This Prospectus has been approved by the *Commission de Surveillance du Secteur Financier* (the "**CSSF**") in its capacity as competent authority under the Prospectus Regulation and the Luxembourg Prospectus Act. The CSSF only approves this Prospectus as meeting the standards of completeness, comprehensibility and consistency imposed by the Prospectus Regulation and the Luxembourg Prospectus Act. Approval by the CSSF should not be considered as an endorsement of the Issuers (as defined below) or the quality of the Notes (as defined below) that are the subject of this Prospectus. In accordance with Article 6 (4) of the Luxembourg Prospectus Act (with regard to the Base Prospectuses) and in accordance with Article 34 (3) of the Luxembourg Prospectus Act (with regard to the Alleviated Base Prospectuses), by approving this Prospectus, the CSSF assumes no responsibility for the economic or financial soundness of the transactions contemplated by this Prospectus or the quality and solvency of any of the Issuers. Investors should make their own assessment as to the suitability of investing in the Notes.

In addition, the Issuers have requested the CSSF to provide (i) the German Federal Financial Supervisory Authority (*Bundesanstalt für Finanzdienstleistungsaufsicht*) in its capacity as competent authority in the Federal Republic of Germany under the Prospectus Regulation, and (ii) The Netherlands Authority for the Financial Markets (*Stichting Autoriteit Financiële Markten*) in its capacity as competent authority in The Netherlands under the Prospectus Regulation with certificates of approval in accordance with Article 25 (1) of the Prospectus Regulation attesting that the Base Prospectuses have been drawn up in accordance with the Prospectus Regulation (each, a "**Notification**"). The

Issuers may request the CSSF to provide competent authorities in additional Member States of the European Economic Area (the "EEA") with similar Notifications.

Application has been made to list notes to be issued under the Programme (the "Notes") on the official list of the Luxembourg Stock Exchange and to admit them to trading on the regulated market "*Bourse de Luxembourg*" of the Luxembourg Stock Exchange or on the professional segment of the regulated market of the Luxembourg Stock Exchange. The regulated market of the Luxembourg Stock Exchange is a regulated market for the purposes of Directive 2014/65/EU of the European Parliament and of the Council of May 15, 2014 on markets in financial instruments and amending Directive 2002/92/EC and Directive 2011/61/EU ("**MiFID II**"). Notes to be issued under the Programme may also be listed on an alternative stock exchange or may not be listed at all. The payments of all amounts due in respect of Notes (other than Notes to be issued by Daimler AG) will be unconditionally and irrevocably guaranteed by Daimler AG.

This Prospectus, any document incorporated by reference in this Prospectus and any supplement hereto will be published in electronic form on the website of the Luxembourg Stock Exchange (www.bourse.lu/programme/Programme-Daimler/2370) and will be viewable on, and obtainable free of charge from, such website. For the avoidance of doubt, any information contained in the aforementioned website (other than the information incorporated by reference in this Prospectus (as described in the section entitled "*Table of Documents Incorporated by Reference*")), does not form part of this Prospectus and has not been scrutinised or approved by the CSSF.

This Prospectus (as supplemented as at the relevant time, if applicable) is valid for a period of twelve months from its Date of Approval in relation to Notes which are to be admitted to trading on a regulated market in the EEA and/or offered to the public in the EEA other than in circumstances where an exemption is available under Article 1(4) and/or Article 3(2) of the Prospectus Regulation (the "Term of the Prospectus"). The obligation to supplement this Prospectus in the event of a significant new factor, material mistake or material inaccuracy shall not apply once this Prospectus is no longer valid. During its time of validity the Issuer shall not be obliged to supplement this Prospectus in case it is not being used in connection with an issue of Notes which shall be admitted to trading on a regulated market in the EEA and/or offered to the public in the EEA in circumstances where no exemption is available under Article 1(4) and/or Article 3(2) of the Prospectus Regulation.

An investment in Notes to be issued under the Programme involves certain risks which should be considered by prospective investors. A discussion of these risks is set out in the section entitled "*Risk Factors*".

Prospectus dated **May 12, 2020**
(the **Date of Approval**)

This Prospectus is valid for a period of twelve months from the Date of Approval.

IMPORTANT NOTICE

The purpose of this Prospectus is to give information with regard to Daimler AG ("**DAG**" or the "**Guarantor**" and, together with its subsidiaries, the "**Daimler Group**", the "**Group**" or "**Daimler**"), Mercedes-Benz Australia/Pacific Pty Ltd (ABN 23 004 411 410) ("**MBAP**"), Daimler International Finance B.V. ("**DIF**"), Daimler Canada Finance Inc. ("**DCFI**"), Daimler Finance North America LLC ("**DFNA**") and Mercedes-Benz Finance Co., Ltd. ("**MBFJ**") (each an "**Issuer**" and together, the "**Issuers**") and the EUR 70,000,000,000 Euro Medium Term Note Programme of the Issuers.

This Prospectus is to be read and construed in conjunction with any supplement hereto and all documents which are incorporated by reference herein (see the section entitled "*Documents Incorporated by Reference*") and, in relation to any Tranches (as defined below) of Notes, together with the relevant Final Terms (as defined below). This Prospectus shall be read and construed on the basis that such documents are incorporated by reference into and form part of this Prospectus.

The binding language of this Prospectus is English (with the exception of the section entitled "*Form of the Guarantee*", whose binding language is German). Each of the sections entitled "*Form of the Final Terms*" and "*Terms and Conditions of the Notes*" is accompanied by a German language translation. The binding language of the Final Terms and the Conditions (as defined below) prepared in relation to Notes to be issued under the Programme may be German or English as set out in the relevant Final Terms and/or the relevant Conditions.

The Dealers (as defined below) have not separately verified the information contained herein. Accordingly, no representation, warranty or undertaking, express or implied, is made and no responsibility is accepted by the Dealers as to the accuracy or completeness of the information contained in, or incorporated by reference into, this Prospectus or any other information provided by the Issuers in connection with the Programme or the Notes to be issued under the Programme. The Dealers accept no liability in relation to the information contained in, or incorporated by reference into, this Prospectus or any other information provided by the Issuers in connection with the Programme or the Notes to be issued under the Programme or their distribution. The statements made in this paragraph are without prejudice to the respective responsibilities of the Issuers and the Guarantor under the Programme.

Neither this Prospectus nor any Final Terms nor any other information supplied in connection with the Programme or any Notes constitutes an offer or an invitation to subscribe for or purchase any Notes or is intended to provide the basis of any credit or other evaluation and should not be considered as a recommendation by either the Issuers, the Guarantor, the Dealers or any of them that any recipient of this Prospectus or any Final Terms or any other information supplied in connection with the Programme or the Notes should subscribe for or purchase any of the Notes. Each investor contemplating subscribing for or purchasing Notes should make its own independent investigation of the financial condition and affairs and its own appraisal of the creditworthiness of the relevant Issuer and the Guarantor and each recipient of this Prospectus or any Final Terms shall be taken to have made its own investigation and appraisal of the condition (financial or otherwise) of the relevant Issuer and the Guarantor.

No person has been authorized by any of the Issuers or the Guarantor to give any information or to make any representations not contained in or not consistent with the information and the representations set out in this Prospectus or any other document entered into in connection with the issue or sale of any Notes under the Programme, and, if given or made, such information or representations must not be relied upon as having been authorized by the Issuers, the Guarantor or the Dealers.

Neither the delivery of this Prospectus nor the offering, sale, issue or delivery of any Notes shall, in any circumstances, imply that the information contained herein is correct at any time subsequent to the date hereof or that any other information supplied in connection with the Programme is correct as of any time subsequent to the date indicated in the document containing the same. The Dealers expressly do not

undertake to review the financial condition or affairs of the Issuers and the Guarantor during the life of the Programme or to advise any investor in the Notes of any information coming to their attention. Investors should review, *inter alia*, the most recently published financial statements of the relevant Issuer and the Guarantor (if applicable) when deciding whether or not to subscribe for or purchase any Notes.

Each Issuer and the Guarantor have undertaken with the Dealers to supplement this Prospectus in accordance with Article 23 of the Prospectus Regulation or publish a new Prospectus in the event that any significant new factor, material mistake or material inaccuracy relating to the information included in this Prospectus which is capable of affecting the assessment of the Notes to be issued under the Programme arises or is noted between the time when this Prospectus is approved and the final closing of any Tranche of Notes offered to the public or, as the case may be, trading of any Tranche of Notes on a regulated market begins, whichever occurs later. Such supplement or new Prospectus will be viewable on, and obtainable free of charge from, the website of the Luxembourg Stock Exchange (www.bourse.lu/programme/Programme-Daimler/2370).

The Notes and the unconditional and irrevocable guarantee (the "Guarantee") given by DAG for the due payment of amounts due on any Notes (issued by any Issuer other than DAG under the Programme) have not been and will not be registered under the United States Securities Act of 1933, as amended (the "Securities Act"). The Notes may be subject to U.S. tax law requirements. The Notes may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act. See the section entitled "*Selling Restrictions*".

This document may not be passed on to any person in the United Kingdom except to investment professionals or other persons in circumstances in which Section 21(1) of the Financial Services and Markets Act 2000 (the "FSMA") does not apply.

The Notes have not been and will not be qualified for sale under the securities laws of Canada or any province or territory thereof and may not be offered or sold, directly or indirectly, in Canada, or to, or for the benefit of, any resident thereof, in contravention of any such laws.

The Notes may not be offered or sold, directly or indirectly, and neither this document nor any other offering material may be distributed or published in any jurisdiction, except under circumstances that will result in compliance with any applicable laws or regulations.

If the relevant Final Terms include a legend entitled "*Prohibition of Sales to Retail Investors in the European Economic Area or in the United Kingdom*", the Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in any member state of the EEA or in the United Kingdom. For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of MiFiD II; (ii) a customer within the meaning of Directive (EU) 2016/97 of the European Parliament and of the Council of January 20, 2016 on insurance distribution, as amended, where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFiD II; or (iii) not a qualified investor as defined in the Prospectus Regulation. If the relevant Final Terms include the above-mentioned legend, no key information document required by Regulation (EU) No. 1286/2014, as amended (the "**PRIIPs Regulation**") for offering or selling the Notes or otherwise making them available to retail investors in the EEA or in the United Kingdom has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA or in the United Kingdom may be unlawful under the PRIIPs Regulation.

If the relevant Final Terms in respect of any Notes specify "*Prohibition of Sales to Retail Investors in the European Economic Area or in the United Kingdom*" as "*Not Applicable*", except to the extent sub-paragraph (ii) below may apply, in relation to each Member State of the EEA and the United Kingdom (each, a "**Relevant State**"), any offer of Notes will be made pursuant to an exemption under the Prospectus Regulation from the requirement to publish a prospectus for offers of Notes. Accordingly any person making

or intending to make an offer in that Relevant State of Notes which are the subject of an offering/placement contemplated in this Prospectus as completed by Final Terms in relation to the offer of those Notes may only do so (i) in circumstances in which no obligation arises for the Issuer or any Dealer to publish a prospectus pursuant to Article 3 of the Prospectus Regulation or supplement a prospectus pursuant to Article 23 of the Prospectus Regulation, in each case, in relation to such offer, or (ii) if a prospectus for such offer has been approved by the competent authority in that Relevant State or, where appropriate, approved in another Relevant State and notified to the competent authority in that Relevant State and (in either case) published, all in accordance with the Prospectus Regulation, provided that any such prospectus has subsequently been completed by Final Terms which specify that offers may be made other than pursuant to Article 1(4) of the Prospectus Regulation in that Relevant State and such offer is made in the period beginning and ending on the dates specified for such purpose in such prospectus or relevant Final Terms, as applicable, and the Issuer has consented in writing to the use of such prospectus for the purpose of such offer.

Except to the extent sub-paragraph (ii) above may apply, neither the Issuers nor the Guarantor nor any Dealer have authorized, nor do they authorize, the making of any offer of Notes in circumstances in which an obligation arises for the Issuers or the Guarantor or any Dealer to publish or supplement a prospectus for such offer.

Each Dealer and/or further financial intermediary subsequently reselling or finally placing Notes to be issued under the Programme may be entitled to use this Prospectus as set out in the section entitled "*Consent to the Use of this Prospectus*".

Tranches of Notes may be rated or unrated. Where a Tranche of Notes is rated, such credit rating and the respective rating agency will be specified in the relevant Final Terms. Any credit ratings assigned to the Notes are not recommendations to purchase, hold or sell the Notes inasmuch as such ratings do not comment as to market price or suitability for a particular investor. There is no assurance that these ratings will remain in effect for any given period of time or that the ratings will not be revised or withdrawn entirely in the future by the respective rating organizations if in their judgment circumstances so warrant.

Any credit ratings assigned to the Notes may not reflect the potential impact of all risks related to structure and other factors on the value of the Notes. In addition, real or anticipated changes in any credit ratings assigned to the Notes will generally affect the market value of the Notes.

Any credit ratings in respect of the Notes or an Issuer are, in respect of an offer or invitation for the issue, sale or purchase of Notes in Australia (including an offer or invitation which is received by a person in Australia), for disclosure or distribution only to a person who is not a "retail client" within the meaning of section 761G of the Corporations Act 2001 of Australia (the "**Corporations Act**") but is a sophisticated investor, professional investor or other investor in respect of whom disclosure is not required under Part 6D.2 or Chapter 7 of the Corporations Act and, in all cases, who is otherwise permitted to receive credit ratings in accordance with applicable law in any jurisdiction in which the person may be located. Anyone who is not such a person is not entitled to receive this Prospectus and anyone who receives this Prospectus must not distribute it to any person who is not entitled to receive it.

Prospective investors should not construe anything in this Prospectus as "financial product" advice for the purposes of Chapter 7 of the Corporations Act.

Product Classification pursuant to Section 309B of the Securities and Futures Act (Chapter 289 of Singapore) (the "SFA"): In connection with Section 309B of the SFA and the Securities and Futures (Capital Markets Products) Regulations 2018 of Singapore (the "**CMP Regulations**"), each Issuer has determined and hereby notifies all relevant persons (as defined in Section 309(A)(1) of the SFA), that the Notes are "prescribed capital markets products" (as defined in the CMP Regulations) and Excluded Investment Products (as defined in MAS Notice SFA 04-N12: Notice on the Sale of Investment Products and MAS Notice FAA-N16: Notice on Recommendations on Investment Products).

Where Notes (other than Fixed Rate Notes which bear an interest rate of zero per cent.) are issued by (a) MBFJ or (b) DAG, MBAP, DIF or DCFI, in circumstances where any interest on the Notes is attributable to a business conducted by such Issuer of the Notes through its permanent establishment in Japan in the manner provided for in the Special Taxation Measures Law of Japan, interest payments on the Notes will generally be subject to Japanese withholding tax, unless the Holder establishes that the Notes are held by or for the account of (i) a Holder that is not an individual resident of Japan or a Japanese corporation for Japanese tax purposes and that is not a person having a special relationship with the Issuer as described in article 6, paragraph 4 of the Special Taxation Measures Law of Japan ("**Specially-related Person of the Issuer**"), (ii) a designated Japanese financial institution described in article 6, paragraph 9 of the Special Taxation Measures Law of Japan which complies with the requirement for tax exemption under that paragraph or (iii) a public corporation, a financial institution, a financial instruments business operator or certain other entity which has complied with the requirement for tax exemption under Article 3-3, Paragraph 6 of the Special Taxation Measures Law of Japan which has received such payments through a Japanese payment handling agent as provided in Article 3-3, Paragraph 6 of the Special Taxation Measures Law of Japan.

Interest payments on such Notes to an individual resident of Japan or a Japanese corporation (except for the designated Japanese financial institution and the public corporation, the financial institution, the financial instruments business operator and certain other entity described in the preceding paragraph) or to an individual non-resident of Japan or a non-Japanese corporation that is a Specially-related Person of the Issuer will be subject to deduction in respect of Japanese income tax at a rate of 15 per cent. (from, and including, January 1, 2013 to, and including, December 31, 2037, at a rate of 15.315 per cent.) of the amount of such interest.

The relevant Final Terms may include a legend entitled "*MiFID II Product Governance*" which will outline the target market assessment in respect of the Notes and which channels for distribution of the Notes are appropriate. Any person subsequently offering, selling or recommending the Notes (a "**Distributor**") should take into consideration the target market assessment; however, a Distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the target market assessment) and determining appropriate distribution channels.

A determination will be made in relation to each issue about whether, for the purpose of the Product Governance Rules under EU Delegated Directive 2017/593 (the "**MiFID Product Governance Rules**"), any Dealer subscribing for any Notes is a manufacturer in respect of such Notes, but otherwise neither the relevant Issuer, the Guarantor, the Arranger, any of the Dealers nor any of their respective affiliates will be a manufacturer for the purpose of the MiFID Product Governance Rules.

Interest amounts payable on Notes with a fluctuating rate of interest ("**Floating Rate Notes**") will be calculated by reference to a specific benchmark which will be provided by an administrator.

As at the date of this Prospectus, the specific benchmark applicable to an issue of Floating Rate Notes has not yet been determined. However, amounts payable under Floating Rate Notes may be calculated by reference to (i) BBSW (Bank Bill Swap Rate) which is administered by ASX Benchmarks Pty Limited ("**ASX Benchmarks**"), (ii) CDOR (Canadian Dollar Offered Rate) which is provided by Refinitiv Benchmark Services (UK) Limited ("**RBSL**"), (iii) EURIBOR (Euro Interbank Offered Rate) which is provided by the European Money Markets Institute ("**EMMI**"), (iv) LIBOR (London Interbank Offered Rate) which is provided by the ICE Benchmark Administration Limited ("**IBA**"), (v) SIBOR (Singapore Interbank Offered Rate) which is provided by ABS Benchmarks Administration Co Pte Ltd ("**ABS Co.**"), (vi) STIBOR (Stockholm Interbank Offered Rate) which is provided by the Swedish Bankers' Association ("**SBA**"), or (vii) another benchmark. As at the date of this Prospectus, only IBA, EMMI and RBSL appear on the register (the "**ESMA Register**") of administrators and benchmarks established and maintained by the European Securities and Markets Authority (the "**ESMA**") pursuant to Article 36 of the Regulation (EU) 2016/1011 of the European Parliament and of the Council of June 8, 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds and amending

Directives 2008/48/EC and 2014/17/EU and Regulation (EU) No 596/2014 (the "**Benchmarks Regulation**"). As at the date of this Prospectus, neither ASX Benchmarks nor ABS Co. or SBA appear in the ESMA Register. As far as the Issuers are aware, the transitional provisions in Article 51 of the Benchmarks Regulation apply, so that neither ASX Benchmarks nor ABS Co. or SBA are currently required to obtain authorisation or registration (or, if located outside the European Union, recognition, endorsement or equivalence).

The Final Terms will specify the name of the specific benchmark and the relevant administrator. In such case the Final Terms will further specify if the relevant administrator is included in the ESMA Register or whether the transitional provisions in Article 51 of the Benchmarks Regulation apply.

IN CONNECTION WITH THE ISSUE OF ANY TRANCHE OF NOTES, THE DEALER OR DEALERS (IF ANY) NAMED AS THE STABILISATION MANAGER(S) IN THE APPLICABLE FINAL TERMS (OR PERSONS ACTING ON BEHALF OF ANY STABILISATION MANAGER(S)) MAY OVER-ALLOT NOTES OR EFFECT TRANSACTIONS (IN EACH CASE OUTSIDE AUSTRALIA AND NOT ON A FINANCIAL MARKET OPERATED IN AUSTRALIA) WITH A VIEW TO SUPPORTING THE MARKET PRICE OF THE NOTES AT A LEVEL HIGHER THAN THAT WHICH MIGHT OTHERWISE PREVAIL. HOWEVER, STABILISATION MAY NOT NECESSARILY OCCUR. ANY STABILISATION ACTION MAY BEGIN ON OR AFTER THE DATE ON WHICH ADEQUATE PUBLIC DISCLOSURE OF THE TERMS OF THE OFFER OF THE RELEVANT TRANCHE OF NOTES IS MADE AND, IF BEGUN, MAY CEASE AT ANY TIME, BUT IT MUST END NO LATER THAN THE EARLIER OF 30 DAYS AFTER THE ISSUE DATE OF THE RELEVANT TRANCHE OF NOTES AND 60 DAYS AFTER THE DATE OF THE ALLOTMENT OF THE RELEVANT TRANCHE OF NOTES. ANY STABILISATION ACTION OR OVER-ALLOTMENT MUST BE CONDUCTED BY THE RELEVANT STABILISATION MANAGER(S) (OR PERSONS ACTING ON BEHALF OF ANY STABILISATION MANAGER(S)) IN ACCORDANCE WITH ALL APPLICABLE LAWS AND RULES.

This Prospectus contains certain forward-looking statements. Forward-looking statements are statements that do not relate to historical facts and events. GENERAL DESCRIPTION OF THE PROGRAMME

Under the Programme, the Issuers may from time to time issue Notes with a fixed rate of interest (the "**Fixed Rate Notes**") or with a floating rate of interest (the "**Floating Rate Notes**") and denominated in any currency agreed between the relevant Issuer and the relevant Dealer(s).

The maximum aggregate nominal amount of all Notes from time to time outstanding under the Programme will not exceed EUR 70,000,000,000 (or its equivalent in other currencies), subject to any increase in accordance with the terms of the dealer agreement dated May 12, 2020 (the "**Dealer Agreement**").

The Notes may be issued on a continuing basis to one or more of the Dealers specified on the cover page of this Prospectus and any additional Dealer appointed under the Programme from time to time by the Issuers, which appointment may be for a specific issue or on an ongoing basis (each a "**Dealer**" and, together, the "**Dealers**"). References in this Prospectus to the "**relevant Dealer**" shall, in the case of an issue of Notes being (or intended to be) subscribed by more than one Dealer, be to all Dealers agreeing to subscribe such Notes.

The Issuer and the relevant Dealer will agree on the terms and conditions (the "**Conditions**") applicable to each tranche of Notes (the "**Tranche**"). The Conditions will be set out in a document specific to such Tranche referred to as final terms (the "**Final Terms**"). Copies of Final Terms prepared in connection with the issue and admission to trading on a regulated market or public offer of Notes will be viewable on, and obtainable free of charge from, the website of the Luxembourg Stock Exchange (www.bourse.lu/programme/Programme-Daimler/2370).

Notes will be issued in series (each a "**Series**"). Each Series of Notes may comprise one or more Tranches issued on different dates. The Notes of each Series will all be subject to identical terms whether as to currency, interest (if any), maturity or otherwise, or terms which are identical except that the issue price, issue date, the first interest payment date (if any) and/or the amount of the first payment of interest (if any) may be different. The Notes of each Tranche will all be subject to identical terms in all respects.

The Notes may be distributed by way of offers to the public or private placements and, in each case, on a syndicated or non-syndicated basis. The method of distribution of each Tranche will be set out in the Final Terms applicable to such Tranche. The Notes may be offered to qualified and/or non-qualified investors.

The Notes will be issued in such denominations as may be agreed between the relevant Issuer and the relevant Dealer, save that the minimum denomination of any Notes will be, (i) in the case of Notes to be issued by DAG, MBAP, DIF, DCFI or DFNA and admitted to trading on the regulated market of a stock exchange located in a Member State of the EEA or publicly offered in a Member State of the EEA, Euro 1,000 or its foreign currency equivalent on the relevant date of issue, (ii) in the case of Notes to be issued by MBFJ and admitted to trading on the regulated market of a stock exchange located in a Member State of the EEA or publicly offered (which offer shall be an offer which is exempt from the obligation to publish a prospectus pursuant to the Prospectus Regulation) in a Member State of the EEA, Euro 100,000 or its foreign currency equivalent on the relevant date of issue, and (iii) such amount as may be allowed or required from time to time by the relevant central bank (or equivalent body) or any laws or regulations applicable to the relevant specified currency. In the following, Notes with a minimum denomination of at least Euro 100,000 or its foreign currency equivalent will be referred to as "**Wholesale Notes**".

Where Notes have a maturity of less than one year and either (a) the issue proceeds are received by the relevant Issuer in the United Kingdom or (b) the activity of issuing the Notes is carried on from an establishment maintained by the relevant Issuer in the United Kingdom, such Notes must: (i) have a minimum denomination of at least £100,000 or its foreign currency equivalent and be issued only to persons whose ordinary activities involve them in acquiring, holding, managing or disposing of investments (as principal or agent) for the purposes of their businesses or who it is reasonable to expect will acquire, hold,

manage or dispose of investments (as principal or agent) for the purposes of their businesses where the issue of the Notes would otherwise constitute a contravention of Section 19 of the FSMA by the relevant Issuer; or (ii) be issued in other circumstances which do not constitute a contravention of Section 19 of the FSMA by the relevant Issuer or the Guarantor.

Certain selling restrictions set out in the section entitled "*Selling Restrictions*" apply to the Notes. Other than that, the Notes will be freely transferable.

Notes may be issued at an issue price which is at par or at a discount to, or premium over, par (as specified in the relevant Final Terms). The issue price for Notes to be issued will be determined at the time of pricing on the basis of a yield which will be determined on the basis of the orders of the investors which are received by the relevant Dealers during the offer period of the Notes. Orders will specify a minimum yield or spread level and may only be confirmed at or above such yield or level. The resulting yield will be used to determine an issue price corresponding to the yield.

The yield for Fixed Rate Notes will be set out in the relevant Final Terms and will be calculated pursuant to the ICMA method, which determines the effective interest rate of notes by taking into account accrued interest on a daily basis.

Notes will be accepted for clearing through one or more Clearing Systems as specified in the relevant Final Terms. These systems may comprise those operated by Euroclear Bank SA/NV (1 Boulevard du Roi Albert II, 1210 Brussels, Belgium) ("**Euroclear**") and Clearstream Banking S.A., Luxembourg (42, Avenue J. F. Kennedy, L-1855 Luxembourg) ("**CBL**") or Clearstream Banking AG (Mergenthalerallee 61, 65760 Eschborn, Germany) ("**CBF**") or any other relevant Clearing System (as specified in the relevant Final Terms). The appropriate codes for each Tranche allocated by Euroclear, CBL and/or CBF will be contained in the relevant Final Terms.

Citibank, N.A, London Branch will act as Issuing and Principal Paying Agent and BNP Paribas Securities Services, Luxembourg Branch will act as Luxembourg Listing Agent.

The risk factors set out in the section entitled "*Risk Factors*" are limited to the description of risks which are (i) specific to DAG, MBAP, DIF, DCFI, DFNA and MBFJ as Issuers and Guarantor, as the case may be, as well as the Notes, and (ii) material for making an informed investment decision. They are presented in a limited number of categories depending on their nature. In each category the most material risk factor is mentioned first.

Where required by Article 7 of the Prospectus Regulation, a summary (the "**Issue-Specific Summary**") will be prepared in connection with an issue of Notes under this Prospectus. Such Issue-Specific Summary will be annexed to the Final Terms prepared in connection with such Notes.

RISK FACTORS

In purchasing the Notes, investors assume the risk that the Issuer or the Guarantor may become insolvent or otherwise be unable to make payments due in respect of the Notes or (in the case of DAG) the Guarantee. There is a wide range of factors which individually or together could result in the Issuer or the Guarantor becoming unable to make payments due in respect of the Notes or (in the case of DAG) the Guarantee. The Issuers and the Guarantor may not be aware of all relevant factors and certain factors which the Issuer and the Guarantor may currently deem not to be material may become material over time and could likewise impair the business operations of the Issuers and the Guarantor and have a material adverse effect on their business, cash flows, results of operations and their financial condition.

The Issuers and the Guarantor have identified in the following subsection entitled "*Risk Factors Relating to DAG, MBAP, DIF, DCFI, DFNA and MBFJ*" a number of factors which could materially adversely affect their business, net assets, financial condition and results of operations as well as their ability to make payments due under any Notes or (in the case of DAG) the Guarantee.

In addition, certain factors which are material for the purpose of assessing the market risks associated with Notes to be issued under the Programme and risks relating to the structure of Notes to be issued under the Programme are also described below in the subsection entitled "*Risks Relating to the Notes*".

Prospective investors should consider these risk factors before deciding to purchase Notes to be issued under the Programme. In addition, prospective investors should be aware that the risks described below may combine and thus intensify one another.

Prospective investors should consider all information provided in this Prospectus and should consult with their own professional advisers (including their financial, accounting, legal and tax advisers) prior to making any investment decision.

Risk Factors Relating to DAG, MBAP, DIF, DCFI, DFNA and MBFJ

MBAP, DIF, DCFI, DFNA and MBFJ are direct or indirect subsidiaries of DAG. All Notes to be issued by MBAP, DIF, DCFI, DFNA or MBFJ are unconditionally and irrevocably guaranteed by DAG in respect of principal and interest payments. Accordingly, MBAP, DIF, DCFI, DFNA and MBFJ are affected, substantially, by the same risks as those that affect the business and operations of DAG and/or its consolidated subsidiaries. Therefore, references in this section to DAG and/or its consolidated subsidiaries and/or Daimler Group shall include references to the Issuer (if applicable).

DAG is subject to various risks resulting from changing economic, political, social, industry, business and financial conditions. The principal risks which could affect DAG's business, financial condition, profitability, cash flows, results of operations and future business results are described below. DAG's overall risk situation is the sum of the individual risks of all risk categories for the divisions, the corporate functions and legal entities. In general, the reporting of risks takes place in relation to the individual segments. If no segment is explicitly mentioned, the risks described relate to all divisions.

In addition, risks that are not yet known or assessed as not material can influence profitability, cash flows and financial position.

As a matter of the nature of Daimler Group's business it is exposed to the following risks, which are presented in the categories below depending on their nature with the most material risk factor mentioned first in each category:

- 1. Risks Relating to the Economy and the Daimler Group's Markets,**
- 2. Risks Relating to the Daimler Group and its Business,**
- 3. Financial Risks,**
- 4. Legal and Tax Risks,**
- 5. Risks Relating to Stakeholders' Perception and Reputation of the Daimler Group, and**
- 6. Other Risks.**

1. Risks Relating to the Economy and the Daimler Group's Markets

Daimler Group is subject to various economic and market-related risks. Should any of the following risks materialize, this could have material adverse effects on the Daimler Group's business, net assets, financial condition and results of operations.

Economic risks constitute the framework for the risks listed in the following categories. Overall economic conditions have a significant influence on vehicle sales markets and thus on the Group's success.

Economic risks are also linked to assumptions and forecasts concerning general developments.

Risks Resulting from the Outbreak of the COVID-19 Pandemic

The outbreak of the coronavirus has resulted in significant reductions in economic growth worldwide. Due to the worsening situation of the COVID-19 pandemic. The Daimler Group decided on March 17, 2020 to suspend the majority of its production in Europe, as well as work in selected administrative departments. The suspension applied to Daimler's car, van and commercial vehicle plants in Europe. Later on, the suspension was extended to the respective plants in the U.S., Latin America, Africa and India. The Board of Management and the general works council (*Gesamtbetriebsrat*) of DAG decided to apply for short-time working (*Kurzarbeit*) for a majority of its production and selected administrative departments in Germany as of April 6, 2020.

After the world economy slipped into recession in the first quarter of the year 2020, its development will continue to be dominated by the COVID-19 pandemic for the time being. The decisive factors will be when the pandemic will be under control worldwide, how long economic activity is reduced until then, and which pattern of recovery will occur afterwards. A significant decline in global economic output must be anticipated at least for the year 2020 as a whole.

It is to be expected that China, the first of the major economies to suffer a massive slump, will achieve only slight growth this year, instead of the originally expected 5 to 6%. For the economy of the European Monetary Union ("EMU"), a deep recession must be expected due to the restrictive measures taken to combat the COVID-19 pandemic. Expectations are that none of the larger individual economies of the EMU will be able to escape this fall in gross domestic product ("GDP"). The decline in economic output is likely to be especially pronounced in countries very severely affected by the pandemic, such as Italy and Spain. Due to its high dependence on private consumption, the US economy is also expected to suffer a significant GDP decline.

The economies of major emerging nations are also likely to be very weak due to the impact of the COVID-19 pandemic. For major commodity exporters such as Russia and Brazil, a very low oil price would have an

additional negative effect. A decline in economic output is expected in both Eastern Europe and South America.

Worldwide demand for cars is likely to be severely affected by the COVID-19 pandemic in most of the sales regions important for Daimler. Daimler anticipates a significant decrease in the global car market. In the context of increasing macroeconomic challenges and uncertainties, primarily due to the COVID-19 pandemic, Daimler anticipates weaker or negative growth rates for demand for vans in several markets and regions. According to current assessments, major truck sales markets will develop very unfavorably as a result of the COVID-19 pandemic. For buses, Daimler expects market volumes in both the EU30 region (European Union, United Kingdom, Switzerland and Norway) and Brazil to be significantly lower than in 2019.

The conditions are currently largely determined by the COVID-19 pandemic. Therefore, an unusually high level of uncertainty exists concerning the further development of Daimler's business, which has a significant impact on Daimler's forecasting ability. It is not possible to estimate what further course the pandemic will take in Daimler's important sales markets. This will also depend on the extent and duration of the measures taken to contain the wave of infection and the resulting economic burdens. However, Daimler assumes that it will not be able to offset the shortfalls that have already occurred during the further course of the year 2020.

The entire global economy is affected by the COVID-19 pandemic, with declines, in some cases drastic, in economic output. This includes domestic demand, foreign trade and private consumption, as well as companies' investment activities. Not only the industrial sector is affected, which is already dependent on economic cycles, but also and above all the services sector.

A possibly even more serious development of the COVID-19 pandemic, especially if the restrictive measures remain in force significantly longer and are stricter than expected or in the event of a second massive worldwide wave of infections, would on the one hand result in an even deeper slump for the global economy. On the other hand, these scenarios would not only affect the development of the Group's unit sales but could also have a more significant impact than initially assumed on production, the procurement market and the supply chain.

Risks Resulting from Trade Conflicts

The trade conflict between the United States and China continues to be a significant risk for the further development of the world economy. Furthermore, the threat by the United States to impose additional tariffs on imported vehicles and parts, including from the European Union, still exists. These two factors could significantly affect the development of unit sales and earnings, especially at Mercedes-Benz Cars & Vans. In addition, there is a danger that countries will implement increasingly protectionist measures such as specific market-access barriers or industry-political concepts. This would have significant impacts on the global value chains at Mercedes-Benz Cars & Vans and Daimler Trucks and Buses, leading to higher costs and adversely affecting business developments and sales possibilities.

Risks Resulting from a Slowdown in Investment Activity and from a Slowdown or Decline of Economic Growth

Even without a further escalation of the various trade conflicts, the ongoing uncertainty could ensure that the global investment cycle weakens even more than previously assumed. A further slowdown in investment activity – particularly in North America and Europe – would adversely affect the unit sales of heavy-duty commercial vehicles in particular and would therefore have a particularly negative impact on the unit sales and profitability of Daimler Trucks & Buses.

If the recession, which has so far been limited to the industrial sector, spreads more to the service sector and spreads even more than before to the United States, in addition to the euro zone and China, this would have

noticeable effects on employment and wages in those regions. This would have a significant impact on consumer confidence and consumption, one of the most important drivers of the current economic expansion. The resulting lower growth or even decline in overall economic consumption would have a correspondingly negative impact on the sales prospects of Mercedes-Benz Cars & Vans in particular.

Risks Resulting from the United Kingdom's Withdrawal from the European Union

The European market will continue to be of great importance for all segments of the Daimler Group in the future, so changes in investment and consumer behavior will affect the development of unit sales in all segments. The risk of a disorderly withdrawal of the United Kingdom from the European Union due to the Brexit of January 31, 2020 and the related exit agreement no longer exists. However, uncertainty is now likely to shift to the negotiations on a future agreement between the UK and the EU, which according to the transitional agreement would have to be concluded by the end of 2020 in order to prevent customs duties as of January 2021. These negotiations are likely to be very difficult and connected with a high degree of political uncertainty. In extreme cases, renewed distortions in the European financial markets and corresponding decreases in economic growth are to be expected. This would significantly impact growth above all in the United Kingdom, with an adverse effect on the development of the Group's unit sales across all segments. In the euro zone, the risk of political conflicts also remains increased. Phases of political uncertainty could have a negative impact on consumption and investment decisions by households and companies.

Risks Resulting from the Presidential Elections in the United States

In the United States, political uncertainty in the run-up to the presidential elections and ongoing trade tensions could lead to a more pronounced reduction in corporate investment than previously assumed. This would have a particularly negative effect on the unit sales of the Daimler Trucks & Buses segment. The overall economic growth slowdown was to be more pronounced than previously expected, consumption by private households would also suffer significantly due to negative employment and income effects. This in turn could have a negative impact on the unit sales of Mercedes-Benz Cars & Vans.

Risks Resulting from High Levels of Public and Private Debt

In general, public and private debt remains high in many economies. In the event of a more pronounced economic downturn, this could limit the scope for governments to take fiscal countermeasures or lead to increased defaults by companies and households. This would lead to increased instability in the financial markets and also adversely affect overall economic demand, with negative effects on the unit sales of the Daimler Group's segments.

From an economic perspective, the high indebtedness of Chinese companies, especially state-owned enterprises, also represents a considerable risk. If the government's efforts to restrict credit growth in combination with the negative impact of US tariffs on imports from China lead to a more significant growth slowdown than currently expected, this could result in an excessive increase in credit defaults, which would then lead to turbulences in the banking sector and the financial markets. In particular, at the Mercedes-Benz Cars & Vans segment, for which China is now one of the biggest sales markets, the aforementioned risks could result in significant negative effects on unit sales.

Another risk is that the pressure on the emerging markets could intensify further if underlying sentiment in the financial markets deteriorates significantly. In such a case, even more capital would flow out of the emerging markets. Growth in the emerging markets would then be significantly weaker and put pressure on global growth. Furthermore, changes in central-bank policy in the developed and emerging markets to support economic development (such as currency devaluation) entail a high risk. Although the risk of a debt crisis in the emerging markets – triggered by US interest-rate rises and the resulting higher interest burden due to the predominance of US dollar debt – has recently been reduced by the US Federal Reserve's shift to a

looser monetary policy, it has not been fully resolved. Possible crises in individual countries would have a noticeable negative impact on sales prospects in those markets and possibly also on conditions for the Group's local operations.

Risks Resulting from Oil Prices

Although oil prices fell significantly last year, if political crises – especially in the Middle East – and ensuing temporary supply bottlenecks lead to a significant rise in oil prices that OPEC countries are unable to offset in the short term, inflation could rise significantly and adversely affect global growth. A sustained very low oil price would put additional pressure on oil-exporting economies. This could have negative effects on unit sales for all Daimler segments in those countries. Moreover, an escalation of geopolitical conflicts in other regions of the world could also significantly slow down global economic growth.

General Market Risks

The risks for the economic development of automotive markets are strongly affected by the cyclical situation of the global economy as described above. The assessment of market risks is linked to assumptions and forecasts about the overall development of markets in the regions in which the Daimler Group is active. The possibility of markets developing worse than assumed in the planning, or of changing market conditions, generally exists for all segments of the Daimler Group. Potential effects of the risks on the development of unit sales are included in risk scenarios. Increasing customer demand for model series with lower profit margins can have a negative impact on the earnings of the segments concerned. Causes of declining vehicle sales may result in particular from the partially unstable economic environment and in the context of political or economic uncertainties. A rising oil price and volatile exchange rates can also lead to market uncertainty and thus to falling demand. Differences between the segments exist due to the partly varying regional focus of their activities.

Due to the partly difficult financial situation of some dealerships and vehicle importers, support actions might become necessary to ensure the performance of the business partners. Further risks result from the dependency on certain dealerships, so in certain circumstances, relationships with new business partners may have to be developed. The loss of important dealerships and vehicle importers can lead to customer demand not being fully served and lower unit sales. Risks of this kind exist for dealerships and vehicle importers of Mercedes-Benz Cars & Vans and Daimler Trucks & Buses.

The launch of new products by competitors, more aggressive pricing policies and poorer price enforcement in the aftersales business can lead to increasing competitive and price pressure in the automotive segments.

Location and Country-specific Risks

In conducting business around the world, Daimler is subject to risks that are inherent in operating in other countries and is therefore exposed to material location and country-specific risks.

In general, business operations in emerging markets involve a greater risk resulting from economic and political systems that typically are less developed, and likely to be less stable, than those of more advanced countries. Daimler is therefore exposed to a number of factors, over which the Group has little to no control and which may adversely affect the Group's business activities. These factors include, but are not limited to, the following: political, social, economic, financial or market-related instability or volatility; foreign currency control regulations and other regulations or the negative impacts related to foreign exchange rate volatility; restrictions on capital transfers; absence of independent and experienced judiciary and inability to enforce contracts; reimbursement rates and services covered by government reimbursement programs; trade restrictions and restrictions on repatriation of earnings.

The realization of any of these risks could have a material adverse effect on Daimler's business, cash flows, financial condition and results of operations.

Procurement Market Risks

Procurement market risks arise for the automotive divisions in particular from fluctuations in prices of raw materials and energy. There are also risks of financial bottlenecks of suppliers, and of capacity bottlenecks caused by supplier delivery failures or by insufficient utilization of production capacities at suppliers. Potential claims from suppliers due to the premature termination of development and production agreements by the Daimler Group may also lead to decreased earnings.

The automotive segments of the Daimler Group require certain raw materials for the manufacture of vehicle components and vehicles, which are purchased on the world market. The level of costs depends on the price development of raw materials. Due to largely unchanged macroeconomic conditions, price fluctuations are expected with uncertain and inconsistent trends. For example, raw-material markets can be impacted by political crises and uncertainties – combined with possible supply bottlenecks – as well as volatile demand for specific raw materials. Potential tariff increases for certain raw materials as a result of increasing protectionist tendencies worldwide can have a negative impact on price developments. In general, the ability to pass on the higher costs of commodities and other materials in form of higher prices for manufactured vehicles is limited because of strong competitive pressure in the international automotive markets. Rising raw-material prices may therefore have a negative impact on the margins on the vehicles sold and thus lead to lower earnings in the respective segment.

The financial situation of some suppliers remains tense due to the gloomy market environment. The resulting possible production losses at suppliers may cause an interruption in the supply chain of the Daimler Group's automotive segments and prevent vehicles from being completed and delivered to customers on time.

Due to the planned electrification of new model series and a shift in customer demand from diesel to gasoline engines, Mercedes-Benz Cars & Vans in particular is faced with the risk that Daimler will require changed volumes of components from suppliers. This could result in over- or under-utilization of production capacities for certain suppliers. If suppliers cannot cover their fixed costs, there is the risk that they may demand compensation payments. Necessary capacity expansion at suppliers' plants could also require cost-effective participation.

Risks Resulting from the General Legal and Political Framework

The automotive industry is subject to extensive governmental regulation worldwide. Risks from the legal and political framework have a considerable impact on Daimler's future business success. Regulations concerning vehicles' emissions, fuel consumption, safety and certification, as well as tariff aspects, play a particularly important role. Complying with these varied and often diverging regulations all over the world requires strenuous efforts on the part of the automotive industry. In the future, Daimler expects to spend an even larger proportion of its research and development budget to ensure compliance with these regulations.

Many countries and regions have already implemented stricter regulations to reduce vehicles' emissions and fuel consumption or are currently preparing such laws. They relate for example to the environmental impact of vehicles, including emission levels, fuel economy and noise, as well as pollutants from the emissions caused by the production facilities. Non-compliance with regulations applicable in the various regions might result in significant penalties and reputational risks and might even mean that vehicles could not or could no longer be registered in the relevant markets. In addition, the risk exists that vehicles already in the markets will have to be rectified. The cost of compliance with these regulations is significant, especially for conventional engines, and Daimler expects a further increase in costs in this context.

Mercedes-Benz Cars & Vans faces risks with respect to regulations on mandatory targets for the average fleet fuel consumption and CO₂ emissions of new vehicles. Especially in the markets of China, Europe and the United States Daimler gives these targets due consideration in its product planning. The increasingly ambitious targets require significant proportions of actual unit sales of plug-in hybrids or cars with other types of electric drive. The ambitious statutory requirements will be difficult to fulfill in some countries. The market success of these drive systems is greatly influenced not only by customer acceptance but also by regional market conditions, like for example the battery-charging infrastructure and state support.

As the negative headlines on diesel engines and the implementation of driving bans on diesel vehicles unsettle customers, this can result in lasting shifts in the drive-system portfolio (fewer diesel and more gasoline engines). This would require additional cost-intensive development and production measures in order to meet the CO₂ fleet limits applicable as of 2020.

The EU Commission is still revising, and amending or supplementing, the framework conditions for the WLTP (Worldwide Harmonized Light Vehicles Test Procedure) measurement method, which has been applicable since September 2018. This may result in increased and additional WLTP testing and documentation costs.

Due to a procedural error in the legislation, the Court of the European Union has at first instance annulled parts of the RDE (Real Driving Emissions) legislation and has given the legislators 12 months from the date of the decision on the appeal to amend the contested parts of the regulation. If the appeal against the ruling is unsuccessful, the new regulation could pose significant risks to the eligibility of vehicles for registration, also of the Daimler Group. In the worst case, the new vehicles concerned, also of the Daimler Group, would no longer be allowed to be registered and operated throughout the EU.

Strict regulations for the reduction of vehicles' emissions and fuel consumption also create potential risks for Daimler Trucks & Buses, because it will be difficult to fulfill the statutory requirements in some countries. Above all this applies to the markets of Japan, the United States, China and Europe. The European Commission has developed a method for determining the CO₂ emissions of heavy commercial vehicles, named VECTO (Vehicle Energy Consumption Calculation Tool), the application of which has been mandatory for the most important vehicle categories since January 1, 2019. The prescribed level of CO₂ reduction in Europe of 15% by 2025 and 30% by 2030, in each case compared to the new-vehicle fleet in the period of July 2019 to June 2020, cannot be achieved with conventional technology alone. Daimler Trucks & Buses will therefore have to apply the latest technologies in order to fulfill these requirements. Achieving the 2025 target will require significant shares of battery-electric trucks or other electrified drive systems in the actual market, which may only be achievable at higher costs.

The position of the Daimler Group in key foreign markets could also be affected by an increase in or changes in free-trade agreements. If free-trade agreements are concluded without the participation of countries in which Daimler has production facilities, this could result in a competitive disadvantage for Daimler compared with competitors that produce in those countries that participate in the free-trade agreements. In addition, if the content of the free-trade agreements currently used by Daimler is made significantly stricter, this could also significantly impair the position of the Daimler Group, as the Group could no longer benefit from those free trade agreements.

The danger exists that individual countries will attempt to defend and improve their competitiveness in the world's markets by resorting to interventionist and protectionist measures. Furthermore, interruptions in the supply chain due to potential trade conflicts cannot be ruled out. This can lead to increased costs if production facilities have to be established or expanded or local purchasing has to be increased. In addition, attempts are being made to limit growth in imports through barriers to market access such as by making certification processes more difficult, delaying certification and imposing other complicated customs procedures. These measures generally exacerbate uncertainties in the planning process; they can also lead to lower unit sales if importing is made more difficult.

In addition to the described emission and fuel-consumption regulations, traffic-policy restrictions for the reduction of traffic jams, noise and emissions are becoming increasingly important in cities and urban areas worldwide. This development can have a dampening effect on the development of unit sales, especially in growth markets. Pressure to reduce personal transport is increasingly being applied in European cities through discussions of bans on vehicles entering or driving in inner cities, especially those with diesel engines. These developments may dampen the development of unit sales, especially in the growth markets. In European cities, discussions about driving bans are increasingly intensifying the pressure to reduce individual transport, especially for vehicles with diesel engines. The great challenge of the coming years will be to offer an appropriate range of drive systems and the right product portfolio in each market.

2. Risks Related to the Daimler Group and its Business

Daimler Group is subject to various company-specific and business-related risks. Should any of the following risks materialize, this could have material adverse effects on the Daimler Group's business, net assets, financial condition and results of operations.

Industry and Business Risks

Under the industry and business conditions, which are currently largely determined by the COVID-19 pandemic, an unusually high level of uncertainty exists concerning the further development of the business of the Daimler Group, so Daimler cannot assess the reporting figures it forecasts for the rest of the year 2020 in the usual level of detail and to the usual extent, which significantly impairs the risk assessment of Daimler Group and its segments. It is not possible to estimate at this time what further course the pandemic will take in Daimler's important sales and procurement markets. The macroeconomic effects of the COVID-19 pandemic are meanwhile being felt in most of the sales markets relevant to Daimler.

Production and Technology Risks

Key success factors for achieving the desired level of prices for the products of the Daimler Group – and hence for the achievement of corporate targets – are brand image, design and quality, and thus the acceptance of products by customers, as well as technical features based on innovative research and development. Convincing solutions, which for example support accident-free driving or further improve the products' fuel consumption and emissions, such as hybrid or electric vehicles, are of key importance for safe and sustainable mobility. Innovations and technology opportunities for the progressive and future-oriented design of the product range flow into the strategic product planning of the automotive divisions. However, due to increasing technical complexity, the continually rising extent of requirements in terms of emissions, fuel consumption and safety, as well as meeting and steadily raising the Daimler Group's quality standards, product launches and manufacturing in the automotive divisions are also subject to production and technology risks.

In the context of product launches, the required parts and equipment components have to be available. To avoid restrictions in this context, the related processes are continuously evaluated and improved. In order to secure and enhance the long-term future viability of production facilities, modernization, expansion, construction and restructuring measures are carried out as required. The execution of modernization activities and the launch of new products are generally connected with high investments. For example, delays in the ramp-up phase of an innovation or during a product's lifecycle can lead to inefficiencies in the production process and as a consequence to a temporary reduction in production volumes. Late design changes in the development process, for example in connection with new regulatory requirements, as well as quality or availability problems of supplied vehicle components can have a negative impact on production ramp-ups. Furthermore, the planned increase in battery production due to the increasing electrification of the vehicle fleet means that initial problems during the production of the various battery types and possible technical limitations on battery lifecycles cannot be ruled out. Affected are those automotive segments which are currently launching a new product or have planned a related production ramp-up.

In principle, there is a danger that reduced plant availability, or the failure of production equipment or production plants may cause internal bottlenecks that would consequently generate costs. These risks mainly exist for Mercedes-Benz Cars & Vans. The production equipment is continuously maintained and modernized.

Capacity restrictions in the production of batteries, interruptions in the supply chain and possible interruptions in supply by energy providers can lead to bottlenecks, especially at Mercedes-Benz Cars & Vans. Restrictions on certain equipment components in new vehicle models and the lack of availability of vehicle parts at the right time also mean that vehicles cannot be handed over to customers as planned. The lack of availability and quality problems with certain vehicle parts can lead to production downtimes and cause costs.

Warranty and goodwill cases could arise in the Daimler Group if the quality of the products does not meet the requirements, regulations are not fully complied with, or support cannot be provided in the required form in connection with product problems and product care. Quality problems both with components in vehicles from external suppliers and in connection with technical innovations in vehicles may require adjustments that can lead to considerable expenses.

Information Technology Risks

The high penetration of information technology (IT) in all segments of the Group also brings risks for their business and production processes, as well as for their services and products.

The ever-growing threat from cybercrime and the spread of aggressive malicious code brings risks that can affect the availability, integrity and confidentiality of information and IT-supported operating resources. Despite extensive precautions, in the worst-case scenario, this can lead to a temporary interruption of IT-supported business processes with severe negative effects on the Group's earnings. In addition, the loss or misuse of sensitive data may under certain circumstances lead to a loss of reputation. In particular, stricter regulatory requirements such as the EU Data Protection Directive may, among other things, give rise to claims by third parties and result in costly regulatory requirements and penalties with an impact on earnings.

It is essential for the globally active Daimler Group and its wide-ranging business and production processes that information is available and can be exchanged in an up-to-date, complete and correct form. The framework for IT security is based on international standards such as ISO/IEC 2700x and the NIST Cybersecurity Framework, and its protective measures also apply industry standards and best practice. Appropriately secure IT systems and a reliable IT infrastructure must be used to protect information. Cyber threats must be identified over the entire lifecycle of applications and IT systems and dealt with in line with their seriousness. In particular, risks could result in the interruption of business processes due to the failure of IT systems or which could cause the loss or corruption of data.

Risks Relating to the Leasing and Sales-Financing Business

In connection with the sale of vehicles, Daimler offers its customers a wide range of financing and leasing options. The resulting risks for the Daimler Mobility segment are mainly due to borrowers' worsening creditworthiness, so receivables might not be recoverable in whole or in part because of customers' insolvency (default or credit risk).

In connection with leasing agreements, risks arise if the market value of a leased vehicle at the end of the agreement term differs from the residual value originally calculated and forecasted at the time the agreement was concluded and used as a basis for the leasing installments. A residual-value risk arises if the expected market value of a vehicle at the end of the contract term is lower than the residual value calculated and forecasted when the contract was concluded. Particularly at Mercedes-Benz Cars & Vans and Daimler Mobility, risks therefore result from the development of the used car markets and thus from the residual

values of the vehicles produced. Above all, the existing uncertainties in connection with diesel vehicles can have a negative impact on residual values. As part of the established residual-value management process, certain assumptions are made at local and corporate levels regarding the expected level of prices, based upon which the cars to be returned in the leasing business are evaluated. If changing market developments lead to a negative deviation from assumptions, there is a risk of lower residual values of used cars. This can adversely affect the proceeds from the sale of used cars.

In addition, a residual-value risk from non-Daimler vehicles exists for the Daimler Mobility companies that operate commercial fleet management and leasing management, because most of those vehicles are not covered by manufacturers' residual-value guarantees. The negative development of sale prices for used cars on stock can adversely affect earnings.

Personnel Risks

The success of the Daimler Group is highly dependent on its employees and their expertise.

Competition for highly qualified staff and management is still very intense in the industry and the regions in which Daimler operates. Future success also depends on the extent to which the Daimler Group succeeds over the long term in recruiting, integrating and retaining specialist employees.

Due to demographic developments, the Group has to cope with changes relating to an aging workforce and has to secure a sufficient number of qualified young persons with the potential to become the next generation of highly skilled specialists and executives.

Daimler Group counters economic, market and competitive fluctuations with the established time and flexibility instruments to enable Daimler to react appropriately to the situation. In order to achieve the long-term reduction in personnel costs necessary for the transformation, Daimler's management and the General Works Council have concluded an agreement which includes a staff-reduction program. As this is based on an agreement that is voluntary for both parties, there is a risk that its implementation may not be able to take place to the full extent planned.

Risks exist in the context of negotiations on collective bargaining frameworks and the associated potential loss of production.

Risks Related to Equity Investments and Cooperations

Cooperation with partners in associated companies and joint ventures is of key importance to Daimler.

The Daimler Group generally participates in the risks of associated companies and joint ventures in line with its equity interest, and is also subject to share-price risks if such companies are listed on a stock exchange.

The remeasurement of an associated company or joint venture in relation to its carrying value can lead to risks for the segment to which it is allocated. Furthermore, the business activities of an associated company, joint venture or joint operation, or the disposal or acquisition of an interest in such an entity, can result in financial obligations or an additional financing requirement. Such risks also exist with investments in startups and in the context of the restructuring of companies in which a minority interest is held. Risks from associated companies and joint ventures exist at Mercedes-Benz Cars & Vans, Daimler Trucks & Buses and Daimler Mobility, as well as at the associated companies and joint ventures directly allocated to the Group.

3. Financial Risks

The Daimler Group is generally exposed to various financial risks, including risks from changes in market prices such as currency exchange rates, interest rates and commodity prices. In addition, the Daimler Group

is exposed to credit risks, risks of restricted access to capital markets, risks of early credit repayment requirements, risks from pension plans and risks from changes in credit ratings. Since the volatility of the financial markets, which is largely determined by the COVID-19 pandemic, cannot be reliably estimated at present, Daimler anticipates an increased probability that financial risks may materialize. Should any of the following risks materialize, this could have material adverse effects on the Daimler Group's business, net assets, financial condition and results of operations.

Further information on financial risks is provided in Note 33 (*Management of financial risks*) of the Notes to the Annual Consolidated Financial Statements 2019 of DAG, incorporated by reference into this Prospectus. Information on the Group's financial instruments is provided in note 32 (*Financial instruments*) of the notes to the Annual Consolidated Financial Statements 2019 of DAG, incorporated by reference into this Prospectus.

Exchange Rate Risks

The Daimler Group's global orientation means that its business operations and financial transactions are connected with risks related to fluctuations in currency exchange rates. This applies in particular to fluctuations of the euro against the US dollar, Chinese renminbi, British pound and other currencies such as those of growth markets. An exchange rate risk arises in business operations primarily when revenue is generated in a currency different from that of the related costs (transaction risk). This applies in particular to Mercedes-Benz Cars & Vans, as a major portion of its revenue is generated in foreign currencies while most of its production costs are denominated in euros. Daimler Trucks & Buses is also exposed to such transaction risks, but to a lesser degree because of its worldwide production network. Exchange rate risks also exist in connection with the translation into euros of the net assets, revenues and expenses of the companies of the Group outside the euro zone (translation risk); these risks are not generally hedged.

Interest Rate Risks

Changes in interest rates can create risks for business operations as well as for financial transactions. Daimler employs a variety of interest-rate sensitive financial instruments to manage the cash requirements of its business operations on a day-to-day basis. Most of these financial instruments are held in connection with the financial services business of Daimler Mobility. Term-congruent refinancing is generally undertaken for the financial services business. However, to a certain extent, the funding does not match in terms of maturities and interest rates, which gives rise to the risk of changes in interest rates.

Commodity Price Risks

As already described in the subsection "*Procurement Market Risks*", the Group's business operations are exposed to changes in the market prices of purchased parts and raw materials.

Credit Risks

Credit risk is the risk of economic loss arising from a counterparty's failure to repay or service debt in accordance with the contractual terms. Credit risk encompasses both the direct risk of default and the risk of a deterioration of creditworthiness as well as concentration risks. The Group is exposed to credit risks which result primarily from its financial services activities and from the operations of its vehicle business. Credit risks also arise from the Group's liquid assets. Risks related to leasing and sales financing are addressed in the subsection entitled "*Industry and Business Risks – Risks Relating to the Leasing and Sales-Financing Business*". Should defaults occur, this would adversely affect the Group's financial position, cash flows and profitability.

Risks of Restricted Access to Capital Markets

Liquidity risks arise when a company is unable to fully meet its financial obligations. In the normal course of business, Daimler uses bonds, commercial paper and securitized transactions, as well as bank loans in various currencies, primarily with the aim of refinancing its leasing and sales-financing business. An increase in the cost of refinancing would have a negative impact on the competitiveness and profitability of Daimler's financial services business to the extent that the higher refinancing costs cannot be passed on to customers; a limitation of the financial services business would also have negative consequences for the vehicle business. Access to capital markets in individual countries may be limited by government regulations or by a temporary lack of absorption capacity. In addition, pending legal proceedings as well as Daimler's own business policy considerations and developments may temporarily prevent Daimler from covering any liquidity requirements by means of borrowing in the capital markets.

Risks of Early Credit Repayment Obligations

Daimler may be required to make premature repayment of special-purpose loans in the case of adverse results of ongoing legal proceedings. It is to be expected that the resulting refinancing requirement will have to be concluded at a higher cost.

Risks Relating to Pension Plans

Daimler has pension benefit obligations and, to a lesser degree, obligations relating to healthcare benefits, which are largely covered by plan assets. The balance of pension obligations less plan assets constitutes the carrying amount or funded status of those employee benefit plans. The measurement of pension obligations and the calculation of net pension expense are based on certain assumptions. Even small changes in those assumptions particularly changes in the discount rate may have a negative effect on the funded status and Group equity in the current financial year, and lead to changes in the periodic net pension expense in the following financial year. The fair value of plan assets is determined to a large degree by developments in the capital markets. Unfavorable developments, especially relating to equity prices and fixed-interest securities, reduce the carrying value of plan assets. A change in the composition of plan assets can also have a negative impact on the fair value of plan assets.

Further information on the pension plans and their risks is provided in Note 22 (*Pensions and similar obligations*) of the Notes to the Annual Consolidated Financial Statements 2019 of DAG, incorporated by reference into this Prospectus.

Risks from Changes in Credit Ratings

Daimler's creditworthiness is assessed by the rating agencies DBRS Limited, Fitch Ratings España S.A.U., Moody's Deutschland GmbH, Scope Ratings GmbH and S&P Global Ratings Europe Limited. Risks exist in connection with potential downgrades to credit ratings by the rating agencies, and thus to Daimler's creditworthiness. Downgrades could have a negative impact on the Group's financing if such a downgrade leads to an increase in the costs for external financing or restricts the Group's ability to obtain financing. A credit rating downgrade could also discourage investors from investing in DAG or notes to be issued by DAG or another Group company. A risk to the credit rating of the Daimler Group can also arise if the earnings and cash flows from the anticipated Group's growth cannot be realized.

4. Legal and Tax Risks

The Daimler Group is exposed to various legal and tax risks. Should any of the following risks materialize, this could have material adverse effects on the Daimler Group's business, net assets, financial condition and results of operations.

Regulatory Risks

The automotive industry is subject to extensive governmental regulations worldwide. Laws in various jurisdictions regulate occupant safety and the environmental impact of vehicles, including emissions levels, fuel economy and noise, as well as the emissions of the plants where vehicles or parts thereof are produced. In case regulations applicable in the different regions are not complied with, this could result in significant penalties and reputational harm or the inability to certify vehicles in the relevant markets. The cost of compliance with these regulations is significant, and in this context, Daimler expects a significant increase in such costs.

Risks from Legal Proceedings in General

DAG and its subsidiaries are confronted with various legal proceedings, claims as well as government investigations and orders (legal proceedings) on a large number of topics, including vehicle safety, emissions, fuel economy, financial services, dealer, supplier and other contractual relationships, intellectual property rights, warranty claims, environmental matters, antitrust matters (including actions for damages) as well as shareholder litigation. Product-related litigation involves claims alleging faults in vehicles, some of which have been made as class actions. If the outcome of such legal proceedings is detrimental to Daimler, the Group may be required to pay substantial compensatory and punitive damages or to undertake service actions, recall campaigns, monetary penalties or other costly actions. Some of these proceedings may have an impact on the Group's reputation.

Risks from Legal Proceedings in Connection with Diesel Exhaust Gas Emissions – Governmental Proceedings

Daimler is continuously subject to governmental information requests, inquiries, investigations, administrative orders and proceedings relating to environmental, criminal, antitrust and other laws and regulations in connection with diesel exhaust emissions.

Several federal and state authorities and other institutions worldwide have inquired about and/or are/have been conducting investigations and/or administrative proceedings, and/or have issued administrative orders or in the case of the Stuttgart district attorney's office a fine notice. These particularly relate to test results, the emission control systems used in Mercedes-Benz diesel vehicles and/or Daimler's interaction with the relevant federal and state authorities as well as related legal issues and implications, including, but not limited to, under applicable environmental, criminal and antitrust laws. These authorities and institutions include, amongst others, the US Department of Justice (DOJ), which has requested that Daimler conducts an internal investigation, the US Environmental Protection Agency (EPA), the California Air Resources Board (CARB) and other US state authorities, the South Korean Ministry of Environment (MoE) and the South Korean competition authority (Korea Fair Trade Commission (KFTC)), the European Commission, the German Federal Cartel Office (*Bundeskartellamt*) as well as national antitrust authorities and other authorities of various foreign states as well as the German Federal Ministry of Transport and Digital Infrastructure (BMVI) and the German Federal Motor Transport Authority ("**KBA**"). In the course of its formal investigation into possible collusion on clean emission technology, the European Commission sent a statement of objections to Daimler and other automobile manufacturers in April 2019. In this context, Daimler filed an application for immunity from fines (leniency application) with the European Commission some time ago. The Stuttgart district attorney's office is conducting criminal investigation proceedings against Daimler employees on the suspicion of fraud and criminal advertising, and, in May 2017, searched the premises of Daimler at several locations in Germany. In February 2019, the Stuttgart district attorney's office also initiated a formal investigation proceeding against DAG with respect to an administrative offense. In September 2019, the Stuttgart district attorney's office issued a fine notice against Daimler based on a negligent violation of supervisory duties in the amount of €870 million which has become legally binding, thereby concluding the administrative offense proceedings against Daimler. Daimler continues to fully cooperate with the authorities and institutions. Irrespective of such cooperation, it is possible that further

regulatory, criminal and administrative investigative and enforcement actions and measures relating to Daimler and/or its employees will be taken, or administrative orders will be issued. Such actions, measures and orders may include subpoenas, that is legal instructions issued under penalty of law in the process of taking evidence, or other requests for documentation, testimony or other information, or orders to recall vehicles, further search warrants, a notice of violation or an increased formalization of the governmental investigations, coordination or proceedings, including the resolution of proceedings by way of a settlement. Additionally, further delays in obtaining regulatory approvals necessary to introduce new or recertify existing vehicle models could occur.

Since 2018, KBA has issued various administrative orders holding that certain calibrations of specified functionalities in certain Mercedes-Benz diesel vehicles are to be qualified as impermissible defeat devices and ordered subsequent auxiliary provisions for the respective EC type approvals in this respect, including mandatory recalls and, in certain cases, stops of the first registration. In addition and since 2018, Daimler has (in view of KBA's interpretation of the law as a precaution) implemented a temporary delivery and registration stop with respect to certain models, also covering the used-car, leasing and financing businesses, and is constantly reviewing whether it can lift this delivery and registration stop in whole or in part. Daimler has filed timely objections against the KBA's administrative orders in order to have the open legal issues resolved, if necessary, also by a court of law. In the course of its regular market supervision, KBA is routinely conducting further reviews of Mercedes-Benz vehicles and is asking questions about technical elements of the vehicles. In light of the aforementioned administrative orders issued by, and continued discussions with, the KBA, it is likely that in the course of the ongoing and/or further investigations, KBA will issue additional administrative orders holding that other Mercedes-Benz diesel vehicles are also equipped with impermissible defeat devices. The new calibrations requested by KBA are being processed, and for a certain proportion of the vehicles, the relevant software has already been approved by KBA; the related recalls have insofar been initiated. It cannot be ruled out that software updates may be reworked, further delivery and registration stops may be ordered or resolved by Daimler as a precautionary measure, also with a view to the used car, leasing and financing businesses.

Daimler is conducting further investigations and otherwise continues to fully cooperate with the authorities and institutions.

In January 2019, another vehicle manufacturer reached civil settlements with US federal and state authorities, as well as with vehicle customers. Although the manufacturer did not admit liability, the authorities maintain the position that the manufacturer included undisclosed Auxiliary Emission Control Devices ("AECDS") in its diesel vehicles, apparently including functionalities that are common in diesel vehicles, and that certain of these AECDS are illegal defeat devices. As part of these settlements, the manufacturer has agreed to, among other things, pay civil penalties, undertake a recall of affected vehicles, provide extended warranties, undertake a nationwide mitigation project and make other payments. The manufacturer has furthermore agreed to provide payments to current and former diesel vehicle owners as part of a class action settlement.

In light of these matters and in light of the ongoing governmental information requests, inquiries, investigations, administrative orders and proceedings, as well as Daimler's own internal investigations, it is likely that, besides KBA, one or more regulatory and/or investigative authorities worldwide will reach the conclusion that other passenger cars and/or commercial vehicles with the brand name Mercedes-Benz or other brand names of the Group are equipped with impermissible defeat devices and/or that certain functionalities and/or calibrations were not properly disclosed. Furthermore, the authorities have increased scrutiny of Daimler's processes regarding running-change, field-fix and defect reporting as well as other compliance issues. Except for, in particular, the Stuttgart district attorney's office's administrative offense proceedings, the other inquiries, investigations, legal actions and proceedings as well as the replies to the governmental information requests, and the objection proceedings against KBA's administrative orders are still ongoing and open; hence, Daimler cannot predict the outcome at this time. Due to the outcome of the administrative offense proceedings by the Stuttgart district attorney's office against Daimler and the above as well as any potential other information requests, inquiries, investigations, administrative orders and

proceedings, it is possible that Daimler will become subject to significant additional monetary penalties, fines, disgorgements of profits, remediation requirements, further vehicle recalls, further registration and delivery stops, process and compliance improvements, mitigation measures and the early termination of promotional loans, and/or other sanctions, measures and actions (such as the exclusion from public tenders), including further investigations and/or administrative orders by these or other authorities and additional proceedings. The occurrence of the aforementioned events in whole or in part could cause significant collateral damage including reputational harm. Further, due to negative determinations or findings with respect to technical or legal issues by one of the various governmental agencies, other agencies – or also plaintiffs – could also adopt such determinations or findings, even if such determinations or findings are not within the scope of such authority's responsibility or jurisdiction. Thus, a negative determination or finding in one proceeding, such as the fine notice issued by the Stuttgart district attorney's office, carries the risk of being able to have an adverse effect on other proceedings, also potentially leading to new or expanded investigations or proceedings, including lawsuits.

In addition, Daimler's ability to defend itself in proceedings could be impaired by the fine notice issued by the Stuttgart district attorney's office as well as other unfavorable findings, results or developments in any of the information requests, inquiries, investigations, administrative orders, legal actions and/or proceedings discussed above.

Risks from Legal Proceedings in Connection with Diesel Exhaust Gas Emissions – Court Proceedings

A consumer class-action lawsuit is pending in the United States in which it is alleged that DAG and MBUSA conspired with Robert Bosch LLC and Robert Bosch GmbH to deceive US regulators and consumers. A separate lawsuit was filed in January 2019 by the State of Arizona alleging that DAG and MBUSA deliberately deceived consumers in connection with the advertising of Mercedes-Benz diesel vehicles. Consumer class-action lawsuits containing similar allegations were filed against DAG and other companies of the Group in Canada in April 2016, and against DAG in Israel in February 2019. A similar class action was filed in the United States in July 2017, but in December 2017, the parties stipulated to dismiss that lawsuit without prejudice. It may be filed again under specific conditions.

Furthermore, class actions have been filed in the United States and Canada alleging anticompetitive behavior relating to vehicle technology, costs, suppliers, markets, and other competitive attributes, including diesel emissions control technology. A securities class action lawsuit is pending in the United States on behalf of investors in DAG American Depositary Receipts which alleges that the defendants made materially false and misleading statements about diesel emissions in Mercedes-Benz vehicles.

In Germany, a multitude of lawsuits by customers alleging claims under warranty and tort laws as well as lawsuits by investors alleging the violation of disclosure requirements are pending. In this context, motions to initiate a model proceeding in accordance with the Act on Model Proceedings in Capital Markets Disputes (*KapMuG*) have been filed by investors as well as by DAG. Currently, no model proceeding is pending.

If court proceedings have an unfavorable outcome for Daimler, this could result in significant damages and punitive damages payments, remedial works or other cost-intensive measures. Court proceedings can in part also have an adverse effect on the reputation of the Group.

Furthermore, Daimler's ability to defend itself in the court proceedings could be impaired by unfavorable findings, results or developments in any of the governmental or other court proceedings discussed above, in particular the fine notice issued by the Stuttgart district attorney's office.

Further information on legal proceedings is provided in Note 30 (*Legal proceedings*) of the Notes to the Annual Consolidated Financial Statements 2019 of DAG incorporated by reference in this Prospectus.

Risks from Other Legal Proceedings

Following the settlement decision by the European Commission adopted on July 19, 2016 concluding the trucks antitrust proceedings, DAG and Daimler Truck AG are facing customers' claims for damages to a considerable degree. Respective legal actions, class actions and other forms of legal redress have been initiated in various states in and outside of Europe and should further be expected.

As legal proceedings are fraught with a large degree of uncertainty, it is possible that after their final resolution, some of the provisions Daimler has recognized for them could prove to be insufficient. As a result, substantial additional expenditures may arise. This also applies to legal proceedings for which the Group has seen no requirement to recognize a provision.

It cannot be ruled out that the regulatory risks and risks from legal proceedings discussed above individually or in the aggregate may materially adversely impact Daimler's profitability and financial position

Further information on legal proceedings is provided in Note 30 (*Legal proceedings*) of the Notes to the Annual Consolidated Financial Statements 2019 of DAG and in Note 17 (*Legal proceedings*) of the Notes to the Unaudited Interim Consolidated Financial Statements Q1 2020 of DAG, each as incorporated by reference in this Prospectus.

Tax Risks

DAG and its subsidiaries operate in many countries worldwide and are therefore subject to numerous different statutory provisions and tax audits. Any changes in legislation and jurisdiction, as well as different interpretations of the law by the fiscal authorities – especially in the field of cross-border transactions – may be subject to considerable uncertainty. It is therefore possible that the provisions recognized will not be sufficient, which could have negative effects on the Group's net profit and cash flows.

In addition, if future taxable income is not earned or is too low, there is a risk that the tax benefit from loss carryforwards and tax-deductible temporary differences may not be recognized or may no longer be recognized in full, which could have a negative impact on net profit.

5. Risks Relating to Stakeholders' Perception and Reputation of the Daimler Group

As a company with worldwide activities, DAG is at the focus of public interest. The relevant stakeholders' perception is of crucial importance and can affect the reputation of the entire Daimler Group. A key role in the public's current perception is played by Daimler's approach to environmental, employee and social matters, fighting corruption and bribery, and respecting human rights and may lead to non-financial risks.

Risks arise above all in connection with the public debate about diesel vehicles and the related fundamental reconsideration of methods for measuring emissions. Due to the replacement of the NEDC (New European Driving Cycle) with the new measuring method WLTP (Worldwide Harmonized Light Vehicles Test Procedure), the fleet CO₂ average has worsened. In light of today's knowledge, this makes it more difficult to achieve the CO₂ targets as of 2020. Furthermore, there has been some pressure in the past two years on diesel technology, which is important for compliance with the challenging CO₂ targets in the EU, because of NO_x levels exceeding the limits at some measuring stations in cities. The current public focus on vehicle emissions as well as possible certifications stops and recalls jeopardize the reputation of the automotive industry and in particular of the diesel engine, and could result in damage to Daimler's reputation. In general, legal risks – for example in connection with antitrust investigations – as well as possible legal and social violations by partners and suppliers can have a negative impact on the reputation of the entire Daimler Group.

6. Other Risks

As well as the risk categories described above, unpredictable events such as natural disasters, political instability or terrorist attacks can disturb production and business processes. Disruptions of business processes can also occur in connection with projects as a result of system changes. In addition to the described risks, other risks can occur that adversely affect the public perception and therefore the reputation of the Daimler Group. Public interest is focused on Daimler's position with regard to individual issues in the fields of sustainability, integrity and social responsibility. Furthermore, customers, business partners and capital markets are interested in how the Group reacts to the technological challenges of the future, how it succeeds in offering up-to-date and technologically leading products in the markets, and how business operations are conducted under the given conditions.

New competitors in the IT sector for example and the Group's current strategy, among other things in connection with electric mobility, pose further challenges for the Daimler Group and are connected with risks.

Finally, there will be a negative effect from the continuing high advance expenditure for new products and technologies. In addition, there will be costs for Project Future for the implementation of the new Group structure.

Risk Factors Relating to the Notes

The risk factors relating to the Notes are presented in the following categories depending on their nature with the most material risk factor presented first in each category:

- 1. Risks Relating to All Notes to be Issued under the Programme,**
- 2. Risks Relating to the Structure of Certain Types of Notes to be Issued under the Programme,**
- 3. Risks Relating to Notes Denominated in Renminbi,**
- 4. Risks Relating to Green Bonds, and**
- 5. Other Related Risks.**

1. Risks Relating to All Notes to be Issued under the Programme

Holder's May Face Liquidity Risks

Application has been made to list Notes issued under the Programme on the official list, and admit them for trading on, the regulated market of the Luxembourg Stock Exchange appearing on the list of regulated markets issued by the European Commission or on the professional segment of the regulated market of the Luxembourg Stock Exchange. In addition, the Programme provides that Notes may be listed on an alternative stock exchange or may not be listed at all. Regardless of whether the Notes are listed or not, there can be no assurance that a liquid secondary market for the Notes will develop or, if it does develop, that it will continue. The fact that the Notes may be listed does not necessarily lead to greater liquidity as compared to unlisted Notes. If the Notes are not listed on any stock exchange, pricing information for such Notes may, however, be more difficult to obtain which may affect the liquidity of the Notes adversely. In an illiquid market, an investor might not be able to sell his Notes at any time at fair market prices. The possibility to sell the Notes might additionally be restricted by country specific reasons.

Holders May Face Foreign Exchange Risks

A Holder of Notes denominated in a foreign currency is exposed to the risk of changes in currency exchange rates which may affect the yield of such Notes. Changes in currency exchange rates result from various factors such as macro-economic factors, speculative transactions and interventions by central banks and governments.

A change in the value of any foreign currency against the Euro, for example, will result in a corresponding change in the Euro value of Notes denominated in a currency other than Euro and a corresponding change in the Euro value of interest and principal payments made in a currency other than in Euro in accordance with the terms of such Notes. If the underlying exchange rate falls and the value of the Euro correspondingly rises, the price of the Notes and the value of interest and principal payments made thereunder, expressed in Euro, falls correspondingly.

In addition, government and monetary authorities may impose (as some have done in the past) exchange controls that could adversely affect an applicable currency exchange rate. As a result, Holders may receive less interest or principal than expected, or no interest or principal.

Holders May Face Taxation Risks

Potential purchasers of Notes should be aware that stamp duty and other taxes and/or charges may be levied in accordance with the laws and practices in the countries where the Notes are transferred and other relevant jurisdictions. In addition, payments of interest on the Notes or income derived from the Notes may be subject to taxation, including withholding taxes, in the jurisdiction of the relevant Issuer, in the jurisdiction of the Holder, or in other jurisdictions in which the Holder is required to pay taxes. Any such tax consequences may have an impact on the net income received from the Notes. Potential purchasers of Notes should carefully consider the tax consequences of investing in the Notes and consult their own independent tax advisers about their tax situation. In addition, potential purchasers should be aware that tax regulations and their application by the relevant taxation authorities may change from time to time. Accordingly, it is not possible to predict the precise tax treatment of the Notes which will apply at any given time.

Holders May Face Risks Related to FATCA and the U.S. Tax Treatment of the Notes

While the Notes issued by DAG, MBAP, DIF, MBFJ and DCFI (together, the "**Non-U.S. Issuers**") are in global form and held within Clearstream Banking S.A. or Euroclear Bank SA/NV (together, the "**ICSDs**") or Clearstream Banking AG ("**CBF**"), in all but the most remote circumstances, it is not expected that the new reporting regime and potential withholding tax imposed by sections 1471 through 1474 of the U.S. Internal Revenue Code of 1986 ("**FATCA**") will affect the amount of any payment received by the ICSDs or CBF. However, FATCA may affect payments made to custodians or intermediaries in the subsequent payment chain leading to the ultimate investor if any such custodian or intermediary generally is unable to receive payments free of FATCA withholding. It also may affect payment to any ultimate investor that is a financial institution that is not entitled to receive payments free of withholding under FATCA, or an ultimate investor that fails to provide its broker (or other custodian or intermediary from which it receives payment) with any information, forms, other documentation or consents that may be necessary for the payments to be made free of FATCA withholding. Investors should choose the custodians or intermediaries with care (to ensure each is compliant with FATCA or other laws or agreements related to FATCA) and provide each custodian or intermediary with any information, forms, other documentation or consents that may be necessary for such custodian or intermediary to make a payment free of FATCA withholding. Investors should consult their own tax adviser to obtain a more detailed explanation of FATCA and how FATCA may affect them. The relevant Non-U.S. Issuer's obligations under the Notes are discharged once it has made payment to, or to the order of, the ICSDs or CBF and the relevant Non-U.S. Issuer has therefore no responsibility for any amount thereafter transmitted through the ICSDs or CBF and custodians or intermediaries. Further, foreign financial institutions in a jurisdiction which has entered into an intergovernmental agreement with the United States

(an "IGA") are generally not expected to be required to withhold under FATCA or an IGA (or any law implementing an IGA) from payments they make.

Payments on Notes issued by DFNA will be subject to withholding under FATCA if the holder, beneficial owner or an intermediary in the chain of payments is not FATCA compliant.

In addition, an Issuer may also redeem early any Notes under the Programme if certain payments made to the Issuer or the Guarantor (if applicable) become subject to withholding under FATCA or if the Issuer is required, under FATCA, to redeem such Notes. In such case, all Notes of a series may be redeemed early.

Finally, in the case of Notes to be issued by DCFI (if such Notes increase an issue originally issued under the 2013 Prospectus or the 2014 Prospectus) or DFNA, the Issuer may redeem early such Notes if the Notes are or will be treated as being in bearer form for U.S. federal income tax purposes.

Holders May Face Risks from the Implementation of the Proposed Financial Transactions Tax

On February 14, 2013, the European Commission published a proposal (the "**Commission's Proposal**") for a Directive for a common financial transactions tax ("**FTT**") in Austria, Belgium, France, Germany, Greece, Italy, Portugal, Slovakia, Slovenia, Spain (the "**Participating Member States**") and Estonia. However, Estonia has since stated that it will not participate with regard to the FTT proposal.

The Commission's Proposal has very broad scope and could, if introduced, apply to certain dealings in the Notes (including secondary market transactions) in certain circumstances. The issuance and subscription of Notes should, however, be exempt.

Under the Commission's Proposal the FTT could apply in certain circumstances to persons both within and outside of the Participating Member States. Generally, it would apply to certain dealings in the Notes where at least one party is a financial institution, and at least one party is established in a Participating Member State. A financial institution may be, or be deemed to be, "established" in a Participating Member State in a broad range of circumstances, including (a) by transacting with a person established in a Participating Member State or (b) where the financial instrument which is subject to the dealings is issued in a Participating Member State.

However, the FTT proposal remains subject to negotiation between Participating Member States. It may therefore be altered prior to any implementation, the timing of which remains unclear. Additional EU member states may decide to participate.

Investors are advised to seek their own professional advice in relation to the FTT.

If Payments in Respect of the Notes Issued by DIF Were to Become Subject to the New Withholding Tax on Interest in the Netherlands as of January 1, 2021, DIF Would Make the Required Withholding or Deduction for the Account of the Holders and Would Not be Obligated to Pay Additional Amounts to the Holders

The Netherlands is introducing a new withholding tax of 21.7 per cent. on interest payments as of January 1, 2021. The new withholding tax will generally apply to interest payments made by an entity tax resident in the Netherlands, like DIF, to a "related entity" tax resident in a "listed jurisdiction".

For these purposes, a jurisdiction is considered a "listed jurisdiction", if such jurisdiction (i) has a corporation tax on business profits with a general statutory rate of less than 9 per cent. (a low taxed jurisdiction) and is designated as such in the ministerial decree of the Dutch Ministry of Finance (the "**Dutch Black List**") or (ii) is included in the European Union list of non-cooperative jurisdictions (the "**EU Black List**"), in each case applicable at the relevant Interest Payment Date. The Dutch Black List and the EU Black List are periodically updated.

As at the date hereof, the following 24 jurisdictions are jurisdictions listed on the Dutch Black List or the EU Black List: American Samoa, Anguilla, Bahamas, Bahrain, Barbados, Bermuda, the British Virgin Islands, the Cayman Islands, Fiji, Guam, Guernsey, Isle of Man, Jersey, Oman, Palau, Panama, Samoa, Seychelles, Trinidad and Tobago, Turkmenistan, Turks and Caicos Islands, Vanuatu, the United Arab Emirates and the U.S. Virgin Islands.

Generally, an entity is considered a "related entity" if (i) it has a "Qualifying Interest" (as defined below) in DIF, (ii) DIF has a Qualifying Interest in such entity, or (iii) a third party has a Qualifying Interest in both DIF and such entity. The term "**Qualifying Interest**" means a directly or indirectly held interest – either individually or jointly as part of a collaborating group (*samenwerkende groep*) – that enables the holder of such interest to exercise a decisive influence on the decisions that can determine the activities of the entity in which the interest is held.

The new withholding tax may also apply in situations where artificial structures are put in place with the main purpose or one of the main purposes to avoid the Dutch withholding tax, e.g., where an interest payment to a listed jurisdiction is artificially routed via an intermediate entity in a non-listed jurisdiction.

In practice, DIF may not always be able to assess whether a Holder is related to DIF or located in a listed jurisdiction. The parliamentary history is unclear on DIF's responsibilities to determine the absence of affiliation in respect of notes issued in the market, like the Notes.

If payments in respect of the Notes were to become subject to this new withholding tax described above, DIF would make the required withholding or deduction for the account of the Holder and would not be required to pay additional amounts in respect of the withholding or deduction (see Condition 7 (*Taxation*)). Prospective investors in the Notes should consult their own tax advisers as to whether this new withholding tax on interest in the Netherlands could be relevant to them.

Holders May Face Risks from a Change of the Law Underlying the Notes

The terms and conditions of the Notes are based on German law in effect as at the date of this Prospectus. No assurance can be given as to the impact of any possible judicial decision or change to German law (or law applicable in Germany) or administrative practice after the date of this Prospectus.

2. Risks Relating to the Structure of Certain Types of Notes to be Issued under the Programme

Holders Are Exposed to Market Price Risks in Relation to the Notes

The development of market prices of the Notes depends on various factors, such as changes of market interest rate levels, the policy of central banks, overall economic developments, inflation rates or the lack of or excess demand for the relevant type of Notes. The market price of the Notes may also be negatively affected by an increase in the Issuer's credit spreads, i.e. the difference between yields on the Issuer's debt and the yield of government bonds or swap rates of similar maturity. The Issuer's credit spreads are mainly based on its perceived creditworthiness but also influenced by other factors such as general market trends as well as supply and demand for such Notes. The Holder of Notes is therefore exposed to the risk of an unfavorable development of market prices of his Notes which materializes if the Holder sells the Notes prior to the final maturity of such Notes. If the Holder decides to hold the Notes until final maturity the Notes will be redeemed at the amount set out in the relevant Final Terms.

Holders of Fixed Rate Notes Are Exposed to the Risk that the Price of Such Notes Falls as a Result of Changes in the Market Interest Rate

A Holder of a Fixed Rate Note is exposed to the risk that the price of such Note falls as a result of changes in the current interest rate on the capital markets (the "**Market Interest Rate**") for comparable debt securities of the same maturity. While the nominal interest rate of a Fixed Rate Note as specified in the applicable

Final Terms is fixed during the life of such Note, the Market Interest Rate typically changes on a daily basis. As the Market Interest Rate changes, the price of a Fixed Rate Note also changes, but in the opposite direction. If the Market Interest Rate increases, the price of a Fixed Rate Note typically falls, until the yield of such Note is approximately equal to the Market Interest Rate. If the Market Interest Rate falls, the price of a Fixed Rate Note typically increases, until the yield of such Note is approximately equal to the Market Interest Rate. Potential purchasers of Fixed Rate Notes should be aware that movements of the Market Interest Rate could adversely affect the market price of the Notes.

Fixed Rate Notes may also bear an interest rate of zero per cent., in which case no interest will be paid. If a Holder purchases such Notes at a price (which term shall include any possible issue surcharge or any provisions, commissions or transactional costs in connection with such purchase) higher than the redemption amount of such Notes, the yield of the Notes so purchased may be negative and the Holder may suffer a loss.

Holder of Floating Rate Notes Are Exposed to the Risk of Fluctuating Interest Rate Levels

Floating Rate Notes pay a variable amount of interest based on a reference interest rate on specified interest payment dates. Floating Rate Notes tend to be volatile investments. A Holder of a Floating Rate Note is exposed to the risk of fluctuating interest rate levels and, consequently, uncertain interest income. Fluctuating interest rate levels make it impossible to determine the yield of Floating Rate Notes in advance. Neither the current nor the historical value of the relevant floating rate should be taken as an indication of the future development of such floating rate during the term of any Floating Rate Notes.

Floating Rate Notes may be structured to include caps and/or floors. In such case, their market value may be more volatile than the market value for Floating Rate Notes that do not include these features. The effect of a cap is that the amount of interest will never rise above and beyond the predetermined cap, so that Holders will not be able to benefit from any actual favorable development beyond the cap. The yield could therefore be considerably lower than that of similar Floating Rate Notes without a cap.

Specific Risks Arise in Case Floating Rate Notes Are Linked to a "Benchmark" as Reference Interest Rate

Interest rates and indices which are deemed to be "benchmarks", (including the London Inter-bank Offered Rate ("**LIBOR**"), the Euro Interbank Offered Rate ("**EURIBOR**") and other interest rates and indices) are the subject of recent national, international and other regulatory guidance and proposals for reform. Some of these reforms are already effective while others are still to be implemented. These reforms may cause such "benchmarks" to perform differently than in the past, to disappear entirely, or to have other consequences which cannot be predicted. Any such consequence could have a material adverse effect on any Notes linked to or referencing such a "benchmark".

The Benchmarks Regulation applies, subject to certain transitional provisions, to the provision of benchmarks, the contribution of input data to a benchmark and the use of a benchmark within the EU (which for these purposes, includes the United Kingdom). Among other things, it (i) requires benchmark administrators to be authorised or registered (or, if non-EU-based, to be subject to an equivalent regime or otherwise recognised or endorsed), and (ii) prevents certain uses by EU supervised entities of "benchmarks" of administrators that are not authorised or registered (or, if non-EU based, not deemed equivalent or recognised or endorsed), unless such benchmark administrators are exempt from the application of the Benchmarks Regulation, such as, for example, central banks and certain public authorities.

The Benchmarks Regulation, as far as applicable, could have a material impact on any Notes linked to or referencing LIBOR, EURIBOR or any other "benchmark", in particular, if the methodology or other terms of the LIBOR, the EURIBOR or such other "benchmark" are changed in order to comply with the requirements of the Benchmarks Regulation. Such changes could, among other things, have the effect of reducing, increasing or otherwise affecting the volatility of the published rate or level of the LIBOR, the EURIBOR or such other "benchmark".

In Australia, examples of reforms that are already effective include the replacement of the Australian Financial Markets Association as BBSW administrator with ASX Benchmarks, the publication of the ASX BBSW Trade and Trade Reporting Guidelines, which allow for the benchmark indices to be calculated directly from a wider set of market transactions and the Treasury Laws Amendment (2017 Measures No. 5) Act 2018 of Australia, which, among other things, enables the Australian Securities and Investment Commission ("**ASIC**") to make rules relating to the generation and administration of benchmark indices. On June 6, 2018, ASIC designated BBSW as a "significant financial benchmark" and made the ASIC Financial Benchmark (Administration) Rules 2018 and the ASIC Financial Benchmarks (Compelled) Rules 2018. On June 27, 2019, ASIC granted ASX Benchmarks a licence to administer BBSW.

More broadly, any of the international or national reforms, or the general increased regulatory scrutiny of "benchmarks", could increase the costs and risks of administering or otherwise participating in the setting of a "benchmark" and complying with any such regulations or requirements.

The euro risk free-rate working group for the euro area has published a set of guiding principles for fallback provisions in new euro denominated cash products (including bonds) referencing EURIBOR. The guiding principles indicate, among other things, that continuing to reference EURIBOR in relevant contracts (without robust fallback provisions) may increase the risk to the euro area financial system.

It is not possible to predict with certainty whether, and to what extent, LIBOR and EURIBOR or certain other "benchmarks" will continue to be supported going forwards. This may cause LIBOR and EURIBOR and such other "benchmarks" to perform differently than they have done in the past, and may have other consequences which cannot be predicted. Such factors may have the following effects on the relevant "benchmark": (i) discourage market participants from continuing to administer or contribute to the "benchmark"; (ii) trigger changes in the rules or methodologies used in the "benchmarks", or (iii) lead to the disappearance of the "benchmark". Any of the above changes or any other consequential changes as a result of international or national reforms or other initiatives or investigations, could have a material adverse effect on the value or liquidity of, and return on any Notes linked to or referencing a "benchmark".

The Terms and Conditions of the Notes linked to or referencing LIBOR, EURIBOR or any other "benchmark" provide for certain fall-back arrangements in the event that a "benchmark" or any page on which a "benchmark" may be published (or any successor service) becomes unavailable or a Rate Replacement Event (as defined in the Terms and Conditions) in respect of a "benchmark", which is used to determine the Reference (Interest) Rate (as defined in the Terms and Conditions) applicable to Notes with a floating rate of interest, occurs, including if (1) a "benchmark" ceases to be published for a period of at least ten business days prior to and including the relevant Determination Day (as defined in the Terms and Conditions), (2) a benchmark ceases to be representative or an industry accepted rate for debt market instruments such as, or comparable to, the Notes, (3) public announcements are made by, *inter alia*, administrators, supervisors of administrators, the central bank for the specified currency and/or any entity with insolvency or resolution authority over the administrator of a "benchmark" that, *inter alia*, (i) the publication of such "benchmark" will cease permanently or indefinitely, (ii) such "benchmark" has been or will be permanently or indefinitely discontinued, (iii) such "benchmark" will permanently or indefinitely cease to be provided by its administrator, (iv) such "benchmark" will be prohibited from being used, or (v) that a material change of the methodology of calculation of such "benchmark" has occurred or will occur.

As outlined in (2) above, the rate of interest on Notes linked to or referencing LIBOR, EURIBOR or any other "benchmark" may cease to be determined by reference to the original "benchmark" which is used to determine the rate of interest applicable to those Notes, and instead be determined by reference to the Replacement Rate, even if the original "benchmark" continues to be published. Such rate may be lower than the original "benchmark" rate for so long as that "benchmark" continues to be published, and the value of and return on the Notes may be adversely affected.

Such fall-back arrangements include the possibility that the Rate of Interest could be determined by reference to a Replacement Rate (as defined in the Terms and Conditions), with or without the application of an Adjustment Spread (as defined in the Terms and Conditions) and may include adjustments to the Terms and Conditions of the Notes to ensure the proper operation of the Replacement Rate, all as determined by an Independent Adviser (as defined in the Terms and Conditions) or the Issuer (as the case may be). An Adjustment Spread, if applied may be positive or negative and would be applied with a view to reducing or eliminating, to the extent reasonably practicable, any transfer of economic value between the relevant Issuer and Holders arising as a result of the replacement of a Reference (Interest) Rate. However, it may not be possible to determine or apply an Adjustment Spread and even if an adjustment is applied, such Adjustment Spread may not be effective to reduce or eliminate economic prejudice to the Holders. The use of a Replacement Rate (including with the application of an Adjustment Spread) will still result in any Notes linked to or referencing a "benchmark" performing differently (which may include payment of a lower Rate of Interest) than they would if such "benchmark" were to continue to apply in its current form.

If, following the occurrence of a Rate Replacement Event, no Replacement Rate, Adjustment Spread or Replacement Rate Adjustments can be determined, the ultimate fall-back for the purposes of calculation of the Rate of Interest for a particular Interest Period will result in the Reference (Interest) Rate for the last preceding Interest Period being used. This may result in the effective application of a fixed rate of interest to Floating Rate Notes based on the Reference (Interest) Rate applicable to the last preceding Interest Period in respect of which the Reference (Interest) Rate could be determined, unless the relevant Issuer makes use of an early termination right available to it in these circumstances (in which case the risks described in "*Risk of Early Redemption*" above apply). Due to the uncertainty concerning the availability of Replacement Rates, the involvement of an Independent Adviser, and the potential for further regulatory developments, there is a risk that the relevant fall-back provisions may not operate as intended at the relevant time.

Furthermore, if the Rate of Interest payable under any Notes referencing or linked to a "benchmark" cannot be determined due to any reason other than a Rate Replacement Event certain fall-back provisions will apply with regard to interest determination. The application of these fall-back provisions could result in the same interest rate being applied to the Notes until their maturity, effectively turning the Notes, which are supposed to pay a floating rate of interest, into debt instruments with a fixed rate of interest.

Investors should consult their own independent advisers and make their own assessment about the potential risks imposed by the Benchmarks Regulation or the reforms mentioned above in making any investment decision with respect to any Notes referencing a "benchmark".

Specific Risks Arise in Case Floating Rate Notes Are Linked to LIBOR

On July 27, 2017, the Chief Executive of the United Kingdom Financial Conduct Authority (the "FCA"), which regulates LIBOR, announced that it does not intend to continue to persuade, or use its powers to compel, panel banks to submit rates for the calculation of LIBOR to the administrator of LIBOR after 2021. Specifically, the sustainability of LIBOR has been questioned as a result of the absence of relevant active underlying markets and possible disincentives (including possibly as a result of benchmark reforms) for market participants to continue contributing to such "benchmarks". The FCA has indicated through a series of announcements that the continuation of LIBOR on the current basis is not guaranteed after 2021. This may cause LIBOR to perform differently than it did in the past and may have other consequences which cannot be predicted.

Holders Are Exposed to the Risk of Early Redemption of the Notes by the Issuer

The applicable Final Terms will indicate whether the Issuer may have the right to call the Notes prior to maturity for reasons of taxation or at the option of the Issuer (optional call right) or whether the Notes will be subject to early redemption in case of the occurrence of an event specified in the applicable Conditions (early redemption event).

An optional call right is likely to limit the market value of the relevant Notes. Prior to or during any period when the Issuer may elect to redeem the Notes, the market value of those Notes generally will not rise substantially above the price at which they can be redeemed.

If the Issuer redeems the Notes prior to maturity or the Notes are subject to early redemption due to an early redemption event, a Holder of such Notes is exposed to the risk that due to early redemption his investment may have a lower than expected or even a negative yield, depending on the price at which such Holder purchased its Notes. In addition, the Holders may have to reinvest the funds they receive upon early redemption on less favourable conditions as compared to the original investment.

The Issuer might exercise its optional call right if the yield on comparable notes in the capital market falls and the Issuer's cost of any new borrowing is lower than the interest rate payable under the relevant Notes. At those times, an investor may only be able to reinvest the redemption proceeds in notes with a lower yield. Prospective investors should consider reinvestment risk in light of other investments available at the time when they are deciding whether to invest in the relevant Notes.

It should be noted that the Issuer may exercise any optional call right irrespective of the Market Interest Rates which are relevant on a certain call date.

A Holder is Subject to the Risk of Being Outvoted by a Majority Resolutions of the Holders

If the relevant Conditions provide for resolutions of Holders a Holder is subject to the risk of being outvoted by a majority resolution of the Holders. As such majority resolution properly adopted is binding on all Holders, certain rights of such Holder against the relevant Issuer under the relevant Conditions may be amended or reduced or even cancelled.

The Appointment of a Joint Representative May Restrict a Holder's Right to Pursue and Enforce its Rights Under the Conditions

If the relevant Conditions provide for the appointment of a Joint Representative it is possible that a Holder may be deprived of its individual right to pursue and enforce its rights under the relevant Conditions against the relevant Issuer, such right passing to the Joint Representative who is then exclusively responsible to claim and enforce the rights of all Holders.

3. Risks Relating to Notes Denominated in Renminbi

Restrictions on Convertibility of Renminbi and Remittance of Proceeds into or outside the PRC

At the date of this Prospectus, Renminbi is not completely freely convertible. The People's Republic of China ("**PRC**", which, for the purpose of this Prospectus shall exclude Hong Kong and Macau Special Administrative Regions of the People's Republic of China and Taiwan) government continues to regulate conversion between Renminbi and foreign currencies, including the EUR.

Remittance of Renminbi by foreign investors into the PRC for purposes such as capital contributions, known as capital account items, is generally subject to specific approvals from (or registrations with) the relevant currency control authorities or a close review by qualified local banks, on a case-by-case basis and subject to a strict monitoring system. Regulation in the PRC on the remittance of Renminbi into the PRC for settlement of capital account items is developing gradually.

Although from October 1, 2016, Renminbi has been added to the Special Drawing Rights basket created by the International Monetary Fund and policies further improving accessibility to Renminbi to settle cross-border transactions in foreign currencies were implemented by the People's Bank of China (the "**PBoC**") in 2018, there is no assurance that the PRC government will liberalise control over crossborder remittance of

Renminbi in the future or that new regulations in the PRC will not be promulgated in the future which have the effect of restricting or eliminating the remittance of Renminbi into or outside the PRC. In the event that the Issuer does remit some or all of the proceeds into the PRC in Renminbi and the Issuer subsequently is not able to repatriate funds outside the PRC in Renminbi, it will need to source Renminbi offshore to finance its obligations under the Notes, and its ability to do so will be subject to the overall availability of Renminbi outside the PRC.

Limited Availability of Renminbi Outside the PRC

As a result of the restrictions by the PRC government on cross-border Renminbi fund flows, the availability of Renminbi outside the PRC is limited. The current size of Renminbi denominated financial assets outside the PRC is also limited.

Renminbi business participating banks do not have direct Renminbi liquidity support from the PBoC. The relevant financial institution that has been permitted to engage in the settlement of current account trade transactions in Renminbi in certain financial centres and cities (the "**RMB Clearing Bank**") only has access to onshore liquidity support from the PBoC for the purpose of squaring open positions of participating banks for limited types of transactions and is not obliged to square for participating banks any open positions resulting from other foreign exchange transactions or conversion services. In such cases, the participating banks will need to source Renminbi from outside the PRC to square such open positions.

The offshore Renminbi market is subject to many constraints as a result of PRC laws and regulations on foreign exchange control. There is no assurance that no new PRC regulations will be promulgated and the agreements on the clearing of Renminbi entered into by the PBoC and the relevant RMB Clearing Bank may not be terminated or amended so as to have the effect of restricting availability of Renminbi offshore. The limited availability of Renminbi outside the PRC may affect the liquidity of the Notes. To the extent the Issuer is required to source Renminbi in the offshore market to service the Notes, there is no assurance that the Issuer will be able to source such Renminbi on satisfactory terms, if at all.

Risk of Depreciation of Renminbi

The value of Renminbi against the EUR and other foreign currencies fluctuates from time to time and is affected by changes in the PRC and international political and economic conditions as well as many other factors. In August 2015, the PBoC implemented changes to the way it calculates the midpoint against the US Dollar to take into account market-maker quotes before announcing the daily midpoint. This change, among others that may be implemented, may increase the volatility in the value of Renminbi against other currencies. The Issuer will make all payments of interest and principal with respect to the Notes in Renminbi unless otherwise specified. As a result, the value of these Renminbi payments may vary with the changes in the prevailing exchange rates in the marketplace. If the value of Renminbi depreciates against the EUR or other foreign currencies, the value of the investment made by a Holder of the Notes in EUR or any other foreign currency terms will decline.

Risk of Notes Being Settled in U.S. Dollar

If the Issuer is not able to satisfy its obligation to pay interest and principal on the Notes as a result of RMB Inconvertibility, RMB Non Transferability or RMB Illiquidity (each, as defined in the section entitled "*Terms and Conditions of the Notes*"), the Issuer shall be entitled, on giving not less than five or more than 30 calendar days' irrevocable notice to the Holders prior to the due date for payment, to settle any such payment in U.S. dollar on the due date at the US Dollar Equivalent (as defined in the section entitled "*Terms and Conditions of the Notes*") of any such interest or principal, as the case may be.

Risk of Increased Interest Rate Volatility

The PRC government has gradually liberalised its regulation of interest rates in recent years. Further liberalisation may increase interest rate volatility. In case the Notes carry a fixed interest rate, the trading price of the Notes will vary with the fluctuations in the Renminbi interest rates. If Holders of the Notes propose to sell their Notes before their maturity, they may receive an offer lower than the amount they have invested.

PRC Tax Laws

In considering whether to invest in Notes denominated in Renminbi, investors should consult their individual tax advisers with regard to the application of PRC tax laws to their particular situations as well as any tax consequences arising under the laws of any other tax jurisdictions. The value of the Holder's investment in Notes denominated in Renminbi may be materially and adversely affected if the Holder is required to pay PRC tax with respect to acquiring, holding or disposing of and receiving payments under those Notes.

4. Risks Relating to Green Bonds

The Issuers may decide to use the proceeds from any series of Notes issued under the Programme for green or environmental purposes (each such series of Notes, a "**Green Bond**"). The Final Terms for each Green Bond issued under the Programme will contain further information on the envisaged use of proceeds.

Green Bonds may not be a suitable investment for all investors seeking exposure to green assets. Prospective investors who intend to invest in Green Bonds must determine for themselves the relevance of the information in this Prospectus (in particular, regarding the reasons for the offer and the use of proceeds) for the purpose of any investment in the Green Bonds together with any other investigation such investors deem necessary. In particular, no assurance is given by the Issuers or the Dealers that the use of proceeds of the Green Bonds will meet or continue to meet on an ongoing basis any or all investor expectations regarding investment in "green bond", "green" or "sustainable" or similarly labelled projects. Furthermore, it should be noted that there is currently no clear definition (legal, regulatory or otherwise) of, nor market consensus as to what constitutes, a "green" or "sustainable" or an equivalently-labelled project or as to what precise attributes are required for a particular project to be defined as "green" or "sustainable" or such other equivalent label nor can any assurance be given that such a clear definition or consensus will develop over time.

While it is the intention of the Issuers and the Guarantor to apply the proceeds of such Green Bonds specifically for a portfolio of eligible green projects (the "**Green Projects**") as described in Daimler's Green Finance Framework, there can be no assurance that the relevant project(s) or use(s) (including those the subject of, or related to, any Green Projects) will be capable of being implemented in or substantially in such manner and/or in accordance with any timing schedule and that accordingly such proceeds will be totally or partially disbursed for such project(s) or use(s). Any such event or failure by the Issuer will not constitute an event of default under the terms and conditions of any Green Bond.

In connection with the issue of Green Bonds, the Issuers may appoint one or more external provider(s) to provide a green evaluation (the "**Green Evaluation**"). Such Green Evaluation is not incorporated in, and does not form part of, this Prospectus. Such Green Evaluation provides an opinion on certain environmental and related considerations and is not intended to address any credit, market or other aspects of an investment in Green Bonds including without limitation market price, marketability, investor preference or suitability of any security. Such Green Evaluation is a statement of opinion, not a statement of fact. Such Green Evaluation is not a recommendation to buy, sell or hold Green Bonds. No assurance is given that such Green Evaluation correctly assesses the potential environmental impact of the issue of Green Bonds or the Issuers generally. Such Green Evaluation generally is only current as of the date it is released and may be updated, suspended or withdrawn by the relevant provider(s) at any time. Currently the providers of green evaluations are not subject to any specific regulatory regime or other regime or oversight. Prospective investors must

determine for themselves the relevance of any Green Evaluation for the purpose of any investment in Green Bonds. In particular, no assurance or representation is made or given that any such Green Evaluation reflects any present or future requirements, investment criteria or guidelines which may apply to any investor or its investments. Holders of Green Bonds will have no recourse against the provider(s) of any Green Evaluation. In addition, it would not constitute an event of default under the terms and conditions of any Green Bond if the Issuer or the Guarantor (if applicable) were to fail to observe the provisions in the Final Terms for the Green Bonds relating to the use of proceeds of the Green Bonds or the Issuer's or the Guarantor's intentions as regards reporting. A negative change to, or a withdrawal of, any Green Evaluation may affect the value of the Green Bonds and may have consequences for certain investors with portfolio mandates to invest in green assets.

In the event that any of the Green Bonds are listed or admitted to trading on any dedicated "green", "environmental", "sustainable" or other similarly labelled segment of any stock exchange or securities market (whether or not regulated), or are included in any dedicated "green", "environmental", "sustainable" or other equivalently-labelled index, no representation or assurance is given by the Issuers, the Guarantor or any other person that such listing or admission, or inclusion in such index, satisfies any present or future investor expectations or requirements as regards any investment criteria or guidelines with which such investor or its investments are required to comply, whether by any present or future applicable law or regulations or by its own by-laws or other governing rules or investment portfolio mandates. Furthermore, it should be noted that the criteria for any such listings or admission to trading may vary from one stock exchange or securities market to another and also the criteria for inclusion in such index may vary from one index to another. No representation or assurance given or made by the Issuers, the Guarantor (if applicable) or any other person that any such listing or admission to trading, or inclusion in any such index, will be obtained in respect of Green Bonds or, if obtained, that any such listing or admission to trading, or inclusion in such index, will be maintained during the life of Green Bonds. Additionally, no representation or assurance is given by the Issuers, the Guarantor (if applicable) or any other person as to the suitability of Green Bonds to fulfil environmental and sustainability criteria required by prospective investors. Neither the Issuers nor the Guarantor (as applicable) are responsible for any third party assessment of the Green Bonds. Nor is any Dealer responsible for (i) any assessment of Green Bonds, or (ii) the monitoring of the use of proceeds. Any failure to apply the proceeds of Green Bonds as set out in the Final Terms for an issue of Green Bonds and/or negative change to, or withdrawal or suspension of, any Green Evaluation and/or listing or admission to trading on any stock exchange or securities market as aforesaid may have a material adverse effect on the value of Green Bonds and/or result in adverse consequences for certain investors with portfolio mandates to invest in securities to be used for a particular purpose.

5. Other Related Risks

The Notes may not be a Suitable Investment for all Investors

The Notes to be issued under the Programme may not be a suitable investment for all investors. Therefore, each potential investor in Notes must determine the suitability of that investment in light of its own circumstances. In particular, each potential investor should:

- (i) have sufficient knowledge and experience to make a meaningful evaluation of the relevant Notes, the merits and risks of investing in the relevant Notes and the information contained or incorporated by reference in this Prospectus or any applicable supplement hereto;
- (ii) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation and the investment(s) it is considering, an investment in the Notes and the impact the Notes will have on its overall investment portfolio;

- (iii) have sufficient financial resources and liquidity to bear all of the risks of an investment in the relevant Notes, including where the currency for principal or interest payments is different from the potential investor's currency;
- (iv) understand thoroughly the terms of the relevant Notes and be familiar with the behavior of any relevant indices and financial markets; and
- (v) be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

Sophisticated institutional investors generally do not purchase financial instruments as stand-alone investments. They purchase financial instruments as a way to reduce risk or enhance yield with an understood, measured, appropriate addition of risk to their overall portfolio. A potential investor should not invest in the Notes unless it has the expertise (either alone or with a financial adviser) to evaluate how the Notes will perform under changing conditions, the resulting effects on the value of the Notes and the impact this investment will have on the potential investor's overall investment portfolio.

Credit Ratings May not Reflect All Risks Associated with an Investment in the Notes

Notes to be issued under the Programme may be rated or unrated. Where a Tranche of Notes is rated, such rating will not necessarily be the same as the rating assigned to other debt securities issued by the Issuer. In addition, the rating may not reflect the potential impact of all risks relating to structure, market and other factors that may affect the value of the Notes. A credit rating is not a recommendation to buy, sell or hold securities and may be revised, suspended or withdrawn by the rating agency at any time. Any ratings assigned to debt securities of the Issuer as at the date of this Prospectus are not indicative of the future performance of the Issuer's business or its future creditworthiness.

In general, European regulated investors are restricted under the Regulation (EC) No 1060/2009 of the European Parliament and of the Council of September 16, 2009 on credit rating agencies, as amended, (the "**CRA Regulation**") from using credit ratings for regulatory purposes, unless such ratings are issued by a credit rating agency established in the EU and registered under the CRA Regulation (and such registration has not been withdrawn or suspended, subject to transitional provisions that apply in certain circumstances). Such general restriction will also apply in the case of credit ratings issued by non-EU credit rating agencies, unless the relevant credit ratings are endorsed by an EU-registered credit rating agency or the relevant non-EU rating agency is certified in accordance with the CRA Regulation (and such endorsement action or certification, as the case may be, has not been withdrawn or suspended, subject to transitional provisions that apply in certain circumstances). If the status of the rating agency rating the Notes changes, European regulated investors may no longer be able to use the rating for regulatory purposes and the Notes may have a different regulatory treatment. This may result in European regulated investors selling the Notes which may impact the value of the Notes and any secondary market. The list of registered and certified rating agencies published by the European Securities and Markets Authority ("**ESMA**") on its website in accordance with the CRA Regulation is not conclusive evidence of the status of the relevant rating agency included in such list, as there may be delays between certain supervisory measures being taken against a relevant rating agency and the publication of the updated ESMA list.

Interests of Natural and Legal Persons Involved in the Issue or the Offer

Certain of the Dealers and/or their affiliates have engaged, and may in the future engage, in investment banking and/or commercial banking transactions with, and may perform services for, the Issuer and the Guarantor (if applicable) in the ordinary course of business. In addition, in the ordinary course of their business activities, these Dealers and/or their affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including

bank loans) for their own account and for the accounts of their customers. Such investments and securities activities may involve securities and/or instruments of the Issuer or the Guarantor (if applicable). Certain of the Dealers and/or their affiliates that have a lending relationship with the Issuer or the Guarantor (if applicable) routinely hedge their credit exposure to the Issuer or the Guarantor (if applicable) consistent with their customary risk management policies. Typically, such Dealers and/or their affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in securities, including potentially the Notes. Any such short positions could adversely affect future trading prices of the Notes. The Dealers and their affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

In case the Issuer has given its General Consent to the use of this Prospectus and the relevant Final Terms any Dealer and/or further financial intermediary using this Prospectus and the relevant Final Terms shall state on its website that it uses this Prospectus and the relevant Final Terms in accordance with this consent and the conditions attached to this consent.

FORM OF THE NOTES

Each Tranche of Notes will initially be in the form of either a temporary global bearer note (the "**Temporary Global Note**"), without interest coupons, or a permanent global bearer note (the "**Permanent Global Note**" and, together with the Temporary Global Note, the "**Global Notes**"), without interest coupons, in each case as specified in the relevant Final Terms, which will be delivered on or prior to the issue date of such Tranche to a (common) depository of Clearstream Banking, S.A., Luxembourg ("**CBL**") and/or Euroclear Bank SA/NV ("**Euroclear**") or to Clearstream Banking AG ("**CBF**" and, together with CBL and Euroclear, the "**Clearing Systems**" and, each, a "**Clearing System**").

Each Global Note issued will be kept in custody by or on behalf of the relevant Clearing System that maintains a book-entry system for transfers of interest in the Global Note until all obligations thereunder have been satisfied. Definitive Notes and coupons will not be issued.

The relevant Final Terms will specify whether United States Treasury Regulation § 1.163-5(c)(2)(i)(C) or any successor provision in substantially similar form (the "**TEFRA C Rules**" or "**TEFRA C**") or United States Treasury Regulation § 1.163-5(c)(2)(i)(D) or any successor provision in substantially similar form (the "**TEFRA D Rules**" or "**TEFRA D**") are applicable in relation to the Notes or that neither the TEFRA C Rules nor the TEFRA D Rules are applicable. Each Tranche of Notes for which the relevant Final Terms specify TEFRA C will be represented by a Permanent Global Note, each Tranche of Notes for which the relevant Final Terms specify TEFRA D will initially be represented by a Temporary Global Note exchangeable for a Permanent Global Note and each Tranche of Notes for which the relevant Final Terms specify that neither the TEFRA C Rules nor the TEFRA D Rules are applicable will be represented by a Permanent Global Note.

It is the intention of DFNA that each Tranche of Notes issued by DFNA (the "**U.S. Notes**") will be treated as "immobilized" and issued in registered form for U.S. federal income tax purposes. Each U.S. Note will be represented by a Global Note (the "**U.S. Global Note**"). U.S. Global Notes will only be issued to CBF pursuant to a book-entry registration agreement (the "**Book-Entry Registration Agreement**") and may not be delivered, sold, assigned or otherwise transferred by CBF except (i) to a successor custodian that agrees to hold the U.S. Global Notes on the same terms as set forth in the Book-Entry Registration Agreement or (ii) to DFNA for cancellation. Pursuant to the Book-Entry Registration Agreement, CBF will be appointed as registrar in respect of the U.S. Notes. As agent of DFNA, CBF will maintain (i) a register showing the aggregate number of U.S. Notes represented by each U.S. Global Note until all obligations of DFNA under the U.S. Notes have been satisfied, and (ii) records of the holders of interests in the U.S. Notes represented by the U.S. Global Note (the "**Register**"). CBF will hold the U.S. Global Notes in custody for the holders of interests in the U.S. Notes as evidenced by the Register until all obligations of DFNA under the U.S. Notes have been satisfied. CBF and DFNA will provide a certified copy of a U.S. Global Note to any holder of an interest in such U.S. Global Note upon request. Such copy shall not itself be an enforceable bearer instrument.

Payment of interest on the U.S. Notes will be made only after delivery of a properly completed U.S. Internal Revenue Service (IRS) form certifying that the holder is a non-United States person and demonstrating a complete exemption from withholding taxes pursuant to Sections 1471 through 1474 of the U.S. Internal Revenue Code of 1986 in respect of interest payments.

Temporary Global Note Exchangeable for Permanent Global Note

If the relevant Final Terms specify the form of the Notes as being "Temporary Global Note exchangeable for Permanent Global Note", the Notes will initially be in the form of a Temporary Global Note, without interest coupons, which will be exchangeable for interests in a Permanent Global Note, without interest coupons, not earlier than 40 days (or later than 180 days) after the issue date of the relevant Tranche of the Notes (the "**Exchange Date**") upon certification as to non-U.S. beneficial ownership. No payments of principal, interest

or any other amounts will be made under the Temporary Global Note prior to such certification of non-U.S. beneficial ownership having been received by the relevant Clearing System and such Clearing System having given a like certification (based on the certifications it has received) to the Issuing Agent.

Whenever any interest in the Temporary Global Note is to be exchanged for an interest in a Permanent Global Note, the Issuer shall procure (in the case of first exchange) the prompt delivery (free of charge to the bearer) of such Permanent Global Note to the bearer of the Temporary Global Note or (in the case of any subsequent exchange) an increase in the principal amount of the Permanent Global Note in accordance with its terms against:

- (i) presentation and (in the case of final exchange) surrender of the Temporary Global Note at the specified office of the Issuing Agent; and
- (ii) receipt by the Issuing Agent of a certificate or certificates of non-U.S. beneficial ownership.

The principal amount of the Permanent Global Note shall be equal to the aggregate of the principal amounts specified in the certificates of non-U.S. beneficial ownership; provided, however, that in no circumstances shall the principal amount of the Permanent Global Note exceed the initial principal amount of the Temporary Global Note. Payments of principal, interest (if any) or any other amounts on a Permanent Global Note will be made through the relevant Clearing System (against presentation or surrender (as the case may be) of the Permanent Global Note) without any requirement for certification.

Terms and Conditions of the Notes Applicable to the Notes

The Terms and Conditions of the Notes applicable to any Global Note will be attached to such Global Note, as more fully described in the section entitled "*Issue Procedures*".

Legend Concerning United States Persons

In the case of a Tranche issued in accordance with TEFRA C or TEFRA D, any Global Note will bear a legend to the following effect:

"ANY UNITED STATES PERSON WHO HOLDS THIS OBLIGATION WILL BE SUBJECT TO LIMITATIONS UNDER THE UNITED STATES INCOME TAX LAWS, INCLUDING THE LIMITATIONS PROVIDED IN SECTIONS 165(j) AND 1287(a) OF THE INTERNAL REVENUE CODE."

The sections referred to provide that United States Holders, with certain exceptions, will not be entitled to deduct any loss on a Note and will not be entitled to capital gains treatment of any gain on any sale, disposition, redemption or payment of principal in respect of such Note.

ISSUE PROCEDURES

General

The Issuer and the relevant Dealer will agree on the terms and conditions applicable to each particular Tranche of Notes (the "**Conditions**"). These Conditions will be constituted by the relevant set of terms and conditions set out in the section entitled "*Terms and Conditions of the Notes*" (the "**Terms and Conditions**") as completed by the Final Terms (the "**Final Terms**") as described below.

Sets of Terms and Conditions

A separate set of Terms and Conditions shall apply to each type of Notes, as set out below. The Final Terms shall provide for the Issuer to choose among the following Options:

Option I - Terms and Conditions for Notes with fixed interest rates; and

Option II - Terms and Conditions for Notes with floating interest rates.

Documentation of the Conditions

The Issuer shall document the Conditions in any of the following ways:

- The Final Terms shall determine whether Option I or Option II and whether certain further options contained in Option I or Option II shall be applicable to the individual issue of Notes by replicating the relevant provisions of, and completing the relevant placeholders set out in, Option I or Option II in the Final Terms. The replicated and completed provisions of the set of Terms and Conditions alone shall constitute the Conditions (the "**Integrated Conditions**"). The Integrated Conditions shall be attached to each global note representing the Notes of the relevant Tranche. The Issuer shall document the Conditions in this way if the Notes shall be publicly offered, in whole or in part, or initially distributed, in whole or in part, to non-qualified investors.
- Alternatively, the Final Terms shall determine whether Option I or Option II and whether certain further options contained in Option I or Option II shall be applicable to the individual issue of Notes by making reference to the specific sections of the relevant set of Terms and Conditions. The Final Terms and the relevant set of Terms and Conditions (the "**Long-form Conditions**"), taken together, shall constitute the Conditions. The Final Terms and the Long-form Conditions shall be attached to each global note representing the Notes of the relevant Tranche.

Determination of Options / Completion of Placeholders

The Final Terms shall determine whether Option I or Option II shall be applicable to the individual issue of Notes. Each set of Terms and Conditions constituting Option I or Option II contains certain further options (characterised by indicating the respective optional provision through instructions and explanatory notes set out in square brackets within the text of the relevant set of Terms and Conditions as set out in this Prospectus) as well as placeholders (characterised by square brackets which include the relevant items) which shall be determined by the Final Terms as follows:

Determination of Options

The Issuer shall determine which options shall be applicable to the individual issue of Notes by either replicating the relevant provisions in the Final Terms or by making reference in the Final Terms to the relevant sections of the relevant set of Terms and Conditions. If the Final Terms do not replicate or make reference to an

alternative or optional provision (as set out in the relevant set of Terms and Conditions) such provision shall be deemed to have been deleted from the Conditions.

Completion of Placeholders

The Final Terms shall specify the information completing the placeholders in the relevant set of Terms and Conditions. In case the provisions of the Final Terms and the relevant set of Terms and Conditions, taken together, shall constitute the Conditions the relevant set of Terms and Conditions shall be deemed to have been completed by the information contained in the Final Terms as if such information were inserted in the placeholders of such provisions.

In that case, all instructions and explanatory notes and text set out in square brackets in the relevant set of Terms and Conditions and any footnotes and explanatory text set out in the Final Terms shall be deemed to have been deleted from the Conditions.

Binding Language

The Terms and Conditions have been prepared in the German and the English language. The following shall apply with regard to the language in which the Conditions shall be prepared:

- In the case of Notes which shall be (i) publicly offered, in whole or in part, or (ii) initially distributed, in whole or in part, to non-qualified investors, German will be the binding language. If, in the event of such public offer or distribution to non-qualified investors, however, English is chosen as the binding language, a German language translation of the Conditions shall be either set out in the relevant Final Terms or be available from the principal offices of the Issuing Agent and the Issuer as specified at the back of this Prospectus.
- In other cases the Issuer shall elect either German or English to be the binding language.

FORM OF THE FINAL TERMS MUSTER DER ENDGÜLTIGEN BEDINGUNGEN

Set out below is the form of Final Terms which will be completed for each Tranche of Notes to be issued under the Programme.

[[Verbot des Verkaufs an Kleinanleger im europäischen Wirtschaftsraum oder im Vereinigten Königreich

Die Schuldverschreibungen sind nicht zum Angebot, zum Verkauf oder zur sonstigen Zurverfügungstellung an Kleinanleger im Europäischen Wirtschaftsraum ("EWR") oder im Vereinigten Königreich ("UK") bestimmt und sollten Kleinanlegern im EWR oder in UK nicht angeboten, nicht an diese verkauft und diesen auch nicht in sonstiger Weise zur Verfügung gestellt werden. Entsprechend wurde kein nach der Verordnung (EU) Nr. 1286/2014 in der jeweils geltenden Fassung (die "**PRIIP-Verordnung**") erforderliches Basisinformationsblatt für das Angebot oder den Verkauf oder die sonstige Zurverfügungstellung der Schuldverschreibungen an Kleinanleger im EWR oder in UK erstellt; daher kann das Angebot oder der Verkauf oder die sonstige Zurverfügungstellung der Schuldverschreibungen an Kleinanleger im EWR oder in UK nach der PRIIP-Verordnung rechtswidrig sein. Für die Zwecke dieser Bestimmung bezeichnet der Begriff Kleinanleger eine Person, die eines (oder mehrere) der folgenden Kriterien erfüllt: (i) sie ist ein Kleinanleger im Sinne von Artikel 4 Abs. 1 Nr. 11 der Richtlinie 2014/65/EU in der jeweils geltenden Fassung ("**MiFID II**"); (ii) sie ist ein Kunde im Sinne der Richtlinie (EU) 2016/97 des Europäischen Parlaments und des Rates vom 20. "Anpassungsspanne" bezeichnet die (positive oder negative) Differenz oder eine Formel oder Methode zur Bestimmung einer solchen Differenz, welche nach Festlegung der Jeweiligen Festlegenden Stelle auf die Ersatzrate anzuwenden ist, um eine Verlagerung des wirtschaftlichen Wertes zwischen der Emittentin und den Gläubigern, die ohne diese Anpassung infolge der Ersetzung des Referenzzinssatzes durch die Ersatzrate entstehen würde (einschließlich, aber ohne hierauf begrenzt zu sein, infolgedessen, dass die Ersatzrate eine risikofreie Rate ist), soweit sinnvollerweise möglich, zu reduzieren oder auszuschließen. Bei der Festlegung der Anpassungsspanne sind die Relevanten Leitlinien zu berücksichtigen.

Portfolio Changes

The BMW Group and Daimler have pooled their mobility services to create a new global player providing sustainable urban mobility for customers.

After the closing of the joint venture agreement, the BMW Group and Daimler held a joint press conference in February 2019 where they stated that they plan to invest more than €1 billion in the expansion and the closer integration of their existing services in the areas of ride hailing, multimodal platforms, car sharing, parking and charging. In doing so, they will systematically utilize the opportunities offered by digitization, shared services and customers' increasing mobility needs. In the period from February until the end of 2019, 588 million transactions were conducted through the YOUR NOW joint-venture group. The products and services of the joint ventures have been further systematically focused on customer requirements and consolidated into three pillars: 1. FREE NOW & REACH NOW. 2. SHARE NOW. 3. PARK NOW & CHARGE NOW. The establishment of a new parent company on January 1, 2020 supports the management of these three pillars.

In March 2019, DAG and Zhejiang Geely Holding Group announced the establishment of a globally oriented 50:50 joint venture. Its aim is to turn smart into one of the leading brands for electric mobility. The joint-venture agreement stipulates that the next generation of electric smart models will be manufactured in a new electric vehicle factory in China that will be especially built for this purpose. Global sales are scheduled to begin in 2022.

In March 2019, Daimler Trucks and Torc Robotics announced that they are to form a partnership for the marketing of automated trucks in the United States. The two companies agreed that Daimler Trucks and Buses US Holding LLC, a subsidiary of Daimler Truck AG, would acquire a majority of the shares in Torc Robotics in order to link the businesses. Daimler Trucks and Torc Robotics augment one another with regard to resources, expertise and capabilities. The acquisition of the majority interest was concluded in the third quarter of 2019.

In July 2019, Daimler and BMW Group began to cooperate on automated driving. The two companies signed an agreement governing their long-term strategic collaboration in this area. Daimler and BMW Group

plan to jointly develop the next generation of technology for driving assistance systems and automated driving on highways, as well as for automated parking functions. Moreover, the partners intend to conduct talks concerning a possible expansion of their partnership to include higher levels of automation in urban environments. This underscores the long-term, sustainable nature of the partnership, which will develop into a scalable platform for automated driving. The partnership is open to other automakers and technology partners. In addition, the results of the partnership are to be offered to other OEMs for licensing purposes. Among other things, the partnership aims to quickly launch the technology on the market. The first systems are scheduled to become available for privately owned cars in 2024. Each company will individually implement the results of the development cooperation in its own products. More than 1,200 experts will probably work in this partnership, some of them in mixed teams. Their tasks will include the design of a scalable architecture for driver-assistance systems including sensors, the creation of a joint computer center for the storage, administration and processing of data, and the development of various functions and software.

Principal Future Investments

Investments and expenditure on research and development

In order to utilize the opportunities offered by the international automotive markets and to help actively shape the coming transformation of mobility, Daimler will continue to invest substantially in new products, innovative technologies and state-of-the-art production facilities in the coming years. One focus of Daimler's efforts will be on the future-oriented fields of digitization, autonomous driving and electric mobility. Daimler plans to invest approximately €14 billion in property, plant and equipment in 2020 and 2021, as well as nearly €19 billion in research and development projects. Daimler will therefore continue to maintain a high level of investment in order to safeguard the future of the company. The decrease in investment volume from the 2019 figure is in part because Daimler will be making much more efficient use of its financial resources and will also focus more strongly on issues that are important for the future of the Group. During the year 2019, Daimler also entered into several partnerships in areas that will play a key role in the future of mobility. This will enable Daimler to limit its own expenditure and ensures its access to new technologies. Over the medium and long term, DAG expects investment and expenditure on research and development to be reduced, step by step, to below the extraordinarily high levels of recent years. This should be achieved in part by reducing the number of vehicle architectures and platforms at Mercedes-Benz and a decrease in their complexity, in addition to lower investment in traditional drive systems.

Investment in property, plant and equipment will mainly be applied to prepare for the production of Daimler's new models. Other focal points will be the realignment of Daimler's manufacturing facilities in Germany, increased local production in the growth markets and the development of a global production network for electric vehicles and batteries.

Most of Daimler's expenditure for research and development will flow into new products. Key individual projects include the successor models of the C-Class and the S-Class and new vehicles from our EQ electric mobility brand. Other key areas at its automotive divisions include innovative drive-system and safety technologies, the connectivity of its products and the further development of automated and autonomous driving. The plans of Daimler also call for substantial funds to be invested in particular in its comprehensive electric mobility offensive at all of its automotive divisions.

Investment in property, plant and equipment

	2018	2019	2020-2021 (planned)
	(in billions of €)		
Daimler Group	7.5	7.2	13.8
Mercedes-Benz Cars & Vans	6.2	5.9	11.3
Daimler Trucks & Buses	1.2	1.1	2.3
Daimler Mobility	0.06	0.09	0.1
Corporate	0.1	0.1	0.1

Research and development expenditure

	2018	2019	2020-2021 (planned)
	(in billions of €)		
Daimler Group	9.1	9.7	18.8
Mercedes-Benz Cars & Vans	7.6	8.1	15.5
Daimler Trucks & Buses	1.5	1.7	3.3

As part of the measures Daimler is taking to safeguard liquidity and cut costs due to the COVID-19 pandemic, Daimler will also reduce its planned investment in property, plant and equipment and its research and development expenditure. However, Daimler will continue to maintain the advance expenditures that serve to ensure the future viability of the Group. Overall, Daimler assumes that investment in property, plant and equipment and research and development expenditure will be lower than in 2019.

Refinancing Measures

The funds raised by Daimler in the year 2019 primarily served to refinance the leasing and sales-financing business. For that purpose, Daimler made use of a broad spectrum of various financing instruments in various currencies and markets. They include bank loans, commercial paper in the money market, bonds with medium and long maturities, promissory-note loans, customer deposits at Mercedes-Benz Bank, and the securitization of receivables from customers in the financial services business (asset-backed securities).

4. Business Overview

DAG is the parent company of the Daimler Group and its headquarters are in Stuttgart. With the new corporate structure, effective as of January 1, 2020, the Group's business operations under the umbrella of Daimler AG are no longer managed in five divisions, but in three. With the new structure, DAG carries out the functions of steering and governance and provides services for the companies of the Group. As the parent company, it also defines the Group's strategy, makes strategic decisions for business operations, and ensures the effectiveness of organizational, legal, and compliance-related functions throughout the Group.

The statement of investments in affiliated and related companies as of December 31, 2019 is set out in note 41 (*Additional Information*) in the notes to the Annual Consolidated Financial Statements 2019 incorporated by reference into this Prospectus.

Principal Activities

The Daimler Group which includes DAG and its consolidated subsidiaries is a vehicle manufacturer with a wide product range of automobiles, trucks, vans and buses. The product portfolio is completed by a range of tailored automotive and financial services.

With its brands, Daimler is active in nearly all the countries of the world. The Group has production facilities in Europe, North and South America, Asia and Africa.

In 2019, Daimler increased its revenue by 3% to €172.7 billion. The Group's five divisions contributed to this total as follows: Mercedes-Benz Cars 52%, Daimler Trucks 22%, Mercedes-Benz Vans 8%, Daimler

Buses 3% and Daimler Mobility 15%. At the end of 2019, Daimler employed a total workforce of more than 298,000 people worldwide.

The products supplied by the **Mercedes-Benz Cars** division comprise a broad spectrum of premium vehicles of the Mercedes-Benz brand, the Mercedes-AMG high-performance brand and the Mercedes-Maybach luxury brand. These vehicles range from compact models to a highly varied portfolio of off-road vehicles, roadsters, coupes and convertibles, and to the S-Class luxury sedans. The product range is rounded out by the Mercedes me brand and the high-quality small cars of the smart brand. In 2016, Daimler launched the new EQ (Electric Intelligence) brand for all of its activities related to electric mobility. The most important markets for Mercedes-Benz Cars in 2019 were China with 29% of unit sales, Germany (14%), the other European markets (28%), the United States (13%), South Korea (3%) and Japan (3%). The Mercedes-Benz Cars division is continuously refining its flexible production network consisting of a total of more than 30 locations on four continents.

Daimler Trucks develops and produces vehicles in a global network under the brands Mercedes-Benz, Freightliner, Western Star, FUSO and BharatBenz. The division's 30 production facilities are located in the NAFTA region (17), Europe (7), Asia (4) and South America (2). In China, Beijing Foton Daimler Automotive Co., Ltd. (BFDA), a joint venture with our Chinese partner Beiqi Foton Motor Co., Ltd., has been producing trucks under the Auman brand name since 2012. Daimler Trucks' product range includes light-, medium- and heavy-duty trucks for long-distance, distribution and construction-site haulage, as well as special vehicles that are used mainly in municipal applications. Due to close links in terms of production technology, the division's product range also includes buses of the Thomas Built Buses and FUSO brands. The activities related to electric mobility have been combined at the E-Mobility Group since 2018. The division offers and tests locally emission-free electric drive systems across its entire product range. Daimler Trucks' most important sales markets in 2019 were the NAFTA region with 41% of unit sales, Asia with 28% and the EU30 region (European Union, Switzerland and Norway) with 16%.

Mercedes-Benz Vans is a global supplier of a complete portfolio of vans and related services. The division's products range from the Citan small van with a gross vehicle weight of 1.8 metric tons to the Sprinter large van with a gross vehicle weight of up to 5.5 metric tons. The models offered in the commercial segment comprise the Sprinter large van, the Vito mid-size van (marketed as the "Metris" in the United States) and the Citan urban delivery van. In the segment for private customers, Mercedes-Benz Vans offers the V-Class multipurpose vehicle, the Marco Polo travel vans and recreational vehicles. The Mercedes-Benz Vans division has manufacturing facilities in Germany, Spain, the United States, Argentina, China and Russia. The division is active in the Chinese market through the joint venture Fujian Benz Automotive Ltd. Production of the Citan is part of the strategic alliance with Renault-Nissan-Mitsubishi. The most important markets for vans are the EU30 region, which accounted for 68% of unit sales in the year under review, the NAFTA region (13%) and Asia (9%).

The **Daimler Buses** division with its Mercedes-Benz and Setra brands is a manufacturer for buses above 8 metric tons in its most important traditional core markets: the EU30 region, Brazil, Argentina and Mexico. The division's product range comprises city and intercity buses, touring coaches and bus chassis. The largest of the division's 14 production plants are located in Germany, France, Spain, Turkey, Argentina, Brazil, Mexico and India. In 2019, Daimler Buses generated 68% of its revenue in the EU30 region and 15% in Latin America (excluding Mexico). Whereas Daimler mainly sells complete buses in Europe, its business in Latin America, Mexico, Africa and Asia focuses on the production and distribution of bus chassis.

The **Daimler Mobility** division supports the sales of the Daimler Group's automotive brands with tailored financial services. These services range from leasing, financing and insurance solutions to commercial fleet management services. In addition, the division is a strategic investor in mobility services for ride hailing, multimodal platforms, car sharing, parking and charging. The mobility services of the "YOUR NOW" joint ventures between Daimler and BMW have been consolidated in three units as of January 1, 2020: FREE NOW & REACH NOW, SHARE NOW, PARK NOW & CHARGE NOW. The mobility eco-system is

rounded out by flexible-use services from Daimler Mobility such as Mercedes-Benz Rent (rental vehicles) and Mercedes me Flexperience (a car-on-demand solution). During the year 2019 Daimler Mobility financed or leased approximately 50% of the vehicles sold by the Group. The division's contract volume of €162.8 billion covers more than 5.4 million vehicles. Daimler Mobility operates in 40 countries and employs approximately 13,000 people.

Daimler is active in the global automotive industry and related sectors through a broad network of subsidiaries, associated companies and partnerships. The statement of investments of Daimler AG in accordance with Section 313 of the German Commercial Code (HGB) can be found in note 41 of the Notes to the Annual Consolidated Financial Statements 2019 of DAG incorporated by reference into this Prospectus.

5. Trend Information and Significant Change in Daimler's Financial Position

The negative impact of the COVID-19 pandemic on Daimler's business, cash flows, financial condition, liquidity and results of operations in the first quarter 2020 is reflected in the Unaudited Interim Consolidated Financial Statements Q1 2020 of DAG, incorporated by reference into this Prospectus. Any further negative economic effects of the ongoing spread of COVID-19 on Daimler cannot be adequately determined or reliably quantified for the time being, however, a continuing COVID-19 pandemic will have a significant negative impact on Daimler's business, cash flows, financial condition, liquidity and results of operations. A possibly even more serious development of the COVID-19 pandemic, especially if the restrictive measures remain in force significantly longer and are stricter than expected or in the event of a second massive worldwide wave of infections, would on the one hand result in an even deeper slump for the global economy. On the other hand, these scenarios would not only affect the development of the Group's unit sales but could also have a more significant impact than initially assumed on production, the procurement market and the supply chain.

Other than as set out above, there has been no material adverse change in the prospects of DAG since the date of its last published audited financial statements as of December 31, 2019, and there has been no significant change in the financial performance, and no significant change in the financial position, of the Group since March 31, 2020, being the end of the last financial period for which financial information has been published by DAG.

Audit Committee

The Audit Committee of DAG (the "**Audit Committee**") is composed of four members, who are elected by a majority of the votes cast on the relevant resolution of the Supervisory Board. The Chairman of the Supervisory Board is not simultaneously the Chairman of the Audit Committee.

Both the Chairman of the Audit Committee, Dr. Clemens Börsig, and the other shareholder representative on the Audit Committee, Joe Kaeser, fulfill the criteria for independence and have expertise in the field of financial reporting, as well as special knowledge and experience in the application of accounting principles and methods of internal control.

Current members of the Audit Committee are:

Dr. Clemens Börsig – Chairman
Michael Brecht*
Joe Kaeser
Ergun Lümali

* Representative of the employees

The Audit Committee deals with the supervision of the accounting process and the annual external audit. At least once a year, it discusses with the Board of Management the effectiveness and functionality of the risk management system, the internal control and auditing system and the compliance management system. It regularly receives reports on the work of the Internal Auditing department and the Compliance Organization. At least four times a year, the Audit Committee receives a report from the Business Practices Office on complaints and information about any breaches of regulations or guidelines by high-level executives. It regularly receives information about the handling of these complaints and notifications.

The Audit Committee discusses with the Board of Management the interim reports on the first quarter, first half and first nine months of the year before they are published. On the basis of the report of the external auditors, the Audit Committee reviews the annual company financial statements and the annual consolidated financial statements, as well as the combined management report of the company and the Group, and discusses them with the external auditors. Since 2014, the responsible auditor at KPMG AG Wirtschaftsprüfungsgesellschaft, the company of auditors commissioned to carry out the external audit 2017, has been Dr. Axel Thümmler. The Audit Committee makes a proposal to the Supervisory Board on the adoption of the annual company financial statements of DAG, on the approval of the annual consolidated financial statements and on the appropriation of profits.

The Audit Committee also makes recommendations for the proposal on the election of external auditors, assesses those auditors' suitability and independence, and, after the external auditors are elected by the Annual Shareholders' Meeting, it engages them to conduct the annual audit of the company and consolidated financial statements and to review the interim reports, negotiates an audit fee and determines the focus of the annual audit. The external auditors report to the Audit Committee on all accounting matters that might be regarded as critical and on any material weaknesses of the internal control and risk management system with regard to accounting that might be discovered during the audit.

Finally, the Audit Committee approves services that are not directly related to the annual audit provided by the firm of external auditors or its affiliates to DAG or to companies of the Group.

Corporate Governance

Declaration by the Board of Management and Supervisory Board of DAG pursuant to Section 161 of the German Stock Corporation Act (*Aktiengesetz*) regarding the German Corporate Governance Code (the "Code")

Daimler AG satisfies the recommendations of the German Corporate Governance Code published in the official section of the German Federal Gazette on April 24, 2017 in the Code version dated February 7, 2017, with the exception of Clause 3.8 Paragraph 3 (D & O insurance deductible for the Supervisory Board) and will continue to observe the recommendations with the aforesaid deviation. Since the issuance of the last compliance declaration in December 2016, Daimler AG has observed the recommendations of the German Corporate Governance Code in the version dated May 5, 2015, published on June 12, 2015, with the aforementioned exception as well as with a deviation from Clause 5.4.1 Paragraph 2 (Specific objectives for the composition of the Supervisory Board) declared as a precautionary measure.

D & O insurance deductible for the Supervisory Board (Clause 3.8 Paragraph 3)

As in previous years, the Directors' & Officers' liability insurance (D&O insurance) also contains a provision for a deductible for the members of the Supervisory Board, which is appropriate in the view of DAG. However, this deductible does not correspond to the legally required deductible for members of the Board of Management in the amount of at least 10% of the damage up to at least one and a half of the fixed annual remuneration. Since the remuneration structure of the Supervisory Board is limited to function-related fixed remuneration without performance bonus components, setting a deductible for Supervisory Board members in the amount of 1.5 times the fixed annual remuneration would have a disproportionate economic impact when compared with the members of the Board of Management, whose compensation consists of fixed and performance bonus components.

Maximum number of supervisory board memberships for members of the management board of a listed corporation (Clause 5.4.5 Paragraph 1 Sentence 2).

In accordance with this recommendation, the management board of a listed corporation shall not accept more than a total of three supervisory board memberships in non-group listed corporations or on supervisory bodies of non-group entities that make similar requirements. Whether the number of supervisory board memberships held by a member of the management board of a listed corporation still seems appropriate should, however, be assessed more appropriately on a case-by-case basis than with a rigid upper limit. The individual workload expected for a member of a management board as a result of the total number of memberships held does not necessarily increase in proportion to their number.

9. Financial Information Concerning DAG's Assets and Liabilities, Financial Position and Profit and Losses

Historical Financial Information

The Annual Consolidated Financial Statements 2019 of DAG as set out in the DAG Annual Report 2019, the Annual Consolidated Financial Statements 2018 of DAG as set out in the DAG Annual Report 2018 and the

Unaudited Interim Consolidated Financial Statements Q1 2020 of DAG as set out in the Interim Report Q1 2020 are incorporated by reference into this Prospectus.

Legal and Arbitration Proceedings

DAG and its subsidiaries are confronted with various legal proceedings, claims as well as governmental investigations and orders (legal proceedings) on a large number of topics, including vehicle safety, emissions, fuel economy, financial services, dealer, supplier and other contractual relationships, intellectual property rights, product warranties, environmental matters, antitrust matters (including actions for damages) and shareholder matters. Legal proceedings relating to products deal with claims on account of alleged vehicle defects. Some of these claims are asserted by way of class action suits. If the outcome of such legal proceedings is detrimental to Daimler, the Group may be required to pay substantial compensatory and punitive damages or to undertake service actions, recall campaigns, monetary penalties or other costly actions. Legal proceedings may have an impact on the Group's reputation.

Diesel emission behavior: Class-action and other lawsuits in the United States, Canada and Germany

Several consumer class-action lawsuits were filed against Mercedes-Benz USA, LLC (MBUSA) in federal courts in the United States in early 2016. The main allegation was the use of devices that impermissibly impair the effectiveness of emission control systems in reducing nitrogen-oxide (NO_x) emissions and which cause excessive emissions from vehicles with diesel engines. In addition, plaintiffs alleged that consumers were deliberately deceived in connection with the advertising of Mercedes-Benz diesel vehicles. Those consumer class actions were consolidated into one class action pending against both DAG and MBUSA in the US District Court for the District of New Jersey, in which the plaintiffs asserted various grounds for monetary relief on behalf of a nationwide class of persons or entities who owned or leased certain models of Mercedes-Benz diesel vehicles as of February 18, 2016. DAG and MBUSA moved to dismiss the lawsuit in its entirety. By order dated December 6, 2016, the court granted DAG's and MBUSA's motion to dismiss and dismissed the lawsuit without prejudice, based on plaintiffs' failure to allege with sufficient specificity the advertising that they contended had misled them. Plaintiffs subsequently filed an amended class action complaint in the same court making similar allegations. The amended complaint also adds as defendants Robert Bosch LLC and Robert Bosch GmbH (collectively; "**Bosch**"), and alleges that DAG and MBUSA conspired with Bosch to deceive US regulators and consumers. On February 1, 2019, the court granted in part and denied in part DAG and MBUSA's subsequent motion to dismiss. The case is ongoing as the court's decision merely addressed certain legal aspects of plaintiffs' claims and did not decide whether the plaintiffs can ultimately prove their claims, whether the plaintiffs' allegations are true, or whether their claims have merit.

On January 8, 2019, the Arizona State Attorney General filed a civil complaint in the Arizona State Court against DAG and MBUSA making similar allegations that Arizona consumers had been deliberately deceived in connection with the advertising of Mercedes-Benz diesel vehicles. The state seeks monetary penalties for violation of Arizona's consumer protection laws.

Another consumer class-action lawsuit against DAG and other companies of the Group containing similar allegations was filed in Canada in April 2016. On June 29, 2017, the court granted a procedural motion to certify certain issues for class treatment, and on March 12, 2018, the court ordered the parties to send a notice to the class by May 18, 2018, informing class members that the litigation is ongoing and that they will be bound by the outcome. That notice was sent, and class members had until July 20, 2018 to opt out of the class to avoid being bound by subsequent rulings in the case.

On July 14, 2017, an additional class action was filed in the Superior Court of California, Los Angeles County, against DAG and other companies of the Group, alleging claims similar to the existing US class action. That action was removed to federal court and, on October 31, 2017, was transferred to the District Court of New Jersey. On December 21, 2017, the parties stipulated to dismiss, without prejudice, that lawsuit. It may be filed again under specific conditions.

In Germany, a multitude of lawsuits by investors alleging the violation of disclosure requirements is pending against Daimler. In addition, some investors have raised out-of-court claims for damages. The investors contend that DAG did not immediately disclose inside information in connection with the emission behavior of its diesel vehicles and that it had made false and misleading public statements. They further claim that the purchase price of the financial instruments acquired by them (in particular DAG shares) would have been lower if DAG had correctly complied with its disclosure duties. In this context, both investors as well as DAG have filed motions to initiate a model proceeding in accordance with the Act on Model Proceedings in Capital Markets Disputes (KapMuG). Currently, no model proceeding is pending.

Diesel emission behavior: Governmental proceedings

Furthermore, several federal and state authorities and other institutions worldwide have inquired about and/or are/have been conducting investigations and/or administrative proceedings and/or have issued administrative orders or, in the case of the Stuttgart district attorney's office, a fine notice. These particularly relate to test results, the emission control systems used in Mercedes-Benz diesel vehicles and/or Daimler's interaction with the relevant federal and state authorities as well as related legal issues and implications, including, but not limited to, under applicable environmental, criminal and antitrust laws. These authorities and institutions include, among others, the US Department of Justice ("**DOJ**"), which in April 2016 requested that DAG review its certification and admissions processes related to exhaust emissions of diesel vehicles in the United States by way of an internal investigation in cooperation with the DOJ, the US Environmental Protection Agency (EPA), the California Air Resources Board (CARB) and other US state authorities, the South Korean Ministry of Environment (MoE) and the South Korean competition authority (Korea Fair Trade Commission (KFTC)), the European Commission, the German Federal Cartel Office (*Bundeskartellamt*) as well as national antitrust authorities and other authorities of various foreign states as well as the German Federal Ministry of Transport and Digital Infrastructure (BMVI) and the German Federal Motor Transport Authority ("**KBA**"). In the course of its formal investigation into possible collusion on clean emission technology, the European Commission sent a statement of objections to Daimler and other automobile manufacturers in April 2019. In this context, DAG filed an application for immunity from fines (leniency application) with the European Commission some time ago. The Stuttgart district attorney's office is conducting criminal investigation proceedings against Daimler employees concerning the suspicion of fraud and criminal advertising, and, in May 2017, searched the premises of Daimler at several locations in Germany. In February 2019, the Stuttgart district attorney's office also initiated a formal investigation proceeding against DAG with respect to an administrative offense. In September 2019, the Stuttgart district attorney's office issued a fine notice against Daimler based on a negligent violation of supervisory duties in the amount of €870 million which has become legally binding, thereby concluding the administrative offense proceedings against Daimler.

Since 2018, KBA has issued various administrative orders holding that certain calibrations of specified functionalities in certain Mercedes-Benz diesel vehicles are to be qualified as impermissible defeat devices and ordered subsequent auxiliary provisions for the respective EC type approvals in this respect, including mandatory recalls and, in certain cases, stops of the first registration. In addition and since 2018, Daimler has (in view of KBA's interpretation of the law as a precaution) implemented a temporary delivery and registration stop with respect to certain models, also covering the used-car, leasing and financing businesses, and is constantly reviewing whether it can lift this delivery and registration stop in whole or in part. Daimler has filed timely objections against the KBA's administrative orders in order to have the open legal issues resolved, if necessary, also by a court of law. In the course of its regular market supervision, KBA is routinely conducting further reviews of Mercedes-Benz vehicles and is asking questions about technical elements of the vehicles. In light of the aforementioned administrative orders issued by, and continued discussions with, the KBA, it is likely that in the course of the ongoing and/or further investigations, KBA will issue additional administrative orders holding that other Mercedes-Benz diesel vehicles are also equipped with impermissible defeat devices. The new calibrations requested by KBA are being processed, and for a certain proportion of the vehicles, the relevant software has already been approved by KBA; the related recalls have insofar been initiated. It cannot be ruled out that software updates may be reworked,

further delivery and registration stops may be ordered or resolved by Daimler as a precautionary measure, also with a view to the used car, leasing and financing businesses, under the relevant circumstances.

Daimler is conducting further investigations and otherwise continues to fully cooperate with the authorities and institutions.

Except for the Stuttgart district attorney's office's administrative offense proceedings, the aforementioned inquiries, investigations, administrative proceedings and the replies to these related information requests, as well as the objection proceedings against the administrative orders are ongoing.

Accounting assessment of the legal proceedings in connection with diesel emission behavior

With respect to the legal proceedings described in the two preceding chapters, in accordance with IAS 37.92 no further information is disclosed with respect to whether, or to what extent, provisions have been recognized and/or contingent liabilities have been disclosed, so as not to prejudice Daimler's position.

Antitrust law proceedings (including actions for damages)

Starting on July 25, 2017, a number of class actions have been filed in the United States and Canada against DAG and other manufacturers of automobiles as well as various of their North American subsidiaries. Plaintiffs allege to have suffered damages because defendants engaged in anticompetitive behavior relating to vehicle technology, costs, suppliers, markets, and other competitive attributes, including diesel emissions control technology, since the 1990s. On October 4, 2017, all pending US class actions were centralized in one proceeding by the Judicial Panel on multidistrict litigation and transferred to the US District Court for the Northern District of California. On March 15, 2018, plaintiffs in the US class action amended and consolidated their complaints into two pleadings, one on behalf of consumers and the other on behalf of dealers. On June 17, 2019, the court granted motions to dismiss in the consolidated US class action proceedings, albeit with leave to amend, and on August 15, 2019, the plaintiffs filed amended complaints making similar allegations. On March 31, 2020, the court granted motions to dismiss these first amended US class action complaints, albeit with leave to amend. The plaintiffs have until May 15, 2020 to file second amended complaints.

In this context, DAG may disclose that it filed a leniency application with the European Commission some time ago. In late October 2017, the European Commission conducted preannounced inspections with Daimler in Stuttgart (as well as further inspections with other manufacturers) in order to further clarify the facts of the case. In the third quarter of 2018, the European Commission opened a formal investigation into possible collusion on clean emission technology. In the course of such investigation, the European Commission, in April 2019, sent a statement of objections to DAG and other automobile manufacturers to which DAG responded in good time.

Following the settlement decision by the European Commission adopted on July 19, 2016, concluding the trucks antitrust proceedings, DAG and Daimler Truck AG are facing customers' claims for damages to a considerable degree. Respective legal actions, class actions and other forms of legal redress have been initiated in various states in and outside of Europe and should further be expected. Daimler is taking appropriate legal remedies to defend itself. In accordance with IAS 37.92, no further information is disclosed with respect to whether, or to what extent, provisions have been recognized and/or contingent liabilities have been disclosed, so as not to prejudice DAG's position.

Class-action lawsuits Takata airbag inflators

Class actions in connection with Takata airbags are pending in Canada, the United States and Israel. The lawsuits are based on the allegation that, along with Takata entities and many other companies that sold vehicles equipped with Takata airbag inflators, Daimler entities were allegedly negligent in selling such vehicles, purportedly not recalling them quickly enough, and failing to provide an adequate replacement airbag inflator. In detail: In August 2016, Mercedes-Benz Canada (MB Canada) was added as a defendant to

a putative nationwide class action pending in Ontario Superior Court. In addition, DAG and MBUSA were named as defendants along with Takata companies in June 2017, in a US nationwide class action, which was filed in New Jersey Federal Court. In the third quarter of 2017, such lawsuit was transferred to federal court in the Southern District of Florida for consolidation with other multidistrict litigation proceedings.

Further class action lawsuits in the USA were integrated into the multiple district proceedings. In an order entered on June 21, 2019, the court dismissed all consumer claims against DAG and some consumer claims against MBUSA. However, one of the multidistrict litigation complaints has been amended to assert claims by automotive recyclers who allege injury because they are not able to re-sell salvaged airbag inflators that are subject to the Takata recall. The motions to dismiss against that complaint are still pending. In February 2019, DAG and its non-subsidiary Israeli distributor (Colmobil) were named as defendants in an Israel-wide class action alleging inadequacy of Takata recall efforts in Israel. A lawsuit filed by the State of New Mexico against MBUSA was dismissed without prejudice on June 22, 2017. It may, however, be filed again under specific conditions. Contingent liabilities were disclosed to a low extent for this topic.

Toll Collect

On July 4, 2018, through its subsidiary Daimler Financial Services AG (since July 23, 2019 Daimler Mobility AG), DAG together with Deutsche Telekom AG notarized a settlement agreement (hereinafter: settlement) with the Federal Republic of Germany which settles all arbitration proceedings in connection with the involvement in the Toll Collect consortium, which have been ongoing since 2004 and on July 6, 2018, the arbitral tribunal issued an arbitration ruling on agreed terms terminating the Toll Collect arbitration proceedings on the basis of the settlement. The final operating permit for the toll system was granted within the scope of the settlement.

As a result of the settlement, in the second quarter of 2018, the profit/loss on equity-method investments in the Daimler Mobility segment includes expenses of €418 million. The earnings of the Daimler Mobility segment were reduced in particular due to the existing 50% obligation of Daimler Financial Services AG to pay €550 million to Toll Collect GbR, which is partially offset by provisions recognized in previous years. In the third quarters of 2019 and 2018, Daimler Mobility AG recorded cash out-flows of €200 million each. The last tranche of €150 million will be paid in the third quarter of 2020. All known and unknown claims from the toll agreement that arose until March 31, 2018 are settled under the settlement provided that the related damage occurred before March 31, 2018.

Irrespective of the settlement, the guarantee relating to the operating agreement or other additional agreements remain unchanged. No guarantee claims have been made so far.

The statements regarding legal proceedings set out above are to be read in conjunction with Notes 23 (*Provisions for other risks*), 30 (*Legal proceedings*) and 31 (*Contingent liabilities and other financial obligations*) to the Annual Consolidated Financial Statements 2019 of DAG, incorporated by reference in this Prospectus.

10. Additional Information

Share Capital

DAG's capital stock consists of ordinary shares without par value (*Stückaktien*). The ordinary shares are issued in registered form. Under DAG's Articles of Incorporation, each ordinary share represents one vote. Major shareholders do not have different voting rights.

As at the date of this Prospectus, the share capital of DAG amounted to approximately €3,070 million divided in 1,069,837,447 registered ordinary shares of no par value. Each share represents a nominal value of approximately €2.87 of capital stock. The shares are fully paid.

11. Material Contracts

There are no material contracts that have been entered into in the ordinary course of DAG's business, which could result in any Group member being under an obligation or entitlement that is material to DAG's ability to meet its obligation to Holders in respect of the Notes to be issued under the Programme.

12. Ratings

DAG has received the following short-term and long-term ratings from DBRS Limited ("**DBRS**"), Fitch Ratings España S.A.U. ("**Fitch**"), Moody's Deutschland GmbH ("**Moody's**"), Scope Ratings GmbH ("**Scope**") and S&P Global Ratings Europe Limited ("**Standard & Poor's**").

Short-term ratings:

DBRS: R-1 (low)

Fitch: F-1

Moody's: P-2

Scope: S-1

Standard & Poor's: A-2

Long-term ratings:

DBRS: A; outlook under review with negative implications

Fitch: BBB+; outlook stable

Moody's: A3; outlook under review for possible downgrade

Scope: A; outlook stable

Standard & Poor's: BBB+; outlook negative

For the purposes of DBRS ratings, an R-1 (low) rating means good credit quality. The capacity for the payment of short-term financial obligations as they fall due is substantial. Overall strength is not as favourable as higher rating categories. May be vulnerable to future events, but qualifying negative factors are considered manageable. An A rating means good credit quality. The capacity for the payment of financial obligations is substantial, but of lesser credit quality than AA. May be vulnerable to future events, but qualifying negative factors are considered manageable. All long-term rating categories other than AAA and D also contain subcategories "(high)" and "(low)". The absence of either a "(high)" or "(low)" designation indicates the rating is in the middle of the category. Rating trends provide guidance in respect of DBRS's opinion regarding the outlook for the rating in question, with rating trends falling into one of three categories - "Positive", "Stable" or "Negative". The rating trend indicates the direction in which DBRS considers the rating is headed should present tendencies continue, or in some cases, unless challenges are addressed. In general, the DBRS view is based primarily on an evaluation of the entity itself, but may also include consideration of the outlook for the industry or industries in which the entity operates.

For the purposes of Fitch ratings, an F-1 rating means the strongest intrinsic capacity for timely payment of financial commitments. A BBB' rating indicates that expectations of default risk are currently low. The capacity for payment of financial commitments is considered adequate, but adverse business or economic

conditions are more likely to impair this capacity. The modifiers "+" or "-" may be appended to a rating to denote relative status within major rating categories. Rating outlooks indicate the direction a rating is likely to move over a one- to two-year period. They reflect financial or other trends that have not yet reached the level that would trigger a rating action, but which may do so if such trends continue.

For the purposes of Moody's ratings, a P-2 rating means that an issuer has a strong ability to repay short-term debt obligations. An A rating means that an obligation is judged to be upper-medium grade and is subject to low credit risk. Moody's appends numerical modifiers 1, 2 and 3 to each generic rating classification from Aa through Caa. The modifier 3 indicates a ranking in the lower range of that generic rating category. A Moody's rating outlook is an opinion regarding the likely direction of an issuer's rating over the medium term. Where assigned, rating outlooks fall into the following four categories: Positive, Negative, Stable, and Developing. Moody's uses the watchlist to indicate that a rating is under review for possible change in the short-term. A rating can be placed on review for possible upgrade, on review for possible downgrade, or more rarely with direction uncertain. A credit is removed from the watchlist when the rating is upgraded, downgraded or confirmed.

For the purposes of Scope ratings, an S-1 rating reflects an opinion of very low credit risk with high capacity to repay short-term obligations. An A rating reflects an opinion of strong credit quality. Scope's long-term ratings are expressed with symbols from 'AAA to D', with '+' and '-' as additional sub-categories for each category from 'AA' to 'B' (inclusive), that is, 20 levels in total. A rating can be accompanied by a rating outlook, which can be 'Stable', 'Positive' or 'Negative'. The 'Positive' and 'Negative' outlooks normally refer to a time period of 12-18 months. These outlooks do not necessarily signal that rating upgrades or downgrades, respectively, will automatically follow.

For the purposes of Standard & Poor's ratings, an A-2 rating means that an obligor has satisfactory capacity to meet its financial commitments but is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligors in the higher-rated categories. A BBB rating means that an obligor has adequate capacity to meet its financial commitments. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitments. The ratings from "AA" to "CCC" may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories. A Standard & Poor's rating outlook assesses the potential direction of a long-term credit rating over the intermediate term (typically six months to two years). In determining a rating outlook, consideration is given to any changes in the economic and/or fundamental business conditions. An outlook is not necessarily a precursor of a rating change or future CreditWatch action. A negative outlook means that a rating may be lowered.

In case Notes to be issued by DAG under the Programme will be rated such ratings and, in case of Notes other than Wholesale Notes, any explanations of the meanings of such ratings published by the rating agencies will be set out in the relevant Final Terms.

13. Recent Developments

On February 19, 2020, it was announced that DAG's Supervisory Board extended the contract of Hubertus Troska, who is in the Board of Management responsible for Greater China, until December 31, 2025. On the same date, it was announced that the Supervisory Board of DAG has decided to propose to the Annual General Meeting that Timotheus Höttges be elected to the Supervisory Board as a member representing the shareholders with effect from the end of the Annual General Meeting 2020. Paul Achleitner will step down from the Supervisory Board of DAG with effect from the end of the Annual Shareholder's Meeting 2020.

As announced on February 20, 2020, DAG has further developed its organizational structure with the goal of improving the development and production processes for vehicles, technologies and services through closer and more efficient collaboration. Several restructuring measures took effect on April 1, 2020. For the area of Mercedes-Benz Cars, the position of Product Strategy and Steering has been newly created. Furthermore, Ola Källenius has assumed overall responsibility for the Mercedes-Benz Vans division. Markus Schäfer, currently Member of the Boards of Management of DAG and Mercedes-Benz AG responsible for Group Research and Mercedes-Benz Cars Development, Procurement and Supplier Quality, will in the future be responsible at DAG level as Chief Operating Officer for the technical value-added process of Mercedes-Benz Cars – from development and materials purchasing to production. Harald Wilhelm, Member of the Board of Management of DAG responsible for Finance & Controlling and Daimler Mobility, is also Member of the Board of Management for Finance at Mercedes-Benz AG.

Due to the worsening situation of the COVID-19 pandemic, the Daimler Group decided on March 17, 2020 to suspend the majority of its production in Europe, as well as work in selected administrative departments, for an initial period of two weeks. The suspension applied to Daimler's car, van and commercial vehicle plants in Europe. Later on, the suspension was prolonged in Europe and extended to the respective plants in the U.S., Latin America, Africa and India. The Board of Management and the general works council (*Gesamtbetriebsrat*) of DAG decided to apply for short-time working (*Kurzarbeit*) for a majority of its production and selected administrative departments in Germany as of April 6, 2020.

The Board of Management decided not to hold the Annual Shareholders' Meeting as planned on April 1, 2020, but to postpone it until later in 2020, aiming for July 8, 2020. This inevitably results in the corresponding postponement of the resolution on the appropriation of profit and the dividend payment.

On April 1, 2020, DAG has increased its financial flexibility with a further credit line of €12 billion. This is in addition to the existing, not yet utilized, €11 billion revolving credit facility with a term until 2025 including extension options. The additional credit line was agreed with a consortium of international banks and can be utilized in a twelve-month period with two six-month extension options.

In April 2020, the Volvo Group and Daimler Truck AG signed a preliminary, non-binding agreement to establish a new joint venture. The intention is to develop, produce and commercialize fuel-cell systems for use in heavy-duty commercial vehicles and other applications.

Following review and approval by the relevant competition authorities, the transaction is expected to be closed in the second half of 2020. It is planned that the Volvo Group and Daimler Truck AG will each hold a 50% interest in the joint venture. To make the joint venture possible, Daimler will concentrate all of its Group-wide fuel-cell activities in new fuel cell entities. The Volvo Group will acquire 50% of the joint venture for approximately €0.6 billion.

Organizational Structure

MBAP is a wholly-owned subsidiary of DAP which in turn is a wholly-owned subsidiary of Mercedes-Benz AG which in turn is a wholly-owned subsidiary of DAG. MBAP does not have any subsidiaries of its own.

MBAP is dependent upon its parent company DAP which in turn is dependent upon its ultimate parent company DAG.

Principal Activities

MBAP's principal activities are the importation, marketing and distribution of the Group's range of passenger vehicles and associated spare parts. With effect from October 1, 2017, the importation, marketing and distribution of heavy commercial vehicles including buses has been transferred from MBAP to newly established DAP subsidiary, Daimler Truck and Bus Australia Pacific Pty Ltd (ABN 86 618 413 282) ("**Daimler Truck and Bus**"), and the importation, marketing and distribution of vans was transferred to newly established DAP subsidiary, Mercedes-Benz Vans Australia Pacific Pty Ltd (ABN 16 618 413 362). With effect from January 1, 2019, the vans business was transferred back to MBAP and with effect from October 31, 2019 Daimler Truck and Bus was transferred to the newly established Daimler Truck and Bus Holding Australia Pacific Pty Ltd (ABN 62 629 141 699), a subsidiary of Daimler Truck and Bus AG. 5. Trend Information and Significant Change in MBAP's Financial Position

The negative economic effects of the ongoing spread of COVID-19 on Daimler including MBAP as a subsidiary of DAG cannot be adequately determined or reliably quantified for the time being, however, a continuing COVID-19 pandemic will have a significant negative impact on the business, cash flows, financial condition, liquidity and results of operations of Daimler including MBAP as a subsidiary of DAG. A possibly even more serious development of the COVID-19 pandemic, especially if the restrictive measures remain in force significantly longer and are stricter than expected or in the event of a second massive worldwide wave of infections would on the one hand result in an even deeper slump for the global economy. On the other hand, these scenarios would not only affect the development of the Group's unit sales but could also have a more significant impact than initially assumed on production, the procurement market and the supply chain of the Group which, in turn, could also affect the business, cash flows, financial condition, liquidity and results of operations of Daimler including MBAP as a subsidiary of DAG.

Other than as set out above, there has been no material adverse change in the prospects of MBAP since the date of its last published audited financial statements as of December 31, 2019.

4. Business Overview

Organizational Structure

DCFI is a wholly-owned subsidiary of DAG. DCFI is dependent upon its parent company DAG. DCFI does not have any subsidiaries of its own.

Principal Activities

DCFI was formed to access Canadian and foreign capital markets to raise funds which it lends to the DAG subsidiaries in Canada through a consolidated funding and cash management system. DCFI acts as a financial clearing entity for DAG subsidiaries in Canada by providing appropriate capital funding through outside finance sources as well as through self-generated resources within the DAG subsidiaries in Canada. DCFI does not carry on an operating business. DCFI's key tasks are to provide short and long-term liquidity which serves as a basis for the expansion of the activities of the DAG subsidiaries in Canada and to increase the efficiency and profitability of their financial operations. DCFI also provides cash concentration services to DAG subsidiaries in Canada. Because of its aforementioned purpose, DCFI does not have any markets in which it competes.

5. Trend Information and Significant Change in DCFI's Financial Position

The negative economic effects of the ongoing spread of COVID-19 on Daimler including DCFI as a subsidiary of DAG cannot be adequately determined or reliably quantified for the time being, however, a continuing COVID-19 pandemic will have a significant negative impact on the business, cash flows, financial condition, liquidity and results of operations of Daimler including DCFI as a subsidiary of DAG. A possibly even more serious development of the COVID-19 pandemic, especially if the restrictive measures remain in force significantly longer and are stricter than expected or in the event of a second massive worldwide wave of infections would on the one hand result in an even deeper slump for the global economy. On the other hand, these scenarios would not only affect the development of the Group's unit sales but could also have a more significant impact than initially assumed on production, the procurement market and the

supply chain of the Group which, in turn, could also affect the business, cash flows, financial condition, liquidity and results of operations of Daimler including DCFI as a subsidiary of DAG.

Other than as set out above, there has been no material adverse change in the prospects of DCFI since the date of its last published audited financial statements as of December 31, 2019.

In the financial performance and in the financial position of DCFI there has been no significant change since the date of its last published audited financial statements as of December 31, 2019.

DFNA accesses U.S. and foreign capital markets to raise funds, which it lends to Daimler North America Corporation through a consolidated funding and cash management system. As such, it has transactions and relationships with companies in the Group. In July 2007, DFNA was substituted for Daimler North America Corporation as an issuer of notes and assumed all of the rights and obligations for such notes, amounting to US \$25,948 million. DAG issued full and unconditional guarantees for DFNA's obligations incurred under its outstanding notes and bonds programs. At the same time, DFNA and Daimler North America Corporation entered into an intercompany loan agreement which is intended to mirror DFNA's external borrowings such that interest expense with third parties is offset by corresponding interest income from Daimler North America Corporation. Because of its aforementioned purpose, DFNA does not have any markets in which it competes.

5. Trend Information and Significant Change in MBFJ's Financial Position

The negative economic effects of the ongoing spread of COVID-19 on Daimler including MBFJ as a subsidiary of DAG cannot be adequately determined or reliably quantified for the time being, however, a continuing COVID-19 pandemic will have a significant negative impact on the business, cash flows, financial condition, liquidity and results of operations of Daimler including MBFJ as a subsidiary of DAG. A possibly even more serious development of the COVID-19 pandemic, especially if the restrictive measures remain in force significantly longer and are stricter than expected or in the event of a second massive worldwide wave of infections would on the one hand result in an even deeper slump for the global economy. On the other hand, these scenarios would not only affect the development of the Group's unit sales but could also have a more significant impact than initially assumed on production, the procurement market and the supply chain of the Group which, in turn, could also affect the business, cash flows, financial condition, liquidity and results of operations of Daimler including MBFJ as a subsidiary of DAG.

Other than as set out above, there has been no material adverse change in the prospects of MBFJ since the date of its last published audited financial statements as of December 31, 2019.

For the purposes of this provision, the expression an "**offer of Notes to the public**" in relation to any Notes in any Relevant State means the communication in any form and by any means of sufficient information on the terms of the offer and the Notes to be offered so as to enable an investor to decide to purchase or subscribe the Notes, and the expression "**Prospectus Regulation**" means Regulation (EU) 2017/1129 of the European Parliament and of the Council of June 14, 2017 on the prospectus to be published when securities are offered to the public or admitted to trading on a regulated market and repealing Directive 2003/71/EC.
