guaranteed by

ALLIANZ SE

Under this Base Prospectus, Allianz SE, Allianz Finance II B.V. and Allianz Finance III B.V. (the "**Issuers**" and each an "**Issuer**"), subject to compliance with all relevant laws, regulations and directives, may from time to time issue unsubordinated bearer notes in a minimum denomination of € 1,000 per Note (together the "**Notes**"). The aggregate principal amount of Notes issued under the Debt Issuance Programme described in this Base Prospectus (the "**Programme**") outstanding will not at any time exceed € 25,000,000,000 (or the equivalent in other currencies). Notes issued by Allianz Finance II B.V. or issued by Allianz Finance III B.V. will be guaranteed by Allianz SE (in such capacity the "**Guarantor**"). The principal amount of the Notes, the issue currency, the interest payable in respect of the Notes, the issue prices and maturities of the Notes and all other terms and conditions which are applicable to a particular Series and, if applicable, Tranche of Notes (each term as defined below, see "General description of the Programme") will be set out in the document containing the final terms (each "**Final Terms**") within the meaning of Art. 26(5) of the Prospectus Regulation.

The Commission de Surveillance du Secteur Financier (the "**CSSF**") of the Grand Duchy of Luxembourg in its capacity as competent authority (the "**Competent Authority**") under the Prospectus Directive has approved this Base Prospectus as a base prospectus within the meaning of Art. 5(4) of the Prospectus Directive pursuant to article 7 of the Luxembourg act relating to prospectuses for securities (*loi relative aux prospectus pour valeurs mobilières*) dated 10 July 2005, as amended, which implements the Prospectus Directive into Luxembourg law (the "**Luxembourg Prospectus Law**"). By approving this Base Prospectus, CSSF gives no undertaking as to the economic and financial soundness of the operation or the quality or solvency of the Issuers and the Guarantor (if any).

Application has also been made to the Luxembourg Stock Exchange for Notes issued under the Programme for the period of twelve months from the date of the publication of this Base Prospectus to be listed on the official list of the Luxembourg Stock Exchange (the "**Official List**") and to be admitted to trading on the Luxembourg Stock Exchange's regulated market "Bourse de Luxembourg", appearing on the list of regulated markets issued by the European Commission, and may be made on any other regulated market in a Member State (a "**Regulated Market**") of the European Economic Area ("**EEA**"). The Luxembourg Stock Exchange's regulated market is a Regulated Market for the purposes of the Markets in Financial Instruments Directive 2014/65/EU (as amended, "**MiFID II**"). However, Notes may be listed on any other stock exchange or may be unlisted as specified in the relevant Final Terms.

The Notes may be offered to the public in the Grand Duchy of Luxembourg ("**Luxembourg**"). The Issuer may request the CSSF in its capacity as Competent Authority under Luxembourg Prospectus Law to provide competent authorities in host Member States within the EEA with a certificate of approval attesting that the Base Prospectus has been drawn up in accordance with the Luxembourg Prospectus Law ("**Notification**").

Each Tranche of Notes will be represented on issue either by a temporary global note (each a "**Temporary Global Note**") or a permanent global note (each a "**Permanent Global Note**") only (the Temporary Global Note and the Permanent Global Note, each a "**Global Note**"). Interests in a Temporary Global Note will be exchangeable, in whole or in part, for interest in a Permanent Global Note on or after the date 40 days after the later of the commencement of the offering and the relevant

issue date (the "**Exchange Date**"), upon certification as to non-U.S. beneficial ownership. The Notes are intended to be held in a manner which would allow Eurosystem eligibility. Therefore, the Global Notes will be deposited on the issue date either (i) in classical global note form with Clearstream Banking AG, Frankfurt am Main ("**Clearstream, Frankfurt**") or (ii) in new global note form with a common safekeeper for Euroclear Bank SA/NV ("**Euroclear**") and Clearstream Banking, société anonyme ("**Clearstream, Luxembourg**") and/or any other agreed clearing system. It does not necessarily mean that the Notes will be recognised as eligible collateral for Eurosystem monetary policy and intra-day credit operations by the Eurosystem either upon issue or at any or all times during their life. Such recognition will depend upon satisfaction of the Eurosystem eligibility criteria applicable from time to time.

This Base Prospectus will be published in electronic form on the website of the Luxembourg Stock Exchange (www.bourse.lu). This Base Prospectus is valid for a period of twelve months after its approval.

Arranger

Commerzbank

This Base Prospectus comprises three base prospectuses for the purposes of giving information with regard to the Issuers, the Guarantor, the Guarantor and its subsidiaries taken as a whole (the "**Group**" or "**Allianz Group**") and the Notes which, according to the particular nature of the Issuers, the Guarantor and the Notes, is necessary to enable investors to make an informed assessment of the assets and liabilities, financial position, profit and losses and prospects of the Issuers and the Guarantor.

Allianz Finance II B.V. in respect of itself only, Allianz Finance III B.V. in respect of itself only and Allianz SE in their capacity as issuers (the "**Issuers**" and each an "**Issuer**") and Allianz SE in its capacity as Guarantor (the "**Guarantor**") accept responsibility for the information contained in this Base Prospectus. To the best of the knowledge of the Issuers and the Guarantor, having taken all reasonable care to ensure that such is the case, the information contained in this Base Prospectus is in accordance with the facts and does not omit anything likely to affect its import.

This Base Prospectus is to be read in conjunction with those pages of the documents which are incorporated herein by reference (see "Documents Incorporated by Reference" below).

No person has been authorised to give any information or to make any representation other than those contained in this Base Prospectus in connection with the issue or sale of the Notes and, if given or made, such information or representation must not be relied upon as having been authorised by the Issuers, the Guarantor or the Arranger or any Dealer (as defined in "Overview of the Programme"). Neither the delivery of this Base Prospectus nor any sale made in connection herewith shall, under any circumstances, create any implication that there has been no change in the affairs of each of the Issuers or the Guarantor since the date hereof or the date upon which this Base Prospectus has been most recently supplemented or that there has been no adverse change in the financial position of each of the Issuers or the Group since the date hereof or the date upon which this Base Prospectus has been most recently supplemented or that any other information supplied in connection with the Programme is correct as of any time subsequent to the date on which it is supplied or, if different, the date indicated in the document containing the same.

The distribution of this Base Prospectus and the offering or sale of the Notes in certain jurisdictions may be restricted by law. Persons into whose possession this Base Prospectus comes are required by the Issuers, the Guarantor and the Arranger to inform themselves about and to observe any such restriction. Neither the Notes nor any guarantee in respect of the Notes have been or will be registered under the U.S. Securities Act of 1933, as amended (the "**Securities Act**") or with any securities regulatory authority of any state or other jurisdiction of the United States. The Notes will be issued in bearer form and are subject to certain U.S. tax law requirements. Subject to certain exceptions, Notes may not be offered, sold or delivered within the United States or to, or for the account or benefit of, any U.S. person. The term "U.S. person" has the meaning ascribed to it in Regulation S under the Securities Act ("**Regulation S**") and the U.S. Internal Revenue Code of 1986, as amended (the "**Code**") and regulations thereunder. The Notes are being offered and sold outside the United States to non-U.S. persons pursuant to Regulation S and may not be legally or beneficially owned at any time by any U.S. person. For a description of certain restrictions on offers and sales of Notes and on distribution of this Base Prospectus, see "Subscription and Sale".

This Base Prospectus does not constitute an offer of, or an invitation by or on behalf of the Issuers, the Guarantor or any Dealer to subscribe for, or purchase, any Notes.

MIFID II PRODUCT GOVERNANCE / TARGET MARKET – The Final Terms in respect of any Notes will include a legend entitled "MiFID II Product Governance" which will outline the target market assessment in respect of the Notes and which channels for distribution of the Notes are appropriate. Any person subsequently offering, selling or recommending the Notes (a "**distributor**") should take into consideration the target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the target market assessment) and determining appropriate distribution channels.

A determination will be made in relation to each issue about whether, for the purpose of the MiFID Product Governance rules under EU Delegated Directive 2017/593 (the "**MiFID Product Governance Rules**"), any Dealer subscribing for any Notes is a manufacturer in respect of such Notes, but otherwise neither the Arranger nor the Dealers nor any of their respective affiliates will be a manufacturer for the purpose of the MiFID Product Governance Rules.

PRIIPs / IMPORTANT – EEA RETAIL INVESTORS – If the Final Terms in respect of any Notes include a legend entitled "*Prohibition of Sales to EEA Retail Investors*", the Notes are not intended to be offered, sold or otherwise made available to and, with effect from such date, should not be offered, sold or otherwise made available to any retail investor in the EEA. For these purposes, a retail investor means a person who is one (or

more) of: (i) a retail client as defined in point (11) of Article 4(1) of MiFID II; (ii) a customer within the meaning of Directive 2002/92/EC (the "**Insurance Mediation Directive**"), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in the Prospectus Directive. Consequently, no key information document required by Regulation (EU) No 1286/2014 (the "**PRIIPs Regulation**") for offering or selling the Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

BENCHMARK REGULATION STATEMENT IN RELATION TO ADMINISTRATOR'S REGISTRATION – Amounts payable under floating rate Notes issued under the Programme are calculated by reference to (i) the Euro Interbank Offered Rate ("**EURIBOR**") which is provided by the European Money Markets Institute ("**EMMI**"), or (ii) the London Interbank Offered Rate ("**LIBOR**") which is provided by the ICE Benchmark Association ("**IBA**"). As at the date of this Prospectus, each of EMMI and IBA does not appear on the register of administrators and benchmarks established and maintained by the European Securities and Markets Authority ("**ESMA**") pursuant to Article 36 of the Benchmark Regulation (Regulation (EU) 2016/1011) (the "**Benchmark Regulation**"). As far as the Issuers are aware, the transitional provisions in Article 51 of the Benchmark Regulation apply, such that EMMI and IBA are not currently required to obtain authorisation or registration (or, if located outside the European Union, recognition, endorsement or equivalence).

The Arranger and the Dealers have not separately verified the information contained in this Base Prospectus. Neither the Arranger nor any of the Dealers makes any representation, expressly or implied, or accepts any responsibility, with respect to the accuracy or completeness of any information contained in this Base Prospectus. Neither this Base Prospectus nor any other financial statements are intended to provide the basis of any credit or other evaluation and should not be considered as a recommendation by any of the Issuers, the Guarantor, the Arranger or the Dealers that any recipient of this Base Prospectus or any other financial statements should purchase the Notes. Each potential purchaser of Notes should determine for itself the relevance of the information contained in this Base Prospectus and its purchase of Notes should be based upon such investigation as it deems necessary. None of the Arranger or the Dealers undertakes to review the financial condition or affairs of each of the Issuers or the Guarantor during the life of the arrangements contemplated by this Base Prospectus nor to advise any investor or potential investor in the Notes of any information coming to the attention of any of the Dealers or the Arranger.

This Base Prospectus may only be used for the purpose for which it has been published.

Prospective investors should have regard to the factors described under the section headed "Risk Factors" in this Base Prospectus. This Base Prospectus identifies in general terms certain information that a prospective investor should consider prior to making an investment in the Notes. However, a prospective investor should conduct its own thorough analysis (including its own accounting, legal and tax analysis) prior to deciding whether to invest in any Notes issued under the Programme as any evaluation of the suitability for an investor of an investment in Notes issued under the Programme depends upon a prospective investor's particular financial and other circumstances, as well as on specific terms of the relevant Notes and, if it does not have experience in financial, business and investment matters sufficient to permit it to make such a determination, it should consult its financial adviser prior to deciding to make an investment on the suitability of any Notes.

In connection with the issue of any Tranche (as defined below), the Dealer or Dealers (if any) acting as stabilisation manager(s) (the "**Stabilisation Manager(s)**") (or a person acting on behalf of any Stabilisation Manager(s)) in the applicable Final Terms may over-allot Notes or effect transactions with a view to supporting the market price of the Notes at a level higher than that which might otherwise prevail. However, stabilisation may not necessarily occur. Any stabilisation action may begin on or after the date on which adequate public disclosure of the terms of the offer of the relevant Tranche is made and, if begun, may cease at any time, but it must end no later than the earlier of 30 calendar days after the issue date of the relevant Tranche and 60 calendar days after the date of the allotment of the relevant Tranche or, as the case may be, such other date(s) as may be applicable to any such stabilising activities in the jurisdiction where such stabilising activities are to be effected. Any stabilisation action or over-allotment must be conducted by the relevant Stabilisation Manager(s) (or a person acting on behalf of any Stabilisation Manager(s)) in accordance with all applicable laws and rules.

Certain terms used in this Base Prospectus and financial measures presented in the documents incorporated by reference are not recognized financial measures under IFRS ("**Alternative Performance Measures**") and may therefore not be considered as an alternative to the financial measures defined in the accounting standards in accordance with generally accepted accounting principles. The Issuers have provided these Alternative Performance Measures because they believe they provide investors with additional information to assess the economic situation of the Issuers' business activities. The definition of the Alternative Performance Measures

may vary from the definition of identically named alternative performance measures used by other companies. The Alternative Performance Measures used by the Issuers should not be considered as an alternative to measures derived in accordance with IFRS as measures of operating performance. These Alternative Performance Measures have limitations as analytical tools and should not be considered in isolation or as substitutes for analysis of results as reported under IFRS.

In this Base Prospectus, unless otherwise specified or the context otherwise requires, references to "**CHF**" are to the currency of Switzerland, references to "**EUR**", "euro", "Euro" and "€" are to the currency introduced at the third stage of European economic and monetary union pursuant to the Treaty establishing the European Community as amended by the Treaty on European Union, references to "Sterling" and "£" are to the currency of the United Kingdom and references to "**US\$**", "**USD**" and "**U.S. dollars**" are to the currency of the United States.

- B.4b** Known trends affecting the Issuer and the industries in which it operates In the property-casualty sector, premium growth is expected to accelerate in 2018, reflecting higher inflation and the ongoing broad based recovery of the global economy. In the life sector, global industry profitability could also improve in 2018, albeit only modestly. The improvement would be mainly a result of recent management actions which steered insurance portfolios towards less capital intensive business lines and investment portfolios towards riskier but higher-yielding asset classes. For the asset management industry, 2018 might bring higher financial market volatility due to the geopolitical uncertainty.
- B.5** Description of the group and the Issuer's position within the group Allianz Group is present in over 70 countries and offers a comprehensive range of insurance and asset management products and services to 88 million insured customers. Allianz Group's business activities are first organized by product and type of service based on how these are strategically managed: insurance activities, asset management activities and corporate and other activities. Market Risks

The market expectations as to the prospects and the profitability of Allianz SE have been and may continue to be volatile.

As in the last global financial crisis the Allianz Group may be adversely affected by the development of the global economy in general and global financial markets in particular. The Allianz Group's management cannot assess how the global economy and the global capital markets will develop in the future.

Interest rate volatility and persisting low interest rates may adversely affect the Allianz Group's results of operations and economic capitalization.

The Allianz Group is exposed to equity and alternative investments risks that could impair the value of the Allianz Group's portfolio and adversely impact the Allianz Group's financial position and results of operations.

The Allianz Group is exposed to inflation risk and credit spread risk.

Changes in value relative to the Euro of non-Euro zone currencies in which the Allianz Group generates revenues and incurs expenses could adversely affect the Allianz Group's reported earnings and cash flow.

Credit Risks

The Allianz Group companies are subject to a potential economic loss in the value of its portfolio that would result from either changes in the credit quality of counterparties ("migration risk") or the inability or unwillingness of a counterparty to fulfill contractual obligations ("default risk"), which in each case may materially and adversely affect the Allianz Group's business or results of operations.

Risks arising from the nature of the Allianz Group's business

Intense competition in the German market as well as in other markets could materially adversely affect the Allianz Group's revenues and profitability.

The Allianz Group's financial results may be materially adversely affected by the occurrence of natural catastrophes and man-made disasters (including acts of terrorism).

Loss reserves for the Allianz Group's Property-Casualty insurance and reinsurance policies are based on estimates as to claims liabilities. Adverse developments relating to claims could lead to further reserve additions and materially adversely impact the Allianz Group's results of operations.

Actuarial experience and other factors could differ from that assumed in the calculation of Life/Health actuarial reserves and pension liabilities.

If the Allianz Group's asset management business underperforms, it may experience a decline in assets under management, related fee income and a reduction of performance fees.

Business Risks

Allianz Group is exposed to business risks which include cost risks and policyholder behaviour risks.

Operational Risks

Allianz Group is exposed to risks resulting from clients, products & business practices, execution, delivery and process management as well as other operational risks.

Risks arising from legal and regulatory conditions

Changes in existing, or new, government laws and regulations, or enforcement initiatives in respect thereof, in the countries in which the Allianz Group companies operate may materially impact the Allianz Group and could adversely affect the Allianz Group's business.

Allianz Group is exposed to the risk of regulatory actions in case of a breach of regulatory capital requirements.

The Allianz Group's business may be negatively affected by adverse publicity, regulatory actions or litigation with respect to the Allianz Group, other well-known companies and the financial services industry generally.

Other risks

Many of the Allianz Group's businesses are dependent on the financial strength and credit ratings assigned to the Allianz Group companies and their businesses by various rating agencies. Therefore, a downgrade in their ratings may materially adversely affect relationships with customers and intermediaries, negatively impact sales of their products and increase their cost of borrowing.

Allianz Group is exposed to strategic risks such as the decrease in the Allianz Group's value arising from adverse management decisions on business strategies and their implementation.

The Allianz Group's financial condition, liquidity needs, access to capital and cost of capital may be significantly affected by adverse developments in the capital and credit markets.

Any misbehaviour by Allianz Group can lead to adverse publicity and damage Allianz Group's reputation and may, amongst others, trigger increased regulatory supervision.

Market and other factors could adversely affect goodwill, deferred policy acquisition costs and deferred tax assets; the Allianz Group's deferred tax assets are also potentially impacted by changes in tax legislation.

Allianz SE has the contingent obligation to indemnify, under certain circumstances, the Federal Association of German Banks ("Bundesverband deutscher Banken e.V.") in connection with possible support measures for German banks of the Allianz Group.

German life insurance undertakings of the Allianz Group may have increased obligations under the German policy holder protection scheme for life insurers (*Protector*).

The benefits that the Allianz Group may realize from acquisitions could be materially different from its expectations.

The terms and conditions of the Notes provide that the terms and conditions of the Notes may be amended by the Issuer with consent of the Noteholders by way of a majority resolution in a Noteholders Meeting or by a vote not requiring a physical meeting (*Abstimmung ohne Versammlung*), a Noteholder is subject to the risk of being outvoted by a binding majority resolution of the Noteholders.

The terms and conditions of the Notes provide for the appointment of a Noteholders' joint representative, therefore a Noteholder may be deprived of its individual right to pursue and enforce a part or all of its rights under the terms and conditions of the Notes against the Issuer.

Market risks

The trading market for debt securities may be volatile and may be adversely impacted by many events.

An active trading market for the Notes may not develop.

A Noteholder denominated in a foreign currency is exposed to the risk that changes in currency exchange rates may affect the yield of such Notes.

[Fixed Rate Notes

A Noteholder of fixed rate Notes is exposed to the risk that the price of such Notes falls as a result of changes in the market yield.]

[Floating Rate Notes

The price of the Notes is subject to changes in the market spread, changes in the reference interest rate or both. Movements of the market spread can adversely affect the price of the Notes and can lead to losses for the Noteholders.]

[Risks associated with the reform of LIBOR, EURIBOR and other interest rate 'benchmarks':

A Noteholder is exposed to the risks associated with the reform of LIBOR, EURIBOR and other interest rates or other types of rates and indices which are deemed "benchmarks" (each a "**Benchmark**" and together, the "**Benchmarks**"). On 30 June 2016, the EU regulation ((EU) 2016/1011) on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds (the "**Benchmark Regulation**") entered into force and is fully applicable since 1 January 2018. The Benchmark Regulation could have a material impact on Notes linked to a Benchmark, including in any of the following circumstances:

- a rate or index which is a Benchmark may not be used according to the Benchmark Regulation (subject to applicable transitional provisions) if its administrator does not obtain authorisation or is not registered and in case of an administrator which is based in a non-EU jurisdiction, if the administrator's legal benchmark system is not considered equivalent (Art. 30 Benchmark Regulation) pending such decision the administrator is not recognised (Art. 32 Benchmark Regulation) or the benchmarks is not endorsed (Art 33 Benchmark Regulation).

In such event, depending on the particular Benchmark and the applicable terms of the Notes, the Notes could be impacted; and

- the methodology or other terms of the Benchmark could be changed in order to comply with the terms of the Benchmark Regulation, and such changes

could have the effect of reducing or increasing the rate or level or affecting the volatility of the published rate or level, and could impact the Notes, including Calculation Agent determination of the rate.

In addition to the aforementioned Benchmark Regulation, there are numerous other proposals, initiatives and investigations which may impact Benchmarks. Following the implementation of any such potential reforms, the manner of administration of Benchmarks may change, with the result that they may perform differently than in the past, or Benchmarks could be eliminated entirely, or there could be other consequences which cannot be predicted.]

One or more independent credit rating agencies may assign credit ratings to the Notes. If the rating agencies were to change their practices for rating such securities in the future and the ratings of the Notes were to be subsequently lowered, this may have a negative impact on the trading price of the Notes.

The market value of the Notes could decrease if the creditworthiness of the Issuer, the Guarantor (if any) and/or the Group worsens or the market participants' estimation of the creditworthiness of corporate debtors in general or of debtors operating in the same business as the Issuer, the Guarantor (if any) and/or the Group adversely changes.

The investment activities of certain investors are subject to legal investment laws and regulations, or review or regulation by certain authorities. Therefore, each potential investor should consult its legal advisers.

Special investment risks

An actual yield on the Notes may be reduced from the stated yield by transaction costs.

If a loan is used to finance the acquisition of the Notes and the Notes subsequently go into default, or if the trading price diminishes significantly, the Noteholder not only has to face a potential loss on its investment, but it will also have to repay the loan and pay interest thereon.

An effective yield on the Notes may be diminished by the tax impact on an investment in the Notes.

Financial Transactions Tax

Some European Member States, Germany amongst them, may introduce a common financial transactions tax ("**FTT**") as proposed by the European Commission. It could apply to certain dealings in the Notes (including secondary market transactions). As a result, investors may be burdened with additional costs for the execution of transactions with the Notes. However, the FTT and its scope are still under discussion and it is uncertain if and when the FTT will be enacted and when the tax will enter into force with regard to dealings with the Notes

Tax initiatives of Dutch government

One of the policy intentions of the new Dutch government is the introduction of a withholding tax on interest payments made to beneficiaries in low-tax jurisdictions or countries that are included in the EU list of non-cooperative jurisdictions as of 2021. The interest withholding tax could potentially be applicable to interest payments on the Notes. Many aspects of this policy intention remain unclear.

RISK FACTORS

Risk factors relating to Allianz SE / Allianz Group

The following is a description of risk factors in relation to Allianz SE as Issuer and/or in its capacity as Guarantor. The realisation of any of the risks described below may affect the profitability of Allianz SE and thereby the ability of Allianz SE to fulfil its payment obligations under the Guarantees or its obligations as Issuer and/or may adversely affect the market price of Notes and can lead to losses for the Noteholders if they sell Notes before they fall due for redemption. As a result, investors are exposed to the risk of losing their investment in whole or in part. Additional risks not currently known to Allianz SE or Allianz Group that are now immaterial may result in material risks in the future.

Words and expressions defined in the Programme terms and conditions (the "**Terms and Conditions**") shall have the same meanings in this section.

Market Risks

The market expectations as to prospects and the profitability of Allianz SE have been and may continue to be volatile.

The market expectations as to prospects and the profitability of Allianz SE have been volatile in the past and may continue to be affected in particular in the wake of the expansive monetary policy, with the resulting historically low interest rates and risk premia as well as challenges of implementing long term structural reforms in key Eurozone countries. Persisting geopolitical risks including the conflicts in the Middle East or the Korean peninsula and political uncertainty may add to this volatility, as may the occurrence of natural catastrophes. Factors other than the Allianz Group's financial results that may affect the market expectations as to Allianz SE's prospects and profitability include but are not limited to: market expectations of the performance and capital adequacy of financial institutions generally; investor perception of and the actual performance of other financial institutions; investor perception of the success and impact of the Allianz Group's strategy; a downgrade or rumored downgrade of the Allianz Group companies' credit ratings; adverse developments of financial markets and/or increased volatility as a major driver for market risk to which Allianz Group is highly exposed to as a result of its investment portfolios and liabilities depending in their value on changes of market parameters.

As in the last global financial crisis the Allianz Group may be adversely affected by the development of the global economy in general and global financial markets in particular. The Allianz Group's management cannot assess how the global economy and the global capital markets will develop in the future.

The Allianz Group's financial results are, amongst others, subject to market risk. Risk can arise, among others, from adverse changes in interest rates, inflation rates, equity prices, credit spreads, foreign exchange rates, real estate prices and other relevant parameters such as market volatility.

Despite the positive development of the global economy, the market continues to be concerned about a potential increase in inflation, sudden changes in monetary policy, rising unemployment, limited availability and higher cost of credit, renewed pressure on real estate and mortgage markets, sovereign indebtedness in many developed countries, particularly the Eurozone and the United States, as well as geopolitical and other risks. As a consequence, volatility may increase and the prospects for the global economy and global capital markets may be challenging. There is the risk that global economic growth slows down or even turns into a recession.

The occurrence of adverse scenarios or other adverse events might result in higher levels of financial market volatility, especially in the equity and foreign exchange markets, lower interest rates due to monetary policy response, increased challenges in the banking sector, including bank run scenarios, where large number of customers withdraw their deposits, as well as bond impairments and increased bond spreads due to a flight to quality and other difficult to predict spill-over effects. Since the Allianz Group has a significant part of its business and investment exposures in countries that might be affected by a contagion of a sovereign debt crisis, especially in Italy and Spain, the occurrence of any such adverse scenarios would most likely have unforeseeable adverse impacts on the Allianz Group's business and financial position.

Factors such as consumer spending, investments, government spending, the volatility and strength of the capital markets, inflation and others affect the business and economic environment and, ultimately, the profitability of the Allianz Group. In an economic downturn characterized by higher unemployment, lower family income, lower corporate earnings, lower levels of investments and consumer spending, the demand for the Allianz Group's financial and insurance products could be adversely affected. In addition, the Allianz Group may

experience an elevated incidence of claims and lapses or surrenders of policies. The Allianz Group's policyholders may choose to defer paying insurance premiums or stop paying insurance premiums altogether. Also, a spike in inflation without a corresponding increase in interest rates may negatively affect the Allianz Group's Property-Casualty business. Moreover, the Allianz Group companies are a significant writer of unit-linked and other investment-oriented products, for which sales could decrease due to customer concerns regarding their exposure to the financial markets. Adverse changes in the economy could affect the Allianz Group's earnings negatively and could have a material adverse effect on the Allianz Group's business and its financial condition, including shareholders' equity.

Interest rate volatility and persisting low interest rates may adversely affect the Allianz Group's results of operations and economic capitalization.

Changes in prevailing interest rates (including changes in the difference between the levels of prevailing short- and long-term rates, and the prospect of enduring negative rates) may adversely affect the Allianz Group's insurance, asset management, corporate and other results.

An increase in interest rates could substantially decrease the value of the Allianz Group's fixed-income portfolio, and any unexpected change in interest rates could materially adversely affect the Allianz Group's bond and interest rate derivative positions.

Assets and liabilities from a Group perspective are not necessarily matched in terms of interest rate sensitivities and therefore any big unexpected change in interest rates could materially adversely affect the Allianz Group's bond and interest rate derivative positions and the fair value of liabilities. A change in prevailing interest rates may accordingly have a negative impact on the capitalization of the Allianz Group.

Results of the Allianz Group's asset management business may also be affected by movements in interest rates, as management fees are generally based on the value of assets under management, which fluctuate with changes in the level of interest rates.

Changes in interest rates will impact the Allianz Group's Life/Health business to the extent they result in changes to current interest income, impact the value of the Allianz Group's fixed-income portfolio and the fair value of the liabilities and affect the levels of new product sales or surrenders of business in force. Reductions in the effective investment income below the rates prevailing at the issue date of the policy, or below the long-term guarantees in countries such as Germany and Switzerland, would reduce the profit margins or lead to losses on the Life/Health insurance business written by the Allianz Group's Life/Health subsidiaries to the extent the maturity composition of the assets does not match the maturity composition of the insurance obligations they are backing. In particular, if low interest rates persist, the effective investment income will decrease over time due to reducing reinvestment yields. Similarly, reductions in the effective investment income of the fixed income trust assets backing the Allianz Group's pension reserves may lead to deficits of the internal pension plans, and these deficits would have to be covered by the Allianz Group. Interest rate volatility risk could substantially impact the economic capitalization in a low interest rate environment, as long term guarantees in Life/Health business increase in value.

The Allianz Group is exposed to equity and alternative investments risks that could impair the value of the Allianz Group's portfolio and adversely impact the Allianz Group's financial position and results of operations.

The Allianz Group holds a significant equity and alternative investments portfolio. Alternative investments include real estate, private equity, renewable energy and infrastructure sectors. These investments are subject to volatility in equity and alternative investments markets affecting the market value and liquidity of these holdings. Investments are reviewed regularly for impairment, with write-downs to fair value charged to income if there is objective evidence that the cost may not be recovered. The Allianz Group holds interests in a number of financial institutions as part of its portfolios, which are particularly exposed to uncertain market conditions affecting the financial services sector generally.

In prior years the Allianz Group has incurred significant impairments on the value of the securities and other financial assets that it holds and there is the risk that the Allianz Group will recognize significant impairments in the future again, which may have an adverse effect on the Allianz Group's earnings and on the Allianz Group's business and its financial condition.

The Allianz Group is exposed to inflation risk and credit spread risk.

Allianz Group is exposed to changing inflation rates, predominantly due to the Non-Life insurance obligations but also due to inflation-indexed internal pension obligations. Unexpected inflation increases both future claims

and expenses, leading to greater liabilities and payments to policyholders. Besides interest rate movements the value of fixed-income assets such as bonds is also changing in case of moving credit spreads. They may lose value if credit spreads widen. This may happen in case the perception of risk in the market changes i.e. investors demand higher compensation for taking on risks, which can happen for several reasons for example following a political crisis, an economic recession or changed monetary policy.

Changes in value relative to the Euro of non-Euro zone currencies in which the Allianz Group generates revenues and incurs expenses could adversely affect the Allianz Group's reported earnings and cash flow.

The Allianz Group prepares its consolidated financial statements in Euro. However, a significant portion of the revenues and expenses from the Allianz Group companies outside the Euro zone, originates in currencies other than the Euro.

As a result, although the Allianz Group's non-Euro zone subsidiaries generally record their revenues and expenses in the same currency, changes in the exchange rates used to translate foreign currencies into Euro may adversely affect the Allianz Group's results of operations and the net asset value of subsidiaries from an Allianz Group perspective.

Credit Risks

The Allianz Group has significant counterparty risk exposure, which could adversely affect the Allianz Group.

The Allianz Group companies are subject to a potential economic loss in the value of their portfolio that would result from either changes in the credit quality of counterparties ("migration risk") or the inability or unwillingness of a counterparty to fulfill contractual obligations ("default risk"). The Group's credit risk profile is derived from three sources:

- **Investment portfolio:** Credit risk results from Allianz Group's investments in fixed-income bonds, loans, derivatives, cash positions, and receivables whose value may decrease depending on the credit quality of the obligor. As a result, defaults by one or more of these parties on their obligations to the Allianz Group companies due to bankruptcy, lack of liquidity, downturns in the economy or real estate values, operational failure or other reasons, or even rumors about potential defaults by one or more of these parties or regarding the financial services industry generally, could lead to losses or defaults by the Allianz Group companies or by other institutions. In addition, with respect to secured transactions, the Allianz Group companies' credit risk may be exacerbated when the collateral held by them cannot be realized or is liquidated at prices not sufficient to recover the full amount of the loan or derivative exposure. The Allianz Group companies also have exposure to a number of financial institutions in the form of unsecured debt instruments, derivative transactions and equity investments. Losses on or impairments to the carrying value of these assets may materially and adversely affect the Allianz Group's business or results of operations.
- **Credit insurance:** Credit risk arises from potential claim payments on limits granted by Euler Hermes to its policyholders. Euler Hermes insures its policyholders from credit risk associated with short-term trade credits advanced to clients of the policyholder. If the client of the policyholder is unable to meet its payment obligations, Euler Hermes indemnifies the loss to the policyholder.
- **Reinsurance:** The Allianz Group transfers exposure to certain risks in the Property-Casualty and Life/Health insurance businesses to others through reinsurance arrangements. Under these arrangements, other insurers assume a portion of the Allianz Group's losses and expenses associated with reported and unreported losses in exchange for a portion of policy premiums. Credit risk arises from potential losses from non-recoverability of reinsurance receivables or due to default on benefits under in-force reinsurance treaties.

If any of the above-mentioned risks materialize that may materially and adversely affect the Allianz Group's business or results of operations.

Risks arising from the nature of the Allianz Group's business

Intense competition in the German market as well as in other markets could materially adversely affect the Allianz Group's revenues and profitability.

The markets in which the Allianz Group operates are generally quite competitive. This basically applies to all of the Allianz Group's primary business areas, i.e. insurance, asset management and banking businesses.

In particular, the Allianz Group's more mature insurance markets (e.g. Germany, France, Italy and the United States) are highly competitive. In recent years, the Allianz Group has also experienced increasing competition in emerging markets, as large insurance companies and other financial services providers have also entered these markets to participate in their high growth potential. In addition, local institutions have become more experienced and have established strategic relationships, alliances or mergers also with the Allianz Group's competitors. Downturns in the economies of these markets might even increase the competitive pressure, potentially resulting in lower margins or business volumes for the Allianz Group.

If the Allianz Group fails to offer attractive products and services suitable to customers' needs, revenues could be materially adversely affected and the Allianz Group may lose market shares in important areas of the Allianz Group's business, which might also have a material adverse impact on the Allianz Group. In addition, ongoing pricing pressure in certain highly competitive markets may negatively impact the Allianz Group's profitability.

The Allianz Group's financial results may be materially adversely affected by the occurrence of natural catastrophes and man-made disasters (including acts of terrorism).

Allianz Group's Property-Casualty insurance covers to a large extent losses from major unpredictable events like natural catastrophes (e.g. hurricanes, earthquakes, floods) and man-made events (e.g. fires, industrial explosions) but also acts of terror. The likelihood of such events can change due to natural climate cycles, changes in the portfolios, but also through a changing market or geopolitical environment. Consequently, the geopolitical tensions in the Middle East with the subsequent immigration wave, terror acts such as in Paris or Nice or growing tensions between Russia and the United States as well as other countries may increase the risk of terror losses significantly in some regions. Also increasing urbanization and increasing concentration of industrial facilities in natural catastrophe prone regions has increased losses over the past years, a trend that is expected to continue. In addition, increasing digitalization introduces new risks in regard to Cybercrime, i.e. manipulation of software or loss of sensitive data. However, the incidence and severity of all these catastrophes in any given period are inherently unpredictable. All risk models are subject to uncertainty arising from both scientific and management assumptions as well as underlying data.

The Allianz Group monitors its overall exposure to catastrophes and other unpredictable events in each geographic region and each of the Allianz Group's subsidiaries within the Allianz Group's limit framework. In addition, local entities have implemented their own underwriting limits related to insurance coverage for losses from catastrophic events. However, a series of unlikely catastrophes in a year may result in unusually high levels of losses with a material adverse effect on the Allianz Group's financial position or results of operations.

Furthermore, the occurrence of extreme large scale natural catastrophes, pandemics and man-made disasters (e.g. terror events) can have a negative impact on local or even global economy in general, and capital markets in particular, and thus also on the Allianz Group's financial position and results of operations.

Loss reserves for the Allianz Group's Property-Casualty insurance and reinsurance policies are based on estimates as to claims liabilities. Adverse developments relating to claims could lead to further reserve additions and materially adversely impact the Allianz Group's results of operations.

In accordance with industry practice and accounting and regulatory requirements, the Allianz Group establishes reserves for losses and loss adjustment expenses related to its Property-Casualty insurance and reinsurance businesses, including Property-Casualty business in run-off.

Reserves are based on estimates of future payments that will be made in respect of claims, including expenses relating to such claims. Such estimates are made both on a case-by-case basis as well as in respect of losses that have been incurred but not reported ("IBNR") to the Allianz Group. These reserves represent the estimated ultimate cost necessary to bring all pending reported and IBNR claims to final settlement.

Reserves are subject to change due to a number of variables that affect the ultimate cost of claims, such as exchange rates, changes in the legal environment and results of litigation as well as effects closely related to (super-imposed-) inflation that may adversely affect costs of repairs and medical costs. The Allianz Group's reserves for asbestos and environmental and other latent claims are particularly subject to such variables.

Established loss reserves estimates are periodically adjusted in the ordinary course of settlement, using the most current information available to management, and any adjustments resulting from changes in reserve estimates are reflected in current results of operations.

To the extent that the Allianz Group's actual claims experience is less favorable than the underlying assumptions used in setting the prices for products and establishing reserves, the Allianz Group may be required to increase its reserves, which may materially adversely affect its results of operations.

On a quarterly basis, Allianz Group monitors reserve levels, movements and trends. This monitoring is conducted on the basis of quarterly data submitted by the subsidiaries as well as through frequent dialogue with local actuaries. However, ultimate losses may materially exceed the established reserves and have a material adverse effect on the Allianz Group's result of operations.

Actuarial experience and other factors could differ from that assumed in the calculation of Life/Health actuarial reserves and pension liabilities.

The assumptions the Allianz Group makes in assessing its Life/Health insurance reserves may differ from what the Allianz Group may experience in the future. The Allianz Group derives its Life/Health insurance reserves using "best estimate" actuarial practices and assumptions. These assumptions include the assessment of the long-term development of interest rates, investment returns, the allocation of investments between equity, fixed-income and other categories, policyholder bonus rates (some of which are guaranteed), mortality and morbidity rates, policyholder lapses and future expense levels. The Allianz Group monitors its actual experience of these assumptions, and to the extent that it considers that this experience will continue in the longer term it refines its long-term assumptions. Similarly, estimates of the Allianz Group's own pension obligations necessarily depend on assumptions concerning future actuarial, demographic, macroeconomic and financial markets developments. Changes in any such assumptions may lead to changes in the estimates of Life/Health insurance reserves or pension obligations.

The Allianz Group companies have a significant portfolio of contracts with guaranteed investment returns, including endowment and annuity products for the German market as well as certain guaranteed contracts in other markets. The amounts payable by the Allianz Group companies at maturity of an endowment policy in Germany and in certain other markets include a "guaranteed benefit", an amount that, in practice, is equal to a legally mandated minimum rate of return on actuarial reserves. If interest rates further decline or remain at historically low levels for a long period, the Allianz Group could be required to provide additional funds to the Allianz Group's Life/Health subsidiaries to support their obligations in respect of products with higher guaranteed returns or their pension obligations, or increase reserves in respect of such products, which could in turn have a material adverse effect on the Allianz Group's results of operations.

In the United States, in particular in the variable and fixed-indexed annuity products, and to a lesser extent in Europe and Asia, the Allianz Group has a portfolio of contracts where policyholder crediting is contractually tied to equity market performance. The hedging arrangements (if any) may not cover the returns due to policyholders, which could in turn have a material adverse effect on the Allianz Group's results of operations.

If the Allianz Group's asset management business underperforms, it may experience a decline in assets under management, related fee income and a reduction of performance fees.

While the assets under management in the Allianz Group's Asset Management segment include a significant amount of funds related to the Allianz Group's insurance operations, third-party assets under management ("AUM") represent the majority.

Results of the Allianz Group's asset management activities are driven by variations in management and performance fees. Background for such variations may be AUM-movements which are induced by valuation changes resulting from market movements. In addition, AUM may fluctuate due to net flows which can be attributed to the relative performance of Allianz Group's investment activities compared to competitors and benchmarks. Moreover, the result of Allianz Group's asset management business can potentially be impacted by adverse credit or operational loss events, if any.

Business Risks

Allianz Group is exposed to business risks which include cost risks and policyholder behavior risks. Business risks are mostly driven by the Life/Health business and to a lesser extent by the Property-Casualty business. Cost risks are associated with the risk that expenses incurred in administering policies are higher than expected or that new business volume decreases to a level that does not allow Allianz Group to absorb its fixed costs. Business risk is measured relative to baseline plans. For the Life/Health business, policyholder behavior risks are risks related to the unpredictable, adverse behavior of policyholders in exercising their contractual options, including for example the early termination of contracts, surrenders, partial withdrawals, renewals, and annuity take-up options.

Operational Risks

Risks resulting from clients, products & business practices, execution, delivery and process management as well as other operational risks.

The Allianz Group is exposed to operational risks resulting from inadequate internal processes or failures in such processes and can stem from a wide variety of sources such as:

- potential losses due to a failure to meet a professional obligation or from the design of a product. Examples include misselling, non-compliance with internal or external requirements related to products, anti-trust behavior, data protection, sanctions and embargoes, etc. These losses tend to be of a lower frequency but with a potentially high financial impact.
- potential losses arising from transaction or process management failures. Examples include interest and penalties from non-payment or underpayment of taxes or losses associated with broker and agent distribution processes. These losses tend to be of a relatively higher frequency but with a low financial impact (although single large loss events can occur).
- Other operational risks, including, for example, internal or external fraud, financial misstatement risk, a breach of cyber security causing business disruption or fines, a potential failure at Allianz Group's outsourcing partners causing a disruption to its working environment. For example, the Allianz Group relies on complex IT-systems and could suffer financial losses, a disruption of its businesses, liabilities to clients, regulatory interventions or reputational damages in case of events such as operational errors, software and hardware errors, power blackouts, damage, computer viruses, terrorist or other acts of sabotage as well as other internal or external threats. Operational risks also include legal and compliance risks.

Risks arising from legal and regulatory conditions

Changes in existing, or new, government laws and regulations, or enforcement initiatives in respect thereof, in the countries in which the Allianz Group companies operate may materially impact the Allianz Group and could adversely affect the Allianz Group's business.

The Allianz Group's insurance, asset management and banking businesses as well as the financial steering activities of Allianz SE are subject to detailed, comprehensive laws and regulations as well as supervision in all the countries in which the Allianz Group companies do business.

Regulatory authorities have broad administrative power over many aspects of the financial services business, which include liquidity, capital adequacy and permitted investments, governance, ethical issues, money laundering, "know your customer" rules, privacy, record keeping, and marketing and distribution practices.

Insurance, banking and other financial services laws, regulations and policies currently governing Allianz SE and its subsidiaries may change at any time in ways which have an adverse effect on the Allianz Group's business.

Changes in existing laws and regulations, or in their interpretation by the authorities, may affect Allianz Group's tax burden, its capital requirements, the way in which the Allianz Group companies conduct their business and the products they may offer. Governments, regulatory authorities and others have made and continue to make proposals to reform the regulatory framework for the financial services industry to enhance its resilience against future crises and to enhance consumer protection. Proposals include, among others, requests for more stringent regulatory capital and liquidity standards, regulation of specific types of business perceived as particularly dangerous, and expansion of the resolution powers of regulators. It is possible that the future regulatory framework for the financial industry may change. This is also due to the fact that the Allianz Group has been designated as a "Global Systemically Important Insurer" by the Financial Stability Board and will be subject to the respective policy measures which may apply to such groups. In addition, it is unclear how the Common Framework for the Supervision of Internationally Active Insurance Groups ("**Comframe**") which is currently being developed by the International Association of Insurance Supervisors ("**IAIS**") will be implemented. Effects of the regulatory changes on the Allianz Group may range from additional administrative cost to implement and comply with new rules to increased cost of capital and a materially adverse effect on the Allianz Group's business, results of operation and prospects. The future capital requirements applicable for Global Systemically Important Insurers ("**G-SIIs**") are still not finalized, resulting in some uncertainty in terms of the ultimate capital requirements for Allianz Group. Finally, the potential for a multiplicity of different regulatory regimes, capital standards and reporting requirements will increase operational complexity and costs.

Governments in jurisdictions in which the Allianz Group does business may consider changes to tax laws which may affect the attractiveness of certain of the Allianz Group's products; if enacted, such changes could result in a significant reduction in the sale of such products.

Regulatory actions in case of a breach of regulatory capital requirements.

In the event of a failure by Allianz SE or Allianz Group to meet regulatory capital requirements, regulators have broad authority to take various regulatory actions including limiting or prohibiting the writing of new business, prohibiting payment of dividends or coupon payments and suspend repayments of senior debt. A breach of regulatory capital requirements or a reduction of solvency ratios by subsidiaries may result in Allianz SE injecting new capital into its subsidiaries which could in turn adversely affect Allianz SE's and financial position. Regulatory restrictions can reduce Allianz SE's ability to move capital within Allianz Group which in turn can adversely affect the liquidity and financial position of Allianz SE and Allianz Group. Under the Solvency II regime, the powers of intervention of supervisory authorities with respect to reinsurers like Allianz SE are extended and, in particular, allow for a restriction on all payments (in particular, payments under the Notes or the Guarantees) at an earlier stage of a potential crisis.

The Allianz Group's business may be negatively affected by adverse publicity, regulatory actions or litigation with respect to the Allianz Group, other well-known companies and the financial services industry generally.

Adverse publicity and damage to the Allianz Group's reputation might arise from financial reporting irregularities or compliance irregularities, data protection irregularities, involving Allianz Group or other large and well-known companies, increasing regulatory and law enforcement scrutiny of "know your customer", anti-money laundering and anti-terrorist-financing procedures and their effectiveness, and regulatory investigations of the asset management, banking and insurance industries. Any of the above could also lead to increased regulatory supervision, affect the Allianz Group's ability to attract and retain customers, impair access to the capital markets or have other adverse effects on the Allianz Group in ways that are not predictable.

Other risks

Many of the Allianz Group's businesses are dependent on the financial strength and credit ratings assigned to the Allianz Group companies and their businesses by various rating agencies. Therefore, a downgrade in their ratings may materially adversely affect relationships with customers and intermediaries, negatively impact sales of their products and increase their cost of borrowing.

Claims paying ability and financial strength ratings are each a factor in establishing the competitive position of insurers. Allianz SE's financial strength rating has a significant impact on the individual ratings of key subsidiaries. If a rating of certain subsidiaries falls below a certain threshold, the respective operating business may be significantly impacted. A ratings downgrade, or the potential for such a downgrade, of the Allianz Group or any of its insurance subsidiaries could, among other things, adversely affect relationships with agents, brokers and other distributors of the Allianz Group's products and services, thereby negatively impacting new sales, adversely affect the Allianz Group's ability to compete in the respective markets and increase the cost of borrowing. In particular, in those countries where primary distribution of the Allianz Group's products is done through independent agents, future ratings downgrades could adversely impact sales of the life insurance and annuity products. Any future ratings downgrades could also materially adversely affect the cost of raising capital and could, in addition, give rise to additional financial obligations or accelerate existing financial obligations which are dependent on maintaining specified rating levels. For some lines of business a downgrade might also have impact on current business in case agreements provide for cancellation clauses which allow policyholders to cancel the agreements in case a certain downgrade occurs. This would trigger a repayment of (parts) of the received premium.

Rating agencies can be expected to continue to monitor the Allianz Group's financial strength and claims paying ability. Future ratings downgrades may occur at any time, whether due to changes in the Allianz Group's performance, its regulatory capital position, changes in the rating agencies' industry views or ratings methodologies, or a combination of these and other factors.

Strategic Risk

Strategic risk is the risk of a decrease in Allianz Group's value arising from adverse management decisions on business strategies and their implementation. Strategic risks are identified and evaluated as part of the Allianz Group's Top Risk Assessment process, and discussed in various committees of the Board of Management (e.g. Group Finance and Risk Committee). Allianz Group also monitors market and competitive conditions, capital market requirement and, regulatory conditions, to decide if strategic adjustments are necessary.

The Allianz Group's financial condition, liquidity needs, access to capital and cost of capital may be significantly affected by adverse developments in the capital and credit markets.

Liquidity risk is the risk that current or future payment obligations cannot be met or can only be met on the basis of adversely altered conditions. Liquidity risk can arise primarily if there are mismatches in the timing of cash in- and out-flows.

Allianz Group's operating entities manage liquidity risk locally, using asset/liability management systems designed to ensure that assets and liabilities are adequately matched. The major sources of liquidity for operational activities are primary and reinsurance premiums received, reinsurance receivables collected, investment income, and proceeds generated from the maturity or sale of investments. These funds are mainly used to pay claims arising from the Property-Casualty insurance business and related expenses, life policy benefits, surrenders and cancellations, acquisition costs, and operating costs.

The main sources of liquidity available for Allianz SE are dividends received from subsidiaries and funding provided by capital markets. Liquidity resources are readily available assets – specifically cash, money market investments, and highly liquid government bonds. Allianz SE's funds are primarily used for interest payments on debt funding, operating costs, internal and external growth investments, and dividends to shareholders. Allianz SE's access to external funds depends on various factors such as capital market conditions, access to credit facilities, credit ratings, and credit capacity as well as the possibility that customers or lenders could develop a negative perception of the Allianz Group's long- or short-term financial prospects or negative actions by regulators or rating agencies. The financing of the Allianz Group's activities includes, among other means, funding through commercial paper facilities and medium- and long-term debt issuances. A break-down of such markets such as in the last global financial crisis could have a materially adverse impact on the availability and cost of funding as well as on the refinancing structure of the Allianz Group.

The overall liquidity of Allianz Group's insurance operations depends on capital market developments, interest rate levels, and the ability to realize the market value of the investment portfolio to meet insurance claims and policyholder benefits. Other factors affecting the liquidity of the Property-Casualty insurance operations include the timing, frequency, and severity of losses underlying the policies and policy renewal rates. In Life operations, liquidity needs are generally influenced by trends in actual mortality rates compared to the assumptions underlying the life insurance reserves. Market returns, crediting rates, and the behavior of life insurance clients – for example, regarding the level of surrenders and withdrawals – can also have significant impacts.

Major contingent liquidity requirements include market risk scenarios for Allianz SE and its subsidiaries, non-availability of external capital markets, and reinsurance risk scenarios for Allianz SE.

Reputational Risk

Allianz Group's reputation as a well-respected and socially aware provider of financial services is influenced by its behaviour in a range of areas such as product quality, corporate governance, financial performance, customer service, employee relations, intellectual capital, and corporate responsibility. Any misbehaviour can lead to adverse publicity and damage the Allianz Group's reputation and trigger increased regulatory supervision, affecting the Allianz Group's ability to attract and retain customers, impair access to the capital markets or have other adverse effects on the Allianz Group in ways that are not predictable. Reputational risk is the risk of an unexpected drop in the value of the Allianz SE share price, the value of the current business, or the value of future business caused by a decline in the reputation assessed by external stakeholders.

Market and other factors could adversely affect goodwill, deferred policy acquisition costs and deferred tax assets; the Allianz Group's deferred tax assets are also potentially impacted by changes in tax legislation.

Business and market conditions may impact the amount of goodwill the Allianz Group carries in its consolidated financial statements. As the value of certain parts of the Allianz Group's businesses, including in particular the Allianz Group's asset management business, are significantly impacted by such factors as the state of financial markets and ongoing operating performance, significant declines in financial markets or operating performance could also result in impairment of other goodwill carried by the Allianz Group companies and result in significant write-downs, which could be material. No impairments were recorded for goodwill in fiscal year 2017.

The assumptions the Allianz Group made with respect to recoverability of deferred policy acquisition costs ("DAC") are also affected by such factors as operating performance and market conditions. DAC is incurred in connection with the production of new and renewal insurance business and is deferred and amortized generally in proportion to profits or to premium income expected to be generated over the life of the underlying policies, depending on the classification of the product. If the assumptions on which expected profits are based prove to

be incorrect, it may be necessary to accelerate amortization of DAC, even to the extent of writing down DAC, which could materially adversely affect results of operations. No material write-downs were recorded for DAC in fiscal year 2017.

Allianz Group carries in its consolidated financial statements deferred tax assets and deferred tax liabilities. The calculation of the respective tax assets and liabilities is based on current tax laws and IFRS and depends on applicable valuation parameters as well as on the performance of Allianz SE and of certain business units in particular.

Changes in German or other tax legislation or regulations or an operating performance below currently anticipated levels or any circumstances which result in an expiration of tax losses may lead to an impairment or revaluation of deferred tax assets, in which case the Allianz Group could be obligated to write-down certain tax assets. Tax assets may also need to be written down if certain assumptions of profitability prove to be incorrect, as losses incurred for longer than expected could make the usability of tax assets more unlikely. Any such development may have a material adverse impact on the Allianz Group's net income.

Allianz SE has the contingent obligation to indemnify, under certain circumstances, the Federal Association of German Banks ("Bundesverband deutscher Banken e.V.") in connection with possible support measures for German banks of the Allianz Group.

In accordance with the statutes of the Joint Fund for Securing Customer Deposits ("Einlagensicherungsfonds"), Allianz SE has undertaken to indemnify the "Bundesverband deutscher Banken e.V.", the deposit protection association of privately-held German banks, for any losses it may incur by reason of supporting measures taken in favor of the Oldenburgische Landesbank Aktiengesellschaft ("Oldenburgische Landesbank"). In connection with the sale of OLB in February 2018, Allianz SE terminated the indemnification undertaking; however, it remains applicable with respect to supporting measures that are based on facts that were already existing at the time of termination.

German life insurance undertakings of the Allianz Group may have increased obligations under the German policy holder protection scheme for life insurers (Protector).

German life insurance undertakings of the Allianz Group are members of the German policy holder protection scheme for life insurers ("Protector"). In case of an adverse development of the situation of German life insurance companies outside Allianz Group, German life insurance undertakings of the Allianz Group may be required, in line with German regulation and the contract between these undertakings and Protector, to make substantial contributions to Protector that are considerably higher than at the current moment.

The benefits that the Allianz Group may realize from acquisitions could be materially different from its expectations.

A variety of factors that are partially or entirely beyond the Allianz Group's control could cause actual business results of the acquired undertakings being materially different from what was initially expected, and any synergies due to the acquisition, therefore, could, as a result, be materially smaller or realized at a later stage than initially expected.

Risk factors relating to Allianz Finance II B.V.

Allianz Finance II B.V. is a funding vehicle for the Allianz Group. As such, it, *inter alia*, raises funds and on-lends monies to group companies within the Allianz Group by way of intra-group loans. In the event that a group company fails to make a payment under an intra-group loan, the Issuer may not be able to meet its payment obligations under the Notes.

Risk factors relating to Allianz Finance III B.V.

Allianz Finance III B.V. is a funding vehicle for the Allianz Group. As such, it, *inter alia*, raises funds and on-lends monies to group companies within the Allianz Group by way of intra-group loans. In the event that a group company fails to make a payment under an intra-group loan, the Issuer may not be able to meet its payment obligations under the Notes.

Risk Factors relating to the Notes

The Notes may not be a suitable investment for all investors

Each potential investor in the Notes must determine whether or not the Notes represent a suitable investment in light of that investor's own circumstances. The Notes are only suitable for sophisticated investors that:

- (i) have sufficient knowledge and experience to make a meaningful evaluation of the Notes, the merits and risks of investing in the Notes and the information contained or incorporated by reference in this Base Prospectus or any applicable supplement;
- (ii) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of their particular financial situation, an investment in the Notes and the impact the Notes will have on its overall investment portfolio;
- (iii) have sufficient financial resources and liquidity to bear all of the risks of an investment in the Notes, including Notes where the currency for principal or interest payments is different from the potential investor's currency;
- (iv) understand thoroughly the terms of the Notes and are familiar with the behaviour of any relevant indices, rates and financial markets; and
- (v) are able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect their investment and their ability to bear the applicable risks.

The Notes are complex financial instruments. Sophisticated institutional investors generally purchase complex financial instruments as part of a wider portfolio strategy rather than as stand-alone investments. They purchase complex financial instruments as a way to reduce risk or enhance yield with a measured and appropriate addition of risk to their overall portfolios, and only after performing an intensive analysis of all involved risks. A potential investor should not invest in the Notes which are complex financial instruments unless the potential investor has the expertise (either alone or with a financial adviser) to evaluate how the Notes will perform under changing conditions, the resulting effects on the value of the Notes and the impact this investment will have on the potential investor's overall investment portfolio.

Risks related to the structure of a particular issue of Notes

A wide range of Notes may be issued under the Programme. A number of these Notes may have features which contain particular risks for potential investors. Set out below is a description of the most common such features:

Early Redemption by the Issuer

At the Issuer's option, the Notes may be redeemed prior to the Maturity Date at par plus accrued interest if, as a result of a future change of applicable laws, the Issuer or the Guarantor (as applicable) will be obliged to pay Additional Amounts.

If provided for in any Final Terms for a particular Series of Notes, the Notes may be redeemed prior to the Maturity Date (i) if, as a result of a future change of applicable laws, interest payable by the Issuer in respect of the Notes or any payment to be made by the Guarantor under the Guarantee (as applicable) is no longer fully deductible by the Issuer or the Guarantor (as applicable) for income tax purposes, or (ii) at the option of the Issuer on any Call Redemption Date or (iii) for a minimal outstanding principal amount.

If the Notes of any Series are redeemed earlier than expected by a Noteholder, a Noteholder is exposed to the risk that due to the early redemption its investment will have a lower than expected yield and to the risks connected with any reinvestment of the cash proceeds received as a result of the early redemption. The redemption amount may be lower than the then prevailing market price of and the purchase price for the Notes paid by the Noteholder for the Notes so that the Noteholder in such case would not receive the total amount of the capital.

Notes issued at a substantial discount or premium

The market values of Notes issued at a substantial discount or premium from their principal amount tend to fluctuate more in relation to general changes in interest rates than do prices for conventional interest-bearing

securities. Generally, the longer the remaining term of the Notes, the greater the price volatility as compared to conventional interest-bearing securities.

No limitation on issuing debt

There is no restriction on the amount of liabilities which any of the Issuers or the Guarantor may issue or guarantee. The Issuers and the Guarantor and its subsidiaries and affiliates may incur additional indebtedness or grant guarantees in respect of indebtedness of third parties. If the Issuer's or the Guarantor's financial condition were to deteriorate, the relevant Noteholders could suffer direct and materially adverse consequences, including (if so specified in the relevant Final Terms) suspension, deferral or cancellation of interest and, if the Issuer or the Guarantor were liquidated (whether voluntarily or involuntarily), loss by the relevant Noteholders of their entire investment.

Amendments to the Terms and Conditions by resolution of the Noteholders

The terms and conditions applicable to each particular Series and Tranche of Notes (the "**Conditions**") may be amended by the Issuer with consent of the Noteholders by way of a majority resolution in a Noteholders Meeting or by a vote not requiring a physical meeting (*Abstimmung ohne Versammlung*) as described in Sections 5 et seq. of the German Act on Issues of Debt Securities (*Gesetz über Schuldverschreibungen aus Gesamtemissionen*, "**SchVG**"), the Issuer may subsequently amend the Conditions with the consent of the majority of Noteholders as described in § 14 of the Terms and Conditions, which amendment will be binding on all Noteholders of the relevant Series of Notes, even on those who voted against the change.

Therefore, a Noteholder is subject to the risk of being outvoted by a majority resolution of the Noteholders. As such majority resolution is binding on all Noteholders of a particular Series of Notes, certain rights of such Noteholder against the Issuer under the Conditions may be amended or reduced or even cancelled, which may have significant negative effects on the value of the Notes and the return from the Notes.

The Noteholders may by majority resolution provide for the appointment or dismissal of a joint representative. If a joint representative is appointed a Noteholder may be deprived of its individual right to pursue and enforce a part or all of its rights under Conditions against the Issuer, such right passing to the Noteholders' joint representative who is then exclusively responsible to claim and enforce the rights of all the Noteholders.

Market risks

Market volatility and other factors

The trading market for debt securities may be volatile and may be adversely impacted by many events.

The market for debt securities is influenced by economic and market conditions in the Netherlands and/or Germany and, to varying degrees, by market conditions, interest rates, currency exchange rates and inflation rates in other European and other industrialised countries. There can be no assurance that events in Germany, Europe or elsewhere will not cause market volatility or that such volatility will not adversely affect the price of Notes or that economic and market conditions will not have any other adverse effect.

No active trading market

An active trading market for the Notes may not develop.

There can be no assurance that an active trading market for the Notes will develop or, if one does develop, that it will be maintained. If an active trading market for the Notes does not develop or is not maintained, the market or trading price and liquidity of the Notes may be adversely affected.

The relevant Issuer or its affiliates (in the case of Allianz SE) are entitled to buy and sell the Notes for their own account or for the account of others, and to issue further Notes. Such transactions may favourably or adversely affect the price development of the Notes. If additional and competing products are introduced in the markets, this may adversely affect the value of the Notes.

Exchange rate risk, exchange controls and redenomination risk

The relevant Issuer will pay principal and interest on the Notes in the Specified Currency. This presents certain risks relating to currency conversions if an investor's financial activities are denominated principally in a currency or currency unit (the "Investor's Currency") other than the Specified Currency. These include the risk that exchange rates may significantly change (including changes due to devaluation of the Specified Currency or revaluation of the Investor's Currency) and the risk that authorities with jurisdiction over the Investor's Currency may impose or modify exchange controls. An appreciation in the value of the Investor's Currency relative to the

Specified Currency would decrease (i) the Investor's Currency-equivalent yield on the Notes, (ii) the Investor's Currency equivalent value of the principal payable on the Notes and (iii) the Investor's Currency equivalent market value of the Notes.

Government and monetary authorities may impose (as some have done in the past) exchange controls that could adversely affect an applicable exchange rate. As a result, investors may receive less interest or principal than expected, or no interest or principal.

In the case of any Notes for which the redenomination clause is applicable, the Specified Currency of the Series may be redenominated (in whole but not in part) to the New Currency if the relevant member state of the European Monetary Union identified by the Final Terms redenominates its public debt to a currency other than the Euro (the "New Currency"). An investor could become newly exposed to the exchange rate risks and risk of exchange controls described above by such redenomination.

Interest rate risks for Fixed Rate Notes

Investment in Fixed Rate Notes involves the risk that subsequent changes in market interest rates may adversely affect the value of the Fixed Rate Notes. Noteholders are exposed to the risk that the price of such Notes may fall because of changes in the market yield. While the nominal interest rate (i.e. the coupon) of the Notes is fixed, the market yield typically changes on a daily basis. As the market yield changes, the price of the Notes changes in the opposite direction. If the market yield increases, the price of the Notes falls. If the market yield falls, the price of the Notes increases. Noteholders should be aware that movements of the market yield can adversely affect the price of the Notes and can lead to losses for the Noteholders.

Noteholders should also be aware that the market yield has two components, namely the risk free rate and the credit spread. The credit spread is reflective of the yield that investors require in addition to the yield on a risk free investment of equal tenor as a compensation for the risks inherent in the Notes. The credit spread changes over time and can decrease as well as increase for a large number of different reasons. The market yield of the Notes can change due to changes of the credit spread, the risk free rate, or both.

In addition, Noteholders are exposed to reinvestment risk with respect to proceeds from coupon payments or early redemptions by the issuer. If the market yield (or market spread respectively) declines, and if Noteholders want to invest such proceeds in comparable transactions, Noteholders will only be able to reinvest such proceeds in comparable transactions at the then prevailing lower market yields (or market spreads respectively).

Interest rate risks for Floating Rate Notes.

A key difference between Floating Rate Notes and Fixed Rate Notes is that interest income on Floating Rate Notes cannot be anticipated. Due to varying interest income, investors are not able to determine a definite yield of Floating Rate Notes at the time they purchase them, so that their return on investment cannot be compared with that of investments having a longer term with fixed interests.

Since the Margin, if any, is fixed at issuance of the Notes, Noteholders are subject to the risk that the Margin does not reflect the spread that investors require in addition to the relevant reference interest rate as a compensation for the risks inherent in the Notes ("**market spread**"). The market spread typically changes on a daily basis. As the market spread changes, the price of the Note changes in the opposite direction. A decrease of the market spread has a positive impact on the price of the Note, an increase of the market spread has a negative impact on the price of the Note. However, the price of the Notes is subject to changes in the market spread, changes in the reference interest rate or both. Noteholders should be aware that movements of the market spread can adversely affect the price of the Notes and can lead to losses for the Noteholders.

In addition, Noteholders are exposed to reinvestment risk with respect to proceeds from interest payments or any early redemptions by the Issuer. If the market yield (or market spread respectively) declines, and if Noteholders want to invest such proceeds in comparable transactions, Noteholders will only be able to reinvest such proceeds in comparable transactions at the then prevailing lower market yields (or market spreads respectively).

Risks associated with the reform of LIBOR, EURIBOR and other interest rate 'benchmarks'.

The Euro Interbank Offered Rate ("**EURIBOR**") and other interest rates or other types of rates and indices which are deemed "benchmarks" (each a "**Benchmark**" and together, the "**Benchmarks**") have become the subject of regulatory scrutiny and recent national and international regulatory guidance and proposals for reform. Some of these reforms are already effective whilst others are still to be implemented. These reforms may cause such Benchmarks to perform differently than in the past, or to disappear entirely, or have other

consequences which cannot be predicted. Any such consequence could have a material adverse effect on any Notes linked to such a Benchmark.

International proposals for reform of Benchmarks include the European Council's regulation (EU) 2016/1011 of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds and amending Directives 2008/48/EC and 2014/17/EU and Regulation (EU) No 596/2014 (the "**Benchmark Regulation**") which is fully applicable since 1 January 2018.

The Benchmark Regulation could have a material impact on Notes linked to a Benchmark, including in any of the following circumstances:

- a rate or index which is a Benchmark may only be used if its administrator obtains authorisation or is registered and in case of an administrator which is based in a non-EU jurisdiction, if the administrator's legal benchmark system is considered equivalent (Art. 30 Benchmark Regulation), the administrator is recognised (Art. 32 Benchmark Regulation) or the Benchmarks is endorsed (Art. 33 Benchmark Regulation) (subject to applicable transitional provisions). If this is not the case, Notes linked to such Benchmarks could be impacted; and
- the methodology or other terms of the Benchmark could be changed in order to comply with the terms of the Benchmark Regulation, and such changes could have the effect of reducing or increasing the rate or level or affecting the volatility of the published rate or level, and could have an impact on the Notes, including Calculation Agent determination of the rate.

Amounts payable under floating rate Notes issued under the Programme are calculated by reference to (i) EURIBOR which is provided by the European Money Markets Institute ("**EMMI**") or (ii) the London Interbank Offered Rate ("**LIBOR**") which is provided by the ICE Benchmark Association ("**IBA**"). As at the date of this Prospectus, each of EMMI and IBA does not appear on the register of administrators and benchmarks established and maintained by the European Securities and Markets Authority ("**ESMA**") pursuant to Article 36 of the Benchmarks Regulation. As far as the Issuers are aware, the transitional provisions in Article 51 of the Benchmark Regulation apply, such that EMMI and IBA are not currently required to obtain authorisation or registration (or, if located outside the European Union, recognition, endorsement or equivalence).

If a Benchmark were to be discontinued or otherwise unavailable, the rate of interest for floating rate Notes which are linked to such Benchmark will be determined for the relevant period by the fall-back provisions applicable to such Notes, which in the end could result in the same rate being applied until maturity of the floating rate Notes, effectively turning the floating rate of interest into a fixed rate of interest.

In addition to the aforementioned Benchmark Regulation, there are numerous other proposals, initiatives and investigations which may impact Benchmarks.

Following the implementation of any such potential reforms, the manner of administration of Benchmarks may change, with the result that they may perform differently than in the past, or Benchmarks could be eliminated entirely, or there could be other consequences which cannot be predicted. For example, on 27 July 2017, the UK Financial Conduct Authority announced that it will no longer persuade or compel banks to submit rates for the calculation of the LIBOR benchmark after 2021 (the "**FCA Announcement**"). The FCA Announcement indicates that the continuation of LIBOR on the current basis cannot and will not be guaranteed after 2021.

Any changes to a Benchmark as a result of the Benchmark Regulation or other initiatives, could have a material adverse effect on the costs of refinancing a Benchmark or the costs and risks of administering or otherwise participating in the setting of a Benchmark and complying with any such regulations or requirements. Although it is uncertain whether or to what extent any of the above-mentioned changes and/or any further changes in the administration or method of determining a Benchmark could have an effect on the value of any Notes linked to the relevant Benchmark, investors should be aware that any changes to a relevant Benchmark may have a material adverse effect on the value of any Notes linked to such Benchmark.

Credit ratings may not reflect all risks and may be subject to change at all times

One or more independent credit rating agencies may assign credit ratings to the Notes.

The ratings may not reflect the potential impact of all risks related to structure, market, additional factors discussed above, and other factors that may affect the value of the Notes. A credit rating is not a recommendation to buy, sell or hold securities and may be revised or withdrawn by the rating agency at any time. Rating agencies may also change their methodologies for rating securities in the future. If the rating agencies were to change their practices for rating such securities in the future and the ratings of the Notes were to be subsequently lowered, this may have a negative impact on the trading price of the Notes.

The market value of the Notes could decrease if the creditworthiness of the Allianz Group worsens

If the likelihood that the Issuer or the Guarantor will be in a position to fully perform all obligations under the Notes or the Guarantee (as applicable) when they fall due decreases, for example, because of the materialisation of any of the risks regarding the Allianz Group or Allianz SE, the market value of the Notes will suffer. In addition, even if the likelihood that the Issuer will be in position to fully perform all obligations under the Notes when they fall due actually has not decreased, market participants could nevertheless have a different perception. In addition, the market participants' estimation of the creditworthiness of corporate debtors in general or debtors operating in the same business as the Allianz Group could adversely change. If any of these risks occurs, third parties would only be willing to purchase Notes for a lower price than before the materialisation of this risk. Under these circumstances, the market value of the Notes will decrease.

Legal investment considerations may restrict certain investments

The investment activities of certain investors are subject to legal investment laws and regulations, or review or regulation by certain authorities. Each potential investor should consult its legal advisers to determine whether and to what extent (i) Notes are legal investments for it, (ii) Notes can be used as collateral for various types of borrowing and (iii) other restrictions apply to its purchase or pledge of any Notes. Financial institutions should consult their legal advisers or the appropriate regulators to determine the appropriate treatment of Notes under any applicable risk-based capital or similar rules.

Special investment risks

Transaction costs

An actual yield on the Notes may be reduced from the stated yield by transaction costs.

When Notes are purchased or sold, several types of incidental costs (including transaction fees and commissions) are incurred in addition to the current price of the security. These incidental costs may significantly reduce or even exclude the profit potential of the Notes. For instance, credit institutions as a rule charge their clients for own commissions which are either fixed minimum commissions or pro-rata commissions depending on the order value. To the extent that additional – domestic or foreign – parties are involved in the execution of an order, including but not limited to domestic dealers or brokers in foreign markets, Noteholders must take into account that they may also be charged for the brokerage fees, commissions and other fees and expenses of such parties (third party costs).

In addition to such costs directly related to the purchase of Notes (direct costs), Noteholders must also take into account any follow-up costs (such as custody fees). Investors should inform themselves about any additional costs incurred in connection with the purchase, custody or sale of the Notes before investing in the Notes.

Noteholders must further take into account that upon sales or purchases of Notes prior to an interest payment date (depending on their type and features), respectively, no accrued interest might be paid or charged, as the case may be.

Margin lending

Margin lending, where it is permitted, can materially increase the risk to a Noteholder of non-performance of the Notes.

If a loan is used to finance the acquisition of the Notes and the Notes subsequently go into default, or if the trading price diminishes significantly, the Noteholder not only has to face a potential loss on its investment, but it will also have to repay the loan and pay interest thereon. This may significantly increase the risk of a loss. Investors should not assume that they will be able to repay the loan or pay interest thereon from the profits of a transaction. Instead, investors should assess their financial situation prior to an investment, as to whether they are able to pay interest on the loan, or to repay the loan on demand, even if they may suffer losses instead of realising gains.

Tax impact of the investment

An effective yield on the Notes may be diminished by the tax impact on an investment in the Notes.

Payments of interest on the Notes, or profits realised by the Noteholder upon the sale or repayment of the Notes, may be subject to taxation in its home jurisdiction or in other jurisdictions in which it is required to pay taxes. Certain tax impacts on Noteholders generally in Germany, the Netherlands and Luxembourg are described

below, see "TAXATION – Federal Republic of Germany, – The Netherlands, – Luxembourg". However, the tax impact on an individual Noteholder may differ from the situation described for Noteholders generally.

All investors are advised to contact their own tax advisors for advice on the tax impact of an investment in the Notes. Examples of taxation risks that investors should consider together with their advisors include the risk of double taxation (in the Netherlands and/or Germany and their home jurisdiction).

The proposed financial transactions tax ("FTT")

The European Commission has published a proposal for a Directive for a common FTT in Belgium, Germany, Estonia, Greece, Spain, France, Italy, Austria, Portugal, Slovenia and Slovakia (the "**Participating Member States**"). In December 2015 Estonia withdrew from the group of states willing to introduce the FTT.

The proposed FTT has very broad scope and could, if introduced in its current form, apply to certain dealings in the Notes (including secondary market transactions).

Under current proposals the FTT could apply in certain circumstances to persons both within and outside of the Participating Member States. Generally, it would apply to certain dealings in the Notes where at least one party is a financial institution, and at least one party is established in a Participating Member State. A financial institution may be, or be deemed to be, "established" in a Participating Member State in a broad range of circumstances, including (a) by transacting with a person established in a Participating Member State or (b) where the financial instrument which is subject to the dealings is issued in a Participating Member State.

The FTT proposal remains subject to negotiation between the (still) Participating Member States and the scope of any such tax is uncertain. Additional EU Member States may decide to participate. Furthermore, it is currently uncertain if and when the FTT will be enacted and when the tax will enter into force with regard to dealings with the Notes. Prospective Noteholders are advised to seek their own professional advice in relation to the FTT.

Tax initiatives of Dutch government

On 10 October 2017, the four parties that have formed the new Dutch government released their coalition agreement (*regeerakkoord*) 2017-2021. The coalition agreement does not include concrete legislative proposals, but instead sets out a large number of policy intentions of the new Dutch government. On 23 February 2018, the Dutch State Secretary for Finance published a letter with an annex containing further details on the government's policy intentions against tax avoidance and tax evasion.

One of the policy intentions is the introduction of a withholding tax on interest payments made to beneficiaries in low-tax jurisdictions or countries that are included in the EU list of non-cooperative jurisdictions as of 2021. The interest withholding tax would apply to certain payments made by a Dutch entity directly or indirectly to group companies in a low tax or non-cooperative jurisdictions. However, it cannot be ruled out that it will have a wider application and, as such, it could potentially be applicable to interest payments on the Notes. Many aspects of this policy intention remain unclear. As at the date of this Prospectus, no clear definition has been provided of what is considered to be a low-tax jurisdiction and it is not clear whether the withholding tax obligation will extend to publicly listed bonds.

If interest payments to unrelated, third parties were to be affected and, as such, withholding on interest payments to Noteholders were to arise, this could result in Issuers having the right to redeem Notes under § 4(b) of the Terms and Conditions (*Early redemption following a Gross up Event*).

GENERAL DESCRIPTION OF THE PROGRAMME

Under the EUR 25,000,000,000 Debt Issuance Programme (the "**Programme**"), Allianz SE, Allianz Finance II B.V. and Allianz Finance III B.V. (the "**Issuers**" and each an "**Issuer**"), subject to compliance with all relevant laws, regulations and directives, may from time to time issue notes (the "**Notes**").

The aggregate principal amount of Notes outstanding will not at any time exceed EUR 25,000,000,000 (or the equivalent in other currencies) (the "**Programme Amount**"). The Issuers may increase the Programme Amount in accordance with the terms of the Programme Agreement (as defined below) from time to time.

Notes issued under the Programme may be issued either: (1) pursuant to this Base Prospectus and associated Final Terms; or (2) pursuant to a Specific Prospectus (as defined below); or (3) in relation to Notes not publicly offered in, and not listed on a regulated market of, any member state of the European Economic Area in such form as agreed between the relevant Issuer, the Guarantor (as applicable), the relevant Dealer(s) and, if relevant for the Fiscal Agent (as defined below), the Fiscal Agent.

"**Specific Prospectus**" means any prospectus prepared by any of the Issuers and the Guarantor (as applicable) in relation to Notes issued under the Programme and having terms not contemplated by the Base Prospectus as Option I or Option II, which may incorporate by reference certain parts of the Base Prospectus and which constitutes a prospectus for the purposes of Article 5.3 or 5.4, as the case may be, of the Prospectus Directive, including any documents which are from time to time incorporated by reference in the Specific Prospectus, as such Specific Prospectus is amended, supplemented or replaced from time to time.

Notes issued by Allianz Finance II B.V. under the Base Prospectus will be guaranteed by Allianz SE (in such capacity the "**Guarantor**") pursuant to the guarantee with respect to Allianz Finance II B.V., dated 26 April 2018, and Notes issued by Allianz Finance III B.V. under the Base Prospectus will be guaranteed by the Guarantor pursuant to the guarantee with respect to Allianz Finance III B.V., dated 26 April 2018 (see "Guarantee with respect to Allianz Finance II B.V." and "Guarantee with respect to Allianz Finance III B.V." below) (the "**Guarantees**" and each a "**Guarantee**"). Each Guarantee constitutes an irrevocable, unsecured and unsubordinated obligation of the Guarantor ranking *pari passu* with all other unsecured and unsubordinated obligations of the Guarantor, save for any obligations required to be preferred by law. In relation to Notes issued by Allianz Finance II B.V. or Allianz Finance III B.V. under the Programme but not under this Base Prospectus, Allianz SE may elect to give separate guarantees.

Commerzbank Aktiengesellschaft acts as arranger in respect of the Programme (the "**Arranger**").

The Issuer or the Issuers may from time to time appoint dealers in respect of one or more Tranches. References in this Base Prospectus to "Dealers" are to all persons appointed as a dealer in respect of one or more Tranches.

Deutsche Bank Aktiengesellschaft will act as fiscal agent (the "**Fiscal Agent**") and paying agent (the "**Paying Agent**"). Deutsche Bank Luxembourg S.A. will act as Luxembourg Listing Agent.

The Notes will be issued in series (each a "**Series**"). Each Series may be issued in tranches (each a "**Tranche**") being intended to be interchangeable with all other Notes of the same Series issued on the same or different issue dates. The specific terms of each Tranche issued under this Base Prospectus (which, save in respect of the issue date, issue price, first payment of interest and principal amount of the Tranche, will be identical to the terms of all other Tranches of the same Series) will be set out in the relevant final terms for such Tranche (the "Final Terms").

Notes may be distributed by way of public offer or private placements and, in each case, on a syndicated or non-syndicated basis. The method of distribution of each Tranche will be stated in the relevant Final Terms. The Notes may be offered to qualified and non-qualified investors.

The Commission de Surveillance du Secteur Financier (the "**CSSF**") of the Grand Duchy of Luxembourg in its capacity as competent authority (the "**Competent Authority**") under the Prospectus Directive has approved this Base Prospectus as a base prospectus within the meaning of Art. 5(4) of the Prospectus Directive pursuant to article 7 of the Luxembourg Prospectus Law. By approving this Base Prospectus, CSSF gives no undertaking as to the economic and financial soundness of the operation or the quality or solvency of the Issuers and the Guarantor (if any).

Application has also been made to the Luxembourg Stock Exchange for Notes issued under the Programme for the period of twelve months from the date of the publication of this Base Prospectus to be listed on the official list of the Luxembourg Stock Exchange (the "**Official List**") and to be admitted to trading on the Luxembourg Stock Exchange's regulated market "Bourse de Luxembourg", appearing on the list of regulated markets issued

by the European Commission, and may be made on any other regulated market in a Member State (a "**Regulated Market**") of the European Economic Area ("**EEA**"). The Luxembourg Stock Exchange's regulated market is a regulated market for the purposes of the Markets in Financial Instruments Directive 2014/16/EU (as amended). However, Notes may be listed on any other stock exchange or may be unlisted as specified in the relevant Final Terms.

The Notes may be offered to the public in the Grand Duchy of Luxembourg ("**Luxembourg**"). The Issuer may request the CSSF in its capacity as Competent Authority under Luxembourg Prospectus Law to provide competent authorities in host Member States within the EEA with a certificate of approval attesting that the Base Prospectus has been drawn up in accordance with the Luxembourg Prospectus Law ("**Notification**").

The offer and distribution of any Notes of any Tranche in jurisdictions other than Luxembourg will be subject to selling restrictions, including those for the United States, the EEA, the United Kingdom, The Netherlands, the Republic of Italy, Japan, Hong Kong, Singapore and Switzerland. See "Subscription and Sale" below.

Issuances of Notes under the Programme will be made pursuant to Category 2 for the purposes of Regulation S under the United States Securities Act of 1933, as amended.

The Notes will be issued in compliance with U.S. Treas. Reg. §1.163-5(c)(2)(i)(D) (the "**D Rules**").

Each Tranche of Notes will be represented on issue either by a temporary global note (each a "**Temporary Global Note**") or a permanent global note (each a "**Permanent Global Note**") only (the Temporary Global Note and the Permanent Global Note, each a "**Global Note**"). Interests in a Temporary Global Note will be exchangeable, in whole or in part, for interest in a Permanent Global Note on or after the date 40 days after the later of the commencement of the offering and the relevant issue date (the "**Exchange Date**"), upon certification as to non-U.S. beneficial ownership. The Notes are intended to be held in a manner, which would allow Eurosystem eligibility. Therefore, the Global Notes will be deposited on the issue date either (i) in classical global note form with Clearstream Banking AG, Frankfurt am Main or (ii) in new global note form with a common safekeeper for Euroclear and Clearstream, Luxembourg and/or any other agreed clearing system. It does not necessarily mean that the Notes will be recognised as eligible collateral for Eurosystem monetary policy and intra-day credit operations by the Eurosystem either upon issue or at any or all times during their life. Such recognition will depend upon satisfaction of the Eurosystem eligibility criteria applicable from time to time.

The Notes will be freely transferable in accordance with the rules and regulations of the relevant Clearing System.

Notes will be issued in such denominations as may be agreed between the relevant Issuer and the relevant Dealer(s) and as indicated in the applicable Final Terms save that the minimum denomination of the Notes will be, if in euro, EUR 1,000, and, if in any currency other than euro, an amount in such other currency at least equivalent to EUR 1,000 at the time of the issue of Notes. Subject to any applicable legal or regulatory restrictions, and requirements of relevant central banks, Notes may be issued in euro or any other currency.

Notes will be issued with such maturities as may be agreed between the relevant Issuer and the relevant Dealer(s), subject to such minimum or maximum maturities as may be allowed or required from time to time by any laws, regulations and directives applicable to the relevant Issuer or the relevant currency.

The principal amount of the Notes, the currency, the interest payable in respect of the Notes, if any, the issue price (which may be at par or at a discount to, or premium over, par) and maturities of the Notes which are applicable to a particular Series and, if applicable, Tranche will be set out in the relevant Final Terms.

Notes of any Tranche may be issued at a price (the "**Issue Price**") equal to their principal amount or at a discount or premium to their principal amount. The Issue Price for the Notes of any Tranche issued on a syndicated basis will be determined at the time of pricing on the basis of a yield which will be determined on the basis of the orders of the investors which are received by the Dealers during the offer period. Orders will specify a minimum yield and may only be confirmed at or above such yield. The resulting yield will be used to determine the Issue Price all to correspond to the yield.

The Notes issued under this Base Prospectus will be issued as fixed rate Notes, non interest bearing Notes or floating rate Notes.

The yield for Notes with fixed interest rates will be calculated by the use of the ICMA method, which determines the effective interest rate of notes taking into account accrued interest on a daily basis.

The Final Terms in respect of any Notes will include a legend entitled "MiFID II Product Governance" which will outline the target market assessment in respect of the Notes and which channels for distribution of the Notes are appropriate. Any person subsequently offering, selling or recommending the Notes (a "**distributor**") should take into consideration the target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the target market assessment) and determining appropriate distribution channels.

A determination will be made in relation to each issue about whether, for the purpose of the MiFID Product Governance rules, any Dealer subscribing for any Notes is a manufacturer in respect of such Notes, but otherwise neither the Arranger nor the Dealers nor any of their respective affiliates will be a manufacturer for the purpose of the MiFID Product Governance Rules.

If the Final Terms in respect of any Notes include a legend entitled "Prohibition of Sales to EEA Retail Investors", the Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the EEA. For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of MiFID II; (ii) a customer within the meaning of the Insurance Mediation Directive, where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in the Prospectus Directive. Consequently, no key information document required by the PRIIPs Regulation for offering or selling the Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

ISSUE PROCEDURES

General

The relevant Issuer and the relevant Dealer(s) will agree on Conditions. The Conditions will be constituted by the relevant set of Terms and Conditions set forth below in the Base Prospectus as further specified by the relevant Final Terms as described below.

Options for sets of Terms and Conditions

A separate set of Terms and Conditions applies to each type of Notes, as set forth below. The Final Terms provide for the relevant Issuer to choose between the following Options:

- Option I – Terms and Conditions for Notes with fixed interest rates or non interest bearing Notes; and
- Option II – Terms and Conditions for Notes with floating interest rates.

Documentation of the Conditions

The relevant Issuer may document the Conditions of an individual issue of Notes in either of the following ways:

–The Final Terms shall be completed as set out therein. The Final Terms shall determine which of the Option I or Option II, including certain further options contained therein, respectively, shall be applicable to the individual Series and Tranche of Notes by replicating the relevant provisions and completing the relevant placeholders of the relevant set of Terms and Conditions as set out in the Base Prospectus in the Final Terms. The replicated and completed provisions of the set of Terms and Conditions alone shall constitute the Conditions which will be attached to each global note representing the Notes of the relevant Tranche. This type of documentation of the Conditions will be required where the Notes are publicly offered, in whole or in part, or are to be initially distributed, in whole or in part, to non-qualified investors.

–Alternatively, the Final Terms shall determine which of Option I or Option II and of the respective further options contained therein are applicable to the individual issue by referring to the relevant provisions of the relevant set of Terms and Conditions as set out in the Base Prospectus only. The Final Terms will specify that the provisions of the Final Terms and the relevant set of Terms and Conditions as set out in the Base Prospectus, taken together, shall constitute the Conditions. Each global note representing a particular Tranche of Notes will have the Final Terms and the relevant set of Terms and Conditions as set out in the Base Prospectus attached.

Determination of Options / Completion of Placeholders

The Final Terms shall determine which of the Option I or Option II shall be applicable to the individual issue of Notes. Each of the sets of Terms and Conditions of Option I or Option II contains also certain further options (characterised by indicating the respective optional provision through instructions and explanatory notes set out in square brackets within the text of the relevant set of Terms and Conditions as set out in the Base Prospectus) as well as placeholders (characterised by square brackets which include the relevant items) which will be determined by the Final Terms as follows:

Determination of Options

The relevant Issuer will determine which options will be applicable to the individual issue either by replicating the relevant provisions in the Final Terms or by reference of the Final Terms to the respective sections of the relevant set of Terms and Conditions as set out in the Base Prospectus. If the Final Terms do not refer to an alternative or optional provision or such alternative or optional provision is not replicated therein it shall be deemed to be deleted from the Terms and Conditions.

Completion of Placeholders

The Final Terms will specify the information with which the placeholders in the relevant set of Terms and Conditions will be completed. In the case the provisions of the Final Terms and the relevant set of Terms and Conditions, taken together, shall constitute the Conditions, the relevant set of Terms and Conditions shall be deemed to be completed by the information contained in the Final Terms as if such information were inserted in the placeholders of such provisions.

All instructions and explanatory notes and text set out on the side or in square brackets in the relevant set of Terms and Conditions and any footnotes and explanatory text in the Final Terms will be deemed to be deleted from the Terms and Conditions.

Language of the Conditions

As to the language of the respective Terms and Conditions the relevant Issuer may elect to draft the Conditions either in the German language with an English translation, with the German being the controlling language, or in the English language only.

Im Fall von Schuldverschreibungen, für die die Währungs-umstellungsklausel anwendbar ist, gilt folgendes:

Wenn [Name des EWU-Mitgliedsstaats] seine Staatsschulden auf eine andere Währung als Euro (die "Neue Währung") umstellt, wird mit Wirkung ab dem Tag dieser Umstellung (der "Umstellungstag") die Festgelegte Währung der Schuldverschreibungen insgesamt, nicht jedoch teilweise, auf die Neue Währung umgestellt. Die Emittentin wird die Umstellung unverzüglich gemäß § 11 bekannt machen.

If [name EMU Member State] redenominates its public debt to a currency other than the Euro (the "New Currency"), the Specified Currency of the Notes in whole but not in part shall be redenominated to the New Currency with effect from the day of introduction of such New Currency (the "Redenomination Date"). The Issuer shall give notice of such fact without undue delay in accordance with § 11.

In the case of Notes for which the redenomination clause is applicable, the following applies:

Mit Wirkung ab dem Umstellungstag gilt jede in diesen Bedingungen enthaltene Bezugnahme auf die Festgelegte Währung als durch eine Bezugnahme auf die Neue Währung ersetzt und die Umstellung der Festgelegten Währung auf die Neue Währung als bewirkt. Die Emittentin wird die Festgelegte Stückelung und alle übrigen sich aus einer Schuldverschreibung ergebenden Zahlungsverpflichtungen in die Neue Währung konvertieren, indem sie den offiziell für den Zeitpunkt der Umstellung der Staatsschulden auf die Neue Währung festgelegten Umrechnungskurs anwendet und die sich ergebende Zahl auf die nächste kleinste Einheit der Neuen

The Issuer shall convert the Specified Denomination and any other payment obligation due under a Note to the New Currency by applying the conversion rate officially fixed for the time of redenomination of the public debt and rounding the resultant figure to the nearest unit of the New Currency (with 0.005 units being rounded upwards).

Währung rundet (wobei 0,005 Einheiten aufgerundet werden).

Die Bekanntmachung über die Umstellung der Schuldverschreibungen hat folgende Angaben zu enthalten: (i) die Bezeichnung der umzustellenden Schuldverschreibungen einschließlich ihrer Wertpapierkennungen, (ii) die Angabe des für den Zeitpunkt der Umstellung der Staatsschulden auf die Neue Währung festgelegten Umrechnungskurses, (iii) den Umstellungstag und (iv) ggfs. die Bestimmung des neuen Referenzsatzes und/oder Änderungen der Definition des Begriffs "Geschäftstag".

Die vor der Umstellung anwendbare Definition des Begriffs "Zahltag" findet auch nach der Umstellung auf die Schuldverschreibungen Anwendung, es sei denn, die Emittentin legt in der Bekanntmachung der Umstellung der Schuldverschreibungen diejenige Definition des Begriffs Zahltag fest, die mit der dann bestehenden oder erwarteten Marktpraxis für auf die Neue Währung lautenden Schuldverschreibungen, die in internationalen Clearing Systemen gehalten werden, übereinstimmt.

Der vor der Umstellung anwendbare Referenzsatz findet auch nach der Umstellung auf die Schuldverschreibungen Anwendung (mit der Maßgabe, dass alle Bezugnahmen auf die Festgelegte Währung durch Bezugnahmen auf die Neue Währung ersetzt werden), es sei denn, die Emittentin legt zur Zeit der Umstellung denjenigen Referenzzinssatz als Referenzsatz fest, der mit der dann bestehenden oder erwarteten Marktpraxis für auf die Neue Währung lautende, variabel verzinsliche Schuldverschreibungen, die in internationalen Clearing Systemen gehalten werden, übereinstimmt.

Wenn der Referenzzinssatz für variabel verzinsliche Staatsschulden oder als Benchmarkemissionen begebene Schuldverschreibungen erst mit Wirkung ab einem Tag, der nach dem Umstellungstag liegt, auf einen neuen Referenzzinssatz umgestellt wird, kann die Emittentin auch zu diesem Zeitpunkt diesen Referenzzinssatz als neuen Referenzsatz für die betreffende Serie von Schuldverschreibungen festlegen.

The definition of the term "Payment Business Day" that applies to the Notes prior to the redenomination shall also apply to the Notes after the redenomination, unless the Issuer, in the notice regarding the redenomination of the Notes elects to apply to the Notes such definition of the term "Payment Business Day" which is consistent with the then existing or anticipated market practice for notes issued in the New Currency and held in international clearing systems.

The Reference Rate that shall apply to the Notes after the redenomination shall be the reference interest rate which applied to the Notes prior to the redenomination (provided that all references to the Specified Currency be replaced by references to the New Currency), unless the Issuer elects, at the time of the redenomination, to apply to the Notes the reference interest rate as Reference Rate which is consistent with the then existing or anticipated market practice for floating rate notes issued in the New Currency and held in international clearing systems.

If the reference interest rate for floating rate public debt or for benchmark issues is only changed with effect on a date that falls after the Redenomination Date, the Issuer may fix such reference interest rate to become the Reference Rate that is applicable on the relevant Series of Notes from that date.

If on or after the redenomination the Reference Rate which applied to the Notes prior to the redenomination is no longer available, the Issuer shall apply to the Notes the reference interest rate which is consistent with the then existing or anticipated market practice for floating rate notes issued in the New Currency and held in international clearing systems.

- 1.1** Allianz SE (the "**Guarantor**") hereby unconditionally and irrevocably guarantees (the "**Guarantee**") to the holders (the "**Noteholders**") of any unsubordinated Notes (the "**Notes**") now or at any time hereafter issued by Allianz Finance II B.V., Amsterdam, The Netherlands, as issuer under the Programme (the "**Issuer**") the due payment in the relevant specified currency(ies) of the amounts corresponding to the principal of and interest on, as well as any other amounts due on, the Notes in accordance with the terms and conditions of the Notes (the "**Conditions**"). - 1.2** The intent and purpose of this Guarantee is to ensure that the Noteholders under any and all circumstances, whether factual or legal, and irrespective of validity or enforceability of the obligations of the Issuer, or any other reasons on the basis of which the Issuer may fail to fulfil its obligations, receive on the respective due date any and all sums payable in accordance with the Conditions.
- 1.3** The Guarantor may deposit with the Lower Court (*Amtsgericht*) in Frankfurt am Main any principal and interest as well as any other amounts due on the Notes, if any, not claimed by the Noteholders within twelve months after having become due. 2 Die Garantie stellt einen Vertrag zugunsten der jeweiligen Anleihegläubiger als begünstigte Dritte gemäß § 328 Absatz 1 BGB dar, die jedem Anleihegläubiger das Recht gibt, Erfüllung der hierin übernommenen Verpflichtungen unmittelbar von der Garantin zu verlangen und diese Verpflichtungen unmittelbar gegen die Garantin durchzusetzen.

1.5 Negative Pledge of the Guarantor

- (i) The Guarantor hereby undertakes towards the Noteholders, for as long as any Notes shall remain outstanding, but only up to the time at which all amounts payable under the Conditions have been paid to the Clearing System, not to provide any security on its domestic real property for any Capital Market Indebtedness, including any guarantees or other indemnities assumed in respect thereof, without at the same time or prior thereto securing the Notes equally and rateably therewith.
- (ii) The undertaking pursuant to Clause 1.5(i) shall not apply to a security (x) which is mandatory according to applicable laws, or (y) which is required as a prerequisite for governmental approvals. 2 This Guarantee constitutes a contract in favour of the respective Noteholders as third party beneficiaries pursuant to § 328 (1) of the German Civil Code (*Bürgerliches Gesetzbuch*) giving rise to the right of each such Noteholder to require performance of the obligations assumed hereby directly from the Guarantor and to enforce such obligations directly against the Guarantor.

History and Development of Allianz SE

The company was founded as a property insurer on 5 February 1890 in Berlin under the name Allianz Versicherungs-Aktien-Gesellschaft.

In 1985, the company transferred its operational insurance business to today's Allianz Versicherungs-AG and changed its name to "Allianz Aktiengesellschaft Holding". Since 1985, it operates as a holding company with reinsurance activities. The name was again changed, by resolution of the General Meeting of 7 October 1996, to "Allianz Aktiengesellschaft" (Allianz AG).

On 3 February 2006, the extraordinary General Meetings of holders of RIUNIONE ADRIATICA DI SICURTÀ S.p.A ("RAS") ordinary shares and holders of RAS savings shares and on 8 February 2006, the extraordinary General Meeting of Allianz AG agreed to the cross-border merger between Allianz AG and RAS. Upon registration of the merger with the commercial register of Allianz AG on 13 October 2006, Allianz adopted the legal form of a European Company (Societas Europaea, SE) and has been operating since then under the corporate name "Allianz SE".

Investments

Allianz Group's invested assets consist primarily of the portfolios of its various business operations. In addition to the regular portfolio managing process the following significant transactions have been made or are in the process of being closed since 31 December 2017.

Allianz and Liverpool Victoria to launch joint venture in the United Kingdom personal insurance market

On 4 August 2017, Allianz Group and Liverpool Victoria Friendly Society (LV) agreed to launch a joint venture and a longer-term strategic partnership in the UK, creating a general insurance business with over 6 million customers and gross premiums written in excess of £ 1.7 bn. The first stage of the transaction has been closed as at the end of 2017 and was financed with existing funds. LV received approx. £ 500 mn from Allianz in exchange for a 49 per cent. stake of Allianz in Liverpool Victoria General Insurance Group Limited (LVGIG). LVGIG acquired Allianz Insurance plc's personal home and motor insurer's renewal rights while Allianz Insurance plc obtained LVGIG's commercial insurer's renewal rights. The second stage of the transaction will take place in 2019 and will see Allianz pay approx. £ 213 mn for a further 20.9 per cent. stake in LVGIG through an agreed forward purchase, based on a total valuation of approx. £ 1.020 bn for 100 per cent. of LVGIG. LV has a put option under which it can sell all or part of its remaining shares to Allianz. Notice can be served at any time after completion of the first stage of the transaction, with the consideration during the first two years after completion being a fixed price based on the total transaction value and fair market value thereafter. The second stage will be financed with existing funds. For both stages regulatory approvals have been obtained.

Allianz sells stake in Oldenburgische Landesbank AG

Allianz Deutschland AG has sold its entire stake in Oldenburgische Landesbank AG (OLB), corresponding to 90.2 per cent. of the shares of the company, to Bremer Kreditbank AG (BKB). Allianz Deutschland AG and BKB had entered on 23 June 2017 into a sale and purchase agreement regarding the sale of the Allianz stake in OLB for € 300 mn. Following receipt of all regulatory approvals, the transaction was completed on 7 February 2018.

Allianz to sell part of life insurance portfolio in Taiwan

On 19 October 2017, Allianz SE announced that Allianz Taiwan Life Insurance Co. Ltd has reached an agreement to sell a part of its traditional life insurance portfolio to China Life Insurance Co., headquartered in Taipei, Taiwan (China Life). This transaction has received regulatory approval on 27 February 2018. The closing is expected for the second quarter of 2018. The transaction includes a portfolio with insurance liabilities of around € 1.2 bn. Allianz Group expects a positive impact on the group's Solvency II capital position and a negative net income effect of around € 0.2 bn in 2018.

Tender offer to the minority shareholders of Euler Hermes

In November and December 2017, the Allianz Group acquired in a series of transactions approximately 15 % of the share capital of Euler Hermes Group SA ("**Euler Hermes**") for € 779 mn in cash, corresponding to a price of € 122 per share. As a result, the Allianz Group increased its ownership to approximately 78 % (excluding treasury shares held by Euler Hermes representing 1.45 % of its share capital) of Euler Hermes share capital as of 31 December 2017.

In January 2018, Allianz SE launched a simplified cash tender offer to acquire the remaining 8,769,824 outstanding Euler Hermes shares not already owned by Allianz at the price of € 122 per share. The tender offer was open from 15 January until 13 February 2018. During this period, the Allianz Group extended its ownership to 92.43 % (excluding the treasury shares). As of 23 February 2018, the remaining float on the market represented less than 5 % of Euler Hermes share capital. On 9 April 2018, in continuation with its initial tender offer, a second simplified cash tender offer was launched for all remaining Euler Hermes shares held by minority shareholders. The consideration for one Euler Hermes share was unchanged from the prior tender offer and was € 122 in cash. The second simplified cash tender offer closed on 20 April 2018, and will be followed by a squeeze out procedure and delisting of Euler Hermes shares from the Euronext Paris stock exchange. The overall transaction will be financed with existing funds.

Regulatory capital adequacy

The capital requirements, as well as the definition and calculation of eligible capital, are governed by the Solvency II rules that came into force on 1 January 2016. The Allianz Group's and Allianz SE's own funds as well as the capital requirements are since then based on the market value balance sheet approach as the major economic principle of the Solvency II rules. Allianz Group determines its regulatory capital requirements on the basis of a (partial) internal model¹.

Some uncertainty about the future capitalization requirements of Allianz remains since the future capital requirements applicable for Global Systemically Important Insurers (so-called G-SIIs) are still not finalized. Also the review of certain elements of the Solvency II framework could potentially have an impact on Allianz's capitalization. Finally, the potential for a multiplicity of different regulatory regimes, capital standards and reporting requirements will increase operational complexity and costs.

Allianz Group: Solvency II regulatory capitalization²

EUR bn	31 December 2017	31 December 2016
Own funds	84.2	81.3
Capital requirement	23.7	20.9
Capitalization ratio	355%	389%

As of 31 December 2017, Group Solvency II capitalization increased to 229% compared to 218% at the end of 2016. This was driven by an increase in Own Funds and an overall decrease in the Solvency II capital requirement. The increase in the Solvency II capitalization ratio was mainly due to strong Solvency II earnings and favorable markets that were characterized by higher interest rates, lower credit spreads, and rising equities. Model changes also contributed to the increase of the capitalization ratio. These positive impacts were partly offset by capital management activities like the share buy-backs as well as the dividend accrual throughout the year. Management actions such as the acquisition of a 49 % stake in Liverpool Victoria General Insurance Group and part of the non-controlling interests of Euler Hermes Group S.A., the decrease in exposures to some government bonds, and the improvement of our interest rate risk profile had further compensating effects. Other

¹ From a formal perspective, the German Supervisory Authority deems Allianz Group's model to be 'partial' because it does not cover all of Allianz Group's operations: some of Allianz Group's smaller operations report under the standard model and others under the deduction and aggregation method.

Ratings⁽¹⁾

As of the date of this prospectus, Allianz SE had the following ratings:

	Standard & Poor's ⁽²⁾	Moody's ⁽³⁾	A.M. Best ⁽⁴⁾
Insurer financial strength.....	AA	Aa3	A+
Outlook	Stable	Stable	Stable
Counterparty credit.....	AA	Not rated	aa- ⁽⁵⁾
Outlook	Stable		Stable
Senior unsecured debt	AA	Aa3	aa-
Outlook	Stable	Stable	Stable

⁽¹⁾ Includes ratings for securities issued by Allianz Finance II B.V. and Allianz Finance III B.V.

⁽²⁾ Standard & Poor's rating scale for Insurer Financial Strength Ratings consists of the following categories: "AAA", "AA", "A", "BBB", "BB", "B", "CCC", "CC" (in descending order). In addition, a "R" rating is assigned to issuers being under regulatory supervision. Ratings from "AA" to "CCC" may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

Standard & Poor's defines the issued ratings as follows:

"An insurer rated 'AA' has very strong financial security characteristics, differing only slightly from those rated higher."

"An obligor rated 'AA' has very strong capacity to meet its financial commitments. It differs from the highest-rated obligors only to a small degree."

"An obligation rated 'AA' differs from the highest-rated obligations only to a small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong."

"An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong."

"A short-term obligation rated 'A-1' is rated in the highest category by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong."

⁽³⁾ Moody's uses nine rating symbols ("Aaa", "Aa", "A", "Baa", "Ba", "B", "Caa", "Ca" and "C"). The symbols range from "Aaa", used to designate least credit risk, to "C", denoting greatest credit risk. In addition Moody's appends numerical modifiers 1, 2 and 3 to each generic rating classification from "Aa" through "Caa". The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Moody's defines the issued ratings as follows:

"Insurance companies rated Aa offer excellent financial security. Together with the Aaa group, they constitute what are generally known as high-grade companies. They are rated lower than Aaa companies because long-term risks appear somewhat larger."

"Obligations rated Aa are judged to be of high quality and are subject to very low credit risk."

"Obligations rated A are considered upper-medium grade and are subject to low credit risk."

"Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations."

⁽⁴⁾ The rating scale of A.M. Best Financial Strength Rating ranges from "A++", "A+", "A", "A-" to "C-". In addition the scale provides for the ratings "D" (Poor), "E" (Under Regulatory Supervision), "F" (In Liquidation) and "S" (Suspended).

A.M. Best defines the issued ratings as follows:

A+: "Assigned to companies that have, in our opinion, a superior ability to meet their ongoing insurance obligations."

aa: "Assigned to issues where, in our opinion, the issuer has a very strong ability to meet the terms of the obligation."

a: "Assigned to issues where, in our opinion, the issuer has a strong ability to meet the terms of the obligation."

"Ratings from "aa" to "ccc" may be enhanced with "+" (plus) or "-" (minus) to indicate whether credit quality is near the top or bottom of a category."

⁽⁵⁾ Issuer credit rating.

Notes to be issued under the Programme may be rated or unrated. Where an issue of Notes is rated a security rating is not a recommendation to buy, sell or hold securities and may be revised or withdrawn by the rating agency at any time. Any negative change in the credit rating of the Issuer could adversely affect the trading price of the Notes. Investors should consider each rating individually and obtain additional and more detailed understanding of the significance of the respective credit rating information provided by the respective rating agency.

Business Operations

Allianz Group structure

Allianz Group offers property-casualty insurance, life/health insurance, and asset management products and services in over 70 countries, with the largest of our operations located in Europe. The Allianz Group insures 88.0 million customers. Allianz SE, as the parent company of the Allianz Group, has its headquarters in Munich, Germany.

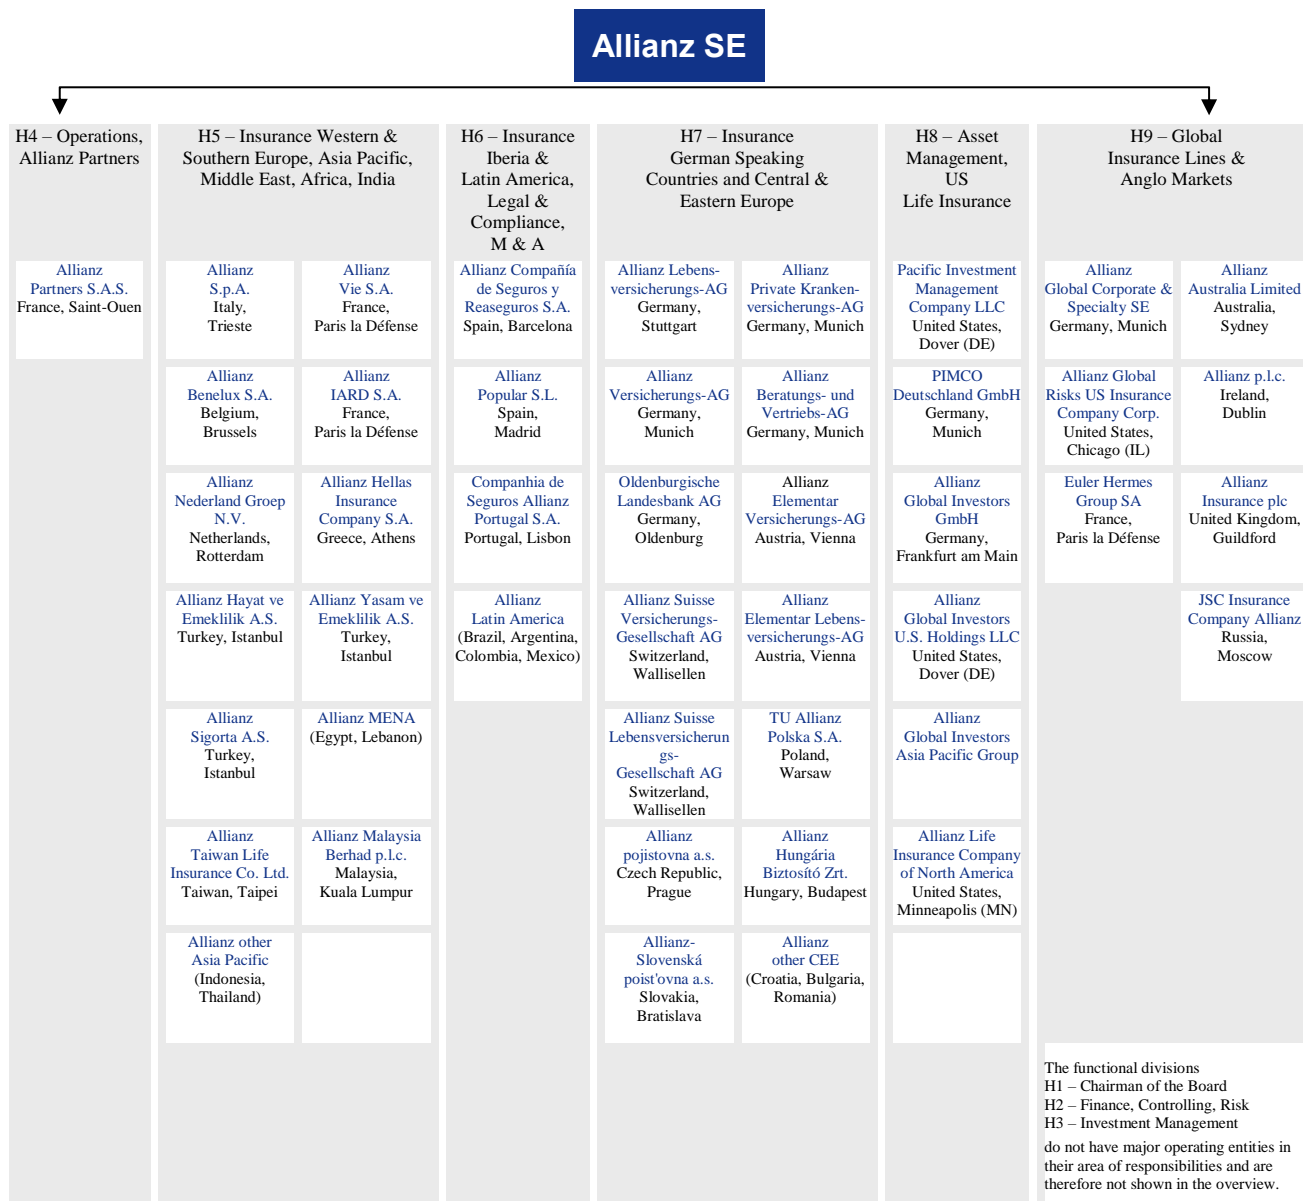

The Allianz Group structure reflects both business segments and geographical regions. Business activities are organized by product and type of service, based on how these are strategically managed: insurance activities, asset management activities, and corporate and other activities. Due to differences in the nature of products, risks, and capital allocation, insurance activities are further divided into property-casualty and life/health categories. In accordance with the responsibilities of the Board of Management, each of the insurance categories is grouped into regional reportable segments. Corporate and other activities are divided into three different reportable segments in order to differentiate between the respective products, risks, and capital allocation. In 2017, the Allianz Group had 14 reportable segments.

This overview is simplified. It focuses on major operating entities and does not contain all entities of the Allianz Group. Also, it does not show whether a shareholding is direct or indirect. This overview shows the status as of 31 December 2017.

Insurance Operations

Allianz Group offers a wide range of property-casualty and life/health insurance products to both retail and corporate customers. For the Property-Casualty business segment, these include motor, accident, property, general liability, travel insurance and assistance services; the Life/Health business segment offers savings and investment-oriented products in addition to life and health insurance. Allianz Group is the leading property-casualty insurer worldwide and rank among the top five in the life/health insurance business¹. Allianz Group's key markets (in terms of premiums) for both property-casualty and life/health are Germany, France, Italy, and the United States.

Most of our insurance markets are served by local Allianz companies. However, some business lines – such as Allianz Global Corporate & Specialty (AGCS), Allianz Partners (AP) (formerly Allianz Worldwide Partners (AWP)) and Credit Insurance – are run globally.

Asset Management

Allianz Group's two major investment management businesses, PIMCO and AllianzGI, operate under Allianz Asset Management (AAM). Allianz Group is one of the largest asset managers in the world that actively manage assets. Offerings cover a wide range of equity, fixed income, and alternative investment products and solutions. Core markets include the United States, Germany, France, Italy, the United Kingdom, and the Asia-Pacific region.

- **Alternative Investments**

The share buy-back program is based on the authorization granted by the Annual General Meeting on 7 May 2014. The buy-back program, which started in January 2018, is envisaged to be executed in the first six months of 2018. Allianz SE will cancel all repurchased shares. Outlook for 2018¹

Economic outlook

Although political uncertainties linger, the global economic outlook for 2018 is favorable. The U.S. economy is expected to grow by 2.6%. The recently adopted tax reform package should contribute to higher growth. The net tax reductions will underpin companies' propensity to invest and support solid consumption growth. In the Eurozone, growth is likely to exceed 2% again in 2018. In particular, apart from the favorable global backdrop, the fact that the loose European Central Bank monetary policy continues to provide support, coupled with broadly neutral fiscal policy, points to an ongoing recovery. As in 2017, the emerging market economies are expected to grow by close to 5%. Asian emerging markets continue to benefit from the revival of world trade and stable growth in China. The Eastern European countries capitalize on the continuing upturn in the Eurozone.

¹ The information presented in the section "Economic outlook", "Insurance industry outlook" and "Asset management industry outlook" is based on Allianz Group's own estimates.

We are currently faced with a rather high degree of synchronization, and for the world economy it is the strongest expansion period since 2011.

Global output is expected to increase by 3.2% in 2018. The uncertain global political environment bears the potential for higher financial market volatility. Monetary policy also contributes to this. As the U.S. economy is expected to expand solidly and inflation rates continue to move up, the Federal Reserve will carry on normalizing its monetary policy stance. Three further rate hikes in the course of 2018 look realistic. In addition, the Federal Reserve will rein in its balance sheet moderately. In the Eurozone, the European Central Bank is expected to terminate its monthly bond purchasing program in October, having halved the monthly volume to € 30 bn as of January 2018. No key interest rate hikes are expected before 2019. Modestly rising yields on 10-year U.S. government bonds, the good economic situation in the Eurozone, and gradually rising inflation rates are likely to influence investors' interest rate expectations and exert upward pressure on European benchmark bond yields.

Insurance industry outlook

The insurance industry can look towards 2018 with some optimism, mainly for three reasons: Firstly, premium growth is set to increase as the stronger economic momentum bolsters demand for insurance. Secondly, the expected gradual rise in interest rates and yields can be seen as the harbinger of the end of the long and cold "yield winter", although it will still take some time until higher yields are reflected in higher investment incomes. Finally, after the increase in financial regulation in recent years, the insurance industry might enjoy a sort of respite in 2018, a breathing space for better coping with the new rules.

However, even if the macroeconomic and regulatory environment looks more favorable in 2018, it is by no means plain sailing for the insurance industry. New technologies, from digitalization to Artificial Intelligence, continue to change the industry profoundly: Business models need to be transformed, new skills to be learned, new partnerships to be built and new competition to be fended off. Furthermore, the ongoing digitalization of our lives will usher in a new era of regulation, governing the use of data – the oil of the 21st century. On the other hand, the upsides of the new technologies, in particular in terms of simplicity and accessibility, should become more visible in 2018, too.

In the ***property-casualty sector***, premium growth is expected to accelerate in 2018, reflecting higher inflation and the ongoing broad based recovery of the global economy. As in previous years, emerging markets are the main driver of growth: All regions, from Latin America over Africa to Asia, should continue their recovery; in Emerging Asia, premium growth could top 10%. In contrast, growth in advanced markets will be much slower, at around 3%. Overall, Allianz Group expects global premium growth of about 5% in 2018 (in nominal terms and adjusted for foreign currency translation effects). Assuming average losses from natural catastrophes and more positive rate dynamics – particularly in business lines affected by last year's losses – overall profitability is likely to increase, although investment income might remain a drag.

In the ***life sector***, the overall picture is quite similar – with one exception: The growth lead of Emerging Asia over the rest of the world is even more pronounced. While the advanced markets' recovery proceeds at a snail's pace and other emerging markets show robust but more or less stable growth, many of Asia's emerging markets are expected to clock growth rates of 15% or more. A rising middle class, urbanization, aging societies, and last but not least a favorable policy environment underpin the continued growth story. Overall, Allianz Group expects global premium growth to increase by about 6% in 2018 (in nominal terms and adjusted for foreign currency translation effects) compared to 2017. Global industry profitability could also improve in 2018, albeit only modestly. This change for the better has not so much to do with the slight rise in interest rates; it is mainly a result of recent management actions which steered insurance portfolios towards less capital intensive business lines (such as protection) and investment portfolios towards riskier but higher-yielding asset classes (such as infrastructure).

Asset management industry outlook

For the asset management industry, 2018 might bring higher financial market volatility due to the geopolitical uncertainty. While the positive economic outlook generally supports stock markets, Allianz Group believes that current valuation levels are very high already. In addition, central banks are increasingly likely to move further away from accommodative monetary policies. Allianz Group therefore expects a more modest capital market contribution to Assets under Management growth. This may weigh down on net inflows in certain asset classes, while it might create opportunities in other areas. Investors may look to further de-risk into bonds as yields become more attractive. Furthermore, bonds continue to be particularly interesting for the growing number of retirees in developed countries as well as for liability-driven investors looking for a stable stream of income.

The industry's profitability remains under pressure from both continuous flows into passive products and rising distribution costs, so the trend towards industry consolidation will continue. At the same time, digital channels are expected to continue gaining prominence. Measures aimed at strengthening regulatory oversight and reporting could also affect profitability in the asset management sector. In order to continue growing, it is vital for asset managers to keep sufficient business volumes, ensure efficient operations, and maintain strong investment performance.

Outlook for the Allianz Group

The outlook provided for Allianz Group assumes a continued global economic growth with a modest rise in interest rates, no major disruptions of capital markets as well as no disruptive fiscal or regulatory interference and a level of claims from natural catastrophes at expected average levels.

In 2017, our total revenues amounted to € 126.1 bn, a 3.0% increase on a nominal basis compared to 2016. For 2018, Allianz Group envisages relatively stable total revenues, with Property-Casualty and Asset Management revenues showing an upward trend, while Life/Health revenues remaining rather stable due to Allianz Group's selective focus on profitable growth.

Property-Casualty insurance

Allianz Group expects its revenues to increase by approximately 2% in 2018 (2017: 1.4%), supported by favorable volume and price effects.

Premium growth in 2018 is expected mainly from our Global Lines such as Allianz Partners, where Allianz Group's B2B2C business activities are bundled. Further growth is expected in its core European markets such as Germany, Spain and Italy, as well as in Turkey.

Allianz Group believes the overall slow rise in prices it witnessed in a number of markets in 2017 will continue in 2018. However, as in previous years Allianz Group will keep its focus on achieving strong underwriting results by adhering to its strict underwriting discipline, and will be willing to accept a lower top line if target margins cannot be achieved.

As the low-interest-rate environment is likely to persist, investment income will remain under pressure due to the rather short duration of investments in the Property-Casualty business segment. Going forward, Allianz Group will continue to take measures to adapt our investment strategy to changing market conditions.

Life/Health insurance

Allianz Group will remain focused on shifting our new business mix towards capital-efficient, unit-linked, and protection products – which, in view of the prolonged low-yield environment, also match customer needs – while maintaining strong shareholder returns and building on our strong track record of product innovation. In addition, Allianz Group will continue to actively manage both its new and in-force business through continuous repricing, expense management, asset/liability management, and crediting strategies, which should allow Allianz Group to further mitigate the impacts of difficult market conditions – particularly the low interest rates. It must be noted, however, that market volatility, along with the level of net harvesting, can significantly affect the Life/Health business segment results.

Asset Management

While Allianz Group expects continued strong inflows in 2018 at both PIMCO and AllianzGI, a moderation of the exceptionally high inflows of 2017 is likely to occur. Another growth opportunity should result from the integration of Allianz Capital Partners into AllianzGI on 1 January 2018, with the opportunity to leverage this platform for external growth in the future. While Allianz Group expects performance fees to decrease slightly, growth in AuM should drive an increase in management and loading fees, and thus a slight increase in operating revenues, which should more than offset the moderate increase of operating expenses we envisage. Pressure on profit growth is likely to come from a weaker U.S. Dollar compared to 2017.

Legal Proceedings

Allianz Group companies are involved in legal, regulatory, and arbitration proceedings in Germany and a number of foreign jurisdictions, including the United States. Such proceedings arise in the ordinary course of businesses, including, amongst others, their activities as insurance, banking and asset management companies, employers, investors and taxpayers. It is not feasible to predict or determine the ultimate outcome of the pending or threatened proceedings. Allianz SE does not believe that the outcome of these proceedings, including those discussed below, will have a material adverse effect on the financial position and the results of operations of the

Allianz Group, after consideration of any applicable provision. Apart from the proceedings discussed below, Allianz SE is not aware of any threatened or pending legal, regulatory or arbitration proceedings nor were there any such proceedings, during a period covering the twelve months preceding the date of this prospectus, which may have, or have had in the recent past, significant effects on its and/or Allianz Group's financial position or profitability.

Material governmental, legal, regulatory or arbitration proceedings in which Allianz Group companies have been involved during the past twelve months are in particular the following:

On 24 May 2002, pursuant to a statutory squeeze-out procedure, the general meeting of Dresdner Bank AG resolved to transfer shares from its minority shareholders to Allianz as principal shareholder in return for payment of a cash settlement amounting to € 51.50 per share. Allianz established the amount of the cash settlement on the basis of an expert opinion, and its adequacy was confirmed by a court appointed auditor. Some of the former minority shareholders applied for a court review of the appropriate amount of the cash settlement in a mediation procedure ("**Spruchverfahren**"). In September 2013, the district court ("**Landgericht**") of Frankfurt dismissed the minority shareholders' claims in their entirety. This decision has been appealed to the higher regional court ("**Oberlandesgericht**") of Frankfurt. In the event that a final decision were to determine a higher amount as an appropriate cash settlement, this would affect all of the approximately 16 mn shares that were transferred to Allianz.

In September 2015 and in January 2017, two separate putative class action complaints were filed against Allianz Life Insurance Company of North America ("**Allianz Life**") making allegations similar to those made in prior class actions regarding the sale of Allianz Life's annuity products, including allegations of breach of contract and violation of California unfair competition law. The ultimate outcome of the cases cannot yet be determined.

However, to a large extent Allianz SE is treated as a German stock corporation and therefore governed by the general provisions of German corporate law (in particular the German Stock Corporation Act (*Aktiengesetz*)). The corporate bodies of Allianz SE are the Board of Management (*Vorstand*), the Supervisory Board (*Aufsichtsrat*) and the General Meeting (*Hauptversammlung*). The Governance Code summarizes the fundamental guidelines for best-practice corporate governance in Germany and in addition to restating various corporate governance-related mandatory provisions of German law, the Governance Code contains "recommendations", which reflect widely recognized standards of corporate governance. Although the Governance Code does not have the force of law, it has a legal basis through the declaration of conformity required by § 161 of the German Stock Corporation Act, which requires that the Board of Management and the Supervisory Board annually issue a declaration of conformity with the Governance Code.

On 14 December 2017, the Board of Management and the Supervisory Board of Allianz SE issued the following declaration of conformity:

Alternative Performance Measures

The Allianz Group uses, throughout its financial publications, alternative performance measures (APMs) in addition to the figures which are prepared in accordance with the International Financial Reporting Standards (IFRS). We believe that these measures provide useful information to investors and enhance the understanding of our results. These financial measures are designed to measure performance, growth, profit generation and capital efficiency.

The APMs should be viewed as complementary to, rather than a substitute for, the figures determined according to IFRS.

This Prospectus contains references to the following major alternative performance measures:

- Total revenues
- Operating profit
- Return on equity
- Combined ratio
- Cost-income ratio

Investors should consider that similarly titled APMs reported by other companies may be calculated differently. For that reason, the comparability of APMs across companies might be limited.

In accordance with the guidelines of the European Securities and Markets Authority (ESMA), the following information is given in regards to the above mentioned alternative performance measures:

- Definition of the APM, its use and limitations on the usefulness.
- Reconciliation of the APM to the most directly reconcilable line item, subtotal or total presented in the financial statements.

Definitions, use and limitations

Total Revenues

Definition and Usefulness

Total revenues are "top line" figure from which costs and expenses are subtracted to determine operating profit and net income. According to our business segments, total revenues in the Allianz Group comprise gross

premiums written in Property-Casualty, statutory premiums in Life/Health, operating revenues in Asset Management and total revenues in Corporate and Other (Banking).

Total revenues Allianz Group = Gross premiums written Property-Casualty

- + Statutory premiums Life/Health
- + Operating revenues Asset Management
- + Total revenues Corporate and Other (Banking)

We consider total revenues as a key performance indicator and believe that it is useful and meaningful to our external audience because it is an important financial measure for the performance and growth of the Allianz Group during a specific time period.

Limitations on the Usefulness

Total revenues do not provide any information as to the profitability of the Allianz Group. Therefore, total revenues should always be viewed in conjunction with other performance indicators such as operating profit or net income.

Furthermore, total revenues are subject to fluctuations which do not derive from the performance of Allianz Group. These fluctuations result from effects of price changes, foreign currency translation as well as acquisitions, disposals and transfers. Accordingly, in addition to presenting nominal total revenue growth, we also present internal growth, which excludes some of these effects.

Operating Profit (OP)

Definition and Usefulness

The Allianz Group uses operating profit to evaluate the performance of its reportable segments as well as of the Allianz Group as a whole. Operating profit highlights the portion of income before income taxes that is attributable to the ongoing core operations of the Allianz Group.

The Allianz Group considers the presentation of operating profit to be useful and meaningful to investors because it enhances the understanding of the Allianz Group's underlying operating performance and the comparability of its operating performance over time.

Operating profit is used as one of the decision metrics by Allianz Group's management.

Starting from 1 January 2017, the Allianz Group has changed the definition of operating profit. Restructuring charges are now excluded from operating profit. We believe that the updated definition of operating profit provides more reliable and relevant information to our external audience as the timing of restructuring charges is largely at the discretion of the Allianz Group, and accordingly their exclusion provides additional insight into the operating trends of the underlying business.

To better understand the ongoing operations of the business, the Allianz Group generally excludes the following non-operating effects:

- income from financial assets and liabilities carried at fair value through income (net),
- realized gains and losses (net) and impairments of investments (net), certain one-off effects from pension revaluation, interest expenses from external debt,
- acquisition-related expenses (from business combinations),
- amortization of intangible assets,
- restructuring charges,
- profit (loss) of substantial subsidiaries classified as held for sale.

The following exceptions apply to this general rule:

- In all reportable segments, income from financial assets and liabilities carried at fair value through income (net) is treated as operating profit if the income relates to operating business.
- For life/health insurance business and property-casualty insurance products with premium refunds, all items listed above are included in operating profit if the profit sources are shared with policyholders. There is one

exception from this general rule with regard to policyholder participation in tax benefits. As IFRS require that the consolidated income statements present all tax benefits in the income taxes line item, even when they belong to policyholders, the corresponding expenses for premium refunds are shown as non-operating profit as well.

Operating profit should be viewed as complementary to, and not as a substitute for, income before income taxes or net income as determined in accordance with IFRS.

Limitations on the Usefulness

Operating profit is subject to fluctuations which do not derive from the performance of the Allianz Group such as changes in foreign currency rates or acquisitions, disposals and transfers between reportable segments.

Return on Equity (RoE)

Definition and Usefulness

For Allianz Group, return on equity represents net income attributable to shareholders divided by the average shareholders' equity excluding unrealized gains/losses on bonds net of shadow accounting at the beginning of the period and at the end of the period.

$$\text{RoE}_{\text{AZ Group}} = \frac{\text{Net income attributable to shareholders}}{(\text{Shareholders' equity}^{1,2} \text{ begin of period} + \text{Shareholders' equity}^{1,2} \text{ end of period})/2}$$

¹ Shareholders' equity excluding non-controlling interests.

² Shareholders' equity excluding unrealized gains/losses on bonds net of shadow accounting.

The Allianz Group also uses RoE as a performance measure for the Life/Health segment. For the Life/Health segment, RoE represents net income divided by the average total equity excluding unrealized gains/losses on bonds net of shadow accounting at the beginning of the period and at the end of the period.

$$\text{RoE}_{\text{AZ Group}} = \frac{\text{Total net income}}{(\text{Total equity}^1 \text{ begin of period} + \text{Total equity}^1 \text{ end of period})/2}$$

¹ Total equity excluding unrealized gains/losses on bonds net of shadow accounting.

The Allianz Group uses RoE as a key performance indicator. It combines the view on business profitability and capital efficiency. Therefore, management uses RoE in the steering of our business.

Limitations on the Usefulness

The RoE of the Allianz Group or the Life/Health segment include items which are not indicative of the performance of management. Furthermore, RoE is not available at Line of Business or product level.

The performance indicator RoE is inherently limited by the fact that it represents a ratio and thus does not provide any information as to the absolute amount of net income or shareholders' equity/total equity excluding unrealized gains/losses on bonds net of shadow accounting.

Combined Ratio (CR)

Definition and Usefulness

The Allianz Group uses the combined ratio as a measure of underwriting profitability in the Property-Casualty segment. The combined ratio represents the total of acquisition and administrative expenses (net) and claims and insurance benefits incurred (net) divided by premiums earned (net).

$$\text{CR}_{\text{PC Segment}} = \frac{\text{Acq. and admin. expenses (net)}^1, \text{ excluding one-off effects from pension revaluation} + \text{Claims and ins. benefits inc. (net)}^1}{\text{Premiums earned (net)}^1}$$

¹ In insurance terminology the term "net" means after reinsurance ceded.

The combined ratio is typically expressed as a percentage. A ratio of below 100% indicates that the underwriting result is profitable, whereas a ratio of above 100% indicates an underwriting loss.

The combined ratio can be further broken down into the loss ratio and the expense ratio. The loss ratio represents claims and insurance benefits incurred (net) divided by premiums earned (net), and thus expresses the percentage of net earned premiums used to settle claims.

$$\text{Loss ratio}_{\text{PC Segment}} = \frac{\text{Claims and ins. benefits inc. (net)}}{\text{Premiums earned (net)}}$$

The expense ratio represents acquisition and administrative expenses (net) divided by premiums earned (net). It expresses the percentage of net earned premiums used to cover underwriting expenses for the acquisition of new or renewal business and for administrative expenses.

$$\text{Expense ratio}_{\text{PC Segment}} = \frac{\text{Acq. and admin. expenses (net)}}{\text{Premiums earned (net)}}$$

Limitations on the Usefulness

The combined ratio is used to measure underwriting profitability, but it does not capture the profitability of the investment result or the non-operating result. Even in case of a combined ratio of above 100 %, the operating profit and/or the net income can still be positive due to a positive investment income and/or a positive non-operating result.

Moreover, the usefulness of the combined ratio is inherently limited by the fact that it is a ratio and thus it does not provide information on the absolute amount of the underwriting result.

Cost-Income Ratio (CIR)

Definition and Usefulness

The Allianz Group uses the cost-income ratio as a key performance indicator in the Asset Management segment. The CIR sets operating expenses in relation to operating revenues in a given period.

$$\text{CIR}_{\text{AM Segment}} = \frac{\text{Operating expenses}^1}{\text{Operating revenues}^2}$$

¹ Operating expenses consist of administrative expenses (net), excluding acquisition-related expenses.

² Operating revenues are the sum of net fee and commission income, net interest income, income from financial assets and liabilities carried at fair value through income (net) and other income. The term "net" means that the relevant expenses have already been deducted.

The Allianz Group uses CIR in order to measure the efficiency of its activities in the Asset Management segment. Changes in the ratio indicate a change in efficiency.

Limitations on the Usefulness

The CIR in a given period of time can be influenced by special items, one-offs or foreign exchange effects on the revenue and/or expense side which lead to a change in CIR without a long-term change of efficiency.

Moreover, the usefulness of the cost-income ratio is inherently limited by the fact that it is a ratio and thus it does not provide information on the absolute amount of the operating revenues and expenses.

TAXATION

The following comments are of a general nature. They are based on the relevant laws and regulations currently in force, save for the proposed financial transaction tax, and as applied on the date of this Base Prospectus, which are subject to change at any time, possibly with retroactive effect. These comments do not purport to be a comprehensive description of all tax considerations, which may be relevant to a decision to purchase the Notes and cannot replace legal or tax advice. No representation with respect to the consequences to any particular prospective Noteholder is made hereby. Prospective Noteholders should consult their own tax advisers in each country in which they are resident and in all relevant jurisdictions as to the particular tax consequences to them of subscribing, purchasing, holding and disposing of the Notes, including the application and effect of state, local, foreign and other tax laws and the possible effects of changes in the applicable tax laws.

Federal Republic of Germany

German tax residents holding Notes as private assets

Taxation of income from the Notes

If the Notes are held as private assets (*Privatvermögen*) by an individual investor whose residence or habitual abode is in Germany, payments of interest under the Notes are taxed as investment income (*Einkünfte aus Kapitalvermögen*) generally at a 25% flat tax (*Abgeltungsteuer*) (plus a 5.5% solidarity surcharge thereon and, if applicable to the individual investor, church tax (*Kirchensteuer*)).

Please note that the coalition agreement between the German Christian Democratic and Christian Socialist Union, as well as with the German Social Democratic Party for the formation of a new German federal government provides that the flat tax regime shall be partially abolished for certain capital investment income. The coalition agreement further provides that the solidarity surcharge shall be abolished in stages provided that the individual income does not exceed certain thresholds. There is however no draft bill available yet and a lot of details are hence still unclear. That means however that income received by individual investors from the Notes may be taxed at individual progressive income tax rates of up to 45 per cent. in the future (plus a 5.5 per cent. solidarity surcharge thereon, unless abolished or reduced in the future, and church tax, if applicable to the individual investor).

The same applies to capital gains from the sale or redemption of the Notes. The capital gain is generally determined as the difference between the proceeds from the sale or redemption of the Notes and the acquisition costs. Expenses directly and factually related (*unmittelbar sachlicher Zusammenhang*) to the sale or redemption are taken into account in computing the taxable gain. Otherwise the deduction of related expenses for tax purposes is not permitted.

Where the Notes are acquired and/or sold in a currency other than Euro, the acquisition costs will be converted into Euro at the time of acquisition, the sales proceeds will be converted in Euro at the time of sale, and only the difference will then be computed in Euro.

The flat tax is generally collected by way of withholding (see succeeding paragraph – Withholding tax) and the tax withheld shall generally satisfy the individual investor's tax liability with respect to the Notes. If, however, no or not sufficient tax was withheld (e.g., in case there is no Domestic Paying Agent as defined in the subsequent paragraph – Withholding Tax), the investor will have to include the income received from its investment in the Notes in its income tax return and the flat tax will then be collected by way of tax assessment. The investor may also opt for inclusion of investment income in its income tax return if the aggregated amount of tax withheld on investment income during the year exceeded the investor's aggregated flat tax liability on investment income (e.g., because of an available loss carry forward or a foreign tax credit). If the investor's total income tax liability on all taxable income including the investment income determined by generally applicable individual progressive tax rates is lower than 25% the investor may opt to be taxed at individual progressive tax rates with respect to its investment income.

Capital losses from the Notes held as private assets are generally tax-recognised irrespective of the holding period of the Notes. The losses may, however, not be used to offset other income like employment or business income but may only be offset against investment income subject to certain limitations. Losses not utilised in one year may be carried forward into subsequent years but may not be carried back into preceding years. According to the view of German tax authorities losses suffered upon a bad debt loss (*Forderungsausfall*) and a

waiver of a receivable (*Forderungsverzicht*) (to the extent the waiver does not qualify as a hidden contribution) shall, in general, not be deductible for tax purposes. With respect to a bad debt loss the German federal fiscal court has recently rejected the view of the German tax authorities. With respect to a (voluntary) waiver of receivable a German lower fiscal court has recently confirmed the view of the German tax authorities in a final decision. Furthermore, capital losses might not be recognised by the German tax authorities if the Notes are sold at a market price, which is lower than the transaction costs or if the level of transaction costs is restricted because of a mutual agreement that the transaction costs are calculated by subtracting a certain amount from the sales price or if no (or only *de minimis*) payments are made to the individual investors on the maturity or redemption date of the Notes. This view has however been challenged in 2014 by a final judgement of a German lower fiscal court.

Individual investors are entitled to a saver's lump sum tax allowance (*Sparer-Pauschbetrag*) for investment income of 801 Euro per year (1,602 Euro for jointly assessed investors). The saver's lump sum tax allowance is considered for purposes of the withholding tax (see subsequent paragraph – Withholding tax) if the investor has filed a withholding tax exemption request (*Freistellungsauftrag*) with the respective Domestic Paying Agent (as defined below). The deduction of related expenses for tax purposes is not possible.

Withholding tax

If the Notes are kept or administered in a domestic securities deposit account by a German credit or financial services institution (*Kredit- oder Finanzdienstleistungsinstitut*) (or by a German branch of a foreign credit or financial services institution), or by a German securities trading firm (*Wertpapierhandelsunternehmen*) or by a German securities trading bank (*Wertpapierhandelsbank*) (each a "**Domestic Paying Agent**") which pays or credits the interest, a 25% withholding tax, plus a 5.5% solidarity surcharge thereon, resulting in a total withholding tax charge of 26.375%, is levied on the interest payments.

Capital gains are also subject to the 25% withholding tax, plus a 5.5% solidarity surcharge thereon, if the Notes are kept or administered by a Domestic Paying Agent effecting the sale or redemption since their acquisition. If the Notes were sold or redeemed after being transferred to a securities deposit account with a Domestic Paying Agent, 25% withholding tax (plus solidarity surcharge thereon) would be levied on 30% of the proceeds from the sale or the redemption, as the case may be, unless the investor or the previous depository bank was able and allowed to prove evidence of the investor's actual acquisition costs to the Domestic Paying Agent.

The applicable withholding tax rate applied to interest payments or capital gains is in excess of the aforementioned rates if church tax applies and is collected for the individual investor by way of withholding which is provided for as a standard procedure unless the Noteholder has filed a blocking notice (*Sperrvermerk*) with the German Federal Central Tax Office (*Bundeszentralamt für Steuern*).

German resident investors holding the Notes as business assets

Taxation of income from the Notes

If the Notes are held as business assets (*Betriebsvermögen*) by an individual or corporate investor who is tax resident in Germany (i.e., a corporation with its statutory seat or place of management in Germany), interest income and capital gains from the Notes are subject to personal income tax (at individual progressive rates) or corporate income tax at a rate of 15% (plus a 5.5% solidarity surcharge thereon and church tax, if applicable) and, in general, trade tax. The effective trade tax rate depends on the applicable trade tax factor (*Gewerbsteuer-Hebesatz*) of the relevant municipality where the business is located. In case of individual investors the trade tax may, however, be partially or fully creditable against the investor's personal income tax liability depending on the applicable trade tax factor and the investor's particular circumstances. Generally, losses from the disposal or redemption of the Notes will be tax-recognised and may be offset by income subject to certain limitations.

Withholding tax

If the Notes are kept or administered by a Domestic Paying Agent which pays or credits the interest, a 25% withholding tax, plus a 5.5% solidarity surcharge thereon, resulting in a total withholding tax charge of 26.375%, is levied on the interest payments. The applicable withholding tax rate is in excess of the aforementioned rate if church tax applies and is collected for the individual investor by way of withholding which is provided for as a standard procedure unless the Noteholder has filed a blocking notice with the German Federal Central Tax Office.

No withholding is generally required on capital gains from the disposal or redemption of the Notes which is derived by German resident corporate investors and, upon application, by individual investors holding the Notes as business assets, subject to certain requirements. Any losses incurred from the disposal or redemption of the

Notes will not be taken into account for withholding tax purposes. The withholding tax does not satisfy the investor's personal or corporate income tax liability with respect to the Notes. The income from the Notes will have to be included in the investor's personal or corporate income tax return. Any German withholding tax (including surcharges) is generally fully creditable against the investor's personal or corporate income tax liability or refundable, as the case may be.

Non-German resident investors

Income derived from the Notes by Noteholders who are not tax resident in Germany is in general exempt from German income taxation, and no withholding tax shall be withheld, unless (i) the Notes are held as business assets of a German permanent establishment of the investor or by a permanent German representative of the investor or (ii) the income derived from the Notes does otherwise constitute German source income (such as income from the letting and leasing of certain property located in Germany). If the income derived from the Notes is subject to German taxation according to (i) or (ii) above, the income is subject to withholding tax similar to that described above under the paragraphs Withholding tax. Under certain circumstances, foreign investors may benefit from tax reductions or tax exemptions under applicable double tax treaties (*Doppelbesteuerungsabkommen*) entered into with Germany.

Inheritance tax / gift tax

The transfer of Notes to another person by way of gift or inheritance is subject to German gift or inheritance tax, respectively, if *inter alia*

- (i) the testator, the donor, the heir, the donee or any other acquirer had his residence, habitual abode or, in case of a corporation, association (*Personenvereinigung*) or estate (*Vermögensmasse*), had its seat or place of management in Germany at the time of the transfer of property,
- (ii) except as provided under (i), the testator's or donor's Notes belong to a business asset attributable to a permanent establishment or a permanent representative in Germany.

Special regulations apply to certain German expatriates.

Prospective investors are urged to consult with their tax advisor to determine the particular inheritance or gift tax consequences in light of their particular circumstances.

Other taxes

The purchase, sale or other disposal of Notes does not give rise to capital transfer tax, value added tax, stamp duties or similar taxes or charges in Germany (despite the European initiative on financial transaction tax). However, under certain circumstances entrepreneurs may opt for value added tax with regard to the sales of Notes which would otherwise be tax exempt. Net wealth tax (*Vermögensteuer*) is, at present, not levied in Germany.

The Netherlands

General

The following summary outlines the principal Dutch tax consequences of the acquisition, holding, settlement, redemption and disposal of the Notes, but does not purport to be a comprehensive description of all Dutch tax considerations that may be relevant. For purposes of Dutch tax law, a holder of Notes may include an individual or entity who does not have the legal title of these Notes, but to whom nevertheless the Notes or the income thereof is attributed based on specific statutory provisions or on the basis of such individual or entity having an interest in the Notes or the income thereof. This summary is intended as general information only and each prospective investor should consult a professional tax adviser with respect to the tax consequences of the acquisition, holding, settlement, redemption and disposal of the Notes.

This summary is based on tax legislation, published case law, treaties, regulations and published policy, in each case as in force as of the date of this Prospectus, and does not take into account any developments or amendments thereof after that date whether or not such developments or amendments have retroactive effect.

Scope

This summary does not address the Dutch corporate and individual income tax consequences for:

- (i) investment institutions (*fiscale beleggingsinstellingen*);
- (ii) pension funds, exempt investment institutions (*vrijgestelde beleggingsinstellingen*) or other Dutch tax resident entities that are not subject to or exempt from Dutch corporate income tax;
- (iii) holders of Notes holding a substantial interest (*aanmerkelijk belang*) or deemed substantial interest (*fictief aanmerkelijk belang*) in the Issuer and holders of Notes of whom a certain related person holds a substantial interest in the Issuer. Generally speaking, a substantial interest in the Issuer arises if a person, alone or, where such person is an individual, together with his or her partner (statutorily defined term), directly or indirectly, holds or is deemed to hold (i) an interest of 5% or more of the total issued capital of the Issuer or 5% or more of the issued capital of a certain class of shares of the Issuer, (ii) rights to acquire, directly or indirectly, such interest or (iii) certain profit-sharing rights in the Issuer;
- (iv) persons to whom the Notes and the income from the Notes are attributed based on the separated private assets (*afgezonderd particulier vermogen*) provisions of the Dutch Income Tax Act 2001 (*Wet inkomstenbelasting 2001*);
- (v) entities which are a resident of Aruba, Curacao or Sint Maarten that have an enterprise which is carried on through a permanent establishment or a permanent representative on Bonaire, Sint Eustatius or Saba and the Notes are attributable to such permanent establishment or permanent representative;
- (vi) individuals to whom Notes or the income there from are attributable to employment activities which are taxed as employment income in the Netherlands; and
- (vii) holders of Notes for whom the benefits from the Notes qualify for the participation exemption within the meaning of article 13 of the Dutch Corporate Income Tax Act 1969 (*Wet op de vennootschapsbelasting 1969*) or would qualify for the participation exemption had the corporate holders of Notes been resident in the Netherlands.

Where this summary refers to the Netherlands, such reference is restricted to the part of the Kingdom of the Netherlands that is situated in Europe and the legislation applicable in that part of the Kingdom.

Withholding tax

All payments made by the Issuer under the Notes may be made free of withholding or deduction for any taxes of whatsoever nature imposed, levied, withheld or assessed by the Netherlands or any political subdivision or taxing authority thereof or therein provided that the Notes do not in fact function as equity of the Issuer within the meaning of article 10, paragraph 1, under d of the Dutch Corporate Income Tax Act 1969 (*Wet op de vennootschapsbelasting 1969*).

Corporate and Individual Income Tax

Residents of the Netherlands

If a holder of Notes is a resident of the Netherlands or deemed to be a resident of the Netherlands for Dutch corporate income tax purposes and is fully subject to Dutch corporate income tax or is only subject to Dutch corporate income tax in respect of an enterprise to which the Notes are attributable, income derived from the Notes and gains realised upon the redemption, settlement or disposal of the Notes are generally taxable in the Netherlands (at up to a maximum rate of 25%).

If an individual is a resident of the Netherlands or deemed to be a resident of the Netherlands for Dutch individual income tax purposes, income derived from the Notes and gains realised upon the redemption, settlement or disposal of the Notes are taxable at the progressive rates (at up to a maximum rate of 51,95%) under the Dutch Income Tax Act 2001, if:

- (i) the individual is an entrepreneur (*ondernemer*) and has an enterprise to which the Notes are attributable or the individual has, other than as a shareholder, a co-entitlement to the net worth of an enterprise (*medegerechtigde*), to which enterprise the Notes are attributable; or
- (ii) such income or gains qualify as income from miscellaneous activities (*resultaat uit overige werkzaamheden*), which includes activities with respect to the Notes that exceed regular, active portfolio management (*normaal, actief vermogensbeheer*).

If neither condition (i) nor condition (ii) above applies, an individual that holds the Notes, must determine taxable income with regard to the Notes on the basis of a deemed return on savings and investments (*sparen en beleggen*), rather than on the basis of income actually received or gains actually realised. This deemed return on savings and investments is fixed at a percentage of the individual's yield basis (*rendementsgrondslag*) at the beginning of the calendar year (1 January), insofar as the individual's yield basis exceeds a statutory threshold (*heffingvrij vermogen*). The individual's yield basis is determined as the fair market value of certain qualifying assets held by the individual less the fair market value of certain qualifying liabilities on 1 January. The fair market value of the Notes will be included as an asset in the individual's yield basis. The deemed return percentage to be applied to the yield basis increases progressively depending on the amount of the yield basis. The deemed return on savings and investments is taxed at a rate of 30%.

Non-residents of the Netherlands

If a person is neither a resident of the Netherlands nor is deemed to be a resident of the Netherlands for Dutch corporate or individual income tax purposes, such person is not liable to Dutch income tax in respect of income derived from the Notes and gains realised upon the settlement, redemption or disposal of the Notes, unless:

- (i) the person is not an individual and such person (1) has an enterprise that is, in whole or in part, carried on through a permanent establishment or a permanent representative in the Netherlands to which permanent establishment or permanent representative the Notes are attributable, or (2) is, other than by way of securities, entitled to a share in the profits of an enterprise or a co-entitlement to the net worth of an enterprise, which is effectively managed in the Netherlands and to which enterprise the Notes are attributable.

This income is subject to Dutch corporate income tax at up to a maximum rate of 25%.

- (ii) the person is an individual and such individual (1) has an enterprise or an interest in an enterprise that is, in whole or in part, carried on through a permanent establishment or a permanent representative in the Netherlands to which permanent establishment or permanent representative the Notes are attributable, or (2) realises income or gains with respect to the Notes that qualify as income from miscellaneous activities in the Netherlands which include activities with respect to the Notes that exceed regular, active portfolio management (*normaal, actief vermogensbeheer*), or (3) is, other than by way of securities, entitled to a share in the profits of an enterprise which is effectively managed in the Netherlands and to which enterprise the Notes are attributable.

Income derived from the Notes as specified under (1) and (2) is subject to individual income tax at progressive rates up to a maximum rate of 51,95%. Income derived from a share in the profits of an enterprise as specified under (3) that is not already included under (1) or (2) will be taxed on the basis of a deemed return on savings and investments (as described above under "*Residents of the Netherlands*").

Gift and Inheritance Tax

Dutch gift or inheritance taxes will not be levied on the occasion of the transfer of a Note by way of gift by, or on the death of, a holder of a Note, unless:

- (i) the holder of a Note is, or is deemed to be, resident in the Netherlands for the purpose of the relevant provisions; or
- (ii) the transfer is construed as an inheritance or gift made by, or on behalf of, a person who, at the time of the gift or death, is or is deemed to be resident in the Netherlands for the purpose of the relevant provisions.

Value Added Tax

In general, no value added tax will arise in respect of payments in consideration for the issue of the Notes or in respect of a cash payment made under the Notes, or in respect of a transfer of Notes.

Other taxes

No registration tax, customs duty, transfer tax, stamp duty or any other similar documentary tax or duty will be payable in the Netherlands by a holder in respect of or in connection with the subscription, issue, placement, allotment, delivery or transfer of the Notes.

Luxembourg

There is no withholding tax on payments of interest (including accrued but unpaid interest) made to a Luxembourg non-resident Noteholder. There is also no Luxembourg withholding tax, upon repayment of the principal or upon redemption or exchange of the Notes.

Residents

According to the law of 23 December 2005, as amended, interest on Notes paid by a Luxembourg paying agent to an individual Noteholder who is a resident of Luxembourg will be subject to a withholding tax of 20%. The withholding tax will be in full discharge of income tax if the beneficial owner is an individual acting in the course of the management of his/her private wealth.

Interest on Notes paid by a Luxembourg paying agent to a resident Noteholder who is not an individual is not subject to withholding tax.

Responsibility for the withholding tax will be assumed by the Luxembourg paying agent.

Further, pursuant to the law of 23 December 2005, as amended, Luxembourg resident individuals who are the beneficial owners of interest payments and other similar income made by a paying agent established outside Luxembourg in a Member State of the European Union or of the European Economic Area, may also opt for a final 20% levy. In such case, the 20% levy is charged on the same amounts as for the payments made by Luxembourg resident paying agents. The option for the 20% levy must cover all interest payments made by the paying agent to the Luxembourg resident beneficial owner during the entire civil year.

When used in the preceding paragraphs "*interest*", "*paying agent*" and "*residual entity*" have to be interpreted pursuant to the Luxembourg law of 23 December 2005, as amended. "Interest" will include accrued (since 1 July 2005) or capitalised interest at the sale, repurchase or redemption of the Notes.

U.S. Foreign Account Tax Compliance Withholding

Pursuant to certain provisions of the U.S. Internal Revenue Code of 1986, commonly known as FATCA, a "foreign financial institution" may be required to withhold on certain payments it makes ("**foreign passthru payments**") to persons that fail to meet certain certification, reporting, or related requirements. A number of jurisdictions (including Germany and the Netherlands) have entered into, or have agreed in substance to, intergovernmental agreements with the United States to implement FATCA ("**IGAs**"), which modify the way in which FATCA applies in their jurisdictions. Certain aspects of the application of the FATCA provisions and IGAs to instruments such as the Notes, including whether withholding would ever be required pursuant to FATCA or an IGA with respect to payments on instruments such as the Notes, are uncertain and may be subject to change. Even if withholding would be required pursuant to FATCA or an IGA with respect to payments on instruments such as the Notes, such withholding would not apply prior to 1 January 2019 (intended date). Noteholders should consult their own tax advisors regarding how these rules may apply to their investment in the Notes. In the event any withholding would be required pursuant to FATCA or an IGA with respect to payments on the Notes, neither the Issuer nor the Guarantor will pay any additional amounts as a result of the withholding.

SUBSCRIPTION AND SALE

Summary of Programme Agreement

Subject to the terms and conditions contained in a Programme Agreement relating to the Programme dated 26 April 2018 (the "**Programme Agreement**") between the Issuers, the Guarantor and the Arranger, the Notes will be offered by the Issuers to the relevant Dealer(s). The Notes may be resold at prevailing market prices, or at prices related thereto, at the time of such resale, as determined by the relevant Dealer. The Notes may also be sold by the Issuers through the Dealers, acting as agents of the Issuers, or directly without any Dealer. The Programme Agreement also provides for Notes to be issued in syndicated Tranches that are jointly and severally underwritten by two or more Dealers.

The relevant Issuer will pay each relevant Dealer a commission as agreed between them in respect of Notes subscribed by it. Each of the Issuers has agreed to reimburse the Arranger for certain of its expenses incurred in connection with the establishment of the Programme and for certain of its activities in connection with the Programme. The commissions in respect of an issue of Notes on a syndicated basis will be stated in the relevant Final Terms if required.

Each of the Issuers has agreed to indemnify the Dealers against certain liabilities in connection with the offer and sale of the Notes. The Programme Agreement entitles the Dealers to terminate any agreement that they make to subscribe Notes in certain circumstances prior to payment for such Notes being made to the relevant Issuer.

Selling Restrictions

General

These selling restrictions may be modified by the agreement of the relevant Issuer and the Dealers following a change in a relevant law, regulation or directive. Any such modification will be set out in the Final Terms issued in respect of the issue of Notes to which it relates or in a supplement to this Base Prospectus.

No action has been taken in any jurisdiction that would permit a public offering of any of the Notes, or possession or distribution of the Base Prospectus or any other offering material or any Final Terms, in any country or jurisdiction where action for that purpose is required.

Each Dealer appointed will be required to represent and agree that it will, to the best of its knowledge, comply with all relevant laws, regulations and directives in each jurisdiction in which it purchases, offers, sells or delivers Notes or has in its possession or distributes the Base Prospectus, any other offering material or any Final Terms in all cases at its own expense, and neither any Issuer, the Guarantor, nor any other Dealer shall have responsibility therefore.

United States

The Notes and the Guarantee have not been and will not be registered under the Securities Act, as amended and may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons except in certain transactions exempt from the registration requirements of the Securities Act. Terms used in this paragraph have the meanings given to them by Regulation S under the Securities Act.

The Notes are subject to U.S. tax law requirements and may not be offered, sold or delivered within the United States or its possessions or to a United States person, except in certain transactions permitted by U.S. tax regulations. Terms used in this paragraph have the meanings given to them by the Code and regulations thereunder.

Each Dealer appointed will be required to agree that, except as permitted by the Programme Agreement, it has not offered, sold or delivered and will not offer, sell or deliver the Notes and the Guarantee of any identifiable Tranche (i) as part of their distribution at any time or (ii) otherwise until 40 days after completion of the distribution of such Tranche or in the case of Notes issued on a syndicated basis, the Lead Manager, within the United States or to, or for the account or benefit of, U.S. persons, and it will have sent to each dealer to which it sells Notes and the Guarantee during the distribution compliance period a confirmation or other notice setting forth the restrictions on offers and sales of the Notes and the Guarantee within the United States or to, or for the account or benefit of, U.S. persons. Terms used in this paragraph have the meanings given to them by Regulation S.

In addition, until 40 days after the commencement of the offering, an offer or sale of Notes and the Guarantee within the United States by any dealer (whether or not participating in the offering) may violate the registration requirements of the Securities Act.

European Economic Area

Unless the relevant Final Terms in respect of any Notes specify "*Prohibition of Sales to European Economic Area Retail Investors*" as "*Not Applicable*", each Dealer appointed under the Programme will be required to represent and agree, that it has not offered, sold or otherwise made available and will not offer, sell or otherwise make available any Notes which are the subject of the offering contemplated by the Prospectus as completed by the Final Terms in relation thereto to any retail investor in the EEA. For the purposes of this provision:

- (a) the expression retail investor means a person who is one (or more) of the following:
 - (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU of the European Parliament and of the Council of 15 May 2014 on markets in financial instruments and amending Directive 2002/92/EC and Directive 2011/61/EU ("**MiFID II**"); or
 - (ii) a customer within the meaning of Directive 2002/92/EC of the European Parliament and of the Council of 9 December 2002 on insurance mediation, where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or
 - (iii) not a qualified investor as defined in the Prospectus Directive); and
- (b) the expression offer includes the communication in any form and by any means of sufficient information on the terms of the offer and the Notes to be offered so as to enable an investor to decide to purchase or subscribe the Notes.

If the relevant Final Terms in respect of any Notes specify "*Prohibition of Sales to European Economic Area Retail Investors*" as "*Not Applicable*", in relation to each Member State of the EEA which has implemented the Prospectus Directive (each, a "**Relevant Member State**"), each Dealer appointed under the Programme will be required to represent and agree, that with effect from and including the date on which the Prospectus Directive is implemented in that Relevant Member State (the "**Relevant Implementation Date**") it has not made and will not make an offer of Notes which are the subject of the offering contemplated by this Prospectus as completed by the final terms in relation thereto to the public in that Relevant Member State except that it may, with effect from and including the Relevant Implementation Date, make an offer of such Notes to the public in that Relevant Member State:

- (a) if the Final Terms in relation to the Notes specify that an offer of those Notes may be made other than pursuant to Article 3(2) of the Prospectus Directive in that Relevant Member State ("**Non-exempt Offer**"), following the date of publication of a prospectus in relation to such Notes which has been approved by the competent authority in that Relevant Member State or, where appropriate, approved in another Relevant Member State and notified to the competent authority in that Relevant Member State, provided that any such prospectus has subsequently been completed by the Final Terms contemplating such Non-exempt Offer, in accordance with the Prospectus Directive, in the period beginning and ending on the dates specified in such prospectus or Final Terms, as applicable and the Issuer has consented in writing to its use for the purpose of that Non-exempt Offer;
- (b) at any time to any legal entity which is a qualified investor as defined in the Prospectus Directive;
- (c) at any time to fewer than 150 natural or legal persons (other than qualified investors as defined in the Prospectus Directive), subject to obtaining the prior consent of the relevant Dealer or Dealers nominated by the Issuer for any such offer; or
- (d) at any time in any other circumstances falling within Article 3(2) of the Prospectus Directive,

provided that no such offer of Notes referred to in (ii) to (iv) above shall require the Issuer or any Dealer to publish a prospectus pursuant to Article 3 of the Prospectus Directive or supplement a prospectus pursuant to Article 16 of the Prospectus Directive.

For the purposes of this provision, the expression "**offer of Notes to the public**" in relation to any Notes in any Relevant Member State means the communication in any form and by any means of sufficient information on the terms of the offer and the Notes to be offered so as to enable an investor to decide to purchase or subscribe the Notes, as the same may be varied in that Member State by any measure implementing the Prospectus Directive in that Member State, the expression "**Prospectus Directive**" means Directive 2003/71/EC as

amended, including by Directive 2010/73/EU and includes any relevant implementing measure in the Relevant Member State.

The aforesaid prohibition does not apply to (i) a transfer and acceptance by natural persons not acting in the course of their business of profession, (ii) the issue of such Notes to the first holders thereof and (iii) the issue and trading of such Notes if they are physically issued outside the Netherlands and are not distributed in the Netherlands in the course of primary trading or immediately thereafter.

If the relevant Final Terms in respect of any Notes specify "*Prohibition of Sales to European Economic Area Retail Investors*" as "*Not Applicable*", each Dealer appointed under the Programme will be required to represent and agree that it will not make an offer of Notes which are outside the scope of the approval of this Base Prospectus, as completed by the Final Terms related thereto, to the public in the Netherlands in reliance on Article 3(2) of the Prospectus Directive (as defined above under "*European Economic Area*") unless (i) such offer is made exclusively to persons or entities which are qualified investors as defined in the Dutch Financial Supervision Act or (ii), in addition to a requirement (if the Notes may constitute "packaged" products) to prepare a key information document under PRIIPs Regulation, standard exemption wording and a logo are disclosed as required by Section 5:20(5) of the Dutch Financial Supervision Act, in each case provided that no such offer of Notes shall require the Issuer or any Dealer to publish a prospectus pursuant to Article 3 of the Prospectus Directive or supplement a prospectus pursuant to Article 16 of the Prospectus Directive.

Republic of Italy

The offering of the Notes has not been registered with the *Commissione Nazionale per le Società e la Borsa* ("**CONSOB**") pursuant to Italian securities legislation and, accordingly, no Notes may be offered, sold or delivered, nor may copies of this Base Prospectus or of any other document relating to any Notes be distributed in Italy, except, in accordance with any Italian securities, tax and other applicable laws and regulations.

Each Dealer appointed under the Programme will be required to represent and agree that it has not offered, sold or delivered, and will not offer, sell or deliver any Notes or distribute any copy of this Base Prospectus or any other document relating to the Notes in Italy except:

- (a) to qualified investors (*investitori qualificati*), as defined pursuant to Article 100 of Legislative Decree no. 58 of 24 February 1998 (the "**Financial Services Act**") and Article 34-ter, paragraph 1, letter (b) of CONSOB regulation No. 11971 of 14 May 1999 (the "**Issuers Regulation**"), all as amended from time to time; or

- (b) in other circumstances which are exempted from the rules on public offerings pursuant to Article 100 of the Financial Services Act and Issuers Regulation.

- (i) made by an investment firm, bank or financial intermediary permitted to conduct such activities in Italy in accordance with the Financial Services Act, Legislative Decree No. 385 of 1 September 1993 (the "**Banking Act**") and CONSOB Regulation No. 20307 of 15 February 2018, all as amended from time to time;
- (ii) in compliance with Article 129 of the Banking Act, as amended from time to time, and the implementing guidelines of the Bank of Italy, as amended from time to time; and
- (iii) in compliance with any other applicable laws and regulations, including any limitation or requirement which may be imposed from time to time by CONSOB or the Bank of Italy or other competent authority.

Investors should note that, in accordance with Article 100-bis of the Financial Services Act, where no exemption from the rules on public offerings applies under paragraphs (a) and (b) above, the subsequent distribution of the Notes on the secondary market in Italy must be made in compliance with the public offer and the prospectus requirement rules provided under the Financial Services Act and the Issuers Regulation. Furthermore, where no exemption from the rules on public offerings applies, the Notes which are initially offered and placed in Italy or abroad to professional investors only but in the following year are "systematically" distributed on the secondary market in Italy become subject to the public offer and the prospectus requirement rules provided under the Financial Services Act and Issuers Regulation. Failure to comply with such rules may result in the sale of such Notes being declared null and void and in the liability of the intermediary transferring the financial instruments for any damages suffered by the purchasers of Notes who are acting outside of the course of their business or profession.

Eurosystem eligibility³

EZB-Fähigkeit

Intended to be held in a manner which would allow Eurosystem eligibility

[Not applicable] [Yes/No]

Soll in EZB-fähiger Weise gehalten werden

[Nicht anwendbar] [Ja/Nein]

[Yes. Note that the designation "yes" simply means that the Notes are intended upon issue to be deposited with in the case of (i) a NGN one of the ICSDs as common safekeeper or (ii) a CGN Clearstream Banking AG, Frankfurt, and does not necessarily mean that the Notes will be recognized as eligible collateral for Eurosystem monetary policy and intra day credit operations by the Eurosystem either upon issue or at any or all times during their life. Such recognition will depend upon the ECB being satisfied that Eurosystem eligibility criteria have been met.]

[No. Whilst the designation is specified as "no" at the date of these Final Terms, should the Eurosystem eligibility criteria be amended in the future such that the Notes are capable of meeting them, the Notes may then be deposited with one of the ICSDs as common safekeeper (and registered in the name of a nominee of one of the ICSDs acting as common safekeeper). Note that this does not necessarily mean that the Notes will then be recognised as eligible collateral for Eurosystem monetary policy and intra day credit

¹ If the Notes clearly do not constitute "packaged" products, "Not Applicable" should be specified. If the Notes may constitute "packaged" products and no KID will be prepared, "Applicable" should be specified.

² *Sind die Schuldverschreibungen eindeutig keine "verpackten" Produkte sind, so sollte "Nicht anwendbar" ausgewählt werden. Wenn die Schuldverschreibungen "verpackte" Produkte darstellen und kein KID vorbereitet wird, ist "Anwendbar" auszuwählen.*

³ Select "Yes" if the Notes are in NGN form and are to be kept in custody by an ICSD as common safekeeper. Select "No" if the Notes are in NGN form and are to be kept in custody by the common service provider as common safekeeper. Select "Not applicable" if the Notes are in CGN form but not deposited with Clearstream Banking AG, Frankfurt.

"Ja" wählen, falls die Schuldverschreibungen in Form einer NGN begeben und von einem ICSD als common safekeeper gehalten werden sollen. "Nein" wählen, falls die Schuldverschreibungen in Form einer NGN begeben und vom common service provider als common safekeeper gehalten werden sollen. "Nicht anwendbar" wählen, falls die Schuldverschreibungen in Form einer CGN begeben werden, aber nicht bei Clearstream Banking AG, Frankfurt verwahrt werden.

operations by the Eurosystem at any time during their life. Such recognition will depend upon the ECB being satisfied that Eurosystem eligibility criteria have been met.]

[Ja. Es wird darauf hingewiesen, dass "ja" hier lediglich bedeutet, dass die Wertpapiere nach ihrer Begebung im Fall (i) einer NGN bei einem der ICSDs als gemeinsamen Verwahrer oder (ii) einer CGN bei Clearstream Banking AG, Frankfurt verwahrt werden und es bedeutet nicht notwendigerweise, dass die Schuldverschreibungen als geeignete Sicherheit im Sinne der Währungspolitik des Eurosystems und der taggleichen Überziehungen (intra-day credit operations) des Eurosystems entweder nach Begebung oder zu irgendeinem Zeitpunkt während ihrer Existenz anerkannt werden. Eine solche Anerkennung wird vom Urteil der EZB abhängen, dass die Eurosystemfähigkeitskriterien erfüllt werden.]

[Nein. Während die Bestimmung am Tag dieser Endgültigen Bedingungen mit "Nein" festgelegt wurde, können sich die Eurosystemfähigkeitskriterien für die Zukunft deart ändern, dass die Schuldverschreibungen fähig sein werden diese einzuhalten. Die Schuldverschreibungen können dann bei einer der ICSDs als gemeinsamer Verwahrer hinterlegt (und auf den Namen eines Nominees von einem der ICSDs als gemeinsamer Verwahrer eingetragen) werden. Es ist zu beachten, dass die Schuldverschreibungen selbst dann nicht notwendigerweise als geeignete Sicherheit im Sinne der Währungspolitik des Eurosystems und der taggleichen Überziehungen (intra-day credit operations) des Eurosystems zu irgendeinem Zeitpunkt während ihrer Existenz anerkannt werden. Eine solche Anerkennung wird vom Urteil der EZB abhängen, dass die Eurosystemfähigkeitskriterien erfüllt werden.]
