MIFID II PRODUCT GOVERNANCE / TARGET MARKET: PROFESSIONAL INVESTORS AND ECPS ONLY

Solely for the purposes of each manufacturer's product approval process, the target market assessment in respect of both Series of Notes has led to the conclusion that: (i) the target market for the Notes is eligible counterparties and professional clients only, each as defined in MiFID II; and (ii) all channels for distribution of the Notes to eligible counterparties and professional clients are appropriate. Any person subsequently offering, selling or recommending the Notes (a "**distributor**") should take into consideration the manufacturers' target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the manufacturers' target market assessment) and determining appropriate distribution channels.

PRIIPS REGULATION / PROHIBITION OF SALES TO EEA AND UK RETAIL INVESTORS

The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area ("**EEA**"). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of MiFID II; or (ii) a customer within the meaning of Directive (EU) 2016/97 (as amended, the "**Insurance Distribution Directive**"), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II. Consequently, no key information document required by Regulation (EU) No 1286/2014 (as amended, the "**PRIIPs Regulation**") for offering or selling the Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the United Kingdom ("**UK**"). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client, as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 ("**EUWA**"); or (ii) a customer within the meaning of the provisions of the Financial Services and Markets Act 2000 (the "**FSMA**") and any rules or regulations made under the FSMA to implement Directive (EU) 2016/97, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA. Consequently no key information document required by Regulation (EU) No 1286/2014 as it forms part of domestic law by virtue of the EUWA (the "**UK PRIIPs Regulation**") for offering or selling the Notes or otherwise

making them available to retail investors in the UK has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the UK may be unlawful under the UK PRIIPs Regulation.

Where acting as agent on behalf of a disclosed or undisclosed client when purchasing, or making or accepting an offer to purchase, any Notes (or any beneficial interests therein) from the Issuer and/or the Joint Lead Managers the foregoing representations, warranties, agreements and undertakings will be given by and be binding upon both the agent and its underlying client.

In connection with Section 309B of the Securities and Futures Act (Chapter 289) of Singapore (the "**SFA**") and the Securities and Futures (Capital Markets Products) Regulations 2018 of Singapore (the "**CMP Regulations 2018**"), the Issuer has determined, and hereby notifies all relevant persons (as defined in Section 309A(1) of the SFA), that the Notes are 'prescribed capital markets products' (as defined in the CMP Regulations 2018) and Excluded Investment Products (as defined in MAS Notice SFA 04-N12: Notice on the Sale of Investment Products and MAS Notice FAA-N16: Notice on Recommendations on Investment Products).

STABILISATION

IN CONNECTION WITH THE ISSUE OF THE NOTES, DEUTSCHE BANK AKTIENGESELLSCHAFT (THE "**STABILISING MANAGER**") (OR ANY PERSON ACTING ON BEHALF OF ANY STABILISING MANAGER) MAY OVER-ALLOT NOTES OR EFFECT TRANSACTIONS WITH A VIEW TO SUPPORTING THE MARKET PRICE OF THE NOTES AT A LEVEL HIGHER THAN THAT WHICH MIGHT OTHERWISE PREVAIL. HOWEVER, STABILISATION MAY NOT NECESSARILY OCCUR. ANY STABILISATION ACTION MAY BEGIN ON OR AFTER THE DATE ON WHICH ADEQUATE PUBLIC DISCLOSURE OF THE TERMS OF THE OFFER OF THE NOTES IS MADE AND, IF BEGUN, MAY CEASE AT ANY TIME, BUT IT MUST END NO LATER THAN THE EARLIER OF 30 DAYS AFTER THE ISSUE DATE OF THE NOTES AND 60 DAYS AFTER THE DATE OF THE ALLOTMENT OF THE NOTES. ANY STABILISATION ACTION OR OVER-ALLOTMENT MUST BE CONDUCTED BY THE STABILISING MANAGER (OR ANY PERSON ACTING ON BEHALF OF THE STABILISING MANAGER) IN ACCORDANCE WITH ALL APPLICABLE LAWS AND RULES.

FORWARD-LOOKING STATEMENTS

This Prospectus contains certain forward-looking statements, including statements using the words "believes", "anticipates", "intends", "expects" or other similar terms. This applies in particular to statements under the caption "*Description of the Issuer and Deutsche Börse Group*" and statements elsewhere in this Prospectus relating to, among other things, the future financial performance, plans and expectations regarding developments in the business of the Issuer and Deutsche Börse Group. These forward-looking statements are subject to a number of risks, uncertainties, assumptions and other factors that may cause the actual results, including the financial position and profitability of the Issuer or Deutsche Börse Group, to be materially different from or worse than those expressed or implied by these forward-looking statements. Any forward-looking statements in this Prospectus speak only as of the date on which they are made. Neither the Issuer nor the Joint Lead Manager do assume any obligation to update such forward-looking statements contained herein or to reflect any change in their respective expectations with regard thereto or any change in events, conditions or circumstances on which such statement is based and to adapt them to future events or developments.

ALTERNATIVE PERFORMANCE MEASURES

Certain financial measures presented in this Prospectus and in the documents incorporated by reference are not recognised financial measures under International Financial Reporting Standards as adopted by the European Union ("**IFRS**") ("**Alternative Performance Measures**") and may therefore not be considered as an alternative to the financial measures defined in the accounting standards in accordance with generally accepted accounting principles. The Alternative Performance Measures are intended to supplement investors' understanding of Deutsche Börse Group's financial information by providing measures which investors, financial analysts and management use to help evaluate Deutsche Börse Group's financial leverage and operating performance. Special items which the Issuer does not believe to be indicative of ongoing business performance are excluded from these calculations so that investors can better evaluate and analyse historical and future business trends on a consistent basis. Definitions of these Alternative Performance Measures may not be comparable to similar definitions used by other companies and are not a substitute for similar measures according to IFRS.

RISK FACTORS

Before deciding to purchase the Notes, investors should carefully review and consider the following risk factors and the other information contained in this Prospectus. Should one or more of the risks described below materialise, this may have a material adverse effect on the business, prospects, shareholders' equity, assets, financial position and results of operations (Vermögens-, Finanz- und Ertragslage) or general affairs of the Issuer or the Group. Moreover, if any of these risks occur, the market value of the Notes and the likelihood that the Issuer will be in a position to fulfil its payment obligations under the Notes may decrease, in which case the holders of the Notes could lose all or part of their investments. Factors which the Issuer believes may be material for the purpose of assessing the market risks associated with the Notes are also described below.

The Issuer believes that the factors described below represent the principal risks inherent in investing in the Notes, but the Issuer may be unable to pay interest (in case of the 2031 Notes), principal or other amounts on or in connection with the Notes for other unknown reasons than those described below. Additional risks of which the Issuer is not presently aware could also affect the business operations of Deutsche Börse Group and have a material adverse effect on Deutsche Börse Group's business activities and financial condition and results of operations. Prospective investors should read this section and the detailed information set out elsewhere in this Prospectus (including any documents incorporated by reference herein) and reach their own views prior to making any investment decision. In addition, prospective investors should bear in mind that several of the mentioned risks may occur simultaneously and that their implication can, possibly together with other circumstances, thus be intensified.

Words and expressions defined in the Terms and Conditions shall have the same meanings in this section.

Potential investors should, among other things, consider the following:

Risks relating to the Issuer and Deutsche Börse Group

The risk factors in this section are categorised as follows:

- Operational Risks
- Business Risks
- Financial Risks
- Additional Risks relating to the ISS Acquisition

When a risk factor is relevant in more than one category, such risk factor is presented only under the category deemed to be the most relevant for such risk factor. The most significant risk factor under each category is presented first. The other risk factors are not listed by significance or probability of the risk being materialising. The significance is assessed mainly on the basis of two criteria, (i) the probability that the risk will materialise and (ii) the magnitude of the negative effect the materialised risk may have on the Issuer and the Group and any Noteholder.

Operational Risks

Insufficient systems capacity and systems failures could adversely affect Deutsche Börse Group's business.

Deutsche Börse Group's business depends on the performance and reliability of complex computer and communications systems, including upgrades. Heavy use of its platforms and order routing systems during peak trading times or at times of unusually high market volatility could cause Deutsche Börse Group's systems to operate slowly or even to fail for periods of time. Failure to maintain systems, ensure security or to ensure sufficient capacity may also result in a temporary disruption of Deutsche Börse Group's regulatory and reporting functions.

Deutsche Börse Group has experienced systems failures in the past, and it is possible that Deutsche Börse Group will experience systems failures in the future. Systems failures could be caused by, among other things, periods of insufficient capacity of network bandwidth, power or telecommunications failures, acts of God, war, terrorism, human error, natural

disasters, fire, sabotage, hardware or software malfunctions or defects, complications experienced in connection with system upgrades, computer viruses, intentional acts of vandalism and similar events over which Deutsche Börse Group has little or no control. Deutsche Börse Group also relies on third parties for systems support. Any interruption in these third-party services or deterioration in the performance of these services could also be disruptive to its business. In addition, its systems may be adversely affected by failures of other trading systems, as a result of which it may be required to suspend trading activity in particular securities or, under certain circumstances, unwind trades.

In the event that any of its systems, or those of its third-party service providers, fail or operate slowly, it may, *inter alia*, cause any of the following to occur: unanticipated disruptions in service to exchange members and clients (including unavailability due to pandemic based events), slower response times or delays in trade executions, incomplete or inaccurate recording or processing of trades, financial losses and liabilities to clients and litigation or other claims against Deutsche Börse Group.

If Deutsche Börse Group cannot expand system capacity and performance to handle increased demand, or if its systems otherwise fail to perform and it experiences disruptions in service, slower response times or delays in introducing new products and services, then Deutsche Börse Group could incur reputational damage, regulatory sanctions, litigation, loss of trading share, loss of trading volume and loss of revenues, any of which could also have a material adverse effect on Deutsche Börse Group's business and cash flows, financial condition and results of operations.

Deutsche Börse Group is subject to significant litigation risks and other liabilities.

Many aspects of Deutsche Börse Group's business involve litigation risks. Some of its other liability risks arise under the laws and regulations relating to the insurance, tax, anti-money laundering, foreign asset controls and foreign corrupt practices areas. These risks include, among others, potential liability from disputes over terms of a securities trade or from claims that a system or operational failure or delay caused monetary losses to a customer, as well as potential liability from claims that Deutsche Börse Group facilitated an unauthorized transaction or provided materially false or misleading statements in connection with a transaction. Deutsche Börse Group is involved in, and may continue to be involved in, allegations of misuse of the intellectual property of others, as well as other commercial disputes.

Although aspects of Deutsche Börse Group's business are protected by contractual arrangements providing for limited or no liability clauses, Deutsche Börse Group could nevertheless be exposed to substantial liability under German law, U.S. federal and state laws and court decisions, rules and regulations promulgated by the German Federal Financial Supervisory Authority (*Bundesanstalt für Finanzdienstleistungsaufsicht* – "**BaFin**"), the U.S. Securities and Exchange Commission ("**SEC**"), the U.S. Commodity Futures Trading Commission ("**CFTC**") or European and other regulators, and laws and court decisions in the countries where Deutsche Börse Group operates. Deutsche Börse Group could incur significant expenses defending claims, even those without merit. In addition, an adverse resolution of any lawsuit or claim against Deutsche Börse Group may require it to pay substantial damages or impose restrictions on how it conducts business.

Please refer to the section "*Description of the Issuer and Deutsche Börse Group – Litigation*" for a description of significant legal proceedings of Deutsche Börse Group.

An adverse result with respect to any of these various proceedings could have a material adverse effect on Deutsche Börse Group's business and cash flows, financial condition and results of operations.

Deutsche Börse Group is subject to complex tax rules in various jurisdictions, and its interpretation and application of these rules may differ from those of relevant tax authorities, which could result in a liability to material additional taxes, interest and penalties.

Deutsche Börse Group operates in a number of territories and is accordingly subject to tax in several jurisdictions. The tax rules to which Deutsche Börse Group is subject are complex, and Deutsche Börse Group must make judgements (including based on external advice) as to the interpretation and application of these rules. The tax affairs of Deutsche Börse Group are in the ordinary course reviewed by tax authorities. Those tax authorities may disagree with the interpretation and/or application of relevant tax rules by Deutsche Börse Group. A challenge by a tax authority in these

circumstances might require Deutsche Börse Group to incur costs in connection with litigation against the relevant tax authority or reaching a settlement with the tax authority and, if the tax authority's challenge is successful, could result in additional taxes (perhaps together with interest and penalties) being assessed on Deutsche Börse Group, and as a result an increase in the amount of tax payable by Deutsche Börse Group.

Deutsche Börse Group operates in a highly regulated industry that is constantly developing and may be subject to censures, fines and other legal proceedings if it fails to comply with its legal and regulatory obligations.

Deutsche Börse Group operates in a highly regulated industry and its various entities are subject to extensive regulation, including competition and antitrust laws. The securities industry, as well as the banking and financial services industry, are subject to extensive governmental regulation and could become subject to increased regulatory scrutiny.

Following the financial crisis in 2007 and 2008, there has been and may continue to be an increased demand for more regulation and stricter oversight. The implementation of new regulation may impose excessive regulatory burdens. A regulatory trend towards group-wide compliance could also have impacts upon activities or entities that directly are subject to lesser regulation.

In particular, the regulatory requirements for the risk management of financial institutions have been extended. Examples are the *Mindestanforderungen an das Risikomanagement* (German minimum requirements for risk management), the Circular 12/552 on Central Administration, Internal Governance and Risk Management issued by the CSSF, the European Banking Recovery and Resolution Directive, respectively, the German *Gesetz zur Abschirmung von Risiken und zur Planung der Sanierung und Abwicklung von Kreditinstituten und Finanzgruppen* (Act on Ringfencing and Recovery and Resolution Planning for Credit Institutions and Financial Groups), risk management requirements set out in European Market Infrastructure Regulation ("**EMIR**") and Central Securities Depository Regulation ("**CSDR**"), the principles for financial market infrastructure of the Financial Stability Board, the Committee on Payments and Market Infrastructures and the International Organization of Securities Commissions and the act implementing the European Capital Requirements Directives / Capital Requirements Regulation.

These regulatory requirements directly affect the financial institutions of the Group, Clearstream, Eurex Clearing AG as well as European Commodity Clearing AG and Nodal Clear, LLC.

In addition, Regulation (EU) 2016/1011 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds (the "**Benchmark Regulation**"), entered into force in 2018, imposing new requirements on benchmark providers with regard to their authorisation and governance and the administration of benchmarks. These requirements also apply to those entities of Deutsche Börse Group which are providing relevant benchmarks such as, for example, DAX.

The failure to comply with these requirements could result in significant sanctions. As the scope of Deutsche Börse Group's business expands, it may also become subject to oversight by additional regulatory bodies, either directly with respect to operating entities or also additionally with respect to holding companies. The classification of Deutsche Börse Group activities as systemically significant could result in the application of additional regulatory or supervisory requirements, such as by the European Central Bank.

As a result, Deutsche Börse Group may sustain losses related to a failure to comply with new or existing laws or regulations. Deutsche Börse Group may also sustain losses if contracts must be renegotiated or if contract terms must be altered as a result of new laws, regulations, or court decisions. Additionally, Deutsche Börse Group may have greater responsibility for preventing illegal activities, such as fraud, money laundering, market manipulation, economic sanctions and embargos, corruption, tax evasion, violations of competition regulations or breaches of banking secrecy and face increased financial exposure or penalties related to an increased responsibility as a result of new laws or regulations. Furthermore, non-compliance or inadequate compliance with new or existing laws, inadequate contract terms or court decisions not adequately observed in customary business practice as well as fraud could lead to losses.

Regulators are vested with broad enforcement powers over exchanges, clearing houses, banks and other financial services providers in their respective jurisdictions, including powers to censure, fine, issue cease-and-desist orders, prohibit a

regulated entity from engaging in some of its operations or suspend or revoke an entity's recognition, license or registration. In the case of actual or alleged non-compliance with regulatory requirements, Deutsche Börse Group's entities could be subject to investigations and administrative or judicial proceedings that may result in substantial penalties, including revocation of a recognition, license or registration. Any such investigation or proceeding, whether successful or unsuccessful, would result in substantial costs and diversions of resources, could negatively impact Deutsche Börse Group's reputation and could have a material adverse effect on Deutsche Börse Group's business and cash flows, financial condition and results of operations. Furthermore, action by any of Deutsche Börse Group's entities' regulators requiring it to limit or otherwise change its operations, or prohibiting it from engaging in certain activities, could adversely affect its business and cash flows, financial condition and operating results.

Regulatory developments adversely affecting Deutsche Börse Group's businesses and cash flows, financial condition and results of operations could also result from court rulings such as the ruling of the German Federal Court of Justice (*Bundesgerichtshof*) on the permitted scope of usage of index trademarks.

If the indices and other products of Deutsche Börse Group contain undetected errors or malfunction, this could have a material adverse effect on its business.

The Qontigo business of Deutsche Börse Group develops, calculates, markets and distributes indices in a variety of asset classes. As a result, Deutsche Börse Group's indices underlie derivative financial instruments of investors, financial market product developers and issuers. Indices and other products developed or licensed by Deutsche Börse Group may contain miscalculations or undetected errors. As a consequence, market participants who use real-time price and order book information or other market signals to make their buy or sell decisions and recommendations or require accurate instrument reference data for risk management activities and error-free settlement may base their decisions on miscalculated or erroneous information. Therefore, Deutsche Börse Group may be exposed to damage claims brought forward against it based on such miscalculations or undetected errors and could suffer harm to its reputation, contractual disputes, negative publicity, delays in or loss of market acceptance of its products, license terminations or renegotiations, or unexpected expenses and diversion of resources to remedy errors. This may have a material adverse effect on Deutsche Börse Group's business and cash flows, financial condition and results of operations.

Service deficiency in Deutsche Börse Group's manual data processing could result in losses.

Deutsche Börse Group relies mostly on automated data processing. However, not all of the data processing is automated and manual data processing in relation to certain services rendered to its customers is required. Therefore, operator errors or omissions may occur that relate mainly to manual input of data (e.g. incorrect processing of customer instructions in the custody business). As a result, Deutsche Börse Group remains exposed in certain business segments to the risk of inadequate handling of customer instructions. In addition, manual intervention in market and system management is necessary in certain cases. The manual intervention in data processing may lead to mistakes and disputes with its customers, which could harm its reputation and have a material adverse effect on Deutsche Börse Group's business and cash flows, financial condition and results of operations.

Deutsche Börse Group's networks and those of its third-party service providers may be vulnerable to security risks.

The secure transmission of confidential information over public and other networks is a critical element of Deutsche Börse Group's operations. Cybercrime is increasingly becoming a focus for organised crime. Deutsche Börse Group's networks, based on links provided by third parties, and those of its third-party service providers may be vulnerable to unauthorized access, computer viruses and other security problems. Persons who circumvent security measures could wrongfully access and use Deutsche Börse Group's information or its customers' information, or cause interruptions or malfunctions in its operations. Deutsche Börse Group has frequently been the target of attempted information security attacks, but due to its situation centre (Computer Emergency Response Team, CERT), which detects and assesses threats from cybercrime in cooperation with national and international financial intelligence units at an early stage and coordinates risk mitigation measures in cooperation with the business areas, none of these attempts has resulted in any material issues for either the Group or its customers. The security measures taken by Deutsche Börse Group are costly and may ultimately prove inadequate. This could cause Deutsche Börse Group to incur reputational damage, regulatory

sanctions, litigation, loss of trading share, loss of trading volume and loss of revenues, any of which could also have a material adverse effect on Deutsche Börse Group's business and cash flows, financial condition and results of operations.

Deutsche Börse Group's reliance on third parties to provide certain products and services could adversely affect its business if these third parties cease to perform the functions that they currently perform.

Deutsche Börse Group relies on third-party service providers, including information technology hardware providers and certain data suppliers that it does not control. In particular, the index and analytic products developed in the Qontigo business of Deutsche Börse Group are dependent upon updates and continuing access to historical and current data from third-party sources, such as exchanges and other data suppliers who calculate and provide a variety of indices. If any of the provided information has errors, is delayed or is unavailable, this could materially impair the ability of Deutsche Börse Group to effectively operate these businesses. In particular, the timing of calculations of real-time indices as reference prices for certain derivatives is critical, and any delay may cause Deutsche Börse Group to face liabilities from customers who rely on these indices as a reference point for their specific products.

Deutsche Börse Group also relies on members of the trading community to maintain markets and add liquidity. Global market and economic conditions have been difficult in recent years, in particular for financial services companies, such as the members of the exchanges.

Clearstream uses a network of depositories to settle transactions between two customers in the various markets it is operating. These depositories are required to establish a connection between the customers in order to deliver the security.

To the extent that any external service providers provide inadequate products, experience difficulties or losses, do not provide sufficiently experienced personnel, are unable to provide services to the required levels or otherwise fail to meet their obligations under their service arrangements with Deutsche Börse Group, a material adverse effect on Deutsche Börse Group's business and cash flows, financial condition and results of operations could occur.

Leakage of sensitive data may violate laws and regulations that could result in fines and loss of reputation.

Deutsche Börse Group accumulates, stores and uses in its operating business data which is sensitive and/or protected by data protection laws in the countries in which it operates. Although Deutsche Börse Group takes precautions to protect data in accordance with applicable laws, it is possible that there may be leakages in the future. Loss or leakage of sensitive data or violation of data protection laws may result in fines and loss of reputation, which could have a material adverse effect on Deutsche Börse Group's business and cash flows, financial condition and results of operations.

Damage to Deutsche Börse Group's reputation could materially adversely affect Deutsche Börse Group's business.

One of Deutsche Börse Group's competitive strengths is its strong reputation and brand name. Deutsche Börse Group's reputation could be harmed in many different ways, including by any failures to comply with regulatory requirements, by governance or technology failures or by activities of members or listed companies whom it does not control. Damage to Deutsche Börse Group's reputation could cause some issuers not to list their securities on Deutsche Börse Group's exchanges, as well as reduce the trading volume on its exchanges, and/or reduce clearing and/or settlement volumes. Any of these events could have a material adverse effect on Deutsche Börse Group's business and cash flows, financial condition and results of operations.

Deutsche Börse Group operates in a business environment that continues to experience significant and rapid technological change.

Technology is a key component of Deutsche Börse Group's business strategy and is crucial to its success. Deutsche Börse Group seeks to offer market participants a comprehensive suite of best-in-class technology solutions in a centralized environment. However, Deutsche Börse Group operates in a business environment that has undergone, and continues to experience, significant and rapid technological change. In recent years, electronic trading and customer demand for increased choice of execution methods has grown significantly. To remain competitive, Deutsche Börse Group must continue to enhance and improve the responsiveness, functionality, capacity, accessibility and features of its trading platforms, software, systems and technologies. Deutsche Börse Group must also adopt technological changes for

regulatory reasons. Its success will depend, in part, on its ability to develop and license leading technologies, enhance existing trading, clearing and settlement platforms and services and create new platforms and services. Furthermore, it needs to respond to customer demands, technological advances and emerging industry standards and practices on a cost-effective and timely basis and continue to attract and retain highly skilled technology staff to maintain and develop existing technology and to adapt to and manage emerging technologies.

The development and expansion of electronic trading, clearing, settlement, custody, collateral management and market data-related technologies entail significant technological, financial and business risks. These risks include Deutsche Börse Group failing or being unable to provide reliable and cost-effective electronic services to its customers, timely developing the required functionality to support electronic trading in key products comparable to systems on other electronic markets, matching fees of its competitors that offer electronic-only trading facilities, attracting independent software vendors to write front-end software that will effectively access Deutsche Börse Group's electronic trading systems and automated order routing systems, responding to technological developments or service offerings by competitors, and generating sufficient revenue to justify the substantial capital investment Deutsche Börse Group has made and will continue to make in enhancements to its electronic trading platforms, as well as its clearing and settlement systems. The adoption of new technologies or market practices may require Deutsche Börse Group to devote additional resources to improve and adapt its services. Deutsche Börse Group operates on a high cost base and has accordingly a high operational leverage.

Any failure or delay in exploiting technology, or failure to exploit technology as effectively as competitors of Deutsche Börse Group, or any requirements to adopt costs due to the required changes could have a material adverse effect on Deutsche Börse Group's business and cash flows, financial condition and results of operations.

A failure to protect Deutsche Börse Group's intellectual property rights, or allegations that Deutsche Börse Group has infringed intellectual property rights of others, could adversely affect Deutsche Börse Group's business.

Deutsche Börse Group owns or licenses rights to a number of trademarks, service marks, trade names, copyrights and patents that it uses in its businesses, including rights to use certain indices as the basis for equity index derivatives products traded on its futures markets and the rights to use Deutsche Börse Group's data for trading, calculation and benchmarking purposes (together "**Intellectual Property Rights**"). To protect its Intellectual Property Rights, Deutsche Börse Group relies on a combination of trademark laws, copyright laws, patent laws, trade secret protection, database laws, confidentiality agreements and other contractual arrangements with affiliates, customers, strategic investors and others. The protective steps taken may be inadequate to deter misappropriation of its intellectual property. Deutsche Börse Group may be unable to detect the unauthorized use of, or take appropriate steps to enforce, its Intellectual Property Rights. Furthermore, some of the products and processes of Deutsche Börse Group may not be subject to intellectual property protection. Failure to protect intellectual property adequately could harm Deutsche Börse Group's reputation and affect its ability to compete effectively. Further, defending its Intellectual Property Rights may require significant financial and managerial resources. Any of the foregoing could have a material adverse effect on Deutsche Börse Group's business and cash flows, financial condition and results of operations.

Third parties may assert Intellectual Property Rights claims against Deutsche Börse Group, which may be costly to defend, could require the payment of damages and could limit Deutsche Börse Group's ability to use certain technologies, trademarks or other intellectual property. Some of Deutsche Börse Group's competitors currently own patents and have actively been filing patent applications in recent years, some of which may relate to its trading platforms and business processes. As a result, Deutsche Börse Group may face allegations that it has infringed or otherwise violated the intellectual property rights of third parties. Any intellectual property rights claims, with or without merit, could be expensive to litigate or settle and could divert management resources and attention. Successful challenges against Deutsche Börse Group could require it to modify or discontinue its use of technology or business processes where such use is found to infringe or violate the rights of others, or require Deutsche Börse Group to purchase licenses from third parties, any of which could also have a material adverse effect on Deutsche Börse Group's business and cash flows, financial condition and results of operations.

Business Risks

Adverse economic and legal conditions and disruptions in financial markets could negatively affect trading, clearing and listing activities and thereby Deutsche Börse Group's business.

General economic conditions affect the overall level of trading and clearing activity in securities and derivatives markets as well as new listings in securities markets, which directly impact Deutsche Börse Group's results of operations. A significant portion of Deutsche Börse Group's revenue will depend, either directly or indirectly, on transaction-based fees that, in turn, depend on Deutsche Börse Group's ability to attract and maintain order flow, both in absolute terms and relative to other market centres. The recent years have been characterized by increased political and economic uncertainty in some of the core markets Deutsche Börse Group operates in, including Europe, and numerous factors continue to contribute to the considerable uncertainty going forward. In Europe, potential future changes to monetary policy, continued doubts about the future of the Eurozone (as well as questions about the European Union more generally following the UK's exit from the European Union ("**Brexit**")), the impact of negative interest rates or tariff conflicts, insufficient deleveraging in the private and public sectors, a halt in implementing structural and financial reforms and an elevated level of political uncertainty could adversely affect Deutsche Börse Group's operations. Adverse economic conditions may result in a deterioration of the economic success of the companies listed on Deutsche Börse Group's exchanges and hence a decline in trading volume and demand for market data and a decrease of asset-based fees, which may adversely affect Deutsche Börse Group's revenues and future growth. Declines in volumes may impact Deutsche Börse Group's market share or pricing structures. Poor economic conditions may also negatively impact new listings by reducing the number or size of securities offerings and could therefore have a material adverse effect on Deutsche Börse Group's business and cash flows, financial condition and results of operations.

The major share of Deutsche Börse Group's customer base is part of the financial market, meaning that Deutsche Börse Group's credit exposures are highly concentrated to the financial sector. Deutsche Börse Group could therefore be adversely affected by negative developments of the financial sector as a whole or in part. A lack of investor confidence in the financial markets could also have a negative effect on Deutsche Börse Group's financial performance. Over the last few years global financial markets and economic conditions have been difficult and volatile, in particular for financial services companies that are Deutsche Börse Group's most significant customers. These conditions have resulted in significantly increased volatility, outflows of customer funds and securities, losses resulting from declining asset values, defaults on securities, reduced liquidity and regulatory and legislative changes. In the event of a significant and sustained decline in trading and/or clearing volumes, including a reduction in the number of traders, reduced trading demand by customers of Deutsche Börse Group, a decision by regulators or market participants to curtail speculative or high frequency trading, other regulatory or legislative changes that result in reduced trading activity, heightened capital maintenance requirements, changes to its contract specifications that are not viewed favourable by its market participants or significant defaults by issuers of debt leading to market disruption, Deutsche Börse Group would lose revenue, and its inability to quickly reduce infrastructure and overhead expenses could have a material adverse effect on Deutsche Börse Group's business and cash flows, financial condition and results of operations.

The global Covid-19 pandemic could adversely affect the financial condition and results of operations of Deutsche Börse Group

Pandemics, epidemics, outbreaks of infectious diseases or any other serious public health concerns, such as the outbreak of SARS-CoV-2 first identified in December 2019 and its associated diseases ("**Covid-19**"), together with any measures aimed at mitigating a further expansion thereof, such as restrictions on travel, imposition of quarantines, prolonged closures of workplaces, or curfews or other social distancing measures, are likely to have a material adverse effect on the global economy and financial markets, which may, in turn, have a material adverse effect on Deutsche Börse Group's business and cash flows, financial condition and results of operations. The rapid expansion of the outbreak of Covid-19 and the existing uncertainties regarding the further progression of the crisis means that only very limited exact forecasts can be made regarding the further impact on the global economy as well as consequences resulting therefrom.

Deutsche Börse Group faces significant competition and competes globally with a broad range of market participants for listings, trading, clearing and settlement volumes.

The financial industry, including listings, trade execution, clearing, settlement, and custody of cash equities, bonds and derivatives, is highly competitive. Deutsche Börse Group faces significant competition for listings, trading, clearing and settlement of equities, fixed income securities, repos, exchange-traded funds ("ETFs"), closed-end funds, structured products, futures, options and other derivatives. Deutsche Börse Group expects competition in the financial industry to increase further and anticipates that new competitors will enter the industry. For example, competitors, such as the exchanges Euronext, Singapore Exchange (SGX), ICE Futures Europe and Mercado Español de Futuros Financieros (MEFF), as operators of derivatives markets, might increase their market shares on the European trading markets (both on- and off-exchange). Competitors and new entrants may be subject to less stringent regulatory oversight than Deutsche Börse Group currently faces. The ongoing consolidation of the industry by mergers, business combinations or otherwise may continue. As a result of these combinations, and as a result of new entrants entering the industry, global competition among listing venues, trading markets and other execution venues as well as among clearing service providers has become more intense. The global derivatives industry has also become increasingly competitive. Exchanges, intermediaries, and even end users are consolidating and over the counter ("OTC") and unregulated markets and entities are constantly evolving. Additionally, in response to growing competition, many marketplaces have demutualized to provide greater flexibility for future growth.

Sustained trends toward the liberalization of certain parts of the industry, technological innovation and globalization of world capital markets have resulted in greater mobility of capital, greater international participation in local markets and more competition among markets in different geographical areas. The financial infrastructure industry has undergone significant consolidation through mergers, acquisitions and major alliances globally in recent years.

The current and prospective competitors of Deutsche Börse Group include both traditional and non-traditional execution and listing venues, securities and option exchanges, futures exchanges, OTC markets, clearing organizations, market data and information vendors, electronic communications networks, multilateral trading facilities ("MTFs"), crossing systems and similar entities, consortia of large customers, consortia of clearing firms and electronic brokerage and dealing facilities, market makers, banks, index providers, news and analytics providers, financial services technology providers and other financial market participants. Some of these competitors are also among the largest customers of Deutsche Börse Group or are owned by Deutsche Börse Group's customers. Deutsche Börse Group faces significant and growing competition from financial institutions that have the ability to divert trading and/or clearing volumes from Deutsche Börse Group's exchanges and clearing houses.

Deutsche Börse Group competes with other market participants in a variety of ways, including the cost, quality and speed of trade execution, liquidity, functionality, ease of use and performance of trading systems, the ranges of products and services offered to trading participants and listed companies, technological innovation and reputation. In particular, Deutsche Börse Group's competitors may exploit regulatory disparities between traditional, regulated exchanges and alternative markets that benefit from a reduced regulatory burden and lower-cost business model or consolidate and form alliances, which may create greater liquidity, lower costs, and better pricing than Deutsche Börse Group can offer. These competitors may also better leverage existing relationships with customers and alliance partners or better exploit brand names to market and sell their services.

Failure of Deutsche Börse Group to compete successfully could have a material adverse effect on its business, cash flows, financial condition and results of operations.

Deutsche Börse Group's share of trading equities in Europe may decline.

Pan-European trading venues and other competitors offer trading in the securities listed on the Frankfurt Stock Exchange and compete directly with Deutsche Börse Group for market share. Competition from these execution venues may lead to a decline of Deutsche Börse Group's share of turnover in equities trading. In this respect, regulatory changes under MiFID II/MiFIR may lead to increasing competition from systematic internalisers operated by investment firms. If

Deutsche Börse Group's market share decreases relative to its competitors, Deutsche Börse Group may be less attractive to market participants as a source of liquidity.

If Deutsche Börse Group is unable to offset any significant decline in its trading share by an increase in its overall trading volumes of Deutsche Börse Group-listed securities, or if a decline in its trading share in Deutsche Börse Group-listed securities makes its venues appear less liquid, then this could have a material adverse effect on Deutsche Börse Group's business and cash flows, financial condition and results of operations.

Upcoming legislation may lead to significant changes in the competitive environment and may have a major impact on the overall market infrastructure and result in increased costs and expenses. Furthermore, uncertainties in connection with the development and implementation of new regulations may reduce the level of activities of Deutsche Börse Group.

Significant new regulatory requirements continue to be applied to financial institutions and markets which may impact either Deutsche Börse Group or its customers and market participants. The European Parliament and the Council of the European Union concluded the revision of MiFID in 2014. The amended requirements were published in a directive (MiFID II) and a regulation ("**MiFIR**") and are applicable since 3 January 2018. The new regulations also contain many components of the German High-Frequency Trading Act (*Hochfrequenzhandelsgesetz*), which aims to help stabilising the financial markets without impacting the supply of liquidity to the markets.

Numerous other legal developments and draft proposals may have a significant impact on the business of Deutsche Börse Group. These include, amongst others, the intended capital markets union, EMIR, Capital Requirements Directive IV, Capital Requirements Regulation, Basel III, the revised Market Abuse Directive and Regulation, the CSDR, possible changes to the Financial Conglomerates Directive and the harmonisation of settlement across Europe. Furthermore, various legal developments in the United States, inter alia on corporate governance, transparency, oversight and ownership rules for registered national exchanges and other self-regulated organizations, as well as further implementation of regulations pursuant to the Dodd-Frank Act, may also have a significant impact. Requirements for compliance with regulations such as these may increase costs and expenses or limit the potential for further development of some areas of Group activity.

If any of the legislation mentioned above or any other legislation (in particular of the United States) that might be adopted in the future adversely affects the legal and regulatory environment surrounding the markets that Deutsche Börse Group operates, or the market perceptions thereof, it may make it difficult for its exchanges and/or clearing houses to compete with other competitors in different jurisdictions. Additionally, the reforms of the legislative framework lead to uncertainties in the context of the regulatory framework for financial markets and Deutsche Börse Group's listings, trading, market data, clearing and settlement businesses, which may reduce the levels of activity of Deutsche Börse Group.

Deutsche Börse Group is highly dependent upon the levels and nature of activity on its exchanges and clearing houses. It is expected that market participants will change their behaviour in response to these new regulations. To the extent that the above regulatory changes cause market participants to reduce the levels or restrict the nature of activity on Deutsche Börse Group's exchanges, and/or clearing houses, the business and cash flows, financial condition and results of operations of Deutsche Börse Group may be adversely affected.

If and when legislative proposals are adopted, and/or if any other legislation relevant to Deutsche Börse Group's business is adopted or amended, this could adversely impact the businesses of Deutsche Börse Group in various and significant ways and could have a material adverse effect on Deutsche Börse Group's business and cash flows, financial condition and results of operations.

There is a risk that the Issuer could be classified as a "financial holding company" in the future.

Due to the structure of the Deutsche Börse Group, which also includes financial institutions as subsidiaries of the Issuer, BaFin is on a regular basis assessing whether the Issuer could potentially be classified as a financial holding company ("**FHC**") for the purposes of the European Capital Requirements Regulation (Regulation (EU) No. 575/2013).

As of the date of this Prospectus, the Issuer is not classified as an FHC. However, it cannot be excluded that such classification may change, if BaFin determines that the Issuer is mainly a holding company and its subsidiaries are or have become "wholly or mainly" credit institutions, investment firms or financial institutions.

If the Issuer is qualified as an FHC, the Issuer and Deutsche Börse Group are likely to be subject to increased regulatory capital requirements and a more extensive application of regulations such as the European Bank Recovery and Resolution Directive (Directive 2014/59/EU). This could, *inter alia*, result in higher administrative costs. As a consequence, the classification of the Issuer as an FHC could have a material adverse effect on the financial condition and the results of operations of Deutsche Börse Group.

Deutsche Börse Group may face competitive disadvantages, or may lose or impede its business opportunities, if it does not receive necessary or timely regulatory approvals for new business initiatives.

Deutsche Börse Group operates regulated businesses including exchanges and/or clearing houses in multiple jurisdictions, in particular in Germany, the United States, Switzerland and Singapore. Regulators in each of these countries regulate in particular exchanges and clearing houses through the adoption and enforcement of rules governing the trading activities, business conduct and financial responsibility of such exchanges and clearing houses and entities and individuals associated with them. Deutsche Börse Group's initiatives in these jurisdictions with regulatory implications must be approved by the relevant authorities in each of these countries. In particular, Deutsche Börse Group may from time to time seek to engage in new business activities, some of which may require changes to its or its exchanges' and clearing houses' organisational documents or rules that may also require approvals.

Any delay or denial of a requested approval could cause Deutsche Börse Group to lose business opportunities, slow its ability to integrate its different markets or slow or impede its ability to change its governance practices. Deutsche Börse Group's competitive position could be significantly weakened if its competitors are able to obtain regulatory approval for new functionalities faster, or with less cost or difficulty, or if approval is not required for Deutsche Börse Group's competitors but is required for Deutsche Börse Group. In addition, as Deutsche Börse Group seeks to expand its product base, it could become subject to the oversight of additional regulatory bodies. As a consequence, any delay or denial of requested approvals could have a material adverse effect on Deutsche Börse Group's business and cash flows, financial condition and results of operations.

Similar risks could arise if the banking and financial services institutions operated by Deutsche Börse Group do not receive necessary or timely regulatory approvals for its new business initiatives.

Deutsche Börse Group's business may be adversely affected by intense price competition.

The financial industry, including listings, trade execution, clearing and settlement of cash equities, bonds and derivatives as well as index and data supply, is characterized by intense price competition. In particular, the pricing model for listings, trade execution, clearing and settlement has changed in response to competitive market conditions. In recent years, some of Deutsche Börse Group's competitors have engaged in aggressive pricing strategies, including lowering the fees that they charge for taking liquidity and increasing liquidity (or offering rebates) as an incentive for providers of liquidity in certain markets. It is likely that Deutsche Börse Group will continue to experience significant pricing pressure and that some of its competitors will seek to increase their share of listings, trading or clearing by reducing their fees, by offering larger liquidity payments or by offering other forms of financial or other incentives.

Profit margins could also decline if Deutsche Börse Group reduces pricing in response, particularly in light of the substantially fixed cost nature of the trading, clearing and settlement businesses of Deutsche Börse Group. In addition, a decrease in the market share in the listing and trading businesses as a result of price pressure could adversely impact other business segments, such as Deutsche Börse Group's data business. Deutsche Börse Group also might be forced to lower its subscription fees for instruments listed on Xetra or Eurex due to competitors offering similar services at lower prices or for free. Furthermore, many internalization strategies are driven by cost-saving or profit incentive, thus further increasing the desire of Deutsche Börse Group's customers to avoid incurring fees on its exchanges or clearing houses.

Deutsche Börse Group's results of operations and future profitability could be adversely affected as a result of these activities.

Broad market trends and other factors beyond the control of Deutsche Börse Group could significantly reduce demand for its services.

Deutsche Börse Group's business, cash flows and results of operations are highly dependent upon the levels of activity on its exchanges and clearing houses, and in particular, upon the volume of financial instruments traded and/or cleared, the number and shares outstanding of listed issuers, the number of new listings, the number of traders in the market and similar factors. Deutsche Börse Group's business, cash flows and results of operations are also dependent upon the success of its commercial technology business, which, in turn, is directly dependent on the commercial well-being of its customers. Deutsche Börse Group has no direct control over these variables. These variables are in turn influenced by economic, political and market conditions in Europe, the United States, and elsewhere in the world that are beyond Deutsche Börse Group's direct control, including factors such as broad trends in business and finance, including industry-specific circumstances, capital market trends and the mergers and acquisitions environment, concerns over inflation and the level of institutional or retail confidence; changes in monetary policy and foreign currency exchange rates, changes in tax policy (e.g. the introduction of a financial transaction tax), the availability of short-term and long-term funding and capital, the availability of alternative investment opportunities; changes in the level of trading activity, changes and volatility in the prices of securities, changes in the level and volatility of interest rates and growth in gross domestic product (GDP), changes in the customer base, legislative and regulatory changes (e.g. German High-Frequency Trading Act, MiFID II, EMIR and CSDR), the perceived attractiveness, or lack of attractiveness, of the European capital markets, unforeseen market closures or other disruptions in trading, clearing, settlement, custody, collateral management and/or market data technology, terrorism, natural disasters, including floodings and war and the outbreak of contagious disease pandemics or other public health emergencies in the regions in which Deutsche Börse Group operates, which could decrease levels of economic and market activities.

General economic conditions affect financial and securities markets in a number of ways, from determining availability of capital to influencing investor confidence. Adverse changes in the economy or the outlook for the financial and securities industry can have a negative impact on Deutsche Börse Group's revenues through declines in trading volumes, new listings, clearing and settlement volumes and demand for market data. The tax policy applicable at the venue of exchanges operated by Deutsche Börse Group may also influence the attractiveness of these exchanges.

If levels of activity on Deutsche Börse Group's exchanges are adversely affected by any of the factors described above or other factors beyond its control, this could also have a material adverse effect on Deutsche Börse Group's business and cash flows, financial condition and results of operations.

Deutsche Börse Group intends to continue offering new products, enter into or increase its presence in new markets and attract new customers, which will involve risks. Deutsche Börse Group may not be successful in offering new products or identifying opportunities.

Deutsche Börse Group intends to continue to explore and pursue opportunities to strengthen its business and grow the company. In doing so, Deutsche Börse Group may launch new products and enter into or increase its presence in other markets. In relation to the expansion of its business, Deutsche Börse Group may incur risks which may be material. Deutsche Börse Group may spend substantial time and money developing new products or improving current product offerings. If these product offerings are not successful, Deutsche Börse Group may miss a potential market opportunity and not be able to offset the cost of such initiatives. Deutsche Börse Group may enter into or increase its presence in markets that already possess established competitors who may enjoy the protection of barriers to entry. In addition, offering new products requires substantial time and attention of its management team, which could prevent the management team from successfully overseeing other initiatives. Deutsche Börse Group is potentially expanding its presence or entering into newly developing arenas of competition, such as MTFs in Europe, where competitors that do not also operate regulated markets may be subject to less regulation, and where demand for such services is subject to uncertainty will subject Deutsche Börse Group to a high degree of uncertainty and risk. If Deutsche Börse Group is unable

to expand its business to successfully compete, this could have a material adverse effect on its business and cash flows, financial condition and results of operations.

Deutsche Börse Group will face risks when entering into or increasing its presence in markets or when entering into new business lines.

Deutsche Börse Group may enter into or increase its presence in markets that already possess established competitors. Attracting customers in certain countries may also be subject to a number of risks, including currency exchange rate risk, difficulties in enforcing agreements or collecting receivables, longer payment cycles, compliance with the laws or regulations of these countries, and political and regulatory uncertainties. Deutsche Börse Group may also expand its presence or enter into newly developing arenas of competition, e.g. emerging asset classes for derivatives contracts such as commodities, emissions, power and weather, facing competition from already established regulated competitors such as less regulated competitors, e.g. voice and electronic interdealer brokers. In addition, demand for such services is subject to uncertainty and may change over time with the emergence of new competing products. As a result, demand and market acceptance for Deutsche Börse Group's products and services within these markets are subject to a high degree of uncertainty and risk.

Deutsche Börse Group may be unable to enter into or increase its presence in these markets and compete successfully, which could have a material adverse effect on Deutsche Börse Group's business and cash flows, financial condition and results of operations.

Deutsche Börse Group depends on large customers.

A considerable portion of Deutsche Börse Group's revenues is derived from business conducted by Deutsche Börse Group with institutional clients and large financial institutions. For example, in Deutsche Börse Group's Xetra business, the 10 largest trading participants accounted for approximately half of the total trading volumes on Frankfurt Stock Exchange in 2020. On the Eurex side of Deutsche Börse Group's business, the 10 largest customers accounted for around 50 per cent. of the overall trading volumes of Eurex for 2020. Clearstream's 10 largest customers accounted for almost 35 per cent. of Clearstream's sales revenues in 2020. Loss of all or a substantial portion of trading volumes of any of Deutsche Börse Group's large customers for whatever reason could have a material adverse effect on Deutsche Börse Group's business and cash flows, financial condition and results of operations.

Deutsche Börse Group may not be able to retain and/or attract personnel that are key to Deutsche Börse Group's business.

Deutsche Börse Group's success is dependent upon the experience and industry knowledge of its management personnel and the contributions of qualified personnel to operate its business, ensure compliance with regulatory requirements and execute its business plans. This applies to all of its business segments, particularly to the information technology division. There is surplus demand in the employment market for specialists in a number of fields, such as in the information technology field, and the Group competes for employees with a large number of other enterprises in these industries. Should Deutsche Börse Group be unsuccessful in recruiting and retaining an adequate number of qualified employees in the future, this could have a material adverse effect on its business and cash-flows, financial condition and results of operations.

Deutsche Börse Group's obligations in connection with its regulatory functions as exchange operator in Germany could limit its funding resources.

Pursuant to Section 5 para. 1 of the German Stock Exchange Act (*Börsengesetz*), operators of German exchanges must provide certain funds to the exchanges operated by them. Therefore, Deutsche Börse, as operator of the Frankfurt Stock Exchange, is required to provide the Frankfurt Stock Exchange, at the request of its management, with staff and financial resources as well as the means necessary for the operation and further development of its business. This applies accordingly to Eurex Frankfurt AG as operator of Eurex Deutschland, European Energy Exchange AG ("EEX") as operator of the European Energy Exchange, Tradegate Exchange GmbH as operator of Tradegate Exchange, and Börse Berlin AG as operator of Börse Berlin. The obligation to fund these regulatory functions could limit Deutsche Börse Group's funding resources, Deutsche Börse Group's ability to reduce its expense structure, and could limit its ability to

invest in or pursue other opportunities, which could in turn have a material adverse effect on Deutsche Börse Group's business and cash flows, financial condition and results of operations.

Financial Risks

Deutsche Börse Group's business may be adversely affected by credit risks associated with clearing and settlement activities and from its cash investments.

The customers of Deutsche Börse Group's subsidiaries that operate its clearing and settlement businesses, Eurex Clearing AG, European Commodity Clearing AG, Nodal Clear, LLC and Clearstream, may default on their contractual, borrowing or guarantee obligations and not be able to fulfil their obligations or settle outstanding liabilities.

Eurex Clearing AG is the largest clearing house within Deutsche Börse Group. It offers fully automated and straight-through post-trade services for derivatives, equities, repo and fixed income transactions. In its role as a central counterparty, Eurex Clearing AG is exposed to counterparty, credit and market risk because it acts as a buyer to all sellers and as a seller to all buyers, thereby seeking to minimize counterparty risk and to maximize operational efficiency for its clearing members. Eurex Clearing AG maintains policies and procedures to help ensure that its clearing members can satisfy their obligations and uses several lines of defence to cover counterparty risks, including requesting daily and, where necessary, intraday deposit of collateral by clearing members in the form of cash or securities in line with the parties' respective positions and margin requirements and guarantee funds (clearing funds). However, in the event of a clearing member's default, the collateral deposited may be inadequate to cover all remaining obligations after closing out all open positions.

European Commodity Clearing AG is a central clearing house which specializes in energy and commodity products. As part of EEX Group, European Commodity Clearing AG provides clearing services for EEX, EEX Asia and EPEX SPOT and for the partner exchanges HUPX, HUDEX, NOREXECO, SEEPEX and SEMOpX. In its role as a central counterparty, European Commodity Clearing AG steps between the buyer and the seller in each transaction, thereby minimizing the counterparty risk. European Commodity Clearing AG guarantees the physical and financial settlement of all transactions, providing security and cross-margining benefits for its customers. European Commodity Clearing AG maintains policies and procedures to help ensure that its clearing members can satisfy their obligations and uses several lines of defence to cover counterparty risks, including requesting daily and, where necessary, intraday deposit of collateral by clearing members mostly in the form of cash or securities in line with the parties' respective positions and margin requirements and guarantee funds (clearing funds). However, in the event of a clearing member's default, the collateral deposited may be inadequate to cover all remaining obligations after closing out all open positions.

Nodal Clear, LLC, the clearing house for Nodal Exchange, is a derivatives clearing organization pursuant to the Commodity Exchange Act and is regulated by the CFTC. Nodal Clear, LLC serves as the central counterparty for all Nodal Exchange transactions. Through the clearing process, the clearing house becomes the buyer to every seller and the seller to every buyer, significantly reducing the credit risk exposure of Nodal Exchange participants. Nodal Clear, LLC's strong risk management practices create a sound market infrastructure for trading of Nodal Exchange contracts. Nodal Clear, LLC employs a tailored portfolio margining methodology that appropriately margins Nodal Exchange contracts and provides capital efficiencies to market participants. Nodal Clear, LLC maintains policies and procedures to help ensure that its clearing members can satisfy their obligations and uses several lines of defence to cover counterparty risks, including twice daily and, where necessary, ad hoc deposits of collateral by clearing members in the form of cash (and in limited instances, irrevocable letters of credit) in line with the parties' respective positions and margin requirements and guarantee funds (clearing funds). However, in the event of a clearing member's default, the collateral deposited may be inadequate to cover all remaining obligations after closing out all open positions.

Clearstream grants loans to its clients in order to make the securities settlement more efficient. This type of credit business is, however, fundamentally different from the classic lending business. On the one hand, credit is extended solely for less than a day, and it is generally collateralised and granted to clients with high creditworthiness on the other. Furthermore, the credit lines granted can be revoked at any time. Furthermore, Clearstream is also exposed to credit risk in its securities lending activities. Although lending transactions are collateralized, Clearstream customers may default and the collateral

held may not be sufficient to avoid incurring a credit loss, which could have a material adverse effect on Deutsche Börse Group's business and cash flows, financial condition and results of operations. Furthermore, Clearstream is exposed to the risk of a default in its network of cash correspondent banks.

Finally, Deutsche Börse Group is also exposed to credit risk from cash investments as part of its treasury activities.

As a consequence of the economic downturn being further accelerated by the Covid-19 crisis, the risk of counterparty default may generally increase in the future.

In the event that counterparties to Deutsche Börse Group default on their obligations, such default could have a material adverse effect on Deutsche Börse Group's business and cash flows, financial condition and results of operation.

Deutsche Börse Group is exposed to fluctuations in foreign exchange rates, interest rates and other market prices.

Since Deutsche Börse Group conducts operations in several different countries, including several European countries and the United States, a substantial portion of its assets, liabilities, revenues and expenses are denominated in currencies other than euros, e.g. U.S. dollars and Swiss francs. As a result, Deutsche Börse Group is exposed to foreign exchange rate fluctuations. In addition, Deutsche Börse Group is exposed to interest rate fluctuations, in particular in connection with cash investments or borrowings as well as through corporate transactions. Deutsche Börse Group may use derivative financial instruments with the aim to reduce some of the negative impacts that could result from fluctuations in these rates. Deutsche Börse Group's assumptions and assessments with regard to the future development of these rates and the chosen level of risk avoidance or risk tolerance has a substantial impact on the success or failure of its hedging policies. The failure of Deutsche Börse Group's hedging policies could have a material adverse effect on Deutsche Börse Group's business and cash flows, financial condition and results of operations. Further market price risk arises in connection with pension schemes established by Deutsche Börse Group.

Deutsche Börse Group is exposed to liquidity risk and may lack sufficient liquidity to meet its daily payment obligations or may incur increased refinancing costs.

In particular in its financial institutions, Deutsche Börse Group may in the future lack sufficient liquidity to meet its daily payment obligations or may incur increased refinancing costs in the event of liquidity shortages. Deutsche Börse Group manages liquidity risk by matching the duration of investments and liabilities, restricting investments in potentially illiquid or volatile asset classes, pledging securities received with central banks and maintaining sufficient financing facilities to overcome unexpected demands for liquidity. Credit lines are also available to Deutsche Börse Group to provide additional liquidity should it be needed. Nevertheless, Deutsche Börse Group cannot guarantee that current liquidity levels and contingency credit lines will be adequate in every event of liquidity shortage. A future lack of sufficient liquidity to close out open positions could have a material adverse effect on Deutsche Börse Group's business and cash flows, financial condition and results of operations.

Deutsche Börse Group's earnings may be impacted by factors beyond its control, and if Deutsche Börse Group's goodwill or intangible assets become impaired, Deutsche Börse Group may be required to record a significant charge to earnings.

In addition to the results of operations of Deutsche Börse Group, its earnings may be impacted by matters other than its normal operations. Under IFRS, Deutsche Börse Group reviews its amortizable intangible assets for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable. Goodwill and other indefinite-lived intangible assets are tested for impairment at least annually, and are also tested when factors arise that may be considered a change in circumstances indicating that the carrying value of the goodwill or intangible assets may not be recoverable, such as a decline in stock price and market capitalization, reduced future cash flow estimates, and slower growth rates in its businesses. Deutsche Börse Group cannot guarantee that impairment charges will not be necessary on goodwill or other intangible assets on any future balance sheet date particularly in the event of a substantial deterioration of Deutsche Börse Group's future prospects or general economic conditions.

If impairment charges occur, this could have a material adverse effect on Deutsche Börse Group's business, financial condition and results of operations.

Liquidity shortages due to the economic conditions could limit Deutsche Börse Group's ability to implement its business initiatives.

In the past, companies in many different industries found it difficult to borrow money from banks and other lending sources, and also experienced difficulty raising funds in the capital markets. While access to credit markets has improved, several European states are facing concerns regarding their ability to service and/or refinance their sovereign debt. As a consequence, credit ratings have been downgraded concerning both, sovereign states and major financial institutions. The resulting ongoing upheaval in the credit markets continues to impact the economy. While Deutsche Börse Group has not experienced reductions in their borrowing capacity, lenders in general have taken actions that indicate their concerns regarding liquidity in the marketplace. These actions have included reduced advance rates for certain security types, more stringent requirements for collateral eligibility and higher interest rates. Should lenders continue to take additional similar actions, the cost of conducting Deutsche Börse Group's businesses may increase and Deutsche Börse Group's ability to implement its business initiatives could be limited. In addition, Deutsche Börse Group's ability to raise financing could be impaired if rating agencies, lenders or investors develop a negative perception of its financial prospects, or of prospects for the industries in which it operates, which could have a material adverse effect on Deutsche Börse Group's business and cash flows, financial condition and results of operations.

Future acquisitions, partnerships and joint ventures that Deutsche Börse Group undertakes may require significant resources and/or result in significant unanticipated costs or liabilities or fail to deliver anticipated benefits.

In addition to the ISS Acquisition (as defined below), Deutsche Börse Group may also seek to grow its business by making other acquisitions or entering into partnerships or joint ventures and other strategic investments or alliances, some of which may be material. The market for acquisition targets and strategic alliances is highly competitive, particularly in respect of the size of potential acquisition targets due to the increasing consolidation in the industry, which could adversely affect Deutsche Börse Group's ability to find acquisition targets or strategic partners consistent with its objectives. In pursuing its strategy Deutsche Börse Group routinely engages in discussions with industry participants regarding potential strategic transactions and monitors the market for potential acquisition targets to further its business and such transactions may be entered into by Deutsche Börse Group depending on available market opportunities, including in the short and medium term.

Such transactions may be financed by the issuance of additional securities, or the incurrence of indebtedness, taking loans or any combination thereof. Market conditions may limit Deutsche Börse Group's ability to use its shares as an acquisition currency. In addition, some of its business areas are subject to minimum regulatory capital requirements which may constrain its ability to use its available capital resources to finance potential acquisitions and to pursue debt financed acquisitions. Deutsche Börse Group could face financial risks associated with incurring indebtedness. In addition, acquisitions, partnerships and joint ventures may require significant managerial attention, which may be diverted from Deutsche Börse Group's other operations. These and other factors may adversely affect its ability to identify acquisition targets or strategic partners consistent with its objectives or may make it less attractive as an acquirer or strategic partner.

There can be no assurance that Deutsche Börse Group will be able to complete any business combination, acquisition, partnership, joint venture, strategic investment or alliance that it announces. Completion of these transactions is usually subject to closing conditions, including approvals from or conditions imposed by national regulatory authorities, over which Deutsche Börse Group has limited or no control and where there may be duplicative or inconsistent requirements or conditions imposed by different national regulatory authorities. Moreover, Deutsche Börse Group's competitors could merge, making it more difficult for Deutsche Börse Group to find appropriate entities to acquire or merge with and making it more difficult to compete in its industry due to the increased resources of its merged competitors.

There can be no assurance that Deutsche Börse Group will realise the anticipated benefits of any transaction it undertakes, such as any expected cost savings, growth opportunities, synergies or improvements in its competitive profile. A variety of factors, including unanticipated difficulties integrating or developing its existing technology platforms or regulatory changes, competitive developments, labour conflicts, litigation, currency fluctuations and inflation, may adversely affect any anticipated cost savings, revenue potential or other anticipated benefits. The anticipated benefits of a particular transaction may not be realised fully, if at all, or may take longer to realise than expected.

In addition, in connection with any such transaction, Deutsche Börse Group may expend cash, incur debt, assume contingent liabilities or incur other expenses, any of which could harm its business, financial condition or operating results. There can be no assurance that any such financing will be available or that the terms of such financing will be favourable to Deutsche Börse Group.

As a result of any acquisition, Deutsche Börse Group may assume existing or pending litigation or create additional expenses related to amortising intangible assets with estimable useful lives, any of which could harm its business, financial condition or results of operations and negatively impact its share price.

These capital and managerial commitments may impair the operation of Deutsche Börse Group's business. Furthermore, any future acquisitions or partnerships could entail a number of additional risks, including increased regulation and exposure to unanticipated liabilities, all of which could have a material adverse effect on Deutsche Börse Group's business and cash flows, financial condition and results of operations.

Additional Risks relating to the ISS Acquisition

The benefits that Deutsche Börse Group may realize from the ISS Acquisition could be materially different from Deutsche Börse Group's expectations.

On 17 November 2020, Deutsche Börse announced that it will acquire a majority share of approximately 80% in Institutional Shareholder Services Inc. ("**ISS**"), valuing ISS at USD 2,275 million (EUR 1,925 million) for 100% of the business (cash and debt free). Together, the current majority shareholder of ISS, Genstar Capital LLC, and the current management of ISS will continue to hold a stake of approximately 20%. The transaction is expected to close in the first half of 2021 subject to customary closing conditions and regulatory approvals (the "**ISS Acquisition**"). The ISS Acquisition will be financed by Deutsche Börse through the issuance of the Notes and the remainder with own cash.

In the assessment of Deutsche Börse, ISS is a global leading governance, "environmental, social, and corporate governance" ("**ESG**") data and analytics provider. As of the date of this Prospectus, ISS has more than 2,000 employees worldwide across more than 30 global offices in 15 countries.

For further information on the ISS Acquisition, please refer to the section "*Description of the Issuer and Deutsche Börse Group – Recent Events – The ISS Acquisition*".

Like any M&A transaction of this scale, the ISS Acquisition involves a number of risks, including, but not limited to:

- unexpected losses of key employees of ISS;
- changes in the applicable regulatory framework;
- extraordinary or unexpected legal, regulatory, contractual or other costs;
- challenges in managing the increased scope, geographic diversity and complexity of operations, including expansion of footprint in India and the Philippines;
- mitigating contingent and/or assumed liabilities;
- the possible loss of customers and/or other business partners;
- control issues as Deutsche Börse will not be able to exercise sole control of ISS.

Deutsche Börse Group may not be able to realise the anticipated synergies, future earnings, transfer of know-how or other benefits that it intends to achieve from the ISS Acquisition. Deutsche Börse cannot guarantee that the acquisition will yield benefits that are sufficient to justify the expenses Deutsche Börse Group will incur. In addition, Deutsche Börse may not be successful in consummating the ISS Acquisition. In this case, the expenses incurred would not realize the anticipated benefits for Deutsche Börse Group.

Please also refer to the risk factor *"Future acquisitions, partnerships and joint ventures that Deutsche Börse Group undertakes may require significant resources and/or result in significant unanticipated costs or liabilities or fail to deliver anticipated benefits"* above.

The materialisation of any of the risks described above could have material adverse effects on the business, financial condition and results of operations of Deutsche Börse Group.

There can be no guarantee that Deutsche Börse had access to all relevant information at the time of the investment decision for the ISS Acquisition.

Although Deutsche Börse was able to inspect and review internal documents of ISS and speak to key employees of the company in preparation of the acquisition process (customary due diligence for a transaction of this type and size), there can be no guarantee that Deutsche Börse had access to all relevant information at the time of the investment decision. The valuation of ISS and the determination of the offered cash amount per ISS share was based on certain assumptions and the information available to Deutsche Börse at the time and it cannot be ruled out that these assessments prove to be erroneous or incorrect, which could have a material adverse effect on the business, financial condition and results of operations of the Group.

Risks relating to the Notes

The risk factors in this section are categorised as follows:

- Risk associated with the Characteristics of the Notes
- Risks related to Interest Payments
- Risks associated with the Solvency of the Issuer
- Other Risks related to the Notes

When a risk factor is relevant in more than one category, such risk factor is presented only under the category deemed to be the most relevant for such risk factor. The most significant risk factor under each category is presented first. The other risk factors are not ordered by significance or probability of the risk being materialised. The significance is assessed mainly on the basis of two criteria, (i) the probability that the risk will materialise and (ii) the magnitude of the negative effect the materialised risk may have on any investor.

Risks associated with the Characteristics of the Notes

Risks related to the Nature of the Notes as Long-Term Securities

The Issuer will redeem (i) the 2026 Notes on 22 February 2026 (the **"2026 Notes Maturity Date"**) and (ii) the 2031 Notes on 22 February 2031 (the **"2031 Notes Maturity Date"**), unless they have been previously redeemed or repurchased and cancelled.

The Noteholders will only be entitled to request a redemption of their Notes prior to the respective maturity date upon occurrence of a Change of Control Event or an event of default (as described in the Terms and Conditions).

Application has been made to the Frankfurt Stock Exchange for the Notes to be listed on the Frankfurt Stock Exchange and to be traded on the regulated market of the Frankfurt Stock Exchange. Application has also been made to the Luxembourg Stock Exchange for the Notes to be admitted to the Official List and to be admitted to trading on the Luxembourg Stock Exchange's regulated market. However, there is a risk that no liquid secondary market for the Notes will develop or, if it does develop, that it will not continue. The fact that the Notes will be listed does not necessarily lead to greater liquidity as compared to unlisted notes. The liquidity of each Series of Notes may also be subject to fluctuations during the term of each Series of Notes and may deteriorate, in particular as a result of repurchases and redemptions. In an illiquid market, a Noteholder is subject to the risk that it will not be able to sell its Notes at any time at fair market prices.

Prospective investors should be aware that they may be required to bear the financial risk of an investment in the Notes of any Series until their respective maturity date and may not recover their investment before the end of this period.

Risks related to a possible Early Redemption of the Notes by the Issuer, in particular upon occurrence of a Transaction-related Event

The Issuer may, at its option, call and redeem each Series of Notes at their relevant Trigger Call Redemption Amount (as specified in the Terms and Conditions), upon publication, within the Transaction Notice Period (as specified in the Terms and Conditions), of a notice stating that the Transaction has been terminated prior to its completion or that the Transaction will not be settled for any reason whatsoever or that the Issuer has publicly stated that it no longer intends to pursue the Transaction. For the purposes of this provision, "**Transaction**" is defined as the acquisition by Deutsche Börse Group of a majority share of approximately 80% in Institutional Shareholder Services Inc.

Further, the Issuer may, at its option, call and redeem each Series of Notes at their principal amount on each Business Day in a three-month period prior to the respective maturity date of the relevant Series of Notes.

In addition, the Issuer may, at its option, call and redeem each Series of Notes at their principal amount at any time upon occurrence of certain changes in taxation or if 80 per cent. or more in principal amount of the relevant Series of Notes initially issued have been redeemed or purchased.

Finally, the Issuer may, at its option, call and redeem each Series of Notes at any time at their respective Make-Whole Redemption Amount (as defined and further described in the Terms and Conditions).

In the event that the Issuer exercises the option to call and redeem any Series of Notes, the Noteholders of such Series of Notes might suffer a lower than expected yield and might not be able to reinvest the funds on the same terms.

Risks related to the Effective Subordination of the Notes

The Terms and Conditions only require the Issuer to secure the Notes equally if the Issuer or any of its Material Subsidiaries (as defined in the Terms and Conditions) provides security for the benefit of other Capital Market Indebtedness (as defined in the Terms and Conditions). Furthermore, there are substantial carve-outs and exemptions from this undertaking.

To the extent the Issuer or any of its subsidiaries provide security interests over their respective assets for the benefit of (a) Capital Market Indebtedness in line with such carve-outs and exemptions or (b) other indebtedness, in both cases without also securing the Notes, the Notes will be effectively junior to such debt to the extent of such assets.

As a result of the foregoing, holders of (present or future) secured debt of the Issuer or any of its subsidiaries may recover disproportionately more on their claims than the Noteholders in an insolvency, bankruptcy or similar proceeding. The Issuer may not have sufficient assets remaining to make payments under the Notes.

Risks related to Interest Payments

Risks related to Fixed Interest Rate Notes

The 2031 Notes bear interest at a fixed rate. The interest rate for the 2026 Notes was fixed at 0.000% *per annum*, this means that there will not be any periodic payments of interest on the 2026 Notes.

A holder of a fixed interest rate note is exposed to the risk that the price of such note may fall because of changes in the market interest rate. While the nominal interest rate of a fixed interest rate note is fixed during the life of such note or during a certain period of time, the current interest rate on the capital market (market interest rate) typically changes on a daily basis. As the market interest rate changes, the price of such note changes in the opposite direction. If the market interest rate increases, the price of such note typically falls, until the yield of such note is approximately equal to the market interest rate. If the market interest rate falls, the price of a fixed interest rate note typically increases, until the yield of such note is approximately equal to the market interest rate. Noteholders should be aware that movements of the market interest rate can adversely affect the market price of the Notes and can lead to losses for the Noteholders if they sell their Notes.

Risks associated with the Solvency of the Issuer

Risk of a Partial or Total Failure of the Issuer to make Interest and/or Redemption Payments

The Notes are unsecured obligations of the Issuer.

Any person who purchases the Notes is relying on the creditworthiness of the Issuer. Noteholders are subject to the risk of a partial or total failure of the Issuer to make interest (in case of the 2031 Notes) and/or redemption payments that the Issuer is obliged to make under the Notes. A materialisation of the credit risk (for example, because of the materialisation of any of the risks regarding the Issuer and Deutsche Börse Group described above) may result in partial or total failure of the Issuer to make interest (in case of the 2031 Notes) and/or redemption payments under the Notes.

Risks related to Structural Subordination

In the event of a liquidation or an insolvency or similar proceeding of any of the Issuer's subsidiaries, such subsidiary will pay the holders of its own debt (including holders of third-party debt which such subsidiary has guaranteed) and its trade creditors before it would be able to distribute any of its assets to its shareholder (i.e. ultimately, the Issuer). As a result of the foregoing, the Issuer may not have sufficient assets to make payments on the Notes.

Risk of a potential Decrease in the Market Value of the Notes

If the likelihood that the Issuer will be in a position to perform all obligations under the Notes in full when they fall due decreases, for example, because of the materialisation of any of the risks regarding the Issuer and Deutsche Börse Group described above, the market value of the Notes will suffer. In addition, even if the likelihood that the Issuer will be in a position to perform all obligations under the Notes when they fall due actually has not decreased, market participants could nevertheless have a different perception. If any of these risks occurs, third parties would only be willing to purchase Notes for a lower price than before the materialisation of the mentioned risk. Under these circumstances, the market value of the Notes is likely to decrease.

Other Risks related to the Notes

Risks in connection with the Application of the German Act on Issues of Debt Securities (Gesetz über Schuldverschreibungen aus Gesamtemissionen, "SchVG")

Since the Terms and Conditions provide for meetings of Noteholders or the taking of votes without a meeting, the Terms and Conditions may be amended by majority resolution of the Noteholders of such Series of Notes and a Noteholder is subject to the risk of being outvoted by a majority resolution of the Noteholders. The rules pertaining to resolutions of Noteholders are set out in the SchVG and are largely mandatory. Pursuant to the SchVG the relevant majority for Noteholders' resolutions is generally based on votes cast, rather than on the aggregate principal amount of the Series of Notes outstanding, therefore, any such resolution may effectively be passed with the consent of less than a majority of the aggregate principal amount of the Series of Notes outstanding. As such majority resolution is binding on all Noteholders of such Series of Notes, certain rights of a Noteholder against the Issuer under the Terms and Conditions of the relevant Series of Notes may be amended or reduced or even cancelled.

Since the Terms and Conditions provide that the Noteholders are entitled to appoint a Noteholders' Representative for each Series of Notes by a majority resolution of such Noteholders of such Series, it is possible that a Noteholder may be deprived of its individual right to pursue and enforce its rights under the Terms and Conditions of the relevant Series of Notes against the Issuer, such right passing to the Noteholders' Representative who is then exclusively responsible to claim and enforce the rights of all the Noteholders of such Series of Notes.

Risks in respect of credit ratings

Credit rating agencies are expected to assign credit ratings to the Notes. The credit ratings of the Notes may not reflect the potential impact of all risks related to the structure, market, additional risk factors discussed herein and other factors that may affect the value of the Notes. In general, European Union and UK regulated investors are restricted from using a rating for regulatory purposes if such rating is not issued by a credit rating agency established in the European Union

or in the UK and registered under Regulation (EC) No 1060/2009 of the European Parliament and of the Council of 16 September 2009 on credit rating agencies, as amended (the "**CRA Regulation**") (as applicable in the UK by forming part of domestic law by virtue of the European Union (Withdrawal) Act 2018) unless the rating is provided by a credit rating agency operating in the European Union or in the UK before 7 June 2010 which has submitted an application for registration in accordance with the CRA Regulation and such registration has not been refused. If the status of the credit rating agency changes, European Union and UK regulated investors may no longer be able to use the rating for regulatory purposes and the Notes may have a different regulatory treatment. This may result in European Union and UK regulated investors selling the Notes which may impact the value of the Notes and any secondary market. A credit rating is not a recommendation to buy, sell or hold securities and may be revised, suspended or withdrawn by the credit rating agency at any time. No assurance can be given that a credit rating will remain constant for any given period of time or that a credit rating will not be reduced or withdrawn entirely by the credit rating agency if, in its judgment, circumstances so warrant. Rating agencies may also change their methodologies for rating securities in the future. Any change of the credit rating assigned or measures taken to the Notes by one or more of the credit rating agencies may adversely affect the cost and terms and conditions of the Group's financings and could adversely affect the value and trading of the Notes.

Dies gilt nicht insoweit, als die Dingliche Sicherheit für Kapitalmarktverbindlichkeiten eines Unternehmens bestellt ist, das mit der Emittentin verschmolzen oder von der Emittentin erworben worden ist und diese Sicherheit im Zeitpunkt der Verschmelzung oder des Erwerbs schon bestanden hat, nicht zum Zwecke der Finanzierung der Verschmelzung oder des Erwerbs eingeräumt wurde und nach der Verschmelzung oder dem

This does not apply to the extent any Encumbrance was created for any Capital Market Indebtedness of a company which has merged with the Issuer or which has been acquired by the Issuer, provided that such Encumbrance was already in existence at the time of the merger or the acquisition, was not created for the purpose of financing the merger or the acquisition and is not increased in amount and not extended following the merger or the acquisition.

- (b) Solange Schuldverschreibungen noch ausstehen (aber nur bis zu dem Zeitpunkt, in dem alle Beträge an Kapital und Zinsen der Hauptzahlstelle zur Verfügung gestellt worden sind), verpflichtet sich die Emittentin – soweit ihr dies rechtlich möglich ist – weiter sicherzustellen, dass ihre Wesentlichen Tochtergesellschaften ihr gegenwärtiges oder zukünftiges Vermögen weder ganz noch teilweise mit Dinglichen Sicherheiten zur Besicherung von gegenwärtigen oder zukünftigen Kapitalmarktverbindlichkeiten der jeweiligen Wesentlichen Tochtergesellschaft oder eines Dritten belasten oder solche Dinglichen Sicherheiten zu einem solchen Zweck bestehen lassen, ohne gleichzeitig die Anleihegläubiger an derselben Dinglichen Sicherheit in gleicher Weise und im gleichen Verhältnis teilnehmen zu lassen.. Dies gilt nicht insoweit, als die Dingliche Sicherheit für Kapitalmarktverbindlichkeiten einer bereits vorhandenen Tochtergesellschaft bestellt ist, die während der Laufzeit der Schuldverschreibungen Wesentliche Tochtergesellschaft wird und diese Dingliche Sicherheit zu diesem Zeitpunkt schon bestanden hat und danach in ihrem Umfang nicht erweitert und nicht verlängert wird. Satz 1 dieses § 3(2)(b) gilt ferner nicht insoweit, als die Dingliche Sicherheit für Kapitalmarktverbindlichkeiten eines Unternehmens bestellt ist, das mit der Wesentlichen Tochtergesellschaft verschmolzen oder von der Wesentlichen Tochtergesellschaft erworben worden ist und diese Sicherheit im Zeitpunkt der Verschmelzung oder des Erwerbs schon bestanden hat, nicht zum Zwecke der Finanzierung der Verschmelzung oder des Erwerbs eingeräumt wurde und nach der Verschmelzung oder dem Erwerb in ihrem Umfang nicht erweitert und nicht verlängert wird.

- (b) So long as any Notes remain outstanding, but only up to the time all amounts of principal and interest have been placed at the disposal of the Principal Paying Agent, the Issuer further undertakes to procure to the extent legally possible, that its Material Subsidiaries will not create or permit to subsist any Encumbrance upon any or all of its present or future assets to secure any present or future Capital Market Indebtedness of the relevant Material Subsidiary or any third party without having the Noteholders at the same time share equally and rateably in such Encumbrance. This does not apply to the extent any Encumbrance was created for any Capital Market Indebtedness of an existing subsidiary which becomes a Material Subsidiary during the term of the Notes, provided that such Encumbrance was already in existence at this time and is not increased in amount and not extended. Furthermore, sentence 1 of this § 3(2)(b) does not apply to the extent any Encumbrance was created for any Capital Market Indebtedness of a company which has merged with the Material Subsidiary or which has been acquired by the Material Subsidiary, provided that such Encumbrance was already in existence at the time of the merger or the acquisition, was not created for the purpose of financing the merger or the acquisition and is not increased in amount and not extended following the merger or the acquisition.

§ 4 ZINSEN

(1) Verzinsung und Zinszahlungstage.

Vorbehaltlich einer vorzeitigen Rückzahlung gemäß diesen Anleihebedingungen werden die Schuldverschreibungen bezogen auf ihren Nennbetrag verzinst, und zwar ab dem 22. Februar 2021 (einschließlich) (der "**Zinslaufbeginn**") bis zum Endfälligkeitstag (ausschließlich) mit jährlich 0,125 %. Die Zinsen sind nachträglich am 22. Februar eines jeden Jahres zahlbar (jeweils ein "**Zinszahlungstag**"). Die erste Zinszahlung erfolgt am 22. Februar 2022.

(2) Auflaufende Zinsen.

Falls die Emittentin die Schuldverschreibungen bei Fälligkeit nicht einlöst, endet die Verzinsung der Schuldverschreibungen nicht am Tag der Fälligkeit, sondern erst zu dem Zeitpunkt, an dem Kapital und Zinsen aus oder im Zusammenhang mit den Schuldverschreibungen dem Clearingsystem zur Verfügung gestellt worden sind. Die Verzinsung des ausstehenden Nennbetrages ab dem Tag der Fälligkeit (einschließlich) bis zum Tag der Rückzahlung der Schuldverschreibungen (ausschließlich) erfolgt zum gesetzlich festgelegten Satz für Verzugszinsen.¹

(3) Zinstagequotient.

Sofern Zinsen für einen Zeitraum berechnet werden, der gleich lang oder kürzer als eine Zinsperiode ist, entspricht der zu verwendende "**Zinstagequotient**" der tatsächlichen Anzahl von Tagen im jeweiligen Zeitraum, berechnet ab dem Datum, ab dem die Zinsen auflaufen (einschließlich), bis zu dem Datum, an dem sie fällig werden (ausschließlich), dividiert durch die tatsächliche Anzahl von Tagen in der Zinsperiode, in welche der jeweilige Zeitraum fällt (einschließlich des ersten jedoch ausschließlich des letzten solchen Tages).

§ 4 INTEREST

(1) Interest and Interest Payment Dates.

Unless previously redeemed in accordance with these Terms and Conditions, the Notes shall bear interest on their Principal Amount at the rate of 0.125 per cent. per annum from and including 22 February 2021 (the "**Interest Commencement Date**") to, but excluding, the Maturity Date. Interest shall be payable in arrear on 22 February in each year (each such date, an "**Interest Payment Date**"). The first payment of interest shall be made on 22 February 2022.

(2) Accrual of interest.

If the Issuer shall fail to redeem the Notes when due, interest shall continue to accrue on the outstanding Principal Amount of the Notes at the default rate of interest established by law from and including the due date to but excluding such date as principal and interest on or in connection with the Notes has been placed at the disposal of the Clearing System.²

(3) Day Count Fraction.

Where interest is to be calculated for a period which is equal to or shorter than an Interest Period, the "**Day Count Fraction**" used will be the number of days in the relevant period, from and including the date from which interest begins to accrue to but excluding the date on which it falls due, divided by the actual number of days in the Interest Period in which the relevant period falls (including the first such day but excluding the last).

¹ Der gesetzliche Verzugszins beträgt für das Jahr fünf Prozentpunkte über dem von der Deutschen Bundesbank von Zeit zu Zeit veröffentlichten Basiszinssatz, §§ 288 Absatz 1, 247 BGB.

² The default rate of interest established by law is five percentage points above the basic rate of interest published by Deutsche Bundesbank from time to time, §§ 288 paragraph 1, 247 German Civil Code (*Bürgerliches Gesetzbuch*).

Any such notice shall be given in accordance with § 11. It shall be irrevocable, must specify the date fixed for redemption and must set forth a statement in summary form of the facts constituting the basis for the right of the Issuer so to redeem.

A "**Gross-up Event**" will occur if an opinion of a recognised law firm has been delivered to the Issuer (the Issuer shall provide the Principal Paying Agent with a copy thereof) stating that, as a result of any change in, or amendment or clarification to, the laws, regulations or other rules of the Federal Republic of Germany, any of its political subdivisions or any

If the Issuer exercises its call right in accordance with sentence 1, the Issuer shall redeem the Notes at their Principal Amount together with accrued interest, if any, to but excluding the specified redemption date on the redemption date specified in the notice.

Any such notice shall be given in accordance with § 11. It shall be irrevocable, must specify the date fixed for redemption and must set forth a statement in summary form of the facts constituting the basis for the right of the Issuer so to redeem.

The "**Benchmark Yield**" means the yield at the Redemption Calculation Date of the corresponding Bundesanleihe 0 per cent. due 15 August 2030, ISIN: DE0001102507, and if such yield is not available at that time the Benchmark Yield shall be the yield of a substitute benchmark security chosen by the Calculation Agent, in each case as having a maturity comparable to the remaining term of the Notes to the Maturity Date, that would be used at the time of selection and in accordance with customary financial practice, in pricing new issues of corporate debt securities of comparable maturity to the Maturity Date.

Business Overview, Objectives and Strategies

Overview

According to the assessment of the Issuer, Deutsche Börse Group is one of the largest market infrastructure providers worldwide. Deutsche Börse Group offers its customers a wide range of products and services, which cover the entire financial market transactions value chain – from trading, through transaction clearing and settlement, securities custody, services for liquidity and collateral management and the provision of market information, down to the development and operation of IT systems that support all these processes.

¹ S&P Global Ratings defines "AA" as follows: An obligor rated "AA" has very strong financial security characteristics, differing only slightly from those rated higher. S&P Global Ratings rating scale for the long-term credit ratings consists of the following categories: "AAA", "AA", "A", "BBB", "BB", "B", "CCC", "CC" (in descending order). Ratings from "AA" to "CCC" may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories. The rating outlook also assesses the potential direction of a long-term credit rating over the intermediate term (typically six months to two years), where "stable" means that a rating is not likely to change.

² S&P Global Ratings rating scale for the short-term issue credit ratings goes from A-1 to D. An "A-1" rating means that the obligor's capacity to meet its financial commitment on the obligation is strong. Within the A-1 category it can be designated with a plus sign (+). This indicates that the issuer's commitment to meet its obligation is very strong.

³ The European Securities and Markets Authority publishes on its website (<https://www.esma.europa.eu/supervision/credit-rating-agencies/risk>) a list of credit rating agencies registered in accordance with the CRA Regulation. Objectives and Strategies

The goal of Deutsche Börse Group as a global market infrastructure provider is to contribute to the capital markets' stability, efficiency and integrity. Deutsche Börse Group believes that this benefits issuers in the form of low costs of raising capital and investors in the form of high liquidity and low transaction costs. At the same time, Deutsche Börse Group aims to stand for transparent, secure capital markets in which organised trading is based on free price formation.

Deutsche Börse Group believes that its business model is geared towards a diversified product and service offer that covers the entire value chain of financial market transactions. The diversified business model is based on the following key principles:

- Integrating different financial market services such as trading, clearing, settlement, securities custody, liquidity and collateral management, as well as index, analytics and market data services
- Providing these services for various asset classes such as equities, bonds, funds, commodities, foreign exchange, interest rates, and derivatives products based on these underlyings
- Developing and operating proprietary electronic systems for all processes along the value creation chain
- Organising an impartial marketplace to ensure orderly, supervised trading with fair price formation, plus providing risk management services

For the period from 2017 to 2020, Deutsche Börse Group had set itself ambitious goals in its "Roadmap 2020" strategy. For this period, Deutsche Börse Group targeted secular growth of over 5% per year, the completion of multiple M&A transactions in focus areas, investments in new technology (such as the "cloud" and distributed ledger technology), a reduction of structural costs by around EUR 100 million and a strengthened execution discipline. In the assessment of Deutsche Börse Group all strategic targets included in the "Roadmap 2020" have been achieved.

In order to maintain and expand its leading position among exchange organisations, Deutsche Börse Group is now pursuing the "Compass 2023" growth strategy. To achieve this strategic objective, Deutsche Börse Group is focusing on generating structural, organic growth, while at the same time accelerating non-organic growth through acquisitions in five defined business areas – namely Data/Index, Commodities, Foreign Exchange, Fixed Income and Investment Funds. In addition, Deutsche Börse Group continues to strengthen and further expand its position in the IT area.

As part of an ongoing process, Deutsche Börse Group is reviewing its organic growth initiatives, focusing in particular on expansion into markets and asset classes characterised by structural growth, while attaching great importance to ensuring that the initiatives launched are implemented in a consistent, successful manner. As far as external growth opportunities are concerned, the focus is on strengthening existing high-growth areas, and on exploring new asset classes and services.

Despite its growth ambition, the Group recorded relatively low capital expenditures (3-year average: approximately EUR 180 million per year).

Growth Initiatives

Major growth initiatives of the Group include:

- Eurex (financial derivatives) segment: Product innovation to support futurization (e.g. total return and dividend futures) and to address accelerated buy-side demand (e.g. MSCI derivatives), establishment of a liquid EU-based OTC clearing alternative.

Net revenue in the IFS segment is largely a function of the value of assets under custody and the number of transactions.

Following the acquisition of Swisscanto Funds Centre Ltd. at the end of 2018, the rollout of distribution support services launched in mid-2019 progressed as scheduled. Among others, the functionalities of the Fund Desk distribution support service were enhanced and fully integrated into the IFS product range. In July 2019, STOXX Ltd. announced that it had been recognised as administrator according to Article 32 of the Benchmark Regulation. This recognition means that indices managed by STOXX are now included in the register of administrators established and maintained by ESMA pursuant to Article 36 of the Benchmark Regulation. To achieve synergies in Deutsche Börse Group's index business, Deutsche Börse has decided to transfer the administration (as defined in the Benchmark Regulation) of its indices (DAX, eb.rexx etc.) to STOXX Ltd.

Net revenue from analytics of EUR 25.8 million, reported for the first time in the financial year 2019, reflects the new business generated by the merger with Axioma in portfolio management and risk analytics software. Revenue relates to the period since the acquisition was completed (13 September 2019).

According to its unaudited preliminary results (new reporting structure), the Qontigo (index and analytics business) segment contributed EUR 248.1 million to Deutsche Börse Group net revenues in the financial year 2020.

Principal Markets

As a stock exchange organisation and transaction service provider which supports capital market infrastructure through the development and operation of electronic data processing systems, Deutsche Börse Group offers its customers access to the international capital markets. This business objective puts it in competition with on- and off-exchange marketplace operators in London, Paris, Chicago and New York, among others.

In cash trading, Deutsche Börse operates the Frankfurter Wertpapierbörse (Frankfurt Stock Exchange) with the trading venues Xetra and Börse Frankfurt. Additionally, it holds approx. 60% in Tradegate Exchange GmbH which operates Tradegate Exchange. According to the assessment of Deutsche Börse, these three venues comprise by far the largest portion of cash trading on German stock exchanges. In Europe, Deutsche Börse Group considers itself among the leading stock exchanges, others being Cboe Europe Equities ("CBOE"), London Stock Exchange Group or Euronext.

In the derivatives market, Eurex operates a very liquid derivatives market in trading and clearing of futures and options, along with ICE Futures Europe ("ICE"), CME Group ("CME") and CBOE. According to its own assessment, Eurex Clearing AG is one of the leading central counterparties globally. In OTC derivatives, Eurex is active in a market alongside CME, ICE and LCH Group.

According to its own assessment, Clearstream, whose major competitor in supplying ICSD services is Euroclear Bank SA/NV, is one of the leading providers of settlement and custody services for internationally traded bonds and equities. It offers its services in more than 50 markets worldwide.

Employees

As of 31 December 2020, Deutsche Börse Group had 7,238 (2019: 6,775) employees having 110 nationalities, at 43 locations in 28 countries, while the average number of employees in 2020 was 6,996 (2019: 6,286).

Litigation

Deutsche Börse Group is currently party to a number of legal proceedings within the normal course of its business. The following is an overview of significant legal proceedings as of the date of this Prospectus. Except for the proceedings cited in this section, there are no governmental, legal or arbitration proceedings (including any such proceedings pending

or threatened, of which Deutsche Börse is aware), nor have there been proceedings during the previous 12 months, which may have or have had in the recent past material effects on the Issuer's financial position or profitability.

Peterson vs Clearstream Banking S.A., Citibank NA et al. ("Peterson I") and Heiser vs Clearstream Banking S.A.

In its 2012 corporate report, Deutsche Börse Group informed about proceedings, Peterson vs Clearstream Banking S.A., the first Peterson proceeding, initiated by various plaintiffs seeking turnover of certain customer positions held in Clearstream Banking S.A.'s securities omnibus account with its US depository bank, Citibank NA, and asserting direct claims against Clearstream Banking S.A. for damages of USD 250 million. That matter was settled between Clearstream Banking S.A. and the plaintiffs and the direct claims against Clearstream Banking S.A. were abandoned.

In July 2013, the US court ordered turnover of the customer positions to the plaintiffs, ruling that these were owned by Bank Markazi, the Iranian central bank. Bank Markazi appealed, and the decision was affirmed on 9 July 2014 by the Second Circuit Court of Appeals, and then by the US Supreme Court on 20 April 2016. Once the process of distribution of funds to the plaintiffs is complete, a related case, Heiser vs Clearstream Banking S.A., also seeking turnover of the same assets, should be dismissed.

Peterson vs Clearstream Banking S.A. ("Peterson II")

On 30 December 2013, a number of US plaintiffs from the first Peterson case, as well as other plaintiffs, filed a complaint in the USA targeting restitution of certain assets that Clearstream Banking S.A. holds as a custodian in Luxembourg. In 2014, the defendants in this action, including Clearstream Banking S.A., moved to dismiss the case. On 19 February 2015, the US court issued a decision granting the defendants' motions and dismissing the lawsuit. The plaintiffs lodged an appeal against this ruling at the competent appeals court (Second Circuit Court of Appeals), which on 21 November 2017 confirmed large portions of the decision of the court of first instance. The appeals court referred the case back to the court of first instance regarding another aspect, asking the court to assess whether the assets held in Luxembourg are subject to execution in the USA. Clearstream Banking S.A. filed a petition against this ruling with the US Supreme Court on 8 May 2018. The US Supreme Court decided on 13 January 2020 to refer the Peterson II case back to the appeals court for consideration in the light of new US legislation. The appeals court subsequently referred the case back to the court of first instance. On 12 August 2020, the plaintiffs filed a motion for a summary decision with the court of first instance. Alternatively, the plaintiffs are requesting a preliminary court decision ordering the transfer to the USA of the assets at issue held by Clearstream Banking S.A. as custodian.

Havlish vs Clearstream Banking S.A. ("Havlish")

On 14 October 2016, a number of plaintiffs filed a complaint in the USA naming Clearstream Banking S.A. and other entities as defendants. The complaint in this proceeding, Havlish vs Clearstream Banking S.A., is based on similar assets and allegations as in the Peterson proceedings. The complaint seeks turnover of certain assets that Clearstream Banking S.A. holds as a custodian in Luxembourg. The complaint also asserts direct claims against Clearstream Banking S.A. and other defendants and purports to seek damages of up to approximately USD 6.6 billion plus punitive damages and interest. On 12 October 2020, an amended complaint was filed in this matter aimed at joining further plaintiffs to the action. As a result, additional direct claims are asserted against Clearstream Banking S.A. and the other defendants for damages of up to around USD 3.3 billion (plus punitive damages and interest).

On 24 November 2020, the plaintiffs from the aforementioned Havlish case filed a complaint against Clearstream Banking S.A. and other defendants in Luxembourg as well. The complaint in essence is based on similar allegations as the Havlish case pending in the USA, and among others is asserting direct claims against Clearstream Banking S.A. in an amount of approximately USD 5.5 billion (plus interest).

Criminal investigations against Clearstream Banking S.A.

On 2 April 2014, Clearstream Banking S.A. was informed that the United States Attorney for the Southern District of New York has opened a grand jury investigation against Clearstream Banking S.A. due to Clearstream Banking S.A.'s conduct with respect to Iran and other countries subject to US sanction laws. Clearstream Banking S.A. is cooperating with the US attorney.

Bank Markazi vs Clearstream Banking S.A.

In the context of the ongoing disputes regarding assets of Bank Markazi, Clearstream Banking S.A. was served with a complaint of Bank Markazi on 17 January 2018 naming Banca UBAE S.P.A. and Clearstream Banking S.A. as defendants. The complaint filed before the Luxembourg courts primarily seeks the restitution of assets of Bank Markazi which the complaint alleges are held on accounts of Banca UBAE S.P.A. and Bank Markazi with Clearstream Banking S.A. totalling approximately USD 4.9 billion plus interest. Alternatively, Bank Markazi seeks damages to the same amount. The assets sought include assets that were previously transferred out of Clearstream Banking S.A. to Banca UBAE S.P.A. Furthermore, the complaint of Bank Markazi concerns assets of approximately USD 1.9 billion that were turned over to US plaintiffs pursuant to a 2013 binding and enforceable US court order in a proceeding to which Bank Markazi was a party (see *Peterson I* above). The lawsuit also concerns customer assets of approximately USD 2 billion, which includes assets held by Clearstream Banking S.A. that are currently subject to US and Luxembourg litigation brought by US plaintiffs (see, in particular, *Peterson II* above). In view of this, Bank Markazi by way of further proceedings pending in Luxembourg is seeking the declaration that Clearstream Banking S.A. shall, subject to penalties, be prohibited from transferring relevant assets to the USA. Until a decision in these proceedings, Clearstream Banking S.A. due to a preliminary injunction obtained by Bank Markazi is prohibited under penalty from transferring relevant assets to the USA. Clearstream Banking S.A. has filed a recourse with the Luxembourg Court of Cassation against the preliminary injunction.

The plaintiffs in the abovementioned Havlish case on 24 September 2020 made a formal intervention concerning the complaint by Bank Markazi of 17 January 2018. With this, the plaintiffs, among others, request that Clearstream Banking S.A. be ordered to pay an amount equivalent to US judgments obtained by the plaintiffs against Iran and Bank Markazi in the amount of approximately USD 6.6 billion (plus interest).

Banca UBAE S.p.A vs Clearstream Banking S.A.

On 15 June 2018, Banca UBAE S.p.A. filed a complaint against Clearstream Banking S.A. in front of the Luxembourg courts. This complaint is a recourse action related to the complaint filed by Bank Markazi against Clearstream Banking S.A. and Banca UBAE S.p.A. and asks that Banca UBAE S.p.A. be indemnified and held harmless by Clearstream Banking S.A. in the event that Banca UBAE S.p.A. loses the legal dispute brought by Bank Markazi and is ordered by the court to pay damages to Bank Markazi.

Levin vs. Clearstream Banking S.A.

On 26 December 2018, two US plaintiffs filed a complaint naming Clearstream Banking S.A. and other entities as defendants. The plaintiffs hold claims against Iran and Iranian authorities and persons amounting to approximately USD 28.8 million. The complaint in this case is based on similar assets and allegations as in the Peterson II case, and the Havlish case. The complaint seeks turnover of certain assets that Clearstream Banking S.A. holds as a custodian in Luxembourg. The complaint also asserts direct claims against Clearstream Banking S.A. and other defendants and seeks damages of up to approximately USD 28.8 million, plus punitive damages and interest.

Heiser vs Clearstream Banking S.A. (II)

On 4 December 2019, several US plaintiffs from the aforementioned Heiser vs Clearstream Banking S.A. case filed a new complaint naming Clearstream Banking S.A. and other entities as defendants. The plaintiffs hold claims against Iran and Iranian authorities and persons in excess of USD 500.0 million and are seeking turnover of Iranian assets.

Ofisi vs Clearstream Banking S.A.

On 26 August 2020, additional judgment creditors of Iran (the "**Ofisi plaintiffs**") filed a complaint in the USA, in which Clearstream Banking S.A. is also named as a defendant. The Ofisi plaintiffs obtained a court judgment in the USA against Iran and others in 2014, which awarded them damages totalling approximately USD 8.7 billion based on terrorist acts attributed to Iran and other entities. Based on this, the Ofisi plaintiffs are seeking turnover of assets that are alleged to be attributed to Bank Markazi and that are already the subject of actions brought by others against Clearstream Banking S.A. The Ofisi plaintiffs are also asserting claims directly against Clearstream Banking S.A. in an amount equal to the damage award plus punitive damages.

Fairfield

Starting on 16 July 2010, the insolvency administrators of Fairfield Sentry Ltd. and Fairfield Sigma Ltd., two funds domiciled on the British Virgin Islands, filed complaints in the US Bankruptcy Court for the Southern District of New York, asserting claims against more than 300 financial institutions for restitution of amounts paid to investors in the funds for redemption of units prior to December 2008. On 14 January 2011, the funds' insolvency administrators filed a court claim against Clearstream Banking S.A. for the restitution of USD 13.5 million in payments made for redemption of fund units, which the funds made to investors via the settlement system of Clearstream Banking S.A. The proceedings, which were suspended for several years, are ongoing.

Promesa

Among other legal disputes in connection with the bankruptcy of Puerto Rico case under PROMESA legislation, the legal committee of the Puerto Rican government initiated legal action in 2019 seeking to recover interest payments made from 2014 to 2017 to holders of government bonds (ERS and GO bonds) and company pension bonds. Clearstream Banking S.A. is named in this U.S. litigation and two actions have been filed against Clearstream Banking S.A. itself: one relating to payments in connection with the GO bond, the other to payments in connection with the ERS bond. The Puerto Rican government is claiming about USD 3.9 million for the GO bond and less than USD 16,000 for the ERS bond. Both actions (and all other similar litigation) have been suspended since July 2019.

Kapuas Prima

On 24 August 2020, Clearstream Banking S.A. was summoned in legal proceedings in Indonesia between PT Kapuas Prima Coal TBK and the principal defendant Horizonte Opportunities Fund SPC. Clearstream Banking S.A. is cited as a co-defendant in the proceedings. PT Kapuas Prima Coal TBK claims a breach of contract by ZINC shareholders and is seeking the return by means of blocking and seizure of ZINC shares it issued, which are currently deposited with the co-defendants' custodians (including Clearstream Banking S.A.). At the first hearing held in November 2020, the court noted it could dismiss the claim if the plaintiff is again not present at a hearing scheduled for April 2021.

MBB Clean Energy AG

Legal disputes have arisen regarding a bond issued by MBB Clean Energy AG ("**MBB**"), which is held in custody by Clearstream Banking AG. MBB issued the first tranche of the bond in April 2013 and the second tranche of the bond in December 2013. The global certificates for the two tranches were delivered to Clearstream Banking AG by the paying agent of the issuer. The legal disputes relate to the non-payment of the bond and the purported lack of validity of the bond. Clearstream Banking AG's role in the context of the purported lack of validity of the MBB bond is primarily to safekeep the global certificate as national central securities depository. Insolvency proceedings have meanwhile been opened in respect of the issuer, MBB. A buyer of an MBB Clean Energy AG (MBB) bond, which is held in custody by Clearstream Banking AG and was listed on the Frankfurt Stock Exchange, filed a lawsuit at a Dutch court concerning claims for damages against Clearstream Banking AG, Deutsche Börse AG and other partners. The lawsuit was dismissed at first instance in October 2020; the plaintiff filed an appeal against the judgment.

Proceedings before the court in Frankfurt

On 6 February 2020, a plaintiff filed a complaint naming Clearstream Banking AG and one other entity as defendants. The complaint, which was filed before the courts in Frankfurt, primarily seeks rights to information and turnover of dividends in the amount of approximately EUR 4.1 million plus interest. The alleged claim relates to dividends from securities that Clearstream Banking AG holds as a custodian.

Proceedings by the Public Prosecutor's Office in Cologne

In September 2017, Clearstream Banking AG and Clearstream Banking S.A. were made aware that the public prosecutor's office in Cologne had initiated proceedings for tax evasion against an employee of Clearstream Banking AG for his alleged involvement in the settlement of transactions of market participants over dividend date (cum/ex transactions). On 22 January 2018, the public prosecutor's office in Cologne addressed to Clearstream Banking AG a notification of hearing

Clearstream Banking AG and Clearstream Banking S.A. as potential secondary participants (*Nebenbeteiligte*). Starting on 27 August 2019, together with other supporting authorities, the Public Prosecutor's Office in Cologne conducted searches of the offices of Clearstream Banking AG, Clearstream Banking S.A., as well as other Deutsche Börse Group companies and sites. In the course of these measures, Deutsche Börse Group entities were made aware that the Public Prosecutor's Office in Cologne has extended the group of accused persons to include further current and former employees of Deutsche Börse Group companies as well as executive board members of subsidiaries of Deutsche Börse AG. Due to the still early stage of the proceedings, it is not possible to predict timing, scope or consequences of a potential decision. The companies concerned are cooperating with the competent authorities. They do not expect that they could be successfully held liable.

Lawsuit before the District Court of Frankfurt/Main

In November 2018, a customer of a trading participant of the Frankfurt Stock Exchange filed a lawsuit at the District Court (*Landgericht*) of Frankfurt/Main against the Issuer. The plaintiff is claiming damages of approximately €2.6 million from the Issuer. The alleged damages are said to have arisen (1) on 7 July 2016, from the Issuer's publication of an inaccurate ex-dividend date relating to a financial instrument via the Xetra system and (2) due to the fact that a client of the plaintiff relied on this inaccurate information to conclude transactions. In its final decision of 6 November 2020, the court has dismissed the lawsuit.

Penalty proceedings brought by BaFin

On 19 December 2018, BaFin sent the Issuer a formal hearing notification in a penalty proceeding, which refers to the allegation of a supposed lack of self-liberation or, alternatively, an allegedly omitted ad hoc announcement. Specifically, in the search for a successor for Carsten Kengeter, the Issuer had omitted to qualify as a price-relevant intermediate step the fact that a few days before the appointment of Theodor Weimer in November 2017, two suitable and interested CEO candidates had been identified and a decision about the appointment was planned. Even after consulting with external experts, the Issuer believes this allegation is unfounded.

In the letter of comfort, the Issuer undertakes to provide Eurex Clearing AG with financial funding to enable Eurex Clearing AG to comply with its obligations. The maximum aggregate liability of the Issuer under this letter of comfort will not exceed EUR 600 million.

Executive Board members' change of control agreement

Under certain conditions, some members of the Issuer's Executive Board have a special right to terminate their contracts of service and to receive compensation in the event of a change of control. These change of control provisions will be eliminated gradually from agreements with Executive Board members under the new remuneration system which applies to service contracts that have been entered into or extended on or after 1 January 2020. According to existing change of control provisions, a change of control occurs if (i) a shareholder or third party discloses that it possesses more than 50 per cent. of the voting rights in the Issuer in accordance with Sections 33 and 34 of the WpHG (Sections 21 and 22 of the WpHG (previous version)), (ii) an intercompany agreement in accordance with Section 291 of the AktG is entered into with the Issuer as a dependent company, or the Issuer is absorbed in accordance with Section 319 of the AktG or (iii) the Issuer is merged in accordance with Section 2 of the Reorganization of Companies Act (*Umwandlungsgesetz*, "UmwG").

Declaration to German Corporate Governance Code

On 3 December 2020, the Executive Board and the Supervisory Board published a qualified declaration of conformity with the German Corporate Governance Code (*Deutscher Corporate Governance Code*, the "**Code**") in accordance with § 161 of the AktG. For the period since the last regular declaration of conformity dated 10 December 2019 until 19 March 2020, the declaration of conformity refers to the version of the Code dated 7 February 2017 ("**Code 2017**"). Since 20 March 2020, it refers to the new version of the Code as amended on 16 December 2019 and published in the Federal Gazette on 20 March 2020 ("**Code 2019**").

The Executive Board and the Supervisory Board declared that the recommendations of the Code in its respective version have been met almost completely. Also, it is intended to fully comply with the recommendations of the Code in the future.

1. Agreement of severance payment caps when concluding Executive Board contracts (no. 4.2.3 (4) Code 2017, recommendation G. 13 Code 2019)

Severance payment caps agreed upon in all contracts with the members of the Executive Board complied and will continue to comply with recommendation no. 4.2.3 (4) Code 2017 / recommendation G. 13 Code 2019. In the past, however, the Supervisory Board reserved the right to deviate from no. 4.2.3 (4) Code 2017, as it was of the opinion that a deviation may become necessary in extraordinary cases. In connection with the introduction of an adjusted remuneration system for the Executive Board from 1 January 2020, the Supervisory Board generally abandoned this reservation. The recommendation – also in its new version – has therefore been complied with in full since then.

2. Caps on total amount of remuneration (no. 4.2.3 (2) (sentence 6) Code 2017, recommendation G. 1, first indent Code 2019) and disclosure in the remuneration report (no. 4.2.5 (3) Code 2017)

No. 4.2.3 (2) (sentence 6) Code 2017 recommended that the amount of management compensation shall be capped, both as regards variable components and in the aggregate. This recommendation has not been fully complied with in the past.

The annual remuneration, comprising fixed and variable remuneration components and pension benefits, was capped at EUR 9.5 million (total cap) for each member of the Executive Board. However, ancillary benefits were not included in the overall cap. In addition, the share-based long-term variable remuneration components were capped regarding the number of shares granted, but no dedicated cap on the maximum achievable bonus amount was provided for. With regard to the share based variable remuneration components, the maximum achievable remuneration therefore could not be reported either – as recommended in no. 4.2.5 (3) (first subitem) Code 2017.

With the introduction of the adjusted remuneration system for the Executive Board on 1 January 2020, the annual remuneration of a fixed salary, variable remuneration components, pension expenses and ancillary benefits for each Executive Board member is now capped at a maximum amount of EUR 9.5 million (total cap). Regarding the Executive Board service contracts that have been newly concluded or extended since 1 January 2020, no. 4.2.3 (2) (sentence 6) Code 2017 and recommendation G. 1, first indent Code 2019 – according to which, inter alia, in the remuneration system it should be determined what amount the total remuneration may not exceed (maximum remuneration) – is therefore complied with. With the intended corresponding adjustment of the remaining Executive Board service contracts with regard to the provision on maximum remuneration, recommendation G. 1 Code 2019 will be complied with in the future in full.

3. Composition of the Nomination Committee (no. 5.3.3 Code 2017, recommendation D. 5 Code 2019)

According to no. 5.3.3 Code 2017 / recommendation D. 5 Code 2019, the Supervisory Board shall form a Nomination Committee composed exclusively of shareholder representatives. In accordance with Section 4 b of the German Stock Exchange Act, the Nomination Committee, however, also assists the Supervisory Board of Deutsche Börse AG in

selecting candidates for the Executive Board. As in particular this task shall not exclusively be performed by the shareholder representatives on the Supervisory Board, the Nomination Committee also includes employee representatives. Since the new version of the Code, this recommendation is no longer applicable for Deutsche Börse AG in view of the priority provision of the German Stock Exchange Act (recommendation F. 4 Code 2019). Regardless of this, it is ensured that the nominees proposed to the Annual General Meeting for the election as members of the Supervisory Board are determined solely by the shareholder representatives on the Committee.

Risk Management

Risk management is an integral component of management and control within Deutsche Börse Group. Deutsche Börse Group seeks to safeguard its continued existence and enables it to achieve its corporate goals by utilising effective and efficient risk management. To this end, Deutsche Börse Group has established a group-wide risk management system, which defines the roles, processes and responsibilities applicable to all staff and organisational entities within Deutsche Börse Group.

Deutsche Börse Group's risk management system is designed to ensure that all management committees within Deutsche Börse Group are able to control the risk profile of the entire Deutsche Börse Group or of single legal entities, as well as significant individual risks, in a timely manner. The aim is to identify developments that could threaten Deutsche Börse Group's interests and to take appropriate countermeasures promptly.

Deutsche Börse Group uses quantitative and qualitative risk management approaches and methods to monitor and manage its risk profile. The aim is to provide a picture as complete as possible of its risk situation at all times.

Deutsche Börse Group assesses and reports operational, financial and business risks using value at risk (VaR) as a uniform measure. This value quantifies the risks and represents the upper limit of the cumulative loss that Deutsche Börse Group may incur within a specified period of time, e.g. for the next twelve months, with a specified probability or level of confidence. The regulatory capital requirements for the financial institutions are also determined. Furthermore, Deutsche Börse Group applies stress tests to analyse its risks.

Organisation and Methodology

The risk strategy applies to the entire Deutsche Börse Group. Risk management functions, processes and responsibilities are binding for all employees and organisational units of Deutsche Börse Group. To ensure that all employees consciously deal with risks, risk management is firmly anchored in the organisational structure and workflows and is supported by corresponding measures, such as risk management training. The Executive Board is responsible for risk management overall, within individual companies it is the responsibility of the management; the following boards and committees receive comprehensive and timely information on risks.

The Supervisory Board of Deutsche Börse monitors the effectiveness of the risk management system and examines its risk strategy and risk appetite on a yearly basis. The Supervisory Board has delegated the evaluation to its Audit Committee, which regularly assesses the appropriateness and effectiveness of the risk management system. To monitor the risk situation, the Supervisory Board has established a Risk Committee.

The Executive Board of Deutsche Börse determines the Deutsche Börse Group-wide risk strategy and risk appetite. It ensures that the risk appetite is and remains compatible with Deutsche Börse Group's short- and long-term strategy, business and capital planning, risk-bearing capacity and remuneration systems. Based on the parameters used to assess risks, it also determines what procedures apply. It ensures that each business unit complies with these requirements for risk strategy and risk appetite.

The Group Risk Committee reviews the risk position of Deutsche Börse Group regularly and involves the Executive Board in all decisive questions. The Committee is chaired by the Chief Financial Officer. It also includes in particular all Product Owners of Deutsche Börse Group. It regularly checks the levels of all parameters for appropriateness and current status and, as necessary, makes recommendations to the Chief Risk Officer ("CRO") or the Executive Board as to what measures should be used to adjust these parameters.

Group Risk Management ("**GRM**") is headed by the CRO. It prepares the proposals for the risk levers, i.e. the strategy, appetite, parameters, capital allocation and procedures. GRM continuously analyses and evaluates risks and reports quantitatively and qualitatively. These are regularly submitted to the Group Risk Committee, once a month to the Executive Board, once a quarter to the Risk Committee of the Supervisory Board and twice a year to the Supervisory Board. In this way, the responsible bodies can regularly check whether the risk limits defined in the strategy are systematically adhered to. In addition, GRM recommends measures to manage risks. The regulated subsidiaries act in the same way, always ensuring that they meet the requirements of Deutsche Börse Group. In particular, they adhere to the framework for risk appetite allocated to them by Deutsche Börse Group. The relevant supervisory boards and their committees are involved, as are the executive boards and risk management functions in the various divisions. Clearstream and Eurex Clearing AG, Deutsche Börse Group's financial institutions, implement this risk strategy using their own strategies that they derive from it. In line with this, they use parameters and reporting formats that are compatible with the overarching Group-wide structure. At Clearstream, responsibility lies with the executive board of Clearstream Holding AG, supervised by the supervisory board, as well as the corresponding governing bodies of Clearstream Banking S.A. and Clearstream Banking AG; at Eurex Clearing AG, responsibility again lies with the executive board, which is also controlled by the supervisory board of the institute.

The organisational structure described above, and the procedures and responsibilities associated with it are designed to enable Deutsche Börse Group to ensure that risk awareness throughout the entire Deutsche Börse Group is well developed and that an active risk culture is in place in practice.

Recent Events

Preliminary Results Financial Year 2020

On 10 February 2021, Deutsche Börse published its preliminary results for the financial year 2020. For further information, please refer to the section "*Preliminary Results Financial Year 2020*" below.

The ISS Acquisition

On 17 November 2020, Deutsche Börse announced that it will acquire a majority share of approximately 80% in ISS, valuing ISS at USD 2,275 million (EUR 1,925 million) for 100% of the business (cash and debt free). Together, the current majority shareholder of ISS, Genstar Capital LLC, and the current management of ISS will continue to hold a stake of approximately 20%. The ISS Acquisition is expected to close in the first half of 2021 subject to customary closing conditions and regulatory approvals. The ISS Acquisition will be financed by Deutsche Börse through the issuance of the Notes and the remainder with own cash.

Deutsche Börse believes that this partnership of a global market infrastructure provider with a leading corporate governance, ESG, data and analytics provider forms an excellent foundation to fully realise opportunities for future growth in ESG-based investing globally. With this transaction, Deutsche Börse strongly commits to one of the key megatrends in the industry that will, in the assessment of Deutsche Börse, fundamentally change the investment space over the coming years. Deutsche Börse believes that ISS' unique ESG and data expertise will allow Deutsche Börse to emerge as a leading global ESG data player.

As of the date of this Prospectus, ISS has more than 2,000 employees worldwide across more than 30 global offices in 15 countries. ISS' more than 4,000 clients include many of the world's leading institutional investors who rely on ISS' governance and ESG data and research, as well as public companies focused on ESG and governance risk mitigation as a shareholder value enhancing measure. In the years 2014 to 2020, ISS recorded a compound annual growth rate (CAGR) of 15%.

Deutsche Börse believes that the ISS Acquisition will bring a strengthened capital structure to ISS and the ability to further accelerate organic and inorganic growth initiatives for the benefit of ISS' clients while leveraging the infrastructure of Deutsche Börse Group and, in particular, its global index franchise. After the closing, ISS will continue to operate with the same editorial independence in its data and research organisation that is in place today. The current executive leadership team of ISS with CEO Gary Retelny will co-invest in the transaction and will also lead the business of ISS after the closing.

In the assessment of Deutsche Börse, the businesses of ISS and Deutsche Börse Group are highly complementary and offer the potential for revenue synergies along Deutsche Börse Group's entire value chain: the partnership of ISS with the leading index and analytics capabilities of Qontigo, which is also part of Deutsche Börse Group, will open opportunities for ESG growth on both sides. Further linkages along the value chain include ISS' data distribution, which will benefit from the leading position of Deutsche Börse Group's post-trading services provider Clearstream in the investment funds space. In total, Deutsche Börse expects revenue synergies to result in EUR 15 million additional earnings before interest, tax, depreciation and amortisation ("**EBITDA**") by 2023. Deutsche Börse believes that ISS brings unique access to the buy-side with more than 2,000 asset managers, including the global top 10. In the assessment of Deutsche Börse, ISS' strong footprint in the US complements well with Deutsche Börse Group's leading position in Europe.

Deutsche Börse believes that the ISS Acquisition is the logical next step in its pre-trade growth strategy. In the assessment of Deutsche Börse, the ISS Acquisition complements last year's creation of Qontigo, formed from the combination of the analytics capabilities of Axioma with Deutsche Börse's existing STOXX and DAX index businesses.

In 2020, ISS is expected to generate net revenue of more than USD 280 million (pro-forma IFRS) and an adjusted EBITDA margin of approximately 35% pre-transaction effects, which has further operating leverage potential. The "EBITDA margin" as a profitability indicator is measuring the Earnings before interest, tax, depreciation and amortisation as a percentage of net revenue. Net revenue of ISS is expected to grow organically at a rate of more than 5% on average *per annum* until 2023. Deutsche Börse will report ISS' financial performance as a separate pre-trading segment within Deutsche Börse Group.

TAXATION WARNING

SUBSCRIPTION AND SALE OF THE NOTES

General

Pursuant to a subscription agreement dated 18 February 2021 (the "**Subscription Agreement**") among the Issuer and the Joint Lead Managers, the Issuer has agreed to sell to the Joint Lead Managers, and the Joint Lead Managers have agreed, subject to certain customary closing conditions, to purchase, the Notes on 22 February 2021. The Issuer has furthermore agreed to pay certain fees to the Joint Lead Managers and to reimburse the Joint Lead Managers for certain expenses incurred in connection with the issue of the Notes.

The Subscription Agreement provides that the Joint Lead Managers under certain circumstances will be entitled to terminate the Subscription Agreement. In such event, no Notes will be delivered to investors. Furthermore, the Issuer has agreed to indemnify the Joint Lead Managers against certain liabilities in connection with the offer and sale of the Notes.

Certain of the Joint Lead Managers and their respective affiliates may be customers of, borrowers from or creditors of Deutsche Börse and its affiliates. In addition, certain Joint Lead Managers and their respective affiliates may have engaged, and may in the future engage, in investment banking and/or commercial banking transactions with, and may perform services for, Deutsche Börse and its affiliates in the ordinary course of business. In particular, in the ordinary course of their business activities, the Joint Lead Managers and their respective affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers. Such investments and securities activities may involve securities and/or instruments of Deutsche Börse or its affiliates. Certain of the Joint Lead Managers or their respective affiliates that have a lending relationship with Deutsche Börse routinely hedge their credit exposure to Deutsche Börse consistent with their customary risk management policies. Typically, such Joint Lead Managers and their respective affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in securities, including potentially the Notes issued. Any such positions could adversely affect future trading prices of the Notes. The Joint Lead Managers and their respective affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

There are no interests of natural and legal persons involved in the issue, including conflicting ones, that are material to the issue.
