8. OPERATIONAL INFORMATION

Any Clearing System(s) other than Euroclear Bank S.A./N.V. and [Not Applicable/Euroclear France/VPS/ Euroclear Sweden/Euroclear Finland/CREST/Euroclear/Clearstream (and

¹⁰ Only include a description of any interest, including conflicting ones, that is material to the issue/offer, detailing the persons involved and the nature of the interest that is material to the issue is different from that set out in the section of the Base Prospectus entitled "Risks associated with conflicts of interests between Goldman Sachs and purchasers of Securities".

Other Information

Clearstream Banking S.A. and the relevant identification number(s): CDIs in CREST)/[●] (*specify other, give name(s), address(es) and number(s)*)

Delivery: Delivery [against/free of] payment.

Names and addresses of additional Paying Agent(s) (if any): [Not Applicable/[●] (*specify*)].

Operational contact(s) for Fiscal Agent: [Not Applicable/[●] (*specify*)].

Intended to be held in a manner which would allow Eurosystem eligibility: [Yes/No].

[Note that the designation "yes" simply means that the Notes are intended upon issue to be deposited with one of the ICSDs as common safekeeper, and registered in the name of a nominee of one of the ICSDs acting as common safekeeper and does not necessarily mean that the Notes will be recognised as eligible collateral for Eurosystem monetary policy and intra day credit operations by the Eurosystem either upon issue or at any or all times during their life. Such recognition will depend upon the ECB being satisfied that Eurosystem eligibility criteria have been met.] / [Whilst the designation is specified as "no" at the date of this Pricing Supplement, should the Eurosystem eligibility criteria be amended in the future such that the Notes are capable of meeting them the Notes may then be deposited with one of the ICSDs as common safekeeper, and registered in the name of a nominee of one of the ICSDs acting as common safekeeper. Note that this does not necessarily mean that the Notes will then be recognised as eligible collateral for Eurosystem monetary policy and intra day credit operations by the Eurosystem at any time during their life. Such recognition will depend upon the ECB being satisfied that Eurosystem eligibility criteria have been met.]

9. UNITED STATES TAX CONSIDERATIONS

Section 871(m) Withholding Tax

(If the Notes are Share Linked Securities or Index Linked Securities, insert either of the following paragraphs, depending on whether the Notes are subject to Section 871(m) of the U.S. Internal Revenue Code of 1986, as amended. If the Notes are not Share Linked Securities or Index Linked Securities, insert 'Not Applicable'.)

[If the Notes are subject to Section 871(m): The U.S. Treasury Department has issued regulations under which amounts paid or deemed paid on certain financial instruments that are treated as attributable to U.S.-source dividends could be treated, in whole or in part depending on the circumstances, as a "dividend equivalent" payment that is subject to tax at a rate of 30 per cent. (or a lower rate under an applicable treaty). We have determined that, as of the issue date of the Notes, the Notes will be subject to withholding under these rules. The tax will be imposed at the full withholding tax rate even if you are otherwise eligible for a reduction in the rate under an applicable treaty. See "*United States Tax Considerations – Dividend Equivalent Payments*" in the Base Prospectus for a more comprehensive discussion of the application of Section 871(m) to the Notes.]

[If the Notes are not subject to Section 871(m): The U.S. Treasury Department has issued regulations under which amounts paid or deemed paid on certain financial instruments that are treated as attributable to U.S.-source dividends could be treated, in whole or in part depending on the circumstances, as a "dividend equivalent" payment that is subject to tax at a rate of 30 per cent. (or a lower rate under an applicable treaty). We have determined that, as of the issue date of the Notes, the Notes will not be subject to withholding under these rules. In certain limited circumstances, however, it is possible for United States alien holders to be liable for tax under these rules with respect to a combination of transactions treated as having been entered into in connection with each other even when no withholding is required. United States alien holders should consult their tax advisor concerning these regulations, subsequent official guidance and regarding any other possible alternative characterisations of their Notes for United States federal income tax purposes. See *"United States Tax Considerations – Dividend Equivalent Payments"* in the Base Prospectus for a more comprehensive discussion of the application of Section 871(m) to the Notes.]

[Not Applicable.]

[Classification for U.S. Tax Purposes]

(If GSFCI is the Issuer, insert either of the following paragraphs, depending on whether the Instruments will be treated as debt or will not be treated as debt for U.S. Tax purposes.)

[If the Instruments are identified as "other income securities": We have determined that there is a material risk that the Notes will not be treated as a debt instrument, but will rather be treated as a forward or derivative contract, for United States federal income tax purposes. In light of this possibility, we intend to treat the Notes in the manner described under *"United States Tax Considerations -- Securities Issued by GSFCI -- Securities that are not Classified as Debt for United States Tax Purposes"* in the Base Prospectus. If the Notes bear periodic coupons, then, due to uncertainty regarding the U.S. withholding tax treatment of coupon payments on Notes that are not treated as debt, it is expected that withholding agents will (and we, if we are the withholding agent, intend to) withhold on coupon payments on the Notes at a 30 per cent. rate or at a lower rate specified by an applicable income tax treaty under an "other income" or similar provision. No additional amounts will be paid for such withholding tax by us or by the applicable withholding agent. Amounts paid upon the redemption or maturity of the Notes (other than any periodic coupons that are paid at such time) are not expected to be subject to U.S. withholding tax and, if we (including any of our affiliates) are the withholding agent, we do not intend to withhold on such amounts. You should consult your own tax advisor regarding the U.S. tax consequences of purchasing, holding and disposing of the Notes.]

[If the Instruments are identified as debt: We intend to treat the Notes, for United States federal income tax purposes, in the manner described under *"United States Tax Considerations -- Securities Issued by GSFCI -- Securities that are Classified as Debt for United States Tax Purposes"* in the Base Prospectus, which description includes details for United States alien holders eligible for an exemption from United States federal withholding tax on payments of principal and interest. However this determination is not binding on the United States Internal Revenue Service ("IRS") and the IRS may disagree with the treatment. In the case of Notes that bear periodic coupons, the consequences of the IRS disagreeing with the treatment include the possibility that coupon payments made to you (including any such coupon payments made at maturity) could be subject to tax at a 30 per cent. rate or at a lower rate specified by an applicable income tax treaty under an "other income" or similar provision. No additional amounts will be paid for such tax by us or by the applicable withholding agent. Amounts paid upon the redemption or maturity of the Notes are not expected to be subject to U.S. withholding tax and, if we (including any of our affiliates) are the withholding agent, we do not intend to withhold on such amounts. You should consult your own tax advisor regarding the U.S. tax consequences of purchasing, holding and disposing of the Notes.]]

10. INDEX DISCLAIMER

[(Include if applicable, include Index and Commodity Index disclaimer(s) / Not Applicable].

11. [SECURITIES AND FUTURES ACT [2001] [(CHAPTER 289)] SINGAPORE

[The Notes are prescribed capital markets products (as defined in the Securities and Futures (Capital Markets Products) Regulations 2018) and are Excluded Investment Products (as defined in the Notice on the Sale of Investment Products (SFA 04–N12) and the Notice on Recommendations on Investment Products (FAA–N16) each issued by the Monetary Authority of Singapore).]

[The Notes are capital market products other than prescribed capital market products (as defined in the Securities and Futures (Capital Market Products) Regulations 2018) and are Specified Investment Products (as defined in the Notice on the Sale of Investment Products (SFA 04–N12) and the Notice on Recommendations on Investment Products (FAA–N16) each issued by the Monetary Authority of Singapore).]

12. REASONS FOR THE OFFER, ESTIMATED NET AMOUNT OF PROCEEDS AND TOTAL EXPENSES

(i) Reasons for the offer: [Not Applicable/[●]].

(See "Use of Proceeds" wording in Base Prospectus – if reasons for offer different from providing additional funds for the Issuer's operations and for other general corporate purposes, will need to include those reasons here. For example, specify here if may intend to allocate an amount equal to the net proceeds from the Securities to finance or refinance projects and assets made or held by any Goldman Sachs Group member that respond to critical environmental, social and/or sustainability issues, including any related terms and matters. The below is sample language only and is subject to change for any particular issuance. Otherwise, insert 'Not Applicable'.)

[The Securities are being issued subject to and in accordance with the Goldman Sachs Sustainability Issuance Framework. Accordingly, the Issuer intends to allocate an amount equal to the net proceeds from the Securities to finance or refinance projects and assets that respond to critical environmental, social and/or sustainability issues, including those related to climate transition and inclusive growth, as defined by the relevant Eligibility Criteria.] *(This may be tailored Green or Social issuances)*

[Proceeds from the Securities may be allocated across a combination of both environmentally and socially-focused Eligible Investments. *(This may be tailored Green or Social issuances)*.]

[Goldman Sachs will prioritise the use of proceeds from each issuance of Securities under its Sustainability Issuance Framework to finance new projects or assets that meet the Eligibility Criteria [of the respective type of issuance] and will aim to allocate all proceeds within two years following the issuance. Loans and investments that qualify under the relevant criteria made up to one year prior to the issuance are also eligible for

refinancing with its proceeds. Goldman Sachs will track and manage an amount equivalent to the proceeds of each issuance of Securities under the Sustainability Issuance Framework via a separate internal ledger. Any portion of proceeds unallocated against Eligible Investments will be allocated against highly liquid instruments, until such amount can be allocated against Eligible Investments. During the term of the relevant Securities, if an asset that has been funded with the proceeds of such Securities either matures or is sold, Goldman Sachs will seek to reallocate the equivalent amount of proceeds into eligible projects and assets, where possible and feasible as described in Sustainability Issuance Framework.]

[Goldman Sachs will publish reports on an annual basis and the information will be updated annually until the proceeds of the Securities are fully allocated to Eligible Investments and as promptly as practicable in case of any material changes in the proceeds allocation thereafter. Each report will include a brief description of categories of Eligible Investments to which proceeds have been allocated, the total amount of proceeds allocated to such Eligible Investments and the total amount of unallocated proceeds (if any), and, to the extent feasible, the expected and realised environmental and/or social impact of the allocated Eligible Investments. Information about the allocation and impact of projects and assets may be presented on an aggregated basis due to applicable confidentiality obligations and the large number of Eligible Investments that may be allocated proceeds from the Securities.]

- (ii) Estimated net amount of [Not Applicable/[●]].
proceeds:

(If proceeds are intended for more than one use will need to split out and present in order of priority. If proceeds insufficient to fund all proposed uses state amount and sources of other funding.)

- (iii) Estimated total expenses [related [Not Applicable/[●]].
to the admission to trading]

(Include breakdown of expenses)

[ADDITIONAL PROVISIONS RELATING TO THE UNDERLYING

The Issuer may, but is not obliged to, include additional information here as to additional provisions not required by the relevant securities note, relating to the Underlying Asset(s) including, if applicable, Index and Commodity Index disclaimer(s).

For PSL Notes, the Issuer may (but is not obliged to), include a copy of the completed Part B – Key Terms (variables) (and any other key terms) (see PSL Note Description – 3 Description of the Preference Shares Part B of Part 2 – Key Terms (variables) of the Base Prospectus) of the Preference Shares to which the PSL Notes are linked.]

[(Specify relevant information about the Reference Entities in Part B above)]

DESCRIPTION OF THE GOLDMAN SACHS GLOBAL DIVERSIFIED FUNDS VOLATILITY TARGET STRATEGY

The following description of the Goldman Sachs Global Diversified Funds Volatility Target Strategy (the "Strategy"), the Goldman Sachs Global Diversified Funds Basket Excess Return (the "Underlying Strategy") and the EUR Goldman Sachs Overnight Money Market Index (the "Money Market Index", and together with the Strategy and the Underlying Strategy, each a "Relevant Strategy") is subject to, and qualified in its entirety by, the methodology in respect of such Relevant Strategy as published or made available by the Strategy Sponsor from time to time. Any such methodology may be amended or modified from time to time at the discretion of the Strategy Sponsor in accordance with the terms set out therein. Copies of such methodologies shall be available upon request by a prospective purchaser of Index Linked Securities from the Strategy Sponsor.

A prospective purchase of Index Linked Securities should also carefully review the risk factors in relation to the Strategy set out in the section of this Base Prospectus entitled "Risk Factors" before purchasing any Index Linked Securities.

Each Relevant Strategy is a synthetic rules-based proprietary strategy created by the Strategy Sponsor. All determinations made pursuant to each Relevant Strategy are reserved for the Strategy Sponsor only, save that the Strategy Calculation Agent may determine the value of each Relevant Strategy from time to time in accordance with the relevant methodology.

The Strategy Sponsor owns the copyright and all other rights to each Relevant Strategy.

Capitalised terms not otherwise defined shall have the meaning given to them in Section 5 (Definitions) of this "Description of the Goldman Sachs Global Diversified Funds Volatility Target Strategy" section of this Base Prospectus.

1. Description of the Strategy

1.1 Overview of the Strategy

The Strategy intends to provide a volatility-targeted exposure to the performance of the Underlying Strategy. The volatility adjustment feature systematically adjusts the exposure of the Strategy to the performance of the Underlying Strategy by allocating a percentage of its exposure to the Underlying Strategy if a specified measure of the realised volatility of the Underlying Strategy would otherwise deviate from a target of 5.25 per cent. on any Strategy Rebalancing Day. The weight assigned to the Underlying Strategy is rebalanced on a daily basis and is subject to a cap of 100 per cent.

The Strategy is a long only "excess return" strategy and, therefore, the value of the Strategy shall not include the accrual of any amount in relation to a money market rate.

Although the value of the Strategy is reduced by the deduction of an annual fixed rate of one per cent. which has the effect of reducing the performance of the Strategy.

1.2 Calculation of the value of the Strategy

The value of the Strategy on the Strategy Inception Date was equal to the Strategy Initial Value.

The value of the Strategy shall be calculated by the Strategy Calculation Agent on each Strategy Business Day following the Strategy Inception Date as an amount in the Strategy Currency (subject to a floor of zero) equal to (a) the Strategy Value immediately before subtracting the Asset Rebalancing Cost in respect of such Strategy Business Day minus (b) the Asset Rebalancing Cost in respect of such Strategy Business Day (" RC_t^V ").

Expressed as a formula, the value of the Strategy on each Strategy Business Day following the Strategy Inception Date is as follows:

$$V_t^{Pre} - RC_t^V$$

The Strategy Value immediately before subtracting the Asset Rebalancing Cost in respect of each Strategy Business Day following the Strategy Inception Date (" V_t^{Pre} ") shall be calculated by the Strategy Calculation Agent as an amount in the Strategy Currency equal to:

- (a) the value of the Strategy in respect of the Strategy Rebalancing Day immediately preceding such Strategy Business Day (" V_{Vrt} "); plus
- (b) the Asset Exposure in respect of the Strategy Rebalancing Day immediately preceding such Strategy Business Day (" $Exposure_{Vrt}$ "); multiplied by
- (c) one (1); multiplied by
- (d)
 - (i) the quotient of (I) the Underlying Strategy Value in respect of such Strategy Business Day (" A_t ") (as numerator) and (II) the Underlying Strategy Value in respect of the Strategy Rebalancing Day immediately preceding such Strategy Business Day (" A_{Vrt} ") (as denominator); minus
 - (ii) One (1); minus
- (e) the value of the Strategy in respect of the Strategy Rebalancing Day immediately preceding such Strategy Business Day (" V_{Vrt} "); multiplied by
- (f) the actual number of days in the period commencing on (and including) the Strategy Rebalancing Day immediately preceding such Strategy Business Day and ending on (but excluding) such Strategy Business Day, divided by 360 (" $DCF_{Vrt,t}$ "); multiplied by
- (g) one (1) per cent,

provided that if the value of the Strategy in respect of such Strategy Business Day is (or is deemed to be) zero, the value of the Strategy in respect of each Strategy Business Day immediately following such Strategy Business Day shall also be zero.

Expressed as a formula, the value of the Strategy on each Strategy Business Day following the Strategy Inception Date is as follows:

$$V_{Vrt} + Exposure_{Vrt} \times 1 \times \left(\frac{A_t}{A_{Vrt}} - 1 \right) - V_{Vrt} \times DCF_{Vrt,t} \times 1.00\%$$

Subject to the occurrence of a Disruption Event, each such value in respect of a Strategy Business Day will be published on the Strategy Bloomberg Ticker rounded to two decimal places (with 0.005 being rounded upwards).

1.3 Calculation of the Asset Exposure

The Asset Exposure shall be calculated by the Strategy Calculation Agent on each Strategy Rebalancing Day as an amount equal to:

- (a) the value of the Strategy on the second Strategy Business Day immediately preceding such Strategy Rebalancing Day (or, if none, the Strategy Initial Value); multiplied by
- (b) the Asset Weight in respect of the second Strategy Business Day immediately preceding such Strategy Rebalancing Day (or, if none, in respect of the Strategy Inception Date); multiplied by
- (c) the Underlying Strategy Value in respect of such Strategy Rebalancing Day divided by the Underlying Strategy Value in respect of the second Strategy Business Day immediately preceding such Strategy Rebalancing Day (or, if none, in respect of the Strategy Inception Date).

1.4 Calculation of the Asset Weight

The Asset Weight shall be calculated by the Strategy Calculation Agent on each Strategy Business Day as an amount equal to the lower of:

- (a) 100 per cent.; and
- (b) 5.25 per cent. divided by the Asset Realized Volatility in respect of such Strategy Business Day.

Any such Asset Weight shall be rounded to three decimal places with 0.0005 being rounded upwards.

1.5 Calculation of the Asset Realized Volatility

The Asset Realized Volatility in respect of the Strategy Inception Date was equal to 5.25 per cent.

The Asset Realized Volatility shall be calculated by the Strategy Calculation Agent on each Strategy Business Day falling after the Strategy Inception Date as a percentage equal to the greater of the Short Term Basket Volatility and the Long Term Basket Volatility, in each case, in respect of such Strategy Business Day.

The Short Term Basket Volatility shall be calculated by the Strategy Calculation Agent on each Strategy Business Day falling after the Strategy Inception Date in accordance with the following formula:

$$\sqrt{0.950 \times AssetVol_{ST,t-1}^2 + (1 - 0.950) \times \frac{252}{1} \times \left[\ln \left(\frac{A_{t-d}}{A_{t-d-k}} \right) \right]^2}$$

The Long Term Basket Volatility shall be calculated by the Strategy Calculation Agent on each Strategy Business Day falling after the Strategy Inception Date in accordance with the following formula:

$$\sqrt{0.995 \times AssetVol_{LT,t-1}^2 + (1 - 0.995) \times \frac{252}{1} \times \left[\ln \left(\frac{A_{t-d}}{A_{t-d-k}} \right) \right]^2}$$

Where:

$AssetVol_{ST,t-1}^2$ means, in respect of a Strategy Business Day, the square of the Short Term Basket Volatility in respect of the Strategy Business Day immediately preceding such Strategy Business Day (or, if none, the square of 5.25 per cent.);

A_{t-d} means, in respect of a Strategy Business Day, the Underlying Strategy Value in respect of the Strategy Business Day immediately preceding such Strategy Business Day (or, if none, in respect of the Strategy Inception Date);

A_{t-d-k} means, in respect of a Strategy Business Day, the Underlying Strategy Value in respect of the second Strategy Business Day immediately preceding such Strategy Business Day (or, if none, in respect of the Strategy Inception Date);

$\ln$ means the natural logarithm function; and

$AssetVol_{LT,t-1}^2$ means, in respect of a Strategy Business Day, the square of the Long Term Basket Volatility in respect of the Strategy Business Day immediately preceding such Strategy Business Day (or, if none, the square of 5.25 per cent.).

1.6 Calculation of the Asset Rebalancing Cost

The Asset Rebalancing Cost in respect of (a) the Strategy Inception Date and (b) each Strategy Business Day following the Strategy Inception Date that is not a Strategy Rebalancing Day, is equal to zero.

The Asset Rebalancing Cost in respect of each Strategy Rebalancing Day following the Strategy Inception Date shall be calculated by the Strategy Calculation Agent in accordance with the following formula:

$$TC_t^A \times |Exposure_t - \overline{Exposure_t}|$$

Where:

TC_t^A means the Asset Transaction Cost Rate;

$Exposure_t$ means the Asset Exposure in respect of such Strategy Rebalancing Day; and

$\overline{Exposure}_t$ means the Asset Actual Exposure in respect of such Strategy Rebalancing Day.

1.7 Calculation of the Asset Actual Exposure

The Asset Actual Exposure in respect of each Strategy Business Day shall be calculated by the Strategy Calculation Agent as an amount equal to:

- (a) the Asset Exposure in respect of the Strategy Rebalancing Day immediately preceding such Strategy Business Day; multiplied by
- (b) the quotient of (i) the Underlying Strategy Value in respect of such Strategy Business Day (as numerator) and (ii) the Underlying Strategy Value in respect of the Strategy Rebalancing Day immediately preceding such Strategy Business Day (as denominator).

2. Description of the Underlying Strategy

2.1 Overview of the Underlying Strategy

The Underlying Strategy intends to provide a synthetic exposure to the performance of a dynamically weighted basket of Underlying Funds which periodically rebalances to assign a weight to each Underlying Fund that may be positive, negative or zero. Therefore, the Underlying Strategy may have a long or short exposure (or no exposure) to the Underlying Funds from time to time.

The Underlying Funds in respect of the Underlying Strategy are set out in Section 3 (*Underlying Fund Table*). Subject to the occurrence of a Disruption Event or an Additional Market Disruption Event, on each Asset Business Day, the Asset Value of each Underlying Fund shall be determined on the basis of the Reference Level of the relevant Underlying Fund on such Asset Business Day adjusted to reflect the addition and/or deduction of the return of a synthetic euro cash deposit to change the type of return of each Underlying Fund from a "total return" to "excess return" basis.

The Basket Value intends to track the weighted value of each Underlying Fund and is calculated based on the value of each Underlying Fund weighted by their respective Asset Quantities. Subject to the occurrence of a Disruption Event or an Additional Market Disruption Event, the Asset Quantity in respect of each Underlying Fund is assigned and rebalanced on a monthly basis. Each such Asset Quantity may positive or negative and, therefore, the Underlying Strategy may have a long or short exposure (or no exposure) to each Underlying Fund.

The Underlying Strategy is an "excess return" strategy and, therefore, the value of the Underlying Strategy shall not include the accrual of any amount in relation to a money market rate.

2.2 Calculation of the Underlying Strategy Value

The Underlying Strategy Value on the Strategy Inception Date was equal to the Strategy Initial Value.

The Underlying Strategy Value shall be calculated by the Strategy Calculation Agent on each Strategy Business Day following the Strategy Inception Date as an amount in the Strategy Currency (subject to a floor of zero) equal to:

- (a) the Underlying Strategy Value in respect of the Strategy Rebalancing Day immediately preceding such Strategy Business Day (" V_{VRt} "); multiplied by
- (b)
 - (i) the Basket Value in respect of such Strategy Business Day (" B_t "); divided by
 - (ii) the Basket Value in respect of the Strategy Rebalancing Day immediately preceding such Strategy Business Day (or, if none, 100) (" B_{VRt} "),

provided that if the Underlying Strategy Value in respect of such Strategy Business Day is (or is deemed to be) zero, the Underlying Strategy Value in respect of each Strategy Business Day immediately following such Strategy Business Day shall also be zero.

Expressed as a formula, the Underlying Strategy Value on each Strategy Business Day following the Strategy Inception Date is as follows:

$$V_{VRt} \times \left(\frac{B_t}{B_{VRt}} \right)$$

2.3 Calculation of the Basket Value

The Basket Value on the Strategy Inception Date was equal to 100.

The Basket Value shall be calculated by the Strategy Calculation Agent on each Strategy Business Day following the Strategy Inception Date as an amount (subject to a floor of zero) equal to:

- (a) the summation in respect of each Underlying Fund of the Asset Quantity multiplied by the Asset Value, in each case, in respect of such Underlying Fund and Strategy Business Day; plus
- (b)
 - (i) the Cash Asset Quantity in respect of such Strategy Business Day; multiplied by
 - (ii) one (1),

provided that if the Basket Value in respect of such Strategy Business Day is (or is deemed to be) zero, the Basket Value in respect of each Strategy Business Day immediately following such Strategy Business Day shall be zero.

2.4 Calculation of the Asset Value for each Underlying Fund

The Asset Value in respect of each Underlying Fund in respect of the Asset Inception Date was 100.

The Asset Value in respect of an Underlying Fund in respect of each Asset Business Day following the Asset Inception Date shall be calculated by the Strategy Calculation Agent as:

- (a) the Asset Value in respect of the Asset Rebalancing Day in respect of such Underlying Fund immediately preceding such Asset Business Day; multiplied by
- (b)
 - (i) one (1); minus
 - (ii) the Money Market Index Value in respect of such Asset Business Day divided by the Money Market Index Value in respect of the Asset Rebalancing Day immediately preceding such Asset Business Day; plus
 - (iii) the Adjusted Reference Level in respect of such Underlying Fund and Asset Business Day divided by the Adjusted Reference Level in respect of such Underlying Fund in respect of the Asset Rebalancing Day immediately preceding such Asset Business Day.

2.5 Calculation of the Asset Quantity for each Underlying Fund

The Asset Quantity in respect of an Underlying Fund in respect of each Strategy Business Day falling after the Strategy Inception Date that is not a Basket Rebalancing Day shall be equal to Asset Quantity in respect of such Underlying Fund in respect of the Basket Rebalancing Day immediately preceding such Strategy Business Day.

The Asset Quantity in respect of an Underlying Fund in respect of each Basket Rebalancing Day shall be calculated by the Strategy Calculation Agent as:

- (a) the Asset Weight in respect of such Underlying Fund multiplied by the Basket Value in respect of the Basket Observation Day relating to such Basket Rebalancing Day (or, in respect of the Basket Rebalancing Day falling on the Strategy Inception Date, 100); divided by
- (b) the Asset Value in respect of the Basket Observation Day relating to such Basket Rebalancing Day.

2.6 Calculation of the Cash Asset Quantity

The Cash Asset Quantity on the Strategy Inception Date was equal to the Initial Cash Asset Quantity,

The Cash Asset Quantity shall be calculated by the Strategy Calculation Agent on each Strategy Business Day following the Strategy Inception Date as follows:

- (a) where such Strategy Business Day does not fall on a Basket Rebalancing Day, an amount equal to:
 - (i) the Cash Asset Quantity in respect of the Basket Rebalancing Day immediately preceding such Strategy Business Day (or, if none, the Initial Cash Asset Quantity); minus
 - (ii) the Asset Servicing Cost in respect of such Strategy Business Day.
- (b) where such Strategy Business Day falls on a Basket Rebalancing Day, an amount calculated by the Strategy Calculation Agent in accordance with the following formula:

$$q_{c,BRt} + \frac{1}{C_t^B} \times \left\{ \sum_{i=1}^8 [(q_{i,BRt} - q_{i,t}) \times A_{i,t}^{Ex}] - RC_t^B - SC_t \right\}$$

Where:

$q_{c,BRt}$ means the Cash Asset Quantity in respect of the Basket Rebalancing Day immediately preceding such Strategy Business Day (or, if none, the Initial Cash Asset Quantity);

C_t^B means one (1);

i means each Underlying Fund;

$q_{i,BRt}$ means the Asset Quantity in respect of the relevant Underlying Fund in respect of the Basket Rebalancing Day immediately preceding such Strategy Business Day (or, if none, in respect of the Strategy Inception Date);

$q_{i,t}$ means the Asset Quantity in respect of the relevant Underlying Fund and such Strategy Business Day;

$A_{i,t}^{Ex}$ means the Asset Value in respect of the relevant Underlying Fund and such Strategy Business Day;

RC_t^B means the Basket Rebalancing Cost in respect of such Strategy Business Day; and

SC_t means the Asset Servicing Cost in respect of such Strategy Business Day.

2.7 Basket Rebalancing Cost

The Basket Rebalancing Cost in respect of (a) the Strategy Inception Date and (b) each Strategy Business Day following the Strategy Inception Date that is not a Basket Rebalancing Day, is equal to zero.

The Basket Rebalancing Cost in respect of each Basket Rebalancing Day following the Strategy Inception Date shall be calculated by the Strategy Calculation Agent in accordance with the following formula:

$$\sum_{i=t}^8 (T_{i,t}^A \times A_{i,t}^{Ex} \times |q_{i,BRt} - q_{i,t}|)$$

Where:

$TC_{i,t}^A$ means the Asset Transaction Cost Rate in respect of the relevant Underlying Fund;

$A_{i,t}^{Ex}$ means the Asset Value in respect of the relevant Underlying Fund and such Strategy Business Day;

$q_{i,BRt}$ means the Asset Quantity in respect of the relevant Underlying Fund in respect of the Basket Rebalancing Day immediately preceding such Basket Rebalancing Day (or, if none, in respect of the Strategy Inception Date); and

$q_{i,t}$ means the Asset Quantity in respect of the relevant Underlying Fund and such Basket Rebalancing Day.

2.8 Asset Servicing Cost

The Asset Servicing Cost in respect of the Strategy Inception Date was equal to zero.

The Asset Servicing Cost in respect of each Strategy Business Day following the Strategy Inception Date shall be calculated by the Strategy Calculation Agent in accordance with the following formula:

$$\sum_{i,t}^8 \left[q_{i,BRt} \times \sum_{s=BRt}^{t-1} (A_{i,s} \times DCF_{s,s+1} \times CC_{i,2}^A) \right]$$

Where:

$q_{i,BRt}$ means the Asset Quantity in respect of the relevant Underlying Fund and the Basket Rebalancing Day immediately preceding such Strategy Business Day;

t means the relevant Strategy Business Day;

s means each relevant Strategy Business Day falling in the period commencing on (and including) the Basket Rebalancing Day immediately preceding such Strategy Business Day to (and including) the Strategy Business Day immediately preceding such Strategy Business Day;

$A_{i,s}$ means the Asset Value in respect of the relevant Underlying Fund and Strategy Business Day s ;

$DCF_{s,s+1}$ means the actual number of days in the period commencing on (and including) Strategy Business Day s and ending on (but excluding) the Strategy Business Day immediately preceding Strategy Business Day s , divided by 360; and

$CC_{i,s}^A$ means the Asset Servicing Cost Rate in respect of the relevant Underlying Fund.

4. Description of the Money Market Index

4.1 Overview of the Money Market Index

The Money Market Index intends to express the notional returns accruing to a hypothetical investor from an investment in a notional overnight money account denominated in the Strategy Currency that accrues interest at a rate determined by reference to the Euro Overnight Index Average ("EONIA") rate.

4.2 Calculation of the Money Market Index Value

The Money Market Index Value on the Strategy Inception Date was equal to the Strategy Initial Value.

The Money Market Index Value shall be calculated by the Strategy Calculation Agent on each Strategy Business Day following the Strategy Inception Date as an amount equal to:

- (a) the Money Market Index Value in respect of the Overnight Interest Rate Business Day immediately preceding such Strategy Business Day (or, if none, the Strategy Initial Value); multiplied by
- (b) the greater of:
 - (i) zero; and
 - (ii) (A) one; plus
 - (B) the Overnight Interest Rate in respect of the Overnight Interest Rate Business Day immediately preceding such Strategy Business Day multiplied by (I) the actual number of days in the period commencing on (and including) the Overnight Interest Rate Business Day immediately preceding such Strategy Business Day and ending on (but excluding) such Strategy Business Day, divided by (II) 360,

provided that if the Money Market Index Value in respect of such Strategy Business Day is equal to or less than zero, the Money Market Index Value in respect of such Strategy Business Day and all subsequent Strategy Business Days shall be zero.

Subject as provided in "Change in Methodology and Overnight Interest Rate and Termination" below, the Strategy Calculation Agent will make available the Money Market Index Value on each Strategy Business Day.

Each Money Market Index Value will be published on the Strategy Bloomberg Ticker.

4.3 **Change in Methodology and Overnight Interest Rate and Termination**

(a) ***Change in Methodology and Overnight Interest Rate***

If any fiscal, market, regulatory, juridical, financial or other circumstances arise that would, in the view of the Strategy Sponsor, necessitate or make desirable a modification or change of the methodology in respect of the Money Market Index, the Strategy Sponsor reserves the right to make such changes to the methodology in respect of the Money Market Index to account for the occurrence of such circumstance(s).

In particular, if EONIA is not published (or, if published, is deemed to be manifestly incorrect) for a period longer than three Overnight Interest Rate Business Days, the Strategy Sponsor may substitute EONIA with an alternative euro overnight interest rate option.

The Strategy Sponsor shall be entitled to make modifications to the terms of the Money Market Index in any manner it may deem necessary or desirable, including (without limitation) to correct any manifest or proven error, or to cure, correct or supplement any ambiguity or defective provision contained in the methodology for the Money Market Index.

The Strategy Sponsor may, but is not required to, establish a committee comprising of employees of the Strategy Sponsor and external members with the relevant academic or professional background to consider any proposed changes outlined above. The rules, responsibilities and powers of any such committee shall be pre-defined by the Strategy Sponsor.

(b) ***Termination***

The Strategy Sponsor may, in its sole discretion, at any time and without notice, terminate the calculation and publication of the Money Market Index.

5. **Definitions**

"Additional Market Disruption Event" has the meaning given to such term in Section 7 (*Additional Market Disruption Events, Potential Adjustment Events and Consequences*).

"Adjusted Reference Level" means, in respect of an Underlying Fund and an Asset Business Day in respect of such Underlying Fund, the Reference Level in respect of such Underlying Fund and Asset Business Day, as adjusted by the Strategy Calculation Agent following the occurrence of any Potential Adjustment Event.

"Asset Business Day" means, in respect of an Underlying Fund, 31 October 2018 (the **"Asset Inception Date"**) and, thereafter, each day on which (a) the Net Asset Value per share or unit of such Underlying Fund is scheduled to be published or made available in respect of such day and (b) a Strategy Fund Market Disruption Event has not occurred in respect of such Underlying Fund.

"Asset Rebalancing Day" means, in respect of an Underlying Fund, each Asset Business Day on which both the Asset Value and Adjustment Reference Level in respect of such Underlying Fund are strictly greater than zero.

"Asset Servicing Cost Rate" means, in respect of each Underlying Fund, zero per cent; **provided that** the Strategy Sponsor, acting in a reasonable manner and in good faith, shall have the right to amend the Asset Servicing Cost Rate if the Strategy Sponsor determines, in its sole and absolute discretion, that the costs that a hypothetical investor would incur in investing in, rebalancing, maintaining positions in, or synthetically replicating the performance of, transactions linked to such Underlying Fund.

"Asset Transaction Cost Rate" means zero per cent; **provided that** the Strategy Sponsor, acting in a reasonable manner and in good faith, shall have the right to amend the Asset Transaction Cost Rate if the Strategy Sponsor determines, in its sole and absolute discretion, that the costs that a hypothetical investor would incur in investing in, rebalancing, maintaining positions in, or synthetically replicating the performance of, transactions linked to such the Underlying Strategy or the relevant Underlying Fund (as the case may be).

"**Asset Weight**" means, in respect of each Underlying Fund, 12.50 per cent.

"**Basket Observation Day**" means 2 November 2018 and, thereafter, the first calendar day of each calendar month from (but excluding) November 2018 (or, in each case, the Strategy Business Day immediately preceding such day if such day is not a Strategy Business Day).

"**Basket Rebalancing Day**" means each Strategy Business Day which falls in a Basket Rebalancing Period (which, for the avoidance of doubt, includes the Strategy Inception Date), subject to postponement by the Strategy Sponsor in accordance with Section 6 (*Disruption Events and Consequences*) or Section 7 (*Additional Market Disruption Events, Potential Adjustment Events and Consequences*); **provided that**, if on any such Strategy Business Day the Basket Value or the Asset Value of an Underlying Fund is less than zero, such Strategy Business Day shall not constitute a Basket Rebalancing Day and no Basket Rebalancing Days shall occur after such Strategy Business Day.

"**Basket Rebalancing Period**" means, in respect of:

- (a) the Strategy Inception Date, such Strategy Inception Date; and
- (b) any Basket Observation Day falling after the Strategy Inception Date, the period commencing on (and including) the Strategy Business Day which falls three Strategy Business Days after such Basket Observation Day (the "**Relevant Strategy Business Day**") and ending on (but excluding) the Strategy Business Day immediately following such Relevant Strategy Business Day.

"**Disruption Events**" means each of the relevant events set out in Section 6 (*Disruption Events and Consequences*).

"**Index Strategy Component**" means, in respect of:

- (a) the Strategy, the Underlying Strategy; and
- (b) the Underlying Strategy, the Money Market Index.

"**Initial Cash Asset Quantity**" means an amount calculated by the Strategy Calculation Agent as being equal to:

- (a)
 - (i) 100; minus
 - (ii) the summation in respect of each Underlying Fund of the Asset Quantity multiplied by the Asset Value, in each case, in respect of such Underlying Fund and the Strategy Inception Date; divided by
- (b) one (1).

"**Money Market Index Value**" means, in respect of any relevant day, the value the Money Market Index in respect of such day determined by the Strategy Calculation Agent in accordance with Section 6 (*Description of the Money Market Index*).

"**Net Asset Value**" means, in respect of an Underlying Fund and an Asset Business Day in respect of such Underlying Fund, the net asset value per share or unit of such Underlying Fund as reported by such Underlying Fund or the Fund Service Provider (as defined in Section 7 (*Additional Market Disruption Events, Potential Adjustment Event and Consequences*)) in respect of such Underlying Fund (or any successor thereto) in respect of such Asset Business Day or, if not so published, the net asset value per share or unit of such Underlying Fund as made available by such Underlying Fund or the Fund Service Provider in respect of such Underlying Fund (or any successor thereto) in respect of such Asset Business Day.

"**Overnight Interest Rate**" means, in respect of an Overnight Interest Rate Business Day, the rate determined by the Strategy Calculation Agent using the EONIA rate, expressed as a percentage, which is published on Refinitiv Screen EONIA RSF.REC.EONIA=.NaE Page (or any successor thereto), **provided that** if such rate is not published on such Overnight Interest Rate Business Day or, if published, the Strategy Sponsor determines in its reasonable judgement that such rate is manifestly incorrect, the

Strategy Sponsor will use the Overnight Interest Rate determined in respect of the immediately preceding Overnight Interest Rate Business Day. For the avoidance of doubt, the Overnight Interest Rate may be negative.

"Overnight Interest Rate Business Day" means a day on which the Trans-European Automated Real-time Gross settlement Express Transfer (TARGET) system is open.

"Potential Adjustment Event" has the meaning given to such term in Section 7 (*Additional Market Disruption Events, Potential Adjustment Event and Consequences*).

"Reference Level" means, subject to the occurrence of an Additional Market Disruption Event, in respect of an Underlying Fund and an Asset Business Day in respect of such Underlying Fund, the Net Asset Value in respect of such Underlying Fund and Asset Business Day, as adjusted for any subscription costs, redemption costs or dealing charges that would have been charged to a hypothetical investor in such Underlying Fund, as determined by the Strategy Calculation Agent in good faith and a commercially reasonable manner; **provided that** any distributions and proceeds that are not received or not able to be readily liquidated into cash by a hypothetical investor within 30 calendar days of having validly submitted a redemption request (as determined by the Strategy Calculation Agent) may be valued at zero.

"Strategy Bloomberg Ticker" means, in respect of:

- (a) the Strategy, DYNAGFBV Index (or any successor thereto); and
- (b) the Money Market Index, GSMMEUR Index (or any successor thereto).

"Strategy Business Day" means, subject to postponement by the Strategy Sponsor in accordance with Section 6 (*Disruption Events and Consequences*) or Section 7 (*Additional Market Disruption Events, Potential Adjustment Events and Consequences*), in respect of:

- (a) the Strategy, the Strategy Inception Date and each Strategy Business Day in respect of the Underlying Strategy following the Strategy Inception Date;
- (b) the Underlying Strategy, each day that is an Asset Business Day in respect of each Underlying Fund; and
- (c) the Money Market Index, each day that is not a Saturday or Sunday.

"Strategy Calculation Agent" means, in respect of:

- (a) each of the Strategy and the Underlying Strategy, Solactive AG; and
- (b) the Money Market Index, Goldman Sachs International.

"Strategy Currency" means euro.

"Strategy Fund Market Disruption Event" has the meaning given to such term in Section 7 (*Additional Market Disruption Events, Potential Adjustment Event and Consequences*).

"Strategy Inception Date" means, in respect of:

- (a) the Strategy, 3 December 2018;
- (b) the Underlying Strategy, 7 November 2018; and
- (c) the Money Market Index, 4 January 1999.

"Strategy Initial Value" means 100.

"Strategy Rebalancing Day" means, subject to postponement by the Strategy Sponsor in accordance with Section 6 (*Disruption Events and Consequences*) or Section 7 (*Additional Market Disruption Events, Potential Adjustment Event and Consequences*), in respect of:

- (a) the Strategy, the Strategy Inception Date and each Strategy Business Day following the Strategy Inception Date, **provided that** if on any Strategy Business Day the value of the Strategy or the Underlying Strategy is equal to or less than zero, such Strategy Business Day shall not constitute a Strategy Rebalancing Day and no Strategy Rebalancing Days shall occur after such Strategy Business Day; and
- (b) the Underlying Strategy, the Strategy Inception Date and each Strategy Business Day in respect of which the Basket Value is greater than zero, **provided that** if on any Strategy Business Day the value of the Strategy or the Basket Value is equal to or less than zero, such Strategy Business Day shall not constitute a Strategy Rebalancing Day and no Strategy Rebalancing Days shall occur after such Strategy Business Day.

"Strategy Sponsor" means Goldman Sachs International (or any successor thereto).

"Strategy Value" means, in respect of any relevant day, the value of the Strategy in respect of such day determined by the Strategy Calculation Agent in accordance with Section 1.2 (*Calculation of the value of the Strategy*).

"Underlying Fund" means each Underlying Fund as set out in the table in Section 3 (*Underlying Fund Table*).

"Underlying Strategy Value" means, in respect of any relevant day, the value of the Underlying Strategy in respect of such day determined by the Strategy Calculation Agent in accordance with Section 2 (*Description of the Underlying Strategy*).

6. Disruption Events and Consequences

6.1 Disruption Events applicable to an Index Strategy Component

- (a) If an Index Strategy Component in respect of the Strategy or the Underlying Strategy (for the purposes of this Section 6 (*Disruption Events and Consequences*)) only, a **"Relevant Strategy"** is either:
 - (i) not calculated and announced by the Strategy Sponsor but is calculated by a successor sponsor acceptable to the Strategy Sponsor; or
 - (ii) replaced by a successor strategy using, in the determination of the Strategy Sponsor the same or substantially same formula as such Index Strategy Component,

then, in relation to (i) the Index Strategy Component shall continue to be the underlying asset in respect of the Relevant Strategy, and, in relation to (ii) such successor strategy shall be deemed to become an underlying asset in respect of the Relevant Strategy and, in each case, the Strategy Sponsor may make such adjustment to the Relevant Strategy as it deems appropriate to account for such change.

- (b) If:
 - (i) the Strategy Sponsor or the sponsor of any Underlying Fund announces that it will make a material change in the formula for calculating the relevant Index Strategy Component (or any component thereof) or in any other way materially modifies such Index Strategy Component (or any component thereof) (other than any modification prescribed in the formula for the purpose of maintaining such Index Strategy Component (or such component thereof) in the event of changes to its composition);
 - (ii) such Index Strategy Component (or any component thereof) is permanently cancelled by its sponsor without any successor thereto, or ceases to exist or is no longer tradeable, including as a result of any member of the Goldman Sachs Group discontinuing the relevant Index Strategy Component; or
 - (iii) the Strategy Sponsor (or the sponsor of any component thereof) fails to calculate and announce the level of such Index Strategy Component (or such component thereof),

then, the Strategy Sponsor may:

- (A) remove the Index Strategy Component and/or select an alternative index to replace the Index Strategy Component (provided that such replacement is a similar alternative) and may such adjustments to the Relevant Strategy as it deems appropriate to account for such change; or
- (B) in relation to (i) and (iii) above, determine that no action be taken in respect of such Index Strategy Component.

6.2 Disruption Events in respect of the Strategy and the Underlying Strategy

For the purposes of this Section 6 (*Disruption Events and Consequences*), a "**Relevant Component**" shall mean, in respect of (i) the Strategy, the Underlying Strategy and (ii) the Underlying Strategy, each Underlying Fund and the Money Market Index.

If, in respect of a Relevant Component, any one or more of the following occur:

- (a) the Strategy Sponsor becomes aware of the adoption of, or any change in, applicable law, it is illegal for the Strategy Sponsor or the Strategy Calculation Agent to undertake their respective roles in relation to the Strategy or the Underlying Strategy (or they would incur materially increased costs in doing the same) or any relevant entity would be prevented in entering into any transactions in respect of the Strategy or a Relevant Component;
- (b) the Strategy Sponsor determines that a market participant would be unable to undertake certain actions in relation to all or a material portion of its hedge positions relating to a Relevant Component or would incur a material cost in doing so or an Additional Market Disruption Event occurs in relation to the Underlying Fund;
- (c) a force majeure event (including, without limitation, an act of God, an armed conflict or an act of terrorism) occurs that the Strategy Sponsor determines is likely to have a material effect on a Relevant Component or on its ability to perform its role in relation to the Strategy or the Underlying Strategy;
- (d) (i) the official, price, level, rate or other measure in relation to a Relevant Component is unavailable on any relevant day, (ii) any relevant exchange is not open for trading during its regular trading session or closes early, (iii) any trading disruption occurs which affects the ability of market participants to enter into transactions in relation to any product linked to the Strategy or the Underlying Strategy, (iv) certain events in relation to the disruption or conversion of a reference currency by reference to a currency exchange rate or (v) the Strategy Sponsor determines that the value of the Strategy or any Relevant Component is manifestly incorrect; or
- (e) where required, the Strategy Sponsor ceases to have any relevant data licence in respect of a Relevant Component,

then, the Strategy Sponsor (or the Strategy Calculation Agent on the instructions of the Strategy Sponsor) may take one or more of the following actions in order to preserve the intended commercial purpose of the Strategy or the Underlying Strategy (as the case may be):

- (i) make such determinations or adjustments to the Strategy or the Underlying Strategy (as the case may be) as it deems appropriate to account for the occurrence of such event and, as applicable, to the extent necessary to calculate the value in respect of the Strategy or the Underlying Strategy (as the case may be) in respect of such day;
- (ii) postpone any applicable rebalancing in whole or part of the Relevant Strategy to the next applicable business day on which no such event is continuing and make such adjustments as necessary to account for such postponement;
- (iii) suspend the publication of the value of the Strategy or the Underlying Strategy (as the case may be) until such event is not continuing;

- (iv) publish an indicative value of the Strategy or the Underlying Strategy (as the case may be) until such event is not continuing; or
- (v) remove or replace any affected Relevant Component with an alternative asset where it considers that a similar alternative is available.

6.3 Corrections

If a Relevant Component is rebased, otherwise adjusted or modified or a level is corrected within a reasonable amount of time after its initial publication, the Strategy Sponsor may (or the Strategy Sponsor may instruct the Strategy Calculation Agent to) take such steps as it considers appropriate in response to the same. In the case of a correction, such steps may include, amongst other things, a recalculation or other adjustment of any value in respect of the Relevant Component.

6.4 Change in Methodology

If any market, legal, regulatory, judicial, financial, fiscal or other circumstances arise that would, in the view of the Strategy Sponsor, necessitate or make desirable a modification or change of the methodology in respect of the Strategy or the Underlying Strategy in order to preserve the intended commercial purpose of the Strategy or the Underlying Strategy (as applicable), the Strategy Sponsor reserves the right to make such changes to the relevant methodology to account for the occurrence of such circumstance(s).

Accordingly, the Strategy Sponsor shall be entitled to make modifications and/or changes to the methodology in respect of the Strategy or the Underlying Strategy or any data obtained from a third party data source which is used to calculate the Strategy or the Underlying Strategy (as applicable) without notice as it deems appropriate, necessary or desirable, including, without limitation:

- (a) to correct any manifest or proven error contained in the relevant strategy methodology;
- (b) to cure, correct or supplement any ambiguity or contradictory or defective provision in the relevant strategy methodology;
- (c) to change the frequency of calculation of the Strategy or the Underlying Strategy (as the case may be) and make corresponding changes to the relevant strategy methodology to account for such change of frequency;
- (d) to permit the Strategy Calculation Agent to continue calculating and determining the value of the Strategy or the Underlying Strategy (as the case may be) and determining the weights of any component thereof respectively if market, legal, regulatory, judicial, financial, fiscal or other circumstances arise which were not reasonably foreseeable by the Strategy Sponsor and which have not been deliberately caused by the Strategy Sponsor and such circumstances would prevent the Strategy Calculation Agent from calculating and determining the value of the Strategy or the Underlying Strategy (as the case may be) and determining the weights of any component thereof respectively, and would necessitate a modification or change of the methodology in respect of the Strategy or the Underlying Strategy (as the case may be) in order for the value of the Strategy or the Underlying Strategy (as the case may be) to continue to be calculated and determined notwithstanding the relevant circumstances; and/or
- (e) to preserve the intended commercial purpose of the Strategy or the Underlying Strategy (as the case may be) where the change is of a formal, minor or technical nature.

Any such changes shall result in a methodology consistent with the intended commercial purpose of the Strategy or the Underlying Strategy (as the case may be). The Strategy Sponsor may, but is not required to, establish a committee comprising of employees of the Strategy Sponsor and an equal number of external members with the relevant academic or professional background to consider any proposed changes outlined above. The rules, responsibilities and powers of any such committee shall be pre-defined by the Strategy Sponsor.

In addition, if the aggregate notional amount of products or transactions linked to the Strategy or the Underlying Strategy (as the case may be) (or any other similar strategy sponsored by the Strategy Sponsor) exceeds a certain threshold (as determined by the Strategy Sponsor by reference to the hedging

capabilities of the Strategy Sponsor or any affiliate in respect of its exposure to the Strategy or the Underlying Strategy (as the case may be)) then the Strategy Sponsor may:

- (a) change the methodology of the Strategy or the Underlying Strategy (as applicable) to allow for rebalancing to occur more frequently;
- (b) replace the Strategy or the Underlying Strategy (as applicable) with a replacement strategy identical in all material respects other than the days on which rebalancing occurs; and/or
- (c) make such other adjustments to the Strategy or the Underlying Strategy (as applicable) in order to allow the Strategy Sponsor (or its affiliate) to effectively hedge its exposure to the Strategy or the Underlying Strategy (as applicable) or reduce expected liquidity impact of such hedging transactions,

in each case, whilst ensuring the relevant replacement or proposed changes shall result in the Strategy or the Underlying Strategy (as the case may be) being consistent with its intended commercial purpose.

7. Additional Market Disruption Events, Potential Adjustment Events and Consequences

7.1 Additional Market Disruption Events in respect of Underlying Funds

It shall constitute an Additional Market Disruption Event in respect of an Underlying Fund if the Strategy Sponsor determines (acting in good faith and a commercially reasonable manner) that any of the following events has occurred:

Strategy Fund Market Disruption Event	A suspension of subscriptions or redemptions (or similar method for increasing or decreasing exposure) in, or a failure to receive timely valuations for, an Underlying Fund.
Maximum AUM Event	At any time, the total exposure of the Strategy Sponsor and its affiliates to an Underlying Fund (in physical and synthetic form) is greater than the AUM Threshold of such Underlying Fund. " AUM Threshold " shall mean, in respect of an Underlying Fund, 10 (ten) per cent. of the AUM of such Underlying Fund as indicated by the most recently available data published by the Underlying Fund or relevant Fund Service Provider.
Non-Cash Dealing/Delayed Proceeds Event	The Fund Service Provider (a) fails to accept or execute subscriptions or redemptions wholly in cash or (b) fails to deliver cash proceeds in a timely manner as specified in the relevant Fund Prospectus and in any case within 30 calendar days of a validly submitted redemption request.
Winding-Up of Underlying Fund or Investment Advisor	An Underlying Fund or its investment advisor is unable to pay its debts as they fall due or otherwise becomes insolvent or goes into liquidation (other than for the purpose of reconstruction or amalgamation) or if a liquidator, administrator or equivalent is appointed in respect of such party or a substantial part of its assets or the Underlying Fund is the subject of a court order for its winding up or liquidation or other cessation of trading of an Underlying Fund or any shares issued by such Underlying Fund.
Increased Cost of Dealing and Charges	The Strategy Sponsor (or any of its affiliates) becomes liable to any increase in any tax, duty, costs or fees related to trading or holding the Underlying Fund (including in relation to any hedging transactions in respect of the Underlying Asset and/or the Underlying Strategy). The increase may be driven by, amongst other things, an action or inaction by or notification from a Fund Service Provider, an amendment of the Fund Prospectus of an Underlying Fund or an increase in the

	aggregate subscription or redemption costs or dealing charges incurred with regard to the relevant Underlying Fund.
Fund Service Provider Agreements	The (a) termination of the relevant Fund Service Provider Agreement; unless a replacement Fund Service Provider has been appointed, or (b) breach of any contractual obligations by a Fund Service Provider under the relevant Fund Service Provider Agreement which results in an increase in any of the costs or fees specified in relation to any Underlying Fund in the relevant Fund Prospectus, or (c), in respect of the investment advisory agreement only, any actual or potential termination of the investment advisory agreement, in each case, as notified by the directors of an Underlying Fund.
Underlying Fund Agreements	Any (a) termination, removal or amendment of any agreement or arrangement made by the Strategy Sponsor or its affiliates in respect of an Underlying Fund which results in the Strategy Sponsor (or any of its affiliates) becoming liable to an increase in any costs or fees related to trading or holding the Underlying Fund or (b) breach of any terms of any agreement made between the Strategy Sponsor or its affiliates and any counterparty in respect of an Underlying Fund (including but not limited to any failure by a counterparty to pay any fee rebate or other payment owed to the Strategy Sponsor or any of its affiliates under such agreement).
Dealing Restrictions	Any of (a) a decrease in the frequency of dealing in any shares issued by an Underlying Fund from the frequency stipulated in relation to such Underlying Fund in the relevant Fund Prospectus, (b) the imposition of any dealing restrictions in relation to any shares issued by an Underlying Fund not specified in the Fund Prospectus including, without limitation, a minimum or maximum dealing size (including any increase in dealing size, whether or not applicable solely to the Strategy Sponsor and/or its affiliates), (c) a delay (partial or otherwise) in dealing, an extension of the notice period, or material change in the notice times for dealing, or a suspension or termination of subscription or redemption, (d) any comparable restriction imposed on any similar method for increasing or decreasing exposure to an Underlying Fund not specified in the relevant Fund Prospectus.
Breach of Investment Guidelines and Restrictions	Any material deviation from the investment guidelines or breach of the investment restrictions of an Underlying Fund set out in relation to such Underlying Fund in the relevant Fund Prospectus.
Change to Investment Guidelines	An official, announced material change to the investment guidelines of an Underlying Fund which changes the investment objective of that Underlying Fund as specified in the relevant Fund Prospectus.
Composition of Investments made by each Underlying Fund	At any time, more than five (5) per cent. of any Underlying Fund's AUM is invested in unregulated collective investment schemes where the operator of such schemes has not applied for or obtained authorisation or recognition from any relevant national regulator.
Regulatory or Legal Action	Regulatory action, litigation, dispute or legal proceedings against an Underlying Fund, or its investment advisor or any Fund Service Provider that has a material adverse effect on the

functioning, operations, inflows or outflows of the relevant Underlying Fund.

Loss of licence or authority

An Underlying Fund, or its investment advisor or any Fund Service Provider (a) loses any relevant licence or new Conditions are imposed on such licence or (b) has any regulatory authorisation, registration or approval cancelled, suspended, revoked or removed for whatever reason, which has a material adverse effect on the functioning, operations, inflows or outflows of the relevant Underlying Fund.

Regulatory Event

On or after the Strategy Inception Date (a) due to the adoption of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "**Dodd-Frank Act**"), any rule or regulation resulting from the Dodd- Frank Act, or any change in any applicable law, rule, or regulation or the interpretation thereof as a result of the adoption of the Dodd- Frank Act or (b) due to the promulgation of or any change in the interpretation by any court, tribunal, or regulatory authority with competent jurisdiction of any applicable law, rule, or regulation, that (w) it has become, or within the next 30 calendar days will become without any further action by the Strategy Sponsor or its affiliates or an Underlying Fund, illegal to purchase or hold interests in an Underlying Fund, (x) it has become, or within the next 30 calendar days will become without any further action by the Strategy Sponsor or its affiliates, illegal for it directly or indirectly to hold, acquire, establish, re-establish, substitute, maintain, unwind, or dispose of any instruments or arrangements used to provide exposure (whether direct or indirect) to an Underlying Fund, (y) the regulatory status of an Underlying Fund as specified in the relevant Fund Prospectus has changed, or (z) the Strategy Sponsor or its affiliates will incur a materially increased cost in performing any obligations or executing any hedging transactions in respect of the Underlying Strategy.

Tax Event

Any change in tax law or interpretation of tax law which would affect payments made to investors in, or an investor having exposure to, the relevant Underlying Fund.

Material Adverse Fund Event

In respect of an Underlying Fund on any day, the occurrence of any of the following events:

- (a) the quotient of (A) the net asset value per share or unit of such Underlying Fund as of such day, divided by (B) the highest net asset value per share or unit of such Underlying Fund during the six months immediately preceding such day is less than Limit 1 of such Underlying Fund as specified in Section 3 (*Underlying Fund Table*) adjusted for any share split, merger, dividend or any other corporate action as determined by Strategy Sponsor; or
- (b) the quotient of (A) the AUM of such Underlying Fund as of such day, divided by (B) the highest AUM of such Underlying Fund during the six months immediately preceding such day is less than Limit 2 of such Underlying Fund as specified in Section 3 (*Underlying Fund Table*), adjusted for corporate actions as determined by the Strategy Sponsor, or

- (c) the annualised daily realised volatility in relation to such Underlying Fund calculated over the six months immediately preceding such day is greater than Limit 3 of such Underlying Fund as specified in Section 3 (*Underlying Fund Table*), as determined by the Strategy Sponsor.

For the purposes of each Additional Disruption Events described above:

"**AUM**" means in respect of an Underlying Fund, the assets under management of such Underlying Fund as calculated and published by such Underlying Fund, as determined by the Strategy Sponsor.

"**Fund Prospectus**" means, in respect of an Underlying Fund, the relevant prospectus and supplement (if applicable) in respect of such Underlying Fund as outlined in Section 3 (*Underlying Fund Table*).

"**Fund Service Provider**" means, in relation to an Underlying Fund, any person who is appointed to provide services (including, for the avoidance of doubt, in respect of effecting subscriptions and redemptions in shares issued by such Underlying Fund), directly or indirectly, for an Underlying Fund, including the investment advisor, fund administrator, registrar and any other person specified as such in the relevant Fund Prospectus.

"**Fund Service Provider Agreement**" means an agreement entered into by, or on behalf of, an Underlying Fund and a Fund Service Provider.

7.2 Consequences of Additional Market Disruption Events

If an Additional Market Disruption Event has occurred with respect to an Underlying Fund, the Strategy Sponsor may, acting in good faith and a commercially reasonable manner:

- (a) confirm the occurrence of the Additional Market Disruption Event;
- (b) if relevant, determine the date of occurrence of the Additional Market Disruption Event;
- (c) if relevant, determine the date on which the Additional Market Disruption Event was cured or waived;
- (d) if relevant, determine appropriate amendments to the Underlying Strategy which may include, among other things, amendments to the determination of Asset Business Days, various types of rebalancing days and/or Reference Levels. For the avoidance of doubt, this might lead to a halt in the publication of value of the Underlying Strategy and/or the occurrence of certain non-Strategy Business Days; and/or
- (e) if relevant, determine appropriate amendments to any other strategy that might be affected by the occurrence of the Additional Market Disruption Event which may include, amongst other things, amendments to the computation of the realised volatility of the Strategy.

For the avoidance of doubt, with respect to an Underlying Fund, if an Additional Market Disruption Event has occurred, the amended calculation methodology of the Reference Level may refer to:

- (a) cash proceeds (if any) realised by a hypothetical investor within 30 calendar days after having validly submitted a redemption request in respect of such Underlying Fund; **provided that** if the Strategy Sponsor determines that a hypothetical investor would have validly submitted a redemption request in respect of an Underlying Fund and a period of 30 calendar days had elapsed following such redemption request and the Fund Service Provider has failed to deliver the full cash proceeds, the Strategy Sponsor may value the relevant Underlying Fund at zero;
- (b) any published values that the Strategy Sponsor determines are relevant; and/or
- (c) an asset that the Strategy Sponsor determines is a relevant substitute (the "**Substitution Asset**") in respect of the relevant Underlying Fund. When selecting the Substitution Asset for any relevant Underlying Fund, the Strategy Sponsor may take into consideration the following criteria:

- (i) the proceeds per share or unit of the Underlying Fund that would be realised in cash by a hypothetical investor within 30 calendar days after having validly submitted a redemption request in respect of such Underlying Fund, net of any dealing charges that the Strategy Sponsor or its affiliates may have incurred in performing any obligations or executing any hedging transactions in respect of the relevant Underlying Fund;
- (ii) the asset class of the relevant Underlying Fund and the Substitution Asset;
- (iii) the investment objectives of the relevant Underlying Fund and the Substitution Asset;
- (iv) the geographical focus of the relevant Underlying Fund and the Substitution Asset;
- (v) the fees and expenses of the relevant Underlying Fund and the Substitution Asset;
- (vi) the assets under management and the investment advisor of the relevant Underlying Fund and the Substitution Asset;
- (vii) the relevant "live track record" of the relevant Underlying Fund and the Substitution Asset; and
- (viii) the realised volatility of the relevant Underlying Fund and the Substitution Asset.

For the avoidance of doubt:

- (A) there is no obligation for the Strategy Sponsor to select a Substitution Asset that satisfies all these criteria;
- (B) the Substitution Asset shall not be limited to equivalent fund assets and might be composed of securities, indices or cash;
- (C) the Substitution Asset may not be limited to a single instrument and might be composed of several instruments;
- (D) the calculation methodology of the Substitution Asset may refer to levels reported by the Strategy Sponsor, service providers, fund assets, exchanges and/or asset sponsors; and
- (E) after the Strategy Sponsor has determined a Substitution Asset and the date on which such substitution shall take effect:
 - (1) the relevant Additional Market Disruption Event will be deemed to have been cured and on each subsequent Strategy Business Day;
 - (2) the relevant Underlying Fund shall cease to be an Asset of the Strategy from such date;
 - (3) the Substitution Asset(s) shall be deemed to be an Underlying Fund of the Strategy from such date; and
 - (4) the Basket Value shall be calculated based on the performance of such revised set of Underlying Funds in the Basket.

Potential Adjustment Events in respect of Underlying Funds

If the Strategy Sponsor determines that a Potential Adjustment Event has occurred in respect of an Underlying Fund (an "**Affected Underlying Fund**") or following any adjustment to the settlement terms of listed options or futures contracts on such Affected Underlying Fund traded on an options or futures exchange, the Strategy Sponsor will determine whether such Potential Adjustment Event or adjustment to the settlement terms of listed options or futures contracts on such Affected Underlying Fund traded on an options or futures exchange has a diluting or concentrative effect on the theoretical value of such Affected Underlying Fund and, if so will:

- (a) make the corresponding adjustment, if any, to one or more determinations under the Underlying Strategy, as the Strategy Sponsor determines appropriate to account for that diluting or concentrative effect (provided that no adjustments will be made to account solely for changes in volatility, expected dividends, stock loan rate or liquidity relative to such Affected Underlying Fund), including, without limitation, an adjustment to the Adjusted Reference Level in respect of such Affected Underlying Fund; and
- (b) determine the effective date of such adjustment.

The Strategy Sponsor may, but need not, determine the appropriate adjustment by reference to, amongst other things, the adjustment in respect of such Potential Adjustment Event made by other equity market dealers and/or exchanges (including, but not limited to, the reference exchange for such Affected Underlying Fund, and options and futures exchanges related to such Affected Underlying Fund) or quoting services.

"Potential Adjustment Event" means, in respect of an Affected Underlying Fund, any of the following:

- (a) a subdivision, consolidation or reclassification of the relevant Affected Underlying Fund (unless resulting in a merger event) or a free distribution or dividend of any such Affected Underlying Fund to existing holders of such Affected Underlying Fund by way of bonus, capitalisation, or similar issue;
- (b) a distribution, issue or dividend to existing holders of the relevant Affected Underlying Fund of (a) such Affected Underlying Fund, or (b) other share capital or securities granting the right to payment of dividends and/or the proceeds of liquidation of the issuer of such Affected Underlying Fund equally or proportionately with such payments to holders of such Affected Underlying Fund, or (c) share capital or other securities of another issuer acquired or owned (directly or indirectly) by the issuer of such Affected Underlying Fund as a result of a spin-off or other similar transaction, or (d) any other type of securities, rights, or warrants, or other assets, in any case for payment (in cash or in other consideration) at less than the prevailing market price, all as determined by the Strategy Sponsor;
- (c) an extraordinary dividend;
- (d) a call by the issuer of such Affected Underlying Fund in respect of such Affected Underlying Fund that are not fully paid;
- (e) a repurchase by the issuer of such Affected Underlying Fund or any of its subsidiaries of such Affected Underlying Fund whether out of profits or capital and whether the consideration for such repurchase is cash, securities, or otherwise;
- (f) in respect of the issuer of such Affected Underlying Fund, an event that results in any shareholder rights being distributed or becoming separated from shares of common stock or other shares of the capital stock of such issuer pursuant to a shareholder rights plan or arrangement directed against hostile takeovers that provides upon the occurrence of certain events for a distribution of preferred stock, warrants, debt instruments, or stock rights at a price below their market value, as determined by the Strategy Sponsor, provided that any adjustment effected as a result of such an event shall be readjusted upon any redemption of such rights; or
- (g) any other event having a diluting or concentrative effect on the theoretical value of the relevant Affected Underlying Fund, as determined by the Strategy Sponsor.

8. Additional Definitions

"Currency Exchange Rate Disruption Event" means (and a Currency Exchange Rate Disruption Event shall be deemed to have occurred if), in respect of a currency exchange rate and a relevant day:

- (a) such currency exchange rate splits into dual or multiple currency exchange rates;
- (b) an event has occurred in or affecting any jurisdiction that generally makes it impossible to convert the applicable reference currency into the Strategy Currency through customary legal channels;

- (c) an event has occurred in or affecting any relevant jurisdiction that generally makes it impossible to deliver (i) the Strategy Currency from accounts inside such jurisdiction to accounts outside such jurisdiction, or (ii) the Strategy Currency between accounts inside such jurisdiction for the applicable reference currency or to a party that is a non-resident of such jurisdiction;
- (d) a default, event of default, or other similar Condition or event (however described) with respect to any security or indebtedness for borrowed money of, or guaranteed by, any applicable governmental authority (as defined below), including, but not limited to:
 - (A) the failure of timely payment in full of any principal, interest, or other amounts due (without giving effect to any applicable grace periods) in respect of any such security, indebtedness, or guarantee;
 - (B) a declared moratorium, standstill, waiver, deferral, repudiation, challenge of the validity, or rescheduling of any principal, interest, or other amounts due in respect of any such security, indebtedness, or guarantee;
 - (C) the amendment or modification of the terms and conditions of payment of any principal amount, interest, or other amounts due in respect of any such security, indebtedness, or guarantee without the consent of all holders of such obligation.

For these purposes, the determination of the existence or occurrence of any default, event of default, or other similar Condition or event shall be made without regard to any lack or alleged lack of authority or capacity of such governmental authority to issue or enter into such security, indebtedness, or guarantee. "governmental authority" means any de facto or de jure government (or any agency or instrumentality thereof), court, tribunal, administrative, executive, legislative or other governmental authority, or any other entity (private or public) charged with the regulation of the financial markets (including the central bank) of a reference country (which with respect to the euro shall include the European Union as well as any member state thereof from time to time whose currency is the euro).

- (A) it is or becomes impossible or not reasonably practicable for the Index Sponsor or any of its affiliates to obtain such currency exchange rate from the source typically used for such currency exchange rate, or to obtain a firm quote for such currency exchange rate;
- (B) any expropriation, confiscation, requisition, nationalization or other action by a relevant governmental authority occurs which deprives the Index Sponsor or any of its affiliates of all or substantially all of its assets in any relevant jurisdiction; or
- (C) the applicable reference currency and/or Strategy Currency, as the case may be, ceases to exist and is replaced by a new currency.

"Force Majeure Event" means the occurrence of a systems failure, natural or man-made disaster, act of God, armed conflict, act of terrorism, riot or labour disruption or any similar intervening circumstance that is beyond the reasonable control of the Index Sponsor, Strategy Calculation Agent or any of their respective affiliates that the Index Sponsor determines is likely to have a material effect on an Index Strategy Component, or on its ability to perform its role in respect of the Proprietary Index.

"Hedging Disruption" means, (and a Hedging Disruption shall be deemed to occur if):

- (a) the Index Sponsor becomes aware of (i) the adoption of, or change in, any applicable law or (ii) the promulgation of, or any change in, the interpretation of any applicable law by a court, tribunal or regulatory authority with competent jurisdiction, which has the effect that (x) the performance by the Index Sponsor or Strategy Calculation Agent of their respective roles in respect of the Proprietary Index has become unlawful, impracticable or would result in materially increased costs to them in whole or in part for any reason, or (y) any relevant entity would be prevented from entering into transactions in respect of such Proprietary Index or Index Strategy Component (including any Index Strategy Component where the Index Sponsor and/or any of its affiliates is sponsor) by any applicable law or regulation; or
- (b) (i) the Index Sponsor determines that a market participant, as a result of a market-wide Condition relating to such Proprietary Index and/or Index Strategy Component would (x) be

unable, after using commercially reasonable efforts, to acquire, establish, re-establish, substitute, maintain, unwind, or dispose of all or a material portion of any hedge position relating to such Index Strategy Component, or (y) incur a materially increased cost in doing so, including due to any capital requirements or other law or regulation, or (ii) any other event described as an Additional Market Disruption Event occurs.

"Other Disruption" means:

- (a) the official price, level, rate or other measure of any Index Strategy Component is unavailable on any relevant day on which such measure is scheduled to be published (including cases where a member of the Goldman Sachs Group is the sponsor or calculation agent of such Index Strategy Component);
- (b) the relevant reference exchange is not open for trading during its regular trading session, or closes prior to its scheduled closing time, on any relevant day;
- (c) a trading disruption occurs in respect of the relevant reference exchange or any other event or circumstance occurs which, in the reasonable judgement of the Index Sponsor, (A) affects the ability of market participants in general to enter into transactions in respect of such Index Strategy Component in a notional size required in relation to any product or transaction linked to the relevant Proprietary Index, (B) impairs the liquidity of any transactions in relation to such Index Strategy Component and/or (C) affects the value of such Index Strategy Component;
- (d) a Currency Exchange Rate Disruption Event has occurred; or
- (e) the value of such Proprietary Index and/or Index Strategy Component is, in the reasonable judgement of the Index Sponsor or Strategy Calculation Agent, manifestly incorrect.

**DESCRIPTION OF THE GOLDMAN SACHS GLOBAL DIVERSIFIED MULTI-ASSET
SERIES 2 5% INDEX**

The following description (this "**Description**") of each of:

- (i) the Goldman Sachs Global Diversified Multi-Asset Series 2 5% Index (for purposes of this section only, the "**Index**");
- (ii) the Goldman Sachs Diversified Multi-Asset Basket EUR ER Index (for purposes of this section only, the "**Underlying Index**");
- (iii) the Goldman Sachs US and EUR Government Bond Basket USD ER Strategy (the "**Govt Bond Strategy**");
- (iv) the US Government Bond Futures Rolling Strategy Index (the "**UST Futures Index**");
- (v) the European Government Bond Futures Rolling Strategy Index (the "**Euro Bond Futures Strategy Index**" and, together with the UST Futures Index, the "**Bond Indices**");
- (vi) the Goldman Sachs Commodity Focus Basket USD ER Index (for purposes of this section only, the "**Commodity Index**");
- (vii) the Goldman Sachs EUA USD Strategy (the "**EUA USD Strategy**");
- (viii) the Goldman Sachs Enhanced Strategy MOZE on S&P GSCI Carbon Emission Allowances EUA (EUR) Index (the "**EUA EUR Strategy**");
- (ix) the EUR Goldman Sachs Overnight Money Market Index (the "**EUR Money Market Index**");
- (x) the EUR STR Goldman Sachs Overnight Money Market Index (the "**EUR STR Money Market Index**"); and
- (xi) the USD Goldman Sachs Overnight Money Market Index (the "**USD Money Market Index**" and, together with the EUR Money Market Index and the EUR STR Money Market Index, each a "**Money Market Index**" and together the "**Money Market Indices**"),

(the Index, the Underlying Index, the Govt Bond Strategy, the Bond Indices, the Commodity Index, the EUA USD Strategy, the EUA EUR Strategy and each Money Market Index, a "**Relevant Strategy**"), is subject to, and qualified in its entirety by, the methodology in respect of such Relevant Strategy as published or made available by Goldman Sachs International (or any successor thereto) (the "**Strategy Sponsor**" in respect of such Relevant Strategy) from time to time.

Any such methodology may be amended or modified from time to time at the discretion of the Strategy Sponsor in accordance with the terms set out therein. Copies of such methodologies shall be made available by the Strategy Sponsor from www.goldmansachsindices.com (or any successor page thereto).

A prospective purchaser of Index Linked Securities should also carefully review the risk factors in relation to the Index and the other Relevant Strategies set out in the section of this Base Prospectus entitled "Risk Factors" before purchasing any Index Linked Securities.

Each Relevant Strategy is a synthetic rules-based proprietary strategy created by the Strategy Sponsor. All determinations made pursuant to each Relevant Strategy are reserved for the Strategy Sponsor only, save that, in respect of:

- (1) each Relevant Strategy other than the Bond Indices, Goldman Sachs International; and
- (2) each Bond Index, Standard & Poor's,

(acting as calculation agent, the "**Strategy Calculation Agent**" in respect of the relevant Relevant Strategy) may determine the value of the relevant Relevant Strategy from time to time in accordance with the relevant methodology.

The Strategy Sponsor owns the copyright and all other rights to each Relevant Strategy.

The structure of the Index is set out in the diagram below:

1. Description of the Index

Capitalised terms defined in this Section 1 (*Description of the Index*) (including in Section 1.8 (*Definitions in respect of the Index*)) shall have the meaning given to them solely for the purposes of this Section 1 (*Description of the Index*) unless otherwise specified or cross-referred to.

1.1 Overview of the Index

The Goldman Sachs Global Diversified Multi-Asset 5% Series 2 Index (*Bloomberg Code: GSISCC52 <Index>*) (referred to in this section as the "Index") seeks to provide a volatility-targeted exposure to the performance of the Underlying Index.

The volatility adjustment feature systematically adjusts the exposure of the Index to the performance of the Underlying Index by adjusting the weight of its exposure to the Underlying Index if a specified measure of the realised volatility of the Underlying Index would otherwise deviate from a target of pre-defined volatility target of 5.00 per cent. (the "**Volatility Target**") on any Strategy Rebalancing Day (the "**Volatility Adjustment Feature**"). The notional weight assigned to the Underlying Index is rebalanced on each Scheduled Trading Day (as defined in Section 2 (*Description of the Underlying Index*) below) for the Underlying Index and is subject to a cap of 100 per cent.

The Index is an "excess return" strategy and, therefore, the value of the Index shall not include the accrual of any amount or interest in relation to any money market rate in respect of any notional cash amount.

The Index is denominated in euro ("**EUR**").

The level of the Index is reduced by the deduction of synthetic costs of establishing and unwinding transactions in respect of the Underlying Index resulting from the application of the Volatility Adjustment Feature.

1.2 Calculation of the Value of the Index

The value of the Index (the "**Strategy Value**") on the Strategy Inception Date was equal to 100.

The Strategy Value shall be calculated by the Strategy Calculation Agent on each Strategy Business Day following the Strategy Inception Date as an amount in the Strategy Currency (subject to a floor of zero) equal to: (a) the Strategy Value immediately prior to subtracting the Asset Rebalancing Cost in respect of such Strategy Business Day minus (b) the Asset Rebalancing Cost in respect of such Strategy Business Day (" RCV_t^V ").

Expressed as a formula, the value of the Index on each Strategy Business Day following the Strategy Inception Date is as follows:

$$V_t^{Pre} - RC_t^V$$

The Strategy Value immediately before subtracting the Asset Rebalancing Cost in respect of each Strategy Business Day following the Strategy Inception Date (" V_t^{Pre} ") shall be calculated by the Strategy Calculation Agent as an amount in the Strategy Currency equal to:

- (a) the value of the Index in respect of the Strategy Rebalancing Day immediately preceding such Strategy Business Day (" V_{VRt} "); multiplied by
- (b) an amount equal to:
 - (i) the Asset Weight on the Strategy Rebalancing Day immediately preceding such Strategy Business Day (" W_{VRt}^V "); multiplied by
 - (ii) the quotient of (i) the Asset Value of the Underlying Index in respect of such Strategy Business Day (" A_t "), as numerator; and (ii) the Asset Value of the Underlying Index on the Strategy Rebalancing Day immediately preceding such Strategy Business Day (" A_{VRt} "), as denominator,

provided that if the value of the Index in respect of such Strategy Business Day is (or is deemed to be) zero, the value of the Index in respect of each Strategy Business Day immediately following such Strategy Business Day shall also be zero.

Expressed as a formula, the Strategy Value immediately before subtracting the Asset Rebalancing Cost in respect of each Strategy Business Day following the Strategy Inception Date is as follows:

$$V_{VRt} \times \left[W_{VRt}^V \times \frac{A_t}{A_{VRt}} \right]$$

Subject to the occurrence of a disruption event (in respect of which see Section 10 (*Disruption Events, Adjustment Events and consequences*) below), each Strategy Value in respect of a Strategy Business Day will be published on the Strategy Publication Data Source and the Strategy Bloomberg Ticker rounded to two decimal places (with 0.005 being rounded upwards).

1.3 Calculation of the Asset Value in respect of the Underlying Index

In respect of any calendar day, the Asset Value in respect of the Underlying Index shall be as calculated in accordance with Section 2.3 (*Calculation of the Underlying Index Value*) set out in Section 2 (*Description of the Underlying Index*) below.

In respect of any calendar day, if the Asset Value of the Underlying Index is not available, then such Asset Value shall be the latest available Asset Value immediately preceding such calendar day.

1.4 Calculation of the Asset Weight

The Asset Weight in respect of a Strategy Rebalancing Day is an amount equal to the lower of:

- (a) 100 per cent.; and

- (b) the quotient of (A) 5.00 per cent., as numerator; and (B) the Reference Volatility in respect of such Strategy Rebalancing Day, as denominator.

Any such Asset Weight shall be rounded to three decimal places with 0.0005 being rounded upwards.

1.5 Calculation of the Reference Volatility and the Exponential Asset Realized Volatility

In respect of a Strategy Business Day, the Reference Volatility shall be equal to the Exponential Asset Realized Volatility in respect of the Asset Sampling Business Day falling on or immediately before such Strategy Rebalancing Day.

The Exponential Asset Realized Volatility in respect of the Strategy Inception Date was equal to 5.00 per cent.

The Exponential Asset Realized Volatility shall be calculated by the Strategy Calculation Agent on each Asset Sampling Business Day falling after the Strategy Inception Date as an amount equal to the greater of the Short Term Exponential Asset Realized Volatility and the Long Term Exponential Asset Realized Volatility, in each case, in respect of such Asset Sampling Business Day.

The Short Term Exponential Asset Realized Volatility shall be calculated by the Strategy Calculation Agent on each Asset Sampling Day falling after the Strategy Inception Date in accordance with the following formula:

$$\sqrt{0.94 \times AssetVol_{ST,t-1}^2 + (1 - 0.94) \times \frac{252}{5} \times \left[\ln \left(\frac{A_{t-d}}{A_{t-d-k}} \right) \right]^2}$$

The Long Term Basket Volatility shall be calculated by the Strategy Calculation Agent on each Asset Sampling Business Day falling after the Strategy Inception Date in accordance with the following formula:

$$\sqrt{0.97 \times AssetVol_{LT,t-1}^2 + (1 - 0.97) \times \frac{252}{5} \times \left[\ln \left(\frac{A_{t-d}}{A_{t-d-k}} \right) \right]^2}$$

Where:

$AssetVol_{ST,t-1}^2$ means, in respect of an Asset Sampling Business Day, the square of the Short Term Exponential Asset Realized Volatility in respect of the Asset Sampling Business Day immediately preceding such Strategy Business Day;

A_{t-d} means, in respect of an Asset Sampling Business Day, the Asset Value in respect of the Underlying Index in respect of the Asset Sampling Business Day that is two Asset Sampling Business Days immediately preceding such Asset Sampling Day;

A_{t-d-k} means, in respect of an Asset Sampling Business Day, the Asset Value in respect of the Underlying Index in respect of the Asset Sampling Business Day that is seven Asset Sampling Business Days immediately preceding such Asset Sampling Day;

$\ln$ means the natural logarithm function; and

$AssetVol_{LT,t-1}^2$ means, in respect of an Asset Sampling Business Day, the square of the Long Term Exponential Asset Realized Volatility in respect of the Asset Sampling Business Day immediately preceding such Strategy Business Day.

1.6 Calculation of the Asset Rebalancing Cost in respect of the Index

The Asset Rebalancing Cost in respect of (a) the Strategy Inception Date and (b) each Strategy Business Day following the Strategy Inception Date that is not a Strategy Rebalancing Day, is equal to zero.

The Asset Rebalancing Cost in respect of each Strategy Rebalancing Day following the Strategy Inception Date shall be calculated by the Strategy Calculation Agent in accordance with the following formula:

$$0.0005 \times |w_t^v - \overline{w_t^v}| \times V_t^{Pre}$$

Where:

w_t^v means the Asset Weight in respect of such Strategy Rebalancing Day;

$\overline{w_t^v}$ means the Asset Actual Weight in respect of such Strategy Rebalancing Day immediately prior to the rebalancing process; and

V_t^{Pre} means the Strategy Value immediately before subtracting the Asset Rebalancing Cost in respect of such Strategy Business Day.

1.7 Calculation of the Asset Actual Weight in respect of the Index

The Asset Actual Weight in respect of each Strategy Business Day shall be calculated by the Strategy Calculation Agent as an amount equal to:

- (a) the Asset Weight in respect of the Strategy Rebalancing Day immediately preceding such Strategy Business Day; multiplied by
- (b) the quotient of (A) the Asset Value in respect of such Strategy Business Day, as numerator; and (B) the Asset Value in respect of the Strategy Rebalancing Day immediately preceding such Strategy Business Day, as denominator; multiplied by
- (c) the quotient of (A) the Strategy Value in respect of the Strategy Rebalancing Day immediately preceding such Strategy Business Day, as numerator; and (B) the Strategy Value in respect of such Strategy Business Day immediately before subtracting the Asset Rebalancing Cost in respect of such Strategy Business Day.

1.8 Definitions in respect of the Index

"**Asset Sampling Business Day**" means the Strategy Inception Date and thereafter each calendar day which is a "Strategy Business Day" (as defined in Section 2 (*Description of the Underlying Index*) below);

"**Asset Trading Day**" means each "Strategy Trading Day" (as defined in Section 2 (*Description of the Underlying Index*) below);

"**Strategy Bloomberg Ticker**" means *GSISCC52 <Index>*;

"**Strategy Business Day**" means the Strategy Inception Date and thereafter each Asset Sampling Business Day; "Strategy Currency" means EUR;

"**Strategy Inception Date**" means 20 January 2022;

"**Strategy Publication Data Source**" means <https://goldmansachsindices.com> (or any successor page thereto);

"**Strategy Rebalancing Day**" means the Strategy Inception Date and thereafter each Asset Trading Day; and

"**Strategy Trading Day**" means the Strategy Inception Date and thereafter each Asset Trading Day.

1.9 Disruption Events, Adjustment Events, Change in Methodology and Corrections

In respect of the Index, please see Section 10.1 (*Disruption Events - In respect of each of the Index, the Underlying Index and the Govt Bond Strategy only*), Section 11 (*Corrections*) and Section 12 (*Change in Methodology*).

2. Description of the Underlying Index

Capitalised terms defined in this Section 2 (*Description of the Underlying Index*) (including in Section 2.11 (*Definitions in respect of the Underlying Index*)) shall have the meaning given to them solely for the purposes of this Section 2 (*Description of the Underlying Index*) unless otherwise specified or cross-referred to.

2.1 Overview of the Underlying Index

The Goldman Sachs Diversified Multi-Asset Basket EUR ER Index (*Bloomberg Code: GSISDMAB <Index>*) (referred to herein as the Underlying Index) seeks to provide synthetic exposure to the performance of an unequally weighted basket (the "**Basket**") of four underlying indices (the "**Basket Indices**" and each a "**Basket Index**") and which periodically (on a monthly basis) rebalances to assign a notional weight to each Basket Index by reference to certain fixed weights (the Asset Weights, as set out in Section 2.2 (*Overview of Underlying Index Basket Indices*) below).

The Basket Indices in respect of the Underlying Index are set out in Section 2.2 (*Overview of Underlying Index Basket Indices*) below.

The Underlying Index is an "excess return" strategy and, therefore, the value of the Underlying Index shall not include the accrual of any amount or interest in relation to any money market rate in respect of any notional cash amount.

The Underlying Index is denominated in euro ("**EUR**") and has, in respect of each Basket Index which is not denominated in EUR, an internal simulated currency hedge feature that seeks to offset a substantial portion of the positive or negative effects of currency exchange rate fluctuations on the level of such Basket Index.

The level of the Underlying Index is reduced by the deduction the basket rebalancing costs and the asset servicing costs. The basket rebalancing costs reflect the synthetic costs of entering into and/or unwinding any transactions relating to the Basket Indices following changes to their Asset Quantities. The asset servicing costs reflect the synthetic costs of maintaining positions in, and replicating the performance of, the Basket Indices. Overall, the deduction of such synthetic costs may have the effect of reducing the performance of the Underlying Strategy.

2.2 Overview of the Underlying Index Basket Indices

i	Basket Index	Bloomberg Page	Currency	Return Type	Asset Weight
1	MSCI World Climate Change Select 200 Net EUR Index*	<i>MXWOCCNE <Index></i>	EUR	Total Return	40%
2	Goldman Sachs US and EUR Government Bond Basket USD ER Strategy**	<i>GSISFIBU <Index></i>	USD	Excess Return	20%
3	GS Commodity Focus Basket USD ER Index***	<i>GSISCFBU <Index></i>	USD	Excess Return	20%
4	Euronext Reitsmarket GRESB Global Sustainable Index****	<i>ERGSN <Index></i>	EUR	Total Return	20%

* Further details are available from <https://www.msci.com>

** As described in Section 3 (*Description of the Govt Bond Strategy*) below.

*** As described in Section 6 (*Description of the Commodity Index*) below.

**** Further details are available from <https://live.euronext.com>

2.3 Calculation of the Underlying Index Value

The value of the Underlying Index (the "**Underlying Index Value**") on the Strategy Inception Date was equal to 100.

The Underlying Index Value shall be calculated by the Strategy Calculation Agent on each Strategy Business Day following the Strategy Inception Date as an amount in the Strategy Currency. The Underlying Index Value is calculated in t (subject to a floor of zero) equal to:

- (a) the Underlying Index Value in respect of the Strategy Rebalancing Day immediately preceding such Strategy Business Day (" V_{VRt} "); multiplied by
- (b) the quotient of:
 - (A) the Basket Value in respect of such Strategy Business Day (" B_t "), as numerator; and
 - (B) the Basket Value in respect of the Strategy Rebalancing Day immediately preceding such Strategy Business Day (or, if none, 100) (" V_{VRt} "), as denominator,

provided that if the Underlying Index Value in respect of such Strategy Business Day is (or is deemed to be) zero, the Underlying Index Value in respect of each Strategy Business Day immediately following such Strategy Business Day shall also be zero.

Expressed as a formula, the Underlying Index Value on each Strategy Business Day following the Strategy Inception Date is as follows:

$$V_{VRt} \times \left(\frac{B_t}{V_{VRt}} \right)$$

Subject to the occurrence of a disruption event (in respect of which see Section 10 (*Disruption Events, Adjustment Events and Consequences*) below), each such value in respect of each Strategy Business Day will be published on the Strategy Publication Data Source and the Strategy Bloomberg Ticker rounded to two decimal places (with 0.005 being rounded upwards).

2.4 Calculation of the Basket Value

The Basket Value on the Strategy Inception Date was equal to 100.

The Basket Value shall be calculated by the Strategy Calculation Agent on each Strategy Business Day following the Strategy Inception Date as an amount (subject to a floor of zero) equal to:

- (a) the summation, in respect of each Basket Index, of:
 - (A) the Asset Quantity; multiplied by
 - (B) the Asset Value,

in each case, in respect of such Basket Index and such Strategy Business Day,

plus
- (b) the Cash Asset Quantity in respect of such Strategy Business Day,

provided that if the Basket Value in respect of such Strategy Business Day is (or is deemed to be) zero, the Basket Value in respect of each Strategy Business Day immediately following such Strategy Business Day shall be zero.

2.5 Calculation of the Asset Quantity in respect of each Basket Index

The Asset Quantity in respect of a Basket Index and each Strategy Business Day falling after the Strategy Inception Date that is not a Basket Rebalancing Day shall be equal to the Asset Quantity in respect of such Basket Index in respect of the Basket Rebalancing Day immediately preceding such Strategy Business Day.

The Asset Quantity in respect of a Basket Index and each Basket Rebalancing Day shall be calculated by the Strategy Calculation Agent as the quotient of:

- (a) the Asset Weight in respect of such Basket Index multiplied by the Basket Value, in each case in respect of the Basket Observation Day relating to such Basket Rebalancing Day (or, in respect of the Basket Rebalancing Day falling on the Strategy Inception Date, 100), as numerator; and
- (b) the Asset Value in respect of the Basket Observation Day relating to such Basket Rebalancing Day, as denominator.

Unless the Strategy Calculation Agent determines otherwise, in the event that the value of any component which is utilised for the calculation of an Asset Quantity is subsequently corrected, the Strategy Calculation Agent will not correct the Asset Quantity and will instead use the Asset Quantity as calculated before such correction.

2.6 Calculation of the Asset Value in respect of each Basket Index

The Asset Value of each Basket Index on the Asset Inception Date was equal to 100.

The calculation of the Asset Value of each Basket Index depends on the Currency and Return Type in respect of such Basket Index, as set out in Section 2.2 (*Overview of Underlying Index Basket Indices*) above.

The Asset Value of each Basket Index in respect of which the Currency is EUR and the Return Type is "Total Return" (being Basket Indices i=1 and i=4) on any given Asset Business Day following the Asset Inception Date shall be calculated by the Strategy Calculation Agent as an amount equal to:

- (a) the Asset Value in respect of such Basket Index in respect of the Asset Rebalancing Day in respect of such Basket Index immediately preceding such Asset Business Day (" A_{Art} "); multiplied by
- (b) an amount equal to:
 - (i) one (1); minus
 - (ii) the quotient of (I) the Reference Level of the EUR STR Money Market Index on such Asset Business Day (" MM_t "), as numerator; and (II) the Reference Level of the EUR STR Money Market Index on the Asset Rebalancing Day immediately preceding such Asset Business Day (" MM_{Art} "), as denominator; plus
 - (iii) the quotient of (i) the Reference Level of such Basket Index on such Asset Business Day (" L_t ") as numerator; and (ii) the Reference Level of such Basket Index on the Asset Rebalancing Day immediately preceding such Asset Business Day (" L_{Art} "), as denominator.

Expressed as a formula, the Asset Value of each Basket Index in respect of which the Currency is EUR and the Return Type is "Total Return" on any given Asset Business Day following the Asset Inception Date is as follows:

$$A_{Art} \times \left(1 - \frac{MM_t}{MM_{Art}} + \frac{L_t}{L_{Art}} \right)$$

The Asset Value of each Basket Index in respect of which the Currency is USD and the Return Type is "Excess Return" (being Basket Indices i=2 and i=3) on any given Asset Business Day following the Asset Inception Date shall be calculated by the Strategy Calculation Agent as an amount equal to:

- (a) the Asset Value in respect of such Basket Index in respect of the Asset Rebalancing Day in respect of such Basket Index immediately preceding such Asset Business Day (" A_{Art} "); multiplied by
- (b) an amount equal to:
 - (i) one (1); minus

- (ii) the quotient of:
 - (I) the applicable Currency Exchange Rate to convert one unit of USD into EUR in respect of such Asset Business Day (" FX_t "), as numerator; and
 - (II) the applicable Currency Exchange Rate to convert one unit of USD into EUR in respect of the Asset Rebalancing Day immediately preceding such Asset Business Day (" FX_{Art} "), as denominator; plus
- (iii) the quotient of:
 - (I) the Reference Level of such Basket Index in respect of such Asset Business Day (" L_t "), multiplied by the applicable Currency Exchange Rate to convert one unit of USD into EUR in respect of such Asset Business Day (" FX_t "), as numerator; and
 - (II) the Reference Level of such Basket Index in respect of the Asset Rebalancing Day immediately preceding such Asset Business Day (" L_{Art} "), multiplied by the applicable Currency Exchange Rate to convert one unit of USD into EUR in respect of the Asset Rebalancing Day immediately preceding such Asset Business Day (" FX_{Art} "), as denominator.

Expressed as a formula, the Asset Value of each Basket Index in respect of which the Currency is USD and the Return Type is "Excess Return" on any given Asset Business Day following the Asset Inception Date is as follows:

$$A_{Art} \times \left(1 - \frac{FX_t}{FX_{Art}} + \frac{FX_t \times L_t}{FX_{Art} \times L_{Art}} \right)$$

2.7 Calculation of the Cash Asset Quantity

The Cash Asset Quantity on the Basket Inception Date was equal to the Initial Cash Asset Quantity.

The Cash Asset Quantity on each Strategy Business Day following the Basket Inception Date shall be calculated by the Strategy Calculation Agent as an amount equal to:

- (a) where such Strategy Business Day does not fall on a Basket Rebalancing Day, an amount equal to:
 - (A) the Cash Asset Quantity in respect of the Basket Rebalancing Day immediately preceding such Strategy Business Day (or, if none, the Initial Cash Asset Quantity); minus
 - (B) the Asset Servicing Cost in respect of such Strategy Business Day; and
- (b) where such Strategy Business Day falls on a Basket Rebalancing Day, an amount calculated by the Strategy Calculation Agent in accordance with the following formula:

$$q_{C,BRt} + 1 \times \left\{ \sum_{i=1}^n [(q_{i,BRt} - q_{i,t}) \times A_{i,t}] - RC_t^B - SC_t \right\}$$

Where:

$q_{C,BRt}$ means the Cash Asset Quantity in respect of the Basket Rebalancing Day immediately preceding such Strategy Business Day (or, if none, the Initial Cash Asset Quantity);

i means Basket Index "i";

n means a number equal to the total number of Basket Indices;

$q_{i,BRt}$ means the Asset Quantity in respect of the relevant Basket Index in respect of the Basket Rebalancing Day immediately preceding such Strategy Business Day (or, if none, in respect of the Strategy Inception Date);

$q_{i,t}$ means the Asset Quantity in respect of the relevant Basket Index and such Strategy Business Day;

$A_{i,t}$ means the Asset Value in respect of the relevant Basket Index and such Strategy Business Day;

RC_t^B means the Basket Rebalancing Cost in respect of such Strategy Business Day; and

SC_t means the Asset Servicing Cost in respect of such Strategy Business Day.

2.8 Calculation of the Initial Cash Asset Quantity

The Initial Cash Asset Quantity shall be calculated by the Strategy Calculation Agent as an amount equal to the quotient of:

(A) an amount equal to:

(i) 100; minus

(ii) the summation, in respect of each Basket Index, of:

(I) the Asset Quantity; multiplied by

(II) the Asset Value,

in each case, in respect of the Strategy Inception Date,

(as numerator); and

(B) one, as denominator.

Expressed as a formula, the Initial Cash Asset Quantity is calculated in accordance with the following formula:

$$\frac{100 - \sum_{i=1}^n q_{i,BID} \times A_{i,BID}}{1}$$

Where:

$q_{i,BRt}$ means the Asset Quantity in respect of Basket Index "i" in respect of the Strategy Inception Date;

i means Basket Index "i";

n means a number equal to the total number of Basket Indices; and

$A_{i,t}$ means the Asset Value in respect of Basket Index "i" in respect of the Strategy Inception Date.

2.9 Calculation of the Basket Rebalancing Cost

The Basket Rebalancing Cost in respect of (a) the Strategy Inception Date and (b) each Strategy Business Day following the Strategy Inception Date that is not a Basket Rebalancing Day, is equal to zero.

The Basket Rebalancing Cost in respect of each Basket Rebalancing Day following the Strategy Inception Date shall be calculated by the Strategy Calculation Agent in accordance with the following formula:

$$\sum_{i=1}^4 (TC_{i,t}^A \times |q_{i,BRt} - q_{i,t}|)$$

Where:

i means Basket Index "i";

$TC_{i,t}^A$ means the Asset Transaction Cost Rate in respect of the relevant Basket Index;

$A_{i,t}$ means the Asset Value in respect of the relevant Basket Index and such Strategy Business Day;

$q_{i,BRt}$ means the Asset Quantity in respect of the relevant Basket Index in respect of the Basket Rebalancing Day immediately preceding such Basket Rebalancing Day (or, if none, in respect of the Strategy Inception Date); and

$q_{i,t}$ means the Asset Quantity in respect of the relevant Basket Index and such Basket Rebalancing Day.

2.10 Calculation of the Asset Servicing Cost

The Asset Servicing Cost in respect of the Strategy Inception Date was equal to zero.

The Asset Servicing Cost in respect of each Strategy Business Day following the Strategy Inception Date shall be calculated by the Strategy Calculation Agent in accordance with the following formula:

$$\sum_{i=1}^n \left[q_{i,BRt} \times \sum_{s=BRt}^{t-1} (A_{i,s} \times DCF_{s,s+1} \times CC_{i,s}) \right]$$

Where:

i means Basket Index "i";

n means a number equal to the total number of Basket Indices;

$q_{i,BRt}$ means the Asset Quantity in respect of the relevant Basket Index and the Basket Rebalancing Day immediately preceding such Strategy Business Day;

t means the relevant Strategy Business Day;

s means each relevant Strategy Business Day falling in the period commencing on (and including) the Basket Rebalancing Day immediately preceding such Strategy Business Day to (and including) the Strategy Business Day immediately preceding such Strategy Business Day;

$A_{i,s}$ means the Asset Value in respect of the relevant Basket Index and such Strategy Business Day;

$DCF_{s,s+1}$ means the actual number of days in the period commencing on (and including) such Strategy Business Day and ending on (but excluding) the Strategy Business Day immediately following such Strategy Business Day, divided by 360; and

$CC_{i,s}$ means the Asset Servicing Cost Rate in respect of the relevant Basket Index.

2.11 Definitions in respect of the Underlying Index

"Additional Market Disruption Event" means, in respect of Basket Index c=3, if a hedging disruption would otherwise occur due solely to a restriction in trading in the relevant underlying futures contract of such Basket Index due to movements in price exceeding certain permitted limits, such restriction shall be deemed not to be a hedging disruption for the purposes of such Basket Index.

"Asset Business Day" means, in respect of each Basket Index, each day from and including the Asset Inception Date which is a business day according to the holiday calendar of such Basket Index;

"Asset Inception Date" means, in respect of each Basket Index, 11 January 2022;

"Asset Rebalancing Day" means, in respect of a Basket Index, each Asset Business Day from and including the Asset Inception Date on which both the Asset Value and the Reference Level of such Basket Index are strictly greater than zero.

"Asset Servicing Cost Rate" means, in respect of a Basket Index and a Strategy Business Day

- (a) if the Asset Quantity in respect of such Basket Index on such Strategy Business Day (or, if such Strategy Business Day is not Basket Rebalancing Day, on the Basket Rebalancing Day immediately preceding such Strategy Business Day) was greater than or equal to zero, the Long Asset Servicing Cost Rate in respect of such Basket Index; or
- (b) otherwise, the Short Asset Servicing Cost Rate in respect of such Basket Index

"Asset Sponsor" means, in respect of:

- (a) Basket Index i=1, MSCI Inc.;
- (b) each of Basket Index i=2 and i=3, Goldman Sachs International; and
- (c) Basket Index i=4, Euronext N.V.,

or, in each case, any successor thereto.

"Asset Trading Day" means, in respect of:

- (a) Basket Index i=1, each day on which each of the following exchanges is open for trading during its regular trading session (as determined by the Strategy Calculation Agent): New York Stock Exchange, London Stock Exchange, Tokyo Stock Exchange, Frankfurt Stock Exchange, Hong Kong Stock Exchange and Paris Stock Exchange;
- (b) Basket Index i=2, each "Strategy Trading Day" as defined in (as defined in Section 3 (*Description of the Govt Bond Strategy*) below);
- (c) Basket Index i=3, each "Strategy Trading Day" as defined in (as defined in Section 6 (*Description of the Commodity Index*) below); and
- (d) Basket Index i=4, each day on which each of the following exchanges is open for trading during its regular trading session (as determined by the Strategy Calculation Agent): Singapore Stock Exchange, Tokyo Stock Exchange, New York Stock Exchange, Toronto Stock Exchange, London Stock Exchange, Brussels Stock Exchange, Mercado Continuo (SIBR), Hong Kong Stock Exchange and Paris Stock Exchange;

"Asset Transaction Cost Rate" means, in respect of each Basket Index, 0.0005;

"Basket Observation Day" means, with respect to:

- (a) the Strategy Inception Date, the Strategy Inception Date; and
- (b) a Basket Rebalancing Day which is not the Strategy Inception Date, the calendar day falling two Strategy Business Days before such day;

"Basket Rebalancing Day" means the Strategy Inception Date and thereafter the 11th calendar day of each calendar month, or the immediately following Basket Trading Day if such day is not a Basket Trading Day. If on any Strategy Business Day, the Basket Value (calculated immediately before subtracting the Basket Rebalancing Cost for such day) or the Asset Value of a Basket Index is equal to or less than zero, no further Basket Rebalancing Day will occur on or after such day.

"Basket Trading Day" means each Strategy Business Day which is an Asset Trading Day for each Basket Index.

"Currency Exchange Rate" means, in respect of an Asset Business Day, the 4 p.m. London closing spot mid rate for converting one unit of USD into EUR as published by WM Performance Services or any successor company for such day.

The days on which Currency Exchange Rates are usually fixed and published, as determined by the Strategy Calculation Agent, by WM Performance Services or any successor company are referred to herein as **"Fixing Days"**. If any calendar day is not a Fixing Day, the Strategy Calculation Agent will

use the level of the relevant Currency Exchange Rate published for the applicable Fixing Day immediately preceding such calendar day.

If any calendar day is a Fixing Day but the applicable Currency Exchange Rate is not available on such day at the applicable time indicated above, the Strategy Calculation Agent shall determine the Currency Exchange Rate in respect of such Fixing Day in a commercially reasonable manner;

"Long Asset Servicing Cost Rate" means in respect of:

- (a) each of Basket Index i=1 and i=4, 0.0075; and
- (b) each of Basket Index i=2 and i=3, zero.

"Reference Level" means, in respect of:

- (a) any Basket Index, on any given calendar day, the closing level of the relevant Basket Index as determined by the relevant Asset Sponsor in respect of such calendar day; and
- (b) the EUR STR Money Market Index:
 - (A) on any MM Index Business Day, its MM Index Value as calculated by the Strategy Sponsor in respect of the EUR STR Money Market Index and such MM Index Business Day; and
 - (B) on any day other than a MM Index Business Day, its MM Index Value as calculated by the Strategy Sponsor in respect of the EUR STR Money Market Index and the immediately preceding MM Index Business Day,

for the purposes of this sub-paragraph (b), in each case as such term is defined in Section 9 (*Description of the Money Market Indices*).

"Short Asset Servicing Cost Rate" means, in respect of each Basket Index, zero;

"Strategy Business Day" means each weekday (being Monday to Friday of each calendar week) starting from and including the Strategy Inception Date;

"Strategy Currency" means EUR;

"Strategy Inception Date" means 11 January 2022;

"Strategy Publication Data Source" means <http://marquee.gs.com> (or any successor page thereto);

"Strategy Rebalancing Day" means the Strategy Inception Date and thereafter each Strategy Business Day for which the Basket Value is strictly greater than zero;

"Strategy Trading Day" means each Basket Trading Day from and including the Strategy Inception Date; and

"USD" means United States Dollars.

2.12 Disruption Events, Adjustment Events, Change in Methodology and Corrections

In respect of the Underlying Index, please see Section 10.1 (*Disruption Events - In respect of each of the Index, the Underlying Index and the Govt Bond Strategy only*), Section 11 (*Corrections*) and Section 12 (*Change in Methodology*).

3. Description of the Govt Bond Strategy

Capitalised terms defined in this Section 3 (*Description of the Govt Bond Strategy*) (including in the Section 3.11 (*Definitions in respect of the Govt Bond Strategy*)) shall have the meaning given to them solely for the purposes of this Section 3 (*Description of the Govt Bond Strategy*) unless otherwise specified or cross-referred to.

3.1 Overview of the Govt Bond Strategy

The Goldman Sachs US and EUR Government Bond Basket USD ER Strategy (*Bloomberg Code: GSISFIBU <Index>*) (referred to herein as the Govt Bond Strategy) seeks to provide synthetic exposure to the performance of an equally weighted basket (the "**Basket**") of two underlying indices (the "**Basket Indices**" and each a "**Basket Index**") and which periodically (on a monthly basis) rebalances to assign a notional weighting to each Basket Index by reference to certain fixed weights (the Assets Weights, as set out in Section 3.2 (*Overview of the Govt Bond Strategy Basket Indices*) below).

The Basket Indices in respect of the Govt Bond Strategy are set out in the Section 3.2 (Overview of the Govt Bond Strategy Basket Indices) below.

The Govt Bond Strategy is an "excess return" strategy and, therefore, the value of the Govt Bond Strategy shall not include the accrual of any amount or interest in relation to any money market rate in respect of any notional cash amount.

The Govt Bond Strategy is denominated in United States Dollars ("**USD**") and has, in respect of each Basket Index which is not denominated in USD, an internal simulated currency hedge feature that seeks to offset a substantial portion of the positive or negative effects of currency exchange rate fluctuations on the value of such Basket Index.

The value of the Govt Bond Strategy is reduced by the deduction of (i) synthetic costs of entering into and/or unwinding any transaction relating to the Basket Indices following a Rebalancing and (ii) synthetic costs of maintaining positions in, and replicating the performance of, the Basket Indices. Overall, the deduction of such synthetic costs may have the effect of reducing the performance of the Govt Bond Strategy.

3.2 Overview of the Govt Bond Strategy Basket Indices

i	Basket Index	Bloomberg Page	Currency	Return Type	Asset Weight
1	US Government Bond Futures Rolling Strategy Index*	<i>FRSIUSB <Index></i>	USD	Total Return	50%
2	European Government Bond Futures Rolling Strategy Index**	<i>FRSIEUB <Index></i>	EUR	Total Return	50%

* As described in Section 4 (Description of the US Government Bond Futures Rolling Strategy Index) below.

** As described in Section 5 (Description of the European Government Bond Futures Rolling Strategy Index) below.

3.3 Calculation of the Value of the Govt Bond Strategy

The value of the Govt Bond Strategy (the "**Govt Bond Strategy Value**") on the Strategy Inception Date was equal to 100.

The Govt Bond Strategy Value shall be calculated by the Strategy Calculation Agent on each Strategy Business Day following the Strategy Inception Date as an amount in the Strategy Currency (subject to a floor of zero) calculated in the same manner as the Underlying Index Value, as set out in Section 2.2 (*Calculation of the Underlying Index Value*) of Section 2 (*Description of the Underlying Index*).

3.4 Calculation of the Basket Value

The Basket Value on the Strategy Inception Date was equal to 100.

The Basket Value shall be calculated by the Strategy Calculation Agent on each Strategy Business Day following the Strategy Inception Date as an amount (subject to a floor of zero) calculated in the same manner as the Basket Value for the purposes of the Underlying Index, as set out in Section 2.4 (*Calculation of the Basket Value*) of Section 2 (*Description of the Underlying Index*).

3.5 Calculation of the Asset Quantity

The Asset Quantity in respect of a Basket Index and a Strategy Business Day shall be determined by the Strategy Calculation Agent as set out in Section 2.5 (*Calculation of the Asset Quantity in respect of each Basket Index*) of Section 2 (*Description of the Underlying Index*).

Unless the Strategy Calculation Agent determines otherwise, in the event that the value of any component which is utilised for the calculation of an Asset Quantity is subsequently corrected, the Strategy Calculation Agent will not correct the Asset Quantity and will instead use the Asset Quantity as calculated before such correction.

3.6 Calculation of the Asset Value

The Asset Value of each Basket Index on the Asset Inception Date was equal to 100.

The Asset Value of each Basket Index in respect of which the Currency is USD and the Return Type is "Total Return" (being Basket Index i=1) on any given Asset Business Day following the Asset Inception Date shall be calculated by the Strategy Calculation Agent as an amount equal to:

- (a) the Asset Value in respect of such Basket Index in respect of the Asset Rebalancing Day in respect of such Basket Index immediately preceding such Asset Business Day (" A_{Art} "); multiplied by
- (b) an amount equal to:
 - (i) one (1); minus
 - (ii) the quotient of (I) the Reference Level of the USD Money Market on such Asset Business Day (" MM_t "), as numerator; and (II) the Reference Level of the USD Money Market Index on the Asset Rebalancing Day immediately preceding such Asset Business Day (" MM_{Art} "), as denominator; plus
 - (iii) the quotient of (i) the Reference Level of such Basket Index on such Asset Business Day (" L_t ") as numerator; and (ii) the Reference Level of such Basket Index on the Asset Rebalancing Day immediately preceding such Asset Business Day (" L_{Art} "), as denominator.

Expressed as a formula, the Asset Value of the Basket Index in respect of which the Currency is USD and the Return Type is "Total Return" on any given Asset Business Day following the Asset Inception Date is as follows:

$$A_{Art} \times \left(1 - \frac{MM_t}{MM_{Art}} + \frac{L_t}{L_{Art}} \right)$$

The Asset Value of each Basket Index in respect of which the Currency is EUR (being Basket Index i=2) on any given Asset Business Day following the Asset Inception Date shall be calculated by the Strategy Calculation Agent as an amount equal to:

- (a) the Asset Value in respect of such Basket Index in respect of the Asset Rebalancing Day in respect of such Basket Index immediately preceding such Asset Business Day (" A_{Art} "); multiplied by
- (b) an amount equal to:
 - (i) one (1); minus
 - (ii) the quotient of:
 - (I) an amount equal to the Reference Level of the EUR Money Market Index on such Asset Business Day (" MM_t "), multiplied by the applicable Currency Exchange Rate to convert one unit of EUR into USD on such Asset Business Day (" FX_t "), as numerator; and

- (II) an amount equal to the Reference Level of the EUR Money Market Index on the Asset Rebalancing Day immediately preceding such Asset Business Day (" MM_{Art} "), multiplied by the applicable Currency Exchange Rate to convert one unit of EUR into USD on the Asset Rebalancing Day immediately preceding such Asset Business Day (" FX_{Art} "),

plus

- (iii) the quotient of:

- (I) the Reference Level of such Basket Index in respect of such Asset Business Day (" L_t "), multiplied by the applicable Currency Exchange Rate to convert one unit of EUR into USD in respect of such Asset Business Day (" FX_t "), as numerator; and
- (II) the Reference Level of such Basket Index in respect of the Asset Rebalancing Day immediately preceding such Asset Business Day (" L_{Art} "), multiplied by the applicable Currency Exchange Rate to convert one unit of EUR into USD in respect of the Asset Rebalancing Day immediately preceding such Asset Business Day (" FX_{Art} "), as denominator.

Expressed as a formula, the Asset Value of each Basket Index in respect of which the Currency is EUR and the Return Type is "Total Return" on any given Asset Business Day following the Asset Inception Date is as follows:

$$A_{Art} \times \left(1 - \frac{MM_t \times FX_t}{MM_{Art} \times FX_{Art}} + \frac{FX_t \times L_t}{FX_{Art} \times L_{Art}} \right)$$

In respect of an Asset and a day which is not an Asset Business Day the Asset Value shall be the Asset Value of such Asset as of the immediately preceding Asset Business Day.

3.7 Calculation of the Cash Asset Quantity

The Cash Asset Quantity on the Basket Inception Date was equal to the Initial Cash Asset Quantity.

The Cash Asset Quantity in respect of a Basket Index and each Strategy Business Day following the Basket Inception Date shall be calculated by the Strategy Calculation Agent as set out in Section 2.7 (*Calculation of the Cash Asset Quantity*) of Section 2 (*Description of the Underlying Index*).

3.8 Calculation of the Initial Cash Asset Quantity

The Initial Cash Asset Quantity shall be determined by the Strategy Calculation Agent as set out in Section 2.8 (*Calculation of the Initial Cash Asset Quantity*) of Section 2 (*Description of the Underlying Index*).

3.9 Calculation of the Basket Rebalancing Cost

The Basket Rebalancing Cost in respect of (a) the Strategy Inception Date and (b) each Strategy Business Day following the Strategy Inception Date that is not a Basket Rebalancing Day, is equal to zero.

The Basket Rebalancing Cost in respect of each Basket Rebalancing Day following the Strategy Inception Date shall be calculated by the Strategy Calculation Agent as set out in Section 2.9 (*Calculation of the Basket Rebalancing Cost*) of Section 2 (*Description of the Underlying Index*).

3.10 Calculation of the Asset Servicing Cost

The Asset Servicing Cost in respect of the Strategy Inception Date was equal to zero.

The Asset Servicing Cost in respect of each Strategy Business Day following the Strategy Inception Date shall be calculated by the Strategy Calculation Agent as set out in Section 2.10 (*Calculation of the Asset Servicing Cost*) of Section 2 (*Description of the Underlying Index*).

3.11 Definitions in respect of the Govt Bond Strategy

"Asset Business Day" means, in respect of each Basket Index, each day from and including the Asset Inception Date which is a business day according to the holiday calendar of such Basket Index;

"Asset Inception Date" means, in respect of each Basket Index, 10 January 2022;

"Asset Rebalancing Day" means, in respect of a Basket Index, each Asset Business Day from and including the Asset Inception Date on which both the Asset Value and the Reference Level of such Basket Index are strictly greater than zero;

"Asset Servicing Cost Rate" means, in respect of a Basket Index and a Strategy Business Day

- (a) if the Asset Quantity in respect of such Basket Index on such Strategy Business Day (or, if such Strategy Business Day is not Basket Rebalancing Day, on the Basket Rebalancing Day immediately preceding such Strategy Business Day) was greater than or equal to zero, the Long Asset Servicing Cost Rate in respect of such Basket Index; or
- (b) otherwise, the Short Asset Servicing Cost Rate in respect of such Basket Index;

"Asset Sponsor" means, in respect of each Basket Index, Goldman Sachs International, or any successor thereto;

"Asset Trading Day" means, in respect of:

- (a) Basket Index $i=1$, business days according to Chicago Mercantile Exchange Globex trading calendar. The Good Friday holiday shall not be considered a business day; and
- (b) Basket Index $i=2$, business days according to the Eurex trading calendar;

"Asset Transaction Cost Rate" means, in respect of each Basket Index, 0.0005;

"Basket Observation Day" means, with respect to:

- (a) the Strategy Inception Date, the Strategy Inception Date; and
- (b) a Basket Rebalancing Day which is not the Strategy Inception Date, the calendar day falling two (2) Strategy Business Days before such day;

"Basket Rebalancing Day" means the Strategy Inception Date and, thereafter, the 10th calendar day of each calendar month, or the immediately following Basket Trading Day if such day is not a Basket Trading Day. If on any Strategy Business Day, the Basket Value (calculated immediately before subtracting the Basket Rebalancing Cost for such day) or the Asset Value of a Basket Index is equal to or less than zero, no further Basket Rebalancing Day will occur on or after such day

"Basket Trading Day" means each Strategy Business Day which is an Asset Trading Day for each Basket Index.

"Currency Exchange Rate" means, in respect of an Asset Business Day, the 4 p.m. London closing spot mid rate for converting one unit of EUR into USD as published by WM Performance Services or any successor company for such day.

The days on which Currency Exchange Rates are usually fixed and published, as determined by the Strategy Calculation Agent, by WM Performance Services or any successor company are referred to herein as **"Fixing Days"**. If any calendar day is not a Fixing Day, the Strategy Calculation Agent will use the level of the relevant Currency Exchange Rate published for the applicable Fixing Day immediately preceding such calendar day.

If any calendar day is a Fixing Day but the applicable Currency Exchange Rate is not available on such day at the applicable time indicated above, the Strategy Calculation Agent shall determine the Currency Exchange Rate in respect of such Fixing Day in a commercially reasonable manner;

"Long Asset Servicing Cost Rate" means in respect of each Basket Index, 0.0015.

"**Reference Level**" means, in respect of:

- (a) any Basket Index, on any given calendar day, the closing level of the relevant Basket Index as determined by the relevant Asset Sponsor in respect of such calendar day; and
- (b) any Money Market Index:
 - (A) on any MM Index Business Day, its MM Index Value as calculated by the Strategy Sponsor in respect of such Money Market Index and such MM Index Business Day; and
 - (B) on any day other than a MM Index Business Day, its MM Index Value as calculated by the Strategy Sponsor in respect of such Money Market Index and the immediately preceding MM Index Business Day,

for the purposes of this sub-paragraph (b), in each case as such term is defined in Section 9 (Description of the Money Market Indices);

"**Short Asset Servicing Cost Rate**" means, in respect of each Basket Index, zero.

"**Strategy Business Day**" means each weekday (being Monday to Friday of each calendar week) starting from and including the Strategy Inception Date;

"**Strategy Currency**" means USD;

"**Strategy Inception Date**" means 10 January 2022;

"**Strategy Publication Data Source**" means <http://marquee.gs.com> (or any successor page thereto);

"**Strategy Rebalancing Day**" means the Strategy Inception Date and thereafter each Strategy Business Day for which the Basket Value is strictly greater than zero; and

"**Strategy Trading Day**" means each Basket Trading Day from and including the Strategy Inception Date.

3.12 Disruption Events, Adjustment Events, Change in Methodology and Corrections

In respect of the Govt Bond Strategy, please see Section 10.1 (*Disruption Events - In respect of each of the Index, the Underlying Index and the Govt Bond Strategy only*), Section 11 (*Corrections*) and Section 12 (*Change in Methodology*).

4. Description of the US Government Bond Futures Rolling Strategy Index

Capitalised terms defined in this Section 4 (*Description of the US Government Bond Futures Rolling Strategy Index*) shall have the meaning given to them solely for the purposes of this Section 4 (*Description of the US Government Bond Futures Rolling Strategy Index*) unless otherwise specified or cross-referred to.

4.1 Overview of the US Government Bond Futures Rolling Strategy Index

The US Government Bond Futures Rolling Strategy Index (Total Return USD) (*Bloomberg Code: FRSIUSB <Index>*) (referred to herein as the "**UST Futures Index**") is a proprietary index designed to provide investors with a synthetic exposure to the total return (including income from interest) of the first nearby 10-Year U.S. Treasury Note futures contracts (the "**10Y U.S. Treasury Futures Contracts**"). 10Y U.S. Treasury Futures Contracts are currently listed for trading on the Chicago Board of Trade (the "**CBOT**"). For more details on the 10Y U.S. Treasury Futures Contracts and 10-Year U.S. Treasury notes, please see below Section 4.9 (*10-Year U.S. Treasury Note Futures Contracts*).

4.2 The UST Futures Index

The UST Futures Index is sponsored by Goldman Sachs International but is calculated by Standard & Poor's, as index calculation agent. The UST Futures Index operates in accordance with a set of pre-determined rolling methodology and formulae, and Standard & Poor's, the index calculation agent, does not exercise any discretion with respect to the UST Futures Index. The UST Futures Index is, therefore,

not a managed index. As the index sponsor, Goldman Sachs International is not acting as an investment adviser or performing a discretionary management role with respect to the UST Futures Index and, as a result, has no fiduciary duty to any person in respect of the UST Futures Index.

4.3 UST Futures Index Starting Value

The UST Futures Index has been given a starting value of 100 as of December 31, 1991, which is the initial calculation date of the UST Futures Index.

4.4 Daily Strategy Value Calculation

The UST Futures Index is a U.S. dollar denominated index and is calculated on each day on which the CBOT is open for trading (such day, a "**exchange business day**"). The value of the UST Futures Index on any given exchange business day will be calculated as the product of (i) the value of the UST Futures Index as of the immediately preceding exchange business day and (ii) the sum of (x) the daily return ratio of the value of the 10Y U.S. Treasury Futures Contracts on such day and (y) the overnight interest rate for the calculation period.

Daily Return Ratio of the Value of the 10Y U.S. Treasury Futures Contracts: On any given exchange business day (other than during the roll period as described below), the daily return ratio of the value of 10Y U.S. Treasury Futures Contracts is calculated as the quotient of (a) the 10Y U.S. Treasury Futures Contract Valuation Price on the relevant exchange business day and (b) the 10Y U.S. Treasury Futures Contract Valuation Price on the immediately preceding exchange business day. During the roll period, the calculation of the daily return ratio of 10Y U.S. Treasury Futures Contracts will reflect the price of the second nearby 10Y U.S. Treasury Futures Contracts into which the first nearby 10Y U.S. Treasury Futures Contracts are gradually rolled over.

10Y U.S. Treasury Futures Contracts Valuation Price: The 10Y U.S. Treasury Futures Contracts Valuation Price on any given exchange business day means the official daily settlement price per 10Y U.S. Treasury Futures Contract quoted by the CBOT on such exchange business day.

Overnight Interest Rate: The interest rate calculation uses the overnight interest rate as published on Global Insight DRI page USD-FEDERAL-FUNDS-H15 and the ACT/360 day count fraction, as defined in the 2006 ISDA Definitions. If the overnight interest rate is not published or is otherwise unavailable for the applicable calculation period, then the last available overnight interest rate published on such page will be used as the overnight interest rate for such calculation period.

The calculation agent will, however, not calculate the daily index value or will calculate such value pursuant to a different methodology when at any given time the 10Y U.S. Treasury Futures Contracts Valuation Prices for the first nearby 10Y U.S. Treasury Futures Contracts and/or the second nearby 10Y U.S. Treasury Futures Contracts, as applicable, are not published or are otherwise unavailable as further described below.

4.5 Roll Methodology

As 10Y U.S. Treasury Futures Contracts have a quarterly expiration period (March, June, September or December), when the first nearby 10Y U.S. Treasury Futures Contracts come to expiration, they are replaced by the second nearby 10Y U.S. Treasury Futures Contracts. For example, a 10Y U.S. Treasury Futures Contract purchased and held in May may specify a June expiration. As time passes, the contract expiring in June is replaced by a 10Y U.S. Treasury Futures Contract for delivery in September. This process is referred to as "rolling".

Roll Period: Rolling will be carried out during the three exchange business days starting from, and including, the third last exchange business day prior to the first notice date of the first nearby 10Y U.S. Treasury Futures Contracts to, and including, the last exchange business day prior to the first notice date of such 10Y U.S. Treasury Futures Contracts. Such period is referred to from time to time as the "roll period". On each exchange business day of the roll period, one third of the notional investment in the first nearby 10Y U.S. Treasury Futures Contracts will be rolled into the second nearby 10Y U.S. Treasury Futures Contracts, and the prices at which 10Y U.S. Treasury Futures Contracts are rolled will be based on the 10Y U.S. Treasury Futures Contracts Valuation Price for each of the first nearby and second nearby 10Y U.S. Treasury Futures Contracts. Rolling will, however, be carried out pursuant to a different methodology when at any time during the roll period the 10Y U.S. Treasury Futures Contracts Valuation

Prices for one or both of the first nearby and second nearby 10Y U.S. Treasury Futures Contracts are not published or are otherwise unavailable as further described below.

4.6 Price of 10Y U.S. Treasury Futures Contracts Unavailable

Unavailable Outside of the Roll Period: If, on any exchange business day that does not fall within the roll period, the 10Y U.S. Treasury Futures Contracts Valuation Price for the first nearby 10Y U.S. Treasury Futures Contracts is not published or is otherwise unavailable, then the calculation agent will not calculate any value for the UST Futures Index but will publish the last available value.

If, on the immediately following exchange business day, the 10Y U.S. Treasury Futures Contracts Valuation Price for the first nearby 10Y U.S. Treasury Futures Contracts is available, the daily return ratio of the value of the 10Y U.S. Treasury Futures Contracts will be calculated as the *quotient* of (a) the 10Y U.S. Treasury Futures Contracts Valuation Price on that exchange business day and (b) the last available 10Y U.S. Treasury Futures Contracts Valuation Price (however, for the avoidance of doubt, if such exchange business day is the first day of the roll period and the 10Y U.S. Treasury Futures Contracts Valuation Price for the second nearby 10Y U.S. Treasury Futures Contracts is not published or is otherwise unavailable on that exchange business day, then, as further described below, the calculation agent will not calculate any value for the UST Futures Index but will publish the last available value).

Unavailable Within the Roll Period: If the 10Y U.S. Treasury Futures Contracts Valuation Price for one or both of the first nearby and second nearby 10Y U.S. Treasury Futures Contracts is not published or is otherwise unavailable at any time during the roll period, then rolling will be carried out pursuant to the following alternative rolling methodology:

- **Case 1:** If the 10Y U.S. Treasury Futures Contracts Valuation Price for one or both of the first nearby and second nearby 10Y U.S. Treasury Futures Contracts is not published or is otherwise unavailable on the first exchange business day of the roll period, then one half of the notional investment in the first nearby 10Y U.S. Treasury Futures Contracts will be rolled into the second nearby 10Y U.S. Treasury Futures Contracts on the second exchange business day of the roll period if the 10Y U.S. Treasury Futures Contracts Valuation Prices for both the first nearby and second nearby 10Y U.S. Treasury Futures Contracts are available on such second exchange business day, and the second half of the notional investment in the first nearby 10Y U.S. Treasury Futures Contracts will be rolled over into the second nearby 10Y U.S. Treasury Futures Contracts on the third exchange business day of the roll period if the 10Y U.S. Treasury Futures Contracts Valuation Prices for both the first nearby and second nearby 10Y U.S. Treasury Futures Contracts are available on such third exchange business day; however, if the 10Y U.S. Treasury Futures Contracts Valuation Price for one or both of the first nearby and second nearby 10Y U.S. Treasury Futures Contracts is not published or is otherwise unavailable on such third exchange business day, then rolling of any remaining portion of the notional investment in the first nearby 10Y U.S. Treasury Futures Contracts will be carried out as set out below in respect of Case 4.
- **Case 2:** If the 10Y U.S. Treasury Futures Contracts Valuation Price for one or both of the first nearby and second nearby 10Y U.S. Treasury Futures Contracts is not published or is otherwise unavailable on both of the first and second exchange business days of the roll period, then the entire notional investment in the first nearby 10Y U.S. Treasury Futures Contracts will be rolled into the second nearby 10Y U.S. Treasury Futures Contracts on the third exchange business day of the roll period; however, if the 10Y U.S. Treasury Futures Contracts Valuation Price for one or both of the first nearby and second nearby 10Y U.S. Treasury Futures Contracts is not published or is otherwise unavailable on such third exchange business day, then rolling of any remaining portion of the notional investment in the first nearby 10Y U.S. Treasury Futures Contracts will be carried out as set out below in respect of Case 4.
- **Case 3:** If the 10Y U.S. Treasury Futures Contracts Valuation Price for both of the first nearby and second nearby 10Y U.S. Treasury Futures Contracts is available on the first exchange business day of the roll period, on which one third of the notional investment in the first nearby 10Y U.S. Treasury Futures Contracts is rolled over into the second nearby 10Y U.S. Treasury Futures Contracts, but the 10Y U.S. Treasury Futures Contracts Valuation Price for one or both of the first nearby and second nearby 10Y U.S. Treasury Futures Contracts is not published or is otherwise unavailable on the second exchange business day of the roll period, then the

remaining two thirds of the notional investment in the first nearby 10Y U.S. Treasury Futures Contracts will be rolled into the second nearby 10Y U.S. Treasury Futures Contracts on the third exchange business day of the roll period; however, if the 10Y U.S. Treasury Futures Contracts Valuation Price for one or both of the first nearby and second nearby 10Y U.S. Treasury Futures Contracts is not published or is otherwise unavailable on such third exchange business day, then rolling of any remaining portion of the notional investment in the first nearby 10Y U.S. Treasury Futures Contracts will be carried out as set out below in respect of Case 4.

- **Case 4:** In any situation where the 10Y U.S. Treasury Futures Contracts Valuation Price for one or both of the first nearby and second nearby 10Y U.S. Treasury Futures Contracts is not published or is otherwise unavailable on the third exchange business day of the roll period (including where such price is not published or is otherwise unavailable on both of the first and third exchange business days of the roll period only, both of the second and third exchange business days of the roll period only or all of the three exchange business days of the roll period), then any remaining amount of the notional investment in the first nearby 10Y U.S. Treasury Futures Contracts will be rolled into the second nearby 10Y U.S. Treasury Futures Contracts on the first notice date, which is the exchange business day immediately following the third exchange business day of the roll period. On such first notice date, rolling will be effected by using the first traded prices for the first nearby 10Y U.S. Treasury Futures Contracts and the second nearby 10Y U.S. Treasury Futures Contracts, provided that if, on such first notice date, the first traded price for the first nearby 10Y U.S. Treasury Futures Contracts and/or the second nearby 10Y U.S. Treasury Futures Contracts is not published or is otherwise unavailable, then the first nearby 10Y U.S. Treasury Futures Contracts will be sold at the Valuation Price for such first nearby 10Y U.S. Treasury Futures Contracts on the last reference day (as defined below) and the second nearby 10Y U.S. Treasury Futures Contracts will be bought at the Valuation Price for such second nearby 10Y U.S. Treasury Futures Contracts on the last reference day.

On any given exchange business day on which rolling does not occur because the 10Y U.S. Treasury Futures Contracts Valuation Price for one or both of the first nearby and second nearby 10Y U.S. Treasury Futures Contracts is not published or is otherwise unavailable (such day, a "no-roll exchange business day"; for the avoidance of doubt, a no-roll exchange business day may include any exchange business day of the roll period, as the case may be), the calculation agent will not calculate any value for the UST Futures Index but will publish the last available value.

If, on any exchange business day immediately following such no-roll exchange business day, the 10Y U.S. Treasury Futures Contracts are rolled over pursuant to the alternative methodology described above, then the calculation agent will apply alternative calculation methods to compute the level of the UST Futures Index on such exchange business day, which can be summarized as follows:

On such exchange business day, the level of the UST Futures Index will be computed as the *product* of:

- the value of the UST Futures Index as of the last exchange business day on which the Valuation Prices for both of the first nearby and second nearby 10Y U.S. Treasury Futures Contracts were available (such day, the "**last reference day**") and
- the *sum* of:
 - (i) the *daily return ratio* reflecting either:
 - (a) if such exchange business day falls within the roll period, the weighted performance of the first nearby 10Y U.S. Treasury Futures Contracts and the weighted performance of the second nearby 10Y U.S. Treasury Futures Contracts from the last reference day to such exchange business day; or
 - (b) if such exchange business day is a first notice date, the product of (x) the weighted performance of the first nearby 10Y U.S. Treasury Futures Contracts from the last reference day up to the rolling effected as of the opening of the market on the first notice date, (y) the weighted performance of the second nearby 10Y U.S. Treasury Futures Contracts from the last reference day up to the rolling effected as of the opening of the market on such first notice date and (z) the performance of the second nearby 10Y U.S. Treasury Futures Contracts, including the second

nearby contracts into which any remaining portion of the first nearby 10Y U.S. Treasury Futures Contracts are rolled over on such first notice date, calculated based on the opening price and the official daily settlement price of the second nearby 10Y U.S. Treasury Futures Contracts on such first notice date (for the avoidance of doubt, if the official daily settlement price of the second nearby 10Y U.S. Treasury Futures Contracts is not published or is otherwise unavailable on such first notice date, then the calculation agent will not calculate any value for the UST Futures Index but will publish the last available value),

and

- (ii) the overnight interest rate for the calculation period.

4.7 Publication

The value of the UST Futures Index is published on the Bloomberg page FRSIUSB <Index> (or any successor page).

4.8 UST Futures Index Calculation Formulae

The formulae for the calculation of the UST Futures Index are presented below. Investors, however, should be aware that these formulae do not reflect the alternative rolling and calculation methodologies applied when the value of 10Y U.S. Treasury Futures Contracts is not published or is otherwise unavailable (as further described above).

$$TRI_t = \left(r_t + \frac{i_{t-n}}{360} \cdot n \right) TRI_{t-n};$$

$$\left\{ \begin{array}{l} r_t = \frac{cP_{1,t}}{cP_{1,t-n}} \\ \text{when NOT in the 3-day roll period} \\ r_t = \left(1 - \frac{m-1}{3} \right) \cdot \frac{cP_{1,t}}{cP_{1,t-n}} + \frac{m-1}{3} \cdot \frac{cP_{2,t}}{cP_{2,t-n}} \\ \text{when on the } m^{\text{th}} \text{ day of the roll period, } m = 1, 2, 3 \end{array} \right.$$

Where

t = The relevant exchange business day;

TRI_t = The value of UST Futures Index as of day t ;

i_{t-n} = Overnight interest rate as of $(t - n)$

n = The number of actual calendar days between t and the immediately preceding exchange business day $(t - n)$;

r_t = Daily price return of the value of the 10Y U.S. Treasury Futures Contracts on t ;

$cP_{1,t}$ = 10Y U.S. Treasury Futures Contracts Valuation Price of the first nearby 10Y U.S. Treasury Futures Contracts on t ; *provided that*, for the avoidance of doubt, once the rolling has been effected in accordance with the above roll methodology and there is no remaining amount to be rolled, the first nearby 10Y U.S. Treasury Futures Contracts shall mean the 10Y U.S. Treasury Futures Contracts into which the notional investment has been rolled; and

$cP_{2,t}$ = 10Y U.S. Treasury Futures Contracts Valuation Price of the second nearby 10Y U.S. Treasury Futures Contracts on t .

Note: All calculations are based on seven significant figures (rounded at the eighth significant figure), and the value is published up to two decimal places (rounded at the third decimal place).

4.9 10-Year U.S. Treasury Note Futures Contracts

The 10-Year U.S. Treasury Note futures contracts underlying the UST Futures Index are three-month contracts to buy or sell standardized trading "units". One trading unit of 10-Year U.S. Treasury Note futures contracts equals one 10-Year U.S. Treasury note with a face value of \$100,000 or a multiple thereof. The 10-Year U.S. Treasury Note futures contract closest to expiration at any given time is known as the "first nearby" futures contract.

10-Year U.S. Treasury Notes: 10-Year U.S. Treasury notes are notes issued by the U.S. government with a ten-year maturity. U.S. Treasury notes are sold in increments of \$100. The price and interest rate of a note are determined at auction. The price may be greater than, less than or equal to the note's par amount.

4.10 Adjustments to the UST Futures Index

Investors should be aware that if the terms of the 10Y U.S. Treasury Futures Contracts are modified, Goldman Sachs International, as sponsor of the UST Futures Index, may take such steps as it considers appropriate in response to such modification.

5. Description of the European Government Bond Futures Rolling Strategy Index

Capitalised terms defined in this Section 5 (*Description of the European Government Bond Futures Rolling Strategy Index*) shall have the meaning given to them solely for the purposes of this Section 4 (*Description of the European Government Bond Futures Rolling Strategy Index*) unless otherwise specified or cross-referred to.

5.1 Overview of the European Government Bond Futures Rolling Strategy Index

The European Government Bond Futures Rolling Strategy Index (Total Return EUR) (*Bloomberg Code: FRSIEUB <Index>*) (the "**Euro Bond Futures Strategy Index**") is a Goldman Sachs International proprietary index designed to provide investors with a synthetic exposure to the total return (including income from interest accruing at the relevant overnight interest rate (as described below)) of the first nearby "Euro Bond Futures Contracts". Euro Bond Futures Contracts are futures contracts on federal bonds of the Federal Republic of Germany (such bonds, the "German Bonds") currently listed for trading on the Eurex. For further information on the Euro Bond Futures Contracts and the German Bonds, please refer to Section 5.10 (*The German Bond Futures Contracts*) and Section 5.11 (*The German Bonds*) below.

5.2 The Euro Bond Futures Strategy Index

The Euro Bond Futures Strategy Index is sponsored by Goldman Sachs International but is calculated by Standard & Poor's, as index calculation agent. The Euro Bond Futures Strategy Index operates in accordance with a pre-determined rolling methodology and set of formulae, and Standard & Poor's, the index calculation agent, does not exercise any discretion with respect thereto. The Euro Bond Futures Strategy Index is, therefore, not a managed index. As the index sponsor, Goldman Sachs International is not acting as an investment adviser or performing a discretionary management role with respect to the Euro Bond Futures Strategy Index and, as a result, has no fiduciary duty to any person in respect of the Euro Bond Futures Strategy Index. Goldman Sachs International may exercise discretion, however, in a limited number of exceptional circumstances, including, without limitation, where the Euro Bond Futures Contracts are modified or, as sponsor of the Strategy, where a Euro Bond Futures Contract Valuation Price is not published or otherwise unavailable or a market disruption event affects the Euro Bond Futures Strategy Index.

5.3 The Euro Bond Futures Strategy Index Starting Value

The Euro Bond Futures Strategy Index has been given a starting value of 100 as of December 31, 1991, which was the initial calculation date of the Euro Bond Futures Strategy Index.

5.4 Daily Strategy Value Calculation

The Euro Bond Futures Strategy Index is a euro denominated index and is calculated on each Eurex exchange business day. The value of the Euro Bond Futures Strategy Index on each Eurex exchange

business day will be calculated as the *product* of (i) the value of the Euro Bond Futures Strategy Index as of the immediately preceding Eurex exchange business day *multiplied* by (ii) the *sum* of (x) the daily return ratio of the value of the Euro Bond Futures Contracts (calculated as described below) on such Eurex exchange business day plus (y) the overnight interest rate for the given Eurex exchange business day *multiplied* by the applicable day count fraction based on the number of days in the calculation period.

Daily Return Ratio of the Value of the Euro Bond Futures Contracts: On each Eurex exchange business day (other than during the roll period as described below), the daily return ratio of the value of Euro Bond Futures Contracts is calculated as the quotient of (a) the Euro Bond Futures Contract Valuation Price on the relevant Eurex exchange business day divided by (b) the Euro Bond Futures Contract Valuation Price on the immediately preceding Eurex exchange business day. During each roll period, the daily return ratio of the values of the Euro Bond Futures Contracts is calculated as the quotient of (a) the Euro Bond Futures Contract Valuation Price of the second nearby Euro Bond Futures Contracts on such Eurex exchange business day divided by (b) the Euro Bond Futures Contract Valuation Price of the second nearby Euro Bond Futures Contracts on the immediately preceding Eurex exchange business day, to the extent the first nearby Euro Bond Futures Contracts have been rolled over.

Euro Bond Futures Contract Valuation Price: The Euro Bond Futures Contract Valuation Price on each Eurex exchange business day is the official daily settlement price per Euro Bond Futures Contract quoted by Eurex on such Eurex exchange business day.

Overnight Interest Rate: The overnight interest rate used for purposes of calculating the value of the Euro Bond Futures Strategy Index is, in the period:

- (i) up to (and including) 20 December 2021, the overnight interest rate as published on Reuters page EUR-EONIA-OIS-COMPOUND on EONIA RSF.REC.EONIA=.NaE, which follows the ACT/360 day count fraction, as defined in the 2006 ISDA Definitions; and
- (ii) from (and including) 20 December 2021, in respect of any day, the sum of (a) the euro short-term rate (€STR) administered by the European Central Bank (or any successor administrator) in respect of such day; and (b) a spread of 8.50 basis points,

in each case, if such rate is not published or is otherwise unavailable for any Eurex exchange business day, then the last available overnight interest rate published on such page will be used as the overnight interest rate for such Eurex exchange business day.

Unavailability of Euro Bond Futures Contract Valuation Price: The index calculation agent will not, however, calculate the value of the Euro Bond Futures Strategy Index, or will calculate such value pursuant to a different methodology (as described below under "*Price of Euro Bond Futures Contracts Unavailable – Unavailable Within the Roll Period*"), as the case may be, at any time where the Euro Bond Futures Contract Valuation Price for the first nearby and/or the second nearby Euro Bond Futures Contracts, as applicable, is not published or is otherwise unavailable as further described below.

5.5 Roll Methodology

Each Euro Bond Futures Contract has a quarterly contract month for expiration (March, June, September or December). At any given time, the Euro Bond Futures Strategy Index will include the first nearby Euro Bond Futures Contracts. As the first nearby Euro Bond Futures Contracts come to expiration, they will be replaced by the second nearby Euro Bond Futures Contracts. For example, a Euro Bond Futures Contract purchased and held in May may specify a June expiration. As time passes, the contract expiring in June is replaced by a Euro Bond Futures Contract with a September expiration during the relevant roll period. This process is referred to as "rolling".

Roll Period: Rolling will be carried out during the three Eurex exchange business days starting from, and including, the third to last Eurex exchange business day prior to the first notice date of the first nearby Euro Bond Futures Contracts to, and including, the last Eurex exchange business day prior to the first notice date of such Euro Bond Futures Contracts. Such period is referred to from time to time as the "roll period". On each Eurex exchange business day of the roll period, one third of the notional investment in the first nearby Euro Bond Futures Contracts will be rolled into the second nearby Euro Bond Futures Contracts, and the prices at which Euro Bond Futures Contracts are rolled will be based on the Euro Bond Futures Contract Valuation Prices for each of the first nearby and second nearby Euro Bond Futures

Contracts. Rolling will, however, be carried out pursuant to a different methodology when at any time during the roll period the Euro Bond Futures Contract Valuation Prices for either or both of the first nearby and second nearby Euro Bond Futures Contracts are not published or are otherwise unavailable as further described below.

5.6 Price of Euro Bond Futures Contracts Unavailable

Unavailable Outside of the Roll Period: If, on any Eurex exchange business day that does not fall within the roll period, the Euro Bond Futures Contract Valuation Price for the first nearby Euro Bond Futures Contracts is not published or is otherwise unavailable, then the index calculation agent will not calculate any value for the Euro Bond Futures Strategy Index but will publish the last available value.

In such an instance, if, on the immediately following Eurex exchange business day, the Euro Bond Futures Contract Valuation Price for the first nearby Euro Bond Futures Contracts is available, the daily return ratio of the value of the Euro Bond Futures Contracts will be calculated as the *quotient* of (a) the Euro Bond Futures Contract Valuation Price on that immediately following Eurex exchange business day *divided by* (b) the last available Euro Bond Futures Contract Valuation Price; *provided, however*, that, for the avoidance of doubt, if such immediately following Eurex exchange business day is the first day of the roll period and the Euro Bond Futures Contract Valuation Price for the second nearby Euro Bond Futures Contracts is not published or is otherwise unavailable on that immediately following Eurex exchange business day, then, as further described below, the index calculation agent will not calculate any value for the Euro Bond Futures Strategy Index but will publish the last available value.

Unavailable Within the Roll Period: If the Euro Bond Futures Contract Valuation Price is not published or is otherwise unavailable for either or both of the first nearby and second nearby Euro Bond Futures Contracts at any time during the roll period, then that rolling will be carried out pursuant to the following alternative rolling methodology:

- **Case 1:** If (a) the Euro Bond Futures Contract Valuation Price is not published or is otherwise unavailable on the first Eurex exchange business day of the roll period for either or both of the first nearby and second nearby Euro Bond Futures Contracts *and* (b) the Euro Bond Futures Contract Valuation Price is available on the second Eurex exchange business day of the roll period for both the first nearby and second nearby Euro Bond Futures Contracts, then:
 - one half of the notional investment in the first nearby Euro Bond Futures Contracts will be rolled into the second nearby Euro Bond Futures Contracts on that second Eurex exchange business day of the roll period; *and*
 - if the Euro Bond Futures Contract Valuation Price is also available on the third Eurex exchange business day of the roll period for both the first nearby and second nearby Euro Bond Futures Contracts, the second half of the notional investment in the first nearby Euro Bond Futures Contracts will be rolled over into the second nearby Euro Bond Futures Contracts on that third Eurex exchange business day of the roll period; *but*
 - if the Euro Bond Futures Contract Valuation Price is not published or is otherwise unavailable on such third Eurex exchange business day of the roll period for either or both of the first nearby and second nearby Euro Bond Futures Contracts, then rolling of any remaining portion of the notional investment in the first nearby Euro Bond Futures Contracts will be carried out as set out below under Case 4.
- **Case 2:** If the Euro Bond Futures Contract Valuation Price is not published or is otherwise unavailable on both the first and second Eurex exchange business days of the roll period for either or both of the first nearby and second nearby Euro Bond Futures Contracts, then:
 - if the Euro Bond Futures Contract Valuation Price is available on the third Eurex exchange business day of the roll period for both the first nearby and second nearby Euro Bond Futures Contracts, then the entire notional investment in the first nearby Euro Bond Futures Contracts will be rolled into the second nearby Euro Bond Futures Contracts on the third Eurex exchange business day of the roll period; *but*

- otherwise, the rolling of any remaining portion of the notional investment in the first nearby Euro Bond Futures Contracts will be carried out as set out below under Case 4.
- **Case 3:** If the Euro Bond Futures Contract Valuation Price is available on the first Eurex exchange business day of the roll period for both the first nearby and second nearby Euro Bond Futures Contracts (on which day one-third of the notional investment in the first nearby Euro Bond Futures Contracts is rolled over into the second nearby Euro Bond Futures Contracts), but the Euro Bond Futures Contract Valuation Price is not published or is otherwise unavailable on the second Eurex exchange business day of the roll period for either or both of the first nearby and second nearby Euro Bond Futures Contracts, then the remaining two-thirds of the notional investment in the first nearby Euro Bond Futures Contracts will be rolled into the second nearby Euro Bond Futures Contracts on the third Eurex exchange business day of the roll period, unless the Euro Bond Futures Contract Valuation Price is not published or is otherwise unavailable on such third Eurex exchange business day of the roll period for either or both of the first nearby and second nearby Euro Bond Futures Contracts (in which case the rolling of any remaining portion of the notional investment in the first nearby Euro Bond Futures Contracts will be carried out as set out below under Case 4).
- **Case 4:** In any situation where the Euro Bond Futures Contract Valuation Price for either or both of the first nearby and second nearby Euro Bond Futures Contracts is not published or is otherwise unavailable on the third Eurex exchange business day of the roll period (including where such price is not published or is otherwise unavailable on both the first and third Eurex exchange business days of the roll period only, on both the second and third Eurex exchange business days of the roll period only or on all three Eurex exchange business days of the roll period), then any remaining amount of the notional investment in the first nearby Euro Bond Futures Contracts will be rolled into the second nearby Euro Bond Futures Contracts on the first notice date, which is the Eurex exchange business day immediately following the third Eurex exchange business day of the roll period. On such first notice date, rolling will be effected by using the first traded prices for the first nearby Euro Bond Futures Contracts and the second nearby Euro Bond Futures Contracts, provided that if, on such first notice date, the first traded price for the first nearby Euro Bond Futures Contracts and/or the second nearby Euro Bond Futures Contracts is not published or is otherwise unavailable, then the first nearby Euro Bond Futures Contracts will be sold at the Euro Bond Futures Contract Valuation Price for such first nearby Euro Bond Futures Contracts on the last reference day (as defined below) the second nearby Euro Bond Futures Contracts will be bought at the Euro Bond Futures Contract Valuation Price for such second nearby Euro Bond Futures Contracts on the last reference day.

On each Eurex exchange business day on which rolling does not occur because the Euro Bond Futures Contract Valuation Price is not published or is otherwise unavailable for either or both of the first nearby and second nearby Euro Bond Futures Contracts (such day, a "Bond no-roll Eurex exchange business day"; for the avoidance of doubt, a Bond no-roll Eurex exchange business day may include any Eurex exchange business day of the roll period, as the case may be), the index calculation agent will not calculate any value for the Euro Bond Futures Strategy Index but will publish the last available value.

If, on any Eurex exchange business day immediately following such Bond no-roll Eurex exchange business day, the Euro Bond Futures Contracts are rolled over pursuant to the alternative methodology described above, then the index calculation agent will apply alternative calculation methods to compute the level of the Euro Bond Futures Strategy Index on such Eurex exchange business day, which can be summarized as follows:

On such Eurex exchange business day immediately following such Bond no-roll Eurex exchange business day, the level of the Euro Bond Futures Strategy Index will be computed as the *product* of:

- the value of the Euro Bond Futures Strategy Index as of the last Eurex exchange business day on which the Euro Bond Futures Contract Valuation Prices for both of the first nearby and second nearby Euro Bond Futures Contracts were available (such day, the "last reference day"); *multiplied by*
- the *sum* of:
 - (i) the *daily return ratio* reflecting either:

- (a) if such Eurex exchange business day falls within the roll period, the weighted performance of the first nearby Euro Bond Futures Contracts and the weighted performance of the second nearby Euro Bond Futures Contracts from the last reference day to such Eurex exchange business day; or
- (b) if such Eurex exchange business day is a first notice date of the first nearby Euro Bond Futures Contracts, the *product* of (x) the weighted performance of the first nearby Euro Bond Futures Contracts from the last reference day up to the rolling effected as of the opening of the market on such first notice date, (y) the weighted performance of the second nearby Euro Bond Futures Contracts from the last reference day up to the rolling effected as of the opening of the market on such first notice date and (z) the performance of the second nearby Euro Bond Futures Contracts, including the second nearby contracts into which any remaining portion of the first nearby Euro Bond Futures Contracts are rolled over on such first notice date, calculated based on the opening price and the official daily settlement price of the second nearby Euro Bond Futures Contracts on such first notice date (for the avoidance of doubt, if the official daily settlement price of the second nearby Euro Bond Futures Contracts is not published or is otherwise unavailable on such first notice date, then the index calculation agent will not calculate any value for the Euro Bond Futures Strategy Index but will publish the last available value),

plus

- (ii) the overnight interest rate for the calculation period.

5.7 Publication

The value of the Euro Bond Futures Strategy Index is published on the Bloomberg page *FRSIEUB* <Index> (or any successor page).

5.8 Euro Bond Futures Strategy Index Calculation Formulae

The formulae for the calculation of the Euro Bond Futures Strategy Index are presented below. Investors, however, should be aware that these formulae do not reflect the alternative rolling and calculation methodologies applied when the value of Euro Bond Futures Contracts is not published or is otherwise unavailable (as further described above).

$$TRI_t = \left(r_t + \frac{i_{t-n}}{360} \cdot n \right) TRI_{t-n};$$

$$\left\{ \begin{array}{l} r_t = \frac{cP_{1,t}}{cP_{1,t-n}} \\ \text{when NOT in the 3-day roll period} \\ r_t = \left(1 - \frac{m-1}{3} \right) \cdot \frac{cP_{1,t}}{cP_{1,t-n}} + \frac{m-1}{3} \cdot \frac{cP_{2,t}}{cP_{2,t-n}} \\ \text{when on the } m^{\text{th}} \text{ day of the roll period, } m = 1, 2, 3 \end{array} \right.$$

Where

t = The relevant Eurex exchange business day;

TRI_t = The value of Euro Bond Futures Strategy Index as of day t ;

i_{t-n} = Overnight interest rate as of $(t - n)$

n = The number of actual calendar days between t and the immediately preceding Eurex exchange business day $(t - n)$;

r_t = Daily price return of the value of the Euro Bond Futures Contracts on t ;

$cP_{1,t}$ = Euro Bond Futures Contract Valuation Price of the first nearby Euro Bond Futures Contracts on t ; provided that, for the avoidance of doubt, once the rolling has been effected in accordance with the above roll methodology and there is no remaining amount to be rolled, the first nearby Euro Bond Futures Contracts shall mean the Euro Bond Futures Contracts into which the notional investment has been rolled; and

$cP_{2,t}$ = Euro Bond Futures Contract Valuation Price of the second nearby Euro Bond Futures Contracts on t .

Note: All calculations are based on seven significant figures (rounded at the eighth significant figure), and the value is published up to two decimal places (rounded at the third decimal place).

5.9 Adjustments to the Euro Bond Futures Strategy Index

Investors should be aware that if the terms of the Euro Bond Futures Contracts are modified Goldman Sachs International, as sponsor of the Euro Bond Futures Strategy Index, may take such steps as it considers appropriate in response to such modification.

5.10 The German Bond Futures Contracts

The German Bond futures contracts underlying the Euro Bond Futures Strategy Index are quarterly three-month contracts to buy or sell standardized trading "units". One trading unit of German Bond futures contracts equals one federal bond issued by the Federal Republic of Germany with a par value of €100,000. The German Bond futures contract closest to expiration at any given time is known as the "first nearby" futures contract, and the German Bond futures contract that is second closest to expiration at any given time is known as the "second nearby" futures contract.

5.11 The German Bonds

The bonds on which Euro Bond Futures Contracts are based are federal bonds issued by the Federal Republic of Germany. These bonds have a term of 8.5 to 10.5 years and a coupon of 6%. Interest is paid annually.

6. Description of the Commodity Index

Capitalised terms defined in this Section 6 (*Description of the Commodity Index*) (including in Section 6.9 (*Definitions in respect of the Commodity Index*)) shall have the meaning given to them solely for the purposes of this Section 6 (*Description of the Commodity Index*) unless otherwise specified or cross-referred to.

6.1 Overview of the Commodity Index

The Goldman Sachs Commodity Focus Basket USD ER Index (*Bloomberg Code: GSISCFBU <Index>*) (referred to herein as the Commodity Index) seeks to provide synthetic exposure to the performance of a fixed and unequally weighted basket (the "**Basket**") of five underlying commodity indices (together the "**Components**" and each a "**Component**") which periodically (on a monthly basis) rebalances to assign a notional weight to each Component by reference to such fixed weights (the Component Weights, as set out in the table below).

The Components in respect of the Commodity Index are set out in the table below.

The Commodity Index is an "excess return" strategy and, therefore, the value of the Commodity Index shall not include the accrual of any amount or interest in relation to any money market rate in respect of any notional cash amount.

The Commodity Index is denominated in United States Dollars ("**USD**").

The level of the Commodity Index is reduced by the deduction the basket rebalancing costs and the asset servicing costs. The basket rebalancing costs reflect the synthetic costs of entering into and/or unwinding any transactions relating to the Components following changes to their Units. The asset servicing costs

reflect the synthetic costs of maintaining positions in, and replicating the performance of, the Components. Overall, the deduction of such synthetic costs may have the effect of reducing the performance of the Commodity Index.

c	Components	Bloomberg Page	Component Weight	Transaction Cost Rate	Servicing Cost Rate	Style
1	S&P GSCI Copper (ER) Index*	<i>SPGCICP</i> <Index>	30.00%	0.0003	0.002	A
2	S&P GSCI Aluminium (ER) Index*	<i>SPGCIAP</i> <Index>	20.00%	0.0003	0.002	A
3	S&P GSCI Nickel (ER) Index*	<i>SPGCIKP</i> <Index>	12.50%	0.0003	0.002	A
4	S&P GSCI Silver (ER) Index*	<i>SPGCSIP</i> <Index>	12.50%	0.0003	0.002	A
5	Goldman Sachs EUA USD Strategy**	<i>AGGSMOZ</i> <Index>	25.00%	0.0005	0.005	B

* Further details are available from <https://www.spglobal.com/>

** The EUA USD Strategy, as described in Section 7 (*Description of the EUA USD Strategy*) below.

6.2 Calculation of the value of the Commodity Index

The value of the Commodity Index (the "**Strategy Tradeable Level**") in respect of each Strategy Calculation Day will depend on the daily mark-to-market change in the value of the position in each Component reference by the Commodity Index as well as the notional holding in such Component at such time.

The Strategy Tradeable Level on the on the Strategy Inception Date was equal to 100.

The Strategy Tradeable Level shall be calculated by the Strategy Calculation Agent on each Strategy Calculation Day following the Strategy Inception Date as an amount in the Strategy Currency equal to the sum of:

- (i) the Strategy Tradeable Level in respect of the immediately preceding Strategy Calculation Day (" S_{t-1} "); plus
- (ii) the summation, in respect of each Component ("**c**"), of the sum of:
 - (a) the value of the position in respect of such Component in respect of the Tradeable Level of such Component and such Strategy Calculation Day and the Units of such Component in respect of the Strategy Calculation Day immediately preceding such Strategy Calculation Day (" $V_{t,t-1}(c)$ "); minus
 - (b) the value of the position in respect of such Component in respect of the Tradeable Level of such Component in respect of the Strategy Calculation Day immediately preceding such Strategy Calculation Day and the Units of such Component in respect of the Strategy Calculation Day immediately preceding such Strategy Calculation Day (" $V_{t-1,t-1}(c)$ "); minus
- (iii) the Total Costs in respect of such Strategy Calculation Day ("**Total Costs_t**").

Expressed as a formula:

$$S_{t-1} + \left[\sum_c (V_{t,t-1}(c) - V_{t-1,t-1}(c)) \right] - Total\ Costs_t$$

The Strategy Tradable Level may be negative on any Strategy Calculation Day. If the Strategy Tradable Level continues to be less than or equal to zero for a prolonged period of time, the value of the position in all Components will revert to zero and the Strategy Tradable Level will become static at or below zero.

If a Non-Tradable Event occurs on any Strategy Calculation Day, the Strategy Calculation Agent will not be able to calculate the Strategy Tradable Level in respect of such Strategy Calculation Day until a later date. Therefore, the Strategy Calculation Agent will also calculate a level (the "**Strategy Timely Level**") in respect of each Strategy Calculation Day.

The Strategy Calculation Agent will calculate the Strategy Timely Level of the Commodity Index on each Strategy Calculation Day as follows:

- (i) if no Non-Tradable Event occurs in respect of the Commodity Index on such Strategy Calculation Day, the Strategy Timely Level shall be equal to the Strategy Tradable Level in respect of such Strategy Calculation Day; or
- (ii) if a Non-Tradable Event occurs in respect of the Commodity Index on such Strategy Calculation Day, the Strategy Timely Level will be calculated using the same methodology for calculating the Strategy Tradable Level, save that the Timely Level of each Component shall be used in place of its Tradable Level.

6.3 Calculation of the value of the position in respect of a Component

The value of the position in respect of a Component and a Strategy Calculation Day is determined using the Tradeable Level in respect of such Component and a specified Strategy Calculation Day and the Units of such Component and a specified Strategy Calculation Day in accordance with the following formula:

$$L_t(c) \times U_s(c)$$

Where:

$L_t(c)$ means the Tradeable Level in respect of the relevant Component in respect of the relevant specified Strategy Calculation Day; and

$U_s(c)$ means the Units in respect of the relevant Component in respect of the relevant specified Strategy Calculation Day.

6.4 Determination of the Tradeable Level in respect of a Component

The Tradeable Level in respect of a Component and a Strategy Calculation Day, is determined by reference to the "Style" in respect of such Component.

In respect of each Component in respect of which the "Style" is "A", the Tradable Level in respect of a Strategy Calculation Day will be determined as follows:

- (i) if no Non-Tradable Event occurs in respect of any relevant contract expiration included in such Component on such Strategy Calculation Day, the Tradable Level of such Component will be equal to the Timely Level on such Strategy Calculation Day; or
- (ii) if a Non-Tradable Event occurs in respect of any relevant contract expiration (the "**Affected Contract Expiration**") included in such Component on such Strategy Calculation Day, the Tradable Level of such Component will be calculated on the First Tradable Date (broadly speaking being the first day on or following such Strategy Calculation Day on which the components of the Component are tradeable and not subject to a disruption) in accordance with the formula for, and method of, calculating such Component, using the Tradable Contract Price (broadly speaking, the reference price of the Affected Contract Expiration on the First Tradeable Day unless a Non-Tradeable Event occurs in which case it shall be as determined by the Strategy Sponsor) (instead of the relevant daily settlement price) for the Affected Contract Expiration in respect of such Strategy Calculation Day, and the Strategy Sponsor may make such adjustment(s) to the formula for, and method of, calculating such Component as it determines in a commercially reasonable manner to be appropriate in order to effect such calculation.

In respect of each Component in respect of which the "Style" is "B", the Tradable Level in respect of a Strategy Calculation Day will be calculated in accordance with the definition of "Strategy Tradable Level" specified in the relevant rules in respect of such Component, provided that if such Tradable Level would be determined on a day which would fall after the First Tradable Date (broadly speaking being the first day on or following such Strategy Calculation Day on which the components of the Component are tradeable and not subject to a disruption), the Tradable Level of such Component shall be determined by the Strategy Sponsor on such First Tradable Date acting in a commercially reasonable manner.

6.5 Calculation of the Units in respect of a Component

The Units of a Component and a specified Strategy Calculation Day shall be an amount calculated by the Strategy Calculation Agent in accordance with the following formula in respect of the Rebalancing Date "r" falling on or prior to such Strategy Calculation Day:

$$ICW_r(c) \times \frac{S_{RefDate(r)}}{LRefDate(r)(c)}$$

Where:

$ICW_r(c)$ means the Component Weight in respect of the relevant Component;

$S_{RefDate(r)}$ means the Strategy Timely Level in respect of the Reference Date in respect of the relevant Rebalancing Date or if such Strategy Timely Level is negative, then zero; and

$LRefDate(r)(c)$ means the Timely Level in respect of such Component and the Reference Date in respect of the relevant Rebalancing Date.

6.6 Calculation of the Total Costs

The Total Costs in respect of a Strategy Calculation Day shall be equal to an amount determined by the Strategy Calculation Agent in accordance with the following formula:

$$TC_t + \left[\sum_c SC_t(c) \right]$$

Where:

$SC_t(c)$ means, in respect of a Component, the Servicing Costs in respect of the relevant Component and the relevant Strategy Calculation Day; and

TC_t means, in respect of a Strategy Calculation Day, the aggregate of the transaction costs in respect of each Transaction Cost Class (being each class of Components with a common Transaction Cost Rate), as determined by the Strategy Calculation Agent in accordance with the following formula:

$$\sum_{cc} TC_t(cc)$$

Where:

cc means each Transaction Cost Class; and

$TC_t(cc)$ means the transaction costs in respect of the relevant Transaction Cost Class and the relevant Strategy Calculation Day, being an amount determined by the Strategy Calculation Agent in accordance with the following formula:

$$TCR_t(cc) \times Abs \left(\sum_c TCWM_t(c, cc) \times U_t(c) - U_{t-1}(c) \right)$$

Where:

$TCR_t(cc)$ means the Transaction Cost Rate in respect of the relevant Transaction Cost Class;

$Abs(x)$ means the absolute value function evaluated for the number x ;

$TCWM_t(c, cc)$ means, in respect of a Component and a Strategy Calculation Day, the Tradeable Level in respect of such Component and the relevant Strategy Calculation Day;

$U_t(c)$ means the Units of the relevant Component in respect of the relevant Strategy Calculation Day; and

$U_{t-1}(c)$ means the Units of the relevant Component in respect of the Strategy Calculation Day falling immediately prior to the relevant Strategy Calculation Day.

6.7 Calculation of the Servicing Costs in respect of a Component

The Servicing Costs in respect of a Component and a Strategy Calculation Day shall be equal to an amount determined by the Strategy Calculation Agent in accordance with the following formula:

$$Abs(L_{t-1}(c) \times U_{t-1}(c)) \times SCR_{t-1}(c) \times \frac{days}{365}$$

Where:

$Abs(x)$ means the absolute value function evaluated for the number x ;

$L_{t-1}(c)$ means the Tradeable Level of the relevant Component and the Strategy Calculation Day immediately preceding the relevant Strategy Calculation Day;

$U_{t-1}(c)$ means the Units of the relevant Component in respect of the Strategy Calculation Day falling immediately prior to the relevant Strategy Calculation Day;

$SCR_{t-1}(c)$ means the Servicing Cost Rate in respect of the relevant Component; and

days means the number of calendar days falling in the period commencing on (and including) the Strategy Calculation Date immediately preceding the relevant Strategy Calculation Day and ending on (but excluding) the relevant the relevant Strategy Calculation Day.

6.8 Termination

The Strategy Sponsor may, in its sole and absolute discretion, at any time, for any reason (including without limitation, because it is no longer possible or practicable to calculate the value of the Commodity Index) and without notice, terminate the calculation and publication of the Commodity Index.

6.9 Definitions in respect of the Commodity Index

"GS Strategy" means proprietary strategies which Goldman Sachs International or its successor(s) may create from time to time.

"Instrument" means a futures contract which is used to calculate the level of a Component.

"Market Disruption Event" means, in respect of a Strategy Calculation Day and:

- (i) a Component any one of the following events, as determined by the Strategy Sponsor:
 - (a) each such event as determined in accordance with the rules of such Component; or
 - (b) the occurrence of a Market Disruption Event (or other analogous event) in respect of any Instrument or other asset, instrument or rate (including, but not limited to, an option, exchange rate or interest rate) included in such Component or used in the calculation of the level of, such Component; or
- (ii) an Instrument that is not a Component, the occurrence of any one of the following events, as determined by the Strategy Sponsor:

- (a) the daily reference price of the relevant contract expiration of such Instrument for such Strategy Calculation Day remains at a "limit price" which means that the price of such Instrument on such day has increased or decreased from the previous day's settlement price for such Instrument by the maximum amount permitted under the applicable rules of the relevant trading facility; or
- (b) there is a failure by the relevant trading facility or other price source to announce or publish the daily reference price of the relevant contract expiration of such Instrument for such Strategy Calculation Day, provided that such Strategy Calculation Day is also an exchange business day in respect of such relevant contract expiration; or
- (c) trading the relevant contract expiration of such Instrument on the relevant trading facility is suspended or interrupted subsequent to the opening of trading and trading in such contract expiration does not recommence at least ten (10) minutes prior to the regular scheduled close of trading in such contract expiration, or in the event trading in such contract expiration does recommence at least ten (10) minutes prior to the regular scheduled close of trading, trading does not continue until the regular scheduled close of trading in such contract expiration.

"Non-Tradeable Event" means, in respect of a Strategy Calculation Day and:

- (i) a Component, the occurrence of any one of the following events, as determined by the Strategy Sponsor:
 - (a) such Strategy Calculation Day is not a Trading Day for such Component; or
 - (b) a Market Disruption Event is occurring or existing in respect of such Component on such Strategy Calculation Day;
- (ii) an Instrument that is not a Component,
 - (a) such Strategy Calculation Day is not an exchange business day for such Instrument; or
 - (b) a Market Disruption Event is occurring or existing in respect of such the relevant Instrument on such Strategy Calculation Day; or
 - (c) the Strategy Sponsor, in its reasonable judgement, (I) determines that such Instrument has ceased to be a liquid, actively traded Instrument that is generally available for trading, or that such Instrument has been the subject of a Market Disruption Event for at least five consecutive Strategy Calculation Days, or (II) anticipates on the basis of publicly available information that such Instrument or any Instrument valuation data, notwithstanding that it is available for trading, will cease to be liquid and actively traded or will be terminated or delisted by the relevant price source
 - (d) is occurring or existing in respect of the relevant contract expiration of such Instrument on such Strategy Calculation Day.
- (iii) a GS Strategy, the occurrence of a Non-Tradable Event in respect of any Component included in such GS Strategy.

"Rebalancing Date" means, in respect of a Reference Date, the Trading Day immediately following such Reference Date.

"Reference Date" means each of the Strategy Inception Date and, thereafter, the second to last Trading Day of each month.

"Strategy Calculation Day" means any day on which the offices of Goldman Sachs & Co. LLC in New York are open for business.

"Strategy Currency" means USD.

"Strategy Inception Date" means 10 December 2007.

"Strategy Trading Day" means each "Trading Day" in respect of Component c=5.

"Timely Level" means, in respect of a Component and a Strategy Calculation Day, if the "Style" in respect of such Component is:

- (i) "A" means the "Timely Level" of a Component on any day will be determined as the official closing level of such Component as published on the relevant Bloomberg page on such day, subject to adjustment in accordance with methodology of the Commodity Index; and
- (ii) "B" means the "Timely Level" of a Component on any day will be calculated in accordance with the definition of "Strategy Timely Level" specified in the relevant rules in respect of such Component.

in each case, provided that if such day is not a day on which the level of such Component is scheduled to be published, then the Timely Level of such Component for such day shall be deemed to be the Timely Level of such Component on the immediately preceding day on which such Component is scheduled to be published.

"Trading Day" means, in respect of a Component, that:

- (i) not a GS Strategy (being c = 1, 2, 3 and 4), a day which is (I) an exchange business day for any Instruments included in or referenced by such Component, (II) a day on which any other asset, instrument or rate (including, but not limited to, an option, exchange rate or interest rate) included in such Component or used in the calculation of the level of such Component, is scheduled to be traded or published, as applicable, and (III) a day on which such Component is scheduled to be published or traded (as applicable); and
- (ii) a GS Strategy (being c = 5), each day which is (a) a Trading Day for all the "Components" included in such GS Strategy, (b) a currency business day for the "Currency Conversion Component" (as defined in Section 5 (*Description of the EUA USD Strategy*) below) in respect of such Component and (c) a Strategy Calculation Day for the GS Strategy.

6.10 Disruption Events, Adjustment Events, Change in Methodology and Corrections

In respect of the Commodity Index, please see Section 10.2 (*Disruption Events - In respect of each of the Commodity Index and the EUA USD Strategy only*), Section 11 (*Corrections*) and Section 12 (*Change in Methodology*).

7. Description of the EUA USD Strategy

Capitalised terms defined in this Section 7 (*Description of the EUA USD Strategy*) (including in Section 7.7 (*Definitions in respect of the EUA USD Strategy*)) shall have the meaning given to them solely for the purposes of this Section 7 (*Description of the EUA USD Strategy*) unless otherwise specified or cross-referred to.

7.1 Overview of the EUA USD Strategy

The Goldman Sachs EUA USD Strategy (*Bloomberg Code: AGGSMOZ <Index>*) (referred to herein as the EUA USD Strategy) seeks to provide synthetic exposure to the EUA EUR Strategy (the "**Component**") hedged into the currency of the EUA USD Strategy, being United States Dollars ("**USD**").

c	Component	Bloomberg Page	Component Weight	Style
1	Enhanced Strategy MOZE on S&P GSCI Carbon Emission Allowances EUA (EUR) Index*	AGGSMOZE <Index>	100%	A

* As described in Section 8 (*Description of the EUA EUR Strategy*) below.

7.2 Calculation of the value of the EUA USD Strategy

The value of the EUA USD Strategy (the "**Strategy Tradeable Level**") in respect of each Strategy Calculation Day will depend on the daily mark-to-market change in the value of the position in the Component referenced by the EUA USD Strategy, the change in the foreign currency exchange rate between EUR and USD and the notional holding in such Component at such time.

The Strategy Tradeable Level on the on the Strategy Inception Date was equal to 100.

The Strategy Tradeable Level shall be calculated by the Strategy Calculation Agent on each Strategy Calculation Day following the Strategy Inception Date as an amount in the Strategy Currency equal to the sum of:

- (i) the Strategy Tradeable Level in respect of the immediately preceding Strategy Calculation Day (" S_{t-1} "); plus
- (ii) the product of:
 - (a) the FX Rate Tradeable Level in respect of such Strategy Calculation Day (" $FX_t(c)$ "); multiplied by
 - (b)
 - (1) the value of the position in respect of the Component in respect of the Tradeable Level of the Component and such Strategy Calculation Day and the Units of the Component in respect of the Strategy Calculation Day immediately preceding such Strategy Calculation Day (" $V_{t,t-1}(c)$ "); minus
 - (2) the value of the position in respect of such Component in respect of the Tradeable Level of such Component in respect of the Strategy Calculation Day immediately preceding such Strategy Calculation Day and the Units of such Component in respect of the Strategy Calculation Day immediately preceding such Strategy Calculation Day (" $V_{t-1,t-1}(c)$ ").

Expressed as a formula:

$$S_{t-1} + \left[\sum_c \left(FX_t(c) \times (V_{t,t-1}(c) - V_{t-1,t-1}(c)) \right) \right]$$

The Strategy Tradable Level may be negative on any Strategy Calculation Day. If the Strategy Tradable Level continues to be less than or equal to zero for a prolonged period of time, the value of the position in the Component will revert to zero and the Strategy Tradable Level will become static at or below zero.

If a Non-Tradable Event occurs on any Strategy Calculation Day, the Strategy Calculation Agent will not be able to calculate the Strategy Tradable Level in respect of such Strategy Calculation Day until a later date. Therefore, the Strategy Calculation Agent will also calculate a level (the "**Strategy Timely Level**") in respect of each Strategy Calculation Day.

The Strategy Calculation Agent will calculate the Strategy Timely Level of the EUA USD Strategy on each Strategy Calculation Day as follows:

- (i) if no Non-Tradable Event occurs in respect of the EUA USD Strategy on such Strategy Calculation Day, the Strategy Timely Level shall be equal to the Strategy Tradable Level in respect of such Strategy Calculation Day; or
- (ii) if a Non-Tradable Event occurs in respect of the EUA USD Strategy on such Strategy Calculation Day, the Strategy Timely Level will be calculated using the same methodology for calculating the Strategy Tradable Level, save that the Timely Level of each Component shall be used in place of its Tradable Level.

7.3 Calculation of the value of the position in respect of the Component

The value of the position in respect of the Component and a Strategy Calculation Day is determined using the Tradeable Level in respect of such Component and a specified Strategy Calculation Day and

the Units of the Component and a specified Strategy Calculation Day in accordance with the following formula:

$$L_t(c) \times U_s(c)$$

Where:

$L_t(c)$ means the Tradeable Level in respect of the Component in respect of the relevant specified Strategy Calculation Day; and

$U_s(c)$ means the Units in respect of the Component in respect of the relevant specified Strategy Calculation Day.

7.4 Determination of the Tradeable Level in respect of the Component

The Tradable Level in respect of the Component and a Strategy Calculation Day will be determined as follows:

- (i) if no Non-Tradable Event occurs in respect of the Component on such Strategy Calculation Day, the Tradable Level of the Component will be equal to the Timely Level on such Strategy Calculation Day; or
- (ii) if a Non-Tradable Event occurs in respect of any relevant contract expiration (the "**Affected Contract Expiration**") included in the Component on such Strategy Calculation Day, the Tradable Level of the Component will be calculated on the First Tradable Date (broadly speaking being the first day on or following such Strategy Calculation Day on which the components of the Component are tradeable and not subject to a disruption) in accordance with the formula for, and method of, calculating the Component, using the Tradable Contract Price (broadly speaking, the reference price of the Affected Contract Expiration on the First Tradeable Day unless a Non-Tradeable Event occurs in which case it shall be as determined by the Strategy Sponsor) (instead of the relevant daily settlement price) for the Affected Contract Expiration in respect of such Strategy Calculation Day, and the Strategy Sponsor may make such adjustment(s) to the formula for, and method of, calculating the Component as it determines in a commercially reasonable manner to be appropriate in order to effect such calculation.

7.5 Calculation of the Units in respect of a Component

The Units of the Component and a specified Strategy Calculation Day shall be an amount calculated by the Strategy Calculation Agent in accordance with the following formula in respect of the Rebalancing Date "r" falling on or prior to such Strategy Calculation Day:

$$ICW_r(c) \times \frac{S_{RefDate(r)}}{LRefDate(r)(c) \times FX_{RefDate(r)}(c)}$$

Where:

$ICW_r(c)$ means the Component Weight in respect of the Component;

$FX_{RefDate(r)}(c)$ means the FX Rate Tradeable Level in respect of the Reference Date in respect of the relevant Rebalancing Date;

$S_{RefDate(r)}$ means the Strategy Timely Level in respect of the Reference Date in respect of the relevant Rebalancing Date or if such Strategy Timely Level is negative, then zero; and

$LRefDate(r)(c)$ means the Timely Level in respect of such Component and the Reference Date in respect of the relevant Rebalancing Date.

7.6 Termination

The Strategy Sponsor may, in its sole and absolute discretion, at any time, for any reason (including without limitation, because it is no longer possible or practicable to calculate the value of the EUA USD Strategy) and without notice, terminate the calculation and publication of the EUA USD Strategy.

7.7 Definitions in respect of the EUA USD Strategy

"Currency Conversion Component" means in respect of EUR and USD, a rate expressed as the number of units of the EUR per unit of USD.

"Exchange Rate Disruption Event" means, broadly speaking and as more fully described in the methodology in respect of the EUA USD Strategy as published or made available by the Strategy Sponsor, in respect of a Strategy Calculation Day, in respect of the Currency Conversion Component, any one of the following events, as determined by the Strategy Sponsor:

- (i) the relevant Spot Exchange Rate has ceased to be published by the relevant Spot Exchange Rate Price Source, and has not been replaced by a successor; or
- (ii) EUR or USD splits into dual or multiple currencies; or
- (iii) an event has occurred in, or affecting, any jurisdiction whose currency is either EUR or USD, as the case may be, that generally makes it impossible to convert USD into EUR or, as the case may be, EUR into USD, through customary legal channels; or
- (iv) it is or becomes impossible or not reasonably practicable for the Strategy Sponsor to obtain a currency exchange rate for such Currency Conversion Component from the relevant Spot Exchange Rate Price Source or any other source, or to obtain a firm quote for a currency exchange rate for such Currency Conversion Component; or
- (v) (a) an event has occurred in, or affecting, any jurisdiction whose currency is EUR that generally makes it impossible to deliver (I) the USD from accounts inside such jurisdiction to accounts outside such jurisdiction or (II) EUR between accounts inside such jurisdiction or to a party that is a non-resident of such jurisdiction, or (b) an event has occurred in, or affecting, any jurisdiction whose currency is USD that generally makes it impossible to deliver (I) EUR from accounts inside such jurisdiction to accounts outside such jurisdiction or (II) USD between accounts inside such jurisdiction or to a party that is a non-resident of such jurisdiction; or
- (vi) a default, event of default, or other similar condition or event (however described) with respect to any security or indebtedness for borrowed money of, or guaranteed by, any applicable governmental authority, including, but not limited to, (a) the failure of timely payment in full of any principal, interest, or other amounts due (without giving effect to any applicable grace periods) in respect of any such security, indebtedness, or guarantee, (b) a declared moratorium, standstill, waiver, deferral, repudiation, challenge of the validity, or rescheduling of any principal, interest, or other amounts due in respect of any such security, indebtedness, or guarantee, or (c) the amendment or modification of the terms and conditions of payment of any principal, interest, or other amounts due in respect of any such security, indebtedness, or guarantee without the consent of all holders of such obligation. For these purposes, the determination of the existence or occurrence of any default, event of default, or other similar condition or event shall be made without regard to any lack or alleged lack of authority or capacity of such governmental authority to issue or enter into such security, indebtedness, or guarantee; or
- (vii) any expropriation, confiscation, requisition, nationalisation or other action by a relevant governmental authority which deprives any market participant of all or substantially all of its assets in any jurisdiction whose currency is USD or EUR; or
- (viii) the occurrence or existence at any time, of any event or circumstance that disrupts or impairs (a) the ability of market participants in general to effect transactions in relation to EUR or USD in a notional size required in relation to any product or transaction linked to the EUA USD Strategy, (b) impairs the liquidity of transactions in relation to EUR or USD, (c) the ability to obtain market values of, EUR or USD, or (d) the ability of any market participant, after using commercially reasonable efforts, to acquire, establish, re-establish, substitute, maintain, unwind, or dispose of any hedge position relating to the EUA USD Strategy or any transaction linked to the EUA USD Strategy or to realise, recover or remit the proceeds of any such transaction; or
- (ix) EUR or USD ceases to exist and is replaced by another currency.

"FX Rate Timely Level" means, in respect of any day, the Spot Exchange Rate in respect of such day.

"FX Rate Tradeable Level" means, in respect of any Strategy Calculation Day, the FX Rate Timely Level in respect of such day unless a Non-Tradable Event is occurring in respect of the Currency Conversion Component or the Component on such Strategy Calculation Day, in which case the FX Tradeable Level shall be the Spot Exchange Rate on the day (the "Resolution Day") that is the First Tradable Date (broadly speaking being the first day on or following such Strategy Calculation Day on which the components of the Currency Conversion Component are tradeable and not subject to a disruption) in respect of such Currency Conversion Component and the Strategy Calculation Day that falls on the First Tradable Date in respect of the Component and such Strategy Calculation Day, provided that if a Non-Tradable Event in respect of such Currency Conversion Component exists on the Resolution Day, the FX Rate Tradeable Level of such Currency Conversion Component shall be determined by the Strategy Sponsor on such First Tradable Date acting in a commercially reasonable manner

"Instrument" means a futures contract which is used to calculate the level of a Component.

"Non-Tradeable Event" means, in respect of a Strategy Calculation Day and:

- (i) a Component, the occurrence of any one of the following events, as determined by the Strategy Sponsor:
 - (a) such Strategy Calculation Day is not a Trading Day for such Component; or
 - (b) a Market Disruption Event is occurring or existing in respect of such Component on such Strategy Calculation Day;
- (ii) an Instrument that is not a Component,
 - (a) such Strategy Calculation Day is not an exchange business day for such Instrument; or
 - (b) a Market Disruption Event is occurring or existing in respect of such the relevant Instrument on such Strategy Calculation Day; or
 - (c) the Strategy Sponsor, in its reasonable judgement, (I) determines that such Instrument has ceased to be a liquid, actively traded Instrument that is generally available for trading, or that such Instrument has been the subject of a Market Disruption Event for at least five consecutive Strategy Calculation Days, or (II) anticipates on the basis of publicly available information that such Instrument or any Instrument valuation data, notwithstanding that it is available for trading, will cease to be liquid and actively traded or will be terminated or delisted by the relevant price source; or
 - (d) is occurring or existing in respect of any relevant contract expiration of such Instrument on such Strategy Calculation Day; or
- (iii) the Currency Conversion Component, the occurrence of any one of the following events, as determined by the Strategy Sponsor:
 - (a) such Strategy Calculation Day is not a day on which the Spot Exchange Rate is scheduled to be published on the relevant Spot Exchange Rate Price Source; or
 - (b) a Market Disruption Event is occurring or existing in respect of the relevant Currency Conversion Component on such Strategy Calculation Day; or
- (iv) a Component that is a GS Strategy, the occurrence of a Non-Tradable Event in respect of any "Component" included in such GS Strategy.

"Market Disruption Event" means, in respect of:

- (i) in respect of a Component, any one of the following events, as determined by the Strategy Sponsor:
 - (a) each event determined as such in accordance with the rules of such Component; or

- (b) the occurrence of a Market Disruption Event (or other analogous event) in respect of any Instrument or other asset, instrument or rate (including, but not limited to, an option, exchange rate or interest rate) included in such Component or used in the calculation of the level of, such Component; or
- (ii) the Currency Conversion Component and a Strategy Calculation Day, the occurrence of any one of the following events, as determined by the Strategy Sponsor:
 - (a) an Exchange Rate Disruption Event in respect of such Currency Conversion Component; or
 - (b) the occurrence or existence, on such Strategy Calculation Day at any time, of a suspension of, or limitation imposed on, trading on the London interbank market or the interbank market of the city or cities determined by the Strategy Sponsor to be the principal financial centre(s) for EUR or USD; and
- (iii) an Instrument that is not a Component and a Strategy Calculation Day, the occurrence of any one of the following events, as determined by the Strategy Sponsor:
 - (a) the daily reference price of the relevant contract expiration of such Instrument for such Strategy Calculation Day remains at a "limit price" which means that the price of such Instrument on such day has increased or decreased from the previous day's settlement price for such Instrument by the maximum amount permitted under the applicable rules of the relevant trading facility; or
 - (b) there is a failure by the relevant trading facility or other price source to announce or publish the daily reference price of the relevant contract expiration of such Instrument for such Strategy Calculation Day, provided that such Strategy Calculation Day is also an exchange business day in respect of such relevant contract expiration; or
 - (c) trading the relevant contract expiration of such Instrument on the relevant trading facility is suspended or interrupted subsequent to the opening of trading and trading in such contract expiration does not recommence at least ten (10) minutes prior to the regular scheduled close of trading in such contract expiration, or in the event trading in such contract expiration does recommence at least ten (10) minutes prior to the regular scheduled close of trading, trading does not continue until the regular scheduled close of trading in such contract expiration.

"Reference Date" means each Strategy Calculation Day.

"Rebalancing Date" means, in respect of a Reference Date, the Strategy Calculation Day immediately following such Reference Date.

"Spot Exchange Rate" means, in respect of any day, the 4 p.m. London closing spot mid rate for converting one unit of USD into EUR for such day as published by the Spot Exchange Rate Price Source. If such day is not a day on which such spot exchange rate is scheduled to be published on the relevant Spot Exchange Rate Price Source, or such spot exchange rate is otherwise unavailable for any other reason, the Spot Exchange Rate shall be deemed to be the relevant spot exchange rate as of the first preceding day on which such spot exchange rate was scheduled to be published and the relevant Spot Exchange Rate Price Source published such spot exchange rate.

"Spot Exchange Rate Price Source" means WM Company or any successor company.

"Strategy Currency" means USD.

"Strategy Inception Date" means 10 December 2007.

"Timely Level" means, in respect of the Component and a Strategy Calculation Day, the official closing level of the Component as published on the relevant Bloomberg page on such day, subject to adjustment in accordance with methodology of the EUA USD Strategy, provided that if such day is not a day on which the level of the Component is scheduled to be published, then the Timely Level of the Component

for such day shall be deemed to be the Timely Level of the Component on the immediately preceding day on which the Component is scheduled to be published.

7.8 Disruption Events, Adjustment Events, Change in Methodology and Corrections

In respect of the EUA USD Strategy, please see Section 10.2 (*Disruption Events - In respect of each of the Commodity Index and the EUA USD Strategy only*), Section 11 (*Corrections*) and Section 12 (*Change in Methodology*).

8. Description of the EUA EUR Strategy

Capitalised terms defined in this Section 8 (*Description of the EUA EUR Strategy*) shall have the meaning given to them solely for the purposes of this Section 8 (*Description of the EUA USD Strategy*) unless otherwise specified or cross-referred to. Terms used but not defined herein shall have the meaning given to them in the S&P GSCI® Index Methodology and should be read in conjunction with such methodology (further details are available from <https://www.spglobal.com/>).

8.1 Overview of the EUA EUR Strategy

The Goldman Sachs EUA EUR Strategy (*Bloomberg Code: AGGSMOZE <Index>*) (referred to herein as the EUA EUR Strategy) reflects the returns that are potentially available through an investment in the same commodity futures contract that is included in the S&P GSCI Carbon Emission Allowances EUA (EUR) Index (the "**Underlying S&P Index**") and is calculated in accordance with the methodology for calculating Underlying S&P Index, subject to certain modifications to the methodology for calculating the relevant Underlying S&P Index as further described in Section 8.3 (*The Adjustment of Roll Contract Expiration*) and Section 8.4 (*The Strategy Roll Period*) below.

The EUA EUR Strategy is calculated and published by the Strategy Sponsor and displayed on the relevant Bloomberg ticker. The Strategy Currency is EUR.

The EUA EUR Strategy is calculated using an "excess return" methodology and therefore reflects the returns that are potentially available through an investment in the commodity futures contract included in the Underlying S&P Index. The use of the term "excess return" refers to the changing value of the commodity futures contract included in the relevant Underlying S&P Index and the yield that results from the "rolling" forward of the hypothetical positions in such commodity futures contract as it approaches delivery (i.e., (i) selling near-dated commodity futures contracts (or the commodity futures contracts that are nearing expiration) before they expire, and (ii) buying longer-dated futures contracts (or the commodity futures contracts that have an expiration date further in the future)), and not to any expectations of return.

The Strategy Inception Date is 10 December 2007.

The Underlying S&P Index is calculated and published by S&P Dow Jones Indices LLC (the "**S&P Index Sponsor**").

c	Component	Underlying S&P Index	Bloomberg Page
1	European Union Carbon Emission Allowances (EUA) Futures	S&P GSCI Carbon Emission Allowances EUA (EUR) Index *	SPGSCEE <Index>

* Further details are available from <https://www.spglobal.com/>.

8.2 Calculation of the level of the EUA EUR Strategy

The EUA EUR Strategy is calculated on a similar, but not identical, basis to the Underlying S&P Index. However, the key difference between the EUA EUR Strategy and the Underlying S&P Index is that the EUA EUR Strategy applies different rules for the "rolling" forward of the hypothetical positions in the relevant commodity futures contracts to those used by the relevant Underlying S&P Index, as described in more detail in Section 8.3 (*The Adjustment of Roll Contract Expiration*) and Section 8.4 (*The Strategy Roll Period*) below.

8.3 The Adjustment of Roll Contract Expiration

In respect of the Designated Contract of each Strategy, the definition of the term "Roll Contract Expiration" in respect to such Designated Contract in the S&P GSCI® Index Methodology is modified so that, with respect to the Designated Contract to be rolled in the EUA EUR Strategy on any S&P GSCI Business Day, the Roll Contract Expiration shall be the Designated Contract Expiration following the Contract Expiration identified according to the schedule for each of the 12 months starting with January shall be "Z Z Z Z Z Z Z Z Z Z Z Z" (where "Z" denotes the December contract expiration falling in the relevant calendar year). This modified definition of the term Roll Contract Expiration will result in the relevant Designated Contract of the EUA EUR Strategy being rolled in a manner other than as set out in the S&P GSCI® Index Methodology.

8.4 The Strategy Roll Period

The EUA EUR Strategy applies a different roll period to the "Roll Period" used by the S&P GSCI® Index Methodology. The Roll Period applicable to the S&P GSCI® Index Methodology begins on the fifth S&P GSCI Business Day of each calendar month and ends on the ninth S&P GSCI Business Day of such calendar month, subject to adjustment in accordance with the S&P GSCI® Index Methodology. In contrast, the roll period applicable to the EUA EUR Strategy (the "Strategy Roll Period") begins on the Roll Start Date and ends on the Roll End Date, as defined below.

"**Last Roll Date**" means the first S&P GSCI Business Day that satisfies the two conditions below:

- (a) falls on or after the fifth S&P GSCI Business Day in the month immediately preceding the month in which the roll would take place for the Underlying S&P Index; and
- (b) none of the circumstances described in Section 8.6 (*Adjustment of the Strategy Roll Period*) below exist.

"**Roll End Date**" means the fifth S&P GSCI Business Day in the month in which the roll would take place for the Underlying S&P Index.

"**Roll Start Date**" means the later of:

- (a) the seventh S&P GSCI Business Day in the month immediately preceding the month in which the roll would take place for the Underlying S&P Index; or
- (b) the first S&P GSCI Business Day that falls immediately after the Last Roll Date.

8.5 Adjustment events in respect of the roll period

The Strategy Sponsor may make certain adjustments to the EUA EUR Strategy that it determines to be necessary or appropriate (or may cease to calculate the EUA EUR Strategy) including (i) if the contract reference price on a day for the relevant commodity futures contract is a maximum or minimum price for such commodity futures contract on such day, (ii) if the published Daily Contract Reference Price (as defined in the S&P GSCI® Index Methodology) reflects a manifest error, (iii) if no contract reference price is published by 4:00 p.m., Eastern Standard Time or (iv) trading in the relevant commodity futures contract is terminated prior to its scheduled closing time.

8.6 Adjustment of the Strategy Roll Period

If on any day during a Strategy Roll Period (that would otherwise be a S&P GSCI Business Day), any of the following circumstances exist with respect to a Designated Contract included in the EUA EUR Strategy, the portion of the roll in respect of such Designated Contract that would otherwise have taken place on that day is deferred until the next Contract Business Day (provided that such day is also an S&P GSCI Business Day) on which such circumstances do not exist:

- (a) if the S&P Index Sponsor announces or has announced after the start of the current Strategy Roll Period that such day is no longer an S&P GSCI Business Day;
- (b) if such S&P GSCI Business Day is not a Contract Business Day with respect to the First Nearby Contract Expiration or the Roll Contract Expiration in respect of such Strategy Roll Period;

- (c) the applicable Daily Contract Reference Price of the First Nearby Contract Expiration or the Roll Contract Expiration in respect of such Strategy Roll Period on such S&P GSCI Business Day is a Limit Price (i.e., the maximum or minimum price for such Contract Expiration) on such day, as determined by the rules or policies of the relevant Trading Facility;
- (d) the Daily Contract Reference Price published by the relevant Trading Facility for the First Nearby Contract Expiration or the Roll Contract Expiration in respect of such Strategy Roll Period reflects manifest error and such error is not corrected, or such price is not published by 4:00 p.m., Eastern Standard Time. In that event, the S&P Strategy Sponsor may, but is not required to, determine a Daily Contract Reference Price and complete the relevant portion of the roll based on such price; provided, that, if the relevant Trading Facility publishes a price before the opening of trading on the next day, the S&P Strategy Sponsor will revise the portion of the roll accordingly; or
- (e) trading in the First Nearby Contract Expiration or the Roll Contract Expiration in respect of such Strategy Roll Period for such S&P GSCI Business Day is terminated prior to its scheduled closing time, and trading in such First Nearby Contract Expiration or Roll Contract Expiration does not resume at least ten minutes prior to, and continue until, the scheduled closing time (or the rescheduled closing time if such closing time was rescheduled as a result of the termination).

As an example, assuming that the Strategy Roll Period is scheduled to be twenty S&P GSCI Business Days, if any of the enumerated circumstances above exist in respect of a Designated Contract included in the EUA EUR Strategy on the first S&P GSCI Business Day of such Strategy Roll Period, then no portion of the roll in respect of such Designated Contract will be performed on such day and 10 per cent. of the roll in respect of such Designated Contract will be implemented on the next S&P GSCI Business Day. If such circumstances also exist in respect of the same Designated Contract on the second S&P GSCI Business Day of such Strategy Roll Period, then 15 per cent. of the roll in respect of such Designated Contract will be performed on the third S&P GSCI Business Day, and so forth. If such circumstances exist in respect of the same Designated Contract throughout all twenty S&P GSCI Business Days initially designated as such Strategy Roll Period, then the entire roll in respect of the same Designated Contract will be performed on the next succeeding S&P GSCI Business Day on which none of these circumstances exist in respect of such Designated Contract. This procedure for adjusting the Strategy Roll Period is also applied by the S&P Index Sponsor to the Underlying S&P Index.

8.7 Disruption Events, Adjustment Events, Change in Methodology and Corrections

In respect of the EUA EUR Strategy, please see Section 10.3 (*Disruption Events - In respect of the EUA EUR Strategy only*), Section 11 (*Corrections*) and Section 12 (*Change in Methodology*).

8.8 Termination

The Strategy Sponsor may, in its sole and absolute discretion, at any time, for any reason (including without limitation, because it is no longer possible or practicable to calculate the value of the EUA EUR Strategy) and with notice, terminate the calculation and publication of the EUA EUR Strategy.

9. Description of the Money Market Indices

Capitalised terms defined in this Section 9 (*Description of the Money Market Indices*) (including in Section 9.5 (*Definitions in respect of the Money Market Indices*)) shall have the meaning given to them solely for the purposes of this Section 9 (*Description of the Money Market Indices*) unless otherwise specified or cross-referred to.

9.1 Overview of each Money Market Index

The EUR Goldman Sachs Overnight Money Market Index (*Bloomberg Code: GSMMEUR <Index>*) (referred to herein as the EUR Money Market Index) intends to express the notional returns accruing to a hypothetical investor from an investment in a notional overnight money account denominated in the Strategy Currency of EUR that accrues interest at a rate equal to, in the period:

- (i) up to (and including) 20 December 2021, the Euro OverNight Index Average ("**EONIA**"); and

- (ii) from (and including) 20 December 2021, the sum of (a) €STR (as defined below); and (b) a spread of 8.50 basis points.

The EUR STR Goldman Sachs Overnight Money Market Index (*Bloomberg Code: GSMMSTR <Index>*) (referred to herein as the EUR STR Money Market Index) intends to express the notional returns accruing to a hypothetical investor from an investment in a notional overnight money account denominated in the Strategy Currency of EUR that accrues interest at a rate determined by reference to €STR.

The USD Goldman Sachs Overnight Money Market Index (*Bloomberg Code: GSMMUSD <Index>*) (referred to herein as the USD Money Market Index) intends to express the notional returns accruing to a hypothetical investor from an investment in a notional overnight money account denominated in the Strategy Currency of USD that accrues interest at a rate determined by reference to the USD-Federal Funds-H.15 rate ("**Fed Funds Rate**").

9.2 Calculation of the value of each Money Market Index

The value of the Money Market Index (the "**MM Index Value**") in respect of a Money Market Index on the MM Index Inception Date in respect of such Money Market Index was equal to 100.

The MM Index Value in respect of a Money Market Index shall be calculated by the Strategy Calculation Agent on each MM Index Business Day following the MM Index Inception Date in respect of such Money Market Index as an amount equal to:

- (a) the MM Index Value in respect of the Overnight Interest Rate Business Day in respect of such Money Market Index immediately preceding such MM Index Business Day (or, if none, 100); multiplied by
- (b) the greater of:
- (A) zero; and
 - (B) (i) one; plus
 - (ii) the Overnight Interest Rate in respect of such Money Market Index in respect of the Overnight Interest Rate Business Day in respect of such Money Market Index immediately preceding such MM Index Business Day multiplied by (I) the actual number of days in the period commencing on (and including) the Overnight Interest Rate Business Day immediately preceding such MM Index Business Day and ending on (but excluding) such MM Index Business Day, divided by (II) 360,

provided that if the MM Index Value in respect of such MM Index Business Day is equal to or less than zero, the MM Index Value in respect of such Money Market Index and such MM Index Business Day and all subsequent MM Index Business Days shall be zero.

Subject as provided under the heading "*Change in Methodology and Overnight Interest Rate and Termination*" below, the Strategy Calculation Agent will make available the MM Index Value on each MM Index Business Day. Each MM Index Value will be published on the applicable MM Index Bloomberg Ticker.

9.3 Change in methodology and overnight interest rate in respect of each Money Market Index

If any fiscal, market, regulatory, juridical, financial or other circumstances arise that would, in the view of the Strategy Sponsor, necessitate or make desirable a modification or change of the methodology in respect of the Money Market Index, the Strategy Sponsor reserves the right to make such changes to the methodology in respect of the Money Market Index to account for the occurrence of such circumstance(s).

In particular, in respect of the:

- (i) EUR Money Market Index or the EUR STR Money Market Index, if €STR is not published (or, if published, is deemed to be manifestly incorrect) for a period longer than three Overnight

Interest Rate Business Days, the Strategy Sponsor may substitute €STR with an alternative euro overnight interest rate option; and

- (ii) USD Money Market Index, if the Fed Funds Rate is not published (or, if published, is deemed to be manifestly incorrect) for a period longer than three Overnight Interest Rate Business Days, the Strategy Sponsor may substitute the Fed Funds Rate with an alternative euro overnight interest rate option.

The Strategy Sponsor shall be entitled to make modifications to the terms of the Money Market Index in any manner it may deem necessary or desirable, including (without limitation) to correct any manifest or proven error, or to cure, correct or supplement any ambiguity or defective provision contained in the methodology for the Money Market Index.

The Strategy Sponsor may, but is not required to, establish a committee comprising of employees of the Strategy Sponsor and external members with the relevant academic or professional background to consider any proposed changes outlined above. The rules, responsibilities and powers of any such committee shall be pre-defined by the Strategy Sponsor.

9.4 Termination in respect of a Money Market Index

The Strategy Sponsor in respect of a Money Market Index may, in its sole discretion, at any time and without notice, terminate the calculation and publication of such Money Market Index.

9.5 Definitions in respect of the Money Market Indices

"€STR" means, with respect to any day, the euro short-term rate, expressed as a percentage, as administered by the European Central Bank (or any successor administrator) and published on the European Central Bank's website.

"MM Index Bloomberg Ticker" means, in respect of:

- (a) the EUR Money Market Index, *GSMMEUR <Index>*;
- (b) the EUR STR Money Market Index, *GSMMSTR <Index>*;
- (c) the USD Money Market Index, *GSMMUSD <Index>*,

or, in each case, any successor page thereto;

"MM Index Business Day" means each calendar day that is not a Saturday or Sunday;

"MM Index Inception Date" means, in respect of:

- (a) the EUR Money Market Index, 4 January 1999;
- (b) the EUR STR Money Market Index, 3 January 2005; and
- (c) the USD Money Market Index, 10 January 1994;

"Overnight Interest Rate Business Day" means, in respect of:

- (a) each of the EUR Money Market Index and the EUR STR Money Market Index, a day on which the Trans-European Automated Real-time Gross settlement Express Transfer (TARGET) system is open; and
- (b) the USD Money Market Index, any day which is a day on which commercial banks are open for general business (including dealings in foreign exchange and foreign currency deposits) New York.

"Overnight Interest Rate" means, in respect of:

- (a) the EUR Money Market Index, in the period:

- (i) up to (and including) 20 December 2021, EONIA; and
 - (ii) from (and including) 20 December 2021, the sum of (a) €STR; and (b) a spread of 8.50 basis points;
- (b) the EUR STR Money Market Index, €STR; and
- (c) the USD Money Market Index, USD-Federal Funds-H.15;

"USD-Federal Funds-H.15" means in respect of any day, the overnight Federal Funds Effective Rate US, referred as "USD-Federal-Funds-H15, expressed as a percentage, which is published on the Reuters Screen RSF.REC.USONFFE=NaE Page in respect of such day; and

10. Disruption Events, Adjustment Events and Consequences

For the purposes of this Section 10, any underlying index, financial instrument, asset, price, level, component or other underlying comprising, directly or indirectly, a Relevant Strategy, a "Strategy Component".

10.1 Disruption Events - In respect of each of the Index, the Underlying Index and the Govt Bond Strategy only:

Disruption Events applicable to a Strategy Component which is an index, as determined by the Strategy Sponsor (an "Index Strategy Component").

- (a) If an Index Strategy Component in respect of a Relevant Strategy is either:
- (i) not calculated and announced by the relevant component's sponsor or calculation agent but is calculated and announced by a successor sponsor or successor calculation agent acceptable to the Strategy Sponsor; or
 - (ii) replaced by a successor strategy using, in the determination of the Strategy Sponsor the same or substantially same formula for and method of calculating that Index Strategy Component,

then, in relation to (i) the Index Strategy Component shall continue to be the underlying component in respect of the Relevant Strategy, and, in relation to (ii) such successor strategy shall be deemed to become an underlying asset in respect of the Relevant Strategy and shall replace the affected Index Strategy Component and, in each case, the Strategy Sponsor may make such temporary or permanent adjustment to the Relevant Strategy as it deems appropriate in its sole discretion to account for such change.

- (b) In respect of an Index Strategy Component, if:
- (i) the Strategy Component's sponsor for such Index Strategy Component or the sponsor of any component of such Index Strategy Component announces that it will make a material change in the formula for calculating the relevant Index Strategy Component (or any component thereof) or in any other way materially modifies such Index Strategy Component (or any component thereof) (other than any modification prescribed in the formula for the purpose of maintaining such Index Strategy Component (or such component thereof) in the event of changes to its composition);
 - (ii) such Index Strategy Component (or any component thereof) is permanently cancelled by its sponsor without any successor thereto, or ceases to exist or is no longer tradeable, including as a result of any member of the Goldman Sachs Group discontinuing the relevant Index Strategy Component; or
 - (iii) the Strategy Sponsor (or the sponsor of any component thereof) fails to calculate and announce the level of such Index Strategy Component (or such component thereof);
 - (iv) in the reasonable judgement of the Strategy Sponsor, the level of such Index Strategy Component contains a manifest error;

- (v) any authorisation, registration, recognition, endorsement, equivalence decision, approval or inclusion in any official register in respect of such Index Strategy Component or the administrator or sponsor of such Index Strategy Component has not been, or will not be, obtained or has been, or will be, rejected, refused, suspended or withdrawn by the relevant competent authority or other relevant official body, in each case, with the effect that the Strategy Sponsor is not, or will not be permitted under any applicable law or regulation to use such Index Strategy Component, as determined by the Strategy Sponsor,

then, the Strategy Sponsor may take actions or take no action, including, but not limited to, the following:

- (A) temporarily or permanently remove the Index Strategy Component and/or select an alternative index to replace the Index Strategy Component (provided that such replacement is a similar alternative) and may such adjustments to the Relevant Strategy as may be necessary, in its commercially reasonable judgement to effect such change; or
- (B) calculate the level of such Index Strategy Component, in lieu of the published level, using the same formula for, and method of, calculating the level of such Index Strategy Component last in effect prior to the occurrence of any of the circumstances described above (utilising any adjustment to such formula or method that the Strategy Sponsor determines to be commercially reasonable).

Disruption Events in respect of all Strategy Components:

If, in respect of a Strategy Component, any one or more of the following occur:

- (a) the Strategy Sponsor becomes aware of the adoption of, or any change in, applicable law, it is illegal for the Strategy Sponsor or the Strategy Calculation Agent to undertake their respective roles in relation to the Relevant Strategy (or they would incur materially increased costs in doing the same) or any relevant entity would be prevented in entering into any transactions in respect of the relevant Strategy or a Strategy Component;
- (b) the Strategy Sponsor determines that a hedging party would (A) be unable to undertake certain actions in relation to all or a material portion of its hedge positions relating to a relevant Strategy Component or (B) there is a temporary or prolonged suspension of trading in such Strategy Component (or its relevant hedging instrument) during regular scheduled trading sessions on the relevant reference exchange and/or a relevant reference exchange announces that there is a disruption in trading in respect of such Strategy Component (or its relevant hedging instrument), and such suspension or disruption has a material impact on the ability of market participants to enter into hedging transactions in respect of such Strategy Component (in each case, a "**Material Trading Disruption**");
- (c) a trading disruption occurs in respect of the relevant trading venue or any other event or circumstance occurs which, in the reasonable judgement of the Strategy Sponsor, (A) affects the ability of market participants in general to enter into transactions in respect of such relevant Strategy Component in a notional size required in relation to any product or transaction linked to the relevant Strategy, (B) impairs the liquidity of any transactions in relation to such relevant Strategy Component and/or (C) affects the value of such relevant Strategy Component;
- (d) an event described in the Strategy description as an "**Additional Market Disruption Event**" occurs;
- (e) a force majeure event (including, without limitation, an act of God, an armed conflict or an act of terrorism) occurs that the Strategy Sponsor determines is likely to have a material effect on a Strategy Component or on its ability to perform its role in relation to the Relevant;
- (f) (i) the official, price, level, rate or other measure in relation to a Strategy Component is unavailable or incomplete on any relevant day, (ii) an unscheduled holiday occurs in respect of a trading venue or relevant Component, (iii) a trading venue or the sponsor or provider of a Strategy Component publicly announces that a day that was previously not a scheduled business

day in respect of such trading venue or Strategy Component shall be considered a scheduled business day in respect of such trading venue or Strategy Component, (iv) any relevant exchange is not open for trading during its regular trading session or closes early, or (v) the Strategy Sponsor determines that the value of the Relevant Strategy or any Strategy Component is manifestly incorrect;

- (g) where required, the Strategy Sponsor ceases to have any relevant data licence in respect of a Strategy Component;
- (h) any authorisation, registration, recognition, endorsement, equivalence decision, approval or inclusion in any official register in respect of such Strategy, Strategy Component or the Strategy Sponsor has not been, or will not be, obtained or has been, or will be, rejected, refused, suspended or withdrawn by the relevant competent authority or other relevant official body, in each case, with the effect that the issuer of, or one of the contracting parties in respect of, a linked product is not, or will not be permitted under any applicable law or regulation to use the Strategy or Strategy Component, as determined by the Strategy Sponsor;
- (i) a material change in national or international financial, political, legal or economic conditions that would likely prejudice the calculation and publications of the value of a Strategy, as determined by the Strategy Sponsor; or
- (j) the European Union membership or any member of the European Union is discontinued, suspended or terminated, or any member of the European Union disaffirms, disclaims, repudiates or rejects in whole or in part any obligation arising from its European Union membership under the relevant treaties or:
 - (I) the euro ceases to be the lawful currency of any member of the European Union; or
 - (II) any member of the European Union takes, or indicates its intention to take, any action in furtherance of, or indicates its consent to, approval of, or acquiescence in, any of the foregoing event;

then, the Strategy Sponsor (or the Strategy Calculation Agent on the instructions of the Strategy Sponsor) may take one or more of the following actions, or take no action, in order to preserve the intended commercial purpose of the Relevant Strategy:

- (i) make such determinations or adjustments to the Relevant Strategy as it deems appropriate to account for the occurrence of such event and, as applicable, to the extent necessary to calculate the value in respect of the Relevant Strategy in respect of such day (for which purpose it may use its own internal models and other market data sources as it reasonably determines is necessary and/or input data last published or made available;
- (ii) postpone any applicable rebalancing in whole or part of the Relevant Strategy to the next applicable business day on which no such event is continuing and make such adjustments as necessary to account for such postponement;
- (iii) determine that the value assigned to the weight or unit in respect of the Strategy Component in respect of the period from (and including) the date on which such event occurred to (but excluding) the date on which such event is no longer continuing shall remain at the value assigned immediately prior to the occurrence of such event;
- (iv) suspend the publication of the value of the Relevant Strategy until such event is not continuing;
- (v) publish an indicative value of the Relevant Strategy until such event is not continuing;
- (vi) temporarily or permanently remove or replace any affected Strategy Component with an alternative asset where it considers that a similar alternative is available;
- (vii) in the case of a Material Trading Disruption only in respect of a Strategy Component (the "**Affected Strategy Component**"), if the Strategy Sponsor or the Strategy Calculation Agent (as applicable) has determined that such Material Trading Disruption

has occurred or is ongoing for five or more consecutive strategy business days, it may remove the Affected Strategy Component and/or select an alternative asset to replace such Affected Strategy Component and may make such adjustments to the terms of the Relevant Strategy as it deems appropriate to account for such removal and in order to preserve insofar as possible the preserve the intended commercial purpose of the Relevant Strategy.

When determining a replacement of such Affected Strategy Component, the Strategy Sponsor may take into consideration the following criteria:

- (A) the investment objectives of such Affected Strategy Component;
- (B) the asset class exposure of such Affected Strategy Component;
- (C) the geographical focus of such Affected Strategy Component; and/or
- (D) the realised volatility of such Affected Strategy Component.

In respect of such replacement of an Affected Strategy Component:

- (1) there is no obligation for the Strategy Sponsor to select a replacement of such Affected Strategy Component that satisfied all of the above criteria;
- (2) the replacement component shall not be limited to equivalent assets and might be composed of securities, indices or cash;
- (3) the replacement component may not be limited to a single instrument and might be composed of several instruments; and
- (4) the calculation methodology of such replacement component may refer to levels reported by the Strategy Sponsor, service provider, exchanges and/or asset sponsors.

Any removal or replacement of an Affected Strategy Component will take into consideration a review by any relevant strategy committee; or

- (viii) if the Strategy Sponsor determines that (A) none of the actions listed above would be possible to take or, if possible to take, would achieve a commercially reasonable result and/or (B) it is no longer possible or practicable to calculate the Relevant Strategy, terminate the calculation and publication of the Relevant Strategy.

Disruption Events in respect of Input Data

Where "Input Data" means input data (including but not limited to any price or level) which is used to determine, or which constitutes, any weight(s), signal(s) or other values or parameters in relation to a Strategy Component and any other input data (other than a Strategy Component) or software package used in the calculation of a Strategy.

If the Strategy Sponsor discovers, or is notified by a party responsible for collecting, calculating, distributing or publishing Input Data (the "**Input Data Provider**", which may include a third party, the Strategy Sponsor itself or certain departments within the Goldman Sachs Group), that:

- (i) an Input Data Provider has ceased to publish such Input Data (or the Input Data Provider announces that it will cease to publish such Input Data) unless the Strategy Sponsor determines, in its sole and absolute discretion, that such Input Data has been replaced by any equivalent information or data;
- (ii) there is a material change in the formula for or method of calculating, or the content or frequency of publication of, such Input Data (as determined by the Strategy Sponsor); or
- (iii) the Input Data Provider (A) fails to calculate or publish such Input Data, (B) does not deliver such Input Data to the Strategy Sponsor or Strategy Calculation Agent (as the case maybe) or (C) delivers incomplete Input Data to the Strategy Sponsor or Strategy Calculation Agent (as

the case maybe), in each case, on or prior to the time at which the Strategy Sponsor needs to use such Input Data for calculating the value of the relevant Strategy,

(each an **"Input Data Disruption Event"**), then the Strategy Sponsor may, in its sole discretion determine to take actions or take no actions, including, but not limited to:

- (I) use the Input Data last published or made available by such Input Data Provider to calculate the value of the relevant Strategy; and/or
- (II) in all circumstances, (A) elect to temporarily or permanently replace or remove (or assign a zero weight to) the Strategy Component(s) affected by the unavailability or material change(s) at the earliest possible opportunity as it determines to be commercially reasonable in order for the value of such Strategy to continue to be calculated notwithstanding the relevant circumstances, (B) use information or data from an alternative data source (which may be internal data) which it determines to be comparable to such Input Data and to be appropriate in order to preserve the Strategy Purpose, (C) make such adjustment(s) to the Strategy or to the composition of such Strategy as it determines to be necessary, in its discretion and acting in a commercially reasonable manner, to reflect such unavailability or change(s) or (D) if the Strategy Sponsor determines that none of the above adjustment(s) would achieve a commercially reasonable result and/or that it is no longer possible or practicable to calculate the relevant Strategy, terminate the calculation and publication of such Strategy.

10.2 Disruption Events - In respect of each of the Commodity Index and the EUA USD Strategy only:

Strategy Adjustment Events in respect of a Relevant Strategy

If, in respect of a Relevant Strategy and any Strategy Calculation Day, a Strategy Adjustment Event has occurred, then the Strategy Sponsor may determine, in its discretion and acting in a commercially reasonable manner, to make such determinations or adjustments to the terms of such Relevant Strategy, including to the methodology and/or to replace the relevant data sources, as it deems appropriate to account for such Strategy Adjustment Event and, as applicable, to the extent necessary to calculate the Strategy Timely Level and the Strategy Tradable Level in respect of such Strategy Calculation Day (for which purpose it may use its own internal models and other market data sources as it reasonably determines is necessary) whilst preserving the intended commercial purpose of the Relevant Strategy.

If the Strategy Sponsor determines that no such determination(s) or adjustment(s) would be possible to take or, if possible to take, would achieve a commercially reasonable result and/or that it is no longer possible or practicable to calculate the level of the Relevant Strategy, the Strategy Sponsor may terminate the calculation and the publication of the Relevant Strategy without notice.

"Strategy Adjustment Event" means, in respect of a Strategy Calculation Day, the occurrence of any one of the following events, as determined by the Strategy Sponsor: (i) a force majeure event; (ii) a material change in national or international financial, political, legal or economic conditions that would likely prejudice the calculation and publication of the Strategy Tradable Level; or (iii) the European Union membership of any member of the European Union is discontinued, suspended or terminated, or any member of the European Union disaffirms, disclaims, repudiates or rejects in whole or in part any obligation arising from its European Union membership under the relevant treaties; or the Euro ceases to be the lawful currency of any member of the European Union; or any member of the European Union takes, or indicates its intention to take, any action in furtherance of, or indicates its consent to, approval of, or acquiescence in, any of the foregoing events.

Adjustment Events in respect of components of a Relevant Strategy

Each of the following events in (a) to (c) shall be an "Adjustment Event".

- (a) If any Strategy Component is: (i) not calculated and announced by the relevant sponsor or price source, but is calculated and announced by a successor sponsor or price source, which is determined by the Strategy Sponsor as being an acceptable successor, then such successor sponsor or price source will be deemed to be the relevant sponsor or price source; or (ii) replaced by a successor instrument, strategy, index or basket, as applicable, using the same or a substantially similar specification or formula and method of calculation as used in the

calculation of such Strategy Component, then such replacement instrument, strategy, index or basket, as the case may be, will be deemed to be that Strategy Component, and, in each case, the Strategy Sponsor may determine that it is necessary to make any such adjustment to the rules or to the composition of the Relevant Strategy.

- (b) If the Strategy Sponsor determines that, in respect of any Strategy Component and any Strategy Calculation Day:
- (i) the relevant sponsor has made a material change in the weighting or composition of, formula for, or method of calculating such Strategy Component or in any other way that has materially modified such Strategy Component (other than a modification prescribed in such formula or method relating to the weighting or composition of such Strategy Component or other routine events or modifications), effective on or after such Strategy Calculation Day;
 - (ii) the relevant sponsor fails or is not scheduled to calculate and announce the level of such Strategy Component on such Strategy Calculation Day, or, on or prior to such Strategy Calculation Day, such Strategy Component has ceased to be calculated by the relevant sponsor, and has not been replaced by a successor index, strategy or basket;
 - (iii) a Market Disruption Event (as defined in the relevant Section in respect of such Relevant Strategy) occurs in respect of any Currency Conversion Component on such Strategy Calculation Day; or
 - (iv) the level of such Strategy Component on such Strategy Calculation Day contains a manifest error,

then the Strategy Sponsor shall instead calculate the level of such Strategy Component, in the absence of a published level for such Strategy Component using the same formula for, and method of, calculating the level of such Strategy Component last in effect prior to the occurrence of any of the circumstances described above or in the event that the Strategy Sponsor determines that the occurrence of any of the foregoing circumstances could adversely affect the Relevant Strategy, it may elect to replace or remove (or assign a zero weight to) the relevant Strategy Component at the earliest possible opportunity as it determines and make such other changes to the Relevant Strategy as may be necessary to effect such change;

- (c) If the Strategy Sponsor determines that, in respect of any Strategy Component and any Strategy Calculation Day:
- (i) any Strategy Component has ceased to be published by the relevant price source, and has not been replaced by any successor;
 - (ii) that there has been a material change (or it has been announced that a material change will be made) to (I) the content, composition or constitution of any Strategy Component, or (II) the formula for or method of calculating any Strategy Component valuation data, or (III) the delivery, expiry or settlement terms of such Strategy Component; or
 - (iii) such Strategy Component has ceased to be a liquid, actively traded Strategy Component that is generally available for trading, or that such affected Strategy Component has been the subject of a Market Disruption Event (as defined in the relevant Section in respect of such Relevant Strategy) for at least five consecutive Strategy Calculation Days, or (II) anticipates on the basis of publicly available information that such Strategy Component or any Strategy Component valuation data, notwithstanding that it is available for trading, will cease to be liquid and actively traded or will be terminated or delisted by the relevant price source,

then the Strategy Sponsor may:

- (A) make such determinations or adjustments to the terms of the Relevant Strategy, including to the methodology and relevant data sources, as it deems appropriate to account for such Adjustment Event to the extent necessary for the Strategy Timely Level and the Strategy Tradable Level to continue to be calculated; or

- (B) elect to replace or remove (or, where applicable, assign a zero weight to) such Strategy Component to which such Strategy Component is linked from the Relevant Strategy at the earliest possible opportunity in order for the Strategy Timely Level and the Strategy Tradable Level to continue to be calculated, and in such case, the Strategy Sponsor may make such adjustment(s) to the rules of the Relevant Strategy or to the composition of the Relevant Strategy to be necessary to reflect such change; and/or
- (C) if the level of a the relevant Strategy Component as published by the relevant sponsor, the Strategy Component valuation data, or the Spot Exchange Rate, each as published by the relevant price source, on any Strategy Calculation Day is subsequently corrected and the Strategy Sponsor determines that the correction is published or made available by the sponsor or price Source on a timely basis on the immediately following Strategy Calculation Day, then such corrected level, price or rate (as the case may be) shall be deemed to be the relevant level, price or rate, and the Strategy Sponsor shall use the corrected level, price or rate as the case may be, in its calculation of the Strategy Timely Level or Strategy Tradable Level, as applicable.

10.3 **Disruption Events - In respect of the EUA EUR Strategy only:**

(a) **Changes to Components of the Relevant Strategy**

If, in respect of the Component of the Relevant Strategy:

- (i) the Strategy Sponsor determines that the Component has ceased to be published or listed for trading by the relevant trading facility, and has not been replaced by a successor commodity futures contract or contract expiration; or
- (ii) the Strategy Sponsor determines that there has been a material change in (A) the content, composition or constitution of the relevant contract or the commodity referenced by such contract, or (B) the formula for or method of calculating such Component or the relevant contract, or (C) the delivery, expiry or settlement terms of such Component or the relevant contract; or
- (iii) the Strategy Sponsor, in its discretion and acting in a commercially reasonable manner, (A) determines that such Component has ceased to be a liquid, actively traded contract expiration that is generally available for trading, or (B) anticipates on the basis of publicly available information that such Component, on or before the next roll period for the relevant contract, notwithstanding that it is available for trading, will cease to be a liquid and actively traded contract expiration or will be terminated or delisted by the relevant Trading Facility,

then the Strategy Sponsor may, in its discretion and acting in a commercially reasonable manner, make such adjustment to the formula or method for calculating the Relevant Strategy (including adjustment to the weighting or composition), at the earliest possible opportunity in order for the Relevant Strategy to continue to be calculated notwithstanding any of the foregoing circumstances or in the event that the Strategy Sponsor determines, in its reasonable judgement, that the occurrence of any of the foregoing circumstances would result in a fundamental change to the Relevant Strategy, it may (in good faith) elect to discontinue the publication of the Relevant Strategy at the earliest possible opportunity as it determines to be commercially reasonable.

For the purposes of the above, "**Component**" means: (A) any futures contract expiration in respect of the relevant commodity selected for inclusion in the Relevant Strategy; or (B) if applicable, any futures contract expiration in respect of the relevant commodity in respect of which the daily contract reference price is scheduled to be observed in accordance with the procedure (if any) for determining the composition of the Relevant Strategy.

(b) **Changes to Designated Contracts included in the Underlying S&P Index**

- (i) In the event that any Designated Contract (as defined in the rules of the Underlying S&P Index) is added to the Underlying S&P Index, to the extent that such Designated Contract is relevant for the purposes of the Relevant Strategy, it shall be added to the Relevant Strategy and the Roll Contract Expiration (as defined in the rules of the Underlying S&P Index) in respect of such Designated Contract shall be the same as that determined by the S&P Index Sponsor in respect of such Designated Contract in the Underlying S&P Index.
 - (ii) Subject to paragraph (a) (*Changes to Components of the Relevant Strategy*) above, in the event that any Designated Contract is removed from the Underlying S&P Index, such Designated Contract shall, at the earliest opportunity that the Strategy Sponsor determines to be commercially reasonable, also be removed from the Relevant Strategy.
- (c) **Adjustment Events in respect of the Underlying S&P Index**

If, in respect of the Underlying S&P Index, and a day on which the Relevant Strategy is to be calculated, the Strategy Sponsor determines, in a commercially reasonable manner, that:

- (i) the S&P Index Sponsor makes a material change in the weighting or composition of, formula for, or method of calculating the Underlying S&P Index or in any other way materially modifies the Underlying S&P Index; or
- (ii) the S&P Index Sponsor fails or is not scheduled to calculate and announce the closing level of the Underlying S&P Index, or, on or prior to such day, the Underlying S&P Index has ceased to be calculated by the S&P Index Sponsor, and has not been replaced by a successor index,

then the Strategy Sponsor shall calculate the value of the Relevant Strategy in accordance with the formula for and method of calculating such Relevant Strategy last in effect prior to the occurrence of any of the circumstances described above (utilising any adjustment to such formula or method for calculating the Relevant Strategy, including adjustment to the weighting or composition of the Relevant Strategy, that the Strategy Sponsor determines to be commercially reasonable) or in the event that the Strategy Sponsor determines, in a commercially reasonable manner, that the occurrence of any of the foregoing circumstances would represent a fundamental change to the Relevant Strategy, it may (in good faith) elect to discontinue the publication of the Relevant Strategy at the earliest possible opportunity as it determines to be commercially reasonable.

10.4 In respect of each of the Commodity Index, the EUA EUR Strategy and the EUA USD Strategy only:

If, in respect of any third-party information or data relied on or which is used to determine, or which constitutes, any weight(s), signal(s) or other input used in the calculation of the Relevant Strategy (the "**Third-Party Data**"):

- (a) the Strategy Sponsor discovers, or is notified by the third party responsible for collecting, calculating, distributing or publishing such Third-Party Data (the "**Third-Party Data Source**") of, an error or discrepancy in such Third-Party Data, the Strategy Sponsor may disregard such error or discrepancy or correct or revise the value of the Relevant Strategy following the release of the corrected Third-Party Data by the Third-Party Data Source; or
- (b) in respect of the Third-Party Data: (i) the Third-Party Data Source ceases to publish such Third-Party Data (or announces that it will cease to publish such Third-Party Data), and such Third-Party Data is not replaced by any equivalent information or data; (ii) there is a material change in the formula for or method of calculating, or the content or frequency of publication of, such Third-Party Data; or (iii) the Third-Party Data Source fails to calculate or publish such Third-Party Data for an extended period of time,

then the Strategy Sponsor may: (I) elect to, in respect of each of the Commodity Index and the EUA USD Strategy, replace or remove (or assign a zero weight to) the Strategy Component, or, in respect of the EUA EUR Strategy, disapply some or all modifications made by the EUA EUR Strategy to the Underlying S&P Index for any contracts, in each case affected by the unavailability or material change(s)

at the earliest possible opportunity as it determines in order for the value of the Relevant Strategy to continue to be calculated notwithstanding the relevant circumstances; (II) use third-party information or data from an alternative data source which it determines to be comparable to such Third-Party Data and to be appropriate in order to preserve the original economic objective of the Strategy or the Underlying Strategy, or (III) make such adjustment(s) to the rules of the Relevant Strategy or to the composition of the Relevant Strategy as it determines to be necessary to reflect such unavailability or change; or (IV) if the Strategy Sponsor determines that none of the above adjustments would achieve a commercially reasonable result and/or that it is no longer possible or practicable to calculate the Relevant Strategy, terminate the calculation and publication of the Relevant Strategy with notice.

11. Corrections

In respect of each of the Commodity Index, the EUA EUR Strategy and the EUA USD Strategy only:

In the event that ambiguities arise in the calculation of the value of the Relevant Strategy, the Strategy Sponsor will resolve such ambiguities and, if necessary for resolution, make changes to the composition of such Relevant Strategy or the methodology of calculating such Relevant Strategy. In the event that the Index Sponsor determines that any calculation or determination in respect of any Relevant Strategy is incorrect, the Strategy Sponsor may, if practicable, correct calculations or determinations and publish or cause to be published such correct calculations or determinations.

In the event that the value of any component which is utilised for any calculation or determination in respect of a Relevant Strategy is subsequently corrected, the Strategy Calculation Agent may, if practicable, use such corrected value for the purpose of such calculation or determination, and, to the extent necessary and practicable, may adjust any prior calculation or determination or terms of such Relevant Strategy to account for such correction.

In respect of each of the Index, the Underlying Index and the Govt Bond Strategy only:

Information on the policies and procedures of the Strategy Sponsor in relation to the handling of errors, incidents and restatements can be found at the following location: <https://www.goldmansachs.com/disclosures/euro-benchmark-reg-iosco-principles-for-financial-benchmarks-f/summary-of-gs-policy-on-global-benchmark-incidents.pdf> (or any successor page thereto).

12. Change in Methodology

If any market, legal, regulatory, judicial, financial, fiscal or other circumstances arise that would, in the view of the Strategy Sponsor, necessitate or make desirable a modification or change of the methodology in respect of the Relevant Strategy in order to preserve the intended commercial purpose of the Relevant Strategy, the Strategy Sponsor reserves the right to make such changes to the relevant methodology to account for the occurrence of such circumstance(s).

Accordingly, the Strategy Sponsor shall be entitled to make modifications and/or changes to the methodology in respect of the Relevant Strategy or any data obtained from a third party data source which is used to calculate the Relevant Strategy without notice as it deems appropriate, necessary or desirable, including, without limitation:

- (a) to correct any manifest or proven error contained in the relevant strategy methodology;
- (b) to cure, correct or supplement any ambiguity or contradictory or defective provision in the relevant strategy methodology;
- (c) to change the frequency of calculation of the Relevant Strategy and make corresponding changes to the relevant strategy methodology to account for such change of frequency;
- (d) to permit the Strategy Calculation Agent to continue calculating and determining the value of the Relevant Strategy and determining the weights of any component thereof respectively if market, legal, regulatory, judicial, financial, fiscal or other circumstances arise which were not reasonably foreseeable by the Strategy Sponsor and which have not been deliberately caused by the Strategy Sponsor and such circumstances would prevent the Strategy Calculation Agent

from calculating and determining the value of the Relevant Strategy and determining the weights of any component thereof respectively, and would necessitate a modification or change of the methodology in respect of the Relevant Strategy in order for the value of the Relevant Strategy to continue to be calculated and determined notwithstanding the relevant circumstances;

- (e) to preserve the intended commercial purpose of the relevant Strategy where the change is of a formal, minor or technical nature; and/or
- (f) in respect of the Index, the Underlying and the Govt Bond Strategy only:
 - (i) to permit the Strategy Sponsor to continue calculating and determining the value of a Strategy and determining the weight(s), signal(s) or other values or parameters in respect of any Strategy Component in anticipation of, or as a result of (A) the cessation of any benchmark (an "**Affected Benchmark**"), (B) any change or adjustment announced or implemented by clearing houses or exchanges with respect to an Affected Benchmark or (C) when such Affected Benchmark, as determined by the Strategy Sponsor, becomes no longer reliable and representative of market or economic reality that such Affected Benchmark is intended to measure;
 - (ii) to increase the transparency of the Strategy description; and/or
 - (iii) to preserve the Strategy Sponsor's or its affiliates' ability to hedge the relevant Strategy, Components and/or Input Data and maintain such Strategy as tradable and replicable.

Any such changes shall result in a methodology consistent with the intended commercial purpose of the Relevant Strategy. The Strategy Sponsor may, but is not required to, establish a committee comprising of employees of the Strategy Sponsor and an equal number of external members with the relevant academic or professional background to consider any proposed changes outlined above. The rules, responsibilities and powers of any such committee shall be pre-defined by the Strategy Sponsor.

In respect of each of the Index, the Underlying Index and the Govt Bond Strategy only:

In the event that an ambiguity or contradictory or defective provision comes to the attention of the Strategy Sponsor in the calculation of the value of a Strategy, the Strategy Sponsor may, in accordance with its own policies and procedures applicable at the time, resolve such ambiguity or contradictory or defective provision and, if necessary for resolution, make such changes to the composition of such Strategy or the methodology of calculating such Strategy.

In addition, if the aggregate notional amount of products or transactions linked to the Relevant Strategy (or any other similar strategy sponsored by the Strategy Sponsor) exceeds a certain threshold (as determined by the Strategy Sponsor by reference to the hedging capabilities of the Strategy Sponsor or any affiliate in respect of its exposure to the Relevant Strategy) then the Strategy Sponsor may:

- (a) change the methodology of the Relevant Strategy to allow for rebalancing to occur more frequently;
- (b) replace the Relevant Strategy with a replacement strategy identical in all material respects other than the days on which rebalancing occurs; and/or
- (c) make such other adjustments to the Relevant Strategy in order to allow the Strategy Sponsor (or its affiliate) to effectively hedge its exposure to the Relevant Strategy or reduce expected liquidity impact of such hedging transactions,

in each case, whilst ensuring the relevant replacement or proposed changes shall result in Relevant Strategy being consistent with its intended commercial purpose.

DESCRIPTION OF THE GOLDMAN SACHS GLOBAL DIVERSIFIED MULTI-ASSET 5% INDEX

The following description (this "**Description**") of each of:

- (i) the Goldman Sachs Global Diversified Multi-Asset 5% Index (for purposes of this section only, the "**Index**");
- (ii) the Goldman Sachs Diversified Multi-Asset Basket EUR ER Index (for purposes of this section only, the "**Underlying Index**");
- (iii) the Goldman Sachs US and EUR Government Bond Basket USD ER Strategy (the "**Govt Bond Strategy**");
- (iv) the US Government Bond Futures Rolling Strategy Index (the "**UST Futures Index**");
- (v) the European Government Bond Futures Rolling Strategy Index (the "**Euro Bond Futures Strategy Index**" and, together with the UST Futures Index, the "**Bond Indices**");
- (vi) the Goldman Sachs Commodity Focus Basket USD ER Index (for purposes of this section only, the "**Commodity Index**");
- (vii) the Goldman Sachs EUA USD Strategy (the "**EUA USD Strategy**");
- (viii) the Goldman Sachs Enhanced Strategy MOZE on S&P GSCI Carbon Emission Allowances EUA (EUR) Index (the "**EUA EUR Strategy**");
- (ix) the EUR Goldman Sachs Overnight Money Market Index (the "**EUR Money Market Index**");
- (x) the EUR STR Goldman Sachs Overnight Money Market Index (the "**EUR STR Money Market Index**"); and
- (xi) the USD Goldman Sachs Overnight Money Market Index (the "**USD Money Market Index**" and, together with the EUR Money Market Index and the EUR STR Money Market Index, each a "**Money Market Index**" and together the "**Money Market Indices**"),

(the Index, the Underlying Index, the Govt Bond Strategy, the Bond Indices, the Commodity Index, the EUA USD Strategy, the EUA EUR Strategy and each Money Market Index, a "**Relevant Strategy**"), is subject to, and qualified in its entirety by, the methodology in respect of such Relevant Strategy as published or made available by Goldman Sachs International (or any successor thereto) (the "**Strategy Sponsor**" in respect of such Relevant Strategy) from time to time.

Any such methodology may be amended or modified from time to time at the discretion of the Strategy Sponsor in accordance with the terms set out therein. Copies of such methodologies shall be made available by the Strategy Sponsor from www.goldmansachsindices.com (or any successor page thereto).

A prospective purchaser of Index Linked Securities should also carefully review the risk factors in relation to the Index and the other Relevant Strategies set out in the section of this Base Prospectus entitled "Risk Factors" before purchasing any Index Linked Securities.

Each Relevant Strategy is a synthetic rules-based proprietary strategy created by the Strategy Sponsor. All determinations made pursuant to each Relevant Strategy are reserved for the Strategy Sponsor only, save that, in respect of:

- (1) each Relevant Strategy other than the Bond Indices, Goldman Sachs International; and
- (2) each Bond Index, Standard & Poor's,

(acting as calculation agent, the "**Strategy Calculation Agent**" in respect of the relevant Relevant Strategy) may determine the value of the relevant Relevant Strategy from time to time in accordance with the relevant methodology.

The Strategy Sponsor owns the copyright and all other rights to each Relevant Strategy.

The structure of the Index is set out in the diagram below:

13. Description of the Index

Capitalised terms defined in this Section 13 (*Description of the Index*) (including in Section 13.8 (*Definitions in respect of the Index*)) shall have the meaning given to them solely for the purposes of this Section 13 (*Description of the Index*) unless otherwise specified or cross-referred to.

13.1 Overview of the Index

The Goldman Sachs Global Diversified Multi-Asset 5% Index (*Bloomberg Code: GSISCC5E <Index>*) (referred to in this section as the "Index") seeks to provide a volatility-targeted exposure to the performance of the Underlying Index.

The volatility adjustment feature systematically adjusts the exposure of the Index to the performance of the Underlying Index by adjusting the weight of its exposure to the Underlying Index if a specified measure of the realised volatility of the Underlying Index would otherwise deviate from a target of pre-defined volatility target of 5.00 per cent. (the "**Volatility Target**") on any Strategy Rebalancing Day (the "**Volatility Adjustment Feature**"). The notional weight assigned to the Underlying Index is rebalanced on each Scheduled Trading Day (as defined in Section 14 (*Description of the Underlying Index*) below) for the Underlying Index and is subject to a cap of 100 per cent.

The Index is an "excess return" strategy and, therefore, the value of the Index shall not include the accrual of any amount or interest in relation to any money market rate in respect of any notional cash amount.

The Index is denominated in euro ("**EUR**").

The level of the Index is reduced by the deduction of synthetic costs of establishing and unwinding transactions in respect of the Underlying Index resulting from the application of the Volatility Adjustment Feature. The value of the Index is also reduced by the deduction of an annual fixed rate of one per cent. (the "**Strategy Deduction Rate**") which has the effect of reducing the performance of the Index.

13.2 Calculation of the Value of the Index

The value of the Index (the "**Strategy Value**") on the Strategy Inception Date was equal to 100.

The Strategy Value shall be calculated by the Strategy Calculation Agent on each Strategy Business Day following the Strategy Inception Date as an amount in the Strategy Currency (subject to a floor of zero) equal to: (a) the Strategy Value immediately prior to subtracting the Asset Rebalancing Cost in respect of such Strategy Business Day minus (b) the Asset Rebalancing Cost in respect of such Strategy Business Day (" RCV_t^V ").

Expressed as a formula, the value of the Index on each Strategy Business Day following the Strategy Inception Date is as follows:

$$V_t^{Pre} - RC_t^V$$

The Strategy Value immediately before subtracting the Asset Rebalancing Cost in respect of each Strategy Business Day following the Strategy Inception Date (" V_t^{Pre} ") shall be calculated by the Strategy Calculation Agent as an amount in the Strategy Currency equal to:

- (a) the value of the Index in respect of the Strategy Rebalancing Day immediately preceding such Strategy Business Day (" V_{Vrt} "); multiplied by
- (b) an amount equal to:
 - (i)
 - (1) the Asset Weight on the Strategy Rebalancing Day immediately preceding such Strategy Business Day (" W_{Vrt}^V "); multiplied by
 - (2) the quotient of (i) the Asset Value of the Underlying Index in respect of such Strategy Business Day (" A_t "), as numerator; and (ii) the Asset Value of the Underlying Index on the Strategy Rebalancing Day immediately preceding such Strategy Business Day (" A_{Vrt} "), as denominator,
 - minus*
 - (ii)
 - (1) the actual number of days in the period commencing on (and including) the Strategy Rebalancing Day immediately preceding such Strategy Business Day and ending on (but excluding) such Strategy Business Day, divided by 360 (" $DCF_{Vrt,t}$ "); multiplied by
 - (2) the Strategy Deduction Rate.

provided that if the value of the Index in respect of such Strategy Business Day is (or is deemed to be) zero, the value of the Index in respect of each Strategy Business Day immediately following such Strategy Business Day shall also be zero.

Expressed as a formula, the Strategy Value immediately before subtracting the Asset Rebalancing Cost in respect of each Strategy Business Day following the Strategy Inception Date is as follows:

$$V_{Vrt} \times \left[W_{Vrt}^V \times \frac{A_t}{A_{Vrt}} - DCF_{Vrt,t} \times 1.00\% \right]$$

Subject to the occurrence of a disruption event (in respect of which see Section 22 (*Disruption Events, Adjustment Events and consequences*) below), each Strategy Value in respect of a Strategy Business Day will be published on the Strategy Publication Data Source and the Strategy Bloomberg Ticker rounded to two decimal places (with 0.005 being rounded upwards).

13.3 Calculation of the Asset Value in respect of the Underlying Index

In respect of any calendar day, the Asset Value in respect of the Underlying Index shall be as calculated in accordance with Section 14.3 (*Calculation of the Underlying Index Value*) set out in Section 14 (*Description of the Underlying Index*) below.

In respect of any calendar day, if the Asset Value of the Underlying Index is not available, then such Asset Value shall be the latest available Asset Value immediately preceding such calendar day.

13.4 Calculation of the Asset Weight

The Asset Weight in respect of a Strategy Rebalancing Day is an amount equal to the lower of:

- (a) 100 per cent.; and
- (b) the quotient of (A) 5.00 per cent., as numerator; and (B) the Reference Volatility in respect of such Strategy Rebalancing Day, as denominator.

Any such Asset Weight shall be rounded to three decimal places with 0.0005 being rounded upwards.

13.5 Calculation of the Reference Volatility and the Exponential Asset Realized Volatility

In respect of a Strategy Business Day, the Reference Volatility shall be equal to the Exponential Asset Realized Volatility in respect of the Asset Sampling Business Day falling on or immediately before such Strategy Rebalancing Day.

The Exponential Asset Realized Volatility in respect of the Strategy Inception Date was equal to 5.00 per cent.

The Exponential Asset Realized Volatility shall be calculated by the Strategy Calculation Agent on each Asset Sampling Business Day falling after the Strategy Inception Date as an amount equal to the greater of the Short Term Exponential Asset Realized Volatility and the Long Term Exponential Asset Realized Volatility, in each case, in respect of such Asset Sampling Business Day.

The Short Term Exponential Asset Realized Volatility shall be calculated by the Strategy Calculation Agent on each Asset Sampling Business Day falling after the Strategy Inception Date in accordance with the following formula:

$$\sqrt{0.94 \times AssetVol_{ST,t-1}^2 + (1 - 0.94) \times \frac{252}{5} \times \left[\ln \left(\frac{A_{t-d}}{A_{t-d-k}} \right) \right]^2}$$

The Long Term Basket Volatility shall be calculated by the Strategy Calculation Agent on each Asset Sampling Business Day falling after the Strategy Inception Date in accordance with the following formula:

$$\sqrt{0.97 \times AssetVol_{LT,t-1}^2 + (1 - 0.97) \times \frac{252}{5} \times \left[\ln \left(\frac{A_{t-d}}{A_{t-d-k}} \right) \right]^2}$$

Where:

$AssetVol_{ST,t-1}^2$ means, in respect of an Asset Sampling Business Day, the square of the Short Term Exponential Asset Realized Volatility in respect of the Asset Sampling Business Day immediately preceding such Strategy Business Day;

A_{t-d} means, in respect of an Asset Sampling Business Day, the Asset Value in respect of the Underlying Index in respect of the Asset Sampling Business Day that is two Asset Sampling Business Days immediately preceding such Asset Sampling Day;

A_{t-d-k} means, in respect of an Asset Sampling Business Day, the Asset Value in respect of the Underlying Index in respect of the Asset Sampling Business Day that is seven Asset Sampling Business Days immediately preceding such Asset Sampling Day;

$\ln$ means the natural logarithm function; and

$AssetVol_{LT,t-1}^2$ means, in respect of an Asset Sampling Business Day, the square of the Long Term Exponential Asset Realized Volatility in respect of the Asset Sampling Business Day immediately preceding such Strategy Business Day.

13.6 Calculation of the Asset Rebalancing Cost in respect of the Index

The Asset Rebalancing Cost in respect of (a) the Strategy Inception Date and (b) each Strategy Business Day following the Strategy Inception Date that is not a Strategy Rebalancing Day, is equal to zero.

The Asset Rebalancing Cost in respect of each Strategy Rebalancing Day following the Strategy Inception Date shall be calculated by the Strategy Calculation Agent in accordance with the following formula:

$$0.0005 \times \left| w_t^v - \overline{w}_t^v \right| \times V_t^{Pre}$$

Where:

w_t^v means the Asset Weight in respect of such Strategy Rebalancing Day;

$\overline{w}_t^v$ means the Asset Actual Weight in respect of such Strategy Rebalancing Day immediately prior to the rebalancing process; and

V_t^{Pre} means the Strategy Value immediately before subtracting the Asset Rebalancing Cost in respect of such Strategy Business Day.

13.7 Calculation of the Asset Actual Weight in respect of the Index

The Asset Actual Weight in respect of each Strategy Business Day shall be calculated by the Strategy Calculation Agent as an amount equal to:

- (a) the Asset Weight in respect of the Strategy Rebalancing Day immediately preceding such Strategy Business Day; multiplied by
- (b) the quotient of (A) the Asset Value in respect of such Strategy Business Day, as numerator; and (B) the Asset Value in respect of the Strategy Rebalancing Day immediately preceding such Strategy Business Day, as denominator; multiplied by
- (c) the quotient of (A) the Strategy Value in respect of the Strategy Rebalancing Day immediately preceding such Strategy Business Day, as numerator; and (B) the Strategy Value in respect of such Strategy Business Day immediately before subtracting the Asset Rebalancing Cost in respect of such Strategy Business Day.

13.8 Definitions in respect of the Index

"Asset Sampling Business Day" means the Strategy Inception Date and thereafter each calendar day which is a "Strategy Business Day" (as defined in Section 14 (*Description of the Underlying Index*) below);

"Asset Trading Day" means each "Strategy Trading Day" (as defined in Section 14 (*Description of the Underlying Index*) below);

"Strategy Bloomberg Ticker" means *GSISCC5E <Index>*;

"Strategy Business Day" means the Strategy Inception Date and thereafter each Asset Sampling Business Day; "Strategy Currency" means EUR;

"Strategy Inception Date" means 20 January 2022;

"Strategy Publication Data Source" means <https://goldmansachsindices.com> (or any successor page thereto);

"Strategy Rebalancing Day" means the Strategy Inception Date and thereafter each Asset Trading Day; and

"Strategy Trading Day" means the Strategy Inception Date and thereafter each Asset Trading Day.

13.9 Disruption Events, Adjustment Events, Change in Methodology and Corrections

In respect of the Index, please see Section 22.1 (*Disruption Events - In respect of each of the Index, the Underlying Index and the Govt Bond Strategy only*), Section 23 (*Corrections*) and Section 24 (*Change in Methodology*).

14. Description of the Underlying Index

Capitalised terms defined in this Section 14 (*Description of the Underlying Index*) (including in Section 14.11 (*Definitions in respect of the Underlying Index*)) shall have the meaning given to them solely for the purposes of this Section 14 (*Description of the Underlying Index*) unless otherwise specified or cross-referred to.

14.1 Overview of the Underlying Index

The Goldman Sachs Diversified Multi-Asset Basket EUR ER Index (*Bloomberg Code: GSISDMAB <Index>*) (referred to herein as the Underlying Index) seeks to provide synthetic exposure to the performance of an unequally weighted basket (the "**Basket**") of four underlying indices (the "**Basket Indices**" and each a "**Basket Index**") and which periodically (on a monthly basis) rebalances to assign a notional weight to each Basket Index by reference to certain fixed weights (the Asset Weights, as set out in Section 14.2 (*Overview of Underlying Index Basket Indices*) below).

The Basket Indices in respect of the Underlying Index are set out in Section 14.2 (*Overview of Underlying Index Basket Indices*) below.

The Underlying Index is an "excess return" strategy and, therefore, the value of the Underlying Index shall not include the accrual of any amount or interest in relation to any money market rate in respect of any notional cash amount.

The Underlying Index is denominated in euro ("**EUR**") and has, in respect of each Basket Index which is not denominated in EUR, an internal simulated currency hedge feature that seeks to offset a substantial portion of the positive or negative effects of currency exchange rate fluctuations on the level of such Basket Index.

The level of the Underlying Index is reduced by the deduction the basket rebalancing costs and the asset servicing costs. The basket rebalancing costs reflect the synthetic costs of entering into and/or unwinding any transactions relating to the Basket Indices following changes to their Asset Quantities. The asset servicing costs reflect the synthetic costs of maintaining positions in, and replicating the performance of, the Basket Indices. Overall, the deduction of such synthetic costs may have the effect of reducing the performance of the Underlying Strategy.

14.2 Overview of the Underlying Index Basket Indices

i	Basket Index	Bloomberg Page	Currency	Return Type	Asset Weight
1	MSCI World Climate Change Select 200 Net EUR Index*	<i>MXWOCCNE <Index></i>	EUR	Total Return	40%
2	Goldman Sachs US and EUR Government Bond Basket USD ER Strategy**	<i>GSISFIBU <Index></i>	USD	Excess Return	20%
3	GS Commodity Focus Basket USD ER Index***	<i>GSISCFBU <Index></i>	USD	Excess Return	20%
4	Euronext Reitsmarket GRESB Global Sustainable Index****	<i>ERGSN <Index></i>	EUR	Total Return	20%

* Further details are available from <https://www.msci.com>

** As described in Section 15 (*Description of the Govt Bond Strategy*) below.

*** As described in Section 18 (*Description of the Commodity Index*) below.

**** Further details are available from <https://live.euronext.com>

14.3 Calculation of the Underlying Index Value

The value of the Underlying Index (the "**Underlying Index Value**") on the Strategy Inception Date was equal to 100.

The Underlying Index Value shall be calculated by the Strategy Calculation Agent on each Strategy Business Day following the Strategy Inception Date as an amount in the Strategy Currency. The Underlying Index Value is calculated in t (subject to a floor of zero) equal to:

- (a) the Underlying Index Value in respect of the Strategy Rebalancing Day immediately preceding such Strategy Business Day (" V_{VRt} "); multiplied by
- (b) the quotient of:
 - (A) the Basket Value in respect of such Strategy Business Day (" B_t "), as numerator; and
 - (B) the Basket Value in respect of the Strategy Rebalancing Day immediately preceding such Strategy Business Day (or, if none, 100) (" V_{VRt} "), as denominator,

provided that if the Underlying Index Value in respect of such Strategy Business Day is (or is deemed to be) zero, the Underlying Index Value in respect of each Strategy Business Day immediately following such Strategy Business Day shall also be zero.

Expressed as a formula, the Underlying Index Value on each Strategy Business Day following the Strategy Inception Date is as follows:

$$V_{VRt} \times \left(\frac{B_t}{V_{VRt}} \right)$$

Subject to the occurrence of a disruption event (in respect of which see Section 22 (*Disruption Events, Adjustment Events and Consequences*) below), each such value in respect of each Strategy Business Day will be published on the Strategy Publication Data Source and the Strategy Bloomberg Ticker rounded to two decimal places (with 0.005 being rounded upwards).

14.4 Calculation of the Basket Value

The Basket Value on the Strategy Inception Date was equal to 100.

The Basket Value shall be calculated by the Strategy Calculation Agent on each Strategy Business Day following the Strategy Inception Date as an amount (subject to a floor of zero) equal to:

- (a) the summation, in respect of each Basket Index, of:
 - (A) the Asset Quantity; multiplied by
 - (B) the Asset Value,in each case, in respect of such Basket Index and such Strategy Business Day,
plus

- (b) the Cash Asset Quantity in respect of such Strategy Business Day,

provided that if the Basket Value in respect of such Strategy Business Day is (or is deemed to be) zero, the Basket Value in respect of each Strategy Business Day immediately following such Strategy Business Day shall be zero.

14.5 Calculation of the Asset Quantity in respect of each Basket Index

The Asset Quantity in respect of a Basket Index and each Strategy Business Day falling after the Strategy Inception Date that is not a Basket Rebalancing Day shall be equal to the Asset Quantity in respect of

such Basket Index in respect of the Basket Rebalancing Day immediately preceding such Strategy Business Day.

The Asset Quantity in respect of a Basket Index and each Basket Rebalancing Day shall be calculated by the Strategy Calculation Agent as the quotient of:

- (a) the Asset Weight in respect of such Basket Index multiplied by the Basket Value, in each case in respect of the Basket Observation Day relating to such Basket Rebalancing Day (or, in respect of the Basket Rebalancing Day falling on the Strategy Inception Date, 100), as numerator; and
- (b) the Asset Value in respect of the Basket Observation Day relating to such Basket Rebalancing Day, as denominator.

Unless the Strategy Calculation Agent determines otherwise, in the event that the value of any component which is utilised for the calculation of an Asset Quantity is subsequently corrected, the Strategy Calculation Agent will not correct the Asset Quantity and will instead use the Asset Quantity as calculated before such correction.

14.6 Calculation of the Asset Value in respect of each Basket Index

The Asset Value of each Basket Index on the Asset Inception Date was equal to 100.

The calculation of the Asset Value of each Basket Index depends on the Currency and Return Type in respect of such Basket Index, as set out in Section 14.2 (*Overview of Underlying Index Basket Indices*) above.

The Asset Value of each Basket Index in respect of which the Currency is EUR and the Return Type is "Total Return" (being Basket Indices i=1 and i=4) on any given Asset Business Day following the Asset Inception Date shall be calculated by the Strategy Calculation Agent as an amount equal to:

- (a) the Asset Value in respect of such Basket Index in respect of the Asset Rebalancing Day in respect of such Basket Index immediately preceding such Asset Business Day (" A_{Art} "); multiplied by
- (b) an amount equal to:
 - (i) one (1); minus
 - (ii) the quotient of (I) the Reference Level of the EUR STR Money Market Index on such Asset Business Day (" MM_t "), as numerator; and (II) the Reference Level of the EUR STR Money Market Index on the Asset Rebalancing Day immediately preceding such Asset Business Day (" MM_{Art} "), as denominator; plus
 - (iii) the quotient of (i) the Reference Level of such Basket Index on such Asset Business Day (" L_t ") as numerator; and (ii) the Reference Level of such Basket Index on the Asset Rebalancing Day immediately preceding such Asset Business Day (" L_{Art} "), as denominator.

Expressed as a formula, the Asset Value of each Basket Index in respect of which the Currency is EUR and the Return Type is "Total Return" on any given Asset Business Day following the Asset Inception Date is as follows:

$$A_{Art} \times \left(1 - \frac{MM_t}{MM_{Art}} + \frac{L_t}{L_{Art}} \right)$$

The Asset Value of each Basket Index in respect of which the Currency is USD and the Return Type is "Excess Return" (being Basket Indices i=2 and i=3) on any given Asset Business Day following the Asset Inception Date shall be calculated by the Strategy Calculation Agent as an amount equal to:

- (a) the Asset Value in respect of such Basket Index in respect of the Asset Rebalancing Day in respect of such Basket Index immediately preceding such Asset Business Day (" A_{Art} "); multiplied by
- (b) an amount equal to:
 - (i) one (1); minus
 - (ii) the quotient of:
 - (I) the applicable Currency Exchange Rate to convert one unit of USD into EUR in respect of such Asset Business Day (" FX_t "), as numerator; and
 - (II) the applicable Currency Exchange Rate to convert one unit of USD into EUR in respect of the Asset Rebalancing Day immediately preceding such Asset Business Day (" FX_{Art} "), as denominator; plus
 - (iii) the quotient of:
 - (I) the Reference Level of such Basket Index in respect of such Asset Business Day (" L_t "), multiplied by the applicable Currency Exchange Rate to convert one unit of USD into EUR in respect of such Asset Business Day (" FX_t "), as numerator; and
 - (II) the Reference Level of such Basket Index in respect of the Asset Rebalancing Day immediately preceding such Asset Business Day (" L_{Art} "), multiplied by the applicable Currency Exchange Rate to convert one unit of USD into EUR in respect of the Asset Rebalancing Day immediately preceding such Asset Business Day (" FX_{Art} "), as denominator.

Expressed as a formula, the Asset Value of each Basket Index in respect of which the Currency is USD and the Return Type is "Excess Return" on any given Asset Business Day following the Asset Inception Date is as follows:

$$A_{Art} \times \left(1 - \frac{FX_t}{FX_{Art}} + \frac{FX_t \times L_t}{FX_{Art} \times L_{Art}} \right)$$

14.7 Calculation of the Cash Asset Quantity

The Cash Asset Quantity on the Basket Inception Date was equal to the Initial Cash Asset Quantity.

The Cash Asset Quantity on each Strategy Business Day following the Basket Inception Date shall be calculated by the Strategy Calculation Agent as an amount equal to:

- (a) where such Strategy Business Day does not fall on a Basket Rebalancing Day, an amount equal to:
 - (A) the Cash Asset Quantity in respect of the Basket Rebalancing Day immediately preceding such Strategy Business Day (or, if none, the Initial Cash Asset Quantity); minus
 - (B) the Asset Servicing Cost in respect of such Strategy Business Day; and
- (b) where such Strategy Business Day falls on a Basket Rebalancing Day, an amount calculated by the Strategy Calculation Agent in accordance with the following formula:

$$q_{c,Brt} + 1 \times \left\{ \sum_{i=1}^n [(q_{i,Brt} - q_{i,t}) \times A_{i,t}] - RC_t^B - SC_t \right\}$$

Where:

$q_{c,BRt}$ means the Cash Asset Quantity in respect of the Basket Rebalancing Day immediately preceding such Strategy Business Day (or, if none, the Initial Cash Asset Quantity);

i means Basket Index "i";

n means a number equal to the total number of Basket Indices;

$q_{i,BRt}$ means the Asset Quantity in respect of the relevant Basket Index in respect of the Basket Rebalancing Day immediately preceding such Strategy Business Day (or, if none, in respect of the Strategy Inception Date);

$q_{i,t}$ means the Asset Quantity in respect of the relevant Basket Index and such Strategy Business Day;

$A_{i,t}$ means the Asset Value in respect of the relevant Basket Index and such Strategy Business Day;

RC_t^B means the Basket Rebalancing Cost in respect of such Strategy Business Day; and

SC_t means the Asset Servicing Cost in respect of such Strategy Business Day.

14.8 Calculation of the Initial Cash Asset Quantity

The Initial Cash Asset Quantity shall be calculated by the Strategy Calculation Agent as an amount equal to the quotient of:

- (a) an amount equal to:
 - (i) 100; minus
 - (ii) the summation, in respect of each Basket Index, of:
 - (I) the Asset Quantity; multiplied by
 - (II) the Asset Value,
 in each case, in respect of the Strategy Inception Date,

(as numerator); and
- (b) one, as denominator.

Expressed as a formula, the Initial Cash Asset Quantity is calculated in accordance with the following formula:

$$\frac{100 - \sum_{i=1}^n q_{i,BID} \times A_{i,BID}}{1}$$

Where:

$q_{c,BRt}$ means the Asset Quantity in respect of Basket Index "i" in respect of the Strategy Inception Date;

i means Basket Index "i";

n means a number equal to the total number of Basket Indices; and

$A_{i,t}$ means the Asset Value in respect of Basket Index "i" in respect of the Strategy Inception Date.

14.9 Calculation of the Basket Rebalancing Cost

The Basket Rebalancing Cost in respect of (a) the Strategy Inception Date and (b) each Strategy Business Day following the Strategy Inception Date that is not a Basket Rebalancing Day, is equal to zero.

The Basket Rebalancing Cost in respect of each Basket Rebalancing Day following the Strategy Inception Date shall be calculated by the Strategy Calculation Agent in accordance with the following formula:

$$\sum_{i=1}^4 (TC_{i,t}^A \times |q_{i,BRt} - q_{i,t}|)$$

Where:

i means Basket Index "i";

$TC_{i,t}^A$ means the Asset Transaction Cost Rate in respect of the relevant Basket Index;

$A_{i,t}$ means the Asset Value in respect of the relevant Basket Index and such Strategy Business Day;

$q_{i,BRt}$ means the Asset Quantity in respect of the relevant Basket Index in respect of the Basket Rebalancing Day immediately preceding such Basket Rebalancing Day (or, if none, in respect of the Strategy Inception Date); and

$q_{i,t}$ means the Asset Quantity in respect of the relevant Basket Index and such Basket Rebalancing Day.

14.10 Calculation of the Asset Servicing Cost

The Asset Servicing Cost in respect of the Strategy Inception Date was equal to zero.

The Asset Servicing Cost in respect of each Strategy Business Day following the Strategy Inception Date shall be calculated by the Strategy Calculation Agent in accordance with the following formula:

$$\sum_{i=1}^n \left[q_{i,BRt} \times \sum_{s=BRt}^{t-1} (A_{i,s} \times DCF_{s,s+1} \times CC_{i,s}) \right]$$

Where:

i means Basket Index "i";

n means a number equal to the total number of Basket Indices;

$q_{i,BRt}$ means the Asset Quantity in respect of the relevant Basket Index and the Basket Rebalancing Day immediately preceding such Strategy Business Day;

t means the relevant Strategy Business Day;

s means each relevant Strategy Business Day falling in the period commencing on (and including) the Basket Rebalancing Day immediately preceding such Strategy Business Day to (and including) the Strategy Business Day immediately preceding such Strategy Business Day;

$A_{i,s}$ means the Asset Value in respect of the relevant Basket Index and such Strategy Business Day;

$DCF_{s,s+1}$ means the actual number of days in the period commencing on (and including) such Strategy Business Day and ending on (but excluding) the Strategy Business Day immediately following such Strategy Business Day, divided by 360; and

$CC_{i,s}$ means the Asset Servicing Cost Rate in respect of the relevant Basket Index.

14.11 Definitions in respect of the Underlying Index

"Additional Market Disruption Event" means, in respect of Basket Index c=3, if a hedging disruption would otherwise occur due solely to a restriction in trading in the relevant underlying futures contract of such Basket Index due to movements in price exceeding certain permitted limits, such restriction shall be deemed not to be a hedging disruption for the purposes of such Basket Index.

"Asset Business Day" means, in respect of each Basket Index, each day from and including the Asset Inception Date which is a business day according to the holiday calendar of such Basket Index;

"Asset Inception Date" means, in respect of each Basket Index, 11 January 2022;

"Asset Rebalancing Day" means, in respect of a Basket Index, each Asset Business Day from and including the Asset Inception Date on which both the Asset Value and the Reference Level of such Basket Index are strictly greater than zero.

"Asset Servicing Cost Rate" means, in respect of a Basket Index and a Strategy Business Day

- (a) if the Asset Quantity in respect of such Basket Index on such Strategy Business Day (or, if such Strategy Business Day is not Basket Rebalancing Day, on the Basket Rebalancing Day immediately preceding such Strategy Business Day) was greater than or equal to zero, the Long Asset Servicing Cost Rate in respect of such Basket Index; or
- (b) otherwise, the Short Asset Servicing Cost Rate in respect of such Basket Index

"Asset Sponsor" means, in respect of:

- (a) Basket Index i=1, MSCI Inc.;
- (b) each of Basket Index i=2 and i=3, Goldman Sachs International; and
- (c) Basket Index i=4, Euronext N.V.,

or, in each case, any successor thereto.

"Asset Trading Day" means, in respect of:

- (a) Basket Index i=1, each day on which each of the following exchanges is open for trading during its regular trading session (as determined by the Strategy Calculation Agent): New York Stock Exchange, London Stock Exchange, Tokyo Stock Exchange, Frankfurt Stock Exchange, Hong Kong Stock Exchange and Paris Stock Exchange;
- (b) Basket Index i=2, each "Strategy Trading Day" as defined in (as defined in Section 15 (*Description of the Govt Bond Strategy*) below);
- (c) Basket Index i=3, each "Strategy Trading Day" as defined in (as defined in Section 18 (*Description of the Commodity Index*) below); and
- (d) Basket Index i=4, each day on which each of the following exchanges is open for trading during its regular trading session (as determined by the Strategy Calculation Agent): Singapore Stock Exchange, Tokyo Stock Exchange, New York Stock Exchange, Toronto Stock Exchange, London Stock Exchange, Brussels Stock Exchange, Mercado Continuo (SIBEX), Hong Kong Stock Exchange and Paris Stock Exchange;

"Asset Transaction Cost Rate" means, in respect of each Basket Index, 0.0005;

"Basket Observation Day" means, with respect to:

- (a) the Strategy Inception Date, the Strategy Inception Date; and
- (b) a Basket Rebalancing Day which is not the Strategy Inception Date, the calendar day falling two Strategy Business Days before such day;

"Basket Rebalancing Day" means the Strategy Inception Date and thereafter the 11th calendar day of each calendar month, or the immediately following Basket Trading Day if such day is not a Basket Trading Day. If on any Strategy Business Day, the Basket Value (calculated immediately before subtracting the Basket Rebalancing Cost for such day) or the Asset Value of a Basket Index is equal to or less than zero, no further Basket Rebalancing Day will occur on or after such day.

"Basket Trading Day" means each Strategy Business Day which is an Asset Trading Day for each Basket Index.

"Currency Exchange Rate" means, in respect of an Asset Business Day, the 4 p.m. London closing spot mid rate for converting one unit of USD into EUR as published by WM Performance Services or any successor company for such day.

The days on which Currency Exchange Rates are usually fixed and published, as determined by the Strategy Calculation Agent, by WM Performance Services or any successor company are referred to herein as **"Fixing Days"**. If any calendar day is not a Fixing Day, the Strategy Calculation Agent will use the level of the relevant Currency Exchange Rate published for the applicable Fixing Day immediately preceding such calendar day.

If any calendar day is a Fixing Day but the applicable Currency Exchange Rate is not available on such day at the applicable time indicated above, the Strategy Calculation Agent shall determine the Currency Exchange Rate in respect of such Fixing Day in a commercially reasonable manner;

"Long Asset Servicing Cost Rate" means in respect of:

- (a) each of Basket Index i=1 and i=4, 0.0075; and
- (b) each of Basket Index i=2 and i=3, zero.

"Reference Level" means, in respect of:

- (a) any Basket Index, on any given calendar day, the closing level of the relevant Basket Index as determined by the relevant Asset Sponsor in respect of such calendar day; and
- (b) the EUR STR Money Market Index:
 - (A) on any MM Index Business Day, its MM Index Value as calculated by the Strategy Sponsor in respect of the EUR STR Money Market Index and such MM Index Business Day; and
 - (B) on any day other than a MM Index Business Day, its MM Index Value as calculated by the Strategy Sponsor in respect of the EUR STR Money Market Index and the immediately preceding MM Index Business Day,

for the purposes of this sub-paragraph (b), in each case as such term is defined in Section 21 (*Description of the Money Market Indices*).

"Short Asset Servicing Cost Rate" means, in respect of each Basket Index, zero;

"Strategy Business Day" means each weekday (being Monday to Friday of each calendar week) starting from and including the Strategy Inception Date;

"Strategy Currency" means EUR;

"Strategy Inception Date" means 11 January 2022;

"Strategy Publication Data Source" means <http://marquee.gs.com> (or any successor page thereto);

"Strategy Rebalancing Day" means the Strategy Inception Date and thereafter each Strategy Business Day for which the Basket Value is strictly greater than zero;

"Strategy Trading Day" means each Basket Trading Day from and including the Strategy Inception Date; and

"USD" means United States Dollars.

14.12 Disruption Events, Adjustment Events, Change in Methodology and Corrections

In respect of the Underlying Index, please see Section 22.1 (*Disruption Events - In respect of each of the Index, the Underlying Index and the Govt Bond Strategy only*), Section 11 (*Corrections*) and Section 12 (*Change in Methodology*).

15. Description of the Govt Bond Strategy

Capitalised terms defined in this Section 3 (*Description of the Govt Bond Strategy*) (including in the Section 3.11 (*Definitions in respect of the Govt Bond Strategy*)) shall have the meaning given to them solely for the purposes of this Section 3 (*Description of the Govt Bond Strategy*) unless otherwise specified or cross-referred to.

15.1 Overview of the Govt Bond Strategy

The Goldman Sachs US and EUR Government Bond Basket USD ER Strategy (*Bloomberg Code: GSISFIBU <Index>*) (referred to herein as the Govt Bond Strategy) seeks to provide synthetic exposure to the performance of an equally weighted basket (the "**Basket**") of two underlying indices (the "**Basket Indices**" and each a "**Basket Index**") and which periodically (on a monthly basis) rebalances to assign a notional weighting to each Basket Index by reference to certain fixed weights (the Assets Weights, as set out in Section 3.2 (*Overview of the Govt Bond Strategy Basket Indices*) below).

The Basket Indices in respect of the Govt Bond Strategy are set out in the Section 3.2 (Overview of the Govt Bond Strategy Basket Indices) below.

The Govt Bond Strategy is an "excess return" strategy and, therefore, the value of the Govt Bond Strategy shall not include the accrual of any amount or interest in relation to any money market rate in respect of any notional cash amount.

The Govt Bond Strategy is denominated in United States Dollars ("**USD**") and has, in respect of each Basket Index which is not denominated in USD, an internal simulated currency hedge feature that seeks to offset a substantial portion of the positive or negative effects of currency exchange rate fluctuations on the value of such Basket Index.

The value of the Govt Bond Strategy is reduced by the deduction of (i) synthetic costs of entering into and/or unwinding any transaction relating to the Basket Indices following a Rebalancing and (ii) synthetic costs of maintaining positions in, and replicating the performance of, the Basket Indices. Overall, the deduction of such synthetic costs may have the effect of reducing the performance of the Govt Bond Strategy.

15.2 Overview of the Govt Bond Strategy Basket Indices

i	Basket Index	Bloomberg Page	Currency	Return Type	Asset Weight
1	US Government Bond Futures Rolling Strategy Index*	<i>FRSIUSB <Index></i>	USD	Total Return	50%
2	European Government Bond Futures Rolling Strategy Index**	<i>FRSIEUB <Index></i>	EUR	Total Return	50%

* As described in Section 4 (Description of the US Government Bond Futures Rolling Strategy Index) below.

** As described in Section 5 (Description of the European Government Bond Futures Rolling Strategy Index) below.

15.3 Calculation of the Value of the Govt Bond Strategy

The value of the Govt Bond Strategy (the "Govt Bond Strategy Value") on the Strategy Inception Date was equal to 100.

The Govt Bond Strategy Value shall be calculated by the Strategy Calculation Agent on each Strategy Business Day following the Strategy Inception Date as an amount in the Strategy Currency (subject to a floor of zero) calculated in the same manner as the Underlying Index Value, as set out in Section 2.2 (*Calculation of the Underlying Index Value*) of Section 2 (*Description of the Underlying Index*).

15.4 Calculation of the Basket Value

The Basket Value on the Strategy Inception Date was equal to 100.

The Basket Value shall be calculated by the Strategy Calculation Agent on each Strategy Business Day following the Strategy Inception Date as an amount (subject to a floor of zero) calculated in the same manner as the Basket Value for the purposes of the Underlying Index, as set out in Section 2.4 (*Calculation of the Basket Value*) of Section 2 (*Description of the Underlying Index*).

15.5 Calculation of the Asset Quantity

The Asset Quantity in respect of a Basket Index and a Strategy Business Day shall be determined by the Strategy Calculation Agent as set out in Section 2.5 (*Calculation of the Asset Quantity in respect of each Basket Index*) of Section 2 (*Description of the Underlying Index*).

Unless the Strategy Calculation Agent determines otherwise, in the event that the value of any component which is utilised for the calculation of an Asset Quantity is subsequently corrected, the Strategy Calculation Agent will not correct the Asset Quantity and will instead use the Asset Quantity as calculated before such correction.

15.6 Calculation of the Asset Value

The Asset Value of each Basket Index on the Asset Inception Date was equal to 100.

The Asset Value of each Basket Index in respect of which the Currency is USD and the Return Type is "Total Return" (being Basket Index i=1) on any given Asset Business Day following the Asset Inception Date shall be calculated by the Strategy Calculation Agent as an amount equal to:

- (a) the Asset Value in respect of such Basket Index in respect of the Asset Rebalancing Day in respect of such Basket Index immediately preceding such Asset Business Day (" A_{Art} "); multiplied by
- (b) an amount equal to:
 - (i) one (1); minus
 - (ii) the quotient of (I) the Reference Level of the USD Money Market on such Asset Business Day (" MM_t "), as numerator; and (II) the Reference Level of the USD Money Market Index on the Asset Rebalancing Day immediately preceding such Asset Business Day (" MM_{Art} "), as denominator; plus
 - (iii) the quotient of (i) the Reference Level of such Basket Index on such Asset Business Day (" L_t ") as numerator; and (ii) the Reference Level of such Basket Index on the Asset Rebalancing Day immediately preceding such Asset Business Day (" L_{Art} "), as denominator.

Expressed as a formula, the Asset Value of the Basket Index in respect of which the Currency is USD and the Return Type is "Total Return" on any given Asset Business Day following the Asset Inception Date is as follows:

$$A_{Art} \times \left(1 - \frac{MM_t}{MM_{Art}} + \frac{L_t}{L_{Art}} \right)$$

The Asset Value of each Basket Index in respect of which the Currency is EUR (being Basket Index i=2) on any given Asset Business Day following the Asset Inception Date shall be calculated by the Strategy Calculation Agent as an amount equal to:

- (c) the Asset Value in respect of such Basket Index in respect of the Asset Rebalancing Day in respect of such Basket Index immediately preceding such Asset Business Day (" A_{Art} "); multiplied by
- (d) an amount equal to:

- (i) one (1); minus
- (ii) the quotient of:
 - (I) an amount equal to the Reference Level of the EUR Money Market Index on such Asset Business Day (" MM_t "), multiplied by the applicable Currency Exchange Rate to convert one unit of EUR into USD on such Asset Business Day (" FX_t "), as numerator; and
 - (II) an amount equal to the Reference Level of the EUR Money Market Index on the Asset Rebalancing Day immediately preceding such Asset Business Day (" MM_{Art} "), multiplied by the applicable Currency Exchange Rate to convert one unit of EUR into USD on the Asset Rebalancing Day immediately preceding such Asset Business Day (" FX_{Art} "),

plus

- (iii) the quotient of:
 - (I) the Reference Level of such Basket Index in respect of such Asset Business Day (" L_t "), multiplied by the applicable Currency Exchange Rate to convert one unit of EUR into USD in respect of such Asset Business Day (" FX_t "), as numerator; and
 - (II) the Reference Level of such Basket Index in respect of the Asset Rebalancing Day immediately preceding such Asset Business Day (" L_{Art} "), multiplied by the applicable Currency Exchange Rate to convert one unit of EUR into USD in respect of the Asset Rebalancing Day immediately preceding such Asset Business Day (" FX_{Art} "), as denominator.

Expressed as a formula, the Asset Value of each Basket Index in respect of which the Currency is EUR and the Return Type is "Total Return" on any given Asset Business Day following the Asset Inception Date is as follows:

$$A_{Art} \times \left(1 - \frac{MM_t \times FX_t}{MM_{Art} \times FX_{Art}} + \frac{FX_t \times L_t}{FX_{Art} \times L_{Art}} \right)$$

In respect of an Asset and a day which is not an Asset Business Day the Asset Value shall be the Asset Value of such Asset as of the immediately preceding Asset Business Day.

15.7 Calculation of the Cash Asset Quantity

The Cash Asset Quantity on the Basket Inception Date was equal to the Initial Cash Asset Quantity.

The Cash Asset Quantity in respect of a Basket Index and each Strategy Business Day following the Basket Inception Date shall be calculated by the Strategy Calculation Agent as set out in Section 2.7 (*Calculation of the Cash Asset Quantity*) of Section 2 (*Description of the Underlying Index*).

15.8 Calculation of the Initial Cash Asset Quantity

The Initial Cash Asset Quantity shall be determined by the Strategy Calculation Agent as set out in Section 2.8 (*Calculation of the Initial Cash Asset Quantity*) of Section 2 (*Description of the Underlying Index*).

15.9 Calculation of the Basket Rebalancing Cost

The Basket Rebalancing Cost in respect of (a) the Strategy Inception Date and (b) each Strategy Business Day following the Strategy Inception Date that is not a Basket Rebalancing Day, is equal to zero.

The Basket Rebalancing Cost in respect of each Basket Rebalancing Day following the Strategy Inception Date shall be calculated by the Strategy Calculation Agent as set out in Section 2.9 (*Calculation of the Basket Rebalancing Cost*) of Section 2 (*Description of the Underlying Index*).

15.10 Calculation of the Asset Servicing Cost

The Asset Servicing Cost in respect of the Strategy Inception Date was equal to zero.

The Asset Servicing Cost in respect of each Strategy Business Day following the Strategy Inception Date shall be calculated by the Strategy Calculation Agent as set out in Section 2.10 (*Calculation of the Asset Servicing Cost*) of Section 2 (*Description of the Underlying Index*).

15.11 Definitions in respect of the Govt Bond Strategy

"Asset Business Day" means, in respect of each Basket Index, each day from and including the Asset Inception Date which is a business day according to the holiday calendar of such Basket Index;

"Asset Inception Date" means, in respect of each Basket Index, 10 January 2022;

"Asset Rebalancing Day" means, in respect of a Basket Index, each Asset Business Day from and including the Asset Inception Date on which both the Asset Value and the Reference Level of such Basket Index are strictly greater than zero;

"Asset Servicing Cost Rate" means, in respect of a Basket Index and a Strategy Business Day

- (a) if the Asset Quantity in respect of such Basket Index on such Strategy Business Day (or, if such Strategy Business Day is not Basket Rebalancing Day, on the Basket Rebalancing Day immediately preceding such Strategy Business Day) was greater than or equal to zero, the Long Asset Servicing Cost Rate in respect of such Basket Index; or
- (b) otherwise, the Short Asset Servicing Cost Rate in respect of such Basket Index;

"Asset Sponsor" means, in respect of each Basket Index, Goldman Sachs International, or any successor thereto;

"Asset Trading Day" means, in respect of:

- (a) Basket Index i=1, business days according to Chicago Mercantile Exchange Globex trading calendar. The Good Friday holiday shall not be considered a business day; and
- (b) Basket Index i=2, business days according to the Eurex trading calendar;

"Asset Transaction Cost Rate" means, in respect of each Basket Index, 0.0005;

"Basket Observation Day" means, with respect to:

- (a) the Strategy Inception Date, the Strategy Inception Date; and
- (b) a Basket Rebalancing Day which is not the Strategy Inception Date, the calendar day falling two (2) Strategy Business Days before such day;

"Basket Rebalancing Day" means the Strategy Inception Date and, thereafter, the 10th calendar day of each calendar month, or the immediately following Basket Trading Day if such day is not a Basket Trading Day. If on any Strategy Business Day, the Basket Value (calculated immediately before subtracting the Basket Rebalancing Cost for such day) or the Asset Value of a Basket Index is equal to or less than zero, no further Basket Rebalancing Day will occur on or after such day

"Basket Trading Day" means each Strategy Business Day which is an Asset Trading Day for each Basket Index.

"Currency Exchange Rate" means, in respect of an Asset Business Day, the 4 p.m. London closing spot mid rate for converting one unit of EUR into USD as published by WM Performance Services or any successor company for such day.

The days on which Currency Exchange Rates are usually fixed and published, as determined by the Strategy Calculation Agent, by WM Performance Services or any successor company are referred to herein as **"Fixing Days"**. If any calendar day is not a Fixing Day, the Strategy Calculation Agent will

use the level of the relevant Currency Exchange Rate published for the applicable Fixing Day immediately preceding such calendar day.

If any calendar day is a Fixing Day but the applicable Currency Exchange Rate is not available on such day at the applicable time indicated above, the Strategy Calculation Agent shall determine the Currency Exchange Rate in respect of such Fixing Day in a commercially reasonable manner;

"Long Asset Servicing Cost Rate" means in respect of each Basket Index, 0.0015.

"Reference Level" means, in respect of:

- (a) any Basket Index, on any given calendar day, the closing level of the relevant Basket Index as determined by the relevant Asset Sponsor in respect of such calendar day; and
- (b) any Money Market Index:
 - (A) (A) on any MM Index Business Day, its MM Index Value as calculated by the Strategy Sponsor in respect of such Money Market Index and such MM Index Business Day; and
 - (B) (B) on any day other than a MM Index Business Day, its MM Index Value as calculated by the Strategy Sponsor in respect of such Money Market Index and the immediately preceding MM Index Business Day,

for the purposes of this sub-paragraph (b), in each case as such term is defined in Section 9 (Description of the Money Market Indices);

"Short Asset Servicing Cost Rate" means, in respect of each Basket Index, zero.

"Strategy Business Day" means each weekday (being Monday to Friday of each calendar week) starting from and including the Strategy Inception Date;

"Strategy Currency" means USD;

"Strategy Inception Date" means 10 January 2022;

"Strategy Publication Data Source" means <http://marquee.gs.com> (or any successor page thereto);

"Strategy Rebalancing Day" means the Strategy Inception Date and thereafter each Strategy Business Day for which the Basket Value is strictly greater than zero; and

"Strategy Trading Day" means each Basket Trading Day from and including the Strategy Inception Date.

15.12 Disruption Events, Adjustment Events, Change in Methodology and Corrections

In respect of the Govt Bond Strategy, please see Section 22.1 (*Disruption Events - In respect of each of the Index, the Underlying Index and the Govt Bond Strategy only*), Section 23 (*Corrections*) and Section 24 (*Change in Methodology*).

16. Description of the US Government Bond Futures Rolling Strategy Index

Capitalised terms defined in this Section 16 (*Description of the US Government Bond Futures Rolling Strategy Index*) shall have the meaning given to them solely for the purposes of this Section 16 (*Description of the US Government Bond Futures Rolling Strategy Index*) unless otherwise specified or cross-referred to.

16.1 Overview of the US Government Bond Futures Rolling Strategy Index

The US Government Bond Futures Rolling Strategy Index (Total Return USD) (*Bloomberg Code: FRSIUSB <Index>*) (referred to herein as the **"UST Futures Index"**) is a proprietary index designed to provide investors with a synthetic exposure to the total return (including income from interest) of the first nearby 10-Year U.S. Treasury Note futures contracts (the **"10Y U.S. Treasury Futures**

Contracts)). 10Y U.S. Treasury Futures Contracts are currently listed for trading on the Chicago Board of Trade (the "CBOT"). For more details on the 10Y U.S. Treasury Futures Contracts and 10-Year U.S. Treasury notes, please see below Section 16.9 (*10-Year U.S. Treasury Note Futures Contracts*).

16.2 The UST Futures Index

The UST Futures Index is sponsored by Goldman Sachs International but is calculated by Standard & Poor's, as index calculation agent. The UST Futures Index operates in accordance with a set of pre-determined rolling methodology and formulae, and Standard & Poor's, the index calculation agent, does not exercise any discretion with respect to the UST Futures Index. The UST Futures Index is, therefore, not a managed index. As the index sponsor, Goldman Sachs International is not acting as an investment adviser or performing a discretionary management role with respect to the UST Futures Index and, as a result, has no fiduciary duty to any person in respect of the UST Futures Index.

16.3 UST Futures Index Starting Value

The UST Futures Index has been given a starting value of 100 as of December 31, 1991, which is the initial calculation date of the UST Futures Index.

16.4 Daily Strategy Value Calculation

The UST Futures Index is a U.S. dollar denominated index and is calculated on each day on which the CBOT is open for trading (such day, a "**exchange business day**"). The value of the UST Futures Index on any given exchange business day will be calculated as the product of (i) the value of the UST Futures Index as of the immediately preceding exchange business day and (ii) the sum of (x) the daily return ratio of the value of the 10Y U.S. Treasury Futures Contracts on such day and (y) the overnight interest rate for the calculation period.

Daily Return Ratio of the Value of the 10Y U.S. Treasury Futures Contracts: On any given exchange business day (other than during the roll period as described below), the daily return ratio of the value of 10Y U.S. Treasury Futures Contracts is calculated as the quotient of (a) the 10Y U.S. Treasury Futures Contract Valuation Price on the relevant exchange business day and (b) the 10Y U.S. Treasury Futures Contract Valuation Price on the immediately preceding exchange business day. During the roll period, the calculation of the daily return ratio of 10Y U.S. Treasury Futures Contracts will reflect the price of the second nearby 10Y U.S. Treasury Futures Contracts into which the first nearby 10Y U.S. Treasury Futures Contracts are gradually rolled over.

10Y U.S. Treasury Futures Contracts Valuation Price: The 10Y U.S. Treasury Futures Contracts Valuation Price on any given exchange business day means the official daily settlement price per 10Y U.S. Treasury Futures Contract quoted by the CBOT on such exchange business day.

Overnight Interest Rate: The interest rate calculation uses the overnight interest rate as published on Global Insight DRI page USD-FEDERAL-FUNDS-H15 and the ACT/360 day count fraction, as defined in the 2006 ISDA Definitions. If the overnight interest rate is not published or is otherwise unavailable for the applicable calculation period, then the last available overnight interest rate published on such page will be used as the overnight interest rate for such calculation period.

The calculation agent will, however, not calculate the daily index value or will calculate such value pursuant to a different methodology when at any given time the 10Y U.S. Treasury Futures Contracts Valuation Prices for the first nearby 10Y U.S. Treasury Futures Contracts and/or the second nearby 10Y U.S. Treasury Futures Contracts, as applicable, are not published or are otherwise unavailable as further described below.

16.5 Roll Methodology

As 10Y U.S. Treasury Futures Contracts have a quarterly expiration period (March, June, September or December), when the first nearby 10Y U.S. Treasury Futures Contracts come to expiration, they are replaced by the second nearby 10Y U.S. Treasury Futures Contracts. For example, a 10Y U.S. Treasury Futures Contract purchased and held in May may specify a June expiration. As time passes, the contract expiring in June is replaced by a 10Y U.S. Treasury Futures Contract for delivery in September. This process is referred to as "rolling".

Roll Period: Rolling will be carried out during the three exchange business days starting from, and including, the third last exchange business day prior to the first notice date of the first nearby 10Y U.S. Treasury Futures Contracts to, and including, the last exchange business day prior to the first notice date of such 10Y U.S. Treasury Futures Contracts. Such period is referred to from time to time as the "roll period". On each exchange business day of the roll period, one third of the notional investment in the first nearby 10Y U.S. Treasury Futures Contracts will be rolled into the second nearby 10Y U.S. Treasury Futures Contracts, and the prices at which 10Y U.S. Treasury Futures Contracts are rolled will be based on the 10Y U.S. Treasury Futures Contracts Valuation Price for each of the first nearby and second nearby 10Y U.S. Treasury Futures Contracts. Rolling will, however, be carried out pursuant to a different methodology when at any time during the roll period the 10Y U.S. Treasury Futures Contracts Valuation Prices for one or both of the first nearby and second nearby 10Y U.S. Treasury Futures Contracts are not published or are otherwise unavailable as further described below.

16.6 Price of 10Y U.S. Treasury Futures Contracts Unavailable

Unavailable Outside of the Roll Period: If, on any exchange business day that does not fall within the roll period, the 10Y U.S. Treasury Futures Contracts Valuation Price for the first nearby 10Y U.S. Treasury Futures Contracts is not published or is otherwise unavailable, then the calculation agent will not calculate any value for the UST Futures Index but will publish the last available value.

If, on the immediately following exchange business day, the 10Y U.S. Treasury Futures Contracts Valuation Price for the first nearby 10Y U.S. Treasury Futures Contracts is available, the daily return ratio of the value of the 10Y U.S. Treasury Futures Contracts will be calculated as the *quotient* of (a) the 10Y U.S. Treasury Futures Contracts Valuation Price on that exchange business day and (b) the last available 10Y U.S. Treasury Futures Contracts Valuation Price (however, for the avoidance of doubt, if such exchange business day is the first day of the roll period and the 10Y U.S. Treasury Futures Contracts Valuation Price for the second nearby 10Y U.S. Treasury Futures Contracts is not published or is otherwise unavailable on that exchange business day, then, as further described below, the calculation agent will not calculate any value for the UST Futures Index but will publish the last available value).

Unavailable Within the Roll Period: If the 10Y U.S. Treasury Futures Contracts Valuation Price for one or both of the first nearby and second nearby 10Y U.S. Treasury Futures Contracts is not published or is otherwise unavailable at any time during the roll period, then rolling will be carried out pursuant to the following alternative rolling methodology:

- **Case 1:** If the 10Y U.S. Treasury Futures Contracts Valuation Price for one or both of the first nearby and second nearby 10Y U.S. Treasury Futures Contracts is not published or is otherwise unavailable on the first exchange business day of the roll period, then one half of the notional investment in the first nearby 10Y U.S. Treasury Futures Contracts will be rolled into the second nearby 10Y U.S. Treasury Futures Contracts on the second exchange business day of the roll period if the 10Y U.S. Treasury Futures Contracts Valuation Prices for both the first nearby and second nearby 10Y U.S. Treasury Futures Contracts are available on such second exchange business day, and the second half of the notional investment in the first nearby 10Y U.S. Treasury Futures Contracts will be rolled over into the second nearby 10Y U.S. Treasury Futures Contracts on the third exchange business day of the roll period if the 10Y U.S. Treasury Futures Contracts Valuation Prices for both the first nearby and second nearby 10Y U.S. Treasury Futures Contracts are available on such third exchange business day; however, if the 10Y U.S. Treasury Futures Contracts Valuation Price for one or both of the first nearby and second nearby 10Y U.S. Treasury Futures Contracts is not published or is otherwise unavailable on such third exchange business day, then rolling of any remaining portion of the notional investment in the first nearby 10Y U.S. Treasury Futures Contracts will be carried out as set out below in respect of Case 4.
- **Case 2:** If the 10Y U.S. Treasury Futures Contracts Valuation Price for one or both of the first nearby and second nearby 10Y U.S. Treasury Futures Contracts is not published or is otherwise unavailable on both of the first and second exchange business days of the roll period, then the entire notional investment in the first nearby 10Y U.S. Treasury Futures Contracts will be rolled into the second nearby 10Y U.S. Treasury Futures Contracts on the third exchange business day of the roll period; however, if the 10Y U.S. Treasury Futures Contracts Valuation Price for one or both of the first nearby and second nearby 10Y U.S. Treasury Futures Contracts is not published or is otherwise unavailable on such third exchange business day, then rolling of any

remaining portion of the notional investment in the first nearby 10Y U.S. Treasury Futures Contracts will be carried out as set out below in respect of Case 4.

- **Case 3:** If the 10Y U.S. Treasury Futures Contracts Valuation Price for both of the first nearby and second nearby 10Y U.S. Treasury Futures Contracts is available on the first exchange business day of the roll period, on which one third of the notional investment in the first nearby 10Y U.S. Treasury Futures Contracts is rolled over into the second nearby 10Y U.S. Treasury Futures Contracts, but the 10Y U.S. Treasury Futures Contracts Valuation Price for one or both of the first nearby and second nearby 10Y U.S. Treasury Futures Contracts is not published or is otherwise unavailable on the second exchange business day of the roll period, then the remaining two thirds of the notional investment in the first nearby 10Y U.S. Treasury Futures Contracts will be rolled into the second nearby 10Y U.S. Treasury Futures Contracts on the third exchange business day of the roll period; however, if the 10Y U.S. Treasury Futures Contracts Valuation Price for one or both of the first nearby and second nearby 10Y U.S. Treasury Futures Contracts is not published or is otherwise unavailable on such third exchange business day, then rolling of any remaining portion of the notional investment in the first nearby 10Y U.S. Treasury Futures Contracts will be carried out as set out below in respect of Case 4.
- **Case 4:** In any situation where the 10Y U.S. Treasury Futures Contracts Valuation Price for one or both of the first nearby and second nearby 10Y U.S. Treasury Futures Contracts is not published or is otherwise unavailable on the third exchange business day of the roll period (including where such price is not published or is otherwise unavailable on both of the first and third exchange business days of the roll period only, both of the second and third exchange business days of the roll period only or all of the three exchange business days of the roll period), then any remaining amount of the notional investment in the first nearby 10Y U.S. Treasury Futures Contracts will be rolled into the second nearby 10Y U.S. Treasury Futures Contracts on the first notice date, which is the exchange business day immediately following the third exchange business day of the roll period. On such first notice date, rolling will be effected by using the first traded prices for the first nearby 10Y U.S. Treasury Futures Contracts and the second nearby 10Y U.S. Treasury Futures Contracts, provided that if, on such first notice date, the first traded price for the first nearby 10Y U.S. Treasury Futures Contracts and/or the second nearby 10Y U.S. Treasury Futures Contracts is not published or is otherwise unavailable, then the first nearby 10Y U.S. Treasury Futures Contracts will be sold at the Valuation Price for such first nearby 10Y U.S. Treasury Futures Contracts on the last reference day (as defined below) and the second nearby 10Y U.S. Treasury Futures Contracts will be bought at the Valuation Price for such second nearby 10Y U.S. Treasury Futures Contracts on the last reference day.

On any given exchange business day on which rolling does not occur because the 10Y U.S. Treasury Futures Contracts Valuation Price for one or both of the first nearby and second nearby 10Y U.S. Treasury Futures Contracts is not published or is otherwise unavailable (such day, a "no-roll exchange business day"; for the avoidance of doubt, a no-roll exchange business day may include any exchange business day of the roll period, as the case may be), the calculation agent will not calculate any value for the UST Futures Index but will publish the last available value.

If, on any exchange business day immediately following such no-roll exchange business day, the 10Y U.S. Treasury Futures Contracts are rolled over pursuant to the alternative methodology described above, then the calculation agent will apply alternative calculation methods to compute the level of the UST Futures Index on such exchange business day, which can be summarized as follows:

On such exchange business day, the level of the UST Futures Index will be computed as the *product* of:

- the value of the UST Futures Index as of the last exchange business day on which the Valuation Prices for both of the first nearby and second nearby 10Y U.S. Treasury Futures Contracts were available (such day, the "**last reference day**"); and
- the *sum* of:
 - (i) the *daily return ratio* reflecting either:
 - (a) if such exchange business day falls within the roll period, the weighted performance of the first nearby 10Y U.S. Treasury Futures Contracts and the

weighted performance of the second nearby 10Y U.S. Treasury Futures Contracts from the last reference day to such exchange business day; or

- (b) if such exchange business day is a first notice date, the product of (x) the weighted performance of the first nearby 10Y U.S. Treasury Futures Contracts from the last reference day up to the rolling effected as of the opening of the market on the first notice date, (y) the weighted performance of the second nearby 10Y U.S. Treasury Futures Contracts from the last reference day up to the rolling effected as of the opening of the market on such first notice date and (z) the performance of the second nearby 10Y U.S. Treasury Futures Contracts, including the second nearby contracts into which any remaining portion of the first nearby 10Y U.S. Treasury Futures Contracts are rolled over on such first notice date, calculated based on the opening price and the official daily settlement price of the second nearby 10Y U.S. Treasury Futures Contracts on such first notice date (for the avoidance of doubt, if the official daily settlement price of the second nearby 10Y U.S. Treasury Futures Contracts is not published or is otherwise unavailable on such first notice date, then the calculation agent will not calculate any value for the UST Futures Index but will publish the last available value),

and

- (ii) the overnight interest rate for the calculation period.

16.7 Publication

The value of the UST Futures Index is published on the Bloomberg page FRSIUSB <Index> (or any successor page).

16.8 UST Futures Index Calculation Formulae

The formulae for the calculation of the UST Futures Index are presented below. Investors, however, should be aware that these formulae do not reflect the alternative rolling and calculation methodologies applied when the value of 10Y U.S. Treasury Futures Contracts is not published or is otherwise unavailable (as further described above).

$$TRI_t = \left(r_t + \frac{i_{t-n}}{360} \cdot n \right) TRI_{t-n};$$

$$r_t = \frac{cP_{1,t}}{cP_{1,t-n}}$$

when NOT in the 3-day roll period

$$r_t = \left(1 - \frac{m-1}{3} \right) \cdot \frac{cP_{1,t}}{cP_{1,t-n}} + \frac{m-1}{3} \cdot \frac{cP_{2,t}}{cP_{2,t-n}}$$

when on the m^{th} day of the roll period, $m = 1, 2, 3$

Where

t = The relevant exchange business day;

TRI_t = The value of UST Futures Index as of day t ;

i_{t-n} = Overnight interest rate as of $(t - n)$

n = The number of actual calendar days between t and the immediately preceding exchange business day $(t - n)$;

r_t = Daily price return of the value of the 10Y U.S. Treasury Futures Contracts on t ;

$cP_{1,t}$ = 10Y U.S. Treasury Futures Contracts Valuation Price of the first nearby 10Y U.S. Treasury Futures Contracts on t ; *provided that*, for the avoidance of doubt, once the rolling has been effected in accordance with the above roll methodology and there is no remaining amount to be rolled, the first nearby 10Y U.S. Treasury Futures Contracts shall mean the 10Y U.S. Treasury Futures Contracts into which the notional investment has been rolled; and

$cP_{2,t}$ = 10Y U.S. Treasury Futures Contracts Valuation Price of the second nearby 10Y U.S. Treasury Futures Contracts on t .

Note: All calculations are based on seven significant figures (rounded at the eighth significant figure), and the value is published up to two decimal places (rounded at the third decimal place).

16.9 10-Year U.S. Treasury Note Futures Contracts

The 10-Year U.S. Treasury Note futures contracts underlying the UST Futures Index are three-month contracts to buy or sell standardized trading "units". One trading unit of 10-Year U.S. Treasury Note futures contracts equals one 10-Year U.S. Treasury note with a face value of \$100,000 or a multiple thereof. The 10-Year U.S. Treasury Note futures contract closest to expiration at any given time is known as the "first nearby" futures contract.

10-Year U.S. Treasury Notes: 10-Year U.S. Treasury notes are notes issued by the U.S. government with a ten-year maturity. U.S. Treasury notes are sold in increments of \$100. The price and interest rate of a note are determined at auction. The price may be greater than, less than or equal to the note's par amount.

16.10 Adjustments to the UST Futures Index

Investors should be aware that if the terms of the 10Y U.S. Treasury Futures Contracts are modified, Goldman Sachs International, as sponsor of the UST Futures Index, may take such steps as it considers appropriate in response to such modification.

17. Description of the European Government Bond Futures Rolling Strategy Index

Capitalised terms defined in this Section 17 (*Description of the European Government Bond Futures Rolling Strategy Index*) shall have the meaning given to them solely for the purposes of this Section 16 (*Description of the European Government Bond Futures Rolling Strategy Index*) unless otherwise specified or cross-referred to.

17.1 Overview of the European Government Bond Futures Rolling Strategy Index

The European Government Bond Futures Rolling Strategy Index (Total Return EUR) (*Bloomberg Code: FRSIEUB <Index>*) (the "**Euro Bond Futures Strategy Index**") is a Goldman Sachs International proprietary index designed to provide investors with a synthetic exposure to the total return (including income from interest accruing at the relevant overnight interest rate (as described below)) of the first nearby "Euro Bond Futures Contracts". Euro Bond Futures Contracts are futures contracts on federal bonds of the Federal Republic of Germany (such bonds, the "German Bonds") currently listed for trading on the Eurex. For further information on the Euro Bond Futures Contracts and the German Bonds, please refer to Section 17.10 (*The German Bond Futures Contracts*) and Section 17.11 (*The German Bonds*) below.

17.2 The Euro Bond Futures Strategy Index

The Euro Bond Futures Strategy Index is sponsored by Goldman Sachs International but is calculated by Standard & Poor's, as index calculation agent. The Euro Bond Futures Strategy Index operates in accordance with a pre-determined rolling methodology and set of formulae, and Standard & Poor's, the index calculation agent, does not exercise any discretion with respect thereto. The Euro Bond Futures Strategy Index is, therefore, not a managed index. As the index sponsor, Goldman Sachs International is not acting as an investment adviser or performing a discretionary management role with respect to the Euro Bond Futures Strategy Index and, as a result, has no fiduciary duty to any person in respect of the Euro Bond Futures Strategy Index. Goldman Sachs International may exercise discretion, however, in a limited number of exceptional circumstances, including, without limitation, where the Euro Bond Futures

Contracts are modified or, as sponsor of the Strategy, where a Euro Bond Futures Contract Valuation Price is not published or otherwise unavailable or a market disruption event affects the Euro Bond Futures Strategy Index

17.3 The Euro Bond Futures Strategy Index Starting Value

The Euro Bond Futures Strategy Index has been given a starting value of 100 as of December 31, 1991, which was the initial calculation date of the Euro Bond Futures Strategy Index.

17.4 Daily Strategy Value Calculation

The Euro Bond Futures Strategy Index is a euro denominated index and is calculated on each Eurex exchange business day. The value of the Euro Bond Futures Strategy Index on each Eurex exchange business day will be calculated as the *product* of (i) the value of the Euro Bond Futures Strategy Index as of the immediately preceding Eurex exchange business day *multiplied* by (ii) the *sum* of (x) the daily return ratio of the value of the Euro Bond Futures Contracts (calculated as described below) on such Eurex exchange business day plus (y) the overnight interest rate for the given Eurex exchange business day *multiplied* by the applicable day count fraction based on the number of days in the calculation period.

Daily Return Ratio of the Value of the Euro Bond Futures Contracts: On each Eurex exchange business day (other than during the roll period as described below), the daily return ratio of the value of Euro Bond Futures Contracts is calculated as the quotient of (a) the Euro Bond Futures Contract Valuation Price on the relevant Eurex exchange business day divided by (b) the Euro Bond Futures Contract Valuation Price on the immediately preceding Eurex exchange business day. During each roll period, the daily return ratio of the values of the Euro Bond Futures Contracts is calculated as the quotient of (a) the Euro Bond Futures Contract Valuation Price of the second nearby Euro Bond Futures Contracts on such Eurex exchange business day divided by (b) the Euro Bond Futures Contract Valuation Price of the second nearby Euro Bond Futures Contracts on the immediately preceding Eurex exchange business day, to the extent the first nearby Euro Bond Futures Contracts have been rolled over.

Euro Bond Futures Contract Valuation Price: The Euro Bond Futures Contract Valuation Price on each Eurex exchange business day is the official daily settlement price per Euro Bond Futures Contract quoted by Eurex on such Eurex exchange business day.

Overnight Interest Rate: The overnight interest rate used for purposes of calculating the value of the Euro Bond Futures Strategy Index is, in the period:

- (i) up to (and including) 20 December 2021, the overnight interest rate as published on Reuters page EUR-EONIA-OIS-COMPOUND on EONIA RSF.REC.EONIA=.NaE, which follows the ACT/360 day count fraction, as defined in the 2006 ISDA Definitions; and
- (ii) from (and including) 20 December 2021, in respect of any day, the sum of (a) the euro short-term rate (€STR) administered by the European Central Bank (or any successor administrator) in respect of such day; and (b) a spread of 8.50 basis points,

in each case, if such rate is not published or is otherwise unavailable for any Eurex exchange business day, then the last available overnight interest rate published on such page will be used as the overnight interest rate for such Eurex exchange business day.

Unavailability of Euro Bond Futures Contract Valuation Price: The index calculation agent will not, however, calculate the value of the Euro Bond Futures Strategy Index, or will calculate such value pursuant to a different methodology (as described below under "*Price of Euro Bond Futures Contracts Unavailable – Unavailable Within the Roll Period*"), as the case may be, at any time where the Euro Bond Futures Contract Valuation Price for the first nearby and/or the second nearby Euro Bond Futures Contracts, as applicable, is not published or is otherwise unavailable as further described below.

17.5 Roll Methodology

Each Euro Bond Futures Contract has a quarterly contract month for expiration (March, June, September or December). At any given time, the Euro Bond Futures Strategy Index will include the first nearby Euro Bond Futures Contracts. As the first nearby Euro Bond Futures Contracts come to expiration, they will be replaced by the second nearby Euro Bond Futures Contracts. For example, a Euro Bond Futures

Contract purchased and held in May may specify a June expiration. As time passes, the contract expiring in June is replaced by a Euro Bond Futures Contract with a September expiration during the relevant roll period. This process is referred to as "rolling".

Roll Period: Rolling will be carried out during the three Eurex exchange business days starting from, and including, the third to last Eurex exchange business day prior to the first notice date of the first nearby Euro Bond Futures Contracts to, and including, the last Eurex exchange business day prior to the first notice date of such Euro Bond Futures Contracts. Such period is referred to from time to time as the "roll period". On each Eurex exchange business day of the roll period, one third of the notional investment in the first nearby Euro Bond Futures Contracts will be rolled into the second nearby Euro Bond Futures Contracts, and the prices at which Euro Bond Futures Contracts are rolled will be based on the Euro Bond Futures Contract Valuation Prices for each of the first nearby and second nearby Euro Bond Futures Contracts. Rolling will, however, be carried out pursuant to a different methodology when at any time during the roll period the Euro Bond Futures Contract Valuation Prices for either or both of the first nearby and second nearby Euro Bond Futures Contracts are not published or are otherwise unavailable as further described below.

17.6 Price of Euro Bond Futures Contracts Unavailable

Unavailable Outside of the Roll Period: If, on any Eurex exchange business day that does not fall within the roll period, the Euro Bond Futures Contract Valuation Price for the first nearby Euro Bond Futures Contracts is not published or is otherwise unavailable, then the index calculation agent will not calculate any value for the Euro Bond Futures Strategy Index but will publish the last available value.

In such an instance, if, on the immediately following Eurex exchange business day, the Euro Bond Futures Contract Valuation Price for the first nearby Euro Bond Futures Contracts is available, the daily return ratio of the value of the Euro Bond Futures Contracts will be calculated as the *quotient* of (a) the Euro Bond Futures Contract Valuation Price on that immediately following Eurex exchange business day *divided by* (b) the last available Euro Bond Futures Contract Valuation Price; *provided, however*, that, for the avoidance of doubt, if such immediately following Eurex exchange business day is the first day of the roll period and the Euro Bond Futures Contract Valuation Price for the second nearby Euro Bond Futures Contracts is not published or is otherwise unavailable on that immediately following Eurex exchange business day, then, as further described below, the index calculation agent will not calculate any value for the Euro Bond Futures Strategy Index but will publish the last available value.

Unavailable Within the Roll Period: If the Euro Bond Futures Contract Valuation Price is not published or is otherwise unavailable for either or both of the first nearby and second nearby Euro Bond Futures Contracts at any time during the roll period, then that rolling will be carried out pursuant to the following alternative rolling methodology:

- **Case 1:** If (a) the Euro Bond Futures Contract Valuation Price is not published or is otherwise unavailable on the first Eurex exchange business day of the roll period for either or both of the first nearby and second nearby Euro Bond Futures Contracts *and* (b) the Euro Bond Futures Contract Valuation Price is available on the second Eurex exchange business day of the roll period for both the first nearby and second nearby Euro Bond Futures Contracts, then:
 - one half of the notional investment in the first nearby Euro Bond Futures Contracts will be rolled into the second nearby Euro Bond Futures Contracts on that second Eurex exchange business day of the roll period; *and*
 - if the Euro Bond Futures Contract Valuation Price is also available on the third Eurex exchange business day of the roll period for both the first nearby and second nearby Euro Bond Futures Contracts, the second half of the notional investment in the first nearby Euro Bond Futures Contracts will be rolled over into the second nearby Euro Bond Futures Contracts on that third Eurex exchange business day of the roll period; *but*
 - if the Euro Bond Futures Contract Valuation Price is not published or is otherwise unavailable on such third Eurex exchange business day of the roll period for either or both of the first nearby and second nearby Euro Bond Futures Contracts, then rolling of any remaining portion of the notional investment in the first nearby Euro Bond Futures Contracts will be carried out as set out below under Case 4.

- **Case 2:** If the Euro Bond Futures Contract Valuation Price is not published or is otherwise unavailable on both the first and second Eurex exchange business days of the roll period for either or both of the first nearby and second nearby Euro Bond Futures Contracts, then:
 - if the Euro Bond Futures Contract Valuation Price is available on the third Eurex exchange business day of the roll period for both the first nearby and second nearby Euro Bond Futures Contracts, then the entire notional investment in the first nearby Euro Bond Futures Contracts will be rolled into the second nearby Euro Bond Futures Contracts on the third Eurex exchange business day of the roll period; *but*
 - otherwise, the rolling of any remaining portion of the notional investment in the first nearby Euro Bond Futures Contracts will be carried out as set out below under Case 4.
- **Case 3:** If the Euro Bond Futures Contract Valuation Price is available on the first Eurex exchange business day of the roll period for both the first nearby and second nearby Euro Bond Futures Contracts (on which day one-third of the notional investment in the first nearby Euro Bond Futures Contracts is rolled over into the second nearby Euro Bond Futures Contracts), but the Euro Bond Futures Contract Valuation Price is not published or is otherwise unavailable on the second Eurex exchange business day of the roll period for either or both of the first nearby and second nearby Euro Bond Futures Contracts, then the remaining two-thirds of the notional investment in the first nearby Euro Bond Futures Contracts will be rolled into the second nearby Euro Bond Futures Contracts on the third Eurex exchange business day of the roll period, unless the Euro Bond Futures Contract Valuation Price is not published or is otherwise unavailable on such third Eurex exchange business day of the roll period for either or both of the first nearby and second nearby Euro Bond Futures Contracts (in which case the rolling of any remaining portion of the notional investment in the first nearby Euro Bond Futures Contracts will be carried out as set out below under Case 4).
- **Case 4:** In any situation where the Euro Bond Futures Contract Valuation Price for either or both of the first nearby and second nearby Euro Bond Futures Contracts is not published or is otherwise unavailable on the third Eurex exchange business day of the roll period (including where such price is not published or is otherwise unavailable on both the first and third Eurex exchange business days of the roll period only, on both the second and third Eurex exchange business days of the roll period only or on all three Eurex exchange business days of the roll period), then any remaining amount of the notional investment in the first nearby Euro Bond Futures Contracts will be rolled into the second nearby Euro Bond Futures Contracts on the first notice date, which is the Eurex exchange business day immediately following the third Eurex exchange business day of the roll period. On such first notice date, rolling will be effected by using the first traded prices for the first nearby Euro Bond Futures Contracts and the second nearby Euro Bond Futures Contracts, provided that if, on such first notice date, the first traded price for the first nearby Euro Bond Futures Contracts and/or the second nearby Euro Bond Futures Contracts is not published or is otherwise unavailable, then the first nearby Euro Bond Futures Contracts will be sold at the Euro Bond Futures Contract Valuation Price for such first nearby Euro Bond Futures Contracts on the last reference day (as defined below) the second nearby Euro Bond Futures Contracts will be bought at the Euro Bond Futures Contract Valuation Price for such second nearby Euro Bond Futures Contracts on the last reference day.

On each Eurex exchange business day on which rolling does not occur because the Euro Bond Futures Contract Valuation Price is not published or is otherwise unavailable for either or both of the first nearby and second nearby Euro Bond Futures Contracts (such day, a "Bond no-roll Eurex exchange business day"; for the avoidance of doubt, a Bond no-roll Eurex exchange business day may include any Eurex exchange business day of the roll period, as the case may be), the index calculation agent will not calculate any value for the Euro Bond Futures Strategy Index but will publish the last available value.

If, on any Eurex exchange business day immediately following such Bond no-roll Eurex exchange business day, the Euro Bond Futures Contracts are rolled over pursuant to the alternative methodology described above, then the index calculation agent will apply alternative calculation methods to compute the level of the Euro Bond Futures Strategy Index on such Eurex exchange business day, which can be summarized as follows:

On such Eurex exchange business day immediately following such Bond no-roll Eurex exchange business day, the level of the Euro Bond Futures Strategy Index will be computed as the *product* of:

- the value of the Euro Bond Futures Strategy Index as of the last Eurex exchange business day on which the Euro Bond Futures Contract Valuation Prices for both of the first nearby and second nearby Euro Bond Futures Contracts were available (such day, the "last reference day"); *multiplied* by
- the *sum* of:
 - (i) the *daily return ratio* reflecting either:
 - (a) if such Eurex exchange business day falls within the roll period, the weighted performance of the first nearby Euro Bond Futures Contracts and the weighted performance of the second nearby Euro Bond Futures Contracts from the last reference day to such Eurex exchange business day; or
 - (b) if such Eurex exchange business day is a first notice date of the first nearby Euro Bond Futures Contracts, the *product* of (x) the weighted performance of the first nearby Euro Bond Futures Contracts from the last reference day up to the rolling effected as of the opening of the market on such first notice date, (y) the weighted performance of the second nearby Euro Bond Futures Contracts from the last reference day up to the rolling effected as of the opening of the market on such first notice date and (z) the performance of the second nearby Euro Bond Futures Contracts, including the second nearby contracts into which any remaining portion of the first nearby Euro Bond Futures Contracts are rolled over on such first notice date, calculated based on the opening price and the official daily settlement price of the second nearby Euro Bond Futures Contracts on such first notice date (for the avoidance of doubt, if the official daily settlement price of the second nearby Euro Bond Futures Contracts is not published or is otherwise unavailable on such first notice date, then the index calculation agent will not calculate any value for the Euro Bond Futures Strategy Index but will publish the last available value),

plus

- (ii) the overnight interest rate for the calculation period.

17.7 Publication

The value of the Euro Bond Futures Strategy Index is published on the Bloomberg page *FRSIEUB* <Index> (or any successor page).

17.8 Euro Bond Futures Strategy Index Calculation Formulae

The formulae for the calculation of the Euro Bond Futures Strategy Index are presented below. Investors, however, should be aware that these formulae do not reflect the alternative rolling and calculation methodologies applied when the value of Euro Bond Futures Contracts is not published or is otherwise unavailable (as further described above).

$$TRI_t = \left(r_t + \frac{i_{t-n}}{360} \cdot n \right) TRI_{t-n};$$

{

$$r_t = \frac{cP_{1,t}}{cP_{1,t-n}}$$

when NOT in the 3-day roll period

$$r_t = \left(1 - \frac{m-1}{3} \right) \cdot \frac{cP_{1,t}}{cP_{1,t-n}} + \frac{m-1}{3} \cdot \frac{cP_{2,t}}{cP_{2,t-n}}$$

when on the m^{th} day of the roll period, $m = 1, 2, 3$

Where

t = The relevant Eurex exchange business day;

TRI_t = The value of Euro Bond Futures Strategy Index as of day t ;

i_{t-n} = Overnight interest rate as of $(t - n)$

n = The number of actual calendar days between t and the immediately preceding Eurex exchange business day $(t - n)$;

r_t = Daily price return of the value of the Euro Bond Futures Contracts on t ;

$cP_{1,t}$ = Euro Bond Futures Contract Valuation Price of the first nearby Euro Bond Futures Contracts on t ; provided that, for the avoidance of doubt, once the rolling has been effected in accordance with the above roll methodology and there is no remaining amount to be rolled, the first nearby Euro Bond Futures Contracts shall mean the Euro Bond Futures Contracts into which the notional investment has been rolled; and

$cP_{2,t}$ = Euro Bond Futures Contract Valuation Price of the second nearby Euro Bond Futures Contracts on t .

Note: All calculations are based on seven significant figures (rounded at the eighth significant figure), and the value is published up to two decimal places (rounded at the third decimal place).

17.9 Adjustments to the Euro Bond Futures Strategy Index

Investors should be aware that if the terms of the Euro Bond Futures Contracts are modified Goldman Sachs International, as sponsor of the Euro Bond Futures Strategy Index, may take such steps as it considers appropriate in response to such modification.

17.10 The German Bond Futures Contracts

The German Bond futures contracts underlying the Euro Bond Futures Strategy Index are quarterly three-month contracts to buy or sell standardized trading "units". One trading unit of German Bond futures contracts equals one federal bond issued by the Federal Republic of Germany with a par value of €100,000. The German Bond futures contract closest to expiration at any given time is known as the "first nearby" futures contract, and the German Bond futures contract that is second closest to expiration at any given time is known as the "second nearby" futures contract.

17.11 The German Bonds

The bonds on which Euro Bond Futures Contracts are based are federal bonds issued by the Federal Republic of Germany. These bonds have a term of 8.5 to 10.5 years and a coupon of 6%. Interest is paid annually.

18. Description of the Commodity Index

Capitalised terms defined in this Section 18 (*Description of the Commodity Index*) (including in Section 18.9 (*Definitions in respect of the Commodity Index*)) shall have the meaning given to them solely for the purposes of this Section 18 (*Description of the Commodity Index*) unless otherwise specified or cross-referred to.

18.1 Overview of the Commodity Index

The Goldman Sachs Commodity Focus Basket USD ER Index (*Bloomberg Code: GSISCFBU <Index>*) (referred to herein as the Commodity Index) seeks to provide synthetic exposure to the performance of a fixed and unequally weighted basket (the "**Basket**") of five underlying commodity indices (together the "**Components**" and each a "**Component**") which periodically (on a monthly basis) rebalances to assign a notional weight to each Component by reference to such fixed weights (the Component Weights, as set out in the table below).

Description of the Goldman Sachs Global Diversified Multi-Asset 5% Index

The Components in respect of the Commodity Index are set out in the table below.

The Commodity Index is an "excess return" strategy and, therefore, the value of the Commodity Index shall not include the accrual of any amount or interest in relation to any money market rate in respect of any notional cash amount.

The Commodity Index is denominated in United States Dollars ("USD").

The level of the Commodity Index is reduced by the deduction the basket rebalancing costs and the asset servicing costs. The basket rebalancing costs reflect the synthetic costs of entering into and/or unwinding any transactions relating to the Components following changes to their Units. The asset servicing costs reflect the synthetic costs of maintaining positions in, and replicating the performance of, the Components. Overall, the deduction of such synthetic costs may have the effect of reducing the performance of the Commodity Index.

c	Components	Bloomberg Page	Component Weight	Transaction Cost Rate	Servicing Cost Rate	Style
1	S&P GSCI Copper (ER) Index*	<i>SPGCICP</i> <Index>	30.00%	0.0003	0.002	A
2	S&P GSCI Aluminium (ER) Index*	<i>SPGCIAP</i> <Index>	20.00%	0.0003	0.002	A
3	S&P GSCI Nickel (ER) Index*	<i>SPGCIKP</i> <Index>	12.50%	0.0003	0.002	A
4	S&P GSCI Silver (ER) Index*	<i>SPGCSIP</i> <Index>	12.50%	0.0003	0.002	A
5	Goldman Sachs EUA USD Strategy**	<i>AGGSMOZ</i> <Index>	25.00%	0.0005	0.005	B

* Further details are available from <https://www.spglobal.com/>

** The EUA USD Strategy, as described in Section 19 (*Description of the EUA USD Strategy*) below.

18.2 Calculation of the value of the Commodity Index

The value of the Commodity Index (the "**Strategy Tradeable Level**") in respect of each Strategy Calculation Day will depend on the daily mark-to-market change in the value of the position in each Component reference by the Commodity Index as well as the notional holding in such Component at such time.

The Strategy Tradeable Level on the on the Strategy Inception Date was equal to 100.

The Strategy Tradeable Level shall be calculated by the Strategy Calculation Agent on each Strategy Calculation Day following the Strategy Inception Date as an amount in the Strategy Currency equal to the sum of:

- (i) the Strategy Tradeable Level in respect of the immediately preceding Strategy Calculation Day (" S_{t-1} "); plus
- (ii) the summation, in respect of each Component (" c "), of the sum of:
 - (a) the value of the position in respect of such Component in respect of the Tradeable Level of such Component and such Strategy Calculation Day and the Units of such Component in respect of the Strategy Calculation Day immediately preceding such Strategy Calculation Day (" $V_{t,t-1}(c)$ "); minus
 - (b) the value of the position in respect of such Component in respect of the Tradeable Level of such Component in respect of the Strategy Calculation Day immediately preceding

such Strategy Calculation Day and the Units of such Component in respect of the Strategy Calculation Day immediately preceding such Strategy Calculation Day (" $V_{t-1,t-1}(c)$ "); minus

- (iii) the Total Costs in respect of such Strategy Calculation Day (" **$Total Costs_t$** ").

Expressed as a formula:

$$S_{t-1} + \left[\sum_c (V_{t,t-1}(c) - V_{t-1,t-1}(c)) \right] - Total Costs_t$$

The Strategy Tradable Level may be negative on any Strategy Calculation Day. If the Strategy Tradable Level continues to be less than or equal to zero for a prolonged period of time, the value of the position in all Components will revert to zero and the Strategy Tradable Level will become static at or below zero.

If a Non-Tradable Event occurs on any Strategy Calculation Day, the Strategy Calculation Agent will not be able to calculate the Strategy Tradable Level in respect of such Strategy Calculation Day until a later date. Therefore, the Strategy Calculation Agent will also calculate a level (the "**Strategy Timely Level**") in respect of each Strategy Calculation Day.

The Strategy Calculation Agent will calculate the Strategy Timely Level of the Commodity Index on each Strategy Calculation Day as follows:

- (iv) if no Non-Tradable Event occurs in respect of the Commodity Index on such Strategy Calculation Day, the Strategy Timely Level shall be equal to the Strategy Tradable Level in respect of such Strategy Calculation Day; or
- (v) if a Non-Tradable Event occurs in respect of the Commodity Index on such Strategy Calculation Day, the Strategy Timely Level will be calculated using the same methodology for calculating the Strategy Tradable Level, save that the Timely Level of each Component shall be used in place of its Tradable Level.

18.3 Calculation of the value of the position in respect of a Component

The value of the position in respect of a Component and a Strategy Calculation Day is determined using the Tradeable Level in respect of such Component and a specified Strategy Calculation Day and the Units of such Component and a specified Strategy Calculation Day in accordance with the following formula:

$$L_t(c) \times U_s(c)$$

Where:

$L_t(c)$ means the Tradeable Level in respect of the relevant Component in respect of the relevant specified Strategy Calculation Day; and

$U_s(c)$ means the Units in respect of the relevant Component in respect of the relevant specified Strategy Calculation Day.

18.4 Determination of the Tradeable Level in respect of a Component

The Tradeable Level in respect of a Component and a Strategy Calculation Day, is determined by reference to the "Style" in respect of such Component.

In respect of each Component in respect of which the "Style" is "A", the Tradable Level in respect of a Strategy Calculation Day will be determined as follows:

- (i) if no Non-Tradable Event occurs in respect of any relevant contract expiration included in such Component on such Strategy Calculation Day, the Tradable Level of such Component will be equal to the Timely Level on such Strategy Calculation Day; or

- (ii) if a Non-Tradable Event occurs in respect of any relevant contract expiration (the "**Affected Contract Expiration**") included in such Component on such Strategy Calculation Day, the Tradable Level of such Component will be calculated on the First Tradable Date (broadly speaking being the first day on or following such Strategy Calculation Day on which the components of the Component are tradeable and not subject to a disruption) in accordance with the formula for, and method of, calculating such Component, using the Tradable Contract Price (broadly speaking, the reference price of the Affected Contract Expiration on the First Tradeable Day unless a Non-Tradeable Event occurs in which case it shall be as determined by the Strategy Sponsor) (instead of the relevant daily settlement price) for the Affected Contract Expiration in respect of such Strategy Calculation Day, and the Strategy Sponsor may make such adjustment(s) to the formula for, and method of, calculating such Component as it determines in a commercially reasonable manner to be appropriate in order to effect such calculation.

In respect of each Component in respect of which the "Style" is "B", the Tradable Level in respect of a Strategy Calculation Day will be calculated in accordance with the definition of "Strategy Tradable Level" specified in the relevant rules in respect of such Component, provided that if such Tradable Level would be determined on a day which would fall after the First Tradable Date (broadly speaking being the first day on or following such Strategy Calculation Day on which the components of the Component are tradeable and not subject to a disruption), the Tradable Level of such Component shall be determined by the Strategy Sponsor on such First Tradable Date acting in a commercially reasonable manner.

18.5 Calculation of the Units in respect of a Component

The Units of a Component and a specified Strategy Calculation Day shall be an amount calculated by the Strategy Calculation Agent in accordance with the following formula in respect of the Rebalancing Date "r" falling on or prior to such Strategy Calculation Day:

$$ICW_r(c) \times \frac{S_{RefDate(r)}}{LREFDate(r)(c)}$$

Where:

$ICW_r(c)$ means the Component Weight in respect of the relevant Component;

$S_{RefDate(r)}$ means the Strategy Timely Level in respect of the Reference Date in respect of the relevant Rebalancing Date or if such Strategy Timely Level is negative, then zero; and

$LREFDate(r)(c)$ means the Timely Level in respect of such Component and the Reference Date in respect of the relevant Rebalancing Date.

18.6 Calculation of the Total Costs

The Total Costs in respect of a Strategy Calculation Day shall be equal to an amount determined by the Strategy Calculation Agent in accordance with the following formula:

$$TC_t + \left[\sum_c SC_t(c) \right]$$

Where:

$SC_t(c)$ means, in respect of a Component, the Servicing Costs in respect of the relevant Component and the relevant Strategy Calculation Day; and

TC_t means, in respect of a Strategy Calculation Day, the aggregate of the transaction costs in respect of each Transaction Cost Class (being each class of Components with a common Transaction Cost Rate), as determined by the Strategy Calculation Agent in accordance with the following formula:

$$\sum_{cc} TC_t(cc)$$

Where:

cc means each Transaction Cost Class; and

$TC_t(cc)$ means the transaction costs in respect of the relevant Transaction Cost Class and the relevant Strategy Calculation Day, being an amount determined by the Strategy Calculation Agent in accordance with the following formula:

$$TCR_t(cc) \times Abs \left(\sum_c TCWM_t(c, cc) \times U_t(c) - U_{t-1}(c) \right)$$

Where:

$TCR_t(cc)$ means the Transaction Cost Rate in respect of the relevant Transaction Cost Class;

$Abs(x)$ means the absolute value function evaluated for the number x ;

$TCWM_t(c, cc)$ means, in respect of a Component and a Strategy Calculation Day, the Tradeable Level in respect of such Component and the relevant Strategy Calculation Day;

$U_t(c)$ means the Units of the relevant Component in respect of the relevant Strategy Calculation Day; and

$U_{t-1}(c)$ means the Units of the relevant Component in respect of the Strategy Calculation Day falling immediately prior to the relevant Strategy Calculation Day.

18.7 Calculation of the Servicing Costs in respect of a Component

The Servicing Costs in respect of a Component and a Strategy Calculation Day shall be equal to an amount determined by the Strategy Calculation Agent in accordance with the following formula:

$$Abs(L_{t-1}(c) \times U_{t-1}(c)) \times SCR_{t-1}(c) \times \frac{days}{365}$$

Where:

$Abs(x)$ means the absolute value function evaluated for the number x ;

$L_{t-1}(c)$ means the Tradeable Level of the relevant Component and the Strategy Calculation Day immediately preceding the relevant Strategy Calculation Day;

$U_{t-1}(c)$ means the Units of the relevant Component in respect of the Strategy Calculation Day falling immediately prior to the relevant Strategy Calculation Day;

$SCR_{t-1}(c)$ means the Servicing Cost Rate in respect of the relevant Component; and

days means the number of calendar days falling in the period commencing on (and including) the Strategy Calculation Date immediately preceding the relevant Strategy Calculation Day and ending on (but excluding) the relevant the relevant Strategy Calculation Day.

18.8 Termination

The Strategy Sponsor may, in its sole and absolute discretion, at any time, for any reason (including without limitation, because it is no longer possible or practicable to calculate the value of the Commodity Index) and without notice, terminate the calculation and publication of the Commodity Index.

18.9 Definitions in respect of the Commodity Index

"GS Strategy" means proprietary strategies which Goldman Sachs International or its successor(s) may create from time to time.

"Instrument" means a futures contract which is used to calculate the level of a Component.

"Market Disruption Event" means, in respect of a Strategy Calculation Day and:

- (i) a Component any one of the following events, as determined by the Strategy Sponsor:
 - (a) each such event as determined in accordance with the rules of such Component; or
 - (b) the occurrence of a Market Disruption Event (or other analogous event) in respect of any Instrument or other asset, instrument or rate (including, but not limited to, an option, exchange rate or interest rate) included in such Component or used in the calculation of the level of, such Component; or
- (ii) an Instrument that is not a Component, the occurrence of any one of the following events, as determined by the Strategy Sponsor:
 - (c) the daily reference price of the relevant contract expiration of such Instrument for such Strategy Calculation Day remains at a "limit price" which means that the price of such Instrument on such day has increased or decreased from the previous day's settlement price for such Instrument by the maximum amount permitted under the applicable rules of the relevant trading facility; or
 - (d) there is a failure by the relevant trading facility or other price source to announce or publish the daily reference price of the relevant contract expiration of such Instrument for such Strategy Calculation Day, provided that such Strategy Calculation Day is also an exchange business day in respect of such relevant contract expiration; or
 - (e) trading the relevant contract expiration of such Instrument on the relevant trading facility is suspended or interrupted subsequent to the opening of trading and trading in such contract expiration does not recommence at least ten (10) minutes prior to the regular scheduled close of trading in such contract expiration, or in the event trading in such contract expiration does recommence at least ten (10) minutes prior to the regular scheduled close of trading, trading does not continue until the regular scheduled close of trading in such contract expiration.

"Non-Tradeable Event" means, in respect of a Strategy Calculation Day and:

- (i) a Component, the occurrence of any one of the following events, as determined by the Strategy Sponsor:
 - (f) such Strategy Calculation Day is not a Trading Day for such Component; or
 - (g) a Market Disruption Event is occurring or existing in respect of such Component on such Strategy Calculation Day;
- (ii) an Instrument that is not a Component,
 - (h) such Strategy Calculation Day is not an exchange business day for such Instrument; or
 - (i) a Market Disruption Event is occurring or existing in respect of such the relevant Instrument on such Strategy Calculation Day; or
 - (j) the Strategy Sponsor, in its reasonable judgement, (I) determines that such Instrument has ceased to be a liquid, actively traded Instrument that is generally available for trading, or that such Instrument has been the subject of a Market Disruption Event for at least five consecutive Strategy Calculation Days, or (II) anticipates on the basis of publicly available information that such Instrument or any Instrument valuation data, notwithstanding that it is available for trading, will cease to be liquid and actively traded or will be terminated or delisted by the relevant price source
 - (k) is occurring or existing in respect of the relevant contract expiration of such Instrument on such Strategy Calculation Day.
- (iii) a GS Strategy, the occurrence of a Non-Tradable Event in respect of any Component included in such GS Strategy.

"Rebalancing Date" means, in respect of a Reference Date, the Trading Day immediately following such Reference Date.

"Reference Date" means each of the Strategy Inception Date and, thereafter, the second to last Trading Day of each month.

"Strategy Calculation Day" means any day on which the offices of Goldman Sachs & Co. LLC in New York are open for business.

"Strategy Currency" means USD.

"Strategy Inception Date" means 10 December 2007.

"Strategy Trading Day" means each "Trading Day" in respect of Component c=5.

"Timely Level" means, in respect of a Component and a Strategy Calculation Day, if the "Style" in respect of such Component is:

- (i) **"A"** means the "Timely Level" of a Component on any day will be determined as the official closing level of such Component as published on the relevant Bloomberg page on such day, subject to adjustment in accordance with methodology of the Commodity Index; and
- (ii) **"B"** means the "Timely Level" of a Component on any day will be calculated in accordance with the definition of "Strategy Timely Level" specified in the relevant rules in respect of such Component.

in each case, provided that if such day is not a day on which the level of such Component is scheduled to be published, then the Timely Level of such Component for such day shall be deemed to be the Timely Level of such Component on the immediately preceding day on which such Component is scheduled to be published.

"Trading Day" means, in respect of a Component, that:

- (i) not a GS Strategy (being c = 1, 2, 3 and 4), a day which is (I) an exchange business day for any Instruments included in or referenced by such Component, (II) a day on which any other asset, instrument or rate (including, but not limited to, an option, exchange rate or interest rate) included in such Component or used in the calculation of the level of such Component, is scheduled to be traded or published, as applicable, and (III) a day on which such Component is scheduled to be published or traded (as applicable); and
- (ii) a GS Strategy (being c = 5), each day which is (a) a Trading Day for all the "Components" included in such GS Strategy, (b) a currency business day for the "Currency Conversion Component" (as defined in Section 17 (*Description of the EUA USD Strategy*) below) in respect of such Component and (c) a Strategy Calculation Day for the GS Strategy.

18.10 Disruption Events, Adjustment Events, Change in Methodology and Corrections

In respect of the Commodity Index, please see Section 22.2 (*Disruption Events - In respect of each of the Commodity Index and the EUA USD Strategy only*), Section 23 (*Corrections*) and Section 24 (*Change in Methodology*).

19. Description of the EUA USD Strategy

Capitalised terms defined in this Section 19 (*Description of the EUA USD Strategy*) (including in Section 19.7 (*Definitions in respect of the EUA USD Strategy*)) shall have the meaning given to them solely for the purposes of this Section 19 (*Description of the EUA USD Strategy*) unless otherwise specified or cross-referred to.

19.1 Overview of the EUA USD Strategy

The Goldman Sachs EUA USD Strategy (*Bloomberg Code: AGGSMOZ <Index>*) (referred to herein as the EUA USD Strategy) seeks to provide synthetic exposure to the EUA EUR Strategy (the

"**Component**") hedged into the currency of the EUA USD Strategy, being United States Dollars ("**USD**").

c	Component	Bloomberg Page	Component Weight	Style
1	Enhanced Strategy MOZE on S&P GSCI Carbon Emission Allowances EUA (EUR) Index*	AGGSMOZE <Index>	100%	A

* As described in Section 20 (*Description of the EUA EUR Strategy*) below.

19.2 Calculation of the value of the EUA USD Strategy

The value of the EUA USD Strategy (the "**Strategy Tradeable Level**") in respect of each Strategy Calculation Day will depend on the daily mark-to-market change in the value of the position in the Component referenced by the EUA USD Strategy, the change in the foreign currency exchange rate between EUR and USD and the notional holding in such Component at such time.

The Strategy Tradeable Level on the on the Strategy Inception Date was equal to 100.

The Strategy Tradeable Level shall be calculated by the Strategy Calculation Agent on each Strategy Calculation Day following the Strategy Inception Date as an amount in the Strategy Currency equal to the sum of:

- (i) the Strategy Tradeable Level in respect of the immediately preceding Strategy Calculation Day (" S_{t-1} "); plus
- (ii) the product of:
 - (a) the FX Rate Tradeable Level in respect of such Strategy Calculation Day (" $FX_t(c)$ "); multiplied by
 - (b)
 - (1) the value of the position in respect of the Component in respect of the Tradeable Level of the Component and such Strategy Calculation Day and the Units of the Component in respect of the Strategy Calculation Day immediately preceding such Strategy Calculation Day (" $V_{t,t-1}(c)$ "); minus
 - (2) the value of the position in respect of such Component in respect of the Tradeable Level of such Component in respect of the Strategy Calculation Day immediately preceding such Strategy Calculation Day and the Units of such Component in respect of the Strategy Calculation Day immediately preceding such Strategy Calculation Day (" $V_{t-1,t-1}(c)$ ").

Expressed as a formula:

$$S_{t-1} + \left[\sum_c \left(FX_t(c) \times (V_{t,t-1}(c) - V_{t-1,t-1}(c)) \right) \right]$$

The Strategy Tradable Level may be negative on any Strategy Calculation Day. If the Strategy Tradable Level continues to be less than or equal to zero for a prolonged period of time, the value of the position in the Component will revert to zero and the Strategy Tradable Level will become static at or below zero.

If a Non-Tradable Event occurs on any Strategy Calculation Day, the Strategy Calculation Agent will not be able to calculate the Strategy Tradable Level in respect of such Strategy Calculation Day until a later date. Therefore, the Strategy Calculation Agent will also calculate a level (the "**Strategy Timely Level**") in respect of each Strategy Calculation Day.

The Strategy Calculation Agent will calculate the Strategy Timely Level of the EUA USD Strategy on each Strategy Calculation Day as follows:

- (iii) if no Non-Tradable Event occurs in respect of the EUA USD Strategy on such Strategy Calculation Day, the Strategy Timely Level shall be equal to the Strategy Tradable Level in respect of such Strategy Calculation Day; or
- (iv) if a Non-Tradable Event occurs in respect of the EUA USD Strategy on such Strategy Calculation Day, the Strategy Timely Level will be calculated using the same methodology for calculating the Strategy Tradable Level, save that the Timely Level of each Component shall be used in place of its Tradable Level.

19.3 Calculation of the value of the position in respect of the Component

The value of the position in respect of the Component and a Strategy Calculation Day is determined using the Tradeable Level in respect of such Component and a specified Strategy Calculation Day and the Units of the Component and a specified Strategy Calculation Day in accordance with the following formula:

$$L_t(c) \times U_s(c)$$

Where:

$L_t(c)$ means the Tradeable Level in respect of the Component in respect of the relevant specified Strategy Calculation Day; and

$U_s(c)$ means the Units in respect of the Component in respect of the relevant specified Strategy Calculation Day.

19.4 Determination of the Tradeable Level in respect of the Component

The Tradable Level in respect of the Component and a Strategy Calculation Day will be determined as follows:

- (i) if no Non-Tradable Event occurs in respect of the Component on such Strategy Calculation Day, the Tradable Level of the Component will be equal to the Timely Level on such Strategy Calculation Day; or
- (ii) if a Non-Tradable Event occurs in respect of any relevant contract expiration (the "**Affected Contract Expiration**") included in the Component on such Strategy Calculation Day, the Tradable Level of the Component will be calculated on the First Tradable Date (broadly speaking being the first day on or following such Strategy Calculation Day on which the components of the Component are tradeable and not subject to a disruption) in accordance with the formula for, and method of, calculating the Component, using the Tradable Contract Price (broadly speaking, the reference price of the Affected Contract Expiration on the First Tradeable Day unless a Non-Tradeable Event occurs in which case it shall be as determined by the Strategy Sponsor) (instead of the relevant daily settlement price) for the Affected Contract Expiration in respect of such Strategy Calculation Day, and the Strategy Sponsor may make such adjustment(s) to the formula for, and method of, calculating the Component as it determines in a commercially reasonable manner to be appropriate in order to effect such calculation.

19.5 Calculation of the Units in respect of a Component

The Units of the Component and a specified Strategy Calculation Day shall be an amount calculated by the Strategy Calculation Agent in accordance with the following formula in respect of the Rebalancing Date "r" falling on or prior to such Strategy Calculation Day:

$$ICW_r(c) \times \frac{S_{RefDate(r)}}{L_{RefDate(r)}(c) \times FX_{RefDate(r)}(c)}$$

Where:

$ICW_r(c)$ means the Component Weight in respect of the Component;

$FX_{RefDate(r)}(c)$ means the FX Rate Tradeable Level in respect of the Reference Date in respect of the relevant Rebalancing Date;

$S_{RefDate(r)}$ means the Strategy Timely Level in respect of the Reference Date in respect of the relevant Rebalancing Date or if such Strategy Timely Level is negative, then zero; and

$LRefDate(r)(c)$ means the Timely Level in respect of such Component and the Reference Date in respect of the relevant Rebalancing Date.

19.6 Termination

The Strategy Sponsor may, in its sole and absolute discretion, at any time, for any reason (including without limitation, because it is no longer possible or practicable to calculate the value of the EUA USD Strategy) and without notice, terminate the calculation and publication of the EUA USD Strategy.

19.7 Definitions in respect of the EUA USD Strategy

"Currency Conversion Component" means in respect of EUR and USD, a rate expressed as the number of units of the EUR per unit of USD.

"Exchange Rate Disruption Event" means, broadly speaking and as more fully described in the methodology in respect of the EUA USD Strategy as published or made available by the Strategy Sponsor, in respect of a Strategy Calculation Day, in respect of the Currency Conversion Component, any one of the following events, as determined by the Strategy Sponsor:

- (i) the relevant Spot Exchange Rate has ceased to be published by the relevant Spot Exchange Rate Price Source, and has not been replaced by a successor; or
- (ii) EUR or USD splits into dual or multiple currencies; or
- (iii) an event has occurred in, or affecting, any jurisdiction whose currency is either EUR or USD, as the case may be, that generally makes it impossible to convert USD into EUR or, as the case may be, EUR into USD, through customary legal channels; or
- (iv) it is or becomes impossible or not reasonably practicable for the Strategy Sponsor to obtain a currency exchange rate for such Currency Conversion Component from the relevant Spot Exchange Rate Price Source or any other source, or to obtain a firm quote for a currency exchange rate for such Currency Conversion Component; or
- (v) (a) an event has occurred in, or affecting, any jurisdiction whose currency is EUR that generally makes it impossible to deliver (I) the USD from accounts inside such jurisdiction to accounts outside such jurisdiction or (II) EUR between accounts inside such jurisdiction or to a party that is a non-resident of such jurisdiction, or (b) an event has occurred in, or affecting, any jurisdiction whose currency is USD that generally makes it impossible to deliver (I) EUR from accounts inside such jurisdiction to accounts outside such jurisdiction or (II) USD between accounts inside such jurisdiction or to a party that is a non-resident of such jurisdiction; or
- (vi) a default, event of default, or other similar condition or event (however described) with respect to any security or indebtedness for borrowed money of, or guaranteed by, any applicable governmental authority, including, but not limited to, (a) the failure of timely payment in full of any principal, interest, or other amounts due (without giving effect to any applicable grace periods) in respect of any such security, indebtedness, or guarantee, (b) a declared moratorium, standstill, waiver, deferral, repudiation, challenge of the validity, or rescheduling of any principal, interest, or other amounts due in respect of any such security, indebtedness, or guarantee, or (c) the amendment or modification of the terms and conditions of payment of any principal, interest, or other amounts due in respect of any such security, indebtedness, or guarantee without the consent of all holders of such obligation. For these purposes, the determination of the existence or occurrence of any default, event of default, or other similar condition or event shall be made without regard to any lack or alleged lack of authority or capacity of such governmental authority to issue or enter into such security, indebtedness, or guarantee; or

- (vii) any expropriation, confiscation, requisition, nationalisation or other action by a relevant governmental authority which deprives any market participant of all or substantially all of its assets in any jurisdiction whose currency is USD or EUR; or
- (viii) the occurrence or existence at any time, of any event or circumstance that disrupts or impairs (a) the ability of market participants in general to effect transactions in relation to EUR or USD in a notional size required in relation to any product or transaction linked to the EUA USD Strategy, (b) impairs the liquidity of transactions in relation to EUR or USD, (c) the ability to obtain market values of, EUR or USD, or (d) the ability of any market participant, after using commercially reasonable efforts, to acquire, establish, re-establish, substitute, maintain, unwind, or dispose of any hedge position relating to the EUA USD Strategy or any transaction linked to the EUA USD Strategy or to realise, recover or remit the proceeds of any such transaction; or
- (i) EUR or USD ceases to exist and is replaced by another currency.

"FX Rate Timely Level" means, in respect of any day, the Spot Exchange Rate in respect of such day.

"FX Rate Tradeable Level" means, in respect of any Strategy Calculation Day, the FX Rate Timely Level in respect of such day unless a Non-Tradable Event is occurring in respect of the Currency Conversion Component or the Component on such Strategy Calculation Day, in which case the FX Tradeable Level shall be the Spot Exchange Rate on the day (the "Resolution Day") that is the First Tradable Date (broadly speaking being the first day on or following such Strategy Calculation Day on which the components of the Currency Conversion Component are tradeable and not subject to a disruption) in respect of such Currency Conversion Component and the Strategy Calculation Day that falls on the First Tradable Date in respect of the Component and such Strategy Calculation Day, provided that if a Non-Tradable Event in respect of such Currency Conversion Component exists on the Resolution Day, the FX Rate Tradeable Level of such Currency Conversion Component shall be determined by the Strategy Sponsor on such First Tradable Date acting in a commercially reasonable manner

"Instrument" means a futures contract which is used to calculate the level of a Component.

"Non-Tradeable Event" means, in respect of a Strategy Calculation Day and:

- (i) a Component, the occurrence of any one of the following events, as determined by the Strategy Sponsor:
 - (a) such Strategy Calculation Day is not a Trading Day for such Component; or
 - (b) a Market Disruption Event is occurring or existing in respect of such Component on such Strategy Calculation Day;
- (ii) an Instrument that is not a Component,
 - (c) such Strategy Calculation Day is not an exchange business day for such Instrument; or
 - (d) a Market Disruption Event is occurring or existing in respect of such the relevant Instrument on such Strategy Calculation Day; or
 - (e) the Strategy Sponsor, in its reasonable judgement, (I) determines that such Instrument has ceased to be a liquid, actively traded Instrument that is generally available for trading, or that such Instrument has been the subject of a Market Disruption Event for at least five consecutive Strategy Calculation Days, or (II) anticipates on the basis of publicly available information that such Instrument or any Instrument valuation data, notwithstanding that it is available for trading, will cease to be liquid and actively traded or will be terminated or delisted by the relevant price source; or
 - (f) is occurring or existing in respect of any relevant contract expiration of such Instrument on such Strategy Calculation Day; or
- (iii) the Currency Conversion Component, the occurrence of any one of the following events, as determined by the Strategy Sponsor:

- (g) such Strategy Calculation Day is not a day on which the Spot Exchange Rate is scheduled to be published on the relevant Spot Exchange Rate Price Source; or
- (h) a Market Disruption Event is occurring or existing in respect of the relevant Currency Conversion Component on such Strategy Calculation Day; or
- (iv) a Component that is a GS Strategy, the occurrence of a Non-Tradable Event in respect of any "Component" included in such GS Strategy.

"Market Disruption Event" means, in respect of:

- (i) in respect of a Component, any one of the following events, as determined by the Strategy Sponsor:
 - (a) each event determined as such in accordance with the rules of such Component; or
 - (b) the occurrence of a Market Disruption Event (or other analogous event) in respect of any Instrument or other asset, instrument or rate (including, but not limited to, an option, exchange rate or interest rate) included in such Component or used in the calculation of the level of, such Component; or
- (ii) the Currency Conversion Component and a Strategy Calculation Day, the occurrence of any one of the following events, as determined by the Strategy Sponsor:
 - (c) an Exchange Rate Disruption Event in respect of such Currency Conversion Component; or
 - (d) the occurrence or existence, on such Strategy Calculation Day at any time, of a suspension of, or limitation imposed on, trading on the London interbank market or the interbank market of the city or cities determined by the Strategy Sponsor to be the principal financial centre(s) for EUR or USD; and
- (iii) an Instrument that is not a Component and a Strategy Calculation Day, the occurrence of any one of the following events, as determined by the Strategy Sponsor:
 - (e) the daily reference price of the relevant contract expiration of such Instrument for such Strategy Calculation Day remains at a "limit price" which means that the price of such Instrument on such day has increased or decreased from the previous day's settlement price for such Instrument by the maximum amount permitted under the applicable rules of the relevant trading facility; or
 - (f) there is a failure by the relevant trading facility or other price source to announce or publish the daily reference price of the relevant contract expiration of such Instrument for such Strategy Calculation Day, provided that such Strategy Calculation Day is also an exchange business day in respect of such relevant contract expiration; or
 - (g) trading the relevant contract expiration of such Instrument on the relevant trading facility is suspended or interrupted subsequent to the opening of trading and trading in such contract expiration does not recommence at least ten (10) minutes prior to the regular scheduled close of trading in such contract expiration, or in the event trading in such contract expiration does recommence at least ten (10) minutes prior to the regular scheduled close of trading, trading does not continue until the regular scheduled close of trading in such contract expiration.

"Reference Date" means each Strategy Calculation Day.

"Rebalancing Date" means, in respect of a Reference Date, the Strategy Calculation Day immediately following such Reference Date.

"Spot Exchange Rate" means, in respect of any day, the 4 p.m. London closing spot mid rate for converting one unit of USD into EUR for such day as published by the Spot Exchange Rate Price Source. If such day is not a day on which such spot exchange rate is scheduled to be published on the relevant

Spot Exchange Rate Price Source, or such spot exchange rate is otherwise unavailable for any other reason, the Spot Exchange Rate shall be deemed to be the relevant spot exchange rate as of the first preceding day on which such spot exchange rate was scheduled to be published and the relevant Spot Exchange Rate Price Source published such spot exchange rate.

"**Spot Exchange Rate Price Source**" means WM Company or any successor company.

"**Strategy Currency**" means USD.

"**Strategy Inception Date**" means 10 December 2007.

"**Timely Level**" means, in respect of the Component and a Strategy Calculation Day, the official closing level of the Component as published on the relevant Bloomberg page on such day, subject to adjustment in accordance with methodology of the EUA USD Strategy, provided that if such day is not a day on which the level of the Component is scheduled to be published, then the Timely Level of the Component for such day shall be deemed to be the Timely Level of the Component on the immediately preceding day on which the Component is scheduled to be published.

19.8 Disruption Events, Adjustment Events, Change in Methodology and Corrections

In respect of the EUA USD Strategy, please see Section 22.2 (*Disruption Events - In respect of each of the Commodity Index and the EUA USD Strategy only*), Section 23 (*Corrections*) and Section 24 (*Change in Methodology*).

20. Description of the EUA EUR Strategy

Capitalised terms defined in this Section 20 (*Description of the EUA EUR Strategy*) shall have the meaning given to them solely for the purposes of this Section 20 (*Description of the EUA USD Strategy*) unless otherwise specified or cross-referred to. Terms used but not defined herein shall have the meaning given to them in the S&P GSCI® Index Methodology and should be read in conjunction with such methodology (further details are available from <https://www.spglobal.com/>).

20.1 Overview of the EUA EUR Strategy

The Goldman Sachs EUA EUR Strategy (*Bloomberg Code: AGGSMOZE <Index>*) (referred to herein as the EUA EUR Strategy) reflects the returns that are potentially available through an investment in the same commodity futures contract that is included in the S&P GSCI Carbon Emission Allowances EUA (EUR) Index (the "**Underlying S&P Index**") and is calculated in accordance with the methodology for calculating Underlying S&P Index, subject to certain modifications to the methodology for calculating the relevant Underlying S&P Index as further described in Section 20.3 (*The Adjustment of Roll Contract Expiration*) and Section 20.4 (*The Strategy Roll Period*) below.

The EUA EUR Strategy is calculated and published by the Strategy Sponsor and displayed on the relevant Bloomberg ticker. The Strategy Currency is EUR.

The EUA EUR Strategy is calculated using an "excess return" methodology and therefore reflects the returns that are potentially available through an investment in the commodity futures contract included in the Underlying S&P Index. The use of the term "excess return" refers to the changing value of the commodity futures contract included in the relevant Underlying S&P Index and the yield that results from the "rolling" forward of the hypothetical positions in such commodity futures contract as it approaches delivery (i.e., (i) selling near-dated commodity futures contracts (or the commodity futures contracts that are nearing expiration) before they expire, and (ii) buying longer-dated futures contracts (or the commodity futures contracts that have an expiration date further in the future)), and not to any expectations of return.

The Strategy Inception Date is 10 December 2007.

The Underlying S&P Index is calculated and published by S&P Dow Jones Indices LLC (the "**S&P Index Sponsor**").

Description of the Goldman Sachs Global Diversified Multi-Asset 5% Index

c	Component	Underlying S&P Index	Bloomberg Page
1	European Union Carbon Emission Allowances (EUA) Futures	S&P GSCI Carbon Emission Allowances EUA (EUR) Index *	<i>SPGSCEE <Index></i>

* Further details are available from <https://www.spglobal.com/>.

20.2 Calculation of the level of the EUA EUR Strategy

The EUA EUR Strategy is calculated on a similar, but not identical, basis to the Underlying S&P Index. However, the key difference between the EUA EUR Strategy and the Underlying S&P Index is that the EUA EUR Strategy applies different rules for the "rolling" forward of the hypothetical positions in the relevant commodity futures contracts to those used by the relevant Underlying S&P Index, as described in more detail in Section 20.3 (*The Adjustment of Roll Contract Expiration*) and Section 20.4 (*The Strategy Roll Period*) below.

20.3 The Adjustment of Roll Contract Expiration

In respect of the Designated Contract of each Strategy, the definition of the term "Roll Contract Expiration" in respect to such Designated Contract in the S&P GSCI® Index Methodology is modified so that, with respect to the Designated Contract to be rolled in the EUA EUR Strategy on any S&P GSCI Business Day, the Roll Contract Expiration shall be the Designated Contract Expiration following the Contract Expiration identified according to the schedule for each of the 12 months starting with January shall be "Z Z Z Z Z Z Z Z Z Z Z Z" (where "Z" denotes the December contract expiration falling in the relevant calendar year). This modified definition of the term Roll Contract Expiration will result in the relevant Designated Contract of the EUA EUR Strategy being rolled in a manner other than as set out in the S&P GSCI® Index Methodology.

20.4 The Strategy Roll Period

The EUA EUR Strategy applies a different roll period to the "Roll Period" used by the S&P GSCI® Index Methodology. The Roll Period applicable to the S&P GSCI® Index Methodology begins on the fifth S&P GSCI Business Day of each calendar month and ends on the ninth S&P GSCI Business Day of such calendar month, subject to adjustment in accordance with the S&P GSCI® Index Methodology. In contrast, the roll period applicable to the EUA EUR Strategy (the "Strategy Roll Period") begins on the Roll Start Date and ends on the Roll End Date, as defined below.

"**Last Roll Date**" means the first S&P GSCI Business Day that satisfies the two conditions below:

- (a) falls on or after the fifth S&P GSCI Business Day in the month immediately preceding the month in which the roll would take place for the Underlying S&P Index; and
- (b) none of the circumstances described in Section 20.6 (*Adjustment of the Strategy Roll Period*) below exist.

"**Roll End Date**" means the fifth S&P GSCI Business Day in the month in which the roll would take place for the Underlying S&P Index.

"**Roll Start Date**" means the later of:

- (a) the seventh S&P GSCI Business Day in the month immediately preceding the month in which the roll would take place for the Underlying S&P Index; or
- (b) the first S&P GSCI Business Day that falls immediately after the Last Roll Date.

20.5 Adjustment events in respect of the roll period

The Strategy Sponsor may make certain adjustments to the EUA EUR Strategy that it determines to be necessary or appropriate (or may cease to calculate the EUA EUR Strategy) including (i) if the contract reference price on a day for the relevant commodity futures contract is a maximum or minimum price

for such commodity futures contract on such day, (ii) if the published Daily Contract Reference Price (as defined in the S&P GSCI® Index Methodology) reflects a manifest error, (iii) if no contract reference price is published by 4:00 p.m., Eastern Standard Time or (iv) trading in the relevant commodity futures contract is terminated prior to its scheduled closing time.

20.6 Adjustment of the Strategy Roll Period

If on any day during a Strategy Roll Period (that would otherwise be a S&P GSCI Business Day), any of the following circumstances exist with respect to a Designated Contract included in the EUA EUR Strategy, the portion of the roll in respect of such Designated Contract that would otherwise have taken place on that day is deferred until the next Contract Business Day (provided that such day is also an S&P GSCI Business Day) on which such circumstances do not exist:

- (c) if the S&P Index Sponsor announces or has announced after the start of the current Strategy Roll Period that such day is no longer an S&P GSCI Business Day;
- (d) if such S&P GSCI Business Day is not a Contract Business Day with respect to the First Nearby Contract Expiration or the Roll Contract Expiration in respect of such Strategy Roll Period;
- (e) the applicable Daily Contract Reference Price of the First Nearby Contract Expiration or the Roll Contract Expiration in respect of such Strategy Roll Period on such S&P GSCI Business Day is a Limit Price (i.e., the maximum or minimum price for such Contract Expiration) on such day, as determined by the rules or policies of the relevant Trading Facility;
- (f) the Daily Contract Reference Price published by the relevant Trading Facility for the First Nearby Contract Expiration or the Roll Contract Expiration in respect of such Strategy Roll Period reflects manifest error and such error is not corrected, or such price is not published by 4:00 p.m., Eastern Standard Time. In that event, the S&P Strategy Sponsor may, but is not required to, determine a Daily Contract Reference Price and complete the relevant portion of the roll based on such price; provided, that, if the relevant Trading Facility publishes a price before the opening of trading on the next day, the S&P Strategy Sponsor will revise the portion of the roll accordingly; or
- (g) trading in the First Nearby Contract Expiration or the Roll Contract Expiration in respect of such Strategy Roll Period for such S&P GSCI Business Day is terminated prior to its scheduled closing time, and trading in such First Nearby Contract Expiration or Roll Contract Expiration does not resume at least ten minutes prior to, and continue until, the scheduled closing time (or the rescheduled closing time if such closing time was rescheduled as a result of the termination).

As an example, assuming that the Strategy Roll Period is scheduled to be twenty S&P GSCI Business Days, if any of the enumerated circumstances above exist in respect of a Designated Contract included in the EUA EUR Strategy on the first S&P GSCI Business Day of such Strategy Roll Period, then no portion of the roll in respect of such Designated Contract will be performed on such day and 10 per cent. of the roll in respect of such Designated Contract will be implemented on the next S&P GSCI Business Day. If such circumstances also exist in respect of the same Designated Contract on the second S&P GSCI Business Day of such Strategy Roll Period, then 15 per cent. of the roll in respect of such Designated Contract will be performed on the third S&P GSCI Business Day, and so forth. If such circumstances exist in respect of the same Designated Contract throughout all twenty S&P GSCI Business Days initially designated as such Strategy Roll Period, then the entire roll in respect of the same Designated Contract will be performed on the next succeeding S&P GSCI Business Day on which none of these circumstances exist in respect of such Designated Contract. This procedure for adjusting the Strategy Roll Period is also applied by the S&P Index Sponsor to the Underlying S&P Index.

20.7 Disruption Events, Adjustment Events, Change in Methodology and Corrections

In respect of the EUA EUR Strategy, please see Section 22.3 (*Disruption Events - In respect of the EUA EUR Strategy only*), Section 23 (*Corrections*) and Section 24 (*Change in Methodology*).

20.8 Termination

The Strategy Sponsor may, in its sole and absolute discretion, at any time, for any reason (including without limitation, because it is no longer possible or practicable to calculate the value of the EUA EUR Strategy) and with notice, terminate the calculation and publication of the EUA EUR Strategy.

21. Description of the Money Market Indices

Capitalised terms defined in this Section 21 (*Description of the Money Market Indices*) (including in Section 21.5 (*Definitions in respect of the Money Market Indices*)) shall have the meaning given to them solely for the purposes of this Section 21 (*Description of the Money Market Indices*) unless otherwise specified or cross-referred to.

21.1 Overview of each Money Market Index

The EUR Goldman Sachs Overnight Money Market Index (*Bloomberg Code: GSMMEUR <Index>*) (referred to herein as the EUR Money Market Index) intends to express the notional returns accruing to a hypothetical investor from an investment in a notional overnight money account denominated in the Strategy Currency of EUR that accrues interest at a rate equal to, in the period:

- (i) up to (and including) 20 December 2021, the Euro OverNight Index Average ("**EONIA**"); and
- (ii) from (and including) 20 December 2021, the sum of (a) €STR (as defined below); and (b) a spread of 8.50 basis points.

The EUR STR Goldman Sachs Overnight Money Market Index (*Bloomberg Code: GSMMSTR <Index>*) (referred to herein as the EUR STR Money Market Index) intends to express the notional returns accruing to a hypothetical investor from an investment in a notional overnight money account denominated in the Strategy Currency of EUR that accrues interest at a rate determined by reference to €STR.

The USD Goldman Sachs Overnight Money Market Index (*Bloomberg Code: GSMMUSD <Index>*) (referred to herein as the USD Money Market Index) intends to express the notional returns accruing to a hypothetical investor from an investment in a notional overnight money account denominated in the Strategy Currency of USD that accrues interest at a rate determined by reference to the USD-Federal Funds-H.15 rate ("**Fed Funds Rate**").

21.2 Calculation of the value of each Money Market Index

The value of the Money Market Index (the "**MM Index Value**") in respect of a Money Market Index on the MM Index Inception Date in respect of such Money Market Index was equal to 100.

The MM Index Value in respect of a Money Market Index shall be calculated by the Strategy Calculation Agent on each MM Index Business Day following the MM Index Inception Date in respect of such Money Market Index as an amount equal to:

- (a) the MM Index Value in respect of the Overnight Interest Rate Business Day in respect of such Money Market Index immediately preceding such MM Index Business Day (or, if none, 100); multiplied by
- (b) the greater of:
 - (A) zero; and
 - (B)
 - (i) one; plus
 - (ii) the Overnight Interest Rate in respect of such Money Market Index in respect of the Overnight Interest Rate Business Day in respect of such Money Market Index immediately preceding such MM Index Business Day multiplied by (I) the actual number of days in the period commencing on (and including) the Overnight Interest Rate Business Day immediately preceding such MM Index Business Day and ending on (but excluding) such MM Index Business Day, divided by (II) 360,

provided that if the MM Index Value in respect of such MM Index Business Day is equal to or less than zero, the MM Index Value in respect of such Money Market Index and such MM Index Business Day and all subsequent MM Index Business Days shall be zero.

Subject as provided under the heading "*Change in Methodology and Overnight Interest Rate and Termination*" below, the Strategy Calculation Agent will make available the MM Index Value on each MM Index Business Day. Each MM Index Value will be published on the applicable MM Index Bloomberg Ticker.

21.3 Change in methodology and overnight interest rate in respect of each Money Market Index

If any fiscal, market, regulatory, juridical, financial or other circumstances arise that would, in the view of the Strategy Sponsor, necessitate or make desirable a modification or change of the methodology in respect of the Money Market Index, the Strategy Sponsor reserves the right to make such changes to the methodology in respect of the Money Market Index to account for the occurrence of such circumstance(s).

In particular, in respect of the:

- (i) EUR Money Market Index or the EUR STR Money Market Index, if €STR is not published (or, if published, is deemed to be manifestly incorrect) for a period longer than three Overnight Interest Rate Business Days, the Strategy Sponsor may substitute €STR with an alternative euro overnight interest rate option; and
- (ii) USD Money Market Index, if the Fed Funds Rate is not published (or, if published, is deemed to be manifestly incorrect) for a period longer than three Overnight Interest Rate Business Days, the Strategy Sponsor may substitute the Fed Funds Rate with an alternative euro overnight interest rate option.

The Strategy Sponsor shall be entitled to make modifications to the terms of the Money Market Index in any manner it may deem necessary or desirable, including (without limitation) to correct any manifest or proven error, or to cure, correct or supplement any ambiguity or defective provision contained in the methodology for the Money Market Index.

The Strategy Sponsor may, but is not required to, establish a committee comprising of employees of the Strategy Sponsor and external members with the relevant academic or professional background to consider any proposed changes outlined above. The rules, responsibilities and powers of any such committee shall be pre-defined by the Strategy Sponsor.

21.4 Termination in respect of a Money Market Index

The Strategy Sponsor in respect of a Money Market Index may, in its sole discretion, at any time and without notice, terminate the calculation and publication of such Money Market Index.

21.5 Definitions in respect of the Money Market Indices

"€STR" means, with respect to any day, the euro short-term rate, expressed as a percentage, as administered by the European Central Bank (or any successor administrator) and published on the European Central Bank's website.

"MM Index Bloomberg Ticker" means, in respect of:

- (a) the EUR Money Market Index, *GSMMEUR <Index>*;
- (b) the EUR STR Money Market Index, *GSMSTR <Index>*;
- (c) the USD Money Market Index, *GSMUSD <Index>*,

or, in each case, any successor page thereto;

"MM Index Business Day" means each calendar day that is not a Saturday or Sunday;

"MM Index Inception Date" means, in respect of:

- (a) the EUR Money Market Index, 4 January 1999;
- (b) the EUR STR Money Market Index, 3 January 2005; and
- (c) the USD Money Market Index, 10 January 1994;

"Overnight Interest Rate Business Day" means, in respect of:

- (a) each of the EUR Money Market Index and the EUR STR Money Market Index, a day on which the Trans-European Automated Real-time Gross settlement Express Transfer (TARGET) system is open; and
- (b) the USD Money Market Index, any day which is a day on which commercial banks are open for general business (including dealings in foreign exchange and foreign currency deposits) New York.

"Overnight Interest Rate" means, in respect of:

- (a) the EUR Money Market Index, in the period:
 - (i) up to (and including) 20 December 2021, EONIA; and
 - (ii) from (and including) 20 December 2021, the sum of (a) €STR; and (b) a spread of 8.50 basis points;
- (b) the EUR STR Money Market Index, €STR; and
- (c) the USD Money Market Index, USD-Federal Funds-H.15;

"USD-Federal Funds-H.15" means in respect of any day, the overnight Federal Funds Effective Rate US, referred as "USD-Federal-Funds-H15, expressed as a percentage, which is published on the Reuters Screen RSF.REC.USONFFE=NaE Page in respect of such day; and

22. Disruption Events, Adjustment Events and Consequences

For the purposes of this Section 22, any underlying index, financial instrument, asset, price, level, component or other underlying comprising, directly or indirectly, a Relevant Strategy, a "Strategy Component".

22.1 Disruption Events - In respect of each of the Index, the Underlying Index and the Govt Bond Strategy only:

Disruption Events applicable to a Strategy Component which is an index, as determined by the Strategy Sponsor (an "Index Strategy Component").

- (a) If an Index Strategy Component in respect of a Relevant Strategy is either:
 - (i) not calculated and announced by the relevant component's sponsor or calculation agent but is calculated and announced by a successor sponsor or successor calculation agent acceptable to the Strategy Sponsor; or
 - (ii) replaced by a successor strategy using, in the determination of the Strategy Sponsor the same or substantially same formula for and method of calculating that Index Strategy Component,

then, in relation to (i) the Index Strategy Component shall continue to be the underlying component in respect of the Relevant Strategy, and, in relation to (ii) such successor strategy shall be deemed to become an underlying asset in respect of the Relevant Strategy and shall replace the affected Index Strategy Component and, in each case, the Strategy Sponsor may make such temporary or permanent adjustment to the Relevant Strategy as it deems appropriate in its sole discretion to account for such change.

- (b) In respect of an Index Strategy Component, if:
- (i) the Strategy Component's sponsor for such Index Strategy Component or the sponsor of any component of such Index Strategy Component announces that it will make a material change in the formula for calculating the relevant Index Strategy Component (or any component thereof) or in any other way materially modifies such Index Strategy Component (or any component thereof) (other than any modification prescribed in the formula for the purpose of maintaining such Index Strategy Component (or such component thereof) in the event of changes to its composition);
 - (ii) such Index Strategy Component (or any component thereof) is permanently cancelled by its sponsor without any successor thereto, or ceases to exist or is no longer tradeable, including as a result of any member of the Goldman Sachs Group discontinuing the relevant Index Strategy Component; or
 - (iii) the Strategy Sponsor (or the sponsor of any component thereof) fails to calculate and announce the level of such Index Strategy Component (or such component thereof);
 - (iv) in the reasonable judgement of the Strategy Sponsor, the level of such Index Strategy Component contains a manifest error;
 - (v) any authorisation, registration, recognition, endorsement, equivalence decision, approval or inclusion in any official register in respect of such Index Strategy Component or the administrator or sponsor of such Index Strategy Component has not been, or will not be, obtained or has been, or will be, rejected, refused, suspended or withdrawn by the relevant competent authority or other relevant official body, in each case, with the effect that the Strategy Sponsor is not, or will not be permitted under any applicable law or regulation to use such Index Strategy Component, as determined by the Strategy Sponsor,

then, the Strategy Sponsor may take actions or take no action, including, but not limited to, the following:

- (A) temporarily or permanently remove the Index Strategy Component and/or select an alternative index to replace the Index Strategy Component (provided that such replacement is a similar alternative) and may such adjustments to the Relevant Strategy as may be necessary, in its commercially reasonable judgement to effect such change; or
- (B) calculate the level of such Index Strategy Component, in lieu of the published level, using the same formula for, and method of, calculating the level of such Index Strategy Component last in effect prior to the occurrence of any of the circumstances described above (utilising any adjustment to such formula or method that the Strategy Sponsor determines to be commercially reasonable).

Disruption Events in respect of all Strategy Components:

If, in respect of a Strategy Component, any one or more of the following occur:

- (c) the Strategy Sponsor becomes aware of the adoption of, or any change in, applicable law, it is illegal for the Strategy Sponsor or the Strategy Calculation Agent to undertake their respective roles in relation to the Relevant Strategy (or they would incur materially increased costs in doing the same) or any relevant entity would be prevented in entering into any transactions in respect of the relevant Strategy or a Strategy Component;
- (d) the Strategy Sponsor determines that a hedging party would (A) be unable to undertake certain actions in relation to all or a material portion of its hedge positions relating to a relevant Strategy Component or (B) there is a temporary or prolonged suspension of trading in such Strategy Component (or its relevant hedging instrument) during regular scheduled trading sessions on the relevant reference exchange and/or a relevant reference exchange announces that there is a disruption in trading in respect of such Strategy Component (or its relevant hedging instrument), and such suspension or disruption has a material impact on the ability of market participants to

enter into hedging transactions in respect of such Strategy Component (in each case, a "**Material Trading Disruption**");

- (e) a trading disruption occurs in respect of the relevant trading venue or any other event or circumstance occurs which, in the reasonable judgement of the Strategy Sponsor, (A) affects the ability of market participants in general to enter into transactions in respect of such relevant Strategy Component in a notional size required in relation to any product or transaction linked to the relevant Strategy, (B) impairs the liquidity of any transactions in relation to such relevant Strategy Component and/or (C) affects the value of such relevant Strategy Component;
- (f) an event described in the Strategy description as an "**Additional Market Disruption Event**" occurs;
- (g) a force majeure event (including, without limitation, an act of God, an armed conflict or an act of terrorism) occurs that the Strategy Sponsor determines is likely to have a material effect on a Strategy Component or on its ability to perform its role in relation to the Relevant;
- (h) (i) the official, price, level, rate or other measure in relation to a Strategy Component is unavailable or incomplete on any relevant day, (ii) an unscheduled holiday occurs in respect of a trading venue or relevant Component, (iii) a trading venue or the sponsor or provider of a Strategy Component publicly announces that a day that was previously not a scheduled business day in respect of such trading venue or Strategy Component shall be considered a scheduled business day in respect of such trading venue or Strategy Component, (iv) any relevant exchange is not open for trading during its regular trading session or closes early, or (v) the Strategy Sponsor determines that the value of the Relevant Strategy or any Strategy Component is manifestly incorrect;
- (i) where required, the Strategy Sponsor ceases to have any relevant data licence in respect of a Strategy Component;
- (j) any authorisation, registration, recognition, endorsement, equivalence decision, approval or inclusion in any official register in respect of such Strategy, Strategy Component or the Strategy Sponsor has not been, or will not be, obtained or has been, or will be, rejected, refused, suspended or withdrawn by the relevant competent authority or other relevant official body, in each case, with the effect that the issuer of, or one of the contracting parties in respect of, a linked product is not, or will not be permitted under any applicable law or regulation to use the Strategy or Strategy Component, as determined by the Strategy Sponsor;
- (k) a material change in national or international financial, political, legal or economic conditions that would likely prejudice the calculation and publications of the value of a Strategy, as determined by the Strategy Sponsor; or
- (l) the European Union membership or any member of the European Union is discontinued, suspended or terminated, or any member of the European Union disaffirms, disclaims, repudiates or rejects in whole or in part any obligation arising from its European Union membership under the relevant treaties or:
 - (I) the euro ceases to be the lawful currency of any member of the European Union; or
 - (II) any member of the European Union takes, or indicates its intention to take, any action in furtherance of, or indicates its consent to, approval of, or acquiescence in, any of the foregoing event;

then, the Strategy Sponsor (or the Strategy Calculation Agent on the instructions of the Strategy Sponsor) may take one or more of the following actions, or take no action, in order to preserve the intended commercial purpose of the Relevant Strategy:

- (i) make such determinations or adjustments to the Relevant Strategy as it deems appropriate to account for the occurrence of such event and, as applicable, to the extent necessary to calculate the value in respect of the Relevant Strategy in respect of such day (for which purpose it may use its own internal models and other market data sources as it reasonably determines is necessary and/or input data last published or made available;

- (ii) postpone any applicable rebalancing in whole or part of the Relevant Strategy to the next applicable business day on which no such event is continuing and make such adjustments as necessary to account for such postponement;
- (iii) determine that the value assigned to the weight or unit in respect of the Strategy Component in respect of the period from (and including) the date on which such event occurred to (but excluding) the date on which such event is no longer continuing shall remain at the value assigned immediately prior to the occurrence of such event;
- (iv) suspend the publication of the value of the Relevant Strategy until such event is not continuing;
- (v) publish an indicative value of the Relevant Strategy until such event is not continuing;
- (vi) temporarily or permanently remove or replace any affected Strategy Component with an alternative asset where it considers that a similar alternative is available;
- (vii) in the case of a Material Trading Disruption only in respect of a Strategy Component (the "**Affected Strategy Component**"), if the Strategy Sponsor or the Strategy Calculation Agent (as applicable) has determined that such Material Trading Disruption has occurred or is ongoing for five or more consecutive strategy business days, it may remove the Affected Strategy Component and/or select an alternative asset to replace such Affected Strategy Component and may make such adjustments to the terms of the Relevant Strategy as it deems appropriate to account for such removal and in order to preserve insofar as possible the preserve the intended commercial purpose of the Relevant Strategy.

When determining a replacement of such Affected Strategy Component, the Strategy Sponsor may take into consideration the following criteria:

- (A) the investment objectives of such Affected Strategy Component;
- (B) the asset class exposure of such Affected Strategy Component;
- (C) the geographical focus of such Affected Strategy Component; and/or
- (D) the realised volatility of such Affected Strategy Component.

In respect of such replacement of an Affected Strategy Component:

- (1) there is no obligation for the Strategy Sponsor to select a replacement of such Affected Strategy Component that satisfied all of the above criteria;
- (2) the replacement component shall not be limited to equivalent assets and might be composed of securities, indices or cash;
- (3) the replacement component may not be limited to a single instrument and might be composed of several instruments; and
- (4) the calculation methodology of such replacement component may refer to levels reported by the Strategy Sponsor, service provider, exchanges and/or asset sponsors.

Any removal or replacement of an Affected Strategy Component will take into consideration a review by any relevant strategy committee; or

- (viii) if the Strategy Sponsor determines that (A) none of the actions listed above would be possible to take or, if possible to take, would achieve a commercially reasonable result and/or (B) it is no longer possible or practicable to calculate the Relevant Strategy, terminate the calculation and publication of the Relevant Strategy.

Disruption Events in respect of Input Data

Where "Input Data" means input data (including but not limited to any price or level) which is used to determine, or which constitutes, any weight(s), signal(s) or other values or parameters in relation to a Strategy Component and any other input data (other than a Strategy Component) or software package used in the calculation of a Strategy.

If the Strategy Sponsor discovers, or is notified by a party responsible for collecting, calculating, distributing or publishing Input Data (the "**Input Data Provider**", which may include a third party, the Strategy Sponsor itself or certain departments within the Goldman Sachs Group), that:

- (ix) an Input Data Provider has ceased to publish such Input Data (or the Input Data Provider announces that it will cease to publish such Input Data) unless the Strategy Sponsor determines, in its sole and absolute discretion, that such Input Data has been replaced by any equivalent information or data;
- (x) there is a material change in the formula for or method of calculating, or the content or frequency of publication of, such Input Data (as determined by the Strategy Sponsor); or
- (xi) the Input Data Provider (A) fails to calculate or publish such Input Data, (B) does not deliver such Input Data to the Strategy Sponsor or Strategy Calculation Agent (as the case maybe) or (C) delivers incomplete Input Data to the Strategy Sponsor or Strategy Calculation Agent (as the case maybe), in each case, on or prior to the time at which the Strategy Sponsor needs to use such Input Data for calculating the value of the relevant Strategy,

(each an "**Input Data Disruption Event**"), then the Strategy Sponsor may, in its sole discretion determine to take actions or take no actions, including, but not limited to:

- (i) use the Input Data last published or made available by such Input Data Provider to calculate the value of the relevant Strategy; and/or
- (ii) in all circumstances, (A) elect to temporarily or permanently replace or remove (or assign a zero weight to) the Strategy Component(s) affected by the unavailability or material change(s) at the earliest possible opportunity as it determines to be commercially reasonable in order for the value of such Strategy to continue to be calculated notwithstanding the relevant circumstances, (B) use information or data from an alternative data source (which may be internal data) which it determines to be comparable to such Input Data and to be appropriate in order to preserve the Strategy Purpose, (C) make such adjustment(s) to the Strategy or to the composition of such Strategy as it determines to be necessary, in its discretion and acting in a commercially reasonable manner, to reflect such unavailability or change(s) or (D) if the Strategy Sponsor determines that none of the above adjustment(s) would achieve a commercially reasonable result and/or that it is no longer possible or practicable to calculate the relevant Strategy, terminate the calculation and publication of such Strategy.

22.2 Disruption Events - In respect of each of the Commodity Index and the EUA USD Strategy only:

Strategy Adjustment Events in respect of a Relevant Strategy

If, in respect of a Relevant Strategy and any Strategy Calculation Day, a Strategy Adjustment Event has occurred, then the Strategy Sponsor may determine, in its discretion and acting in a commercially reasonable manner, to make such determinations or adjustments to the terms of such Relevant Strategy, including to the methodology and/or to replace the relevant data sources, as it deems appropriate to account for such Strategy Adjustment Event and, as applicable, to the extent necessary to calculate the Strategy Timely Level and the Strategy Tradable Level in respect of such Strategy Calculation Day (for which purpose it may use its own internal models and other market data sources as it reasonably determines is necessary) whilst preserving the intended commercial purpose of the Relevant Strategy.

If the Strategy Sponsor determines that no such determination(s) or adjustment(s) would be possible to take or, if possible to take, would achieve a commercially reasonable result and/or that it is no longer possible or practicable to calculate the level of the Relevant Strategy, the Strategy Sponsor may terminate the calculation and the publication of the Relevant Strategy without notice.

"Strategy Adjustment Event" means, in respect of a Strategy Calculation Day, the occurrence of any one of the following events, as determined by the Strategy Sponsor: (i) a force majeure event; (ii) a material change in national or international financial, political, legal or economic conditions that would likely prejudice the calculation and publication of the Strategy Tradable Level; or (iii) the European Union membership of any member of the European Union is discontinued, suspended or terminated, or any member of the European Union disaffirms, disclaims, repudiates or rejects in whole or in part any obligation arising from its European Union membership under the relevant treaties; or the Euro ceases to be the lawful currency of any member of the European Union; or any member of the European Union takes, or indicates its intention to take, any action in furtherance of, or indicates its consent to, approval of, or acquiescence in, any of the foregoing events.

Adjustment Events in respect of components of a Relevant Strategy

Each of the following events in (a) to (c) shall be an "Adjustment Event".

- (a) If any Strategy Component is: (i) not calculated and announced by the relevant sponsor or price source, but is calculated and announced by a successor sponsor or price source, which is determined by the Strategy Sponsor as being an acceptable successor, then such successor sponsor or price source will be deemed to be the relevant sponsor or price source; or (ii) replaced by a successor instrument, strategy, index or basket, as applicable, using the same or a substantially similar specification or formula and method of calculation as used in the calculation of such Strategy Component, then such replacement instrument, strategy, index or basket, as the case may be, will be deemed to be that Strategy Component, and, in each case, the Strategy Sponsor may determine that it is necessary to make any such adjustment to the rules or to the composition of the Relevant Strategy.
- (b) If the Strategy Sponsor determines that, in respect of any Strategy Component and any Strategy Calculation Day:
 - (i) the relevant sponsor has made a material change in the weighting or composition of, formula for, or method of calculating such Strategy Component or in any other way that has materially modified such Strategy Component (other than a modification prescribed in such formula or method relating to the weighting or composition of such Strategy Component or other routine events or modifications), effective on or after such Strategy Calculation Day;
 - (ii) the relevant sponsor fails or is not scheduled to calculate and announce the level of such Strategy Component on such Strategy Calculation Day, or, on or prior to such Strategy Calculation Day, such Strategy Component has ceased to be calculated by the relevant sponsor, and has not been replaced by a successor index, strategy or basket;
 - (iii) a Market Disruption Event (as defined in the relevant Section in respect of such Relevant Strategy) occurs in respect of any Currency Conversion Component on such Strategy Calculation Day; or
 - (iv) the level of such Strategy Component on such Strategy Calculation Day contains a manifest error,

then the Strategy Sponsor shall instead calculate the level of such Strategy Component, in the absence of a published level for such Strategy Component using the same formula for, and method of, calculating the level of such Strategy Component last in effect prior to the occurrence of any of the circumstances described above or in the event that the Strategy Sponsor determines that the occurrence of any of the foregoing circumstances could adversely affect the Relevant Strategy, it may elect to replace or remove (or assign a zero weight to) the relevant Strategy Component at the earliest possible opportunity as it determines and make such other changes to the Relevant Strategy as may be necessary to effect such change;

- (c) If the Strategy Sponsor determines that, in respect of any Strategy Component and any Strategy Calculation Day:
 - (i) any Strategy Component has ceased to be published by the relevant price source, and has not been replaced by any successor;

- (ii) that there has been a material change (or it has been announced that a material change will be made) to (I) the content, composition or constitution of any Strategy Component, or (II) the formula for or method of calculating any Strategy Component valuation data, or (III) the delivery, expiry or settlement terms of such Strategy Component; or
- (iii) such Strategy Component has ceased to be a liquid, actively traded Strategy Component that is generally available for trading, or that such affected Strategy Component has been the subject of a Market Disruption Event (as defined in the relevant Section in respect of such Relevant Strategy) for at least five consecutive Strategy Calculation Days, or (II) anticipates on the basis of publicly available information that such Strategy Component or any Strategy Component valuation data, notwithstanding that it is available for trading, will cease to be liquid and actively traded or will be terminated or delisted by the relevant price source,

then the Strategy Sponsor may:

- (A) make such determinations or adjustments to the terms of the Relevant Strategy, including to the methodology and relevant data sources, as it deems appropriate to account for such Adjustment Event to the extent necessary for the Strategy Timely Level and the Strategy Tradable Level to continue to be calculated; or
- (B) elect to replace or remove (or, where applicable, assign a zero weight to) such Strategy Component to which such Strategy Component is linked from the Relevant Strategy at the earliest possible opportunity in order for the Strategy Timely Level and the Strategy Tradable Level to continue to be calculated, and in such case, the Strategy Sponsor may make such adjustment(s) to the rules of the Relevant Strategy or to the composition of the Relevant Strategy to be necessary to reflect such change; and/or
- (C) if the level of a the relevant Strategy Component as published by the relevant sponsor, the Strategy Component valuation data, or the Spot Exchange Rate, each as published by the relevant price source, on any Strategy Calculation Day is subsequently corrected and the Strategy Sponsor determines that the correction is published or made available by the sponsor or price Source on a timely basis on the immediately following Strategy Calculation Day, then such corrected level, price or rate (as the case may be) shall be deemed to be the relevant level, price or rate, and the Strategy Sponsor shall use the corrected level, price or rate as the case may be, in its calculation of the Strategy Timely Level or Strategy Tradable Level, as applicable.

22.3 Disruption Events - In respect of the EUA EUR Strategy only:

(a) Changes to Components of the Relevant Strategy

If, in respect of the Component of the Relevant Strategy:

- (i) the Strategy Sponsor determines that the Component has ceased to be published or listed for trading by the relevant trading facility, and has not been replaced by a successor commodity futures contract or contract expiration; or
- (ii) the Strategy Sponsor determines that there has been a material change in (A) the content, composition or constitution of the relevant contract or the commodity referenced by such contract, or (B) the formula for or method of calculating such Component or the relevant contract, or (C) the delivery, expiry or settlement terms of such Component or the relevant contract; or
- (iii) the Strategy Sponsor, in its discretion and acting in a commercially reasonable manner, (A) determines that such Component has ceased to be a liquid, actively traded contract expiration that is generally available for trading, or (B) anticipates on the basis of publicly available information that such Component, on or before the next roll period for the relevant contract, notwithstanding that it is available for trading, will cease to be a

liquid and actively traded contract expiration or will be terminated or delisted by the relevant Trading Facility,

then the Strategy Sponsor may, in its discretion and acting in a commercially reasonable manner, make such adjustment to the formula or method for calculating the Relevant Strategy (including adjustment to the weighting or composition), at the earliest possible opportunity in order for the Relevant Strategy to continue to be calculated notwithstanding any of the foregoing circumstances or in the event that the Strategy Sponsor determines, in its reasonable judgement, that the occurrence of any of the foregoing circumstances would result in a fundamental change to the Relevant Strategy, it may (in good faith) elect to discontinue the publication of the Relevant Strategy at the earliest possible opportunity as it determines to be commercially reasonable.

For the purposes of the above, "**Component**" means: (A) any futures contract expiration in respect of the relevant commodity selected for inclusion in the Relevant Strategy; or (B) if applicable, any futures contract expiration in respect of the relevant commodity in respect of which the daily contract reference price is scheduled to be observed in accordance with the procedure (if any) for determining the composition of the Relevant Strategy.

(b) Changes to Designated Contracts included in the Underlying S&P Index

- (i) In the event that any Designated Contract (as defined in the rules of the Underlying S&P Index) is added to the Underlying S&P Index, to the extent that such Designated Contract is relevant for the purposes of the Relevant Strategy, it shall be added to the Relevant Strategy and the Roll Contract Expiration (as defined in the rules of the Underlying S&P Index) in respect of such Designated Contract shall be the same as that determined by the S&P Index Sponsor in respect of such Designated Contract in the Underlying S&P Index.
- (ii) Subject to paragraph (a) (*Changes to Components of the Relevant Strategy*) above, in the event that any Designated Contract is removed from the Underlying S&P Index, such Designated Contract shall, at the earliest opportunity that the Strategy Sponsor determines to be commercially reasonable, also be removed from the Relevant Strategy.

(c) Adjustment Events in respect of the Underlying S&P Index

If, in respect of the Underlying S&P Index, and a day on which the Relevant Strategy is to be calculated, the Strategy Sponsor determines, in a commercially reasonable manner, that:

- (i) the S&P Index Sponsor makes a material change in the weighting or composition of, formula for, or method of calculating the Underlying S&P Index or in any other way materially modifies the Underlying S&P Index; or
- (ii) the S&P Index Sponsor fails or is not scheduled to calculate and announce the closing level of the Underlying S&P Index, or, on or prior to such day, the Underlying S&P Index has ceased to be calculated by the S&P Index Sponsor, and has not been replaced by a successor index,

then the Strategy Sponsor shall calculate the value of the Relevant Strategy in accordance with the formula for and method of calculating such Relevant Strategy last in effect prior to the occurrence of any of the circumstances described above (utilising any adjustment to such formula or method for calculating the Relevant Strategy, including adjustment to the weighting or composition of the Relevant Strategy, that the Strategy Sponsor determines to be commercially reasonable) or in the event that the Strategy Sponsor determines, in a commercially reasonable manner, that the occurrence of any of the foregoing circumstances would represent a fundamental change to the Relevant Strategy, it may (in good faith) elect to discontinue the publication of the Relevant Strategy at the earliest possible opportunity as it determines to be commercially reasonable.

22.4 In respect of each of the Commodity Index, the EUA EUR Strategy and the EUA USD Strategy only:

If, in respect of any third-party information or data relied on or which is used to determine, or which constitutes, any weight(s), signal(s) or other input used in the calculation of the Relevant Strategy (the "**Third-Party Data**"):

- (a) the Strategy Sponsor discovers, or is notified by the third party responsible for collecting, calculating, distributing or publishing such Third-Party Data (the "**Third-Party Data Source**") of, an error or discrepancy in such Third-Party Data, the Strategy Sponsor may disregard such error or discrepancy or correct or revise the value of the Relevant Strategy following the release of the corrected Third-Party Data by the Third-Party Data Source; or
- (b) in respect of the Third-Party Data: (i) the Third-Party Data Source ceases to publish such Third-Party Data (or announces that it will cease to publish such Third-Party Data), and such Third-Party Data is not replaced by any equivalent information or data; (ii) there is a material change in the formula for or method of calculating, or the content or frequency of publication of, such Third-Party Data; or (iii) the Third-Party Data Source fails to calculate or publish such Third-Party Data for an extended period of time,

then the Strategy Sponsor may: (I) elect to, in respect of each of the Commodity Index and the EUA USD Strategy, replace or remove (or assign a zero weight to) the Strategy Component, or, in respect of the EUA EUR Strategy, disapply some or all modifications made by the EUA EUR Strategy to the Underlying S&P Index for any contracts, in each case affected by the unavailability or material change(s) at the earliest possible opportunity as it determines in order for the value of the Relevant Strategy to continue to be calculated notwithstanding the relevant circumstances; (II) use third-party information or data from an alternative data source which it determines to be comparable to such Third-Party Data and to be appropriate in order to preserve the original economic objective of the Strategy or the Underlying Strategy, or (III) make such adjustment(s) to the rules of the Relevant Strategy or to the composition of the Relevant Strategy as it determines to be necessary to reflect such unavailability or change; or (IV) if the Strategy Sponsor determines that none of the above adjustments would achieve a commercially reasonable result and/or that it is no longer possible or practicable to calculate the Relevant Strategy, terminate the calculation and publication of the Relevant Strategy with notice.

23. Corrections

In respect of each of the Commodity Index, the EUA EUR Strategy and the EUA USD Strategy only:

In the event that ambiguities arise in the calculation of the value of the Relevant Strategy, the Strategy Sponsor will resolve such ambiguities and, if necessary for resolution, make changes to the composition of such Relevant Strategy or the methodology of calculating such Relevant Strategy. In the event that the Index Sponsor determines that any calculation or determination in respect of any Relevant Strategy is incorrect, the Strategy Sponsor may, if practicable, correct calculations or determinations and publish or cause to be published such correct calculations or determinations.

In the event that the value of any component which is utilised for any calculation or determination in respect of a Relevant Strategy is subsequently corrected, the Strategy Calculation Agent may, if practicable, use such corrected value for the purpose of such calculation or determination, and, to the extent necessary and practicable, may adjust any prior calculation or determination or terms of such Relevant Strategy to account for such correction.

In respect of each of the Index, the Underlying Index and the Govt Bond Strategy only:

Information on the policies and procedures of the Strategy Sponsor in relation to the handling of errors, incidents and restatements can be found at the following location: <https://www.goldmansachs.com/disclosures/euro-benchmark-reg-iosco-principles-for-financial-benchmarks-f/summary-of-gs-policy-on-global-benchmark-incidents.pdf> (or any successor page thereto).

24. Change in Methodology

If any market, legal, regulatory, judicial, financial, fiscal or other circumstances arise that would, in the view of the Strategy Sponsor, necessitate or make desirable a modification or change of the methodology in respect of the Relevant Strategy in order to preserve the intended commercial purpose of the Relevant

Strategy, the Strategy Sponsor reserves the right to make such changes to the relevant methodology to account for the occurrence of such circumstance(s).

Accordingly, the Strategy Sponsor shall be entitled to make modifications and/or changes to the methodology in respect of the Relevant Strategy or any data obtained from a third party data source which is used to calculate the Relevant Strategy without notice as it deems appropriate, necessary or desirable, including, without limitation:

- (a) to correct any manifest or proven error contained in the relevant strategy methodology;
- (b) to cure, correct or supplement any ambiguity or contradictory or defective provision in the relevant strategy methodology;
- (c) to change the frequency of calculation of the Relevant Strategy and make corresponding changes to the relevant strategy methodology to account for such change of frequency;
- (d) to permit the Strategy Calculation Agent to continue calculating and determining the value of the Relevant Strategy and determining the weights of any component thereof respectively if market, legal, regulatory, judicial, financial, fiscal or other circumstances arise which were not reasonably foreseeable by the Strategy Sponsor and which have not been deliberately caused by the Strategy Sponsor and such circumstances would prevent the Strategy Calculation Agent from calculating and determining the value of the Relevant Strategy and determining the weights of any component thereof respectively, and would necessitate a modification or change of the methodology in respect of the Relevant Strategy in order for the value of the Relevant Strategy to continue to be calculated and determined notwithstanding the relevant circumstances;
- (e) to preserve the intended commercial purpose of the relevant Strategy where the change is of a formal, minor or technical nature; and/or
- (f) in respect of the Index, the Underlying and the Govt Bond Strategy only:
 - (i) to permit the Strategy Sponsor to continue calculating and determining the value of a Strategy and determining the weight(s), signal(s) or other values or parameters in respect of any Strategy Component in anticipation of, or as a result of (A) the cessation of any benchmark (an "**Affected Benchmark**"), (B) any change or adjustment announced or implemented by clearing houses or exchanges with respect to an Affected Benchmark or (C) when such Affected Benchmark, as determined by the Strategy Sponsor, becomes no longer reliable and representative of market or economic reality that such Affected Benchmark is intended to measure;
 - (ii) to increase the transparency of the Strategy description; and/or
 - (iii) to preserve the Strategy Sponsor's or its affiliates' ability to hedge the relevant Strategy, Components and/or Input Data and maintain such Strategy as tradable and replicable.

Any such changes shall result in a methodology consistent with the intended commercial purpose of the Relevant Strategy. The Strategy Sponsor may, but is not required to, establish a committee comprising of employees of the Strategy Sponsor and an equal number of external members with the relevant academic or professional background to consider any proposed changes outlined above. The rules, responsibilities and powers of any such committee shall be pre-defined by the Strategy Sponsor.

In respect of each of the Index, the Underlying Index and the Govt Bond Strategy only:

In the event that an ambiguity or contradictory or defective provision comes to the attention of the Strategy Sponsor in the calculation of the value of a Strategy, the Strategy Sponsor may, in accordance with its own policies and procedures applicable at the time, resolve such ambiguity or contradictory or defective provision and, if necessary for resolution, make such changes to the composition of such Strategy or the methodology of calculating such Strategy.

In addition, if the aggregate notional amount of products or transactions linked to the Relevant Strategy (or any other similar strategy sponsored by the Strategy Sponsor) exceeds a certain threshold (as

determined by the Strategy Sponsor by reference to the hedging capabilities of the Strategy Sponsor or any affiliate in respect of its exposure to the Relevant Strategy) then the Strategy Sponsor may:

- (g) change the methodology of the Relevant Strategy to allow for rebalancing to occur more frequently;
- (h) replace the Relevant Strategy with a replacement strategy identical in all material respects other than the days on which rebalancing occurs; and/or
- (i) make such other adjustments to the Relevant Strategy in order to allow the Strategy Sponsor (or its affiliate) to effectively hedge its exposure to the Relevant Strategy or reduce expected liquidity impact of such hedging transactions,

in each case, whilst ensuring the relevant replacement or proposed changes shall result in Relevant Strategy being consistent with its intended commercial purpose.

GOLDMAN SACHS SINGLE STOCKS STATIC BASKET INDICES

INDEX DESCRIPTION

Dated: 21 April 2021

The information set out in this Index Description is only an overview of the Goldman Sachs Single Stocks Static Basket Indices and must be read in conjunction with the Index Rules (as defined below). This Index Description is intended to highlight essential characteristics of the Goldman Sachs Single Stocks Static Basket Indices and does not purport to be complete. It is summarised from, and is qualified in its entirety by, the Index Rules.

1. Introduction

The Goldman Sachs Single Stocks Static Basket Indices (each, an "**Index**" and together, the "**Indices**") are a group of notional rules-based proprietary indices which Goldman Sachs International (or its successor(s)) (the "**Index Sponsor**") may create from time to time. Goldman Sachs International (or its successor(s)) will also act as the index calculation agent in calculating and publishing an Index (the "**Index Calculation Agent**"). References in this Index Description to "the Index" shall mean the relevant Index.

The complete rules and methodology applicable to the Index (the "**Index Rules**") and notices in respect of the Index will be made available on the website specified in the Index Supplement. The Index Rules comprise the following documentation elements:

- (i) the Goldman Sachs General Strategy Terms dated 23 November 2020 (or any successor version);
- (ii) the Goldman Sachs Single Stock Indices Base Methodology with FX Hedging (or any successor version); and
- (iii) the relevant "index supplement" document describing the parameters which apply to a particular Index (or any successor version) (the "**Index Supplement**").

Below, we describe:

- the objective and overview of the Index (section 2);
- how the exposure of the Index to the Component Stocks is calculated (section 3);
- how the Index Value is calculated (section 4);
- the effect of the deduction of Transaction Costs and the Index Deduction Rate on the Index Value (section 5);
- the consequences of certain corporate action determinations and adjustments, Disruption Events, corrections to the Index and changes to the Index methodology (section 6); and
- an overview of conflicts of interest (section 7).

2. Objective and Overview of the Index

The Index seeks to provide synthetic exposure to a basket (the "**Basket**") of equity stocks (each, a "**Component Stock**") which are selected from a broad universe of equity stocks in multiple jurisdictions and/or traded on different exchanges. The Component Stocks included in the Basket and the fixed weight assigned to each Component Stock (the "**Weight**") will be specified in the Index Supplement. As the Index is "synthetic" or "notional", it represents an investment in each Component Stock without physically owning them, and there is no actual portfolio of Component Stocks to which any person is entitled or in which any person has any ownership interest.

The Index is denominated in the currency specified in the Index Supplement (the "**Index Currency**"). A Component Stock may or may not be denominated in the Index Currency.

The Index will have a long exposure to each Component Stock in the Basket. The Basket will be rebalanced on a regular basis on each day specified in the Index Supplement (each, a "**Rebalancing Day**" and such rebalancing, a "**Basket Rebalancing**"). The quantity of exposure (the "**Number of Shares**") of the Index to each Component Stock will be determined on a Rebalancing Day and will reflect its target Weight as well as any adjustments made by the Index Calculation Agent to reflect corporate actions occurring in respect of such Component Stock, as more particularly described in section 3 (*Calculation of the Number of Shares of each Component Stock*) below. Depending the performance of each Component Stock relative to the other Component Stocks in the Basket since the immediately preceding Rebalancing Day, the actual exposure the Index has to each Component Stock during the period between each rebalancing of the Basket may vary from their assigned Weights.

The Index may be calculated on a "Price Return", "Net Total Return" or "Gross Total Return" basis, as specified in the Index Supplement. If the Index is calculated on a "Net Total Return" or "Gross Total Return" basis, then any dividend amounts paid in respect of a Component Stock will be taken into account in calculating the Index. If the Index is calculated on a "Net Total Return" basis, then a notional dividend withholding tax will be deducted from any dividend amounts paid in respect of a Component Stock. The notional dividend withholding tax rate applied to dividend amounts may vary depending on the jurisdiction of incorporation of the issuer of the relevant Component Stock and will be determined by the Index Calculation Agent.

If "FX Hedge" is specified to be applicable in the Index Supplement, then the value of the Index will be adjusted to hedge the currency exposures of the Index. Such adjustment shall reduce but not eliminate foreign exchange risk.

The calculation of the Index will include deductions that are intended to synthetically reflect the transaction costs that a hypothetical investor would incur if it entered into and maintained direct investment positions providing the same exposure to the Component Stocks included in the Basket. Such transaction costs are linked to the magnitude and frequency of changes to the quantity of exposure the Index has to each Component Stock. The value of the Index may also be reduced by the deduction of a fixed pre-determined rate (an "**Index Deduction Rate**") if so specified in the Index Supplement. The effect of these deductions could be to benefit the Index Sponsor and/or its affiliates. The actual costs of hedging the exposure to the Index may be lower or higher than these deductions and, if they were lower, this may result in investors being in a worse position than if they were to maintain direct investment positions in the Component Stocks. The value of the Index will increase if the Component Stocks included in the Basket perform positively overall, though any positive performance will be reduced by the abovementioned deductions. See further section 5 (*Effect of the Deduction of Transaction Costs and Index Deduction Rate*) below for further details.

The Index will be reviewed periodically in accordance with the Index Sponsor's internal policies.

The Index, including the methodology and underlying assumptions, may not be successful in achieving its objective or in producing positive returns, and may not outperform any alternative investment strategy.

3. **Calculation of the Number of Shares of each Component Stock**

The Index Calculation Agent will calculate the value of the Index (the "**Index Value**") on each Index Business Day starting from the Index Inception Date. Each of "**Index Business Day**" and "**Index Inception Date**" shall be as specified in the Index Supplement.

In order to calculate the Index Value, the Index Calculation Agent will first determine the Number of Shares of each Component Stock in the Basket on a Rebalancing Day as an amount equal to the *quotient* of (a) the *product* of (i) the Basket Closing Value on the Observation Day corresponding to such Rebalancing Day, *multiplied* by (ii) the Weight of such Component Stock, *divided* by (b) the official closing price of such Component Stock published on the primary exchange on which it is traded ("**Official Closing Price**") in respect of such Observation Day (or, if the Official Closing Price of such Component Stock is denominated in a currency other than the Index Currency, as converted into the Index Currency using the FX Rate Fixing). Each of "**Observation Day**" and "**FX Rate Fixing**" (if applicable) shall be as specified in the Index Supplement.

The Number of Shares in respect of a Component Stock will reflect adjustments made by the Index Calculation Agent for any dividends or corporate actions occurring in respect of such Component Stock, and will become effective as of the opening of the Index Business Day immediately following the relevant Rebalancing Day. In respect of each Index Business Day thereafter until, and including, the next Rebalancing Day, the Number of Shares in respect of a Component Stock will be equal to the Number of Shares of such Component Stock for the immediately preceding Index Business Day, unless otherwise adjusted by the Index Calculation Agent for any dividends or corporate actions occurring in respect of such Component Stock. Depending on the performance of each Component Stock relative to the other Component Stocks in the Basket since the immediately preceding Rebalancing Day, the actual exposure the Index has to each Component Stock during the period between each rebalancing of the Basket may vary from their assigned Weights.

4. Calculation of the Index Value

The Index Value on the Index Inception Date will be as specified in the Index Supplement. On each Index Business Day thereafter, the Index Value will be either (a) if "FX Hedge" is not specified as applicable in the Index Supplement, a currency-unhedged value of the Index (the "**Index Unhedged Value**"), or (b) if "FX Hedge" is specified as applicable in the Index Supplement, a currency-hedged value of the Index (the "**Index Hedged Value**").

The Index Value will be published on each Index Business Day by the Index Calculation Agent on the website and under the ticker specified in the Index Supplement, subject to the right of the Index Sponsor and/or Index Calculation Agent to suspend or discontinue publication of the Index Value at any time and for any reason, or to publish the Index Value on such other information sources as the Index Sponsor may select from time to time. The Index Value will be rounded to the number of decimal places specified in the Index Supplement.

(a) Calculation of the Index Unhedged Value

In respect of an Index Business Day ("**Index Business Day (t)**") falling after the Index Inception Date, the Index Unhedged Value seeks to reflect the value of the Basket of Component Stocks less Transaction Costs and the Index Deduction Rate, and is determined in accordance with the following formula:

$$I_t = I_{t-1} \times \left[\frac{BCV_t + BDiv_t}{BOV_t} \times (1 - Cost_t) \times (1 - SD \times DayCountFraction(t-1, t)) \right]$$

Where:

"**BCV_t**" means the Basket Closing Value on Index Business Day (t);

"**BDiv_t**" means the Basket Dividend on Index Business Day (t);

"**BOV_t**" means the Basket Opening Value on Index Business Day (t);

"**Cost_t**" means the Basket Rebalancing Cost on Index Business Day (t);

"**DayCountFraction(t-1, t)**" means the day count fraction in respect of the period commencing on, and including, the Index Business Day immediately preceding Index Business Day (t) and ending on, but excluding, Index Business Day (t), as specified in the Index Supplement;

"**I_t**" means the Index Unhedged Value on Index Business Day (t);

"**I_{t-1}**" means the Index Unhedged Value on the Index Business Day immediately preceding Index Business Day (t); and

"**SD**" means the Index Deduction Rate (or, if none is specified in the Index Supplement, zero).

If "Index Value Floor" is specified to be applicable in the Index Supplement, and the Index Unhedged Value in respect of any Index Business Day is zero or negative, the Index Unhedged

Value for such Index Business Day and all Index Business Days thereafter will be deemed to be equal to zero. If "Index Value Floor" is specified to be not applicable in the Index Supplement, the Index Unhedged Value may be negative.

The "**Basket Closing Value**" on an Index Business Day is equal to the aggregate value of the shares of each Component Stock included in the Basket at the close of such Index Business Day. The value of the shares of a Component Stock at the close of an Index Business Day is calculated as the *product* of (i) the Number of Shares of such Component Stock in respect of such Index Business Day, *multiplied* by (ii) its Official Closing Price on such Index Business Day (or, if the Official Closing Price of such Component Stock is denominated in a currency other than the Index Currency, as converted into the Index Currency using the FX Rate Fixing).

The "**Basket Opening Value**" on an Index Business Day is equal to the aggregate value of the shares of each Component Stock included in the Basket at the open of such Index Business Day. The value of the shares of a Component Stock at the open of an Index Business Day is calculated as the *product* of (i) the Number of Shares of such Component Stock in respect of such Index Business Day, *multiplied* by (ii) its Official Closing Price on the immediately preceding Index Business Day (or, if the Official Closing Price of such Component Stock is denominated in a currency other than the Index Currency, as converted into the Index Currency using the FX Rate Fixing), and further *multiplied* by (iii) a price adjustment factor to account for any corporate actions occurring in respect of such Component Stock.

The "**Basket Dividend**" on an Index Business Day is equal to: (i) if the Index is calculated on a "Price Return" basis, zero, (ii) if the Index is calculated on a "Gross Total Return" basis or a "Net Total Return" basis, the aggregate of the dividend amounts of each Component Stock included in the Basket, provided that (A) if the Official Closing Price of the relevant Component Stock is denominated in a currency other than the Index Currency, the dividend amount shall be converted into the Index Currency using the FX Rate Fixing, and (B) if the Index is calculated on a "Net Total Return" basis, the Basket Dividend will reflect a deduction in respect of notional dividend withholding tax in respect of each Component Stock, which is intended to reflect the withholding tax that is levied or may be levied by the country of incorporation or residence of the issuer of each Component Stock. This means that if the Index Sponsor (or any of its affiliates) has hedged its exposure to the Component Stocks, it will benefit if the effective rate of withholding tax that it incurs in carrying out its hedging activities is less than the rate of the notional dividend withholding tax applied in calculating the Basket Dividend. Any such benefit will not be passed on to investors in any Securities linked to the Index.

The "**Basket Rebalancing Cost**" on an Index Business Day that is a Rebalancing Day is equal to the sum of the cost that is notionally incurred in entering or unwinding positions in each Component Stock as a result of a Basket Rebalancing. Such cost is calculated as the *product* of (i) the transaction cost rate specified in the Index Supplement ("**Transaction Cost Rate**") applicable to the relevant Component Stock, *multiplied* by (ii) the change in the actual exposure of the Index to such Component Stock. The Basket Rebalancing Cost on an Index Business Day that is not a Rebalancing Day will be zero. See section 5 (*Effect of the Deduction of Transaction Costs and Index Deduction Rate*) below for more details.

(b) Calculation of the Index Hedged Value

In respect of an Index Business Day (t) falling after the Index Inception Date, the Index Hedged Value seeks to reflect the Index Unhedged Value as adjusted to hedge the currency exposures of the Index, and is determined in accordance with the following formula:

$$HI_t = HI_{L1} \times \left(\frac{UH_t}{UH_{L1}} + FXHedgeImpact_t \right)$$

Where:

"**FXHedgeImpact_t**" means the FX Hedge Impact on Index Business Day (t);

"**HI_t**" means the Index Hedged Value on Index Business Day (t);

"**HL_t**" means the Index Hedged Value in respect of the last Index Business Day of the month immediately preceding the calendar month in which Index Business Day (t) falls;

"**UH_t**" means the Index Unhedged Value on Index Business Day (t); and

"**UH_{Lt}**" means the Index Unhedged Value in respect of the last Index Business Day of the month immediately preceding the calendar month in which Index Business Day (t) falls.

The "**FX Hedge Impact**" on an Index Business Day is equal to the aggregate impact of the hedging positions in interpolated forward exchange rates that are notionally entered into by the Index to hedge against currency fluctuations.

5. **Effect of the Deduction of Transaction Costs and Index Deduction Rate**

The Index Value will be reduced by the deduction of certain costs. There are two types of costs that are deducted from the Index:

- (a) transaction costs, which are intended to synthetically reflect the transaction costs (including, but not limited to, any applicable stamp duty payments, financial transaction taxes, brokerage costs, and/or other fees and expenses) ("**Transaction Costs**") that would be incurred by a hypothetical investor if it were to enter into actual transactions representing the notional rebalancing of the Basket on a Rebalancing Day. Transaction Costs are only deducted on a Rebalancing Day. The Transaction Costs associated with each Component Stock is calculated by reference to the Transaction Cost Rate applicable to such Component Stock. The Transaction Cost Rate in respect of each Component Stock will be as specified in the Index Supplement; and
- (b) an Index Deduction Rate, which is intended to reduce the pricing of certain transactions linked to the Index. The Index Deduction Rate will be specified as a fixed percentage in the Index Supplement (or, if none is specified in the Index Supplement, zero).

Such deductions will act as a drag on the performance of the Index. For the avoidance of doubt, the published Index Value is net of the above costs.

As the notional Transaction Costs are calculated by reference to pre-determined Transaction Cost Rates, they do not necessarily reflect the actual or realised transaction costs that would be incurred by a hypothetical investor in the relevant Component Stocks, which could be greater or less than the Transaction Costs. The Index Sponsor and/or any affiliate in its capacity as issuer or counterparty to Securities linked to the Index (a "**Hedging Party**") that has hedged its exposure to the Component Stocks will benefit if the actual or realised transaction costs that it incurs in carrying out its hedging activities are less than the Transaction Costs. Any such benefit will not be passed on to investors in Securities linked to the Index. Further, if such actual or realised transaction costs are less than the Transaction Costs, investors may be in a worse position than if they maintained direct investment positions in the Component Stocks.

6. **Corporate Action Determinations and Adjustments, Disruption Events, Corrections and Changes in Index Methodology**

- (a) Corporate Action Determinations and Adjustments

For corporate action determinations and/or adjustments, the Index Calculation Agent will make such determinations and/or adjustments by reference to the "Equity Basket Calculation Methodology" and "Withholding Tax Rates" published at <https://www.solactive.com/documents/> (or any successor website) (the "**Index Calculation Agent Methodology**").

Following the determination by the Index Calculation Agent that:

- (i) a Component Stock has commenced trading ex-dividend in respect of an ordinary cash dividend;
- (ii) an extraordinary event ("**Extraordinary Event**") has occurred in respect of a Component Stock, including a merger, a takeover or tender offer, the nationalisation of the shares or

assets of the issuer of a Component Stock, a delisting of a Component Stock on an exchange, or the insolvency of the issuer of a Component Stock; or

- (iii) any event having a diluting or concentrative effect on the theoretical value of a Component Stock or following any adjustment to the settlement terms of listed options or futures contracts on such Component Stock traded on an options or futures exchange,

the Index Calculation Agent will adjust the Index in accordance with the Index Calculation Agent Methodology.

If the Index Sponsor determines that it and/or its affiliates would be unable to, or would incur additional costs to, replicate an adjustment in accordance with the Index Calculation Agent Methodology, the Index Sponsor may instruct the Index Calculation Agent to take alternative action to allow the Index Sponsor and/or its affiliates to replicate the relevant adjustment, with the goal of preserving the original economic objective of the Index.

The Index Calculation Agent may change the Index Calculation Agent Methodology from time to time (including creating a new methodology to determine corporate actions and adjustments).

(b) Disruption Events

Certain events may occur in respect of the Index, a Component Stock or input data used for determinations and/or calculations relating to the Index ("**Input Data**", together with the Component Stocks, "**Relevant Underlyings**"), which affect the performance by the Index Sponsor or Index Calculation Agent of its obligations in respect of the Index or related hedging arrangements (each, a "**Disruption Event**"), including the following:

- (i) the performance by the Index Sponsor or Index Calculation Agent of its obligations in respect of the Index becomes unlawful, impracticable or would result in materially increased costs to it, as a result of a change in law;
- (ii) a Hedging Party is unable to enter or unwind hedging arrangements in respect of the Index or a Relevant Underlying or incurs increased costs in doing so;
- (iii) any event or circumstance (including a trading disruption) which (A) affects the ability of market participants to enter into transactions in respect of a Relevant Underlying in a notional size required for transactions relating to the Index, or (B) impairs the liquidity or affects the value of such Relevant Underlying;
- (iv) the occurrence of a "force majeure" event such as a systems failure, disaster, act of god, armed conflict, terrorism, etc. that is likely to have a materially impact a Relevant Underlying or the ability to perform obligations in respect of the Index;
- (v) the official price or other measure of a Relevant Underlying is not available on any day on which it is scheduled to be published or provided;
- (vi) (A) the occurrence of an unscheduled non-business day in respect of a Relevant Underlying or its trading venue, where no announcement thereof was made within a reasonable amount of time prior to such day, (B) the announcement by a trading venue or provider of a Relevant Underlying that a day that was previously not a business day in respect of such trading venue or Relevant Underlying shall be considered a business day, where no announcement thereof was made within a reasonable amount of time prior to such day, or (C) the relevant trading venue is not open for trading during its regular trading session or closes prior to its scheduled closing time;
- (vii) the value of the Index and/or a Relevant Underlying is manifestly incorrect;
- (viii) the Index Sponsor ceases to have the relevant data licence in respect of a Relevant Underlying;
- (ix) any authorisation or similar requirement in respect of the Index, a Relevant Underlying or the Index Sponsor has not been, or will not be, obtained or has been, or will be, refused

with the effect that any entity is not permitted under applicable law to use the Index and/or Relevant Underlying;

- (x) a material change in national or international financial, political, legal or economic conditions likely to prejudice the calculation and publication of the Index Value; or
- (xi) (A) an EU member state discontinues or suspends its membership of the EU, or rejects any obligation arising from its membership of the EU under the relevant treaties, or (B) the euro ceases to be the lawful currency of any EU member state.

In such circumstances, the Index Sponsor may take action to preserve the intended commercial purpose of the Index, including to: (i) make such determinations or adjustments to the Index to account for such Disruption Event, (ii) postpone any Basket Rebalancing, (iii) determine that the value of a Relevant Underlying for the period during which a Disruption Event is continuing shall be the value of such Relevant Underlying immediately prior to the occurrence of the Disruption Event, (iv) suspend or terminate the publication of the Index Value, (v) publish an indicative Index Value, and/or (vi) remove and/or replace any affected Relevant Underlying.

Certain events may occur in respect of a Component Stock which affect the performance by the Index Sponsor or Index Calculation Agent of its obligations in respect of the Index or related hedging arrangements (each, a "**Disruption Event**" for a Component Stock only), including the following:

- (i) a prohibition or restriction or other adverse impact on short-selling a Component Stock, or on obtaining or offering synthetic exposure to a Component Stock, as a result of a change in law;
- (ii) a limitation or suspension on trading in a Component Stock imposed by the relevant exchange; or
- (iii) the adoption of or change to sanctions or restrictions which adversely impacts obtaining or offering synthetic exposure to a Component Stock.

In such circumstances, the Index Sponsor may take action to preserve the intended commercial purpose of the Index, including to: (i) exclude temporarily or permanently the affected Component Stock from the Index, and/or (ii) make such other adjustments to the terms of the Index to account for the Disruption Event.

Certain events may occur in respect of Input Data which affect the performance by the Index Sponsor or Index Calculation Agent of its obligations in respect of the Index (each, a "**Disruption Event**" for Input Data only), including the following:

- (i) a party responsible for collecting, calculating, distributing or publishing Input Data (the "**Input Data Provider**") has ceased or will cease to publish Input Data;
- (ii) there is a material change in the formula or method for calculating, or the content or frequency of publication of, Input Data; or
- (iii) the Input Data Provider fails to calculate, publish or deliver Input Data or delivers incomplete Input Data.

In such circumstances, the Index Sponsor may take certain actions, including to: (i) use Input Data last published by the Input Data Provider, (ii) remove and/or replace any affected Relevant Underlying either permanently or temporarily, (iii) use information or data from an alternative data source, (iv) make adjustments to the Index as it determines necessary to account for the Disruption Event, and/or (iv) terminate the publication of the Index Value.

Certain events may occur in respect of a currency exchange rate which affect the performance by the Index Sponsor or Index Calculation Agent of its obligations in respect of the Index (each, a "**Disruption Event**" for a currency exchange rate only), including the following:

- (i) a suspension of or limitation on trading on the relevant interbank market of a relevant currency exchange rate;
- (ii) a relevant currency exchange rate splits into multiple currency exchange rates;
- (iii) it is or becomes impossible to deliver the Index Currency (A) from accounts inside a relevant jurisdiction to accounts outside such jurisdiction, (B) between accounts inside such jurisdiction, or (C) to a party that is not resident in such jurisdiction;
- (iv) an event of default or other similar event in respect of any security or indebtedness for borrowed money of, or guaranteed by, a relevant governmental authority;
- (v) it is or becomes impossible or not reasonably practicable for the Index Sponsor or its affiliates to obtain a relevant currency exchange rate from its typical source;
- (vi) any expropriation, confiscation, requisition, nationalisation or other action by a relevant governmental authority occurs which deprives the Index Sponsor or its affiliates of its assets in any relevant jurisdiction; or
- (vii) a relevant currency exchange rate and/or Index Currency ceases to exist and is replaced by a new currency.

In such circumstances, the Index Sponsor may take action to preserve the intended commercial purpose of the Index, including to: (i) make such determinations or adjustments to the Index to account for such Disruption Event, (ii) postpone any Basket Rebalancing, (iii) determine that the value of a currency exchange rate for the period during which a Disruption Event is continuing shall be the value of such currency exchange rate immediately prior to the occurrence of the Disruption Event, (iv) suspend or terminate the publication of the Index Value, (v) publish an indicative Index Value, and/or (vi) remove and/or replace any affected currency exchange rate.

(c) **Corrections**

In the event that the value of any Component Stock or currency exchange rate which is utilised for any calculation or determination in respect of the Index is subsequently corrected, the Index Calculation Agent may use such corrected value or rate for the purpose of such calculation or determination and may adjust prior calculations or determinations. In making any such corrections or adjustments, the Index Calculation Agent will act in accordance with its error policy, a summary of which is available from the Index Calculation Agent upon request.

(d) **Changes in Index Methodology**

The Index Sponsor reserves the right to make changes to the methodology of the Index, including (i) to correct, cure or supplement any error, ambiguity, or contradictory or defective provision in the Index Rules, (ii) to change the frequency of calculation of the Index Value, (iii) to make modifications to the Index in order to continue calculating the Index Value if market, legal, regulatory, judicial, financial, fiscal or other circumstances arise which were not reasonably foreseeable or deliberately caused by the Index Sponsor and which would otherwise prevent the Index Value from being calculated, (iv) to preserve the commercial purpose of the Index where such changes are of a formal, minor or technical nature, or to increase the transparency of the Index Rules, and/or (v) to preserve the Index Sponsor's or its affiliates' ability to hedge the Index, Component Stocks and/or Input Data and maintain such Index as tradeable and replicable. The Index Sponsor will ensure that any such modifications will result in a methodology that is consistent with the commercial purpose of the Index.

Upon changing the methodology of the Index, the Index Sponsor will post details of such change on the website specified in the Index Supplement.

7. Overview of Conflicts of Interest

Goldman Sachs has multiple roles in connection with the Index, which include (a) calculating and publishing the Index Value and making certain determinations, and (b) engaging in a range of activities

in its business as a full service financial services group which could affect the value of the Index or a Component Stock, which may give rise to potential conflicts of interest. In such capacities, it has the power to make determinations that are final, conclusive and binding and that could materially affect the Index Value. It does not owe any person any fiduciary duties in respect of the Index and is not required to take the interests of any person into account.

INVESTORS IN ANY PRODUCTS LINKED TO THE INDEX MUST READ AND UNDERSTAND THE INDEX RULES SETTING OUT THE COMPLETE METHODOLOGY, ADJUSTMENTS, RISK FACTORS, DISCLAIMERS AND CONFLICTS OF INTEREST APPLICABLE TO THE INDEX, COPIES OF WHICH WILL BE MADE AVAILABLE ON THE WEBSITE SPECIFIED IN THE INDEX SUPPLEMENT. IN PARTICULAR, AN INVESTOR MUST PAY PARTICULAR ATTENTION TO THE CONFLICTS OF INTEREST APPLICABLE TO THE INDEX SET OUT IN THE INDEX RULES.

GOLDMAN SACHS FUND BASKET STRATEGIES

INDEX DESCRIPTION

Dated: 1 February 2021

The information set out in this Index Description is an overview of the Goldman Sachs Fund Basket Strategies and must be read in conjunction with the Index Rules (as defined below). This Index Description is intended to highlight essential characteristics of the Goldman Sachs Fund Basket Strategies and do not purport to be complete. It is summarised from, and is qualified in its entirety by, the Index Rules (as defined below).

1. Introduction

The Goldman Sachs Fund Basket Strategies (each, a "**Strategy**" and together, the "**Strategies**") are a group of notional rules-based proprietary strategies which Goldman Sachs International (or its successor(s)) (the "**Strategy Sponsor**") may create from time to time. Goldman Sachs International (or its successor(s)) will also act as the strategy calculation agent in calculating and publishing a Strategy (the "**Strategy Calculation Agent**"). References in this Index Description to "the Strategy" shall mean the relevant Strategy.

The complete rules and methodology applicable to the Strategy (the "**Index Rules**") will be made available on request by an investor in Securities linked to the Strategy, and notices in respect of the Strategy will be made available on the website specified in the relevant Strategy Supplement (as defined below). The Index Rules comprise the following documentation elements:

- (i) the Goldman Sachs Common Strategy Terms dated 23 February 2017 (or any successor version);
- (ii) the General Description of the Goldman Sachs Quantity-Based Basket Strategies dated 20 September 2013 (or any successor version); and
- (iii) the relevant "strategy supplement" document describing the parameters which apply to a particular Strategy and each document describing the assets in the Basket (as defined below) referred to therein (the "**Strategy Supplement**").

Below, we describe:

- (a) the objective and overview of the Strategy (section 2);
- (b) how the Asset Values are calculated (section 3);
- (c) the rebalancing of the Basket and how the Basket Value is calculated (section 4);
- (d) how the Strategy Value is calculated (section 5);
- (e) the effect of the deductions of Asset Servicing Costs, Basket Rebalancing Costs and Strategy Deduction Amounts (section 6);
- (f) the consequences of certain disruption events and potential adjustment events, corrections to the Strategy and changes to the Strategy methodology (section 7); and
- (g) an overview of conflicts of interest (section 8).

2. Objective and Overview of the Strategy

The Strategy intends to provide a synthetic exposure to the performance of a basket (the "**Basket**") of underlying funds (the "**Assets**"). The Strategy tracks the performance of the dynamically weighted Basket, which will be rebalanced on a regular basis on specified days set out in the Strategy Supplement (each a "**Basket Rebalancing Day**"). The exposure assigned to each Asset (the "**Asset Quantity**") is not fixed and will be dynamically determined on each Basket Rebalancing Day. The Strategy will have a long exposure to each of the Assets. The Strategy is calculated on a total return basis.

The Strategy is denominated in the currency specified in the Strategy Supplement (the "**Strategy Currency**"). Each Asset is also denominated in the Strategy Currency.

The calculation of the Strategy value may include deductions that are intended to synthetically reflect the transaction and servicing costs that a hypothetical investor would incur if such hypothetical investor were to enter into and maintain a series of direct investment positions to provide the same exposure to the Assets as the Strategy. As a result, the value of the Strategy is reduced from time to time by these deductions. Investors should note that the actual costs of hedging the exposure to the Strategy may be lower or higher than such deductions. If they were lower, this may result in investors being in a worse position than if they were to maintain direct investment positions in the Assets. In such case, the effect of these deductions would be to benefit the Strategy Sponsor and/or any affiliate (each, a "**Hedging Party**"). A further amount calculated by reference to the Strategy Deduction Rate will also be deducted, which will have the effect of reducing the value of the Strategy.

The Strategy will be reviewed regularly in accordance with the Strategy Sponsor's internal policies. As of the date of this index description, the review frequency is annual.

The Strategy, including the methodology and underlying assumptions, may not be successful in achieving its objective or in producing positive returns, and may not outperform any alternative investment strategy.

3. Calculation of Asset Values

In order to determine the value of the Strategy (the "**Strategy Value**"), the Strategy Calculation Agent must determine the value of the Basket (the "**Basket Value**"), which is in turn calculated by reference to the value of each Asset (the "**Asset Value**"). The Assets included in the Basket will be specified in the Strategy Supplement. The Asset Value of an Asset will be determined on each Asset Business Day starting from the Asset Inception Date. Each of "**Asset Business Day**" and "**Asset Inception Date**" shall be as specified in the Strategy Supplement.

The Asset Value of an Asset on the Asset Inception Date shall be as specified in the Strategy Supplement. Thereafter, the Asset Value of an Asset in respect of an Asset Business Day falling after the Asset Inception Date shall be calculated as the *product* of (i) the Asset Value of such Asset on the Asset Rebalancing Day immediately preceding such Asset Business Day *multiplied* by (ii) the *quotient* of (a) the Adjusted Reference Level of such Asset on such Asset Business Day, *divided* by (b) the Adjusted Reference Level of such Asset on the Asset Rebalancing Day immediately preceding such Asset Business Day. The "**Adjusted Reference Level**" of an Asset is equal to the net asset value per share or unit of such Asset as made available by the relevant service provider (the "**Asset Service Provider**"), adjusted for any subscription or redemption costs or dealing charges that would have been charged to a hypothetical investor in such Asset, and further adjusted to reflect the occurrence of any Potential Adjustment Event (as defined below). The Asset Value of an Asset on a day which is not an Asset Business Day shall be the Asset Value of such Asset in respect of the immediately preceding Asset Business Day.

In respect of an Asset, "**Asset Rebalancing Day**" means each Asset Business Day in respect of such Asset on which both the Asset Value and the Adjusted Reference Level of such Asset are greater than zero.

4. Rebalancing of the Basket and Calculation of Basket Value

(i) Rebalancing of the Basket

The Basket will be rebalanced on a regular basis on the specified Basket Rebalancing Days by changing the Asset Quantity of each Asset in the Basket.

The Asset Quantity of an Asset shall be, in respect of: (a) the Basket Inception Date, equal to the *quotient* of (I) the *product* of (A) the "Asset Weight" of such Asset specified in the Strategy Supplement, *multiplied* by (B) the Basket Initial Value specified in the Strategy Supplement, *divided* by (II) its Asset Value on the Asset Inception Date, (b) each Basket Rebalancing Day falling after the Basket Inception Date, equal to the *quotient* of (I) the *product* of (A) its Asset Weight, *multiplied* by (B) the Basket Value on the Basket Observation Day immediately preceding such Basket Rebalancing Day, *divided* by (II) its Asset Value on such Basket

Observation Day, and (c) a Basket Business Day falling after the Basket Inception Date that is not a Basket Rebalancing Day, equal to the Asset Quantity of such Asset in respect of the Basket Rebalancing Day immediately preceding such Basket Business Day. Each of "**Basket Observation Day**", "**Basket Business Day**" and "**Basket Inception Date**" shall be as specified in the Strategy Supplement.

The Asset Quantity of an Asset will be positive and therefore, the Strategy will have a long exposure to each Asset in the Basket. The sum of the actual weights of all Assets may be greater than, equal to, or less than 100 per cent. The Strategy will provide a leveraged exposure to the Assets if such sum exceeds 100 per cent. If on any Basket Business Day, the Basket Value or the Asset Value in respect of an Asset is equal to or less than zero, no further Basket Rebalancing Day will occur on or after such day.

(ii) **Calculation of Basket Value**

The Basket Value is calculated on each Basket Business Day from the Basket Inception Date.

The Basket Value as of the Basket Inception Date is as specified in the Strategy Supplement. The Basket Value on a Basket Business Day falling after the Basket Inception Date is calculated as the *sum* of (a) the aggregate of the weighted values of all the Assets on such Basket Business Day, in each case being the *product* of (I) the Asset Quantity of such Asset on such Basket Business Day, *multiplied* by (II) its Asset Value on such Basket Business Day, *plus* (b) the *product* of (I) the Cash Asset Quantity on such Basket Business Day, *multiplied* by (II) the Cash Asset Value on such Basket Business Day. The Basket Value is floored at zero. If the Basket Value in respect of a Basket Business Day would be zero or less than zero, then the Basket Value in respect of such Basket Business Day and all following Basket Business Days shall be zero.

The "**Cash Asset Value**" on any Basket Business Day is equal to the value of a notional rules-based notional rules-based proprietary index calculated by Goldman Sachs International as index sponsor (the "**Money Market Index**"), which reflects a notional amount in the Strategy Currency which accrues interest compounded on a daily basis. Further details in respect of the Money Market Index will be as specified in the Strategy Supplement and made available on request by an investor in any product linked to the Strategy.

The "**Cash Asset Quantity**" on the Basket Inception Date is calculated as the *quotient* of (a) the *difference* between (I) the Basket Value on the Basket Inception Date *minus* (II) the aggregate of the weighted values of the Assets on the Basket Inception Date, *divided* by (b) the Cash Asset Value on the Basket Inception Date.

Thereafter, the Cash Asset Quantity in respect of each Basket Business Day falling after the Basket Inception Date shall be: (a) if such Basket Business Day is not a Basket Rebalancing Day, equal to the *difference* between (I) the Cash Asset Quantity on the Basket Rebalancing Day immediately preceding such Basket Business Day *minus* (II) the *quotient* of (A) the Asset Servicing Cost in respect of such Basket Business Day *divided* by (B) the Cash Asset Value on such Basket Business Day, or (b) if such Basket Business Day is a Basket Rebalancing Day, equal to the *sum* of (I) the Cash Asset Quantity on the Basket Rebalancing Day immediately preceding such Basket Business Day *plus* (II) the *quotient* of (A) the *difference* between (1) the aggregate for all the Assets of the *product* of (x) the change in the Asset Quantity of an Asset from the previous Basket Rebalancing Day to such Basket Business Day, *multiplied* by (y) the Asset Value of such Asset on such Basket Business Day, *minus* (2) the Basket Rebalancing Cost and the Asset Servicing Cost in respect of such Basket Business Day, *divided* by (B) the Cash Asset Value on such Basket Business Day.

Therefore, the Cash Asset Quantity will decrease when the exposure of the Basket to an Asset increases and the Cash Asset Quantity will increase when the exposure of the Basket to an Asset decreases.

5. **Calculation of Strategy Value**

The Strategy Value is calculated on each Strategy Business Day from the Strategy Inception Date. Each of "**Strategy Inception Date**" and "**Strategy Business Day**" shall be as specified in the Strategy Supplement.

The Strategy Value as of the Strategy Inception Date is as specified in the Strategy Supplement. On each Strategy Business Day falling after the Strategy Inception Date, the Strategy Value is calculated as the *product* of (i) the Strategy Value on the Strategy Rebalancing Day immediately preceding such Strategy Business Day, *multiplied* by (ii) the *difference* between (a) the *quotient* of (I) the Basket Value on such Strategy Business Day *divided* by (II) the Basket Value on the Strategy Rebalancing Day immediately preceding such Strategy Business Day, *minus* (b) the *product* of (I) the Strategy Deduction Rate multiplied by (II) the applicable day count fraction. "**Strategy Rebalancing Day**" means the Strategy Inception Date and each Strategy Business Day thereafter in respect of which the Basket Value is greater than zero.

The Strategy Value is floored at zero. If the Strategy Value in respect of a Strategy Business Day would be zero or less than zero, then the Strategy Value in respect of such Strategy Business Day and all following Strategy Business Days shall be zero.

The Strategy Value will be published on each Strategy Business Day by the Strategy Calculation Agent on the website and under the ticker specified in the Strategy Supplement. The Strategy Sponsor and/or the Strategy Calculation Agent may at any time and for any reason terminate or discontinue the calculation and publication of the Strategy, publish the Strategy Value on such other sources and/or change the frequency of publication of the Strategy Value.

6. **The effect of the deductions of Asset Servicing Costs, Basket Rebalancing Costs and Strategy Deduction Amounts**

The Strategy Value will be reduced by the following deductions:

- (i) an "**Asset Servicing Cost**", which reflects the notional costs of synthetically maintaining positions in, and replicating the performance of, each Asset included in the Basket. The Asset Servicing Cost for each Asset will be deducted from the Basket Value on each Basket Business Day falling after the Basket Inception Date and will be determined by reference to the "Asset Servicing Cost Rate" specified in the Strategy Supplement;
- (ii) a "**Basket Rebalancing Cost**", which reflects the notional costs synthetically incurred in establishing and unwinding transactions in respect of each Asset when there are changes to the Asset Quantity of such Asset. The Basket Rebalancing Cost will be deducted from the Basket Value on each Basket Rebalancing Day other than the Basket Inception Date and is calculated as the *sum* across all Assets of the *product* of (a) the actual change in the Asset Quantity of each such Asset from the previous Basket Rebalancing Day to such Basket Rebalancing Day, *multiplied* by (b) the Asset Transaction Cost Rate for such Asset as specified in the Strategy Supplement, and further *multiplied* by (c) the Asset Value of such Asset on such Basket Rebalancing Day; and
- (iii) a "**Strategy Deduction Amount**". An amount will be deducted from the Strategy Value on each Strategy Business Day falling after the Strategy Inception Date based on the Strategy Deduction Rate of 0.55 per cent.

Such deductions will act as a drag on the performance of the Strategy.

7. **Disruption Events, Additional Market Disruption Events, Potential Adjustment Events, Corrections and Changes in Strategy Methodology**

(i) **Disruption Events**

Certain events may occur in respect of the Strategy, or the Money Market Index or an Asset (each, a "**Strategy Component**"), which affect the performance by the Strategy Sponsor or Strategy Calculation Agent of its obligations in respect of the Strategy or related hedging arrangements (each, a "**Disruption Event**"), including the following:

- (a) the performance by the Strategy Sponsor or Strategy Calculation Agent of its obligations in respect of the Strategy becomes unlawful, impracticable or would result in materially increased costs to it as a result of a change in law, or any relevant entity is prevented from entering into transactions in respect of the Strategy or a Strategy Component by any applicable law or regulation;
- (b) due to a market-wide condition in respect of the Strategy or a Strategy Component, a market participant is unable to enter into certain hedging arrangements or would incur a materially increased cost in doing so;
- (c) the occurrence of a "force majeure" event such as a systems failure, disaster, act of god, armed conflict, terrorism, etc. that is beyond the reasonable control of the Strategy Sponsor, Strategy Calculation Agent or any of their affiliates that materially impacts a Strategy Component, or the ability to perform obligations in respect of the Strategy;
- (d) (1) the official price or level of a Strategy Component is not available on any day on which it is scheduled to be published, (2) the relevant exchange is not open for trading during its regular trading session or closes prior to its scheduled closing time, (3) a disruption to trading in a Strategy Component, or (4) the value of the Strategy or a Strategy Component is manifestly incorrect; or
- (e) if required, the Strategy Sponsor ceases to have the relevant data licence in respect of a Strategy Component.

Following the determination that a Disruption Event has occurred, the Strategy Sponsor or Strategy Calculation Agent may take any one or more of the following actions: (I) make such determinations or adjustments to the Strategy (including to change the Strategy methodology and data sources) as it deems appropriate to account for such Disruption Event, (II) postpone any applicable rebalancing and make adjustments to the Strategy methodology to account for such postponement, (III) suspend the publication of the Strategy Value, (IV) publish an indicative Strategy Value, or (V) remove and/or replace an affected Strategy Component.

Certain events may occur in respect of the Money Market Index which affect the performance by the Strategy Sponsor or Strategy Calculation Agent of its obligations in respect of the Strategy (each, a "**Disruption Event**" for the Money Market Index only), including the following:

- (a) the Money Market Index is not calculated and announced by its sponsor but rather by a successor sponsor acceptable to the Strategy Sponsor or is replaced by a successor index using the same or substantially similar formula for and method of calculating the Money Market Index;
- (b) the sponsor of the Money Market Index (or component thereof) announces it will make a material change in the formula for or method of calculating the Money Market Index (or component thereof) or otherwise materially modifies the Money Market Index (or component thereof);
- (c) the Money Market Index (or component thereof) is permanently cancelled by its sponsor without any successor index (or successor component thereof), or ceases to exist or is no longer tradable; or
- (d) the sponsor of the Money Market Index (or component thereof) fails to calculate and announce the level of the Money Market Index (or component thereof).

In the case of (a), the Strategy Sponsor may make such adjustments to the terms of the Strategy to account for such change and/or replacement. In the case of (b), (c) or (d), the Strategy Sponsor may remove the Money Market Index and/or select an alternative index to replace the Money Market Index and make adjustments to the Strategy to account for such removal and/or replacement.

(ii) **Additional Market Disruption Events**

Certain events may occur in respect of an Asset which affect the performance by the Strategy Sponsor or Strategy Calculation Agent of its obligations in respect of the Strategy or related hedging arrangements (each, an "**Additional Market Disruption Event**"), including the following:

- (a) a suspension of subscriptions or redemptions in, or a failure to receive timely valuations for, the Asset;
- (b) the total exposure of a Hedging Party and its affiliates to the Asset is greater than 10 per cent. of the assets under management of the Asset ("**AUM**");
- (c) an Asset Service Provider fails to accept or execute subscriptions or redemptions in cash or deliver cash proceeds in a timely manner as specified in the prospectus relating to the Asset (such prospectus, as supplemented from time to time, the "**Asset Document**") and, in any event, within 30 calendar days of a valid redemption request;
- (d) the Asset or its investment advisor is insolvent (or subject to other similar event or proceedings);
- (e) a Hedging Party or its affiliates become liable to any increase in any tax, duty, costs or fees related to trading or holding the Asset;
- (f) (1) any agreement entered into between the Asset and an Asset Service Provider ("**Asset Service Provider Agreement**") is terminated and a replacement Asset Service Provider has not been appointed, (2) an Asset Service Provider has breached its obligations under the Asset Service Provider Agreement which results in an increase in the costs or fees specified in the Asset Documents, or (3) an actual or potential termination of the investment advisory agreement in respect of the Asset;
- (g) a termination, removal or amendment of any agreement or arrangement made by a Hedging Party or its affiliates in respect of the Asset resulting in the Hedging Party or its affiliates becoming liable to increased costs or fees, or a breach of the terms thereof;
- (h) the occurrence or imposition of dealing restrictions in respect of the Asset not described in the Asset Documents;
- (i) a material deviation from the investment guidelines or breach of investment restrictions of the Asset as set out in the Asset Documents;
- (j) a material change to the investment guidelines of the Asset which changes the investment objective of the Asset as set out in the Asset Documents;
- (k) more than 5 per cent. of the AUM in respect of the Asset is invested in unregulated collective investment schemes and the operator thereof has not applied for or obtained authorisation or recognition from, a relevant national regulator;
- (l) the Asset, its investment advisor or an Asset Service Provider is subject to regulatory action, dispute or legal proceedings that has a material adverse effect on the Asset;
- (m) the Asset, its investment advisor or an Asset Service Provider loses any relevant licence or new conditions are imposed on such licence, or has any regulatory authorisation, registration or approval cancelled or suspended, which loss, imposition, cancellation or suspension has a material adverse effect on the Asset;
- (n) due to a change in law (1) it becomes or will become in the next 30 calendar days illegal to purchase or hold interests in, or execute hedging transactions in respect of, the Asset, (2) the regulatory status of the Asset as specified in the Asset Documents has changed, or (3) the Hedging Party or its affiliates have incurred or are reasonably likely to incur a materially increased cost in performing its obligations or executing hedging transactions in respect of the Strategy;

- (o) a change in tax law which affects payments made to investors in or exposed to the Asset;
or
- (p) the net asset value per share or unit of the Asset or the AUM in respect of the Asset fails to reach the threshold specified in the Strategy Supplement, or the annualised daily realised volatility in respect of the Asset surpasses the threshold specified in the Strategy Supplement.

Following the determination that an Additional Market Disruption Event has occurred, the Strategy Sponsor may, among other things, determine amendments to the Strategy or any other Strategy affected by the occurrence of the Additional Market Disruption Event. Such amendments may include, but are not limited to, changes to the type of business days and/or rebalancing days, the levels of an Asset, a suspension in publication of the Strategy Value or a substitution of an Asset with a replacement asset.

(iii) **Potential Adjustment Events**

Following the occurrence of an event having a diluting or concentrative effect on the theoretical value of an Asset (a "**Potential Adjustment Event**") or following any adjustment to the settlement terms of listed options or futures contracts on such Asset traded on an options or futures exchange having such diluting or concentrative effect, the Strategy Sponsor will make corresponding adjustments to the Strategy to account for such diluting or concentrative effect.

(iv) **Corrections**

If a Strategy Component is rebased, otherwise adjusted or modified or a level published or provided to the Strategy Calculation Agent in relation to such Strategy Component is, within a reasonable amount of time after its initial publication or provision, corrected, the Strategy Sponsor or Strategy Calculation Agent may take such actions as it considers appropriate for the purposes of the Strategy in response to such rebasing, adjustment, modification or correction.

In the case of a correction, such steps may not necessarily include a recalculation or other adjustment of any value, weight or quantity of a Strategy Component that was determined prior to such correction. In particular, in the event that the value used to calculate the Asset Quantity in respect of an Asset and a relevant day is subsequently corrected, the Strategy Calculation Agent will not correct the Asset Quantity in respect of such Asset and such day and will instead use the Asset Quantity in respect of such Asset and such day as calculated before such correction.

(v) **Changes in Strategy Methodology**

The Strategy Sponsor reserves the right to make changes to the methodology of the Strategy, including to correct, cure or supplement any error, ambiguity, or contradictory or defective provision in the Index Rules, or to change the frequency of calculation of the Strategy Value or other method of calculation or determination in respect of the Strategy. The Strategy Sponsor will ensure that any such modifications will result in a methodology that is consistent with the commercial purpose of the Strategy.

8. **Overview of Conflicts of Interest**

Goldman Sachs has multiple roles in connection with the Strategy, which include (a) calculating and publishing the Strategy Value and making certain determinations, and (b) engaging in a range of activities in its business as a full service financial services group which could affect the value of the Strategy or a Strategy Component, which may give rise to potential conflicts of interest. In such capacities, it has the power to make determinations that are final, conclusive and binding and that could materially affect the value of the Strategy. It does not owe any person any fiduciary duties in respect of the Strategy and is not required to take the interests of any person into account.

INVESTORS IN ANY PRODUCTS LINKED TO THE STRATEGY MUST READ AND UNDERSTAND THE INDEX RULES SETTING OUT THE COMPLETE METHODOLOGY, ADJUSTMENTS, RISK FACTORS, DISCLAIMERS AND CONFLICTS OF INTEREST APPLICABLE TO THE STRATEGY, COPIES OF WHICH WILL BE PROVIDED ON

REQUEST BY ANY INVESTOR IN ANY PRODUCT LINKED TO THE STRATEGY. IN PARTICULAR, AN INVESTOR MUST PAY PARTICULAR ATTENTION TO THE CONFLICTS OF INTEREST APPLICABLE TO THE STRATEGY SET OUT IN THE INDEX RULES.

FORM OF GSG GUARANTY

THIS GUARANTY is made on 15 July 2022 by **THE GOLDMAN SACHS GROUP, INC.**, a corporation duly organized under the laws of the State of Delaware (the "**Guarantor**").

WHEREAS:

- (A) Goldman Sachs International ("**GSI**"), Goldman, Sachs & Co. Wertpapier GmbH ("**GSW**") and Goldman Sachs Finance Corp International Ltd ("**GSFCI**" and, together with GSI and GSW, the "**Issuers**" and each an "**Issuer**") have instituted the Series P programme for the issuance of warrants (the "**Warrants**"), certificates (the "**Certificates**", and together with the Warrants, the "**Instruments**") and notes (the "**Notes**", and together with the Warrants and the Certificates, the "**Securities**") (the "**Programme**") in connection with which the Issuers and the Guarantor (a) may prepare an Approved Base Prospectus (the "**Approved Base Prospectus**", which expression shall include any supplements thereto and any replacement thereof and any further base prospectus(es) prepared under the Programme), (b) may prepare a Private Placement Memorandum (the "**Private Placement Memorandum**", which expression shall include any supplements thereto and any replacement thereof prepared under the Programme), (c) may prepare an Offering Circular dated on or about the date hereof (the "**Offering Circular**", which expression shall include any supplements thereto and any replacement thereof prepared under the Programme), (d) may (in the case of one or more of the Issuers) prepare one or more further base prospectuses, private placement memoranda and/or offering circulars under the Programme from time to time and (e) may (in the case of one or more Issuers) prepare a securities note (which may or may not include a summary and a registration document, each for the purposes of Article 8 Regulation (EU) 2017/1129 (as amended) or Article 8 Regulation (EU) 2017/1129 (as amended) as it forms part of UK domestic law by virtue of the European Union (Withdrawal) Act 2018 and regulations made thereunder) or separate prospectus for the issuance of any particular Tranche of Securities (each such securities note or separate prospectus, a "**Securities Note**") and entered into (i) in the case of each Issuer, an amended and restated programme agency agreement dated on or around 15 July 2022 (the "**Programme Agency Agreement**", which expression shall include any amendments or supplements thereto or replacement thereof) with Citibank, N.A., London Branch as Principal Programme Agent and Citibank, N.A., London Branch as Fiscal Agent and the other agents named therein; (ii) in the case of each Issuer in relation to Securities issued under the Programme other than PSL Notes which are expressed to be governed under Cayman Islands law, a deed of covenant dated 15 July 2022 (as amended and/or replaced from time to time the "**Deed of Covenant**") and, in the case of GSW or GSFCI in relation to PSL Notes which are expressed to be governed under Cayman Islands law issued under the Programme, a deed of covenant governed under Cayman Islands law dated 15 July 2022 (as amended and/or replaced from time to time the "**Cayman Deed of Covenant**").
- (B) From time to time the Issuers may (in accordance with the Programme Agency Agreement in relation to both Notes and Instruments) issue Tranches of Notes and Instruments under the Programme subject to the terms and conditions described in the relevant Approved Base Prospectus, the Private Placement Memorandum and the Offering Circular, as the case may be, and the relevant Final Terms and the relevant Pricing Supplement (as applicable) or the relevant Securities Note, as the case may be. For the avoidance of doubt, (i) all such Tranches of Notes and Instruments issued by GSFCI will have the benefit of this Guaranty and (ii) in respect of such Tranches of Notes and Instruments issued by GSI or GSW, such Tranches of Notes and Instruments will have the benefit of this Guaranty only where the relevant Final Terms, Pricing Supplement or Securities Note (as the case may be) specifies that the Guarantor of such Notes and Instruments shall be The Goldman Sachs Group, Inc., provided that any such Notes and Instruments which have the benefit of the GSG (Swiss) Guaranty made on 15 July 2022 by The Goldman Sachs Group, Inc (or any successor or replacement to such GSG (Swiss) Guaranty) shall not have the benefit of this Guaranty. As used in this Guaranty (other than the initial reference in Paragraph (A) above), the term "**Securities**" shall mean only such foregoing Notes and Instruments described herein which satisfy both of (i) and (ii) from the preceding paragraph and are not excluded by the proviso to the preceding paragraph, and which therefore have the benefit of this Guaranty.

- (C) The Guarantor has determined to execute this Guaranty of the payment obligations of GSI, GSW and GSFCI in respect of the Securities for the benefit of the Holders from time to time of the Securities.
- (D) Terms defined in the Approved Base Prospectus, the Private Placement Memorandum, the Offering Circular and the Programme Agency Agreement shall bear the same meaning in this Guaranty.

THE GUARANTOR hereby agrees as follows:

1. For value received, the Guarantor hereby unconditionally guarantees to the Holder of each Security the payment obligations of GSI, GSW and GSFCI in accordance with the terms and conditions of (where relevant) the Programme Agency Agreement, the Deed of Covenant, the Cayman Deed of Covenant and the Securities. In the case of failure of GSI and/or GSW and/or GSFCI punctually to make payment of any Settlement Amount or Redemption Amount, any Interest Amount or any other amount payable under the terms and conditions of the Securities, the Guarantor hereby agrees to cause any such payment to be made promptly when and as the same shall become due and payable as if such payment was made by GSI and/or GSW and/or GSFCI in accordance with the terms and conditions of the Securities. In the case of Securities providing for Physical Settlement, the Guarantor is obligated only to make payment of the Physical Settlement Disruption Amount in lieu of delivering any Deliverable Assets.
2. Any Securities issued by GSI, GSW or GSFCI under the Programme on or after the date hereof shall have the benefit of this Guaranty but shall not have the benefit of any subsequent guaranty by the Guarantor relating to Securities issued by GSI, GSW or GSFCI under the Programme on or after the date of such subsequent guaranty (unless expressly so provided in any such subsequent guaranty).
3. This Guaranty is one of payment and not of collection.
4. The Guarantor hereby waives notice of acceptance of this Guaranty and notice of any obligation or liability to which it may apply, and waives presentment, demand for payment, protest, notice of dishonour or non-payment of any such obligation or liability, suit or the taking of other action by any Holder against, and any notice to, the Issuers, the Guarantor or any other party.
5. The obligations of the Guarantor hereunder will not be impaired or released by (1) any change in the terms of any obligation or liability of GSI and/or GSW and/or GSFCI under the Programme Agency Agreement, the Deed of Covenant, the Cayman Deed of Covenant (in the case of PSL Notes which are expressed to be governed under Cayman Islands law issued under the Programme), or the Securities (2) the taking of or failure to take any action of any kind in respect of any security for any obligation or liability of GSI and/or GSW and/or GSFCI under the Programme Agency Agreement, the Deed of Covenant, the Cayman Deed of Covenant (in the case of PSL Notes which are expressed to be governed under Cayman Islands law issued under the Programme), or the Securities (3) the exercising or refraining from exercising of any rights against GSI and/or GSW and/or GSFCI or any other party or (4) the compromising or subordinating of any obligation or liability of GSI and/or GSW and/or GSFCI under the Programme Agency Agreement, the Deed of Covenant, the Cayman Deed of Covenant (in the case of PSL Notes which are expressed to be governed under Cayman Islands law issued under the Programme), or the Securities, including any security therefor.
6. Upon any assignment or delegation of GSI's and/or GSW's and/or GSFCI's rights and obligations under the Securities pursuant to the terms and conditions of the Securities to a partnership, corporation, trust or other organization in whatever form (the "**Substitute Issuer**") that assumes the obligations of GSI and/or GSW and/or GSFCI under the Securities by contract, operation of law or otherwise, this Guaranty shall remain in full force and effect and thereafter be construed as if each reference herein to the Issuer was a reference to the Substitute Issuer.
7. The Guarantor may not assign its rights nor delegate its obligations under this Guaranty in whole or in part, except for (i) an assignment and delegation of all of the Guarantor's rights and obligation hereunder to another entity in whatever form that succeeds to all or substantially all of the Guarantor's assets and business and that assumes such obligations by contract, operations

of law or otherwise; or (ii) a transfer of this Guaranty or any interest or obligations of the Guarantor in or under this Guaranty to another entity as transferee as part of the resolution, restructuring, or reorganization of the Guarantor upon or following the Guarantor becoming subject to a receivership, insolvency, liquidation, resolution, or similar proceeding. Upon any such delegation and assumption of obligations, the Guarantor shall be relieved of and fully discharged from all obligations hereunder.

8. Notwithstanding anything contained herein, in the event the Guarantor becomes subject to a proceeding under the Federal Deposit Insurance Act or Title II of the Dodd-Frank Wall Street Reform and Consumer Protection Act (together, the "**U.S. Special Resolution Regimes**"), the transfer of the Guaranty and any interest and obligation in or under the Guaranty, from the Guarantor will be effective to the same extent as the transfer would be effective under such U.S. Special Resolution Regime if the Guaranty, and any interest and obligation in or under the Guaranty, were governed by the laws of the United States or a state of the United States. In the event the Issuer or the Guarantor, or any of their affiliates, becomes subject to a U.S. Special Resolution Regime, default rights against the Issuer or the Guarantor and the Guaranty are permitted to be exercised to no greater extent than such default rights could be exercised under such U.S. Special Resolution Regime if the Securities and the Guaranty were governed by the laws of the United States or a state of the United States.
9. **THIS GUARANTY SHALL BE GOVERNED BY AND CONSTRUED IN ACCORDANCE WITH THE LAWS OF THE STATE OF NEW YORK.**

THE GOLDMAN SACHS GROUP, INC.

By:

Authorized Officer

FORM OF GSI GUARANTEE

THIS GUARANTEE is made by way of deed on 18 November 2022 by **GOLDMAN SACHS INTERNATIONAL**, a company incorporated with unlimited liability in England ("**GSI**" or the "**Guarantor**").

WHEREAS:

- (A) Under the Series P Programme for the Issuance of Warrants, Notes and Certificates (the "**Programme**"), GSI, Goldman Sachs Finance Corp International Ltd ("**GSFCI**") and Goldman, Sachs & Co. Wertpapier GmbH ("**GSW**") (the "**Issuers**" and each an "**Issuer**") may from time to time issue warrants (the "**Warrants**"), certificates (the "**Certificates**"), and together with the Warrants, the "**Instruments**") and notes (the "**Notes**", and together with the Warrants and the Certificates, the "**Securities**").
- (B) In connection with the issuance of Securities from time to time, the Issuers have each entered into an amended and restated programme agency agreement in relation to the Securities dated on or about the date hereof (as amended and/or replaced from time to time, the "**Programme Agency Agreement**") and (ii) (in the case of each Issuer in relation to Securities issued under the Programme other than PSL Notes which are expressed to be governed under Cayman Islands law ("**PSL Notes (Cayman Islands Law)**")), a deed of covenant dated on or about the date hereof (as amended and/or replaced from time to time the "**Deed of Covenant**") (the foregoing, together, the "**Programme Documents**").
- (C) From time to time the Issuers may (in accordance with the Programme Agency Agreement) issue Tranches of Securities under the Programme subject to the terms and conditions described in the relevant (a) Approved Base Prospectus (the "**Approved Base Prospectus**", which expression shall include any supplements thereto and any replacement thereof and any further base prospectus(es) prepared under the Programme), (b) Private Placement Memorandum (the "**Private Placement Memorandum**", which expression shall include any supplements thereto and any replacement thereof prepared under the Programme), (c) Offering Circular dated on or about the date hereof (the "**Offering Circular**", which expression shall include any supplements thereto and any replacement thereof prepared under the Programme), (d) one or more further base prospectuses, private placement memoranda and/or offering circulars under the Programme from time to time and (e) securities note (which may or may not include a summary and a registration document, each for the purposes of Article 8 Regulation (EU) 2017/1129 (as amended) or Article 8 Regulation (EU) 2017/1129 (as amended) as it forms part of UK domestic law by virtue of the European Union (Withdrawal) Act 2018 and regulations made thereunder) or separate prospectus for the issuance of any particular Tranche of Securities (each such securities note or separate prospectus, a "**Securities Note**"), as the case may be, and the relevant Issue Terms or the relevant Securities Note, as the case may be. For the avoidance of doubt, all such Tranches of Securities, other than in respect of (i) PSL Notes (Cayman Islands law) issued by GSW, and (ii) such Tranches of Securities issued by GSW where such Securities are Swiss Securities and the relevant Issue Terms or Securities Note (as the case may be) specifies that (a) the Guarantor of such Securities shall be Goldman Sachs International and (b) that any such Securities will have the benefit of the GSI (Swiss law) Guarantee made on 18 November 2022 by Goldman Sachs International (or any successor or replacement to such GSI (Swiss) Guarantee), will have the benefit of this Guarantee.
- (D) The Guarantor wishes to enter into this Guarantee in relation to GSW's payment obligations in respect of the Securities (other than in respect of (i) PSL Notes (Cayman Islands law) and (ii) Swiss Securities that have the benefit of the GSI (Swiss) Guarantee) (for which the Guarantor has entered into separate guarantees) or in respect of Securities guaranteed by The Goldman Sachs Group, Inc. (for which The Goldman Sachs Group, Inc. has entered into a separate guarantee)) issued by GSW and in respect of which the relevant Issue Terms or Securities Note (as the case may be) specifies that the Guarantor of such Securities shall be Goldman Sachs International, for the benefit of the Holders thereof from time to time. Securities having the benefit of this Guarantee as described in this paragraph shall be referred to in this Guarantee as "**Relevant Securities**".

THE GUARANTOR hereby agrees as follows:

- (1) Terms defined in any relevant Programme Agency Agreement or in the Conditions (which term is defined in the Programme Agency Agreement) shall have the same meaning in this Guarantee (including in the recitals hereto), unless expressly defined otherwise in this Guarantee. Terms defined in the recitals hereto shall have the same meaning when used in this Guarantee.
- (2) Subject as provided below, the Guarantor hereby unconditionally guarantees by way of deed poll to the Holder of each Relevant Security the payment obligations of GSW when due in accordance with the terms and conditions of the applicable Programme Documents and the Conditions of the Relevant Securities (the "**Obligations**"). In the case of failure of GSW punctually to make payment of any Settlement Amount or Redemption Amount, any Interest Amount or any other amount payable under the Conditions of the Relevant Securities, the Guarantor hereby agrees to cause any such payment to be made promptly when and as the same shall become due and payable as if such payment were made by GSW in accordance with the Conditions of the Relevant Securities (following the failure of GSW to punctually make such payment). In the case of Relevant Securities providing for Physical Settlement, the Guarantor hereby unconditionally guarantees by way of deed poll to the Holder of each Relevant Security that, following the failure of GSW to make any delivery of Deliverable Assets deliverable under the Conditions of the Relevant Securities when due, the Guarantor shall make payment of the Physical Settlement Disruption Amount in lieu of delivering any Deliverable Assets (and, for avoidance of doubt, the Guarantor shall not be obligated to deliver any Deliverable Assets).
- (3) The Guarantor hereby waives notice of acceptance of this Guarantee and notice of the Obligations, and waives presentment, demand for payment, protest, notice of dishonour or non-payment of the Obligations, suit or petition or the taking of other action by GSW against, and any other notice to, the Guarantor or others.
- (4) GSW may at any time and from time to time without notice to or consent of the Guarantor and without impairing or releasing the obligations of the Guarantor hereunder: (a) make any change in the terms of the Obligations; (b) take or fail to take any action of any kind in respect of any security for the Obligations; (c) exercise or refrain from exercising any rights against others in respect of the Obligations; or (d) compromise or subordinate the Obligations, including any security therefor. Further, the obligations of the Guarantor hereunder will not be impaired or released by: (a) the status of GSW as the debtor or subject of a bankruptcy or insolvency proceeding; (b) the rendering of any judgment against GSW or any action to enforce the same; or (c) any admission by GSW in writing of its inability to pay or meet its debts as they may mature or if proceedings are initiated against GSW under any applicable insolvency or bankruptcy laws or GSW convenes a meeting of its creditors or makes or proposes to make any arrangements or compositions with or any assignment for the benefit of its creditors. Any other suretyship defences which, but for this provision might operate to release or otherwise exonerate the Guarantor from any of its obligations under this Guarantee, are hereby waived by the Guarantor.
- (5) The Guarantor (a) shall have the right, upon receipt of a demand under this Guarantee by a Holder, to assume the rights and payment obligations of GSW to such Holder, together with any right of GSW to cure any event of default by or relating to GSW, notwithstanding any notice of default/termination previously sent by such Holder to GSW, and thereby rescind any notice of default/termination given by such Holder, and (b) shall be subrogated to all rights of the Holders against GSW in respect of any amounts paid by the Guarantor pursuant to the provisions of this Guarantee; provided, however, that the Guarantor shall not be entitled to enforce or to receive any payments arising out of, or based upon, such right of subrogation until all amounts due and payable by GSW to the Beneficiaries in respect of the obligations subject to the aforesaid demand for payment, up to the time of such subrogation, have been paid in full.
- (6) The Guarantor may not assign its rights nor delegate its obligations under this Guarantee, in whole or in part, without prior written consent of the GSW, and any purported assignment or delegation absent such consent is void, except for an assignment and delegation of all of the Guarantor's rights and obligations hereunder in whatever form the Guarantor determines may be appropriate to a partnership, corporation, trust or other organization in whatever form that succeeds to all or substantially all of the Guarantor's assets and business and that assumes such obligations by contract, operation of law or otherwise. Upon any such delegation and assumption of obligations, the Guarantor shall be relieved of and fully discharged from all

obligations hereunder, whether such obligations arose before or after such delegation and assumption.

- (7) Upon any assignment or delegation of GSW's rights and obligations under the Relevant Securities pursuant to the terms and conditions of the Relevant Securities to a partnership, corporation, trust or other organization in whatever form (the "**Substitute Issuer**") that assumes the obligations of GSW under the Relevant Securities by contract, operation of law or otherwise, this Guarantee shall remain in full force and effect and thereafter be construed as if each reference herein to GSW was a reference to the Substitute Issuer.
- (8) Any Relevant Securities issued by GSW under the Programme on or after the date hereof shall have the benefit of this Guarantee but shall not have the benefit of any subsequent guarantee by the Guarantor relating to Relevant Securities issued by GSW under the Programme on or after the date of such subsequent guarantee (unless expressly so provided in any such subsequent guarantee). This Guarantee shall continue in full force and effect until the opening of business on the fifth business day after GSW receives written notice of termination from the Guarantor. It is also understood and agreed, however, that notwithstanding any such termination or amendment to the Obligations this Guarantee shall continue in full force and effect with respect to all Obligations which shall have been incurred prior to such termination or amendment.
- (9) Notwithstanding anything contained herein, in the event the Guarantor becomes subject to a proceeding under the Federal Deposit Insurance Act or Title II of the Dodd-Frank Wall Street Reform and Consumer Protection Act (together, the "**U.S. Special Resolution Regimes**"), the transfer of the Guarantee and any interest and obligation in or under the Guarantee, from the Guarantor will be effective to the same extent as the transfer would be effective under such U.S. Special Resolution Regime if the Guarantee, and any interest and obligation in or under the Guarantee, were governed by the laws of the United States or a state of the United States. In the event the Issuer or the Guarantor, or any of their affiliates, becomes subject to a U.S. Special Resolution Regime, default rights against the Issuer or the Guarantor and the Guarantee are permitted to be exercised to no greater extent than such default rights could be exercised under such U.S. Special Resolution Regime if the Relevant Securities and the Guarantee were governed by the laws of the United States or a state of the United States.
- (10) This Guarantee and any non-contractual obligations arising out of or in connection herewith shall be governed by and construed in accordance with English law.
- (11) The Courts of England are to have jurisdiction to settle any disputes, controversy, proceedings or claim of whatever nature that may arise out of or in connection with this Guarantee (including its formation) and accordingly any such legal action or proceedings ("**Proceedings**") may be brought in such courts. Each of GSW and the Guarantor irrevocably submits to the jurisdiction of the courts of England and waives any objection to Proceedings in such courts on the ground of venue or on the ground that the Proceedings have been brought in an inconvenient forum. This clause is for the benefit of each of the Holders of the Relevant Securities and shall not affect the right of any of them to take Proceedings in any other court of competent jurisdiction nor shall the taking of Proceedings in one or more jurisdictions preclude the taking of Proceedings in any other jurisdiction (whether concurrently or not).
- (12) No person shall have any right to enforce any term or Condition of this Guarantee under the Contracts (Rights of Third Parties) Act 1999.

IN WITNESS whereof this Guarantee has been executed and delivered by Goldman Sachs International as a deed on the date first before written.

Occupation:

FORM OF GSI (CAYMAN) GUARANTEE

THIS GUARANTEE is made on 15 July 2022 by **GOLDMAN SACHS INTERNATIONAL**, a company incorporated with unlimited liability in England ("**GSI**" or the "**Guarantor**").

WHEREAS:

- (A) Under the Series P Programme for the Issuance of Warrants, Notes and Certificates (the "**Programme**"), Goldman, Sachs & Co. Wertpapier GmbH ("**GSW**" or the "**Issuer**") may from time to time issue Securities, which are (i) specified to be PSL Notes and (ii) expressed to be governed under Cayman Islands law, in each case in accordance with the Conditions of such securities (such Securities, the "**PSL Notes (Cayman Islands law)**").
- (B) The PSL Notes (Cayman Islands law) shall be issued pursuant to (i) a deed of covenant governed under Cayman Islands law dated on or around the date hereof (as amended and/or replaced from time to time the "**Cayman Deed of Covenant**"); and (ii) an amended and restated programme agency agreement in relation to the Securities dated on or around the date hereof (as amended and/or replaced from time to time, the "**Programme Agency Agreement**") with Citibank, N.A., London Branch as Fiscal Agent and the other agents named therein.
- (C) The Guarantor wishes to enter into this Guarantee in relation to GSW's payment obligations in respect of the PSL Notes (Cayman Islands law) (but not any other Securities under the Programme) for the benefit of the Holders thereof from time to time. The Guarantor has entered into a separate guarantee in relation to Securities other than PSL Notes (Cayman Islands law).
- (D) Each of the PSL Notes (Cayman Islands law) of a series will have the benefit of this Guarantee only where the relevant Final Terms, Pricing Supplement or Securities Note (as applicable and as defined in the Programme Agency Agreement referred to below) ("**Relevant Issue Document**") in respect of such PSL Notes (Cayman Islands law) specifies that the Guarantor of such PSL Notes (Cayman Islands law) shall be Goldman Sachs International (such PSL Notes (Cayman Islands law) are referred to in this Guarantee as "Relevant Securities" and each, a "Relevant Security"). For the avoidance of doubt, if the Relevant Issue Document in respect of such PSL Notes (Cayman Islands law) does not specify that the Guarantor of such PSL Notes (Cayman Islands law) shall be Goldman Sachs International (for example, if the Relevant Issue Document specifies a different guarantor of such PSL Notes (Cayman Islands law)) then such PSL Notes (Cayman Islands law) will not have the benefit of this Guarantee (and such PSL Notes (Cayman Islands law) will not be "Relevant Securities" hereunder).

THE GUARANTOR hereby agrees as follows:

- (1) Subject as provided in paragraph 2 below, for value received, the Guarantor hereby unconditionally guarantees to the Holder of each Relevant Security the payment obligations of GSW when due in accordance with the terms and conditions of the Cayman Deed of Covenant and the Programme Agency Agreement and the Conditions of the Relevant Securities. In the case of failure of GSW punctually to make payment of any Settlement Amount or Redemption Amount, any Interest Amount or any other amount payable under the Conditions of the Relevant Securities, the Guarantor hereby agrees to cause any such payment to be made promptly when and as the same shall become due and payable as if such payment was made by GSW in accordance with the Conditions of the Relevant Securities (following the failure of GSW to punctually make such payment). In the case of Relevant Securities providing for Physical Settlement, the Guarantor is obligated only to make payment of the Physical Settlement Disruption Amount in lieu of delivering any Deliverable Assets. This Guarantee is one of payment and not of collection.
- (2) Any Relevant Securities issued by GSW under the Programme on or after the date hereof shall have the benefit of this Guarantee but shall not have the benefit of any subsequent guarantee by the Guarantor relating to Relevant Securities issued by GSW under the Programme on or after the date of such subsequent guarantee (unless expressly so provided in any such subsequent guarantee).

- (3) The Guarantor hereby waives notice of acceptance of this Guarantee and notice of any obligation or liability to which it may apply, and waives presentment, demand for payment, protest, notice of dishonour or non-payment of any such obligation or liability, suit or the taking of other action by any Holder against, and any notice to, the Issuer, the Guarantor or any other party.
- (4) The obligations of the Guarantor hereunder will not be impaired or released by (1) any change in the terms of any obligation or liability of GSW under the Programme Agency Agreement, the Cayman Deed of Covenant, the Programme Agency Agreement, or the Relevant Securities, (2) the taking of or failure to take any action of any kind in respect of any security for any obligation or liability of GSW under the Cayman Deed of Covenant, the Programme Agency Agreement or the Relevant Securities, (3) the exercising or refraining from exercising of any rights against GSW or any other party or (4) the compromising or subordinating of any obligation or liability of GSW under the Programme Agency Agreement, the Deed of Covenant, the Cayman Deed of Covenant, or the Relevant Securities, including any security therefor. Any other suretyship defences are hereby waived by the Guarantor.
- (5) Upon any assignment or delegation of GSW's rights and obligations under the Relevant Securities pursuant to the Conditions of the Relevant Securities to a partnership, corporation, trust or other organization in whatever form (the "**Substitute Issuer**") that assumes the obligations of GSW under the Relevant Securities by contract, operation of law or otherwise, this Guarantee shall remain in full force and effect and thereafter be construed as if each reference herein to the Issuer was a reference to the Substitute Issuer.
- (6) The Guarantor may not assign its rights nor delegate its obligations under this Guarantee in whole or in part, except for an assignment and delegation of all the Guarantor's rights and obligations hereunder to another entity in whatever form that succeeds to all or substantially all of the Guarantor's assets and business and that assumes such obligations by contract, operation of law or otherwise. Upon any such delegation and assumption of obligations, the Guarantor shall be relieved of and fully discharged from all obligations hereunder.
- (7) Terms defined in any relevant Programme Agency Agreement or in the Conditions (which term is defined in the Programme Agency Agreement) shall have the same meaning in this Guarantee (including in the recitals hereto), unless expressly defined otherwise in this Guarantee. Terms defined in the recitals hereto shall have the same meaning when used in this Guarantee.
- (8) Each Holder acknowledges, accepts and agrees as set out in the Schedule attached hereto.
- (9) Notwithstanding anything contained herein, in the event the Guarantor becomes subject to a proceeding under the Federal Deposit Insurance Act or Title II of the Dodd-Frank Wall Street Reform and Consumer Protection Act (together, the "**U.S. Special Resolution Regimes**"), the transfer of the Guarantee and any interest and obligation in or under the Guarantee, from the Guarantor will be effective to the same extent as the transfer would be effective under such U.S. Special Resolution Regime if the Guarantee, and any interest and obligation in or under the Guarantee, were governed by the laws of the United States or a state of the United States. In the event the Issuer or the Guarantor, or any of their affiliates, becomes subject to a U.S. Special Resolution Regime, default rights against the Issuer or the Guarantor and the Guarantee are permitted to be exercised to no greater extent than such default rights could be exercised under such U.S. Special Resolution Regime if the Relevant Securities and the Guarantee were governed by the laws of the United States or a state of the United States.
- (10) **THIS GUARANTEE SHALL BE GOVERNED BY AND CONSTRUED IN ACCORDANCE WITH THE INTERNAL LAWS OF THE STATE OF NEW YORK WITHOUT GIVING EFFECT TO PRINCIPLES OF CONFLICTS OF LAW. THE GUARANTOR AGREES TO THE EXCLUSIVE JURISDICTION OF COURTS LOCATED IN THE STATE OF NEW YORK, UNITED STATES OF AMERICA, OVER ANY DISPUTES ARISING UNDER OR RELATING TO THIS GUARANTEE.**

GOLDMAN SACHS INTERNATIONAL

Authorized Officer

SCHEDULE

Notwithstanding any other terms of this Guarantee or any other agreements, arrangements, or understanding between GSI and any Holder of each Relevant Security (each, a "**Relevant Holder**"), each Relevant Holder acknowledges and accepts that a UK BRRD Liability arising under this Guarantee may be subject to the exercise of UK Bail-in Powers by the Relevant UK Resolution Authority, and acknowledges, accepts, and agrees to be bound by:

- (a) the effect of the exercise of UK Bail-in Powers by the Relevant UK Resolution Authority in relation to any UK BRRD Liability of GSI under this Guarantee, that (without limitation) may include and result in any of the following, or some combination thereof:
 - (i) the reduction of all, or a portion, of the UK BRRD Liability or outstanding amounts due thereon;
 - (ii) the conversion of all, or a portion, of the UK BRRD Liability, as the case may be, into shares, other securities or other obligations of GSI or another person, and the issue to or conferral on the Relevant Holder of such shares, securities or obligations;
 - (iii) the cancellation of the UK BRRD Liability; and/or
 - (iv) the amendment or alteration of any interest, if applicable, thereon, the maturity or the dates on which any payments are due, including by suspending payment for a temporary period; and/or
- (b) the variation of the terms of this Guarantee, as deemed necessary by the Relevant UK Resolution Authority to give effect to the exercise of UK Bail-in Powers by the Relevant UK Resolution Authority.

For these purposes:

"Relevant UK Resolution Authority" means any resolution authority with the ability to exercise any UK Bail-In Powers in relation to GSI;

"UK Bail-In Power" means any statutory write-down and/or conversion power existing from time to time under any laws, regulations, rules or requirements relating to the resolution of banks, banking group companies, credit institutions and/or investment firms incorporated in the United Kingdom in effect and applicable in the United Kingdom to GSI or any of its subsidiaries, including but not limited to any such laws, regulations, rules or requirements that are implemented, adopted or enacted within the context of the Directive 2014/59/EU of the European Parliament and of the Council, establishing a framework for the recovery and resolution of credit institutions and investment firms of May 15, 2014 as it forms part of UK domestic law by virtue of the European Union (Withdrawal) Act 2018 (as amended) and/or within the context of a UK resolution regime under the UK Banking Act, as amended, or otherwise, pursuant to which obligations of a bank, banking group company, credit institution or investment firm or any of its affiliates can be reduced, cancelled and/or converted into shares or other securities or obligations of GSI or any other person, or amended (including amendments to the term, or payment or delivery dates, thereof, or amounts payable (whether on account of interest or otherwise) or assets deliverable thereunder, or the suspension of the payment of such amounts or delivery of such assets for a particular period);

"UK Banking Act" means the UK Banking Act 2009 (as amended) and related statutory instruments; and

"UK BRRD Liability" means a liability in respect of which the UK Bail-in Powers may be exercised.

PSL NOTE DESCRIPTION

This section comprises three parts:

1. Overview of PSL Notes
2. Description of the Preference Share Issuer
3. Description of the Preference Shares

1. OVERVIEW OF PSL NOTES

The PSL Notes are linked to the fair market value of redeemable preference shares (the "**Preference Shares**") of a particular class to be issued from time to time by Goldman Sachs (Cayman) Limited ("**GSCL**"). In particular, the return on, and amount payable under, the PSL Notes will depend on the change in the fair market value of the Preference Shares on the final valuation date from their issue price.

The fair market value of the Preference Shares will depend on the redemption amount and dividends/distributions, if any, payable under the Preference Shares. The redemption amount and, in certain cases, the dividends/distributions, if any, of the Preference Shares will be a particular payout formula, and will be dependent on the performance of one or more underlying assets (the "**Preference Share Underlying**"). The Preference Share Underlying may be shares, indices, currencies, commodities or fund units as specified in the Specific Terms and Conditions of the Preference Shares.

If Preference Share Automatic Early Redemption applies in relation to the applicable Preference Shares, the PSL Notes will redeem early following a Preference Share Automatic Early Redemption Event and the redemption amount payable on the PSL Notes will depend on the fair market value of the Preference Share on the valuation date under the terms and conditions of the Preference Shares (the "**Preference Share Terms and Conditions**") on which the Preference Share Automatic Early Redemption Event occurred.

Potential purchasers of PSL Notes should ensure that they understand the nature of the Preference Shares to which the PSL Notes are linked. The Preference Share Terms and Conditions will be made available to investors upon request to the relevant Issuer or Dealer.

2. DESCRIPTION OF THE PREFERENCE SHARE ISSUER

The following information is provided in respect of Goldman Sachs (Cayman) Limited.

General

GSCL was incorporated as a limited liability company under the laws of the Cayman Islands in the Cayman Islands, on 25 September 2012 to exist for an unlimited duration. GSCL was registered at the Register of Companies Cayman Islands under registered number 271943 and has its registered offices at Maples Corporate Services Limited, PO Box 309, Ugland House, Grand Cayman, KY1-1104, Cayman Islands.

Shareholding

The Authorised Share Capital of GSCL is U.S.\$ 250 divided into 250 ordinary shares of a par value of U.S.\$ 1.00 each and GBP 20,000 divided into 200,000 preference shares of a par value of GBP 0.10. As at the date of this Base Prospectus, all of the issued ordinary shares and the issued preference shares are held by GSI, a company incorporated under English law. Goldman Sachs Group UK Limited, a company incorporated under English law has a 100 per cent. shareholding in GSI. Goldman Sachs (UK) L.L.C. is established under the laws of the State of Delaware and holds 100 per cent. of the ordinary shares of Goldman Sachs Group UK Limited. The Goldman Sachs Group, Inc. ("**GSG**") is established in Delaware and has a 100 per cent. shareholding in Goldman Sachs (UK) L.L.C.

Business

The Articles of GSCL set out the principal objects for which it was established. The objects for which GSCL was established are unrestricted and it has full power and authority to carry out any object not prohibited by the Companies Law (2018 Revision) of the Cayman Islands as amended or revised from time to time or any other law of the Cayman Islands. GSCL has been established as a special purpose entity for the purpose of issuing the preference shares.

Assets

GSCL has no assets other than the issued share capital and the rights to payments due to GSCL pursuant to a swap transaction entered into between GSCL and GSI which provides for payment to GSCL of the redemption amounts and dividends/distributions, if any, owing on the Issued Preference Shares. The obligations of GSCL with respect to the payment on the Issued Preference Shares are obligations of GSCL alone and not of, or guaranteed in any way by any other person.

Costs

GSI has entered into an expenses agreement with GSCL under which, as consideration for GSCL undertaking to issue preference shares from time to time, GSI agrees to meet, among other expenses, any fees and expenses incurred by GSCL in respect of the issuance of the preference shares and the entry into ancillary documents and arrangements in respect thereof.

Financial Statements

GSCL is not required by Cayman law to publish any financial statements and GSCL has not published and does not intend to publish any financial statements.

3. DESCRIPTION AND SPECIFIC TERMS AND CONDITIONS OF THE PREFERENCE SHARES

Part 1 – General

The following Part 1 – General is a summary description of certain rights attaching to each class of Goldman Sachs (Cayman) Limited ("GSCL" or the "Company") Preference Shares (each a "Class") which are set out in full in, are subject to, and are qualified in their entirety by reference to, GSCL's Amended and Restated Memorandum and Articles of Association and, in relation to each Class of Preference Shares, the applicable Specific Terms and Conditions approved by an authorised GS Signatory or by the resolution of the Board of Directors of GSCL passed in relation to the issue of such Class (together, the "Articles"). Paragraphs in italics are not included in the Articles and contain a summary of certain provisions of Cayman Island law that will be applicable to the Preference Shares.

Definitions

For the purposes of the Preference Shares of each Class, unless there is something in the subject or context inconsistent therewith, the following expressions have the following meanings:

Expressions

Meanings

authorised GS Signatory

The person or persons for the time being authorised by resolution of the Board of Directors of GSCL to approve each issuance of Preference Shares and to approve and/or prepare, give, make, sign, execute and deliver, as appropriate, all documentation as is necessary in connection therewith.

applicable Specific Terms and Conditions:

With respect to each Preference Share of each Class, means the Specific Terms and Conditions (or the relevant provisions thereof) which are expressed to be applicable to that Class of Preference Shares and which are approved by the Board of Directors of GSCL or by an authorised GS Signatory.

Expressions	Meanings
Class:	A separate class of Preference Shares (and includes any sub-class of any such class).
Directors:	The directors for the time being of the Company.
Early Redemption Amount:	With respect to each Preference Share of each Class redeemed, means the amount payable following a winding up or other return of capital (other than a conversion, redemption or purchase of shares) determined by the Preference Share Calculation Agent in good faith and a commercially reasonable manner to be the fair market value of the relevant Preference Shares immediately prior to such payment (adjusted to account for any reasonable costs and expenses of unwinding any underlying and/or related hedging arrangements).
Holder:	The registered owner of a Preference Share.
Member:	Has the same meaning as in the Statute.
Ordinary Shares:	The ordinary shares of U.S.\$ 1.00 par value each in the authorised share capital of GSCL.
Preference Share Issue Date:	In respect of each Class of Preference Share, means the date specified as such in the applicable Specific Terms and Conditions.
Preference Share Redemption Amount:	In respect of each Preference Share of each Class redeemed, means the amount payable by GSCL on the Redemption Date or Preference Share Automatic Early Redemption Date, as is applicable, in respect of such Preference Share, determined in the manner set out in the applicable Specific Terms and Conditions.
Preference Shares:	Preference shares of any Class in the authorised share capital of GSCL.
Redemption Date:	With respect to each Preference Share of each Class, means the date set out in the applicable Specific Terms and Conditions.
Series:	A separate series of Preference Shares (and includes any sub-series of any such series).
Share and Shares:	A share or shares in the Company and includes a fraction of a share in the Company.
Special Resolution:	A resolution which has been passed by a majority of not less than two-thirds of the members of GSCL being entitled to vote including a unanimous written resolution of such members.
Specific Terms and Conditions:	With respect to a Class, means the specific terms and conditions adopted and prevailing from time to time in relation to such Class of Preference Shares and setting out the rights attaching thereto, issued by or on behalf of the Directors of GSCL pursuant to Article 5 of the Articles.

Expressions

Meanings

Statute:

The Companies Law (2018 Revision) of the Cayman Islands as amended or revised from time to time.

Dividends/Distributions:

Whether the Preference Shares carry the right to a dividend and, if so, the nature of that right to dividends will depend on the relevant Specific Terms and Conditions. Any such dividends or other distributions shall be paid by the Company pursuant to the provisions of the Articles.

Capital:

In relation to each Class of Preference Shares, the right (i) on redemption of such Preference Shares, to payment of the applicable Preference Share Redemption Amount per Preference Share in priority to any payment to the holders of Ordinary Shares, such payment to be made pro rata amongst all the Preference Shares of the relevant Class in issue, and (ii) on a winding up of GSCL or other return of capital (other than a conversion, redemption or purchase of shares), to payment, in priority to any payment to the holders of Ordinary Shares, of an amount determined by the Preference Share Calculation Agent in good faith and a commercially reasonable manner to be the fair market value of the relevant Preference Shares immediately prior to such payment (adjusted to account for any reasonable costs and expenses of unwinding any underlying and/or related hedging arrangements), such payment to be made pro rata amongst all the Preference Shares in issue.

Redemption:

The Preference Shares of each Class shall, subject to the provisions of this paragraph and the Articles, be redeemed upon and subject to the following terms and conditions:

- (i) Each Preference Share shall (provided it is fully paid) be redeemed by GSCL by payment of the applicable Preference Share Redemption Amount on the relevant Redemption Date or (if applicable) Preference Share Automatic Early Redemption Date, as the case may be, provided however, (if applicable) if a Preference Share Automatic Early Redemption Event occurs on a Preference Share Valuation Date (other than the Final Preference Share Valuation Date) or upon the valuation of a Preference Share on the Final Preference Share Valuation Date, the Holder of a Preference Share may, but is not obliged to, request in writing on such Preference Share Valuation Date or Final Preference Share Valuation Date, as the case may be, or on any date following such Preference Share Valuation Date or Final Preference Share Valuation Date, as the case may be, up to but excluding the Redemption Date (if applicable) or Preference Share Automatic Early Redemption Date, as the case may be, that the Redemption Date or (if applicable) Preference Share Automatic Early Redemption Date, as the case may be, be deemed to occur on such day and that the Company pay the Preference Share Redemption Amount for settlement in immediately available funds on such day (or, if the request is not received in time on such

Expressions

Meanings

day to effect transfer on such day, for the next business day in the Cayman Islands).

- (ii) Any Preference Shares redeemed by GSCL shall be cancelled and such Preference Shares shall thereafter be capable of re-issue.

Section 37 of the Statute provides that, a company limited by shares such as GSCL with redeemable shares, may (if authorised to do so by its articles of association) make payments in respect of a redemption of its own shares from profits, the share premium account or capital (including any capital redemption reserve) (provided such shares are fully paid). The redeemable shares of a limited company are not capable of being redeemed unless immediately following the date on which the payment out of capital is proposed to be made the company shall be able to pay its debts as they fall due in the ordinary course of business.

Voting rights:

The Holders of Preference Shares of each Class shall not be entitled to receive notice of, or attend, or vote at any general meeting of GSCL. The rights attaching to the Preference Shares of any Class or Series (unless otherwise provided by the terms of issue of those Preference Shares) may (whether or not GSCL is being wound up) be varied without the consent of the Holders of the issued Preference Shares of that Class or Series where such variation is considered by the Directors, not to have a material adverse effect upon such holders' Share Rights; otherwise, any such variation shall be made only with the prior consent in writing of the holders of not less than two-thirds by par value of such Preference Shares, or with the sanction of a resolution passed by a majority of at least two-thirds of the votes cast in person or by proxy at a separate meeting of the Holders of such Preference Shares. For the avoidance of doubt, the Directors reserve the right, notwithstanding that any such variation may not have a material adverse effect, to obtain consent from the Holders of such Preference Shares. To any such meeting all the provisions of the Articles as to general meetings shall *mutatis mutandis* apply, but so that any Holder of a Preference Share present in person or by proxy may demand a poll, and the quorum for any such meeting shall be Members holding not less than twenty per cent. by par value of the issued Preference Shares of the relevant Class or Series.

Notices:

Notices shall be in writing and may be given by GSCL to any Holder of a Preference Share either personally or by sending it by post, cable, telex, fax or e-mail to him or to his address as shown in the Register of Members (or where the notice is given by e-mail by sending it to the e-mail address provided by such Holder). Any notice, if posted from one country to another, is to be sent by airmail. Where a notice is sent by courier, service of the notice shall be deemed to be effected by delivery of the notice to a courier company, and shall be deemed to have been received on the third day (not including Saturdays or Sundays or public holidays) following the day on which the notice was delivered to the courier. Where a notice is sent by post, service of the notice shall be deemed

Expressions

Meanings

to be effected by properly addressing, pre-paying and posting a letter containing the notice, and shall be deemed to have been received on the fifth day (not including Saturdays or Sundays or public holidays) following the day on which the notice was posted. Where a notice is sent by cable, telex or fax, service of the notice shall be deemed to be effected by properly addressing and sending such notice and shall be deemed to have been received on the same day that it was transmitted. Where a notice is given by e-mail, service shall be deemed to be effected by transmitting the e-mail to the e-mail address provided by the intended recipient and shall be deemed to have been received on the same day that it was sent, and it shall not be necessary for the receipt of the e-mail to be acknowledged by the recipient.

Form:

The Preference Shares will be issued in registered form. Title to the Preference Shares will pass by registration of the transferee in the share register. No Share nor any interest in a Share may be transferred by way of mortgage, charge, pledge or otherwise unless the requirements of the Articles are complied with and the Directors (or where authorised, the share registrar and/or the paying agent) consent. The Directors (or where authorised, the share registrar and/or the paying agent) shall apply the relevant provisions in the Programme Agency Agreement in giving their consent. Any purported transfer made otherwise than in accordance with the Articles and without the Directors', the share registrar's and /or the paying agent's consent shall not be given effect for any purpose, and shall be disregarded by the Company and the paying agent for all purposes. If the Directors or any agent on the Company's behalf decline to register a transfer of any Shares the Directors or such agent shall within 10 Business Days after the date on which the transfer was lodged with the Company send to the transferee a notice of refusal.

Listing:

The Preference Shares will not be listed.

Miscellaneous:

All amounts payable by GSCL in respect of the Preference Shares will be paid by GSCL or its appointed paying agent to the Holder of record of the relevant Preference Shares. Investors who have not previously reviewed the information contained in the Articles and the relevant Specific Terms and Conditions should do so in connection with their evaluation of any securities issued by GSCL.

Part 2 – Specific Terms and Conditions

The Preference Shares of the relevant Class shall have attached to them the following rights and obligations in addition to the rights and obligations set out in the Articles.

Part A – Key Terms (constant)

The following key terms (constant) apply to each Class of Preference Shares subject as supplemented and if applicable amended in Part B – Key Terms (variable):

Definitions

Capitalised terms used but not defined herein shall have the meanings given to them in the Articles. Capitalised terms in the Articles not defined therein, if not inconsistent with the subject or context, shall have the meaning given to them herein. In addition, if not inconsistent with the subject or context, the expressions set out below shall have the following meanings:

Expressions	Meanings
Articles:	The Amended and Restated Memorandum and Articles of Association of GSCL in their form as at the date hereof or from time to time altered and a reference to a numbered "Article" is to the corresponding numbered Article thereof.
Holder:	A person whose name is entered in the Register as a holder of Preference Shares.
Preference Share Issuer:	Goldman Sachs (Cayman) Limited.
Preference Share Calculation Agent:	Goldman Sachs International ("GSI") (or such other entity as may be appointed by the company as such from time to time).
Preference Share Registrar:	GSI (or such other entity as may be appointed by the company as such from time to time).

Form

Subject to compliance with "Restrictions" below, the Preference Shares shall be issued in registered form on the Preference Share Issue Date.

Restrictions

Preference Shares may not be issued or transferred to any person (or persons) resident in the Cayman Islands unless such person (or persons) (i) holds the same in trust and (ii) none of the beneficiaries of such trust are resident in the Cayman Islands.

Preference Shares may only be transferred in accordance with the provisions of the Articles and the Master Agency Agreement, dated as of 11 October 2012 (as may be supplemented and/or restated and/or replaced from time to time), among the Company, GSI as paying agent, GSI as preference share calculation agent and GSI as registrar. The Directors may refuse to register any transfer of Preference Shares in their absolute discretion and without giving any reason. Preference Shares may not be offered, sold, transferred or delivered within the U.S. or to any U.S. person or to any person who might, in the opinion of the Directors, cause the Company a pecuniary, tax or regulatory disadvantage, or to be in breach of the law or requirements of any country or governmental authority.

Notwithstanding anything to the contrary in the Articles, the Holders of the Preference Shares shall, by their purchase of the Preference Shares, be deemed to agree that they shall not seek to vary the terms of the Preference Shares or agree to any such variation without the consent or instructions of the holders of the notes issued by Goldman, Sachs & Co. Wertpapier GmbH or Goldman Sachs Finance Corp International Ltd linked to the Preference Shares (the "Notes"), save where such variation is determined by the Preference Share Calculation Agent, in its sole discretion, not to be materially adverse to the

interests of the holders of the Notes or is for the purpose of curing an ambiguity or correcting a defective provision or manifest error in these Specific Terms and Conditions.

Dividends/Distributions

Whether the Preference Shares carry the right to a dividend and, if so, the nature of that right to dividends will depend on the relevant Specific Terms and Conditions. Any such dividends or other distributions shall be paid by the Company pursuant to the provisions of the Articles.

Redemption

Subject to the Articles, (i) if Preference Share Automatic Early Redemption is applicable and the Preference Share Calculation Agent determines that a Preference Share Automatic Early Redemption Event has occurred on any Preference Share Valuation Date (other than the Final Preference Share Valuation Date), each Preference Share in issue shall be redeemed by the Company on the relevant Preference Share Automatic Early Redemption Date in respect of such Preference Share Valuation Date, and (ii) if Preference Share Automatic Early Redemption is applicable and a Preference Share Automatic Early Redemption Event has not occurred on any Preference Share Valuation Date (other than the Final Preference Share Valuation Date), or if Preference Share Automatic Early Redemption is not applicable, each Preference Share in issue shall be redeemed by the Company on the Redemption Date, in each case by payment of the relevant Preference Share Redemption Amount and without the need for the Company to give notice of such redemption to the Holder, provided however (if applicable), if a Preference Share Automatic Early Redemption Event occurs on a Preference Share Valuation Date (other than the Final Preference Share Valuation Date) or upon the valuation of a Preference Share on the Final Preference Share Valuation Date, the Holder of a Preference Share may, but is not obliged to, request in writing on such Preference Share Valuation Date or Final Preference Share Valuation Date, as the case may be, or on any date following such Preference Share Valuation Date or Final Preference Share Valuation Date, as the case may be, up to but excluding the Redemption Date (if applicable) or Preference Share Automatic Early Redemption Date, as the case may be, that the Redemption Date or (if applicable) Preference Share Automatic Early Redemption Date, as the case may be, be deemed to occur on such day and that the Company pay the Preference Share Redemption Amount for settlement in immediately available funds on such day (or, if the request is not received in time on such day to effect transfer on such day, for the next business day in the Cayman Islands).

Purchase

Subject to the foregoing and to applicable law, the Company may at any time and from time to time purchase issued Preference Shares by tender, in the open market or by private agreement. If purchases are made by tender, the tender must be available to all Holders on the same terms and conditions.

Any such purchase, if made by the Company, shall be made in such manner and on such terms as the Company shall approve by a resolution passed by a simple majority of the Members as, being entitled to do so, vote in person or, where proxies are allowed, by proxy at a general meeting, and includes a unanimous written resolution (an "**Ordinary Resolution**").

Payment date falls on a day other than a Business Day

If any date referred to under the Specific Terms and Conditions as a date for payment in respect of the Preference Shares would otherwise fall on a day that is not a Business Day, then the obligation to make payment on such date shall be adjusted so that the obligation to make such payment shall fall on the first following day that is a Business Day.

Part B – Key Terms (variable)

The following is an example of the key terms (variable) which will be completed by the Preference Share Issuer for each separate Class of Preference Shares to complete the Specific Terms and Conditions of that Class of Preference Shares (subject to adjustment for the particular terms of a Class of Preference Shares).

PSL Note Description

Please note the following with regard to the terms in the table below:

- The terms are representative only and additional terms may be added and/or certain terms may be deleted and/or amended in relation to any particular Class of Preference Shares; and
- The terms below provide an example of the key terms that will be completed if the Preference Share Underlying is an Index or Index Basket; if the Preference Share Underlying is:
 - a Share or Share Basket, then, amongst other changes, all references to (i) "Index" shall be replaced with "Share" and (ii) "Level" with "Price"; or
 - a Commodity or Commodity Basket, then, amongst other changes, (i) the following key terms, as applicable, shall be added: "Commodity Contract", "Delivery Date", "First Nearby Month", "Second Nearby Month", "Trading Facility" and "Price Source" and (ii) all references to "Preference Share Underlying" shall be replaced with "Preference Share Underlying Price" or "Commodity Reference Price" as applicable.

Redemption Date:	[insert] provided that, if (i) Preference Share Automatic Early Redemption Event is applicable and (ii) an Automatic Early Redemption Event occurs on a Preference Share Valuation Date (other than the Scheduled Final Preference Share Valuation Date), the "Redemption Date" shall be the Preference Share Automatic Early Redemption Date falling most recently after the Preference Share Valuation Date on which the Automatic Early Redemption Event has occurred
Preference Share Automatic Early Redemption: <i>[(If not applicable, delete following sub-paragraphs)]</i>	[Applicable] [Not Applicable]
Preference Share Automatic Early Redemption Event:	[The Preference Share Underlying Level of [each] [any] Preference Share Underlying on any Preference Share Valuation Date (other than the Final Preference Share Valuation Date) <i>is greater than or equal to</i> its [respective] Preference Share Underlying Level [(Trigger)] [(Initial)].] [The Worst Preference Share Underlying Performance on any Preference Share Valuation Date (other than the Final Preference Share Valuation Date) is greater than or equal to the Preference Share Underlying Performance (Trigger) on such Preference Share Valuation Date.] <i>[Insert other, as applicable]</i>
Preference Share Automatic Early Redemption Amount:	<i>[insert formula, together with any related definitions]</i>
Preference Share Automatic Early Redemption Date(s):	[insert]
Business Day:	Any day on which commercial banks and foreign exchange markets settle payments and are open for general business (including dealing in foreign exchange and foreign currency deposits) in [London and] [insert] [which is a day on which the Trans-European Automated Real-Time Gross Settlement Express Transfer (TARGET 2) System (or any successor) is open]
Preference Share Underlying index disclaimer:	[Applicable] [Not Applicable] <i>[insert]</i>

Schedule

A schedule, forming part of the Specific Terms and Conditions of the Preference Shares, will be included for each Class of Preference Shares in relation to the particular type of Preference Share Underlying (e.g. the Index Linked Conditions or Share Linked Conditions, as applicable). The terms of the schedule will be substantively identical to the Underlying Asset Conditions set out in this Base Prospectus in relation to the relevant type of Underlying Asset, save that the Calculation Agent will be the Preference Share Calculation Agent, references to 'Security' or 'Securities' will be to 'Preference Share' or 'Preference Shares' and certain other applicable changes will be made.

Under the terms of the schedule, the Preference Share Calculation Agent may adjust or early redeem the Preference Shares following certain events in relation to the Preference Share Underlying. Any such adjustment or early redemption shall constitute a "Preference Shares Adjustment or Redemption Event"

under the PSL Note Payout Conditions, in which case the Calculation Agent under the Notes may adjust or early redeem the Notes accordingly.

FORMS OF THE NOTES

Registered Notes (other than French Law Notes, Swiss Securities, Euroclear Finland Registered Notes, Euroclear Finland Registered Notes, VPS Registered Notes)

Each Tranche of Registered Notes (other than French Law Notes, Swiss Securities, Euroclear Finland Registered Notes, Euroclear Finland Registered Notes, VPS Registered Notes) will be in the form of either individual Note Certificates ("**Individual Note Certificates**") or a global note in registered form (a "**Global Registered Note**"), in each case as specified in the relevant Issue Terms. Each Global Registered Note will be deposited on or around the relevant issue date with a depositary or a common depositary for Euroclear and/or Clearstream, Luxembourg and/or any other relevant clearing system and registered in the name of a nominee for such depositary or, in the case of Global Registered Notes issued under the NSS, a Common Safekeeper and registered in the name of a nominee for such Common Safekeeper and will be exchangeable for Individual Note Certificates in accordance with its terms.

If the relevant Issue Terms specify the form of Notes as being "Individual Note Certificates", then the Notes will at all times be in the form of Individual Note Certificates issued to each Noteholder in respect of their respective holdings.

If the relevant Issue Terms specify the form of Notes as being "Global Registered Note exchangeable for Individual Note Certificates", then the Notes will initially be in the form of a Global Registered Note which will be exchangeable in whole, but not in part, for Individual Note Certificates:

- (a) on the expiry of such period of notice as may be specified in the relevant Issue Terms; or
- (b) at any time, if so specified in the relevant Issue Terms; or
- (c) if the relevant Issue Terms specify "in the limited circumstances described in the Global Registered Note", then if (a) Euroclear or Clearstream, Luxembourg or any other relevant clearing system is closed for business for a continuous period of 14 days (other than by reason of legal holidays) or announces an intention permanently to cease business or (b) any of the circumstances described in General Note Condition 16 (*Events of Default*) occurs.

Whenever the Global Registered Note is to be exchanged for Individual Note Certificates, the relevant Issuer shall procure that Individual Note Certificates will be issued in an aggregate principal amount equal to the principal amount of the Global Registered Note within five business days of the delivery, by or on behalf of the registered holder of the Global Registered Note to the Registrar of such information as is required to complete and deliver such Individual Note Certificates (including, without limitation, the names and addresses of the persons in whose names the Individual Note Certificates are to be registered and the principal amount of each such person's holding) against the surrender of the Global Registered Note at the specified office of the Registrar.

Such exchange will be effected in accordance with the provisions of the Programme Agency Agreement and the regulations concerning the transfer and registration of Notes scheduled thereto and, in particular, shall be effected without charge to any holder, but against such indemnity as the Registrar may require in respect of any tax or other duty of whatsoever nature which may be levied or imposed in connection with such exchange.

If:

- (a) Individual Note Certificates have not been delivered by 5.00 p.m. (London time) on the thirtieth day after they are due to be issued and delivered in accordance with the terms of the Global Registered Note; or
- (b) any of the Notes represented by a Global Registered Note (or any part of it) has become due and payable in accordance with the Terms and Conditions of the Notes or the date for final redemption of the Notes has occurred and, in either case, payment in full of the amount of principal falling due with all accrued interest thereon has not been made to the holder of the Global Registered Note in accordance with the terms of the Global Registered Note on the due date for payment,

then the Global Registered Note (including the obligation to deliver Individual Note Certificates) will become void at 5.00 p.m. (London time) on such thirtieth day (in the case of (a) above) or at 5.00 p.m. (London time) on such due date (in the case of (b) above) and the holder of the Global Registered Note will have no further rights thereunder (but without prejudice to the rights which the holder of the Global Registered Note or others may have under the Deed of Covenant or Cayman Deed of Covenant, as applicable. Under the Deed of Covenant or Cayman Deed of Covenant, as applicable, persons shown in the records of Euroclear and/or Clearstream, Luxembourg and/or any other relevant clearing system as being entitled to an interest in a Global Registered Note will acquire directly against the Issuer all those rights to which they would have been entitled if, immediately before the Global Registered Note became void, they had been the holders of Individual Note Certificates in an aggregate principal amount equal to the principal amount outstanding of Notes they were shown as holding in the records of Euroclear and/or Clearstream, Luxembourg and/or any other relevant clearing system.

Terms and Conditions applicable to the Notes

The terms and conditions applicable to any Individual Note Certificate will be endorsed on that Individual Note Certificate and will consist of the terms and conditions set out under "General Terms and Conditions of the Notes" above and the provisions of the relevant Issue Terms which complete those terms and conditions.

French Law Notes, Swiss Securities, Euroclear Finland Registered Notes, Euroclear Finland Registered Notes and VPS Registered Notes

The form of French Law Notes, Swiss Securities, Euroclear Finland Registered Notes, Euroclear Finland Registered Notes and VPS Registered Notes will be as described in "*General Terms and Conditions of the Notes*" above.

BOOK-ENTRY CLEARING SYSTEMS

The information appearing below is based on the Issuers' understanding of the rules and procedures of the relevant Clearing System as derived from public sources. These rules and procedures are subject to change.

Securities held through a relevant Clearing System

See "Book-entry systems" below. Transfers of Securities which are held in a relevant Clearing System may be effected only through the relevant Clearing System(s) in which the Securities to be transferred are held. Title will pass upon registration of the transfer in the books of the relevant Clearing System(s) and in accordance with the local laws, regulations and/or rules governing such relevant Clearing Systems.

Beneficial interests in the Global Securities will be shown on, and transfers thereof will be effected through, records maintained by the relevant Clearing System(s) and its respective participants.

Book-entry systems

DTC, Euroclear, Clearstream, Luxembourg and Clearstream Frankfurt have each published rules and operating procedures designed to facilitate transfers of beneficial interests in Global Securities among participants and accountholders of DTC, Euroclear, Clearstream, Luxembourg and Clearstream Frankfurt. However, they are under no obligation to perform or continue to perform such procedures, and such procedures may be discontinued or changed at any time. None of the Issuers, the Guarantors (if applicable), the relevant Paying Agents or any Dealer will be responsible for any performance by DTC, Euroclear, Clearstream, Luxembourg or Clearstream Frankfurt or their respective direct or indirect participants or accountholders of their respective obligations under the rules and procedures governing their operations and none of them will have any liability for any aspect of the records relating to or payments made on account of beneficial interests in the Securities represented by Global Securities or for maintaining, supervising or reviewing any records relating to such beneficial interests.

Euroclear, Clearstream, Luxembourg, Clearstream Frankfurt, Euroclear France and Euroclear Finland

Euroclear, Clearstream, Luxembourg, Clearstream Frankfurt, Euroclear France and Euroclear Finland each hold securities for their customers and facilitate the clearance and settlement of securities transactions by electronic book-entry transfer between their respective account holders. Euroclear, Clearstream, Luxembourg, Clearstream Frankfurt, Euroclear France and Euroclear Finland provide various services including safekeeping, administration, clearance and settlement of internationally traded securities and securities lending and borrowing. Euroclear, Clearstream, Luxembourg, Clearstream Frankfurt, Euroclear France and Euroclear Finland also deal with domestic securities markets in several countries through established depository and custodial relationships. Euroclear and Clearstream, Luxembourg have established an electronic bridge between their two systems across which their respective participants may settle trades with each other. Euroclear, Clearstream, Luxembourg, Clearstream Frankfurt, Euroclear France and Euroclear Finland customers are world-wide financial institutions, including underwriters, securities brokers and dealers, banks, trust companies and clearing corporations. Indirect access to Euroclear, Clearstream, Luxembourg, Clearstream Frankfurt, Euroclear France and Euroclear Finland is available to other institutions that clear through or maintain a custodial relationship with an account holder of either system.

DTC

DTC is a limited-purpose trust company organised under the New York Banking Law, a "banking organisation" within the meaning of the New York Banking Law, a member of the Federal Reserve System, a "clearing corporation" within the meaning of the New York Uniform Commercial Code and a "clearing agency" registered pursuant to the provisions of Section 17A of the Exchange Act. DTC holds and provides asset servicing for over 3.5 million issues of U.S. and non-U.S. equity issues, corporate and municipal debt issues, and money market instruments (from over 100 countries) that DTC's participants ("**Direct Participants**") deposit with DTC. DTC also facilitates the post-trade settlement among Direct Participants of sales and other securities transactions in deposited securities through electronic computerised book-entry transfers and pledges between Direct Participants' accounts. This eliminates the need for physical movement of securities certificates. Direct Participants include both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, clearing corporations, and certain other

organisations. DTC is a wholly-owned subsidiary of The Depository Trust & Clearing Corporation ("**DTCC**"). DTCC is the holding company for DTC, National Securities Clearing Corporation and Fixed Income Clearing Corporation, all of which are registered clearing agencies. DTCC is owned by the users of its regulated subsidiaries. Access to the depository system is also available to others such as both U.S. and non-U.S. securities brokers and dealers, banks, trust companies and clearing corporations that clear through or maintain a custodial relationship with a Direct Participant, either directly or indirectly ("**Indirect Participants**"). The rules applicable to Direct Participants are on file with the SEC. More information about DTC can be found at its internet web site at <http://www.dtcc.com/>.

Euroclear Sweden

Euroclear Sweden is a subsidiary within the Euroclear group of companies. Euroclear Sweden is a limited liability company. It is authorised and regulated by the Swedish Financial Supervisory Authority as a central securities deposit within the meaning of the Swedish Central Securities Depositories and Financial Instruments Accounts Act (1998:1479) (as amended) and as a clearing organisation within the meaning of the Swedish Securities Markets Act (2007:528) (as amended). Swedish Securities will be issued in registered, uncertificated and dematerialised book-entry form with Euroclear Sweden in accordance with the Swedish CSD Rules. No physical notes, certificates or other physical instruments (whether in global, temporary or definitive form) will be issued in respect of the Swedish Securities other than as specifically allowed in the General Instrument Conditions and the General Note Conditions. All transactions relating to the Swedish Securities (such as issuance, sale and transfer, pledge arrangements and other dispositions and redemptions) are executed as computerised book-entry registrations. Consequently, in order to effect such entries Holders must establish a book-entry account through a credit institution or a securities firm acting as an account operator with Euroclear Sweden. More information regarding Euroclear Sweden and its rules and operating procedures can be found at its internet web site at <http://www.ncsd.eu>.

Monte Titoli

Monte Titoli S.p.A. ("**Monte Titoli**") is a company limited by shares which belongs to the London Stock Exchange Group and provides for post-trade services (i.e. issuer services, pre-settlement, settlement, custody and asset services). Monte Titoli, which has been authorised by, and is subject to the supervisory activity of, the Bank of Italy and the Italian Securities and Exchange Commission ("**CONSOB**"), acts as the Italian Central Securities Depository ("**CSD**") providing for the central securities depository services of financial instruments pursuant to Part III, Title II of Legislative Decree No. 58 of 24 February 1998, as subsequently amended and supplemented ("**Financial Services Act**") and the related implementing regulations issued by the competent authorities. The central securities depository service of financial instruments permits, through the opening of accounts in the name of the entities authorised to participate in the central securities depository service as intermediaries or issuers ("**Participants**") (i) the registration on the central securities depository accounts of dematerialised financial instruments (ii) the custody of financial instruments centralised in paper-based form and (iii) the administration of financial instruments referred to at (i) and (ii) on the basis of the information transmitted by Participants. The administrative and ownership rights in relation to financial instruments admitted to the central securities depository service shall be exercised on the basis of the appointments and notifications sent to Monte Titoli by Participants in the manner and within the time limits specified in the Monte Titoli's rules. More information regarding Monte Titoli and its rules and operating procedures can be found at its internet website at www.montetitoli.it.

VPS

The VPS is the Norwegian paperless centralised securities registry. It is a computerised bookkeeping system in which the ownership of and transactions relating to securities that are registered with the VPS are recorded. The VPS also and facilitate the clearance and settlement of securities transactions. All transactions relating to securities registered with the VPS are made through computerised book entries. The VPS confirms each entry by sending a transcript to the registered holder irrespective of any beneficial ownership. To effect such entries, the individual holder must establish a VPS account with an authorised VPS account agent. Amongst others banks and investment firms authorises to conduct services in or into Norway can become authorised VPS account agents. Indirect access to the VPS is available to authorised institutions that offer custodial/nominee services in securities registered with the VPS. The entry of a transaction in the VPS is prima facie evidence in determining the legal rights of parties as against the issuer or a third party claiming an interest in the relevant security. The VPS is

generally liable for any loss resulting from an error in connection with registering, altering or cancelling a right, except in the event of contributory negligence, in which event compensation owed by the VPS may be reduced or withdrawn.

CREST and CDIs

If specified in the relevant Issue Terms, investors may hold indirect interests in the Securities in CREST through the issuance of dematerialised CREST depository interests ("**CDIs**") issued, held, settled and transferred through CREST (being the system for the paperless settlement of trades and the holding of uncertificated securities operated by Euroclear UK & Ireland Limited or any successor thereto in accordance with the United Kingdom Uncertificated Securities Regulations 2001).

CDIs are independent securities constituted under English law which are issued by CREST Depository Limited ("**CREST Depository**") (or any successor thereto) pursuant to the global deed poll dated 25 June 2001 (in the form contained in Chapter 7 of the CREST International Manual (which forms part of the CREST Manual)) (as subsequently modified, supplemented, replaced and/or restated "**CREST Deed Poll**").

Under the CREST Deed Poll, the CREST Depository declares that its rights in and to the relevant Securities (being held in a Euroclear account by its nominee, CREST International Nominees Limited ("**CREST Nominee**") are held on trust for the holders of CDIs.

CDIs represent indirect interests in the Securities being held by the CREST Nominee (as nominee for the CREST Depository) in its account with Euroclear (or other relevant Clearing System, as applicable).

Each CDI will be treated by the CREST Depository as if it were a relevant Security, for the purposes of determining all rights and obligations and all amounts payable in respect thereof. The CREST Depository will pass on to holders of CDIs any interest or other amounts received by it as holder of the relevant Securities on trust for such CDI holder, together with notices in respect of the relevant Securities.

CDIs will have the same ISIN as the ISIN of the relevant Securities and will not require a separate listing.

It is intended that CDIs will be issued to the relevant CREST participants on or around the Issue Date of the relevant Securities. However, CDIs may be created at any time following the credit of relevant Securities to the CREST Nominee's account with Euroclear.

Transfers of interests in the relevant Securities by the CREST participant to a participant of the relevant Clearing System will be effected by cancellation of the relevant CDIs and transfer of an interest in the Securities underlying the CDIs to the account of the relevant participant with the relevant Clearing System.

Holding indirect interests in Securities through CDIs in CREST

If the terms and conditions of your Securities so provide, you may hold indirect interests in the Securities in CREST through the issuance of dematerialised CREST depository interests ("**CDIs**") issued, held, settled and transferred through CREST (being the system for the paperless settlement of trades and the holding of uncertificated securities operated by Euroclear UK & Ireland Limited or any successor thereto in accordance with the United Kingdom Uncertificated Securities Regulations 2001).

CDIs are independent securities constituted under English law which are issued by CREST Depository Limited ("**CREST Depository**") pursuant to the global deed poll dated 25 June 2001 (as subsequently modified, supplemented and/or restated) ("**CREST Deed Poll**").

Holders of CDIs will not be the legal owners of the Securities to which such CDIs relate. CDIs are separate legal instruments from the Securities and represent indirect interests in the interests of the nominee for the CREST Depository in the relevant Securities. CDIs will be issued by the CREST Depository to investors and will be governed by English law.

The Securities (as distinct from the CDIs representing indirect interests in the Securities) will be held in an account with a custodian. The custodian will hold the Securities through the relevant Clearing System. Rights in the Securities will be held through custodial and depository links through the relevant Clearing

System. The legal title to the Securities or to interests in the Securities will depend on the rules of the relevant Clearing System in or through which the Securities are held.

Rights in respect of the Securities cannot be enforced by holders of CDIs except indirectly through the CREST Depository and CREST nominee who in turn can enforce rights indirectly through the intermediary depositaries and custodians described above. The enforcement of rights in respect of the Securities will therefore be subject to the local law of the relevant intermediary. Such manner of enforcement may result in a reduced and/or delayed settlement than if an investor held the relevant Securities directly.

In the event of any insolvency or liquidation of the relevant intermediary, in particular where the relevant Securities held in the relevant Clearing System are not held in special purpose accounts and are fungible with other securities held in the same accounts on behalf of other customers of the relevant intermediaries, a holder of CDIs may suffer a loss of amounts otherwise receivable by it had it held the relevant Securities directly.

Holders of CDIs will be bound by all provisions of the CREST Deed Poll and by all provisions of or prescribed pursuant to the CREST International Manual (April 2008) issued by Euroclear UK & Ireland Limited and as amended, modified, varied or supplemented from time to time ("**CREST Manual**") and the CREST Rules ("**CREST Rules**") (contained in the CREST Manual) applicable to the CREST International Settlement Links Service. Holders of CDIs must comply in full with all obligations imposed on them by such provisions.

Investors in CDIs should note that the provisions of the CREST Deed Poll, the CREST Manual and the CREST Rules contain indemnities, warranties, representations and undertakings to be given by holders of CDIs and limitations on the liability of the CREST Depository as issuer of the CDIs. Holders of CDIs may incur liabilities resulting from a breach of any such indemnities, warranties, representations and undertakings in excess of the money invested by them.

As a holder of CDIs, you should be aware that you may be required to pay fees, charges, costs and expenses to the CREST Depository in connection with the use of the CREST International Settlement Links Service. These will include the fees and expenses charged by the CREST Depository in respect of the provision of services by it under the CREST Deed Poll and any taxes, duties, charges, costs or expenses which may be or become payable in connection with the holding of the Securities through the CREST International Settlement Links Service.

We will not have any responsibility for the performance by any intermediaries or their respective direct or indirect participants or accountholders acting in connection with CDIs or for the respective obligations of such intermediaries, participants or accountholders under the rules and procedures governing their operations.

Tax

We make no representation or warranty as to the tax consequences of an investment in CDIs and/or the tax consequences of the acquisition, holding, transfer or disposal of CDIs (including, without limitation, whether any stamp duty, stamp duty reserve tax, excise, severance, sales, use, transfer, documentary or any other similar tax, duty or charge may be imposed, levied, collected, withheld or assessed by any government, applicable tax authority or jurisdiction on the acquisition, holding, transfer or disposal of CDIs by any investor). The tax consequences for each investor in CDIs can be different. Therefore, you should consider consulting your tax adviser as to the specific consequences of holding CDIs.

SIX SIS AG

SIX SIS AG is part of SIX Group.

As both a central securities depository and an international central securities depository, SIX SIS AG offers banks and other financial market participants the safe custody of securities, a full range of custody services and the settlement of securities transactions. SIX SIS AG settles securities transactions worldwide, including transactions in uncertificated securities.

In the Swiss market, SIX SIS AG is part of the so-called Swiss value chain. The links to the SIX Swiss Exchange AG and the payment systems SIC/euroSIC, ensure fully automated settlement in central bank money.

Disclaimer as to Clearing Systems and their agents and operators

Any description herein as to payments being made or any other actions or duties being undertaken by any Clearing System (or its agents or operators) is based solely on the Issuers' understanding of the relevant rules and/or operations of such Clearing System (and its agents and operators). None of the Issuers or the Guarantors make any representation or warranty that such information is accurate or, in any event, that the relevant Clearing System (or its agents or operators) will make such payments or undertake such actions or duties in accordance with such description. Accordingly, notwithstanding anything else herein, none of the Issuers, the Guarantors or the Agents has any responsibility for the performance by any Clearing System (or its agents or operators) of their respective payment, delivery, Holder identification, or other obligations in respect of the Securities as described herein and/or under the rules and procedures governing their operations.

USE OF PROCEEDS

We intend to use the net proceeds from the issue of each Tranche of Securities to provide additional funds for the relevant Issuer's operations and for other general corporate purposes, unless otherwise specified in the applicable Issue Terms.

For example, if so specified in the applicable Issue Terms, we intend to allocate an amount equal to the net proceeds from the Securities to finance or refinance projects and assets made or held by any Goldman Sachs Group member that respond to critical environmental, social and/or sustainability issues, as further specified in the applicable Issue Terms (for example, see "*General Description of the Programme – Issuances under the Goldman Sachs Sustainability Issuance Framework*" above).

GOLDMAN SACHS INTERNATIONAL

The information provided below is correct as of the date of this Base Prospectus.

General Information on Goldman Sachs International

Goldman Sachs International's ("GSI") activities and sources of revenue include and are derived from securities underwriting and distribution; trading of corporate debt and equity securities, non-U.S. sovereign debt and mortgage securities; execution of swaps and derivative instruments; mergers and acquisitions; financial advisory services for restructurings, private placements and lease and project financings; real estate brokerage and finance; merchant banking and stock brokerage and research. Services are provided worldwide to a substantial and diversified client base which includes corporations, financial institutions, governments and individual investors.

GSI is an English company formed on 2 June 1988. GSI was re-registered as a private unlimited liability company in England and Wales with the Registrar of Companies on 25 February 1994 (registration number 02263951), having previously been registered as a limited liability company under the name "Goldman Sachs International Limited". GSI is authorised by the Prudential Regulation Authority (the "PRA") and regulated by the Financial Conduct Authority (the "FCA") and the PRA, and is an authorised person under the Financial Services and Markets Act 2000 of the United Kingdom (the "FSMA"), and is subject to their rules. GSI and certain of its affiliates are members of various exchanges and are subject to their rules, including those of the London Stock Exchange plc and the London International Financial Futures and Options Exchange. Certain affiliates of GSI are also subject to regulation by the FCA and the PRA.

Goldman Sachs Group UK Limited, a company incorporated under English law has a 100 per cent. shareholding in GSI. Goldman Sachs (UK) L.L.C. is established under the laws of the State of Delaware and holds 100 per cent. of the ordinary shares of Goldman Sachs Group UK Limited. The Goldman Sachs Group, Inc. is established in Delaware and has a 100 per cent. shareholding in Goldman Sachs (UK) L.L.C.

A description of GSI's principal future investments on which its management body has already made firm commitments may be found in Note 25 of the "Notes to the Financial Statements" at page 69 of GSI's 2021 Annual Report, which has been incorporated by reference into this Base Prospectus as set out above.

During the previous and current fiscal years, GSI has been in continuous existence without interruption.

The objects and purposes of GSI are set out in Article 2 (Objects) of the Articles of Association of GSI.

The registered office of GSI is Plumtree Court, 25 Shoe Lane, London EC4A 4AU, England, telephone number +44 20 7774 1000. The website of GSI is www.goldmansachs.com.

Capitalisation

As at 30 June 2022, GSI had 598,182,053 issued ordinary shares of U.S.\$ 1.00 each. The issue of additional shares by GSI shall be at the discretion of the Directors of GSI in accordance with Article 1.6 of the Articles of Association of GSI. All of the issued shares are fully paid and are owned by Goldman Sachs Group UK Limited.

No categories of persons have subscription rights for additional capital and there are no agreements requiring the issue of additional shares. The right of shareholders to receive a proportional part of any new issue of shares has been disapproved by GSI.

At the time hereof, there are no convertible bonds or options on GSI's ordinary or preference shares outstanding which have been issued by GSI or by group companies of GSI.

GSI is an indirect wholly owned subsidiary of GSG and does not own any of its issued ordinary shares. Its shares are not listed nor traded.

Corporate Governance

GSI complies with the corporate governance regime applicable under the laws of England.

There are no potential conflicts of interest between any duties owed by the Board of Directors to GSI and their private interests and/or other duties.

GSI Board Audit Committee

The following are the members of GSI's Board Audit Committee (the "**Audit Committee**"):

Nigel Harman	Chairman and Member
Sam P. Gyimah	Member
Catherine G. Cripps	Member

The following is a summary of the duties and responsibilities of the Audit Committee:

- (a) **Financial control:** monitoring and overseeing the integrity of the GSI's financial statements and financial reporting processes and controls, and reporting to the Board of Directors of GSI in relation to the same;
- (b) **Systems and controls:** Overseeing and assessing the adequacy of management's processes for ensuring the appropriateness and effectiveness of systems and controls;
- (c) **Compliance:** safeguarding the integrity and independence of, and overseeing the performance of, the compliance function;
- (d) **Conduct risk:** overseeing the Goldman Sachs Group's conduct risk framework as it relates to GSI and receiving reports from the chairs of the EMEA Conduct Risk Committee;
- (e) **Internal audit:** safeguarding the integrity and independence of, and overseeing the performance of, the internal audit function;
- (f) **External audit:** overseeing the process for appointment, re-appointment or replacement of GSI's external auditor, reviewing and monitoring the independence and objectivity of the external auditor, monitoring the statutory audit of the annual financial statements taking into account any findings and conclusions by relevant regulators, and reporting to the Board of Directors of GSI on the outcome of the statutory audit including its contribution to the integrity of financial reporting and the role of the audit committee in that process; and

- (g) **Whistleblowing:** overseeing the independence, autonomy and effectiveness of GSI's policies and procedures on whistleblowing, including the procedures for protection of staff who raise concerns from detrimental treatment.

Selected Financial Information

The selected financial information set out below has been extracted from (i) GSI's 2021 Financial Statements and GSI's 2020 Financial Statements, which have been audited by PricewaterhouseCoopers LLP and on which PricewaterhouseCoopers LLP issued an unqualified audit report and (ii) GSI's 2022 Second Quarter Financial Statements, which have not been audited.

GSI's 2022 Second Quarter Financial Statements, GSI's 2021 Financial Statements and GSI's 2020 Financial Statements have been prepared in accordance with International Financial Reporting Standards ("IFRS"). The financial information presented below should be read in conjunction with the financial statements included in such documents, the notes thereto and report thereon.

The following table shows selected key historical financial information in relation to GSI:

	As at and for the six months ended (unaudited)		As at and for the period ended (audited)	
(in USD millions)	30 June 2022	30 June 2021	31 December 2021	31 December 2020
Operating Profit	N/A	N/A	N/A	N/A
Profit before taxation	3,149	1,557	3,552	3,524
Profit for the financial period	2,364	1,246	2,937	2,755
	As at (unaudited)		As at (audited)

Current Assets	N/A		1,139,953	1,263,014
Total Shareholders' Equity	41,467		38,895	36,578

¹ Fixed Assets are computed by adding (i) Property, leasehold improvements and equipment, (ii) Intangible assets and (iii) Right-of-use assets in Note 14. Other Assets of GSI's 2021 Financial Statements.

GOLDMAN, SACHS & CO. WERTPAPIER GMBH

The information below is correct as of the date of this Base Prospectus.

History and Development of Goldman, Sachs & Co. Wertpapier GmbH

Goldman, Sachs & Co. Wertpapier GmbH ("GSW") was established by means of a notarial deed dated 6 November 1991 for an indefinite period. GSW is a company with limited liability (*Gesellschaft mit beschränkter Haftung*) incorporated under the laws of Germany and operates under the said laws. It has its seat in Frankfurt am Main and has been registered under the number HRB 34439 in the commercial register of the local court of Frankfurt am Main since 27 November 1991.

The business address and telephone number of GSW are:

Goldman, Sachs & Co. Wertpapier GmbH
Marienturm
Taunusanlage 9-10
60329 Frankfurt am Main Germany
Telephone: +49 69 7532 1111

GSW Overview

GSW was established for the purpose of issuing securities, in particular warrants. Apart from warrants, GSW also issues certificates and structured bonds. The securities issued by GSW are sold to GSI. For issuances in Germany, Goldman Sachs Bank Europe SE, Frankfurt am Main acts as the issuing and paying agent and undertakes the processing of all products issued by GSW and deposited with Clearstream Banking Frankfurt. For products deposited with other clearing systems, GSI undertakes these tasks.

The purpose of GSW is to issue fungible securities and to carry out financial transactions and auxiliary transactions for financial transactions. GSW is neither engaged in banking transactions within the meaning of Section 1 of the German Banking Act (*Kreditwesengesetz*) nor in business operations within the meaning of Section 34c German Industrial Code (*Gewerbeordnung*).

GSW arranges hedging transactions with affiliated companies to hedge against any market risks. This places GSW in the position to meet its obligations in accordance with the securities issued.

GSW operates its business primarily in Germany and in the Netherlands and, to a lesser extent, in other European countries including Austria, Belgium, France, Switzerland, Luxembourg and the United Kingdom.

Organisational Structure

GSW is a wholly-owned subsidiary of The Goldman Sachs Group, Inc. ("GSG"). GSG, together with its affiliated companies, is a globally active financial institution. Through its offices in the USA and the leading financial centres of the world, GSG is active in the financial services industry, divided into the segments (i) Investment Banking which includes advice with respect to mergers and acquisitions, divestitures, restructurings and spin-offs as well as public offerings and private placements of a wide range of securities and other financial instruments and also corporate lending, (ii) Global Markets which includes client execution activities related to making markets in credit products, interest rate products, mortgages, currencies, commodities and shares, (iii) Asset Management which includes in particular investments (directly and indirectly through funds) and loans in various asset classes as well as investments by Goldman Sachs in consolidated investment entities and (iv) Consumer & Wealth Management.

The share capital of GSW amounts to EUR 51,129.19 and has been paid in full. All shares are held by GSG whereby GSW is dependent on the strategic and operational decisions made by GSG.

Trend Information

The issuance activity is expected to decrease significantly in 2022 given a majority of the securities issuance business has been migrated to GSBE.

The Russian invasion of Ukraine in February 2022 has led to significant disruption in financial markets and increased uncertainty in the business environment in which GSW operates. The future impact of the war on GSW's operational and financial performance remains difficult to predict at this time.

As at the time of this Base Prospectus, there continues to be uncertainty regarding the impact of COVID-19. The extent of the impact will depend on future developments including the duration of the pandemic and potential future variants.

Management

The managing director (*Geschäftsführer*) of GSW is Michael Schmitz.

Michael Schmitz is managing director at GSI, Frankfurt branch (*Zweigniederlassung Frankfurt*).

GSW may be represented by a managing director jointly with another managing director or jointly with a holder of general commercial power of representation (*Prokurist*) or jointly by two holders of general commercial power of representation (*Prokuristen*). The managing directors are exempt from the restrictions of Section 181 of the German Civil Code (*Bürgerliches Gesetzbuch*) and can be reached via the business address of GSW at Marienturm, Taunusanlage, 9-10, 60329 Frankfurt am Main, Germany, telephone +49 69 7532 1111.

There are no potential conflicts of interest between the obligations of Michael Schmitz with regard to Goldman, Sachs & Co. Wertpapier GmbH and his obligations deriving from such activities performed outside Goldman, Sachs & Co. Wertpapier GmbH as well as his private interests.

GSW has neither an advisory board nor a supervisory board.

GSW has an audit committee (*Prüfungsausschuss*) in accordance with section 324 of the German Commercial Code (*Handelsgesetzbuch*). The members of the audit committee (*Prüfungsausschuss*) are Dr. Matthias Bock, Michael Bartsch and Michael Holmes. The main tasks of the audit committee (*Prüfungsausschuss*) are the supervision of the legality and usefulness of the accounting and the accounting processes as well as the effectiveness of the internal control system and the risk management system. It also supervises the effectiveness of the internal audit department.

The German Corporate Governance Code is not applicable to GSW. The Corporate Governance Code is not mandatory for companies which are not listed on stock exchanges. GSW does not apply the Corporate Governance Code on a voluntary basis.

Memorandum and Articles of Association

GSW has its seat in Frankfurt am Main and has been registered under the number HRB 34439 in the commercial register of the local court of Frankfurt am Main.

According to section 2(1) of the articles of association, the purpose of GSW is to issue fungible securities and to carry out financial transactions and auxiliary transactions for financial transactions. GSW is neither engaged in banking transactions within the meaning of Section 1 of the German Banking Act (*Kreditwesengesetz*) nor in business operations within the meaning of Section 34c of German Industrial Code (*Gewerbeordnung*).

Material Contracts

On 1 October 2021, GSW, Goldman Sachs Bank Europe SE ("**GSBE**") and GSI have entered into an agreement to transfer securities issued by GSW which are offered either in The Netherlands, Belgium and/or France or in Germany and Austria (the "**Transferred Securities**") to GSBE. The transfer is based on the issuer substitution clause set forth in the terms and conditions in the related securities prospectuses for the respective Transferred Securities.

GSW, GSBE and GSI have published notice(s) with respect to the transfer(s) of the securities (the "**Transfer Notice(s)**"). The transfer became effective in two tranches by (i) the end of 22 October 2021 and (ii) the end of 5 November 2021 (each an "**Effective Date**"). The Transfer Notice(s) contain(s) a list of the Transferred Securities.

As of the Effective Dates, GSBE substituted GSW as the new issuer and assumes all obligations of GSW under or in connection with the Transferred Securities.

At the same time GSW gave an unconditional and irrevocable guarantee for all obligations of GSBE as new issuer of the Transferred Securities.

Selected Financial Information

The selected financial information set out below has been extracted from (as applicable) (i) GSW's 2022 Interim Financial Statements, which have not been audited, (ii) GSW's 2021 Financial Statements, which have been audited by MAZARS GmbH & Co. KG Wirtschaftsprüfungsgesellschaft Steuerberatungsgesellschaft, Theodor-Stern-Kai 1, 60596 Frankfurt am Main, Germany, ("**MAZARS GmbH & Co. KG**") and (iii) GSW's 2020 Financial Statements, which have been audited by PricewaterhouseCoopers GmbH Wirtschaftsprüfungsgesellschaft, Friedrich-Ebert-Anlage 35 – 37, 60327 Frankfurt am Main ("**PwC GmbH**") and on which PwC GmbH issued an unqualified audit report.

GSW's 2022 Interim Financial Statements, GSW's 2021 Financial Statements and GSW's 2020 Financial Statements are incorporated by reference into this Base Prospectus. The financial information presented below should be read in conjunction with the financial statements included in such documents, the notes thereto and report thereon.

The following table shows selected key historical financial information in relation to GSW:

	As at and for the six months ended (unaudited)		As at and for the year ended (audited)

GOLDMAN SACHS FINANCE CORP INTERNATIONAL LTD

The information provided below is correct as of the date of this Base Prospectus.

History of Goldman Sachs Finance Corp International Ltd

Goldman Sachs Finance Corp International Ltd ("GSFCI") was incorporated in Jersey on 19 October 2016 as a public company with limited liability under the Companies (Jersey) Law 1991 for an unlimited duration and operates under the said legislation. GSFCI's registered office is at 22 Grenville Street, St. Helier, Jersey JE4 8PX (telephone number +44 (0) 1534 676 000). The Issuer is registered with the Companies Registry in Jersey with registration number 122341.

Overview

GSFCI has been established for the purpose of issuing securities (including structured notes, warrants and certificates), lending and entering into derivatives transactions with its affiliates. The securities issued by GSFCI are sold to Goldman Sachs International ("GSI"). The proceeds of such issuances are on-lent to other members of the corporate group.

The Issuer does not have an objects clause in its Memorandum of Association. The website of GSFCI is www.goldmansachs.com.

Organisation Structure

GSFCI is a wholly-owned subsidiary of GS Global Markets, Inc. ("GS GM"). GS GM is a wholly-owned subsidiary of The Goldman Sachs Group, Inc. ("GSG"). GSG together with its affiliated companies is a leading international investment bank. Through its offices in the USA and the leading financial centres of the world, GSG and the Goldman Sachs Group is active in the financial services industry, divided into the segments (i) Investment Banking which includes advice with respect to mergers and acquisitions, divestitures, restructurings and spin-offs as well as public offerings and private placements of a wide range of securities and other financial instruments, (ii) Institutional Client Services which includes client execution activities related to making markets in credit products, interest rate products, mortgages, currencies, commodities and shares, (iii) Investing and Lending which includes investments (directly and indirectly through funds) and loans in various asset classes as well as investments by Goldman Sachs in consolidated investment entities and (iv) Investment Management.

The authorised share capital of GSFCI is U.S.\$10,000,000 divided into 10,000,000 ordinary shares of a par value of U.S.\$1.00 each. As at the date of this Base Prospectus, there are 5,000,007 ordinary shares in issue, all of which are fully paid-up and are held by GS GM.

As at the date of this Base Prospectus, there are no outstanding convertible bonds or options which have been issued by the Issuer on the Issuer's issued ordinary shares.

Management

The directors of GSFCI are as follows:

<i>Name</i>	<i>Position</i>	<i>Business Address</i>
Pierre Benichou	Director	200 West Street New York NY 10282 United States
Anshuman Bajpayi	Director	Helios Business Park 150 Outer Ring Road Kadubeesanahalli, Bengaluru 560103, India
Vikram Sethi	Director	Helios Business Park 150 Outer Ring Road Kadubeesanahalli, Bengaluru 560103, India

<i>Name</i>	<i>Position</i>	<i>Business Address</i>
Michael Lynam	Director	22 Grenville Street St. Helier Jersey JE4 8PX
Stephen McGrath	Director	22 Grenville Street St. Helier Jersey JE4 8PX
Ed Fletcher	Director	22 Grenville Street St. Helier Jersey JE4 8PX
Christo Van Der Spuy	Director	22 Grenville Street St. Helier Jersey JE4 8PX

The company secretary of GSFCI is Maurant Secretaries (Jersey) Limited whose business address is 22 Grenville Street, St. Helier, Jersey JE4 8PX.

There are no potential conflicts of interest between the obligations of the directors listed above with regard to GSFCI and their private interests and/or other obligations, save that each of Michael Lynam, Ed Fletcher, Christo Van Der Spuy and Stephen McGrath, as directors of GSFCI, has an interest in Maurant Secretaries (Jersey) Limited as the company secretary of GSFCI and Maurant Governance Services (Jersey) Limited ("MGSJL") as administrator of GSFCI, to whom fees are payable by GSFCI for acting in their respective capacities. Each of Michael Lynam, Ed Fletcher, Christo Van Der Spuy and Stephen McGrath are directors of MGSJL. Each of Michael Lynam, Christo Van Der Spuy and Stephen McGrath are also employees of Maurant Services (Jersey) Limited and Ed Fletcher is also a partner in the partnership named Maurant LP, trading under the name of Maurant Ozannes.

There is no published corporate governance regime in Jersey; however, the Directors recognise the importance of sound corporate governance and endeavour to follow best practice for a company of its equivalent size, stage of development and resources.

GSFCI does not have an audit committee.

Selected Financial Information

The selected financial information set out below has been extracted from (i) GSFCI's 2022 Interim Financial Statements, which have not been audited, (ii) GSFCI's 2021 Financial Statements, which have been audited by PricewaterhouseCoopers LLP, and on which PricewaterhouseCoopers LLP have issued an unqualified audit report and (iii) GSFCI's 2020 Financial Statements, which have been audited by PricewaterhouseCoopers LLP, and on which PricewaterhouseCoopers LLP have issued an unqualified audit report.

GSFCI's 2022 Interim Financial Statements, GSFCI's 2021 Financial Statements and GSFCI's 2020 Financial Statements are incorporated by reference into this Base Prospectus. The financial information presented below should be read in conjunction with GSFCI's 2022 Interim Financial Statements, GSFCI's 2021 Financial Statements and GSFCI's 2020 Financial Statements and the notes thereto.

The following table shows selected key historical financial information in relation to GSFCI:

	As at and for the six months ended (unaudited)		As at and for the period ended (audited)

PricewaterhouseCoopers LLP of 7 More London Riverside, London SE1 2RT have been appointed as auditors to GSFCL.

THE GOLDMAN SACHS GROUP, INC.

The information provided below is correct as of the date of this Base Prospectus.

The Goldman Sachs Group, Inc. ("**GSG**") was founded in 1869 and, pursuant to the laws of the State of Delaware, the duration of GSG is unlimited. GSG's company registration number is 2923466. Pursuant to the third clause of GSG's certificate of incorporation, its purpose is to engage in any lawful act or activity for which corporations may be organised under the Delaware General Corporation Law. GSG is organised in the State of Delaware. The legal entity identifier ("**LEI**") of GSG is 784F5XWPLTWKTBV3E584. The website of GSG is www.goldmansachs.com.

GSG is in compliance in all material respects with the corporate governance standards of the New York Stock Exchange which are applicable to GSG as a corporation organised in the United States whose securities are listed on such exchange.

The business address and telephone number of GSG's directors is identical to the address and telephone number of GSG's principal executive offices, which is The Goldman Sachs Group, Inc., 200 West Street, New York, New York 10282, USA., telephone +1 (212) 902-1000.

GSG is the parent holding company of the group of companies comprising GSG and its consolidated subsidiaries (collectively, "**Goldman Sachs**" or the "**GSG Group**"). Goldman Sachs is a leading global investment banking, securities and investment management firm that provides a wide range of financial services to a substantial and diversified client base that includes corporations, financial institutions, governments and individuals.

GSG is a bank holding company and a financial holding company regulated by the Board of Governors of the Federal Reserve System (Federal Reserve Board). GSG's U.S. depository institution subsidiary, Goldman Sachs Bank USA, is a New York State-chartered bank.

TAXATION

The following is a general description of certain United Kingdom, Jersey, Luxembourg, Austrian, Belgian, Croatian, Czech, Dutch, Finnish, French, German, Greek, Hungarian, Irish, Italian, Norwegian, Polish, Portuguese, Romanian, South African, Spanish, Swedish, Swiss and United States tax considerations relating to the Securities. It does not constitute legal or tax advice. It does not purport to be a complete analysis of all tax considerations relating to the Securities, whether in the United Kingdom, Jersey, Luxembourg, Austria, Belgium, Croatia, Czech Republic, The Netherlands, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Norway Poland, Portugal, Romania, South Africa, Spain, Sweden, Switzerland, Slovak Republic, Slovenia, the United States or elsewhere. Prospective purchasers of Securities should be aware that ownership of the Securities, and any transactions involving the Securities, including the issue of any Security, any purchase, disposal, lapse or redemption of, or other dealings in, the Securities and any transaction involved in the exercise and settlement of the Securities, may have tax consequences (including but not limited to withholding taxes and possible liabilities to stamp duties, transfer and registration taxes). The tax consequences may depend, amongst other things, upon the status and circumstances of the prospective purchaser, the terms and conditions of the particular Security specified to be applicable in the relevant Issue Terms, and the applicable law and practice of taxation authorities in relevant jurisdictions. **The following is a general guide and should be treated with appropriate caution. Prospective purchasers of any Securities should consult their own tax advisers in relevant jurisdictions about the tax implications of holding any Security and of any transaction involving any Security.**

Investors should be aware that the tax legislation of the country in which the investor is resident and of the Issuer's country of incorporation may have an impact on the income received from the Securities.

United Kingdom Tax Considerations

The following comments are of a general nature, relating only to the position of persons who are absolute beneficial owners of the Securities and are based on United Kingdom law and what is understood to be the current practice of Her Majesty's Revenue & Customs ("HMRC"), in each case at the date of this Base Prospectus, which may change at any time, possibly with retrospective effect. The following is a general overview only of the United Kingdom withholding taxation treatment at the date hereof in relation to income payments in respect of the Securities. The overview also contains some very general statements about stamp duty and stamp duty reserve tax ("SDRT"). The comments are not exhaustive, and do not deal with other United Kingdom tax aspects of acquiring, holding, disposing of, abandoning, exercising or dealing in Securities other than as set out under the heading "PSL Notes" below.

United Kingdom withholding tax

Interest payments

Interest will only be subject to a deduction on account of United Kingdom income tax if it has a United Kingdom source in which case it may fall to be paid under deduction of United Kingdom income tax at the basic rate (currently 20 per cent.) subject to such relief as may be available under the provisions of any applicable double taxation treaty or to any other exemption which may apply.

The location of the source of a payment for UK tax purposes is a complex matter. The case law provides that a multi-factorial approach must be taken to determining the source. Relevant factors include the residence of the Issuer and the original guarantor, the location of security (if any), and the ultimate, or substantive, source of discharge of the Issuer's obligation to make payments. However there is no definitive list of factors and other factors may also be relevant. Interest payable on Securities issued by GSI is likely to have a UK source. GSFCI has been advised that payments of interest that they make should not generally have a UK source. Payments of interest by GSW may or may not have a UK source depending on all the facts and circumstances.

Where interest has a United Kingdom source, any payment of interest may nonetheless be made without withholding or deduction for or on account of United Kingdom income tax where any of the following conditions are satisfied:

- (a) if the Securities are and continue to be "quoted Eurobonds" as defined in section 987 of the Income Tax Act 2007. The Securities will constitute "quoted Eurobonds" if they carry a right to interest and are and continue to be either:
 - (i) listed on a recognised stock exchange within the meaning of section 1005 of the Income Tax Act 2007. Securities admitted to trading on a recognised stock exchange outside the United Kingdom will be treated as "listed" on a recognised stock exchange if (and only if) they are admitted to trading on that exchange and they are officially listed in accordance with provisions corresponding to those generally applicable in European Economic Area states in a country outside the United Kingdom in which there is a recognised stock exchange; or
 - (ii) admitted to trading on a "multilateral trading facility" (as defined by section 987 of the Income Tax Act 2007) (as amended) operated by a "regulated recognised stock exchange" within the meaning of section 987 of the Income Tax Act 2007 (as amended).
- (b) Where GSI is the issuer, if, and for so long as, it is authorised for the purposes of the Financial Services and Markets Act 2000 and its business consists wholly or mainly of dealing in financial instruments (as defined by section 984 of the Income Tax Act 2007) as principal, provided the payment is made by it in the ordinary course of that business; or
- (c) if the relevant interest is paid on Securities with a maturity date of less than one year from the date of issue and which are not issued under arrangements the effect of which is to render such Securities part of a borrowing with a total term of a year or more.

The references to "interest" above mean "interest" as understood in United Kingdom tax law and in particular any premium element of the redemption amount of any Securities redeemable at a premium may, if it is not considered "capital" for UK tax purposes, constitute a payment of interest subject to the withholding tax provisions discussed above. The statements above do not take any account of any different definitions of "interest" or "principal" which may prevail under any other law or which may be created by the terms and conditions of the Securities or any related documentation.

PSL Notes

The basis and rate of taxation in respect of the PSL Notes and reliefs depend on the prospective purchaser's own individual circumstances and could change at any time. This could have a negative impact on the return of the PSL Notes. Prospective purchasers of PSL Notes should seek their own independent tax advice as to the possible tax treatment of redemption payments (such term including early or final redemption) received on PSL Notes, prior to investing.

In the event that the PSL Notes pay a coupon otherwise than by way of a premium payable on redemption (such term including early or final redemption), prospective purchasers should be aware that such coupon will likely be subject to income tax.

United Kingdom Stamp Duty and Stamp Duty Reserve Tax

Issue

No UK stamp duty or SDRT should generally be payable on the issue of Securities save that SDRT at 1.5 per cent may be payable on an issue of Securities to a depositary receipts system or a clearance service (or their nominees) where all three of the conditions in (i), (ii) and (iii) below are met:

- (a) the Securities do not constitute exempt loan capital (see below);
- (b) the Securities are not covered by Article 5(2) of the Capital Duties Directive (Council Directive 2008/7/EC) (to the extent that that forms part of UK domestic law by virtue of the European Union (Withdrawal) Act 2018, as amended, and regulations made thereunder); and
- (c) there is a provision for physical settlement.

For the purposes of this UK tax section, the clearing systems run by Euroclear and Clearstream, Luxembourg constitute a "clearance service" however the CREST system run by Euroclear UK & Ireland Limited does not.

Securities will constitute "exempt loan capital" if the Securities constitute "loan capital" (as defined in section 78 Finance Act 1986) and do not carry (and in the case of (ii)-(iv) below have never carried) any one of the following four rights:

- (i) a right for the holder of the Securities to opt for conversion into shares or other securities or to acquire shares or other securities, including loan capital of the same description;
- (ii) a right to interest the amount of which exceeds a reasonable commercial return on the nominal amount of the capital;
- (iii) a right to interest the amount of which falls or has fallen to be determined to any extent by reference to the results of, or of any part of, a business or to the value of any property; or
- (iv) a right on repayment to an amount which exceeds the nominal amount of the capital and is not reasonably comparable with what is generally repayable (in respect of a similar nominal amount of capital) under the terms of issue of loan capital listed in the Official List of the London Stock Exchange.

Transfer of Securities

Transfers of interests in Securities held through a clearance service do not attract UK stamp duty or SDRT provided that no section 97A election has been made.

Where Securities do not comprise exempt loan capital and are not held through a clearance service, then, where the issuer of the Securities is a body corporate incorporated in the United Kingdom or where the Securities are registered in a register kept in the United Kingdom by or on behalf of the relevant issuer or the shares are "paired" with shares in a United Kingdom incorporated company within the meaning of section 99(6B) of the Finance Act 1986, agreements to transfer such Securities may attract SDRT at 0.5 per cent. of the chargeable consideration.

Where Securities are not held through a clearance service, SDRT at 0.5 per cent. may also be payable in relation to any agreement to transfer Securities such as Warrants which give the holder the right on exercise to acquire stock, shares or loan capital in certain companies with a United Kingdom connection unless such stock, shares or loan capital would itself qualify as "exempt loan capital". A company will have a United Kingdom connection for these purposes if:

- (a) the company is incorporated in the United Kingdom; or
- (b) a register of the relevant stock, shares or loan capital is kept in the United Kingdom by or on behalf of the company; or
- (c) the shares are "paired" with shares in a United Kingdom incorporated company within the meaning of section 99(6B) of the Finance Act 1986.

In addition, stamp duty at 0.5 per cent. may arise in respect of any document transferring any Security that does not comprise exempt loan capital. However, where a liability to stamp duty is paid within six years of a liability to SDRT arising the liability to SDRT will be cancelled or repaid as appropriate.

Redemption or Settlement of Securities

Stamp duty or SDRT at 0.5 per cent. may arise on Physical Settlement in certain cases.

Higher Rate Charges

Where stamp duty is payable as outlined above, it may be charged at the higher rate of 1.5 per cent. (rather than at the 0.5 per cent. rate) in respect of any document transferring or agreement to transfer Securities to a depositary receipts system or clearance service.

Jersey Tax Considerations

The following is a general description of certain tax considerations relating to the Securities and is based on taxation law and practice in Jersey as at the date of this Base Prospectus and is subject to any changes therein. It does not purport to be a complete analysis of all tax considerations relating to the Securities and so should be treated with appropriate caution. Prospective investors should consult their own professional advisers concerning the possible tax consequences of purchasing, holding and/or selling Securities and receiving payments of interest, principal and/or other amounts under the Securities under the applicable laws of their country of citizenship, residence or domicile.

The Issuers will be able to make payments in respect of the Securities without any withholding or deduction for or on account of Jersey tax. Holders of Securities (other than residents of Jersey) will not be subject to any Jersey tax in respect of the holding, sale or other disposition of their Securities.

Goods and services tax

GSFCI is an "international services entity" for the purposes of the Goods and Services Tax (Jersey) Law 2007 (the "**GST Law**"). Consequently, GSFCI is not required to:

- (a) register as a taxable person pursuant to the GST Law;
- (b) charge goods and services tax in Jersey in respect of any supply made by it; or
- (c) (subject to limited exceptions that are not expected to apply to GSFCI) pay goods and services tax in Jersey in respect of any supply made to it.

Stamp duty

Under the current Jersey law, there are no death or estate duties, capital gains, gift, wealth, inheritance or capital transfer taxes. No stamp duty is levied in Jersey on the issue, transfer, acquisition, ownership, redemption, sale or other disposal of Securities. In the event of the death of an individual sole holder of Securities, duty at rates of up to 0.75 per cent. of the value of the Securities held may be payable on registration of Jersey probate or letters of administration which may be required in order to transfer or otherwise deal with Securities held by the deceased individual sole holder of Securities.

Organisation for Economic Co-operation and Development (OECD) Common Reporting Standard

Drawing extensively on the intergovernmental approach to implementing the United States Foreign Account Tax Compliance Act, the OECD developed the Common Reporting Standard ("**CRS**") to address the issue of offshore tax evasion on a global basis. Aimed at maximising efficiency and reducing cost for financial institutions, the CRS provides a common standard for due diligence, reporting and exchange of financial account information. Pursuant to the CRS, participating jurisdictions will obtain from reporting financial institutions, and automatically exchange with exchange partners on an annual basis, financial information with respect to all reportable accounts identified by financial institutions on the basis of common due diligence and reporting procedures. Jersey has implemented the CRS by the Taxation (Implementation) (International Tax Compliance) (Common Reporting Standard) (Jersey) Regulations 2015. As a result, GSFCI is required to comply with the CRS due diligence and reporting requirements, as adopted by Jersey. Jersey has committed to a common implementation timetable which has seen the first exchanges of information in 2017 in respect of accounts open at and from the end of 2015, with further countries committed to implement the new global standard.

Holders of Securities issued by GSFCI may be required to provide additional information to GSFCI to enable GSFCI to satisfy its obligations under the CRS. Failure to provide requested information may subject an investor to liability for any resulting penalties or other charges and/or mandatory redemption of Securities issued by GSFCI.

Luxembourg Tax Considerations

The following overview is of a general nature and is included herein solely for information purposes. It is a general description of certain Luxembourg tax considerations relating to the purchasing, holding and disposing of Securities.

This description is based on the laws, regulations and applicable tax treaties as in effect in Luxembourg on the date hereof, all of which are subject to change, possibly with retroactive effect. It is not intended to be, nor should it be construed to be, legal or tax advice.

The following overview does not purport to be a comprehensive description of all tax considerations that may be relevant to a particular prospective holder with regard to a decision to purchase, own or dispose of Securities.

Prospective holders are advised to consult their own tax advisers as to the tax consequences, under the tax laws of the country of which they are resident and under the laws of the all relevant jurisdictions, to which they may be subject.

The residence concept used under the respective headings below applies for Luxembourg income tax assessment purposes only. Any reference in the present section to a tax, duty, levy, impost or other charge or withholding of a similar nature refers to Luxembourg tax law and/or concepts only.

Withholding tax

Non-Luxembourg tax resident holders

Under the Luxembourg general tax laws currently in force, there is no withholding tax to be withheld by the debtor of Securities on payments of principal, premium or arm's length non-profit participating interest (including accrued but unpaid interest) to non-Luxembourg tax resident holders. Nor is any Luxembourg withholding tax payable upon redemption or repurchase of Securities held by non-Luxembourg tax resident holders to the extent said Securities do not (i) give entitlement to a share of the profits generated by the issuing company and (ii) the issuing company is not thinly capitalised.

Luxembourg tax resident holders

Under Luxembourg general tax laws currently in force and subject to the law of 23 December 2005, as amended (hereinafter the "**Law**"), there is no withholding tax to be withheld by the debtor of Securities on payments of principal, premium or arm's length non-profit participating interest (including accrued but unpaid interest) to Luxembourg tax resident holders. Nor is any Luxembourg withholding tax payable upon redemption or repurchase of Securities held by Luxembourg tax resident holders to the extent said Securities do not (i) give entitlement to a share of the profits generated by the issuing company and (ii) the issuing company is not thinly capitalised.

Under the Law, payments of interest or similar income made or ascribed by a paying agent established in Luxembourg to or for the immediate benefit of an individual beneficial owner who is tax resident of Luxembourg will be subject to a withholding tax of 20 per cent.

Luxembourg resident individuals can opt to self-declare and pay a 20 per cent. levy on interest payments made or ascribed by paying agents located in a member state of the European Union other than Luxembourg or a member state of the European Economic Area.

In case the individual beneficial owner is an individual acting in the course of the management of his/her private wealth, said withholding tax will be in full discharge of income tax. Responsibility for the withholding tax will be assumed by the Luxembourg Paying Agent. Payments of interest under Securities coming within the scope of the Law would be subject to withholding tax at a rate of 20 per cent.

Registration tax

Neither the issuance nor the transfer of Securities will give rise to any Luxembourg stamp duty, issuance tax, registration tax, transfer tax or similar taxes or duties. Notwithstanding, documents relating to the Securities, other than the Securities themselves, attached to a notarial deed may require registration. In this case, as well as in case of a voluntary registration, depending on the nature of such documents, registration duties may apply.

Automatic exchange of information

Under the law of 18 December 2015 implementing the Directive on Administrative Cooperation ("**DAC2**") and the OECD Common Reporting Standard (the "**CRS**") (the "**Law**"), since 1 January 2016,

the Luxembourg financial institutions are required to provide to the fiscal authorities of other EU member states and jurisdictions participating to the CRS details of payments of interest, dividends and similar type of income, gross proceeds from the sale of financial assets and other income, and account balances held on reportable accounts, as defined in the DAC2 and the CRS, of account holders residents of, or established in, an EU member state and certain dependent and associated territories of EU member states or in a jurisdiction which has introduced the CRS in its domestic law.

Payment of interest and other income derived from the Securities will fall into the scope of the Law and are therefore subject to reporting obligations.

Prospective investors should consult their own tax advisor with respect to the application of the DAC2 and the CRS to such investor in light of such investor's individual circumstances.

German Tax Considerations

Tax Residents

Taxation of interest income and capital gains

Payments of interest on the Securities to persons who are tax residents of Germany (i.e. persons whose residence, habitual abode, statutory seat, or place of effective management and control is located in Germany) are subject to German income or corporate tax (plus solidarity surcharge (*Solidaritätszuschlag*) at a rate of 5.5 per cent. on the respective taxable amount, if applicable). Furthermore, church tax may apply. Such interest may also be subject to trade tax if the Securities form part of the assets of a German trade or business.

Capital gains from the disposal, redemption, repayment or assignment of Securities held as non-business assets are subject to German income tax and, if applicable, solidarity surcharge. The taxable capital gain will be the difference between the proceeds from the disposition, redemption, repayment or assignment on the one hand and the acquisition and disposal costs on the other hand. Where Securities are issued in a currency other than Euro, the disposal proceeds and the acquisition costs each will be converted into Euros using the relevant current exchange rates, so that currency gains and losses will also be taken into account in determining taxable income.

Where a Security forms part of the property of a German trade or business generally, each year the part of the difference between the issue or purchase price of the Security and its redemption amount (if such amount is fixed at the time of the acquisition) attributable to such year as well as interest accrued must be taken into account as interest income and may also be subject to trade tax.

Income Tax

If (i) Securities are held in a custodial account which the holder of the Securities maintains with a German credit institution or a German financial services institution, each as defined in the German Banking Act (*Gesetz über das Kreditwesen*) (including a German branch of a foreign credit institution or of a foreign financial services institution, but excluding a foreign branch of a German credit institution or a German financial services institution) (a "**German Bank**") or a German securities trader (*Wertpapierhandelsunternehmen*) or a German securities trading bank (*Wertpapierhandelsbanken*) or one of these entities executes the sale of the Securities and (ii) the relevant entity pays or credits the relevant payments under the Securities (a "**German Disbursing Agent**") and (iii) the respective payments qualify as interest payments on bonds and claims, which are publicly registered or entered into a foreign register or for which collective global notes or partial debentures were issued, or qualify as capital gains from the sale or redemption of coupons, if the linked bonds are not subject to the sale or the redemption, or qualify as capital gains from the sale or redemption of other capital claims within the meaning of sec. 20 para. 1 no. 7 of the German Income Tax Act or qualify as gains arising from forward transactions (*Termingeschäft*) or arising from the sale of a financial instrument which is designed as forward transaction, the German Disbursing Agent would withhold or deduct German withholding tax at a rate of 26.375 per cent. (including solidarity surcharge).

In case interest payments on bonds and claims, which are publicly registered or entered into a foreign register or for which collective global notes or partial debentures were issued, or proceeds from the sale or redemption of coupons, if the linked bonds are not subject to the sale, or proceeds from the sale or redemption of other capital claims within the meaning of sec. 20 para. 1 no. 7 of the German Income Tax

Act are paid out or credited by the debtor or a German Bank to a holder other than a foreign credit institution or foreign financial services institution against handing over of the Securities or interest coupons, which are not safe-kept or administered by the debtor or the German Bank ("**Over-the-counter Transaction**") the aforesaid institution is obliged to withhold tax at a rate of 26.375 per cent. (including solidarity surcharge).

Withholding tax will also apply with regard to proceeds from Securities held as business assets, provided the requirements as set forth above are met, unless in cases of proceeds deriving from forward transactions (*Termingeschäfte*) or from the sale of the Securities (i) the holder of the Securities qualifies as corporation being subject to unlimited taxation in Germany or (ii) such proceeds are business income of a German business and the holder of the Securities declares this fact to the German Disbursing Agent by ways of an official form.

Flat Tax Regime

Generally for private individuals holding the Securities as private assets, withholding taxes levied on income deriving from capital investments (e.g. interest income under the Securities and also capital gains) becomes subject to a final flat tax of 25 per cent. plus a solidarity surcharge thereon, which is currently levied at 5.5 per cent. (resulting in an aggregate tax burden of 26.375 per cent.). If the holder of the Securities holds the Securities with a German Disbursing Agent, then such flat tax will be directly withheld by such German Disbursing Agent (see above section on Withholding Tax). An individual holder may in addition be subject to church tax. Since 1 January 2015, for individuals subject to church tax an electronic information system for church withholding tax purposes applies in relation to investment income, with the effect that church tax will be collected automatically by the paying office by way of withholding unless the holder of the Securities has filed a blocking notice (*Sperrvermerk*) with the German Federal Central Tax Office (*Bundeszentralamt für Steuern*) in which case the holder of the Securities will be assessed to church tax. If church tax has to be taken into account within the withholding tax procedure by the German Disbursing Agent, the flat tax is to be reduced by 25 per cent. of the church tax applying to the respective taxable income. Such reduced withholding tax amount is the assessment base for the church tax to be withheld by the German Disbursing Agent. The church tax rate varies between the German federal states. If the income from the Securities was not subject to withholding tax, the flat tax is levied in the course of the annual assessment procedure.

Tax Base

The tax base depends upon the nature of the respective income:

With regard to current interest income, the gross interest the resident holder receives is subject to the flat tax upon accrual of the interest.

Regarding the sale or redemption of the Securities, the capital gain is calculated on the difference between the proceeds from the redemption, transfer or sale after deduction of expenses directly related to the transfer, sale or redemption and the acquisition costs, if the Securities were purchased or sold by the German Disbursing Agent and had been held in a custodial account with such German Disbursing Agent. In case the resident holder transfers the Securities to another account, the initial German Disbursing Agent has to inform the new German Disbursing Agent about the acquisition costs of the Securities, otherwise 30 per cent. of the proceeds from the sale or redemption of the Securities are deemed as assessment base for the withholding tax.

If (i) under the Securities on the basis of their respective Issue Terms the resident holder may demand the delivery of a fixed number of securities instead of repayment of the nominal value of the Securities by the Issuer upon the maturity of the Securities or the Issuer is entitled to deliver a fixed number of securities instead of the repayment of the nominal value upon the maturity of the Securities and (iii) the resident holder or the Issuer makes use of such right, then the acquisition costs for the Securities are deemed as sale price and as acquisition costs for the delivered bonds or shares. In such case, no taxation or withholding tax is triggered upon delivery of the bonds or the shares.

In case Securities qualify as income within the meaning of sec. 20 para. 1 no. 7 of the German Income Tax Act, losses resulting from the total or partial un-collectability of such claim, from the write-off of worthless claims, from the transfer of worthless claims to a third party or from any other shortfall can only be offset with gains from other capital income up to the amount of 20,000 Euro *p.a.*. Losses not

offset can be carried forward to subsequent years and can be offset against gains from capital income up to the amount of EUR 20,000 in each subsequent year. Such loss compensation will not be recognized at the level of the withholding tax, i.e. withholding tax will be applied without the aforementioned loss compensation and the individual private investor will have to submit a tax return to have such losses recognized.

Apart from an annual lump-sum deduction (*Sparer-Pauschbetrag*) for investment type income of EUR 801 (EUR 1,602 for married couples and for partners in accordance with the registered partnership law (*Gesetz über die Eingetragene Lebenspartnerschaft*) filing jointly) investors holding the Securities as private assets will not be entitled to deduct expenses incurred in connection with the investment in the Securities from their income. In addition, such holders could not offset losses from the investment in the Securities against other type of income (e.g. employment income). However, upon formal application by the taxpayer, the lower personal income tax rate (i.e. a personal income tax rate falling below 25 per cent. plus, if applicable, solidarity surcharge thereon), if any, will be applied (*Günstigerprüfung*). A taxpayer can also formally apply for a tax assessment to make specific allowances.

In general, no withholding tax will be levied if the holder of Securities is an individual (i) whose Securities do not form part of the property of a German trade or business or give rise to income from the letting and leasing of property and (ii) who filed a certificate of exemption (*Freistellungsauftrag*) with the German Disbursing Agent but only to the extent the interest income derived from the Securities together with other investment income does not exceed the maximum exemption amount shown on the certificate of exemption. Similarly, no withholding tax will be deducted if the holder of Securities has submitted to the German Disbursing Agent a certificate of non-assessment (*Nichtveranlagungsbescheinigung*) issued by the relevant local tax office.

If the Securities are not held as private assets but as business assets, gains relating to a sale, transfer or redemption of the Securities and payments of interest are subject to German corporation tax or income tax and in any case trade tax as part of current operating profit. Losses incurred under the Securities may only be limited tax deductible.

If the Securities are held as business assets, a withholding tax charge will not be a final tax, but might result in a tax credit or refund of the withholding tax.

Non-residents

Non-residents of Germany are, in general, exempt from German income taxation, unless the respective payments qualify as taxable income from German sources within the meaning of section 49 of the German Income Tax Act, e.g. if the Securities are held in a German permanent establishment or through a German permanent representative or payments are paid within the scope of an Over-the-counter Transaction or for another reason stipulated in said section 49 of the German Income Tax Act. In this case a holder of the Securities will be subject to a limited tax liability in Germany and income tax or corporation tax as the case may be and solidarity surcharge will be levied on the German income. In addition, interest income and capital gains will be subject to trade tax if the Securities belong to a German permanent establishment of the holder.

Generally, German withholding taxes may be levied, even if the right to tax the income is, e.g. due to a double taxation treaty, not with Germany if the further conditions set out above are met. However, under certain conditions, the investor in the Securities may be eligible for a full or partial refund.

Under certain circumstances non-residents may benefit from tax reductions or tax exemptions under double tax treaties, if any, entered into with Germany.

Inheritance and Gift Tax

No inheritance or gift taxes with respect to any Instrument will arise under the laws of Germany, if, in the case of inheritance tax, neither the deceased nor the beneficiary, or, in the case of gift tax, neither the donor nor the donee, is a resident of Germany and such Instrument is not attributable to a German trade or business for which a permanent establishment is maintained, or a permanent representative has been appointed, in Germany. Exceptions from this rule apply to certain German expatriates.

Other Taxes

No stamp, issue, registration or similar taxes or duties will be payable in Germany in connection with the issuance, delivery or execution of the Securities. Net assets tax (*Vermögenssteuer*) is currently not levied in Germany. However, the proposal of a financial transactions tax is discussed at the level of ten participating EU member states (see "The proposed Financial Transactions Tax ("**FTT**")" above).

International Exchange of Information

Based on the so-called OECD Common Reporting Standard, the states which have committed themselves to implement this standard ("**Participating States**") will exchange potentially taxation-relevant information about financial accounts which an individual holds in a Participating State other than his country of residence. This procedure commenced in 2017 with information for the year 2016. The same applies starting on 1 January 2016 for the member states of the European Union. Due to an extension of Directive 2011/16/EU on administrative cooperation in the field of taxation (the "**Mutual Assistance Directive**"), the member states will from that date onwards exchange financial information on notifiable financial accounts of individuals which are resident in another member state of the European Union.

In Germany, the Mutual Assistance Directive as amended in regard of the Automatic Exchange of Information and the OECD Common Reporting Standard were implemented by the Act on the Exchange of Financial Accounts Information (*Finanzkonten-Informationsaustauschgesetz – FKAustG*) which became effective as of 31 December 2015.

Based on (bilateral) agreements between either the European Union or Germany and third countries as regards the automatic exchange of information in the field of taxation, a significant number of non-EU countries and certain dependent or associated territories of certain member states is taking part in the International Exchange of Information. Overall, more than 100 countries and jurisdictions have adopted measures in the light of the OECD Common Reporting Standard and have committed to the automatic exchange of financial account information.

Prospective purchasers of the Securities are advised to consult their own tax advisors in relation to the further developments.

Austrian Taxation

*The information contained in this section is only non-binding information for investors. The following is a brief summary of Austrian (income) tax aspects in connection with the Securities. It does not claim to fully describe all Austrian tax consequences of the acquisition, ownership, disposition, redemption, exercise or settlement of the Securities, but only of certain aspects thereof. Further, this overview does not take into account or discuss the tax laws of any country other than Austria nor does it take into account the investors' individual circumstances. Under no circumstances will the Issuer issue any tax advice to the investors with this information. Rather, this reference does not replace the advice of a tax adviser, which is indispensable in each individual case. As different types of Securities may be issued under this Base Prospectus, the tax treatment of such Securities can be different due to their specific terms. Any taxes or other charges which may be payable in connection with the payment of interest, capital gains or the repayment amount shall be borne by the respective investor. In the case of payments due under the Securities and in case of sale of the Securities tax may be incurred in Austria. Tax risks resulting from the Securities (in particular from a potential qualification as a foreign investment fund within the meaning of section 188 Austrian Investment Funds Act *Investmentfondsgesetz – "AIFA"*) shall in any case be borne by the respective investor. In certain situations or for certain investors, exceptions to the legal situation described herein may apply. Prospective investors are advised to consult their own professional advisers to obtain further information about the tax consequences of the acquisition, ownership, disposition, redemption, exercise or settlement of any of the Securities. Only personal advisers are in a position to adequately take into account special tax aspects of the particular Securities in question as well as the individual investor's personal circumstances and any special tax treatment applicable to such investor.*

This overview is based on Austrian law as in force as of the date of this Base Prospectus. The laws and their interpretation by the tax authorities may change and such changes may also have retroactive effect. With regard to certain innovative or structured financial notes or instruments there is currently hardly any case law or comments of the fiscal authorities as to the tax treatment of such financial notes and

instruments. Accordingly, it cannot be ruled out that the Austrian fiscal authorities and courts or the Austrian credit institutions (custodians or paying agents) adopt a view different from that outlined below.

With the Austrian Tax Reform Act 2015/2016 (Steuerreformgesetz 2015/2016) the withholding tax rate and the flat (special) income tax rate pursuant to section 27a Austrian Income Tax Act (Einkommensteuergesetz– "AITA") for most investment income of individuals was increased from 25 per cent to 27.5 per cent. from 1 January 2016 (limited exceptions apply in relation to certain investment income, mainly interest on bank accounts, for which the applicable rate remained at 25 per cent.). Loss compensation rules were also amended. Prospective investors are advised to consult their own professional advisors in this regard.

(a) Individual Investors

(i) Individual is an Austrian resident or has his/her habitual abode in Austria

For the purpose of the below outlined principles regarding the taxation of investment income in Austria it is assumed that the Securities are securitised, legally and factually offered to an indefinite number of persons (public offering) and are neither equity instruments, such as shares or participation rights (*Substanzgenussrechte*), nor investment fund units. For private placements other principles apply. For non-securitised instruments, the principles outlined below would be applicable if the custodian or paying agent (see below) withholds and pays tax as explained below on a voluntary basis.

If income from the Securities is paid out by a custodian or a paying agent (*depotführende oder auszahlende Stelle*) located in Austria (i.e., Austrian credit institutions as well as Austrian branches of foreign credit institutions paying out the income to the holder of the Securities), the custodian or paying agent has to withhold and pay to the Austrian financial authorities 27.5 per cent. withholding tax. The term "income from the Securities" includes (i) current income (interest payments) as well as (ii) income, if any, realised upon redemption or prior redemption or (iii) income realised upon sale of the Securities (capital gains). Securities with value-based repayment are assessed by the Austrian tax authorities as certificates. Accordingly, certificates are securitised capital claims that reflect the performance of an underlying asset and grant the holder a right to receive a monetary or settlement amount that depends on the value of the underlying asset. Underlyings may include inter alia shares, indices, commodities, currencies, bonds or precious metals. Capital gains from such securities are treated by the Austrian tax authorities as income from derivative financial instruments according to section 27 paragraph 4 AITA. Additional special rules on deducting 27.5 per cent. withholding tax apply to cash or share notes.

In case no withholding tax is levied on income from the Securities (i.e., interest income is not paid out by a custodian or paying agent in Austria), Austrian resident individual investors will have to declare the income derived from the Securities in their income tax returns pursuant to the AITA. In this case the income from the Securities is subject to the flat (special) income tax rate of 27.5 per cent. pursuant to section 27a paragraph 1 AITA.

Upon relocation abroad investment income accrued until the time of relocation is generally taxable in Austria. However, in case of relocation within the European Union or the European Economic Area taxation in relation to Securities held as non-business assets can be postponed until actual realisation of the income based on a respective application. Special rules also apply to the transfer of a custodian account from Austria abroad. For Securities held as business assets, exit tax arises upon relocation but generally may be paid over five years .

The 27.5 per cent. withholding tax generally constitutes a final taxation (*Endbesteuerung*) according to section 97 paragraph 1 AITA for all Austrian resident individuals, if they hold the Securities as a non-business asset. Final taxation means that no further income tax will be assessed and the income is not to be included in the investor's income tax return. According to section 27a paragraph 4 AITA, the investor may opt to include the investment income in his or her individual tax return. In such case the tax already withheld is credited against the otherwise assessed income tax

(progressive tax rate up to 55 per cent.) or paid back, respectively. Expenses incurred by individual investor in relation to the acquisition, ownership, disposition, redemption, exercise or settlement of Securities (e.g., bank fees or commissions) are not tax deductible (*Abzugsverbot*) according to section 20 paragraph 2 AITA. Generally, a certain amount of loss compensation is possible under certain conditions.

The Treaty between the Republic of Austria and the Swiss Confederation on Cooperation in the Areas of Taxation and Capital Markets was revoked completely as per 1 January 2017 when the agreement regarding the introduction of the global standard on Automatic Exchange of Information (AEOI) between the EU and Switzerland entered into force. As a result, income that used to be covered by the revoked treaty, is subject to the Swiss equivalent of the Austrian Common Reporting Standard Act (see below) from 1 January 2017. The Treaty between the Republic of Austria and the Principality of Liechtenstein on Cooperation in the Area of Taxation ("**Tax-Treaty**") was revised with regard to the implementation of the AEOI-Agreement between Austria and Liechtenstein as well with effect from 1 January 2017. As a result certain accounts of tax transparent asset structures (*steuerlich transparente Vermögensstrukturen*) existing on 31 December 2016 and of non-transparent asset structures (*steuerlich intransparente Vermögensstrukturen*) regardless of their date of establishment may further be subject to the Tax Treaty and exempt from AEOI. The Tax Treaty provides that a Liechtenstein paying agent has to withhold a tax amounting to 25 per cent. or 27.5 per cent. (depending on the type of claim) on, inter alia, interest income, dividends and capital gains from assets booked with an account or deposit of such Liechtenstein paying agent, if the relevant holder of such assets is tax resident in Austria. The same applies for assets of Austrian tax residents which are managed by a Liechtenstein paying agent. For Austrian income tax purposes this withholding tax has the effect of final taxation regarding the underlying income if the AITA provides for the effect of final taxation for such income, had it been accrued in Austria. Instead of paying the withholding tax, the taxpayer can opt for voluntary disclosure of the income and capital gains to the competent Austrian authority by express authorization to the Liechtenstein paying agent; these subsequently have to be included in the taxpayer's income tax return.

The redemption by delivery of underlying assets results in an acquisition of the underlying asset by the investor. Capital gains upon disposal of the underlying asset are generally taxable at the 27.5 per cent. tax rate in the case of capital investments (*Kapitalvermögen*). Capital gains from the disposal of raw materials or precious metals are subject to income tax at the full income tax rate if the disposal is effected less than one year after the acquisition of the underlying asset upon redemption.

(ii) Risk of Requalification

Further, subject to certain conditions, instruments may be re-qualified as units of a foreign investment fund within the meaning of section 188 AIFA). Pursuant to section 188 AIFA, the term "foreign investment fund" comprises (i) undertakings for collective investment in transferable securities ("**UCITS**") the state of origin of which is not Austria, (ii) alternative investment funds ("**AIF**") pursuant to the Austrian Act on Alternative Investment Fund Managers (*Alternative Investmentfonds Manager-Gesetz – "AIFMG"*) the state of origin of which is not Austria (except property AIF *AIF in Immobilien* according to AIFMG); and (iii) alternative undertakings subject to a foreign jurisdiction, irrespective of the legal form they are organised in, the assets of which are invested according to the principle of risk-spreading on the basis either of a statute, of the undertaking's articles or of customary exercise, in cases of abnormally low taxation in the state of residence. Uncertainties exist as to the precondition under which a foreign issuer has to be qualified as an AIF manager; regarding the definition of an AIF, the guidelines issued by the Austrian Financial Market Authority are applicable. Prospective investors are, therefore, advised to consult their tax advisors to obtain further information about the interpretation of the law and the application of the law by the tax authorities in this regard. In this respect, it should be noted that the Austrian tax authorities have commented upon the fact that also debt securities as, for instance, certificates may be classified as AIFs (item 77 Investment Fund Regulations 2018 *Investmentfondsrichtlinien* 2018). Pursuant to these regulations, this may be so, in

particular, if (i) there is an obligation of the issuer vis-à-vis the investor regarding the investment of the issue proceeds and (ii) the issuer has the possibility to influence the performance of the investment. The term investment fund, however, does not encompass collective real estate investment vehicles pursuant to the Austrian Real Estate Funds Act (*ImmobilienInvestmentfondsgesetz*). In case of requalification of a financial instrument into a foreign investment fund, such foreign investment fund units are regarded as transparent for tax purposes. Both distributions as well as retained income are subject to income tax. Retained income may be deemed distributed for tax purposes (so called "income equivalent to distributions" *ausschüttungsgleiche Erträge*) as early as 31 December of each year. In case a foreign investment fund does neither have an Austrian tax representative nor has reported such income equivalent to distributions to the Austrian tax authorities by itself, a lump sum calculation will take place. Such lump sum calculation generally results in a higher tax basis. Generally, the 27.5 per cent. tax rate applies. Capital gains on a disposal of units in foreign investment funds are taxed by means of the 27.5 per cent. withholding tax or are taxed at the flat (special) income tax rate of 27.5 per cent. in addition, on non-investment income the progressive tax rate is applicable.

- (iii) Individual is neither Austrian resident nor has his/her habitual abode in Austria

In case the investor (natural person) is neither an Austrian resident nor has his/her habitual abode in Austria, Austrian income tax will not apply on interest payments as well as capital gains from the disposal, redemption, exercise or settlement of the Securities, provided that the issuer is not an Austrian resident, does not have its seat or place of management in Austria or is not an Austrian branch of a foreign credit institution. If the investment income of non-resident individual investors is not subject to income tax liability in Austria, tax deduction can be omitted, subject to certain conditions. The Austrian custodian or paying agent may refrain from withholding already at source only, if the non-resident investor furnishes proof of non-residency.

(b) **Corporations / Private Foundations**

Generally, interest or income from the disposition, redemption, exercise or settlement of the Securities is subject to corporate income tax at a rate of 25 per cent. The withholding tax is credited against corporate income tax. Corporate investors deriving business income from the Securities may avoid the application of withholding tax by filing a declaration of exemption (*Befreiungserklärung*) within the meaning of section 94 no 5 AITA with the custodian or paying agent. Additionally, the Securities have to be held in a custodial account with a credit institution. Generally, for private foundations holding the Securities as non-business assets, the same tax rules as for individuals (see above) apply. However, in case of private foundations pursuant to the Austrian Private Foundations Act (*Privatstiftungsgesetz* – "**PSG**") fulfilling the prerequisites contained in section 13 paragraph 1 Austrian Corporate Income Tax Act (*Körperschaftsteuergesetz* – "**CITA**") and holding the Securities as a non-business asset no withholding tax is levied on income on such Securities under the conditions set forth in section 94 no 12 AITA. Interest or income from the disposition, redemption, exercise or settlement of the Securities is not subject to the flat (special) income tax rate of 27.5 per cent. Instead, pursuant to section 13 paragraph 3 CITA, an interim tax (*Zwischensteuer*) at a rate of 25 per cent. is levied on such income. This interim tax can be credited against withholding tax for amounts granted to beneficiaries (*Begünstigter*) of the private foundation pursuant to the PSG.

(c) **International Exchange of Information**

Based on the so-called "OECD Common Reporting Standard", the states which have committed themselves to implement this standard ("**Participating States**") will exchange potentially taxation-relevant information about financial accounts which an individual holds in a Participating State other than his country of residence. In General, this procedure commenced in 2017 with information for the year 2016.

Austria implemented the relevant directive of the European Council (2014/107/EU) with the Austrian Common Reporting Standard Act (*Gemeinsamer Meldestandard-Gesetz* - "**GMSG**") which became effective on 1 January 2016. The GMSG determines for the purpose of the

multilateral mechanism for automatic tax information exchange between Austria and the competent authorities of the other EU member states and of participating non-EU countries reporting and due diligence requirements for reporting financial institutions regarding notification obligations via the competent Austrian tax authority. Generally, reporting requirements under the GMSG are applicable to periods starting on 1 January 2017. The notifications generally have to be made not later than by the end of June for the previous calendar year. Initial notifications for the period from 1 October until 31 December 2016 on certain data on new accounts had to be made until 30 June 2017.

(d) **Responsibility for Withholding of Taxes**

The Issuer does not assume liability for the withholding of taxes at source. Withholding tax is levied by an Austrian custodian or paying agent.

(e) **Inheritance and Gift Tax**

In Austria, inheritance and gift tax is not levied any more. Gifts upon living persons (*Schenkungen unter Lebenden*) are, however, to be notified to the Austrian tax authorities. This applies if the donor or the acquirer is an Austrian tax resident or has his/her habitual abode in Austria at the time of the donation. In case of corporations, the registered seat or the actual place of management in Austria is relevant. Exemptions apply to donations between close family members if the value of the gift(s) does not exceed EUR 50,000 within one year and to donations between other persons if the value of the gift(s) does not exceed EUR 15,000 within five years. Although this disclosure requirement does not trigger any tax for the donation in Austria, breach of the disclosure requirement may be fined with an amount of up to 10 per cent. of the value of the gift.

Certain gratuitous transfers of assets to (Austrian and foreign) private foundations and comparable legal estates are subject to foundation transfer tax (*Stiftungseingangsteuer*) according to the Austrian Foundation Transfer Tax Act (*Stiftungseingangsteuergesetz*). Such tax is triggered if at the time of the transfer the transferor and/or the transferee have a domicile, their habitual abode, their legal seat or their place of management in Austria. Certain exemptions apply in case of transfers mortis causa of financial assets according to section 27 paragraph 3 and 4 AITA (except shares in companies) if income from such financial assets is subject to tax at the flat rate of 25 per cent. or 27.5 per cent. The tax basis is the fair market value of the assets transferred minus any debts, calculated at the time of transfer. The tax rate is 2.5 per cent. in general with a higher rate of 25 per cent. applying in special cases. Special provisions apply to transfers to entities falling within the scope of the tax treaty between Austria and Liechtenstein.

Further, gratuitous transfers of Securities pursuant to section 27 paragraph 6 no 1 AITA may trigger income tax at the level of the transferor.

(f) **Other Taxes**

There are no transfer taxes, registration taxes or similar taxes payable in Austria as a consequence of the issuance, acquisition, ownership, disposition, redemption, exercise or settlement of the Securities. Wealth tax is currently not levied in Austria.

Belgian Taxation

Withholding tax

If the Issuers are making payments in respect of the Securities, which qualify as "interest" for Belgian tax purposes, and these payments are made to investors via a Belgian paying agent or other financial intermediary established in Belgium, then a 30 per cent. withholding tax will normally apply, save where an exemption is applicable (e.g. for interest payments made by non-residents (such as the Issuers) to non-resident investors which are not imputed on the results of a Belgian establishment of the debtor and which are made through regulated financial intermediaries (including licensed clearing or settlement institutions) established in Belgium, subject to compliance with some certification requirements regarding conditions applicable to the investors) or where a rate reduction applies under a bilateral tax treaty between Belgium and the state of tax residence of the investor subject to delivery of the necessary affidavit. This withholding tax is the final tax for private individuals and non-profit legal entities (subject

to the legal entities tax) resident in Belgium and constitutes an advance tax payment for individual professional investors and companies established in Belgium, which is creditable against their final income tax assessment and any excess withholding may be refundable.

In the less likely event that the payments made by the Issuers on the Securities would qualify as "dividends" for Belgian tax purposes and these payments are made to investors via a Belgian paying agent or other financial intermediary established in Belgium, then a 30 per cent. withholding tax will normally apply, save where an exemption is applicable (e.g. for non-Belgian source dividends received by Belgian resident companies or Belgian establishments of non-resident companies resident in another member state of the EEA) or where a rate reduction applies under a bilateral tax treaty between Belgium and the state of tax residence of the investor subject to delivery of the necessary affidavit. Again, this withholding tax is the final tax for private individuals (except that from assessment year 2019 onwards private individuals can claim a tax exemption on an annual dividend income of EUR 800 per person via their personal tax return) and non-profit legal entities (subject to the legal entities tax) resident in Belgium and constitutes an advance tax payment for individual professional investors and companies established in Belgium, which is creditable against their final income tax assessment and any excess withholding may be refundable.

As non-residents of Belgium, not acting through a Belgian establishment or branch office, the Issuers do not assume responsibility for the Belgian withholding tax referred to above.

Croatian Taxation

The following statements and discussions of certain Croatian tax considerations relevant to the purchase, holding or sale of Securities in the Republic of Croatia are of a general nature only and do not purport to exhaustively describe all possible tax aspects and do not deal with specific situations which may be of relevance for potential investors in Securities under Croatian law. These statements are not intended to be, nor should they be construed to be, legal or tax advice. This summary is based on the currently valid tax legislation which may be amended from time to time. Such amendments may possibly also be effected with retroactive effect and may negatively impact on the tax consequences described. Potential purchasers of the Securities will therefore need to consult their own legal and tax advisors as to the tax consequences of the purchase, holding or sale of the Securities. Tax risks resulting from the Securities shall in any case be borne by the holders of Securities. The Issuer assumes no responsibility with respect to taxes withheld at source.

Corporations, legal entities and individuals engaged in economic activities

General Remarks

Companies, legal entities and individuals independently and permanently engaged in economic activities for the purpose of generating profit, having their place of effective management and/or their registered legal seat in Croatia, are subject to profit tax pursuant to the Croatian Profit Tax Act (*Zakon o porezu na dobit*, Official Gazette No. 177/2004, as amended from time to time, the "**Profit Tax Act**") (unlimited corporate income tax liability). Such companies, legal entities and individuals having neither their place of effective management nor their registered legal seat in Croatia are subject to corporate income tax only on income from certain Croatian sources (limited corporate income tax liability).

Generally, the profit tax base is the difference between revenues and expenditures assessed pursuant to accounting rules, which is then increased and reduced for tax-specific items under the profit tax provisions. The tax base for residents is based on their worldwide income, while for non-residents is based only on income from Croatian sources.

Profit tax is taxable at the rate of (i) 10 per cent. applicable to companies, legal entities and individuals subject to profit tax with annual revenues below HRK 7,500,000 and (ii) 18 per cent. applicable to companies, legal entities and individuals subject to profit tax with annual revenues equal or above HRK 7,500,001. Accordingly, if a Croatian company, other legal and natural persons or business unit of a non-resident subject to paying profit tax is a holder of Securities, income on this basis would not be taxed directly, but such persons, should their overall operations generate profit, would be required to pay a profit tax of 10 per cent. or 18 per cent., as applicable.

The general rules outlined above apply to the extent there are no limitations imposed under applicable double taxation treaties.

Withholding Tax

Profit generated in Croatia by a non-resident is subject to withholding tax pursuant to the Profit Tax Act. Withholding tax payment is the obligation of the person who distributes the profit.

Interest, dividends, profit shares, copyrights and other intellectual property rights payable to a non-resident natural person are all subject to withholding tax. The tax base is calculated as the gross amount of profit distributed from a Croatian resident to a non-resident.

The withholding tax rate is 15 per cent., except for dividends and profit shares for which the withholding tax is paid at a rate of 10 per cent. As an exception, withholding tax is paid at a rate of 20% for all payments in case payments are made to legal entities having their seat or place of effective management in a country which is listed on the EU list of non-cooperative jurisdictions for tax purposes and with which Croatia does not have a double taxation treaty.

Interest payments on commodity loans for the purchase of goods used for carrying out a taxpayer's business activity, loans granted by a non-resident bank or other financial institution, and holders of government or corporate bonds who are non-resident legal persons are exempted from withholding tax payment.

Finally, the withholding tax rates may be lower if Croatia and the non-resident's country have entered into a double taxation treaty or exempt if the Securities qualify for exemption pursuant to the terms prescribed under the relevant EU directive applicable to interest and royalty payments made between associated companies of different Member States.

Natural Persons

General Remarks

Pursuant to the Croatian Income Tax Act (*Zakon o porezu na dohodak*, Official Gazette No. 115/2016, as amended from time to time, the "**Income Tax Act**"), individuals having a permanent domicile and/or their habitual abode in Croatia are subject to income tax in Croatia on their worldwide income (unlimited income tax liability). Individuals having neither a permanent domicile nor their habitual abode in Croatia (non-residents) are subject to income tax only on income from certain Croatian sources (limited income tax liability).

Depending on the tax base, annual income tax rates are: (i) tax base up to HRK 360,000.00 – 20 per cent., (ii) tax base above HRK 360,000.00 – 30 per cent. The aforementioned tax rates can be further increased in accordance with applicable surtax ranging from 0 per cent. to 18 per cent. depending on the exact location of residence in Croatia.

Income that is realized in a foreign currency shall be converted to HRK counter value by applying the middle exchange rate of the Croatian National Bank valid at the date of payment.

The general rules outlined above apply to the extent there are no limitations imposed under applicable double taxation treaties.

Capital Income

Capital income, as defined by the Income Tax Act, includes receipts from interest, exclusions of property and usage of services at the expense of profit of the current period, capital gains and profit shares acquired by grants or optional purchases of own shares, as well as receipts from dividends and profit shares based on shares of capital that are realized in the tax period.

Receipts from any type of claims are considered as interest, and especially (i) receipts from interest on savings in Croatian Kuna or foreign currencies, (ii) receipts from interest that are based on securities, (iii) receipts of interest on the basis of given loans, and (iv) receipts from distribution of income of an investment fund in the form of interest, if they are not taxed as profit shares on the basis of the distribution

of profit or income of an investment fund. Receipts from interest realized by investing into bonds, irrespective of the issuer and type of bonds are not considered as interests for capital income tax purposes.

Capital income from capital gains represents the difference between the purchase value and agreed selling price or receipt assessed on the basis of market value of the financial property that is being disposed of. Receipts are also considered those from disposing of financial instruments and structured products (hereinafter: financial property), i.e., receipts from (i) transferrable securities and structured products, including shares of companies and other associations whose shares may be disposed of similarly as shares of companies, (ii) money market instruments, (iii) units of joint venture entities, (iv) derivatives, and (v) a proportional part of the salvage value in a case of dissolution of the investment fund and other receipts from ownership shares in a case of dissolution, winding up or withdrawal.

Disposal of financial property includes sale, exchange, gift and other types of transfer, but does not include: (i) transfer of shares from one voluntary pension fund to another, (ii) exchange of securities with equivalent securities of the same issuer, provided that the relations among the holders of shares and capital of the issuer are not affected, as well as exchange of securities or financial instruments with other securities or financial instruments, and acquisition of securities or financial instruments in a case of change of status, provided that in all such cases there is no cash flow and the sequence of acquisition of financial property is ensured (where the value assessed on the date of the first acquisition of financial property shall be considered to be the purchase value), (iii) division of stocks of the same issuer, provided that there is no change of share capital or cash flow, (iv) exchange of shares among investment sub-funds of the same umbrella fund, or exchange of shares among investment funds that are managed by the same management company, provided that the sequence of acquisition of financial property is ensured (where the value assessed on the date of the first acquisition of financial property shall be considered to be the purchase value), and (v) repurchase of shares of the Croatian War Veterans' Fund.

The capital income from receipts from units of joint venture entities shall be assessed in the amount of realized yield that is decreased by the costs of the management of investments or property of the investment fund (net yield), or in a case of discounted securities and zero-coupon bonds, in the amount of the difference of the purchase value at the time of issue and realized value at the time of maturity if the purchaser shall hold the security until it becomes mature. The capital income from capital gains from investing financial property into portfolios, pursuant to the regulations that are regulating the capital market, shall be assessed at the time of realization of the yield from the portfolio, decreased by the costs of the management of portfolio (net yield).

The capital income from capital gains shall not be taxed if the disposing of was made (i) between spouses and first-degree relatives and other members of the immediate family, (ii) between divorced spouses, if the disposing of is directly related to the divorce, (iii) in relation to inheritance of financial property, or (iv) after more than two years from the date of acquisition of such property.

If financial property was acquired as a gift and disposed of within two years from the date of acquisition, the capital income shall be assessed as the difference between the purchase value and agreed selling price or receipt assessed on the basis of the market value of the financial property that is being disposed of, whereas the date at which the giver acquired the financial property is considered to be the date of acquisition, and the market value at the time of acquisition shall be considered to be the purchase value.

Capital losses may be deducted only from the income from capital gains that is realized in the same calendar year. All the appertaining expenses incurred at the expense of the taxpayer are calculated in the capital losses. Capital losses may be stated up to the amount of the tax basis.

The general rules outlined above apply to the extent there are no limitations imposed under applicable double taxation treaties.

Taxation of inheritance and gifts

If Securities are received as an inheritance or gift, or acquired on any other basis without compensation on the territory of the Republic of Croatia, the receiver would be required to pay taxes in the amount of 4 per cent. of the market value of the Securities.

The following persons are exempt from taxation: (i) spouse, ancestors and descendants of the deceased person/donor, (ii) individual and legal entities that receive movable property as compensation or for other

purposes related to the Homeland War, by the state or local government, (iii) individuals and legal entities that receive gifts or donations for purposes laid down by special regulations, and (iv) humanitarian organizations, religious communities, trusts, foundations and public authorities.

Czech Taxation

The summary herein provides general information regarding tax obligations in respect of any transaction involving the Securities, including but not limited to holding or disposal of the Securities, pursuant to the Act No. 586/1992 Coll., on Income Tax, as amended (the "**Czech ITA**").

Provided that the relevant Issuer of the Securities is not a tax resident of the Czech Republic for Czech tax purposes, does not have a permanent establishment in the territory of the Czech Republic, and/or has not employed its employees in the Czech Republic for more than 183 days (except in cases where services are provided) - i.e., the Issuer of the Securities is not considered as so called tax remitter pursuant Czech ITA, no withholding tax obligation arises in connection with the Securities pursuant to the Czech ITA.

However, income derived from any transaction involving the Securities, including but not limited to holding or disposal of the Securities, may have tax implications for prospective purchasers, who are Czech tax residents, or who have their permanent establishment in the territory of the Czech Republic. Should any of the assumptions listed in the previous paragraph cease to be true and accurate, tax implications may also arise.

This summary is not intended to constitute any tax or legal advice, it does not define the exact tax implications and it does not consider any specific double taxation treaty. Prospective purchasers of any Securities should consult their own tax advisers in the Czech Republic in respect of any transaction involving the Securities, including but not limited to holding or disposal of the Securities.

Dutch Taxation

For the purposes of the Netherlands tax consequences as described herein, it is assumed that the relevant Issuer of the Securities is neither a resident nor deemed to be a resident of the Netherlands for Netherlands tax purposes.

Withholding Tax

All payments made by the relevant Issuer under the Securities may be made free of withholding or deduction for any taxes of whatsoever nature imposed, levied, withheld or assessed by the Netherlands or any political subdivision or taxing authority thereof or therein.

Finnish Tax Considerations

The following overview relates only to Finnish withholding tax issues for payments made in respect of the Securities to persons who are generally liable to tax in Finland (i.e. persons that are Finnish residents for tax purposes). The overview does not deal with any other Finnish tax implications of acquiring, holding or disposing of the Securities. Investors are advised to seek professional advice relating to other tax implications in respect of acquiring, holding or disposing of the Securities.

On the basis that the Issuers are not resident in Finland for tax purposes and are not operating through a branch office, permanent establishment or other fixed place of business in Finland in connection with the Securities, there is no Finnish withholding tax (*Fi. lähdevero*) applicable to the payments made by the Issuer in respect of the Securities.

However, Finland operates a system of preliminary taxation (*Fi. ennakonpidätysjärjestelmä*) to secure payment of taxes in certain circumstances. In the context of the Securities, a tax of 30 per cent. will be deducted and withheld from all payments (including redemption proceeds/premium) that are treated as interest or as compensation comparable to interest, when such payments are made by a Finnish Paying Agent (account operator) to individuals. Any preliminary tax (*Fi. ennakonpidätys*) will be used for the payment of the individual's final taxes (which means that they are credited against the individual's final tax liability).

If, however, the Securities are regarded as warrants or certificates for Finnish tax purposes (and assuming that these warrants or certificates are listed on a regulated market or would otherwise qualify for listing),

any profits on warrants or certificates would, based on current Finnish court practice, be considered a capital gain (as opposed to interest or compensation comparable to interest). Therefore, any payments made in respect of Securities that are regarded as warrants or certificates may be made without deduction or withholding for or on account of Finnish tax and should, accordingly, not be subject to any preliminary taxation (*Fi. ennakonpidätys*) by a Finnish Paying Agent (account operator).

French Tax Considerations

The following is a general description of certain French interest withholding tax considerations which may be relevant to holders of Securities who are individuals resident in France for tax purposes. It does not purport to be a complete analysis of all tax considerations relating to the Securities, whether in France or elsewhere. In particular, it does not discuss any other French tax such as French corporate or individual income tax (as applicable), French registration duties or French tax on financial transactions.

On the basis that the Issuers are not resident in France for tax purposes and are not operating through a branch office, permanent establishment or other fixed place of business in France in connection with the Securities, payments of interest (and principal) by the Issuers under the Securities may be made free from the French interest withholding tax provided by Article 125 A, III of the French Code *général des impôts*.

However, pursuant to Article 125 A, I of the French Code *général des impôts*, where the paying agent ("*établissement payeur*") is located in France, subject to certain exceptions, payments of interest and assimilated income to individuals resident in France for tax purposes are subject to a 12.8 per cent. levy withheld at source, which is deductible from their personal income tax liability in respect of the year in which the payment has been made. Social contributions (i.e., CSG, CRDS and other related contributions) are also levied at source at an aggregate rate of 17.2 per cent. on interest and assimilated income paid to French tax resident individuals.

Holders of Securities who are French tax resident individuals are urged to consult with their usual French tax advisor on the way the 12.8 per cent. levy and the 17.2 per cent. social contributions are collected, where the paying agent is not located in France.

Greece Tax Considerations

The following is a brief overview of Greek tax aspects in connection with the Securities. The below overview does not fully describe all tax consequences of the acquisition, ownership, disposition or redemption of the Securities. This overview only discusses the tax laws of Greece as in force on the date of this Base Prospectus and as interpreted by the relevant guidance provided by the Greek Tax Administration available until that date. As different types of Securities may be issued under the Programme, the tax treatment of such Securities can be different due to their specific terms. This overview does not take into account the investors' individual circumstances, thus based on the individual circumstances a different tax regime may apply. Prospective investors should consult their own professional advisors to obtain further information about the tax consequences of the acquisition, ownership, disposition, redemption, exercise or settlement of any of the Securities.

Income tax considerations

a) Individuals

Interest payments to individuals who are tax residents in Greece are subject to Personal Income Tax at a flat rate of 15%, and to Special Solidarity Contribution at progressive rates of up to 10%. If such interest payment is made through a Greek credit institution or other similar paying agent, it will be subject to withholding tax at a 15% rate. Such withholding tax exhausts the Personal Income Tax liability of the respective individual recipients of such interest income. In case no withholding is made for any reason whatsoever, then the amount of the interest paid should be included in the individual's taxable capital income.

Capital gains arising from the disposal or redemption of Securities are subject to Personal Income Tax at a flat rate of 15%, and to Special Solidarity Contribution at progressive rates of up to 10%. In principle, the capital gains are the difference between the proceeds from the disposal/redemption of the Securities and the acquisition/nominal value of the Securities, although special rules may apply depending on the exact nature of the Securities. However, the capital gains from the disposal of securities that are

characterized as corporate bonds/notes and are issued by legal persons or entities incorporated in an EU/EEA member-state, are exempt from Personal Income Tax and are subject only to Special Solidarity Contribution at progressive rates of up to 10%. Any capital losses are carried-forward for 5 years.

The return of capital to the holders of the Securities is not subject to Personal Income Tax or to Special Solidarity Contribution.

b) Legal persons and legal entities

The proceeds of the holders of the Securities (e.g. interest payments, capital gains) who are tax resident in Greece or hold such Securities through a Greek permanent establishment to which such Securities are attributable, are subject to Corporate Income Tax at a flat 22% rate. If an interest payment is made to a legal person or entity tax resident in Greece and such interest is remitted to Greece through a Greek credit institution or other similar paying agent, it will be subject to withholding tax at a 15% rate, which is credited against the final Corporate Income Tax liability of such legal person or entity.

Inheritance and Donations Tax

If the Securities are included in the estate of a deceased individual who was resident in Greece or was a Greek national (and was not residing outside of Greece for more than ten years before his/her demise), then such inheritance will be subject to Greek inheritance tax, taxable at the level of each heir/beneficiary. Greek inheritance tax is imposed at progressive rates of up to 10%, 20% or 40%, depending on the family relationship between the deceased and the heir/beneficiary.

The donation of the Securities will be subject to Greek donation tax if the donor is a Greek national or if the donee/beneficiary is a Greek national or Greek resident. Greek donation tax is imposed at progressive rates of up to 10%, 20% or 40%, depending on the family relationship between the donor and the donee. It is noted that a tax free bracket of EUR 800.000,00 applies in case of Securities' donation between family members of a specific category. If the value of the Securities exceeds the tax free bracket of EUR 800.000, then the excess amount shall be subject to Greek gift tax at a flat rate of 10%.

Other Taxes

There are no transfer taxes, registration taxes or similar taxes, as well as stamp duties, payable in Greece as a consequence of the issuance, acquisition, ownership, disposition, redemption, exercise or settlement of the Securities.

International Exchange of Information

By virtue of Directive 2014/107/EU, which amended Directive 2011/16/EU ("**Mutual Assistance Directive**") as regards mandatory automatic exchange of information in the field of taxation (the "**Directive**"), Greece implemented the renewed rules on the EU network of exchanging tax information, which includes the removal of the legislation due to the repeal of the EU Savings Directive (Directive 2003/48/EC) and the implementation of new legislation in line with the new Directive.

The aforementioned Directives implemented in Greece by L. 4170/2013, as amended by L. 4378/2016 and in force. Based on the new rules the tax authority collects a broad range of data of the owners of financial accounts from financial institutions including identification data of the financial account, identification data of the account owner, the name of the country or countries of which the owner is a resident, and the balance of the account.

The tax authority is entitled to request data from the central registration of beneficial ownership information and to have access to the data and documents in respect of the beneficial owner in order to control if the financial institutions met their obligation of due diligence and data providing, and to provide information to other member state upon request.

Hungarian Tax Considerations

The following is a brief overview of Hungarian tax aspects in connection with the Securities. The below overview does not fully describe all tax consequences of the acquisition, ownership, disposition or redemption of the Securities. This overview only discusses the tax laws of Hungary as in force on June 15, 2022 and based on the individual circumstances a different tax regime may apply. As different types

of Securities may be issued under the Programme, the tax treatment of such Securities can be different due to their specific terms. This overview does not take into account the investors' individual circumstances.

Prospective investors are advised to consult their own professional advisors to obtain further information about the tax consequences of the acquisition, ownership, disposition, redemption, exercise or settlement of any of the Securities.

It cannot be excluded that Hungarian tax authorities or courts or the Hungarian Payers (as defined below) adopt a view different from that outlined below.

Income Taxation of Private individuals

Withholding (Income) Tax

Unless otherwise provided for in the applicable convention on the avoidance of double taxation between Hungary and another State where the private individual has its tax residency, the income of a private individual is subject to Hungarian personal income tax (currently 15 per cent), which is generally withheld in the form of withholding tax. A private individual is subject to withholding taxation of certain capital incomes if such capital income is paid to the private individual taxpayer by a legal person, other organisation, or private entrepreneur resident in Hungary that (who) provides taxable income, irrespective of whether such payment is made directly or through an intermediary (post office, credit institution) (a "**Hungarian Payer**"). The general rate of the withheld income tax is 15 per cent.

- In respect of interest, Hungarian Payer shall mean the person who pays any interest income to any natural person according to the Personal Income Tax Act, the borrower of a loan or the issuer of a bond.
- In respect of dividends, Hungarian Payer shall mean the taxpayer from whose assets such dividends are paid.
- In respect of revenues originating from a transaction concluded with the involvement of a licensed stockbroker, Hungarian Payer shall mean such stockbroker (consignee).
- In respect of income that is earned in a foreign country and taxable in Hungary, Hungarian Payer shall mean the person (legal person, other organisation, or private entrepreneur) commissioned in Hungary, with the exception of transaction orders given to a credit institution solely for the performance of a transfer (payment).
- In respect of any taxable payment made by a non-resident company through its branch or commercial representation, such branch or commercial representation shall be considered a Hungarian Payer.

As long as the relevant Issuer is not a Hungarian Payer, the Issuer is not liable for the withholding of taxes and the recipient of the income has to pay and declare taxes fully on his/her own.

The income tax also applies if the private individual is not a Hungarian tax resident, i.e. is generally not subject to Hungarian income tax but the income is deemed to originate from Hungary.

The income tax most notably applies to the following kinds of income, each defined or detailed further in Act CXVII of 1995 on Personal Income Tax (the "**Personal Income Tax Act**");

- (a) interest income;
- (b) income from securities lending;
- (c) dividend income;
- (d) capital gains income;
- (e) controlled capital market transactions; and

- (f) transactions with crypto assets.

However, whether an income tax is actually applicable to a certain income, the exact details of the security, the income payment and the tax subject (holder of the security) shall be examined. Incomes which do not fit into the definitions of these incomes belong to the general tax base of private individuals, which is taxed at the same level of personal income tax, but is generally subject to higher social contribution and social contribution tax burden.

Interest Income

"Interest income" shall mean the following (narrowed for the purposes of this Base Prospectus):

- (a) in case of the balance of any deposit account (savings deposit account), or payment account, the part of the interest credited and/or capitalised based on a contract (including standard service agreements and interest conditions) made between the private individual and a payment service provider that is not in excess of the fair market value;
- (b) in connection with debt securities and collective investments in transferable securities, which are offered and traded publicly:
 - (i) the income paid to the private individual under the title of interest and/or yield, due to the fact that the Securities are held at a specific time prescribed as a precondition for entitlement to interest and/or yield,
 - (ii) the gains achieved when called, redeemed, or transferred, not including the transfer of collective investments in transferable securities in an exchange market, or in a market of another EEA member state or in a member state of the Organization for Economic Cooperation and Development (OECD) from the income payable to the private individual – irrespective of the net current value, accumulated interest or yield it represents – to the extent established according to the provisions on capital gains; and
- (c) by way of derogation from paragraphs (a)-(b) directly above, if the interest income established according to paragraphs (a)-(b) represents any asset (e.g. securities) from which the tax cannot be deducted, the taxable amount shall be calculated by multiplying the fair market value of the asset by 1.18.

The legal title of tax liability in connection with any interest income not mentioned in paragraphs (a)-(c) above and Section 65 (1) of the Personal Income Tax Act or that is obtained by way of derogation from the conditions defined therein shall be determined in consideration of the contract between the parties affected (meaning the natural person and the person paying the interest income, or between these persons and a third party), and the relating tax liabilities of the payer or the private individual shall be satisfied accordingly (including, in particular, the assessment, payment and declaration of income, tax amount, tax advance, and the related disclosures).

As a main rule, the tax authority will prepare a tax return for individuals if interest income is received. However, if there is no Hungarian Payer, the tax authority does not gain knowledge of the interest income, and the private individual shall establish the private income tax after the interest income in its own tax return and pay it. The rate of the tax is 15 per cent.

In case of qualifying long-term investments ("*tartós befektetés*"), interest income shall be free of tax if the private individual does not interrupt the deposit period of five years.

Securities Lending Fee

The entire fee of securities lending acquired by the private individual shall qualify as taxable income. The Hungarian Payer shall establish, deduct and pay the tax, the amount of which is 15 per cent.

Profit Realised on Swaps

Profit realised on swaps shall mean the part of the proceeds received by a private individual in a tax year in connection with interest-rate, currency and equity swaps (swap receipts) that is in excess of the expenses (swap expenses) the private individual has incurred and verified as directly related to the

transaction in question. Any sum of swap expenses that is in excess of swap receipts shall be treated as a loss realised on swaps.

Profits and/or losses realised on swaps

- (a) shall be determined by the Hungarian Payer at the end of the tax year separately for each transaction, and they shall supply a certificate to the private individual affected by 31 January of the year following the tax year broken down according to transactions, and shall disclose such information to the National Tax and Customs Authority in accordance with the Act on the Rules of Taxation;
- (b) shall be recorded by the private individual in the absence of a Hungarian Payer.

The legal title of the income and the amount of tax liability shall be determined in consideration of the contract between the parties affected (meaning the private individual to whom the income was paid and the other party to the transaction, or between these persons and a third party) and the circumstances under which the income was obtained if it is established that the private individual arranged the transaction in a way to make a profit without any real risk, by setting conditions in derogation from the market price, exchange rates, interest rates, fees and other factors.

In connection with the profit realised on swaps, the Hungarian Payer is not subject to the obligation of tax deduction. The private individual affected shall assess the profit realised on swaps and the tax payable on such income following the end of the tax year separately for each transaction, and shall declare them in his/her tax return filed for the tax year, and shall pay the tax by the deadline prescribed for filing tax returns.

If a swap is carried over to the next tax year, and if the private individual realises any loss on this swap that covers such carried over period (as well), and indicates this loss separately for each transaction in his tax return filed for the tax year when the loss was realised, the private individual shall be entitled to tax compensation that may be claimed as tax paid in the tax return.

Tax compensation shall be established separately for each transaction on an annual basis, cumulatively (carried over) under the duration of the transaction, supported by regularly updated bookkeeping records (see Section 65/B of the Personal Income Tax Act).

Dividend Income

All revenues of private individuals received as dividends or dividend advance shall be considered income. For the purposes of this Base Prospectus:

- (a) dividend shall mean dividend as defined by Hungarian accounting rules and also (among others):
 - (i) interest on interest-bearing shares,
 - (ii) income specified as dividends by the laws of other countries,
 - (iii) return on investment units issued by an alternative investment fund,
 - (iv) the payment made by the trustee to the private individual beneficiary or settlor from the yields of the trust assets, based on a Hungarian trust deed; (unless the beneficiary obtained such status as consideration for or related to an activity, transfer of assets or provision of services), it shall be assumed that yields are acquired before capital from the trust assets, if yield and capital cannot be separately identified, the entire amount obtained by the private individual shall be regarded as dividend;
 - (v) payment as a share from its profits by a small taxpayer company to its shareholder not notified as a small taxpayer;
- (b) dividend advance shall mean any prepayments of dividends made on the dividend estimated for the tax year.

The tax on dividends (dividend advances) shall be assessed by the Hungarian Payer:

- (a) including resident credit institutions and investment service providers, in connection with any payment (credit) of dividend (dividend advance) earned abroad to a private individual through the securities account (securities escrow account) it maintains on behalf of that private individual;
- (b) in due consideration of the rules on inability to deduct withholding tax and of the special rules of taxation applicable to the income of foreign nationals laid down in Act on Personal Income Tax;

at the time of payment, and shall be declared and paid.

As a main rule, the tax authority will prepare a tax return for individuals even if dividend income is received. In the case of dividend income, if there is no Hungarian Payer involved, the tax in connection with the dividend will not be included in the tax return by the tax authority. The private individual will therefore be required to supplement the tax return prepared by the tax authority with this income, and pay it before the deadline prescribed for filing.

The amount of dividend advance and the tax withheld from it shall be indicated for information purposes in the tax return filed for the year when the payment was made. The amount of approved dividend, as well as the tax deducted from it, shall be declared in the tax return filed for the year when the resolution establishing the dividend was approved, and shall show the tax deducted and paid from the dividend advance as tax deducted.

Capital Gains Income

"Income from capital gains realised" shall mean the proceeds received upon the transfer of securities (not including lending arrangements), less the purchase price of the securities and any incidental costs associated with the acquisition of the securities. Any portion of the said profit that is to be treated as part of some other type of income shall not be considered as a capital gain.

The Hungarian Payer shall assess the amount of income realised from the revenues, the tax and tax advance corresponding to the legal title of the income relying on the data and information at its disposal on the day of payment or that can be obtained, or as verified by the private individual relating to acquisition costs and the incremental costs, and shall declare and pay it in accordance with the Act on the Rules of Taxation and the Personal Income Tax Act. As a main rule, the tax authority will prepare a tax return for individuals if they realize capital gains income. However, if there is no Hungarian Payer, the tax authority does not gain knowledge of the dividend income, and the private individual will be required to at least supplement the tax return prepared by the tax authority, and pay the so calculated tax before the deadline prescribed for filing. Private individuals shall include in their tax returns, in the total of their income from capital gains realised during the tax year, or by way of self-assessment of their tax returns, that part of the purchase price of securities and the incremental costs associated with the securities that the payer did not take into account when determining income.

Controlled Capital Market Transactions

In case of income from controlled capital market transactions, no tax is withheld, however, if the Hungarian Payer of such income is an investment service provider, it shall report certain income information to the Hungarian tax authority. The tax rate on the income is 15%.

Income from controlled capital market transactions means the profit realised on controlled capital market transaction(s) the private individual has made during the tax year (not including interest income, or if income from long-term investments has to be established based on the transaction), and received in money from all such transactions (total profit realised on transactions) that is in excess of the total losses the investment service provider has charged to the private individual in connection with a given transaction or transactions, and paid during the tax year (total loss realised on transactions). Losses on controlled capital market transactions shall include the sum of total loss realised on transactions that is in excess of the total profit realised on transactions.

Controlled capital market transaction shall mean any transaction concluded with an investment service provider, or with the help of an investment service provider – other than swaps – involving financial

instruments (other than privately placed securities) or commodities, as well as spot transactions concluded within the framework of financial services, or within the framework of investment services and ancillary investment services involving foreign exchange or currency, where such deals are concluded by financial settlement and, in either case, if they satisfy the provisions of the said acts pertaining to transactions, except for the transactions where a price – other than the fair market value – is used as specified by the investment service providers customer and/or the parties he/she represents (a private individual, and/or any person closely linked to one another by their common interests, directly or otherwise), and

- (a) if executed within the framework of activities supervised by the Hungarian National Bank (HNB),
- (b) that is concluded with an investment service provider, or with the help of an investment service provider, operating in the money markets of any EEA member state, or any other state with which Hungary has an agreement on double taxation, and
 - (i) if executed within the framework of activities supervised by the competent authorities of that state, and
 - (ii) if the given state is not an EEA member state, there are facilities in place to ensure the exchange of information between the competent authorities mentioned above and the HNB, and
 - (iii) for which the private individual has a certificate made out by the investment service provider to his name, containing all data and information for each and every transaction concluded during the tax year for the assessment of his/her tax liability.

In case the income originates from investment service providers who qualify as a payer the payer issues a detailed certificate of execution on the cleared transactions of the given tax year. The private individual may use this certificate to declare this income in his/her tax return filed for the tax year, and shall pay that tax by the deadline prescribed for filing tax returns. The private individual may also declare his income on the basis of his/her own records (instead of the certificate).

In case the income originates from investment service providers who do not qualify as a payer, the private individual affected shall assess – in accordance with the provisions on capital gains as well – the profit realised on such controlled capital market transaction(s) and the tax payable on such income relying on the documents (any invoice or certificate) issued by the investment service provider, or on his/her own records, and shall declare them in his/her tax return filed for the tax year, and shall pay the tax by the deadline prescribed for filing tax returns.

If the private individual realised any loss in connection with a controlled capital market transaction during the tax year and/or during the year preceding the current tax year, and/or in the two years preceding the current tax year, and if this loss is indicated in his tax return filed for the year when the loss was realised, the private individual shall be entitled to tax compensation that may be claimed as tax paid in the tax return.

Transactions with crypto assets

In case of income from transactions with crypto assets, specific rules apply but no tax is withheld. The private individual affected shall calculate the profit realized on such transaction(s) and the tax payable, and shall declare them in his/her tax return filed for the tax year, and shall pay the tax by the deadline prescribed for filing tax returns. A ‘transaction with crypto assets’ shall mean transactions where the private individual acquires valuable consideration not in the form of crypto assets, through the transfer, assignment of crypto assets (including the exercise of rights granted by the crypto asset), in a transaction which is available, concludable for anyone. Crypto asset shall mean the digital representation of value or rights which can be electronically transferred and stored by using the distributed ledger technology or other similar technology.

Exceptions

A withholding tax obligation may also be created or cease due to a convention on (the avoidance of) double taxation, between Hungary and another State. The tax obligation may cease if the Securities are held as long-term investment and further requirements are met.

Valuable Consideration Obtained in the Form of Securities

In connection with any valuable consideration obtained by a private individual in the form of securities, income shall mean the fair market value of the security prevailing at the time of acquisition of the security, less the verified cost (value) of the security and any incremental costs associated with it. The type of tax liability attached to this income shall be determined on the basis of the relationship between the parties concerned (the private individual and the person from whom the security originates, and the said persons and a third party) and the circumstances under which the income was obtained, and the ensuing tax liabilities prescribed upon the payer or the private individual in question (including, in particular, the assessment, payment and declaration of income, tax amount, tax advance, and the related disclosures) shall be satisfied accordingly.

Among other cases, the valuable consideration obtained by a private individual in the form of securities shall not be treated as income if the private individual:

- (a) obtained the security in question through exercising a right that was obtained in a transaction offering equal conditions to all parties concerned;
- (b) has obtained the shares from another private individual by means of a contract with mutual consideration, provided that the amount (value) of consideration reaches the nominal value of shares, or, where there is no nominal value, their accountable par from the issuers subscribed capital; without prejudice to the applicability of other provisions on tax exemptions.

The tax rate is 15 per cent.

Valuable Consideration Obtained by Way of Rights in Securities

If income is not realised from profits made by means of controlled capital market transactions, the following rules shall apply:

As regards the valuable consideration obtained through the transfer (assignment), termination, endorsement of the purchase, subscription, sale or other similar right in securities (exclusive of rights attached to other securities) or through the waiver of such right, from the proceeds received by the private individual the margin above the costs charged, as verified, to the private individual in connection with the acquisition of the right and the incremental costs associated with the transaction (in connection with a gratuitous or complimentary right, including any income that is deemed taxable at the time the right is acquired). The amount of income shall be assessed as on the day when received.

In connection with securities obtained by way of a purchase, subscription or other similar right in securities, the private individual obtaining them shall be subject to the provisions pertaining to valuable considerations obtained in the form of securities. In this case the date of the acquisition of income shall be determined as the date of the acquisition of the right of control over the security or the date when the private individual (or any other person acting on his/her behalf) takes possession of the security in question (including, in particular, when the security is credited to the securities account), whichever occurs earlier.

As regards the valuable consideration obtained through the exercise of a sale option or other similar right in securities, that part of the income defined on the basis of the obtained valuable consideration that is greater than the fair market value of the security that is effective on the day of transfer (income component for the exercise of the right in question), less the costs charged, as verified, to the private individual (in connection with a gratuitous or complimentary right, including any income that is deemed taxable at the time the right is acquired) shall be treated as income, with the exception that:

- (a) the amount of income from the remaining part of the proceeds received in connection with the transfer of the security shall be determined in compliance with the provisions on capital gains, with due consideration of what is contained in paragraph (b);

- (b) where paragraph (a) applies, the part of the costs charged to the private individual in connection with the acquisition of the right may be deducted from the proceeds mentioned therein under the title of transfer costs, that is in excess of the proceeds from the exercise of the option. The amount of income shall be assessed as on the day of transfer of the security in question.

The tax rate is 15 per cent.

Social contribution tax

According to the Act LII of 2018 on Social Contribution Tax, social contribution tax is payable in the amount of 13 per cent until the aggregate amount of a natural person's certain incomes reaches twenty-four times the mandatory minimum wage, the minimum wage being 200,000 Hungarian Forints in 2022.

Social contribution tax must be paid in respect of:

- (a) income from securities lending,
- (b) dividend income,
- (c) capital gains income, and
- (d) the securities lending fee.

However, social contribution tax is not required to be paid in respect of:

- (a) interest income,
- (b) profit realised on swaps,
- (c) controlled capital market transactions, and
- (d) transactions with crypto assets.

No social contribution tax is payable in respect of dividend income incurred in connection with a security listed on a stock exchange operating in any Member State of the European Economic Area and qualifying as a recognised (regulated) market under the Capital Markets Act that is classified as a dividend (dividend advance) under the law of that Member State.

Social contribution tax must be paid in respect of: (a) income from securities lending, (b) dividend income, (c) capital gains income, and (d) the securities lending fee. However, social contribution tax is not required to be paid in respect of: (a) interest income, (b) profit realised on swaps, and (c) controlled capital market transactions.

Corporate Income Tax

Generally, with the exception of special cases, legal entities and Hungarian ring-fenced trust assets are not subject to any corporate income tax withholding in connection with capital gains (interest, dividend and return on security sales revenues) on the basis of Act LXXXI of 1996 on Corporate Income Tax.

The corporate income tax rate is 9 per cent. of the positive tax base.

Hungarian implementation of Directive 2014/107/EU on Administrative Cooperation

Based on Directive 2014/107/EU amending Directive 2011/16/EU as regards mandatory automatic exchange of information in the field of taxation (the "**Directive**"), Hungary implemented the renewed rules on the EU network of exchanging tax information, which includes the removal of the legislation due to the repeal of the EU Savings Directive and the implementation of new legislation in line with the new Directive.

The main implementation of the Directive under Hungarian law is Act XXXVII of 2013. Based on the new rules the tax authority collects a broad range of data of the owners of financial accounts from financial institutions including identification data of the financial account, identification data of the account owner, the name of the country or countries of which the owner is a resident, and the balance of the account.

The tax authority is entitled to request data from the central registration of beneficial ownership information and to have access to the data and documents in respect of the beneficial owner in order to

control if the financial institutions met their obligation of due diligence and data providing, and to provide information to other member state on request.

The Directive provides for the exchange of information in three forms – spontaneous, automatic and on request. In the framework of the automatic exchange of information Hungary automatically provides data relating to the financial account and its owner to the other member state or third country where the owner is a resident.

This form of exchange is usually in electronic form and usually on a mutually agreed periodic basis. Information exchange on request is a response by one country to a request by another country for information.

Inheritance duty

If a private investor deceases, the inheritance may be subject to inheritance duty (öröklési illeték). Inheritance duty is applicable to the assets within Hungary; as well as the moveable assets inherited by a Hungarian citizen/resident/legal person if such assets are not subject to inheritance in the country of their location. The inheritance duty is levied on the heir.

The base for such inheritance duty is the clear value of the acquired assets (i.e. after the deduction of liabilities). The general duty rate is 18 per cent.

Inheritance of the deceased investor's lineal relatives (parents, grandparents, children, grandchildren etc., including where relationship is based on adoption), siblings and surviving spouse is free of inheritance duty.

Gift duty

The free transfer of the Securities is subject to gift duty payable by the receiving party. The base for the duty is the value of the gift. The general duty rate is 18 per cent.

The following (among others) are not subject to gift duty:

- (a) gift in the value not exceeding HUF 150,000 in market value if no document was made;
- (b) gift acquired by the donor's lineal relatives (parents, grandparents, children, grandchildren etc., including where relationship is based on adoption), siblings and spouse;
- (c) the transfer of assets to a trustee notified as such to the tax authority, under a trust deed established pursuant to the Civil Code, unless the trustee acquires it as a beneficiary;
- (d) the acquisition of the trust assets and its yield by the settlor (even as a beneficiary).

Financial transaction duty

Hungarian payment service providers and service providers carrying out cross-border payment, credit and loan, currency exchange services in Hungary are obliged to pay financial transaction duty for each crediting of money on Hungarian bank accounts. The general rate of the duty is 0.3 per cent. of the transferred amount of up to HUF 10,000 per transaction. Crediting of the proceeds of the Securities to Hungarian bank accounts may be subject to additional banking fees if the payment service providers charge such duty to the clients directly.

The crediting of securities with Hungarian ISIN identification number only on clients' securities accounts by investment firms and credit institutions is also subject to financial transaction duty with the same rate (0.3 per cent up to HUF 10,000 per transaction).

The subject of the financial transaction duty is the payment service providers, investment firms and credit institutions, but it cannot be excluded that the duty is passed on to clients in the form of banking / account management fees.

Irish Tax Considerations

The following comments are of a general nature, relating only to the position of persons who are the absolute beneficial owners of the Securities. The following is a general overview only of the Irish withholding tax treatment on the date of this Base Prospectus in relation to income payments in respect of the Securities. This overview is based on Irish law and what is understood to be the practice of the Irish Revenue Commissioners, in each case as in effect on the date of this Base Prospectus, which are subject to prospective or retroactive change. The comments are not exhaustive and do not deal with any other Irish tax aspects of acquiring, holding, disposing of, abandoning, exercising or dealing in the Securities. Prospective investors in the Securities should consult their own advisers as to the Irish tax consequences of acquiring, holding, disposing of, abandoning, exercising or dealing in the Securities.

Irish withholding tax on interest payments

Irish interest withholding tax should not apply to interest payments which have their source outside Ireland. On the basis that the relevant issuer is not resident in Ireland and has no presence in Ireland, that no interest payments will be made from Ireland, that no Irish situate assets will be secured and that the Securities will not be deposited with an Irish depository, interest payments on the Securities should not have an Irish source and, thus, no Irish interest withholding tax should arise.

Irish withholding tax on annual payments

Irish withholding tax can also apply to payments, other than interest payments, which are annual payments for Irish tax purposes. However, Irish withholding tax should not apply to annual payments which have their source outside Ireland. On the basis that the relevant issuer is not resident in Ireland and has no presence in Ireland, that no payments will be made from Ireland, that no Irish situate assets will be secured, and that the Securities will not be deposited with an Irish depository, any annual payments on the Securities should not have an Irish source and, thus, no Irish withholding tax should arise on such payments.

Irish encashment tax

Irish encashment tax may be required to be withheld at the rate of 25 from any interest payments or annual payments paid in respect of the Securities where such payments are paid or collected by a person in Ireland on behalf of any holder of the Securities. Holders of the Securities should therefore note that the appointment of an Irish collection agent or an Irish paying agent could result in the deduction of 25 per cent. encashment tax by such agent from interest payments or annual payments on the Securities. A holder of the Securities that is not resident in Ireland for tax purposes may claim an exemption from this form of withholding tax by submitting an appropriate declaration of non-Irish tax residency to the Irish agent. An exemption also applies where the payment is made to a company that is beneficially entitled to the income and is within the charge to Irish corporation tax in respect of the income.

Italian Tax Considerations

The following is a general overview of current Italian law and practice relating to certain Italian tax considerations concerning the purchase, ownership and disposal of the Securities by Italian and non-Italian resident investors and does not in any way constitute, nor should it be relied upon as being, a tax advice or a tax opinion covering any or all of the relevant tax considerations surrounding or connected to the purchase, ownership or disposal of the Securities by Italian or non-Italian resident investors. It does not purport to be a complete analysis of all tax considerations that may be relevant to a decision to purchase, own or dispose of the Securities and does not purport to deal with the tax consequences applicable to all categories of prospective beneficial owners of Securities, some of which may be subject to special rules. This overview is based upon Italian tax laws and published practice in effect as at the date of this Base Prospectus which may be subject to change, potentially with retroactive effect.

Prospective purchasers should be aware that tax treatment depends on the individual circumstances of each client: as a consequence they should consult their tax advisers as to the consequences under Italian tax law and under the tax laws of the country in which they are resident for tax purposes and of any other potentially relevant jurisdiction of acquiring, holding and disposing of Securities and receiving payments of interest, principal and/or other amounts under the Securities, including in particular the effect of any state, regional or local tax laws.

Italian tax treatment of the Securities (Warrants, Certificates and Notes)

The Securities may be subject to different tax regimes depending on whether:

- (a) they represent a debt instrument implying a use of capital (*impiego di capitale*), through which the investors transfer to the Issuer a certain amount of capital, for the economic exploitation of the same, subject to the right to obtain a (partial or entire) reimbursement of such amount at maturity; or
- (b) they represent derivative financial instruments or bundles of derivative financial instruments, through which the investors purchase indirectly underlying financial instruments.

1. Securities representing debt instruments implying a "use of capital"

Securities having 100 per cent. capital reimbursement

Italian resident investors

Legislative Decree No. 239 of 1 April 1996, as subsequently amended, (the "**Decree No. 239**") provides for the applicable regime with respect to the tax treatment of interest, premium and other income (including the difference between the redemption amount and the issue price) from Securities falling within the category of bonds (*obbligazioni*) or debentures similar to bonds (*titoli similari alle obbligazioni*) issued, *inter alia*, by non-Italian resident Issuers.

For these purposes, debentures similar to bonds are defined as bonds that incorporate an unconditional obligation to pay, at maturity, an amount not less than their nominal value (whether or not providing for interim payments) and that do not give any right to directly or indirectly participate in the management of the relevant Issuer or of the business in relation to which they are issued nor any type of control on the management.

Where an Italian resident Investor is:

- (a) an individual not engaged in a commercial activity (*esercizio di attività commerciali*) to which the Securities are connected (unless he has opted for the application of the *risparmio gestito regime* – see "Capital Gains Tax" below);
- (b) a non-commercial partnership pursuant to Article 5 of the Presidential Decree No. 917 of 22 December 1986 ("**TUIR**") (with the exception of general partnerships, limited partnerships and similar entities);
- (c) a public or private entity (other than a company) or a trust not carrying out a commercial activity; or
- (d) an investor exempt from Italian corporate income taxation;

interest (including the difference between the redemption amount and the issue price), premium and other income relating to the Securities, accrued during the relevant holding period, are subject to a withholding tax equal to 26 per cent. referred to as *imposta sostitutiva*. In the event that the investors described above are engaged in a commercial activity (*esercizio di attività commerciali*) to which the Securities are connected, the *imposta sostitutiva* applies as a provisional tax and may be deducted from the final income tax due by the relevant Investor.

Subject to certain limitations and requirements (including a minimum holding period), Italian resident individuals not acting in connection with an entrepreneurial activity may be exempt from any income taxation, including the *imposta sostitutiva*, on interest, premium and other income relating to the Securities if the Securities are included in a long-term savings account (*piano di risparmio a lungo termine*) that meets the requirements set forth in Article 1, paragraph 100-114 of Law No. 232 of 11 December 2016, ("**Law No. 232**"), as subsequently amended and restated from time to time, and for long-term individual savings accounts established from 1 January 2020, by Article 13-bis of Law Decree No. 124 of 26 October 2019, converted by Law No. 157 of 19 December 2019 ("**Decree No. 124**"), as subsequently amended and restated from time to time.

Where an Italian resident Investor is a company or similar commercial entity pursuant to Article 73 of TUIR or a permanent establishment in Italy - to which the Securities are effectively connected – of a non – Italian resident entity and the Securities are deposited with an authorised intermediary, interest, premium and other income from the Securities will not be subject to *imposta sostitutiva*, but must be included in the relevant Investor's income tax return and are therefore subject to general Italian corporate taxation ("**IRES**", levied at the rate of 24 per cent.) and, in certain circumstances, depending on the "status" of the Investor, also to regional tax on productive activities ("**IRAP**", generally levied at the rate of 3.9 per cent., even though regional surcharges may apply).

Under the current regime provided by Law Decree No. 351 of 25 September 2001 converted into law with amendments by Law No. 410 of 23 November 2001, payments of interest in respect of the Securities made to Italian resident real estate investment funds established pursuant to Article 37 of Legislative Decree No. 58 of 24 February 1998, as amended and supplemented, and Article 14-bis of Law No. 86 of 25 January 1994 are subject neither to *imposta sostitutiva* nor to any other income tax in the hands of a real estate investment fund provided that the Securities, together with the relevant coupons, are timely deposited with an authorised intermediary. A withholding tax may apply in certain circumstances at the rate of 26 per cent. on distributions made by real estate investment funds. The same tax regime applies to payments of interest made to an Italian resident SICAF mainly investing in real estate assets and governed by Legislative Decree No. 44 of 4 March 2014.

If an Investor is resident in Italy and is an open-ended or closed-ended investment fund (the "**Fund**") or a SICAV, and the Securities are deposited with an authorised intermediary, interest, premium and other income accrued during such Investor's holding period will not be subject to *imposta sostitutiva* but must be included in the management result of the Fund or the SICAV. A withholding tax may apply in certain circumstances at the rate of 26 per cent on distributions made by the Fund or the SICAV to certain categories of investors. The same tax regime applies to payments of interest made to an Italian resident SICAF not mainly investing in real estate assets and governed by Legislative Decree No. 44 of 4 March 2014.

Where an Italian resident Investor is a pension fund (subject to the regime provided for by article 17 of the Legislative Decree No. 252 of 5 December 2005, as subsequently amended) and the Securities are deposited with an authorised intermediary, interest (including the difference between the redemption amount and the issue price), premium and other income relating to the Securities and accrued during the holding period will not be subject to *imposta sostitutiva*, but must be included in the result of the relevant portfolio accrued at the end of the tax period, to be subject to the special 20 per cent. substitute tax applicable to Italian pension funds.

Pursuant to Decree No. 239, *imposta sostitutiva* is applied by banks, *società di intermediazione mobiliare* ("**SIMs**"), fiduciary companies, *società di gestione del risparmio*, stockbrokers and other entities identified by a decree of the Ministry of Economics and Finance (each an "**Intermediary**").

For the Intermediary to be entitled to apply the *imposta sostitutiva*, it must

- (a) be resident in Italy; or
- (b) be resident outside Italy, with a permanent establishment in Italy; or
- (c) be an entity or a company not resident in Italy, acting through a system of centralised administration of securities and directly connected with the Department of Revenue of the Italian Ministry of Finance having appointed an Italian representative for the purposes of Decree No. 239; and
- (d) intervene, in any way, in the collection of interest or in the transfer of the Securities. For the purpose of the application of the *imposta sostitutiva*, a transfer of Securities includes any assignment or other act, either with or without consideration, which results in a change of the ownership of the relevant Securities or a transfer of the Securities to another deposit or account held with the same or another Intermediary.

Where the Securities are not deposited with an Intermediary, the *imposta sostitutiva* is applied and withheld by any entity paying interest to an Investor. If interest and other proceeds on the Securities are not collected through an Intermediary or any entity paying interest and as such no *imposta sostitutiva* is

levied, the Italian resident beneficial owners listed above under (a) to (d) (inclusive) will be required to include interest and other proceeds in their yearly income tax return and subject them to a final substitute tax at a rate of 26 per cent. The Italian individual Investor may elect instead to pay ordinary personal income tax ("**IRPEF**") at the applicable progressive rates in respect of the payments; if so, the Investor should generally benefit from a tax credit for withholding taxes applied outside of Italy, if any.

Non-Italian resident investors

No Italian *imposta sostitutiva* is applied on payments to a non-Italian resident Investor of interest or premium relating to the Securities, provided that, if the Securities are held in Italy, the non-Italian resident Investor declares itself to be a non-Italian resident according to Italian tax regulations.

Securities qualifying as Atypical Securities (Securities not having 100 per cent. capital reimbursement)

In the case of Securities representing debt instruments implying a "use of capital" do not guarantee the total reimbursement of the principal, under Italian tax law they should qualify as "atypical securities" (*titoli atipici*) and payments in respect of such Securities received by Italian investors would be subject to the following regime:

- (a) if the Securities are placed (*collocati*) in Italy, payments made to individual investors holding the Securities not in connection with a trade (*esercizio di attività commerciali*) will be subject to a 26 per cent final withholding tax. This withholding tax is levied by the entrusted Italian resident bank or financial intermediary, if any, that is involved in the collection of payments on the Securities, in the repurchase or in the transfer of the Securities;
- (b) if the Securities are not placed (*collocati*) in Italy or in any case where payments on the Securities are not received through an entrusted Italian resident bank or financial intermediary (that is involved in the collection of payments on the Securities, in the repurchase or in the transfer thereof) and no withholding tax is levied, the individual beneficial owners will be required to declare the payments in their income tax return and subject them to a final substitute tax at a rate of 26 per cent. The Italian individual Investor may elect instead to pay ordinary IRPEF at the progressive rates applicable to them in respect of the payments; if so, the Investor should generally benefit from a tax credit for withholding taxes applied outside Italy, if any.

Capital Gains Tax

Any gain obtained from the sale, early redemption or redemption of the Securities would be treated as part of the taxable income (and, in certain circumstances, depending on the "status" of the Investor, also as part of the net value of production for IRAP purposes) if realised by: (i) an Italian resident company; (ii) an Italian resident commercial partnership; (iii) the Italian permanent establishment of foreign entities to which the Securities are effectively connected; or (iv) Italian resident individuals engaged in a commercial activity (*esercizio di attività commerciali*) to which the Securities are connected.

Where an Italian resident Investor is an individual not holding the Securities in connection with an entrepreneurial activity, any capital gain realised by such Investor from the sale, early redemption or redemption of the Securities would be subject to an *imposta sostitutiva*, levied at the current rate of 26 per cent. Under some conditions and limitations, investors may set off losses with gains. This rule applies also to certain other entities holding the Securities. In respect of the application of the *imposta sostitutiva*, taxpayers may opt for one of the three regimes described below.

- (a) Under the tax declaration regime (*regime della dichiarazione*), which is the ordinary regime for taxation of capital gains realised by Italian resident individuals not engaged in a commercial activity (*esercizio di attività commerciali*) to which the Securities are connected, the *imposta sostitutiva* on capital gains will be chargeable, on a yearly cumulative basis, on all capital gains, net of any incurred capital loss, realised by the Italian resident individual. The Investor holding Securities not in connection with a commercial activity (*esercizio di attività commerciali*) must indicate the overall capital gains realised in any tax year, net of any relevant incurred capital loss, in the annual tax return and pay *imposta sostitutiva* on such gains together with any balance of income tax due for such year. Capital losses in excess of capital gains may be carried forward against capital gains realised in any of the four succeeding tax years. Under Law Decree No.

66/2014, available capital losses can be carried forward against capital gains realised as of 1 July 2014 (i) for 48.08 per cent. of their amount, if the losses were realised until 31 December 2011; or (ii) for 76.92 per cent. of their amount, if the losses were realised between 1 January 2012 and 30 June 2014.

- (b) As an alternative to the tax declaration regime, the Italian resident individual Investor holding the Securities not in connection with a commercial activity (*esercizio di attività commerciali*) may elect to pay the *imposta sostitutiva* separately on capital gains realised on each sale, early redemption or redemption of the Securities (the *risparmio amministrato* regime provided for by Article 6 of the Legislative Decree 21 November 1997, No. 461 as a subsequently amended, the "**Decree No. 461**"). Such separate taxation of capital gains is allowed subject to: (1) the Securities being deposited with Italian Banks, SIMs or certain authorised financial intermediaries; and (2) an express valid election for the *risparmio amministrato* regime being punctually made in writing by the relevant Investor. The depository is responsible for accounting for *imposta sostitutiva* in respect of capital gains realised on each sale or redemption of the Securities (as well as in respect of capital gains realised upon the revocation of its mandate), net of any incurred capital loss, and is required to pay the relevant amount to the Italian Tax Authorities on behalf of the taxpayer, deducting a corresponding amount from the proceeds to be credited to the Investor or using funds provided by the Investor for this purpose. Under the *risparmio amministrato* regime, where a sale, early redemption or redemption of the Securities results in a capital loss, such loss may be deducted from capital gains subsequently realised, within the same Securities management, in the same tax year or in the following tax years up to the fourth. Under Law Decree No. 66/2014 available capital losses can be carried forward against capital gains realised as of 1 July 2014 (i) for 48.08 per cent. of their amount, if the losses were realised until 31 December 2011; or (ii) for 76.92 per cent. of their amount, if the losses were realised between 1 January 2012 and 30 June 2014. Under the *risparmio amministrato* regime, the Investor is not required to declare the capital gains in its annual tax return.

- (c) Any capital gains realised or accrued by Italian resident individual investors holding the Securities not in connection with a commercial activity (*esercizio di attività commerciali*) who have entrusted the management of their financial assets, including the Securities, to an authorised intermediary and have validly opted for the so-called *risparmio gestito* regime (the regime provided by Article 7 of Decree No. 461) will be included in the computation of the annual increase in value of the managed assets accrued, even if not realised, at year end, subject to a 26 per cent. *imposta sostitutiva*, to be paid by the managing authorised intermediary. Under the *risparmio gestito* regime, any depreciation of the managed assets accrued at year end may be carried forward against increase in value of the managed assets accrued in any of the four succeeding tax years. Under Law Decree No. 66/2014 depreciation of the managed assets accrued as of 30 June 2014 and not yet compensated can be carried forward against increase in value of the managed assets accrued as of 1 July 2014 (i) for 48.08 per cent. of its amount, if accrued until 31 December 2011; or (ii) for 76.92 per cent. of its amount, if the registered between 1 January 2012 and 30 June 2014. Under the *risparmio gestito* regime, the Investor is not required to declare the capital gains realised in its annual tax return.

Subject to certain limitations and requirements (including a minimum holding period), capital gains in respect of Securities realised upon sale, transfer or redemption by Italian resident individuals holding the Securities not in connection with an entrepreneurial activity may be exempt from taxation, including the 26 per cent. *imposta sostitutiva*, if the Securities are included in a long-term individual savings account (*piano individuale di risparmio a lungo termine*) pursuant Article 1, paragraph 100 – 114, of Law No. 232, as subsequently amended and restated from time to time, and for long-term individual savings accounts established from 1 January 2020, by Article 13-bis of Decree No. 124, as subsequently amended and restated from time to time.

Any capital gains realised by an Investor which is an Italian resident real estate investment fund established pursuant to Article 37 of Legislative Decree No. 58 of 24 February 1998, as amended and supplemented, and Article 14-*bis* of Law No. 86 of 25 January 1994 are subject neither to substitute tax nor to any other income tax in the hands of a real estate investment fund. The same tax regime applies to capital gains realised by an Italian resident SICAF mainly investing in real estate assets and governed by Legislative Decree No. 44 of 4 March 2014.

Any capital gains realised by an Investor which is a Fund or a SICAV will neither be subject to *imposta sostitutiva* nor to any form of taxation in the hands of the Fund or of the SICAV, but any income paid by a Fund or by a SICAV in favour of its participants will be subject to taxation in accordance with the specific rules provided for the different kind of participants. The same tax regime applies to capital gains realised by an Italian resident SICAF not mainly investing in real estate assets and governed by Legislative Decree No. 44 of 4 March 2014.

Any capital gains realised by an Investor which is an Italian pension fund (subject to the regime provided for by Article 17 of the Legislative Decree No. 252 of 5 December 2005, as subsequently amended) will be included in the result of the relevant portfolio accrued at the end of the tax period, to be subject to the 20 per cent. special substitute tax applicable to Italian pension funds.

Non-Italian resident investors

Capital gains realised by non-Italian resident investors from the sale or redemption of the Securities are not subject to Italian taxation, provided that the Securities (1) are transferred on regulated markets, or (2) if not transferred on regulated markets, are held outside Italy.

Moreover, even if the Securities are held in Italy, no *imposta sostitutiva* applies if the non-Italian resident investor is resident for tax purposes in a country which recognises the Italian tax authorities' right to an adequate exchange of information listed in Ministerial Decree of 4 September 1996, as recently amended by Ministerial Decree of 9 August 2016.

The provisions of applicable tax treaties against double taxation entered into by Italy apply if more favourable and provided that all relevant conditions are met.

2. Securities representing derivative financial instruments or bundles of derivative financial instruments

Pursuant to the generally followed interpretation, payments in respect of Securities qualifying as securitised derivative financial instruments received by Italian investors (not engaged in a commercial activity (*esercizio di attività commerciali*) to which the Securities are connected) as well as capital gains realised by such Italian investors on any sale or transfer for consideration of the Securities or redemption thereof are subject to a 26 per cent. capital gain tax, which applies under the tax declaration regime, the *risparmio amministrato* tax regime or the *risparmio gestito* tax regime according to the same rules described above under the section "Capital Gains Tax" above.

Payments in respect of Securities qualifying as securitised derivative financial instruments received by Italian investors which carry out commercial activities are not subject to the 26 per cent. capital gain tax, but the proceeds are included in their taxable income and subject to taxation in accordance with the ordinary rules.

Securities that cannot be qualified as securitised derivative financial instruments may qualify as "atypical securities" (*titoli atipici*), whose tax regime is described under section "Securities representing debt instruments implying a "use of capital" – Securities not having 100 per cent. capital reimbursement" above.

3. Inheritance and gift tax

Transfers of any valuable assets (including the Securities) as a result of death or *inter vivos* gift (or other transfers for no consideration) and the creation of liens on such assets for a specific purpose (*vincoli di destinazione*) are taxed as follows:

- (a) four per cent. if the transfer is made to spouses and direct descendants or ancestors; in this case, the transfer is subject to tax on that part of the value that exceeds EUR 1,000,000 (per beneficiary);
- (b) six per cent. if the transfer is made to brothers and sisters; in this case, the transfer is subject to the tax on that part of the value that exceeds EUR 100,000 (per beneficiary);
- (c) six per cent. if the transfer is made to relatives up to the fourth degree (*parenti fino al quarto grado*), to persons related by direct affinity as well as to persons related by collateral affinity up

to the third degree (*affini in linea retta nonché affini in linea collaterale fino al terzo grado*);
and

- (d) eight per cent. in all other cases.

If the transfer is made in favour of persons with severe disabilities, the tax applies on that part of the value that exceeds EUR 1,500,000.

Moreover, an anti-avoidance rule is provided in the case of a gift of assets, such as the Securities, whose sale for consideration would give rise to capital gains to be subject to the *imposta sostitutiva* provided for by Decree No. 461, as subsequently amended. In particular, if the *donee* sells the Securities for consideration within five years from their receipt as a gift, the latter is required to pay the relevant *imposta sostitutiva* as if the gift had never taken place.

Subject to certain limitations and requirements, transfers of Securities as a result of death (but not as a result of an *inter vivos* gift or other transfers for no consideration) of Italian resident individuals holding the Securities not in connection with an entrepreneurial activity may be exempt from Italian inheritance tax if the Securities are included in a long-term individual savings account (*piano individuale di risparmio a lungo termine*) pursuant Article 1, paragraph 100 – 114, of Law No. 232, as subsequently amended and restated from time to time, and for long-term individual savings account established from 1 January 2020, by Article 13-*bis* of Decree No. 124, as subsequently amended and restated from time to time.

4. Transfer tax and registration tax

Contracts relating to the transfer of securities are subject to registration tax as follows: (i) public deeds and notarised deeds (*atti pubblici e scritture private autentiche*) executed in Italy are subject to fixed registration tax at rate of Euro 200; (ii) private deeds (*scritture private autentiche*) are subject to registration tax at rate of Euro 200 only in case of use or voluntary registration.

5. Stamp duty

Pursuant to Article 13 par. 2/*ter* of the tariff Part I attached to Presidential Decree No. 642 of 26 October 1972, as amended by Article 1 par. 581 of Law No. 147 of 27 December 2013, a proportional stamp duty applies on an annual basis to the periodic reporting communications sent by financial intermediaries to their clients and relating to securities and financial instruments. The stamp duty applies at a rate of 0.20 per cent.; this stamp duty is determined on the basis of the market value or – if no market value is available – the nominal value or redemption amount of the securities held. The stamp duty cannot exceed the amount of Euro 14,000 if the recipient of the periodic reporting communications is an entity (i.e. not an individual).

It may be understood that the stamp duty applies both to Italian resident and non-Italian resident investors, to the extent that the Securities are held with an Italian-based financial intermediary.

The periodic reporting communications are considered to be sent at least once a year, even for instruments for which is not mandatory nor the deposit nor the release or the drafting of the periodic reporting communication. In case of reporting periods of less than 12 months, the stamp duty is payable pro-rata.

Based on the wording of the law and the implementing decree issued by the Italian Ministry of Economy on 24 May 2012, the stamp duty applies to any investor who is a client (as defined in the regulations issued by the Bank of Italy on 20 June 2012) of an entity that exercises in any form a banking, financial or insurance activity within the Italian territory.

6. Wealth tax

Pursuant to Article 19 of Law Decree No. 201 of 6 December 2011, as amended by Article 1 par. 582 of Law No. 147 of 27 December 2013, Italian resident individuals holding the Securities abroad are required to pay a wealth tax (IVAFE) at a rate of 0.20 per cent. for each year. This tax is calculated on the market value of the Securities proportionally to the respective holding period or – if no market value is available – their nominal value or the redemption value.

Taxpayers are entitled to an Italian tax credit equivalent to the amount of any wealth tax paid in the State where the Securities are held (up to an amount equal to the IVAFE due).

The Securities held abroad are excluded from the scope of IVAFE, if such Securities are administered by Italian financial intermediaries pursuant to an administration agreement.

7. Financial Transaction Tax (FTT) depending on the features of the Securities

Pursuant to Law No. 228 of 24 December 2012, a FTT applies to (a) transfer of ownership of shares and other participating securities issued by Italian resident companies or of financial instruments representing the just mentioned shares and/or participating securities (irrespective of whether issued by Italian resident issuers or not) (the "**Relevant Securities**"), (b) transactions on financial derivatives (i) the main underlying assets of which are the Relevant Securities, or (ii) whose value depends mainly on one or more Relevant Securities, as well as to (c) any transaction on certain securities (i) which allow to mainly purchase or sell one or more Relevant Securities or (ii) implying a cash payment determined with main reference to one or more Relevant Securities.

Securities could be included in the scope of application of the FTT if they meet the requirements set out above. On the other hand, Securities falling within the category of bonds (*obbligazioni*) or debentures similar to bonds (*titoli simili alle obbligazioni*) are not included in the scope of the FTT.

The FTT on derivative instruments is levied at a fixed amount that varies depending on the nature of the relevant instrument and the notional value of the transaction, and ranges between Euro 0.01875 and Euro 200 per transaction. The amount of FTT payable is reduced to 1/5 of the standard rate in case the transaction is performed on regulated markets or multilateral trading facilities of certain EU and EEA member states. The FTT on derivatives is due by each of the parties to the transactions. FTT exemptions and exclusions are provided for certain transactions and entities.

The FTT is levied and paid by the subject (generally a financial intermediary) that is involved, in any way, in the execution of the transaction. Intermediaries which are not resident in Italy but are liable to apply the FTT can appoint an Italian tax representative for the purposes of the FTT. If no intermediary is involved in the execution of the transaction, the FTT must be paid by the taxpayers. Investors are advised to consult their own tax advisers also on the possible impact of the FTT.

8. Tax monitoring obligations

Italian resident individuals (and certain other entities) are required to report in their yearly income tax return, according to Law Decree No. 167 of 28 June 1990, converted into law by Law No. 227 of 4 August 1990, for tax monitoring purposes, the amount of Securities held abroad (or beneficially owned abroad under Italian anti-money laundering provisions). This also applies in the case that at the end of the tax year, Securities are no longer held by the above Italian resident individuals and entities.

However, the above reporting obligation is not required in case the financial assets are deposited for management with Italian banks, SIMs, fiduciary companies or other professional intermediaries, indicated in article 1 of Decree No. 167 of 28 June 1990, or if one of such intermediaries intervenes, also as a counterpart, in their transfer, provided that income deriving from such financial assets is collected through the intervention of such an intermediary.

Norwegian Tax Considerations

The following is an overview of certain Norwegian tax consequences for Holders who are resident in Norway for tax purposes. The overview is based on legislation as at the date of this document. The overview is intended to provide general information only and does not deal comprehensively with all tax consequences that may occur for holders of the Notes or the Instruments. The tax treatment of each Holder partly depends on the Holder's specific situation. Special tax consequences that are not described below may apply for certain categories of tax payers, including, mutual funds and persons who are not resident in Norway. It is recommended that prospective applicants for the Notes or Instruments consult their own tax advisers for information with respect to the special tax consequences that may arise as a result of holding the Notes or the Instruments, including the applicability and effect of foreign income tax rules, provisions contained in double taxation treaties and other rules which may be applicable. Any changes to applicable tax laws may have a retrospective effect.

Taxation of the Notes

Classification

The Notes will normally be classified as debt instruments for Norwegian tax purposes, and this is assumed in the following. It is also assumed that the Notes are debentures (Nw: mengdegjeldsbrev). In preparatory works, "mengdegjeldsbrev" is defined as several debt instruments issued at the same time with identical text.

Taxation of return on the Notes prior to disposal

Any kind of return received on the Notes prior to the disposal is taxable as "ordinary income" subject to the flat rate of 22 per cent. For financial service companies subject to the Norwegian financial tax (e.g. banks, insurance companies, investment companies etc.) the tax rate for "ordinary income" is 25 per cent. Return on the Notes is taxed on an accruals basis (i.e. regardless of when the return is actually paid), taxed at the same rate.

Taxation upon disposal or redemption of the Notes

Redemption at the end of the term, as well as prior disposal, is treated as realisation of the Notes and may result in a capital gain or loss. Capital gains will be taxable as "ordinary income", subject to the flat rate of 22 per cent. . Losses will normally be deductible in the noteholder's "ordinary income".

Any capital gain or loss is computed as the difference between the amount received by the Holder on realisation and the cost price of the Notes. The cost price is equal to the price for which the Holder acquired the Notes. Costs incurred in connection with the acquisition and realisation of the Notes may be deducted from the Holder's taxable income in the year of the realisation.

Net wealth taxation

The value of the Notes at the end of each income year will be included in the computation of the Holder's taxable net wealth for municipal and state net wealth tax purposes. Listed Notes are valued at their quoted value on 1 January in the assessment year, while non-listed Notes are valued at their estimated market value on 1 January in the assessment year. The marginal tax rate of net wealth tax is currently 0.95 per cent for net worth above a minimum threshold of NOK 1,700,000, and 1.1 per cent for net worth above a minimum threshold of NOK 20,000,000.

Limited liability companies and certain similar entities are exempt from net wealth taxation.

Transfer taxes, etc. – VAT

There are currently no Norwegian transfer taxes, stamp duty or similar taxes connected to purchase, disposal or redemption of the Notes. Furthermore, there is no VAT on transfer of the Notes.

Taxation of the Instruments

Separate or integrated taxation

Whether the Instruments will be subject to separate taxation on settlement or integrated taxation with the underlying assets depends inter alia on the nature of the underlying object of the Instruments. Financial options, i.e. options on shares, debentures, foreign currency, quoted financial instruments and index options are always taxed separately from the underlying asset. Whether other financial instruments than financial options shall be taxed separately or integrated, must be evaluated in each case. However, financial instruments will as a starting point be subject to separate taxation if the purpose of the instrument is not mainly to arrange for the transfer of the underlying object of the instrument. On this basis the Instruments will most likely be subject to separate taxation in Norway. This is assumed in the following. It is also assumed that for Instruments with shares as the underlying object, Holders will not be deemed to be the direct holders of such shares.

Individuals

Tax liability

Both return received on the Instruments (in the form of payments from the issuer) and capital gains received on realisation (including sale) of the Instruments are as a main rule taxable as ordinary income, subject to a flat rate of 22 per cent. for Norwegian individuals. Losses on realisation of the Instruments are deductible in the ordinary income of the individual, taxed at the same rate.

Calculation of capital gains and losses

Capital gain or loss is computed as the difference between the consideration received on realisation and the cost price of the Instruments. The cost price of the Instruments is equal to the price for which the Holder acquired the Instruments. Costs incurred in connection with the acquisition and realisation of the Instruments may be deducted from the Holder's ordinary income in the year of realisation. In the case of physical settlement of the Instruments, the capital gain will be computed as the difference between the market value of the underlying asset and the cost price of the Instruments (premium) including the exercise price.

Settlement, sale and lapse of Warrants

Capital gains taxation is triggered on settlement or sale of the Warrant. The calculation of capital gains and losses is accounted for above.

If the Warrant should lapse, it is deemed realised, incurring a loss equal to the acquisition cost. A loss is deductible as set out above.

Settlement and sale of Certificates

Settlement at the end of the term as well as prior disposal is treated as realisation of the Certificates and will trigger a capital gain or loss. The calculation of capital gains and losses is accounted for above.

Net wealth taxation

The value of the Instruments at the end of each income year will be included in the computation of the Holder's taxable net wealth for municipal and state net wealth tax purposes. Listed Instruments are valued at their quoted value on 1 January in the assessment year, while non-listed Instruments are valued at their estimated market value. The marginal tax rate is currently 0.95 per cent for net worth above a minimum threshold of NOK 1,700,000, and 1.1 per cent for net worth above a minimum threshold of NOK 20,000,000.

Transfer taxes etc. – VAT

There is currently no Norwegian transfer taxes, stamp duty or similar taxes connected to purchase, disposal or settlement of the Instruments. Holders who are resident in Norway for tax purposes are not subject to withholding taxes in Norway in relation to the Instruments. Furthermore, there is no VAT on transfer of the Instruments.

Legal entities

Both return received on the Instruments in the form of payments from the Issuer and capital gains received on realisation (including sale) of the Instruments are as a main rule taxable as ordinary income, which is currently taxed at a flat rate of 22 per cent. for Norwegian legal entities such as limited companies and similar entities. For financial service companies subject to the Norwegian financial tax (e.g. banks, insurance companies, investment companies etc.) the tax rate for "ordinary income" is 25 per cent. Losses on realisation of the Instruments are deductible in the ordinary income of the entity. The taxation is as a starting point triggered and calculated as described in the section concerning "Individuals", see above.

However, legal entities may benefit from the Norwegian exemption method. The exemption method is as a main rule applicable to gains and yields on shares/ownership interests in companies, mutual funds and similar entities located within the EEA, but may also apply to financial instruments with such shares/ownership interests as an underlying. Gains and yields covered by the exemption method are exempt from taxation, and losses are correspondingly not tax deductible.

Stock index options may also be comprised by the exemption method, but only as long as the index substantially (i.e. at least 90 per cent. or more according to statements of the tax authorities) is related to companies resident within the EEA.

As mentioned above, there are no transfer taxes, stamp duty or similar taxes connected to purchase, disposal or settlement of the Instruments. Holders who are resident in Norway for tax purposes are not subject to withholding taxes in Norway in relation to the Instruments. Furthermore, there is no VAT on the transfer of the Instruments. Limited companies and similar entities are not subject to net wealth taxation.

Polish Taxation

The following information on certain Polish taxation matters is based on the laws and practice in force as of the date of this Base Prospectus and is subject to any changes in law and the interpretation and application thereof, which changes could be made with retroactive effect. The following information does not purport to be a comprehensive description of all the tax consequences and considerations that may be relevant to acquisition, holding, disposing and redeeming of or cancelling (as applicable) the Securities, and does not purport to deal with the tax consequences applicable to all categories of investors. The following information is based on the assumption that no Agent is located in Poland. The following information is not intended to be, nor should it be construed to be, legal or tax advice. It is recommended that potential purchasers of the Securities consult with their legal and tax advisers as to the tax consequences of the purchase, holding, sale or redemption.

Withholding tax

Polish withholding tax may only apply to Polish source incomes. There are no regulations defining in which cases income earned (revenue) by a Polish tax resident should be considered income (revenue) earned in Poland. However, as of 1 January 2017 a new regulation addressing the source of income with respect to non-residents has been in force and it cannot be excluded that in practice the tax authorities will consider that the same situations should indicate a Polish source of income for Polish tax residents. Pursuant to income tax regulations, income (revenues) earned in the Republic of Poland by non-residents shall include in particular income (revenues) from:

1. any kind activity pursued in the Republic of Poland, including work and activity performed in person in Poland, a foreign establishment located in the Republic of Poland;
2. immovable property located in the Republic of Poland or rights to such property, including from its disposal in whole or in part, or from disposal of any rights to such property;
3. securities and derivatives other than securities, admitted to public trading in the Republic of Poland as part of the regulated stock exchange market, including those obtained from the disposal of these securities or derivatives, or the exercise of rights resulting from them;
4. the transfer of ownership of shares in a company, of all rights and obligations in a partnership without legal personality, or units in an investment fund or a collective investment undertaking, in which at least 50 per cent. of the value of assets is constituted, directly or indirectly, by immovable properties located in the Republic of Poland, or rights to such immovable properties;
5. the transfer of ownership of shares, all rights and obligations, units or similar rights in the real property company;
6. the receivables settled, including receivables put at disposal, paid out or deducted, by natural persons, legal persons, or organisational units without legal personality, having their place of residence, registered office, or management board in the Republic of Poland, irrespective of the place of concluding and performing the agreement; and
7. the unrealised gains.

The above list is not exhaustive; therefore, the tax authorities may also consider that income (revenues) not listed above is sourced in Poland.

Given the above, in principle interest on the Securities should not be considered as income earned in Poland because the Issuer is located outside of Poland. Therefore, there is no withholding tax in Poland in relation to the Securities, unless the Securities are admitted to public trading in Poland

Taxation of income

Polish resident individuals

Individuals having their place of residence in Poland ("**Polish Resident Individuals**") are subject to Polish Personal Income Tax ("**PIT**") on their worldwide incomes irrespective of the country from which the incomes were derived. Income earned by Polish Resident Individuals on the disposal or redemption of Securities should not be combined with income from other sources but will be subject to the 19 per cent. flat PIT rate. The income is calculated as the difference between the revenue earned on the disposal or redemption of Securities (in principle, the selling price or redemption amount) and the related costs (in principle, the issue price). The tax is settled by Polish Resident Individuals on an annual basis. Interest under Securities earned by a Polish Resident Individuals should not be combined with income from other sources and will be subject to the 19 per cent. flat PIT rate. The tax is settled by Polish Resident Individuals on an annual basis. Generally, tax withheld in other countries on interest income can be deducted against tax payable on this income in Poland unless otherwise provided for by the provisions of the Double Tax Treaty concluded between Poland and the country where the tax was withheld.

Polish resident entities

Entities having their seat or place of management in Poland ("**Polish Resident Entities**") are subject to Polish Corporate Income Tax ("**CIT**") on their worldwide incomes irrespective of the country from which the incomes were derived. CIT is imposed on income which is a sum of income generated from capital gains and income generated from other sources of revenue. Income is determined separately for each relevant basket, i.e. revenues from capital gains are separated from revenues from other sources. Correspondingly, the tax losses are determined separately for each of these baskets, whereby a tax loss from one basket may not be deducted against the income from the other basket. Income earned by Polish Resident Entities on the disposal or redemption of Securities is attributed to capital gains basket and is subject to the 19 per cent. CIT rate. The income is calculated as the difference between the revenue earned on the disposal or redemption of Securities (in principle, the selling price or redemption amount) and the related costs (in principle, the issue price).

The amount of interest earned by a Polish Resident Entity under Securities is also attributed to capital gains basket and is subject to the 19 per cent. CIT rate. Generally, similar to Polish Resident Individuals tax withheld in other countries on interest income can be deducted against tax payable on this income in Poland unless otherwise provided for by the provisions of the Double Tax Treaty concluded between Poland and country where the tax was withheld.

Non-resident individuals and entities

Non-Polish residents are subject to tax only on income (revenue) earned in Poland (limited tax obligation). Income (revenue) earned in the territory of the Republic of Poland in particular means income (revenue) from: (i) all types of activity (work performance, economic activity performed through a permanent establishment, activity performed in person) pursued in the Republic of Poland, including through a foreign establishment located in the Republic of Poland; (ii) immovable property located in the Republic of Poland or rights to such property, including from its disposal in whole or in part, or from the disposal of any rights to such property; (iii) securities and financial derivatives which are admitted to public trading on the territory of the Republic of Poland on the regulated exchange market, including income (revenue) generated from the disposal of such securities, and the exercise of the rights arising from any of the above; (iv) the transfer of the ownership of shares in a company, all rights and obligations in a company that is not a legal person, shares in investment funds, or mutual fund institutions where real estate property located in the territory of the Republic of Poland or rights to such real estate property, directly or indirectly, constitute at least 50% of their assets; (v) the transfer of ownership of shares, all rights and obligations, units or similar rights in the real property company, (vi) the receivables settled, including receivables placed at disposal, paid out or deducted, by natural persons, legal persons, or organisational units without legal personality, having their place of residence, seat, or management board in the Republic of Poland, irrespective of the place of conclusion of the agreement and place of performance and (vii) the unrealised gains

Individuals and entities that are non-Polish residents will not generally be subject to Polish taxes on interest and income resulting from the disposal or redemption of Securities as long as Securities are not quoted on the Warsaw Stock Exchange, unless such income is attributable to an enterprise which is either managed in Poland or carried through a permanent establishment in Poland. In case of treaty protected non-Polish residents income on the disposal or redemption of Securities quoted on the Warsaw Stock Exchange will not be in principle subject to tax in Poland. However, some double tax treaties concluded by Poland may provide for a different tax treatment, for example, in case of the disposal of shares/securities in a real estate company based on so-called "real estate clause". Due to Poland's signing on 7 June 2017 the Multilateral Convention to Implement Tax Treaty-Related Measures to Prevent Base Erosion and Profit-Shifting (the "**Convention**"), permanent establishment status may be verified in light of the Convention and the real estate clause may be introduced to those double tax treaties which have not provided for it to date. Furthermore, interest paid to treaty protected non-Polish residents on Securities quoted on the Warsaw Stock Exchange may be considered a Polish source income and taxed in Poland in accordance with the relevant Double Tax Treaty. In the case of individuals and entities resident in a country which does not have a double tax treaty with Poland, interest on Securities quoted on the Warsaw Stock Exchange as well as income on the disposal/redemption of Securities quoted on the Warsaw Stock Exchange will be taxed in Poland at 19 per cent. PIT/CIT rate.

In addition, in the case of individuals resident in a country which does not have a double tax treaty with Poland, there may be a risk of taxation of the types of income referred to in this paragraph, in the case of the disposal/redemption of Securities quoted on the Warsaw Stock Exchange as well as payment of interest on Securities quoted on the Warsaw Stock Exchange pursuant to the regulations determining Polish source incomes.

Taxation of inheritances and donations

The Polish tax on inheritance and donations is paid by individuals who received title to Securities by right of succession, as legacy, further legacy, testamentary instruction or gift only if at the moment of the acquisition of the Securities the acquirers were the Polish citizens or had residence within the territory of Poland. The rates of tax on inheritances and donations vary depending on the degree of kinship by blood, kinship through marriage or other types of personal relationships existing between the testator and the heir, or between the donor and the donee (the degree of the kinship is decisive for the assignment to a given tax group). The tax rate varies from 3 per cent. to 20 per cent. of the taxable base depending on the tax group to which the recipient was assigned. Acquisition of ownership of Securities by a spouse, descendants, ascendants, stepchildren, siblings, stepfather or stepmother is tax exempt if the beneficiary notifies the head of the competent tax office of the acquisition within six months of the day when the tax liability arose or, in the case of an inheritance, within six months of the day when the court decision confirming the acquisition of the inheritance becomes final.

Tax on civil law transactions

Generally tax on civil law transactions ("**TCLT**") at the rate of one per cent. is levied on the sale or exchange of the rights exercised in Poland. The taxpayer of this tax is only the purchaser of the rights. The tax is also imposed on agreements for the sale or exchange of the rights exercised outside Poland (including Securities) only if the sale or exchange agreement is concluded in Poland and the purchaser has a place of residence or seat in the territory of Poland. However, the sale of Securities (i) to investment firms (including foreign investment firms within the meaning of the Polish Act on Trading in Financial Instruments), or (ii) conducted via investment firms (including foreign investment firms) acting as intermediaries, or (iii) the sale of the Securities either on the Warsaw Stocks Exchange or on any multilateral trading facility operating in accordance with relevant regulations (i.e. in the "**Organised trading**"), or (iv) outside the Organised trading by investment firms (including foreign investment firms) if the Securities had been acquired by such firms under Organised trading – is exempt from tax on civil law transactions.

Polish Act on Trading in Financial Instruments defines Organised trading as trading in securities or other kinds of instruments in the Republic of Poland on a regulated market or alternative trading system, which means that the definition of Organised trading has been limited to transactions conducted in the Republic of Poland. Additionally, pursuant to Polish Act on Trading in Financial Instruments the investment firm is understood to mean a brokerage house, a bank conducting brokerage activities, a foreign investment firm conducting brokerage activities in the Republic of Poland, and a foreign legal person with its

registered office in an OECD or WTO country which conducts brokerage activities in the Republic of Poland.

It should be noted, that foreign investment firm - in Polish law provisions - is understood to be a legal person or an organisational unit which does not have legal personality with its registered office in a different EU member state, and where legislation in the country in question does not require the registered office to be established – with its central office in a different EU member state, or a natural person with their place of residence in a different member state, conducting, on the basis of a licence from the relevant supervisory authority, brokerage activity in a different EU member state, and also a foreign credit institution.

As of 2021 United Kingdom is no longer a member of the European Union and European Economic Area, British entities, that provide brokerage services, consequently, cannot be treated as foreign investment firms. Therefore, those entities must conduct brokerage activity within the Republic of Poland to be entitled to TCLT exemption. An entity that intends to provide investment services and/or to perform investment activities in Republic of Poland shall obtain a licence from the Polish Financial Supervision Authority, based on an application filed by the entity concerned. Such investment firms are not considered foreign investment firms, but they are treated the same way as Polish investment firms. Otherwise, involving a UK investment firm does not allow for benefiting from TCLT exemption.

Other Taxes

Polish tax provisions impose an additional tax, a solidarity levy to natural persons. Natural persons are obliged to pay the solidarity levy in the amount of 4% surplus over PLN 1 000 000 of various incomes (including income earned from disposal against consideration of securities or business income)

No other Polish taxes should be applicable to the Securities.

Portuguese Tax Considerations

The following is a general description of certain Portuguese withholding tax considerations relating to the Securities. It does not purport to be a complete analysis of all tax considerations relating to the Securities, whether in Portugal or elsewhere, neither does it purport to address the tax consequences applicable to all categories of investors, some of which may be subject to special rules. This overview is based upon the law as in effect on the date of this Base Prospectus. It is subject to any change of the law that may apply after such date. The information contained within this section is limited to withholding taxation on income paid by Portuguese resident entities to Portuguese resident individuals, and prospective investors should not apply any information set out below to other areas. Prospective purchasers of the Securities should consult their own tax advisers as to the consequences of making an investment in, holding or disposing of the Securities and the receipt of any amount under the Securities.

Payments of interest (and principal) and other income by the relevant Issuers under the Securities may in principle be made without any withholding for or on account of Portuguese taxes to the extent that the relevant Issuers are not residents of Portugal or are not otherwise acting through a Portuguese permanent establishment.

However, interest and other income (excluding capital gains) arising from the Securities is subject to withholding tax at a 28 per cent. rate when paid or made available by Portuguese resident entities (acting on behalf of the Issuer or of the holders of the Securities) to Portuguese resident individuals, in which case tax should be withheld by the former.

In this case, the holder of the Securities may choose to treat the withholding tax as a final tax or to tax the income at the general progressive income tax rates of up to 48 per cent. (plus (i) an additional surcharge of 2.5 per cent. applicable on income exceeding EUR 80,000 and up to EUR 250,000 and of 5 per cent. applicable on income exceeding EUR 250,000.

Such income when paid or made available to accounts in the name of one or more resident accountholders acting on behalf of unidentified third parties is subject to a final withholding tax rate of 35 per cent. unless the relevant beneficial owners of the income are identified, in which case the general tax rules apply.

A withholding tax rate of 35 per cent. also applies to income due by non-resident entities domiciled in a country, territory or region subject to a clearly more favourable tax regime included in the "low tax jurisdictions" list (approved by Ministerial order no. 150/2004, of 13 February 2004, as amended) and paid or made available by Portuguese resident entities to individuals resident in Portugal.

Mandatory Automatic Exchange of Information

Under EC Council Directive no. 2003/48/EC, of 3 June 2003 (the "**EU Savings Directive**"), on taxation of savings income in the form of interest payments, member states were required to provide to the tax authorities of another member state, details of payments of interest (or similar income) paid by a person within its jurisdiction to an individual resident in that other member state.

A number of non-EU countries and certain dependent or associated territories of certain member states have agreed to adopt similar measures (either provision of information or transitional withholding) in relation to payments made by a person within its jurisdiction to, or collected by such a person for, an individual resident in a member state. In addition, the member states have entered into reciprocal provision of information or transitional withholding arrangements with certain of those dependent or associated territories in relation to payments made by a person in a member state to, or collected by such a person for, an individual resident in one of those territories.

Meanwhile, further measures in the field of information exchange were adopted at the EU-level, namely with the approval by the European Council of Directive no. 2014/107/EU of 9 December 2014, which amended EU Council Directive no. 2011/16/EU (the "**Administrative Cooperation Directive**") to extend the mandatory automatic exchange of information to a wider range of income, including financial income, in line with the Standard for Automatic Exchange of Financial Account Information in Tax Matters issued by OECD in July 2014 and with the bilateral exchange agreements between the United States of America and several other countries to implement the United States' Foreign Account Tax Compliance Act ("**FATCA**").

On 10 November 2015, the European Council approved Directive no. 2015/2060 ("**Directive 2015/2060**"), repealing the EU Savings Directive with effect from 1 January 2016 (and from 1 January 2017 in case of Austria). The repeal of the EU Savings Directive is aimed at preventing overlap between the EU Savings Directive and the new automatic exchange of information regime to be implemented under the Administrative Cooperation Directive (as amended by EU Council Directive no. 2014/107/EU).

Portugal has implemented the EU Savings Directive into Portuguese law through Decree-Law no. 62/2005, of 11 March 2005, as amended. Accordingly, it is expected that Decree-Law no. 62/2005, of 11 March 2005, will be revoked.

Portugal has implemented the Administrative Cooperation Directive (as amended by the EU Council Directive no. 2014/107/EU) into Portuguese law through Decree-Law no. 64/2016, of 11 October 2016 ("**Portuguese CRS Law**"), which has introduced amendments to the Decree-Law no. 61/2013, of 10 May 2015, in this regard. Under the Portuguese CRS Law, the first exchange of information was due by 31 July 2017 for information related to the calendar year 2016. For calendar year 2018 and the subsequent years, exchange of information is due by 31 July 2019 and 31 July of the following years.

Portugal has also implemented the FATCA regulations through Decree-Law no. 64/2016, of 11 October 2016. Under the Portuguese FATCA framework, the exchange of information regarding information related to calendar years 2014 and 2015 was due by 10 January 2017. For the following calendar years reporting is due by 31 July.

Prospective investors resident in Portugal should consult their own legal or tax advisers regarding the consequences of the Administrative Cooperation Directive and the FATCA regulations in their particular circumstances.

Romanian Taxation

The following text is a high level summary of certain Romanian tax aspects and considerations relating to the Securities. This information is of a general nature and it does not purport to be a comprehensive analysis of all relevant tax aspects that has to be considered when deciding to invest in Securities. This summary is based on the provisions of the Romanian fiscal legislation in force as of 3 July 2018.

This summary does not describe any tax aspects resulting from the tax laws of any other state than Romania.

Investors are, under all circumstances, strongly advised to contact their own tax advisor to clarify the individual consequences of their investment, holding and disposal of the Securities.

The summary below assumes that the Issuer of the Securities is not tax resident in Romania and the Securities are not issued via a Romanian branch/permanent establishment of the Issuer.

Romanian withholding tax on interest payments

Interest income received by a non-resident person from a Romanian resident is subject to withholding tax. Starting from the premise that the Issuer is not resident for tax purposes in Romania and it has no permanent establishment in Romania, the payments made by the Issuer in respect of interest, premiums, principal, dividends, capital gains in connection with Securities will not be deemed made from Romania.

Taxation of resident individual holders

Individuals who are tax resident in Romania or non-resident citizens who meet the conditions of fiscal residence according to Romanian legislation, respectively the residency criteria provided in the Fiscal Code, are subject to personal income tax in Romania on their worldwide income. Therefore, Romanian individual holders would be subject to personal income tax due on their investment income arising from the holding, redemption, sale or any other transaction with the Securities. Irrespective of the nature of the income (interest, premiums, gains derived from transfer of the Securities), the rate of taxation would be 10 per cent, except dividends for which rate of taxation is 5 percent.

The annual net losses coming from abroad are carried forward and compensated by the taxpayer with the incomes of the same nature and source, realized on each country and registered in the next 7 fiscal years.

The fiscal residents of the states with which Romania has concluded a Double Taxation Avoidance Convention are generally taxable for the interests obtained from Romania in the state of fiscal residence, but for each situation, the provisions of the conventions between states must be taken into account. Thus, according to these double taxation conventions, exemptions can be considered in the situation where the natural person has paid tax by withholding tax in a foreign country for the incomes obtained from Securities.

The obligation to declare and pay tax in relation to any income and/or gains obtained from abroad by a Romanian tax resident individual stays with that individual. However, if the payments of the income and/or gains in relations to Securities are effectively performed through a Romanian paying agent, it might be the case that (although this is debatable) the Romanian tax authorities require this agent to withheld at source the income tax due by the Romanian tax resident individual on certain categories of income, such as interest and dividends.

The resident individual holder has the obligation to pay contribution to the state health insurance fund, if the income and gains obtained by this individual from Securities exceed a fixed threshold of 12 gross monthly minimum salaries in force at the date of submitting the relevant tax declaration. For 2022, the limit is RON 30,600 (the minimum gross salary in the country is RON 2,550). The amount of the social health insurance contribution is calculated at the minimum mentioned limit, applying the 10% quota to it, so that, for 2022, the social health insurance contribution quota is RON 3,060.

The contribution to the state health insurance fund is also due even if the income and gains obtained from Securities are lower than the threshold above, but the income and gains from Securities cumulated with revenues obtained by the resident individual from other sources (except for income from salaries and assimilated to salaries, for example income from independent activities, income from other sources, income from intellectual property rights)) exceed this threshold.

If the income and gains obtained from Securities are lower than the threshold above, and the resident individual does not obtain revenues from other sources (with the exception of salaries), the contribution is only optional.

Taxation of resident entities holders

Resident entities which are tax resident in Romania (i.e. if they are incorporated in Romania or if they have their effective place of management in Romania or if they are legal entities incorporated according to European legislation with registered office in Romania) will be subject to corporate income tax on their worldwide income, including any income and gains resulting from the holding, redemption, sale or any other transaction with the Securities. The applicable tax rate is 16 per cent. The tax loss incurred by these entities can be carried forward for 7 consecutive years.

The taxable base for corporate tax purpose is computed as the difference between revenues and expenses registered by entities as per the accounting rules, adjusted with tax items. Therefore, the corporate tax consequences deriving from holding, redemption, sale or any other transaction with the Securities is dependent also on the accounting treatment applied to such Securities, especially as regards the recognition of the related revenues and expenses.

The Romanian fiscal legislation, exempt from corporate income tax, in certain conditions, the incomes derived from dividends and from evaluation/revaluation/sale of shares.

The Romanian fiscal legislation, states that the losses incurred by a company from selling receivables is deductible within the limit of 30%. In case of credit institutions, if receivables are partially covered by provisions or taken off from the balance sheet and then sold, 70% of the difference between the value of receivable and their selling price represents taxable income. However, starting 14 May 2020 this restriction does no longer apply to transfers of government securities, bonds and other debt instruments that give the holder a contractual right to collect cash, the expenses recorded from such transfers being deductible when calculating the tax result.

Relief for withholding tax paid in a foreign country in relation with Securities may be available, if Romania has in place a double tax treaty in place with the country where the tax was withheld. The relief is granted under the form of deduction from and within the limit of the corporate income tax due in Romania.

Note that, legal entities with an annual income lower than RON equivalent of EUR 1,000,000 as at 31 December of the previous year, fall under the obligation to pay tax for micro-entities of 1% or 3% (depending on the number of employees) applied to income obtained (except certain income specifically provided) without possibility to deduct expenses.

Taxation of non-residents

Non-resident (legal entities and/or individuals carrying on independent activities) will be subject to tax in Romania in respect of income derived from the Securities, in case they have a permanent establishment in Romania to which the Securities are attributable.

Stamp duties, transfer taxes, other taxes

There are no stamp duties, transfer taxes or other taxes due in Romania in connection with acquisitions and transactions with Securities, other than those mentioned above.

South African Taxation

The information below is intended to be a general guide to the relevant tax laws of South Africa as at the date of this Base Prospectus and is not intended as comprehensive advice and does not purport to describe all of the considerations that may be relevant to a prospective purchaser of, or subscriber for, South African Notes. Prospective purchasers of, or subscribers for, South African Notes should consult their own professional advisers in regard to the purchase of, or subscription for, South African Notes and the tax implications thereof.

Securities Transfer Tax

The issue, transfer and redemption of the South African Notes will not attract securities transfer tax under the South African Securities Transfer Tax Act, 2007 (the "**STT Act**") because the South African Notes do not constitute "securities" as defined in the STT Act. Any future transfer duties and/or taxes that may be introduced in respect of (or applicable to) the transfer of South African Notes will be for the account of Noteholders.

Value Added Tax

No value-added tax ("VAT") is payable on the issue or transfer of South African Notes. The issue, sale or transfer of South African Notes constitute "financial services" as defined in section 2 of the South African Value-Added Tax Act, 1991 (the "**VAT Act**"). In terms of section 2 of the VAT Act, the issue, allotment, drawing, acceptance, endorsement or transfer of ownership of a debt security is exempt from VAT in terms of section 12(a) of that Act. The South African Notes constitute "debt securities" as defined in section 2(2)(iii) of the VAT Act.

However, commissions, fees or similar charges raised for the facilitation of the issue, allotment, drawing, acceptance, endorsement or transfer of ownership of South African Notes will be subject to VAT at the standard rate (currently 15 per cent.), except where the recipient is a non-resident as contemplated below.

Services (including exempt financial services) rendered to non-residents who are not in South Africa when the services are rendered, are subject to VAT at the zero rate in terms of section 11(2)(l) of the VAT Act.

Services rendered by a supplier who is resident or carries on business outside South Africa to a recipient who is a resident of South Africa, are subject to VAT at the standard rate in terms of section 7(1)(c) of the VAT Act, except to the extent that such services are utilized or consumed in South Africa for the purpose of making taxable supplies (i.e. broadly, supplies as part of that South African resident's business). If applicable, such VAT on "imported services" is payable by the recipient of such imported services.

Income Tax

Under current taxation law effective in South Africa, a "resident" (as defined in section 1 of the Income Tax Act, 1962 (the "**Income Tax Act**")) is subject to income tax on his/her world-wide income. Accordingly, all Noteholders who are "residents" of South Africa will generally be liable to pay income tax, subject to available deductions, allowances and exemptions, on any income (including income in the form of interest) earned in respect of the South African Notes.

Non-residents of South Africa are subject to income tax on all income derived from a South African source (subject to domestic exemptions or relief in terms of any applicable double taxation treaties). Interest income is derived from a South African source if it is incurred by a South African tax resident (unless it is attributable to a foreign permanent establishment), or it is derived from the utilisation or application in South Africa by any person of any funds or credit obtained in terms of any form of "interest bearing arrangement". The South African Notes will constitute an "interest-bearing arrangement". On the basis that the Issuers will not be tax resident in South Africa as at the South African Programme Date and furthermore that the funds raised from the issuance of any Tranche of South African Notes will not be utilised or applied by the Issuers (or, to the best of the Issuers' knowledge, any other person) in South Africa, the interest earned by a non-resident Noteholder should not be deemed to be from a South African source and therefore should not be subject to South African income tax.

Under section 24J of the Income Tax Act, broadly speaking, any discount or premium to the principal amount of a South African Note is treated as part of the interest income on the South African Note. Interest income which accrues (or is deemed to accrue) to a Noteholder is deemed, in accordance with section 24J of the Income Tax Act, to accrue on a day-to-day basis until that Noteholder disposes of the South African Note or until maturity. This day-to-day basis accrual is determined by calculating the yield to maturity (as defined in Section 24J of the Income Tax Act) and applying this rate to the capital involved for the relevant tax period. Section 24JB deals with the fair value taxation of financial instruments for certain types of taxpayers. Noteholders should seek advice as to whether this provision may apply to them.

Certain entities may be exempt from income tax. Prospective subscribers for or purchasers of the South African Notes are advised to consult their own professional advisors as to whether the interest income earned on the South African Notes will be exempt from tax in terms of the Income Tax Act.

Withholding Tax

A final withholding tax on interest which is levied at the rate of 15 per cent. applies to interest payments made from a South African source to foreign persons (i.e. non-residents). This is subject to certain

exemptions, including an exemption for listed debt (certain formalities may need to be complied with in order to claim some of these exemptions). South Africa is also a party to double taxation treaties that may provide full or partial relief from the withholding tax on interest, provided that certain formalities are complied with.

The withholding tax should not apply to the interest payable on the South African Notes, as interest which is paid or accrues on the South African Notes should not be deemed to be from a South African source (see above). Accordingly, under current taxation law in South Africa, all payments made under the South African Notes to resident and non-resident Noteholders will generally be made free of withholding or deduction for or on account of any taxes, duties, assessments or governmental charges in South Africa.

Capital Gains Tax

Capital gains and losses of residents of South Africa on the disposal of South African Notes are subject to capital gains tax unless the South African Notes are purchased for re-sale in the short term as part of a scheme of profit making, in which case the proceeds will be subject to income tax. Any discount or premium on acquisition which has already been treated as interest for income tax purposes, under section 24J of the Income Tax Act will not be taken into account when determining any capital gain or loss. If the South African Notes are disposed of or redeemed prior to or on maturity, a gain or loss must be calculated. The gain or loss is deemed to have been incurred or to have accrued in the year of assessment in which the transfer or redemption occurred. The calculation of the gain or loss will take into account interest which has already accrued or been incurred during the period in which the transfer or redemption occurs. In terms of section 24J(4A), where an adjusted loss on transfer or redemption will, to the extent that it has previously included interest which has been included in the taxable income of the holder (as interest), be allowed that amount qualifies as a deduction from the income of the holder when it is incurred during the year of assessment in which the transfer or redemption takes place, and accordingly will not give rise to a capital loss.

Capital gains tax under the Eighth Schedule to the Income Tax Act will not be levied in relation to South African Notes disposed of by a person who is not a resident of South Africa unless the South African Notes disposed of are effectively connected with a permanent establishment of that person in South Africa during the relevant year of assessment.

Purchasers are advised to consult their own professional advisers as to whether a disposal of South African Notes will result in a liability to capital gains tax.

Definition of Interest

The references to "interest" above mean "interest" as understood in South African tax law. The statements above do not take any account of any different definitions of "interest" or "principal" which may prevail under any other law or which may be created by the terms and conditions of the South African Notes or any related documentation.

Spanish Tax Considerations

The following is a general description of the Spanish withholding tax treatment and indirect taxation of payments under the Securities. It does not purport to be a complete analysis of all tax considerations relating to the Securities, whether in Spain or elsewhere, which may be relevant to a decision to subscribe for, purchase, own or dispose of the Securities and does not purport to deal with the tax consequences applicable to all categories of investors, some of which (such as dealers in securities or commodities) may be subject to special rules. Prospective purchasers of the Securities should consult their own tax advisers as to which countries' tax laws could be relevant to acquiring, holding and disposing of the Securities and receiving payments of interest, principal and/or other amounts under the Securities and the consequences of such actions under the tax laws of Spain. This overview regarding Spanish taxes and withholding taxes in Spain is made assuming that the Issuers do not act through a permanent establishment in Spain, and is based upon Spanish law, as well as administrative interpretations, as in effect on the date of this Base Prospectus, which may change at any time, possibly with retrospective effect.

Personal Income Tax ("PIT") / Corporate Income Tax ("CIT") / Non Resident Income Tax ("NRIT")

(A) *Spanish resident individuals*

(i) Warrants

Following the criterion of the Spanish Directorate-General for Taxation in several rulings (amongst others, rulings dated 27 August 2007, 23 May 2007 and 29 May 2013), income earned by Spanish resident individuals under Warrants should be considered as capital gains, in which case no withholdings on account of PIT will have to be deducted.

Notwithstanding that, Spanish resident individuals recognising capital gains will still be subject to PIT, to be declared in their annual tax returns, according to the following rates:

- Amounts up to EUR 6,000.00: 19 per cent.
- Amounts between EUR 6,000.01 and EUR 50,000:00 21 per cent.
- Amounts between EUR 50,000.01 and EUR 200,000.00 23 per cent.
- Amounts exceeding EUR 200,000.01: 26 percent.

(ii) Certificates and Notes

(a) *Interest payments under the Certificates and Notes*

Income earned by Spanish resident individuals under Certificates and Notes should qualify as interest payments. In general, interest payments obtained by Spanish resident individuals should be subject to withholding tax at a 19 per cent. rate on account of PIT (creditable against final tax liability). Expenses relating to the management and deposit of the Certificates and Notes, if any, will be tax-deductible, excluding those pertaining to discretionary or individual portfolio management. Notwithstanding the above, as non-resident in Spain entities not acting through a permanent establishment are not bound to withhold on account of PIT on payments made to Spanish resident individuals, interest payments under Certificates and Notes should be only subject to withholding tax in Spain in case they are deposited in a depositary entity or individual resident in Spain (or acting through a permanent establishment in Spain) or if an entity or individual resident in Spain (or acting through a permanent establishment in Spain) is in charge of the collection of the income derived from the Certificates and Notes, provided that such income had not been previously subject to withholding tax in Spain.

Notwithstanding the above, Spanish resident individuals earning such income will still be subject to PIT – to be declared in their annual tax returns – according to the following rates:

- Amounts up to EUR 6,000.00: 19 per cent.
- Amounts between EUR 6,000.01 and EUR 50,000:00 21 per cent.
- Amounts between EUR 50,000:01 and EUR 200,000.00 23 per cent.
- Amounts exceeding EUR 200,000.01: 26 per cent

However, when certain income included in the taxpayer's taxable base has already been taxed abroad, the taxpayer shall be entitled to a tax credit against the PIT taxable base for the lowest amount of the following: (i) the amount effectively paid abroad; and (ii) the amount resulting from applying the average tax rate to the taxable base effectively taxed abroad.

(b) Income upon transfer or redemption of the Certificates and Notes

Income earned upon transfer or redemption of the Certificates and Notes should be subject to Spanish withholding tax at a 19 per cent. rate on account of PIT (creditable against final tax liability). Notwithstanding this, as non-resident in Spain entities not acting through a permanent establishment are not bound to withhold on account of PIT on payments made to Spanish resident individuals, income upon transfer or redemption of the Certificates and Notes should be subject to withholding tax in Spain only if there is a financial entity acting on behalf of the seller, provided such entity is resident for tax purposes in Spain or has a permanent establishment in the Spanish territory and such income had not been previously subject to withholding tax in Spain.

However, when the Certificates and Notes (i) are represented in book-entry form; (ii) are admitted to trading on a Spanish secondary stock exchange; and (iii) generate explicit yield, holders can benefit from a withholding tax exemption in respect of the income arising from the transfer or reimbursement of the Certificates and Notes, save in respect of income derived from accounts entered into with financial institutions, provided that such income was based on financial instruments, such as the Certificates and Notes. However, under certain circumstances, when a transfer of the Certificates and Notes has occurred within the 30-day period immediately preceding any relevant coupon payment date such holders may not be eligible for such withholding tax exemption.

Notwithstanding the above, Spanish resident individuals earning such income will still be subject to PIT, to be declared in their annual tax returns, according to the following rates:

- Amounts up to EUR 6,000.00: 19 per cent.
- Amounts between EUR 6,000.01 and EUR 50,000.00 21 per cent.
- Amounts between EUR 50,000.01 and EUR 200,000.00 23 per cent.
- Amounts exceeding EUR 200,000.01: 26 per cent.

However, when certain income included in the taxpayer's taxable base has already been taxed abroad, the taxpayer shall be entitled to a tax credit against the PIT taxable base for the lowest amount of the following: (i) the amount effectively paid abroad; and (ii) the amount resulting from applying the average tax rate to the taxable base effectively taxed abroad.

(B) Spanish resident companies

(i) Warrants

Income earned under Warrants shall be considered as capital gains, in which case no withholdings on account of CIT will have to be deducted.

(ii) Certificates and Notes

Interest payments under the Certificates and Notes shall be subject to withholding tax at a 19 per cent. rate on account of CIT (creditable against final tax liability). Notwithstanding this, as non-resident in Spain entities not acting through a permanent establishment are not bound to withhold on account of CIT on payments made to Spanish resident entities, interest payments under the Certificates and Notes should be only subject to withholding tax in Spain in case they are deposited in a depositary entity or individual resident in Spain (or acting through a permanent establishment in Spain) or if an entity or individual resident in Spain (or acting through a permanent establishment in Spain) is in charge of the collection of the income derived from the Certificates and Notes, provided that such income had not been previously subject to withholding tax in Spain.

Income upon transfer or redemption of the Certificates and Notes should be subject to Spanish withholding tax at a 19 per cent. rate on account of CIT (creditable against final tax liability). Notwithstanding this, as non-resident in Spain entities not acting through a permanent establishment are not bound to withhold on account of CIT on payments made to Spanish resident entities, income upon transfer or redemption of the Certificates and Notes should be subject to withholding tax in Spain only if there is a financial entity acting on behalf of the seller, provided such entity is resident for tax purposes in Spain or has a permanent establishment in the Spanish territory..

However, when (i) the Certificates and Notes are represented in book-entry form and are admitted to trading on a Spanish secondary stock exchange or on the Spanish Alternative Fixed Income Market (MARF); or (ii) the Certificates and Notes are listed on an OECD market; holders who are Corporate Income Taxpayers can benefit from a withholding tax exemption in respect of interest payments and income arising from the transfer or redemption of the Certificates and Notes, exception made of income derived from accounts entered into with financial entities, provided that such accounts are based on financial instruments, which meet the requirements listed above.

Spanish resident companies earning income under the Warrants, Certificates or Notes will be subject to CIT, to be declared in their annual tax returns, at a general 25 per cent. rate. However, when certain income included in the taxpayer's taxable base has already been taxed abroad, the taxpayer shall be entitled to a tax credit against the CIT taxable base for the lowest amount of the following: (i) the amount effectively paid abroad; and (ii) the amount that should have been paid in Spain in the case that such income had been obtained in Spain. Taxpayers with an annual net turnover higher than EUR 20 million or that are taxed jointly under a CIT group will be subject to a minimum 15% effective CIT rate of the adjusted taxable base (additional requirements or limitations may apply depending on the nature and circumstances of a given taxpayer).

(C) *Individuals and companies with no tax residency in Spain*

(i) *Income obtained through a permanent establishment*

Ownership of the Securities by investors who are not resident for tax purposes in Spain will not in itself create the existence of a permanent establishment in Spain.

The tax rules applicable to income deriving from the Securities under NRIT in this scenario are, generally, the same as those previously set out for Spanish resident companies, subject to the provisions of any relevant double tax treaty.

(ii) *Income obtained without a permanent establishment*

Income obtained by investors residing outside Spain and without a permanent establishment within the Spanish territory would not be considered, in general terms, as Spanish-source income and, therefore, would not be subject to taxation and withholding tax in Spain.

According to binding ruling V0185-20 issued by the Spanish General Directorate of Taxes on 27 January 2020, certain securities (such as financial derivatives) may be classified, for the purposes of the relevant double tax treaty, as business profits or other income and, as mentioned above, should not be considered, in general terms, as Spanish-source income, subject to the provisions of any relevant double tax treaty.

Net Wealth Tax ("NWT")

Only individual holders of Securities would be subject to the NWT as legal entities are not taxable persons under NWT.

Relevant taxpayers will be (i) individuals who have their habitual residence in Spain regardless of the place where their assets or rights are located or could be exercised; and (ii) non-Spanish resident individuals owning assets or rights which are located or could be exercised in Spain, when in both cases their net wealth is higher than EUR 700,000, as this amount is considered as exempt from NWT.

Taxpayers should include in their NWT self-assessment the Securities (when qualifying as debt instruments) for the following amounts:

- (i) if they are listed in an official market, the average negotiation value of the fourth quarter; and
- (ii) in other case, its nominal value (including redemption premiums).

The value of the Securities together with the rest of the taxpayer's wealth, once reduced by the deductible in rem liens and encumbrances which reduce the rights and assets values and the personal debts of the taxpayer, shall be taxed at a tax rate between 0.2 to 3.5 per cent.

Finally, please note that the Spanish regions are entitled to modify (i) the threshold of net wealth exempt from taxation; (ii) the tax rates; and (iii) the tax benefits and exemptions to be applied in their territory.

Taxpayers who are non-Spanish resident individuals but who are resident in a Member State of the European Union or the European Economic Area may apply the rules approved by the autonomous region where the assets and rights with more value (i) are located, (ii) can be exercised or (iii) must be fulfilled.

Inheritance and Gift Tax ("IGT")

(A) *Individuals with tax residency in Spain*

Individuals resident in Spain who acquire ownership or other rights over any Securities by inheritance, gift or legacy will be subject to IGT. The applicable effective tax rates range between 7.65 per cent. and 81.6 per cent., depending on several factors such as family relationship and pre-existing heritage. However, it is necessary to take into account that the IGT (including certain tax benefits) has been transferred to the Spanish regions. Therefore, an analysis must be made in each specific case to determine to what extent any regional legislation might be applicable, since there might be differences in respect of the final taxation under IGT depending on the region in which an investor resides.

(B) *Companies with tax residency in Spain*

Companies resident in Spain are not subject to IGT, as income obtained will be subject to CIT.

(C) *Individuals and companies with no tax residency in Spain*

Non-Spanish resident individuals that acquire ownership or other rights over the Securities by inheritance, gift or legacy, will not be subject to IGT provided that the Securities were not located in Spain and the rights deriving from them could not be exercised within Spanish territory.

The acquisition of Securities by non-resident companies is not subject to the IGT, as income obtained will be subject to the NRIT.

Value Added Tax, Transfer Tax and Stamp Duty

Acquisition and transfer of Securities, in principle, shall not trigger Transfer Tax and Stamp Duty, nor will they be taxable under Value Added Tax.

Spanish Financial Transaction Tax ("FTT")

The acquisition of shares of a Spanish listed company trading on a regulated market in Spain, any other Member State of the European Union, or on a market in a third country if the market is considered to be equivalent, with a market capitalization greater than 1,000 million euros ("Qualifying Shares") and the acquisition of certificates of deposit representing Qualifying Shares ("Qualifying Certificates"), such as American depositary receipts, regardless of the type of market or trading centre where the trades are executed (regulated market, multilateral trading facility, systematic internaliser; or OTC transactions), are subject, save for certain exceptions, to Spanish FTT at a 0.2 per cent of the corresponding acquisition price (excluding the costs and expenses associated to such transaction).

In addition to the above, the acquisition of Qualifying Shares and Qualifying Certificates under the execution or settlement of convertible or exchangeable bonds or debentures, of derivatives, as well as of any financial instrument, or of certain financial contracts, are also subject to the Spanish FTT.

Swedish withholding tax

There is no Swedish withholding tax at source (*källskatt*) applicable on payments made by the issuer in respect of the Securities. However, Sweden operates a system of preliminary tax (*preliminärskatt*) to secure payment of taxes. In the context of the Securities a preliminary tax of 30 per cent. will be deducted from all payments of interest in respect of the Securities made to any individuals, or estates, that are resident in Sweden for tax purposes provided the paying entity is subject to reporting obligations. A preliminary tax of 30 per cent. will also be deducted from any other payments in respect of the Securities not treated as capital gains, if such payments are paid out together with payments treated as interest. Depending on the relevant holder's overall tax liability for the relevant fiscal year the preliminary tax may contribute towards, equal or exceed the holder's overall tax liability with any balance subsequently to be paid by or to the relevant holder, as applicable.

Slovak Tax Considerations

The following is a brief overview of the Slovak (income) tax aspects in connection with the Securities. It does not claim to fully describe all Slovak tax consequences of the acquisition, ownership, disposition, or redemption of the Securities. In some cases, a different tax regime may apply, as under the Programme different types of Securities may be issued, the tax treatment of such Securities can be different due to their specific terms. Further, this overview does not consider or discuss the tax laws of any country other than Slovakia, nor does it consider the investors' individual circumstances. Prospective investors are advised to consult their own professional tax advisors / attorneys to obtain further information about the tax consequences of the acquisition, ownership, disposition, redemption, exercise, or settlement of any of the Securities. Only tax advisors / attorneys are able to adequately take into account special tax aspects of the particular Security in question as well as the investor's personal circumstances and any special tax treatment applicable to the investor.

This overview is based exclusively on Slovak law as in force as of the date of this Base Prospectus. The laws and their interpretation by the Slovak tax authorities may change. Regarding certain innovative or structured financial securities or instruments, there is currently neither extensive Slovak case law nor comments/opinions of the Slovak tax authorities as to the tax treatment of such securities or instruments. Accordingly, it cannot be ruled out that the Slovak tax authorities and courts or the Slovak paying agents adopt a view different from that outlined below.

Slovak taxation in general

In the case where payments vis-à-vis Slovak investors and related to the Securities issued based on the Base Prospectus will not be made either by a Slovak entity nor a Slovak resident transfer/payment agent will take care of the payments related to the Securities, such payments related to the above Securities should not be subject to the withholding or securing tax in the Slovak Republic.

If the payments related to the Securities are paid by the paying agent being resident or having a permanent establishment in the Slovak Republic, there is a high risk that the interest or any other similar income paid (i) to individuals, (ii) to a taxable party not established or founded to conduct business (e.g., associations of legal entities, chambers of professionals, civic associations, including trade union organizations, political parties and movements, churches and religious communities recognized by the State, etc.), (iii) to the National Bank of Slovakia or (iv) to a non-resident legal entity not conducting business in the territory of the Slovak Republic through a permanent establishment (i.e., a legal entity not having its registered office or its place of actual management or its permanent establishment in the territory of the Slovak Republic – non-Slovak tax resident) could be subject to the 19 per cent withholding tax (or 35 per cent in case of countries that are, in general, not protected by bilateral Double Taxation Treaty or Tax Administrative Treaty).

Further, any interest paid or any other similar income from Securities paid by the paying agent being resident or having a permanent establishment in the Slovak Republic to other non-Slovak tax residents not mentioned in the previous paragraph may still be subject to 19 per cent (or 35 per cent) securing or withholding tax, unless the non-Slovak tax resident is a tax resident of an EU Member State (in which

case no tax securing is required). No tax securing is required if a non-Slovak tax resident proves that it already pays Slovak income tax prepayments; the respective tax authority may however decide otherwise. In any case, such tax security would be subsequently credited against the final Slovak tax liability of the non-Slovak tax resident in its income tax return. The applicable Double Taxation Treaty may further provide for exemption or credit of whole amount of such tax paid in Slovakia or part thereof.

Also, please note that the tax consideration of the regime of interest paid to other types of taxable parties, as mentioned above or the tax consideration of the regime of interest paid from other types of securities as notes, if applicable, would be much more complex and would require separate more detailed consideration.

Individual Investors

It must be always assessed on the individual basis whether the income should be treated as interest or profits on notes or as dividends, or as other, based on the nature of the Security and its Issuer in question.

Slovak tax residents

All payments of interest and principal by the Issuer can be made free and clear of any withholding or deduction for or on account of any taxes of whatsoever nature imposed, levied, withheld, or assessed by Slovakia or taxing authority thereof or therein, in accordance with the applicable Slovak law, subject however to:

- The application of 19 per cent Slovak withholding tax, if the income derived from the Securities is paid out by a custodian or a paying agent (financial institutions including Slovak branches of foreign financial institutions paying out the income to the holder of the Securities) located in Slovakia. The term "income from the Securities" includes (i) interest and (ii) other income derived from the notes.
- In case no withholding tax is levied on income from the Securities (i.e., interest income is not paid out by a custodian or paying agent in Slovakia), Slovak resident individual investors will have to declare the income derived from the Securities in their income tax returns pursuant to the Slovak Income Tax Act. In this case the income from the Securities is generally subject to Slovak personal income tax at the 19 per cent rate.

Non-Slovak tax residents

In case of non-Slovak tax resident holders of the Securities, Slovak withholding tax will generally apply on resulting interest payments, provided that such income is attributable to his/her/its Slovak permanent establishment and that such payments are made by a custodian or paying agent in Slovakia.

Capital Gains

Slovak tax residents

Income realized by Slovak tax residents from the sale of the Securities is generally subject to Slovak flat corporate income tax at 15 per cent or 21 per cent flat rate, or personal income tax at the 19 per cent or 25 per cent progressive rate (income of individuals up to EUR 500 from the sale of Securities may be tax exempt, if meeting the conditions). Losses from the sale of the Securities will only be tax deductible if the conditions prescribed by Slovak Income Tax Act are met (typically not for individuals).

Income of individuals who are Slovak tax residents realised from the sale of Securities traded on a regulated market (e.g., stock-exchange) or similar foreign market may be tax exempt if a holding period exceeds one calendar year and if the period between admission of such notes to the regulated or similar foreign market and their sale exceeds one calendar year, provided that Securities were not included in the business assets of the individual.

If the income related to sale of the Securities is paid by the paying agent resident or having a permanent establishment in the Slovak Republic, there is a high risk that such income paid (i) to a taxable party not established or founded to conduct business (e.g., associations of legal entities, chambers of professionals, civic associations, including trade union organizations, political parties and movements, churches and

religious communities recognized by the State, etc.), or (ii) to the National Bank of Slovakia could be subject to the 19 per cent withholding tax (self-assessed by these taxpayers).

Non-Slovak tax residents

Income realized by a non-Slovak tax resident, not holding the Securities through a permanent establishment in the Slovak Republic, from the sale of the Securities: (i) to a Slovak tax resident, or (ii) to a Slovak permanent establishment of another non-Slovak tax resident will be subject to taxation in the Slovak Republic, unless an applicable Double Taxation Treaty provides for other taxation of income or capital gains realized from the sale of the notes by such non-Slovak tax resident (typically, such income is not taxable in Slovakia).

If such income realized by a non-Slovak tax resident still remains taxable in the Slovak Republic under the previous paragraph and the applicable Double Taxation Treaty does not state otherwise, a 19 per cent securing tax (or 35 per cent in case of countries that are not protected by bilateral Double Taxation Treaty or Tax Administrative Treaty) is deducted by the purchaser, unless the non-Slovak tax resident is a tax resident of an EU Member State (in which case no tax securing is required). Further, no tax securing should be required if a non-Slovak tax resident proves that he already pays Slovak income tax prepayments; the respective tax authority may however decide otherwise. In any case, such tax security would be subsequently credited against the final Slovak tax liability of the non-Slovak tax resident. The applicable Double Taxation Treaty may further provide for exemption or credit of whole amount of such tax paid in Slovakia or part thereof.

Revaluation differences

Slovak tax residents that prepare their financial statements under the Slovak Accounting Standards or under the International Financial Reporting Standards may be required to revalue the Securities to fair value for accounting purposes, whereby the revaluation would be accounted for as revenue or expense. Such revenue is generally taxable and the corresponding expense should be generally tax deductible for Slovak tax purposes.

EU Savings Directive

Under Directive 2003/48/EC on the taxation of savings income (the "Directive 2003/48/EC") that has been implemented into Slovak law, Member States are required to provide to the tax authorities of another Member State details of payments of interest (as defined in the Savings Directive) made by a paying agent (as defined in the Savings Directive) within its jurisdiction to an individual resident in that other Member State. On 10 November 2015, the Council of the European Union adopted Council Directive (EU) 2015/2060 of 10 November 2015, repealing the Directive 2003/48/EC, with effect from 1 January 2016 (the "Directive 2015/2060/EU"). Certain provisions of the Directive 2003/48/EC will continue to be effective during 2016 and Austria will continue to apply the Directive 2003/48/EC until 31 December 2016. The repeal of the Directive 2003/48/EC is aimed at preventing overlap between the EU Savings Tax Directive and a new automatic exchange of information regime to be implemented under Council Directive 2011/16/EU on Administrative Cooperation in the field of Taxation (as amended by later Council Directives).

Responsibility for Withholding of Taxes

The (non-Slovak) Issuer is generally not liable for the withholding of Slovak taxes at source. Withholding tax is levied by a Slovak custodian or paying agent.

Inheritance and Gift Tax

In Slovakia, inheritance and gift tax has been abolished as of 2004.

Other applicable taxes

No Slovak stamp duty, registration, transfer, or similar tax should be payable in connection with the acquisition, ownership, sale or disposal of the Securities. Certain immaterial registration fees may however be applicable.

Slovenia Tax Considerations

The following overview is of a general nature and is included herein solely for information purposes. It is a general description of certain Slovenia tax considerations relating to the purchasing, holding and disposing of Securities.

This description is based on the laws, regulations and applicable tax treaties as in effect in Slovenia on the date hereof, all of which are subject to change, possibly with retroactive effect. It is not intended to be, nor should it be construed to be, legal or tax advice.

The following overview does not purport to be a comprehensive description of all tax considerations that may be relevant to a particular prospective holder with regard to a decision to purchase, own or dispose of Securities.

Prospective holders are advised to consult their own tax advisers as to the tax consequences, under the tax laws of the country of which they are resident and under the laws of the all relevant jurisdictions, to which they may be subject.

Taxation of interest income

Legal Persons

Interest income received by (a) a legal person, which is a resident for taxation purposes in the Republic of Slovenia or (b) a permanent establishment (poslovna enota) in the Republic of Slovenia of a legal person not resident for taxation purposes in the Republic of Slovenia will be subject to Slovenian tax as a part of the net annual income of such legal person or permanent establishment, being Corporate Income Tax (davke od dohodkov pravnih oseb) which is currently levied at the rate of 19 per cent.

Individuals

A Slovenian Personal Income Tax (dohodnina) from the interest income received from a source in Slovenia by an individual that is a resident in Slovenia will be generally calculated (certain exemptions apply) by the tax payer and withheld together with the calculation of interest at the (current) rate of 25 per cent.

In case of the interest income received from a source outside of Slovenia by an individual that is a resident in Slovenia (who receives an amount of interest free of any deduction for account of this tax) shall (i) declare each amount so received and (ii) pay the amount of tax in accordance with the relevant decision of the tax authorities. This does not apply in cases when the interest income with a source outside of Slovenia is paid by a Slovenian tax payer (intermediary). In this case the intermediary calculates a Slovenian Personal Income Tax (dohodnina) from the interest income received from a source outside of Slovenia and withholds it together with the calculation of interest at the (current) rate of 25 per cent.

Withholding tax

According to the Slovenian Corporate Income Tax Act (Zakon o davku od dohodkov pravnih oseb), withholding tax is imposed on certain income of non-residents from a Slovenian source, including interest. The standard withholding tax rate is 15% and in certain situations in more detail regulated in the Slovenian Tax Procedure Act (Zakon o davčnem postopku) it can be 25%. It is the responsibility of the Slovenian payer (e.g., a legal entity, a sole entrepreneur, a business unit of a non-resident, for example, a Slovenian branch of a foreign company or an agent) to withhold the tax at the relevant rate at the time of payment of Slovenian sourced income. In certain cases it is, however, possible to apply for a reduced withholding tax rate or even an exemption from withholding tax.

Taxation of interest income

Taxation of capital gains

Legal Persons

Capital gains earned on the sale or disposition of the Securities by a legal person resident for taxation purposes in the Republic of Slovenia or a permanent establishment (poslovna enota) in the Republic of Slovenia of a legal person not resident for taxation purposes in the Republic of Slovenia will be subject

to Slovenian Corporate Income Tax as a part of its overall income tax (currently levied at the rate of 19 per cent.).

Capital gains earned by legal persons not resident for taxation purposes in the Republic of Slovenia and having no permanent establishment (poslovna enota) in the Republic of Slovenia are not subject to Slovenian taxation.

Individuals

Under the Slovenian Personal Income Tax Act (Zakon o dohodnini (ZDoh-2)), capital gains from the sale or other disposition of debt securities held as non-business assets are in general exempt from taxation, while capital gains earned as business income (dohodek iz dejavnosti) of an individual resident for taxation purposes in the Republic of Slovenia may be subject to Slovenian Personal Income Tax as a part of such individual's overall annual business income at the rate applicable in accordance with the progressive tax scale which may reach up to 50 per cent.

Capital gains earned on the sale or disposition of the Securities by an individual resident for taxation purposes in the Republic of Slovenia may, in circumstances described in the Act on the Taxation of Profits from the Disposal of Derivatives (Zakon o davku od dobička od odsvojitve izvedenih finančnih instrumentov (ZDDOIFI)), be subject to tax levied at the rate of up to 40 per cent.

Value Added Tax

Pursuant to Value Added Tax Act (Zakon o davku na dodano vrednost (ZDDV-1)), transactions with securities are VAT-exempt in the Republic of Slovenia. According to the law, interest on debt securities is not subject to VAT, thus VAT is neither charged nor payable.

Inheritance and gift taxations

Natural persons and private law entities, within the meaning of the Slovenian Inheritance and Gift Tax Act (Zakon o davku na dediščine in darila (ZDDD)) may be subject to Slovenian inheritance and gift tax in case of the transfer of the Securities mortis causa or inter vivos. The value of all transfers by the same person in one year is considered when ascertaining the taxable amount for such purposes.

Inheritance tax and gift tax is assessed by reference to the market value of property subject to taxation at the time of the occurrence of tax liability, decreased by debts, costs and charges relating to this property. In the case of movable property (such as the Securities), the tax base for inheritances and gifts is decreased by Euro 5,000.

Tax on inheritance and gifts is not paid by the heir or recipient of a gift of a first hereditary order (children and spouse).

Tax rates are progressive and differ depending on the hereditary order. Tax rates for inheritance and gift tax range:

- (a) from 5 per cent. up to 14 per cent. for the second hereditary order (parents, siblings and their descendants);
- (b) from 8 per cent. up to 17 per cent. for the third hereditary order (grandparents); and
- (c) from 12 per cent. up to 39 per cent. for all subsequent hereditary orders (others).

Switzerland Taxation

The following discussion is a summary of certain material Swiss tax considerations relating to (i) Securities issued by any of the Issuers where the Holder is tax resident in Switzerland or has a tax presence in Switzerland or (ii) Securities where the Paying Agent, custodian or securities dealer is located in Switzerland. The discussion is a summary based on legislation as of the date of this Base Prospectus. It does not aim to be a comprehensive description of all the Swiss tax considerations that may be relevant for a decision to invest in Securities. The tax treatment for each investor depends on the particular situation. All investors are advised to consult with their professional tax advisors as to the

respective Swiss tax consequences of the purchase, ownership, disposition, lapse, exercise or redemption of Securities (or options embedded therein) in light of their particular circumstances.

Swiss Withholding Tax

Payments under the Securities will not be subject to Swiss federal withholding tax, provided that the Issuer is at all times resident and managed outside Switzerland for Swiss tax purposes.

Income Taxation

Securities held as Private Assets by a Swiss resident Holder

(a) *Structured Notes*

If a Security classifies as a structured Security, i.e. as derivative financial instrument(s) with a bond-like prefunding component embedded therein, its income taxation depends on whether (i) the embedded bond component and the embedded derivative financial instrument(s) are reported separately from each other, or, if the Security is a standard product, alternatively the values of the embedded bond component and the embedded derivative financial instrument(s) can at any time be determined analytically by using standard valuation programmes, and (ii) the Security classifies as a structured product with or without a predominant one-time interest payment:

Non-transparent derivative financial instruments: If the embedded bond is not recorded separately from the embedded derivative financial instrument(s) and if the conditions for analytical determination of the values of the embedded bond and the embedded derivative financial instrument(s) set forth above do not apply, then the Security classifies as non-transparent structured note and any return over the initial investment classifies as a taxable interest payment. Non-transparent derivative financial instruments generally include a predominant one-time interest payment and are taxed in accordance with the principles set forth below under "Transparent derivative financial instruments with a predominant one-time interest payment".

Transparent derivative financial instruments without a predominant one-time interest payment: If the embedded bond is recorded separately from the embedded derivative financial instrument(s) or if the values of the embedded bond and the embedded derivative financial instrument(s) can be determined analytically as set forth above and if the yield-to-maturity predominantly derives from periodic interest payments and not from a one-time-interest-payment such as an original issue discount or a repayment premium (see below "*Transparent derivative financial instruments with a predominant one-time interest payment*"), then a person who is an individual resident in Switzerland holding such a Security as a private asset is required to include any periodic and one-time interest payments received on the Security, converted in each case into Swiss Francs at the exchange rate prevailing at the time of payment, in his or her personal income tax return for the relevant tax period and will be taxable on any net taxable income (including such amounts) for the relevant tax period. Option premium received, and a gain, including in respect of interest accrued, a loss, respectively, realised on the sale of such a Security is a tax-free private capital gain, a non-tax-deductible private capital loss, respectively.

Transparent derivative financial instruments with a predominant one-time interest payment: If the embedded bond is recorded separately from the embedded derivative financial instrument(s) or if the values of the embedded bond and the embedded derivative financial instrument(s) can be determined analytically as set forth above and if the yield-to-maturity predominantly derives from a one-time-interest-payment such as an original issue discount or a repayment premium and not from periodic interest payments, then a person who is an individual resident in Switzerland holding such a Security as a private asset, is required to include any periodic interest payments received on the Security and, in addition, any amount equal to the difference between the value of the Security at redemption or sale, as applicable, and its value at issuance or secondary market purchase, as applicable, and converted in each case into Swiss Francs at the exchange rate prevailing at the time of sale or redemption, issuance or purchase, respectively, in his or her personal income tax return for the relevant tax period and will be taxable on any net taxable income (including such amounts, i.e., including, *inter alia*, any gain in respect of

interest accrued or foreign exchange rate) for the relevant tax period. Any compensation received by such a holder for the embedded derivative, i.e., option premium received, and any residual gain, and a loss, respectively, realised on the sale of such a Security is a tax-free private capital gain, a non-tax-deductible private capital loss, respectively. However, notwithstanding the foregoing, such a holder may offset any decrease in value realised by him or her within the same taxation period on sale or redemption of such a Security against any gain (including periodic interest payments) realised by him or her from other securities with a predominant one-time interest payment.

(b) *Bonds*

Bonds without a predominant one-time interest payment: If a Security classifies as a pure bond without a predominant one-time interest payment (i.e., the yield-to-maturity of which predominantly derives from periodic interest payments and not from a one-time-interest-payment such as an original issue discount or a repayment premium), then a person who is an individual resident in Switzerland holding such a Security as a private asset is required to include any periodic and one-time interest payments received on such Security, converted into Swiss Francs at the exchange rate prevailing at the time of payment, in his or her personal income tax return for the relevant tax period and will be taxable on any net taxable income (including such amounts) for the relevant tax period. A gain, including, *inter alia*, in respect of interest accrued or foreign exchange rate, a loss, respectively, realised on the sale of such a Security is a tax-free private capital gain, a non-tax-deductible private capital loss, respectively.

Bonds with a predominant one-time interest payment: If a Security classifies as a pure bond with a predominant one-time interest payment (the yield-to-maturity of which predominantly derives from a one-time-interest-payment such as an original issue discount or a repayment premium and not from periodic interest payments), then a person who is an individual resident in Switzerland holding such a Security as a private asset, is required to include any periodic interest payments received on the Security and, in addition, any amount equal to the difference between the value of the Security at redemption or sale, as applicable, and its value at issuance or secondary market purchase, as applicable, and converted in each case into Swiss Francs at the exchange rate prevailing at the time of sale or redemption, issuance or purchase, respectively, in his or her personal income tax return for the relevant tax period and will be taxable on any net taxable income (including such amounts, i.e., including, *inter alia*, any gain in respect of interest accrued or foreign exchange rate) for the relevant tax period. Such a holder may offset any decrease in value realised by him or her within the same taxation period on sale or redemption of such a Security against any gain (including periodic interest payments) realised by him or her from other securities with a predominant one-time interest payment.

(c) *Pure Derivative Financial Instruments*

A capital gain realised by an individual on the sale or redemption of a Security which classifies as a pure derivative financial instrument (such as pure call and put options, pure futures, static certificates replicating an index or a basket of at least five shares and with a fixed maturity or an annual redemption right and discount certificates with a maturity not exceeding twelve months) and which is held as part of the individual's private assets is a tax-free private capital gain. Conversely, a capital loss realised on the sale or redemption of such a Security cannot be set off against taxable income. Dividend equalisation payments on such a Security constitute taxable investment income.

(d) *Low Exercise Price Warrants*

A fully pre-funded call option with a term of not more than one year classifies as pure derivative financial instrument (see taxation treatment above "Pure Derivative Financial Instruments"). If the term of a call option exceeds one year and the instrument underlying the call option is pre-financed by 50 per cent. or more at the time of issuance then the interest component embedded in such an instrument (i.e., issue discount) constitutes taxable interest income (see taxation treatment above "Structured Notes").

(e) *Fund-like Securities*

A Security which is classified as a fund-like instrument will be considered a pass-through instrument for Swiss tax purposes if dividend and interest income (less attributable costs) from, and capital gains and losses (less costs attributable) realised on, the underlying investments, are reported and distributed separately. Under such conditions, an individual holding a fund-like Security as part of his or her private assets receives taxable income (which he or she must report annually) over such portion of distributions (in case the fund is distributing the income realised on the underlying investments) or earnings credits (in case the fund is reinvesting the income realised on the underlying investment) as derive from dividends and interest (less attributable costs) on the underlying instruments. Any distributions or credits deriving from capital gains realised on the underlying investments constitute a tax-free private capital gain, and any respective loss is a non-tax-deductible private capital loss. Any gain realised within a taxation period on the sale of a fund-like Security (including accrued dividends and interest) is exempt from income taxation as a private capital gain, and, conversely, any loss realised on such a Security a non-tax-deductible capital loss.

Securities held as Assets of a Swiss Business

Corporate entities and individuals who hold Securities as part of a trade or business in Switzerland, in the case of residents abroad carried on through a permanent establishment or a fixed place of business in Switzerland, are required to recognise any payments on, and any capital gains or losses realised on the sale or redemption of, such Securities (irrespective of their classification) in their income statement for the respective taxation period and will be taxed on any net taxable earnings for such period.

The same taxation treatment also applies to Swiss-resident individuals who, for income tax purposes, are classified as "professional securities dealers" for reasons of, *inter alia*, frequent dealing and leveraged investments in securities.

Capital Gains Taxation

Securities held as Private Assets by a Swiss resident Holder

A gain, a loss, respectively, realised by an individual resident in Switzerland for tax purposes upon the sale or other disposal of a Security held as part of his or her private assets is a tax-free private capital gain, or a non-tax deductible capital loss, respectively, unless such individual is classified, for income tax purposes, as a "professional securities dealer" for reasons of, *inter alia*, frequent dealing and leveraged investments in securities. If an individual is classified as "professional securities dealer" he or she will be taxed in accordance with the principles set forth above under "*Income Taxation, Securities held as Assets of a Swiss Business*". Concerning the bifurcation of a tax-exempt capital gain component, or a non-tax deductible capital loss component, respectively, from taxable income components of a Security see the bifurcation principles set forth above with regard to the different instruments under "*Income Taxation, Securities held as Private Assets by a Swiss resident Holder*").

Securities held as Assets of a Swiss Business

Capital gains realised on Securities held as Assets of a Swiss Business are taxed in accordance with the taxation principles set forth above under "*Income Taxation, Securities held as Assets of a Swiss Business*").

Swiss Federal Stamp Taxes

The issuance of Securities on the Issue Date (primary market) is exempt from Swiss federal securities turnover tax (*Umsatzabgabe*), except that the issuance of Securities which are classified as fund-like instruments may be subject to Swiss federal securities turnover tax of up to 0.3 per cent. on the offering price, however, only if a Swiss securities dealer (as defined in the Swiss federal stamp tax act) is a party or an intermediary to the transaction and, additionally, if no exemption applies.

Dealings in Securities (secondary market) which classify as pure derivative financial instruments (such as pure call and put options, including low exercise price options with a maturity not exceeding twelve months, pure futures with a maximal pre-financing of 25 per cent., fully-funded Securities statically replicating an index or a basket of at least five shares and with a fixed maturity or an annual redemption right) are exempt from Swiss federal securities turnover tax. Dealings in other Securities may be subject to Swiss federal securities turnover tax of up to 0.3 per cent. on the consideration paid, however, only if

a Swiss securities dealer (as defined in the Swiss federal stamp tax act) is a party or an intermediary to the transaction and, additionally, if no exemption applies.

The physical settlement of a security at exercise or redemption to the holder of the Security may be subject to Swiss federal securities turnover tax of 0.3 per cent. in case a security issued by an issuer outside Switzerland is delivered and of 0.15 per cent. in case a security issued by a Swiss domestic issuer is delivered, however, in each case, only if a Swiss domestic securities dealer (as defined in the Swiss federal stamp tax act) is a party or an intermediary to the delivery and, additionally, if no exemption applies.

Gift, Inheritance and Estate Taxes

Subject to an applicable tax treaty in an international situation, transfers of Securities may be subject to cantonal and/or communal inheritance tax, estate tax or gift tax if the deceased person has had his or her last domicile in Switzerland, the donor is resident in Switzerland, respectively, or in the case of a foreign deceased or resident person the transfer involves an unincorporated business in Switzerland and Securities are held as part of such business. No such taxes exist at the federal level. Rates depend upon the existing relationship (i.e. the relationship between the deceased and the heirs, or between the donor and the donee) and the size of the inheritance or gift. Interspousal gifts and gifts to descendants and inheritances collected by the surviving spouse and descendants are frequently exempt or taxed at low rates (up to 6 per cent.). Gifts and inheritances received from unrelated persons attract rates ranging from 20 per cent. to 40 per cent. The taxable base is usually the market value of the property transferred.

Net Worth and Capital Taxes

A holder of Securities who is an individual resident in Switzerland for tax purposes or is a non-Swiss resident holding Securities as part of a Swiss business operation or a Swiss permanent establishment is required to report Securities as part of private wealth or as part of Swiss business assets, as the case may be, and is subject to annual cantonal and/or communal private wealth tax on any net taxable wealth (including the Securities), in the case of a non-Swiss resident individual holding Securities as part of a Swiss business operation or a Swiss permanent establishment to the extent the aggregate taxable wealth is allocable to Switzerland. Incorporated holders of Securities are subject to cantonal and communal capital tax on net taxable equity, in the case of non-Swiss resident person holding Securities as part of a Swiss permanent establishment, to the extent the aggregate taxable equity is allocable to Switzerland. No net worth and capital taxes are levied at the federal level.

Non-Swiss resident Holders

A holder of a Security who is not resident in Switzerland and who during the taxation year has not engaged in a trade or business carried on through a permanent establishment or fixed place of business in Switzerland will in respect of such Security not be subject to income tax in Switzerland.

Automatic Exchange of Information in Tax Matters

The Automatic Exchange of Information in Tax Matters is a global initiative led by the OECD. It aims to establish a universal standard for automatic exchange of tax information and to increase tax transparency. Jurisdictions that are committed to implement or have implemented the AEI (such as Switzerland, the European Union member countries and many other jurisdictions worldwide) require their reporting financial institutions in accordance with the respective local implementing law to determine the tax residence(s) of their account holders and controlling persons (as applicable) and, in case of reportable accounts, report certain identification information, account information and financial information (including the account balance and related payments such as interest, dividends, other income and gross proceeds) to the local tax authority which will then exchange the information received with the tax authorities in the relevant reportable jurisdictions.

Foreign Account Tax Compliance Act (FATCA)

Switzerland has concluded an intergovernmental agreement with the United States to facilitate the implementation of FATCA. The agreement ensures that the accounts held by U.S. persons with Swiss financial institutions are disclosed to the U.S. tax authorities either with the consent of the account holder or by means of group requests within the scope of administrative assistance. Information will not be transferred automatically in the absence of consent, and instead will be exchanged only within the scope

of administrative assistance on the basis of the double taxation agreement between the U.S. and Switzerland.

United States Tax Considerations

The following is a summary of the principal United States federal income and estate tax consequences to a United States alien holder of Securities. You are a United States alien holder if you are the beneficial owner of a Security and are, for United States federal income tax purposes:

- a non-resident alien individual;
- a foreign corporation;
- a foreign partnership; or
- an estate or trust that in either case is not subject to United States federal income tax on a net income basis on income or gain for a Security

that does not hold the Security in connection with the conduct of a trade or business within the United States.

The discussion herein does not apply to any holder of Securities that is not a United States alien holder.

The tax treatment of Securities that are issued by GSFCI will generally differ from the tax treatment of Securities that are issued by GSI and GSW. Accordingly, the discussion below separately addresses the tax treatment of Securities that are issued by GSFCI and Securities that are issued by GSI and GSW.

In addition, holders of Securities (whether issued by GSFCI, GSW or GSI) that directly or indirectly reference the performance of United States equities (including an index or basket that includes United States equities) should consult the discussion below under "Dividend Equivalent Payments" with respect to the possible application of the Section 871(m) withholding tax to their Securities.

Please consult your tax advisor concerning the consequences of owning Securities in your particular circumstances under the U.S. Internal Revenue Code of 1986, as amended (the "**Code**") and the laws of any other taxing jurisdiction.

Securities issued by GSFCI

The following discussion applies only to Securities that are issued by GSFCI.

Tax Classification of GSFCI

GSFCI is classified as a branch of a subsidiary of GSG for United States federal income tax purposes. Accordingly, any Securities that are issued by GSFCI will be treated as issued by such subsidiary, which is a United States corporation, for United States federal income tax purposes.

The discussion herein assumes that the Securities are not subject to the rules of Section 871(h)(4)(A) of the Code relating to interest payments that are determined by reference to the income, profits, changes in the value of property or other attributes of the debtor or a related party. In addition, the discussion herein only applies to Securities that have a term that is no longer than 40 years.

Prospective purchasers of Securities should be advised that any bank which purchases a Security will be deemed to represent that it is not purchasing the Security in the ordinary course of its lending business and that it is buying the Security either (1) for investment purposes only or (2) for resale to a third party that either is not a bank or is holding the Security for investment purposes only.

In addition, the tax treatment of Securities that are issued by GSFCI may differ if they are not treated as debt for United States federal income tax purposes. Accordingly, the discussion below separately addresses the tax treatment of Securities that are treated as debt, and Securities that are not treated as debt, for United States federal income tax purposes. The Issue Terms will identify any Securities issued by GSFCI that we believe may not be treated as debt for United States federal income tax purposes.

Securities that are Classified as Debt for United States Tax Purposes

The discussion in this subsection addresses the tax treatment of Securities that are treated as debt for United States federal income tax purposes. The applicable Final Terms will identify any Securities that we intend to treat as debt for United States federal income tax purposes.

Subject to the discussions below under "*Foreign Account Tax Compliance Withholding*", "*Dividend Equivalent Payments*", and "*Information Reporting and Backup Withholding*", if you are a United States alien holder of a Security issued by GSFCI:

- (1) GSFCI and other United States payors generally will not be required to deduct United States federal withholding tax from payments of principal and premium (if any) and interest, including original issue discount, to you if, in the case of payments of interest:
 - (a) you do not actually or constructively own 10 per cent. or more of the total combined voting power of all classes of our stock entitled to vote;
 - (b) you are not a controlled foreign corporation that is related to us through stock ownership; and
 - (c) the United States payor does not have actual knowledge or reason to know that you are a United States person and:
 - (A) you have furnished to the United States payor an IRS Form W-8BEN, Form W-8BEN-E or an acceptable substitute form upon which you certify, under penalties of perjury, that you are not a United States person;
 - (B) in the case of payments made outside the United States to you at an offshore account (generally, an account maintained by you at a bank or other financial institution at any location outside the United States), you have furnished to the U.S. payor documentation that establishes your identity and your status as a person who is not a United States person;
 - (C) the United States payor has received a withholding certificate (furnished on an appropriate IRS Form W-8 or an acceptable substitute form) from a person claiming to be:
 - (x) a withholding foreign partnership (generally a foreign partnership that has entered into an agreement with the U.S. Internal Revenue Service ("**IRS**") to assume primary withholding responsibility with respect to distributions and guaranteed payments it makes to its partners);
 - (y) a qualified intermediary (generally a non-United States financial institution or clearing organisation or a non-United States branch or office of a United States financial institution or clearing organisation that is a party to a withholding agreement with the IRS); or
 - (z) a United States branch of a non-United States bank or of a non-United States insurance company;and the withholding foreign partnership, qualified intermediary or United States branch has received documentation upon which it may rely to treat the payment as made to a person who is not a United States person in accordance with United States Treasury regulations (or, in the case of a qualified intermediary, in accordance with its agreement with the IRS);
 - (D) the United States payor receives a statement from a securities clearing organisation, bank or other financial institution that holds customers' securities in the ordinary course of its trade or business:
 - (x) certifying to the United States payor under penalties of perjury that an IRS Form W-8BEN, Form W-8BEN-E or an acceptable substitute form has

been received from you by it or by a similar financial institution between it and you; and

- (y) to which is attached a copy of the IRS Form W-8BEN, Form W-8BEN-E or acceptable substitute form; or
 - (E) the U.S. payor otherwise possesses documentation upon which it may rely to treat the payment as made to a person who is not a United States person in accordance with United States Treasury regulations.
- (2) no deduction for any United States federal withholding tax will be made from any gain that you realise on the sale or exchange of your Security; and
- (3) a Security held by an individual who at death is not a citizen or resident of the United States will not be includible in the individual's gross estate for purposes of the United States federal estate tax if:
- (a) the decedent did not actually or constructively own 10 per cent. or more of the total combined voting power of all classes of our stock entitled to vote at the time of death; and
 - (b) the income on the Security would not have been effectively connected with a United States trade or business of the decedent at the time of death.

Securities that are not Classified as Debt for United States Tax Purposes

The discussion in this subsection addresses the tax treatment of Securities that are not treated as debt, but are rather treated as forward or derivative contracts, for United States federal income tax purposes. The Issue Terms will identify any Securities that we believe may not be treated as debt for United States federal income tax purposes.

Subject to the discussion below, amounts that a United States alien holder realises upon the sale or maturity of the Securities will not be subject to United States withholding tax if the holder complies with the certification requirements applicable to United States alien holders, in addition to the other requirements to avoid United States withholding tax, in each case as described above under "*Securities that are Classified as Debt for United States Tax Purposes*".

However, the IRS released a notice in 2007 that may affect the taxation of United States alien holders of certain instruments that are not properly treated as debt for U.S. federal income tax purposes but instead are classified as prepaid forward or executory contracts. The notice stated that the IRS was considering whether withholding tax should apply to such instruments. It is therefore possible that guidance could be issued pursuant to such notice or otherwise that would cause payments on the Securities (including amounts realised upon the sale or maturity of the Securities) to be subject to withholding tax. Under the terms of the Securities, we will not be obligated to pay additional amounts with respect to the payments on the Securities in order to compensate you for any amount that may be withheld or due because of a such a change in United States tax law or otherwise.

In addition, the application of the U.S. withholding tax rules to coupons, interest, or periodic payments (collectively "**coupon payments**") on a forward or derivative contract is not entirely clear. Because of this uncertainty, in the absence of further guidance, we intend to withhold on coupon payments (but not on payments on redemption or maturity that are not coupon payments) on the Securities at a 30 per cent. rate or at a lower rate specified by an applicable income tax treaty under an "other income" or similar provision. We will not make payments of any additional amounts in respect of such withholding tax. To claim a reduced treaty rate for withholding, you generally must provide a valid IRS Form W-8BEN, IRS Form W-8BEN-E, or an acceptable substitute form upon which you certify, under penalty of perjury, your status as a U.S. alien holder and your entitlement to the lower treaty rate. Payments will be made to you at a reduced treaty rate of withholding only if such reduced treaty rate would apply to any possible characterisation of the payments (including, for example, if the coupon payments were characterised as contract fees). Withholding also may not apply to coupon payments made to you if: (i) the coupon payments are "effectively connected" with your conduct of a trade or business in the United States and are includable in your gross income for U.S. federal income tax purposes, (ii) the coupon payments are attributable to a permanent establishment that you maintain in the United States, if required by an

applicable tax treaty, and (iii) you comply with the requisite certification requirements (generally, by providing an IRS Form W-8ECI). If you are eligible for a reduced rate of United States withholding tax, you may obtain a refund of any amounts withheld in excess of that rate by filing a refund claim with the IRS.

You should consult your tax advisor concerning the significance, and potential impact, of the above considerations.

Foreign Account Tax Compliance Withholding

A U.S. law enacted in 2010 (commonly known as "**FATCA**") could impose a withholding tax of 30 per cent. on interest income (including original issue discount) and other periodic payments on Securities paid to you or any non-U.S. person or entity that receives such income (a "**non-U.S. payee**") on your behalf, unless you and each such non-U.S. payee in the payment chain comply with the applicable information reporting, account identification, withholding, certification and other FATCA-related requirements. This withholding tax could also apply to all payments made upon maturity, redemption, or sale of certain Securities by a non-compliant payee. In the case of a payee that is a non-U.S. financial institution (for example, a clearing system, custodian, nominee or broker), withholding generally will not be imposed if the financial institution complies with the requirements imposed by FATCA to collect and report (to the U.S. or another relevant taxing authority) substantial information regarding such institution's U.S. account holders (which would include some account holders that are non-U.S. entities but have U.S. owners). Other payees, including individuals, may be required to provide proof of tax residence or waivers of confidentiality laws and/or, in the case of non-U.S. entities, certification or information relating to their U.S. ownership.

Withholding may be imposed at any point in a chain of payments if the payee is not compliant. A chain may work as follows, for example: The payment is transferred through a paying agent to a clearing system, the clearing system makes a payment to each of the clearing system's participants, and finally the clearing system participant makes a payment to a non-U.S. bank or broker through which you hold the Securities, who credits the payment to your account. Accordingly, if you receive payments through a chain that includes one or more non-U.S. payees, such as a non-U.S. bank or broker, the payment could be subject to withholding if, for example, your non-U.S. bank or broker through which you hold the Securities fails to comply with the FATCA requirements and is subject to withholding. This would be the case even if you would not otherwise have been directly subject to withholding.

A number of countries have entered into, and other countries are expected to enter into, agreements with the U.S. to facilitate the type of information reporting required under FATCA. While the existence of such agreements will not eliminate the risk that Securities will be subject to the withholding described above, these agreements are expected to reduce the risk of the withholding for investors in (or investors that indirectly hold Securities through financial institutions in) those countries.

The withholding tax described above could apply to all interest and other periodic payments on the Securities. We will not pay any additional amounts in respect of this withholding tax, so if this withholding applies, you will receive less than the amount that you would have otherwise received.

Depending on your circumstances, you may be entitled to a refund or credit in respect of some or all of this withholding. However, even if you are entitled to have any such withholding refunded, the required procedures could be cumbersome and significantly delay your receipt of any withheld amounts. You should consult your own tax advisors regarding FATCA. You should also consult your bank or broker through which you would hold the Securities about the likelihood that payments to it (for credit to you) may become subject to withholding in the payment chain.

Securities Issued by GSI and GSW

The following discussion applies only to Securities that are issued by GSI and GSW. Except as described below under "*Foreign Account Tax Compliance Withholding*", "*Dividend Equivalent Payments*", and "*Information Reporting and Backup Withholding*", payments and amounts realised in respect of such Securities will generally not be subject to United States income tax, withholding tax or estate tax.

Foreign Account Tax Compliance Withholding

FATCA could impose a withholding tax of 30 per cent. on payments on Securities paid to you or any non-U.S. person or entity that receives such income (a "**non-U.S. payee**") on your behalf, unless you and each non-U.S. payee in the payment chain comply with the applicable information reporting, account identification, withholding, certification and other FATCA-related requirements. However, this withholding tax will generally not apply to Securities issued by GSI and GSW unless they are treated as giving rise to "foreign passthru payments" and (i) are issued after the date that is six months after the U.S. Treasury Department issues final regulations defining what constitutes "foreign passthru payments", (ii) lack a stated expiration or term (including, for example, Open-ended Instruments), or (iii) are properly treated as equity for United States federal income tax purposes. In addition, such withholding will not apply to payments made before the date that is two years after the date on which final regulations defining the term "foreign passthru payment" are enacted. There are currently no rules regarding what constitutes a "foreign passthru payment" or when the defining regulations would be issued.

In addition, it is possible that the IRS could assert that your Securities should be deemed to be wholly or partially reissued for U.S. federal tax purposes if (a) an underlying asset, position, index or basket containing the foregoing, that is referenced by your Securities, is modified, adjusted or discontinued, or (b) there is a substitution of the issuer of the Securities. It is therefore possible that a holder that acquires Securities before the date mentioned under (i) in the immediately preceding paragraph, could nevertheless be subject to FATCA withholding in the future if the IRS successfully asserts that the Securities are deemed to be wholly or partially reissued for U.S. federal income tax purposes after such date.

Even if this withholding tax were to apply to payments on any Securities, in the case of a payee that is a non-U.S. financial institution (for example, a clearing system, custodian, nominee or broker), withholding generally will not be imposed if the financial institution complies with the requirements imposed by FATCA to collect and report (to the U.S. or another relevant taxing authority) substantial information regarding such institution's U.S. account holders (which would include some account holders that are non-U.S. entities but have U.S. owners). Other payees, including individuals, may be required to provide proof of tax residence or waivers of confidentiality laws and/or, in the case of non-U.S. entities, certification or information relating to their U.S. ownership. Under this withholding regime, withholding may be imposed at any point in a chain of payments if the payee is not compliant. A chain may work as follows, for example: The payment is transferred through a paying agent to a clearing system, the clearing system makes a payment to each of the clearing system's participants, and finally the clearing system participant makes a payment to a non-U.S. bank or broker through which you hold the Securities, who credits the payment to your account. Accordingly, if you receive payments through a chain that includes one or more non-U.S. payees, such as a non-U.S. bank or broker, the payment could be subject to withholding if, for example, your non-U.S. bank or broker through which you hold the Securities fails to comply with the FATCA requirements and is subject to withholding. This would be the case even if you would not otherwise have been directly subject to withholding.

A number of countries have entered into, and other countries are expected to enter into, agreements with the U.S. to facilitate the type of information reporting required under FATCA. While the existence of such agreements will not eliminate the risk that Securities will be subject to the withholding described above, these agreements are expected to reduce the risk of the withholding for investors in (or investors that indirectly hold Securities through financial institutions in) those countries. The U.S. has entered into such agreements with each of the United Kingdom and Germany. Under these agreements, a financial institution that is resident in the United Kingdom or Germany (as applicable) and meets the requirements of the agreement will not be subject to the withholding described above on payments it receives and generally will not be required to withhold from non-U.S. source income payments that it makes, including payments on the Securities.

We will not pay any additional amounts in respect of this withholding tax, so if this withholding applies, you will receive less than the amount that you would have otherwise received.

Depending on your circumstances, in the event we are required to withhold any amounts in respect of this withholding tax, you may be entitled to a refund or credit in respect of some or all of this withholding. However, even if you are entitled to have any such withholding refunded, the required procedures could be cumbersome and significantly delay your receipt of any withheld amounts. You should consult your own tax advisors regarding FATCA. You should also consult your bank or broker through which you would hold the Securities about the likelihood that payments to it (for credit to you) may become subject to withholding in the payment chain.

Dividend Equivalent Payments

Section 871(m) of the Code provides for a 30 per cent. withholding tax (subject to reduction under an applicable treaty) on "dividend equivalents" that are paid to foreign investors with respect to certain financial instruments that reference the performance of a United States equity. Under these rules, if a Security that is issued after 1 January 2017 provides for "delta-one" exposure to the performance of shares of a United States corporation, we will be obligated to impose United States withholding tax in respect of the actual dividends that are paid on the shares of the corporation (or corporations) that are referenced by the Security even if we do not actually transmit such amounts to you. This tax will also apply if a Security provides for delta-one exposure to an index or basket that includes shares of a United States corporation, unless as discussed below, the index or basket constitutes a "qualified index". If the basket or index is not a "qualified index", the tax will only apply to the dividends on shares of the United States corporations that are included in the index. A Security will generally be treated as providing for a "delta-one" position if it provides for 100 per cent. participation in all of the appreciation and depreciation in the performance of the shares that are referenced by the Security during the term of the Security. We will state in the Issue Terms for a Security that references the performance of an equity, an index or a basket that includes an equity or an index if we have determined that the Security is subject to Section 871(m) withholding tax as of the issue date of the Securities.

If a Security is subject to the Section 871(m) withholding tax described above, each dividend that is paid on a U.S. equity that is referenced by the Security will be subject to a withholding tax at the time that the dividend is paid (or, in certain cases, at the close of the quarter upon which the dividend is paid) even though we will not make any distributions on your Security until the redemption or maturity of the Security. We will remit the withholding tax to the IRS. We will not reduce the amount that is due under the Security by the amount of the Section 871(m) withholding tax. Rather, we will be deemed to have paid the amount of the Section 871(m) tax to you and then paid such amount on your behalf to the IRS. We expect, however, that as a general matter, any Security that is subject to the Section 871(m) tax will reference a net dividend index or basket in which the dividend amount that is included in the index or basket will be reduced by the amount of withholding tax that would be imposed on a direct foreign holder of the United States stocks that are referenced by the Security (which is the same rate as the Section 871(m) tax). In addition, the withholding tax rate that will be used to determine the Section 871(m) withholding tax as well as the net dividend that is included in the index or basket that is referenced by the Security will not take into account any reduced rate to which you may be entitled under an applicable tax treaty. Furthermore, you may not receive the necessary information reporting to enable you to claim a refund for the excess of the withholding tax over the tax that would be imposed under an applicable treaty. In addition, you may not be able to claim a credit for the payment of the Section 871(m) withholding tax in your resident tax jurisdiction, and you therefore should consult a tax advisor in such jurisdiction as to whether you will be able to claim such a credit. The withholding tax that we collect will completely satisfy a Security holder's Section 871(m) tax liability and therefore no other withholding agent (including any financial intermediaries in the chain of ownership for the Securities) will be obligated to impose any additional Section 871(m) tax with respect to the Securities.

Section 871(m) withholding tax will generally not apply to a Security that references a qualified index even if it is otherwise a "delta-one" Security. A "qualified index" is an index that is passive, diverse, widely used by numerous market participants, and that satisfies a number of technical requirements that are set forth in United States Treasury regulations. Even if an index otherwise constitutes a "qualified index", a Security may not be treated as referencing a "qualified index" with respect to a particular holder if the holder holds a related short position in one or more of the component securities in the index (other than a short position in the entire index, or a "de minimis" short position with a value of less than 5 per cent. of the value of the long positions in the index). Because of this possibility, custodians and other withholding agents may require a holder of a Security that references a "qualified index" to make representations or certifications regarding the nature of any short positions that it holds with respect to the components of the index, and it is possible that a custodian or other withholding agent will impose the Section 871(m) withholding tax if it does not receive a satisfactory representation or certification or if it otherwise concludes that you may hold a related short position described above.

In addition, a holder may be subject to Section 871(m) even if it holds a Security that is not a "delta-one" Security under the rules described above if (a) the holder's position under the Security would be "delta-one" when combined with other related positions that are held by the holder or (b) if a principal purpose for the holder's investment in the Security is to avoid the application of Section 871(m), in which case a special Section 871(m) anti-abuse rule could apply to the holder's investment in the Securities. In such a

case, a United States alien holder may be liable for Section 871(m) tax in respect of its Securities even when no withholding is required in respect of the Securities.

Furthermore, Securities that are issued on or after 1 January 2025 may be subject to Section 871(m) even if they are not a "delta-one" Security under the rules described above. It is possible that the IRS could assert that a Security that is issued before such date could be deemed to be reissued for tax purposes after 1 January 2025 upon (a) a rebalancing or adjustment of the asset, position, index or basket that is referenced by the Security or (b) a substitution of the issuer of a Security. In such a case, a Security that is originally issued before 1 January 2025 and is not "delta-one" (and is thus originally not subject to Section 871(m)) could be subject to Section 871(m) after the deemed reissuance.

In addition, while Securities that are issued by GSI and GSW may be grandfathered from FATCA if issued before the applicable grandfather date (as described above under "*Securities Issued by GSI and GSW Foreign Account Tax Compliance Withholding*"), any payments on the Securities that are subject to the Section 871(m) withholding tax may also be subject to FATCA withholding if an investor or intermediary does not comply with the applicable FATCA certification and identification requirements.

The application of Section 871(m) to the Securities is complex, and there may be uncertainties regarding the application of Section 871(m) to the Securities. If you are a United States alien holder, you should consult your tax advisor about the application of Section 871(m) to your Securities.

Information Reporting and Backup Withholding

In general, payments of principal, premium (if any) or interest, including original issue discount, made by GSFCI and other U.S. payers on Securities that are issued by GSFCI will generally be subject to backup withholding or information reporting unless the certification requirements described above under "*Securities Issued by GSFCI – Securities that are Classified as Debt for Tax Purposes*" are satisfied or you otherwise establish an exemption. GSFCI and other U.S. payers, however, are required to report payments of interest on Securities that are issued by GSFCI on IRS Form 1042-S, even if the payments are not otherwise subject to information reporting requirements.

In addition, payment of the proceeds from the sale of Securities effected at a United States office of a broker will not be subject to backup withholding and information reporting provided that:

- (1) the broker does not have actual knowledge or reason to know that you are a United States person and you have furnished to the broker:
 - (a) an appropriate IRS Form W-8 or an acceptable substitute form certifying, under penalties of perjury, that you are not a United States person; or
 - (b) other documentation upon which the broker may rely to treat the payment as made to a person who is not a United States person in accordance with United States Treasury regulations; or
- (2) you otherwise establish an exemption.

If you fail to establish an exemption and the broker does not possess adequate documentation of your status as a person who is not a United States person, the payments may be subject to information reporting and backup withholding. However, backup withholding will not apply with respect to payments made to an offshore account maintained by you unless the broker has actual knowledge that you are a United States person.

In general, payment of the proceeds from the sale of Securities effected at a foreign office of a broker will not be subject to information reporting or backup withholding. However, a sale effected at a foreign office of a broker will be subject to information reporting and backup withholding if:

- (1) the proceeds are transferred to an account maintained by you in the United States;
- (2) the payment of proceeds or the confirmation of the sale is mailed to you at a United States address; or

- (3) the sale has some other specified connection with the United States as provided in United States Treasury regulations;

unless the broker does not have actual knowledge or reason to know that you are a United States person and the documentation requirements described above (relating to a sale of Securities effected at a United States office of a broker) are met or you otherwise establish an exemption.

In addition, payment of the proceeds from the sale of Securities effected at a foreign office of a broker will be subject to information reporting, but not backup withholding, if the broker is:

- (1) a United States person;
- (2) a controlled foreign corporation for United States tax purposes;
- (3) a foreign person 50 per cent. or more of whose gross income is effectively connected with the conduct of a United States trade or business for a specified three-year period; or
- (4) a foreign partnership, if at any time during its tax year:
 - (a) one or more of its partners are "U.S. persons", as defined in United States Treasury regulations, who in the aggregate hold more than 50 per cent. of the income or capital interest in the partnership; or
 - (b) such foreign partnership is engaged in the conduct of a United States trade or business;

unless the broker does not have actual knowledge or reason to know that you are a United States person and the documentation requirements described above (relating to a sale of Securities effected at a United States office of a broker) are met or you otherwise establish an exemption.

SELLING RESTRICTIONS

Save for the approval of this Base Prospectus as a Base Prospectus for the purpose of Article 8 of the EU Prospectus Regulation by the CSSF, and the notification of such approval to the competent authorities of Austria, Belgium, Croatia, Czech Republic, Finland, France, Germany, Greece, Hungary, Ireland, Italy, The Netherlands, Norway, Poland, Portugal, Romania, Slovak Republic, Slovenia, Spain and Sweden no action has been or will be taken by the Issuers or the Guarantors that would permit a public offering of the Securities or possession or distribution of any offering material in relation to the Securities in any jurisdiction where action for that purpose is required. No offers or sales of any Securities, or distribution of any offering material relating to the Securities, may be made in or from any jurisdiction except in circumstances which will result in compliance with any applicable laws and regulations and will not impose any obligation on the Issuers or the Guarantors.

The United States

None of the Securities, the relevant Guarantee in respect of the Issuers' obligations in relation to the Securities or any securities to be delivered upon exercise or settlement of the Securities have been or will be registered under the Securities Act or any state securities laws and neither the Securities nor the relevant Guarantee may be offered; sold within the United States or to, or for the account or benefit of, U.S. persons except in transactions exempt from, or not subject to, the registration requirements of the Securities Act. Notwithstanding the foregoing, Securities issued by GSFCI may not be offered; sold within the United States or to, or for the account or benefit of, U.S. persons at any time. Each Dealer is required to agree that it will not offer or sell the Securities, as part of their distribution at any time or otherwise until 40 days after the completion of the distribution of the Series of which such Securities are a part, as determined and certified to the relevant Issuer by the Dealer (or, in the case of a Series of Securities sold to or through more than one Dealer, by each of such Dealers as to Securities of such Series purchased by or through it, in which case such Issuer shall notify each such Dealer when all such Dealers have so certified), within the United States or to, or for the account or benefit of, U.S. persons. Accordingly, each Dealer is required to represent and agree that it, its affiliates and any person acting on its or their behalf have not engaged, and will not engage, in any directed selling efforts with respect to the Securities and it and they have complied, and will comply, with the "offering restrictions" requirements under Regulation S and it will have sent to each Dealer to which it sells Securities during the distribution compliance period a confirmation or other notice setting forth the restrictions on offers and sales of the Securities in the United States or to, or for the account or benefit of, U.S. persons.

If the Final Terms relating to an Instrument expressly provide for an offering of the Instrument by GSI only in reliance on the Private Placement Exemption, the Dealer may arrange for the initial offer and sale of a portion of the Instruments within the United States exclusively to persons reasonably believed to be QIBs. Each purchaser of Instruments offered within the United States is hereby notified that the offer and sale of such Instruments to it is made in reliance upon such exemption and that such Instruments are not transferrable except as provided under "Transfer Restrictions" below. Instruments issued by GSW will not be sold to QIBs in reliance on the Private Placement Exemption.

Securities issued by GSI or GSW relating to commodities and commodities futures (within the meaning of the Commodity Exchange Act and the rules and regulations of the CFTC thereunder), or securities issuable upon exercise of certain the Securities, may not be offered, sold or resold in or into the United States without an applicable exemption under the Commodity Exchange Act. Unless otherwise stated in the relevant Final Terms, such Securities may not be offered, sold or resold in the United States and GSI or GSW, as applicable, and the Guarantor reserve the right not to make payment or delivery in respect of such a Security to a person in the United States if such payment or delivery would constitute a violation of U.S. law. Securities issued by GSFCI relating to commodities and commodities futures (within the meaning of the Commodity Exchange Act and the rules and regulations of the CFTC thereunder), or securities issuable upon exercise of certain of the Securities, may not be offered, sold or resold in or into the United States at any time. Such Securities may not be offered, sold or resold in the United States and GSFCI and GSG, in its capacity as Guarantor, reserve the right not to make payment or delivery in respect of such a Security to a person in the United States.

In addition, an offer or sale of Securities within the United States by a dealer (whether or not participating in the offering) may violate the registration requirements of the Securities Act if such offer or sale is otherwise than in accordance with Rule 144A.

Hedging transactions involving Instruments may not be conducted other than in compliance within the Securities Act.

As used herein, "**United States**" means the United States of America, its territories or possessions, any state of the United States, the District of Columbia or any other enclave of the United States government, its agencies or instrumentalities, and "**U.S. person**" means any person who is a U.S. person as defined in Regulation S under the Securities Act.

In addition, unless otherwise specified in the Final Terms relating to a Security, by its purchase of the Securities, the purchaser (or transferee) and each person directing such purchase (or transfer) on behalf of such holder will represent, or will be deemed to have represented and warranted, on each day from the date on which the purchaser (or transferee) acquires the Securities through and including the date on which the purchaser (or transferee) disposes of its interest in the Securities, that the funds that the purchaser (or transferee) is using to acquire the Securities are not the assets of an "employee benefit plan" (as defined in Section 3(3) of Title I of the Employee Retirement Income Security Act of 1974, as amended ("**ERISA**")) that is subject to the fiduciary responsibility provisions of ERISA, a "plan" that is subject to Section 4975 of the Internal Revenue Code of 1986, as amended (the "**Code**"), any entity whose underlying assets include "plan assets" by reason of any such employee plan's or plan's investment in the entity, or a governmental, church, non-U.S. or other plan that is subject to any law or regulation that is substantially similar to the provisions of Section 406 of ERISA or Section 4975 of the Code.

Transfer Restrictions

Instruments offered and sold outside the United States to persons who are not U.S. persons in accordance with Regulation S under the Securities Act will be issued in the form of a Regulation S Global Instrument, and Instruments offered and sold to QIBs in reliance on the Private Placement Exemption will be issued in the form of a Rule 144A Global Instrument. In addition, GSI may from time to time issue Warrants that will be represented by a Regulation S/Rule 144A Global Warrant which can be (a) offered and sold to QIBs in reliance on the Private Placement Exemption and (b) offered and sold to investors who are located outside the United States and are not U.S. persons as defined in Regulation S (each, a "**Regulation S/Rule 144A Warrant**"). Notes will be issued in the forms described under "Forms of the Notes".

Each purchaser of any Instrument, or interest therein, offered and sold by GSI only in reliance on the Private Placement Exemption will be deemed to have represented, acknowledged and agreed as follows (terms used in this paragraph that are not defined herein will have the meaning given to them in Rule 144A or in Regulation S, as the case may be, and references to any Instrument shall include interests beneficially held in such Instrument):

- (a) the purchaser (i) is a QIB, (ii) is aware that the sale to it is being made in reliance on the Private Placement Exemption and (iii) is acquiring Instruments for its own account or for the account of a QIB;
- (b) the purchaser understands that such Instrument is being offered only in reliance on the Private Placement Exemption, such Instrument has not been and will not be registered under the Securities Act or any other applicable securities law and may not be offered, sold or otherwise transferred unless registered pursuant to or exempt from, or not subject to, registration under the Securities Act or any other applicable securities law; and that if in the future the purchaser decides to offer, resell, pledge or otherwise transfer such Instrument, such Instrument may be offered, sold, pledged or otherwise transferred only in a transaction exempt from, or not subject to, registration under the Securities Act and only (A) to GSI or an affiliate thereof, but only if it agrees to purchase the Instruments from the purchaser, and the purchaser understands that although GSI or an affiliate thereof may repurchase the Instrument, they are not obliged to do so, and therefore the purchaser should be prepared to hold such Instrument until maturity, or (B) to a person which the seller reasonably believes is a QIB in a transaction meeting the requirements of Rule 144A;
- (c) by its purchase of such Instrument, on each day from the date on which the purchaser acquires such Instrument through and including the date on which the purchaser disposes of its interest in such Instrument, the funds that the purchaser is using to acquire Instruments are not the assets of an "employee benefit plan" (as defined in Section 3(3) of Title I of ERISA) that is subject to

the fiduciary responsibility provisions of ERISA, a "plan" that is subject to Section 4975 of the Code, any entity whose underlying assets include "plan assets" by reason of any such employee plan's or plan's investment in the entity, or a governmental, church, non-U.S. or other plan that is subject to any law or regulation that is substantially similar to the provisions of Section 406 of ERISA or Section 4975 of the Code;

- (d) the purchaser acknowledges that the relevant Issuer, the dealer(s), their affiliates and others will rely upon the truth and accuracy of the foregoing representations and agreements; and
- (e) the purchaser understands that such Instrument will bear legends substantially in the form set forth in capital letters below.

Each Instrument offered by GSI only and sold in reliance on the Private Placement Exemption (other than a Regulation S/Rule 144A Warrant) will bear legends to the following effect, in addition to such other legends as may be necessary or appropriate, unless GSI determines otherwise in compliance with applicable law:

"THE [WARRANTS/CERTIFICATES] EVIDENCED HEREBY[, THE GUARANTEE IN RESPECT THEREOF] AND ANY SECURITIES TO BE DELIVERED UPON EXERCISE OR SETTLEMENT OF THE [WARRANTS/CERTIFICATES] HAVE NOT BEEN AND WILL NOT BE REGISTERED UNDER THE UNITED STATES SECURITIES ACT OF 1933, AS AMENDED (THE "**SECURITIES ACT**") AND MAY NOT BE OFFERED, SOLD, PLEDGED OR OTHERWISE TRANSFERRED EXCEPT PURSUANT TO AN AVAILABLE EXEMPTION FROM, OR IN A TRANSACTION NOT SUBJECT TO, THE REGISTRATION REQUIREMENTS OF THE SECURITIES ACT AND IN ACCORDANCE WITH ALL APPLICABLE SECURITIES LAWS OF THE STATES OF THE UNITED STATES OR ANY OTHER JURISDICTION. IN ADDITION, THE [WARRANTS/CERTIFICATES] ARE SUBJECT TO TRANSFER RESTRICTIONS SET FORTH IN A LETTER AGREEMENT MADE BETWEEN THE PURCHASER AND GOLDMAN SACHS INTERNATIONAL (THE "**LETTER AGREEMENT**"), A COPY OF WHICH IS AVAILABLE FROM GOLDMAN SACHS INTERNATIONAL. BY ITS ACCEPTANCE OF A [WARRANT/CERTIFICATE], THE PURCHASER (A) REPRESENTS THAT IT IS A QUALIFIED INSTITUTIONAL BUYER (AS DEFINED IN RULE 144A UNDER THE SECURITIES ACT ("**RULE 144A**")) (A "**QIB**") ACTING FOR ITS ACCOUNT OR FOR THE ACCOUNT OF A QIB AND (B) AGREES THAT THE [WARRANTS/CERTIFICATES] MAY NOT BE TRANSFERRED EXCEPT (I) TO GOLDMAN SACHS INTERNATIONAL OR AN AFFILIATE THEREOF, BUT ONLY IF GOLDMAN SACHS INTERNATIONAL OR SUCH AFFILIATE AGREES TO PURCHASE THE [WARRANTS/CERTIFICATES] FROM SUCH PURCHASER, OR (II) TO A QIB IN A TRANSACTION MEETING THE REQUIREMENTS OF RULE 144A, BUT ONLY IF THE TRANSFEREE FIRST HAS BEEN APPROVED IN WRITING BY GOLDMAN SACHS INTERNATIONAL AND HAS SIGNED A LETTER AGREEMENT SUBSTANTIALLY IN THE FORM OF THE LETTER AGREEMENT; PROVIDED THAT IN LIEU OF GIVING SUCH APPROVAL, GOLDMAN SACHS INTERNATIONAL OR ANY AFFILIATE THEREOF MAY PURCHASE THE [WARRANTS/CERTIFICATES] IF IT SO CHOOSES ON THE SAME TERMS AS THOSE AGREED BY SUCH QIB. ANY TRANSFERS OF THE [WARRANTS/CERTIFICATES] IN VIOLATION OF SUCH AGREEMENT SHALL BE VOID. THIS [WARRANT/CERTIFICATE] MAY ONLY BE EXERCISED BY A QIB. HEDGING TRANSACTIONS INVOLVING THIS [WARRANT/CERTIFICATE] MAY NOT BE CONDUCTED OTHER THAN IN COMPLIANCE WITH THE SECURITIES ACT OR THE UNITED STATES COMMODITY EXCHANGE ACT OF 1936, AS AMENDED (THE "**COMMODITY EXCHANGE ACT**"), AS APPLICABLE.

BY ITS PURCHASE OF THE [WARRANTS/CERTIFICATES], THE PURCHASER (OR TRANSFEREE) AND EACH PERSON DIRECTING SUCH PURCHASE (OR TRANSFER) ON BEHALF OF SUCH HOLDER WILL REPRESENT, OR WILL BE DEEMED TO HAVE REPRESENTED AND WARRANTED, ON EACH DAY FROM THE DATE ON WHICH THE PURCHASER (OR TRANSFEREE) ACQUIRES THE [WARRANTS/CERTIFICATES] THROUGH AND INCLUDING THE DATE ON WHICH THE PURCHASER (OR TRANSFEREE) DISPOSES OF ITS INTEREST IN THE [WARRANTS/CERTIFICATES], THAT THE FUNDS THAT THE PURCHASER (OR TRANSFEREE) IS USING TO ACQUIRE THE [WARRANTS/CERTIFICATES] ARE NOT THE ASSETS OF AN EMPLOYEE BENEFIT PLAN (AS DEFINED IN SECTION 3(3) OF TITLE I OF THE EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974, AS AMENDED ("**ERISA**")) THAT IS SUBJECT TO THE FIDUCIARY RESPONSIBILITY PROVISIONS OF

ERISA, A PLAN THAT IS SUBJECT TO SECTION 4975 OF THE INTERNAL REVENUE CODE OF 1986, AS AMENDED (THE "**CODE**"), ANY ENTITY WHOSE UNDERLYING ASSETS INCLUDE "PLAN ASSETS" BY REASON OF ANY SUCH EMPLOYEE BENEFIT PLAN'S OR PLAN'S INVESTMENT IN THE ENTITY, OR A GOVERNMENTAL, CHURCH, NON-U.S. OR OTHER PLAN THAT IS SUBJECT TO ANY LAW OR REGULATION THAT IS SUBSTANTIALLY SIMILAR TO THE PROVISIONS OF SECTION 406 OF ERISA OR SECTION 4975 OF THE CODE."

Each purchaser of any Security, or interest therein, offered and sold in reliance on Regulation S will be deemed to have represented and agreed as follows (terms used in this paragraph that are defined in Regulation S are used herein as defined therein):

- (a) the purchaser (i) is, and the person, if any, for whose account it is acquiring such Security is, outside the United States and is not a U.S. person, and (ii) is acquiring the offered Securities in an offshore transaction meeting the requirements of Regulation S;
- (b) the purchaser is aware that the Securities have not been and will not be registered under the Securities Act and that the Securities are being distributed and offered outside the United States in reliance on Regulation S;
- (c) by its purchase of the Securities, on each day from the date on which the purchaser acquires the Securities through and including the date on which the purchaser disposes of its interest in the Securities, the funds that the purchaser is using to acquire the Securities are not the assets of an "employee benefit plan" (as defined in Section 3(3) of Title I of ERISA) that is subject to the fiduciary responsibility provisions of ERISA, a "plan" that is subject to Section 4975 of the Code, any entity whose underlying assets include "plan assets" by reason of any such employee plan's or plan's investment in the entity, or a governmental, church, non-U.S. or other plan that is subject to any law or regulation that is substantially similar to the provisions of Section 406 of ERISA or Section 4975 of the Code;
- (d) the purchaser acknowledges that the relevant Issuer, the dealer(s), their affiliates and others will rely upon the truth and accuracy of the foregoing representations and agreements; and
- (e) the purchaser understands that such Instrument will bear legends substantially in the form set forth in capital letters below.

Each Security offered and sold in reliance on Regulation S (other than a Security issued by GSFCI or a Regulation S/Rule 144A Warrant) will bear legends to the following effect, in addition to such other legends as may be necessary or appropriate, unless the relevant Issuer determines otherwise in compliance with applicable law:

"THE SECURITIES EVIDENCED HEREBY[, THE GUARANTEE IN RESPECT THEREOF] AND ANY SECURITIES TO BE DELIVERED UPON EXERCISE OR SETTLEMENT OF THE SECURITIES HAVE NOT BEEN AND WILL NOT BE REGISTERED UNDER THE UNITED STATES SECURITIES ACT OF 1933, AS AMENDED (THE "**SECURITIES ACT**") AND MAY NOT BE OFFERED, SOLD, PLEDGED OR OTHERWISE TRANSFERRED IN THE UNITED STATES OR TO U.S. PERSONS (AS THOSE TERMS ARE DEFINED IN REGULATION S UNDER THE SECURITIES ACT) EXCEPT PURSUANT TO AN AVAILABLE EXEMPTION FROM, OR IN A TRANSACTION NOT SUBJECT TO, THE REGISTRATION REQUIREMENTS OF THE SECURITIES ACT AND IN ACCORDANCE WITH ALL APPLICABLE SECURITIES LAWS OF THE STATES OF THE UNITED STATES OR ANY OTHER JURISDICTION.

SECURITIES RELATING TO COMMODITIES AND COMMODITIES FUTURES (WITHIN THE MEANING OF THE UNITED STATES COMMODITY EXCHANGE ACT OF 1936, AS AMENDED (THE "**COMMODITY EXCHANGE ACT**") AND THE RULES AND REGULATIONS OF THE UNITED STATES COMMODITY FUTURES TRADING COMMISSION THEREUNDER), OR SECURITIES ISSUABLE UPON EXERCISE OF CERTAIN OF THE SECURITIES, MAY NOT BE OFFERED, SOLD OR RESOLD IN OR INTO THE UNITED STATES WITHOUT AN APPLICABLE EXEMPTION UNDER THE COMMODITY EXCHANGE ACT. THE ISSUER [AND THE GUARANTOR] RESERVE[S] THE RIGHT NOT TO MAKE PAYMENT OR DELIVERY IN RESPECT OF SUCH A SECURITY TO A PERSON IN THE UNITED STATES IF SUCH PAYMENT OR DELIVERY WOULD CONSTITUTE A VIOLATION OF U.S. LAW.

BY ITS PURCHASE OF THE SECURITIES, THE PURCHASER (OR TRANSFEREE) AND EACH PERSON DIRECTING SUCH PURCHASE (OR TRANSFER) ON BEHALF OF SUCH HOLDER WILL REPRESENT, OR WILL BE DEEMED TO HAVE REPRESENTED AND WARRANTED, ON EACH DAY FROM THE DATE ON WHICH THE PURCHASER (OR TRANSFEREE) ACQUIRES THE SECURITIES THROUGH AND INCLUDING THE DATE ON WHICH THE PURCHASER (OR TRANSFEREE) DISPOSES OF ITS INTEREST IN THE SECURITIES, THAT THE FUNDS THAT THE PURCHASER (OR TRANSFEREE) IS USING TO ACQUIRE THE SECURITIES ARE NOT THE ASSETS OF AN EMPLOYEE BENEFIT PLAN (AS DEFINED IN SECTION 3(3) OF TITLE I OF THE EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974, AS AMENDED ("**ERISA**")) THAT IS SUBJECT TO THE FIDUCIARY RESPONSIBILITY PROVISIONS OF ERISA, A PLAN THAT IS SUBJECT TO SECTION 4975 OF THE INTERNAL REVENUE CODE OF 1986, AS AMENDED (THE "**CODE**"), ANY ENTITY WHOSE UNDERLYING ASSETS INCLUDE "PLAN ASSETS" BY REASON OF ANY SUCH EMPLOYEE BENEFIT PLAN'S OR PLAN'S INVESTMENT IN THE ENTITY, OR A GOVERNMENTAL, CHURCH, NON-U.S. OR OTHER PLAN THAT IS SUBJECT TO ANY LAW OR REGULATION THAT IS SUBSTANTIALLY SIMILAR TO THE PROVISIONS OF SECTION 406 OF ERISA OR SECTION 4975 OF THE CODE."

GSFCI will not issue Regulation S/Rule 144A Warrants. Each Security issued by GSFCI will be offered and sold in reliance on Regulation S and will bear legends to the following effect, in addition to such other legends as may be necessary or appropriate, unless GSFCI determines otherwise in compliance with applicable law:

"THE SECURITIES EVIDENCED HEREBY, THE GUARANTEE IN RESPECT THEREOF AND ANY SECURITIES TO BE DELIVERED UPON EXERCISE OR SETTLEMENT OF THE SECURITIES HAVE NOT BEEN AND WILL NOT BE REGISTERED UNDER THE UNITED STATES SECURITIES ACT OF 1933, AS AMENDED (THE "**SECURITIES ACT**") AND MAY NOT BE OFFERED, SOLD, PLEDGED OR OTHERWISE TRANSFERRED IN THE UNITED STATES OR TO U.S. PERSONS (AS THOSE TERMS ARE DEFINED IN REGULATION S UNDER THE SECURITIES ACT).

SECURITIES RELATING TO COMMODITIES AND COMMODITIES FUTURES (WITHIN THE MEANING OF THE UNITED STATES COMMODITY EXCHANGE ACT OF 1936, AS AMENDED (THE "**COMMODITY EXCHANGE ACT**") AND THE RULES AND REGULATIONS OF THE UNITED STATES COMMODITY FUTURES TRADING COMMISSION THEREUNDER), OR SECURITIES ISSUABLE UPON EXERCISE OF CERTAIN OF THE SECURITIES, MAY NOT BE OFFERED, SOLD OR RESOLD IN OR INTO THE UNITED STATES. THE ISSUER AND THE GUARANTOR RESERVE THE RIGHT NOT TO MAKE PAYMENT OR DELIVERY IN RESPECT OF ANY SECURITY TO A PERSON IN THE UNITED STATES IF SUCH PAYMENT OR DELIVERY WOULD CONSTITUTE A VIOLATION OF U.S. LAW.

BY ITS PURCHASE OF THE SECURITIES, THE PURCHASER (OR TRANSFEREE) AND EACH PERSON DIRECTING SUCH PURCHASE (OR TRANSFER) ON BEHALF OF SUCH HOLDER WILL REPRESENT, OR WILL BE DEEMED TO HAVE REPRESENTED AND WARRANTED, ON EACH DAY FROM THE DATE ON WHICH THE PURCHASER (OR TRANSFEREE) ACQUIRES THE SECURITIES THROUGH AND INCLUDING THE DATE ON WHICH THE PURCHASER (OR TRANSFEREE) DISPOSES OF ITS INTEREST IN THE SECURITIES, THAT THE FUNDS THAT THE PURCHASER (OR TRANSFEREE) IS USING TO ACQUIRE THE SECURITIES ARE NOT THE ASSETS OF AN EMPLOYEE BENEFIT PLAN (AS DEFINED IN SECTION 3(3) OF TITLE I OF THE EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974, AS AMENDED ("**ERISA**")) THAT IS SUBJECT TO THE FIDUCIARY RESPONSIBILITY PROVISIONS OF ERISA, A PLAN THAT IS SUBJECT TO SECTION 4975 OF THE INTERNAL REVENUE CODE OF 1986, AS AMENDED (THE "**CODE**"), ANY ENTITY WHOSE UNDERLYING ASSETS INCLUDE "PLAN ASSETS" BY REASON OF ANY SUCH EMPLOYEE BENEFIT PLAN'S OR PLAN'S INVESTMENT IN THE ENTITY, OR A GOVERNMENTAL, CHURCH, NON-U.S. OR OTHER PLAN THAT IS SUBJECT TO ANY LAW OR REGULATION THAT IS SUBSTANTIALLY SIMILAR TO THE PROVISIONS OF SECTION 406 OF ERISA OR SECTION 4975 OF THE CODE."

Each Warrant offered and sold by GSI only in reliance on Regulation S or the Private Placement Exemption, or both, that is represented by a Regulation S/Rule 144A Global Warrant will bear legends to the following effect, in addition to such other legends as may be necessary or appropriate, unless GSI determines otherwise in compliance with applicable law:

"THE REGULATION S/RULE 144A WARRANTS EVIDENCED HEREBY[, THE GUARANTEE IN RESPECT THEREOF] AND ANY SECURITIES TO BE DELIVERED UPON EXERCISE OR SETTLEMENT OF THE REGULATION S/RULE 144A WARRANTS HAVE NOT BEEN AND WILL NOT BE REGISTERED UNDER THE UNITED STATES SECURITIES ACT OF 1933, AS AMENDED (THE "**SECURITIES ACT**"), AND MAY NOT BE OFFERED, SOLD, PLEDGED OR OTHERWISE TRANSFERRED IN THE UNITED STATES OR TO U.S. PERSONS (AS THOSE TERMS ARE DEFINED IN REGULATION S UNDER THE SECURITIES ACT), EXCEPT PURSUANT TO AN AVAILABLE EXEMPTION FROM, OR IN A TRANSACTION NOT SUBJECT TO, THE REGISTRATION REQUIREMENTS OF THE SECURITIES ACT AND IN ACCORDANCE WITH ALL APPLICABLE SECURITIES LAWS OF THE STATES OF THE UNITED STATES OR ANY OTHER JURISDICTION. IN ADDITION, THE REGULATION S/RULE 144A WARRANTS THAT HAVE BEEN PLACED WITH QUALIFIED INSTITUTIONAL BUYERS ("**QIBs**") AS DEFINED IN RULE 144A UNDER THE SECURITIES ACT ("**RULE 144A**") ARE SUBJECT TO TRANSFER RESTRICTIONS SET FORTH IN A LETTER AGREEMENT MADE BETWEEN THE PURCHASER AND GOLDMAN SACHS INTERNATIONAL (THE "**LETTER AGREEMENT**"), A COPY OF WHICH IS AVAILABLE FROM GOLDMAN SACHS INTERNATIONAL. BY ITS ACCEPTANCE OF A REGULATION S/RULE 144A WARRANT, EACH SUCH QIB WHO ACQUIRES A REGULATION S/RULE 144A WARRANT UNDER RULE 144A (A) REPRESENTS THAT IT IS A QIB ACTING FOR ITS ACCOUNT OR FOR THE ACCOUNT OF A QIB AND (B) AGREES THAT THE REGULATION S/RULE 144A WARRANTS MAY NOT BE TRANSFERRED EXCEPT (I) TO GOLDMAN SACHS INTERNATIONAL OR AN AFFILIATE THEREOF, BUT ONLY IF GOLDMAN SACHS INTERNATIONAL OR SUCH AFFILIATE AGREES TO PURCHASE THE REGULATION S/RULE 144A WARRANTS FROM SUCH PURCHASER, OR (II) TO A QIB IN A TRANSACTION MEETING THE REQUIREMENTS OF RULE 144A, BUT ONLY IF THE TRANSFEREE FIRST HAS BEEN APPROVED IN WRITING BY GOLDMAN SACHS INTERNATIONAL AND HAS SIGNED A LETTER AGREEMENT SUBSTANTIALLY IN THE FORM OF THE LETTER AGREEMENT; PROVIDED THAT IN LIEU OF GIVING SUCH APPROVAL, GOLDMAN SACHS INTERNATIONAL OR ANY AFFILIATE THEREOF MAY PURCHASE THE REGULATION S/RULE 144A WARRANTS IF IT SO CHOOSES ON THE SAME TERMS AS THOSE AGREED BY SUCH QIB. ANY TRANSFERS OF THE REGULATION S/RULE 144A WARRANT IN VIOLATION OF SUCH LETTER AGREEMENT SHALL BE VOID. HEDGING TRANSACTIONS INVOLVING THIS REGULATION S/RULE 144A WARRANT MAY NOT BE CONDUCTED OTHER THAN IN COMPLIANCE WITH THE SECURITIES ACT OR THE UNITED STATES COMMODITY EXCHANGE ACT OF 1936, AS AMENDED (THE "**COMMODITY EXCHANGE ACT**"), AS APPLICABLE.

REGULATION S/RULE 144A WARRANTS RELATING TO COMMODITIES AND COMMODITIES FUTURES (WITHIN THE MEANING OF THE COMMODITY EXCHANGE ACT AND THE RULES AND REGULATIONS OF THE UNITED STATES COMMODITY FUTURES TRADING COMMISSION THEREUNDER), OR SECURITIES ISSUABLE UPON EXERCISE OF CERTAIN OF THE REGULATION S/RULE 144A WARRANTS, MAY NOT BE OFFERED, SOLD OR RESOLD IN OR INTO THE UNITED STATES WITHOUT AN APPLICABLE EXEMPTION UNDER THE COMMODITY EXCHANGE ACT. THE ISSUER AND THE GUARANTOR RESERVE THE RIGHT NOT TO MAKE PAYMENT OR DELIVERY IN RESPECT OF SUCH A REGULATION S/RULE 144A WARRANT TO A PERSON IN THE UNITED STATES IF SUCH PAYMENT OR DELIVERY WOULD CONSTITUTE A VIOLATION OF U.S. LAW.

BY ITS PURCHASE OF THE REGULATION S/RULE 144A WARRANTS, THE PURCHASER (OR TRANSFEREE) AND EACH PERSON DIRECTING SUCH PURCHASE (OR TRANSFER) ON BEHALF OF SUCH HOLDER WILL REPRESENT, OR WILL BE DEEMED TO HAVE REPRESENTED AND WARRANTED, ON EACH DAY FROM THE DATE ON WHICH THE PURCHASER (OR TRANSFEREE) ACQUIRES THE REGULATION S/RULE 144A WARRANTS THROUGH AND INCLUDING THE DATE ON WHICH THE PURCHASER (OR TRANSFEREE) DISPOSES OF ITS INTEREST IN THE REGULATION S/RULE 144A WARRANTS, THAT THE FUNDS THAT THE PURCHASER (OR TRANSFEREE) IS USING TO ACQUIRE THE REGULATION S/RULE 144A WARRANTS ARE NOT THE ASSETS OF AN EMPLOYEE BENEFIT PLAN (AS DEFINED IN SECTION 3(3) OF TITLE I OF THE EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974, AS AMENDED ("**ERISA**")) THAT IS SUBJECT TO THE FIDUCIARY RESPONSIBILITY PROVISIONS OF ERISA, A PLAN THAT IS SUBJECT TO SECTION 4975 OF THE INTERNAL REVENUE CODE OF 1986, AS AMENDED (THE "**CODE**"),

ANY ENTITY WHOSE UNDERLYING ASSETS INCLUDE "PLAN ASSETS" BY REASON OF ANY SUCH EMPLOYEE BENEFIT PLAN'S OR PLAN'S INVESTMENT IN THE ENTITY, OR A GOVERNMENTAL, CHURCH, NON-U.S. OR OTHER PLAN THAT IS SUBJECT TO ANY LAW OR REGULATION THAT IS SUBSTANTIALLY SIMILAR TO THE PROVISIONS OF SECTION 406 OF ERISA OR SECTION 4975 OF THE CODE."

Interests in any Regulation S/Rule 144A Warrant that are purchased by QIBs in reliance on the Private Placement Exemption will initially constitute "restricted securities" under Rule 144 under the Securities Act and will in any event be subject, for the life of such Warrants, to the Rule 144A transfer restrictions described herein. However, the Regulation S/Rule 144A Global Warrants will be assigned a single ISIN that will not indicate the restricted status of interests in such Warrant that have been placed with QIBs in reliance on the Private Placement Exemption. Holders of interests in a Regulation S/Rule 144A Global Warrant that have acquired those interests in reliance on the Private Placement Exemption or Rule 144A will need to use mechanisms and procedures that do not rely on the ISIN assigned to such Warrant to ensure that they act in accordance with the transfer restrictions applicable to such Warrant.

Prohibition of Sales to EEA Retail Investors

Unless the Issue Terms in respect of any Securities specifies the "Prohibition of Sales to EEA Retail Investors" as "Not Applicable", the relevant Securities may not be offered, sold or otherwise made available to any retail investor in the European Economic Area. For the purposes of this provision:

- (a) the expression "retail investor" means a person who is one (or more) of the following:
 - (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, "**MiFID II**"); or
 - (ii) a customer within the meaning of Directive (EU) 2016/97, where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of the MiFID II; or
 - (iii) not a qualified investor as defined in the EU Prospectus Regulation; and
- (b) the expression an "offer" includes the communication in any form and by any means of sufficient information on the terms of the offer and the Securities to be offered so as to enable an investor to decide to purchase or subscribe for the Securities.

Prohibition of Sales to UK Retail Investors

Unless the Issue Terms in respect of any Securities specifies the "Prohibition of Sales to UK Retail Investors" as "Not Applicable", the relevant Securities may not be offered, sold or otherwise made available to any retail investor in the United Kingdom. For the purposes of this provision:

- (a) the expression "retail investor" means a person who is one (or more) of the following:
 - (i) a retail client, as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of UK domestic law by virtue of the European Union (Withdrawal) Act 2018 of the United Kingdom (as amended, the "**EUWA**"); or
 - (ii) a customer within the meaning of the provisions of the Financial Services and Markets Act 2000 of the United Kingdom (as amended, the "**FSMA**") and any rules or regulations made under the FSMA to implement Directive (EU) 2016/97, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of UK domestic law by virtue of the EUWA; or
 - (iii) not a qualified investor as defined in Article 2 of the UK Prospectus Regulation; and
- (b) the expression an "offer" includes the communication in any form and by any means of sufficient information on the terms of the offer and the Securities to be offered so as to enable an investor to decide to purchase or subscribe for the Securities."

Public Offer Selling Restrictions under the EU Prospectus Regulation

In relation to each member state of the European Economic Area, if the Issue Terms in respect of any Securities specifies the "Prohibition of Sales to EEA Retail Investors" as "Not Applicable", an offer of those Securities may not be made to the public in that Member State except that an offer of such Securities may be made to the public in that Member State:

- (a) if the final terms or drawdown prospectus in relation to the Securities specifies that an offer of those Securities may be made other than pursuant to Article 1(4) of the EU Prospectus Regulation in that Member State (a "**Non-exempt Offer**"), following the date of publication of a prospectus in relation to such Securities which has been approved by the competent authority in that Member State or, where appropriate, approved in another Member State and notified to the competent authority in that Member State, provided that any such prospectus, if not a drawdown prospectus, has subsequently been completed by the final terms contemplating such Non-exempt Offer, in accordance with the EU Prospectus Regulation, in the period beginning and ending on the dates specified in the drawdown prospectus or final terms, as applicable and the Issuer has consented in writing to its use for the purpose of that Non-exempt Offer;
- (b) at any time to any legal entity which is a qualified investor as defined in the EU Prospectus Regulation;
- (c) at any time to fewer than 150 natural or legal persons (other than qualified investors as defined in the EU Prospectus Regulation), subject to obtaining the prior consent of the relevant Dealer or Dealers nominated by the Issuer for any such offer; or
- (d) at any time in any other circumstances falling within Article 1(4) of the EU Prospectus Regulation,

provided that no such offer of Securities referred to in (b) to (d) above shall require the Issuer or any Dealer of offeror to publish a prospectus pursuant to Article 3 of the EU Prospectus Regulation, or supplement a prospectus pursuant to Article 23 of the EU Prospectus Regulation. For the purposes of this provision, the expression "an offer of Securities to the public" in relation to any Securities in any Member State means the communication in any form and by any means of sufficient information on the terms of the offer and the Securities to be offered so as to enable an investor to decide to purchase or subscribe for the Securities, and the expression "**EU Prospectus Regulation**" means Regulation (EU) 2017/1129 (as amended).

Each Dealer has represented and agreed, and each further Dealer appointed under this Programme will be required to represent and agree that, in relation to any offering of Securities to which Directive 2014/65/EU on markets in financial instruments (as amended, "**MiFID II**") applies, that such offering is in accordance with the applicable rules set out in MiFID II (including any applicable national transposition of MiFID II), including that any commission, fee or non-monetary benefit received from the relevant Issuer complies with such rules.

Public Offer Selling Restrictions under the UK Prospectus Regulation

If the Issue Terms in respect of any Securities specifies "Prohibition of Sales to UK Retail Investors" as "Not Applicable", an offer of those Securities may not be made to the public in the United Kingdom except that it may make an offer of such Securities to the public in the United Kingdom:

- (a) if the final terms or drawdown prospectus in relation to the Securities specify that an offer of those Securities may be made other than pursuant to section 86 of the FSMA (a "**Non-exempt Offer**"), following the date of publication of a prospectus in relation to such Securities which has been approved by the Financial Conduct Authority in the period beginning and ending on the dates specified in such prospectus and the Issuer has consented in writing to its use for the purpose of that Non-exempt Offer;
- (b) at any time to any legal entity which is a qualified investor as defined in Article 2 of the UK Prospectus Regulation;
- (c) at any time to fewer than 150 natural or legal persons (other than qualified investors as defined in Article 2 of the UK Prospectus Regulation) in the United Kingdom subject to obtaining the prior consent of the relevant Dealer or Dealers nominated by the Issuer for any such offer; or

- (d) at any time in any other circumstances falling within section 86 of the FSMA,

provided that no such offer of Securities referred to in (a) to (c) above shall require the Issuer or any Dealer to publish a prospectus pursuant to section 85 of the FSMA or supplement a prospectus pursuant to Article 23 of the UK Prospectus Regulation.

For the purposes of this provision, the expression an "**offer of Securities to the public**" in relation to any Securities means the communication in any form and by any means of sufficient information on the terms of the offer and the Securities to be offered so as to enable an investor to decide to purchase or subscribe for the Securities and the expression "**UK Prospectus Regulation**" means Regulation (EU) 2017/1129 as it forms part of domestic law by virtue of the EUWA and regulations made thereunder.

Selling Restrictions Addressing Additional United Kingdom Securities Laws

Any offeror of Securities will be required to represent and agree that:

- (a) in relation to any Securities which have a maturity of less than one year, (i) it is a person whose ordinary activities involve it in acquiring, holding, managing or disposing of investments (as principal or agent) for the purposes of its business and (ii) it has not offered or sold and will not offer or sell any Securities other than to persons whose ordinary activities involve them in acquiring, holding, managing or disposing of investments (as principal or as agent) for the purposes of their businesses or who it is reasonable to expect will acquire, hold, manage or dispose of investments (as principal or agent) for the purposes of their businesses where the issue of the Securities would otherwise constitute a contravention of section 19 of the FSMA by the relevant Issuer;
- (b) it has only communicated or caused to be communicated and will only communicate or cause to be communicated an invitation or inducement to engage in investment activity (within the meaning of section 21 of the FSMA) received by it in connection with the issue or sale of any Securities in circumstances in which section 21(1) of the FSMA does not apply to the relevant Issuer or the Guarantor or, in the case of GSI, would not if it was not an authorised person, apply to GSI; and
- (c) it has complied and will comply with all applicable provisions of the FSMA and the Financial Conduct Authority Handbook with respect to anything done by it in relation to any Securities in, from or otherwise involving the United Kingdom.

Argentina

The offering of Securities has not been authorised by, and the Securities have not been registered with, the Argentine Securities Commission (*Comisión Nacional de Valores*, "**CNV**"). The CNV has not approved this Base Prospectus or any other document related to the offering of the Securities in Argentina. The Securities will not be offered or sold in Argentina except in transactions that may not constitute a public offering of securities within the meaning of Sections 2 and 83 of the Capital Markets Law No. 26,831, as amended.

Austria

In addition to the selling restrictions described in the sections headed "Prohibition of Sales to EEA Retail Investors" and "Public Offer Selling Restrictions under the EU Prospectus Regulation" above (in particular the restrictions/requirements stipulated by the EU Prospectus Regulation), the Securities may be offered in Austria only in compliance with the provisions of the Austrian Capital Market Act 2019 (*Kapitalmarktgesetz 2019*, Federal Law Gazette No 62/2019, as amended, the "**KMG 2019**") which may require the filing of a notification pursuant to section 24 of the KMG 2019 with the Austrian Control Bank (*Oesterreichische Kontrollbank Aktiengesellschaft*) as soon as possible, but in any event prior to the commencement of the relevant offer of the Securities.

In addition, any offer and sale of the Securities must be made in compliance with the provisions of the Austrian Securities Supervision Act 2018 (*Wertpapieraufsichtsgesetz 2018*, Federal Law Gazette No 107/2017, as amended) and all other applicable legislation and regulations in Austria.

The Bahamas

The Securities may not be offered or sold in or from within The Bahamas unless the offer or sale is made by a person appropriately licensed or registered to conduct securities business in or from within The Bahamas.

The Securities may not be offered or sold to persons or entities designated or deemed resident in The Bahamas pursuant to the Exchange Control Regulations, 1956 of The Bahamas unless the prior approval of the Central Bank of The Bahamas is obtained.

No offer or sale of the Securities may be made in The Bahamas unless a preliminary prospectus and a prospectus have been filed with the Securities Commission of The Bahamas and the Securities Commission of The Bahamas has issued a receipt for each document, unless such offering is exempted pursuant to the Securities Industry Act, 2011 and the Securities Industry Regulations, 2012. This Base Prospectus has not been registered with the Securities Commission of The Bahamas, nor have any applications been made to exempt such offer from the filing of a prospectus with the Securities Commission of The Bahamas under the Securities Industry Act, 2011.

Kingdom of Bahrain ("Bahrain")

This Base Prospectus has been prepared for private information purposes of intended investors only who fall within the definition of 'Accredited Investors' as defined by the Central Bank of Bahrain ("**CBB**") and set out below. Each Dealer represents and warrants that it has not made and it will not make any invitation to the public in or from Bahrain to subscribe to the Securities or to any potential investor in Bahrain. All marketing and offering is made and will be made outside Bahrain and this Base Prospectus will not be issued to, passed to, or made available to the public generally in Bahrain.

This Base Prospectus and the Securities have not been approved, licensed, registered or filed by and/or with (as applicable) the CBB, the Bahrain Bourse, the Ministry of Industry, Commerce and Tourism ("**MOICT**") or any other regulatory authority in Bahrain.

The CBB has not reviewed, nor has it approved this Base Prospectus or the marketing thereof in Bahrain. The CBB, the Bahrain Bourse and the MOICT takes no responsibility for the accuracy of the statements and information contained in this Base Prospectus or the performance of the Securities, nor shall they have any liability to any person, investor or otherwise for any loss or damage resulting from reliance on any statements or information contained herein. The Securities offered by way of private placement may only be offered in minimum subscriptions of USD100,000 (or equivalent in other currencies). The CBB is not and will not be responsible for the performance of the Securities.

For this purpose, an "Accredited Investor" means:

- (a) individuals who have a minimum net worth (or joint net worth with their spouse) of U.S.\$1,000,000 or more, excluding that person's principal place of residence;
- (b) companies, partnerships, trusts or other commercial undertakings which have financial assets available for investment of not less than U.S.\$1,000,000; or
- (c) governments, supranational organisations, central banks or other national monetary authorities, and state organisations whose main activity is to invest in financial instruments (such as state pension funds).

Belgium

For selling restrictions in respect of Belgium, please see "Public Offer Selling Restrictions Under The EU Prospectus Regulation" together with the other restrictions in this section "Belgium":

This Base Prospectus has not been submitted for approval to the Financial Services and Markets Authority. Accordingly, investments instruments (as defined in the law of 11 July 2018 on offerings to the public of investment instruments and the admission of investment instruments to trading on regulated markets, as amended or replaced from time to time (the "**Prospectus Law**")) that do not qualify as securities (as defined in the Prospectus Regulation), including Securities that have a maturity of less than 12 months and qualify as money market instruments, and that therefore fall outside the scope of the Prospectus Regulation, may not be distributed in Belgium by way of an offering to the public, as defined in and subject to the exemptions set out in the Prospectus Law.

Any offeror of Securities will be required to represent and agree that it will not offer for sale, sell or market Securities to any person qualifying as a consumer within the meaning of Article I.1.2 of the Belgian Code of Economic Law, as amended from time to time, unless such offer, sale or marketing is made in compliance with this Code and its implementing regulation.

Brazil

The Securities may not be offered or sold to the public in Brazil. Accordingly, the Securities have not been and will not be registered with the Brazilian Securities and Exchange Commission (*Comissão de Valores Mobiliários*), nor have they been submitted to the foregoing agency for approval. Documents relating to the Securities, as well as the information contained therein, may not be supplied to the public in Brazil, as the offering of Securities is not a public offering of securities in Brazil, nor used in connection with any offer for subscription or sale of securities to the public in Brazil. A seller of the Securities may be asked by the purchaser to comply with procedural requirements to evidence previous title to the Securities and may be subject to Brazilian tax on capital gains which may be withheld from the sale price. Persons wishing to offer or acquire the Securities within Brazil should consult with their own counsel as to the applicability of these registration requirements or any exemption therefrom.

British Virgin Islands ("BVI")

This Base Prospectus is not an offer to sell, or a solicitation or invitation to make offers to purchase or subscribe for, the Securities or any other securities or investment business services in the BVI. This Base Prospectus may not be sent or distributed to persons in the BVI and the Securities are not available to, and no invitation or offer to subscribe, purchase or otherwise acquire the Securities will be made to, persons in the BVI. However, the Securities may be offered and sold to business companies incorporated in the BVI and international limited partnerships formed in the BVI, provided that any such offering and sale is made outside the BVI or is otherwise permitted by BVI legislation.

Although not currently in force, it is possible that Part II of the Securities and Investment Business Act, 2010 of the BVI ("**SIBA**") will be brought into force and become law in the BVI in the near future. Upon Part II of SIBA coming into force, the Securities may not, and will not, be offered to the public or to any person in the BVI for purchase or subscription by or on behalf of the relevant Issuer. The Securities may continue to be offered to business companies incorporated in the BVI and international limited partnerships formed in the BVI, but only where the offer will be made to, and received by, the relevant company or limited partnership outside of the BVI. Once Part II of SIBA comes into force, the Securities may also be offered to persons located in the BVI who are "qualified investors" for the purposes of SIBA.

This Base Prospectus has not been reviewed or approved by, or registered with, the Financial Services Commission of the BVI and will not be so registered upon Part II of SIBA coming into force.

Bulgaria

For selling restrictions in respect of Bulgaria, please see "Public Offer Selling Restrictions under the EU Prospectus Regulation" and "Prohibition of Sales to EEA Retail Investors". In addition to the exemptions under Article 1(4) of the EU Prospectus Regulation, if the Issue Terms in respect of any Securities specifies the "Prohibition of Sales to EEA Retail Investors" as "Not Applicable", an offer of those Securities may be made to the public in Bulgaria if:

- (a) at any time the total consideration of each offer of Securities to the public is less than the monetary amount of EUR 3,000,000 calculated over a period of 12 months, where admission is requested to trading on a multilateral trading facility as defined in point (22) of Article 4(1) of Directive 2014/65/EU ("MTF"), or
- (b) at any time the total consideration of each offer of Securities to the public is less than the monetary amount of EUR 3,000,000 calculated over a period of 12 months, where admission to trading on a regulated market or an MTF is not requested, subject to the publication of a document for public offering. Local regulator (the Financial Supervision Commission) may require amendments to the document.

provided that no such offer of Securities referred to in (a) to (b) above shall require the Issuer or any Dealer of offeror to publish a prospectus pursuant to Article 3 of the EU Prospectus Regulation, or supplement a prospectus pursuant to Article 23 of the EU Prospectus Regulation.

Cayman Islands

Each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that it shall not offer and sell Securities from a place of business within the Cayman Islands (including an offering from an internet or other electronic service provider located in the Cayman Islands) or in a manner constituting the establishment of a place of business or the commencement of business in the Cayman Islands unless it is appropriately registered and licensed or otherwise permitted to undertake such an offer or sale under applicable laws (including, without limitation, the Securities Investment Business Law (2020 Revision) (as amended) of the Cayman Islands).

A Dealer may therefore offer and sell Securities to investors registered and incorporated in the Cayman Islands without restriction on such Dealer or the relevant Issuer if such Dealer and the relevant Issuer is, according to applicable Cayman Islands law, not located in the Cayman Islands (as a branch, an incorporated entity, a resident or otherwise) and does not have a place of business in and/or has not commenced the carrying on of business in the Cayman Islands.

No Securities may be sold by or on behalf of the relevant Issuer within the Cayman Islands if such sale would require the relevant Issuer to be registered as a foreign company under the Companies Law (2020 Revision) of the Cayman Islands.

None of the Securities shall be sold to or offered by way of subscription to any member of the public in the Cayman Islands whether directly or indirectly.

Chile

The Issuers and the Securities have not been, and will not be, registered with the Chilean Commission for the Financial Market (*Comisión para el Mercado Financiero*, "**CMF**") pursuant to Law No. 18.045 (*Ley de Mercado de Valores*, "**Securities Market Act**"), as amended, of the Republic of Chile and, accordingly, no person shall offer or sell the Securities within Chile or to, or for the account or benefit of, persons in Chile except in circumstances which have not resulted and will not result in a public offering and/or in the conduct of intermediation (*funciones de intermediación*) within the meaning of Chilean law.

The offer of any Securities pursuant to this Base Prospectus begins on the date of issuance of the relevant Final Terms. Any such offer of Securities complies with General Rule N°. 336 of the CMF. Since the Securities to which an offer relates have not been registered in the Foreign Securities Registry of the CMF, they are not subject to the supervision of such entity. As any offer of Securities pursuant to this Base Prospectus does not relate to registered securities, there is no obligation on the relevant Issuer of the Securities to deliver in Chile public information regarding the Securities. The Securities may not be publicly offered in Chile as long as they are not registered in the corresponding Securities Registry.

The above paragraph has to be reproduced in Spanish in order to comply with the General Rule N°. 336. Therefore, the following paragraph is only a translation into Spanish of this paragraph's disclaimers and does not contain any additional statement.

Esta oferta comienza el día que se emitan los final terms. Esta oferta de valores cumple con la Norma de Carácter General 336 de la CMF. Dado que esta oferta versa sobre valores no inscritos en el Registro de Valores Extranjeros que lleva dicha Comisión, tales valores no están sujetos a la fiscalización de ésta. Como esta oferta de valores se refiere a valores no inscritos, no existe la obligación por parte de su emisor de entregar en Chile información pública respecto de dichos valores. Estos valores no podrán ser objeto de oferta pública mientras no sean inscritos en el Registro de Valores correspondiente.

Colombia

This Base Prospectus, together with the Final Terms for each issue of Securities, is for the sole and exclusive use of the addressee as a determined individual/entity, and cannot be understood as addressed or be used by any third party, including but not limited to third parties for which the addressee can legally or contractually represent, nor any of its shareholders, administrators or by any of the employees of the addressee. Any material to be delivered in Colombia or to any person located, domiciled or established in Colombia, shall be for the sole and exclusive use of the recipient.

This Base Prospectus, together with the Final Terms for each issue of Securities, has not been and will not be filed with or approved by the Colombian Financial Superintendency or any other regulatory authority in Colombia.

The issuance of the Securities, its trading and payment shall occur outside Colombia; therefore the Securities have not been and will not be registered before the Colombian National Registry of Issuers and Securities, nor with the Colombian Stock Exchange. The delivery of this Base Prospectus or the Final Terms for each issue of Securities does not constitute a public offer of securities under the laws of Colombia. This Base Prospectus, together with the Final Terms for each issue of Securities, does not constitute and may not be used for, or in connection with, a public offering as defined under Colombian law and shall be valid in Colombia only to the extent permitted by Colombian law. Under Colombian regulations, any offering addressed to 100 or more named individuals or companies shall be deemed to be an offering to the public requiring the prior approval of the Colombian Financial Superintendency and listing on the Colombian National Registry of Issuers and Securities.

The Securities may not be solicited, publicly offered, transferred, sold or delivered, whether directly or indirectly, to any individual or legal entity in Colombia.

The addressee acknowledges the Colombian laws and regulations (including but not limited to foreign exchange and tax regulations) applicable to any transaction or investment made in connection with this Base Prospectus or the Final Terms for each issue of Securities and acknowledges and represents that it is the sole responsible party for full compliance with any such laws and regulations. Additionally, Colombian investors are solely liable for conducting an investment suitability analysis as per their applicable investment regime.

Costa Rica

Any offer of Securities under this Base Prospectus will be an individual and private offer which is made in Costa Rica upon reliance on an exemption from registration before the General Superintendence of Securities ("SUGEVAL"), pursuant to articles 6 and 7 of the Regulations on the Public Offering of Securities (*Reglamento sobre Oferta Pública de Valores*).

This offering is NOT a public offering of securities in Costa Rica.

The product being offered is not intended for the Costa Rican public or market and neither is it registered or will be registered before the SUGEVAL, nor can it be traded in the secondary market.

Croatia

For selling restrictions in respect of Croatia, please see "Prohibition of Sales to EEA Retail Investors" and "Public Offer Selling Restrictions under the EU Prospectus Regulation" above.

This Base Prospectus has not been, and no prospectus in relation to the Programme or this offer has been or will be approved by the Croatian Financial Services Supervisory Authority (*Hrvatska agencija za nadzor financijskih usluga*). Neither this Base Prospectus nor any other document connected therewith may be distributed, passed on or disclosed to any person in Croatia, unless it has been approved by the competent authority of another EEA Member State, published pursuant to the Prospectus Regulation, validly passported to Croatia and such distribution, passing and disclosure is made pursuant to the Croatian Capital Market Act (*Zakon o tržištu kapitala*, Official Gazette No 65/2018, as amended from time to time, the "ZTK") and all other relevant laws and regulations applicable in Croatia as amended from time to time.

No action has been taken that would constitute a public offering of the Securities or distribution of any offering material in relation to the Securities in Croatia. Each Dealer has represented and agreed, and each further Dealer appointed under this Programme will be required to represent and agree, that it will offer or distribute the Securities in Croatia only in compliance with the terms of the ZTK and all other laws and regulations applicable to the offer and sale of the Securities in Croatia as amended from time to time.

Czech Republic

For selling restrictions in respect of the Czech Republic, please see "Public Offer Selling Restrictions under the EU Prospectus Regulation" above, with the following exceptions:

"Qualified investors" for the purpose of a Czech offering are (a) persons specified in Article 2a paragraph 1 and 2 of Act No. 256/2004 Coll., on Capital Markets Undertakings, as amended (the "**Czech Capital Markets Act**") and/or (b) persons who are considered as professional customers under Article 2b of the Czech Capital Markets Act, to the extent of trading or investment instruments relating to the offered securities.

The monetary amount relevant for the exemption from the obligation to publish a prospectus under Article 1(4)(c) and 1(4)(d) of the EU Prospectus Regulation is determined by the applicable governmental regulations, as amended and/or replaced from time to time.

Denmark

This Base Prospectus has not been filed with or approved by the Danish Financial Supervisory Authority or any other regulatory authority in the Kingdom of Denmark. The Securities have not been offered or sold and may not be offered, sold or delivered directly or indirectly in Denmark, unless in compliance with Chapter 3 of the Danish Capital Markets Act and executive orders issued pursuant thereto as amended from time to time.

Dominican Republic

The issuance, circulation and offering of the Securities has a strictly private character according to the laws of the Dominican Republic, falling beyond the scope of articles 1 numeral (31), 46 et al of Law 249-17 dated 19 December 2017, as amended. Since no governmental authorisations are required in this issuance, circulation and offering, the Securities under this Base Prospectus have not been and will not be registered with the Superintendency of the Stock Market of the Dominican Republic (*Superintendencia del Mercado de Valores de la República Dominicana*), considering that and Securities will only be circulated, offered and sold in the Dominican Republic in a private manner based on the criteria established under Dominican laws and regulations.

Dubai International Financial Centre

This Base Prospectus relates to an Exempt Offer in accordance with the Markets Rules of the Dubai Financial Services Authority (the "**DFSA**").

This Base Prospectus is intended for distribution only to Professional Clients (as defined in the DFSA Rules, as amended) who are not natural persons. It must not be delivered to, or relied on by, any other person.

The DFSA has no responsibility for reviewing or verifying any documents in connection with Exempt Offers. The DFSA has not approved this Base Prospectus nor taken steps to verify the information set out in it, and has no responsibility for it.

The Securities to which this Base Prospectus relates may be illiquid and/or subject to restrictions on their resale. Prospective purchasers of the Securities offered should conduct their own due diligence on the Securities.

If you do not understand the contents of this Base Prospectus you should consult an authorised financial adviser.

El Salvador

This Base Prospectus has been provided to the recipient under the recipient's express request and instructions, and on a private placement basis.

Finland

For selling restrictions in respect of Finland, please see "Public Offer Selling Restrictions under the EU Prospectus Regulation" above.

This Base Prospectus has not been subjected to approval by the Finnish Financial Supervisory Authority. The Securities may only be offered or sold in compliance with all applicable provisions of the laws of Finland and especially in compliance with the Finnish Securities Market Act (*arvopaperimarkkinalaki* (746/2012), as amended) and any regulation or rule made thereunder, as supplemented and amended from time to time.

Each of the Dealers and the relevant Issuer have represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that it has not distributed or caused to be distributed and will not distribute or cause to be distributed in Finland, this Base Prospectus, the relevant Final Terms or any other offering material relating to the Securities other than to investors to whom offers and sales of Securities may be made.

France

This Base Prospectus has not been approved by the *Autorité des marchés financiers* ("AMF").

Each of the Dealers and the relevant Issuer have represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that:

- (a) *Offer to the public non exempted from the obligation to publish a prospectus in France*: it has only made and will only make an offer of Securities to the public non exempted from the obligation to publish a prospectus (*offre au public non dispensée de la publication d'un prospectus*) in France or an admission of Securities to trading on a regulated market in France in the period beginning (i) when a prospectus in relation to those Securities has been approved by the AMF on the date of its publication, or (ii) when a prospectus in relation to those Securities has been approved by the competent authority of another member state of the European Economic Area, on the date of notification of such approval to the AMF in accordance with Article 25 of the EU Prospectus Regulation, and ending at the latest on the date which is 12 months after the date of approval of the prospectus, all in accordance with Articles 3 and 12 of the EU Prospectus Regulation, Articles L. 412-1 and L. 621-8 of the French financial and monetary code (*Code monétaire et financier*) and the provisions of the *Règlement général* of the AMF ("RG AMF") and when formalities required by French laws and regulations have been carried out; or
- (b) *Offer to the public exempted from the obligation to publish a prospectus (Private placement) in France*: it has only made and will only make an offer of Securities in France only in circumstances that do constitute an offer to the public exempted from the obligation to publish a prospectus pursuant to Articles L.411-2 and L.411-2-1 of the French financial and monetary code (*Code monétaire et financier*) and more particularly to (a) a restricted circle of investors (*cercle restreint d'investisseurs*), other than qualified investors, provided that such investors are acting for their own account; in accordance with Articles L. 411-2 1° and D.411-4 of the French financial and monetary code (*Code monétaire et financier*) and/or (b) qualified investors (*investisseurs qualifiés*) as defined in and in accordance with Articles L. 411-2 1° of the French financial and monetary code (*Code monétaire et financier*) and Article 2(e) of the EU Prospectus Regulation and/or (c) investors who acquire Securities for a total consideration of at least EUR 100,000 (or its equivalent in another currency) per investor, for each separate offer in accordance with Article L. 411-2-1 2° of the French financial and monetary code (*Code monétaire et financier*) and Article 211-2 II of the RG AMF and/or (d) Securities whose nominal amount or equivalent amounts is at least EUR 100,000 (or its equivalent in another currency) in accordance with Article L. 411-2-1 3° of the French financial and monetary code (*Code monétaire et financier*) and Article 211-2 III of the RG AMF.

The direct or indirect resale of Securities which have been acquired with respect to an offer to the public shall be subject to the same restrictions and shall only be made in accordance with the Articles L. 412-1, L. 621-8, L.411-2 and 411-2-1 of the French financial and monetary code (*Code monétaire et financier*).

In addition, each of the Dealers and the relevant Issuer have represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that it has not distributed or caused to be distributed and will not distribute or cause to be distributed in France, this Base Prospectus, the relevant Final Terms or any other offering material relating to the Securities other than to investors to whom offers and sales of Securities in France may be made as described above.

Germany

For selling restrictions in respect of Germany, please see "Public Offer Selling Restrictions under the EU Prospectus Regulation" above.

Greece

For selling restrictions in respect of Greece, please see "Public Offer Selling Restrictions under the EU Prospectus Regulation" above, with the below specifications:

Under the Greek laws implementing the Prospectus Regulation (as amended and in force) the following are provided:

- (i) The publication of a prospectus is not required, according to the specific provisions of the Prospectus Regulation, in case of public offers of securities with a total consideration in the European Union lower than Euro five million (€5,000,000), calculated over a period of twelve (12) months.
- (ii) The publication of an information circular (in accordance with the directions, circulars and decisions issued by the Hellenic Capital Market Commission) is required in connection with public offers of securities with a total consideration ranging from Euro five hundred thousand (€500,000) to five million (€5,000,000) calculated over a period of twelve (12) months. Exceptionally, the publication of the information circular is not needed provided that the conditions of Regulation (EU) 2020/1503, regarding public offers of securities from an authorised European crowdfunding service provider, are met.

This Base Prospectus (and/or any supplement and/or final terms thereto) has not been approved by the Hellenic Capital Market Commission and no approval has been sought or obtained from the Hellenic Capital Market Commission for the offer, distribution and marketing or sale of the Securities in Greece.

The Securities may only be offered or sold in compliance with all applicable requirements and provisions of the laws of Greece, as supplemented and amended from time to time, with any applicable European or international legislation and with any relevant applicable regulation or rule or instruction or guideline (including but not limited to the Hellenic Capital Market Commission's instructions, decisions and guidelines), as each time in force. Similarly, any related advertisement, notification or other declaration or announcement is subject to the abovementioned framework.

Neither this Base Prospectus nor any other document connected therewith may be distributed, passed on or disclosed to any person in Greece, unless it has been approved by the competent authority and published pursuant to the Prospectus Regulation and validly passported to Greece.

Gibraltar

The Issuer and each Manager has represented and agreed and each further Manager appointed under the Programme and each Distributor appointed to distribute any specific Tranches of Securities in Gibraltar will be required to represent and agree that it has not made and will not make an offer of the Securities which are the subject of the offering contemplated by this Offering Circular to the public in Gibraltar other than at any time:

- to any legal entity which is a qualified investor as defined in the Gibraltar Prospectus Regulation;
- to fewer than 150 natural or legal persons (other than qualified investors as defined in the Gibraltar Prospectus Regulation), subject to obtaining the prior consent of the relevant Manager or Managers nominated by the Issuer for any such offer; or
- in any other circumstances falling within Articles 1(3), 1(4) and/or 3(2)(b) of the Gibraltar Prospectus Regulation),

provided that no such offer of Securities shall require the Issuer or any Manager to publish a prospectus pursuant to Article 3 of the Gibraltar Prospectus Regulation or supplement a prospectus pursuant to Article 23 of the Gibraltar Prospectus Regulation.

For the purposes of the provision above, the expression an **"offer of Securities to the public"** in relation to any Securities in Gibraltar means the communication in any form and by means of sufficient information on the terms of the offer and the Securities to be offered so as to enable an investor to decide to purchase or subscribe for the Securities, and the expression **"Gibraltar Prospectus Regulation"** means Regulation (EU) 2017/1129 (including the delegated and implementing acts adopted under it) as implemented, retained, amended, extended, re-enacted or otherwise given effect in the Gibraltar at the end of the transitional period agreed between the European Union and Gibraltar pursuant to the European Union (Withdrawal) Act 2019 and as amended or supplemented in Gibraltar thereafter.

Other regulatory restrictions: Each Manager has represented and agreed, and each further Manager appointed under this Programme and each Distributor appointed to distribute any specific Tranche of Securities in the United Kingdom will be required to represent and agree, that it has complied and will continue to comply with all provisions applicable to it under the Financial Services Act 2019 of Gibraltar and it will not issue or cause to be issued, make or cause to be made, any investment advertisement or promotion in or from within Gibraltar unless it is authorised and/or approved to do so or is exempted under the relevant provisions of the Financial Services Act 2019.

Hong Kong

No advertisement, invitation or document relating to the Securities may be issued, or may be in the possession of any person for the purpose of issue, (in each case whether in Hong Kong or elsewhere), if such advertisement, invitation or document is directed at, or the contents of which are likely to be accessed or read by, the public in Hong Kong (except if permitted to do so under the laws of Hong Kong) other than with respect to Securities which are or are intended to be disposed of only to persons outside of Hong Kong or only to "professional investors" within the meaning of the Securities and Futures Ordinance (Cap. 571, Laws of Hong Kong, the **"SFO"**) and any rules made thereunder. In addition, in respect of Securities which are not a "structured product" as defined in the SFO, the Securities may not be offered or sold by means of any document other than (i) to "professional investors" within the meaning of the SFO and any rules made thereunder; or (ii) in other circumstances which do not result in the document being a "prospectus" within the meaning of the Companies (Winding Up and Miscellaneous Provisions) Ordinance (Cap 32, Laws of Hong Kong, the **"CO"**) or which do not constitute an offer to the public within the meaning of the CO.

Unless (a) the Securities are not linked to an Underlying Asset or do not otherwise include a derivative and/or (b) you are an institution or are otherwise an institutional or an eligible corporate professional investor which satisfies requirements under the Code of Conduct for Persons Licensed by or Registered with the Securities and Futures Commission for whom an assessment of the suitability of the Securities for you by the selling intermediary is not required under applicable Hong Kong laws, regulations and rules, you should take note of the following warning:

This is a structured product involving derivatives. The investment decision is yours but you should not invest in the Securities unless the intermediary who sells it to you has explained to you that the product is suitable for you having regard to your financial situation, investment experience and investment objectives.

Where the Securities are not linked to any Underlying Asset or do not otherwise include a derivative, if you are not an institution or an institutional or an eligible corporate professional investor which satisfies requirements under the Code of Conduct for Persons Licensed by or Registered with the Securities and Futures Commission for whom an assessment of the suitability of the Securities for you by the selling intermediary is not required under applicable Hong Kong laws, regulations and rules, you should take note of the following warning:

This is an investment product. The investment decision is yours but you should not invest in the Securities unless the intermediary who sells it to you has explained to you that the product is suitable for you having regard to your financial situation, investment experience and investment objectives.

In either case, you should also take note of the following warning:

The contents of this document have not been reviewed by any regulatory authority in Hong Kong. You are advised to exercise caution in relation to the offer. If you are in any doubt about any of the contents of this document, you should obtain independent professional advice.

None of the Issuers or the Guarantors accepts any responsibility for any acts or omissions of such intermediary.

Hungary

This Base Prospectus has not been approved by the *Magyar Nemzeti Bank (Hungarian National Bank)*.

In addition to any other general selling restrictions in this Base Prospectus (including, but not limited to restrictions under the headings "Public Offer Selling Restrictions under the EU Prospectus Regulation" and "Prohibition of Sales to EEA Retail Investors" above), the following restrictions also apply to an offer in Hungary of Securities which are the subject of the offering contemplated by this Base Prospectus (hereinafter an "**Offer**" for the purposes of the selling restrictions applicable in relation to Hungary).

Any Offer of Securities in Hungary is authorized only if all rules specified in the laws and regulation of Hungary and the European Union (especially, but not limited to the EU Prospectus Regulation and Sections 13 to 51 of the Hungarian Act CXX of 2001 on the Capital Market (the "**Capital Market Act**") , as amended from time to time) are fully complied with and no further obligations or sanctions arise for any of the Issuers.

Private placement

A placement of such Securities in Hungary that is

- (i) neither an offer of securities to the public pursuant to the EU Prospectus Regulation
- (ii) nor the admission of such Securities to trading on a regulated market;

qualifies as a private placement (*zártkörű forgalombahozatal*) in Hungary.

An Offer of Securities in Hungary by way of a private placement is authorized only (and without prejudice to compliance with any other applicable restriction) if all rules specified in the Capital Market Act are complied with, which requires, among others,

- in Section 16 of the Capital Market Act, the equal distribution (by the issuer or the dealer) of information to all investors on the material information of the market, economic, financial and legal situation and prospects of the issuer and the information necessary to assess the rights attaching to the underlying instruments (including information raised in personal discussions with investors);
- in Section 17 of the Capital Market Act, that the private placement in Hungary is subsequently notified to the Hungarian National Bank within 15 days of completion by the relevant issuer;
- in Section 18 of the Capital Market Act, that each and any written document related to the Offer must clearly indicate that the Offer is a private placement.

Additional obligations in respect of exempt offers of securities to the public

An Offer that is falling within any of paragraphs a), b), c), d), e) or j) of Article 1(4) of the EU Prospectus Regulation is only authorized in Hungary if the rules specified in Section 16 of the Capital Market Act (applicable through section 21 (1c) of the Capital Market Act and partially summarized above) are fully complied with (without prejudice to compliance with any other applicable restriction).

An Offer that is falling within Article 1(4) or any of paragraphs a) – h) of Article 1(5) of the EU Prospectus Regulation is only authorized in Hungary if the relevant Issuer agrees and undertakes to duly notify the Hungarian National Bank about the Offer in Hungary subsequently within 15 days of completion (pursuant to section 17 of the Capital Market Act; applicable through section 21 (1c) of the Capital Market Act) (without prejudice to compliance with any other applicable restriction).

If the Offer in Hungary is not exempt from the obligation of the relevant issuer to engage an appropriately licensed investment service provider under Section 23 (1) of the Capital Market Act, any offer of Securities to the public is only authorized in Hungary if the relevant Issuer agreed and engaged an investment service provider fully in accordance with Section 23 (1) of the Capital Market Act.

Registration in a multilateral trading facility

The registration of Securities which are the subject of the offering contemplated by this Base Prospectus as completed by the relevant Issue Terms in a multilateral trading facility or the publication of selling and purchase prices is not authorized in Hungary unless in compliance with the Capital Markets Act and other Hungarian laws and regulations as amended from time to time.

Ireland

In addition to the circumstances referred to in the section entitled "Public Offer Selling Restrictions under the EU Prospectus Regulation", each offeror of Securities will be required to represent, warrant and agree that it has not offered, sold, placed or underwritten and that it will not offer, sell, place or underwrite the Securities, or do anything in Ireland in respect of the Securities, otherwise than in conformity with the provisions of:

- (a) the Regulation (EU) 2017/1129 (EU Prospectus Regulation) Commission Delegated Regulation (EU) 2019/980 (EU PR Regulation), Commission Delegated Regulation (EU) 2019/989 (RTS Regulation), the European Union (Prospectus) Regulations 2019 and any Central Bank of Ireland ("**Central Bank**") rules issued and / or in force pursuant to section 1363 of the Companies Act 2014 (as amended);
- (b) the Companies Act 2014 (as amended);
- (c) the European Union (Markets in Financial Instruments) Regulations 2017 (as amended) and it will conduct itself in accordance with any rules or codes of conduct and any conditions or requirements, or any other enactment, imposed or approved by the Central Bank;
- (d) Regulation (EU) No 596/2014 of the European Parliament and of the Council of 16 April 2014 on market abuse, the European Union (Market Abuse) Regulations 2016 and any Central Bank rules issued and / or in force pursuant to section 1370 of the Companies Act 2014 (as amended), and will assist the Issuer in complying with its obligations thereunder;
- (e) Regulation (EU) No 1286/2014 of the European Parliament and of the Council of 26 November 2014 on key information documents for packaged retail and insurance based investment products (PRIIPs); and
- (f) the Central Bank Acts 1942 to 2018 (as amended) and any codes of conduct rules made under Section 117(1) of the Central Bank Act 1989.

Italy

Unless specified in the relevant Final Terms that a non-exempt offer may be made in Italy, the offering of Securities has not been registered pursuant to Italian securities legislation and, accordingly, no Securities may be offered, sold or delivered, nor may copies of this Base Prospectus, any final terms or of any other document relating to the Securities be distributed in the Republic of Italy, except:

- (a) to qualified investors (*investitori qualificati*), as defined pursuant to Article 2 of Prospectus Regulation and any applicable provision of Italian laws and regulations; or
- (b) in other circumstances which are exempted from the rules on public offerings pursuant to Article 1 of the Prospectus Regulation, Article 100 of the the Legislative Decree No. 58 of 24 February 1998, as amended (the "**Financial Services Act**") and Article 34-ter, first paragraph, of CONSOB Regulation No. 11971 of 14 May 1999, as amended (the "**CONSOB Regulation No. 11971**"), and the applicable Italian laws.

Any offer, sale or delivery of the Securities or distribution of copies of this Base Prospectus, any Final Terms or any other document relating to the Securities in the Republic of Italy under (a) or (b) above must be:

- (a) made by an investment firm, bank or financial intermediary permitted to conduct such activities in the Republic of Italy in accordance with the Financial Services Act, CONSOB Regulation

No. 20307 of 15 February 2018 (as amended from time to time) and Legislative Decree No. 385 of 1 September 1993, as amended (the "**Banking Act**");

- (b) in compliance with Article 129 of the Banking Act, as amended, and the implementing guidelines of the Bank of Italy which came into force on 1 October 2016, as amended from time to time, pursuant to which the Bank of Italy requests periodic information on the issue or the offer of securities in the Republic of Italy to be provided by uploading such information on the Infostat platform of the Bank of Italy; and
- (c) in compliance with any other applicable laws and regulations (including article 100-bis of the Financial Services Act, where applicable) or requirement imposed by CONSOB or other Italian authority.

Japan

The Securities have not been and will not be registered under the Financial Instruments and Exchange Act of Japan (Law No. 25 of 1948, as amended, the "**FIEA**") and, accordingly, each Dealer has agreed and each further Dealer to be appointed under the Programme will be required to agree that it will not offer or sell any Securities, directly or indirectly, in Japan, or to, or for the benefit of, any resident of Japan (which term as used herein means any person resident in Japan, including any corporation or other entity organised under the laws of Japan), or to others for reoffering or resale, directly or indirectly, in Japan or to any resident of Japan, except pursuant to an exemption from the registration requirements of, and otherwise in compliance with, the FIEA and any other applicable laws, regulations and ministerial guidelines of Japan.

Jersey

In the case of Securities issued by GSI and GSW, no consent of the Jersey Financial Services Commission under Article 8(2) of the Control of Borrowing (Jersey) Order 1958 has been obtained for the circulation in Jersey of any offer for subscription, sale or exchange of any Securities issued by GSI and GSW and any such offer must be addressed exclusively to a restricted circle of persons in Jersey. For these purposes an offer is not addressed exclusively to a restricted circle of persons unless (i) the offer is addressed to an identifiable category of persons to whom it is directly communicated by the offeror or the offeror's appointed agent, (ii) the members of that category are the only persons who may accept the offer and they are in possession of sufficient information to be able to make a reasonable evaluation of the offer and (iii) the number of persons in Jersey to whom the offer is so communicated does not exceed 50.

Liechtenstein

For selling restrictions in respect of Liechtenstein, please see "Public Offer Selling Restrictions under the EU Prospectus Regulation" above.

Luxembourg

The Securities may not be offered or sold to the public in the Grand Duchy of Luxembourg, directly or indirectly, and, neither this Base Prospectus nor any other circular, prospectus, form of application, advertisement, communication or other material may be distributed, or otherwise made available in, or from or published in, the Grand Duchy of Luxembourg, except (i) for the sole purpose of the listing of the Notes on the Official List of the Luxembourg Stock Exchange and the admission to trading of the Notes on the Euro MTF market of the Luxembourg Stock Exchange and in circumstances which do not constitute an offer of securities to the public pursuant to the EU Prospectus Regulation and the Luxembourg law dated 16 July 2019 relating to prospectuses for securities or (ii) in other circumstances which do not constitute an offer of securities to the public within the meaning of the EU Prospectus Regulation.

For more information on selling restrictions in respect of Luxembourg, please see "Public Offer Selling Restrictions under the EU Prospectus Regulation" above.

Mexico

The Securities have not been and will not be registered with the Mexican National Securities Registry (*Registro Nacional de Valores*), maintained by the Mexican National Banking and Securities Commission (*Comisión Nacional Bancaria de Valores*), and may not be offered or sold publicly in Mexico. The Securities may be sold in Mexico, by any person, including the relevant Issuer, to investors that qualify as institutional and accredited investors in Mexico, pursuant to the private placement exemption set forth in Article 8 of the Mexican Securities Market Law (*Ley del Mercado de Valores*).

Norway

For selling restrictions in respect of Norway, please see "Public Offer Selling Restrictions under the EU Prospectus Regulation" above.

In no circumstances may an offer of Securities be made in the Norwegian market without the Securities being registered in the VPS in dematerialised form or in another central securities depository which is properly authorised or recognised by the Financial Supervisory Authority of Norway (*Nw. Finansilsynet*) as being entitled to register the Securities pursuant to Regulation (EU) No 909/2014, to the extent such Instruments or Notes shall be registered, according to the Norwegian Central Securities Depositories Act of 15 March 2019 no. 6 (*Nw. Verdipapirsentralloven, 2019*) and ancillary regulations.

Panama

The Securities have not been and will not be Registered with the Superintendence of Capital Markets of the Republic of Panama under Decree law No.1 of July 8, 1999 (as amended to date, the "**Panamanian Securities Act**") and may not be publicly offered or sold within Panama, except in certain limited transactions exempt from the registration requirements of the Panamanian Securities Act. These Securities do not benefit from the tax incentives provided by the Panamanian Securities Act and are not subject to regulation or supervision by the Superintendence of Capital Markets of the Republic of Panama.

Neither the Securities nor the offer, sale or transactions related to the same have been registered with the Superintendence of Capital Markets. The exemption from registration is based on paragraph (3) of Article 129 of the Amended and Restated Text of Law Decree N°1 of July 8, 1999 (institutional investors). Accordingly, the tax treatment set forth in Articles 334 thru 336 of said Amended and Restated Text of Law Decree N°1 of July 8, 1999 is not applicable. The Securities are not subject to the supervision of the Superintendence of Capital Markets.

Institutional investors that purchase the Securities pursuant to the institutional investor exemption must hold the Securities for a year and during that period may only sell these securities to other institutional investors.

Paraguay

This Base Prospectus does not constitute a public offering of securities or other financial products and services in Paraguay. Each purchaser of Securities acknowledges that the securities and financial products to be offered under this Programme will be issued outside of Paraguay. Each purchaser of Securities acknowledges that any legal matter arising from any offer of Securities shall not be submitted to any Paraguayan government authority. Each purchaser of Securities acknowledges as well that the Paraguayan Deposit Insurance legislation does not cover the products offered hereby or assets or funds allocated for these purposes. The Paraguayan Central Bank, the Paraguayan National Stock Exchange Commission and the Paraguayan Banking Superintendence do not regulate the offering of these products or their undertaking. Each purchaser of Securities should make his own decision whether this offering meets his investment objectives and risk tolerance level.

Este Memorandum de Colocación Privada no constituye el ofrecimiento público de valores u otros productos y servicios financieros en Paraguay. Cada comprador de Valores reconoce que los valores y los productos financieros ofrecidos bajo este Programa serán emitidos fuera del Paraguay. Cada comprador de Valores acepta que cualquier asunto legal que surja en virtud de esta oferta de Valores no será sometido a ninguna autoridad gubernamental paraguaya. Cada comprador de Valores reconoce que la Ley de Garantía de Depósitos de Paraguay no cubre los productos ofrecidos por este medio, ni los activos y fondos transferidos a estos efectos. El Banco Central del Paraguay, la Comisión Nacional de Valores del Paraguay, y la Superintendencia de Bancos del Banco Central del Paraguay no regulan

ni son responsables de la oferta de estos productos o su aceptación. El comprador de Valores debe evaluar si la presente oferta cumple con sus objetivos de inversión y niveles de tolerancia de riesgos.

Peru

The Securities and this Base Prospectus have not been registered in Peru under the *Decreto Supremo N° 093-2002-EF: Texto Único Ordenado de la Ley del Mercado de Valores* as amended (the "**Peruvian Securities Law**") nor have they been approved by the Superintendencia del Mercado de Valores and cannot be offered or sold in Peru except in a private offering under the meaning of the Peruvian Securities Law. The Peruvian Securities Law provides that an offering directed exclusively to "institutional investors" (as defined in the Institutional Investors Market Regulations as amended) qualifies as a private offering. The Securities acquired by institutional investors in Peru cannot be transferred to a third party, unless such transfer is made to another institutional investor or the Securities have been previously registered with the *Registro Público del Mercado de Valores maintained by the Superintendencia del Mercado de Valores*.

Poland

In addition to provisions applicable to the "Public Offer Selling Restrictions under the EU Prospectus Regulation" and "Prohibition of Sales to EEA Retail Investors" stated above, the following applies:

With respect to the offer, delivery, advertisement or sale of Securities no approval has been sought or obtained from the Polish Financial Supervision Authority (*Komisja Nadzoru Finansowego*) and the offer, delivery, advertisement or sale of Securities was not notified to the Polish Financial Supervision Authority (*Komisja Nadzoru Finansowego*).

Any offer, delivery, advertisement or sale of the Securities or distribution of copies of this Base Prospectus, any pricing supplement or any other document relating to the Securities to the public in Poland must be made in accordance with:

- (a) the EU Prospectus Regulation;
- (b) the Polish Act on Public Offers and Conditions of Introducing Financial Instruments to Organised Trading and on Public Companies of 29 July 2005 (as amended) ("**Act on Public Offers**");
- (c) the Polish Act on Trading in Financial Instruments of 29 July 2005 (as amended); and
- (d) any other applicable laws and regulations or requirement imposed by the Polish Financial Supervision Authority (*Komisja Nadzoru Finansowego*) or other Polish authority.

In particular, according to Article 3 Section 1a of the Act on Public Offers, an offer of securities to the public referred to in Article 1 Section 4(b) of the EU Prospectus Regulation, in the case of which the number of persons to whom it is directed together with the number of persons to whom public offers referred to in Article 1 Section 4(b) of EU Prospectus Regulation were directed, of the same type of securities, carried out over the past 12 months, exceeds 149, requires that an information memorandum referred to in Article 38b of the Polish Act on Public Offers shall be published, which is subject to the Polish Financial Supervision Authority's (*Komisja Nadzoru Finansowego*) approval.

The provision under Article 3 Section 1a of the Act on Public Offers is not applicable if the offer is directed solely to the holders of the same type of securities of the same issuer or to entities which were offered the issuer's securities by way of exchanging receivables from the redemption of the previously issued securities of the issuer.

Moreover, according to the Act on Public Offers, advertisements of an offer of securities to the public referred to in Article 1 Section 4(b) of the EU Prospectus Regulation may only be disseminated to less than 150 persons in the territory of one Member State and cannot be made available to an unknown recipient.

If, pursuant to the provisions of the EU Prospectus Regulation, it is not required to make the prospectus available, the advertisements should be consistent with the information included in the information memorandum or any other document required under the Act on Public Offers or the EU Prospectus

Regulation, made available to the public, or with information which should be included in the memorandum or in the document pursuant to the provisions of the Act on Public Offers, the EU Prospectus Regulation and delegated and implementing acts issued on the basis thereof, if the information memorandum or such document have not yet been made available to the public, and they cannot mislead investors in respect of the issuer's situation and the assessment of the securities.

Portugal

The Securities may only be offered in Portugal in compliance with the provisions of the Portuguese Securities Code (*Código dos Valores Mobiliários*, approved by the Decree-Law 486/99, of November 13, as amended) and other laws and regulations applicable to the offer and sale of the Securities in Portugal. This Base Prospectus has not been verified by the Portuguese Securities Exchange Commission (*Comissão do Mercado de Valores Mobiliários*, or the "CMVM") and the Securities are not registered therewith for public offer in Portugal. The recipients of this Base Prospectus and other offering materials in respect of the Securities are professional investors, targeted exclusively on the basis of a private placement, all as defined in and in accordance with articles 30, 109 and 110 of the Portuguese Securities Code. Accordingly, the Securities must not be, and are not being, offered or advertised, and no offering or marketing materials relating to the Securities may be made available or distributed in any way that would constitute a public offer under the Portuguese Securities Code (whether at present or in the future).

Romania

The Base Prospectus has not been subject to the approval of the Romanian Financial Supervisory Authority ("ASF") or any other competent Romanian authority. Accordingly, the Issuer and each Dealer have represented and agreed that it has not offered, sold or delivered, and will not offer, sell or deliver, any Securities in Romania in a solicitation to the public, and that sales of the Securities in Romania shall be effected in accordance with all Romanian securities, tax and exchange control and other applicable laws and regulations.

For the cases when a valid passporting procedure to Romania in relation to the Base Prospectus has not been successfully enacted, the Issuer and each of the dealers has represented and agreed that it will not offer, sell or deliver any Securities or distribute copies of the Base Prospectus or any other document relating to the Securities in Romania except for the cases when the Base Prospectus and any related documents relating to the Securities will be offered in observance of the following cumulative conditions:

- (a) it is addressed only to investors who are "**qualified investors**" within the meaning of article 2 letter e) of the EU Prospectus Regulation;
- (b) it complies with all applicable laws and regulations in Romania, including the EU Prospectus Regulation, the provisions of Law no. 24/2017 as regards issuers of financial instruments and market operations, the provisions of Regulation No. 5/2018 on issuers of financial instruments and market operations issued by the Romanian Financial Supervisory Authority, and any norms and decisions issued or approved by the Romanian Financial Authority or any other competent Romanian authority, as well as with all applicable EU legislation.

Saudi Arabia

No action has been or will be taken in the Kingdom of Saudi Arabia that would permit a public offering of the Securities. Any investor in the Kingdom of Saudi Arabia or who is a Saudi person (a "**Saudi Investor**") who acquires any Securities pursuant to any offering should note that the offer of Securities is a private placement under Article 8 or Article 9 or Article 10, or Article 11 of the "Rules on the Offer of Securities and Continuing Obligations" as issued by the Board of the CMA pursuant to its resolution number 3-123-2017 dated 9/4/1439H corresponding to 27/12/2017G amended by Resolution of the Board of the CMA number 1-104-2019 dated 01/02/1441H corresponding to 30/09/2019G amended by Resolution of the Board of the CMA number 1-7-2021 dated 01/06/1442H corresponding to 14/01/2021G (the "**KSA Regulations**") for the purposes of Article 10 of the KSA Regulations through a Capital Market Institution licensed by the CMA to carry on the securities activity of arranging and following a notification to the CMA under the KSA Regulations.

The Securities may thus not be advertised, offered or sold to any person in the Kingdom of Saudi Arabia other than to "Institutional clients" and "Qualified client" under Article 8 of the KSA Regulations or by

way of a limited offer under Article 9 of the KSA Regulations. Each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that any offer of Securities will comply with the KSA Regulations.

Each offer of Securities shall not therefore constitute a "public offer" pursuant to the KSA Regulations, but is subject to the restrictions on secondary market activity under Article 14 of the KSA Regulations. Any Saudi Investor who has acquired Securities pursuant to a private placement under Article 10, or Article 9 or is an Exempt offer under Article 6 of the KSA Regulations may not offer or sell those Securities to any person unless the offer or sale is made through a Capital Market Institution appropriately licensed by the CMA and where one of the following requirements is met:

- (a) An offer of securities is a limited offer if at the subscription is limited to no more than 100 offerees (excluding investors under the categories of Institutional and Qualified Clients) and the minimum amount payable per offeree does not exceed two hundred thousand SAR;
- (b) Securities of the same class may not be offered as a limited offer under paragraph (a) of this Article more than once in a twelve-month period ending with the date of the offer in question;
- (c) the offer is an exempt offer;
- (d) the securities are offered or sold to an "Institutional client" and "Qualified client"; or
- (e) the securities are being offered or sold in such other circumstances as the CMA may prescribe for these purposes.

All the above restrictions shall cease to apply upon approval of listing on the Saudi Stock Exchange of securities of the same class as the Securities that are subject to such restrictions.

If the requirement in paragraph (a) above cannot be fulfilled because the price of the Securities being offered or sold to the transferee has increased since the date of the original private placement, the transferor may offer or sell the Securities to the transferee if their purchase price during the period of the original private placement did not exceed two hundred thousand SAR or an equivalent amount. If this requirement cannot be fulfilled, a Saudi Investor may offer or sell the Securities if he sells his entire holding of such Securities to one person.

All the above provisions shall apply to all subsequent transferees of such Securities.

Singapore

This Base Prospectus has not been registered as a prospectus with the Monetary Authority of Singapore (the "MAS") under the Securities and Futures Act 2001, as amended or modified (the "SFA").

Securities

Where the Securities are:

- (a) linked to Underlying Assets which are shares (other than units of a collective investment scheme) of a corporation (whether incorporated in Singapore or elsewhere), debentures of an entity, units in a business trust, any instrument conferring or representing a legal or beneficial ownership interest in a corporation, partnership or limited liability partnership formed in Singapore or elsewhere (each of the foregoing, an "SFA security"), or any derivatives contract of which the underlying thing or any of the underlying things is a SFA security or a SFA securities index, or such other product or class of products prescribed by the MAS ("**Non-CIS Reference Items**"); or
- (b) linked to Underlying Assets which fall within the ambit of a "collective investment scheme" (as defined in the SFA) (the "**CIS Reference Items**"),

this Base Prospectus and any other document or material in connection with the offer or sale, or invitation for subscription or purchase, of the Securities or the Non-CIS Reference Items may not be circulated or distributed, nor may the Securities or the Non-CIS Reference Items be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in

Singapore other than (i) to an institutional investor (as defined in the SFA) under Section 274 of the SFA, (ii) to a relevant person (as defined in Section 275(2) of the SFA) pursuant to Section 275(1) of the SFA, or any person pursuant to Section 275(1A), and in accordance with the conditions specified in Section 275 of the SFA, and where applicable, the conditions specified in Regulation 3 of the Securities and Futures (Classes of Investors) Regulations 2018 or (iii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA.

Where Securities or Non-CIS Reference Items are subscribed for or purchased under Section 275 of the SFA by a relevant person which is:

- (a) a corporation (which is not an accredited investor (as defined in the SFA)) the sole business of which is to hold investments and the entire share capital of which is owned by one or more individuals, each of whom is an accredited investor; or
- (b) a trust (where the trustee is not an accredited investor) whose sole purpose is to hold investments and each beneficiary of the trust is an individual who is an accredited investor,

securities (as defined in Section 2(1) of the SFA) or securities-based derivatives contracts (as defined in Section 2(1) of the SFA) of that corporation or the beneficiaries' rights and interest (howsoever described) in that trust shall not be transferred within six months after that corporation or that trust has acquired the Securities or Non-CIS Reference Items pursuant to an offer made under Section 275 of the SFA except:

- (1) to an institutional investor or to a relevant person, or to any person arising from an offer referred to in Section 275(1A) or Section 276(4)(c)(ii) of the SFA;
- (2) where no consideration is or will be given for the transfer;
- (3) where the transfer is by operation of law;
- (4) as specified in Section 276(7) of the SFA; or
- (5) as specified in Regulation 37A of the Securities and Futures (Offers of Investments) (Securities and Securities-based Derivatives Contracts) Regulations 2018.

Securities Linked to CIS Reference Items with Physical Delivery

(A) Securities linked to CIS Reference Items where the Securities do not provide for a right or interest (including an option) in respect of units in a CIS Reference Item

Where the Securities are linked to CIS Reference Items and do provide for a right to physical delivery of the CIS Reference Items (whether such right is contingent on the fulfilment of any condition or not), the selling restriction applicable to Securities as specified above will apply to such Securities linked to CIS Reference Items, and additionally, the offer or invitation of the Securities and CIS Reference Items, which is the subject of this Base Prospectus, does not relate to a collective investment scheme which is authorised under Section 286 of the SFA or recognised under Section 287 of the SFA. The Programme and the Issuers are not authorised or recognised by the MAS and the Securities and the CIS Reference Items are not allowed to be offered to the retail public. This Base Prospectus and any other document or material issued in connection with the offer or sale is not a prospectus as defined in the SFA, and accordingly, statutory liability under the SFA in relation to the content of prospectuses does not apply, and you should consider carefully whether the investment is suitable for you.

This Base Prospectus and any other document or material in connection with the offer or sale, or invitation for subscription or purchase, of the CIS Reference Items may not be circulated or distributed, nor may the CIS Reference Items be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore other than (i) to an institutional investor (as defined in the SFA) under Section 304 of the SFA, (ii) to a relevant person (as defined in Section 305(5) of the SFA) pursuant to Section 305(1) or any person pursuant to Section 305(2), and in accordance with the conditions specified in Section 305 of the SFA and where applicable, the conditions specified in Regulation 3 of the Securities and Futures (Classes of Investors) Regulations 2018 or, (iii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA.

Where CIS Reference Items are subscribed for or purchased under Section 305 of the SFA by a relevant person which is:

- (a) a corporation (which is not an accredited investor (as defined in the SFA)) the sole business of which is to hold investments and the entire share capital of which is owned by one or more individuals, each of whom is an accredited investor; or
- (b) a trust (where the trustee is not an accredited investor) whose sole purpose is to hold investments and each beneficiary of the trust is an individual who is an accredited investor,

securities (as defined in Section 2(1) of the SFA) of that corporation or the beneficiaries' rights and interest (howsoever described) in that trust shall not be transferred within six months after that corporation or that trust has acquired the CIS Reference Items pursuant to an offer made under Section 305 of the SFA except:

- (1) to an institutional investor or to a relevant person, or to any person arising from an offer referred to in Section 275(1A) or Section 305A(3)(c)(ii) of the SFA;
- (2) where no consideration is or will be given for the transfer;
- (3) where the transfer is by operation of law;
- (4) as specified in Section 305A(5) of the SFA; or
- (5) as specified in Regulation 36A of the Securities and Futures (Offers of Investments) (Collective Investment Schemes) Regulations 2005 of Singapore.

(B) Securities Linked to CIS Reference Items where the Securities provide for a right or interest (including an option) in respect of units in a CIS Reference Item

Where the Securities are linked to CIS Reference Items and do provide for a right to physical delivery of the CIS Reference Items (whether such right is contingent on the fulfilment of any condition or not), and additionally, the Securities provide for a right or interest (including an option) in respect of units in a CIS Reference Item, the offer or invitation of the Securities and CIS Reference Items, which is the subject of this Base Prospectus, does not relate to a collective investment scheme which is authorised under Section 286 of the SFA or recognised under Section 287 of the SFA. The Programme and the Issuers are not authorised or recognised by the MAS and the Securities and the CIS Reference Items are not allowed to be offered to the retail public. This Base Prospectus and any other document or material issued in connection with the offer or sale is not a prospectus as defined in the SFA, and accordingly, statutory liability under the SFA in relation to the content of prospectuses does not apply, and you should consider carefully whether the investment is suitable for you.

This Base Prospectus and any other document or material in connection with the offer or sale, or invitation for subscription or purchase, of the Securities or CIS Reference Items may not be circulated or distributed, nor may the Securities or CIS Reference Items be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore other than (i) to an institutional investor (as defined in the SFA) under Section 304 of the SFA, (ii) to a relevant person (as defined in section 305(5) of the SFA) pursuant to Section 305(1) or any person pursuant to Section 305(2), and in accordance with the conditions specified in Section 305 of the SFA, and where applicable, the conditions specified in Regulation 3 of the Securities and Futures (Classes of Investors) Regulations 2018 or, (iii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA.

Where Securities or CIS Reference Items are subscribed for or purchased under Section 305 of the SFA by a relevant person which is:

- (a) a corporation (which is not an accredited investor (as defined in the SFA)) the sole business of which is to hold investments and the entire share capital of which is owned by one or more individuals, each of whom is an accredited investor; or
- (b) a trust (where the trustee is not an accredited investor) whose sole purpose is to hold investments and each beneficiary of the trust is an individual who is an accredited investor,

securities (as defined in Section 2(1) of the SFA) of that corporation or the beneficiaries' rights and interest (howsoever described) in that trust shall not be transferred within six months after that corporation or that trust has acquired the Securities or CIS Reference Items pursuant to an offer made under Section 305 of the SFA except:

- (1) to an institutional investor or to a relevant person, or to any person arising from an offer referred to in Section 275(1A) or Section 305A(3)(c)(ii) of the SFA;
- (2) where no consideration is or will be given for the transfer;
- (3) where the transfer is by operation of law;
- (4) as specified in Section 305A(5) of the SFA; or
- (5) as specified in Regulation 36A of the Securities and Futures (Offers of Investments) (Collective Investment Schemes) Regulations 2005 of Singapore.

Any reference to the "**SFA**" is a reference to the Securities and Futures Act 2001 and a reference to any term as defined in the SFA or any provision in the SFA is a reference to that term as modified or amended from time to time including by such of its subsidiary legislation as may be applicable at the relevant time.

Slovak Republic

For selling restrictions in respect of Slovak Republic, please see "Public Offer Selling Restrictions under the EU Prospectus Regulation" above, provided that:

"Qualified investors" for the purpose of a Slovak offering are persons specified in Article 8a paragraph 2 of Act No. 566/2001 Coll., on securities and investment services, as amended (the "**Slovak Securities Act**").

The Securities may only be offered or sold in compliance with all applicable provisions of the laws of Slovak Republic and especially in compliance with the Slovak Securities Act.

Slovenia

For selling restrictions in respect of Slovenia, please see "Prohibition of Sales to EEA Retail Investors" and "Public Offer Selling Restrictions under the EU Prospectus Regulation" above.

This Base Prospectus has not been, and no prospectus in relation to the Programme or this offer has been or will be approved by the Slovenian Securities Market Agency (*Agencija za trg vrednostnih papirjev*). Neither this Base Prospectus nor any other document connected therewith may be distributed, passed on or disclosed to any person in Slovenia, unless it has been approved by the competent authority of another EEA Member State, notified to the Slovenian Securities Market Agency by the competent authority of another EEA Member State approving the prospectus and published pursuant to the EU Prospectus Regulation.

Article 3(1) of the EU Prospectus Regulation shall not apply to offers of securities to the public if the total consideration of each such offer in the EU is less than a monetary amount calculated over a period of 12 months which shall not exceed EUR 5,000,000.

South Africa

Each Dealer has (or will have) represented, warranted and agreed that it (i) will not offer Securities for subscription, (ii) will not solicit any offers for subscription for or sale of the Securities, and (iii) will itself not sell or offer the Securities in South Africa in contravention of the South African Companies Act, 2008, the South African Banks Act, 1990, the South African Exchange Control Regulations, 1961, promulgated pursuant to the South African Currency and Exchanges Act, 1933 and/or any other applicable laws and regulations of South Africa in force from time to time.

Prior to the issue of any Securities under the Programme, each Dealer who has (or will have) agreed to place those Securities will be required to represent and agree that it will not make an "offer to the public" (as such expression is defined in the South African Companies Act, 2008, and which expression includes

any section of the public) of Securities (whether for subscription, purchase or sale) in South Africa. This Base Prospectus does not, nor is it intended to, constitute a prospectus prepared and registered under the South African Companies Act, 2008.

Offers not deemed to be offers to the public

Offers for subscription for, or sale of, Securities are not deemed to be offers to the public if:

- (a) made only to certain investors contemplated in section 96(1)(a) of the South African Companies Act, 2008; or
- (b) the total contemplated acquisition cost of Securities, for any single addressee acting as principal, is equal to or greater than ZAR 1,000,000, or such higher amount as may be promulgated by notice in the Government Gazette of South Africa pursuant to section 96(2)(a) of the South African Companies Act, 2008.

Information made available in this Base Prospectus should not be considered as "advice" as defined in the South African Financial Advisory and Intermediary Services Act, 2002.

Spain

This Base Prospectus has not been and it is not envisaged to be approved by, registered or filed with, or notified to the Spanish Securities Market Commission (*Comisión Nacional del Mercado de Valores*). It is not intended for the public offering or sale of Securities in Spain and does not constitute a prospectus (registration document or securities note) for the public offering of Securities in Spain.

Consequently, copies of this Base Prospectus or any other document relating to the Securities may not be offered, sold, delivered, marketed or distributed in Spain, and investors in the Securities may not sell, offer, deliver, market or distribute such Securities in Spain other than upon observance of and in compliance with the requirements set forth in the Prospectus Regulation, articles 35 of the Royal Legislative Decree 4/2015 of 23 October of the Securities Markets (*Real Decreto Legislativo 4/2015, de 23 de octubre, por el que se aprueba el texto refundido de la Ley del Mercado de Valores*), as amended and restated, ("**Royal Legislative Decree 4/2015**") and Article 38 of Royal Decree 1310/2005, of 4 November, partially developing Act 24/1988, of 28 July on admission to trading of securities in official secondary markets, public offerings and prospectus (*Real Decreto 1310/2005, de 4 de noviembre, por el que se desarrolla parcialmente la Ley 24/1988, de 28 de julio, del Mercado de Valores, en materia de admisión a negociación de valores en mercados secundarios oficiales, de ofertas públicas de venta o suscripción y del folleto exigible a tales efectos*), as amended and restated (the "**Royal Decree 1310/2005**") as further amended, supplemented and restated along with any other related regulations that may be in force from time to time, so that any sale or offering of the Securities in Spain is not classified as a public offering of securities in Spain.

Thereby, the Securities may not be listed, offered, sold or distributed in Spain, except in accordance with the requirements set out the Prospectus Regulation, the Royal Legislative Decree 4/2015, and the Royal Decree 1310/2005 or any other related regulations that may be in force from time to time, as further amended, supplemented or restated.

Sweden

For selling restrictions in respect of Sweden, please see "Public Offer Selling Restrictions under the EU Prospectus Regulation" above.

Switzerland

Each offeror of Securities represents and agrees that it has not made and will not make an offer of Securities to the public in Switzerland, except that it may make an offer of such Securities to the public in Switzerland

- (a) if the relevant Final Terms in respect of any Securities specify Switzerland as a Public Offer Jurisdiction, in the period beginning and ending on the dates specified in the relevant Final Terms and consent has been granted to its use for the purpose of such offer to the public in

accordance with article 36 para. 4 of the Swiss Federal Financial Services Act ("**FinSA**") and article 45 Financial Services Ordinance ("**FinSO**"); or

- (b) in any circumstances falling within the exemptions listed in article 36 para. 1 FinSA,

provided that no offer of Securities referred to in (b) above shall require the Issuer or any offeror to publish a prospectus pursuant to article 35 FinSA. For the purposes of this provision, the expression "offer to the public" refers to the respective definitions in article 3 lit. g and h FinSA and as further detailed in the FinSO.

Prohibition of Offer to Private Clients in Switzerland:

Unless the relevant Final Terms or Pricing Supplement, as the case may be, in respect of any Securities specifies the "Prohibition of Offer to Private Clients in Switzerland" to be "Not Applicable", subject to the last paragraph, each purchaser and/or offeror of the Securities represents and agrees that it has not offered and will not offer the Securities to any Private Client in Switzerland.

For the purposes of this provision:

- (a) the expression "**Private Client**" means a person who is not one (or more) of the following:
- (1) a professional client as defined in article 4 para. 3 FinSA (not having opted-in on the basis of article 5 para. 5 FinSA) or article 5 para. 1 FinSA; or
 - (2) an institutional client as defined in article 4 para. 4 FinSA; or
 - (3) a private client according to article 58 para. 2 FinSA.
- (b) the expression "**offer**" refers to the interpretation of such expression in article 58 FinSA.

Notwithstanding the above, in the case where the relevant Final Terms or Pricing Supplement, as the case may be, in respect of any Securities specifies the "Prohibition of Offer to Private Clients in Switzerland" to be applicable or in the case of the next paragraph being applicable but where subsequently a key information document under article 58 FinSA (*Basisinformationsblatt für Finanzinstrumente*) or article 59 para. 2 FinSA in respect of the Securities is published, then, following such publication, the prohibition on the offering of the Securities to Private Clients in Switzerland as described above shall no longer apply.

In the case where the Final Terms or Pricing Supplement, as the case may be, in respect of any Securities does specify the "Prohibition of Offer to Private Clients in Switzerland" to be "Not Applicable" but if for structured products only a simplified prospectus based on the transitory provision of article 111 FinSO has been prepared or, for leverage products, no key information document has been published, then after the expiry of the transitory period, the prohibition of the offering of the Securities to Private Clients in Switzerland as described above shall automatically apply, subject to the preceding paragraph.

The Netherlands

For selling restrictions in respect of The Netherlands, please see "Public Offer Selling Restrictions under the EU Prospectus Regulation" above.

United Arab Emirates (UAE)

The offering of the Securities has not been approved or licensed by the UAE Central Bank, the UAE Securities & Commodities Authority (the "**SCA**"), the DFSA or any other relevant licensing authorities in the UAE, and accordingly does not constitute a public offer of securities in the UAE in accordance with the commercial companies law, Federal Law No. 2 of 2015 (as amended), SCA Resolution No. 9 R.M. of 2016 Concerning the Regulation of Mutual Funds (as amended) or SCA Resolution No. 3 R.M. of 2017 Concerning the Organisation of Promotion and Introduction (as amended) (together the "**SCA Resolutions**") or otherwise. Accordingly, the Securities may not be offered to the public in the UAE (including the Dubai International Financial Centre).

Selling Restrictions

The Securities to be issued under this Base Prospectus have not been, and will not be, offered, sold, publicly promoted or advertised in the UAE other than in compliance with any laws applicable in the UAE governing the issue, offering and sale of the Securities.

This Base Prospectus is strictly private and confidential and is being issued to a limited number of institutional and individual investors:

- (a) who fall within the exceptions to SCA Resolutions and/or who qualify as Qualified Investors as defined under the SCA Resolutions;
- (b) upon their request and confirmation that they understand that the Securities have not been approved or licensed by or registered with the UAE Central Bank, the SCA, the DFSA or any other relevant licensing authorities or governmental agencies in the UAE; and
- (c) must not be provided to any person other than the original recipient, and may not be reproduced or used for any other purpose.

Uruguay

The Securities have not been registered with the Central Bank of Uruguay and will not be offered or sold in Uruguay through public offerings.

Venezuela

The Securities may not be offered to the public in Venezuela and may not be sold or offered in Venezuela in any manner that may be construed as a public offering, as determined under Venezuelan securities laws. The Securities may be sold by means of a private offer through sales that do not constitute a public offering, as determined under Venezuelan securities laws.

OFFERS AND SALES AND DISTRIBUTION ARRANGEMENTS

In respect of each Tranche of Securities, the relevant Issuer may retain some of the Securities which it may sell, cancel or otherwise dispose of from time to time, as the case may be, as it may determine. The relevant Issuer is entitled, at any time before the expiration or maturity of the Securities of any Tranche, to purchase or sell such Securities in the open market or through private transactions.

The issue price of any Security specified in the relevant Final Terms (the "**Issue Price**") is an initial price set by the relevant Issuer as at the date of the relevant Final Terms. Such Issuer reserves the right to offer such Securities at any other price or prices as conclusively determined by it and no Holder shall have a claim against the relevant Issuer or the Guarantor by reason of the price offered to it or any other Holder.

Goldman Sachs International ("**GSI**") (of Plumtree Court, 25 Shoe Lane, London EC4A 4AU, England) intends to issue the Securities to Holders. Each of GSW and GSFCI intends to issue the Securities to GSI. GSI (including acting through its licensed branches) shall act as Dealer and purchase all Securities from the relevant Issuer, provided that Goldman Sachs Bank Europe SE (of Marienturm, Taunusanlage, 9-10, 60329 Frankfurt am Main, Germany) may act as Dealer in respect of some or all of the Securities acquired by it from GSI.

If applicable, the relevant Final Terms will specify the name and address of any entities in respect of which the Issuer has entered into an arrangement to provide a firm commitment to act as intermediaries in secondary trading, providing liquidity through bid and offer rates and description of the main terms of their commitment.

In the case of Notes to be offered to the public in Italy and/or listed in Italian markets or traded on Italian multilateral trading facilities, where (a) liquidity enhancement agreement(s) have been entered into whereby the entities acting as price makers undertake to show given bid-prices for the acquisition of the Notes on the secondary market, and (b) the communication n. DEM/DME/9053316 dated 8 June 2009 of the Commissione Nazionale per le Società e la Borsa (CONSOB) (the "**Communication**") and/or the resolution no. 18406 dated 13 December 2012 of CONSOB (the "**Resolution**") apply or it is however required, the relevant Final Terms or notices (in compliance with the relevant Italian laws and regulations) will provide suitable disclosure of such agreement(s) according to such Communication and Resolution and the Issuer will act in compliance with such Communication and Resolution.

IMPORTANT LEGAL INFORMATION

1. This Base Prospectus and any supplements

This document (the "**Base Prospectus**") is a base prospectus prepared for the purposes of Article 8 of the EU Prospectus Regulation. It is valid for one year and may be supplemented from time to time under the terms of the EU Prospectus Regulation. Each supplement will be available for viewing on the website of the Luxembourg Stock Exchange at www.bourse.lu. In such case, in relation to a Non-Exempt Offer, investors who have already agreed to purchase or subscribe for the Securities before the supplement is published shall have the right, exercisable within the time period specified in the supplement, to withdraw their acceptances, provided that the new factor, mistake or inaccuracy giving rise to the publication of the supplement arose before the final closing of the Non-Exempt Offer and the delivery of the Securities.

This document should be read together with any supplements to it, any documents incorporated by reference within it, and the relevant Issue Terms in relation to any particular issue of Securities.

2. Responsibility statements

This Base Prospectus comprises a base prospectus in respect of Securities issued by GSI (the "**GSI Base Prospectus**"), a base prospectus in respect of Securities issued by GSW (the "**GSW Base Prospectus**") and a base prospectus in respect of Securities issued by GSFCI (the "**GSFCI Base Prospectus**"). The GSI Base Prospectus comprises all of the information in this Base Prospectus and the sections of this Base Prospectus entitled "Goldman, Sachs & Co. Wertpapier GmbH" and "Goldman Sachs Finance Corp International Ltd". The GSW Base Prospectus comprises all of the information in this Base Prospectus and the sections of this Base Prospectus entitled "Goldman Sachs International" and "Goldman Sachs Finance Corp International Ltd". The GSFCI Base Prospectus comprises all of the information in this Base Prospectus and the sections of this Base Prospectus entitled "Goldman Sachs International" and "Goldman, Sachs & Co. Wertpapier GmbH".

GSI accepts responsibility for the information contained in the GSI Base Prospectus. To the best of the knowledge of GSI, the information contained in the Base Prospectus is in accordance with the facts and does not omit anything likely to affect the import of such information. Where information contained in the Base Prospectus has been sourced from a third party, this information has been accurately reproduced and, so far as GSI is aware and is able to ascertain from information published by that third party, no facts have been omitted which would render the reproduced information inaccurate or misleading.

GSW accepts responsibility for the information contained in the GSW Base Prospectus. To the best of the knowledge of GSW, the information contained in the GSW Base Prospectus is in accordance with the facts and does not omit anything likely to affect the import of such information. Where information contained in the GSW Base Prospectus has been sourced from a third party, this information has been accurately reproduced and, so far as GSW is aware and is able to ascertain from information published by that third party, no facts have been omitted which would render the reproduced information inaccurate or misleading.

GSFCI and the directors of GSFCI accept responsibility for the information contained in the GSFCI Base Prospectus. To the best of the knowledge of GSFCI and the directors of GSFCI, the information contained in the GSFCI Base Prospectus is in accordance with the facts and does not omit anything likely to affect the import of such information. Where information contained in the GSFCI Base Prospectus has been sourced from a third party, this information has been accurately reproduced and, so far as GSFCI and the directors of GSFCI are aware and are able to ascertain from information published by that third party, no facts have been omitted which would render the reproduced information inaccurate or misleading.

GSG accepts responsibility for the information contained in this Base Prospectus. To the best of the knowledge of GSG, the information contained in the Base Prospectus is in accordance with the facts and does not omit anything likely to affect the import of such information. Where information contained in the Base Prospectus has been sourced from a third party, this information has been accurately reproduced and, so far as GSG is aware and is able to ascertain from information published by that third party, no facts have been omitted which would render the reproduced information inaccurate or misleading.

3. Consent to use this Base Prospectus

If so specified in the relevant Final Terms in respect of any particular issuance of Securities, the Issuer consents to the use of this Base Prospectus in connection with the making of an offer of the Securities to the public requiring the prior publication of a prospectus under the EU Prospectus Regulation (a "**Non-exempt Offer**") (i) by the financial intermediary/ies (each, an "**Authorised Offeror**"), (ii) during the offer period and (iii) subject to the relevant conditions, in each case as specified in the relevant Final Terms.

The consent shall be valid in relation to the Grand Duchy of Luxembourg and such of Austria, Belgium, Croatia, Czech Republic, Finland, France, Germany, Greece, Hungary, Ireland, Italy, The Netherlands, Norway, Poland, Portugal, Romania, Slovak Republic, Slovenia, Spain and Sweden, provided that it shall be a condition of such consent that the Base Prospectus may only be used by the relevant Authorised Offeror(s) to make offerings of the relevant Securities in the jurisdiction(s) in which the Non-exempt Offer is to take place, as specified in the relevant Final Terms.

The Issuer may (i) give consent to one or more additional Authorised Offerors after the date of the relevant Final Terms, (ii) discontinue or change the offer period, and/or (iii) amend the conditions of the offer. In such event, such information in relation to the relevant Securities will be published by way of a notice which will be available on the Luxembourg Stock Exchange website (www.bourse.lu) and the Goldman Sachs website (www.gs.com), provided that any extension of the offer period or any such amendment to the conditions of the offer which falls within Article 23 of the EU Prospectus Regulation shall be the subject of a supplement. The consent relates only to offer periods occurring within 12 months from the date of this Base Prospectus.

The Issuer accepts responsibility for the content of this Base Prospectus in relation to any person (an "**Investor**") purchasing Securities pursuant to a Non-exempt Offer where the offer to the Investor is made (i) by an Authorised Offeror (or the Issuer, the Guarantor or Dealer named herein), (ii) in a member state for which the Issuer has given its consent, (iii) during the offer period for which the consent is given and (iv) in compliance with the other conditions attached to the giving of the consent, all as set forth in the relevant Final Terms. However, none of the Issuer, the Guarantor and the Dealer has any responsibility for any of the actions of any Authorised Offeror, including compliance by an Authorised Offeror with applicable conduct of business rules or other local regulatory requirements or other Securities law requirements in relation to such offer.

Other than in accordance with the terms set out in the paragraph above, the Issuer has not authorised (and nor has any of the Guarantor or Dealer) the making of any Non-exempt Offers of the Securities or the use of this Base Prospectus by any person. No financial intermediary or any other person is permitted to use this Base Prospectus in connection with any offer of the Securities in any other circumstances unless otherwise agreed by the Issuer and the Guarantor. Any such offers are not made on behalf of the Issuer (or the Guarantor or Dealer) and none of the Issuer, the Guarantor and the Dealer has any responsibility or liability to any Investor purchasing Securities pursuant to such offer or for the actions of any person making such offer.

If an Investor intends to purchase Securities from an Authorised Offeror, it will do so, and such offer and sale will be made, in accordance with any terms and other arrangements in place between such Authorised Offeror and the Investor, including as to price allocations and settlement arrangements. Neither the Issuer nor the Guarantor will be a party to any such arrangements and, accordingly, this Base Prospectus does not contain such information. The terms and conditions of such offer should be provided to the Investor by that Authorised Offeror at the time such offer is made. None of the Issuer, the Guarantor or the Dealer has any responsibility or liability for such information.

4. **Content of websites does not form part of this Base Prospectus**

No content of any website, cited or referred to in this Base Prospectus, shall be deemed to form part of, or be incorporated by reference into this Base Prospectus.

5. **Yield for fixed rate and zero coupon Securities**

The yield for fixed rate and zero coupon Securities which is specified in the relevant Issue Terms is calculated as at the Issue Price on the Issue Date. It is not an indication of future yield, which will depend on the price at which the Securities were acquired.

6. Approval and passporting under the EU Prospectus Regulation

This Base Prospectus has been approved by the Commission de Surveillance du Secteur Financier (the "CSSF") which is the competent authority for the purpose of the EU Prospectus Regulation, for the purpose of giving information with regard to the issue of Securities (excluding Exempt Securities) by each of GSI, GSW and GSFCI under the Programme during the period of 12 months from the date of this Base Prospectus. The CSSF has only approved this Base Prospectus as meeting the standards of completeness, comprehensibility and consistency imposed by the EU Prospectus Regulation. Pursuant to article 6(4) of the Luxembourg Law dated 16 July 2019 on prospectuses for securities ("**Luxembourg Prospectus Law**"), by approving this Base Prospectus, the CSSF gives no undertaking as to, and assumes no responsibility for, the economic and financial characteristics of the Securities to be issued hereunder or the quality and solvency of any Issuer. Such approval should not be considered as an endorsement of the Issuers, the Guarantors or the quality of the Securities that are the subject of this Base Prospectus. Investors should make their own assessment as to the suitability of investing in the Securities.

On the approval of this Base Prospectus as a base prospectus for the purpose of Article 8 of the EU Prospectus Regulation by the CSSF, application for the notification of such approval has been made to the competent authorities of Austria, Belgium, Croatia, Czech Republic, Finland, France, Germany, Greece, Hungary, Ireland, Italy, The Netherlands, Norway, Poland, Portugal, Romania, Spain and Sweden, and subsequently to Slovak Republic and Slovenia.

The CSSF has neither approved nor reviewed the Form of Pricing Supplement (Instruments) or the Form of Pricing Supplement (Notes) and the information contained therein.

This Base Prospectus has also been approved by the Luxembourg Stock Exchange for the purpose of giving information with regard to the issue of Exempt Securities only by GSI, GSW and GSFCI under the Programme during the period of 12 months from the date of this Base Prospectus.

7. Listing the Securities and admission to trading

Application has been made to the Luxembourg Stock Exchange (the "**Luxembourg Stock Exchange**") for Securities issued under the Programme to be listed on the Official List of the Luxembourg Stock Exchange and admitted to trading on the regulated market of the Luxembourg Stock Exchange (a regulated market for the purposes of Directive 2014/65/EU on markets in financial instruments (as amended, "**MiFID II**")). Application has also been made to the Luxembourg Stock Exchange for Securities (including the Exempt Securities) to be admitted to the Official List of the Luxembourg Stock Exchange and to trading on the Luxembourg Stock Exchange's Euro MTF. The Euro MTF is not a "regulated market" for the purposes of MiFID II.

Further to the approval of the Base Prospectus by the CSSF referred to under "Approval and passporting under the EU Prospectus Regulation" above, application may also be made for the Securities to be admitted to listing and/or trading on regulated markets (as from time to time determined for the purposes of MiFID II) in any member state of the European Economic Area further to Article 25(1) of the EU Prospectus Regulation, or on any other listing authority, stock exchange or quotation system. Securities issued under the Programme may also be unlisted. The Issue Terms in respect of the issue of any Securities will specify whether or not the relevant Securities are to be listed and/or admitted to trading and, if so, on which stock exchange(s) and/or market(s). If Securities are to be listed and/or admitted to trading, the relevant Issuer is under no obligation to maintain such listing and/or admission.

8. De-listing

Although no assurance is made as to the liquidity of the Securities as a result of their listing on the Official List of the Luxembourg Stock Exchange or any other exchange, as the case may be, delisting the Securities from the Luxembourg Stock Exchange or any other regulated or unregulated market or multilateral trading facility or other trading platform, as the case may be, may have a material adverse effect on a purchaser's ability to resell its Securities in the secondary market.

9. Credit Ratings

The credit ratings of GSG¹¹ and GSI¹² referred to in this Base Prospectus have been issued by DBRS, Inc. ("**DBRS**"), Fitch, Inc. ("**Fitch**"), Moody's Investors Service, Inc. ("**Moody's**"), Standard & Poor's

¹¹ The information for this rating has been extracted from information made available by each rating agency referred to below. GSG confirms that such information has been accurately reproduced and that, so far as it is aware, and is able to ascertain from information published by such ratings agencies, no facts have been omitted which would render the reproduced inaccurate or misleading.

As of September 2022, the ratings for GSG were:

Short-term debt:

Fitch, Inc rating was F1: An 'F1' rating indicates the highest short-term credit quality and the strongest intrinsic capacity for timely payment of financial commitments; may have an added '+' to denote any exceptionally strong credit feature.

Moody's rating was P-1: 'P-1' Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations.

S&P rating was A-2: A short-term obligation rated 'A-2' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitment on the obligation is satisfactory.

DBRS rating was R-1(middle): This indicates superior credit quality. The capacity for the payment of short-term financial obligations as they fall due is very high. Differs from R-1 (high) by a relatively modest degree. Unlikely to be significantly vulnerable to future events.

R&I rating was a-1: This indicates that the certainty of the fulfilment of a short-term obligation is high.

Long-term debt:

Fitch, Inc rating was A: An 'A' rating indicates high credit quality and denotes expectations of low default risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

Moody's rating was A2: Obligations rated A are judged to be upper-medium grade and are subject to low credit risk. Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

S&P rating was BBB+: An obligation rated 'BBB+' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation. The ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

DBRS rating was A (high): An A rating indicates good credit quality. The capacity for the payment of financial obligations is substantial, but of lesser credit quality than AA. May be vulnerable to future events, but qualifying negative factors are considered manageable

R&I rating was A: This indicates a high creditworthiness supported by a few excellent factors.

¹² The information for this rating has been extracted from information made available by each rating agency referred to below. GSI confirms that such information has been accurately reproduced and that, so far as it is aware, and is able to ascertain from information published by such ratings agencies, no facts have been omitted which would render the reproduced information inaccurate or misleading.

As of September 2022, the ratings for GSI were:

Short-term debt:

Fitch, Inc rating was F1: An 'F1' rating indicates the highest short-term credit quality and the strongest intrinsic capacity for timely payment of financial commitments; may have an added '+' to denote any exceptionally strong credit feature.

Moody's rating was P-1: 'P-1' Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations.

S&P rating was A-1: A short-term obligation rated 'A-1' is rated in the highest category by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong.

Long-term debt:

Fitch, Inc rating was A+: An 'A+' rating indicates high credit quality and denotes expectations of low default risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

Moody's rating was A1: Obligations rated 'A' are considered upper-medium grade and are subject to low credit risk. Note: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from 'Aa' through 'Caa'. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Ratings Services, a division of The McGraw-Hill Companies, Inc. ("**S&P**") and Rating and Investment Information, Inc. ("**R&I**"). In general, European regulated investors are restricted from using a rating for regulatory purposes if such rating is not either (1) issued or validly endorsed by a credit rating agency established in the European Union and registered with the European Securities and Markets Authority ("**ESMA**") under Regulation (EC) No. 1060/2009, as amended by Regulation (EU) No. 513/2011 (the "**EU CRA Regulation**") or (2) issued by a credit rating agency established outside the European Union which is certified under the EU CRA Regulation.

The EU affiliates of DBRS, Fitch, Moody's and S&P are registered under the EU CRA Regulation. ESMA has approved the endorsement by such EU affiliates of credit ratings issued by DBRS, Fitch, Moody's and S&P. Accordingly, credit ratings issued by DBRS, Fitch, Moody's and S&P may be used for regulatory purposes in the EU. The credit rating issued by R&I is included in this Base Prospectus for information purposes only.

Credit ratings may be adjusted over time, and there is no assurance that these credit ratings will be effective after the date of this Base Prospectus. A credit rating is not a recommendation to buy, sell or hold any Securities. The ratings shown in this section are GSG's and GSI's own ratings and should not be treated as ratings of the Securities. If Securities are rated, the ratings assigned to the relevant Securities may be different to the ratings of GSG and GSI, as applicable. The ratings shown in this section are GSI and GSI's own ratings and should not be treated as ratings of the Securities. If Securities are rated, the ratings assigned to the relevant Securities may be different to the ratings of GSI and/or GSG.

The credit rating (if any) of a certain Series of Securities to be issued under the Programme may be specified in the relevant Issue Terms. Whether or not each credit rating applied for in relation to the relevant Series of Securities will be issued or endorsed by a credit rating agency established in the European Union and registered under the EU CRA Regulation. The list of credit rating agencies registered under the EU CRA Regulation (as updated from time to time) is published on the website of the ESMA (www.esma.europa.eu/page/list-registered-and-certified-CRAs).

10. ISDA Definitions

Where any interest and/or coupon amount payable under the Securities is calculated by reference to an ISDA Rate, investors should consult the relevant Issuer if they require an explanation of such ISDA Rate.

11. Non-equity securities

All Series of Securities issued under the Programme will not constitute "equity securities" for the purposes of Article 2(b) of the EU Prospectus Regulation and Article 2(1)(v) of the Luxembourg Prospectus Law.

12. Final Terms for certain fungible issuances

- (i) In the case of any issue of Instruments under the Programme which are to be consolidated and form a single series with an existing Series of Instruments the first tranche of which was issued under the May 2019 Base Prospectus (or for the purpose of any other Series of Instruments, including for the purposes of listing on a regulated market) in respect of which the terms and conditions of the Instruments provide that the terms and conditions from the May 2019 Base Prospectus apply, such Instruments will be documented using the May 2019 Form of Final Terms (Instruments) (which is incorporated by reference into this Base Prospectus), save that the first paragraph under the section entitled "Contractual Terms" of such Form of Final Terms (Instruments) shall be deleted in its entirety and replaced with the following:

"Terms used herein shall have the same meaning as in the General Instrument Conditions[, the Payout Conditions] [, the Coupon Payout Conditions] [, the Autocall Payout Conditions] [and the applicable Underlying Asset Conditions] set forth in the base prospectus dated [●] [as

S&P rating was A+: An obligation rated 'A+' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

The ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

supplemented by the supplement[s] dated [●],[●] [and] [●] to such base prospectus] which are incorporated by reference into the base prospectus dated 13 January 2023 (the "**Base Prospectus**"). This document constitutes the Final Terms of the [Warrants/Certificates] described herein for the purposes of Article 8 of the EU Prospectus Regulation (EU) 2017/1129 (as amended, the "**EU Prospectus Regulation**") and must be read in conjunction with the Base Prospectus [as supplemented by the supplement[s] to the Base Prospectus dated [●], [●] and [●]] which [together] constitute[s] a base prospectus for the purposes of the EU Prospectus Regulation, including the General Instrument Conditions[, the Payout Conditions] [, the Coupon Payout Conditions] [, the Autocall Payout Conditions] [and the applicable Underlying Asset Conditions] set forth in the base prospectus dated [●] (as so supplemented) which are incorporated by reference into the Base Prospectus. Full information on the Issuer, the Guarantor and the offer of the [Warrants/Certificates] is only available on the basis of the combination of these Final Terms and the Base Prospectus [as so supplemented]. The Base Prospectus [and the supplement[s] to the Base Prospectus] [is] [are] available for viewing at www.bourse.lu and during normal business hours at the registered office of the Issuer, and copies may be obtained from the specified office of the Luxembourg Paying Agent. [These Final Terms are available for viewing at www.bourse.lu] *[Include where the Securities are to be admitted to trading on the Luxembourg Stock Exchange]* [and] [●] *[insert other website if the Final Terms will be published elsewhere].]*"

- (ii) In the case of any issue of Notes under the Programme which are to be consolidated and form a single series with an existing Series of Notes the first tranche of which was issued under the May 2019 Base Prospectus (or for the purpose of any other Series of Notes, including for the purposes of listing on a regulated market) in respect of which the terms and conditions of the Notes provide that the terms and conditions from the May 2019 Base Prospectus apply, such Notes will be documented using the May 2019 Form of Final Terms (Notes) (which is incorporated by reference into this Base Prospectus), save that the first paragraph under the section entitled "Contractual Terms" of such Form of Final Terms (Notes) shall be deleted in its entirety and replaced with the following:

"Terms used herein shall have the same meaning as in the General Note Conditions[, the [EIS Note] Payout Conditions] [, the Coupon Payout Conditions][, the Autocall Payout Conditions] [and the applicable Underlying Asset Conditions] set forth in the base prospectus dated [●] [as supplemented by the supplement[s] dated [●],[●] and [●] to such base prospectus] which are incorporated by reference into the base prospectus dated 13 January 2023 (the "**Base Prospectus**"). This document constitutes the Final Terms of the Notes described herein for the purposes of Article 8 of the EU Prospectus Regulation (EU) 2017/1129 (as amended, the "**EU Prospectus Regulation**") and must be read in conjunction with the Base Prospectus [as supplemented by the supplement[s] to the Base Prospectus dated [●], [●] [and] [●]] which [together] constitute[s] a base prospectus for the purposes of the EU Prospectus Regulation, including the General Note Conditions[, the [EIS Note] Payout Conditions] [, the Coupon Payout Conditions] [, the Autocall Payout Conditions] [and the applicable Underlying Asset Conditions] set forth in the base prospectus dated [●] (as so supplemented) which are incorporated by reference into the Base Prospectus. Full information on the Issuer, the Guarantor and the offer of the Notes is only available on the basis of the combination of these Final Terms and the Base Prospectus [as so supplemented]. The Base Prospectus [and the supplement[s] to the Base Prospectus] [is] [are] available for viewing at www.bourse.lu and during normal business hours at the registered office of the Issuer, and copies may be obtained from the specified office of the Luxembourg Paying Agent. [These Final Terms are available for viewing at www.bourse.lu] *[Include where the Securities are to be admitted to trading on the Luxembourg Stock Exchange]* [and] [●] *[insert other website if the Final Terms will be published elsewhere].]*"

- (iii) In the case of any issue of Instruments under the Programme which are to be consolidated and form a single series with an existing Series of Instruments the first tranche of which was issued under the July 2019 Base Prospectus (or for the purpose of any other Series of Instruments, including for the purposes of listing on a regulated market) in respect of which the terms and conditions of the Instruments provide that the terms and conditions from the July 2019 Base Prospectus apply, such Instruments will be documented using the July 2019 Form of Final Terms (Instruments) (which is incorporated by reference into this Base Prospectus), save that

the first paragraph under the section entitled "Contractual Terms" of such Form of Final Terms (Instruments) shall be deleted in its entirety and replaced with the following:

"Terms used herein shall have the same meaning as in the General Instrument Conditions[, the Payout Conditions] [, the Coupon Payout Conditions] [, the Autocall Payout Conditions] [and the applicable Underlying Asset Conditions] set forth in the base prospectus dated [●] [as supplemented by the supplement[s] dated [●],[●] [and] [●] to such base prospectus] which are incorporated by reference into the base prospectus dated 13 January 2023 (the "**Base Prospectus**"). This document constitutes the Final Terms of the [Warrants/Certificates] described herein for the purposes of Article 8 of the EU Prospectus Regulation (EU) 2017/1129 (as amended, the "**EU Prospectus Regulation**") and must be read in conjunction with the Base Prospectus [as supplemented by the supplement[s] to the Base Prospectus dated [●], [●] and [●]] which [together] constitute[s] a base prospectus for the purposes of the EU Prospectus Regulation, including the General Instrument Conditions[, the Payout Conditions] [, the Coupon Payout Conditions] [, the Autocall Payout Conditions] [and the applicable Underlying Asset Conditions] set forth in the base prospectus dated [●] (as so supplemented) which are incorporated by reference into the Base Prospectus. Full information on the Issuer, the Guarantor and the offer of the [Warrants/Certificates] is only available on the basis of the combination of these Final Terms and the Base Prospectus [as so supplemented]. The Base Prospectus [and the supplement[s] to the Base Prospectus] [is] [are] available for viewing at www.bourse.lu and during normal business hours at the registered office of the Issuer, and copies may be obtained from the specified office of the Luxembourg Paying Agent. 13. Securities with offer periods continuing beyond the validity of the July 2022 Base Prospectus

The offer period during which a Non-exempt Offer of the Securities identified in the table below (the "**Legacy Securities**") will be made extends beyond the validity of the July 2022 Base Prospectus. Following the approval of this Base Prospectus by the CSSF, such Non-Exempt Offers will continue under this Base Prospectus until the end of the relevant offer period.

The July 2022 Base Prospectus and the Final Terms of each Series of Legacy Securities documented using the July 2022 Form of Final Terms (Instruments) or the July 2022 Form of Final Terms (Notes) are available for viewing at the website specified in the column entitled "Relevant Website" in the row corresponding to such Series of Legacy Securities in the table below (the "**Relevant Website**"). From and including the date on which this Base Prospectus is approved by the CSSF, full information on the Issuer, the Guarantor and the offer of the Legacy Securities shall only be available on the basis of the combination of the new Final Terms and this Base Prospectus.

GENERAL INFORMATION

1. Authorisations

GSI: The Programme has been authorised pursuant to a written resolution of the Executive Committee of the Board of Directors of GSI passed on 28 September 1998.

GSW: The Programme has been authorised pursuant to the Articles of Association of GSW.

GSFCI: The Programme has been authorised pursuant to a resolution of the Board of Directors of GSFCI passed on 23 December 2022.

2. Financial Statements

(a) Goldman Sachs International

The statutory financial statements of GSI for the periods ended 31 December 2021 and 31 December 2020 have been audited without qualification by PricewaterhouseCoopers LLP, Chartered Accountants and Statutory Auditors, of 7 More London Riverside, London, SE1 2RT in accordance with the laws of England. PricewaterhouseCoopers LLP is a registered member of the Institute of Chartered Accountants in England and Wales.

(b) Goldman, Sachs & Co. Wertpapier GmbH

The annual financial statements of GSW for the period ended 31 December 2021 has been audited without qualification by MAZARS GmbH & Co. KG Wirtschaftsprüfungsgesellschaft Steuerberatungsgesellschaft ("**MAZARS GmbH & Co. KG**"), of Theodor-Stern-Kai 1, 60596 Frankfurt am Main in accordance with the laws of Germany. MAZARS GmbH & Co. KG is a member of the German Chamber of Public Accountants (Wirtschaftsprüferkammer), a public body (*Körperschaft des öffentlichen Rechts*), Raucherstraße 26, 10787 Berlin.

The annual financial statements of GSW for the period ended 31 December 2020 has been audited without qualification by PricewaterhouseCoopers GmbH Wirtschaftsprüfungsgesellschaft ("**PwC GmbH**"), of Friedrich-Ebert-Anlage 35 – 37, 60327 Frankfurt am Main in accordance with the laws of Germany. PwC GmbH is a member of the German Chamber of Public Accountants (*Wirtschaftsprüferkammer*), a public body (*Körperschaft des öffentlichen Rechts*), Rauchstraße 26, 10787 Berlin.

The half-yearly financial statements of GSW for the period ended 30 June 2022 has not been audited.

(c) Goldman Sachs Finance Corp International Ltd

The annual financial statements of GSFCI for the periods ended 31 December 2021 and 31 December 2020 have been audited without qualification by PricewaterhouseCoopers LLP, Chartered Accountants and Statutory Auditors, of 7 More London Riverside, London, SE1 2RT. PricewaterhouseCoopers LLP is a registered member of the Institute of Chartered Accountants in England and Wales.

(d) The Goldman Sachs Group, Inc.

PricewaterhouseCoopers LLP, which is a member of the American Institute of Certified Public Accountants and regulated as an independent registered public accounting firm under the rules of the Public Company Accounting Oversight Board, of 300 Madison Avenue, New York, New York 10017, USA, audited GSG's consolidated statements of financial condition as of 31 December 2021 and 31 December 2020 and the related consolidated statements of earnings, cash flows and changes in shareholders' equity for the fiscal years ended 31 December 2021 and 31 December 2020 and issued unqualified audit opinions thereon.

The consolidated statements of GSG incorporated by reference in this Base Prospectus by reference from the GSG's 2021 Form 10-K for the fiscal year ended 31 December 2021 and management's assessment of the effectiveness of internal control over financial reporting (which

is included in management's report on internal control over financial reporting) have been incorporated in reliance on the report of PricewaterhouseCoopers LLP included therein given on the authority of said firm as experts in auditing and accounting.

3. No significant change in the financial position or financial performance and no material adverse change in prospects

GSI: There has been no significant change in the financial position or financial performance of GSI since 30 September 2022. There has been no material adverse change in the prospects of GSI since 31 December 2021.

GSW: There has been no significant change in the financial position or financial performance of GSW since 30 June 2022. There has been no material adverse change in the prospects of GSW since 31 December 2021.

GSFCI: There has been no significant change in the financial position or financial performance of GSFCI since 30 June 2022. There has been no material adverse change in the prospects of GSFCI since 31 December 2021.

GSG: There has been no significant change in the financial position or financial performance of GSG since 30 September 2022. There has been no material adverse change in the prospects of GSG since 31 December 2021.

In this Base Prospectus, references to the "prospects", "financial position" and "financial performance" of GSI, GSW, GSFCI and GSG are specifically to the respective ability of each of GSI, GSW, GSFCI and GSG to meet its full payment obligations under the Securities (in the case of each of GSI, GSW and GSFCI) or the Guarantees (in the case of GSI and GSG (as applicable)) in a timely manner. Material information about the respective financial condition and prospects of GSI, GSW, GSFCI and GSG is included in each of GSI's, GSW's, GSFCI's and GSG's annual and interim reports, which are incorporated by reference into this Base Prospectus.

4. Litigation

Save as disclosed in (i) "Legal Proceedings" of Note 27 to the Financial Statements (pages 209 to 218) of GSG's 2021 Form 10-K, (ii) "Legal Proceedings" of Note 27 to the Financial Statements (pages 89 to 101) of GSG's 2022 Third Quarter Form 10-Q, (iii) "Legal Proceedings" of Note 25 to the Financial Statements (pages 70 to 71) of GSI's 2021 Annual Report and (iv) "Legal Proceedings" of Note 9 to the Financial Statements (pages 11 to 12) of GSI's 2022 Third Quarter Financial Report, there have been no governmental, legal or arbitration proceedings (including any such proceedings which are pending or threatened of which GSI, GSW, GSFCI or GSG is aware) during the 12 months before the date of this Base Prospectus which may have, or have had in the recent past, significant effects on GSI, GSW, GSFCI or GSG's financial position or profitability.
