### Factors which are material for the purpose of assessing the market risks associated with Bond:

The Bonds may not be a suitable investment for all investors. Each potential investor in the Bonds must determine the suitability of that investment in light of its own circumstances. In particular, each potential investor should:

- (i) have sufficient knowledge and experience to make a meaningful evaluation of the Bonds, the merits and risks of investing in the Bonds and the information contained or incorporated by reference in this Securities Note and/or Registration Document or any applicable supplement;
- (ii) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation, an investment in the Bonds and the impact the Bonds will have on its overall investment portfolio;
- (iii) have sufficient financial resources and liquidity to bear all of the risks of an investment in the Bonds, including where the currency for principal or interest payments is different from the potential investor's currency;
- (iv) understand thoroughly the terms of the Bonds and be familiar with the behaviour of the financial markets; and
- (v) be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

### Modification and Waiver

The conditions of the Bonds contain provisions for calling meetings of bondholders to consider matters affecting their interests generally. These provisions permit defined majorities to bind all bondholders including bondholders who did not attend and vote at the relevant meeting and bondholders who voted in a manner contrary to the majority.

The power of the Bond Trustee to represent the Bondholders and the duties and authority of the Bond Trustee are described in the Bond Agreement clause 16.1 and 16.2, respectively.

## 1 Summary

Summaries are made up of disclosure requirements known as 'Elements'. These elements are numbered in Sections A – E (A.1 – E.7).

This summary contains all the Elements required to be included in a summary for this type of securities and Issuer. Because some Elements are not required to be addressed, there may be gaps in the numbering sequence of the Elements.

Even though an Element may be required to be inserted in the summary because of the type of securities and Issuer, it is possible that no relevant information can be given regarding the Element. In this case a short description of the Element is included in the summary with the mention of 'not applicable'.

### Section A Introduction and warning

D.2	Key information on the key risks that are specific to the issuer.	<p>The key risks relating to the Group and the industry in which it operates are the following:</p> <ul style="list-style-type: none"> <li>• Shipping operations may be affected by conditions beyond the Group's control such as harsh weather, capsizing, groundings, collisions, engine problems, technical problems and navigation errors which may result in loss of or damage to the Group's vessels, damage to property and damage to the environment or persons. Such events may lead to the Group being held liable for substantial amounts by injured parties, their insurers and public governments.</li> <li>• The container shipping industry is cyclical with attendant volatility in charter rates and profitability. No assurances can be made that the Group will be able to successfully employ its vessels in the future or renew existing employment agreements (including charters and pool agreements) at rates sufficient to allow it to meet its obligations.</li> <li>• Due to the lack of diversification in the Group's lines of business, an adverse development in the Group's container business, or in the container shipping industry, generally would have a significant impact on the Group's business, financial condition and results of operations.</li> <li>• The technical operation of a vessel has a significant impact on the vessel's economic life and technical risks will always be present. Failure to adequately maintain the technical operation of a vessel may adversely impact the operating expenses and other costs of the fleet owned by the Group and accordingly the</li> </ul>

		<p>potential realization values that can be obtained.</p> <ul style="list-style-type: none"> <li>• The Group will make investments in assets that are illiquid and not traded on any regulated market, and there can be no assurance that the Group will manage to achieve a successful realisation of its investments.</li> <li>• Any operational downtime of the Group's vessels or any failure to secure employment for any vessel at satisfactory rates will affect the Group's results. Furthermore, off-hire due to technical or other problems to any vessel could be materially disruptive to the Group's financial results.</li> <li>• The timing and costs of repairs on the Group's ships are difficult to predict with certainty, may be substantial and might not be covered by insurance. Large repair expenses and repair time may have a material adverse effect on the Group's business, financial condition, results of operation and liquidity.</li> <li>• Risks may arise for which the Group is not or not adequately insured. Any particular claim may not be paid or not paid in time by the Group's insurance and any claims covered by insurance would be subject to deductibles, the aggregate amount of which could be material.</li> <li>• The Group is reliant on the performance of ship managers. There can be no assurance that such ship management will operate successfully.</li> <li>• The Group is exposed to risks regarding the correct application of the tax regulations and possible changes in legal, tax and regulatory regimes within the relevant jurisdictions in which the Group operates may have an adverse effect on the Group.</li> <li>• The Group may require additional capital in the future due to unforeseen liabilities, repayment of financing obligations or in order to take advantage of business opportunities, among others. There can be no assurance that the Group will be able to obtain necessary financing in a timely manner on acceptable terms.</li> <li>• The Group may be unable to repay its financial obligations when they mature.</li> <li>• Charter hire is normally payable in USD and the value of the Group's vessels is normally denominated in USD. The Group's container vessels operate on a worldwide basis and, as a result, incur costs in currencies other than USD. Thus, currency fluctuations may affect both the Group's and consequently the investors' return, book value and value adjusted equity of subsidiaries in other currencies than USD.</li> <li>• Any changes in the interest rate would directly affect the returns on the financed investments. Interest rate levels can also indirectly affect the value of the assets at the point of sale, which will impact the value of the Group's portfolio.</li> <li>• The Group's risk management policies and procedures may leave it exposed to unidentified or unanticipated risks.</li> </ul>

## 2 Risk Factors

Investing in bonds issued by MPC Container Ships Invest B.V. (the “Issuer”) involves inherent risks. Prospective investors should consider, among other things, the risk factors set out in the Prospectus, including those related to the Issuer as set out in the Registration Document, before making an investment decision. The risks and uncertainties described in the Prospectus, including those set out in the Registration Document, are risks of which the Issuer is aware and that the Issuer considers to be material to its business. If any of these risks were to occur, the Issuer’s business, financial position, operating results or cash flows could be materially adversely affected, and the Issuer could be unable to pay interest, principal or other amounts on or in connection with the bonds. Prospective investors should also read the detailed information set out in the Registration Document dated 23 March 2018 and reach their own views prior to making any investment decision.

### **Risk related to the market in general**

All investments in interest bearing securities have risk associated with such investment. The risk is related to the general volatility in the market for such securities, varying liquidity in a single bond issue as well as company specific risk factors. There are five main risk factors that sum up the investors’ total risk exposure when investing in interest bearing securities: liquidity risk, interest rate risk, settlement risk, credit risk and market risk (both in general and issuer specific).

**Liquidity risk** is the risk that a party interested in trading bonds cannot do it because nobody in the market wants to trade the bonds. Missing demand for the bonds may result in a loss for the bondholder.

**Interest rate risk** is the risk that results from the variability of the LIBOR interest rate. The coupon payments, which depend on the LIBOR interest rate and the Margin, will vary in accordance with the variability of the LIBOR interest rate. The interest rate risk related to this bond issue will be limited, since the coupon rate will be adjusted quarterly according to the change in the reference interest rate (LIBOR 3 months) over the 5 year tenor. The primary price risk for a floating rate bond issue will be related to the market view of the correct trading level for the credit spread related to the bond issue at a certain time during the tenor, compared with the credit margin the bond issue is carrying. A possible increase in the credit spread trading level relative to the coupon defined credit margin may relate to general changes in the market conditions and/or Issuer specific circumstances. However, under normal market circumstances the anticipated tradable credit spread will fall as the duration of the bond issue becomes shorter. In general, the price of bonds will fall when the credit spread in the market increases, and conversely the bond price will increase when the market spread decreases.

**Settlement risk** is the risk that the settlement of bonds does not take place as agreed. The settlement risk consists of the failure to pay or the failure to deliver the bonds.

**Credit risk** is the risk that the Borrower fails to make the required payments under the Loan (either principal or interest).

**Market risk** is the risk that the value of the bonds will decrease due to the change in value of the market risk factors. The price of a single bond issue will fluctuate in accordance with the interest rate and credit markets in general, the market view of the credit risk of that particular bond issue, and the liquidity of this bond issue in the market. In spite of an underlying positive development in the Issuers business activities, the price of a bond may fall independent of this fact. Bond issues with a relatively short tenor and a floating rate coupon rate do however in general carry a lower price risk compared to bonds with a longer tenor and/or with a fixed coupon rate.

No market-maker agreement is entered into in relation to this bond issue, and the liquidity of bonds will at all times depend on the market participants view of the credit quality of the Issuer as well as established and available credit lines.

**Tax risk** are due to tax laws and regulations that are highly complex and subject to interpretation. Consequently, the Group is subject to changing tax laws, treaties and regulations in and between countries in which it operates.

### **Risk related to the Bonds**

#### **Collateral risk**

Although the bonds are secured, there can be no assurance that the value of the Issuer’s and Guarantors’ assets will be sufficient to cover all the outstanding bonds together with accrued interest and expenses in case of a default. The Issuer will have a significant amount of debt after the issuance of the bonds.

#### **Refinancing risk**

The Issuer may in the future be required to refinance certain or all of its outstanding debt, including the Bonds. The Issuer’s ability to successfully refinance such debt is dependent on the conditions of the financial markets in general at such time, and deterioration in the financial position of the Group. Such deterioration may reduce the Group’s ability to obtain any debt financing required to repay Bondholders at the time of the maturity of the Bonds. As a result, the Issuer’s access to financing sources at a particular time, may not be available on favourable terms, or at all. The

Issuer's inability to refinance its debt obligations on favourable terms, or at all, could have a material adverse effect on the Group's business, financial condition and results of operations and on the Issuer's ability to repay amounts due under the Bonds.

***Risks related to early redemption***

Pursuant to the bond agreement, the Issuer may prepay bonds prior to their maturity date. The amount to be paid to each bondholder if such option is exercised is equal to their outstanding principal amount of the bonds, plus accrued and unpaid interest to the date of redemption and a premium calculated in accordance with the terms and conditions of the bond agreement. The call option mechanism may limit the market value of the bonds. The Issuer may be expected to redeem the bonds when its general cost of borrowing is lower than the interest rate on the bonds. At those times, an investor generally would not be able to reinvest the redemption proceeds at an effective interest as high as the interest rate on the bonds and may only be able to do so at a significantly lower rate. Potential investors should consider reinvestment risk in light of other investments available at that time.

***Change of control– the Issuer's ability to redeem the bonds with cash may be limited***

The Issuer's ability to redeem the Bonds with cash may be limited. Upon the occurrence of a change of control event, each individual bondholder shall have a right of pre-payment of the Bonds as set out in the Bond Agreement. However, it is possible that the Issuer may not have sufficient funds to make the required redemption of Bonds, resulting in an event of default under the Bonds. The Issuer's failure to redeem tendered bonds would constitute an event of default under the bond agreement.

***There may only be a limited trading market for bonds***

There is no existing market for the bonds, and there can be no assurance given regarding the future development of a market for the bonds and therefore, the liquidity of the bond and the volume it is traded in cannot be guaranteed. This may apply even if the bonds are listed and there are no market-makers agreements in place or intended to be established in order to secure a liquid market for the bonds after the issue date.

***The market price of the bonds may be volatile***

The market price of the bonds may experience significant fluctuations in response to actual or anticipated variations in the Issuer's operating results and those of its competitors, adverse business developments, changes to the regulatory environment in which the Issuer operates, changes in financial estimates by securities analysts and the actual or expected sale of a large number of bonds, as well as other factors. In addition, in recent years the global financial markets have experienced significant price and volume fluctuations, which, if repeated in the future, could adversely affect the market price of the bonds without regard to the Issuer's operating results, financial condition or prospects.

***Modifications to bond terms and waivers***

The bond terms will contain provisions for calling meetings of bondholders to consider matters affecting their interests generally. These provisions permit defined majorities to bind all bondholders, including bondholders who did not attend and vote at the relevant meeting and bondholders who voted in a manner contrary to the majority. The trustee may agree. Without the consent of the bondholders. To certain modifications to the bond terms and finance documents (as defined in the bond terms) which are, in the opinion of the bond trustee, proper to make. Such modifications, which will be binding upon the bondholders, will be described in the bond terms.

Each Bondholder may exercise its Put Option by written notice to its account manager for the CSD, who will notify the Paying Agent of the exercise of the Put Option. No vote may be cast by any nominee if the Bondholder has presented relevant evidence to the Bond Trustee pursuant to Clause 3.3 (Bondholders' rights) stating that it is the owner of the Bonds voted for. If the Bondholder has voted directly for any of its nominee registered Bonds, the Bondholder's votes shall take precedence over votes submitted by the nominee for the same Bonds.

A Summons for a repeated Bondholders' Meeting shall also contain the voting results obtained in the initial Bondholders' Meeting.
- (c) A repeated Bondholders' Meeting may only be convened once for each original Bondholders' Meeting. A repeated Bondholders' Meeting may be convened pursuant to the procedures of a Written Resolution in accordance with Clause 15.5 (Written Resolutions), even if the initial meeting was held pursuant to the procedures of a Bondholders' Meeting in accordance with Clause 15.2 (Procedure for arranging a Bondholders' Meeting) and vice versa.

#### 15.5 Written Resolutions

- (a) Subject to these Bond Terms, anything which may be resolved by the Bondholders in a Bondholders' Meeting pursuant to Clause 15.1 (Authority of the Bondholders' Meeting) may also be resolved by way of a Written Resolution. A Written Resolution passed with the relevant majority is as valid as if it had been passed by the Bondholders in a Bondholders' Meeting, and any reference in any Finance Document to a Bondholders' Meeting shall be construed accordingly.
- (b) The person requesting a Bondholders' Meeting may instead request that the relevant matters are to be resolved by Written Resolution only, unless the Bond Trustee decides otherwise.
- (c) The Summons for the Written Resolution shall be sent to the Bondholders registered in the CSD at the time the Summons is sent from the CSD and published at the Bond Trustee's web site, or other relevant electronic platform or via press release.

- (f) Only Bondholders of Voting Bonds registered with the CSD on the Relevant Record Date, or the beneficial owner thereof having presented relevant evidence to the Bond Trustee pursuant to Clause 3.3 (Bondholders’ rights), will be counted in the Written Resolution.
- (g) A Written Resolution is passed when the requisite majority set out in paragraph (e) or paragraph (f) of Clause 15.1 (Authority of Bondholders’ Meeting) has been achieved, based on the total number of Voting Bonds, even if the Voting Period has not yet expired. A Written Resolution may also be passed if the sufficient numbers of negative votes are received prior to the expiry of the Voting Period.
- (h) The effective date of a Written Resolution passed prior to the expiry of the Voting Period is the date when the resolution is approved by the last Bondholder that results in the necessary voting majority being achieved.
- (i) If no resolution is passed prior to the expiry of the Voting Period, the number of votes shall be calculated at the close of business on the last day of the Voting Period, and a decision will be made based on the quorum and majority requirements set out in paragraphs (d) to (f) of Clause 15.1 (Authority of Bondholders’ Meeting).
