Product Prospectus Supplement MLN-ES-ETF-1 dated June 19, 2019 and
Prospectus Dated June 18, 2019

The Toronto-Dominion Bank

\$1,525,000

Autocallable Fixed Interest Barrier Notes Linked to the Least Performing among the Common Stock of Apple Inc., the Common Stock of Amazon.com, Inc., the Class C Capital Stock of Alphabet Inc. and the Common Stock of Netflix, Inc. Due April 19, 2023

The Toronto-Dominion Bank ("TD" or "we") has offered the Autocallable Fixed Interest Barrier Notes (the "Notes") linked to the least performing among the common stock of Apple Inc., the common stock of Amazon.com, Inc., the class C capital stock of Alphabet Inc. and the common stock of Netflix, Inc. (each, a "Reference Asset" and together, the "Reference Assets").

The Notes will pay you an Interest Payment on each Interest Payment Date (including the Maturity Date) at a per annum rate of 9.60% (the "Interest Rate"), regardless of the performance of the Reference Assets, unless the Notes are subject to an automatic call. The Notes will be automatically called if, on any Call Observation Date, the Closing Value of each Reference Asset is greater than or equal to its Call Threshold Value, which is equal to 100.00% of its Initial Value. If the Notes are automatically called, on the first following Interest Payment Date (the "Call Payment Date"), we will pay a cash payment per Note equal to the Principal Amount, plus the Interest Payment otherwise due. No further amounts will be owed under the Notes. If the Notes are not automatically called, the amount we pay at maturity, in addition to the Interest Payment otherwise due, if anything, will depend on the Closing Value of each Reference Asset on its Final Valuation Date (each, its "Final Value") relative to its Barrier Value, which is equal to 60.00% of its Initial Value. The payment at maturity will be calculated as follows:

- If the Final Value of each Reference Asset is greater than or equal to its Barrier Value:
the Principal Amount of \$1,000
- If the Final Value of any Reference Asset is less than its Barrier Value:
the sum of (1) \$1,000 plus (2) the product of (i) \$1,000 times (ii) the Least Performing Percentage Change

In this scenario, investors will suffer a loss on their initial investment that is proportionate to the Reference Asset with the lowest percentage change from its Initial Value to its Final Value (the "Least Performing Reference Asset") over the term of the Notes. Specifically, investors will lose 1% of the Principal Amount of the Notes for each 1% that the Final Value of the Least Performing Reference Asset is less than its Initial Value, and may lose the entire Principal Amount. Any payments on the Notes are subject to our credit risk.

The Notes do not guarantee the return of the Principal Amount. Investors are exposed to the market risk of each Reference Asset on each Call Observation Date and the Final Valuation Date and any decline in the value of one Reference Asset will not be offset or mitigated by a lesser decline or potential increase in the value of any other Reference Asset. If the Final Value of any Reference Asset is less than its Barrier Value, investors may lose up to their entire investment in the Notes. Any payments on the Notes are subject to our credit risk.

The Notes are unsecured and are not savings accounts or insured deposits of a bank. The Notes are not insured or guaranteed by the Canada Deposit Insurance Corporation, the U.S. Federal Deposit Insurance Corporation or any other governmental agency or instrumentality of Canada or the United States. The Notes will not be listed or displayed on any securities exchange or electronic communications network.

The Notes have complex features and investing in the Notes involves a number of risks. See "Additional Risk Factors" beginning on page P-7 of this pricing supplement, "Additional Risk Factors Specific to the Notes" beginning on page PS-6 of the product prospectus supplement MLN-ES-ETF-1 dated June 19, 2019 (the "product prospectus supplement") and "Risk Factors" on page 1 of the prospectus dated June 18, 2019 (the "prospectus").

Neither the Securities and Exchange Commission (the "SEC") nor any state securities commission has approved or disapproved of these Notes or determined that this pricing supplement, the product prospectus supplement or the prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

We will deliver the Notes in book-entry only form through the facilities of The Depository Trust Company on the Issue Date against payment in immediately available funds. The estimated value of your Notes at the time the terms of your Notes were set on the Pricing Date was \$904.70 per Note, as discussed further under "Additional Risk Factors—Estimated Value" beginning on page P-8 and "Additional Information Regarding the Estimated Value of the Notes" on page P-21 of this pricing supplement. The estimated value is less than the public offering price of the Notes.

	Public Offering Price ¹	Underwriting Discount ²	Proceeds to TD ²
Per Note	\$1,000.00	\$32.50	\$967.50
Total	\$1,525,000.00	\$49,562.50	\$1,475,437.50

¹ Certain dealers who purchase the Notes for sale to certain fee-based advisory accounts may have agreed to forgo some or all of their selling concessions, fees or commissions. The public offering price for investors purchasing the Notes in these accounts may have been as low as \$967.50 (96.75%) per \$1,000.00 Principal Amount of the Notes.

² TD Securities (USA) LLC ("TDS") will receive a commission of \$32.50 (3.25%) per \$1,000.00 principal amount of the Notes and will use all of that commission to allow selling concessions to other dealers in connection with the distribution of the Notes, or will offer the Notes directly to investors. TDS may resell the Notes to other securities dealers at the Principal Amount less a concession of \$32.50 per Note. The other dealers may have agreed to forgo, in their sole discretion, some or all of their selling concessions. TD will reimburse TDS for certain expenses in connection with its role in the offer and sale of the Notes, and TD will pay TDS a fee in connection with its role in the offer and sale of the Notes. See "Supplemental Plan of Distribution (Conflicts of Interest)" herein.

The public offering price, underwriting discount and proceeds to TD listed above relate to the Notes we issue initially. We may decide to sell additional Notes after the date of this pricing supplement, at public offering prices and with underwriting discounts and proceeds to TD that differ from the amounts set forth above. The return (whether positive or negative) on your investment in the Notes will depend in part on the public offering price you pay for such Notes.

Autocallable Fixed Interest Barrier Notes Linked to the Least Performing among the Common Stock of Apple Inc., the Common Stock of Amazon.com, Inc., the Class C Capital Stock of Alphabet Inc. and the Common Stock of Netflix, Inc. Due April 19, 2023

Summary

The information in this “Summary” section is qualified by the more detailed information set forth in this pricing supplement, the product prospectus supplement and the prospectus.

Issuer:	TD
Issue:	Senior Debt Securities, Series E
Type of Note:	Autocallable Fixed Interest Barrier Notes
Term:	Approximately 36 months, subject to an automatic call
Reference Assets:	The common stock of Apple Inc. (Bloomberg ticker: AAPL, “AAPL”), the common stock of Amazon.com, Inc. (Bloomberg ticker: AMZN, “AMZN”), the class C capital stock of Alphabet Inc. (Bloomberg ticker: GOOG, “GOOG”) and the common stock of Netflix, Inc. (Bloomberg ticker: NFLX, “NFLX”)
CUSIP / ISIN:	89114RHF6 / US89114RHF64
Agent:	TDS
Currency:	U.S. Dollars
Minimum Investment:	\$1,000 and minimum denominations of \$1,000 in excess thereof
Principal Amount:	\$1,000 per Note
Pricing Date:	April 15, 2020
Issue Date:	April 20, 2020, which is three Business Days following the Pricing Date. Under Rule 15c6-1 of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), trades in the secondary market generally are required to settle in two Business Days (“T+2”), unless the parties to a trade expressly agree otherwise. Accordingly, purchasers who wish to trade the Notes in the secondary market on any date prior to two Business Days before delivery of the Notes will be required, by virtue of the fact that each Note initially will settle in three Business Days (“T+3”), to specify alternative settlement arrangements to prevent a failed settlement of the secondary market trade.
Final Valuation Date:	April 17, 2023, or If such day is not a Trading Day, the first following Trading Day, subject to postponement in the same manner as a Call Observation Date, as described below under “Call Observation Dates” and as described under “General Terms of the Notes—Market Disruption Events” in the product prospectus supplement.
Maturity Date:	April 19, 2023, or, if such day is not a Business Day, the first following Business Day, subject to postponement as described below under “Call Observation Dates”.
Call Feature:	If the Closing Value of each Reference Asset on any Call Observation Date is greater than or equal to its Call Threshold Value, we will automatically call the Notes and, on the related Call Payment Date, will pay you a cash payment equal to the Principal Amount plus the Interest Payment otherwise due. No further amounts will be owed to you under the Notes.

Call Threshold Value: With respect to AAPL, \$284.43 (100.00% of its Initial Value).
 With respect to AMZN, \$2,307.68 (100.00% of its Initial Value).
 With respect to GOOG, \$1,262.47 (100.00% of its Initial Value).
 With respect to NFLX, \$426.75 (100.00% of its Initial Value).
 Each Call Threshold Value is determined by the Calculation Agent and is subject to adjustment as described under “General Terms of the Notes—Anti-Dilution Adjustments” in the product prospectus supplement.

Call Observation Dates: Quarterly, on the 15th calendar day of each January, April, July and October, commencing on October 15, 2020 and ending on January 15, 2023, or, if such day is not a Trading Day, the next following Trading Day. If a Market Disruption Event occurs or is continuing with respect to a Reference Asset on any Call Observation Date, the Call Observation Date for the affected Reference Asset will be postponed until the next Trading Day on which no Market Disruption Event occurs or is continuing for that Reference Asset. In no event, however, will any Call Observation Date for any Reference Asset be postponed by more than eight Trading Days. If the determination of the Closing Value of a Reference Asset for any Call Observation Date is postponed to the last possible day, but a Market Disruption Event occurs or is continuing on that day, that day will nevertheless be the date on which the Closing Value of such Reference Asset will be determined. In such an event, the Calculation Agent will estimate the Closing Value that would have prevailed in the absence of the Market Disruption Event. For the avoidance of doubt, if on any Call Observation Date, no Market Disruption Event occurs or is continuing with respect to a particular Reference Asset, the Call Observation Date for such Reference Asset will be made on the originally scheduled Observation Date irrespective of the occurrence of a Market Disruption event with respect to another Reference Asset. If a Call Observation Date or the Final Valuation Date is postponed, the corresponding Call Payment Date, Interest Payment Date and/or Maturity Date, as applicable, will be postponed to maintain the same number of Business Days between such dates as existed prior to the postponement(s).

Call Payment Date: If the Notes are subject to an automatic call, the Call Payment Date will be the Interest Payment Date immediately following the relevant Call Observation Date, subject to postponement as described above under “Call Observation Dates” if the related Call Observation Date is postponed or, if such day is not a Business Day, the next following Business Day.

Interest Payment: An Interest Payment will be paid to you on the corresponding Interest Payment Date regardless of the performance of each Reference Asset (unless the Notes are subject to an automatic call), in an amount equal to:

$$\text{Principal Amount} \times \text{Interest Rate} \times 1/12$$

All amounts used in or resulting from any calculation relating to an Interest Payment will be rounded upward or downward, as appropriate, to the nearest tenth of a cent.

Interest Rate: 9.60% per annum

Interest Payment Dates: As indicated below, subject to the Call Feature. If an Interest Payment Date falls on a day that is not a Business Day, that Interest Payment Date will be the next following Business Day. Each Interest Payment Date following any Call Observation Date is subject to postponement as described above under “Call Observation Dates”.

Interest Payment Dates	Interest Payment Dates (continued)	Interest Payment Dates (continued)
May 19, 2020	May 19, 2021	May 18, 2022
June 17, 2020	June 17, 2021	June 17, 2022
July 17, 2020	July 19, 2021*	July 19, 2022*
August 19, 2020	August 18, 2021	August 17, 2022
September 17, 2020	September 17, 2021	September 19, 2022

October 19, 2020*	October 19, 2021*	October 19, 2022*
November 18, 2020	November 17, 2021	November 17, 2022
December 17, 2020	December 17, 2021	December 19, 2022
January 20, 2021*	January 20, 2022*	January 19, 2023*
February 18, 2021	February 17, 2022	February 17, 2023
March 17, 2021	March 17, 2022	March 17, 2023
April 19, 2021*	April 20, 2022*	Maturity Date

* Also a potential Call Payment Date

Payment at Maturity: If the Notes are not automatically called, on the Maturity Date, in addition to the Interest Payment otherwise due, we will pay a cash payment, if anything, per Note equal to:

If the Final Value of each Reference Asset is greater than or equal to its Barrier Value:

Principal Amount of \$1,000.

If the Final Value of any Reference Asset is less than its Barrier Value:

$\$1,000 + \$1,000 \times \text{Least Performing Percentage Change}$.

In this scenario, investors will suffer a loss on their initial investment that is proportionate to the Reference Asset with the lowest percentage change from its Initial Value to its Final Value (the “Least Performing Reference Asset”) over the term of the Notes. Specifically, investors will lose 1% of the Principal Amount of the Notes for each 1% that the Final Value of the Least Performing Reference Asset is less than its Initial Value, and may lose the entire Principal Amount. Any payments on the Notes are subject to our credit risk.

All amounts used in or resulting from any calculation relating to the Payment at Maturity will be rounded upward or downward, as appropriate, to the nearest cent.

Percentage Change: For each Reference Asset, the Percentage Change is the quotient, expressed as a percentage, of the following formula:

$$\frac{\text{Final Value} - \text{Initial Value}}{\text{Initial Value}}$$

Initial Value: With respect to AAPL, \$284.43
 With respect to AMZN, \$2,307.68
 With respect to GOOG, \$1,262.47
 With respect to NFLX, \$426.75
 The Initial Value of each Reference Asset equals its Closing Value on the Pricing Date, as determined by the Calculation Agent and subject to adjustment as described under “General Terms of the Notes—Anti-Dilution Adjustments” in the product prospectus supplement.

Closing Value: As described under “General Terms of the Notes—Closing Price” in the product prospectus supplement.

Final Value: For each Reference Asset, the Closing Value of such Reference Asset on its Final Valuation Date.

Barrier Value: With respect to AAPL, \$170.658 (60.00% of its Initial Value).
 With respect to AMZN, \$1,384.608 (60.00% of its Initial Value).

With respect to GOOG, \$757.482 (60.00% of its Initial Value).

With respect to NFLX, \$256.05 (60.00% of its Initial Value).

Each Barrier Value is determined by the Calculation Agent and is subject to adjustment as described under “General Terms of the Notes—Anti-Dilution Adjustments” in the product prospectus supplement.

Least Performing Reference Asset:	The Reference Asset with the lowest Percentage Change as compared to the Percentage Change of any other Reference Asset.
Least Performing Percentage Change:	The Percentage Change of the Least Performing Reference Asset.
Monitoring Period:	Final Valuation Date Monitoring
Trading Day:	A day on which the principal trading market(s) for each Reference Asset is scheduled to be open for trading, as determined by the Calculation Agent.
Business Day:	Any day that is a Monday, Tuesday, Wednesday, Thursday or Friday that is neither a legal holiday nor a day on which banking institutions are authorized or required by law to close in New York City.
U.S. Tax Treatment:	By purchasing the Notes, you agree, in the absence of a statutory or regulatory change or an administrative determination or judicial ruling to the contrary, to treat the Notes, for U.S. federal income tax purposes, as consisting of two components for U.S. federal income tax purposes: (1) a non-contingent debt instrument (the “Debt Component”); and (2) a put option contract in respect of the Reference Assets (the “Put Option Component”), allocated as specified herein under “Material U.S. Federal Income Tax Consequences”. Based on certain factual representations received from us, our special U.S. tax counsel, Cadwalader, Wickersham & Taft LLP, is of the opinion that it would be reasonable to treat the Notes in the manner described above. However, because there is no authority that specifically addresses the tax treatment of the Notes, it is possible that your Notes could alternatively be treated for tax purposes as a single contingent payment debt instrument, or pursuant to some other characterization, such that the timing and character of your income from the Notes could differ materially and adversely from the treatment described above, as described further herein under “Material U.S. Federal Income Tax Consequences” herein and in the product prospectus supplement under “Material U.S. Federal Income Tax Consequences”.
Canadian Treatment:	Tax Please see the discussion in the product prospectus supplement under “Supplemental Discussion of Canadian Tax Consequences,” which applies to the Notes.
Record Date:	The Business Day preceding the relevant Interest Payment Date, provided that if you sell the Notes in the secondary market on a Call Observation Date, assuming the standard T+2 settlement, the purchaser of the Notes shall be deemed to be the record holder as of the applicable record date and, therefore, you will not be entitled to any payment on the Interest Payment Date or Call Settlement Date, as applicable.
Calculation Agent:	TD
Listing:	The Notes will not be listed or displayed on any securities exchange or electronic communications network.
Canadian Bail-in:	The Notes are not bail-inable debt securities (as defined in the prospectus) under the Canada Deposit Insurance Corporation Act.

Additional Terms of Your Notes

You should read this pricing supplement together with the prospectus, as supplemented by the product prospectus supplement MLN-ES-ETF-1 (the “product prospectus supplement”), relating to our Senior Debt Securities, Series E, of which these Notes are a part. Capitalized terms used but not defined in this pricing supplement will have the meanings given to them in the product prospectus supplement. In the event of any conflict the following hierarchy will govern: first, this pricing supplement; second, the product prospectus supplement; and last, the prospectus.

The Notes vary from the terms described in the product prospectus supplement in several important ways. You should read this pricing supplement carefully.

This pricing supplement, together with the documents listed below, contains the terms of the Notes and supersedes all prior or contemporaneous oral statements as well as any other written materials including preliminary or indicative pricing terms, correspondence, trade ideas, structures for implementation, sample structures, brochures or other educational materials of ours. You should carefully consider, among other things, the matters set forth in “Additional Risk Factors” herein, “Additional Risk Factors Specific to the Notes” in the product prospectus supplement and “Risk Factors” in the prospectus, as the Notes involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisors concerning an investment in the Notes. You may access these documents on the SEC website at www.sec.gov as follows (or if that address has changed, by reviewing our filings for the relevant date on the SEC website):

? Prospectus dated June 18, 2019:

<http://www.sec.gov/Archives/edgar/data/947263/000119312519175701/d741334d424b3.htm>

? Product Prospectus Supplement MLN-ES-ETF-1 dated June 19, 2019:

<http://www.sec.gov/Archives/edgar/data/947263/000114036119011260/form424b3.htm>

Our Central Index Key, or CIK, on the SEC website is 0000947263. As used in this pricing supplement, the “Bank,” “we,” “us,” or “our” refers to The Toronto-Dominion Bank and its subsidiaries.

We reserve the right to change the terms of, or reject any offer to purchase, the Notes prior to their issuance. In the event of any changes to the terms of the Notes, we will notify you and you will be asked to accept such changes in connection with your purchase. You may also choose to reject such changes, in which case we may reject your offer to purchase.

TD SECURITIES (USA) LLC

P-6

Additional Risk Factors

The Notes involve risks not associated with an investment in conventional debt securities. This section describes the most significant risks relating to the terms of the Notes. For additional information as to these and other risks, please see “Additional Risk Factors Specific to the Notes” in the product prospectus supplement and “Risk Factors” in the prospectus.

Investors should consult their investment, legal, tax, accounting and other advisors as to the risks entailed by an investment in the Notes and the suitability of the Notes in light of their particular circumstances.

Your Investment in the Notes May Result in a Loss.

The Notes do not guarantee the return of the Principal Amount and investors may lose up to their entire investment in the Notes. Specifically, if the Notes are not automatically called and the Final Value of any Reference Asset is less than its Barrier Value, investors will lose 1% of the Principal Amount of the Notes for each 1% that the Final Value of the Least Performing Reference Asset is less than its Initial Value, and may lose the entire Principal Amount.

The Potential Positive Return on the Notes Is Limited to the Interest Payments Paid on the Notes, Regardless of Any Appreciation in the Price of Any Reference Asset.

The potential positive return on the Notes is limited to the Interest Payments paid, meaning any positive return on the Notes will be composed solely by the sum of the Interest Payments paid over the term of the Notes. Therefore, if the appreciation of any Reference Asset exceeds the sum of the Interest Payments actually paid on the Notes, the return on the Notes will be less than that on a direct investment in such Reference Asset or on a security directly linked to the positive performance of such Reference Asset.

Your Return May Be Less than the Return on a Conventional Debt Security of Comparable Maturity.

The return that you will receive on your Notes, which could be negative, may be less than the return you could earn on other investments. Even if the Notes are not subject to an automatic call and your return on the Notes is positive, your return may be less than the return you would earn if you bought a conventional, interest-bearing senior debt security of TD of comparable maturity or if you invested directly in any of the Reference Assets. Your investment may not reflect the full opportunity cost to you when you take into account factors that affect the time value of money.

The Notes May Be Automatically Called Prior to the Maturity Date And Are Subject to Reinvestment Risk.

If your Notes are automatically called, no further payments will be owed to you under the Notes after the applicable Call Payment Date. Therefore, because the Notes could be called as early as the first potential Call Payment Date, the holding period could be limited. There is no guarantee that you would be able to reinvest the proceeds from an investment in the Notes at a comparable return for a similar level of risk in the event the Notes are automatically called prior to the Maturity Date. Furthermore, to the extent you are able to reinvest such proceeds in an investment with a comparable return for a similar level of risk, you may incur transaction costs such as dealer discounts and hedging costs built into the price of the new notes.

Investors Are Exposed to the Market Risk of Each Reference Asset.

Your return on the Notes is not linked to a basket consisting of the Reference Assets. Rather, it will be contingent upon the performance of each Reference Asset. Unlike an instrument with a return linked to a basket of indices, common stocks or other underlying securities, in which risk is mitigated and diversified among all of the components of the basket, you will be exposed equally to the risks related to each Reference Asset on the Final Valuation Date. Poor performance by any Reference Asset as of the Final Valuation Date will negatively affect your return and will not be offset or mitigated by any positive performance of any other Reference Asset as of such date. For instance, you will receive a negative return equal to the Least Performing Percentage Change if the Final Value of any Reference Asset is less than its Barrier Value on its Final Valuation Date, even if the Percentage Change of another Reference Asset is positive or has not declined as much. Accordingly, your investment is subject to the market risk of each Reference Asset.

Because the Notes are Linked to the Least Performing Reference Asset, You Are Exposed to a Greater Risk of Losing a Significant Portion or All of Your Initial Investment at Maturity than if the Notes Were Linked to a Single Reference Asset or Fewer Reference Assets.

The risk that (i) the Final Value of any Reference Asset is less than its Barrier Value and (ii) that you will lose a significant portion or all of your initial investment in the Notes is greater if you invest in the Notes than the risk of investing in substantially similar securities that are linked to the performance of only one Reference Asset or fewer Reference Assets. With more Reference Assets, it is more likely that the Final Value of any Reference Asset will be less than its Barrier Value on the Final Valuation Date than if the Notes were linked to a single Reference Asset or fewer Reference Assets.

In addition, the lower the correlation is between the performance of a pair of Reference Assets, the more likely it is that one of the Reference Assets will decline in value to a Final Value that is less than its Barrier Value on the Final Valuation Date. Although the correlation of the Reference Assets' performance may change over the term of the Notes, the economic terms of the Notes, including the Barrier Value and Interest Rate are determined, in part, based on the correlation of the Reference Assets' performance calculated using our internal models at the time when the terms of the Notes are finalized. All things being equal, a higher Interest Rate and lower Barrier Values are generally associated with lower correlation of the Reference Assets. Therefore, if the performance of a pair of Reference Assets is not correlated to each other or is negatively correlated, the risk that the Final Value of any Reference Asset is less than its Barrier Value on the Final Valuation Date is even greater despite a lower Barrier Value. Therefore, it is more likely that the Final

TD SECURITIES (USA) LLC

P-7

Value of a Reference Asset will be less than its Barrier Value and that you will lose a significant portion or all of your initial investment at maturity.

Investors Are Subject to TD's Credit Risk, and TD's Credit Ratings and Credit Spreads May Adversely Affect the Market Value of the Notes.

Although the return on the Notes will be based on the performance of the Least Performing Reference Asset, the payment of any amount due on the Notes is subject to TD's credit risk. The Notes are TD's senior unsecured debt obligations. Investors are dependent on TD's ability to pay all amounts due on the Notes and, therefore, investors are subject to the credit risk of TD and to changes in the market's view of TD's creditworthiness. Any decrease in TD's credit ratings or increase in the credit spreads charged by the market for taking TD's credit risk is likely to adversely affect the market value of the Notes. If TD becomes unable to meet its financial obligations as they become due, investors may not receive any amounts due under the terms of the Notes.

The Agent Discount, Offering Expenses and Certain Hedging Costs Are Likely to Adversely Affect Secondary Market Prices.

Assuming no changes in market conditions or any other relevant factors, the price, if any, at which you may be able to sell the Notes will likely be less than the public offering price. The public offering price includes, and any price quoted to you is likely to exclude, any underwriting discount paid in connection with the initial distribution, offering expenses as well as the cost of hedging our obligations under the Notes. In addition, any such price is also likely to reflect dealer discounts, mark-ups and other transaction costs, such as a discount to account for costs associated with establishing or unwinding any related hedge transaction.

There May Not Be an Active Trading Market for the Notes — Sales in the Secondary Market May Result in Significant Losses.

There may be little or no secondary market for the Notes. The Notes will not be listed or displayed on any securities exchange or electronic communications network. The Agent may make a market for the Notes; however, it is not required to do so and may stop any market-making activities at any time. Even if a secondary market for the Notes develops, it may not provide significant liquidity or trade at prices advantageous to you. We expect that transaction costs in any secondary market would be high. As a result, the difference between bid and ask prices for your Notes in any secondary market could be substantial.

If you sell your Notes before the Maturity Date, you may have to do so at a substantial discount from the public offering price irrespective of the value of the then-current least performing Reference Asset, and as a result, you may suffer substantial losses.

The Interest Rate Will Reflect, In Part, the Volatility of each Reference Asset and May Not Be Sufficient to

Compensate You for the Risk of Loss at Maturity.

Generally, the higher the Reference Assets' volatility, the more likely it is that the Closing Value of each Reference Asset could be less than its Barrier Value on the Final Valuation Date. Volatility means the magnitude and frequency of changes in the values of the Reference Assets. This greater risk will generally be reflected in a higher Interest Rate for the Notes than the interest rate payable on our conventional debt securities of comparable maturity. However, while the Interest Rate is set on the Pricing Date, the Reference Assets' volatility can change significantly over the term of the Notes, and may increase. The value of any Reference Asset could fall sharply during the term of the Notes, including on the Final Valuation Date, resulting in an increased risk of being exposed to the Least Performing Reference Asset on the Final Valuation Date and an increased risk of losing a significant portion or all of your Principal Amount.

There Are Single Stock Risks Associated with each Reference Asset.

The value of each Reference Asset can rise or fall sharply due to factors specific to such Reference Asset and its issuer (the "Reference Asset Issuer", and together, the "Reference Asset Issuers"), such as stock price volatility, earnings, financial conditions, corporate, industry and regulatory developments, management changes and decisions and other events, as well as general market factors, such as general stock and commodity market volatility and levels, interest rates and economic and political conditions. You, as an investor in the Notes, should make your own investigation into the Reference Assets and Reference Asset Issuers for your Notes. In addition, recently, the threat of coronavirus infection has threatened a slowdown in the global economy as well as caused volatility in the global financial markets. Coronavirus or any other communicable disease may adversely affect the Reference Asset Issuers. For additional information, see "Information Regarding the Reference Assets" in this pricing supplement and each Reference Asset Issuer's SEC filings. **We urge you to review financial and other information filed periodically by the Reference Asset Issuers with the SEC.**

Estimated Value

The Estimated Value of Your Notes Is Less Than the Public Offering Price of Your Notes.

The estimated value of your Notes is less than the public offering price of your Notes. The difference between the public offering price of your Notes and the estimated value of the Notes reflects costs and expected profits associated with selling and structuring the Notes, as well as hedging our obligations under the Notes. Because hedging our obligations entails risks and may be influenced by market forces beyond our control, this hedging may result in a profit that is more or less than expected, or a loss.

The Estimated Value of Your Notes Is Based on Our Internal Funding Rate.

The estimated value of your Notes is determined by reference to our internal funding rate. The internal funding rate used in the determination of the estimated value of the Notes generally represents a discount from the credit spreads for our conventional, fixed-rate debt securities and the borrowing rate we would pay for our conventional, fixed-rate debt securities. This discount is

based on, among other things, our view of the funding value of the Notes as well as the higher issuance, operational and ongoing liability management costs of the Notes in comparison to those costs for our conventional, fixed-rate debt, as well as estimated financing costs of any hedge positions, taking into account regulatory and internal requirements. If the interest rate implied by the credit spreads for our conventional, fixed-rate debt securities, or the borrowing rate we would pay for our conventional, fixed-rate debt securities were to be used, we would expect the economic terms of the Notes to be more favorable to you. Additionally, assuming all other economic terms are held constant, the use of an internal funding rate for the Notes is expected to increase the estimated value of the Notes at any time.

The Estimated Value of the Notes Is Based on Our Internal Pricing Models, Which May Prove to Be Inaccurate and May Be Different from the Pricing Models of Other Financial Institutions.

The estimated value of your Notes is based on our internal pricing models when the terms of the Notes are set, which take into account a number of variables, such as our internal funding rate on the Pricing Date, and are based on a number of subjective assumptions, which are not evaluated or verified on an independent basis and may or may not materialize. Further, our pricing models may be different from other financial institutions' pricing models and the methodologies used by us to estimate the value of the Notes may not be consistent with those of other financial institutions that may be purchasers or sellers of Notes in the secondary market. As a result, the secondary market price of your Notes may be materially less than the estimated value of the Notes determined by reference to our internal pricing models. In addition, market conditions and other relevant factors in the future may change, and any assumptions may prove to be incorrect.

The Estimated Value of Your Notes Is Not a Prediction of the Prices at Which You May Sell Your Notes in the Secondary Market, If Any, and Such Secondary Market Prices, If Any, Will Likely be Less Than the Public Offering Price of Your Notes and May Be Less Than the Estimated Value of Your Notes.

The estimated value of the Notes is not a prediction of the prices at which the Agent, other affiliates of ours or third parties may be willing to purchase the Notes from you in secondary market transactions (if they are willing to purchase, which they are not obligated to do). The price at which you may be able to sell your Notes in the secondary market at any time, if any, will be influenced by many factors that cannot be predicted, such as market conditions, and any bid and ask spread for similar sized trades, and may be substantially less than the estimated value of the Notes. Further, as secondary market prices of your Notes take into account the levels at which our debt securities trade in the

secondary market, and do not take into account our various costs and expected profits associated with selling and structuring the Notes, as well as hedging our obligations under the Notes, secondary market prices of your Notes will likely be less than the public offering price of your Notes. As a result, the price at which the Agent, other affiliates of ours or third parties may be willing to purchase the Notes from you in secondary market transactions, if any, will likely be less than the price you paid for your Notes, and any sale prior to the Maturity Date could result in a substantial loss to you.

The Temporary Price at Which the Agent May Initially Buy the Notes in the Secondary Market May Not Be Indicative of Future Prices of Your Notes.

Assuming that all relevant factors remain constant after the Pricing Date, the price at which the Agent may initially buy or sell the Notes in the secondary market (if the Agent makes a market in the Notes, which it is not obligated to do) may exceed the estimated value of the Notes on the Pricing Date, as well as the secondary market value of the Notes, for a temporary period after the Issue Date of the Notes, as discussed further under “Additional Information Regarding the Estimated Value of the Notes.” The price at which the Agent may initially buy or sell the Notes in the secondary market may not be indicative of future prices of your Notes.

If the Value of any Reference Asset Changes, the Market Value of Your Notes May Not Change in the Same Manner.

Your Notes may trade quite differently from the performance of any of the Reference Assets. Changes in the value of any Reference Asset may not result in a comparable change in the market value of your Notes. Even if the value of each Reference Asset increases above its Initial Value during the life of the Notes, the market value of your Notes may not increase by the same amount and could decline.

There Are Potential Conflicts of Interest Between You and the Calculation Agent.

The Calculation Agent will, among other things, determine the amounts payable on the Notes. We will serve as the Calculation Agent and may appoint a different Calculation Agent after the Issue Date without notice to you. The Calculation Agent will exercise its judgment when performing its functions. For example, the Calculation Agent may have to determine whether a market disruption event affecting the Reference Asset has occurred, which may, in turn, depend on the Calculation Agent’s judgment as to whether the event has materially interfered with our ability or the ability of one of our affiliates to unwind our hedge positions. Because this determination by the Calculation Agent may affect the amounts payable on the Notes, the Calculation Agent may have a conflict of interest if it needs to make a determination of this kind. For additional information on the Calculation Agent’s role, see “General Terms of the Notes— Role of Calculation Agent” in the product prospectus supplement.

TD SECURITIES (USA) LLC

P-9

You Will Have No Rights to Receive Any Shares of Any Reference Asset and You Will Not Be Entitled to Any Dividends or Other Distributions by Any Reference Asset.

The Notes are our debt securities. They are not equity instruments, shares of stock, or securities of any other issuer. Investing in the Notes will not make you a holder of shares of any Reference Asset. You will not have any voting rights, any rights to receive dividends or other distributions, any rights against any Reference Asset Issuer. As a result, the return on your Notes may not reflect the return you would realize if you actually owned shares of any Reference Asset and received any dividends paid or other distributions made in connection with them. Your Notes will be paid in cash and you have no right to receive delivery of shares of any Reference Asset.

We Do Not Control any Reference Asset Issuer and Are Not Responsible for Any of their Disclosures.

Neither we nor any of our affiliates have the ability to control the actions of any Reference Asset Issuer and have not conducted any independent review or due diligence of any information related to any Reference Asset or Reference Asset Issuer. We are not responsible for any Reference Asset Issuer’s public disclosure of information on itself or the applicable Reference Asset, whether contained in SEC filings or otherwise. You should make your own investigation into each of the Reference Asset Issuers.

You Will Have Limited Anti-Dilution Protection.

The Calculation Agent may adjust the Initial Value, and therefore the Call Threshold Value and Barrier Value of a Reference Asset, for stock splits, reverse stock splits, stock dividends, extraordinary dividends and other events that affect such Reference Asset, but only in the situations we describe in “General Terms of the Notes—Anti-Dilution Adjustments” in the product prospectus supplement. The Calculation Agent will not be required to make an adjustment for every event that may affect a Reference Asset. Those events or other actions by any Reference Asset Issuer or a third party may nevertheless adversely affect the price of a Reference Asset, and adversely affect the value of your Notes.

Any Call Observation Date or the Final Valuation Date and the Related Payment Dates are Subject to Market Disruption Events and Postponements.

Each Call Observation Date or the Final Valuation Date) and the related payment dates (including the Maturity Date) are subject to postponement due to the occurrence of one of more market disruption events. For a description of what constitutes a market disruption event as well as the consequences of that market disruption event, see “General Terms of the Notes—Market Disruption Events” in the product prospectus supplement and under “Summary—Call Observation Dates” herein. A market disruption event for a particular Reference Asset will

not constitute a market disruption event for any other Reference Asset.

Trading and Business Activities by TD or its Affiliates May Adversely Affect the Market Value of, and Any Amounts Payable on, the Notes.

We, the Agent and our other affiliates may hedge our obligations under the Notes by purchasing securities, futures, options or other derivative instruments with returns linked or related to changes in the price of a Reference Asset, and we may adjust these hedges by, among other things, purchasing or selling at any time any of the foregoing assets. It is possible that we or one or more of our affiliates could receive substantial returns from these hedging activities while the market value of the Notes declines. We or one or more of our affiliates may also issue or underwrite other securities or financial or derivative instruments with returns linked or related to changes in a Reference Asset.

These trading activities may present a conflict between the holders' interest in the Notes and the interests we and our affiliates will have in our or their proprietary accounts, in facilitating transactions, including options and other derivatives transactions, for our or their customers' accounts and in accounts under our or their management. These trading activities could be adverse to the interests of the holders of the Notes.

We, the Agent and our affiliates may, at present or in the future, engage in business with one or more Reference Asset Issuers, including making loans to or providing advisory services to those companies. These services could include investment banking and merger and acquisition advisory services. These business activities may present a conflict between our, the Agent's and our affiliates' obligations, and your interests as a holder of the Notes. Moreover, we, the Agent or our affiliates may have published, and in the future expect to publish, research reports with respect to a Reference Asset. This research is modified from time to time without notice and may express opinions or provide recommendations that are inconsistent with purchasing or holding the Notes. Any of these activities by us or one or more of our affiliates or the Agents or their affiliates may affect the value of a Reference Asset and, therefore, the market value of, and the amounts payable on, the Notes.

Significant Aspects of the Tax Treatment of the Notes Are Uncertain.

The U.S. tax treatment of the Notes is uncertain. Please read carefully the section entitled "Material U.S. Federal Income Tax Consequences" in the product prospectus supplement, and the section entitled "Material U.S. Federal Income Tax Consequences" below. You should consult your tax advisor as to the tax consequences of your investment in the Notes.

For a discussion of the Canadian federal income tax consequences of investing in the Notes, please see the discussion in the product prospectus supplement under "Supplemental Discussion of Canadian Tax Consequences." If you are not a Non-resident Holder (as that term is defined in the prospectus) for Canadian federal income tax purposes or if you acquire the Notes in the secondary market, you should consult your tax advisor as to the consequences of acquiring, holding and disposing of the Notes and receiving the payments that might be due under the Notes.

Hypothetical Returns

The examples set out below are included for illustration purposes only and are hypothetical examples only; amounts below may have been rounded for ease of analysis. The Closing Values and Percentage Changes of the Reference Assets used to illustrate the Payment at Maturity or upon an automatic call are not estimates or forecasts of the actual Initial Value, the Final Value or the value of any Reference Asset on any Trading Day prior to the Maturity Date. All examples assume, for hypothetical Reference Asset A, Reference Asset B, Reference Asset C and Reference Asset D respectively; a hypothetical Initial Value of \$300.00, \$1,800.00, \$1,300.00 and \$360.00; a hypothetical Call Threshold Value of \$300.00, \$1,800.00, \$1,300.00 and \$360.00 (each 100.00% of its hypothetical Initial Value); a hypothetical Barrier Value of \$180.00, \$1,080.00, \$780.00 and \$216.00 (each 60.00% of its hypothetical Initial Value); the Interest Payment of \$8.00 per Note (reflecting the Interest Rate of 9.60% per annum), that a holder purchased Notes with a Principal Amount of \$1,000 and that no Market Disruption Event occurs on any Call Observation Date or on the Final Valuation Date. The actual terms of the Notes are set forth elsewhere in this pricing supplement.

Example 1 — The Closing Value of Each Reference Asset is Greater than or Equal to its Call Threshold Value on the First Call Observation Date and The Notes Are Automatically Called.

Date	Closing Values	Payment (per Note)
First Call Observation Date	Reference Asset A: \$380.00 (<u>greater than or equal to</u> its Call Threshold Value)	\$1,000 (Principal Amount)
	Reference Asset B: \$1,800.00 (<u>greater than or equal to</u> its Call Threshold Value)	+ \$8.00 (Interest Payment)
	Reference Asset C: \$1,320.00 (<u>greater than or equal to</u> its Call Threshold Value)	\$1,008.00 (Total Payment upon Automatic Call)
	Reference Asset D: \$365.00 (<u>greater than or equal to</u> its Call Threshold Value)	+ \$40.00 (Interest Payments Previously Paid)
		\$1,048.00 (Total Return)

Because the Closing Value of each Reference Asset is greater than or equal to its Call Threshold Value on the first Call Observation Date, the Notes will be automatically called and, on the corresponding Call Payment Date, we will pay you a cash payment equal to \$1,008.00 per Note,

reflecting the Principal Amount plus the Interest Payment. When added to the Interest Payments of \$40.00 received in respect of the prior Interest Payment Dates, we will have paid you a total of \$1,048.00, a return of 4.80% per Note. No further amounts will be owed under the Notes.

Example 2 — The Closing Value of Each Reference Asset is Greater than or Equal to its Call Threshold Value on the Fourth Call Observation Date and The Notes Are Automatically Called.

Date	Closing Value	Payment (per Note)
First through Third Call Observation Date	Reference Asset A: Various (all <u>less than</u> its Call Threshold Value) Reference Asset B: Various (all <u>less than</u> its Call Threshold Value) Reference Asset C: Various (all <u>less than</u> its Call Threshold Value) Reference Asset D: Various (all <u>less than</u> its Call Threshold Value)	\$96.00 (Aggregate Interest Payments)
Fourth Call Observation Date	Reference Asset A: \$400.00 (<u>greater than or equal to</u> its Call Threshold Value) Reference Asset B: \$1,800.00 (<u>greater than or equal to</u> its Call Threshold Value) Reference Asset C: \$1,500.00 (<u>greater than or equal to</u> its Call Threshold Value) Reference Asset D: \$370.00 (<u>greater than or equal to</u> its Call Threshold Value)	\$1,000 (Principal Amount) + \$8.00 (Interest Payment) \$1,008.00 (Total Payment upon Automatic Call) + \$112.00 (Interest Payments Previously Paid) \$1,120.00 (Total Return)

Because the Closing Value of each Reference Asset is greater than or equal to its Call Threshold Value on the fourth Call Observation Date, the Notes will be automatically called and, on the corresponding Call Payment Date, we will pay you a cash payment equal to \$1,008.00 per Note, reflecting the Principal Amount plus the Interest Payment. When added to the Interest Payments of \$112.00 paid in respect of the prior Interest Payment Dates, we will have paid you a total of \$1,120.00 per Note, a return of 12.00% per Note. No further amounts will be owed under the Notes.

TD SECURITIES (USA) LLC

P-11

Example 3 — The Closing Value of at least one Reference Asset is Less than its Call Threshold Value on each Call Observation Date and the Final Value of each Reference Asset is greater than or equal to its Barrier Value.

Date	Closing Value	Payment (per Note)
First through Tenth Call Observation Date	Reference Asset A: Various (all <u>greater than or equal to</u> its Call Threshold Value) Reference Asset B: Various (all <u>less than</u> its Call Threshold Value) Reference Asset C: Various (all <u>less than</u> its Call Threshold Value) Reference Asset D: Various (all <u>less than</u> its Call Threshold Value)	\$264.00 (Aggregate Interest Payments)
Final Valuation Date	Reference Asset A: \$185.00 (<u>greater than or equal to</u> its Barrier Value; <u>less than</u> its Call Threshold Value) Reference Asset B: \$1,200.00 (<u>greater than or equal to</u> its Barrier Value; <u>less than</u> its Call Threshold Value) Reference Asset C: \$790.00 (<u>greater than or equal to</u> its Barrier Value; <u>less than</u> its Call Threshold Value) Reference Asset D: \$220.00 (<u>greater than or equal to</u> its Barrier Value; <u>less than</u> its Call Threshold Value)	\$1,000 (Principal Amount) + \$8.00 (Interest Payment) \$1,008.00 (Total Payment on Maturity Date) + \$280.00 (Interest Payments Previously Paid) \$1,288.00 (Total Return)

Because the Closing Value of at least one Reference Asset is less than its Call Threshold Value on each Call Observation Date, we will pay the Interest Payment on each corresponding Interest Payment Date and the Notes will not be subject to an automatic call. Because the Final Value of each Reference Asset is greater than or equal to its Barrier Value on the Final Valuation Date, on the Maturity Date we will pay you a cash payment equal to \$1,008.00 per Note, reflecting the Principal Amount plus the Interest Payment. When added to the Interest Payments of \$280.00 paid in respect of the prior Interest Payment Dates, we will have paid you a total of \$1,288.00 per Note, a return of 28.80% per Note.

Example 4 — The Closing Value of at least one Reference Asset is Less than its Call Threshold Value on each Call Observation Date and the Final Value of the Least Performing Reference Asset is less than its Barrier Value.

Date	Closing Value	Payment (per Note)
First through Tenth Call Observation Date	Reference Asset A: Various (all <u>less than</u> its Call Threshold Value) Reference Asset B: Various (all <u>less than</u> its Call Threshold Value)	\$264.00 (Aggregate Interest Payments)

	Reference Asset C: Various (all less than its Call Threshold Value)	
	Reference Asset D: Various (all greater than or equal to its Call Threshold Value)	
	Reference Asset A: \$90.00 (less than its Barrier Value)	= \$1,000 + (\$1,000 x Percentage Change)
Final Valuation Date	Reference Asset B: \$1,500.00 (greater than or equal to its Barrier Value)	= \$1,000 + (\$1,000 x -70.00%)
	Reference Asset C: \$950.00 (greater than or equal to its Barrier Value)	+ <u>\$8.00</u> (Interest Payment)
	Reference Asset D: \$225.00 (greater than or equal to its Barrier Value)	\$308.00 (Total Payment on Maturity Date)
		+ <u>\$280.00</u> (Interest Payments Previously Paid)
		\$588.00 (Total Return)

Because the Closing Value of at least one Reference Asset is less than its Call Threshold Value on each Call Observation Date, we will pay the Interest Payment on each corresponding Interest Payment Date and the Notes will not be subject to an automatic call. Because the Final Value of the Least Performing Reference Asset is less than its Barrier Value, we will pay you a cash payment equal to the Principal Amount plus the product of the Principal Amount and the Least Performing Percentage Change in addition to the Interest Payment otherwise due on the Maturity Date, for a total of \$308.00 per Note. When added to the Interest Payments of \$280.00 paid in respect of the prior Interest Payment Dates, we will have paid you a total of \$588.00 per Note, a loss of 41.20% per Note.

In this scenario, investors will suffer a loss on their initial investment that is proportionate to the Reference Asset with the lowest percentage change from its Initial Value to its Final Value (the “Least Performing Reference Asset”) over the term of the Notes. Specifically, investors will lose 1% of the Principal Amount of the Notes for each 1% that the Final Value of the Least Performing Reference Asset is less than its Initial Value, and may lose the entire Principal Amount. Any payments on the Notes are subject to our credit risk.

TD SECURITIES (USA) LLC

Information Regarding the Reference Assets

Each Reference Asset is registered under the Exchange Act. Companies with securities registered under the Exchange Act are required to file periodically certain financial and other information specified by the SEC. Information provided to or filed with the SEC can be inspected and copied at the public reference facilities maintained by the SEC or through the SEC’s website at www.sec.gov. In addition, information regarding each Reference Asset may be obtained from other sources including, but not limited to, press releases, newspaper articles and other publicly disseminated documents.

The graphs below set forth the information relating to the historical performance of each Reference Asset. The graphs below show the daily historical Closing Values of each Reference Asset for the period specified. We obtained the information regarding the historical performance of each Reference Asset in the graphs below from Bloomberg Professional® service (“Bloomberg”).

We have not independently verified the accuracy or completeness of the information obtained from Bloomberg. The historical performance of each Reference Asset should not be taken as an indication of its future performance, and no assurance can be given as to the Final Value of any Reference Asset. We cannot give you any assurance that the performance of the Reference Assets will result in any positive return on your initial investment.

Apple Inc.

According to publicly available information, Apple Inc. (“Apple”) designs, manufactures and markets mobile communication and media devices, personal computers, and portable digital music players, and sells a variety of related software, services, accessories, networking solutions, and third-party digital content and applications. Information filed by Apple with the SEC can be located by reference to its SEC file number 001-36743, or its CIK Code: 0000320193. Apple’s website is apple.com. Apple’s common stock is listed on the NASDAQ Global Select Market under the ticker symbol “AAPL.”

Historical Information

The graph below illustrates the performance of the Reference Asset from April 15, 2010 to April 15, 2020. The dotted lines represent its Call Threshold Value of \$284.43, which is equal to 100.00% of its Initial Value, and its Barrier Value of \$170.658, which is equal to 60.00% of its Initial Value.

We obtained the information regarding the historical performance of the Reference Asset in the graph below from Bloomberg and have not independently verified the accuracy or completeness of the information obtained from Bloomberg. The historical performance of the Reference Asset should not be taken as an indication of its future performance, and no assurance can be given as to the Final Value of the Reference

Asset. We cannot give you any assurance that the performance of the Reference Asset will result in any positive return on your initial investment.

Apple Inc. (AAPL)

PAST PERFORMANCE IS NOT INDICATIVE OF FUTURE RESULTS

P-13

Amazon.com, Inc.

According to publicly available information, Amazon.com, Inc. ("Amazon") is an online retail company offering a variety of products sold by Amazon and third parties. Amazon also manufactures and sells electronic devices, including Kindle e-readers, Fire tablets, Fire TVs and Echo. Information filed by Amazon with the SEC can be located by reference to its SEC file number: 000-22513, or its CIK Code: 0001018724. Amazon's website is amazon.com. Amazon's common stock is listed on the NASDAQ Global Select Market under the ticker symbol "AMZN."

Historical Information

The graph below illustrates the performance of the Reference Asset from April 15, 2010 to April 15, 2020. The dotted lines represent its Call Threshold Value of \$2,307.68, which is equal to 100.00% of its Initial Value, and its Barrier Value of \$1,384.608, which is equal to 60.00% of its Initial Value.

We obtained the information regarding the historical performance of the Reference Asset in the graph below from Bloomberg and have not independently verified the accuracy or completeness of the information obtained from Bloomberg. The historical performance of the Reference Asset should not be taken as an indication of its future performance, and no assurance can be given as to the Final Value of the Reference Asset. We cannot give you any assurance that the performance of the Reference Asset will result in any positive return on your initial investment.

P-14

Alphabet Inc.

According to publicly available information, Alphabet Inc. ("Alphabet") is a parent holding company of Google Inc. that provides web-based search, advertisements, maps, software applications, mobile operating systems, consumer content, enterprise solutions, commerce and hardware products. Until April 2, 2014, the ticker "GOOG" was used for Google Inc.'s Class A common stock. In January 2014, Google Inc.'s board of directors approved the creation and distribution of a class C capital stock as a dividend to holders of Google Inc.'s Class A and Class B common stock. The dividend had a record date of March 27, 2014 and a payment date of April 2, 2014. On April 3, 2014, Google Inc.'s class C capital stock began regular trading under the ticker "GOOG" and Class A common stock began trading under the ticker "GOOGL". Each share of Google Inc.'s Class A common stock carries one vote and each share of Google Inc.'s class C capital stock does not carry any votes. On October 2, 2015, Alphabet became the successor issuer to, and parent holding company of, Google Inc. On October 5, 2015, Alphabet's class C capital stock commenced trading on The NASDAQ Global Select Market under the symbol "GOOG" previously used by Google Inc.'s class C capital stock and Alphabet's Class A common stock also commenced trading on the NASDAQ Global Select Market under the symbol "GOOGL" previously used by Google Inc.'s Class A capital stock. Accordingly, the underlying asset has a limited historical performance. Information filed by Alphabet with the SEC can be located by reference to its SEC file number: 001-36380, or its CIK Code: 0001288776. Alphabet's website is abc.xyz. Alphabet's class C capital stock is listed on the NASDAQ Global Select Market under the ticker symbol "GOOG."

Historical Information

The graph below illustrates the performance of the Reference Asset from March 27, 2014 to April 15, 2020. The dotted lines represent its Call Threshold Value of \$1,262.47, which is equal to 100.00% of its Initial Value, and its Barrier Value of \$757.482, which is equal to 60.00% of its Initial Value.

We obtained the information regarding the historical performance of the Reference Asset in the graph below from Bloomberg and have not independently verified the accuracy or completeness of the information obtained from Bloomberg. The historical performance of the Reference Asset should not be taken as an indication of its future performance, and no assurance can be given as to the Final Value of the Reference Asset. We cannot give you any assurance that the performance of the Reference Asset will result in any positive return on your initial investment.

Alphabet Inc. (GOOG)

PAST PERFORMANCE IS NOT INDICATIVE OF FUTURE RESULTS

Netflix, Inc.

According to publicly available information, Netflix, Inc. ("Netflix") is an Internet television network offering TV shows and movies, including original series, documentaries and feature films. Information filed by Netflix with the SEC can be located by reference to its SEC file number: 001-35727, or its CIK Code: 0001065280. Netflix's website is netflix.com. Netflix's common stock is listed on The NASDAQ Global Select Market under the ticker symbol "NFLX."

Historical Information

The graph below illustrates the performance of the Reference Asset from April 15, 2010 to April 15, 2020. The dotted lines represent its Call Threshold Value of \$426.75, which is equal to 100.00% of its Initial Value, and its Barrier Value of \$256.05, which is equal to 60.00% of its Initial Value.

We obtained the information regarding the historical performance of the Reference Asset in the graph below from Bloomberg and have not independently verified the accuracy or completeness of the information obtained from Bloomberg. The historical performance of the Reference Asset should not be taken as an indication of its future performance, and no assurance can be given as to the Final Value of the Reference Asset. We cannot give you any assurance that the performance of the Reference Asset will result in any positive return on your initial investment.

TD SECURITIES (USA) LLC

P-16

Material U.S. Federal Income Tax Consequences

The U.S. federal income tax consequences of your investment in the Notes are uncertain. No statutory, regulatory, judicial or administrative authority directly discusses the characterization for U.S. federal income tax purposes of securities with terms that are substantially the same as the Notes. Some of these tax consequences are summarized below, but we urge you to read the more detailed discussion under “Material U.S. Federal Income Tax Consequences” in the product prospectus supplement and to discuss the tax consequences of your particular situation with your tax advisor. This discussion is based upon the Internal Revenue Code of 1986, as amended (the “Code”), final, temporary and proposed U.S. Department of the Treasury (the “Treasury”) regulations, rulings and decisions, in each case, as available and in effect as of the date hereof, all of which are subject to change, possibly with retroactive effect. This discussion, other than the section entitled “Non-U.S. Holders” below, applies to you only if you are a U.S. holder, as defined in the product prospectus supplement. Tax consequences under state, local and non-U.S. laws are not addressed herein. No ruling from the U.S. Internal Revenue Service (the “IRS”) has been sought as to the U.S. federal income tax consequences of your investment in the Notes, and the following discussion is not binding on the IRS.

U.S. Tax Treatment. Pursuant to the terms of the Notes, TD and you agree, in the absence of a statutory or regulatory change or an administrative determination or judicial ruling to the contrary, to characterize each Note as consisting of two components for U.S. federal income tax purposes: (1) a non-contingent debt instrument (the “Debt Component”); and (2) a put option contract in respect of the Reference Assets (the “Put Option Component”). In accordance with this treatment, you agree to treat each Fixed Interest Payment as consisting of (1) interest on the Debt Component and (2) put option premium on the Put Option Component as follows:

Fixed Interest Rate	Interest on Debt Component	Put Option Component
9.60% per annum	1.58%	8.02%

We intend to treat the Debt Component as having a term greater than one year, so that interest payments in respect of the Debt Component would be includable in income by you in accordance with your regular method of accounting for interest for U.S. federal income tax purposes. If, however, the Debt Component were treated as having a term of one year or less, amounts treated as interest on the Debt Component would be subject to the general rules governing interest payments on short-term notes and would be required to be accrued by accrual-basis taxpayers.

(and cash-basis taxpayers who elect to accrue interest currently) on either the straight-line method, or, if elected, the constant yield method, compounded daily. Cash-basis taxpayers who do not elect to accrue interest currently would include interest into income upon receipt of such interest.

Put option premium payments in respect of the Put Option Component would generally not be taxed until a sale, automatic call or maturity of the Notes. At maturity, such payments would be taxed as a short-term capital gain.

If the Notes are automatically called prior to the Maturity Date, you generally should not recognize gain or loss with respect to the Debt Component, and you generally should recognize the total put option premium received as short-term capital gain on the applicable Call Payment Date.

Upon a sale of the Notes for cash, you should allocate the cash received between the Debt Component and the Put Option Component on the basis of their respective values on the date of sale. You should generally recognize gain or loss with respect to the Debt Component in an amount equal to the difference between the amount of the sale proceeds allocable to the Debt Component (less accrued and unpaid interest, which will be taxable as such) and your adjusted tax basis in the Debt Component (which generally will equal your purchase price for the Note). This gain or loss should be capital gain or loss and should be long-term capital gain or loss if you are treated as having held the Debt Component for more than one year at the time of sale. If the Put Option Component has a positive value on the date of sale, you should generally recognize short-term capital gain equal to the portion of the sale proceeds allocable to the Put Option Component plus any previously received put option premium. If the Put Option Component has a negative value on the date of sale, you should generally be treated as having paid the buyer an amount equal to the negative value in order to assume your rights and obligations under the Put Option Component. In that case, you should recognize a short-term capital gain or loss in an amount equal to the difference between the total put option premium previously received and the amount of the payment deemed made by you with respect to the buyer's assumption of the Put Option Component. The amount of the deemed payment will be added to the sale price allocated to the Debt Component in determining the gain or loss in respect of the Debt Component. The deductibility of capital losses by U.S. holders is subject to limitations.

Based on certain factual representations received from us, our special U.S. tax counsel, Cadwalader, Wickersham & Taft LLP, is of the opinion that it would be reasonable to treat your Notes in the manner described above. However, because there is no authority that specifically addresses the tax treatment of the Notes, it is possible that your Notes could alternatively be treated for tax purposes as a single contingent payment debt instrument, or pursuant to some other characterization, such that the timing and character of your income from the Notes could differ materially and adversely from the treatment described above, as described further herein.

TD SECURITIES (USA) LLC

P-17

Except to the extent otherwise required by law, TD intends to treat your Notes for U.S. federal income tax purposes in accordance with the treatment described above and under "Material U.S. Federal Income Tax Consequences" in the product prospectus supplement, unless and until such time as the Treasury and the IRS determine that some other treatment is more appropriate.

Possible changes in law. In 2007, the IRS released a notice that may affect the taxation of holders of the Notes. According to Notice 2008-2, the IRS and the Treasury are actively considering the appropriate tax treatment of holders of certain types of structured notes. Legislation has also been proposed in Congress that would require the holders of certain prepaid forward contracts to accrue income during the term of the transaction. Additionally, in 2013, the House Ways and Means Committee released in draft form certain proposed legislation relating to financial instruments that, if it had been enacted, would have required instruments such as the Put Option Component of the Notes to be marked to market on an annual basis with all gains and losses to be treated as ordinary, subject to certain exceptions. It is not clear whether the Notice applies to instruments such as the Notes. Furthermore, it is not possible to determine what guidance or legislation will ultimately result, if any, and whether such guidance or legislation will affect the tax treatment of the Notes.

Medicare Tax on Net Investment Income. U.S. holders that are individuals, estates or certain trusts are subject to an additional 3.8% tax on all or a portion of their "net investment income" or "undistributed net investment income" in the case of an estate or trust, which may include any income or gain realized with respect to the Notes, to the extent of their net investment income or undistributed net investment income (as the case may be) that when added to their other modified adjusted gross income, exceeds \$200,000 for an unmarried individual, \$250,000 for a married taxpayer filing a joint return (or a surviving spouse), \$125,000 for a married individual filing a separate return or the dollar amount at which the highest tax bracket begins for an estate or trust. The 3.8% Medicare tax is determined in a different manner than the income tax. U.S. holders should consult their tax advisors as to the consequences of the 3.8% Medicare tax.

Specified Foreign Financial Assets. U.S. holders may be subject to reporting obligations with respect to their Notes if they do not hold their Notes in an account maintained by a financial institution and the aggregate value of their Notes and certain other "specified foreign financial assets" (applying certain attribution rules) exceeds an applicable threshold. Significant penalties can apply if a U.S. holder is required to disclose its Notes and fails to do so.

Non-U.S. Holders. If you are a non-U.S. holder, subject to Section 871(m) of the Code and FATCA, as discussed below, you should generally

not be subject to U.S. withholding tax with respect to payments on your Notes or to generally applicable information reporting and backup withholding requirements with respect to payments on your Notes if you comply with certain certification and identification requirements as to your non-U.S. status including providing us (and/or the applicable withholding agent) a properly executed and fully completed applicable IRS Form W-8. Subject to Section 897 of the Code and Section 871(m) of the Code, discussed below, gain realized from the taxable disposition of the Notes generally will not be subject to U.S. tax unless (i) such gain is effectively connected with a trade or business conducted by you in the U.S., (ii) you are a non-resident alien individual and are present in the U.S. for 183 days or more during the taxable year of such taxable disposition and certain other conditions are satisfied or (iii) you have certain other present or former connections with the U.S.

Section 897. We will not attempt to ascertain whether any Reference Asset Issuer would be treated as a “United States real property holding corporation” (“USRPHC”) within the meaning of Section 897 of the Code. We also have not attempted to determine whether the Notes should be treated as “United States real property interests” (“USRPI”) as defined in Section 897 of the Code. If any Reference Asset Issuer or the Notes were so treated, certain adverse U.S. federal income tax consequences could possibly apply, including subjecting any gain to a non-U.S. holder in respect of a Note upon a taxable disposition of the Note to the U.S. federal income tax on a net basis, and the proceeds from such a taxable disposition to a 15% withholding tax. Non-U.S. holders should consult their tax advisors regarding the potential treatment of any such entity as a USRPHC or the Notes as USRPI.

Section 871(m). A 30% withholding tax (which may be reduced by an applicable income tax treaty) is imposed under Section 871(m) of the Code on certain “dividend equivalents” paid or deemed paid to a non-U.S. holder with respect to a “specified equity-linked instrument” that references one or more dividend paying U.S. equity securities or indices containing U.S. equity securities. The withholding tax can apply even if the instrument does not provide for payments that reference dividends. Treasury regulations provide that the withholding tax applies to all dividend equivalents paid or deemed paid on specified equity-linked instruments that have a delta of one (“delta-one specified equity-linked instruments”) issued after 2016 and to all dividend equivalents paid or deemed paid on all other specified equity-linked instruments issued after 2018. However, the IRS has issued guidance that states that the Treasury and the IRS intend to amend the effective dates of the Treasury regulations to provide that withholding on dividend equivalents paid or deemed paid will not apply to specified equity-linked instruments that are not delta-one specified equity-linked instruments and are issued before January 1, 2023.

Based on our determination that the Notes are not “delta-one” with respect to the Reference Assets, our counsel is of the opinion that the Notes should not be delta-one specified equity-linked instruments and thus should not be subject to withholding on dividend equivalents. Our determination is not binding on the IRS, and the IRS may disagree with this determination. Furthermore, the application of Section 871(m) of the Code will depend on our determinations made upon issuance of the Notes. If withholding is required, we will not make payments of any additional amounts.

TD SECURITIES (USA) LLC

P-18

Nevertheless, after issuance, it is possible that your Notes could be deemed to be reissued for tax purposes upon the occurrence of certain events affecting the Reference Assets or your Notes, and following such occurrence your Notes could be treated as delta-one specified equity-linked instruments that are subject to withholding on dividend equivalents. It is also possible that withholding tax or other tax under Section 871(m) of the Code could apply to the Notes under these rules if you enter, or have entered, into certain other transactions in respect of the Reference Assets or the Notes. If you enter, or have entered, into other transactions in respect of the Reference Assets or the Notes, you should consult your tax advisor regarding the application of Section 871(m) of the Code to your Notes in the context of your other transactions.

Because of the uncertainty regarding the application of the 30% withholding tax on dividend equivalents to the Notes, you are urged to consult your tax advisor regarding the potential application of Section 871(m) of the Code and the 30% withholding tax to an investment in the Notes.

Foreign Account Tax Compliance Act. The Foreign Account Tax Compliance Act (“FATCA”) was enacted on March 18, 2010, and imposes a 30% U.S. withholding tax on “withholdable payments” (i.e., certain U.S.-source payments, including interest (and original issue discount), dividends, other fixed or determinable annual or periodical income, and the gross proceeds from a disposition of property of a type that can produce U.S.-source interest or dividends) and “passthru payments” (i.e., certain payments attributable to withholdable payments) made to certain foreign financial institutions (and certain of their affiliates) unless the payee foreign financial institution agrees (or is required), among other things, to disclose the identity of any U.S. individual with an account at the institution (or the relevant affiliate) and to annually report certain information about such account. FATCA also requires withholding agents making withholdable payments to certain foreign entities that do not disclose the name, address, and taxpayer identification number of any substantial U.S. owners (or do not certify that they do not have any substantial U.S. owners) to withhold tax at a rate of 30%. Under certain circumstances, a holder may be eligible for refunds or credits of such taxes.

Pursuant to final and temporary Treasury regulations and other IRS guidance, the withholding and reporting requirements under FATCA will generally apply to certain “withholdable payments”, will not apply to gross proceeds on a sale or disposition, and will apply to certain foreign passthru payments only to the extent that such payments are made after the date that is two years after final regulations defining the term “foreign passthru payment” are published. If withholding is required, we (or the applicable paying agent) will not be required to pay additional amounts with respect to the amounts so withheld. Foreign financial institutions and non-financial foreign entities located in jurisdictions that have

an intergovernmental agreement with the U.S. governing FATCA may be subject to different rules.

Investors should consult their tax advisors about the application of FATCA, in particular if they may be classified as financial institutions (or if they hold their Notes through a foreign entity) under the FATCA rules.

As discussed above, alternative characterizations of the Notes for U.S. federal income tax purposes are possible. Should an alternative characterization of the Notes cause payments with respect to the Notes to become subject to withholding tax, we (and/or the applicable withholding agent) will withhold tax at the applicable statutory rate and we will not make payments of any additional amounts.

Both U.S. and non-U.S. holders should consult their tax advisors regarding the U.S. federal income tax consequences of an investment in the Notes, as well as any tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction (including that of TD).

Supplemental Plan of Distribution (Conflicts of Interest)

We have appointed TDS, an affiliate of TD, as the Agent for the sale of the Notes. Pursuant to the terms of a distribution agreement, TDS has agreed to purchase the Notes from TD at the public offering price less a concession equal to the underwriting discount set forth on the cover page of this pricing supplement for distribution to other registered broker-dealers. TDS or other registered broker-dealers have offered the Notes at the public offering price set forth on the cover page of this pricing supplement, provided that certain dealers who purchase the Notes for sale to certain fee-based advisory accounts may have agreed to forgo some or all of their selling concessions, fees or commissions. The public offering price for investors purchasing the Notes in these accounts may have been as low as \$967.50 (96.75%) per Note. The underwriting discount represents the selling concessions for other dealers in connection with the distribution of the Notes. The other dealers may have agreed to forgo, in their sole discretion, some or all of their selling concessions. TD will reimburse TDS for certain expenses in connection with its role in the offer and sale of the Notes, and TD will pay TDS a fee in connection with its role in the offer and sale of the Notes.

Conflicts of Interest. TDS is an affiliate of TD and, as such, has a “conflict of interest” in this offering within the meaning of Financial Industry Regulatory Authority, Inc. (“FINRA”) Rule 5121. In addition, TD will receive the net proceeds from the initial public offering of the Notes, thus creating an additional conflict of interest within the meaning of FINRA Rule 5121. This offering of the Notes will be conducted in compliance with the provisions of FINRA Rule 5121. In accordance with FINRA Rule 5121, neither TDS nor any other affiliated agent of ours is permitted to sell the Notes in this offering to an account over which it exercises discretionary authority without the prior specific written approval of the account holder.

We, TDS, another of our affiliates or third parties may use this pricing supplement in the initial sale of the Notes. In addition, we, TDS, another of our affiliates or third parties may use this pricing supplement in a market-making transaction in the Notes after their initial sale. ***If a purchaser buys the Notes from us, TDS, another of our affiliates or third parties, this pricing supplement is being used in a market-making transaction unless we, TDS, another of our affiliates or third parties informs such purchaser otherwise in the confirmation of sale.***

Prohibition of Sales to European Economic Area Retail Investors

The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area (“EEA”). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU, as amended (“MiFID II”); (ii) a customer within the meaning of Directive 2002/92/EC, as amended, where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in Directive 2003/71/EC, as amended. Consequently no key information document required by Regulation (EU) No 1286/2014, as amended (the “PRIIPs Regulation”), for offering or selling the Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

Additional Information Regarding the Estimated Value of the Notes

The final terms for the Notes were determined on the Pricing Date, based on prevailing market conditions, and are set forth in this pricing supplement.

The economic terms of the Notes are based on our internal funding rate (which is our internal borrowing rate based on variables such as market benchmarks and our appetite for borrowing), and several factors, including any sales commissions expected to be paid to TDS or another affiliate of ours, any selling concessions, discounts, commissions or fees expected to be allowed or paid to non-affiliated intermediaries, the estimated profit that we or any of our affiliates expect to earn in connection with structuring the Notes, estimated costs which we may incur in

connection with the Notes and the estimated cost which we may incur in hedging our obligations under the Notes. Because our internal funding rate generally represents a discount from the levels at which our benchmark debt securities trade in the secondary market, the use of an internal funding rate for the Notes rather than the levels at which our benchmark debt securities trade in the secondary market is expected to have had an adverse effect on the economic terms of the Notes.

On the cover page of this pricing supplement, we have provided the estimated value for the Notes. The estimated value was determined by reference to our internal pricing models which take into account a number of variables and are based on a number of assumptions, which may or may not materialize, typically including volatility, interest rates (forecasted, current and historical rates), price-sensitivity analysis, time to maturity of the Notes, and our internal funding rate. For more information about the estimated value, see “Additional Risk Factors” herein. Because our internal funding rate generally represents a discount from the levels at which our benchmark debt securities trade in the secondary market, the use of an internal funding rate for the Notes rather than the levels at which our benchmark debt securities trade in the secondary market is expected, assuming all other economic terms are held constant, to increase the estimated value of the Notes. For more information see the discussion under “Additional Risk Factors — The Estimated Value of Your Notes Is Based on Our Internal Funding Rate.”

Our estimated value of the Notes is not a prediction of the price at which the Notes may trade in the secondary market, nor will it be the price at which the Agent may buy or sell the Notes in the secondary market. Subject to normal market and funding conditions, the Agent or another affiliate of ours intends to offer to purchase the Notes in the secondary market but it is not obligated to do so.

Assuming that all relevant factors remain constant after the Pricing Date, the price at which the Agent may initially buy or sell the Notes in the secondary market, if any, may exceed our estimated value on the Pricing Date for a temporary period expected to be approximately 3 months after the Issue Date because, in our discretion, we may elect to effectively reimburse to investors a portion of the estimated cost of hedging our obligations under the Notes and other costs in connection with the Notes which we will no longer expect to incur over the term of the Notes. We made such discretionary election and determined this temporary reimbursement period on the basis of a number of factors, including the tenor of the Notes and any agreement we may have with the distributors of the Notes. The amount of our estimated costs which we effectively reimburse to investors in this way may not be allocated ratably throughout the reimbursement period, and we may discontinue such reimbursement at any time or revise the duration of the reimbursement period after the Issue Date of the Notes based on changes in market conditions and other factors that cannot be predicted.

We urge you to read the “Additional Risk Factors” herein.

Validity of the Notes

In the opinion of Cadwalader, Wickersham & Taft LLP, as special products counsel to TD, when the Notes offered by this pricing supplement have been executed and issued by TD and authenticated by the trustee pursuant to the indenture and delivered, paid for and sold as contemplated herein, the Notes will be valid and binding obligations of TD, enforceable against TD in accordance with their terms, subject to applicable bankruptcy, insolvency, fraudulent conveyance, reorganization, moratorium, receivership or other laws relating to or affecting creditors' rights generally, and to general principles of equity (regardless of whether enforcement is sought in a proceeding at law or in equity). This opinion is given as of the date hereof and is limited to the laws of the State of New York. Insofar as this opinion involves matters governed by Canadian law, Cadwalader, Wickersham & Taft LLP has assumed, without independent inquiry or investigation, the validity of the matters opined on by McCarthy Tétrault LLP, Canadian legal counsel for TD, in its opinion expressed below. In addition, this opinion is subject to customary assumptions about the trustee's authorization, execution and delivery of the indenture and, with respect to the Notes, authentication of the Notes and the genuineness of signatures and certain factual matters, all as stated in the opinion of Cadwalader, Wickersham & Taft LLP dated May 24, 2019 which has been filed as Exhibit 5.3 to the registration statement on Form F-3 filed by TD on May 24, 2019.

In the opinion of McCarthy Tétrault LLP, the issue and sale of the Notes has been duly authorized by all necessary corporate action on the part of TD, and when this pricing supplement has been attached to, and duly notated on, the master note that represents the Notes, the Notes will have been validly executed and issued and, to the extent validity of the Notes is a matter governed by the laws of the Province of Ontario, or the laws of Canada applicable therein, will be valid obligations of TD, subject to the following limitations: (i) the enforceability of the indenture is subject to bankruptcy, insolvency, reorganization, arrangement, winding up, moratorium and other similar laws of general application limiting the enforcement of creditors' rights generally; (ii) the enforceability of the indenture is subject to general equitable principles, including the fact that the availability of equitable remedies, such as injunctive relief and specific performance, is in the discretion of a court; (iii) courts in Canada are precluded from giving a judgment in any currency other than the lawful money of Canada; and (iv) the enforceability of the indenture will be subject to the limitations contained in the Limitations Act, 2002 (Ontario), and such counsel expresses no opinion as to whether a court may find any provision of the indenture to be unenforceable as an attempt to vary or exclude a limitation period under that Act. This opinion is given as of the date hereof and is limited to the laws of the Provinces of Ontario and the federal laws of Canada applicable thereto. In addition, this opinion is subject to: (i) the assumption that the senior indenture has been duly authorized, executed and delivered by, and constitutes a valid and legally binding obligation of, the trustee, enforceable against the trustee in accordance with its terms; and (ii) customary assumptions about the genuineness of signatures and certain factual matters all as stated in the letter of such counsel dated May 24, 2019, which has been filed as Exhibit 5.2 to the registration statement on Form F-3 filed by TD on May 24, 2019.
