## RISK FACTORS

An investment in the Notes entails significant risks not associated with similar investments in a conventional debt security that bears limited to, events that are difficult to predict and beyond our control. Accordingly, prospective investors should consult their financial and legal advisors regarding investment in the Notes and the suitability of the Notes in light of their particular circumstances.

**Early Redemption Risk.** The Issuer retains the option to redeem the Notes, in whole but not in part, on any Redemption Date, beginning on the first date after the Issuer's next scheduled interest payment date. If the Issuer exercises this option, the Issuer will redeem the Notes in whole prior to their Maturity Date to the extent that the interest payable on the Notes is greater than the interest payable on comparable instruments of the Issuer of comparable maturity, terms and credit rating trading in the market. If the Notes are redeemed, in whole but not in part, investors will receive no further interest payments from the Notes redeemed and may have to re-invest the proceeds in a lower rate environment.

**Inclusion Of Projected Profit From Hedging Is Likely To Adversely Affect Secondary Market Prices.** Assuming no change in market conditions, the price, if any, at which the Agent is willing to purchase the Notes in secondary market transactions will likely be lower than the Issue Price. If secondary market prices are likely to exclude, the projected profit included in the cost of hedging the obligations under the Notes. In addition, the Agent's profit is determined by pricing models used by the Agent, as a result of dealer discounts, mark-ups or other transaction costs.

## UNITED STATES FEDERAL INCOME TAXATION

This discussion applies only to initial investors in the Notes who purchase the Notes at the "issue price," which will equal the first price at which the Notes is sold to the public (not including bond houses, brokers or similar persons or organizations acting in the capacity of underwriters, placement agents or dealers). Under the operation of Treasury regulations that address the treatment of an issuer's option to redeem a debt instrument, the Notes will not be treated as debt for U.S. federal income tax purposes, and stated interest on the Notes will generally be taxable to you if you are a U.S. Holder (as defined in the prospectus supplement) as you receive interest on your normal method of accounting for U.S. federal income tax purposes. For other U.S. federal income tax consequences of owning and disposing of the Notes, see the prospectus supplement titled "United States Federal Income Taxation."

## USE OF PROCEEDS AND HEDGING

The net proceeds from the sale of the Notes will be used as described under "Use of Proceeds" in the accompanying prospectus supplement.

To provide a hedge to TMCC, an affiliate of Morgan Stanley & Co. LLC will enter into a swap agreement with TMCC. Under the swap agreement, the affiliate of Morgan Stanley & Co. LLC will make periodic rate payments linked to the London interbank offered rate in respect of a notional principal amount equal to the aggregate principal amount of the Notes in exchange for receiving payments equal to interest due in respect of the Notes from the affiliate of Morgan Stanley & Co. LLC.

## CLEARANCE AND SETTLEMENT

The Issuer expects that delivery of the Notes will be made against payment therefor on the Original Issue Date. Under Rule 15c6-1 of the Securities Exchange Act of 1934, as amended, trades in the secondary market generally are required to settle in three Business Days, unless the parties to any such trade expressly agree otherwise. Purchasers who wish to trade the Notes more than three Business Days prior to the Original Issue Date will be required to specify alternative settlement dates. In the event of a failed settlement and should consult their own investment advisor.
