Consequently, no key information document required by Regulation (EU) No 1286/2014 (as amended, the “PRIIPs Regulation”) for offering or selling the notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

FORWARD-LOOKING STATEMENTS

This prospectus supplement may contain forward-looking statements. Statements that are not historical facts, including statements about Mexico's beliefs and expectations, are forward-looking statements. These statements are based on current plans, estimates and projections, and therefore you should not place undue reliance on them. Forward-looking statements speak only as of the date they are made, and Mexico undertakes no obligation to update publicly any of them in light of new information or future events. Forward-looking statements involve inherent risks and uncertainties. Mexico cautions you that a number of important factors could cause actual results to differ materially from those contained in any forward-looking statement. Such factors include, but are not limited to:

- Adverse external factors, such as high international interest rates, low oil prices, measures restricting exports and imports, a prevailing global inflationary environment and recession or low growth in Mexico's trading partners. High international interest rates could increase Mexico's expenditures, low oil prices could decrease the Mexican Government's revenues and recession or low growth in Mexico's main trading partners or restrictions on trade could lead to fewer exports and availability of foreign currencies to service debt. A combination of these factors could negatively affect Mexico's current account.
- Instability or volatility in the international financial markets. This could lead to domestic volatility, making it more complicated for the Mexican Government to achieve its macroeconomic goals. This could also lead to declines in foreign investment inflows, including portfolio investment in particular.
- Adverse domestic factors, such as the implementation of legislation impacting foreign investment, domestic inflation, high domestic interest rates, exchange rate volatility and political uncertainty. Each of these could lead to lower growth in Mexico, declines in foreign direct and portfolio investment and potentially lower international reserves.
- Global or national health considerations, including the outbreak of pandemic or contagious disease, such as the coronavirus pandemic.

Affiliates of the underwriters may be holders of certain of the outstanding securities of PEMEX subject to the PEMEX Tender Offer and may receive 5% or more of the proceeds from this offering in tendering their PEMEX securities into that tender offer. accordance with Financial Industry Regulatory Authority (“FINRA”) Rule 5121.

Stabilization..... In connection with the issuance of each series of notes, the underwriters or any person acting for the underwriters may over-allot or effect transactions with a view to supporting the market price of each series of notes at a level higher than that which might otherwise prevail for a limited period after the issue date. However, there is no obligation of any of the underwriters or any agent of the underwriters to do this. Any such stabilizing, if commenced, may be discontinued at any time and must be brought to an end after a limited period.

RISK FACTORS

The following risk factors supplement the information contained under “Risk Factors” in the corresponding prospectus. You should consult your financial and legal advisors about the risks of investing in the notes and the suitability of your investment in light of your particular situation. Mexico disclaims any responsibility for advising you on these matters.

There can be no assurances that Mexico’s credit ratings will improve or remain stable, or that they will not be downgraded, suspended or cancelled by the rating agencies.

Mexico’s long-term public external indebtedness was downgraded in the spring of 2020 by each of the three major credit rating agencies. On July 8, 2022, Moody’s downgraded its rating to Baa2 from Baa1 and revised its outlook to stable, on July 18, 2024, Fitch affirmed its BBB- rating with a stable outlook, on November 14, 2024, Moody’s affirmed its Baa2 rating and revised its outlook to negative, and on December 13, 2024, S&P affirmed its BBB rating and revised its outlook to stable. On April 16, 2025, Fitch affirmed its BBB- rating with a stable outlook. On September 5, 2025, S&P reaffirmed its BBB rating with a stable outlook.

Ratings address the creditworthiness of Mexico and the likelihood of timely payment of Mexico’s long-term debt securities. Ratings are not a recommendation to purchase, hold or sell securities and may be changed, suspended or withdrawn at any time. Mexico’s current ratings and the rating outlooks currently assigned to it depend, in part, on economic conditions and other factors that affect credit risk and are outside the control of Mexico, as well as assessments of the creditworthiness of its productive state-owned enterprises. Certain ratings agencies may also downgrade the credit ratings of *Petróleos Mexicanos* (PEMEX), a state-owned public company of Mexico (*empresa pública del estado*), as they have in the past, and their assessment of PEMEX’s creditworthiness may affect Mexico’s credit ratings. On August 4, 2025, Fitch upgraded its long-term foreign and local currency debt rating for PEMEX from B+ to BB, with a stable outlook. On September 8, 2025, Moody’s upgraded PEMEX’s rating from B3 to B1 with a stable outlook.

There can be no assurances that Mexico’s credit ratings will be maintained or that they will not be downgraded, suspended or cancelled. Any credit rating downgrade, suspension or cancellation may have an adverse effect on the market price and the trading of the notes.

Changes in the interest rate environment could adversely impact the trading price of the notes.

We expect that the trading price of the notes will depend on a variety of factors, including, without limitation, the interest rate environment.

If interest rates, or expected future interest rates, rise during the terms of the notes, the price of the notes will likely decrease. The condition of the financial markets and prevailing interest rates have fluctuated in the past and are likely to fluctuate in the future, which could have an adverse effect on the trading price of the notes. Because interest rates and interest rate expectations are influenced by a wide variety of factors, many of which are beyond our control, we cannot assure you that changes in interest rates or interest rate expectations will not adversely affect the trading price of the notes.

Geopolitical developments, such as the ongoing conflicts between Russia and Ukraine and in the Middle East, could have a material adverse effect on Mexico's economy and its ability to raise funding in the external debt markets in the future.

The Russia-Ukraine conflict contributed to the upward pressure on global prices for certain commodities, including oil and gas and grains, and affected conditions in the international capital markets. The effects of the Russia-Ukraine conflict could materially affect the prices of certain commodities critical to the performance of the Mexican economy. Further, while the full extent of the impact of the conflict in the Middle East remains to be seen as of the date of this prospectus supplement, the effects of these ongoing conflicts could result in economic uncertainty and upward inflationary pressure, and, as a result, negatively affect the performance of the Mexican economy or Mexico's ability to raise funding in the external debt markets in the future.

USE OF PROCEEDS

The net proceeds to Mexico from the sale of the notes were approximately U.S.\$7,955,810,000, after the deduction of the underwriting discounts and Mexico's share of the expenses in connection with the sale of the notes, which are estimated to be approximately U.S.\$330,000. Mexico intends to use the net proceeds from the sale of the notes for the general purposes of the Government of Mexico, including the refinancing, repurchase or retirement of domestic and/or external indebtedness of Mexico, as well as to make a capital contribution to *Petróleos Mexicanos* (PEMEX) as authorized under Article 2 of the Federal Revenue Law for 2025, which in turn will be used by PEMEX to partially repay and redeem certain of its outstanding short-term securities and repurchase certain of its outstanding securities pursuant to the PEMEX Tender Offer. The PEMEX Tender Offer is made solely by means of an offer to purchase issued by PEMEX and this prospectus does not constitute an offer with respect thereto.

Optional Redemption – 2031 notes

Prior to February 22, 2031 (one month prior to their maturity date) (the “2031 notes Par Call Date”), Mexico may redeem the 2031 notes at its option, in whole or in part, at any time and from time to time, at a redemption price (expressed as a percentage of principal amount and rounded to three decimal places) equal to the greater of:

- (1) (a) the sum of the present values of the remaining scheduled payments of principal and interest thereon discounted to the redemption date (assuming the 2031 notes matured on the 2031 notes Par Call Date) on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) at the Treasury Rate plus 20 basis points less (b) interest accrued to the date of redemption, and
- (2) 100% of the principal amount of the 2031 notes to be redeemed,

plus, in either case, accrued and unpaid interest thereon to the redemption date.

On or after the 2031 notes Par Call Date, Mexico may redeem the 2031 notes, in whole or in part, at any time and from time to time, at a redemption price equal to 100% of the principal amount of the 2031 notes being redeemed plus accrued and unpaid interest thereon to the redemption date.

“*Treasury Rate*” for this purpose means, with respect to any redemption date, the yield determined by Mexico in accordance with the following two paragraphs.

The Treasury Rate shall be determined by Mexico after 4:15 p.m., New York City time (or after such time as yields on U.S. government securities are posted daily by the Board of Governors of the Federal Reserve System), on the third business day preceding the redemption date based upon the yield or yields for the most recent day that appear after such time on such day in the most recent statistical release published by the Board of Governors of the Federal Reserve System designated as “Selected Interest Rates (Daily) - H.15” (or any successor designation or publication) (“H.15”) under the caption “U.S. government securities—Treasury constant maturities—Nominal” (or any successor caption or heading) (“H.15 TCM”). In determining the Treasury Rate, Mexico shall select, as applicable: (1) the yield for the Treasury constant maturity on H.15 exactly equal to the period from the redemption date to the 2031 notes Par Call Date (the “Remaining Life”); or (2) if there is no such Treasury constant maturity on H.15 exactly equal to the Remaining Life, the two yields – one yield corresponding to the Treasury constant maturity on H.15 immediately shorter than and one yield corresponding to the Treasury constant maturity on H.15 immediately longer than the Remaining Life – and shall interpolate to the 2031 notes Par Call Date on a straight-line basis (using the actual number of days) using such yields and rounding the result to three decimal places; or (3) if there is no such Treasury constant maturity on H.15 shorter than or longer than the Remaining Life, the yield for the single Treasury constant maturity on H.15 closest to the Remaining Life. For purposes of this paragraph, the applicable Treasury constant maturity or maturities on H.15 shall be deemed to have a maturity date equal to the relevant number of months or years, as applicable, of such Treasury constant maturity from the redemption date.

If on the third business day preceding the redemption date H.15 TCM is no longer published, Mexico shall calculate the Treasury Rate based on the rate per annum equal to the semi-annual equivalent yield to maturity at 11:00 a.m., New York City time, on the second business day preceding such redemption date of the United States Treasury security maturing on, or with a maturity that is closest to, the 2031 notes Par Call Date, as applicable. If there is no United States Treasury security maturing on the 2031 notes Par Call Date but there are two or more United States Treasury securities with a maturity date equally distant from the 2031 notes Par Call Date, one with a maturity date preceding the 2031 notes Par Call Date and one with a maturity date following the 2031 notes Par Call Date, Mexico shall select the United States Treasury security with a maturity date preceding the 2031 notes Par Call Date. If there are two or more United States Treasury securities maturing on the 2031 notes Par Call Date or two or more United States Treasury securities meeting the criteria of the preceding sentence, Mexico shall select from among these two or more United States Treasury securities the United States Treasury security that is trading closest to par based upon the average of the bid and asked prices for such United States Treasury securities at 11:00 a.m., New York City time. In determining the Treasury Rate in accordance with the terms of this paragraph, the semi-annual yield to maturity of the applicable United States Treasury security shall be based upon the average of the bid and asked prices (expressed as a percentage of principal amount) at 11:00 a.m., New York City time, of such United States Treasury security, and rounded to three decimal places.

Mexico’s actions and determinations in determining the redemption price shall be conclusive and binding for all purposes, absent manifest error.

Notice of any redemption will be mailed or electronically delivered (or otherwise transmitted in accordance with the depositary’s procedures) at least 10 days but not more than 60 days before the redemption date to each holder of 2031 notes to be redeemed.

In the case of a partial redemption, selection of the 2031 notes for redemption will be made pro rata, by lot or by such other method as the Trustee in its sole discretion deems appropriate and fair and in accordance with applicable depositary procedures. No 2031 notes of a principal amount of \$1,000 or less will be redeemed in part. If any 2031 note is to be redeemed in part only, the notice of redemption that relates to the 2031 note will state the portion of the principal amount of the 2031 note to be redeemed. A

new 2031 note in a principal amount equal to the unredeemed portion of the 2031 note will be issued in the name of the holder of the 2031 note upon surrender for cancellation of the original 2031 note. For so long as the 2031 notes are held by DTC (or another depository), the redemption of the 2031 notes shall be done in accordance with the policies and procedures of the depository.

Unless Mexico defaults in payment of the redemption price, on and after the redemption date interest will cease to accrue on the 2031 notes or portions thereof called for redemption.

Optional Redemption – 2033 notes

Prior to January 22, 2033 (two months prior to their maturity date) (the “2033 notes Par Call Date”), Mexico may redeem the 2033 notes at its option, in whole or in part, at any time and from time to time, at a redemption price (expressed as a percentage of principal amount and rounded to three decimal places) equal to the greater of:

(1) (a) the sum of the present values of the remaining scheduled payments of principal and interest thereon discounted to the redemption date (assuming the 2033 notes matured on the 2033 notes Par Call Date) on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) at the Treasury Rate plus 25 basis points less (b) interest accrued to the date of redemption, and

(2) 100% of the principal amount of the 2033 notes to be redeemed,

plus, in either case, accrued and unpaid interest thereon to the redemption date.

On or after the 2033 notes Par Call Date, Mexico may redeem the 2033 notes, in whole or in part, at any time and from time to time, at a redemption price equal to 100% of the principal amount of the 2033 notes being redeemed plus accrued and unpaid interest thereon to the redemption date.

“*Treasury Rate*” for this purpose means, with respect to any redemption date, the yield determined by Mexico in accordance with the following two paragraphs.

The Treasury Rate shall be determined by Mexico after 4:15 p.m., New York City time (or after such time as yields on U.S. government securities are posted daily by the Board of Governors of the Federal Reserve System), on the third business day preceding the redemption date based upon the yield or yields for the most recent day that appear after such time on such day in the most recent statistical release published by the Board of Governors of the Federal Reserve System designated as “Selected Interest Rates (Daily) - H.15” (or any successor designation or publication) (“H.15”) under the caption “U.S. government securities–Treasury constant maturities–Nominal” (or any successor caption or heading) (“H.15 TCM”). In determining the Treasury Rate, Mexico shall select, as applicable: (1) the yield for the Treasury constant maturity on H.15 exactly equal to the period from the redemption date to the 2033 notes Par Call Date (the “Remaining Life”); or (2) if there is no such Treasury constant maturity on H.15 exactly equal to the Remaining Life, the two yields – one yield corresponding to the Treasury constant maturity on H.15 immediately shorter than and one yield corresponding to the Treasury constant maturity on H.15 immediately longer than the Remaining Life – and shall interpolate to the 2033 notes Par Call Date on a straight-line basis (using the actual number of days) using such yields and rounding the result to three decimal places; or (3) if there is no such Treasury constant maturity on H.15 shorter than or longer than the Remaining Life, the yield for the single Treasury constant maturity on H.15 closest to the Remaining Life. For purposes of this paragraph, the applicable Treasury constant maturity or maturities on H.15 shall be deemed to have a maturity date equal to the relevant number of months or years, as applicable, of such Treasury constant maturity from the redemption date.

If on the third business day preceding the redemption date H.15 TCM is no longer published, Mexico shall calculate the Treasury Rate based on the rate per annum equal to the semi-annual equivalent yield to maturity at 11:00 a.m., New York City time, on the second business day preceding such redemption date of the United States Treasury security maturing on, or with a maturity that is closest to, the 2033 notes Par Call Date, as applicable. If there is no United States Treasury security maturing on the 2033 notes Par Call Date but there are two or more United States Treasury securities with a maturity date equally distant from the 2033 notes Par Call Date, one with a maturity date preceding the 2033 notes Par Call Date and one with a maturity date following the 2033 notes Par Call Date, Mexico shall select the United States Treasury security with a maturity date preceding the 2033 notes Par Call Date. If there are two or more United States Treasury securities maturing on the 2033 notes Par Call Date or two or more United States Treasury securities meeting the criteria of the preceding sentence, Mexico shall select from among these two or more United States Treasury securities the United States Treasury security that is trading closest to par based upon the average of the bid and asked prices for such United States Treasury securities at 11:00 a.m., New York City time. In determining the Treasury Rate in accordance with the terms of this paragraph, the semi-annual yield to maturity of the applicable United States Treasury security shall be based upon the average of the bid and asked prices (expressed as a percentage of principal amount) at 11:00 a.m., New York City time, of such United States Treasury security, and rounded to three decimal places.

Mexico's actions and determinations in determining the redemption price shall be conclusive and binding for all purposes, absent manifest error.

Notice of any redemption will be mailed or electronically delivered (or otherwise transmitted in accordance with the depository's procedures) at least 10 days but not more than 60 days before the redemption date to each holder of 2033 notes to be redeemed.

In the case of a partial redemption, selection of the 2033 notes for redemption will be made pro rata, by lot or by such other method as the Trustee in its sole discretion deems appropriate and fair and in accordance with applicable depository procedures. No 2033 notes of a principal amount of \$1,000 or less will be redeemed in part. If any 2033 note is to be redeemed in part only, the notice of redemption that relates to the 2033 note will state the portion of the principal amount of the 2033 note to be redeemed. A new 2033 note in a principal amount equal to the unredeemed portion of the 2033 note will be issued in the name of the holder of the 2033 note upon surrender for cancellation of the original 2033 note. For so long as the 2033 notes are held by DTC (or another depository), the redemption of the 2033 notes shall be done in accordance with the policies and procedures of the depository.

Unless Mexico defaults in payment of the redemption price, on and after the redemption date interest will cease to accrue on the 2033 notes or portions thereof called for redemption.

Optional Redemption – 2035 notes

Prior to June 22, 2035 (three months prior to their maturity date) (the "2035 notes Par Call Date"), Mexico may redeem the 2035 notes at its option, in whole or in part, at any time and from time to time, at a redemption price (expressed as a percentage of principal amount and rounded to three decimal places) equal to the greater of:

- (1) (a) the sum of the present values of the remaining scheduled payments of principal and interest thereon discounted to the redemption date (assuming the 2035 notes matured on the 2035 notes Par Call Date) on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) at the Treasury Rate plus 25 basis points less (b) interest accrued to the date of redemption, and

(2) 100% of the principal amount of the 2035 notes to be redeemed, plus, in either case, accrued and unpaid interest thereon to the redemption date.

On or after the 2035 notes Par Call Date, Mexico may redeem the 2035 notes, in whole or in part, at any time and from time to time, at a redemption price equal to 100% of the principal amount of the 2035 notes being redeemed plus accrued and unpaid interest thereon to the redemption date.

UNITED MEXICAN STATES

Geography and Population

On July 16, 2025, a decree amending, adding, and repealing various provisions of the *Ley Federal de Presupuesto y Responsabilidad Hacendaria* (Federal Budget and Fiscal Responsibility Law) was published in the Official Gazette to strengthen the allocation of social spending on the basis of empirical evidence. The decree abolishes the *Consejo Nacional de Evaluación de la Política de Desarrollo Social* (National Council for the Evaluation of Social Development Policy or CONEVAL) and transfers its powers to *Instituto Nacional de Estadística y Geografía* (National Institute of Statistics and Geography, or INEGI), which is now responsible for issuing and updating the technical guidelines for poverty measurement and social policy evaluation. This transfer of power seeks to enhance fiscal oversight, ensure methodological consistency, and reinforce transparency and independence in public finance management. Pursuant to its new mandate, on August 13, 2025, INEGI published the first official measurement of multidimensional poverty in Mexico, using the *Encuesta Nacional de Ingresos y Gastos de los Hogares* (National Survey of Household Income and Expenditure, or ENIGH) 2024, reporting that 29.6% of the population (38.5 million people) were living in multidimensional poverty, while 7.0 million people were living in extreme poverty.

Legal and Political Reforms

On July 16, 2025, a decree was published in the Official Gazette enacting the *Ley General del Sistema Nacional de Seguridad Pública* (General Law on the National Public Security System), which aims to enhance coordination, efficiency and transparency in addressing current security challenges in Mexico.

On July 22, 2025, a decree was published in the Official Gazette issuing the Internal Regulations of the *Secretaría de Cultura* (Ministry of Culture), which, among other provisions, establish the agency's structure and operations, define its leadership's roles and responsibilities, and set forth the duties and responsibilities of the different units within the agency.

On August 4, 2025, a decree was published in the Official Gazette creating the *Comisión Presidencial para la Reforma Electoral* (Presidential Commission for Electoral Reform), with the aims of increasing citizen participation in the improvement of the electoral system and carrying out analyses and preparing reports on electoral reform topics. The Commission, which will carry out its functions until the earlier of September 30, 2030 or its dissolution by Mexico's President, will (i) report directly to the President, (ii) be funded with resources included in the federal budget, and (iii) be chaired by a federal executive branch appointee and composed of representatives from various agencies.

On August 20, 2025, the *Secretaría de Hacienda y Crédito Público* (Ministry of Finance and Public Credit), published new management guidelines for investment programs and projects carried out by federal agencies and entities in the Official Gazette, with the goal of prioritizing prosperity, equitable development and social justice, and reducing inequality.

Criminal Justice

On July 16, 2025, several decrees were published in the Official Gazette amending, adding, and repealing certain provisions of the *Código Militar de Procedimientos Penales* (Military Code of Criminal Procedure), *Ley de Disciplina del Ejército y Fuerza Aérea Mexicanos* (Mexican Army and Air Force Discipline Act), and the *Código de Justicia Militar* (Code of Military Justice). These reforms expand military jurisdiction over members of the National Guard, among other changes.

Internal Security

On July 16, 2025, a decree enacting the *Ley del Sistema Nacional de Investigación e Inteligencia en Materia de Seguridad Pública* (Law on the National Public Security Investigation and Intelligence System) was published in the Official Gazette. The decree aims to regulate the organization and operations of the *Sistema Nacional de Seguridad Pública* (National Public Security System), as well as the distribution of powers and coordination among federal, state and municipal institutions in accordance with the provisions of Article 21 of the *Constitución Política de los Estados Unidos Mexicanos* (Political Constitution Mexico).

On July 16, 2025, a decree was published in the Official Gazette issuing the *Ley de la Guardia Nacional* (National Guard Law) and reforming the *Ley Orgánica de la Administración Pública Federal* (Organic Law of the Federal Public Administration). The law also provides that the National Guard may enter into agreements to temporarily assist state or municipal authorities in matters of public security and participate in environmental protection issues. Reforms to the Organic Law of the Federal Public Administration include incorporating the National Guard as a permanent part of the *Secretaría de la Defensa Nacional* (Ministry of National Defense, or Sedena), granting Sedena a supervisory role over the public security operations of the National Guard, and restructuring the National Guard's administrative units to strengthen coordination among institutions, among other changes.

On July 22, 2025, the Mexican government launched the *Cero Robos* (Zero Robberies) strategy to reinforce security on the Mexico-Puebla, Mexico-Querétaro, and Culiacán-Mazatlán highways. As part of the strategy, the National Guard deployed more than 1,100 troops, vehicles, helicopters, drones, and stolen vehicle detection towers.

Under the program, the *Secretaría de Infraestructura, Comunicaciones y Transportes* (Ministry of Infrastructure, Communications and Transportation, or SICT) is expected to modernize infrastructure and build 13 highway rest stops with services and security, among other efforts. This strategy, which will be initially implemented along these three highways, is expected to be expanded to Mexico's entire federal highway network.

Foreign Trade Relations and Agreements

On July 23, 2025, with the goal of strengthening the safe trade of animal and plant products, Mexico's Ministry of Agriculture and Rural Development collaborated with the Department of Agricultural Defense of Brazil's Ministry of Agriculture, Livestock and Supply (MAPA) to enhance commercial ties between the two countries. The National Service of Agri-Food Health, Safety and Quality (*Senasica*) hosted Brazilian officials to establish a work plan benefiting food production in both nations.

On August 5, 2025, with the purpose of strengthening the safe trade of agri-food products between Mexico and Canada, the sanitary agencies of both countries started working on strategies to streamline existing protocols and facilitate trade of new products, benefiting producers and consumers in both nations. In a virtual meeting, Mexico's Ministry of Agriculture and Rural Development, the *Senasica*, and the Canadian Food Inspection Agency (CFIA) emphasized the importance of cooperation to ensure the flow of safe food.

In the second quarter of 2025, Mexico's current account registered a surplus of U.S.\$206 million, or 0.04% of GDP, compared to a deficit of U.S.\$911 million, or 0.19% of GDP, in the second quarter of 2024. The increase in the current account balance was the result of an increase in the non-oil merchandise balance and a decrease in the services deficit, which were partially offset by increases in the primary income and oil merchandise balance deficits, as well as a decrease in the secondary income surplus.

Foreign Investment in Mexico

On July 13, 2025, the Ministry of Economy reported progress in the establishment of Investment Promotion Committees across the states, an initiative aimed at fostering and sustaining national and foreign investment. Moreover, committees were launched in Campeche, Baja California Sur and in San Luis Potosí, bringing the total amount of state committees to eight. The strategy envisions the creation of 32 state committees and one national committee, under the *Plan México*, as a formal and reliable space for dialogue between the federal government and the business sector.

PUBLIC FINANCE

General

During the first half of 2025, fiscal balances remained in line with the targets set forth in the 2025 Economic Package, due to a strong tax revenue performance and income from public entities and companies, and fiscally responsible public spending.

On September 4, 2025, a decree was published in the Official Gazette approving the *Programa Nacional de Financiamiento del Desarrollo 2025-2030* (National Development Financing Program 2025-2030), which was prepared by the Ministry of Finance and Public Credit as part of the National Development Plan. The program seeks to ensure the efficient and transparent use of public resources under the principles of republican austerity, promote balanced economic growth among regions and strengthen public sector revenues. The program will be mandatory for federal agencies, and its implementation will be supervised by the Ministry of Finance and Public Credit together with the Ministry of Anticorruption and Good Governance.

Fiscal policy

On August 22, 2025, the Ministry of Finance and Public Credit published an *Acuerdo* (Agreement) in the Official Gazette establishing fiscal stimulus amounts, pursuant to decrees in effect since 2020, for gasoline sales in municipalities bordering Guatemala. The regulation, which aims to reduce price disparities with neighboring countries and support regional competitiveness, sets forth the differentiated per-liter subsidies based on fuel type and region, ranging from Ps. 1.167 to Ps. 2.549, that were effective between August 23 and August 29, 2025.

This update allows for more timely and comparable monitoring of state and municipal budget execution, strengthens multi-year fiscal planning, and provides key inputs for performance evaluation, aligning territorial public spending with the objectives of the 2025–2030 National Development Plan and Mexico’s international sustainable development commitments.

Health and Labor, Education and Other Social Welfare Expenditures

On July 17, 2025, an amendment to the *Programa de Crédito 2025 del Fondo de la Vivienda* (2025 Credit Program of the Housing Fund) was published in the Official Gazette, authorizing an additional Ps. 7 billion for the *Programa Fondo de la Vivienda Mujeres* (Housing Fund Women’s Program), which aims to offer financing to female government workers with interest rates ranging from 2% to 3.5%.

If *Banco de México* undertakes extensive sales of allocated debt in the secondary market, however, this can result in an elevated level of outstanding internal debt as compared to the Government’s figure for net internal debt.

BofA Securities, Inc., Citigroup Global Markets Inc. and J.P. Morgan Securities LLC are acting as global coordinators and joint lead bookrunners in connection with the offering of the notes, and Deutsche Bank Securities Inc., Goldman Sachs & Co LLC, Mizuho Securities USA LLC and SMBC Nikko Securities America, Inc. acted as joint bookrunners in connection with the offering of the notes.

The underwriters offered the notes to the public at the respective public offering price set forth for the 2031 notes, the 2033 notes and the 2035 notes on the cover page of this prospectus supplement. After the initial offering of the notes, the underwriters may have varied the offering price and other selling terms. The underwriters may have offered and sold the notes through certain of their respective affiliates. Some of the notes will be offered and sold in transactions that are exempt from the registration requirements of the Securities Act of 1933, as amended (the “Securities Act”) pursuant to Regulation S thereunder, and this prospectus supplement may be used in connection with such offers and sales.

The underwriters purchased and offered the notes, subject to prior sale, when, as and if issued to and accepted by them, subject to approval of the validity of the notes by counsel and other conditions contained in the terms agreement, such as the receipt by the underwriters of certificates of officials and legal opinions. The underwriters reserved the right to withdraw, cancel or modify offers to the public and to reject orders, in whole or in part.

Certain of the underwriters or, as applicable, their respective affiliates are acting as joint dealer managers for the PEMEX Tender Offer, pursuant to an offer to purchase by PEMEX. As described in “Use of Proceeds,” it is anticipated that some of the net proceeds of this offering will be used by Mexico to make a capital contribution to PEMEX, which in turn will be used by PEMEX to partially repay and redeem certain of its outstanding short-term securities and repurchase certain of its outstanding securities pursuant to the PEMEX Tender Offer, for which certain of the underwriters are acting as joint dealer managers. Affiliates of the underwriters may be holders of certain of the outstanding securities of PEMEX subject to the PEMEX Tender Offer and may receive 5% or more of the proceeds from this offering in tendering their PEMEX securities. Because of the manner in which the net proceeds are being used, this offering will be conducted in accordance with Financial Industry Regulatory Authority (“FINRA”) Rule 5121.

Some of the underwriters and their affiliates have engaged in, and may in the future engage in, investment banking and other commercial dealings in the ordinary course of business with Mexico or its

affiliates. They have received, or may in the future receive, customary fees and commissions for these transactions.

In addition, in the ordinary course of their business activities, the underwriters and their affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers. Such investments and securities activities may involve securities and/or instruments of Mexico or its affiliates. If any of the underwriters or their affiliates has a lending relationship with us, certain of those underwriters or their affiliates routinely hedge, and certain other of those underwriters or their affiliates may hedge, their credit exposure to us consistent with their customary risk management policies. Typically, these underwriters and their affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in our securities, including potentially the notes offered hereby. Any such credit default swaps or short positions could adversely affect future trading prices of the notes offered hereby. The underwriters and their affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

In order to facilitate the offering of the notes, the underwriters and their affiliates may engage in transactions that stabilize, maintain or affect the price of the notes. In particular, the underwriters or their affiliates may:

- over-allot in connection with the offering (*i.e.*, apportion to dealers more of the notes than the underwriters have), creating a short position in the notes for their own accounts;
- bid for and purchase notes in the open market to cover over-allotments or to stabilize the price of the notes; or
- if the underwriters or their affiliates repurchase previously distributed notes, reclaim selling concessions which they gave to dealers when they sold the notes.

Any of these activities may stabilize or maintain the market price of the notes above independent market levels. The underwriters or their affiliates are not required to engage in these activities, but, if they do, they may discontinue them at any time.

Any stabilization action may begin on or after the date on which adequate public disclosure of the final terms of the offer of the notes is made and, if begun, may be ended at any time, but it must end no later than the earlier of 30 days after the issue date of the notes and 60 days after the date of the allotment of the notes. Any stabilization action or over-allotment must be conducted by the underwriters, or any person acting on behalf of the underwriters, in accordance with all applicable laws and rules. This supplements the stabilization provision in the corresponding prospectus dated September 26, 2025 issued by Mexico.

Delivery of the notes was made against payment therefor on the fourth business day following the date of launch (such settlement cycle being referred to herein as “T+4”). Trades in the secondary market generally are required to settle in one business day, unless the parties to any such trade expressly agree otherwise. Accordingly, purchasers who wished to trade the notes prior to one business day before delivery were required, by virtue of the fact that the notes initially settled in T+4, to specify an alternate settlement cycle at the time of any such trade to prevent a failed settlement. Purchasers of the notes who wished to trade the notes prior to one business day before delivery should have consulted their own advisors.

The net proceeds to Mexico from the sale of the notes were approximately U.S.\$7,955,810,000, after the deduction of the underwriting discount and Mexico's share of the expenses in connection with the sale of the notes, which are estimated to be approximately U.S.\$330,000.

The underwriters agreed to pay for certain expenses of Mexico in connection with the offering of the notes.

Mexico agreed to indemnify the several underwriters against certain liabilities, including liabilities under the U.S. Securities Act of 1933, as amended, or to contribute to payments that the underwriters may be required to make in respect of any of those liabilities.

The notes will not be offered, sold or delivered nor any copies of the prospectus, the prospectus supplement and/or any other document relating to the notes will be distributed in the Republic of Italy except in circumstances which are exempted from the rules on public offerings, as provided under Regulation (EU) 2017/1129, the Legislative Decree No. 58 of 24 February 1998 (the “Consolidated Financial Act”) and the *Commissione Nazionale per le Società e la Borsa* (“CONSOB”) Regulation No. 11971 of 14 May 1999 (the “Issuer Regulation”).

Any offer, sale or delivery of the notes or distribution of copies of the prospectus, the prospectus supplement or any other document relating to the notes in the Republic of Italy must be:

- (a) made by an investment firm, bank or financial intermediary permitted to conduct such activities in the Republic of Italy in accordance with Regulation (EU) 2017/1129, the Consolidated Financial Act, Regulation No. 20307, Legislative Decree No. 385 of 1 September 1993 (the “Banking Act”) (in each case, as amended) and any other applicable laws or regulation;
- (b) in compliance with Article 129 of the Banking Act, and the implementing guidelines of the Bank of Italy, as amended from time to time; and
- (c) in compliance with any other applicable laws and regulations or requirement imposed by CONSOB or the Bank of Italy or other competent authority.

Each intermediary must comply with the applicable laws and regulations concerning information duties vis-à-vis its clients in connection with the notes or the relevant offering.

Japan

The notes have not been and will not be registered under the Financial Instruments and Exchange Act of Japan (Act No. 25 of 1948, as amended, the “Financial Instruments and Exchange Act”) and each underwriter and agent will represent and agree that it will not offer or sell any notes, directly or indirectly, in Japan or to, or for the benefit of, any resident of Japan (as defined under Item 5, Paragraph 1, Article 6 of the Foreign Exchange and Foreign Trade Act of Japan (Act No. 228 of 1949, as amended)), or to others for re offering or resale, directly or indirectly, in Japan or to, or for the benefit of, a resident of Japan, except pursuant to an exemption from the registration requirements of, and otherwise in compliance with, the Financial Instruments and Exchange Act and any other applicable laws, regulations and ministerial guidelines of Japan.

Luxembourg

The notes may not be offered to the public in Luxembourg, except in the following circumstances:

- a. in the period beginning on the date of publication of a prospectus in relation to those notes which have been approved by the *Commission de surveillance du secteur financier* (CSSF) in Luxembourg or, where appropriate, approved in another relevant European Union Member State and notified to ESMA and the CSSF, all in accordance with the Prospectus Regulation and ending on the date which is 12 months after the date of such publication (hereafter a “Public offer”);
- b. at any time to qualified investors, which, pursuant to the Prospectus Regulation, means persons or entities that are listed in points (1) to (4) of Section I of Annex II to Directive 2014/65/EU, and persons or entities who are, on request, treated as professional clients in accordance with Section II of that Annex, or recognised as eligible counterparties in accordance with Article 30 of Directive 2014/65/EU unless they have entered into an agreement to be treated as non-professional clients in accordance with the fourth paragraph of Section I of that Annex. For the purposes of applying the first sentence of this point, investment firms and credit institutions shall, upon request from the issuer, communicate the classification of their clients to the issuer subject to compliance with the relevant laws on data protection;
- c. an offer of securities addressed to fewer than 150 natural or legal persons per Member State, other than qualified investors; and/or
- d. at any time in any other circumstances which do not require the publication by the issuer of a prospectus pursuant to Article 1 (4) of the Prospectus Regulation.

The applicability of the selling restrictions provided by Luxembourg law will depend on whether the invitation is to be treated as a public offer or whether it can be made under one of the exemptions of Article 1 (4) of the Prospectus Regulation (a “private placement”).

For the purposes of this provision, the expression an offer of notes to the public in relation to any notes in Luxembourg means the communication in any form and by any means of sufficient information on the terms of the offer and the notes to be offered so as to enable an investor to decide to purchase the notes, as defined in the Prospectus Regulation or any variation thereof or amendment thereto.

The delivery to, and receipt by, the CNBV of such notice does not certify the solvency, liquidity or credit quality of Mexico, the investment quality of the notes, or that the information contained in this prospectus supplement and the corresponding prospectus is accurate or complete, or validates any legal action that is void under applicable law. Mexico has prepared this prospectus supplement and the corresponding prospectus and is solely responsible for its content, and the CNBV has not reviewed or authorized such content.
