LISTING PARTICULARS
DATED MARCH 13, 2015

NOT FOR GENERAL CIRCULATION
IN THE UNITED STATES OR ISRAEL

€2,055 million (equivalent)

\$1,480,000,000 $7^5/_8$% Senior Notes due 2025
€750,000,000 $6^1/_4$% Senior Notes due 2025

issued by

ALTICE S.A.

Altice S.A., a public limited liability company (*société anonyme*) organized and existing under the laws of the Grand Duchy of Luxembourg (the "Issuer"), offered \$1,480 million aggregate principal amount of its $7^5/_8$% senior notes due 2025 (the "Dollar Notes") and €750 million aggregate principal amount of its $6^1/_4$% senior notes due 2025 (the "Euro Notes" and, together with the Dollar Notes, the "Notes"), in connection with the financing of the PT Portugal Acquisition (as defined herein). The Notes will mature on February 15, 2025. The Issuer will pay interest on the Notes, as applicable, semi annually in cash in arrears on each April 1 and October 1, commencing on October 1, 2015. Please refer to "Definitions" for the meaning of certain capitalized terms used herein.

On the Issue Date (as defined below) the Initial Purchasers deposited (i) the gross proceeds from the offering of the Dollar Notes into a segregated escrow account (the "Dollar Notes Escrow Account") in the name of the Escrow Agent (as defined herein) for the benefit of the holders of the Dollar Notes and the Trustee, and (ii) the gross proceeds from the offering of the Euro Notes into a segregated escrow account (the "Euro Notes Escrow Account" and, together with the Dollar Notes Escrow Account, the "Escrow Accounts") in the name of the Escrow Agent for the benefit of the holders of the Euro Notes and the Trustee. The release of escrow proceeds will be subject to the conditions set forth in "*Description of Notes—Escrow of Proceeds; Special Mandatory Redemption*". If the conditions for the release of escrow proceeds are not satisfied prior to June 9, 2016 or upon the occurrence of certain other events, the applicable Notes will be subject to a special mandatory redemption at 100% of the initial issue price of each such Note plus accrued and unpaid interest and additional amounts, if any, from the Issue Date. See "*Description of Notes—Escrow of Proceeds; Special Mandatory Redemption*".

At any time prior to February 15, 2020, the Issuer may redeem some or all of the Notes at a price equal to 100% of the principal amount plus a "make whole" premium. At any time on or after February 15, 2020, the Issuer may redeem some or all of the Notes at the redemption prices set forth herein. Prior to February 15, 2018, the Issuer may redeem up to 40% of the aggregate principal amount of each series of the Notes with the proceeds of certain public or private equity offerings at a redemption price equal to 107.625% of the principal amount of the Dollar Notes and 106.250% of the principal amount of the Euro Notes, plus, in each case, accrued and unpaid interest and additional amounts, if any, to the redemption date, provided that at least 60% of the original aggregate principal amount of each series of the Notes remains outstanding after the redemption. Further, the Issuer may redeem all of the Notes at a price equal to their principal amount plus accrued and unpaid interest and additional amounts, if any, upon the occurrence of certain changes in tax law. If the Issuer and its restricted subsidiaries sell certain of their assets or, if the Issuer experiences specific kinds of changes of control, the Issuer may be required to make an offer to repurchase the Notes at the prices set forth herein.

The Notes are senior obligations of the Issuer. Prior to the release of all of the proceeds of the offering of the Notes from the Escrow Accounts, the Notes are secured by a first ranking pledge over the Issuer's rights under the Escrow Agreement (as defined herein) and the assets in the Escrow Accounts as applicable. On the Completion Date, the Notes will benefit from first ranking pledges (the "Collateral") over (i) all of the share capital of Altice International S.à r.l. ("Altice International") and Altice France S.A. and (ii) the AI Mandatory Convertible Notes.

The Notes were not guaranteed on the Issue Date. On the Completion Date, the Notes will be guaranteed (the "Guarantee") by Altice France S.A. (the "Guarantor").

The Collateral will also secure the obligations of the Issuer under the 2014 Altice S.A. Revolving Credit Facility Agreement (as defined herein), the 2014 Senior Notes (as defined herein) and certain hedging obligations. Under the terms of the Altice S.A. Intercreditor Agreement (as defined herein), in the event of an enforcement of the Collateral, the holders of the Notes will receive proceeds from such Collateral only after the lenders under the 2014 Altice S.A. Revolving Credit Facility Agreement and the counterparties to certain hedging agreements have been repaid in full. Any proceeds received upon any enforcement over any Collateral, after all obligations under the Altice S.A. Revolving Credit Facility have been repaid and such hedging obligations have been discharged from such recoveries, will be applied pro rata in repayment of all obligations under the Indenture, the Notes, the 2014 Senior Notes and obligations under the 2014 Senior Notes Indenture and any other Indebtedness of the Issuer and the Guarantors permitted to be Incurred and secured by the Collateral on a pari passu basis pursuant to the Indenture and the Intercreditor Agreement. In addition, the security interests in the Collateral may be released under certain circumstances. See "G*eneral Description of our Business and the Offering—The Offering*", "*Simplified Corporate and Financing Structu*re", "*Risk Factors—Risks Relating to the Notes and the Structure*" and "*Description of Other Indebtedness*".

Investing in the Notes involves a high degree of risk. Please see "*Risk Factors*" beginning on page 50 of these Listing Particulars.

The Notes and the Guarantee have not been, and will not be, registered under the U.S. Securities Act of 1933, as amended (the "U.S. Securities Act"), or the securities laws of any other jurisdiction, and may not be offered or sold within the United States except in compliance with Rule 144A under the U.S. Securities Act. In the United States, this offering is being made only to "qualified institutional buyers" (as defined in Rule 144A under the U.S. Securities Act ("Rule 144A")) in compliance with Rule 144A. You are hereby notified that the Initial Purchasers (as defined herein) of the Notes may be relying on the exemption from certain provisions of the U.S. Securities Act provided by Rule 144A. Outside the United States, this offering was made in reliance on Regulation S under the U.S. Securities Act ("Regulation S"). Please see "*Notice to Investors*" for additional information about eligible offerees and transfer restrictions.

Application has been made to the Luxembourg Stock Exchange for the Notes to be admitted to listing on the Official List of the Luxembourg Stock Exchange and trading on the Euro MTF Market, which is not a regulated market (pursuant to the provisions of Directive 2004/39/EC).

The Dollar Notes are in registered form in minimum denominations of $200,000 and integral multiples of $1,000 above $200,000. The Euro Notes are in registered form in minimum denominations of €100,000 and integral multiples of €1,000 above €100,000. As of February 4, 2015 (the "Issue Date"), each series of Notes are being represented by one or more global notes that were delivered through The Depository Trust Company ("DTC"), Euroclear SA/NV ("Euroclear") and Clearstream Banking, *société anonyme*, as applicable. Interests in each global note will be exchangeable for definitive notes only in certain limited circumstances. See "*Book-Entry, Delivery and Form*".

Dollar Notes price: 100.000% plus accrued interest from the Issue Date
Euro Notes price: 100.000% plus accrued interest from the Issue Date

THIS DOCUMENT CONSISTS OF THE LISTING PARTICULARS (THE "LISTING PARTICULARS") IN CONNECTION WITH THE APPLICATION TO HAVE THE NOTES LISTED ON THE OFFICIAL LIST OF THE LUXEMBOURG STOCK EXCHANGE AND ADMITTED FOR TRADING ON THE EURO MTF MARKET OF THE LUXEMBOURG STOCK EXCHANGE (THE "LISTING"). THESE LISTING PARTICULARS ARE PROVIDED ONLY FOR THE PURPOSE OF OBTAINING APPROVAL OF ADMISSION OF THE NOTES TO THE OFFICIAL LIST OF THE LUXEMBOURG STOCK EXCHANGE AND ADMISSION FOR TRADING ON THE EURO MTF MARKET OF THE LUXEMBOURG STOCK EXCHANGE AND SHALL NOT BE USED FOR OR DISTRIBUTED FOR ANY OTHER PURPOSE. THESE LISTING PARTICULARS DO NOT CONSTITUTE AN OFFER TO SELL, OR A SOLICITATION OF AN OFFER TO BUY, ANY OF THE NOTES AND THESE LISTING PARTICULARS HAVE NOT BEEN FILED WITH, OR REVIEWED BY, ANY NATIONAL OR LOCAL SECURITIES COMMISSION OR REGULATORY AUTHORITY OF ISRAEL, THE UNITED STATES, THE UNITED KINGDOM, FRANCE, GERMANY, BELGIUM, THE NETHERLANDS, OR ANY OTHER JURISDICTION, NOR HAS ANY SUCH COMMISSION OR AUTHORITY PASSED UPON THE MERITS, ACCURACY OR ADEQUACY OF THESE LISTING PARTICULARS. ANY REPRESENTATION TO THE CONTRARY MAY BE UNLAWFUL AND MAY BE A CRIMINAL OFFENSE.

These Listing Particulars are provided only for the purpose of obtaining approval of admission for trading on the Euro MTF Market of the Luxembourg Stock Exchange and shall not be used for or distributed for any other purpose and these Listing Particulars do not constitute an offer to sell, or a solicitation of an offer to buy, any of the Notes.

Neither the Issuer nor any of its subsidiaries or affiliates has authorized any dealer, salesperson or other person to give any information or represent anything to you other than the information contained in these Listing Particulars. You must not rely on unauthorized information or representations.

The information in these Listing Particulars are current only as of the date of the Listing Particulars, and may have changed after that date. For any time after the date of the Listing Particulars, the Issuer does not represent that its affairs or the affairs of the Group (as defined herein) are the same as described or that the information in these Listing Particulars are correct, nor does it imply those things by delivering these Listing Particulars or selling securities to you.

The Issuer and the Initial Purchasers (as defined below) are offering to sell the Notes only in places where offers and sales are permitted.

IN CONNECTION WITH THE OFFERING OF NOTES, J.P. MORGAN SECURITIES PLC (WITH RESPECT TO THE EURO NOTES) AND J.P. MORGAN SECURITIES LLC (WITH RESPECT TO THE DOLLAR NOTES) (THE "STABILIZING MANAGER") (OR PERSONS ACTING ON BEHALF OF THE STABILIZING MANAGER) MAY OVER-ALLOT NOTES OR EFFECT TRANSACTIONS WITH A VIEW TO SUPPORTING THE MARKET PRICE OF THE NOTES AT A LEVEL HIGHER THAN THAT WHICH MIGHT OTHERWISE PREVAIL. HOWEVER, THERE IS NO ASSURANCE THAT THE STABILIZING MANAGER (OR PERSONS ACTING ON BEHALF OF A STABILIZING MANAGER) WILL UNDERTAKE ANY SUCH STABILIZATION ACTION. SUCH STABILIZATION ACTION, IF COMMENCED, MAY BEGIN ON OR AFTER THE DATE OF ADEQUATE PUBLIC DISCLOSURE OF THE FINAL TERMS OF THE OFFER OF THE NOTES IS MADE AND, IF BEGUN, MAY BE ENDED AT ANY TIME, BUT IT MUST END NO LATER THAN THE EARLIER OF 30 CALENDAR DAYS AFTER THE DATE ON WHICH THE ISSUER RECEIVED THE PROCEEDS OF THE ISSUE AND 60 CALENDAR DAYS AFTER THE DATE OF ALLOTMENT OF THE NOTES.

The Issuer offered the Notes in reliance on exemptions from the registration requirements of the U.S. Securities Act. The Notes have not been registered with, recommended by or approved by the U.S. Securities and Exchange Commission (the "SEC") or any other securities commission or regulatory authority, nor has the SEC or any such securities commission or authority passed upon the accuracy or adequacy of these Listing Particulars. Any representation to the contrary is a criminal offense in the United States.

These Listing Particulars are being provided for informational use solely in connection with consideration of a purchase of the Notes (i) to U.S. investors that the Issuer reasonably believes to be qualified institutional buyers as defined in Rule 144A under the U.S. Securities Act, and (ii) to certain persons in offshore transactions complying with Rule 903 or Rule 904 of Regulation S under the U.S. Securities Act. Its use for any other purpose is not authorized.

These Listing Particulars are directed only to persons who (i) are investment professionals, as such term is defined in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended, the "Financial Promotion Order"), (ii) are persons falling within Article 49(2)(a) to (d) ("high net worth companies, unincorporated associations, etc.") of the Financial Promotion Order, (iii) are outside the United Kingdom, or (iv) are persons to whom an invitation or inducement to engage in investment activity (within the meaning of section 21 of the Financial Services and Markets Act 2000 ("FSM Act")) in connection with the issue or sale of any Notes may otherwise lawfully be communicated or caused to be communicated (all such persons together being referred to as "relevant persons"). These Listing Particulars are directed only at relevant persons and must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which these Listing Particulars relates is available only to relevant persons and will be engaged in only with relevant persons.

These Listing Particulars have been prepared on the basis that all offers of the Notes were made pursuant to an exemption under Article 3 of Directive 2003/71/EC as amended (the "EU Prospectus Directive"), as implemented in member states of the European Economic Area (the "EEA"), from the requirement to produce a prospectus for offers of the Notes. Accordingly, any person making or intending to make any offer within the EEA of the Notes should only do so in circumstances in which no obligation arises for the Issuer or any of the Initial Purchasers to produce a prospectus for such offer. Neither the Issuer nor the Initial Purchasers has authorized, nor do any of them authorize, the making of any offer of the Notes through any financial intermediary, other than offers made by the Initial Purchasers which constitute the final placement of the Notes contemplated in these Listing Particulars.

These Listing Particulars constitutes a prospectus for the purpose of part IV of the Luxembourg act dated July 10, 2005, on prospectuses for securities, as amended (the "Prospectus Act") and for the purpose of the rules and regulations of the Luxembourg Stock Exchange.

The Issuer has prepared these Listing Particulars solely for use in connection with this offering and for applying to the Luxembourg Stock Exchange for the Notes to be admitted to listing on the Official List of the Luxembourg Stock Exchange and to trading on the Euro MTF Market of the Luxembourg Stock Exchange.

You are not to construe the contents of these Listing Particulars as investment, legal or tax advice. You should consult your own counsel, accountant and other advisers as to legal, tax, business, financial and related aspects of a purchase of the Notes. You are responsible for making your own examination of the Issuer, the Group, ODO, Numericable Group, SFR and PT Portugal and your own assessment of the merits and risks of investing in the Notes. The Issuer is not, and the Initial Purchasers and the Trustee, and their respective agents, are not, making any representation to you regarding the legality of an investment in the Notes by you.

The information contained in these Listing Particulars have been furnished by the Issuer and other sources it believes to be reliable. No representation or warranty, express or implied, is made by the Initial Purchasers as to the accuracy or completeness of any of the information set out in these Listing Particulars, and nothing contained in these Listing Particulars are or shall be relied upon as a promise or representation by the Initial Purchasers, whether as to the past or the future. These Listing Particulars contain summaries, believed by the Issuer to be accurate, of some of the terms of specified documents, but reference is made to the actual documents, copies of which will be made available by the Issuer upon request, for the complete information contained in those documents. Copies of such documents and other information relating to the issuance of the Notes will also be available for inspection upon request at the specified offices of the Issuer. All summaries of the documents contained herein are qualified in their entirety by this reference.

The Issuer accepts responsibility for the information contained in these Listing Particulars. The Issuer has made all reasonable inquiries and confirmed to the best of each of their knowledge, information and belief that the information contained in these Listing Particulars with regard to them, each of its subsidiaries and affiliates, and the Notes are true and accurate in all material respects, that the opinions and intentions expressed in these Listing Particulars are honestly held, and that they are not aware of any other facts the omission of which would make these Listing Particulars or any statement contained herein misleading in any material respect.

The historical information relating to PT Portugal (as defined herein) included or referred to in these Listing Particulars have been obtained by us from public filings by Portugal Telecom SGPS, S.A. ("Portugal Telecom SGPS"), Oi, S.A. ("Oi") and its subsidiaries and we have relied on such information, together with certain limited additional information provided by Oi and/or PT Portugal, in the preparation of these Listing Particulars. None of Oi, PT Portugal or any of their respective subsidiaries are issuers of the Notes and, accordingly, each investor will be deemed to represent and warrant that such investor has not relied upon Oi, PT Portugal or any person affiliated with Oi or PT Portugal in connection with its investigation of the accuracy of the information of PT Portugal contained or incorporated by reference in these Listing Particulars. None of Oi, PT Portugal or any persons affiliated with them accepts any liability in relation to any such information.

No person is authorized in connection with any offering made pursuant to these Listing Particulars to give any information or to make any representation not contained in these Listing Particulars, and, if given or made, any other information or representation must not be relied upon as having been authorized by the Issuer, the Initial Purchasers, the Trustee or their respective agents. The information contained in these Listing Particulars are current at the date hereof. Neither the delivery of these Listing Particulars at any time nor any subsequent commitment to enter into any financing shall, under any circumstances, create any implication that there has been no change in the information set out in these Listing Particulars or in the Issuer's or the Group's affairs since the date of these Listing Particulars.

The Issuer reserves the right to withdraw this offering of the Notes at any time, and the Issuer and the Initial Purchasers reserve the right to reject any commitment to subscribe for the Notes in whole or in part and to allot to you less than the full amount of Notes subscribed for by you.

The distribution of these Listing Particulars and the offer and sale of the Notes may be restricted by law in some jurisdictions. Persons into whose possession these Listing Particulars or any of the Notes come must inform themselves about, and observe, any restrictions on the transfer and exchange of the Notes. See "*Plan of Distribution*" and "*Transfer Restrictions*".

These Listing Particulars does not constitute an offer to sell or an invitation to subscribe for or purchase any of the Notes in any jurisdiction in which such offer or invitation is not authorized or to any person to whom it is unlawful to make such an offer or invitation. You must comply with all laws that apply to you in any place in which you buy, offer or sell any Notes or possess these Listing Particulars. You must also obtain any consents or approvals that you need in order to purchase any Notes. The Issuer and the Initial Purchasers are not responsible for your compliance with these legal requirements.

The Notes are subject to restrictions on resale and transfer except as permitted under the U.S. Securities Act and all other applicable securities laws as described under "*Plan of Distribution*" and "*Transfer Restrictions*". By purchasing any Notes, you will be deemed to have made certain acknowledgments, representations and agreements as described in those sections of these Listing Particulars. You may be required to bear the financial risks of investing in the Notes for an indefinite period of time.

NOTICE TO NEW HAMPSHIRE RESIDENTS

NEITHER THE FACT THAT A REGISTRATION STATEMENT OR AN APPLICATION FOR A LICENSE HAS BEEN FILED UNDER RSA 421-B WITH THE STATE OF NEW HAMPSHIRE NOR THE FACT THAT A SECURITY IS EFFECTIVELY REGISTERED OR A PERSON IS LICENSED IN THE STATE OF NEW HAMPSHIRE CONSTITUTES A FINDING BY THE SECRETARY OF STATE THAT ANY DOCUMENT FILED UNDER RSA 421-B IS TRUE, COMPLETE AND NOT MISLEADING. NEITHER ANY SUCH FACT NOR THE FACT THAT AN EXEMPTION OR EXCEPTION IS AVAILABLE FOR A SECURITY OR A TRANSACTION MEANS THAT THE SECRETARY OF STATE HAS PASSED IN ANY WAY UPON THE MERITS OR QUALIFICATIONS OF, OR RECOMMENDED OR GIVEN APPROVAL TO, ANY PERSON, SECURITY, OR TRANSACTION. IT IS UNLAWFUL TO MAKE, OR CAUSE TO BE MADE, TO ANY PROSPECTIVE PURCHASER, CUSTOMER OR CLIENT ANY REPRESENTATION INCONSISTENT WITH THE PROVISIONS OF THIS PARAGRAPH.

NOTICE TO U.S. INVESTORS

Each purchaser of the Notes is deemed to have made the representations, warranties and acknowledgements that are described in these Listing Particulars under "*Transfer Restrictions*". The Notes have not been and will not be registered under the U.S. Securities Act or the securities laws of any state of the United States and are subject to certain restrictions on transferability and resale and may not be transferred or resold except as permitted under the U.S. Securities Act or any other applicable securities laws, pursuant to registration or an exemption therefrom. Prospective purchasers are hereby notified that the seller of any Note may be relying on the exemption from the provisions of Section 5 of the U.S. Securities Act provided by Rule 144A. For a description of certain further restrictions on resale or transfer of the Notes, see "*Transfer Restrictions*". The Notes may not be offered to the public within any jurisdiction. By accepting delivery of these Listing Particulars, you agree not to offer, sell, resell, transfer or deliver, directly or indirectly, any Note to the public.

NOTICE TO CERTAIN EUROPEAN INVESTORS

Austria These Listing Particulars have not been or will not be approved and/or published pursuant to the Austrian Capital Markets Act (*Kapitalmarktgesetz*) as amended. Neither these Listing Particulars nor any other document connected therewith constitutes a prospectus according to the Austrian Capital Markets Act and neither these Listing Particulars nor any other document connected therewith may be distributed, passed on or disclosed to any other person in

Austria. No steps may be taken that would constitute a public offering of the Notes in Austria and the offering of the Notes may not be advertised in Austria. Any offer of the Notes in Austria will only be made in compliance with the provisions of the Austrian Capital Markets Act and all other laws and regulations in Austria applicable to the offer and sale of the Notes in Austria.

Luxembourg These Listing Particulars have not been approved by and will not be submitted for approval to the Luxembourg Supervision Commission of the Financial Sector (*Commission de Surveillance du Secteur Financier*) for purposes of a public offering or sale in Luxembourg. Accordingly, the Notes may not be offered or sold to the public in Luxembourg, directly or indirectly, and neither these Listing Particulars nor any other circular, prospectus, form of application, advertisement or other material may be distributed, or otherwise made available in or from, or published in, Luxembourg except in circumstances which do not constitute a public offer of securities to the public, subject to prospectus requirements, in accordance with the Prospectus Act and implementing the EU Prospectus Directive. "EU Prospectus Directive" means Directive 2003/71/EC (and amendments thereto, including the 2010 PD Amending Directive, to the extent implemented in each member state of the EEA which has implemented the EU Prospectus Directive (a "Relevant Member State")) and includes any relevant implementing measure in each Relevant Member State and the expression "2010 PD Amending Directive" means Directive 2010/73/EU.

Germany The Notes may be offered and sold in Germany only in compliance with the German Securities Prospectus Act (*Wertpapierprospektgesetz*) as amended, the Commission Regulation (EC) No 809/2004 of April 29, 2004, as amended, or any other laws applicable in Germany governing the issue, offering and sale of securities. The Listing Particulars has not been approved under the German Securities Prospectus Act (*Wertpapierprospektgesetz*) or the Directive 2003/71/EC and accordingly the Notes may not be offered publicly in Germany.

France These Listing Particulars have not been prepared in the context of a public offering of financial securities in France within the meaning of Article L. 411-1 of the *Code Monétaire et Financier and Title I of Book II of the Règlement Général of the Autorité des marchés financiers* (the "AMF") and therefore has not been submitted for clearance to the AMF. Consequently, the Notes may not be, directly or indirectly, offered or sold to the public in France (*offre au public de titres financiers*), and offers and sales of the Notes will only be made in France to providers of investment services relating to portfolio management for the account of third parties (*personnes fournissant le service d'investissement de gestion de portefeuille pour le compte de tiers*) and/or to qualified investors (*investisseurs qualifiés*) and/or to a closed circle of investors (*cercle restreint d'investisseurs*) acting for their own accounts, as defined in and in accordance with Articles L. 411-1, L. 411-2, D. 411-1, D744-1, D 754-1 and D 764-1 of the *Code of Monétaire et Financier*. Neither these Listing Particulars nor any other offering material may be distributed to the public in France.

Italy. No action has been or will be taken which could allow an offering of the Notes to the public in the Republic of Italy within the meaning of Article 1, paragraph 1, letter t) of Legislative Decree No. 58 of February 24, 1998, as subsequently amended (the "Italian Financial Act"). Accordingly, the Notes may not be offered or sold directly or indirectly in the Republic of Italy, and neither these Listing Particulars nor any other offering circular, prospectus, form of application, advertisement, other offering material or other information relating to the Issuer, the Notes may be issued, distributed or published in the Republic of Italy, except under circumstances that will result in compliance with all applicable laws, orders, rules and regulations. The Notes cannot be offered or sold in the Republic of Italy either on the primary or on the secondary market to any natural persons or to entities other than qualified investors (investitori qualificati) as defined pursuant to Article 100 of the Italian Financial Act and Article 34 ter, paragraph 1, letter b) of Regulation No. 11971 of May 14, 1999 as amended (the "Issuers Regulation") issued by the Commissione Nazionale per le Società e la Borsa ("CONSOB") or unless in circumstances which are exempt from the rules on public offers pursuant to the Italian Financial Act and the implementing CONSOB regulations, including the Issuers Regulation.

The Notes may not be offered, sold or delivered and neither these Listing Particulars, and no other material relating to the Notes may be distributed or made available in the Republic of Italy unless such offer, sale or delivery of Notes or distribution or availability of copies of these Listing Particulars or any other material relating to the Notes in Italy is made as follows: (a) by investment firms, banks or financial intermediaries permitted to conduct such activities in Italy in accordance with Legislative Decree No 385 of September 1, 1993 as amended, the Italian Financial Act, CONSOB Regulation No. 16190 of October 29, 2007 as amended and any other applicable laws and regulations; and (b) in compliance with all relevant Italian securities, tax and exchange control and other applicable laws and regulations and any other applicable requirement or limitation which may be imposed from time to time by CONSOB or the Bank of Italy or other competent authority. Any investor purchasing the Notes is solely responsible for ensuring that any offer or resale of the Notes by such investor occurs in compliance with applicable laws and regulations.

The Netherlands The Notes (including the rights representing an interest in the Notes in global form) which are the subject of these Listing Particulars, have been and shall be offered, sold, transferred or delivered exclusively to qualified investors (within the meaning of the EU Prospectus Directive) in the Netherlands.

For the purposes of the above mentioned paragraphs, the expression an "offer of Notes to the public" in relation to any Notes in the Netherlands means the announcement or communication in any form and by any means of sufficient information on the terms of the offer and the Notes to be offered so as to enable an investor to decide to purchase or subscribe for the Notes and the expression "EU Prospectus Directive" means Directive 2003/71/EC (and amendments thereto, including the 2010 PD Amending Directive) and the expression "2010 PD Amending Directive" means Directive 2010/73/EU.

Spain This offering has not been registered with the *Comisión Nacional del Mercado de Valores* and therefore the Notes may not be offered in Spain by any means, except in circumstances which do not qualify as a public offer of securities in Spain in accordance with article 30 bis of the Securities Market Act ("*Ley 24/1988, de 28 de julio del Mercado de Valores*") as amended and restated, or pursuant to an exemption from registration in accordance with article 41 of the Royal Decree 1310/2005 ("*Real Decreto 1310/2005, de 4 de noviembre por el que se desarrolla parcialmente la Ley 24/1988, de 28 de julio, del Mercado de Valores, en materia de admisión a negociación de valores en mercados secundarios oficiales, de ofertas públicas de venta o suscripción y del folleto exigible a tales efectos*").

Switzerland The Notes offered hereby are being offered in Switzerland on the basis of a private placement only. These Listing Particulars, as well as any other material relating to the Notes which are the subject of the offering contemplated by these Listing Particulars, do not constitute an issue prospectus pursuant to article 652a and/or article 1156 of the Swiss Code of Obligations (SR 220) and does not comply with the Directive for Notes of Foreign Borrowers of the Swiss Bankers' Association. The Notes will not be listed on the SIX Swiss Exchange Ltd or any other Swiss stock exchange or regulated trading facility and, therefore, the documents relating to the Notes, including, but not limited to, these Listing Particulars, do not claim to comply with the disclosure standards of the Swiss Code of Obligations and the listing rules of SIX Swiss Exchange Ltd and corresponding prospectus schemes annexed to the listing rules of the SIX Swiss Exchange Ltd or the listing rules of any other Swiss stock exchange or regulated trading facility. Neither these Listing Particulars nor any other material relating to the Notes may be publicly distributed or othewise made publicly available in Switzerland. The Notes are being offered in Switzerland by way of a private placement (i.e. to a limited number of selected, hand picked investors only), without any public advertisement and only to investors who do not purchase the Notes with the intention to distribute them to the public. The investors will be individually approached directly from time to time. These Listing Particulars, as well as any other material relating to the Notes, may not be used in connection with any other offer and shall in particular not be copied and/or distributed to the public in (or from) Switzerland.

Portugal Neither this offering, nor the Notes have been approved by the Portuguese Securities Commission (*Comissão do Mercado de Valores Mobiliários*—the "CMVM") or by any other competent authority of another Member State of the European Union and notified to the CMVM.

Neither the Issuer nor the Initial Purchasers have, directly or indirectly, offered or sold any Notes or distributed or published these Listing Particulars, any prospectus, form of application, advertisement or other document or information in Portugal relating to the Notes and will not take any such actions in the future, except under circumstances that will not be considered as a public offering under article 109 of the Portuguese Securities Code (Código dos Valores Mobiliários—the "Cód.VM") approved by Decree Law 486/99 of 13 November 1999, as last amended by Decree Law No. 157/2014, of 24 October 2014.

As a result, this offering and any material relating to the Notes are addressed solely to, and may only be accepted by, any person or legal entity that is resident in Portugal or that will hold the notes through a permanent establishment in Portugal (each a "Portuguese Investor") to the extent that such Portuguese Investor (i) is deemed a qualified investor (*investidor qualificado*) pursuant to paragraph 1 of article 30 of the Cód.VM, (ii) is not treated by the relevant financial intermediary as a non-qualified investor (*investidor não qualificado*) pursuant to article 317 of the Cód.VM and (iii) does not request the relevant financial intermediary to be treated as a non-qualified investor (*investidor não qualificado*) pursuant to article 317-A of the Cód.VM.

United Kingdom These Listing Particulars are directed solely at persons who (i) are investment professionals, as such term is defined in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005, as amended (the "Financial Promotion Order"), (ii) are persons falling within Article 49(2)(a) to (d) ("high net worth companies, unincorporated associations, etc.") of the Financial Promotion Order, (iii) are outside the United Kingdom, or (iv) are persons to whom an invitation or inducement to engage in investment activity (within the meaning of Section 21 of the FMSA) in connection with the issue or sale of any Notes may otherwise be lawfully communicated or caused to be communicated (all such persons together being referred to as "relevant persons"). These Listing Particulars are directed only at relevant persons and must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which these Listing Particulars relates is available only to relevant persons and will be engaged in only with relevant persons. Any person who is not a relevant person should not act or rely on these Listing Particulars or any of its contents.

NOTICE TO ISRAELI INVESTORS

The Notes may not be offered or sold to any Israeli investor unless such investor (i) is a "Qualified Investor" within the meaning of the first Appendix to the Israeli Securities Law, who is not an individual (a "Qualified Israeli Investor"), (ii) has completed and signed a questionnaire regarding its qualifications as a Qualified Israeli Investor and delivered it to J.P. Morgan Securities plc or J.P. Morgan Securities LLC and (iii) has certified that it has an exemption from Israeli withholding taxes on interest and delivered a copy of such certification to J.P. Morgan Securities plc or J.P. Morgan Securities LLC.

THESE LISTING PARTICULARS CONTAIN IMPORTANT INFORMATION WHICH YOU SHOULD READ BEFORE YOU MAKE ANY DECISION WITH RESPECT TO AN INVESTMENT IN THE NOTES.

DEFINITIONS

Unless otherwise stated or the context otherwise requires, the terms "Group", "we", "us" and "our" as used in these Listing Particulars refers to the Issuer and its subsidiaries (including the Numericable Group, SFR and its subsidiaries, and SIG 50 and, following the Transactions, these terms will also include PT Portugal and its subsidiaries). For explanations or definitions of certain technical terms relating to our business as used herein, see "Glossary" on page G-1 of these Listing Particulars.

"Numericable Senior Secured Notes Indentures" refers to the indentures dated as of May 8, 2014, governing the Numericable Senior Secured Notes.

"Numericable Term Loan" refers to the term loan facility established under the facility agreement originally dated May 8, 2014, as amended, restated, supplemented or otherwise modified from time to time, among, inter alios, Numericable, Ypso France and Numericable U.S. LLC as borrowers, the lenders from time to time party thereto, Deutsche Bank AG, New York Branch as dollar administrative agent and Deutsche Bank AG, London Branch as euro administrative agent and as security agent.

"Numericable Term Loan Agreement" refers to the agreement originally dated May 8, 2014, that established the Numericable Term Loan facility.

"ODO" refers to Altice Hispaniola S.A, formerly named Orange Dominicana S.A.

"ODO Acquisition" refers to the acquisition by Altice Dominican Republic II S.A.S. of ODO which was completed on April 9, 2014.

"Offering" refers to this offering of the Notes.

"OMT Invest" refers to OMT Invest S.A.S., a private limited liability company (*société par actions simplifieé*), incorporated under the laws of France.

"ONI" and "ONI Group" refer to Winreason, ONI S.G.P.S., Onitelecom and/or their subsidiaries as the context requires.

"ONI Acquisition" refers to the purchase by Cabovisão of all of the outstanding shares of Winreason and Winreason shareholders' credits, which was consummated on August 8, 2013.

"ONI Facility Agreement" refers to the facility agreement originally dated 10 November 2011 between, amongst others, Onitelecom, as borrower, and Banco Efisa, S.A., as agent.

"ONI Hedging Agreements" refers to the hedging agreements entered into by Onitelecom in connection with the ONI Facility Agreement.

"ONI Refinancing" refers to, collectively, the repayment of the outstanding indebtedness under the ONI Facility Agreement by Altice Financing and the termination of, and repayment of the outstanding indebtedness under, the ONI Hedging Agreements by Onitelecom, which were consummated on August 8, 2013.

"ONI S.G.P.S." refers to ONI S.G.P.S., S.A. a holding company (*sociedade gestora de participações sociais*) incorporated under the laws of Portugal.

"Onitelecom" refers to Onitelecom—Infomunicações, S.A., a public limited liability company (*sociedade anónima*) incorporated under the laws of Portugal.

"Onitelecom Proceeds Notes" refers to the outstanding bonds issued by ONI and subscribed for by Altice Holdings.

"ONI Transaction" refers to, collectively, the ONI Acquisition and the ONI Refinancing.

"Outremer" refers to Groupe Outremer Telecom and its subsidiaries.

"Outremer Investment Agreement" refers to the investment agreement between the parties to the Outremer Purchase Agreement.

"Outremer Minority Shareholders" has the meaning ascribed to it under "*Description of our Business—Material Contracts—Certain Shareholder Arrangements—French Overseas Territories*".

"Outremer Proceeds Loans" collectively refers to the intercompany loans made by Altice Holdings as lender to Altice Caribbean, Altice Blue Two, OMT Invest and Group Outremer Telecom as borrowers in connection with the Outremer Transaction.

"Outremer Purchase Agreement" refers to the sale and purchase agreement dated June 7, 2013 between Altice International and certain of its subsidiaries and the existing investors in, and certain managers of, OMT Invest and certain of its affiliates.

"Outremer Transaction" refers collectively to the following transactions: (i) the purchase by Altice (through Altice Blue Two) of all of the outstanding share capital of OMT Invest other than shares that were contributed separately by the Outremer Minority Shareholders pursuant to the Outremer Investment Agreement and the refinancing of all of the outstanding indebtedness of OMT Invest and its subsidiaries pursuant to the Outremer Purchase Agreement; and (ii) the contribution by the Group of all of the outstanding share capital of Le Cable Martinique and Le Cable Guadeloupe to Altice Blue Two and the contribution by the managers of OMT Invest of substantially all of the outstanding shares of OMT Invest not sold to Altice under the Outremer Purchase Agreement to Altice Blue Two pursuant to the Outremer Investment Agreement. The Outremer Transaction was consummated on July 5, 2013.

"Overseas Territories" refers to the Dominican Republic and certain French Overseas Territories in the Caribbean and the Indian Ocean regions.

"PT Portugal Acquisition" refers to the acquisition of all of the shares of PT Portugal and certain of its subsidiaries by Altice International from OI pursuant to the Acquisition Agreement.

"PT Cloud" means PT Cloud e Data Centers, S.A., a public limited liability company (*sociedade anónima*) incorporated under the laws of Portugal.

"PTC" means PT Comunicações S.A., a public limited liability company (*sociedade anónima*) incorporated under the laws of Portugal.

“PT Group Loans” refers to the intercompany loans made by (i) Altice Portugal as lender to PT Portugal as borrower, (ii) PT Portugal as lender to PT Opco as borrower, (iii) PT Opco as lender to PT Móveis as borrower and (iv) PT Móveis as lender to SIRESP as borrower, in each case, in connection with the Transactions.

“PT OpCo” refers to MEO—Serviços de Comunicações e Multimédia, S.A., a public limited liability company (*sociedade anónima*) incorporated under the laws of Portugal with registration number 504 615 947, which was formerly known as PT Comunicações, S.A. and is the surviving entity from the merger of Meo, S.A. into PT Comunicações, S.A. on December 29, 2014.

“PT Móveis” means PT—Móveis—Serviços de Telecomunicações, SGPS, S.A., a public limited liability company (*sociedade anónima*) incorporated under the laws of Portugal.

“PT Portugal” refers to PT Portugal S.G.P.S., S.A., a public limited liability company (*sociedade anónima*) incorporated under the laws of Portugal.

“PT Portugal Acquisition” has the meaning ascribed to it under “*The Transactions*”.

“PT Portugal Acquisition Agreement” refers to the agreement entered into between Altice S.A. and Altice Portugal with Oi S.A. relating to 100% of the issued share capital of PT Portugal.

“PT Portugal Group” refers to the entities that will be acquired pursuant to the PT Portugal Acquisition. For a list of these entities, see “*PT Portugal Combined Selected Financial Information—Basis of Preparation*”.

“Revolving Credit Facility Agreements” collectively refers to the Existing Altice Financing Revolving Credit Facility Agreements, the 2014 Altice S.A. Revolving Credit Facility Agreement, the 2014 Numericable Group Revolving Credit Facilities Agreement, the New Altice International Super Senior Revolving Credit Facility Agreement, and the New Altice International Pari Passu Revolving Credit Facility Agreement.

“Security Agent” refers to Deutsche Bank AG, London Branch.

“Senior Notes” collectively refers to the Notes and the Existing Senior Notes.

“Senior Notes Proceeds Loans” collectively refers to the 2013 Dollar Senior Notes Proceeds Loan, the 2012 Senior Notes Proceeds Loan and the 2013 Senior Notes Proceeds Loan.

“SFR Collectivités” refers to SFR Collectivités, S.A. a subisidary of SFR and a public limited liability company (*société anonyme*) incorporated under the laws of France.

“SFR” refers to Société Française du Radiotéléphone—SFR S.A. a public limited liability company (*société anonyme*) organized and existing under the laws of France, SIG 50 and their subsidiaries (excluding SPT, a holding company of Maroc Telecom), unless the context otherwise requires.

“SIG 50” refers to Société d’Investissement et de Gestion 50—SIG 50 S.A., a French corporation incorporated as a *société anonyme*, registered under identification number 421 345 026 Paris and its subsidiaries.

“SIRESP” means SIRESP—Gestão de Redes Digitais de Segurança e Emergência, S.A., a public limited liability company (*sociedade anónima*) incorporated under the laws of Portugal.

“SPV1” refers to H. Hadaros 2012 Ltd.

“SPV1 Acquisition Note” refers to SPV1’s NIS 955.5 million aggregate principal amount of notes due 2019 issued to Altice Financing on the 2012 Transaction Completion Date.

“Telindus France” refers to Telindus France S.A.S, the principal subsidiary of Groupe Telindus France.

“Transactions” has the meaning ascribed to it in “*The Transactions*”.

“Tricom” refers collectively to Tricom S.A., a corporation (*Sociedad Anónima*) incorporated under the laws of the Dominican Republic and Global Interlink Ltd.

“Tricom Acquisition” refers to the acquisition by Altice Dominican Republic SAS of Tricom which was consummated on March 12, 2014.

"Trustee" refers to Deutsche Bank AG, London Branch, acting in its capacity as trustee under the Indenture.

"U.S. Exchange Act" refers to the U.S. Securities Exchange Act of 1934, as amended.

"U.S. Securities Act" refers to the U.S. Securities Act of 1933, as amended.

"Vivendi" refers to Vivendi S.A., a French corporation incorporated as a *société anonyme* registered under sole identification number 343 059 564 RLS Paris.

"Winreason" refers to Winreason, S.A., a public limited liability company (*sociedade anónima*) incorporated under the laws of Portugal.

"Ypso France Senior Facility Agreement" refers to the senior facility agreement originally dated June 6, 2006, as amended and/or restated from time to time, including on July 18, 2006, July 28, 2006 and March 2, 2007, by a letter dated June 24, 2008, on December 9, 2009, on September 16, 2011, and on November 25, 2013, between, among others, Ypso Holding S.à r.l., as parent; Ypso France S.A.S., Altice France S.A., EST S.A.S., Coditel Debt S.à r.l., Est Videocommunication S.A.S., Numericable S.A.S. and NC Numericable S.A.S., as original borrowers and original guarantors; BNP Paribas, CALYON, Lehman Brothers Bankhaus AG, London Branch and Morgan Stanley Bank International Limited, as mandated lead arrangers; BNP Paribas, as agent and security agent; and the Lenders named therein.

PRESENTATION OF FINANCIAL AND OTHER INFORMATION

Unless otherwise stated or the context otherwise requires, references to "IFRS" herein are to IFRS as adopted in the European Union.

Financial Data

The Issuer is the holding company of the Group. Prior to the 2014 Numericable Acquisition (which was completed in February 2014) and the 2014 SFR Acquisition (which was completed in November 2014), the primary assets of the Group consisted of Altice International, a wholly-owned subsidiary of the Issuer and a holding company (which, since its formation in 2008, has from time to time made significant equity investments in a number of cable, media and telecommunication businesses in various jurisdictions), and its subsidiaries and the equity interests held by Altice France S.A., a wholly-owned subsidiary of the Issuer, in the Numericable Group prior to such date (which are accounted for in the Historical Consolidated Financial Information of the Issuer (as defined below) prior to the 2014 Numericable Acquisition using the equity method). The following is a summary of the key investments and disposals made by the Altice Group, since 2011, which have had a significant impact on the Historical Consolidated Financial Information (as defined below).

During the year ended December 31, 2011, Altice International made the following acquisitions that fundamentally changed the business undertaking: (i) in the first quarter of 2011, Altice International increased its ownership in HOT-Telecommunication Systems Ltd. (together with its subsidiaries but excluding HOT Mobile Ltd., the "HOT Telecom Group") thereby acquiring a majority equity ownership in the HOT Telecom Group (as a result of which the financial information of the HOT Telecom Group is consolidated in the Historical Consolidated Financial Information with effect from March 16, 2011). In addition, in the fourth quarter of 2011, MIRS Communications Ltd. (an Israeli mobile services provider that was subsequently renamed HOT Mobile Ltd.) was acquired by the HOT Telecom Group from a subsidiary of Altice International and renamed HOT Mobile Ltd (the HOT Telecom Group and HOT Mobile Ltd. are collectively referred to herein as the "HOT Group"); and (ii) in the second quarter of 2011, Altice International acquired a controlling equity interest in Coditel Brabant S.p.r.l, a company with cable television operations in Belgium and Coditel S.à r.l., a company with cable television operations in Luxembourg, in each case, through an intermediate holding company, Coditel Holding S.A. (the financial information of which is consolidated in the Historical Consolidated Financial Information with effect from July 1, 2011). In addition, Altice International sold 5% of its equity interest in MIRS Communications Limited during the course of 2011.

The year ended December 31, 2012 was marked by the following two significant acquisitions by Altice International: (i) in the first quarter of 2012, Altice International acquired approximately 60% of the equity interests in Cabovisão, a Portuguese telecommunications company (the financial information of which is consolidated in the Historical Consolidated Financial Information with effect from February 29, 2012); and (ii) in the fourth quarter of 2012, Altice International completed the take-private transaction of the HOT Group whereby it acquired substantially all of the equity interests in HOT-Telecommunication Systems Ltd. it did not previously own.

Altice International added to its portfolio of holdings in 2013 with the following acquisitions: (i) in the first quarter of 2013, Altice International acquired substantially all of the equity interests in Cabovisão that it did not already own; (ii) in the third quarter of 2013, Altice International acquired a controlling equity interest in Groupe Outremer Telecom, a telecommunications company with operations in the French Overseas Territories (the financial information of which is consolidated in the Historical Consolidated Financial Information with effect from July 5, 2013); and (iii) in the third quarter of 2013, Altice International (through its subsidiary Cabovisão) acquired 100% of the equity interests in Winreason, the owner of the Portuguese telecommunications holding company ONI S.G.P.S. and its subsidiaries (the financial information of which is consolidated in the Historical Consolidated Financial Information with effect from August 8, 2013) and (iv) in November 2013, Altice International acquired further equity interests in Coditel pursuant to the 2013 Coditel Acquisition. In addition, in 2013, we disposed of our interests in Valvision S.A.S. ("Valvision") and acquired Ma Chaîne Sport S.A.S. ("Ma Chaîne Sport) and SportV S.A. ("SportV"). During 2013, Altice International also initiated its equity investment in Wananchi ("Wananchi"), a Kenyan cable operator.

In 2014, Altice International consummated the acquisitions of (i) Tricom, a cable, fixed-line and mobile services provider (the financial information of which is consolidated in the Historical Consolidated Financial Statements of Altice International with effect from March 12, 2014), (ii) ODO (the financial information of which is consolidated in the Historical Consolidated Financial Statements with effect from April 9, 2014); (iii) Mobius (the financial information of which is consolidated in the Historical Consolidated Financial Statements with effect from January 1, 2014). On March 11, 2014, we entered into arrangements pursuant to which Altice Carribean, acquired a substantial proportion of the minority interests in Altice Blue Two (which owns 96% of Outremer, with substantially all the remaining interest being owned by the Issuer) in exchange for ordinary shares of the Issuer and Altice Caribbean Warrants (as defined below).

On November 27, 2014, the Issuer, through Numericable Group, completed the acquisition of SFR from Vivendi. In addition, in connection with the acquisition of SFR by Numericable Group, we entered into a commitment with the French Competition Authority to dispose of the mobile network assets of OMT in Mayotte and La Réunion (which are part of the French Overseas Territories and which in aggregate contributed €10 million to aggregated and pro forma EBITDA for the fiscal year ended 2013). If this disposal is not completed by mid-2015, we are committed to appoint an independent agent (who must be approved by the French Competition Authority) to complete such disposal. Further, we have undertaken to ensure that the OMT mobile assets in La Réunion and in Mayotte mentioned above are managed independently from the other activities of Altice France Group (including those of SFR). We expect that the disposal of the mobile network assets of OMT in Mayotte and La Réunion will reduce the overall leverage of the Group.

On December 4, 2014, the Altice France Group acquired 100% of Omer Telecom (the holding company of a telecom operator that provides services under the Virgin Mobile brand in France).

On December 9, 2014, we entered into an agreement with Oi S.A. to purchase 100% of the issued share capital of PT Portugal.

Historical Consolidated Financial Information of the Issuer

These Listing Particulars includes the following Historical Consolidated Financial Information of the Issuer:

(i) the unaudited condensed consolidated financial statements of the Issuer as of, and for the three and nine months ended, September 30, 2013 and 2014, prepared in accordance with IAS 34 Interim Financial Reporting ("IAS 34"), which have been reviewed by Deloitte Audit S.à r.l., as stated in their report appearing herein; and

(ii) audited consolidated financial statements of the Issuer as of and for the years ended December 31, 2013 and the audited combined financial statements of the Issuer as of and for the years ended December 31, 2010, 2011 and 2012, prepared in accordance with IFRS, which have been audited by Deloitte Audit S.à r.l., as stated in their report appearing herein.

The Issuer was incorporated on January 3, 2014. Each of the Issuer, Altice International and Altice France S.A. were historically separate legal and reporting entities, under common control and management. As a result, the above-mentioned combined financial statements for the years ended December 31, 2011, 2012 and 2013 and for the nine-month period ended September 30, 2013, have been prepared to reflect the carrying value of historical assets, liabilities, revenues, expenses and cash flows that were directly related to Altice International and Altice France S.A. and are based on a combination of the separate Historical Consolidated Financial Information of Altice International and annual accounts of Altice France S.A. The above-mentioned historical consolidated and combined financial information of the Issuer, and information directly derived therefrom, are referred to herein as the "Historical Consolidated Financial Information of the Issuer".

The consolidated financial statements of the Issuer as of and for the year ended December 31, 2013, the statement of directors' responsibility and the related report of the Deloitte Audit S.à.r.l. included in these Listing Particulars have been extracted from the 2013 Annual Report of Altice, which includes supplementary elements as required by Luxembourg laws and regulations.

Historical Consolidated Financial Information of Altice International

These Listing Particulars includes the following Historical Consolidated Financial Statements of Altice International:

(i) the unaudited condensed consolidated financial statements of Altice International as of and for the three and nine month periods ended September 30, 2014 (including comparative information as of and for the three and nine month periods ended September 30, 2013), prepared in accordance with IAS 34, which have been reviewed by Deloitte Audit S.à r.l.; and

(ii) the audited consolidated financial statements of Altice International as of and for the year ended December 31, 2012 (including comparative information as of and for the year ended December 31, 2011) and 2013, prepared in accordance with IFRS, which have been audited by Deloitte Audit S.à r.l.

The above-mentioned historical consolidated financial information of Altice International, and information directly derived therefrom, are referred to herein as the "Historical Consolidated Financial Information of Altice International", together with the Historical Consolidated Financial Information of the Issuer, the "Historical Consolidated Financial Information".

Illustrative Aggregated Selected Financial Information of Altice International

As a result of the series of significant acquisitions that have been consummated by Altice International since 2011, and the intra-year timing of such acquisitions, the Historical Consolidated Financial Information of Altice International does not consolidate the results of operations of the entire business undertaking of the Altice International Group as it existed as of December 31, 2011, 2012 or 2013, or September 30, 2013 or 2014 for all of the periods presented and the comparability of the Historical Consolidated Financial Information of Altice International over each of the periods presented may be significantly limited. Consequently, in addition to the Pro Forma Financial Information of Altice International described below, certain unaudited Illustrative Aggregated Selected Financial Information of Altice International for each of the years ended December 31, 2011 and 2012 has been included in these Listing Particulars as we believe this will aid comparability of the results of operations of the Altice International Group for each of these periods. The illustrative aggregated selected financial information of Altice International for each of the years ended December 31, 2011 and 2012, and information directly derived therefrom, are referred to herein as the "Illustrative Aggregated Selected Financial Information".

The Illustrative Aggregated Selected Financial Information has been compiled by aggregating selected aggregated financial information extracted from (i) the audited Historical Consolidated Financial Information of Altice International for each of the years ended December 31, 2011 and 2012 and (ii) the historical financial information of each of the business undertakings the acquisition of which were consummated by Altice International prior to December 31, 2013 for each of the years ended December 31, 2011 and 2012 (or for such shorter periods during the years ended December 31, 2011 and 2012, as applicable, for which the results of operations of such acquired business undertaking are not included in the audited Historical Consolidated Financial Information of Altice International). Adjustments have been made to the resulting aggregation in instances where the audited historical financial information of a business undertaking acquired by Altice International and included within such resulting aggregation have been drawn up in accordance with an accounting framework, the measurement and recognition criteria of which differs substantially from the corresponding criteria applicable under IFRS as adopted by the European Union. The Illustrative Aggregated Selected Financial Information does not include any additional pro forma adjustments. For further details regarding the basis of preparation of the Illustrative Aggregated Selected Financial Information, please see Note 1 to the Illustrative Aggregated Selected Financial Information included elsewhere in these Listing Particulars. The Illustrative Aggregated Selected Financial Information does not aggregate the financial information of the Mobius Group, Tricom, ODO, Numericable Group (which is not within Altice International's scope of consolidation), SFR (which is not within Altice International's scope of consolidation) or PT Portugal, nor does it give effect to the disposal of our assets in Réunion and Mayotte. The Pro Forma Financial Information (as defined below) and the Illustrative Aggregated Selected Financial Information include the results of operations of Valvision until June 6, 2013, even though we disposed of our interests in Valvision in 2013. Valvision's contribution to our revenue and EBITDA was not material. Further, the Historical Consolidated Financial Information, the Illustrative Aggregated Selected Financial Information and the Pro Forma Financial Information include the results of operations of Green Datacenter and Auberimmo S.A.S. ("Auberimmo"), which are subsidiaries of Altice International but are unrestricted subsidiaries under the terms governing our existing indebtedness and did not constitute Restricted Subsidiaries on the Issue Date. In each of the years ended December 31, 2011, 2012 and 2013, Green Datacenter contributed €4.3 million, €10.3 million and €12.4 million to aggregated and pro forma revenues and € 3.6 million, €9.0 million and €10.2 million to aggregated and pro forma EBITDA and Auberimmo's contribution to our revenue and EBITDA was not material. For the nine months ended September 30, 2013 and 2014, Green Datacenter contributed €8.8 million and €8.2 million to pro forma revenue and €7.6 million and €6.9 million to pro forma EBITDA, respectively. As of September 30, 2014, Green Datacenter had €34.8 million of third-party debt outstanding.

The Illustrative Aggregated Selected Financial Information was prepared on the basis of the audited Historical Financial Information of Altice International for the years ended December 31, 2011 and 2012 prepared in accordance with IFRS (which include in the notes thereto certain pro forma financial information of HOT Telecom for the period between January 1, 2011 and March 16, 2011) included elsewhere in these Listing Particulars and the following additional financial statements that are incorporated by reference to Altice's website (www.altice.net/phoenix.zhtml?c=252690&p=irol-ipo):

- the audited financial statements of Coditel Brabant S.p.r.l. as of and for the seven months ended July 31, 2011 prepared in accordance with Belgian GAAP;

- the audited accounts of Coditel S.à r.l. for the period from January 1, 2011 to July 31, 2011 prepared in accordance with Luxembourg GAAP;

- the unaudited financial statements of Cabovisão for the two months ended February 29, 2012 prepared in accordance with IFRS;

- the audited financial statements of Cabovisão for the year ended December 31, 2011 prepared in accordance with IFRS;

- the audited pro forma accounts for ONI for the years ended December 31, 2011 and 2012 (corresponding to the period between January 1 and December 31) prepared in accordance with IFRS;
- the audited consolidated financial statements for Groupe Outremer Telecom for the years ended December 31, 2011 and 2012 prepared in accordance with IFRS;
- the audited statutory accounts of Ma Chaîne Sport for the years ended December 31, 2011 and 2012 prepared in accordance with French GAAP (aligned with the measurement and recognition criteria of IFRS); and
- the unaudited financial statements for SportV for the year ended December 31, 2012 prepared in accordance with IFRS.

The Illustrative Aggregated Selected Financial Information among other things:

- neither represents financial information prepared in accordance with IFRS nor pro forma financial information and should not be read as such;
- has not been audited in accordance with any generally accepted auditing standards;
- has not been reviewed in accordance with any generally accepted review standards;
- is presented for illustrative purposes only; and
- is provided for certain limited items from Altice International's statement of income and statement of cash flows and accordingly does not include all the information that would usually be included in a statement of income or statement of cash flows or any information that would usually be included in a statement of other comprehensive income, statement of financial position or statement of changes in equity, in each case prepared in accordance with IFRS.
- does not purport to represent what our actual results of operations or financial condition would have been had the significant acquisitions and disposals described above occurred with effect from the dates indicated; and
- does not purport to project our results of operations or financial condition for any future period or as of any future date.

The Illustrative Aggregated Selected Financial Information included in these Listing Particulars have not been prepared in accordance with the requirements of Regulation S-X of the U.S. Securities Act, the EU Prospectus Directive, or any generally accepted accounting standards. Neither the assumptions underlying the adjustments nor the resulting aggregated financial information have been audited in accordance with any generally accepted auditing standards. The Illustrative Aggregated Selected Financial Information has been prepared only for the years ended December 31, 2011 and 2012 and no similar financial information has been prepared by Altice International for any other periods for which Historical Consolidated Financial Information of Altice International or Pro Forma Financial Information of Altice International has been included in these Listing Particulars.

The Illustrative Aggregated Selected Financial Information includes results of operations data of the acquired businesses (other than Mobius Group, Tricom, ODO, Numericable Group (which is not within Altice International's scope of consolidation), SFR (which is not within Altice International's scope of consolidation) and PT Portugal) for each of the periods presented even though we may not have owned or controlled such acquired businesses for all or any of the duration of the periods presented and would not have been permitted under IFRS to consolidate the results of such acquired businesses in any historical financial statements. As we currently have the ability to control Coditel Holding through which we conduct our operations in Belgium and Luxembourg, we consolidate 100% of their revenue and expenses in the Illustrative Aggregated Selected Financial Information for each of the periods presented, and in the Historical Consolidated Financial Information from July 1, 2011, respectively, despite the fact that third parties own significant interests in these entities. Since we do not present any Illustrative Aggregated Selected Financial Information below the line item operating income before depreciation, amortization, restructuring costs and other expenses, or EBITDA, the non- controlling interests in the operating results of Coditel Holding are not reflected anywhere in the Illustrative Aggregated Selected Financial Information. Such non-controlling owners' interests may be very significant. Since we do not present any Illustrative Aggregated Selected Financial Information below the line item operating income before depreciation, amortization, restructuring costs and other expenses, or EBITDA, the Illustrative Aggregated Selected Financial Information is also subject to the limitations with respect to non-IFRS measures described below.

Pro Forma Financial Information

The Listing Particulars includes:

(i) the unaudited pro forma consolidated financial statements of the Issuer as of and for each of the nine months ended September 30, 2013 and 2014, and

(ii) the unaudited pro forma consolidated financial statements of the Issuer as of and for the year ended December 31, 2013.

In addition, these Listing Particulars includes:

(a) unaudited pro forma consolidated interim financial statements of Altice International as of and for each of the nine-months periods ended September 30, 2013 and 2014,

(b) the unaudited pro forma consolidated financial statements of Altice International for the year ended December 31, 2013.

each giving effect to each of the significant acquisitions described above as if such acquisitions had occurred by January 1, 2013, January 1, 2014 or September 30, 2014 (as the case may be) (but without giving effect to the disposal of our mobile network assets in Mayotte and La Réunion which we have committed to undertake and, except as described below, without giving effect to the Tricom Acquisition or the Mobius Acquisition and, in the case of Altice International, without giving effect to the 2014 Numericable Acquisition or 2014 SFR Acquisition) (the financial statements in (i) and (ii) above, the "Pro Forma Financial Information of the Issuer", the financial statements in (a) and (b) above, the "Pro Forma Financial Information of Altice International", and, collectively, the "Pro Forma Financial Information").

These Listing Particulars includes certain pro forma financial information derived from:

(i) the Pro Forma Financial Information of Altice International after giving effect to each of the significant acquisitions described above but without giving effect to the ODO Acquisition, the Tricom Acquisition, the Mobius Acquisition, the 2014 Numericable Acquisition (which is not within Altice International's scope of consolidation), the 2014 SFR Acquisition (which is not within Altice International's scope of consolidation), the PT Portugal Acquisition, or the disposal of our assets in Réunion and Mayotte (the "Pre-PT/ODO Transactions Pro Forma Financial Information");

(ii) the Pro Forma Financial Information of Altice International after giving effect to each of the significant acquisitions described above (including the ODO Acquisition and the disposal of our assets in Réunion and Mayotte, but without giving effect to the 2014 Numericable Acquisition (which is not within Altice International's scope of consolidation), 2014 SFR Acquisition (which is not within Altice International's scope of consolidation), PT Portugal Acquisition, Tricom Acquisition or Mobius Transaction) (the "Pre-PT Transaction Pro Forma Financial Information"); and

(iii) the Pro Forma Financial Information of the Issuer after giving effect to each of the significant acquisitions described above (including the ODO Acquisition, the 2014 Numericable Acquisition, 2014 SFR Acquisition and PT Portugal Acquisition, but without giving effect to the Tricom Acquisition, Mobius Transaction, or the disposal of our assets in Réunion and Mayotte) (the "Post Transaction Pro Forma Financial Information").

In addition, these Listing Particulars includes certain information derived from the Pro Forma Financial Information of the Issuer, which reflects the financial information of the Altice France Group after giving effect to the 2014 Numericable Group Transactions (the "Altice France Group Pro Forma Financial Information").

The financial information of Tricom has been consolidated in the historical consolidated financial statements of the Issuer and of Altice International with effect from March 12, 2014, and the financial information of Mobius has been consolidated in the Historical Consolidated Financial Information with effect from January 1, 2014. As a result, the Pro Forma Financial Information also consolidates the financial information of Tricom and Mobius from March 12, 2014 and January 1, 2014, respectively, but does not give pro forma effect to the Mobius Acquisition or the Tricom Acquisition for any other periods. For the nine months ended September 30, 2014, Tricom contributed €82.0 million to pro forma revenue and €40.5 million to pro forma EBITDA and Mobius contributed €13.2 million to pro forma revenue and €3.1 million to pro forma EBITDA.

With effect from April 9, 2014, the financial information of ODO has been consolidated in the Historical Consolidated Financial Information. The Pre-PT/ODO Transactions Pro Forma Financial Information as of and for the nine months ended September 30, 2014 deducts the contribution of ODO and does not give pro forma effect to the ODO Acquisition during this period. The Pre-PT Transaction Pro Forma Financial Information and the Post-Transaction Pro Forma Financial Information as of and for the nine months ended September 30, 2014 includes ODO's contribution for the period between April 9, 2014 and September 30, 2014 and gives pro forma effect to the ODO Acquisition for the period between January 1, 2014 and April 8, 2014. See Note 2 to the Pro Forma Financial Information included elsewhere in these Listing Particulars.

The Pro Forma Financial Information included in these Listing Particulars have not been prepared in accordance with the requirements of Regulation S-X of the U.S. Securities Act, the EU Prospectus Directive or any generally accepted accounting standards.

The Pro Forma Financial Information included in these Listing Particulars and their respective pro forma adjustments, among other things:

- are based on available information and assumptions that we believe are reasonable under the circumstances;
- are presented for informational purposes only;
- have not been audited in accordance with any generally accepted auditing standards;
- have not been reviewed in accordance with any generally accepted review standards;
- do not purport to represent what our actual results of operations or financial condition would have been had the applicable significant acquisitions described above occurred with effect from the dates indicated; and
- do not purport to project our results of operations or financial condition for any future period or as of any future date.

The Historical Consolidated Financial Information, the Pro Forma Financial Information and the Illustrative Aggregated Selected Financial Information mentioned above do not indicate results that may be expected for any future period.

The Pro Forma Financial Information includes the results of operations and financial condition of the acquired businesses and in the case of the Post- Transaction Pro Forma Financial Information, the results of ODO, the Numericable Group, SFR, and PT Portugal, as applicable, for each of the periods presented even though we may not have owned or controlled such acquired businesses for all or any of the duration of the periods presented and would not have been permitted under IFRS to consolidate the results of such acquired businesses in any historical financial statements.

ODO Financial Information

As of September 30, 2014, the Group owns approximately 97.2% of the equity interests in ODO. These Listing Particulars includes the audited stand-alone financial statements of ODO as of and for the years ended December 31, 2013 and 2012 and as of and for the nine months ended September 30, 2013. The financial information of ODO has been consolidated in the Historical Consolidated Financial Information of Altice International with effect from April 9, 2014. Certain financial information of ODO for the nine months ended September 30, 2014 presented in these Listing Particulars for comparative purposes have been derived from the Historical Consolidated Financial Information of Altice International as of and for the nine months ended September 30, 2014 (including the notes thereto, which contain certain financial information of ODO for the period between January 1, 2014 and April 8, 2014).

PT Portugal Financial Information

Historically, the results of the former Portugal Telecom group were consolidated at the level of Portugal Telecom, SGPS, S.A., which was the holding entity and listed company for such group and which consolidated the results of the PT Portugal Group as well as the results of certain entities that are not a part of the PT Portugal Group and that will not be acquired pursuant to the PT Portugal Acquisition. These Listing Particulars includes the audited standalone financial statements prepared under Portuguese GAAP of PTC and Meo, S.A, which are the most significant subsidiaries of the PT Portugal Group, as of and for the years ended December 31, 2012 (including unaudited comparative information as of and for the year ended December 31, 2011) and 2013 and the unaudited condensed financial information of PTC and Meo, S.A. as of and for the nine months ended September 30, 2013 and 2014 (the "PT Historical Financial Information"). The PT Historical Financial Information does not consolidate the results of operations of the entire business undertaking of the PT Portugal Group as it existed as of December 31, 2011, 2012 or 2013 or September 30, 2013 or 2014 for all of the periods presented. Consequently, in addition to the PT Historical Financial Information and the Pro Forma Financial Information described below, certain unaudited illustrative aggregated selected financial information of the PT Portugal Group for each of the years ended December 31, 2011, 2012 and 2013 and for each of the nine months ended September 30, 2013 and 2014 has been included in these Listing Particulars. The illustrative aggregated selected financial information of the PT Portugal Group for each of the years ended December 31, 2011, 2012 and 2013, and the nine months ended September 30, 2013 and 2014, and information directly derived therefrom, are referred to herein as the "PT Portugal Combined Selected Financial Information". The PT Portugal Combined Selected Financial Information has been compiled by aggregating (subject to inter-company elimiations and certain other adjustments described under *Presentation of Financial and Other Information—PT Portugal Financial Information* extracted from (i) the audited standalone historical financial statements of PTC and Meo, S.A., prepared under Portuguese GAAP, for each of the years ended December 31, 2012 (including unaudited comparative figures for 2011) and 2013 and the unaudited historical condensed financial statements, prepared under Portuguese GAAP, for each of the nine months ended September 30, 2013 and 2014 and (ii) the unaudited historical condensed financial information of the other subsidiaries and assets included in the PT Portugal Group derived from the internal financial reporting systems of the PT Portugal Group. The PT Portugal Combined Selected Financial Information is subject to significant limitations similar to those described under "*—Illustrative Aggregated Selected Financial Information*" above and under "*—Non-IFRS Measures*" below. For the nine months ended September 30, 2014, PTC and Meo, S.A. represent over 97% of the PT Portugal Group's revenues as derived from the PT Portugal Combined Selected Financial Information described below.

Numericable Group Financial Information

The Issuer has control over Numericable as a result of the 2014 Numericable Acquisition. The Numericable Group was formed on August 2, 2013, by the contribution of Ypso Holding S.à r.l. and its subsidiaries (the "Ypso Sub-Group") and Altice B2B S.à r.l. and its subsidiaries (the "Altice B2B Sub-Group") to Numericable. Accordingly, these Listing Particulars includes English language translations of (i) the unaudited condensed consolidated financial statements of the Numericable Group as of and for the nine months ended September 30, 2014 (including the comparative financial information as of, and for the nine months ended, September 30, 2013), prepared in accordance with IAS 34, which have been reviewed by Deloitte & Associés and KPMG Audit, a department of KPMG S.A., and (ii) the audited consolidated financial statements of the Numericable Group as of and for the year ended December 31, 2013, prepared in accordance with IFRS as adopted in the European Union which have been audited by Deloitte & Associés and KPMG Audit, a department of KPMG S.A. and (iii) and the audited combined financial statements of the Numericable Group as of and for the years ended December 31, 2011 and 2012, prepared in accordance with IFRS as adopted in the European Union which have been audited by Deloitte & Associés. These financial statements of the Numericable Group and information directly derived therefrom are referred to herein as the "Numericable Group Financial Information".

The Numericable Group Financial Information as of and for the year ended December 31, 2011 and 2012 has been prepared at the carrying value of historical assets, liabilities, revenues, expenses and cash flows that were directly related to the Ypso Sub-Group and the Altice B2B Sub-Group, which were historically separate legal groups, under common control and management, and are based on the separate consolidated financial statements of each sub-group. For further information, *see* Note 1.4 to the Numericable Group's consolidated financial statements. All companies in which a sub-group has a controlling interest, namely those in which it has the power to govern financial and operational policies in order to obtain benefits from their operations, are included in the scope of combination. The effects of transactions between the two sub-groups on assets, liabilities, revenue and expense for periods presented have been eliminated in full in the combined financial statements. Non-controlling interests in subsidiaries are identified separately from the Numericable Group's equity under "other financial assets" in the Numericable Group's combined financial statements.

SFR Financial Information

Following the completion of the 2014 SFR Acquisition on November 27, 2014, the Group indirectly owns 60.3% of the equity interests in SFR (through Altice France S.A.). SFR is a wholly owned subsidiary of Numericable, in which Altice France S.A. holds 60.3% of the equity interest.

These Listing Particulars includes English language translations of the following financial information of SFR referred to as the "Historical Financial Statements of SFR":

- (i) unaudited condensed combined financial statements of SFR as of and for the nine months ended September 30, 2014, prepared in accordance with IAS 34, which have been reviewed by KPMG Audit, a department of KPMG S.A.; and

- (ii) the audited combined financial statements of SFR as of and for the years ended December 31, 2011, 2012 and 2013, which have been audited by KPMG Audit, a department of KPMG S.A. and Ernst & Young.

The combined financial statements of SFR includes SFR, SIG 50 and their subsidiaries which were transferred from Vivendi to the Numericable Group as part of the 2014 Numericable Group Transactions.

The above-mentioned Historical Financial Statements of SFR, and information directly derived therefrom, are referred to herein as the “Historical Financial Information of SFR”.

The Historical Financial Statements of SFR are prepared in accordance with IFRS that require the management of SFR to take into account the estimates and assumptions that could affect the book value of certain assets and liabilities and charges of SFR, as well as the information given in the appended notes. The management of SFR revises its estimates and assumptions regularly in order to ensure their relevance in light of past experience and the current economic situation. Depending on changes in these assumptions, the items in future financial statements of SFR could be different based on changes in estimates. The impact of the changes in accounting estimates is evaluated during the period of the change and future periods affected.

The principal estimates made by the management of SFR for the preparation of the Historical Financial Statements of SFR concern the following:

- certain elements of revenue, particularly identification of the separable elements of a packaged offer and the duration of decreases in revenue linked to costs of access to the service;
- the amount of the provisions for risks and other provisions linked to the business of SFR;
- the assumptions used for calculating the obligations linked to staff benefits;
- the methods of valuation and impairment of goodwill;
- recognition of the deferred tax assets; and
- duration of the utility of intangible and tangible fixed assets.

In addition, until November 27, 2014, SFR has historically operated as a division within Vivendi. Accordingly, the Historical Financial Statements of SFR do not necessarily represent the results of operations, statement of financial position or cash flows of SFR if it had operated as a stand-alone consolidated group.

The estimates and management assumptions used by the management of SFR in the framework of the preparation of the Historical Financial Statements of SFR are described in detail in note 1.3 of the Historical Financial Statements of SFR.

Certain Adjusted Financial Information

These Listing Particulars also includes certain financial information on an as adjusted basis to give effect to the Transactions, including this offering and the application of the proceeds therefrom, including combined financial data as adjusted to reflect the effect of the Transactions on the Group’s indebtedness as if the Transactions had occurred on September 30, 2014 and the Group’s finance costs as if the Transactions occurred on January 1, 2013, January 1, 2014, or September 1, 2014, as applicable. The as adjusted financial information has been prepared for illustrative purposes only and does not represent what the Group’s indebtedness would have been had the Transactions occurred on such dates; nor does it purport to project the combined entities’ or the Group’s indebtedness or interest expense at any future date. The as adjusted financial information has not been prepared in accordance with IFRS. Neither the assumptions underlying the adjustments nor the resulting as adjusted financial information have been audited or reviewed in accordance with any generally accepted auditing standards.

Non-IFRS Measures

These Listing Particulars contain measures and ratios (the “Non-IFRS Measures”), including EBITDA, Adjusted EBITDA, Pro Forma Adjusted EBITDA (including synergies), Operating Free Cash Flow and cash flow conversion, that are not required by, or presented in accordance with, IFRS or any other generally accepted accounting standards. We present Non-IFRS measures because we believe that they are of interest for the investors and similar measures are widely used by certain investors, securities analysts and other interested parties as supplemental measures of performance and liquidity. The Non-IFRS measures may not be comparable to similarly titled measures of other companies, have limitations as analytical tools and should not be considered in isolation or as a substitute for analysis of our, or any of our subsidiaries’, operating results as reported under IFRS or other generally accepted accounting standards. The Non-IFRS measures may also be defined differently than the corresponding terms governing our indebtedness, including the Existing Indentures, the 2015 Indentures, and the Indenture. Non-IFRS measures and ratios such as EBITDA and Adjusted EBITDA are not measurements of our, Numericable’s, SFR’s, ODO’s, PT’s or any of our or their subsidiaries’, performance or liquidity under IFRS or any other generally accepted accounting principles. In particular, you should not consider EBITDA or Adjusted EBITDA as an alternative to (a) operating profit or profit for the period (as determined in accordance with IFRS) as a measure of our, or any of our operating entities' or PT Portugal's or any of their subsidiaries, operating performance, (b) cash flows from operating, investing and financing activities as a measure of our, Numericable's, SFR's, ODO's, PT's or any of our or their subsidiaries' ability to meet its cash needs or (c) any other measures of performance under IFRS or other generally accepted accounting standards. EBITDA and Adjusted EBITDA have limitations as an analytical tool, and you should not consider them in isolation, or as a substitute for, an analysis of the results of our operating entities as reported under IFRS or other generally accepted accounting standards. Some of these limitations are:

- they do not reflect cash expenditures or future requirements for capital expenditures or contractual commitments;
- they do not reflect changes in, or cash requirements for, working capital needs;
- they do not reflect the significant interest expense or the cash requirements necessary to service interest or principal payments;
- although depreciation, amortization and impairment are non-cash charges, the assets being depreciated and amortized will generally need to be replaced in the future and EBITDA and Adjusted EBITDA do not reflect any cash requirements that would be required for such replacements; and
- some of the exceptional items that we or our operating entities eliminate in calculating EBITDA and Adjusted EBITDA reflect cash payments that were made, or will in the future be made.

These Listing Particulars contain certain synergy estimates, among others, relating to cost reductions and other benefits expected to arise from the Tricom Acquisition, the ODO Acquisition, the 2014 SFR Acquisition and the PT Portugal Acquisition as well as related costs to implement such measures. The estimates present the expected future impact of these transactions and the integration of Tricom, ODO, SFR and PT Portugal into our existing business. Such estimates are based on a number of assumptions made in reliance on the information available to us and management's judgments based on such information. The assumptions used in estimating the synergies arising from the Tricom Acquisition, the ODO Acquisition, the 2014 SFR Acquisition, and the PT Portugal Acquisition are inherently uncertain and are subject to a wide variety of significant business, economic, and competitive risks and uncertainties that could cause actual results to differ materially from those contained in the synergy benefit estimates.

In these Listing Particulars, "Adjusted EBITDA" as presented by Altice S.A. and Altice International corresponds to "EBITDA" as reported by such entities for financial reporting purposes as of September 30, 2014.

Certain amounts and percentages presented herein have been rounded and, accordingly, the sum of amounts presented may not equal the total. All references in this document to NIS and ILS refer to New Israeli Shekels and all references to "U.S.$" or "$" are to U.S. dollars. All references to DOP refer to the Dominican Peso. All references to "€" are to euro.

SUBSCRIBER, MARKET AND INDUSTRY DATA

Key Operating Measures

These Listing Particulars includes information relating to certain key operating measures of the Altice International Group, the Numericable Group, ODO, Tricom, SFR and PT Portugal, including, among others, number of homes passed, Cable Customer Relationships, subscribers, RGUs, RGUs per Cable Customer Relationship, churn, ARPUs, penetration and mobile coverage of territory, as applicable, which our management uses or will use to track the financial and operating performance of our businesses. None of these terms are measures of financial performance under IFRS, nor have these measures been audited or reviewed by an auditor, consultant or expert. All of these measures are derived from the internal operating systems of the individual members of the Altice International Group, the Numericable Group, ODO and Tricom, SFR, PTC. Meo, S.A. and PT Portugal as the case may be. As defined by the Altice International Group, the Numericable Group, ODO and Tricom, PTC, Meo, S.A. and PT Portugal, respectively, these terms may not be directly comparable to corresponding or similar terms used by each other, their competitors or other companies. Certain measures relating to PTC and Meo, S.A. have also been derived from information in the public filings of Portugal Telecom SGPS. Certain historical measures relating to SFR have been derived from information contained in its public filings. Please refer to the meanings of these terms as defined elsewhere in these Listing Particulars.

Market and Industry Data

We operate in industries in which it is difficult to obtain precise market and industry information. We have generally obtained the market and competitive position data in these Listing Particulars from our competitors' public filings, from industry publications and from surveys or studies conducted by third party sources that we believe to be reliable. Certain information in these Listing Particulars contains independent market research carried out by Euromonitor International Limited, Ovum Research, Anacom, IDC, ABI Research, Gartner, Cisco, Analysys Mason and Strategy Analytics.

With respect to Israel, we calculate market share for each of our services by dividing the number of RGUs for such service by the total number of subscribers in Israel to such service, which is calculated based on our competitors' public filings and reported subscriber base, other public information and our internal estimates. Under HOT's mobile license, it is required to calculate market share of its mobile operations, which is calculated using different parameters than as described above. For more information see "*Description of Our Business—Material Contracts—Provision of certain bank guarantees to the State of Israel relating to performance of certain license terms*". In footprint market shares in the jurisdictions in which we operate are calculated from our penetration data by extrapolating overall market penetration from industry sources to our footprint. Market and industry data relating to PT Portugal have been derived from public filings made by Portugal Telecom SGPS, S.A.

However, neither we nor the Initial Purchasers or any of our or their respective advisors can verify the accuracy and completeness of such information and neither we nor the Initial Purchasers or any of our or their respective advisors has independently verified such market and position data. We do, however, accept responsibility for the correct reproduction of this information and, as far as we are aware and are able to ascertain from information published, no facts have been omitted that would render the reproduced information materially inaccurate or misleading.

In addition, in many cases we have made statements in these Listing Particulars regarding our industries and our position in these industries based on our experience and our own investigation of market conditions. Neither we nor the Initial Purchasers or any of our or their respective advisors can assure you that any of these assumptions are accurate or correctly reflect our position in these industries, and none of our or their internal surveys or information has been verified by independent sources.

EXCHANGE RATE INFORMATION

We have set forth in the table below, for the periods and dates indicated, certain information regarding the exchange rates between U.S. dollars and euro based on the market rates at 6:00 p.m. London time. We have provided this exchange rate information solely for your convenience. We do not make any representation that any amount of currencies specified in the table below has been, or could be, converted into the applicable currency at the rates indicated or any other rate.

	U.S.$ per euro			
	Period Average(1)(2)	High	Low	Period End(3)
Year				
2011	1.3924	1.4874	1.2925	1.2960

FORWARD-LOOKING STATEMENTS

These Listing Particulars contain "forward-looking statements" as that term is defined by the U.S. federal securities laws. These forward-looking statements include, but are not limited to, statements other than statements of historical facts contained in these Listing Particulars, including, but without limitation, those regarding our or PT Portugal's future financial condition, results of operations and business, our or PT Portugal's products, acquisitions, dispositions and finance strategies, our or PT Portugal's capital expenditure priorities, regulatory or technological developments in the market, subscriber growth and retention rates, potential synergies and cost savings, competitive and economic factors, the maturity of our or PT Portugal's markets, anticipated cost increases, synergies, liquidity, credit risk and target leverage levels. In some cases, you can identify these statements by terminology such as "aim", "anticipate", "believe", "continue", "could", "estimate", "expect", "forecast", "guidance", "intend", "may", "plan", "potential", "predict", "project", "should", and "will" and similar words used in these Listing Particulars.

By their nature, forward-looking statements are subject to numerous assumptions, risks and uncertainties. Many of these assumptions, risks and uncertainties are beyond our control. Accordingly, actual results may differ materially from those expressed or implied by the forward-looking statements. Such forward-looking statements are based on numerous assumptions regarding our present and future business strategies and the environment in which we and PT Portugal operate. We caution readers not to place undue reliance on the statements, which speak only as of the date of these Listing Particulars, and we expressly disclaim any obligation or undertaking to disseminate any updates or revisions to any forward looking statement contained herein, to reflect any change in our expectations with regard thereto, or any other change in events, conditions or circumstances on which any such statement is based.

Where, in any forward-looking statement, we express an expectation or belief as to future results or events, such expectation or belief is expressed in good faith and believed to have a reasonable basis, but there can be no assurance that the expectation or belief will result or be achieved or accomplished.

Risks and uncertainties that could cause actual results to vary materially from those anticipated in the forward-looking statements included in these Listing Particulars include those described under "Risk Factors".

The following are some but not all of the factors that could cause actual results or events to differ materially from anticipated results or events:

- our substantial leverage and debt service obligations;
- our ability to generate sufficient cash flow to service our debt and to control and finance our capital expenditures and operations;
- restrictions and limitations contained in the agreements governing our debt;
- our ability to raise additional financing or refinance our existing indebtedness;
- fluctuations in currency exchange rates, inflation and interest rates;
- negative changes to our credit rating;
- risks associated with our structure, this offering, and our other indebtedness;
- the competitive environment and downward price pressure in the broadband internet communications, television sector, fixed line telephony, mobile telephony and B2B sectors in the countries in which we operate;
- economic and business conditions and trends in the industries in which we and the entities in which we have interests operate;
- changes in the political, judicial, economic or security environment in the countries in which we operate or will operate in the future;
- changes in consumer demand for cable-based and mobile products as well as the demand for bundled services and offerings;
- capital spending for the acquisition and/or development of telecommunications networks and services and equipment and competitor responses to our products and services, and the products and services of the entities in which we have interests;

- increases in operating costs and inflation risks;
- our ability to introduce new technologies or services and our ability to respond to technological developments;
- deployment of fiber or VDSL2 networks by competitors;
- perceived or actual health risks and other environmental requirements relating to our mobile operations;
- our ability to maintain favorable roaming or network sharing agreements;
- our ability to achieve cost saving from network sharing arrangements for our mobile services in Israel;
- reduced interconnection rates in the countries in which we operate, including Portugal;
- the ability of third party suppliers and vendors to timely deliver products, network infrastructure, equipment, software and services;
- the availability of attractive programming for our analog and digital video services or necessary equipment at reasonable costs;
- risks related to royalties payments and our licenses;
- technical failures, equipment defects, physical or electronic break- ins to the services, computer viruses and similar description problems;
- any negative impact on our reputation, including due to product quality issues;
- our ability to attract and retain customers;
- our ability to integrate acquired businesses and realize planned synergy benefits from past or future acquisitions (including, without limitation, SFR following the 2014 SFR Acquisition and PT Portugal following the PT Portugal Acquisition);
- uncertainty with respect to the amount and the timeframe for synergies and other benefits expected to arise from the PT Portugal Acquisition, the Tricom Acquisition, the 2014 Numericable Acquisition, the 2014 SFR Acquisition, Mobius Acquisition, the ODO Acquisition and the cost savings we expect to realize from our Network Sharing Agreement in Israel;
- our ability to maintain adequate managerial controls and procedures as the business grows;
- our inability to provide high levels of customer service;
- the declining revenue from certain of our services and our ability to offset such declines;
- any disruptions in the credit and equity markets which could affect our credit instruments and cash investments;
- our ability to protect our intellectual property rights and avoid any infringement of any third party's intellectual property rights;
- our ability to maintain subscriber data and comply with data privacy laws;
- the outcome of any pending or threatened litigation, including class action lawsuits in Israel and antitrust proceedings in Portugal;
- uncertainty over the legal framework within which we own and operate our networks, including in France, Belgium and Luxembourg;
- post retirement and healthcare benefit obligations (both funded and unfunded) of companies we have acquired or may acquire in the future, including PT Portugal;
- changes in laws or treaties relating to taxation in the countries in which we operate, or the interpretation thereof;

- the regulatory environment in the countries in which we operate and changes in, or a failure or an inability to comply with, government regulations and adverse outcomes from regulatory proceedings;

- the application of law generally and government intervention that opens our fixed-line and mobile networks to competitors, which may have the effect of increasing competition and reducing our ability to reach the expected returns on investment;

- our ability to manage our brands;

- our inability to completely control the prices we charge to customers or the programming we provide;

- our ability to obtain building and environmental permits for the building and upgrading of our networks, including our mobile network in Israel, and to comply generally with city planning laws;

- the loss of key employees and the availability of qualified personnel and a deterioration of the relationship with employee representatives;

- our ultimate parent's interest may conflict with our interests;

- the entry of new operators into the telecommunications markets in which we operate, including France;

- risks related to the Transactions and our ability to execute the Transactions in the manner and within the timetable currently envisaged;

- events that are outside of our control, such as political unrest in international markets, terrorist attacks, natural disasters, pandemics and other similar events; and

- other factors discussed in these Listing Particulars.

The cable television, broadband internet access, fixed-line telephony, mobile services, ISP services, B2B and wholesale industries are changing rapidly and, therefore, the forward-looking statements of expectations, plans and intent in these Listing Particulars are subject to a significant degree of risk. These forward-looking statements and such risks, uncertainties and other factors speak only as of the date of these Listing Particulars, and we expressly disclaim any obligation or undertaking to disseminate any updates or revisions to any forward looking statement contained herein, to reflect any change in our expectations with regard thereto, or any other change in events, conditions or circumstances on which any such statement is based. Readers are cautioned not to place undue reliance on any forward looking statement.

The cautionary statements set forth above should be considered in connection with any subsequent written or oral forward-looking statements that we or persons acting on our behalf may issue. We do not undertake any obligation to review or confirm analysts' expectations or estimates or to release publicly any revisions to any forward-looking statements to reflect events or circumstances after the date of these Listing Particulars.

We disclose important factors that could cause our actual results to differ materially from our expectations in these Listing Particulars. These cautionary statements qualify all forward-looking statements attributable to us or persons acting on our behalf. When we indicate that an event, condition or circumstance could or would have an adverse effect on us, we mean to include effects upon our business, financial and other conditions, results of operations and ability to make payments under the Notes and the Notes.

These Listing Particulars contain certain synergy estimates, among others, relating to cost reductions and other benefits expected to arise from the Tricom Acquisition, the 2014 Numericable Acquisition, the ODO Acquisition, the 2014 SFR Acquisition, and the PT Portugal Acquisition and estimates of cost savings we expect to realize from our Network Sharing Agreement in Israel as well as related costs to implement such measures. The estimates present the expected future impact of these transactions and the integration of Tricom, ODO, SFR and PT Portugal into our existing business. Such estimates are based on a number of assumptions made in reliance on the information available to us and management's judgments based on such information. The assumptions used in estimating the synergies arising from the Tricom Acquisition, the 2014 Numericable Acquisition, the ODO Acquisition, the 2014 SFR Acquisition, and the PT Portugal Acquisition are inherently uncertain and are subject to a wide variety of significant business, economic, and competitive risks and uncertainties that could cause actual results to differ materially from those contained in the synergy benefit estimates. Our estimates of cost savings from our Network Sharing Agreement assume, among other things, that our historical performance data will remain substantially unchanged and assumes certain capital expenditure savings.

AVAILABLE INFORMATION

For so long as any of the Notes are "restricted securities" within the meaning of Rule 144A(a)(3) under the U.S. Securities Act, we will, during any period in which we are neither subject to the reporting requirements of Section 13 or 15(d) of the U.S. Exchange Act, nor exempt from the reporting requirements of the U.S. Exchange Act under Rule 12g3-2(b) thereunder, provide to the holder or beneficial owner of such restricted securities or to any prospective purchaser of such restricted securities designated by such holder or beneficial owner, in each case upon the written request of such holder, beneficial owner or prospective purchaser, the information required to be provided by Rule 144A(d)(4) under the U.S. Securities Act.

We are not currently subject to the periodic reporting and other information requirements of the U.S. Exchange Act. However, pursuant to the Indenture and so long as the Notes are outstanding, we will furnish periodic information to holders of the Notes, as applicable. See "*Description of Notes—Certain Covenants—Reports*".

TAX CONSIDERATIONS

Prospective purchasers of the Notes are advised to consult their own tax advisors as to the consequences of purchasing, holding and disposing of the Notes, including, without limitation, the application of U.S. federal tax laws to their particular situations, as well as any consequences to them under the laws of any other taxing jurisdiction, and the consequences of purchasing the Notes at a price other than the initial issue price in the offering. See "*Tax Considerations*".

TRADEMARKS AND TRADE NAMES

We own or have rights to certain trademarks or trade names that we use in conjunction with the operation of our businesses. Each trademark, trade name or service mark of any other company appearing in these Listing Particulars are the property of its respective holder.

GENERAL DESCRIPTION OF OUR BUSINESS AND THE OFFERING

This general description of our business and the offering highlights selected information contained in these Listing Particulars regarding the Group and the Notes. It does not contain all the information you should consider prior to investing in the Notes. You should read the entire Offering Memorandum carefully including the "Risk Factors" and the financial statements and notes thereto included in these Listing Particulars. Please see page G-1 of these Listing Particulars for a glossary of technical terms used in these Listing Particulars.

In this section, unless the context otherwise requires, the terms "Altice Group", "Group", "we", "us" and "our" refers to the Issuer, its subsidiaries (and following the completion of the Transactions these terms will also include the PT Portugal Group); references to Altice International are to Altice International S.à r.l. and its subsidiaries (and following the completion of the Transactions this term will also include the PT Portugal Group); references to "Altice Portugal" are to our combined Portuguese business following the completion of the Transactions, including the PT Portugal Group, Cabovisao and ONI; the term "PT Portugal Group" refers to the entities that will be acquired pursuant to the PT Portugal Acquisition; references to "Numericable Group" are to Numericable-SFR S.A. (formerly known as Numericable Group S.A.) and its subsidiaries without giving effect to the 2014 Numericable Group Transactions; and references to "Altice France Group" are to Numericable-SFR S.A. and its subsidiaries after giving effect to the 2014 Numericable Group Transactions, including the acquisition of SFR and its subsidiaries, but without giving effect to the acquisition of Omer Telecom.

Altice Group Overview

We are a multinational cable and telecommunications company. We conduct our activities (i) in France through the Numericable Group, which completed its acquisition of SFR from Vivendi S.A. in November 2014 resulting in the combination of the sole major cable operator in France with France's leading integrated fixed and mobile network operator ("Altice France Group") and (ii) in Western Europe (comprising Belgium, Luxembourg, Portugal and Switzerland), Israel, and the Overseas Territories (comprising the Dominican Republic and certain French Overseas Territories in the Caribbean and the Indian Ocean regions) through Altice International S.à r.l. ("Altice International"). We provide cable and fiber-based services (high quality pay television, broadband internet and fixed line telephony) and mobile telephony services to residential and corporate customers.

We have expanded internationally through price-disciplined acquisitions and have recently entered into agreements to acquire from Oi S.A. 100% of the issued share capital of PT Portugal, and accordingly, the PT Portugal Group and its assets for an enterprise value of €7.4 billion on a cash and debt free basis (the "PT Portugal Acquisition"). See "The Transactions". The PT Portugal Group is a leading provider of integrated telecommunication services to residential and corporate customers in Portugal, including triple-play and quadruple-play services. It is the second largest pay television services provider and the market leading provider of broadband internet services and B2B services, which it provides through its fiber-to-the-home ("FTTH" or "fiber") and DSL networks. The PT Portugal Group is also the leading mobile services provider in Portugal. Based on the PT Portugal Combined Selected Financial Information, for the last twelve months ("LTM") ended September 30, 2014, the PT Portugal Group had revenues of €2,565 million, EBITDA of €997 million (EBITDA Margin of 38.9%), gross cash capital expenditure of €448 million and EBITDA less gross cash capital expenditure of €549 million (Margin of 21.4% and Cash Flow Conversion (which is defined as EBITDA less cash capital expenditure as a percentage of EBITDA) of 55.0%). This transaction is subject to regulatory approval and is currently expected to close in the second quarter of 2015.

Pro forma for the PT Portugal Acquisition, the 2014 SFR Acquisition and the ODO Acquisition, the Altice Group generated Pro Forma revenues of € 15,812.0 million and Pro Forma Adjusted EBITDA (including certain expected aggregated synergies and cost savings from these acquisitions) of €5,553.5 million for the LTM ended September 30, 2014, comprised of the following:

(i) Altice France Group generated Pro Forma revenues of € 11,251.4 million and Pro Forma Adjusted EBITDA (including certain expected synergies and cost savings) of €3,562.7 million; and

(ii) Altice International generated Pro Forma revenues of € 4,560.6 million and Pro Forma Adjusted EBITDA (including certain expected synergies and cost savings) of €1,990.7 million. See "*Summary Financial Information and Other Data—Pro Forma Adjusted EBITDA*".

As of the date of these Listing Particulars, the Altice Group owns 60.3% of the Altice France Group and 100% of Altice International.

Note:

- These results reflect the LTM results of the Altice Group pro forma for the acquisition of ODO, SFR and the PT Portugal Group but not the disposal of our mobile network assets in Mayotte and La Réunion which we have committed to undertake. Revenues exclude revenues generated by Tricom prior to the acquisition of Tricom (i.e. from October 1, 2013 to March 12, 2014). Pro Forma Adjusted EBITDA includes Tricom EBITDA for the entire LTM period.

- Altice International financial information has been derived from the Post-Transaction Pro Forma Financial Information.

(1) Includes management estimate of at least €350 million of pro forma synergies expected to result in the medium term from the combination of the Numericable Group and SFR. This synergy estimate is based on a number of assumptions made in reliance on the information available to us and management's judgments based on such information. The assumptions used in estimating synergies are inherently uncertain and are subject to a wide variety of significant business, economic, and competitive risks and uncertainties that could cause actual results to differ materially from those contained in the synergy benefit estimates.

(2) Excluding the value of the €750 million earnout payable to Vivendi if Altice France Group's EBITDA less capital expenditures reaches certain predefined targets.

(3) As at January 19, 2015.

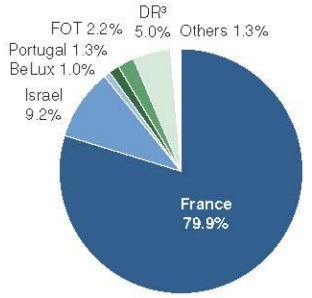
(4) Other includes the B2B telecommunications solutions business and datacenter operations in Switzerland (Green and Green Datacenter), the datacenter operations in France (Auberimmo) and the content production and distribution businesses in France and Luxembourg (Ma Chaîne Sport and SportV). Green Datacenter and Auberimmo are designated as unrestricted subsidiaries under the terms governing the indebtedness of the Group.

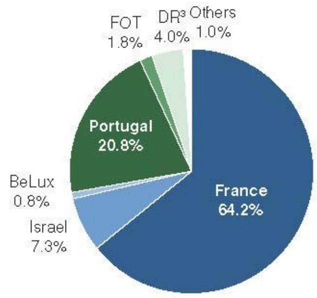
(5) Pro Forma Adjusted EBITDA includes management estimate of € 115 million of pro forma synergies expected to result in the medium term from the PT Portugal Acquisition and certain other expected synergies and cost savings. These synergies estimates are based on a number of assumptions made in reliance on the information available to us and management's judgments based on such information. The assumptions used in estimating synergies are inherently uncertain and are subject to a wide variety of significant business, economic, and competitive risks and uncertainties that could cause actual results to differ materially from those contained in the synergies benefit estimates.

(6) Altice International indirectly owns 99.7% of the ownership interests in our French Overseas Territories subsidiaries and all of the remaining ownership interest is held by Altice S.A.

The table below shows our pro forma EBITDA both (i) before the PT Portugal Acquisition and (ii) pro forma for the PT Portugal Acquisition split by geography for the LTM ended September 30, 2014 (in each case giving pro forma effect to the 2014 SFR Acquisition and the ODO Acquisition).

Altice Group Pro Forma LTM ended September 30, 2014 Adj. EBITDA Split Pre PT Portugal Acquisition[(1)]	**Altice Group Pro Forma LTM ended September 30, 2014 Adj. EBITDA Split Post PT Portugal Acquisition**[(2)]





(1) Adjusted EBITDA includes management estimate of €365 million of pro forma synergies expected to result in the medium term from expected synergies and cost savings in France, Dominican Republic, Portugal and the French Overseas Territories.

(2) Adjusted EBITDA includes management estimate of €465 million of pro forma synergies expected to result in the medium term from the PT Portugal Acquisition and certain other expected synergies and cost savings in France, Dominican Republic, Portugal and the French Overseas Territories.

(3) Gives pro forma effect to the ODO Acquisition and the Tricom Acquisition for the entire LTM ended September 30, 2014.

We have a high quality cable-based and fiber-based network infrastructure. In the Altice France Group's footprint, in the portion of the Numericable Group's cable network that has been upgraded to Docsis 3.0 (approximately 5.2 million homes as of December 31, 2013, and 5.8 million homes as of September 30, 2014, representing 52% and 58% of total homes passed, respectively) we are able to offer download speeds of up to 200 Mbps with the potential capacity to support download speeds of up to 400 Mbps with limited network and customer premises equipment upgrades. Numericable Group's cable footprint is complemented by SFR's near national DSL presence and SFR's fiber network, which comprises 1.5 million households passed with FTTH technology and offers download speeds of up to 200 Mbps (although a significant portion of the existing fiber networks of the Numericable Group and SFR overlap). Altice International's fixed-line services are primarily delivered over hybrid fiber coaxial ("HFC") cable that are among the most technically advanced in the markets in which we operate and the PT Portugal Group's FTTH networks are among the most technically advanced in Portugal. Altice International's cable networks benefit from substantial spectrum availability and, on a blended basis, are 99% Docsis 3.0-enabled (before giving effect to the PT Portugal Acquisition) as of September 30, 2014. Together with PT Portugal Group's FTTH networks, which offer download speeds of up to 1 Gbps, this allows us to offer advanced triple-play services in a vast majority of Altice International's service areas. Outside the Overseas Territories, our cable networks enable us to offer download speeds of at least 100 Mbps to a majority of homes passed in our footprint. Given the existing technological capability of our networks, in the short to medium term, we expect that the substantial majority of our cable networks outside the Overseas Territories will offer download speeds of up to 360 Mbps with limited network and customer premises equipment upgrades. We believe that our cable networks are well positioned for future technological developments including our ability to upgrade to the upcoming Docsis 3.1 standard while the PT Portugal Group's FTTH networks are already set up to provide download speeds of up to 1Gbps. In Portugal, the French Overseas Territories and the Dominican Republic we also provide fixed-line services to a portion of our customer base through a DSL network that we continue to upgrade to FTTH and HFC.

Prior to the 2014 SFR Acquisition, as of September 30, 2014, Numericable Group's network passed 10 million cable homes with 1.3 million Cable Customer Relationships, 3.3 million cable-based RGUs, an average of 2.4 RGUs per Cable Customer Relationship and 236,000 million mobile telephony RGUs. In addition, pro forma for the 2014 SFR Acquisition, the Altice France Group passed 2.0 million FTTH homes with 238,000 FTTH customer relationships and had 5.0 million xDSL broadband RGUs and 21.4 million mobile telephony RGUs, as at June 30, 2014. Prior to the PT Portugal Acquisition, Altice International passed 4.1 million cable/FTTH homes passed with 1.6 million Cable/FTTH Customer Relationships, 3.4 million cable/FTTH-based RGUs, an average of 2.1 RGUs per Cable Customer Relationship, 4.7 million mobile telephony RGUs and had 0.5 million xDSL/non-cable/non-FTTH based fixed RGUs, as at September 30, 2014. In addition, as at September 30, 2014, the PT Portugal Group passed approximately 1.7 million homes with its FTTH network (including an approximate 36% overbuild of the 910,000 homes passed by our existing cable network in Portugal).

We are the largest or second largest cable/FTTH pay television operator and broadband internet services provider, and a leading provider of multiple-play services in our service areas. In France, through Numericable Group's 1.1 million digital multi-play subscribers, SFR's 238,000 FTTH subscribers and Numericable Group's 362,000 white label subscribers (through an agreement with Bouygues Telecom), the Altice France Group is the market leader in the fixed very high speed broadband internet market (which is defined by ARCEP as broadband internet with above 30 Mbps speed capability) representing 60% of the total very high speed connections in France as of December 31, 2013 (78% including white label subscribers). In addition, SFR is the second largest mobile operator in France by number of subscribers. Pro forma for the PT Portugal Acquisition, we believe that Altice Portugal will be the second largest service provider of B2C pay television services in Portugal and the largest broadband internet services provider. As of December 31, 2013, the PT Portugal Group had market share of 42% in B2C pay television and 51% in B2C broadband internet and Cabovisao had a market share of 7% in B2C pay television and 6% in B2C broadband internet according to Anacom. In addition, the PT Portugal Group is the largest mobile operator in Portugal by number of subscribers with a 47% market share as at December 31, 2013, according to Anacom. In most of the markets in which we operate, we offer bundled triple-play services, and where possible, quadruple-play services and focus our marketing on our multiple-play offerings.

The table below sets forth, on a pro forma basis for the PT Portugal Acquisition, the services we offer in key countries in which we operate.

altice

Geographic Area	Western Europe			Israel	Dominican Republic	French Overseas Territories[1,2]	Other[5]

(1) We provide our cable based services in Belgium and Luxembourg and the French Overseas Territories under the Numericable brand licensed from the Altice France Group.

(2) We provide pay television, fixed-line telephony and internet access services over our unbundled xDSL network in certain parts of the French Overseas Territories. In Guadeloupe and Martinique we have begun to market these services under the Numericable brand which we have historically used for services provided via our cable network but we continue to use the ONLY brand in French Guiana and Mayotte, while in La Réunion we use the IZI brand.

(3) We continue to provide our iDEN mobile services under the "MIRS" brand. On January 12, 2015, the Israeli Ministry of Communications informed HOT Mobile that based on the results of a tender regarding 4G-LTE, it would be awarded a frequency bandwidth of 2X5MHz in the 1.8 GHz spectrum, for a license fee of NIS 34.5 million (up to half of which may be paid by way of provision of a bank guarantee, which may be refunded, in whole or in part, upon HOT Mobile reaching certain market share milestones). The tender results will be brought before the Minister of Communications for approval.

(4) In La Réunion, Mayotte and French Guiana, we continue to market our mobile services under the "ONLY" brand. However, in connection with the acquisition of SFR by Numericable (which is controlled by our parent Altice S.A., and therefore an affiliate of the Group), we have committed to the French Competition Authority to dispose of the mobile network assets in La Réunion and in Mayotte by mid-2015, which in aggregate contributed €10 million to aggregated and pro forma EBITDA for the fiscal year ended 2013.

(5) Includes business and datacenter operations in Switzerland (Green and Green Datacenter), datacenter operations in France (Auberimmo) and content production and distribution businesses in France and Luxembourg (Ma Chaîne Sport and SportV). Green Datacenter and Auberimmo are designated as unrestricted subsidiaries under the terms governing the indebtedness of the Group.

Our cable and fiber technologies enable us to offer premium digital services, attractive interactive features and local content to our subscribers. We have leveraged our network advantage to drive our multiple-play strategy and offer an attractive combination of content, speed and functionality. Numericable Group experienced a significant increase in the number of multiple-play subscribers (double-play and triple-play), reaching 1,083,000 as of September 30, 2014, compared to 972,000 as of December 31, 2012 (without giving effect to the 2014 SFR Acquisition). We also expect to increase the number of SFR's 5.2 million DSL customers and 0.2 million FTTH customers as of September 30, 2014, to whom we expect to be able to upsell multiple-play products supported by the migration of part of SFR's DSL customers base to the Numericable Group's fiber network. Altice International experienced a significant increase in the percentage of triple play subscribers reaching 708,000 triple play customers as of September 30, 2014 compared to 622,000 triple play customers as of December 31, 2012 (including the Overseas Territories, but excluding the PT Portugal Group), translating into growth in RGU per unique cable customer relationship. We expect this trend of upselling to higher RGUs per subscriber to continue.

Cable-Based Services ARPU Growth and Triple Play Penetration

(1) Represents operating measures of the Numericable Group (over which we acquired control as a result of the 2014 Numericable Acquisition in January 2014), including the cable services provided to customers under the "Numericable" brand and B2B services offered under the Completel brand. For France (Numericable Group), ARPU does not reflect ARPU from white label end users or bulk subscribers but includes ARPU from mobile services. France (Numericable Group) does not include operating measures of SFR, which provides xDSL and FTTH based services.

(2) Represents individual digital subscribers ARPU.

(3) For 2012 and 2013, represents year on year growth. For Q3 2014, represents growth compared to 2013.

(4) Portugal represents operating measures of Cabovisao (in which we acquired a controlling interest in February 2012) and the PT Portugal Group (which we agreed to acquire on December 9, 2014).

(5) Israel represents operating measures of HOT (in which we acquired a controlling interest in March 2011).

(6) Dominican Republic represents Tricom (in which we acquired a controlling interest in March 2014).

(7) Cable ARPU in the Dominican Republic includes only revenues related to pay television services and also revenues from additional set top boxes and other value added and premium services. Does not include ARPU from broadband internet and fixed line telephony services.

(8) Blended 3P penetration in the Dominican Republic is shown for cable and xDSL/non cable based customers.

(9) Defined as multi-play subscribers/Digital individual subscribers and analog TV individual subscribers, as per Numericable Group's reporting.

We aim to maximize return on our investments by implementing our investment strategy, IT and network planning as well as procurement initiatives at the Group level. We have implemented common technological platforms across many of our networks in order to gain economies of scale, notably with respect to billing systems, network improvements and cable customer premises equipment. We have also achieved substantial reductions in our operating expenses as we implemented the same best practice operational processes across our organization. We have simplified the services we offer, increased the level of outsourcing of customer service, customer installations and network maintenance and reduced costs through the negotiation of attractive interconnection rates and improved pricing of our television content. We believe that sharing of best practices across our regions and identifying group synergies are key drivers of our operational performance improvements, operating margin increases and organic cash-flow growth.

We have an acquisition strategy whereby we target cable and FTTH operators with what we believe to be quality networks in markets we find attractive from an economic, competitive and regulatory standpoint and create value at the acquired businesses by implementing operational improvements and leveraging economies of scale, as well as pursuing in-market consolidation and attractive diversification with B2B, DSL and mobile add-on opportunities. We aim to substantially improve the operational performance of the businesses we acquire, thereby providing the cash flow generation to help fund future growth.

PT Portugal Acquisition Overview

Subject to regulatory approval, the acquisition of PT Portugal will result in the combination of the assets of the PT Portugal Group, with our existing Portuguese businesses, Cabovisao (B2C business offering cable-based pay television, broadband internet and fixed-line telephony services) and ONI (B2B business). The businesses of the PT Portugal Group, Cabovisao and ONI are referred to in this section as "Altice Portugal". We believe that after completion of the PT Portugal Acquisition, Altice Portugal will be a leading telecommunications operator in B2C and B2B segments and the second largest service provider of B2C pay television services in Portugal. The PT Portugal Group had a market share of 42% in B2C pay television, 51% in B2C broadband internet, 47% in B2C mobile and 48% in B2B Enterprise, as of December 31, 2013, according to company disclosures, Anacom and Analysys Mason.

Based on the PT Portugal Combined Selected Financial Information, the PT Portugal Group generated revenues of €2,627.4 million for the year ended December 31, 2013 and €2,565.1 million for the LTM ended September 30, 2014, and EBITDA of €1,026.4 million for the year ended December 31, 2013 (EBITDA Margin of 39.1%) and of €997.2 million for the LTM ended September 30, 2014 (EBITDA Margin of 38.9%).

For further details, see "*Recent Developments*" and "*The Transactions*".

PT Portugal Expected Synergies

We believe that the PT Portugal Group will be in a position to realize substantial cost savings from the advantages of being a part of the broader Group. We expect that the PT Portugal Group will realize substantial cost savings in the following areas: subcontractor rationalization, increased buying power through combined procurement, reduction in international content costs (brought in line with) the Altice Group's benchmarks, reduction in interconnection costs through re-routing to Altice Group's reduction in IT spending, simplification of operating practice and outsourcing of customer care. We also expect that Altice Group will realize capital expenditure savings through benefits of scale in procurement, adoption of Altice best practices in capital expenditure planning and efficiency savings in network speed.

Across our geographies, we have a successful track record of improving the performance of cable and telecommunication operators we acquire. We expect to continue to grow our operating margins by focusing on cost optimization and increasing economies of scale and operational synergies as we integrate the recently acquired businesses, including SFR, and the PT Portugal Group, into the Group. Furthermore, we expect to realize capital expenditures synergies as a result of increasing economies of scale and improved negotiating leverage with counterparties as the Group expands. In addition, we also aim to reduce churn by continuously improving our service quality, bundling and subscriber satisfaction, which we expect to drive growth in our operating margin.

Management estimates total annual cost synergies impacting EBITDA and total annual synergies impacting capital expenditure, which are expected to result in the medium-term from the PT Portugal Acquisition to be approximately €100 million and approximately €40 million, respectively. However, this synergies estimate is based on a number of assumptions made in reliance on the information available to us and management's judgments based on such information. The assumptions used in estimating synergies are inherently uncertain and are subject to a wide variety of significant business, economic, and competitive risks and uncertainties that could cause actual results to differ materially from those contained in the synergies benefit estimates.

PT Portugal Group Overview

B2C Pay Television: The PT Portugal Group is the second largest pay television service provider in Portugal with 1.3 million subscribers and 42% market share as of December 31, 2013 according to Anacom. We believe that the PT Portugal Group offers exclusive and differentiated premium content, advanced functionalities, such as multiplatform support, and an interactive customer experience, through its FTTH network. Pay television penetration in Portugal stood at 85.9%, as per Ovum Research estimates for 2014. Following the PT Portugal Acquisition, we believe that Altice Portugal will be well placed to benefit from an increase in pay television penetration in Portugal, which is estimated to increase to 98.2% by 2017, according to Ovum Research.

B2C Broadband Internet: The PT Portugal Group is the market leader in Portugal in the provision of broadband internet to consumers, with 1.3 million subscribers and 51% market share, as of December 31, 2013, according to Anacom. Of the 3.9 million primary households in Portugal, PT Portugal Group covers almost all the homes with its copper network, and 1.7 million of the households are passed by PT Portugal Group's FTTH networks (which inculdes an approximate 36% overbuild of the 910,000 homes passed by Cabovisao's existing cable network in Portugal). The PT Portugal Group is the sole fixed infrastructure provider on a portion of its footprint, in mainly rural areas of Portugal where cable operators and Vodafone have no fixed network. The PT Portugal Group has made significant investments in its fiber transmission network that supports up to 100 Gbps and its FTTH access network that offers speeds of up to 1 Gbps.

B2C Mobile: The PT Portugal Group is the largest mobile operator in Portugal with 6.4 million subscribers and 47% market share as of December 31, 2013, according to Anacom. The PT Portugal Group has a state of the art 4G-LTE network, covering 95% of population and allowing speeds up to 150 Mbps, in addition to nationwide 3G and 2G networks.

B2C Bundling: We believe that Altice Portugal will be well placed to capitalize on the growing trend of bundling of telecom services, in triple and quadruple play packages. As of September 30, 2014, the PT Portugal Group had multiple-play penetration (3P/4P) of 51% (9 million customers) compared to 71% (3P/4P) for NOS based on its public filings and 59% for Cabovisao. In 2013, the PT Portugal Group introduced its quadruple-play (M_4O) and triple-play (M_3O) offers, which have been well received by the market with M_4O winning the Consumer Choice for best quadruple-play service in Portugal in 2013. For the nine months ended September 30, 2014, the PT Portugal Group's residential ARPU and personal ARPU amounted to €31.9 and €7.3 respectively, as compared to €31.7 and €7.7 for the nine months ended September 30, 2013. Through the development of its advanced fixed-mobile infrastructure, we believe that the PT Portugal Group is well placed to increase its penetration of triple play and quadruple play packages among its customer base.

B2B Enterprise: In the B2B Enterprise segment, the PT Portugal Group is the leading B2B player in the Portuguese market. The PT Portugal Group benefits from an extensive fiber and DSL network in Portugal, with a market share of approximately 48% based on revenues, according to Analysys Mason. A significant number of the PT Portugal Group's clients are connected through FTTH. We believe that the PT Portugal Group also benefits from strong customer relationships.

B2B Wholesale/Others: As the incumbent telecom provider in Portugal, the PT Portugal Group is the primary provider of wholesale telecom capacity to resellers in the Portuguese market. Altice Portugal, through its investments in infrastructure and telecom-IT convergence, will aim to develop and market advanced integrated solutions for the B2B segment that will include IT/IS services and value added services (such as cloud outsourcing and BPO).

Cabovisao/ONI

Cabovisao, our existing B2C operator in Portugal, is a triple-play provider of pay television, broadband internet and fixed-line telephony services. As of December 31, 2013, Cabovisao had 224,000 pay television subscribers, 156,000 broadband internet subscribers, and 223,000 fixed-line telephony subscribers, representing a 7%, 6% and 5% market share respectively, according to Anacom and Ovum Research. Cabovisao owns a fully upgraded (99%) Docsis 3.0 network capable of delivering speeds of up to 360 Mbps. The backbone of Cabovisao is spread over 3,647 kilometers with approximately 36% overbuild of the PT Portugal Group's FTTH network. Our existing B2B Enterprise business ONI, has a next generation network, with more than 9,000 kilometers of fibre and 427 points of presence, supporting 17,500 customers sites with fibre access.

Cabovisao and ONI generated cable-based revenues of €108.7 million for the year ended December 31, 2013 and of €101.0 million for the LTM ended September 30, 2014, B2B revenues of €100.9 million for the year ended December 31, 2013 and of €89.0 million for the LTM ended September 30, 2014, total revenues of €209.6 million for the year ended December 30, 2013, and of €190.1 million for the LTM ended September 30, 2014, and EBITDA of €58.3 million for the year ended December 31, 2013 (EBITDA Margin of 27.8%), and of €57.4 million for the LTM ended September 30, 2014 (EBITDA Margin of 30.2%).

Group Summary Financials

The table below summarizes the development in our revenues, Adjusted EBITDA and Adjusted EBITDA less capital expenditures in the periods indicated:

	Post-Transaction Pro Forma Financial Information[(1)]			
		For the nine months ended September 30,		
	For the year ended December 31, 2013	**2013**	**2014**	**LTM ended September 30[(6)]**
	€ in millions			
Revenue	15,972.2	11,926.5	11,699.4	15,812.0
of which Tricom adjustment[(7)]				*66.9*
Adjusted EBITDA[(2)]	5,230.4	4,054.9	3,889.5	5,088.5
of which Tricom adjustment[(7)]				*23.6*
Capital Expenditures[(3)]	2,862.5	1,891.5	1,790.7	2,778.7
of which Tricom adjustment[(7)]				*17.0*
Adjusted EBITDA—Capital Expenditures	2,367.9	2,163.4	2,098.8	2,309.8
of which Tricom adjustment[(7)]				*6.6*
Pro Forma Adjusted EBITDA[(4)]				5,553.5
of which Pro Forma Adjusted EBITDA (Altice France Group)[(5)]				3,562.7
of which synergies—Altice France				*350.0*
of which Pro Forma Adjusted EBITDA (Altice International)				1,990.7
of which synergies—Altice International				*115.0*
of which Intercompany Adjustments				*(6.0)*
Pro Forma Adjusted EBITDA—Capital Expenditures				2,774.8

(1) The Post-Transaction Pro Forma Financial Information, among other things, gives pro forma effect to the acquisition of ODO, the Numericable Group, SFR and PT Portugal. Save for the LTM column, it does not give pro forma effect to the acquisition of Tricom or Mobius but includes the contribution of Tricom and Mobius from March 12, 2014, and January 1, 2014, respectively, following their consolidation into the Historical Consolidated Financial Information of Altice International. For details, see "*Pro Forma Financial Information of the Group*". Post-Transaction Pro Forma Financial Information does not give pro forma effect to the disposal of our mobile network assets in Mayotte and La Réunion which we have committed to undertake.

(2) Adjusted EBITDA is defined as operating income before depreciation and amortization, goodwill impairment, management fees, other expenses, net and reorganization and non-recurring costs (EBITDA) and before equity based compensation expenses. Adjusted EBITDA is unaudited. We believe that these measures are useful to investors as it provides them with a measure of the operating results which excludes certain items we consider outside of our recurring operating activities or that are non-cash, making trends more easily observable and providing information regarding our operating results and cash flow generation that allows investors to better identify trends in our financial performance. Adjusted EBITDA should not be considered as a substitute measure for operating income and may not be comparable to similarly titled measures used by other companies (including the Numericable Group, SFR and the PT Portugal Group). "Adjusted EDITDA" of Altice S.A. and Altice International presented herein corresponds to "EBITDA" as reported by Altice S.A. and Altice International for financial reporting purposes as of September 30, 2014.

(3) For the Post Transaction Pro Forma Financial Information, capital expenditures have been calculated by aggregating (i) the Group's cash capital expenditures based on the Pre Transaction Pro Forma Financial Information, (ii) the cash capital expenditures of ODO based on the

historical financial statements of ODO and for the nine-month period ended September 30, 2014 Altice International, (iii) the cash capital expenditures of the PT Portugal Group based on the PT Portugal Combined Selected Financial Information, (iv) the cash capital expenditures of the Numericable Group based on the historical combined financial statements of Numericable and (v) the cash capital expenditures of SFR based on the historical standalone financial statements of SFR.

(4) For reconciliation of Pro Forma Adjusted EBITDA to Adjusted EBITDA, Total Altice France Group EBITDA to Pro Forma Adjusted EBITDA (Altice France Group) and Total Altice International EBITDA to Pro Forma Adjusted EBITDA (Altice International) see "*Summary Financial Information and Other Data—Pro Forma Adjusted EBITDA*".

(5) We own 60.3% of the Numericable Group.

(6) LTM is calculated by (i) adding the revenue, EBITDA or Adjusted EBITDA, as applicable, for the nine months ended September 30, 2014 and the year ended December 31, 2013 and (ii) subtracting the revenue, EBITDA or Adjusted EBITDA, as applicable, for the nine months ended September 30, 2013 from such sum.

(7) For the purposes of the LTM ended September 30, 2014, only, pro forma effect is given to the acquisition of Tricom, including the non-consolidated portion of Tricom prior to Tricom's consolidation into the Historical Consolidated Financial Information of Altice International from March 12, 2014, which is accounted for under "Tricom adjustment", and the contribution of Tricom from March 12, 2014, following its consolidation into the Historical Consolidated Financial Information of Altice International.

Our Competitive Strengths

We believe that we benefit from the following key strengths:

We are one of the leading cable-based communications groups benefitting from significant scale. We are one of the largest cable groups in the world outside of North America. After giving effect to the PT Portugal Acquisition, the 2014 SFR Acquisition and the ODO Acquisition, we had €15,812.0 million of Pro Forma revenues and €5,553.5 million of Pro Forma Adjusted EBITDA (including certain expected aggregated synergies and cost savings from the SFR, the Numericable Group, PT Portugal, and ODO acquisitions) for the LTM ended September 30, 2014. In the same period, we have made Pro Forma cash capital expenditures of €2,778.7 million, resulting in a Pro Forma Adjusted EBITDA less Pro Forma cash capital expenditures balance of €2,774.8 million. We benefit from significant scale with 14.6 million cable/FTTH/DSL RGUs and 26.9 million mobile customers, after giving effect to the PT Portugal Acquisition, the 2014 SFR Acquisition and the ODO Acquisition. Our scale allows us to realize operational performance improvements, target operating margin increases and organic cash flow growth by sharing best practices across our regions and implementing group synergies.

We enjoy leading positions in the pay television and broadband internet markets in our service areas which have favorable dynamics for cable and fiber operators, with over 86.1% of our Pro Forma Adjusted EBITDA coming from Western Europe. After giving effect to the PT Portugal Acquisition and the 2014 SFR Acquisition, we are the largest or second largest cable/FTTH pay television operator and broadband internet services provider in our service areas. In a significant majority of our footprint outside of Portugal, we are the sole cable operator. We are located in markets that we believe have a number of attractive trends for cable and mobile operators. In France, we are the leading provider of very-high-speed (defined as speeds over 30 Mbps) internet services to residential customers, a nascent but growing market, as we leverage one of the most extensive last mile HFC and FTTH networks in Europe, and we are also the second largest mobile operator by number of subscribers. Cabovisao's network passes approximately 910,000 homes in Portugal through cable (with approximately 36% overbuild of the PT Portugal Group's FTTH network) and is 99% DOCSIS 3.0-enabled. The PT Portugal Group's mobile network in Portugal is already upgraded to 4G-LTE and currently covers 95% of the population allowing speeds up to 150 Mbps, in addition to nationwide 3G and 2G networks. In Israel, we are the leading cable operator with the number one market position in pay television and number two position in broadband internet and we benefit from nationwide cable network coverage, a unique feature in the cable sector, which we believe provides us with significant penetration upside potential. All of the countries in which we currently operate have historically had high consumption of television and high pay television penetration combined with a relatively weak free-to-air television proposition. Broadband internet penetration in our footprint, and in particular in France, Israel, Belgium and Luxembourg, also compares favorably with most other West European markets. After giving effect to the PT Portugal Acquisition, the 2014 SFR Acquisition and the ODO Acquisition, our operations in Western Europe accounted for 89.4% of our Pro Forma revenues and 86.1% of our Pro Forma Adjusted EBITDA (including certain expected synergies and cost savings) for the LTM ended September 30, 2014.

We believe that we benefit from a fixed network advantage in each of our markets. We own our HFC networks that are Docsis 3.0-enabled for the majority of cable homes we pass, including 100% in Israel and 58% in France (before giving effect to the 2014 SFR Acquisition), which we believe allow us to offer attractive and competitive services in terms of picture quality, speed and connection reliability. In France, we own a modern cable network and benefit from a first-mover advantage with respect to fiber in France. In the B2C segment, our FTTB/EuroDocsis 3.0-enabled network provides customers with a current download speed of up to 200 Mbps, passing approximately 5.8 million homes as of September 30, 2014, representing approximately 58% of the Numericable Group's total homes passed, while SFR's fiber network passed 2.0 million homes (although a significant portion of the existing fiber networks of the Numericable

Group and SFR overlap). In Portugal, the PT Portugal Group owns one of the largest FTTH networks by penetration in Europe reaching 1.7 million homes (43% penetration). Outside the Overseas Territories, where network upgrades are currently underway, we are able to offer download speeds of at least 100 Mbps to a vast majority of homes passed in our footprint. Given the existing technological capability of our networks, in the short to medium term, we expect to offer download speeds of up to 360 Mbps with limited network and customer premises equipment upgrades across a substantial portion of our network. We currently have a network advantage in terms of download speed across a part of our cable service area across geographies (excluding the Dominican Republic and Portugal) and, specifically in Israel, where we expect to continue offering faster speeds than our competitor's legacy technology and at par with it in areas where it has deployed FTTH. We believe that with our HFC, and following the PT Portugal Acquisition, FTTH technologies we are well positioned for future technological developments making it possible for us to increase broadband internet download and upload speeds exceeding those offered by competing technologies without making significant additional investments. In addition, through the mobile network owned by SFR and the PT Portugal Group, we believe that we will have one of the broadest and most advanced mobile networks in France and Portugal respectively. As of December 31, 2013, SFR's network was comprised of more than 16,500 3G active antennas with 3G coverage of 99% of the French population, the highest 3G coverage in France, and 1,034 4G antennas on its 800 Mhz band offering with a 4G coverage of over 40% of the French population. The PT Portugal Group has a state of the art 4G-LTE network, covering 95% of population and allowing speeds up to 150 Mbps, in addition to nationwide 3G and 2G networks.

The following table sets forth the key characteristics of our cable network:

	Altice Key Geographies			European Peers		
	France (Numericable Group)	Israel	Dominican Republic	Ziggo	Telenet	KDG
Cable Network Capacity..	862MHz[1]	600 - 862 MHz	Primarily 750 - 1,000 MHz[2]	862 MHz	600 MHz	Mainly 640 MHz
Docsis 3.0 Upgrade (%)	58	100	100	100	100	95
Homes Passed per node	~200	~1,250	~750	1,500	~580	>1,500
Advertised Speed (Mbits).....................	30 - 200	30 - 100	1 - 100	20 - 150	60 - 120	10 - 100

	PT Portugal Group
Homes passed with FTTH Connections..	1.7 million

(1) 85% of the homes connected to the Numericable Group's network benefit from an 862 MHz frequency.

(2) 91% of Tricom's cable network as of September 30, 2014.

We are a leading multiple-play provider of cable and/or FTTH based services in our markets with substantial cross-sell and up-sell opportunities in fixed, mobile and B2B. Building on our technologically advanced networks and innovative offerings, we have developed leading positions in our markets in multiple-play offerings by selling our differentiated pay television, high speed broadband internet, fixed line telephony and in most instances mobile telephony services as bundles. We believe that the strength of our pay television, broadband internet and fixed telephony businesses and our ability to offer advanced mobile telephony services makes us well positioned to increase penetration of multiple-play and premium packages. We believe that continued focus on our bundling strategy and increasing our triple-play or, where possible, quadruple-play penetration will enable us to grow our cable/FTTH-based services ARPU. The demand for high speed internet, fixed mobile convergence and high quality content together with opportunities provided by leveraging our networks as a result of the PT Portugal Acquisition, the 2014 SFR Acquisition and ODO Acquisition are key drivers of our cross-sell and up-sell strategy.

According to Ovum Research, worldwide subscribers for high-speed broadband internet are expected to increase at a 6.0% rate between 2013 and 2016. We believe that we are well positioned to capitalize on this trend as we offer download speeds of at least 100 Mbps to a majority of homes passed in our footprint (other than the portion of homes passed in France and the Overseas Territories that are currently not Docsis 3.0-enabled). In France, we believe the strength of our pay television, broadband internet and fixed telephony businesses and the enhanced ability to offer advanced mobile telephony services positions us well to continue to increase the penetration of multiple-play and premium packages. In addition, we are the leading multi play provider of very high speed broadband internet services in France. We expect that through a bundling strategy and increasing the triple-play and quadruple-play penetration, the Altice France Group will be able to grow its cable/FTTH-based services ARPU. In addition, the Numericable Group's network is complimented by SFR's fiber network and will enable the Altice France Group to provide customers serviced by its cable network with very-high-speed broadband internet, currently with speeds of up to 200 Mbps, the highest available on a large scale in the French market. The Numericable Group's network has been built and upgraded specifically to address the increasing speed and bandwidth requirements of our customers. The targeted migration of a part of SFR's 5.2 million fixed broadband internet customers onto the Numericable Group's network provides an opportunity to significantly grow penetration on the Altice France Group's network, to reduce cost for renting of the last mile and create upselling opportunities. In Portugal, the PT Portugal Group is a leading provider of multiple-play services and the market leading provider of broadband internet services, which we believe provides upsell opportunities in fixed telephony and mobile telephony. In Israel, HOT is the sole triple-play provider in the market and enjoys the leading market position in pay television and the number two market position in broadband and fixed telephony. In addition, we have been offering mobile services through our own mobile network since 2012, and we see the increase in penetration of mobile subscribers as a key potential upside.

Pro Forma for the PT Portugal Acquisition, we will have a fully integrated fixed mobile business in France, Portugal, Israel and the Overseas Territories. In France, through the acquisition of SFR's mobile network, the Altice France Group will be able to provide its customers with access to one of the most advanced 4G mobile offers in the market, offering significant increases in speed and benefits in terms of latency. Following the PT Portugal Acquisition, we believe that we will be well positioned to benefit from convergence between fixed and mobile service offerings in Portugal by leveraging the PT Portugal Group's high-speed fiber-based fixed network and 4G mobile network. The PT Portugal Group currently provides innovative triple-play and quadruple-play bundles through the MEO brand and we believe there are significant cross selling opportunities through increased penetration of converged services. We own and operate a 3G mobile network in Israel and in the French Overseas Territories which, in each case, benefit from synergies with our cable networks, whereas in Belgium we complement our fixed-line products with mobile offerings through an MVNO arrangement.

We have a premium, high quality content offering in all of our markets. We believe that Altice France Group will be able to offer its customers significant advantages in terms of content. It has direct long-term relationships with the major content providers and television channel suppliers, and is currently the only broadband internet provider contractually able to offer premium content in a single-bill bundle (shared exclusively with CanalSat). The Altice France Group's offerings will include an extensive array of HD channels as well as the largest VOD catalog in the market, with over 30,000 shows and movies available by aggregating all VOD packages available in France in a crisp, user friendly interface. In Portugal, the PT Portugal Group offers a high quality content package through more than 220 channels and a leading VOD library. In Israel, we co-develop and co-own high quality original local content together with local producers and broadcast it on our proprietary channels. We believe that our high quality proprietary local content, along with high quality local content we purchase and our distinctive brand enable us to attract new and retain existing subscribers to our cable based services.

In the Dominican Republic, we target increasing revenues by cross-selling Tricom's high-speed broadband internet and pay television offerings to ODO's existing customers and ODO's mobile services to Tricom's customers in addition to offering new services that utilize both companies' product sets and networks. We also have an opportunity to upsell ODO's DSL customers to Tricom's cable network.

We benefit from strong EBITDA margin and scalable capital expenditures translating into strong organic cash flow. On a historical consolidated basis, our Adjusted EBITDA as a percentage of revenues increased from 38.0% in fiscal year ended December 31, 2011 to 45.7% in the nine months ended September 30, 2014, primarily as a result of operational efficiencies implemented by us across the organization in addition to acquisitions of higher margin businesses. The operational efficiencies have been complemented by efficient capital expenditure as, on a blended basis, 99% of our cable networks outside France (before giving effect to the PT Portugal Acquisition) and 58% of our cable networks in France (before giving effect to the 2014 SFR Acquisition) are already upgraded to Docsis 3.0, making our cable based business's capital expenditures largely success driven, including network upgrades and customer acquisition related investments. Pro forma for the PT Portugal Acquisition, we generated in the LTM ended September 30, 2014, Pro Forma Adjusted EBITDA as a percentage of revenues of 35.1% and Pro Forma Adjusted EBITDA less capital expenditure as a percentage of Pro Forma Adjusted EBITDA of 50% (including certain expected aggregated synergies and cost savings from the PT Portugal Acquisition and certain other recently completed transactions). We believe that we will benefit from the PT Portugal Group's well invested FTTH-based fixed network and 4G-LTE mobile network in Portugal, and we consequently expect to further improve our cashflow conversion as a result of the PT Portugal Acquisition. We expect our increased scale to enable us to further reduce operating expenses and capital expenditures through optimized purchasing. While we have already completed the main network investment cycle in France, we will continue to upgrade the portions of our cable network where we see strong return on investment. We will make similar upgrades to our cable networks in the French Overseas Territories of Guadeloupe and Martinique as well as in the Dominican Republic. We own 60.3% of the Altice France Group and can set its dividend policy and are entitled to receive dividends, if any, declared by the Altice France Group that reflect our proportionate ownership of the Altice France Group.

We have a proven track record of making attractive acquisitions and of unlocking value through operational excellence. We believe that our entrepreneurial culture and efficient decision making processes allow us to quickly react to changes in our operating environments and to seize business opportunities as they arise. We believe a key driver of our success is our ability to identify attractive acquisition targets and assess the associated potential for value creation, consummate the acquisitions on terms economically attractive to us and consistently and timely implement best operational practices that drive the previously identified improvements to the profitability of acquired businesses. We have historically been able to acquire fixed and mobile networks operators in our existing footprint and in new attractive markets and create value through operational synergies. We have expertise in operating cable operators in numerous countries and business environments, with consistent focus on fostering cash-flow growth. In our acquired businesses, we have been successful at optimizing costs, capital expenditures, internal processes and outsourcing certain functions while preserving and enhancing the quality of service we provide to our subscribers. For example, in France, we have played a key role in consolidating the fragmented cable sector around the Altice France Group, and successfully expanded into the B2B segment through the acquisition of Completel, driving combined EBITDA margin to 47% for the nine months ended September 30, 2014 (up 3.1% from the year ended December 31, 2011). Similarly, in our Israeli business, following the acquisition of control by the Group over HOT in 2011, HOT's EBITDA margin increased to 49% for the nine months ended September 30, 2014 (from 39% for the year ended December 31, 2011); in our Portuguese business, following the acquisition of control by the Group over Cabovisao in February 2012, our Portuguese business's EBITDA margin increased to 32% in the nine months ended September 30, 2014 compared to 14% for the year ended December 31, 2011; in our BeLux business, following the acquisition of control by the Group over Numericable in 2011, Coditel's EBITDA margin increased to 67% for the nine months ended September 30, 2014, (from 62% for the year ended December 31, 2011); and in the Dominican Republic, our cost restructuring efforts following the acquisition of ODO in April 2014 have resulted in an increase in EBITDA margin from 39% for the year ended December 31, 2013, to 46% for the nine months ended September 30, 2014. Furthermore, we believe that the PT Portugal Acquisition and the 2014 SFR Acquisition will be synergistic with our existing Portuguese and French assets respectively and will additionally benefit from certain cost advantages as part of the broader Group, including technological know-how and improved procurement terms. We expect to realize operational synergies from the optimization of procurement, marketing spending, including the convergence to a unique brand, and IT through simplification of processes and offerings.

We have an experienced management team with a long term industry track record. We manage our business by combining the expertise of the Altice senior management team with the local expertise of the managers of our operating subsidiaries who have significant experience managing day-to-day operations at cable and telecommunications companies. We are supported by an entrepreneurial shareholder and executive chairman of our Board, Patrick Drahi, founder of Altice, with 20 years of experience owning and managing cable and telecommunications companies globally. Among Mr. Drahi's achievements is the roll-up of the French cable and telecom market into the Altice France Group and Completel and, following the completion of the acquisition by the Numericable Group of SFR in November 2014. The Altice senior management team has extensive experience in the cable and telecommunications sectors. Before joining Altice in 2009, Dexter Goei (CEO) worked for 15 years in investment banking, most recently as Co-Head of the Media & Telecommunications Group for Europe, Middle-East and Africa at Morgan Stanley. Before joining Altice in 2012, Dennis Okhuijsen (CFO) worked for 17 years in the cable sector with UPC, UGC and Liberty Global, most recently as Group Treasurer of Liberty Global. Before joining Altice in 2005, Jérémie Bonnin (General Secretary) worked for 7 years at KPMG in Transaction Services. Before joining Altice in 2013, Max Aaron (General Counsel) was a partner at Allen & Overy for over 14 years focusing on capital markets transactions. The Altice France Group's management has extensive experience in the cable and telecommunications industry and in the French market in particular. Eric Denoyer has been CEO of Numericable since January 2011. Prior to this, he was general manager of Completel's wholesale division. Thierry Lemaitre has been Numericable's CFO since May 2010. Prior to joining Numericable, he acted as CFO of Rentabiliweb, Streamezzo and held various positions within the France Télécom Group.

Our Strategy

The key components of our strategy are to:

Grow operating margins and cash flow by leveraging our operational expertise and group synergies. We have a successful track record of improving the performance of cable and telecommunication operators across geographies. We expect to continue to grow our operating margins by focusing on cost optimization and increasing economies of scale and operational synergies as our Group develops. In addition, we also aim to reduce churn by continuously improving our service quality, bundling and subscriber satisfaction, which we expect to drive growth in our operating margin. Furthermore, we target further economies of scale in capital expenditures as our Group expands and our bargaining power increases. In addition, we believe in-market consolidation opportunities and related synergies will continue to drive our profitability and cash-flow expansion. For example, we believe our recent acquisition of SFR in France, the acquisitions of cable and mobile operators, Tricom and ODO, in the Dominican Republic, and the acquisition of PT Portugal following the completion of the PT Portugal Acquisition will be complementary to our existing cable operations in these geographies and allow us to generate synergies. In France, we expect the 2014 SFR Acquisition will create opportunities to realize both cost and capital expenditure synergies in various areas including network, B2C, B2B, and operations. In Portugal, we expect the PT Portugal Acquisition will result in the realization of operational synergies in the following areas: telecommunication, equipment procurement, content procurement, maintenance spend, customer care, IT, workflow processes, marketing and product offering. In addition, the high-quality, fiber based network we will acquire as part of the PT Portugal Acquisition could reduce the need for fiber roll-out expenditures currently planned by Altice Portugal.

We have an experienced management with a proven integration and synergy delivery track record. Management estimates that the total annual cost synergies impacting EBITDA which are expected to result in the medium term from the PT Portugal Acquisition and the 2014 SFR Acquisition are approximately €100 million and €350 million respectively.

With regard to the synergies relating to the 2014 SFR Acquisition, we will aim to leverage the combination of the state of the art networks of Numericable Group and SFR which are highly complementary and will create the most advanced wholly or partly fiber-based fixed network in France while optimizing the Altice France Group's cost structure. In addition, the Altice France Group will aim to leverage SFR's mobile network to offer customers the most compelling quadruple play offers in the market, in particular, through SFR's state of the art 4G network. In particular, we are targeting EBITDA synergies in the B2C market as a result of SFR DSL customers subscribing to cable or fiber offers of the Numericable Group. This increase in cable/fiber customer base and decrease in DSL customer base of the Altice France Group should generate cost savings (particularly with respect to local loop unbundling fees paid to Orange), and, since ARPU of Numericable Group's customers is currently higher than that of SFR's, the increase in the cable/fiber base and decrease in the DSL base should allow for an overall increase in the ARPU of the Altice France Group. Further synergies are also expected due to the concentration of marketing efforts in the zones where cable/fiber have been deployed, thanks to the strength of the SFR brand and the development of the range and quality of the services offered. We are also targeting synergies in the B2B market by more effective marketing through the redeployment of our sales force, enabling better customer coverage, leading to a lower churn rate and increasing the sale of high value-added products. Network synergies resulting from the optimization of (i) data transfer between network terminals, principally SFR mobile antennae, and the core network (SFR uses third-party infrastructure for this transport, and we intend to use Numericable Group's infrastructure in the future, thus generating cost savings); (ii) the DSL networks of Completel and SFR; and (iii) SFR's fiber deployment. EBITDA and capital expenditure synergies are also expected to result from the optimization of (i) procurement, (ii) marketing expenses and the brand portfolio, and (iii) IT costs. However, these synergy estimates are based on a number of assumptions made in reliance on the information available to us and management's judgments based on such information. The assumptions used in estimating synergies are inherently uncertain and are subject to a wide variety of significant business, economic, and competitive risks and uncertainties that could cause actual results to differ materially from those contained in the synergies benefit estimates.

In the Dominican Republic, in March 2014, we completed the acquisition of Tricom, a cable and fixed line as well as mobile services provider, and in April 2014 we completed the ODO Acquisition, a mobile and wireless broadband internet services provider, which we believe will enable us to build an integrated fixed line and mobile infrastructure and provide us with substantial cross-sell and up-sell opportunities. In addition, we believe that our recent acquisition of Outremer Telecom (a mobile and fixed-line player in the French Overseas Territories) will enable us to benefit from cross-selling and up-selling opportunities between our cable, DSL and mobile customer bases. Following these acquisitions, we have realized certain operating expense and capital expenditure savings and we expect to benefit from approximately €15 million of incremental total annual cost synergies impacting EBITDA in the medium-term as a result of these transactions.

Further increase our multiple-play penetration and ARPU by providing new and existing customers with additional products and services, including attractive mobile products wherever profitable. We believe that our state-of-the-art cable and fiber networks across our markets provide us with a strong technological infrastructure for delivering high-quality television, higher speed internet and triple and, where permitted, quadruple-play services at attractive prices. We believe that fixed network leadership, operational excellence and multiple-play strategy are key success factors in our end markets. We have successfully increased triple-play penetration, as reflected by the growing number of RGUs per customer relationship outside France from 2.0x as of December 31, 2012 to 2.1x as of September 30, 2014 (without giving effect to the PT Portugal Acquisition). The number of our multiple-play subscribers in France has increased from 972,000 as of December 31, 2012 to 1,083,000 as of September 30, 2014. Our strategy is to continue to increase our multiple-play customer penetration by attracting new customers and cross-selling our mobile services to our existing cable-based services customers in the countries in which we offer those services. In France, following the 2014 SFR Acquisition we have an attractive opportunity to migrate part of SFR's 5.3 million fixed broadband customers onto the Numericable Group's cable network. This will allow us to leverage our network infrastructure, access to premium content and SFR's large customer base and premium brand name, to offer our existing and new B2C customers compelling bundled triple and quadruple play packages in the French market, where we will be the only player in our coverage area capable of bundling the highest broadband speeds in the market and premium pay television content into single-bill packages. We also plan to leverage up-selling opportunities to maximize ARPU by increasing penetration of certain services, such as higher speed broadband internet, premium content or value added interactive services, such as VoD and PVR. We believe that we will be able to convert a significant part of SFR's existing xDSL customer relationships into cable-based customer relationships with additional services and potentially higher ARPU. Following the PT Portugal Acquisition, we believe we have the potential to increase penetration of both fixed and mobile services in Portugal, by leveraging the PT Portugal Group's state-of-the-art FTTH broadband network and 4G mobile network, and our innovative triple-play and quadruple-play bundles. The PT Portugal Group's mobile strategy will focus on driving growth through mobile data offers based on its high quality network, delivering best in class coverage, capacity and quality of service to customers. The PT Portugal Group is focused on increasing smartphone penetration through a broad portfolio of handsets, and simplification of tariff plans to reinforce our post-paid value proposition and consequently encourage customer migration from prepaid to post-paid plans, which typically results in lower churn.

Leverage our networks to address new growth opportunities including B2B and mobility. We believe that our dense cable/FTTH network infrastructures supported by fiber backbones will position us ideally to service new demand from corporate customers and to benefit from the convergence of fixed-mobile usage without significant capital investment. We aim to leverage our well-invested infrastructures to offer tailored data solutions and capture profitable growth in these markets, thereby maximizing the return on our network assets. As the B2B telecommunications market shifts to next generation services, including IP VPN, hosting or cloud services, which are more bandwidth-intensive and complex, we will look to expand opportunistically in the B2B businesses, which offer important economies of scale and synergies with our B2C operations. We plan to continue to expand our presence in the B2B segment in France as a result of the 2014 SFR Acquisition by providing next generation services which require high bandwidth, and offer potential for higher margins. We intend to capitalize on the combination of our modern cable network and expertise in critical network architecture to grow our customer base and increase our offering of higher margin data products in France. We target increasing our market share in the B2B segment from approximately 20% (according to our internal estimates) by strategically redeploying our sales force in order to fully address all B2B market sub-segments. In addition, as mobile internet traffic is expected to grow at an average 68% growth rate between 2012 and 2017 (according to a Cisco VNI 2013 study) primarily driven by development of smart devices supporting multiple wireless technologies, we believe that our high capacity backbone will be a differentiating factor as it enables us to offer a compelling backhaul offload offering to MNOs. We are the second leading mobile operator in France with 21.4 million subscribers as of June 30, 2014. We believe that this will enable the Altice France Group to drive growth by leading the French market in quadruple play, convergence and innovation, supported by the power of the SFR brand and our multi-channel presence.

In Portugal, following the PT Portugal Acquisition, we will benefit from a leading enterprise telecom infrastructure (including one of the largest data centers in the world) and strong customer relationships, as well as from the PT Portugal Group's number one mobile telecom position with its 4G mobile network and superior scale as a mobile operator. We believe we can further grow this business by leveraging know-how between our Portuguese businesses and implementing best practices from the broader Group.

Generate value through disciplined acquisition strategy and proven integration capabilities. We deploy capital opportunistically across our portfolio through value enhancing acquisitions with the aim of generating strong cash flow and operational synergies in the cable and telecommunication sector. We target operators with what we believe to be quality networks in attractive markets from an economic, competitive and regulatory standpoint and seek to create value at the acquired businesses by implementing operational improvements and leveraging economies of scale, as well as pursuing in-market consolidation and attractive diversification with FTTH, B2B, DSL and mobile add-on opportunities. Our acquisition strategy also benefits from our flexible capital structure, which features no material near term maturities and allows us to make investments. The terms of the agreements governing our debt have historically allowed us to execute our acquisition strategy enabling us to be agile and opportunistic in a fast evolving environment. We have a strong track record of integrating acquired businesses having completed over ten transactions in the last three years. The PT Portugal Acquisition represents a further meaningful extension of this strategy and we believe will enable us to to realize value through significant expected operational synergies.

Recent Developments

PT Portugal Acquisition

On December 9, 2014, the Issuer, through its subsidiary Altice Portugal, entered into an agreement with Oi S.A. (the "PT Portugal Acquisition Agreement") relating to the purchase of all of the outstanding equity interests in PT Portugal (the "PT Portugal Acquisition") for an enterprise value of €7,400 million on a debt and cash free basis, as adjusted for estimated net post retirement benefit obligations post tax of € 957 million and other non financial debt purchase price adjustments (including working capital adjustments and certain tax liabilities) of € 339 million (price paid will be after deduction of net financial debt at closing and difference to normative level of working capital, as defined in the PT Portugal Acquisition Agreement) payable in cash upon completion of the PT Portugal Acquisition, which includes an earn out of €500 million, payable in the event the consolidated revenues of the PT Portugal Group for any financial year between 2015 to 2019 achieves a specified target. In order for PT Portugal to exceed such specified revenue target by the end of the specified period, its revenue growth will need to materially exceed the best-in-class compound annual revenue growth rate currently expected by the market from incumbent telecommunications companies in Europe. Prior to the Completion Date, Oi S.A. shall cause a reorganization of PT Portugal and its subsidiaries to be completed (the "Carve

Out Reorganization") so that, among other things, upon the completion of the PT Portugal Acquisition, PT Portugal shall no longer own any interests in the entities and assets or in the financing vehicle that are currently parts of the PT Portugal perimeter. In particular, the commercial paper and any other securities issued by Rio Forte Investments S.A shall not be included in the assets comprising the PT Portugal Group.

The consummation of the PT Portugal Acquisition is subject to certain conditions, including merger control from the European Commission (or from the Portuguese Competition Authority, under the referral mechanism set forth in the EU merger control rules) and relevant authorizations and clearances from the Portuguese ISP (*Instituto de Seguros de Portugal*).

The PT Portugal Acquisition is expected to be completed in the second quarter in 2015.

2014 SFR Acquisition

The 2014 SFR Acquisition was completed on November 27, 2014. Following the 2014 SFR Acquisition, the capital of the Numericable Group is owned as follows: (i) Vivendi: 20%, (ii) Altice France S.A.: approximately 60.3% and (iii) free float: approximately 19.7%. On November 27, 2014, the Issuer, Altice France S.A. and Vivendi entered into a shareholders' agreement governing the relationship between Altice France S.A. and Vivendi as shareholders of Numericable (the "Altice Vivendi Shareholders' Agreement"). For further details, refer to "*Description of Our Business—Material Contracts—Altice Vivendi Shareholders' Agreement*".

Virgin Mobile Acquisition

On December 4, 2014, the Altice France Group acquired 100% of Omer Telecom (the holding company of a telecom operator that provides services under the Virgin Mobile brand in France).

Merger between PTC and Meo, S.A.

On December 29, 2014, Meo, S.A. and PTC, the two most material subsidiaries in the PT Portugal Group merged with PTC as the surviving entity. PTC was renamed MEO—Serviços de Comunicações e Multimédia, S.A. ("PT OpCo"). For the avoidance of doubt, when we refer to "PTC" and "Meo, S.A." in a historical context, we are referring to PTC and Meo, S.A. as separate entities prior to the merger.

Merger between Altice France S.A. and Fiderman

On December 31, 2014, Fiderman SCA merged into Altice France S.A., with Altice France S.A. as the surviving entity.

Coditel

Proposed Merger

It is intended that each of Coditel Holding Lux S.à.r.l. and Coditel Holding Lux II S.à.r.l. will merge with and into Coditel Holding sometime in the first quarter of 2015, with Coditel Holding S.A. being the surviving entity once such merger has taken effect. Once such merger has taken effect we expect to cause Coditel Holding to accede as an additional guarantor in respect of indebtedness of the Senior Secured Notes Issuer and the Senior Notes Issuer (including the 2015 Senior Secured Notes).

Refinancing of the Existing Coditel Mezzanine Facility

The Existing Coditel Mezzanine Facility was refinanced on December 2, 2014 by €124 million (equivalent) of borrowings under the Existing Revolving Credit Facilities. We drew all of the 2013 Altice Financing Revolving Credit Facility and $56 million of the 2012 Altice Financing Revolving Credit Facility to repay the Existing Coditel Mezzanine Facility. On January 27, 2015, we repaid the $56 million outstanding under the 2012 Altice Financing Revolving Credit Facility. As of the date hereof, all of the 2013 Altice Financing Revolving Credit Facility has been drawn.

Our Principal Shareholders

Founded by telecom entrepreneur Patrick Drahi, Next L.P. is the principal shareholder of the Group with a shareholding of 56.8% of the Issuer's share capital. Next L.P. and its shareholders have significant experience identifying acquisition opportunities, structuring, financing and managing investments in the telecommunications industry, advising cable operators worldwide and creating value through operational excellence. Through Altice International and its subsidiaries, the Group has developed a strong presence in Israel, Portugal, Belgium, Luxembourg, Switzerland, the Dominican

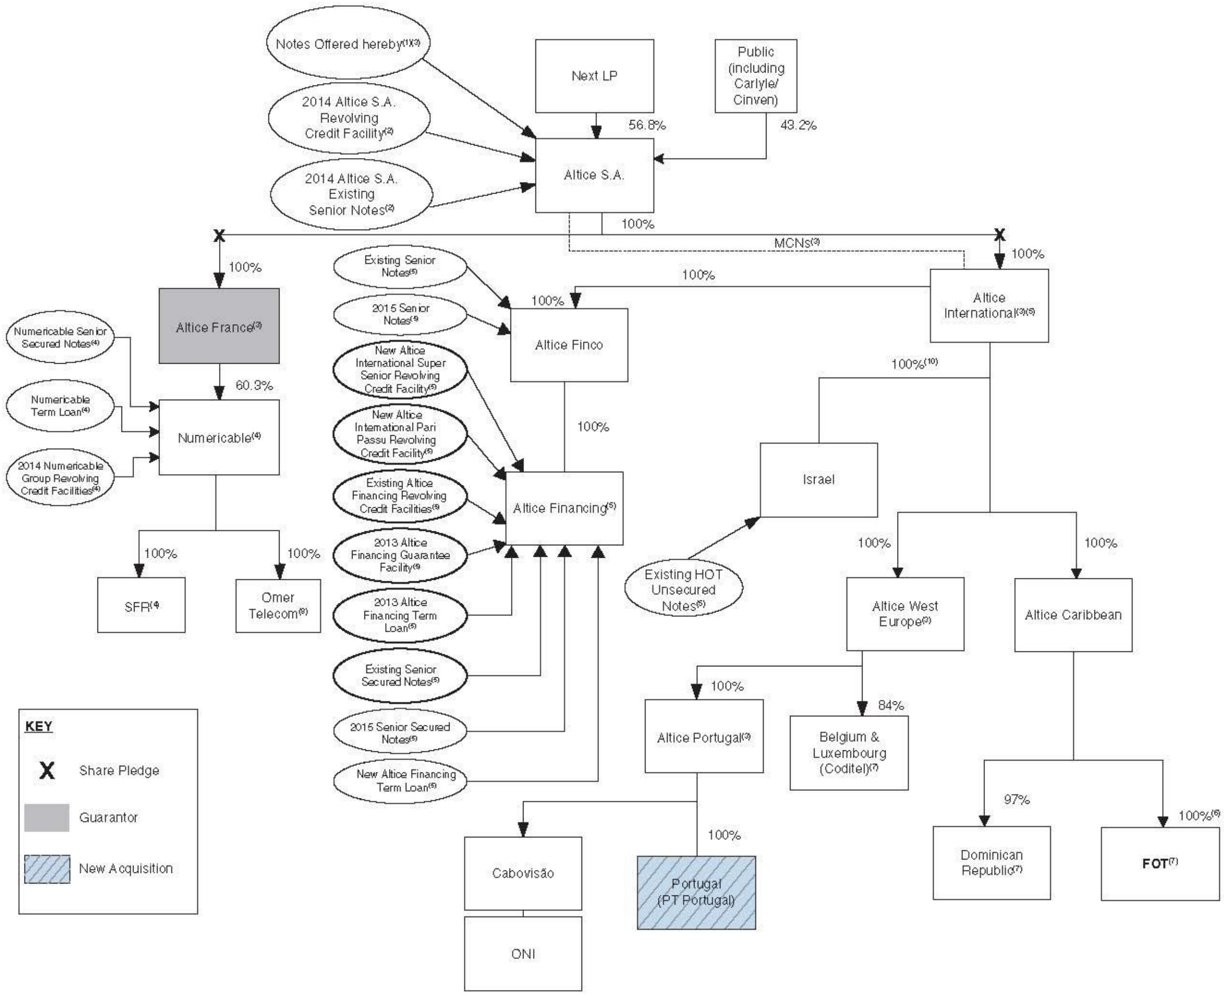
Republic and the French Overseas Territories. In addition, the Group has consolidated the cable and telecom market in France as a result of the roll up of the French cable and telecom market into the Numericable Group and Completel and, following the completion of the acquisition by the Numericable Group of SFR in November 2014, SFR.

The Issuer

The Issuer is a public limited liability company (*société anonyme*) incorporated under the laws of the Grand Duchy of Luxembourg, having its registered office at 3, Boulevard Royal, L-2449 Luxembourg and registered with the Luxembourg Trade and Companies Register under number B183391. The Issuer's business operations are limited to the management of the operating activities of the Group. The Issuer's ability to pay principal, interest and premium, if any, on the Notes is dependent, in large part, upon payments received from its subsidiaries. See "*The Transactions*" and "*Simplified Corporate and Financing Structure*" for more information.

SIMPLIFIED CORPORATE AND FINANCING STRUCTURE

The following diagram summarizes our expected corporate and financing structure after giving effect to the Transactions, including the offering of the Notes, the PT Portugal Acquisition and the application of the proceeds therefrom as described in "*The Transactions*" and "*Use of Proceeds*". The following is provided for indicative and illustration purposes only and should be read in conjunction with the information contained elsewhere in these Listing Particulars. For a summary of the debt obligations referred to in the following diagram, see "*Description of Notes*" and "*Description of Other Indebtedness*".



---

(1) In connection with the Transactions, the Issuer has issued €750 million in aggregate principal amount of the Euro Notes and $1,480 million in aggregate principal amount of the Dollar Notes. The Notes are senior obligations of the Issuer.

Pending satisfaction of the conditions to the release of the escrow proceeds as described in "*Description of Notes—Escrow of Proceeds; Special Mandatory Redemption*", the Initial Purchasers deposited the gross proceeds from the offering of the Notes into segregated escrow accounts for the benefit of the holders of the Notes. The escrow release conditions will be deemed to have been satisfied upon the delivery of an officer's certificate (the "Escrow Release Certificate") by the Issuer to the Escrow Agent stating that, among other things, the PT Portugal Acquisition Agreement shall not have been modified, amended or waived in any respect that is material and adverse to the holders of the Notes (subject to certain exceptions), the PT Portugal Acquisition Agreement remains in full force and effect and no insolvency related events have occurred with respect to the Issuer. If the conditions for the release of escrow proceeds are not satisfied prior to June 9, 2016 or upon the occurrence of certain other events, the Notes are subject to a special mandatory redemption at 100% of the principal amount plus accrued and unpaid interest and additional amounts, if any. The Indenture requires the Issuer to consummate the PT Portugal Acquisition promptly upon release of the escrow proceeds (other than a release for purposes of investing the escrow proceeds in accordance with the terms of the Escrow Agreement). Prior to the Completion Date, the Notes are guaranteed, but are secured by a first-ranking pledge over the assets in the Escrow Accounts (as defined herein) and the Issuer's rights under the Escrow Agreement (as defined herein).

(2) In connection with the 2014 Numericable Group Transactions, the Issuer entered into the €200 million "super senior" 2014 Altice S.A. Revolving Credit Facility Agreement and issued € 4,172 million (equivalent) in aggregate principal amount of the 2014 Senior Notes, each of which are senior obligations of the Issuer.

(3) On the Completion Date, the Notes will be senior obligations of the Issuer and guaranteed by Altice France S.A. and will benefit from first-ranking pledges over (i) all of the capital stock of Altice France S.A. and Altice International and (ii) the AI Mandatory Convertible Notes (the "Collateral").

Under the terms of the Altice S.A. Intercreditor Agreement, in the event of an enforcement of the Collateral, the holders of the Notes will receive proceeds from the Collateral only after the lenders under the 2014 Altice S.A. Revolving Credit Facility and counterparties to certain hedging agreements have been paid in full. Any proceeds received upon any enforcement over any Collateral, after all obligations under the Altice S.A. Revolving Credit Facility have been repaid and such hedging obligations have been discharged from such recoveries, will be applied pro rata in repayment of all obligations under the Indenture, the Notes, the 2014 Senior Notes and obligations under the 2014 Senior Notes Indenture and any other Indebtedness of the Issuer and the Guarantors permitted to be Incurred and secured by the Collateral on a pari passu basis pursuant to the Indenture and the Intercreditor Agreement. In addition, the security interests in the Collateral may be released under certain circumstances. See "*The Offering*", "*Risk Factors—Risks Relating to the Notes and the Structure*" and "*Description of Notes—Security*".

On or about the Completion Date, the Issuer will downstream the proceeds of the offering of the Notes by way of the AI Mandatory Convertible Notes into Altice International, which in turn will on-lend such proceeds to Altice Holding, which in turn will on-lend such proceeds (together with proceeds received from Altice Financing and Altice Finco from the proceeds of the issuance of the 2015 Senior Secured Notes and 2015 Senior Notes, borrowings under the New Altice Financing Term Loan and the amounts drawn under the New Altice International Super Senior Revolving Credit Facility) to Altice West Europe and then eventually to Altice Portugal for, amongst others, the payment of the purchase price under the PT Portugal Acquisition and fees and expenses related to the PT Portugal Acquisition.

(4) After giving effect to the 2014 Numericable Group Transactions, the Issuer indirectly owns approximately 60.3% of the common stock of Numericable which in turn owns all of the common stock of SFR (other than the 10 shares held by third parties). As part of the 2014 Numericable Group Transactions, Numericable issued the Numericable Senior Secured Notes and entered into the Numericable Term Loan Agreement and the 2014 Numericable Group Revolving Credit Facilities Agreement.

(5) Altice Finco has issued €903 million (equivalent) of senior notes and Altice Financing has issued €1,587 million (equivalent) of senior secured notes and has borrowed €813 million (equivalent) under the 2013 Altice Financing Term Loan. Altice Financing has also entered into the $80 million 2012 Altice Financing Revolving Credit Facility, the €80 million 2013 Altice Financing Revolving Credit Facility, the €15 million 2013 Guarantee Facility and the € 501 million New Altice International Pari Passu Revolving Credit Facility. We drew all of the 2013 Altice Financing Revolving Credit Facility and $56 million of the 2012 Altice Financing Revolving Credit Facility to repay the Existing Coditel Mezzanine Facility. On January 27, 2015, we repaid the $56 million outstanding under the 2012 Altice Financing Revolving Credit Facility. As of the date hereof, all of the 2013 Altice Financing Revolving Credit Facility has been drawn. In connection with the PT Portugal Acquisition, Altice Finco issued $385 million of its new senior notes and Altice Financing issued €2,317 million (equivalent) of its new senior secured notes and entered into the €330 million Altice Financing Super Senior Revolving Credit Facility and the €841 million (equivalent) New Altice Financing Term Loan. The Existing HOT Unsecured Notes are issued by HOT.

(6) Other than Altice West Europe and Altice Caribbean, Altice International owns directly or indirectly the following entities and therefore each of their subsidiaries: (a) HOT (Israel), (b) Cabovisão and ONI (Portugal), (c) Coditel Luxembourg and Coditel Belgium, (d) Outremer, La Cable and Mobius (French Overseas Territories), (e) Tricom and ODO (Dominican Republic), (f) Green (Switzerland), (g) Global Interlink (Bahamas), and (h) Ma Chaîne Sport and SportV (content).

(7) Our direct or indirect ownership percentage in these entities are: (a) HOT (100%), (b) Cabovisão and ONI (100%), (c) Coditel Luxembourg and Coditel Belgium (84%), (d) Outremer (99.85%), (e) Le Cable (99.85%), (f) Mobius (100%), (g) Tricom (97.2%), (h) ODO (97.2%), (i) Green (99.6%), (j) Global Interlink (100%), and (k) Ma Chaîne Sport and SportV (100%). After completion of the PT Portugal Acquisition, we will own 100% of the share capital of PT Portugal.

(8) On December 4, 2014, the Altice France Group acquired 100% of the shares of Omer Telecom (the holding company of a telecoms operator that provides services under the Virgin Mobile brand in France).

THE OFFERING

The summary below describes the principal terms of the Notes. Certain of the terms and conditions described below are subject to important limitations and exceptions. The "Description of Notes" section of these Listing Particulars contains a more detailed description of the terms and conditions of the Notes, including the definitions of certain terms used in this summary.

Issuer .... Altice S.A.

Notes Offered .... $1,480 million aggregate principal amount of 7⅝% senior notes due 2025 (the "Dollar Notes").

€750 million aggregate principal amount of 6¼% senior notes due 2025 (the "Euro Notes" and, together with the Dollar Notes, the "Notes").

Maturity Date

Dollar Notes.................................... February 15, 2025.

Euro Notes .... February 15, 2025.

Interest

Dollar Notes.................................... 7.625%.

Euro Notes .... 6.250%.

Interest Payment Dates .... Semi-annually in cash in arrears on each April 1 and October 1 commencing October 1, 2015. Interest will accrue from the Issue Date.

Denomination .... The Dollar Notes are in denominations of $200,000 and any integral multiples of $1,000 above $200,000. Dollar Notes in denominations of less than $200,000 are not available. The Euro Notes are in denominations of €100,000 and any integral multiples of €1,000 in excess of €100,000. Euro Notes in denominations of less than €100,000 are not available.

Issue Price

Dollar Notes.................................... 100.000% plus accrued interest, if any, from the Issue Date.

Euro Notes .... 100.000% plus accrued interest, if any, from the Issue Date.

Ranking of the Notes

Notes... The Notes:

- are general obligations of the Issuer;
- will be secured as set forth under "—*Security*";
- rank pari passu in right of payment with any existing or future indebtedness of the Issuer that is not subordinated in right of payment to the Notes, including Indebtedness under the 2014 Altice S.A. Revolving Credit Facility, the 2014 Senior Notes and certain hedging obligations;
- rank senior in right of payment to any existing or future indebtedness of the Issuer that is expressly subordinated in right of payment to the Notes;
- will be effectively subordinated to any existing or future indebtedness of the Issuer that is secured by property or assets that do not secure the Notes, to the extent of the value of the property and assets securing such Indebtedness; and
- will be effectively subordinated to all existing and future Indebtedness of the Issuer's Subsidiaries that do not guarantee the Notes.

Ranking of the Guarantee

Notes... The Notes have not been guaranteed on the Issue Date. Upon the release of the proceeds of the offering of the Notes from the applicable Escrow Accounts, the Notes will be guaranteed by Altice France S.A.

On the Completion Date, the Guarantee of Altice France S.A. will:

- be a general obligation of the Guarantor;

- rank pari passu in right of payment with any existing or future indebtedness of the Guarantor that is not subordinated in right of payment to the Guarantee, including Altice France's Guarantee under the 2014 Altice S.A. Revolving Credit Facility, the 2014 Senior Notes and certain hedging obligations;
- rank senior in right of payment to any existing or future indebtedness of the Guarantor that is expressly subordinated in right of payment to the Guarantee;
- be effectively subordinated to any existing or future indebtedness of the Guarantor that is secured by property or assets that do not secure the Guarantee, to the extent of the value of the property and assets securing such Indebtedness; and
- be effectively subordinated to all existing and future indebtedness of the Guarantor's Subsidiaries that do not guarantee the Notes.

Security.. As of the Issue Date, the Notes were secured by a security interest over the rights of the Escrow Agent under the Escrow Agreement and the assets in the Escrow Accounts, as applicable. On the Completion Date, the Notes will be secured by a pledge over all of the share capital of each of Altice International and Altice France and a pledge over the AI Mandatory Convertible Notes.

Escrow of Proceeds; Special Mandatory Redemption........... The Initial Purchasers, concurrently with the closing of the offering of the Notes on the Issue Date, deposited the gross proceeds of the Notes into segregated escrow accounts (the "Escrow Accounts") pursuant to the terms of the Escrow Agreement, pending satisfaction of the conditions to the release of the escrow proceeds as set forth in "*Description of Notes—Escrow of Proceeds; Special Mandatory Redemption*". The Escrow Accounts are controlled by the Escrow Agent, and pledged on a first ranking basis in favor of the Trustee on behalf of the holders of the Notes.

If the conditions to the release of the escrow proceeds as set forth in "*Description of Notes—Escrow of Proceeds; Special Mandatory Redemption*" are not satisfied prior to June 9, 2016 or upon the occurrence of certain other events, the applicable Notes are subject to a special mandatory redemption at a price equal to 100% of the initial issue price of each such Note plus accrued and unpaid interest and additional amounts, if any, from the Issue Date. See "*The Transactions—Financing of the Numericable Group Transactions*" and "*Description of Notes—Escrow of Proceeds; Special Mandatory Redemption*".

The Indenture requires the Issuer to consummate the PT Portugal Acquisition promptly upon release of the escrow proceeds (other than a release for purposes of investing the escrow proceeds in accordance with the terms of the Escrow Agreement).

Change of Control........................ Following a change of control as defined in the Indenture at any time, the Issuer is required to offer to repurchase the Notes at 101% of their aggregate principal amount, plus accrued and unpaid interest and additional amounts, if any, to the date of the purchase. See "*Description of Notes—Change of Control*".

Optional Redemption.................. Prior to February 15, 2020, the Issuer may redeem all or a portion of the Notes at a price equal to 100% of the principal amount plus a make whole premium. The Issuer may redeem some or all of the Notes at any time on or after, February 15, 2020, at a redemption price equal to their principal amount plus a premium, accrued and unpaid interest and additional amounts, if any. See "*Description of Notes—Optional Redemption*".

In addition, prior to February 15, 2018, the Issuer may redeem up to 40% of the aggregate principal amount of each series of the Notes with the proceeds of certain public or private equity offerings at a redemption price equal to 107.625% of the principal amount of the Dollar Notes and 106.250% of the principal amount of the Euro Notes, plus, in each case, accrued and unpaid interest and additional amounts, if any, to the redemption date, provided that at least 60% of the original aggregate principal amount of each series of the Notes remains outstanding after the redemption and the redemption occurs within 180 days after the closing of such equity offering. See "*Description of Notes—Optional Redemption*".

Additional Amounts; Tax All payments made under or in respect of the Notes or the Guarantee will be made

Redemption	without withholding or deduction for any taxes, except to the extent required by law. If such withholding or deduction is required by law in any relevant tax jurisdiction, the Issuer or the Guarantor will pay additional amounts so that the net amount received by each holder is no less than that which it would have received in the absence of such withholding or deduction. See "*Description of Notes—Withholding Taxes*". In the event of certain developments affecting taxation or certain other circumstances, the Issuer may redeem the relevant Notes in whole, but not in part, at any time, at a redemption price of 100% of the principal amount, plus accrued and unpaid interest, if any, and additional amounts, if any, to the date of redemption. See "*Description of Notes—Redemption for Changes in Withholding Taxes*".
Certain Covenants	The Issuer has issued the Notes under the Indenture. The Indenture limits, among other things, the ability of the Issuer and its restricted subsidiaries, as applicable, to: • incur or guarantee additional indebtedness; • make investments or other restricted payments; • create liens; • sell assets and subsidiary stock; • pay dividends or make other distributions or repurchase or redeem our capital stock or subordinated debt; • engage in certain transactions with affiliates; • enter into agreements that restrict the payment of dividends by subsidiaries or the repayment of intercompany loans and advances; and • engage in mergers or consolidations. These covenants are subject to a number of important exceptions and qualifications. For more details, see "*Description of Notes—Certain Covenants*".
Transfer Restrictions.....................	The Notes and the Guarantees have not been, and will not be, registered under the U.S. Securities Act or the securities laws of any other jurisdiction. The Notes are subject to restrictions on transfer and may only be offered or sold in transactions that are exempt from or not subject to the registration requirements of the U.S. Securities Act. See "*Transfer Restrictions*" and "*Plan of Distribution*".
Absence of a Public Market for the Notes	The Notes are new securities for which there is currently no market. Although the Initial Purchasers have informed the Issuer that they intend to make a market in the Notes, they are not obligated to do so and they may discontinue market making at any time without notice. Accordingly, the Issuer cannot assure you that a liquid market for the Notes will develop or be maintained.
Use of Proceeds	The gross proceeds from the sale of the Notes were deposited into the Escrow Accounts for the benefit of the relevant holders of the Notes and the Trustee, pending satisfaction of the conditions to release such proceeds. On or prior to the Completion Date, the Escrow Agent will transfer to the Issuer the gross proceeds from each of the Dollar Notes and the Euro Notes. See "*Description of Notes—Escrow of Proceeds; Special Mandatory Redemption*". Subject to the conditions to the release of the escrow proceeds as set forth in "*Description of Notes—Escrow of Proceeds; Special Mandatory Redemption*", the Issuer is expected to use the proceeds of the Notes as set out under "*Use of Proceeds*". The Indenture requires the Issuer to consummate the PT Portugal Acquisition promptly upon release of the escrow proceeds.
Listing	Application has been made for the Notes to be admitted to listing on the Official List of the Luxembourg Stock Exchange and to trading on the Euro MTF Market of the Luxembourg Stock Exchange. See "*Description of Notes—Certain Covenants—Maintenance of Listing*".
Trustee	Deutsche Bank AG, London Branch.
Principal Paying Agent..................	Deutsche Bank AG, London Branch.

Euro Transfer Agent and Euro Registrar	Deutsche Bank Luxembourg S.A.
US Paying Agent, US Transfer Agent and US Registrar	Deutsche Bank Trust Company Americas.
Security Agent	Deutsche Bank AG, London Branch.
Governing Law	The Indenture and the Notes are governed by the laws of the State of New York. The Altice S.A. Intercreditor Agreement is governed by the laws of England and Wales. The security documents governing the Collateral are governed by and construed in accordance with the laws of the Grand Duchy of Luxembourg. See "*Description of Notes—Notes Security*". The application of the provisions set out in Articles 86 to 94 8 of the Luxembourg law dated August 10, 1915 on commercial companies, as amended, is excluded.
Risk Factors	Please see "Risk Factors" for a description of certain of the risks you should carefully consider before investing in the Notes.
Certain U.S. Federal Income Tax Considerations	The Dollar Notes or the Euro Notes may be treated as having been issued with original issue discount for U.S. federal income tax purposes. An obligation generally is treated as having been issued with original issue discount if its stated principal amount exceeds its issue price by at least a defined de minimis amount. If a Note is treated as issued with original issue discount, investors subject to U.S. federal income tax will be subject to tax on that original issue discount as ordinary income as it accrues, in advance of the receipt of cash payments attributable to that income (and in addition to qualified stated interest). See "*Tax Considerations—Certain U.S. Federal Income Tax Considerations*".
Certain ERISA Considerations	The Notes and any interest therein may, subject to certain restrictions described herein under "Certain Employee Benefit Plan Considerations", be sold and transferred to ERISA Plans (as defined in these Listing Particulars). See "*Certain Employee Benefit Plan Considerations*".

SUMMARY FINANCIAL INFORMATION AND OTHER DATA

Basis of Presentation

The Issuer is the holding company of the Group. Prior to the 2014 Numericable Acquisition (which was completed in February 2014) and the 2014 SFR Acquisition (which was completed in November 2014), the primary assets of the Group consisted of Altice International, a wholly-owned subsidiary of the Issuer and a holding company (which, since its formation in 2008, has from time to time made significant equity investments in a number of cable, media and telecommunication businesses in various jurisdictions), and its subsidiaries and the equity interests held by Altice France S.A., a wholly-owned subsidiary of the Issuer, in the Numericable Group prior to such date (which are accounted for in the Historical Consolidated Financial Information of the Issuer (as defined below) prior to the 2014 Numericable Acquisition using the equity method). The following is a summary of the key investments and disposals made through Altice International since 2011, which have had a significant impact on the Historical Consolidated Financial Information of the Issuer and Historical Consolidated Financial Information of Altice International (as defined below).

During the year ended December 31, 2011, Altice International, made the following acquisitions that fundamentally changed the business undertaking: (i) in the first quarter of 2011, Altice International increased its ownership in HOT-Telecommunication Systems Ltd. (together with its subsidiaries but excluding HOT Mobile Ltd., the "HOT Telecom Group") thereby acquiring a majority equity ownership in the HOT Telecom Group (as a result of which the financial information of the HOT Telecom Group is consolidated in the Historical Consolidated Financial Information with effect from March 16, 2011). In addition, in the fourth quarter of 2011, MIRS Communications Ltd. (an Israeli mobile services provider that was subsequently renamed HOT Mobile Ltd.) was acquired by the HOT Telecom Group from a subsidiary of Altice International and renamed HOT Mobile Ltd (the HOT Telecom Group and HOT Mobile Ltd. are collectively referred to herein as the "HOT Group"); and (ii) in the second quarter of 2011, Altice International acquired a controlling equity interest in Coditel Brabant S.p.r.l, a company with cable television operations in Belgium and Coditel S.à r.l., a company with cable television operations in Luxembourg, in each case, through an intermediate holding company, Coditel Holding S.A. (the financial information of which is consolidated in the Historical Consolidated Financial Information with effect from July 1, 2011). In addition, Altice International sold 5% of its equity interest in MIRS Communications Limited during the course of 2011.

The year ended December 31, 2012 was marked by the following two significant acquisitions by Altice International: (i) in the first quarter of 2012, Altice International acquired approximately 60% of the equity interests in Cabovisão, a Portuguese telecommunications company (the financial information of which is consolidated in the Historical Consolidated Financial Information with effect from February 29, 2012); and (ii) in the fourth quarter of 2012, Altice International completed the take-private transaction of the HOT Group whereby it acquired substantially all of the equity interests in HOT-Telecommunication Systems Ltd. it did not previously own.

The Issuer, through Altice International added to its portfolio of holdings in 2013 with the following acquisitions: (i) in the first quarter of 2013, Altice International acquired substantially all of the equity interests in Cabovisão that it did not already own; (ii) in the third quarter of 2013, Altice International acquired a controlling equity interest in Groupe Outremer Telecom S.A., a telecommunications company with operations in the French Overseas Territories (the financial information of which is consolidated in the Historical Consolidated Financial Information with effect from July 5, 2013); and (iii) in the third quarter of 2013, Altice International (through its subsidiary Cabovisão) acquired 100% of the equity interests in Winreason, the owner of Portuguese telecommunications holding company ONI S.G.P.S. and its subsidiaries (the financial information of which is consolidated in the Historical Consolidated Financial Information with effect from August 8, 2013) and (iv) in November 2013, Altice International acquired further equity interests in Coditel pursuant to the 2013 Coditel Acquisition. In addition, in 2013, we disposed of our interests in Valvision S.A.S. ("Valvision") and acquired Ma Chaîne Sport and SportV. During 2013, Altice International also initiated its equity investment in Wananchi ("Wananchi"), a Kenyan cable operator.

In 2014, Altice International consummated the acquisitions of (i) Tricom (the financial information of which is consolidated in the Historical Consolidated Financial Information of Altice International with effect from March 12, 2014), (ii) ODO (the financial information of which is consolidated in the Historical Consolidated Financial Information of with effect from April 9, 2014) and (iii) Mobius (the financial information of which is consolidated in the Historical Consolidated Financial Information with effect from January 1, 2014). On March 11, 2014, we entered into arrangements pursuant to which Altice Carribean, acquired a substantial proportion of the minority interests in Altice Blue Two (which owns 96% of Outremer, the remaining interest being owned by the Issuer) in exchange for ordinary shares of the Issuer and Altice Caribbean Warrants. On November 27, 2014, the Issuer, through Numericable (previously known as Numericable Group S.A.), completed the acquisition of SFR from Vivendi. In addition, in connection with the acquisition of SFR by Numericable, we entered into a commitment with the French Competition Authority to dispose of the mobile network assets of OMT in Mayotte and La Réunion (which are part of the French Overseas Territories). If this disposal is not completed by mid-2015, we are committed to appoint an independent agent (who must be approved by the French Competition Authority) to complete such disposal. Further, we have undertaken to ensure that the OMT mobile assets in La Réunion and in Mayotte mentioned above are managed independently from the other activities of the Altice France Group (including those of SFR). On December 4, 2014, the Issuer, through the Altice France Group, completed the acquisition of 100% of Omer Telecom, a telecom operator which provides services through the Virgin Mobile brand. For the avoidance of doubt, the disclosures and financial information (including the Pro Forma Financial Information) presented in these Listing Particulars do not include Omer Telecom.

On December 9, 2014, we entered into an agreement with Oi S.A. to purchase 100% of the issued share capital of PT Portugal.

As a result of the series of these significant acquisitions that have been consummated by Altice International since 2011, and the intra-year timing of such acquisitions, the Historical Consolidated Financial Information of the Issuer and the Historical Consolidated Financial Information of Altice International do not consolidate the results of operations of the entire business undertaking of the Group or of the Altice International Group as it exists at the date of these Listing Particulars for any of the periods presented and the comparability of the Historical Consolidated Financial Information of the Issuer or the Historical Consolidated Financial Information of Altice International, as the case may be, over each of the periods presented may be significantly limited. Therefore, in order to facilitate an understanding of the Group's and Altice International Group's, as the case may be, results of operations and financial condition, the tables below set forth:

(i) summary selected Historical Consolidated Financial Information of the Issuer derived from the (a) the unaudited condensed consolidated financial statements of the Issuer as of September 30, 2014 and for the three and nine months ended September 30, 2014, prepared in accordance with IAS 34, which have been reviewed by Deloitte Audit S.à.r.l.; and (b) audited consolidated financial statements of the Issuer as of and for the year ended December 31, 2013 and the audited combined financial statements of the Issuer as of and for the years ended December 31, 2010, 2011 and 2012, prepared in accordance with IFRS, which have been audited by Deloitte Audit S.à r.l.;

(ii) unaudited summary selected historical financial information of ODO derived from the audited standalone financial statements of ODO as of and for the years ended December 31, 2012 and 2013 and the unaudited stand-alone historical financial statements of ODO as of and for the nine months ended September 30, 2013 (and with respect to information relating to the nine months ended September 30, 2014, derived from the Historical Consolidated Financial Information of the Issuer as of and for the nine months ended September 30, 2014);

(iii) unaudited summary PT Portugal Combined Selected Financial Information as of and for the years ended December 31, 2011, 2012 and 2013 and the nine months ended September 30, 2013 and 2014;

(iv) summary selected Historical Financial Information of SFR as of and for the years ended December 31, 2011, 2012 and 2013 and the nine months ended September 30, 2013 and 2014;

(v) summary selected Numericable Group Financial Information as of and for the years ended December 31, 2011, 2012 and 2013 and the nine months ended September 30, 2013 and 2014;

(vi) summary Illustrative Aggregated Selected Financial Information of Altice International as of and for the years ended December 31, 2011 and 2012 (which does not aggregate the results of ODO, Tricom, Mobius Group, PT Portugal, Numericable Group (which is not within Altice International's scope of consolidation), or SFR (which is not within Altice International's scope of consolidation));

(vii) summary selected Pre-PT/ODO Transactions Pro Forma Financial Information of Altice International derived from the Pro Forma Financial Information of Altice International (giving effect to each significant acquisition by Altice International but excluding the ODO Acquisition, the PT Portugal Acquisition, the 2014 Numericable Acquisition (which is not within Altice International's scope of consolidation), the 2014 SFR Acquisition (which is not within Altice International's scope of consolidation) and the disposal of our mobile network assets in Mayotte and La Réunion which we have committed to undertake and, except as described elsewhere in these Listing Particulars, the Mobius Acquisition and the Tricom Acquisition) as of and for the year ended December 31, 2013;

(viii) summary selected Pre-PT Transaction Pro Forma Financial Information of Altice International derived from the Pro Forma Financial Information of Altice International (giving effect to each such significant acquisition by Altice International, including the ODO Acquisition) but not the PT Portugal Acquisition, the 2014 Numericable Acquisition (which is not within Altice International's scope of consolidation), the 2014 SFR Acquisition (which is not within Altice International's scope of consolidation), the disposal of our mobile network assets in Mayotte and La Réunion which we have committed to undertake or, except as described elsewhere in these

Listing Particulars, the Mobius Acquisition or the Tricom Acquisition) as of and for the nine months ended September 30, 2013 and 2014;

(ix) summary selected Post Transaction Pro Forma Financial Information derived from the Pro Forma Financial Information of the Issuer (giving effect to each such significant acquisition by the Issuer including the ODO Acquisition, the 2014 Numericable Acquisition, the 2014 SFR Acquisition and the PT Portugal Acquisition) (but not the disposal of our mobile network assets in Mayotte and La Réunion which we have committed to undertake or, except as described elsewhere in these Listing Particulars, not the Mobius Acquisition or the Tricom Acquisition) as of and for the year ended December 31, 2013, and as of and for the nine months ended September 30, 2013 and 2014; and

(x) summary selected Altice Group Pro Forma Financial Information derived from the Pro Forma Financial Information of the Issuer, reflecting the financial information of Numericable after giving effect to the 2014 SFR Acquisition.

For further details regarding the basis of preparation of the Illustrative Aggregated Selected Financial Information, the PT Portugal Combined Selected Financial Information and the Pro Forma Financial Information, please see Note 1 to the Illustrative Aggregated Selected Financial Information, Notes to the PT Portugal Combined Selected Financial Information and Note 2 to the Pro Forma Financial Information included elsewhere in these Listing Particulars. The Illustrative Aggregated Selected Financial Information, the PT Portugal Combined Selected Financial Information and the Pro Forma Financial Information included in these Listing Particulars have not been prepared in accordance with the requirements of Regulation S-X of the U.S. Securities Act, the EU Prospectus Directive, or any generally accepted accounting standards. Neither the assumptions underlying the adjustments nor the resulting aggregated financial information have been audited or reviewed in accordance with any generally accepted auditing standards. The Illustrative Aggregated Selected Financial Information, the PT Portugal Combined Selected Financial Information and the Pro Forma Financial Information are subject to significant limitations. See "*Presentation of Financial and Other Information" and "Risk Factors—The Pro Forma Financial Information, the Illustrative Aggregated Selected Financial Information, the Historical Consolidated Financial Information and the PT Portugal Combined Selected Financial Information presented in these Listing Particulars may not reflect what our actual results of operations and financial condition would have been had we been a combined company for the periods presented and thus these results may not be indicative of our future operating performance. The Illustrative Aggregated Selected Financial Information, the PT Portugal Combined Selected Financial Information and the Pro Forma Financial Information included herein are subject to certain signification assumptions and limitations*".

The summary financial information presented below should be read together with the Historical Consolidated Financial Information, the Illustrative Aggregated Selected Financial Information, the Pro Forma Financial Information, and the PT Portugal Combined Selected Financial Information including, in each case, the accompanying notes, included elsewhere in these Listing Particulars.

(1) The Illustrative Aggregated Selected Financial Information does not aggregate the financial information of Tricom, ODO, Mobius, Numericable Group (which is not within Altice International's scope of consolidation), SFR (which is not within Altice International's scope of consolidation), and PT Portugal. For details, see "*Illustrative Aggregated Selected Financial Information of Altice International*". We do not present any Illustrative Aggregated Selected Financial Information below the line item operating income before depreciation and amortization.

(2) The Pre-PT/ODO Transactions Pro Forma Financial Information does not give pro forma effect to the acquisition of ODO, Tricom, Mobius, Numericable Group (which is not within Altice International's scope of consolidation), SFR (which is not within Altice International's scope of consolidation) or PT Portugal for the year ended December 30, 2013. For details, see "*Pro Forma Financial Information of the Group*". Pro Forma Financial Information does not give pro forma effect to the disposal of our mobile network assets in Mayotte and La Réunion which we have committed to undertake.

(3) EBITDA is defined as operating profit before depreciation and amortization, goodwill impairment, other expenses, net, management fees and restructuring and other non-recurring costs.

(4) Equity-based compensation consists of expenses pertaining to employee stock options provided to employees in Israel.

(5) Adjusted EBITDA is defined as EBITDA before equity based compensation expenses. Adjusted EBITDA is unaudited. We believe that these measures are useful to readers of our financial as it provides them with a measure of the operating results which excludes certain items we consider outside of our recurring operating activities or that are non-cash, making trends more easily observable and providing information regarding our operating results and cash flow generation that allows investors to better identify trends in its financial performance. Adjusted EBITDA should not be considered as a substitute measure for operating income and may not be comparable to similarly titled measures used by other companies. "Adjusted EBITDA" of Altice International presented herein corresponds to "EBITDA" as reported by Altice International for financial reporting purposes as of September 30, 2014.

(6) Others includes our B2B telecommunications solutions business and datacenter operations in Switzerland (Green and Green Datacenter), our datacenter operations in France (Auberimmo) and our content production and distribution businesses in France and Luxembourg (Ma Chaîne Sport and SportV). For the nine months ended September 30, 2014, it also includes the contribution made by Tricom from March 12, 2014. We disposed of our interests in Valvision in 2013 (which was included in Others). Green Datacenter and Auberimmo are designated as unrestricted subsidiaries under the terms governing the indebtedness of the Group. Valvision's and Auberimmo's contribution to our revenue and EBITDA was not material. In each of the years ended December 31, 2011, 2012 and 2013, Green Datacenter contributed

€4.3 million, €10.3 million and € 12.4 million to aggregated and pro forma revenues and €3.6 million, €9.0 million and €10.2 million to aggregated and pro forma EBITDA. For the nine months ended September 30, 2013 and 2014, Green Datacenter contributed €8.8 million and €8.2 million to pro forma revenue and €7.6 million and €6.9 million to pro forma EBITDA, respectively.

(7) The Pre-PT Transaction Pro Forma Financial Information, among other things, gives pro forma effect to the acquisition of ODO. It does not give pro forma effect to the PT Portugal Acquisition, the acquisition of Tricom or Mobius, the 2014 Numericable Acquisition (which is outside the scope of Altice International's consolidation), the 2014 SFR Acquisition (which is outside the scope of Altice International's consolidation) nor the disposal of our mobile network assets in Mayotte and La Réunion which we have committed to undertake, but includes the contribution of Tricom and Mobius from March 12, 2014, and January 1, 2014, respectively, following their consolidation into the Historical Consolidated Financial Information. For details, see "*Pro Forma Financial Information*".

(8) Excludes Tricom.

(9) Also includes the contribution of Mobius.

(10) LTM ended September 30, 2014 is calculated by (i) adding the revenue, EBITDA or Adjusted EBITDA or other applicable line item for the nine months ended September 30, 2014 and the year ended December 31, 2013 and (ii) subtracting the revenue, EBITDA or Adjusted EBITDA or other applicable line item for the nine months ended September 30, 2013 from such sum.

(11) For the purposes of the LTM ended September 30, 2014, only, pro forma effect is given to the acquisition of Tricom, including the non-consolidated portion of Tricom prior to Tricom's consolidation into the Historical Consolidated Financial Information of Altice International from March 12, 2014, which is accounted for under "Tricom adjustment", and the contribution of Tricom from March 12, 2014, following its consolidation into the Historical Consolidated Financial Information of Altice International.

ODO

The following table sets forth the revenues and EBITDA based on historical financial statements of ODO, other than the information for the nine months ended September 30, 2014 which has been derived from the Historical Consolidated Financial Information of Altice International.

	For the year ended December 31,			For the nine months ended September 30,		
	2011	**2012**	**2013**	**2013**	**2014**	**LTM ended September 30[(1)] 2014**
	€ in millions					
Revenue						
Dominican Republic (ODO)........	417.1	457.4	446.6	333.6	327.4	440.1
EBITDA						
Dominican Republic (ODO)........	—	166.7	173.0	131.7	150.0	191.3

(1) LTM ended September 30, 2014 is calculated by (i) adding the revenue, or EBITDA for the nine months ended September 30, 2014 and the year ended December 31, 2013 and (ii) subtracting the revenue, or EBITDA for the twelve months ended September 30, 2013 from such sum.

PT Portugal

(1) The Altice International Post-Transaction Pro Forma Financial Information, among other things, gives pro forma effect to the acquisition of ODO and PT Portugal. It does not give pro forma effect to the acquisition of Tricom or Mobius but includes the contribution of Tricom and Mobius from March 12, 2014, and January 1, 2014, respectively, following their consolidation into the Historical Consolidated Financial Information of Altice International. For details, see "*Pro Forma Financial Information of Altice International*". Post-Transaction Pro Forma Financial Information does not give pro forma effect to the disposal of our mobile network assets in Mayotte and La Réunion which we have committed to undertake.

(2) Also includes "staff costs and employee benefits expenses" which is presented as a separate line item on the Group's consolidated statement of income.

(3) Further referred to as EBITDA.

Altice France Group (Numericable Group and SFR)

The following table sets forth the revenues and Adjusted EBITDA based on historical financial statements of Numericable Group and SFR, and the Altice France Group Pro Forma Financial Information.

Altice France Group Pro Forma Financial Information contains intercompany and pro-forma adjustments that do not refer to Numericable-SFR S.A. only, but also include other adjustments relating to the Altice S.A. perimeter. Had Numericable-SFR S.A. prepared Pro Forma Financial Information at its level, there would have been differences between the figures. As such, Altice France Group Pro Forma Financial Information is not and should not be considered, for any period, as the Numericable-SFR Pro Forma Financial Information.

Synergies									350.0
Intercompany adjustments									(6.4)
Pro Forma Adjusted EBITDA (France) (including Pro Forma Synergies)[6]									**3,562.7**

(1) Adjusted EBITDA is defined by the Altice Group as operating income before depreciation and amortization, goodwill impairment, management fees, other expenses, net and reorganization and non recurring costs. Adjusted EBITDA includes an add back for equity based compensation and CVAE, a business tax levied in France. We believe that these measures are useful to readers of our financial as it provides them with a measure of the operating results which excludes certain items we consider outside of our recurring operating activities or that are non cash, making trends more easily observable and providing information regarding our operating results and cash flow generation that allows investors to better identify trends in its financial performance. Adjusted EBITDA should not be considered as a substitute measure for operating income and may not be comparable to similarly titled measures used by other companies (including the Altice France Group).

(2) The Numericable Group has applied IAS 19 Employee benefits (revised) ("IAS 19R") from January 1, 2013, recognizing actuarial gains and losses in "other comprehensive income". The application of IAS 19R has resulted in a change in accounting policy that has been applied retrospectively thus resulting in adjusting the comparative financial information for the year ended December 31, 2012. The information presented in the tables above for the year ended December 31, 2011 does not reflect the application of IAS 19R. Please refer to Note 1.3 to the audited consolidated financial statements for the Numericable Group as of and for the year ended December 31, 2013 for a description of this change in accounting policy and the related impact.

(3) For the year ended December 31, 2013 and the nine months ended September 30, 2013 and 2014 respectively, includes an add back for CVAE (Cotisation sur la Valeur Ajoutée des Entreprises) amounting to € 53 million, €40.7 million and €46.2 million respectively. Adjusted EBITDA for nine months ended September 30, 2014, excludes a non-recurring charge of €196 million in relation to certain litigation matters disclosed in the financial statements of SFR, SIG 50 and their subsidiaries at September 30, 2014, December 31, 2013, 2012 and 2011.

(4) Includes (€44.8 million) in intercompany adjustments.

(5) Excludes (€1.6 million) in intercompany adjustments.

(6) For a reconciliation of Total France EBITDA to Pro Forma Adjusted EBITDA (France), see "*Summary Financial Information and Other Data—Pro Forma Adjusted EBITDA*".

(7) LTM ended September 30, 2014 is calculated by (i) adding the revenue, EBITDA or Adjusted EBITDA or other applicable line item for the nine months ended September 30, 2014 and the year ended December 31, 2013 and (ii) subtracting the revenue, EBITDA or Adjusted EBITDA or other applicable line item for the nine months ended September 30, 2013 from such sum.

(1) The Post-Transaction Pro Forma Financial Information, among other things, gives pro forma effect to the acquisition of ODO (which is included under "Dominican Republic"), the Numericable Group (which is included under "Numericable Group"), SFR (which is included under "SFR"), and PT Portugal (which is included under "Portugal"). Save for the LTM column, it does not give pro forma effect to the acquisition of Tricom or Mobius but includes the contribution of Tricom and Mobius from March 12, 2014, and January 1, 2014, respectively. For details, see "*Pro Forma Financial Information of the Group*". Post-Transaction Pro Forma Financial Information does not give pro forma effect to the disposal of our mobile network assets in Mayotte and La Réunion which we have committed to undertake. Altice International EBITDA derived from the Post-Transaction Pro Forma Financial Information may vary by insignificant amounts compared to the corresponding amounts derived from the Pro Forma Financial Information of Altice International due to certain holding

company expenses incurred by Altice S.A. For details, see "*Presentation of Financial and Other Information—Pro Forma Financial Information*".

(2) LTM ended September 30, 2014 is calculated by (i) adding the revenue, EBITDA or Adjusted EBITDA or other applicable line item for the nine months ended September 30, 2014 and the year ended December 31, 2013 and (ii) subtracting the revenue, EBITDA or Adjusted EBITDA or other applicable line item for the nine months ended September 30, 2013 from such sum.

(3) Includes ODO but excludes Tricom.

(4) Others includes our B2B telecommunications solutions business and datacenter operations in Switzerland (Green and Green Datacenter), our datacenter operations in France (Auberimmo) and our content production and distribution businesses in France and Luxembourg (Ma Chaîne Sport and SportV). For the nine months ended September 30, 2014, it also includes the contribution made by Tricom from March 12, 2014. We disposed of our interests in Valvision in 2013 (which was included in Others) to the Numericable Group. Green Datacenter and Auberimmo are designated as unrestricted subsidiaries under the terms governing the indebtedness of the Group. Valvision's and Auberimmo's contributions to our revenue and EBITDA was not material. In each of the years ended December 31, 2011, 2012 and 2013, Green Datacenter contributed €4.3 million, €10.3 million and €12.4 million to aggregated and pro forma revenues and €3.6 million, €9.0 million and €10.2 million to aggregated and pro forma EBITDA. For the nine months ended September 30, 2013 and 2014, Green Datacenter contributed €8.8 million and € 8.2 million to pro forma revenue and €7.6 million and € 6.9 million to pro forma EBITDA, respectively. This also includes the contribution made by Tricom from March 12, 2014.

(5) EBITDA is defined as operating profit before depreciation and amortization, other expenses, net, management fees and restructuring and other non-recurring costs. We believe that this measure is useful to readers of our financial information as it provides them with a measure of the operating results which excludes certain items we consider outside of our recurring operating activities or that are non-cash, making trends more easily observable and providing information regarding our operating results and cash flow generation that allows investors to better identify trends in its financial performance. EBITDA should not be considered as a substitute measure for operating income and may not be comparable to similarly titled measures used by other companies (including for the Numericable Group and SFR).

(6) Gives effect to certain synergies expected to result over time from the 2014 Numericable Group Transactions, including (i) network synergies, which include the elimination of unbundling fees paid to Orange for access to the local loop in areas where the Numericable Group has fixed network coverage, closure of Completel's B2B DSL network, replaced by SFR's nationwide DSL network and optimization of SFR's backhaul on the Numericable Group's network, (ii) B2C synergies, which includes the overall simplification of the Altice France Group's product offering, sales and distribution and the sale of premium pay television and other services to SFR's existing customer base, (iii) B2B synergies, which includes improvements of the commercial and operational efficiency through strong economies of scale, redeployment of the B2B sales force in order to address new potential clients that are not currently covered by the Altice France Group and targeted churn reduction and (iv) other operational synergies, which includes expected savings from the combination of the information systems, financial control and accounting, customer service, sales operations, marketing and branding costs and technical costs of the Altice France Group. We may not be able to achieve all such synergies for a number of reasons. These synergy estimates are based on a number of assumptions made in reliance on the information available to us and management's judgments based on such information. The assumptions used in estimating synergies are inherently uncertain and are subject to a wide variety of significant business, economic, and competitive risks and uncertainties that could cause actual results to differ materially from those contained in the synergy benefit estimates.

(7) We now own 60.3% of Altice France Group following the completion of the 2014 Numericable Group Transactions.

(8) Equity based compensation consists of expenses pertaining to employee stock options provided to employees by the Numericable Group and SFR. For the year ended December 31, 2013, the €30.6 million equity based compensation for France relates to €27.0 million for SFR and €3.6 million for Numericable Group. For the nine months ended September 30, 2013, the €23.7 million equity based compensation for France relates to SFR. For the nine months ended September 30, 2014, the €16.8 million equity based compensation for France relates to €4.1 million for SFR, €3.7 million for Numericable Group and includes a €9 million adjustment at the Altice S.A. level.

(9) Giving effect to certain synergies expected to result from the 2013 June Transactions (including the Outremer Transaction and the ONI Transaction which were consummated in the third quarter of 2013) and to certain synergies expected to result over time from the ODO Acquisition and the Tricom Acquisition. See "*General Description of our Business—History*". We may not be able to achieve all such synergies for a number of reasons. These synergy estimates are based on a number of assumptions made in reliance on the information available to us and management's judgments based on such information. The assumptions used in estimating synergies are inherently uncertain and are subject to a wide variety of significant business, economic, and competitive risks and uncertainties that could cause actual results to differ materially from those contained in the synergy benefit estimates.

(10) Gives effect to certain synergies expected to result over time from the PT Portugal Acquisition, which is expected to result in the realization of operational efficiencies in the following areas: subcontractor rationalization, increased buying power through combined procurement, reduction in interconnection costs through re-routing to Altice's international backbone, renegotiations of price lists with suppliers, reduction in IT spending, simplification of operating practices, and outsourcing of customer care. We also expect that Altice Group will realize capital expenditure savings through benefits of scale in procurement, adoption of Altice Group's best practices in capital expenditure planning and efficiency savings in network spread. These synergy estimates are based on a number of assumptions made in reliance on the information available to us and management's judgments based on such information. The assumptions used in estimating synergies are inherently uncertain and are subject to a wide variety of significant business, economic, and competitive risks and uncertainties that could cause actual results to differ materially from those contained in the synergy benefit estimates.

(11) Adjusted EBITDA is defined as EBITDA before equity based compensation expenses. Adjusted EBITDA is unaudited. We believe that these measures are useful to readers of our financials as it provides them with a measure of the operating results which excludes certain items we consider outside of our recurring operating activities or that are non-cash items, making trends more easily observable and providing information regarding our operating results and cash flow generation that allows investors to better identify trends in its financial performance. Adjusted EBITDA should not be considered as a substitute measure for operating income and may not be comparable to similarly titled measures used by other companies (including the Altice France Group).

(12) In connection with the approval of the Altice Group's acquisition of SFR, the French Competition Authority has required us to undertake divestitures of our mobile businesses located in La Réunion and Mayotte. The revenue and EBITDA generated by such business is not material, amounting to €49 million and €10 million, respectively, in 2013 and is included under "French Overseas Territories".

(13) CVAE is a business tax levied in France. For the year ended December 31, 2013, the €65.7 million CVAE for France relates to €53.0 million for SFR and €12.7 million for Numericable Group. For the nine months ended September 30, 2013, the €53.6 million CVAE for France relates to €40.7 million for SFR and € 9.2 million for Numericable Group. For the nine months ended September 30, 2014, the €55.2 million CVAE for France relates to €46.2 million for SFR and €9.0 million for Numericable Group.

(14) For the nine months ended September 30, 2014, "French Overseas Territories" also includes the contribution of Mobius. In connection with the acquisition of SFR by Numericable-SFR S.A. (which is controlled by the Issuer), we have entered into a commitment with the French Competition Authority to dispose of our mobile network assets in Mayotte and La Réunion (which are part of our Group's business in the French Overseas Territories) by mid-2015.

(15) For the purposes of the LTM ended September 30, 2014, only, pro forma effect is given to the acquisition of Tricom, including the non-consolidated portion of Tricom prior to Tricom's consolidation into the Historical Consolidated Financial Information of Altice International from March 12, 2014, which is accounted for under "Tricom adjustment", and the contribution of Tricom from March 12, 2014, following its consolidation into the Historical Consolidated Financial Information of Altice International.

(16) Altice France Group Pro Forma Financial Information contains intercompany and pro-forma adjustments that do not refer to Numericable-SFR S.A. only, but also include other adjustments relating to the Altice S.A. perimeter. Had Numericable-SFR S.A. prepared Pro Forma Financial Information at its level, there would have been differences between the figures. As such, Altice France Group Pro Forma Financial Information is not and should not be considered, for any period, as the Numericable-SFR Pro Forma Financial Information.

(17) The following table presents a reconciliation between SFR's EBITDA (which is the basis of the Management's Discussion and Analysis of Financial Condition and Results of Operations of SFR presented elsewhere in this document) and SFR's EBITDA as it would appear if calculated using Altice S.A. Standards.

	For the year ended December 31, 2013	For the nine months ended September 30, 2013	For the nine months ended September 30, 2014

** Assumes that the 2014 SFR Acquisition, the 2014 Numericable Acquisition, the PT Portugal Acquisition and the ODO Acquisition were consummated October 1, 2013. The completion of the PT Portugal Acquisition is subject to certain conditions, including the separate approval by the competent regulatory authorities in Portugal and merger-control clearance from the European Commission (or from the Portuguese Competition Authority, under the referral mechanism set forth in the EU merger control rules). For further details, see "*Capitalization*".

(1) For reconciliation of Pro Forma Adjusted EBITDA for the Altice France Group, see "*Summary Financial Information and Other Data—Pro Forma Adjusted EBITDA*".

(2) Represents the aggregation of the LTM ended September 30, 2014, capital expenditures of €364.1 million by Numericable Group and €1,510 million as reported by SFR.

(3) Represents change in working capital as reported by SFR. As we did not own SFR prior to November 27, 2014, we cannot assure you that change in working capital is reported in a manner that is fully comparable with change in working capital information presented by Altice.

(4) Represents change in working capital as reported by PT Portugal. As we do not control PT Portugal, we cannot assure you that change in working capital is reported in a manner that is fully comparable with change in working capital information presented by Altice.

(5) Represents the gross cash interest expense, which is calculated using the cash interest expense in connection with the outstanding pro forma indebtedness of the Altice France Group after the 2014 Numericable Group Transactions as if the 2014 Numericable Group Transactions occurred on October 1, 2013. It is presented for illustrative purposes only and does not purport to represent what the interest expense of the Altice France Group would actually have been had the 2014 Numericable Group Transactions occurred on such date nor does it purport to project the interest rate of the Altice France Group for any future period or financial condition at any future point in time. Cash interest expense excludes (among other items) (a) other financing costs relating to (i) foreign exchange transactions, collection costs, hedging contracts and imbedded derivatives, (ii) bank charges and credit card commissions, and (iii) refinancing and reorganization costs, (b) interest income and (c) the impact of hedging transactions.

(6) For reconciliation of Pro Forma Adjusted EBITDA for Altice International, see "*Summary Financial Information and Other Data—Pro Forma Adjusted EBITDA*."

(7) Represents change in working capital as reported by ODO that has not been consolidated into the Historical Financial Information of Altice International from September 30, 2013 to April 8, 2014. The ODO change in working capital is reported in DOP and has been converted into euro at an average exchange rate of 0.0183 Dop/EUR for the period. Does not include change in working capital for Tricom.

(8) Represents the gross cash interest expense, which is calculated using the cash interest expense in connection with the outstanding combined indebtedness of Altice International after giving pro forma effect to the PT Portugal Acquisition as if it had occurred on October 1, 2013. It is presented for illustrative purposes only and does not purport to represent what the interest expense of Altice International would actually have been had the PT Portugal Acquisition occurred on such date, nor does it purport to project the interest rate of Altice International for any future prior or financial condition at any future point in time. Cash interest expense excludes (amongst other items) (a) other financing costs relating to (i) foreign exchange transactions, collection costs and imbedded derivatives (ii) bank charges and credit card commissions, and (iii) refinancing and reorganization costs, (b) interest income and (c) the impact of hedging transactions.

(9) We consider an aggregation of these line items as a meaningful proxy for certain cash flow characteristics by the relevant entities. It is not a measure recognized under IFRS and investors are urged to also review the cash flow information prepared under IFRS included in these Listing Particulars. Importantly, there are other factors that could significantly impact the cash flows of the relevant entities, including without limitation changes in working capital, income tax and other tax payments, principal debt repayments, restructuring costs and other extraordinary cash costs. These could have a significant effect on the cash that may be available from the Altice France Group and Altice International to service indebtedness of Altice S.A., including the Notes. In addition, we expect that cash flows from the Altice France Group may be available to Altice S.A. from the Altice France Group and Altice International in the form of dividends. Cash flow metrics such as the ones discussed herein should not be taken as an illustration of any funds that may be available for declaration and payment of dividends by the Altice France Group and Altice International.

(10) Represents the gross cash interest expense, which is calculated using the cash interest expense in connection with the outstanding indebtedness of the Issuer on a standalone basis, and giving pro forma effect on the gross interest expense of the 2014 Senior Notes offered on May 8, 2014 and the Notes offered hereby as if the offering of the 2014 Senior Notes and the Notes offered hereby had occurred on October 1, 2013. It is presented for illustrative purposes only and does not purport to represent what the interest expense of Altice S.A. would actually have been had the offering of the 2014 Senior Notes and the Notes offered hereby occurred on such date, nor does it purport to project the interest rate of Altice S.A. for any future period or financial condition at any future point in time. Cash interest expense excludes (amongst other items) (a) other financing costs relating to (i) foreign exchange transactions, collection costs and imbedded

derivatives, (ii) bank charges and credit card commissions, and (iii) refinancing and reorganization costs, (b) interest income and (c) the impact of hedging transactions.

(11) Represents a mathematical illustration of the relevant metric pro rata to anticipated Altice S.A. ownership post-Transactions. It is not, and should not be taken as, a measure of cash flows that may be available to service indebtedness of Altice S.A., including the 2014 Senior Notes and the Notes. In addition, Altice International does not wholly own all of its subsidiaries (see "*Simplified Corporate and Financing Structure*").

(12) LTM ended September 30, 2014 is calculated by (i) adding the revenue, EBITDA or Adjusted EBITDA or other applicable line item for the nine months ended September 30, 2014 and the year ended December 31, 2013 and (ii) subtracting the revenue, EBITDA or Adjusted EBITDA or other applicable line item for the nine months ended September 30, 2013 from such sum. For the purposes of the LTM ended September 30, 2014, only, pro forma effect is given to the acquisition of Tricom, including the non-consolidated portion of Tricom prior to Tricom's consolidation into the Historical Consolidated Financial Information of Altice International from March 12, 2014, following its consolidation into the Historical Consolidated Financial Information of Altice International.

(13) Represents a mathematical illustration of the relevant metric pro rata to Altice S.A. ownership. It is not, and should not be taken as, a measure of cash flows that may be available to service indebtedness of Altice S.A., including the 2014 Senior Notes and the Notes.

Key Subsidiary Restricted Payment Covenant Exceptions and Carve-outs

The debt instruments governing outstanding indebtedness of the Issuer's subsidiaries include, and the debt instruments to be entered into in connection with the Transactions will include, in the relevant "Restricted Payments" covenant, general limitations on the ability of such subsidiaries to pay dividends or make other distributions directly or indirectly to the Issuer. However, these limitations are subject to certain exceptions and carve-outs.

Under certain of Altice International's existing debt instruments, these exceptions and limitations generally include, among other things, the ability to make dividends and distributions out of a "build-up" basket of cumulative consolidated EBITDA less 1.5x consolidated interest expense of Altice International and its restricted subsidiaries, in each case, since December 12, 2012, plus the net cash proceeds and the fair market value of assets received from the issuance of equity interests in Altice International, plus certain other items less the amounts of certain other restricted payments and a general restricted payments basket. Dividends from the "build-up" basket may be paid if each of the consolidated senior secured leverage ratio and the consolidated leverage ratio of Altice International and its subsidiaries is equal to or less than 3x and 4x, respectively, *provided* that, in each case, no default or event of default is outstanding (or would result therefrom) under the relevant debt instrument.

Under the terms of the 2015 Indentures governing the Altice International New Notes, these exceptions and limitations generally include, among other things, the same "build-up" basket described in the immediately preceding sentence, from which dividends may be paid if the consolidated net leverage ratio of Altice International and its subsidiaries is equal to or less than 4x, *provided* that, in each case, no default or event of default is outstanding (or would result therefrom) under the relevant debt instrument. In addition, the 2015 Indentures allow for unlimited dividends to be paid if the consolidated leverage ratio is equal to or less than 4x, *provided* that, in each case, no default or event of default is outstanding (or would result therefrom) under the relevant debt instrument. Furthermore, for so long as no payment block events (as defined in such instruments) have occurred and are continuing, Altice International may pay dividends or other distributions to the Issuer for the payment of regularly scheduled interest as such amounts come due under the Notes. In addition, the 2015 Indentures contain a provision allowing for dividends (in addition to the foregoing) to be paid in an amount not to exceed the greater of €250 million and 2.0% of Altice International Total Assets.

In addition to the foregoing, the "Restricted Payments" covenants in each of the 2015 Indentures and certain of Altice International's existing debt instruments also include other exceptions and carve-outs that are expected to provide additional capacity to Altice International for the making of payments and distributions to the Issuer.

In addition, the debt instruments of Numericable also provide that, for so long as no payment block events (as defined in such instruments) have occurred and are continuing, Numericable may pay dividends or other distributions to its shareholders in an amount such that Altice France S.A.'s pro rata share of such dividends or other distributions is equal to the amount required by Altice S.A. for the payment of regularly scheduled interest as such amounts come due under the 2014 Senior Notes and the 2014 Altice S.A. Revolving Credit Facility Agreement, less the amount of dividends or distributions paid under the provision described in the following sentence. For so long as no default or event of default is outstanding under the relevant debt instrument, and while Numericable is a public company, Numericable will also be permitted to pay dividends in an annual amount not to exceed (A) the greater of (i) 6% of the net cash proceeds received from certain public equity offerings and (ii) the greater of 5% of the market capitalization of Numericable at the time of its initial public offering and 5% of market capitalization at the time of the dividend, less (B) the amount of dividends or distributions paid pursuant to the preceding sentence, provided that dividends may only be paid in respect of this sentence if the consolidated net leverage ratio of Numericable 4.0x or less. Furthermore, Numericable is entitled to pay any amount of dividends or other distributions to its shareholders as long as its consolidated net leverage ratio is 4.0x or less (on a pro forma basis), provided that no default or event of default is outstanding under the relevant debt instrument. Although the debt instruments of the Issuer's subsidiaries are expected to provide for a significant amount of future dividend capacity, any such payments would be subject to, among other things, distributable reserves of the relevant subsidiaries at the time of such payments and available cash.

Summary Selected Credit Data and Ratios**

	LTM ended September 30, 2014[3]
	€ in millions
As adjusted Altice France Group Consolidated Net Debt[1]	11,678
As adjusted Altice International Consolidated Net Debt[1]	7,319

Ratio of as adjusted Altice S.A. Consolidated Net Debt to Total Pro Forma Adjusted EBITDA (including Pro Forma Synergies)	4.4x
Ratio of Total Pro Forma Adjusted EBITDA (including Pro Forma Synergies) to Pro Forma Adjusted Consolidated Altice S.A. Cash Interest Expense(2)	3.5x

** Assumes that the 2014 SFR Acquisition, 2014 Numericable Acquisition, PT Portugal Acquisition and ODO Acquisition were consummated October 1, 2013. The completion of the PT Portugal Acquisition is subject to certain conditions, including regulatory clearances in France. For further details, see "*Capitalization*".

(1) Reflects the aggregate principal amount of debt of the Altice France Group, the Altice International Group or Altice S.A., as applicable, minus cash and cash equivalents of the Altice France Group, Altice International Group or Altice S.A., as applicable, in each case on an as adjusted basis after giving effect to the Transactions.

(2) Represents the gross interest expense, which is calculated using the cash interest expense in connection with our outstanding consolidated debt (after giving effect to the Transactions as if they had occurred on October 1, 2013). As adjusted Consolidated Altice S.A. interest expense has been presented for illustrative purposes only and does not purport to represent what our interest expense would actually have been had the Transactions occurred nor does it purport to project our interest rate for any future period or financial condition at any future. Interest expense excludes (a) other financing costs relating to (i) foreign exchange transactions, collection costs and embedded derivatives, (ii) bank charges and credit card commissions, and (iii) refinancing and reorganization costs, (b) interest income, and (c) the impact of hedging transactions.

(3) LTM ended September 30, 2014 is calculated by (i) adding the revenue, EBITDA or Adjusted EBITDA or other applicable line item for the nine months ended September 30, 2014 and the year ended December 31, 2013 and (ii) subtracting the revenue, EBITDA or Adjusted EBITDA or other applicable line item for the nine months ended September 30, 2013 from such sum. For the purposes of the LTM ended September 30, 2014, only, pro forma effect is given to the acquisition of Tricom, including the non-consolidated portion of Tricom prior to Tricom's consolidation into the Historical Consolidated Financial Information of Altice International, and the contribution of Tricom from March 12, 2014, following its consolidation into the Historical Consolidated Financial Information of Altice International.

(1) Excludes Tricom, Mobius, Numericable Group (which is not within Altice International's scope of consolidation), SFR (which is not within Altice Internati contribution of Tricom (in Others) and Mobius (in French Overseas Territories) from March 12, 2014, and January 1, 2014, respectively, following the Information of Altice International.

(2) Excludes Tricom.

ODO

The following table sets forth the cash capital expenditures and EBITDA less capital expenditures based on historical financial statements of ODO, other than the information for the nine months ended September 30, 2014 which has been derived from the Historical Consolidated Financial Information of Altice International and the historical financial statements of ODO.

	For the year ended December 31,			For the nine months ended September 30,	
	2011	2012	2013	2013	2014
	€ in millions				
Capital expenditures[(1)]	70.8	73.2	58.5	38.9	48.4
EBITDA—total capital expenditures	**—**	**93.5**	**114.5**	**92.8**	**101.6**

(1) In addition, for the years ended December 31, 2012 and 2013 and the nine months ended September 30, 2013 and 2014, Tricom's total capital expenditures were approximately $71 million (approximately €56 million) of which approximately $23 million (approximately €18 million) was spent on 4G/LTE technology upgrades, approximately $35 million (approximately €27 million), approximately $28.0 million (approximately €21.0 million) and approximately €13.2 million, respectively. Tricom's capital expenditures have been consolidated in the Historical Consolidated Financial Information of Altice International with effect from March 12, 2014.

PT Portugal

The following table sets forth the gross cash capital expenditures and EBITDA less capital expenditures of the PT Portugal Group based on the PT Portugal Combined Selected Financial Information.

	PT Portugal Combined Selected Financial Information				
	For the year ended December 31,			For the nine months ended September 30,	
	2011	2012	2013	2013	2014
	€ in millions				
Total gross cash capital expenditures[(1)]	670.1	763.6	560.0	428.1	316.9
EBITDA—total capital expenditures	**597.6**	**364.0**	**466.4**	**347.6**	**430.2**

(1) The capital expenditures figures included are on a cash basis. For the years ended December 31, 2011, 2012 and 2013 and the nine months ended September 30, 2013 and 2014, the accrued capital expenditures of the PT Portugal Group based on the PT Portugal Combined Selected Financial Information were €798.6 million, €571.7 million, €520.3 million, €356.3 million and €231.0 million, respectively. See "*Management's Discussion and Analysis of Financial Condition and Results of Operations of the PT Portugal Group—Capital Expenditures*".

Altice France Group (Numericable Group and SFR)

	For the year ended December 31,			For the nine months ended September 30,	
	2011	2012	2013	2013	2014

(1) For the Altice International Group, Cable Customer Relationships represents the number of individual end users who have subscribed for one or more of ou internet or fixed-line telephony), without regard to how many services to which the end user subscribed. It is calculated on a unique premises basis. Cable Cu our mobile or ISP services. For the Numericable Group, Cable Customer Relationships is calculated as the sum of (i) "Digital individual subscribers" and (i the Numericable Group. It does not include white label end users but includes mobile telephony subscribers as per the Numericable Group's definition of "D Dominican Republic (Tricom), Cable Customer Relationships includes non-residential customers and includes only pay television cable customer relationship

(2) For the Altice International Group, RGUs relate to sources of revenue, which may not always be the same as customer relationships. For example, one accounting for only one subscriber but two RGUs. RGUs for pay television and broadband internet are counted on a per service basis and RGUs for fix Numericable Group, RGUs only relate to direct individual subscribers (and do not include RGUs related to white label end- users or bulk subscribers). Fo represent "Equivalent Billing Units" of Tricom.

(3) Penetration rates for our pay television, broadband internet and fixed-line telephony services are presented as a percentage of homes passed.

(4) For France, the Numericable Group reported a "Number of individual RGUs per individual user" of 2.53x, 2.41x and 2.61x respectively for the years en September 30, 2014. However, Mobile RGUs are included in the calculation of the "Number of individual RGUs per individual user" in Numericable Group separate basis (and these are not included in the "Total individual RGUs" definition).

(5) For Israel, cable based ARPU has been calculated by using the following exchange rates: (i) average rate for the year ended December 31, 2013, €0.2086 = 2012 €0.2018 = NIS1.00, and (ii) average rate for the nine months ended September 30, 2014, €0.2113 = NIS1.00. For the Numericable Group, operating data VAT) for the periods indicated and does not reflect ARPU from white label end users or bulk subscribers but includes mobile services. For the Dominican Re related to pay television services and also revenues from additional set top boxes and other value added and premium services, and does not include ARPU fro

(6) Mobile subscribers is equal to the net number of lines or SIM cards that have been activated on our mobile network. For the Numericable Group, only Dominican Republic (Tricom), mobile subscribers does not include wireless data subscribers. In Israel, the total number of mobile subscribers for our iDEN a

(1) The public switched telephone network, or PSTN, is the traditional telephone system that runs through copper lines. The integrated digital services network, or ISDN, is the digital telecommunications network that allows simultaneous voice and data transmission over an access line.

(2) The net additions figures for the nine months ended September 30, 2013 and 2014 are calculated on a nine-month basis from December 31, 2012 and 2013, respectively.

(3) The PT Portugal Group's residential customer category provides fixed line telephone and broadband services, pay-TV (IPTV over ADSL and fiber and DTH satellite TV) services and internet access services to residential customers. PTC is the primary operating company through which the PT Portugal Group provides such residential services.

(4) The PT Portugal Group's personal customer category provides telecommunications and mobile data services for a variety of personal devices, including tradtional cell phones, smartphones, tablets and laptops through our mobile business. Meo, S.A. is the primary operating company through which the PT Portugal Group provides its mobile services.

(5) Minutes of Usage represents the monthly average of outgoing traffic in minutes divided by the average number of users in the period.

(6) Subscriber Acquisition and Retention Cost, or SARC, equals the sum of 70% of marketing and publicity costs *plus* commissions *plus* subsidies, divided by gross additions *plus* upgrades.

(7) The PT Portugal Group's enterprise customer category provides enterprise services (including integrated voice, data and image solutions, virtual private networks, convergence solutions, consultancy and outsourcing) to corporate, SMEs and SoHo customers that need diversified telecommunications solutions and integration with IT services through service packages. PTC and, to a lesser extent, Meo, S.A., are the primary operating companies through which the PT Portugal Group provides its enterprise services.

SFR Operating Data

The following table sets forth the key operating measures of SFR:

	As of, or for the year ended, December 31,		As of nine months ended September 30,
	2012	**2013**	**2014**
	(Unaudited) (in thousands except number of RGUs per individual user and ARPU or unless otherwise indicated)		
B2C Operating Data:			
Footprint[1]			
SFR Operating Data:			
Total Mobile customers[2]	15,057	14,555	14,182
Total Mobile subscribers[3]	11,194	11,381	11,315
Smartphone penetration rate[4]	51.2%	64.1%	69.3%
12-month rolling Mobile ARPU[5] (€)	28.3	24.1	22.8
Number of broadband internet customers	5,039	5,209	5,217
FTTH customers	126	197	249
Quadruple-play customers ("MultiPack") (as % of customer base)	35%	45%	49.4%
Broadband internet ARPU[5] (€)	33.3	32.5	32.2

(1) A home is deemed "passed" if it can be connected to the distribution system without further extension of the network. SFR Homes Passed is subject to unbundling by SFR of its IP voice, internet or television services.

(2) Total Mobile Customers is equal to the number of customers with active SIM cards in compliance with ARCEP definition. The customers base as at September 30, 2014 and December 31, 2013, integrates a technical purge of 92,000 inactive lines in 2013, which was related to a

migration of invoice system (without impact on revenues). The customers base as at December 31, 2012, is the published base (before such technical purge).

(3) Total Mobile Subscribers is equal to post-paid subscribers with active SIM cards only.

(4) Number of customers equipped with a smartphone in relation to the total mobile customer base (excluding remote access).

(5) Mobile ARPU is the average monthly revenue per customer. It is calculated by dividing the B2C Mobile Revenue (excluding equipment) generated over the last twelve months by the average number of customers (excluding machine to machine customers, multi-SIM and backup keys) over the same period. The ARPU is expressed in monthly revenue by line. Broadband internet ARPU is the average monthly revenue per B2C Broadband internet line. It is calculated by dividing the average monthly revenue, based on the last twelve months, by the average number of B2C Broadband internet lines over the same period. The average number of customers is the average of the monthly averages during the period concerned. The monthly average is the arithmetic mean of the number of customers at the beginning and the end of the month.

RISK FACTORS

An investment in the Notes involves risks. Before purchasing the Notes, you should consider carefully the specific risk factors set forth below, as well as the other information contained in these Listing Particulars. If any of the events described below, individually or in combination, were to occur, this could have a material adverse impact on our business, prospects, results of operations and financial condition and our ability to make payments on the Notes and could therefore have a negative effect on the trading price of the Notes. Described below and elsewhere in these Listing Particulars are the risks considered to be the most material, although there may be other unknown or unpredictable economic, business, competitive, regulatory or other factors that also could have material adverse effects on our results of operations, financial condition, business or operations in the future. In addition, our past financial performance may not be a reliable indicator of future performance and historical trends should not be used to anticipate results or trends in future periods. These Listing Particulars also contains forward-looking statements that involve risks and uncertainties. Actual results may differ materially from those anticipated in these forward-looking statements as a result of various factors, including the risks described below and elsewhere in these Listing Particulars. See "Forward-Looking Statements".

In this section, unless the context otherwise requires, the terms "Group", "we", "us" and "our" refers to the Issuer and its subsidiaries (including PT Portugal and the Numericable Group but excluding SFR). For a description of the principal risks and uncertainties relating to SFR, see "—Risks Relating to the 2014 SFR Acquisition, SFR's Business and the Integration of SFR into our Business," "—Risks Relating to SFR's Industry and Markets" and "—Risks Relating to SFR's Regulatory Environment and Legal Matters". As a result of this presentation, some risks applicable to Altice, the Numericable Group and/or SFR may be discussed multiple times in this section.

Risks Relating to Our Financial Profile and the Transaction

Our substantial leverage could adversely affect our business, financial condition and results of operations and prevent us from fulfilling our obligations under the Notes or the ability to raise additional capital to fund our operations.

We have significant outstanding debt and debt service requirements and may incur additional debt in the future. As of September 30, 2014, (i) the Altice International Group had total third party debt (excluding other long term and short term liabilities, other than finance leases) of € 3,730 million on a consolidated basis, (ii) the Altice France Group had total third party debt (excluding other long term and short term liabilities, other than finance leases) of €11,750 million and (iii) the Issuer had total third party debt of €4,172 million. As adjusted to give effect to the Transactions (including this Offering) and to the repayment of the Existing Coditel Mezzanine Facility with proceeds from our Existing Altice Financing Revolving Credit Facilities which occurred on December 2, 2014, (i) the Altice International Group had total third party debt (excluding other long term and short term liabilities, other than finance leases) of €7,460 million on a consolidated basis, (ii) the Altice France Group had total third party debt (excluding other long term and short term liabilities, other than finance leases) of € 11,760 million and (iii) the Issuer had total third party debt of €6,227 million. In addition, the Issuer will be able to draw € 200 million in total under the 2014 Altice S.A. Revolving Credit Facility, the Altice France Group will be able to draw €750 million under the Numericable Group Revolving Credit Facilities Agreement (of which €50 million has been drawn as of September 30, 2014) and the Altice International Group will also have the ability to draw up to $80 million under the 2012 Altice Financing Revolving Credit Facility and €80 million under the 2013 Altice Financing Revolving Credit Facility (all of which has been drawn as of the date hereof), up to €180 million under the New Altice International Super Senior Revolving Credit Facility (of which it is expected that €330 million will be drawn to complete the PT Portugal Acquisition), up to €501 million under the New Altice International Pari Passu Revolving Credit Facility and up to € 15 million under the 2013 Guarantee Facility (pursuant to which, as at the date hereof, one request for a guarantee of up to approximately € 6.8 million has been made). For a description of such changes to our financial profile and our third party indebtedness, see "Description of Other Indebtedness".

Although the Altice International Group and the Altice France Group are both controlled by Altice S.A., the Altice International Group is currently financed, and will be financed following the consummation of the Transactions, on a standalone basis and constitute a separate financing group from the Altice France Group. Each of these financing groups are subject to covenants that restrict the use of their respective cash flows outside their respective restricted group (including between the Altice International Group and the Altice France Group and between the Issuer and either of the two groups). Consequently, cash flows from operations of the Altice International Group may not be able to be applied to meet the obligations of the Altice France Group or the obligations of the Issuer and other members of the Altice Group and cash flows from operations of the Altice France Group may not be able to be applied to meet the obligations of the Altice International Group, the Issuer and other members of the Altice Group.

Our significant level of debt could have important consequences, including, but not limited to, the following:

- making it more difficult for us to satisfy our obligations under the Notes;

- requiring that a substantial portion of our cash flows from operations be dedicated to servicing debt, thereby reducing the funds available to us to finance our operations, capital expenditures, research and development and other business activities, including maintaining the quality of and upgrading our network;

- impeding our ability to obtain additional debt or equity financing, including financing for capital expenditures, and increasing the cost of any such funding, particularly due to the financial and other restrictive covenants contained in the agreements governing our debt;

- impeding our ability to compete with other providers of pay television, broadband Internet services, fixed-line telephony services, mobile services and B2B services in the regions in which we operate;

- restricting us from exploiting business opportunities or making acquisitions or investments;

- increasing our vulnerability to, and reducing our flexibility to respond to, adverse general economic or industry conditions;

- limiting our flexibility in planning for, or reacting to, changes in our business and the competitive and economic environment in which we operate; and

- adversely affecting public perception of us and our brands.

Any of these or other consequences or events could have a material adverse effect on our ability to satisfy our debt obligations under the Notes.

The terms of the agreements and instruments governing our debt restrict, but do not prohibit, us from incurring additional debt. We may refinance our debt, and we may increase our consolidated debt for various business reasons which might include, among other things, financing acquisitions, funding the prepayment premiums, if any, on debt we refinance, funding distributions to our shareholders or general corporate purposes. If new debt is added to our consolidated debt described above, the related risks that we now face will intensify.

We may not generate sufficient cash flow to fund our capital expenditures, ongoing operations and debt obligations, and may be subject to certain tax liabilities.

Our ability to service our debt and to fund our ongoing operations will depend on our ability to generate cash. We cannot assure you that our businesses will generate sufficient cash flow from operations or that future debt or equity financing will be available to us in an amount sufficient to enable us to pay our debt obligations when due. Our ability to generate cash flow and to fund our capital expenditures, ongoing operations and debt obligations are dependent on many factors, including:

- our future operating performance;

- the demand and price levels for our current and planned products and services;

- our ability to maintain the required level of technical capability in our networks and in the subscriber equipment and other relevant equipment connected to our networks;

- our ability to successfully introduce new products and services;

- our ability to reduce churn;

- general economic conditions and other conditions affecting customer spending;

- competition;

- sufficient distributable reserves, as required under applicable law;

- the outcome of certain litigation in which we are involved; and

- legal, tax and regulatory developments affecting our business.

Some of these factors are beyond our control. If we are unable to generate sufficient cash flow, we may not be able to repay our debt, grow our business, respond to competitive challenges or fund our other liquidity and capital needs, including capital expenditures. If we are unable to meet our debt service obligations, we may have to sell assets, attempt to restructure or refinance our existing indebtedness or seek additional funding in the form of debt or equity capital. We may not be able to do so on satisfactory terms, if at all.

We expect that a portion of our cash flow will consist of payments of dividends or interest by Israeli companies in our Group. In general, payments of dividends or interest by companies that are Israeli residents for tax purposes are subject to withholding tax. With respect to payments to Luxembourg tax residents or residents of other countries who have a tax treaty with Israel, such withholding tax may be reduced from the rates generally applicable under Israeli law to the rates applicable under the tax treaty between Israel and Luxembourg or the other applicable treaty. In order to enjoy the reduced rate of withholding tax, it is necessary to file with the Israel Tax Authority a request for relief from withholding prior to payment of the dividend and/or interest. If a withholding tax exemption or relief certificate is received from the Israel Tax Authority prior to the payment of the dividend and/or interest, the payer will be able to make the dividend/interest payment at such reduced withholding tax rate. However, if such request is denied or delayed and such certificate is not available at the time of payment, withholding will be made at the full statutory rates. Any changes in the tax rates on dividends or interest could significantly affect our ability to meet our debt service obligations under the Notes. In addition, payments of dividends or interests by companies resident in the Dominican Republic are subject to a withholding tax of 10%.

The agreements and instruments governing our debt contain restrictions and limitations that could adversely affect our ability to operate our business.

The terms of the agreements and instruments governing our debt contain a number of significant covenants or other provisions that could adversely affect our ability to operate our business. These covenants restrict our ability, and the ability of our subsidiaries, to, among other things:

- pay dividends or make other distributions;
- make certain investments or acquisitions, including participating in joint ventures;
- make capital expenditures;
- engage in transactions with affiliates and other related parties;
- dispose of assets other than in the ordinary course of business;
- merge with other companies;
- incur additional debt and grant guarantees;
- repurchase or redeem equity interests and subordinated debt or issue shares of subsidiaries;
- grant liens and pledge assets; and
- change our business plan.

All of these limitations will be subject to certain exceptions and qualifications, including the ability to pay dividends, make investments or to make significant prepayments of shareholder debt. However, these covenants could limit our ability to finance our future operations and capital needs and our ability to pursue business opportunities and activities that may be in our interest. In addition, our ability to comply with these restrictions may be affected by events beyond our control. In addition, we are also subject to the affirmative covenants contained in certain of the debt agreements we are party to, including the Existing Altice Financing Revolving Credit Facility Agreements, the 2013 Guarantee Facility and the Existing HOT Unsecured Notes, the 2014 Altice S.A. Revolving Credit Facility and the Numericable Group Revolving Credit Facilities Agreement which require us to maintain specified financial ratios. Upon entry into the New Altice International Revolving Credit Facilities, we will also be required to maintain certain specified financial ratios under these agreements. Our ability to meet these financial ratios may be affected by events beyond our control and, as a result, we cannot assure you that we will be able to meet these ratios.

In addition to limiting our flexibility in operating our business, the breach of any covenants or obligations under the agreements and instruments governing our debt will result in a default under the applicable debt agreement or instrument and could trigger acceleration of the related debt, which in turn could trigger defaults under other agreements governing our debt. A default under any of the agreements governing our other debt could materially adversely affect our growth, financial condition and results of operations.

Moreover, until such time when all of the Existing HOT Unsecured Notes shall be delisted from trading or be repaid in full, HOT will remain a "reporting company" under Israeli law. Reporting companies under Israeli law are subject to extensive disclosure requirements and burdensome corporate governance rules under the Israeli Companies Law, 1999, the Israeli Securities Law, 1968 and the regulations promulgated thereunder, including the provision which requires a reporting company to maintain an independent audit committee, and the approval of the audit committee as a prior condition to any transaction of the reporting company in which the controlling shareholder has a personal interest.

A substantial amount of our indebtedness will mature before the Notes, and we may not be able to repay this indebtedness or refinance this indebtedness at maturity on favorable terms, or at all.

Of the €25,447 million of total borrowings we would have had outstanding as of September 30, 2014 (excluding other liabilities, but including finance leases), as adjusted to give effect to all changes to our capital structure since September 30, 2014, including the Transactions, €23,270 million (equivalent) of our borrowings, will mature prior to the maturity dates of the Notes.

Our ability to refinance our indebtedness, on favorable terms, or at all, will depend in part on our financial condition at the time of any contemplated refinancing. Any refinancing of our indebtedness could be at higher interest rates than our current debt and we may be required to comply with more onerous financial and other covenants, which could further restrict our business operations and may have a material adverse effect on our business, financial condition, results of operations and prospects and the value of the Notes. We cannot assure you that we will be able to refinance our indebtedness as it comes due on commercially acceptable terms or at all and, in connection with the refinancing of our debt or otherwise, we may seek additional refinancing, dispose of certain assets, reduce or delay capital investments, or seek to raise additional capital.

We are exposed to interest rate risks. Shifts in such rates may adversely affect our debt service obligations.

As adjusted to give effect to all changes to our capital structure since September 30, 2014, including the Transactions (including this Offering, the borrowing under the New Altice Financing Term Loan and the offering of the 2015 Senior Notes and 2015 Senior Secured Notes), as of September 30, 2014, we would have had €5,929 million of floating rate debt. In addition, any amounts we borrow under the Revolving Credit Facility agreements, the New Altice International Revolving Credit Facilities or the 2013 Guarantee Facility bear or will bear interest at a floating rate. Further, as of September 30, 2014, we had an amount equivalent to € 148.0 million outstanding under Series A of the HOT Unsecured Notes which is linked to the consumer price index in Israel. An increase in the interest rates on our debt will reduce the funds available to repay our debt and to finance our operations, capital expenditures and future business opportunities. Although we enter into various derivative transactions to manage exposure to movements in interest rates, there can be no assurance that we will be able to continue to do so at a reasonable cost.

Currency fluctuations and interest rate and other hedging risks could adversely affect our earnings and cash flow.

Our business is exposed to fluctuations in currency exchange rates. HOT's primary transactional currency is the New Israel Shekel. The primary transactional currency of Cabovisão, ONI, PT Portugal, Coditel, Outremer Telecom, the Altice France Group and Le Cable is the Euro. The primary transactional currency of Green is Swiss Francs. The primary transactional currency of Tricom S.A. and ODO is the Dominican Peso. We conduct, and will continue to conduct, transactions in currencies other than such primary transactional currencies, particularly the U.S. dollar. Our existing debt is primarily denominated in U.S. dollars, euros and New Israeli Shekels although the amounts incurred in euros and New Israeli Shekels do not necessarily match the cash flows generated from operations in such currencies. The exchange rate between the U.S. dollar and the New Israeli Shekel, euro, Swiss Franc and the Dominican Peso has fluctuated significantly in recent years and may continue to fluctuate significantly in the future. Further in the past, the Dominican Republic government has imposed exchange controls and currency restrictions and they may do so in the future. This is beyond our control and may result in the Dominican Peso ceasing to be freely convertible or transferable abroad to service our then outstanding indebtedness or otherwise, or the Dominican Peso being significantly depreciated relative to other currencies, including the U.S. dollar. We have historically covered a portion of our U.S. dollar and euro cash outflows arising on anticipated and committed obligations through the use of foreign exchange derivative instruments. Further, while we manage the risk of certain currency fluctuations in respect of a portion of our existing debt and to hedge our exposure to interest rate changes in respect of indebtedness linked to interest rates, these arrangements may be costly and may not insulate us completely from such exposure. There can be no guarantee that our hedging strategies will adequately protect our operating results from the effects of exchange rate fluctuation or changes in interest rates, or that these hedges will not limit any benefit that we might otherwise receive from favorable movements in exchange rates or interest rates.

Negative changes in our credit rating and future ratings downgrades of sovereign debt (such as of Portugal) may have a material adverse effect on our financial condition.

A downgrade in our credit rating (including due to the effects of the economic conditions described below) may negatively affect our ability to obtain future financing (including from financial institutions, retail investors and banks) to fund our operations and capital needs. Any downgrade of our ratings could have even more significant effects on our ability to obtain financing and therefore on our liquidity. It may increase our financing costs by increasing the interest rates of our outstanding debt or the interest rates at which we are able to refinance existing debt or incur new debt.

Our credit rating may be impacted by a number of factors, including the effects of the economic conditions in the countries in which we operate and any future rating downgrades of sovereign debt of these countries. For example, against the backdrop of the Eurozone crisis, the increased risk perception also led to consecutive downgrades of Portuguese sovereign debt by the rating agencies. In 2011, Portugal was downgraded (1) by 4 notches at Moody's Investors Service, or Moody's, from A1 on December 21, 2010 to Ba2 on July 5, 2011; (2) by 3 notches at Standard & Poor's Ratings Services, or S&P, from A− on November 30, 2011 to BBB− on December 5, 2011; and (3) by 6 notches at Fitch Ratings, or Fitch, from A+ on December 23, 2010 to BB+ on November 24, 2011. In 2012, Portugal was downgraded (1) by 1 notch at Moody's from Ba2 to Ba3 on February 13, 2012; and (2) by 2 notches at S&P from BBB to BB on January 13, 2012. On January 13, 2012, S&P downgraded France's sovereign debt rating by one notch to AA+. On December 13, 2014, France was downgraded by Fitch by one notch to AA.

Because the financial condition, revenues and profitability of PT Portugal, which contributed 16.2% of Pro Forma revenues and 18.0% of pro forma adjusted EBITDA (on a last twelve months basis) after giving Pro Forma effect to the PT Portugal Acquisition, are closely linked to the Portuguese economy, we expect that the ratings under Moody's and S&P's ratings methodologies of the Altice International Group and of the Issuer will also be impacted by the Portuguese sovereign debt rating. Any deterioration in the economic condition of Portugal or the other countries in which we operate or any ratings downgrade of sovereign debt of these countries may have a material adverse impact on our financial conditions.

Risks Relating to Our Business, Technology and Competition

We face significant competition in each of the industries in which we operate and competitive pressures could have a material adverse effect on our business.

We face significant competition from established and new competitors in each of the countries and segments in which we operate. The nature and level of the competition we face vary for each of the products and services we offer. Our competitors include, but are not limited to, providers of television, broadband Internet, fixed-line telephony and B2B services using DSL or fiber connections, providers of television services using technologies such as IPTV, providers of television by satellite, DTT providers, mobile network operators, and providers of emerging digital entertainment technologies and other providers of wholesale carrier, infrastructure and white label services.

In some instances, we compete against companies which may have easier access to financing, more comprehensive product ranges, lower financial leverage, greater financial, technical, marketing and personnel resources, larger subscriber bases, wider geographical coverage for their cable or mobile networks, greater brand name recognition and experience or longer established relationships with regulatory authorities, suppliers and customers. Some of our competitors may have fewer regulatory burdens with which they are required to comply because, among other reasons, they use different technologies to provide their services, do not own their own fixed-line network, or are not subject to obligations applicable to operators with significant market power.

Because the telecommunications and mobile markets in certain of the geographic markets in which we operate, including Israel and France, are reaching saturation, there are a limited number of new subscribers entering the market and therefore in order to increase our subscriber base and market share we are dependent on attracting our competitors' existing subscribers, which intensifies the competitive pressures we are subject to. The competitive landscape in the countries in which we operate is generally characterized by increasing competition, tiered offerings that include lower-priced entry level products and a focus on multiple-play offerings including special promotions and discounts for customers who subscribe for multiple-play services, which may contribute to increased average revenue per unique customer relationship, but will likely reduce our ARPU on a per-service basis for each service included in a multiple-play package. We expect additional competitive pressure to result from the convergence of broadcasting and communication technologies, as a result of which participants in the media and telecommunications industries seek to offer packages of fixed and mobile voice, Internet and video broadcast services. In addition, we expect competition to increase as a result of changes in the regulatory regime seeking to increase competition in the markets in which we operate, such as allowing third party access to cable networks on a wholesale basis.

Our products and services are also subject to increasing competition from alternative new technologies or improvements in existing technologies. For example, our pay television services in certain jurisdictions compete with providers who provide IPTV services to customers in our network areas utilizing DSL or very high bitrate DSL ("VDSL") broadband Internet connections. In the broadband Internet market, we generally face competition from mobile operators as they are increasingly able to utilize a combination of progressively powerful handsets and high bandwidth technologies, such as UMTS and long-term-evolution ("LTE") technology. Mobile services, including those offering advanced higher speed, higher bandwidth technologies and mobile virtual network operators ("MVNOs"), also contribute to the competitive pressures that we face as a fixed-line telephony operator. In the past, mobile operators have engaged in "cut the line" campaigns and used attractive mobile calling tariffs to encourage customers with both fixed-line and mobile services to retain only their mobile services. This substitution, in addition to the increasing use of alternative communications technologies, tends to negatively affect our fixed-line call usage volumes and subscriber growth. At the same time, incumbent fixed-line operators have also applied resources to "win-back" activities that can entice our existing telephony customers, as well as prospective telephony customers, to return or remain with the incumbent by offering certain economic incentives.

In addition, new players from sectors that are either unregulated or subject to different regulations (including Internet players such as Yahoo, Google, Microsoft, Amazon, Skype, Apple, YouTube, Netflix and other audiovisual players, media players and over-the-top (of an existing broadband internet network) players) have emerged as competitors to our content offering. These players are taking advantage of improved connectivity and platform-agnostic technologies to offer over-the-top and cloud-based services. Telecommunications operators are expected to maintain traditional access services and billing relationships over which users access services from adjacent players such as well-known companies offering music, video, photos, apps and retail. The rapid success of audiovisual content streamed through the telecommunications network and insufficient innovation could lead to the emergence of other content or service providers as well as the saturation of the network, which would put pressure on the revenues and margins of operators like our Group while simultaneously requiring them to increase capital expenditures to remain competitive, which could adversely affect our business, financial condition or results of operations.

The following is an overview of the competitive landscape in France, Israel, Portugal and the Dominican Republic:

France

Pay television. In the French pay-television market, we compete with providers of premium television packages such as CanalSat, DSL triple-play and/or quadruple-play operators such as Orange, Free and Bouygues Telecom, which provide IPTV, and providers of pay-DTT (Canal+, which operates across multiple formats: IPTV, paid DTT, satellite and cable). The growth of IPTV has changed the market, opening up the provision of pay-television services beyond the traditional methods of cable and satellite, which is limited by the inability to install a satellite dish on the façade of buildings in certain areas, such as central Paris. According to ScreenDigest, in 2013, television distribution by IPTV was the most popular pay-television distribution platform in France ((49.8%) of overall pay- television subscriptions), ahead of satellite (32.5%), cable (12.6%) and DTT (5.1%). We also compete with satellite television services that may be able to offer a greater range of channels to a larger audience, reaching wider geographic areas (especially in rural areas) for lower prices than the prices of our cable pay television services. Any increase in market share of satellite distribution may have a negative impact on the success of our digital cable television services. We also face competition from satellite distribution of free-to-air television programming. To receive free-to-air programming, viewers need only to purchase a satellite dish and a set-top box. The impact of these market evolutions can be seen in the decline in our stand-alone pay television RGUs in France from 1,292,000 as of December 31, 2010 to 1,134,000 as of September 30, 2014. While pay-DTT's share (which only includes Canal+ Group currently) of the pay-TV market is currently low, providers of pay-DTT may in the future be able to offer a wider range of channels to a larger audience for lower prices than the prices we charge. Furthermore, the number and quality of channels offered in non-premium television packages in France have significantly increased in recent years. If our premium television packages are not seen by our subscribers as having a better cost-benefit profile than non-premium television packages (either the ones offered by us or those offered by our competitors), our subscribers may opt for our or our competitors' non-premium television packages. Finally, the provision of audiovisual content over-the-top of an existing broadband Internet network by providers such as Amazon and Apple by-passes the traditional networks discussed above (including ours) and is an increasing source of competition.

Broadband Internet. In France, we compete primarily with xDSL providers which is currently the most widespread technology used to access broadband Internet in France. Orange is the leading DSL provider, followed by Free, SFR and Bouygues Télécom. In 2013, Orange, Free, SFR and Bouygues Télécom had high-speed and very-high-speed Internet access market shares of approximately 41%, 23%, 21% and 8%, respectively, based on the total number of subscribers in France (Source: Group estimates). While we believe that the superior performance and capacity of our cable network compared to our competitors' xDSL networks currently places us at a competitive advantage to exploit the increased demand in France for very high speed Internet, such competitive advantage may diminish to the extent that xDSL operators roll out FTTH or VDSL2 networks. See "*—The deployment of fiber or VDSL2 networks by our competitors* *may reduce, and ultimately eliminate, the speed and power gap between our cable network and the DSL networks of our main competitors*". In addition, our xDSL competitors' networks cover more French homes than our network and pricing is very competitive. Orange's fixed-line network includes a local loop covering all French homes, and unbundling provides competitors such as Bouygues Télécom and Free with access at a price regulated by ARCEP to all homes where unbundling has occurred (over 85% of French homes), compared to approximately 35% of French homes covered by our network. In addition, we could, in the future and particularly in the context of the build-out of FTTH networks, be required to grant competitors access to our fiber network. In certain cases, the regulation of FTTH may create opportunities for DSL unbundlers to significantly reduce their wholesale prices. We also compete with service providers that use other alternative technologies for Internet access, such as satellite technologies or mobile standards such as UMTS and 4G mobile technologies. These mobile broadband Internet high speed Internet access technologies may enable both incumbent and new broadband Internet access providers to provide high bandwidth connection services for voice and data. Furthermore, additional access technologies may be launched in the future that will further increase competition or lead us to increase capital expenditure for additional upgrades. Providers of mobile broadband Internet access may be able to offer fast Internet access speeds at a competitive cost, with the additional possibility of allowing customers to access the Internet remotely.

Mobile telephony. The French mobile telephony market, which we entered as an MVNO in May 2011, is characterized by competition among well-established mobile network operators such as Orange, SFR, Bouygues Telecom and Free, as well as other MVNOs such as Virgin Mobile or La Poste. Competition has intensified, particularly as to price, since the entry by Free in early 2012 with a low-priced unlimited calling package. The mobile telephony market in France is currently undergoing a transformation, with a price war and bundled packages no longer including subsidized handsets, and the development of "low-cost" brands. The evolution of consumer behavior as well as new offers could have a negative impact on the attractiveness of our products. Our competitive position is also affected by our status as an MVNO and the structure of our contractual relationship with our network providers, including Bouygues Telecom. We are currently not technically able to offload our customers' mobile usage onto WiFi, which may place us at a disadvantage compared to our competitors who are able to offload to WiFi and hence have a structurally lower cost base.

Multiple-play. The French media and telecommunications markets have converged in the residential segment as customers seek to obtain their media and communications services from a single provider at an attractive price. Bundled packages of services are now the market norm in the French residential segment. If our bundled products are not able to compete effectively in the marketplace, we may be required to lower prices or increase investment in services to improve quality in order to take advantage of increasing demand for bundled services and retain subscribers.

Business services. Competition in the French B2B market, though not as intense as in the residential market, is strong and may increase. B2B customers, including SMEs, tend to focus on "infrastructure as a service," integrated solutions for data availability, storage, and security. B2B customers require service to be extremely reliable and to be re-established within short timeframes if there is any disruption, which increases competitive pressure on market participants. Our competitors in France may have more effective customer relations teams or a more established presence in certain regions than us. Our main competitors in this segment are Orange (Orange Business Services) and Colt. Bouygues Telecom Enterprises is also a competitor in the SME segment. As of September 30, 2014, Orange and Colt had market shares of 70% and 3%, respectively, and we believe that we had a market share of approximately 7% (4% for medium-sized businesses and approximately 8% for large businesses and public sector entities) and SFR had a market share of approximately 12%. The French B2B market for voice services is extremely price sensitive, with sophisticated customers and relatively short-term (typically one year) contracts, and vulnerable to cuts in MTR rates. The ability to compete effectively is partially a function of network capillarity, and certain of our competitors have a more extensive and denser network than us. In the French B2B market for data services, network power and capacity and access to the latest technologies are very important to customers. Our competitors in France may invest more heavily in network power and technological advancements and therefore compete more effectively for B2B customers than us. In the data market, customers also often seek combined infrastructure and software solutions. As a result, we also compete with software and other IT providers of data and network solutions, which may decrease the value customers place on our infrastructure solutions, leading to a reduction in our prices and margins. IT providers may also partner with our infrastructure telecommunications competitors.

Wholesale services. The French wholesale telecommunications market is dominated by Orange and SFR, although their market shares vary depending on the segment, with SFR dominating the voice wholesale segment with an estimated 60% market share as of December 31, 2012 and Orange dominating in the data wholesale segment with an estimated 60% market share as of December 31, 2012. In the fiber wholesale segment, Orange is the dominant player, with a market share that we believe to be approximately 70% as of December 31, 2013. We estimate that we have a market share between 10% and 20% in the three wholesale sectors of voice, data, and fiber. We also face competition from consortiums of telecom operators and construction companies, such as Covage, Vinci, Eiffage and Axiom (who may lay down fiber in construction sites and then lease them on the wholesale market). The wholesale market for voice services in France is extremely volatile. Operators generally launch offers to tender each year and choose the provider based solely on availability and price, as there is little to no difference in the quality of service among operators in this sub-segment. Competition is therefore based primarily on price and network capillarity. The wholesale market for data services in France is less volatile than the voice market. Competition is based primarily, in addition to price, on service quality and technological advancement. The wholesale market for dark fiber infrastructure in France is more open than for wholesale voice and data carriage, as providing it does not require having a dense, national network and does not include any services that would require technical expertise. For example, certain cities in France have built their own local fiber networks and are therefore wholesale infrastructure providers (i.e. they rent the fiber to telecommunications operators).

Israel

Pay Television. In the multi-channel television market our main competitor is D.B.S. Satellite Services (1998) Ltd, an associate of Bezeq, which provides satellite technology based multi-channel television services under the brand "YES". Other factors that have a material impact on competition in the market include the availability of free-to-air DTT channels and the increasing availability of video content that may be offered via the Internet. In addition, we believe that the implementation of certain regulatory changes may have an impact on competition in the market, including the expansion in the number of free-to-air DTT channels, the "narrow" television package and the increased scope of special broadcasting licenses pursuant to which we are required to broadcast television channels owned by special broadcasting license holders on our network under certain terms. See "*Regulatory—Israel—Television Access to DTT Channels—Narrow Package Proposal*."

Broadband Internet Infrastructure Access. Our high-speed broadband Internet infrastructure access service competes primarily with Bezeq, which provides high-speed broadband Internet access over DSL, holds the highest market share in broadband Internet infrastructure access in Israel, and offers a range of products with different download speeds, data transfer limits and other value added services. Continued upgrades to the quality of Bezeq's DSL-based broadband Internet infrastructure access service to very high bitrate DSL ("VDSL") and potentially even faster DSL variants and the possibility of widespread fiber-to-the-home installations which it has announced could have a negative impact on our competitive position in the broadband Internet infrastructure market and may also require us to revise our marketing strategy and make potentially significant capital expenditures. Further, the Israeli Ministry of Communications has issued regulatory instructions, including the method of setting wholesale service rates and, in the case of Bezeq, the maximum rates that can be collected by Bezeq from other license holders who make use of its infrastructure for the years 2014 to 2018, in an attempt to create a wholesale market for broadband internet infrastructure access and fixed line telephony services which would allow service providers (such as ISPs, VOB providers and IPTV providers) to provide services to their customers by using our cable network. In addition, the Israeli Ministry of Communications has issued an order requiring HOT to fulfill the universal service obligation. We are currently evaluating the impact of the Israeli Ministry of Communication's decisions on our business in Israel and while we have not yet made a full assessment of such impact, it is possible that this may result in increased competition. See See "*Regulatory—Israel—Obligation to Extend Services*", and "*Regulatory—Israel—Broadband Internet Infrastructure Access and Fixed Line Telephony—Decision Regarding the Creation of a Wholesale Market*". Competition may also increase following the creation of a public private joint venture in June 2013 between the government owned Israeli Electric Corporation ("IEC") and a private company, which proposes to use the electric transmission and distribution network in Israel owned by IEC to provide wholesale products to telecommunication services providers via optical fiber, and thus compete with HOT and Bezeq in the wholesale market as well as providing such services directly to large business customers.

Fixed-Line Telephony. Competition in providing fixed-line telephony service is intense, with providers having introduced substantial price reductions over the past few years. Bezeq, our principal competitor in the Israeli market and the largest provider of fixed-line telephony services, has an extensive fixed-line telephone network throughout Israel, strong market knowledge, high brand recognition and substantial capital resources. We believe that competition in this market will increase due to the low barriers to entry primarily as a result of regulations pursuant to which new service providers, who receive a license, can provide telephony services using voice over Internet protocol ("VoIP") or voice over broadband Internet ("VOB") technology over the infrastructure network owned by either us or Bezeq (the end user will still need to purchase access to the infrastructure network directly from us or from Bezeq, until a wholesale market is established). As a result of the wholesale market implementation, the VOB service provider may be entitled to procure the access to the network infrastructure by itself. The Israeli Ministry of Communications requires the various telephony service providers to provide interconnection access in return for payment of an "interconnection fee" set by it. Competition may also increase following the commencement of operations by the proposed IEC joint venture, if successful, and as the result of the policy to develop a wholesale market in telecommunications services. Although our market share in this segment is increasing, we may not have the resources of, or benefit from the economies of scale available to, Bezeq and other competitors.

Mobile Services. The mobile market in Israel is characterized by saturation and a very high penetration level in excess of 100%, as a result of which competition is focused primarily on customers moving from one mobile operator to another. Our mobile service competes with three principal mobile network operators in Israel, who between them are currently estimated to directly represent over 86% of the total market for mobile services in Israel as of December 31, 2013, by number of mobile customers, and with an additional new mobile network operator (as well as several MVNOs). As such, the brand names of the three principal mobile network operators in Israel are better recognized as mobile service providers than our brand, they have better established sales, marketing and distribution capabilities, and are more experienced in the provision of mobile services. While we acquired HOT Mobile in November 2011, which had an existing iDEN-based mobile network and service offering, we only began offering our 3G based mobile services under the HOT brand in May 2012 and expect that we will continue to face the challenge that the brand names of our competitors are better recognized as mobile service providers and that these competing providers are part of larger, more established companies than us. We may be required to invest significantly in marketing, other promotional activities and our infrastructure to overcome this challenge. We may also face increased competition in the future from Golan Telecom, which launched its services at the same time as HOT Mobile, and MVNOs that provide mobile services under their own brand using the network infrastructure of another service provider. In addition, on November 21, 2012, the Israeli Ministry of Communications issued a policy that permitted VoIP service providers to provide VoC (VoIP over Mobile) services. A licensed VoC service improves user experience, since it has a standard phone number and can be ported in and out with number portability. If the VoC marketing experiment is successful, demand for our mobile services may be reduced, which would negatively impact revenues and profits from that segment. On July 2, 2014, the Israeli Ministry of Communications published a tender for a mobile phone license for the provision of advanced services using 4G-LTE technology, through which a total of eight frequency bands in the area of 1,800 MHz will be allocated. HOT Mobile has submitted its offer for a part of the spectrum in response to the tender. The draft tender clarified that a licensee may enter into a network sharing agreement with another licensee, and that HOT Mobile may request to replace the deployment plan they attached to the tender for the UMTS frequencies with a deployment plan for 4G, in each case subject to certain conditions. As a result, HOT Mobile has updated its request for approval by the Ministry of Communication of the Network Agreement with Partner accordingly.

On January 12, 2015, the Israeli Ministry of Communications informed HOT Mobile that based on the results of the tender it would be awarded a frequency bandwidth of 2X5MHz in the 1.8 GHz spectrum, for a license fee of NIS 34.5 million (up to half of which may be paid by way of provision of a bank guarantee, which may be refunded, in whole or in part, upon HOT Mobile reaching certain market share milestones). The tender results will be brought before the Minister of Communications for approval. In the event that the Minister of Communications approves such additional spectrum and we decide to accept the terms on which it is offered to us, we would need to deploy 4G-LTE infrastructure within the arrangements we have entered into with Partner (which have been approved by the Israeli Antitrust Authority and are pending final approval from the Israeli Ministry of Communications) in order to commercialize such services. If we are not granted such permission or the regulatory approval for our Network Sharing Agreement with Partner is delayed, we could incur significant delays in rolling out our 4G-LTE network. Mobile service providers have been permitted to use temporary frequency bandwith to use LTE technology until the end of the tender proceedings pursuant to which certain providers have launched LTE based services. We intend to launch such services in the coming months. Any delay in the introduction of 4G-LTE services or a failure on our part to provide such services at all could negatively affect our ability to compete with mobile operators who can provide such services to Israeli subscribers.

On December 29, 2014, Cellcom, an Israeli telecommunication company, which also offers mobile services, announced the launch of "Cellcom TV", its new service for offering television over the internet. Cellcom TV services include the Israeli DTT broadcasting television channels, VOD services and additional advanced features and viewing capabilities. Although this service was only recently introduced (and, as such, we are unable to fully anticipate the effect that this development may have on HOT), we expect that it may increase the competition in the television services market in which HOT currently operates, and as such could have a material effect on our business, financial condition and results of operations.

Multiple-play offerings. We are currently the only provider of triple-play services combining pay television, broadband internet infrastructure access and fixed-line telephony services at a bundled price below what a subscriber would pay for each service individually. Bezeq, our principal competitor, is currently limited under its license from providing triple-play services, although it can apply for approval to the Israeli Ministry of Communications to provide such services. On March 26, 2014, the Antitrust Commissioner approved the merger between Bezeq and "YES". Therefore, we expect that Bezeq will offer such triple-play services to its customers in the near future through "YES". Bezeq can also currently provide double-play services including broadband Internet infrastructure access and ISP services at a bundled price. The ability of our competitors to provide multiple-play services in the future as a result of regulatory changes, consolidation in the industry, advances in technology or other factors, or regulatory changes that might require us to provide, on a stand alone basis, the services that currently form our triple-play bundle at the bundled rates, could have a material effect on our business, financial condition and results of operations.

Business services. Competition in the provision of internet, data and voice products to business customers is intense, with Bezeq, several local telephony operators through VoB and several international telephony operators among our competitors. In addition to competitive activity, we continue to see challenges in this segment of the market as a result of price erosion in existing products and the need to invest in new product development to satisfy the evolving preferences of prospective customers.

Dominican Republic

We began operations in the Dominican Republic as a result of the acquisition of Tricom (which was completed in March 2014) and ODO (which was completed in April 2014). Tricom, which provides cable and fixed line services as well as mobile services, and ODO which provides mobile services and broadband Internet services, currently face significant competition in their respective markets.

In the mobile market, ODO's and Tricom's key competitors are Claro, the incumbent with a 53% market share and Viva with a 7% market share. ODO and Tricom have recently been subject to decreasing mobile termination rates which continue to be significantly higher than in other regions such as Western Europe. While voice to data substitution resulting from increased smartphone penetration should help mitigate the impact of voice ARPU deterioration, ODO and Tricom may not be able to successfully capture wireless market share, due to competition in particular from Claro, the incumbent owned by the Mexican telecom operator America Movil with a 67% market share, and also Wind Telecom, a local wireless player with an 8% market share (as of June 2014).

Key competitors of Tricom's pay television business are Claro (approximately 26% market share), cable operator Aster (approximately 12% market share) and Wind Telecom (approximately 9% market share) (as of September 30, 2014). While the market remains relatively fragmented, significant consolidation opportunities exist, in particular between some of the smaller cable operators and we therefore expect increased competition going forward.

Concentration in the fixed telephony market is also high, with Claro and Tricom together accounting for a market share of over 90% (approximately 65% and 22% market shares, respectively) (as of December 2013). However, revenues and fixed line telephony subscribers have seen declines in recent years, due to mobile substitution. These trends are in line with those witnessed in most Western European countries and are expected to continue in the future, with multiple play uptake only expected to mitigate this deterioration in part. In addition, termination rates continue to be significantly higher than in other countries, with any reductions likely to impact Tricom negatively.

Tricom and Claro are currently the only quadruple play providers in the Dominican Republic. Bundled services are expected to become increasingly important and customers that have such services are less likely to switch to a different operator for all or part of the bundled services. ODO does not currently provide bundled service and is therefore currently unable to compete in the market for bundled services, which may adversely affect its ability both to retain existing customers and to attract new customers, including those who currently subscribe for bundled services from other operators and may be disincentivised to switch operators as a result.

Further, a new mobile network operator, or "MNO," could successfully enter the mobile telecommunications market in the Dominican Republic. The entry of a new MNO in the Dominican Republic mobile telecommunications market could materially impact ODO and Tricom's market shares and have corresponding effects on their revenues and results of operations. MVNOs and resellers could also enter the Dominican Republic mobile telecommunications market, following an international trend towards increasing diversification in the telecommunications markets. In addition, ODO and Tricom are facing increasing competition from non traditional mobile voice and data services based on new mobile voice over the Internet technologies, in particular over the top ("OTT") applications, such as Skype, Google Talk and Facebook.

Portugal

In Portugal, we currently operate through our Cabovisão and ONI brands which face similar risks to those described below. Following the PT Portugal Acquisition, we will also provide telecommunication services through the PT Portugal brand. The competitive risks PT Portugal faces are described below.

Multiplay offerings. In 2008, PT Portugal launched a nationwide Pay- TV service under the "MEO" brand, primarily using its fixed network (IPTV over ADSL2+ and FTTH and direct-to-home, or DTH satellite technology). This service required PT Portugal to make significant investments in its network in order to increase the bandwidth and offer a better service quality than their competitors. In January 2013, PT Portugal announced the rebranding of MEO and the launch of a quadruple-play service as "M4O", offering Pay-TV broadband internet, fixed telephone and mobile telephone services. This launch has required additional marketing expenditures and will entail ongoing investments in infrastructure to remain competitive with other market participants.

Notwithstanding gains in PT Portugal's revenues and market share from Pay-TV services in recent years and the quality of its service, PT Portugal has experienced pressure from its competitors to reduce monthly subscription fees. In addition, PT Portugal's efforts to build scale to enable it to negotiate better programming costs with content suppliers, especially certain premium content owned by one of its competitors, may not prove successful.

The competitive landscape has changed significantly in Portugal as a result of the merger in 2013 of ZON Multimédia—Serviços de Telecomunicações e Multimédia, SGPS, S.A., or ZON, the largest cable operator, and Optimus SGPS, S.A., or Optimus, the third-largest mobile operator, to create NOS SGPS, S.A. ("NOS"), a new integrated telecommunications operator in Portugal. This transaction has further increased the focus on bundled offers and the evolution from triple-play to quadruple-play services as NOS has leveraged its position as an integrated telecommunications operator and a content distributor. Cabovisão also offers triple-play services.

PT Portugal's revenues from residential services, enterprise services (where bundled offers are becoming increasing important) and its financial position could be significantly affected if it is not successful in competing to provide these bundled services, particularly as its Pay-TV services have become increasingly important as a retention tool of its fixed line and broadband internet customers. PT Portugal's revenues from enterprise services could also be significantly affected by the competition presented by NOS, which has announced its strategy to grow its enterprise services.

Fixed-Lined Telephony. As a result of the trend toward the use of mobile services instead of fixed telephone services (mobile usage grew 63% between 2007 and 2013, whereas fixed traffic reduced by 2.5% in the same period), combined with the increase in competition from other operators, PT Portugal has experienced, and may continue to experience, erosion of market share of both access lines and of outgoing domestic and international traffic. Additionally, all mobile players have launched fixed telephony services based on their mobile networks, which are directly competing for the same customers. Competition is intensified by mobile operators NOS and Vodafone with large mobile operations but a limited (although growing) fixed line network. Mobile operators can bypass PT Portugal's international wireline network by interconnecting directly with fixed line and mobile networks either in its domestic network or abroad. Competition is also forcing down the prices of fixed line voice services for long-distance and international calls, as operators have been offering unlimited voice communications for all national and several international fixed destinations. Lowering international call prices has caused a decline in PT Portugal's revenues from international fixed line voice services. We expect competition from operators with services based on Voice over Internet Protocol, or VoIP, also to place increasing price pressure on voice tariffs. In addition, ANACOM decided to heavily reduce fixed termination fees, from €0.1114 to €0.068, effective as of October 1, 2013. This has contributed to a decrease in our revenues from fixed telephone services. The decrease in fixed line voice traffic and lower tariffs resulting from competition has significantly affected PT Portugal's overall revenues, and we expect these factors to continue to negatively affect revenues.

Broadband Internet. We believe that competition in broadband internet access in Portugal is intensifying. The intensification of competition is driven by the development of technologies such as broadband wireless access through 3G and 4G, as well as high-speed broadband supported by the deployment of a fiber optic network. PT Portugal may have increased competition from Vodafone Portugal, which intends to expand its currently limited FTTH footprint from 700,000 homes as of March 2014, to 1.5 million homes by mid-2015, as well as NOS whose high-speed broadband coverage (including HFC and FTTH) as of March 2014 was larger than that of PT Portugal. As the result of such intensified competition, PT Portugal may face additional pricing pressure on its services, which could result in the loss of revenues from both residential and enterprise customers.

Mobile Services. We believe that PT Portugal's existing mobile competitors, Vodafone and NOS, will continue to market their services aggressively, resulting in similarly priced offers for all major mobile players in the market. These aggressive pricing strategies have boosted voice and data usage at the expense of eroding retail revenues. A clear example was the launch, in 2008, of the so-called "tribal plans." Although initially designed to provide special calling and texting advantages for "restricted" user groups, their widespread success soon resulted in a significant pressure on revenues. We believe that PT Portugal's success against competitors will depend on its ability to differentiate its products based on services offered, quality, simplicity and targeting of pricing plans, and it may not be successful in doing so. We also believe quadruple-play will play a major role in the mobile Portuguese market. Although PT Portugal was the first operator to launch a quadruple-play offer, in January 2013, it will be increasingly difficult to sustain this competitive advantage, particularly following the merger resulting in the creation of NOS.

In addition, we have operations in Belgium and Luxembourg and the French Overseas Territories that face competition and competitive pressure risks similar to those described above.

A weak economy and negative economic development in Israel, Belgium, the French Overseas Territories, Luxembourg, Portugal, Switzerland and the Dominican Republic, may jeopardize our growth targets, have a material adverse effect on our business, financial condition and results of operations and significantly increase our cost of debt.

Negative developments in, or the general weakness of, the economy in Israel, Belgium, the French Overseas Territories, Luxembourg, Portugal, Switzerland or the Dominican Republic, in particular increasing levels of unemployment, may have a direct negative impact on the spending patterns of retail consumers, both in terms of the products they subscribe for and usage levels. Because a substantial portion of our revenue is derived from residential subscribers who may be impacted by these conditions, it may be (i) more difficult to attract new subscribers, (ii) more likely that certain of our subscribers will downgrade or disconnect their services and (iii) more difficult to maintain ARPUs at existing levels. In addition, we can provide no assurances that a deterioration of any of these economies will not lead to a higher number of non-paying customers or generally result in service disconnections. Similarly, a deterioration in economic conditions in the countries in which we offer B2B services (Portugal, Belgium, Luxembourg, Switzerland, the French Overseas Territories and the Dominican Republic) or wholesale services would be likely to adversely affect the demand for and pricing of such services. Therefore, a weak economy and negative economic development in the markets in which we operate may jeopardize our growth targets and may have a material adverse effect on our business, financial condition and results of operations. We are currently unable to predict the extent of these potential adverse effects. Recently, the general economic, political, labor market and capital market conditions in the EMEA region (including Israel), including certain of the jurisdictions in which we operate, and other parts of the world have undergone significant turmoil. In addition, general market volatility has resulted from uncertainty about sovereign debt and fear that the governments of countries such as Cyprus, Greece, Portugal, Spain, Ireland and Italy may default on their financial obligations. This loss of confidence led to rescue measures for Greece, Ireland and Portugal by the EU, the EBC and the IMF and a bailout of the Spanish banking sector by the EU. These issues, along with the re- pricing of credit risk and the difficulties currently experienced by financial institutions, have made it difficult for companies to obtain financing. In Portugal, government economic policy over the last three years has focused on implementing the measures agreed to as part of the €78 billion financial support package from the European Union/European Commission, the ECB and the IMF. Following an assessment of the current economic situation and future prospects, as well as the situation in the financial markets (notably the successful issuance of long-term debt), and the existence of a cash buffer that covered the government's funding needs for the 12-month period beginning May 17, 2014, the Portuguese government concluded and exited the three-year-long adjustment programme without requesting any further external financial assistance. As the result of extensive structural reforms implemented during the adjustment programme period and projected for coming years, Portuguese real GDP is forecasted by IMF to grow by 1.0% in 2014 (as compared to 1.4% decline in 2013). In 2014, the IMF expects the government deficit to remain at approximately 4.1% of GDP (as compared to 5.1% in 2013). As one of Portugal's largest companies and employers, PT Portugal's financial condition, revenues and profitability are closely linked to circumstances affecting in the Portuguese economy. The recession in Portugal has had a direct effect on demand for PT Portugal's products and services, contributing to a decline in revenues in 2011, 2012 and 2013 across most of the customer categories of PT Portugal's business. In addition, the outcome of the Portuguese general elections scheduled for September and October 2015 may result in political, economic or regulatory changes in Portugal. Furthermore, continued hostilities in the Middle East and recent tensions in North Africa could adversely affect the Israeli economy. Additionally, the Dominican Republic economy depends to a significant degree on global tourism and the health of the US economy and remains vulnerable to external shocks (e.g. economic declines in other emerging market countries). Any decrease in visitors, a downturn in the US economy or such external shocks could have a material adverse effect on economic growth in the Dominican Republic. These conditions could also adversely affect access to capital and increase the cost of capital. As a result of the disruptions in the credit markets, many lenders have increased interest rates, enacted tighter lending standards, required more restrictive terms (including higher collateral ratios for advances, shorter maturities and smaller loan amounts) or refused to refinance existing debt at all or on terms similar to pre-crisis conditions. Changes in interest rates and exchange rates may also adversely affect the fair value of our assets and liabilities. If there is a negative impact on the fair values of our assets and liabilities, we could be required to record impairment charges.

The political and military conditions in Israel may adversely affect our financial condition and results of operations.

A significant portion of our operations, our networks and some of our suppliers are located in Israel and are affected by political and military conditions. Since the establishment of the State of Israel in 1948, a number of armed conflicts have taken place between Israel and its neighboring countries. Hostilities involving Israel, any interruption or curtailment of trade between Israel and its trading partners and political instability within Israel or its neighboring countries are likely to cause our revenues to fall and harm our business. In particular, in recent conflicts, missile attacks have occurred on civilian areas, which could cause substantial damage to our networks, reducing our ability to continue serving our customers as well as our overall network capacity. In addition, in the event that recent political unrest and instability in the Middle East, including changes in some of the governments in the region, cause investor concerns resulting in a reduction in the value of the New Israeli Shekel, our expenses in non-shekel currencies may increase, with a material adverse effect on our financial results.

During an emergency, including a major communications crisis in Israel's national communications network, a natural disaster, or a special security situation in Israel, control of our networks may be assumed by a lawfully authorized person in order to protect the security of the State of Israel or to ensure the provision of necessary services to the public. During such circumstances, the government also has the right to withdraw temporarily some of the mobile spectrum granted to us. Under the Equipment Registration and Mobilization to the Israel Defense Forces Law, 1987, the Israel Defense Forces may mobilize our engineering equipment for their use, compensating us for the use and damage. This may materially harm our ability to provide services to our subscribers in such emergency circumstances and have a negative impact on our revenue and results of operations.

Moreover, the Prime Minister of Israel may, under powers which the Communications Law (Telecommunication and Broadcasting), 5742—1982 (the "Communications Law") grants him for reasons of state security or public welfare, order us to provide services to the security forces, to perform telecommunications activities and to set up telecommunications facilities required by the security forces to carry out their duties. While the Communications Law provides that we will be compensated for rendering such services to security forces, the government is seeking a change in the Communications Law which would require us to bear some of the cost involved with complying with the instructions of security forces. Such costs may be significant and have a negative impact on our revenue and results of operations.

Some of our officers and employees are currently obligated to perform annual reserve duty. All reservists are subject to being called to active duty at any time under emergency circumstances. In addition, some of our employees may be forced to stay at home during emergency circumstances in their area. We cannot assess the full impact of these requirements on our workforce and business if such circumstances arise.

More generally, any armed conflicts, terrorist activities or political instability in the region would likely negatively affect business conditions and could harm our results of operations, including following termination of such conflicts, due to a decrease in the number of tourists visiting Israel. Beginning in 2010 and continuing to date several countries in the region, including Egypt and Syria, have been experiencing increased political instability and armed conflict, which have led to change in government in some of these countries, the effects of which are currently difficult to assess. Further, tensions have increased recently between Israel and Iran over Iran's nuclear program. In the event the conflict escalates, especially if Iran has nuclear weapons capabilities, the impact on our business could be significant.

Terrorist attacks and threats, escalation of military activity in response to such attacks or acts of war may negatively affect our cash flows, results of operations or financial condition.

Our business is affected by general economic conditions, fluctuations in consumer confidence and spending, and market liquidity which can decline as a result of numerous factors outside of our control, such as terrorist attacks and acts of war. In Israel, the ongoing hostilities with the Palestinians, future terrorist attacks, rumors or threats of war, actual conflicts in which it or its allies might be involved, or military or trade disruptions affecting us or our customers may adversely affect our operations.

SFR's and the PT Portugal Group's revenues and EBITDA have decreased over the past years and this trend may continue.

SFR's revenue decreased from €12,183 million in 2011 to € 11,288 million in 2012 to €10,199 million in 2013 and from €7,616 million for the nine months ended September 30, 2013, to €7,396 million for the nine months ended September 30, 2014. SFR's EBITDA decreased from €3,800 million in 2011 to € 3,301 million in 2012 to €2,766 million in 2013 and from € 2,200 million for the nine months ended September 30, 2013, to €1,777 million for the nine months ended September 30, 2014 (in each case without an add back for CVAE). We believe that the decreases in revenue have resulted primarily from decreases in mobile prices due to a highly competitive marketplace and lower tariffs imposed by ARCEP and that the decreases in EBITDA reflect its declining revenues, which have not been fully offset by decreased costs. Though SFR has been implementing since 2012 a multi-year plan designed to adapt its organization to the changing market environment, adverse economic developments may occur, price competition may continue and even intensify and regulators may continue to impose lower tariffs, any or all of which could have a significant material adverse effect on Altice France Group's business, financial condition and results of operations. In addition, the PT Portugal Group's revenue decreased from €2,955.3 million in 2011 to €2,769.4 million in 2012 to €2,627.4 million in 2013 and from €1,963.2 million for the nine months ended September 30, 2013 to €1,900.9 million for the nine months ended September 30, 2014. The PT Portugal Group's EBITDA decreased from €1,267.7 million in 2011 to € 1,127.6 million in 2012 to €1,026.4 million in 2013 and from €775.7 million for the nine months ended September 30, 2013 to €746.6 million for the nine months ended September 30, 2014. We believe that the decrease in revenues and EBITDA of the PT Portugal Group have resulted primarily from lower revenues in the enterprise customers category as a result of cost-cutting initiatives by clients driven by the macro-economic and financial conditions in Portugal and due to lower mobile termination rates imposed by the regulator and decreases in mobile prices due to a highly competitive marketplace. We expect this trend of declining revenue and EBITDA for SFR and the PT Portugal Group to be reflected in their respective results for the fourth quarter of 2014 and, while we expect to implement business plans and cost reduction measures to address this trend, SFR and the PT Portugal Group may continue to see declining revenue and EBITDA in the 2015 fiscal year and beyond, which could have an adverse effect on our business. SFR and the PT Portugal Group accounted for 63.1% and 16.2% respectively of the pro forma consolidated revenue of the Group and 46.6% and 18% respectively of the pro forma consolidated EBITDA of the Group for the last twelve months ended September 30, 2014.

Our growth prospects depend on a continued demand for cable based and mobile products and services and an increased demand for bundled and premium offerings.

The use of Internet, television and fixed-line telephony and mobile services in certain of the jurisdictions in which we operate has increased sharply in recent years. For example, Israel has become one of the most highly penetrated countries for such services, broadly in line with countries in Western Europe. We have benefited from this growth in recent years and our growth and profitability depend, in part, on a continued demand for these services in the coming years. We rely on our multiple-play and premium television services in most of the jurisdictions in which we operate to attract new customers and to increase our revenue per customer by migrating existing customers to such services. Therefore, if demand for multiple-play products and premium television services does not increase as expected, this could have a material adverse effect on our business, financial condition and results of operations.

Our business is capital intensive and our capital expenditures may not generate a positive return or we may be unable or unwilling to make additional capital expenditures.

The pay television, broadband Internet, fixed-line telephony, mobile and B2B businesses in which we operate are capital intensive. Significant capital expenditures are required to add customers to our networks, including expenditures for equipment and labor costs. In Israel, we recently completed an upgrade to our cable network that made our entire network Docsis 3.0- enabled, which enables us to expand the transfer volume on the network to improve the provision of services that require substantial bandwidth like VoD and increase the number of channels that we can offer our subscribers. We are also in the process of selectively rolling out "FTTx" improvements to our last mile fixed-line network and may need to make similar capital expenditures in the future to keep up with technological advancements. In addition, we are continuing to invest in the expansion of our UMTS mobile network in Israel to provide 3G mobile services, which we launched on May 15, 2012 and which offers subscribers faster network capabilities and better roaming coverage as compared to our iDEN platform and the ability to use 3G phones. In addition, the relevant authorities in Israel have initiated an application process to award spectrum for the provision of LTE mobile telephony services. We have submitted our offer in response to this tender. On January 12, 2015, the Israeli Ministry of Communications informed HOT Mobile that based on the results of the tender it would be awarded a frequency bandwidth of 2X5MHz in the 1.8 GHz spectrum, for a license fee of NIS 34.5 million (up to half of which may be paid by way of provision of a bank guarantee, which may be refunded, in whole or in part, upon HOT Mobile reaching certain market share milestones). The tender results will be brought before the Minister of Communications for approval and in case of such approval, we will need to upgrade our mobile network and roll out an LTE network, which could involve a significant amount of capital expenditure (which we expect will be made through investment in the newly formed limited partnership to be set up pursuant to the Network Sharing Agreement between HOT Mobile and Partner. In France, we are seeking to upgrade and expand our network and expect to incur substantial capital expenditure in the process. We intend to keep upgrading our cable network to fiber in order to make them compatible with Docsis 3.0, which we expect will require significant capital expenditure. We also expect to develop our FTTH networks in the context of public-private partnerships in France, such as our DSP 92 project. For a description of our DSP 92 project, see "*Description of Our Business—Products and Services—Business- to-Business Services—Infrastructure Wholesale Services*".

We have, in recent years, also made significant investments in cable and mobile networks in Belgium and Luxembourg, the French Overseas Territories and Portugal. PT Portugal has also made significant investments in its network, in particular in connection with the commencement of Pay-TV services in 2008 and quadruple play services in 2013. No assurance can be given that our recent or future capital expenditures will generate a positive return or that we will have adequate capital available to finance future upgrades or acquire additional licenses. If we are unable to, or elect not to, pay for costs associated with adding new customers, expanding or upgrading our networks, or making our other planned or unplanned capital expenditures, our growth and our competitive position may be materially adversely affected.

We are subject to increasing operating costs and inflation risks which may adversely affect our earnings.

While we generally attempt to increase our subscription rates to offset increases in operating costs, there is no assurance that we will be able to do so due to competitive and other factors. Therefore, operating costs may rise faster than associated revenue, resulting in a material negative impact on our cash flow and results of operations. We are also affected by inflationary increases in salaries, wages, benefits and other administrative costs which we may not be in a position to pass on to our customers, which in turn could have a material adverse effect on our business, financial condition and results of operations.

If we fail to successfully introduce new technologies or services, or to respond to technological developments, our business and level of revenue may be adversely affected and we may not be able to recover the cost of investments that we have made.

Our business is characterized by rapid technological change and the introduction of new products and services. If any new or enhanced technologies, products or services that we introduce fail to achieve broad market acceptance or experience technical difficulties, our revenue growth, margins and cash flows may be adversely affected. As a result, we may not recover investments that we make in order to deploy these technologies and services. Enhanced television, fixed-line telephony, broadband Internet infrastructure access and mobile services provided by competing operators may be more appealing to customers, and new technologies may enable our competitors to offer not only new services, but to also offer existing standard services at lower prices. See "*—We face significant competition in each of the industries in which we operate and competitive pressures could have a material adverse effect on our business*." We may not be able to fund the capital expenditures necessary to keep pace with technological developments. It is possible that alternative technologies that are more advanced than those we currently provide may be developed. We may not obtain the expected benefits of our investments if more advanced technology is adopted by the market. Even if we adopt new technologies in a timely manner as they are developed, the cost of such technology may exceed the benefit to them. Our inability to obtain the funding or other resources necessary to expand or further upgrade our systems and provide advanced services in a timely manner, or successfully anticipate the demands of the marketplace, could adversely affect our ability to attract and retain customers and generate revenue.

We anticipate that over time, new products and services we may introduce will require upgraded or new customer premises equipment, which may therefore constrain our ability to market and distribute such new services. For example, we do not expect that previously installed Internet modems or set-top boxes will be able to support all the enhancements we may introduce to our broadband Internet or pay television services over time. A portion of our subscribers will therefore require some form of upgrade or potentially a replacement of their customer premises equipment. Implementing such upgrades may entail additional costs to us and could delay the introduction of enhanced services and therefore reduce our cash flow and profitability, particularly where customers rent such customer premise equipment from us.

The deployment of fiber or VDSL2 networks by our competitors may reduce, and ultimately eliminate, the speed and power gap between our cable network and the DSL networks of our main competitors.

We believe that one of our core competitive advantages in the majority of our geographies is the strength and speed of our fiber/cable networks. On a blended basis, approximately 99.5% of the Altice International Group's networks is Docsis 3.0-enabled and over an aggregate of approximately 85% of the Altice France Group's networks is Docsis 2.0- or Docsis 3.0-enabled, in each case as of September 30, 2014. Following the PT Portugal Acquisition we will also benefit from PT Portugal's FTTH network. The parts of our networks that have been upgraded to FTTx and use Docsis 3.0 technology allow for speed levels that cannot currently be matched by xDSL networks that have not been upgraded to fiber, which is the technology deployed by most of our competitors, and allows for the connection of several devices without impairing the quality of the television signal.

However, our competitors may deploy fiber and/or VDSL2 networks allowing for download speeds and bandwidths which may rival those achieved by our network. For example, in France, our main DSL competitors (Orange, Free and Bouygues Télécom) have begun to roll out FTTH networks in order to increase and harmonize their network speed. In line with the law on modernization of the economy dated August 4, 2008 and in line with the conditions set forth by ARCEP (decision 2009-1106 dated December 22, 2009 and decision 2010- 1312 dated December 14, 2010), other operators will be able to obtain access to the infrastructure deployed by an operator, including through co- financing projects, and use such infrastructure for their own very-high-speed broadband internet offers. French DSL operators have all announced various agreements to mutualize deployment of FTTH in certain areas. In addition, in February 2013, the French government announced a €20 billion FTTH deployment plan and a goal to provide very- high-speed internet access to 50% of the population by 2017 and 100% of the population by 2023. The government pledged to provide €3 billion in subsidies to municipalities for FTTH deployment. Several communities have already granted subsidies to network operators to install FTTH connections. These grants are likely to continue, with some regions of France such as the Hauts-de-Seine, Amiens and Louvin districts, having already entered into public-private partnerships in an effort to encourage such investments. Furthermore, Orange may decide, either as an alternative to FTTH or as an intermediate approach pending the FTTH roll-out, to upgrade a portion of its network to VDSL2. Orange announced that it would run a beta test of VDSL2 for certain consumers on its network during the course of the fall of 2013. Free has also announced that it would make its current offerings upgradeable to VDSL2 should the technology become available in a subscriber's location.

Bezeq, through its DSL network, is the leading broadband Internet infrastructure access provider in Israel with 1.3 million subscriptions as of December 31, 2013 including business and residential customers. Based on Bezeq's public filings, Bezeq is currently rolling out FTTH/FTTB infrastructure. Bezeq has reported that, as of December 31, 2013, approximately 98% of its 1.2 million broadband internet customers have been migrated to its next generation network. On August 29, 2012, Bezeq announced its decision to broaden the deployment of optical fibers to reach as close as possible to its customers through FTTH or FTTB, in an effort to form the basis of the future supply of advanced communications services and with greater bandwidth than currently provided. In August 2013, Bezeq announced it had deployed FTTH to 200,000 households and businesses in Israel, reached 400,000 households and businesses in Israel by end of 2013, and was aiming to reach more than one million homes and businesses with fiber by the end of 2014.

In Portugal, the company formed by the combination of Zon and Optimus and which was subsequently rebranded to NOS operates the largest high-speed broadband network (including HFC and FTTH). It passed approximately 3.3 million homes as of September 30, 2014, with approximately 71% of triple-play and quadruple-play customer penetration. As of February 2014, NOS's 4G network covered 87.6% of the population (with 46.6% coverage at 150 Mbps). Following the merger, NOS has stated it aims to increase market share from 25% in 2012 to approximately 30% in 2018 (source: NOS Strategy Day presentation).

If our competitors deploy or significantly expand their fiber networks they may be able to compete with our pay television and broadband Internet offers at a level of quality and speed equal or superior to ours, potentially eliminating our current competitive advantage, increasing pressure on our prices and margins and leading us to incur significant capital expenditures to match their service offerings. Implementation of a VDSL2 solution by such competitors could also reduce our competitive advantage. The deployment of fiber and/or VDSL2 networks by competitors is also a risk for our B2B operations, particularly with respect to SMEs and SoHos, for which our cable and fiber/DSL networks, as applicable, are also currently an advantage. While we have invested and improved our offerings in response to fiber/VDSL2 deployment, such deployment could have a material adverse effect on our business, financial condition and results of operations.

In addition, we will need to expend significant capital expenditures to fulfill the universal service obligation and to upgrade the parts of our networks that are xDSL. There can be no assurance that we will have sufficient capital to finance such upgrades or that such upgrades will generate a positive return.

Our business may be adversely affected by actual or perceived health risks and other environmental requirements relating to exposure to electromagnetic fields through telecommunications equipment.

Exposure to electromagnetic fields through telecommunications equipment, including mobile antennas, relay antennas and WiFi, has raised concerns regarding possible harmful side effects. If concern for such risks were to worsen, or if harmful effects were scientifically established, our business, financial condition and results of operations could be materially adversely affected.

A number of studies have been conducted to examine the health effects of mobile phone use and network sites, and some of these studies have been construed as indicating that radiation from mobile phone use causes adverse health effects. Media reports have suggested that radio frequency emissions from mobile network sites, mobile handsets and other mobile telecommunication devices may raise various health concerns. While, to the best of our knowledge, the handsets that we market comply with the applicable laws that relate to acceptable Specific Absorption Rate ("SAR") levels, we rely on the SAR levels published by the manufacturers of these handsets and do not perform independent inspections of the SAR levels of these handsets. As the manufacturers' approvals refer to a prototype handset, and not for each and every handset, we have no information as to the actual level of SAR of the handsets along the lifecycle of the handsets. Furthermore, we only own mobile networks in Israel and the French Overseas Territories and our mobile network sites comply with the International Council on Non-Ionizing Radiation Protection standard, a part of the World Health Organization.

In May 2011, the International Agency for Research on Cancer ("IARC"), which is part of the World Health Organization ("WHO"), published a press release according to which it classified radiofrequency electromagnetic fields as possibly carcinogenic to humans based on an increased risk for adverse health effects associated with wireless phone use. We have complied with and are committed to continue to comply with the rules of the authorized governmental institutions with respect to the precautionary rules regarding the use of mobile telephones.

In June 2011, WHO published a fact sheet (no. 193) in which it was noted that "A large number of studies have been performed over the last two decades to assess whether mobile phones pose a potential health risk. To date, no adverse health effects have been established as being caused by mobile phone use". It was also noted by WHO that "While an increased risk of brain tumors is not established, the increasing use of mobile phones and the lack of data for mobile phone use over time periods longer than 15 years warrant further research of mobile phone use and brain cancer risk in particular, with the recent popularity of mobile phone use among younger people, and therefore a potentially longer lifetime of exposure". WHO notified that in response to public and governmental concern it will conduct a formal risk assessment of all studied health outcomes from radiofrequency fields exposure.

In Israel, the Israeli Ministry of Health published in July 2008 recommendations regarding precautionary measures when using mobile handsets. It indicated that although the findings of an international study on whether mobile phone usage increases the risk of developing certain tumors were not yet finalized, partial results of several of the studies were published, and a relationship between prolonged mobile phone usage and tumor development was observed in some of these studies. For example, we refer our customers in Israel to the precautionary rules that have been recommended by the Israeli Ministry of Health, as may be amended from time to time. These studies, as well as the precautionary recommendations published by the Israeli Ministry of Health, have increased concerns of the Israeli public with regards to the connection between mobile phone exposure and illnesses.

Several lawsuits have been filed against mobile operators and other participants in the mobile industry alleging adverse health effects and other claims relating to radio frequency transmissions to and from sites, handsets and other mobile telecommunications devices, including lawsuits against HOT, which were settled during 2012 with no material expenses incurred in such settlements.

In Portugal, the National Regulatory Authority, ICP-ANACOM ("ANACOM") issued a regulation pursuant to Decree Law No. 11/2003, which requires entities, including PT Portugal, that are qualified to install and use radio communication stations for public broadcasting, to submit to ANACOM for approval an annual plan that monitors and measures the intensity levels of the electromagnetic waves emitted from these radio communication stations, especially stations located near the general population. Further, the Portuguese government adopted an ordinance that limits emission and exposure to electromagnetic fields with frequencies between 0 kHz and 300 GHz. Although we believe that these regulations or ordinances do not have a material impact on PT Portugal, the Portuguese government may adopt new laws or regulations regarding electromagnetic emissions and exposure, which could have an adverse effect on PT Portugal's business.

The perception of increased health risks related to mobile network sites may also cause us increased difficulty in obtaining leases for new mobile network site locations or renewing leases for existing locations or otherwise in installing mobile telecommunication devices. If it is ever determined that health risks existed or that there was a deviation from radiation standards which would result in a health risk from sites, other mobile devices or handsets, this would have a material adverse effect on our business, operations and financial condition, including through exposure to potential liability, a reduction in subscribers and reduced usage per subscriber. Furthermore, we do not expect to be able to obtain insurance with respect to such liability.

If we cannot obtain or maintain favorable roaming or network sharing arrangements for our mobile services, our services may be less attractive or less profitable.

In November 2013 we entered into a Network Sharing Agreement with Partner Communications Company Ltd. ("Partner") pursuant to which HOT Mobile and Partner will own equal shares of a newly formed limited partnership, which shall hold, develop and operate an advanced shared mobile network for both companies. The Network Sharing Agreement has been approved by the Israeli Antitrust Authority subject to certain conditions. One such condition is that from May 22, 2021, or six years from the date on which the final approval of the Ministry of Communications is given, whichever is earlier, the approval may be revoked if the Commissioner finds the partnership, its existence or its actions harms competition. The Network Sharing Agreement remains subject to final approval from the Israeli Ministry of Communications, the decision of which is expected to be made after the outcome of the 4G-LTE tender process is decided. Once approved, the Network Sharing Agreement will enable HOT Mobile and Partner to share antennas and frequencies and facilitate optimum utilization of the spectrum.

The Network Sharing Agreement is valid until December 31, 2028, and provides for automatic renewals in five year increments after December 31, 2028 but may be terminated in the event of a material breach and certain other specific events. In the interim, HOT Mobile has entered into a RoU Agreement with Partner which gives HOT Mobile a right of use over Partner's mobile communication network for the purpose of providing nationwide mobile coverage to our customers. The RoU Agreement with Partner is valid until January 4, 2017. If we are unable to obtain the final approval for the Network Sharing Agreement or otherwise implement the arrangements we have entered into with Partner in a timely or cost effective manner we may be unable to achieve some or all of the anticipated benefits of these arrangements and our business and results of operations may be negatively affected. We have also entered into an agreement with Vodafone for roaming services outside Israel and which automatically renews until one of the parties gives written notice of termination and may be terminated in the event of a material breach or the commencement of liquidation or insolvency proceedings.

In France and Belgium, we do not own a mobile network and we rely on mobile virtual network operator agreements with Bouygues Telecom, SFR and BASE, as applicable, to provide mobile services. In addition, in the French Overseas Territories we rely on third party operators to provide international roaming services for our mobile subscribers. We cannot control the quality of the service that any such operators provide and it may be inferior to the quality of service that we provide. Equally, our subscribers may not be able to use some of the advanced features that they enjoy when making calls on our mobile network. Some of our competitors may be able to obtain lower roaming or MVNO rates than we do because they may have larger call volumes. If our competitors' providers can deliver a higher quality or a more cost effective service, then subscribers may migrate to those competitors and our results of operation could be adversely affected. Further, we may not be able to compel providers to participate in our technology migration and enhancement strategies. As a result, our ability to implement technological innovations could be adversely affected if these providers are unable or unwilling to cooperate with the further development of our mobile networks or if they cease to provide services comparable to those we offer on our networks. In addition, in France we are currently not technically able to transfer our customers' mobile usage to WiFi which could place us in a less favorable position compared to our competitors who are able to transfer mobile usage to WiFi, thereby affording such competitors a structurally lower cost base. Moreover, the financial terms of these agreements include a flat fee or a fee based on the actual level of consumption of mobile telephony services by our subscribers or both. In the case of flat fee contracts, even if our subscribers use low levels of mobile telephony services, we will still be charged a monthly flat fee, causing a deterioration of our operating margin. In the case of contracts which have a fee based on actual levels of consumption, if our subscribers use higher levels of mobile telephony services, we will be charged a higher fee based on such levels of consumption. As our mobile subscribers generally pay a flat subscription fee to us, higher usage patterns and hence higher fees under our contracts could put pressure on our margins. In France, our MVNO agreements with Bouygues Telecom relating to voice transmission services are due to expire in 2017 and those relating to data transmission expired in 2012 and were automatically renewed for an indefinite term, subject to termination by either party with twelve months' notice. We also have MVNO agreements with SFR relating to voice transmission services and those relating to data transmission. In addition, while Bouygues Telecom and SFR have best efforts obligations under the respective MVNO agreements, each has the unilateral right to modify their terms should it become unable to perform all or part of its obligations due to technical or regulatory reasons. In Belgium, our MVNO agreement is valid for an initial term of three years expiry at the end of December 2014. In Belgium, we have entered into a MVNO agreement with BASE to provide us with MVNO services for a period of three years (which, as such, is valid until December 2017). If we are unable to renew or replace the services provided by these operators with respect to roaming or MVNO services on favorable terms, our business and results of operations may be negatively affected.

We rely on interconnecting telecommunications providers and could be adversely affected if these providers fail to provide these services without disruption and on a consistent basis.

Our ability to provide commercially viable telephone services in the jurisdictions in which we operate depends upon our ability to interconnect with the telecommunications networks of fixed-line, mobile and international operators in such jurisdictions in order to complete calls between our subscribers and parties on a fixed-line or other mobile telephone network, as well as third parties abroad. Generally, fixed-line telephony, mobile and international operators in the jurisdictions in which we operate are obliged by law to provide interconnection to, and not to discriminate against, any other licensed telecommunications operator. We have no control over the quality and timing of the investment and maintenance activities that are necessary for these entities to provide us with interconnection to their respective telecommunications networks. In Israel, for instance, the implementation of number portability requires us to rely further on other providers, since our ability to implement number portability, provide our services and our basic ability to port numbers between operators are dependent on the manner of number portability implementation by interconnecting local operators.

The failure of these or other telecommunications providers to provide reliable interconnections to us on a consistent basis and under terms that are favorable to us could have an adverse effect on our business, financial condition or results of operations.

In addition, interconnection agreements and interconnection rates are normally subject to regulation in the jurisdictions in which we operate. In the Dominican Republic, interconnection rates are not set by the regulator but are individually negotiated by operators, however, operators must report the agreements they reach with each other to the regulator. The regulator reserves the right to intervene, if necessary, to establish prices and access to backhaul. Any changes in the interconnection rates set by the regulators may impact our results of operations. In the Dominican Republic, ODO has challenged the legality of a decision by Indotel which modified the regulation on interconnection agreements to include backhaul as an essential facility. If the Dominican Republic courts uphold the decision rendered by Indotel, ODO will have to comply with the conditions related to backhaul. It is unclear what financial implications this would have on ODO's operations.

Reduced interconnection rates have negatively affected PT Portugal's revenues for its Portuguese telecommunications businesses and will continue to do so in 2015.

In recent years, ANACOM has imposed price controls on interconnection rates for the termination of calls on mobile networks. These reductions have had a significant impact on interconnection revenues of PT Portugal's mobile subsidiary, Meo, S.A., and, consequently, on its earnings.

ANACOM has issued successive decisions that have reduced mobile termination rates over time. Most recently, in March 2012, ANACOM issued a final decision reducing mobile termination rates progressively to € 0.0127 by December 2012. The reductions in mobile termination rates have had and will continue to have a negative effect on PT Portugal's cash flows and revenues.

The Portuguese Competition Authority also completed an analysis of mobile rates for originating calls to non-geographic numbers in January 2012, finding origination rates to be excessive, and issued a recommendation that mobile operators must reduce their rates to a level reflecting their costs or face the possibility of being sanctioned. In March, 14, 2014, the Portuguese Competition Authority requested Meo, S.A. information regarding its mobile origination rates for calls to non-geographic numbers. Meo, S.A. responded to this request in April, 1, 2014, and there are no further developments since then.

With respect to the wholesale market for voice call termination on individual public telephone networks at a fixed location (Relevant Market 3), on March 7, 2013, ANACOM published a draft decision, proposing to set an average symmetrical fixed termination rate, or FTR, of €0.1091 from October 1, 2013, to July 1, 2014. This rate was calculated as the average FTR of the countries that had already notified the European Commission of their decisions with respect to their national markets based on pure Bottom Up Long-Run Average Incremental Cost, or BU-LRIC, cost models. In August 2013, after the European Commission expressed serious concerns in respect of ANACOM's draft decision, ANACOM decided to withdraw its decision and instead to impose interim and urgent measures. Under its revised measures, ANACOM determined that the maximum average prices to be adopted by operators identified as having significant market power in Relevant Market 3 should be €0.1114 per minute as of October 1, 2013, and that as of July 1, 2014, the price will be set using a pure LRIC cost model that is being developed. In November 2013, ANACOM issued a new decision imposing additional interim and urgent measures for the termination market (this decision has defined the prices PTC must adopt regarding each of the three levels of interconnection of the termination services provided and imposed similar obligations on the remaining operators who have complex prices), and launched a consultation regarding the development and implementation of a cost model for the fix termination market. On July 10, 2014, ANACOM approved (i) a draft decision regarding the definition of the fix termination wholesale market, the evaluation of significant market power in that market and the imposition, maintenance, modification and suppression of regulatory obligations in that market, and (ii) a draft decision regarding the cost model for the fixed termination market (which had been preceded by a public consultation launched in November 2013). Pursuant to Portuguese law, both draft decisions were submitted for public consultation for a period of 30 business days. We expect a final report to be published by ANACOM in the near future.

ANACOM's interconnection price controls may also negatively affect PT Portugal's revenues from fixed line residential services because it is required to reflect the reduction in these interconnection charges in our retail prices for calls from its fixed line network in Portugal. We expect ANACOM to lift these price controls following the designation of NOS as the universal service obligation, or USO, provider for fixed lines. We expect that the reduction in interconnection charges will continue to have an impact on PT Portugal's revenues from fixed line residential services in Portugal.

In addition, the lower interconnection rates have slightly reduced revenues for PT Portugal's wholesale business, which records revenues from international incoming calls transiting through its network that terminate on the networks of mobile and other fixed operators. The prices PT Portugal charge to international operators (and hence its revenues) also depend on the interconnection fees charged by mobile and fixed operators for international incoming calls terminating on their networks, and these fees have been decreasing. We expect that lower interconnection rates will continue to have a negative impact on PT Portugal's wholesale revenues.

We rely on third parties for access to and the operation of certain parts of our network.

We are generally dependent on access to sites and land belonging to, and network infrastructure owned by, third parties, including for cable duct space and antennas used for our networks and facility space (colocation). In this respect, we have generally obtained leases, rights and licenses from network operators, including incumbent operators, governmental authorities and individuals. Our ability to offer our services to customers depends on the performance of these third parties of their obligations under such leases, licenses and rights.

If we are not able to renew our current lease agreements for these sites and/or enter into new lease agreements for suitable alternate sites, this could have a negative impact on the coverage of our network. In certain cases we are reliant on such third parties to provide installation and maintenance services, such as in Israel where we rely on our competitor and incumbent operator Bezeq to provide installation and maintenance services on certain parts of our cable network. Following the implementation of the Network Sharing Agreement with Partner, we will rely on the newly formed limited partnership (in which HOT Mobile and Partner shall each hold an equal share), which will hold, develop and operate an advanced shared mobile network for both companies. In France, Orange has granted us several IRUs on its network infrastructure (mainly ducts). These IRUs, which were entered into at various dates, were granted to us for terms of 20 years each, and the renewal of the first of these will have to be negotiated between the parties before or in 2019. We cannot guarantee that these IRUs will be renewed or that they will be renewed on commercially acceptable terms. If Orange were not to renew such IRUs, we would need to require Orange to make the ducts available to us pursuant to applicable regulation, which could, however, result in different financial terms. The portion of our network using the ducts of Orange represents 55% of our network in France. Orange could also grant IRUs on its infrastructure to some of our competitors, increasing the competitive pressure on our markets, and tighten the procedures set forth by Orange to operate on its infrastructure. Furthermore, in France we also rely on Bouygues Télécom and SFR with whom we have entered into several MVNO agreements that enable us to provide mobile telephony services to residential and business customers using their networks. Moreover, approximately 7% of our network in France is governed by long-term leases of public property, conventions d'affermage (i.e. a type of operating concession through which we lease an entire network) or public land use agreements (convention d'occupation du domaine public), through which we install the necessary network equipment on public property with no underlying property transfer. These agreements are entered into with local authorities, primarily municipalities, for terms ranging from ten to 30 years. In accordance with articles L. 2122-2 and L. 2122-3 of the *Code général de la propriété des personnes publiques*, local authorities may terminate these public land use agreements at any time by demonstrating that doing so is in the public interest. Upon expiration of these agreements, we must, in accordance with our contractual obligations, (i) return the entire network to local authorities, in some cases against the payment by the local authorities of an amount equal to the market value of the network, and in some cases free of charge, (ii) remove the entire network at our own expense or at the expense of the local authorities, (iii) transfer the network to other operators with the approval of local authorities, or (iv) repurchase the network. In accordance with the law applicable to these agreements, upon expiration of long-term leases, the network reverts back to the local authorities.

If third parties refuse to or only partially fulfil their obligations under or terminate the licenses granted to us or prevent the required access to certain or all of such sites, it could prevent or delay the connection to sites or customers, limit the growth of our offerings and influence our ability to supply high quality service to our customers in a timely and cost effective manner. In addition, the costs of providing services is dependent on the pricing and technical terms under which we are given such access and any change in such terms may have a material adverse effect on our business. In many cases, we may not be able to find suitable alternatives at comparable cost or within a reasonable timeframe.

If we are unable to obtain attractive programming on satisfactory terms for our pay television services, the demand for these services could be reduced, thereby lowering revenue and profitability.

The success of our basic and premium pay television services depends on access to an attractive selection of television programming from content providers. The ability to provide movie, sports and other popular programming, including VOD content, is a major factor that attracts subscribers to pay television services, especially premium services.

We rely on digital programming suppliers for a significant portion of our programming content and VOD services. We may not be able to obtain sufficient high-quality programming from third party producers for our digital cable television services on satisfactory terms or at all in order to offer compelling digital cable television services. In addition, we also rely on certain of our competitors, such as Canal Plus Group in France, for the provision of certain content offerings. Further, with respect to our operations in Israel, we cannot assure you that the local content we are required to develop in conjunction with our partner studios will continue to be successful. The inability to obtain high-quality content, may also limit our ability to migrate customers from lower tier programming to higher tier programming, thereby inhibiting our ability to execute our business strategy. In addition, we are currently subject to "must carry" requirements in certain of the jurisdictions in which we operate that may consume channel capacity otherwise available for other services. Any or all of these factors could result in reduced demand for, and lower revenue and profitability from, our digital cable television services.

Also, some of our programming contracts require us to pay prices for the programming based on a guaranteed minimum number of subscribers, even if that number is larger than the number of actual subscribers. In addition, some of our programming contracts are based on a flat fee irrespective of the popularity of the content purchased under such contract. As a result, if we misjudge anticipated demand for the programming or if the programming we acquire does not attract the number of viewers we anticipated, the profitability of our television services may be impaired.

In addition, program providers and broadcasters may elect to distribute their programming through other distribution platforms, such as satellite platforms, digital terrestrial broadcasting or IPTV, or may enter into exclusive arrangements with other distributors.

Furthermore, as we purchase a significant portion of our content from various content providers under relatively short-term contracts, the prices we pay to purchase such content are subject to change and may increase significantly in the future, which could have a material adverse effect on our results of operations.

An increase in the rate of our annual royalty or other payments with respect to our licenses could adversely affect our results of operations.

We are required to make certain royalty payments to the State of Israel in connection with our domestic license with respect to our broadband Internet and fixed-line services, our broadcasting license, our mobile license and our international long distance telephony services. See "*Regulatory—Israel—Broadband Internet Infrastructure Access and Fixed-Line Telephony—Fees and Royalty Payments.*" In Israel, although the royalty payments due to the Israeli Ministry of Communication have decreased in recent years and have been reduced to zero with effect from January 2013, there is no assurance that the Israeli Ministry of Communications would not reinstate or increase them in the future. We are still required to make annual payments until January 2015, to the State of Israel for the use of cable infrastructure. In Portugal, we are required to pay certain fees to the regulatory authority to cover certain costs of such authority that are allocated amongst the telecommunications operators, such as an annual fee calculated considering our turnover in the telecommunications sector, as well as annual fees for number usage and for frequency usage. We are also required to pay fees for number allocation, for frequency allocation and for certain declarations of rights, among other fees. If the Israeli Ministry of Communications and the Israeli Ministry of Finance or the relevant government authorities in Portugal or in the other jurisdictions in which we operate increase the royalty or other payments we are required to make pursuant to our licenses or otherwise, it may have a material effect on our revenue and results of operations.

We depend on hardware, software and other providers of outsourced services, who may discontinue their services or products, seek to charge us prices that are not competitive or choose not to renew contracts with us.

We have important relationships with several suppliers of hardware, software and related services that we use to operate our pay television, broadband Internet, fixed-line telephony, mobile and B2B businesses. In certain cases, we have made substantial investments in the equipment or software of a particular supplier, making it difficult for us to quickly change supply and maintenance relationships in the event that our initial supplier refuses to offer us favorable prices or ceases to produce equipment or provide the support that we require. For example, while we continue to promote a rapid take up of our premium triple-play services, which combines premium television services including, VOD functionality, HD technology and recording capabilities, very high-speed Internet and fixed-line telephony, using a single set-top box in several of our geographies including France, Portugal, Belgium and Luxembourg and Israel, we face potential risks in securing the required customer set-top box equipment to maintain this roll out as we currently rely on a single provider to provide us with such equipment. Currently, we have a sufficient supply of these boxes available, but a future shortage may involve significant delays in seeking an alternative supply, may constrain our ability to meet customer demand and may result in increased customer churn. Further, in the event that hardware or software products or related services are defective, it may be difficult or impossible to enforce recourse claims against suppliers, especially if warranties included in contracts with suppliers have expired or are exceeded by those in our contracts with our subscribers, in individual cases, or if the suppliers are insolvent, in whole or in part. In addition, there can be no assurances that we will be able to obtain the hardware, software and services we need for the operation of our business, in a timely manner, at competitive terms and in adequate amounts. In particular, in the case of an industry-wide cyclical upturn or in the case of high demand for a particular product, our suppliers of software, hardware and other services may receive customer orders beyond the capacity of their operations, which could result in late delivery to us, should these suppliers elect to fulfil the accounts of other customers first. We have, from time to time, experienced extensions of lead times or limited supplies due to capacity constraints and other supply-related factors, as well as quality control problems with service providers. We may also not be able to recover monies paid to such suppliers or obtain contractual damages to which we may be entitled (if any) in the event our suppliers fail to comply with their obligations in a timely manner.

We also outsource some of our support services, including parts of our subscriber services, information technology support, technical services, and maintenance operations. Should any of these arrangements be terminated by either contract party, this could result in delays or disruptions to our operations and could result in us incurring additional costs, including if the outsourcing counterparty increases pricing or if we are required to locate alternative service providers or in-source previously outsourced services.

Further, we are dependent on certain suppliers with respect to our mobile services in Israel who we may not be able to replace without incurring significant costs. With respect to our 3G mobile operations, we have engaged NSN Nokia Solutions and Networks ("NSN") as a turnkey contractor to plan and build the new UMTS network. With respect to our iDEN-based mobile services, we are dependent on Motorola Solutions which, to the best of our knowledge, holds all the rights to and is the sole provider of infrastructure equipment and end- user equipment for this technology. A cessation or interruption in the supply of the products and/or services by NSN or Motorola Solutions may harm our ability to provide our mobile services to our subscribers.

Our ability to renew our existing contracts with suppliers of products or services, or enter into new contractual relationships, with these or other suppliers, upon the expiration of such contracts, either on commercially attractive terms, or at all, depends on a range of commercial and operational factors and events, which may be beyond our control. The occurrence of any of these risks or a significant disruption in our supply of equipment and services from key sourcing partners could create technical problems, damage our reputation, result in the loss of customer relationships and have a material adverse effect on our business, financial condition and results of operations.

Failure in our technology or telecommunications systems could significantly disrupt our operations, which could reduce our customer base and result in lost revenue.

Our success depends, in part, on the continued and uninterrupted performance of our information technology and network systems as well as our customer service centers. The hardware supporting a large number of critical systems for our cable networks and mobile networks is housed in a relatively small number of locations. Our systems are vulnerable to damage from a variety of sources, including telecommunications failures, power loss, malicious human acts and natural disasters. Moreover, despite security measures, our servers are potentially vulnerable to physical or electronic break-ins, computer viruses and similar disruptive problems. Despite the precautions we have taken, unanticipated problems affecting our systems could cause failures in our information technology systems or disruption in the transmission of signals over our networks. Sustained or repeated system failures that interrupt our ability to provide service to our customers or otherwise meet our business obligations in a timely manner would adversely affect our reputation and result in a loss of customers and revenues.

If any part of our cable or mobile networks, including our information technology systems, is subject to a flood, fire or other natural disaster, terrorism, acts of war, a computer virus, a power loss, other catastrophe or unauthorized access, our operations and customer relations could be materially adversely affected. For example, although our cable networks are generally built in resilient rings to ensure the continuity of network availability in the event of any damage to its underground fibers, if any ring is cut twice in different locations, transmission signals will not be able to pass through, which could cause significant damage to our business. In the event of a power outage or other shortage, we do not have a back-up or alternative supply source for all of our network components. The occurrence of any such event could cause interruptions in service or reduce capacity for customers, either of which could reduce our revenue or cause us to incur additional expenses. In addition, the occurrence of any such event may subject us to penalties and other sanctions imposed by regulators such as the Portuguese telecommunications regulator (the *Autoridade Nacional das Comunicações*, or ANACOM) (in the case of our businesses in Portugal). Further, we may incur costs and revenue losses associated with the unauthorized use of our networks, including administrative and capital costs associated with the unpaid use of our networks as well as with detecting, monitoring and reducing the incidences of fraud. Fraud also impacts interconnect costs, capacity costs, administrative costs and payments to other carriers for unbillable fraudulent roaming charges.

Additionally, our businesses are also dependent on certain sophisticated critical systems, including our switches, billing and customer service systems, which could be damaged by any of the aforementioned risks. For example, if we experience problems in the operation of our billing systems, it may be difficult to resolve the issue in a timely and cost effective manner. In addition, the hardware that supports our switches, billing and customer service systems is housed in a relatively small number of locations and if damage were to occur to any of such locations, or if those systems develop other problems, it could have a material adverse effect on our business. Moreover, we may incur liabilities and reputational damages to the extent that any accident or security breach results in a loss of or damage to customers' data or applications, or inappropriate disclosure of confidential information. Additionally, we rely on hardware, software, technical services and customer support provided by third parties. We do not control the proper functioning of such third party equipment, and to the extent hardware, software, technical services and customer support provided by third parties fails, our business operations may be adversely affected.

As the number of our customers and the services that we offer our customers increases, the complexity of our product offerings and network architecture also increases, as does network congestion. A failure to manage the growth and complexity of our networks could lead to a degradation of service and network disruptions that could harm our reputation and result in a loss of subscribers. In France, any failure to increase our homes passed connected to the Docsis 3.0-enabled portion of our cable network as planned may affect our results of operations. In Israel, any delays or technical difficulties in establishing our UMTS network may affect our results of operations. Further, although many of our products and services are built on standardized platforms, they have been adapted or tailored to our networks and the offerings we have designed, as a result of which we face the risk of any newly implemented technology that there may be unexpected operational issues that arise. If we were to experience a breakdown of equipment or technology that we cannot timely repair, we might lose subscribers.

We are not generally insured against war, terrorism (except to a limited extent under our general property insurance) and cyber risks and do not generally insure the coaxial portion of our network. Any catastrophe or other damage that affects any of our networks in the jurisdictions in which we operate could result in substantial uninsured losses. In addition, disaster recovery, security and service continuity protection measures that we have or may in the future undertake, and our monitoring of network performance (including in Israel from our network operating center in Yakum), may be insufficient to prevent losses.

In addition, although so far no incidents have occurred in numbers that are statistically significant, our technical equipment has been and may continue to be subject to occasional malfunctioning due to technical shortcomings or imperfect interfaces with equipment in private homes, the networks of other operators or our own network or with other surrounding equipment. We might incur liabilities or reputational damages as a result thereof.

Our reputation and financial condition may be affected by product quality issues, in particular in connection with LaBox.

Many of our products and services, including LaBox which we have rolled out in France, Belgium, Luxembourg, Portugal and Israel, are manufactured and maintained through complex and precise technological processes. These complex products may contain defects or experience failures when first introduced or when new versions or enhancements to existing products are released. We cannot guarantee that, despite testing procedures, errors will not be found in new products, including LaBox, after launch. Such errors could result in a loss of, or a delay in market acceptance of our products, increased costs associated with customer support, delay in revenue recognition or loss of revenues, writing down the inventory of defective products, replacement costs, or damage to our reputation with our customers and in the industry. Any such error could also require a software solution that would cure the defect but impede performance of the product. In addition, any loss of confidence by customers in us may cause sales of our other products to drop significantly. Furthermore, we may have difficulty identifying customers whose products are defective. As a result, we could incur substantial costs to implement modifications and correct defects. Any of these problems could materially adversely affect our results of operations.

Customer churn, or the threat of customer churn, may adversely affect our business.

Our ability to attract and retain subscribers to our cable based and mobile services or to increase profitability from existing subscribers will depend in large part on our ability to stimulate and increase subscriber usage, convince subscribers to switch from competitors' services to our services and our ability to minimize customer "churn". Customer churn is a measure of the number of customers who stop subscribing for one or more of our products or services. Churn arises mainly as a result of competitive influences, introduction of new products and technologies, deterioration of personal financial circumstances, price increases and regulatory developments. In Israel, the regulatory framework prohibits, among other things, cable based service providers and mobile operators from charging exit fees, except in limited circumstances, to subscribers who wish to terminate their services and mobile operators from selling locked handsets or linking the terms of sale of handsets to the terms of mobile services, including discounts and other benefits, which has increased churn rates for many cable based service providers and mobile operators. If we fail to effectively communicate the benefits of our networks through our marketing advertising efforts, we may not be able to attract new customers and our efforts to attract and retain customers may prove unsuccessful. With the launch of our UMTS network in 2012, our mobile churn rate in Israel increased from historical levels as 3G mobile services generally have a higher churn rate than iDEN mobile services. In addition, any interruption of our services or the removal or unavailability of programming, which may not be under our control, could contribute to increased customer churn. Further our competitors may improve their ability to attract new customers, for example by offering new product bundles or product offerings at lower prices than us, which would make it difficult for us to retain our current subscribers, and the cost of retaining and acquiring new subscribers could increase. Moreover, the churn rate in our white label business in France may increase for reasons outside of our control (as we are not involved in client services and retention). For example, the acquisition by Bouygues Télécom of Darty's telecommunications business in July 2012 will likely continue to lead to a decrease in Darty's DSL end-customers in the long-term as Bouygues Télécom encourages Darty's customer base to migrate to Bouygues Télécom's own DSL network. In Portugal, we experienced increase churn in recent periods mainly as a result of aggressive competition and the adverse economic conditions. In addition, our B2B operations are also subject to "tariff churn" (i.e. an existing customer negotiating tariff decreases). Large corporate customers in particular are highly sophisticated and often aggressive in seeking to renegotiate the pricing of their contracts which tends to result in margin pressure. Increased customer or tariff churn may have a material adverse effect on our business, financial condition and results of operation.

Acquisitions and other strategic transactions present many risks including the risk that we may not be able to integrate newly acquired operations into our business, which may prevent us from realizing the strategic and financial goals contemplated at the time of any such transaction and thus adversely affect our business.

Historically, our business has grown, in part, through a significant number of selective acquisitions that enabled us to take advantage of existing networks, service offerings and management expertise. Since 2010, we have acquired the HOT Telecommunications group in Israel, Cabovisão and ONI in Portugal, Outremer Telecom and Mobius in the French Overseas Territories, Tricom and ODO in the Dominican Republic, as well as majority controlling equity interests in Coditel with operations in Belgium and Luxembourg, the Numericable Group in France and Tricom and ODO in the Dominican Republic. In addition, we entered into agreements to acquire SFR which completed on November 27, 2014. On December 9, 2014, we entered into an agreement with Oi S.A. to purchase 100% of the issued share capital of PT Portugal. The PT Portugal Acquisition is subject to certain conditions including regulatory approval in Portugal and merger-control clearance by the European Commission (or from the Portuguese Competition Authority, under the referral mechanism set forth in the EU merger control rules). We expect to continue growing our business through acquisitions of cable and telecommunications businesses that we believe will present opportunities to create value by generating strong cash flows and operational synergies.

Any acquisition or other strategic transaction we may undertake in the future could result in the incurrence of debt and contingent liabilities and an increase in interest expenses and amortization expenses related to goodwill and other intangible assets or in the use by us of available cash on hand to finance any such acquisitions. We may experience difficulties in integrating acquired operations into our business, incur higher than expected costs and not realize all the anticipated benefits or synergies of these acquisitions, if any. Such transactions may also disrupt our relationships with current and new employees, customers and suppliers. In addition, our management may be distracted by such acquisitions and the integration of the acquired businesses. Thus, if we consummate any further acquisitions or fail to integrate any previous acquisitions, there could be a material adverse effect on our business, financial condition or results of operations. In addition, our debt burden may increase if we borrow funds to finance any future acquisition, which could have a negative impact on our cash flows and our ability to finance our overall operations. If we use available cash on hand to finance acquisitions pursuant to our acquisition strategy, our ability to make dividend payments may be limited or we may not be able to make such dividend payments at all. There can be no assurance that we will be successful in completing business acquisitions or integrating previously acquired companies.

There can be no assurance that we will receive the required governmental approvals and meet the other conditions required to consummate the PT Portugal Acquisition. Furthermore, acquisitions of additional telecommunications companies may require the approval of governmental authorities (either at country or, in the case of the EU, European level), which can block, impose conditions on, or delay the process which could result in a failure on our part to proceed with announced transactions on a timely basis or at all, thus hampering our opportunities for growth. In the event conditions are imposed and we fail to meet them in a timely manner, the relevant governmental authority may impose fines and, if in connection with a merger transaction, may require restorative measures, such as mandatory disposition of assets or divestiture of operations. In connection with the acquisition of SFR by Numericable, we have entered into a commitment with the French Competition Authority to dispose of our mobile network assets in Mayotte and La Réunion (which are part of our Group’s business in the French Overseas Territories). If this disposal is not completed by mid-2015, we are committed to appoint an independent agent (who must be approved by the French Competition Authority) to complete such disposal. Further, we have undertaken to ensure that such mobile assets in La Réunion and in Mayotte are managed independently from the other activities of the Altice France Group (including those of SFR) prior to such disposal.

Although we analyze and conduct due diligence on acquisition targets, our assessments are subject to a number of assumptions concerning profitability, growth, interest rates and company valuations and our inquiries may fail to uncover relevant information. There can be no assurance that our assessments or due diligence of and assumptions regarding acquisition targets will prove to be correct, and actual developments may differ significantly from our expectations. Moreover, our plans to acquire additional businesses in the future are subject to the availability of suitable opportunities. Our competitors may also follow similar acquisition strategies and may have greater financial resources available for investments or may be willing to accept less-favorable terms than we can accept, which may prevent us from acquiring the businesses that we target to the benefit of our competitors.

We may be unable to allocate sufficient managerial and operational resources to meet our needs as our business grows, and our current operational and financial systems and managerial controls and procedures may become inadequate.

Historically, our business has grown, in part, through selective acquisitions. As a result, the operating complexity of our business, as well as the responsibilities of management, has increased, which may place significant strain on our managerial and operational resources.

Although we consider the operational and financial systems and the managerial controls and procedures that we currently have in place to be adequate for our purposes, we recognize that the effectiveness of these systems, controls and procedures needs to be kept under regular review as our business grows. We will have to maintain close coordination among our logistical, technical, accounting, finance, marketing and sales personnel. Management of growth will also require, among other things, continued development of financial and management controls and information technology systems. The constant growth and increased international operations may strain our managerial resources which may require us to hire additional managerial resources. We may be unable to hire managers with the relevant expertise or the hiring process may require significant time and resources, all of which could result in a disruption in our management, growth, operational and financial systems, managerial controls and procedures and results of operations

Any failure to apply the necessary managerial and operational resources to our growing business and any weaknesses in our operational and financial systems or managerial controls and procedures may impact our ability to produce reliable financial statements and may adversely affect our business, financial condition and results of operations.

Pressure on customer service could adversely affect our business.

The volume of contacts handled by our customer service functions can vary considerably over time. The introduction of new product offerings can initially place significant pressure on our customer service personnel. Increased pressure on such functions is generally associated with decreased satisfaction of customers.

In the B2B and wholesale markets, customers require service to be extremely reliable and to be reestablished within short timeframes if there is any disruption. Penalties are often payable in the case of failure to meet expected service quality. In addition, product installation can be complex, requiring specialized knowledge and expensive equipment. Delays and service problems may result in both penalties and the potential loss of customers. In these segments, we rely on our experienced customer relations personnel to handle any customer issues or requests, and the loss of such personnel can result in the loss of customers. For example, in the first half of 2012 in France, loss of personnel as a result of our relocation of our B2B engineers from Champs sur Marne to Rouen adversely affected the number of installations and results in such period.

We have in the past experienced significant levels of customer dissatisfaction as a result of operational difficulties, particularly in our residential and B2B businesses in France. With respect to our residential operations in France, these dissatisfaction levels resulted primarily from operational difficulties stemming from the integration of the various cable businesses we acquired in 2005 and 2006. Improvements to customer service functions may be necessary to achieve desired growth levels, and, if we fail to manage such improvements effectively and achieve such growth, we may in the future experience customer service problems and damage our reputation, contribute to increased churn and/or limit or slow our future growth.

Revenue from certain of our services is declining, and we may be unable to offset this decline.

We continue to provide analog television services to subscribers in all of our geographies where we provide pay television services but expect that the number of subscribers to such services will continue to decline and that such services will ultimately be phased out. Furthermore, our analog television subscribers may decide, upon their transition to a digital television service, to shift to other providers of television services.

We also expect our DSL white label business with Bouygues Télécom (previously with Darty) in France to continue to decline. Bouygues Télécom acquired Darty's telecom business in July 2012. According to an agreement with Bouygues Télécom, a certain number of customers were migrated in 2012 to Bouygues Télécom's network (such customers being only partially unbundled on our network and able to be fully unbundled on Bouygues' network), but the remaining clients have not been automatically migrated to Bouygues Télécom's DSL network. However, Bouygues Télécom has succeeded in recruiting new subscribers onto its own DSL network, and churn at Darty has led to a decrease in customers on our DSL network in France.

Disruptions in the credit and equity markets could increase the risk of default by the counterparties to our financial instruments, undrawn debt facilities and cash investments and may impact our future financial position.

Although we seek to manage the credit risks associated with our financial instruments, cash and cash equivalents and undrawn debt facilities, disruptions in credit and equity markets could increase the risk that our counterparties could default on their obligations to us. Were one or more of our counterparties to fail or otherwise be unable to meet its obligations to us, our cash flows, results of operations and financial condition could be adversely affected. It is not possible to predict how disruptions in the credit and equity markets and the associated difficult economic conditions could impact our future financial position. In this regard, (i) the financial failures of any of our counterparties could (a) reduce amounts available under committed credit facilities and (b) adversely impact our ability to access cash deposited with any failed financial institution and (ii) sustained or further tightening of the credit markets could adversely impact our ability to access debt financing on favorable terms, or at all.

Our brands are subject to reputational risks.

The brands under which we sell our products and services, including HOT, SFR, Numericable, Coditel, Completel, Cabovisão, ONI, Izi, Only, Orange Dominicana and Tricom are well-recognized brands in Israel, France, Belgium and Luxembourg, Portugal, the French Overseas Territories and the Dominican Republic, as applicable. We have developed the brands we use through extensive marketing campaigns, website promotions, customer referrals, and the use of a dedicated sales force and dealer networks. Upon completion of the PT Portugal Acquisition, brands including MEO will be added to our portfolio.

Our brands represent a material and valuable asset to us. Although we try to manage our brands, we cannot guarantee that our brands will not be damaged by circumstances that are outside our control or by third parties such as hackers, sponsorees, or interfaces with its clients, such as subcontractors' employees or sales forces, with a resulting negative impact on our activities. In particular, our image is increasingly tied to LaBox, an innovative set-top box we source from a third-party supplier.

A failure on our part to protect our image, reputation and the brands under which we market our products and services may have a material adverse effect on our business and results of operations.

Our business may suffer if we cannot continue to license or enforce the intellectual property rights on which our business depends.

We rely on patent, copyright, trademark and trade secret laws and licenses and other agreements with our employees, customers, suppliers and other parties to establish and maintain our intellectual property rights in content, technology and products and services used to conduct our businesses. However, our intellectual property rights or those of our licensors could be challenged or invalidated, we could have difficulty protecting or obtaining such rights or the rights may not be sufficient to permit us to take advantage of business opportunities, which could result in costly redesign efforts, discontinuance of certain product and service offerings or other competitive harm.

We have been, and may be in the future, subject to claims of intellectual property infringement, which could have an adverse impact on our business or operating results.

We have received and may receive in the future claims of infringement or misappropriation of other parties' proprietary rights, particularly creative rights with respect to broadcasted programs. In addition to claims relating to broadcasts on channels which we own, we may be subject to intellectual property infringement claims with respect to programs broadcast on the other channels, including foreign channels that we carry. These claims may require us to initiate or defend protracted and costly litigation, regardless of the merits of these claims. Generally, law relating to intellectual property contains provisions allowing the owner of an intellectual property right to apply to courts to grant various enforcement measures and other remedies, such as temporary and permanent injunctive relief, a right to confiscate infringing goods and damages. Successful challenges to our rights to intellectual property or claims of infringement of a third party's intellectual property could require us to enter into royalty or licensing agreements on unfavorable terms, incur substantial monetary liability or be temporarily or permanently prohibited from further use of the intellectual property in question. This could require us to change our business practices and limit our ability to provide our customers with the content that they expect. If we are required to take any of these actions, it could have an adverse impact on our businesses or operating results. Even if we believe that the claims of intellectual property infringement are without merit, defending against the claims can be time-consuming and costly and divert management's attention and resources away from its businesses.

The operation of our conditional access systems is dependent on licensed technology and subject to illegal piracy risks.

We operate conditional access systems to transmit encrypted digital programs, including our digital pay television packages. For example, in Israel, we are party to an agreement with NDS Limited, pursuant to which NDS Limited has agreed to sell and install parts of our conditional access system for our cable distribution, including hardware equipment, to grant licenses for the respective intellectual property rights for the conditional access system and to provide maintenance, support and security services. We are currently in the process of reviewing our contractual arrangements with NDS Limited for the provision of these products and services. We are also party to similar agreements with Cisco, the parent company of NDS Limited, across our other operations. Billing and revenue generation for our services rely on the proper functioning of our conditional access systems.

Even though we require our conditional access system providers to provide state-of-the-art security for the conditional access systems, the security of our conditional access systems may be compromised by illegal piracy and other means. In addition, our set top boxes require smart cards before subscribers can receive programming and our smart cards have been and may continue to be illegally duplicated, providing unlawful access to our television signals. While we work diligently to reduce the effect of piracy, there can be no assurance that we will be able to successfully eliminate the piracy we currently face. In addition, there can be no assurance that any new conditional access system security that we may put in place will not be circumvented. Encryption failures could result in lower revenue, higher costs and increased basic cable subscriber churn or otherwise have a material adverse effect on our business, financial condition and results of operations.

We collect and process subscriber data as part of our daily business and the leakage of such data may violate laws and regulations which could result in fines, loss of reputation and subscriber churn and adversely affect our business.

We accumulate, store and use data in the ordinary course of our operations that is protected by data protection laws. Regulatory authorities in the jurisdictions in which we operate our businesses have the right to audit us and impose fines if they find we have not complied with applicable laws and adequately protected customer data. Although we take precautions to protect subscriber data in accordance with the applicable privacy requirements in the jurisdictions in which we operate, we may fail to do so and certain subscriber data may be leaked or otherwise used inappropriately. We work with independent and third party sales agents, service providers and call center agents, and although our contracts with these third parties generally restrict the use of subscriber data, we can provide no assurances that they will abide by the contractual terms or that the contracts will be found to be in compliance with data protection laws. Violation of data protection laws may result in fines, loss of reputation and subscriber churn and could have an adverse effect on our business, financial condition and results of operations. There can be no guarantee that our assessment of risk will be accurate or that provisions made will be sufficient.

We are exposed to, and currently engaged in, a variety of legal proceedings, including several existing and potential class action lawsuits in Israel and antitrust proceedings in Portugal.

In addition to a number of legal and administrative proceedings arising in the ordinary course of our business, we have been named as defendants in a number of civil proceedings related to our cable and mobile services, which may result in civil liabilities against us or our officers and directors. These include, amongst others, consumer claims regarding, for example, our tariff plans and billing methods and claims by competitors, which may result in significant monetary damages and civil penalties. The costs that may result from these lawsuits are only accrued when it is more likely than not that a liability, resulting from past events, will be incurred and the amount of that liability can be quantified or estimated within a reasonable range. The amount of the provisions recorded in our historical consolidated financial statements as of December 31, 2013, in respect of each lawsuit, which in the aggregate amounted to €18 million, is based on a case-by-case assessment of the risk level of each individual lawsuit, and events arising during the course of legal proceedings may require a reassessment of this risk. Our assessment of risk is based both on the advice of legal counsel and on our estimate of the probable settlement amounts that are expected to be incurred, if such a settlement will be agreed by both parties.

In Portugal, in January 2011, the European Commission opened an investigation into an agreement between Telefonica and PT Portugal Telecom SGPS allegedly not to compete in the Iberian telecommunications markets. In January 2013, the EC adopted a decision finding that Portugal Telecom SGPS and Telefonica had infringed Article 101 of the Treaty on the Functioning of the European Union with reference to Portugal Telecom's July 28, 2010, agreement with Telefònica concerning the acquisition by Telefonica of Portugal Telecom SGPS's stake in Brazilian operator Vivo. In accordance with this decision, Portugal Telecom SGPS was fined in the amount of €12.29 million. The January 2013 decision ended the investigation which began in January 2011, in which the European Commision analysed the relationship between both companies since 1996.

On April 9, 2013, Portugal Telecom SGPS brought an action for annulment before the General Court of European Union (the first level of appeal of the EU courts) and will continue to vigorously defend the matter. The matter is now waiting to be tried before the General Court. We note that the EU appeal courts have unlimited jurisdiction to review decisions where the EC has fixed a fine (including cancelling, reducing or increasing the fine).

Although the European Commission's decision was addressed to Portugal Telecom SGPS, PT Moveis, SGPS, S.A. was expressly mentioned in the decision as being involved in the alleged infringement (even though it is not the addressee of the European Commission decision). Portugal Telecom SGPS is therefore solely responsible for the payment of the fine. While the appeal is pending the payment of the fine was secured with a bank guarantee (with an initial term of one year that is automatically extended for additional periods of one year each). While this bank guarantee is in place, the European Commission will not enforce their decision in order to collect the fine. Accordingly, no provision has been recorded with regards to this matter.

In Israel, plaintiffs in these proceedings are often seeking certification as class actions. These claims are generally for significant amounts and may require us to initiate or defend protracted and costly litigation, regardless of the merits of these claims.

If any of these claims or claims that may arise in the future succeed, we may be forced to pay damages or undertake other actions which could affect our business and results of operations. See "*Description of our Business—Legal Proceedings*" and "*Description of PT Portugal's Business—Legal Proceedings*".

There are uncertainties about the legal framework under which we own and operate our network in France, Belgium and Luxembourg.

In France, we have been granted certain rights of use and operating concessions under the Plan Nouvelle Donne (the "New Deal Plan") (law of September 30, 1986 relating to the freedom of communications). Our networks built under the New Deal Plan represent approximately 38% of our overall network in France. There is no standard form of contract in connection with the New Deal Plan and, as a result, there has been a certain degree of uncertainty over the network ownership under certain long-term agreements entered into with local authorities, especially when these agreements contain a clause providing for the return to the local authority of assets used to carry out public services (*biens de retour*). We have entered into approximately 500 contracts for networks under the New Deal Plan.

In this context, law 2004-669 dated July 9, 2004, which implemented the 2002 European directives "2002 Telecoms Package" (the "Paquet Télécoms 2002") into French law, imposed the termination of exclusive rights over the installation and/or operation of networks contained in these agreements. In order to clarify the conditions for implementing such termination of exclusive rights over the installation and/or operation of networks in the agreements currently in place with public authorities (primarily local authorities), in May 2010, we made a proposal to ARCEP to novate the agreements under the following approach: the ownership of physical infrastructure (the ducts) reverts back to local authorities, while ownership of all existing telecommunications equipment and cables expressly revert back to us through a transfer process.

This approach led to the conclusion of transactional agreements that are in line with the above-mentioned requirement (i) containing the aforementioned provisions and (ii) including a right to the use of public land (*convention d'occupation du domaine public*), comprising a nonexclusive right for us to use the ducts which had become the property of the local authorities on the terms of such new agreements, with our own telecommunications equipment. One of the key features of these agreements is our right to use the ducts on a non-exclusive basis and our competitors' ability to install their own equipment in such ducts.

These new agreements, while in line with the approach acknowledged by ARCEP, could be challenged based on certain of their terms. While we have signed approximately 80 agreements, 25 of which follow the approach acknowledged by ARCEP, with various local authorities, no assurance can be given that we will be able to implement this type of agreement across all concerned localities. We are currently in the process of negotiating similar contracts with certain local authorities. If we are unable to negotiate such agreements with local authorities, the non-renegotiated terms of the agreements in place would continue to apply and we may be subject to claims or proceedings by local authorities, our competitors, and national and/or European administrative authorities.

Furthermore, upon expiration of the existing agreements, which include the concept of *biens de retour* (approximately half of our New Deal Plan contracts), that are not renegotiated or extended, local authorities would receive ownership of all or part of our network, for free or in exchange for payment, depending on the exact terms of each agreement. In order to continue operating in such localities, we would need to either install a new network in the local authorities' infrastructure identified as *biens de retour* through the payment of fees to the local authorities or through leasing the network of another operator or the network which would have thus been transferred to such local authority. In addition, the conditions, under which we renegotiated some of these agreements during the 2003 - 2006 period on terms that differ from those put forward in 2010 by ARCEP, led the European Commission, on July 17, 2013, to announce that it had opened an in-depth inquiry into whether the transfer of certain public cable infrastructure during such period by several French local authorities to Numericable was in accordance with European competition laws on state aid. The European Commission, in connection with the announcement of the opening of the inquiry, noted that it believed the transfer of public goods to a private enterprise without requiring appropriate compensation provided such enterprise with an economic advantage from which its competitors did not benefit and thus constituted state aid under the rules of the European Union, and that the free transfer of cable networks and ducts to Numericable conducted by approximately 45 French municipalities, according to its own estimates, conferred such an advantage and thus constituted state aid potentially in violation of EU law. We continue to firmly contest the existence of any state aid.

The European Commission's July 17, 2013 decision was published in the Official Journal of the European Union on September 17, 2013. The case is currently in a comment period during which we and third parties may make observations in relation to the allegations, with the Group continuing to firmly contest the existence of any state aid.

In Belgium and in Luxembourg, we built our network pursuant to agreements which we entered into during the 1960s and the 1970s with municipalities which authorized us to build and operate a television cable network in their territory. Since then, the regulatory framework has changed. In particular, the right of certain of the municipalities to receive royalty payments in consideration for the grant of the authorization, to reclaim ownership of the network and to regulate the prices at which we offer our services are arguably incompatible with the liberalization of the telecommunications market within the European Union. These uncertainties are compounded by the fact that the national laws adopted to implement European Union directives did not necessarily deal with these issues, that these agreements were sometimes renewed after the new regulatory regime was entered into force but were not amended to reflect such changes and by the lack of authoritative case law on the subject creating uncertainties as to the status of these networks and the rights of the different interested parties. Furthermore, there is no uniformity among these agreements. These uncertainties have led to litigation, including with the Roeser and Junglinster municipalities in Luxembourg which are currently pending on appeal. See "*Description of our Business—Legal Proceedings.*"

If we were to lose what we believe is the ownership of our network and our right to operate it in such litigation or in any new litigation, or because of any new law or regulation that would be favorable to the municipalities' claims, this would have a material adverse effect on our business, results of operations and financial condition.

Unfunded post retirement benefits obligations may put PT Portugal at a disadvantage to its competitors and could adversely affect our financial performance

Following the PT Portugal Acquisition, PT Portugal will become a part of the Group. The PT Portugal Group has unfunded post retirement benefits obligations that may limit its future use and availability of capital and adversely affect its financial and operating results. Although in December 2010, PTC transferred to the Portuguese government the post retirement benefits obligations relating to regulated pensions of Caixa Geral de Aposentações and Marconi, it retained all other obligations, including (1) salaries to suspended and pre-retired employees amounting to €808.1 million as of September 30, 2014, which PT Portugal must pay monthly directly to the beneficiaries until their retirement age and (2) €516.4 million in obligations related to pension supplements and healthcare as of September 30, 2014, which are backed by plan assets with a market value of €252.6 million, resulting in unfunded obligations of €1,071.8 million as of September 30, 2014.

Any decrease in the market value of PT Portugal's plan assets relating to its pension supplements and healthcare obligations could increase its unfunded position. Although there is an investment policy in place with capital preservation targets, in the current economic and financial crisis, in particular, the market value of its plan assets is volatile and poses a risk. In addition, PT Portugal's obligations to pay salaries to suspended and pre- retired employees are unfunded. The value of the obligations referred to above may also fluctuate, depending on demographic, financial, legal or regulatory factors that are beyond our control. For example, the Portuguese government has recently announced that the retirement age will be raised to 66 in 2015 and 66 and two months in 2016 and may raise it further in the future. A rise in the retirement age would increase our obligations to pay salaries to suspended and pre-retired employees. Any significant increase in PT Portugal's unfunded obligations could adversely affect its ability to raise capital, require it to use cash flows that it would otherwise use for capital investments, implementing its strategy or other purposes and adversely affect perceptions of its overall financial strength.

See "Management is Discussion and Analysis of Financial Condition and Results of Operations of the PT Portugal Group" for a description of PT Portugal's transfer of pension obligations to the Portuguese government.

PT Portugal and PT OpCo have significant post-retirement benefit and healthcare obligations the payment of which may have an adverse effect on its business and, therefore, the ability of the Issuer to make payments of principal and interest on the Notes.

As of September 30, 2014, the projected benefits obligations of PTC's post-retirement benefits, including pension supplements, healthcare benefits and salaries payable to pre-retired and suspended employees amounted to €1,316.4 million (€112.9 million for pension supplements, €402.0 million for healthcare benefits and €801.5 million for salaries payable to pre-retired and suspended employees). Salaries payable to pre-retired and suspended employees are obligations under individual agreements with employees to pay employees a significant portion of their existing salary to not work (or work part-time) until retirement.

The market value as of September 30, 2014 of the funds related to PTC's pension supplements and healthcare benefits amounted to €94.2 million and €158.5 million. In Portugal, there is no legislation on the establishment of funds to cover the healthcare obligations and the salaries for pre-retired and suspended employees, and PTC (and now PT OpCo) is required to pay for these benefits only when the salaries are paid to pre-retired and suspended employees, or when healthcare expenses are incurred. Accordingly, there is no requirement to fund these benefits obligations at present. Although the PT Portugal Group has set up a fund managed by a subsidiary, PT Prestações—Mandatária de Aquisições e Gestão de Bens, S.A., or PT Prestações, to finance the Group's healthcare post-retirement liabilities, no similar fund has been established to pay salaries owed to pre-retired and suspended employees.

The payment of these obligations by PTC may have an adverse effect on its business, the performance of the Altice International Group and, therefore, the Issuer to make payments of principal and interest on the Notes.

The Pro Forma Financial Information, the Illustrative Aggregated Selected Financial Information and the Historical Consolidated Financial Information presented in these Listing Particulars may not reflect what our actual results of operations and financial condition would have been had we been a combined company for the periods presented and thus these results may not be indicative of our future operating performance. The Illustrative Aggregated Selected Financial Information, the PT Portugal Combined Selected Financial Information and the Pro Forma Financial Information included herein are subject to certain signification assumptions and limitations.

The Group consists of the Issuer and its subsidiaries or entities over which the Issuer exercises control, comprising (i) Altice International and its subsidiaries (the "Altice International Group") (in which the Issuer holds 100% of the share capital of the parent entity) and (ii) the Altice France Group (in which the Issuer indirectly through Altice France S.A. holds 60.3% of the share capital of Numericable, the parent entity of the Altice France Group. Pursuant to the Altice Vivendi Shareholders' Agreement, Altice France S.A. holds the majority vote at meetings of Numericable's board of directors. For further details, see "*Description of Our Business—Material Contracts—Altice Vivendi Shareholders' Agreement*". Prior to the reorganisation of the Group prior to the Issuer's initial public offering in January 2014, each of Altice International and Numericable were wholly controlled subsidiaries of Next L.P and were historically separate legal and reporting entities, under common control and management. Therefore, the historical combined financial statements of the Issuer do not consolidate the results of operations of the entire business undertaking of the Group as it exists at the date of these Listing Particulars. As a result, the Historical Consolidated Financial Information has been included in these Listing Particulars to reflect the carrying value of historical assets, liabilities, revenues, expenses and cash flows that were directly related to each of the Altice International Group and Altice France S.A., and are based on the separate Historical Consolidated Financial Statements of Altice International and the annual standalone accounts of Altice France S.A.

Since its formation in 2007, Altice France S.A. has been the holding entity for the Group's shareholding in the Numericable Group (and, following the 2014 SFR Acquisition, the Altice France Group), which represents substantially all of its assets and business. For each of the periods for which the Historical Consolidated Financial Information of the Issuer is presented, the financial statements of Altice France S.A. used to account for the Numericable Group prior to the 2014 Numericable Acquisition as an investment in an associate using the equity method. Following the consummation of the 2014 Numericable Group Transactions, Altice France S.A. holds 60.3% of the shares in Numericable and has entered into a new shareholders' agreement with Vivendi S.A. providing, *inter alia*, that Altice France S.A. will keep such majority of votes in the board of directors of Numericable. As a result, the Issuer is required to consolidate Numericable in its financial statements in accordance with IFRS (the "Numericable Group Consolidation"). In addition, Altice International is a holding company of the Altice International Group which, since its formation in 2008, has from time to time made significant equity investments in a number of cable and telecommunication businesses in various jurisdictions. The Historical Consolidated Financial Information does not consolidate the results of operations of the entire business undertaking of the Altice International Group as it exists at the date of these Listing Particulars for any period for which our historical consolidated financial information has been presented herein. As a result, the Historical Consolidated Financial Information included in these Listing Particulars may not accurately represent the results of operations and financial condition of the entire business undertaking of the Group as it exists as of the date of these Listing Particulars and the comparability of the Historical Consolidated Financial Information over each of the periods presented may be significantly limited. Accordingly, the Historical Consolidated Financial Information may not reflect what our actual results of operations and financial condition would have been had we been a combined company during the periods presented, or what our results of operations and financial condition will be in the future.

In order to aid the comparability of the financial condition and results of operations of the entire business undertaking of the Group as it exists at the date of these Listing Particulars, we have presented the Illustrative Aggregated Selected Financial Information and the Pro Forma Financial Information.

The Illustrative Aggregated Selected Financial Information has been compiled by aggregating selected aggregated financial information extracted from (i) the audited Historical Consolidated Financial Information of Altice International for each of the years ended December 31, 2011 and 2012, and (ii) the historical financial information of each of the business undertakings the acquisition of which was consummated by Altice International prior to December 31, 2013 for each of the years ended December 31, 2011 and 2012 (or for such shorter periods during the years ended December 31, 2011 and 2012, as applicable, for which the results of operations of such acquired business undertaking are not included in the audited Historical Consolidated Financial Information of Altice International). Adjustments have been made to the resulting aggregation in instances where the audited historical financial information of a business undertaking acquired by Altice International and included within such resulting aggregation have been drawn up in accordance with an accounting framework, the measurement and recognition criteria of which differs substantially from the corresponding criteria applicable under IFRS as adopted by the European Union, or where such acquired business undertaking was utilising accounting policy elections that differ substantially from those adopted by Altice International for the purposes of the Historical Consolidated Financial Information of Altice International. Therefore, among other things, the Illustrative Aggregated Selected Financial Information does not reflect several effects of the relevant acquisitions prior to the dates on which the financial information of the relevant acquired business undertakings were consolidated within the consolidated financial information of Altice International. The Illustrative Aggregated Selected Financial Information is provided with respect to certain limited statement of income and cash flow items and accordingly does not include all the information that would usually be included in a statement of income or statement of cash flows or any information that would usually be included in a statement of other comprehensive income, statement of financial position or statement of changes in equity, in each case prepared in accordance with IFRS. The Illustrative Aggregated Selected Financial Information has not been audited in accordance with any generally accepted auditing standards and it has not been reviewed in accordance with any generally accepted review engagement standards. The Illustrative Aggregated Selected Financial Information does not purport to present the operations of the Altice International Group as they actually would have been had the relevant acquisitions occurred with effect from any relevant dates indicated or to project the operating results or financial condition of the Altice International Group for any future period. The Illustrative Aggregated Selected Financial Information has been prepared only for the years ended December 31, 2011 and 2012 and no similar financial information has been prepared by the Altice International Group for any other periods for which Historical Consolidated Financial Statements of Altice International or Pro Forma Financial Information of Altice International has been included in these Listing Particulars.

We have also included in these Listing Particulars the Pro Forma Financial Information which gives effect to each of the significant acquisitions the Issuer, through its subsidiaries (including Altice International) has made since January 1, 2013 (but except as described in these Listing Particulars, without giving effect to the Tricom Acquisition or the Mobius Acquisition, or to the disposal of our assets in Réunion that we have committed to undertake).

The Pro Forma Financial Information has not been audited in accordance with any generally accepted auditing standards and it has not been reviewed in accordance with any generally accepted review engagement standards. The Pro Forma Financial Information has been prepared for illustrative purposes only, and because of its nature, the Pro Forma Financial Information addresses a hypothetical situation and, therefore, does not represent the Issuer's actual financial position or results. The Pro Forma Financial Information is based on certain assumptions that we believe are reasonable. Our assumptions may prove to be inaccurate over time. Accordingly, the Pro Forma Financial Information may not reflect what our results of operations and financial condition would have been had we been a combined company during the periods presented, or what our results of operations and financial condition will be in the future.

The Pro Forma Financial Information and the Illustrative Aggregated Selected Financial Information include the results of operations and financial condition of the acquired businesses (and in the case of the Post Transaction Pro Forma Financial Information, the results of the Numericable Group, ODO, PT Portugal and SFR as well) for each of the periods presented even though we may not have owned or controlled such acquired businesses for all or any of the duration of the periods presented and would not have been permitted under IFRS to consolidate the results of such acquired businesses in any historical financial statements. As we have acquired control over the Numericable Group, ODO and SFR and have entered into agreements that will enable us to control PT Portugal, we consolidate 100% of their revenue and expenses in the Post Transaction Pro Forma Financial Information for each of the periods presented, despite the fact that third parties owned significant equity interests therein, as applicable. As we currently have the ability to control Coditel Holding, through which we conduct our operations in Belgium and Luxembourg, we consolidate 100% of its revenues and expenses in the Pro Forma Financial Information and the Illustrative Aggregated Selected Financial Information for each of the periods presented, and in the Historical Consolidated Financial Information from July 1, 2011, despite the fact that third parties own significant interests in the entity. The non-controlling interests in the operating results of the Numericable Group, ODO and SFR in the Post Transaction Pro Forma Financial Information and the non-controlling interests in the operating results of Coditel Holding in the Historical Consolidated Financial Information and Pro Forma Financial Information are reflected in the line item profit or loss attributable to non-controlling interests in the relevant statements of income and financial position. However, since we do not present any Illustrative Aggregated Selected Financial Information below the line item operating income before depreciation. amortization, restructuring costs and other expenses, or EBITDA, the non controlling owners' interests in the operating results of Coditel Holding are not reflected anywhere in the Illustrative Aggregated Selected Financial Information. Such non-controlling interests amounted to negative €1.9 million in the nine months ended September 30, 2014, based on the Pre Transaction Pro Forma Financial Information. The Illustrative Aggregated Selected Financial Information is also subject to the limitations generally attributable to non IFRS measures. For further details regarding the presentation of financial information in these Listing Particulars, including their limitations, please see "*Presentation of Financial and Other Information*".

We have also included in these Listing Particulars the PT Portugal Combined Selected Financial Information which represents the arithmetical sum of selected financial information extracted from (i) the audited historical financial statements of PTC and Meo, S.A. as of and for the years ended December 31, 2012 and 2013; (ii) the unaudited historical condensed financial information of PTC and Meo, S.A. as of and for the nine months ended September 30, 2013 and 2014 and (iii) the unaudited historical condensed financial information of the other subsidiaries in the PT Portugal Group derived from the internal financial reporting systems of the PT Portugal Group. The PT Portugal Combined Selected Financial Information is subject to significant limitations similar to those described above.

In addition, we have presented certain key operating measures across all the countries in which we currently operate even though we may not have owned or controlled such business for the entire duration of the periods presented.

Our lack of operating history as a combined company and the challenge of integrating previously independent businesses make evaluating our business and our future financial prospects difficult. Our potential for future business success and operating profitability must be considered in light of the risks, uncertainties, expenses and difficulties typically encountered by recently organised or combined companies.

We are exposed to local business risks in many different countries.

We conduct our business in multiple jurisdictions, including in Portugal, France, Israel, the Dominican Republic, Belgium, the French Overseas Territories, Luxembourg and Switzerland. In addition, we may expand into additional markets in the future by entering into acquisitions or other strategic transactions. Accordingly, our business is subject to risks resulting from differing legal, political, social and economic conditions and regulatory requirements and unforeseeable developments in a variety of jurisdictions, including in emerging markets (which may be more vulnerable to volatility as well as political and economic instability than developed markets). These risks include, among other things:

- differing economic cycles and adverse economic conditions;
- political instability (including expropriation and political violence or disturbance);
- the burden of complying with a wide variety of foreign laws and regulations;
- unexpected changes in the regulatory environment and/or governmental policies;
- varying tax regimes;
- fluctuations in currency exchange, interest rates and inflation (particularly in emerging markets, such as the Dominican Republic, which has historically experienced high rates of inflation);
- inability to collect payments or seek recourse under or comply with ambiguous or vague commercial or other laws;
- varying degrees of concentration among suppliers and customers;
- insufficient protection against violations of our intellectual property rights;
- foreign exchange controls and restrictions on repatriation of funds; and
- difficulties in attracting and retaining qualified management and employees, or further rationalizing our work force;
- significant oil price increases; and
- challenges caused by distance, language and cultural differences.

Our overall success as a business depends to a considerable extent on our ability to anticipate and effectively manage differing legal, political, social and economic conditions and regulatory requirements and unforeseeable developments. We may not continue to succeed in developing and implementing policies and strategies which will be effective in each location where we do business or may do business in the future.

The liquidity and value of our interests in certain of our subsidiaries and our ability to take certain corporate actions may be adversely affected by shareholder agreements and other similar agreements to which we are a party.

Certain of our operations including our operations in the Dominican Republic, France, Belgium and Luxembourg are conducted through subsidiaries in which third parties hold a minority equity interest or with respect to which we have provided third parties with rights to acquire minority equity interests in the future. In France, we control the Altice France Group. Further, Vivendi holds certain limited protective rights in SFR. Our equity interests in certain of the subsidiaries, in which third parties hold a minority equity stake, are subject to shareholder agreements partnership agreements and other instruments and agreements that contain provisions that affect the liquidity, and therefore the realizable value, of those interests. We have also entered into certain shareholder arrangements with the Outremer Minority Shareholders at the Altice Caribbean level. Most of these agreements subject the transfer of such equity interests to consent rights, pre-emptive rights or rights of first refusal of the other shareholders or partners. Our equity interest in Numericable is subject to a 180-day lock-up period pursuant to the terms of the Numericable Rights Issue which commenced on the date of the payment and delivery of the Numericable shares under the Numericable Rights Issue. Some of our subsidiaries are parties to loan agreements and indentures that restrict changes in ownership of the borrower without the consent of the lenders or noteholders. All of these provisions will restrict the ability to sell those equity interests and may adversely affect the prices at which those interests may be sold. In addition, the present or potential future shareholders in our subsidiaries have the ability to block certain transactions or decisions that we would otherwise undertake. Although the terms of our investments vary, our operations may be affected if disagreements develop with other equity participants in our subsidiaries. Failure to resolve such disputes could have an adverse effect on our business.

Risks Relating to the Integration of Tricom and ODO into Our Business

Anticipated synergies from acquisitions, in particular from the Tricom Acquisition and the ODO Acquisition, may not materialize.

The Tricom Acquisition and the ODO Acquisition completed on March 12, 2014, and April 9, 2014, respectively. We expect to achieve certain synergies relating to the operations of Tricom and ODO as they are one part of the Group. We may not realize any or all of the anticipated synergies of the Tricom Acquisition and the ODO Acquisition that we currently anticipate. Among the synergies that we currently expect are cross selling opportunities to existing customers of Tricom and ODO, network synergies and other operational synergies. The merger application of ODO and Tricom is still pending due to which these entities currently operate as distinct businesses. If such merger approval is not received on a timely basis or at all, or is granted subject to conditions, our operations in the Dominican Republic, including any plans to integrate the operations of Tricom and ODO, may be adversely affected. In addition, until the merger application has been approved, uncertainty remains as to the ability for ODO to utilize Tricom's excess spectrum, which could impact 4G-LTE deployment and therefore increased data demand from our customers. There can be no assurance that we will receive such approval at all or on a timely basis.

We also expect to achieve certain synergies from the 2013 June Transactions. Among the synergies that we currently expect are operational synergies in the French Overseas Territories and Portugal as a result of the Outremer Transaction and ONI Transaction, respectively, increased scale, access to global credit markets, more efficient employment of capital, harmonization of accounting policies and computation of key operating measures and harmonization of best practices across our footprint. Our estimated synergies from the ODO Acquisition, the Tricom Acquisition, the 2013 June Transactions and Mobius Acquisition are subject to a number of assumptions about the timing, execution and costs associated with realizing the synergies. There can be no assurance that such assumptions turn out to be correct and, as a result, the amount of synergies that we will actually realize over time may differ significantly from the ones that we currently estimate and we may incur significant costs in realizing the reorganization of ODO and Tricom. We may not be successful in integrating some or all of these businesses as currently anticipated which may have a material adverse effect on our business and operations.

The integration of Tricom and ODO into the Group could result in operating difficulties and other adverse consequences.

The integration of Tricom and ODO as anticipated into the Group may create unforeseen operating difficulties and expenditures and pose significant management, administrative and financial challenges to our business. These challenges include:

- integration of Tricom and ODO into our current business in a cost effective manner, including network infrastructure, management information and financial control systems, marketing, branding, customer service and product offerings;
- outstanding or unforeseen legal, regulatory, contractual, labor or other issues arising from the Tricom Acquisition and the ODO Acquisition;
- integration of different company and management cultures; and
- retention, hiring and training of key personnel.

In such circumstances, our failure to effectively integrate Tricom and ODO into our Group could have a material adverse effect on our financial condition and results of operations.

Further, ODO has entered into various agreements with suppliers, including a variety of handset device suppliers, outsourcing suppliers and other services suppliers of software licenses, call center support, data management and human resources, consulting, among others, which have terminated following the completion of the ODO Acquisition, as a result of a change in control in ODO's corporate structure. ODO currently sources its handsets and such other services on the basis of temporary arrangements with suppliers, while the Group is negotiating contractual arrangements to replace the agreements that have been terminated. These temporary arrangements which primarily include the sourcing of suppliers on the basis of individual purchase orders may be terminated at any time. Although we are currently working to mitigate such transitional issues, we cannot guarantee that these will be successful.

ODO's ability to operate its business effectively may suffer if we do not, quickly and cost effectively, establish the necessary support functions, as well as a service platform, to support ODO's business following the ODO Acquisition.

Historically, ODO has relied on certain financial, administrative and other resources of Orange S.A. to operate its business and to provide services to its customers. ODO has entered into certain intercompany agreements with Orange S.A. which provided ODO with support services and access to software, IT operations and other technical support. Some of these agreements have automatically terminated upon the ODO Acquisition. As a consequence, ODO will need to create certain independent support systems or contract with third parties to replace Orange S.A.'s systems and services from which ODO will not benefit post closing.

ODO has entered into the Transitional Services Agreement with Orange S.A. identifying, among the products and services provided by Orange S.A. and related entities prior to the ODO Acquisition, which ones will be maintained, modified or terminated and setting forth the conditions under which certain products and services will continue to be provided. The Transitional Services Agreement also have a term of up to twelve months following closing of the ODO Acquisition. These services may not be sufficient to meet ODO's needs, and, after the arrangements with Orange S.A. expire or terminate, we may not be able to replace these services at all or obtain these services at prices or on terms as favorable as currently provided to ODO. Any failure or significant downtime in the services provided to ODO by Orange S.A. during the transition period could impact our results or prevent ODO from paying its suppliers or employees, performing other administrative services on a timely basis or providing an adequate level of service to its customers. Any such event could also have a material adverse impact on our business, financial condition and results of operations.

We may not be successful in establishing a new brand identity for the products and services marketed by ODO.

Historically, ODO has marketed its products and services through the "Orange" brand. Currently, ODO benefits from a Brand License Agreement which allows it to use the "Orange" brand for its current products and services in the Dominican Republic for a period of three to five years after the closing of the ODO Acquisition although this agreement can be terminated early in certain circumstances. The value of the "Orange" brand name has been recognized by ODO's suppliers and customers. We will need to expend significant time, effort and resources to establish a new brand name in the marketplace for ODO's products and services to prepare for the termination of the Brand License Agreement, in addition to our regular marketing and advertising expenses. We cannot guarantee that this effort will ultimately be successful. If our efforts to establish a new brand identity are unsuccessful, our business, financial condition and results of operations could be materially adversely affected. For further details see "*Description of Our Business—Material Contracts—Agreementswith Orange in the Dominican Republic*".

Risks Relating to Legislative and Regulatory Matters

We are subject to significant government regulation and supervision, which could require us to make additional expenditures or limit our revenues and otherwise adversely affect our business, and further regulatory changes could also adversely affect our business.

Our activities as a cable television, broadband Internet infrastructure access provider, ISP, fixed-line and international long distance telephony and mobile operator are subject to regulation and supervision by various regulatory bodies, including local and national authorities in the jurisdictions in which we operate. Such regulation and supervision, as well as future changes in laws or regulations or in their interpretation or enforcement that affect us, our competitors or our industry, strongly influence how we operate our business. Complying with existing and future law and regulations may increase our operational and administrative expenses, restrict our ability or make it more difficult to implement price increases, affect our ability to introduce new services, force us to change our marketing and other business practices, and/or otherwise limit our revenues. In particular, our business could be materially and adversely affected by any changes in relevant laws or regulations (or in their interpretation) regarding, for example, licensing requirements, access and price regulation, interconnection arrangements or the imposition of universal service obligations, or any change in policy allowing more favorable conditions for other operators or increasing competition. There can be no assurance to you that the provision of our services will not be subject to greater regulation in the future.

In addition to regulation specific to the telecommunications industry, we are from time to time subject to review by competition authorities concerning whether we exhibit significant market power. Regulatory authorities may also require us to grant third parties access to our bandwidth, frequency capacity, facilities or services to distribute their own services or resell our services to end customers.

Furthermore, a failure to comply with the applicable rules and regulations could result in penalties, restrictions on our business or loss of required licenses or other adverse consequences. See "*Regulatory*".

European Union

The regulations applicable to our operations within the EU often derive from EU Directives. The various Directives require EU Member States to harmonize their laws on communications and cover such issues as access, user rights, privacy and competition. These Directives are reviewed by the EU from time to time and any changes to them could lead to substantial changes in the way in which our businesses in the relevant jurisdictions are regulated and to which we would have to adapt. Any changes to these EU Directives could lead to substantial changes in the way in which our businesses in the European Union are regulated.

France. In France, telecommunication activities are subject to significant regulation and supervision by various regulatory bodies. In addition, specific requirements including grant of access, non- discrimination and transparency obligations can also be imposed in France on entities that are deemed, by ARCEP to have a significant power in relevant markets that are not sufficiently competitive. Pursuant to decisions adopted in the summer of 2011 and applicable until the summer of 2014 concerning the regulation of the broadband Internet and very-high-speed fast broadband Internet markets, ARCEP identified Orange as the sole operator with significant power in the landline market and imposed specific obligations on it concerning access to its infrastructures including unbundling its copper local loop and local sub-loop and providing access to its infrastructure. In 2013, ARCEP launched new market analyses on the following markets: "wholesale (physical) network infrastructure access (including shared or fully unbundled access) at a fixed location," "wholesale broadband access," which comprises non- physical or virtual network access including "bit-stream" access at a fixed location; and "capacity services." A draft decision regarding the first two markets mentioned above was issued by ARCEP in November 2013. This draft decision was followed by a public consultation period which ended on September 16, 2013. Our business in France has not been identified in ARCEP's draft as having significant market power in any of these markets. However, no assurance can be given that we will not be identified by ARCEP as having significant market power in any one of those or other relevant markets in the future and that ARCEP will not therefore impose additional regulatory requirements on us.

In France, we are subject to, among other things:

- price regulation, including with respect to fixed-line termination rates and mobile roaming fees, that we charge in France;
- rules governing the interconnection between different networks and the interconnection rates that we can charge and that we pay;
- rules and remedies imposed on electronic communications services providers with "significant market power" as defined in Directive 2002/21/EC of the European Parliament (as amended and updated from time to time) and of the Council of 7 March 2002 on a common regulatory framework for electronic communications networks and services;
- risk of regulatory authorities granting third parties access to our network, in particular in the context of our build-out of FTTH networks;
- requirements that, under specified circumstances, a cable system carry certain broadcast stations or obtain consent to carry a broadcast station;
- rules for authorizations, licensing, acquisitions, renewals and transfers of licenses;
- rules and regulations relating to subscriber privacy;
- requirements that we provide or contribute to the provision of certain universal services, including requirements to provide certain "social" tariffs;
- requirements relating to safety and security of operator's networks;
- requirements on supplying subscribes lists for the purpose of publishing universal directories;
- requirements on portability;

Belgium and Luxembourg. In Belgium and Luxembourg, telecommunication activities are subject to significant regulation and supervision by various regulatory bodies. In addition, specific requirements can also be imposed in

Belgium and Luxembourg on entities that are deemed, by the Belgium Institute for Postal Services (the "BIPT") or the Luxembourg Regulatory Institute (the "LRI") and/or radio and television regulatory authorities, to have a significant power in relevant markets that are not sufficiently competitive, including grant of access, non-discrimination and transparency obligations.

In Belgium and Luxembourg, we are subject to, among other things:

- price regulation for certain services that we provide in Belgium (for instance, the Belgian Ministry for Economic Affairs must consent to any increase in the prices that we charge our subscribers for providing basic cable television);
- rules governing the interconnection between different networks and the interconnection rates that we can charge and that we pay;
- rules and remedies imposed on electronic communications services providers with "significant market power" as defined in Directive 2002/21/EC of the European Parliament (as amended and updated from time to time) and of the Council of 7 March 2002 on a common regulatory framework for electronic communications networks and services;
- risk of regulatory authorities granting third parties access to our network;
- requirements that, under specified circumstances, a service distributor must carry certain broadcasts or obtain consent to carry other broadcasts;
- rules for authorizations, licensing, acquisitions, renewals and transfers of licenses;
- rules and regulations relating to subscriber privacy;
- requirements that we provide or contribute to the provision of certain universal services, including requirements to provide certain "social" tariffs;
- taxes imposed on our public rights of way; and
- other requirements covering a variety of operational areas such as land use and environmental protection, moving the cables in our network underground, equal employment opportunity, technical standards, subscriber service requirements and the implementation of data retention obligations in Belgium.

For an overview of the regulatory landscape in Belgium and Luxembourg, see "*Regulatory—Belgium and Luxembourg.*"

Portugal. In Portugal, our activities in the electronic communication industry, including cable television, broadband Internet and telephony industries, are subject to significant regulation and supervision by ANACOM.

In Portugal, we are subject to, among other things:

- rules regarding authorizations, information duties and specific rights of use for number assignments;
- price regulation with respect to fixed call termination charges;
- number portability obligations;
- rules regarding the interconnection of our network with those of other network operators (capacity interconnection);
- requirements that a network operator carry certain channels (the must carry obligation);
- rules and regulations relating to subscriber privacy;
- regulations governing the limitation of exit-fees or cancellation charges;
- default barring of value-added services;
- rules and regulations imposing co-installation and co-location obligations with regard to our network (including our submarine cable landing stations), the scope of which can be subject to interpretation;

- obligation to contribute to the universal service fund; and
- sector specific charges (e.g. annual charge and investment obligations created by Law 55/2012 of Portugal).

For an overview of the regulatory landscape in Portugal, see "*Regulatory—Portugal.*"

Israel

In Israel, we are subject to, among other things:

- price regulation for certain services that we provide, specifically analog television;
- rules governing the interconnection between different telephone networks and the interconnection rates that we can charge and that we pay;
- regulations requiring us to maintain structural separation between our cable television, broadband Internet infrastructure access and fixed-line telephony, ISP and mobile subsidiaries;
- regulations governing the prohibition of exit-fees or cancellation charges;
- regulations requiring us to grant third party ISPs access to our cable network;
- regulations restricting the number of channels we can own and specifying the minimum investment we are required to make in local content productions;
- regulations governing roaming charges and other billing and customer service matters;
- requirements that, under specified circumstances, a cable system carry certain television stations or obtain consent to carry certain television stations according to telecommunication laws;
- rules for authorizations, licensing, acquisitions, renewals and transfers of licenses;
- requirements that we extend our cable television, broadband Internet infrastructure access and fixed-line telephony services to areas of Israel even where it is not economically profitable to do so;
- rules and regulations relating to subscriber privacy;
- laws requiring levels of responsiveness to customer service calls;
- antitrust law and regulations and specific terms within the antitrust authority's approval for the Israeli cable consolidation;
- requirements that we provide or contribute to the provision of certain universal services; and
- other requirements covering a variety of operational areas such as land use, health and safety and environmental protection, moving the cables in our network underground, equal employment opportunity, technical standards and subscriber service requirements.

The Israeli Ministry of Communications has recently taken active steps to increase competition in the fixed-line and mobile telecommunications industries, including providing licenses to MVNOs and eliminating termination fees that operators can charge, except in limited circumstances, and prohibiting the linkage of the price and terms of handsets to the services or benefits of the mobile contract. The Israeli Ministry of Communications has also introduced a policy for the establishment of a wholesale market for broadband Internet infrastructure access pursuant to which certain limitations on structural separation and bundling of products may be reduced, but we would also be required to provide access to our network infrastructure to other service providers on a wholesale basis. The price for such access would be determined based on a commercial agreement between us and any such service provider, but the Israeli Minister of Communications will be entitled to intervene in the determination of the terms or the price that have been agreed or that is demanded by us if it should find that such price is either unreasonable or could harm the competition, or if we have been unable to enter into a commercial agreement with the service provider. Further, the Israeli Ministry of Communications has issued regulatory instructions, including the method of setting wholesale service rates and, in the case of Bezeq, the maximum rates that can be collected by Bezeq from other license holders who make use of its infrastructure for the yeas 2014 to 2018, in an attempt to create a wholesale market for broadband internet infrastructure access and fixed line telephony services which would allow service providers (such as ISPs, VOB providers and IPTV providers) to provide services to their customers by using our cable network. Should the wholesale market develop, certain requirements for structural separation and bundling of products that apply to Bezeq and us may be lifted, and thus competition in the broadband Internet infrastructure access market may increase significantly which could negatively affect or results of operations.

Due to concerns over "margin squeeze" practices by HOT and Bezeq, the Ministry of Communications has proposed to review every new retail offer made by HOT and Bezeq to new or existing subscribers. Under the proposal, the Ministry may notify an infrastructure owner, if there is a concern over margin squeeze, that it is forbidden to offer the proposed package. HOT is currently studying the terms of the proposal and, at this time, is unable to evaluate the effect the proposal would have on its ability to compete if approved.

For an overview of the regulatory landscape in Israel, see "*Regulatory—Israel.*"

French Overseas Territories. In the French Overseas Territories, our existing and planned activities in the cable television, broadband Internet and telephony industries are subject to significant regulation and supervision by various regulatory bodies, including national and EU authorities.

Regulation of our service includes price controls (for termination charges), service quality standards, requirements to carry specified programming, requirements to grant network access to competitors and content providers, and programming content restrictions. In particular, we are subject, for our activities in the French Overseas Territories to:

- rules regarding declarations and registrations with telecommunication regulatory authorities;
- individual requirements associated with commitments made in the context of authorizations granted by telecommunication regulatory authorities for the use of frequencies;
- price regulation with respect to call termination charges;
- rules regarding the interconnection of our network with those of other network operators;
- requirements that a network operator carry certain channels (the must carry obligation);
- rules relating to the quality of the landline networks;
- specific rules relating to the access to new-generation optical fiber networks;
- rules relating to the content of electronic communications, antitrust regulations; and
- specific tax regimes.
- taxes imposed on our public rights of way;
- other taxes imposed on our operations including a 0.9% tax levied on electronic communication services related revenues (excluding VAT) in excess of €5,000,000 (subject to certain deductions and exclusions, and with specific rebate for bundled offers) of all telecommunication operators, which was introduced by the Public Audiovisual Reform law of March 5, 2009 (*loi relative à la communication audiovisuelle et au nouveau service public de la télévision*); and
- other requirements covering a variety of operational areas such as land use and environmental protection, moving the cables in our network underground, equal employment opportunity, technical standards, subscriber service requirements and the implementation of data retention obligations in France.

In addition, the expiry of one of Le Cable Guadeloupe's 28 cable network agreements (that of Pointe-à-Pitre) was due on November 22, 2014. On October 1, 2014, Guadeloupe's Town Hall approved the assignment of the cable networks to WSG ("World Services Guadeloupe", a 100% owned subsidiary of Altice Blue Two) for €400,000.

Further, the payment activity we conduct in the French Overseas Territories through our subsidiary OPS SAS, is subject to the control of the French *Autorité de Contrôle Prudentiel* ("ACP"). In connection with this activity, OPS SAS is subject to the control of the ACP covering matters such as, for instance, its level of equity capital, its management standards and the protection of the funds it receives. For an overview of the regulatory landscape in the French Overseas Territories, see "*Regulatory—French Overseas Territories*".

Dominican Republic. As a result of the completion the Tricom Acquisition and the ODO Acquisition, we are and will continue to also be subject to significant regulations in the Dominican Republic. For a description of the regulatory landscape in the Dominican Republic, see "*Regulatory—Dominican Republic*".

The European Commission's review of roaming charges may continue to lead to a reduction in revenues from mobile services

The European Commission, or EC, regulates the roaming charges that may be charged in the wholesale market and the retail market in Europe. These regulations extend to data and Short Messaging Services, or SMS, or text messaging. On July 1, 2012, the previous roaming regulations were replaced by a new version, known as "*Roaming III*" which will expire on June 30, 2022. In addition to setting maximum voice roaming rates (subject to a glide path) that may be charged with respect to the wholesale and retail market, for voice, data and SMS services, Roaming III also features (1) extended transparency and consumer-protection measures ("bill- shock") that go beyond the EU territory, (2) the introduction of an obligation for mobile operators in the wholesale market to provide reasonable network access in order to allow roaming services and (3) the decoupling of roaming services from other services, while enabling a consumer to use the same number.

The Roaming III regulations have had, and are expected to continue to have an adverse effect on the revenues of our mobile businesses in the European Union (including PT Portugal upon the consummation of the PT Portugal Acquisition and SFR following the consummation of the 2014 SFR Acquisition) and on our results of operations. In addition, the EC's proposed "*Connected Continent*" legislation, which is described in the next risk factor, could lead to the elimination of roaming charges for calls within the EU, which would similarly have an adverse effect on us.

The European Commission's proposed "Connected Continent" legislation could adversely affect our businesses in the European Union

The EC is finalizing its plans to pass a legislative package implementing a single telecommunications market—the so-called "*Connected Continent*" legislation—in order to stimulate the provision of cross- border European services. The draft legislation, in its initial wording, addresses matters such as a single European authorization and convergence of regulatory remedies, a standard EU wholesale broadband access product, the harmonization of spectrum authorization procedures, net neutrality and transparency, international mobile roaming and international calls, and consumer protection.

In its latest form, the legislative package approved by the European Parliament on April 3, 2014, provides, among other things, for (1) the cancellation of retail market roaming tariffs by December 15, 2015, which would result in operators no longer being able to differentiate between retail domestic and roaming communications within EU mobile networks, (2) clear rules for traffic management and the obligation of operators to assure a certain quality of service and (3) reinforced consumer rights.

In December 2014, the Body of European Regulators for Electronic Communications approved the working documents in view of a workshop to be held in February 2015. On January 8, 2015, the European Council issued its Draft Council Conclusions on Single Market Policy, which calls for the information of competitiveness tests by the end of 2015. The Connected Continent regulation, as part of the Single Digital Market, is included in the Commission's Work Programme for 2015, no precise legislative planning has been released yet. The legislation is not expected to be adapted it its final version before the end of 2015.

If approved, this legislation is expected to have an adverse effect on our businesses in the European Union due to anticipated price decreases, higher operational costs and increased competition.

Burdensome regulation in an open market may put PT Portugal at a disadvantage to its competitors and could adversely affect its business

The Portuguese electronic communications sector is fully open to competition. However, many regulatory restrictions and obligations are still imposed on PT Portugal. Pursuant to the European Relevant Markets Recommendation issued in 2007, which significantly reduced the number of markets subject to regulation, ANACOM is re-analyzing the retail and wholesale markets to identify which markets are still relevant for regulatory intervention and which electronic communications operators and service providers, if any, it considers to have significant market power in those markets. Additionally, ANACOM is determining the regulatory remedies that should be imposed on those operators and service providers. ANACOM has not indicated when it will conclude this round of market analysis, but it is expected to be concluded by the end of 2015. On October 9, 2014, the European Commission adopted a new European Relevant Markets Recommendation that replaces the 2007 Recommendation and further reduced the number of relevant markets subject to *ex ante* regulation.

ANACOM has re-analyzed some of the markets defined under the European Relevant Market Recommendation and issued findings that PT Portugal had significant market power in certain markets, including the wholesale market for call termination on individual public telephone networks provided at a fixed location, the market for call termination on individual mobile networks, the market for the provision of wholesale (physical) network infrastructure access and the wholesale leased lines terminating segments market. In December 2013, ANACOM launched a public consultation on a draft decision regarding the reanalysis of the retail markets for fixed access and telephony services and of the wholesale market of call origination at a fixed location. ANACOM is proposing to withdraw the existing retail regulation on those markets while keeping the wholesale call origination market fully regulated.

In certain cases, such as the wholesale broadband access market and the wholesale leased lines trunk segments market, ANACOM has segmented the markets into “C” (competitive) and “NC” (non-competitive) segments and issued a finding that PT Portugal had significant market power in the non-competitive segments. ANACOM has the power to impose remedies to increase competition in those markets. However, ANACOM has not completed the review of all the markets identified by the European Relevant Market Recommendation, and we expect that ANACOM will reduce the adverse impacts of the remedies imposed on PT Portugal. However, additional reviews by ANACOM could include other markets, such as access to next generation networks. For example, on February 6, 2012, ANACOM approved a draft decision concerning the review markets for wholesale physical network infrastructure access at a fixed location, or Market 4, and markets for wholesale broadband access, or Market 5. Pursuant to this draft decision, ANACOM proposed to include high-speed broadband networks (e.g. FTTH networks) in order to require operators with Significant Market Power, or SMP, to provide access to these networks. In this connection, pursuant to this draft decision, ANACOM intends to maintain its previous 2008 finding that PT Portugal is an SMP operator in the national wholesale market for access to network infrastructure at a fixed location and in the broadband access wholesale market in non- competitive areas.

With respect to Market 4, in addition to the obligation of granting unbundled access to copper loops, subloops, ducts and poles at the national level, in its February 6, 2012 draft decision, ANACOM proposed to impose on PT Portugal a geographically differentiated obligation to provide its wholesale customers with virtual access to optical fiber (advanced bitstream). The analysis review procedure was not concluded, mainly due to the changes that took place in the domestic market during 2013 and 2014 (merger between ZON and Optimus and investments initiated by Vodafone, for expansion of its fiber networks and the infrastructure sharing agreement entered into between PT Portugal and Vodafone) and the publication, in September 2013, of the EC’s recommendation on NGA non-discrimination and costing methodologies. In light of these developments, a new ANACOM consultation on Markets 4 and 5 is expected in the near future.

With respect to the wholesale leased line markets, in which PTC was declared an operator with Significant Market Power, ANACOM decided to make ethernet circuits subject to a retail-minus rule and approved a final decision amending PTC’s leased lines reference offer (*oferta de referência de circuitos alugados*), or “ORCA” and ethernet accesses reference offer (*oferta de referência de circuitos Ethernet*), or “ORCE” in 2012. At the same time, ANACOM extended PTC’s co-installation obligations under its regulated reference offers to its submarine cable landing stations.

We receive correspondence from ANACOM from time to time regarding compliance with such and other regulations. If we are found to be in breach of such regulations, the regulators may impose penalties, fines or additional obligations on us to rectify such breaches which may have an adverse effect on our business operations. Remedies imposed by ANACOM may also require PT Portugal to provide services in certain markets or geographic regions or to make investments that it would otherwise not choose to make. In addition, PT Portugal incurred and may still have to incur, expenses to adapt its operations to changing regulatory requirements and to ensure regulatory compliance. The resources PT Portugal may be required to fulfill our regulatory obligations in Portugal could adversely affect its ability to compete.

PT Portugal’s obligations as a universal service provider in Portugal could adversely affect its results of operations and profitability

On October 12, 2012, following ANACOM’s decision on the designation of a universal service provider, the Portuguese Ministries of Finance, Economy and Employment launched a public tender to designate the universal service providers, which included a compensation fund for universal service providers. PTC submitted bids for certain tenders. On October 18, 2013, the Portuguese government determined the designation of Optimus and ZON as the universal service providers for the connection to a public electronic communications network at a fixed location and the provision of publicly available telephone services, and of PTC as the universal service provider for publicly available telephone (payphones). In addition, on July 29, 2013, the Portuguese government decided to initiate a direct award procedure in respect of the provision of comprehensive directory and directory inquiry services for a period of 12 months, with the possibility of such period being extended for an additional six months. PTC was the only company that presented a proposal and was awarded the contract to provide directories and directory inquiry services.

As the universal service provider for payphones, directories and directory inquiry services, PTC is required to make available those services in accordance with Portuguese regulations whether or not they are profitable to us. In addition, PTC will be required to contribute to the compensation fund for universal services providers according to its share of the revenues of the national telecommunications sector. These obligations could adversely affect the expenses and PTC's profitability.

We can only operate our business for as long as we have licenses from the relevant authorities in the jurisdictions in which we operate.

We are required to hold licenses to own and operate our networks and to broadcast our signal to our customers. These licenses generally require that we comply with applicable laws and regulations, meet certain solvency requirements and maintain minimum levels of service.

In France, ARCEP ensures that operators comply with the laws and regulations set forth in the CPCE and, where applicable, that they respect the conditions of any individual authorizations granted. While our operations do not require specific authorizations from ARCEP, we must declare our activities and register with ARCEP. Until recently, the sanctions available to ARCEP if an operator failed to comply with the regulatory framework, as set forth in Article L. 36-11 of the CPCE, included limiting the scope or reducing the term of the operator's license, as well as suspending or even fully withdrawing the operator's registration. ARCEP could also impose fines representing up to 3% of the operator's annual revenue, or 5% in the event of a repeated breach and, if ARCEP identified a serious and immediate infringement of the rules governing the sector, it could order precautionary measures without any requirement for prior notice. In addition, if an infringement could cause serious harm to an operator or the market, the chairman of ARCEP could make an emergency application to the French *Conseil d'Etat* for an order requiring the party concerned to comply with the applicable rules and impose a daily fine until such party complies. On July 5, 2013, however, the *Conseil constitutionnel* (the constitutional court in France), ruling on a question by the Numericable Group challenging the constitutionality of Article L. 36-11 of the CPCE through a procedure known as *question prioritaire de constitutionalité*, invalidated the power of sanction of ARCEP set forth in Article L. 36-11, paragraphs 1 through 12, of the CPCE. An ordinance dated March 12, 2014 has restored the power of sanction of the ARCEP, but which henceforth complies with the principle of separation of investigative and sanctioning powers.

In Israel, we conduct our operations pursuant to licenses granted to us by the Israeli Ministry of Communications and by the Council for Cable and Satellite Broadcasting for specified periods, which may be extended for additional periods upon our request to the Israeli Ministry of Communications and confirmation that we have met certain performance requirements. Our broadcast license is valid until 2017, our domestic operator license for fixed-line telephony and broadband Internet infrastructure access is valid until 2023, our UMTS-based mobile license is valid until 2031 and our general international telecommunications service provider license is valid until 2032. There is no certainty, however, that the licenses will be renewed or extended in the future or that they will not be cancelled or changed by the Israeli Ministry of Communications. Any cancellation or change in the terms of our licenses may materially affect our business and results of operations. Furthermore, although we believe that we are currently in compliance with all material requirements of our licenses, the interpretation and application of the technical standards used to measure these requirements, including the requirements regarding population coverage and minimum quality standards and other license provisions, disagreements have arisen and may arise in the future between the Israeli Ministry of Communications and us. We have provided significant bank guarantees to the Israeli Ministry of Communications to guarantee our performance under our licenses. If we are found to be in material breach of our licenses, the guarantees may be forfeited and our licenses may be revoked. In addition, the Israeli Ministry of Communications is authorized to levy significant fines on us for breaches of our licenses.

PT Portugal provides a significant number of services in Portugal under licenses and authorizations granted by ANACOM to its subsidiaries PTC and Meo, S.A. Certain licenses require PT Portugal and/or its subsidiaries to comply with future regulatory changes, subject to the principle of proportionality, even where PT Portugal and its subsidiaries may not be entitled to receive compensation for the costs of implementing such changes. In addition, PT Portugal and/or its subsidiaries may need to apply for the renewal of certain licenses in the near future. ANACOM can terminate Meo, S.A.'s mobile licenses in the event of non-payment of legally due fees for a period of two consecutive years or in situations of severe and persistent non-compliance with the terms and conditions of its licenses. Through Meo, S.A., PT Portugal holds renewable licenses to provide Global System for Mobile Communications, or GSM, or 2G, and 3G mobile telephone services throughout Portugal, valid until 2016 and 2022, respectively. In January 2012, Meo, S.A. was allocated the right to use frequencies to provide, among other technologies, 4G mobile telephone services throughout Portugal, and in March 2012, ANACOM issued a renewable license to Meo, S.A., valid until 2027, with respect to the use of these frequencies. This license also unifies the previous 2G and 3G licenses issued to Meo, S.A. If ANACOM were to terminate such licenses for any reason, PT Portugal would not be able to conduct the activities authorized by those licenses. This loss would eliminate an important source of our revenues. ANACOM has recently issued certain decisions with respect to PT Portugal's DTT license, pertaining to required DTT coverage and implementation of additional multi- frequency channels to function in overlay with its single frequency network in order to comply with the license. PT Portugal has responded to these decisions and the matter is still pending a final decision from ANACOM.

In the Dominican Republic, ODO was awarded a concession to and are licensed to provide telecommunications services. ODO's concession was originally granted under a concession agreement with Indotel in 1996 and will expire on August 1, 2015. In order to renew ODO's concession, a renewal request needs to be submitted to Indotel by August 1, 2014. In the event that the concession agreement expires and ODO has not submitted a request to renew, according to applicable law, Indotel may automatically renew the agreement for another 20 year term or terminate the agreement. If ODO correctly files all of the documentation for renewal and remains in compliance with all of Indotel's policies and regulations, Indotel should approve the renewal request, however we cannot guarantee approval. ODO has not yet filed an application for renewal since it is awaiting Indotel providing a template Concession Agreement. In addition, ODO currently holds a number of frequency license certificates issued by Indotel. All of ODO's frequency licenses are valid until August 1, 2015. We cannot guarantee that Indotel will approve ODO's renewal request for its concession or for its frequency licenses. Furthermore, certain regulatory approvals, such as new build permits, may be required for ODO to operate antenna sites with other frequencies/frequency bands, in particular where the shift is made from a higher frequency band (e.g. 1800 MHz) to a lower frequency band (e.g. 900 MHz). To the extent that ODO seeks to operate antenna sites with other frequencies/frequency bands in the future, failure to obtain such regulatory approvals could have a negative impact on the coverage of its network. If Indotel does not renew ODO's concession or frequency licenses or if ODO fails to obtain any regulatory approvals that are required, our business, financial condition and results of operations following the ODO Acquisition could be materially adversely affected.

Should we fail to comply with these requirements or the requirements of any of our other licenses, we may be subject to financial penalties from the relevant authorities and there may also be a risk that licenses could be partially or totally withdrawn. The imposition of fines and/or the withdrawal or non-renewal of licenses could have a material adverse effect on our results of operations and financial condition and prevent us from conducting our business.

ODO's activities may be affected by Indotel's decisions regarding the granting, amendment or renewal of frequency licenses.

ODO's activities as a mobile network operator in the Dominican Republic are subject to regulation and supervision by various Dominican Republic authorities, in particular the Dominican Institute for Telecommunications ("Indotel"). Since 2002, Indotel has issued a series of decrees and resolutions in order to implement the National Frequency Allocation Plan ("PNAF"), the objective of which is to reorganize the radio spectrum in the Dominican Republic and make more bands available for operators to provide mobile services. Frequency migration is currently in progress and concerns ODO among other operators. For example, ODO must migrate from its current 1800Mhz frequency to another frequency to be allocated to it in the 2110-2155Mhz band in order to comply with PNAF provisions, which pair the 1700Mhz frequency with the 2100Mhz frequency. Spectrum entitlement rights relating to the migrated bands remain in dispute among various telecom operators. In addition, Indotel has not confirmed the final step in a frequency swap assigning the 1720-1730 MHZ and the 2120-2130 MHz ranges to ODO in exchange for other frequencies.

We do not have complete control over the programming that we provide or over some of the prices that we charge, which exposes us to third party risks and may adversely affect our business and results of operations.

In all of our jurisdictions where we provide pay television services, we are required to carry certain broadcast and other channels on our cable system that we would not necessarily carry voluntarily. For example, in Israel, these "must carry" obligations apply to: (i) two specific governmental channels; (ii) two specific commercial channels; (iii) the "Knesset" channel, which is a channel broadcasting content from the Israeli parliament; (iv) one educational channel and (v) channels from a special license broadcaster that we deliver to all of our pay television subscribers. See "*Regulatory—Israel—Television—Access to DTT Channels*." We cannot guarantee that the remuneration, if any, that we receive for providing these required channels will cover our actual costs of broadcasting these channels, or provide the return that we would otherwise receive if we were allowed to freely choose the programming we offer on our system.

We may incur significant costs to comply with city planning laws.

We are subject to planning laws when we upgrade or expand our networks. In particular, our current installation of the UMTS network in Israel is subject to compliance with the National Zoning Plan 36 (TAMA 36) and the directives issued thereunder, which are aimed at reducing the danger of radiation and the damage to the environment. The cost of complying with TAMA 36 can be substantial and there is currently a regulatory process underway to amend TAMA 36 which would place substantial limitations and further increase the cost of erecting our UMTS network. See "*Regulatory—Israel—Mobile—Construction of Network Sites—National Zoning Plan 36A*". In addition, the local loop of our networks is generally located aboveground. Local municipal governments generally have the authority to require us to move these network lines underground. Usually, we are able to coordinate with other utility suppliers to share the costs associated with moving lines underground but no assurance can be given that we will always be able to do so. Nevertheless, the costs of complying with municipal orders can be substantial and not subsidized by such municipal government, and may require us to incur significant costs in the future.

We have had difficulties obtaining some of the building and environmental permits required for the erection and operation of our mobile network sites in Israel, and some building permits have not been applied for or may not be fully complied with. These difficulties could have an adverse effect on the coverage, quality and capacity of our mobile network. Operating mobile network sites without building or other required permits, or in a manner that deviates from the applicable permit, may result in criminal or civil liability to us or to our officers and directors.

Our ability to maintain and improve the extent, quality and capacity of our mobile network coverage in Israel depends in part on our ability to obtain appropriate sites and approvals to install our mobile network infrastructure, including mobile network sites. The erection and operation of most of these mobile network sites require building permits from local or regional planning and building authorities, as well as a number of additional permits from other governmental and regulatory authorities. In addition, as part of our UMTS network build-out, we are erecting additional mobile network sites and making modifications to our existing mobile network sites for which we may be required to obtain new consents and approvals.

For the reasons described in further detail below, we have had difficulties obtaining some of the building permits required for the erection and operation of our mobile network sites.

Mobile network site operation without required permits or that deviates from the permit has in some cases resulted in the filing of criminal charges and civil proceedings against our subsidiaries in Israel and its officers and directors, and monetary penalties against such subsidiaries, as well as demolition orders. In the future, we may face additional monetary penalties, criminal charges and demolition orders. The prosecutor's office has set up a national unit to enforce planning and building laws. The unit has stiffened the punishments regarding violations of planning and building laws, particularly against commercial companies and its directors. If we continue to experience difficulties in obtaining approvals for the erection and operation of mobile network sites and other mobile network infrastructure, this could have an adverse effect on the extent, coverage and capacity of our mobile network, thus impacting the quality of our voice and data services, and on our ability to continue to market our products and services effectively. In addition, as we seek to improve the range and quality of our mobile telephony services, we need to further expand our mobile network, and difficulties in obtaining required permits may delay, increase the costs or prevent us from achieving these goals in full. Our inability to resolve these issues in a timely manner could also prevent us from achieving or maintaining the mobile network coverage and quality requirements contained in our license.

Since June 2002, following the approval of the National Building Plan 36 (the "Plan"), which regulates network site construction and operation, building permits for our mobile network sites (where required) have been issued in reliance on the Plan.

We have set up several hundred small communications devices, called wireless access devices, pursuant to a provision in the Planning and Construction Law, which exempts such devices from the need to obtain a building permit. A claim was raised that the exemption does not apply to mobile communications devices and the matter reached first instance courts a number of times, resulting in conflicting decisions. This claim is included in an application to certify a class action filed against certain Israeli mobile telephone operators, but we were not included in this claim. In May 2008, a district court ruling adopted the position that the exemption does not apply to wireless access devices. The mobile telephone operators filed a request to appeal this ruling to the Supreme Court. In May 2008, the Israeli Attorney General filed an opinion regarding this matter stating that the exemption applies to wireless radio access devices under certain conditions. Subsequently, two petitions were filed with the High Court of Justice in opposition to the Israeli Attorney General's opinion. The matter is still pending before the Supreme Court and the High Court of Justice.

In September 2010, adopting the position of the Israeli Attorney General, the Israeli Supreme Court issued an interim order prohibiting further construction of radio access devices for mobile networks in reliance on the exemption mentioned above. In September 2011, the Supreme Court permitted HOT Mobile and Golan Telecom to use the exemption in order to erect their new UMTS networks until December 31, 2013, provided, however, that no more than 40% of the facilities that the operator erects are within the jurisdiction of any municipality, an affidavit is submitted in advance to the municipality's engineer and the safety zone does not exceed four meters and does not deviate from the boundaries of the lot. On August 28, 2013, we submitted a formal request with the Israeli Supreme Court, requesting a renewal of the exemption. On September 30, 2013, we received a response from the Supreme Court stating that they had requested a formal reply from the state on this subject matter. On October 1, 2013, the Israeli Supreme Court passed a decree nici in relation to the petition to which the State filed a response on December 17, 2013, requesting a perpetual injunction to prevent the erecting of access network devices until legislation was put in place by the Israeli Ministry of Interior and the Ministry of Communication to regulate this matter. In its response, the State further claimed that the exemption relating the erecting of access network devices for HOT Mobile and Golan should only be valid until June 30, 2014. The Supreme Court has not passed judgment on this however and until a final decision has been passed by the Supreme Court however, HOT Mobile will be allowed to continue the deployment of its UMTS network.

If a definitive court judgment holds that the exemption does not apply to mobile devices at all, or in case of disagreements with the municipalities where we have installed our devices or a regulatory authority regarding the interpretation of the Supreme Court's decision, we may be required to remove the existing devices and would not be able to install new devices on the basis of the exemption. As a result, our mobile network capacity and coverage would be negatively impacted, which could have an adverse effect on our revenue and results of operations.

We, like the other mobile telephone operators in Israel, provide repeaters, also known as bi-directional amplifiers, to subscribers seeking an interim solution to weak signal reception within specific indoor locations. In light of the lack of a clear policy of the local planning and building authorities, and in light of the practice of the other mobile telephone operators, we have not requested permits under the Planning and Building Law for the repeaters. However, we have received an approval to connect the repeaters to our communications network from the Israeli Ministry of Communications and have received from the Israeli Ministry of Environmental Protection permit types for all our repeaters. If the local planning and building authorities determine that permits under the Planning and Building Law are also necessary for the installation of these devices, or any other receptors that we believe do not require a building permit, it could have a negative impact on our ability to obtain permits for our repeaters.

The Israeli Ministry of Environmental Protection notified us of a new condition for all of our 3G mobile network site operation permits, according to which we must install systems software (provided by the Israeli Ministry of Environmental Protection) that continuously monitors and reports the level of power created in real time from the operation of our 3G mobile network sites (the "Monitoring System"). Since May 2012, we started erecting our new UMTS cell sites according to construction permits received in November 2011. We have also made practical examinations to all our new UMTS cell sites. All of the examinations showed that our new UMTS cell sites comply with the safety standard determined by the Israeli Ministry of Environmental Protection. As of August 2012, we began to apply requests for operation permits to our sites to the Commissioner. We also applied to the Commissioner for extended time to connect to the monitoring system. As of November 2012, we started receiving operation permits, which are subject to the demand to connect to the monitoring system no later than February 5, 2013. On February 4, 2013, we were notified by the Israeli Ministry of Environmental Protection that we have complied with all of its requirements for connecting to the monitoring system.

We are of the opinion that all of the antennas that we operate comply with the conditions of the safety permits that we were granted by the Israeli Ministry of Environmental Protection. However, implementation of the monitoring software increases our exposure and our directors and senior officers to civil and criminal proceedings in the event that any antennas are found to not meet the conditions of the permits granted to us and the maximum permitted power. In addition, if our antennas are found to not meet the conditions of the permits granted to us and the maximum permitted power, the Israeli Ministry of Environmental Protection may revoke existing permits, which would require us to dismantle existing mobile network sites. As a result, our network capacity and coverage would be negatively impacted, which could have an adverse effect on our revenue and results of operations.

We may be required to indemnify certain local planning and building committees in Israel with respect to claims against them.

In Israel, under the Planning and Building Law, 1965, local planning committees may be held liable for the depreciation of the value of nearby properties as a result of approving a building plan. Under the Non-Ionizing Radiation Law, 2006, the National Council for Planning and Building requires indemnification undertakings from mobile companies as a precondition for obtaining a building permit for new or existing mobile network sites. The National Council has decided that until the Plan is amended to reflect a different indemnification amount, mobile companies will be required to undertake to indemnify the committees in full against all losses resulting from claims against a committee for reductions in property values as a result of granting a permit to the mobile network site. On June 1, 2010, the National Council for Planning and Building approved the National Building Plan No. 36/A/1 version that incorporates all of the amendments to the Plan (the "Amended Plan"). The Amended Plan is subject to government approval in accordance with the Planning and Building Law.

As of September 30, 2014, we had approximately 342 indemnification letters outstanding to local planning and building committees although no claims have been filed against us under such letters. Calls upon our indemnification letters may have a material adverse effect on our financial condition and results of operations.

In addition, the requirement to provide indemnification in connection with new building permits may impede our ability to obtain building permits for existing mobile network sites or to expand our mobile network with the erection of new mobile network sites. The indemnification requirement may also cause us to change the location of our mobile network sites to less suitable locations or to dismantle existing mobile network sites, which may have an adverse effect on the quality and capacity of our mobile network coverage.

In 2007, the Israeli Ministry of Interior Affairs extended the limitation period within which depreciation claims may be brought under the Planning and Building Law from three years from approval of the building plan to the later of one year from receiving a building permit for a mobile network site under the Plan and six months from the construction of a mobile network site. The Israeli Ministry retains the general authority to extend such period further. This extension of the limitation period increases our potential exposure to depreciation claims.

Adverse decisions of tax authorities or changes in tax treaties, laws, rules or interpretations could have a material adverse effect on our results of operations and cash flow.

The tax laws and regulations in the jurisdictions in which we operate may be subject to change and there may be changes in the content as well as in the interpretation and enforcement of tax law. As a result, we may face increases in taxes payable if tax rates increase, or if tax laws and regulations are modified by the competent authorities in an adverse manner.

In addition, the tax authorities in the jurisdictions in which we operate periodically examine our activities. We regularly assess the likelihood of such outcomes and have established tax allowances which represent management's best estimate of the potential assessments.

The resolution of any future tax matters could differ from the amount reserved, which could have a material adverse effect on our cash flows, business, financial condition and results of operations for any affected reporting period.

French tax law may limit our capacity to deduct interest for tax purposes, which could lead to a reduction in the Altice France Group's net cash flows.

Articles 212 bis and 223 B bis of the *Code général des impôts*, created by Article 23 of the Budget Law no. 2012- 1509 for 2013, limit the fraction of net financial expenses that is deductible for corporate tax purposes, subject to certain conditions and save for some exceptions, to 85% in fiscal years ending on or after December 31, 2012, and to 75% in fiscal years beginning on or after January 1, 2014.

We believe that this limitation will deprive the Altice France Group of a deduction of approximately €28.3 million in 2013 and €45 million in 2014, based on rules currently in force and information available as of the date of these Listing Particulars.

In addition, under French thin-capitalization rules, the deduction of interest paid on loans granted by a related party, and, subject to certain exclusions, on third-party loans guaranteed by a related party, are allowed under certain conditions but subject to limitations, under the rules of article 212 of the *Code général des impôts*.

The impact of such rules on our ability to effectively deduct, for tax purposes, interest paid on loans could increase our tax burden and therefore could have a material adverse effect on our financial condition and results of operations.

Our future results, French tax law, tax audits and other factors may limit our capacity to use our tax losses, and thus reduce the Altice France Group's net cash flows.

We have significant tax loss carry forwards in France. The ability to use such tax loss carry-forwards depends on a variety of factors, including (i) taxable profit and the difference between the amount of such profits and that of tax losses, (ii) the general limitation under which the percentage of French tax loss carry-forwards that may be used to offset the portion of taxable profit exceeding €1 million is limited to 50% in respect of fiscal years ending on or after December 31, 2012, as well as certain specific restrictions on the use of such tax loss carry-forwards, (iii) the outcome of present and future tax audits and litigations; (iv) the consequences of the reorganization of the Numericable Group prior to the Numericable IPO and (v) potential changes in applicable laws and regulations.

The impact of such factors could increase the Altice France Group's tax burden and therefore negatively impact its cash position, its effective tax rate, its financial condition and its results of operations.

Portugal Telecom SGPS, S.A., the former parent of the PT Portugal Group, is subject to an ongoing investigation by the Central Department of Penal Investigation and Action relating to purchase of commercial paper issued by Rio Forte Investments S.A.

There is an ongoing investigation by the Central Department of Penal Investigation and Action ("*Departamento Central de Investigação e Ação Penal")* involving Portugal Telecom SGPS, S.A. related to the purchase by PT International Finance BV and PT Portugal (subsidiaries of Portugal Telecom SGPS, S.A. at the date of the purchase) of certain commercial paper issued by Rio Forte Investments S.A. (the "Rio Forte Investigation"). In connection with this process, on January 6, 2015, investigators searched the Lisbon offices of Portugal Telecom SGPS, S.A. The Rio Forte Investigation concerns, among other things, suspicion of aggravated fraud ("*burla qualificada*"). Based on public statements by Portugal Telecom SGPS, S.A., they intend to cooperate fully with the authorities. As we did not control PT Portugal during the period to which the Rio Forte Investigation relates and do not control PT Portugal as of the date of these Listing Particulars, we have very limited information with respect to the facts and circumstances surrounding the subject matter of the Rio Forte Investigation. In addition, because the Rio Forte Investigation is non-public, we do not know who is being investigated or if any PT Portugal employees are the subject of the Rio Forte Investigation. Oi S.A. has warranted in the PT Portugal Acquisition Agreement that, upon closing of the PT Portugal Acquisition, neither PT Portugal nor any other member of the PT Portugal Group would be bound by any ongoing obligation towards Portugal Telecom SGPS, S.A. in connection with the commercial paper of Rio Forte Investments S.A.. In addition, the PT Portugal Acquisition Agreement contains certain undertakings regarding indemnity of PT Portugal by Oi S.A. for certain adverse consequences which may have been or may be incurred by PT Portugal as a result of the purchase, holding or transfer of the Rio Forte Investments S.A. commercial paper. However, until the Completion Date we will not control PT Portugal and as a result have no involvement with the Rio Forte Investigation, nor do we have any influence over PT Portugal's level of involvement, co-operation or strategy in responding to inquiries by the authorities conducting the Rio Forte Investigation. Following the Completion Date, we intend to assess any risk of liability under applicable bribery and corruption laws, understand if there has been any historic misconduct which involved PT Portugal Group and take any remedial measures we deem necessary. We cannot assure you that additional information will not come to light which may materially and adversely affect the value of our investment in the PT Portugal Group or may expose any employees of PT Portugal to liability, sanctions or penalties by the authorities conducting the Rio Forte Investigation. If any such new information comes to light or if a member of management of PT Portugal is found liable and/or subject to sanctions or penalties, this may have a material adverse effect on the operations of PT Portugal and the value of your investment in the Notes may suffer.

Risks Relating to Our Employees, Management, Majority Principal Shareholder and Related Parties

The loss of certain key executives and personnel or a failure to sustain a good working relationship with employee representatives, including workers' unions, could harm our business.

We depend on the continued contributions of our senior management and other key personnel and in particular, Patrick Drahi, who is our executive chairman and the principal shareholder of the Issuer. There can be no assurance that we will be successful in retaining their services or that we would be successful in hiring and training suitable replacements without undue costs or delays. As a result, the loss of our executive chairman (including allocation of his time to any other business interests) or any of these key executives and employees could cause disruptions in our business operations, which could materially adversely affect our results of operations.

In our business, we rely on sales forces and call center employees to interface with the major part of our residential customers. Their reliability is key, as is our relationship with employee representatives. Some of our employees currently belong to organized unions and works councils, and there can be no assurance that more employees will not form or join unions in the future. In France, we have faced several strikes by our personnel between 2005 and 2007 when, in connection with our merger with certain cable operators, we completed several rounds of headcount optimization; in early 2009, when we terminated the employment of a number of our salespersons; and during the spring of 2010 in response to our amendment of certain of our door-to-door salespersons' employment terms and conditions. The strikes, which took place in 2009, disrupted our headquarters' operations and generated adverse publicity. An increase in the number of our unionised employees could lead to an increased likelihood of strikes, work stoppages and other industrial actions. In addition, we also face the risk of strikes called by employees of our key suppliers of materials or services as well as our installation providers, which could result in interruptions in the performance of our services. Although we monitor our labor relations, we cannot predict the extent to which future labor disputes or disturbance could disrupt our operations, cause reputational or financial harm or make it more difficult to operate our businesses.

You may be unable to effect service of process on the Issuer and/or members of our Board in the U.S. or enforce judgments obtained in U.S. courts for U.S. securities laws violations.

The Issuer is organized under the laws of the Grand Duchy of Luxembourg and does not have any material assets in the U.S. None of the members of the Issuer's Board will be residents of the U.S. and all or a majority of their assets are located outside the United States. As a result, it may not be possible for investors to effect service of process within the U.S. upon the Issuer or the members of its board of directors, or to enforce any judgments obtained in U.S. courts predicated upon civil liability provisions of the U.S. securities laws. In addition, the Issuer cannot assure you that civil liabilities predicated upon the federal securities laws of the U.S. will be enforceable in Luxembourg. The designation of a service of process agent may constitute a power of attorney/mandate in Luxembourg, which can be terminated upon the occurrence of an insolvency event. Depsite the service of process, summary proceedings may be initiated in Luxembourg.

The interests of Next L.P., our majority shareholder, may conflict with our interests or your interests as holders of the Notes.

Next L.P. owns 56.8% of the voting interests in the Issuer as of the date of these Listing Particulars. When business opportunities, or risks and risk allocation arise, the interests of Next L.P. (or its affiliates) may be different from, or in conflict with, our interests on a standalone basis. Because we are controlled by Next L.P., Next L.P. may allocate certain or all of its risks to us and we cannot assure you that Next L.P. will permit us to pursue certain business opportunities. However, Next L.P. has undertaken, until such time as Next L.P.'s holding of shares in the capital of the Issuer falls below 30% of the fully diluted share capital of the Issuer, to present all new corporate opportunities it believes are capable of execution and relating to a relevant opportunity to the Issuer. These obligations, or other needs of the Altice France Group, could result in the Altice France Group not being able to declare any dividends.

In addition, the interests of Next L.P. may conflict with your interests as holders of the Notes. Next L.P. will be able to appoint a majority of the Issuer's and each other group entity's board of directors and to determine our corporate strategy, management and policies. In addition, Next L.P. will have control over our decisions to enter into any corporate transaction and will have the ability to prevent any transaction that requires the approval of shareholders regardless of whether holders of the Notes, believe that any such transactions are in their own best interests. For example, the shareholders could vote to cause us to incur additional indebtedness, to sell certain material assets or make dividends, in each case, so long as our debt instruments and the intercreditor agreements to which we are party permit. The incurrence of additional indebtedness would increase our debt service obligations and the sale of certain assets could reduce our ability to generate revenues, each of which could adversely affect the holders of the Notes.

Risks Relating to the 2014 SFR Acquisition, SFR's Business and the Integration of SFR into our Business

Anticipated synergies from the 2014 SFR Acquisition may not materialize.

We expect to achieve certain synergies discussed elsewhere in these Listing Particulars relating to the operations of SFR and its subsidiaries as they have become part of the Atlice France Group and are consolidated subsidiaries of the Altice France Group. We may not realize any or all of the anticipated synergies of the 2014 SFR Acquisition that we currently anticipate. Among the synergies that we currently expect are cross selling opportunities to existing customers of the Numericable Group and SFR, network synergies and other operational synergies. Our estimated synergies from the 2014 SFR Acquisition are subject to a number of assumptions about the timing, execution and costs associated with realizing the synergies. Such assumptions are inherently uncertain and are subject to a wide variety of significant business, economic and competition risks and uncertainties. There can be no assurance that such assumptions turn out to be correct and, as a result, the amount of synergies that we will actually realize and/or the timing of any such realization may differ significantly (and may be significantly lower) from the ones that we currently estimate and we may incur significant costs in realizing the reorganization of SFR and in reaching the estimated synergies. We may not be successful in integrating some or all these businesses as currently anticipated, which may have a material adverse effect on our business and operations.

The integration of SFR into the Altice France Group could result in operating difficulties and other adverse consequences.

The integration of SFR as anticipated into the Altice France Group may create unforeseen operating difficulties and expenditures and pose significant management, administrative and financial challenges to our business. These challenges include:

- integration of SFR into our current business in a cost effective manner, including network infrastructure, management information and financial control systems, marketing, branding, customer service and product offerings;
- outstanding unforeseen or undisclosed legal, regulatory, contractual, labor or other issues arising from the 2014 SFR Acquisition;
- integration of different company and management cultures;
- retention and/or renewal of material contracts with business partners, suppliers and certain B2B customers; and
- retention, hiring and training of key personnel.

In such circumstances, our failure to effectively integrate SFR into the Altice France Group could have a material adverse effect on our financial condition and results of operations.

Further, SFR has entered into various agreements with a variety of service and outsourcing suppliers, some of which have been terminated upon the 2014 SFR Acquisition as a result of a change in control in SFR's corporate structure. Some of the supply agreements cannot be assigned to any third party outside of SFR. In addition, SFR has entered into agreements with various suppliers for the supply of handset devices. Following the completion of the 2014 SFR Acquisition, SFR will not continue to benefit from certain of these agreements.

Moreover, the 2014 SFR Acquisition has required, and will likely continue to require, substantial amounts of certain of our management's time and focus, which could potentially affect their ability to operate the business. Although we analyze and conduct due diligence on acquisition targets, our assessments are subject to a number of assumptions concerning profitability, growth, interest rates and company valuations and our inquiries may fail to uncover relevant information. There can be no assurance that our assessments or due diligence of and assumptions regarding acquisition targets will prove to be correct, and actual developments may differ significantly from our expectations. Furthermore, our plans to acquire additional businesses in the future are subject to the availability of suitable opportunities. Our competitors may also follow similar acquisition strategies and may have greater financial resources available for investments or may be willing to accept less-favourable terms than we can accept, which may prevent us from acquiring the businesses that we target to the benefit of our competitors.

SFR's ability to operate its business effectively may suffer if we do not, quickly and cost effectively, establish the necessary support functions, as well as a service platform, to support SFR's business following the 2014 SFR Acquisition.

Historically, SFR has relied on certain financial, administrative and other resources of Vivendi to operate its business. SFR has entered into certain intergroup agreements with Vivendi which provided SFR with support services. Some of these agreements automatically terminated upon the 2014 SFR Acquisition. As a consequence, SFR may need to adapt certain independent support systems or contract with third parties to replace Vivendi's services from which SFR no longer benefit.

The French competition authority Autorité de la concurrence (the "Autorité") has announced that it has opened proceedings to review the implementation of the conditions under which the 2014 SFR Acquisition was cleared.

The clearance by the Autorité of the 2014 SFR Acquisition was subject to certain commitments. On January 22, 2015, the Autorité announced that it has opened ex officio proceedings to assess whether certain mobile subscription price increases announced by Groupe Outremer Telecom in La Réunion and Mayotte in November 2014 that became effective on January 1, 2015 are in compliance with Numericable's commitments to preserve Groupe Outremer Telecom's mobile telephony business's viability, market value and competitiveness until the divestiture. In the announcement, the Autorité noted that the French Code of commercial law empowers it to withdraw its authorization of the transaction, order Numericable to comply with the commitments and pay penalties for non-compliance in the event of a delay in execution and issue fines. Withdrawal of the Autorité's approval of the 2014 SFR Acquisition or compliance by Numericable with any such order by the Autorité could have a material adverse effect on our business, financial condition and results of operations and the penalties imposed and/or fines issued by Autorité may be significant.

Risks Relating to SFR's Industry and Markets

SFR is subject to strong competitive pressures.

The French telecommunications market is intensely competitive, saturated and mature. Nationally, SFR competes with the other telecommunications operators, particularly Orange, Bouygues Telecom and the Iliad group, which operates under its "Free" brand, as well as with MVNOs in the mobile market.

SFR also competes with new operators in specific areas, such as service or content providers, search engines, instant messaging services, VoIP services and terminal and OS providers.

In the B2C market, competition is reflected in intense price pressure, which has resulted in lower ARPU and higher churn. As a result, SFR has had to modify its pricing structure. Competition also results in the continuous improvement of the quality of offers and services on the market.

Competition in the B2B market is strong and may increase. Numerous offers relating to the integration of an increasing number of services, particularly IT, and the complexity of the services being offered (data, security) are increasing. Furthermore, SFR also faces competition from other operators such as infrastructure providers, IT network solution providers, software providers, system integrators, both local and international operators as well as private networks.

Furthermore, consolidation in the Internet and mobile telephony markets in France and in Europe, respectively, and the possible market entry of foreign operators in France, could significantly alter the telecommunications market and SFR may not be able to compete with these new operators, particularly those with significant financial and technical resources.

The measures adopted by SFR to adapt to competitive pressures by improving its products and services may not be sufficient to successfully compete with the products and services offered by its competitors. Such competitive pressures may have a material adverse effect on its business, financial condition, results of operations or prospects.

The entry of new operators in the telecommunications market may affect SFR's position.

The development of new telecommunications services and new technologies has encouraged the emergence of new operators, such as the entry by Free in the French market in early 2012, service or content providers on the telecommunications market, such as search engines, instant messaging services, VoIP ("Voice over Internet Protocol") and terminal and OS ("Operating System") providers. These services already compete and are likely to compete increasingly with the offers of telecommunications operators. These new operators may succeed in providing alternative products and services that are superior to the ones currently being offered by SFR, thereby exposing SFR to the risk of losing customers, in an environment where such relationships generate value. Furthermore, these service or content providers could in fact offer their services directly to end consumers and only use the telecommunications operators to gain access to end users. SFR and other telecommunications operators would therefore be at risk of no longer being the direct interface with customers and becoming only service providers.

Furthermore, the principle of net neutrality requires the equal treatment of all data flows on the Internet, and prohibits any telecommunications operator from blocking or restricting Internet content. Accordingly, SFR must ensure unhindered flow of content, applications or services provided to end users by these new operators. The corresponding flows have an impact on the speed and capacity of the networks made available by SFR, while SFR is unable to benefit from the value created or associated where applicable, with such content, applications or services. SFR can only bill its customers for the network it provides and not for the connected services they use. Therefore, SFR could also be forced to make significant investments in order to handle ever increasing data flows and demand for bandwidth by its customers. The investments made, however, may not be sufficient to maintain the quality and capacity of SFR's network.

Consequently, even if SFR continues to build and maintain the quality of its customer relationships and develop offers integrating new services or products, the entry of new operators could affect the positioning of SFR in the value chain. SFR could therefore be faced with the loss of market share (in both the B2C and B2B markets in which it operates) and/or the loss of part of the value created by the services and content to the profit of these new operators. This could have a material adverse effect on the Altice France Group's business, financial conditions, results of operations or prospects.

SFR might not be able to anticipate, identify and offer products and services that are differentiated in the market.

The telecommunications market is characterized notably by rapid changes in technology, services and functionalities, the frequency at which new products are introduced, and the implementation of new sector standards and practices rendering the existing technologies and systems obsolete.

SFR must therefore be able to ensure that the measures it takes are in line with rapid changes to technology, consumer habits and the demand of its customers. In particular, in the absence of dedicated research and development activities for certain products, services and technologies, SFR must be able to identify, aggregate and offer innovative products and services that are differentiated in the market, vis-à-vis its competitors, particularly by promoting the quality of the services associated with its offers. To this end, SFR constantly monitors innovations and services in order to continuously improve the products it offers its clients. Integrating these innovations is essential to ensuring it can continue to compete with its competitors. SFR cannot, however, guarantee that it will be able to anticipate and identify the products and services that meet the expectations of its customers or prospective customers, or that it will be successful in adapting its existing products and services to the new technologies. SFR may not be able to market these products and services within the necessary timeframes. Moreover, SFR may incur substantial costs in renewing or promoting its product and service offering. Furthermore, SFR may not be able to ensure that the product offers and service functionalities developed will be met with the predicted success or enable SFR to achieve its objectives. Additionally, the offers proposed by other operators may not be subject to the same regulatory constraints as telecommunications operators, due to the sectors in which they primarily operate or the location from which they operate their businesses, such as OTT (over-the-top) content providers. Such offers could disrupt the competitive environment, and particularly the market position of operators such as SFR.

SFR may therefore be unable to provide products and services that set it apart from its competitors, which may result in a decline in its current market position and see itself viewed as only an access provider with low value-added services. Consequently, SFR could also lose market share in the B2C and B2B segments. These developments could have a material adverse effect on the Combined Group's business, financial condition, results of operations and prospects.

Risks Relating to SFR's Business and Operations

SFR is exposed to the risk of disturbances in telecommunications networks and/or information systems.

The reliability and quality (both in terms of service and availability) of its networks and information systems, particularly in respect of its mobile telephony and fixed-line businesses are critical to SFR's business, the continuity of its services and the confidence of its customers. In particular, SFR depends heavily on the information systems used by the its network of stores, its website and its customer services systems, which are used for product and service sales and subscriptions and the management of customer accounts. Any unavailability of these systems could significantly disrupt SFR's business.

Furthermore, SFR's current technical projects relating to both its information systems and the short- and medium-term migration plans involving certain mobile network equipment could be exposed to faults on the networks and information systems. In particular, the quality of the networks could be affected by the deployment of SFR's 4G network as well as by the continuous maintenance of its 2G and 3G networks, requiring frequent technical interventions, which could lead to service interruptions or failures affecting SFR's customers. Also, telecommunications infrastructures and the physical security of the sites are vulnerable to possible natural disasters or other similar events (bad weather, floods, fire, power outages, earthquakes, acts of terrorism, vandalism, etc.), which may cause substantial damage to SFR's technical sites and generate significant costs. Furthermore, the damage caused by these disasters may have long-term adverse effects, which could also generate significant costs for SFR. SFR's networks and information systems may also be vulnerable to external attacks, intrusions, denial of service attacks (where large query volumes are sent with the aim of saturating the network), and/or malicious acts which could cause service interruptions or failures.

Additionally, SFR could also be exposed to financial penalties under the contracts it has with its B2C, B2B and wholesale customers if it breaches its contractual obligations particularly with regards to the quality of the services provided. Moreover, the development of resources used by consumers (e.g. videoconferences, telepresence and cloud computing for B2B customers), connected devices and new terminals (smartphones, tablets, etc.) could lead to network saturation due to the large data volumes they may generate or attract.

Although SFR decided to strengthen its IT backup systems and implemented a global protection and monitoring plan, to ensure that the vital functions of the information systems were effectively controlled and backed up, there can be no assurance that these backup systems will be able to cover all the information SFR uses and stores or perform as expected.

A major failure in the information systems or any part of the production or logistics chain during the year-end period could have a significant adverse effect on revenues due to the concentration of sales during this period. Accordingly, SFR avoids working on its network and information systems during this period of the year (starting from mid-November to year-end).

Network or information system faults linked to the occurrence of the events described above could lead to quality deficiencies or service interruptions for some, or even all, customers of SFR, more particularly for certain businesses for which the service provided is of strategic importance. This could affect SFR's reputation and have direct or indirect unfavorable financial consequences (such as financial penalties) and lead to a material adverse effect on the Combined Group's business, financial condition, results of operations or prospects.

SFR's business is dependent on its ability to maintain the quality of the products and services it provides.

SFR is required to integrate new technologies in order to adapt to continuous technological developments in telecommunications products and services. Such new technologies may be difficult to implement, and any implementation issues could have a negative impact on the quality of SFR's products and services. Problems in controlling newly integrated technologies or defects in SFR's products or services could damage its reputation or result in a delay or termination of the marketing of certain products or services, in an increase in customer service costs, costs related to the replacement of defective products and in a loss of revenues, which could be significant if there is a loss of consumer confidence.

SFR might also be unable to adapt to existing or new technologies in order to meet the needs of its customers within an appropriate timeframe.

In addition, although SFR intends to continue to offer high-quality customer service, maintaining this quality level could require substantial investments, and SFR cannot ensure that it will succeed in maintaining a satisfactory level of quality, particularly if it uses third-party providers. Any customer dissatisfaction could affect its reputation or lead to loss of market share.

The occurrence of any of the above could have a material adverse effect on the Altice France Group's business, financial condition, results of operations or prospects.

SFR operates in a capital intensive business.

SFR's activities require substantial levels of capital expenditure relating to maintenance, modernization and development of its network, which are all critical to SFR's growth. Furthermore, SFR incurs substantial capital expenditure in relation to the deployment of new technologies and will continue to make substantial investments in order to develop these new technologies, including 4G (for the purchase of frequencies and the deployment of network infrastructure) and fiber (for the deployment of infrastructure). Furthermore, SFR is obliged to respect certain network coverage and deployment commitments under FTTH and its mobile licenses, which also require it to make substantial and continuous investments. SFR may also acquire new frequencies granted by ARCEP as well as local public authorities in the future, in particular 700 MHz frequencies, in order to improve the quality of its mobile telephony offers and maintain its competitive position. Recent reports indicate that France is expected to auction spectrum in the 700 MHz frequency in late 2015. As spectrum auctions are infrequent and SFR may need additional spectrum in the future, SFR will likely participate even though SFR might not, at the time of auction, require additional spectrum capacity. SFR's participation would require significant capital expenditures in the near-term as acquiring spectrum is expensive, due in part to the fact that spectrum availability is limited. In view of the development of the market and relevant technologies, as well as the development of frequency offers, SFR may have to incur significant additional costs and capital expenditure before achieving a return on previous investments. If market demand for these services decreases, it may also limit SFR's ability to recoup its investment in new frequencies, network and infrastructure. See "*Management's Discussion and Analysis of Financial Condition and Results of Operations of SFR—Liquidity and Capital Resources of SFR—Net Cash From (Used In) Investing Activities*".

Furthermore, new practices and the use of multiple applications may increase bandwidth requirements, which could lead to network saturation and force telecommunications operators to make additional investments to increase their infrastructure capacity. The structure of the French telecommunications market does not allow telecommunications operators to pass their investment costs and capital expenditures on to the end consumer in proportion to the volume of data consumed. Thus, telecommunications operators may not benefit from higher revenues from increasing demand for content, although they bear the costs of this demand through their infrastructure investments.

SFR also has certain network access/coverage obligations for its fiber and/or mobile network, notably for its mobile licenses, such as the hosting of roaming services or network sharing in certain deployment areas. The conditions for implementing these obligations and certain tariffs, such as roaming tariffs within the European Union, may be regulated. These constraints may limit SFR's ability to operate its network under economically advantageous conditions, which could affect the profitability of its investments.

The lack of margins and sufficient resources or self-financing capacity on acceptable terms, could have a negative impact on the ability of SFR to maintain the quality of its network, its products and its services, and on its ability to deploy and extend its network coverage. This in turn could adversely affect the competitive position of SFR in the French market and its long-term growth. Moreover, SFR cannot ensure that the investments made, particularly in 4G or fiber, will be profitable and/or that the associated services will be commercially successful.

SFR's relations with its employees could be affected by changes in the competitive landscape.

SFR operates in highly competitive and changing markets, which requires it to constantly adapt, anticipate and adopt new measures in order to preserve its competitiveness and efficiency. This leads to regular changes to its organizations, which require the employees affected to adapt. This process requires mobilization and motivation of teams with the SFR Group's objectives. As a result, SFR's business could be affected by a deterioration in labor relations with its employees, staff representative bodies or unions. The ability of SFR to maintain good relations with its employees, staff representative bodies and unions is crucial to the success of its various projects. Therefore, SFR must continuously consult with staff representatives in order to ensure the success of its current and future projects, which may delay the completion of certain projects. Furthermore, projects may be poorly received by employees and lead to a deterioration in labor relations, which could, in turn, lead to declines in productivity, possible labor disputes (e.g. strikes, disruptions), and could have a material adverse effect on SFR's business, financial condition and results of operations. In 2014, negotiations with representative labor organizations led to the signature of fifteen collective agreements, signed by most organizations. Nevertheless, difficulties in finalizing these collective agreements cannot be excluded.

In that context, certain of SFR Group's structures must or will have to consult their personnel's representative organizations to carry out their ongoing and upcoming projects, which may delay the completion of certain operations.

In addition, planned decisions may not be well received by employees, and lead to a deterioration of the social climate, itself causing decreases in productivity and potential social conflicts (work interruptions, disruptions, etc.). Such situations could have a material adverse effect on the business, the financial situation and the operational results of the Altice France Group.

SFR is dependent on its providers and suppliers for certain key functions, products and services.

SFR outsources certain services to external operators (other telecommunications operators, providers, sub-contractors, commercial partners, etc.). For example, SFR has outsourced certain IT services that are necessary for SFR to provide the services offered to its customers. SFR therefore relies on third-party providers to supervise a number of its infrastructures, develop IT solutions, or supply, install and maintain the equipment installed in customers' homes and on the premises of business customers. SFR also relies on a number of different suppliers for the products integrated into its offers or for the hardware and software it uses. Furthermore, SFR uses content providers (producers of channels or packages) for its triple-play and quadruple-play offers.

SFR has implemented a multi-sourcing purchase policy for certain products and services and monitors suppliers in its production chain. SFR believes that it is generally capable of changing providers, and uses standardized and interchangeable products. However, it also maintains a single-source policy for certain types of telecommunications equipment, in particular, with respect to its core network, based on geographic area and type of equipment. Although the products and services are standardized and interchangeable, a shortage of certain components on the market or a significant rise in their prices could have a material adverse effect on SFR's business, financial condition and results of operations. Moreover, SFR can, for certain highly specific products or services, become highly dependent on certain providers. SFR considers itself to be in a situation of commercial dependency on one terminal supplier. Consequently, any significant increase in the price of the products concerned, or any deterioration or change in relations with this supplier, could have a material adverse effect on the Altice France Group's business, financial condition and results of operations.

Certain contracts also stipulate minimum order quantities and/or volumes, which SFR might not be able to fulfill according to consumer demand, which would result in the payment of financial penalties. In addition, SFR's business may be delayed in the event of a strike by the employees of its suppliers. The use of suppliers may also result in issues in identifying the responsible party for resolving issues in the supply chain. SFR may also be unable to terminate certain contractual obligations, which could impede any future efforts to rationalize its contractual relations, revise its commercial strategy and/or reduce its purchase volumes, in order to optimize conditions for the performance of contracts and redefine SFR's requirements and margins vis-à-vis its suppliers. While the majority of the contracts entered into with the service providers contain clauses protecting SFR's interests in the event of non-renewal or breach by the third-party suppliers, non-renewal or breach could result in disruptions to operations if SFR is unable to find replacements quickly. SFR could also be required to manage problems with respect to suppliers or sub-contractors in financial difficulty (e.g. suppliers which are in suspension of payments procedures, for example).

The occurrence of any or all of these risks could damage SFR's relations with its customers, lead to the loss of part of its customer base and damage its image and reputation, which in turn could have a material adverse effect on the Altice France Group's business, financial condition and results of operations.

SFR is dependent on its contracts with MVNOs.

In addition to network operators, MVNOs, whose activities depend on access to the network of one or more network operators, operate on the mobile telecommunications market. Providing end-to-end mobile services to MVNOs is a significant financial and commercial endeavor for the SFR Group, which provides services to 16 MVNOs on its network.

Competition to provide these services to MVNOs has intensified over recent years, and the MVNO wholesale market has changed, in particular with the introduction of "Full MVNO" status, which allows virtual operators to issue their own SIM cards and have a central database managing subscriber rights and certain core network elements, providing such operators more autonomy. In addition, market consolidation, and in particular acquisitions of MVNOs by telecommunications operators, could decrease the size of the MVNO wholesale market and SFR's market share.

SFR's ability to renew its existing contracts with MVNOs or enter into new contractual relationships, upon the expiration of such contracts, either on commercially attractive terms, or at all, depends on a range of commercial and operational factors and events, which may be beyond SFR's control. If SFR is unable to maintain or renew relations with its MVNOs, or develop business relationships with additional MVNOs, it could have a material adverse effect on its business, and financial condition, results of operations or prospects.

Regulatory and Legal Risks of SFR

SFR might not be able to obtain, maintain or renew the licenses and permits needed to carry out its activities.

Various aspects of SFR's business depend on obtaining or renewing licenses issued by the regulatory authorities, more specifically the ARCEP for telecommunications, and the French regulator of the audiovisual industry (CSA) for the audiovisual sector.

The procedure for obtaining or renewing these licenses can be long, costly and complicated. In addition, these licenses may not be obtained or renewed. Should SFR not be able to obtain in a timely fashion or renew the licenses needed to operate or develop its business, its ability to realize its strategic objectives could be compromised.

The acquisition of licenses, furthermore, is costly, and the payment schedule varies depending on the auctions of the frequencies in question. The cost of acquiring licenses could increase in the future due to the high levels of competition in the telecommunications sector. As a result, any auction of the 700 MHz frequency band open to telecom operators at the end of 2015 could generate significant expenses for SFR, with the dates for payments unknown until the auction is announced. In addition, SFR may not be granted the licenses it seeks, which could have an adverse effect on the Altice France Group's business, financial condition, results of operations or prospects. The calendar for the auction of these frequencies is expected to be set in early 2015.

Moreover, SFR's subsidiaries committed to complying with certain obligations (population coverage, sharing in certain areas, national roaming) when they were granted licenses. As a result, SFR is required to deploy a 3G and 4G radio network in accordance with specific coverage rates of the population in mainland France and according to a set timeframe. In addition, in accordance with its 4G licenses and provided certain conditions are met, SFR will be required to provide Free Mobile with roaming on part of its 4G network. SFR must also, jointly with the other 800 MHz band license holders, and in accordance with its 2G license, cover the town centers identified under the "white spots" program and grant reasonable demands for network sharing in priority deployment areas. SFR is also required to grant reasonable demands to host MVNOs on all of its very high speed mobile networks open to the public in mainland France. Failure to comply with any of these commitments could put SFR at risk with respect to its regulatory obligations and possibly expose SFR to sanctions (fines, total or partial suspension or withdrawal of licenses). This could have a material adverse effect on the Altice France Group's business, financial condition, results of operations or prospects.

The legal status of SFR's network is complex and the network is primarily governed by public law, which could affect the stability of the rights of SFR.

SFR's telecommunications network is essentially made up of physical infrastructure (lines, network headends, switches and radio stations) in which the telecommunications equipment (mainly cables) is installed. These components of SFR's network are subject to different legal systems. As SFR owns only some of the sites where its physical infrastructure is located, concessions, easements, leases or IRUs have been concluded where infrastructure is located on public land or on private property ("*autorisation d'occupation du domaine public*").

In connection with the establishment of a significant part of its telecommunications and frequency network, SFR has concluded public land use agreements (conventions d'occupation du domaine public) or is the holder of public land use permits. Under such agreements or permits, SFR may install the equipment for its network along roads, motorways, railways or canals, for example. No transfer of property takes place in this context.

These agreements have been entered into for very different terms, varying from 3 to 25 years, with the shortest term agreements generally providing for automatic renewal. As for all occupants of public land, SFR's occupancy of public land is precarious and on an intuitus personae basis. The public entities with which SFR has made such agreements or which have granted such permits may terminate such agreements or permits at any time for fault or in the public interest, and certain agreements furthermore provide that no compensation is to be provided for such termination.

SFR does not have a right to renew such agreements. Should SFR not be able to renew such agreements, the relevant subsidiary would be required, upon the expiry of such agreements, to (i) restore the site to its original state at the request of the manager or the owner of the relevant public land and/or (ii) transfer, in certain cases in exchange for compensation and in others for free, title of the infrastructure installed on the relevant land.

If SFR were to lose some or all of the rights relating to its network, this could have a significant unfavorable effect on the Altice France Group's business, financial condition, results of operations or prospects.

SFR's business depends in part on its ability to set up and maintain partnerships with other participants in the telecommunications sector.

Network sharing agreement between Bouygues Telecom and SFR

On January 31, 2014, Bouygues Telecom and SFR concluded an agreement to share part of their mobile networks. The aim of this agreement was to allow both operators to offer their respective customers better geographic coverage and a better quality of service whilst optimizing the costs and investments incurred for this purpose.

The first cell coverage plans were delivered by each party on April 30, 2014. At this date, each operator was able to review the other's deployment plan, since exchanging technical information on-site during the establishment of sharing agreements is prohibited by the ARCEP. This exchange of information led, on October 24, 2014, to the adaptation of the agreement and in particular regarding certain engineering choices that had been made at the time of negotiation when each party did not have all of the pertinent information about the other's network. The completion of the target network, initially expected for the end of 2017, has been delayed by one year to the end of 2018, to take into account the prior deployment delays.

SFR could be exposed to various risks associated with the implementation of the sharing agreement. The agreement provides for the deployment of the shared network by the two operators. Any delay in its implementation could affect SFR's ability to reach its geographic coverage and service quality objectives. The implementation of the partnership will furthermore require considerable capital expenditures.

SFR will be dependent on Bouygues Telecom for the part of the network that Bouygues Telecom will be responsible for operating. In particular, SFR will not have any direct operational control of the part of the network to be shared and managed by Bouygues Telecom. SFR will not therefore be able to control the quality of the network provided to its customers or to control the implementation of any maintenance or of any repairs that may be necessary to correct a failure. Furthermore, SFR will be exposed to the risk of default by Bouygues Telecom.

The partnership may also not generate the expected synergies, especially in terms of geographic coverage and service quality.

In the event of a failure and/or a total or partial interruption of the partnership, SFR would have to redeploy a network in the areas that had previously been covered by the sharing agreement in order to maintain. Furthermore, in such a scenario, SFR would not necessarily be able to provide the same level of coverage that its customers had enjoyed under the sharing agreement.

The competent authorities could, in the future, make decisions that call into question the economics or validity of the sharing agreement.

Lastly, third parties could also try to gain access to the shared network and bring legal action against SFR and Bouygues Telecom.

Agreement for the deployment of fiber in average densely populated areas between SFR and Orange

On November 14, 2011, SFR concluded a co-investment agreement with Orange relating to the deployment of FTTH optical fiber for the coverage of less densely populated areas (ZMD) of mainland France.

SFR has to provide or co-finance the coverage of 10 million homes under this agreement. In order to avoid overlap, the agreement designates the operator that is in charge of deployment for each municipality, which must then allow the other operator to access its network. This agreement thus provides that, by 2020, SFR will have deployed optical fiber (FTTH) to 2.4 million homes, and Orange to 7.6 million homes. Each will become a customer of the other on the wholesale market, by entering into IRUs in the areas where the relevant operator has not itself deployed the optical fiber.

SFR has announced that it will be starting all horizontal deployments on the less densely populated areas (ZMD) that it is to cover before the end of 2015 and that it has undertaken to complete such deployments in the following five years at the latest. In the event of non-compliance with this contractual deployment schedule, Orange may make its own deployments in the areas initially allocated to SFR.

In the event of delays in deployment, SFR could thus lose the opportunity to set up its own network and would be dependent on the network deployed by Orange and be required to purchase wholesale services from Orange, which could furthermore expose it to a loss of market share and revenue.

To alleviate concerns from the French authorities that SFR would slow down its deployment in the areas in which NG already has its own cable network, Numericable Group has committed to the French Competition Authority that SFR will enter into good faith negotiations with Orange in order to ensure that it will not remain in charge of the deployment of FTTH optical cable in areas already covered by Numericable Group's own network, and thus swap these municipalities with Orange against other municipalities of similar size and requiring a similar investment. If this swap is not completed within a certain period of time, Orange shall be allowed to deploy its own network in the relevant municipalities.

Partnership agreement between SFR and Vodafone Sales and Services Limited

SFR has had a partnership agreement with Vodafone Sales and Services Limited ("Vodafone") since 2011, which allows each party to offer their business customers international telephony services.

This agreement also provides for roaming, with SFR's customers traveling abroad using Vodafone's network and Vodafone's customers traveling in France using SFR's network.

If this agreement is terminated, SFR may no longer be able to provide comparable offers and services to its customers, which could result in a loss of clients and a decrease in sales of other products. In addition, given the nature of the partnership and the services provided, it would be difficult for SFR to find another partner able to provide equivalent services.

Contract related to the GSM-R mobile communications network

SFR has a minority shareholding of 30% in the Synérail company, which has concluded a partnership agreement with RFF for the design, construction, deployment, operation, maintenance and financing of the GSM-R mobile communications network. The GSM-R project aims to set up a private telecommunications network dedicated to the needs of rail transport professionals. It will enable the establishment of a European network with a unique communication system that is compatible and standardized across the rail networks, replacing the existing national radio systems. This contract, which has a 15 year term and a €1 billion global amount, provides for the progressive deployment of this network. SFR also plays a part as services provider in the exploitation phase of the GSM-R network. Delays by SFR in deployment or SFR's inability to achieve the objectives set by the contract could put SFR in breach with respect to main partners.

The occurrence of any of the above could have a material adverse effect on the Altice France Group's business, financial condition, results of operations or prospects.

SFR is dependent on its intellectual property rights, which may not be adequately protected.

SFR owns a large, diverse portfolio of brands, patents, drawings, models and domain names. The activities of SFR are based to a large extent on its intellectual property rights, and SFR has implemented and oversees an active policy aimed at protecting and managing them.

SFR holds (fully or through licenses) patent and trademark rights and patent applications in the European Union, specifically in France, as well as outside Europe (in particular in the United States, Japan and China). Like any other entity that seeks to protect its intellectual property rights, SFR may have difficulty in obtaining intellectual property rights due to potential historical claims or conditions relating to appropriate title registration. Moreover, SFR cannot guarantee that the filings and registrations made to obtain intellectual property rights will lead to their being awarded, specifically when disputes arise with third parties in connection with opposition or invalidity claims. In addition, the rights obtained may not provide adequate protection or a competitive advantage, such as an exclusive operating right.

SFR may also be dependent on its employees or third parties with respect to the ownership of certain intellectual property rights. SFR's policy on employee and corporate officer inventions and creations provides that such employees or corporate officers are rewarded or provided additional compensation for the transfer of intellectual property rights to SFR. Certain contractual provisions providing for such transfer may however not meet the requirements of the French Intellectual Property Code, and, as a result, such transfer (including copyright on software rights) may, in certain situations, be challenged by the relevant employees or corporate officers. Furthermore, certain intellectual property rights used by SFR may have been developed jointly and may be held in co-ownership with third parties. Some secondary patents may also be dependent on third-party technologies.

Certain key intellectual property rights used by SFR in connection with its business are or may be held by third parties that have granted a license to SFR, the terms of which may restrict SFR's use, and the infringement of which could result in significant litigation, specifically regarding software. In particular, some licensing contracts contain clauses that may lead to termination of right to use in the event of a change of control of SFR.

Despite SFR's best efforts to protect its intellectual property rights, third parties may attempt to infringe upon such rights. SFR may find it difficult to protect its current or future rights effectively and to prevent unauthorized use, particularly in foreign countries, and this could generate significant costs. SFR has established a policy for monitoring potential infringements of its intellectual property rights (specifically trademarks and domain names) and entrusts the management of preliminary litigation to specialist law firms. Management by SFR of its extensive portfolio of intellectual property rights represents a significant cost, which costs may increase if SFR were required to bring legal action to enforce its rights or if SFR were required to defend its rights against claims from third parties.

Furthermore, SFR may face litigation based on the infringement of the intellectual property rights of third parties. Such litigation could result in a usage ban and substantial damages. In line with competitors and other companies operating in areas where technological expertise is required, SFR is exposed to the risk of actions brought by "patent trolls" or Non-Practicing Entities (NPE). The main or sole activity of these entities is to acquire or hold patents that they do not themselves use. They offer licenses for the patents they hold and seek to obtain cross-licensing agreements. Where appropriate, they take legal action for infringement of these patents in order to obtain compensation. Such legal action usually involves very large sums and could force SFR to enter into licensing agreements for certain technologies that are key to its business, particularly with respect to 3G and 4G technology.

The inability of SFR to protect key elements of its intellectual property rights and technology effectively could have a material adverse effect on the Altice France Group's business, financial condition, results of operations or prospects.

SFR uses so-called "freeware" in connection with its business.

"Freeware" is software based on the concepts of sharing and free use of source code. It is subject to specific license types, for instance the GNU GPL (General Public License), which allows users to modify and use source code without the prior consent of the rights holders.

However, depending on the type of license, modified versions of freeware or changes made to it may be subject to the same "free" license and be freely accessible and usable by third parties in the same conditions as the original freeware (particularly in terms of warranties of title). In addition, generally speaking, no contractual guarantee is given by the rights holders of freeware. Furthermore, there is uncertainty as to the law applicable to this type of license and the interpretation of the provisions such a license contains, and regarding the chain of ownership rights to freeware.

As a result, SFR is subject to a risk of lawsuits involving this type of software. In addition, the use by SFR of such software could have an impact on the ownership of software developed by SFR, notably in terms of license exclusivity (the use or integration of such freeware components could result in the application of the freeware patent regime in whole or in part). This situation could have a material adverse effect on the Altice France Group's business, financial condition, results of operations or prospects.

SFR faces risks associated with its distribution network.

SFR distributes its products and services to consumers and companies directly or indirectly through its national distribution network. In connection with its B2C business, this distribution occurs mainly through the "Espace SFR" brand. For indirect distribution, SFR relies on independent partners, including the SFD and Cinq sur Cinq companies, in which it holds minority interests either directly or indirectly.

The telecommunications market is characterized by rapid changes in customer needs and habits. As a result, SFR endeavors to adapt its distribution network over time to such changes, which may require changes by independent partners involved in indirect distribution of SFR's products and services. However, some partners may not be willing or able to implement the necessary changes.

SFR also faces litigation for substantial sums, specifically regarding requests for the reclassification of certain contracts as commercial agent contracts, for compensation following the termination of the business relationship, for application of the "salaried manager" status, and requests from its own employees regarding the recognition of SFR in its capacity as employer, and the application of the employment status in terms of the "SFR Social and Economic Unit (UES) convention" (See "*Description of SFR's Business—Legal Proceedings*" of these Listing Particulars).

Although SFR has already implemented policies for adapting its contractual tools in order to prevent risks and manage tailored protective policies, SFR cannot guarantee that such claims will not increase or that the factual or legal arguments put forward by SFR to rebut these claims will be received favorably by the courts. In particular, SFR may be obligated to apply SFR employment status outside its current Social and Economic Unit (UES) convention.

Such events could have an adverse effect on SFR's distribution network and compel it to modify it; more generally it could have a significant material adverse effect on the organization, business, financial condition, results of operations or prospects of the Altice France Group.

SFR is involved in legal or administrative actions and litigation with regulators, competitors or other parties.

In the ordinary course of its business, SFR is involved in a number of legal, governmental, administrative and arbitration proceedings, and may also be subject to investigations and audits. These procedures and investigations whose outcome is by nature uncertain may result in the payment of significant sums (certain of which, in particular but not exclusively, relate to claims received since the most recent accounting close, i.e. September 30, 2014) and/or harm SFR's reputation, which in turn could have a significant material adverse effect on its business, financial condition, results of operations or prospects.

The main proceedings in which SFR is involved are set out in "*Description of SFR's Business—Legal Proceedings*".

Risks Relating to Telecommunications Operators in France affecting SFR, the Numericable Group and, following the 2014 SFR Acquisition, the Altice France Group.

Exposure to electromagnetic fields through telecommunications equipment has raised concerns regarding possible harmful side effects.

SFR operates several facilities classified by the government as ICPE (*installation classée pour la protection de l'environnement*) in mainland France and in La Réunion, especially for its data centers. SFR remains attentive to the environmental risks which might arise or be discovered in the future, and has programs in place to ensure the observance of the applicable regulations.

Both SFR and Numericable Group's activities are subject to public concern relating to possible effects of electromagnetic waves on consumers' health (radiofrequency emissions from antennas, radiofrequency emissions from mobile terminals, Wifi, etc.). These concerns have been expressed in numerous countries, as well as in relation to the deployment of 4G networks by mobile operators.

The World Health Organization (WHO), in Fact sheet no. 193 of June 2011, indicates that "to date, no adverse health effects have been established as being caused by mobile phone use". However, a number of studies report long-term health effects linked to the use of radio equipment and particularly mobile phones. In May 2011, the International Agency for Research on Cancer (the IARC), with the support of the WHO, classified the radiofrequency electromagnetic fields linked particularly with the use of cordless phones as "possibly carcinogenic to humans". In May 2014, a French study (from the *Institut de Santé Publique, d'Epidémologie et de Développement de Bordeaux—IPSED*) evoked an increased risk of brain tumors.

Several reports (such as the Grenelle radio wave conference (2009), the 2012 BioInitiative Report, the updated opinion and report of the French Agency for Food, Environmental and Occupational Health Safety (*Agence nationale de sécurité sanitaire de l'alimentation, de l'environnement et du travail*) in October 2013 and the recommendations of the French Mission Sobriété in late 2013) have been published on this subject.

The government and health authorities have established different precautions aimed at reducing exposure to mobile phone fields. Certain countries, such as France, have also adopted regulations establishing public exposure limits.

As a precaution, SFR recommends in its general user terms and conditions, as do health authorities, to limit one's exposure to the electromagnetic fields emitted by mobile telephones, via measures that can be easily implemented. Furthermore, new publications, either scientific or written by public or health-related authorities, are monitored by a dedicated team within SFR in order to identify actions that can be implemented in light of said publications.

Future scientific publications or publications issued by the government and the health authorities which establish a direct link between mobile phone usage and health problems could lead to legislative and regulatory changes that might result in the dismantling of antennas and a greater scarcity of sites, thereby generating additional costs for SFR and the Numericable Group. Furthermore, such changes could lead to a reduction in the use of mobile telecommunications services and Wifi networks, as well as a multiplication of claims, particularly if an adverse effect were to be scientifically established.

On June 26, 2014, the French Senate adopted, at a first reading, a bill on efficiency, transparency and consultation in matters of exposure to electromagnetic waves (text no. 1635), following the adoption of an earlier version by the French National Assembly in January 2014. This bill is still in the parliamentary process (and is expected to undergo a second review at the National Assembly at the beginning of 2015), and it is difficult at this stage to identify what obligations may be placed on operators. As the bill currently stands, the Group believes that such provisions could mainly lead to more complex and time intensive procedures related to the installation of antennas, the extent of which will depend on the objectives set with respect to public exposure, which appear in the bill that was adopted by the Senate at a first reading.

Fears of possible health risks of electromagnetic waves could also lead to third-party actions against SFR and the Numericable Group. For example, this might include legal actions demanding the removal of antennas or masts, which could affect the Altice France Group's business and the deployment of its network, which could have a material adverse effect on its business, financial condition and results of operations.

Prolonged weakness of, or a deterioration in, macroeconomic conditions in France could weigh on SFR's and Numericable Group's business, financial condition and results of operations.

For the nine months ending September 30, 2014, all of SFR's and Numericable Group's revenues were derived from operations in France. They are therefore heavily dependent on the changing economic climate in France.

The French economy has experienced weak growth or recession in recent periods and although short- term forecasts show slight improvements, growth remains fragile, with the French government estimating that France's GDP will grow by only 0.4% in 2014 and 1.0% in 2015 (source: Banque de France; IMF October 2014). Negative developments in the French economy, including as a result of any possible resurgence of the Eurozone debt crisis, may have a direct negative impact on the spending patterns of consumers as well as on businesses, both in terms of products and usage levels. Such negative developments could (i) make it more difficult for the Altice France Group to attract new subscribers and customers, (ii) make it more likely that certain of the Altice France Group's subscribers or customers will downgrade or terminate their services and (iii) make it more difficult for the Altice France Group to maintain its ARPU or B2B prices at existing levels. In particular, a significant portion of the Altice France Group's B2C business revenue is generated by premium television and multiple-play packages. Because discretionary consumer spending is affected in periods of economic uncertainty, customers may consider such premium products as being non-essential or not attractive from a cost- benefit perspective and therefore opt for the Altice France Group's non-premium packages or cheaper offers from competitors, or cancel or decide not to renew their subscriptions. While the impact on the B2B segment is more limited than in the B2C segment, the Altice France Group also faces the risk during periods of macroeconomic downturns of businesses reducing their service requirements or negotiating increasingly lower prices.

The introduction of a class action lawsuit in the French legal system open to consumer advocacy groups could increase the Group's exposure to significant legal disputes.

Starting from October 1, 2014, French law allows customers to join a class action lawsuit initiated by a consumer advocacy group so as to obtain reparations for material damages suffered during a consumer transaction. Given the B2C activities of the Altice France Group, the Altice France Group could be confronted, like any operator in the sector, with potential class action lawsuits that could be joined by clients seeking to obtain reparations for potential damages. In such cases, and assuming there are actual or even only alleged practices and damages, the Altice France Group could face significant claim amounts. In addition, such acts could harm the reputation of the Altice France Group.

The Altice France Group is subject to data confidentiality and security obligations.

Within the scope of its activities, the Altice France Group must collect and process personal data. The French data protection law (the "*loi Informatique et Libertés*") of January 6, 1978 imposes obligations on the data processing controller (i.e. the entity which determines the purpose of data processing and the data processing procedures), concerning personal information and data of individuals, obtaining of their consent (notably for the use of cookies), declaration formalities and transfer of data outside the European Union. Any breach of these obligations could lead to criminal and financial penalties against the Altice France Group and damage its reputation. The French data protection law also imposes an obligation to notify security breaches on providers of publicly available electronic communication services, such as the Altice France Group. The breach of these obligations could lead to litigation against the Altice France Group. Furthermore, a draft European regulation dated January 25, 2012 on the protection of personal data was approved by the European Parliament on March 12, 2014. This regulation will affect the procedures and implementation of personal data processes by the Altice France Group, and will significantly increase the penalties which might be imposed on the Altice France Group in case of breach. This draft regulation is expected to be adopted by 2016, but no specific timetable has been set. Changes to the regulations on personal data processing are likely to have a material adverse effect on the Altice France Group's activities, financial condition and results of operations.

The development of data hosting activities for different customers will increase the Altice France Group's level of exposure to the risk of liability in terms of protection and security, all the more so as SFR has a data hosting activity subject to approval which involves the health data of individuals. As a result, it is subject to specific obligations set out in the French Public Health Code. This type of activity is particularly sensitive in view of the personal data concerned. If the Altice France Group breaches its obligations or if data breaches occur, the Altice France Group could be subject to criminal and financial penalties, which may be likely to have a material adverse effect on the activities, financial condition and results of operations of the Altice France Group.

Also, Numericable Group and SFR have put in place measures to guarantee the reliability of their personal data protection and security systems, as well as to reduce the risks that might be caused by a safety breach or breach of the personal data they process. The Altice France Group has therefore put in place specific resources dedicated to data protection and has also set up an internal process which fulfills the obligation to notify the French data protection commission (the "CNIL") of personal data security breaches. Despite the measures adopted by the Altice France Group to protect data confidentiality and security, the risk of possible attacks or breaches of the data processing systems remains, which could give rise to penalties and damage their reputation. The Altice France Group could be forced to incur additional costs in order to limit such risks or the consequences thereof, which could in turn have a material adverse effect on its business, financial condition, results of operations or prospects. Furthermore, any loss of confidence of customers of the Altice France Group as a result of such events could lead to a substantial fall in sales and have a material adverse effect on the Altice France Group's business, financial condition and results of operations.

SFR's and Numericable Group's reputation and business could be materially harmed as a result of, and SFR and Numericable Group could be held liable, including criminally liable, for, data loss, data theft, unauthorized access or successful hacking.

SFR's and Numericable Group's operations depend on the secure and reliable performance of their information technology systems. The techniques used to obtain unauthorized access, disable or degrade service or sabotage systems change frequently and often are not recognized until launched against a target. SFR and Numericable Group may therefore be unable to anticipate these techniques or to implement in a timely manner effective and efficient countermeasures.

If third parties attempt, or manage, to bring down any of SFR's or Numericable Group's information technology systems or gain access to its information technology systems, they may be able to misappropriate confidential information, cause interruptions in SFR's or Numericable Group's operations, access SFR's or Numericable Group's services without paying, damage its computers or otherwise damage SFR's or Numericable Group's reputation and business. While SFR and Numericable Group continue to invest in measures to protect their networks, any such unauthorized access to the Altice France Group's cable television service could result in a loss of revenue, and any failure to respond to security breaches could result in consequences under the SFR's or Numericable Group's agreements with content providers, all of which could have a material adverse effect on the Altice France Group's business, results of operations and financial condition. Furthermore, as an electronic communications services provider, SFR or Numericable Group may be held liable for the loss, release or inappropriate modification or storage conditions of customer data or the wider public, which are carried by its network or stored on its infrastructures. In such circumstances, the Altice France Group could be held liable or be subject to litigation, penalties, including the payment of damages and interest, and adverse publicity that could adversely affect its business, financial condition and results of operations.

Failure by each of SFR and the Numericable Group to protect its image, reputation and brand could materially affect their businesses.

The brands under which Numericable Group and SFR sell products and services, including "Numericable", "Completel", "SFR", "RED", "Formules Carrées", "SFR La Carte" and associated brands are well-recognized brands in France.

These brands have been developed through extensive marketing campaigns, website promotions and customer referrals, and the use of a dedicated sales force and dealer networks. SFR's and Numericable Group's success depend on their ability to maintain and enhance the image and reputation of their existing products and services and to develop a favorable image and reputation for new products and services. For example, Numericable Group's image is tied to its key product, LaBox, for which it has heavily invested in marketing campaigns and sales distribution channels. The image and reputation of SFR's and Numericable Group's products and services, including LaBox, may be adversely affected if concerns arise about (i) the quality, reliability and benefit/cost balance of their products and services, (ii) the quality of their support centers or (iii) their ability to deliver the level of services advertised. An event or series of events that threatens the reputation of one or more of SFR's or Numericable Group's respective brands, or one or more of SFR's and Numericable Group's products such as LaBox, could have an adverse effect on the value of that brand or product and subsequent revenues therefrom. Restoring the image and reputation of SFR's or Numericable Group's products and services may be costly and not always possible.

Both SFR and Numericable Group rely upon copyright, trademark and patent laws to establish and protect their intellectual property rights, but no assurance can be given that the actions they have taken or will take in the future will be adequate to prevent violation of their intellectual property rights. Adverse publicity, legal action or other factors could lead to substantial erosion in the value of SFR's or Numericable Group's brand, which could lead to decreased consumer demand and have a material adverse effect on SFR's or Numericable Group's business, results of operations or financial condition and prospects.

Pressure on customer service could adversely affect SFR's and Numericable Group's respective businesses.

The volume of contacts handled by SFR's and Numericable Group's customer service functions can vary considerably over time. The introduction of new product offerings can initially place significant pressure on each of their customer service functions. Increased pressure on such functions is associated with decreased satisfaction of customers.

For example, in the B2B and wholesale segments of the Altice France Group, customers require service to be extremely reliable and to be reestablished within short timeframes in the event of disruptions. Penalties are often payable in the case of failure to meet expected service quality and/or respect expected recovery times. In addition, product installation can be complex, requiring specialized knowledge and expensive equipment and with delays and service problems resulting in both penalties and the potential loss of a customer. In these segments, the Altice France Group relies on its experienced key customer relations personnel to handle any customer issues or requests, and the loss of such personnel can result in the loss of customers.

Furthermore, the Numericable Group has in the past experienced significant levels of customer dissatisfaction as a result of operational difficulties, both in the B2C and B2B segments. In the B2C segment, these dissatisfaction levels resulted primarily from operational difficulties stemming from the integration of the various cable businesses the Numericable Group acquired in 2005 and 2006. The Altice France Group considers that its current levels of customer satisfaction are high. However, no assurance can be given that such levels will remain high in the future.

Improvements to customer service functions may be necessary to achieve desired growth levels, and, if SFR and the Numericable Group fail to manage such improvements effectively and achieve such growth, they may in the future experience customer service problems which may damage their reputation, contribute to increased churn and/or limit or slow their future growth.

Risks Relating to the Notes and the Structure

The Issuer and the Guarantor are holding companies and conduct no business of their own and will depend on payments from their direct and indirect subsidiaries to provide them with funds to meet their obligations under the Notes and the Guarantee.

The Issuer and the Guarantor are holding companies with no business or revenue generating operations on their own. The only significant assets of the Issuer as of the Issue Date consisted of cash in its bank accounts, its interest in the Escrow Agreement and Escrow Accounts and its shares in Altice France and Altice International. As such, the Issuer is wholly dependent upon payments from members of the Group, and the Guarantor is wholly dependent upon payments from its direct and indirect subsidiaries in order to service its debt obligations under the Notes or the Guarantee to the extent it does not have cash to meet those obligations. Furthermore, the Indenture and the 2014 Senior Notes Indenture prohibit the Issuer from engaging in any activities other than certain limited activities. The only significant assets of the Guarantor as of the Issue Date consisted of its bank accounts and the shares it holds in Numericable.

The ability of members of the Group to make such payments will depend upon their cash flows and earnings which, in turn, will be affected by all of the factors discussed in these "Risk Factors Relating to the Group" and elsewhere in these Listing Particulars. Furthermore, the payment of dividends and the making, or repayment, of loans and advances to the Issuer by the Issuer's and the Guarantor's subsidiaries are subject to various restrictions. Existing debt of certain of these subsidiaries prohibits, and future debt of such subsidiaries may prohibit, the payment of dividends or the making, or repayment, of loans or advances to the Issuer or its parent entities. In addition, the ability of any of the Issuer's and the Guarantor's direct or indirect subsidiaries to make certain distributions may be limited by the laws of the relevant jurisdiction in which the subsidiaries are organized or located, including financial assistance rules, corporate benefit laws, requirements that dividends must be paid out of reserves available for distribution and other legal restrictions which, if violated, might require the recipient to refund unlawful payments. In some cases, receipt of such payments or advances may be subject to onerous tax consequences.

While the 2015 Indentures of Altice International and the New Altice Financing Term Loan permit, subject to certain conditions, payments by Altice International to the Issuer in an amount sufficient to enable the Issuer to make scheduled interest payments on the Notes, the instruments governing existing Indebtedness of Altice International do not contain any such specific provisions. In order for Altice International to make payments to the Issuer to enable the Issuer to make interest payments on the Notes, Altice International will need to rely on other exceptions and carve-outs in the covenants applicable to such existing Indebtedness of Altice International. See "*Summary—Key Subsidiary Restricted Payment Covenant Exceptions and Carve-outs*". In addition, the Numericable Senior Secured Notes and the Numericable Term Loan permit Numericable to pay dividends to its shareholders in an amount such that the Issuer's pro rata share of such dividends is sufficient to make scheduled interest payments on the 2014 Senior Secured Notes only. Neither the Numericable Senior Secured Notes nor the Numericable Term Loan contain any such specific provision relating to the Notes. In order for the Issuer to receive payments from Numericable to enable the Issuer to make payments on the Notes, Numericable will need to rely on other exceptions and carve-outs in the covenants applicable to the Numericable Senior Secured Notes and the Numericable Term Loan (See "*Summary—Key Subsidiary Restricted Payment Covenant Exceptions and Carve-outs*") and the Issuer will only be entitled to receive 60.3% of any such payments. In addition, any such payments must be approved by the Board of Directors of Numericable in compliance with their fiduciary duties as directors of a public company. We cannot assure you the instruments governing existing indebtedness of Altice International or Numericable will permit the payments required to be received by the Issuer to make payments on the Notes, and if permitted, we cannot assure you that the amount of payments so permitted will be sufficient to meet our obligations under the Notes and the Indenture.

We own 60.3% of the Numericable Group. Although we control the Numericable Group (including the ability to set its dividend policy) and fully consolidate its results of operations in the Issuer's financial statements, we are only entitled to receive 60.3% of the dividends, if any, declared by the Numericable Group. As a result, the EBITDA of the Numericable Group or the pro forma EBITDA of the Altice France Group should not be relied upon as a measure of the cash that is available from the Numericable Group to allow us to meet our obligations under the Notes. Furthermore, the Numericable Group has issued the Numericable Senior Secured Notes and entered into the Numericable Term Loan, and therefore has substantial debt obligations of its own.

Although the Indenture and the 2014 Senior Notes Indenture and 2014 Altice S.A. Revolving Credit Facility Agreement limit the ability of the Issuer's subsidiaries to enter into future consensual restrictions on their ability to pay dividends and make other payments to the Issuer or the Guarantor, there are significant qualifications and exceptions to these limitations. We cannot assure you that arrangements with the Issuer and its subsidiaries and the funding permitted by the agreements governing existing and future indebtedness of the Issuer and its subsidiaries will provide the Issuer or the Guarantor with sufficient dividends, distributions or loans to fund payments under its Notes or the Guarantee, when due. See "*Description of Other Indebtedness*" and "*Description of Notes*."

Your right to receive payments under the Notes may be structurally or effectively subordinated to the claims of certain existing and future creditors of the Issuer's subsidiaries that do not guarantee the Notes upon the release of the proceeds thereof from the relevant Escrow Accounts.

As of the Issue Date, none of our subsidiaries guaranteed the Notes and only Altice France will guarantee the Notes upon the release of the proceeds of the offering of the Notes from the Escrow Accounts. Generally, claims of creditors of a non Guarantor subsidiary, including trade creditors and claims of preference shareholders (if any) of the subsidiary, will have priority with respect to the assets and earnings of the subsidiary over the claims of creditors of its parent entity, including claims by holders of the Notes under the Guarantee. In the event of any foreclosure, dissolution, winding up, liquidation, administration, reorganization or other insolvency or bankruptcy proceeding of any of our non Guarantor subsidiaries, holders of their debt (including any intercompany loan to such subsidiaries) and their trade creditors will generally be entitled to payment of their claims from the assets of those subsidiaries before any assets are made available for distribution to its parent entity. As such, the Notes and the Guarantee will each be structurally subordinated to the creditors (including trade creditors) and preference shareholders (if any) of our non Guarantor subsidiaries.

Our non Guarantor subsidiaries may also be able to incur substantial additional indebtedness in the future, further increasing the risks associated with leverage. If any of our non Guarantor subsidiaries incur additional indebtedness, the holders of that debt will be entitled to share ahead of you in any proceeds distributed in connection with any insolvency, liquidation, reorganization, dissolution or other winding up of such subsidiaries.

The value of the Collateral may not be sufficient to satisfy our obligations under the Notes and such Collateral may be reduced or diluted under certain circumstances.

In the event of a liquidation, insolvency, foreclosure, bankruptcy, reorganization or similar proceeding, the proceeds from the sale of the Collateral that secures the Notes may not be sufficient to satisfy our obligations under the Notes. The value of the Collateral and the amount that may be received upon a sale of Collateral will depend upon many factors including, among others, the condition of the Collateral and our industry, the ability to sell the Collateral in an orderly sale, market and economic conditions, whether the business is sold as a going concern, the availability of buyers and other factors. With respect to any shares of our subsidiaries pledged to secure the Notes and the Guarantee, such shares may also have limited value in the event of a bankruptcy, insolvency, liquidation, winding up or other similar proceedings in relation to the entity's shares that have been pledged because all of the obligations of the entity whose shares have been pledged must first be satisfied, leaving little or no remaining assets in the pledged entity. As a result, the claims of the holders of the Notes are effectively subordinated to the rights of our existing and future secured creditors who have priority in respect of proceeds from enforcement of the liens over assets that constitute Collateral to the extent of the value of such assets. In addition, courts could limit recoverability with respect to the Collateral if they deem a portion of the interest claim usurious in violation of applicable public policy. As a result, liquidating the Collateral may not produce proceeds in an amount sufficient to pay any amounts due on the Notes. If the proceeds of Collateral were not sufficient to repay amounts outstanding under the Notes, then holders of the Notes (to the extent not repaid from the proceeds of the sale of the Collateral) would only have an unsecured claim against our remaining assets. See "*—It may be difficult to realize the value of the Collateral securing the Notes*."

No appraisal of the fair market value of the Collateral has been made in connection with this offering of Notes. The book value of the Collateral should not be relied on as a measure of realizable value for such assets. The value of the Collateral could be impaired in the future as a result of changing economic and market conditions, our failure to successfully implement our business strategy, competition and other factors. The Collateral may include intangible or other illiquid assets that by their nature may not have a readily ascertainable market value, whose value to other parties may be less than its value to us, or may not be readily saleable or, if saleable, there may be substantial delays in their liquidation. In addition, the value of the Collateral may decrease because of obsolescence, impairment or certain casualty events.

The Indenture permits, and the Altice S.A. Intercreditor Agreement, the 2014 Altice S.A. Revolving Credit Facility Agreement and the 2014 Senior Notes Indenture permit, the granting of certain liens other than those in favor of the holders of the Notes on the relevant Collateral securing the Notes. To the extent that holders of other secured indebtedness or third parties enjoy such liens, including statutory liens, whether or not permitted by the Indenture, the Altice S.A. Intercreditor Agreement, the 2014 Altice S.A. Revolving Credit Facility Agreement, the 2014 Senior Notes Indenture or the security documents governing the Collateral, such holders or third parties may have rights and remedies with respect to the Collateral that, if exercised, could reduce the proceeds available to satisfy our obligations under the Notes, to the extent such Notes are secured by such Collateral. Moreover, if the Issuer issues additional Notes under the Indenture, holders of such additional Notes would benefit from the same Collateral as the holders of the Notes being offered hereby, thereby diluting holders of Notes' ability to benefit from the liens on the Collateral securing their Notes.

The Altice S.A. Intercreditor Agreement provides for detailed enforcement mechanisms with respect to the Collateral. Please see "*Description of Other Indebtedness—Altice S.A. Intercreditor Agreement*".

The security interests in the Collateral will be granted to the Security Agent rather than directly to the holders of the Notes, as applicable. The ability of the Security Agent to enforce certain of the Collateral may be restricted by local law.

The security interests in the Collateral that will secure our obligations under the Notes and the obligations of the Guarantor under the Guarantee will not be granted directly to the holders of the Notes but will be granted only in favor of the Security Agent. The Indenture provides (along with the Altice S.A. Intercreditor Agreement) that only the Security Agent has the right to enforce the security documents. As a consequence, holders of the Notes will not have direct security interests and will not be entitled to take enforcement action in respect of the Collateral securing such Notes, except through the Security Agent who will (subject to the provisions of the Indenture and the Altice S.A. Intercreditor Agreement) provide instructions to the Security Agent in respect of the Collateral securing such Notes.

The appointment of a foreign security agent will be recognized under Luxembourg law, (i) to the extent that the designation is valid under the law governing such appointment and (ii) subject to possible restrictions, depending on the type of the security interests. Generally, according to article 2(4) of the Luxembourg Act dated August 5, 2005 concerning financial collateral arrangements, a security (financial collateral) may be provided in favor of a person acting on behalf of the collateral taker, a fiduciary or a trustee in order to secure the claims of third party beneficiaries, whether present or future, provided that these third party beneficiaries are determined or may be determined. Without prejudice to their obligations vis à vis third party beneficiaries of the security, persons acting on behalf of beneficiaries of the security, the fiduciary or the trustee benefit from the same rights as those of the direct beneficiaries of the security aimed at by such law.

The security documents governing the granting of the Collateral are governed by the laws of Luxembourg. Bankruptcy laws could prevent the Security Agent on behalf of the holders of the Notes from repossessing and disposing of the Collateral upon the occurrence of an event of default if a bankruptcy proceeding is commenced by or against the relevant grantor of such Collateral before the Security Agent repossesses and disposes of the Collateral. See "*—Enforcing your rights as a holder of the Notes or under the Guarantee or security across may prove difficult or provide less protection than U.S. bankruptcy law*."

The holders of the Notes' ability to recover under the Collateral and the Guarantee may be limited. Before any amounts are available to repay the Notes, lenders under the 2014 Altice S.A. Revolving Credit Facility and certain hedge counterparties will have a right to be repaid with the proceeds realized following the enforcement of all or part of the Collateral.

The obligations under the Notes and the Guarantee are secured by security interests over the Collateral, which also secures our obligations under the 2014 Altice S.A. Revolving Credit Facility Agreement the 2014 Senior Notes Indenture and certain hedging agreements. Pursuant to the Altice S.A. Intercreditor Agreement, the lenders under the 2014 Altice S.A. Revolving Credit Facility Agreement and certain hedging arrangements have priority over the holders of the Notes with respect to the proceeds from the enforcement of the Collateral. In addition, the creditors under the 2014 Altice S.A. Revolving Credit Facility Agreement and certain hedging arrangements will have priority over any amounts received from the sale of any assets of the Issuer or the Guarantor pursuant to an insolvency event or certain other distressed disposals of the Collateral pursuant to the Altice S.A. Intercreditor Agreement. As such, you may not be able to recover on the Collateral if the claims of the lenders under the 2014 Altice S.A. Revolving Credit Facility Agreement and certain hedging obligations are greater than the proceeds realized from any enforcement of the security interests over the Collateral.

In addition, the Collateral secures obligations under the 2014 Senior Notes Indenture and may also secure certain future indebtedness that is permitted to be incurred under the Indenture and our other debt agreements on a *pari passu* basis, and certain of that indebtedness may have similar priority to the proceeds of the enforcement of, or certain distressed disposals of, the Collateral. Any proceeds from an enforcement sale of the Collateral by any creditor will, after all obligations under the 2014 Altice S.A. Revolving Credit Facility Agreement and such priority hedging obligations have been paid from such recoveries, be applied pro rata in repayment of the Notes, the 2014 Senior Notes and other senior indebtedness secured on such Collateral. Our ability to incur additional debt in the future secured on the Collateral may have the effect of diluting the ratio of the value of such Collateral to the aggregate amount of the obligations secured by the Collateral. In addition, claims of any secured creditors which are secured by assets that do not also secure the Notes or the Guarantee will have priority with respect to such assets over the claims of holders of the Notes. As such, the claims of the holders of the Notes are effectively subordinated to the rights of such secured creditors to the extent of the value of the assets securing such indebtedness.

Subject to certain conditions, any security interest in the Collateral will be automatically released at the time of an enforcement sale of the pledged entity or the assets or shares of any direct or indirect parent entity of such subsidiary. Following such a sale, the Trustee of the Notes and the holders of the Notes will have no claims in relation to such entity and its direct and indirect subsidiaries under the Notes or the Guarantee. See "*Description of Other Indebtedness—Altice S.A. Intercreditor Agreement*" for further information.

It may be difficult to realize the value of the Collateral securing the Notes.

On the Completion Date, the holders of the Notes will benefit from security interests in the Collateral that secures the Notes.

The Collateral will be subject to any and all exceptions, defects, encumbrances, liens, loss of legal perfection and other imperfections permitted under the Indenture, the 2014 Senior Notes Indenture and/or the Altice S.A. Intercreditor Agreement and accepted by other creditors that have the benefit of first ranking security interests in the Collateral securing the Notes from time to time, whether on or after the date the Notes are first issued. The Initial Purchasers have neither analyzed the effect of, nor participated in any negotiations relating to, such exceptions, defects, encumbrances, liens and other imperfections. The existence of any such exceptions, defects, encumbrances, liens, loss of legal perfection and other imperfections could adversely affect the value of the Collateral, as well as the ability of the Security Agent to realize or foreclose on such Collateral. Furthermore, the first ranking of security interests can be affected by a variety of factors, including, among others, the timely satisfaction of perfection requirements, statutory liens or recharacterization under the laws of certain jurisdictions.

The security interests of the Security Agent will be subject to practical problems generally associated with the realization of security interests over real or personal property such as the Collateral. For example, the Security Agent may need to obtain the consent of a third party, including that of competent regulatory authorities or courts, to enforce a security interest. We cannot assure you that the Security Agent will be able to obtain any such consents. We also cannot assure you that the consents of any third parties will be given when required to facilitate a foreclosure on such assets. Accordingly, the Security Agent may not have the ability to foreclose upon those assets, and the value of the Collateral may significantly decrease.

Furthermore, enforcement procedures and timing for obtaining judicial decisions in Luxembourg may be materially more complex and time consuming than in equivalent situations in jurisdictions with which investors may be familiar.

Rights in the Collateral may be adversely affected by the failure to perfect security interests in the Collateral.

Applicable law may require that a security interest in certain assets can only be properly perfected and its priority retained through certain actions undertaken by the secured party of the security or the grantor of the security. The liens on the Collateral may not be perfected with respect to the Notes and the Guarantee, as the case may be, if the Security Agent is not able to or does not take the actions necessary to perfect or maintain the perfection of any such liens. Such failure may result in the invalidity of the relevant security interest in the Collateral securing the Notes, as applicable, or adversely affect the priority of such security interest in favor of such debt against third parties, including a trustee in bankruptcy and other creditors who claim a security interest in the same Collateral. In addition, applicable law may require that certain property and rights acquired after the grant of a general security interest can only be perfected at the time such property and rights are acquired and identified. There can be no assurance that the Security Agent will monitor, or that we will inform the Security Agent of, the future acquisition of property and rights that constitute Collateral, and that the necessary action will be taken to properly perfect the security interest in such after acquired collateral. The Security Agent does not have any obligation to monitor the acquisition of additional property or rights that constitute Collateral or the perfection of or to take steps to perfect any security interest therein. Such failure may result in the loss of the security interest in the Collateral or adversely affect the priority of the security interest in favor of the Notes and the Guarantee against third parties including a trustee in bankruptcy and other creditors who may claim a secured interest in the Collateral.

Additionally, the Indenture and the security documents that will secure the Notes may require us to take a number of actions that might improve the perfection or priority of the liens of the Security Agent in the Collateral. To the extent that the security interests created by the security documents with respect to any Collateral are not perfected, the Security Agent's rights will be equal to the rights of general unsecured creditors in the event of a liquidation, foreclosure, bankruptcy, reorganization or similar proceeding.

There are circumstances other than repayment or discharge of the Notes under which the Guarantee and the Collateral will be released automatically, without your consent or the consent of the Trustee.

Under various circumstances, the Guarantee will be released. See "*Description of Notes—The Note Guarantee*". In addition, under various circumstances, the Issuer and the Guarantor will be entitled to release the security interests in respect of the Collateral securing the Notes and the Guarantee. We will be permitted to release and/or re take any Collateral to the extent permitted by the terms of the Indenture, the 2014 Senior Notes Indenture, the security documents governing the Collateral, the Altice S.A. Intercreditor Agreement or any additional intercreditor agreement. Such a release and re taking of Collateral may give rise to the start of a new hardening period in respect of the Collateral and/or the Collateral may be void under applicable Luxembourg provisions. Under certain circumstances, other creditors, insolvency administrators or representatives or courts could challenge the validity or enforceability of the grant of the Collateral. Any such challenge, if successful, could potentially limit your recovery in respect of the Collateral and thus reduce your recovery under the Notes. See "*Description of Notes—Notes Security*".

We will in most cases have control over the Collateral securing the Notes and the sale of particular assets could reduce the pool of assets securing such debt.

The security documents governing the Collateral will allow us to remain in possession of, retain exclusive control over, freely operate, and collect, invest and dispose of any income from the Collateral. So long as no default or event of default under the Indenture would result therefrom, we may, among other things, without any release or consent by the Security Agent, conduct ordinary course activities with respect to the Collateral, such as selling, or otherwise disposing of Collateral and making ordinary course cash payments, including repayments of debt. Any of these activities could reduce the value of the Collateral and consequently the amounts payable to you from proceeds of any sale of Collateral in the case of an enforcement of the liens.

Enforcing your rights as a holder of the Notes or under the Guarantee or security across multiple jurisdictions may prove difficult or provide less protection than U.S. bankruptcy law.

The Notes were issued by the Issuer and guaranteed by the Guarantor, each of which is incorporated under the laws of the Grand Duchy of Luxembourg. In the event of a bankruptcy, insolvency or similar event, proceedings could be initiated in the Grand Duchy of Luxembourg, England and Wales or other jurisdictions. Such jurisdictions may not be as favorable to investors as the laws of the United States or other jurisdictions with which investors are familiar, and proceedings in these jurisdictions are likely to be complex and costly for creditors and otherwise may result in greater uncertainty and delay regarding the enforcement of your rights. Your rights under the Notes and the Collateral will be subject to such bankruptcy, insolvency and administrative laws and there can be no assurance that you will be able to effectively enforce your rights in such complex, multiple bankruptcy, insolvency or similar proceedings. See "*—The Guarantee will be subject to certain limitations on enforcement and may be limited by applicable laws or subject to certain defenses that may limit its validity and enforceability*."

In addition, in the event that one or more of the Issuer, the Guarantor and any future guarantor, if any, or any other of our subsidiaries experiences financial difficulty, the bankruptcy, insolvency, administrative and other laws of the Issuer's and the Guarantor's jurisdictions of organization and location of assets may be materially different from, or in conflict with, each other and those of the United States, including in the areas of rights of creditors, priority of governmental and other creditors, ability to obtain post petition interest and duration of the proceedings. The application of these laws, or any conflict among them, could call into question whether the law of any particular jurisdiction should apply, and may adversely affect your ability to enforce your rights under the Notes, the Guarantee and the Collateral in those jurisdictions or limit any amounts that you may receive. See "*Enforcement of Judgments*" with respect to certain of the jurisdictions mentioned above.

The Guarantee will be subject to certain limitations on enforcement and may be limited by applicable laws or subject to certain defenses that may limit its validity and enforceability.

The Guarantee provides the holders of the Notes with a direct claim against the Guarantor. However, the Indenture provides that the Guarantee will be limited to the maximum amount that may be guaranteed by the Guarantor without, among other things, rendering the Guarantee, as it relates to the Guarantor, voidable or otherwise ineffective or limited under applicable law or causing the officers of the Guarantor to incur personal civil or criminal liability, and enforcement of such Guarantee would be subject to certain generally available defenses. See "*Limitation on Validity and Enforceability of the Guarantee and the Security Interests*."

Enforcement of the Guarantee against the Guarantor, or of the security interests in respect thereof, will be subject to certain defenses available to the Guarantor in the relevant jurisdiction. Although laws differ among various jurisdictions, in general, under bankruptcy or insolvency law and other laws, a court could (i) void or invalidate all or a portion of the Guarantor's obligations under its Guarantee or the security interests in respect thereof, (ii) direct that the holders of the Notes return any amounts paid under a Guarantee to the Guarantor or to a fund for the benefit of the Guarantor's creditors or (iii) take other action that is detrimental to you, typically if the court found that:

- the Guarantee was incurred with actual intent to give preference to one creditor over another, hinder, delay or defraud creditors or shareholders of the Guarantor or, in certain jurisdictions, when the granting of the Guarantee has the effect of giving a creditor a preference or when the recipient was aware that the Guarantor was insolvent when it granted the Guarantee;

- the Guarantor did not receive fair consideration or reasonably equivalent value or corporate benefit for the Guarantee and such Guarantor was: (i) insolvent or rendered insolvent because of the Guarantee; (ii) undercapitalized or became undercapitalized because of the Guarantee; or (iii) intended to incur, or believed that it would incur, indebtedness beyond its ability to pay at maturity;

- the Guarantee was held to exceed financial assistance rules or the corporate objects of the Guarantor or not to be in the best interests or for the corporate benefit of the Guarantor; or

- the amount paid or payable under the Guarantee was in excess of the maximum amount permitted under applicable law.

These or similar laws may also apply to any future guarantee granted by any of our subsidiaries pursuant to the Indenture. Limitations on the enforceability of judgments obtained in New York courts in such jurisdictions could limit the enforceability of any Guarantee against any Guarantor.

We cannot assure you which standard a court would apply in determining whether a Guarantor was "insolvent" at the relevant time or that, regardless of the method of the valuation, a court would not determine that a Guarantor was insolvent on that date, or that a court would not determine, regardless of whether or not a Guarantor was insolvent on the date its Guarantee was issued, that payments to holders of the Notes constituted preferences, fraudulent transfers or conveyances on other grounds.

The measures of insolvency for purposes of fraudulent transfer laws vary depending upon applicable governing law. Generally, an entity would be considered insolvent if, at the time it incurred indebtedness:

- the sum of its debts, including contingent liabilities, is greater than the fair value of all its assets;

- the present fair saleable value of its assets is less than the amount required to pay the probable liability on its existing debts and liabilities, including contingent liabilities, as they become due; or

- it cannot pay its debts as they become due.

The liability of the Guarantor under the Guarantee will be limited to the amount that will result in such Guarantee not constituting a preference, fraudulent conveyance or improper corporate distribution or otherwise being set aside. However, there can be no assurance as to what standard a court will apply in making a determination of the maximum liability of the Guarantor. There is a possibility that the entire Guarantee may be set aside, in which case the entire liability may be extinguished.

If a court decided that the Guarantee was a preference, fraudulent transfer or conveyance and voided such Guarantee, or held it unenforceable for any other reason, you may cease to have any claim in respect of the Guarantor and would be a creditor solely of the Issuer. In the event that the Guarantee is invalid or unenforceable, in whole or in part, the Notes would be effectively subordinated to all liabilities of the Guarantor, and if we cannot satisfy our obligations under the Notes or the Guarantee is found to be a preference, fraudulent transfer or conveyance or is otherwise set aside, we cannot assure you that we can ever repay in full any amounts outstanding under the Notes. See "*Limitation on Validity and Enforceability of the Guarantee and the Security Interests*."

We may not be able to obtain enough funds necessary to finance an offer to repurchase the Notes upon the occurrence of certain events constituting a change of control (as defined in the Indenture) as required by the Indenture.

Upon the occurrence of certain events constituting a change of control, the Issuer will be required to offer to repurchase all outstanding Notes (and the Issuer could be required to repay the outstanding borrowings under the 2014 Revolving Credit Facility and offer to purchase the 2014 Senior Notes) at a purchase price in cash equal to 101% of the principal amount thereof on the date of purchase plus accrued and unpaid interest to the date of purchase. If a change of control were to occur, we cannot assure you that the Issuer would have sufficient funds available at such time to pay the purchase price of the outstanding Notes or that the restrictions in our credit facilities or other then existing contractual obligations of us or the Issuer would allow the Issuer to make such required repurchases. The repurchase of the Notes pursuant to such an offer could cause a default under such indebtedness, even if the change of control itself does not. The Issuer's ability to pay cash to the holders of the Notes following the occurrence of a change of control may be limited by our then existing financial resources. Sufficient funds may not be available when necessary to make any required repurchases. If an event constituting a change of control occurs at a time when the Issuer is prohibited from repurchasing Notes under the 2014 Altice S.A. Revolving Credit Facility, the 2014 Senior Notes Indenture or other debt instruments, we may seek the consent of the lenders under such indebtedness to the purchase of the Notes or may attempt to refinance the borrowings that contain such prohibition. If we do not obtain such consent or repay such borrowings, the Issuer will remain prohibited from repurchasing any tendered Notes. In addition, we expect that we would require third party financing to make an offer to repurchase the Notes upon a change of control. We cannot assure you that we would be able to obtain such financing. Any failure by the Issuer to offer to purchase Notes would constitute a default under the Indenture, which could, in turn, constitute a default under other agreements governing our debt. See "*Description of Notes—Change of Control*".

The change of control provisions contained in the Indenture may not necessarily afford you protection in the event of certain important corporate events, including reorganizations, restructurings, mergers, recapitalizations or other similar transaction involving us that may adversely affect you, because such corporate events may not involve a shift in voting power or beneficial ownership or, even if they do, may not constitute a "change of control" as defined in the Indenture. Except as described under "Description of Notes—Change of Control", the Indenture does not contain provisions that require us to offer to repurchase or redeem the Notes in the event of a reorganization, restructuring, merger, recapitalization or similar transaction.

The definition of "change of control" that will be contained in the Indenture includes a disposition of all or substantially all of the assets of the Issuer and its restricted subsidiaries taken as whole to any person. Although there is a limited body of case law interpreting the phrase "all or substantially all," there is no precise established definition of the phrase under applicable law. Accordingly, in certain circumstances there may be a degree of uncertainty as to whether a particular transaction would involve a disposition of "all or substantially all" of the assets of the Issuer and its restricted subsidiaries taken as a whole. As a result, it may be unclear as to whether a change of control has occurred and whether the Issuer is required to make an offer to repurchase the Notes.

We cannot assure you that an active trading market will develop for the Notes, in which case your ability to sell the Notes will be limited.

The Notes are new securities for which there is no market. We cannot assure you as to:

- the liquidity of any market that may develop for the Notes;

- your ability to sell your Notes; or

• the prices at which you would be able to sell your Notes.

Future trading prices of the Notes will depend on many factors, including, among other things, prevailing interest rates, our operating results and the market for similar securities. Historically, the market for non investment grade securities has been subject to disruptions that have caused substantial volatility in the prices of securities similar to the Notes. The liquidity of a trading market for the Notes may be adversely affected by a general decline in the market for similar securities and is subject to disruptions that may cause volatility in prices. It is possible that the market for the Notes will be subject to disruptions. Any such disruption may have a negative effect on you, as a holder of the Notes, regardless of our prospects and financial performance. The Initial Purchasers have advised the Issuer that they currently intend to make a market in the Notes. However, the Initial Purchasers are not obliged to do so, and they may discontinue any market making activities at any time without notice. As a result, there is no assurance that an active trading market will develop for the Notes. If no active trading market develops, you may not be able to resell your Notes at a fair value, if at all.

The Notes may not become or remain listed on the Official List of the Luxembourg Stock Exchange.

Although the Issuer agreed in the Indenture to use commercially reasonable efforts to have the Notes listed and admitted to trading on the Euro MTF Market of the Luxembourg Stock Exchange within a reasonable period after the respective issue date of the Notes and to maintain such listing as long as the Notes are outstanding, the Issuer cannot assure you that the Notes will become or remain listed. If the Issuer is unable or can no longer maintain the listing on the Luxembourg Stock Exchange, the Issuer may cease to make or maintain such listing on the Luxembourg Stock Exchange, provided that if at any time the Issuer determines that it will not maintain such listing, it will obtain prior to the delisting of the Notes from the Euro MTF Market of the Luxembourg Stock Exchange, and thereafter use its best efforts to maintain, a listing of such Notes on another recognized stock exchange. Although no assurance is made as to the liquidity of the Notes as a result of listing on the Luxembourg Stock Exchange or another recognized listing exchange for high yield issuers in accordance with the Indenture, failure to be approved for listing or the delisting of the Notes from the Luxembourg Stock Exchange or another listing exchange in accordance with the Indenture may have a material adverse effect on a holder's ability to resell Notes in the secondary market.

Credit ratings may not reflect all risks.

The credit ratings assigned to the Notes are an assessment by the relevant rating agencies of the Issuer's ability to pay its debts when due, which is, in respect of payment obligations under the Notes, dependent upon the ability of its subsidiaries to make payments to the Issuer. Consequently, real or anticipated changes in our or the Notes' credit ratings may generally affect the market value of the Notes. Ratings may not reflect the potential impact of all risks relating to structure, market and additional factors discussed in these Listing Particulars, and other factors not discussed herein may affect the value of the Notes. A credit rating is not a recommendation to buy, sell or hold securities and may be revised or withdrawn by the rating agency at any time. An explanation of the significance of such rating may be obtained from the applicable rating agency. There is no assurance that such credit ratings will be issued or remain in effect for any given period of time or that such ratings will not be lowered, suspended or withdrawn entirely by the rating agencies, if, in the applicable rating agency's judgment, circumstances so warrant. It is also possible that such ratings may be lowered in connection with the application of the proceeds of this offering or in connection with future events, such as future acquisitions. Holders of Notes will have no recourse against us or any other parties in the event of a change in or suspension or withdrawal of such ratings. Any lowering, suspension or withdrawal of such ratings may have an adverse effect on the market price or marketability of the Notes.

Certain covenants may be suspended upon the occurrence of a change in our ratings.

The Indenture provides that, if at any time following the date of the Indenture, the Notes are rated Baa3 or better by Moody's and BBB− or better from Standard & Poors and no default or event of default has occurred and is continuing, then beginning that day the following provisions of the Indenture will not apply to the Notes: "—Limitation on Indebtedness", "—Limitation on Restricted Payments", "—Limitation on Restrictions on Distributions from Restricted Subsidiaries", "—Limitation on Sales of Assets and Subsidiary Stock", "—Limitation on Affiliate Transactions" and "—Impairment of Security Interests" and the provisions of clause (3) of the first paragraph of the covenant described under "—Merger and Consolidation—The Issuer." Notwithstanding the foregoing, if the rating assigned by any such rating agency to such Notes should subsequently decline to below Baa3 or BBB−, respectively, the foregoing covenants will be reinstituted as at and from the date of such rating decline.

If these covenants were to be suspended, we would be able to incur additional debt or make payments, including dividends or investments, which may conflict with the interests of holders of the Notes. There can be no assurance that the Notes will ever achieve an investment grade rating or that any such rating will be maintained.

The Issuer is incorporated under and subject to Luxembourg law, and Luxembourg insolvency laws may not be as favorable as insolvency laws in other jurisdictions.

The Issuer is a public limited liability company (*société anonyme*) incorporated under the laws of Luxembourg and has its center of main interests in Luxembourg. Accordingly, insolvency proceedings with respect to an Issuer may proceed under, and be governed by, Luxembourg insolvency laws. The rights of holders of Notes and the responsibilities of the Issuer to the holders of Notes under Luxembourg law may be materially different from those with regard to equivalent instruments under the laws of the jurisdiction in which the Notes are offered. Additionally, the insolvency laws of Luxembourg may not be as favorable to holders of Notes as insolvency laws of jurisdictions with which investors may be familiar.

The following is a brief description of certain aspects of insolvency laws in Luxembourg. Under Luxembourg insolvency laws, the following types of proceedings (together referred to as insolvency proceedings) may be opened against an Issuer to the extent that an Issuer has its registered office or center of main interest in Luxembourg:

- bankruptcy proceedings (*faillite*), the opening of which may be requested by an Issuer, by any of its creditors or by the Luxembourg public prosecutor. Following such a request, the courts having jurisdiction may open bankruptcy proceedings, if an Issuer (a) is in default of payment (*cessation de paiements*) and (b) has lost its commercial creditworthiness (*ébranlement de crédit*). If a court considers that these conditions are met, it may open bankruptcy proceedings, absent a request made by an Issuer or a creditor. The main effect of such proceedings is the suspension of all measures of enforcement against an Issuer except, subject to certain limited exceptions, for secured creditors, and the payment of creditors in accordance with their rank upon the realization of assets;

- controlled management proceedings (*gestion contrôlée*), the opening of which may only be requested by the Issuer and not by its creditors; and

- composition proceedings (*concordat préventif de la faillite*), the opening of which may only be requested by an Issuer (having received prior consent of a majority of its creditors) and not by its creditors. The court's decision to admit a company to the composition proceedings triggers a provisional stay on enforcement of claims by unsecured creditors.

In addition to these proceedings, the ability of the holders of Notes to receive payment on the Notes, as applicable may be affected by a decision of a court to grant a reprieve from payments (*sursis de paiements*) or to put an Issuer into judicial liquidation (*liquidation judiciaire*). Judicial liquidation proceedings may be opened at the request of the public prosecutor against companies pursuing an activity violating criminal laws or that are in serious violation of the commercial code or of the Luxembourg law dated August 10, 1915 on commercial companies, as amended. The management of such liquidation proceedings will generally follow similar rules as those applicable to bankruptcy proceedings.

The Issuer's liabilities in respect of the Notes, as applicable will, in the event of a liquidation of the Issuer following bankruptcy or judicial liquidation proceedings, rank after the cost of liquidation (including any debt incurred for the purpose of such liquidation) and those of the Issuer's debts that are entitled to priority under Luxembourg law. Preferential debts under Luxembourg law for instance include, among others:

- certain amounts owed to the Luxembourg Revenue;

- value added tax and other taxes and duties owed to the Luxembourg Customs and Excise;

- social security contributions; and

- remuneration owed to employees.

Assets over which a security interest has been granted will in principle not be available for distribution to unsecured creditors (except after enforcement and to the extent a surplus is realized).

During insolvency proceedings, all enforcement measures by unsecured creditors are suspended. The ability of secured creditors to enforce their security interest may also be limited in the event of controlled management proceedings automatically causing the rights of secured creditors to be frozen until a final decision has been taken by the court as to the petition for controlled management, and may be affected thereafter by a reorganization order given by the court. A reorganization order requires the prior approval by more than 50% of the creditors representing more than 50% of the Issuer's liabilities in order to take effect.

The Luxembourg act dated August 5, 2005 concerning financial collateral arrangements, as amended (the "Collateral Act 2005") expressly provides that all financial collateral arrangements (including pledges) including enforcement measures are valid and enforceable even if entered into during the pre bankruptcy period, against all third parties including supervisors, receivers, liquidators and any other similar persons or bodies irrespective of any bankruptcy, liquidation or other situation, national or foreign, of composition with creditors or reorganization affecting anyone of the parties, save in the case of fraud.

Generally, Luxembourg insolvency laws may also affect transactions entered into or payments made by the Issuer during the pre bankruptcy hardening period (*période suspecte*) which is a maximum of six months and the 10 days preceding the judgment declaring bankruptcy, except that in certain specific situations the court may set the start of the suspect period at an earlier date. In particular:

- pursuant to article 445 of the Luxembourg code of commerce, some specific transactions (in particular, the granting of a security interest for antecedent debts, save in respect of financial collateral arrangements within the meaning of the Collateral Act 2005; the payment of debts which have not fallen due, whether payment is made in cash or by way of assignment, sale, set off or by any other means; the payment of debts which have fallen due by any means other than in cash or by bill of exchange; the sale of assets without consideration or with substantially inadequate consideration) entered into during the suspect period (or the ten days preceding it) must be set aside or declared null and void, if so requested by the insolvency receiver;

- pursuant to article 446 of the Luxembourg code of commerce payments made for matured debts as well as other transactions concluded for consideration during the suspect period are subject to cancellation by the court upon proceedings instituted by the insolvency receiver if they were concluded with the knowledge of the bankrupt's cessation of payments;

- pursuant to article 21 (2) of the Collateral Act 2005 concerning financial collateral arrangements, notwithstanding the suspect period as referred to in articles 445 and 446 of the Luxembourg code of commerce, where a financial collateral arrangement has been entered into on the date of the commencement of a reorganization measure or winding up proceedings, but after the opening of liquidation proceedings or the coming into force of reorganization measures or the entry into force of such measures, that agreement is enforceable and binding against third parties, administrators, insolvency receivers, liquidators and other similar organs if the collateral taker proves that it ignored the fact that such proceedings had been opened or that such measures had been taken or that it could not reasonably be aware of it; and

- pursuant to article 448 of the Luxembourg code of commerce and article 1167 of the civil code (*action paulienne*) gives the insolvency receiver (acting on behalf of the creditors) has the right to challenge any fraudulent payments and transactions, including the granting of security with an intent to defraud, made prior to the bankruptcy, without any time limit.

In principle, a bankruptcy order rendered by a Luxembourg court does not result in automatic termination of contracts except for intuitu personae contracts, that is, contracts for which the identity of the company or its solvency were crucial. The contracts, therefore, subsist after the bankruptcy order. However, the insolvency receiver may choose to terminate certain contracts. However, as of the date of adjudication of bankruptcy, no interest on any unsecured claim will accrue vis á vis the bankruptcy estate. The bankruptcy order provides for a period of time during which creditors must file their claims with the clerk's office of the Luxembourg district court sitting in commercial matters. After having converted all available assets of the company into cash and after having determined all the company's liabilities, the insolvency receiver will distribute the proceeds of the sale, on a pro rata basis, to the creditors after deduction of the receiver fees and the bankruptcy administration costs.

Transfers of the Notes are restricted, which may adversely affect the value of the Notes.

The Notes are being offered and sold pursuant to an exemption from registration under the U.S. Securities Act and applicable state securities laws of the United States. The Notes have not been, and will not be, registered under the U.S. Securities Act or any U.S. state securities laws. Therefore, you may not transfer or sell the Notes in the United States except pursuant to an exemption from, or a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws, or pursuant to an effective registration statement, and you may be required to bear the risk of your investment in the Notes for an indefinite period of time. The Notes and the Indenture contain provisions that restrict the Notes from being offered, sold or otherwise transferred except pursuant to the exemptions available pursuant to Rule 144A and Regulation S under the U.S. Securities Act, or other exemptions under the U.S. Securities Act. In addition, by acceptance of delivery of any Notes, the holder thereof agrees on its own behalf and on behalf of any investor accounts for which it has purchased the Notes that it shall not transfer the Notes, as applicable, in an aggregate principal amount of less than $200,000, in the case of the dollar denominated Notes, or €100,000, in the case of the euro denominated Notes. Furthermore, the Issuer has not registered the Notes under any other country's securities laws. It is your obligation to ensure that your offers and sales of the Notes within the United States and other countries comply with applicable securities laws. See "*Transfer Restrictions*".

You may be unable to recover in civil proceedings for U.S. securities laws violations.

Each of the Issuer and the Guarantor are incorporated under the laws of the Grand Duchy of Luxembourg. Some or all of the directors and executive officers of the Issuer and the Guarantor are non residents of the United States and all or a majority of their assets are located outside the United States. As a result, it may not be possible for investors to effect service of process within the United States upon the Issuer, the Guarantor or their respective directors and executive officers, or to enforce any judgments obtained in U.S. courts predicated upon civil liability provisions of the U.S. securities laws. Additionally, there is doubt as to the enforceability in many foreign jurisdictions of civil liabilities based on the civil liability provisions of the federal or state securities laws of the United States against ourselves, the Guarantor, the directors, controlling persons and management and any experts named in these Listing Particulars who are not residents of the United States. See "*Enforcement of Judgments*".

You may face currency exchange risks or adverse tax consequences by investing in the Notes denominated in currencies other than your reference currency.

The Notes are denominated and payable in U.S. dollar and euro. If you are a sterling or other non U.S. dollar or non euro investor, an investment in the Notes will entail foreign exchange related risks due to, among other factors, possible significant changes in the value of the U.S. dollar or euro relative to sterling or other relevant currencies because of economic, political or other factors over which we have no control. Depreciation of the U.S. dollar or euro against sterling or other relevant currencies could cause a decrease in the effective yield of the Notes below their stated coupon rates and could result in a loss to you when the return on the Notes is translated into the currency by reference to which you measure the return on your investments. Investments in the Notes by U.S. investors may also have important tax consequences as a result of foreign currency exchange gains or losses, if any. See "*Tax Considerations—Certain U.S. Federal Income Tax Considerations*".

The Notes may be treated as issued with original issue discount for U.S. federal income tax purposes.

The Dollar Notes or the Euro Notes may be treated as having been issued with original issue discount for U.S. federal income tax purposes. An obligation generally is treated as having been issued with original issue discount if its stated principal amount exceeds its issue price by at least a defined de minimis amount. If a Note is treated as issued with original issue discount, investors subject to U.S. federal income tax will be subject to tax on that original issue discount as ordinary income as it accrues, in advance of the receipt of cash payments attributable to that income (and in addition to qualified stated interest). See "*Tax Considerations—Certain U.S. Federal Income Tax Considerations*".

The Notes will initially be held in book entry form, and therefore you must rely on the procedures of the relevant clearing systems to exercise any rights and remedies.

Owners of the book entry interests will not be considered owners or holders of the Notes unless and until Notes in registered definitive form ("Definitive Notes") are issued in exchange for book entry interests. Instead, the common depositary for Euroclear and Clearstream and/or DTC (or their respective nominee) will be the sole holder of the global notes representing the Notes.

Payments of principal, interest and other amounts owing on or in respect of the Notes in global form will be made to the Principal Paying Agent and US Paying Agent, which will make payments to Euroclear, Clearstream and/or DTC, as applicable. Thereafter, such payments will be credited to Euroclear, Clearstream and/or DTC participants' accounts that hold book entry interests in the Notes, as applicable, in global form and credited by such participants to indirect participants. After payment to Euroclear, Clearstream and/or DTC, the Trustee, the transfer agents, the Registrars or any Paying Agent will not have any responsibility or liability for any aspect of the records relating to or payments of interest, principal or other amounts to Euroclear, Clearstream and/or DTC or to owners of book entry interests.

Owners of book entry interests will not have the direct right to act upon our solicitations for consents or requests for waivers or other actions from holders of the Notes, including enforcement of security for the Notes. Instead, if you own a book entry interest, you will be permitted to act directly only to the extent you have received appropriate proxies to do so from Euroclear, Clearstream and/or DTC or, if applicable, from a participant. We cannot assure you that procedures implemented for the granting of such proxies will be sufficient to enable you to vote on any requested actions or to take any other action on a timely basis. See "*Book Entry, Delivery and Form*".

Risks relating to the Transactions

The PT Portugal Acquisition is subject to significant uncertainties and risks.

The consummation of the PT Portugal Acquisition is subject to the conditions set out in the PT Portugal Acquisition Agreement, including regulatory approval in Portugal and from the European Commission. Furthermore, in the case that the regulator requires any concessions from us to approve the PT Portugal Acquisition, we may have to dispose of some or all of our existing Portuguese assets, including Cabovisao and/or ONI. As of September 30, 2014, Cabovisao and ONI had assets of over €170 million and generated revenues of €190.1 million and EBITDA of €57.4 million for the LTM ended September 30, 2014. There can be no assurance that such approvals will be obtained in a timely manner if at all and the regulator may impose conditions (including disposals) on their approvals. See "*The Transactions*".

The completion of the PT Portugal Acquisition may be subject to litigation that if realized may result in a material adverse effect on, including delay in completion of, the PT Portugal Acquisition.

The PT Portugal Acquisition has received extensive coverage in the press in Brazil and Portugal, including with respect to statements made and positions taken by Portugal Telecom SGPS, S.A., the Portuguese Securities Market Commission and other parties relating to certain aspects of the PT Portugal Acquisition. The PT Portugal Acquisition may be subject to litigation risks that are frequently faced by parties in connection with transactions of this type, including challenges by dissenting shareholders, and at least one civil action has been filed by shareholders against Portugal Telecom SGPS, S.A. challenging the extraordinary general meeting in which the sale of PT Portugal was approved. Plaintiffs in any such litigation action may seek, among other remedies, compensatory damages (which may involve claims for a significant amount of monetary damages) or injunctive relief (which, if granted, may delay the closing the PT Portugal Acquisition, including beyond the Escrow Longstop Date). The outcome of any such suit is inherently uncertain. As a result, we cannot assure you that any such litigation will not result in payment of settlement amounts, award of monetary damages against the relevant parties to any such lawsuit or grant of other remedies, including injunctions, any one of which may be material in amount and/or impact on the completion of the PT Portugal Acquisition and may have a material adverse effect on the combined Group's business, financial condition or results of operations.

Anticipated synergies from the PT Portugal Acquisition may not materialize.

Upon completion of the PT Portugal Acquisition, we expect to achieve certain synergies discussed elsewhere in these Listing Particulars relating to the operations of the PT Portugal Group as it will become part of the Group and become consolidated subsidiaries of Altice International. We may not realize any or all of the anticipated synergies of the PT Portugal Acquisition that we currently anticipate, including if we are unable to consummate the PT Portugal Acquisition. Among the synergies that we currently expect are operational synergies in the following areas: subcontractor rationalization, increased buying power through combined procurement, reduction in international content costs (brought in line with) the Altice Group's reduction in IT spending, subcontractor rationalization, simplification of operating practice, and outsourcing of customer care we also expect that Altice Group will realize capital expenditure savings through benefits of scale in procurement, adoption of best practices in Altice Group's capital expenditure planning and efficiency savings in network spread. Our estimated synergies from the PT Portugal Acquisition are subject to a number of assumptions about the timing, execution and costs associated with realizing the synergies. There can be no assurance that such assumptions turn out to be correct and, as a result, the amount of synergies that we will actually realize over time may differ significantly from the ones that we currently estimate and we may also incur significant costs in integrating the PT Portugal Group. We may not be successful in integrating some or all of these businesses as currently anticipated which may have a material adverse effect on our business and operations.

The integration of the PT Portugal Group into the Group could result in operating difficulties and other adverse consequences.

The consummation of the PT Portugal Acquisition and the integration of the PT Portugal Group as anticipated into the Group may create unforeseen operating difficulties and expenditures and pose significant management, administrative and financial challenges to our business. These challenges include:

- integration of the PT Portugal Group into our current business in a cost effective manner, including network infrastructure, management information and financial control systems, marketing, branding, customer service and product offerings;
- outstanding or unforeseen legal, regulatory, contractual, labor or other issues arising from the PT Portugal Acquisition;
- integration of different company and management cultures; and

- retention, hiring and training of key personnel.

In such circumstances, our failure to effectively integrate the PT Portugal Group into our Group could have a material adverse effect on our financial condition and results of operations.

Moreover, the PT Portugal Acquisition has required, and will likely continue to require, substantial amounts of certain of our management's time and focus, which could potentially affect their ability to operate the business.

If the conditions to the escrow releases are not satisfied, the Issuer will be required to redeem some or all of the Notes, which means that you may not obtain the return you expect on the Notes.

Pending satisfaction of the conditions to release of the escrow proceeds, the gross proceeds of the offering of the Notes are being held in the Escrow Accounts on behalf of the holders of the Notes. If the conditions to the release of the escrow proceeds as described in "*Description of Notes—Escrow of Proceeds; Special Mandatory Redemption*" are not satisfied on or prior to June 9, 2016 or in the event of certain other events that trigger escrow termination occur, the applicable Notes are subject to a special mandatory redemption and you may not obtain the return you expect to receive on such Notes. See "*Description of Notes—Escrow of Proceeds; Special Mandatory Redemption*". The Indenture requires the Issuer to consummate the PT Portugal Acquisition promptly upon release of the escrow proceeds.

The escrow funds will be limited to the gross proceeds of the offering of the Notes and will not be sufficient to pay the special mandatory redemption price, which is equal to 100% of the initial issue price of each of the Notes plus accrued and unpaid interest and additional amounts, if any, from the Issue Date to the date of the special mandatory redemption.

Your decision to invest in the Notes is made at the time of purchase. Changes in our business or financial condition or the terms of the PT Portugal Acquisition or the financing thereof, between the closing of this offering and the release of the escrow proceeds, will have no effect on your rights as a purchaser of the Notes.

PT Portugal will not be controlled by us until completion of the PT Portugal Acquisition.

We currently do not own PT Portugal. We will not acquire PT Portugal until completion of the PT Portugal Acquisition. The PT Portugal Acquisition is expected to be consummated in the second quarter of 2015, subject to regulatory approval in Portugal and merger-control clearance from the European Commission (or from the Portuguese Competition Authority, under the applicable referral rules). We cannot assure you that during the interim period the business of the PT Portugal Group will be operated in the same way that we would operate them.

The information contained in these Listing Particulars relating to the PT Portugal Group has been derived from public sources and other sources we believe to be reliable.

THE TRANSACTIONS

PT Portugal Acquisition

On December 9, 2014, Altice S.A., through its subsidiary Altice Portugal, entered into an agreement with Oi S.A. (the "PT Portugal Acquisition Agreement") relating to the purchase of all of the outstanding equity interests in PT Portugal (the "PT Portugal Acquisition"). The total consideration for this transaction amounts to an initial purchase price of €6,900 million on a debt and cash free basis, as adjusted for estimated net post retirement benefit obligations post tax of €957 million and other non financial debt purchase price adjustments (including working capital adjustments and certain tax liabilities) of €339 million (price paid will be after deduction of net financial debt at closing and difference to normative level of working capital, as defined in the PT Portugal Acquisition Agreement) payable in cash upon completion of the PT Portugal Acquisition, and an earn out of €500 million, payable in the event the consolidated revenues of the PT Portugal Group for any financial year between 2015 to 2019 achieves a specified target. In order for PT Portugal to exceed such specified revenue target by the end of the specified period, its revenue growth will need to materially exceed the best-in-class compound annual revenue growth rate currently expected by the market from incumbent telecommunications companies in Europe. Prior to the Completion Date, Oi S.A. shall cause a reorganization of PT Portugal and its subsidiaries to be completed (the "Carve Out Reorganization") so that, among other things, upon the completion of the PT Portugal Acquisition, PT Portugal shall no longer own any interests in the Asian entities and assets, African entities and assets, other than Open Ideia (Angola), Open Ideia (Morocco) and Contact Cabo Verde, or in the financing vehicle that are currently parts of the PT Portugal perimeter. In particular, the commercial paper and any other securities issued by Rio Forte Investments S.A shall not be included in the assets comprising the PT Portugal Group.

The consummation of the PT Portugal Acquisition is subject to certain conditions, including antitrust clearance from the European Commission and relevant authorizations and clearances from the Portuguese ISP (Instituto de Seguros de Portugal). The PT Portugal Acquisition Agreement provides that the parties shall cooperate in order to obtain as soon as practicable the authorizations or clearances needed to fulfil the conditions to closing and to consummate the PT Portugal Acquisition. The PT Portugal Acquisition Agreement shall terminate, and the parties will not be required to consummate the PT Portugal Acquisition, if such clearances or authorizations have not been obtained at the latest within eighteen months of December 9, 2014. In the event the conditions to completion of the PT Portugal Acquisition are satisfied and Altice Portugal fails to consummate the PT Portugal Acquisition, Altice Portugal shall be liable to pay a specified break-up fee to Oi S.A. Similarly, in the event the Carve Out Reorganization is not completed within six months of December 9, 2014, or the conditions to completion of the PT Portugal Acquisition are satisfied and Oi S.A. fails to consummate the PT Portugal Acquisition, Oi S.A. shall be liable to pay a specified break-up fee to Altice Portugal.

Under the PT Portugal Acquisition Agreement, Oi S.A. has agreed to cause PT Portugal and the entities that will comprise the PT Portugal Group to operate its business solely in the ordinary course and consistent with past practice. In addition, Oi S.A. has undertaken covenants to place certain restrictions on the ability of PT Portugal and of the entities that will comprise the PT Portugal Group to take certain actions without the prior consent of Altice Portugal (not to be withheld unreasonably) customary for that type of transaction. Failure by Oi S.A. to comply with these restrictions or with any of its covenants under the PT Portugal Acquisition Agreement, unless waived by Altice Portugal, could, under certain circumstances, result in the PT Portugal Acquisition Agreement being terminated by Altice Portugal.

The PT Portugal Acquisition Agreement also provides that Altice S.A. guarantees the fulfillment by Altice Portugal of its obligations under the PT Portugal Acquisition Agreement.

The Financing

The consideration for the PT Portugal Acquisition together with related fees and expenses will be financed as follows:

- the Issuer issued €2,055 million of the Notes which will be contributed to the Altice International Group in exchange for mandatory convertible notes issued by Altice International;
- Altice Finco issued the 2015 Senior Notes;
- Altice Financing issued the 2015 Senior Secured Notes;
- Altice Financing entered into the New Altice Financing Term Loan on or about the Issue Date. Altice Financing drew the New Altice Financing Term Loan in full on February 4, 2015 to consummate the PT Portugal Acquisition; and
- Altice Financing entered into the New Altice International Super Senior Revolving Credit Facility on or prior to the Issue Date. It is expected that the New Altice International Super Senior Revolving Credit Facility will be fully

drawn to consummate the PT Portugal Acquisition. We may utilize excess cash (to the extent available at the time of completion of the PT Portugal Acquisition) or other debt sources in place of some or all of the funds currently expected to be drawn under the New Altice International Super Senior Revolving Credit Facility to consummate the PT Portugal Acquisition.

Pending satisfaction of the conditions to the release of the escrow proceeds as described in "*Description of Notes—Escrow of Proceeds; Special Mandatory Redemption*", the Initial Purchasers deposited the gross proceeds from the offering of the Notes into segregated escrow accounts for the benefit of the holders of the Notes and the Trustee.

The Escrow Accounts are controlled by the Escrow Agent and pledged on a first ranking basis in favor of, the Trustee on behalf of the holders of the Notes. See "*Description of Notes—Escrow of Proceeds; Special Mandatory Redemption*". The proceeds of the Notes will be released to the Issuer to complete the PT Portugal Acquisition upon delivery of an applicable officer's certificate to the Escrow Agent stating that, among other things, the PT Portugal Acquisition Agreement shall not have been modified, amended or waived in any respect that is material and adverse to the holders of the Notes (subject to certain exceptions), the PT Portugal Acquisition Agreement remains in full force and effect and no insolvency related events have occurred with respect to the Issuer. If the conditions for the release of escrow proceeds are not satisfied prior to June 9, 2016, or upon the occurrence of certain other events, the Notes are subject to a special mandatory redemption at 100% of the principal amount plus accrued and unpaid interest and additional amounts, if any. The Indenture requires the Issuer to consummate the PT Portugal Acquisition promptly upon release of the escrow proceeds (other than a release for purposes of investing the escrow proceeds in accordance with the terms of the Escrow Agreement).

The gross proceeds from the offering of the 2015 Senior Notes and 2015 Senior Secured Notes are also held in segregated escrow accounts pursuant to escrow agreements and the release of such proceeds will be subject to similar conditions.

The transactions referred to under "*—PT Portugal Acquisition*" and "*—The Financing*" are collectively referred to as the "Transactions".

USE OF PROCEEDS

Sources and Uses for the Transactions

The expected estimated sources and uses of the funds necessary to consummate the PT Portugal Acquisition are shown in the table below. Actual amounts may vary from the estimated amounts depending on several factors, including, among other things, (i) differences in the amount of indebtedness outstanding and (ii) differences from our estimates of fees and expenses and the actual fees and expenses, as of the completion of the PT Portugal Acquisition. The completion of the PT Portugal Acquisition is subject to certain conditions, including the separate approval by the competent regulatory authorities in Portugal and merger-control clearance by the European Commission (or from the Portuguese Competition Authority, under the referral mechanism set forth in the EU merger control rules).

The amounts set forth below are based on an exchange rate as of January 29, 2015, of €0.882 = $1.00.

Sources of Funds			**Uses of Funds**		
	$ in millions	**€ in millions**		**$ in millions**	**€ in millions**
New Altice Financing Term Loan[1]	954	841	Cash Acquisition Consideration for PT Portugal[5]	6,355	5,604
Notes offered hereby[2][7]	2,331	2,055			
2015 Senior Secured Notes[3]	2,627	2,317	Transaction Fees and Expenses[6][7]	146	128
2015 Senior Notes[3]	385	340			
New Altice International Super Senior Revolving Credit Facilities[4]	204	180			
Total Sources	**6,501**	**5,732**	**Total Uses**	**6,501**	**5,732**

(1) On or around the Issue Date, Altice Financing entered into the €841 million (equivalent) New Altice Financing Term Loan. Altice Financing drew under the New Altice Financing Term Loan fully to consummate the PT Portugal Acquisition. The gross proceeds from borrowings under the New Altice Financing Term Loan have been deposited in segregated escrow accounts on behalf of the lenders thereunder, pending satisfaction of the conditions to the release of the escrow proceeds in accordance with the relevant escrow agreements relating thereto.

(2) The gross proceeds from the sale of the Notes were deposited in segregated escrow accounts on behalf of the holders of the Notes, pending satisfaction of the conditions to the release of the escrow proceeds in accordance with the relevant escrow agreements relating thereto. It is expected that Altice S.A. will contribute the proceeds of the Notes to Altice International in exchange for mandatory convertible notes of €2,055 million aggregate value (with €100,000 nominal value each) to be issued by Altice International and to be subscribed by Altice S.A., and Altice International will, in turn, contribute such proceeds to Altice Holdings (the "ASA Notes Proceeds Contribution").

(3) The gross proceeds from the sale of the 2015 Senior Secured Notes were deposited in segregated escrow accounts on behalf of the respective holders of the 2015 Senior Secured Notes and the gross proceeds from the sale of the 2015 Senior Notes were deposited in a segregated escrow account on behalf of the respective holders of the 2015 Senior Notes, in each case, pending satisfaction of the conditions to the release of the escrow proceeds.

(4) It is expected that €180 million under the New Altice International Super Senior Revolving Credit Facility may be drawn to consummate the PT Portugal Acquisition. We may utilize excess cash (to the extent available at the time of completion of the PT Portugal Acquisition) or other debt sources in place of some or all of the funds currently expected to be drawn under the New Altice International Super Senior Revolving Credit Facility to consummate the PT Portugal Acquisition.

(5) Represents a total consideration of €6,900 million as adjusted for estimated net post retirement benefit obligations post tax of €957 million and other non financial debt purchase price adjustments (including working capital adjustments and certain tax liabilities) of €339 million (price paid will be after deduction of net financial debt at closing and difference to narrative level of working capital, as defined in the PT Portugal Acquisition Agreement). The cash consideration for the PT Portugal Acquisition totals €5,604 million. The total consideration and cash consideration figures exclude an earn-out of €500 million which is payable if the revenues generated by the PT Portugal Group for any financial year between 2015 to 2019 achieve a specified target. In order for PT Portugal to exceed such specified revenue target by the end of the specified period, its revenue growth will need to materially exceed the best-in-class compound annual revenue growth rate currently expected by the market from incumbent telecommunications companies in Europe. The total enterprise value of € 7,400 million represents the sum of the cash consideration, the estimated net post-retirement obligations, other purchase price adjustments and the earn-out. The PT Portugal Acquisition is subject to regulatory approval by the competent regulatory authorities in Portugal and merger-control clearance by the European Commission (or from the Portuguese Competition Authority, under the referral mechanism set forth in the EU merger control rules). See "*The Transactions—PT Portugal Acquisition*" for further details.

(6) This amount reflects our estimate of the fees and expenses we will pay in connection with the Transactions, including commitment, placement, financial advisory and other transaction costs and professional fees. This amount may differ from the estimated amount depending on several factors, including differences from our estimates of fees and expenses and the actual fees and expenses as of the completion of the various transactions contemplated by the Transactions.

(7) The total net proceeds from the sale of the Notes is €1,927 million and will consist of the gross proceeds from the sale of the Notes less the Transaction Fees and Expenses.

CAPITALIZATION

The following table presents, in each case, the cash and cash equivalents and debt capitalization as of September 30, 2014 of the Group (i) on a historical consolidated basis and (ii) on an as adjusted combined basis after giving effect to the 2014 Numericable Group Transactions, the Transactions (including the offering of the Notes hereby, the funding of the New Altice Financing Term Loan, the offering of the 2015 Senior Notes and the 2015 Senior Secured Notes, the expected amounts to be drawn under the New Altice International Super Senior Revolving Credit Facility to consummate the PT Portugal Acquisition) and the repayment of the Existing Coditel Mezzanine Facility. The completion of the PT Portugal Acquisition is subject to certain conditions, including the approval by the competent regulatory authorities in Portugal and merger-control clearance by the European Commission (or from the Portuguese Competition Authority, under the referral mechanism set forth in the EU merger control rules). The as-adjusted amounts are estimates and may not accurately reflect the amounts outstanding upon completion of the Transactions. This table should be read in conjunction with "*Use of Proceeds*", "*Pro Forma Financial Information*", "*Description of Other Indebtedness*" and the financial statements and notes thereto included elsewhere in these Listing Particulars.

The impact of any derivative instruments that we have or may enter into to manage foreign currency risk associated with our debt (including the Notes) has not been reflected in the as adjusted data presented in the table. Unless otherwise stated, amounts are based on the exchange rate as of September 30, 2014 of €0.7918 = $1.00.

(1) €529 million of cash is required to be paid by Altice S.A. to certain funds affiliated with Carlyle and Cinven in connection with the Cinven Caryle Rollover by January 31, 2015. The As Adjusted cash figure includes €549 million of excess proceeds from the 2014 Senior Notes minus €76 million paid by Altice S.A. in relation to the Numericable Rights Issue and the acquisition of Fiberman.

(2) On May 8, 2014, Numericable entered into the 2014 Numericable Group Revolving Credit Facilities Agreement with, among others, the lenders party thereto. The 2014 Numericable Group Revolving Credit Facilities allowed borrowings by Numericable up to a maximum of €750 million. As of September 30, 2014, €50 million was drawn under the 2014 Numericable Group Revolving Credit Facilities, and €250 million remained available for drawdown (as from the completion of the 2014 SFR Acquisition on November 27, 2014, an additional credit line of €450 million is now available under the 2014 Numericable Group Revolving Credit Facilities). As of the date of these Listing Particulars, the 2014 Numericable Group Revolving Credit Facilities have been fully repaid. Excludes accrued interests and the impact of the effective tax rate method.

(3) Reflects the Numericable Senior Secured Notes issued on May 8, 2014 in an aggregate principal amount of €7,873 million (equivalent). The funds from the Numericable Senior Secured Notes were released from escrow in November 2014 in connection with the completion of the 2014 SFR Acquisition. This amount is based on an exchange rate of €1.00 = $1.3827. Excludes accrued interests and the impact of the effective tax rate method.

(4) On May 8, 2014, Numericable entered into the €3,780 million (equivalent) Numericable Term Loan. This amount is based on an exchange rate of €1.00 = $1.3827. Excludes accrued interests and the impact of the effective tax rate method.

(5) The amount is based on the exchange rate as of September 30, 2014 of €0.2150 = NIS1.00.

(6) The Existing Coditel Mezzanine Facility was refinanced on December 2, 2014 by €124 million (equivalent) of borrowings under the Existing Altice Financing Revolving Credit Facilities.

(7) Green Datacenter is designated as an unrestricted subsidiary under the terms governing the indebtedness of the Group.

(8) Reflects the aggregate $1,360 million and €510 million Existing Senior Secured Notes outstanding.

(9) Reflects the aggregate $825 million and €250 million Existing Senior Notes outstanding.

(10) Reflects the issuance of the 2015 Senior Notes and the 2015 Senior Secured Notes issued on the Issue Date. Pending satisfaction of certain conditions to the release of the escrow proceeds, the initial purchasers of the 2015 Senior Notes and the 2015 Senior Secured Notes deposited the gross proceeds from the offering of the 2015 Senior Notes and the 2015 Senior Secured Notes into segregated escrow accounts for the benefit of the holders of the 2015 Senior Notes and the 2015 Senior Secured Notes. The amount is based on an exchange rate as of January 29, 2015, of €0.882 = $1.00.

(11) On or around the Issue Date, Altice Financing entered into the €841 million (equivalent) New Altice Financing Term Loan.The New Altice Financing Term Loan was fully drawn to consummate the PT Portugal Acquisition. The gross proceeds from borrowings under the New Altice Financing Term Loan have been deposited in segregated escrow accounts on behalf of the lenders thereunder, pending satisfaction of the conditions to the release of the escrow proceeds in accordance with the relevant escrow agreements relating thereto.

(12) The New Altice International Revolving Credit Facilities are made up of (i) a €330 million New Altice International Super Senior Revolving Credit Facility (which was entered into on or prior to the Issue Date) and (ii) a €501 million New Altice International Pari Passu Revolving Credit Facility. It is expected that €180 million under the New Altice International Super Senior Revolving Credit Facility will be drawn to consummate the PT Portugal Acquisition. The New Altice International Pari Passu Revolving Credit Facility will be available to be drawn to meet the Altice International Group's working capital needs.

(13) The Existing Altice Financing Revolving Credit Facilities are made up of (i) the $80 million 2012 Altice Financing Revolving Credit Facility and (ii) the €80 million 2013 Altice Financing Revolving Credit Facility. Altice Financing also has access to he 2013 Guarantee Facility allowing for requests for guarantees to be issued up to a maximum of €15 million. We drew all of the 2013 Altice Financing Revolving Credit Facility and $56 million of the 2012 Altice Financing Revolving Credit Facility to repay the Existing Coditel Mezzanine Facility. On January 27, 2015, we repaid the $56 million outstanding under the 2012 Altice Financing Revolving Credit Facility. As of the date hereof, all of the 2013 Altice Financing Revolving Credit Facility has been drawn. In addition, as of the date hereof, Altice Financing has made one request for a guarantee of up to approximately €6.8 million to be issued under the 2013 Guarantee Facility, which represents a contingent liability of the Group.

(14) On May 8, 2014, the Issuer entered into the 2014 Altice S.A. Revolving Credit Facility Agreement with, among others, the lenders party thereto, in order to (a) prior to the completion of the 2014 SFR Acquisition, service the interest on the proceeds of the 2014 Senior Notes deposited in escrow and (b) after the completion of the 2014 SFR Acquisition, support its working capital purposes. The 2014 Altice S.A. Revolving Credit Facility Agreement allows borrowings by the Issuer up to a maximum of €200 million at any one time outstanding.

(15) This amount is based on an exchange rate of €1.00 = $1.3827.

(16) Reflects the issuance of the Notes offered hereby. The amount is based on an exchange rate as of January 29, 2015, of €0.882 = $1.00.

(17) Excludes certain other long-term and short- term liabilities, other than finance leases, of the Group, any intercompany loans among the Group and preferred equity certificates issued in connection with the Tricom Acquisition and any other preferred equity certificates issued to minority shareholders in our subsidiaries. Other long-term and short-term liabilities include, among other things, HOT's obligations to the State of Israel related to its mobile license and its ownership of the cable network, contingent consideration on behalf of the HOT Mobile acquisition, trade payables, other payables, provision for lawsuits, accrued severance liability, and deferred tax liability.

(18) Reflects the aggregate €23.65 million perpetual subordinated notes issued by NC Numericable S.A.S. to Vilorex, a subsidiary of GDF Suez (excluding capitalized interest). The proceeds of the Numericable Perpetual Subordinated Notes have been earmarked for financing the construction of plugs in towns located in SIPPEREC's southern hub (*Syndicat Intercommunal de la Périphérie de Paris pour l'Electricité et les Réseaux de Communication*). The Numericable Perpetual Subordinated Notes bear interest at 7% per annum. Interest is capitalized, and accrued interest on the loan amounted to €16 million as of September 30, 2014.

ALTICE S.A.

NOTES TO THE UNAUDITED PRO FORMA CONSOLIDATED FINANCIAL INFORMATION

1—General information

The accompanying unaudited pro forma consolidated statement of income for the nine and twelve month periods ended September 30, 2014, and September 30, 2013, and the twelve months period ended December 31, 2013, the accompanying unaudited pro forma condensed consolidated statement of financial position as of September 30, 2014 and these explanatory notes (together the "Unaudited Pro Forma Financial Information") present the unaudited pro forma consolidated financial information of Altice S.A. (the "Company" or the "Group"), giving effect to each of the acquisitions and the other transactions described in the basis of preparation described in Note 2. For the period ended September 30, 2013 and the year ended December 31, 2013 the Company, Altice France S.A. (formerly Altice Six S.A.) and Altice International S.à r.l. (formerly Altice VII S.à r.l.) (Together the "Predecessor Entities") and their subsidiaries are referred to collectively as the "Group".

The Unaudited Pro Forma Financial Information does not give pro forma effect to the Group's acquisition of Mobius S.A. ("Mobius") for the nine month periods ended September 30, 2013 and December 31, 2013 respectively. However, as a result of the acquisition of the Mobius Group on January 15, 2014, the pro-forma condensed consolidated statement of income for the nine months ended September 30, 2014 and the pro-forma condensed consolidated statement of financial position as at September 30, 2014 contains information pertaining to the Mobius Group. The Board of Directors has concluded that these are not significant for the purpose of preparing the accompanying Unaudited Pro Forma Financial Information. Additionally, the unaudited Pro Forma Financial Information does not give pro forma effect to the Group's acquisition of Tricom S.A. and Global Interlink Limited ("Tricom") for the nine and twelve month periods ended September 30, 2013 and December 31, 2013 respectively. However, as a result of the acquisition of the Tricom Group on March 12, 2014, the pro-forma condensed consolidated statement of income for the nine months ended September 30, 2014 and the pro-forma condensed consolidated statement of financial position as at September 30, 2014 contains information pertaining to the Tricom Group. The Board of Directors has concluded that these are not significant for the purpose of preparing the accompanying Unaudited Pro Forma Financial Information. For the nine months ended September 30, 2014, the Mobius Group and Tricom Group contributed €13.1 million and €82.0 million to the Company's revenues and €1.0 million and €14.1 million to the Company's operating income respectively. The Unaudited Pro Forma Financial Information also does not give effect to the disposal of the assets of Outremer Telecom that are located in the Indian Ocean region, as this disposal is not deemed to be significant by the Board of Directors. With regards to the recently completed acquisition of SFR S.A., these pro-forma accounts do not give effect to the acquisition of Virgin Mobile or Telindus France. In October 2014, the Company, through its indirect subsidiary Altice Africa S.à r.l., acquired an additional stake in Wananchi Group (Holdings) Limited for a total cash of amount of €8.6 million. Management has deemed that this acquisition is not significant for the purposes of these accounts and hence no pro forma effect has been given to this transaction. The Board of Directors has concluded that these are not significant for the purpose of preparing the accompanying Unaudited Pro Forma Financial Information.

The Unaudited Pro Forma Financial Information does not give effect to any hedging effects that the Company or the Group may enter into to cover its different financing and acquisitions. The Unaudited Pro Forma Financial Information has not been audited or reviewed.

The Unaudited Pro Forma Financial Information does not purport to be indicative of the financial position and results of operations that the Group will obtain in the future, or that the Group would have obtained if the significant acquisitions and disposals described in the basis of preparation below occurred with effect from the dates indicated. The pro forma adjustments are based upon currently available information and upon certain assumptions that the Board of Directors of the Company believes to be reasonable.

For the purposes of these Unaudited Pro Forma Financial Information, and in relation to the Group's acquisition of PT Portugal Group ("PT") and Société Francaise de Radiophonie S.A. ("SFR") any difference between (a) the total consideration transferred measured in accordance with IFRS 3 *Business Combinations* ("IFRS 3") and (b) the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed, has been allocated to goodwill. Definitive allocations will be performed and finalized based upon certain valuations and other studies that will be performed with the services of outside valuation specialists after the closing of the aforementioned acquisitions. Accordingly, the determination of the amount of goodwill is preliminary and has been made solely for the purpose of preparing the Unaudited Pro Forma Consolidated Financial Information and is subject to revision based on a final determination of fair value of assets acquired and liabilities assumed at the end of the measurement period for PT and SFR.

The Unaudited Pro Forma Consolidated Financial Information should be read in conjunction with the assumptions underlying the pro forma adjustments which are described in these notes as well as the historical and other financial statements included in these Listing Particulars.

2—Basis of preparation

The Unaudited Pro Forma Financial Information has been prepared to give effect to the following transactions as if they occurred on January 1, 2013 for the purposes of the unaudited pro forma consolidated statements of income and, if applicable, on September 30, 2014 for the purpose of the unaudited condensed consolidated pro forma statement of financial position:

- The acquisition by Altice S.A. or its subsidiaries of:
    - 99.85% of the share capital of OMT Invest S.A.S. in three tranches of 77%, 22.7% and 0.15% respectively;
    - A supplementary 40% of the share capital of Altice Portugal and its direct subsidiary Cabovisao;
    - 100% of the share capital of Winreason S.A.;
    - 100% of the share capital of Sportv S.A.;
    - 100% of the share capital of Ma Chaîne Sport S.A.S.;
    - A supplementary 40% of the share capital of Coditel Holding Lux II S.à r.l.;
    - 97.2% of the share capital of Orange Dominicana S.A.S. (later renamed Altice Hispaniola S.A.S.)
- The acquisition by Numericable Group S.A. ("NG") of 100% of the share capital of Societe Francaise de Radiophonie ("SFR") paid in cash and new NG shares to Vivendi, giving it a 20% stake in the Altice France Group.
- The planned acquisition by the Company and/or its subsidiaries of 100% of the share capital of PT Portugal and its subsidiaries as defined by the carve-out perimeter. A description of the planned carve out steps and adjustments is provided elsewhere in the Listing Particulars.
- The following Refinancing Transactions
    - The issuance by the Company and its subsidiaries of:
        - 9% EUR 250 million Senior Secured Notes falling due in 2023;
        - $6^{1}/_{2}$% $900 million Senior Secured Notes due in 2022;
        - $8^{1}/_{8}$% $400 million Senior Secured Notes due in 2024;
        - 7.75% $ 2,900 million Senior Notes due in 2022;
        - 7.25% EUR 2,075 million Senior Notes due in 2022;
        - 6.20% EUR 2,500 million Senior Notes falling due in 2022,
        - 5.36% EUR 3,540 million Senior Notes falling due in 2022. These Notes are expected to be issued in USD and fully hedged,
        - 5.19% Senior Secured Term Loan credit facility agreement for an amount equivalent to EUR 2,600 million due in 2020,
        - 4.93% Senior Secured Term Loan credit facility agreement for an amount equivalent to EUR 3,000 million due in 2020. This term loan is expected to be issued in USD and fully hedged
    - The planned issuance by the Company and its subsidiaries of:

- 5.25% EUR 400 million term loan due in 2022;
- 5.25% USD 500 million term loan due in 2022;
- 5.25% EUR 500 million Senior Secured Notes due in 2023;
- 6.625% USD 2,060 million Senior Secured Notes due in 2023;
- 7.625% USD 385 million Senior Notes falling due in 2025;
- 6.250% EUR 750 million Notes falling due in 2025;
- 7.625% USD 1,480 million Notes falling due in 2025

- The obtaining of a senior secured term loan B credit facility agreement for an amount equivalent to EUR 795 million;
- The repayment of the Coditel Mezzanine facility amounting to EUR 125.7 million;
- The repayment of the Coditel Senior Facility amounting to EUR 138 million;
- The repayment of the ABO credit facility amounting to EUR 65.6 million;
- The repayment of the Cabovisao facility amounting to EUR 202.6 million; and
- The repayment of the ONI facility amounting to EUR 47.3 million.
- The repayment of the Numericable Group's financial liabilities under its existing Senior Facility Agreement for EUR 2,638 million
- The obtaining of an additional revolving credit facility amounting to a total of EUR 330 million.
- The acquisition of a 100% stake in Fiberman SCA and Fiberman Management SCA for a cash amount of EUR 32.7 million.
- The borrowing costs on the aforementioned drawn amounts have been included in the unaudited pro forma statements of income for the nine months ended September 30, 2013 and 2014 and the year ended December 31, 2013.

As mentioned above, given the timing of the Acquisition, assets acquired and liabilities assumed of the PT Portugal Group are reflected in the unaudited pro forma consolidated statement of financial position as of September 30, 2014 at their historical book value reflected in the PT Portugal Combined Selected Financial Information for the nine months ended September 30, 2014, and have not been adjusted. The determination of the amount of goodwill is preliminary and has been made solely for the purpose of preparing the Unaudited Pro Forma Financial Information and is subject to revision based on a final determination of fair value after the closing of the acquisitions mentioned above. Under IFRS, goodwill is not amortized, but is tested for impairment at least annually, and therefore, the unaudited pro forma consolidated statement of income does not include any amortization expense in relation to the identifiable assets acquired. Upon finalization of the amount of goodwill, certain identifiable assets acquired such as licenses, trademarks and customer base will have a finite life and will be amortized. As a result, the future results of consolidated operations of Altice S.A. could be significantly affected by amortization expense in relation to such identifiable assets acquired.

On April 23, 2013, an indirect subsidiary of the Company acquired the remaining 40% of the share capital of Cabovisao. The Group had acquired control over Cabovisao on February 29, 2012 and the acquisition was accounted for using the purchase method of accounting with the assets acquired and liabilities assumed recorded at their estimated fair values at the date of acquisition. The assets acquired and liabilities assumed of Cabovisao are reflected in the condensed consolidated statement of financial position as of September 30, 2014. Therefore, this transaction has not been deemed to result in any adjustments to the unaudited pro forma consolidated statement of financial position. Accordingly, the relevant pro-forma effects on the non-controlling interests resulting from the increase in the Group's shareholding from 60% to 100% have been included in the unaudited pro forma consolidated statements of income for the nine months ended September 30, 2013 and the year ending on December 31, 2013.

On June 14, 2013, Altice Finco S.A., an indirect subsidiary of the Company, issued 9% Senior Notes for an aggregate principal of EUR 250 million maturing in 2023. Such liabilities are reflected in the condensed consolidated statement of financial position as of September 30, 2014. Therefore, this transaction has not been deemed to result in any adjustments to the unaudited pro forma consolidated statement of financial position as of September 30, 2014. Accordingly, the relevant pro-forma effects of the resulting borrowing costs on the aforementioned drawn amount for the period between January 1, 2013 and June 14, 2013 have been included in the unaudited pro forma consolidated statement of income for the nine months ended September 30, 2013 and the year ending on December 31, 2013.

On June 24, 2013, Altice Financing S.A., an indirect subsidiary of the Company, entered into a senior secured credit facility agreement providing for term loans for a total equivalent amount of EUR 795 million. As of September 30, 2014, the full amount of EUR795 million has been drawn under this facility. The corresponding liability is reflected in the condensed consolidated statement of financial position as of September 30, 2014. Therefore, this transaction has not been deemed to result in any adjustments to the unaudited pro forma consolidated statement of financial position. Accordingly, the relevant pro-forma effects of the resulting borrowing costs on the aforementioned drawn amount for the period between January 1, 2013 and June 24, 2013 have been included in the unaudited pro forma consolidated statements of income for the nine months ended September 30, 2013 and the year ending on December 31, 2013.

On July 2, 2013, Cabovisao repaid its credit facility for an amount of EUR202.6 million. The corresponding operation is reflected in the condensed consolidated statement of financial position as of September 30, 2014. Therefore, this transaction has not been deemed to result in any adjustments to the unaudited pro forma consolidated statement of financial position. Accordingly, the relevant pro-forma effects of the resulting borrowing costs on the aforementioned drawn amount for the period between January 1, 2013 and July 2, 2013 have been included in the unaudited pro forma consolidated statements of income for the nine months ended September 30, 2013 and the year ending on December 31, 2013.

On July 4, 2013, an indirect subsidiary of the Company acquired 77% of the share capital of OMT Invest S.A. ("OMT"). On June 27, 2014, the Company acquired an additional 22.7% of the share capital of OMT and subsequently acquired an additional 0.15% stake in November 2014. The acquisition was accounted for using the purchase method of accounting and the assets acquired and liabilities assumed were recorded at their estimated fair values at the date of acquisition. The assets acquired and liabilities assumed of OMT are reflected in the condensed consolidated statement of financial position as of September 30, 2014. Therefore, this transaction has not been deemed to result in any adjustments to the unaudited pro forma consolidated statement of financial position. The results of operations for OMT have been included in the consolidated statement of income of the Company since the date of acquisition on July 4, 2013. The OMT historical consolidated income statement for the period from January 1, 2013 through July 3, 2013 have hence been included in the unaudited pro forma consolidated statements of income for the nine months ended September 30, 2013 and the year ending on December 31, 2013.

On August 8, 2013, an indirect subsidiary of the Company acquired 100% of the share capital of Winreason S.A. ("ONI"). The acquisition was accounted for using the purchase method of accounting and the assets acquired and liabilities assumed were recorded at their estimated fair values at the date of acquisition. The assets acquired and liabilities assumed of ONI are reflected in the condensed consolidated statement of financial position as of September 30, 2014, at their fair value and a purchase price allocation has been completed. Accordingly, this transaction has not been deemed to result in any adjustments to the unaudited pro forma condensed consolidated statement of financial position. The results of operations for ONI have been included in the historical consolidated statement of income since the date of acquisition on August 8, 2013. The ONI historical consolidated income statement for the period from January 1, 2013 through August 7, 2013 have been included in the unaudited pro forma consolidated income statement for the nine months ended September 30, 2013 and the year ending on December 31, 2013. As per the requirements of IFRS 3, *Business Combinations*, the comparative historical period for ONI included in the condensed consolidated statement of income of the Company for the nine months ended September 30, 2013 has been restated to reflect the impact of the recognition of the fair value of the assumed assets and liabilities of ONI on the amortization and depreciation expense for the period in question.

On August 8, 2013, ONI repaid its credit facility for an amount of EUR 47.3 million. The corresponding operation is reflected in the condensed consolidated statement of financial position as of September 30, 2014. Therefore, this transaction has not been deemed to result in any adjustments to the unaudited consolidated pro forma statement of financial position. Accordingly, the relevant pro-forma effects of the resulting borrowing costs on the aforementioned drawn amount for the period between January 1, 2013 and August 8, 2013 have been included in the unaudited pro forma consolidated statements of income for the nine months ended September 30, 2013 and the year ending on December 31, 2013.

On October 1, 2013, an indirect subsidiary of the Company integrated in the Altice International group 100% of the share capital of Ma Chaîne Sport S.A.S. ("MCS"). The Board of Directors has not accounted for this transaction using the purchase method of accounting as it relates to a transaction performed under the common control of the ultimate beneficial owner of the Company. The corresponding operation is reflected in the condensed consolidated statement of financial position as of September 30, 2014. Therefore, this transaction has not been deemed to result in any adjustments to the unaudited pro forma consolidated statement of financial position. The results of operations for MCS have been included in the consolidated statement of income of the Company since the date of acquisition on September 30, 2013. The MCS historical income statement for the period from January 1, 2013 through September 30, 2013 have hence been included in the unaudited pro forma consolidated statements of income for the nine months ended September 30, 2013 and the year ending on December 31, 2013.

On October 1, 2013, an indirect subsidiary of the Company integrated in the Altice International group 100% of the share capital of SportV S.A. ("SportV"). The Board of Directors has not accounted for this transaction using the purchase method of accounting as it relates to a transaction performed under the common control of the ultimate beneficial owner of the Company. The corresponding operation is reflected in the condensed consolidated statement of financial position as of September 30, 2014. Therefore, this transaction has not been deemed to result in any adjustments to the unaudited pro forma consolidated statement of financial position. The results of operations for Sportv have been included in the consolidated statement of income of the Company since the date of acquisition on September 30, 2013. The SportV historical income statement for the period from January 1, 2013 through September 30, 2013 have hence been included in the unaudited pro forma consolidated statements of income for the nine months ended September 30, 2013 and the year ending on December 31, 2013.

On November 29, 2013, an indirect subsidiary of the Company acquired an additional 40% of the share capital of Coditel Holding Lux II S.à r.l. ("Coditel") and reimbursed certain Preferred Equity Certificates held by the non-controlling interests in this entity. The corresponding operation is reflected in the condensed consolidated statement of financial position as of September 30, 2014. Therefore, this transaction has not been deemed to result in any adjustments to the unaudited pro forma consolidated statement of financial position. Accordingly, the relevant pro forma effects of the resulting borrowing costs and change in non-controlling interests on the aforementioned operation for the period between January 1, 2013 and November 29, 2013 have been included in the unaudited pro forma consolidated statements of income for the nine months ended September 30, 2013 and the year ending on December 31, 2013.

On December 5, 2013, Altice Financing S.A., an indirect subsidiary of the Company, proceeded with the issuance of $6^1/_2$ Senior Secured Notes for an aggregate principal of $ 900 million maturing in 2022. The corresponding operation is reflected in the condensed consolidated statement of financial position as of September 30, 2014. Therefore, this transaction has not been deemed to result in any adjustments to the unaudited pro forma consolidated statement of financial position. Accordingly, the relevant pro forma effects of the resulting borrowing costs on the aforementioned operation for the period between January 1, 2013 and December 5, 2013 have been included in the unaudited pro forma consolidated statements of income for the nine months ended September 30, 2013 and the year ending on December 31, 2013.

On December 5, 2013, Altice Finco S.A., an indirect subsidiary of the Company, proceeded with the issuance of $8^1/_8$% Senior Notes for an aggregate principal of $400 million maturing in 2024. The corresponding operation is reflected in the condensed consolidated statement of financial position as of September 30, 2014. Therefore, this transaction has not been deemed to result in any adjustments to the unaudited pro forma consolidated statement of financial position. Accordingly, the relevant pro forma effects of the resulting borrowing costs on the aforementioned operation for the period between January 1, 2013 and December 5, 2013 have been included in the unaudited pro forma consolidated statements of income for the nine months ended September 30, 2013 and the year ending on December 31, 2013.

On January 31, 2014, Altice S.A. successfully listed its shares on the Euronext Amsterdam exchange. The primary issuance amounted to a total of €750 million, at a listing price of €28.25 per share. Given that this issuance occurred on January 31, 2014, the proceeds from the issuance have been included in the condensed consolidated statement of financial position as of September 30, 2014. Accordingly, the relevant pro forma adjustments have been made to the unaudited pro forma consolidated statement of financial income in order to reflect this transaction as if it had occurred on January 1, 2013.

On February 3, 2014, Altice France S.A. acquired a controlling stake in the Numericable Group S.A. and hence started fully consolidating the results of Numericable Group S.A. (as against the equity accounting method used prior to this date). The excess of the acquisition price over the historical book value of the non-controlling interests was recorded as goodwill after a preliminary purchase price allocation. The Board of Directors has not conducted any impairment analysis on this goodwill generated from this allocation for the purpose of preparing this financial information. The assets acquired and liabilities assumed of NG are reflected in the condensed consolidated statement of financial position as of September 30, 2014, and the difference between the consideration paid and the net asset position has been provisionally accounted for as goodwill. The Group has, following a report from an independent valuer, recognized certain tangible and intangible identifiable assets at their fair value for the period ended September 30, 2014. Apart from this, this transaction has not been deemed to result in any adjustments to the unaudited pro forma consolidated statement of financial position. Pro-forma adjustments have thus been made to the pro-forma statements of income for the nine months ended September 30, 2014 and 2013 and the year ended December 31, 2013 to reflect the impact of the recognition of these assets at their fair value on the depreciation and amortization expense (and the corresponding deferred tax impact). Additionally, the results of operations for NG have been included in the condensed consolidated statement of income since the date of acquisition on February 3, 2014. The historical consolidated income statement of NG, for the period from January 1, 2014 through February 3, 2014 has been included in the unaudited pro forma consolidated statement of income for the nine months ended September 30, 2014. However, for practical reasons, the data pertaining to the period from February 3, 2014 to September 30, 2014 has been deducted from the condensed consolidated financial information of the Group for the period ended September 30, 2014, and a pro-forma adjustment reflecting the statement of income for the period from January 1, 2014 to September 30, 2014 has been presented. This has been done to ensure comparability of information for the nine month periods ended September 30, 2014 and 2013 respectively.

On April 9, 2014, the Company acquired 97.2% of the share capital of Orange Dominicana S.A. ("ODO"). The excess of the acquisition price over the historical book value of the non-controlling interests was recorded as goodwill after a preliminary purchase price allocation. The Board of Directors has not conducted any impairment analysis on this goodwill generated from this allocation for the purpose of preparing this financial information. The assets acquired and liabilities assumed of ODO are reflected in the consolidated statement of financial position as of September 30, 2014, and the difference between the consideration paid and the net asset position has been provisionally accounted for as goodwill, except for two identifiable assets that were recognized at the provisional fair values at the time of acquisition. These assets consist of the right to use the Orange brand in the Dominican Republic for a period of three years (plus an option of two additional years) and the capitalization of subscriber acquisition costs in line with Group accounting policies. Apart from this, this transaction has not been deemed to result in any adjustments to the unaudited pro forma consolidated statement of financial position. The results of operations for ODO have been included in the historical consolidated statement of income since the date of acquisition on April 9, 2014. The historical consolidated statement of income of ODO, for the period from January 1, 2014 through April 8, 2014 have been included in the unaudited pro forma condensed consolidated income statement for the nine months ended September 30, 2014. However, for practicality reasons, the data pertaining to the six month period from April 9, 2014 to September 30, 2014 has been deducted from the historical consolidated financial information of the Group, and a pro-forma adjustment reflecting the statement of income for the period from January 1, 2014, to September 30, 2014 has been presented. This has been done to ensure comparability of information for the nine month periods ended September 30, 2014 and 2013 respectively for the purpose of the Management Discussion and Analysis of ODO.

On May 8, 2014, the Company completed the issuance of a €4.2 billion senior notes due in 2022. These notes were issued in two tranches, a $2.9 billion tranche bearing interest at $7^3/_4$% and a €2.1 billion tranche bearing interest at $7^1/_4$%. Given that this issuance occurred on May 8, 2014, the proceeds from the issuance have been included in the condensed consolidated statement of financial position as of September 30, 2014. Accordingly, the relevant pro forma adjustments have been made to the unaudited pro forma consolidated statement of financial income in order to reflect this transaction as if it had occurred on January 1, 2013.

On May 8, 2014, Numericable Group S.A., an indirect subsidiary of the Company, completed the issuance of new loans and debts for a total euro equivalent amount of €11,653 million, falling due between 2019 and 2024. Given that this issuance occurred on May 8, 2014, the proceeds from the issuance have been included in the condensed consolidated statement of financial position as of September 30, 2014. Accordingly, the relevant pro forma adjustments have been made to the unaudited pro forma consolidated statement of financial income in order to reflect this transaction as if it had occurred on January 1, 2013.

In October 2014, Altice France S.A. completed the acquisition of 100% of the share capital of Fiberman S.C.A. Prior to this, Altice France held a 12.48% stake in Fiberman S.C.A and accounted for this investment as an available for sale. As this acquisition occurred after September 30, 2014, pro-forma adjustments have been made to reflect the impacts of the transaction. Further to this acquisition, the Company, through Altice France S.A. funded the contribution of Fiberman's share in the NG rights issuance completed on November 17, 2014. Given that this acquisition has not been included in the condensed consolidated statement of financial position as of September 30, 2014 pro-forma adjustments have been made to the unaudited pro forma consolidated statement of financial position in order to reflect this new acquisition as if it had occurred on September 30, 2014. After the completion of this step, Altice France S.A. held a 75.375% stake in NG (diluted down to 60.3% after the allocation of a 20% stake in NG to Vivendi as part of the SFR closing). On December 31, 2014, Fiberman SCA and Fiberman Management SCA were merged into their mother company, Altice France S.A.

On November 27, 2014, an indirect subsidiary of the Company acquired 100% of the share capital of Société Francaise de Radiotéléphone S.A. ("SFR"). The Board of Directors has not conducted any impairment analysis on this goodwill generated from this allocation for the purpose of preparing this financial information. Given that this acquisition has not been included in the condensed consolidated statement of financial position as of September 30, 2014, the assets acquired and liabilities assumed of SFR are reflected in the unaudited pro forma consolidated statement of financial position as of

September 30, 2014 at their historical book value reflected in the Condensed Combined Financial Statements of SFR for the nine months ended September 30, 2014, and have not been adjusted. The determination of the amount of goodwill is preliminary and has been made solely for the purpose of preparing the Unaudited Pro Forma Financial Information and is subject to revision based on a final determination of fair value after the closing of the acquisitions mentioned above. Under IFRS, goodwill is not amortized, but is tested for impairment at least annually, and therefore, the unaudited pro forma consolidated statement of income does not include any amortization expense in relation to the identifiable assets acquired. Upon finalization of the amount of goodwill, certain identifiable assets acquired such as licenses, trademarks and customer base will have a finite life and will be amortized. As a result, the future results of consolidated operations of Altice S.A. will be significantly affected by amortization expense in relation to such identifiable assets acquired.

On December 2, 2014, the Company refinanced the mezzanine facility issued by Coditel Holding S.A. for a total amount of €125.7 million (this included the PIK interest due on the debt as well as the break costs of 6.75%). Given that this transaction has not been included in the condensed consolidated statement of financial position as of September 30, 2014 pro-forma adjustments have been made to the unaudited pro forma consolidated statement of financial position in order to reflect this transaction as if it had occurred on September 30, 2014. Accordingly, the relevant pro-forma effects of the resulting borrowing costs on the aforementioned reimbursement have been included in the unaudited pro forma consolidated statements of income for the nine months ended September 30, 2014, September 30, 2013 and the year ending on December 31, 2013.

In January 2015, Altice S.A. and two of its subsidiaries, Altice Finco S.A. and Altice Financing S.A., intend to proceed with the issuance of the Notes and entry into a term loan credit facility in an amount of €5,552 million (equivalent) and also draw on a new revolving credit facility of €180 million. Given that such issuance will occur after September 30, 2014, the liabilities arising from the issuance are not included in the condensed consolidated statement of financial position as of September 30, 2014. Accordingly, adjustments have been made to the unaudited pro forma consolidated statement of financial position in order to reflect this transaction as if it had occurred on September 30, 2014. Accordingly, the relevant pro-forma effects of the resulting borrowing costs on the aforementioned issuance have been included in the unaudited pro forma consolidated statements of income for the nine months ended September 30, 2014, September 30, 2013 and the year ending on December 31, 2013.

On December 9, 2014, Altice International S.à r.l. signed an agreement to acquire the Portuguese and Hungarian assets of Portugal Telecom from Oi and is subject to works council procedures and to certain conditions precedent, including antitrust approval. The main details of this offer are outlined in the section entitled, "The Transactions" elsewhere in these Listing Particulars. After the completion of the transaction, Altice International S.à r.l. is expected to hold 100% of the PT Portugal Group. The excess of the purchase price over the historical book value will be recorded as goodwill after a preliminary purchase price allocation. The Board of Directors has not conducted any impairment analysis on this goodwill generated from this allocation for the purpose of preparing this financial information. However, this does not purport to represent any adjustments resulting from the allocation of the consideration that will be paid by the Group to acquire PT Portugal. Given that such acquisitions will occur after September 30, 2014, the assets acquired and liabilities assumed of PT Portugal are not included in the condensed consolidated statement of financial position as of September 30, 2014. Accordingly, adjustments have been made to the unaudited pro forma consolidated statement of financial position in order to reflect this transaction as if it had occurred on September 30, 2014. The historical combined statements of income for the period from January 1, 2013 through December 31, 2013, January 1, 2013, to September 30, 2013, and from January 1, 2014, to September 30, 2014, have hence been included in the unaudited pro forma consolidated statement of income for the nine months ended September 30, 2013, and December 31, 2013, and the period ended September 30, 2013, respectively.

The Unaudited Pro Forma Financial Information has been prepared for illustrative purposes. It has not been prepared in accordance with the requirements of Regulation S-X under the U.S. Securities Act or any generally accepted accounting standards nor has it been audited or reviewed. Because of its nature, it addresses a hypothetical situation and, therefore, does not represent the Group's actual financial position or results. It does not purport to indicate the results of operations or the financial position that would have resulted had the transactions been completed at the beginning of the period presented, nor is it intended to be indicative of expected results of operations in future periods or the future financial position of the Group. The pro forma adjustments are based upon available information and certain assumptions that the Company believes to be reasonable. In addition, they do not reflect cost savings or other synergies resulting from the acquisitions that may be realized in future periods. The Unaudited Pro Forma Financial Information does not reflect any special items such as payments pursuant to contractual change-of-control provisions or restructuring and integration costs which may be incurred as a result of the transactions described below. The Unaudited Pro Forma Financial Information do not give effect to the Mobius Acquisition, Tricom Acquisition for the nine month and full year periods ended September 30, 2013 and December 31, 2013. Also, the Unaudited Pro Forma Financial Information does not give effect to the future disposal of the assets held by Outremer Telecom in the Indian Ocean region.

No consideration has been given to any potential effect of the early redemptions of the issued Notes in the statement of financial position.

There are certain differences in the way in which PT Portugal and the Company present items on their respective statements of financial position and statements of income. As a result, certain items have been reclassified in the Unaudited Pro forma Condensed Consolidated statements of income to comply with Altice International's presentation. There could be additional reclassifications following completion of the PT Portugal Acquisition.

The Unaudited Pro Forma Financial Information should be read in conjunction with the notes thereto as well as the historical consolidated financial statements of the Company included herein.

In ODO, no pro forma effects have been given to the capitalization of subscriber acquisition costs (and related depreciation) for the nine months ended September 30, 2013, and year ended December 30, 2013, given the Board has concluded that these are not material.

Historical consolidated financial statements

The historical consolidated financial statements of the Company are represented by the consolidated financial statements of Altice S.A. as of and for the three month and nine month ended September 30, 2014 (and the comparative period for the three month and nine months ended September 30, 2013) prepared in accordance with IAS 34, and as of and for the year ended December 31, 2013, prepared in accordance with International Financial Reporting Standards as adopted for use in the European Union ("IFRS").

3—Pro-Forma adjustments

(a) Acquisition of ODO

Altice Dominican Republic II S.A.S., an indirectly fully-owned subsidiary of Altice International obtained control of ODO on April 9, 2014, further to a purchase of 97.2% of its shares. These pro-forma adjustments relate to the historical income statement of ODO for the period from January 1, 2013, to December 31, 2013, and from January 1, 2014 to April 9, 2014 derived respectively from the unaudited financial statements of ODO prepared in accordance with the measurement and recognition criteria of IFRS, to which certain reclassifications were made to conform to the presentation of the accompanying unaudited pro forma statements of income and from the notes to the historical condensed consolidated financial statements of Altice S.A. as of and for the three month and nine month ended September 30, 2014.

The ODO Acquisition has been accounted for in the condensed consolidated statement of financial position as of September 30, 2014, using the acquisition method of accounting in accordance with IFRS. Under the acquisition method, the consideration paid is allocated to the tangible and identifiable intangible assets acquired and liabilities assumed as the basis of their fair values on the transaction cost. Preliminary goodwill is measured as the excess of the sum of the consideration paid over the net amounts of identifiable assets and liabilities acquired and liabilities assumed of the acquisition costs and amounts to €677.9 million. The actual amounts and the allocation to goodwill ultimately recorded may differ materially from the information presented in this unaudited pro forma consolidated financial information. The preliminary estimates reflected herein are subject to change based upon completion of the valuation of the assets acquired.

For the period ended September 30, 2014, the pro-forma adjustments pertain to the extraction of the result of Orange Dominicana for the period from April 9, 2014, through September 30, 2014, and adding back the results of the nine month period from January 1, 2014 through September 30, 2014.

(b) Acquisition of Numericable Group S.A.

Altice France S.A., an indirectly fully-owned subsidiary of Altice International obtained control of NG on February 3, 2014 pursuant to a purchase of an additional 10.0% (including a call option on 2.8%, exercised in June 2014) of its shares. These Pro-Forma Adjustments relate to the historical statement of income of NG for the period from January 1, 2013, to December 31, 2013, the period from January 1, 2013, to September 30, 2013, and from January 1, 2014, to February 3, 2014, derived respectively from the audited consolidated financial statements of NG prepared in accordance with the measurement and recognition criteria of IFRS, to which certain reclassifications were made to conform to the presentation of the accompanying unaudited pro forma statements of income of Altice S.A.

The historical audited consolidated financial statements for Numericable Group S.A. have been prepared based on the audited historical financial statements of Numericable Group S.A. for the period ended September 30, 2013, and for the year ended December 31, 2013, prepared in accordance with IFRS after giving effect to the following adjustments:

- Reclassification adjustments—certain reclassification adjustments have been made to the audited historical financial statements for the period ended September 30, 2013, and for the year ended December 31, 2013, to conform to the financial information presentation of the Unaudited Pro Forma Consolidated Financial Information of Altice S.A.

- The Numericable Group S.A. Acquisition has been accounted for in the condensed consolidated statement of financial position as of September 30, 2014, using the acquisition method of accounting in accordance with IFRS. Under the acquisition method, the consideration paid is allocated to the tangible and identifiable intangible assets acquired and liabilities assumed as the basis of their fair values on the transaction cost for the purposes of the Unaudited Pro Forma Consolidated Financial Information. Preliminary goodwill is measured as the excess of the sum of the consideration paid over the net amounts of identifiable assets and liabilities acquired and liabilities assumed of the acquisition costs and amounts to €2,558.7 million. The actual amounts and the allocation to goodwill ultimately recorded may differ materially from the information presented in this unaudited pro forma financial information. The preliminary estimates reflected herein are subject to change based upon completion of the valuation of the assets acquired. Preliminary adjustments have been made to reflect the impact of the recognition of certain identifiable assets as part of the preliminary purchase price allocation of the initial goodwill recognized on the acquisition of a controlling stake in the Numericable Group. Such adjustments had an impact of EUR 3.6 million, EUR 32.1 million and EUR 42.8 million on the pro-forma statements of income (net of income tax effects) for the nine month periods ended September 30, 2014 and 2013 and the year ended December 31, 2013 respectively.

For the period ended September 30, 2014, the pro-forma adjustments pertain to the extraction of the period from February 3, 2014 through September 30, 2014 and adding back the results of the period from January 1, 2014 through September 30, 2014.

(c) Acquisition of PT Portugal (adjustments related to the Altice S.A. perimeter)

In connection with the Transactions, the Group, through its indirectly held subsidiary, Altice Portugal S.A., contemplates acquiring a 100.0% stake in the PT Portugal Group. Pro-forma adjustments relating to this transaction are reflected below, and pertain to the Pro-Forma Adjustments made by the Issuer to reflect the impact of the transaction on its unaudited Pro Forma Consolidated Financial Information.

In order to finance this acquisition, the Group, through its indirect subsidiaries Altice Finco S.A. and Altice Financing S.A. intends to issue the New Loans and Senior and Senior Secured Notes bearing interest at 5.25%, 6.6% and 5.3% respectively. These debts fall due in 2022, 2025 and 2023 respectively. Additionally, Altice S.A. issued Senior Notes bearing interest at 7.625% and 6.250% due in 2025. Additionally, the Group acquired and will draw on a new revolving credit facility for a total amount of €330 million bearing interest at 3.65%. The Pro forma adjustments relating to the new debt issuance are composed as follows:

- Payment of the purchase price to the vendors as agreed in the sale and purchase agreement.

- Payment of €128.1 million as underwriting and other fees related to the issuance of the new debts.

Pro-forma adjustments of €248.8 million and €331.7 million have been recorded for the nine month periods ended September 30, 2014 and 2013, and the twelve months ended December 31, 2013 respectively to reflect the net change to finance costs on borrowings and non-recurring deal fees, that would have been recorded had the above debt issuance taken place on January 1, 2013.

In case of a +/−10 basis points change in the interest rate, the final interest expense adjustment would have an impact of +/− €3.3 million for the twelve months ended December 31, 2013, and +/− €2.5 million for the nine months ended September 30, 2013, and September 30, 2014.

Total equity and liabilities	**(962.3)**	**—**	**(243.5)**	**(1,205.8)**

a) The net assets acquired of PT Portugal Group as their historical amounts as if the acquisition took place as at December 31, 2013. The value of the equity acquired (€962.3 million) has been computed as the aggregation of (i) the equity of the combined PT Portugal Group as at September 30, 2014 for €962.3 million minus (ii) the existing goodwill recorded in the books of the combined PT Portugal Group prior to its acquisition by Altice

International. Thus provisional goodwill of €2,761.4 million has been recorded in the pro-forma statement of financial position.

b) Provisional goodwill has been determined with regards to the acquisition of PT Portugal, and is calculated as the difference between the consideration transferred to the owners and the estimated acquisition date assumed fair value of the assets and liabilities acquired, as required by IFRS 3, 'Business combinations'. The SPA also includes an earn out due to the vendors in the event that certain pre-determined conditions are met before the fifth year following the closing of the transaction. As per the requirements of IFRS 3, this contingent consideration was evaluated at its fair value, using the probability weighted average fair value method (corresponding to the present value of the future payout, discounted at the weighted average cost of capital (WACC) of the Group and assuming a probability of occurrence for each discreet payout scenario). The following adjustments have been made to reflect the impact of the acquisition on the Pro-Forma Financial Information. The cash consideration expected to be paid to the vendors to acquire shares in the new combined PT Portugal Group, amounting to €1.

c) Subsequently, the PT Portugal Group will use the proceeds from the new debt issuance to reimburse shareholder loans held by the vendors for a total amount of €5,604.0 million. The cash position of the PT Portugal Group has been cancelled as it is assumed that PT will be sold to Altice on a cash free basis.

(d) Acquisition of SFR

On November 27, 2014, Numericable Group S.A. completed the planned acquisition of SFR S.A. from Vivendi S.A. The acquisition was financed using cash held in escrow from debt issuances performed in May 2014 and was also remunerated with a 20% equity offering in the Numericable Group S.A. Pro Forma Adjustments have been made to the unaudited pro forma consolidated statements of income and unaudited pro-forma statement of financial position to reflect these changes.

In order to finance this acquisition, the NG and the Company issued debts in an aggregate amount of €11,653 million (equivalent) and €4,072 million (equivalent), which were recorded in the condensed consolidated statement of financial position of the Company as of September 30, 2104. On November 17, 2014, Numericable Group S.A. also concluded a new rights offering for a net amount of €4,720 million, of which €3,530.1 million was fully subscribed by Altice France S.A (and funded using proceeds from the debts described above).

The following pro-forma adjustments have been recorded in the pro-forma statement of income to reflect the impact of the issuance of these, had such debts been issued on January 1, 2013:

- Payment of the purchase price of €13,366.3 million to the vendors as agreed in the sale and purchase agreement.

- Payment of €165.4 million as underwriting fees related to the issuance of the new debts by NG.

- Payment of €12.5 million as underwriting fees related to the rights issuance of NG.

- Payment of €34.7 million as discretionary fees related to the issuance of the new debts by NG.

- Payment of €7.8 million as discretionary fees related to the issuance of the new debts by Altice S.A.

Pro-forma adjustments of €137.0 million have been recorded for the nine month periods ended September 30, 2014 for the NG perimeter to reflect the impact of the debt and rights issuance on finance costs and restructuring, non-recurring costs and other expenses. For the nine months ended September 30, 2013 and the twelve months ended December 31, 2013, adjustments of €137.0 million and €326.7 million have been made to reflect the net change (after tax) to finance costs on borrowings and non-recurring deal fees, that would have been recorded had the above debt issuance taken place on January 1, 2013.

As of September 30, 2014 , the following pro-forma entries were recorded in the unaudited Pro Forma consolidated statement of financial position to reflect the closing of the transaction:

(i) Provisional goodwill has been determined with regards to the acquisition of SFR, and is calculated as the difference between the consideration transferred to the owners and the estimated acquisition date assumed fair value of the assets and liabilities acquired, as required by IFRS 3, 'Business combinations'. The SPA also includes an earn-out due to the vendors in the event that a certain pre-determined level of an operational indicator is achieved. As per the requirements of IFRS 3, this contingent consideration was evaluated at its fair value, which the Board of Directors estimates is equal to the nominal value of the earn-out, €750.0 million. The total cash consideration transferred to the vendors was €13,366.3 million (restricted cash held in escrow and recorded in the statement of financial position as of September 30, 2014) and the equity consideration transferred amounted to €2,674.2 million and the net fair value of assumed assets and liabilities was evaluated as €11,121.4 million (including adjustments on intercompany debt at SFR on a cash free/debt free basis). A residual goodwill of €5,669.1 was recognized in the pro forma condensed consolidated statement of financial position as at September 30, 2014.

The Board of Directors has not accounted for the pro-forma effect of the call options held by the Company on the 20% stake of Vivendi in NG.

3—Pro Forma adjustments

(ii) The variation between the amortised cost of the restricted cash recorded in the condensed consolidated statement of financial position as of September 30, 2014 and the actual cash released from escrow for a total amount of €794.0 million.

(iii) Payment of fees related to the issuance of debt at Numericable Group in relation to the transaction for a total amount of €200.1 million.

(iv) Numericable Group issued new shares under the rights issuance for a total amount of €4,732.0 (€4,720.0 million net of underwriting fees), under which Altice France S.A. subscribed to new NG shares for a total amount of €3,530.1. This portion was funded using the restricted cash held on the balance sheet of Altice S.A. as of September 30, 2014.

(v) Excess cash resulting from the closing of the acquisition for a total of €548.8 million at Altice S.A. and €67.4 million at NG.

(vi) The use of existing cash on balance sheet at SFR, as the planned acquisition of SFR was closed on a cash free basis.

(vii) The subscription by Fiberman S.C.A of its portion of the Numericable rights issuance, funded by available cash on the statement of financial position for a total amount of €43.4 million.

(e) Acquisition of OMT

Altice Blue Two S.A.S., an indirectly fully-owned subsidiary of Altice International obtained control of OMT on July 4, 2013, pursuant to a purchase of 77% of its shares. These pro-forma adjustments relate to the historical income statement of OMT for the period from January 1, 2013, through July 4, 2013, derived from the unaudited financial statements of OMT prepared in accordance with the measurement and recognition criteria of IFRS, to which certain reclassifications were made to conform to the presentation of the accompanying unaudited pro forma statements of income.

(f) Acquisition of Winreason S.A.

Cabovisao, an indirectly fully-owned subsidiary of Altice International obtained control of Winreason on August 8, 2013, pursuant to a purchase of 100% of its shares. These pro-forma adjustments relate to the historical income statement of

ONI for the period from January 1, 2013, through August 8, 2013, derived from the unaudited special-purpose consolidated financial statements of Winreason prepared in accordance with the measurement and recognition criteria of IFRS, to which certain reclassification have been applied to conform to the presentation of the accompanying unaudited pro forma statements of income.

(g) Acquisition of Ma Chaîne Sport

On October 1, 2013, Altice International entered into a share purchase agreement with Altice IV S.A. and Valemi S.A. for the purchase of 100% of the share capital and voting rights of Ma Chaîne Sport S.A.S.. These pro-forma adjustments relate to the historical income statement of Ma Chaîne Sport for the period from January 1, 2013, through September 30, 2013 derived from the financial statements of Ma Chaîne Sport prepared in accordance with the measurement and recognition criteria of French Generally Accepted Accounting Principles ("French GAAP").

The measurement and recognition criteria of French Generally Accepted Accounting Principles ("French GAAP") do not permit the capitalisation of costs related to the acquisition of contents for delivery to final customers. Given the exclusive nature of such contents, IFRSs allow the capitalisation and recognition of such costs as intangible assets. Had Ma Chaine Sport adopted the aforementioned measurement and recognition criteria of IFRS, such illustrative adjustments result in a decrease in purchasing and subcontracting services of €4.7 million, in other operating expenses of €1.6 million and an increase in depreciation and amortization of €6.1 million for the year ended December 31, 2013, and a decrease in purchasing and subcontracting services of €4.1 million, in other operating expenses of €1.4 million and an increase in depreciation and amortization of €4.4 million for the nine months ended September 30, 2013.

(h) Acquisition of SportV

On October 1, 2013, Altice International obtained control over Sportv S.A. These pro-forma adjustments relate to the historical statement of income of Sportv for the period from January 1, 2013, through December 31, 2013, derived from the financial statements of Sportv prepared in accordance with the measurement and recognition criteria of IFRS, to which certain reclassification have been applied to conform to the presentation of the accompanying unaudited pro forma consolidated statements of income.

(i) Acquisition of non-controlling interests

Coditel

(i) On November 29, 2013, Altice International purchased the remaining 40% of the shares and voting rights of Coditel Lux II S.à r.l. it did not hold and refinanced certain Preferred Equity Certificates issued by such entity. The cash consideration for the acquisition on a cash-free and debt-free basis was €82.5 million. Pro forma adjustments have hence been recorded to give effect to the impact on the non-controlling interests within the unaudited pro forma consolidated statement of income as if such transaction took place on January 1, 2013. Such adjustments represents the reallocation of the net income attributable to non-controlling interests to net income attributable to equity holders of the parent, as a result of the acquisition of the non-controlling interests for an amount of €14.6 million for the nine month period ended September 30, 2013, and €18.7 million for the full year ended December 31, 2013. Additionally, a reversal of €7.2 million, pertaining to the interests paid on the preferred equity certificates for the period between January 1, 2013 and November 29, 2013, has been reflected in the unaudited pro-forma statement of financial income for the nine months ended September 30, 2013, and the twelve months ended December 31, 2013.

Cabovisao

(ii) On April 23, 2013, Altice International purchased the remaining 40% of the shares and voting rights of Cabovisao. The cash consideration for the acquisition on a cash-free and debt-free basis was €105.1 million. Pro forma adjustments have hence been recorded to give effect to the impact on the non-controlling interests within the unaudited proforma consolidated statement of income as if such transaction took place on January 1, 2013. Such adjustments represents the reallocation of the net income attributable to non-controlling interests to net income attributable to equity holders of the parent, as a result of the acquisition of the non-controlling interests for an amount of €2.4 million for the nine months ended September 30, 2013 and twelve months ended December 31, 2013.

Outremer Telecom

(iii) On March 13 and November 13, 2014 Altice S.A. repurchased the minority interests in Altice Blue Two S.A.S. it did not hold. Pro forma adjustments have hence been recorded to give effect to the impact on the non-controlling interests within the unaudited proforma consolidated income statement as if such transaction took place on January 1, 2013. Such adjustments represent the reallocation of the net income attributable to non-controlling interests to net income attributable to equity holders of the parent, as a result of the acquisition of the non-controlling interests for an amount of €2.7 million for the full year ended December 31, 2013 and €2.5 million for the nine months ended September 30, 2013.

(j) Refinancing Transactions

The pro forma adjustments relating to the refinancing transactions are composed as follows:

(i) Issuance of Senior and Senior Secured Notes on June 14, 2013 and December 5, 2013

On June 14, 2013 and December 5, 2013, the Group issued Senior and Senior Secured Notes for an amount of €1,505.0 million. The proceeds were used to refinance the following liabilities.

- The repayment of the Cabovisao credit facility on July 2, 2013 for an amount of €202.6 million;
- The purchase of the Coditel Senior Facility on July 2, 2013 for an amount of €42.3 million; and
- The purchase of Orange Dominicana for an amount of €1,034.0 million and of Tricom and Global Interlinks for a total amount of €299.2 million.

(ii) Use of Term Loan

On June 24, 2013, the Altice International Group secured a senior secured credit facility of €795 million. The proceeds were used to acquire ONI together with OMT and the rest was used to refinance the following liabilities:

- The repayment of the Coditel Senior Facility on July 2, 2013 for an amount of €95.7 million;
- The repayment of the ONI credit facility on August 8, 2013 for an amount of €47.3 million; and
- The repayment of the ABO credit facility on July 2, 2013 for an amount of €65.6 million.

(iii) Refinancing of Coditel mezzanine

On December 2, 2014, the Company, through its indirectly held subsidiary, Coditel Holding S.A., exercised a call option held in a mezzanine facility, issued by Coditel Holding S.A. The total amount refinanced was €125.7 million, which included accumulated PIK interest and break costs of 6.75% of the nominal amount. This facility was refinanced by drawing on two RCFs currently available to the Group and will be subsequently refinanced in the future.

(iv) During the fourth quarter of 2013, Altice Finance secured a margin loan of €324 million. The proceeds were used to finance the increase in the share capital of NG. As part of the SFR Acquisition, this was repaid fully.

NOTES TO THE UNAUDITED PRO FORMA CONSOLIDATED FINANCIAL INFORMATION

3—Pro Forma adjustments

Pro-Forma adjustments of €(15.3) million, € 66.5 and €145.8 million have been recorded to reflect the net change to finance costs on borrowings for the nine months ended September 30, 2014, and September 30, 2013, and the year ended December 31, 2013, inclusive of tax effects, that would have been recorded had the above refinancing transactions taken place on January 1, 2013.

(k) Acquisition of a controlling stake in Fiberman S.C.A

In October 2014, the Company through its direct subsidiary, acquired a 100% controlling stake in Fiberman S.C.A, a vehicle held by former majority stakeholders in NG and certain managers of the Numericable Group S.A.. As this transaction occurred after September 30, 2014, adjustments for a total amount of EUR 32.7 million have been recorded in the unaudited pro-forma consolidated statement of financial position.

(l) Translation of historical financial information denominated in currencies other than Euro.

The historical financial statements of ODO, from which amounts have been derived in preparing the Unaudited Pro Forma Financial Information as of and for the year ended December 31, 2013, and the nine months ended September 30, 2013, have been drawn in Dominican Pesos (“DOP”). The amounts have been translated into Euro (“EUR”), for the purposes of their inclusion within the Unaudited Pro Forma Financial Information, using the following notes:

- As of September 30, 2013: DOP1.00 = EUR0.0186
- As of December 31, 2013: DOP1.00 = EUR0.0168

(m) Elimination of intercompany transactions between PT Portugal and Altice S.A. and its subsidiaries.

(i) Intercompany transactions between the entities included in the Unaudited Pro Forma Financial Information have not been excluded or eliminated from the Unaudited Pro Forma Financial Information as the amounts were not considered material by the Board of Directors, except for certain transactions between Cabovisao S.A, ONI SGPS and PT Portugal and its subsidiaries that make up the transaction perimeter. These intercompany transactions had a net impact of €0 million that has been recorded in the unaudited Pro Forma consolidated statements of income for the nine month periods ended September 30, 2013 and 2014 and for the full year ended December 31, 2013.

(ii) Intercompany sales between Cabovisao and ONI and PT Portugal have been eliminated for an amount of €17.6 million, €24.3 million and €30.6 million respectively for the nine months ended September 30, 2014 and 2013 and the twelve months ended December 31, 2013.

(iii) Intercompany operating expenses and purchases and subcontracting services between Cabovisao and ONI and PT Portugal have been eliminated for an amount of €17.6 million, €24.3 million and €30.6 million respectively have been eliminated for the nine months ended September 30, 2014 and 2013 and the twelve months ended December 31, 2013.

(iv) The elimination of intercompany transactions between Cabovisao and ONI and PT Portugal relating to trade receivables and payables for €9.0 million that have been recorded in the unaudited proforma consolidated statement of financial position as at September 30, 2014.

(n) Elimination of intercompany transactions between SFR and Altice S.A. and its subsidiaries.

(i) Intercompany transactions between the entities included in the Unaudited Pro Forma Financial Information have not been excluded or eliminated from the Unaudited Pro Forma Financial Information as the amounts were not considered material by the Board of Directors, except for certain transactions between SFR and Numericable Group and their subsidiaries that make up the transaction perimeter. These intercompany transactions had a net impact of €0 million that has been recorded in the unaudited pro-forma consolidated statements of income for the nine month periods ended September 30, 2013 and 2014 and the twelve month period ended December 31, 2013.

(ii) Intercompany sales between SFR and NG have been eliminated for a total amount of €45.1 million in the unaudited consolidated pro forma statement of income for the nine month period ending September 30, 2014, €44.8 million for the year ended December 31, 2013, and €33.6 million for the period ended September 30, 2013.

(iii) Intercompany purchasing and subcontracting costs between SFR and NG have been eliminated for an amount of €6.3 million in the unaudited pro forma statement of income for the nine months ended September 30, 2014, €1.6 million for the year ended December 31, 2013 and €1.2 million for the period ended September 30, 2013.

(iv) Intercompany operating expenses between SFR and NG have been eliminated for an amount of €38.8 million in the unaudited pro forma statement of income for the nine months ended September 30, 2014, €43.2 million for the year ended December 31, 2013, and € 32.4 million for the period ended September 30, 2013.

(v) Intercompany trade receivables and payables have been eliminated for a total amount of €84.6 million between SFR and NG and their subsidiaries in the unaudited pro forma consolidated statement of financial position as of September 30, 2014.

ALTICE INTERNATIONAL S.à r.l.

NOTES TO THE UNAUDITED PRO FORMA CONSOLIDATED FINANCIAL INFORMATION

1—General information

The accompanying unaudited pro forma consolidated statement of income for the nine and twelve month periods ended September 30, 2014 and September 30, 2013, and the twelve months period ended December 31, 2013, the accompanying unaudited pro forma consolidated statement of financial position as of September 30, 2014 and these explanatory notes (together the "Unaudited Pro Forma Financial Information") present the unaudited pro forma consolidated financial information of Altice International S.à r.l. (the "Company" or the "Group"), giving effect to each of the acquisitions and the other transactions described in the basis of preparation described in Note 2.

The Unaudited Pro Forma Financial Information does not give pro forma effect to the Group's acquisition of Mobius S.A.S ("Mobius") for the nine month periods ended September 30, 2013 and December 31, 2013 respectively. However, as a result of the acquisition of the Mobius Group on January 15, 2014, the pro-forma condensed consolidated statement of income for the nine months ended September 30, 2014 contains information pertaining to the Mobius Group. The Board of Managers has concluded that these are not significant for the purpose of preparing the accompanying Unaudited Pro Forma Financial Information. Additionally, the unaudited Pro Forma Financial Information does not give pro forma effect to the Group's acquisition of Tricom S.A., Global Interlinks Limited and their subsidiaries ("Tricom") for the nine and twelve month periods ended September 30, 2013 and December 31, 2013 respectively. However, as a result of the acquisition of the Tricom Group on March 12, 2014, the pro-forma condensed consolidated statement of income for the nine months ended September 30, 2014 contains information pertaining to the Tricom Group. The Board of Managers has concluded that these are not significant for the purpose of preparing the accompanying Unaudited Pro Forma Financial Information. For the nine months ended September 30, 2014, the Mobius Group and Tricom Group contributed €13.1 million and €82.0 million to the Company's revenues and €1.0 million and €14.1 million to the Company's operating income respectively. The Unaudited Pro Forma Financial Information also does not give effect to the disposal of the assets of Outremer Telecom that are located in the Indian Ocean region, as this disposal is not deemed to be significant by the Board of Managers. In October 2014, the Company, through its indirect subsidiary, Altice Africa S.à r.l. acquired an additional stake in Wananchi Group (Holdings) Ltd for a total cash amount of €8.6 million. Management has deemed that this acquisition is not significant for the purposes of these accounts and hence no pro forma effect has been given to this transaction. The Unaudited Pro Forma Financial Information does not give effect to any hedging effects that the Company or the Group may enter into to cover its different financing and acquisitions. The Unaudited Pro Forma Financial Information has not been audited or reviewed.

The Unaudited Pro Forma Financial Information does not purport to be indicative of the financial position and results of operations that the Group will obtain in the future, or that the Group would have obtained if the significant acquisitions and disposals described in the basis of preparation below occurred with effect from the dates indicated. The pro forma adjustments are based upon currently available information and upon certain assumptions that the Board of Managers of the Company believes to be reasonable.

For the purposes of these Unaudited Pro Forma Financial Information, and in relation to the Group's acquisition of the PT Portugal Group ("PT") any difference between (a) the total consideration transferred measured in accordance with IFRS 3 *Business Combinations* ("**IFRS 3**") and (b) the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed, has been allocated to goodwill. Definitive allocations will be performed and finalized based upon certain valuations and other studies that will be performed with the services of outside valuation specialists after the closing of the aforementioned acquisitions. Accordingly, the determination of the amount of goodwill is preliminary and has been made solely for the purpose of preparing the unaudited pro forma condensed consolidated financial information and is subject to revision based on a final determination of fair value of assets acquired and liabilities assumed at the end of the measurement period for PT.

The Unaudited Pro Forma Financial Information should be read in conjunction with the assumptions underlying the pro forma adjustments which are described in these notes as well as the historical and other financial statements included in these Listing Particulars.

2—Basis of preparation

The Unaudited Pro Forma Financial Information has been prepared to give effect to the following transactions as if they occurred on January 1, 2013 for the purposes of the unaudited pro forma consolidated statements of income and, if applicable, on September 30, 2014 for the purpose of the unaudited condensed consolidated pro forma statement of financial position:

- The acquisition by the Company or its subsidiaries of:
    - 99.7% of the share capital of OMT Invest S.A.S. in two tranches of 77% and 22.7% respectively;
    - A supplementary 40% of the share capital of Altice Portugal and its direct subsidiary Cabovisao;
    - 100% of the share capital of Winreason S.A.;
    - 100% of the share capital of Sportv S.A.;
    - 100% of the share capital of Ma Chaîne Sport S.A.S.;
    - A supplementary 40% of the share capital of Coditel Holding Lux II S.à r.l
    - 97.2% of the share capital of Orange Dominicana S.A.S. (later renamed Altice Hispaniola S.A.S.).
- The planned acquisition by the Company and/or its subsidiaries of 100% of the share capital of PT Portugal and its subsidiaries as defined by the carve-out perimeter. A description of the planned carve out steps and adjustments is provided elsewhere in the Listing Particulars.
- The following Refinancing Transactions
    - The issuance by subsidiaries of the Company of:
        - 9% €250 million Senior Secured Notes falling due in 2023;
        - $6^1/_2$% $900 million Senior Secured Notes due in 2022;
        - $8^1/_8$% $400 million Senior Secured Notes due in 2024;
    - The planned issuance by the Company and its subsidiaries of:
        - 5.25% €400 million term loan due in 2022;
        - 5.25% €500 million term loan due in 2022;
        - 5.25% €500 million Senior Secured Notes due in 2023;
        - 6.625% $2,060 million Senior Secured Notes due in 2023;
        - 7.625% $385 million Senior Notes falling due in 2025;
    - The obtaining of a senior secured term loan B credit facility agreement for an amount equivalent to €795 million;
    - The repayment of the Coditel Mezzanine facility amounting to €125.7 million;
    - The repayment of the Coditel Senior Facility amounting to €138 million;
    - The repayment of the ABO credit facility amounting to €65.6 million;
    - The repayment of the Cabovisao facility amounting to €202.6 million; and
    - The repayment of the ONI facility amounting to €47.3 million.
    - The planned issuance of Mandatory Convertible Notes (“MCN”) to be fully subscribed by its sole shareholder for a total amount of up to €2,055 million (excluding transaction fees).
    - The obtaining of an additional revolving credit facility amounting to a total of €180 million.

- The borrowing costs on the aforementioned drawn amounts have been included in the unaudited pro forma statement of income for the nine months ended September 30, 2013 and 2014 and the year ended December 31, 2013.

As mentioned above, given the timing of the Acquisition, assets acquired and liabilities assumed of the PT Portugal Group are reflected in the unaudited pro forma consolidated statement of financial position as of September 30, 2014 at their historical book value reflected in the PT Portugal Combined Selected Financial Information for the nine months ended September 30, 2014, and have not been adjusted. The determination of the amount of goodwill is preliminary and has been made solely for the purpose of preparing the Unaudited Pro Forma Financial Information and is subject to revision based on a final determination of fair value after the closing of the acquisitions mentioned above. Under IFRS, goodwill is not amortized, but is tested for impairment at least annually, and therefore, the unaudited pro forma consolidated statement of income does not include any amortization expense in relation to the identifiable assets acquired. Upon finalization of the amount of goodwill, certain identifiable assets acquired such as licenses, trademarks and customer base will have a finite life and will be amortized. As a result, the future results of consolidated operations of Altice International S.à r.l. could be significantly affected by amortization expense in relation to such identifiable assets acquired.

On April 23, 2013, an indirect subsidiary of the Company acquired the remaining 40% of the share capital of Cabovisao. The Group had acquired control over Cabovisao on February 29, 2012 and the acquisition was accounted for using the purchase method of accounting with the assets acquired and liabilities assumed recorded at their estimated fair values at the date of acquisition. The assets acquired and liabilities assumed of Cabovisao are reflected in the condensed consolidated statement of financial position as of September 30, 2014. Therefore, this transaction has not been deemed to result in any adjustments to the unaudited pro forma consolidated statement of financial position. Accordingly, the relevant pro forma effects on the non-controlling interests resulting from the increase in the Group's shareholding from 60% to 100% have been included in the unaudited pro forma consolidated statements of income for the nine months ended September 30, 2013 and the year ending on December 31, 2013.

On June 14, 2013, Altice Finco S.A., an indirect subsidiary of the Company, issued 9% Senior Notes for an aggregate principal of €250 million maturing in 2023. Such liabilities are reflected in the combined consolidated statement of financial position as of September 30, 2014. Therefore, this transaction has not been deemed to result in any adjustments to the unaudited pro forma consolidated statement of financial position as of September 30, 2014. Accordingly, the relevant pro-forma effects of the resulting borrowing costs on the aforementioned drawn amount for the period between January 1, 2013 and June 14, 2013 have been included in the unaudited pro forma consolidated statement of income for the nine months ended September 30, 2013 and the year ending on December 31, 2013.

On June 24, 2013, Altice Financing S.A., an indirect subsidiary of the Company, entered into a senior secured credit facility agreement providing for term loans for a total equivalent amount of €795 million. As of September 30, 2014, the full amount of €795 million has been drawn under this facility. The corresponding liability is reflected in the consolidated statement of financial position as of September 30, 2014. Therefore, this transaction has not been deemed to result in any adjustments to the unaudited pro forma condensed consolidated statement of financial position. Accordingly, the relevant pro-forma effects of the resulting borrowing costs on the aforementioned drawn amount for the period between January 1, 2013 and June 24, 2013 have been included in the unaudited pro forma consolidated statements of income for the nine months ended September 30, 2013 and the year ending on December 31, 2013.

On July 2, 2013, Cabovisao repaid its credit facility for an amount of €202.6 million. The corresponding operation is reflected in the condensed consolidated statement of financial position as of September 30, 2014. Therefore, this transaction has not been deemed to result in any adjustments to the unaudited pro forma consolidated statement of financial position. Accordingly, the relevant pro-forma effects of the resulting borrowing costs on the aforementioned drawn amount for the period between January 1, 2013 and July 2, 2013 have been included in the unaudited pro forma consolidated statements of income for the nine months ended September 30, 2013 and the year ending on December 31, 2013.

On July 4, 2013, an indirect subsidiary of the Company acquired 77% of the share capital of OMT Invest S.A. ("OMT"). On June 27, 2014, the Company acquired the remaining 22.7% of the share capital of OMT. The acquisition was accounted for using the purchase method of accounting and the assets acquired and liabilities assumed were recorded at their estimated fair values at the date of acquisition. The assets acquired and liabilities assumed of OMT are reflected in the consolidated statement of financial position as of September 30, 2014. Therefore, this transaction has not been deemed to result in any adjustments to the unaudited pro forma consolidated statement of financial position. The results of operations for OMT have been included in the consolidated statement of income of the Company since the date of acquisition on July 4, 2013. The OMT historical consolidated income statement for the period from January 1, 2013 through July 3, 2013 have hence been included in the unaudited pro forma consolidated statements of income for the nine months ended September 30, 2013 and the year ending on December 31, 2013.

On August 8, 2013, an indirect subsidiary of the Company acquired 100% of the share capital of Winreason S.A. ("ONI"). The acquisition was accounted for using the purchase method of accounting and the assets acquired and liabilities assumed were recorded at their estimated fair values at the date of acquisition. The assets acquired and liabilities assumed of ONI are reflected in the condensed consolidated statement of financial position as of September 30, 2014, at their fair value and a purchase price allocation has been completed. Accordingly, this transaction has not been deemed to result in any adjustments to the unaudited pro forma consolidated statement of financial position. The results of operations for ONI have been included in the historical consolidated statement of income since the date of acquisition on August 8, 2013. The ONI historical consolidated income statement for the period from January 1, 2013 through August 7, 2013 have been included in the unaudited pro forma consolidated income statement for the nine months ended September 30, 2013 and the year ending on December 31, 2013. As per the requirements of IFRS 3, *Business Combinations*, the comparative historical period for ONI included in the condensed consolidated statement of income of the Company for the nine months ended September 30, 2013 has been restated to reflect the impact of the recognition of the fair value of the assumed assets and liabilities of ONI on the amortization and depreciation expense for the period in question.

On August 8, 2013, ONI repaid its credit facility for an amount of €47.3 million. The corresponding operation is reflected in the condensed consolidated statement of financial position as of September 30, 2014. Therefore, this transaction has not been deemed to result in any adjustments to the unaudited consolidated pro forma statement of financial position. Accordingly, the relevant pro-forma effects of the resulting borrowing costs on the aforementioned drawn amount for the period between January 1, 2013 and August 8, 2013 have been included in the unaudited pro forma consolidated statements of income for the nine months ended September 30, 2013 and the year ending on December 31, 2013.

On October 1, 2013, an indirect subsidiary of the Company integrated in the Altice International group 100% of the share capital of Ma Chaîne Sport SAS ("MCS"). The Board of Managers has not accounted for this transaction using the purchase method of accounting as it relates to a transaction performed under the common control of the ultimate beneficial owner of the Company. The corresponding operation is reflected in the condensed consolidated statement of financial position as of September 30, 2014. Therefore, this transaction has not been deemed to result in any adjustments to the unaudited pro forma consolidated statement of financial position. However, the relevant pro forma effects of the unconsolidated period between January 1, 2013 and October 4, 2013 have been included in the unaudited pro forma consolidated statement of income for the nine months ended September 30, 2013 and the year ending on December 31, 2013

On October 1, 2013, an indirect subsidiary of the Company integrated in the Altice International group 100% of the share capital of Sportv S.A. ("Sportv"). The Board of Managers has not accounted for this transaction using the purchase method of accounting as it relates to a transaction performed under the common control of the ultimate beneficial owner of the Company. The corresponding operation is reflected in the consolidated statement of financial position as of September 30, 2014. Therefore, this transaction has not been deemed to result in any adjustments to the unaudited pro forma consolidated statement of financial position. However, the relevant pro forma effects of the unconsolidated period between January 1, 2013 and October 4, 2013 have been included in the unaudited pro forma consolidated income statements in the nine months ended September 30, 2013 and the year ending on December 31, 2013

On November 29, 2013, an indirect subsidiary of the Company acquired an additional 40% of the share capital of Coditel Holding Lux II S.à r.l. ("Coditel") and reimbursed certain Preferred Equity Certificates held by the non-controlling interests in this entity. The corresponding operation is reflected in the condensed consolidated statement of financial position as of September 30, 2014. Therefore, this transaction has not been deemed to result in any adjustments to the unaudited pro forma condensed consolidated statement of financial position. Accordingly, the relevant pro forma effects of the resulting borrowing costs and change in non controlling interests on the aforementioned operation for the period between January 1, 2013 and November 29, 2013 have been included in the unaudited pro forma consolidated statements of income for the nine months ended September 30, 2013 and the year ending on December 31, 2013.

On December 5, 2013, Altice Financing S.A., an indirect subsidiary of the Company, proceeded with the issuance of $6^1/_2$ Senior Secured Notes for an aggregate principal of $ 900 million maturing in 2022. The corresponding operation is reflected in the condensed consolidated statement of financial position as of September 30, 2014. Therefore, this transaction has not been deemed to result in any adjustments to the unaudited pro forma consolidated statement of financial position. Accordingly, the relevant pro forma effects of the resulting borrowing costs on the aforementioned operation for the period between January 1, 2013 and December 5, 2013 have been included in the unaudited pro forma consolidated statements of income for the nine months ended September 30, 2013 and the year ending on December 31, 2013.

On December 5, 2013, Altice Finco S.A., an indirect subsidiary of the Company, proceeded with the issuance of $8^1/_8$% Senior Notes for an aggregate principal of $ 400 million maturing in 2024. The corresponding operation is reflected in the condensed consolidated statement of financial position as of September 30, 2014. Therefore, this transaction has not been deemed to result in any adjustments to the unaudited pro forma consolidated statement of financial position.

Accordingly, the relevant pro forma effects of the resulting borrowing costs on the aforementioned operation for the period between January 1, 2013 and December 5, 2013 have been included in the unaudited pro forma consolidated statements of income for the nine months ended September 30, 2013 and the year ending on December 31, 2013.

On April 9, 2014, the Company acquired 97.2% of the share capital of Orange Dominicana S.A. ("ODO"). The excess of the acquisition price over the historical book value of the non-controlling interests was recorded as goodwill after a preliminary purchase price allocation. The Board of Managers has not conducted any impairment analysis on this goodwill generated from this allocation for the purpose of preparing this financial information. The assets acquired and liabilities assumed of ODO are reflected in the consolidated statement of financial position as of September 30, 2014, and the difference between the consideration paid and the net asset position has been provisionally accounted for as goodwill, except for two identifiable assets that were recognized at the provisional fair values at the time of acquisition. These assets consist of the right to use the Orange brand in the Dominican Republic for a period of three years (plus an option of two additional years) and the capitalization of subscriber acquisition costs in line with Group accounting policies. Accordingly, this transaction has not been deemed to result in any adjustments to the unaudited pro forma consolidated statement of financial position. The results of operations for ODO have been included in the historical consolidated statement of income since the date of acquisition on April 9, 2014. The historical consolidated income statement of ODO, for the period from January 1, 2014 through April 8, 2014 have been included in the unaudited pro forma condensed consolidated income statement for the nine months ended September 30, 2014. However, for practicality reasons, the data pertaining to the six month period from April 9, 2014 to September 30, 2014 has been deducted from the historical consolidated financial information of the Group, and a pro-forma adjustment reflecting the income statement for the period from January 1, 2014 to September 30, 2014 has been presented. This has been done to ensure comparability of information for the nine month periods ended September 30, 2014 and 2013 respectively for the purpose of the Management Discussion and Analysis of ODO.

On December 2, 2014, the Company refinanced the mezzanine facility issued by Coditel Holding S.A. for a total amount of €125.7 million (this included the PIK interest due on the debt as well as the break costs of 6.75%). Given that this transaction occurred after September 30, 2014, this refinancing has not been included in the condensed consolidated statement of financial position as of September 30, 2014. Accordingly, adjustments have been made to the unaudited pro forma consolidated statement of financial position in order to reflect this new acquisition as if it had occurred on September 30, 2014 as well as in the unaudited pro forma consolidated statements of income for the nine months ended September 30, 2013, for the nine months ended September 30, 2014 and the year ending on December 31, 2013.

In January 2015, Altice Finco S.A. and Altice Financing S.A., two subsidiaries of Altice International S.à r.l., intend to proceed with the issuance of the Notes and entry into a term loan credit facility in an amount of €3,498 million (equivalent). Given that such issuance will occur after September 30, 2014, the liabilities arising from the issuance are not included in the condensed consolidated statement of financial position as of September 30, 2014. Accordingly, adjustments have been made to the unaudited pro forma statement of financial position in order to reflect this transaction as if it had occurred on September 30, 2014. Accordingly, the relevant pro forma effects of the resulting borrowing costs on the aforementioned operation for the period between January 1, 2013 and September 30, 2014 have been included in the unaudited pro forma consolidated statements of income for the nine months ended September 30, 2013, for the nine months ended September 30, 2014 and the year ending on December 31, 2013.

In addition to the debt issuances mentioned above, the Company will proceed with the issuance of Mandatory Convertible Notes for a total amount of up to €2,055 million. Given that such issuance will occur after September 30, 2014, the liabilities arising from the issuance are not included in the condensed consolidated statement of financial position as of September 30, 2014. Accordingly, adjustments have been made to the unaudited pro forma statement of financial position in order to reflect this transaction as if it had occurred on September 30, 2014. Accordingly, the relevant pro forma effects of the resulting borrowing costs on the aforementioned operation for the period between January 1, 2013 and September 30, 2014 have been included in the unaudited pro forma consolidated statements of income for the nine months ended September 30, 2013, for the nine months ended September 30, 2014 and the year ending on December 31, 2013.

On December 9, 2014, the Company signed an offer to acquire the Portuguese and Hungarian assets of the Portuguese from Oi and is subject to works council procedures and to certain conditions precedent, including antitrust approval. The main details of this offer are outlined in the section entitled, "The Transactions" elsewhere in these Listing Particulars. After the completion of the transaction, the Company is expected to hold 100% of the PT Portugal Group. The excess of the purchase price over the historical book value will be recorded as goodwill after a preliminary purchase price allocation. The Board of Managers has not conducted any impairment analysis on this goodwill generated from this allocation for the purpose of preparing this financial information. However, this does not purport to represent any adjustments resulting from the allocation of the consideration that will be paid by the Group to acquire PT Portugal. Given that such acquisitions will occur after September 30, 2014, the assets acquired and liabilities assumed of PT Portugal are not included in the condensed consolidated statement of financial position as of September 30, 2014. Accordingly, adjustments have been made to the unaudited pro forma condensed consolidated statement of financial position in order to reflect this transaction as if it had occurred on September 30, 2014. The historical combined statements of income for the period from January 1, 2013 through December 31, 2013, January 1, 2013 to September 30, 2013 and from January 1, 2014 to September 30, 2014 have hence been included in the unaudited pro forma consolidated statement of income for the nine months ended December 31, 2013 and September 30, 2014 and the year ended September 30, 2014, respectively.

The Unaudited Pro Forma Financial Information has been prepared for illustrative purposes. It has not been prepared in accordance with the requirements of Regulation S- X under the U.S. Securities Act or any generally accepted accounting standards nor has it been audited or reviewed. Because of its nature, it addresses a hypothetical situation and, therefore, does not represent the Group's actual financial position or results. It does not purport to indicate the results of operations or the financial position that would have resulted had the transactions been completed at the beginning of the period presented, nor is it intended to be indicative of expected results of operations in future periods or the future financial position of the Group. The pro forma adjustments are based upon available information and certain assumptions that the Company believes to be reasonable. In addition, they do not reflect cost savings or other synergies resulting from the acquisitions that may be realized in future periods. The Unaudited Pro Forma Financial Information does not reflect any special items such as payments pursuant to contractual change-of-control provisions or restructuring and integration costs which may be incurred as a result of the transactions described below. The unaudited Pro Forma Financial Information does not give effect to the Mobius Acquisition, Tricom Acquisition for the nine month period ended September 30, 2013 or the full year ended December 31, 2013. However, since the acquisition of Mobius S.A.S in January 2014 and of Tricom in March 2014, the results of these entities are included in the historical condensed consolidated statement of income and condensed consolidated statement of financial position of the Group for the nine months ended September 30, 2014. The unaudited pro- forma financial does not give effect to the disposal of the mobile assets of Outremer Telecom based in the Reunion Islands and Mayotte.

There are certain differences in the way in which PT Portugal and the Company present items on their respective statements of financial position and statements of income. As a result, certain items have been reclassified in the Unaudited Pro Forma Consolidated statements of income to comply with Altice International's presentation. There could be additional reclassifications and some remeasurements following completion of the PT Portugal Acquisition.

The unaudited Pro Forma Financial Information should be read in conjunction with the notes thereto as well as the historical consolidated financial statements of the Company included herein.

In ODO, no pro forma effects have been given to the capitalization of subscriber acquisition costs (and related depreciation) for the nine months ended September 30, 2013, and year ended December 31, 2013, given the Board has concluded these are not material.

Historical consolidated financial statements

The historical consolidated financial statements of the Company are represented by the consolidated financial statements of the Company as of and for the three month and nine month ended September 30, 2014 (and the comparative period for the three month and nine months ended September 30, 2013) prepared in accordance with IAS 34, and as of and for the year ended December 31, 2013, prepared in accordance with International Financial Reporting Standards as adopted for use in the European Union ("IFRS").

3—Pro-forma adjustments

(a) Acquisition of ODO

Altice Dominican Republic II S.A.S, an indirectly fully-owned subsidiary of Altice International obtained control of ODO on April 9, 2014 further to a purchase of 97.2% of its shares. These pro-forma adjustments relate to the historical income statement of ODO for the period from January 1, 2013 to December 31, 2013 and from January 1, 2014 to April 9, 2014 derived respectively from the unaudited financial statements of ODO prepared in accordance with the measurement and recognition criteria of IFRS, to which certain reclassifications were made to conform to the presentation of the accompanying unaudited pro forma statements of income and from the historical condensed consolidated financial statements of Altice International S.à r.l. as of and for the three month and nine month period ended September 30, 2014.

The pro-forma adjustments pertain to the extraction of the result of Orange Dominicana for the period from April 9, 2014 through September 30, 2014 and adding back the results of the full nine month period from January 1, 2014 through September 30, 2014.

(b) Acquisition of PT Portugal (adjustments related to the Altice perimeter)

In connection with the Transactions, the Group, through its subsidiary, Altice Portugal S.A., contemplates acquiring a 100.0% stake in the PT Portugal Group. Pro-forma adjustments relating to this transaction are reflected below and pertain to the pro-forma adjustments made by Altice International to reflect the impact of the transaction on its accounts.

In order to finance this acquisition, the Group, through its indirect subsidiaries Altice Finco S.A. and Altice Financing S.A. intends to issue the New Loans and Senior and Senior Secured Notes bearing interest at 5.7%, 7.6% and 6.0% respectively. These debts fall due in 2022, 2025 and 2023 respectively. The Company will also issue Mandatory Convertible Notes for a total amount of EUR 2,055 million, which will be fully subscribed by Altice S.A. These notes will bear interest at a rate of 6.4% and will become due in 2025. As per the provisions of IAS 32, the fair value of the coupon payments is characterised as debt and the remainder of the principal amount as equity. Additionally, the Group will acquire and draw on a new revolving credit facility for a total amount of EUR 180 million bearing interest at 3.65%. The Pro forma adjustments relating to the new debt issuance are composed as follows:

- Payment of the purchase price to the vendors as agreed in the sale and purchase agreement.
- Payment of EUR 128.1 million as underwriting and other fees related to the issuance of the new debts.

Pro-forma adjustments of €248.8 million and €331.7 million have been recorded for the nine month periods ended September 30, 2014 and 2013, and the twelve months ended December 31, 2013 respectively to reflect the net change to finance costs on borrowings and non-recurring deal fees, that would have been recorded had the above debt issuance taken place on January 1, 2013.

Actual interest rates at the time of pricing may differ from the indicative rate used herein. In case of a +/- 10 basis points change in the interest rate, the final interest expense adjustment would have an impact of +/- €3.3 million for the twelve months ended December 31, 2013 and +/- EUR 2.5 million for the nine months ended September 30, 2013 and September 30, 2014.

Total equity and liabilities	**(962.3)**	**—**	**(243.5)**	**(1,205.8)**

(a) The net assets acquired of PT Portugal Group as their historical amounts as if the acquisition took place as at December 31, 2013. The value of the equity acquired (EUR (962.3) million) has been computed as the aggregation of (i) the equity of the combined PT Portugal Group as at September 30, 2014 for €962.3 million minus (ii) the existing goodwill recorded in the books of the combined PT Portugal Group prior to its acquisition by Altice International. Thus provisional goodwill of €2,761.4 million has been recorded in the pro-forma statement of financial position.

(b) Provisional goodwill has been determined with regards to the acquisition of PT Portugal, and is calculated as the difference between the consideration transferred to the owners and the estimated acquisition date assumed fair value of the assets and liabilities acquired, as required by IFRS 3, 'Business combinations'. The SPA also includes an earn out due to the vendors in the event that certain pre-determined conditions are agreed in the fifth year following the closing of the transaction. As per the requirements of IFRS 3, this contingent consideration was valued at its fair value, using the probability weighted average fair value method (corresponding to the present value of the future payout, discounted at the weighted average cost of capital (WACC) of the Group and assuming a probability of occurrence for each discreet payout scenario). The following adjustments have been made to reflect the impact of the acquisition on the pro-forma accounts. The cash consideration expected to be paid to the vendors to acquire shares in the new PT Portugal Group, amounting to €1.

(c) Subsequently, the PT Portugal Group will use the proceeds from the new debt and mandatorily convertible notes issuance to reimburse shareholder loans held by the vendors for a total amount of €5,604.0 million. The cash position of the PT Portugal Group has been cancelled as it is assumed that PT will be sold to Altice on a cash free basis. The mandatarily convertible notes have been reflected for in accordance with IAS 32 with an equity and debt position.

(c) Acquisition of OMT

Altice Blue Two S.A.S., an indirectly fully-owned subsidiary of Altice International obtained control of OMT on July 4, 2013 pursuant to a purchase of 77% of its shares. These pro-forma adjustments relate to the historical statement of income of OMT for the period from January 1, 2013 through July 4, 2013 derived from the unaudited financial statements of OMT prepared in accordance with the measurement and recognition criteria of IFRS, to which certain reclassifications were made to conform to the presentation of the accompanying unaudited pro forma statements of income.

(d) Acquisition of Winreason S.A.

Cabovisao, an indirectly fully-owned subsidiary of Altice International obtained control of Winreason on August 8, 2013 pursuant to a purchase of 100% of its shares. These pro-forma adjustments relate to the historical statement of income of ONI for the period from January 1, 2013 through August 8, 2013 derived from the unaudited special-purpose consolidated financial statements of Winreason prepared in accordance with the measurement and recognition criteria of IFRS, to which certain reclassification have been applied to conform to the presentation of the accompanying unaudited pro forma statements of income.

(e) Acquisition of Ma Chaîne Sport

On October 1, 2013, Altice International entered into a share purchase agreement with Altice IV S.A. and Valemi S.A. for the purchase of 100% of the share capital and voting rights of Ma Chaine Sport S.A.S.. These pro- forma adjustments relate to the historical income statement of Ma Chaîne Sport for the period from January 1, 2013 through September 30, 2013 derived from the financial statements of Ma Chaiîne Sport prepared in accordance with the measurement and recognition criteria of French Generally Accepted Accounting Principles (“French GAAP”).

The measurement and recognition criteria of French Generally Accepted Accounting Principles (“French GAAP”) do not permit the capitalisation of costs related to the acquisition of contents for delivery to final customers. Given the exclusive nature of such contents, IFRSs allow the capitalisation and recognition of such costs as intangible assets. Had Ma Chaine Sport adopted the aforementioned measurement and recognition criteria of IFRS, such illustrative adjustments result in a decrease in purchasing and subcontracting services of EUR 4.7 million, in other operating expenses of EUR 1.6 million and an increase in depreciation and amortization of EUR 6.1 million for the year ended December 31, 2013 and a decrease in purchasing and subcontracting services of EUR 4.1 million, in other operating expenses of EUR 1.4 million and an increase in depreciation and amortization of EUR 4.4 million for the nine months ended September 30, 2013.

(f) Acquisition of SportV

On October 1, 2013, Altice International obtained control over SportV S.A. These pro-forma adjustments relate to the historical income statement of SportV for the period from January 1, 2013 through December 31, 2013 derived from the financial statements of SportV prepared in accordance with the measurement and recognition criteria of IFRS, to which certain reclassification have been applied to conform to the presentation of the accompanying unaudited pro forma statements of income.

(g) Acquisition of non-controlling interests

Coditel

(i) On November 29, 2013, Altice International purchased the remaining 40% of the shares and voting rights of Coditel Lux II S.à r.l. it did not hold and refinanced certain Preferred Equity Certificates issued by such entity. The cash consideration for the acquisition on a cash-free and debt-free basis was €82.5 million. Pro-forma adjustments have hence been recorded to give effect to the impact on the non-controlling interests within the unaudited pro forma consolidated statement of income as if such transaction took place on January 1, 2013. Such adjustments represents the reallocation of the net income attributable to non-controlling interests to net income attributable to equity holders of the parent, as a result of the acquisition of the non-controlling interests for an amount of €14.6 million for the nine month period ended September 30, 2013 and €18.7 million for the full year ended

December 31, 2013. Additionally, a reversal of €7.2 million, pertaining to the interests paid on the preferred equity certificates for the period between January 1, 2013 and November 29, 2013, has been reflected in the unaudited pro-forma statement of financial income for the nine months ended September 30, 2013 and the twelve months ended December 31, 2013.

Cabovisao

(ii) On April 23, 2013, Altice International purchased the remaining 40% of the shares and voting rights of Cabovisao. The cash consideration for the acquisition on a cash-free and debt-free basis was €105.1 million. Pro-forma adjustments have hence been recorded to give effect to the impact on the non-controlling interests within the unaudited pro forma consolidated statement of income as if such transaction took place on January 1, 2013. Such adjustments represents the reallocation of the net income attributable to non-controlling interests to net income attributable to equity holders of the parent, as a result of the acquisition of the non-controlling interests for an amount of €2.4 million for the nine months ended September 30, 2013 and twelve months ended December 31, 2013.

Outremer Telecom

(iii) On June 27, 2014, Altice International repurchased the minority interests in Altice Blue Two S.A.S. it did not hold. Pro-forma adjustments have hence been recorded to give effect to the impact on the non-controlling interests within the unaudited pro forma consolidated income statement as if such transaction took place on January 1, 2013. Such adjustments represent the reallocation of the net income attributable to non-controlling interests to net income attributable to equity holders of the parent, as a result of the acquisition of the non-controlling interests for an amount of €2.7 million for the full year ended December 31, 2013 and €2.5 million for the nine months ended September 30, 2013.

(h) Refinancing Transactions

The Pro forma Adjustments relating to the refinancing transactions are composed as follows:

(i) Issuance of Senior and Senior Secured Notes on June 14, 2013 and December 5, 2013

On June 14, 2013 and December 5, 2013, the Group issued Senior and Senior Secured Notes for an amount of EUR 1,505.0 million. The proceeds were used to refinance the following liabilities.

- The repayment of the Cabovisao credit facility on July 2, 2013 for an amount of €202.6 million;
- The purchase of the Coditel Senior Facility on July 2, 2013 for an amount of €42.3 million; and
- The purchase of Orange Dominicana for an amount of €1,034.0 million and of Tricom and Global Interlinks for EUR 299.2 million.
- The payment of transaction fees for a total amount of €7.0 million.

(ii) Use of Term Loan

On June 24, 2013, the Altice International Group secured a senior secured credit facility of EUR795 million. The proceeds were used to acquire ONI together with OMT and the rest was used to refinance the following liabilities:

- The repayment of the Coditel Senior Facility on July 2, 2013 for an amount of €95.7 million;
- The repayment of the ONI credit facility on August 8, 2013 for an amount of €47.3 million; and
- The repayment of the ABO credit facility on July 2, 2013 for an amount of €65.6 million.

(iii) Refinancing of Coditel mezzanine

On December 2, 2014, the Company, through its indirectly held subsidiary, Coditel Holding S.A., exercised a call option held on a mezzanine facility issued by Coditel Holding S.A. The total amount refinanced was €125.7 million, which included accumulated PIK interest and break costs of 6.75% of the nominal amount. This facility was refinanced by drawing on two RCFs currently available to the Group, which will subsequently be refinanced by the Group using debt raised as part of the Transaction.

Pro-forma adjustments of €(6.9) million, €58.7 and €147.9 million have been recorded to reflect the net change to finance costs on borrowings for the nine months ended September 30, 2014 and September 30, 2013 and the year ended December 31, 2013, inclusive of tax effects, that would have been recorded had the above refinancing transactions taken place on January 1, 2013.

(i) Translation of historical financial information denominated in currencies other than Euro.

The historical financial statements of ODO, from which amounts have been derived in preparing the Unaudited Pro Forma Financial Information as of and for the year ended December 31, 2013 and the nine months ended September 30, 2013, have been drawn in Dominican Pesos (“DOP”). The amounts have been translated into Euro (“EUR”), for the purposes of their inclusion within the Unaudited Pro Forma Financial Information, using the following notes

- As of September 30, 2013: DOP1.00 = EUR0.0186

- As of December 31, 2013: DOP1.00 = EUR0.0168

(j) Elimination of intercompany transactions between PT Portugal and Altice International S.à r.l. and its subsidiaries.

  (i) Intercompany transactions between the entities included in the Unaudited Pro Forma Financial Information have not been excluded or eliminated from the Unaudited Pro Forma Financial Information as the amounts were not considered material by the Board of Managers, except for certain transactions between Cabovisao S.A, ONI SGPS and PT Portugal and its subsidiaries that make up the transaction perimeter. These intercompany transactions had a zero net impact that has been recorded in the unaudited pro-forma consolidated statements of income for the nine month periods ended September 30, 2013 and 2014 and for the full year ended December 31, 2013.

  (ii) Intercompany sales between Cabovisao and ONI and PT Portugal have been eliminated for an amount of €17.6 million, €24.3 million and €30.6 million respectively have been eliminated for the nine months ended September 30, 2014 and 2013 and the twelve months ended December 31, 2013.

  (iii) Intercompany operating expenses and purchase and subcontracting services between Cabovisao and ONI and PT Portugal have been eliminated for an amount of €17.6 million, €24.3 million and € 30.6 million respectively have been eliminated for the nine months ended September 30, 2014 and 2013 and the twelve months ended December 31, 2013.

  (iv) The elimination of intercompany transactions between Cabovisao and ONI and PT Portugal relating to trade receivables and payables for €9.0 million that have been recorded in the unaudited pro forma condensed consolidated statement of financial position as at September 30, 2014.

5—Other Information

Other referenced acquisitions and divestitures as disclosed in the "Presentation of Financial Information" have not been reflected in the pro forma adjustments. The other referenced acquisitions and divestitures were not individually or in the aggregate significant to the Company.

The tax effect of the transaction adjustments in the Unaudited Pro Forma Financial Information has been calculated using a theoretical effective tax rate of 38% for companies based in France, 29.22% for companies based in Luxembourg and 23% for companies based in Portugal, for the nine month period ended September 30, 2014.

PT PORTUGAL UNAUDITED COMBINED ADJUSTED FINANCIAL INFORMATION

The unaudited combined adjusted financial information presented below represents PT target assets (as defined below), which includes (1) unaudited combined balance sheet as of September 30, 2014, (2) unaudited combined income and cash flow statements for the nine months ended September 30, 2014 and 2013 and for the year ended December 31, 2013, (3) unaudited selected income and cash flow statement data for the years ended December 31, 2012 and 2011, and (4) selected notes to the main captions of the unaudited combined adjusted balance sheet and income statements as of and for the nine month period ended September 30, 2014.

(*) The payment related to other investment activities of €200 million for the nine months ended September 30, 2014 relates to the subscription of commercial paper of Rio Forte Investments, S.A. ("Rio Forte") on April 15, 2014 and matured on July 15, 2014, which was not repaid by Rio Forte on the respective maturity date. This investment is carved-out from the unaudited balance sheet as of September 30, 2014 presented in the section "PT Portugal Unaudited Combined Adjusted Financial Information", as it is out of the scope of the transaction perimeter.

Basis of Preparation

On December 9, 2014, Altice, S.A. entered into an agreement to acquire from Oi, S.A. 100% of the issued share capital of PT Portugal, SGPS, S.A., (The "Transaction") and accordingly, the PT Portugal Group and its assets ("PT Portugal Group"). Prior to the consummation of the sale and as a condition precedent to its closing, certain corporate reorganizations (the "Carve Out Reorganization") will be required to take place in order to delineate the operations to be transferred as well as to separate PT Portugal's investments, in Africatel GmbH & Co. KG and Timor Telecom S.A. and the investments held by PT Portugal in Rio Forte Investments S.A., which will not be included in the Transaction, as well as all or part of PT Portugal's indebtedness. The PT Portugal Group comprises the entities presented in the table below, each of which will be wholly owned subsidiaries of PT Portugal following the completion of the Carve Out Reorganization. The table below also includes the entities in which the PT Portugal Group will own an ownership interest of less than 50%.

ENTITIES WITHIN THE TRANSACTION PERIMETER AS OF SEPTEMBER 30, 2014

This unaudited combined adjusted financial information has been prepared to present the financial information of the target perimeter companies for the applicable periods.

The combined financial information presented above represents an aggregation of the historical financial information extracted from the accounting records of the PT Portugal Group, basically adjusted for (1) consolidation adjustments and (2) adjustments to remove from the balance sheet and income statements the effects related to the companies and other assets that will not be part of the transaction described above.

In the following paragraphs we will describe in more detail the basis of presentation of each piece of the unaudited combined adjusted financial information presented above.

The combined balance sheet as of September 30, 2014 reflects the aggregation of the following:

1. *PTC Standalone and MEO Standalone*: Unaudited condensed balance sheets of PTC and Meo, S.A. prepared in accordance with Portuguese GAAP ("PGAAP"), which for purposes of this combined financial information were presented under the same format as that used for financial information published by Portugal Telecom SGPS, S.A. (the "international format" or "PT format"), reflecting certain reclassifications as compared to the

balance sheet format presented for PGAAP purposes. Under this PT format, EBITDA is defined as income before financials and income taxes plus post retirement benefits costs, depreciation and amortization expenses, work force reduction program costs, net losses/(gains) on sales disposals of fixed assets and net other costs (gains).

2. *Contribution from other entities*: Unaudited financial information (assets and liabilities) of the other companies that will be included in the target perimeter. These other companies' financial information include the investments of PT Portugal and its subsidiaries in the net assets of PT Finance, PT Investimentos, PT Participações (companies that are excluded from the target perimeter) and in Rio Forte Investments, S.A., which are eliminated in the column "Assets carve-out/in to adjust the perimeter"—see point 5 below. This financial information have been extracted from the accounting records of each company included in the transaction perimeter, adjusted for intercompany eliminations;

3. *Eliminations and adjustments between PTC and MEO*: Eliminations of the intercompany balances between PTC and MEO and the financial investment recorded by PTC relating to MEO, a wholly owned subsidiary of PTC, since under PGAAP PTC accounts for the investment in MEO by the equity method;

4. *Eliminations and adjustments between PTC/MEO and other PT Target Businesses* include:

   (a) the elimination of intercompany balances between both PTC and MEO and the other subsidiaries of the PT Portugal Group, which relate mainly to trade payables due by PTC and MEO to support companies, intercompany debt and related accrued interest due by PTC to PT Portugal, and income tax liabilities due by PTC and MEO to PT Portugal in connection with the tax consolidation regime adopted by PT Portugal. Income tax receivables from or payables to the Portuguese State in relation to the tax consolidation regime are recorded in the standalone financial statements of PT Portugal, currently the parent company of the tax consolidation group, while its subsidiaries also included in this tax consolidation regime, including PTC and MEO, record its income tax receivables or payables as intercompany receivables from or payables to PT Portugal, which are therefore eliminated in the consolidation process and also in this combination process;

   (b) the elimination of the financial investments held by PTC and Meo S.A. in the other subsidiaries of the target perimeter; and

   (c) the elimination of goodwill generated following internal sale and purchase agreements settled between companies within the PT Portugal Group;

5. *Assets carve-out/in to adjust the perimeter:* The elimination and incorporation of certain assets in order to adjust the unaudited combined balance sheet to reflect only the assets and liabilities of the target companies; these adjustments reflect (i) the carve-out of the financial investments in PT Finance BV, S.A. (a finance vehicle) and PT Investimentos (holding company for foreign investments) in the amounts of €235.4 million and €6.9 million, respectively, which were recorded at PT Portugal standalone financial statements, (ii) the carve-out of the financial investment in PT Participações (holding company that holds the investments in Africa and Timor) in the amount of €1,533.8 million, which was recorded at PT Móveis, (iii) the elimination of the Rio Forte investment (commercial paper issued by Rio Forte) recorded at PT Portugal, amounting to € 200.0 million, and (iv) the incorporation of the financial investments in Hungaro Digitel and Siresp, in the amounts of €2.5 million and €5.7 million, respectively, entities that are included in the target perimeter companies but the investments of which were recorded at PT Participações, an entity outside the target perimeter companies.

The PT Portugal unaudited combined income and cash flow statements for the nine months ended September 30, 2014 and 2013 and the years ended December 31, 2013, 2012 and 2011 reflect the aggregation of the following:

1. *PTC Standalone and MEO Standalone*: Unaudited income and cash flow statements of PTC and Meo, S.A. for the nine months ended September 30, 2014 and 2013 and audited condensed income and cash flow statements of PTC and Meo, S.A. for the years ended December 31, 2013, 2012 and 2011 . As already explained above in relation to the balance sheet, the income statements are also prepared in accordance with Portuguese GAAP but for purposes of this combined financial information of the PT Portugal Group were presented under an PT format, reflecting certain reclassifications as compared to the profit and loss format presented for PGAAP purposes. These reclassifications primarily reflect certain captions that under Portuguese GAAP are included as operating items while under the PT format are presented as operating item but not included on the computation of EBITDA (as defined above), namely "Post retirement benefits", "Work force reduction program costs", "Losses/(gains) on sales disposals of fixed assets, net", "Non-recurring items" and "Equity in earnings of associated companies". It should also be mentioned that prior to 2014, the parent company of the tax consolidation regime was Portugal Telecom and whenever entities included in this tax consolidation group, such

as PTC and MEO, presented tax losses, the related income tax gain was not recorded in that entity but in the parent company of the tax consolidation group, which prior to 2014 was Portugal Telecom, an entity not included in the transaction perimeter. For the years ended December 31, 2013, 2012 and 2011, the income tax gain recorded by Portugal Telecom (and thus not included in this combined profit and loss statement) relating to PTC's tax losses amounted to €90.8 million, €170.1 million and €217.0 million, respectively, since deferred tax assets on tax losses are recorded directly by the parent company of the tax consolidation group.

2. *Contribution from other entities*: Unaudited aggregation of financial information (revenues and costs) of the other subsidiaries included in the target perimeter, which was presented net of intercompany eliminations;

3. *Eliminations and adjustments between PTC and MEO*: eliminations of the intercompany revenues, costs, cash receipts and cash payments between PTC and Meo, S.A. and also PTC's equity in earnings of Meo, S.A.;

4. *Eliminations and adjustments between PTC/MEO and other PT Target Businesses* include:

   (a) the elimination of intercompany revenues, costs, cash receipts and cash payments between PTC and/or MEO and the other entities within the PT Portugal Group, which relate mainly to operating costs incurred by PTC and/or MEO with other companies and interest expenses in connection with intercompany debt due from PTC to PT Portugal;

   (b) the elimination of PTC's and MEO's equity in earnings of the other subsidiaries of the PT Portugal Group; and

   (c) IFRS adjustments related to the impact of the adoption of the revised version of IAS 19 in the combined adjusted income statement for the year ended December 31, 2011, because PTC's unaudited standalone financial statements for that year did not yet reflect the adoption of this revised standard; these IFRS adjustments are included because as PT Portugal's consolidated financial statements are prepared in accordance with IFRS, this combined financial information was also prepared in accordance with IFRS, despite PTC and MEO's financial statements being prepared under PGAAP;

5. *Carve-out/in adjustments:* The elimination and inclusion adjustments of the gains and costs incurred with the companies that have been excluded and included in the Transaction, reflecting the reversal of the gains and losses resulting from either the equity method of accounting in or the disposal of entities that are outside the target perimeter, and the inclusion of the gains and losses resulting from the equity method of accounting in entities included in the target perimeter. These adjustments primarily include (1) the equity in the earnings or losses of PT Finance and PT Investimentos, both of which recorded at PT Portugal, (2) the equity in the earnings or losses of Bratel BV (an entity that is not included in the transaction perimeter that held the investments in Oi and Contax) and PT Participações, both of which recorded at PT Móveis, and (3) the gains or losses on the disposal of the investments in CTM and UOL, which were recorded by PT Comunicações and PT Brasil in 2013 and 2011, respectively.

The table below presents a summary of the effects on the combined adjusted balance sheet as of September 30, 2014 resulting from the carve-out and carve-in adjustments:

Adjustments to the combined adjusted balance sheet as of September 30, 2014	**Investments in associated companies**	**Other current assets**	**Total carve-out/in adjustments**
		(€, in millions)	
Carve-out of PT Participações	(1,533.8)	—	**(1,533.8)**
Carve-out of PT Finance	(235.4)	—	**(235.4)**
Carve-out of PT Investimentos	(6.9)	—	**(6.9)**
Carve-out of Carrigans and CV TEL	(0.0)	—	**(0.0)**
Carve-out of Rio Forte	—	(200.0)	**(200.0)**
Acquisition of Hungaro Digitel	2.5	—	**2.5**
Acquisition of Siresp	5.7	—	**5.7**
	(1,767.9)	**(200.0)**	**(1,967.9)**

The table below presents a summary of the effects on the combined adjusted income statements for the nine months ended September 30, 2014 and 2013 and the years ended December 31, 2013, 2012 and 2011 resulting from (i) the elimination of the gains and losses recorded by perimeter entities in connection with the equity method of accounting in or the disposal of entities that are outside the target perimeter and (2) the inclusion of gains and losses recorded by entities outside perimeter that relate to the equity method of accounting in entities included in the target perimeter:

Adjustments to the combined adjusted income statements	Years ended December 31, 2011	2012	Nine months ended September 30, 2013	2013	2014
			(€, in millions)		
Reversal of equity accounting over entites outside perimeter					
PT Participações (i)	—	—	—	—	17.9
PT Finance (i)	—	—	—	—	14.8
PT Investimentos (i)	—	—	—	—	(2.2)
Carrigans and CV TEL	0.1	0.0	0.0	(0.0)	(0.0)
Bratel BV (ii)	37.9	2.4	(141.2)	(76.0)	25.2

Sportinveste (vii)	(0.1)	(2.3)	0.0	0.1	—
Yunit (vii)	0.0	(0.2)	(0.2)	(0.1)	—
Foreign currency losses recycled to net income by PT Móveis upon the disposal of Bratel BV (viii)	—	—	—	—	949.9
Loss recorded by PT Móveis relating to the investment in PT Participações (ix)	—	—	—	—	68.7
Total impact in net income	**38.8**	**(0.6)**	**(174.8)**	**(107.4)**	**1,076.7**

(i) Represents the equity accounting in losses (gains) of these entities recorded by PT Móveis (investment in PT Participações) and PT Portugal (PT Finance and PT Investimentos) as from May 2014, which were excluded from the combined income statement since these investments are outside the target perimeter. PT Móveis and PT Portugal acquired these investments in the beginning of May 2014.

(ii) Represents the equity accounting in losses (gains) of these entities recorded by PT Móveis (investment in Bratel BV, entity that held the investment in Oi) and PT Brasil (investments in Contax and CTX). The investments in Bratel BV, Contax and CTX were disposed to Portugal Telecom, SGPS, S.A. in the beginning of May 2014 and therefore, in relation to the nine months ended September 2014, these captions correspond only to the losses for the four months period ended April 30, 2014.

(iii) These captions correspond to gains recorded by PTC regarding its 3% interest in Companhia de Telecomunicações de Macao ("CTM"), including the gains through the equity accounting method until the end of 2012 and the capital gain recorded in 2013 upon the disposal of this investment.

(iv) This caption corresponds to the losses recorded by PT Brasil through the equity method of accounting over Mobitel, Portugal Telecom, SGPS, S.A. group's call centre operation in Brasil prior to the disposal of Vivo. During the year 2011, PT Brasil subscribed a share capital increase in Contax (call centre business rendering services to Oi) through the contribution in kind of this investment.

(v) This caption corresponds to the capital gain recorded by PT Brasil in connection with the disposal of this investment in January 2011.

(vi) These captions correspond to the losses (gains) recorded by PT Participações (outside perimeter) over these entities through the equity method of accounting, since both Hungaro Digitel and Siresp are included in the target perimeter. As mentioned above, these entities will be acquired by PT Móveis from PT Participações prior to the closing of the acquisition of PT Portugal by Altice.

(vii) These captions correspond to the losses (gains) recorded by Portugal Telecom SGPS (outside perimeter) over these entities through the equity method of accounting, since both Sportinveste and Yunit are included in the target perimeter. These entities were disposed by Portugal Telecom SGPS to PTC in the end of 2013.

(viii) This caption corresponds to the net loss recorded by PT Móveis in connection with the sale of Bratel BV to Portugal Telecom SGPS, including (1) a capital gain of €50.0 million corresponding to the difference between the sale price and the carrying value of the investment, and (2) foreign currency losses of €1,000.0 million relating to the depreciation of the Brazilian Real against the Euro since the acquisition of the investment in Oi in March 2011, which were recycled to net income upon the disposal of the investment. This net loss was excluded from the combined adjusted income statement as it relates to an entity outside the perimeter.

(ix) This caption corresponds to a loss recorded by PT Móveis in connection with the acquisition of PT Participações in order to adjust the carrying value of its investments to the correspondent recoverable amounts. This loss was also excluded from the combined profit and loss statement as it relates to entities outside the perimeter.

Selected Notes to the Combined Adjusted Balance Sheet and Income Statements

Net Assets	**642.5**	**319.8**	**962.3**

The transactions referred to above consisted basically of the following corporate transactions to be completed prior to the execution of the business combination:

(a) repayment of debt due by CV TEL, B.V. (entity not included in the transaction perimeter) to PT Móveis amounting to €3,401.0 million, recorded in the balance sheet under the caption "*Investments in intercompany loans*", through the reduction of a portion of the "*Medium and long-term intercompany debt*" due to Portugal Telecom International Finance B.V. ("PTI Finance", an entity not included in the transaction perimeter);

(b) a dividend distribution of €44.0 million from PT Participações to PT Móveis and with these proceeds PT Móveis shall acquire the investments in Hungaro Digitel, PLC ("Hungaro Digitel") and SIRESP, Gestão de Redes Digitais de Segurança e Emergência, S.A. ("SIRESP") (both entities are included in the target assets) previously held by PT Participações, SGPS, S.A. ("PT Participações", an entity not included in the transaction perimeter), for total amounts of €34.0 million and €10.0 million, respectively;

(c) sale by PT Móveis to Oi of its investments in shares of PT Participações, CV TEL and Carrigans Finance S.A.R.L ("Carrigans") (all three entities are not included in the target assets) for a total amount of €1,549.0 million, prior to which PT Portugal shall reduce its share capital in favor of Oi through the assignment of a receivable from PT Móveis amounting to €1,549.0 million that shall be used to settle the above mentioned sale. These transactions do not produce an impact in the unaudited combined pro forma balance sheet because these investments had already been eliminated in the combined adjusted balance sheet;

(d) sale by PT Portugal to Oi of its investment in shares of PTI Finance for a total amount of €255.0 million, prior to which PT Portugal shall reduce its share capital in favor of Oi by the same amount; this transaction did not produce an impact in the combined pro forma balance sheet because this investment had already been eliminated in the unaudited combined adjusted balance sheet;

(e) transfer by PT Portugal of its existing €200.0 million Rio Forte receivable to PTI Finance by offsetting against €200.0 million of debt due from PT Portugal to PTI Finance; this transaction does produce an impact in the combined pro forma balance sheet because the Rio Forte receivable had already been eliminated in the combined adjusted balance sheet;

(f) sale by PT Investimentos Internacionais, Consultoria Internacional, S.A. ("PT Investimentos", an entity not included in the transaction perimeter) of its shares in Taguspark—Sociedade de Promoção e Desenvolvimento do Parque de Ciência e Tecnologia da Área de Lisboa, S.A. ("Tagusparque") and APOR—Agência para a Modernização do Porto, S.A. ("APOR") to PT Portugal for a total amount of €3.0 million, by offsetting a portion of the €5.0 million debt due from PT Investimentos to PT Portugal, with the remaining portion of the €2.0 million debt due from PT Investimentos being transferred from PT Portugal to PTI Finance BV by offsetting a portion of the debt due by PT Portugal to PTI Finance BV;

(g) sale by PT Portugal to Oi of its investment in shares of PT Investimentos for €7.0 million, prior to which PT Portugal shall reduce its share capital in favor of Oi by the same amount; this transaction did not produce an impact in the combined pro forma balance sheet because this investment had already been carve-out in the combined adjusted balance sheet;

(h) Transfer to Oi of PT Portugal's EMTN Notes due to third-party lenders, totalling €404.5 million (principal of €404.0 million and €4.5 million of accrued interest), as a result of which this debt is replaced at PT Portugal by an intercompany debt to Oi of the same amount;

(i) Capitalization of a €321 million portion of New Loan held by Oi against PT Portugal into the share capital of PT Portugal in exchange for shares issued by the latter, as a result of which the loan due by PT Portugal to Oi is decreased from €404 million to € 83 million; and

(j) A loan granted by PT Móveis to Siresp amounting to €1.2 million, amount that was used by Siresp to repay its debt due to PT Participações of the same amount.

The table below presents a summary of the effects on the balance sheet as of September 30, 2014 resulting from the corporate transactions to be completed prior to the closing of the acquisition of PT Portugal by Altice:

Adjustments to the combined proforma balance sheet as of September 30, 2014	Notes above	Cash and cash equivalents	Investments in group and associated	Investments in intercompany loans	Other investments	Medium and long term debt	Total corporate transactions
				(€, in millions)

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS OF THE ALTICE INTERNATIONAL GROUP

The following discussion and analysis is intended to assist in providing an understanding of the Altice International Group's financial condition, changes in financial condition and results of operations and should be read together with the Historical Consolidated Financial Information, with the Pro Forma Financial Information and the Illustrative Aggregated Selected Financial Information, including the accompanying notes, included elsewhere in these Listing Particulars. Some of the information in this discussion and analysis includes forward-looking statements that involve risks and uncertainties. See "Forward-looking statements" and "Risk Factors" for a discussion of important factors to be evaluated in connection with an investment in the Notes.

In this section, we use "pro forma basis" and "aggregated basis" or similar terms to describe financial information derived from the Pro Forma Financial Information or the Illustrative Aggregated Selected Financial Information as the case may be. When used in this section, the terms "we", "our", "Altice International", "Company", the "Group", and "us" refer to the business constituting the Altice International Group (excluding PT Portugal, and other than for the purposes of comparing the results of operations and capital expenditures for the nine months ended September 30, 2014 versus the nine months ended September 30, 2013, ODO) as of the date of these Listing Particulars even though we may not have owned such business for the entire duration of the periods presented. Since the Issuer did not consolidate the results of ODO for any periods prior to April 9, 2014 and only commenced presenting the Dominican Republic as a separate geographic segment after such date, the results of ODO for the years ended December 31, 2013, 2013 and 2011 have been discussed separately in these Listing Particulars. See "Management's Discussion and Analysis or Financial Condition and Results of Operations of ODO" for the Years Ended December 31, 2013, 2012 and 2011.

In the subsections "—Year Ended December 31, 2013 compared to the Year Ended December 31, 2012" and "—Capital Expenditures—Capital expenditures on a Pro Forma Consolidated Basis and Aggregated Basis—Year Ended December 31, 2013 compared to the Year Ended December 31, 2012" below, we compare certain financial information as of and for the year ended December 31, 2012 derived from the Illustrative Aggregated Selected Financial Information with the corresponding financial information as of and for the year ended December 31, 2013 derived from the Pre-PT/ODO Transactions Pro Forma Financial Information. While we do not present any pro forma financial information for the year ended December 31, 2012, the adjustments used to prepare the selected information included in the Illustrative Aggregated Selected Financial Information for the year ended December 31, 2012 are substantially similar to the adjustments used to prepare the corresponding information in the Pre-PT/ODO Transactions Pro Forma Financial Information for the year ended December 31, 2013 and therefore a comparison between the Illustrative Aggregated Selected Financial Information for the year ended December 31, 2012 and the corresponding information in the Pre-PT/ODO Transactions Pro Forma Financial Information for the year ended December 31, 2013 is on a like-for-like basis for items above EBITDA. However, we do not present any Illustrative Aggregated Selected Financial Information below the line item "operating income before depreciation, amortization, restructuring costs and other expenses", or EBITDA, and therefore do not compare any such financial information appearing in the Pre-PT/ODO Transactions Pro Forma Financial Information. In addition, the Illustrative Aggregated Selected Financial Information does not provide for certain pro forma adjustments included in the Pre-PT/ODO Transactions Pro Forma Financial Information which affect the line items in the pro forma income statement below "operating income before depreciation and amortization", or EBITDA.

Basis of Presentation

This discussion and analysis for each of the periods presented is based on the financial information derived from the unaudited condensed consolidated financial statements of Altice International as of and for the nine months ended September 30, 2014 and 2013, and the audited consolidated financial statements of Altice International as of and for the years ended December 31, 2013 and 2012 (including comparative numbers as of and for the year ended December 31, 2011) (the "Historical Consolidated Financial Information of Altice International").

Altice International is a holding company which, since its formation in 2008, has from time to time made significant equity investments in a number of cable and telecommunication businesses in various jurisdictions. The following is an overview of key investments and disposals made by Altice International since 2010, which have had a significant impact on the Historical Consolidated Financial Information.

During the year ended December 31, 2011, Altice International made the following acquisitions that fundamentally changed the business undertaking: (i) in the first quarter of 2011, Altice International increased its ownership in HOT-Telecommunication Systems Ltd. thereby acquiring a majority equity ownership in the HOT Telecom Group (as a result of which the financial information of the HOT Telecom Group is consolidated in the Historical Consolidated Financial Information of Altice International with effect from March 16, 2011). In addition, in the fourth quarter of 2011, MIRS Communications Ltd. was acquired by the HOT Telecom Group from a subsidiary of Altice International and renamed HOT Mobile Ltd. The HOT Telecom Group and HOT Mobile Ltd. are collectively referred to herein as the

"HOT Group"; and (ii) in the second quarter of 2011, Altice International acquired a controlling equity interest in Coditel Brabant S.p.r.l, a company with cable television operations in Belgium and Coditel S.à r.l., a company with cable television operations in Luxembourg, in each case, through an intermediate holding company, Coditel Holding S.A. (the financial information of which is consolidated in the Historical Consolidated Financial Information of Altice International with effect from July 1, 2011). In addition, Altice International sold 5% of its equity interest in MIRS Communications Limited during the course of 2011.

The year ended December 31, 2012 was marked by the following two significant acquisitions by Altice International: (i) in the first quarter of 2012, Altice International acquired approximately 60% of the equity interests in Cabovisão, a Portuguese telecommunications company (the financial information of which is consolidated in the Historical Consolidated Financial Information of Altice International with effect from February 29, 2012); and (ii) in the fourth quarter of 2012, Altice International completed the take-private transaction of the HOT Group whereby it acquired substantially all of the equity interests in HOT-Telecommunication Systems LTD. it did not previously own.

Altice International added to its portfolio of holdings in 2013 with the following acquisitions: (i) in the first quarter of 2013, Altice International acquired substantially all of the equity interests in Cabovisão that it did not already own; (ii) in the third quarter of 2013, Altice International acquired a controlling equity interest in Groupe Outremer Telecom, a telecommunications company with operations in the French Overseas Territories (the financial information of which is consolidated in the Historical Consolidated Financial Information of Altice International with effect from July 5, 2013); and (iii) in the third quarter of 2013, Altice International (through its subsidiary Cabovisão) acquired 100% of the equity interests in Winreason, the owner of the Portuguese telecommunications operator holding company ONI S.G.P.S. and its subsidiaries (the financial information of which is consolidated in the Historical Consolidated Financial Information of Altice International with effect from August 8, 2013) and (iv) in November 2013, Altice International acquired further equity interests in Coditel pursuant to the 2013 Coditel Acquisition. In addition, in 2013, we disposed of our interests in Valvision and acquired the content subsidiaries, Ma Chaîne Sport, SportV, Tricom, Mobius and ODO. In addition, during 2013 Altice International initiated its equity investment in Wananchi ("Wananchi"), a Kenyan cable operator.

In 2014, Altice International consummated the acquisitions of (i) Tricom (the financial information of which is consolidated in the Historical Consolidated Financial Information of Altice International with effect from March 12, 2014), (ii) ODO (the financial information of which is consolidated in the Historical Consolidated Financial Information of Altice International with effect from April 9, 2014) and (iii) Mobius (the financial information of which is consolidated in the Historical Consolidated Financial Information of Altice International with effect from January 1, 2014). On December 9, 2014, we entered into an agreement with Oi S.A.to purchase 100% of the issued share capital of PT Portugal. In addition, in connection with the acquisition of SFR by Numericable Group (which is indirectly controlled by our parent Altice S.A., and therefore an affiliate of the Group), we have entered into a commitment agreement with the French Competition Authority to dispose of our mobile network assets in Mayotte and La Réunion (which are part of our Group's business in the French Overseas Territories and which in aggregate contributed €10 million to aggregated and pro forma EBITDA for the fiscal year ended 2013.). If this disposal is not completed by mid-2015, we are committed to appoint an independent agent (who must be approved by the French Competition Authority) to complete such disposal. Further, we have undertaken to ensure that such mobile assets in La Réunion and in Mayotte are managed independently from the other activities of Numericable Group (including those of SFR) prior to such disposal. We expect that the disposal of the mobile network assets of OMT in Mayotte and La Réunion will reduce the overall leverage of the Group.

As a result of the series of these significant acquisitions that have been consummated by Altice International since 2011, and the intra-year timing of such acquisitions, the Historical Consolidated Financial Information of Altice International does not consolidate the results of operations of the entire business undertaking of the Altice International Group as it existed as of September 30, 2014 for any of the periods presented and the comparability of the Historical Consolidated Financial Information over each of the periods presented may be significantly limited. Therefore, in order to facilitate an understanding of the Altice International Group's results of operations and financial condition, this discussion and analysis is being supplemented by the following information:

For the nine months ended September 30, 2014 and the nine months ended September 30, 2013

(i) financial information derived from the unaudited pro forma consolidated interim financial information of Altice International for each of the nine-months periods ended September 30, 2013 and 2014, giving effect to each of the significant acquisitions described above (but without giving effect to the PT Portugal Acquisition, the disposal of our mobile network assets in Mayotte and La Réunion which we have committed to undertake and, except as described below, without giving pro forma effect to the Tricom Acquisition or the Mobius Acquisition) (the "Pre-PT Transaction Pro Forma Financial Information") ;

For the years ended December 31, 2013, 2012 and 2011

(ii) financial information derived from the unaudited pro forma consolidated financial statements of Altice International for the year ended December 31, 2013, giving effect to each of the significant acquisitions described above (but without giving effect to the PT Portugal Acquisition, the ODO Acquisition, the Tricom Acquisition, the Mobius Acquisition or the disposal of our mobile network assets in Mayotte and La Réunion which we have committed to undertake) (the "Pre-PT/ODO Transactions Pro Forma Financial Information" and, together with the "Pre-PT Transaction Pro Forma Financial Information", the "Pro Forma Financial Information"); and

(iii) financial information derived from the Illustrative Aggregated Selected Financial Information as of and for the years ended December 31, 2011 and 2012 (the "Illustrative Aggregated Selected Financial Information"), which aggregates financial information of each of the business undertakings the acquisition of which was consummated by Altice International prior to December 31, 2013 (but does not include the financial information of PT Portugal, ODO, Tricom or Mobius).

For further details regarding the basis of presentation of the Pro Forma Financial Information and the Illustrative Aggregated Selected Financial Information, please see basis of preparation to the Pro Forma Financial Information and the Illustrative Aggregated Selected Financial Information, respectively, included elsewhere in these Listing Particulars.

With effect from March 12, 2014, and January 1, 2014, respectively, the financial information of Tricom and Mobius have been consolidated in the Historical Consolidated Financial Information of Altice International. As a result, the Pro Forma Financial Information also consolidates the financial information of Tricom and Mobius from March 12, 2014 and January 1, 2014, respectively, but does not give pro forma effect to the Mobius Acquisition or the Tricom Acquisition for any other periods. The Pro Forma Financial Information and the Illustrative Aggregated Selected Financial Information also includes the results of operations of Valvision even though the Altice International Group disposed of its interests in Valvision to the Numericable Group on June 27, 2013. In each of the years ended December 31, 2013, 2012 and 2011, respectively, Valvision contributed €1.3 million, €2.5 million and €2.6 million to pro forma revenues and €0.5 million, €0.9 million and €0.9 million to pro forma EBITDA. In the nine months ended September 30, 2013, Valvision contributed €1.3 million to pro forma revenues and €0.5 million to pro forma EBITDA.

As we control Coditel Holding through which we conduct our operations in Belgium and Luxembourg, we consolidate 100% of their revenue and expenses in our consolidated income statements despite the fact that third parties own or owned significant interests in this entity. The non-controlling owners' interests in the operating results of Coditel Holding in the Historical Consolidated Financial Information and the Pro Forma Financial Information are reflected in the line item "profit or loss attributable to non-controlling interests" in the relevant statements of income. However, since we do not present any Illustrative Aggregated Selected Financial Information below the line item "operating income before depreciation and amortization", or EBITDA, the non-controlling interests in the operating results of Coditel Holding are not reflected anywhere in the Illustrative Aggregated Selected Financial Information. Such non-controlling interests may be significant. The Pro Forma Financial Information and the Illustrative Aggregated Selected Financial Information have not been prepared in accordance with IFRS and are unaudited.

Geographic Segments

We have historically discussed the results of operations of our businesses based on the following geographic segments: Israel (which includes HOT and HOT Mobile); Belgium and Luxembourg (which includes Coditel); Portugal (which includes Cabovisao and ONI); the French Overseas Territories (which includes Outremer and Le Cable) and Others (which include our B2B telecommunications solutions business and datacenter operations in Switzerland (Green and Green Datacenter), our datacenter operations in France (Auberimmo) and our content production and distribution businesses in France and Luxembourg (Ma Chaîne Sport and SportV). Following the acquisition of ODO in April 2014, we have added the Dominican Republic as a new geographic segment for the purposes of the discussion of our results for the nine months ended September 30, 2014 and the comparative period in 2013 (but not for any prior period). Currently, the Dominican Republic segment only reflects the results of ODO. We also acquired Tricom in the Dominican Republic in March 2014. The result of Tricom have been included in the Others segment with effect from March 12, 2014. Following the acquisition of Mobius, with effect from January 1, 2014, Mobius has been included in the French Overseas Territories segment.

Key Factors Affecting Our Business

Our operations and the operating metrics discussed below have been, and may continue to be, affected by certain key factors as well as certain historical events and actions. The key factors affecting the ordinary course of our business and our results of operations include, among others, network upgrades, including the roll-out of our UMTS network in Israel and the concurrent phase-out of the old iDEN technology, competition, acquisitions and integration of acquired businesses, macro-economic and political risks in the areas where we operate, pricing, our cost structure, churn and the introduction of new products and services, including multiple-play services. For further discussions of the factors affecting our results of operations, see "*Risk Factors*".

Acquisitions and Integration of Businesses

Since our formation in 2008, we have from time to time made significant direct and indirect equity investments in a number of cable and telecommunication businesses in various jurisdictions. Due to the significant nature of certain of these acquisitions, the comparability of our results of operations based on the Historical Consolidated Financial Information is limited. Our revenues and EBITDA increased from €784.2 million and €297.8 million in the year ended December 31, 2011 to €1,286.8 million and €518.8 million in the year ended December 31, 2013, mainly as a result of the impact of such acquisitions. See "*—Basis of Presentation*". We plan to continue to evaluate value-enhancing acquisition opportunities in the cable and telecommunication sector with the aim of generating strong cash flow and operational synergies.

In general, following any acquisition, our results of operations are impacted by the results of the newly acquired business, debt incurred to acquire the business and expenditures made to integrate the newly acquired business into the Altice International Group. When seeking to integrate and improve a newly acquired business, we look to several key areas: (i) reviewing current products and prices and improving operational processes and cost structure to achieve satisfactory operating margins; (ii) implementing cable and mobile network upgrades to bring the acquired business in line with our Group-wide standards; (iii) researching ways to create synergies and benefit from economies of scale including with respect to customer equipment such as set- top boxes and outsourcing of certain services; (iv) sharing knowledge and experience and implementing Group-wide best practices; and (v) leveraging our ability to raise financing, including in the international capital markets. Many of these integration measures require expenditure by us. In the year ended December 31, 2013 and the nine months ended September 30, 2014, respectively, we incurred restructuring and other non-recurring costs of €76.3 million and €58.5 million, which primarily include costs with respect to renegotiations or termination of contractual arrangements, employee redundancies, fees paid to external counsel and other administrative expenses related to re-organization of existing or newly acquired businesses. In addition, we generally record goodwill in connection with such acquisitions. As of September 30, 2014, the goodwill recorded on our balance sheet amounted to €2,050 million. Goodwill is subject to impairment reviews in accordance with IFRS and any impairment charge on goodwill would have a negative impact on operating profit/net operating income.

Network Upgrades

Our ability to provide new or enhanced cable-based services, including HDTV and VoD television services, broadband internet network access at increasing speeds and fixed-line telephony services to additional subscribers depends in part on our ability to upgrade our cable networks by extending the fiber portion of our network, reducing the number of nodes per home passed and upgrading technical components of our network. During each of 2012 and 2013, we deployed fiber on and upgraded a substantial part of our cable networks. As of September 30, 2014, our networks, on a blended basis, are 99.5% Docsis 3.0-enabled, which allows us to offer our customers high broadband internet access speeds and better HDTV services across our regions, excluding the Dominican Republic. For the nine months ended September 30, 2014 and for the year ended December 31, 2013, on a pro forma basis, we invested €53.2 million and €57.5 million, respectively, and for the year ended December 31, 2011 and 2012, on an aggregated basis, we invested €58.1 million and €76.8 million, respectively, in cable network and construction related capital expenditures. We continue to evaluate the need to upgrade our networks for advancements in technologies such as Docsis 3.1 and for the deployment of additional fiber on an ongoing basis.

In May 2012, we launched our UMTS network in Israel, which allows us to offer 3G mobile services to our customers in Israel under the "HOT Mobile" brand. Under the terms of our license, among other things, we have committed to provide UMTS network coverage to 90% of the Israeli population and inhabited territory by 2018. Our network already extends to approximately 56% of the inhabited territory of Israel. For the nine months ended September 30, 2014 and for the year ended December 31, 2013, we invested €22.8 million and €83.8 million, respectively, in capital expenditures in our mobile business in Israel, of which most related to the build out of our UMTS network (and if we are successful, in connection with the tender for LTE frequencies built on our 4G LTE network). In November 2013 we entered into the Network Sharing Agreement with Partner pursuant to which HOT Mobile and Partner will own equal shares of a newly formed limited partnership, which shall hold, develop and operate an advanced shared mobile network for both companies. The Network Sharing Agreement will enable HOT Mobile and Partner to share antennas and frequencies and facilitate optimum utilization of the spectrum. Accordingly, we expect that the Network Sharing Agreement will optimize the amount of capital expenditures we incur in relation to the build-out of our UMTS network. The Network Sharing Agreement has received approval from the Israeli Antitrust Authority (subject to certain conditions) but remains subject to final approval from the Israeli Ministry of Communications and any required agreement or regulation. See "*Description of Our Business—Material Contracts—Mobile Network Sharing Agreement with Partner in Israel*."

In Israel, on July 2, 2014, the Ministry of Communications published a tender for a mobile phone license for the provision of advanced services using 4G-LTE technology, through which a total of eight frequency bands in the area of 1,800 MHz will be allocated. The tender conditions clarified that a licensee may enter into a network sharing agreement with another licensee subject to certain conditions, as a result of which HOT Mobile updated its request for approval by the Ministry of Communications of the Network Sharing Agreement with Partner. On November 18, 2014, HOT Mobile submitted its offer in response to the tender. On January 12, 2015, the Israeli Ministry of Communications informed HOT Mobile that based on the results of the tender it would be awarded a frequency bandwidth of 2X5MHz in the 1.8 GHz spectrum, for a license fee of NIS 34.5 million (up to half of which may be paid by way of provision of a bank guarantee, which may be refunded, in whole or in part, upon HOT Mobile reaching certain market share milestones). The tender results will be brought before the Minister of Communications for approval. It is also expected that ARCEP will initiate an application process to award spectrum for the provision of LTE mobile telephony services in the French Overseas Territories in the near term. In the event of a successful tender bid, our ability to provide LTE mobile services to complement our existing mobile services in Israel and the French Overseas Territories respectively will depend in part on our ability to upgrade our mobile network and roll out an LTE network, which would involve additional capital expenditure or, subject to regulatory approval, investment in the newly formed limited partnership to be set up in Israel pursuant to the Network Sharing Agreement between HOT Mobile and Partner. In Israel, because of our extensive fixed line network and the technologically advanced nature of our UMTS network, as well as the Network Sharing Agreement, we believe upgrading our mobile network to the LTE standard will require lesser investment as compared to some of our competitors and significantly less capital expenditure than we incurred to roll out our UMTS network.

Competition

Our Cable Customer Relationships, RGUs and ARPUs are impacted by the levels of competition we experience in each of our regions. Although we increased our total cable RGUs in 2012, our total cable RGUs declined by 87,000 (or 2.6%) for the year ended December 31, 2013 and by 121,000 RGUs (or 3.7%) for the nine months ended September 30, 2014, due to significant competition in most of the regions in which we operate. In Portugal, we experienced increased churn and a decline in total cable RGUs and ARPUs in the nine months ended September 30, 2014, and in the twelve months ended December 31, 2013, mainly as a result of aggressive competition and adverse economic conditions as well as our strategic decision to cease offering certain aggressively-priced packages and to migrate customers to our triple play offerings, in order to maintain our EBITDA margins, which resulted in an erosion of our subscriber base. Furthermore, in Belgium, we also experienced a decline in total cable RGUs in the nine months ended September 30, 2014 and the twelve months ended December 31, 2013, resulting from a net decrease in digital television RGUs, partially due to customers churning to different platforms such as digital television providers over DSL and satellite operators. We expect competitive pressures to intensify in each of our regions due to a variety of factors. For example, in Israel, we expect to experience an increase in competition particularly with respect to the broadband internet services as a result of an increase in speeds offered by the incumbent operator. Further, the number of total mobile subscribers declined in the French Overseas Territories in 2013 and in the nine months ended September 30, 2014, primarily due to intense competition. For details regarding our key competitors, please see "Industry and Market Overview". Our ability to increase or maintain the prices for our cable and mobile services, and therefore our ARPU, is also limited by regulatory factors in each of the regions in which we operate.

In Israel, the Israeli Ministry of Communications has in recent years taken certain measures to increase the competition in the telecommunications industries, including the establishment of a DTT platform with the possibility of expanding the number of channels broadcasted over such platform, eliminating exit fees for subscribers except in limited circumstances and prohibiting the linkage of the price and terms of a handset to mobile services or benefits. In 2014, the Israeli Ministry of Communications also introduced a policy for the establishment of a wholesale market for broadband internet infrastructure access pursuant to which certain limitations on structural separation and bundling of products may be reduced, but we would also be required to provide access to our network infrastructure to other service providers on a wholesale basis. The price for such access would be determined based on a commercial agreement between us and any such service provider, but the Israeli Minister of Communications will be entitled to intervene in the determination of the terms or the price that have been agreed or that is demanded by us if it should find that such price is either unreasonable or could harm the competition, or if we have been unable to enter into a commercial agreement with the service provider. The Israeli Ministry of Communications has also introduced a policy for the establishment of a wholesale market for broadband Internet infrastructure access pursuant to which certain limitations on structural separation and bundling of products may be reduced, but we would also be required to provide access to our network infrastructure to other service providers on a wholesale basis. The price for such access would be determined based on a commercial agreement between us and any such service provider, but the Israeli Minister of Communications will be entitled to intervene in the determination of the terms or the price that have been agreed or that is demanded by us if it should find that such price is either unreasonable or could harm the competition, or if we have been unable to enter into a commercial agreement with the service provider. Further, the Israeli Ministry of Communications has issued regulatory instructions, including the method of setting wholesale service rates and, in the case of Bezeq, the maximum rates that can be collected by Bezeq from other license holders who make use of its infrastructure for the years 2014 to 2018, in an attempt to create a wholesale market for broadband Internet infrastructure access and fixed line telephony services which would allow service providers (such as ISPs, VOB providers and IPTV providers) to provide services to their customers by using our cable network. Should the wholesale market develop, certain requirements for structural separation and bundling of products that apply to Bezeq and us may be lifted, and thus competition in the broadband Internet infrastructure access market may increase significantly which could negatively affect our results of operations. See "*Risk Factors—Risks Relating to Legislative and Regulatory Matters—Israel—We are subject to significant government regulation and supervision, which could require us to make additional expenditures or limit our revenues and otherwise adversely affect our business, and further regulatory changes could also adversely affect our business.*"

The competition we face in our markets, as well as any decline in the economic environment, could adversely impact our ability to increase or maintain our revenue, RGUs, operating cash flow or liquidity. We currently are unable to predict the extent of any of these potential adverse effects on our results of operations.

In addition, the cable services and mobile telephony industries typically exhibit churn as a result of high levels of competition, which could lead to increased costs and reduced revenue. Our churn levels may be affected by a variety of factors including changes in our or our competitors' pricing, our level of customer satisfaction, disconnection of non-paying subscribers and changes in regulations. Churn rates in the cable segment in our individual markets are also impacted by customers moving out of our network area, although our nationwide network in Israel, allows us to minimize the impact of our customers moving homes as there is a high likelihood that such customer will move into a home passed by our cable network or that could be connected to our cable network without materially extending our cable network plan. We could in some instances incur some capital expenditures related to installation and connection of such relocating customers. With respect to our mobile business, in Israel, prior to the launch of our UMTS based 3G services in May 2012, our churn rates have increased in recent years as subscribers left our iDEN-based network for the more advanced networks of our competitors. Our churn rates further increased in our mobile sector in Israel in 2012 as our contract with the Israeli Defense Force for the provision of iDEN-based mobile services terminated in the last quarter of 2012, but were partially offset by certain of our iDEN subscribers switching to our 3G services launched in May 2012 as opposed to those offered by our competitors. The gradual migration of the iDEN subscribers under the expired contract with the Israeli Defense Forces to the new service provider was completed in March 2013. With the launch of our UMTS network, we expect that our mobile churn rate in Israel will increase from historical levels as 3G mobile services generally have a higher churn rate than iDEN mobile services. In addition, regulatory actions of the Israeli Ministry of Communications which have increased competition by prohibiting exit fees, except in limited circumstances, long-term commitments and, as of January 2013, the linkage of the price and terms of handsets to the mobile service prices and benefits are also likely to have an impact on mobile churn rates in Israel. In Portugal, we experienced an increase in churn in recent periods mainly as a result of aggressive competition and adverse economic conditions. Business customer retention is generally high compared to the retention of residential customers as switching service providers in the short term can be difficult and costly especially for large corporate customers. Our long term business customer relationships in Portugal (our largest B2B market) usually last on average for six years with contract terms ranging between 24 to 36 months.

On December 29, 2014, Cellcom, an Israeli telecommunication company, which also offers mobile services, announced the launch of "Cellcom TV", its new service for offering television over the internet. Cellcom TV services include the Israeli DTT broadcasting television channels, VOD services and additional advanced features and viewing capabilities. Although this service was only recently introduced (and, as such, we are unable to fully anticipate the effect that this development may have on HOT), we expect that it may increase the competition in the television services market in which HOT currently operates, and as such could have a material effect on our business, financial condition and results of operations.

Multiple-Play Strategy

We have implemented a product offering across the regions in which we operate with a strategic focus on multiple-play, including triple-play bundles. Subscribers who elect to subscribe for our multiple-play bundles realize cost savings on their monthly bill as compared to purchasing each of the services individually. We believe that offering bundled services allows us to meet customers' communication and entertainment requirements increases customer loyalty and attracts new customers as the value proposition of the offering is enhanced. As a result of our focus on providing subscribers with multiple- play bundles, we have experienced an increase in the number of Cable Customer Relationships subscribing for our triple-play services, with the number of triple-play subscribers increasing from 560,000 as of December 31, 2011, to 693,000 as of September 30, 2014, which has driven growth in our cable based services ARPU (other than in Portugal where our ARPU was negatively impacted in 2013 and the nine months ended September 30, 2014, by aggressive competition and adverse economic conditions). Our cable-based services ARPU for the years ended December 31, 2011, 2012 and 2013 and for the nine months ended September 30, 2013 and 2014, respectively, were €42.4, €44.4, €47.6, €47.6 and €48.8 in Israel, €36.7, €39.5, €41.9, €41.1 and €43.6 in Belgium and Luxembourg, €36.9, €34.9, €34.6, €35.1 and €33.4 in Portugal and €43.1, €48.3, €51.4, €50.8 and €55.6 in the French Overseas Territories.

Introduction of New Products and Services

We have significantly expanded our presence and product and service offerings in the past. HOT has been a leader in bringing cable-based services to the Israeli market. HOT launched digital cable television in 2001, high-speed broadband internet infrastructure access in 2003 and cable-based fixed telephony services in 2005. HOT has continued to enhance its product and service offerings, being the first company to introduce VoD services in Israel in 2005 and launching a 100 Mbps broadband internet service in 2010. In May 2012, we launched UMTS- based 3G mobile services in Israel. We have taken similar measures in the other countries in which we operate including introducing mobile services in Belgium, launching our most advanced set top boxes, LaBox after the successful introduction in Belgium and Luxembourg (2012), Portugal (2012) and Israel (as "FibreBox" in March 2014). In the French Overseas Territories, Outremer pioneered flat-fee rate mobile telephony plans by introducing packages with unlimited calls to the French Overseas Territories and mainland France in 2012. In addition, we regularly review and invest in the content we offer in order to provide our subscribers with a flexible and diverse range of programming options, including high-quality local content and exclusive premium content. The introduction of new products and services have impacted our result of operations in the periods presented, by among other things, opening new revenue streams (e.g. 3G mobile services in Israel and Belgium) and, in certain cases, increasing operating expenses and capital expenditures (e.g. UMTS network build out costs and roaming costs in Israel relating to our 3G mobile services and costs relating to the roll-out of the LaBox in Western Europe).

Pricing

We focus our product offering on multiple-play offers. In Israel, we believe our ability to offer triple-play services provides us with a competitive price advantage. The cost of a multiple-play subscription package generally depends on market conditions and pricing by competitors with similar offerings. In addition, pricing depends on the content and options available on each platform (i.e. number of regular and premium channels offered for television, maximum speed for broadband internet, regular and long-distance minutes for fixed-line telephony, and number of voice minutes and text messages for mobile telephony). Subject to certain exceptions such as our flat-fee rate plans in the French Overseas Territories which we introduced in the first half of 2012, the more options, content and included usage time, the higher the price of the multi-play package or stand-alone offering in question. We adjust our pricing policies based on evolving market practices as well as the Altice International Group's overall business strategy. For example, in Belgium we increased the prices for our triple-play and stand-alone products in 2012 in line with the market which has resulted in an increase in cable-based ARPU, while in Portugal, during the course of 2012, we took the strategic decision to cease offering certain aggressively-priced packages and to migrate customers to our triple-play offerings, in order to maintain our EBITDA margins, which resulted in an erosion of our subscriber base. Our ability to increase or maintain the prices for our cable and mobile services, and therefore our ARPU, is also limited by regulatory factors in each of the regions in which we operate. Prices for B2B contracts are negotiated with each customer. The B2B market for voice services is extremely price sensitive and very low margin, as voice services are highly commoditized, with sophisticated customers and relatively short-term contracts. The B2B market for data services is less price sensitive, as data services require more customization and service level agreements. In both markets, price competition is strongest in the large corporates segment and public sector, whereas customer-adapted solutions are an important competitive focus in the medium and smaller business segment.

Cost Structure

We generally work towards achieving satisfactory operating margins in our businesses and focus on revenue-enhancing measures once we have achieved such margins. We continuously work towards optimizing our cost base by implementing initiatives to improve our cost structure across the various regions in which we operate. We are implementing common technological platforms across our networks in order to gain economies of scale, notably with respect to billing systems, network improvements and cable customer premises equipment. We have also achieved and expect to continue to achieve substantial reductions in our operating expenses as we implement the same best practice operational processes across our organization. We have simplified the services we offer, increased the level of outsourcing of customer service, customer installations and network maintenance and reduced costs through the negotiation of attractive interconnection rates and improved pricing of the same television content. As a result, we have generally managed to achieve growth in EBITDA, profitability and operating cash flow of businesses we have acquired. For example, in our Israeli business, following the acquisition by Altice International of HOT in 2011, HOT's cable EBITDA margin increased to 55.1% in 2013 from 41.8% in 2011. Likewise, in our Portuguese business, following the acquisition by Altice International of Cabovisão in February 2012, Cabovisão's EBITDA margin increased to 39.9% in 2013 compared to 14.2% in 2011. In our Dominican Republic business, following the acquisition by Altice International of ODO in April 2014, ODO's EBITDA margin increased to 47.8% for the nine months ended September 30, 2014 compared to 38.9% for the nine months ended September 30, 2013.

We make expansion-related capital expenditure decisions by applying strict investment return and payback criteria. For the nine months ended September 30, 2014 and for the year ended December 31, 2013, respectively, we incurred capital expenditure of €315.1 million and €314.2 million, in each case on a pro forma basis. Of such capital expenditures, approximately 21.0% and 22.6% related to CPE and installations cable capital expenditures, 16.9% and 18.3% related to our cable network and construction, 21.1% and 24.3% related to other cable capital expenditures, 26.5% and 19.7% related to capital expenditures for our mobile businesses and 14.5% and 15.1% related to B2B and other capital expenditures in each case for the nine months ended September 30, 2014 and the year ended December 31, 2013, respectively.

We have recently incurred significant capital expenditures related to the building-out and launching of our UMTS network in Israel as well as significant operating expenditures, including national roaming costs pursuant to our roaming arrangement with Pelephone. In November 2013 we entered into the Network Sharing Agreement with Partner pursuant to which HOT Mobile and Partner will each own equal shares of a newly formed limited partnership, which is expected to hold, develop and operate an advanced shared mobile network for both companies. The Network Sharing Agreement is valid until December 31, 2028 and has received approval from The Israeli Antitrust Authority (subject to certain conditions) but remains subject to final approval from the Israeli Ministry of Communications. This agreement will enable HOT Mobile and Partner to share antennas and frequencies and facilitate optimum utilization of the spectrum. In the interim, HOT Mobile has entered into the RoU Agreement with Partner which gives HOT Mobile a right of use over Partner's mobile communication network for the purpose of providing nation-wide mobile coverage to our customers. In connection with our entry into the Network Sharing Agreement and the RoU Agreement, HOT Mobile and Pelephone amended their underlying agreement in December 2013 repealing the exclusivity clause which HOT Mobile was subject to. This amendment will allow HOT Mobile to exercise its rights under the Network Sharing Agreement with Partner (once final approval from the Israeli Ministry of Communications has been given) and we expect that the arrangements we have entered into with Partner will result in savings related to network and maintenance expenses and optimize the amount of capital expenditures we are required to incur in relation to the build-out of our UMTS network. We have already experienced savings relating to roaming costs under our RoU Agreement for the nine months ended September 30, 2014; however there can be no assurance that we will be able to obtain the required the outstanding regulatory approvals or otherwise be able to implement the other arrangements we have entered into with Partner in a timely or cost effective manner. For further details, see "*Description of Our Business—Material Contracts—Mobile Network Sharing Agreement with Partner in Israel*."

Macro Economic and Political Developments

Our operations are subject to macro-economic and political risks that are outside of our control. For example, high levels of sovereign debt in the U.S., certain European countries and countries in the Middle East, combined with weak growth and high unemployment, could lead to low consumer demand, fiscal reforms (including austerity measures), sovereign debt restructurings, currency instability, increased counterparty credit risk, high levels of volatility and, potentially, disruptions in the credit and equity markets, as well as other outcomes that might adversely impact our financial condition. For example, our results of operations in the period under review have been affected by adverse economic conditions and austerity measures in Portugal which had a negative effect on consumer confidence. Moreover, in Israel, we are subject to the inherent risks associated with the political and military conditions there and the potential for armed conflicts with Israel's neighbors.

Fluctuations in Currency Exchange Rates and Interest Rates

Our reporting currency is euros but a majority of our revenue and expenses are currently earned or incurred in other currencies. In Israel, which accounted for approximately 68.5% and 47% of the total revenue of the Altice International Group in the year ended December 31, 2013 and for the nine months ended September 30, 2014, respectively, on a pro forma basis, a substantial portion of our revenue is in NIS while a portion of our operational expenses and capital expenditures are incurred in other currencies, including the U.S. dollar. In the year ended December 31, 2013 and nine months ended September 30, 2014, respectively, approximately 9% and 12% of our total operating expenses in Israel and approximately 47% and 35% of our total capital expenditures in Israel were incurred in currencies other than NIS. In the Dominican Republic, which accounted for approximately 22.1% of total revenue of the Altice International Group in the nine months ended September 30, 2014, on a pro forma basis, a substantial portion of our revenue is in Dominican pesos and 37% of our operating expenses and 52% of our capital expenditure were incurred in U.S. dollars. Our borrowings are denominated in NIS, euros and U.S. dollars but do not necessarily correspond to the portion of revenue we earn in such currencies. The exchange rate between U.S. dollars and NIS, the euro and NIS and U.S. dollars and Dominican pesos has been volatile in the past and may continue to be so in the future. Although we attempt to mitigate currency risk through hedging, sharp changes in the exchange rate could have a material effect on our results of operations. We are also exposed to translation foreign currency exchange risk arising from the consolidation of the financial results of HOT into Altice International's consolidated financial statements and with effect from March 12, 2014 and April 9, 2014, respectively, the consolidation of our operations in the Dominican Republic into Altice International's consolidated financials statements. In the year ended December 31, 2013, compared to 2012, foreign exchange translation movements between the NIS and the euro had a positive impact of €32.6 million on our total revenues and €11.8 million on our EBITDA and in the nine months ended September 30, 2014 compared to the corresponding period in 2013, foreign exchange translation movements between NIS and the euro had a positive impact of €8.3 million on our total revenues and € 4.0 million on our total EBITDA. In the nine months ended September 30, 2014, foreign exchange translation movements between Dominican pesos and the euro had a negative impact of €26.4 million on our total revenues and €12.1 million on our total EBITDA. Further, as adjusted to give effect to the Transactions, as of September 30, 2014, we had approximately €2,149 million of outstanding indebtedness, which bears interest at a floating rate and is therefore subject to interest rate risk. In addition, any indebtedness that we incur under the Revolving Credit Facilities and the 2013 Guarantee Facility will bear interest at a floating rate.

Key Operating Measures

We use several key operating measures, including number of homes passed, Cable Customer Relationships, RGUs, RGUs per Cable Customer Relationship and ARPUs to track the financial and operating performance of our business. None of these terms are measures of financial performance under IFRS, nor have these measures been audited or reviewed by an auditor, consultant or expert. All of these measures are derived from our internal operating and financial systems. As defined by our management, these terms may not be directly comparable to similar terms used by competitors or other companies.

(1) Cable Customer Relationships represents the number of individual end users who have subscribed for one or more of our cable based services (including pay television, broadband internet or fixed-line telephony), without regard to how many services to which the end user subscribed. It is calculated on a unique premises basis. Cable Customer Relationships does not include subscribers to either our mobile or ISP services.

(2) RGUs relate to sources of revenue, which may not always be the same as customer relationships. For example, one person may subscribe for two different services, thereby accounting for only one subscriber, but two RGUs. RGUs for pay television and broadband internet are counted on a per service basis and RGUs for fixed-line telephony are counted on a per line basis.

(3) Penetration rates for our pay television, broadband internet and fixed-line telephony services are presented as a percentage of homes passed.

(4) ARPU is an average monthly measure that we use to evaluate how effectively we are realizing revenue from subscribers. ARPU is calculated by dividing the revenue for the service provided after certain deductions for non-customer related revenue (such as hosting fees paid by channels) for the respective period by the average number of customer relationships for that period and further by the number of months in the period. The average number of customer relationships is calculated as the number of customer relationships on the first day in the respective period plus the number of customer relationships on the last day of the respective period, divided by two. For Israel, ARPU has been calculated by using the following exchange rates: (i) average rate for the year ended December 31, 2011 € 0.2009 = NIS 1.00, (ii) average rate for the year ended December 31, 2012 €0.2018 = NIS 1.00, (iii) average rate for the year ended December 31, 2013, €0.2092 = NIS 1.00, (iv) average rate for the nine months ended September 30, 2013, €0.2086 = NIS 1.00 and (v) average rate for the nine months ended September 30, 2014, € 0.2113 = NIS 1.00. For ODO, ARPU has been calculated by using the following exchange rates: (i) average rate for the nine months ended September 30, 2013 €0.0186 = DOP 1.00 and (ii) average rate for the nine months ended September 30, 2014 €0.017210 = DOP 1.00.

(5) Mobile subscribers is equal to the net number of lines or SIM cards that have been activated on our mobile network. In Israel, the total number of mobile subscribers for our iDEN and UMTS services were as follows:

	As of December 31,			As of September 30,	
	2011	**2012**	**2013**	**2013**	**2014**
Mobile Subscribers					
iDEN	444	325	218	234	186
UMTS	—	441	592	539	742
Total	**444**	**766**	**810**	**773**	**932**

(6) In Israel, Homes Passed is the number of total Israeli Homes. Our cable network passes a vast majority of Israel's 2.3 million households.

(7) Only relates to the cable based services (pay television, broadband internet and fixed-line telephony) we provide in Guadeloupe and Martinique and excludes the xDSL based broadband internet (including IPTV) and fixed-line telephony services we provide in Guadeloupe, Martinique, French Guiana, La Réunion and Mayotte following our acquisition of a controlling interest in Outremer in July 2013.

(8) Total represents the aggregate of the respective key operating measures across all the regions in which we currently operate even though we may not have owned or controlled such business for the entire duration of the periods presented. Israel represents operating measures of HOT (in which we acquired a controlling interest in March 2011) and HOT Mobile; Belgium and Luxembourg represents operating measures of Coditel Belgium and Coditel Luxembourg (in which we acquired a controlling interest from the Numericable Group in June 2011); Portugal represents operating measures of Cabovisão (in which we acquired a controlling interest in February 2012) but not ONI; French Overseas Territories represents operating measures of Le Cable and in respect of mobile services only, Outremer (in which we acquired a controlling interest in July 2013); and Dominican Republic represents operating measures of ODO (in which we acquired a controlling interest in April 2014) but not Tricom.

(9) Excludes French Guiana.

(10) Excludes Tricom.

(11) Includes subscribers through resellers as ODO enters into direct contractual arrangements with customers of resellers. All post-paid subscribers are considered as active. Also includes exclusively mobile subscribers, with mobile broadband/internet subscribers excluded.

(12) Includes both post-paid residential subscribers and post-paid business subscribers.

(13) Prepaid residential subscribers only

(14) In connection with the acquisition of SFR by Numericable (which is indirectly controlled by the Issuer, and therefore an affiliate of the Altice International Group), we have entered into a commitment with the French Competition Authority to dispose of our mobile network assets in Mayotte and La Réunion (which are part of our Group's business in the French Overseas Territories) by mid-2015.

Key Income Statement Items

In 2014, in the context of the anticipated acquisition and integration of the French mobile operator Société Francaise du Radiotéléphone S.A. ("SFR") into the Altice Group, the board of directors of the Issuer decided to amend the presentation of its operational segments, by regrouping the cable-based services segment and B2B segment into a single line called 'Fixed', and by maintaining the mobile segment. Other activities such as content, datacenters and holding company operations are classified under "Others". With effect from January 1, 2014, the Altice International Group now follows the same segmentation as the Issuer for financial reporting purposes. See Note 8 to the historical consolidated financial statement of Altice International as of and for the nine months ended September 30, 2014. However, for comparative purposes, we have continued to present the discussion and analysis of the results of operations of Altice International for all periods in line with the historical segmentation of the business, i.e. cable-based services, mobile services and B2B and others.

Revenue

Revenue consists of income generated from the delivery of cable-based services, mobile services and B2B and other services to our residential and business subscribers. Revenue is recognized at the fair value of the consideration received or receivable net of value-added tax, returns, rebates and discounts and after eliminating intercompany sales within the Altice International Group. We have presented revenue generated from the following services:

Cable-based services: Revenue from cable-based services consists of revenue from pay television services, including related services such as VoD, broadband internet services, fixed-line telephony services and ISP services to our customers. This primarily includes (i) recurring subscription revenue for pay television services, broadband internet and fixed-line telephony (which are recognized in revenue on a straight-line basis over the subscription period), (ii) variable usage fees from Video On Demand ("VoD") and fixed-line telephony calls (which are recognized in revenue when the service is rendered), (iii) installation fees (which are recognized in revenue when the service is rendered if consideration received is lower than the direct costs to acquire the contractual relationship) and (iv) interconnection revenue received for calls that terminate on our cable network.

Mobile services: Revenue from mobile telephony services primarily consists of (i) recurring subscription revenue for our post-paid mobile services (which are recognized in revenue on a straight-line basis over the subscription period), (ii) revenue from purchases of our pre-paid mobile services (which are recognized in revenue when the service is rendered), (iii) variable usage fees for mobile telephony calls (which are recognized in revenue when the service is rendered), (iv) revenue from the sale of handsets (which are recognized on the date of transfer of ownership), and (v) interconnection revenue received for calls that terminate on our mobile network.

B2B and others: Revenue from the B2B and others segment includes broadband internet access, telephony, virtual private network, leased lines, data center services and other corporate fixed-line services to large and small businesses or government agencies. However, it does not include revenue from standard pay television, broadband internet, fixed-line telephony and mobile services to businesses, which are included under cable or mobile revenue as the case may be. In addition, it also includes revenue from other businesses units such as content delivery and production, provided either directly to customers or to other cable network operators. These primarily include revenue from our B2B business in Portugal, certain pure B2B services in Belgium and Luxembourg, our datacenter and B2B businesses in Switzerland and our content business.

Purchasing and subcontracting services

Purchasing and subcontracting services consists of direct costs associated with the delivery of cable-based services, mobile services and B2B and other services to our residential and business subscribers. We present purchasing and subcontracting services paid for the procurement of the following services:

Cable-based services: Purchasing and subcontracting services associated with cable based services consists of all direct costs related to the (i) procurement of non-exclusive television content, royalties and licenses to broadcast, (ii) transmission of data services, (iii) interconnect costs related to fixed-line telephony. In addition, it includes costs incurred in providing VoD or other interactive services to subscribers and accounting variations arising from changes in inventories of customer premises equipment (such as modems, set top boxes and decoders). In Israel, costs relating to the procurement of exclusive television content from third party providers were included in purchasing and subcontracting services for cable based services until March 31, 2013, but these costs have been capitalized thereafter.

Mobile services: Purchasing and subcontracting services associated with mobile services consists primarily of mobile interconnect fees, including roaming charges and accounting variations arising from the changes in inventories of mobile handsets.

B2B and others: Purchasing and subcontracting services associated with B2B and other services consist of, (i) cost of renting space for datacenters (subject to certain exceptions), (ii) utility costs related to the operation of datacenters (such as power and water supply costs), (iii) hosting and interconnect fees for telephony and broadband internet services to corporate clients or small businesses, and (iv) costs of professional services. In addition, it includes in relation to the content activity of the Altice International Group, technical costs associated with the delivery of content, such as satellite rental costs.

Other operating expenses

Other operating expenses consist mainly of the following subcategories:

Customer service costs: Customer service costs include all costs related to billing systems, bank commissions, external costs associated with operating call centers, allowances for bad customer debts and recovery costs associated therewith.

Technical and maintenance: Technical and maintenance costs include all costs related to infrastructure rental, equipment, equipment repair, costs of external subcontractors, maintenance of backbone equipment and datacenter equipment, maintenance and upkeep of the cable and mobile networks, costs of utilities to run network equipment and those costs related to customer installations that are not capitalized (such as service visits, disconnection and reconnection costs).

Staff expenses: For the Historical Financial Information "Other operating expenses" also includes staff expenses, comprised of all costs related to wages and salaries, bonuses, social security, pension contribution and other outlays paid to Group employees involved in technical operations and customer services functions (except for Outremer, which historically has accounted for all salary expenses under this item). Prior to the year ended December 31, 2013, staff costs and employee benefits were recorded under the line items "Other operating expenses", "General and administrative expenses" and "Other sales and marketing expenses", depending on the costs which they related to. Beginning with the year ended December 31, 2013, such staff costs and employee benefits have been accounted for in a separate line item and reflect total staff costs for all functions. See the historical financial statements for the nine months ended September 30, 2014 and for the year ended December 31, 2013 elsewhere in these Listing Particulars for further details. For comparative purposes staff and employee costs have been reclassified for the nine months ended September 30, 2013 and for the year ended December 31, 2012, respectively, to match the new reporting method of the Altice International Group. For the Pre-PT Transaction Pro Forma Financial Information and the Pre-PT/ODO Transactions Pro Forma Financial Information, staff costs and employee benefits expenses are accounted for under the line items "Other operating expenses", "General and administrative expenses" and "Other sales and marketing expenses", depending on the costs which they related to.

Business taxes: Business taxes include all costs related to payroll and professional taxes or fees.

General and administrative expenses

General and administrative expenses consist of office rent and maintenance, professional and legal advice, recruitment and placement, welfare and other administrative expenses. For the purposes of the discussion and analysis of the Pre-PT/ODO Transactions Pro Forma Financial Information, the Pre-PT Transaction Pro Forma Financial Information and their respective comparative periods, it also includes staff costs and employee benefits expenses relating to administrative personnel.

Other sales and marketing expenses

Other sales and marketing expenses consist of salary and associated payments for sales and marketing personnel, advertising and sale promotion, office rent and maintenance, commission's for marketers, external sales and storage and other expenses related to sales and marketing efforts. For Pre-PT/ODO Transactions Pro Forma Financial Information, the Pre-PT Transaction Pro Forma Financial Information and their respective comparative periods, it also includes staff costs and employee benefits expenses relating to sales and marketing personnel.

Depreciation and amortization

Depreciation and amortization includes depreciation of tangible assets related to production, sales and administrative functions and amortization of intangible assets.

Goodwill impairment

Goodwill impairment includes the write off of any goodwill that has been recognized on the acquisition of new assets based upon a re-evaluation of the cash generating capacity of these assets compared to the initial valuation assigned to the original goodwill of such asset acquisition.

Other expenses, net

Other expenses, net includes any one-off or non-recurring income or expenses incurred during the on-going financial year, excluding restructuring and other non-recurring costs. This includes deal fees paid to external consultants for merger and acquisition activities. With effect from January 1, 2014, other expenses, net have been included in restructuring and other non recurring costs.

Management fees

Management fees include all consulting and management fees paid to related parties. These fees are primarily related to consulting services provided on mergers and acquisitions and negotiations with vendors and banks.

Restructuring and other non-recurring costs

Restructuring and other non-recurring costs include one-off expenses incurred to reorganize existing or newly acquired businesses. Cost incurred are categorized under: (i) operating and maintenance costs when related to equipment redundancies, (ii) rents and other general and administrative expenses when related to building or redundancies of general installations and (iii) staff expenses, when related to employee redundancies. With effect from January 1, 2014, restructuring and other non-recurring costs include other expenses, net.

Gain arising on step acquisition

Gain arising on step acquisition includes the gain on achieving control in an investment or business and switching from the equity method of accounting to full integration in the consolidated accounts. See note 27 to Altice International's historical consolidated financial statements as of and for the year ended December 31, 2011 included elsewhere in these Listing Particulars.

Share of profit of associates

Share of profit of associates includes revenue arising from activities that are accounted for using the equity method for associates in the consolidation perimeter of the Altice International Group.

Finance income

Finance income consists of changes in the net fair value of the financial derivatives, gains from the disposal of financial assets, net exchange rate differences, and other finance income.

Finance costs

Finance costs includes financing expenses for short-term credit facilities, changes in the net fair value of the financial derivatives that do not qualify as hedges for accounting purposes, financing expenses for banking and credit card companies' commissions, financing expenses for long-term loans, financing expenses for bonds, net exchange rate differences and other expenses paid for financing operations recognized at amortized cost.

Income tax expenses

Income tax expenses or income comprise current tax and deferred tax. Taxes on income are recognized in the income statement except when the underlying transaction is recognized in other comprehensive income, at which point the associated tax effect is also recognized under other comprehensive income or in equity.

(1) For the Historical Financial Information "Other operating expenses" also includes staff costs and employee benefits expenses. Prior to the year ended December 31, 2013, staff costs and employee benefits were recorded under the line items "Other operating expenses", "General and administrative expenses" and "Other sales and marketing expenses", depending on the costs which they related to. Beginning with the year ended December 31, 2013, such staff costs and employee benefits have been accounted for in a separate line item and reflect total staff costs for all functions. See the historical financial statements for the nine months ended September 30, 2014 elsewhere in these Listing Particulars for further details. For comparative purposes staff and employee costs have been reclassified for the nine months ended September 30, 2013 to match the new reporting method of the Altice International Group. For the Pre-PT Transaction Pro Forma Financial Information, staff costs and employee benefits expenses are accounted for under the line items "Other operating expenses", "General and administrative expenses" and "Other sales and marketing expenses", depending on the costs which they relate to.

(2) Pre-PT Transaction Pro Forma Financial Information for the nine months ended September 30, 2013 and 2014, respectively, gives pro forma effect to the acquisition of ODO, but does not give pro forma effect to the acquisition of PT Portugal, Tricom and Mobius nor the disposal of our mobile network assets in Mayotte and La Réunion which we have committed to undertake. Since the financial information for Tricom and Mobius have been consolidated into the Historical Consolidated Financial Information of the Altice International Group from January 1, 2014 and March 12, 2014, respectively, following the consummation of the Mobius Acquisition on January 1, 2014 and the Tricom Acquisition on March, 12, 2014, the Pre-PT Transactions Pro Forma Financial Information for the nine months ended September 30, 2014 includes the contribution of Tricom and Mobius from the periods for which each of these entities have been consolidated.

(3) With effect from January 1, 2014, "Other expenses, net" have been included in the "Restructuring and other non-recurring costs" line item.

Significant Events Affecting Historical Results

Our results of operations for the nine months ended September 30, 2014 and September 30, 2013 were significantly impacted by the following events:

- In the third quarter of 2013, Altice International acquired a controlling equity interest in Outremer (the financial information of which is consolidated in the Historical Consolidated Financial Information with effect from July 5, 2013). Outremer contributed €51.0 million to revenue, €8.4 million to operating profit and €18.1 million to EBITDA of Altice International on a consolidated basis in the nine months ended September 30, 2013 since July 5, 2013 compared to €145.4 million to revenue, €16.9 million to operating profit and €54.0 million to EBITDA of Altice International on a consolidated basis for the nine months ended September 30, 2014. For the period from January 1 to July 5, 2013, Outremer had €96.5 million of revenue, €19.4 million of operating profit and € 33.2 million of EBITDA, which are not consolidated in the Historical Consolidated Financial Information of Altice International.

- In the third quarter of 2013, Altice International acquired a 100% equity interest in ONI (through its indirect subsidiary Cabovisão), the financial information of which is consolidated in the Historical Consolidated Financial Information of Altice International with effect from August 8, 2013. ONI contributed €17.4 million to revenue, €1.2 million to operating loss and €2.0 million to EBITDA of Altice International on a consolidated basis in the nine month ended September 30, 2013 since August 8, 2013 and €65.1 million to revenue, €2.4 million to operating loss and €14.4 million to EBITDA of Altice International on a consolidated basis in the nine months ended September 30, 2014. For the period from January 1 until August 8, 2013, ONI had €59.0 million of revenue, € 2.8 million of operating loss and €9.2 million of EBITDA, which are not consolidated in the Historical Consolidated Financial Information of the Company.

- In the fourth quarter of 2013, Altice International acquired a controlling interest in Ma Chaîne Sport S.A.S and SportV, two content producers based in France and Luxembourg respectively, the financial information of which is consolidated in the Historical Consolidated Financial Information of Altice International with effect from October 4, 2013. The two entities contributed €20.1 million to revenue, €2.6 million to operating profit and €10.5 million to the EBITDA of Altice International on a consolidated basis in the nine months ended September 30 2014. These entities did not have an impact on the financial information of Altice International for the nine months ended September 30, 2013.

- In the first quarter of 2014, Altice International acquired a controlling interest in Mobius, the financial information of which is consolidated in the Historical Consolidated Financial Information of Altice International with effect from January 1, 2014. Mobius contributed €13.2 million to revenue, €1.0 million to operating profit and €3.1 million to EBITDA of Altice International on a consolidated basis in the nine months ended September 30, 2014.

  Furthermore, during the first quarter, Altice International also acquired a controlling interest in Tricom, the financial information of which is consolidated in the Historical Consolidated Financial Information of Altice International with effect from March 12, 2014. Tricom contributed €82.0 million to revenue, €14.1 million to operating profit and €40.5 million to EBITDA of Altice International on a consolidated basis in the nine months ended September 30, 2014. Tricom and Mobius did not have an impact on the consolidated financial information for the nine months ended September 30, 2013.

  In the second quarter of 2014, Altice International acquired a controlling interest in ODO, the financial information of which is consolidated in the Historical Consolidated Financial Information of Altice International with effect from April, 1 2014. ODO contributed €218.6 million to revenue, €62.7 million to operating profit and €104.5 million to EBITDA of Altice International on a consolidated basis in the nine months ended September 30, 2014. ODO did not have an impact on the consolidated financial information for the nine months ended September 30, 2013.

Revenue

Historical Consolidated Basis

For the nine months ended September 30, 2014, we generated total revenue of €1,372.8 million, a 47.9% increase compared to €928.4 million for the nine months ended September 30, 2013. Our total revenue by our key regions in the nine months ended September 30, 2014 and 2013, respectively, were: (i) in Israel, €645.9 million and €669.4 million, (ii) in Belgium and Luxembourg, €54.0 million and €53.2 million, (iii) in Portugal, €140.4 million and €100.9 million (revenue for the nine months ended September 30, 2013 was impacted by the consolidation of ONI only with effect from August 8, 2013 and revenue for the nine months ended September 30, 2014 was impacted by the contribution from ONI for the entire period), (iv) in the French Overseas Territories, €178.7 million and €69.8 million (revenue for the nine months ended September 30, 2013 were impacted by the consolidation of Outremer only with effect from July 5, 2013 and revenue for the nine months ended September 30, 2014 was impacted by the contribution from Outremer and Mobius for the entire period) and (v) in the Dominican Republic, €300.5 million and nil (the Altice International Group did not have any activities in the Dominican Republic prior to March 12, 2014). Foreign exchange translation movements between the NIS and the euro had a positive impact of €8.3 million on total revenue. Foreign exchange translation movements between Dominican pesos and the euro had a negative impact of €26.4 million on total revenue.

Cable based services: For the nine months ended September 30, 2014, we generated cable based services revenue of €721.9 million, a 6.8% increase compared to €676.1 million for the nine months ended September 30, 2013. The increase was primarily due to the inclusion of cable based services revenue from Outremer for the entire duration of the nine months ended September 30, 2014, with cable based services revenue increasing to €68.1 million for the French Overseas Territories for the nine months ended September 30, 2014 compared to €18.7 million for the nine months ended September 30, 2013, offset by a decline in cable based services revenue in Israel and Portugal from €527.0 million and €83.4 million in the nine months ended September 30, 2013, respectively, to €513.0 million and €75.3 million in the nine months ended September 30, 2014, respectively. Foreign exchange translation movements between the NIS and the euro had a positive impact of €6.6 million on cable based service revenue.

Mobile services: For the nine months ended September 30, 2014, we generated mobile services revenue of €457.7 million, a 160.3% increase compared to €175.9 million for the nine months ended September 30, 2013. This was primarily due to the inclusion of € 218.6 million in mobile services revenue generated by ODO for the nine months ended September 30, 2014 (with effect from April 9, 2014). Foreign exchange translation movements between the NIS and the euro had a positive impact of €1.7 million on mobile revenues. Foreign exchange translation movements between Dominican pesos and the euro had a negative impact of €24.6 million on total revenue.

B2B and others: For the nine months ended September 30, 2014, we generated B2B and other services revenue of €193.1 million, a 153.5% increase compared to €76.3 million for the nine months ended September 30, 2013, predominantly due to the inclusion of B2B and others revenue from ONI (€65.1 million for the nine months ended September 30, 2014, compared to €17.5 million for the nine months ended September 30, 2013, and the inclusion of the B2B and others revenue of Tricom (with effect from March 12, 2014) (€54.4 million for the nine months ended September 30, 2014, compared to nil for the nine months ended September 30, 2013).

Pro Forma Consolidated Basis

The following table sets forth our revenue by country of operation and on a pro forma consolidated basis based on the Pre-PT Transaction Pro Forma Financial Information.

	Pre-PT Transaction Pro Forma Financial Information[5]													
	For the nine months ended September 30,													
	2013							2014						
	Israel	Belgium & Luxembourg	Portugal	French Overseas Territories[2]	Dominican Republic[4]	Others[1]	Total	Israel	Belgium & Luxembourg	Portugal	French Overseas Territories[2]	Dominican Republic[4]	Others[1]	Total[3]
	€ in millions													
Revenue														
Cable based services	527.0	45.7	83.4	63.7	—	1.3	721.1	513.1	45.9	75.3	74.5	—	19.7	728.4
Mobile Services	142.4	0.8	—	102.6	333.6	—	579.8	132.8	1.0	—	104.3	327.4	8.0	573.4

(1) Others include our B2B telecommunications solutions business and datacenter operations in Switzerland (Green and Green Datacenter), our datacenter operations in France (Auberimmo) and our content production and distribution businesses in France and Luxembourg (Ma Chaîne Sport and SportV). We disposed of our interests in Valvision (which was included in Others) in 2013 to the Numericable Group. Green Datacenter and Auberimmo are designated as unrestricted subsidiaries under the terms governing the indebtedness of the Group. For the nine months ended September 30, 2014, it also includes the contribution made by Tricom from March 12, 2014. See note 3 below for details.

(2) For the French Overseas Territories, cable based services includes purchasing and subcontracting services for cable based services we provide in Guadeloupe and Martinique as well as the xDSL based broadband internet (including IPTV) and fixed line telephony services we provide in Guadeloupe, Martinique, French Guiana, La Réunion and Mayotte. For the nine months ended September 30, 2014, it also includes the contribution of Mobius. See note 3 below for details.

(3) Total revenue for the nine months ended September 30, 2014 includes the contribution of Mobius since its consolidation into the Altice International Group from January 1, 2014. For the nine months ended September 30, 2014, Mobius generated €13.2 million of revenue in B2B and other. Mobius has no other revenue streams. Total revenue for the nine months ended September 30, 2014 also includes the contribution made by Tricom from March 12, 2014. For the nine months ended September 30, 2014, Tricom generated total revenue of €82.0 million, cable based service revenue of €19.6 million, mobile services revenue of €8.0 million and B2B/Other revenue of €54.4 million. Mobius and Tricom did not have any impact on the Pre-PT Transaction Pro Forma Financial Information for the nine months ended September 30, 2013.

(4) Excludes Tricom.

(5) Pre-PT Transaction Pro Forma Financial Information for the nine months ended September 30, 2013 and 2014, respectively, gives pro forma effect to the acquisition of ODO, but does not give pro forma effect to the acquisition of PT Portugal, Tricom and Mobius nor the disposal of our mobile network assets in Mayotte and La Réunion which we have committed to undertake. Since the financial information for Tricom and Mobius have been consolidated into the Historical Consolidated Financial Information of the Altice International Group from January 1, 2014 and March 12, 2014, respectively, following the consummation of the Mobius Acquisition on January 1, 2014 and the Tricom Acquisition on March, 12, 2014, the Pre-PT Transaction Pro Forma Financial Information for the nine months ended September 30, 2014 includes the contribution of Tricom and Mobius from the periods for which each of these entities have been consolidated.

Israel: For the nine months ended September 30, 2014, we generated total revenue in Israel of €645.9 million, a 3.5% decrease compared to €669.4 million for the nine months ended September 30, 2013. As compared to the nine months ended September 30, 2013, for the nine months ended September 30, 2014, our cable based services revenue decreased by 2.6% and our mobile services revenue decreased by 6.7%. Foreign exchange translation movements between the NIS and euro had a positive impact of €8.3 million on total revenue, €6.6 million on cable services revenue and €1.7 million on mobile services revenue. Accordingly, at a constant exchange rate, our total revenue in Israel decreased by 4.8%, our cable based service revenue decreased by 3.9% and our mobile services revenue decreased by 7.9%.

Cable based services revenue in Israel was negatively impacted by a 46,000 net decrease in our total cable RGUs, comprising a 19,000 net decrease in pay television RGUs and a 28,000 net decrease in broadband internet infrastructure access RGUs. The decrease in our cable RGUs was mainly due to significant disruptions to our customer service in the second and third quarter of 2014. The disruptions were caused by (i) the conflict in Gaza in the third quarter of 2014 which had led to closures of several of our service centers and (ii) certain procedural issues experienced by to our third party customer service provider, which are in the process of being addressed by management. The decrease in cable based services revenue was partially offset by an increase in cable based services ARPU of 2.6% (1.3% at a constant exchange rate) from €47.6 for the nine months ended September 30, 2013 to €48.8 for the nine months ended September 30, 2014, primarily as a result of our strategic focus on multiple-play offerings and an increase in the take-up of our higher value higher speed broadband internet services. We also experienced an increase in the number of Cable Customer Relationships subscribing for our triple-play service as a result of our bundling strategy, with the number of triple-play Cable Customer Relationships increasing from 448,000 as of September 30, 2013 to 484,000 as of September 30, 2014 as well as the launch of "FiberBox" and our revised broadband internet with speeds of up to 200MG.

The decrease in the interconnection fees for fixed line telephony which were implemented in December 2013, following the change in the regulation from the Ministry of Communication, had an impact on the cable based services revenue with the interconnection rate being set at 0.99 agorot per minute for both peak and off peak time calls.

The decrease in mobile services revenue in Israel was mainly due to the decrease in mobile ARPU by €1.9, or 11.2%, to €15.0 for the nine months ended September 30, 2014 compared to €16.9 for the nine months ended September 30, 2013, caused by subscribers disconnecting from our higher ARPU iDEN mobile network, with iDEN customers decreasing to 186,000 for the nine months ended September 30, 2014 compared to 234,000 for the nine months ended September 30, 2013. On a constant foreign exchange rate mobile ARPU decreased by 14.8%. Mobile services revenue for the nine months ended September 30, 2014 was further negatively impacted by a decrease in handset sales in our iDEN service, primarily during the first half of 2014. The decrease in mobile services revenue was offset by an increase in total mobile RGUs from 773,000 for the nine months ended September 30, 2013 to 932,000 for the nine months ended September 30, 2014, due to the increase in UMTS mobile subscribers to 746,000 for the nine months ended September 30, 2014 compared to 592,000 for the nine months ended September 30, 2013. Although the decline in mobile ARPU was offset by an increase in our lower ARPU UMTS based network subscribers, ARPU from gross adds to our mobile RGUs were generally lower than the ARPU for customers churned. Mobile ARPU was also negatively impacted by highly competitive prices for mobile services, in particular for UMTS based 3G services.

Belgium and Luxembourg: For the nine months ended September 30, 2014, we generated total revenue in Belgium and Luxembourg of €54.0 million, a 1.5% increase compared to €53.2 million for the nine months ended September 30, 2013. As compared to the nine months ended September 30, 2013, for the nine months ended September 30, 2014, our cable based services revenue increased by 0.5% to €45.9 million and our mobile services revenue increased from €0.8 million to €1.0 million.

The increase in cable based services revenue in Belgium and Luxembourg was primarily due to an increase in cable based ARPU by 6.0% to €43.6 in the nine months ended September 30, 2014 compared to €41.1 for the nine months ended September 30, 2013. The increase in cable based services ARPU was due to price increases of some of our triple-play packages in June 2014 and higher sales of our high-end triple-play packages. Cable based services revenue was also positively impacted by a slight increase in broadband internet RGUs which was due to (i) our ability to offer subscribers higher broadband internet connection speeds and increased bandwidth capacity compared to providers relying on alternative technologies such as xDSL and mobile broadband internet networks, (ii) our attractive pricing of broadband internet services and (iii) an increase in the uptake of our triple-play bundles, which include broadband internet services. These factors were offset by a decline in television RGUs, including a net decrease in digital television RGUs, due to customers churning to different platforms such as digital television providers over DSL and satellite operators, customers terminating their television service or having moved out of Coditel's network areas. We also experienced a decline in fixed line telephony RGUs due to the general trend of customers switching to mobile telephony services.

The increase in mobile services revenue was due to an increase in the number of subscribers during the nine months ended September 30, 2014 with 9,000 net adds during this period as compared to the nine months ended September 30, 2013, offset by a decrease in ARPU due to an increase in basic mobile services subscribers.

Portugal: In the nine months ended September 30, 2014, we generated total revenue in Portugal of €140.4 million, a 12.2% decrease compared to €159.9 million in the nine months ended September 30, 2013. As compared to the nine months ended September 30, 2013, for the nine months ended September 30, 2014, our revenue in Portugal for our cable based services decreased by 9.7% and our B2B and other services revenue decreased by 14.8%.

The decrease in cable based services revenue in Portugal was primarily driven by a net decrease in total number of cable RGUs by 31,000, comprising of a net decrease of 13,000 pay television RGUs, 13,000 fixed line telephony RGUs and 4,000 broadband internet RGUs. These were the result of the continuous intense competition in the Portuguese cable services market during 2014, with aggressive promotions and pricing policies adopted by competitors and their increased focus on competing multiple play offerings, as well as the adverse economic conditions and austerity measures in Portugal which had a negative effect on consumer confidence pushing them to opt for cheaper packages. Cable based services ARPU decreased slightly by €1.7, or 4.8%, to €33.4 in the nine months ended September 30, 2014 compared to €35.1 in the nine months ended September 30, 2013, predominantly due to the impact of aggressive competition in each segment of the cable services market which required us to offer certain discounts and undertake other promotional offers, despite an increase in the prices of our products in January 2014. As a result, the ARPU from gross adds to our RGUs were generally lower than the ARPU for customers churned.

The decrease in B2B and other revenue in Portugal was primarily due to the competitiveness in the market. Furthermore, as we renewed contracts with certain of our major clients (data services) who experienced revenue losses, this affected the revenue we generated under these contracts. A decrease in interconnection revenues, due to activity reduction and lower prices of national fixed termination, also contributed to the decrease in B2B and other revenue.

French Overseas Territories: For the nine months ended September 30, 2014, we generated total revenue in the French Overseas Territories, excluding Mobius, of €165.5 million, a 0.5% decrease compared to €166.3 million for the nine months ended September 30, 2013. As compared to the nine months ended September 30, 2013, for the nine months ended September 30, 2014, our revenue in the French Overseas Territories for our cable based services decreased by 4.0% and our mobile services revenue increased by 1.5%.

The €2.5 million decrease in cable based services revenue in the French Overseas Territories was due to (i) a decrease in fixed line revenue of Outremer, which in turn was mainly as a result of a net decrease of 7,000 fixed line telephony RGUs due to continuation in the trend of customers switching from traditional voice telephony towards multiple play VoIP packages and (ii) a decrease in broadband internet services revenue of Outremer which in turn was mainly as a result of a net decrease of 1,000 xDSL broadband internet RGUs and a 6.5% decrease in ARPU due to increased competition, partly as a result of the launch of "Canal Box" by Canal+. This was partially offset by a 4.4% increase in cable based services ARPU with respect to our cable based services offered by Le Cable in Guadeloupe and Martinique to €55.6 for the nine months ended September 30, 2014 compared to €50.8 for the nine months ended September 30, 2013 and a net increase of 26,000 cable RGUs during this period as a result of our strategic focus on triple play offerings reflected in an increase in triple play Cable Customer Relationships by 11,000 to 26,000 as of September 30, 2014 compared to 17,000 as of December 31, 2013.

The €1.6 million increase in mobile services revenue in the French Overseas Territories, all of which is attributable to Outremer, was primarily due to a net increase of 17,000 post-paid mobile subscribers over the period, offset by a decline in prepaid mobile subscribers. This increase was a result of the revamping of Outremer's mobile post-paid offering that was launched in the first half of 2012, particularly due to the success of flat fee rate plans with unlimited calls within the French Overseas Territories and mainland France. Mobile ARPUs increased by €1.7 primarily due to the improvements in our product mix and an increase in the take-up of Outremer's higher value post-paid packages following the revamping of its mobile product offering.

Dominican Republic (ODO): For the nine months ended September 30, 2014, we generated total revenue in the Dominican Republic of €327.4 million, a 2.0% decrease compared to €333.9 million for the nine months ended September 30, 2013.

The decrease in revenue in the Dominican Republic was due to the foreign exchange translation movements between Dominican pesos and the euro, which had a negative impact of €29.0 million in the nine months ended September 30, 2014. At a constant exchange rate, our total revenue increased by 6.8% in the nine months ended September 30, 2014, driven by an increase in both our residential and business post-paid subscribers, with a net addition of 94,000 post-paid subscribers during this period, of which 69.6 were residential subscribers and 24.4 were business subscribers. The increase in post-paid residential subscribers was primarily due to the success of our flexible monthly plans, including low monthly rate subscriptions with the ability to add-on additional services such as data through promotional offers. The increase in post-paid business subscribers was primarily due to the continuous expansion of our enterprise business and a stronger penetration strategy and sales staff dedicated to soliciting more subscribers. This was partially offset by a slight decrease in ODO's mobile ARPU to €9.21 for the nine months ended September 30, 2014 from €9.8 for the nine months ended September 30, 2013, primarily due to the fact that ODO altered its postpaid offerings to tackle competition, resulting in price erosion, and that ODO is encouraging migration from prepaid to postpaid mobile plans and such migrated customers usually opt for basic, lower-cost plans.

Gross Profit

Historical Consolidated Basis

For the nine months ended September 30, 2014, our total gross profit was €1,048.3 million, a 57.4% increase compared to €666.2 million for nine months ended September 30, 2013. Our gross profit by our key regions in the nine months ended September 30, 2013 and 2014 respectively, were: (i) in Israel, €485.0 million and €517.2 million, (ii) in Belgium and Luxembourg, €44.0 million and €45.2 million, (iii) in Portugal, €64.5 million and €80.2 million (gross profit for the nine months ended September 30, 2013 was impacted by the consolidation of ONI only with effect from August 8, 2013 and for the nine months ended September 30, 2014 was impacted by the consolidation of ONI for the entire duration), (iv) in the French Overseas Territories, €50.8 million and €136.0 million (gross profit for the nine months ended September 30, 2013 was impacted by the consolidation of Outremer only with effect from July 5, 2013 and for the nine months ended September 30, 2014 was impacted by the consolidation of Outremer and Mobius for the entire duration) and (v) in the Dominican Republic, nil and €234.1 million (the Altice International Group did not have any activities in the Dominican Republic prior to March 12, 2014). Our gross margin increased from 71.8% in the nine months ended September 30, 2013 to 76.4% in the nine months ended September 30, 2014. Foreign exchange translation movements between the NIS and the euro had a positive impact of €6.7 million on total gross profit. Foreign exchange translation movements between Dominican pesos and the euro had a negative impact of €12.7 million on total gross profit.

Cable based services: For the nine months ended September 30, 2014, our gross profit from our cable based services was €578.1 million, a 7.4% increase compared to €538.3 million for the nine months ended September 30, 2013. The increase was primarily due to the inclusion of cable based services gross profit from Outremer for the entire duration of nine months ended September 30, 2014 of €108.7 million compared to €34.6 million for the nine months ended September 30, 2013, following the consolidation of Outremer on July 5, 2013. Our gross margin for cable based services increased to 80.1% in the nine months ended September 30, 2014 from 79.6% in the nine months ended September 30, 2013. Foreign exchange translation movements between the NIS and the euro had a positive impact of €5.5 million on gross profit for our cable based services.

Mobile services: For the nine months ended September 30, 2014, our gross profit from our mobile services increased to €339.1 million compared to €82.1 million in the previous year. The increase was predominantly due to the inclusion of mobile based services gross profit from ODO of €171.6 million for the nine months ended September 30, 2014, following the consolidation of ODO on April 9, 2014. Our gross margin for mobile based services increased to 74.1% in the nine months ended September 30, 2014 from 46.7% in the nine months ended September 30, 2013. Foreign exchange translation movements between the NIS and the euro had a positive impact of €1.2 million.

B2B and others: For the nine months ended September 30, 2014, our gross profit from B2B and others was €131.1 million, a 187.3% increase compared to €45.6 million for the nine months ended September 30, 2013. Our gross margin for B2B and other services decreased from 78.6% in the nine months ended September 30, 2013 to 67.9% in the nine months ended September 30, 2014. The increase in gross profit was primarily due to inclusion of B2B and other services gross profit of ONI of €28.6 million for the entire duration of the nine months ended September 30, 2014 compared to €7.2 million for the nine months ended September 30, 2013, following the consolidation of ONI on August 5, 2013.

Pro Forma Consolidated Basis

The following table sets forth our purchasing and subcontracting services by country of operation and on a Pro Forma Consolidated Basis based on the Pre- PT Transaction Pro Forma Financial Information.

	Pre-PT Transaction Pro Forma Financial Information(5)													
	For the nine months ended September 30,													
	2013							2014						
	Israel	Belgium & Luxembourg	Portugal	French Overseas Territories(2)	Dominican Republic(4)	Others(1)	Total	Israel	Belgium & Luxembourg	Portugal	French Overseas Territories(2)	Dominican Republic(4)	Others(1)	Total(3)
	€ in millions													
Purchasing and subcontracting services

(1) Others include our B2B telecommunications solutions business and datacenter operations in Switzerland (Green and Green Datacenter), our datacenter operations in France (Auberimmo) and our content production and distribution businesses in France and Luxembourg (Ma Chaîne Sport and SportV). We disposed of our interests in Valvision (which was included in Others) in 2013 to the Numericable Group. Green Datacenter and Auberimmo are designated as unrestricted subsidiaries under the terms governing the indebtedness of the Group. For the nine months ended September 30, 2014, it also includes the contribution made by Tricom from March 12, 2014. See note 3 below for details.

(2) For the French Overseas Territories, cable based services includes purchasing and subcontracting services for cable based services we provide in Guadeloupe and Martinique as well as the xDSL based broadband internet (including IPTV) and fixed-line telephony services we provide in Guadeloupe, Martinique, French Guiana, La Réunion and Mayotte. For the nine months ended September 30, 2014 it also includes the contribution of Mobius. See note 3 below for details.

(3) Total purchasing and subcontracting services costs for the nine months ended September 30, 2014 includes the contribution of Mobius since its consolidation into the Altice International Group from January 1, 2014. For the nine months ended September 30, 2014, Mobius generated €4.0 million of purchasing and subcontracting services costs in B2B and other. Mobius has no other revenue streams. Total purchasing and subcontracting services for the nine months ended September 30, 2014 also includes the contribution made by Tricom from March 12, 2014. For the nine months ended September 30, 2014, Tricom generated total purchasing and subcontracting services costs of €17.6 million, cable based service purchasing and subcontracting services costs of €14.1 million, mobile services purchasing and subcontracting services costs of €2.2 million and B2B/Other purchasing and subcontracting services of €1.3 million. Mobius and Tricom did not have an impact in the Pre-PT Transaction Pro Forma Financial Information for the nine months ended September 30, 2013.

(4) Excludes Tricom.

(5) Pre-PT Transaction Pro Forma Financial Information for the nine months ended September 30, 2013 and 2014, respectively, gives pro forma effect to the acquisition of ODO, but does not give pro forma effect to the acquisition of PT Portugal, Tricom and Mobius nor the disposal of our mobile network assets in Mayotte and La Réunion which we have committed to undertake. Since the financial information for Tricom

and Mobius have been consolidated into the Historical Consolidated Financial Information of the Altice International Group from January 1, 2014 and March 12, 2014, respectively, following the consummation of the Mobius Acquisition on January 1, 2014 and the Tricom Acquisition on March, 12, 2014, the Pre-PT Transaction Pro Forma Financial Information for the nine months ended September 30, 2014 includes the contribution of Tricom and Mobius from the periods for which each of these entities have been consolidated.

Israel: For the nine months ended September 30, 2014, our purchasing and subcontracting services costs in Israel were €128.7 million, a 30.2% decrease compared to €184.4 million for the nine months ended September 30, 2013. As compared to the nine months ended September 30, 2013, for the nine months ended September 30, 2014, our purchasing and subcontracting services costs for cable based services decreased by 14.9% and our purchasing and subcontracting services costs for mobile services decreased by 49.2%. Foreign exchange translation movements between NIS and euro had a negative impact of increasing purchasing and subcontracting services costs by €1.6 million (including €1.1 million of cable based services purchasing and subcontracting services costs and €0.5 million of mobile services purchasing and subcontracting services costs). Accordingly, at a constant exchange rate, our total purchasing and subcontracting services costs in Israel decreased by 31.1%, our cable based service purchasing and subcontracting services costs decreased by 15.9% and our purchasing and subcontracting services costs for mobile services decreased by 49.8%.

The decrease in purchasing and subcontracting services costs for cable based services in Israel was due to (i) a decrease in interconnection fees paid as a result of lower fixed-line telephony call volumes by our customers with fixed-line telephony customers switching to mobile services, with the latter providing competitive prices and unlimited price plan packages, (ii) a decrease in the interconnection fees for fixed-line (thereby having a greater impact in the nine months ended September 30, 2014) telephony services which came into effect in December 2013, as a result of changes to the regulation implemented by the Ministry of Communication, (iii) the positive effect of renegotiated movie channel contracts, and (iv) the change in the amortization rate for certain productions since April 1, 2013, allowing us to amortize related costs over a three year period as opposed to the previous one year period, reflecting the fact that consumers make use of the content subscription for more than one year.

The decrease in purchasing and subcontracting services costs for mobile services in Israel was primarily due to a decrease in interconnection fees stemming from the decrease in national roaming costs as a result of the arrangements we have with Partner under the RoU.

Belgium and Luxembourg: For the nine months ended September 30, 2014, our purchasing and subcontracting services costs in Belgium and Luxembourg were €8.8 million, a 3.2% decrease compared to €9.1 million for the nine months ended September 30, 2013. As compared to the nine months ended September 30, 2013, for the nine months ended September 30, 2014 our purchasing and subcontracting services costs for cable based services increased by 0.8% and our purchasing and subcontracting services costs for B2B services decreased by 79.4% (from €1.4 million to €0.3 million). We began providing mobile services in Belgium as a MVNO in September 2012 and incurred purchasing and subcontracting services costs of €0.7 million and €1.2 million for the nine months ended September 30, 2013 and 2014, respectively.

The slight increase in purchasing and subcontracting services costs for cable based services was due to higher programming expenses.

The decrease in purchasing and subcontracting services costs for B2B services was due to (i) the nature of B2B projects undertaken in 2014 (for which costs were primarily in the form of capital expenditures) as compared to the same period in the previous year and (ii) the decrease in promotional offers and incentives during the nine months ended September 30, 2014, as compared to the offers and incentives we offered during the same period in the previous year.

The increase in purchasing and subcontracting services costs for mobile services was due to an increase in subscribers, in particular, subscribers with high usage rates which in turn also resulted in higher fees payable to our MNVO provider.

Portugal: For nine months ended September 30, 2014, our purchasing and subcontracting services costs in Portugal were €60.2 million, a 11.1% decrease compared to €67.7 million for the nine months ended September 30, 2013. As compared to the nine months ended September 30, 2013, for the nine months ended September 30, 2014, our purchasing and subcontracting services costs for each of cable based services decreased by 11.1% and B2B and others based purchasing and subcontracting services costs decreased by 10.9%.

The 11.1% decrease in purchasing and subcontracting services costs for cable based services in Portugal was primarily due to lower sales and the operational optimization program implemented by the Altice International Group following the acquisition Cabovisão in February 2012.

The 10.9% decrease in costs of sales for B2B and others in Portugal was due to the lower level of ONI's activity and the reduction in national fixed termination prices. Cost reduction measures such as the renegotiations of supplier contacts and revisions to the costs associated with technical solutions were also undertaken to reduce the impact of re-negotiated pricing terms with some of our larger clients to avoid a negative impact on margins.

French Overseas Territories: For the nine months ended September 30, 2014, our purchasing and subcontracting services costs in the French Overseas Territories, excluding Mobius, were €45.5 million, a 6.7% decrease compared to €48.8 million for the nine months ended September 30, 2013. As compared to the nine months ended September 30, 2013, for the nine months ended September 30, 2014, our purchasing and subcontracting services costs for cable based services decreased by 23.6% and our purchasing and subcontracting services costs for mobile services increased by 2.5%.

The decrease in purchasing and subcontracting services costs for cable based services in the French Overseas Territories was primarily due to the decrease in Outremer's fixed-line telephony and xDSL broadband internet RGUs.

The increase in purchasing and subcontracting services costs for mobile services in the French Overseas Territories was mainly due to the increase in post-paid RGUs and interconnections costs with the success of Outremer's flat-fee rate plans which include unlimited calls.

Dominican Republic (ODO): For the nine months ended September 30, 2014, our purchasing and subcontracting services cost in the Dominican Republic, all of which relates to the mobile services provided by ODO, were €76.2 million, a 24.9% decrease compared to €101.5 million for the nine months ended September 30, 2013.

The €20.3 million decrease in mobile services revenue in the Dominican Republic was due to the foreign exchange translation movements between Dominican pesos and the euro, which had a negative impact of € 5.2 million in the nine months ended September 30, 2014. At a constant exchange rate, our purchasing and subcontracting services costs increased by 8.3%, predominantly due to an increase in the activity, offset by the reclassification of certain commercial costs previously recorded as sales and marketing expenses.

As a result of the factors described above, our gross profit and gross margin by country of operation on a pro forma consolidated basis based on the Pre-PT Transaction Pro Forma Financial Information for the nine months ended September 2014 and 2013, respectively:

(1) Others include our B2B telecommunications solutions business and datacenter operations in Switzerland (Green and Green Datacenter), our datacenter operations in France (Auberimmo) and our content production and distribution businesses in France and Luxembourg (Ma Chaîne Sport and SportV). We disposed of our interests in Valvision (which was included in Others) in 2013 to the Numericable Group. Green Datacenter and Auberimmo are designated as unrestricted subsidiaries under the terms governing the indebtedness of the Group. For the nine months ended September 30, 2014, it also includes the contribution made by Tricom from March 12, 2014. See note 3 hereto for details.

(2) For the French Overseas Territories, cable based services includes gross profit and gross margin for cable based services we provide in Guadeloupe and Martinique as well as the xDSL based broadband internet (including IPTV) and fixed-line telephony services we provide in Guadeloupe, Martinique, French Guiana, La Réunion and Mayotte. For the nine months ended September 30, 2014, it also includes the contribution for Mobius. See note 3 below for details.

(3) Total gross profit and total gross margin for the nine months ended September 30, 2014, includes the contribution of Mobius since its consolidation into the Altice International Group from January 1, 2014. For the nine months ended September 30, 2014, Mobius generated a gross profit of €9.3 million and a gross margin of 70.1% in B2B and other. Mobius has no other revenue streams. Total gross profit for nine

months ended September 30, 2014 also includes the contribution made by Tricom from March, 2014. For the nine months ended September 30, 2014, Tricom generated a gross profit of €64.4 million and a gross margin of 28.0%, cable based service gross profit of €5.5 million and cable based service gross margin of 28.0%, mobile services gross profit of € 5.7 million and mobile services gross margin of 72.2% and B2B/Other gross profit of €53.1 million and B2B/Other gross margin of 97.6%.

(4) Excludes Tricom.

(5) Pre-PT Transaction Pro Forma Financial Information for the nine months ended September 30, 2013 and 2014, respectively, gives pro forma effect to the acquisition of ODO, but does not give pro forma effect to the acquisition of PT Portugal, Tricom and Mobius nor the disposal of our mobile network assets in Mayotte and La Réunion which we have committed to undertake. Since the financial information for Tricom and Mobius have been consolidated into the Historical Consolidated Financial Information of the Altice International Group from January 1, 2014 and March 12, 2014, respectively, following the consummation of the Mobius Acquisition on January 1, 2014 and the Tricom Acquisition on March, 12, 2014, the Pre-PT Transaction Pro Forma Financial Information for the nine months ended September 30, 2014 includes the contribution of Tricom and Mobius from the periods for which each of these entities have been consolidated.

Foreign exchange translation movements between the NIS and euro had a positive impact of €6.7 million on total gross profit in Israel, including €5.5 million for cable-based services and €1.2 million for mobile services. Foreign exchange translation movements between the Dominican peso and euro had a negative impact of €19.9 million on total gross profit in the Dominican Republic.

Operating Expenses and EBITDA

Historical Consolidated Basis

For the nine months ended September 30, 2014, our total operating expenses (other than purchasing and subcontracting services costs) were € 421.4 million, a 45.8% increase compared to €289.1 million for the nine months ended September 30, 2013. Our total operating expenses comprise of other operating expenses, which increased by 27.2%, general and administrative expenses, which increased by 53.3% and other sales and marketing expenses, which increased by 188.8%, in each case in the nine months ended September 30, 2014, compared to the nine months ended September 30, 2013.

Our total operating expenses by our key regions in the nine months ended September 30, 2013 and 2014, respectively, were: (i) in Israel, € 215.1 million and €202.6 million, (ii) in Belgium and Luxembourg, €8.6 million and €8.9 million, (iii) in Portugal, €28.7 million and €35.9 million (operating expenses for the nine months ended September 30, 2013 were impacted by the consolidation of ONI into the Altice International Group only with effect from August 8, 2013, and operating expenses for the nine months ended September 30, 2014, were impacted by the consolidation of ONI for the entire duration) (iv) in the French Overseas Territories, €22.3 million and €63.4 million (operating expenses for the nine months ended September 30, 2013, was impacted by the consolidation of Outremer with effect from July 5, 2013 and for the nine months ended September 30, 2014 were impacted by the consolidation of Outremer for the entire duration and (v) in the Dominican Republic, nil and €89.1 million (the Altice International Group did not have any operations in the Dominican Republic prior to March 12, 2014).

We define EBITDA in our Historical Consolidated Financial Statements as operating profit before depreciation and amortization, goodwill impairment, other expenses, net, management fees and restructuring and other non-recurring costs.

As a result, for the nine months ended September 30, 2014, our EBITDA increased to €627.0 million a 66.3% increase compared to € 377.1 million for the nine months ended September 30, 2013. Our EBITDA by our key regions for the nine months ended September 30, 2013 and 2014, respectively, were: (i) in Israel, €269.9 million and € 314.6 million, (ii) in Belgium and Luxembourg, €35.4 million and €36.3 million, (iii) in Portugal, €35.8 million and €44.3 million (EBITDA for the nine months ended September 30, 2013 was impacted by the consolidation of ONI only with effect from August 8, 2013 and EBITDA for the nine months ended September 30, 2014 was impacted by the consolidation of ONI for the entire duration), (iv) in the French Overseas Territories, €28.5 million and €72.7 million due to the fact that EBITDA for the nine months ended September 30, 2013 was impacted by the consolidation of Outremer only with effect from July 5, 2013 and that EBITDA for the nine months ended September 30, 2014 was impacted by the consolidation of Outremer for the entire duration and (v) in the Dominican Republic, nil and €145.0 million (the Altice International Group did not have any operations in the Dominican Republic prior to March 12, 2014).

Pro Forma Consolidated Basis

The following paragraphs set forth our total operating expenses by country of operation and on a pro forma consolidated basis based on the Pre-PT Transaction Pro Forma Financial Information.

For the nine months ended September 30, 2014, our total operating expenses were €457.4 million, a 2.8% increase compared to € 444.9 million for the nine months ended September 30, 2013.

Israel: For the nine months ended September 30, 2014, our total operating expenses in Israel were €202.6 million, a 5.8% decrease compared to €215.1 million for the nine months ended September 30, 2013. Foreign exchange translation movements between NIS and euro had the impact of increasing operating expenses by €2.6 million. Accordingly, at a constant exchange rate, our total operating expenses in Israel decreased by 7.0%.

Other operating expenses: As compared to the nine months ended September 30, 2013, for the nine months ended September 30, 2014 our other operating expenses in Israel decreased by 9.7% from €157.9 million to €142.5 million. This decrease was primarily due to a decrease in salaries and social benefits and a reduction in head count as part of the measures implemented to maximize cost structure efficiency. In addition, in July 2013, our customer services and technical support functions were outsourced which also contributed to the decrease in salaries and social benefits expenses, partially offset by an increase in costs relating to the outsourcing of customer and technical services. The decrease of other operating expenses was also impacted by a decrease in cable network maintenance and set-top box maintenance expenses due to recent investments leading to the improvement of our network and a more efficient maintenance process for set-top boxes.

General and administrative expenses: As compared to the nine months ended September 30, 2013, for the nine months ended September 30, 2014 our general and administrative expenses in Israel increased by 4.3% from €20.8 million to €21.7 million. This increase was primarily due to an increase in employee costs.

Other sales and marketing expenses: As compared to the nine months ended September 30, 2013, for the nine months ended September 30, 2014, our other sales and marketing expenses in Israel increased by 5.2% from € 36.4 million to €38.4 million. Compared to the prior year period, our sales and marketing expenses increased as a result of an increase in advertising costs including advertising costs relating to the campaigns for the launch of our net set-top box “FiberBox” in March 2014 and our high-speed internet “200Mg” in May 2014 as well as an increase in advertising costs for our mobile handsets in June 2014.

EBITDA: As a result of the factors discussed above, for the nine months ended September 30, 2014, in Israel our EBITDA was €314.6 million, a 16.6% increase compared to €269.9 million for the nine months ended September 30, 2013 and our EBITDA margin was 48.7% in the nine months ended September 30, 2014 compared to 40.3% in the nine months ended September 30, 2013. Foreign exchange translation movements between the NIS and euro had a positive impact of €4.1 million on total EBITDA.

Belgium and Luxembourg: For the nine months ended September 30, 2014, our total operating expenses in Belgium and Luxembourg were € 8.9 million, an increase of 2.7% compared to €8.6 million for the nine months ended September 30, 2013.

Other operating expenses: As compared to the nine months ended September 30, 2013, for the nine months ended September 30, 2014 our other operating expenses in Belgium and Luxembourg increased from € 2.7 million to €4.1 million. This increase was primarily due to an increase in customer service costs relating to higher bad or overdue debt for the nine months ended September 30, 2014, compared to the nine months ended September 30, 2013, and higher technical maintenance staff expenses mainly due to cost of living adjustments.

General and administrative expenses: General and administrative costs decreased from €4.8 million for the nine months ended September 30, 2013, to €2.8 million for the nine months ended September 30, 2014, due to a decrease in costs from external consultants.

Other sales and marketing expenses: As compared to the nine months ended September 30, 2013, for the nine months ended September 30, 2014, our other sales and marketing expenses in Belgium and Luxembourg increased from €1.2 million to €1.9 million. This decrease can be attributed to higher sales and marketing expenses for the nine months ended September 30, 2013, associated with the launch of “LaBox”.

EBITDA: As a result of the factors discussed above, for the nine months ended September 30, 2014, our EBITDA in Belgium and Luxembourg was € 36.3 million, a 2.5% increase compared to €35.4 million for the nine months ended September 30, 2013. Our EBITDA margin was 67.2% in the nine months ended September 30, 2014 compared to 66.5% in the nine months ended September 30, 2013.

Portugal

In the nine months ended September 30, 2014, our total operating expenses in Portugal were €35.9 million, a 23.9% decrease compared to € 47.2 million for the nine months ended September 30, 2013. This decrease was due to a lower level of activities in the nine months ended September 30, 2014 compared to the prior year period and the continued effect of the operational optimization program implemented by the Altice International Group following the acquisitions of Cabovisão in February 2012 and ONI in August 2013.

Other operating expenses: For the nine months ended September 30, 2014 our other operating expenses in Portugal decreased by 28.0% to € 21.2 million, compared to €29.5 million for the nine months ended September 30, 2013. This decrease mainly reflects strong cost reductions in outsourcing services and personnel and contract renegotiations at ONI after its acquisition by the Altice International Group in August 2013.

General and administrative expenses: As compared to the nine months ended September 30, 2013, for the nine months ended September 30, 2014 our general and administrative expenses in Portugal decreased by 31.4% from €10.5 million to €7.2 million. This decrease was primarily due to savings at both Cabovisão and ONI resulting from (i) headcount reductions in corporate and administrative staff and (ii) the cancelation and renegotiation of several contracts for administrative services.

Other sales and marketing expenses: As compared to the nine months ended September 30, 2013, for the nine months ended September 30, 2014 our other sales and marketing expenses in Portugal increased by 4.1% from € 7.3 million to €7.6 million.

EBITDA: As a result of the factors discussed, in the nine months ended September 30, 2014, our EBITDA in Portugal was €44.3 million, a decrease of 1.9% compared to €45.1 million in the nine months ended September 30, 2013. Our EBITDA margin was 31.5% in the nine months ended September 30, 2014 compared to 28.2% in the nine months ended September 30, 2013.

French Overseas Territories: For the nine months ended September 30, 2014, our total operating expenses in the French Overseas Territories, excluding Mobius, were €50.4 million, a 9.2% decrease compared to €55.5 million for the nine months ended September 30, 2013.

Other operating expenses: As compared to the nine months ended September 30, 2013, for the nine months ended September 30, 2014, our other operating expenses in the French Overseas Territories, excluding Mobius, remained fairly stable at €32.8 million, compared to €32.2 million for the nine months ended September 30, 2013. The cost savings achieved in IT and network maintenance cost were offset by increased costs related to measures taken to improve quality of service, in particular the densification of mobile networks.

General and administrative expenses: As compared to the nine months ended September 30, 2013, for the nine months ended September 30, 2014, our general and administrative expenses in the French Overseas Territories, excluding Mobius, decreased by 29.9% from €12.1 million to €8.5 million. This decrease was due to measures taken to reduce rental, travel, legal and other expenses as well as a reduction in non-recurring expenses indirectly related to the acquisition of Outremer by Altice International which impacted the general and administrative expenses for the nine months ended September 30, 2013.

Other sales and marketing expenses: As compared to the nine months ended September 30, 2013, for the nine months ended September 30, 2014, our other sales and marketing expenses in the French Overseas Territories decreased, excluding Mobius, by 18.1% from €11.2 million to € 9.2 million. This decrease was primarily due to the decrease in the level of retention and acquisition subsidies for mobile subscribers and a lower number of new products and offers being launched in 2014.

EBITDA: As a result of the factors discussed, for the nine months ended September 30, 2014, our EBITDA in the French Overseas Territories, excluding Mobius, was €69.5 million, a 11.9% increase compared to €62.1 million for the nine months ended September 30, 2013. Our EBITDA margin was 42.0% in the nine months ended September 30, 2014 compared to 37.3% in the nine months ended September 30, 2013.

Dominican Republic (ODO): For the nine months ended September 30, 2014, our total operating expenses in the Dominican Republic, excluding Tricom, were €101.3 million, a 0.7% increase compared to €100.7 million for the nine months ended September 30, 2013.

Other operating expenses: As compared to the nine months ended September 30, 2013, for the nine months ended September 30, 2014 our other operating expenses in the Dominican Republic, excluding Tricom, increased by 39.7% from €24.7 million to €34.5 million.

General and administrative expenses: As compared to the nine months ended September 30, 2013, for the nine months ended September 30, 2014 our general and administrative expenses in the Dominican Republic, excluding Tricom, decreased by 74.8% from €33.7 million to € 8.5 million. This decrease was primarily due to renegotiations of supplier contracts and streamlining of costs following the acquisition ODO by the Altice International Group.

Other sales and marketing expenses: As compared to the nine months ended September 30, 2013, for the nine months ended September 30, 2014, our other sales and marketing expenses in the Dominican Republic, excluding Tricom, increased by 38.1% from €42.3 million to €58.4 million. This increase was primarily due to the volume of retained and new customers in our post-paid segment.

EBITDA: As a result of the factors discussed, for the nine months ended September 30, 2014, our EBITDA in the Dominican Republic, excluding Tricom, was €150.0 million, a 13.9% increase compared to € 131.7 million for the nine months ended September 30, 2013. Our EBITDA margin was 45.8% in the nine months ended September 30, 2014 compared to 39.4% in the nine months ended September 30, 2013.

The following tables set forth our EBITDA across our segments for the nine months ended September 30, 2013 and 2014 a pro forma basis.

	Pre-PT Transaction Pro Forma Financial Information[5]													
	For the nine months ended September 30,													
	2013							2014						
	Israel	Belgium & Luxembourg	Portugal	French Overseas Territories[3]	Dominican Republic[5]	Others[2]	Total	Israel	Belgium & Luxembourg	Portugal	French Overseas Territories[3]	Dominican Republic[5]	Others[2]	Total[4]
	€ in millions													
EBITDA[1]	269.9	35.4	45.1	62.1	131.7	17.7	561.5	314.6	36.3	44.3	72.7	150.0	54.6	672.3

(1) The Company defines EBITDA as operating profit before depreciation and amortization, goodwill impairment, other expenses, net, management fees, restructuring and other non-recurring costs.

(2) Comprises (i) €9.8 million and €10.5 million of EBITDA generated by our content production and distribution businesses for the nine months ended September 30, 2013 and 2014, respectively, (ii) €12.9 million and €12.5 million of EBITDA generated by Green Datacenter/Green for the nine months ended September 30, 2013 and 2014, respectively, and (iii) €9.6 million and €5.3 million of negative EBITDA generated by our other holding entities (including corporate expenses) for the nine months ended September 30, 2013 and 2014, respectively. For the nine months ended September 30, 2014, it also comprises the EBITDA generated by the Tricom since March 12, 2014. See note 4 below for details.

(3) For the nine months ended September 30, 2014, it also includes the contribution of Mobius. See note 3 hereto for details.

(4) Total EBITDA for the nine months ended September 30, 2014 includes the contribution of Mobius since its consolidation into the Altice International Group from January 1, 2014. For the nine months ended September 30, 2014, Mobius generated €3.1 million of EBITDA. Total EBITDA for the nine months ended September 30, 2014 also includes the contribution made by Tricom from March 12, 2014. For the nine months ended September 30, 2014, Tricom generated €40.5 million of EBITDA. Mobius and Tricom did not have any impact on the Pre-PT Transaction Pro Forma Financial Information for the nine months ended September 30, 2013.

(5) Excludes Tricom.

(6) Pre-PT Transaction Pro Forma Financial Information for the nine months ended September 30, 2013 and 2014, respectively, gives pro forma effect to the acquisition of ODO, but does not give pro forma effect to the acquisition of PT Portugal, Tricom and Mobius nor the disposal of our mobile network assets in Mayotte and La Réunion which we have committed to undertake. Since the financial information for Tricom and Mobius have been consolidated into the Historical Consolidated Financial Information of the Altice International Group from January 1, 2014 and March 12, 2014, respectively, following the consummation of the Mobius Acquisition on January 1, 2014 and the Tricom Acquisition on March, 12, 2014, the Pre-PT/ODO Transactions Pro Forma Financial Information for the nine months ended September 30, 2014 includes the contribution of Tricom and Mobius from the periods for which each of these entities have been consolidated.

Depreciation and Amortization

Historical Consolidated Basis

For the nine months ended September 30, 2014, depreciation and amortization on a historical consolidated basis totalled €397.6 million, a 43.0% increase compared to €278.0 million for the nine months ended September 30, 2013. Depreciation and amortization in the nine months ended September 30, 2014 was impacted by (i) the consolidation of Outremer and ONI for the entire duration of nine months ended September 30, 2014 and (ii) the impact of the consolidation of Tricom and ODO from March 12, 2014 and April 9, 2014, respectively.

Operating Profit

Historical Consolidated Basis

For the nine months ended September 30, 2014, on a historical consolidated basis, (i) management fees primarily relating to consulting services totalled €0.6 million compared to €0.7 million for the nine months ended September 30, 2013, and (ii) restructuring and other non-recurring costs and other expenses totalled €58.5 million compared to restructuring and other non-recurring costs of €12.3 million for the nine months ended September 30, 2013, due to (x) the implementation of cost restructuring measures at ONI, ODO and Tricom, (y) fees and other expenses paid to external consultants in relation to mergers and acquisitions activity in the first three quarters of 2014 and (z) due to restructuring costs at HOT Mobile of €15.1 million.

As a result of the factors described above, for the nine months ended September 30, 2014, our operating profit was €170.3 million, compared to an operating profit of €86.1 million for the nine months ended September 30, 2013.

Finance costs (net)

Historical Consolidated Basis

For the nine months ended September 30, 2014, on a historical consolidated basis, our net finance costs totalled €302.2 million, a 104.1% increase compared to €148.1 million for the nine months ended September 30, 2014 which was primarily due to (i) the incurrence of debt to finance the acquisitions of ODO and Tricom (€65.4 million impact for the nine months ended September 30, 2014), (ii) the full period impact of the interest payments relating to the 2013 Term Loan (€ 32.6 million impact for the nine months ended September 30, 2014) and (iii) the increase in the financial expenses incurred due to the variation in the marked-to-market accounting of the various hedges in place at the Altice International level.

Income tax benefits/ (expenses)

Historical Consolidated Basis

For the nine months ended September 30, 2014, on a historical consolidated basis, our total income tax expense was €27.6 million compared to an income tax expense of €27.4 million for the nine months ended September 30, 2013 which was primarily due to an income tax expense of €33.6 million driven by an increase in profits in Israel and the Dominican Republic, which was offset by deferred tax credits of €7.5 million. For the nine months ended September 30, 2013, the income tax expense mainly consisted of deferred tax expenses amounting to €21.9 million

Profit/ (loss) for the period

Historical Consolidated Basis

As a result of the factors discussed above, on a historical consolidated basis, for the nine months ended September 30, 2014, our loss for the period was €159.6 million compared to a loss of €89.4 million for the nine months ended September 30, 2013.

(1) Pre-PT/ODO Transactions Pro Forma Financial Information does not give pro forma effect to the acquisition of PT Portugal, ODO, Tricom and Mobius nor the disposal of our mobile network assets in Mayotte and La Réunion which we have committed to undertake.

(2) For the Historical Financial Information "Other operating expenses" also includes staff costs and employee benefits expenses. Also includes staff costs and employee benefits expenses. Prior to the year ended December 31, 2013, staff costs and employee benefits were recorded under the line items "Other operating expenses", "General and administrative expenses" and "Other sales and marketing expenses", depending on the costs which they related to. Beginning with the year ended December 31, 2013, such staff costs and employee benefits have been accounted for in a separate line item and reflect total staff costs for all functions. See the historical financial statements for the year ended December 31, 2013 elsewhere in these Listing Particulars for further details. For comparative purposes staff and employee costs have been reclassified for the year ended December 31, 2012 to match the new reporting method of the Altice International Group. For the Pre- PT/ODO Transactions Pro Forma Financial Information, staff costs and employee benefits expenses are accounted for under the line items "Other operating expenses", "General and administrative expenses" and "Other sales and marketing expenses", depending on the costs which they related to.

Significant Events Affecting Historical Results

Our results of operations for the year ended December 31, 2013 and December 31, 2012 were significantly impacted by the following events:

- In February 2012, Altice International acquired a controlling equity interest in Cabovisão (the results of which are consolidated in the Historical Consolidated Financial Information of Altice International with effect from February 29, 2012). Cabovisão contributed €98.2 million to revenue, €20.0 million to operating loss and €29.8 million to EBITDA of the Company on a consolidated basis, in the twelve months ended December 31, 2012 since February 29, 2012. In the first two months of 2012, Cabovisão had €19.8 million of revenue, €1.5 million of operating profit and €2.6 million of EBITDA, which are not consolidated in the Historical Consolidated Financial Information of Altice International. In the first quarter of 2013, Altice International acquired the remaining equity interests in Cabovisão it did not already own.

- In the third quarter of 2013 Altice International acquired a controlling equity interest in Outremer (the financial information of which is consolidated in the Historical Consolidated Financial Information with effect from July 5, 2013). Outremer contributed €102.1 million to revenue, €13.5 million to operating profit and €38.3 million to EBITDA of Altice International on a consolidated basis in the twelve months ended December 31, 2013 since July 5, 2013. For the period from January 1 to July 5, 2013, Outremer had €96.5 million of revenue, €19.4 million of operating profit and €33.2 million of EBITDA, which are not consolidated in the Historical Consolidated Financial Information of the Company.

- In the third quarter of 2013, Altice International acquired a 100% equity interest in ONI (through its indirect subsidiary Cabovisão), the financial information of which is consolidated in the Historical Consolidated Financial Information of Altice International with effect from August 8, 2013. ONI contributed €41.8 million to revenue, €4.9 million to operating loss and €5.7 million to EBITDA of Altice International on a consolidated basis in the twelve months ended December 31, 2013 since August 8, 2013. For the period from January 1 until August 8, 2013, ONI had €59.0 million of revenue, €2.7 million of operating loss and €9.4 million of EBITDA, which are not consolidated in the Historical Consolidated Financial Information of Altice International.

- In the fourth quarter of 2013, Altice International acquired a controlling interest in Ma Chaîne Sport S.A.S and SportV, two content producers based in France and Luxembourg respectively, the financial information of which is consolidated in the Historical Consolidated Financial Information of Altice International with effect from October 4,

2013. The two entities contributed €6.4 million to revenue, €0.3 million to operating profit and €3.3 million to the EBITDA of Altice International on a consolidated basis in the twelve months ended December 31, 2013 since October 4, 2013. For the period from January 1, 2013 until October 4, 2013, the two companies had €18.3 million of revenue, €2.9 million of operating profit and €10.7 million of EBITDA which are not consolidated in the Historical Consolidated Financial Information of Altice International.

Revenue

Historical Consolidated Basis

For the year ended December 31, 2013, we generated total revenue of €1,286.8 million, a 17.8% increase compared to €1,092.4 million for the year ended December 31, 2012. Our total revenue by our key regions in the twelve months ended December 31, 2013 and 2012, respectively, were: (i) in Israel, €881.9 million and €850.4 million, (ii) Belgium and Luxembourg, €72.0 million and €71.3 million, (iii) in Portugal, €150.5 million and €98.2 million (revenue for the year ended December 31, 2012 was impacted by the consolidation of Cabovisão only with effect from February 29, 2012, and revenue for the year ended December 31, 2013, was impacted by the consolidation of ONI only with effect from August 8, 2013), and (iv) in the French Overseas Territories, €126.9 million and €24.4 million (revenue for the year ended December 31, 2012 and 2013 were impacted by the consolidation of Outremer only with effect from July 5, 2013). Foreign exchange translation movements between the NIS and the euro had a positive impact of €29.0 million on total revenue.

Cable based services: For the year ended December 31, 2013, we generated cable based services revenue of €891.9 million, a 2.1% increase compared to €873.3 million for the year ended December 31, 2012. The increase was primarily due to the inclusion of cable based services revenue of €108.7 million from Portugal for the entire duration of twelve months ended December 31, 2013 compared to €98.2 million for the year ended December 31, 2012, following the acquisition of Cabovisão on February 29, 2012, the inclusion of Outremer's cable based services revenue of €27.1 million for the year ended December 31, 2013 (with effect from July 5, 2013). In addition, cable based services revenue increased in Israel due to the factors discussed below. Foreign exchange translation movements between the NIS and the euro had a negative impact of €23.9 million on cable based service revenue.

Mobile services: For the year ended December 31, 2013, we generated mobile services revenue of €256.2 million, a 48.3% increase compared to €172.7 million for the year ended December 31, 2013. This was primarily due to an increase in Israel's mobile services revenue due to the factors discussed below and the inclusion of €67.3 million in mobile services revenue generated by Outremer for the year ended December 31, 2013 (with effect from July 5, 2013). Foreign exchange translation movements between the NIS and the euro had a positive impact of €6.2 million on mobile revenues.

B2B and others: For the year ended December 31, 2013, we generated B2B and other services revenue of €138.6 million, compared to €46.4 million for the year ended December 31, 2012, predominantly due to the inclusion of €41.8 million in B2B services revenue generated by ONI and due to the inclusion of revenue from the content companies Ma Chaîne Sport and SportV acquired in the fourth quarter of 2013 (€6.4 million from October 4, 2013 onwards).

Pro Forma Consolidated Basis and Aggregated Basis

The following table sets forth our revenue by country of operation and on a Pro Forma Consolidated Basis based on the Pre-PT/ODO Transactions Pro Forma Financial Information with respect to the year ended December 31, 2013 and on aggregated basis based on the Illustrative Aggregated Selected Financial Information with respect to the year ended December 31, 2012.

	Illustrative Aggregated Selected Financial Information — For the year ended December 31, 2012						Pre-PT/ODO Transactions Pro Forma Financial Information(4) — For the year ended December 31, 2013					
	Israel	Belgium & Luxembourg	Portugal	French Overseas Territories(2)	Others(1)	Total	Israel(3)	Belgium & Luxembourg	Portugal	French Overseas Territories(2)	Others(1)	Total
	€ in millions											
Revenue												
Cable based services	677.9	59.7	118.0	87.8	2.4	945.7	694.2	60.9	108.7	89.6	1.3	954.7
Mobile Services	172.5	0.2	—	131.7	—	304.4	187.6	1.2	—	133.9	—	322.8
B2B and others	—	11.5	117.4	—	62.7	191.6	—	8.4	100.9	—	73.9	183.1
Total Revenue	**850.4**	**71.3**	**235.4**	**219.6**	**65.2**	**1,441.8**	**881.9**	**70.5**	**209.6**	**223.5**	**75.2**	**1,460.7**

(1) Others include our B2B telecommunications solutions business and datacenter operations in Switzerland (Green and Green Datacenter), our datacenter operations in France (Auberimmo) and our content production and distribution businesses in France and Luxembourg (Ma Chaîne Sport and SportV). We disposed of our interests in Valvision (which was included in Others) in 2013 to the Numericable Group. Green Datacenter and Auberimmo are designated as unrestricted subsidiaries under the terms governing the indebtedness of the Group.

(2) For the French Overseas Territories, cable based services includes purchasing and subcontracting services for cable based services we provide in Guadeloupe and Martinique as well as the xDSL based broadband internet (including IPTV) and fixed line telephony services we provide in Guadeloupe, Martinique, French Guiana, La Réunion and Mayotte.

(3) These numbers are adjusted to eliminate intercompany transactions between HOT Telecom and HOT Mobile in Israel. Such intercompany transactions consist of (i) mobile services sold by HOT Mobile to HOT Telecom and (ii) fixed line telephony services sold by HOT Telecom to HOT Mobile. These transactions were considered to be non-material (below €1 million) until the nine months ended September 30, 2013 as they had no significant impact on the segmental analysis. However, during the fourth quarter of 2013, each of HOT Mobile and HOT Telecom generated revenue from such intercompany transactions which were subject to purchasing and subcontracting services costs that exceeded the materiality threshold. As third party purchasing and subcontracting costs for such intercompany transactions were not eliminated when showing the cable and mobile segments individually, the adjustments were required to present the actual gross margin figures for each of the segments for the year ended December 31, 2013.

(4) Pre-PT/ODO Transactions Pro Forma Financial Information does not give pro forma effect to the acquisition of PT Portugal, ODO , Tricom and Mobius nor the disposal of our mobile network assets in Mayotte and La Réunion which we have committed to undertake.

Israel: For the year ended December 31, 2013, we generated total revenue in Israel of €881.9 million, a 3.7% increase compared to €850.4 million for the year ended December 31, 2012. As compared to the year ended December 31, 2012, for the year ended December 31, 2013, our cable based services revenue increased by 2.4% and our mobile services revenue increased by 8.8%. Foreign exchange translation movements between the NIS and euro had a positive impact of €29.0 million on total revenue, €22.8 million on cable services revenue and €6.2 million on mobile services revenue. Accordingly, at a constant exchange rate, our total revenue in Israel remained stable, our cable-based service revenue slightly decreased by 0.2% and our mobile services revenue increased by 6.7%.

Cable based services revenue in Israel was positively impacted due to the increase in cable based services ARPU of 7.2% (3.6% at a constant exchange rate) from €44.4 for the year ended December 31, 2012 to €47.6 for the year ended December 31, 2013 primarily as a result of our strategic focus on multiple-play offerings and an increase in the take- up of our higher value higher speed broadband internet services (despite a decrease in total broadband internet RGUs). We experienced an increase in the number of Cable Customer Relationships subscribing for our triple-play service as a result of our bundling strategy, with the number of triple-play Cable Customer Relationships increasing from 413,000 as of December 31, 2012 to 452,000 as of December 31, 2013. The positive impact of the increase in cable based services ARPU on cable based services revenue was offset by a 48,000 net decrease in our total cable RGUs, comprising a 21,000 net decrease in pay television RGUs, a 27,000 net decrease in broadband internet infrastructure access RGUs. The decrease in our cable RGUs was mainly due to the fact that during July and August 2013, respectively, our third party customer service and technical support provider had not allocated sufficient resources to manage the intake and connection arrangements for potential new subscribers and had focused on providing relevant assistance and support to existing subscribers only. The decrease in the interconnection fees for fixed line telephony starting December 2013, following the change in the regulation from the Ministry of Communication, had a blended impact on the cable based services revenue as the interconnection rate was set at 0.99 agorot per minute for both peak or off peak time calls.

The increase in mobile services revenue in Israel was primarily due to the increase in the number of subscribers for our UMTS based services which were launched in May 2012. For the year ended December 31, 2013, we had 810,000 total mobile RGUs in Israel comprising 218,000 iDEN customers and 592,000 UMTS customers compared to 766,000 mobile customers comprising 325,000 iDEN customers and 441,000 UMTS RGUs as of December 31, 2012. The increase in mobile services revenue was offset by the churn of customers for our iDEN services as a result of decreased marketing efforts and the termination of our contract with the Israeli Defense Force in the third quarter of 2012. The gradual migration of the iDEN subscribers under the expired contract with the Israeli Defense Forces to the new service provider was completed in March 2013. Mobile services revenue was further offset by a decrease in mobile ARPU by €2.6, or 13.4%, to €16.8 for the year ended December 31, 2013 compared to €19.4 for the year ended December 31, 2012, mainly due to subscribers disconnecting from our higher ARPU iDEN mobile network and offset by an increase in our lower ARPU UMTS based network subscribers. Consequently, ARPU from gross-adds to our mobile RGUs were generally lower than the ARPU for customers churned. Mobile ARPU was also negatively impacted by highly competitive prices for mobile services, in particular for UMTS based 3G services. On a constant foreign exchange rate mobile ARPU decreased by 16.2%.

Belgium and Luxembourg: For the year ended December 31, 2013, we generated total revenue in Belgium and Luxembourg of €70.5 million, a 2% decrease compared to €71.3 million for the year ended December 31, 2012. In addition, we launched mobile services (as a MNVO) in Belgium in September 2012 and generated €1.2 million in mobile services revenue in the year ended December 31, 2013.

The increase in cable based services revenue in Belgium and Luxembourg was primarily due to an increase in cable based ARPU by 6.1% to €41.9 in the year ended December 31, 2013 compared to €39.5 for the year ended December 31, 2012. The increase in cable based services ARPU was due to price increases in our triple-play packages as well as stand-alone pay television offerings. The increase in cable based services revenue can also be attributed to the full period impact of revenues we generated from AIESH, a Belgian municipality, for which we acquired a concession in the third quarter of 2012, to provide pay television services to existing analog customers served by the AIESH network and to upgrade the AIESH network. Cable based services revenue was also positively impacted by a slight increase in broadband internet RGUs which was primarily due to our ability to offer subscribers higher speeds and increased bandwidth capacity compared to providers relying on alternative technologies such as xDSL and mobile broadband internet networks, our attractive pricing of broadband internet services and due to increase in uptake of our triple-play bundles, which includes broadband internet services. These factors were offset by a decline in television RGUs, including a net decrease in digital television RGUs, due to customers churning to different platforms such as digital television providers over DSL and satellite operators, customers terminating their television service or having moved out of Coditel's network areas. We also experienced a decline in fixed line telephony RGUs due to general the trend of customers switching to mobile services.

The AIESH concession is for a period of 30 years and can be extended for a further period of 20 years. We have upgraded the entire AIESH network and converted the analog customers served by the upgraded AIESH network into digital multiple-play customers. The decrease in B2B and other revenue in Belgium and Luxembourg was primarily due to higher installation fees earned from our project for the Brussels police involving installation of fiber links for the CCTV network in the year ended December 31, 2012, a portion of which reflects non-recurring revenues, slightly offset by an increase in recurring revenue earned for fiber links leased to the Brussels police as part of this project in the twelve months ended December 31, 2013.

Portugal: In the year ended December 31, 2013, we generated total revenue in Portugal of €209.6 million, an 11.0% decrease compared to €235.4 million in the twelve months ended December 31, 2012. As compared to the twelve months ended December 31, 2012, for the year ended December 31, 2013, our revenue in Portugal for our cable based services decreased by 7.9% and our B2B and other services revenue decreased by 14.1%.

The decrease in cable based services revenue in Portugal was primarily driven by a net decrease in total number of cable RGUs by 45,000, comprising of a net decrease of 21,000 pay television RGUs, 20,000 fixed-line telephony RGUs and 3,000 broadband internet RGUs. These were the result of intense competition in the Portuguese cable services market during 2013, with aggressive promotions and pricing policies adopted by competitors and their increased focus on competing multiple-play offerings, as well as the adverse economic conditions and austerity measures in Portugal which had a negative effect on consumer confidence pushing them to opt for cheaper packages. Our strategic decision during the course of 2012 to cease offering certain aggressively priced packages and to migrate customers to triple-play offerings also contributed to the decline in cable RGUs. Cable based services ARPU decreased slightly by €0.3, or 0.9%, to €34.6 in 2013 compared to €34.9 in 2012, predominantly due to the impact of aggressive competition in each segment of the cable services market which required us to offer certain discounts and undertake other promotional offers, despite an increase in the prices of our products in January 2013. As a result, the ARPU from gross-adds to our RGUs were generally lower than the ARPU for customers churned. We have implemented certain measures which are aimed at improving our competitive position in future periods, including improvements to our website which will enable customers to directly subscribe for our products online, rolling out additional stores and entering into arrangements with distributors (primarily supermarkets). There can however be no assurance that these measures will be successful in achieving RGU or ARPU growth in future periods.

The decrease in B2B and other revenue in Portugal was primarily due to the lower level of business with carriers (transit) and sales of equipment that occurred in 2012, linked to certain specific projects undertaken by ONI during this period.

French Overseas Territories: For the year ended December 31, 2013, we generated total revenue in the French Overseas Territories of €223.5 million, a 1.8% increase compared to €219.6 million for the year ended December 31, 2012. As compared to the twelve months ended December 31, 2012, for the year ended December 31, 2013, our revenue in the French Overseas Territories for our cable based services increased by 2.1% and our mobile services revenue increased by 1.7%.

The €1.8 million increase in cable based services revenue in the French Overseas Territories was due to (i) a €2.4 million decrease in fixed-line revenue of Outremer, which in turn was mainly as a result of a net decrease of 5,000 fixed-line telephony RGUs due to continuation in the trend of customers switching from traditional voice telephony towards multiple-play VoIP packages and (ii) a €1.9 million decrease in broadband internet services revenue of Outremer which in turn was mainly as a result of a net decrease of 2,000 xDSL broadband internet RGUs due to increased competition particularly in La Reunion and the limited ability and marketing investment to provide triple-play services, limited marketing innovation in Outremer's broadband internet product line and the limited nature of IPTV provided to DSL broadband internet customers prior to the integration of Outremer in the Altice International Group. This was partially offset by a 6.4% increase in cable based services ARPU with respect to our cable based services offered by Le Cable in Guadeloupe and Martinique to €51.4 for the year ended December 31, 2013 compared to €48.3 for the year ended December 31, 2012 and a net increase of 10,000 total cable RGUs during this period largely as a result of our strategic focus on triple-play offerings and an increase in triple- play Cable Customer Relationships to 17,000 as of December 31, 2013 from 12,000 as of December 31, 2012.

The €2.2 million increase in mobile services revenue in the French Overseas Territories, all of which is attributable to Outremer, was primarily due to a net increase of 14,000 post-paid mobile subscribers over the period, offset by a decline in prepaid mobile subscribers. This increase was a result of the revamping of Outremer's mobile post-paid offering, particularly due to the success of flat-fee rate plans with unlimited calls within the French Overseas Territories and mainland France, which Outremer introduced in the first half of 2012 as well as a decrease in termination rates. Mobile ARPUs increased slightly by €0.4 primarily due to the improvement in product mix with greater demand of Outremer's higher value post paid packages following the revamping of its mobile product offering despite the sharp decrease in mobile termination rates from €0.028 in 2012 to €0.01 in 2013 prescribed by the French national regulatory authority for electronic communications, the ARCEP resulting in lower mobile interconnection revenues.

Gross Profit

Historical Consolidated Basis

For the year ended December 31, 2013, our total gross profit was €918.9 million, a 16.3% increase compared to €790.3 million for the year ended December 31, 2012. Our gross profit by our key regions in the twelve months ended December 31, 2013 and 2012, respectively, were: (i) in Israel, €644.4 million and €621.7 million, (ii) Belgium and Luxembourg, €59.1 million and €60.3 million, (iii) in Portugal, €92.1 million and €59.1 million (gross profit for the year ended December 31, 2012 was impacted by the consolidation of Cabovisão only with effect from March 1, 2012 and gross profit for the year ended December 31, 2012 and 2013 was impacted by the consolidation of ONI only with effect from August 8, 2013), and (iv) in the French Overseas Territories, €89.8 million and €20.4 million (gross profit for the year ended December 31, 2012 and 2013 was impacted by the consolidation of Outremer only with effect from July 5, 2013). Our gross margin decreased from 72.3% in the twelve months ended December 31, 2012 to 71.4% in the twelve months ended December 31, 2013. Foreign exchange translation movements between the NIS and the euro had a positive impact of €21.0 million on total gross profit.

Cable based services: For the year ended December 31, 2013, our gross profit from our cable based services was €712.3 million, a 7.9% increase compared to €660.4 million for the year ended December 31, 2012. The increase was primarily due to the inclusion of cable based services gross profit from Portugal for the entire duration of the twelve months ended December 31, 2013 of €74.6 million compared to €59.1 million for the year ended December 31, 2012, following the acquisition of Cabovisão on February 28, 2012, and an increase in Israel's gross profit due to the factors discussed below. Foreign exchange translation movements between the NIS and the euro had a positive impact of €18.4 million on cable based services gross profit. Our gross margin for cable based services increased from 75.6% in the twelve months ended December 31, 2012 to 79.9% in the year ended December 31, 2013.

Mobile services: For the year ended December 31, 2013, our gross profit from our mobile services increased to €126.4 million compared to €102.8 million in the previous year. Although we saw a decrease in gross profit of €22.9 million in Israel, due to the factors discussed below, it was offset by the inclusion of gross profit of €46.1 million of Outremer's mobile services with effect from July 5, 2013. Our gross margin for mobile services decreased from 59.5% in the twelve months ended December 31, 2012 to 49.3% in the year ended December 31, 2013. Foreign exchange translation movements between the NIS and the euro had a positive impact of €2.6 million on mobile services gross profit.

B2B and others: For the year ended December 31, 2013, our gross profit from B2B and others was €80.2 million, a 195.9% increase compared to €27.1 million for the year ended December 31, 2012. Our gross margin for B2B and other services decreased from 58.4% in the year ended December 31, 2012 to 57.9% in the year ended December 31, 2013. The increase in gross profit was primarily due to the inclusion of B2B services gross profit of €17.5 million generated by ONI and €5.0 million gross profit generated by the content companies MCS and SportV.

Pro Forma Consolidated Basis and Aggregated Basis

The following table sets forth our purchasing and subcontracting services by country of operation and on a Pro Forma Consolidated Basis based on the Pre- PT/ODO Transactions Pro Forma Financial Information with respect to the year ended December 31, 2013 and on an aggregated basis based on the Illustrative Aggregated Financial Information with respect of the year ended December 31, 2012.

B2B and others	—	0.6	66.8	—	21.5	88.9	—	1.0	55.6	—	26.5	83.0
Total purchasing and subcontracting services	**228.8**	**11.0**	**114.7**	**68.0**	**22.0**	**444.5**	**237.4**	**12.9**	**89.7**	**66.8**	**27.1**	**433.5**

(1) Others include our B2B telecommunications solutions business and datacenter operations in Switzerland (Green and Green Datacenter), our datacenter operations in France (Auberimmo) and our content production and distribution businesses in France and Luxembourg (Ma Chaîne Sport and SportV). We disposed of our interests in Valvision (which was included in Others) in 2013 to the Numericable Group. Green Datacenter and Auberimmo are designated as unrestricted subsidiaries under the terms governing the indebtedness of the Group.

(2) For the French Overseas Territories, cable based services includes purchasing and subcontracting services for cable based services we provide in Guadeloupe and Martinique as well as the xDSL based broadband internet (including IPTV) and fixed-line telephony services we provide in Guadeloupe, Martinique, French Guiana, La Réunion and Mayotte.

(3) These numbers are adjusted to eliminate intercompany transactions between HOT Telecom and HOT Mobile in Israel. Such intercompany transactions consist of (i) mobile services sold by HOT Mobile to HOT Telecom and (ii) fixed line telephony services sold by HOT Telecom to HOT Mobile. These transactions were considered to be non-material (below €1 million) up until the nine months ended September 30, 2013 as they had no significant impact on the segmental analysis. However, during the fourth quarter of 2013, each of HOT Mobile and HOT Telecom generated revenue from such intercompany transactions which were subject to purchasing and subcontracting services costs that exceeded the materiality threshold. As third party purchasing and subcontracting costs for such intercompany transactions were not eliminated when showing the cable and mobile segments individually, the adjustments were required to present the actual gross margin figures for each of the segments for the year ended December 31, 2013.

(4) Pre-PT/ODO Transactions Pro Forma Financial Information does not give pro forma effect to the acquisition of PT Portugal, ODO, Tricom and Mobius nor the disposal of our mobile network assets in Mayotte and La Réunion which we have committed to under take.

Israel: For the year ended December 31, 2013, our purchasing and subcontracting services costs in Israel were €237.4 million, a 3.8% increase compared to €228.8 million for the year ended December 31, 2012. As compared to the year ended December 31, 2012, for the year ended December 31, 2013, our purchasing and subcontracting services costs for cable based services decreased by 18.5% and our purchasing and subcontracting services costs for mobile services increased by 54.4%. Foreign exchange translation movements between NIS and euro had the impact of increasing purchasing and subcontracting services costs by €7.8 million (including €4.2 million of cable based services purchasing and subcontracting services costs and €3.6 million of mobile services purchasing and subcontracting services costs). Accordingly, at a constant exchange rate, our total purchasing and subcontracting services costs in Israel increased by 0.4%, our cable based service purchasing and subcontracting services costs decreased by 20.5% and our cellular services revenue increased by 52.5%.

The decrease in purchasing and subcontracting services costs for cable based services in Israel was primarily due to a decrease in interconnection fees paid as a result of lower call volumes by our customers due to customers switching from fixed-line telephony services to mobile services, as a result of the competitive prices and unlimited price plan packages, and a decrease in the royalties paid to the State of Israel following the regulations enacted under the Communications Law pursuant to which the rate of royalties applicable to our cable telecommunication licenses have been reduced to 0% with effect from January 2, 2013. Purchasing and subcontracting services costs for cable based services also decreased due to the positive effect of renegotiated movie channels contracts and the capitalization of costs arising from the purchase of exclusive third party content from April 1, 2013, as previously, we were able to capitalize exclusive in-house content costs only. In the twelve months ended December 31, 2013 we capitalized €7.7 million of costs relating to exclusive third party content.

The increase in purchasing and subcontracting services costs for mobile services in Israel was primarily due to an increase in interconnection fees of €81.5 million we incurred in the twelve months ended December 31, 2013, with respect to our 3G mobile services which was launched in May 2012 compared to €43.7 million in the twelve months ended December 31, 2012. Interconnection fees in the year ended December 31, 2013 included national roaming costs of €49.8 million compared to €21.4 million in the year ended December 31, 2012.

Belgium and Luxembourg: For the year ended December 31, 2013, our purchasing and subcontracting services costs in Belgium and Luxembourg were €12.6 million, a 14.5% increase compared to €11.0 million for the year ended December 31, 2012. As compared to the year ended December 31, 2012, for the year ended December 31, 2013, our purchasing and subcontracting services costs for cable based services increased by 2.9% and our purchasing and subcontracting services costs for B2B services increased by 25% (from €0.8 million to €1.0 million). We began providing mobile services in Belgium in September 2012 as a MVNO and incurred costs of sales in an amount of €0.9 million in the twelve months ended December 31, 2013.

The increase in purchasing and subcontracting services costs for cable based services in Belgium resulted from (i) the increase in the cost of certain French channels in Belgium and (ii) the inclusion of cost of sales incurred in relation to the migration of AIESH customers from analogue to digital ports during 2013.

The increase in purchasing and subcontracting services costs for mobile services in Belgium and Luxembourg was due to an increase in expenses associated with (i) the launch of our mobile operation in September 2012 and the full year impact of its operations in 2013 and (ii) the payments made to Mobistar under the MNVO agreement.

The increase in cost of sale for B2B services and others in Belgium and Luxembourg was due to (i) the nature of B2B projects undertaken in 2013 as compared to the same period in the previous year (for which costs were primarily in the form of capital expenditures) and (ii) promotional offers and incentives in responses to the strategy adopted by our competitors.

Portugal: For the year ended December 31, 2013, our purchasing and subcontracting services costs in Portugal was €89.7 million, a 21.8% decrease compared to €114.7 million for the year ended December 31, 2012. As compared to the year ended December 31, 2012, for the year ended December 31, 2013, our purchasing and subcontracting services costs for cable based services decreased by 28.8% and our purchasing and subcontracting services costs for B2B and others decreased by 16.8%.

The 28.8% decrease in purchasing and subcontracting services costs for cable based services in Portugal can primarily be attributed to the larger impact in the year ended December 31, 2013 compared to the prior year of an operational optimization program implemented by the Altice International Group following the acquisition of Cabovisão in February 2012, which included savings through renegotiations of television content rights.

The 16.8% decrease in costs of sales for B2B and others in Portugal was due to the higher level of ONI's business with carriers (transit) and sales of equipment in the year ended December 31, 2012, which are projects that inherently have a lower gross profit margin. Also, during the last quarter 2013, some savings were achieved as a result of the measures undertaken to implement a cost reduction which are still ongoing.

French Overseas Territories: For the year ended December 31, 2013, our purchasing and subcontracting services costs in the French Overseas Territories were €66.8 million, a 1.8% decrease compared to € 68.0 million for the year ended December 31, 2012. As compared to the year ended December 31, 2012, for the year ended December 31, 2013, our purchasing and subcontracting services costs for cable based services decreased by 5.3% and our purchasing and subcontracting services costs for mobile services increased by 0.5%.

The decrease in purchasing and subcontracting services costs for cable based services in the French Overseas Territories was primarily due to the decrease in interconnection rates and the decrease in Outremer's fixed-line telephony and xDSL broadband internet RGUs.

The increase in costs of sales for mobile services in the French Overseas Territories was mainly due to the increase in post-paid RGUs and interconnections costs with the success of Outremer's flat-fee rate plans which include unlimited calls, and was partially offset by the decrease in termination rates.

As a result of the factors described above, our gross profit and gross margin by country of operation on a Pro Forma Consolidated Basis based on the Pre-PT/ODO Transactions Pro Forma Financial Information for the year ended December 31, 2013 and on an aggregated basis based on the Illustrative Aggregated Selected Financial Information for the year ended December 31, 2012 was as follows:

	Illustrative Aggregated Selected Financial Information						Pre-PT/ODO Transactions Pro Forma Financial Information(4)

(1) Others include our B2B telecommunications solutions business and datacenter operations in Switzerland (Green and Green Datacenter), our datacenter operations in France (Auberimmo) and our content production and distribution businesses in France and Luxembourg (Ma Chaîne Sport and SportV). We disposed of our interests in Valvision (which was included in Others) in 2013 to the Numericable Group. Green Datacenter and Auberimmo are designated as unrestricted subsidiaries under the terms governing the indebtedness of the Group.

(2) For the French Overseas Territories, cable based services includes gross profit and gross margin for cable based services we provide in Guadeloupe and Martinique as well as the xDSL based broadband internet (including IPTV) and fixed-line telephony services we provide in Guadeloupe, Martinique, French Guiana, La Réunion and Mayotte.

(3) These numbers are adjusted to eliminate intercompany transactions between HOT Telecom and HOT Mobile in Israel. Such intercompany transactions consist of (i) mobile services sold by HOT Mobile to HOT Telecom and (ii) fixed line telephony services sold by HOT Telecom to HOT Mobile. These transactions were considered to be non-material (below €1 million) up until the nine months ended September 30, 2013 as they had no significant impact on the segmental analysis. However, during the fourth quarter of 2013, each of HOT Mobile and HOT Telecom generated revenue from such intercompany transactions which were subject to purchasing and subcontracting services costs that exceeded the materiality threshold. As third party purchasing and subcontracting costs for such intercompany transactions were not eliminated when showing the cable and mobile segments individually, the adjustments were required to present the actual gross margin figures for each of the segments for the year ended December 31, 2013.

(4) Pre-PT/ODO Transactions Pro Forma Financial Information does not give pro forma effect to the acquisition of PT Portugal, ODO, Tricom and Mobius nor the disposal of our mobile network assets in Mayotte and La Réunion which we have commited to undertake.

Foreign exchange translation movements between the NIS and euro had a positive impact of €21.1 million on total gross profit in Israel, €18.5 million for cable based services and €2.6 million for mobile services.

Operating Expenses and EBITDA

Historical Consolidated Basis

For the year ended December 31, 2013, our total operating expenses (other than purchasing and subcontracting services costs) were €400.2 million, a 3.4% increase compared to €387.1 million for the year December 31, 2012. Our total operating expenses comprise of other operating expenses, which increased by 4%, general and administrative expenses, which increased by 8.7% and other sales and marketing expenses, which decreased by 4.4%, in each case in the year ended December 31, 2013 compared to the year ended December 31, 2012.

Our total operating expenses by our key regions in the year ended December 31, 2012 and 2013, respectively, were: (i) in Israel, €316.5 million and €281.7 million, (ii) Belgium and Luxembourg, €14.7 million and €12.9 million, (iii) in Portugal, €29.2 million and €43.0 million (operating expenses for the year ended December 31, 2012 was impacted by the consolidation of Cabovisão only with effect from March 1, 2012 and operating expenses for the years ended December 31, 2012 and 2013 were impacted by the consolidation of ONI only with effect from August 8, 2013), and (iv) in the French Overseas Territories, €8.3 million and €40.5 million (operating expenses for the years ended December 31, 2012 and 2013 were impacted by the consolidation of Outremer only with effect from July 5, 2013).

We define EBITDA in our Historical Consolidated Financial Statements as operating profit before depreciation and amortization, goodwill impairment, other expenses, net, management fees and restructuring and other non- recurring costs. We define Adjusted EBITDA as EBITDA before equity based compensation expenses.

As a result, for the year ended December 31, 2013, our EBITDA increased to €518.7 million a 28.7% increase compared to €403.2 million for the year ended December 31, 2012. Our EBITDA by our key regions for the years ended December 31, 2012 and 2013, respectively, were: (i) in Israel, €305.2 million and €362.8 million, (ii) Belgium and Luxembourg, €45.6 million and €46.5 million, (iii) in Portugal, €29.8 million and €49.1 million (EBITDA for the year ended December 31, 2012 was impacted by the consolidation of Cabovisão only with effect from March 1, 2012 and EBITDA for the years ended December 31, 2012 and 2013 were impacted by the consolidation of ONI only with effect from August 8, 2013), and (iv) in the French Overseas Territories, €12.1 million and €49.3 million due to the fact that EBITDA for the year ended December 31, 2013 were impacted by the consolidation of Outremer only with effect from

July 5, 2013. Our EBITDA margin for the year ended December 31, 2013 was 40.3% compared to 36.9% for the year ended December 31, 2012.

Pro Forma Consolidated Basis and Aggregated Basis

The following paragraphs set forth our total operating expenses by country of operation and on a pro forma consolidated basis based on the Pre-PT/ODO Transactions Pro Forma Financial Information for the year ended December 31, 2013 and on an aggregated basis based on the Illustrative Aggregated Selected Financial Information for the year ended December 31, 2012.

For the year ended December 31, 2013, our total operating expenses were €455.6 million, a 9.5% decrease compared to €503.1 million for the year ended December 31, 2012.

Israel: For the year ended December 31, 2013, our total operating expenses in Israel were €281.7 million, an 11.0% decrease compared to €316.5 million for the year ended December 31, 2012. Foreign exchange translation movements between NIS and euro had the impact of increasing operating expenses by €6.6 million. Accordingly, at a constant exchange rate, our total operating expenses in Israel decreased by 11.6%.

Other operating expenses: As compared to the year ended December 31, 2012, for the year ended December 31, 2013 our other operating expenses in Israel decreased by 8.6% from €223.4 million to €204.1 million. This decrease was primarily due to a decrease in salaries and social benefits and a reduction in head count as part of the measures implemented to maximize cost structure efficiency. In addition, in July 2013, our customer services and technical support functions were outsourced which also contributed to the decrease in salaries and social benefits expenses. We were able to apply these measures due to an increase in the quality of our network resulting from recent investments in the improvement of our technical service systems. The decrease of other operating expenses was also impacted by a decrease in cable network maintenance and set-top box maintenance expenses due to recent investments leading to the improvement of our network and a more efficient maintenance process for set-top boxes.

General and administrative expenses: As compared to the year ended December 31, 2012, for the year ended December 31, 2013 our general and administrative expenses in Israel decreased by 6.1% from €29.3 million to €27.5 million. This decrease was primarily as a result of a decrease in salary and social benefits expenses due to a reduction in administrative personnel and equity based compensation of €3.8 million in the year ended December 31, 2012 pertaining to HOT stock options.

Other sales and marketing expenses: As compared to the year ended December 31, 2012, for the year ended December 31, 2013 our other sales and marketing expenses in Israel decreased by 21.7% from €63.7 million to €49.9 million. Compared to the prior year period, our sales and marketing expenses decreased as a result of a decrease in sales commissions to retailers, advertising costs and sales promotions and decreases in salaries and social benefits of sales personnel resulting from the measures implemented to maximize cost structure efficiency.

EBITDA: As a result of the factors discussed above, for the year ended December 31, 2013, in Israel our EBITDA was €363.0 million, a 18.8% increase compared to €305.2 million for the year ended December 31, 2012 and our EBITDA margin was 41.1% in the twelve months ended December 31, 2013 compared to 35.9% in the twelve months ended December 31, 2012. Foreign exchange translation movements between the NIS and euro had a positive impact of €11.8 million on total EBITDA.

Belgium and Luxembourg: For the year ended December 31, 2013, our total operating expenses in Belgium and Luxembourg were €12.9 million, a decrease of 12.2% compared to €14.7 million for the year ended December 31, 2012.

Other operating expenses: As compared to the twelve months ended December 31, 2012, for the year ended December 31, 2013 our other operating expenses in Belgium and Luxembourg decreased from €6.2 million to €5.3 million. This decrease was primarily due to a decrease in customer service costs as a result of measures undertaken by our management to improve the efficiency in handling and resolving "first-time" complaints.

General and administrative expenses: General and administrative costs remained stable at €4.1 million for the years ended December 31, 2013 and 2012 respectively.

Other sales and marketing expenses: As compared to the year ended December 31, 2012, for the year ended December 31, 2013 our other sales and marketing expenses in Belgium and Luxembourg decreased from €4.4 million to €3.4 million. This decrease can be attributed to the capitalization of sales commissions (only on the sales target), a practice that was implemented from 2013 onwards, offset by certain sales and marketing expenses associated with the launch of 'LaBox' in Q3 2013.

EBITDA: As a result of the factors discussed above, for the year ended December 31, 2013, our EBITDA in Belgium and Luxembourg was €45.0 million, a 1.3% decrease compared to €45.6 million for the year ended December 31, 2012. Our EBITDA margin was 63.9% in the twelve months ended December 31, 2013 compared to 64.0% in the twelve months ended December 31, 2012.

Portugal

In the twelve months ended December 31, 2013, our total operating expenses in Portugal were €61.5 million, 15.4% decrease compared to €72.7 million for the year ended December 31, 2012. This decrease was due to the larger impact in the twelve months ended December 31, 2013, compared to the prior year period, of an operational optimization program implemented by the Altice International Group following the acquisition of Cabovisão in February 2012 and a reduction in operational expenses by ONI, from €36.8 million for the year ended December 31, 2012 to €30.4 million for the year ended December 31, 2013 achieved as a result of the optimization efforts in several areas.

Other operating expenses: As compared to the twelve months ended December 31, 2012, for the year ended December 31, 2013 our other operating expenses in Portugal increased slightly to €38.6 million compared to €38.3 million for the year ended December 31, 2012 due to the reallocation of certain salary expenses for technical personnel.

General and administrative expenses: As compared to the twelve months ended December 31, 2012, for the year ended December 31, 2013 our general and administrative expenses in Portugal decreased by 40.6% from €21.8 million to €12.8 million. This decrease was primarily due to savings from headcount reductions in corporate and administrative staff and savings through cancelation and renegotiation of certain contracts for administrative services, in each case mainly relating to Cabovisão.

Other sales and marketing expenses: As compared to the twelve months ended December 31, 2012, for the year ended December 31, 2013 our other sales and marketing expenses in Portugal decreased by 20.6% from €12.6 million to €10.0 million. This decrease was mainly due to the cancelation and renegotiation of certain marketing and advertising contracts and headcount reduction in sales personnel, in each case relating to Cabovisão.

EBITDA: As a result of the factors discussed, in 2013, our EBITDA in Portugal was €58.3 million, a 21.5% increase compared to €47.9 million in 2012. Our EBITDA margin was 27.8% in the twelve months ended December 31, 2013 compared to 20.4% in the twelve months ended December 31, 2012.

French Overseas Territories: For the year ended December 31, 2013, our total operating expenses in the French Overseas Territories were €72.2 million, a 5.5% decrease compared to €76.4 million for the year ended December 31, 2012.

Other operating expenses: As compared to the twelve months ended December 31, 2012, for the year ended December 31, 2013 our other operating expenses in the French Overseas Territories decreased by 15.3% from €45.1 million to €38.2 million. This decrease was primarily due to measures taken by Outremer to optimize its fixed costs, including to reduce payroll through (i) automated cash recovery systems with the roll-out of self-service payment machines in each of its 81 outlets, (ii) reallocation of customer care staff from local centers in the French Overseas Territories to its offshoring center in Mauritius, thereby reducing headcount in the French Overseas Territories and (iii) an increased use of online self-care systems. These cost savings were partially offset by increased costs related to measures taken to improve its quality of service, in particular the densification of mobile networks.

General and administrative expenses: As compared to the twelve months ended December 31, 2012, for the year ended December 31, 2013 our general and administrative expenses in the French Overseas Territories increased by 17.6% from €11.9 million to €14.0 million. This increase was primarily due to a non-recurring expense indirectly related to the acquisition of Outremer by Altice International.

Other sales and marketing expenses: As compared to the twelve months ended December 31, 2012, for the year ended December 31, 2013 our other sales and marketing expenses in the French Overseas Territories increased by 2.6% from €19.5 million to €20.0 million. This increase can be attributed to the launch of new cable-based products in Martinique and Guadeloupe and the launch of new mobile post-paid offers in La Réunion during the fourth quarter of 2013.

EBITDA: As a result of the factors discussed, for the year ended December 31, 2013, our EBITDA in the French Overseas Territories was €84.5 million, a 12.5% increase compared to €75.1 million for the year ended December 31, 2012. Our EBITDA margin was 37.8% in the year ended December 31, 2013 compared to 34.2% in the year ended December 31, 2012.

The following tables set forth our EBITDA across our segments for the years ended December 31, 2012 and 2013 on an aggregated basis and on a pro forma basis, respectively.

	Illustrative Aggregated Selected Financial Information						Pre-PT/ODO Transactions Pro Forma Financial Information[(4)]					
	For the year ended December 31, 2012						For the year ended December 31, 2013					
	€ in millions											
	Israel[(3)]	Belgium & Luxembourg	Portugal	French Overseas Territories	Others[(2)]	Total	Israel[(3)]	Belgium & Luxembourg	Portugal	French Overseas Territories	Others[(2)]	Total

EBITDA	**494.2**	**570.9**
Equity based compensation[(1)]	3.8	—
Adjusted EBITDA	**498.0**	**570.9**

(1) Equity-based compensation consists of expenses pertaining to employee stock options provided to employees in Israel.

(2) Pre-PT/ODO Transactions Pro Forma Financial Information does not give pro forma effect to the acquisition of PT Portugal, ODO, Tricom and Mobius nor the disposal of our mobile network assets in Mayotte and La Réunion which we have committed to undertake.

Depreciation and Amortization

Historical Consolidated Basis

For the year ended December 31, 2013, depreciation and amortization on a historical consolidated basis totalled €399.6 million, a 50.1% increase compared to €266.3 million for the year ended December 31, 2012. Depreciation and amortization in the twelve months ended December 31, 2013 was impacted by (i) the acquisitions and subsequent consolidation of Outremer (with effect from July 5, 2013) and ONI (with effect from August 8, 2013) and (ii) the impact of the consolidation of Cabovisão for the entire nine months period, following its acquisition on February 29, 2012. However, the increase in depreciation and amortization as a result of the above factors were more than offset due to the recognition of an impairment charge in 2012 of NIS 604 million (€121.9 million equivalent) as a result of a valuation by Cool Holding, with the assistance of an external appraiser, pursuant to which Cool Holding concluded that the recoverable amount of the in-country fixed line communication segment was lower than its carrying amount.

Operating Profit/Loss

Historical Consolidated Basis

For the year ended December 31, 2013, on a historical consolidated basis, (i) other expenses, net totalled €15.1 million, a 49.3% decrease compared to €29.8 million for the year ended December 31, 2012; (ii) management fees primarily relating to consulting services totalled €0.6 million compared to €6.2 million for the year ended December 31, 2012 and (iii) restructuring and other non recurring costs totalled €61.2 million compared to restructuring and other non recurring costs of €20.8 million for the year ended December 31, 2012 (primarily due to the implementation of a reorganization implemented at ONI, fees and other outlays paid to external consultants in relation to the increased mergers and acquisition activity in 2013 compared to 2012 and due to a one-off provision at HOT Mobile of €31.6 million relating to its agreement with Pelephone).

As a result of the factors described above, for the year ended December 31, 2013, our operating profit was €42.3 million, compared to an operating loss of €41.7 million for the year ended December 31, 2012.

Finance costs (net)

Historical Consolidated Basis

For the year ended December 31, 2013, on a historical consolidated basis, our net finance costs totalled €243.3 million, a 39.9% increase compared to €173.9 million for the year ended December 31, 2012 which was primarily due to (i) the incurrence of new debt to finance the Outremer Telecom and ONI transactions (€12.9 million impact in 2013) and (ii) the full year impact of the debt incurred to finance the HOT take private in 2012 (€47.45 million in 2013), offset slightly by a positive impact of the gain on foreign exchange transactions.

Income tax benefits/ (expenses)

Historical Consolidated Basis

For the year ended December 31, 2013, on a historical consolidated basis, our total income tax expense was €7.4 million compared to an income tax benefit of €26.0 million for the year ended December 31, 2012 which was primarily due to higher income tax expense in Israel due to higher profit before tax, the increase in the tax rate from 25% in 2012 to 26.5% in 2013 and a decrease in deferred tax assets.

Loss for the year

Historical Consolidated Basis

As a result of the factors discussed above, on a historical consolidated basis, for the year ended December 31, 2013, our loss for the year was €208.4 million compared to a loss of €189.8 million for the year ended December 31, 2012.

(1) Each of these items also includes staff costs and employee benefits to the extent they relate to the costs included in such line item. Beginning with the year ended December 31, 2013, such staff costs and employee benefits have been accounted for in a separate line item and reflect total Group staff costs for all functions. See the historical financial statements for the year ended December 31, 2013 elsewhere in these Listing Particulars for further details. For comparative purposes staff and employee costs were reclassified for the year ended December 31, 2012 to match the new reporting method of the Altice International Group. The table above does not reflect such reclassification.

Significant Events Affecting Historical Results

Our results of operations for the year ended December 31, 2012 were significantly impacted by the acquisition of a controlling equity interest in Cabovisão, a Portuguese telecommunications company, by Altice International in February 2012 (the results of which are consolidated in the Historical Consolidated Financial Information with effect from February 29, 2012). Cabovisão contributed €98.2 million to revenue, €20.0 million to operating loss and €29.8 million to the combined EBITDA of the Altice International Group in the year ended December 31, 2012.

In addition, in the fourth quarter of 2012, Altice International completed the take-private transaction of the HOT Group whereby it acquired substantially all of the equity interests in HOT-Telecommunication Systems Ltd. it did not previously own.

Our results of operations for the year ended December 31, 2011 were significantly impacted by the following events:

- in March 2011, Altice International increased its ownership in HOT- Telecommunication Systems Ltd. thereby acquiring a majority equity ownership in the HOT Telecom Group (as a result of which the financial information of the HOT Telecom Group is consolidated in the Historical Consolidated Financial Information with effect from March 31, 2011). In 2011, the HOT Telecom Group had €165.1 million of revenue, € 30.9 million of operating loss and €63.3 million of EBITDA, which are not consolidated in the Historical Consolidated Financial Information, whereas HOT Telecom Group contributed €499.7 million to revenue, €98.4 million to operating profit and €212.4 million to EBITDA on a consolidated basis in the year ended December 31, 2011 since March 31, 2011.

- in May 2011, Altice International's subsidiary MIRS Communications Ltd. was awarded a license to provide UMTS based 3G mobile services pursuant to which it began building out its UMTS mobile network and launched 3G mobile services in May 2012, resulting in us incurring significant capital expenditures and operating costs.

- in the second quarter of 2011, Altice International acquired a controlling equity interest in Coditel Brabant S.p.r.l in Belgium and Coditel S.à r.l. in Luxembourg through an intermediate holding company, Coditel Holding S.A. (the financial information of which is consolidated in the Historical Consolidated Financial Information with effect from July 1, 2011). In 2011, Coditel Brabant S.p.r.l and Coditel S.à r.l. together had € 32.3 million of revenue, €9.9 million of operating profit and €18.1 million of EBITDA, which are not consolidated in the Historical Consolidated Financial Information whereas Coditel Holding S.à r.l contributed €34.8 million to revenue, €(1.4) million to operating profit and €20.4 million to EBITDA on a consolidated basis in the year ended December 31, 2011 since June 30, 2011.

In addition, in the fourth quarter of 2011, MIRS Communications Ltd. was acquired by the HOT Telecom Group from a subsidiary of Altice International and renamed HOT Mobile Ltd. The HOT Telecom Group and HOT Mobile Ltd. are collectively referred to herein as the "HOT Group".

Revenue

Historical Consolidated Basis

For the year ended December 31, 2012, we generated total revenue of € 1,092.4 million, a 39.3% increase compared to €784.2 million for the year ended December 31, 2011. Our total revenue by our key regions in the years ended December 31, 2012 and 2011, respectively, were: (i) in Israel, €850.4 million and €680.4 million (2011 revenue was impacted by the consolidation of the HOT Telecom Group only with effect from March 2011), (ii) Belgium and Luxembourg, €71.3 million and € 34.8 million (2011 revenue was impacted by the consolidation of Coditel Holding S.A. only with effect from July 1, 2011), (iii) in Portugal, €98.2 million and nil (the Altice International Group did not have any activities in Portugal in 2011), and (iv) in the French Overseas Territories, €24.4 million and €23.6 million.

Cable based services: For the year ended December 31, 2012, we generated cable based services revenue of €873.3 million, a 55.9% increase compared to €560.3 million for the year ended December 31, 2011. The increase was primarily due to the inclusion of revenue from Portugal in 2012 following the acquisition of Cabovisão and the consolidation of the HOT Telecom Group and Coditel Holding S.A. for the full year in 2012 compared to only a part of the year in 2011.

Mobile services: For the year ended December 31, 2012, we generated mobile services revenue of €172.7 million, a 4.4% decrease compared to €180.6 million for the year ended December 31, 2011. This was primarily due to the decline in mobile revenue in Israel due to the factors discussed below.

B2B and others: For the year ended December 31, 2012, we generated B2B and other services revenue of €46.4 million, a 7.2% increase compared to €43.3 million for the year ended December 31, 2011. Foreign exchange translation movements between the CHF and euro had a positive impact of €1.0 million on B2B revenue.

Aggregated Basis

The following table sets forth our revenue by country of operation and on a total aggregate basis based on the Illustrative Aggregated Selected Financial Information.

	Illustrative Aggregated Selected Financial Information											
	For the year ended December 31, 2011						For the year ended December 31, 2012					
	Israel	Belgium & Luxembourg	Portugal	French Overseas Territories(2)	Others(1)	Total	Israel	Belgium & Luxembourg	Portugal	French Overseas Territories(2)	Others(1)	Total
	€ in millions

(1) Others include our B2B telecommunications solutions business and datacenter operations in Switzerland (Green and Green Datacenter), our datacenter operations in France (Auberimmo) and our content production and distribution businesses in France and Luxembourg (Ma Chaîne Sport and SportV.) We disposed of our interests in Valvision (which was included in Others) in 2013 to the Numericable Group. Green Datacenter and Auberimmo are designated as unrestricted subsidiaries under the terms governing the indebtedness of the Group.

(2) For the French Overseas Territories, cable based services includes revenues from cable based services we provide in Guadeloupe and Martinique as well as the xDSL based broadband internet (including IPTV) and fixed-line telephony services we provide in Guadeloupe, Martinique, French Guiana, La Réunion and Mayotte.

Israel: For the year ended December 31, 2012, we generated total revenue in Israel of €850.4 million, a 0.6% increase compared to €845.5 million for the year ended December 31, 2011. As compared to the year ended December 31, 2011, for the year ended December 31, 2012 our cable based services revenue increased by approximately 2.0% and our mobile services revenue decreased by approximately 4.5%.

The increase in cable based services revenue in Israel was due to the increase in cable based services ARPU of 4.7% (4.3% at a constant exchange rate) from €42.4 for the year ended December 31, 2011 to €44.4 for the year ended December 31, 2012 primarily as a result of our strategic focus on multiple-play offerings. We experienced an increase in the number of Cable Customer Relationships subscribing for our triple-play service as a result of our attractive bundling strategy, with the number of triple-play Cable Customer Relationships increasing from approximately 348,000 as of December 31, 2011 to approximately 413,000 as of December 31, 2012. In addition, cable based services ARPU was impacted by other factors, including: (i) the introduction of, and an increase in take-up of, our higher value higher speed broadband internet infrastructure services (including 100 Mbps services which we introduced in 2010) resulting in an increase in ARPU associated with our broadband internet infrastructure access services and (ii) with respect to our fixed-line telephony services, decreased interconnect fees and call volumes which resulted in lower interconnection revenues, as subscribers reduced the number of calls placed over landlines, (as a result of strong competition from the mobile segment), which we believe is consistent with general industry-wide trends as well as the reduction in revenue as a result of the increased take-up of our unlimited fixed-line telephony offerings, resulting in a decrease in ARPU associated with our fixed-line telephony services. Our cable based ARPU was also positively impacted by the migration of customers from analog to digital pay television services, with a 38,000 net increase digital RGUs and a 33,000 net decline in analog RGUs in 2012. We intend to continue focusing on increasing ARPUs by increasing our triple play penetration, promoting the migration of analog cable television subscribers to our digital services and launching other revenue and service enhancing measures. Our revenue was also positively impacted by a 49,000 net increase in our total cable RGUs, comprising a 5,000 net increase in pay television RGUs, a 3,000 net increase in in broadband internet infrastructure access RGUs and a 41,000 net increase in fixed-line telephony RGUs. The growth in RGUs is attributable to the success of our multiple-play offerings, our efforts to increase the attractiveness of our television channel offering, including an overall increase in HD content, VoD and PVR services and the growth in the number of subscriptions to broadband internet infrastructure access overall in Israel and our ability to offer our subscribers higher speeds and increased bandwidth capacity compared to alternative technologies such as xDSL.

The decrease in mobile services revenue in Israel was primarily due to a decrease in mobile ARPU by €6.1, or 23.9%, to €19.4 for the year ended December 31, 2012 compared to €25.5 for the year ended December 31, 2011. This decrease in mobile ARPU was mainly due to the combined effects of a decrease in interconnection revenues and subscribers disconnecting from our higher ARPU iDEN mobile network as a result of decreased marketing and the termination in the third quarter of 2012 of our contract with the Israeli Defense Force, which was offset by an increase in our lower ARPU UMTS based network subscribers following the launch of 3G services in May 2012. Consequently, ARPU from gross-adds to our mobile RGUs were generally lower than the ARPU for customers churned. As of December 31, 2012 we had 766,000 total mobile RGUs in Israel comprising 325,000 iDEN customers and 441,000 UMTS customers compared to 444,000 mobile customers (all iDEN based) as of December 31, 2011. Revenue and mobile ARPU were also negatively impacted by price pressure for mobile services, in particular for our UMTS based 3G services.

Belgium and Luxembourg: For the year ended December 31, 2012, we generated total revenue in Belgium and Luxembourg of €71.3 million, a 5.9% increase compared to €67.3 million for the year ended December 31, 2011. As compared to the year ended December 31, 2011, for the year ended December 31, 2012 our cable based services revenue increased by approximately 2.1% and our B2B and other services revenue increased by approximately 30.7%. In addition, we launched mobile services in Belgium in September 2012 and generated €0.2 million in mobile services revenue in the year ended December 31, 2012.

The increase in cable based services in Belgium and Luxembourg was primarily due to an increase in cable based ARPU by €2.8, or 7.6%, to €39.5 for the year ended December 31, 2012 compared to €36.7 for the year ended December 31, 2011. The increase in cable based services ARPU was due to price increases in our triple-play packages as well as stand alone pay television offerings, but was partially offset by an increased uptake of Coditel’s flat rate fixed-line telephony offers. Cable based services revenue was also positively impacted by an approximately 1,000 net increase in the number of television RGUs due in part to our acquisition of a concession from the AIESH, a Belgian municipality, in the fourth quarter of 2012, to provide pay television services to existing analog customers served by the AIESH network and to upgrade the AIESH network. As of December 31, 2012, the AIESH concession represented approximately 12,400 Cable Customer Relationships. The AIESH concession is for a period of 30 years and can be extended for a further period of 20 years. We have upgraded the entire AIESH network and converted the analog customers served by the upgraded AIESH network into digital customers. This was partially offset by an approximately 2,000 net decrease in the number of digital television RGUs primarily due to competition, particularly from IPTV offers by Belgacom in Brussels and POST in Luxembourg. Cable based services revenue was also positively impacted by an increase in broadband internet RGUs which was primarily due to our ability to offer subscribers higher speeds and increased bandwidth capacity compared to providers relying on alternative technologies such as xDSL and mobile broadband networks, our attractive pricing of broadband internet services and due to increase in uptake of our triple-play bundles, which includes broadband internet services.

The increase in B2B and other revenue in Belgium and Luxembourg was primarily due to higher installation fees earned from our project for the Brussels police involving installation of fiber links for the CCTV network, a portion of which reflects non-recurring revenues.

Portugal: For the year ended December 31, 2012, we generated total revenue in Portugal of €235.4 million, a 1.4% decrease compared to €238.8 million for the year ended December 31, 2011. As compared to the year ended December 31, 2011, for the year ended December 31, 2012 our revenue in Portugal for our cable based services decreased by approximately 4.4% and our B2B and other services revenue increased by 1.7%.

The decrease in cable based services revenue in Portugal was primarily driven by a net decrease in total number of cable RGUs by approximately 21,000, comprising of a net decrease of approximately 11,000 pay television RGUs and approximately 3,000 broadband internet RGUs. These were the result of intense competition in the Portuguese cable services market during 2012, with aggressive promotions and pricing policies adopted by competitors and their increased focus on competing multiple-play offerings, as well as the adverse economic conditions and austerity measures in Portugal which had a negative effect on consumer confidence pushing them to opt for cheaper packages. Our strategic decision during the course of 2012 to cease offering certain aggressively priced packages and to migrate customers to triple-play offerings also contributed to the decline in cable RGUs. Although there was a net reduction of approximately 8,000 fixed-line telephony RGUs in the twelve months ended December 31, 2012, the average fixed-line telephony RGUs for the twelve months ended December 31, 2012 was higher compared to the twelve months ended December 31, 2011, which partially offset a decline in cable based services revenue in 2012. A decrease in cable based services ARPU by €2.0, or 5.4%, to €34.9 for the twelve months ended December 31, 2012 compared to €36.9 for the twelve months ended December 31, 2011 also contributed to the decrease in the cable based services revenue. In 2012, our cable based services ARPU was negatively impacted by aggressive competition in each segment of the cable services market which required us to offer discounts and undertake other promotional offers. As a result, the ARPU from gross-adds to our RGUs were generally lower than the ARPU for customers churned. We nevertheless took the strategic decision during the course of 2012 to cease offering certain aggressively priced packages to reduce the decrease of ARPU, which has resulted in an increase in ARPU towards the end of 2012. We have implemented certain measures which are aimed at improving our competitive position in future periods, including improvements to our website which will enable customers to directly subscribe for our products online, rolling out additional stores and entering into arrangements with distributors (primarily supermarkets). There can however be no assurance that these measures will be successful in achieving RGU or ARPU growth in future periods.

The increase in B2B and other revenue in Portugal was primarily due to the higher level of business with carriers (transit) and sales of equipment that occurred in 2012, linked to certain specific projects undertaken by ONI.

French Overseas Territories: For the year ended December 31, 2012, we generated total revenue in the French Overseas Territories of € 219.6 million, a 0.8% increase compared to €217.9 million for the year ended December 31, 2011. As compared to the year ended December 31, 2011, for the year ended December 31, 2012 our revenue in the French Overseas Territories for our fixed-line services decreased by 4.6% and our mobile services revenue increased by 4.7%.

The decrease in fixed-line services revenue in the French Overseas Territories was primarily due to a decrease in fixed-line revenue of Outremer prior to its acquisition by the Altice International Group, which in turn was mainly as a result of a net decrease of approximately 6,000 fixed-line telephony RGUs due to continuation in the trend of customers switching from traditional voice telephony towards multiple-play VoIP packages. Revenue associated with Outremer's broadband internet services (including IPTV) remained relatively stable during the period, which was influenced by increased competition, particularly in the Indian Ocean region comprising La Reunion and Mayotte, and the limited ability and marketing investment to provide triple-play services prior to the integration of Outremer in the Altice International Group. The decrease in fixed- line revenue of Outremer, was partially offset by the increase in revenue from Le Cable, the Altice International Group's cable business in the French Overseas Territories of Guadeloupe and Martinique, primarily due to an increase in cable based services ARPU by €5.2, or 12.1%, to €48.3 for the twelve months ended December 31, 2012 compared to €43.1 for the twelve months ended December 31, 2011. This ARPU growth was primarily due to migration of standalone pay television customers to triple-play packages as a result of our strategic focus on triple-play offerings, migration of customer from analog to digital services and an increase in uptake of VoD services, as well as price increases for our cable based services. RGU growth for our cable based services by approximately 4,000 RGUs net, which was driven by an increase in triple-play penetration also contributed to the increase in cable based services revenue.

The increase in mobile services revenue in the French Overseas Territories, all of which is attributable to Outremer, was primarily due to net increase of 30,000 mobile subscribers over the period. This increase was a result of the revamping of Outremer's mobile post-paid offering, particularly due to the success of flat-fee rate plans with unlimited calls towards the French Overseas Territories and mainland France, which Outremer introduced in the first half of 2012. This increase was offset by a decrease in mobile ARPUs by €2.2, or 7.6%, to €26.7 for the year ended December 31, 2012 compared to €28.9 for the year ended December 31, 2011. This decrease in mobile ARPU during the year ended December 31, 2012 was mainly due to sharply lower mobile interconnection rates prescribed by the French national regulatory authority for electronic communications, the ARCEP, in 2012 compared to 2011, which was partially offset by the improvement in product mix with greater demand for Outremer's higher value post-paid packages following the revamping of its mobile product offering in the first half of 2012. We expect overall mobile ARPU to further decrease in future periods due to price pressure in mobile services.

Gross Profit

Historical Consolidated Basis

For the year ended December 31, 2012, our total gross profit was € 790.3 million, a 29.8% increase compared to €608.8 million for the year ended December 31, 2011. Our gross profit by our key regions in the years ended December 31, 2012 and 2011, respectively, were: (i) in Israel, €621.7 million and €535.3 million (2011 gross profit was impacted by the consolidation of the HOT Telecom Group only with effect from March 2011), (ii) Belgium and Luxembourg, €60.3 million and €27.5 million (2011 gross profit was impacted by the consolidation of Coditel Holding S.A. only with effect from July 1, 2011), (iii) in Portugal, €59.1 million and nil (the Altice International Group did not have any activities in Portugal in 2011), and (iv) in the French Overseas Territories, €20.4 million and €19.8 million. Our gross margin decreased from 77.6% in the year ended December 31, 2011 to 72.3% in the year ended December 31, 2012.

Cable based services: For the year ended December 31, 2012, our gross profit from our cable based services was €660.4 million, a 51.8% increase compared to €435.0 million for the year ended December 31, 2011. The increase was primarily due to the inclusion of gross profit from Portugal in 2012 following the acquisition of Cabovisão and the consolidation of the HOT Telecom Group and Coditel Holding S.A. for the full year in 2012 compared to only a part of the year in 2011. Our gross margin for cable based services decreased from 77.6% in the year ended December 31, 2011 to 75.6% in the year ended December 31, 2012.

Mobile services: For the year ended December 31, 2012, our gross profit from our mobile services was €102.8 million, a 31.3% decrease compared to €149.7 million for the year ended December 31, 2011. This was primarily due to the increase in purchasing and subcontracting services for mobile revenue in Israel due to the factors discussed below. Our gross margin for mobile services decreased from 82.9% in the year ended December 31, 2011 to 59.5% in the year ended December 31, 2012.

B2B and others: For the year ended December 31, 2012, our gross profit from B2B and others was €27.1 million, an 12.4% increase compared to €24.1 million for the year ended December 31, 2011. Our gross margin for B2B and other services increased from 55.7% in the year ended December 31, 2011 to 58.4% in the year ended December 31, 2012.

Aggregated Basis

The following table sets forth our purchasing and subcontracting services by country of operation and on a total aggregate basis based on the Illustrative Aggregated Selected Financial Information.

	Illustrative Aggregated Selected Financial Information											
	For the year ended December 31, 2011						For the year ended December 31, 2012					
	Israel	Belgium & Luxembourg	Portugal	French Overseas Territories[(2)]	Others[(1)]	Total	Israel	Belgium & Luxembourg	Portugal	French Overseas Territories[(2)]	Others[(1)]	Total
	€ in millions

B2B and others	—	1.0	58.8	—	19.2	79.0	—	0.8	66.8	—	21.5	89.2
Total Purchasing and subcontracting services	**185.3**	**12.6**	**113.5**	**68.4**	**19.7**	**399.6**	**228.8**	**11.0**	**114.7**	**68.0**	**22.0**	**444.5**

(1) Others include our B2B telecommunications solutions business and datacenter operations in Switzerland (Green and Green Datacenter), our datacenter operations in France (Auberimmo) and our content production and distribution businesses in France and Luxembourg (Ma Chaîne Sport and SportV.) We disposed of our interests in Valvision (which was included in Others) in 2013 to the Numericable Group. Green Datacenter and Auberimmo are designated as unrestricted subsidiaries under the terms governing the indebtedness of the Group.

(2) For the French Overseas Territories, cable based services includes purchasing and subcontracting services for cable based services we provide in Guadeloupe and Martinique as well as the xDSL based broadband internet (including IPTV) and fixed-line telephony services we provide in Guadeloupe, Martinique, French Guiana, La Réunion and Mayotte.

Israel: For the year ended December 31, 2012, our purchasing and subcontracting services in Israel were €228.8 million, a 23.5% increase compared to €185.3 million for the year ended December 31, 2011. As compared to the year ended December 31, 2011, for the year ended December 31, 2012 our purchasing and subcontracting services costs for cable based services decreased by approximately 3.0% and our purchasing and subcontracting services costs for mobile services increased by approximately 125.2%.

The increase in purchasing and subcontracting services for cable based services in Israel was primarily due to an increase in interconnection fees paid as a result of higher call volumes by our customers due to the increased take-up of our unlimited fixed-line calls package offered as a component of our multiple-play offers.

The increase in purchasing and subcontracting services for mobile services in Israel was primarily due to the launch of UMTS based 3G mobile services in 2012, including interconnection fees of €43.6 million we incurred with respect to our 3G mobile services and increased costs in respect of offering compatible mobile handsets. Interconnection fees in 2012 included national roaming costs of €21.4 million.

Belgium and Luxembourg: For the year ended December 31, 2012, our purchasing and subcontracting services in Belgium and Luxembourg was € 11.0 million, a 13.2% decrease compared to €12.6 million for the year ended December 31, 2011. As compared to the year ended December 31, 2011, for the year ended December 31, 2012 our purchasing and subcontracting services for cable based services decreased by approximately 13.9% and our purchasing and subcontracting services for B2B services decreased by approximately 14.8%. We began providing mobile services in Belgium in September 2012 as an MVNO and incurred minor purchasing and subcontracting services in an amount of approximately €0.1 million in the year ended December 31, 2012.

The decrease in purchasing and subcontracting services for cable based services in Belgium and Luxembourg was primarily due to a reduction in VoIP costs following the renegotiating of contracts and change of supplier, lower data interconnection costs and slightly lower VoD costs, which were partially offset by an increase in amounts paid to television channels due to the addition of more expensive premium channels in Coditel's television packages.

The decrease in purchasing and subcontracting services for B2B services in Belgium and Luxembourg was due to optimization of costs relating to our B2B business, including costs of external service providers, as well as due to the nature of the B2B projects undertaken in 2012, for which the costs were primarily in the form of capital expenditures.

Portugal: For the year ended December 31, 2012, our purchasing and subcontracting services in Portugal were €114.7 million, a 1.0% increase compared to €113.5 million for the year ended December 31, 2011. As compared to the year ended December 31, 2011, for the year ended December 31, 2012 our purchasing and subcontracting services for cable based services decreased by approximately 12.4% and our purchasing and subcontracting services for B2B and others increased by approximately 13.6%.

The decrease in purchasing and subcontracting services for cable based services in Portugal was primarily a result of an operational optimization program implemented by the Altice International Group following the acquisition of Cabovisão in February 2012, which included savings through renegotiations of television content rights.

The increase in costs of sales for B2B and others in Portugal was due to the increase in the level of ONI's business with carriers (transit) and sales of equipment in 2012, which are projects that inherently have a lower gross profit margin.

French Overseas Territories: For the year ended December 31, 2012, our purchasing and subcontracting services in the French Overseas Territories was €68.0 million, a 0.6% decrease compared to €68.4 million for the year ended December 31, 2011. As compared to the year ended December 31, 2011, for the year ended December 31, 2012 our purchasing and subcontracting services for cable based services decreased by approximately 4.0% and our purchasing and subcontracting services for mobile services increased by approximately 1.8%.

The decrease in purchasing and subcontracting services for fixed-line services in the French Overseas Territories was primarily due to savings arising through renegotiations of television content rights and interconnection contracts in connection with Le Cable's cable based services.

The increase in costs of sales for mobile services in the French Overseas Territories was mainly due to the increase in interconnections costs with the success of the flat-fee rate plans including unlimited calls introduced by Outremer, which was partially offset by the sharp decrease in mobile termination rates in 2012.

As a result of the factors described above, our gross profit and gross margin by country of operation on a total aggregate basis based on the Illustrative Aggregated Selected Financial Information was as follows:

	Illustrative Aggregated Selected Financial Information											
	For the year ended December 31, 2011						For the year ended December 31, 2012

(2) For the French Overseas Territories, cable based services includes gross profit and gross margin for cable based services we provide in Guadeloupe and Martinique as well as the xDSL based broadband internet (including IPTV) and fixed-line telephony services we provide in Guadeloupe, Martinique, French Guiana, La Réunion and Mayotte.

Foreign exchange translation movements between the NIS and euro had a positive impact of €4.0 million on total gross profit in Israel.

Operating Expenses and EBITDA

Historical Consolidated Basis

For the year ended December 31, 2012, our total operating expenses were €387.1 million, a 24.5% increase compared to €311.0 million for the year ended December 31, 2011. Our total operating expenses (other than purchasing and subcontracting services) comprise of other operating expenses, which increased by 27.4%, general and administrative expenses, which increased by 13.5% and other sales and marketing expenses, which increased by 24.4%, in each case in the year ended December 31, 2012 compared to the year ended December 31, 2011.

Our total operating expenses by our key regions in the years ended December 31, 2012 and 2011, respectively, were: (i) in Israel, €316.5 million and €279.2 million (2011 operating expenses were impacted by the consolidation of the HOT Telecom Group only with effect from March 2011), (ii) Belgium and Luxembourg, €14.7 million and €7.0 million (2011 operating expenses were impacted by the consolidation of Coditel Holding S.A. only with effect from July 1, 2011), (iii) in Portugal, €29.2 million and nil (the Altice International Group did not have any activities in Portugal in 2011), and (iv) in the French Overseas Territories, €8.3 million and €8.1 million.

We define EBITDA in our Historical Consolidated Financial Statements as operating profit before depreciation and amortization, goodwill impairment, other expenses, net, management fees and restructuring and other non- recurring costs. As a result, for the year ended December 31, 2012, our EBITDA was €403.2 million, a 35.4% increase compared to €297.8 million for the year ended December 31, 2011. Our EBITDA by our key regions in the years ended December 31, 2012 and 2011, respectively, were: (i) in Israel, €305.2 million and €256.1 million, (ii) Belgium and Luxembourg, €45.6 million and €20.4 million, (iii) in Portugal, €29.8 million and nil, and (iv) in the French Overseas Territories, €12.1 million and €11.7 million. Our EBITDA margin for the year ended December 31, 2012 was 36.9% compared to 38.0% for the year ended December 31, 2011.

Aggregated Basis

For the year ended December 31, 2012, our total operating expenses on a total aggregate basis based on the Illustrative Aggregated Selected Financial Information were €503.1 million, a 4.9% decrease compared to €529.3 million for the year ended December 31, 2011.

Israel: For the year ended December 31, 2012, our total operating expenses in Israel were €316.5 million, a 5.0% decrease compared to €333.0 million for the year ended December 31, 2011.

Other operating expenses: As compared to the year ended December 31, 2011, for the year ended December 31, 2012 our other operating expenses in Israel decreased by approximately 1.1% from €225.8 million to €223.4 million. This decrease was primarily due to a decrease in salaries and social benefits because of a reduction in head count in customer services personnel which was partially offset by increased costs relating to the build-out of our UMTS network, maintenance on our iDEN network, launch of ISP services and the inability to capitalize certain subscriber acquisition costs due to a change in regulation prohibiting the imposition of exit fees on customers except in limited circumstances, which necessitated an implementation of commitment free contracts.

General and administrative expenses: As compared to the year ended December 31, 2011, for the year ended December 31, 2012 our general and administrative expenses in Israel decreased by approximately 26.2% from €39.7 million to €29.3 million. This decrease was primarily as a result of a decrease in salary and social benefits expenses because of a reduction in head count in administrative personnel.

Other sales and marketing expenses: As compared to the year ended December 31, 2011, for the year ended December 31, 2012 our other sales and marketing expenses in Israel decreased by approximately 5.5% from €67.5 million to €63.7 million. This decrease was primarily due to decreased sales commissions to retailers, advertising costs and sales promotions. This was partially offset by increased salary expense as a result of the inability to capitalize commissions and salaries of sales personnel as compared to the prior year period due to a change in regulation prohibiting the imposition of exit fees on customers except in limited circumstances, which necessitated an implementation of commitment free contracts.

EBITDA: As a result of the factors discussed, for the year ended December 31, 2012, in Israel our EBITDA was €305.2 million, a 6.7% decrease compared to €327.2 million for the year ended December 31, 2011 and our EBITDA margin was 35.9% in December 31, 2012 compared to 38.7% in the year ended December 31, 2011. Foreign exchange translation movements between the NIS and euro had a positive impact of €1.2 million on total EBITDA.

Belgium and Luxembourg: For the year ended December 31, 2012, our total operating expenses in Belgium and Luxembourg were €14.7 million, a 7.4% increase compared to €13.7 million for the year ended December 31, 2011.

Other operating expenses: As compared to the year ended December 31, 2011, for the year ended December 31, 2012 our other operating expenses in Belgium and Luxembourg decreased by approximately 3.2% from €6.4 million to €6.2 million mainly explained by a decrease in technical and maintenance costs following renegotiation of maintenance contracts and a decrease in personnel costs of €0.1 million due to a slight reduction in staffing.

General and administrative expenses: As compared to the year ended December 31, 2011, for the year ended December 31, 2012 our general and administrative expenses in Belgium and Luxembourg increased marginally from €3.9 million to €4.1 million.

Other sales and marketing expenses: As compared to the year ended December 31, 2011, for the year ended December 31, 2012 our other sales and marketing expenses in Belgium and Luxembourg increased by approximately 29.6% from €3.4 million to €4.4 million. This increase was primarily due to the sales and marketing expenses associated with the launch of mobile services in Belgium in September 2012.

EBITDA: As a result of the factors discussed, for the year ended December 31, 2012, our EBITDA in Belgium and Luxembourg was €45.6 million, a 11.3% increase compared to €41.0 million for the year ended December 31, 2011. Our EBITDA margin was 64.0% in the year ended December 31, 2012 compared to 60.9% in the year ended December 31, 2011.

Portugal: For the year ended December 31, 2012, our total operating expenses in Portugal were €72.7 million, a 15.7% decrease compared to €86.3 million for the year ended December 31, 2011. This decrease was a direct result of an operational optimization program implemented by the Altice International Group following the acquisition of Cabovisão in February 2012, which was partially offset by the increase in operating expenditures relating to ONI's B2B business in Portugal as discussed below.

Other operating expenses: As compared to the year ended December 31, 2011, for the year ended December 31, 2012 our other operating expenses in Portugal decreased by approximately 8.2% from €41.7 million to €38.3 million. This decrease was primarily due to savings at Cabovisão resulting from the renegotiation of information technology maintenance and support contracts as well as headcount reductions.

General and administrative expenses: As compared to the year ended December 31, 2011, for the year ended December 31, 2012 our general and administrative expenses in Portugal decreased by approximately 24.4% from €28.8 million to €21.8 million. This decrease was primarily due to savings from head count reductions in corporate and administrative staff and savings through cancelation and renegotiation of certain contracts for administrative services, in each case relating to Cabovisão.

Other sales and marketing expenses: As compared to the year ended December 31, 2011, for the year ended December 31, 2012 our other sales and marketing expenses in Portugal decreased by approximately 19.5% from €15.7 million to €12.6 million. This decrease was mainly due to the cancelation and renegotiation of certain marketing and advertising contracts and headcount reduction in sales personnel, in each case relating to Cabovisão.

EBITDA: As a result of the factors discussed, for the year ended December 31, 2012, our EBITDA in Portugal was €47.9 million, a 22.8% increase compared to €39.0 million for the year ended December 31, 2011. Our EBITDA margin was 16.3% in the year ended December 31, 2011 compared to 20.4% in the year ended December 31, 2012.

French Overseas Territories: For the year ended December 31, 2012, our total operating expenses in the French Overseas Territories were €76.4 million, a 0.9% decrease compared to €77.1 million for the year ended December 31, 2011.

Other operating expenses: As compared to the year ended December 31, 2011, for the year ended December 31, 2012 our other operating expenses in the French Overseas Territories increased by approximately 3.5% from €43.5 million to €45.1 million. This increase was primarily due to measures taken by Outremer to improve its quality of service, in particular through densification of mobile networks and enhancement of the existing loyalty program which was partially offset by certain measures taken to optimize fixed costs, including to reduce payroll (in particular through reallocation of certain customer care staff from local centers in the French Overseas Territories to an offshoring center in Mauritius).

General and administrative expenses: As compared to the year ended December 31, 2011, for the year ended December 31, 2012 our general and administrative expenses in the French Overseas Territories decreased by approximately 12.5% from €13.6 million to €11.9 million.

Other sales and marketing expenses: As compared to the year ended December 31, 2011, for the year ended December 31, 2012 our other sales and marketing expenses in the French Overseas Territories decreased by approximately 2.7% from €20.0 million to €19.5 million. This was principally due to the decrease of external sales (mainly door to door sellers for xDSL offerings), which was partially offset by increased marketing costs associated with the comprehensive revamping of Outremer's mobile service portfolio in 2012, including the launch of flat-fee rate plans with unlimited calls towards the French Overseas Territories and mainland France.

EBITDA: As a result of the factors discussed, for the year ended December 31, 2012, our EBITDA in the French Overseas Territories was €75.1 million, a 3.7% increase compared to €72.4 million for the year ended December 31, 2011. Our EBITDA margin was 34.2% in the year ended December 31, 2012 compared to 33.2% in the year ended December 31, 2011.

The following tables set forth our EBITDA across our segments on an aggregated basis for the years ended December 31, 2011 and 2012.

	Illustrative Aggregated Selected Financial Information											
	For the year ended December 31, 2011						**For the year ended December 31, 2012**					
	Israel[3]	**Belgium & Luxembourg**	**Portugal**	**French Overseas Territories**	**Others[2]**	**Total**	**Israel[3]**	**Belgium & Luxembourg**	**Portugal**	**French Overseas Territories**	**Others[2]**	**Total**

(1) The Altice International Group defines EBITDA as operating profit before depreciation and amortization, goodwill impairment, other expenses, net, management fees and restructuring and other non- recurring costs.

(2) Comprises (i) €8.1 million and €9.8 million of EBITDA generated by our content production and distribution businesses for the twelve months ended December 31, 2011 and 2012, respectively, (ii) €13.4 million and €15.5 million of EBITDA generated by Green Datacenter/Green for the year ended December 31, 2011 and 2012 and (iii) €3.8 million and €5.0 million of negative EBITDA generated by our other holding entities (including corporate expenses) of for the year ended December 31, 2011 and 2012, respectively.

(3) In Israel, costs relating to the purchase of exclusive third party content have only been capitalized with effect from April 1, 2013.

	Illustrative Aggregated Selected Financial Information	
	For the year ended December 31,	
	2011	**2012**
	€ in millions	
EBITDA	497.2	494.2
Equity based compensation[1]	6.0	3.8
Adjusted EBITDA	503.2	498.0

(1) Equity-based compensation consists of expenses pertaining to employee stock options provided to employees in Israel for the year ended December 31, 2011 and 2012, respectively.

Depreciation and amortization

Historical Consolidated Basis

For the year ended December 31, 2012, depreciation and amortization totalled €266.3 million, a 51.0% increase compared to €176.4 million for the year ended December 31, 2011. These were impacted by the factors listed under "—*Discussion and Analysis of our Results of Operations—Year Ended December 31, 2012 compared to the Year Ended December 31, 2011—Significant Events Affecting Historical Results*". Depreciation and amortization in the year ended December 31, 2012 was impacted by the following events:

In May 2011, prior to its acquisition by the Altice International Group, Cabovisão recorded an impairment loss relating to its principal tangible fixed assets (its cable network), amounting to approximately €141.7 million and at the same time it stopped recording depreciation on the amount of such impaired assets. During Cabovisão's financial year ended August 31, 2012, following its acquisition by the Altice International Group, the impairment charge was reviewed and it was concluded that there was not sufficient rational for the impairment charge. Accordingly, the impairment charge was reversed in its entirety and such amount, reduced by depreciation associated with the impaired assets for the last three months of the financial year ended August 31, 2011, was directly recorded in retained earnings of Cabovisão for the financial year ended August 31, 2012 (and accordingly did not have any impact on Cabovisão's income statement for the twelve month period ended December 31, 2012). Depreciation for the twelve months ended December 31, 2011 however includes €11.6 million of depreciation expenses related to the catch-up of depreciation on the relevant assets for the period from September 1, 2011 to December 31, 2011 (corresponding to the first four months of financial year ended August 31, 2012). Depreciation for the twelve months ended December 31, 2011 includes approximately €141.7 million relating to the impairment charge. These events did not have an impact on the financial results of Altice International in the periods under review.

Goodwill impairment

In 2012, Cool Holding a subsidiary of Altice International and the holding company of HOT, recorded an impairment charge of approximately NIS 604 million (€121.9 million equivalent) as a result of a valuation by Cool Holding, with the assistance of an external appraiser, pursuant to which Cool Holding concluded that the recoverable amount of the in-country fixed line communication segment was lower than its carrying amount. There was no goodwill impairment recorded in 2011.

Operating Profit

Historical Consolidated Basis

For the year ended December 31, 2012, (i) other expenses, net totalled €29.8 million, a 432.1% increase compared to €5.6 million for the year ended December 31, 2011; (ii) management fees primarily relating to consulting services totalled €6.2 million compared to €3.1 million for the year ended December 31, 2011 and (iii) restructuring and other non-recurring costs totalled €20.8 million compared to a restructuring and other non-recurring costs of €7.6 million for the year ended December 31, 2011. As a result, for the year ended December 31, 2012, our operating loss was €41.7 million, compared to an operating profit of €105.1 million for the year ended December 31, 2011.

Gains arising on step acquisition

Gain arising on step acquisitions was nil in the year ended December 31, 2012 compared to €134.8 million for the year ended December 31, 2011, which was primarily due to a non-recurring income of €133.0 million recognized in the year ended December 31, 2011 owing to the acquisition of a controlling stake in HOT and the subsequent change in accounting via the consolidation method from equity method as a result of which the equity stake held in HOT prior to the change in control was re-evaluated at its fair value on the date of the change in control.

Share of profit of associates

For the year ended December 31, 2012 our share of profit of associates was nil compared to €11.7 million for the year ended December 31, 2011 representing share of profit from HOT prior to the acquisition of controlling interest in March 2011.

Finance costs (net)

For the year ended December 31, 2012, our net finance costs totalled €174.2million, a 83.4% increase compared to €95.0 million for the year ended December 31, 2011 which was primarily due to full year impact of higher debt levels of the Altice International Group mainly due to the debt incurred by the Altice International Group to finance the Altice International Group's investments in HOT and Coditel in 2011.

Income tax benefits/(expenses)

For the year ended December 31, 2012, our total income tax benefit was €26.0 million compared to an income tax expense of €32.5 million for the year ended December 31, 2011 which was primarily due to higher profit before taxes in the year ended December 31, 2011 as a result of the factors described above and in particular, the non-recurring income of €133.0 million recognized in the year ended December 31, 2011 owing to the acquisition of a controlling stake in HOT Telecom and the subsequent change in accounting via the consolidation method from equity method.

Profit for the year

As a result of the factors discussed above, for the year ended December 31, 2012, our loss for the year was €189.8 million compared to a profit of €123.9 million for the year ended December 31, 2011.

Liquidity and Capital Resources

Cash and Debt Profile

As of September 30, 2014, our consolidated cash and cash equivalents amounted to €140.8 million on an actual basis. Each of our operating subsidiaries maintains cash and cash equivalents to fund their day-to-day requirements.

Our most significant financial obligations are our debt obligations. As a result of the various acquisitions we have made since 2010 and the financing transactions that we entered into to fund such acquisitions, our financing profile has undergone a substantial change in this period. In particular, in December 2012, June 2013 and December 2013 we entered into significant financing transactions, among other things, to finance investments in certain of our subsidiaries and to refinance certain existing indebtedness. Our total debt as of September 30, 2014, was €3,730 million, in each case including finance leases (which amounted to €22 million) but excluding other long term and short term liabilities (and excluding the debt of Green Datacenter which is an unrestricted subsidiary for the purposes of the covenants governing the indebtedness of the Altice International Group). In addition Altice Financing will be able to draw up to $80 million under the 2012 Revolving Credit Facility, up to €330 million under the New Super Senior Revolving Credit Facility (of which it is expected that €180 million will be drawn to complete the PT Portugal Acquisition), up to €501 million under the New Pari Passu Revolving Credit Facility and up to €15 million under the 2013 Guarantee Facility (of which, as of the date hereof, Altice Financing has made one request for a guarantee of up to approximately €6.8 million, which represents a contingent liability of the Altice International Group, as of the date hereof, Altice Financing has made one request for a guarantee of up to approximately €6.8 million which represents a contingent liability of the Altice International Group). In addition, in connection with the Transactions, we expect to issue the 2015 Senior Secured Notes and 2015 Senior Notes and enter into the New Altice Financing Term Loan.

Our material indebtedness (excluding the Existing Altice Financing Revolving Credit Facility Agreements, the New Revolving Credit Facilities, the 2013 Guarantee Facility and finance leases and other long term and short term liabilities) and principal repayment obligations, giving effect to the New Transactions but without giving effect to any hedging transaction and excluding accrued interest and debt issuance costs, with respect to such indebtedness are set forth below. The terms of our debt instruments contain certain restrictions, including covenants that restrict our ability to incur additional debt. As a result, additional debt financing is only a potential source of liquidity if the incurrence of any new debt is permitted by the terms of our existing debt instruments. See "*Description of Other Indebtedness*".

(1) The amount is based on the exchange rate as of September 30, 2014 of €0.215 = NIS1.00.

(2) The amount is based on the exchange rates as of September 30, 2014 of €0.7918 = $1.00.

Sources of Liquidity

Our principal source of liquidity is expected to be the operating cash flows of our operating subsidiaries and if required borrowings under the Existing Altice Financing Revolving Credit Facility Agreements and €15 million under the 2013 Guarantee Facility (of which, as of the date hereof, Altice Financing has made one request for a guarantee of up to approximately €6.8 million). Altice Financing will be able to draw up to $80 million under the 2012 Revolving Credit Facility, up to €80 million under the 2013 Revolving Credit Facility (all of which has been drawn as of September 30, 2014) and up to €15 million under the 2013 Guarantee Facility (of which one request for a guarantee of up to approximately €6.8 million as of the date hereof). In addition, Altice Financing expects to be able to draw €330 million under the New Super Senior Revolving Credit Facility (of which it is expected that €180 million will be drawn to complete the PT Portugal Acquisition) and up to €501 million under the New Pari Passu Revolving Credit Facility.

We expect to use these sources of liquidity to fund operating expenses, working capital requirements, capital expenditures, debt service requirements and other liquidity requirements that may arise from time to time. Our ability to generate cash from our operations will depend on our future operating performance, which is in turn dependent, to some extent, on general economic, financial, competitive, market, regulatory and other factors, many of which are beyond our control. We believe that our cash and cash equivalents, the cash provided from the operations of our operating subsidiaries and any available borrowings under the Existing Altice Financing Revolving Credit Facility Agreements, the 2013 Guarantee Facility, the New Super Senior Revolving Credit Facility and the New Pari Passu Revolving Credit Facility will be sufficient to fund our currently anticipated working capital needs, capital expenditures, and debt service requirements during the next 12 months, although no assurance can be given that this will be the case. However, as our debt matures in later years, we anticipate that we will seek to refinance or otherwise extend our debt maturities. No assurance can be given that we will be able to complete refinancing transactions or otherwise extend our debt maturities. In this regard, it is not possible to predict how economic conditions, sovereign debt concerns and/or any adverse regulatory developments could impact the credit markets we access and accordingly, our future liquidity and financial position. In addition, sustained or increased competition, particularly in combination with adverse economic or regulatory developments, could have an unfavorable impact on our cash flows and liquidity. See "*Risk Factors—Risks Relating to Our Financial Profile*".

The Existing Altice Financing Revolving Credit Facility Agreements, the 2013 Guarantee Facility, the New Super Senior Revolving Credit Facility, the New Pari Passu Revolving Credit Facility, the New Altice Financing Term Loan and the 2013 Term Loan require, while there are any utilizations outstanding, us to maintain compliance with the leverage ratios specified therein, tested as of the end of each fiscal quarter. The Existing HOT Unsecured Notes contain certain financial covenants which require HOT to maintain compliance with a maximum consolidated leverage ratio of 6.0 (calculated on a net debt basis) and minimum equity of NIS 300 million. Further, HOT may only distribute dividends if its consolidated leverage ratio (calculated on a net debt basis) is 5.5 or less. Our ability to maintain compliance with our financial covenants is dependent primarily on our or the relevant operating subsidiaries' ability to maintain or increase EBITDA and to achieve adequate returns on our capital expenditures and acquisitions. In addition, our ability to obtain additional debt financing is limited by the incurrence leverage covenants contained in our various debt instruments. See "*Description of Other Indebtedness.*" Further, if our EBITDA were to decline, we could be required to repay or limit borrowings under the New Super Senior Revolving Credit Facility, the New Pari Passu Revolving Credit Facility and the Existing HOT Unsecured Notes, in order to maintain compliance with applicable covenants. No assurance can be given that we would have sufficient sources of liquidity, or that any external funding would be available on favorable terms, or at all, to fund any such required repayment.

The Issuer is a holding company with no direct source of operating income. It is therefore dependent on dividends, servicing of intercompany loans and other payments from its operating subsidiaries to meet its liquidity requirements.

Working Capital

As of September 30, 2014, we had a negative net working capital position of €220.8 million compared to a negative working capital position of €194.5 million as of September 30, 2013. The negative working capital position is structural and follows industry norms. Customers generally pay subscription revenues early or mid-month, with short Days of Sales Outstanding and suppliers are paid in the beginning of the following month, thus generating a negative working capital. Payables due the following month are generally covered by operating cash flow. We expect our operating cash flows and, if required, available borrowings under the Existing Altice Financing Revolving Credit Facility Agreements, the 2013

Guarantee Facility and the New Super Senior Revolving Credit Facility and the New Pari Passu Revolving Credit Facility will be sufficient to meet our working capital requirements during the next 12 months.

Consolidated Cash Flow Statements

	Historical Consolidated Financial Information

Cash and cash equivalents at end of year/period	**19.8**	**129.7**	**61.3**	**61.9**	**140.8**

Nine Months Ended September 30, 2014 compared to the Nine Months Ended September 30, 2013

Changes in Altice International's cash flows in the nine months ended September 30, 2014 compared to the nine months ended September 30, 2013 were impacted by the significant acquisitions and related financing arrangements described under "*—Discussion and Analysis of our Results of Operations—Nine months ended September 30, 2014 compared to the Nine months ended September 30, 2013—Significant Events Affecting Historical Results*".

Net cash provided by operating activities

Net cash provided by operating activities increased by 74.1% to €502.7 million for the nine months ended September 30, 2014 compared to €288.8 million for the nine months ended September 30, 2013. The increase in net cash provided by operating activities in the nine months ended September 30, 2013 was mainly related to the consolidation of ODO and Tricom into the Group resulting in strong earnings growth and the full nine month impact of Outremer.

Net cash used in investing activities

Net cash used in investing activities decreased by 32.1% to €340.8 million for the nine months ended September 30, 2014 compared to €502.2 million for the nine months ended September 30, 2013. The decrease in cash used in investing activities for the nine month period ended September 30, 2014 compared to the nine month period ended September 30, 2013 was mainly related to the decrease in net payments on the acquisition of subsidiaries, offset by an increase in capital expenditures from €184.1 million for the nine months ended September 30, 2013 to €306.6 million for the nine months September 30, 2014, due to the consolidation of Tricom and ODO into the Group during the first and the second quarter of 2014, respectively and the impact of capital expenditures of Outremer and ONI for the entire duration of nine months ended September 30, 2014.

Net cash provided by (used in) financing activities

Net cash used in financing activities amounted to €83.3 million for the nine months ended September 30, 2014 compared to net cash provided by financing activities of €145.4 million for the nine months ended September 30, 2013 which is primarily attributable to the lower amount of debt incurred in the nine months ended September 30, 2014 compared to the nine months ended September 30, 2013 and the higher amount of interest payable on debt issued during 2013.

Year Ended December 31, 2013 compared to the Year Ended December 31, 2012

Changes in Altice International's cash flows in the year ended December 31, 2013 compared to the year ended December 31, 2012 were impacted by the significant acquisitions and related financing arrangements described under "*—Discussion and Analysis of our Results of Operations—Year Ended December 31, 2013 compared to the Year Ended December 31, 2012—Significant Events Affecting Historical Results*".

Net cash provided by operating activities

Net cash provided by operating activities decreased by 5.5% to €439.2 million for the year ended December 31, 2013 compared to €464.5 million for the year ended December 31, 2012. The decrease in net cash provided by operations was mainly related to the increase in income taxes paid by the Group for the year ended December 31, 2013 as compared to the year ended December 31, 2012 from a cash refund of €1.6 million in the year ended December 31, 2012 to a payment of €2.3 million made in the year ended December 31, 2013

Net cash used in investing activities

Net cash used in investing activities increased by 233.3% to €1,913.6 million for the year ended December 31, 2013 compared to €574.2 million for the year ended December 31, 2012. The increase in the year ended December 31, 2013 can be attributed to higher cash outflow as a result of (i) the acquisition of certain subsidiaries (OMT, ONI, MCS and SportV), (ii) the buyback of minority interests in Coditel and (iii) the buy-out of Cabovisao non-controlling interests each of which occurred in 2013.

Additionally, this balance reflects the cash that was held in escrow as of December 31, 2013, which amounted to the equivalent of €1,234.9 million for the acquisition of ODO and Tricom in the first quarter of 2014. We completed the Tricom Acquisition on March 12, 2014 and the ODO Acquisition on April 9, 2014.

Net cash provided by (used in) financing activities

Net cash provided by financing activities increased by 540.9% to €1,405.6 million for the year ended December 31, 2013 compared to €219.3 million for the year ended December 31, 2012. The increase can primarily be attributed to the 2013 December Senior Secured Notes and the 2013 December Dollar Senior Notes issued on December 5, 2013 proceeds of which were being held in escrow as of December 31, 2013, and which were released in 2014 upon the completion of the ODO Acquisition and the Tricom Acquisition, respectively.

Such proceeds were therefore accounted for as restricted cash (€1,234.9 million) as of December 31, 2013.

Part of these proceeds were used to repay existing debts in the Altice International group, amounting to total of €657.1 million. Cash flow from financing activities also includes payments made to the holders of subordinated debt instruments issued by Altice International, for a total of €212.5million.

Year Ended December 31, 2012 compared to the Year Ended December 31, 2011

Changes in Altice International's cash flows in the year ended December 31, 2012 compared to the year ended December 31, 2011 were impacted by the significant acquisitions and related financing arrangements described under "—*Discussion and Analysis of our Results of Operations—Year Ended December 31, 2012 compared to the Year Ended December 31, 2011—Significant Events Affecting Historical Results*".

Net cash provided by operating activities

Net cash provided by operating activities increased by 51.6% to €464.5 million for the year ended December 31, 2012 compared to €306.4 million for the year ended December 31, 2011. Despite a net loss of €189.8 million in 2012 compared to a net gain in income of €123.9 million in 2011, the operating cash flow in 2011 was offset by the elimination of higher non-cash gains of €133.0 million relating to the step acquisition of HOT (see Note 27 to Altice International's 2011 Historical Consolidated Financial Statements). This increase was slightly offset by a €60.2 million negative impact from the movement in changes in working capital.

Net cash used in investing activities

Net cash used in investing activities decreased by 0.4% to €574.2 million for the year ended December 31, 2012 compared to €576.3 million for the year ended December 31, 2011. The decrease was primarily due to the higher cash outflows of €347.3 million in the year ended December 31, 2011 for acquisitions (including investments in the HOT Telecom Group and Coditel) compared to €35.1 million the year ended December 31, 2012. In addition, we used €172.9 million to acquire the remaining minority interests in HOT in the take-private transaction in December 2012 which is included in cash used in investing activities. This decrease was partially offset by higher capital expenditures in the year ended December 31, 2012 as discussed under "*—Capital Expenditures—Year Ended December 31, 2012 compared to the Year Ended December 31, 2011*".

Net cash provided by (used in) financing activities

Net cash provided by financing activities decreased by 19.5% to €219.3 million for the year ended December 31, 2012 compared to €272.4 million for the year ended December 31, 2011. The decrease was primarily due to the higher levels of interest paid in an amount of €117.8 million in the year ended December 31, 2012 compared to €69.0 million in the year ended December 31, 2011 and the dividends paid to the minority shareholders in an amount of €26.0 million in the year ended December 31, 2012 which was partially offset by the higher levels of debt incurred for purposes other than refinancing of existing indebtedness in the year ended December 31, 2012 (in an amount of €363.2 million versus €341.8 million in the year ended December 31, 2011).

Capital Expenditures

We classify our capital expenditures in the following categories.

Cable based services related: Includes capital expenditures related to (i) connection of customer premises and investment in hardware, such as set-top boxes, routers and other equipment, which is directly linked to RGU growth ("CPEs and installation related"); (ii) investment in improving or expanding our cable network, investments in the television and fixed-line platforms and investments in Docsis network capacity ("cable network and construction related") and (iii) other capital expenditures related to our cable based business.

Mobile services related: Includes capital expenditures related to improving or expanding our mobile networks and platforms and other investments relating to our mobile business.

B2B and others: Includes capital expenditures relating to data centers, backbone network, connection fees of clients premises, rental equipment to customers and other B2B operations as well as content related capital expenditures relating to our subsidiaries that produce and distribute content. Capital expenditures relating to network and equipment that is common to the delivery of cable or mobile services on the one hand and B2B on the other hand are reflected in cable capital expenditures or mobile capital expenditures as the case may be.

	Historical Consolidated Financial Information				
	For the year ended December 31,			For the nine months ended September 30,	
	2011	2012	2013	2013	2014

B2B and others	15.5	11.1	23.8	7.5	45.6
Total Capital Expenditures	**189.8**	**347.0**	**290.1**	**184.1**	**306.6**

Nine months ended September 30, 2014 compared to the Nine months ended September 30, 2013

Capital expenditures on a Historical Consolidated Basis

For the nine months ended September 30, 2014, our total capital expenditures were €306.6 million (representing 22.3% of revenue), a 66.5% increase compared to €184.1 million for the nine months ended September 30, 2013 (representing 19.8% of revenue).

Cable based services related: For the nine months ended September 30, 2014, cable based services capital expenditures were €186.1 million (representing 60.7% of total capital expenditures), a 35.2% increase compared to €137.7 million (representing 74.8% of total capital expenditures) for the nine months ended September 30, 2013.

Mobile services related: For the nine months ended September 30, 2014, mobile services capital expenditures were €74.8 million (representing 24.4% of total capital expenditures), a 92.3% increase compared to €38.9 million (representing 21.1% of total capital expenditures) for the nine months ended September 30, 2013.

B2B and others: For the nine months ended September 30, 2014, B2B and other capital expenditures were €45.6 million (representing 14.9% of total capital expenditures), a 508.0% increase compared to €7.5 million (representing 5.4% of total capital expenditures) for the nine months ended September 30, 2013.

Capital expenditures on a Pro Forma Consolidated Basis

The following table sets forth our cash capital expenditures by country of operation and on a total aggregate basis based on the Pre-PT Transaction Pro Forma Financial Information for the nine months ended September 30, 2013 and 2014, respectively.

	Pre-PT Transaction Pro Forma Financial Information[5]

(1) Others include our B2B telecommunications solutions business and datacenter operations in Switzerland (Green and Green Datacenter), our datacenter operations in France (Auberimmo) and our content production and distribution businesses in France and Luxembourg (Ma Chaîne Sport and SportV). We disposed of our interests in Valvision (which was included in Others) in 2013 to the Numericable Group. Green Datacenter and Auberimmo are designated as unrestricted subsidiaries under the terms governing the indebtedness of the Group. Others for the nine months ended September 30, 2014, it also includes the contribution made by Tricom from March 12, 2014. See note 3 hereto for details.

(2) For the French Overseas Territories, cable based services capital expenditures includes capital expenditures relating to cable based services we provide in Guadeloupe and Martinique as well as the xDSL based broadband internet (including IPTV) and fixed-line telephony services we provide in Guadeloupe, Martinique, French Guiana, La Réunion and Mayotte. For the nine months ended September 30, 2014 it also includes the contribution of Mobius. See note 3 below for details.

(3) Total capital expenditures for the nine months ended September 30, 2014 includes the contribution of Mobius since its consolidation into the Altice International Group from January 1, 2014. For the nine months ended September 30, 2014, Mobius generated € 1.3 million of capital expenditures in B2B and other. Mobius has no other capital expenditures. Total capital expenditures for the nine months ended September 30, 2014 also includes the contribution made by Tricom from March 12, 2014. For the nine months ended September 30, 2014, Tricom had total capital expenditure of €13.2 million, cable-based service capital expenditure of €9.0 million and B2B/Other capital expenditure of €4.2 million.

(4) Excludes Tricom.

(5) Pre-PT Transaction Pro Forma Financial Information for the nine months ended September 30, 2013 and 2014, respectively, gives pro forma effect to the acquisition of ODO, but does not give pro forma effect to the acquisition of PT Portugal, Tricom and Mobius nor the disposal of our mobile network assets in Mayotte and La Réunion which we have committed to undertake. Since the financial information for Tricom and Mobius have been consolidated into the Historical Consolidated Financial Information of the Altice International Group from January 1, 2014 and March 12, 2014, respectively, following the consummation of the Mobius Acquisition on January 1, 2014 and the Tricom Acquisition on March, 12, 2014, the Pre-PT Transaction Pro Forma Financial Information for the nine months ended September 30, 2014 includes the contribution of Tricom and Mobius from the periods for which each of these entities have been consolidated.

Israel: For the nine months ended September 30, 2014, our total capital expenditures in Israel were €155.8 million (representing 49.4% of total capital expenditures); a 14.6% increase compared to € 136.0 million for the nine months ended September 30, 2013 (representing 54.7% of total capital expenditures). The increase in capital expenditures in the cable segment in the nine months ended September 30, 2014 was due to (i) the costs relating to the launch of a project to increase node segmentation for better network quality, (ii) the higher investment in the set-top box installation process to reduce multiple customer visits and (iii) the increase in "FiberBox" installations following its launch in March 2014. The decrease in capital expenditures in the mobile segment was due lower site deployments in the nine months ended September 30, 2014 as compared to the same period last year.

Belgium and Luxembourg: For the nine months ended September 30, 2014, our total capital expenditures in Belgium and Luxembourg were € 14.3 million (representing 4.5% of total capital expenditure), a 2.8% decrease compared to €14.7 million (representing 5.9% of total capital expenditure) for the nine months ended September 30, 2013. The decrease was due to the fact that a variety of exclusive television rights were purchased and capitalized in 2013. We also incurred lower investment costs in cable modem termination systems in the nine months ended September 30, 2014, as compared to the nine months ended September 30, 2013.

Portugal: For the nine months ended September 30, 2014, our total capital expenditures in Portugal were €18.1 million (representing 5.8% of total capital expenditures), a 1.1% decrease compared to €18.3 million for the nine months ended September 30, 2013 (representing 7.3% of total capital expenditures). This was due to a decrease in cable based services capital expenditure resulting from lower activity and the revision of expansion investments, offset by an increase in B2B and other capital expenditure incurred by ONI as a result of the reclassification of certain expenses which were previously capitalized and expensed as operating costs (comprising of costs relating to the right of use of fiber optic backbone network, installation costs and engineering personnel expenses).

French Overseas Territories: For the nine months ended September 30, 2014, our total capital expenditures in the French Overseas Territories were €35.4 million (representing 11.2% of total capital expenditures), a 30.6% increase compared to €27.1 million for the nine months ended September 30, 2013 (representing 10.9% of total capital expenditures). The increase was primarily due to (i) the acquisition of the exclusivity right for the television channel I24 News, and (ii) the repurchase of network equipment initially sold to contractors for cable network maintenance projects, following the decision to discontinue the outsourcing of such projects.

Dominican Republic: For the nine months ended September 30, 2014, our total capital expenditures in the Dominican Republic were €48.4 million (representing 15.5% of total capital expenditures), a 24.4% increase compared to €38.9 million for the nine months ended September 30, 2013 (representing 15.7% of total capital expenditures). The increase related primarily to the acquisition of a 900MHZ frequency band in the second quarter of 2014.

Others: Capital expenditures for our other businesses increased in the nine months ended September 30, 2014 to €43.1 million as compared to €13.4 million for the nine months ended September 30, 2013.

Year Ended December 31, 2013 compared to the Year Ended December 31, 2012

Capital expenditures on a Historical Consolidated Basis

For the year ended December 31, 2013, our total capital expenditures were €290.1 million (representing 22.5% of revenue), a 19.6% decrease compared to €347.0 million for the year ended December 31, 2012 (representing 31.8% of revenue).

Cable based services related: For the year ended December 31, 2013, cable based services capital expenditures were €202.5 million (representing 70.0% of total capital expenditures); a 19.6% decrease compared to €252.1 million (representing 72.7% of total capital expenditures) for the year ended December 31, 2012.

Mobile services related: For the year ended December 31, 2013, mobile services capital expenditures were €62.4 million (representing 21.6% of total capital expenditures); a 25.6% decrease compared to €83.8 million (representing 24.1% of total capital expenditures) for the year ended December 31, 2012.

B2B and others: For the year ended December 31, 2013, B2B and other capital expenditures were €24.4 million (representing 8.4% of total capital expenditures); a 119.8% increase compared to €11.1 million (representing 3.2% of total capital expenditures) for the year ended December 31, 2012.

Capital expenditures on a Pro Forma Consolidated Basis and Aggregated Basis

The following table sets forth our cash capital expenditures by country of operation and on a total aggregate basis based on the Pre-PT/ODO Transactions Pro Forma Financial Information for the year ended December 31, 2013 and on an aggregated basis based on the Illustrative Aggregated Selected Financial Information for the year ended December 31, 2012.

(1) Others include our B2B telecommunications solutions business and datacenter operations in Switzerland (Green and Green Datacenter), our datacenter operations in France (Auberimmo) and our content production and distribution businesses in France and Luxembourg (Ma Chaîne Sport and SportV). We disposed of our interests in Valvision (which was included in Others) in 2013 to the Numericable Group. Green Datacenter and Auberimmo are designated as unrestricted subsidiaries under the terms governing the indebtedness of the Group.

(2) For the French Overseas Territories, cable based services capital expenditures includes capital expenditures relating to cable based services we provide in Guadeloupe and Martinique as well as the xDSL based broadband internet (including IPTV) and fixed-line telephony services we provide in Guadeloupe, Martinique, French Guiana, La Réunion and Mayotte.

(3) In Israel, costs relating to the purchase of exclusive third party content have only been capitalized with effect from April 1, 2013. Consequently, the capital expenditures for the year ended December 31, 2012 do not include any costs relating to the purchase of exclusive

third party content and the capital expenditures for the year ended December 31, 2013 do not include costs relating to the purchase of exclusive third party content incurred in the period prior to April 1, 2013.

Israel: For the year ended December 31, 2013, our total capital expenditures in Israel were €208.9 million (representing 66.5% of total capital expenditures); a 29.3% decrease compared to €295.4 million for the year ended December 31, 2012 (representing 74.3% of total capital expenditures). This decrease was primarily due to higher capital expenditures during the twelve months ended December 31, 2012, related mainly to a one time capital expenditure for the purchase of a building for our call center operations, capital expenditures relating to the purchase of our new set top boxes, HOT Magic HD, and higher cable network and constructions related capital expenditure related to the completion of the upgrade to 100Mb capacity throughout our cable network and the fiber roll out in certain areas in 2012. The decrease in capital expenditures in the mobile segment was primarily due to higher expenditures relating to the expansion of our UMTS network in the twelve months ended December 31, 2012 prior to the launch of our UMTS based cellular services in May 2012.

Belgium and Luxembourg: For the year ended December 31, 2013, our total capital expenditures in Belgium and Luxembourg were €23.0 million (representing 7.3% of total capital expenditure), a 36.5% increase compared to €17.0 million (representing 4.3% of total capital expenditure) for the year ended December 31, 2012 The increase was due to the installation work we conducted following the acquisition of the AIESH concession and the launch of LaBox in 2013, having installed a substantial number of set-top boxes during the twelve months ended December 31, 2013 and capitalization of certain exclusive copyrights.

Portugal: For the year ended December 31, 2013, our total capital expenditures in Portugal were €24.0 million (representing 7.6% of total capital expenditures), a 22.1% decrease compared to €30.8 million for the twelve month ended December 31, 2012 (representing 7.7% of total capital expenditures). This was due to a decrease in B2B and other capital expenditure incurred by ONI in the twelve months ended December 31, 2013, offset by an increase in cable capital expenditure mainly due to the high level of investments made during year ended December 31, 2013 to deploy 'LaBox'.

French Overseas Territories: For the year ended December 31, 2013, our total capital expenditures in the French Overseas Territories were €36.2 million (representing 11.5% of total capital expenditures), a 1.5% increase compared to €35.7 million for the year ended December 31, 2012 (representing 9% of total capital expenditures). The increase was primarily due to the expansion of our 3G mobile networks in Martinique, Guadeloupe, French Guiana, Mayotte and La Reunion and a major renovation work relating to Outremer's distribution network as well as due to the development of a payment platform offering value-added payment services to Outremer's customers and the acquisition of KERTELcom, a small fixed line French operator.

Others: Capital expenditures for our other businesses increased by 18.2% in the year ended December 31, 2013 to €22.1 million as compared to €18.7 million for the year ended December 31, 2012.

Year Ended December 31, 2012 compared to the Year Ended December 31, 2011

Capital expenditures on a Historical Consolidated Basis

For the year ended December 31, 2012, our total capital expenditures were €347.0 million (representing 31.8% of revenue), a 82.8% increase compared to €188.9 million for the year ended December 31, 2011 (representing 24.2% of revenue).

Cable based services related: For the year ended December 31, 2012, cable based services capital expenditures were €252.1 million (representing 72.7% of total capital expenditures), a 98.3% increase compared to €127.1 million (representing 67.0% of total capital expenditures) for the year ended December 31, 2011.

Mobile services related: For the year ended December 31, 2012, mobile services capital expenditures were €83.8 million (representing 24.1% of total capital expenditures), a 77.9% increase compared to €47.1 million (representing 24.8% of total capital expenditures) for the year ended December 31, 2011.

B2B and others: For the year ended December 31, 2012, B2B and other capital expenditures were €11.1 million (representing 3.2% of total capital expenditures), a 28.4% decrease compared to €15.5 million (representing 8.2% of total capital expenditures) for the year ended December 31, 2011.

Capital expenditures on an Aggregated Basis

The following table sets forth our cash capital expenditures by country of operation and on a total aggregate basis based on the Illustrative Aggregated Selected Financial Information.

	Illustrative Aggregated Selected Financial Information											
	For the year ended December 31, 2011						For the year ended December 31, 2012					
	Israel	Belgium and Luxembourg	Portugal	French Overseas Territories	Others	Total	Israel	Belgium and Luxembourg	Portugal	French Overseas Territories	Others	Total
	€ in millions											
Capital expenditures												
CPEs and installations	57.3	5.2	12.4	6.4	—	81.3	98.1	4.4	8.7	7.5	—	118.8
Cable network and constructions	36.9	2.8	5.4	13.0	—	58.1	55.7	6.4	7.1	7.7	—	76.8
Other cable based services	32.7	2.6	1.6	8.7	—	45.6	57.8	6.2	2.4	0.9	—	67.3
Cable based services	126.8	10.6	19.4	28.1	—	185.0	211.6	17.0	18.1	16.1	—	262.8
Mobile services	47.1	—	—	17.2	—	64.3	83.8	—	—	9.2	—	93.0
B2B and others	—	—	15.0	8.1	21.5	44.6	—	—	12.7	10.5	18.7	41.9
Total capital expenditures	173.9	10.6	34.4	53.5	21.5	293.8	295.4	17.0	30.8	35.7	18.7	397.8
EBITDA—total capital expenditures	153.1	30.4	4.6	19.0	(3.8)	203.2	9.8	28.6	17.2	39.4	1.6	96.6

(1) Others includes our B2B telecommunications solutions business and datacenter operations in Switzerland (Green and Green Datacenter), our datacenter operations in France (Auberimmo) and our content production and distribution businesses in France and Luxembourg (Ma Chaîne Sport and SportV.) We disposed of our interests in Valvision (which was included in Others) in 2013 to the Numericable Group. Green Datacenter and Auberimmo are designated as unrestricted subsidiaries under the terms governing the indebtedness of the Group.

(2) For the French Overseas Territories, cable based services capital expenditures includes capital expenditures relating to cable based services we provide in Guadeloupe and Martinique as well as the xDSL based broadband internet (including IPTV) and fixed-line telephony services we provide in Guadeloupe, Martinique, French Guiana, La Réunion and Mayotte.

Israel: For the year ended December 31, 2012, our total capital expenditures in Israel were €295.4 million (representing 74.3% of total capital expenditures), a 69.9% increase compared to €173.9 million for the year ended December 31, 2011 (representing 59.2% of total capital expenditures). This increase was primarily due to increased CPE and installation related capital expenditures as a result of higher capital expenditure incurred during the first two quarters of 2012 relating to our new set top boxes (HOT Magic HD) as well as significantly higher mobile related capital expenditures primarily due to the expansion of our UMTS network. We also experienced an increase in cable network and construction related capital expenditures as a result of the expenditure incurred to complete the upgrade to 100Mb capacity throughout our cable network and fiber roll out in certain areas in 2012. In addition, other cable capital expenditures increased as a result of a one time capital expenditure related to the purchase of a building which houses one of our call center operations and due to an increase in capitalized sales commissions relating to our cable operations.

Belgium and Luxembourg: For the year ended December 31, 2012, our total capital expenditures in Belgium and Luxembourg were €17.0 million (representing 4.3% of total capital expenditures), a 60.4% increase compared to €10.6 million for the year ended December 31, 2011 (representing 3.6% of total capital expenditures). The increase was primarily due to the increase in total cable capital expenditures as a result of higher fees paid for exclusive rights for premium channels (amounting to €1.2 million) and due to the acquisition of the AIESH concession (amounting to €2.5 million) as well as relating to a project for the Brussels police involving installation of fiber links for the CCTV network (amounting to €0.6 million).

Portugal: For the year ended December 31, 2012, our total capital expenditures in Portugal were €30.8 million (representing 7.7% of total capital expenditures), a 10.5% decrease compared to €34.4 million for the year ended December 31, 2011 (representing 11.7% of total capital expenditures). The decrease was primarily due to a decrease in B2B and other capital expenditure incurred by ONI as a result of the significant capital expenditures in 2011 relating to the acquisition of a new VOIP technology platform. In addition, cable capital expenditures decreased mainly due to lower CPE and installation related capital expenditures as a result of the high level of investments made during the year ended December 31, 2011 to deploy set-top boxes with PVR functionality and the impact of the renegotiation of contracts with suppliers relating to installation service as well as due to a reduction in the number of subscribers.

French Overseas Territories: For the year ended December 31, 2012, our total capital expenditures in the French Overseas Territories were € 35.7 million (representing 9.0% of total capital expenditures), a 33.1% decrease compared to €53.5 million for the year ended December 31, 2011 (representing 18.2% of total capital expenditures). The decrease was primarily due to the higher level of cable capital expenditures incurred in the year ended December 31, 2011 as a result of major IRU upgrades in the Caribbean region as well as major mobile related investments in 2011, which included launching 3G mobile services in Mayotte and investments in real-time billing software.

Others: Capital Expenditures for our other businesses were €18.7 million for the year ended December 31, 2012 compared to €21.5 million for the year ended December 31, 2011, a decrease of 13.0%. This decrease was primarily due to the decrease in capital expenditures incurred by Green and Green Datacenter in the year ended December 31, 2012 which was partially offset by the increase in activity in our content business and the capital expenditure incurred by our content subsidiaries in 2012. These content subsidiaries (which we acquired in 2013) were incorporated in 2011 and 2012 respectively and hence did not have a full year of operations in 2011.

Contractual obligations

The following table summarizes the payments that we will be obligated to make under our material contractual commitments as of September 30, 2014. The information presented in the table below reflects management's estimates of the contractual maturities of our obligations. These maturities may differ significantly from the actual maturity of these obligations.

Payments due by period

	Period ending December 31,				
	2014	2015	2016	2017 or later	Total
	€ in millions				
Long-term debt obligations	2	159	43	7,237	7,441
Finance leases	12.6	7.3	5.0	10.4	35.3
Operating leases(1)	55.7	45.2	30.9	50.3	182.1
Total	70.3	211.5	78.9	7,297.7	7,658.4

(1) Includes lease of buildings, office equipment and vehicles for various terms through 2020. Does not take into account any optional extension periods. Includes operating leases of ODO.

In addition, we have other contractual obligations incurred in the ordinary course of business, including commitments relating to building or upgrading network infrastructure, purchase of set-top boxes, modems, mobile handsets and other end-user equipment and various maintenance and support contracts primarily relating to the maintenance and support of network infrastructure and equipment, purchase commitments for content, royalty payments to regulatory authorities and authors' rights to societies and commitments under interconnection contracts. For further details regarding our significant contractual commitments, see note 32 to Altice International's financial statements as of and for the year ended December 31, 2013 and note 31 to Altice International's financial statements as of and for the year ended December 31, 2012 respectively.

In addition, we have obligations under the ODO acquisition agreement to pay certain purchase price adjustments in the near term to the seller of ODO, Wirefree Services Denmark A/S and certain of its affiliates, in relation to the ODO Acquisition. This amounts to €36 million and we have reserved an equivalent amount of our cash and cash equivalents for this purpose.

In addition, we have obligations under defined benefit and defined contribution pension plans. Our cash outflow relating to these obligations will vary depending on a number of factors. In the case of defined benefit plans, we recognize a liability regarding employee benefits in the statement of financial position of Altice International which represents the present value of the defined benefits liability less the fair value of the plan assets, and the past service costs. The liability in respect of defined benefit plans is determined using actuarial valuations. The actuarial valuation involves making assumptions with regards, among others, discount rates, expected rates of return on assets, future salary increases and mortality rates. Due to the long-term nature of these plans, such estimates are subject to uncertainty. Actuarial gains and losses are reflected in the statement of income and statement of other comprehensive income in the period in which they arise, as part of the salary costs. Deposits in a defined contribution plan in respect of severance pay or in respect of emoluments are recognized as an expense at the time of the deposit in the plan, in parallel to the receipt of the labor services from the employee and no additional provision is recognized in the financial statements. As of September 30, 2014, out total pension liabilities were €8.2 million.

Post Balance Sheet Date Events

Related Party Transactions

During the year ended December 31, 2012 and 2013 the Altice International Group paid an aggregate of €6.2 million and €0.6 million to related parties as management fees and during the nine months ended September 30, 2014 the Altice International Group paid an aggregate of €0.6 million. These fees are primarily related to consulting services provided on mergers and acquisitions and negotiations with vendors and banks.

The Altice International Group has entered into certain arrangements with Numericable, including a services agreement with respect to our operations in Belgium and Luxembourg, trade mark license agreements for use of the "Numericable" brand in Belgium and Luxembourg and the French Overseas Territories and the purchase of cable modems and set-top boxes. Additionally, except as disclosed in the notes to the historical consolidated financial statements, the Altice International Group did not have any material transactions with related parties during the years ended December 31, 2013 and 2012 and the nine months ended September 30, 2014.

Off Balance Sheet Arrangements

We are not party to any off-balance sheet arrangements that have, or are reasonably likely to have, a current or future material effect on our financial condition, changes in financial condition, revenue or expenses, results of operations, liquidity, capital expenditure or capital resources, other than the contractual commitments relating to purchase of property plant, and equipment, operating leases and others described under "—*Contractual Obligations*" or as disclosed below or in the notes to the historical consolidated financial statements of the Altice International Group included in these Listing Particulars.

Guarantees

In connection with our operations, we are required to provide a certain number of commitments in terms of performance guarantees for the completion of work, guarantees to municipalities, guarantees to suppliers and guarantees to regulators and other government agencies. At December 31, 2013, these guarantees amounted to approximately €489.5 million.

Quantitative and Qualitative Disclosures About Market Risk

Quantitative and Qualitative Disclosures About Market Risk

We are exposed to market risks relating to fluctuations in interest rates and foreign exchange rates, primarily as between the U.S. dollar, Euro, New Israeli Shekels and the Dominican peso, and use financial instruments to manage our exposure to interest rate and foreign exchange rate fluctuations.

Liquidity Risk

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for our short, medium and long-term funding and liquidity management requirements. We manage liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

Interest Rate and Related Risk

For fixed rate debt, changes in interest rates generally affect the fair value of the debt instrument, but not our earnings or cash flows. Accordingly, interest rate risk and changes in fair market value should not have a significant effect on the fixed rate debt until we would be required to refinance such debt at maturity or, with respect to the HOT Unsecured Notes, pursuant to amortization obligations. As adjusted for the Offering, on a consolidated basis, our primary fixed rate debt obligations were in an amount equivalent to €5,445 million (including finance leases but excluding other financial liabilities) comprising of the 2012 Senior Secured Notes, the 2012 Senior Notes, the 2013 Dollar Senior Notes, the 2013 Euro Senor Notes, the HOT Unsecured Notes, the 2013 Senior Secured Notes and the Notes offered hereby, while our primary floating rate debt obligations (including finance leases and other liabilities) were in an amount equivalent to €2,015 million comprising of the 2013 Term Loan entered into by Altice International, the New Altice Financing Term Loan, and debt of Green Datacenter. In addition, any borrowings we make under the Revolving Credit Facilities and the 2013 Guarantee Facility will bear interest at a floating rate. In addition, a portion of our debt in an amount of NIS 825 million (€177 million equivalent based on the exchange rate as of September 30, 2014), comprising Series A of the HOT Unsecured Notes, is linked to the Consumer Price Index in Israel and therefore actual amounts outstanding may vary from time to time and differ from the nominal amount outstanding.

Foreign Currency Risk

Our business is exposed to fluctuations in currency exchange rates. The HOT Group's primary transactional currency is the New Israel Shekel. ODO's primary transactional currency is the Dominican peso. The primary transactional currency of Green is Swiss Francs. The primary transactional currency of Altice International and its other operating subsidiaries is the euro. We conduct, and will continue to conduct, transactions in currencies other than such primary transactional currencies, particularly the U.S. dollar. Our existing debt is primarily denominated in U.S. dollars, euros and New Israeli Shekels although the amounts incurred in euros and New Israeli Shekels do not necessarily match the amount we earn in the corresponding currency. We seek to manage such transactional foreign currency exposures though our hedging policy in accordance with our specific business needs. As of September 30, 2014, we had the following derivative instruments outstanding to secure foreign currency liabilities and to reduce foreign currency exposure:

- Foreign exchange forward contract relating to a swap of a notional amount of $550 million into New Israeli Shekels (maturing on December 15, 2017);

- Foreign exchange forward contract relating to interest rate hedging on a notional amount of $98.9 million and €40.1 million (maturing on each interest payment date under the 2012 Senior Secured Notes and the 2012 Senior Notes until December 15, 2017), which exchanges fixed euro and U.S. dollar payments into fixed New Israeli Shekels payments;

- Cross currency swaps on notional principal amounts of $200 million, $225 million and €100 million, each swapping into New Israeli Shekels at certain specified rates (maturing on December 15, 2017); and

- Cross currency swaps on notional principal amounts of $293 million, $407 million and $133 million, each swapping into New Israeli Shekels and Euros respectively at certain specified rates (maturing between July and November 2018).

In connection with the Transactions, we expect to enter into various derivative instruments.

In addition, because the reporting currency of the Company is the Euro while the reporting currency of the HOT Group and Green is New Israeli Shekels and Swiss Francs respectively, we are exposed to translation foreign currency exchange risk arising from the consolidation of such entities into the Company's consolidated financial statements. For more information on our foreign currency translation risk and sensitivity analyses, please see note 19 to Altice International's financial statements as of and for the year ended December 31, 2013.

Critical Accounting Policies, Judgments and Estimates

See note 1 to our Historical Consolidated Financial Information included elsewhere in these Listing Particulars.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS OF NUMERICABLE GROUP

The following discussion of the Numericable Group's financial condition and results of operations should be read together with (i) the Numericable Group's audited annual combined financial statements for the years ended December 31, 2011, 2012 and 2013 and the notes thereto; (ii) the Numericable Group's audited annual consolidated financial statements for the year ended December 31, 2013 and the notes thereto; (iii) the Numericable Group's unaudited interim condensed combined financial statements for the nine months ended September 30, 2014 and the notes thereto; and (iv) Recent Developments, all of which are included elsewhere in these Listing Particulars. This discussion contains forward-looking statements that are subject to numerous risks and uncertainties. See "Forward-Looking Statements".

In this section, unless the context requires otherwise, the terms "Numericable Group", "we", "us" and "our" refers only to Numerable Group and its subsidiaries (but excluding SFR), and the term "Numericable" refers to Numericable-SFR S.A. (formerly known as Numericable Group S.A.). For a discussion of the financial conditions and results of operation of SFR, please see "Management's Discussion and Analysis of Financial Condition and Results of Operations of SFR".

Overview

Introduction

Numericable Group is the sole major cable operator in France. It was created through the combination of several cable and B2B telecommunications operators and operates using a highly capillary network infrastructure to serve three telecommunication market segments in France:

- the B2C segment, which includes retail products and services under the Numericable brand and fiber white label offerings. The B2C segment makes up the largest part of the Numericable Group's revenues, contributing €660.6 million for the nine months ended September 30, 2014 (or 66.3% of the Numericable Group's total revenues) and €864.6 million in revenues for the year ended December 31, 2013 (or 65.8% of the Numericable Group's total revenues).

- the B2B segment, which includes offers SMEs, large businesses and government entities. The B2B segment is the second largest contributor to Numericable Group revenues, contributing €240.3 million for nine months ended September 30, 2014 (or 24% of the Numericable Group's total revenues) and €309.6 million in revenues for the year ended December 31, 2013 (or 23.6% of the Numericable Group's total revenues).

- the wholesale segment, which includes voice, data, infrastructure and DSL white label services for telecommunications operators and Internet access providers. The wholesale segment is the third largest contributor to the Numericable Group revenues, contributing €94.5 million for the nine months ended September 30, 2014 (or 9.5% of the Numericable Group's total revenues) and €140.0 million in revenues for the year ended December 31, 2013 (or 10.7% of the respective Numericable Group totals).

The following table provides a breakdown of segment revenues (before elimination of inter-segment sales) for the years ended December 31, 2011, 2012 and 2013 and the nine months ended September 30, 2013 and 2014. This table follows the breakdown found in Note 5 to the consolidated annual financial statements and in Note 3.1 to the consolidated half-year statements, where eliminations of inter-segment sales are not allocated by segment. The Numericable Group analyzes segment revenues in this section based on this breakdown, pursuant to which sales and related costs are within the same segment.

(in € millions)	For the year ended December 31, 2011	2012	2013	For the nine months ended September 30, 2014	2013
Revenue					
B2C	835.3	832.6	869.4	664.9	648.6
B2B	331.1	324.5	312.6	243.3	227.8
Wholesale	201.1	211.5	200.8	155.0	140.7
Inter-segment eliminations	(60.6)	(66.1)	(68.6)	(68.9)	(48.1)
Total	**1,306.9**	**1,302.4**	**1,314.2**	**995.4**	**968.9**

In order to reconcile this contribution with each segment's contribution to Numericable Group consolidated revenue, the following table allocates inter- segment sales eliminations by segment revenue:

(in € millions)	For the year ended December 31, 2011	2012	2013	For the nine months ended September 30, 2014	2013
Segment					
B2C	(5.0)	(6.4)	(4.9)	4.2	3.1
B2B	(2.9)	(1.3)	(3.3)	3.0	2.3
Wholesale	(52.8)	(58.4)	(60.5)	61.5	42.7
Total inter-segment eliminations	**(60.6)**	**(66.1)**	**(68.6)**	**(68.8)**	**(48.1)**

The Numericable Group's service and product offerings are supported by an integrated network and are adapted to the characteristics and requirements of each market segment:

- In the B2C segment, the Numericable Group offers television, very- high-speed broadband Internet and fixed-line and mobile telephony services on both a bundled and stand-alone basis, and in both branded and white label form (through its fiber/cable network). The Numericable Group also offers analog television services to individual subscribers and bulk digital services to multiple-dwelling unit managers.

- In the B2B segment, the Numericable Group offers data services, including IP VPN, LAN to LAN, Internet, security, hosting and cloud computing, as well as voice services, including voice calls, VoIP and Centrex.

- In the wholesale segment, the Numericable Group offers voice and data wholesale carrier services, as well as DSL white label products. Within this segment, the Numericable Group also sells fiber network infrastructure-based wholesale services to other telecommunication operators and to the B2B segment as well.

As of December 31, 2013, the Numericable Group served approximately 1.3 million direct individual subscribers, approximately 1.8 million bulk customers, and approximately 363,000 fiber white label end-users. For the year ended December 31, 2013, the Numericable Group's consolidated revenues were €1,314.2 million, and the Numericable Group's EBITDA was €560.1 million.

As of September 30, 2014, the Numericable Group served approximately 1.3 million direct individual subscribers, approximately 1.8 million bulk customers, and approximately 362,000 fiber white label end-users. For the nine months ended September 30, 2014, the Numericable Group's consolidated revenues were €926.6 million, and the Numericable Group's EBITDA was €443.1 million.

Presentation of the Consolidated Financial Statements Included in these Listing Particulars

Numericable Group was formed on August 2, 2013. On November 7, 2013, in the context of the listing of the Company's shares on Euronext Paris, two Luxembourg holding companies, Ypso Holding S.à.r.l, parent company of Ypso France, and Altice Lux Holding S.à.r.l, parent company of Altice B2B France, were contributed to the Company.

Ypso France, which includes Numericable's commercial activity, is a French provider of cable television services through high-end digital channel packages accessible to households with "triple-play" cable network connections. Ypso France also provides broadband Internet access to the French residential market as well as fixed and mobile telephony services.

Altice B2B France, through Completel, its main operational entity, manages the largest alternative fiber-to-the-office ("FTTO") network in France and is the third largest alternative DSL network in France. By directly connecting its business customers' sites to fiber and DSL networks, Completel SAS provides the commercial market with a complete range of services that includes data transfer and very high speed Internet and telecommunications services, as well as convergence and mobility services.

These Listing Particulars includes an English language translation of the Numericable Group's consolidated annual financial statements for the year ended December 31, 2013, which includes comparative information for 2012 which are identical to those included in the Numericable Group's combined annual financial statements for the year ended December 31, 2012, except for the impact of IAS 19, which was applied retrospectively. These accounts were prepared in accordance with IFRS as published by the International Accounting Standards Board ("IASB") and adopted in the European Union as of December 31, 2013.

The comparative data presented for the year ended December 31, 2012, and the nine-month period ended September 30, 2013, corresponds to the consolidated financial statements of the two sub-groups, Ypso and Altice B2B. Prior to their contribution to Numericable Group on November 7, 2013, these two sub-groups were separate entities under the joint control of the private investment funds Carlyle, Cinven and Altice. As a result, the combined financial statements included for purposes of comparison reflect the historical assets, liabilities, income, expenses and cash flow of the Ypso and Altice B2B sub-groups, which were two separate groups as of December 31, 2012, and September 30, 2013.

Critical Accounting Policies

For a description of the Numericable Group's significant accounting policies and critical accounting estimates, see Notes 2 and 3 to the annual consolidated financial statements as of and for the year ended December 31, 2013, an English translation of which is included elsewhere in these Listing Particulars.

Significant Factors Affecting Results of Operations

The Numericable Group's operations and the operating metrics discussed below have been, and may continue to be, affected by certain key factors as well as certain historical events and actions. In addition to the regulatory and macroeconomic environment, the key factors affecting the ordinary course of the Numericable Group's business and its results of operations include (i) the attractiveness of the Numericable Group's products and services, including relative to the Numericable Group's competitors, (ii) changes in pricing, (iii) customer acquisition and churn, (iv) the Numericable Group's cost structure and cost optimization programs and (v) network upgrades and maintenance. Each of these factors is discussed in more detail below.

The Attractiveness of the Numericable Group's Products and Services

B2C Segment Products and Services

The Numericable Group offers subscribers within its network area television, very-high-speed broadband Internet, fixed-line and mobile telephony services. The Numericable Group also provides analog television services to individual subscribers and bulk digital services to multiple-dwelling unit managers. The B2C segment also includes the Numericable Group's white label business with Bouygues Télécom using the Numericable Group's fiber/cable network. These products compete with those of the Numericable Group's competitors. See "*Risk Factors—Risks Relating to Our Business, Technology and Competition—We face significant competition in each of the industries in which we operate and competitive pressures could have a material adverse effect on our business*".

The Numericable Group's new B2C customers commit for a period of 12 months. A security deposit (of €75) is required only for subscriptions to packages that include LaBox.

The Numericable Group frequently upgrades its product offerings and service quality, in particular by increasing broadband Internet speeds and expanding its digital television offering and the range of interactive services offered, in order to stay competitive in a highly competitive environment, retain existing customers and attract new customers and increase ARPU (see below). Promotional offers may also include a price reduction (thereby reducing ARPU and related revenue) in a given period.

The Numericable Group's most recent efforts have focused on its bundled services offered to individual subscribers. The Numericable Group's bundled offers combine several services into packages, thus enabling subscribers to conveniently order television, broadband Internet and fixed telephony services together and, if desired, mobile telephony services. The Numericable Group believes that its introduction of bundled packages has been a key factor in its success in attracting new subscribers. The Numericable Group's progressive upgrading of its network to EuroDocsis 3.0 technology also enables it to offer customers top of market broadband speeds and access services.

In May 2012, the Numericable Group began marketing "LaBox", an integrated set-top box and cable router that it offers to triple-play and quadruple-play customers who subscribe to the Numericable Group's premium packages. Marketing increased significantly in September 2012. The Numericable Group believes that LaBox is one of the most powerful and interactive set- top boxes on the French market, taking advantage of the portion of the Numericable Group's network that has been upgraded to EuroDocsis 3.0 technology. LaBox has generated increasing ARPU for the Numericable Group as the proportion of premium sales (which include LaBox) has increased and has allowed the Numericable Group to attract new customers to its network. Approximately 70% of new customer adds for the period from September 30, 2012, to June 30, 2014 (78% in the first half of 2014), were for the Numericable Group's high-end multi-play offerings, including LaBox. Nearly 420,000 LaBox units had been deployed as of September 30, 2014, for a penetration rate of 38.8% of the Numericable Group's multi-play customer base.

B2B Segment Product Offerings

The Numericable Group provides business customers with a comprehensive service offering, which includes voice services, including voice calls, VoIP and Centrex, and data services, such as very-high-speed broadband Internet, worksite connection and housing (IP VPN, LAN to LAN, SAN to SAN) and cloud services and hosting. This service offering competes with those of the Numericable Group's competitors. See "*Industry and Market Overview—France—B2B Market*".

As described in "*Description of Our Business—Customer Contracts and Billing*", contracts with B2B customers are generally entered into for an initial minimum period of one year (for voice services) and three years (for data services), but are renewable for an indefinite period of time unless terminated by the customer or renegotiated. Contracts with public sector entities generally have a maturity of three to five years, following mandatory tender processes.

The Numericable Group's voice and data services offer a complete range of telecommunications services. Voice and data services offerings enable customers to centralize their telephony needs on their principal sites by centralizing all of their equipment and telephone calls and connecting the customer's central site to the Numericable Group's fiber optic network for better quality and to the Numericable Group's SDSL network for remote sites. The Numericable Group believes that such access to its network is a major competitive advantage that has allowed it to both attract and retain a large customer base. As most of the Numericable Group's customers are located near the Numericable Group's fiber or DSL network, only limited additional investment is needed to connect customer sites.

The Numericable Group has adapted to the changing telecommunications environment by deploying a full range of cloud computing solutions, including external flexible telephony services, messaging and security solutions and hosting services (e.g. servers and platforms). The Numericable Group focuses in particular on providing IaaS, which provides customers with the benefits of infrastructure without having to invest in it.

The Numericable Group has made strategic acquisitions in order to bolster the competitiveness and attractiveness of its B2B product offering. For example, in 2010, the Numericable Group significantly enhanced its IP VPN offering by acquiring Altitude Télécom, a French specialist in IP VPN which had close relationships with the public sector, and thereby solidified the Numericable Group's public sector entity customer base. Combining IaaS with the Numericable Group's broadband network uses the power of fiber and contributes to customer loyalty, while leveraging Completel's expertise in critical network architecture (Business Continuity Solutions, or disaster recovery plans).

The Numericable Group has a packaged offering for medium-sized companies—Completude—which bundles fixed voice, data and additional services. Completel's premium package, Completude Max, offers broadband Internet at a speed of up to 100 Mbps through the Numericable Group's FTTB network for the same price as DSL access.

Wholesale

In the wholesale market, the Numericable Group provides wholesale voice and data carrier services and network infrastructure-based wholesale services, including IRUs or bandwidth capacity on its network. It provides these services directly or through its subsidiary Sequalum, under a public-private partnership. The segment also includes the Numericable Group's ADSL white label business, which currently consists of services for former Darty customers who have been transferred to Bouygues Télécom (see "*Description of Our Business—Material Contracts—White Label Contracts in France*"). The Numericable Group's wholesale business is an opportunistic one; the Numericable Group can use the network in which it has invested for its B2C and B2B businesses and generate higher margins and benefit from growth opportunities. The wholesale segment also benefits from cross-selling opportunities with the B2B segment, when analysis of a customer's requirements indicates that the Numericable Group can better serve it through a wholesale offering to another operator. This service offer competes with those of the Numericable Group's competitors. See "*Industry and Market Overview—France—B2B Market—Wholesale Market*".

Pricing

B2C Segment Pricing

Pricing in the French B2C market segment is primarily driven by the pricing of multi-play packages, to which the vast majority of customers subscribe. The cost of a multi-play subscription package generally depends on market conditions and pricing by competitors with similar offerings. In addition, pricing depends on the content and options available on each platform (i.e., number of regular and premium channels offered for television, maximum speed for Internet, regular and long-distance minutes for fixed-line telephony, and number of voice minutes and text messages for mobile telephony). Subject to certain exceptions, the more options, content, and included usage time, the higher the price of the multi-play package in question. For example, the addition of a basic mobile telephony package is currently free for premium triple-play subscribers, while the addition of a premium mobile telephony package raises the subscription price. Subscription fees for stand- alone offerings are also sensitive to the number of options, the content and the included usage time, although pricing for these services tends to be less competitive as the majority of the market competes primarily on the multi- play arena.

The Numericable Group adjusts its pricing policies based on evolving market practices. In the past, the French triple-play market was structured around offers at €30 per month. Like other operators, the Numericable Group raised the price of its basic triple play package in January 2011. Similarly, in 2012, the Numericable Group made further changes to its pricing structure in response to changing market conditions. In particular, the Numericable Group began offering its basic triple-play package, “Start”, and its entry-level package, “iStart”, and also lowered the price of its stand-alone mobile telephony services. In 2014, the Numericable Group again modified its pricing structure, slightly raising the prices of its offerings.

The Numericable Group continues to offer television services on a stand-alone basis to existing subscribers.

The Numericable Group’s bulk packages to building managers include access to basic television services and a basic triple-play package that includes a standard digital television package of 48 channels, 30 radio channels, unlimited broadband Internet access up to 2 Mbps and unlimited inbound fixed-line telephone calls. These packages are sold for a fixed subscription fee per apartment, irrespective of whether the services are actually used by the residents. The contracts have an average duration of five years. Most bulk contracts are for only basic television services. Pricing for bulk packages varies by building and by the content provided, with an average price of €3.00 per end-customer per month.

The Numericable Group believes that its current B2C pricing structure, together with the growth in the adoption of additional content-related services such as VOD, should drive growth in revenue and ARPU.

B2B Segment Pricing

Prices for B2B contracts are negotiated with each customer. The B2B market for voice services is extremely price sensitive, as voice services are highly commoditized, with sophisticated customers and relatively short-term (one year) contracts. The B2B market for data services is less price sensitive, as data services require more customization. In both markets, price competition is strongest in the large corporates segment whereas customer-adapted solutions are an important competitive focus in the medium and smaller business segment.

Wholesale Segment Pricing

Prices for wholesale contracts are either regulated and based on a “cost plus” structure, with the interconnection cost set by the ARCEP or freely negotiated with the Numericable Group’s wholesale customers, depending on the service. The Numericable Group’s ability to offer competitive prices is a major factor in winning contracts.

Moreover, Sequalum charges fees for various services rendered to operators (see “*Description of Our Business—Products and Services—Business-to-Business Services—Infrastructure Wholesale Services*”), such as the connection and disconnection of plugs, network capacity increases and the maintenance of the network. It also sells capacity on its network to wholesale telecommunications operators. Legal proceedings are currently ongoing over the termination of Sequalum’s DSP 92 contract. See “*Description of Our Business—Legal Proceedings—Dispute Settlement Proceedings Concerning the DSP 92*”. The access fees charged to retail telecommunications operators in a portion of Hauts-de-Seine that is classified as a “dense area” are regulated by the ARCEP. Other fees charged by Sequalum are not regulated.

Churn

B2C Churn

The B2C television, broadband Internet and telephony industries typically exhibit relatively high churn rates as a result of high levels of competition. Churn rates result primarily from changes in the Numericable Group's or its competitors' pricing, the level of customer satisfaction and the relocation of subscribers outside of its network area. Increases in the churn rate may lead to increased costs and reduced revenues. The Numericable Group has implemented initiatives designed to improve its customers' experience. These initiatives include enhanced CRM systems, which enable the Numericable Group to manage new subscribers more efficiently and to identify and offer special retention packages to subscribers identified as at risk of churning.

The following table sets out the B2C segment's churn rates for direct customers (i.e. not including white label end-users or bulk subscribers) for the years ended December 31, 2011, 2012 and 2013 and for the nine months ended September 30, 2013 and 2014.

	For the year ended December 31,			For the nine months ended September 30,	
	2011	**2012**	**2013**	**2014**	**2013**
Product					
Triple-play	18.1%	17.2%	17.0%	15.2%	16.8%
Overall	**19.4%**	**18.6%**	**19.2%**	**15.1%**	**18.6%**

The Numericable Group believes that the B2C segment has higher churn rates as compared to the triple-play market average; the Numericable Group believes this reflects in particular the loss of customers who move outside of the Numericable Group's fiber/cable network area, which connects only approximately 35% of homes in mainland France; the Numericable Group believes that this factor accounts for an additional churn rate as compared to other national operators. In order to reduce this type of churn, the Numericable Group launched a new DSL triple-play offering in August 2013 in the non-fiber/cable part of its network.

The Numericable Group believes its improved CRM systems have contributed to a significant reduction in churn. The Numericable Group's analog television churn rate spiked in 2011, with the official transition to DTT broadcasting completed in November 2011. The Numericable Group expects high churn rates to continue in analog television until the service is ultimately phased out. See "*Description of Our Business—Products and Services—Pay Television—Western Europe—France*". The increase in stand-alone digital television churn results from migration to triple-play packages, in line with market trends. For a definition of churn as it is used herein, see the Glossary included in these Listing Particulars.

Cost Structure and Cost Optimization

The Numericable Group's most significant costs include content costs (including author rights, signal costs and royalties), staff costs, advertising fees, fees for rights of way, rental and leasehold charges and energy costs.

Certain of the Numericable Group's costs, such as a portion of its network operations, customer care, billing and administration costs, are fixed, while a portion of its marketing and content costs are variable. Costs related to the Numericable Group's fiber/cable network are allocated to the B2C segment, whereas costs related to the Numericable Group's backbone and DSL network are allocated to the B2B segment. No network-related costs are allocated to the wholesale segment. The Numericable Group's general and administrative costs are allocated pro rata based on the relative size of the segments.

Since 2010, the Numericable Group has initiated several cost-saving initiatives that have resulted in an improvement of its cost base, despite an increase in marketing over the period. Such initiatives include (i) the renegotiation of content contracts, (ii) the restructuring of the Numericable Group's sales force, and (iii) measures to reduce bad debt costs. The Numericable Group regularly reviews opportunities to decrease its costs and improve its profitability.

Network Upgrade and Maintenance

In 2012, 2013 and in the nine-month period ended September 30, 2013 and 2014, 11% (€33 million), 15% (€42 million), 13% (€27 million) and 21% (€53 million), respectively, of the Numericable Group's capital expenditures were related to its network, including upgrades, extensions and bandwidth capacity enhancements in relation to its existing network as well as capital expenditures related to DSP 92 (discussed below). The Numericable Group also incurred €107 million and

€125.5 million in maintenance expenses in 2012 and 2013, respectively, and €85 million and €70 million, respectively, in the first nine months of 2014 and 2013.

The Numericable Group's ability to provide new HD and on-demand digital television services, broadband Internet access at ever-higher speeds and telephony services to additional subscribers depends in part on the Numericable Group's ability to upgrade its network. During each of 2012 and 2013 and the nine-month period ended September 30, 2014, the Numericable Group deployed fiber on a substantial part of its network and upgraded a portion of it to EuroDocsis 3.0 technology, making substantial capital expenditures in this respect.

The Numericable Group also upgrades and expands the reach of its network through public-private partnerships. The most significant current public-private partnership is implemented through the Numericable Group's subsidiary Sequalum, which carries out wholesale activities in the "Hauts de Seine" district that includes the "La Défense" business district. Sequalum was established in 2008 to plan, finance, market, deploy and operate an FTTH very-high- speed fiber network under a French law scheme known as délégation de service public (with this one known as the "DSP 92"). Fiber deployment began in October 2009 and continues today; revenues are currently generated and are accounted for in the wholesale segment. Capital expenditures in connection with DSP 92 have been included within the Numericable Group's network capital expenditures. In July 2013, the Numericable Group received notification from the conseil général des Hauts-de-Seine of the approval of Phase II of this project. However, legal proceedings are currently ongoing over the termination of the DSP 92 contract. See "*Description of Our Business—Legal Proceedings—Dispute Settlement Proceedings Concerning the DSP 92*".

The Numericable Group expects to pursue similar public-private opportunities to expand its network in the future, which would result in increased capital expenditures.

Going Concern

The Numericable Group's consolidated financial statements have been prepared assuming that the Numericable Group will continue as a going concern. As discussed in Note 1.8 to the consolidated interim financial statements, the Numericable Group was formed by a series of acquisitions, mainly funded through external borrowings. In addition, the construction and subsequent upgrading of the Numericable Group's network have required substantial investments. These two factors, in addition to the 2014 SFR Acquisition which was completed on November 27, 2014, explain the Numericable Group's financial structure, the significant proportion of financial liabilities in relation to total consolidated equity and the significant financial expenses related to the cost of debt.

The Numericable Group services its debt and funds its investments through net cash from operations. Note 2.3 of the consolidated interim financial statements specify that in May 2014 the Numericable Group refinanced its senior debt, which allowed it to reschedule a large part of its long-term financial debt. Note 2.3 also lists the terms and conditions of the financing for the 2014 SFR Acquisition and the potential consequences had the transaction not been completed.

Under the conditions described in Note 1.8 to the consolidated interim financial statements an English language translation of which included elsewhere in these Listing Particulars, and given the available cash flow projections, the Numericable Group's Board of Directors believes that the Numericable Group will be able to finance its cash requirements at least for the next twelve months from the date of approval of the interim condensed consolidated financial statements as of September 30, 2014 and meet its financial debt obligations during the period.

Changes in Scope of Consolidation

The Numericable Group's results are affected by acquisitions and divestitures.

In March 2013, the Numericable Group acquired Auchan's television, very high speed Internet access and fixed telephony services business (thereby terminating a white label agreement with Auchan), which represented approximately 5,000 individual subscribers.

In June 2013, the Numericable Group acquired the French simplified stock company (société par actions simplifiée) Valvision, a small regional cable operator in France, with approximately 5,000 individual subscribers and 8,000 bulk subscribers.

On October 31, 2013, through Altice B2B France SAS, the Numericable Group acquired 100% of the shares composing the share capital of Invescom, a holding company whose only activity consisted of holding all of the share capital of LTI Télécom, a telecommunications operator created in 1998 and present in the B2B market, offering essentially fixed telephony, mobile telephony, Internet and VPN services to small and medium-sized French businesses with 5 to 250 employees.

The Numericable Group did not carry out any significant divestitures in 2012 or 2013.

The Numericable Group did not carry out any significant divestitures in the nine-month period ended September, 2014. The Numericable Group, however, incurred expenses with respect the completed 2014 SFR Acquisition, in particular advisory fees and expenses related to the debt issued in May 2014 to finance this acquisition.

Key Performance Indicators

Homes Connected and Number of Individual Subscribers

The Numericable Group tracks the number of customers it can address and the number of digital, analog and bulk subscribers and white label end-users as performance indicators. The Numericable Group also tracks the number of stand- alone and multiple-play customers subscribed to its products. Such metrics allow the Numericable Group to analyze the success of its different offerings and packages of offerings, and adjust its offerings accordingly.

	As of and for the year ended December 31			**As of and for the nine months ended September 30,**	
B2C Operating Data	**2011**	**2012**	**2013**	**2014**	**2013**
		(in thousands)			
Footprint[1]					
Homes passed[2]	9,833	9,875	9,940	9,975	9,932
Triple-play enabled	8,368	8,428	8,511	8,603	8,493

DSL white label end-users (Bouygues ex-Darty)	204	168	120	132	89

(1) Operating data related to the Numericable Group's footprint and penetration are presented as of the end of the period presented.

(2) A home is deemed "passed" if it can be connected to the distribution system without further extension of the network.

(3) Includes double-pay services (Internet and fixed telephony, fixed telephony and television, television and Internet)

(4) Includes stand-alone Internet and stand-alone fixed-line and mobile telephony subscribers.

(5) Fiber white label end-users (i.e. not including DSL white- label end users), in accordance with the financial communication policy of Ypso France, as well as the accounting segments of the Numericable Group (fiber white label activities are included in the B2C segment and DSL white label activities are included in the wholesale segment).

(6) Bulk subscribers are subscribers through a collective contract entered into between a cable operator and a property agent or housing association.

The Numericable Group generates new subscribers through a broad range of sales channels, through its own sales outlets, from other retail outlets, its website, inbound and outbound telesales and door-to-door sales. The Numericable Group maintains a detailed monthly reporting system which provides regular updates on, among other metrics, numbers of new customers, churn rates, revenue generation and customer satisfaction. See "*Description of Our Business—Marketing and Sales*".

The total number of customers and the mix between subscriptions to lower- range or premium products significantly affect the Numericable Group's revenues, ARPU and EBITDA.

RGUs

The Numericable Group uses RGUs, or "Revenue Generating Units", to track the level of subscription to its B2C services (before effective connection). Each individual subscriber receiving cable TV, broadband Internet, fixed or mobile telephony services over the Numericable Group's network counts as one RGU. Thus, one direct subscriber who receives all of the Numericable Group's services is counted as four RGUs.

RGU is not a measure of financial performance under IFRS, nor is RGU verified by a third party. RGU is derived from management estimates. As defined by the Numericable Group's management, RGU may not be comparable to similar terms used by other companies. See the Glossary included in these Listing Particulars. The Numericable Group's RGUs only reflect Numericable brand subscribers and do not include white label end-users or bulk subscribers.

	For the year ended December 31,			**For the nine months ended September 30,**	
	2011	**2012**	**2013**	**2014**	**2013**
	(in thousands except RGUs per individual user)				
TV Individual RGUs	1,216	1,163	1,140	1,134	1,144
Internet Individual RGUs	950	985	1,054	1,095	1,032

Mobile Telephony Individual RGUs	47	113	186	236	167
Total individual RGUs	**3,110**	**3,207**	**3,404**	**3,535**	**3,343**
Number of individual RGUs per individual user	**2.27**	**2.41**	**2.53**	**2.61**	**2.49**

(1) Only Numericable direct individual subscribers (i.e. not including white label end-users or bulk subscribers).

ARPU

The Numericable Group uses the ARPU metric to track the performance of its B2C business. ARPU is not a measure of financial performance under IFRS, nor has ARPU been reviewed by the outside auditors, a consultant or an expert. ARPU is derived from internal management calculations and assumptions. The definition of the term used by the Numericable Group's management may not be comparable to similar terms used by other companies. See the Glossary included in these Listing Particulars.

ARPU is a measure the Numericable Group uses to evaluate how effectively it is realizing potential revenues from its direct digital customers. Monthly ARPU is generally calculated on a yearly and quarterly basis by dividing the Numericable Group's total direct digital subscription-related revenue for the period, excluding installation, carriage, connection and disconnection fees, and deposits, by the average number of the Numericable Group's direct digital subscribers served in that period. Operational data related to gross-adds ARPU and customer-base ARPU presented in these Listing Particulars reflect ARPU from the Numericable Group's direct digital subscribers only.

ARPU is highly sensitive to the pricing of the Numericable Group's packages. For example, the Numericable Group saw an increase in ARPU resulting from price adjustments in its triple-play packages and the launch of its quadruple- play packages in 2011, primarily as a result of price increases due to evolving market trends. See "*—Significant Factors Affecting Results of Operations—Pricing*". Recent ARPU increases result from (i) upgrades to the Numericable Group's B2C offers by adding new television channels, new content, new television applications, (ii) customer migration to premium packages, driven primarily by the availability of very high speeds (EuroDocsis 3.0 technology) and LaBox, as well as by price increases, and (iii) an increased mobile telephony penetration rate.

The table below shows the evolution of the Numericable Group's customer- base ARPU (calculated by dividing the Numericable Group's total direct digital subscription related revenue, including paid subscription fees and extra consumption on fixed and mobile telephony and TV options but excluding VOD revenues and installation and carriage fees, for the period by the average number of direct digital customers served in that period) and gross-adds ARPU (calculated based on the subscription revenue from new clients, plus the average value of consumption outside of subscription plans from existing clients, as calculated for the ARPU of the overall subscriber base) for the periods indicated. The operational data relating to gross-adds ARPU and customer-base ARPU presented below reflect ARPU from the Numericable Group's direct digital subscribers only.

	For the year ended December 31,			**For the nine months ended September 30,**	
	2011	**2012**	**2013**	**2014**	**2013**
ARPU per month—new digital individual subscribers (gross-adds)	€41.5	€41.7	€41.3	€43.3	€41.1
Monthly ARPU—digital individual subscribers (customer-base)(1)	€40.3	€40.7	€41.5	€42.4	€41.4

(1) Operating data related to ARPU are presented in euro per month (excluding VAT) for the periods indicated.

The monthly ARPU of new customers declined by approximately 1% to €41.3 in 2013, compared to €41.7 in 2012, due to high seasonal effects in the third quarter of 2013 and to an increase in sales on the Internet and by telephone, which generate lower ARPUs.

Incremental B2B Contract Monthly Adds

The Numericable Group is focused on growing its B2B business profitably and tracks trends in this segment with an indicator of incremental B2B contract revenue adds, a measure which displays the monthly recurring value of the order intakes in a given period. This indicator includes the incremental revenues of new contracts signed in a period. It is comparable to the product of gross- adds ARPU multiplied by the volume of new customers in the B2C segment.

The following table shows the level of incremental B2B contract revenue adds based on contracts signed in each of 2011, 2012, 2013 and the nine months ended September 30, 2013 and 2014.

	For the year ended December 31,			For the nine months ended September 30,	
	2011	**2012**	**2013**	**2014**	**2013**
	(Unaudited) (in € thousands)				
Order intake revenue	5,290.0	5,659.7	6,656.0	4,631.0	4,650.0

Subscriber Acquisition Costs

The Numericable Group is focused on growing its business profitably as it increasingly offers new digital products to its customer base. The Numericable Group's ability to profitably market its multi-play service offerings at competitive prices is tied to its end-to-end control of its cable network, its large customer base to which it can sell additional services, and the cost structure of the Numericable Group's business, all of which are key determinants of the payback profile of its incremental multi-play service customers.

The subscriber acquisition costs for B2C fiber/cable products consist of costs for customer premise equipment (set-top boxes), when applicable, in-house and on-site wiring and installation, and the costs per order including marketing, sales, general and administrative and all other costs. Due to the Numericable Group's own extensive local loop network, it is not obligated (unlike other alternative operators) to make payments to Orange to gain access to its last mile network and therefore has a structural cost advantage. Certain acquisition costs (in particular equipment) are capitalized.

The Numericable Group does not follow subscriber acquisition costs for B2B or wholesale customers, but evaluates its return on investment, considering capital expenditures (equipment, installation and wiring at customer sites as well as the creation of fiber links to customer sites) and operating expenditures (mainly commissions paid to its direct and indirect sales force).

Key Income Statement Items

Below is a summary description of certain Numericable Group income statement line items and other metrics used by the Numericable Group.

Revenue

Revenue is generally a function of (i) volume, which depends on the number of subscribers, sites connected or lines provided for subscription packages and the level of usage, and (ii) prices, for subscription packages, minutes, line rentals and other services, which depend on the offer selected.

Revenue recognition principles are described in Notes 2.3 and 2.4 to the Numericable Group's consolidated financial statements included elsewhere in these Listing Particulars.

The structure of segment revenues is summarized below.

B2C Segment Revenues

Revenue in the B2C segment consists mainly of:

- Digital revenue, including (a) recurring monthly subscription fees for the Numericable Group's television, broadband Internet, fixed-line and mobile telephony services, whether sold on a stand-alone basis or bundled into triple- and quadruple-play packages, (b) variable usage fees from VOD, fixed-line and mobile telephony,

(c) one-time connection and disconnection fees, (d) telephony termination fees, and (e) fees paid to the Numericable Group by pay-TV channels based on the number of Numericable Group customers who subscribe to their offerings;

- Bulk revenue, including quarterly, semiannual and annual fees paid by multiple-dwelling unit managers, including subsidized housing, for the provision of operating and maintenance services with respect to local networks. The incremental revenues from subscribers who upgrade to a full triple- or quadruple-play package are counted as digital revenues and not bulk revenues;

- Analog revenue, including recurring monthly subscription fees for the Numericable Group's analog television offering, including related one-time connection and disconnection fees; and

- Fiber white label revenue, in particular recurring monthly fees paid to the Numericable Group under its white label contracts with Bouygues Télécom.

B2B Segment Revenues

Revenue in the B2B segment consists mainly of:

- Voice services, including revenue from variable usage fees from telephony (including VoIP and Centrex) services, recurring monthly subscription fees and one-time connection, disconnection and termination fees; and

- Fixed data services, including revenue from recurring monthly subscription fees for services such as point-to-point bandwidth, LAN to LAN, SAN to SAN and IP VPN and hosting and cloud services.

Wholesale Segment

Revenue in the wholesale segment consists mainly of:

- Revenue relating to wholesale voice carrier services;

- Revenue relating to wholesale data carrier services;

- Revenue relating to the sale of infrastructure (dark fiber); and

- DSL white label revenue, including revenue from the Numericable Group's white label contracts with Darty (in the form of both subscription fees and activation fees). Since the end of 2012, such white label customers have, in certain cases, been migrated to the network of Bouygues Télécom (see "*Description of Our Business—Material Contracts—White Label Contracts in France*"). Monthly fees paid to the Numericable Group are based on the number of end-users to whom a white label customer sells the Numericable Group's triple-play packages, as well as the type of packages. Additional fees are payable by the Numericable Group's customers who require additional services, such as customer care and billing.

Purchases and Subcontracting Services

Purchases and subcontracting services consist mainly of television content costs, data and broadband Internet interconnection costs and fixed-line telephony interconnection and termination costs (the levels of which are regulated). Other additional purchase and subcontracting services include costs of outsourced work, which primarily relates to outsourced network maintenance, installation work and call centers; advertising costs; fees payable under the Numericable Group's MVNO contracts with Bouygues Télécom (and, beginning in January 2014, SFR); utilities, including electricity, and fees paid for rights of way and rental and leasehold charges. See Note 7 to the Numericable Group's consolidated annual financial statements included elsewhere in these Listing Particulars.

Staff Costs and Employee Benefits Expense

Staff costs and employee benefits expenses include (i) wages, salaries and bonuses, statutorily required and contractual profit-sharing, social security charges and related taxes, (ii) salaried personnel pension costs and other post-employment benefits, (iii) costs associated with the use of temporary, external and non-salaried personnel and (iv) costs relating to the stock option plan required to be recognized under IFRS 2.

The Numericable Group's personnel costs depend on the number and salary levels of its full-time staff and external personnel. The Numericable Group believes that its current personnel levels are adequate and it does not expect to increase its personnel levels significantly in the near future. Salary negotiations are customarily held each year.

Taxes and Duties

Taxes and duties consist mainly of general direct and indirect taxes such as certain business taxes (imposition forfaitaire annuelle and taxe professionnelle) and the taxes implemented in replacement thereof (cotisation sur la valeur ajoutée des entreprises and cotisation fonciére des entreprises), local government taxes (impôts locaux), taxes on the Numericable Group's vehicle fleet (taxe sur les véhicule de société), social security taxes (contribution sociale de solidarité des sociétés) and taxes on certain advertising expenses (in particular taxes on advertisement leaflets), as well as taxes applicable to telecommunications operators and television providers, such as taxes on television providers, taxes supporting the audio-visual content industry (cotisation de soutien à l'industrie des programmes audiovisuels) and taxes on VOD.

This line item does not include corporate income tax (impôt sur les bénéfices), which is recorded under the line item "Income tax expense".

Provisions

Provisions consist mainly of provisions for operational risks, disputes (in particular, a provision of €11.4 million was recorded at December 31, 2013 aiming to cover risks with respect to assessments relating to disputed expenses for services performed between 2009 and 2011; see "*Description of Our Business—Legal Proceedings—Tax Matters in France*") and pensions. See Note 23 to the Numericable Group's consolidated annual financial statements.

Other Operating Income

Other operating income consists mainly of own work capitalized (i.e., related to network upgrade projects and IT product development work staffed with in-house employees), proceeds from disposals of tangible assets, and other income.

Other Operating Expenses

Other operating expenses consist mainly of:

- net book value of assets sold;
- advisory fees paid in connection with refinancings;
- management fees paid to the Numericable Group's prior shareholders Altice, Cinven and Carlyle until the initial public offering in relation to certain management, financing and advisory services provided; and
- miscellaneous operating expenses.

Operating Income Before Depreciation and Amortization and Impairment (EBITDA)

Operating income before depreciation and amortization and impairment (EBITDA) is one of the main indicators the Numericable Group tracks in order to manage and assess the results of its operations, make decisions with respect to investments and allocation of resources, and assess the performance of management personnel. It is calculated as revenues, minus purchases and subcontracting services, staff costs and employee benefits expense, taxes and duties, provisions, other operating income, and other operating expenses.

The Numericable Group believes that this measure is useful to readers of its financial statements as it provides them with a measure of the operating results which excludes non-cash elements such as depreciation and amortization, enhancing the predictive value of its consolidated financial statements and providing information regarding the results of the Numericable Group's ongoing trading activities and cash-flow generation that allows investors to better identify trends in its financial performance.

The Numericable Group's calculation of EBITDA may not be comparable to similarly titled measures used by other entities. Furthermore, this measure should not be considered as an alternative to operating income as the effects of depreciation, amortization and impairment excluded from this measure do ultimately affect operating results. Accordingly, the Numericable Group also presents the line item "Operating income", which encompasses all amounts which affect its operating results.

Adjusted EBITDA

Adjusted EBITDA is equal to EBITDA (i.e., operating income before amortization and depreciation) adjusted for items the Numericable Group considers to be outside of recurring operating activities or that are non-cash. During the period under review, these items consisted of: advisory fees paid in relation to debt refinancing, acquisition-related restructuring costs (in connection with the acquisition of Altitude Télécom), provisions and costs tied to tax and social security audits, commercial penalties, charges (non-cash) resulting from the accelerated depreciation of set-top boxes and broadband routers that were returned damaged or not returned at all by churning subscribers, the transfer of the remaining net accounting value of assets returned to municipal governments in connection with the exiting of DSP contracts, the *Cotisation sur la Valeur Ajoutée des Entreprises* ("CVAE") tax (a French business tax), and, share-based compensation expense.

The Numericable Group believes that this measurement is useful to readers of its consolidated financial statements as it makes trends more visible and provides more precise information regarding the Numericable Group's operating income and cash-flow generation.

Depreciation and Amortization

Depreciation and amortization consists mainly of regular depreciation and amortization of non-current assets such as network assets.

Finance Costs, Net

Finance costs, net, consists of interest income net of interest expense and other financial expenses. Interest income primarily consists of income in connection with the investment of cash and cash equivalents as well as other interest income. Interest expense primarily consists of interest expense on the Numericable Group's debt facilities (calculated after giving effect to related interest rate derivative instruments) as well as costs on finance leases based on the effective interest rate method. Finance costs also include the change in the fair value of derivative instruments that are not eligible for hedge accounting and which, as a result, are recorded at market value. Other financial expense primarily consists of all fees (other than advisory fees, which are included under other operating expenses) paid in connection with the Numericable Group's debt amendment or refinancing, amortization fees paid in connection with implementation of certain new indebtedness facilities and provisions for financial risks.

Income Tax Expense

Income tax expense consists of corporate income tax (impôt sur les bénéfices) and the portion related to income tax of provisions for tax audits. It does not include other taxes due by the Numericable Group, which are recorded under the line item "Taxes and duties" discussed above.

The Numericable Group has substantial tax loss carry-forwards (described in Note 12.4 to the consolidated annual financial statements for the year ended December 31, 2013), which by their nature could reduce the amount of corporate income tax to be paid.

However, the ability to effectively use these losses (and to achieve all or part of the theoretical tax savings they represent) will depend on a number of factors, such as:

- The ability of the Numericable Group or of certain Numericable Group companies to generate taxable profits and the difference between such taxable profits and tax losses; in this respect, it should be noted that (i) a large part of the tax loss carry-forwards (€1,156 million as of September 30, 2014) can currently only be offset against the profits of NC Numericable, an operating company of the Numericable Group (mostly present in the B2C segment); (ii) a part of the tax loss carry-forwards (€183 million as of September 30, 2014) can only be offset against the profits of Completel, an operating company in the B2B and Wholesale segments; (iii) a part of the tax loss carry-forwards (€6 million as of September 30, 2014) can only be used against the profits of Sequalum; (iv) a portion of the losses (€13 million as of September 30, 2014) can only be used against the profits of Altice B2B France, which is a holding company without operating activities; and (v) a portion of the tax loss carry-forwards (€42 million as of September 30, 2014) can only be used against the profits of Ypso France, which is a holding company without operating activities. The use of the losses specific to the two holding companies is extremely limited because they can only be offset against each of these company's profits, respectively, and both these companies are structurally in deficit;
- The two tax consolidation groups formed by Ypso France on the one hand and Altice B2B France on the other remained in place through December 31, 2013. As of December 31, 2013, the Ypso France group had €642 million of tax loss carry-forwards and the Altice B2B France group had € 218 million of tax loss carry-forwards.

Numericable Group S.A. became the head of a tax consolidation group in accordance with articles 223 A and 223 L 6 i of the French General Tax Code, with effect from January 1, 2014, and including the companies of the Altice B2B France and Ypso France sub-groups. If this occurs, most of the €642 million of tax loss carry-forwards generated by the Ypso France group and all of the €218 million of tax loss carry-forwards generated by the Altice B2B France group should remain available, subject to certain conditions and limitations, against the profits of the prior scopes of Ypso France and Altice B2B, respectively, which will be included in the scope of the new group.

- The general limitation pursuant to French tax regulations, under which the percentage of French tax loss carry-forwards that may be used to offset the portion of taxable profit exceeding one million euros is limited to 50% in respect of financial years ending on or after December 31, 2012, as well as certain more specific restrictions with respect to certain tax categories;

- The prospects for using the Luxembourg holdings' tax loss carry-forwards are extremely limited (€46 million as of September 30, 2014);

- Ypso France's specific tax loss carry-forwards (€42 million) should be considered as lost since the company has not received any favorable tax ruling allowing their transfer;

- The outcome of current or future tax audits and tax-related litigation; and

- Possible changes in applicable laws and regulations.

As of September 30, 2014, given the potential to generate income, it became clear that the Numericable Group was able to activate €511 million of tax loss carryforwards (i.e. approximately 22% of tax loss carryforwards), representing a deferred tax asset of €203 million.

As of September 30, 2014, deferred tax assets broke down as follows:

€ thousands	**December 31, 2013**	**2014 Statement of income**	**Other 2014 comprehensive income**	**September 30, 2014**
Loss carryforwards[a]	132,662	70,006	—	202,668
Fair value of SWAPS[b]...	—	(33,534)	78,809	45,275
Deferred tax assets....	**132,662**	**36,472**	**78,809**	247,943

(a) A new fiscal integration was put in place at the Numericable Group level during the nine-month period ended September 30, 2014, effective retroactively as of January 1, 2014. This new fiscal integration was established by Numericable Group as Numericable Group head, as well as by the companies resulting from the two former fiscal integration groups Ypso and Altice, which chose to apply the expanded base mechanism.

Based on the updated forecasts on use of loss carryforwards existing within the new fiscal Numericable Group thus established and deemed probable over a 5-year horizon, an additional deferred tax asset of €70 million was recognized.
The total amount of deferred tax assets on loss carryforwards was thus brought to €203 million as of September 30, 2014.

(b) The Numericable Group recorded a deferred tax asset of €45.3 million on derivative instruments put in place in May 2014, of which:

- €(33.5) million in income on SWAP instruments which are not eligible for hedge accounting (SWAP, on bank loans);

- €78.8 million in other comprehensive income on SWAP instruments which are eligible for hedge accounting (SWAP, on bank loans).

Analysis of Results for the Nine Months Ended September 30, 2013 and September 30, 2014

The table below shows the Numericable Group's consolidated statement of income for the nine month periods ended September 30, 2013 and September 30, 2014, in millions of euros and as a percentage of revenues for the periods in question.

	For the nine months ended September 30,				
	2014		2013		
	(in € millions)	(as a % of revenues)	(in € millions)	(as a % of revenues)	Change
Revenues	**995.4**	**100.0%**	**968.9**	**100.0%**	**2.7%**

Revenues

Contribution to combined/consolidated revenues

	Nine months ended September 30,		
(in € millions)	2014	2013	Change
B2C	660.6	645.4	2.4%
B2B	240.3	225.5	6.6%
Wholesale	94.5	98.1	(3.7)%
Total	**995.4**	**968.9**	**2.7%**

Group revenues totalled €995.4 million for the nine months ended September 30, 2014, up 2.7% compared to revenues of €968.9 million for the nine months ended September 30, 2013.

Among the Group's segments, revenues from the B2C segment increased by 2.4% in the nine months ended September 30, 2014, compared to the nine months ended September 30, 2013. In the third quarter of 2014, the B2C segment's revenues increased by 2.9% compared to the third quarter of 2013, increasing from €215.0 million to €221.2 million. This increase was driven by the growth in the customer base and the maintenance of a high ARPU.

At September 30, 2014, the B2C segment had 1.715 million individual digital users, up 41,000 users compared to September 30, 2013. This growth was primarily driven by growth in Numericable direct digital multi-play customers, which increased by 64,000, and to a lesser extent by an increase in fiber white label users, which increased by 28,000, and despite the 51,000 decrease in mono-play customers (mainly television customers) over the period. Customer-base ARPU remained high, at €42.4 in the third quarter of 2014, up €1 compared to ARPU for the third quarter of 2013. Gross-adds ARPU in the third quarter of 2014 increased to €43, up €0.6 compared to customer-base ARPU and more than €4 higher than gross-adds ARPU one year earlier, in the third quarter of 2013.

B2B segment revenues totalled €240.3 million for the nine months ended September 30, 2014, representing a 6.6% increase compared to € 225.5 million for the nine months ended September 30, 2013. B2B segment revenues increased by 6.3% in the third quarter of 2014 compared to the third quarter of 2013, from €74.1 million in the third quarter of 2013 to €78.8 million in the third quarter of 2014.

This increase in B2B segment revenues in the nine months ended September 30, 2014 was principally related to (i) Data activities for which revenues increased by 3.5% and (ii) the beneficial effect of the integration of LTI, even if revenues from voice activities continued to be impacted by the decreases in tariffs.

Wholesale segment revenues declined, from €98.1 million for the nine months ended September 30, 2013 to €94.5 million for the nine months ended September 30, 2014. This decrease resulted from the voice and DSL business, as in prior quarters. Inversely, Data and Fiber activities principally operated on the Group's network increased, which contributed to the profitability of the segment.

Purchases and Subcontracting Services

In the nine months ended September 30, 2014, purchases and subcontracting services totalled €464.8 million, compared to €448.5 million for the nine months ended September 30, 2013, for an increase of € 16.3 million or 3.6%. This increase resulted from several factors, mainly:

- The €7.6 million increase in mobile telephony costs directly related to the growth of the base of active SIM cards;
- Non-recurring costs incurred in connection with the acquisition of SFR for €6.8 million (see "*Operating Income Before Depreciation and Amortization (EBITDA)*" below).

Staff Costs and Employee Benefits Expense

In the nine months ended September 30, 2014, staff costs and employee benefits expense totalled €118.2 million, compared to €109.0 million for the nine months ended September 30, 2013, representing an increase of 8.5%, or €9.2 million.

This increase resulted primarily from:

- the integration of LTI, which had approximately 100 employees;
- higher levels of bonuses being distributed, in line with the increase in B2C sales;
- the general salary increase of approximately 1% which occurred at the beginning of the year; and
- the share-based compensation expense in 2014, while there was no such expense in the first nine months of 2013.

Taxes and Duties

In the nine months ended September 30, 2014, taxes and duties amounted to €24.3 million, compared to €25.6 million in the nine months ended September 30, 2013, representing a decrease of €1.3 million or 4.8%. This decrease resulted from the mergers of operational entities in the B2C segment, which resulted in a decrease in the "social solidarity contribution between companies" on the intercompany billings of this segment, as well as from various optimizations and adjustments of various taxes.

Provisions

As of September 30, 2014, for the nine months ended September 30, 2014, a total of €10.0 million of provisions were recorded, compared to a total of €1.2 million of provisions recorded in the nine months ended September 30, 2013. This change is mainly due to a deterioration in provisions for doubtful accounts and non-returned equipment. In addition, a reversal of provisions for commercial litigation of €3.8 million was recorded in the 2013 financial statements but no such reversal was recorded in 2014.

Other Operating Income

Other operating income totalled €66.4 million in the nine months ended September 30, 2014, compared to €58.5 million in the nine months ended September 30, 2013, representing an increase of €7.9 million or 13.6%. The increase was mainly due to an increase in charges incurred for DSP 92 in 2014 compared to the transitory period in 2013 when phase 2 of the project was under discussion and phase 1 was being completed. This restart of activity generated a higher capitalization of external costs of €8 million.

Other Operating Expenses

Other operating charges totalled €1.4 million in the nine months ended September 30, 2014, compared to €6.8 million in the nine months ended September 30, 2013, representing a decrease of €5.4 million or 79.4%.

Operating Income Before Depreciation and Amortization and Impairment (EBITDA)

EBITDA increased by €6.8 million, from €436.3 million in the nine months ended September 30, 2013 to €443.1 million in the nine months ended September 30, 2014.

This change mainly reflects the following factors:

- the impact of non-recurring or non-cash costs, which have been eliminated from Adjusted EBITDA, of €23 million in the first nine months of 2014 and €17.3 million in the first nine months of 2013. Most of the €5.7 million increase in non-recurring or non-cash costs is composed of fees related to the acquisition of SFR for a total of €6.8 million.

- excluding these amounts, EBITDA increased by €12.5 million, or 2.8%. This increase was generated mainly by the B2C and Wholesale businesses. B2C segment EBITDA increased by €6 million excluding the costs related to the 2014 SFR Acquisition and the refinancing of existing debt which is recorded in this segment's results. The increase in the Wholesale segment's profitability, related to a larger portion of business generated on the Group's network with a higher margin, more than offset the decrease in the profitability of the B2B business, which continued to suffer from the decrease in customer prices generated by the decrease in call termination tariffs at the beginning of 2013.

In the third quarter of 2014, subscriber acquisition costs totalled € 21 million compared to €19 million in the third quarter of 2013 and €73 million in each of the nine month periods ended September 30, 2013 and 2014.

Reconciliation of EBITDA and Adjusted EBITDA

	For Nine months ended September 30,	
(in € millions)	**2013**	**2014**
	(unaudited)	
EBITDA	436.3	443.1
Debt-refinancing related advisory fees[(a)]	1.5	1.7
Advisory fees related to the 2014 SFR Acquisition	—	6.8
Acquisition-related restructuring costs[(b)]	1.1	2.9
Provisions / costs for tax and social security audits	0.2	(1.1)
CVAE[(c)]	9.2	9.0
Accelerated depreciation of equipment[(d)]	4.2	—
Penalties[(e)]	1.1	—
Share-based compensation expense	—	3.7
Adjusted EBITDA	**453.6**	**466.1**

(a) Advisory fees paid in connection with the Group's refinancing transactions (classified in other operating expenses).

(b) Restructuring costs incurred in connection with the Group's acquisition of Altitude Télécom and SFR (classified in purchases and subcontracting services and staff costs and employee benefits expense).

(c) As from January 1, 2010, the CVAE (*Cotisation sur la Valeur Ajoutée des Entreprises*), a French business value-added levy, partially replaced the former local business tax (*taxe professionnelle*) (classified in taxes and duties).

(d) Non-cash losses resulting from the accelerated depreciation of set-top boxes and broadband routers that were returned damaged or not returned at all by churning subscribers (classified in purchases and subcontracting services), and, as applicable, the transfer of the remaining net accounting value of the assets returned to municipal governments in connection with the exiting of DSP contracts.

(e) Penalties paid to SFR as a result of a delay incurred in the deployment of vertical fiber networks pursuant to a fiber deployment agreement entered into in 2008 (classified in purchases and subcontracting services).

Depreciation, Amortization and Impairment

Depreciation and amortization increased by €11.2 million between the nine months ended September 30, 2013 and the nine months ended September 30, 2014, increasing from €219.0 million to € 230.2 million. This increase reflects the increase in the level of investments in recent years, in both the B2C and B2B segments, in order to renovate the network and connect increasing numbers of customers.

Operating Income

Operating income decreased 2.0%, or €4.4 million, from €217.3 million in the nine months ended September 30, 2013 to €212.9 million in the nine months ended September 30, 2014, for the reasons discussed above.

Finance Costs, Net

Finance costs increased from a charge of €148.8 million for the nine months ended September 30, 2013 to a charge of €427.2 million for the nine months ended September 30, 2014, representing an increase of €278.4 million.

During the first half of 2014, the Group issued €11.65 billion in debt to secure a portion of the cash financing for the 2014 SFR Acquisition and refinance its existing €2.64 billion of debt. This debt consisted of a U.S. dollar portion of $10.375 billion (equivalent to €7.503 billion) and a euro portion of €4.150 billion. The principal and interest of the U.S.-dollar portion were hedged through dollar/euro swaps. Accounting for these swaps, and in particular recording their fair value, affects the Group's income only with respect to the variable-rate portion of the U.S. dollar bank debt to the extent that these instruments do not fulfil the criteria for hedge accounting; the hedging instruments on the fixed-rate debt meet IFRS criteria for hedge accounting, and their fair value is accounted for in other comprehensive income in shareholders' equity. This total debt bears interest at a lower rate than the rate paid by the Group on its debt during the first half of 2013. Of the €11.65 billion raised in May 2014, €8.9 billion was placed in escrow pending the closing of the SFR transaction. The new debt generates finance charges that the Group began to pay upon its issuance in May 2014.

For the first nine months of 2014, as a result of the foregoing, the Group incurred the following finance costs:

- interest expense on the portion of net debt corresponding to Numericable Group's debt prior to financing the 2014 SFR Acquisition decreased by €29.4 million, from €133.5 million in the first nine months of 2013 to €103.1 million in the first nine months of 2014, due to more favourable interest rates. In the third quarter of 2014, the Group recorded interest expense of €33.6 million on the part of net debt corresponding to Numericable Group's net debt prior to financing of the 2014 SFR Acquisition, down €12.0 million on a constant scope of debt basis;

- charges resulting from the early repayment of the Group's € 2.64 billion of existing debt totalling €108.9 million (€ 89 million of make-whole charges for the early repayment of the notes and €20 million from the reclassification as expenses of set-up costs relating to the previous financing that had not yet been fully amortized at the time of the repayment). No such charges were incurred during the third quarter of 2014;

- charges without impact on cash flow of €37.0 million due to amortization of the cost of entering into the existing debt (€17.5 million) and as a result of exchange rate effects on the Group's dollar-denominated debt, including changes in the fair value of the swaps on the bank portion of the new debt (accounting for €17.0 million). In the third quarter of 2013, the Group recorded €10.3 million in amortization of the cost of entering into the existing debt and a gain of €7.6 million as a result of exchange rate effects on the Group's dollar-denominated debt, including changes in the fair value of the swaps on the bank portion of the new debt; and

- additional interest expense on the debt incurred to finance a portion of the 2014 SFR Acquisition and placed in escrow (€8.9 billion) of €173.5 million, incurred between May 21, 2014 and September 30, 2014. In the third quarter of 2014, €109.2 million of financial interest was recorded with respect to the debt incurred to finance a portion of the 2014 SFR Acquisition.

Income Tax Expense

Income tax represented an expense of €8.3 million in the nine months ended September 30, 2013 and income of €36.5 million in the nine months ended September 30, 2014.

The initial public offering and the structural reorganization of the Group implemented in November and December 2013 gave the Group better visibility, as of December 31, 2013, of its tax structure and its ability to generate, in line with the Group's future income perspectives, taxable profits enabling the Company to use at least a portion of its available tax loss carryforwards. Given the potential to generate income, it became clear that the Group was able to use the tax loss carryforwards that it had recorded. The Company therefore decided as of December 31, 2013 to recognize a deferred tax asset for the share of the tax losses that could be used within five years, which resulted in the recognition of deferred tax income of € 132.7 million for 2013. In the first nine months of 2014, the Group also benefited from the formation, as of January 1, 2014, of a new tax consolidation group that includes the companies of the former groups of Altice B2B France and Ypso France, and of which Numericable Group SA is the parent company. This enabled the Group to use its tax losses more rapidly. The result was the recognition of additional net deferred tax income of €70.0 million in the first nine months of 2014.

The Group also recorded deferred tax expense of €33.5 million with respect to the derivative instruments put in place in May 2014 that are not eligible for hedge accounting (swaps on bank loans).

In total, the Group therefore recorded deferred tax income of € 36.5 million in the first nine months of 2014.

For further information, see Note 10 to Numericable Group's interim condensed consolidated financial statements as of and for the nine months ended September 30, 2014.

Analysis of Results by Segment for the Nine Months Ended September 30, 2013 and the Nine Months Ended September 30, 2014

B2C Segment

The following table shows revenues, operating expenses and operating income before depreciation, amortization and impairment for the B2C segment for the nine-month periods ended September 30, 2013 and September 30, 2014.

	For the nine months ended September 30,		
B2C Segment	**2014**	**2013**	**Change 2013/2014**
(in € millions)			
Revenues	**664.9**	**648.5**	**2.5%**
Digital revenues	523.4	507.4	3.1%
Analog revenues	16.9	22.1	(23.7)%
Bulk revenues	50.2	51.4	(2.3)%
Fiber white label revenues	74.4	67.6	10.1%
Purchases and subcontracting services	(315.4)	(301.2)	4.7%
Staff costs and employee benefits expense	(66.0)	(60.5)	9.0%
Taxes and duties	(15.6)	(15.8)	(1.0)%
Provisions	(10.6)	(0.1)	10,500%
Other operating income	49.3	42.6	15.7%
Other operating expenses	(1.4)	(6.8)	(79.8)%
Operating income before depreciation and amortization and impairment (EBITDA)	**305.3**	**305.8**	**(0.2)%**
EBITDA margin rate	45.9%	47.2%	—

Revenues

B2C segment revenues increased by 2.5%, from €648.5 million for the nine-month period ended September 30, 2013 to €664.9 million for the nine-month period ended September 30, 2014.

The increase in B2C revenues was due, firstly, to the Numericable brand digital business, which increased by €16 million, or 3.1%, from € 507.4 million for the nine-month period ended September 30, 2013 to €523.4 million for the nine-month period ended September 30, 2014. Digital revenues comprise revenues generated by sales of digital multi-play packages and options, such as VOD and additional channels. This increase was primarily due to an increase in the digital customer base, which totalled approximately 1.0 million at September 30, 2013, and approximately 1.1 million at September 30, 2014. This increase in the client base primarily reflects the commercial appeal of our Very High Speed and LaBox offerings, which helped us acquire 6.3% more new customers in the nine-month period ended September 30, 2014, than in the first nine months of 2013. The increase in the client base was accompanied by an increase of €1.0 in ARPU for existing clients, from an average of € 41.4 per month during the nine-month period ended September 30, 2013 to an average of €42.4 per month in the nine-month period ended September 30, 2014.

Fiber white labels constituted the second growth vector, with revenues increasing 10.1%, or €6.8 million, from €67.6 million in the nine-month period ended September 30, 2013 to €74.4 million in the nine-month period ended September 30, 2014. This increase reflects an approximate 8.4% increase in the number of fiber white label end users year- on-year, from approximately 334,000 end users as of September 30, 2013 to approximately 362,000 end users as of September 30, 2014, due to the continued commercial roll-out of Bouygues Télécom's white label offering. Added to this was the €5 million effect of passing on €5 million in charges incurred for the launch of the white label brand with SFR in view of a commercial launch at the end of the 2014.

Analog revenues continued to decrease as anticipated, decreasing by € 5.2 million, or 23.7%, from €22.1 million for the nine-month period ended September 30, 2013, to €16.9 million for the nine-month period ended September 30, 2014. This decrease is primarily due to a 22.7% decrease in the Numericable Group's analog customer base, from approximately 88,000 subscribers as of September 30, 2013 to approximately 68,000 as of September 30, 2014. Since the Numericable Group stopped marketing analog offers a few years ago and is not adding new subscribers, the Numericable Group's analog customer base is now only negatively impacted by churners and no further gross adds are registered.

Bulk revenues decreased slightly by 2.3%, totalling €50.2 million for the nine-month period ended September 30, 2014, compared to € 51.4 million for the nine-month period ended September 30, 2013, reflecting a slight decrease in the Numericable Group's bulk customer base.

Operating Income Before Depreciation, Amortization and Impairment (EBITDA)

EBITDA decreased by €0.5 million, from €305.8 million for the nine-month period ended September 30, 2013 to €305.3 million for the nine-month period ended September 30, 2014. This decrease is the result of the following:

- The non-recurring charges relating to the 2014 SFR Acquisition and to the refinancing of Numericable's debt, as well as the bulk of the charge relating to stock option plans, are recorded in the B2C segment. These costs, for a total value of €12 million, were incurred during the nine-month period ended September 30, 2014 and no equivalent expenses were incurred in the first nine months of 2013.

After removal of these items, the B2C segment's EBITDA grew in line with its revenues.

B2B Segment

The following table shows revenues, operating expenses and operating income before depreciation, amortization and impairment for the B2B segment for the nine-month periods ended September 30, 2013 and September 30, 2014.

B2B Segment (in € millions)	**Nine months ended September 30, 2014**	**2013**	**Change 2013/2014**
Revenues	**243.3**	**227.8**	**6.8%**
Voice revenues	94.5	84.0	12.5%
Data revenues	148.8	143.8	3.5%
Purchases and subcontracting services	(152.0)	(130.5)	16.5%
Staff costs and employee benefits expense	(47.7)	(43.6)	9.4%
Taxes and duties	(5.6)	(6.0)	(6.7)%
Provisions	0.7	(0.3)	133%
Other operating income	17.1	15.9	7.6%
Other operating expenses	(0.0)	0.0	—
Operating income before depreciation and amortization and impairment (EBITDA)	**55.9**	**63.3**	**(11.7)%**
EBITDA margin rate	23.0%	27.8%	—

Revenues

B2B segment revenues increased by €15.5 million, or 6.8%, from € 227.8 million in the nine-month period ended September 30, 2013 to €243.3 million in the nine-month period ended September 30, 2014. Both voice and data revenues contributed to this increase. Growth in data was primarily the result of organic growth, led by continually increasing orders.

Voice revenues continued to be affected by contract renegotiations that resulted in lower prices following decreases in the regulatory call termination rates. However, the contribution of new contracts resulted in relatively stable revenues, while the contribution of LTI, which the Numericable Group acquired in late 2013 and which therefore did not contribute to revenues in the nine-month period ended September 30, 2013, increased voice revenues.

Operating Income Before Depreciation, Amortization and Impairment (EBITDA)

EBITDA decreased by €7.4 million, or 11.7%, from €63.3 million in the nine-month period ended September 30, 2013 to € 55.9 million in the nine-month period ended September 30, 2014.

This decrease is due to a decrease in the value of the voice market, primarily as a result of the regulated decrease in interconnection costs. The regulated decrease in call termination rates resulted in an immediate decrease in interconnection costs, whereas the effect on revenues is delayed until the renewal dates of the potentially affected contracts. In 2014, the value of the Numericable Group's revenues at constant volume continued to decrease, whereas the corresponding cost decrease had already occurred at the time of the first decrease, as of January 1, 2013, which negatively affected the margins of these activities.

Wholesale Segment

The following table shows the revenues, operating expenses and operating income before depreciation, amortization and impairment of the Wholesale segment for the nine-month periods ended September 30, 2013 and September 30, 2014.

Wholesale Segment (in € millions)	**Nine months ended September 30, 2014**	**2013**	**Change 2013/2014**
Revenues	**156.0**	**140.7**	**10.9%**
Purchases and subcontracting services	(66.3)	(65.0)	2%
Staff costs and employee benefits expense	(4.6)	(4.8)	(4.2)%
Taxes and duties	(3.1)	(3.8)	(18.4)%
Provisions	0.0	0.0	—
Other operating income	0.0	0.0	—
Other operating expenses	0.0	0.0	—
Operating income before depreciation and amortization and impairment (EBITDA)	**82.0**	**67.2**	**22%**
EBITDA margin rate	52.6%	47.8%	—

Revenue

Wholesale segment revenues increased by €15.3 million, or 10.9%, from €140.7 million in the nine-month period ended September 30, 2013 to €156.0 million in the nine-month period ended September 30, 2014.

After removal of intra-Numericable Group services, Wholesale segment's contribution to revenues decreased by €3.6 million, from € 98.1 million in the nine-month period ended September 30, 2013 to €94.5 million in the nine-month period ended September 30, 2014.

Several factors explain this change. The telephony business had benefited in 2012 from the interconnection traffic between the mobile networks of Bouygues Telecom and Free Mobile. Increasingly, however, traffic is passing directly between these two operators, and less through the Numericable Group's network. This, along with the regulated decrease in interconnection rates, explains a decrease in telephony revenues. However, these two effects had only a weak impact on margin value.

In addition, the revenues generated by the Bouygues (ex-Darty) white label DSL brands continued to decrease in correlation with the decrease in the number of customers hosted on our network.

Conversely, revenues from data capacity resales, which have high margins, continued to grow.

Operating Income Before Depreciation, Amortization and Impairment (EBITDA)

EBITDA of Wholesale activities grew by €14.8 million, or 22.0%, from €67.2 million in the nine-month period ended September 30, 2013 to €82.0 million in the nine-month period ended September 30, 2014.

This increase in EBITDA results from a decline in the traditional telephony service resale business, which is lower margin, more than offset by data service resale business, which is higher margin.

Analysis of Results for the Years Ended December 31, 2012 and December 31, 2013

The table below shows the Numericable Group's consolidated statement of income for the years ended 2012 and 2013, in millions of euros and as a percentage of revenues for the periods in question.

	Year ended December 31,				
	2012		2013		
	(in € millions)	(as a % of revenues)	(in € millions)	(as a % of revenues)	Change
Revenues	**1,302.4**	**100.0%**	**1,314.2**	**100.0%**	**0.9%**
Purchases and subcontracting services	(602.1)	(46.2)%	(611.0)	(46.5)%	1.5%
Staff costs and employee benefits expense	(141.5)	(10.9)%	(154.6)	(11.8)%	9.3%
Taxes and duties	(32.4)	(2.5)%	(33.9)	(2.6)%	4.6%
Provisions	(6.2)	(0.5)%	(20.5)	(1.6)%	229.1%
Other operating income	89.2	6.9%	86.3	6.6%	(3.3)%
Other operating expenses	(17.2)	(1.3)%	(20.5)	(1.6)%	19.1%

Net income (loss)	**86.4**	**6.6%**	**64.7**	**4.9%**	**(25.1)%**
Attributable to owners of the entity	86.4	6.6%	64.6	4.9%	(25.3)%
Attributable to non-controlling interests	0.0	0.0%	0.2	0.0%	218.4%

Revenues

Contribution to combined/consolidated revenues

	Year ended December 31,		
(in € millions)	2012	2013	Change
B2C	826.2	864.6	4.7%
B2B	323.2	309.6	(4.3)%
Wholesale	153.1	140.0	(8.3)%
Total	**1,302.4**	**1,314.2**	**0.9%**

Revenues for 2013 totalled €1,314.2 million, representing an increase of 0.9%.

Of the Numericable Group's activities, B2C's revenues increased the most, due to the growth of the Numericable and Fiber White Label client base and the positive effect of the ARPU of Numericable customers.

At December 31, 2013, the B2C subscriber base totalled approximately 1.7 million, having grown by 81,000 subscribers as compared with December 31, 2012. This growth was primarily due to the growth in the number of multi-play subscribers under the Numericable brand (an increase of 69,000) and in the number of White Label subscribers (an increase of 66,000). ARPU remained high at €41.90 for the fourth quarter of 2013. It increased by €1.10 as compared with ARPU for the Numericable customer base for the fourth quarter of 2012.

B2B revenues decreased by 4.3% from 2012 to 2013. This decrease is primarily the result of (i) the effect of decreases in call termination rates, which in turn led customers (especially large customers) to demand decreases in the rates they paid, and (ii) the impact of administrative and operational difficulties in 2012, which resulted in particular in the issuance of credit notes during the nine-month period ended September 30, 2013. However, the trend appears to be improving in this area as well, as the value of new signed contracts grew significantly, from €5.7 million in 2012 to €6.7 million in 2013, an improvement of 17.6%. This growth should show its full impact in 2014 revenues, given the installation delays for new business.

The Wholesale segment's revenues also decreased, also due to the systematic passing through of the decreases in call termination rates. Wholesale revenues decreased by 8.3% in 2013 as compared with 2012. The primary reason for this decrease was the decreases in call termination rates. In the Wholesale segment, these decreases led to an immediate and systematic effect on other operations. In addition, 2013 was marked by a progressive decline in the Bouygues (ex-Darty)

White Label DSL customer base. This customer base, which had totalled 168,005 subscribers at December 31, 2012, decreased to 120,261 subscribers at December 31, 2013, a contraction of 28%.

Purchases and Subcontracting Services

Purchases and subcontracting services increased by €8.9 million, or 1.5%, from €602.1 million in 2012 to €611.0 million in 2013. This increase is primarily due to an increase in subscriber acquisition costs for new B2C customers relating to the higher volume of new customers, partially offset by a significant decrease in call termination costs in B2C, B2B and Wholesale.

As of December 31, 2013, the total amount of trade payables of the Company, excluding invoices not delivered, was €127.5 million, of which €27.1 million payable before the end of December 2013, € 55.2 million payable before the end of January 2014 and €65.2 million payable at a later date.

Staff Costs and Employee Benefits Expense

Staff costs and employee benefits expense increased by €13.1 million, or 9.3%, from €141.5 million in 2012 to €154.6 million in 2013. This increase was partly the result of an increase in the number of employees, which went from 1,979 employees (excluding trainees) at the end of 2012 to 2,182 employees (excluding trainees) at the end of 2013. This increase in headcount is due to sales force hiring as well as the integration of LTI, a company acquired in early November 2013, which had 100 employees at the time of the acquisition. The increase of €13.1 million therefore comes from both an increase in the number of employees and an increase in the level of compensation, with a general salary increase of 1% in 2013 and a significant bonus distribution relating to increased sales (B2C) and orders (B2B) during the period. €3.6 million in share-based compensation expense relating to stock options issued in 2013 also contributed to the increase.

Taxes and Duties

Taxes and duties rose by €1.5 million, or 4.6%, from €32.4 million in 2012 to €33.9 million in 2013, due primarily to the impact of the increase in B2C and Wholesale income on the CVAE.

Information on luxury expenses: in 2013, Numericable recorded luxury expenses of €133,000 with respect to excess depreciation of rental cars.

Information on the adding back of general expenses in taxable profit: no general expenses were added back for tax purposes by the Company in 2013.

Provisions

Provisions (net of reversals) increased by €14.7 million, from € 6.2 million in 2012 to €20.5 million in 2013. Most of this increase comes from the B2B segment, in which a provision was recorded following a tax audit performed in 2013 relating to the years 2010 and 2011. Following the audit, the tax authorities notably rejected expenses for services performed between 2009 and 2011. A provision of €11.4 million was recorded with respect to this audit as of December 31, 2013, which brought the total amount of provisions for tax audits to €36.3 million as of December 31, 2013. See "*Description of Our Business—Legal Proceedings—Tax Matters in France*" in these Listing Particulars.

Other Operating Income

Other operating income decreased by €2.9 million, from €89.2 million in 2012 to €86.3 million in 2013. This decrease in other operating income primarily reflects a slow-down in costs incurred relating to the DSP 92 project, at a time when the Phase 2 agreement was being discussed and Phase 1 was nearing completion. This slow-down in activity led to a lower level of capitalization of external costs, partly offset by sales of cable networks to municipal governments in connection with the winding up of délégation de service public (public service concession) contracts. In 2013, this item also includes repayment of a €5.0 million fine assessed by ARCEP in 2012, due to the Constitutional Council's decision to invalidate ARCEP's power to impose sanctions.

Other Operating Expenses

Other operating expenses increased by €3.3 million, from € 17.2 million in 2012 to €20.5 million in 2013. This increase is due to the B2C segment and to expenses related to the termination of certain DSPs, which resulted in a return of certain assets to municipal governments. This return of assets results in the removal of certain zero-value assets from the Numericable Group's balance sheet and the transfer of the remaining net accounting value of the transferred assets to expenses. These expenses have no impact on the Numericable Group's cash flow. The increase in these expenses was partially offset by the decrease in fees paid in connection with refinancing transactions (as the costs incurred in connection with the initial public offering were fully deducted from share premium and were not recorded as expenses) and the decrease in management fees paid to shareholders.

Operating Income Before Depreciation and Amortization and Impairment (EBITDA)

EBITDA decreased by €30.7 million, from €590.8 million in 2012 to €560.1 million in 2013. This decrease reflects both decreases directly related to activity and other decreases that are either non-recurring or have no impact on cash flow, and which are eliminated when calculating Adjusted EBITDA (see below). Activity in 2013 was principally characterized by accelerated growth in the B2C business, which generates significant subscriber acquisition costs (sales and marketing expenses). These costs, which are necessary to create dynamic sales, generate expenses in the year during which the new customers are acquired. In 2013 they offset the positive recurring effect of this growth in the B2C business. In the B2B business, the decline in telephony activities and the decision taken in 2013 to issue credit notes to resolve customer management problems related to the service quality problems that occurred in 2012 and 2011 also negatively affected the year's results.

In addition, 2013 was affected by a series of costs that either were non-recurring or had no impact on cash flow, such as the effect of the tax assessments in the B2B segment, the refinancing costs for the transactions carried out in connection with the initial public offering and the non-cash termination costs of certain DSPs.

Adjusted EBITDA

Once non-recurring items and items that have no impact on cash flow are deducted, adjusted EBITDA for 2013 amounted to €615.9 million, a slight decrease of €3.4 million, or 0.5%, as compared with 2012.

These results show the accelerating acquisition of new clients in B2C, which decreases profitability in the first year, as well as the effect of the slow-down in B2B voice activities, due to the last regulated decrease in call termination rates as of January 1, 2013. In Wholesale, a return to profitability was achieved by pursuing growth in high-margin fiber and traditional data capacity resale.

See "—*Reconciliation of EBITDA and Adjusted EBITDA*" for details on the components of adjusted EBITDA.

Depreciation and Amortization

Depreciation and amortization expenses increased by €12.3 million, or 4.2%, from €291.7 million in 2012 to €304.0 million in 2013. This increase reflects increased investment in the B2C and B2B segments in recent years to upgrade and modernize the network and connect an increasing number of clients.

Operating Income

Operating income decreased by €44.5 million, or 14.8%, from € 300.5 million in 2012 to €256.0 million in 2013, for the reasons discussed above.

Finance Costs, Net

Finance costs, net increased by €112.2 million, from a net charge of €211.4 million for the year ended December 31, 2012 to a net charge of €323.6 million for the year ended December 31, 2013. The majority of this decline (€81.6 million) is the result of capitalizing the Super PECs (see below). The remainder of the decline (€ 30.6 million) is the primarily the result of (i) a €34.2 million increase in Other Financial Expenses, excluding the effect of capitalizing the Super PECs, and (ii) a €1.8 million increase in interest expense, offset by a €5.4 million increase in interest income.

At the time of the restructuring of the Numericable Group's debt in 2009, shareholders of the Numericable Group acquired certain loans under the Ypso France Senior Facility Agreement. Ypso Holding Sàrl issued equity securities that were subscribed by the shareholders, and in particular 132,664,023 subordinated interest preferred equity certificates (the "Super PECs"), with a nominal value of one euro each. Interest due to shareholders was capitalized.

Cinven, Carlyle and Altice contributed these Super PECs to Numericable Group on November 7, 2013 in connection with the transactions relating to the initial public offering. As a result, this debt was retired, and newly issued equity securities were delivered in consideration. In turn, debt extinction charges were recorded in financial expenses for an amount of € 81.6 million. This expense has no impact on the Numericable Group's cash flow.

The increase of €34.2 million in Other Financial Expenses, excluding the effect of capitalizing Super PECs, is a result of costs incurred relating to the repayment of various credit lines using the new Facility D, and to the capital increase at the time of the initial public offering (see "*—Liquidity and Capital Resources of the Numericable Group*"). The repayment of the Senior Secured Notes led to the payment of a premium to the noteholders. Thus, the Numericable Group paid a total of €28.0 million (12.375% of the amounts repaid on the C1A Facility, 8.75% of the amounts repaid on the C2A Facility and 2% on the C2B Facility, which was fully repaid). The early repayments of these Facilities, as well as the Facilities under the Altice B2B SFA, resulted in the recording of € 15.2 million in costs relating to the initial entry into the cancelled debt, which had initially been recorded at amortized cost.

The increase in interest income relates primarily to two payments totaling €7.1 million received by the Numericable Group following the bankruptcy of Lehman Brothers. The remainder of interest income recorded on the income statement consists of a reversal of provisions for risks of € 1.9 million.

Interest on debt increased primarily as a result of the refinancing in October 2012, but also as a result of the refinancing in February 2012 (to a lesser extent, because it relates only to the first 45 days of the year). The refinancing transactions carried out in the fourth quarter have lowered interest payments only slightly so far, because they closed in December.

Income Tax Expense

The initial public offering and the structural reorganization implemented in November and December 2013 gave the Numericable Group better visibility over its tax structure and its ability to generate, in line with the Numericable Group's future income perspectives, taxable profits enabling the Company to use at least a portion of its available tax loss carryforwards. Given a number of factors (notably, reorganizations, refinancing) that have allowed for an improved outlook for the use of tax losses, it became clear that the Numericable Group was able to use a portion of the tax loss carryforwards that it had recorded. The Company therefore decided to recognize a deferred tax asset for the share of the tax losses that can be used within five years. The result was the recognition of deferred tax income of €132.7 million for 2013. For a description of the rules governing the use of these losses, "*Risk Factors—Risks Relating to Legislative and Regulatory Matters—Our future results, French tax law, tax audits and other factors may limit our capacity to use our tax losses, and thus reduce the Altice France Group's net cash flows*" in these Listing Particulars.

Analysis of Results by Segment for the Years Ended December 31, 2012 and December 31, 2013

B2C Segment

The following table shows the revenues, operating expenses and operating income before depreciation and amortization and impairment for the B2C segment for the years ended December 31, 2012 and 2013.

	Year ended December 31,		
B2C Segment (in € millions)	**2013**	**2012**	**Change 2012/2013**
Revenues	**869.4**	**832.6**	**4.4%**
Digital revenues	681.5	650.4	4.8%
Analog revenues	28.6	36.9	(22.4)%
Bulk revenues	68.6	70.1	(2.1)%
Fiber white label revenues	90.7	75.3	20.4%
Purchases and subcontracting services	(415.1)	(386.1)	7.5%
Staff costs and employee benefits expense	(87.1)	(77.6)	12.3%
Taxes and duties	(20.5)	(19.9)	2.9%
Provisions	(8.6)	(4.5)	90.8%
Other operating income	65.5	68.1	(3.8)%
Other operating expenses	(18.6)	(16.0)	16.0%
Operating income before depreciation and amortization and impairment (EBITDA)	**385.0**	**396.6**	**(2.9)%**
EBITDA margin rate	*44.3%*	*47.6%*	—

Revenues

B2C segment revenues increased by 4.4% to €869.4 million for the year ended December 31, 2013, compared to €832.6 million for the year ended December 31, 2012.

The increase in B2C revenues was essentially due to the Numericable brand digital business, which increased by €31.1 million, or 4.8%, from €650.4 million in 2012 to €681.5 million in 2013. Digital revenues comprise revenues generated by sales of digital multi-play packages and options, such as VOD and additional channels. This increase was primarily due to an increase in the digital customer base, which totalled 1.264 million at December 31, 2013, as compared to 1.228 million at December 31, 2012. This increase in the client base primarily reflects the commercial appeal of our Very High Speed and LaBox offerings. LaBox was launched in mid-2012 and was aggressively advertised in the fall of 2012. The increase in the client base was accompanied by an increase of €0.80 in ARPU for existing clients, from an average of €40.70 per month in 2012 to an average of €41.5 per month in 2013.

Fiber white labels constituted the second growth vector, with revenues increasing by 20.4%, or €15.4 million, from €75.3 million in 2012 to €90.7 million in 2013. This increase reflects an approximate 22% increase in the number of fiber white label end users year-on-year, from approximately 297,000 end users as of December 31, 2012 to approximately 363,000 end users as of December 31, 2013, due to the continued commercial roll-out of Bouygues Télécom's white label offering since its launch at the end of 2010.

Analog revenues continued to decrease as anticipated, decreasing by € 8.3 million, or 22.5%, from €36.9 million for the year ended December 31, 2012 to €28.6 million for the year ended December 31, 2013. This decrease is primarily due to a 21% decrease in the Numericable Group's analog customer base, from approximately 103,000 subscribers as of December 31, 2012 to approximately 81,000 as of December 31, 2013. Since the Numericable Group stopped marketing analog offers a few years ago, the Numericable Group's analog customer base is now only negatively impacted by churners and no further gross adds are registered.

Bulk revenues decreased slightly by 2.1%, totaling €68.6 million for the year ended December 31, 2013, compared to €70.1 million for the year ended December 31, 2012, reflecting a slight decrease in the Numericable Group's bulk customer base.

Purchases and Subcontracting Services

Purchases and subcontracting services increased by €29.0 million, or 7.5%, from €386.1 million in 2012 to €415.1 million in 2013. This increase primarily reflects the marketing and communications efforts made in order to grow the digital subscriber base between 2012 and 2013. Subscriber acquisition costs, which include subscriber acquisition-related marketing and communications costs and commissions paid to external sales networks, increased by almost €17 million, from €73.4 million in 2012 to €90.0 million in 2013.

In addition, energy and network-maintenance costs increased by approximately €1 million, call center costs increased by €2.5 million, and costs of material purchased for resale increased approximately €5 million.

Staff Costs and Employee Benefits Expense

Staff costs and employee benefits expense increased by 12.3%, or €9.5 million, from €77.6 million in 2012 to €87.1 million in 2013. This increase reflects the hiring of new sales team members in 2012 and 2013, as well as higher variable compensation paid to marketing staff, tied in part to the number of new customers. Furthermore, wages increased by approximately 1% in 2013.

In addition, share-based compensation expense in connection with the IPO resulted in additional costs of €3.6 million.

Taxes and Duties

Taxes and duties increased by 3.0%, or €0.6 million, from € 19.9 million in 2012 to €20.5 million in 2013. This increase is due to the growth in the Company CVAE during this period, which in turn results from the Company's significant investments in the B2C business and the related increase in both the value of fixed assets and added value.

Provisions

Net provisions increased by €4.1 million, from €4.5 million for the year ended December 31, 2012 to €8.6 million for the year ended December 31, 2013.

Provisions mainly consist of those for commercial and tax litigation, for retirement indemnities and for amounts charged to end users who do not return the Numericable Group's equipment after canceling their subscriptions with the Numericable Group.

The increase was primarily due to the increase in net provisions for bad debt, for approximately €4 million. The other provisions recorded during the year were offset by reversals during the period.

Other Operating Income

Other operating income decreased by €2.6 million, from €68.1 million for the year ended December 31, 2012 to €65.5 million for the year ended December 31, 2013. This decrease was primarily due to lower capital expenditures on the DSP 92 project, as the first phase ended during the year.

Other Operating Expenses

Other operating expenses increased by €2.6 million, from € 16.0 million for the year ended December 31, 2012 to €18.6 million for the year ended December 31, 2013. This increase was the result of an increase of €7.3 million in expenses related to the completion of certain DSPs, which resulted in a return of certain assets to local governments. This return of assets results in the removal of certain zero-value assets from the Numericable Group's balance sheet and the transfer of the remaining net accounting value of the transferred assets to expenses. These expenses have no impact on the Numericable Group's cash flow. This increase in expenses was partially offset by a significant decrease in refinancing fees as compared with 2012, a year in which costs increased strongly as a result of two note issuances.

Operating Income Before Depreciation and Amortization and Impairment (EBITDA)

EBITDA decreased by €11.6 million, from €396.6 million for the year ended December 31, 2012 to €385.0 million for the year ended December 31, 2013. Compared to 2012 and earlier years, in which revenue remained relatively stable, the growth in 2013, driven by a more significant capture of new customers, generated higher subscription acquisition costs. In the first year of return to growth, these higher costs more than offset the growth in revenues. However, B2C segment EBITDA excluding subscriber acquisition costs (subscriber acquisition-related marketing, communications and commissions paid to external sales networks) increased from €468.4 million for the year ended December 31, 2012 to €470.0 million for the year ended December 31, 2013.

Moreover, this segment's EBITDA was affected in 2013 by the costs of stock option grants in the amount of €3.6 million, as well as additional charges with no effect on cash flow relating to the completion of DSPs, for €7.3 million.

B2B Segment

The following table shows the revenues, operating expenses and operating income before depreciation and amortization and impairment for the B2B segment for the years ended December 31, 2012 and 2013.

B2B Segment (in € millions)	**Year ended December 31, 2013**	**2012**	**Change 2013/2012**
Revenues	**312.6**	**324.5**	**(3.7)%**
Voice revenues	115.5	133.9	(13.7)%
Data revenues	197.1	190.6	3.4%
Purchases and subcontracting services	(180.2)	(178.4)	1.0%
Staff costs and employee benefits expense	(60.5)	(57.2)	5.8%
Taxes and duties	(8.1)	(7.6)	6.6%
Provisions	(11.6)	(1.3)	NS
Other operating income	20.8	21.1	(1.4)%
Other operating expenses	(1.9)	(1.1)	72.7%
Operating income before depreciation and amortization and impairment (EBITDA)	**71.2**	**100.0**	**(28.8)%**
EBITDA margin rate	*22.8%*	*30.8%*	—

Revenues

B2B segment revenues decreased by €11.9 million, or 3.7%, from € 324.5 million in 2012 to €312.6 million in 2013. This decrease reflected a decrease in voice revenues, which was partially offset by an increase in data revenues.

Voice revenues decreased by €18.4 million, or 13.7%, from € 133.9 million in 2012 to €115.5 million in 2013. This decrease resulted from a gradual passing on to customers of the successive decreases in regulated call termination rates and to a lesser extent from a decrease in volumes.

Data revenues increased by €6.5 million, or 3.4%, from € 190.6 million for the year ended December 31, 2012 to €197.1 million for the year ended December 31, 2013. This increase reflected the Numericable Group's strategy of focusing on data services, where most new contracts are signed.

In addition, 2013 was also affected by credit notes issued to certain customers in response to customer complaints regarding service quality problems during the integration of Altitude Télécom within Completel. These credit notes primarily affected the nine-month period ended September 30, 2014, for a total of approximately €10 million, the impact of which reduced revenues.

Purchases and Subcontracting Services

Purchases and subcontracting services increased slightly, from €178.4 million in 2012 to €180.2 million in 2013, for an increase of 1.0%. This small increase results from the growth in the Numericable Group's data business, the revenues of which increased 3.4% for the year, generating more purchases of capacity.

This increase was partly offset by a decrease in telephony costs of approximately €4 million from 2012 to 2013 resulting from a decrease in per-unit costs—the effect of the last decrease in regulated interconnection rates, which occurred on January 1, 2013—and of a contraction in volumes of minutes.

Staff Costs and Employee Benefits Expense

Staff costs and employee benefits expense increased by 5.8%, from €57.2 million in 2012 to €60.5 million in 2013. This increase has two main causes. First, additional sales staff was recruited to address the lower-end market and SMEs. Second, new contracts increased strongly in 2013 as compared with 2012 (monthly revenues from new contracts increased from €5.660 million in 2012 to €6.657 million in 2013, representing an increase of 17.6%, the effect of which should be seen essentially in 2014), generating higher bonuses for the sales teams in 2013 than in 2012.

Taxes and Duties

Taxes and duties increased slightly, by €0.5 million, between 2012 and 2013.

Provisions

Provisions (net of reversals) increased by €10.3 million, from €1.3 million in 2012 to €11.6 million in 2013. Most of this increase comes from a provision recorded following a tax audit performed in 2013 relating to the years 2010 and 2011, following which the tax authorities rejected expenses for services performed between 2009 and 2011. The amount of the assessments for which a provision was recorded is €11.4 million.

Other Operating Income

Other operating income did not change significantly, decreasing by €0.3 million, or 1.6%, from €21.1 million in 2012 to €20.8 million in 2013. This other income largely comprises capitalized payroll.

Other Operating Expenses

Other operating expenses increased by €0.8 million, from €1.1 million in 2012 to €1.9 million in 2013. This increase is essentially due to fees paid in connection with refinancing transactions in 2013.

Operating Income Before Depreciation and Amortization and Impairment (EBITDA)

EBITDA decreased by €28.8 million, or 28.8%, from €100.0 million in 2012 to €71.2 million in 2013.

This decrease in the B2B segment's operating income is due to a decrease in the size of the voice market, primarily as a result of the regulated decrease in interconnection rates, and, to a lesser extent, in volumes. It was amplified in 2013 by the low level of contract-based orders in 2012, leading to an incremental revenue in 2013 that was weaker than in 2012. The credit notes of close to €10 million issued in the nine-month period ended September 30, the year also weighed heavily on this segment's profitability in 2013, as did the provision relating to the tax audit, for €11.4 million.

The commercial recovery in 2013, as measured by the value of new contracts signed, which increased 17.6% in 2013 as compared with 2012, as well as the end of the regulated decreases in call termination rates, are positive signs for 2014.

Wholesale Segment

The following table shows the revenues, operating expenses and operating income before depreciation and amortization and impairment for the Wholesale segment for the years ended December 31, 2012 and 2013.

Wholesale Segment (in € millions)	**Year ended December 31, 2013**	**2012**	**Change 2012/2013**
Revenues	**200.8**	**211.5**	**(5.1)%**
Purchases and subcontracting services	(84.3)	(103.8)	(18.8)%
Staff costs and employee benefits expense	(7.0)	(6.7)	4.5%
Taxes and duties	(5.4)	(4.9)	10.2%
Provisions	(0.3)	(0.4)	(25.0)%
Other operating income	0.1	—	—
Other operating expenses	0.0	—	—
Operating income before depreciation and amortization and impairment (EBITDA)	**103.9**	**95.7**	**8.6%**
EBITDA margin rate	*51.7%*	*45.3%*	—

Revenues

Wholesale segment revenues decreased by €10.7 million, or 5.1%, from €211.5 million in 2012 to €200.8 million in 2013.

Several factors explain this change. The telephony business had benefited in 2012 from the interconnection traffic between the mobile networks of Bouygues Telecom and Free Mobile. Increasingly, however, traffic is passing directly between these two operators, and less through the Numericable Group's network. This, along with the regulated decrease in interconnection rates, explains a decrease in revenues of approximately €27 million. However, these two effects had only a weak impact on margin value.

In addition, the revenues generated by the Bouygues (ex-Darty) white label DSL brands continued to decrease (by €4 million between 2012 and 2013) in correlation with the decrease in the number of customers hosted on the Numericable Group's network, which decreased from 168,005 customers at the end of 2012 to 120,261 in 2013, or a decrease of 28%.

Conversely, revenues from data capacity resales, which have high margins, continued to grow, increasing by approximately €17 million from 2012 to 2013.

Purchases and Subcontracting Services

Purchases and subcontracting services decreased by €19.5 million, or 18.8%, from €103.8 million in 2012 to €84.3 million in 2013.

This decrease resulted from a decrease in volume and value of telephone traffic over the Numericable Group's network. The decrease in volume was the result of a lower volume of minutes exchanged between Bouygues Télécom and Free Mobile using the Numericable Group's network. The decrease in value was the result of the regulated decrease in interconnection rates, which last occurred on January 1, 2013.

The increase in data activity had only a small impact on purchases and subcontracting services, because it primarily includes the resale of capacity on the Numericable Group's network, which does not generate additional external costs.

Staff Costs and Employee Benefits Expenses

Staff costs and employee benefits expense increased by 4.5%, or €0.3 million, from €6.7 million in 2012 to €7.0 million in 2013, due primarily to the increase in profit sharing based on income growth in 2013.

Taxes and Duties

Taxes and duties increased by €0.5 million, or 10.2%, from €4.9 million in 2012 to €5.4 million in 2013. This tax increase is directly correlated with the increase in income generated by Wholesale activities.

Provisions

Provisions (net of reversals) decreased from €0.4 million in 2012 to €0.3 million in 2013. Neither the change in provisions nor their absolute value is significant.

Operating Income Before Depreciation and Amortization and Impairment (EBITDA)

EBITDA of Wholesale activities grew by €8.2 million, or 8.5%, between 2012 and 2013, from €95.7 million in 2012 to €103.9 million in 2013. This increase in EBITDA results from a decline in the traditional telephony service resale business, which has lower margins, more than offset by growth in the data service resale business, which have higher margins.

Analysis of Results for the Years Ended December 31, 2011 and December 31, 2012

The table below shows the Numericable Group's combined statement of income for the years ended December 31, 2011 and December 31, 2012, in millions of euros and as a percentage of revenues for the periods in question.

	Year ended December 31,				
	2011		2012		
	(in € millions)	(as a % of revenues)	(in € millions)	(as a % of revenues)	Change

See "—*Overview—Key Performance Indicators*" for a discussion of key performance indicators by segment.

Revenues

Numericable Group revenues remained relatively stable, decreasing €4.5 million, or 0.3%, from €1,306.9 million for the year ended December 31, 2011 to €1,302.4 million for the year ended December 31, 2012. This relative stability reflects that of B2C segment revenues and the increase in wholesale segment revenues, partially offset by the decrease in B2B segment revenues. The following discussion describes the contribution of each segment to the Numericable Group's revenues. For the avoidance of doubt, inter-segment sales have been eliminated for purposes of such discussion.

The B2C segment's contribution to Numericable Group revenues remained relatively stable, decreasing by €4.1 million, or 0.5%, from €830.3 million for the year ended December 31, 2011 to €826.2 million for the year ended December 31, 2012. This relative stability reflects an increase in fiber white label revenue and a stable performance in bulk revenue, offset by a decrease in both digital and analog revenues.

The B2B segment's contribution to Numericable Group revenues decreased slightly by €5.0 million, or 1.5%, from €328.2 million for the year ended December 31, 2011 to €323.2 million for the year ended December 31, 2012. This decrease reflects a decrease in voice revenue, which was partly offset by an increase in data revenue. This decrease also reflects higher churn due in part to the migration of segment engineers to Rouen, which underwent a reorganization in the first quarter of 2012, which resulted in higher churn and a low level of new installations, as well as certain technical issues, which were resolved towards the end of 2012.

The wholesale segment's contribution to Numericable Group revenues increased by €4.8 million, or 3.2%, from €148.3 million for the year ended December 31, 2011 to €153.1 million for the year ended December 31, 2012. This increase reflects increases in voice and fiber wholesale revenues, partially offset by decreases in data and white label revenues as well as a reduction in regulated interconnection rates.

Excluding one large one-off revenue item recorded in 2011—a €19 million payment by SFR following the early termination of a long-term IRU which it inherited as part of an acquisition and that it no longer needed—Numericable Group revenues would have increased by €14.5 million, or 1.1%, in 2012 as compared to 2011.

Purchases and Subcontracting Services

Purchases and subcontracting services expenses decreased by €19.6 million, or 3.2%, from a total expense of €621.7 million for the year ended December 31, 2011 to a total expense of €602.1 million for the year ended December 31, 2012. This decrease primarily reflects lower expenses in the B2B segment, as a result of synergies following the Altitude Télécom acquisition as well as a reduction in regulated call termination rates and a reduction in content costs in the B2C segment.

Staff Costs and Employee Benefits Expense

Staff costs and employee benefits expenses remained stable, increasing by €0.5 million, or 0.3%, from €141.0 million for the year ended December 31, 2011, to €141.5 million for the year ended December 31, 2012. This stability reflects slight increases in headcount, wages and employee profit sharing in 2012, partially offset by staff cost synergies realized following the acquisition of Altitude Télécom.

Taxes and Duties

Taxes and duties increased by €4.1 million, or 14.5%, from €28.3 million for the year ended December 31, 2011 to €32.4 million for the year ended December 31, 2012, reflecting a general increase in the tax burden of French corporations in 2012.

Provisions

Net provisions remained relatively stable, amounting to €8.0 million for the year ended December 31, 2011 and €7.7 million for the year ended December 31, 2012.

Other Operating Income

Other operating income increased by €8.8 million, or 10.9%, from €80.4 million for the year ended December 31, 2011 to €89.2 million for the year ended December 31, 2012. This increase reflects an €18.2 million increase in own work capitalized, relating in particular to DSP 92.

Other Operating Expenses

Other operating expenses decreased by €7.9 million, or 31.5%, from €25.1 million for the year ended December 31, 2011 to €17.2 million for the year ended December 31, 2012. This decrease was primarily due to a decrease in management fees paid to the Numericable Group's shareholders resulting from a change in their calculation methodology, partially offset by debt refinancing-related fees.

Operating Income Before Depreciation and Amortization and Impairment (EBITDA)

EBITDA increased by €27.6 million, or 4.9%, from €563.2 million for the year ended December 31, 2011 to €590.8 million for the year ended December 31, 2012. This increase primarily reflects reductions in content-related costs in the B2C segment, as well as synergies derived from the integration of Altitude Télécom (acquired in late 2010) into Completel.

Adjusted EBITDA

Adjusted EBITDA increased by €48.6 million, or 8.5%, from €572.2 million for the year ended December 31, 2011 to €620.8 million for the year ended December 31, 2012. See "*Summary Financial Information and Other Data*" for an explanation of adjusted EBITDA and its components.

Depreciation and Amortization

Depreciation and amortization expenses remained relatively stable, amounting to €294.5 million for the year ended December 31, 2011 and €291.7 million for the year ended December 31, 2012.

Operating Income

Operating income increased by €30.3 million, or 11.3%, from €268.7 million for the year ended December 31, 2011 to €299.0 million for the year ended December 31, 2012. This increase is due to the same factors as the increase in EBITDA.

Finance Costs, Net

Finance costs is a net charge which increased by €25.4 million, or 13.7%, from €186.0 million for the year ended December 31, 2011 to €211.4 million for the year ended December 31, 2012. This variation reflects higher interest relative to gross debt and other financial expenses as a result of the Numericable Group's 2012 debt refinancing. The Numericable Group paid substantial waiver fees in connection with such refinancing, and it resulted in a higher blended interest rate. In addition, no mark-to- market gains were recorded in 2012 in relation to the fixed/variable interest rate swap that was terminated in the middle of 2011, after having generated substantial mark-to-market gains in 2011 (€27.0 million). See "*—Liquidity and Capital Resources of the Numericable Group—Cash Flows—Net cash from (used by) financing activities—Interest paid*".

Income Tax Expense

Income tax expense decreased by €10.9 million, or 81.3%, from €13.4 million for the year ended December 31, 2011 to €2.5 million for the year ended December 31, 2012. This decrease is a result of a base effect in 2011: the Numericable Group recorded a provision of €11 million in respect of tax audits. The effective income tax rate decreased from 16.19% in 2011 to 2.84% in 2012.

Analysis of Results by Segment for the Years Ended December 31, 2011 and December 31, 2012

B2C Segment

The following table shows the revenues, operating expenses and operating income before depreciation and amortization and impairment for the B2C segment for the years ended December 31, 2011 and 2012.

B2C Segment (in € millions)	**Year ended December 31, 2011**	**2012**	**Change 2012/2011**
Revenues	**835.3**	**832.6**	**(0.3)%**
Digital revenues	660.4	650.4	(1.5)%
Analog revenues	51.1	36.9	(27.8)%
Bulk revenues	70.0	70.1	0.1%
Fiber white label revenues	53.8	75.3	40.0%
Purchases and subcontracting services	(385.0)	(386.1)	0.3%
Staff costs and employee benefits expense	(73.5)	(77.6)	5.6%
Taxes and duties	(18.9)	(19.9)	5.3%
Provisions	(5.3)	(4.5)	7.5%
Other operating income	60.2	68.1	13.1%
Other operating expenses	(14.4)	(16.0)	11.1%
Operating income before depreciation and amortization and impairment (EBITDA)	**398.4**	**396.6**	**(0.4)%**
EBITDA margin rate	*47.7%*	*47.6%*	*(0.1)%*

Revenues

B2C segment revenues remained relatively stable, totaling €832.6 million for the year ended December 31, 2012, compared to €835.3 million for the year ended December 31, 2011.

Digital revenues, consisting of the revenues deriving from the sale of digital multiple play packages and options (VOD, additional channels, etc.) decreased by €10.0 million, or 1.5%, from €660.4 million for the year ended December 31, 2011 to €650.4 million for the year ended December 31, 2012. This decrease was primarily due to a slight reduction in the digital customer base, which totalled 1.228 million at December 31, 2012, as compared to 1.238 million at December 31, 2011. The decrease in the customer base reflected a more difficult nine-month period ended September 30, 2012 in terms of gross adds and a relatively flat second half of the year. Churn improved in 2012 as compared to 2011. The reduction in the customer base was partly offset by a €0.4 increase in the ARPU of the customer base in 2012 compared to 2011. VOD revenues also increased from €10.0 million in 2011 to €12.0 million in 2012.

Analog revenues decreased by €14.2 million, or 27.8%, from €51.1 million for the year ended December 31, 2011 to €36.9 million for the year ended December 31, 2012. This decrease was primarily due to a 22.6% decrease in the Numericable Group's analog customer base, from approximately 133,000 subscribers as of December 31, 2011 to approximately 103,000 as of December 31, 2012. Since the Numericable Group stopped marketing analog offers a few years ago, the Numericable Group's analog customer base is now only negatively impacted by churners and no further gross adds are registered. The pace of churn in the analog customer base was lower in 2011 when the satellite analog signal was switched-off.

Bulk revenues remained stable, totaling €70.0 million for the year ended December 11, 2011, compared to €70.1 million for the year ended December 31, 2012, reflecting the relative stability of the Numericable Group's bulk customer base and slight contractual increases in tariffs.

Fiber white label revenues increased by €21.5 million, or 40.0%, from €53.8 million for the year ended December 31, 2011 to €75.3 million for the year ended December 31, 2012. This increase reflected a 44% increase in the number of fiber white label end users year- on-year.

Purchases and Subcontracting Services

Purchases and subcontracting services remained relatively stable at €386.1 million for the year ended December 31, 2012, compared to €385.0 million for the year ended December 31, 2011. This stability results from a reduction in content-related costs and an increase of other expenses such as externalized door-to-door sales force (for an amount of €4 million) and some rental expenses where the Numericable Group's network equipment is located (for an amount of €2.5 million). "Subscriber acquisition" costs, which include subscriber acquisition-related marketing, communications and commissions paid to external distribution networks amounted to €73.8 million and €73.4 million, respectively, for the years ended December 31, 2011 and 2012.

Content-related costs decreased from €103.1 million for the year ended December 31, 2011 to €93.1 million for the year ended December 31, 2012. This decrease is mainly the result of renegotiations that took place at the end of 2011 to renew certain broadcasting contracts with the main TV channels and owners of content rights. In 2012, the Numericable Group negotiated more favorable financial terms for the MNVO contracts entered into with Bouygues Télécom, which terms retroactively apply as from January 1, 2012.

Staff Costs and Employee Benefits Expense

Staff costs increased by 5.6% or €4.1 million, from €73.5 million for the year ended December 31, 2011 to €77.6 million for the year ended December 31, 2012. This increase was due to sales force hirings made in the course of 2012 and 2011, the latter of which having a full-year effect in 2012. In addition, wages increased approximately 1% in 2012 and employee profit sharing expenses increased by €1.5 million.

Taxes and Duties

Taxes and duties increased by 5.3% or €1.0 million, from €18.9 million for the year ended December 31, 2011 to €19.9 million for the year ended December 31, 2012. This increase is mainly due to a general increase in the tax burden on French corporations in 2012 and the increased profitability of this segment.

Provisions

Net provisions remained relatively stable at €5.7 million for the year ended December 31, 2012 compared to €5.3 million for the year ended December 31, 2011.

Provisions mainly consist of those for commercial and tax litigations, for retirement indemnities and for amounts charged to end-users who do not return the Numericable Group's equipment after cancelling their subscriptions with the Numericable Group.

The slight increase in net provisions in 2012 is primarily due to increases in provisions for retirement indemnities, the calculation of which is affected by discount rates, which decreased between 2011 and 2012 and therefore generated an additional expense in 2012 of €2.3 million compared to 2011.

Other Operating Income

Other operating income increased by €7.9 million, or 13.1%, from €60.2 million for the year ended December 31, 2011 to €68.1 million for the year ended December 31, 2012. Excluding a one-off payment of €10 million by France Telecom to the Numericable Group in 2011 pursuant to a judgment of the Paris Commercial Court, other operating income increased by €17.9 million. The increase resulted mainly from an increase in own work capitalized, relating in particular to the DSP 92 project.

Other Operating Expenses

Other operating expenses increased by €1.6 million, or 11.1%, from €14.4 million for the year ended December 31, 2011 to €16.0 million for the year ended December 31, 2012. The increase is primarily a result of €3.9 million in advisory fees incurred in 2012 in connection with the Numericable Group's 2012 debt refinancing.

Operating Income Before Depreciation and Amortization and Impairment (EBITDA)

EBITDA decreased by €3.0 million, or 0.8%, from €398.4 million for the year ended December 31, 2011 to €395.4 million for the year ended December 31, 2012. This is tied to the relative stability of revenues, optimization of content-related costs and a number of items included in the table in "Selected Financial and Operating Data—Other Financial Data—Adjusted EBITDA".

B2C segment EBITDA excluding subscriber acquisition costs (subscriber acquisition-related marketing, communications and commissions paid to external distribution networks) increased from €461.8 million for the year ended December 31, 2011 to €468.4 million for the year ended December 31, 2012, an increase of 1.4%.

B2B Segment

The following table shows the revenues, operating expenses and operating income before depreciation and amortization and impairment for the B2B segment for the years ended December 31, 2011 and 2012.

B2B Segment (in € millions)	Year ended December 31, 2011	2012	Change 2012/2011
Revenues	**331.1**	**324.5**	**(2.0)%**
Voice revenues	152.2	133.9	(12.0)%
Data revenues	179.0	190.6	6.5%
Purchases and subcontracting services	(196.7)	(178.4)	(9.3)%
Staff costs and employee benefits expense	(61.0)	(57.2)	(6.2)%
Taxes and duties	(5.7)	(7.6)	33.3%
Provisions	(3.3)	(1.7)	(48.5)%
Other operating income	20.1	21.1	5.0%
Other operating expenses	(10.6)	(1.1)	(89.6)%
Operating income before depreciation and amortization and Impairment (EBITDA)	**74.0**	**99.6**	**34.6%**
EBITDA margin rate	*22.3%*	*30.7%*	*8.4%*

Revenue

B2B segment revenues decreased by €6.6 million, or 2.0%, from €331.1 million for the year ended December 31, 2011 to €324.5 million for the year ended December 31, 2012. This decrease reflected a decrease in voice revenue, which was partly offset by an increase in data revenue.

Voice revenues decreased by €18.3 million, or 12.0%, from €152.2 million for the year ended December 31, 2011 to €133.9 million for the year ended December 31, 2012. This decrease resulted from a gradual passing on to customers of successive decreases in regulated termination rates.

Data revenues increased by €11.6 million, or 6.5%, from €179.0 million for the year ended December 31, 2011 to €190.6 million for the year ended December 31, 2012. This increase reflected the Numericable Group's strategy to focus on data services following the acquisition in late 2010 of Altitude Télécom, an operator that was focused exclusively on data services.

In general, the nine-month period ended September 30, 2012 was difficult, due to the migration of B2B segment engineers to Rouen and a technical overloading problem at a Completel site in the second quarter of the year, which weighed further on installations. The third quarter was seasonally low in telephony traffic and hence revenues. Sales performance improved in the fourth quarter of 2012, although installations remained low.

Purchases and Subcontracting Services

Purchases and subcontracting services decreased significantly from €196.7 million for the year ended December 31, 2011 to €178.4 million for the year ended December 31, 2012, representing an €18.3 million, or 9.3%, decrease. This decrease resulted from the optimization of other purchases and subcontracting services following the full integration and merger of Altitude Télécom within Completel, completed in December 2011, as well as from a gradual passing on to customers of successive decreases in regulated termination call rates.

Cost synergies generated by the integration and the merger of Altitude within Completel amounted to savings of approximately €10 million in 2012 compared to 2011, the majority of which was related to savings in network expenses, which were reduced by €5.2 million, as well as smaller reductions in marketing expenses (−€2.6 million) and general and administrative expenses (−€1.5 million).

Voice-related expenses decreased by €4.6 million between 2011 and 2012, mainly due to reductions in regulated termination rates.

Staff Costs and Employee Benefits Expense

Staff costs decreased by 6.2%, or €3.8 million, from €61.0 million for the year ended December 31, 2011 to €57.2 million for the year ended December 31, 2012. This decrease is primarily the result of the full integration and merger of Altitude Télécom within Completel, completed in December 2011, which allowed for optimization of staff costs in 2012.

Taxes and Duties

Taxes and duties increased by €1.9 million, from €5.7 million for the year ended December 31, 2011 to €7.6 million for the year ended December 31, 2012. This increase of 33.3% is mainly due to a general increase in the tax burden on French corporations in 2012 and is consistent with the increase of segment EBITDA (+34.6%).

Provisions

Net provisions decreased from €3.3 million for the year ended December 31, 2011 to €1.7 million for the year ended December 31, 2012. The decrease is mainly due to the recording in 2011 of a provision for a redundancy plan relating to the acquisition of Altitude Télécom.

Other Operating Income

Other operating income remained relatively stable from €20.1 million for the year ended December 31, 2011 to €21.1 million for the year ended December 31, 2012.

Other Operating Expenses

Other operating expenses decreased by €9.5 million, or 89.6%, from €10.6 million for the year ended December 31, 2011 to €1.1 million for the year ended December 31, 2012. This decrease was primarily due to a decrease in management fees paid to the Numericable Group's shareholders resulting from a change in their calculation methodology.

Operating Income Before Depreciation and Amortization and Impairment (EBITDA)

EBITDA increased by €25.6 million, or 34.6%, from €74.0 million for the year ended December 31, 2011 to €99.6 million for the year ended December 31, 2012. This improvement in profitability is mainly due to increased data revenues, as well as decreased purchases and subcontracting services expenses, reflecting synergies captured through the integration of Altitude Télécom into Completel.

Wholesale Segment

The following table shows the revenues, operating expenses and operating income before depreciation and amortization and Impairment for the wholesale segment for the years ended December 31, 2011 and 2012.

Wholesale Segment (in € millions)	Year ended December 31, 2011	2012	Change 2012/2011
Revenues	**201.1**	**211.5**	**5.2%**
Purchases and subcontracting services	(100.6)	(103.8)	3.2%
Staff costs and employee benefits expense	(6.6)	(6.7)	1.5%
Taxes and duties	(3.7)	(4.9)	32.4%
Provisions	0.6	(0.4)	NA
Other operating income	0.1	0.0	NA
Other operating expenses	—	—	—
Operating income before depreciation and amortization and Impairment (EBITDA)	**90.9**	**95.7**	**5.3%**
EBITDA margin rate	*45.2%*	*45.2%*	*0.0%*

Revenue

Wholesale segment revenues increased by €10.4 million, or 5.2%, from €201.1 million for the year ended December 31, 2011 to € 211.5 million for the year ended December 31, 2012. This increase was due to increase in the voice business and fiber wholesale partly offset by the decrease in data and DSL white labels.

Voice revenues increased by €23.2 million from €74.9 million for the year ended December 31, 2011 to €98.1 million for the year ended December 31, 2012. This increase reflected favorable contracts signed with Bouygues Télécom following the unexpected changes in telecommunications operators' needs for voice termination resulting from Free's entry into the mobile market in January 2012. The Numericable Group was able to temporarily provide voice termination services to Bouygues pending the latter's development of its own capacity to interconnect with Free's new mobile customer base. The resulting increase in volume more than offset the decrease in regulated call termination rates in July 2011.

The increase in voice revenues was partially offset by decreases in data and DSL white label revenues.

Data revenue decreased from €41 million in 2011 to €30 million in 2012. Excluding a one-off element in 2011—a payment of € 19 million by SFR following the early termination of a long-term IRU which it inherited as part of an acquisition and that it no longer needed—segment data revenue for the year ended December 31, 2012 would have increased by €8 million.

DSL white label revenues decreased by €10 million, from approximately €59 million in 2011 to approximately €49 million in 2012. This decrease is due to a reduction in the number of DSL white label end-users in 2012 following the acquisition by Bouygues Télécom of Darty's telecommunications business in July 2012 and the subsequent migration of certain Darty white label customers from the Numericable Group's network to Bouygues Télécom's network. See "*Description of Our Business—Products and Services—Business-to-Business Services—France—White Label Services—White Label Services (DSL)*".

Finally, fiber wholesale revenues increased by €8.2 million, essentially driven by a stronger need for fiber in the B2B segment. These intra-Numericable Group revenues are eliminated in combination.

Purchases and Subcontracting Services

Purchases and subcontracting services increased by €3.2 million or 3.2% to €103.8 million, for the year ended December 31, 2012 compared to €100.6 million for the year ended December 31, 2011. This slight increase is a result of the Numericable Group providing call termination services to Bouygues Télécom as described in "*—Wholesale Segment*" on segment revenue and reflects termination costs paid by the Numericable Group to Free for such services.

Staff Costs and Employee Benefits Expenses

Staff costs remained stable at €6.6 million for the year ended December 31, 2011 compared to €6.7 million for the year ended December 31, 2012.

Taxes and Duties

Taxes and duties increased from €3.7 million for the year ended December 31, 2011 to €4.9 million for the year ended December 31, 2012, primarily as a result of the increased tax burden on French corporations in 2012.

Provisions

Net provisions amounted to €0.4 million for the year ended December 31, 2012 and consisted of provisions for potential service claims.

Operating Income Before Depreciation and Amortization and Impairment

Operating income before depreciation and amortization and impairment increased by €4.8 million, or 5.3%, from €90.9 million for the year ended December 31, 2011 to €95.7 million for the year ended December 31, 2012, primarily reflecting the increased interconnection business generated by Free's entry into the mobile telephony market.

Reconciliation of EBITDA and Adjusted EBITDA

Reconciliation of Adjusted EBITDA to EBITDA
(Numericable Group)

(in € millions)	For the year ended December 31 2011	2012	2013	For the nine months ended September 30, 2013	2014

(a) Advisory fees paid in connection with the Numericable Group's refinancing transactions (classified in other operating expenses).

(b) Restructuring costs incurred in connection with the Numericable Group's acquisition of Altitude Télécom and SFR (classified in purchases and subcontracting services and staff costs and employee benefits expense).

(c) Amount received from SFR in connection with the early termination of a long-term IRU lease it had inherited through an acquisition and no longer needed (classified in revenues of the wholesale segment).

(d) Amount received from France Télécom-Orange as payment of damages and interest pursuant to a ruling of the Paris Commercial Court against France Télécom-Orange related to restrictive trade practices on the ADSL market in 2001 and 2002 (classified in other operating expenses). Exceptional charge recognized primarily in 2013 for the €6 million penalty relating to the dispute with Free.

(e) As from January 1, 2010, the CVAE (*Cotisation sur la Valeur Ajoutée des Entreprises*), a French business value-added levy, partially replaced the former local business tax (*taxe professionnelle*) (classified in taxes and duties).

(f) Non-cash losses resulting from the accelerated depreciation of set-top boxes and broadband routers that were returned damaged or not returned at all by churning subscribers (classified in purchases and subcontracting services), and, as applicable, the transfer of the remaining net accounting value of the assets returned to municipal governments in connection with the exiting of DSP contracts.

(g) Penalties paid to SFR as a result of a delay incurred in the deployment of vertical fiber networks pursuant to a fiber deployment agreement entered into in 2008 (classified in purchases and subcontracting services).

Liquidity and Capital Resources of the Numericable Group

The Numericable Group's principal financing needs include its working capital requirements, capital expenditures, interest payments and debt repayments. The Numericable Group's financing needs also include acquisition financing, such as the acquisitions of SFR (which was completed on November 27, 2014) and Virgin Mobile (which remains pending).

The Numericable Group's principal source of liquidity on an ongoing basis has been its operating cash flows. The Numericable Group's ability to generate cash in the future from operations will depend on its operating performance, which is in turn dependent, to some extent, on general economic, financial, competitive, market, regulatory and other factors, many of which are beyond the Numericable Group's control. The Numericable Group has at its disposal cash and cash equivalents to fund the ongoing requirements of its business.

The Numericable Group has also regularly refinanced its debt. In 2012, the Numericable Group made two bond issuances to extend its debt maturity profile. In 2013, the Numericable Group carried out three major changes with respect to its financings. In July and August 2013, the subsidiaries Ypso France and Altice B2B France amended and extended the maturity of their primary syndicated loans. The capital increase in November 2013 in connection with the initial public offering of Numericable Group's shares enabled the Numericable Group to repay a portion (€150 million) of its Old Numericable Senior Secured Notes. In December 2013, the Ypso France sub-group acquired the Altice B2B sub-group and refinanced all of its debt. In order to do this, the Numericable Group entered into a new facility for an amount of €800 million (the "D Facility") within the framework of the Ypso France Senior Facility Agreement. In addition to refinancing the debt of the Altice B2B sub-group, this facility allowed the Numericable Group to repay all of the Old Floating Rate Notes and a portion of the Old Fixed Rate Notes. In the nine-month period ended September 30, 2014, in connection with the 2014 SFR Acquisition, the Numericable Group issued bonds in a total aggregate principal amount of €7,873 million and concluded a new Numericable Term Loan Agreement in an aggregate principal amount of

€3,780 million. The Numericable Group also signed a new revolving credit facility, with €300 million available immediately and an additional €450 million available after the completion of the 2014 SFR Acquisition. A portion of the proceeds of the drawdowns under the Numericable Term Loan Agreement were used to refinance in full the Old Numericable Senior Secured Notes and the Ypso France Senior Facility Agreement, including related fees and make-whole amounts in connection therewith. The remainder of the proceeds of the drawdowns under the Numericable Term Loan Agreement (after the refinancing and the payment of related fees and expenses), and all of the proceeds of the bonds, were used to finance the 2014 SFR Acquisition and certain related expenses and had been placed in escrow accounts pending the completion of this acquisition on November 27, 2014.

The Numericable Group estimates that its financing needs for 2014 will consist primarily of its working capital requirements, capital expenditures, interest expenses, debt repayments and the financing of planned acquisitions.

The Numericable Group is of the view that its consolidated net working capital (i.e., its access to liquidity and cash resources) is sufficient in light of its obligations for the next twelve months as from the date of these Listing Particulars, both prior to taking into account the effect of this offering as well as after taking account of this offering, Vivendi's contribution of 57,227,114 shares of SFR, and the 2014 SFR Acquisition.

Financial Resources

Overview

In 2012 and 2013, the Numericable Group principally relied on the following sources of financing:

- Cash flow from operating activities, which amounted to €531.0 million in 2012 and €570.3 million during 2013.

- Cash on hand, which totalled €8.0 million and €101 million at December 31, 2012 and 2013, respectively. See Note 20 "Cash and cash equivalents" to the Numericable Group's financial statements included elsewhere in these Listing Particulars. The significant increase in cash on hand as of December 31, 2013 is tied to the capital increase of November 2013, of which only a portion was used to repay the Old Numericable Senior Secured Notes. The remaining cash was used by the Numericable Group for its general financing needs, including its organic growth (in particular the deployment of fiber in the network).

- Indebtedness, which, as of December 31, 2013, consisted of the Ypso France Senior Facility Agreement (both direct lending by banks and on-lending of the proceeds of bond issuances), NC Numericable's perpetual subordinated notes, finance leases, deposits received from customers and bank overdrafts. See Note 22 "Financial Liabilities" to the Numericable Group's annual financial statements included elsewhere in these Listing Particulars and the discussion below.

In the first nine months of 2014, the Numericable Group has principally relied on the same sources of financing, with an increase in the reliance on indebtedness funding the escrow accounts for the future payment of part of the acquisition price of SFR:

- Cash flow from operating activities, which amounted to €365.9 million in the nine-month period ended September 30, 2014, compared to €414.4 million in the nine-month period ended September 30, 2013.

- Cash on hand, which totalled €101.4 million and €14.2 million at September 30, 2013 and 2014, respectively. See Note 14 "Cash and cash equivalents" to the Numericable Group's financial statements included elsewhere in these Listing Particulars.

- Indebtedness, which, at September 30, 2014, consisted mainly of the Numericable Senior Secured Notes and the drawdowns under the Numericable Term Loans. The majority of the proceeds of this debt was placed in escrow accounts for the payment of a part of the acquisition price of SFR. See Note 15 "Financial Liabilities" to the Numericable Group's financial statements included elsewhere in these Listing Particulars.

Financial Liabilities

The Numericable Group's financial liabilities totalled €12,705.7 million and €2,766.1 million as of September 30, 2014 and December 31, 2013, respectively. The following table provides a breakdown of the Numericable Group's gross debt as of December 31, 2012 and 2013 and September 30, 2014:

(in € millions)	At December 31, 2011	2012	2013	At September 30, 2014
Financial Liabilities under Senior Facility Agreements	2,871.4	2,800.7	2,632.4	—
Of which Senior Secured Notes (defined below)	—	860.2	380.4	—
Financial Liabilities under Numericable Term Loan Agreement	—	—	—	3,936.0
Financial Liabilities under Numericable Senior Secured Notes	—	—	—	8,457.8
Perpetual subordinated notes	32.9	35.2	37.7	39.7
Financial liabilities under finance leases	29.6	27.3	41.5	44.4
Deposits received from customers	42.9	44.5	51.9	56.8
Mark-to-market swaps				119.1
Other financial liabilities	174.2	133.3	2.7	1.8
Of which subordinated instruments and Super PECs[(1)]	122.3	129.0	—	—
Total financial liabilities	**3,104.5**	**3,041.1**	**2,766.1**	12,705.7

(1) These subordinated instruments and Super PECs are expected to be repaid in full in connection with the listing on Euronext Paris of the Company's shares. See "—Other Financial Liabilities—Shareholder Financing".

The following table shows the Numericable Group's current credit ratings:

Moody's	S&P
B1 (positive outlook)	B+

Following the Company's initial public offering, the acquisition of the Altice sub-group by the Ypso France sub-group and the refinancing of various Numericable Group financings, the two ratings agencies decided (i) to remove the rating of the Altice B2B sub-group and (ii) to improve the Ypso France sub-group's rating from B2/B to B1/B+, which became the Numericable Group's rating. Moody's rated the new financing raised in April 2014 Ba3 and announced that the rating of the Numericable Group is Ba3 following the completion of the 2014 SFR Acquisition. S&P confirmed the B+ rating of the Numericable Group.

The following section discusses the main categories of the Numericable Group's financial liabilities. The section begins with a description of the main financing agreements that were in place until the 2014 Numericable Refinancing Transactions. A description of the main financing agreements currently in place follows.

Old Senior Facility Agreements

Until the 2014 Numericable Refinancing Transactions, the Numericable Group's main financing agreement was the Ypso France Senior Facility Agreement (defined below), which included the liabilities related to the Numericable Group's Old Numericable Senior Secured Notes (defined below). Prior to the refinancing that took place in December 2013, the Numericable Group also had a senior facility agreement (the Altice B2B SFA (defined below)) put in place at the Altice B2B sub-group level. These financing agreements are briefly described below.

Ypso France Senior Facility Agreement

Ypso France S.A.S. ("Ypso France") and certain subsidiaries entered into a senior facility agreement dated June 6, 2006 (as amended, the "Ypso France Senior Facility Agreement") with a syndicate of banks and BNP Paribas as agent and security agent, for the principal purpose of the acquisition and refinancing of the financial indebtedness of Ypso France and its subsidiaries. Numericable Finance & Co. S.C.A. acquired loans under the SFA in amounts equal to the principal amount of the Numericable February 2012 Notes and the Numericable October 2012 Notes (each as defined below). Certain members of the Ypso France Numericable Group were joint guarantors under the Ypso France Senior Facility Agreement, and on December 18, 2013, following the acquisition of Altice B2B France by Ypso France, the companies Altice B2B France and Completel became guarantors as well. Numericable Group was not party to this financing agreement.

The initial amount available under the SFA was €3,225 million. As of December 31, 2013, the amount available (i.e., undrawn) was € 65 million (corresponding to a revolving credit facility) and € 2,638.1 million was drawn. Drawdowns on the SFA were made in euros and bore interest at rates per annum which were either fixed or equal to EURIBOR plus a margin. Fixed rate drawdowns corresponded to loans related to € 380.4 million of Old Numericable

Senior Secured Notes (defined below) issued at a fixed rate on December 31 2013. The margin on variable rate drawdowns was a rate adjusted by reference to a net leverage ratio equal to the ratio of consolidated total net borrowings of the Numericable Group, calculated at the level of Ypso France and in accordance with French accounting standards, to its annualized EBITDA. The Ypso France Senior Facility Agreement also included a euro-denominated revolving credit facility in a maximum aggregate amount of €65 million, which was fully undrawn at December 31, 2013.

The July 31, 2013 amendments extended the average duration of the Ypso France Senior Facility Agreement by modifying the breakdown by tranche. The November 22, 2013 amendment had provided for the addition of the new Facility D to refinance all of the Altice B2B France SFA debt and to repay all of the Floating Rate Notes as well as a portion of the Fixed Rate Notes (each as defined below).

A new credit facility "Facility D" was implemented and completely drawn on December 18, 2013 and bore interest at a rate equal to EURIBOR plus 3.75% per annum (regardless of the net leverage ratio). The following table sets out the use of the Facility D:

(rounded amounts, in € millions)	**Amount**
Repayment of the Altice B2B France SFA Facilities (as defined below)	451.2
Repayment of the C2B Additional Credit Facility (Floating Rate Notes)	275.0
Make-Whole for Floating Rate Notes (2% of the principal)	5.5
Interest accrued on Floating Rate Notes	4.0
Repayment of remaining 35% of the C2A Additional Credit Facility (Fixed Rate Notes)	53.1
Premium on the Fixed Rate Notes (8.75% of the amount repaid)	4.6
Interest accrued on the repaid portion of the Fixed Rate Notes	1.5
OID of the Facility D (0.5% of the principal)	4.0
Various commissions	1.1
Total	**800.0**

Financial Covenants under the Ypso France Senior Facility Agreements

The Ypso France Senior Facility Agreement included customary covenants for this kind of financing, and specifically included financial covenants that required the Numericable Group to comply with certain financial ratios, specifically a net leverage ratio (of consolidated total net borrowings divided by annualized EBITDA), a debt service coverage ratio (consolidated cash flow divided by debt service adjusted for customary items for this type of financing contract) and a net interest coverage ratio (annualized EBITDA to consolidated total net cash interest payable). These financial ratios were calculated in accordance with French GAAP and not IFRS.

The following table summarizes the thresholds required with respect to these ratios as well as the ratios at December 31, 2013:

	Required Threshold at December 31, 2013	**Ratio at December 31, 2013**
Net Leverage Ratio	5.40x	4.12x
*Debt Service Cover Ratio**	1.00x	1.42x
Net Interest Coverage Ratio	2.15x	3.57x

* Under Ypso France Senior Facility Agreement, the testing requirement would have been suspended permanently as from the first testing date where the net leverage ratio of the Ypso France Numericable Group was equal to or less than 3.5:1.

Altice B2B France SFA

Prior to the December 18, 2013 implementation of the Facility D under the Ypso France Senior Facility Agreement, the Numericable Group also had debt outstanding under the senior facility agreement entered into by Altice B2B France S.A.S. ("Altice B2B France") and certain subsidiaries on August 29, 2007 (as amended, the "Altice B2B France SFA") with Credit Agricole Corporate and Investment Bank as mandated lead arranger, agent and security agent and other lenders, for the principal purpose of the acquisition and refinancing of the financial indebtedness of the business of Altice B2B France and its subsidiaries (the "Altice B2B France Numericable Group"). After the initial public offering, the acquisition of Altice B2B France by Ypso France triggered a change of control, so that the full amount was immediately due under the Altice B2B France SFA. The full amount was paid thanks to the implementation and draw down of Facility D under the Ypso France Senior Facility Agreement, and the Altice B2B France SFA terminated on December 18, 2013.

Old Numericable Senior Secured Notes

Summary of the Issuance Structure

The Numericable February 2012 Notes and the Numericable October 2012 Notes (the "Old Numericable Senior Secured Notes") were issued by Numericable Finance & Co. S.C.A (the "Old Numericable Notes Issuer"), an independent stand-alone special purpose financing company formed for the purpose of issuing the Numericable February 2012 Notes, the Numericable October 2012 Notes and any other additional debt permitted to be issued under the Old Indentures (as these terms are defined below). All payments due under the Old Numericable Senior Secured Notes came from the payments made in the first instance by the Old Obligors under the Ypso France Senior Facility Agreement, and the terms and conditions of the Old Numericable Senior Secured Notes and the corresponding facilities under the Ypso France Senior Facility Agreement reflected this arrangement.

Numericable February 2012 Notes

On February 14, 2012, the Old Numericable Notes Issuer issued € 360.2 million principal amount of fixed rate $12^3/_8$% senior secured notes due February 2019 (the "Numericable February 2012 Notes"). The Old Numericable Notes Issuer used the proceeds of the issuance to acquire a direct participation in, and subsequently to acquire, an Additional C1 Facility Loan made by J.P. Morgan Ltd. as lending bank to Ypso France. Ypso France used the proceeds of the Additional C1 Facility Loan to repay €350 million of debt outstanding under the Ypso France Senior Facility Agreement. The Old Numericable Notes Issuer was dependent upon payments from Ypso France under the Additional C1 Facility Loan to make payments under the Numericable February 2012 Notes. The Numericable February 2012 Notes were issued pursuant to an indenture dated February 14, 2012 (the "February 2012 Indenture"), between, among others, the Old Numericable Notes Issuer, Citibank, N.A., London Branch, as trustee, Citibank, N.A., London Branch, as security agent, paying agent and transfer agent and Citigroup Global Markets Deutschland AG, as registrar (as amended from time to time).

The Numericable February 2012 Notes were due on February 15, 2019 and bore interest at a fixed rate equal to $12^3/_8$% per annum, payable in cash on February 15 and August 15 of each year.

Following the initial public offering, upon Ypso France's instruction, the Old Numericable Notes Issuer redeemed 35% of the aggregate principal amount of the Numericable February 2012 Notes using a portion of the net cash proceeds of the capital increase realized as part of the Numericable Group's initial public offering at a redemption price equal to 112.375% of the principal amount of the Numericable February 2012 Notes redeemed, increased by accrued and unpaid interest.

As part of the 2014 Numericable Refinancing Transactions, the remaining amount outstanding under the Numericable February 2012 Notes was redeemed at a price of 126.434% in accordance with the February 2012 Indenture, accrued and unpaid interest was paid, and the corresponding Additional C1 Facility Loan was also repaid in full.

Numericable October 2012 Notes

On October 25, 2012, the Old Numericable Notes Issuer issued € 225.0 million principal amount of fixed rate $8^3/_4$% senior secured notes due February 19, 2019 (the "Old Fixed Rate Notes") and € 275.0 million principal amount of senior secured floating rate notes due October 15, 2018 (the "Old Floating Rate Notes" and together with the Old Fixed Rate Notes, the "Numericable October 2012 Notes" and together with the Numericable February 2012 Notes, the "Old Numericable Senior Secured Notes"). Interest on the Old Floating Rate Notes accrued at a rate equal to three-month EURIBOR plus 7.875%. The Numericable October 2012 Notes were issued pursuant to an indenture dated October 25, 2012 (as amended and supplemented from time to time, the "October 2012 Indenture" and together with the February 2012 Indenture, the "Old Indentures"), between, among others, the Old Numericable Notes Issuer, Citibank, N.A., London Branch, as trustee, Citibank, N.A., London Branch, as security agent, principal paying agent, calculation agent and transfer agent and Citigroup Global Markets Deutschland AG, as registrar. The proceeds of the Numericable October 2012 Notes were used to acquire a direct participation in, and subsequently acquire, the Additional C2A Facility Loan and the Additional C2B Facility Loan made by J.P. Morgan Ltd., as lending bank, to Ypso France.

The proceeds of the Additional C2A Facility Loan and the Additional C2B Facility Loan were used to refinance €490 million of debt outstanding under the Ypso France Senior Facility Agreement, with approximately € 10 million incurred in fees in connection with the Numericable October 2012 Notes issuance and the related refinancing.

Interest on the Old Fixed Rate Notes accrued at the rate of $8^3/_4$% per annum and was payable semi-annually in arrears on February 15 and August 15 commencing on February 15, 2013.

The Old Floating Rate Notes were fully repaid on December 18, 2013 with a portion of the proceeds of Facility D. First, the Additional C2B Facility Loan was repaid to Numericable Finance, its sole lender. The latter then redeemed the Old Floating Rate Notes at a price of 102% in accordance with the October 2012 Indenture. The repayment of the Additional C2B Facility Loan (i.e. €275 million) was authorized by the amendment signed on November 22, 2013.

Following the initial public offering, the Old Numericable Notes Issuer, upon instruction from Ypso France, redeemed 35% of the aggregate principal amount of the October 2012 Old Fixed Rate Notes using a portion of the net cash proceeds of the capital increase realized as part of the initial public offering of the Numericable Group at a redemption price equal to 108.75% of the principal amount of the Old Fixed Rate Notes redeemed, plus accrued and unpaid interest. This amount was partly financed by the capital increase realized as part of the initial public offering of the Numericable Group and partly by a portion of the proceeds of Facility D.

As part of the 2014 Numericable Refinancing Transactions, the remaining amount outstanding under the Old Fixed Rate Notes was redeemed at a price of 118.397% in accordance with the October 2012 Indenture, and the corresponding Additional C2A Facility Loan and the Additional C2B Facility Loan were also repaid. The accrued and unpaid interest was also paid.

Numericable Senior Secured Notes, Numericable Term Loan Agreement, 2014 Numericable Group Revolving Credit Facilities and Related Hedging Obligations

On May 8, 2014, Numericable Group issued new bonds and entered into new term loan and revolving credit facility agreements both to finance the 2014 SFR Acquisition and to refinance the bulk of its then-existing indebtedness under the Ypso France Senior Facility Agreement. Prior to such transactions, the Numericable Group and its subsidiaries had €2,638 million of indebtedness outstanding under the Ypso France Senior Facility Agreement, including the Numericable February 2012 Notes and the Numericable October 2012 Notes. On May 21, 2014, Numericable refinanced such indebtedness in full (the “2014 Numericable Refinancing Transactions”). The Numericable Group’s finance leases and the perpetual subordinated notes (see “*—Perpetual Subordinated Notes” below*) remained on the balance sheet of Numericable Group. The main structure of the new senior debt issuance and of the 2014 Numericable Refinancing Transactions is described below:

- Prior to the 2014 Numericable Refinancing Transactions, on May 8, 2014, Numericable Group issued Numericable Senior Secured Notes in an aggregate principal amount equivalent to €7,873, comprised of:
    - US \$2,400 million aggregate principal amount of $4^7/_8$% Senior Secured Notes due May 15, 2019 (the “2019 Notes”);
    - €1,000 million aggregate principal amount of $5^3/_8$% Senior Secured Notes due May 15, 2022 (the “Euro 2022 Notes”);
    - US \$4,000 million aggregate principal amount of 6% Senior Secured Notes due May 15, 2022 (the “Dollar 2022 Notes”, and together with the Euro 2022 Notes, the “2022 Notes”);
    - €1,250 million aggregate principal amount of $5^5/_8$% Senior Secured Notes due May 15, 2024 (the “Euro 2024 Notes”, and together with the Euro 2022 Notes, the “Euro Senior Secured Notes”); and
    - US \$1,375 million aggregate principal amount of $6^1/_4$% Senior Secured Notes due May 15, 2024 (the “Dollar 2024 Notes”, and together with the 2019 Notes and the Dollar 2022 Notes, the “Dollar Senior Secured Notes”, and the Dollar Senior Secured Notes together with the Euro Senior Secured Notes, the “Numericable Senior Secured Notes”).
- Numericable, Ypso France and Numericable U.S. LLC entered into the Numericable Term Loan Agreement (as defined below) in an aggregate principal amount equivalent to up to €3,780 million on May 8, 2014. On May 21, 2014, the following amounts were drawn under the Numericable Term Loan Agreement: Numericable borrowed €635 million, Numericable U.S. LLC borrowed \$2,600 million and Ypso France borrowed € 1,265 million.
- Numericable and certain of its subsidiaries entered into a € 750 million revolving credit facilities agreement (the “2014 Numericable Group Revolving Credit Facilities Agreement” and the credit facilities provided thereunder, the “2014 Numericable Group Revolving Credit Facilities”) on May 8, 2014. €300 million of the 2014 Numericable Group Revolving Credit Facilities became available for drawdown on May 21, 2014. The remaining €450 million became available on November 27, 2014.
- Numericable Group entered into swap agreements intended to hedge its exposure to fluctuations in the US dollar/euro exchange rate and LIBOR with respect to U.S. dollar interest and principal payments on the Dollar

Senior Secured Notes and U.S. dollar interest and principal drawdowns under the Numericable Term Loan Agreement. See "—*Hedging Obligations*" below.

The proceeds of certain drawdowns under the Numericable Term Loan Agreement were used to refinance the Numericable Group's debt. The balance of the drawdown as well as the proceeds from the issuance of the Numericable Senior Secured Notes were placed into escrow accounts, pending completion of the 2014 SFR Acquisition, and were released from escrow on November 27, 2014. The following table sets forth the sources and uses of funds related to the Numericable Senior Secured Notes issuance and Numericable Term Loan Agreement. Thus, in total, of the raised funds, €8.9 billion were placed in escrow until November 27, 2014, €2.7 billion were used to repay debt and €72 million were used to pay commissions:

(in € millions)	Amount
Funds Placed in Escrow Accounts	
Funds from Issuance of Numericable Senior Secured Notes	7,873.056
Funds from Numericable Term Loan Agreement	1,030.379
Total Amount Placed in Escrow Accounts	**8,903.435**
Funds Used in Refinancing Existing Indebtedness	
Repayment of All Facilities Outstanding under the Ypso France Senior Facility Agreement(1)	2,638.106
Including Principal of Old Numericable Senior Secured Notes(2)	*380.380*
Premium on the Old Numericable Senior Secured Notes	88.795
Interest Accrued on the Old Numericable Senior Secured Notes	17.040
Total Debt Repaid	**2,743.941**
Various commissions	72,175
Total	**11,719.552**

(1) Rather than a cash repayment, the loans of Ypso France under the Ypso France Senior Facility Agreement were deemed to be exchanged for new loans under the Numericable Term Loan Agreement.

(2) The issuer of the Old Numericable Senior Secured Notes used the proceeds received by it pursuant to the repayment of amounts due under the SFA to redeem all outstanding Old Numericable Senior Secured Notes.

For the purposes of financing the 2014 SFR Acquisition, in addition to the amount of indebtedness already raised and placed into escrow under the Numericable Senior Secured Notes and the 2014 Numericable Refinancing Transactions, Numericable Group completed the Numericable Rights Issue for an aggregate amount of €4,732 million.

On November 27, 2014, Numericable Group used the proceeds of a notes issuance by Altice placed in escrow, as well as the net proceeds of the Capital Increase, to finance the entirety of the 2014 SFR Acquisition and pay certain commissions.

The Numericable Senior Secured Notes, Numericable Term Loan Agreement and 2014 Numericable Group Revolving Credit Facilities are described below.

The relative rights of these creditors (under the Numericable Senior Secured Notes, the 2014 Numericable Group Revolving Credit Facilities Agreement, the Numericable Term Loan Agreement and certain counterparties to hedging obligations relating to the foregoing) and of creditors of future indebtedness are governed by an intercreditor agreement (the "2014 Numericable Group Intercreditor Agreement") entered into on May 8, 2014.

Numericable Senior Secured Notes

Each series of Numericable Senior Secured Notes was issued by Numericable Group on May 8, 2014, under an indenture (each, an "Indenture" and together the "Indentures") between Numericable Group and Deutsche Bank AG, London Branch, in its capacity as trustee (the "Trustee") for each series of Numericable Senior Secured Notes. The Numericable Senior Secured Notes are "covenant light" in that they are not subject to financial ratios tested on a periodic basis but rather only to ratios tested on the occurrence of particular events (such as asset sales, incurrence of new indebtedness, payment of dividends).

The 2019 Notes mature on May 15, 2019. The 2022 Notes mature on May 15, 2022. The 2024 Notes mature on May 15, 2024.

Excluding the impact of existing hedging instruments that modify the interest rate effectively borne by the Numericable Group, the Notes bear the following interest rate:

(a) 2019 Notes accrues at the rate of 4.875% per annum;

(b) 2022 Dollar Notes accrues at the rate of 6.000% per annum;

(c) 2024 Dollar Notes accrues at the rate of 6.250% per annum;

(d) 2022 Euro Notes accrues at the rate of 5.375% per annum; and

(e) 2024 Euro Notes accrues at the rate of 5.625% per annum.

Interest on the Numericable Senior Secured Notes accrues from the date of original issuance (i.e. May 8, 2014) or, after the first interest payment date, from the date interest was most recently paid. Interest is payable in cash semi annually in arrears on each February 15 and August 15, commencing on August 15, 2014; it being specified that for the first day of payment of interest, accrued interest will correspond to a period of less than six months. Interest of 1% will accrue on overdue principal, interest or other amounts, including additional amounts, if any, due on the Numericable Senior Secured Notes.

Certain provisions of the Numericable Senior Secured Notes apply only to Numericable Group and its "restricted subsidiaries". As of the date of issuance of the Numericable Senior Secured Notes, all of Numericable Group's subsidiaries have been designated as restricted subsidiaries, but the Indentures provide a mechanism for subsidiaries to be designated as unrestricted subsidiaries, provided that certain conditions are met.

Except as described under "—*Escrow of Proceeds; Special Mandatory Redemption*" below, Numericable Group is not required to make mandatory redemption payments with respect to the Numericable Senior Secured Notes.

Numericable Senior Secured Notes Guarantors and Security

The Numericable Senior Secured Notes are senior obligations of the Company. The guarantors and other collateral securing the Numericable Senior Secured Notes vary based on the completion of the 2014 SFR Acquisition.

After the completion of the 2014 SFR Acquisition on November 27, 2014:

- the Numericable Senior Secured Notes are guaranteed by Ypso Holding S.à r.l., Ypso France, Coditel Debt S.à r.l., Ypso Finance S.à r.l., NC Numericable S.A.S., Altice B2B France, Completel S.A.S., Numericable US S.A.S. and Numericable U.S. LLC (such guarantors, collectively, the "Completion Date Guarantors"; and

- The Numericable Senior Secured Notes benefit from senior pledges over all of the capital stock of the Completion Date Guarantors, the business (fonds de commerce) of NC Numericable SAS, certain bank accounts, intragroup receivables and intellectual property rights of the Completion Date Guarantors.

In addition, within 90 days after November 27, 2014:

- the 2019 Notes and the Dollar 2022 Notes will be guaranteed on a senior basis by SFR and any subsidiaries of SFR that become guarantors (the "Post-Completion Date Guarantors");

- the 2019 Notes and the 2022 Dollar Notes will benefit from senior pledges over all of the shares of SFR held by the Numericable Group and over the shares of any of its subsidiaries that become Post-Completion Date Guarantors, a senior pledge over certain bank accounts of SFR and the intragroup loan between the Company and SFR which will replace, as part of the 2014 SFR Acquisition, the intragroup loans currently owed by SFR to Vivendi; a senior pledge over the business (fonds de commerce) (including intellectual property rights) of SFR; and senior pledges over receivables owed to SFR by certain of its subsidiaries; and

- the 2022 Euro Notes and the 2024 Notes will benefit from senior pledges over the SFR shares held by the Company and over the intragroup loan between the Company and SFR which will replace, as part of the 2014 SFR Acquisition, the intragroup loans currently owed by SFR to Vivendi.

On and after November 27, 2014, the same collateral also secures indebtedness due under the 2014 Numericable Group Revolving Credit Facilities, the Numericable Term Loan Agreement and certain related hedging obligations.

Optional Redemption

a) 2019 Notes

Prior to May 15, 2016, the Company may, on any one or more occasions, redeem up to 40% of the principal amount of the 2019 Notes at a redemption price of 104.875% of the principal amount of the 2019 Notes plus accrued and unpaid interest and additional amounts using funds from the net proceeds from one or more specified equity offerings (excluding the Capital Increase) specified in the terms and conditions of the 2019 Notes; provided that at least 60% of the principal amount of the 2019 Notes remains outstanding after each such redemption and the redemption occurs within 180 days of the specified equity offering.

In addition, prior to May 15, 2016, the Company may, at any occasion, redeem all or part of the 2019 Notes, subject to prior notice of between 30 and 60 days, at a redemption price of 100% of the principal amount of the 2019 Notes plus a make-whole specified in the issuance agreement and any accrued and unpaid interest and any potential additional amounts.

On or after May 15, 2016, the Company may redeem all or a part of the 2019 Notes at a redemption price of 103.656%, 101.828% and 100.000% respectively, plus accrued and unpaid interest and additional amounts, if any, if redeemed during the twelve month period beginning on May 15, 2016, 2017 and 2018, respectively.

b) 2022 Notes

Prior to May 15, 2017, the Company may, on any one or more occasions, redeem up to 40% of the principal amount of the 2022 Dollar Notes and up to 40% of the principal amount of the 2022 Euro Notes at a redemption price of 106.000% of the principal amount of the 2022 Dollar Notes and 105.375% of the principal amount of the 2022 Euro Notes, plus accrued and unpaid interest and additional amounts, using funds from the net proceeds from one or more specified equity offerings (excluding the Capital Increase) specified in the terms and conditions of the 2022 Notes, provided that at least 60% of the principal amount of the 2022 Dollar Notes and at least 60% of the 2022 Euro Notes remains outstanding after each such redemption and the redemption occurs within 180 days of the specified equity offering.

In addition, prior to May 15, 2017, the Company may, at any occasion, redeem all or part of the 2022 Dollar Notes and/or 2022 Euro Notes, at a redemption price of 100% of the principal amount of the 2022 Dollar Notes and/or 2022 Euro Notes plus a make-whole specified in the issuance agreement plus accrued and unpaid interest and additional amounts, if any.

On or after May 15, 2017, the Company may redeem all or a part of the 2022 Notes at the following redemption prices (expressed as a percentage of the principal amount) plus accrued and unpaid interest and additional amounts, if any, if redeemed during the twelve month period beginning on May 15 of the years indicated below:

	Redemption Price	
Year	**2022 Dollar Notes**	**2022 Euro Notes**
2017	104.500%	104.031%
2018	103.000%	102.688%
2019	101.500%	101.344%
2020 and thereafter	100.000%	100.000%

c) 2024 Notes

Prior to May 15, 2017, the Company may, on any one or more occasions, redeem up to 40% of the principal amount of the 2024 Dollar Notes and up to 40% of the principal amount of the 2024 Euro Notes at a redemption price of 106.250% of the principal amount of the 2024 Dollar Notes and 105.625% of the principal amount of the 2024 Euro Notes, plus accrued and unpaid interest and additional amounts, using funds from the net proceeds from one or more specified equity offerings (excluding the Capital Increase) specified in the terms and conditions of the 2023 Notes, provided that at least 60% of the principal amount of the 2024 Dollar Notes and at least 60% of the 2024 Euro Notes remains outstanding after each such redemption and the redemption occurs within 180 days of the specified equity offering.

In addition, prior to May 15, 2019, the Company may, at any occasion, redeem all or part of the 2024 Dollar Notes and/or 2024 Euro Notes, at a redemption price of 100% of the principal amount of the 2024 Dollar Notes and/or 2024 Euro Notes plus a make-whole specified in the issuance agreement plus accrued and unpaid interest and additional amounts, if any.

On or after May 15, 2019, the Company may redeem all or a part of the 2024 Notes at the following redemption prices (expressed as a percentage of the principal amount) plus accrued and unpaid interest and additional amounts, if any, if redeemed during the twelve month period beginning on May 15 of the years indicated below:

	Redemption Price	
Year	**2024 Dollar Notes**	**2024 Euro Notes**
2019	103.125%	102.813%
2020	102.083%	101.875%
2021	101.042%	100.938%
2022 and thereafter	100.000%	100.000%

Redemption for Modifications in Taxes

The Numericable Group may redeem an applicable series of Numericable Senior Secured Notes in whole, but not in part, at any time upon giving proper notice if changes in tax laws impose certain withholding taxes or other deductions on amounts payable on the series of Numericable Senior Secured Notes or the guarantees thereof, at a redemption price of 100% of the principal amount, plus accrued and unpaid interest, if any, and additional amounts, if any, to the redemption date.

Change of Control; Asset Sales

Under the terms of the Numericable Senior Secured Notes, at any time following a Change of Control Triggering Event (as defined in each Indenture), the Company will be required to offer to repurchase each series of Numericable Senior Secured Notes at a price equal to 101% of their aggregate principal amount, plus accrued and unpaid interest, if any, and additional amounts, if any (a "Change of Control Offer"). Noteholders are not required to tender their shares to the offer.

For the purpose of this provision, a "Change of Control" means: (1) the consummation of any transaction (including any merger or consolidation), the result of which is that any person other than one or more permitted holders becomes the beneficial owner, directly or indirectly, of more than 50% of the voting rights attached to shares issued and outstanding of the Company; (2) during any period of two consecutive years, a change in the majority of the members on the board of directors of the Company (including new directors appointed with the recommendation of the majority of the board of directors); (3) the direct or indirect sale, lease, transfer, conveyance or other disposition (other than by way of merger, consolidation or other business combination), in one or a series of related transactions, of all or substantially all of assets of the Company and its restricted subsidiaries taken as a whole to any person (other than a permitted holder (i.e., the ultimate controlling shareholder of Altice S.A. and members of his immediate family, and their respective affiliates and direct and indirect subsidiaries and sponsors, and other entities or funds managed or controlled by these persons or other affiliates)); provided that certain exceptions related to possible disposals likely to be completed in the context of the 2014 SFR Acquisition as part of or in order to obtain authorization for the transaction from the competition authorities, provided that the following conditions are respected in the event the fair market value of any such sold, leased, transferred, conveyed or disposed of assets exceeds 2% of the total assets of Numericable Group and its restricted subsidiaries, (i) the Consolidated Net Leverage Ratio of the Numericable Group and its restricted subsidiaries (on a pro forma consolidated basis, including SFR and its restricted subsidiaries), shall not increase; and (ii) the Company shall promptly make an offer to all lenders under the Numericable Term Loans and to the extent required by any pari passu indebtedness (other than indebtedness that was issued in a registered offering or an underwritten private placement), at a pro rata basis between them, to repay or repurchase at a price equal to 100% of the aggregate principal amount thereof plus accrued and unpaid interest thereon to the date of redemption in an amount equal to the net proceeds of such sale, lease, transfer, conveyance or other disposition and in the event the principal amount of Numericable Term Loans tendered is less than the amount of such net proceeds, the Numericable Group will apply the remainder to prepay the principal amount of Numericable Term Loans at par on a pro rata basis.

"Change of Control Triggering Event" means the occurrence of both a Change of Control (as defined above) and, for so long as Vivendi owns, directly or indirectly, 20% or more of the outstanding common shares of the Numericable Group, a rating decline with respect to the Numericable Senior Secured Notes (if Vivendi no longer owns at least 20% of the Company's outstanding common shares, only a Change of Control need occur for there to be a "Change of Control Triggering Event"). A rating decline means:

- a decrease in the rating of the Numericable Senior Secured Notes of a series by at least one rating agency (S&P and Moody's, or if one of these agencies does not rate the Numericable Senior Secured Notes, another rating agency who rates such notes in lieu of these agencies) by one or more gradations (including gradations within rating categories as well as between rating categories) from its rating on the date which is 90 days prior to the earlier of the Change of Control or public notice of the occurrence of a Change of Control or of the intention of Numericable Group to effect a change of control); or

- the withdrawal of a rating of the Numericable Senior Secured Notes of such series by any of the rating agencies

on, or within 60 days after, the earlier of the date of public notice of the occurrence of a Change of Control or of the intention of the Company to effect a Change of Control (which period shall be extended so long as the rating of the Numericable Senior Secured Notes of such series is under publicly announced consideration by any of the rating agencies).

If no rating agency announces an action with regard to its rating of the Numericable Senior Secured Notes of a series after the occurrence of a Change of Control, the Company must request that each rating agency confirm its rating of the Numericable Senior Secured Notes of such series before the end of such 60 day period.

In addition, if the proceeds received by the Company from certain disposals of assets are not applied or invested or committed to be applied or invested to (i) prepay, repay, purchase or redeem certain indebtedness, (ii) invest in or purchase additional assets, or (iii) make certain capital expenditures, and such excess proceeds exceed US$25 million, after a certain period of time (366 days, or in certain cases, 546 days), the Company will be required to make an asset disposition offer (an “Asset Disposition Offer”) to all holders of Numericable Senior Secured Notes and, to the extent the Company elects or the Company or a Guarantor is required by the terms of other outstanding pari passu indebtedness, to all holders of such other outstanding pari passu indebtedness to purchase the maximum principal amount of Numericable Senior Secured Notes and any such pari passu indebtedness to which the Asset Disposition Offer applies that may be purchased out of the excess proceeds, at an offer price in respect of the Numericable Senior Secured Notes in an amount equal to (and, in the case of any pari passu indebtedness, an offer price of no more than) 100% of the principal amount of the Numericable Senior Secured Notes and 100% of the principal amount of pari passu indebtedness, in each case, plus accrued and unpaid interest.

Events of Default

The Indentures relating to the Numericable Senior Secured Notes contain customary events of default, including, without limitation, payment defaults, covenant defaults, certain cross-default and cross acceleration provisions with respect to mortgages, indentures or other instruments (subject to a US$25 million threshold), certain events of bankruptcy and insolvency, judgment defaults (subject to a US$25 million threshold) and provisions relating to the validity and enforceability of the security of the Numericable Senior Secured Notes (subject to a US$10 million threshold) and provisions relating to the validity and enforceability of the guarantees of the Numericable Senior Secured Notes.

Covenants

The Indentures relating to the Numericable Senior Secured Notes contain covenants for the benefit of the holders of the Numericable Senior Secured Notes that, among other things, limit the ability of Numericable Group or any of its restricted subsidiaries to:

- incur or guarantee additional indebtedness, subject to an incurrence-based Consolidated Net Leverage Ratio (the ratio is 4.0:1 for all debt and 3.25:1.0 for senior secured debt) (see definition below) test;
- make investments (including participations in joint ventures) or other restricted payments (including dividends);
- sell assets other than in the ordinary course of business and sell subsidiary stock;
- engage in certain transactions with affiliates;
- merge or consolidate with other entities;
- redeem or reimburse in anticipation equity securities or subordinated debt, or issues shares of its subsidiaries;
- enter into agreements that restrict the payment of dividends by subsidiaries or the repayment of intragroup loans and advances; and
- grant additional security or pledges.

These limitations are, however, subject to a number of important qualifications and exceptions customary for this type of contract, including the ability to issue new indebtedness so long as the Consolidated Net Leverage Ratio (pro forma for such transaction and as defined below) is not greater than 4.0 to 1.0. In particular, if following the 2014 SFR Acquisition, the Consolidated Net Leverage Ratio is not superior to 4.0:1.0, the Combined Numericable Group will be able to incur additional indebtedness. In addition, this new indebtedness may be secured if the Consolidated Net Senior Secured

Leverage Ratio (pro forma for such transaction) is not greater than 3.25 to 1.0. In particular, if, following the 2014 SFR Acquisition, the Consolidated Net Leverage Ratio is not superior to 4.0:1.0, the Combined Numericable Group (after the 2014 SFR Acquisition) will be able to incur additional indebtedness, subject to the aforementioned ceiling.

"Consolidated Net Leverage Ratio" means, as of any date of determination, the ratio of

- Consolidated Net Leverage ((A) the sum, without duplication, of the aggregate outstanding indebtedness of the Company and its restricted subsidiaries on a consolidated basis (excluding hedging obligations and indebtedness incurred under a credit facility up to the greater of € 750 million and 4.0% of total assets) less (B) the aggregate amount of cash and cash equivalents of Numericable Group and its restricted subsidiaries on a consolidated basis); to

- the aggregate amount of pro forma consolidated EBITDA for the period of the most recent two consecutive quarters ending prior to the date of such determination for which internal financial statements of EBITDA are available multiplied by 2.0.

"Consolidated Net Senior Secured Leverage Ratio" is calculated in the same manner as the "Consolidated Net Leverage Ratio", provided that it is calculated with respect to "senior secured indebtedness" rather than "indebtedness". Under the Indentures, senior secured indebtedness includes indebtedness secured by liens as well as indebtedness that is outstanding on May 8, 2014, indebtedness under the Numericable Term Loan Agreement and 2014 Numericable Group Revolving Credit Facility, indebtedness of restricted subsidiaries on the date these entities become restricted subsidiaries and indebtedness permitted to be incurred under the Indentures by certain basket provisions or based on reference to net proceeds from certain equity or subordinated shareholder funding issuances.

The definitions of "indebtedness" and "EBITDA" are those included in the Indentures and are different from those used in the Numericable Group's financial statements included in included elsewhere in these Listing Particulars.

Numericable Term Loan Agreement

Overview

As described above, on May 8, 2014, Numericable, Ypso France and Numericable U.S. LLC (the "Numericable Term Loan Borrowers") entered into a senior secured term loan credit facility providing euro and U.S. dollar term loans in an aggregate principal amount equivalent to up to € 3,780 million (euro equivalent), with the Numericable, Ypso France and Numericable U.S. LLC as borrowers, certain lenders party thereto, Deutsche Bank AG, New York Branch as the dollar administrative agent and Deutsche Bank AG, London Branch as the euro Administrative Agent and as the Security Agent (the "Numericable Term Loan Agreement", and the loans made thereunder, the "Numericable Term Loans"). The Numericable Term Loan Agreement permitted the Numericable Term Loan Borrowers to draw term loans up to the committed principal amount until April 30, 2015. As described above, the proceeds of the Numericable Term Loans were used to finance the 2014 Numericable Refinancing Transactions and certain related fees and expenses, and the remainder was placed in escrow until completion of the 2014 SFR Acquisition, with such amounts being released from escrow on November 27, 2014.

On May 21, 2014, the following drawdowns were made under the Numericable Term Loan Agreement: Numericable borrowed €635 million, Numericable U.S. LLC borrowed US$2,600 million and Ypso France borrowed €1,265 million.

As of the date of these Listing Particulars, the Numericable Term Loan Agreement is fully drawn.

Interest Rate and Fees

The U.S. dollar amounts drawn down under the Numericable Term Loan Agreement bear interest at a rate per annum equal to (i) the higher of (a) a LIBOR rate for the interest period relevant to such borrowing adjusted for certain additional costs and (b) 0.75% and (ii) a margin of 3.75%.

The euro drawdowns under the Numericable Term Loan Agreement bear interest at a rate per annum equal to (i) the higher of (a) a EURIBOR rate for the interest period relevant to such borrowing adjusted for certain additional costs and (b) 0.75% and (ii) a margin of 3.75%.

Interest on overdue principal and interest will accrue at a rate that is 2.00% higher than the otherwise applicable interest rate.

Escrow

€160 million and US$1,206 million were drawn down under the Numericable Term Loan Agreement on May 21, 2014 but not used in the 2014 Numericable Refinancing Transactions and have been deposited into escrow accounts (the "Numericable Term Loan Escrow Accounts") in accordance with the terms of a term loan escrow agreement. The funds deposited in the Numericable Term Loan Escrow Accounts were released on November 27, 2014.

Amortization and Final Maturity

Numericable is required to make scheduled quarterly payments each equal to 0.25% of the original principal amount of the Numericable Term Loan Agreement, with the balance due on May 21, 2020. The first payment will take place at the end of the first full quarter after November 27, 2014.

Mandatory Prepayments

In the event that Numericable or any of its subsidiaries sells, leases, transfers, conveys, or disposes of assets, the fair market value of which exceeds 2.00% of the pro forma amount of total assets of Numericable and its restricted subsidiaries but the Change of Control provisions under the Numericable Senior Secured Notes are not triggered due to contractually provided exceptions (see "*—Numericable Senior Secured Notes—Change of Control; Asset Sales*" above), the Numericable Term Loan Borrowers will be required to promptly make an offer to all lenders under the Numericable Term Loans and to the extent required by any pari passu indebtedness (other than indebtedness that was issued in a registered offering or an underwritten private placement), on a pro rata basis between them, to redeem, at a price of 100% of the principal amount thereof plus accrued and unpaid interest thereon to the date of redemption, an amount equal to the net proceeds of such sale, lease, transfer, conveyance or other disposition. In the event that the principal amount of Numericable Term Loans tendered is less than the amount of such net proceeds, Numericable will apply the remainder to prepay the Numericable Term Loans at par on a pro rata basis.

In addition, if the proceeds received by Numericable from certain disposals of assets are not applied or invested or committed to be applied or invested to (i) prepay, repay, purchase or redeem certain indebtedness, (ii) invest in or purchase additional assets, or (iii) make certain capital expenditures, and such excess proceeds exceed a certain threshold, Numericable will be required to make an Asset Disposition Offer as described under "*—Numericable Senior Secured Notes—Change of Control; Asset Sales*" of these Listing Particulars.

Commencing with the year ending December 31, 2015, the Numericable Term Loan Agreement also requires the Numericable Term Loan Borrowers to prepay outstanding term loans thereunder, subject to certain exceptions, with 50% of Numericable's annual excess cash flow, which percentage will be reduced to 0% if the Numericable's Consolidated Net Leverage Ratio is less than 4.0:1.0.

Voluntary Prepayments or Amendments to Reduce Yield on Loan

The Numericable Term Loan Borrowers have the right to prepay borrowings under the Numericable Term Loan Agreement at any time and from time to time, in whole or in part; provided however that the Numericable Term Loan Borrowers commit to indemnify each Lender against any loss or expense incurred due to a prepayment prior to the end of an interest period.

Security and Guarantees

Prior to on November 27, 2014, the Numericable Term Loan Agreement:

- is guaranteed on a senior basis by the Completion Date Guarantors; and
- benefits from senior pledges over all of the capital stock of the Completion Date Guarantors; certain intragroup loans being entered into in connection with the transactions, the business (fonds de commerce) of NC Numericable SAS; certain bank accounts and intellectual property rights of the Completion Date Guarantors.

Within 90 days of November 27, 2014, the Numericable Term Loan Agreement will be:

- guaranteed on a senior basis by SFR and any Post-Completion Date Guarantors; and
- will benefit from senior pledges over all of the capital stock of SFR (excluding 10 shares) and any of its subsidiaries that become Post-Completion Date Guarantors; a senior pledge over certain bank accounts of SFR; a senior pledge

over the business (fonds de commerce) (including intellectual property) of SFR; and senior pledges over receivables owed to SFR by certain of its subsidiaries.

Certain Covenants

The Numericable Term Loan Agreement includes negative covenants that substantially reflect the covenants contained in the Indentures for the Numericable Senior Secured Notes, and among other things and subject to certain significant exceptions and qualifications, limit the ability of Numericable Group and its restricted subsidiaries to: (i) incur or guarantee additional indebtedness subject to an incurrence-based Consolidated Net Leverage Ratio test, (ii) make investments or other restricted payments (including dividends), (iii) create liens, (iv) sell assets and subsidiary stock, (v) pay dividends or make other distributions or repurchase or redeem shares constituting capital stock or subordinated debt, (vi) engage in certain transactions with affiliates, (vii) enter into agreements that restrict the payment of dividends by subsidiaries or the repayment of intercompany loans and advances; and (viii) engage in mergers or consolidations.

The Numericable Term Loan Agreement also contains certain customary representations and warranties, as well as customary covenants.

Events of Default

The Numericable Term Loan Agreement contains customary events of default, including, without limitation, payment defaults, covenant defaults, certain cross-defaults (subject to a €20 million threshold), certain events of bankruptcy and insolvency, judgment defaults (subject to a €20 million threshold) and provisions relating to the validity and enforceability of the loan documents (including the collateral (subject to a €10 million threshold)) and the guarantees and the occurrence of a Change of Control Triggering Event. If an event of default occurs, the lenders under the Numericable Term Loan Agreement will be entitled to take various actions, including the acceleration of amounts due under the Numericable Term Loan Agreement and all actions permitted to be taken by a secured creditor, subject to the 2014 Numericable Group Intercreditor Agreement.

The 2014 Numericable Group Revolving Credit Facilities Agreement

Numericable and certain of its subsidiaries have entered into the 2014 Numericable Group Revolving Credit Facilities Agreement pursuant to which certain lenders party thereto (the “Numericable RCF Lenders”) have agreed to provide Numericable and certain of its subsidiaries with a €750 million senior secured revolving facility (the “Numericable Group Revolving Facilities”) composed of: (i) a €300 million revolving facility (the “Numericable Facility A”) available from May 21, 2014; and (ii) a €450 million revolving facility (the “Numericable Facility B”), available from November 27, 2014. SFR also has access to these revolving credit facilities after November 27, 2014.

Limitations on Use of Funds

The Numericable Group Revolving Facilities may be used by Numericable and certain of its subsidiaries to finance its activities and as working capital for Numericable and its subsidiaries (the “Numericable Borrower Group”).

Conditions to Drawdowns

A drawdown under the 2014 Numericable Group Revolving Credit Facilities Agreement cannot be made until, among other things, the facility agent has received (or waived) certain customary conditions precedent, documents and evidence in form and substance reasonably satisfactory to it. Drawdowns are subject to further customary conditions including, among other things, that on the date the drawdown is requested and on the drawdown date (i) no default, or event of default in the case of a rollover loan, is continuing or occurring as a result of that drawdown, (ii) certain specified representations and warranties are true in all material respects and (iii) that the Consolidated Net Senior Secured Leverage Ratio is not greater than the specified ratio, pro forma for such drawdown (see “—*Financial Covenants*” below).

Interest Periods, Interest Rates and Fees

Numericable and certain of its subsidiaries are permitted to make a specified number of drawdowns under each 2014 Numericable Group Revolving Credit Facility for terms of one, two, three or six months (or any other period agreed to by Numericable and the facility agent), but no such period shall end beyond the final maturity date of the 2014 Numericable Group Revolving Credit Facilities Agreement. Drawdowns under the 2014 Numericable Group Revolving Credit Facilities must be repaid at the end of the interest period for the relevant loan and repaid amounts may be re borrowed up to one month prior to the final maturity date.

The interest rate on each loan under the 2014 Numericable Group Revolving Credit Facilities Agreement for each interest period is equal to the aggregate of: (x) the applicable margin and (y) EURIBOR. The margin under the 2014 Numericable Group Revolving Credit Facilities Agreement is 3.25% prior to any cancellation of the Numericable Facility B pursuant to certain automatic cancellation events (each a "Numericable Facility B Cancellation Event") and 3.50% per annum after the occurrence of a Numericable Facility B Cancellation Event. Interest accrues daily from and including the first day of an interest period and is payable on the last day of each interest period.

With respect to amounts under the 2014 Numericable Group Revolving Credit Facilities Agreement, Numericable is obligated to pay a commitment fee on the available undrawn amounts at the rate of 40% of the margin calculated on undrawn and un cancelled commitments from June 8, 2014 until one month prior to the final maturity date of the 2014 Numericable Group Revolving Credit Facilities Agreement.

Repayment

The final maturity date of the 2014 Numericable Group Revolving Credit Facilities Agreement is fixed at May 21, 2019.

Automatic Cancellation

Customary partial or total cancellation events apply to the 2014 Numericable Group Revolving Credit Facilities, including where it becomes unlawful for any Numericable RCF Lender to fund, issue or maintain its participation in the 2014 Numericable Group Revolving Credit Facilities.

The Numericable Facility A may be permanently cancelled in part at the option of the lenders if a Numericable Facility B Cancellation Event occurs provided that the aggregate amount of Numericable Facility A following any cancellation will not be less than €150 million.

Mandatory Prepayment

Upon the occurrence of a Change of Control Triggering Event, Numericable and the other borrowers thereunder must repay the 2014 Numericable Group Revolving Credit Facilities in full together with accrued interest and all other amounts due under related finance documents and the 2014 Numericable Group Revolving Credit Facilities will be cancelled.

Certain proceeds received by Numericable from certain disposals of assets must be applied in prepayment of the 2014 Numericable Group Revolving Credit Facilities if they are not applied or invested or committed to be applied or invested to (i) prepay, repay, purchase or redeem certain indebtedness, (ii) invest in or acquire additional assets or (iii) make certain capital expenditures.

Guarantees

Each of the Guarantors of the Numericable Senior Secured Notes and Numericable have also guaranteed the obligations of each obligor under the 2014 Numericable Group Revolving Credit Facilities Agreement and related finance documents, subject to applicable guarantee limitations specified therein.

Security and Guarantees

The 2014 Numericable Group Revolving Credit Facilities are guaranteed and secured by the same entities and collateral as the Numericable Term Loan Agreement.

Representations and Warranties

The 2014 Numericable Group Revolving Credit Facilities Agreement contains representations and warranties customary for facilities of this type, subject to certain exceptions and customary thresholds.

Undertakings

The 2014 Numericable Group Revolving Credit Facilities Agreement contain certain restrictive covenants which substantially reflect the covenants contained in the Indentures.

The 2014 Numericable Group Revolving Credit Facilities Agreement also requires Numericable and the Numericable Borrower Group to observe certain general undertakings subject to materiality conditions and other customary and agreed exceptions.

Financial Covenants

Following November 27, 2014, the 2014 Numericable Group Revolving Credit Facilities Agreement will require Numericable and the Numericable Borrower Group to maintain a Consolidated Net Senior Secured Leverage Ratio of no more than 4.00:1.00, only to be tested at each drawdown or to the extent there are loans or bank guarantees outstanding under the 2014 Numericable Group Revolving Credit Facilities Agreement at the end of each financial quarter.

Events of Default

The 2014 Numericable Group Revolving Credit Facilities Agreement provides for certain events of default (which are substantively similar to those included in the Indentures), the occurrence of which, subject to certain exceptions and thresholds, will allow the lenders party thereto to: (i) cancel the total commitments; (ii) declare the occurrence of default and accelerate all outstanding loans together with other all amounts due and/or (iii) declare that all or part of the loans be repayable on demand. The proceeds of any enforcement of security will be applied in accordance with the 2014 Numericable Group Intercreditor Agreement.

Hedging Obligations

On April 23 and 28, 2014, Numericable entered into various swap agreements with Goldman Sachs International. On May 1, 2014, Numericable and Goldman Sachs International transferred (by novation) a certain number of swap agreements to various prominent international banks. See "—*Qualitative and Quantitative Analysis of Market Risk*" of these Listing Particulars for a discussion of the Numericable Group's exposure to exchange rate and interest rate risks under these swap agreements.

Swap Agreements Relating to U.S. Dollar Amounts in Escrow

Numericable entered into cross-currency swap agreements covering the euro/U.S. dollar exchange rate risk related to the net U.S. dollar proceeds of the Numericable Senior Secured Notes and Numericable Term Loans placed into escrow (i.e., US$7,775 million of net proceeds from the Dollar Senior Secured Notes and US$1,170 million of net proceeds under the Numericable Term Loan), given that the price of the 2014 SFR Acquisition was paid entirely in euros to Vivendi. Pursuant to these swaps, just prior to November 27, 2014, Numericable paid US$8,809 million to the swap counterparties (using the amounts released from escrow) and received € 6,371 million from the swap counterparty, based on an exchange rate of €1.00 = US$1.3827. The difference between the amounts placed in escrow accounts and the amounts paid to the counterparties corresponded to the engagement commissions and OIC on the Numericable Senior Secured Notes and the drawdowns under the Numericable Term Loan Agreement.

5 to 8 Year Swap Agreements Relating to Interest and Principal Payments To Be Made in U.S. Dollars

Numericable also entered into swap agreements to hedge the euro/dollar exchange rate risk related to the interest payments to be made in U.S. dollars with respect to the Dollar Senior Secured Notes and the U.S. dollar drawdowns under the Numericable Term Loan. Pursuant to these swap agreements, Numericable will swap euro amounts for the U.S. dollar amounts to be paid on each semi-annual or quarterly interest payment date, based on an exchange rate of €1.00 = US$1.3827.

The swap agreements with respect to the Dollar Senior Secured Notes cover interest payments starting with the first semi-annual interest payments to be made on August 15, 2014 and ending with the last payment to be made on May 15, 2019 with respect to the 2019 Dollar Notes and May 15, 2022 with respect to the 2022 Dollar Notes and the 2024 Dollar Notes. The swap agreements with respect to the U.S. dollar drawdowns under the Numericable Term Loan Agreement cover interest payments starting with the first quarterly payments to be made on July 30, 2014 and ending with the last payment to be made on May 21, 2019.

With these swap agreements, the Company also hedged the principal amount of its Dollar Senior Secured Notes and Numericable Term Loan agreements. On May 15, 2019, Numericable will pay €1,736 million and will receive US$2,400 million corresponding to the principal of the 2019 Notes and will pay €870 million and will receive US$1,203 million corresponding to the principal of the Numericable Term Loan Agreement, even though it is due in May 2020. On May 15, 2022, Numericable will pay €2,893 million and receive US$4,000 million, corresponding to the principal amount of the Dollar 2022 Notes, and will pay €994 million and receive US$1,375 million, corresponding to the principal amount of the Dollar 2024 Notes, even though these are due in May 2024.

Importantly, Numericable's counterparties to the swap agreements benefit from an early termination right after 5 years for the 8-year agreements, i.e. those relating to the principal and interest of the Dollar 2022 Notes and the Dollar 2024 Notes. The counterparties can unilaterally denounce the swap agreements three years before they reach maturity and, according to the market conditions at the time, pay Numericable or have Numericable pay the market value of the swap agreements.

Swap Agreements with respect to Interest Payments Based on LIBOR

In addition to the objectives of hedging the euro/dollar exchange rate risk related to the interest payments to be made in U.S. dollars under the Numericable Term Loan Agreement, the swap agreements also convert Numericable's LIBOR exposure under the U.S. dollar drawdowns of the Numericable Term Loan Agreement into EURIBOR exposure. The Numericable Group's risk is, however, not entirely hedged as the U.S. dollar drawdowns under the Numericable Term Loan Agreement bear interest at LIBOR plus a margin, subject to a floor of 0.75% on LIBOR, while the swap agreements do not include a floor.

The swap agreements with respect to the U.S. dollar drawdowns under the Numericable Term Loan Agreement cover interest payments starting with the first quarterly payments to be made on July 30, 2014 and ending with the last payment to be made on May 21, 2019.

Security and Guarantees

The swap agreements described above are guaranteed and secured by the same entities and collateral as the Numericable Term Loan Agreement.

Perpetual Subordinated Notes

In 2006, one of the Numericable Group's subsidiaries, NC Numericable S.A.S., issued €23.65 million principal amount of perpetual subordinated notes (Titres Subordonnés à Durée Indéterminée) ("TSDI") to Vilorex, a subsidiary of GDF Suez (excluding capitalized interest). The proceeds of the TSDI have been earmarked for financing the construction of plugs in towns located in SIPPEREC's southern hub (Syndicat Intercommunal de la Périphérie de Paris pour l'Electricité et les Réseaux de Communication). The TSDI bear interest at 7% per annum. Interest is capitalized, and accrued interest on the loan amounted to €14.0 million as of December 31, 2013. The TSDI were issued for an indefinite term, and are repayable in case of the liquidation or dissolution of NC Numericable S.A.S. as well as upon NC Numericable S.A.S. achieving a specified level of revenues with respect to the customers covered by the connectors. Such triggers have not been reached since the TSDI issue date. NC Numericable S.A.S. may elect to prepay all or part of the TSDI upon ten days' notice.

Finance Leases

In November 2013, NC Numericable and Completel concluded a general finance lease with BNP Paribas Rental Solution relating to the purchase and the subsequent lease of various equipment provided by telecom equipment providers such as Huaweï, Alcatel or others (aside from Cisco) for a three-year term.

In May and June 2013, NC Numericable S.A.S. entered into a sale-and-leaseback transaction, for a period of 36 months, with respect to LaBox set-top boxes with Lease Expansion for €12.7 million and €5.9 million, respectively.

The Numericable Group entered into a general lease agreement with Cisco in January 2011, which covers most equipment the Numericable Group sources from Cisco (consisting primarily of data network parts and CPEs, such as servers), with a lease term of 3 years.

In 2001, NC Numericable S.A.S. entered into a finance lease with a 15-year term with respect to an office building located in Champs-sur-Marne. The Numericable Group has an option to purchase the property at the end of the lease term at a price that is expected to be sufficiently lower than the fair value at the date the option becomes exercisable.

In addition, several companies of the Numericable Group have entered into various finance leases with respect to real property (for terms generally between 20 and 30 years) and office equipment (typically for terms of four years).

All leases are denominated in euros. Certain property lease arrangements specify that at the beginning of the lease the annual payments will be set at a fixed amount, but in future years will be increased by the rate of inflation (equal to a specific percentage increase).

As of December 31, 2013, the Numericable Group's total liability (present value of minimum lease payments) under finance leases amounted to €41.5 million. The average effective interest rate on finance leases was approximately 3.96% for the year ended December 31, 2013 compared to 3.24% for the year ended December 31, 2012. This increase in the average rate is essentially explained by the cost of the new financing entered into with Lease Expansion (see above). See Note 30.2 to the Numericable Group's financial statements included elsewhere in this offering document.

Security Deposits Received from Customers

Security deposits received from customers amounted to €51.9 million and €44.5 million as of December 31, 2013 and 2012, respectively. These deposits are made when customers receive equipment from the Numericable Group. The increase in the amount of deposits from December 31, 2012 to December 31, 2013 reflects the increase in deposits paid by customers for LaBox due to increased subscriptions for services that include LaBox. Customer deposits are reimbursed when customers terminate their subscriptions, on condition that the customers have paid any outstanding invoices and have returned the equipment. The guarantee deposits are recorded in the balance sheet as items due within more than one year.

Other Financial Liabilities

Shareholder Financing

All of the shareholder financings provided to the Numericable Group were redeemed or capitalized at the time of the initial public offering of Numericable Group and of the contributions made to the latter. In particular 132,664,023 subordinated interest preferred equity certificates (the "Super PECs") issued by Ypso Holding S.à r.l., with a nominal value of one euro each, were contributed by Cinven, Carlyle and Altice to Numericable Group on November 7, 2013 in connection with the transactions relating to its initial public offering. As a result, this debt was retired, and newly issued equity securities were delivered in consideration. As at December 31, 2013, no shareholder loans were outstanding.

Shareholders' Equity

As of December 31, 2013, the Company's shareholders' equity totalled € 253.4 million, compared to negative shareholders' equity of €287.3 million as of December 31, 2012. This increase reflects the transactions that occurred before and following the Company's initial public offering and in particular the following transactions:

- the contribution of Ypso Holding S.à.r.l and Altice B2B Luxembourg S.à.r.l to Numericable Group, resulting in a capital increase of € 1,995.5 million;
- the capital increases carried out within the framework of the Company's initial public offering (public offering of €250 million and offer reserved for employees of €1 million), net of €14.6 million in expenses incurred in connection with the initial public offering that were deduced from the issuance premium (these amounts have been accounted for without any income tax effect);
- costs of stock option plans granted to certain corporate officers and employees of the Numericable Group on November 7, 2013; and
- extinguishment of debts to shareholders within the framework of contributions made to Numericable Group prior to the initial public offering (Super PECs).

As of September 30, 2014, the Company's shareholders' equity totalled negative €51.5 million, compared to shareholders' equity of € 253.4 million as of December 31, 2013. This change reflects the following:

- the negative comprehensive income of €306.4 million in the first nine months of 2014;
- costs of stock option plans granted to certain corporate officers and employees of the Numericable Group in January 2014. €3.2 million was recorded in the income statement for the period; and
- the impact of the program to buy back treasury shares implemented during the nine-month period ended September 30, 2014.

Presentation and Analysis of the Main Categories of Use of the Numericable Group's Cash

Capital Expenditures

The Numericable Group classifies its capital expenditures in the following categories:

- Network: investments in improving, renovating, upgrading capacity, expanding and maintaining the Numericable Group's network (fiber, backbone and DSL), directly or, in the case of certain network upgrades, through public-private partnerships;

- Customers: capital expenditures linked to in-home B2C and on-site B2B equipment (high-speed routers and TV decoders) as well as in-home wiring for new B2C clients and the creation of fiber links between B2B sites;

- Service Platforms: investment in television and fixed-line telephony platforms; and

- Other: capital expenditures in connection with wholesale projects, as well as miscellaneous investments.

The Numericable Group's capital expenditures in 2012, 2013 and the nine-month period ended September 30, 2014 amounted to €285.6 million, €319.8 million and €250.0 million, respectively. For additional information regarding the Numericable Group's historical, ongoing and planned future capital expenditures, see "—*Capital Expenditures*").

Interest Payments and Debt Repayments

The Numericable Group made interest payments of €152.1 million and €180.6 million, respectively in 2012 and 2013. It also made debt repayments of €957.2 million and €987.4 million, respectively in 2012 and 2013. The high level of debt repayments in 2012 reflects the Numericable Group's refinancing of its debt in such year, in which it issued €831.0 million of new debt. Similarly, the high level of debt repayment in 2013 reflects the repayments of the Altice B2B France Sub-Numericable Group's debts, the Floating Rate Notes and 35% of the Fixed Rate Notes with the proceeds of the capital increase following the initial public offering and implementation of Facility D.

In the nine-month period ended September 30, 2014, the Numericable Group made interest payments of €282.6 million, representing a significant increase compared to the nine-month period ended September 30, 2013 when interest paid amounted to €135.3 million. This increase is due to the increase in the Numericable Group's debt to finance the 2014 SFR Acquisition and for which the amounts are in escrow accounts, and the low financial income paid with respect to the escrow accounts compared to the cost of the debt.

For information, the first payment date for interest on the Numericable Senior Secured Notes (which is payable in cash semi-annually on February 15 and August 15 of each year) was August 15, 2014 (interest for this first interest period corresponded to a period of less than six months). The Numericable Group made the following payments on August 15, 2014:

- with respect to the Dollar Senior Secured Notes: US$119.3 million (after conversion pursuant to the swap agreements, the amount in euros was €74.9 million);

- with respect to the Euro Senior Secured Notes: €33.4 million.

Financing of Working Capital Requirements

Working capital requirements primarily correspond to the value of inventory plus trade receivables and other receivables minus trade payables and other payables. Structurally, the Numericable Group's working capital requirements reflect differences in its business. In the B2C segment, the Numericable Group releases working capital because its B2C customers have shorter payment terms (generally 5 days) than its suppliers (generally 60 days), while in the B2B segment, the Numericable Group consumes working capital because its B2B customers have longer payment terms. The Numericable Group generally finances its working capital requirements through its cash flow from operations.

In 2012, the Numericable Group generated €31.9 million of working capital. In 2013, the Numericable Group consumed €20.7 million of working capital. In the nine-month period ended September 30, 2014, the Numericable Group consumed €7.5 million of working capital.

Contractual Obligations

The table below sets out the Numericable Group's contractual commitments and obligations as of September 30, 2014, excluding in particular future interest and commitments relating to employee benefits and equivalent commitments.

€ thousands	< 1 year	Maturity 1 - 5 years	> 5 years	Total September 30, 2014
Loans and financial liabilities	177.1	1,844.6	10,033.6	12,055.3
Operating lease arrangements	9.9	31.4	9.0	50.4

Total	187.0	1,876.0	10,042.6	12,105.7

A table showing debt owing under the Numericable Term Loan and the Numericable Senior Secured Notes as of September 30, 2014, is included in "*Management's Discussion and Analysis of Financial Condition and Results of Operations of Numericable Group—Qualitative and Quantitative Analysis of Market Risk—Liquidity Risk*" of these Listing Particulars.

The amount on the line "operating lease obligations" corresponds to the amount of the minimum payments due under operating lease agreements that cannot be cancelled by the lessee. They mainly correspond to property and vehicle lease commitments as well as operating leases of TV programs. Leases involving equipment and network IRU (usage rights on local loop, backbone) or other rental contracts (rights of way) were not individually considered material.

The Numericable Group has also committed to build 75,000 connectors for a total amount of €4.5 million on behalf of the city of Le Havre, France. In addition, through its subsidiary Sequalum, the Numericable Group has committed, subject to certain conditions, to deploy 2,600 km of fiber cables and reach 827,900 apartments and offices in the Hauts-de-Seine department. See "*Description of Our Business—Products and Services—Business-to-Business Services—Infrastructure Wholesale Services*" and
"*—Capital Expenditures*" in these Listing Particulars for a description of investments in DSP 92. Legal proceedings are currently ongoing over the termination of the DSP 92 contract. See "*Description of Our Business—Legal Proceedings—Dispute Settlement Proceedings Concerning the DSP 92*".

To operate telecommunications networks, the Numericable Group needs licenses, authorizations or usage rights to infrastructure in the public and private domain. Consequently, the Numericable Group generally pays fees to the public administration in charge of managing the infrastructure (local authorities) or to the owners. In the course of its normal business activities, the Numericable Group has also entered into outsourcing contracts, particularly for certain network maintenance services.

In 2010, the Numericable Group entered into long-term MVNO agreements for voice and data transmission with Bouygues Télécom, pursuant to which the Numericable Group provides mobile telephony services to B2C customers under the Numericable Group's own brand but through the nationwide network of Bouygues Télécom, pursuant to which the Numericable Group is obligated to pay a flat fee corresponding to a minimum level of consumption. See "*Description of our Business—Material Contracts—MVNO Agreements*".

The Numericable Group has also entered into certain operating leases, including property and vehicle leases, leases involving equipment and network IRUs and operating leases and agreements to purchase TV programs. See Note 29 to the Numericable Group's consolidated financial statements included elsewhere in these Listing Particulars.

Undertakings given with respect to the 2014 SFR Acquisition

In connection with the completion of the 2014 SFR Acquisition, the Numericable Group was required to pay the banking fees related to debt that was drawn but not yet used for a total amount of €173 million. As explained in Note 2.3 to the nine months financial statements, the costs linked to securing the bonds, bank loans and the RCF are recognized at amortized cost using the effective interest method in conformity with IAS 39, and are thus spread over the maturity of the debt.

The Numericable Group was also be required to pay certain minor related fees (€6 million) in connection with the completion of the 2014 SFR Acquisition.

Security and Guarantees

The security and guarantees given with respect to the Numericable Senior Secured Notes, Numericable Term Loans and 2014 Numericable Group Revolving Credit Facilities are above in "—Financial Liabilities".

Cash Flows

The table below summarizes the Numericable Group's cash flows for the years ended December 31, 2011, 2012 and 2013 and the nine months ended September 30, 2013 and 2014.

	For the year ended December 31,			**For the nine months ended September 30,**	
(in € thousands)	**2011**	**2012**	**2013**	**2013**	**2014**
				(Unaudited)	
Net cash provided by operating activities	577,127	530,960	570,279	414,422	365,859

Net cash used by investing activities	(237,652)	(285,217)	(342,657)	(204,023)	(9,142,491)
Net cash used by financing activities	(489,705)	(278,327)	(134,253)	(197,494)	8,689,444
Total net increase (decrease) in cash and cash equivalents	**6,027**	**(32,584)**	**93,369**	**12,905**	**(87,188)**

Net cash provided by operating activities

The table below summarizes the Numericable Group's combined net cash provided by operating activities for the years ended December 31, 2011, 2012 and 2013 and the nine months ended September 30, 2013 and 2014.

	For the year ended December 31,			For the nine months ended September 30,	
(in € thousands)	**2011**	**2012**	**2013**	**2013**	**2014**
Cash flow from operations before changes in working capital and income tax	570,651	566,213	553,918	425,711	350,538
Changes in working capital	5,392	(31,911)	20,653	(7,468)	16,818
Income tax paid	1,083	(3,342)	(4,292)	(3,821)	(1,497)
Net cash provided by operating activities	**577,127**	**530,960**	**570,279**	**414,422**	**365,859**

Cash flow from operations before changes in working capital, interest paid and income tax

Cash flow from operations before changes in working capital and income tax decreased by €4.5 million, or 0.8%, from a cash inflow of €570.7 million in the year ended December 31, 2011 to a cash inflow of €566.2 million in the year ended December 31, 2012. This decrease was driven by a €22.8 million increase in other financial expenses, reflecting fees incurred in connection with the refinancing of part of Ypso's debt in 2012 (including the issuance of the Senior Secured Notes, the establishment of new credit facilities and amendments to, and extension of the maturity of, the Ypso France Senior Facility Agreement), partially offset by a €15.9 million increase in net income from continuing operations resulting from a €27.5 million increase in EBITDA.

Cash flow from operations before changes in working capital, interest paid and income tax decreased by €12.2 million, or 2.2%, from a cash inflow of €566.2 million in the year ended December 31, 2012 to a cash inflow of €553.9 million in the year ended December 31, 2013. This decrease was driven by an increase in other financial expenses, resulting from the premiums paid in connection with early repayment of the Senior Secured Notes, compounded by a decrease in Adjusted EBITDA of €5 million.

Cash flow from operations before changes in working capital, interest paid and income tax decreased by €75.2 million, from a cash inflow of €425.7 million for the nine months ended September 30, 2013 to a cash inflow of €350.5 million for the nine months ended September 30, 2014. This sharp decrease was primarily the result of the €89.0 million make-whole payment in May 2014.

Change in working capital requirements

In 2011 and 2012, the Numericable Group made an exceptional working capital investment, related to the termination of a free share plan of Completel Europe NV, which resulted in exceptional cash outflows of €32.8 million in 2011 and €16.4 million in 2012. The free share plan involved grants of free shares for which the pricing and therefore the amount of liabilities were determined in 2009 and recorded in current liabilities. In 2011 and 2012, the Numericable Group made cash payments to the holders to terminate the plan, resulting in the exceptional cash outflows.

The change in working capital requirements represented a cash inflow of €5.4 million in the year ended December 31, 2011. Excluding the outflow related to the termination of the free share plan, the Numericable Group would have recorded a cash inflow of €38.2 million in 2011.

The change in working capital requirements represented a cash outflow of €31.9 million in the year ended December 31, 2012, compared to a cash inflow of €20.7 million in the year ended December 31, 2013. By excluding the cash outflow related to the termination of the free share plan (€16.4 million), the Numericable Group would have recorded a cash outflow limited to €15.5 million in 2012. The year ended December 31, 2012 was exceptional for the change in working capital requirements due to increased subscriber acquisition costs resulting from a larger client base.

The change in working capital requirements represented a cash inflow of €16.8 million for the nine months ended September 30, 2014 and a cash outflow of €7.5 million for the nine months ended September 30, 2013, resulting from the increase of net capital expenditures. The Numericable Groups generally realizes cash inflows from B2C customers in 30 days while its suppliers are paid in 60 days. This difference in payment terms caused the improvement in working capital requirements.

Income tax paid

Income tax paid represented a cash outflow of €0.9 million in 2012, compared to a cash inflow of €1.1 million in 2011, primarily as a result of the increased tax burden on French corporations in 2012 as well as a new limitation on usage of tax loss carryforwards, and the first taxable profits at the level of Altice B2B France. The Ypso group also had a negative taxable result in 2012 due in particular to fees in relation to the various 2012 refinancings.

Income tax paid represented a cash outflow of €4.3 million in 2013, compared to a cash outflow of €3.3 million in 2012, primarily as a result of the increased taxable profits at the level of the Altice B2B France sub-group. The Ypso Sub-Numericable Group continued to produce a negative taxable result in 2013 as a result of the listing of the group head, amendments to the SFA and the 2013 refinancing.

Income tax paid represented a cash outflow of €3.8 million in the nine-month period ended September 30, 2013, as compared to a cash outflow of €1.5 million in the nine-month period ended September 30, 2014. This difference was due to the one-off expenses incurred to finance the 2014 SFR Acquisition as well as early repayment fees, which had a strong negative effect on income before taxes.

Net cash used by investing activities

The table below summarizes the Numericable Group's net cash provided (used) by investing activities for the years ended December 31, 2011, 2012 and 2013 and the nine months ended September 30, 2013 and 2014.

	For the year ended December 31,			For the nine months ended September 30,	
(in € thousands)	**2011**	**2012**	**2013**	**2013**	**2014**
				(Unaudited)	
Net capital expenditures	(237,694)	(281,771)	(314,752)	(200,773)	(246,449)
Escrow accounts	—	—	—	—	(8,893,932)
Net financial investments	41	(3,446)	(27,905)	(3,250)	(2,110)
Net cash (used) by investing activities	**(237,652)**	**(285,217)**	**(342,657)**	**(204,023)**	**(9,142,491)**

Net capital expenditures

Net capital expenditures are capital expenditures net of proceeds from the disposal of tangible and intangible assets and investment subsidies and grants received.

Cash used in net capital expenditures increased €44.1 million, or 18.5%, from a cash outflow of €237.7 million in 2011 to a cash outflow of €281.8 million in 2012, due to higher capital expenditures (up €48.4 million) in connection with the launch of LaBox and the acceleration in fiber deployment in 2012 and lower disposal proceeds (down €1.2 million), partially offset by higher subsidies (up €5.6 million) received in connection with the DSP 92 project.

Cash used in net capital expenditures increased by €33.0 million, or 11.7%, from a cash outflow of €281.8 million in 2012 (given the guarantees given with respect to the implementation of the DSP 92 network) to a cash outflow of €314.8 million in 2013, due to higher capital expenditures (up €30.2 million) in connection with a full year of deployment of LaBox instead of the 5-month deployment in 2012 (launched commercially in the third quarter of 2013) and with the continuous acceleration in fiber deployment in 2013, lower subsidies (down €5.5 million) received in connection with the DSP 92 project, partially offset by higher disposal proceeds (up €1.3 million).

Cash used in net capital expenditures increased by €45.7 million from a cash outflow of €200.8 million in the nine-month period ended September 30, 2013 to a cash outflow of €246.4 million in the nine-month period ended September 30, 2014, as the Numericable Group accelerated its deployment of optical fiber and increased its digital client base.

Escrow accounts

The proceeds from the issuance of the Numericable Senior Secured Notes and from certain drawdowns under the Numericable Term Loan were placed in escrow pending the closing of the 2014 SFR Acquisition on November 27, 2014. The table below breaks down the €8.9 billion placed in escrow

(in millions)	Amount in currency of issuance	Amount in euros[(2)]
2019 Dollar Notes	2,400.0	1,735.7
2022 Dollar Notes	4,000.0	2,892.9
2024 Dollar Notes	1,375.0	994.4
2022 Euro Notes	1,250.0	1,250.0
2024 Euro Notes	1,000.0	1,000.0
U.S. dollar portion of Numericable Term Loan[(1)]	1,191.4	861.7
Euro portion of Numericable Term Loan[(1)]	159.2	159.2
Amount placed in escrow accounts		**8,893.9**

(1) Net of OID (original issue discount, which was 1% for the dollar-denominated Numericable Term Loan and 0.5% for the euro-denominated Numericable Term Loan).

(2) After hedging.

Net financial investments

Net financial investments comprise acquisition of subsidiaries (net of cash received) net of disposals of subsidiaries (net of cash paid), plus acquisitions of other financial assets net of disposals of other financial assets.

Cash used by net financial investments increased by €3.4 million from zero cash inflow in 2011 to a cash outflow of €3.4 million in 2012 due to performance guarantees given in the context of the continuation of DSP 92 network's deployment (see "*Description of Our Business—Products and Services—Business-to-Business Services—Infrastructure Wholesale Services*" and "*Description of Our Business—Legal Proceedings—Dispute Settlement Proceedings Concerning the DSP 92*"). The Numericable Group also bought out the minority shareholders of Sequalum in 2012.

Cash generated by net financial investments increased from a cash outflow of 3.4 million in 2012 (due to the guarantees given in connection with the deployment of the DSP 92 network) to a cash outflow of €27.9 million in 2013. The Numericable Group acquired LTI Télécom in October 2013, as well as Auchan and Valvision's subscribers in March and June 2013, respectively, whereas no acquisitions were made in 2012.

Cash used by net financial investments decreased by €1.1 million, from a cash outflow of €3.3 million in the nine-month period ended September 30, 2013 to a cash outflow of €2.1 million in the nine-month period ended September 30, 2014, mainly due to the acquisition of Auchan Telecom and Volvision's subscribers in March and June 2013, respectively.

Net cash from (used by) financing activities

The table below summarizes the Numericable Group's net cash provided by financing activities for the years ended December 31, 2011, 2012 and 2013 and the nine months ended September 30, 2013 and 2014.

	For the year ended December 31,			For the nine months ended September 30,	
(in € thousands)	2011	2012	2013	2013	2014
				(Unaudited)

Total interest paid	(154,791)	(152,113)	(180,546)	(135,237)	(282,561)
Net cash from (used) by financing activities	**(489,705)**	**(278,327)**	**(134,253)**	**(197,494)**	**8,689,444**

Issuance of debt

Issuance of debt totalled €0.2 million, €831.0 million and €797.2 million in 2011, 2012 and 2013, respectively, and €7.2 million and €11.6 billion in the nine-month period ended September 30, 2013 and 2014, respectively.

In 2011, the Numericable Group did not materially draw on any debt instruments.

In 2012, Numericable Finance & Co. S.C.A. issued €831.0 million of debt (net of OID (original issue discount) and fees), comprising three issuances of Senior Secured Notes, which occurred in February and October 2012. The net proceeds of these Senior Secured Notes were used to refinance existing senior debt of Ypso France.

In 2013, the Numericable Group implemented the new Facility D for an amount of €800 million under the Senior Facility Agreement and new sale- leaseback agreements.

In the nine-month period ended September 30, 2013, the Numericable Group did not increase the debt outstanding under the Senior Facility Agreements, but did put in place new sale-lease back agreements, which explains the minor amount of debt issuances in the nine months ended September 30, 2013.

In the first half of 2014, the Numericable Group issued the Numericable Senior Secured Notes and drew down loans under the Numericable Term Loan for a total gross amount of €11,653.4 million. €76.9 million of expenses and commissions related to the establishment of the debt (€72.2 million of OID and underwriting commissions and € 4.7 million of rating agency fees) were incurred for the refinancing of existing debt. In the above table, the amount of debt issued (€ 11,631.4 million) is net of these commissions and expenses.

Repayment of debt

The Numericable Group repaid €335.1 million, €957.2 million and €987.4 million of debt in 2011, 2012 and 2013, respectively, and €69.5 million and €2.7 billion in the nine-month period ended September 30, 2013 and 2014, respectively.

In 2011, the Numericable Group repaid €335.1 million due under the Senior Facility Agreements, as the Numericable Group made mandatory or voluntary repayments relating to the sale of Coditel. The Numericable Group used the proceeds from the sale of Coditel to finance €156.3 million of the repayments and financed the remainder (€158.3 million) with cash from operations.

In 2012, the Numericable Group repaid €117.1 million under the Senior Facility Agreement with cash from operations and €840 million with the proceeds of the Senior Secured Notes.

In 2013, the Numericable Group repaid €32.8 million under the SFA (in accordance with its obligations), €479.8 million under the Senior Secured Notes and all of the amounts due under the Altice B2B France SFA, i.e. €453.9 million.

In the first half of 2014, the Numericable Group repaid all of its historical debt for an amount of €2,638.1 million. €14.0 million of other repayments corresponds to repayments of finance leases at maturity for €13.4 million and €0.6 million of various debt.

In the third quarter of 2014, the Numericable Group repaid €7.1 million in finance leases that reached maturity and €0.3 million of various debt.

Interest paid

The Numericable Group paid €152.1 million in interest in 2012, a slight decrease as compared to 2011. This decrease reflected the termination in June 2011 of the cash-consuming variable-to-fixed interest swap and the lower amounts due under the Senior Facility Agreements following repayments in 2011, partially offset by the increase in EURIBOR between 2011 and 2012, the issuance of the Senior Secured Notes in 2012 and the incurrence of the Additional C1 Facility Loan, which bear higher interest rates than the debt that was repaid with the proceeds thereof, and a margin increase on the Ypso France Senior Facility Agreement following the extension of certain tranches pursuant to the February 2012 refinancing.

The Numericable Group paid €180.5 million in 2013, an increase of €28.4 million as compared to 2012. This increase reflects the general increase in the cost of the Ypso sub-group's debt following the repayment of low margin facilities in 2012 through the issuance of the Senior Secured Notes in February and October 2012.

The Numericable Group paid €282.6million of interest in the nine- month period ended September 30, 2014, representing an increase compared to €135.3 million in the nine-month period ended September 30, 2013. This increase reflects the increase in the amount of debt outstanding following the debt issued to finance the 2014 SFR Acquisition. A total of €173.5 million reflects interest relating to the new debt to finance the acquisition for the period of May to September 2014. Interest on debt at constant scope (i.e. refinanced debt) amounted to €103.1 million, down €30.5 million compared to the nine month period ended September 30, 2013. This decrease is due to the various refinancing transactions carried out over the last twelve months (capital increase at the time of the initial public offering, Facility D establishment and May 2014 refinancing).

The third quarter of 2014 is the first full quarter of interest payments on the debt put in place in May 2014. The amount of interest paid in the third quarter totaled €146.2 million, of which €33.6 million was on debt at constant scope (refinanced debt) and €109.2 million on the new acquisition debt. The remainder (€3.5 million) corresponds to various debt.

Off-Balance Sheet Commitments

Excluding the arrangements concerning the financial debt and acquisition contracts of both SFR and Omer Telecom, as well as the off-balance sheet arrangements described in the notes to the consolidated financial statements of the Numericable Group, the Numericable Group is not a party to any off- balance sheet arrangements that have, or are reasonably likely to have, a current or future material effect on its financial condition, results of operations, liquidity, capital expenditure or capital resources.

Capital Expenditures

Historical Capital Expenditures

The Numericable Group classifies its capital expenditures in the following categories:

- Network: investment in improving, expanding, increasing capacity, extending and maintaining the Numericable Group's network (fiber, backbone and DSL), either directly or, in the case of certain network expansion projects, through public-private partnerships;

- Customers: capital expenditures linked to in-home B2C equipment installation and on-site B2B equipment installation (broadband routers and set-top boxes), as well as wiring for new B2C customers and the creation of new fiber links between B2C sites;

- Service Platforms: investment in television and fixed-line telephony platforms, and

- Other: capital expenditures in connection with wholesale projects, as well as miscellaneous investments, such as the upkeep of the Numericable Group's property and administrative, technical and commercial investments, as well as own work capitalized.

For the year ended December 31, 2013, the Numericable Group incurred capital expenditure of €319.8 million, compared to €285.6 million and €242.7 million (net of subsidies received) for the years ended December 31, 2012 and 2011, respectively. For the nine-month period ended September 30, 2014, the Numericable Group incurred capital expenditure of €250.2 million, as compared to an amount of €205.9 million for the nine-month period ended September 30, 2013.

Net capital expenditures are capital expenditures net of proceeds from tangible and intangible asset transfers and of investment subsidies received.

The table below sets out the amount of capital expenditures by type: (i) capital expenditures for the maintenance of the network, i.e., "maintenance" capital expenditures (in other words, capital expenditures required regardless of the commercial activity in order to serve existing clients with the same quality and service (e.g. information systems, electrical systems, cooling systems)), (ii) capital expenditures for connecting new customers (customer equipment (e.g. set-top boxes), connection costs, etc.), (iii) capital expenditures for the upgrading and renovation of the network (including the transition to EuroDocsis 3.0, with 408,000 homes connected in 2013 and 410,000 homes connected in the nine- month period ended September 30, 2014, and the DSP 92 project), for the 2011-2013 period as well as the nine-month period ended September 30, 2013 and 2014.

(in € millions)	Maintenance Capital Expenditures	New Customer Capital Expenditures	Network Upgrade Capital Expenditures
First half 2014	54.8	72.3	35.5
First half 2013	46.4	72.4	20.0
2013	125.4	152.4	42.1
2012	107.4	145.7	32.5
2011	90.5	138.2	14.0

Approximately half of the Numericable Group's capital expenditures are comprised of capital expenditures in the new customer category, which vary depending on the acquisition of new B2C and B2B clients. The Numericable Group's capital expenditures are therefore highly dependent on its business activities as well as the pace of network renovations, in particular with respect to fiber, as well as potential public-private partnerships.

The Numericable Group's main public-private partnership was DSP 92, run through its subsidiary Sequalum. Formed in 2008, Sequalum's purpose is the creation, financing, marketing, deployment and technical and commercial operation of a very high speed FTTH fiber network in the Hauts-de-Seine district. Legal proceedings are currently ongoing over the termination of the DSP 92 contract. See "*Description of Our Business—Legal Proceedings—Dispute Settlement Proceedings Concerning the DSP 92*".

The Numericable Group has also made acquisitions, in particular acquiring LTI Télécom, a telecommunications operator created in 1998 and present on the B2B market, which provides fixed, mobile and Internet telephony solutions to small and midsize businesses of 5 to 250 employees. See "*Description of Our Business—History*".

Ongoing and Future Capital Expenditures

The Numericable Group expects the annual amount of its capital expenditures excluding network upgrades to be approximately €300 million over the 2014 to 2016 period. As the 2014 SFR Acquisition has been completed, the figures that had previously been published relating to renovation investments are now obsolete.

The Numericable Group intends to renovate 700,000 to 800,000 triple-play compatible plugs to EuroDocsis 3.0 in 2014 (and has already upgraded approximately 609,000 homes in the nine-month period ended September 30, 2014) and to continue to renovate non-upgraded local triple-play fiber local loops to make them compatible with EuroDocsis 3.0.

The Numericable Group also has ongoing acquisition projects (Virgin Mobile).

Acquisition of Virgin Mobile

On December 4, 2014, Numericable Group completed the acquisition of all the share capital of Omer Telecom Limited (the holding company of the group operating in France under the Virgin Mobile brand) for the acquisition of the entirety of Omer Telecom Limited's capital, at a price corresponding to an enterprise value of €325 million. The acquisition is part of the Numericable Group's acceleration of its complementary strategy between fast and superfast broadband and mobile. The acquisition was consummated on December 4, 2014.

Virgin Mobile France was founded in 2006, and is the largest MVNO in the French market based on the number of subscribers, with a reputation for innovation and high-quality customer service, offering a wide range of tariffs and contract options, catering to a broad range of customer needs. Virgin Mobile France only operates in France.

Virgin Mobile France has invested in the development of a Full MVNO infrastructure, operating its own core network elements and interconnection equipment while using the radio network of another operator. This enables it to participate more fully in customer revenue streams, including termination revenues, and to reduce its costs. It also provides additional strategic flexibility by giving the business greater control of its customers. 77% of Virgin Mobile's customers were on the Full MVNO infrastructure at March 31, 2014.

Virgin Mobile also has a distribution network, with 76 Virgin Mobile single- branded sales locations (independent or owned), and a well-established online platform.

Virgin Mobile furnishes its services using the networks of Orange, SFR and Bouygues Telecom and, for 4G services, SFR and Bouygues Telecom.

The following table provides certain key performance indicators for Virgin Mobile as of March 31, 2013 and 2014:

(in millions)	As of March 31, 2013	As of March 31, 2014
Post-paid customers	1.35	1.32
Pre-paid customers	0.37	0.35
Total customers	1.71	1.67
Mobile ARPU (including insurance margin)	24.3	23.2
Broadband ARPU (including OTT)	29.8	33.4

Source: Virgin Mobile France

Like other mobile operators in France, Virgin Mobile has adapted to the difficult market conditions, in particular the intense market competition, which has caused downward pressure on ARPU and the customer base. The business has been able to maintain its focus on innovative propositions and high-quality customer service to provide differentiation, despite intense market competition. As of October 1, 2014, 93% of its post-paid subscriptions were based on offers launched or modified after Free's entry into the market in January 2012.

Virgin Mobile's offers are available on a SIM-only basis or with a handset subsidy (and a 24-month commitment). The following table shows Virgin Mobile France's offers in March 2014:

Data	100 Mb of Data 3G+		1 Gb of Data 3G+	3 Gb of Data (H+/4G)	5 Gb of Data H+/4G + 1 Gb of Data in Europe	
Voice/SMS/MMS	2 hours of voice and unlimited SMS/MMS	Unlimited voice and unlimited SMS/MMS	2 hours of voice and unlimited SMS/MMS	Unlimited voice toward 52 countries (France + international) and unlimited SMS/MMS	4 hours of voice and unlimited SMS/MMS	Unlimited voice toward 52 countries (France + international) and unlimited SMS/MMS
SIM only, monthly price	€3.99	€9.99	€9.99	€19.99	€19.99	€29.99
With handset subsidy, monthly price	€13.99	€19.99	€19.99	€39.99	€29.99	€52.99

Virgin Mobile also has OTT and quadruple-play offerings: Studio Box and Virgin Box. Studio Box is available for an additional €10 a month and provides enriched access to TNT channels (replay, timeshifting) and additional channels (Paramount, Game One, etc.) as well as SVOD (400 movies and youth programs and a large pay-per-view VOD catalogue), with a set-top box provided by Netgem. Virgin Box is available as part of a quadruple-play bundle from €29.98 per month and includes a market-standard triple-play offer (internet up to 25 Mbps per second, unlimited calls toward fixed lines and 100 countries, unlimited calls to mobile as an option, TV and VOD), with a modem and set-top box based on no-frills SFR equipment and all services operated by SFR.

2014 SFR Acquisition

See "*General Description of our Business and the Offering—Recent Developments—2014 SFR Acquisition*" for a description of the Numericable Group's acquisition of SFR.

Qualitative and Quantitative Analysis of Market Risk

Exchange Rate Risk

The Numericable Group faces monetary exchange rate fluctuations. Given that revenue is recorded in euros, since the refinancing transactions in the nine-month period ended September 30, 2014, the Numericable Group has been exposed to exchange rate risk in connection with its financing activities. Specifically, in May 2014, the Numericable Group incurred U.S. dollar- denominated debt (consisting of part of the Numericable Group's Numericable Term Loans used to refinance the Numericable Group's debt, the "Refi Numericable Term Loans" and the Numericable Term Loans of which the amounts were placed in an escrow account, the "Non-Refi Numericable Term Loans") and certain tranches of the Numericable Senior Secured Notes (see "*—Liquidity and Capital Resources of the Numericable Group—Financial Resources—Financial Liabilities*" and Note 15.3 to the financial statements as of September 30, 2014)).

Because the Numericable Group's financial statements are presented in euros, the Numericable Group converts its debts into euros at the then-applicable exchange rate. As a result, exchange rate fluctuations between the U.S. dollar and the euro may affect the value of U.S. dollar-denominated debt in the Numericable Group's financial statements. As of September 30, 2014, outstanding U.S. dollar-denominated debt totalled U.S. $7,775 million, excluding accrued interest and not taking into account deduction of the initial set-up costs, and outstanding euro-denominated debt totalled €2,250 million, excluding accrued interest and not taking into account the deduction of costs of set up, of the security deposits and of the perpetual subordinated notes.

In addition, the Numericable Group faces exchange rate risk relating to interest due in US Dollars on its US Dollar denominated debt. The Numericable Group seeks to hedge this exposure via derivatives. There can be no guarantee that the Numericable Group's hedging strategies will entirely protect its operating results from the effects of exchange rate fluctuations, or that such hedging will not limit any gain that the Numericable Group could record from favorable exchange rate movements.

As of December 31, 2013, the Numericable Group had no outstanding exchange rate derivatives. On April 23 and 28, 2014, the Company entered into various swap agreements with Goldman Sachs International. On May 1, 2014, Numericable Group and Goldman Sachs International transferred (by novation) a number of swap agreements to various leading international banks. See "*Management's Discussion and Analysis of Financial Condition and Results of Operations of Numericable Group—Liquidity and Capital Resources of the Numericable Group—Financial Resources—Financial Liabilities*".

As of September 30, 2014, the Numericable Group was a party to five categories of currency swaps with more than fifteen counterparties:

	Dollar 2019 Notes	Dollar 2022 Notes	Dollar 2024 Notes	Refi Numericable Term Loan	Non-Refi Numericable Term Loan
Notional amount in USD Million / € Million	2,400 / 1,736	4,000 / 2,893	1,375 / 994	1,394 / 1,008	1,206 / 872
USD Leg/ Euro Leg	4.875% / 4.354%	6.0% / 5.147%	6.25% / 5.383%	L+3.75% /E+4.2135%	L+3.75% /E+4.2085%
First Exchange Date	April 30, 2015	April 30, 2015	April 30, 2015	May 21, 2014	April 30, 2015
Initial Amounts Exchanged in USD million / € Million	2,358 / 1,705	3,930 / 2,842	1,351 / 977	1,355 / 980	1,173 / 848

Final Amount Exchanged in USD Million / € Million	2,400 / 1,736	4,000 / 2,893	1,375 / 994	1,394 / 1,008	1,206 / 872
Special provisions		Banks have a five-year termination right	Banks have a five-year termination right		

The Numericable Group's dollar-denominated debt issuances and the funds placed in the escrow accounts were fully hedged through cross-currency swaps. The table below shows the impact of hedging transactions on the initial debt and the escrow accounts before and after hedging.

		Initial debt		Hedging instrument		Final debt	
Initial amounts (in € millions)	**Currency**	**In USD**	**In euros**	**In foreign currency**	**In euros**	**In foreign currency**	**In euros**
2019 Notes	USD	(2,400)	—	2,400	(1,736)	—	(1,736)
2022 Notes	USD	(4,000)	—	4,000	(2,893)	—	(2,893)
2024 Notes	USD	(1,375)	—	1,375	(994)	—	(994)
2020 Loan ("Refi")	USD	(1,394)	—	1,394	(1,008)	—	(1,008)
2020 Loan ("Non Refi")	USD	(1,206)	—	1,206	(872)	—	(872)
Total liabilities		**(10,375)**	**—**	**10,375**	**(7,503)**	**—**	**(7,503)**
Escrow accounts	USD	8,966	—	(8,966)	6,485	—	6,485
Total assets		**8,966**	**—**	**(8,966)**	**6,485**	**—**	**6,485**

The Numericable Group's dollar-denominated debt issuances (the Numericable Term Loans and Numericable Senior Secured Notes) and the amounts placed in the escrow accounts were fully hedged through cross-currency swaps. However, the Numericable Group's risk is not fully hedged, since U.S. dollar-denominated drawdowns under the Numericable Term Loans bear interest at LIBOR plus a margin subject to a floor of 0.75% on LIBOR, whereas the swap agreements do not include this floor. For the U.S. dollar-denominated Numericable Term Loans, if LIBOR is above 0.75%, the debt is fully hedged; otherwise, the difference between 0.75% and LIBOR is not covered by a dollar/euro swap. See "*—Interest Rate Risk*" below and Note 2.4 to the consolidated financial statements included in these Listing Particulars for a description of the hedging transactions relating to the refinancing transactions.

The following table shows the notional amounts and (negative) fair value of the swaps as of September 30, 2014:

(in € millions)	Notional amount	Fair value (including accrued interest)	Fair value (excluding accrued interest)
2019 Notes	1,736	43.2	45.4
2022 Notes	2,893	116.1	121.4
2024 Notes	994	38.7	40.6
2020 Loan ("Refi")	1,008	(78.8)	(78.8)
2020 Loan ("Non Refi")	872	(0.1)	(0.1)
Total	**7,503**	**119.1**	**128.5**

Impact of the swaps on the Numericable Group's consolidated financial statements

The Numericable Group has entered into two types of swaps:

- The swaps on the Numericable Senior Secured Notes are considered cash flow hedges because they correspond exactly to the cash flow of the underlying Numericable Senior Secured Notes. The effective portion of the change in the fair value of these derivatives is recorded as a component of other comprehensive income. It is recorded in income or loss when the covered item affects net income. As of September 30, 2014, €207.4 million was recorded in other comprehensive income (and therefore in shareholders' equity) representing the fair value of these financial instruments. The Numericable Group also recorded €78.8 million of deferred tax assets on these instruments in other comprehensive income and shareholders' equity as of September 30, 2014.

- The swaps on the Numericable Term Loans were recorded as a natural hedge (at fair value through profit and loss, in accordance with IAS 39). The swaps on the Numericable Term Loans are accounted for differently from the swaps on the Numericable Senior Secured Notes due to the variable rate of the underlying obligations. These swaps are recorded at their fair value on the balance sheet, and changes in their value affect income or loss. As of September 30, 2014, the fair value of these financial instruments (including the fair value of the LIBOR/EURIBOR conversion, which cannot be isolated) was recorded as other financial income of €78.9 million, thus positively affecting the Numericable Group's net income. The Numericable Group also recorded €(33.4) million of expense in deferred tax on these instruments as of September 30, 2014.

Altogether, as of September 30, 2014, the change in the swaps' mark- to-market value positively affected net income by €45.5 million. See Note 16.3 and Note 9.2 to the Numericable Group's interim consolidated financial statements included elsewhere in these Listing Particulars for more information on accounting for these swaps.

Interest Rate Risk

The Numericable Group is exposed to interest rate risk. The variations of these rates could have a material adverse effect on the service of its debt.

The Numericable Group is exposed to the risk of an increase in interest rates, essentially under Numericable Group's Term loans, which is indexed to the European Interbank Offered Rate ("EURIBOR") or, for dollar-denominated loans, the London Interbank Rate ("LIBOR"), plus applicable margins. In addition, any amount that the Numericable Group borrows under the 2014 Numericable Group Revolving Credit Facilities will bear interest at a floating rate. An increase in interest rates applicable to the Numericable Group's debt will reduce available funds to reimburse its debt and finance its operations and capital expenditures. Although the Numericable Group may resort to various derivative instruments to manage its exposure to interest rate movements, there can be no assurance that it will be able to continue to do so at a reasonable cost.

To cover its exposure to changes in LIBOR (which applies to the portion of the Numericable Term Loan denominated in U.S. dollars), the Numericable Group has entered into swap agreements hedging its exposure to euro/dollar currency fluctuations and to changes in LIBOR, thus converting its exposure to LIBOR rates into exposure to EURIBOR rates. See "—*Exchange Rate Risk*" above.

As of September 30, 2014, the Numericable Group had no contracts covering its exposure to fluctuations in the EURIBOR rate. EURIBOR could increase considerably in the future, which would lead to additional interest expense for the Numericable Group, reducing its available cash flow for investments and limiting its ability to service the debt under certain of its debt instruments.

The following table shows changes in the Numericable Group's financial assets and liabilities at September 30, 2014:

(in € millions) September 30, 2014	Financial Assets (a)		Financial Liabilities (b)		Net Exposure (c) = (b) − (a)		Rate-hedging instruments (d)		Net exposure after hedging (e) = (c) − (d)	
	Floating Rate	**Fixed Rate**	**Floating Rate**	**Fixed Rate**	**Floating Rate**	**Fixed Rate**	**Floating Rate**	**Fixed Rate**	**Floating Rate**	**Fixed Rate**
Less than a year				25.6	—	25.6	—	—	—	25.6
From 1 to 5 years......................				1,920.6	—	1.920.6	—	—	—	1,920.6
More than 5 years			3,958.8	6,506.5	3,958.8	6,506.5	—	—	3,958.8	6,506.5
Total...			**3,958.8**	**8,452.7**	**3,958.8**	**8,452.6**	**—**	**—**	**3,958.8**	**8,452.7**

* The hedges implemented relate mostly to foreign currencies; these agreements convert the Numericable Group's exposure to the LIBOR rate to an exposure to the EURIBOR rate and therefore does not reduce the Numericable Group's global exposure to the variability of interest rates.

Numericable's counterparties to the hedging agreements with an eight-year term (relating to interest and principal due on the Dollar 2022 Notes and the Dollar 2024 Notes) benefit from an early termination clause after five years. These counterparties may unilaterally terminate the hedging agreements three years before the end of their terms and cause Numericable Group to pay (depending on market conditions on that date) the remaining balance of the swaps at the time of the termination of the agreements. This possibility thus results in a liquidity risk, as the Numericable Group could reasonably enter into new swap agreements at market conditions concurrent with such termination.

As of December 31, 2013, the Numericable Group's outstanding variable- rate debt totalled €2,257.7 million, and its outstanding fixed-rate debt totalled €380.4 million. As of September 30, 2014, the Numericable Group's outstanding variable-rate debt totalled €3,958.8 million, and its outstanding fixed-rate debt totalled €8,452.7 million.

The Numericable Group has at times entered into interest rate swap agreements and interest rate cap agreements, and intends to continue doing so when necessary. There can be no assurances as to the Numericable Group's ability to properly manage its exposure to interest rate fluctuations in the future or to continue to do so at a reasonable cost.

Given the relative weights of the Numericable Group's fixed-rate and variable-rate debt, and of the existing swap rates that convert the Numericable Group's exposure to fluctuations in LIBOR into exposure to fluctuations in EURIBOR, an immediate change of 50 basis points in EURIBOR would have an effect of plus or minus €9.5 million on the Numericable Group's net income for the nine months ended September 30, 2014. As noted above, due to its interest rate swaps, the Numericable Group is not exposed to changes in LIBOR.

Liquidity Risk

The Numericable Group manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching as much as possible the maturity profiles of financial assets and liabilities.

The following table details the Numericable Group's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods as of September 30, 2014. It was prepared based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Numericable Group can be required to pay. The table includes principal cash flows. The contractual maturity is based on the earliest date on which the Numericable Group may be required to pay.

(€ in thousands)	September 30, 2014 Less than 1 year	1 to 5 years	More than 5 years	Total
Financial liabilities under the Numericable Term Loan	79,266	—	3,780,379	3,859,645
(of which accrued interest)	28,968	—	—	28,968
Financial liabilities under the Numericable Senior Secured Notes	51,361	1,735,734	6,137,322	7,924,417
(of which accrued interest)	51,361	1,735,734	6,137,734	7,924,417
Perpetual subordinated notes	—	—	39,654	39,654
Financial liabilities pursuant to leasing-financing agreements	26,644	19,372	390	44,406
Other financial liabilities	1,000	833	—	1,833
Total notes and loans	**385,005**	**3,116,788**	**6,634,326**	**10,136,118**
(of which amortization of initial costs)	—	—	(61,410)	(61,410)
Marked-to-Market value of swaps	9,394	43,249	75,896	128,539
Security deposits received from customers	11,432	45,411	—	56,843
Bank overdrafts	—	—	—	0
Total financial liabilities	**177,097**	**1,844,599**	**10,033,641**	**12,055,337**

The Numericable Group has no repayment to make with respect to the Numericable Senior Secured Notes or the Numericable Term Loans in the last quarter of 2014. The only repayment to be made during the last quarter of 2014 are with respect to finance leases, in an amount of approximately € 6.6 million. Interest due on the Numericable Term Loans was paid during the last quarter of 2014 in an estimated total amount of approximately € 45.9 million.

The Numericable Group is also exposed to the risk of having to pay the amount corresponding to the mark-to-market value of its hedging agreements with an eight-year term (relating to interest and principal due under the Dollar 2022 Notes and Dollar 2024 Notes) under which the counterparties of Numericable benefit from an early termination clause after five years. See "*—Liquidity and Capital Resources of the Numericable Group—Financial Liabilities*" of these Listing Particulars. These counterparties can unilaterally renounce the hedging agreement three years before their maturity and force Numericable Group to pay (according to market conditions at that date) the mark-to-market value (at the date of the cancellation of the agreements) of the swaps. This possibility thus results in a liquidity risk, as the Numericable Group could reasonably enter into new swap agreements at market conditions concurrent with such termination.

The Numericable Senior Secured Notes are "covenant light", i.e. these Notes have no covenants tested periodically, but rather only on the occasion of particular events (such as transfer of assets, incurrence of new debt, payment of dividends, etc.).

The Numericable Group also has revolving credit facilities (the "2014 Numericable Group Revolving Credit Facilities") available for drawdown for a total amount of €300 million and, as from November 27, 2014, in the additional amount of €450 million. The availability of these revolving credit lines is subject to customary covenants and other undertakings (see Note 20.1 to the consolidated financial statements included elsewhere in these Listing Particulars for more information).

The following table shows the Numericable Group's current credit ratings:

Moody's	S&P
B1 (positive outlook)	B+

Credit and/or Counterparty Risk

Credit and/or counterparty risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Numericable Group.

Financial instruments that could potentially subject the Numericable Group to concentrations of counterparty risk consist primarily of trade receivables, cash and cash equivalents, investments and derivative financial instruments. Overall, the carrying amount of financial assets recognized in the consolidated financial statements, which is net of depreciation, represents the Numericable Group's maximum exposure to credit risk.

The Numericable Group believes that it has an extremely limited exposure to concentrations of credit risk with respect to trade accounts receivable due to its large and diverse customer base (residential and public institutions) operating in numerous industries and located across France. An analysis of credit risk on net trade receivables past due is provided in Note 20 to the consolidated financial statements included elsewhere in these Listing Particulars.

The Numericable Group's policy is to invest its cash, cash equivalents and marketable securities with financial institutions and industrial groups with a long-term rating of A-/A3 or above. The Numericable Group enters into interest rate contracts with leading financial institutions and currently believes that the risk of these counterparties defaulting is extremely low, since their credit ratings are monitored and financial exposure to any one financial institution is limited.

In 2008, at the time Lehman Brothers filed for bankruptcy, part of the Numericable Group's financial liabilities was hedged by interest rate swaps entered into with Lehman Brothers. As a result of the bankruptcy, Lehman Brothers defaulted on the interest rate swaps. The Numericable Group currently has a damages claim against Lehman Brothers for a total amount of €11.2 million. In 2013, the Numericable Group received payments of €4.5 million and €2.6 million in relation to this claim. A third payment was received in November 2013, and the Numericable Group received a fourth payment of €0.8 million in the nine-month period ended September 30, 2014. All amounts accepted by the administrator have been paid to Ypso France (a total of €10.7 million, representing all of the amount initially claimed). The Numericable Group does not expect any additional payments from the administrator of the Lehman Brothers bankruptcy.

Risks Relating to Shares and Other Financial Instruments

As of the date of these Listing Particulars, the Numericable Group does not hold any securities apart from securities of associates and holdings in non- consolidated companies (see Note 17 "Investments in Associates" and Note 31 "Non-current Assets Held for Sale and Discontinued Operations" to the consolidated financial statements included elsewhere in these Listing Particulars). As a result, the Numericable Group believes it is not subject to material market risks relating to shares and other financial instruments.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS OF SFR

The following discussion and analysis is intended to assist in providing an understanding of SFR's financial condition, changes in financial condition and results of operations. The discussion is based on SFR's audited combined financial statements as of and for the years ended December 31, 2011, 2012, and 2013, and SFR's unaudited combined condensed interim financial statements as of and for the nine months ended September 30, 2014, in each case, prepared in accordance with IFRS as adopted by the European Union. SFR's combined financial statements as of and for the years ended December 31, 2011, 2012, and 2013, were audited by KPMG Audit, a department of KPMG S.A., and Ernst & Young et Autres. and SFR's unaudited combined condensed interim financial statements as of and for the nine months ended September 30, 2014, were the subject of a limited review by KPMG S.A. An English translation of these reports are included in these Listing Particulars.

Except as the context otherwise indicates, when discussing historical results of operations under "Description of SFR's Business" and "Management's Discussion and Analysis of Financial Condition and Results of Operations of SFR", "SFR", "it" and other similar terms are generally used to refer to SFR's business. In this section, references to "SFR Combined Group" refer to SIG 50, SFR and their subsidiaries, and references to the "SFR Group" refer to SFR and its subsidiaries and, as the context requires, SIG 50 and its subsidiaries.

You should read the discussion under "Management's Discussion and Analysis of Financial Condition and Results of Operations of SFR" in conjunction with the combined financial statements of SFR and the accompanying notes an English translation of which is included in these Listing Particulars. A summary of the critical accounting estimates that have been applied to SFR's financial statements is set forth below in "Critical Accounting Estimates". This discussion also includes forward-looking statements which, although based on assumptions that SFR considers reasonable, are subject to risks and uncertainties which could cause actual events or conditions to differ materially from those expressed or implied by the forward-looking statements. For a discussion of the risks and uncertainties SFR faces as a result of various factors, see "Risk Factors".

Presentation of Financial Information

The discussion and analysis below for each of the periods presented is based on the financial information derived from the audited combined financial statements of SFR as of and for the years ended December 31, 2011, 2012 and 2013 (the "2011, 2012 and 2013 Combined Financial Statements") and the unaudited combined condensed interim SFR financial statements as of and for the nine months ended September 30, 2014 (the "SFR Q3 2014 Combined Financial Statements" and together with the SFR 2011, 2012 and 2013 Combined Financial Statements, the "SFR Combined Financial Statements"). The SFR Combined Financial Statements cover the following parameters: (i) SFR S.A. ("SFR"); (ii) entities held directly or indirectly by SFR and its subsidiaries; (iii) Vivendi S.A.'s ("Vivendi") participation through its interest in SIG 50, in the telecommunications products and services distribution activity and the telecommunications business of Futur Télécom (a CID subsidiary), given their operational link to SFR's activity; and, with respect to the SFR Q3 2014 Combined Financial Statements, (iv) Groupe Telindus France, which was acquired by SFR on May 1, 2014, when it acquired Groupe Telindus France and operates in the telecommunications and network integration business.

In the absence of a specific IFRS text on the preparation of combined financial statements, SFR defined the basis of preparation of its combined accounts as of and for the years ended December 31, 2011, 2012 and 2013 and as of and for the nine months ended September 30, 2013 and 2014. The SFR Combined Financial Statements were prepared in accordance with IFRS as approved by the European Union.

Introduction

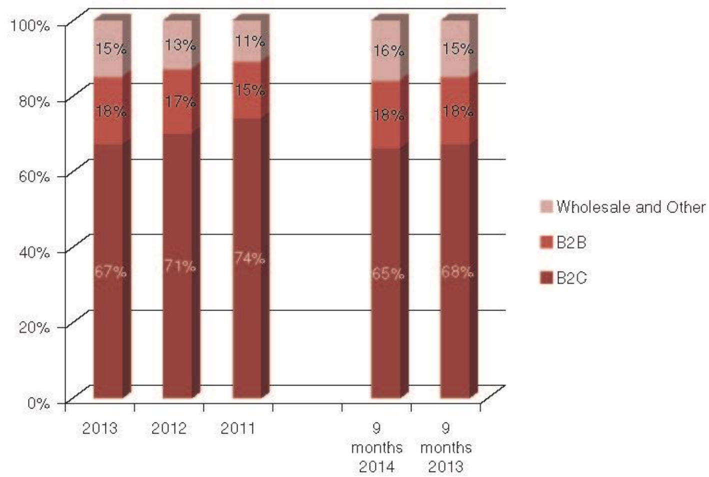
As SFR's business evolves towards increased convergence of the activities of the mobile telephone and broadband internet, and fixed revenue services, it will continue to globalize and unify its operations. The chief operating decision-maker checks the results and operating plans, and decides on the distribution of resources at the group level. SFR has therefore identified one individual operating sector that corresponds to the criteria of standard IFRS 8. Similarly, in view of the fact that virtually all of SFR's activity is on French territory, a single geographic segment has been retained.

SFR's combined revenue has been broken down by the following three markets:

- B2C, which includes the offers and services marketed to the consumer market in mainland France;
- B2B, which includes the offers marketed to VSE/SME, large companies and public entities in mainland France; and
- Wholesale and Other, which includes: (i) services offered to mobile virtual network operators ("MVNOs") or to foreign mobile operators whose customers use SFR's network; (ii) voice and data transmission services;

(iii) wholesale services that rely on the fiber network infrastructure; and (iv) white label DSL services offered to telecommunications operators and internet access providers. In the presentation of the SFR Combined Group's revenues, this market also includes activities that have not been included in the B2C and B2B markets, principally Société Réunionnaise du Radiotéléphone ("SRR"), SFR Collectivités and its subsidiaries as well as inter-segment eliminations.

The following diagram illustrates the relative percentages of the activities of each of these markets in the SFR Combined Group's revenues for the years ended December 31, 2011, 2012 and 2013 and the nine months ended September 30, 2013 and 2014:



Key Figures

The following table presents the breakdown in SFR's combined revenue among its three markets as well as certain key performance indicators for the years ended December 31, 2011, 2012 and 2013 and the nine months ended September 30, 2013 and 2014

	Year ended December 31,					Nine months ended September 30,		
	2013	2012	2011	% Change 2013/2012	% Change 2012/2011	2014	2013	% Change 2014/2013
				€ in millions				
B2C	6,873	7,974	8,982	(13.8)%	(11.2)%	4,831	5,156	(6.3)%

B2C[d]								
Number of mobile customers (in thousands)[b]	14,555	15,057	16,578	(3.3)%	(9.2)%	14,182	14,486	(2.1)%
Number of mobile subscribers (in thousands)[b][e]	11,381	11,194	11,961	1.7%	(6.4)%	11,315	11,230	0.8%
Smartphone penetration rate[f]	64.1%	51.2%	42.1%	12.9pts	9.1pts	69%	58%	10.8 pts
Monthly Mobile ARPU over last twelve months (€)[g]	24.1	28.3	31.4	(15.0)%	(9.6)%	22.8	25.0	(8.7)%
Number of High-Speed Internet Customers (in thousands)[c]	5,209	5,039	4,994	3.4%	0.9%	5,217	5,163	1.0%
of which Fiber customers (in thousands)	197	126	97	55.6%	29.7%	249	172	44.5%
of which quadruple-play customers ("MultiPack") (as a % of the customer base)	45%	35%	24%	9.8pts	11.9pts	49%	44%	5.8 pts
Monthly Broadband Internet ARPU over last twelve months (€)[g]	32.5	33.3	34.1	(2.6)%	(2.1)%	32.2	32.6	(1.0)%

(a) Combined revenues for the SFR Combined Group and the B2B market include revenues from Telindus France since May 2014. On a comparable basis (excluding Telindus), 2013 SFR Combined Group revenues decreased by 4.2% and B2B revenues declined by 6.7% in the nine months ended September 30, 2014.

(b) The 2013 numbers of mobile customers include a technical purge carried out in 2013 of 92,000 inactive lines related to the migration of the billing system (with no impact on revenues). The total number of customers as of December 31, 2012 is as originally published (i.e. without the technical purge).

(c) The total number of high-speed internet customers as of December 31, 2011 was adjusted to remove 23,000 customers following the exit of Akéo 1P and 2P customers from the scope of consolidation.

(d) Mainland France, excluding SRR.

(e) Total mobile subscribers is equal to post-paid customers.

(f) Number of customers equipped with a smartphone compared to the total number of mobile customers (excluding remote connections).

(g) Mobile "ARPU" is the average monthly revenue per customer. It is calculated by dividing the B2C Mobile Revenue (excluding equipment) generated over the last twelve months by the average number of customers (excluding machine to machine ("MtoM") customers, multi-SIM and backup keys) over the same period. The ARPU is expressed in monthly revenue by line. Broadband internet ARPU is the average monthly revenue per B2C broadband internet line. It is calculated by dividing the average monthly revenue, based on the last twelve months, by the average number of B2C broadband internet lines over the same period. The average number of customers is the average of the monthly averages during the period concerned. The monthly average is the arithmetic mean of the number of customers at the beginning and the end of the month.

(h) Includes a non-recurring charge of €196 million.

SFR's B2C and B2B activities are carried out in mainland France, while its Wholesale and Other activities include the activities of SRR, which operates outside of mainland France in Reunion Island and Mayotte and represented approximately 17% of Wholesale and Other combined revenues for 2013.

Key Income Statement Items

Revenue

SFR's revenue is principally comprised of revenues from services and equipment sales. The principles for recognition of revenue are described in note 1.3.4 of the SFR Combined Financial Statements.

B2C Revenue

B2C Revenue is principally comprised of pre-tax revenue from the sale of retail services and equipment to consumers (fixed and mobile) in metropolitan areas of France and call termination income for traffic to B2C customers of SFR.

The main B2C mobile telephony offers available in mainland France are:

- The "Formules Carrées" range, based on mobile internet and the provision of premium content to SFR customers ("Extras"), supplemented a range of services. These plans include access to a wide range of subsidized handsets, with a commitment period, and are available through all sales channels, in particular through SFR's network of brick-and-mortar Espace SFR stores;

- The "Red" range of plans, which do not require a time commitment and are sold essentially through the internet and cover low-priced offers;

- Prepaid offers sold under the "SFR La Carte" brand.

The majority of B2C mobile telephony revenues is generated by subscriptions ("Formules Carrées" and "Red"). Prepaid offers generated nearly 9% of retail mobile revenues in 2012 and 2013 and 7% of retail mobile revenues in the nine months ended September 30, 2014, and their weight has tended to decline with the arrival of low-priced subscription offers without time commitments.

Revenues from sales of handsets and mobile telephony accessories as well as related insurance revenues are included in B2C revenues.

The main B2C fixed offers available in mainland France are:

- Internet access offers through xDSL or optical fiber:

    - Unlimited high speed ADSL, which enables customers to access the internet with a minimum speed;

    - Very high speed fiber (FTTH) offers, which enable eligible customers to access the internet with download speeds of up to 1 Gbps;

- Fixed telephony offers, without associated internet access:

    - Pre-selection offers (call-by-call selection or automatic pre-selection), in which customers keep their telephone-line subscriptions with Orange; and

    - Offers that include the telephone-line subscription, in which customers obtain their telephone subscription from SFR rather than from Orange.

The majority of B2C fixed revenues is generated by internet access offers. Fixed telephony offers without associated internet access generated approximately 9% of B2C fixed revenues in 2012, nearly 8% in 2013 and approximately 6% in the nine months ended September 30, 2014.

SFR also offers automated home solutions to the B2C market, under its “Home by SFR” brand. Call termination income for traffic to B2C customers of SFR is also included in B2C revenues.

B2B Revenue

B2B Revenue comprises pre-tax income from the sales of services to SMEs/VSEs, large businesses and public administrations in metropolitan areas of France, including:

- 3G/4G voice and data mobile services for smartphones, tablets and PCs;

- fixed data services via xDSL technologies or fiber and business network offers (Virtual Private Networks), which provide connections to the sites of single-site or multi-site businesses;

- fixed telephony services for businesses;

- a range of unified communications solutions, including the Business Entrepreneurs Pack for VSEs, the Business Enterprises Pack for SMEs and the Business Corporate Pack (for large businesses);

- value-added hosting services intended for large account customers, or cloud services intended for

- SMEs and integration services; and

- the revenue associated with MtoM communications.

Call termination income for traffic to B2B customers of SFR is also included in B2B revenues.

Wholesale and Other Revenue

Wholesale and Other revenue is principally comprised of the following elements:

- revenue generated by the Operators division of SFR which includes:

    - revenue generated with virtual mobile operators who are customers of SFR;

    - revenue generated by roaming foreign visitors on the SFR mobile network (“roaming in”); and

    - revenue from fixed activities, including the collection and termination of voice, data and special number traffic on behalf of national and international operators, the resale of national and international connections, or the sale of end-to-end voice services.

- revenue generated by SRR, which conducts its activity as a fixed and mobile operator in Reunion and Mayotte for consumers and businesses;

- revenue generated by SFR Collectivités and its subsidiaries from regional authorities. The role of SFR Collectivités is to support the strategy of deploying SFR networks and services complementing the needs of the regional authorities; and

- intersegment eliminations.

Call termination income for traffic to customers of the Wholesale and Other activity is also included in Wholesale and Other revenues.

Costs

The costs of sales are comprised of the purchase of goods, interconnection costs, network operating and maintenance costs, and of the share of costs of sales associated with personnel expenses and taxes and duties. Purchases of goods include purchases of mobile handsets. Commercial and distribution costs include the costs of acquiring customers and developing their loyalty (excluding mobile handset subsidy costs, which are deducted from revenue) such as distributor compensation, customer service and advertising and marketing costs. Overhead costs primarily consist of information systems costs, cost structures, and taxes not associated with the costs of sales.

EBITDA

As explained in note 1.2.5 "Group operational performance" of the SFR Combined Financial Statements, SFR considers EBITDA, a non-accounting indicator, to be a measure of performance. EBITDA corresponds to operating income adjusted for other operating income and charges and net depreciation and amortization expense and provisions for impairment of intangible assets and property, plant and equipment. EBITDA illustrates the profit generated by SFR's activities independently of financing conditions, taxes (corporate income tax) and net depreciation/amortization expense and provisions related to plant and equipment.

EBITDA is calculated from combined revenues, less cost of sales, commercial and distribution costs and general costs (excluding net depreciation and amortization expense and provisions for impairment of intangible assets and property, plant and equipment).

EBITDA is not an IFRS indicator and does not have a standard definition. As a result, SFR's method of calculating EBITDA may not be comparable to those used to calculate indicators with a similar name by other entities.

Operating Income

Operating income corresponds to SFR's combined EBITDA, less depreciation and amortization on intangible and tangible assets, other operating expenses, and other operating income, which includes the amortization of subscriber bases recognized during the combining of businesses and restructuring costs.

Financial Income (Expense)

Financial income (expense) is composed of:

- Net financing cost, which is composed of
    - interest expense on loans, which in turn depends on the level of the debt and the average applicable rates. For 2011, 2012 and 2013 and the nine months ended September 30, 2014, interest expense relates primarily to financial expenses in respect of the shareholder advances provided by Vivendi; and
    - interest income on cash, which is principally composed of income from the investment of cash and cash equivalents.
- Other financial income and expense, which comprise default interest, changes in the value of derivative instruments and the effects of accretion connected to debts and provisions (particularly on debt connected to the GSM license, the provision for post-employment benefits and the provision for the refurbishment of sites).

Income Tax

Income tax in the SFR Combined Financial Statements includes taxes calculated based on the net income realized by each combined entity and excludes other taxes paid by the SFR Combined Group, such as real estate taxes, Flat Rate Tax on Enterprise Networks ("IFER") and the Contribution on Value Added of Companies ("CVAE"), which are included in EBITDA and operating income. It also includes deferred taxes. The effective tax rate is defined as income tax on pre-tax income. For more information, see note 1.3.16 "Income Tax" of the SFR Combined Financial Statements.

Key Operating Measures

SFR uses several key operating measures, including total mobile and internet customers, which are used to evaluate the success of different offers.

In addition, in order to analyze the behavior of customers in a dynamic manner and evaluate the success of different offers, SFR also used the net sales indicator. In the mobile sector, SFR also distinguishes between "subscribers" and "prepaid" as these relate to offers that differ in terms of customer behavior and profitability.

None of these operating measures are measures of performance under IFRS, nor have these measures been audited or reviewed by an auditor, consultant or expert. All of these operating measures are derived from SFR's internal operating and financing systems. As defined by SFR management, these operating measures may not be directly comparable to similar measures used by SFR's competitors or other companies.

ARPU

SFR uses ARPU as an indicator for its B2C mobile and fixed activities.

B2C Mobile ARPU is the average monthly revenues per B2C mobile customer. It is calculated by dividing Mobile B2C revenues (excluding equipment) generated over the last twelve months by the average number of customers (excluding multi-sim and back-up keys) over the same period. The average number of customers is the average of the monthly averages over the relevant period. The monthly average is the arithmetic average of the number of customers at the beginning and end of the month. ARPU is expressed as an average revenue per customer.

B2C broadband internet ARPU is the average monthly revenues per B2C high-speed internet line. It is calculated by dividing B2C High-speed internet revenues generated over the last twelve months by the average number of B2C High-speed internet lines over the same period. The average number of B2C High-speed internet lines is the average of the monthly averages over the relevant period. The monthly average is the arithmetic average of the number of customers at the beginning and end of the month.

Monthly Subscriber Acquisition and Retention Costs

SFR follows its mobile subscriber acquisition and retention costs as a performance indicator. These costs correspond to compensation paid to the distribution network and subsidies for the acquisition of the handset at the time of subscription to a package offer. As stated above, the costs of subsidizing handsets are deducted from revenues. The costs of acquiring and retaining customers are recorded in the income statement in the year they are incurred, i.e. at the time of acquisition or renewal.

Key Factors Affecting SFR's Business

The main factors having an impact on the normal course of SFR's activities and its results include: (i) economic and financial developments in France; (ii) competitive pressures; (iii) significant capital expenditures linked in particular to purchase of licenses; (iv) changes in regulatory tariff prices; and (v) the implementation of a long-term transformation plan. These factors are further described below.

Economic and Financial Environment in France

SFR generates almost all of its revenue in France and is therefore strongly exposed to economic and financial developments in France. The years 2011 to 2013 and the nine months ended September 30, 2014, were marked by almost no economic growth in France, as well as a drop in the purchasing power of households and a reduction in corporate spending. These elements have affected the results of SFR over the same period.

Intensifying Competition

SFR carries out all its business in the telecommunications sector in France, which is marked by intense and growing competition. In particular, at the start of 2012, the French mobile market experienced a significant increase in competition as a result of the entry of a fourth operator, the Iliad Group, which led to a significant increase of low-price, no-commitment offers. The entry of Iliad Group into the market negatively affected the pricing for SFR's mobile offers and churn rate, as well as its ability to attract new customers during 2012, 2013 and the nine months ended September 30, 2014.

Network Expenditures

SFR's business requires significant investments for the maintenance, modernization and development of its networks. In order to develop SFR's businesses and to improve the performance of its network, SFR acquired frequencies granted by the French authorities. The years of 2011 and 2012 were therefore marked by acquisition costs for 4G licenses (the bands 2.6 GHz and 800 MHz), with these costs representing an amount of €1,065 million in 2012. In addition, during the last three years, SFR had to pursue its investments linked to the commitments for the coverage and deployment of the network it undertook pursuant to its mobile licenses. For further information, see note 25 of the SFR 2011, 2012 and 2013 Combined Financial Statements contained elsewhere in these Listing Particulars.

Regulatory Tariffs

A portion of SFR's revenue (approximately 10% in 2013 and 11% in the nine months ended September 30, 2014) is subject to changes in regulations applicable to the telecommunications sector. However, the share of revenue subject to such changes is diminishing. This is mainly related to the decrease in income from call termination on the mobile network of SFR, the tariffs for which are set by ARCEP, and the revenue linked to roaming in Europe, the tariffs for which are subject to European regulations. The decreases in tariffs implemented by the regulators over the last three years were notably as follows:

- decrease in regulated prices for mobile call terminations of 33% on July 1, 2011, of 25% on January 1, 2012, of 33% on July 1, 2012 and of 20% on January 1, 2013;
- decrease in tariffs for mobile roaming on July 1, 2011, 2012 and 2013 as described on the ARCEP website (www.arcep.fr) , under "Major Files—Mobiles—Roaming");
- decrease in prices for SMS call termination tariffs of 25% on July 1, 2011 and of 33% on July 1, 2012; and
- decrease in prices of fixed line call terminations of 40% on October 1, 2011, of 50% on July 1, 2012 and of 47% on January 1, 2013.

The tables below show the impact of the regulatory measures on SFR's combined revenue:

	2013	2012	2011	% Variation 2013/ 2012	% Variation 2012/2011
		€ in millions			
Combined revenue	10,199	11,288	12,183	(9.7)%	(7.3)%
Variation excluding regulatory impacts[(a)]	—	—	—	(7.2)%	(3.3)%

(a) Excluding the price effect of the decreases in the regulated tariff prices detailed above

	September 2014	September 2013	% Variation
	€ in millions		
Combined revenue	7,396	7,616	(2.9)%
Variation excluding regulatory impacts[(a)]			(2.3)%

(a) Excluding the price effect of the decreases in the regulated tariff prices detailed above

SFR's Long-Term Transformation Plan

SFR initiated a global transformation plan in 2012 aimed at adapting to developments in the telecommunications market and anticipating the challenges for its business (see "*Description of SFR's Business—Overview of SFR's Business*"). SFR pursued this transformation plan in 2013 and the nine months ended September 30, 2014, adapting its organization to the market developments and retaining its investment capacity in the high-speed and mobile sectors. This plan has also contributed to decreasing the operating costs of SFR by more than €1 billion between the end of 2011 and September 30, 2014.

Critical Accounting Estimates

The SFR Combined Financial Statements were prepared in accordance with IFRS standards that require SFR's management to take into account the estimates and assumptions that could affect the book value of certain assets and liabilities and charges of SFR, as well as the information in the notes to the SFR Combined Financial Statements. The management of SFR revises its estimates and assumptions regularly in order to ensure their relevance in light of past experience and the current economic situation. Should these assumptions change, the items in future financial statements of SFR could be different based on changes in estimates. The impact of the changes in accounting estimates is evaluated during the period of the change and future periods affected.

The principal estimates made by the management of SFR for the preparation of the SFR Combined Financial Statements concern the following:

- certain elements of revenue, particularly identification of the separate elements of a packaged offer and the duration of decreases in revenue linked to costs of access to the service;

- the amount of the provisions for risks and other provisions linked to the business of the SFR Combined Group;

- the assumptions used for calculating the obligations linked to staff benefits;

- the methods of valuation and impairment of goodwill;

- recognition of the deferred tax assets; and

- duration of the utility of intangible and tangible fixed assets.

The estimates and assumptions used by the management of SFR in the preparation of the SFR Combined Financial Statements are described in detail in note 1.3 of the SFR Combined Financial Statements.

Discussion and Analysis of the SFR Combined Group's Results of Operations

The following table provides the main line items of the SFR Combined Group's income statement for the years 2011, 2012 and 2013 and nine months ended September 30, 2013, and 2014.

	Year ended December 31,			Nine months ended September 30,	
	2013	2012	2011	2014	2013
	€ in millions				
Revenues	**10,199**	**11,288**	**12,183**	**7,396**	**7,616**
Cost of sales[(a)]	(4,851)	(5,113)	(5,681)	(3,716)	(3,518)
Commercial and distribution costs[(a)]	(1,928)	(1,965)	(1,864)	(1,213)	(1,412)
Selling, general and administrative expense[(a)]	(654)	(909)	(838)	(690)	(486)
EBITDA	**2,766**	**3,301**	**3,800**	**1,777**	**2,200**

On April 30, 2014, SIG 50 acquired all of Groupe Telindus France's securities for a total amount of €88 million, excluding €6 million for cash acquired. The principal subsidiary, Telindus France, is one of the main players in the French market for telecom and network integration and is the primary distributor for Cisco in France. Telindus France's revenues were €241.5 million for 2013 and €171 million for the nine months ended September 30, 2014, of which €98 million was recorded in the SFR Combined Group's financial statements at September 30, 2014.

Combined revenue

SFR's combined revenues decreased by €220 million, representing a decrease of 2.9% on a real basis and a decrease of 4.2% on a comparable basis, from €7,616 million for the nine months ended September 30, 2013, to €7,396 million for the nine months ended September 30, 2014. The decrease in revenues slowed: on a comparable basis, revenues decreased by 3.2% in the third quarter of 2014, compared to 4.7% in the first half.

As of September 30, 2014, the total number of mobile customers of SFR amounted to 21.4 million, an increase of 1.3% from September 30, 2013. The total number of mobile subscribers was 18.3 million, or 85.5% of total mobile customers. The total number of residential customers subscribing to broadband Internet rose by 14,000 during the nine months ended September 30, 2014, to 5.3 million.

Information by market

The changes in combined revenues by market are as follows:

	For the nine months ended September 30,		
	2014	2013	% Variation
	€ in millions		
B2C	4,831	5,156	(6.3)%
B2B[(a)]	1,349	1,341	0.6%
Wholesale and Other	1,217	1,120	8.7%
Combined revenue[(a)]	7,396	7,616	(2.9)%

(a) Combined revenues and B2B segment revenues include the revenues of Telindus France starting from May 2014 (a two-month period). On a comparable basis (excluding Telindus France), 2013 B2B combined revenues decreased by 4.2% and B2B segment revenues decreased by 6.7% for the nine months ended September 30, 2014, as compared to the nine months ended September 30, 2013.

The following table shows the changes in our key performance indicators:

	For the nine months ended September 30,			For the year ended December 30, 2013
	2014	2013	% Variation	
SFR Group				
Total mobile customers (in thousands)	21,414	21,144	1.3%	21,354

12-month rolling broadband internet ARPU (€ per month)	32.2	32.6	(1.0)%	32.5

B2C Segment

B2C segment revenues decreased by 6.3% to €4,831 million (excluding 92,000 inactive lines following a technical purge completed in the fourth quarter of 2013) for nine months ended September 30, 2014, as compared to nine months ended September 30, 2013.

	For the nine months ended September 30,		
	2014	2013	% Variation
	€ in millions		
B2C			
Revenue	4,831	5,156	(6.3)%
Mobile	3,231	3,560	(9.2)%
Landline	1,600	1,595	0.3%

In the B2C Mobile market, total numbers of subscribers of SFR decreased by 66,000 subscribers in the nine months ended September 30, 2014, as compared to December 31, 2013. As of September 30, 2014, the total number of B2C Mobile subscribers was 11,315 million, an increase of 0.8%, as compared to September 30, 2013. The total number of B2C Mobile customers (subscribers and prepaid) of SFR amounted to 14.2 million as of September 30, 2014. The repositioning of clients on new rates continued during the nine months ended September 30, 2014: as of September 30, 2014, 89% of B2C Mobile subscribers benefitted from prices put in place after January 2013. Blended ARPU thus decreased by 8.7% as of September 30, 2014 as compared to September 30, 2013, as a result of the aforementioned re-pricing of existing customer contracts due to the introduction of low-price offers by Free after its entry into the market in 2012. The growth of mobile internet usage continued: 69.3% of B2C customers had smartphones as of September 30, 2014, as compared to 58.4% at the end of September 30, 2013.

In the B2C fixed market, the total number of SFR's residential customers in mainland France subscribing to high-speed internet amounted to 5,217 million as of September 30, 2014, an increase of 8,000 customers as compared to the end of 2013. Within the total number of customers subscribing to high-speed internet, the number of fiber subscribers totalled 249,000 as of September 30, 2014. The "SFR Multi-Pack" offer recorded a growth of 328,000 customers between September 30, 2014, and September 30, 2013, amounting to 2.6 million clients (49.4% of the total number of high-speed customers). The monthly broadband internet ARPU thus decreased by 1.0%, from €32.6 as of September 30, 2013, to €32.2 as of September 30, 2014.

In the field of home automation, the Home offer by SFR was integrated into a premium offer package with access to internet during the second quarter of 2014. As of September 30, 2014, it had around 30,000 customers.

B2B Segment

In a difficult and competitive macro-economic climate, B2B segment revenue was €1,349 million, including Telindus France in the nine months ended September 30, 2014, representing a decrease of 6.7% on a comparable basis (an increase of 0.6% on a real basis) as compared to the nine months ended September 30, 2013. For the nine months ended

September 30, 2014, prices were affected by a difficult macroeconomic environment, where business customers sought to decrease their telecommunications expenses.

Moreover, SFR Business Team continued to focus on offering unified communication solutions through new services such as the launch in April 2014 of the Business Entrepreneurs Initial Package.

Groupe Telindus France was acquired by SFR in the second quarter of 2014. It allows SFR to reinforce its presence in the related markets of telecommunications and network integration and to offer new services to its B2B clients as a complement to its SFR Business Team offers.

Wholesale and Other

The revenue of the Wholesale and Other business (which includes, in particular, Wholesale business, SRR and intragroup eliminations) increased by 8.7% as compared to the nine months ended September 30, 2013, to € 1,217 million. This increase was mainly due to the growth of Wholesale activities, both on Fixed and Mobile markets.

Combined EBITDA

	For the nine months ended September 30,			
	2014	**2013**	**Variation**	**Variation in %**
	€ in millions			
Revenue	7,396	7,616	(220)	(2.9)%
Cost of sales[(a)]	(3,716)	(3,518)	(198)	5.6%
Sales and distribution costs[(a)]	(1,213)	(1,412)	199	(14.1)%
General expenses[(a)]	(690)	(486)	(204)	41.9%
EBITDA[(b)]	**1,777**	**2,200**	**(423)**	**(19.2)%**

(a) Excluding net depreciation expenses and provisions on intangible and tangible assets

(b) Combined EBITDA for the SFR Combined Group include contributions to EBITDA from Telindus France since May 2014.

SFR's combined EBITDA decreased by €423 million, or 19.2%, from €2,200 million for the nine months ended September 30, 2013, to €1,777 million for the nine months ended September 30, 2014. EBITDA for nine months ended September 30, 2014, includes a non-recurring charge of €196 million in relation to certain litigation matters disclosed in the financial statements of SFR, SIG 50 and their subsidiaries at September 30, 2014, December 31, 2013, 2012 and 2011. Excluding this non-recurring charge, EBITDA for the nine months ended September 30, 2014 stood at €1,973 million, a decrease of 10.3% as compared to the nine months ended September 30, 2013.

SFR's combined EBITDA includes contributions from Telindus France from May 2014. Telindus France's EBITDA was €10 million for 2013 and € 5 million for the nine months ended September 30, 2014, of which € 5 million was recorded in the SFR Combined Group's financial statements at September 30, 2014.

Excluding non-recurring charges, this evolution mainly reflects the decrease in revenue of €220 million. In total, on a comparable basis (excluding Telindus France, which entered the scope of consolidation on May 1, 2014), costs decreased by €89 million in the nine months ended September 30, 2014, as compared to the nine months ended September 30, 2013.

The decrease in costs during the nine months ended September 30, 2014, reflects:

- A decrease in acquisition and retention costs with respect to mobile customers linked to the implementation of a more selective policy, as well as a decrease in other costs linked to the improvement in operational efficiency. The ongoing long-term plan, started in 2012, aims to adapt the organization of SFR to market developments and to preserve its investment capacity in the very high-speed fixed and mobile sectors. Since the end of 2011, costs, both fixed and variable, have decreased by more than € 1 billion.

- This decrease in acquisition and retention costs of mobile customers offset the increase in interconnection costs between the first nine months of 2013 and the first nine months of 2014, with the decrease of certain regulated tariffs no longer offsetting the increase in volume, as was the case in previous years.

Combined operating income

	For the nine months ended September 30,			
	2014	2013	Variation	% Variation
	€ in millions			
EBITDA	**1,777**	**2,200**	**(423)**	**(19.2)%**
Net depreciation expenses and provisions on intangible and tangible assets	(1,153)	(1,136)	(17)	1.5%
Other operating income	2	1	1	N/A
Other operating expense	(117)	(76)	(41)	53.9%
Operating income	**510**	**989**	**(479)**	**(48.5)%**

SFR's combined operating income decreased by €479 million, or by 48.5%, in the nine months ended September 30, 2014, as compared to the nine months ended September 30, 2013, from €989 million for the nine months ended September 30, 2013, to €510 million for the nine months ended September 30, 2014.

This decrease reflects the decrease in EBITDA of €423 million and an increase in net depreciation expenses and provisions on intangible and tangible assets of €17 million, in connection with the increase in capital expenditures in recent years and the start of the amortization of the 4G licenses (2600 Mhz and 800 Mhz). Other operating charges increased by €41 million as compared to the nine months ended September 30, 2013, mainly due to non-recurring costs in relation to the planned sale of SFR: notably, as part of the sale of SFR by Vivendi to the Numericable Group, a €2,000 gross bonus was granted as an additional incentive and profit- sharing payment to the employees of the SFR Economic and Social Union (Unité Economique et Sociale SFR), generating a €26 million expense, accounted for in the nine months ended September 30, 2014.

Combined financial income (expense)

SFR's combined financial expense decreased by €43 million, or 21.8%, in the nine months ended September 30, 2014, as compared to the nine months ended September 30, 2013, from €198 million for the nine months ended September 30, 2013, to €155 million for the nine months ended September 30, 2014.

This lower expense reflects the decrease of €39 million in net financing costs, as compared to the nine months ended September 30, 2013. The decrease in the net financing cost results from the decrease in net average financial debt, which decreased from €8,541 million in the nine months ended September 30, 2013, to €6,721 million in the nine months ended September 30, 2014, while the average net financing cost remained stable (2.91% in the nine months ended September 30, 2013, to 2.92% in the nine months ended September 30, 2014).

Income tax on combined profit

Income tax on SFR's combined profit decreased by €150 million in the nine months ended September 30, 2014, from €314 million for the nine months ended September 30, 2013, to €164 million for the nine months ended September 30, 2014.

This €150 million savings mainly reflected the decrease in the profit before tax (tax effects: negative €173 million), not offset by the effect of the increase in the effective tax rate, from 39.7% to 45.7%. The change in the effective tax rate is due principally to the increase in the statutory tax rate, which increased from 36.1% to 38% for large companies (i.e. companies whose revenues are greater than €250 million) such as SFR and the increase in the non-deductible portion of interest expense (which increased from 15% to 25%).

Combined net earnings

SFR's combined net earnings decreased by €287 million for the nine months ended September 30, 2014 (a decrease of 60.9% as compared to the nine months ended September 30, 2013), from €471 million for the nine months ended September 30, 2013, to €184 million for the nine months ended September 30, 2014. This reduction reflects the decrease in operating income net of the effect of income taxes.

Analysis and Comparison of Results for the Years Ended December 31, 2012 and December 31, 2013

The table below shows the combined income statement of SFR for the years ended December 31, 2012 and December 31, 2013.

	2013	2012	Variation	% Variation
	€ in millions			
Revenues	**10,199**	**11,288**	**(1,089)**	**(9.7)%**
Cost of sales[(a)]	(4,851)	(5,113)	263	(5.1)%

Attributable to non-controlling interests	**6**	**6**	**—**	**0%**

(a) Excluding net depreciation expenses and provisions on intangible and tangible assets

Combined revenue

SFR's combined revenue decreased by €1,089 million, of 9.7%, from €11,288 million for the year ended December 31, 2012 to €10,199 million for the year ended December 31, 2013. This decrease primarily reflects the impact of decreases in mobile prices linked to severe competition and decreases in tariffs imposed by ARCEP which included: (i) a 33% decrease in regulated prices for MTRs on July 1, 2012, then 20% on January 1, 2013; (ii) 33% decrease in SMS termination rates on July 1, 2012; (iii) decrease in roaming rates on July 1, 2012 and July 1, 2013; (iv) 50% decrease in fixed termination rates on July 1, 2012, and 47% on January 1, 2013. Excluding the impact of lower tariffs imposed by ARCEP, the decrease in revenue would have been of 7.2%.

As of December 31, 2013, the total number of mobile customers of SFR amounted to 21.4 million, an increase of 756,000 from December 31, 2012. The December 31, 2013, total takes into account a technical purge of 92,000 inactive lines, in relation to a migration of the B2C billing system (without any impact on revenue). Excluding the impact of this purge, the B2C subscribers total increased by 2.5% between 2013 and 2012. The total number of residential customers subscribing to the broadband internet rose by 182,000 customers to 5.257 million at December 31, 2013.

Information by market

The changes in combined revenue by market are as follows:

	2013	2012	% Variation
	€ in millions		
B2C	6,873	7,974	(13.8)%
B2B	1,789	1,871	(4.4)%
Wholesale and Other	1,536	1,442	6.5%
Combined revenue	**10,199**	**11,288**	**(9.6)%**

The following table shows the changes in the performance indicators:

	2013	2012	% Variation
SFR Group			
Total mobile customers (in thousands)[(a)]	21,354	20,690	3.2%
Total internet customers (in thousands)	5,257	5,075	3.6%
Mobile acquisition costs (in € millions)	430	497	(13.4)%
Mobile retention costs (in € millions)	541	634	(14.7)%
B2C			
Total mobile customers (in thousands)[(a)]	14,555	15,057	(3.3)%
Total mobile subscribers (in thousands)[(a)]	11,381	11,194	1.7%
Smartphone penetration	64.1%	51.2%	12.9
12-month rolling Mobile ARPU (€ per month)	24.1	28.3	(15.0)%
Number of broadband internet customers (in thousands)	5,209	5,039	3.4%
Of which FTTH customers (in thousands)	197	126	55.6%
Of which quadruple-play customers ("MultiPack") (in % customer base)	45%	35%	9.8%
12-month rolling broadband internet ARPU (€ per month)	32.5	33.3	(2.6)%

(a) Total mobile customers is equal to the number of customers with active SIM cards in compliance with ARCEP's definition. The total number of customers as at December 31, 2013, integrates a 2013 technical purge of 92,000 inactive lines, which was related to a migration of SFR's invoicing system (without impact on revenues). The total number of customers as at December 31, 2012, is the published number (before the technical purge).

B2C

B2C segment revenues decreased by 13.8% to €6,873 million for the year ended December 31, 2013 from €7,974 million for the year ended December 31, 2012.

	2013	2012	% Variation
	€ in millions		
B2C			
Revenue	**6,873**	**7,974**	**(13.8)%**
Mobile	4,741	5,809	(18.4)%
Landline	2,132	2,165	(1.5)%

At the beginning of 2013, SFR implemented a marketing strategy to attract retail mobile customers to its newly priced offers. This resulted in a net decrease in churn as well as a decrease in revenue linked to the drop of the ARPU, which decreased by 15% between 2013 and 2012.

The lower revenue is attributable to (i) the repositioning of mobile subscribers to new and more competitive prices in 2013 (at December 31, 2013, 85% of B2C mobile subscribers had subscribed to offers launched after January 2012 and approximately 75% to offers launched after January 2013) and (ii) the effect in 2013 of the churn of customers during 2012 after the arrival of the fourth mobile telephone operator in January 2012.

In the B2C mobile market, the net growth of subscribers amounted to an additional 279,000 subscribers in 2013. At December 31, 2013, the total number of post-paid mobile subscribers was 11.381 million customers, representing growth of 2.5%. In the B2C post-paid subscribers segment, SFR recorded in the fourth quarter of 2013 its best net sales performance since the fourth quarter of 2011 and its best month of December for three years. Approximately 80% of gross recruitments in the fourth quarter were "Carré" premium offers, particularly the September 2013 launch of an innovative range of customer contracts. For example, 4G contract customers were able to choose an "Extra" amongst five premium services and content, enabling customers to benefit fully from mobile high speed: iCoyote (driving aid), Napster (music), CanalPlay (films), Gameloft (gaming) and SFR Presse (press) (see "*Description of SFR's Business—SFR Products and Services—B2C Services—Mobile Offers—Premium post-paid offers—"Formules Carrées*"). SFR also supported the development of no-frills offers: the "Red" offer, a no-frill offer, accounted for more than 1.7 million customers at the end of 2013. Including pre-paid customers, the total number of B2C mobile customers of SFR as of December 31, 2013, amounted to 14.555 million, compared to 15.057 million as of December 31, 2012.

The growth of mobile internet usage continued in 2013: 64% of B2C customers had smartphones as of December 31, 2013 (compared to 51% as of December 31, 2012).

In the B2C market for landline telephones, the total number of SFR's residential customers in metropolitan areas of France subscribing to high- speed internet amounted to 5.209 million at December 31, 2013, an increase of 170,000 customers compared to December 31, 2012. An increased take-up of services on SFR's fiber network represented 42% of net sales over the period. The total number of fiber customers amounted to 197,000 customers as of December 31, 2013. SFR has also strengthened the attractiveness of its sales offer with the launch of the TV SFR decoder with Google Play, giving access to the TV services of SFR as well as to the Google services on television to customers who were not at that time eligible for TV by ADSL. In the field of home automation, the number of customers subscribing to the Home offer by SFR reached over 20,000 customers at December 31, 2013 (see *"Description of SFR's Business—SFR's Products and Services—B2C Services—Fixed Telephony Offers*" and "*Description of SFR's Business—SFR's Products and Services—B2C Services—Fixed Internet Offers and related services—Bundled Internet, Telephony and IP Television (triple-play)*").

Finally, SFR has been pursuing its home equipment strategy, the "SFR Multi- packs" offer. This offer gives a connection discount to customers registering for a high-speed internet offer and a mobile subscription at the same time. Customers subscribing to this offer accounted for 2.355 million customers at December 31, 2013, representing 45% of SFR's total broadband internet customers for 2013, compared to 1.785 million customers at December 31, 2012, representing 35% of the broadband internet customers total for 2012.

B2B

B2B segment revenue decreased by 4.4% to €1,789 million for the year ended December 31, 2013 from €1,871 million for the year ended December 31, 2012. The sales dynamics of the B2B market remained strong, with strong gross adds over the period (particularly for connected objects); however, the economic environment has had an unfavorable effect on the attrition rate. Similarly, prices were affected by a difficult macroeconomic environment, where business customers sought to decrease their telecommunications expenses. In particular, smaller firms sought to renegotiate prices following the arrival of the fourth entrant in the mobile market.

In 2013, SFR focused on offers and services targeting medium and small enterprises, while continuing to widen its offers to large business customers. In particular, SFR added 4G to its contract offers as well as security services and device management. Further, SFR created the "*Entrepreneurs Business Pack*" (for VSEs), the "*Corporate Business Pack*" (for large companies) and "*Enterprise Business Pack*" (for SMEs), which offers a complete range of unified communications solutions. SFR has developed hosted value-added services for the largest accounts, as well as the use of cloud computing technologies and SAAS (Software as a service, which enables surfers to access the firm's applications via an interface) to provide simple services for SMEs. SFR's cloud services offers rely on an innovative storage technology, enabling a quick response to increasing capacity requirements.

As a leader for connected objects (MtoM), SFR has increased its initiatives to enable its customers to improve their efficiency. A notable example is the launch of m-alert, a solution dedicated to the securitization of persons and tracking of goods.

Wholesale and Other

The Wholesale and Other segment revenue was €1,536 million, showing growth of 6.5%, when compared to 2012 reflecting the good sales performance of the Wholesale business as well as a drop in inter-segment eliminations, partly offset by the unfavorable evolution of SRR revenue in a context similar to that of metropolitan areas of France.

In particular, the revenue of the Wholesale business has increased slightly, both for the fixed and mobile businesses, in spite of the drop in regulated roaming rates on prices of the mobile wholesale segment, and the collateral effect from the drop in prices in the B2C mobile market following the arrival of the fourth mobile operator. In addition, SFR hosts the main MVNOs on its mobile network, including La Poste Mobile (in which it has a holding of 49%), which had attracted 943,000 customers by the end of December 2013, as well as Virgin Mobile and NRJ Mobile, with which it has signed Full MVNO agreements.

Combined EBITDA

	2013	2012	Variation	% Variation
	€ in millions			
Revenue	**10,199**	**11,288**	**(1,089)**	**(9.6)%**
Cost of sales[(a)]	(4,851)	(5,113)	262	(5.1)%
Sales and distribution costs[(a)]	(1,928)	(1,965)	37	(1.9)%
General expenses[(a)]	(654)	(909)	255	(28.1)%
EBITDA	**2,766**	**3,301**	**(535)**	**(16.2)%**

(a) Excluding net depreciation expenses and provisions on intangible and tangible assets

SFR's combined EBITDA has decreased by €533 million, or 16.2%, from €3,299 million for the year ended December 31, 2012 to €2,766 million for the year ended December 31, 2013. This decrease reflects the decrease in revenue of €1,089 million offset partly by the decrease in costs. In total, excluding non-recurring items (€15 million of net non-recurring charges in 2012), costs decreased by €539 million compared to 2012.

This significant decrease in costs for 2013 was caused by the decrease in inter-connection costs, mainly due to the reduction of certain regulated tariffs (decrease of €128 million between 2013 and 2012), acquisition and retention costs with respect to mobile customers linked to the implementation of a more selective policy, the increase in the portion of offers without handsets in the park and other costs linked to the improvement in operational efficiency enabled by the optimization of processes and the development of performance tools, particularly due to ongoing implementation of the transformation plan. This long-term plan, started in 2012, aims to adapt the organization of SFR to market developments and to preserve its investment capacity in the very high-speed fixed and mobile sectors. Since the end of 2011, costs, both fixed and variable, have decreased by more than €1 billion. In addition, as a result of the voluntary departure plan initiated in 2012 and completed in August 2013, 873 staff members chose to leave SFR.

Combined operating income

	2013	2012	Change	% Change
	€ in millions			
EBITDA	**2,766**	**3,301**	**(535)**	**(16.2)%**
Net depreciation expenses and provisions on intangible and tangible assets.	(1,595)	(1,511)	(84)	5.6%
Other operating income	2	11	(9)	(81.8)%
Other operating expense	(169)	(270)	101	(37.4)%
Operating income	**1,005**	**1,530**	**(525)**	**(34.3)%**

The combined operating income of SFR decreased by €525 million in 2013 compared to 2012 (i.e. a reduction of 34.3%), decreasing from €1,530 million for the year ended December 31, 2012 to €1,005 million for the year ended December 31, 2013.

This reduction reflects the decrease in EBITDA of €535 million and an increase in net depreciation expenses and provisions on intangible and tangible assets of €84 million, which reflects the increase in investments in recent years and the start of the amortization of the 4G licenses (2600 Mhz and 800 Mhz). Other operating charges decreased by €101 million compared to 2012 as a result of the decrease in restructuring costs linked in particular to the voluntary departure plan referred to above, which decreased from €187 million in 2012 to €93 million in 2013 (see note 4.2 "Other operating income and expenses" in the SFR Combined Financial Statements).

Combined financial income (expense)

The combined financial expense of SFR increased by €2 million in 2013 compared to 2012 (i.e. an increase of 0.8%), from €249 million for the year ended December 31, 2012 to €251 million for the year ended December 31, 2013.

This increase reflects the increase in the €12 million increase in net financing costs, which was offset in part by smaller allowances for provisions for financial assets in 2013 compared to 2012. The increase in the net financing cost is explained by the increase in the average interest rate, which increased from 2.58% in 2012 to 2.80% in 2013, which was not fully offset by the decrease in net financial debt, which decreased from €8,397 million in 2012 to €8,160 million in 2013.

Income tax on combined profit

Income tax on SFR's combined profit decreased by €199 million in 2013, from €516 million for the year ended December 31, 2012 to €315 million for the year ended December 31, 2013.

This reduction reflects the decrease in the profit before tax, offset by the effect of the increase in the statutory tax rate, which increased from 36.1% to 38% for large companies such as SFR. The effective tax rate was therefore 42.5% in 2013, compared to 40.7% in 2012.

Combined net earnings

SFR's combined net earnings decreased by €326 million, 43.3%, in 2013, from €752 million for the year ended December 31, 2012 to €426 million for the year ended December 31, 2013. This reduction reflects the decrease in operating income net of the effect of income taxes.

Analysis and Comparison of Results for the Years Ended December 31, 2011 and December 31, 2012

The following table sets out the combined income statements of SFR for the years ended December 31, 2011 and December 31, 2012, in millions of euros.

	2012	2011	Change	% Change
		€ millions		
Revenues	**11,288**	**12,183**	**(895)**	**(7.3)%**
Cost of sales[(a)]	(5,113)	(5,681)	568	(10.0)%

(a) Excluding net depreciation expenses and provisions on intangible and tangible assets

Combined revenue

SFR's combined revenue decreased by €895 million, or 7.3%, from €12,183 million for the year ended December 31, 2011 to €11,288 million for the year ended December 31, 2012.

This decrease reflects the impact of price decreases linked to severe competition and decreases in tariffs imposed by regulators, namely: (i) a 33% decrease in regulated prices for MTRs on July 1, 2011, then 25% on January 1, 2012 and then 33% on January 1, 2012; (ii) a 25% decrease in SMS termination rates on July 1, 2011 and then 33% on July 1, 2012; (iii) a new asymmetrical Free termination rate; (iv) a decrease in roaming rates on July 1, 2011 and July 1, 2012; (v) a 40% decrease in fixed termination rates on October 1, 2011, and then 50% on July 1, 2012. Excluding the impact of the tariff reductions introduced by the regulators, revenue would have decreased by 3.3%.

Given the competitive environment marked by the arrival of a fourth mobile telephone operator in France at the beginning of 2012, which increased to a significant degree the intensity of competition in the French market, SFR adapted and simplified its offers by:

- launching in September 2012 new simplified "Formules Carrées", with six pricing plans structured around data and innovations dedicated to a high speed mobile service and a new accompanying segmented approach, "Services Carrées"; and
- adapting the content and prices of the "Series RED" offers, which require no commitment and are distributed mainly over the internet and aimed at the low price segment.

At the end of 2012, the total number of mobile customers of SFR amounted to 20.690 million, a decrease of 773,000 compared to December 31, 2011. The total number of high-speed internet customers as of December 31, 2011, was adjusted to remove 23,000 customers following the exit of Akéo 1P and 2P customers from the scope of consolidation. Customers is the average of the monthly averages during the period concerned. The monthly average is the arithmetic mean of the number of customers at the beginning and the end of the month. The number of customers subscribing to broadband internet increased by approximately 56,000customers to approximately 5.1 million at the end of December 2012.

Information by market

The combined revenue by market was as follows:

	2012	2011	% Change
	€ in millions		
B2C	7,974	8,982	(11.2)%
B2B	1,871	1,868	0.2%
Wholesale and Other	1,442	1,333	8.2%
Combined revenue	**11,288**	**12,183**	**(7.3)%**

The following table shows the changes in the performance indicators:

	2012	2011	% Variation
SFR Group			
Total mobile customers (in thousands)[(a)]	20,690	21,463	(3.6)%
Total internet customers (in thousands)[(b)]	5,075	5,019	1.1%
Mobile acquisition costs (€ millions)	497	602	(17.5)%
Mobile retention costs (€ millions)	634	645	(1.8)%
B2C[(c)]			
Total mobile customers (in thousands)[(a)]	15,057	16,578	(9.2)%
Total mobile subscribers (in thousands)[(d)]	11,194	11,961	(6.4)%
Smartphone penetration[(e)]	51.2%	42.1%	9.1pts
12-month rolling Mobile ARPU (€ per month)[(f)]	28.3	31.4	(9.6)%
Number of broadband internet customers (in thousands)[(b)]	5,039	4,994	0.9%
Of which fiber customers (in thousands)	126	97	29.7%
Of which quadruple-play customers (“MultiPack”) (in % customer base)	35%	24%	11.9pts
12-month rolling broadband internet ARPU[(f)] (€ per month)	33.3	34.1	(2.1)%

(a) Total Mobile Customers is equal to the net number of lines or SIM cards in compliance with ARCEP’s definition.

(b) The total number of high-speed internet customers as of December 31, 2011 was adjusted to remove 23,000 customers following the exit of Akéo 1P and 2P customers from the scope of consolidation.

(c) Metropolitan market, excluding SRR (which provides fixed and mobile services in La Reunion and Mayotte).

(d) Total mobile subscribers is equal to post-paid customers.

(e) Number of customers equipped with a smartphone in relation to the total mobile customer base (excluding remote access).

(f) Mobile “ARPU” is the average monthly revenue per customer. It is calculated by dividing the B2C Mobile Revenue (excluding equipment) generated over the last twelve months by the average number of customers (excluding MtoM customers, multi-SIM and backup keys) over the same period. The ARPU is expressed in monthly revenue by line. Broadband internet ARPU is the average monthly revenue per B2C broadband internet line. It is calculated by dividing the average monthly revenue, based on the last twelve months, by the average number of B2C broadband internet lines over the same period. The average number of

B2C

The revenue for B2C activity was €7,974 million in 2012, a decrease of 11.2% compared to 2011:

	2012	2011	% Change
	€ in millions		
B2C			
Revenue	**7,974**	**8,982**	**(11.2)%**
Mobile	5,809	6,750	(13.9)%
Fixed	2,165	2,232	(3.0)%

This reduction was mainly caused by the loss of mobile customers and the price erosion following the arrival of the fourth mobile operator in January 2012.

The monthly B2C Mobile ARPU decreased by 9.6% in 2012, from €31.4 in 2011 to €28.3 in 2012. The total number of B2C mobile customers (post- paid subscribers and pre-paid customers) declined 9.2% to 15.057 million. This reduction was mostly caused by a decrease in the number of pre-paid customers, as the attractiveness of pre-paid offers declined with the development of “no frills” offers, such as the Red offer, launched at the end of 2011, which had about 700,000 customers at the end of 2012. At the end of December 2012, the number of mobile (post-paid) subscribers amounted to

11.194 million customers, a decrease of 6.4% compared to the end of December 2011, predominantly due to the entry of the fourth mobile operator Free in 2012.

The year 2012 was also marked by continued growth in mobile data usage, brought about by the new generation of smartphones. At the end of 2012, 51% of B2C mobile customers had smartphones (compared to 42% at the end of December 2011).

In the B2C fixed market, the number of residential customers of SFR subscribing to broadband internet amounted to 5.039 million at December 31, 2012, an increase of approximately 45,000 customers compared to December 31, 2011. The “SFR Multi-Pack” offer had 1.785 million customers at the end of December 2012, meaning that 35% of high speed customers had both high speed internet and mobile subscriptions with SFR. The broadband internet ARPU declined 2.1%, from €34.1 at December 31, 2011 to €33.3 at December 31, 2012, in particular due to the decrease in revenues from fixed to mobile communications.

B2B

Revenue for the B2B segment was €1,871 million in 2012, a slight increase over the year (0.2%), due to growth in revenues from fixed products and services which offset the decrease in revenues from mobile products and services.

In 2012, SFR’s goal in the fixed segment was to become a leader in cloud computing for businesses. In September 2012, SFR, the Caisse des Dépôts et Consignations and Bull jointly founded Numergy to provide virtualized computer equipment solutions and enable businesses to take advantage of the potential of the digital transformation. SFR entered into a trade agreement with HP regarding new services to facilitate the adoption of cloud computing by businesses. Moreover, as SFR has been approved to host health data, SFR is positioning itself as an e-health expert. Lastly, SFR signed the “Contact 14 contract” with EDF, creating a customized multi-site, multi- channel and multi-skills virtual contact center.

In the mobile segment, SFR is a leader in connectivity for connected objects (MtoM). In addition, SFR has continued deployment of 150,000 lines under the Opache contract, which provides mobile, voice and data communications and supplies terminals for French ministries and institutions. Lastly SFR launched a new range of streamlined and modular mobile telephony offers and a collaborative on-demand messaging solution for its B2B customers.

Wholesale and Other

Wholesale and Other revenue totalled €1,442 million, an increase of 8.2%, reflecting sound commercial performance on the MVNO market. In 2012, SFR developed its wholesale activities with:

- Virgin Mobile, as a result of the strengthening of the partnership begun in 2011 in ADSL and Mobile.
- La Poste Telecom, virtual mobile operator in the retail market for mobile telephony and which offers a whole range of mobile telephony services, marketed under the La Poste Mobile brand through the La Poste network. At December 31, 2012, it had 643,000 customers.

Combined EBITDA

	2012	2011	Change	% Change
	€ in millions			
Revenue	**11,288**	**12,183**	**(895)**	**(7.3)%**
Cost of sales[(a)]	(5,113)	(5,681)	568	(10.0)%
Commercial and distribution costs[(a)]	(1,965)	(1,864)	(101)	5.4%
General expenses[(a)]	(909)	(838)	(71)	8.5%
EBITDA	**3,301**	**3,800**	**(501)**	**(13.2)%**

(a) Excluding net depreciation expenses and provisions on intangible and tangible assets

SFR’s combined EBITDA decreased by €501 million, or 13.2%, in 2012 compared to 2011, from €3,800 million for the year ended December 31, 2011 to €3,299 million for the year ended December 31, 2012. Excluding non-recurring profits and costs (€15 million net non- recurring costs in 2012 and €93 million non-recurring profits in 2011), combined EBITDA would have decreased by 10.6%.

This decline in Combined EBITDA reflects the €895 million decline in revenue due to the factors described above, partially offset by the €502 million decrease in costs excluding non-recurring items, particularly the decrease in interconnection costs owing mainly to the decrease in certain regulated tariffs (decrease of €257 million between 2012 and 2011), mobile acquisition and retention costs associated with the introduction of a more selective policy and other costs linked to the improvement in operational effectiveness made possible by the launch of the transformation plan in 2012, aimed at adapting its organization to market developments.

Combined operating income

	2012	2011	Change	% Change
	€ in millions			
EBITDA	**3,301**	**3,800**	**(499)**	**(13.1)%**
Net depreciation expenses and provisions on intangible and tangible assets.	(1,511)	(1,508)	(3)	0.2%
Other operating income	11	14	(3)	(21.4)%
Other operating expense	(270)	(84)	(186)	221.4%
Operating income	**1,530**	**2,222**	**(692)**	**(31.1)%**

SFR's combined operating income decreased by €692 million in 2012, or 31.1%, compared to 2011, from €2,222 million for the year ended December 31, 2011 to €1,530 million for the year ended December 31, 2012.

This reduction reflects the €501 million decrease in combined EBITDA and the impact of restructuring costs associated with the voluntary departure plan started in 2012, for which €169 million was recorded in "other operating costs" during 2012.

Combined financial income (expense)

Combined financial expense decreased by €21 million, of 7.8%, in 2012, from €270 million for the year ended December 31, 2011 to €249 million for the year ended December 31, 2012.

The net financing cost increased by only €9 million, as a result of the increase of average financial net debt, which increased from €6,400 million in 2011 to €8,397 million in 2012, offsetting the decrease in the average interest rate (2.58% in 2012 compared to 3.25% in 2011, in line with the decrease in interest rates). The decrease in other financial expense is essentially due to the €42 million non-recurring charge in 2011 linked to the net cost of unwinding swaps.

Income tax on combined profits

The tax on the combined profits of SFR decreased by €19 million in 2012, decreasing from €535 million for the year ended December 31, 2011, to €516 million for the year ended December 31, 2012. The impact of the €668 million decrease in pre-tax income was, to a large extent, offset by the following items:

- a tax savings of €127 million in 2011. On December 12, 2011 a sum of €452 million in tax losses was transferred to SFR in the context of a merger with Vivendi Telecom International. These tax losses were fully used by SFR in the 2011;

- an additional tax cost of €32 million in 2012 linked to the introduction of an 85% ceiling on interest that may be deducted.

Combined net earnings

SFR's combined net earnings decreased by €648 million (i.e. a reduction of 46.3%), decreasing from €1,400 million for the year ended December 31, 2011 to €752 million for the year ended December 31, 2012. This reduction essentially reflects the reduction in the operating income of €692 million.

Liquidity and Capital Resources of SFR

The principal financing requirements of SFR comprise its working capital requirements, its operating and financial investments, its interest payments, loan repayments, and the payments of dividends to its shareholders.

SFR has met these financing requirements principally through the cash flow generated by its operating activities and by current account advances and loans granted by Vivendi, its previous shareholder. In the future, the financing requirements of SFR will be met through the cash flow generated by its operating activities and by financing at the Numericable Group level.

The capacity of SFR to generate cash in the future through its operating activities will depend on its future operating performances, themselves dependent to a certain extent on economic, financial, competitive, market, regulatory and other factors, most of which are outside of the control of SFR.

The information analyzed in this section are based on SFR Combined Financial Statements, and in particular the combined cash flow statements and notes 15 and 20.

Sources and Use of Funds

During the years ended December 31, 2013, 2012 and 2011 and the nine months ended September 30, 2014 and 2013, SFR's principal sources of funds were principally the following:

- *net cash flow from operating activities:* this amounted to € 1,339 million and €1,416 million for the nine months ended September 30, 2014 and 2013, respectively, and €1,960 million, €2,892 million and €3,197 million for the years ended December 31, 2013, 2012 and 2011, respectively;

- *available cash:* the amounts of cash and cash equivalents were €141 million as of September 30, 2014 (including exchange hedge assets), and €394 million, €267 million and €228 million as at December 31, 2013, 2012 and 2011, respectively (see note 15 "Cash and cash equivalents" of the 2011, 2012 and 2013 Combined Financial Statements); and

- *borrowing and financial debts:* during 2013, 2012 and 2011 these notably comprised of the shareholder debt contracted by SFR with Vivendi via current account advances and loans, amounting to €8,672 million, €7,609 million and €5,461 million as at December 31, 2013, 2012 and 2011, respectively. Simultaneously with the acquisition of SFR by Numericable, the abovementioned shareholder debt between SFR with Vivendi was repaid and replaced with a new shareholder loan between Numericable and SFR. As of September 30, 2014, current account advances and loans under this loan amounted to €4,855 million. Since the 2014 SFR Acquisition, which was completed on November 27, 2014, SFR's financing requirements will be met by the cash flow generated through its operating activities and by financing at the Numericable Group level.

The table below presents the amount of the net financial debt of SFR, corresponding to the net borrowing and financial debts of the cash and cash equivalents, as at December 31, 2013, 2012 and 2011 and September 30, 2014:

	As of December 31,			As of September 30,
	2013	**2012**	**2011**	**2014**
			€ in millions	
Borrowing and financial debt	9,094	8,067	7,385	4,923
Cash, cash equivalents and exchange hedge assets	394	267	228	141
Net financial debt	**8,700**	**7,800**	**7,157**	**4,782**

SFR's net financial debt amounted to €4,788 million as of September 30, 2014, compared to €8,700 million as at December 31, 2013. This decrease of €3,912 million is mainly due to the payment of the sales price for the sale of the shares of SPT, which held the interest in Maroc Telecom. As explained in the SFR Q3 2014 Combined Financial Statements, the sales price, net of tax related to the capital gain realized, of €4,056 million was recorded in shareholders' equity, as it was considered as a contribution in compensation of a debt of Vivendi, the amount of the sale being deducted from the amount owed to Vivendi as a shareholder current account advance. Adjusted for this €4,056 million, net financial debt increased by €144 million, due to the cash flow linked to capital expenditures (operating investments) of €1,244 million and interest payments of €147 million, which more than offset the net cash flow from operating activities of €1,339 million.

SFR's net financial debt amounted to €8,700 million as at December 31, 2013, compared to €7,800 million as at December 31, 2012. This increase of €900 million can principally be explained by the cash flow linked to capital expenditures of €1,610 million, interest payments of €229 million and dividends of €985 million, which more than offset the net cash flow from operating activities of €1,960 million.

SFR's net financial debt increased by €643 million between December 31, 2011 and December 31, 2012, from €7,157 million as at December 31, 2011 to €7,800 million as at December 31, 2012. This increase can principally be explained by the cash flow linked to capital expenditures of €2,765 million (including €1,065 million for 4G licenses), interest payments of €217 million and dividends of €538 million, which more than offset the net cash flow from operating activities of €2,892 million and which was financed by way of an increase in shareholder debt.

For a description of changes in cash flows for the period, see "—*Cash Flow Analysis*" below. For a description of the change in loans and financial debt, see "—*Financial Liabilities—Loans and financial debt as* of December 31, 2011, 2012 and 2013 and September 30, 2014" below.

Financial Liabilities

The following table presents SFR's loans and financial debt as of December 31, 2011, 2012 and 2013 and September 30, 2014.

	As of December 31,			As of September 30, 2014
	2013	2012	2011	
	€ in millions			
Shareholder debt	8,672	7,609	5,461	4,855
Bond issuance(s)	300	300	1,296	—
Securitization of receivables	—	—	422	—
Bank loans	50	66	48	13
Debt related to financial leases	11	15	24	9
Other financial debt	60	77	136	45
Borrowing and financial debt	**9,094**	**8,067**	**7,385**	**4,923**

Borrowing and financial debt decreased by €4,171 million in the nine months ended September 30, 2014, principally due to the € 3,817 million decrease in the shareholder debt owed to Vivendi, composed mainly of shareholder advances and loans, as described below.

Borrowing and financial debt increased by €1,027 million in 2013, principally due to the €1,063 million increase in the shareholder debt owed to Vivendi, composed mainly of shareholder advances and loans, as described below.

Borrowing and financial debt increased by €682 million in 2012, principally due to the €2,148 million increase in shareholder debt owed to Vivendi, intended to finance the €1,000 million repayment of a bond issuance in 2012 and the end of the receivables securitization program, which represented €422 million as of December 31, 2011.

The following were the main categories of SFR's borrowing and financial debt as of September 30, 2014:

Shareholder debt (€4,855 million as of September 30, 2014)

Shareholder debt corresponds to the financial debt contracted with Vivendi in the form of:

- shareholder advances (cash current accounts): this is an advance granted to SFR by Vivendi as part of a short-term cash management agreement signed in February 2014, which replaced the previous advance granted in June 2011. The advance amounted to €3.4 billion as of June 30,

- 2014 and €7.5 billion, €4.9 billion and €1.8 billion as of December 31, 2013, 2012 and 2011. This advance is denominated almost entirely in euros. The interest rate is fixed according to market conditions at Euribor plus a margin of 3%;

- shareholder loans (loans or credit facilities entered into between SFR and Vivendi):

    - a loan entered into in December 2011 for €1.2 billion, bearing interest at Euribor plus a margin of 0.825% and maturing in June 2015 and which was still in force as of June 30, 2014;

    - a revolving credit facility entered into in January 2011 for € 1 billion, bearing interest at the Euribor rate plus a margin of 1% and which matured in 2012; and

    - a €1.5 billion revolving credit facility, entered into in June 2009, bearing interest at Euribor plus a margin of 2.5% and which matured in June 2013.

Bond issuance

SFR repaid €300 million of bonds at maturity on July 9, 2014, which were issued in July 2009 and bore interest of 5%.

As of December 31, 2011, SFR also had bonds outstanding of €1 billion. These bonds were composed of an initial issuance in 2005 of € 600 million of bonds due July 18, 2012, with a 3.375% coupon, increased by the issuance on May 5, 2008 of an additional €200 million, with a coupon of 5.155% and an issuance on January 28, 2009 of an additional €200 million, with the same maturity date. These issuances increased the amount of bonds outstanding due July 18, 2012 to €1 billion. These bonds were repaid in full at maturity in July 2012.

Bank loans (€13 million as of September 30, 2014)

SFR also used bank overdrafts provided periodically by credit institutions.

Other financial debt(€45 million as of September 30, 2014)

This category is composed mainly of accrued interest on the bond issuances as well as the bank loans of subsidiaries of the SFR Combined Group.

As of December 31, 2011, this category also included €40 million of commercial paper that was repaid in full in June 2012.

A receivables securitization program was set up in February 2011 for up to €500 million.

This program related to the sale of receivable held by SFR, with respect to customers pursuant to subscriptions or the provision of mobile telephony services and of the Société Allumettière Française with respect to prepaid recharge coupons, to a debt securitization fund created for the program. This program, which amounted to €422 million as of December 31, 2011, closed ahead of the original due date in June 2012.

Cash Flow Analysis

The following table summarizes the cash flows of SFR for the years ended December 31, 2013, 2012 and 2011 and the nine months ended September 30, 2014 and 2013 presented in the combined cash flow statement:

	As of December 31,			As of September 30,	
	2013	**2012**	**2011**	**2014**	**2013**
			€ in millions		
Net cash flow from operating activities	1,960	2,892	3,197	1,339	1,416
Net cash flow from investment activities	(1,638)	(2,765)	(1,903)	(1,244)	(1,265)
Net cash flow from financing activities	(195)	(89)	(1,155)	(354)	(161)
Changes in cash and cash equivalents	**128**	**38**	**139**	**(259)**	**(10)**

Net cash flow from operating activities

SFR considers Cash Flow From Operations ("CFFO"), a non-accounting indicator, to be a pertinent indicator of the SFR Group's operating performance. CFFO chiefly relates to the net cash flow derived from operating activities in the statement of cash flows ("SCF"), after deducting investments net of disposals and changes in the related working capital, adjusted for corporate income tax payments. "Cash Flow From Operations (before investments)" is defined as CFFO before investments net of sales and excluding purchases of licenses and change in working capital requirements linked to investments.

The table below presents the CFFO together with the net operating cash flow for the years ended December 31, 2013, 2012 and 2011 and the nine months ended September 30, 2013 and 2014:

		Year ended December 31,			Nine months ended September 30,	
		2013	2012	2011	2014	2013
		€ in millions				
EBITDA	(a)	2,766	3,301	3,800	1,777	2,200
Adjusted change to WCR (not linked to net investments)	(b)	(305)	154	59	(321)	(406)
Restructuring costs disbursed	(c)	(179)	(27)	(23)	(59)	(101)
Other items	(d)	(22)	4	5	127	8
Cash Flow From Operations (before investments) (I) (a)+(b)+(c)+(d)		**2,259**	**3,429**	**3,840**	**1,526**	**1,702**
Tangible and intangible investments (excl. licenses)		(1,665)	(1,658)	(1,695)	(931)	(1,012)
Sale of tangible and intangible assets		17	13	13	22	3
Investments, net of sales (excl. licenses)		***(1,648)***	***(1,645)***	***(1,682)***	***(909)***	***(1,009)***
Change in WCR linked to net investments		38	15	23	(329)	(233)
Investments (excl. licenses) net of WCR change	(e)	**(1,610)**	**(1,630)**	**(1,659)**	**(1,238)**	**(1,242)**
Cash Flow From Operations (before licenses II) (I) + (e)		**649**	**1,799**	**2,181**	**288**	**460**
Acquisition of licenses and associated spectrums	(f)	—	(1,107)	(150)	—	—
Cash Flow From Operations (III) (II) + (f)		**649**	**693**	**2,032**	**288**	**460**

The table hereunder reconciles Cash Flow From Operations (before investments) to net cash flow from operating activities:

	Year ended December 31,			Nine months ended September 30,	
	2013	2012	2011	2014	2013
	€ in millions				
Cash Flow From Operations (before investments)	**2,259**	**3,429**	**3,840**	**1,526**	**1,702**
Taxes paid	(299)	(537)	(643)	(187)	(286)
Net cash flow from operating activities	**1,960**	**2,892**	**3,197**	**1,339**	**1,416**

The Cash Flow From Operations (before investments) amounted to € 1,526 million for the nine months ended September 30, 2014, as compared with €1,702 million for the nine months ended September 30, 2013. This €176 million decrease was mainly due to the decrease in net flow generated by the activity (EBITDA) of €423 million, which was offset by a €85 million decrease in working capital requirements, which went from requirements of €406 million for the nine months ended September 30, 2013, to requirements of €321 million for the nine months ended September 30, 2014.

The Cash Flow From Operations (before investments) amounted to € 2,259 million for the year ended December 31, 2013, as compared with €3,429 million for the year ended December 31, 2012. This € 1,170 million decrease was mainly due to the decrease in net flow generated by the activity (EBITDA), the €305 million increase in working capital requirements and the increase in restructuring costs disbursed, which increased from €27 million for 2012 to €179 million for 2013.

The Cash Flow From Operations (before investments) amounted to € 3,429 million for the year ended December 31, 2012, as compared with €3,840 million for the year ended December 31, 2011. This decrease of €411 million can notably be explained by the decrease in net cash flow generated by the activity (EBITDA), partly offset by the positive change in working capital requirements of €154 million.

Working Capital Requirements (Not Linked to Net Investments)

The working capital requirements of SFR correspond principally to the value of inventory (composed mainly of mobile handsets, modems, set-top boxes and accessories) plus trade accounts receivable and other receivables and less trade accounts payable and other payables. The working capital requirements of SFR result from the specificities of each of its markets.

With respect to the B2C market, SFR generates working capital in connection with the shorter customer payment periods (generally 30 days) compared to those of the suppliers (generally 60 days), while with respect to the B2B and Wholesale and Other markets, SFR consumes working capital because the B2B and Wholesale and Other customers benefit from longer payment periods.

SFR generally finances its working capital requirements by means of cash flow generated by its sales. The change in working capital requirements of SFR can be broken down as follows for the nine months ended September 30, 2014 and 2013 and the years ended December 31, 2013, 2012 and 2011:

	Year ended December 31,			Nine Months ended September 30,	
	2013	2012	2011	2014	2013
	€ in millions				
Change in working capital requirements in the Statement of Combined Cash Flow	**(305)**	**143**	**54**	**(323)**	**(404)**
Inventories	6	111	(41)	(21)	(14)
Trade accounts receivable	69	203	126	(63)	(28)
Other receivables	(84)	198	(49)	64	(46)
Trade accounts payable	(84)	(191)	(80)	(7)	(110)
Other payables	(212)	(178)	97	(295)	(205)
Adjustments		11	6	1	(2)
Adjusted change in working capital requirements	**(305)**	**154**	**60**	**(321)**	**(406)**

SFR consumed €321 million of working capital in the nine months ended September 30, 2014, compared to €406 million in the nine months ended September 30, 2013. This difference is mainly due to increased, and better, cash collection.

SFR consumed €305 million of working capital in 2013, while it generated working capital in 2012. This change was principally due to:

- a decrease in the line item "Trade accounts receivable", in connection with the decrease in revenue of the B2C activity;
- an increase in the line item "Other receivables", and particularly the tax receivables (other than corporate income tax and VAT) and a decrease in the line item "Other payables", and notably tax payables in relation to 2012. This is linked to the merger of SFR with Vivendi Télécom International which took place in 2011 and which led to deferring from 2012 to 2013 the settlement and payment of interim taxes such as the Contribution on Value Added of Companies ("CVAE") and the Tax on Electronic Communications; and
- a decrease in the line item "Trade accounts payable", in line with the decline in the B2C activity.

For the year ended December 31, 2012, SFR generated working capital of €154 million, which can be explained by the following elements:

- the reduction in "Inventories", resulting from better management;
- the reduction in the line item "Trade accounts receivable", linked to the decrease in the revenue of the B2C activity;
- the reduction in the line item "Other receivables", and notably those of tax receivables, linked to a lower amount of interim payments on the CVAE and the Tax on Electronic Communications paid in 2012 following the merger with Vivendi Télécom International mentioned above; and
- the decrease in the line item "Trade accounts payable", in line with the decline in activity.

Tax paid

In the nine months ended September 30, 2014, taxes paid represented a cash outflow of €187 million, compared to a cash outflow of €286 million in the nine months ended September 30, 2013, in line with the decrease in taxable income.

Taxes paid represented a cash outflow of €299 million for the year ended December 31, 2013, compared to a cash outflow of €537 million in 2012, in line with the decrease in taxable income, offset by the increase in the tax rate from 36.1% to 38%.

Taxes paid represented a cash outflow of €643 million in 2011, which resulted from tax savings in 2011 of €127 million following the use of €452 million of tax losses transferred to SFR as part of its merger with Vivendi Télécom International.

Net Cash From (Used In) Investing Activities

The following table summarizes the net cash from (used in) investing activities by SFR for the years ended December 31, 2013, 2012 and 2011 and the nine months ended September 30, 2014 and 2013:

	As of December 31,			As of September 30,	
	2013	2012	2011	2014	2013
			€ in millions		
Purchase of tangible and intangible assets (excluding licenses)	(1,649)	(1,644)	(1,682)	(909)	(1,009)
Change in working capital requirements linked to capital expenditures (operating investments)	38	15	23	(329)	(233)
Investments (excluding licenses) net of the change in working capital requirements	**(1,611)**	**(1,629)**	**(1,659)**	**(1,238)**	**(1,242)**
Acquisition of licenses and associated frequencies	—	(1,107)	(150)	—	—
Net cash flow from operating investing activities	***(1,611)***	***(2,736)***	***(1,809)***	***(1,238)***	***(1,242)***
Net flows from combined entities net of cash acquired	7	(17)	(28)	(35)	7
Net flows from financial assets	(34)	(11)	(66)	29	(30)
Net cash flow from financial investments	***(27)***	***(28)***	***(94)***	***(6)***	***(23)***
Net cash from (used in) investing activities	**(1,638)**	**(2,764)**	**(1,903)**	**(1,244)**	**(1,265)**

In the nine months ended September 30, 2014, net cash used in investing activities decreased by €21 million compared to the nine months ended September 30, 2013, from an outflow of €1,265 million in the nine months ended September 30, 2013, to €1,244 million in the nine months ended September 30, 2014.

In 2013, net cash used in investing activities decreased by €1,127 million compared to 2012, from an outflow of €2,764 million in 2012 to an outflow of €1,638 million in 2013. Operating capital expenditures (or operating investments) were lower in 2013 due to the peak in the purchases of 4G frequencies (800 Mhz) in 2012 for €1,065 million.

In 2012, net cash used in investing activities increased by €862 million compared to 2011, from an outflow of €1,903 million in 2011 to an outflow of €2,764 million in 2012. This increase results from the increase in operating capital expenditures linked to the purchases of 4G frequencies, which amounted to €1,065 million in 2012 (800 Mhz), compared to €150 million in 2011 (2.6 Ghz).

Net cash flow from operating investing activities

The net total operating capital expenditures made by SFR represented € 1,238 million and €1,242 million in the nine months ended September 30, 2014 and 2013, respectively, and €1,611 million, €2,736 million and €1,809 million for the years ended December 31, 2013, 2012 and 2011, respectively.

The table below shows the distribution of the operating capital expenditures of SFR between acquisition of tangible and intangible assets for the years ended December 31, 2013, 2012 and 2011 and the nine months ended September 30, 2014 and 2013:

	Year ended December 31,			Nine months ended September 30,	
	2013	2012	2011	2014	2013
			€ in millions		
Acquisition of intangible assets—licenses	—	(1,107)	(150)	—	—
Acquisition of intangible assets—other	(586)	(578)	(568)	(358)	(364)
Acquisition of tangible assets	(1,079)	(1,080)	(1,127)	(573)	(648)
Acquisitions of tangible and intangible assets	**(1,665)**	**(2,765)**	**(1,845)**	**(931)**	**(1,012)**
Sales of tangible and intangible assets	(17)	(13)	(13)	(22)	(3)
Operating capital expenditures net of sales	**(1,649)**	**(2,751)**	**(1,832)**	**(909)**	**(1,009)**
Change in working capital requirements linked to operating capital expenditures	(38)	(15)	(23)	329	233
Operating capital expenditures	**(1,610)**	**(2,736)**	**(1,809)**	**(1,238)**	**(1,242)**

The investments principally related to the priorities of the SFR Combined Group detailed below.

Acquisition of licenses

The evolution over the last three years is marked by considerable investments in the context of the LTE (4G) licenses, with investments in these licenses totaling €150 million in October 2011 (2.6 GHz band) and € 1,065 million in January 2012 (800 MHz band).

Investments excluding licenses

Excluding licenses, the principal categories of investments are:

- fixed and mobile networks;
- information systems;
- equipment installation at clients' premises; and
- other investments, such as real estate and investments in the commercial distribution network;

For the year ended December 31, 2013 SFR's investments excluding licenses were distributed as follows: 60% network, 24% client equipment, 14% information systems and 2% other.

a) Investments in the network:

i. Continuation of 3G roll-out

The SFR GSM/GPRS network (2G) covered over 99.7% of the French population as of December 31, 2013, and, as of September 30, 2014, and the UMTS/HSPA network (3G/3G+) over 99% as of December 31, 2013, and as of September 30, 2014.

SFR continued to increase the capacity of its network to support the new uses of mobile internet, with 3G+ and 4G data traffic having increased by over 40% in the year ended December 31, 2013, and 70% in the nine months ended September 30, 2014.

Beyond the increase in speeds, SFR continued to invest in the densification of its 3G+ network and, in the densely populated areas, its rolling out of 3G+ over the 900 MHz frequency band, notably in Lyon, Marseille and Toulouse. This technology contributes to improving the quality of voice and mobile internet services.

To assure better coverage in terms of very high speed mobile, SFR has a large coverage in the Dual Carrier technology (latest evolution of 3G), thus covering over 75% of the population as of September 30, 2014, and making it possible to double download speeds.

ii. Acceleration of 4G roll-out

The roll-out of 4G in the 800 MHz frequency band (known as "golden frequencies") further enables more efficient coverage with better service quality, notably inside buildings. At the same time, the roll-out of 4G in the 2,600 MHz frequency band in densely populated areas enables mobile internet customers to have access to download speeds of up to 115 Mbits/s.

In the nine months ended September 30, 2014, SFR continued its investments in 4G coverage.

iii. Fixed: unbundling and roll-out of fiber optic (FTTH)

As of September 30, 2014, SFR held the largest alternative fixed network in France. With almost 6,500 NRA (Subscriber Connection Nodes) unbundled, SFR had almost 28 million homes unbundled to ADSL access. During the year ended December 31, 2013, more than 800 NRAs were unbundled, being the biggest annual volume since the start of unbundling in France in 2001.

SFR has also made investments in the very-high-speed fixed sector. During the year ended December 31, 2013, SFR invested in the development of FTTH, making more than 1.5 million homes in mainland France eligible for optical fiber (as compared with 1.1 million at end 2012). As of September 30, 2014, this number had increased to approximately 2.1 million homes.

b) Investments in information systems

Within the framework of its ONE transformation plan, SFR is putting in a considerable effort to renew its information systems, investing 14% (over €200 million) of its investments excluding licenses in 2013 to renewing such technologies. These investments have the purpose of rationalizing the existing systems by simplifying the architecture and reducing the number of application subsystems. This investment strategy meets a twofold objective: simplify the operation and thus generate savings in maintenance costs, and improve the customer service quality of SFR over all points of contact (physical distribution network, call centers, internet).

c) Investments in customer equipment

These investments cover equipment owned by SFR and provided to customers, consisting mostly of:

- the costs of modems and internet decoders provided to ADSL and fiber optic customers on the B2C segment;
- the incidental costs associated with the connection of internet clients, including notably the logistics costs of shipping the equipment and the access fees to the service billed by Orange;
- the connection costs of optical fiber customers;
- SIM cards;
- the Femto Cell equipment offered to improve coverage inside the home; and
- the telecoms equipment made available to companies (modems, routers, PABX, etc.).

The majority of these investments correspond to the equipment and costs associated with marketing of the ADSL and optical fiber offers on the B2C market.

Net cash flow from financial investment activities

The financial investments made by SFR represented €6 million and €22 million for the nine months ended September 30, 2014 and 2013, respectively, and €28 million, €29 million and €94 million as at December 31, 2013, 2012 and 2011, respectively.

	Year ended December 31,			**Nine months ended September 30,**	
	2013	**2012**	**2011**	**2014**	**2013**
	€ in millions				
Net flow from combined entities net of cash acquired	7	(17)	(28)	(35)	8
Net flow from other financial assets	(34)	(11)	(66)	29	(30)
Net flow from financial investment activities	***(28)***	***(29)***	***(94)***	***(6)***	***(22)***

In the nine months ended September 30, 2014, these financial investments mainly consisted of:

- the acquisition of the shares of Groupe Telindus France for a total of €36 million for the share of the securities net of €6 million in cash acquired, and with the amount of debt acquired increasing the line "Repayment of loans" in the combined cash flow statement. On April 30, 2014, SIG 50 acquired all of the shares of Groupe Telindus France from the Belgacom group for a total amount of €88 million net of € 6 million of acquired cash; and
- repayment of shareholder advances of the Foncière Rimbaud (1 & 2) companies following the sale of real estate of the Saint-Denis site for a total amount of €22 million.

In 2013, these financial investments mainly consisted of equity and current account advances of the companies Foncière Rimbaud (1 to 4), in which SFR holds a 50% stake, alongside Vinci, within the framework of the construction of the headquarters of the SFR Group in Saint-Denis.

In 2012, SFR took a stake of 46.7% in Numergy, created with Bull and the Caisse des Dépôts and which offers a range of IT infrastructure capable of hosting data and applications, accessible remotely and securely ("cloud computing services"), with robust security and confidentiality protection. SFR's interest, which amounts to €105 million, is, as of the date of these Listing Particulars, paid up at the 25% level, i.e. €26 million.

The financial investments in 2011 mainly consisted of the 49% stake taken in La Poste Telecom.

For further information, see note 11 to the SFR 2011, 2012 and 2013 Combined Financial Statements of SFR.

Net cash from (used in) financing activities

The following table summarizes the net cash from (used in) financing activities by SFR for the years ended December 31, 2013, 2012 and 2011 and the nine months ended September 30, 2014 and 2013:

	As of December 31,			As of September 30,	
	2013	**2012**	**2011**	**2014**	**2013**
	€ in millions				
Net interest paid	(229)	(217)	(208)	(147)	(186)
Dividends paid	(985)	(538)	(1,458)	(7)	(985)
Issuances/repayments of borrowings (including bonds)	(15)	(1,019)	(447)	(358)	(10)
Change in shareholder advances	1,066	2,144	2,142	239	895
Change in other financial liabilities	(25)	(455)	(1,144)	(47)	131
Other cash flow related to financing activities	(7)	(5)	(40)	(33)	(6)
Net cash from (used in) financing activities	**(195)**	**(89)**	**(1,155)**	**(354)**	**(161)**

Net interest paid

SFR paid €147 million and €186 million, respectively, of net interest in the nine months ended September 30, 2014 and 2013, and € 229 million, €217 million and €208 million, respectively, in 2013, 2012 and 2011.

Net interest paid was essentially composed of interest paid on loans, less interest received from the short-term investment of cash.

In the nine months ended September 30, 2014, net interest paid decreased by €39 million, from €186 million in the nine months ended September 30, 2013, to €147 million in the nine months ended September 30, 2014, due to the decrease in average net financial debt, which declined from €8,541 million in the nine months ended September 30, 2013, to €6,721 million in the nine months ended September 30, 2014, while the average cost of financing remained stable.

In 2013, net interest paid increased by €12 million, or 5.5%, from €217 million in 2012 to €229 million in 2013, due to the increase in the average annual cost of financing, which increased from 2.58% in 2012 to 2.8% in 2013, and despite the decrease in average net financial debt, which declined from €8,397 million in 2012 to €8,160 million in 2013.

In 2012, net interest paid increased by €9 million, or 4.3%, from €208 million in 2011 to €217 million in 2012. The increase in interest paid was related to the increase in average net financial debt, which increased from €6,400 million in 2011 to €8,397 million in 2012, partially offset by the decrease in the average cost of financing, from 3.25% in 2011 to 2.58% in 2012 due to the changes in interest rates on the financial market.

Dividends paid

SFR paid €985 million, €538 million and €1,458 million, respectively, in dividends to shareholders in 2013, 2012 and 2011. No material dividend (€7 million) was paid in the nine months ended September 30, 2014. For more information regarding dividends paid, see note 16 "Information on Equity" in the SFR 2011, 2012 and 2013 Combined Financial Statements.

Repayment of debt

In the nine months ended September 30, 2014, repayments of debt totalled €358 million, of which €58 million were with respect to the repayment of the shareholder advance to Belgacom as part of the acquisition of Groupe Telindus France (see "*—Net Cash From (Used In) Investing Activities—Net Cash Flow from Financial Investment Activities*").

On July 9, 2014, the €300 million bond issuance was repaid. In 2013, repayment of debt (including repayment of bond issuances) represented €15 million compared to €1,019 million in 2012, resulting principally from the repayment of the €1,000 million bond issuance in July 2012.

In 2011, repayment of debt (including repayment of bonds) represented €447 million, resulting primarily from the repayment of a banking facility.

Change in shareholder debt

The €239 million increase in shareholder debt in the nine months ended September 30, 2014, resulted mainly from the increase in shareholder advances from Vivendi, less the amount received from the sale of the securities of SPT (the holding company of the interest in Maroc Telecom). The sales price, net of tax related to the capital gain realized, of € 4,056 million was recorded in shareholders' equity, as it was considered a contribution in compensation of a debt of Vivendi, the amount of the sale being deducted from the amount owed to Vivendi as a shareholder advance.

The €1,066 million increase in shareholder debt in 2013 resulted mainly from the increase in shareholder advances from Vivendi of €2.6 billion, which was used to finance the repayment of a revolving credit facility in the amount of €1,500 million, which was signed in July 2009 and which matured in June 2013.

The €2,144 million increase in shareholder debt in 2012 related to the increase in shareholder advances from Vivendi of €4.7 billion, which was used to finance the repayment of €1,000 million of a shareholder loan and a short-term credit line (which amounted to € 1,542 million as of December 31, 2011).

The €2,142 million increase in shareholder debt in 2011 related mainly to the €1,200 million increase in shareholder loans. The remaining €942 million related to shareholder advances.

Change in other financial debt

In 2013, the SFR Combined Group repaid €25 million of other financial debt, compared to €455 million in 2012, which resulted primarily from the payment of the remainder of the receivables securitization program put in place in February 2011 and closed in June 2012.

In 2011, SFR repaid €1,144 million in other financial debt, reflecting mainly the repayment of commercial paper in the amount of €814 million.

Contractual Obligations and Off-Balance Sheet Arrangements

SFR's significant contractual obligations are detailed below.

Contractual commitments for the acquisition of tangible and intangible assets as of December 31, 2013

The amount of contractual commitments for the acquisition of tangible and intangible assets amounted to €889 million as of December 31, 2013. This amount includes commitments linked to the roll-out of telecommunications networks.

The schedule of these commitments is as follows:

	Minimum future payments	Less than one year	2 - 5 years	More than 5 years	2012	2011
			€ in millions			
Commitments related to Public Service Concessions (DSP)	72	27	22	23	262	336
Commitments on MDPA[(a)]	216	19	99	99	8	—
Other investments[(b)]	600	582	19	—	702	1,776
Total	**888**	**628**	**139**	**122**	**972**	**2,112**

(a) Commitments related to the roll-out of the FTTH within the Moderately Densely Populated Areas (MDPA).

(b) In 2011, the amount includes the commitment to acquire the LTE license, in the amount of €1,065 million.

Contractual commitments related to licenses as of December 31, 2013

SFR has the following list of commitments linked to telecommunication licenses:

Commitments given	Amount	Maturity
(a) UMTS license on French territory	1% of revenues generated	2021 - 2030
(a) GSM license on French territory	1% of revenues generated	2021
(a) LTE license on French territory	1% of revenues generated	2031 - 2032
(b) 3G network coverage	Not costed	2013
(c) 4G network coverage	Not costed	2023 - 2027

Commitments received	Amount	Maturity
(a) Network operating and telecommunications service provision authorizations on French territory	Not costed	2021/2032

(a) SFR is the holder of operating authorizations for its networks and for the provision of telecommunications services in France, under the following financial conditions:

- payment of a fixed part, either recorded in debt (GSM) or paid at the time of allocation (UMTS and LTE); and
- payment of a variable part corresponding to 1% of the revenues generated by these licenses.

(b) On November 30, 2009, ARCEP called on SFR to comply with its obligations to roll out the UMTS networks no later than December 31, 2013, which were to provide a rate of cover of the French metropolitan population of 99.3%.

As of December 31, 2013, the Group believes it has fulfilled its coverage obligations, subject to verification by ARCEP.

(c) Within the framework of allocation of the first block of LTE frequencies in October 2011, SFR undertook to respect the roll-out obligations for very high-speed mobile in accordance with the below timeline:

- 25% of the metropolitan population by October 11, 2015;
- 60% of the metropolitan population by October 11, 2019; and
- 75% of the metropolitan population by October 11, 2023.

These coverage obligations may be met by the use of 2.6 GHz frequencies or through the use of other frequencies held by SFR.

Through Decision No. 2012-0039 of the ARCEP dated January 17, 2012, SFR was allocated 2*10 MHz in the 800 MHz band for the sum of € 1,065 million. The commitments linked to this allocation are as follows:

- SFR undertook to fulfilL the following obligations for roll-out of very high-speed mobile:
  - coverage of 98% of the French metropolitan population by January 17, 2024 and 99.6% of the French metropolitan population by January 17, 2027;
  - coverage in the priority roll-out area (around 18% of the French metropolitan population and 63% of the territory): SFR must cover 40% of the population of this priority roll-out area by January 17, 2017 and 90% of the population of this same area by January 17, 2022; and
  - departmental coverage: SFR must cover 90% of the population of each French department by January 17, 2024 and 95% of the population of each department by January 17, 2027.
- SFR and Bouygues Telecom have a mutual obligation to share the network or share frequencies in the priority roll-out area.
- SFR has an obligation to host Free Mobile roaming in the priority roll-out area when it has covered 25% of the French population with its own network at 2.6 GHz, and if it has not signed a national roaming agreement with another operator.
- SFR must cover, jointly with the other holders of the 800 MHz band, the town centers identified by the public authorities within the framework of the “white areas” program (above 98% of the population) within a maximum period of 15 years.

Commitments linked to operating lease agreements as of December 31, 2014

The amount of the minimum future rents for operating lease agreements is detailed in the following table:

	2013					
		Schedule				
	Minimum future rents	Under one year	Two to five years	Over five years	2012	2011
			€ in millions			
Land	5	0	2	3	4	5
Buildings	1,842	287	899	656	1,701	1,560
of which administrative premises	566	61	206	299	521	585
technical premises	1,273	226	692	356	1,181	952
Other	159	44	67	48	146	168
Rentals	**2,006**	**331**	**968**	**707**	**1,851**	**1,732**
Buildings	(216)	(40)	(101)	(75)	(109)	(41)
Of which technical premises	(216)	(40)	(101)	(75)	(109)	(41)
Sub-leases	**(216)**	**(40)**	**(101)**	**(75)**	**(109)**	**(41)**
Net Total	**1,790**	**291**	**867**	**632**	**1,742**	**1,691**

The total amount of future technical rents includes rights of way and rents linked to the use of optical fiber. The amount of the net rents recognized for 2013, 2012 and 2011 respectively is €284 million, €276 million and €277 million.

Future finance leasing rent amounts are presented in Note 10 “Tangible assets” of the SFR 2011, 2012 and 2013 Combined Financial Statements.

SFR’s commitments on long-term contracts as of September 30, 2014

SFR’s contractual commitments on long-term contracts concern mainly telecommunications network maintenance contracts and have the following payment schedule:

	2013					
		Schedule				
	Minimum future payments 2014	Less than one year	2 - 5 years	More than 5 years	2012	2011
			€ in millions			
Commitments given	178	62	79	37	172	63
Commitments received	(127)	(14)	(50)	(63)	—	(80)
Total	**51**	**48**	**29**	**(25)**	**172**	**(17)**

SFR’s other contractual commitments as of December 31, 2013

SFR’s other contractual commitments as of December 31, 2013, are as follows:

	2013	Maturity	2012	2011
		€ in millions		
(a) GSM-R bank guarantees, joint and several bank guarantee	105	According to construction	92	66
Other bank deposits and guarantees	65	2026	64	90
(b) Share purchase commitments	16	2026	16	18
Pledges	84	2017	51	46
Commitments made	**269**		**223**	**219**
Other bank deposits and guarantees	(1)		(1)	(1)
Commitments received	**(1)**		**(1)**	**(1)**

(a) This is the Public/Private Partnership (“PPP”) between the Groups SFR, Vinci, AXA and TDF with Réseau Ferré de France (“RFF”) (see note 11 “Equity-Accounted Affiliates” in the SFR 2011, 2012 and 2013 Combined Financial Statements.

(b) SFR has made unilateral promises to buy back the stakes of a minority financial partner within certain entities. These promises may only be carried out in the event that the entities of the SFR Group do not respect the contractual commitments made upon entering into the shareholders’ agreements.

Employees' Individual Right to Training (DIF)

Law No. 2004-391 of May 4, 2004 on professional training and social dialogue created, for permanent employees, an individual training entitlement of a minimum of 20 hours per year, which can be accumulated over a period of six years but limited to 120 hours. The total volume of training hours corresponding to the rights acquired under the DIF at the end of 2013, 2012 and 2011 is estimated respectively at 1,184,635 hours, 1,194,180 hours and 1,117,215 hours.

Contingent Assets and Liabilities

Following the successful takeover bid in June 2008 which enabled SFR to acquire a 96.41% stake in Neuf Cegetel, SFR initiated a squeeze-out procedure for the outstanding shares of Neuf Cegetel. The amounts set aside as compensation for Neuf Cegetel shares, which have not been claimed by the depositary institutions on behalf of rights holders, will be retained by the CACEIS Corporate Trust for ten years from the initiation date of the squeeze-out procedure (June 24, 2008). After this date they will be transferred to the Caisse des Dépôts et Consignations. These funds may be claimed at any time by rights holders subject to the French government's thirty-year prescription period.

Changes to off-balance sheet commitments and contractual obligations during the nine months ended September 30, 2014

The new significant contractual commitments made and/or received by the SFR Group during the nine months ended September 30, 2014, are summarized below:

Commitments related to the network sharing agreement with Bouygues Telecom

On January 31, 2014, SFR and Bouygues Telecom entered into a strategic network sharing agreement. They will roll out a new shared network in an area covering 57% of the French population. This agreement will enable both operators to improve their mobile coverage and generate significant savings over time.

The agreement is based on two principles:

- first, the creation of a joint venture to manage shared radio site assets, in particular passive infrastructure and geographical locations in which the infrastructure and telecom equipment are deployed, SFR and Bouygues Telecom will retain full ownership of their telecom equipment assets and their frequencies; and

- second, the provision of RAN sharing services that the operators mutually provide in 2G, 3G and 4G on shared territory. Each operator is responsible for a percentage of the shared territory, in which it ensures the design, deployment, operation and maintenance of the RAN sharing service.

This network-sharing agreement is similar to numerous arrangements already existing in other European countries. Each operator will retain its own innovative capacity as well as complete commercial and pricing independence. The first cell coverage plans were delivered by each party on April 30, 2014. At this date, each operator was able to review the other's deployment plan, since exchanging technical information on-site during the establishment of sharing agreements is prohibited by the ARCEP. This exchange of information led, on October 24, 2014, to the adaptation of the agreement and in particular regarding certain engineering choices that had been made at the time of negotiation when each party did not have all of the pertinent information about the other's network. The completion of the target network, initially expected for the end of 2017, has been delayed by one year to the end of 2018, to take into account the prior deployment delays.

Taking into account the adaption of the agreement, SFR estimates that it has off-balance sheet operating commitments consisting of given commitments totaling approximately €1,830 million and received commitments totalling approximately €2,210 million, representing a net commitment received by SFR of approximately €380 million, which applies over the entire duration of the long-term agreement.

Commitments related to the signing of the Oise THD contract on March 27, 2014

As part of the public service delegation (DSP) in the Oise area, the SFR Group has launched a new "Oise Very High Speed Internet" project for the operation and marketing of 280,000 FTTH plugs. The related investment commitment amounts to €125 million over 15 years.

Commitments related to the signing of the Eure-et-Loir Digital contract on May 27, 2014

As part of the public service delegation (DSP) in the Eure-et-Loire area, the SFR Group has launched a new "Eure-et-Loire Very High Speed Internet" project for the operation and marketing of 90,000 FTTH plugs by 2020. The related commitment amounts to €28 million.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS OF THE PT PORTUGAL GROUP

The discussion and analysis below provides information that we believe is relevant to an assessment and understanding of the PT Portugal Group's historical consolidated financial condition and results of operations. You should read this discussion in conjunction with PTC's audited standalone annual financial statements for the years ended December 31, 2013 and 2012 and related notes prepared in accordance with Portuguese GAAP therein (the "PTC Audited Financial Statements"), Meo, S.A.'s audited standalone annual financial statements for the years ended December 31, 2013 and 2012 and related notes prepared in accordance with Portuguese GAAP therein (the "Meo Audited Financial Statements" and, together with the PTC Audited Financial Statements, the "Audited Financial Statements"), the unaudited condensed financial information of PTC and Meo, S.A. for the nine-month periods ended September 30, 2014 and 2013 (the "Interim Financial Information"), the PT Portugal Unaudited Combined Adjusted Financial Information and the PT Portugal Pre-Closing Combined Pro Forma Balance Sheet (together the "PT Portugal Unaudited Combined Adjusted Financial Information"). The Pro Forma Financial Information and the other financial information included elsewhere in these Listing Particulars. In this section, unless the context otherwise requires, the terms "Group", "we", "us" and "our" refers only to PT Portugal and its subsidiaries.

Basis of Presentation

On December 9, 2014, we entered into an agreement to acquire from Oi 100% of the issued share capital of PT Portugal, and accordingly, the PT Portugal Group and its assets. The PT Portugal Group represents the existing business of Portugal Telecom outside of Africa and Asia and excludes African entities (other than Open Ideia (Angola), Open Ideia (Morocco) and Contact Cabo Verde), and PT Portugal's Rio Forte debt securities, Oi treasury shares and the PT Portugal financing vehicles.

These Listing Particulars includes, and unless otherwise stated the discussion below is based solely on, the audited stand alone financial statements of PTC and Meo, S.A., prepared in accordance with Portuguese GAAP which are the most material subsidiaries of the PT Portugal Group, as of and for the years ended December 31, 2013 and 2012 (including unaudited comparative information as of and for the year ended December 31, 2011) and the unaudited condensed financial statements of PTC and Meo, S.A. as of and for the nine months ended September 30, 2013 and 2014 prepared in accordance with Portuguese GAAP (the "PT Historical Financial Information"). The PT Historical Financial Information does not consolidate the results of operations of the entire business undertaking of the PT Portugal Group as it existed as of December 31, 2011, 2012 or 2013 or September 30, 2013 or 2014 for all of the periods presented. As a result, these Listing Particulars also includes the PT Portugal Combined Selected Financial Information, which has been compiled by aggregating selected financial information with appropriate adjustments and eliminations made for intra-group transfers extracted from (i) the audited historical financial statements of PTC and Meo, S.A. for each of the years ended December 31, 2012 and 2013 and the unaudited historical condensed financial statements of PTC and Meo, S.A. for each of the nine months ended September 30, 2013 and 2014 and (ii) the unaudited historical condensed financial information of the other subsidiaries in the PT Portugal Group derived from the internal financial reporting systems of the PT Portugal Group. For further details, see "*PT Portugal Combined Selected Financial Information—Basis of Presentation*".

Except as otherwise stated, the PT Portugal Combined Selected Financial Information have not been discussed below. For the nine months ended September 30, 2014, PTC and Meo, S.A. collectively represented over 97% and 95% of the PT Portugal Group's revenues and EBITDA as derived from the PT Portugal Combined Selected Financial Information. For further details, please refer to "*Presentation of Financial and Other Information—PT Portugal Financial Information*" and "*PT Portugal Combined Selected Financial Information*".

The discussion below is based on the PT Historical Financial Information, which comprises stand-alone financial information of PTC and Meo, S.A., and therefore does not give effect to any intercompany eliminations that would customarily be included in consolidated financial statements or that have been given effect to in the PT Portugal Combined Selected Financial Information included elsewhere in these Listing Particulars. As a result, although we believe that the discussion below reflects the key factors and trends that have had an impact on the results of operations of the PT Portugal Group in the periods discussed, you should not rely on the PTC and Meo, S.A. financial information presented below or the discussion of such financial information (or any aggregation thereof) as a substitute for an analysis of the results of operations of the PT Portugal Group. Among other things, the financial information and discussion included below does not eliminate intercompany revenues or costs between PTC and Meo, S.A. or among the other entities that will form a part of the PT Portugal Group after giving effect to the PT Portugal Acquisition, includes equity from earnings of affiliated companies (including the subsidiaries of PTC and Meo, S.A., as applicable) and includes cash flows from dividends, loan repayments or other distributions from subsidiaries, each of which would be eliminated in a consolidation of financial information. In addition, given PTC and Meo, S.A. operate within the broader PT Portugal Group, which provides integrated telecommunication services, the allocation of costs and revenues presented in the standalone financial information of PTC and Meo, S.A. is only indicative and may not reflect the actual revenues and costs of such entities had they operated as separate businesses, especially in relation to the allocation of revenues from and costs of certain multiple-play packages provided by the PT Portugal Group. PT Portugal has effected a merger between PTC and Meo, S.A. on December 29, 2014, with PTC as the surviving entity, which was renamed MEO—Serviços de Comunicações e Multimédia, S.A. See "*General Description of our Business and the Offering—Recent Developments*". For the financial information of the PT Portugal Group, please refer to the PT Portugal Combined Selected Financial Information included in these Listing Particulars.

Prior to the merger between PTC and Meo, S.A., PTC was the primary operating company through which the PT Portugal Group provided its fixed line services, including residential services (Pay-TV, broadband internet and fixed-line telephony services to residential customers), enterprise services and wholesale and other services. Meo, S.A. was the primary operating company through which the PT Portugal Group provided its mobile services, including personal services and, to a lesser extent, enterprise services and wholesale and other services. Therefore, references to PTC in the discussion below primarily reflect the results of the fixed line business of the PT Portugal Group and references to Meo, S.A. below primarily reflect the results of the mobile business of the PT Portugal Group.

Significant Factors Affecting Results of Operations

The Group's operations and the operating metrics discussed below have been, and may continue to be, affected by certain key factors as well as certain historical events and actions. In addition to the regulatory and macroeconomic environment, and significant industry trends in the global telecommunications sector, the key factors affecting the ordinary course of our Group's business and our results of operations include: (i) increasing competitive pressures, (ii) macro-economic developments, (iii) traffic trends, (iv) changes in revenue mix, (v) decreasing fixed line calling prices and greater focus on pricing plans, (vi) decreasing interconnection charges, (vii) continuing introduction of new products, (viii) continuing investments in our network, (ix) decreases in wholesale and enterprise revenues, (x) our redundancy programs and (xi) derecognition of deferred tax assets. Each of these factors is discussed in more detail below.

- *Increasing Competitive Pressure.* Our businesses face increasingly strong competition from fixed line operators (including VoIP providers) as well as from mobile players. We face aggressive competition from NOS (formerly named ZON Optimus), Vodafone and other corporate solutions operators in the Portuguese telecommunications sector. Our major competitors compete through their respective multiple-play offers, which include traditional voice services as well as Pay-TV and broadband internet services and, on the corporate side, complex telecom and IT/IS solutions. The competitive landscape changed significantly in Portugal in recent years with the merger of ZON and Optimus to create NOS and the construction of a FTTH network by Vodafone, which resulted in two new integrated telecommunications operators. These events have further increased the focus on bundled offers and the evolution of triple-play to quadruple-play services as a way to satisfy perceived consumer appetite for bundles that provide them with simplicity, convenience and good value.

- *Macro-economic developments.* Our operations are subject to macro- economic risks that are outside of our control. Our results of operations in the period under review have been affected by adverse economic conditions and austerity measures in Portugal which had a negative effect on consumer confidence. High levels of sovereign debt, combined with weak growth and high unemployment, could lead to low consumer demand, fiscal reforms (including austerity measures), sovereign debt restructurings, currency instability, increased counterparty credit risk, high levels of volatility and, potentially, disruptions in the credit and equity markets, as well as other outcomes that might adversely impact our financial condition.

- *Traffic Trends.* In recent years, we have experienced a decrease in traffic on our fixed line network, primarily as a result of the trend among consumers to use mobile phones rather than fixed line service and increasing competition from mobile operators, other fixed line operators and, more recently, cable and VoIP providers. This decrease in traffic has negatively affected both our residential and wholesale revenues.

- *Changes in Revenue Mix.* Our Pay-TV customers have increased since we introduced Pay-TV service in 2008. In addition, our ADSL residential accesses increased by 3.3% in 2013 due to our marketing of service packages that include Pay-TV and ADSL broadband services. The mix of the revenues of our residential business has shifted significantly in recent years, with Pay-TV related revenues partially offsetting the continued pressure on the traditional fixed voice business. In each of the last three years, for example, we achieved positive net additions of fixed lines, primarily due to strong performance of *Meo* double-play and triple-play offers, as well as the launch of *M_4O*, our quadruple play offer. We expect that Pay-TV and broadband services offered through our multiple- play package will continue to be an important driver of our fixed line business, and the architecture and regulation of the developing fiber optic network in Portugal will be an important factor affecting our business and revenues.

- *Decreasing Fixed Line Calling Prices and Greater Focus on Pricing Plans.* Retail calling prices, particularly for regional, national and international calls, have been decreasing steadily in recent years, which have negatively affected our residential and personal revenues (which includes revenues from telecommunications and mobile data services for a variety of personal devices, including cell phones). One of our strategies in response to this trend has been to aggressively market a variety of pricing plans to promote customer loyalty in our competitive market. Our pricing plans tend to increase our revenues from fixed charges but contribute to a decrease in our traffic revenues and therefore lower ARPU, particularly with respect to the growing percentage of pricing plans that offer calls at a flat rate. We aggressively use pricing plans for both our residential and personal services.

- *Decreasing Mobile Interconnection Charges.* In 2005, ANACOM declared all mobile operators, including *Meo*, to have significant market power in call termination in the mobile networks market. As a result, ANACOM imposed price controls on interconnection charges that have caused both fixed- to-mobile and mobile-to-mobile interconnection rates to decrease steadily. ANACOM has issued successive decisions that have reduced mobile termination rates over time. These reductions have had, and will continue to have, a significant adverse impact on revenues and results of operations from our mobile operations which are partially offset by the lower interconnection costs we incur for calls made or received by our customers.

- *Continuing Introduction of New Products.* The fast development and availability of new access devices are leading to significant growth in internet users and more frequent usage, leading to increased bandwidth consumption. Examples of this trend are smartphones, tablet PCs and internet tablets. In January 2013, we announced the launch of a quadruple-play offer of converged fixed-mobile services by *Meo*, which includes pay-TV, internet, fixed telephone and mobile telephone services. The launch of our quadruple play offer enabled us to reach a household penetration of 1.7 million RGUs and helped promote customer migration from prepaid to post-paid (by approximately 190,000 customers).

- *Continuing Investments in our Network.* Remaining competitive requires continuing investments to build out our third- and fourth-generation mobile network and develop new services, and our capital expenditures on our mobile network have increased in recent years. In 2011, we acquired a fourth- generation mobile license, under which *Meo* provides services using LTE technology, which represents an evolution from the GSM and UMTS technologies and allows for higher levels of bandwidth and speed. In July 2014, we entered into an agreement with Vodafone Portugal to deploy, swap capacity on and share FTTH networks, for an initial term of 25 years. This agreement provides us with an enhanced ability to distribute broadband and television offers with high speeds and quality. See "*Description of PT Portugal's Business—Material Contracts—Fiber Sharing Agreement with Vodafone Portugal*". We expect the sharing of FTTH networks with Vodafone Portugal to reduce the need to further build out our FTTH networks and to reduce our capital expenditures on such networks in the future. The recent investments in our FTTH network have reduced operating costs relating to customer support and network maintenance costs.

- *Decreases in Wholesale Revenues.* In our wholesale business, the decrease in regulated fixed-to-mobile interconnection charges has also affected our revenues. This is because our wholesale unit records revenue from international incoming calls through our network that terminate on the networks of mobile operators. Decreases in transit traffic (calls that use our network but neither originate nor terminate on our network) also have affected our wholesale revenues.

- *Decreases in Enterprise Revenues.* Enterprise revenues, which relate to services provided to corporate and medium and small business customers, including data and business solutions services, have been decreasing over the past few years reflecting both the adverse economic conditions in Portugal and more intense competition.

- *Redundancy programs.* The redundancy programs undertaken in the past few years have led to a reduction in wages and salaries payable to the employees who became either pre-retired or suspended. The net present value of those salaries payable up to retirement is recorded as an actuarial obligation and are not recognized under wages and salaries, thereby having a positive impact on our operating expenditures. Nevertheless, we remain obligated to pay salaries to such pre-retired or suspended employees up to their retirement age, although salaries payable to pre-retired or suspended employees are lower than the salaries paid previously to those same employees, translating into a cash flow saving.

- *Derecognition of deferred tax assets.* The change in the statutory tax rate applicable to PTC as from January 2014, from 25% to 23%, has led to PTC remeasuring its deferred tax assets and derecognizing certain deferred tax assets. In accordance with public statements of the Portuguese Tax Authorities, we expect that the statutory tax rate will decrease further in future years, resulting in further derecognizing of certain deferred tax assets.

Key Performance Indicators

Overview

Our management uses a number of key performance indicators to track the performance of our businesses and to guide management. We use these indicators in addition to our Portuguese GAAP financial measures in order to evaluate, monitor and manage our business. These metrics allow us to review our core operating activities, enabling us to evaluate relevant trends more meaningfully when considered in conjunction with (but not in lieu of) measures that are calculated in accordance with Portuguese GAAP. None of these metrics are measures of financial performance under Portuguese GAAP, nor have these measures been audited or reviewed by an auditor, consultant or expert. As defined by our managers, these terms may not be directly comparable to similar key terms used by competitors.

The following table sets forth the total number of retail lines (or accesses) and net retail additions for PTC and the total number of mobile customers, net retail additions and data as a percentage of mobile service revenues for Meo, as of the dates indicated below.

	As of December 31,			As of September 30,

(1) The public switched telephone network, or PSTN, is the traditional telephone system that runs through copper lines. The integrated digital services network, or ISDN, is the digital telecommunications network that allows simultaneous voice and data transmission over an access line.

(2) The net additions figures for the nine months ended September 30, 2013 and 2014 are calculated on a nine-month basis from December 31, 2012 and 2013, respectively.

(3) The PT Portugal Group's residential customer category provides fixed line telephone and broadband services, pay-TV services (IPTV over ADSL and fiber and DTH satellite TV) services and internet access services to residential customers. PTC is the primary operating company through which the PT Portugal Group provides such residential services.

(4) The PT Portugal Group's personal customer category provides telecommunications and mobile data services for a variety of personal devices, including tradtional cell phones, smartphones, tablets and laptops through our mobile business. Meo, S.A. is the primary operating company through which the PT Portugal Group provides its mobile services.

(5) Minutes of Usage represents the monthly average of outgoing traffic in minutes divided by the average number of users in the period.

(6) Subscriber Acquisition and Retention Cost, or SARC, equals the sum of 70% of marketing and publicity costs *plus* commissions *plus* subsidies, divided by gross additions *plus* upgrades over the reference periods as presented.

(7) The PT Portugal Group's enterprise customer category provides enterprise services (including integrated voice, data and image solutions, virtual private networks, convergence solutions, consultancy and outsourcing) to corporate, SMEs and SoHo customers that need diversified telecommunications solutions and integration with IT services through service packages. PTC and, to a lesser extent, Meo, S.A., are the primary operating companies through which the PT Portugal Group provides its enterprise services.

Nine Months Ended September 30, 2014 Compared to Year Ended December 31, 2013

For the nine months ended September 30, 2014, PTC's business continued to show stable customer growth, with fixed retail customers increasing by 1.3% to 5.22 million as of September 30, 2014 (with net additions of 66,000 in the nine months ended September 30, 2014) as compared to 5.16 million as of December 31, 2013. Mobile customers decreased slightly by 0.2% to 7.88 million as of September 30, 2014 (with net deductions of 15,000 in the nine months ended September 30, 2014) as compared to 7.90 million as of December 31, 2013, primarily as a result of a decrease in prepaid customers which was partially offset by an increase in post-paid customers (with net additions of 629,000 post-paid customers in the nine months ended September 30, 2014), reflecting the success of our quadruple-play offering, namely *M_4O*, having surpassed 3 million RGUs in October 2014.

The growth of fixed retail customers was underpinned by a solid performance of *Meo,* with pay-TV customers increasing by 5.5% to 1.39 million (with net additions of 72,000 in the nine months ended September 30, 2014) as of September 30, 2014 as compared to 1.32 million as of December 31, 2013. This increase was due to the continued success and the attractiveness of *Meo* in the Portuguese market, even against a backdrop of difficult economic environment. Our triple and quadruple-play customers (voice, broadband and pay-TV) accounted for 87,000 of net additions in the nine months ended September 30, 2014, reaching 1.1 million customers as of September 30, 2014 (up by 11.9% as compared to 1.0 million customers as of December 31, 2013). This increase was partially offset by the decrease in the number of PSTN/ISDN retail lines to 2.50 million as of September 30, 2014 from 2.55 million as of December 31, 2013, reflecting a trend among consumers to use mobile phones rather than fixed line services and increasing competition from mobile operators, fixed line operators, cable and VoIP operators.

Meo, S.A.'s mobile customers increased primarily as a result of the growth of post-paid customers, which increased by 21.5% to 3.6 million as of September 30, 2014 (with net additions of 629,000 in the nine months ended September 30, 2014) as compared to 2.9 million as of December 31, 2013. This increase in post-paid customers was due to the continued success of *M_4O*, which led to a migration from pre-paid to post- paid mobile customers (resulting in net deductions of 644,000 in our pre- paid customers in the nine months ended September 30, 2014). As of September 30, 2014, 45.1% of our mobile subscriber base was on post-paid contracts as compared to 37.0% as of December 31, 2013. We believe the trend of migration from prepaid to post-paid mobile contracts is positive for our business.

As of September 30, 2014, 39.9% of the PT Portugal Group's unique subscribers had subscribed to either a triple-play or quadruple-play offer, as compared to 34.7% as of December 31, 2013. We believe the trend to higher penetration of multi-play subscriptions will benefit our business through reduced churn.

Year Ended December 31, 2013 Compared to Year Ended December 31, 2012

In 2013, overall, PTC's business continued to show stable customer growth, with fixed retail customers increasing by 2.1% to 5.2 million in 2013 (with net additions of 105,000 in 2013) as compared to 5.1 million in 2012. Mobile customers also increased by 3.9% to 7.9 million in 2013 (with net additions of 298,000) as compared to 7.6 million in 2012, primarily as a result of an increase in post-paid customers (with net additions of 456,000 post-paid customers in 2013), reflecting the success of our quadruple-play offering, namely *M_4O*, having reached 1.5 million RGUs as of December 31, 2013.

The growth of fixed retail customers was underpinned by a solid performance of *Meo,* with pay-TV customers increasing by 7.5% to 1.3 million (with net additions of 91,000 in 2013) in 2013 as compared to 1.2 million in 2012. This increase was due to the continued success and the attractiveness of *Meo* in the Portuguese market, even against a backdrop of difficult economic environment and already high penetration of pay-TV. Our triple- play customers (voice, broadband and pay-TV) accounted for 119,000 of net additions in 2013, reaching 952,000 customers (up by 14.3% as compared to 833,000 customers in 2012). This increase was partially offset by the decrease in the number of PSTN/ISDN retail lines to 2.5 million in 2013 from 2.6 million in 2012, reflecting a trend among consumers to use mobile phones rather than fixed line services and increasing competition from mobile operators, fixed line operators, cable and VoIP operators.

In 2013, Meo, S.A.'s mobile customers increased primarily as a result of the growth of post-paid customers, which increased by 18.5% to 2.9 million (with net additions of 456,000 in 2013) in 2013 as compared to 2.5 million in 2012. This increase in post-paid customers was due to the launch of the convergent offer, *M_4O*, which led to a migration from pre-paid to post-paid mobile customers (resulting in net deductions of 158,000 in our pre-paid customers), and from the growth of the "Unlimited" tariff plans (an increase of 11.8% to 298,000 in 2013 as compared to 267,000 in 2012). The "Moche" tariff plans also continued to show solid growth trends (an increase of 18.0% in 2013 to 1.9 million, as compared to 1.6 million in 2012). As of December 31, 2013, 37.0% of our mobile subscriber base was on post-paid contracts as compared to 32.5% as of December 31, 2012.

As of December 31, 2013, 34.7% of the PT Portugal Group's unique subscribers had subscribed to either a triple-play or quadruple-play offer, as compared to 29.6% as of December 31, 2012.

Year Ended December 31, 2012 Compared to Year Ended December 31, 2011

In 2012, PTC's business continued to show steady customer growth, with fixed retail customers increasing by 5.4% to 5.1 million in 2012 (with net additions of 257,000 in 2012) as compared to 4.8 million in 2011. Mobile customers also increased by 2.1% to 7.6 million in 2012 (with net additions of 154,000) as compared to 7.4 million in 2011, with net additions of 91,000 post-paid customers and 63,000 prepaid customers in 2012.

The growth of fixed retail customers was underpinned by a solid performance of *Meo*, with pay-TV customers increasing by 17.4% to 1.2 million (with net additions of 181,000 in 2012) in 2012 as compared to 1.0 million in 2011. This increase was due to the continued success and the attractiveness of *Meo* in the Portuguese market, even against a backdrop of difficult economic environment and already high penetration of pay-TV. This performance of pay-TV underpinned a solid growth of fixed broadband customers, increasing by 10.9% to 1.2 million in 2012 (with net additions of 119,000 in 2012) as compared to 1.1 million in 2011. Our triple-play customers (voice, broadband and pay-TV) increased by 22.7% to 833,000 in 2012 (with 154,000 of net additions in 2012) as compared to 679,000 in 2011. The success of *Meo* is anchored on the back of a distinguished and convergent value proposition, which leverages on a non- linear pay-TV service offering, a seamless multiscreen experience with live TV channels, video on demand and games and music on demand on multiple devices.

In 2012, Meo, S.A.'s mobile customers increased primarily as a result of the growth of post-paid customers which increased by 3.8% to 2.5 million in 2012 (with net additions of 91,000 in 2012) as compared to 2.4 million in 2011, reflecting an improved performance in our enterprise business.

Prepaid customers increased by 1.2% to 5.13 million (with net additions of 63,000 in 2012) in 2012 as compared to 5.07 million in 2011. This increase in prepaid customers was due to the growth of the "Moche" and "e" tariff plans. The "e nunca mais acaba" tariff plans, which reached 933,000 customers in 2012, as well as the new "Moche" tariff plans, which reached 1,593,000 customers in 2012, continued to show solid growth trends. As of December 31, 2012, 32.5% of our mobile subscriber base was on post-paid contracts as compared to 31.9% as of December 31, 2011.

As of December 31, 2012, 29.6% of the PT Portugal Group's unique subscribers had subscribed to either a triple-play or quadruple-play offer, as compared to 23.8% as of December 31, 2011.

Key Income Statement Items

Below is a summary description of certain income statement line items used by PTC and Meo, S.A. for the purpose of the discussion of their results of operations. For the purpose of the discussion below, we have regrouped certain income statement line items.

Operating Revenues

Revenues consist of income generated from services rendered and sales. Revenue is measured at fair value of the amount received or receivable. Revenue recognition is deducted from the estimated amount of returns, discounts and other rebates and does not include the Value Added Tax (VAT) and other taxes paid related to the sale.

For PTC, revenues from services rendered and sales include revenues which are generated from: (1) our residential services, which includes (i) service revenues, generated from providing fixed telephone services, pay-TV services, and generally consist of fixed charges, including network access charges based on a monthly line rental and an initial installation fee, as well as, in most cases, a monthly fee from pricing packages, which can include broadband and Pay-TV services, and traffic, including charges for the use of our fixed line network based on rates dependent on the amount and type of usage, (ii) sales revenues from the sale of telephone and broadband equipments; (2) our enterprise services, which includes traffic charges for voice and data services, outsourcing or management services and fees for business process outsourcing (BPO), and consultancy fees; and (3) our wholesale and other services, which includes primarily providing public pay telephone services and advertising on www.sapo.pt, our internet portal. For a description of revenue recognition principles, see Note 3.21 to the Audited Financial Statements of PTC.

For Meo, S.A., revenues from services rendered and sales include revenues which are generated from (i) service revenues generated from providing mobile voice telecommunication services, mobile broadband access and other mobile services, and comprise (1) customer revenues, which we receive directly from our personal and to a lesser extent, enterprise customers, consisting primarily of traffic charges, subscription and usage charges, and (2) interconnection revenues, which we receive from other telecommunication providers when their customers make calls or otherwise connect to our network from fixed lines or mobile devices; and (ii) sales revenues, which relate primarily to the sale of mobile phone and related equipment to personal and enterprise customers. For a description of revenue recognition principles, see Note 3.16 to the Audited Financial Statements of Meo, S.A.

The invoices for multiple-play packages, namely *M_4O*, are issued by PTC and a portion of the total revenue is allocated to Meo, S.A. based on the ARPU for equivalent mobile post-paid services adjusted for a certain discount included in the bundle package as compared to the total standalone services. In addition, certain additional revenues not included in the base price of the package are allocated to each company based on their nature, for example, the rental of additional set-top-boxes or video on demand are allocated to PTC, while additional mobile SIM cards and roaming revenues are allocated to Meo, S.A. Direct costs are allocated to Meo, S.A. and PTC based on the criteria set out under "—*Direct costs*" below. Other costs relating to multiple-play packages are allocated in the standalone financial information of PTC and Meo, S.A. based on internal management estimates.

Equity in earnings of affiliated companies

Equity in earnings of affiliated companies includes the gains and losses in affiliated companies through the equity method of accounting and the gains and losses on the disposal of affiliated companies.

Costs of products sold and impairment of inventories

Costs of products sold include the costs attributable to the acquisition of the equipments sold by PTC and Meo, S.A, including the cost of the mobile handsets and certain fixed line equipments sold.

Impairment losses on inventories include the value of materials for which there is no intended use due to obsolescence and/or low rotation, as well as the difference between prices of materials that have a fair value lower than the average acquisition costs, when the difference is higher than the discount granted in current market conditions.

Direct costs

For PTC, direct costs include telecommunication costs, programming costs, directories, internet contents costs and other costs.

For Meo, S.A. direct costs include rental costs for capacity, interconnection costs, leasing of sites, contents of internet and mobile service costs and other costs.

Marketing and publicity

For PTC and Meo, S.A., marketing and publicity costs include expenses related to their services and brands, advertising and sale promotion, and other expenses related to marketing and publicity efforts.

Supplies and external services

Supplies and external services include expenses for maintenance and repair, commissions, support services, electricity, rentals, specialized work, communications, fuel, water and other fluids, transportation and other third- party costs.

Wages and salaries

Wages and salaries include salaries, social security, health care benefits, training and other costs relating to active personnel.

Post retirement benefits

PTC sponsors defined benefit plans, under which it grants pension supplements to retired and active employees, healthcare services to retired employees and eligible relatives and pays salaries to suspended and pre-retired employees until retirement age, the latter of which is also applicable to certain other entities of the PT Portugal Group, including Meo, S.A. Post retirement benefit costs include the pension supplements service cost related to active employees and the net interest cost on unfunded obligations in relation to the post retirement benefits obligations. For Meo, S.A., the post retirement benefit costs, which correspond to the net interest cost on salaries due to suspended and pre-retired employees until retirement age, is accounted for under the line item other expenses and losses. For more details, see "—*Post Retirement Benefits*" below.

Curtailment and settlement costs

Curtailment and settlement costs include (1) costs from redundancy programs, reflecting mainly the present value of salaries payable up to retirement age, as well as the components of pension supplements and healthcare obligations that would otherwise be recognized up to retirement age, (2) termination payments and (3) plan settlement costs or gains.

Indirect taxes

Indirect taxes include ANACOM taxes, direct taxes (which primarily include municipal property taxes), value added tax, and other non-income taxes.

Provisions and adjustments

Provisions and adjustments include impairments of accounts receivables and provisions for contingencies and other risks. Impairment of accounts receivables refers to impairments on financial assets, which are impaired when there is clear evidence that as a result of one or more events occurring after its initial recognition, their future estimated cash flows will be negatively affected (with determinative factors being the age of the accounts receivables, the risk profile of the clients and their financial situations). Impairment losses and related reversals are recorded in earnings. PTC and Meo, S.A. are party to a variety of ongoing judicial and tax proceedings for which, based on the opinion of their lawyers, they determine whether they should recognize any provisions in respect of these contingencies.

Net other income and gains/(expenses and losses)

For PTC, net other income and gains (expenses and losses) primarily include supplemental income, income and gains in non-financial investments, investment subsidies, interest due, recovery of accounts receivable, gains and losses on exchange rate differences, income from investment properties, write-off of tangible fixed assets, donations made, contractual penalties incurred, losses in inventories and other gains and losses.

For Meo, S.A. net other income and gains (expenses and losses) primarily include supplemental income, interest due, recovery of accounts receivable, gains and losses on exchange rate differences, gains in inventories, write- off of tangible fixed assets, losses in inventories, discounts granted, direct write-off of accounts receivable curtailment costs, the net interest cost on salaries due to suspended and pre-retired employees until retirement age and other gains and losses.

Depreciation and amortization

Depreciation and amortization principally includes the depreciation and amortization of tangible fixed assets, intangible assets, and investment properties. Goodwill is not amortized but tested on an annual basis for impairment losses.

Net financial expenses

Net financial expenses primarily include interest expenses related to interest paid on loans, net of interest income related to cash and cash equivalents, net foreign currency exchange losses and net other financial losses from banking services, commissions, financial discounts and other financing costs.

Income taxes

Income taxes correspond to the sum of current and deferred taxes, which are recorded in the income statement except when they relate to items recorded directly in shareholders' equity (in which case they are likewise recorded in shareholders' equity). Income taxes are estimated based on the estimate of the corporate tax base under the *Imposto sobre o Rendimento das Pessoas Coletivas*. For further details, see Note 3.11 to the Audited Financial Statements of PTC for the year ended December 31, 2013 and Note 3.8 to the Audited Financial Statements of Meo, S.A. for the year ended December 31, 2013.

Results of Operations

Nine Months Ended September 30, 2014 Compared to Nine Months Ended September 30, 2013

The table below sets out PTC's and Meo, S.A.'s results of operations for the nine months ended September 30, 2013 and 2014.(1)

	PTC		Meo, S.A.	
	Nine Months Ended September 30,		Nine Months Ended September 30,	
	2013	2014	2013	2014
	€ in millions

(1) Reflects stand-alone financial information prepared in accordance with Portuguese GAAP of PTC and Meo, S.A. and does not give effect to intercompany eliminations that would be eliminated in a consolidation of financial information. For the nine-month periods ended September 30, 2014 and 2013, the impact of intercompany eliminations between PTC and Meo, S.A. (but not including any other intercompany eliminations) on PTC's revenues would have been to reduce revenues by € 94.5 million and €113.7 million, respectively, and on MEO's revenues would have been to reduce revenues by €94.2 million and €80.1 million, respectively. The net impact of intercompany eliminations between PTC and Meo, S.A. on income before depreciation and amortization and net income reflects primarily the equity in losses/earnings of Meo, S.A. recorded by PTC through the equity method of accounting, amounting to a loss of €921.3 million and a gain of € 229.0 million in the nine months ended September 30, 2014 and 2013, respectively, as the other eliminations offset each other in the operating and financial results. For further details, see "*PT Portugal Combined Selected Financial Information—Basis of Presentation*".

(2) Meo S.A. recorded post retirement benefit costs of €0.08 million and €0.03 million in the nine months ended September 30, 2014 and 2013, respectively, and curtailment costs of €3.7 million in the nine months ended September 30, 2013, both of which are included under the caption "*Other expenses and losses*" in Meo, S.A.'s standalone profit and loss statement.

Operating Revenues

For the nine months ended September 30, 2014, PTC's revenues from services rendered and sales decreased by 0.7% to €1,269.6 million from €1,279.0 million for the nine months ended September 30, 2013, reflecting primarily lower revenues in the enterprise customer category amid challenging economic conditions in Portugal.

For the nine months ended September 30, 2014, Meo, S.A.'s revenues from services rendered and sales decreased by 7.5% to €738.9 million from €798.8 million for the nine months ended September 30, 2013. This decrease was primarily due to revenue declines in the personal customer category, reflecting lower and more volatile pre-paid recharges by customers as a result of the challenging economic conditions, price competition and a migration to lower tariff plans. Data revenues accounted for 39.2% of service revenues, an increase of 3.0% over the nine months ended September 30, 2014, reflecting the solid performance of our "*internetnotelemovel*" data packages.

Costs and Expenses

Costs of products sold and impairment of inventories. PTC's costs of products sold increased by 15.8% to €17.6 million for the nine months ended September 30, 2014 from €15.2 million for the nine months ended September 30, 2013. This increase was primarily due to an increase in equipment sales. PTC's impairment reversals of inventories increased to €2.0 million for the nine months ended September 30, 2014 from €0.2 million for the nine months ended September 30, 2013. Meo, S.A.'s costs of products sold decreased by 18.1% to €65.4 million for the nine months ended September 30, 2014 from €79.9 million for the nine months ended September 30, 2013. This decrease was primarily due to our cost cutting efforts coupled with a strong focus on profitability and also lower handset subsidies on sales of handsets to our mobile customers. Meo, S.A.'s impairment reversals of inventories amounted to €3.7 million for the nine months ended September 30, 2014, as compared to impairment losses of €1.3 million for the nine months ended September 30, 2013.

Direct costs. PTC's direct costs increased by 1.1% to €372.2 million for the nine months ended September 30, 2014 from €368.1 million for the nine months ended September 30, 2013. This increase is primarily due to higher traffic costs that were partially offset by lower costs associated with our directories business. Meo, S.A.'s direct costs remained broadly stable at €151.6 million for the nine months ended September 30, 2014 as compared to €152.1 million for the nine months ended September 30, 2013.

Marketing and publicity. PTC's marketing and publicity costs decreased by 23.3% to €14.5 million for the nine months ended September 30, 2014 from €18.9 million for the nine months ended September 30, 2013. Meo, S.A.'s marketing and publicity costs decreased by 25% to €10.2 million for the nine months ended September 30, 2014 from €13.6 million for the nine months ended September 30, 2013. The decrease in marketing and publicity costs for PTC and Meo, S.A. is primarily due to the marketing campaigns for the *M_4O* launch in the first quarter of 2013, the marketing efforts made in 2013 and in previous years that allowed for lower marketing investments to be made in 2014 and our strict cost control policies. These were partially offset by the marketing campaigns supporting the rebranding of Meo, S.A.'s mobile business from *TMN* to *Meo* in the first quarter of 2014.

Supplies and external services. For the nine months ended September 30, 2014, PTC's supplies and external services increased by 1.5% to €318.9 million from €314.2 million for the nine months ended September 30, 2013. This increase was primarily due to higher IT/IS support services, which were internalized in 2013 and as from 2014 were externalized to PT Cloud and Data Centers. This was partially offset by lower maintenance costs, which benefitted from the roll-out of our FTTH network, lower electricity expenses, lower billing expenses and lower consultancy and legal fees, reflecting our cost control efforts. For the nine months ended September 30, 2014, Meo, S.A.'s supplies and external services decreased by 6.7% to €184.3 million from €197.5 million for the nine months ended September 30, 2013, reflecting primarily our focus on cost cutting and profitability that translated into lower maintenance and repair expenses and other third party services expenses.

Wages and salaries. PTC's wages and salaries, including employee benefits and social charges, increased by 1.1% to €176.2 million for the nine months ended September 30, 2014 from €174.3 million for the nine months ended September 30, 2013. This increase is primarily due to an increase in variable remunerations and training expenses. Meo, S.A.'s wages and salaries, including employee benefits and social charges, remained broadly stable at €35.1 million for the nine months ended September 30, 2014, as compared to €35.5 million for the nine months ended September 30, 2013.

Post retirement benefit costs. PTC's post retirement benefit costs remained broadly flat at €31.2 million for the nine months ended September 30, 2014 as compared to €31.7 million for the nine months ended September 30, 2013. This cost item does not include early termination costs related to our workforce reduction program, which are discussed under "*—Curtailment and settlement costs*" below.

Curtailment and settlement costs. PTC's curtailment and settlement costs amounted to a gain of €21.9 million for the nine months ended September 30, 2014 as compared to a cost of €102.3 million for the nine months ended September 30, 2013, reflecting primarily the reduction in our healthcare benefits which was put in place in 2014 and the redundancy programs relating to approximately 70 and 400 employees that were implemented in the third quarter of 2014 and the second quarter of 2013, respectively.

Indirect taxes. PTC's indirect taxes remained broadly flat at €12.0 million for the nine months ended September 30, 2014 as compared to €11.5 million for the nine months ended September 30, 2013. Meo, S.A.'s indirect taxes increased by 12.5% to €13.5 million for the nine months ended September 30, 2014 from €12.0 million for the nine months ended September 30, 2013, primarily due to an increase in fees paid to ANACOM, which reflects primarily an increase in the unitary spectrum fee per customer and the increased number of mobile customers, mainly *M_4O* customers.

Provisions and adjustments (including impairment of accounts receivable and provisions for contingencies and other risks). For PTC, provisions and adjustments increased by 96.9% to €12.8 million for the nine months ended September 30, 2014 from €6.5 million for the nine months ended September 30, 2013, primarily due to higher provisions for bad debt and certain reversals of provisions for legal actions recorded in the nine months ended September 30, 2013. For Meo, S.A., provisions and adjustments decreased to a net gain of €0.9 million for the nine months ended September 30, 2014 from a net cost of €12.1 million for the nine months ended September 30, 2013, reflecting primarily lower provisions for bad debt and reversals of provisions for other risks recorded in the nine months ended September 30, 2014.

Net other income and gains/(expenses and losses). PTC's net other income and gains decreased by 5.9% to €50.7 million for the nine months ended September 30, 2014 from €53.9 million for the nine months ended September 30, 2013. This was primarily due to a net gain of €26.0 million recorded by PTC in the first quarter of 2013, which corresponds to the compensation receivable from the Portuguese State relating to the termination of the wireline concession agreement for its universal service obligations. This compensation was received in the third quarter of 2014. Meo, S.A.'s net other income and gains increased to €7.8 million for the nine months ended September 30, 2014 from €6.6 million of net other expenses and losses for the nine months ended September 30, 2013. This increase was primarily due to higher gains on the disposal of tangible fixed assets, lower costs relating to uncollectible receivables that were not adjusted for previously and work force redundancy costs recorded in the nine months ended September 30, 2013, which for Meo, S.A. are included under this caption. See "*—Key Income Statement Items*".

Equity in earnings of affiliated companies, net. For the nine months ended September 30, 2014, PTC's equity in earnings of affiliated companies decreased to a loss of €1,021.3 million from a gain of €161.3 million for the nine months ended September 30, 2013, reflecting primarily lower earnings from the equity investment in Meo, S.A. Meo, S.A.'s equity in earnings of affiliated companies decreased to a loss of €1,034.7 million for the nine months ended September 30, 2014 from a gain of €123.1 million for the nine months ended September 30, 2013. Equity in earnings of affiliated companies relate primarily to Meo, S.A.'s equity investment in PT Móveis, a wholly-owned subsidiary of Meo, S.A. The loss recorded in the nine months ended September 30, 2014 reflects primarily a net loss of €950 million that was recognized by PT Móveis, relating to the disposal to Portugal Telecom of its 100% interest in Bratel BV, the entity that held the investment in Oi.

Income before depreciation and amortization, financing expenses and taxes. PTC's income before depreciation and amortization, financing expenses and taxes decreased to a loss of €597.6 million for the nine months ended September 30, 2014 compared to an income of €489.5 million for the nine months ended September 30, 2013. Meo, S.A.'s income before depreciation and amortization, financing expenses and taxes decreased to a loss of €739.9 million for the nine months ended September 30, 2014 from an income of €414.7 million for the nine months ended September 30, 2013. The decrease in PTC and Meo, S.A.'s incomes before depreciation and amortization, financing expenses and taxes is primarily due to lower services rendered and sales and the equity in losses of affiliated companies recorded in the nine months ended September 30, 2014, reflecting primarily a loss of €950 million recorded by PT Móveis in connection with the disposal of Bratel BV, as compared to equity in earnings recorded in the nine months ended September 30, 2013. For PTC, these effects were partially offset by lower curtailment costs, following the redundancy program undertaken in 2013. For Meo, S.A., the effects mentioned above were partially offset by lower costs of goods sold and supplies and external services reflecting lower sales and Meo, S.A.'s cost cutting efforts.

Based on the PT Portugal Combined Selected Financial Information, PTC and Meo, S.A. represented over 95.2% and 97.9% of the PT Portugal Group's EBITDA for the nine months ended September 30, 2014 and 2013, respectively. See "PT Portugal Combined Selected Financial Information". For a reconciliation between income before depreciation and amortization, financing expenses and taxes as reported by PTC and Meo, S.A. under Portuguese GAAP and EBITDA as reported by Portugal Telecom SGPS, S.A., which publishes its financial information under IFRS (the "International Format"), see "*—Summary of Significant Differences between Portuguese GAAP and IFRS*".

Depreciation and amortization. PTC's depreciation and amortization costs decreased by 8.5% to €329.5 million for the nine months ended September 30, 2014 from €360.3 million for the nine months ended September 30, 2013. Meo, S.A.'s depreciation and amortization costs decreased by 1.9% to €122.8 million for the nine months ended September 30, 2014 from €125.2 million for the nine months ended September 30, 2013. The decrease in PTC's and Meo, S.A.'s depreciation and amortization costs was primarily due to the decline in capital expenditures incurred by PTC and Meo, S.A. in recent periods against the backdrop of the investments in certain technologies and networks that were undertaken in previous years, namely in FTTH and 4G-LTE.

Net interest and related income (expenses). PTC's net interest and related expenses increased by 4.3% to €282.7 million for the nine months ended September 30, 2014 from €270.9 million for the nine months ended September 30, 2013. This was due to higher interest expenses reflecting an increase in the average gross debt of PTC and higher commission expenses (such as banking fees) relating to the business combination between Portugal Telecom and Oi. Meo, S.A.'s net interest and related expenses decreased by 48.6% to €7.2 million for the nine months ended September 30, 2014 from €14.0 million for the nine months ended September 30, 2013. This was due to lower interest expenses reflecting primarily the reduction in outstanding commercial papers issued by Meo, S.A.

Income taxes. For the nine months ended September 30, 2014, PTC's income taxes amounted to €46.7 million compared to an income tax gain of €2.5 million for the nine months ended September 30, 2013, reflecting primarily lower taxable losses in the nine months ended September 30, 2014 mainly due to the curtailment costs recorded in the same period of last year. For Meo, S.A., income taxes increased to €51.4 million for the nine months ended September 30, 2014 from €46.5 million for the nine months ended September 30, 2013, reflecting higher taxable profits in 2014.

Net (Loss)/Income. For PTC, net loss increased to €1,256.5 million for the nine months ended September 30, 2014, compared to € 139.1 million for the nine months ended September 30, 2013, as a result of the factors described above. For Meo, S.A., net loss amounted to €921.3 million for the nine months ended September 30, 2014 as compared to a net income of €229.0 million for the nine months ended September 30, 2013, as a result of the factors described above.

Year Ended December 31, 2013 Compared to Year Ended December 31, 2012

The table below sets out PTC's and Meo, S.A.'s results of operations for the years ended December 31, 2012 and 2013.(1) During the year ended December 31, 2013, PTC adopted the revised version of IAS 19 *Employee Benefits*. As a result of the adoption of the amendments to IAS 19, certain adjustments were made to the previously reported statements of financial position of PTC for the year ended December 31, 2012. The table below sets out PTC's restated results of operations for the year ended December 31, 2012 and may differ from that shown in the Audited Financial Statements of PTC for the year ended December 31, 2012. See Note 5 to the Audited Financial Statements of PTC for the year ended December 31, 2013.

(1) Reflects stand-alone financial information of PTC and Meo, S.A. and does not give effect to intercompany eliminations that would be eliminated in a consolidation of financial information. For the years ended December 31, 2013 and 2012, the net impact of intercompany eliminations between PTC and Meo, S.A. (but not including any other intercompany eliminations) on PTC's revenues would have been to reduce revenues by €147.0 million and €160.2 million, respectively, and on MEO's revenues would have been to reduce revenues by €104.5 million and €107.8 million, respectively. The net impact of intercompany eliminations between PTC and Meo, S.A. on income before depreciation and amortization and net income reflects primarily the equity in earnings of Meo, S.A. recorded by PTC through the equity method of accounting, amounting to €336.1 million and €251.6 million for the years ended December 31, 2013 and 2012, respectively, as the other eliminations offset each other in the operating and financial results. For further details, see "*PT Portugal Combined Selected Financial Information—Basis of Presentation*".

(2) Meo, S.A. recorded post retirement benefit costs of €0.04 million and €0.08 million in the years ended December 31, 2013 and 2012, respectively, and curtailment costs of €4.1 million in the year ended December 31, 2013, both of which are included under the caption "*Other expenses and losses*" in Meo, S.A.'s standalone profit and loss statement.

Operating Revenues

PTC's revenues from services rendered and sales decreased by 3.7% to €1,708.3 million in 2013 from €1,774.3 million in 2012. This decrease was primarily due to (i) lower revenues in the enterprise customer category, where we experienced pricing and demand pressure as a result of strong cost-cutting initiatives by government agency clients and a significant reduction in investments in new projects by government agency clients, cost reduction initiatives by large corporations, particularly in banking, other financial services and pharmaceuticals, and economic challenges faced by small and medium businesses, which continued to be driven by macro-economic and financial conditions in Portugal and (ii) lower revenues from wholesale and other businesses, as a result of a decline in the directories business, leased lines and accesses, including lower prices resulting from adverse regulatory decisions and lower volumes as operators continue to build networks, and declines in revenues from public pay phones and the termination of national and international traffic. These decreases in revenues were partially offset by an increase in revenues from the residential customer category, mainly related to Pay-TV and fixed broadband revenues, which was driven by the success of the *Meo* double- and triple-play offers.

Meo, S.A.'s revenues from services rendered and sales decreased by 8.6% to €1,054.5 million in 2013 from €1,153.3 million in 2012. This decrease was primarily due to (i) revenue declines in the personal customer category, primarily due to lower mobile interconnection revenues (partially as a result of the negative impact of lower mobile termination rates), lower customer revenues (reflecting the effects of challenging economic conditions that have made customers more price-sensitive, greater competitive pressures, increased popularity of "tribal plans" yielding lower revenues per user, as well as the negative effect of lower revenues from mobile broadband due to the higher popularity of fixed broadband), and price pressures from competitors and migrations to lower tariff plans and (ii) lower revenues in the enterprise customer category, where we experienced pricing and demand pressure, due to the reasons mentioned above. Data revenues accounted for 36.5% and 32.6% of service revenues for the years ended December 2013 and 2012, respectively, an increase of 3.9%, reflecting the continued success of Meo, S.A.'s mobile data offers which are based on a high quality network offering and a high capacity to meet customer demands for increasingly higher bandwidth.

Costs and Expenses

Costs of products sold and impairment of inventories. PTC's costs of products sold decreased by 21.2% to €24.9 million in 2013 from €31.6 million in 2012. This decrease was primarily due to lower costs related to the sale of set-top boxes, which were higher in 2012 following the switch-off of the analog television network in Portugal and the switch to DTT. PTC's reversal on inventory impairment provisions decreased by 77.8% to €0.8 million in 2013 from €3.6 million in 2012. Meo, S.A.'s costs of products sold increased by 5.2% to €113.0 million in 2013 from €107.4 million in 2012. This increase was primarily due to an increase in sales of mobile phones, which was partially offset by a decrease in the average cost of handsets as a result of favourable contracts signed with key suppliers. Meo, S.A.'s impairment losses of inventories increased to €1.6 million in 2013 from a reversal of €4.1 million in 2012.

Direct costs. PTC's direct costs increased by 1.7% to €492.2 million in 2013 from €484.0 million in 2012. This increase is primarily due to an increase in programming costs, driven by customer growth and investment in content for our *Meo* offering, and higher costs associated with the provision of IT/IS solutions and outsourcing services as a result of the increased contribution of these services to our revenues. The increase in direct costs was partially offset by lower costs associated with our directories business. Meo, S.A.'s direct costs decreased by 11.9% from €225.3 million in 2012 to €198.6 million in 2013, primarily due to lower mobile traffic costs as a result of a reduction in services rendered and the impact of the regulatory mobile termination rate cuts.

Marketing and publicity. PTC's marketing and publicity costs increased by 26.6% to €26.2 million in 2013 from €20.7 million in 2012. This increase was primarily due to the costs incurred in the launch and rollout of our new *M_4O* offer which more than offset our strict cost control policies and marketing investments already made in previous years. Meo, S.A.'s marketing and publicity costs decreased by 20.3% to €18.8 million in 2013 from €23.6 million in 2012, reflecting the abovementioned strict cost control policies.

Supplies and external services. PTC's supplies and external services expenses decreased by 3.2% to €431.0 million in 2013 from €445.4 million in 2012. This decrease was primarily due to lower maintenance and repairs expenses and other third-party services, which benefited from the roll-out of our FTTH network and an extensive field force transformation program. Meo, S.A.'s supplies and external services expenses increased by 1.7% to €266.3 million in 2013 from €261.9 million in 2012. This increase reflects higher commissions and support services, partially offset by lower legal and consultancy fees.

Wages and salaries. PTC's wages and salaries, including employee benefits and social charges, decreased to €231.9 million in 2013 from €235.5 million in 2012, a decrease of 1.5%. The decreases in wages and salaries for PTC was primarily due to lower variable and overtime compensation, higher efficiency levels in certain internal processes and lower personnel costs as a result of a restructuring plan implemented in the second quarter of 2013. Meo, S.A.'s wages and salaries, including employee benefits and social charges, increased to €47.1 million in 2013 from €44.9 million in 2012, an increase of 4.9%. The increase in wages and salaries for Meo, S.A. was primarily due to higher variable compensation.

Post retirement benefit costs. PTC's post retirement benefit costs decreased by 29.7% to €40.3 million in 2013 from €57.3 million in 2012, primarily reflecting the reduction in discount rates undertaken at the end of 2012, leading to a lower net interest cost in 2013. The post retirement benefits costs in 2012 were restated in order to reflect the impact of the adoption of the amendments to IAS 19. This cost item does not include early termination costs related to our workforce reduction program, which are discussed under "—*Curtailment and settlement costs*" below.

Curtailment and settlement costs. PTC's curtailment and settlement costs increased to €112.8 million in 2013 from €1.2 million in 2012, reflecting the implementation of a redundancy program relating to approximately 400 employees in the second quarter of 2013. Curtailment and settlement costs in 2012 were also restated in order to reflect the impact of the adoption of the amendments to IAS 19.

Indirect taxes. PTC's indirect taxes decreased by 7.8% to €14.2 million in 2013 from €15.4 million in 2012. Meo, S.A.'s indirect taxes decreased by 7.6% to €14.6 million in 2013 from €15.8 million in 2012. The decrease in PTC and Meo, S.A.'s indirect taxes was primarily due to lower fees paid to ANACOM.

Provisions and adjustments. For PTC, provisions and adjustments decreased by 49.6% to €16.9 million in 2013 from €33.5 million in 2012, primarily due to a decrease in provisions for legal actions that benefited from a favorable outcome in a pending action and lower provisions for bad debt. For Meo, S.A., provisions and adjustments decreased by 1.7% to €11.4 million in 2013 from €11.6 million in 2012, primarily due to a decrease in provisions for bad debt. This was partially offset by an increase in provisions for legal actions.

Net other income and gains/(expenses and losses). PTC's net other income and gains decreased by 55.0% to €42.9 million in 2013 from €95.3 million in 2012. This was primarily due to a €60.0 million one-off gain recorded in 2012 relating to compensation received by PTC in connection with its universal service obligations under its concession agreement, which was partially offset by a €26.0 million one-off gain recorded in 2013 relating to the early settlement of the concession agreement. Meo, S.A.'s net other income and gains amounted to €0.4 million in 2013 as compared to €6.1 million of net other expenses and losses in 2012. This was primarily due to lower non-recurring adjustments for accounts receivables.

Equity in earnings of affiliated companies, net. PTC's equity in earnings of affiliated companies increased by 94.5% to €234.4 million in 2013 from €120.5 million in 2012, reflecting an increase in the earnings of Meo, S.A., a wholly-owned subsidiary of PTC. Meo, S.A.'s equity in earnings of affiliated companies increased by 183.8% to €194.7 million in 2013 from €68.6 million in 2012. This increase was predominantly due to a non-recurring gain of €134.5 million recorded by Bratel Brasil (which is a subsidiary of Bratel BV) relating to the settlement of certain liabilities in connection with the acquisition of the investment in Oi. This gain was reflected in Meo, S.A.'s equity in earnings of affiliated companies through its share in the earnings of PT Móveis, an entity that held an investment in Bratel BV which in turn held the investments in Oi and its controlling shareholders.

Income before depreciation and amortization, financing expenses and taxes. PTC's income before depreciation and amortization, financing expenses and taxes decreased by 8.9% to €646.7 million in 2013 from €709.7 million in 2012, primarily due to (i) lower revenues reflecting, as explained above, lower margins in new services provided by the enterprise segment and a continuous decline in the directories business, (ii) higher curtailment costs, reflecting the redundancy program undertaken in 2013 and (iii) lower other income and gains, reflecting primarily the gains recorded in both periods relating to the wireline concession agreement, as explained above. These effects were partially offset by higher equity in the earnings of affiliated companies, reflecting higher earnings at Meo, S.A.

Meo, S.A.'s income before depreciation and amortization, financing expenses and taxes increased by 9.2% to €582.7 million in 2013 from €533.5 million in 2012, primarily due to higher equity in the earnings of affiliated companies, reflecting higher earnings at PT Móveis which, through its subsidiary Bratel BV held the investment in Oi. This was partially offset by lower services rendered due to the factors explained above.

Based on the PT Portugal Combined Selected Financial Information, PTC and Meo, S.A. represented over 93.9% and 97.4% of the PT Portugal Group's EBITDA for the years ended December 31, 2013 and 2012, respectively. See "PT Portugal Combined Selected Financial Information". For a reconciliation between income before depreciation and amortization, financing expenses and taxes as reported by PTC and Meo, S.A. under Portuguese GAAP and EBITDA as reported by Portugal Telecom SGPS, S.A., see "*—Summary of Significant Differences between Portuguese GAAP and IFRS*".

Depreciation and amortization. PTC's depreciation and amortization costs decreased by 3.4% to €480.9 million in 2013 from €497.7 million in 2012. This decrease was primarily due to a decline in capital expenditures following the investments in its FTTH network and an extensive field force transformation program in previous years. Meo, S.A.'s depreciation and amortization costs decreased by 7.0% to €168.2 million in 2013 from €180.8 million in 2012, primarily due to a decline in capital expenditures in 2013 and late 2012 following the investments in certain technologies and networks undertaken in previous years, particularly in 4G coverage.

Net interest and related income (expenses). PTC's net interest and related expenses increased by 19.8% to €366.1 million in 2013 from €305.7 million in 2012. This was primarily due to a significant increase in the average net debt of PTC during the year ended December 31, 2013, reflecting the increased issuance of commercial papers by PTC and subscribed by PT Finance. Meo, S.A.'s net interest expenses decreased 12.8% to €18.4 million in 2013 from €21.1 million in 2012, reflecting lower outstanding debt, namely the intercompany loan of €340.0 million due to PTC that was repaid in 2013. This was partially offset by the €250.0 million of commercial papers that were issued in 2013.

Income taxes. For the year ended December 31, 2013, PTC's income taxes amounted to €9.9 million compared to an income tax gain of €2.3 million for the year ended December 31, 2012. This was primarily due to the change in the statutory tax rate applicable to PTC as from January 2014 from 25% to 23%, as a result of which PTC remeasured its deferred tax assets as of December 31, 2013 and accordingly recorded a deferred tax loss amounting to €13.5 million in 2013. For Meo, S.A., income taxes decreased from €80.1 million in 2012 to €59.9 million in 2013. This decrease was due to lower taxable earnings, primarily reflecting the decline in revenues.

Net (Loss)/Income. For PTC, net loss increased by 130.2% to €210.2 million in 2013, compared to €91.3 million in 2012, as a result of the factors described above. For Meo, S.A. net income increased by 33.6% to €336.1 million in 2013, compared to €251.6 million in 2012, as a result of the factors described above.

Year Ended December 31, 2012 Compared to Year Ended December 31, 2011 (Unaudited)

The table below sets out PTC's and Meo, S.A.'s results of operations for the years ended December 31, 2011 and 2012.[1]

	PTC		Meo, S.A.	
	Year Ended December 31,		Year Ended December 31,

(1) Reflects stand-alone financial information of PTC and Meo, S.A. and does not give effect to intercompany eliminations that would be eliminated in a consolidation of financial information. For the years ended December 31, 2012 and 2011, the net impact of intercompany eliminations between PTC and Meo, S.A. (but not including any other intercompany eliminations) on PTC's revenues would have been to reduce revenues by €160.2 million and €134.2 million, respectively, and on MEO's revenues would have been to reduce revenues by €107.8 million and €45.1 million, respectively. The net impact of intercompany eliminations between PTC and Meo, S.A. on income before depreciation and amortization and net income reflects primarily the equity in earnings of Meo, S.A. recorded by PTC through the equity method of accounting, amounting to €251.6 million and €285.8 million in the year ended December 31, 2012 and 2011, respectively, as the other eliminations offset each other in the operating and financial results. For further details, see "*PT Portugal Combined Selected Financial Information—Basis of Presentation*".

(2) Meo, S.A. recorded post retirement benefit costs of € 0.08 million and €0.04 million in the years ended December 31, 2012 and 2011, respectively, and curtailment costs of €1.1 million in the year ended December 31, 2011, both of which are included under the caption "*Other expenses and losses*" in Meo, S.A.'s standalone profit and loss statement.

Operating Revenues

PTC's revenues from services rendered and sales decreased by 1.3% to € 1,774.3 million in 2012 from €1,796.8 million in 2011. This decrease was primarily due to (i) lower revenues in the enterprise customer category, where we experienced pricing and demand pressure as a result of strong cost-cutting initiatives by government agency clients and a significant reduction in investments in new projects by government agency clients, cost reduction initiatives by large corporations and economic challenges faced by small and medium businesses, which showed some resilience in 2011 but became more negatively affected by the economic and financing conditions in Portugal in 2012 and (ii) lower revenues from wholesale and other businesses, as a result of a decline in the directories business, leased lines and accesses, including lower prices resulting from adverse regulatory decisions and lower volumes as operators continue to build networks, and declines in revenues from public pay phones and the termination of national and international traffic. These decreases in revenues were partially offset by an increase in revenues from the residential customer category, which were driven by the success of the *Meo* double- and triple-play offers. Additionally, PTC's subsidies to operation remained stable at €0.1 million for the years ended December 31, 2011 and 2012, respectively.

Meo, S.A.'s revenues from services rendered and sales decreased by 7.3% to €1,153.3 million in 2012 from €1,244.0 million in 2011. This decrease was primarily due to (i) lower revenues in the Enterprise customer category, where we experienced pricing and demand pressure due to the reasons mentioned above and (ii) revenue declines in the personal customer category, primarily due to lower mobile interconnection revenues (partially as a result of the negative impact of lower mobile termination rates), lower customer revenues (reflecting the effects of challenging economic conditions that have made customers more price-sensitive, greater competitive pressures, increased popularity of "tribal plans" yielding lower revenues per user, as well as the negative effect of lower revenues from mobile broadband due to the higher popularity of fixed broadband) and lower equipment sales. Notwithstanding the economic environment and significant growth in fixed broadband due to triple-play bundled offers, data revenues accounted for 33.2% of service revenues, an increase of 2.4% over 2011, as a result of the solid performance of "*internetnotelemóvel*" (internet on the cell phone) data packages, which continued to show strong growth, the commercial success of our "*e nunca mais acaba*" plan and increased penetration of smartphones, which partially offset the pressure on mobile broadband revenues. Additionally, Meo, S.A.'s subsidies to operation increased to €0.03 million in 2012 from no subsidies to operation in 2011.

Costs and Expenses

Costs of products sold and impairment of inventories. PTC's costs of products sold decreased by 18.6% to €31.6 million in 2012 from €38.8 million in 2011. This decrease was primarily due to our strict cost control policies. PTC's impairment reversals of inventories decreased to €3.6 million in 2012 from €6.7 million in 2011. Meo, S.A.'s costs of products sold decreased by 1.7% to €107.4 million in 2012 from €109.3 million in 2011. This decrease was primarily due to lower sales, lower handset subsidies offered to our mobile customers and a lower average cost of handsets as a result of favorable contracts entered into with key suppliers. Meo, S.A.'s impairment reversals of inventories increased to €4.1 million in 2012 from € 1.4 million in 2011

Direct costs. PTC's direct costs increased by 17.1% to €484.0 million in 2012 from €413.4 million in 2011. This increase is primarily due to an increase in programming costs, driven by customer growth and investment in content for our *Meo* offering, and higher costs associated with international traffic. The increase in direct costs was partially offset by lower costs associated with our directories business. Meo, S.A.'s direct costs decreased by 0.4% to €225.3 million in 2012 from €226.3 million in 2011. This decrease is primarily due to lower mobile traffic costs due to the impact of the regulatory mobile termination rate cuts and lower roaming interconnection costs and lower costs for contents of internet and mobile services. The decrease in direct costs was partially offset by an increase in lease capacity costs to €117.0 million in 2012 from €91.2 million in 2011.

Marketing and publicity. PTC's marketing and publicity costs decreased by 21.0% to €20.7 million in 2012 from €26.2 million in 2011. Meo, S.A.'s marketing and publicity costs decreased by 20.3% to € 23.6 million in 2012 from €29.6 million in 2011. The decrease in PTC's and Meo, S.A.'s marketing and publicity costs was primarily due to our strict cost control policies and marketing investments already made in previous years. In 2010, PTC and Meo, S.A. began to market their services under one brand, *Meo*, rather than marketing their services under several brands as was the case prior to 2010. This led to the simplification of marketing campaigns and thus the continual reduction in marketing costs as the *Meo* brand became more well known.

Supplies and external services. PTC's supplies and external services decreased by 6.0% to €445.4 million in 2012 from €474.0 million for the year ended December 31, 2011. This decrease was primarily due to lower maintenance and repair expenses, support services and other third-party services, which benefited from the roll-out of our FTTH network and an extensive field force transformation program. Meo, S.A.'s supplies and external services decreased by 6.3% to €261.9 million in 2012 from €279.6 million for the year ended December 31, 2011. This decrease was primarily due to lower commissions, which was achieved against a backdrop of continued customer growth (thus reflecting lower churn).

Wages and salaries. PTC's wages and salaries, including employee benefits and social charges, decreased to €235.5 million in 2012 from €240.1 million in 2011, a decrease of 1.9%. Meo, S.A.'s wages and salaries, including employee benefits and social charges, decreased to € 44.9 million in 2012 from €48.0 million in 2011, a decrease of 6.5%. The decreases in wages and salaries for PTC and Meo, S.A. are primarily due to lower variable and overtime compensation, higher efficiency levels in certain internal processes and lower personnel costs as a result of a restructuring plan implemented in the fourth quarter of 2011.

Post retirement benefit costs. PTC's post retirement benefit costs decreased by 4.1% to €51.7 million in 2012 from €53.9 million in 2011. This decrease was primarily due to a decrease in costs related to the annual service of active and suspended employees that were entitled to pension benefits under PTC's pension plans, which were transferred to the Portuguese State in December 2010. This cost item does not include early termination costs related to our workforce reduction program, which are discussed under "—*Curtailment and settlement costs*" below.

Curtailment and settlement costs. PTC's curtailment and settlement costs decreased by 97.3% to €0.9 million in 2012 from €32.9 million in 2011, reflecting mainly the reorganization undertaken at the end of 2011 that led to a number of employees becoming pre-retired or suspended and a decrease in the net present value of the salaries payable to such pre-retired or suspended employees.

Indirect taxes. PTC's indirect taxes increased by 11.6% to € 15.4 million in 2012 from €13.8 million in 2011. Meo, S.A.'s indirect taxes increased by 2.6% to €15.8 million in 2012 from € 15.4 million in 2011. The increase in PTC and Meo, S.A.'s indirect taxes was primarily due to an increase in VAT-related expenses.

Provisions and adjustments. For PTC, provisions and adjustments increased by 50.9% to €33.5 million in 2012 from €22.2 million in 2011, primarily due to an increase in provisions for legal actions and higher provisions for bad debt. For Meo, S.A., provisions and adjustments increased by 195.8% to €11.6 million in 2012 from € 2.4 million in 2011, reflecting higher provisions for both bad debt and legal actions.

Net other income and gains/(expenses and losses). PTC's net other income and gains increased to €95.3 million in 2012 from € 28.3 million in 2011. This was primarily due to a €60.0 million one-off gain recorded in 2012 relating to compensation received by PTC in connection with its universal service obligations under its concession agreement. Meo, S.A.'s net other expenses and losses increased to € 6.1 million in 2012 from €1.0 million in 2011. This was primarily due to certain non-recurring adjustments for accounts receivables recognized in 2012.

Equity in earnings of affiliated companies, net. PTC's equity in earnings of affiliated companies decreased by 21.4% to €120.5 million in 2012 from €153.3 million in 2011, reflecting primarily lower earnings from PTC's equity investment in Meo, S.A. Meo, S.A.'s equity in earnings of affiliated companies increased by 36.4% to €68.6 million in 2012 from €50.3 million in 2011. This increase was predominantly due to higher earnings from Meo, S.A.'s equity investment in PT Móveis, which at that time held the investment in Bratel BV which held the investment in Oi.

Income before depreciation and amortization, financing expenses and taxes. PTC's income before depreciation and amortization, financing expenses and taxes increased by 0.8% to €715.6 million in 2012 from €709.7 million in 2011, primarily due to the non-recurring gain recorded in 2012 relating to the wireline concession agreement included under the caption "*Other income and gains*", as explained above, which was partially offset by lower services rendered due to the factors detailed above and lower equity in earnings of affiliated companies, reflecting Meo, S.A.'s lower net income. Meo, S.A.'s income before depreciation and amortization, financing expenses and taxes decreased by 9.1% to € 533.5 million in 2012 from €587.1 million in 2011, primarily due to a decline in service revenues due to the factors described above, which was partially offset by higher equity in earnings of affiliated companies, reflecting higher earnings at PT Móveis.

Based on the PT Portugal Combined Selected Financial Information, PTC and Meo, S.A. represented over 97.4% and 94.6% of the PT Portugal Group's EBITDA for the years ended December 31, 2012 and 2011, respectively. See "PT Portugal Combined Selected Financial Information". For a reconciliation between income before depreciation and amortization, financing expenses and taxes as reported by PTC and Meo, S.A. under Portuguese GAAP and EBITDA as reported by Portugal Telecom SGPS, S.A., see "*—Summary of Significant Differences between Portuguese GAAP and IFRS*".

Depreciation and amortization. PTC's depreciation and amortization costs decreased by 3.9% to €497.7 million in 2012 from €518.0 million in 2011. This decrease was primarily due to the ending of the useful life of several real estate assets in December 2011, which also led to lower amortization expenses in 2012. Meo, S.A.'s depreciation and amortization costs decreased by 7.0% to €180.8 million in 2012 from €194.4 million in 2011. This was primarily due to the swap of Meo, S.A.'s 2G equipment for 4G-enabled equipment, which led to the accelerated depreciation of 2G equipment through June 30, 2011.

Net interest and related income (expenses). PTC's net interest and related expenses increased by 2.2% to €305.7 million in 2012 from €299.0 million in 2011. Meo, S.A.'s net interest and related expenses increased by 22.0% to €21.1 million in 2012 from € 17.3 million in 2011. The incease in PTC's and Meo, S.A.'s net interest and related expenses primarily reflects higher interests expenses related to intercompany loans, following the increase in outstanding average debt.

Income taxes. For the year ended December 31, 2012, PTC's income tax gain amounted to €0.9 million compared to income taxes of € 262.1 million for the year ended December 31, 2011. This was due to the derecognition of deferred tax assets totalling €227.2 million in 2011. For Meo, S.A., income taxes decreased from €89.5 million in 2011 to €80.1 million in 2012, reflecting lower taxable earnings mainly due to the decline in revenues.

Net (Loss)/Income. For PTC, net loss decreased by 75.3% to € 86.9 million in 2012, compared to €369.4 million in 2011, as a result of the factors described above. For Meo, S.A., net income decreased by 12.0% to €251.6 million in 2012, compared to €285.8 million in 2011, as a result of the factors described above.

Liquidity and Capital Resources

Our principal capital requirements relate to:

- funding our operations;
- capital expenditures on our network infrastructure, information systems and other investments (see "*—Capital Expenditures*" and *"—Contractual Obligations and Off-Balance Sheet Arrangements*" below);
- funding interest payments with respect to our indebtedness and repayments and refinancing of our indebtedness (see "*—Indebtedness*" below);
- in prior periods, shareholder remuneration in the form of dividend payments; and
- funding of post retirement benefits (see "*—Post Retirement Benefits*" below).

Our principal sources of funding for these capital requirements were cash generated from our operations and from the Group and equity and debt financing. We believe that our cash balances, together with the cash that we expect to generate from our operations and available liquidity under our credit facilities and lines of credit, are currently sufficient to meet our present funding needs. Following the New Transactions, liquidity will be provided by the Existing Altice Financing Revolving Credit Facilities and the New Revolving Credit Facilities and other resources within the Altice International Group. For the liquidity and capital resources of the Altice International Group, see "*Management's Discussion and Analysis of Financial Condition and Results of Operations of the Altice International Group—Liquidity and Capital Resources*".

Cash Flows

The table below sets forth a breakdown of PTC's and Meo, S.A.'s cash flows for the years ended December 31, 2011, 2012 and 2013 and the nine-month periods ended September 30, 2013 and 2014.(1)

	PTC					Meo, S.A.				
	Year ended December 31,			Nine months ended September 30,		Year ended December 31,			Nine months ended September 30,	
	2011	2012	2013	2013	2014	2011	2012	2013	2013	2014

(1) Reflects stand-alone financial information of PTC and Meo, S.A. and does not give effect to intercompany eliminations that would be eliminated in a consolidation of financial information. The relevant intercompany eliminations between PTC and Meo, S.A. relating to operating activities result from: (1) PTC's net cash receipts from Meo, S.A. relating to operating activities amounting to €94.4 million and € 78.9 million for the nine months ended September 30, 2013 and 2014, respectively, and €134.5 million, €105.3 million and € 138.2 million for the years ended December 31, 2011, 2012 and 2013, respectively, and (2) Meo, S.A.'s net cash payments to PTC relating to operating activities amounted to the same amounts referred to above. The relevant intercompany eliminations between PTC and Meo, S.A. relating to investing activities and financing activities result from: (1) PTC's cash inflow from the repayment by Meo, S.A. of intercompany loans that had been granted by PTC in previous years, amounting to €340.0 million for the nine months ended September 30, 2013 and €160.0 million

for the year ended December 31, 2011, and interest received by PTC in connection with these loans amounting to €30.0 million for the year ended December 31, 2013, and (2) MEO's net cash payments to PTC relating to these same loans, which are included under financing activities and amounted to the same amounts referred to above. For further details, see "*PT Portugal Combined Selected Financial Information—Basis of Presentation*".

Cash Flow from Operating Activities

Cash flows from operating activities include collections from customers, payments to suppliers, payments to employees, payments relating to income taxes, payments related to post retirement benefits and other cash payments made with respect to operating activities.

PTC's net cash flow from operating activities increased by 22.1% to € 484.2 million for the nine months ended September 30, 2014 from € 396.6 million for the nine months ended September 30, 2013, primarily due to lower payments to suppliers, which was partially offset by lower cash receipts from customers, both reflecting the decreased commercial activity at PTC.

Meo, S.A.'s net cash flow from operating activities decreased by 2.5% to €189.2 million for the nine months ended September 30, 2014 from €194.0 million for the nine months ended September 30, 2013, primarily due to lower cash receipts from customers which was partially offset by lower payments to suppliers and lower payments of income taxes.

PTC's net cash flow from operating activities decreased by 10.1% to € 488.8 million in 2013 from €543.8 million in 2012, primarily due to lower collections from customers (with a decrease of €170.6 million), reflecting the decline in revenues, and higher income taxes paid by PTC for the year ended December 31, 2013 as compared to the year ended December 31, 2012 from a cash receipt of €35.9 million in 2012 to a payment of €6.3 million in 2013. These effects were partially offset by lower payments relating to post retirement benefits (with a decrease of €7.5 million), lower payments to suppliers (with a decrease of €144.2 million) due to lower operating costs in line with the decline in revenues and lower payments to employees (with a decrease of €13.3 million).

Meo, S.A.'s net cash flow from operating activities decreased by 39.9% to €259.8 million in 2013 from €432.6 million in 2012, primarily due to lower collections from customers (with a decrease of € 200.2 million), reflecting the decline in revenues, and an increase in payments relating to other operating activities, reflecting mainly spectrum fees and other payments, including the payments of certain indirect taxes and payments relating to legal actions. These were partially offset by lower payments to suppliers (with a decrease of €18.6 million) and employees (with a decrease of €2.4 million) and a decrease in income tax payments to €69.9 million in 2013 from €92.1 million in 2012.

PTC's net cash flow from operating activities decreased by 6.0% to € 543.8 million in 2012 from €578.7 million in 2011, primarily due to higher payments to suppliers (with an increase of €91.8 million), reflecting higher direct costs, and an increase in other cash payments made to €94.3 million in 2012 from €47.5 million in 2011. These were partially offset by a decrease in income tax paid for the year ended December 31, 2012 as compared to the year ended December 31, 2011 from a cash payment of €52.2 million in 2011 to a cash receipt of € 35.9 million in 2012.

Meo, S.A.'s net cash flow from operating activities decreased by 9.1% to €432.6 million in 2012 from €476.0 million in 2011, primarily due to lower collections from customers (with a decrease of € 32.6 million), reflecting the decline in revenues, an increase in income tax payments to €92.1 million in 2012 from €83.6 million in 2011 and an increase in payments to suppliers to €765.6 million in 2012 from €762.0 million in 2011, partially offset by a decrease in payments to employees to €48.7 million in 2012 from €48.9 million in 2011 and a decrease in VAT payments and spectrum fees paid to ANACOM to €85.8 million in 2012 from €87.0 million in 2011.

Cash Flow from (Used in) Investing Activities

Cash flows from investing activities include proceeds from disposals of investments in affiliated companies and property, plant and equipment, loans granted, dividends, as well as interest and related income on cash equivalents and short-term investments. Cash flows used in investing activities primarily include capital expenditures on tangible and intangible assets, investments in other companies and expenditures on loans granted.

PTC's net cash flow used in investing activities increased to € 218.6 million for the nine months ended September 30, 2014 from a net cash receipt of €62.2 million for the nine months ended September 30, 2013, primarily due to the repayment in 2013 by Meo, S.A. to PTC of an intercompany loan that had been granted by PTC in previous years, amounting to €340.0 million. This was partially offset by lower payments to fixed asset suppliers, reflecting the decline in capital expenditures.

Meo, S.A.'s net cash flow from investing activities increased to € 131.7 million for the nine months ended September 30, 2014 from net cash flow used in investing activities of €34.9 million for the nine months ended September 30, 2013, primarily due to higher dividends received from PT Móveis (which amounted to €194.0 million for the nine months ended September 30, 2014 as compared to €67.9 million for the nine months ended September 30, 2013) and lower payments to fixed asset suppliers (€33.9 million), reflecting the decline in capital expenditures. There was a cash payment of €6.0 million in each of January 2013 and January 2014, representing the second and third instalments (out of a total of six instalments) for the 4G license which Meo, S.A. acquired in 2011.

PTC's net cash flow used in investing activities decreased by 88.8% to €33.4 million in 2013 from €296.9 million in 2012, primarily due to a decrease in cash payments for the acquisition of tangible assets to €399.1 million in 2013 from €531.2 million in 2012 (primarily due to lower capital expenditures as a result of investments in its FTTH network in prior years), an increase in cash receipts from the disposals of financial investments (primarily resulting from the disposal of the investment in Companhia de Telecomunicações de Macau, S.A.R.L. for € 36.0 million in 2013) and the cash receipt relating to loans granted in prior years to Meo, S.A. (€340 million). These were partially offset by the dividend of €235.5 million received from Meo, S.A. in 2012 and an increase in payments resulting from financial investments, primarily due to the acquisition of Sportinveste Multimédia in 2013 (€ 32.6 million).

Meo, S.A.'s net cash flow used in investing activities decreased by 72.3% to €78.1 million in 2013 from €281.5 million in 2012, primarily due to an increase in dividends received from PT Móveis for the year ended December 31, 2013 as compared to the year ended December 31, 2012 to €67.9 million in 2013 from €5.0 million in 2012 and a decrease in cash payments for the acquisition of tangible and intangible assets to €149.2 million in 2013 from €292.6 million in 2012, primarily as a result of the payment in January 2012 of the first instalment of €83.0 million for the 4G license (as compared to a payment of €6.0 million in January 2013 of the secondment instalment for the 4G license) and lower capital expenditures.

PTC's net cash flow used in investing activities decreased by 26.4% to €296.9 million in 2012 from €403.5 million in 2011. This decrease can primarily be attributed to the dividend in an amount of € 235.5 million received from Meo, S.A. in 2012 and a decrease in cash payments for the acquisition of tangible assets to €531.2 million in 2012 from €559.7 million in 2011. These were partially offset by the cash receipts in 2011 from loans repaid by Meo, S.A. to PTC in an amount of €160.0 million, which had been granted in previous years.

Meo, S.A.'s net cash flow used in investing activities increased by 84.0% to €281.5 million in 2012 from €153.0 million in 2011, primarily due to an increase in cash payments for the acquisition of tangible and intangible assets to €292.6 million in 2012 from €167.7 million in 2011 mainly as a result of the payment in January 2012 of the first instalment of €83.0 million for the 4G license, which Meo, S.A. acquired in 2011 and the investments in 4G coverage undertaken throughout 2012. This was partially offset by the dividend of €5.0 million received from PT Móveis in 2012.

Cash Flows from (Used In) Financing Activities

Cash flows used in financing activities include repayments of debt and payments of interest on debt. Cash flows from financing activities primarily consist of borrowings and subsidies.

PTC's net cash flow used in financing activities decreased 45.7% to € 233.2 million for the nine months ended September 30, 2014 from € 429.5 million for the nine months ended September 30, 2013, primarily due to net cash receipts from loans obtained of €82.1 million for the nine months ended September 30, 2014, as compared to net payments resulting from loans repaid of €226.7 million for the nine months ended September 30, 2013. This was partially offset by an increase of €111.6 million in interest payments, reflecting the increase in the total debt of PTC.

Meo, S.A.'s net cash flow used in financing activities increased by 98.4% to €252.5 million for the nine months ended September 30, 2014 from €127.3 million for the nine months ended September 30, 2013, primarily due to higher net payments from loans repaid, totaling € 243.9 million and €116.1 million for the nine months ended September 30, 2014 and 2013, respectively.

PTC's net cash flow used in financing activities increased by 61.3% to €453.0 million in 2013 from €280.8 million in 2012, primarily due to an increase in cash payments under the commercial paper programs to €592.0 million in 2013 from a cash receipt of €1,092.0 million in 2012. This was partially offset by an increase in cash receipts obtained under loans granted by PT Portugal and intercompany loans amounting to €476.4 million in 2013 compared to a payment of €472.2 million under intercompany loans in 2012, a payment in 2012 to the Portuguese Social Security System relating to the transfer of unfunded regulatory pension obligations to the Portuguese State amounting to €454.3 million and a decrease in interest payments and related expenses to € 321.0 million in 2013 from €426.2 million in 2012.

Meo, S.A.'s net cash flow used in financing activities decreased by 8.6% to €179.2 million in 2013 from €196.1 million in 2012. This decrease can primarily be attributed to the dividend payments of € 235.5 million made to PTC in 2012 and the cash receipt of €250.0 million from loans obtained in 2013, primarily due to receipts obtained under the commercial paper programs. These were partially offset by the repayment in 2013 of loans owing to PTC (€340.0 million), the increase in payments relating to intercompany loans to €46.2 million in 2013 from a cash receipt of €47.0 million in 2012 and the increase in interest payments and related expenses to €42.9 million in 2013 from € 5.2 million in 2012.

PTC's net cash flow used in financing activities increased by 114.0% to €280.8 million in 2012 from €131.2 million in 2011, primarily due to an increase in payments relating to leases and other loans obtained to €21.4 million in 2012 from €12.9 million in 2011, an increase in payments relating to intercompany loans to €472.2 million in 2012 from a cash receipt of €4.8 million in 2011, a decrease in cash receipts from loans granted by PT Portugal to no cash receipts in 2012 from €727.0 million in 2011 and an increase in interest payments and related expenses to €426.2 million in 2012 from €155.8 million in 2011. These were partially offset by an increase in cash receipts obtained under the commercial paper programs to €1,092.0 million in 2012 from a payment of €227.0 million in 2011 and a decrease in payments to the Portuguese Social Security System relating to the transfer of unfunded regulatory pension obligations to the Portuguese State for the year ended December 31, 2012 as compared to the year ended December 31, 2011 to €454.3 million in 2012 from €467.4 million in 2011.

Meo, S.A.'s net cash flow used in financing activities decreased by 30.4% to €196.1 million in 2012 from €281.7 million in 2011, primarily due to a decrease in payments related to loans obtained to a receipt of €44.6 million in 2012 from a payment of €268.2 million in 2011. This decrease can primarily be attributed to a decrease in payments relating to financing under the centralized treasury system, to a cash receipt of €47.0 million in 2012 from a payment of €52.8 million in 2011, a decrease in repayments of financing obtained under the commercial paper program and shareholders' loans to no repayments in 2012 from €209.9 million in 2011 and a decrease in payments under finance lease contracts and other financing to €2.5 million in 2012 from €5.5 million in 2011. These were partially offset by the dividends of €235.5 million which was paid to PTC in 2012.

Working Capital

The working capital requirements of PTC correspond principally to the value of the stocks (composed mainly of end user equipment), the increase in trade accounts receivable and other receivables and decrease in trade accounts payable and other payables. The working capital requirements of Meo, S.A. correspond principally to the value of the stocks (composed mainly of mobile handsets, boxes, decoders and accessories), the increase in trade accounts receivable and other receivables and decrease in trade accounts payable and other payables.

With respect to the B2C market PTC and Meo, S.A. generate working capital in connection with the shorter client payment periods (generally 30 days) than those of the suppliers (generally between 60 and 90 days), while with respect to the enterprise and wholesale market, PTC and Meo, S.A. are higher since clients in these markets benefit from longer payment periods.

The change in working capital requirements of PTC can be broken down as follows:

	Year ended December,		**Nine Months ended September 30,**	
	2012	**2013**	**2013**	**2014**
	€ in millions			
Accounts receivable	(114.2)	3.4	6.9	6.2
Accounts payable	162.2	(65.1)	(25.1)	(73.5)
Inventories	(5.2)	(18.2)	(6.2)	1.1
Tax Receivable/(Payable)	(8.0)	12.3	(12.5)	(21.9)
Accrued Expenses	57.9	11.5	(58.7)	(10.4)
Defered Income	(7.8)	(17.7)	(10.4)	(1.5)
Prepaid expenses	0.3	0.5	3.5	2.9
Change in working capital requirements	**85.3**	**(74.4)**	**(102.6)**	**(97.1)**

The change in working capital requirements of Meo, S.A. can be broken down as follows:

	Year ended December,		**Nine Months ended September 30,**	
	2012	**2013**	**2013**	**2014**
	€ in millions			
Accounts receivable	(22.7)	17.4	31.5	141.9
Accounts payable	101.9	103.5	63.1	(7.0)
Inventories	(5.5)	3.8	15.5	(5.8)
Tax Receivable/(Payable)	1.4	(15.6)	(7.0)	3.6
Accrued Expenses	14.4	(33.5)	(27.8)	(8.5)

Defered Income	2.5	10.8	8.8	3.2
Prepaid expenses	2.9	(2.1)	0.9	4.8
Change in working capital requirements	**94.9**	**84.4**	**85.1**	**132.1**

For the nine months ended September 30, 2014, the divestment in working capital of PTC resulted in a cash contribution of €97.1 million. This change is principally due to an increase in trade payables, including primarily an increase in payables to Meo, S.A., and the Christmas subsidy that is accrued through the year and paid in the fourth quarter of each year. For the nine months ended September 30, 2014, the investment in working capital of Meo, S.A. generated a cash requirement of of €132.1 million. This change is principally due to higher trade receivables, including intercompany receivables, namely from PTC.

For the year ended December 31, 2013, the divestment in working capital of PTC resulted in a cash contribution of €74.4 million. This change is principally due to an increase in trade payables, including intercompany payables to other entities of PT Portugal group. For the year ended December 31, 2013, the investment in working capital requirements of Meo, S.A. generated a cash requirement of €84.4 million. This change is principally due lower accounts payables.

We expect our operating cash flows and, if required, available borrowings under the Altice Group's revolving credit facilities will be sufficient to meet our working capital requirements during the next twelve months.

Capital Expenditures

The following tables set forth the accrued capital expenditures of the PT Portugal Group by entity and by segment based on the PT Portugal Combined Selected Financial Information:

	Year ended December 31,			Nine months ended September 30,	
	2011	**2012**	**2013**	**2013**	**2014**
	€ in millions				
PTC	515.3	392.8	341.1	229.3	170.7
Meo, S.A.	280.1	140.8	107.5	70.2	42.3
Sub-total	**795.4**	**533.6**	**448.6**	**299.5**	**213.0**
Other entities included in the transaction perimeter	3.2	38.1	71.7	56.8	18.0
Total combined capex	**798.6**	**571.7**	**520.3**	**356.3**	**231.0**

	Year ended December 31,		Nine months ended September 30,	
	2012	**2013**	**2013**	**2014**
	€ in millions			
Customer	**180.2**	**158.7**	**119.7**	**98.5**
B2C	123.4	98.9	73.2	67.7
B2B	55.0	57.6	45.1	29.4
Other	1.8	2.1	1.4	1.4
Infrastructure	266.1	199.3	121.7	75.7
IT/IS	90.5	110.8	88.6	40.7
Other	18.6	21.2	6.6	6.2
Telecommunications business	**555.5**	**490.0**	**336.7**	**221.1**
Support companies and other entities	16.2	30.3	19.6	9.9
Total combined capex	**571.7**	**520.3**	**356.3**	**231.0**

For the nine months ended September 30, 2014, total capital expenditures of PTC and Meo, S.A. decreased by 28.9% to €213.0 million from €299.5 million for the nine months ended September 30, 2013, as a result of signficant investments made in the past years, both in FTTH and 4G-LTE. For the nine months ended September 30, 2014 and 2013, PT Portugal Group's combined capital expenditures, as derived from the PT Portugal Combined Selected Financial Information, amounted to €231.0 million and €356.3 million, respectively, and PTC and Meo, S.A. accounted for 92.2% and 84.1% of the combined capital expenditures, respectively.

The decrease in total capital expenditures of PTC and Meo, S.A. to €448.6 million in 2013 from €533.6 million in 2012 reflects declines in both customer and infrastructure capital expenditures. The decline in customer capital expenditures was primarily explained by (1) lower unitary equipment costs, (2) lower net additions of customers and (3) lower churn across our pay-TV and broadband services. In 2013, the decline in infrastructure capital expenditures was primarily explained by our expenditures in previous years to (i) deploy the FTTH network, (2) modernize the 4G- enabled 2G network and (3) reinforce our 3G and 3.5G networks in terms of coverage and capacity. This led to an overall decrease in technology capital expenditures in 2013, notwithstanding our investments in deploying the 4G network. For the years ended December 31, 2013 and 2012, PT Portugal Group's combined capital expenditures, as derived from the PT Portugal Combined Selected Financial Information, amounted to €520.3 million and €571.7 million, respectively, and PTC and Meo, S.A. accounted for 86.2% and 93.3% of the combined capital expenditures, respectively.

The table below sets forth the cash capital expenditures of the PT Portugal Group by entity based on the PT Portugal Combined Selected Financial Information:

	For the year ended December 31,			For the nine months ended September 30,	
	2011	**2012**	**2013**	**2013**	**2014**
	€ in millions

The difference between the cash capital expenditures and accrued capital expenditures of the PT Portugal Group is primarily due to the trend of declining accrued capital expenditures over such periods and the timing of when capital expenditures are paid. For example (and based on the general assumption of a 90-day payment period): (i) consolidated gross cash capital expenditures of the PT Portugal Group for the nine months ended September 30, 2014 are €85.4 million greater than the accrued capital expenditures of the PT Portugal Group, reflecting higher accrued capital expenditures in the fourth quarter of 2013 of €164 million, which was paid in the first quarter of 2014, as compared to accrued capital expenditures of €67 million in the third quarter of 2014, which was paid in the fourth quarter of 2014, (ii) consolidated gross cash capital expenditures of the PT Portugal Group for the nine months ended September 2013 are €71.8 million greater than the accrued capital expenditures of the PT Portugal Group, reflecting higher accrued capital expenditures in the fourth quarter of 2012 of €195 million, which was paid in the first quarter of 2012, as compared to accrued capital expenditures of €117 million in the third quarter of 2013, which was paid in the fourth quarter of 2013, (iii) consolidated gross cash capital expenditures of the PT Portugal Group for the year ended December 31, 2012 are €191.9 million greater than the accrued capital expenditures of the PT Portugal Group, reflecting higher accrued capital expenditures in the fourth quarter of 2011 of €387 million, which was paid in the first quarter of 2012 (including a €83 million instalment payment for the 4G license which cost a total of €106 million, which Meo, S.A. acquired in 2011), as compared to accrued capital expenditures of €195 million in the fourth quarter of 2012, which was paid in the first quarter of 2013 and (iv) consolidated gross cash capital expenditures of the PT Portugal Group for the year ended December 31, 2011 are €128.5 million less than the accrued capital expenditures of the PT Portugal Group, reflecting the increase of capital expenditures from 2010 to 2011.

Indebtedness

PTC's indebtedness amounted to €7,318.0 million as of September 30, 2014, compared to €7,240.3 million as of December 31, 2013. PTC's cash and cash equivalents increased to € 54.9 million as of September 30, 2014 from €21.7 million as of December 31, 2013. Meo, S.A.'s indebtedness amounted to € 3.1 million as of September 30, 2014, compared to €254.7 million as of December 31, 2013. Meo, S.A.'s cash and cash equivalents increased to €78.6 million as of September 30, 2014 from €10.3 million as of December 31, 2013. PTC's and Meo, S.A.'s existing debt will be refinanced in connection with the Transactions. As part of the Transactions, the Senior Notes Issuer has issued the New Senior Notes, the Senior Secured Notes Issuer has issued the New Senior Secured Notes, enter into the New Altice Financing Term Loan and enter into the New Revolving Credit Facilities and Altice S.A. issued the New ASA Senior Notes. The Senior Secured Notes Issuer will use amounts borrowed under the New Senior Notes Proceeds Loan, the proceeds of the offering of the New Senior Secured Notes, the amounts borrowed under the New Altice Financing Term Loan and any amounts borrowed under the New Altice Financing Revolving Credit Facility to make a proceeds loan (the "New AH Proceeds Loan") to Altice Holdings. Altice Holdings will use the proceeds under the New AH Proceeds Loan and the ASA Notes Proceeds Contribution to make the AWE Proceeds Loan to Altice West Europe which in turn will make the AP Proceeds Loan to Altice Portugal to consummate the PT Portugal Acquisition. Furthermore, Altice Portugal, PT Portugal, PT OpCo, PT Móveis and SIRESP intend to enter into the PT Group Loans as part of the PT Portugal Acquisition. Following the completion of the Transactions, PT OpCo will have €969.6 million of debt comprising intercompany loans from PT Portugal.

In addition, as of September 30, 2014, PTC had €27.2 million of debt under finance leases of which €15.9 million is due within one year, €5.4 million is due between one and three years, €4.2 million is due between three and five years and €1.7 million is due in more than five years.

As of September 30, 2014, Meo, S.A. had €3.1 million of debt under finance leases of which €1.4 million is due within one year, €0.8 million is due between one and three years, €0.5 million is due between three and five years and €0.3 million is due in more than five years. In addition, the other subsidiaries in the PT Portugal Group (excluding PTC and Meo, S.A.) had €13.3 million of debt under finance leases, as derived from the PT Portugal Combined Selected Financial Information, as of September 30, 2014.

Post Retirement Benefits

As of December 31, 2013, the projected benefits obligations, or PBO, of PTC's post retirement benefits, including pension supplements, healthcare benefits and salaries payable to pre-retired and suspended employees amounted to €1,328.3 million (€116.4 million for pension supplements, €375.7 million for healthcare benefits and €836.3 million for salaries payable to pre-retired and suspended employees). As of September 30, 2014, the projected benefits obligations, or PBO, of PTC's post retirement benefits, including pension supplements, healthcare benefits and salaries payable to pre-retired and suspended employees amounted to €1,316.4 million (€112.9 million for pension supplements, €402.0 million for healthcare benefits and €801.5 million for salaries payable to pre-retired and suspended employees). The decrease in the PBO of PTC's post retirement benefits was primarily due to the decrease in salaries payable to pre-retired and suspended employees, which was partially offset by the increase in healthcare benefits obligations due to net acturial losses recorded as a result of the reduction in discount rates that was partially offset by a gain recorded as a result of the reduction in benefits granted under these plans. As of September 30, 2014 and December 31, 2013, these projected benefits obligations were computed based on discount rates of 2.00% and 3.00% for pension supplements, respectively, 2.5% and 4.00% for healthcare benefits, respectively, and 0.75% and 2.00% for obligations related to the payment of salaries to pre-retired and suspended employees, respectively, and assuming an annual salary increase of 1.75% for pension supplements and healthcare benefits and an annual salary increase ranging between 0% and 1% for salaries due to pre-retired and suspended employees, depending on the amount of the salary and the year of payment, as explained in more detail in Note 11.1 to the Audited Financial Statements of PTC for the year ended December 31, 2013. As of December 31, 2013, PTC's post retirement benefits plans which are closed to new participants, covered approximately 19,763 employees in the case of pensions (approximately 36% still in service), approximately 23,402 beneficiaries in the case of healthcare obligations (approximately 23% still in service) and approximately 5,304 suspended and pre-retired employees in the case of salaries obligations. As of December 31, 2013 and September 30, 2014, the PBO of Meo, S.A.'s post retirement benefits, consisting of salaries payable to pre-retired and suspended employees amounted to €5.8 million and €5.2 million, respectively.

According to the rules of the Portuguese Insurance Institute (*Instituto de Seguros de Portugal, or ISPortugal*), the Portuguese insurance regulator, the liability related to retired employees under the pension supplement plans must be fully funded. Under current rules, funding of pension funds for pre- retired employees and employees still in service can be completed up to the retirement age. The estimated average working life of employees still in service is 14 years. As of September 30, 2014, PTC's pension obligations for retired employees, computed based on ISPortugal rules, are fully funded.

In Portugal, there is no legislation on the establishment of funds to cover the healthcare obligations and the salaries for pre-retired and suspended employees. PTC is required to pay for these benefits only when the salaries are paid to pre-retired and suspended employees, or when healthcare expenses are incurred. Accordingly, there is no requirement to fund these benefits obligations at present. However, the Group has set up a fund managed by our subsidiary, PT Prestações, to finance its healthcare post- retirement liabilities. In previous years, the Group contributed €602 million to this fund, which is being managed in accordance with the same guidelines as the Group's pension funds. Since 2010, PTC has not made additional contributions to this fund.

The market value of the pension supplement funds amounted to €94.7 million as of December 31, 2013, a decrease from €99.5 million as of December 31, 2012, reflecting payments of pension supplements made by the funds (€9.0 million). This was partially offset by the positive performance of assets under management (€3.7 million). See Note 14.1 to the Audited Financial Statements of PTC for the year ended December 31, 2013 for additional information. The asset allocation of our pension supplement funds as of December 31, 2013 was 20.4% equity, 60.5% bonds, 2.4% property and 16.6% cash and others. The effective return of the funds in 2013 was approximately 3.7%. As of September 30, 2014, the market value of the pension supplement funds remained broadly stable at €94.2 million, as compared to €94.7 million as of December 31, 2013. The asset allocation of our pension supplement funds as of September 30, 2014 was 23.3% equity, 65.1% bonds, 2.5% property and 9.1% cash and others. The effective return of the funds for the nine months ended September 30, 2014 was approximately 2%.

The market value of the healthcare benefits fund amounted to €291.7 million as of December 31, 2013, a decrease from €299.9 million as of December 31, 2012, reflecting net refunds of healthcare expenses paid on account by PTC (€22.0 million). This was partially offset by the positive performance of assets under management (€13.8 million). See Note 14.2 to the Audited Financial Statements of PTC for the year ended December 31, 2013 for additional information. The asset allocation of our healthcare benefits fund as of December 31, 2013 was 30.0% equity, 19.7% bonds and 50.3% cash and others. The effective return of the funds in 2013 was approximately 4.7%. As of September 30, 2014, the market value of the healthcare benefit funds amounted to €158.5 million, a decrease of €133.2 million from €291.7 million as of December 31, 2013, reflecting primarily the depreciation of the investment in shares of Banco Espírito Santo Bank ("BES"), following the corporate restructuring of this bank, through which the former shareholders of BES became shareholders of an entity that include assets unrelated to the bank's activities and with no market quote. The asset allocation of our healthcare benefit funds as of September 30, 2014 was 100% cash and others. The effective return of the funds for the nine months ended September 30, 2014 was negative by approximately 40% reflecting the abovementioned depreciation in the investment of BES.

Liabilities stated in PTC's balance sheet correspond to the difference between the PBO related to pensions deducted from the fair value of pension fund assets. The accrued liability related to PTC's total post-retirement benefits amounted to €942.0 million as of December 31, 2013. In 2013, the accrued liabilities increased by €112.9 million, reflecting primarily total post retirement benefits and curtailment costs (€128.5 million) and net actuarial losses (€138.8 million) recognized in the period, effects that were partially offset by salary payments to suspended and pre-retired employees up to retirement age made during the year (€156.4 million). The accrued liability related to PTC's total post-retirement benefits amounted to €1,063.7 million as of September 30, 2014, an increase of €121.7 million from December 31, 2013, reflecting primarily net actuarial losses of €248.5 million due to the reduction in discount rates and negative return on plan assets, which was partially offset by payments, contributions and refunds of €121.2 million, related primarily to salaries paid to pre-retired and suspended employees. The accrued liability related to Meo, S.A.'s salary payments obligations to suspended and pre-retired employees amounted to €5.8 million and €5.2 million as of December 31, 2013 and September 30, 2014.

The table below shows the evolution of PTC's total net responsibilities for post retirement benefits during the years ended December 31, 2011, 2012 and 2013 and for the nine months ended September 30, 2014.

	Year Ended December 31,			September 30, 2014
	2011	2012	2013	
	€ in millions			
Responsibilities for post retirement benefits, net (initial balance)	**945.6**	**908.2**	**829.1**	**942.0**
PT Prime merger	0.3	—	—	—
Net periodic pension cost/(gain)	35.7	35.0	18.5	16.5
Workforce reduction costs	31.2	(0.3)	110.0	(22.0)
Payments, contributions and refunds	(171.0)	(159.4)	(154.4)	(121.2)
Net actuarial losses (gains)	66.4	45.6	138.8	248.5
Responsibilities for post retirement benefits, net (final balance)	**908.2**	**829.1**	**942.0**	**1,063.7**

The table below sets forth the components of PTC's cash flows associated with post retirement benefits in 2011, 2012 and 2013 and for the nine months ended September 30, 2014.

	Year Ended December 31,			Nine months ended September 30,
	2011	2012	2013	2014
	€ in millions			
Pensions				
Contributions to the funds	1.7	1.1	0.5	1.1
Payments of pension supplements	1.1	1.0	0.8	0.7
Subtotal	**2.8**	**2.1**	**1.3**	**1.8**
Healthcare				
Refunds	(23.3)	(20.8)	(22.0)	(11.5)
Payments of health care expenses	18.0	19.0	18.8	15.1
Subtotal	**(5.3)**	**(1.8)**	**(3.2)**	**3.6**
Other payments				
Payments of salaries to pre-retired and suspended employees	173.5	159.2	156.4	115.8
Termination payments	1.7	1.5	2.8	0.1
Service cost related to liabilities transferred to the Portuguese State[(1)]	21.8	25.5	21.8	14.8
Subtotal	**197.0**	**186.1**	**180.9**	**130.7**
	194.5	**186.4**	**178.9**	**136.1**

(1) This caption is accounted for below EBITDA and corresponds to a fixed contribution paid by PTC to the Portuguese Social Security System relating to the annual service of active and suspended employees that were entitled to pension benefits under PTC's post-retirement benefit plans that were transferred to the Portuguese State in December 2010. These contributions are payable so long as the employee who was part of the plans transferred in question remains employed by PTC.

The table below sets forth the estimate of future undiscounted payments as of December 30, 2013, to be made by PTC related to salaries due to pre- retired and suspended employees and to expected contributions to the funds:[(1)]

	€ in millions
2014 (Full year)	155.2
2015 and 2016	268.5
2017 and 2018	216.6
More than 5 years	394.5
Total	**1,034.8**

(1) The figures shown do not take into account payments of salaries to pre-retired and suspended employees that left the company after December 31, 2013, in connection with a redundancy program. During the nine months ended September 30, 2014, we undertook a redundancy program that increased the number of suspended and pre-retired employees by approximately 70.

As of September 30, 2014, the accrued liability related to the PT Portugal Group's total post-retirement benefits amounted to €1,071.8 million, as compared to €1,063.7 million for PTC and €5.2 million for Meo, S.A. This difference is due to salary payments obligations to suspended and pre-retired employees up to retirement age recorded at the other Portuguese subsidiaries in the PT Portugal Group, which amounted to €2.9 million as of September 30, 2014.

Contractual Obligations and Off-Balance Sheet Arrangements

Contractual Obligations and Commercial Commitments

The following table presents PTC's and Meo, S.A.'s contractual obligations and commercial commitments as of September 30, 2014 (other than debt obligations, finance leases and post-retirement benefits discussed above):

	Payments due by period				
PTC:	Less than 1 year	1 - 3years	3 - 5years	More than 5 years	Total
	€ in millions				
Contractual obligations:					
Purchase commitments[(2)]	38.4	—	—	—	38.4
Operating lease obligations[(3)]	21.5	6.9	4.0	3.2	35.6
Total contractual cash obligations	59.9	6.9	4.0	3.2	74.0
Meo, S.A.					

Contractual obligations:					
Licenses and concessions[(1)]	6.0	5.9	10.1	—	22.0
Purchase commitments[(2)]	20.3	—	—	—	20.3
Operating lease obligations[(3)]	21.7	22.6	17.6	19.2	81.1
Total contractual cash obligations	48.0	28.5	27.7	19.2	101.4

(1) Licenses and concessions refer to outstanding instalments due to ANACOM in connection with the acquisition of the 4G license.

(2) Purchase commitments refer to orders placed and not rendered, primarily for the acquisition of materials of infrastructure, telecommunications equipment and mobile handsets in the normal course of operations.

(3) Operating leases relate to the contractual rental agreements entered into by our businesses and include obligations related to leased lines and the rental of buildings. Rents are recognized on a straight-line basis during the period of the lease.

Off-Balance Sheet Arrangements

In connection with PTC and Meo, S.A.'s operations, they provide certain bank guarantees to third parties, including the Portuguese Ministry of Justice and ANACOM, and, in the case of PTC, highway construction entities. These guarantees are given to ensure the proper performance of contractual obligations by PTC or Meo, S.A., as applicable, in the normal course of their business. Bank guarantees presented to the tax authorities by PTC relate primarily to additional income tax assessments for which PTC submitted a claim or an appeal. As of September 30, 2014, PTC has granted €24.6 million of bank guarantees in favour of third parties and Meo, S.A. has granted €20.3 million of bank guarantees in favour of third parties, including bank guarantees of €18.0 million relating to the three €6.0 million instalments due to ANACOM for the acquisition of the 4G license. For further details regarding such bank guarantees and other financial commitments, see note 37 to the unaudited condensed financial statements of PTC and note 34 to the unaudited condensed financial statements of PTC and Meo, S.A.

Critical Accounting Policies, Judgments and Estimates

Our discussion and analysis of PTC's and Meo, S.A.'s financial condition and results of operations are based on the Audited Financial Statements and Interim Financial Information, which have been prepared in accordance with Portuguese GAAP. The significant accounting policies, judgments and estimates are summarized in Note 3 to the Audited Financial Statements of PTC and Meo, S.A. for the year ended December 31, 2013. PTC's and Meo, S.A.'s reported financial position and results of operations are sensitive to accounting methods, assumptions and estimates that underlie preparation of the consolidated financial statements. PTC and Meo, S.A. base their estimates on historical experience and on various other assumptions, the results of which form the basis for judgments about the carrying values of assets and liabilities that are not readily apparent from other sources.

We believe the following critical accounting policies involve the most significant judgments and estimates used in the preparation of PTC's and Meo, S.A.'s audited financial statements.

PTC

Post-employment benefits

The present value of liabilities for post-employment benefits is calculated based on actuarial methodologies, which use certain actuarial assumptions that are reviewed annually by PTC. Any change in these assumptions will impact the carrying value of liabilities. The main assumptions used are described in Note 11 to the Audited Financial Statements of PTC for the year ended December 31, 2013.

The fair value of certain investments made by our healthcare benefits funds is computed by third parties based on their judgments and information on the businesses and do not result from information verified in active markets.

Analysis of goodwill impairment

PTC tests annually whether goodwill has suffered any impairment. The recoverable amounts of cash-generating assets are determined based on value-in- use calculations. The use of this method requires the estimate of future cash flows expected to arise from the continuing operation of the cash generating asset, the choice of a growth rate to extrapolate cash flow projections and the estimate of a suitable discount rate for each cash generating asset. The main assumptions used in the goodwill analysis are disclosed in Note 8 to the Audited Financial Statements of PTC for the year ended December 31, 2013.

Useful life of tangible fixed assets

PTC uses estimates in order to determine to the useful life of tangible fixed assets.

Provisions recognition

PTC is party to several legal proceedings in progress for which, based on the opinion of its lawyers, judgments are made to determine the recognition of any necessary provisions to meet these contingencies.

Impairment recognition

Impairment on accounts receivable are calculated mainly based on receivables seniority, the client's risk profile and their financial situation.

Determining the fair value of assets measured by revaluation model

PTC uses the revaluation model to measure the book value of the asset classes "Land and natural resources", "Buildings and other constructions" and the "Telecommunication infrastructure" included under the caption "Basic equipment" under tangible fixed assets. In order to assess the fair value of real estate properties included under the assets classes "Land and natural resources" and "Buildings and other constructions", PTC uses external appraisers to determine their value based on certain specific indicators related to the real estate market. In order to assess the revalued amount of the asset class "Telecommunication infrastructure", PTC applied the cost replacement method based on current and observable prices of materials and construction work related to the installation underground of the telecommunication infrastructure.

Estimates used are based on the best information available during the preparation of financial statements, although future events, neither controlled nor foreseeable by PTC, could occur and have an impact on those estimates. In accordance with "NCRF 4 Accounting Policies, Changes in Estimates and Errors" ("NCRF 4"), changes to these estimates that occur after the date of the financial statements are recognized in net income, using a prospective methodology. For this reason and given the degree of uncertainty, real results of the transactions in question may differ from the corresponding estimates.

Meo, S.A.

Useful lives of tangible fixed assets and intangible assets

Meo, S.A. uses estimates to calculate the useful lives of tangible fixed assets and intangible assets.

Recognition of provisions and impairments

Meo, S.A. is party to a variety of ongoing judicial proceedings for which, based on the opinion of its lawyers, it used judgment to determine if it should recognize any provision in respect of these contingencies. Impairments for accounts receivable are calculated essentially based on the age of the accounts receivable, the risk profile of the clients and their financial situation.

The estimates were determined based on the best information available at the date the financial statements were prepared. As such, there may be events in subsequent periods that, not having been foreseeable at the time, were not considered in these estimates. In accordance with NCRF 4, changes to these estimates that occur after the date of the financial statements are corrected in the income statement prospectively. For this reason and given the associated degree of uncertainty, actual results for the transactions in question may differ from the corresponding estimates.

Summary of Significant Differences between Portuguese GAAP and IFRS

The primary difference between Portuguese GAAP and IFRS impacting total shareholders' equity relates to grants and subsidies for the acquisitions of assets, which under IFRS are deducted from the carrying amount of the related assets, while in accordance with Portuguese GAAP they are recorded as increases in shareholders' equity. In addition, there are also certain format differences between Portuguese GAAP and IFRS, the most important of which relates to equity in earnings and losses of affiliated companies, which is included within income before depreciation and amortization, financing expenses and taxes under Portuguese GAAP and presented below EBITDA under IFRS.

The table below sets out the unaudited reconciliation between income before depreciation and amortization, financing expenses and taxes as reported by PTC and Meo, S.A. under Portuguese GAAP and EBITDA as prepared by PT Portugal SGPS, S.A. in the International Format:

	PTC					Meo, S.A.				
	Year ended December 31,			Nine months ended September 30,		Year ended December 31,			Nine months ended September 30,	
	2011	2012[3]	2013	2013	2014	2011	2012	2013	2013	2014
	€ in millions									
Income before depreciation and amortization, financing expenses and taxes under Portuguese GAAP	709.8	709.7	646.7	489.5	(597.6)	587.1	533.5	582.7	414.7	(739.9)
Minus[1]:										
Equity in losses (earnings) of affiliated companies	(153.3)	(120.5)	(234.4)	(161.3)	1,021.3	(50.3)	(68.6)	(194.7)	(123.1)	1,034.7
Depreciation related mainly to investment subsidies.......	(3.5)	9.5	(3.2)	(2.7)	(1.5)	(0.0)	(0.0)	0.0	0.0	(0.0)
Post retirement benefits costs	53.9	57.3	40.3	31.7	31.2	—	—	0.0	0.0	0.1
Work force reduction program costs (gains)....................	32.9	1.2	112.8	102.3	(21.9)	—	—	4.1	3.7	—
Losses (gains) on disposal of fixed assets	0.0	(1.3)	(3.4)	(2.9)	(23.5)	(0.1)	(2.2)	(0.1)	(0.1)	(3.5)
Non-recurring items	12.1	(42.0)	1.4	(1.3)	14.1	4.5	18.5	17.7	13.1	0.0
Provisions for income tax contingencies..................	8.0	7.2	(4.1)	(2.6)	0.4	0.5	1.0	0.2	(0.3)	0.2
Net financial results not directly related to net debt	(2.0)	(4.1)	(0.9)	(0.4)	(2.5)	(0.7)	(1.4)	(1.4)	(1.0)	(1.1)
EBITDA under the International Format[2]..........................	658.1	617.0	555.1	452.2	420.0	541.0	480.8	408.5	307.1	290.4

(1) Items included in income before depreciation and amortization, financing expenses and taxes under Portuguese GAAP but excluded under the International Format.

(2) EBITDA is defined as operating profit before depreciation and amortization, other expenses, net, management fees and restructuring and other non recurring costs.

(3) During the year ended December 31, 2013, PTC adopted the revised version of IAS 19 Employee Benefits as permitted by Portuguese GAAP. As a result of the adoption of the amendments to IAS 19, certain adjustments were made to the previously reported statements of financial position of PTC for the year ended December 31, 2012. The table above sets out PTC's restated results of operations for the year ended December 31, 2012 and may differ from that shown in the Audited Financial Statements of PTC for the year ended December 31, 2012. See Note 5 to the Audited Financial Statements of PTC for the year ended December 31, 2013.

Recent Portuguese GAAP Accounting Pronouncements

Portuguese GAAP was approved by the Decree Law No. 158/2009, dated 13 July, and in accordance with the Conceptual Structure, Accounting and Financial Reporting Standards ("NCRF") and Interpretative Standards, as approved by Notices nº 15652/2009, 15653/2009 and 15655/2009 of the General- Secretary of the Ministry of Finance, dated 27 August, which make up the New Portuguese accounting system, named "*Sistema de Normalização Contabilística*" ("SNC"). SNC came into force in 2010, with the transition date being January 1, 2009 for the purposes of presentation of the financial statements of PTC and Meo. NCRFs were formulated based on IFRS that prevailed in June 2007 and no modifications have been introduced in Portuguese GAAP since. In order to fill gaps or omissions in the SNC regarding specific transactions, PTC and Meo, S.A. apply IAS/IFRS and related interpretations issued by IASB.

Seasonality

Although our revenues and costs fluctuate from quarter to quarter, we do not experience large fluctuations due to seasonality. We tend to have higher revenues (but lower EBITDA) in the fourth quarter due to promotional campaigns centered on the Christmas holiday. To a lesser degree, promotional campaigns at the time of the Easter and Mother's Day holidays also tend to increase our revenues in the second quarter. In addition, our revenues from our operations tend to be lower during the Portuguese summer holidays during the third quarter.

Qualitative and Quantitative Analysis of Market Risk

Our most significant market risk exposures are interest rate risk and exchange rate risk and, to a lesser extent, commodity risk. Once the PT Portugal Group forms a part of the Altice International Group following the PT Portugal Acquisition, our market risk profile will change and we will manage such risks through the Altice International Group. For further details, see "*Management's Discussion and Analysis of Financial Condition and Results of Operations of the Altice International Group—Quantitative and Qualitative Disclosures about Market Risk*".

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS OF ODO

The following discussion and analysis of the results of operations and financial condition of ODO is based on its audited standalone financial statements as of and for the twelve months ended December 31, 2012 and 2013, in each case, prepared in accordance with IFRS as issued by the IASB. For a discussion and analysis of the results of operations and financial condition of ODO as of and for the nine months ended September 30, 2013 and 2014, see "Management's Discussion and Analysis of Financial Condition and Results of Operations of the Altice International Group".

Except as the context otherwise indicates, when discussing historical results of operations in this section, "Company," "we," "our" and other similar terms are generally used to refer to the business of ODO.

You should read the discussion below in conjunction with the standalone financial statements of the Company and the accompanying notes in these Listing Particulars. A summary of the critical accounting estimates that have been applied to the Company's financial statements is set forth below in "—Critical Accounting Estimates". You should also review the information in the section "—Presentation of Financial Information". This discussion also includes forward-looking statements which, although based on assumptions that we consider reasonable, are subject to risks and uncertainties which could cause actual events or conditions to differ materially from those expressed or implied by the forward-looking statements. For a discussion of risks and uncertainties facing us as a result of various factors, see "Risk Factors".

Presentation of Financial Information

The standalone financial statements of the Company for the twelve months ended December 31, 2012 and 2013 have been prepared in accordance with IFRS as issued by the IASB. The preparation of the financial statements did not, therefore, require any material allocation of assets and liabilities and income and expense items between Orange S.A., as indirect owner of the Company prior to the ODO Acquisition, and the Company.

Key Factors Affecting Results of Operations

Our performance and results of operations have been and will continue to be affected by a number of factors, including external factors. Certain of these key factors that have had, or may have, an effect on our results are set forth below. For further discussion of the factors affecting our results of operations, see "*Risk Factors*".

One of the key constituents of our revenue is network revenue, which contributed 87.7% and 86.7% of our total revenue for the twelve months ended December 31, 2012 and 2013, respectively. A major contributor to our network revenue is mobile subscriber revenue, which is principally driven by the number of mobile subscribers on our network (our mobile subscriber base), and the ARPU, or average revenue per user (see "*—Mobile ARPU*"), that they generate. Our subscriber base evolution is driven by market dynamics (including demographics, penetration rate, technical innovation and changing customer behavior), gross connections market share (our ability to capture new subscribers). A key recent factor that has impacted our mobile subscriber revenue is the increasing use of data services linked to the popularity of smartphones and mobile computing devices, and our ability to successfully address this increasing demand. Furthermore, our mobile revenues are affected by macroeconomic trends, such as competition-driven price evolution and general macro-economic conditions. Network revenue also includes revenues from incoming voice traffic of other domestic and international operators, as well as roaming charges, and non-voice.

Our mobile costs of sale include (i) mobile termination rates payable to other operators for calls made by our subscribers that are terminated on networks belonging to other operators, (ii) subscriber acquisition and retention costs, which are costs associated with acquiring a new mobile subscriber and retaining existing subscribers (prolonging the contract of an existing mobile subscriber, mobile "renewal" for pre-paid residential subscribers, (iii) network and IT expenses and (iv) other commercial expenses relating to advertising, promotion and other selling fees.

Our primary subscriber acquisition and retention costs include agent commissions related to sales generated by dealers including franchises and wholesalers (together forming our indirect distribution channel) and the cost of handsets sold to our post-paid residential subscribers. Handsets are typically sold to our post-paid subscribers at a discount reflecting the incentive that we provide subscribers to subscribe or renew their subscription. The level of distributor commission paid varies depending on distribution channels (direct or indirect). Our distributor commissions are generally lower for pre-paid residential customers, due to lower ARPU and lower loyalty of pre-paid subscribers, compared to the distributors' commissions for post-paid business customers reflecting the higher lifetime value of these subscribers. Commissions, which are an operating expense, are paid for both, new and retained post-paid subscribers solicited through indirect distribution channels. In the direct distribution channel, incentives and bonuses are paid out to the sales force in relation to their subscriber acquisition and retention performance and such costs are expensed in labor costs. Our direct channels focus on high value customers and providing them with a high quality customer experience and services.

Mobile Subscriber Base

The table below sets forth selected mobile subscriber data for the periods indicated, including an analysis by subscriber segment. Mobile subscribers consist of subscribers for voice services (including incoming and outgoing calls) and non-voice services (including SMS, MMS and data services for handsets).

	Mobile subscriber base — For the twelve months ended December 31,	
	2012	**2013**
	(subscribers in thousands)	
Post-paid subscribers[(1)(2)(4)(5)]	589	624
Pre-paid residential subscribers[(1)(3)(4)]	2,504	2,647
Subscribers at end of period[(1)]	**3,093**	**3,271**

(1) Includes subscribers through reseller (dealers and franchises) as we enter into direct contractual arrangements with customers of resellers

(2) All post-paid subscribers are considered as active

(3) Active pre-paid subscribers exclusively. Pre-paid subscribers are considered as inactive when connected on the home network more than three months without any outgoing traffic events or with fewer than four incoming traffic events

(4) Includes exclusively mobile subscribers. Mobile broadband internet subscribers excluded and analyzed separately in this section

(5) Includes both post-paid residential subscribers and post- paid business subscribers

We provide mobile services to pre-paid residential customers, post-paid residential customers and post-paid business customers, constituting 80.9%, 13.2% and 5.9%, respectively, as of December 31, 2013, of our mobile subscriber base. For the twelve months ended December 31, 2013, pre-paid residential subscribers formed the largest segment of our customer base, contributing 53.1%, as compared to 28.1% for post-paid residential subscribers and 9.1%, for post-paid business subscribers. Since contributions to revenue of subscribers in different segments are disproportionate (due to their different level of ARPU, see "—*Mobile ARPU*"), changes in the composition of our subscriber base in any financial period may have an impact on our revenue for such period.

Our mobile subscriber base increased by 5.8% for the twelve months ended December 31, 2013, as compared to the twelve months ended December 31, 2012. The key drivers of this sustained growth are: (i) favorable market dynamics; (ii) increased market share, due to the positive perception of the "Orange" brand and the quality of our service; (iii) on-going network improvements, with the continuous roll-out of 2G, 3G and 4G sites; (iv) competitive pre-paid and post-paid offers with the continuous expansion of our enterprise line; (v) anti-churn incentives geared at our pre-paid residential subscribers to reduce the number of inactive customers, including automated reminders prompting the subscriber to top-up, simplified SIM swaps for customers who have lost their SIM cards and an automated credit top-up by us where a "zero balance" has been reached; and (vi) the strategic plan by our management to develop the business lines for our post-paid business subscribers with a sales team dedicated to this customer base as well as targeted offers.

As a result of the aforementioned factors, for the twelve months ended December 31, 2013, our post-paid business subscribers increased by 4.1% and our pre-paid residential subscribers 5.7%. We estimate that our total mobile market share in the Dominican Republic by number of subscribers was 40% as of December 31, 2013.

Due in part to the improvement of our post-paid residential offer, our post-residential subscribers increased by 6.9% for the twelve months ended on December 31, 2013 compared to the same period last year. The revamped offer, which began in September 2013, introduced a more varied portfolio of price plans, allowing customers to add on additional services at their option while giving them the freedom of paying a low monthly fee on a post-paid basis. Because the difference between the monthly top-up and post-paid subscription fee is very small, we believe that users of pre-paid mobile phones will continue to migrate to a post-paid subscription. Furthermore, we offer substantial handset subsidies to our post-paid subscribers, which enable us to promote the usage of smartphones and with that voice and data usage. We aim to increase our market share in the post-paid residential segment in the future, especially in light of the increase in smartphone and data usage, and higher returns and retention rates in the long term.

Mobile ARPU

ARPU (average revenue per user), represents the overall revenue for a specific segment divided by the number of subscribers for a given period. Since there may be disconnections and connections over a defined period, the overall revenue is divided by the average subscriber base for that particular period.

ARPU is primarily driven by prices of our services, traffic volume, data services utilization and revenue from interconnection rates for incoming calls. Our monthly ARPU for the twelve months ended December 31, 2013 increased slightly to DOP 533.1, from ARPU of DOP 532.9 for the twelve months ended December 31, 2012 despite termination rates decreasing by 2% semi-annually. The table below sets out our ARPU for our pre-paid and post-paid mobile subscribers:

	Mobile ARPU For the twelve months ended December 31	
	2012	**2013**
	(in DOP per month/ percentages)	
Post-paid ARPU	1,126	1,146
Increase/(decrease) from prior equivalent period	(−7.6)%	1.7%
Pre-paid residential ARPU	393	394
Increase/(decrease) from prior equivalent period	0.5%	0.2%
Total ARPU(1)	**533**	**533**
Increase/(decrease) from prior equivalent period	(−0.4)%	0.1%

(1) We define total ARPU as the measure of the sum of our mobile revenues in the relevant period divided by the average number of mobile subscribers in the period (the average of each month's average number of mobile subscribers (calculated as the average of the total number of mobile subscribers at the beginning of the month and the total number of mobile subscribers at the end of the month)) divided by the number of months in that period.

For the twelve months ended December 31, 2013, our post-paid ARPU increased by 1.7% to DOP 1,146 from DOP 1,126 for the twelve months ended December 31, 2012. This increase was predominantly driven by an increase of our post-paid residential subscriber ARPU by 5.0% (or DOP 62 per month) to DOP 1,312 for the twelve months ended December 31, 2013. This increase can be attributed to an increase in higher value plans.

As of December 31, 2013, we have been able to maintain our pre-paid residential subscriber ARPU at DOP 394, as compared to DOP 393 as of December 31, 2012.

Termination Rates

Mobile termination rates (MTR) contribute to our mobile revenues and costs. Fixed termination rates (FTR) contribute to our revenue and costs for our fixed line services. We receive revenues from other operators for calls terminated on our network and we are required to pay fees to other operators for calls terminated on their networks for both domestic and international calls.

Domestic MTR, local FTR and SMS termination rates result from negotiations between us and the three other main Dominican mobile operators. Indotel has the authority to challenge and/or validate these bilateral agreements. Domestic operators agreed to decrease national MTR and local FTR by 2% semiannually (in dollars), between 2010 to 2013. SMS termination rates remained unchanged between 2010 to 2013 at $0.018 per SMS.

	Year ended December 31,			
	2010	**2011**	**2012**	**2013**
	USD $			
MTR	0.069	0.066	0.064	0.062
FTR local	0.018	0.018	0.017	0.016
SMS	0.018	0.018	0.018	0.018

Internet

For the twelve months ended December 31, 2013, internet revenues increased by 27% to DOP 644 million compared to DOP 507 million for the twelve months ended December 31, 2012. We consider internet services used by our post-paid business subscribers as a commercial lever to cross-sell post-paid business mobile subscription.

Our total number of internet subscribers increased by 16% from 121,000 for the twelve months ended December 31, 2012, to 140,000 for the twelve months ended December 31, 2013. This was mainly driven by an increase in the number of our post-paid residential subscribers by 51% in 2013 due to (i) higher laptop penetration, and (ii) the expansion of internet services into new geographic regions. Although we had an increase in our total subscriber number, we saw a decrease in our post-paid business subscribers due to an internal adjustment made to the computation of this subscriber base in 2013.

The table below shows our internet subscriber base for the twelve months ended December 31, 2012 and 2013, respectively:

	Internet subscriber base	
	For the twelve months ended December 31,	
	2012	2013
	(in thousands subscribers)	
Post-paid residential subscribers[(1)]	62	86
Post-paid business subscribers[(1)]	59	54
Subscribers at end of period[(1)]	**121**	**140**

(1) All post-paid subscribers are considered as active

Mobile Network Upgrade

With the growing penetration of smartphones and the increasing demand in data services, upgrading and maintaining our network is key to the improvement of the services we offer to our customers. The perception of the network quality is an important factor in retaining our subscribers and is therefore a key element in preventing and reducing churn and attracting new customers.

The upgrade and maintenance of our network has a direct impact on the level of our expenses and the capital expenditures we incur each year. The 4G-LTE roll-out which began in the first quarter of 2012 has been focused on certain regions with higher number of medium and large businesses. We believe that our infrastructure will be able to cope with the expected increased data-led capacity requirements and that architecture is scalable to support future traffic growth.

Effects of Change of Control Transaction and Separation

On November 26, 2013, Altice Bahamas S.à r.l. (a wholly owned subsidiary of Altice International S.à r.l.) entered into agreements to acquire ODO in the Dominican Republic. The transaction has been completed on April 9, 2014. See "*Description of Our Business—History*".

The impact of the ODO Acquisition on our income statement and capital expenditures will depend on the synergies and measures undertaken. We may not realize any or all of the anticipated synergies of the ODO Acquisition that we currently anticipate. For a discussion of the risks relating to the integration of ODO into the Altice International Group, see "*Risk Factors—Risks Relating to the Integration of Tricom and ODO into Our Business*".

Key Income Statement Line Items

Revenue

Revenue from our activities includes:

- Mobile revenue, which consists of revenue from voice (including ingoing and outgoing calls) and non-voice (including SMS, MMS and data services for handsets);
- Internet revenue, which consists of mobile broadband internet facilities delivered to post-paid residential subscribers or business post-paid subscribers;
- Wholesale revenue, which consists of: (i) transit revenue consisting of fees charged to foreign competitors connecting to and using our telecommunication path and network to transit voice or data to another operators, and (ii) visitor roaming revenue representing revenue received from our roaming partners for their customers' use of

services on our network. Roaming rates charged by various operators are determined according to the inter-operator tariffs (IOT) agreements between operators;

- Other revenue primarily includes (i) the sale of non-subsidized handsets (ii) fixed-data revenue corresponding to calls realized through IPVPN technology, which are primarily fixed calls for business subscribers, and to a lesser extent, (iii) global services revenue (mainly machine-to-machine (M2M) solutions e.g. industrialized private access point names (APN)) as well as other minor components;

- Equipment revenue consists of the sale of subsidized handsets and, to a lesser extent, mobile accessories.

Operating costs

Our operating costs include:

- Cost of equipment sold primarily consists of the costs arising from equipment sold to terminals, the sale of SIM cards and accessories, and import duties and freight costs;

- Selling, distribution and traffic costs mainly consist of access backbone and termination fees corresponding to costs incurred for terminating a call on another operator's network. Cost is calculated based on the MTR or FTR tariffs which are agreed between operators;

- Advertising and sponsoring costs;

- Offices and technical sites costs;

- Labor expenses, which include salaries and wages, social contributions, individual incentive/bonus plans and the cost of post-employment benefits;

- Corporate fees consist of (i) management fees, and (ii) brand fees based on the terms of the agreement with Orange S.A. regarding the rights to use the "Orange" brand;

- Maintenance costs;

- Other costs and income which include (i) purchase of services (ii) consulting fees (iii) network energy costs and (iv) bad debt expenses;

- Depreciation and amortization of fixed assets.

Non-operating income/expense

Non-operating income/expense mainly include financial items such as (i) foreign exchange gains and losses (mainly corresponding to unrealized translation gains on cash and cash equivalents) (ii) interest on net cash, and on the Orange group current account (decreasing in line with cash and cash equivalents) and (iii) other financial charges concerning the discounting effect of the Asset Retirement Obligation ("ARO") provision, whereby a discount is applied to the costs incurred in relation to the future dismantling of technical sites (the rate is calculated through applying intra-group measures and a discount set by the Dominican Central Bank).

The table below shows our results of operations for the twelve months ended December 31, 2012 and 2013, respectively:

	For the twelve months ended December 31,	
	2012	**2013**
	(in DOP million)	
Revenues	22,754	24,405
Cost of equipment sold	(3,000)	(3,259)

Total comprehensive income for the year	3,446	3,897

Twelve Months Ended December 31, 2013 as compared to Twelve Months Ended December 31, 2012

Our total revenue increased by DOP 1,651 million (+ 7.3%) from DOP 22,754 million for the twelve months ended December 31, 2012 to DOP 24,405 million for the twelve months ended December 31, 2013, driven by an increase in our pre-paid subscriber base together with the favorable effect of increased data usage.

	For the twelve months ended December 31,				Variation	
	2012	% of total revenue	2013	% of total revenue	Amount	%
	(in DOP million)					
Mobile	19,436	85.4%	20,503	84.0%	1,067	5.5%
Wholesale	1,662	7.3%	1,816	7.4%	154	9.3%
Internet	507	2.2%	644	2.6%	137	27.0%
Equipment	866	3.8%	1,151	4.7%	285	32.9%
Other	283	1.2%	291	1.2%	8	2.8%
Total revenue	22,754	100%	24,405	100.0%	1,651	7.3%

	For the twelve months ended December 31,				Variation	
	2012	% of total revenue	2013	% of total revenue	Amount	%
	(in DOP million)					
Post-paid residential subscribers	6,084	31.3%	6,372	31.1%	288	4.7%
Pre-paid residential subscribers	11,580	59.6%	12,350	60.2%	770	6.6%
Post-paid business subscribers	1,772	9.1%	1,781	8.7%	9	0.5%
Mobile revenue	19,436	100.0%	20,503	100.0%	1,067	5.5%

Mobile revenue

Mobile revenue was DOP 20,503 million for the twelve months ended December 31, 2013, an increase of DOP 1,067 million, or 5.5%, from DOP 19,436 million for the twelve months ended December 31, 2012.

Post-paid residential subscribers revenue increased by 4.7% in the twelve months ended December 31, 2013 to DOP 6,372 million primarily driven by flexible monthly plans, including low monthly rate subscriptions with the ability to add-on additional services such as data through promotional offers.

Pre-paid residential subscribers revenue increased by 6.6% in the twelve months ended December 31, 2013 to DOP 12,350 million primarily driven the “anti-churn” incentives.

Post-paid business subscribers revenue increased by 0.5% in the twelve months ended December 31, 2013 to DOP 1,781 million primarily driven by a stronger penetration strategy and sales staff dedicated to soliciting more subscribers. We also benefited from an overhaul in and an increase of the portfolio of services and integrated solutions we were able to offer to a broad variety of businesses (SMEs as well as larger business).

Wholesale revenue

Wholesale revenue was DOP 1,816 million for in the twelve months ended December 31, 2013, an increase of DOP 154 million, or 9.3%, from DOP 1,662 million for the twelve months ended December 31 2012. This increase can be attributed to an increase in transit revenues by 37.1% to DOP 1,192 million for the twelve months ended December 31, 2013, as a result of increased traffic of international telephone calls on our network, resulting in higher terminations. This trend was offset by a decrease in visitor roaming revenue—of 21.4% to DOP 623 million for the twelve months ended December 31, 2013, as result of the increase in tariff competition thereby pushing down global inter-operator roaming rates, as well as international macro-economic conditions.

Internet revenue

Internet revenue increased by 27.0% to DOP 644 million in the twelve months ended December 31, 2013 mainly due to the increase in the average subscriber base driven by the expansion of internet services into new geographic regions, our 3G roll-out and the resulting increase in the higher quality offering over a larger service area, resulting from the speed of our network.

Equipment revenue

Equipment revenue was DOP 1,151 million for the twelve months ended December 31, 2013, an increase of DOP 285 million, or 32.9%, from DOP 866 million for the twelve months ended December 31, 2012, due to an increase in our post-paid subscribers retention rate, which resulted in higher amounts of handset subsidies.

Other revenue

Other revenue was DOP 291 million for the twelve months ended December 31, 2013, an increase of DOP 8 million, or 2.8%, from DOP 283 million for the twelve months ended December 31, 2012 as a result of an increase in our post-paid business segment, leading to an increase in M2M revenue of 123% and other operating revenue of 62%.

Operating costs

Cost of equipment sold

Cost of equipment sold were DOP 3,259 million for the twelve months ended December 31, 2013, an increase of DOP 259 million, or 8.6% from DOP 3,000 million for the twelve months ended December 31, 2012. The increase in cost of equipment sold was mainly due to an increase in smartphone penetration as part of our retention strategy relating to our post-paid residential subscribers.

Selling, distribution and traffic costs

Selling, distribution and traffic costs were DOP 6,263 million for the twelve months ended December 31, 2013, an increase of DOP 402 million, or 6.9%, from DOP 5,861 million for the twelve months ended December 31, 2012. The increase was mainly due to an increase in commissions paid to indirect distributors for high retention rates of post-paid subscribers.

Advertising and sponsoring costs

Advertising and sponsoring costs decreased DOP 62 million, or 6.6%, from DOP 937 million for the year ended December 31, 2012 to DOP 875 million for the year ended December 31, 2013 primarily due to measures implemented by management to optimize advertising costs and communication methods.

Offices and technical sites costs

Offices and technical sites costs were DOP 623 million for the twelve months ended December 31, 2013, an increase of DOP 59 million, or 10.45%, from DOP 564 million for the twelve months ended December 31, 2012. The increase in technical expenses was primarily driven by network extension (site roll-out), partially offset by some savings initiatives (notably regarding base station / antenna power savings through investment in solar panels).

Labor expenses

Labor expenses were DOP 1,234 million for the twelve months ended December 31, 2013, an increase of DOP 59 million, or 5.0%, from DOP 1,175 million for the twelve months ended December 31, 2012. The increase in labor expenses was primarily attributable to an increase in average total labor cost per employee driven annual salary increases and impacted by the recruitment of more experienced employees.

Corporate fees

Corporate fees were DOP 628 million for the twelve months ended December 31, 2013 increasing from DOP 583 million, or 7.7% for the twelve months ended December 30, 2012 due to revenue growth.

Maintenance costs

Maintenance costs were DOP 329 million for the twelve months ended December 31, 2013 a decrease of DOP 3.0 million, or 0.9%, from DOP 332 million for the twelve months ended December 31, 2012. The decrease is mainly attributable to volume discounts relating to network extension.

Other costs and income

Other costs and income decreased to DOP 2,344 million for the twelve months ended December 31, 2013, a decrease of DOP 229 million, or 8.9%, from DOP 2,573 million for the twelve months ended December 31, 2012. This decrease was mainly due to (i) a reduction in the provision for legal claims from DOP 165 million in the twelve months ended December 31, 2012 to DOP 115 million for the twelve months ended December 31, 2013, due to a judgment dismissing the payment of certain costs and (ii) a decrease in withholding taxes of DOP 51 million as a result of improved negotiations with our suppliers and the Group.

Depreciation and amortization

Depreciation and amortization were DOP 3,518 million for the twelve months ended December 31, 2013, a slight increase of DOP 9 million, or 0.3%, from DOP 3,509 million for the twelve months ended December 31, 2012. The increase in depreciation and amortization was primarily attributable to the increase of network assets with improvements in network coverage, as well as the roll-out of additional 2G/3G/4G-LTE sites. Furthermore, ODO performed an inventory of its fixed assets relating to its technical sites (which account for 83% of total fixed assets) between April 2013 and December 2013 which lead to an increase of DOP 23 million in depreciation.

Operating income

As a result of the foregoing factors, our operating income was DOP 5,332 million for the twelve months ended December 31, 2013 compared to DOP 4,221 million for the twelve months ended December 31, 2012, representing an increase in operating margins by 26.3% for the twelve months ended December 31, 2013 as compared to 2.5% for the twelve months ended December 31, 2012.

Non-operating income/expense

Non-operating expenses increased to DOP 45 million for the twelve months ended December 2013, compared to non-operating income of DOP 15 million for the twelve months ended December 31, 2012. The decrease in non-operating income/expense for the twelve months ended December 31, 2013 was due to (i) DOP 76 million of bank commissions as a result of a higher volume in connections for our post paid segment (compared to DOP 71 million for the twelve months ended December 31, 2012), (ii) DOP 18 million from the twelve months ended December 31, 2013 of interest income compared to DOP 37 million for the year ended December 31, 2012 as a result of the reduction of interest rates by the Dominican Central Bank in 2013 and (iii) an increase in foreign currency exchanges which led to a decrease in gains to DOP 26 million for the twelve months ended December 31, 2013, compared to DOP 70 million for the twelve months ended December 31, 2012.

Income Tax

The following table sets forth our income tax expense for the twelve months ended December 31, 2013 as compared to the twelve months ended December 31, 2012:

	For the twelve months ended December 31,		**Variation**	
	2012	**2013**	**Amount**	**%**
	(in DOP million/percentages)			
Current tax expense in respect of the current year	(1,123)	(1,574)	(451)	40.2%
Deferred tax income/(expense)	333	184	(149)	(44.7)%
Total income tax	**(790)**	**(1,390)**	**(600)**	**75.9%**

Income tax increased by DOP 600 million from DOP 790 million for the twelve months ended December 31, 2012 to DOP 1,390 million for the twelve months ended December 31, 2013 primarily driven by a change in dividend credits. Dividend credits decreased from DOP 330 million for the twelve months ended December 31, 2012 to nil in the twelve months ended December 31, 2013. Such dividend credits relate mainly to the refund of dividend withholding tax which terminated with the change in certain tax regulations in the Dominican Republic in November 2012. Furthermore, the increase can be attributed to an increase in profit before tax for the twelve months ended December 31, 2013.

Liquidity and Capital Resources

Capital Resources

Our principal source of liquidity is cash flow generated from our operations and other resources within the Altice International Group. For the liquidity and capital resources of the Altice International Group, see "*Management's Discussion and Analysis of Financial Condition and Results of Operations of the Altice International Group—Liquidity and Capital Resources*".

Cash Flows

The table below sets out information related to our cash flows:

	For the twelve months ended December 31,	
	2012[(1)]	2013
	€ in millions

(1) ODO 2012 figures have been adjusted and restated to show a like for like comparison between the cash flow statements for the twelve months ended December 31, 2013 and 2012. The restatement consisted of netting between trade receivables and trade payables for an amount of DOP 633 million.

Twelve Months ended December 31, 2013 as compared to twelve months ended December 31, 2012

Net cash provided by operating activities

Net cash provided by operating activities for the twelve months ended December 31, 2013 was DOP 4,933 million. Our net cash provided by operating activities for the twelve months ended December 31, 2013 included net income of DOP 3,897 million and depreciation and amortization of DOP 3,518 million. Change in net working capital was negative DOP 2,628 million for this period, principally reflecting an increase in other accounts receivables of DOP 2,343 million. The account receivables significant increase is predominantly due to the cash pooling at the Orange Group's level (DOP 2,567 million in December, 2013 compared to DOP 136 million in December 2012). As per the internal accounting rules of the Orange Group, cash pooling is registered at ODO's account receivables with the group, subsequently impacting the total account receivables balance. ODO made dividend payments of USD 45 million (DOP 1,855 million with an exchange rate of DOP 41,23 = US$1.00 (as of May 24, 2013) during 2013, compared to USD 84 million (DOP 3,345 million with an exchange rate of DOP 39,82 = US$ 1.00 (at an average rate at the relevant payment dates (April, September, November 2012). We define net working capital as the sum of inventories, trade receivables, trade payables and other receivables.

Net cash used in investing activities

Net cash used in investing activities for the twelve months ended December 31, 2013 and 2012 was DOP 3,199 million and DOP 3,637 million, respectively. Net cash used in investing activities during this period principally related to our network and IT capital expenditure plans.

Net cash used in financing activities

Net cash used in financing activities for the twelve months ended December 31, 2013 and 2012 was DOP 1,855 million and DOP 3,345 million, respectively. This decrease was due to a decision by the Board of ODO to limit the dividends payment at USD 45 million (DOP 1,855 million with an exchange rate of DOP 41.23 = US$1.00 (at May, 2013) (reflecting the date of ODO's board meeting) in the second half of 2013).

Off balance sheet commitments

The following table summarizes our contractual commitments that we believe are likely to have a material effect on our current or future financial position as of December 31, 2013. The information presented in this table reflects, in part, management's estimates of the contractual maturities of our obligations, which may differ significantly from the actual maturities of these obligations:

	As of December 31, 2012		As of December 31, 2013	
	(in DOP million/ percentages)			
Rental commitments[(1)]	1,975	49%	2,374	55%
Orders related to handset purchase	632	16%	405	9%
Other Open commitments	459	11%	430	10%
Open commitments	3,065	76%	3,209	74%
Capex commitments	966	24%	1,127	26%
Total off-balance sheet commitments	**4,031**	**100.0%**	**4,336**	**100.0%**

(1) Rental commitments primarily relate to rental commitments in respect of sites, premises (headquarters), shops, franchises, parking spaces and houses

Capital Expenditures and Investments

The table below shows our capital expenditures defined as additions of network, customers, IT, shops and other items for the twelve months ended December 31, 2012 and 2013:

	For the twelve months ended December 31,			
	2012		2013	
	(in DOP million / % of weight)			
Network	2,521	69.3%	2,183	68.2%
Customers	404	11.1%	229	7.2%
IT	443	12.2%	586	18.3%
Shops	98	2.7%	61	1.9%
Other (incl. GSM licenses)	171	4.7%	140	4.4%
Total capital expenditure	**3,637**	**100.0%**	**3,199**	**100.0%**
CAPEX as % of Revenue	**16.0%**		**13.1%**	

For the twelve months ended December 31, 2013, our total capital expenditure amounted to DOP 3,199 million, of which DOP 2,183 million related to our network. Most 2G capital expenditure was related to the construction of new sites (civil works, towers, antennas and base transceiver stations) to complete 2G coverage and improve network quality, while 3G and 4G capital expenditure were done to increase transmission capacity, network coverage, support data traffic growth and create competitive advantage though innovation and 4G services (notably following the rise of the data revenue stream resulting from increasing penetration of smartphones). We have also invested in new platforms, international capacity, core upgrades, and generators.

Quantitative and Qualitative Disclosures about Market Risk

We are exposed to various market risks, including foreign currency exchange rate, credit and liquidity risks associated with our underlying assets, liabilities, forecast transactions and firm commitments. Our treasury department is responsible for managing exposure to market risk that arises in connection with operations and financial activities, including interest rate, foreign currency exchange rate, credit and liquidity and credit risk management.

The following sections discuss our significant exposures to market risk. The following discussions do not address other risks that we face in the normal course of business, including country risk and legal risk.

Foreign Exchange Rate Risk Management

As much as possible, we use foreign currency inflows for our foreign currency outflows. If necessary, we buy foreign currency shortly before the transaction. If any material exposure arises, we may enter into foreign exchange rate hedging instruments.

We are a net buyer of foreign currencies (in particular USD and euro via brand fees paid to the Orange Group). Our local interconnection costs are considered in both revenue and operating expenses in USD which typically limits our exposure due to a netting effect. A significant proportion of capital expenditure is denominated in foreign currency, mainly euro.

Credit Risk Management

Financial instruments that could potentially subject us to concentrations of credit risk consist primarily of cash, trade receivables and securities, investments and deposits.

We believe that we have a limited exposure to concentrations of credit risk with respect to trade accounts receivable due to our large and diverse customer base (residential, and a broad range of business customers). In addition, the maximum value of the credit risk on these financial assets is equal to their recognized net book value. Our gross trade receivables amounted to DOP 2,294 million as of December 31, 2013 and DOP 2,425 million as of December 31, 2012. We have certain provisions in place relating to bad debt, which are split between a provision for dealers and others amounting to DOP 461 million as of December 31, 2013 and DOP 488 million as of December 31, 2012. We also have provisions for our post-paid subscribers, whereby we use certain statistics relating to the outstanding amount due and ageing analysis to establish the risk, with 210 days being the threshold for categorizing outstanding trade receivables as bad debt.

Prior to the ODO Acquisition, cash was historically centralized at the Orange Group level through cash pooling.

We seek to minimize credit risk through a preventative credit check process that aims to ensure that all subscribers requesting new products and services or changes to existing services are reliable and solvent. We also seek to minimize credit risk by preferring contracts that provide for the use of automatic payment methods with the aim of reducing the underlying credit risk, however, the use of direct debit is generally unpopular in the Dominican Republic market.

We additionally exercise timely pre- and post-subscriber acquisition measures for the purpose of credit collection such as the following:

- attribution of a rating to new customers at subscription through the credit check (to anticipate default payment, different measures may be implemented such as requiring deposits or advance payments of or limiting to prepaid offers;
- sending payment reminders to subscribers;
- employing measures for the collection of overdue receivables, separated by strategy, portfolio and subscriber profiles (such as penalties, or reconnection letters with an option for a new contract); and
- measuring and monitoring debt collection status through our internal reporting tools.

The following table provides the ageing analysis of billed trade receivables as of December 31, 2013 and December 31, 2012, for both dealers and post-paid residential subscribers:

	Dealers and others			
	As of December 31, 2012[(1)]		**As of December 31, 2013**	
	(in DOP million/ percentages)			
Not due or less than 30 days	779	54%	614	50%
Between 31 and 60 days	533	37%	198	16%
Between 61 and 90 days	49	3%	80	7%
More than 91 days	87	6%	325	27%
Total gross trade receivables past due	**1,448**	**100%**	**1,216**	100
Provisions for bad debt	(299)	—	(284)	—
Net receivables	**1,149**	—	**932**	—

(1) ODO 2012 figures have been adjusted and restated to show a like for like comparison between the cash flow statements for the twelve months ended December 31, 2013 and 2012. The restatement consisted of a netting between trade receivables and trade payables for an amount of DOP 633 million.

	Post-paid residential subscribers			
	As of December 31, 2012		**As of December 31, 2013**	
	(in DOP million/ percentages)			
Not due or less than 30 days	605	62%	825	77%
Between 31 and 60 days	116	12%	41	4%
Between 61 and 90 days	40	4%	27	2%
More than 91 days	216	22%	184	17%
Total gross trade receivables past due	**977**	**100%**	**1,078**	**100%**
Provisions for bad debt	(189)	—	(177)	—
Net receivables	**788**	—	**901**	—

We also receive guarantees, including sureties issued by primary banks, as collateral for the obligations resulting from supplies to, and receivables from, dealers.

Due to the diverse portfolio of products and services we provide, we believe concentration of credit risk is limited.

On the dealer side, we have a certain degree of concentration offset by bank guarantees, credit limits delivered by credit insurers and the timing of payment of commissions after the activation of a new subscriber. Our assessment of bad debt provision is performed based on an individual basis. A 100% provision is recorded in the case of litigation with a supplier. As of December 31, 2013, such provision amounted to DOP 284 million.

On the post-paid residential subscriber side, concentration of credit risk relating to accounts receivable from subscribers is limited due to our high volume of customers. Provision for post-paid residential subscribers' receivables is performed based on a statistical method, where a rate is applied according to the number of days overdue.

Credit risk relating to cash and cash equivalents, financial deposits and money market funds arises from the risk that the counterparty becomes insolvent and, accordingly, is unable to return the deposited funds or execute the obligations under the derivative transactions as a result of the insolvency. To mitigate this risk, wherever possible, we conduct transactions and deposit funds with investment-grade rated financial institutions and monitor and limit the concentration of our transactions with any single party.

Our maximum exposure to credit risk (not taking into account the value of any collateral or other security held) in the event the counterparty fails to perform its obligations in relation to each class of recognized financial assets is the carrying amount of those assets as indicated on our balance sheet.

Liquidity Risk

We do not have any financial liabilities, derivatives, hedging instruments or finance leases. Liquidity risk arises mostly in connection with all of our payment obligations that result from our business activities.

In general, we manage our liquidity risk by monitoring our cash flow and using a rolling liquidity reserve forecast. Nevertheless, the prime objective of our policy is to minimize risks and not to create or maximize interest earned on cash held in bank accounts. Accordingly, we transfer cash to the current account held by Orange Group, without incurring any additional costs. We have a limited policy for investments with banks, and deposits must be made in the functional currency, with foreign currency deposits made to set up a natural hedge. We manage our cash forecasting to determine a currency split of total cash in each currency in order to ensure that we have sufficient committed facilities to meet our liquidity needs.

Critical Accounting Estimates

In preparing the financial statements, we make estimates, insofar as many elements included in the financial statements cannot be measured with precision. These estimates are revised if the underlying circumstances evolve or in light of new information. Consequently, such estimates made as of December 31, 2013 and 2012, may subsequently be changed.

We also use our judgment to define appropriate accounting policies to apply to certain transactions when the current IFRS standards and interpretations do not specifically deal with related accounting issues.

The underlying assumptions used for significant estimates are outlined below:

Estimate	Nature of estimate
Revenue	(i) Identification of separable components of a bundled offer based on the individual components' relative fair value. (ii) Period of straight-line recognition of revenue relating to invoiced service access fees depending on the nature of product and historical contractual relationship. (iii) Reporting of revenue on a net versus gross basis (depending on an analysis of ODO's involvement as either principal or agent).
Purchases and other expenses	Provision for claims and litigation: assumptions underlying legal assessment and risk measurement.
Property, plant and equipment, intangible assets	Assessment of assets' useful life based on assessment of the technological, legal or economic environments.
Income tax	(i) Assumptions used for the computation of the income tax charge to be recorded in the financial statements, together with the technical merit of tax positions (ii) Assumptions used for recognition of deferred tax assets arising.

INDUSTRY AND MARKET OVERVIEW

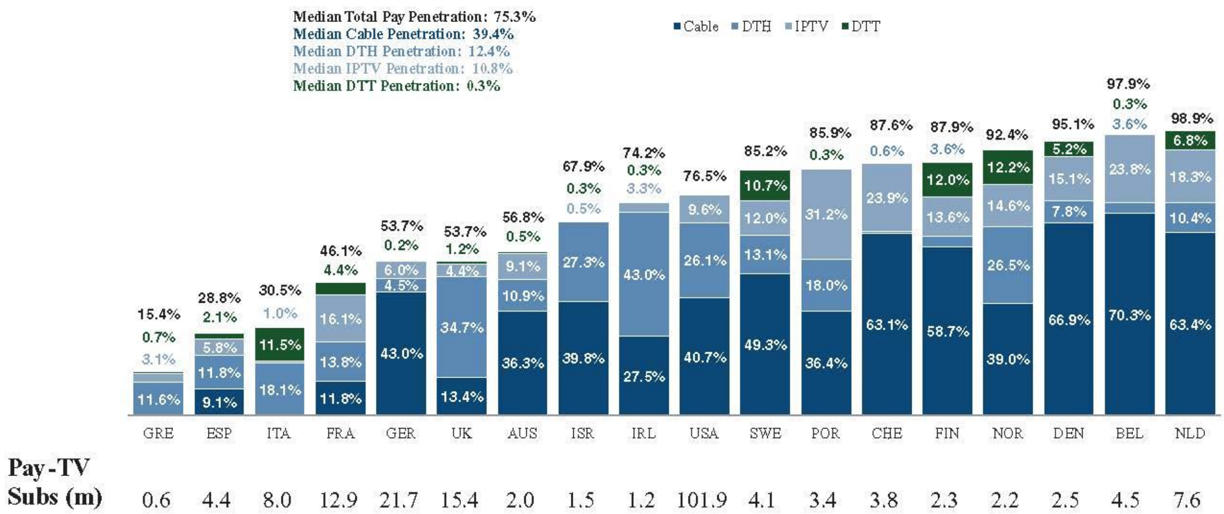
Introduction

We primarily provide cable and fiber-based services comprising high-quality pay television, high-speed broadband internet, fixed-line and mobile telephony to residential customers and, in certain countries, mobile and fixed-line enterprise telecom services to corporate and government customers. Across geographies, we benefit from an attractive competitive environment given the superiority of the offering we can provide through our cable and fiber networks, of which we have significantly invested, as well as our advanced mobile networks. This has enabled us to (1) develop strong positions in multiple play segments as selling various services as part of bundles has become a growing trend in the markets in which we operate and (2) grow our market share in mobile telephony across our markets (France, Portugal, Israel, Dominican Republic and other geographies).48266730_3

Pay Television

Cable is the leading platform to distribute pay television in Western Europe and the United States, with a few exceptions, for example in France where IPTV represents approximately 34.9% (according to estimates for the year ending 2014 from Ovum Research) of the subscriber base or Italy where cable has not been introduced. Technologies that compete with cable include satellite, IPTV, "over the top" ("OTT") television and DTT. We believe that cable has certain advantages over these technologies, notably in terms of availability of interactive features, image quality and number of channels. Cable is only matched in quality by IPTV and OTT television when these technologies are delivered over fiber-to-the-home ("FTTH") networks. FTTH networks benefit from substantial bandwidth capabilities that are able to cope with the simultaneous provision of high-speed broadband and high-definition television services.

2014E Pay-TV Platforms—Western Europe and the US



Pay-TV Subs (m) 0.6 4.4 8.0 12.9 21.7 15.4 2.0 1.5 1.2 101.9 4.1 3.4 3.8 2.3 2.2 2.5 4.5 7.6

Source: Ovum Research

Satellite operators distribute digital signals nationally via satellite directly to television viewers. To receive programming distributed via satellite, viewers require a satellite dish, a satellite receiver and a set top box. Pay television services provided via satellite typically require the viewers to use a conditional access smart card. Satellite providers of free to air satellite services typically do not have strong relationships with the viewers using their service as they do not receive subscription or other fees from them.

Satellite distribution has a number of competitive advantages over cable television services, including a broader range of programs available to a wider geographic area, especially rural areas. Given the lack of an integrated return path, however, satellite struggles to deliver easy to handle interactive television services, including VoD services, to subscribers who do not have a broadband internet connection. We believe that satellite has the following additional disadvantages compared to cable: (i) higher up front cost of procuring and installing a satellite dish, as compared to the "plug and play" convenience of cable television; (ii) absence of an on going maintenance service, which cable network operators can offer to their subscribers; and (iii) vulnerability of satellite reception to external interference, such as adverse weather conditions.

DTT based pay television packages benefit from the wide coverage of the terrestrial platform but suffer from the structurally limited number of channels available on DTT and the lack of interactive features. Consequently, the success of pay DTT has been limited, even in geographies where free DTT is the primary television platform.

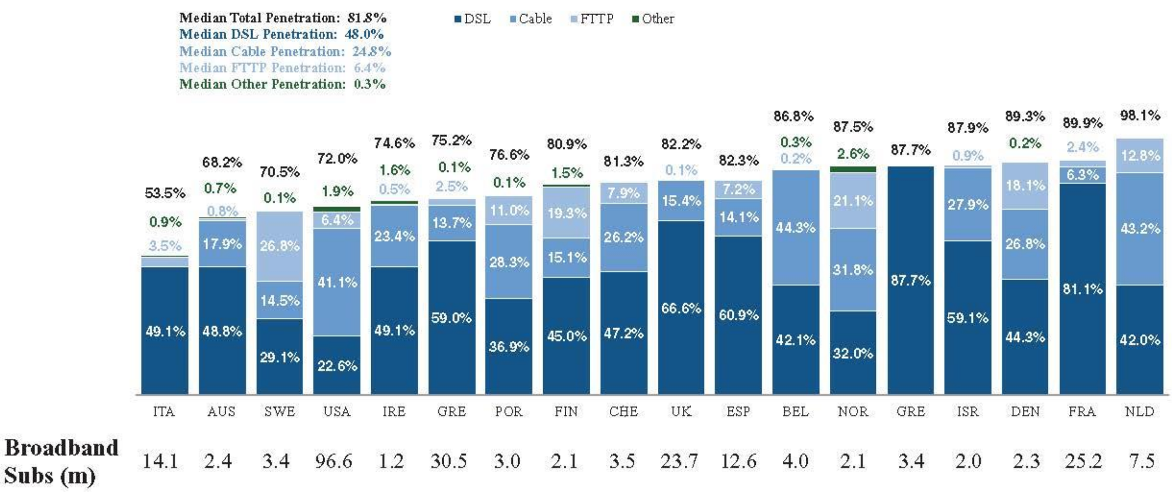
IPTV and OTT television are highly attractive ways of providing television content except when they rely on DSL networks. IPTV and OTT television that rely on DSL networks present a number of disadvantages compared to cable. For example, adding television services over a DSL network strains the network and decreases the amount of capacity available for other service offerings, particularly bandwidth intensive broadband internet. Under currently available technology, we believe that DSL based triple play providers will have difficulty providing the same level of services that can be provided over fiber networks (in particular, for HDTV, viewing of TV and VoD on multiple screens or TV and VoD simultaneous viewing and recording) without having to make significant investments in extending fiber closer to the subscriber's home. When such investments in fiber are made, notably through FTTH networks, IPTV and OTT television are able to offer high quality television to viewers.

Services provided via cable and FTTH networks are characterized by easy to use technology, the efficient installation of customer equipment and the reliability of a protected signal delivered directly to the home. Given the trend towards offering bundled media and telecommunications services, the market share of pay television distribution is expected to benefit from cable and fiber's ability to deliver triple play services with high bandwidth, high-speed and bi-directional capacity. On a standalone basis, namely without a broadband internet connection, the number of advantages of bi-directional capabilities of digital cable television over DTH are substantial for both the users and the cable operator. Digital cable subscribers can order VoD products and use interactive television while the cable operator is able to track usage patterns and enable their customers, the television channels, to target advertising to customers more efficiently.

Broadband Internet

The main broadband internet access technologies are DSL and cable, with DSL being the leading platform in a number of countries for historical reasons stemming from the fact that internet access was initially provided on telephony copper lines but is now increasingly provided on FTTH networks. We believe that increasing demand for very-high-speed broadband internet to cope with advanced applications (multi screen, multimedia) requiring higher bandwidth and greater download speeds offer a sizable growth opportunity for cable- and fiber- based technologies in the near term. We expect substantial growth in demand for very-high-speed internet and believe that we are well positioned to benefit from this trend, given that cable networks enable us to offer download speeds of at least 100 Mbps to a majority of homes passed in our footprint. According to IDC (IDC European Telecom Services Database Q3 2014, November 2014), total spending for VDSL, Docsis 3.0 (Cable) and FTTP (Fiber-to- the-premises), will increase 2.2 times between 2013 and 2016 in Western Europe. We believe our cable and fiber-based networks will be able to handle this increase in demand with limited additional upgrades. In contrast, many DSL based operators in some of our geographies of presence would need to make substantial investments in fiber to meet customer needs, although it is possible, in some areas coverage areas, to upgrade DSL networks to fiber for a limited cost. For instance, we have identified such areas in over 450,000 homes currently passed by our DSL networks in Portugal.

2014E Fixed Broadband Platforms—Western Europe and the US



Source: Ovum Research

The existing DSL infrastructure offers consumers maximum speeds of 28 Mbps while cable currently offers consumers maximum speeds of up to approximately 300Mbps on U.S. Docsis 3.0, 360 Mbps on Euro Docsis 3.0 and up to 1 Gbps on FTTH networks. For most users, the actual speed provided by DSL is lower than the advertised maximum speed as the speed is dependent on the distance between the end-users' premises and DSL hubs. Furthermore, the maximum download speed of DSL networks has to be shared between broadband internet and competing simultaneous users of the line, such as IPTV. According to the "Quality of Broadband Services in the EU" report by the European Commission (published in October 2013), cable is estimated to achieve 89.5% of advertised download speed, while DSL based services achieved only 63.8% of advertised download speed.

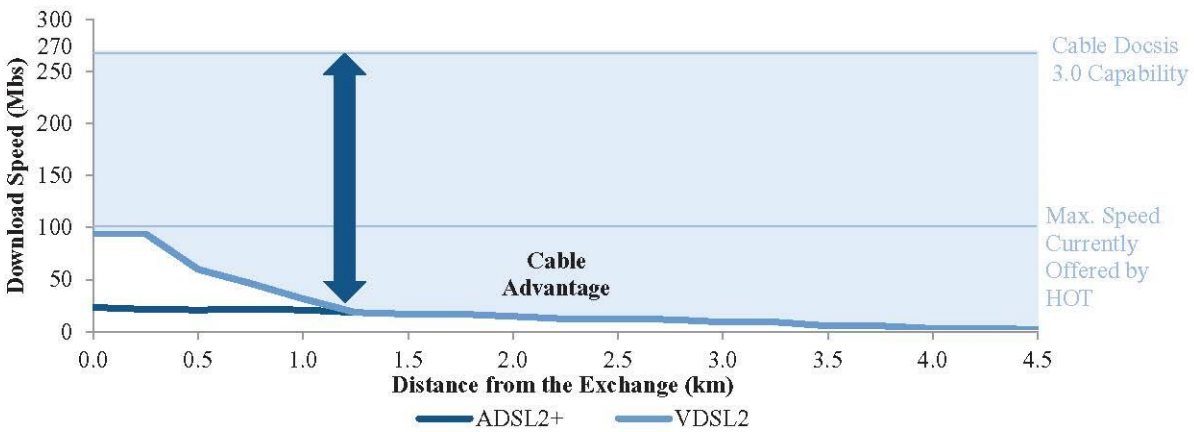
FTTH technology, which requires a direct fiber connection to the home of the user, currently offers consumers maximum speeds of 1 Gbps, with an estimated achievement of 82.7% of advertised download speeds according to the "Quality of Broadband Services in the EU" report by the European Commission (published in October 2013). A substantial challenge facing the expansion of FTTH or FTTB is that introducing such technology is capital and time intensive and requires significant digging and rewiring, with the exception of certain areas and buildings where upgrades can be performed at a limited cost. For example, in certain areas of our networks in Portugal where we are currently upgrading 450,000 DSL-based homes to FTTH (in addition to our current 1.7 million FTTH homes through an agreement with Vodafone to reduce the upgrade costs.

Cable networks are able to deliver consistent speeds irrespective of the distance to the customer, unlike DSL. We are currently able to offer download speeds of at least 100 Mbps to all Docsis 3.0 and FTTH-enabled homes passed in our footprint.

The Docsis 3.1 standard, which is being developed by CableLabs, is a new Docsis specification enabling higher spectral efficiency support of up to 10 Gbps downstream and 1 Gbps upstream speeds. Docsis 3.1 is expected to work on existing hybrid fiber coaxial (HFC) plant and be backwardly compatible with previous Docsis standards. This double backward compatibility will allow a smooth migration strategy and no plant changes required to deploy Docsis 3.1 equipment. Furthermore, limited investment will be needed to further maximize the capacity in the future. Trials are planned for 2014 and commercially available products are expected in 2015.

VDSL2 is the latest and most advanced technology for DSL broadband internet wireline communications. It was originally designed to support the wide deployment of triple play services such as voice, video, data, HDTV and interactive gaming and was intended to enable operators and carriers to gradually, flexibly, and cost efficiently upgrade existing xDSL infrastructure. VDSL2 allows the transmission of asymmetric and symmetric aggregate data rates of up to 200 Mbps downstream and upstream on twisted pairs using a bandwidth up to 30 MHz and further, allows for significantly lower signal deterioration caused by the distance between the cabinet and the customer's premises when compared to older DSL technologies. VDSL2 enabled networks could theoretically allow for up to 100 Mbps at 0.4 kilometers, 40 to 50 Mbps at 0.7 kilometers and approximately 30 Mbps at 1 kilometer.

Cable allows parallel usage of Broadcast TV and High Speed Broadband Internet



Fixed-line Telephony

Traditional switched voice lines have been declining steadily in recent years as they are replaced by VoIP lines. More generally, fixed-line telephony has become a commodity product that is now bundled into multiple play packages. Accordingly, fixed-line services have become dependent on the quality of the broadband internet offering. Flat rate pricing for fixed-line telephony is now the market standard. Despite these changes, the decline in use of fixed-line telephony has been slow as most households still maintain a fixed-line at home.

Mobile Telephony and Mobile Broadband Internet

Consumption of mobile telephony and data services has continued to rise globally, driven by a growing penetration and a wider availability of smart phones. Mobile internet traffic is forecasted to grow at an average rate of 61% between 2013 and 2018 according to the Cisco VNI 2014 study, mainly driven by the development of smartphone devices supporting multiple wireless technologies. As mobile internet usage is mainly in the vicinity of home or office, we believe that operators' success in the mobile telephony services business will largely rely on their ability to access a high capacity backbone with compelling mobile tower backhaul offload solutions and a strong integration of their mobile telephony offers with residential broadband based offload capabilities to cope with increasing data consumption.

Despite this general trend, each mobile telephony market has a different structure and dynamic, depending on a variety of factors including, among other factors, the number of mobile network operators versus mobile virtual network operators, penetration of post paid versus pre paid subscription, regulation, available spectrum, commercial strategies of operators such as handset subsidies. The success of mobile operators in the various markets is largely dependent on the overall environment and its competitive advantages to its competitors.

In light of the various trends and the importance of the market structure for successful mobile operations, in order to reliably take advantage of the fixed mobile convergence, we have decided to implement a versatile mobile strategy. As part of this strategy, we own and operate a mobile network in Israel and we expect to benefit from synergies with our scalable cable networks in Israel. Additionally, we complement our fixed-line products with mobile offerings through a Mobile Virtual Network Operators ("MVNO") arrangement in Belgium.

Fixed-line Enterprise Telecom Services

We provide B2B telecom services, including voice and data to Enterprise customers, in a number of our geographies. We are increasingly migrating our Enterprise customers from voice-only products to integrated systems involving data connectivity, ICT applications and cloud-based solutions. We believe our network infrastructure and pooled experience across the Altice Group give us a competitive advantage in this segment.

1. France

The French telecommunications market is the third largest in Europe, with total retail revenues of approximately €36 billion in 2013 (Source: IDC European Telecom Services Database Q3 2014, November 2014). While we operate in all segments of the French telecommunications market, our core focus is on the most attractive sectors: very high speed fixed broadband, pay television, mobile and next generation B2B services. France is one of the largest fixed broadband internet access markets in Europe, with approximately 24.9 million fixed broadband subscriptions as of December 31, 2013, and 25.7 million as of September 30, 2014 (Source: ARCEP). Higher bandwidth is becoming more important to the B2C market. While only 8% of broadband lines in France were very-high-speed as of December 31, 2013, and 10% as of September 30, 2014 (Source: ARCEP), which is low compared to other European markets. The number of FTTP and Cable connections for the B2C market is expected to increase at an average annual rate of 35% between 2014 and 2018 and to reach 36% of internet access lines in France by 2018 (Source: IDC European Telecom Services Database Q3 2014, November 2014). In mobile, the total number of customers (excluding French Overseas Territories) has been continuously increasing, from 70 million as of December 31, 2012, to 74.1 million as of December 31, 2013, reaching 76.6 million as of September 30, 2014 (Source: ARCEP), supported by the dynamism of the market in France: increasing mobile, smartphone or tablet equipment penetration rate as well as growth in quadruple play offerings. However the mobile market has been slightly declining in value, with subscription prices under pressure, following the disruptive entrance of a fourth mobile operator at the beginning of 2012. Mobile subscription prices in France have now reached levels that are among the lowest in Europe for comparable offers. In the B2B telecommunications segment, data consumption has increased and data needs have become more complex, with the next generation services increasingly sought in the market requiring higher broadband speeds and bandwidth. B2B data consumption is expected to continue to grow.

1.1 B2C Market

In the B2C market, we operate in metropolitan France, which as of December 31, 2013, had a population of approximately 64 million inhabitants (Source: IMF) and approximately 29 million households (Source: IDC European Telecom Services Database Q3 2014, Nov 2014). As of December 31, 2013, Numericable Group's network passed approximately 9.9 million homes, or 35% of French homes, while SFR had a near nationwide DSL network covering approximately 23 million French households. As of September 30, 2014, Numericable Group's network passed approximately 10.0 million homes, while SFR's DSL network covered approximately 25 million French households.

The French B2C broadband market is a mature market, with 24.9 million broadband connections as of December 31, 2013 (Source: ARCEP), representing approximately 87% of French households, and 25.7 million broadband connections as of September 30, 2014, representing approximately 90% of households. In terms of access to very-high-speed broadband, defined by the ARCEP as broadband allowing for speeds above 30 Mbps, however, the French market is underpenetrated, with approximately 7% of households having access to very-high-speed broadband as of December 31, 2013, and only 9% as of September 30, 2014 (Source: ARCEP). This level of penetration is low compared to France's neighbors. As of December 31, 2013, the penetration rates of higher speed connections (VDSL, Docsis 3.0 (Cable) and FTTP) were 43% in Belgium, 45% in the Netherlands and 14% in Western Europe, respectively (Source: IDC European Telecom Services Database Q3 2014, November 2014). We believe that such under penetration presents an attractive growth opportunity as residential customers look increasingly for higher speed and greater bandwidth capacity in their internet consumption. This opportunity is more attractive given that the use of VDSL, Docsis 3.0 (Cable) and FTTP lines in France is estimated to grow 42% CAGR between 2014 and 2018 (Source: IDC European Telecom Services Database Q3 2014, November 2014).

The French fixed broadband market is one of the most competitive in Europe, with high unbundling and strong historic competitors. Orange's fixed-line network includes a local loop covering all of the French population, and unbundling provides competitors such as Bouygues Télécom and Iliad (Free) with access to it at a price regulated by a French regulatory agency. According to ARCEP, as of June 30, 2014, 90.3% of the French population was able to access competitive retail services due to unbundling, which makes France one of the European leaders in unbundling. All operators with significant market power must offer unbundled access to their local loop and associated facilities under non discriminatory conditions, which increases competitive pressure in the market. See "*Regulatory—Regulation of Electronic Communications Networks and Services—The European Regulatory Framework for Electronic Communications*".

The French B2C mobile market is a mature one, although it has experienced significant changes with the entry of a fourth mobile operator in January 2012. Mobile telephony penetration in France has been increasing steadily, from a penetration rate for the total population of approximately 105% in 2011, to 112% in 2012, 117% in 2013 and 121% as of September 30, 2014 (Source: ARCEP). Data consumption on mobile devices has increased, with consumer mobile data revenues in France rising from approximately € 2.3 billion in 2011, to €2.9 billion in 2012 and to €3.1 billion in 2013 (including handset data, tablet, laptop/PC and dongles/mifi consumer data revenues. Source: IDC European Telecom Services Database Q3 2014, Nov 2014). In 2013, SFR's 3G network covered more than 99% of the French population, while its 4G network covered 40% of the population. As of December, 2014 (according to Company press release), these figures stood at 99% and 50%, respectively, for 3G and 4G network coverage.

Industry Convergence

The French B2C media and telecommunications markets have converged as customers seek to receive their media and communications services from a single provider at an attractive price. In response, providers offer television, broadband internet, fixed-line and mobile telephony services bundled into integrated offerings. France is one of the most advanced quadruple play markets in Europe, given the fully integrated and convergent nature of its four major operators. Quadruple play offerings have been available in the French market since 2009 (Bouygues Télécom). SFR and Orange introduced quadruple play offerings in 2010 with Numericable Group following in 2011 and Free in 2012.

The size of the French B2C broadband internet market in 2013 was approximately €4.2 billion (Source: IDC European Telecom Services Database Q3 2014, November 2014). We believe that offering bundled services allows media and telecommunication service providers to meet customers' communication and entertainment needs, increases customer loyalty and attracts new customers as the value proposition of the bundled offering is enhanced. We also believe that we have benefitted and will continue to benefit from opportunities to induce our existing cable television customers to purchase complementary services such as broadband internet, telephony and digital television.

In the French market, triple play services are provided through two major technological distribution platforms: Numericable Group's fiber/cable network and the DSL based networks of Orange, Iliad and SFR. Bi directional fiber/cable networks are particularly well suited for the provision of triple play services with high bandwidth requirements. Because it was originally designed for the transmission of large amounts of data, Numericable Group's hybrid fiber coaxial network based on FTTB technology enables it to deliver high speeds irrespective of the distance to the customer. Conversely, the actual speed of DSL based networks decreases as the customer's distance from the local exchange increases (maximum announced speeds are for customers located less than one kilometer from the nearest local exchange). To increase and harmonize network speed, Orange is investing in the build out of an FTTH network. Iliad and SFR have also begun deploying FTTH networks. As of December 31, 2013, approximately 559,000, and as of September 30, 2014, 800,000 subscribers were connected to FTTH networks (Source: ARCEP). We believe that our FTTB technology represents an advantage over the FTTH technology prioritized by many of our competitors. FTTB technology allows for fiber deployment to generally reach the boundary of our subscribers' buildings, such as the basement in a multi dwelling unit, with the final connection to the individual living space being made via an alternative, non optical means, typically a coaxial cable. By relying on existing coaxial cable within each building to reach each customer's apartment, the FTTB technology allows us to vertically integrate more customers at low cost and more quickly than operators deploying FTTH. To date, FTTH technology deployment has been slow and costly in comparison to that of FTTB. On average, we incur a capital expenditure of €50 per plug to deploy FTTB.

As of December 31, 2013, Numericable Group had a market share of approximately 4% of the broadband market based on the total number of subscribers in France (4% as of September 30, 2014) (Source: Company filings), while SFR's market share was approximately 22% (20% as of September 30, 2014) leading to a combined market share of SFR and Numericable Group of approximately 26% (25% as of September 30, 2014). As of the December 31, 2013 (and September 30, 2014) Orange, Free (Iliad), and Bouygues Télécom reported broadband customers of 10.1 million (10.3 million), 5.6 million (5.8 million) and 2.0 million (2.3 million), respectively (Source: Company filings).

Broadband Internet

(a) Introduction

Broadband internet access, often shortened to "broadband", is high data rate internet access. The International Telecommunication Union Standardization Sector recommendation I.113 has defined "broadband" as a transmission capacity that is faster than primary rate ISDN at 1.5 or 2 Mbps. France is one of the largest broadband internet access markets in Europe, with approximately 24.9 million broadband subscriptions as of December 31, 2013, and 25.7 million as of September 30, 2014 (Source: ARCEP). In terms of access to very-high-speed broadband, however, the French market is underpenetrated, accounting for only 8% of total broadband connections as of December 31, 2013, and 10% as of September 30, 2014. We believe that such under penetration is an attractive growth opportunity as a provider of very-high-speed reliable broadband internet: as smartphones and tablets have proliferated and are used increasingly for multimedia functions, B2C customers require both higher bandwidth (to accommodate the increase in average number of screens per household) and greater download speeds (to accommodate multimedia usage).

The main broadband access technologies are DSL and fiber/cable. Analog dial-up modems, internet access via powerline and wireless local loop technology are also available, although to a lesser extent, in France. While the current broadband penetration rate in France per number of households is in line with other European markets, the growth of broadband penetration rates tends to be faster. The broadband penetration rate, based on number of households, has increased significantly over the last five years, to approximately 87% as of December 31, 2013, and 90% as of September 30, 2014, compared to approximately 63% as of December 31, 2009, and 69% as of December 31, 2010 (Source: ARCEP). As of December 31, 2013, Orange, SFR, Iliad and Bouygues reported total broadband connections of 10.1 million, 5.2 million, 5.6 million and 2.0 million respectively (Source: Company filings). As of September 30, 2014, the total broadband connections reported by each were 10.3 million, 5.2 million, 5.8 million and 2.3 million, respectively (Source: Company filings).

(b) Primary Distribution Platforms—DSL, Fiber and Cable

DSL is the leading broadband internet access platform in France, with 22.5 million subscriptions as of December 31, 2013, and 22.7 million as of September 30, 2014, representing approximately 90%, and 89% of the total French high-speed and very-high-speed internet market, respectively (Source: ARCEP). This results from several factors: (i) the regulatory environment that has encouraged DSL competition through unbundling and regulated wholesale prices; (ii) the relatively recent consolidation of the cable industry in France and low level of cable connection (only 30% of French households as of December 31, 2013); (iii) the fact that the cable network upgrade is relatively recent; and (iv) the relatively low levels of fiber deployment.

DSL currently offers consumers maximum speeds of 28 Mbps while cable currently offers consumers maximum speeds of 200 Mbps. However, the speeds of such technologies in practice may be lower. Whereas cable is estimated to achieve 89.5% of advertised download speed, DSL based services have, in certain instances, achieved only 63.8% of advertised download speed (Source: European Commission).

FTTH technology, which requires a direct fiber connection in the home of the user, currently offers consumers maximum speeds of 200 Mbps, with an estimated achievement of 82.7% of advertised download speeds (Source: European Commission). The main difference between FTTH networks and our fiber/cable (FTTB) networks is that for FTTB networks the vertical connection (in the building) to the subscriber uses the existing coaxial cable. FTTH speeds are in theory infinite, limited only by the equipment used to deliver broadband, and not by any inherent limitations in fiber cables. FTTB speeds are, however, limited by the number of users using the connection in a building, with higher numbers of users requiring fiber deployment in the building in order to continue to achieve the same high speeds as those offered by FTTH.

FTTH deployment in France is progressing. The installation of such technology is intensive both as to capital and time, requiring significant engineering and rewiring, both horizontally to increase the number of cities covered and vertically within buildings. The French government considers FTTH to be a significant part of its long term investment plan and in February 2013 announced a €20 billion deployment plan and goals of 50% of the population having very-high-speed internet access by 2017 and 100% by 2023. The government has promised €3 billion in subsidies to local authorities in connection with FTTH deployment (Source: Investissements d'avenir—développement de l'économie numérique (Future

Investments—Digital Economy Development)). Several municipalities have offered subsidies to network operators that build FTTH connections. This trend is expected to continue, due to the fact that some municipalities, districts (départements) and regions, such as Hauts de Seine, Amiens, and Louvin, for example, have entered into public-private partnerships to stimulate such investment. As of December 31, 2013, FTTH broadband internet subscribers stood at approximately 559,000, accounting for approximately 27% of the French very high speed broadband internet market, and approximately 2.6 million homes were FTTH connectable (Source: ARCEP). As of September 30, 2014 FTTH broadband internet subscribers stood at approximately 800,000, accounting for approximately 32% of the French very high speed broadband internet market, and approximately 3.6 million homes were FTTH connectable (Source: ARCEP).

Both SFR and Iliad have signed agreements with Orange regarding deployment of fiber in France's less dense areas. In line with the conditions set forth by the ARCEP, other operators will also be able to obtain access to the infrastructure deployed by an operator, including through co financing projects, for their own very high speed broadband offers. However, FTTH deployment involves a heavy investment by operators (estimated by the ARCEP at approximately €400 to €200 per FTTH connected household), as vertical deployment must be made in each target building and home. Complexities often ensue as operators must obtain the consent of (and hence work closely with) the housing associations, co-op boards and/or building managers. Such complexities coupled with the financial pressure currently experienced by the Altice France Group's competitors as a result of the price war in the mobile market could delay fiber deployment in France.

VDSL2 is a conceivable intermediate, albeit partial, solution. DSL-based networks may be upgraded to VDSL2, which was authorized for use by the government in April 2013 and provides average bandwidth speeds of up to approximately 50 Mbps (Source: ARCEP). Orange has announced that it will run a beta test of VDSL for certain B2C subscribers on its network beginning in September 2013. Free (Iliad) has also announced that it would make its current offerings upgradeable to VDSL should the technology become available in a subscriber's location (which depends on whether Orange rolls it out on its local loop). Like all DSL based technology, however, and to even greater extent than DSL, VDSL2 speed depends on the distance to the local exchange. It is estimated that for distances above one kilometer, VDSL2 bandwidth speeds will be similar to that of traditional DSL networks (Source: ARCEP). Based on this distance, ZDnet has estimated that only 16% of French households would be in a position to benefit from increased transmission speeds under VDSL2 currently and only 6% would see download speeds greater than 30Mbps. Given the expected geographic and technical coverage of VDSL2, we believe that in the zones covered by our own fiber/cable network less than 8% of DSL lines will benefit from speeds higher than what is currently provided by ADSL2+.

Fiber or cable technology is becoming an increasingly important broadband internet access platform in France as a result of our strategy to upgrade our networks, provide new digital services to customers, leverage existing customer relationships and drive branding initiatives. As of December 31, 2013, very-high-speed subscribers represented approximately 8% of total broadband internet connections, 10% as of September 30, 2014, and we were the dominant player within this market (Source: ARCEP). We currently offer cable customers internet speeds of up to 200 Mbps, and our updated network and set top boxes have the ability to offer speeds of up to 400 Mbps with limited additional capital expenditures by us.

The following table shows the breakdown between high speed and very high speed broadband services in France from 2011 to September 30, 2014 (Source: ARCEP):

In the above table, our subscribers appear in the lines "of which very- high-speeds ≥ 30 and < 100 Mbps" and "of which very- high-speeds ≥ 100 Mbps". As of December 31, 2013, Numericable Group had 1,040 thousand very-high-speed broadband RGUs while SFR had 197 thousand FTTH subscribers representing a combined market share of the very-high-speed broadband market of approximately 60%. Adding Bouygues Telecom's 363,000 subscribers who are white label subscribers of Numericable Group's fiber market, our market share reached to approximately 78%. At that date, Orange reported 319,000 very-high-speed broadband subscribers.

	As of December 31,			As of September 30	
	2011	2012	2013	2013	2014
			(in thousands)		
Total number of high speed and very-high-speed subscribers on fixed-lines	**22,737**	**23,975**	**24,936**	**24,659**	**25,665**
Number of high speed subscribers	**21,389**	**22,369**	**22,870**	**22,797**	**23,170**
Of which xDSL	20,984	21,981	22,461	22,402	22,725
Of which other high speed access	405	388	409	0,395	0,445
Number of very-high-speed subscribers	**1,348**	**1,605**	**2,066**	**1,862**	**2,495**
Of which very-high-speeds ≥30 and <100 Mbps	685	670	743	656	845
Of which very-high-speeds ≥100 Mbps	466	621	764	726	850
Of which FTTH	197	314	559	480	800

Variation in the total number of high and very-high-speed subscribers					
Net increase in one year *(thousands)*	1,390	1,238	961	1,008	1,006
Net increase in one year (%)	6.5%	5.4%	4.0%	4.3%	4.0%

As of September 30, 2014, Numericable Group had 1,095 thousand very-high-speed broadband RGUs while SFR had 249,000 FTTH subscribers representing a combined market share of the very-high-speed broadband market of approximately 54%. Adding Bouygues Telecom's 368,000 subscribers who are white label subscribers of Numericable Group's fiber market, our market share reached to approximately 69%. As of that date, Orange reported 481,000 very-high-speed broadband subscribers.

The following table presents a comparison of our monthly prices for certain triple play and quadruple play offers and those of our competitors.

	Triple-Play	Quadruple-Play
Bouygues Télécom BBox Sensation Fiber	**€25.99**	**NA**
Free Freebox revolution fiber (Iliad)	**€29.99**	**€45.98**
SFR Fiber	**€39.99 (€29.99 for 1 year)**	**€54.98 (€34.98 for 1 year)**
Orange LiveBox Play Fiber	**€37.99 (€28.99 for 1 year)**	**€59.99 (€54.99 for 1 year)**
Numericable Power 4 Fiber	**€46.90 (€35.90 for 1 year)**	**€55.90 (€46.90 for 1 year)**

The offers of our competitors noted above do not include CanalSat channels, which must be subscribed separately through Groupe Canal+.

In addition, alternative access technologies may be introduced in the future that could further increase competition or could lead operators to increase capital expenditure for additional upgrades. Competition, including price competition, from these alternative technologies may increase in the future.

Pay Television

(a) Introduction

The French television market is one of the largest in Europe, with approximately 27.1 million television households and a combined pay television penetration rate of approximately 45.2% as of December 31, 2013, (expected to increase to 48% in 2017) (Source: Ovum Research). Like in other European markets, B2C television behavior in France is increasingly focused on digital, innovative, HD, Ultra HD, 3D TV and interactive television services such as Video on Demand ("VOD"), requiring high bandwidth and bi- directional distribution platforms.

(b) Distribution Platforms

Television signal distribution platforms in France include satellite, IP (DSL/FTTH), our cable network and terrestrial systems (i.e. DTT). Viewers who have the appropriate television equipment are able to receive the signal and view the content of approximately 25 television channels for free (i.e. without requiring a subscription) via DTT. To receive more channels, viewers must subscribe to pay television services. The French pay television market is divided between basic pay television, which primarily consists of basic content packages (i.e. DTT channels as well as low value added channels), and premium pay television, which consists of package offerings of premium sports, movies and other themed channels. Spending for pay television services in France is growing with total subscription fees reaching approximately €6.3 billion in 2013 (Source: Digiworld Yearbook 2014). While the established pay television operators face competition from free television (including DTT) and other pay television alternatives (OTT television and catch up television), the competitive advantage of pay television (high content quality and premium services) and the loyalty of the installed customer base lead to strong pay television resilience (as determined by low price sensitivity and low churn rates). As of December 31, 2013, there were approximately 12.6 million subscribers to pay television services in France, broken down as follows: 34.0% IPTV, 30.4% satellite, 26.5% cable and 9.1% DTT (Source: Ovum Research).

While we distribute our packages exclusively across our cable platform, Canal+ Group distributes its packages across all broadcasting platforms: DSL, DTT, satellite, as well as our cable network (in that case limited to Canal+'s own channels, known as Les Chaînes Canal+). Canal+ Group offers two complementary packages: a premium service consisting of Les Chaînes Canal+ and a multichannel themed service package known as CanalSat. These two complementary packages are available via combined or separate subscriptions. Canal+ Group has developed numerous value added services around its packages, such as its' on-demand television service, CanalPlay (which is not available by satellite and is therefore available on the Altice France Group's cable network), HD and multiscreen distribution. As of December 31, 2013, and as of September 30, 2014, there were 9.5 million and 9.4 million subscriptions, respectively, to Canal+ packages in

France (Source: Vivendi 2013 and Vivendi 2014 results). We have negotiated agreements with content providers that enable it to bundle CanalSat packages within its own offerings, its competitors currently can only offer CanalSat packages as an additional, and separately billed, service as CanalSat holds the distribution rights to this content for satellite and DSL.

We primarily compete with CanalSat, whose offers have similar content (Canal+ content being exclusive to Groupe Canal+). There are several CanalSat offers, including: CanalSat Panorama (approximately 122 channels, €24.90 per month (€15.90 for 1 year)), CanalSat Cinema Series (approximately 20 channels, €19.90 per month (€15.90 for one year)) and an offering of both CanalSat Panorama and CanalSat Cinema Series together (€39.90 per month (€24.90 for one year)). There is also the Grand CanalSat offer which includes CanalSat Panorama, CanalSat Cinema Series and other options (other channels) for €58.90 per month (€64.90 per month with adult channels). The channels Foot+, beIn Sport and the VOD Pass are not included but may be added.

(i) Cable

We are the sole major cable operator in France. There are also small regional cable operators that collectively represent less than 1% of the French cable networks in terms of total homes passed. Cable network operators generate revenues principally from subscription fees paid by customers for the services provided. We believe that the direct access we have to customers allows us to serve them better, as we can identify and fulfill their demands for specific products and services more easily and on a local basis. Services provided via cable networks are characterized by easy to use technology, the efficient installation of customer equipment and the reliability of a protected signal delivered directly to the home. Cable television subscribers are able to access customer services provided by the cable provider on demand. Cable also offers subscribers a high-quality service, including excellent picture quality, multiple HD channels, 3D compatibility and VOD offerings.

Given the trend towards offering bundled media and telecommunications services, the market share of cable television distribution is expected to benefit from cable's ability to deliver triple play services with high- bandwidth, high-speed and bi directional capacity.

(ii) Satellite

Satellite plays a substantial role in the French television market, especially among premium products. Satellite subscribers can receive free to air or pay satellite television.

Satellite distribution has a number of competitive advantages over cable television services, including a wider range of programs available in a wider geographic area, especially rural areas. Conversely, satellite is less widely available in urban areas due to restrictions on the installation of satellite dishes. In addition, current equipment technology is not equipped for interactive televisions services, such as VOD, via satellite. In addition, while satellite operators can team up with providers of broadband internet and fixed-line telephony services, they are unable to directly supply all the products in a triple play bundle, putting them at a significant disadvantage as compared to cable or DSL operators who are able to provide all three services through their networks. We believe that satellite has the following additional disadvantages compared to cable: (i) higher up-front cost of procuring and installing a satellite dish, as compared to the "plug and play" convenience of cable; (ii) absence of a regular maintenance service which cable network operators offer to their subscribers; and (iii) vulnerability of satellite reception to external interference, such as adverse weather conditions.

(iii) DSL

Following its acquisition of SFR, the Altice France Group now addresses the pay television market through both Numericable Group's cable and fiber based offers and SFR's DSL based offers.

Our triple-play and quadruple-play offerings on Numericable Group's cable and fiber network compete mainly with the DSL based offerings of Orange, Free (Iliad) and Bouygues which currently provide television services to customers connected to the the Altice France Group's network utilizing DSL broadband internet connections, and with CanalSat, which delivers premium television packages through the networks of Orange, Free (Iliad), SFR and Bouygues Télécom. Orange, Free and Bouygues Télécom currently have high market shares in the high-speed broadband market in France and have a broad potential customer base (covering, in the case of Orange, its local loop and, in the case of Free, the portion of Orange's local loop that has been unbundled), we believe that the superiority of its technology in terms of quality, reliability and variety of content will allow it to challenge their positions in coming years in the areas where we have deployed our fiber/cable network. See "—The Group's Network". Following the SFR Acquisition, we are also now able to compete with these DSL offers using SFR's close-to-nationwide DSL coverage of the French territory. We believe that DSL based television presents a disadvantage compared to cable: adding television services over a DSL network strains the network and decreases the amount of spectrum bandwidth available for other service offerings, particularly bandwidth intensive broadband. Under currently available technology, we believe that DSL based triple play providers such as Orange and Free (Iliad) will have difficulty providing the same level of services that can be provided over fiber/cable networks (in particular, viewing of multiple TV/VOD on multiple screens, TV/VOD simultaneous viewing and recording) without making significant investments in extending fiber closer to the subscriber's home. In addition, Orange, Free and Bouygues Télécom customers must subscribe separately to premium channels, such as CanalSat, while these are included in certain of our bundled packages.

(iv) Pay DTT

Our cable television services also compete with DTT providers such as Canal+ Group. As of December 31, 2013, approximately 9% of all digital television B2C subscribers in France obtain their service through DTT networks (both free and pay DTT) (Source: Ovum Research). DTT currently offers only a limited number of channels (primarily free television channels) and does not offer any interactive television services, but the image quality provided is good.

(v) Other Emerging Technologies

We face increasing competition from alternative methods of distributing television services other than through traditional cable networks. For example, websites and online aggregators of content that deliver broadcasts OTT of an existing broadband network, such as Amazon and Apple, have already emerged as competitors and are expected to become increasingly significant competitors in the future. Connected or "smart" televisions facilitate the use of these services. OTT refers to broadband delivery of video and audio content without the internet access provider being involved in the control or distribution of the content itself (limiting its role to IP transfer), in contrast with the purchase of video or audio content from an internet provider, such as VOD or an IPTV video service. Outside of France, for example, in the United States where Netflix and Hulu provide OTT content, OTT is popular. The full extent to which these alternative technologies will compete effectively with our cable television system in France is not yet known. In particular, OTT in France is impacted by the "media chronology" in France, which requires subscription VOD services to comply with a minimum 36 month time period between a movie's theatrical release in France and its availability in a subscription VOD catalogue, which does not apply to TV shows or movies that are not shown in movie theaters. Such providers or other web content providers have begun to promote offerings in France and could place significant competitive pressure on the French market. For example, Netflix launched offers in France in September 15, 2014, proposing a free trial month and packages ranging from €7.99 per month for one standard quality screen up to €11.99 per month for four HD-quality screens. In addition, Bouygues Telecom and Orange have announced that they have concluded agreements with Netflix pursuant to which their respective customers will be able to access the unlimited VOD services of Netflix directly from their television with a Netflix subscription starting in November 2014 (Source: press release of Bouygues Telecom and internet site Orange.fr). SFR's offer with the Google-play television set-top box also includes access to Netflix. There are also other competing players in the market, such as Canal+ Group, Apple TV, Google TV, among others. However, such technologies may also contribute to demand for the Altice France Group's very-high-speed broadband internet access.

Fixed Telephony

Traditional switched voice lines have been declining steadily in recent years as they are replaced by VoIP lines. More generally, fixed-line telephony has become a commodity product that is now bundled into multi-play packages. Fixed-line services have therefore become dependent on a quality broadband offering. Flat rate pricing for fixed-line telephony has become the market standard.

The market for B2C telephony in France also faces pressure from alternative carriers, declining mobile phone charges and interconnection rates, as well as alternative access technologies and other methods of internet telephony offered via broadband internet connections. We expect increasing competition, including price competition, in the future.

Mobile Telephony

France is one of the largest mobile markets in Europe with total market revenues of approximately €19.5 billion in 2013 (Source: IDC European Telecom Services Database Q3 2014, November 2014). As of December 31, 2013, there were 74.1 million total mobile customers in France, compared to 70.5 million as of December 31, 2012, representing a 117% penetration rate of the French population (Source: ARCEP). Indeed, as of September 30, 2014, there were 76.6 total mobile customers, compared to 72.9 as of December 31, 2013, representing a 120% penetration rate (Source: ARCEP). By comparison, as of September 30, 2014, mobile penetration of the population was 106%, 127%, 136% and 144% in Spain, the United Kingdom, Germany and Italy, respectively (Source: Ovum Research). The historically low mobile penetration, coupled with the decrease in market prices, has resulted in significant growth in mobile subscriptions. This growth is mostly driven by the subscription contract segment, which grew by approximately 8% in volume in 2013 with the pre-paid contract segment declining by 16% over the same period (Source: ARCEP). The increase in the subscription contract segment and decrease in the pre-paid contract segment is mainly attributable to operators transferring subscribers to potentially higher monthly bills with internet access and by the launch of very low cost subscription offers by French operators following the entry of Free in the mobile market in January 2012.

(a) Market segmentation

Historically, there were only three mobile network operators in France: Orange, SFR and Bouygues Télécom. Iliad was awarded the fourth mobile license in 2009 and it launched a mobile telephony service in January 2012 under the "Free" brand. Free's entry has disrupted the market, with competition intensifying due to Free's aggressive pricing strategy. Before the entry of Free, most of the post paid contracts were based on limited usage (e.g. 4 hours of voice) and subsidized handsets. Free widely introduced "no frills" packages with no handsets and limited outsourced services but providing unlimited voice and data package (3G) at a very low cost (€19.99 per month for its key offer). Other competitors have also introduced low cost brands such as B&You (Bouygues Télécom) and Sosh (Orange). SFR also adapted its strategy by launching its low cost brand "SFR RED". Free rapidly gained market share, reaching approximately 8.0 million mobile customers as of December 31, 2013, and 9.6 million as of September 30, 2014, two years after its commercial launch. This market share gain has been driven by growth of the overall market in volume and by market share gains from Orange, SFR and Bouygues.

The French mobile market is also characterized by a high share of post- paid customers. Post-paid customers represented 71% of the French mobile market (excluding French overseas territories) as of December 31, 2013, compared to 69% as of December 31, 2012 (Source: ARCEP). In comparison, the share of post-paid customers in Spain, the United Kingdom, Germany and Italy was 71%, 59%, 51% and 24%, respectively in 2013 (Source: Ovum Research). This is mostly due to the substitution of pre-paid offers with low cost post- paid offers, at attractive and low prices (e.g. €2 per month for Free) and a small number of hours of communications (e.g. 2 hours of voice) and limited internet (50 Mb).

In recent years, MVNOs such as Virgin Mobile, NRJ Mobile and Numericable Group have also used the networks of mobile operators to sell their own branded mobile products. The migration of clients to MVNOs appears to have stabilized, with MVNOs representing a combined market share of 11% of the mobile market in France as of December 31, 2013, and 12% as of September 30, 2014 (Source: ARCEP).

At December 31, 2013, Orange, SFR, Bouygues and Iliad (Free) reported total mobile customers of 27.0 million, 21.4 million, 11.1 million and 8.0 million, respectively (Source: Companies FY 2013 Reporting), while the total number of MVNO customers in the market reached 7.8 million (Source: ARCEP). As of September 30, 2014, Orange, SFR, Bouygues and Iliad (Free) reported total mobile customers of 27.2 million, 21.4 million, 11.0 million and 9.6 million compared to 8.7 million MVNO customers in the market (Source: ARCEP, Company filings).

(b) Pricing dynamics

In recent years, the increase in competition in the French mobile market has resulted in lower market prices. Consequently, the average market ARPU per month has declined by approximately 32% as at September 30, 2014, since December 31, 2011 (Source: OVUM Research), driven mainly by migration of some post-paid subscribers to no-frills offers. Following this drop, mobile prices in France are among the lowest in Europe. France currently has the lowest mobile prices for comparable offers among major operators including low cost products, unlimited calls, unlimited SMS/MMS, 1, 2 or 3 Gbs of internet and free handsets (Proximus 5GB offer, Base and Mobistar in Belgium) for SFR Red, Sosh, B&You and Free offers at €19.99. The mobile prices in France are particularly low when compared to the low density of population in France, requiring significant investments to meet nationwide geographical coverage. As of December 31, 2013 France had 121 people per square kilometer compared to 265, 231, 370, 498 and 203 people per square kilometer for the United Kingdom, Germany, Belgium, the Netherlands and Italy, respectively, according to the World Bank, providing a disconnect between pricing levels and the investments required to roll out capex intensive networks.

(c) 4G/LTE

The French market has historically lagged behind other European markets in terms of mobile data consumption. Despite the high concentration of post- paid users, historically the market has been slower to embrace data services. Recently, this trend has changed as operators start to launch aggressive 4G mobile offers.

Free was the first operator to introduce 4G at no additional charge in December 2013. However, Free did not proceed with any price cuts as it did for its 3G offers. Free (Iliad) currently has limited capability to deliver 4G on a nationwide basis, given it has no spectrum in the 800 MHz band. Other operators in the market have aligned their 4G prices with Free's, with all MNOs, including SFR, now offering similar all inclusive 4G packages at the €25 per month starting price point.

(d) Mobile Termination Rates

Mobile termination rates ("MTRs") have been reduced by regulators across Europe. In France, ARCEP announced in 2011 it was going to further reduce mobile termination rates (symmetrically for the main operators, Free was not included as it had yet to launch commercial operations). At the end of June 2011, Orange and SFR were charging €0.03 per minute while Bouygues was charging €0.034. The new regulation required operators to reduce the rate to €0.02 per minute from July 1, 2011, €0.015 from January 1, 2012, €0.01 on July 1, 2012 and finally to €0.008 from January 1, 2013. As a result, France has the lowest MTRs in Europe with limited room for further MTR reductions. As a comparison, the average MTR in Europe is €0.0192 as at December 31, 2013 (Source: Body of European Regulators for Electronic Communications).

(e) Mobile spectrum and network coverage

Generally, spectrum licenses in France are for a period of 20 years and operators can only use the technology designated in the license on each spectrum band. This limitation prevents Free (Iliad) from offering competitive 4G service on a nationwide basis, as it is only able to use its 2.6GHz spectrum for 4G. Other operators, including SFR, have very similar positions across the spectrum bands, allowing them to compete effectively with each other across all technologies. The most recent spectrum auctions in France were the 800 MHz auction in December 2011 and the 2.6 GHz auction in September 2011.

1.2 B2B Market

Following the liberalization of the French telecommunications market in 1996, a large number of telecommunications operators entered the B2B market segment, offering fixed-line telephony services, fixed-line internet access, data access links and, more recently, cloud computing. The large corporates B2B market is highly competitive and includes the following among its key market participants: Orange, SFR, Bouygues, Completel, and other international players. The market for other corporates is dominated by Orange, with competition also from local actors.

The expectations of B2B customers differ from those of B2C customers, in particular with respect to the need for reliable and symmetrical bandwidth speeds (i.e. high speeds for both downloading and uploading). B2B customers require service to be extremely reliable and to be re-established within short timeframes if there is disruption (failing which financial penalties typically apply). B2B customers also generally require symmetrical bandwidth speeds, while B2C customers are usually satisfied with asymmetrical speeds providing higher downloading speeds and slower uploading speeds. Additionally, B2B customers require higher security and are in a position to impose monetary and other penalties on providers for failure to meet contractual requirements. These requirements have an impact on the technological solutions offered to B2B customers and support higher prices in the B2B segment.

The penetration of mobile internet is increasing on the B2B market, in particular with more and more smartphones including data in the offer. With respect to fixed connectivity, the B2B market is also currently characterized by increasing penetration of optical fiber, related to the increase in the consumption of data.

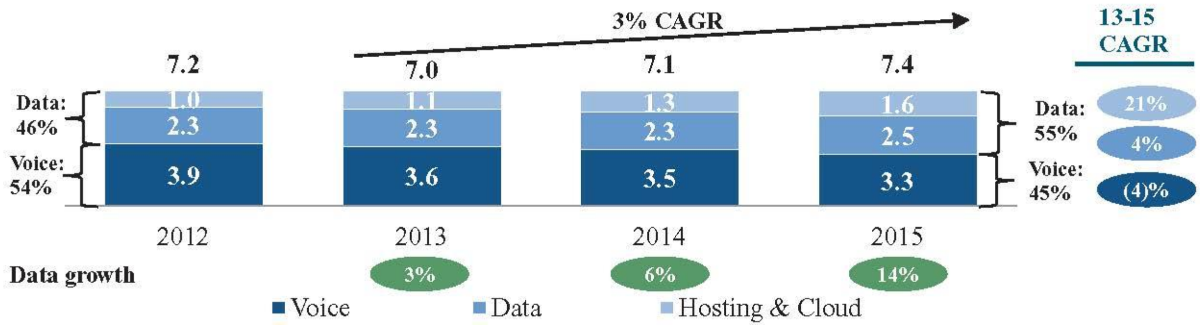
Customer expectations are increasingly leaning towards convergent offers that propose a range of competitive services: fixed telephony, which is converging with data via VoIP, mobile telephony and internet access (with growing demand for very high-speed access). These convergent offers are targeted to very small businesses and small and medium-sized businesses looking for “all- in-one” solutions.

Customer expectations also contribute to the development of unified communications for businesses, which are marked by the convergence of mobile and fixed-line telephony and by the development of collaboration tools (professional messaging services, instant messaging, visio-conferencing, and sharing tools).

Beyond services to businesses, the operators on the B2B market offer related and complementary services, including: (1) unified communications and collaborative tools services; (2) call center services or management of the internet presence; (3) managed security services (hosted and non-hosted), which follow the penetration of IP communication services; and (4) remote work (particularly online backup, firewalls, management and protection of terminals and secured access to resources on the business’ network).

With respect to connectivity, the market is characterized by the growing penetration of optical fiber, related to increasing data consumption.

We expect next generation services and data consumption to increase (chart does not include mobile segment data):



CAGR: Compound Annual Growth Rate

Voice

The B2B segment for voice services is extremely price sensitive, with sophisticated customers and relatively short term (one year) contracts. The ability to compete effectively is partially a function of network capillarity, and certain of our competitors have a more extensive, denser network. In recent years, the B2B market has experienced a structural shift to VoIP services from traditional switched voice services.

Data

In the B2B segment for data services, the capacity to transport high amounts of data and access to the latest technologies are very important to customers. In the data market, consumption has increased significantly and customers currently often seek combined infrastructure and software solutions.

Price pressure is high in this competitive market. Conversely, data consumption has increased significantly. We expect a continued increase in B2B demand for data services and bandwidth due, in particular, to the following factors:

- the convergence of voice and data services, such as VoIP, which results in increased demand for resilient network solutions;
- the centralization of IT hardware of multisite enterprises, including servers into one single location per enterprise, which increases connectivity needs of the peripheral sites of such enterprises;
- the emergence of new business applications, such as videoconference;
- larger corporates' demand for faster access, increased virtualization, data centers and increased security services;
- increasing digitalization at public administrations;
- increased use by medium sized companies of complex data products, such as cloud computing; and
- increased use by businesses of internal wireless networks.

Customers are currently seeking maximum optimization and rationalization of their needs through the use of data centers. Large corporates tend to seek dedicated network solutions in order to control their service chain from end-to-end and often have their own infrastructure. Medium sized corporates are more likely to seek "infrastructure as a service" (IaaS/cloud) solutions for their data availability, storage and security needs. "Infrastructure as a service" can now provide such corporates with data storage and backup solutions that would otherwise be too expensive. While medium sized corporates expect providers to provide tailored and secured infrastructure up to the "middleware" level, small corporates tend to prefer a packaged solution such as "software as a service". We now compete with software and other IT providers of data and network solutions, and the frontier between them and providers of infrastructure and data solutions such as us is increasingly blurred. Partnerships between IT and infrastructure providers are increasingly common and are another source of competition.

Customers

The B2B segment is also defined by the different needs of customers, which vary depending on the size of the company. Large corporates are sophisticated and highly price sensitive customers. Speed, capacity, security and reliability are also very important to these customers. They tend to unbundle services and put them out to tender frequently. Smaller companies are more apt to bundle and place a premium on provider proximity.

We estimate that the size of the large corporates market (those with more than 1,000 employees), medium sized companies (between 20 and 1,000 employees) and small and home offices in 2012 was €3.1 billion, € 3.4 billion and €0.7 billion, respectively. We believe that the French large corporates market includes approximately 1,900 entities, approximately 155,000 sites (approximately 80 sites per large corporate), and a monthly average value per contract of approximately €130,000. We believe that the French midmarket includes approximately 290,000 entities, approximately 507,000 sites (less than 2 sites per medium sized company), and a monthly average value per contract of approximately €1,200.

In 2013, SFR entered into exclusive negotiations to acquire B2B operator Telindus, with the objective to enhance its capabilities as provider of next generation B2B services in France. The transaction was completed on April 30, 2014.

Wholesale Market

The wholesale telecommunications market comprises three sectors: wholesale voice carrier services, wholesale data carrier services and wholesale dark infrastructure services. The wholesale voice carrier services segment includes fixed and mobile termination and interconnection services for operators with no or limited switched voice network capillarity. The wholesale data carrier services segment includes transporting data for operators with no or limited data network capillarity. The new wholesale dark infrastructure market is developing, based on the selling of fiber connections without any related voice or data services. This business is growing in connection with the roll out of FTTH and 4G and involves principally horizontal fiber links and backhauling.

In France, the wholesale telecommunications market is dominated by Orange and SFR with their market shares varying by segment. SFR has a strong presence in the voice wholesale segment. In the data wholesale segment, Orange is the dominant player, with local operators playing a significant role. In the fiber wholesale segment, Orange is the clear leader with a market share of approximately 70% as of December 31, 2013.

- *Voice.* The wholesale market for voice services is highly volatile. Operators generally seek tenders each year and choose the provider based solely on availability and price, as there is little to no difference in the quality of service among operators with respect to voice services. Competition is therefore based primarily on price and network capillarity, as well as on operators' flexibility and ability to offer tailored solutions. Pricing in the voice wholesale segment is generally "cost plus", with the interconnection cost set by the ARCEP. Regulated interconnection costs have decreased as the telecommunications industry has matured. See "*Regulatory—Regulation of Electronic Communications Networks and Services—The European Regulatory Framework for Electronic Communications*". In addition, this segment has been significantly affected by the development of full MVNO agreements between network and virtual operators. These agreements have affected the flow of traffic and led to an increase in fixed to mobile volumes which generate higher wholesale prices. In particular, Free's arrival in the mobile market in January 2012 has led to a significant increase in mobile-to-fixed and mobile-to-mobile volumes.

- *Data.* The wholesale market for data services is less volatile than the voice market. Competition is based primarily, in addition to price, on service quality and technological advancement.

- *Fiber Infrastructure.* The wholesale market for dark fiber infrastructure is more open than the wholesale voice and data carrier, as providing it does not require having a dense, national network and does not include any services that would require technical expertise. For example, certain cities in France have built their own local fiber networks and are therefore wholesale infrastructure providers (i.e. they rent out the fiber to telecommunications operators).

Growth in the wholesale market is driven by growth in demand for network capacity, which has increased significantly in recent years.

Another trend in the wholesale market is the development of public/private partnerships between local authorities and infrastructure players for the installation or upgrade of FTTB networks or the deployment of FTTH/FTTO vertical networks. In the past, we have been selected as the entity in charge of building certain new networks or in charge of upgrading existing networks. We hope to be chosen in the future as well. See "*—The Numericable Group's Business Lines—Wholesale Market—Wholesale Market Product and Service Offering—Infrastructure Wholesale Services*".

Operators and consortiums of operators and construction companies have also started deploying FTTH vertical fiber networks in apartment buildings in order to lease the use of such networks to other telecommunications operators as "building operators" (opérateurs d'immeubles), including through public/private partnerships with local authorities. We operate in this area based on its bulk business relationships, as it is a way to retain and build customer relationships.

2. Portugal

Macroeconomic Overview

According to the IMF, Portugal has a population of approximately 10.6 million and 3.9 million households as of December 2013, and the population is expected to grow at an average rate of 0.1% per annum from 2014 to 2019.

Portugal is a developed market economy with a GDP per capita in 2013 of $23,068 as compared to $44,999 for Germany, $39,372 for the UK and $44,099 for France. In 2013, Portugal's economy contracted by 1.4% according to the IMF due to the ongoing fiscal consolidation and both weak domestic and external demand. This compares to GDP growth of 0.5% for Germany, 1.7% for the UK and 0.3% for France during the same period. Nevertheless, there are early signs of recovery in economic activity. According to the IMF, Portugal's GDP is expected to grow at 1.0% in 2014 and at 1.5% in 2015. This is in line with other developed European economies such as Germany, which is forecast to grow 1.4% and 1.4%, the UK, which is expected to grow 3.2% and 2.7% and France, which is expected to grow 0.4% and 1.0%, respectively over the same periods, according to IMF.

Recently, Portugal has regained access to the sovereign bond markets at more favorable interest rates. Portuguese 10 year sovereign bonds yielded 2.6% as of January 6, 2015, which compares favourably with Germany, France and the UK with respective sovereign yields of 0.5%, 0.7% and 1.6%. Furthermore, contagion from the collapse of Banco Espirito Santo has been fully contained. Moody's has published that it expects no negative impact on Portugal's macro recovery or its sovereign credit rating (BB/Ba1). This positive trend in government financing is expected to benefit private financing for both companies and consumers.

Similarly, Portuguese unemployment has shown signs of improvement in recent quarters, having declined from a peak of 17.5% in March 2013, to 13.1% as of September, 2014 (Source: Instituto Nacional de Estatística). This compares with unemployment rates as of September 2014 of 6.6% in Germany (Source: IMF), 10.1% in France (Source: IMF), and 6.2% in the UK (Source: IMF).

The improved macroeconomic conditions have had a positive impact on consumer confidence, which has increased from (56.6) in January 2012 to (21.4) in November 2014 (based on an index of 100) according to Instituto Nacional de Estatística. Finally, given Portugal's significant household savings rate of 15.3% for 2013 according to IMF, as compared to 24.0% for Germany, 10.0% for the UK and 20.7% for France, there is room for further upside in consumption if confidence continues to improve strongly.

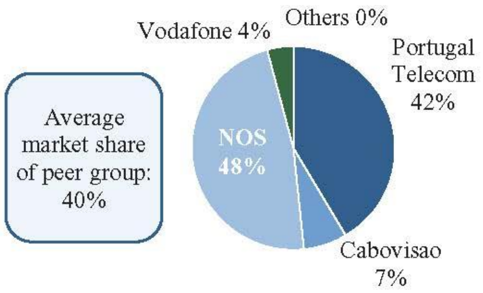
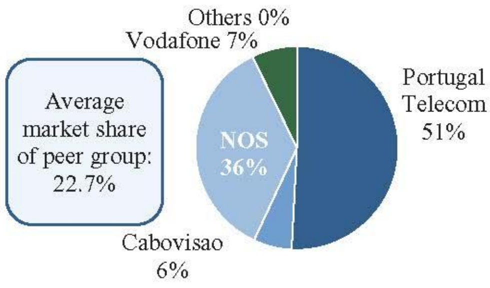
Competitive Overview

Below is an overview of Portugal Telecom's main competitors in Portugal:

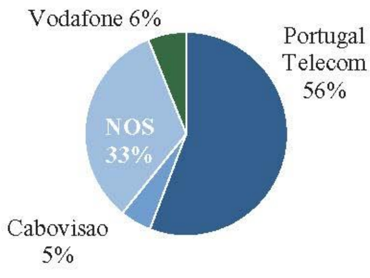
Market Shares by Subscribers in Portugal (2013)



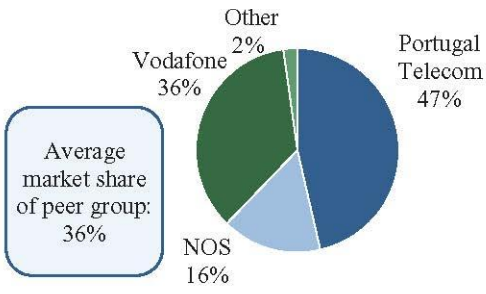
3.2m total subscribers



2.5m total subscribers



3.7m total subscribers



16.3m active SIM cards

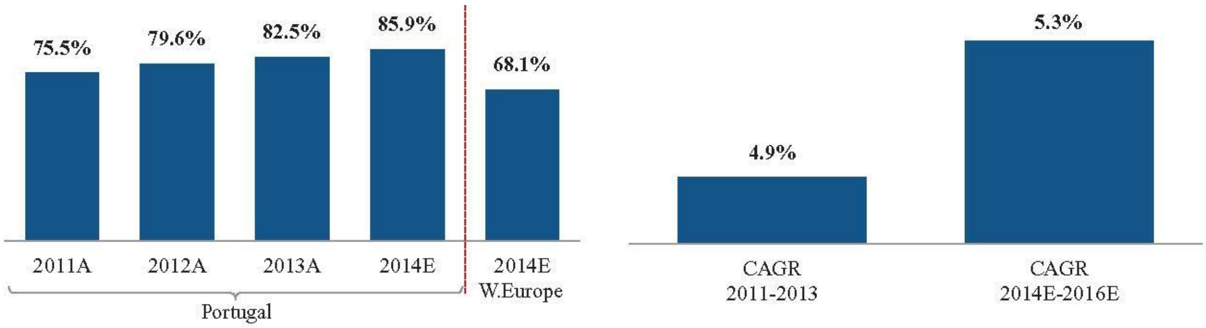
Source: Company filings, TeleGeography, Anacom, Ovum Research.

Note: Peer group for Pay-TV and Broadband includes Virgin Media, Telenet, Com Hem, Ono, Ziggo, KDG and HOT (Market shares 2013 in their respective main country of operations). Peer group for Mobile includes Deutsche Telecom, Telefonica, Telecom Halia, KPN and Vodafone (Market shares 2013 in their respective main country of operations).

2.1 Pay Television

According to Ovum Research, Portugal has an estimated 3.4 million pay television subscribers as of year ending 2014, and an 85.9% penetration rate, comparable with the most advanced EU peers. The penetration rate is expected to reach 98% by 2017 (Source: Ovum Research) Pay television penetration has been rising over the past three years driven by the high demand for a broad range of pay television channels and the relative weakness of free terrestrial television which only transmits five channels. Pay television has historically been primarily provided over the cable platform, which has a higher roll out rate than many Western European countries, with DTH, a complementary platform in rural areas, and more recently, IPTV, primarily in areas where fiber is present. Following the PT Portugal Acquisition, most of the pay television market will be divided between two players: NOS (formerly known as ZON Optimus), the largest player by number of subscribers, and Altice Portugal. Vodafone is a third service provider, but it has a limited coverage in rural areas. Based on Anacom Research, excluding other small providers, as of December 31, 2013, NOS, PT, Cabovisao and Vodafone had approximately 48%, 42%, 7% and 4% of market share nationwide, respectively. This represents a substantial improvement for PT Portugal as compared to its market share of 14% in 2008. In recent years, PT Portugal has been gaining market share due to the provision of local and original content as well as innovative features (e.g. multi-screen and non-linear content). PT Portugal has primarily offered low-priced IPTV, predominately in fiber areas and to a lesser extent on its DSL network; however, it also has a DTH offering for rural areas where its DSL network suffers from technological limitations. PT Portugal's IPTV offering, sold primarily as part of triple play packages, has historically not taken customers away from cable. However, it has driven an increase in pay television penetration. Pay television ARPU has increased from €24.9 per month in 2011 to approximately €25.5 per month in 2013, according to Ovum Research.

The Pay-TV market generated revenues of €1.0 billion in 2013 and is forecasted to grow at a 3.7% CAGR from 2014 to 2017, according to Ovum Research.



Source: Ovum Research

2.2 Broadband internet

Introduction

According to Ovum Research, Portugal has an estimated 3.0 million broadband internet subscribers as of year ending 2014, and a penetration rate of 76.6%, slightly lower than the Western European average of 80.3%. Penetration is nonetheless forecast to increase, and is expected to reach a level of 79.0% by 2018, according to Ovum Research estimates. There are a number of operators providing broadband internet services to residential customers in Portugal. Pro forma for the PT Portugal Acquisition, the incumbent communications operator and historical monopoly in fixed-line telephony and broadband internet access, Altice Portugal will have a leading market share of 57% as of December 31, 2013, comprised of 51% for PT Portugal and 6% for Cabovisao. PT Portugal's market share has improved substantially from a market share of 42% in 2008. The challenger in the market, NOS has grown its broadband internet presence on the back of a Docsis network, with a footprint passing 47% of the Portuguese population as of February, 2014, and 7% for its FTTH network. According to Anacom, NOS had a market share of 36% as of December 31, 2013. The Portuguese broadband market has strong growth prospects given penetration upside potential. Growth is also expected to be driven by upgrading to higher speed offerings, based on a cable or fibre network infrastructure. According to IDC (IDC European Telecom Services Database Q3 2014, November 2014), the number of B2C subscribers to internet accesses is estimated to grow at 3.0% per annum (2014 to 2016) and ARPUs at 0.1% (2014 to 2016), both metrics being in line with the Western European average.

In 2013, the B2C internet access market generated revenues of € 0.3 billion and is forecasted to grow at 2.4% from 2014 to 2018 (Source: IDC European Telecom Services Database Q3 2014, November 2014).

Network Infrastructure

The quality of the network infrastructure underpinning the broadband internet access product is an important asset for operators. Pro forma for the transaction, of the 3.9m primary households in Portugal, Altice Portugal covers a large proportion of them of which 1.7 million households are passed with FTTH (planned to increase to 2.1m following the network sharing agreement with Vodafone to pass an additional 450,000 homes). PT Portugal is additionally the sole infrastructure provider in some rural parts of Portugal, mainly with DSL. NOS covers approximately 3.3 million households with a hybrid fiber and HFC network, and Vodafone covers 1.0 million homes with fiber (with a plan to increase to 2.0 million by the end of 2015). Currently, PT Portugal's penetration of FTTH as a percentage of homes passed in its country of operation is 43%. This will be further extended to 54% of the homes passed, following the rollout of a further 450,000 homes as part of a network sharing agreement with Vodafone. This is a higher level of penetration these for many other European telecom companies. Furthermore, as of December 31, 2013, 28.3% of PT Portugal's Pay-TV subscribers were connected through its FTTH network.

2.3 Fixed-line Telephony

According to Anacom, Portugal had 3.7 million fixed-line connections as of December 31, 2013. The penetration rate was 87.4%, compared to the Western European average of 88.6% (Source: IDC European Telecom Services Database Q3 2014, November 2014). Penetration has been increasing since 2009, primarily driven by NOS's drive to up-sell fixed telephony. At the same time, PT Portugal's number of subscribers remains stable due to an increase in multiple-play penetration. PT and NOS are the leading players with market shares of 56% and 33%, respectively, as of December 31, 2013.

According to IDC, in 2013, the fixed telephony market generated revenues of €0.6 billion and is forecasted to decline at 5% per annum. from 2014 to 2018 (Source: IDC European Telecom Services Database Q3 2014, Nov 2014).

2.4 Mobile Telephony and Data

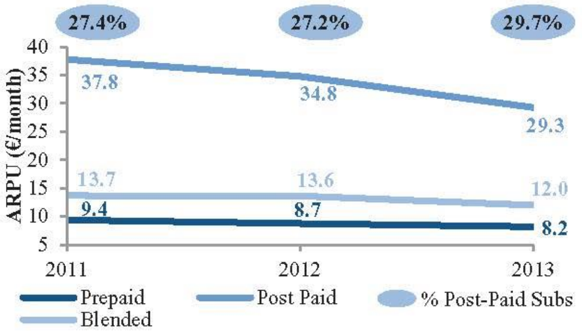
Introduction

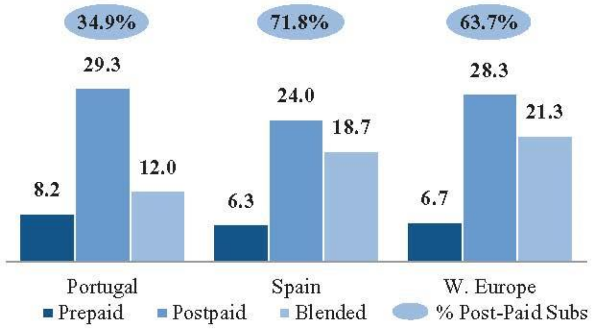
According to Anacom and Ovum Research estimates, the Portuguese mobile market had 16.3 million mobile subscribers, representing a penetration level of 154.0% as of September 30, 2014, as compared to a Western European average of 135.3%. As of December 31, 2013, in Portugal, 3G and 4G represented 71% of the subscriptions (Source: Ovum Research).

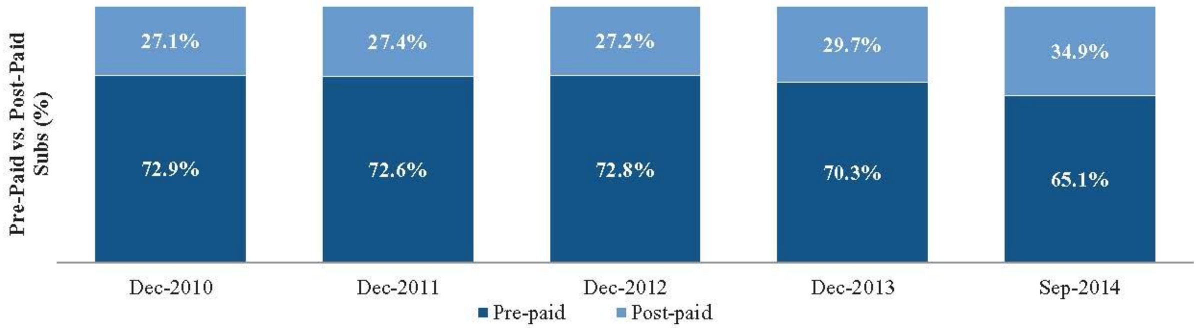
PT Portugal is strongly positioned as the market leader with 47% market share, significantly ahead of Vodafone with a market share of 36%, followed by NOS with a market share of 16%, as of December 31, 2013. This introduction of PT Portugal's quad-play offer M_4O in January 2013 has helped accelerate market convergence and has led to a marked increase in market share for PT Portugal from only 40% as of December 31, 2012. All three players introduced 4G at the beginning of 2012. Portugal Telecom's covers 95% of the population with 4G as of the end of 2014 as compared to 90% for NOS.

The market has low mobile termination rates ("MTRs") by European standards. MTRs in Portugal are currently at €1.27 eurocents/minute and expected to decrease to €1 eurocent/minute by the end of 2014 as compared to €3.50 at the end of 2011, which currently is among the lowest levels in Europe. Furthermore, Portugal is a primarily pre-paid market with 65% pre-paid subscribers (as at September 2014), as compared to 35% for the Western European average. Since pre-paid subscribers typically have a lower ARPU as compared to post-paid subscribers (as depicted in the chart below), overall blended ARPU in the Portuguese mobile market is among the lowest in Europe at €12.0 per month versus Western European average ARPU of €21.3 per month. Migration from pre-paid to post-paid customers, a trend which is already established based on the post-paid penetration level of 53.8% (as of September 30, 2014) as compared to 47.4% as of December 31, 2013, represents an upside opportunity for average ARPU in the market. Finally, the contribution to blended ARPU from data has been increasing over time, and represented 37% as of December 31, 2013, which is still lower than the Western European average of 42%, according to Ovum Research. Similarly smartphone penetration of 50% as of December 31, 2013, suggests a small upside when compared to the European average of 51%.

In 2013, the mobile market generated revenues of €2.4 billion and is forecasted to decline at 1% CAGR from 2014-2018, according to Ovum Research.







Source: Ovum Research

Access Network Topology—4G As of end of 2014

	Covered Area (%)	Covered Population (%)
Continental Portugal	76.1%	95.3%
Madeira	61.4%	93.1%
Açores	50.2%	79.0%
Total	**75.3%**	**94.8%**

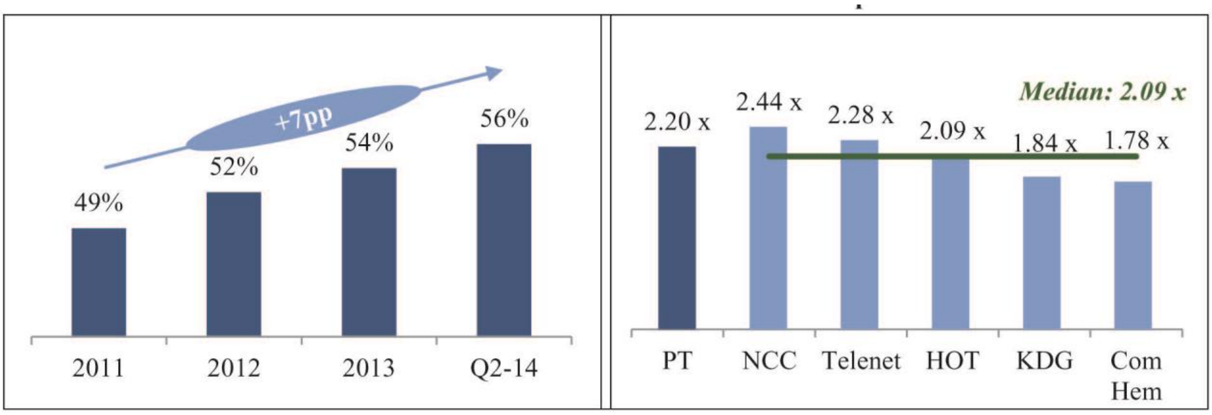
Source: Company Information

2.5 Bundling

As a consequence of consumer preferences and the parallel consolidation of fixed and mobile players, Portugal's telecommunications market has been transitioning towards convergence relatively faster than in other European markets, with an increasing number of residential and B2B customers taking triple-play and quadruple-play services from the same operator (such as the M_4O offer of PT). From an operator perspective, offering bundled services from a single point of contact helps increase ARPU, improve customer loyalty and reduce churn. This trend favors integrated players with state-of-the art network and IT platforms that are able to offer innovative bundled offerings to customers.

Portugal Telecom's strategy has been in line with such convergence trend with the launch of its M_3O and M_4O offer, which have been adopted by 1.0 million RGUs and 2.2 million RGUs, respectively by June, 2014.

As of September 30, 2014, PT Portugal's triple-play and quadruple-play penetration of its unique subscribers was 51.3%, and NOS's triple-play and quadruple-play penetration represented 70.5% of its unique subscribers. PT Portugal has successfully grown its share of subscribers in the triple play market in recent years, from 49% as December 31, 2011 to 56% as of June 30, 2014. Nevertheless, PT Portugal's revenue generating units per unit subscriber of 2.20x as of September 30, 2014 was lower than certain key peers in other geographies. This suggests potential for further upside in the penetration of bundled services. Growing the penetration of bundled solutions remains a key strategy in growing ARPU and reducing churn.



Source: Company information and company filings

2.6 Enterprise

Following the PT Portugal Acquisition, we will own the largest and second largest B2B telecom providers in Portugal under the PT Portugal and ONI brands respectively. In 2013, the market addressable by PT Portugal was estimated at approximately €1.7 billion, based on Mason Analysys estimates. Our main competitor in these markets is NOS, a newcomer to the B2B telecom market with an opportunistic strategy leveraging fixed and mobile networks, Vodafone, a mobile telecommunications company, and AR Telecom. PT Portugal market share for the B2B market was 48% as of December 31, 2013, according to Analysys Mason based on revenues.

Optimus has historically been one of the most aggressive competitors regarding pricing and through its merger with ZON has gained access to an enhanced backbone, last mile access and an enhanced ability to address both large and smaller companies. Vodafone and AR Telecom have adopted different strategies to realize B2B opportunities, but have both had limited success to date due to lack of knowledge of fixed networks and lack of credibility in the corporate market.

There is a general trend in the Enterprise segment to migrate customers away from voice services to higher margin data services and, increasingly, integrated solutions including ICT and outsourcing. Altice Portugal will combine the strengths of PT Portugal and ONI, to capture value from the trend to more data-intensive integrated solutions and to provide converged fixed mobile solutions leveraging our integrated HFC, fiber and 3G and 4G mobile networks. We benefit from a large sales force with strong distribution capabilities in the banking and public administrations sectors and broad supplier relationships, which enrich the range of our services.

In 2013, the Enterprise market generated revenues of €1.7 billion and forecasts that it will decline at a 1% CAGR from 2014 to 2018, according to Analysys Mason estimates.

3. Israel

Macroeconomic Overview

We operate a significant portion of our business in Israel, which has a population of approximately 7.9 million and approximately 2.2 million households, as of December 31, 2013. According to the IMF, between 2010 and 2013, the population of Israel grew at an average rate of 2.2% per annum and is expected to continue to grow at an average rate of 2.2% per annum from 2014 to 2017, thus providing a natural floor to expansion in the number of inhabitants and households, the target market for our cable based and mobile services.
