In the opinion of the management of the Consolidated Group companies the additional exposure in an amount of approximately EUR 565 million (over and above the provisions that have been recorded in these financial statements), as of December 31, 2013 in respect of lawsuits that have been filed against companies in the Consolidated Group on various issues is as follows:

a) An amount of approximately EUR 377 Million in respect of claims, the chances of which, in the assessment of the Company's management, in reliance on opinions from its legal advisors, do not exceed 50%.

b) An amount of approximately EUR 105 Million in respect of claims, which it is not possible to evaluate at this stage, and which consist primarily of applications for approval as class actions that were filed shortly before the date of the financial statements.

c) An amount of approximately EUR 84 Million in respect of claims, where the chances of there being accepted in the assessment of the Company's management, in reliance on the opinion of its legal advisers, exceed 50%.

33—Contractual obligations and commercial commitments (Continued)

The following table is an abbreviated summary of the Consolidated Group's contingent liabilities, which are outstanding as of December 31, 2013, according to groupings having similar characteristics:

The subject matter of the lawsuit	Amount of the additional exposure over and above the provision as of December 31, 2013	Amount of the lawsuits that it is not possible to assess, which were presented shortly before the date of the financial statements (primarily applications for approval as class actions)	Provision recorded in the financial statements as of December 31, 2013	Provision recorded in the financial statements as of December 31, 2012	Updating of the expense (income) in the reporting period
			EUR in Millions

(1) The amount includes EUR 10.5 million in respect of claims after the balance sheet date.

(2) The amount includes EUR 9.4 million in respect of claims after the balance sheet date.

B. Commitments

1. Royalties to the Ministry of Communications and other payments to the government

a) Hot Telecom used to be committed to pay annual royalties in accordance with the Telecommunications Regulations (Concessions)—1987. In accordance with the Telecommunications Regulations (Telecommunications and Broadcasting) (Royalties)—2001, HOT Telecom is required to pay annual royalties in respect of its income from in country operator services and HOT Mobile is required to pay annual royalties in respect of its radio telephone services (less payments to another license holder in respect of reciprocal connection or roaming services). The royalties rates that HOT Telecom and HOT Mobile have each been charged to pay stood at 1.75% in 2012 and decreased to 0% from 2013 onwards.

b) In July 2001, the cables companies, including Hot Telecom, entered into a commitment under an agreement with the State of Israel on the subject of a solution to the disputes between the cable companies and the State in respect of the right of each company to operate the existing cables infrastructure in each of the concession areas after the end of the period of the concessions. It was stipulated in the agreement that the State undertakes to waive all of its claims and its rights in respect of the cables infrastructure such that each cables company would be the owner of all of the rights, including property rights, in the cables infrastructure that it held in the area of its concession and that it would have available to it the right to continue to operate it even at the end of the concession period. In consideration for this, it was stipulated that each company was to pay to the State, on an annual basis and for a period of 12 years (commencing on January 1, 2003), its relative share, as determined in the agreement, of an amount that is equivalent to the multiple of certain incomes (as determined in the agreement) of each of the cable companies on a graduated scale (in accordance with the level of income, as aforesaid) at a rate of from 0% to 4%. The relative share of each company can be altered by agreement between the cables companies.

In addition, it was stipulated that each company is to pay approximately 12% of the overall consideration from the sale of operations that are executed through the cables infrastructure for a period of 12 years. It was also stipulated in the agreement that in so far as Hot has received any amount whatsoever in consideration for the issuance of its shares to the public or to an external investor or in consideration for

33—Contractual obligations and commercial commitments (Continued)

the sale of shares of another company from among the cables companies, part of the consideration from the issue or the sale, as aforesaid, is to serve as an advance payment for the payment of the relevant portion of the consideration that remains to be paid under the agreement, in accordance with a formula that will be determined by the parties by agreement. It is further stipulated in the agreement that it shall apply to the cables companies or to any company that is split or merged even if structural changes are made of any sort whatsoever, and accordingly, with the completion of the merger, the agreement applies to Hot as a merged company.

c) In accordance with the Wireless Telegraph Regulations (Licensing, Certification and Levies) −1978, HOT Mobile is required to pay a fixed annual payment for each frequency that it uses. HOT Mobile paid amounts of NIS 29 million and NIS 26 million in respect of the years 2013 and 2012 respectively.

2. Other royalties

a) Within the framework of the Consolidated Group's routine operations in the broadcasting field, the Consolidated Group enters into commitments under arrangements and agreements under which the Consolidated Group pays royalties to various authors' organizations. The amounts of the royalties that have been reflected by the Consolidated Group within this context in the years 2013 and 2012 amounted to NIS 45 million and NIS 42 million respectively.

b) On January 30, 2012 a draft of the Authors and Performers Law (Judgment on Royalties Issues) 2012 (hereinafter, in this section—''The draft law'') was placed before the Knesset. The draft law was intended to create a royalties court by empowering one of the District Court Judges to hear cases on royalties issues, royalty rates and disputes in royalty issues (in other words, a dispute on the issue of royalty rates between a collective management entity and a user or users of a repertoire).

This draft, if it is accepted, may have an implication for the issue of the payment of royalties to various organizations. As of the date of this report, Hot is unable to assess what the impact of the said legislation will be on its business results, if it is passed.

3. A commitment to invest in original productions

In accordance with the provisions of the Communications Law, the principles of communications and decisions by the Council, Hot is required, inter alia, to invest amounts in original productions at a rate of 8% of its annual income from subscription fees. During the course of the years 2012 and 2013 Hot complied with the investment rate that is required, as aforesaid.

It should be noted in this connection that the Communications Law has empowered the Council to determine the rate of investment that is required, and solely that it may not exceed 12% and may not fall below 8% of the annual income from subscriber fees. In this connection, in October 2011 the Council informed Hot that as from the year 2012 its income from subscriber fees, which form the basis for the calculation for the requirement to invest in original productions, will be deemed to include all of the payments that are paid by its subscribers in order to receive broadcasts and to receive services, including income from users' terminal equipment and the installation thereof, whereas in accordance with the policy adopted by the Council up to them regarding the inclusion of income from terminal equipment for the purpose of the calculation of the requirement for original productions was made conditional upon a mechanism that was based on the profitability of this income, and in past years the income from users' terminal equipment and the installation thereof was not included in the basis for the calculation for original productions. On January 12, 2012, the Council determined that Hot will be entitled to complete the amount of the additional investment for the year 2012 over three investment years.

4. Agreement to deploy and maintain a cables network

On January 1, 1990 and on May 1, 1989, Tevel International Transmission for Israel Ltd. and HOT Gold & Co. (hereinafter together—The cable companies) entered into commitments under agreements for the provision of planning, installation and maintenance services of the cables network with the Bezeq

33—Contractual obligations and commercial commitments (Continued)

company (the provisions of both of the two said agreements are similar, and they will hereinafter in this section be called—the agreement). This agreement was endorsed to HOT Telecom as part of the merger agreement.

In accordance with the agreement, Bezeq, Tevel and HOT Gold planned the cables network, inter alia, based on the Bezeq company's available infrastructure, which was deployed in the areas of the concession at the time of the signing of the agreement. Tevel and HOT Gold supplied the Bezeq company with the base equipment (as defined in the agreement) that comprises the cables network whereas the Bezeq company supplied the additional equipment (as defined in the agreement) that is used for setting up the cables network.

In accordance with the agreement, a cables network was set up and deployed in a number of major cities across Israel, and the Bezeq company conducts the routine maintenance of the cables network and also provides malfunction repair services. The provisions of the agreement also relate, inter alia, to the possibility of the expansion of the cables network to additional facilities, the connection of new houses and of new neighborhoods.

It is determined in the agreement that it will remain in force for the length of the period of the concession, and that it will continue to be in force if the concession or the rights in the concession are transferred or afforded to another, in whole or in part and directly or indirectly, during the course of the original concession period and during the extension of that period or after the end of it. The Bezeq company is only entitled to cancel the agreement in respect of a breach for which notice has been given in writing.

The total of the expenses recorded in Hot's accounting records for the network services payable to the Bezeq company in the years 2013 and 2012 amounted to NIS 47 million and NIS 48 million, respectively.

It should be noted that from time to time, during the routine course of business, disputes arise in connection with the implementation of the agreement, inter alia in respect of the division of the costs that are involved in the performance of some of the services that are supplied by the Bezeq company under the agreement, however the parties are continuing to operate in accordance with the agreement. It is further noted that over the course of the years additions have been signed to the agreement, primarily in connection with enhancement and upgrading work on the cables network.

5. Commitments to lease assets

The Consolidated Group has commitments under agreements for the leasing of buildings and motor vehicles for various periods up to the end of the year 2020. The minimal future rental fees in respect of the rental contracts as of December 31, 2013, exclusive of the option period, are as follows:

	EUR Million December 31, 2013	EUR Million December 31, 2012
2014	37.3	37.8
2015	30.2	30.0
2016	19.7	24.4
2017	10.1	17.5
2018 and thereafter	7.3	61.7
	104.6	**171.3**

6. On July 19, 2011, Hot's Board of Directors approved a commitment under agreements for the execution of the upgrading of the fiber optic infrastructure (FTTX). In accordance with the said commitment, HOT Telecom will purchase advanced optic equipment, work and services from third parties, in order to upgrade the infrastructures, including maintenance services, in accordance with the deployment and the timetables that will be agreed upon between the parties from time to time. The upgrading of the infrastructure, as aforesaid, will enable the expansion of the traffic capacity on the network, in favor of the supply of enhanced VOD services, the increasing of the number of channels that the Consolidated Group can offer to its subscribers, faster internet services and it will also enable Hot to

33—Contractual obligations and commercial commitments (Continued)

deal with increased demand for traffic capacity on the network in the future, which is expected to arise as a result of increased uses and applications that require a considerable band width.

7. On May 27, 2010, a facility agreement was signed between HOT Mobile and Motorola for the purchase, licensing and installation of the infrastructure equipment (hardware and software) which is required in order to operate HOT Mobile's iDEN network. The agreement is in force for a period of five years from the time that it was signed (hereinafter -the initial period) and it will be renewed for additional periods of one year each (or for a longer period that is agreed between the parties), unless a party to the agreement gives notice to the other party, 90 days before the end of the initial period, or one of the extension periods, as the case may be, of its desire to terminate the commitment. The agreement arranged the commitment between the parties for the purpose of the execution of the work orders that will be presented to Motorola, from time to time, by HOT Mobile for the purpose of the supply of equipment or software for the iDEN network.

Within the framework of the agreement, Motorola has undertaken that during the initial period it will hold an inventory of equipment that will enable it to immediately supply the components that are required for the proper functioning of HOT Mobile's iDEN network, and so that it will be capable of supplying HOT Mobile with the maintenance services for the infrastructure equipment and the software that are required to operate the network for a period of seven years from the signing of the agreement, subject to the purchase of the said maintenance services by HOT Mobile.

In consideration for Motorola's commitment to sell the equipment and the licenses to HOT Mobile at the prices that are denoted in the agreement, HOT Mobile has made a commitment to purchase the infrastructure equipment and the software that is required to operate the iDEN network from Motorola alone during the period of the agreement.

8. As part of the commitment with Motorola in respect of the infrastructure for the iDEN network, HOT Mobile has signed on a system maintenance agreement with Motorola as well as on an agreement for the maintenance of the system's hardware, which arrange the repair of malfunctions and the provision of support by Motorola for HOT Mobile's iDEN network.

In December 2011, the system maintenance agreement was extended for an additional period of three years, until the end of 2014.

9. On May 26, 2010, as part of the sale of the control in HOT Mobile to Altice, HOT Mobile entered into a commitment under an agreement with Mobility for the purchase of terminal equipment that supports the iDEN technology.

The agreement is in force for a period of 5 years and it will be renewed for additional periods of one year each time unless a party to the agreement gives notice to the other party, 60 days before the end of the initial period, or one of the extension periods, as the case may be, of its desire to terminate the commitment.

The agreement arranged a mechanism for the ordering and supply of the terminal equipment (including quarterly forecasts by HOT Mobile) with HOT Mobile being responsible for the importing of the terminal equipment from abroad.

The supplier has received an option and the right of first refusal for the repurchase from HOT Mobile of all of the terminal equipment that it may be holding at the time of the termination of the agreement, in accordance with a mechanism that was set in the agreement.

10. On June 16, 2011, HOT Mobile entered into a commitment with Nokia Siemens Networks Israel Ltd. (hereinafter—the supplier) for the setting up of the infrastructure for HOT Mobile's new network.

In accordance with the terms of the agreement, the supplier will plan and set up the new network for HOT Mobile as a turnkey contractor. In the first stage, which was completed in May 2012, the supplier completed the setting up of the systems that are required for the purpose of operating the new system with a coverage of approximately 30%, which is in excess of the extent of the coverage which HOT

33—Contractual obligations and commercial commitments (Continued)

Mobile is required to provide (20%) in accordance with the terms of the tender within two years from the time of the receipt of the new radio telephone license. After the completion of the first stage, HOT Mobile has expanded and is expanding the new network, both from the perspective of the coverage and also from the perspective of the LTE capability.

The agreement is in force for 15 years, and it contains warranties for the proper functioning of the components of the system for a period of two years from the time of the handing over of each component in accordance with the agreement, as well as warranties for the entire period of the agreement that the system will operate in accordance with the system requirements that HOT Mobile placed (in terms of availability, functioning and capacity), subject to their being a maintenance agreement in force between the parties.

In consideration for the completion of the first, second and third stages in accordance with the agreement and the performance of all of the supplier's commitments by the year 2013, the Consolidated Group will pay the supplier an amount of 52 million Dollars, which amount does not include the expansion of the coverage and the capacity over and beyond what is stipulated in the agreement.

11. In 2013 and at the beginning of 2014, a number of additions to the agreement were signed, within the framework of which the payments that were supposed to be paid under the agreement have been deferred to a later date, subject to HOT Mobile's signing on debt notes, with Hot acting as guarantor. Within this framework, HOT Mobile has signed on confirmation for the final receipt of significant portions of the said project.

12. On October 27, 2011, an agreement was signed between HOT Mobile and Comverse Ltd. (hereinafter—Comverse), in accordance with which Comverse will supply Hot with a BSS system (a billing system that is integrated with the customer relations management (CRM) system) (hereinafter—The system) and Comverse will also supply Hot with hardware, software and services, including the operation and maintenance of the system The agreement is for a period of five years. In consideration for Comverse's services, HOT Mobile will pay an amount of approximately 12.5 million US Dollars. In January 2012, the parties signed on an addendum to this agreement, in accordance with which Comverse is committed to allocate seven additional employees to be available for the project (instead of the manpower that Hot had to make available for the project), for a payment of 500,000 US Dollars.

13. On May 30, 2012, HOT Mobile International Communications Ltd (hereinafter—HOT International), a wholly owned subsidiary of HOT Mobile's, received an operator's license for the provision of international telecommunications services (hereinafter—The international license). On January 6, 2013 HOT International received operational approval for starting to provide international telecommunications services in accordance with the international license and on January 8, 2013, notification of the opening of the services was sent to all of the operators.

14. On November 11, 2013, Hot's Audit Committee approved Hot's commitment under a sub-leasing agreement with the Middle East Company Ltd. (hereinafter—the lessor) for the sub-leasing of a plot of land in the Jaffa Port, which Hot is leasing (hereinafter—the leased property), retroactively, as from July 2013.

The leased property will be used by the tenant, which is a company that produces broadcasts for a foreign news company, which is 85% owned by Mr. Patrick Drahi, the ultimate controlling interest in Hot.

The lease fees that will be paid to Hot in respect of the leased property have been set in accordance with the rental fees that Hot pays in respect of the property and under the same payment terms (back to back), with the addition of a monthly amount in respect of: (1) the tenant's relative share of the municipal taxes, electricity, water, security and cleaning expenses (back to back terms to those paid by Hot) and (2) adaptations to the leased property that Hot has executed at its own expense.

It is determined in the rental agreement that in any case in which the agreement ends before the end of the rental period, the tenant shall pay Hot the balance of the payments in respect of the adaptations that

33—Contractual obligations and commercial commitments (Continued)

Hot made in the leased property, as discounted using a real annual interest rate that has been set in the agreement.

15. On November 8, 2013, HOT Mobile signed on agreements with Partner Communications Ltd. (hereinafter—Partner), which are subject to the receipt of all of the approvals that are required, as detailed below: HOT Mobile and Partner will set up a limited partnership, which will hold, develop and operate a single advanced cellular communications network, for both of the companies, each of which will hold half of the rights in it. In accordance with the agreement, each of the parties will continue to hold and to operate its core of the network separately and provide cellular communications services, including the marketing and the selling of such services, to its customers alone.

The agreement arranges the management of the joint network and its development, the manner of the management of the partnership, including a mechanism for the appointment of a board of directors, the resolution of disagreements, the bearing of the costs of upgrading the network and so on.

The agreement will be in force for a period up to December 31, 2028, and thereafter, the agreement will be extended automatically for additional periods of 5 years each, unless either of the parties gives notice of its desire to terminate the agreement by giving notice in advance of 24 months before each automatic renewal. Despite the aforesaid, as from the end of a period of 8 years from the entry of the agreement into force, it may be cancelled by either of the parties, in accordance with their own judgment and by giving two years notice in advance from that time. The agreement also sets a mechanism for the separating of the parties in the event of the termination of the agreement.

In consideration for the agreement, HOT Mobile will pay a non-recurring amount, which is to be paid by the beginning of 2017, and thereafter, each party will bear half of the capital investments that are required to set up and to upgrade the joint network and the bearing of the operating expenses for the joint network will be in accordance with a mechanism that is set in the agreement and which is based, inter alia, on the volume of the data traffic that each party consumes from the joint network.

As an interim stage and until the receipt of the approvals that are required under the law, Partner will extend to HOT Mobile the right to use its cellular communications network for the purposes of the provision of brad national cover to its customers. The services under the agreement will apply after the completion of the preparations and in accordance with any agreement or regulation.

In the light of the commitment with Partner in connection with the in-country roaming services, HOT Mobile and Pelephone Telecommunications Ltd. (with which HOT Mobile had entered into an exclusive agreement in the past for in-country roaming services up to December 31, 2014) reached agreement regarding the cancellation of the exclusivity clause.

16. In the reporting period, the management of HOT Mobile Ltd. (hereinafter—HOT Mobile), made a decision regarding the vacation of its offices at Airport City, in respect of which there is a long-term rental contract with Airport City, for the period up to and including 2019. As a result of this decision, Hot has recognized losses of NIS 34 million (EUR 7.1 million) in the reporting period, which have been recorded under other expenses, reflecting the rental expenses, taxes and amortization of leasehold improvements, which in HOT Mobile's assessment are irrecoverable, and which meet the definition of anonerous contract.

17. Capitalized leasing rights on land from the Israel Lands Authority

Capitalized leasing rights on land from the Israel Lands Authority over an area of 20,713 square meters on which the Consolidated Group's buildings are located. The amount that is attributed to the capitalized rights is presented as a prepaid expenses in respect of operating leases in the balance sheet and is amortized over the period of the leases. See also Note 2K. The lease periods end in the years 2021-2045.

C. Guarantees and liens

1. As collateral for Hot's commitments vis-à-vis the parent company under the credit agreement with it, the following charges have been placed

33—Contractual obligations and commercial commitments (Continued)

a) A floating charge on Hot's assets.

b) A fixed charge on the shares in the subsidiary companies.

c) HOT Telecom has given a charge on some of its assets.

The said charges are in an unlimited amount, vis-à-vis Hot, the investee partnership—HOT Telecom and the subsidiary company—HOT Net, jointly and severally.

2. As collateral for the commitments of Hot, the investee partnership HOT Telecom and the subsidiary company HOT Net, first ranking floating charges have been placed in unlimited amounts in favor of the borrowers, on all of the assets and the rights belonging to debtors of companies in the Consolidated Group and a fixed charge on the goodwill and the unpaid share capital of the Companies in the Consolidated Group.

3. As collateral for Hot's commitments in respect of the royalties agreement, as set forth in section B(1) above, a second ranking floating charge has been placed in favor of the State.

4. As collateral for the Consolidated Group's commitments, as determined in the Consolidated Group's licenses and in the decisions by the Director and the Council, the Consolidated Group has issued a number of guarantees, as follows:

a) Bank guarantees to the Ministry of Communications, in respect of the national operator license that was granted to HOT Telecom amounting to 8.4 million Dollars, in force until December 2017 and December 2025.

b) Guarantees in an amount of NIS 34 million (index-linked) to the Council in respect of the broadcasting license, which are in force until May 2015.

5. HOT has given a number of bank guarantees to various bodies in an overall amount of NIS 32 million.

6. Guarantees for HOT Telecom and HOT Mobile

a) The Consolidated Group has extended guarantees in a cumulative amount of 22 million Dollars as collateral for payments by HOT Telecom to the Cisco company.

b) The Consolidated Group has extended a guarantee in an amount of NIS 246 million (index-linked) as collateral for HOT Telecom's commitments vis-à-vis an interested party with which it has signed a rental agreement.

c) The Consolidated Group has extended a guarantee in an amount of 36 million Dollars as collateral for HOT Mobile's commitments to Bank Crédit Agricole in connection with transactions with suppliers of equipment.

d) The Consolidated Group has extended a guarantee in an amount of NIS 11 million as collateral for the commitments of HOT Telecom to various bodies.

7. On May 23, 2013, Hot signed on a credit agreement with Bank Discount Le'Israel Ltd., the First International Bank Le'Israel Ltd. and HSBC Bank PLC (hereinafter—the banks and the credit agreement, respectively).

The amounts of the credit are divided into a number of facilities: A working capital facility, which may be exploited by the drawing down of loans in an amount of up to NIS 200 million and a credit facility for guarantees in an amount of up to NIS 105 million.

The collateral that exists under the financing agreement that Hot signed with Altice Financing S.A., which is a related party of Hot, will serve as collateral, together with the creation of new, additional liens on Hot's holdings in subsidiary companies and partnerships, except for HOT Mobile. As of the balance sheet date, Hot has taken up a guarantee in an amount of NIS 84 million from these facilities, however it has not taken up credit for working capital from these facilities.

33—Contractual obligations and commercial commitments (Continued)

33.2 Cabovisao commitments

33.2.1 Contingent assets

During the year ended December 31, 2013 and the analysis of the Decree-Law n º 123/2009 of 21 May, Cabovisao made the decision not to pay any fees charged by municipalities, in addition to TMDP (Fees due for rights and charges related to the deployment of, passage within or crossing of systems, equipment and other resources of providers of publicly available electronic communications networks and services at a fixed location, of a public or private municipal domain). On December 31, 2013, Cabovisao had outstanding claims against several municipalities, totaling EUR 2.6 million. To present date, the Company received EUR 0.4 million from sixteen municipalities, and executed receivable plan of EUR 1.7 million for the next three years.

33.2.2 Contingent liabilities

a) Bank guarantees

	December 31, 2013
	In millions of euros
Tax Authority	9.6
City Council	0.9
Third Parties	0.1
Total	10.6

b) Commitments with third parties to add services to be provided in future years:

On December 31, 2013, the commitments with third parties to tangible assets and services to be provided in future years with an amount to approximately EUR 2.7 million Euros and EUR 65.7 million respectively.

c) Real guarantees:

During the year ended December 31, 2013, considering the refinancing and debt restructuring operations performed by Altice Group, headed by Altice VII S.à r.l., Cabovisao has signed a collateral agreement which involved the pledge of some Cabovisao's bank accounts, as well as a pledge on the Cabovisao's shares (representing 100% of Cabovisao's share capital and respective voting rights).

d) Other contingent liabilities:

As a result of the Cabovisao's decision to do not pay any taxes charged by municipalities (since September 2010), the municipality of Almada initiated a litigation process, regarding the municipality taxes charged for the period between 2006 and 2009, in the amount of 595.000 Euros. Until the present date, there are no subsequent deliberations. The Board of Directors understands that the final outcome will be favorable to Cabovisao, based on the legal counsels' opinion.

In addition, there are several legal proceedings, initiated by third parties, in particular claims by several suppliers, related to the supply of services and equipment, in the amount of approximately 174.000 Euros. Until the present date, Cabovisao has not recognized any provision, since it is Board of Directors understanding that the final outcome will be favorable to the company, based on the legal counsels' opinion.

33—Contractual obligations and commercial commitments (Continued)

33.3 Coditel Holding commitments

As of December 31, 2013, off balance sheet commitments include:

The shares, bank accounts and receivables of Coditel Brabant S.p.r.l. and Coditel S.à r.l. have been pledged in the framework of the Coditel facility. Coditel Holding is not allowed to pledge these assets as security for other borrowings or to sell them to another entity.

33.4 Altice Six

Altice Six has an outstanding commitment to buy an additional 10% stake in the Numericable Group S.A. from other major shareholders. This commitment, signed on November 7, 2013, amounted to a total of EUR 317 million for the year ended December 31, 2013. An additional price is due to be paid in the second quarter of 2014, which is based on the evolution of the share price of Numericable Group S.A. between the offering price at IPO and the price on the date of the transaction.; as of March 17, 2014 the additional price amounts to EUR 23.9 million.

33.5 Others

The shares, bank accounts and receivables of Altice VII and its following subsidiaries Altice Finco S.A., Altice Financing S.A., Altice Holdings S.à r.l., Altice West Europe S.à r.l., Altice Portugal S.A., Altice Carribean S. à r.l., Cool Holdings LTD S.A., H.Hadaros 2012 LTD., Hot Telecommunications System LTD, Cabovisao S.A., Altice Blue Two S.A.S. and its subsidiaries, Coditel Holding S.A., Winreason S.G.P.S and its subsidiaries have been pledged for the issued Senior Secured Notes and the Altice financing term loan. The Company is not allowed to pledge these assets as security for other borrowings or to sell them to another entity.

Altice Financing S.A. has access to two super senior secured revolving credit facilities amounting to a total of USD 80 million and EUR 60 million respectively. In addition to these facilities, it also has access to a guarantee facility of EUR 75 million. As of December 31, 2013 the revolving credit facilities remain undrawn. EUR 8.4 million were drawn down on the guarantee facility, and recorded in the accounts of Cabovisao. All pledges applicable for the senior secured notes and the term loan are also applicable to these facilities.

34—Statutory Auditors' fees

In 2013, an amount of EUR 3.8 million was paid to various networks affiliates of the Consolidated Group's auditors, split mainly between EUR 1.4 million for audit services, EUR 2.0 million for assurance services and EUR 0.4 million for non-audit services (tax and consultancy).

35—Going concern

During the year ended December 31, 2013, the company had a net current asset position of EUR 854.2 million (mainly due to current restricted cash of EUR 1,242.7 million), a net profit of EUR 49.6 million (down from a net loss of EUR 180.2 million in FY12), positive cash flow from operations of EUR 438.9 million and negative working capital of EUR 198.4 million. The positive cash flow from operations balance was mainly due to strong earnings growth and EBITDA generation. The net working capital of EUR 198.4 million is mainly driven by trade receivables and payables. The net profit recorded in FY13 was mainly driven by the recognition of a gain on the de-recognition of assets in the accounts of Altice Six related to the public offering of Numericable Group (See note 27). The negative working capital position is structural and follows industry norms. Customers generally pay subscription revenues early or mid-month, with short DSOs (Days of Sales Outstanding) and suppliers are paid in the beginning of the following month, thus generating a negative working capital, as evidenced by the difference in the level of receivables and payables (EUR 194.0 million vs. EUR 392.4 million). Payables due the following month are covered by revenues and operating cash (if needed). As of December 31, 2013, the company had few short term loan payments (< 1y), and long term debt was refinanced in June 2013. Despite the

35—Going concern (Continued)

net current liability position, Management is of the view that the company will continue to act as a going concern for 12 months from the date of approval of these financial statements based on the following:

The Consolidated Group has a strong track record of generating positive operating income before amortisation and depreciation and generated strong positive operating cash flows in 2013 (EUR 438.9 million). Operating income before D&A amounted to EUR 518.0 million, an increase of 28.5% compared to FY12, thus reaffirming management's ability to drive profits in the different operating companies.

The Consolidated Group had healthy unrestricted cash reserves at the end of 2013 (EUR 61.6 million vs. EUR 129.7 million in 2012), which would allow it to cover any urgent cash needs. Additionally, the Consolidated Group had access to a revolving credit facility (''RCF'') of up to USD 80.0 million and EUR 63.8 million (EUR 124 million equivalent), as well as access to a guarantee facility of up to EUR 75 million (of which EUR 8.4 million were drawn in FY2013 in order to unblock restricted cash at Cabovisao).

The Consolidated Group had a net equity position of EUR 95.3 million as of December 31, 2013, a decrease of 66.0% compared to EUR 280.0 million for the year ended December 31, 2012. The decrease in the equity position was mainly driven by accounting adjustments related to losses made on the acquisition of minority interests from non-controlling shareholders recorded at Altice VII. It is management's view that these acquisitions have a strategic founding and will allow the Group to better integrate, absorb and utilize the cash generated by the concerned entities. In addition, Altice Six had enough reserves to absorb such non-cash losses and maintain a positive net equity position.

In addition to the points enumerated above, the Group has implemented a new budgeting exercise, with monthly account reviews with CFOs of operating companies to track budget accuracy. This exercise is complemented by a mid-year reforecast based on real first semester numbers.

Management also tracks operational key performance indicators (KPIs) on a weekly basis, thus closely tracking top line trends very closely. This allows management and local CEOs to ensure proper alignment with budget targets and respond with speed and flexibility to counter any unexpected events and ensure that the budgeted targets are met.

In the view of the initial public offering of the newly formed company Altice S.A., the new direct controlling shareholder of Altice VII Sà r.l., it was decided to convert all existing subordinated debt instruments issued by Altice VII and Altice Six and subscribed by Next L.P.., into share capital, before the contribution of Altice VII and Altice Six to Altice S.A. Thus, YPFECs and ALPECs issued by Altice VII, and YFPECs issued by Altice Six were converted into equity at their nominal value, totalling EUR 181.5 million (EUR133.3 million at Altice VII and EUR 48.2 million at Altice Six).

36—Events after the reporting period

Acquisition of the Mobius Group

On October 19, 2013, Altice Blue Two (a subsidiary of Altice VII) entered into an agreement pursuant to which Altice Blue Two will acquire the Mobius Group (the ''Mobius Acquisition''). The Mobius Group is a telecommunications operator in the Overseas Territory of La Reunion, providing Internet access to professional clients under the ''Mobius Technology'' brand and double and triple play services based on xDSL technology to residential customers under the ''IZI'' brand. The consummation of the Mobius Acquisition occured on January 15, 2014 and was financed via the super senior revolving credit facility that the company has access to. A total of EUR 20.5 million was drawn from the RCF to finance the acquisition. Pursuant to an investment agreement dated October 19, 2013, certain managers of the Mobius Group (the ''Mobius Managers'') have agreed to reinvest a portion of the proceeds received from the Mobius Acquisition (approximately EUR 4.6 million) in Altice Blue Two. As a consequence of such reinvestment, the equity interest held by Altice Caribbean in Altice Blue Two would be reduced to approximately 77%. as of the date of this report, an agreement had been reached with the Managers of

36—Events after the reporting period (Continued)

Altice Blue Two to transfer their minority holdings in Altice Blue Two into shares of Altice S.A. (please see below for more details).

Conversion of Altice VII and Altice Six subordinated debts

On January 31, 2014, Next L.P. converted all subordinated debt instruments held against Altice VII S.à.r.l, and Altice Six S.A. before the planned initial public offering of Altice S.A., in exchange for common shares in the newly listed entity. All outstanding YFPECs and ALPECs issued by Altice VII were converted at their nominal value of EUR 133.2 million, which was directly attributed to the net equity of the company. All outstanding YFPECs issued by Altice Six were converted into common shares of Altice Six S.A. at their nominal value of EUR 48.2 million.

Initial public offering

On January 31, 2014, Altice S.A. listed its shares in an initial public offering on Euronext Amsterdam. The company raised capital in two steps, first through a primary offering of new shares of the listed company, for EUR 750 million and a secondary offering, consisting of the sale of shares held by Next L.P. in Altice S.A., for a total amount of EUR 555 million. The shares were traded at opening at an offer price of EUR 28.25. Additionally, an over-allotment option, for the maximum authorised amount (upto 15% of the total shares offered), was exercised by Altice S.A. Following the IPO, 25.6% of the share capital of the company is publicly traded, with the rest held by Next L.P and certain Managers. The shares are traded on Euronext Amsterdam with the ticker ATC:NA.

Change in minority interests of Altice Blue Two

In January 2014, the Company entered into discussion with the management of Outremer Telecom (''OMT Managers''), holders of a 23% stake in Altice Blue Two, the holding company controlling Outremer Telecom, WSG and MTVC, to exchange their existing shares in Altice Blue Two S.A.S against shares in the newly floated mother company of Altice VII, Altice S.A.

As per the agreement, which was completed and signed on March 13, 2014, the OMT Managers contributed all their shares held in Altice Blue Two and OMT Ocean 3 (an investment vehicle held by certain members of OMT's senior management), for a base value of EUR 55.1 million and two separate earn out clauses that would become applicable only upon the achievement of certain operational and financial targets and the settlement of certain lawsuits.

Acquisition of the Tricom Group

On March 12, 2014 the Group obtained control of Tricom S.A. and Global Interlink Ltd. (together, ''Tricom''), a leading telecommunications operator in the Dominican Republic, providing (i) cable and xDSL-based multiple-play services and stand-alone pay television, broadband Internet and fixed-line telephony services and (ii) 3G and 4G mobile telephony services relying on its mobile network. This acquisition enables the Group to expand its footprint in the Carribean and more especially in the Dominican Republic. Control was obtained upon approval from Indotel, the Dominican Republic antitrust authority. As of the date of the transfer of the shares, the Group acquired 96% of the total equity in Tricom S.A. and 92% of the outstanding interests in Global Interlinks.

For the year ended December 31, 2013, Tricom would have contributed EUR 158.3 million to revenue and EUR 19.9 million to operating profit to the Group's results, if it had been purchased on January 1, 2013 (these figures are based on unaudited US GAAP figures).

The following summarises certain of the major classes of consideration transferred and the provisionally determined amounts of identifiable assets and liabilities assumed at the acquisition date:

Total consideration paid to the vendors for the shares of Tricom amounted to €291.3 million, using the proceeds raised in December 2013.

36—Events after the reporting period (Continued)

The total value of assets transferred in consideration for the values mentioned above amounted to EUR 145.7 million, comprising mainly of intangible assets for a net value of EUR 21.0 million, property, plant and equipment for a total value of EUR 133.8 million and trade receivables for a total amount of EUR 16.5 million. Total liabilities amounted to €97.9 million, comprising of EUR 45.1 of non-current liabilities and EUR 52.8 million of current liabilities. The residual value of EUR 145.6 million was recognised provisionally as goodwill (these figures are based on unaudited US GAAP figures).

The values of the assets and liabilities assumed have been determined on a provisional basis until the Group finalizes its assessment of the fair valuation of the identifiable assets and liabilities assumed and shall complete this exercise within twelve months from the acquisition date.

Goodwill has been recognised as a result of the acquisition as follows:

Total consideration transferred	EUR 291.3 million
Fair value of identifiable assets and liabilities	EUR (145.7) million
Goodwill	EUR 145.6 million

Acquisition of additional shares in Numericable

On November 18, 2013, Altice Six entered into an agreement with other major shareholders in the Numericable group to purchase an additional 10% stake, thus increasing its shareholding to 40% (inclusive of the 2.6% option provided to other shareholders and described elsewhere in this report). This acquisition triggered a change in control of the Numericable Group. The transaction was consummated on February 4, 2014, with the primary proceeds from Altice S.A.'s IPO and thus Altice S.A. became the controlling shareholder of Numericable S.A.

Stock Options provided to Senior Management and Executive Directors

Senior management and Executive Directors of the Company are eligible to participate in the Stock Option Plan (''SOP'') at the discretion of the Remuneration Committee.

Members of the management team (including the Executive Directors) will be granted options on Admission to acquire Shares at the Offer Price. These options will vest and become exercisable in tranches of 50%, 25% and 25% respectively, on the second, third and fourth anniversary of Admission, for a period of seven years (or if earlier, ten years from the initial grant) after which time they will lapse. It is intended that no further options will be granted to participants who were granted options on Admission until the last tranche of the initial options have vested, however options may be granted to new members of the management team.

Options with an aggregate value of up to €250 million will be granted on Admission with an exercise price equal to the Offer Price and further options with an aggregate value of up to €100 million will be made available for new hires. Therefore, up to 6.9% of the Company's issued share capital will be allocated to satisfy these option grants.

Clawback and malus will apply to options granted under the SOP, such that options may be adjusted or reduced (even to nil) prior to exercise, and any exercised options reimbursed to the Company, in circumstances in which the Remuneration Committee considers appropriate, including material misstatement of financial results, failure of risk management, reputational damage, fraud or negligence.

Participants who leave the Group by reason of death, injury, ill-health or, for any other reason, if the Remuneration Committee so determines, will retain any vested options. Unvested options will vest on cessation, but will be pro-rated for time (unless the Remuneration Committee determines otherwise). Participants who leave the Group *for* any other reason will forfeit any outstanding unexercised options, unless the Remuneration Committee determines otherwise. Unvested options will normally vest in full on a change of control of the Company.

36—Events after the reporting period (Continued)

Contribution in kind by Valemi Corp S.A.

On October 4, 2013, Altice VII S.à r.l., a direct subsidiary of Altice S.A., acquired a controlling stake in two content companies, MCS S.A.S and SportV S.à r.l. from Altice IV and Valemi Corp S.A. This transaction gave rise to a vendor loan, held by Valemi Corp. S.A. against Altice VII S.à r.l. As part of the pre-IPO restructuring, Altice S.A. and Valemi Corp reached an agreement under which Valemi contributed to the Company a vendor loan payable by Altice VII against the issue of Ordinary Shares. The total amount of the vendor loan held by Valemi was EUR 6.7 million at the time of admission.

Acquisition of SFR

On March 14, 2014, Altice S.A. and Vivendi S.A, the sole shareholder of SFR, France's second largest mobile operator, entered into exclusive talks to negotiate a potential business combination between Numericable and SFR.

Altice S.A.

Altice S.A.
("Altice Group")

INDEX

To the Board of Directors of
Altice S.A.
3, boulevard Royal
L-2449 Luxembourg

REPORT OF THE REVISEUR D'ENTREPRISES AGREE

We have audited the accompanying combined financial statements of Altice S.A. (the ''Company''); the successor entity of Altice Six S.A. and Altice VII S.à r.l. (collectively the ''Combined Group'') in the context of the contemplated initial public offering of the shares of the Company, which comprise the combined statements of financial position as at December 31, 2012, 2011 and 2010, the combined statements of income, comprehensive income, changes in equity and cash flows for each of the three years then ended, and a summary of significant accounting policies and other explanatory information (collectively the ''Combined Financial Statements''). The Combined Financial Statements have been prepared by the Board of Directors in accordance with the basis of preparation as described in the note 1 thereto, for the purposes of meeting the requirements of EU Regulation (EC) 809/2004 that relate to the inclusion of historical financial information within a prospectus.

Responsibility of the Board of Directors for the Combined Financial Statements

The Board of Directors is responsible for the preparation and fair presentation of the Combined Financial Statements in accordance with International Financial Reporting Standards as adopted by the European Union, and for such internal control the Board of Directors determines is necessary to enable the preparation of Combined Financial Statements that are free from material misstatement, whether due to fraud or error.

Responsibility of the réviseur d'entreprises agréé

Our responsibility is to express an opinion on the Combined Financial Statements based on our audit. We conducted our audit in accordance with International Standards on Auditing as adopted for Luxembourg by the *Commission de Surveillance du Secteur Financier*. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the Combined Financial Statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the Combined Financial Statements. The procedures selected depend on the *réviseur d'entreprises agréé*'s judgment including the assessment of the risks of material misstatement of the Combined Financial Statements, whether due to fraud or error. In making those risk assessments, the *réviseur d'entreprises agréé* considers internal control relevant to the entity's preparation and fair presentation of the Combined Financial Statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the Board of Directors, as well as evaluating the overall presentation of the Combined Financial Statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the Combined Financial Statements give a true and fair view of the combined financial position of the Combined Group as of December 31, 2012, 2011 and 2010, and of its combined financial performance and combined cash flows for each of the three years then ended in accordance with International Financial Reporting Standards as adopted by the European Union.

Basis of accounting

Without modifying our opinion, we draw attention to the disclosures in note 1 to the Combined Financial Statements, which describes the basis of preparation utilized in preparing the Condensed Combined Financial Statements. The Combined Financial Statements are prepared for the purposes of meeting the requirements of EU Regulation (EC) 809/2004 that relate to the inclusion of historical financial information within a prospectus, and may not be suitable for any other purpose. We also draw attention to note 1 to the Combined Financial Statements which provides a description of the accounting method utilized for the purposes of combining the individual elements of the Combined Group; these being under common control; in the absence of specific guidance within International Financial Reporting Standards as adopted in the European Union.

1—Basis of preparation of the combined financial statements

1.1 Presentation of the Two Groups forming Altice Group

Altice S.A.

Altice S.A. (the ''Company'') is a limited company incorporated in the Grand Duchy of Luxembourg whose head office is in Luxemburg and has been formed on January 3, 2014. Upon admission of the Company's shares on Euronext Amsterdam, the Company shall receive the contribution of two entities incorporated in the Grand Duchy of Luxembourg: Altice Six S.A. and Altice VII S.à r.l.. Altice Six S.A. and its subsidiaries are hereafter referred to as ''Altice Six'' and Altice VII S.à r.l. and its subsidiaries are hereafter referred to as ''Altice VII'' or ''Altice VII Group''. The Company shall hence become the successor entity of Altice Six and Altice VII (collectively the ''Predecessor Entities'').

Altice Six

As at approval date, Altice Six holds shares in Numericable Group, a French group listed on Euronext Paris. Numericable Group is a French cable television service provider. Its core products are premium digital television packages, which are available to households in areas that are triple-play enabled. They also provide French consumers with broadband Internet, fixed telephony, and mobile telecommunications services.

Additionally to the Business To Consumer (''B2C'') described above and through its main operational entity, Completel S.A.S., Numericable Group operates the largest alternative fiber-to-the-office (''FTTO''), network in France, constituting the third alternative Digital Subscriber Line (''DSL'') network in France. Completel SAS provides business customers with a comprehensive service offering, which includes data transmission, very high speed Internet, telecommunications services, convergence and mobility solutions, through fiber and DSL networks.

Altice VII

Altice VII offers a variety of services over its cable and mobile infrastructure, including, but not limited to, pay television, broadband Internet access, fixed-line telephony and mobile telephony to residential customers, and, to a lesser extent, corporate customers, depending on the country. Available cable-based service offerings depend on the bandwidth capacity of its cable networks and whether they have been upgraded for two-way communications. Where possible, Altice VII Group intends to deploy the same technologies and equipment across its footprints to generate economies of scale and common knowledge. In addition, the Altice VII group companies aim at sharing skills and best practices across the various operations of Altice VII Group.

Television service offerings include basic and premium programming, and, in most markets, incremental product and service offerings such as enhanced pay-per-view programming, including video-on-demand (''VoD'') and near-video-on-demand (''NVoD''), digital video recorders (''DVR''), high definition (''HD'') television services and, in certain areas, exclusive content, purchased or produced. The Group tailors its basic and premium channel line-up to each country of operation according to culture, demographics, programming preferences and local regulation. The Altice VII Group also offers broadband Internet access services and fixed-line telephony in all its footprints. It also owns and operates mobile infrastructures in certain geographies (French Overseas Territories) and offers mobile services through an MVNO (Mobile Virtual Network Operator) arrangement in Belgium.

1.2 Description of the context

Altice Six and Altice VII (collectively the ''**Two Groups**'' or the ''**Combined Group**'') are currently entities under common control. The Two Groups are ultimately controlled by Patrick Drahi. The purpose of the combined financial statements is to present a fair depiction of the financial condition, and the assets and liabilities of the Two Groups, using historical bases in the assets, liabilities and results of operations and cash flows for each period presented in the combined financial statements.

1—Basis of preparation of the combined financial statements (Continued)

Accordingly, the combined financial statements reflect the historical assets, liabilities, revenues, expenses and cash flows that were directly related to the sub-groups, Altice Six and Altice VII, which are separate legal groups at December 31, 2012, 2011 and 2010.

The combined financial statements have been prepared for the three-year period ended December 31, 2012, 2011 and 2010 (collectively the ''Combined Financial Statements'') in conjunction with the contemplated initial public offering of the shares of Altice S.A. (the **''Offering''**). It is expected that Altice S.A. will acquire 100% of the share capital of Altice VII and Altice Six (the **''Combination''**) in order to reflect the combination of the Two Groups.

1.3 Statement of compliance

The combined financial statements of Altice Group include a combined statement of financial position as of December 31, 2012, 2011 and 2010, a combined statement of income, a combined statement of comprehensive income, a combined statement of cash flows and a combined statement of changes in equity for each of the three years in the period ended December 31, 2012 and the underlying Notes. The combined financial statements have been prepared in compliance with International Financial Reporting Standards (**''IFRS''**) as published by the International Accounting Standards Board (''**IASB**'') and as adopted by the European Union at December 31, 2012.

1.4 Basis of presentation of the Combined Financial Statements

1.4.1 IFRS financial statements

For the purpose of preparing the Combined Financial Statements, accounting principles effective as of December 31, 2012 have been applied to all years presented in these Combined Financial Statements. Altice Six prepares financial statements in accordance with the accounting rules and principles generally accepted in Luxemburg (''**Luxemburg GAAP**''), in application of the Law of December 19, 2012, as amended.

Altice VII prepares consolidated financial statements in accordance with the International Financial Reporting Standards as adopted in the European Union.

In preparing the Combined Financial Statements, Altice Six prepared financial statements in accordance with Luxemburg GAAP and converted them to IFRS which resulted in the following adjustments:

- Equity accounting of its investments in Altice B2B Luxembourg S.à r.l., Altice B2B Lux. Holding S.à r.l., Ypso Holding S.à r.l., in accordance with IAS 28 *Investments in Associates*;
- Under IFRS, transactions that are not carried at a market rate should be discounted over the life of the financial instruments and carried at amortized cost (as opposed to the cost less impairment under Luxemburg GAAP);
- Certain non-recurring income and expenses have been reclassified to EBITDA and/or financial income in the combined statements of income under IFRS.

1.4.2 Subsequent events

The Combined Financial Statements of Altice Group were prepared under the responsibility of the Board of Directors of Altice S.A. and approved by the Board of Directors of Altice S.A. on January 6, 2014. The preparation of the Combined Financial Statements is consistent with estimates reflected in the financial statements of Altice Six and Altice VII as of December 31, 2012, which were respectively authorized for issue on October 17, 2013 and November 12, 2013 by respectively the Board of Directors and Board of Managers. With the exception of the adjustments made in connection with the conversion of the financial statements of Altice Six from Luxemburg GAAP to IFRS, no adjustment has been reflected in the Combined Financial Statements for any subsequent events since November 12, 2013 to reflect exactly the position that was presented in the financial statements of Altice Six and Altice VII for which the Combined Financial Statements are being prepared as disclosed hereafter with the exception of the

1—Basis of preparation of the combined financial statements (Continued)

adjustments made in connection with the conversion in IFRS of the Financial Statements of Altice Six prepared initially in accordance with Luxemburg GAAP.

1.4.3 Basis of combination

The Combined Financial Statements were prepared using the accounting records that were used to prepare the financial statements of the Altice Six and Altice VII sub-groups for the year ended December 31, 2012, 2011 and 2010.

All intra-group balances and transactions have been eliminated in preparing the Combined Financial Statements, including the transactions between Altice Six and Altice VII and their respective subsidiaries.

As described above, the Combination of the Two Groups is considered a combination of entities under common control of Patrick Drahi and the Combined Financial Statements reflects the combination of Altice Six and Altice VII using the following methods and principles:

- In accordance with IAS 8 *Accounting Policies, Changes in Accounting Estimates and Errors* paragraph 10, judgment has been applied in developing and applying an accounting policy that results in information that is relevant and reflect the economic substance of the transaction. As a result, the acquisition method, as defined in IFRS 3 *Business Combinations (Revised 2008)* (''**IFRS 3**''), has not been applied to reflect the combination of the Two Groups. In the absence of specific guidance under IFRS for transactions between entities under common control, we considered and applied standards on business combination and transactions between entities under common control issued by the regulators in the United States (Accounting Standards Codification Topic 810-10-45-10 and Topic 810-10-55-1B *Consolidation* and SEC Regulation S-X Article 3A—*Consolidated and Combined Financial Statements*) and in the United Kingdom (FRS 6 *Acquisitions and mergers*) to prepare the Combined Financial Statements.
- Likewise, the Combined Financial Statements were prepared by aggregating the separate financial statements of Altice Six and Altice VII at their historical book value:
    - Assets, liabilities, income and expenses of the Two Groups have been extracted from the accounting records of the respective Altice Six and Altice VII sub-groups and fully aggregated at their historical book value without being revalued;
    - The combined equity has been determined by aggregating the consolidated equity of the subgroups Altice Six and Altice VII;
    - No goodwill has been recognized and the net assets and liabilities have been recognized at their historical book value; however, historical goodwill balances of the Two Groups existing before the combination have been maintained at their book value in the Combined Financial Statements;
    - The effects of transactions between the Two Groups on assets, liabilities, revenue, and expenses for periods presented have been eliminated except for the operations that relate to associates which are not eliminated.

2—Significant accounting policies

2.1 Accounting principles governing the preparation of the Combined Financial Statements

2.1.1 Standards and interpretations applied by the Combined Group as of December 31, 2012

With the exception of the principles used for the combination, as disclosed in Note 1, the accounting policies for recognition and measurement used in preparing the Combined Financial Statements at December 31, 2012 are the same as those used in the previous consolidated financial statements of

2—Significant accounting policies (Continued)

Altice VII under IFRS. Adjustments have been recognized to convert the consolidated financial statements of Altice Six (prepared under Luxemburg GAAP) to IFRS (see Note 1.4).

As mentioned in Note 1, the Combined Financial Statements have been prepared in accordance with International Financial Reporting Standards (''**IFRS**'') as adopted in the European Union (''**EU**'') with mandatory application as of December 31, 2012. The recognition and measurement principles of International Financial Reporting Standards as adopted by the European Union have been applied in preparing the Combined Financial Statements.

2.1.2 Standards issued but not yet effective

In its combined financial statements, the Combined Group has not anticipated the following standards and interpretations, for which application is not mandatory for periods opened from January 1, 2011. Their impact on the Combined Group's financial statements is estimated not to be significant and/or not applicable. This essentially relates to:

- IFRIC 20 ''Overdraft expenses''.
- IFRS 1 amended ''First application of IFRS'' concerning serious hyperinflation and the abolition of dates set for the first adopters, published by the IASB on December 20, 2010 and adopted by the European Union on December 29, 2012. Application of this standard is obligatory from January 1, 2013.
- IAS 19 ''Revised Employee Benefits''.

The combined financial statements have been prepared on the historical cost basis, except for the liability in respect of share based payment transaction, derivatives and financial instruments at fair value through profit and loss and available for sale financial assets. The principal accounting policies are set out below.

2.2 Functional currency

The combined financial statements are presented in millions of euros. Euro is the functional of Altice Six and Altice VII and the presentation currency of the Two Groups.

The functional currency, which is the currency that best reflects the economic environment in which the Group operates and conducts its transactions, is separately determined for each Group entity, including an associate accounted for using the equity method, and is used to measure its financial position and operating results.

2.3 Foreign currency translation

The presentation currency of Altice is euro. In individual companies, transactions in foreign currencies are recorded at the exchange rate at the date of the transaction. Monetary assets and liabilities in foreign currencies are translated at year-end rates. Any resulting exchange differences are accounted for in the income statement. On consolidation, assets and liabilities of the Two Groups' entities reported in their functional currencies are translated into euro, the Two Groups' presentation currency, using the year-end exchange rates. Income and expense items are translated into euro at the annual weighted average exchange rate or at the rate of the date the transaction occurred for significant items.

Differences arising from the translation of opening net assets of the Two Groups entities, together with differences arising from the restatement of the net results for the year of the Two Groups entities, are recognized in other comprehensive income.

2—Significant accounting policies (Continued)

2.4 Subsidiaries and associates

2.4.1 Subsidiaries

All companies in which the Group has a controlling interest are fully consolidated. Control exists when the Group has the power, directly or indirectly, to govern the financial and operating policies of an enterprise so as to obtain benefits from its activities. The financial statements of subsidiaries are included in the combined financial statements from the date that control commences until the date that control ceases.

All intra-group transactions, balances, income and expenses are eliminated in full on consolidation. Non-controlling interests in subsidiaries are identified separately from the Group's equity therein.

2.4.2 Associates

Investments, over which the Group exercises significant influence, but not control, are accounted for under the equity method. Such investees are referred to as ''associates'' throughout these combined financial statements.

Significant influence is presumed to exist when the Group holds at least 20% of the voting power in the associates. Associates are initially recognized at cost at acquisition date. The Combined Financial Statements include the Group's share of income and expenses, from the date significant influence commences until the date that significant influence ceases.

As per the provisions of IAS 28 *Investment in associates* the interest income and expenses recorded in the consolidated financial statements of Altice Six on loans with associates have not been eliminated in the combined statements of income and therefore are still recorded in the combined financial statements.

2.5 Operating profit before depreciation and amortization

The Combined Group has included the subtotal ''Operating profit before depreciation and amortization'' on the face of the combined statements of income. The Combined Group believes that this subtotal is useful to users of the Combined Group's financial statements as it provides them with a measure of the operating results which excludes non-cash elements such as depreciation and amortization as well as non-recurring transactions and management fees, enhancing the predictive value of the Combined Group's financial statements and providing information regarding the results of the Combined Group's ongoing trading activities and cash-flow generation that allows investors to better identify trends in the Combined Group's financial performance.

This non-IFRS measure is used by the Group internally to manage and assess the results of its operations, make decisions with respect to investments and allocation of resources, and assess the performance of management personnel.

The Combined Group's subtotal within operating income may not be comparable to similarly titled measures used by other entities. Further, this measure should not be considered as an alternative for operating income as the effects of depreciation, amortization and impairment, excluded from this measure do ultimately affect the operating results, which is also presented within the combined financial statements in accordance with IFRS 1.

2.6 Revenue recognition

Revenue from the Combined Group's activities is mainly composed of television, broadband Internet, fixed and mobile telephony subscription and installations fees invoiced to residential and business clients.

2—Significant accounting policies (Continued)

Revenue comprises the fair value of the consideration received or receivable for the sale of goods and services in the ordinary course of the Combined Group's activities. Revenue is shown net of value-added tax, returns, rebates and discounts and after eliminating intercompany sales within the group.

Revenues on bundle packages sold by the Combined Group are split into and recognised under each individual service sold in the bundle. For example, tripe play package revenues are booked under 'triple play television', 'triple play data' and 'triple play telephony' on a straight-line basis over their subscription period and revenues from telephone calls are recognized in revenue when the service is rendered.

Revenue is recognized as follows, in accordance with IAS 18 *Revenue*:

- Revenues from subscriptions for basic cable services, digital television pay, Internet and telephony are recognized in revenue on a straight-line basis over the subscription period; revenues from telephone calls are recognized in revenue when the service is rendered;
- When a promotion not related to a customer's past consumption and purchases (such as subscription's rate discount, service free period) is offered to customer in relation to a subscription, the Group recognizes the total amount of billable revenue on a straight-line basis over the term of the contract;
- Installation and set-up fees (including connection) for residential customers are accounted for as revenues when the service is rendered, if consideration received is lower than the sales direct costs to acquire the contractual relationship. Service access fees for business clients, when they are only allowed access to the services that are sold associated to an equipment or a service, are deferred and the corresponding revenue is recognized along the statistical client lifetime duration and generally spread over the contractual engagement period; and
- The revenue related to transmission capacity on terrestrial cables under indefeasible rights of use: Indefeasible Rights of Use (''IRU'') arrangements are recognized on a straight-line basis over the life of the contract.

2.7 Finance costs

Finance costs primarily comprise:

- Interest charges and other expenses paid for financing operations recognized at amortized costs;
- Changes in the fair value of interest rate derivative instruments that do not qualify as hedges for accounting purposes according to ''IAS 39'';
- Interest income relating to cash and cash equivalents; and
- Gains/losses on extinguishment of debt.

2.8 Income taxes

Taxes on income in the income statement include current taxes and deferred taxes. The tax expenses or income in respect of current taxes or deferred taxes are recognized in profit or loss unless they relate to items that are recorded directly in equity, in these cases the tax effect is reflected under the relevant equity item.

2.8.1 Current taxes

The current tax liability is measured using the tax rates and tax laws that have been enacted or substantively enacted by the end of reporting period as well as adjustments required in connection with the tax liability in respect of previous years.

2—Significant accounting policies (Continued)

2.8.2 Deferred taxes

Differences existing at closing between the tax base value of assets and liabilities and their carrying value in the Combined Statement of Financial Position give rise to temporary differences. Pursuant to the liability method, these temporary differences result in the accounting of:

- Deferred tax assets, when the tax base value is greater than the carrying value (expected future tax saving),
- Deferred tax liabilities, when the tax base value is lower than the carrying value (expected future tax expense).

Deferred tax assets and liabilities are measured at the expected tax rates for the year during which the asset will be realized or the liability settled, based on tax rates (and tax regulations) enacted or substantially enacted by the closing date. They are reviewed at the end of each year, in line with any changes in applicable tax rates.

Deferred tax assets are recognized for all deductible temporary differences, tax loss carry-forwards and unused tax credits, insofar as it is probable that a taxable profit will be available, or when a current tax liability exists to make use of those deductible temporary differences, tax loss carry-forwards and unused tax credits, except where the deferred tax asset associated with the deductible temporary difference is generated by initial recognition of an asset or liability in a transaction which is not a business combination, and that, at the transaction date, does not impact earnings, nor income tax profit or loss.

For deductible temporary differences arising from investments in subsidiaries, joint ventures and other associated entities, deferred tax assets are recorded to the extent that it is probable that the temporary difference will reverse in the foreseeable future and that a taxable profit will be available against which the temporary difference can be utilized.

The carrying value of deferred tax assets is reviewed at each closing date, and revalued or reduced to the extent that it is more or less probable that a taxable profit will be available to allow the deferred tax asset to be utilized. When assessing the probability of a taxable profit being available, account is taken, primarily, of prior years' results, forecasted future results, non-recurring items unlikely to occur in the future and the tax strategy. As such, the assessment of the group's ability to utilize tax losses carried forward is to a large extent judgment-based. If the future taxable results of the group proved to differ significantly from those expected, the group would be required to increase or decrease the carrying value of deferred tax assets with a potentially material impact on the Combined Statement of Financial Position and Combined Income Statement of the Combined Group.

Deferred tax liabilities are recognized for all taxable temporary differences, except where the deferred tax liability results from goodwill or initial recognition of an asset or liability in a transaction which is not a business combination, and that, at the transaction date, does not impact earnings, nor income tax profit or loss.

For taxable temporary differences arising from investments in subsidiaries, joint ventures and other associated entities, deferred tax liabilities are recorded except to the extent that both of the following conditions are satisfied: the parent, investor or venturer is able to control the timing of the reversal of the temporary difference and it is probable that the temporary difference will not be reversed in the foreseeable future.

Current tax and deferred tax shall be charged or credited directly to other comprehensive income, and not earnings, if the tax relates to items that are credited or charged directly to other comprehensive income.

2—Significant accounting policies (Continued)

2.9 Goodwill and business combinations

Business combinations are accounted for in accordance with the purchase method. The acquiree's identifiable assets, liabilities and contingent liabilities that meet the conditions for recognition under IFRS 3 ''Business combinations'' are recognized at their fair value at acquisition date.

The Group recognizes goodwill as of the acquisition date and is measured as the excess of (a) over (b) as follows:

a) *The aggregate of:*

- The consideration transferred, which generally requires acquisition-date fair value;
- The amount of any non-controlling interests in the acquiree measured;
- In a business combination achieved in stages, the acquisition-date fair value of the acquirer's previously held equity interest in the acquiree.

b) The net of the acquisition-date balances of the identifiable assets acquired and the liabilities measured in accordance with IFRS 3.

Any excess of the cost of acquisition over the Combined Group's share in the fair value of all identified assets and liabilities is recognized as goodwill.

The goodwill is determined provisionally by the end of the period. The Combined Group recognizes any adjustments to those provisional values within twelve months after the acquisition date.

During the measurement period, the acquirer shall recognize adjustments to the provisional amounts as if the accounting for the business combination had been completed at the acquisition date. Thus, the acquirer shall revise comparative information for prior periods presented in financial statements as needed, including making any change in depreciation, amortization or other income effects recognized in completing the initial accounting.

If the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed exceeds the purchase price, a gain is recognized immediately.

Subsequently, goodwill is measured at its initial amount less recorded accumulated impairment losses. Impairment loss for goodwill is recorded in the income statement as a deduction from operating income (account ''Depreciation and amortization'') and is never reversed subsequently.

Changes in the Combined Group's ownership interests in subsidiaries that do not result in the Group losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the Group's interests and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to owners of the Combined Group.

2.10 Other intangible assets

Intangible assets acquired separately are recorded at cost on initial recognition, with the addition of direct acquisition costs. Intangible assets acquired in a business combination are measured at fair value as of the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and less any accumulated impairment losses. In our Israeli entity, the costs of producing in-house content is also considered to be an intangible assets and recognized at the cost of production of the shows. Following initial recognition, these intangible assets are carried at cost less any accumulated amortization and less any accumulated impairment losses.

According to Management, intangible assets have either definite or indefinite useful lives.

Assets with definite useful lives are amortized over their useful lives and assessed for impairment signs which would indicate impairment in value. The amortization period and the amortization method for an

2—Significant accounting policies (Continued)

intangible asset with a finite useful life are reviewed at least once a year. Changes in the expected useful life or the expected pattern of consumption of future economic benefits that are expected to derive from the asset are treated as a change in an accounting estimate which is treated prospectively. The amortization expenses regarding intangible assets with finite useful lives are recognized in the income statement.

The useful lives of the intangible assets are as follows:

	Duration
Software	3 years
Customer relations	7 to 37 years
Licences	5 years
Customer relations with a defined contractual term	3 years
Subscriber purchase costs	based on average duration of subscriptions

Assets with indefinite useful lives are tested for impairment annually as well as where there is an indication that it may be impaired by comparing their carrying amount with their recoverable amount.

2.11 Impairment of tangible and intangible assets

Each time events or changes in the economic environment indicate a current risk of impairment of goodwill, other intangible assets, property, plant and equipment and assets in progress, the Combined Group re-examines the value of these assets. In addition, goodwill, other intangible assets with an indefinite useful life, and intangible assets in progress are all subject to an impairment test performed annually.

This test is performed in order to compare the recoverable amount of an asset to its carrying amount.

An asset's recoverable amount is the higher of an asset's fair value less costs to sell and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. In that case, recoverable amount is determined for the cash-generating unit to which the asset belongs. A Cash Generating Unit (''CGU'') is the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or groups of assets.

The value in use of each asset or group of assets is determined as the discounted value of future cash flows (discounted cash flow method or ''DCF'') by using a discount rate after tax specific to each asset or group of assets concerned.

The fair value less costs to sell is the amount obtained from the sale of the asset or group of assets in an arm's length transaction between knowledgeable and willing parties, less costs to sell.

When the carrying amount of an asset exceeds its recoverable amount, an impairment loss is recognized in the caption ''Depreciation and amortization'' in the income statement. Only impairment loss recognized on assets other than goodwill such as depreciable intangible assets, intangible assets with indefinite useful life and property, plant and equipment, may be reversed.

2.12 Property, plant and equipment

Property, plant and equipment are presented at cost with the addition of direct purchase costs less accumulated depreciation and accumulated losses on impairment and they do not include routine maintenance expenses. The cost includes spare parts and ancillary equipment that can only be used in connection with the plant and machinery.

2—Significant accounting policies (Continued)

Depreciation is calculated using the straight line method over the estimated useful lives of the assets, as follows:

	Duration
Buildings	25 to 50 years
Cables Network	4 to 20 years
Call center (primarly electronic equipment)	5 to 9 years
Converters and modems	7 years
Computers and ancillary equipment	3 to 6 years
Office furniture and equipment	6 to 16 years
Communication network infrastructure	6 to 16 years
Leasehold contracts	see below

Leasehold contracts are depreciated according to the straight line method during the rental period (including the option period for an extension by the Combined Group, which it intends to exercise) or the estimated useful lifetime of the improvement.

Elements of a fixed asset item, having a cost that is significant in comparison to the overall cost of the item, are depreciated separately, using the components method. The depreciation is calculated in accordance with the straight line method at annual rates that are considered to be sufficient in order to depreciate the assets over the length of their estimated useful lives.

The useful life, depreciation method and residual value of an asset are reviewed at least annually and any changes are accounted for prospectively as a change in accounting estimate.

2.13 Leasing

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

2.13.1 The Combined Group as lessor

Amounts due from lessees under finance leases are recognized as receivables at the amount of the Combined Group's net investment in the leases. Finance lease income is allocated in an accounting periods so as to reflect a constant periodic rate of return on the Combined Group's net investment outstanding in respect of the leases.

Rental income from operating leases is recognized on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognized on a straight-line basis over the lease term.

Rental income from the leasing of customer premises equipment (set top boxes, modems and decoders) is recognized on a straight-line basis over the term of the subscription held by the client. At the end of the contract or in case of voluntary contract termination by the client, this equipment is repossessed and thus remains in the inventory of the Combined Group.

2.13.2 The Combined Group as lessee

Assets held under finance leases are initially recognized as assets of the Combined Group at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the combined statement of financial position as a finance lease obligation.

Lease payments are apportioned between finance expenses and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance expenses are recognized immediately in profit or loss, unless they are directly attributable to qualifying assets, in which case they are capitalized in accordance with the Group's general policy on borrowing costs (see

2—Significant accounting policies (Continued)

note 2.11 below). Contingent rentals are recognized as expenses in the periods in which they are incurred.

Operating lease payments are recognized as an expense on a straight-line basis over the lease term, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed. Contingent rentals arising under operating leases are recognized as an expense in the period in which they are incurred.

In the event that lease incentives are received to enter into operating leases, such incentives are recognized as a liability. The aggregate benefit of incentives is recognized as a reduction of rental expense on a straight-line basis, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

2.14 Borrowing costs

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized as part of the cost of that asset. According to management, it does not take a substantial period of time to get ready for the intended use because of the incremental deployment of the network. This standard has consequently no impact on the combined financial statements.

2.15 Government grants

Government grants are not recognized until there is reasonable assurance that the Combined Group will comply with the conditions attaching to them and that the grants will be received.

Government grants are recognized in profit or loss on a systematic basis over the periods in which the Combined Group recognizes as expenses the related costs for which the grants are intended to compensate. Specifically, government grants whose primary condition is that the Combined Group should purchase, construct or otherwise acquire non-current assets are recognized as deferred revenue in the combined statement of financial position and transferred to the income statement on a systematic and rational basis over the useful lives of the related assets.

Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Combined Group with no future related costs are recognized in profit or loss in the period in which they become receivable.

The benefit of a government loan at a below-market rate of interest is treated as a government grant, measured as the difference between proceeds received and the fair value of the loan based on prevailing market interest rates.

2.16 Financial assets

The Combined Group classifies financial assets in four categories: available-for-sale, loans and receivables, held-to-maturity and financial assets at fair value through profit and loss. They are classified as current assets and non-current assets according to IAS 1 ''Presentation of financial statements''.

Purchases and sales of all financial assets are recognized on a trade date basis.

2.16.1 Available-for-sale financial assets

Available-for-sale financial assets are recognized initially at fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset. After initial recognition, they are reported at their fair value. Gains and losses arising from changes in their fair value are recognized directly in equity, until the security is disposed of or is determined to be impaired, at which time the cumulative gain or loss previously recognized in equity is included in the profit or loss for the period.

Available-for-sale financial assets consist mainly of shares in non-consolidated companies. Fair value corresponds to quote price for listed securities. For non-listed securities, and when a reliable estimate of

2—Significant accounting policies (Continued)

fair value cannot be made using valuation techniques, the group values financial assets at historical cost, less any impairment losses.

When there is objective evidence that available-for-sale assets are impaired, the cumulative impairment loss included in equity is reclassified from other comprehensive income to income. Objective evidence that an available-for-sale financial asset is impaired includes, among other things, a decrease in the estimated future cash flows arising from these assets, as a result of significant financial difficulty of the issuer, a material decrease in expected future profitability or a prolonged decrease in the fair value of the security. Impairment losses recognized in profit or loss for equity instruments classified as available-for-sale are never reversed through profit or loss.

2.16.2 Loans and receivables

Loans and receivables are recognized initially at fair value plus transaction costs that are directly attributable to the acquisition. After initial recognition, they are measured at amortized cost using the effective interest rate method.

This category mainly includes trade receivables.

If there is objective evidence that an impairment loss has occurred, the amount of this loss, measured as the difference between the financial assets' carrying value and its recoverable amount is recognized in the income statement. Impairment losses may be reversed if the recoverable amount of the asset subsequently increases in the future.

2.16.3 Held-to-maturity financial assets

Held-to-maturity financial assets are financial assets with fixed or determinable payments and fixed maturity that the Combined Group has both the intention and ability to hold to maturity. Financial assets that are designated as held-to-maturity are measured at amortized cost, in accordance with the effective interest rate method.

They are reviewed for impairment on an individual basis if there is any indication that they may be impaired.

The Combined Group currently does not hold any held to maturity financial assets.

2.16.4 Financial assets measured at fair value through profit or loss

These financial assets are measured at fair value with gains and losses recorded as finance income or costs.

This category mainly includes:

- Assets held for trading which the Combined Group intends to sell in the near future (primarily marketable securities);
- Assets voluntarily classified at inception in this category;
- Derivatives financial assets.

2.17 Inventories

Inventories are measured at the lower of cost and net realizable value. The cost of inventories comprises costs of purchase and costs incurred in bringing the inventories to their present location and condition. Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated selling costs.

Cost of inventories is determined using the weighted average cost method.

2—Significant accounting policies (Continued)

The Combined Group periodically evaluates the condition and age of inventories and makes provisions for slow moving inventories accordingly.

2.18 Cash and cash equivalents

Cash consists of cash in banks and deposits.

Cash equivalents are considered as highly liquid investments, including unrestricted short-term bank deposits with an original maturity of three months or less from the date of acquisition or with a maturity of more than three months, but which are redeemable on demand without penalty and which form part of the Combined Group's cash management.

2.19 Restricted cash

Restricted cash is considered to be cash that is dedicated to the repayment of the Combined Group's liabilities to banking entities in accordance with the Group's credit agreement.

2.20 Derivatives

Derivatives are initially recognized at fair value on the date a derivative contract is entered into and are subsequently reassessed at their fair value.

The Combined Group enters into interest rate swaps and caps to manage its interest or foreign currency exchange rate exposure. These contracts do not qualify as hedges for accounting purposes according to IAS 39, as there was no formal designation and documentation of the hedging relationship at inception. Changes in the fair value of any of these derivative instruments are recognized immediately in the income statement within financial income and expenses.

2.21 Share based payment arrangements

The Combined Group's employees are entitled to remuneration in the form of equity-settled share-based payment transactions and certain employees are entitled to remuneration in the form of cash-settled share-based payment transactions that are measured based on the increase in the Company's share price. These stock options based remunerations mainly concerned the Israeli entity, HOT Telecom and these plans were terminated post the take private of the company in December 2012 and the delisting of all active shares of HOT Telecom on the Tel Aviv stock exchange.

2.22 Financial liabilities

Financial liabilities other than derivative instruments include:

2.22.1 Financial liabilities at amortized cost

These financial liabilities are measured at amortized cost calculated based on the effective interest rate method according to IAS 39. The effective interest rate is the internal yield rate that exactly discounts future cash flows through the term of the financial liability. Fees, debt issuance and transaction costs are included in the calculation of the effective interest rate over the expected life of the instrument.

2.22.2 Financial liabilities that are measured at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities classified as held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss.

Financial liabilities are classified as held for trading if they are acquired for the purpose of sale in the near term. Gains or losses on liabilities held for trading are recognized in profit or loss.

Derivatives, including bifurcated embedded derivatives, are classified as held for trading unless they are designated as effective hedging instruments. In the event of a financial instrument that contains one or

2—Significant accounting policies (Continued)

more embedded derivatives, the entire combined instrument may be designated as a financial liability at fair value through profit or loss only upon initial recognition.

The Combined Group assesses whether embedded derivatives are required to be bifurcated from host contracts when the Group first becomes party to the contract. Reassessment only occurs if there is a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required.

The fair value of financial instruments that are traded in an active market is determined by reference to quoted market prices at the close of business on the balance sheet date. For financial instruments for which there is no active market, fair value is determined by the use of valuation techniques. Such techniques include evaluation based on transactions that have been executed recently under market terms, reference to the current market value of another instrument, which is substantially the same, discounted cash flow analysis or other valuation models.

2.22.3 Classification as debt or equity

Debt and equity instruments issued by a group entity are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

2.22.4 Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by a group entity are recognized at the value of the proceeds received, net of direct issue costs.

Repurchase of the Company's own equity instruments is recognized and deducted directly in equity. No gain or loss is recognized in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

The Group also issued some CPECs (Convertible Preferred Equity Certificates). Details of these subordinated financial instruments are set out in note 16.2.

2.23 Other liabilities

2.23.1 Provisions

A provision in accordance with IAS 37 is recognized in the statement of financial position when the Combined Group has a present obligation (legal or implicit) as the result of a past event and it is expected that the use of economic resources will be required in order to settle the obligation and it is possible to reliably estimate it. Where the impact is significant, the provision is measured by discounting the forecasted future cash flows, using a pre-tax interest rate that reflects the expectations of the market in respect of the time frame of the money and in certain cases, the risks that are specific to the liability.

The following types of provisions are recorded in the financial statements:

2.23.1.1 Legal claims

A provision regarding legal claims is recognized when the Combined Group has a present legal commitment or an implicit commitment resulting from a past event; when it is more likely than not that the Combined Group will be required to expand economic resources to clear the commitment, when it is possible to estimate it reliably and when the effect of time is significant, the provision is measured according to the present value.

2—Significant accounting policies (Continued)

2.23.1.2 Warranty

The Combined Group recognizes a provision for warranty for the sale of its products. The warranty is limited to malfunctions as defined by the Combined Group and does not include warranty for damages incurred by the customer.

2.23.1.3 Onerous contracts

Present obligations arising under onerous contracts are recognized and measured as provisions. An onerous contract is considered to exist where the Combined Group has a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received from the contract.

2.23.1.4 Restructuring

A restructuring provision is recognized when the Combined Group has developed a detailed formal plan for the restructuring and has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement the plan or announcing its main features to those affected by it. The measurement of a restructuring provision includes only the direct expenditures arising from the restructuring, which are those amounts that are both necessarily entailed by the restructuring and not associated with the ongoing activities of the Combined Group.

2.23.2 Liabilities for employment benefits

In accordance with the laws and practices of each country in which it operates, the Combined Group participates in, or maintains, several employee benefits. There are as follows:

2.23.2.1 Short-term benefits for employees

Short-term benefits for employees include salaries, vacation pay, sick leave, recuperation pay and employers' deposits for national insurance and are recognized as an expense when the services are provided. A liability in respect of a cash bonus or a profits participation scheme is recognized where the Combined Group has a legal or an implicit commitment to pay the said amount in respect of service that has been provided by the employee in the past and where the amount can be reliably estimated.

2.23.2.2 Post-retirement benefits

In Israel, the Combined Group operates a defined benefits plan in respect of the payment of severance pay in accordance with the Israeli Severance Pay Law. According to this law, employees are entitled to receive severance pay if they are dismissed or on their retirement. The liability in respect of the termination of employee-employer relations is measured in accordance with the actuarial value of a forecast unit of entitlement method. The actuarial calculation takes into account increases in salaries in the future and the rate at which employees leave the Combined Group and this on the basis of an estimate of the timing of the payment. The amounts are presented on the basis of the discounting of the forecast future cash flows, in accordance with government bonds' interest rates, whose repayment dates are close to the period relating to the liability in respect of severance pay.

The Combined Group deposits funds in respect of its severance pay liability in pension funds and insurance companies (hereafter—the plan assets). The plan assets are assets that are held by the employee benefits plan for the long-term or in qualifying insurance policies. The plan assets are not available for use by the Combined Group's creditors, and cannot be paid directly to the Group.

The liability regarding employee benefits presented in the statement of financial position represents the present value of the defined benefits obligation less the fair value of the plan assets, and the past service costs. Actuarial gains and losses are reflected in the income statement in the period in which they arise, as part of the salary costs.

2—Significant accounting policies (Continued)

The Combined Group has defined contribution plans pursuant to the Severance Pay Law under which the Combined Group pays fixed contributions and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient amounts to pay all employee benefits relating to employee service in the current and prior periods. Contributions to the defined contribution plan in respect of severance or retirement pay are recognized as an expense when contributed simultaneously with receiving the employee's services and no additional provision is required in the financial statements.

2.23.2.3 Other long-term employee benefits

The Combined Group's employees are entitled to benefits and other long-service grants. These benefits are accounted for as other long-term benefits since the Combined Group estimates that these benefits will be used and the respective Combined Group's obligation will be settled during the employment period and after one year from the end of the reporting period.

The Combined Group's net obligation regarding other long-term employee benefits is in respect of the future benefit amount due to employees for services rendered in current and prior periods. This amount of benefits is discounted to its present value and the fair value of the assets relating to this obligation is deducted from said amount. The discount rate is determined by reference to the yields on Government bonds whose currency and term are consistent with the currency and term of the Combined Group's obligation. The obligation is calculated using the projected unit credit method. Actuarial gains and losses are recognized in profit or loss in the period in which they occur.

2.23.2.4 Benefits in respect of the termination of employment

Severance pay for employees is reflected as an expense when the Combined Group has made an undertaking, with no real possibility of cancellation, for the dismissal of employees before they reach the customary retirement age in accordance with a detailed formal plan. The benefits that are given to the employees who take voluntary retirement when the Group has offered the employees a plan that encourages voluntary retirement, it is expected that the offer will be accepted and the number of persons accepting the offer can be reliably estimated.

2.24 Significant accounting judgments and estimates used in the preparation of the financial statements

2.24.1 Judgments

In the process of applying the significant accounting policies, the Combined Group has exercised its judgment and has taken into account matters which have the most significant impact on the amounts that have been recognized in the combined financial statements.

2.24.2 Estimates and assumptions

The preparation of the combined financial statements requires the Combined Group to make estimates and assumptions that have an effect on the application of the accounting policies and on the reported amounts of assets, liabilities, revenues and expenses. These estimates and underlying assumptions are reviewed regularly. Changes in accounting estimates are reported in the period in which the estimate changes.

2.24.3 Impairment of goodwill

Determining whether goodwill is impaired requires an estimation of the value in use of the cash-generating units to which goodwill has been allocated. The value in use calculation requires the directors to estimate the future cash flows expected to arise from the cash-generating unit and a suitable discount rate in order to calculate present value. Where the actual future cash flows are less than expected, a material impairment loss may arise.

2—Significant accounting policies (Continued)

The value in use of each CGU was determined by estimating cash flows for a period of five years for the operating activities. Cash flow forecasts are derived from the most recent business plans approved by the Board of Directors. Beyond the specifically forecasted period of five years, the Company extrapolates cash flows for the remaining years based on an estimated constant growth rate between 1,5-2%. This rate does not exceed the average long-term growth rate for the relevant markets. Discount rates have been computed using WACC approach and range from 7% to 7,5%.

The carrying amount of goodwill as at December 31, 2012 was EUR 790,9 million (December 31, 2011 was EUR 911,9 million ; December 31, 2010: EUR 17,8 million). No impairment loss has been accounted for in 2010 and 2011 respectively.

2.24.4 Legal claims

In estimating the likelihood of outcome of legal claims filed against the Combined Group and its investees, the Combined Group companies rely on the opinion of their legal counsel. These estimates are based on the legal counsel's best professional judgment, taking into account the stage of proceedings and historical legal precedents in respect of the different issues. Since the outcome of the claims will be determined in courts, the results could differ from these estimates.

2.24.5 Post-employment benefits

The liability in respect of post-employment defined benefit plans is determined using actuarial valuations. The actuarial valuation involves making assumptions about, among others, discount rates, expected rates of return on assets, future salary increases and mortality rates. Due to the long-term nature of these plans, such estimates are subject to uncertainty.

2.24.6 Deferred tax asset

Deferred tax assets relate primarily to tax loss carry forwards and to deductible temporary differences between reported amounts and the tax bases of assets and liabilities. The assets relating to the tax loss carry forwards are recognized if it is probable that the Combined Group will generate future taxable profits against which these tax losses can be set off. Evaluation of the Group's capacity to utilize tax loss carry-forwards relies on significant judgment. The Combined Group analyses past events, and the positive and negative elements of certain economic factors that may affect its business in the foreseeable future to determine the probability of its future utilization of these tax loss carry forwards.

As of December 31, 2012, 2011 and 2010, in evaluating whether deferred tax assets should be recognized, management considered the weight of one form of negative evidence being a significant amount of cumulative losses in recent years and concluded that it is not probable that future taxable profit will be available against which the unused tax loss carry forward can be utilized.

2.24.7 Discounting of Yield Free Preferred Equity Certificates (YFPEC)

The Combined Group has loans with its equity holder which are currently non-interest bearing and therefore considered as not being at arm's length. In determining the present value, a discount rate of 4,76% has been used for YFPECs issued by Altice VII and 6,38% for YFPECs issued by Altice Six.

(1) Solutions 25 changed its name to Green ch as the result of the merger of Green ch by Solutions 25 in 2010

(2) Everido was merged into Altice VII in 2010

(3) The Combined Group acquired in January 2012 the shares of Sequalum Participation that were held by Eiffage (15.78%). After this operation, the Combined Group owned 95% of Sequalum Participation.

(4) The entities Altitude Telecom, B3G SA and B3G Online were merged in 2011 in Completel SAS.

3.2 Modification of the scope of consolidation

3.2.1 Main acquisitions in 2010

3.2.1.1 Hot Mobile (ex MIRS Communications Ltd)

In 2010, Altice Securities S.à r.l. decided to incorporate Altice Acquisition Ltd, a company incorporated under the laws of Israel. On December 9, 2009, the company entered into an acquisition agreement which was amended on February 4, 2010, pursuant to which, the company acquired all the shares held in MIRS Communications Ltd (''Hot Mobile''), by way of a merger with and into Hot Mobile of the shares held in Altice Acquisition Ltd. This merger became effective on May 27, 2010.

3—Scope of combination (Continued)

3.2.2 Main acquisitions in 2011

3.2.2.1 The HOT group

On October 26, 2010, the Combined Group entered into two acquisition agreements with the HOT Telecommunications equity holders, the Fishman Group and the Yediot Communications Ltd. Group, which as of the date of the above mentioned agreements held about 12,61% and 16,79% of HOT shares, respectively. On November 28, 2011 the transaction was consummated.

On March 16, 2011, Hot Telecommunications completed a private placement for approximately 2% of HOT issued share capital which was entirely subscribed by the Combined Group. At completion of this placement, the Combined Group held approximately 64,7% of HOT's shares.

Until March 16, 2011, the Combined Group held about 44,7% of HOT shares which until that date had been accounted for as an investment in associate using the equity method.

Since March 16, 2011, the Combined Group consolidates HOT and the Combined Group elected to measure the non-controlling interests in the acquiree at fair value at the date when control had been achieved.

The Combined Group has recognized the fair value of the assets that were acquired and the liabilities that were taken on within the framework of the business combination in accordance with an evaluation by an independent external expert. As of the time of the approval of the financial statements a final evaluation from an external expert has been received in relation to the fair value of the identified assets that were acquired and the liabilities that have been taken up. The amount of the investment prior to achieving control, in accordance with the equity method of accounting, as aforesaid, has been revalued in accordance with the share price as of the said time (approximately EUR 12,14), such that the financial statements as of March 31, 2011 income has been recorded on the revaluation of the investment in the affiliate, which became a consolidated company, in an amount of approximately EUR 133,0 million.

a) Customer relations

The customer relations were valued on the basis of the fair value of the existing customers in accordance with the contracts with them, through the excess earnings method for multiple periods. The amortization period for customer contracts ranges from 7 to 14 years under the straight line method.

b) Customer relations with a defined contractual term

This intangible asset was estimated based on the cash flows expected from existing orders or signed agreements of existing customers according to the surplus earning method for multiple periods. The amortization period for this asset is 3 years according to the existing agreements data.

c) Brand name

The ''HOT'' brand and ''Mirs'' brand were valued within the framework of the business combination in accordance with the ''relief from royalties'' method.

d) Backlog of contracts

The backlog of contracts was valued within the framework of the business combination on the basis of the cash flows that were expected as a result of the acquisition, which derived from orders associated with signed contracts, with the addition of an appropriate profit margin, in accordance with the excess earnings method for multiple periods.

e) Subscriber purchase costs

The HOT Group has an intangible asset that was created in respect of the costs associated with the purchase of subscribers. The additional direct sales commissions that are paid in respect of sales to

3—Scope of combination (Continued)

subscribers that have signed on a commitment to remain customers of the Combined Group are recognized as an intangible asset up to the maximum fine that exists according to their contractor obligation. The expenses relating to the amortization of the purchase of the subscribers are recorded in the income statement over the period of the subscribers' average contractual commitment.

f) Software

The Combined Group's assets include computer systems that contain both software and hardware. Software that constitutes an integral part of the hardware, which cannot operate without the software that is installed therein, are classified as fixed assets. On the contrary, licenses from stand-alone software which add additional functionalities for the hardware are classified as intangible assets.

3.2.2.2 Coditel Brabant S.p.r.l. and Coditel S.à r.l.:

The Coditel reporting entity, Coditel Holding S.A. (''Coditel Holding'') was incorporated on May 12, 2011 for the purpose of acquiring Coditel Brabant S.p.r.l. (''Coditel Belgium'') and Coditel S.à r.l. (''Coditel Luxembourg''), which acquisition was completed on July 31, 2011.

As at the end of 2011, Altice VII holds an indirect interest of 44,4% in Coditel Brabant S.p.r.l. and Coditel S.à r.l.. Through various holding vehicles, Altice VII controls Coditel Brabant and Coditel S.à r.l.. Control is obtained via the majority position on the board of these entities by the Altice VII representatives.

3.2.3 Main acquisitions in 2012

Altice Portugal S.A. acquired 100% of Cabovisao as at February 29, 2012, from Cogeco Cable Luxembourg Holding S.A.. The consideration amounted to EUR 45 million, of which 40% was subsequently sold to Apax Partners in April 2013.

3.3 Acquisitions of businesses

Business combinations that occurred during the reporting period are described in note 3.2.

3—Scope of combination (Continued)

The major classes of assets acquired and liabilities assumed at the acquisition date are:

	Total Business Combinations	Cabovisao	Hot Telecom	Coditel Brabant S.p.r.l.	Coditel S.à r.l.
		(in millions of euros)			
Cost of acquisition	1 337,2	45,0	941,1	244,3	106,8
ASSET					
Intangible assets	452,8	37,8	367,8	40,0	7,2
Property, plant and equipment	886,3	123,0	718,8	25,1	19,4
Deferred tax assets	21,7	0,9	20,8	—	—
Other non-current assets	23,1	—	21,5	1,6	—
Inventories	7,3	6,5	—	0,3	0,4
Trade and other receivables	43,4	0,2	30,3	10,4	2,5
Cash and cash equivalents	18,2	9,0	8,3	0,6	0,3
Other current assets	5,4	1,6	3,4	0,3	—
Total assets	**1 458**	**178,9**	**1 170,8**	**78,4**	**30,0**
EQUITY AND LIABILITIES					
Non-current liabilities	682,5	37,7	625,3	17,2	2,2
Current liabilities	300,7	33,2	234,1	26,1	7,3
Total liabilities	**983,2**	**70,9**	**859,4**	**43,3**	**9,5**
Net assets	**474,9**	**108,0**	**311,3**	**35,1**	**20,5**
Residual goodwill/(badwill)	**862,2**	**(63,0)**	**629,8**	**209,2**	**86,4**
Including impact of non controlling interests on goodwill/(badwill)	*139,1*	*(25,2)*	—	*116,3*	*48,0*

The net cash outflow in 2012 on the acquisition of Cabovisao amounted to EUR 35.1 million.

The net cash outflow in 2011 for the acquisitions mentioned above is of EUR 347,3 million and consists of the following:

—acquisition of Coditel Brabant S.p.r.l. and Coditel S.à r.l. . . . . EUR 159,4 million
—acquisition of Hot Telecom . . . . EUR 197,1 million
—Cash used . . . . EUR −9,2 million

3—Scope of combination (Continued)

The main figures of the acquired businesses, since the beginning of the year, and until the business combination, are presented as follows:

	Cabovisao	Coditel Brabant S.p.r.l.	Coditel S.à r.l.	Hot Telecom
	January 1, 2012 to February 29, 2012	January 1, 2011 to June 30, 2011	January 1, 2011 to June 30, 2011	January 1, 2011 to March 16, 2011
	(in millions of euros)			
Revenues	**19,8**	**24,4**	**7,9**	**165,2**
Cost of sales	(8,8)	(3,6)	(1,4)	(48,0)
Gross Profit	**11,0**	**20,7**	**6,5**	**117,1**
Other operating expenses	(4,6)	(2,8)	(0,9)	(38,6)
General and administrative expenses	(1,4)	(3,0)	(0,9)	(5,4)
Other sales and marketing expenses	(2,4)	(1,3)	(0,1)	(9,8)

Management monitors its different businesses by geography. The businesses are split into different geographies as mentioned below:

- Israel
- Belgium and Luxembourg

4—Goodwill (Continued)

- France
- French overseas Territories
- Switzerland
- Others

In addition to this geographical split, for the purpose of the testing for impairment of goodwill and intangible assets with an indefinite useful life, the goodwill, brand name and customer relationships have been allocated to the local businesses that represent cash-generating units (CGU) as follows:

- WSG
- Valvision
- Everido
- Coditel Brabant
- Coditel S.à r.l.
- Hot Telecom

Goodwill is tested at the cash-generating units (''CGU'') level for impairment annually, as of December 31, or whenever changes in circumstances indicate that the carrying amount may not be recoverable. In all cases, the CGU represents the lowest level at which goodwill is monitored for internal management purposes. The recoverable amounts of the CGUs are determined based on their value in use. The key assumptions for the value in use calculations are primarily the discount rates, growth rates, expected changes to telecom prices and direct costs during the period.

The Board of Directors estimates discount rates using pre-tax rates that reflect current market rates for investments of similar risk. The rate for each CGU was estimated from the weighted average cost of capital.

For the year ended December 31, 2012, the Board of Directors has determined the value in use of each cash generating unit, with the assistance of an external appraiser, and as a result of this valuation the Group concluded that the recoverable amount of the Israeli in-country fixed line is lower than its carrying amount and accordingly recorded in the reporting period an impairment of approximately EUR 121,9 million which was recorded as part of section ''depreciation and amortization''

The Board of Directors has performed an impairment analysis for the purpose of issuing these combined financial statements and determined that no impairment should be recorded for the years ended December 31, 2011 and 2010.

(1) Customer relations have been valued on the basis of the fair value of the existing customers. The amortization expenses are in accordance with the benefits expected for each customers in each period.

(2) Subscriber purchase costs were recognized in respect of the costs of linked acquisition costs of subscribers (including additional sales commissions). The amortization expenses are related to the length of the average financial commitment of the subscribers.

The majority of the intangible assets movements for the year ended December 31, 2011 are related to the Hot Telecom, Coditel S.p.r.l. and Coditel S.à r.l. business combinations.

Most of the tangible assets increases as of December 31, 2012 are related to the Cabovisao business combination (see Note 3.3). The additions in capital expenditures come mainly from Hot Telecom activity:

- Modems and converters related capital expenditures represented EUR 69,4 million for the year ended December 31, 2012, as compared to EUR 29,3 million for the year ended December 31, 2011. The increase in converters and modems related capital expenditures resulted from capital expenditure incurred during the first two quarters of 2012 relating to our new set top boxes (HOT

6—Property, Plant & Equipment (Continued)

Magic HD) for which delivery was delayed and which we had expected to incur during the second quarter of 2011 and did not received until the last quarter of 2011.

- Cable network related (including centers) capital expenditures represented EUR 84 million for the year ended December 31, 2012, as compared to EUR 51.6 million for the year ended December 31, 2011. The increase in our total cable network related (including centers) capital expenditure was as a result of the expenditure incurred to complete the upgrade to 100Mb capacity throughout our cable network and fibre roll out in certain areas in 2012.

(1) Cable networks: the Combined Group owns, directly and indirectly through its subsidiaries, cable or fibre network which allow it to supply cable-based pay television, broadband internet and fixed-line telephony services to its subscribers.

(2) Call center represents centralized offices used for the purpose of receiving or transmitting a large volume of administrative, technical or commercial requests by telephone.

(3) Office furniture and equipment refers to furnishings and IT equipment.

(4) The Communication network infrastructure includes the digital technologies for the transmission of multi-channel television services.

Most of the tangible assets increases as of December 31, 2012 come from the Cabovisao business combinations (see Note 3.3).

Most of the tangible assets increases as of December 31, 2011 come from the Coditel and Hot Telecom business combinations (see Note 3.3).

6—Property, Plant & Equipment (Continued)

The additions in capital expenditures mainly come from Hot Telecom activity:

- Modems and converters related capital expenditures represented EUR 29,3 million for the year ended December 31, 2011.The weaker amount of modems and converters related capital expenditures resulted from a delay in the delivery of the HOT Magic HD set top boxes which the local management initially expected to receive during the second quarter of 2011 and ended up not receiving until the fourth quarter of 2011.
- Cable network related (including centers) capital expenditures represented EUR 43,4 million for the year ended December 31, 2011 and was related to investments in the Israeli UFI-channel in 2011.

7—Investments in associates

The breakdown of the investments in associates in 2010, 2011 and 2012 is detailed as follows:

	December 31, 2012	
	Combined Group's share of profits of associates	Combined Group's share of net assets of associates
	(in millions of euros)	
Altice B2B Lux Holding S.à r.l.	11,4	39,1
Ypso Holding S.à r.l.	9,0	(116,1)
Total	**20,4**	**(77,0)**

	December 31, 2011	
	Combined Group's share of profits of associates	Combined Group's share of net assets of associates

Total Net book value	**141,8**	**165,9**	**112,5**

(1) Investment in available for sale financial asset:

A subsidiary company, operating through Hot Net Internet Services Ltd. (formerly Hot Properties) and Finance Ltd. (hereinafter—Hot Net) holds 1 454 663 regular shares in Partner Communications Ltd. (hereinafter—Partner), constituting approximately 0,9% of Partner's share capital which is engaged in the provision of mobile communications services and whose shares are traded on stock exchanges in the United States of America, in the United Kingdom and in Israel. Partner's shares are subject to Israeli restrictions in accordance with the Radio Mobile Telephone license that was granted to Partner, in accordance with which the shares can only be sold to an Israeli buyer, as defined in the said license.

The subsidiary companies present the investment in Partner as an investment in an available for sale financial asset, which is measured at fair value.

(2) Restricted cash (see Note 2.19).

The restricted cash has been deposited in financial institutions and as of the statement of financial position date it bears interest based on the interest rate on daily bank deposits. It is restricted to repayment of certain interests on bank borrowings and debentures.

8—Financial assets (Continued)

Loans to associates as of December 31, 2012, 2011 and 2010 are summarised below:

11.2 Other receivables

	December 31, 2012	December 31, 2011	December 31, 2010
	(in millions of euros)		
Loans to related party	3,8	1,8	2,5
Bank Guarantee	14,0	—	—
Accrued interest on loans and receivables to associates(2)	9,3	9,3	2,9
Tax and social security receivables	5,5	5,1	2,6
Income tax	0,3	—	—
Prepaid expenses	6,1	4,3	1,0
Other current receivables(1)	8,1	10,9	12,8
Total	**47,2**	**31,4**	**21,8**

(1) The main contributions to the other current receivables in 2011 are:

- Derivative instruments: EUR 4,3 million
- Income receivable: EUR 1,6 million
- Advances to suppliers: EUR 1,8 million.

(2) Accrued interest on loans and receivables to associates correspond to interest accrued on the different debt instruments between Altice Six and its associates. As of December 31, 2012 this caption was composed mostly of interest due on Ypso Holdings and Altice B2B Super PECs for EUR 4,3 and 5,0 respectively As of December 31, 2011 this interest amounted to EUR 4,6 and EUR4,7 million respectively. For the period ended December 31, 2010, this amount totaled EUR 2,9 million.

The Combined Group provides services on credit for an average of 16 days, 24 days and 96 days in average to its customers in the cable television field, in the in-country fixed line communications field and in the mobile communication field, respectively. The Combined Group routinely evaluates the credit that is provided to its customers, while checking their financial situations; however it does not demand collateral for those debts. The Combined Group records a provision for doubtful debts, based on the factors that affect the credit risks of certain customers, past experience and other information.

Total	**2,4**	**—**	**0,7**	**(0,6)**	**—**	**0,3**	**2,9**

(1) Provisions for litigations and other risks decreased in FY12 compared to the previous period, mainly driven by a re-evaluation of the risk of pay-out on the various royalty and retransmission fees related lawsuits faced by HOT Telecom in Israel. The reversals on the three major litigations, namely TALI, AKUM and AGICOA, amounted to EUR 3, 13,5 and 3,5 million respectively. The total reversal on provision for litigation was EUR 20 million.

In 2012, HOT Telecom also recorded an additional provision of EUR 1,9 million to cover a contested withholding tax ruling. The increase in provisions for risks and litigation was mainly driven by the finalization of the acquisition of HOT Telecom on a fully consolidated basis from FY11 onwards. A large majority of provisions for litigations were recorded at HOT Telecom, arising from claims for royalty payments from the producers of audio-visual or musical content. The main litigations for the year ended December 31, 2011 were (i) Tali, a claim for royalties by a third party on behalf of writers and directors of audio-visual content, who are producers of their own local content. This claim was provisioned for a total amount of EUR 5,8 million; (ii) A claim by AKUM, provisioned for EUR 17,3 million, also relating to claims on royalties for musical writers, composers and publishers and (iii) a provision of EUR 8,6 million, brought forward by AGICOA, for the payment of fees to audio-visual producers for the retransmission of their locally produced content.

(2) In addition to the claims mentioned above, other provisions for risk mainly concerned legal claims made by former employees for wrongful dismissal in the French Caribbean subsidiaries (EUR 0,38 million), a provision for penalties stemming from an inspection by the labour department in Martinique (EUR 0,33 million) and a wrongful termination claim by a content provider (EUR 0,15 million).

15—Employee benefits

Breakdown of the employee benefits by entity:

Green ch	2	1,4	1,2	
Total	**9,1**	**6,9**	**1,2**	

15.1 Hot Telecom

a) Defined Benefit Plans:

The portion of the severance pay payments that is not covered by deposits, is treated by the Combined Group as a defined benefit plan in accordance with which a liability is recorded in respect of employee benefits, and the Combined Group deposits amounts in central severance pay funds and in appropriate insurance policies in respect of it.

15—Employee benefits (Continued)

The Combined Group has defined contribution plans, in accordance with section 9 of the Israeli Severance Pay Law, in accordance with which the Combined Group makes regular payments without it having a legal or implicit commitment to pay additional payments even if sufficient funds have not accumulated in the funds to pay all of the benefits to an employee that relate to the employee's employment in the current period and in previous periods.

Deposits in a defined contribution plan in respect of severance pay or in respect of emoluments are recognized as expense at the time of the deposit in the plan, in parallel to the receipt of the labor services from the employee and no additional provision is required in the financial statements.

b) *Expenses reflected in the statement of comprehensive income:*

	December 31, 2012	December 31, 2011	December 31, 2010
	(in millions of euros)		
Current service cost	4,7	3,9	—
Interest expenses in respect of the benefit obligations	1,0	1,0	—

Bank overdraft	—	—	0,4
Other financial liabilities	—	0,7	0,4
Accrued interest	14,3	13,3	7,9
Current	**134,9**	**255,8**	**89,6**

During the year ended December 31, 2012, bonds include the debentures in Hot Telecom:

- The Series A’ debentures—EUR 167 million (NIS 825 million par value), linked to the Consumer Prices Index for the month of February, 2011, that bear interest at a rate of 3,9% a year. Series A’ debentures are repayable in 13 semi-annual payments commencing on September 30, 2012 and up to September 30, 2018.
- The Series B’ debentures—EUR 137 million (NIS 675 million par value) that bear interest at a fixed rate of 6,9% a year. Series B’ debentures are repayable in 13 semi-annual payments commencing on September 30, 2012 and up to September 30, 2018.

16—Borrowings and other financial liabilities (Continued)

Bonds also include Senior and Senior secured Notes in Altice Finco S.A. and Altice Financing S.A.:

- The Senior Notes in U.S. dollar, issued by Altice Finco S.A and with a face value of $ 425,0 million (EUR 322,0 million) mature on December 15, 2020 and bear coupons of 9,875% annually
- The Senior Secured Notes in U.S. dollars, issued by Altice Financing S.A. and with a face value of $460 (EUR 348,5 million) mature on December 15, 2019 and bear coupons of 7,875% annually,
- The Senior Secured Notes in Euro, issued by Altice Financing S.A and with a face value of EUR 210 million mature on December 15, 2019 and bear coupons of 8% annually.

The Senior and Senior Secured Notes are listed on the Official List of the Luxembourg Stock Exchange and traded on the Euro MTF Market of the Luxembourg Stock Exchange. The interest payment of the bonds is semi-annually on June 15 and on December 15 of each year and the first payment of the interest will be on June 15, 2013.

16.1 Covenants

16.1.1 Hot

The unsecured debentures issued on the Tel Aviv stock exchange by the Combined Group's subsidiary Hot Telecom include financial covenants measured on Hot Telecom performance, which mainly include:

- a debt to EBITDA ratio, which is not to exceed 6 for a period that exceeds two consecutive quarters;
- no distribution of a dividend at a time when Hot Telecom exceeds a debt to EBITDA ratio of 5,5.

As of December 31, 2011 and 2012, Hot Telecom was in compliance with all of the required financial covenants.

Financial covenants have been set for Hot Mobile, which include:

- the making available of a fixed charge on a Shekel deposit, in favor of the banks, in accordance with a formula that was detailed in the letter of undertaking;
- a minimal ratio between the amounts of the increase in the shareholders' equity and Mirs cumulative free cash flows; For the periods ended December 31, 2010 and December 31, 2011, HOT Mobile was in compliance of the covenants set forth in its debt contracts. This debt was refinanced at the end of 2012.

16.1.2 Altice Blue One

As part of the Altice Blue One (''ABO'') financing arranged in 2009, ABO was required to respect certain covenants calculated on the basis of its consolidated annual accounts. As of December 31, 2011, ABO was in default of its financial covenants, though it was not in default of any scheduled payments due to the lenders. As per the debt contracts, one consequence of this default could be early or accelerated repayment of the debts, if and only if such repayments are unanimously reclaimed by all of the lending agencies.

ABO's management does not believe that these covenant defaults affect in any way the ability of the Group to effectively pursue its operations. This hypothesis was supported by advanced level talks with the lending parties, and based on the fact that none of the lenders ever demanded early repayment of the loan. Thus ABO's accounts for 2012 were closed and approved based on the hypothesis outlined above. On July 2, 2013, ABO refinanced the relevant facilities with funds granted by the Group, thereby solving any default situation

As a result, the whole amount of debt has been reclassified as current borrowings from banking corporations and debentures for the three years ended December 31, 2012, December 31, 2011 and December 31, 2010.

16—Borrowings and other financial liabilities (Continued)

16.1.3 Coditel Holding

Financial covenants have been set for Coditel Holding, in the framework of the financing agreement entered into with a pool of financial institutions on December 2, 2011, based on the consolidated accounts of Coditel Holding S.A..

As of December 31, 2012, Coditel Holding S.A. was in compliance with all of the required financial covenants.

As at December 31, 2012, there were no breaches of covenants for the senior and senior secured notes mentioned in the note above.

16.2 Bonds

Issuer	Effective interest rate	Year of maturity	Carrying amount December 31, 2012	Carrying amount December 31, 2011	Carrying amount December 31, 2010
Bonds					
Hot Telecom					
—Debentures	Variable (3,9% and 6,9% + Consumer Price Index)	2018	294,4	303,8	—
—Senior Secured Notes	between 7,9% and 9,9%	2019/2020	516,7	—	—
—Senior Secured Notes	between 7,9% and 9,9%	2019/2020	322,7	—	—
Related party bonds					
—Alpecs	Variable	2057 to 2061	104,6	69,8	58,0
—Yfpecs	4,76%	2058 to 2061	4,4	4,1	3,9
—PECs	7,3786%	2037	57,6	53,6	49,9

—IFPECs	6,38%	2037	4,2	3,9	3,7
—Tracking IFPECs	6,38%	2037	5,7	5,3	5,0
—YFPECs	6,38%	2059	0,7	0,6	0,6
Nominal value of bonds			**1 456,2**	**575,4**	**246,6**
Of which due within one year			25,4	12,4	—
Of which due after one year			1 430,8	563,0	246,6

The carrying amount of bonds amounted to EUR 1 431,0 million (2011: EUR 563,0 million). This value includes accrued interest of EUR 3,3 million on Alpecs (Altice VII) and EUR 8,6 million on Pecs (Coditel holding).

As at the end of 2011, fair value of PECs issued by Coditel Holding is assumed not to be significantly different from their book value, as far as interest rate of 12,98% result from contracts signed in December 2011.

16.3 Subordinated financial instruments

Subordinated financial instruments have been issued by the following companies :

a) Altice VII

Subordinated financial instruments consists of:

- YFPECs: Yield Free Preferred Equity Certificates;
- ALPECs: Asset Linked Preferred Equity Certificate;
- ALN: Asset Linked Notes

16—Borrowings and other financial liabilities (Continued)

Different categories of subordinated financial instruments are summarized in the table below (YFPECs are presented before impact of discounting):

Name	Maturity date	Interest rate	Convertible	Principal amount as at the end 2011	Principal amount as at the end 2012
				(in millions of euros)	
ALPECs A	14/05/2058	Loan Auberimmo—25 bp	No	1,0	1,0
ALPECs B1	31/12/2057	Loan ABO—25 bp	No	4,5	4,5
ALPECs B3	31/07/2058	Loan ICC France—25 bp	No	1,0	—
ALPECS F (US dollar)	27/05/2059	Loan Mirs—25 bp	No	—	—
ALPECS H	16/11/2060	Business Unit—25 bp	No	59,0	68,9
ALPECS I	28/02/2061	0%	No	—	11,3
ALPECS J	03/08/2061	Business unit yield	No	—	4,0
ALPECS J	02/10/2061	Business unit yield	No	—	7,7
ALPECS J	13/11/2061	Business unit yield	No	—	3,9
Total				**65,5**	**101,3**

Conversely, according to our appreciation, and upon a strict application of IAS 32/39, following instruments have to be classified as debt instruments:

- ALPECs instruments (about EUR 101,3 Million as at the end of 2012);
- YFPECs instruments (about EUR 36,3 Million as at the end of 2012).

The YFPECs have been valued using a discount rate of 4,76% given its preferred interest rate which therefore values the liabilities at EUR 4,4 million as at December 31, 2012.

Name	Maturity date	Interest rate	Convertible	Amount as at the end 2010 (including interests)
				(in millions of euros)
ALPECs A	14/05/2058	Loan Auberimmo—25 bp	No	4,6
ALPECs B1	31/12/2057	Loan ABO—25 bp	No	4,5
ALPECs B3	31/07/2058	Loan ICC France—25 bp	No	1,0
ALPECS F (US dollar)	27/05/2059	Loan Mirs—25 bp	No	46,4
ALPECS H	16/11/2060	Business Unit[1]—25 bp	No	
Total				**56,5**

(1) As per the agreements, Business Unit means any interests and proceeds received by the Issuer by virtue of the Subsidiary's PECs. Each instrument is linked to a specific acquisition and hence to a specific asset.

Conversely, according to our appreciation, and upon a strict application of IAS 32/39, following instruments have to be classified as debt instruments:

- ALPECs instruments (about EUR 65,5 million nominal value as at the end of 2011);
- YFPECs instruments (about EUR 35,2 million nominal value as at the end of 2011).

The YFPECs have been valued using a discount rate of 4,76% given its preferred interest rate which therefore values the liabilities at EUR 4,1 million as at December 31, 2011.

16—Borrowings and other financial liabilities (Continued)

b) Altice Six

Subordinated financial instruments consists of:

- YFPECs: Yield Free Preferred Equity Certificates;
- IFPECs: Interest Free Preferred Equity Certificate;
- PECs: Preferred Equity Certificates
- Super PECs: Super Preferred Equity Certificates
- Tracking IFPECs: Tracking Interest Free Preferred Equity Certificate;

The IFPECs, YFPECs and certain non bearing interests PECs at Altice Six have been valued using a discount rate of 6,38% given its preferred interest rate which therefore values the debt at EUR 97,0 million for the year ended December 31, 2012 (EUR 92,5 million for the year ended December 31, 2011 and EUR 87,2 million for the year ended December 31, 2010). As all the subordinated financial instruments mentioned above are non-convertible instruments, they are classified as debt in the local accounts of Altice Six and no reclassification was required in the combined accounts prepared as per the IFRS standards.

c) Coditel Holding

Subordinated financial instruments in Coditel Holding S.A. consist of PECs (Preferred Equity Certificates). Each PEC bears a yield and shall have a maturity of 49 years.

As at the end of 2012, the total of PECs instruments amounts to EUR 61,8 million (including interests):

Name	Issuing date	Maturity date	Number of instruments	Nominal value per instrument	Interest rate	Convertible?	Amount as at the end of 2011	Amount as at the end of 2012
			(in millions)	(in euro)			(in millions of euros)—including interests	
PECs C	30/06/2011	30/06/2060	44,2	1	12,98%	No	44,2	51,4

17—Financial risk factors

In the course of its business, the Combined Group is exposed to a number of financial risks: credit risk, liquidity risk, market risk (including foreign currency risk and interest rate risk), commodity price risk and other risks (including equity price risk and settlement risk). This note presents the Combined Group's objectives, policies and processes for managing its financial risk and capital.

Financial risk management is an integral part of the way the Combined Group is managed. The Board of Directors establishes the Combined Group's financial policies and the Chief Executive Officer establishes objectives in line with these policies.

The Combined Group is not subject to any externally imposed capital requirements.

17.1 Credit risk

The Combined Group does not have significant concentrations of credit risk. The credit risk may arise from the exposures of commitments under a number of financial instruments with one body or as the result of commitments with a number of Combined Groups of debtors with similar economic characteristics, whose ability to meet their commitments could be similarly affected by economic or other changes.

Qualities that could cause a concentration of risk include the significance of the activities that the debtors are involved in, such as the branch in which the geographical region in which they conduct their activities and the level of their financial stability.

The Combined Group's income mainly derives from customers in Israel, in the French Overseas Territories and in Europe (Belgium, Luxembourg, France and Switzerland). The Combined Group regularly monitors its customers' debts and provisions for doubtful debts are recorded in the financial statements, which provide a fair value of the loss that is inherent to debts whose collection lies in doubt.

The Combined Group does not have significant concentration of credit risk, as a result of the Combined Group's policy, which ensures that the sales are mostly made under standing orders or via credit cards.

17.2 Liquidity risk

Ultimate responsibility for liquidity risk management rests with the management, which have established an appropriate liquidity risk management framework for the management of the short, medium and long-term funding and liquidity management requirements of the Combined Group. The Combined Group manages liquidity risk by maintaining adequate reserves, banking facilities and reserves borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

17.3 Market risks

The Combined Group is exposed to risk from movements in foreign currency exchange rates, interest rates and market prices that affect its assets, liabilities and anticipated future transactions.

17.3.1 Interest rate risk

Interest rate risk comprises the interest price risk that results from borrowings at fixed rates and the interest cash flow risk that results from borrowings at variable rates.

The Combined Group has an exposure to risk in respect of changes in the interest rate in the market, deriving from long-term loans that have been received and which bear variable rate interest.

17—Financial risk factors (Continued)

Interest structure of non-current financial debt (including interest effects of derivatives):

	December 31, 2012	December 31, 2011	December 31, 2010
	(in millions of euros)		
Financial debt at fixed rates	1 698,3	655,3	316,8
Financial debt at variable rates	287,1	834,6	88,3
Total	**1 985,4**	**1 489,9**	**405,1**

Sensitivity tests for changes in interest rates are described as follows:

	December 31, 2011	December 31, 2010
	(in millions of euros)	
Increase of 0.5% in the interest rate	0,4	(3,2)
Decrease of 0.5% in the interest rate	(0,4)	1,0

17.3.2 Israeli CPI risk

The Combined Group has borrowed from banks and issued debentures that are linked to the changes in the Israeli CPI. Also, the Combined Group has deposits and gave loans that are linked to the changes in the Israeli CPI. The net amount of the financial instruments that are linked to the Israeli CPI and for which the Combined Group is exposed to changes in the Israeli CPI amounted to approximately EUR 0,5 million (Hot Telecom) as of December 31, 2011.

The Combined Group has borrowed from banks and issued debentures that are linked to the changes in the Israeli CPI. Also, the Group has deposits and gave loans that are linked to the changes in the Israeli CPI. The net amount of the financial instruments that are linked to the Israeli CPI and for which the Group is exposed to changes in the Israeli CPI amounted to approximately EUR 247 million as of December 31, 2012.

17.3.3 Foreign currency risk

The Combined Group is exposed to foreign currency risk from transactions and translation. Transactional exposures are managed within a prudent and systematic hedging policy in accordance with the Combined Group's specific business needs. Translation exposure arises from the consolidation of the financial statements of foreign operations in euros, which is, in principle, not hedged. The Combined Group's objective is to manage its foreign currency exposure through the use of currency forwards, futures, swaps and options.

Exchange differences recorded in the income statement represented a loss of EUR 14,0 million in 2011 (2010: gain of EUR 33,8 million). They are allocated to the appropriate headings of expenses by function.

The Combined Group estimates that a 10% variation of foreign currencies against euro parity is a relevant change of variables and reasonably possible risk in a year and the chart presented below allows

17—Financial risk factors (Continued)

assessing the impact of a 10% increase of foreign currencies against euro on net result and reserves. A 10% decrease would have a symmetrical impact with the same amounts but in the opposite direction.

	December 31, 2012		
	Israeli Shekel	Swiss Franc	Total
	(in millions of euros)		
Profit for the year			
Increase of 10% in exchange rate	(12,9)	(0,1)	(13,1)
Decrease of 10% in exchange rate	12,9	0,1	13,1
Equity			
Increase of 10% in exchange rate	23,3	3,0	26,3
Decrease of 10% in exchange rate	(23,3)	(3,0)	(26,3)

	December 31, 2011		
	Israeli Shekel	Swiss Franc	Total
	(in millions of euros)		
Profit for the year			
Increase of 10% in exchange rate	(10,7)	(0,1)	(10,9)
Decrease of 10% in exchange rate	10,7	0,1	10,9
Equity			
Increase of 10% in exchange rate	(1,3)	(2,1)	(3,4)
Decrease of 10% in exchange rate	1,3	2,1	3,4

	December 31, 2010		
	Israeli Shekel	Swiss Franc	Total
	(in millions of euros)		
Profit for the year			
Increase of 10% in exchange rate	(0,7)	(1,9)	(2,6)
Decrease of 10% in exchange rate	0,7	1,9	2,6
Equity			
Increase of 10% in exchange rate	(6,2)	(0,3)	(6,5)
Decrease of 10% in exchange rate	6,2	0,3	6,5

17.3.4 Price risk

The Combined Group has investments in listed financial instruments, shares and debentures that are classified as available-for-sale financial assets and financial assets at fair value through profit or loss in respect of which the Combined Group is exposed to risk of fluctuations in the security price that is determined by reference to the quoted market price.

As of December 31, 2011, the carrying amount of these investments was EUR 8,5 million. An increase/decrease in the asset's market price of 10% would result in a change of EUR 0,850 million in the carrying amount of these investments.

As of December 31, 2012, the carrying amount of these investments was EUR 5,7 million. An increase/decrease in the asset's market price of 10% would result in a change of EUR 0,570 million in the carrying amount of these investments.

17—Financial risk factors (Continued)

17.4 Sensitivity tests in respect of a change in market factors

The sensitivity analysis in respect of financial instruments was performed under the assumption that the amount that was in force as of the statement of financial position date was in force throughout the reporting period.

The changes that have been selected as variables for the relevant risk were determined in accordance with management's assessment in respect of the possible reasonable changes in those risk variables.

17.5 Gearing computation

Gearing ratio (net debt/total invested equity) amounts is as follows:

Combined statement of financial position	December 31, 2012	December 31, 2011	December 31, 2010
		(in millions of euros)	
Net Debt (short term and long term)	1 681,9	1 197,5	166,5
Invested Equity	272,9	367,2	233,9
Non-controlling interests	5,2	349,2	0,4
Total equity	278,1	716,4	234,3
Total equity and liabilities	2 937,7	2 695,0	779,2
Gearing	**6,1**	**1,7**	**0,7**

18—Trade and other payables

	December 31, 2012	December 31, 2011	December 31, 2010
		(in millions of euros)	
Trade payable	311,4	208,1	53,0
Trade payables—acquisition of assets	2,9	3,5	9,2
Corporate and social security contributions	24,5	26,2	4,7
Corporate income tax payable	10,7	7,2	2,4
Current Deferred revenue	34,1	31,3	17,7
Other payables	38,9	37,4	12,6
Liabilities from related parties	0,2	—	2,3
Total	**422,7**	**306,5**	**101,9**

Most of the trade payables' and other payables' increases as of December 31, 2011 is a result of the Coditel and Hot Telecom business combination and related to Cabovisao as of December 31, 2012.

19—Other non-current liabilities

	December 31, 2012	December 31, 2011	December 31, 2010
Trade payables—acquisition of assets	5,9	—	—
Non-current Deferred revenue	—	9,4	0,7
Deferred revenue	10,8	—	—
Other payables	32,9	15,3	—
Total	**49,5**	**24,7**	**0,7**

Other payables correspond to Israeli non-current payables: interest payable, royalties to the Israeli government, income in advance from customers (Hot Telecom Business combination).

20—Classification and fair value of financial assets and liabilities

On December 31, 2012 ,2011 and 2010, the principles for measuring financial instruments and their market value breaks down as follows:

	December 31, 2012					
			Fair Value			
	Book value	Amortized cost	Fair value through profit/loss	Assets available for sale	Loans & Receivables	Derivative instruments
			(in millions of euros)			
Current assets						
Cash and cash equivalents	129,7	129,7	—	—	—	—
Trade receivables	150,8	150,8	—	—	—	—
Other receivables	37,9	37,9	—	—	—	—

The classification of financial instruments in accordance with hierarchical levels for fair values:

The financial instruments that are presented in the statement of financial position in accordance with their fair value are classified in accordance with groups that have similar characteristics, into hierarchical levels for fair values, as aforesaid, which are determined in accordance with the source of the input that was used for determining the fair value:

- Level 1—Quoted prices (without adjustments) in an active market for identical assets and liabilities. As of December 31, 2011 the Combined Group has no financial assets or liabilities that meet the definition of Level 1.
- Level 2—Inputs other than quoted prices that are included in level 1, which can be observed directly or indirectly.
- Level 3—Inputs that are not based on observable market data (an evaluation technique that does not use observable market data).

20—Classification and fair value of financial assets and liabilities (Continued)

As result, as of December 31, 2012, classifications of financial instruments are as follows:

	December 31, 2012			
	Level 1	Level 2	Level 3	Total
	(in millions of euros)			
Financial liabilities at FVTPL				
Other derivatives financial liabilities	—	62,5	—	62,5
AFS				
AFS HOT Telecom (Level 1)	6,1		—	6,1
	6,1	**62,5**	**—**	**68,6**

The notional principal amounts of the outstanding forward foreign exchange contracts at December 31, 2012 as follows:

FX Forward contract: USD 550 million, the maturity date will be on December 15, 2017 and swap to NIS at the aggregate rate of 4,1700, this contract relates to a hedge of the notional of the debt and also the rate accretes up to 4,17 in December 15, 2017;

FX Forward contract: USD 98,9 million, the maturity date is based on the interest date payment from June 17, 2013 to December 15, 2017 and swap to NIS at the aggregate rate of each interest payment period, this contract is related to interest rate hedging, exchanging fixed Euro and USD interest payments into fixed NIS payments.

FX Forward contract: EUR 40,1 million, the maturity date is based on the interest date payment from June 17, 2013 to December 15, 2017 and swap to NIS at the aggregate rate of each interest payment period, this contract is related to interest rate hedging, exchanging fixed Euro and USD interest payments into fixed NIS payments.

The notional principal amounts of the outstanding forward foreign exchange contracts at December 31, 2012 as follows:

Cross currency swap: USD 200 million, the maturity date will be on December 15, 2017 swap NIS at the aggregate rate of 7,7550%,

Cross currency swap: USD 225 million, the maturity date will be on December 15, 2017 swap NIS at the aggregate rate of 5,6850%,

Cross currency swap: EUR 100 million, the maturity date will be on December 15, 2017 swap NIS at the aggregate rate of 5,7750%.

Those contracts are effectively fixed Euro and USD interest payments in NIS.

As of December 31, 2012, classification of financial instruments' issue are as follows:

	For the year ended December 31, 2012			
	Recorded Value in Condensed Combined Statement of Financial Position	Level 1 Quoted Prices in active markets for identical assets/liabilities	Level 2 Significant other observable inputs	Level 3 Inputs that are not based on observable market data
	(in millions of euros)			
Recurring Fair Value Measurements				
Financial assets				
—Partner Communication Co.	5.7	5.7	—	—
Financial liabilities				
—Derivatives financial liabilities at FVTPL	62.5	—	62.5	—

20—Classification and fair value of financial assets and liabilities (Continued)

As of December 31, 2011, classification of financial instruments' issue mainly concerns HOT Telecom perimeter:

HOT Telecom

	As of December 31, 2011	
	Level 2	Level 3
	(in millions of euros)	
Available for sale financial asset:		
Shares		8,5
Financial assets at fair value through profit or loss:		
Forward contracts in foreign currency that are not defined as accounting hedges	5,1	
Financial liabilities at fair value through profit or loss:		
Embedded derivatives	(0,4)	
Interest rate swap contract	(0,2)	
Liability to the Ministry of Communications		(3,8)
	4,5	4,7

21—Taxes income

21.3 Reconciliation between the effective tax rate and the theoretical tax rate

	December 31, 2012	December 31, 2011
	(in millions of euros)	
Net income	**(180,2)**	**162,0**
Share of net income—associates	**(20,4)**	**(58,6)**
Share of net income—equity holders	**(200,6)**	**103,4**
Tax charge [(−) expenses/(+) income]	(26,0)	32,5
Earnings/(Loss) before tax	**(226,6)**	**135,9**
Theoretical tax rate	28,80%	28,80%
Income tax calculated on theorical tax	65,3	(39,1)
Impact of:		
Effect of different tax rates of subsidiaries depending in other jurisdictions	(5,8)	
Permanent differences	(53,6)	2,0
Restatements without tax impact	12,1	10,6
Utilization of previously non capitalized tax credit	20,0	3,6
Carry-back	0,1	(0,2)
Tax loss carry forwards of the periods non activated	(13,2)	(9,7)
Effect of unused tax losses not recognized as Deferred tax asset	1,0	0,3
Effective Tax	**26,0**	**(32,5)**
Effective tax rate	**14,43%**	**20,06%**

The permanent differences mainly consist of:

- Reversal of the amortization of goodwill booked in the annual accounts of Solution 25 (Green.ch) for an amount of EUR 1,1.
- Elimination of a profit on internal operation on the sale of the shares of HOT Mobile by Altice Securities S.à r.l. to HOT Telecom Ltd, amounting to EUR 10,8 million.

21.4 Tax assessments

In December 2009 and in the course of the year 2010, HOT received tax assessments for the 2006-2008 tax years, in accordance with section 145(A)(2)(b) of the Income Tax Ordinance. In accordance with the tax assessments, expenses amounting to approximately EUR 220 million were adjusted for HOT for tax purposes as of the end of the year 2008, and this was as a result of a disagreement between HOT and the Tax Authority in Israel, primarily in respect of the pace of the recognition of depreciation expenses in respect of the cables network and additional issues. If the said position of the Tax Authority in relation to the assessments that were issued to HOT in respect of the 2006, 2007 and 2008 tax years is received, HOT will be exposed to a demand for the payment of tax in a cumulative amount of EUR 24 million. Linkage differentials and interest will be added to this amount. Furthermore, HOT will be exposed to a demand for the payment of additional taxation in significantly larger amounts in respect of the tax years after 2008.

HOT's management, on the basis of its position in the self-assessments and based upon its legal advice, has presented an objection against the tax assessments for the years 2006 - 2008 and in the opinion of HOT's management and its professional advisers, HOT has well founded complaints against the claims made in the tax assessments for the years 2006 - 2008, which could significantly change the results of the tax assessments for those years and could also significantly change the implications deriving from them in respect of the tax years after 2008.

21—Taxes income (Continued)

At the present time, discussions are being held on the assessments, within the framework of Stage B for the years 2006 - 2008 and within the framework of Stage A for the 2009 - 2010 tax years. A number of issues have come within the framework of the discussions including the manner of the depreciation of the cables network infrastructure and the manner of the amortization of the intangible assets—brand, goodwill and customer connections. Up to the time of the publication of the financial statements, no assessment has yet been issued in respect of the aforesaid.

A provision of EUR 2 million has been recorded within the framework of the financial statements in respect of HOT estimated exposure in respect of the dispute with the tax authorities in respect of open tax years.

HOT has been issued with final tax assessments up to and including the 2005 tax year. The consolidated companies HOT Vision, HOT Haifa and HOT Eidan have been issued with final tax assessments up to and including the 2001 tax year. The consolidated companies HOT Edom and HOT Net (formerly HOT Investments and Finance) have been issued with final tax assessments up to and including the 2002 tax year. The consolidated company HOT T.L.M. has been issued with final tax assessments up to and including the 2004 tax year. The consolidated companies Drom Hasharon and HOT Properties have been issued with final tax assessments up to and including the 2008 tax year.

The consolidated companies HOT T.L.M., HOT Eidan and HOT Haifa have tax assessments that are considered to be final up to and including the 2005 tax year. The consolidated company HOT Mobile have tax assessments that are considered to be final up to and including the 2008 tax year. The consolidated companies HOT Vision, HOT Edom and Hot Net (formerly HOT Investments and Finance) have tax assessments that are considered to be final up to and including the 2007 tax year. The said assessments are considered to be final subject to the powers that have been afforded to the Director of the Tax Authority in Israel in accordance with section 145, 147 and 152 of the Income Tax Ordinance.

21.4.1 Cabovisao

Cabovisao is subject to corporate income tax at the rate of 25%, increased by a municipal surcharge at the applicable rate up to 1.5%, resulting in an aggregate rate of a maximum of 26.5%. Additionally, any taxable profit in excess of EUR 1,5 million is subject to a State surcharge of 3%, being 5% if the taxable net, or exceeds EUR 10 million, according to article 87-A of the corporate income tax law.

In accordance with the article 88 of the corporate income tax law, Cabovisao is subject to autonomous taxation over some costs incurred by Cabovisao at the rates provided for in the above-mentioned article.

In accordance with current legislation, tax returns are subject to review and correction by the tax authorities during a four-year period or, if tax losses are carried forward or a deduction or tax credit used, for the period for which such right is exercised (five years for Social Security). These periods can be suspended when there are tax inspections, claims or appeals in progress. Consequently, Cabovisao's tax returns for the years 2009 to 2012 are subject to review by the tax authorities.

Cabovisao was subject to an inspection from the Portuguese tax authorities for the fiscal years 2003 to 2006, and the outcome was the following:

Notification for fiscal year 2003 to adjust tax losses by EUR 7,2 million and an additional payment of stamp taxes for fiscal years 2000 to 2002 in the amount of EUR 1,3 million. The Company did not agree with the additional payment of stamp taxes, having claimed through a lawsuit appeal against the Portuguese Tax Authorities, presenting a bank guarantee in the amount of EUR 1,7 million. During the year ended August 31, 2011, the Almada Administrative and Fiscal Court decided the appeal was unfounded. Cabovisao has appealed against that decision before the Almada Administrative and Fiscal Court.

Assessment of the Portuguese Tax Authorities related to 2005, requests an adjustment to tax losses in the amount of EUR 17,1 million, as well as an additional tax payment in the amount of EUR 4 million, for withholding tax and stamp tax. Cabovisao paid EUR 2,6 million and contested this decision of the

21—Taxes income (Continued)

assessment through a gracious complaint and hierarchical appeal, but has not received the final decision yet. The unpaid amount of, approximately, EUR 1 million, was contested by hierarchic appeal. In the year ended 31 August, 2012, the Corporate Tax accepted the claim. As of the date of this report, there were not any subsequent deliberations after that decision.

For 2006, an assessment of tax payable on withholding tax linked to interest due to CSII in the amount of approximately EUR 4,9 million. Cabovisao doesn't agree with this assessment, having filed a gracious complaint and submitted a bank guarantee in the amount of approximately EUR 6,8 million. As of December 31, 2012, the administrative and tax court of Almada didn't pronounce on that claim, therefore it wasn't taken any subsequent deliberations.

The Board of Directors believes that any adjustments resulting from tax revisions to the tax returns of these exercises, taking into account the provisions recorded will not have a significant effect on the financial statements on December 31, 2012.

21.5 Unrecognized deferred tax assets

As at December 31, 2012, unrecognized deferred tax assets amount to EUR 86,1 million and split as follows:

- Cool Holding: EUR 21,2 million,
- Coditel Holding Lux S.à r.l.: EUR 13,6 million,
- Cabovisao: EUR 51,3 million.

As at December 31, 2011, unrecognized deferred tax assets amount to EUR 33,4 million and split as follows:

- Cool Holding: EUR 26,7 million
- Coditel Holding Lux S.à r.l.: EUR 5,8 million
- Coditel Brabant: EUR 0,9 million

22—Segment analysis

22.1 Definitions of segments

Given the geographic spread of the various Group entities, it logically follows that an analysis and control by geography is inalienable to Group strategy of managing its different businesses. It has thus been decided by the central management team to analyse the business across geographies and then by activity. The following geographies have been identified:

- Israel,
- Belgium and Luxembourg (Western Europe),
- France (Western Europe)
- Portugal (Western Europe),
- French Overseas Territories (Antilles and Indian Ocean),
- Other (Switzerland, Africa etc.).

Activities have been split as follows:

- Cable,
- Mobile,
- Others (B2B/Content/etc.).

22—Segment analysis (Continued)

22.1.1 Operational non-IFRS KPIs

It has also been decided by the central team that local operational teams in each geography shall report operational KPIs every week and operational and financial KPIs every month using a standard reporting format defined by the central team.

The main operational KPIs that will be tracked will be:

- Subscriber base evolution (both cable and mobile),
- ARPU (Average Revenue per Unit) (cable and mobile),
- Other relevant cost drivers.

These KPIs are benchmark indicators followed throughout the industry and allow for a thorough and accurate analysis of the business and strategic decision making.

22.1.2 Financial non-IFRS KPIs

Each local operational company will also report the following financial KPIs by segment:

- Revenues (Cable/Mobile/Other),
- Cost of Sales (Cable/Mobile/Other),
- Capex (Cable/Mobile/Other).

The central team believes that given the uniformity in the accounting and nature of operating expenses and given the experience and competence of the Group in managing operating costs, the main indicator that can vary between business units is the gross margin.

HOT Telecom however will report EBITDA on cable and mobile, in addition to the KPIs mentioned above. This derives from the size of the mobile business and the fact that historically, this business had separate reporting for these two activities and also because local regulation require operators to report the EBITDA on these segments.

Capital expenditure (Capex) is an important indicator to follow, as the profile varies greatly between the two activities:

- The cable business has small fixed Capex requirements and initial Capex is quite low, but variable Capex is high, as an increase in customers drives the cash needs for Customer Premise Equipment (CPE) and installation.
- Mobile Capex is one-off and mainly driven by investment in new mobile sites and licences to operate. Once the Capex is engaged and the business operational, there is limited Capex requirement.

Thus, the central team places a great emphasis on the proper tracking of capital expenditures and reviewing them against the costs budgeted for the year.

Management believes that operations in Switzerland and activities such as B2B sales are not yet substantial enough to warrant a separate reporting segment and will be reported under ‘Others’. However, as these activities grow, it is intended that they are also reported under a separate segment with relevant operating KPIs specific to the activity. Financial KPIs are expected to remain the same. The same applies to any new line(s) of business that the Group may decide to venture into (for e.g., content etc.).

22—Segment analysis (Continued)

22.2 Regional specificities

22.2.1 Israel

Israel is currently an important contributor to the Group revenues and EBITDA and, for this reason, is classified as a separate region. Apart from this, this region has particularities that differentiate it.

It is characterised by a high broadband and cable penetration and the general population is very technology focussed. The market is maturing but highly regulated, which means that while opportunities for growth exist, they may be limited by specific regulatory challenges and also by high competition, thus leading to price pressures on ARPU development.

Triple play penetration is low and this represents the biggest development path. Customer retention is difficult as contractual terms heavily favour the customer and, hence, price increases, even when coupled with high value content, can be negatively perceived and lead to an erosion of the customer base.

The regulatory environment does not yet allow for quadruple play packages, which heavily restricts achieving full integration and operational synergies with the mobile business. The prevailing political environment in the region can also have adverse impacts on the development of the business, as a deterioration of the situation may have serious repercussions on the market environment and may even lead to physical damage of the infrastructure.

22.2.2 Belgium and Luxembourg

Even though Belgium/Luxembourg and Portugal can be considered to be the same sub-region, the challenges posed by these two regions are quite distinctly different.

The Belgian and Luxembourg territories have a high standard of living and well developed economies, which translates into higher prices for services. The markets are quite mature, with high broadband penetration and a high percentage of triple play customers. Customers are willing to pay more for premium services (high ARPU/subs) and hence price pressures are low.

These regions are marked by the presence of many well established cable operators and customer retention is a key factor in maintain strong profit margins.

Given the density and presence of mobile operators, the mobile strategy is driven by MVN operations, which allows the presence of quadruple play packages.

22.2.3 France

The French market is a large and mature market with high cable penetration and a large consumer base. French operations represent the oldest and largest part of the cable operations of the combined Group to date.

This region is marked by the presence of many well established cable operators and customer retention is a key factor in maintain strong profit margins. Competition is tough and innovations in cable technology, such as Fiber to the home (FTTH) are driving market growth. Incumbent operators are slowly migrating to fiber optic based networks which gives the Group a head start in capturing the ultra-high speed internet market, given its pre-existing high density cable network.

Given the density and presence of mobile operators, the mobile strategy is driven by MVN operations, which allows the presence of quadruple play packages.

22.2.4 Portugal

The Portuguese market is marked by a high concentration of double play subscribers and a mature telecommunications market, which, when coupled with slow economic recovery after the crisis, makes it

22—Segment analysis (Continued)

difficult to achieve high sales growth. This market is marked by high subscriber attrition and downward migration from high to low ARPU offers.

The challenge in Portugal is to maintain a subscriber base and then slowly migrating the customer base from double play to triple play offers.

22.2.5 French Overseas Territories

The French Overseas Territories represent an attractive market with high scope of growth in cable operations, owing to relatively limited competition and relatively low cable penetration. There is also a large scope for synergies between the cable and mobile businesses, as triple play penetration remains low and regulatory flexibility allows the marketing of quadruple play options.

Price pressures are low in these markets and customers are willing to pay more for value added services. Double play (TV and Internet) offers are predominant in these regions and the migration of new and existing customers to triple and quadruple play packages in the future will be an important factor in growing sales.

There are other opportunities for growth in the sector, most notably in the e-banking sector.

22—Segment analysis (Continued)

22.2.6 Segment information

Details regarding revenues, cost of sales and gross profit for our cable, mobile and other segments are as follows:

	December 31, 2012						
	Total	Belgium & Luxembourg	France	Israel	French Overseas Territories	Portugal	Others

23—Operating expenses

	December 31, 2012	December 31, 2011	December 31, 2010
	(in millions of euros)		
Other operating expenses	(248,9)	(195,4)	(21,9)
Other sales and marketing expenses	(80,1)	(64,4)	(11,6)
General and administrative expenses	(58,2)	(51,3)	(31,7)
Total Operating expenses	**(387,2)**	**(311,1)**	**(65,2)**

The increase in operating expenses at Combined Group level between FY10 and FY11 is mainly explained by the various acquisitions made by the Combined Group in FY11. The acquisition of Coditel Brabant and Coditel S.à r.l. and the change in consolidation method for HOT led to a EUR 114,5 million increase in Technical and Maintenance costs.

24—Other incomes and expenses

	December 31, 2012	December 31, 2011	December 31, 2010
	(in millions of euros)		
Other incomes and expenses	(24,9)	(5,3)	(8,3)
Disposal of tangible assets—selling price and book value of disposal/tangible assets	(4,8)	(0,3)	0,8
Other expenses, net	**(29,8)**	**(5,6)**	**(7,4)**
Gain arising on step acquisition[(1)]		134,8	1,0
Other revenues	—		
Expenses from prior periods[(2)]	8,3	(7,5)	(3,9)
Restructuring costs[(3)]	(22,4)	(0,1)	(0,2)
Subvention	(6,7)	—	0,2
Reorganization and non-recurring costs	**(20,8)**	**127,2**	**(2,9)**
Total	**(50,6)**	**121,6**	**(10,3)**

(1) In the prior year, the gain from achieving control is linked to acquisition of Hot Telecom: the amount of the investment in HOT Telecom prior to achieving control, in accordance with the equity method of accounting has been revalued in accordance with the HOT's share price as of the said time, such that in the Altice VII financial statements as of December 31, 2011 income has been recorded on the revaluation of the investment in the affiliate, which became a consolidated company; as a result, HOT's assets and liabilities previously accounted for in accordance with equity method of accounting have been revalued for EUR 133,0 million.

(2) The increase in expenses from prior periods is mainly explained by fines and penalties paid by HOT relating to the early breakage of mortgage contracts and disputes with other suppliers. The total charge registered was of EUR 22.8 million, offset by a reversal in the provision for these charges for EUR 7.7 million, thus resulting in a net expense of EUR 14.9 million.

(3) Restructuring costs refer to the non-recurring costs incurred by Cabovisao in the year ended December 31, 2012, arising from the restructuring carried out at this company level, post-acquisition by the Group. The costs engaged are made up entirely of personnel costs and are associated with dismissal indemnities paid to employees.

25—Net Finance costs

26—Transaction with related parties

26.1 Trading and financial transaction

Transactions with related parties mainly related to the companies Adevintel, Titan consulting and DOK, all consulting firms specialized in the management and operations of telecom companies. The fees paid to these companies include recurring fees paid based on service level agreements established with Altice VII, one-off success fees for the successful completion of acquisitions or negotiations with banks on debt contracts/bond issuance and reimbursement of any outlays and expenditures incurred by the employees of these companies when working on behalf of Altice VII.

Compensation of key management personnel

The compensation given to the managers, in respect of their duties as Chairman of the Executive Board or member of the Executive Board of Altice VII, for the financial year 2012, was EUR 1,7 million compared to EUR 0,9 million for the financial year 2011.

28—Contractual obligations and commercial commitments

28.1 Hot Telecom Commitments

28.1.1 Commitments

- Royalties to the Ministry of Communications and other payments to the government
- a) HOT is committed to pay annual royalties out of its overall income that are chargeable with royalties (hereinafter—the chargeable income) in accordance with the Telecommunications Regulations (Concessions)—1987. In accordance with the Telecommunications Regulations (Telecommunications and Broadcasting) (Royalties)—2001, HOT Telecom is required to pay annual royalties in respect of its income from in country operator services and HOT Mobile is required to pay annual royalties in respect of its radio telephone services (less payments to another license holder in respect of reciprocal connection or roaming services). The royalty rates that HOT, HOT Telecom and HOT Mobile have each been charged to pay in respect of their chargeable income, as aforesaid, stood at 2,5% in 2007, 2% in 2008, 1,5% in 2009 and 1% in 2010. In accordance with a Temporary Order, the annual royalty rate for the years 2011 and 2012 stood at 1,75%.

28—Contractual obligations and commercial commitments (Continued)

- In accordance with the Amendment to the Telecommunications Regulations (Concessions) and the Amendment to the Telecommunications Regulations (Telecommunications and Broadcasting) (Royalties) (Temporary Order)—2012, as from 2013 the royalty rate that is paid by HOT, HOT Telecom and HOT Mobile on its chargeable income, as aforesaid, stands at 0%.
- b) In July 2001 the cables companies, including HOT, entered into a commitment under an agreement with the State of Israel on the subject of a solution to the disputes between the cable companies and the State in respect of the right of each company to operate the existing cables infrastructure in each of the concession areas after the end of the period of the concessions. It was stipulated in the agreement that the State undertakes to waive all of its claims and its rights in respect of the cables infrastructure such that each cables company would be the owner of all of the rights, including property rights, in the cables infrastructure that it held in the area of its concession and that it would have available to it the right to continue to operate it even at the end of the concession period. In consideration for this, it was stipulated that each company was to pay to the State, on an annual basis and for a period of 12 years (commencing on January 1, 2003), its relative share, as determined in the agreement, of an amount that is equivalent to the multiple of certain incomes (as determined in the agreement) of each of the cable companies on a graduated scale (in accordance with the level of income, as aforesaid) at a rate of from 0% to 4%. The relative share of each company can be altered by agreement between the cables companies.
- In addition, it was stipulated that each company is to pay approximately 12% of the overall consideration from the sale of operations that are executed through the cables infrastructure or which touch upon the cables infrastructure (as defined in the agreement) for a period of 12 years. It was also stipulated in the agreement that in so far as HOT has received any amount whatsoever in consideration for the issuance of its shares to the public or to an external investor or in consideration for the sale of shares of another company from among the cables companies, part of the consideration from the issue or the sale, as aforesaid, is to serve as an advance payment for the payment of the relevant portion of the consideration that remains to be paid under the agreement, in accordance with a formula that will be determined by the parties by agreement. It is further stipulated in the agreement that it shall apply to the cables companies or to any company that is split or merged even if structural changes are made of any sort whatsoever, and accordingly, with the completion of the merger, the agreement applies to HOT as a merged company.
- c) In accordance with the Wireless Telegraph Regulations (Licensing, Certification and Levies)—1978, HOT Mobile is required to pay a fixed annual payment for each frequency that it uses. HOT Mobile paid amounts of NIS 26 million and NIS 20 million in respect of the years 2012 and 2011 respectively (an amount of NIS 2 million in respect of December 2011).
- d) The license to operate a broadcasting center: It is stipulated in the broadcasting center operating license that the license holder is to pay a fee for the license at such rates and at such times as may be determined by the Ministry of Communications in accordance with the Communications Law and the Wireless Telegraph Ordinance (New Version)—1972.
- Other royalties.
- a) Within the framework of the Group's routine operations in the broadcasting field, the Group enters into commitments under arrangements and agreements under which the Group pays royalties to various authors' organizations. The amounts of the royalties that have been reflected by the Group within this context in the years 2012, 2011 and 2010 amounted to NIS 42 million, NIS 43 million and NIS 47 million respectively.
- b) On January 30, 2012 a draft of the Authors and Performers Law (Judgment on Royalties Issues) 2012 was placed before the Knesset. The draft law was intended to create a royalties court by empowering one of the District Court Judges to hear cases on royalties issues, royalty rates and disputes in royalty issues (in other words, a dispute on the issue of royalty rates between a collective management entity and a user or users of a repertoire).

28—Contractual obligations and commercial commitments (Continued)

- This draft, if it is accepted, may have an implication for the issue of the payment of royalties to various organizations. As of the date of this report, HOT is unable to assess what the impact of the said legislation will be on its business results, of it is passed.
- A commitment to invest in original productions
- In accordance with the provisions of the Communications Law, the principles of communications and decisions by the Council, HOT is required, inter alia, to invest amounts in original productions at a rate of 8% of its annual income from subscription fees. During the course of the years 2010, 2011 and 2012 HOT complied with the investment rate that is required, as aforesaid.
- It should be noted in this connection that the Communications Law has empowered the Council to determine the rate of investment that is required, provided that it may not exceed 12% and may not fall below 8% of the annual income from subscriber fees. In October 2011 the Council informed HOT that with effect from the year 2012 its income from subscriber fees, which form the basis for the calculation for the requirement to invest in original productions, will be deemed to include all of the payments that are paid by its subscribers in order to record broadcasts and to receive services, including income from users' terminal equipment and the installation thereof, whereas in accordance with the policy adopted by the Council up to such time the inclusion of income from terminal equipment for the purpose of this calculation was made conditional upon a mechanism that was based on the profitability of this income, and in past years the income from users' terminal equipment and the installation thereof was not included in the basis for the calculation for original productions. On January 12, 2012, the Council determined that HOT will be entitled to complete the amount of the additional investment for the year 2012 over three investment years.
- Agreement to deploy and maintain a cables network
- On January 1, 1990 and on May 1, 1989 Tevel International Transmission for Israel Ltd. and HOT Gold & Co. (hereinafter together—The cable companies) entered into commitments under agreements for the provision of planning, installation and maintenance services of the cables network with Bezeq (the provisions of both of the two said agreements are similar, and they will hereinafter in this section be called—the agreement). This agreement was endorsed to HOT Telecom as part of the merger agreement.
- In accordance with the agreement, Bezeq, Tevel and HOT Gold planned the cables network, inter alia, based on Bezeq's available infrastructure, which was deployed in the areas of the concession at the time of the signing of the agreement. Tevel and HOT Gold supplied Bezeq with the base equipment (as defined in the agreement) that comprises the cables network whereas Bezeq supplied the additional equipment (as defined in the agreement) that is used for setting up the cables network.
- In accordance with the agreement, a cables network was set up and deployed in a number of major cities across Israel, and Bezeq conducts the routine maintenance of the cables network and also provides malfunction repair services. The provisions of the agreement also relate, inter alia, to the possibility of the expansion of the cables network to additional facilities, the connection of new houses and of new neighborhoods.
- The agreement will remain in force for the length of the period of the concession, and will continue to be in force if the concession or the rights in the concession are transferred or afforded to another, in whole or in part and directly or indirectly, during the course of the original concession period and during the extension of that period or after the end of it. Bezeq is only entitled to cancel the agreement in respect of a breach for which notice has been given in writing, and which has not been repaired within six months.
- A consideration mechanism was set in the agreement, according to which HOT Telecom pays sums against the performance of Bezeq's commitments to setup, to maintain and to provide malfunction repair services, which are calculated in accordance with the length of the cables networks that have

28—Contractual obligations and commercial commitments (Continued)

been deployed, in accordance with the various types of networks and it also makes non-recurring payments in respect of certain activities. In accordance with the agreement, the amount of the consideration in respect of the length of the cable, as aforesaid, is reduced by approximately 65% after 12 years from the time of the handing over of each section.

- The total of the expenses recorded in HOT's accounting records for the network services payable to Bezeq in the years 2012, 2011 and 2010 amounted to NIS 48 million, NIS 46 million and NIS 43 million, respectively.
- It should be noted that from time to time, during the routine course of business, disputes arise in connection with the implementation of the agreement, inter alia in respect of the division of the costs that are involved in the performance of some of the services that are supplied by the Bezeq company under the agreement, however the parties are continuing to operate in accordance with the agreement. It is further noted that over the course of the years additions have been signed to the agreement, primarily in connection with enhancement and upgrading work on the cables network.
- Commitments to lease assets
- The Group has commitments under agreements for the leasing of buildings and motor vehicles for various periods up to the end of the year 2020. The minimum future rental fees in respect of the rental contracts as of December 31, 2012, exclusive of the option period, are as follows:

	NIS in millions	EUR in millions
2013	186	37,7
2014	148	30,0
2015	120	24,3
2016	86	17,4
2017 and thereafter	304	61,7
Total	**844**	**171,1**

- On July 19, 2011 HOT's Board of Directors approved a commitment under agreements for the execution of the upgrading of the fiber optic infrastructure (FTTX). In accordance with the said commitment, HOT Telecom will purchase advanced optic equipment, work and services from third parties, in order to upgrade the infrastructures, including maintenance services, in accordance with the deployment and the timetables that will be agreed upon between the parties from time to time. The upgrading of the infrastructure, as aforesaid, will enable the expansion of the traffic capacity on the network, in favor of the supply of enhanced VOD services, the increasing of the number of channels that the Group can offer to its subscribers, faster internet services and it will also enable HOT to deal with increased demand for traffic capacity on the network in the future, which is expected to arrive as a result of the increased use of applications that require a considerable band width.
- On May 27, 2010 a facility agreement was signed between HOT Mobile and Motorola for the purchase, licensing and installation of the infrastructure equipment (hardware and software) which is required in order to operate HOT Mobile's iDEN network. The agreement is in force for a period of five years from the time that it was signed (hereinafter -the initial period) and it will be renewed for additional periods of one year each (or for a longer period that is agreed between the parties), unless a party to the agreement gives notice to the other party, 90 days before the end of the initial period, or one of the extension periods, as the case may be, of its desire to terminate the commitment. The agreement arranged the commitment between the parties for the purpose of the execution of the work orders that will be presented to Motorola, from time to time, by HOT Mobile for the purpose of the supply of equipment or software for the iDEN network.
- Within the framework of the agreement, Motorola has undertaken that during the initial period it will hold an inventory of equipment that will enable it to immediately supply the components that are

28—Contractual obligations and commercial commitments (Continued)

required for the proper functioning of HOT Mobile's iDEN network, and so that it will be capable of supplying HOT Mobile with the maintenance services for the infrastructure equipment and the software that is required to operate the network for a period of seven years from the signing of the agreement, subject to the purchase of the said maintenance services by HOT Mobile.

- In consideration for Motorola's commitment to sell the equipment and the licenses to HOT Mobile at the prices that are denoted in the agreement, HOT Mobile has made a commitment to purchase the infrastructure equipment and the software that is required to operate the iDEN network exclusively from Motorola alone during the period of the agreement.
- As part of the commitment with Motorola in respect of the infrastructure for the iDEN network, HOT Mobile has signed on a system maintenance agreement with Motorola as well as on an agreement for the maintenance of the system's hardware, which arrange the manner of the repair of malfunctions and the provision of support by Motorola for HOT Mobile's iDEN network.
- In December 2011 the system maintenance agreement was extended for an additional period of three years, until the end of 2014.
- On May 26, 2010, as part of the sale of the control in HOT Mobile to Altice, HOT Mobile entered into a commitment under an agreement with Mobility for the purchase of terminal equipment that supports the iDEN technology.
- The agreement is in force for a period of 5 years and it will be renewed for additional periods of one year each time unless a party to the agreement gives notice to the other party,60 days before the end of the initial period, or one of the extension periods, as the case may be, of its desire to terminate the commitment.
- The agreement arranged a mechanism for the ordering and supply of the terminal equipment (including quarterly forecasts by HOT Mobile) with HOT Mobile being responsible for the importing of the terminal equipment from abroad.
- The supplier has received an option and the right of first refusal for the repurchase from HOT Mobile of all of the terminal equipment that it may be holding at the time of the termination of the agreement, in accordance with a mechanism that was set in the agreement.
- Within the framework of the preparations for the setting up of the new network, HOT Mobile entered into commitments under agreements with various suppliers for the purchase of terminal equipment that it will use on the UMTS network.
- On June 16, 2011 HOT Mobile entered into a commitment with Nokia Siemens Networks Israel Ltd. (hereinafter—the supplier) for the setting up of the infrastructure for HOT Mobile's new network.
- In accordance with the terms of the agreement, the supplier will plan and set up the new network for HOT Mobile as a turnkey contractor. In the first stage, which was completed in May 2012, the supplier completed the setting up of the systems that are required for the purpose of operating the new system with a coverage of approximately 30%, which is in excess of the extent of the coverage which is HOT Mobile required to provide (20%) in accordance with the terms of the tender within two years from the time of the receipt of the new radio telephone license. After the completion of the first stage, HOT Mobile has expanded and is expanding the new network, both from the perspective of the coverage and also from the perspective of the LTE capability.
- The agreement arranges the work arrangements between the supplier and HOT Mobile, the manner of the handing over of the system to HOT Mobile and the manner of the maintenance of the system by the supplier.
- The agreement is in force for 15 years, and it contains warranties for the proper functioning of the components of the system for a period of two years from the time of the handing over of each component in accordance with the agreement, as well as warranties for the entire period of the agreement that the system will operate in accordance with the system requirements that HOT

28—Contractual obligations and commercial commitments (Continued)

Mobile placed (in terms of availability, functioning and capacity), subject to their being a maintenance agreement in force between the parties.

- In consideration for the completion of the first, second and third stages in accordance with the agreement and the performance of all of the supplier's commitments by the year 2013, the Group will pay the supplier an amount of USD 52 million, which amount does not include the expansion of the coverage and the capacity over and beyond what is stipulated in the agreement. The overall consideration in the agreement for all of the services up to the year 2017 is approximately USD 120 million, according to HOT Mobile's assessment.

  On January 31, 2013, an addition to the agreement was signed, within the framework of which the payments that were supposed to be paid under the agreement have been deferred to a later date, subject to HOT Mobile's signing on debt notes, with HOT acting as guarantor. Within this framework, HOT Mobile has signed on confirmation for the final receipt of significant portions of the said project.

- On October 27, 2011 an agreement was signed between HOT Mobile and Comverse Ltd. (hereinafter—Comverse), in accordance with which Comverse will supply HOT with a BSS system (a billing system that is integrated with the customer relations management (CRM) system) (hereinafter—The system) and Comverse will also supply HOT with hardware, software and services, including the operation and maintenance of the system. In consideration for Comverse's services, HOT Mobile will pay an amount of approximately USD 12.5 million. In January 2012, the parties signed on an addition to this agreement, in accordance with which Comverse is committed to allocating seven additional employees to be available for the project (instead of the manpower that HOT had to make available for the project), for a payment of USD 500 000.

- On October 6, 2005, HOT Mobile won a tender for the provision of Mobile services to the IDF. Following Cellcom's winning of a tender, which was published by the Ministry of Defense in 2012 for the selection of a new mobile operator for the IDF, in the third quarter of 2012, a gradual transfer of IDF customers to Cellcom's network began. HOT Mobile's revenues from the IDF in the years 2010, 2011 and 2012 amounted to NIS 139,3 million, NIS 112.4 million and NIS 83,7 million, respectively, which constituted approximately 13,5%, 12,5% and 9,8% of HOT Mobile revenues in the said periods, respectively. Of the said revenues, an amount of NIS 10 million a year was in respect of the PTT services, which are supplied to the IDF without reference to the tender.

  On May 30, 2012, HOT Mobile International Communications Ltd (hereinafter—HOT International), a wholly owned subsidiary of HOT Mobile's, received an operator's license for the provision of international telecommunications services (hereinafter—The international license). On January 6, 2013 HOT International received operational approval for starting to provide international telecommunications services in accordance with the international license and on January 8, 2013, notification of the opening of the services was sent to all of the operators.

- Marketing and distribution (for iDEN technology products and services)

- In 2012 HOT Mobile operated through marketing and distribution channels, which included: sales personnel, who were employed by HOT Mobile, inter alia, through services and sales centers, which HOT Mobile operates across the country, a national distribution channel that works ''door to door'' using an external contractor and authorized marketing agents. In 2012 and as of the date of this report, HOT Mobile distributes its products via sales staff who are employed by it, the Israel Post company in some 200 branches and some 150 branches of the Menta chain in the Delek Group's filling stations. In the ultra-orthodox sector, HOT Mobile operates through an external marketer who markets HOT Mobile's products and services in that sector.

- In addition, HOT Mobile is acting to recruit private subscribers through its business/institutional customers, by way of offering attractive packages and paths to the family members of the business/institutional customers.

28—Contractual obligations and commercial commitments (Continued)

- Commitment with an external marketer
- As aforesaid, in 2012, one of the distribution channels for the Group's products and services in the iDEN field of operations was through an external contractor, S.D.M. Sales and Direct Marketing Ltd. (hereinafter—SDM), which provided HOT Mobile with marketing services for the iDEN products, though the operation of sales staff in order to market the iDEN products in the private and business markets, by operating a nationwide set-up, using a specialist marketing method involving initiated personal approaches whilst going door to door.
- The consideration that SDM is entitled to is based on a fixed monthly consideration and commissions which are derived from SDM's results in respect of the sales of the iDEN products.
- The original commitment was up to December 31, 2013. However, on December 6, 2012 a compromise arrangement was signed between HOT Mobile and SDM, in accordance with which HOT Mobile will pay SDM an amount of NIS 8 million and the commitment between the parties will be terminated, with each party waiving its claims against the other party.
- Marketing and distribution (for UMTS technology products and services)
- The marketing and distribution of UMTS products is performed by means of HOT Mobile's and HOT's marketing and distribution channels and through third parties, within the restriction places in the radio telephone license.
- Capitalized leasing rights on land from the Israel Lands Authority
- Capitalized leasing rights on land from the Israel Lands Authority over an area of 20 713 square meters on which the Group's buildings are located. The amount that is attributed to the capitalized rights is presented as a prepaid expenses in respect of operating leases in the balance sheet and is amortized over the period of the leases. The lease periods end in the years 2021-2045.

28.1.2 Guarantees and liens

- As collateral for HOT's commitments vis-à-vis the parent company under the credit agreement with it, the following charges have been placed
- A floating charge on HOT's assets.
- A fixed charge on the shares in the subsidiary companies.
- HOT Telecom has given a charge on some of its assets.
- The said charges are in an unlimited amount, vis-à-vis HOT, the investee partnership—HOT Telecom and the subsidiary company—HOT Net, jointly and severally.
- As collateral for the commitments of HOT, the investee partnership HOT Telecom and the subsidiary company HOT Net, first ranking floating charges have been placed in unlimited amounts in favor of the borrowers, on all of the chargeable assets and the rights of companies in the Group and a fixed charge on the goodwill and the unpaid share capital of the Companies in the Group
- As collateral for HOT's commitments in respect of the royalties agreement, as set forth in section B(1) above, a second ranking floating charge has been placed in favor of the State.
- As collateral for the Group's commitments, as determined in the Group's licenses and in the decisions by the Director and the Council, the Group has issued a number of guarantees, as follows:
- Bank guarantees to the Ministry of Communications, in respect of the national operator license that was granted to HOT Telecom amounting to 8,4 million Dollars, in force until December 2017 and December 2025.

28—Contractual obligations and commercial commitments (Continued)

- Guarantees in an amount of NIS 34 million (index-linked) to the Council in respect of the broadcasting license, which are in force until April and June 2014.
- A bank guarantee in an amount of 2 million Dollars to the Director in respect of HOT's compliance with the terms of the merger as determined by the Director, which is in force until December 2014.
- A bank guarantee in an amount of NIS 695 million, which was made available by HOT Mobile within the framework of its win in a tender for the allocation of frequencies and as collateral for its commitment in favor of the Ministry of Communications, which is in force until December 31, 2018.
- In accordance with the wording of the guarantee that was written by the Ministry of Communications, there is no restriction in the guarantee on the endorsement, assignment or transfer of the guarantee to a third party. Furthermore, HOT Mobile has a duty to bear any expense that is involved in the exercise or the extension of the guarantee.
- In the light of the aforesaid terms, HOT Mobile has signed on a letter of undertaking and endorsement vis-à-vis a bank, according to which HOT waives and is prevented from raising any claim against the bank in connection with the wording of the said guarantee, and it will indemnify and compensate the bank in respect of any expenses incurred for the purpose of conducting administrative and legal proceedings in connection with the said issues.
- On November 28, 2011, HOT Mobile and the former parent company signed on an irrevocable letter of commitment vis-à-vis Bank Hapoalim Ltd. (hereinafter the bank). The letter of undertaking was signed as a condition for the making available of a bank guarantee in an amount of NIS 695 million, as collateral for HOT's commitments vis-à-vis the Ministry of Communications within the context of HOT's win in a frequencies tender for the setting up of a third generation mobile network (UMTS).
- The Group has given a number of bank guarantees to various bodies in an overall amount of NIS 59 million.
- Guarantees to HOT Telecom
- The Group has given guarantees in a cumulative amount of 23 million Dollars as collateral for payments by HOT Telecom to the Cisco company.
- The Group has given a guarantee in an amount of NIS 242 million (index-linked) as collateral for HOT Telecom's commitments vis-à-vis an interested party with which it has signed a rental agreement.
- There exist mutual guarantees between HOT and companies in the Group, in unrestricted amounts, in favor of financial institutions as collateral for the repayment of the Group's liabilities to those financial institutions.

28.1.3 Other contingent liabilities

During the routine course of business, lawsuits have been filed against the companies in the Group and various legal proceedings are outstanding against it (hereinafter, ''The Legal Claims'').

In the opinion of the management of the Company and each of its subsidiaries, as at signature date, the amount of the additional exposure, in an amount of approximately NIS 3 billion (EUR 628,5 million) (over and above the provisions that have been recorded in these financial statements), as a result of the legal proceedings that have been filed against the Company's Subsidiaries on various matters, is as follows:

a. An amount of approximately NIS 1.7 billion (EUR 356,1 million) in respect of claims, in respect of which in the assessment of the Company's management, in reliance on the opinion of its legal advisors, the chances of their being accepted do not exceed 50%.

b. An amount of approximately NIS 0,1 billion (EUR 20,9 million) in respect of claims, which it is not yet possible, at this stage, to make an assessment, the main ones being in connection with applications for the approval of class actions that were presented close to the date of the financial statements

28—Contractual obligations and commercial commitments (Continued)

c. An amount of approximately NIS 1,42 billion (EUR 297,5 million) in respect of claims which, in the assessment of the Company's management, in reliance upon the opinions of its legal advisors, their chances of being accepted exceed 50% and in respect of which a provision has been recorded in accordance with the assessments of the managements of the Company's Subsidiaries, as aforesaid.

The following is an abbreviated summary of the Group's contingent liabilities effective as of signature date, in accordance with groupings having similar characteristics:

The nature of the lawsuit	The amount of the additional exposure in excess of the provision recorded as of signature date	The amount of the lawsuits that cannot be assessed and which were presented close to the date of the financial statements (primarily applications for approval as class actions)
	(in millions of euros)	
Customers	574	21
Lawsuits after the balance sheet date in respect of customers	33	33
Suppliers	13	5
Employees	1	—
The merger transaction	50	—
Total	**671**	**59**

28.2 Cabovisao commitments

28.2.1 Contingent assets

During the year ended December 31, 2012, Cabovisao made the decision not to pay any fees charged by municipalities, in addition to TMDP (Fees due for rights and charges related to the deployment of, passage within or crossing of systems, equipment and other resources of providers of publicly available electronic communications networks and services at a fixed location, of a public or private municipal domain). On December 31, 2012, Cabovisao had outstanding claims against several municipalities, totaling EUR 3,6 million. To present date, Cabovisao received 102 004 Euros from seven municipalities.

28.2.2 Contingent liabilities

28.2.2.1 Bank guarantees

	December 31, 2012
	(in millions of euros)
Tax Authority	8,4
City Council	0,9
Third Parties	0,0
Total	**9,3**

28.2.2.2 Real guarantees

On December 31, 2012, Cabovisao issued a bond amounting to EUR 25 million which was fully underwritten by Goldman Sachs International together with a financial first degree collateral of all bank accounts held by Cabovisao (except the bank deposit account in HSBC France and a current account with Caixa Geral de Depositos, S.A.) and pledge the shares representing Cabovisao's share capital and equity holders' rights.

28—Contractual obligations and commercial commitments (Continued)

28.2.2.3 Other contingent liabilities

As a result of the refusal by Cabovisao to pay the municipal taxes referred to above (since September 2010), the municipality of Almada initiated a process executive for payment of fees from 2006 to 2009, amounting to approximately EUR 0,7 million. It is the understanding of the Board of Directors, based on the opinion of its legal counsel, that the likelihood of loss is very low in the process.

28.2.2.4 Contingent assets

Cabovisao has outstanding claims against various municipalities for municipal taxes that it deems were charged illegally. The amount of such outstanding claims was EUR 3.6 million for the year ended December 31, 2012, of which EUR 0,1 million have been received from seven municipalities, while recovery is on-going with others.

28.3 Coditel Holding commitments

As of December 31, 2012, off balance sheet commitments include:

The shares, bank accounts and receivables of Coditel Brabant S.p.r.l. and Coditel S.à r.l. have been pledged. Coditel Holding is not allowed to pledge these assets as security for other borrowings or to sell them to another entity.

28.4 Others

The shares, bank accounts and receivables of Altice VII and its following subsidiaries Altice Finco S.A., Altice Financing S.A., Cool Holdings Ltd S.A., H.Hadaros 2012 Ltd., Hot Telecommunications System Ltd, Cabovisao S.A., Altice Blue Two S.A.S. and its subsidaries, Coditel Holding S.A. and its subsidiaries have been pledged for the issued Senior Secured Notes and Senior Notes. The Company is not allowed to pledge these assets as security for other borrowings or to sell them to another entity.

29—Going concern

The Combined Group was formed by a series of acquisitions, mainly funded through external borrowings. In addition, the construction and subsequent modernization of the network have required substantial investments. These two factors explain the structure of the statement of financial position and the proportion of financial liabilities in relation to total equity as well as the significant amount of amortization expense and net finance cost.

Currently, the Combined Group services its debt and funds its investments through net operating cash flows. The negative working capital position is structural and follows industry norms. Customers generally pay subscription revenues early or mid-month, with short DSOs (Days of Sales Outstanding) and suppliers are paid in the beginning of the following month, thus generating a negative working capital, as evidenced by the difference in the level of receivables and payables.

Under these conditions and given the cash flow projections, Management believes that the Combined Group will be able to finance its cash requirements for the next twelve months from the date of approval of the Combined Financial Statements for the three years ended December 31, 2012 and meet its financial debt obligations during the period.

As a result, the Combined Financial Statements of the Combined Group for the three years ended December 31, 2012 have been prepared on a going concern basis.

30—Events after the reporting period

On May 31, 2013, Altice Holdings entered into a sale and purchase agreement to acquire Winreason (the ‘‘ONI Purchase Agreement’’), the owner of the Portuguese telecommunications group, ONI, pursuant to which Cabovisao purchased all of the outstanding shares of ONI and refinanced the outstanding indebtedness of ONI (the ‘‘ONI Transaction’’). The deal was consummated on August 8, 2013.

30—Events after the reporting period (Continued)

On June 7, 2013, Altice VII and certain of its subsidiaries entered into a sale and purchase agreement (the ''Outremer Purchase Agreement'') with the owners of OMT Investand certain of its affiliates pursuant to which (i) the Combined Group had agreed to purchase all of the outstanding share capital of OMT Invest other than shares to be contributed separately pursuant to the Outremer Investment Agreement on completion of the Outremer Transaction and (ii) all of the outstanding indebtedness of OMT Invest and its subsidiaries were to be refinanced using a portion of the proceeds of the June 24, 2013 bond issuance (see below). The parties to the Outremer Purchase Agreement entered into an investment agreement (the ''Outremer Investment Agreement'') pursuant to which (i) the Combined Group contributed all of the outstanding share capital of Le Cable Martinique and Le Cable Guadeloupe and (ii) managers of OMT Invest contributed all of the outstanding shares of OMT Invest not sold to the Combined Group under the Outremer Purchase Agreement. The transaction was completed on the July 5, 2013.

On June 14, 2013, Altice Finco issued EUR 250 million aggregate principal amount of its 9% senior notes due 2023 (the ''2013 Senior Notes'').

On June 24, 2013, Altice Financing entered into a senior secured term loan credit facility (as amended from time to time, the ''2013 Term Loan Facility'') which provides for U.S. dollar term loans (the ''2013 Term Loans'') up to an aggregate principal amount equivalent to USD 1 034 million. Altice Financing may draw under the 2013 Term Loan, in up to four tranches, at any time on or prior to November 30, 2013, as long as, among other things, the incurrence of the indebtedness would have been permitted by the covenants in the existing Altice Financing debt documents. On July 2, 2013 and July 5, 2013, Altice Financing borrowed USD 584,2 million and U.S. dollar-equivalent USD 81,9 million under the 2013 Term Loan (the ''First Draw''). The proceeds, together with the proceeds of the 2013 Senior Notes and cash on the balance sheet of the Combined Group were applied to complete the Cabovisao Refinancing, the Coditel Refinancing, the Le Cable Refinancing and the ABO Refinancing on July 2, 2013 (described below), and the Outremer Transaction on July 5, 2013.

On March 7, 2013, Altice VII purchased the 40% remaining shares held by Codilink S.à r.l in Altice Portugal S.A..

Cabovisao Refinancing

On July 2, 2013, Altice Financing repaid the outstanding indebtedness under the existing Cabovisao Bridge Facility of EUR 203 million (the ''Cabovisao Refinancing'').

Coditel Refinancing

In July 2, 2013, Coditel Holding prepaid approximately EUR 7 million of its EUR 138 million indebtedness outstanding under the existing Coditel Senior Facility and Altice Holdings purchased substantially all of the remaining interests of the existing lenders under the existing Coditel Senior Facility.

ABO Refinancing

On July 2, 3013 ABO refinanced approximately EUR 70 million of its existing indebtedness to third parties (the ''ABO Refinancing'').

WSG and MTVC Refinancing

WSG and MTVC are indirect subsidiaries of the Combined Group. On July 2, 2013, Altice Pool refinanced approximately (x) EUR 8 million of indebtedness of MTVC and (y) EUR 14 million of indebtedness of WSG (collectively, the ''Le Cable Refinancing'').

Reduction of Guarantees to the State of Israel

HOT Mobile has informed the Ministry of Communications that as of September 26, 2013, it had reached an average market share in the private sector of 11.3%, constituting an addition of 9.52% on HOT

30—Events after the reporting period (Continued)

Mobile's market share at the time of the expansion of the general license for the provision of mobile radio telephone services under the cellular method (hereinafter—the license), on September 26, 2011.

In the light of HOT Mobile achieving the market share that is required as of the time of the first check, HOT Mobile has requested the Ministry to reduce the amount of the guarantee that was deposited by HOT Mobile, from an amount of NIS 695.0 (€144.6 million) million to an amount of NIS 80 (€16.6 million) million. This was in addition to an amount of NIS 10.0 (€2.0 million) million that it paid upon the receipt of the license.

As of November 21, 2013, the response of the Ministry of Communications has been received and they approved the reduction of Hot Mobile guarantee from NIS 695 Million to NIS 80 Million.

Acquisition of Ma Chaîne Sport and Sportv

On October 4, 2013, Altice IV and Altice VII entered into sale and purchase agreements relating (i) to the sale on the same day by Altice IV and Valemi Corp of their respective shareholding (of approximately 65% and 35%, respectively) in Sportv S.A. (a producer of sport related content) to Ma Chaîne Sport S.A.S (a producer of sports related content) and (ii) to the sale on the same day by Altice IV and Valemi Corp of all or part of their respective shareholdings (of approximately 68% and 32%, respectively) in Ma Chaîne Sport S.A.S to Altice VII. In addition, on October 10, 2013, the general shareholders' meeting of Ma Chaîne Sport S.A.S decided on a capital decrease of €5.0 million by way of a share buy-back of the remaining shares in Ma Chaîne Sport S.A.S held by Valemi Corp which was not sold under the sale and purchase agreement. This capital decrease has been completed on November 8, 2013. As a result of this transaction, Altice VII now holds all of the outstanding equity interests in Ma Chaîne Sport S.A.S which in turn holds 100% of Sportv S.A.. In 2012, Ma Chaîne Sport S.A.S. and Sportv S.A. generated EBITDA of €9.0 million and €0.8 million respectively and had an EBITDA margin of 56.7% and 62.5% respectively.

As this is a common control transaction, the requirements of IFRS 3 in relation to acquisition accounting shall not be applicable and it is expect that the Combined Group shall elect to utilise the pooling-of-interest method to record this acquisition.

Acquisition of the Mobius Group

On October 19, 2013, Altice Blue Two (a subsidiary of Altice VII) entered into an agreement pursuant to which Altice Blue Two will acquire the Mobius Group (the ''Mobius Acquisition''). The Mobius Group is a telecommunications operator in the Overseas Territory of La Reunion, providing Internet access to professional clients under the ''Mobius Technology'' brand and double and triple play services based on xDSL technology to residential customers under the ''IZI'' brand. The consummation of the Mobius Acquisition is expected to occur in the first quarter of 2014 and is subject to the satisfaction of customary closing conditions, including regulatory approval. Pursuant to an investment agreement dated October 19, 2013, certain managers of the Mobius Group have agreed to reinvest a portion of the proceeds received from the Mobius Acquisition in Altice Blue Two. As a consequence of such reinvestment, the equity interest held by Altice Caribbean in Altice Blue Two will be reduced to approximately 75%.

The consideration paid, net of reinvestment of the Managers of Mobius, amounts approximately €21.0 million.

Network Sharing Agreement

On November 8, 2013, HOT Mobile entered into a network sharing agreement (the ''Network Sharing Agreement'') with Partner Communications Company Ltd. Pursuant to the terms of the Network Sharing Agreement, HOT Mobile and Partner will each own 50% of a newly formed limited partnership, which shall hold, develop and operate an advanced shared mobile network for both companies. Network Sharing Agreement enables HOT Mobile and Partner to share antennas and frequencies, and facilitates

30—Events after the reporting period (Continued)

optimum utilization of the spectrum. In addition, while HOT Mobile and Partner will continue to maintain and operate separate core networks, Partner has agreed to grant HOT Mobile a right of use in its cellular communication network for the purpose of providing nation-wide cellular coverage to HOT Mobile's customers.

Also, as part of the engagement the Combined Group will grant a guarantee on behalf of Hot Mobile Ltd. In addition, in several cases as determined in the agreements the Combined Group will be required to grant an additional guarantee for example in case of a change in the finance ranking of the Combined Group. The Network Sharing Agreement is subject to regulatory approvals of the Ministry of communication and the restrictive trade practices controller, which as of the balance sheet date were not achieved.

As a result of this new agreement, the existing agreement with the existing service provider, Pelephone, will be phased out until the contractual end of the agreement in 2014.

Tricom Dominican Republic Acquisitions

On November 26, 2013, Altice Bahamas (a wholly owned indirect subsidiary of Altice VII) and Wirefree Services Denmark A/S (a company controlled by Orange S.A.), entered into a share purchase agreement (the ''ODO Acquisition Agreement'') pursuant to which Altice Bahamas has agreed to acquire from Wirefree Services Denmark A/S and certain of its affiliates (collectively, the ''ODO Sellers''), and the ODO Sellers have agreed to sell to Altice Bahamas, on completion of the ODO Acquisition, all of the outstanding share capital of ODO. The total consideration for the ODO Acquisition is $1,435 million less certain agreed adjustments and subject to final working capital and cash balances on the Orange Dominicana Acquisition Completion Date. The consummation of the ODO Acquisition is subject to certain conditions, including relevant authorizations or clearances from the Dominican Republic regulatory authority Indotel and is expected to occur in the first quarter of 2014.

On October 31, 2013, Altice Caribbean (a wholly owned indirect subsidiary of Altice VII) and Hispaniola Telecom Holdings, Ltd. (the ''Tricom Sellers''), a company controlled by Amzak Capital Management and Inversiones Bahía, entered into agreements (the ''Tricom Purchase Agreements'') pursuant to which Altice Caribbean or one of its subsidiaries (the ''Tricom Purchaser'') is expected to purchase all of the outstanding equity interests in each of Tricom S.A. and Global Interlinks Ltd. (together, ''Tricom'') from the Tricom Sellers (the ''Tricom Acquisition''). The aggregate purchase price payable by Altice Caribbean for the Tricom Acquisition is $405 million. The consummation of the Tricom Acquisition pursuant to the Tricom Purchase Agreements is expected to occur in the first quarter of 2014 and is subject to the satisfaction of customary closing conditions, including the approval of the Dominican Republic regulatory authority Indotel.

The purchase price for the ODO Acquisition and the Tricom Acquisition is expected to be financed from (i) the proceeds received pursuant to the issuance of the 2013 Senior Secured Notes and the 2013 Dollar Senior Notes which are currently being held in escrow and (ii) a portion of the proceeds from the Offering if regulatory approval for the pending acquisitions is received after the Admission, or, to the extent regulatory approval for the pending acquisitions is granted prior to the Admission, an equity contribution to the Altice VII restricted group by a subsidiary of the Company which has obtained committed third party financing to fund such equity contribution. To the extent such regulatory approval for the pending acquisitions is granted prior to the Admission and third party financing is used to complete such acquisitions, a portion of the proceeds from the Offering will be used by the Company to repay such third party financing.

Issuance of New Senior Notes and New Senior Secured Notes

Altice VII announced on December 2, 2013 that (i) its subsidiary Altice Finco S.A. would launch an offering of $400 million in aggregate principal amount of senior notes (the ''Senior Notes'') and (ii) its subsidiary Altice Financing S.A. would launch an offering of $1,309 million equivalent in aggregate principal amount of dollar and euro senior secured notes (the ''Senior Secured Notes'' and, together

30—Events after the reporting period (Continued)

with the Senior Notes, the ''Notes''). Proceeds of the Notes are expected to be used to finance (i) its previously announced acquisition of 88% of Tricom S.A. and Global Interlinks Ltd. (together, ''Tricom''), which Altice entered into an agreement to acquire on October 31, 2013, and (ii) its previously announced acquisition of a majority ownership in Orange Dominicana S.A. (''ODO''), which Altice entered into an agreement to acquire on November 26, 2013.

ODO provides mobile telephony and wireless broadband services to residential customers in the Dominican Republic and fixed and mobile voice and data services to business customers. Tricom provides pay television, broadband Internet and fixed-line telephony services as well as mobile telephony services in the Dominican Republic.

Restructuring of Altice Six holding structure

In anticipation of the increase in shareholding of the newly listed Numericable Group S.A., Altice Six S.A. has performed a restructuring of its subsidiaries to simplify its holding structure. Thus, with effect from November 11, 2013, Altice B2B Lux Holding S.à r.l. was merged with Ypso Holding S.à r.l..

Altice B2B Lux Holding S.à r.l., helds Altice B2B Lux S.à r.l., through which Altice Six S.A. has invested in Completel, the B2B arm of Numericable Group.

On December 18, 2013, the final step of this restructuring was consummated, with the merger of the Altice B2B Lux Holding S.à r.l. with Ypso Holding S.à r.l., thus creating a common company: Ypso Holding S.à r.l. which would directly control the French investment vehicles.

Numericable IPO

On November 7, 2013, Numericable Group, the sole cable operator in France and a leading provider of television and broadband Internet services in its network area (''Numericable'' and together with its subsidiaries, the ''Numericable Group''), announced that it had successfully completed its initial public offering on the regulated market of NYSE Euronext in Paris (Compartment A).

The Global Offering amounted to approximately €652.2 million, consisting of a capital increase of approximately €250 million and a sale of existing shares by Carlyle Cable Investment SC (''Carlyle'') and CCI (F3) S.à.r.l. (''Cinven'') amounting to approximately €402.2 million. An over-allocation option was also offered, which when fully exercised increased the Global Offering to approximately €750 million. The Employee Offering was subscribed for approximately €1 million at €19.84 per share. Trading of the Numericable Group's shares began on November 8, 2013.

Following the Global Offering and the Employee Offering and after the completion of all concurrent share transfers, and once the over-allotment option was exercised in full, Numericable Group's share capital was as follows: Altice 30%, Carlyle 26%, Cinven 18% and a public float of 24%.

Issuance of new margin loan

On November 7, 2013, Altice Six S.A. entered into a financing agreement for a total amount of EUR 300 million with ING Bank N.V as the agent and Deutsche Bank, HSBC, Credit Agricole, Goldman Sachs and Morgan Stanley as lenders. The purpose of this new debt issuance was to purchase an additional 10% holding stake in Numericable Group S.A. and thus increase Altice Six S.A's total stake up to 40% in Numericable Group S.A. thus giving it a controlling stake and allowing full integration of Numericable Group into the accounts of Altice S.A..

As a condition to financing, Altice Six has entered into a pledge agreement with the security agent and bank, following the terms of which it has pledged all the security assets (pertaining to cash and book entries) to an account held at ING Bank Luxembourg to be blocked from immediate effect, post signing of the debt agreement.

30—Events after the reporting period (Continued)

Increase in shareholding in Numericable Group

Altice Six announced on November 18, 2013 that it has entered into an agreement with certain funds affiliated with Cinven Ltd. (''Cinven'') and an entity affiliated with Carlyle Group (''Carlyle'') to acquire additional shares in Numericable Group, from Cinven and Carlyle (the ''Acquisition''). Altice will hold 40% of shares in Numericable (including shares of Numericable subject to call options granted to Altice by certain existing shareholders) and will have the majority of votes in the board of directors. The Acquisition is subject to (i) antitrust approval and (ii) waiver granted by the Autorité des marchés financiers (AMF) to file a mandatory tender offer and is expected to be completed in the first quarter of 2014.

2013 Coditel Acquisition

As of September 30, 2013, Deficom Telecom S.à r.l., a majority owned subsidiary of Altice VII, was the owner of 60% of the outstanding shares of Coditel Holding and various funds advised by Apax Partners MidMarket SAS (the ''Coditel Minority Shareholder'') was the owner of the remaining outstanding shares of Coditel Holding. On March 7, 2013, Altice VII and the Coditel Minority Shareholder entered into a purchase and sale agreement (the ''Coditel Purchase Agreement'') pursuant to which Altice VII, through a wholly owned subsidiary, agreed to purchase all of the outstanding shares of Coditel Holding held by the Coditel Minority Shareholder (the ''2013 Coditel Acquisition''). The 2013 Coditel Acquisition was consummated on November 29, 2013 and was funded in part by using the remaining amounts available under the 2013 Term Loan.

Other Transactions

The Combined Group intends to designate Green Datacenter and Auberimmo as unrestricted subsidiaries in accordance with the terms of our debt instruments and upon such designation these entities will not be subject to the covenants under the terms of our debt instruments.

The Combined Group is in talks with the minority stakeholders in Outremer Telecom, to study the possibility of exchanging the minority interests currently held by the Management and Managers of Outremer Telecom in Altice Blue Two S.A.S against shares to be issued by the listed entity, Altice S.A.

Note 1—Nature of the business, basis of preparation and accounting policies

Nature of the business

Altice International S.à r.l. (formerly Altice VII S.à r.l.) (the ''Company'') is a private limited liability company (société à responsabilité limitée) incorporated under the laws of the Grand Duchy of Luxembourg on December 15, 2008, and registered under the number B 143.725 in Luxembourg. The Group refers to the Company and its subsidiaries. The Company was initially established as a public limited company (société anonyme) and then converted to a private limited liability company on October 7, 2009.

The registered office of the Company is established at 3, boulevard Royal, L-2449 Luxembourg, and as at September 30, 2014 its sole equity holder is Altice S.A. The ultimate controlling party is considered to be Patrick Drahi.

On January 31, 2014, Next LP contributed all its economic interests in Altice International S.à r.l. to Altice S.A. (''Altice'') in exchange for shares in Altice S.A..

Altice is listed on Euronext in Amsterdam. The consolidated financial statements of Altice are available at the registered address of Altice: 3, boulevard Royal, L 2449 Luxembourg and on its website: www.altice.net.

Altice International offers a variety of services over its cable and mobile infrastructure, including, but not limited to, pay television, broadband Internet access, fixed-line telephony and mobile telephony to residential customers, and, to a lesser extent, corporate customers, depending on the country. Available cable-based service offerings depend on the bandwidth capacity of its cable networks and whether they have been upgraded for two-way communications. Most of Altice International's operating subsidiaries operate Docsis 3.1 enabled networks. Where possible, Altice International Group intends to deploy the same technologies and equipment across its footprints to generate economies of scale and common knowledge. In addition, the Group companies aim at sharing skills and best practices across the various operations of the Group.

Television service offerings include basic and premium programming, and, in most markets, incremental product and service offerings such as enhanced pay-per-view programming, including video-on-demand (''VoD'') and near-video-on-demand (''NVoD''), digital video recorders (''DVR''), high definition (''HD'') television services and, in certain areas, exclusive content, purchased or produced. The Altice International Group tailors its basic and premium channel line-up to each country of operation according to culture, demographics, programming preferences and local regulation. The Altice International Group also offers broadband Internet access services and fixed-line telephony in all its footprints. It also owns and operates mobile infrastructures in certain geographies (French Overseas Territories, Dominican Republic and Israel) and offers mobile services through an MVNO (Mobile Virtual Network Operator) arrangement in Belgium.

Altice International's operational entities operate in the following geographies listed below. When possible, the Group tries to achieve convergence and integration between existing cable and mobile networks.

- Israel (Cable and mobile)
- Dominican Republic (Cable and mobile)
- French Overseas Territories (Cable and mobile)
- Portugal (Cable)
- Belgium and Luxembourg (Cable and mobile through MVNO)
- Others (mainly cable based operations and datacenter in Switzerland, content companies and holding activities)

Note 1—Nature of the business, basis of preparation and accounting policies (Continued)

Basis of presentation

The condensed consolidated financial statements of the Company as of and for the three and nine months ended September 30, 2014 have been prepared in accordance with International Accounting Standard (''IAS'') No. 34 ''Interim Financial Reporting''. They should be read in conjunction with the annual consolidated financial statements and the notes thereto as of and for the year ended December 31, 2013 which have been prepared in accordance with International Financial Reporting Standards as adopted in the European Union (''IFRS'').

Comparative information

The comparative information for the nine and three month periods ended September 30, 2013 has been restated to reflect the impact of the purchase price allocation of the assets of ONI S. G.P.S (''ONI'') acquired on August 8, 2013. As per the provisions of IFRS 3:49, the impact of the recognition of the identifiable tangible and intangible assets of ONI at their fair value was restated for the nine and three month period ended September 30, 2013. The total impact on depreciation and amortisation was €0.4 million (€0.3 million net of deferred tax). The loss for the period was impacted by the same amount.

In addition to the restatement described above, staff costs and employee benefits were reclassified to match the presentation adopted for the three and nine months ended September 30, 2014. Such costs amounted to €57.7million for technical and maintenance and customer service staff and €24.0 million for marketing staff costs and have been reclassified from the lines ''other operating expenses'' and ''other sales and marketing expenses'' to ''staff costs and employee benefits expenses''.

Accounting policies

The condensed consolidated financial statements have been prepared on an historical cost basis, except for (i) available-for-sale financial assets, (ii) derivative financial instruments which are measured at market value and (iii) inventories which are measured at the lower of net realizable value or cost. The accounting policies used to prepare the condensed consolidated financial statements are similar to those described in Note 2 to the consolidated financial statements as of and for the year ended December 31, 2013.

There were no other significant effects on the condensed consolidated financial statements as a result of the adoption of any of the below mentioned standards or interpretations.

New standards applied for the first time in the current period

For the period ended September 30, 2014, the Group has applied the following amendments to IAS standards, made compulsory for annual periods beginning on or after January 1, 2014.

- Amendments to IAS 39—Novation of Derivatives and Continuation of Hedge Accounting:

  Under the revised standard, the novation of a hedging instrument should not be considered as an expiration or termination giving rise to the discontinuation of hedge accounting when a hedging derivative is novated.

  This amendment has no impact on the condensed consolidated financial statements of the Company.

- Amendments to IAS 36—Recoverable Amount Disclosures:

  The overall effect of the amendments is to reduce the circumstances in which the recoverable amount of assets or cash-generating units is required to be disclosed, clarify the disclosures required, and to introduce an explicit requirement to disclose the discount rate used in determining impairment (or reversals) where recoverable amount (based on fair value less costs of disposal) is determined using a present value technique.

Note 1—Nature of the business, basis of preparation and accounting policies (Continued)

This amendment has no impact on the condensed consolidated financial statements of the Company.

- IFRIC 21—Levies

  IFRIC 21 provides guidance on when to recognise a liability for a levy imposed by a government, both for levies that are accounted for in accordance with IAS 37 Provisions, Contingent Liabilities and Contingent Assets and those where the timing and amount of the levy is certain. Management has assessed that the implementation of IFRIC 21 has no significant impact on the condensed consolidated financial statements of the Company for the nine month period ended September 30, 2014.

- Draft position paper on IAS 19 on the subject of the existence of a deep market for corporate bonds in Israel

  On September 1, 2014, the Securities Authority of Israel published a draft position paper (the ''draft position'') in accordance with which a deep market exists in Israel for high quality Shekel denoted corporate bonds. In accordance with the said draft position, commitments in respect of post-employment employee benefits as well as commitments in respect of other long-term benefits are to be discounted using a discount rate that is derived from corporate bonds, instead of discounting them at a discount rate that is derived from government bonds, which will lead to the increasing of the discount rate and the reduction of the commitments. In accordance with the draft position, this change is to be reflected by way of a change in an estimate.

  The Company is examining the possible impact of the standard on the annual financial statements for the year 2014.

Significant accounting judgments and estimates used in the preparation of the financial statements

Judgments

In the process of applying the significant accounting policies, the Group has exercised its judgment and has taken into account matters which have the most significant impact on the amounts that have been recognized in the condensed consolidated financial statements.

Estimates and assumptions

The preparation of the condensed consolidated financial statements requires the Group to make estimates and assumptions that have an effect on the application of the accounting policies and on the reported amounts of assets, liabilities, revenues and expenses. These estimates and underlying assumptions are reviewed regularly. Changes in accounting estimates are reported in the period in which the estimate changes.

Impairment of goodwill

Determining whether goodwill is impaired requires an estimation of the value in use of the cash-generating units (herein after referred to as ''CGU'' or ''CGUs'') to which goodwill has been allocated. The value in use calculation requires the Board of Managers to estimate the future cash flows expected to arise from the CGUs and a suitable discount rate in order to calculate present value. Where the actual future cash flows are less than expected, a material impairment loss may arise.

Legal claims

In estimating the likelihood of outcome of legal claims filed against the Group and its investees, the Group companies rely on the opinion of their legal counsel. These estimates are based on the legal counsel's best professional judgment, taking into account the stage of proceedings and historical legal

Note 1—Nature of the business, basis of preparation and accounting policies (Continued)

precedents in respect of the different issues. Since the outcome of the claims will be determined in courts, the results could differ significantly from these estimates.

Post-employment benefits

The liability in respect of post-employment defined benefit plans is determined using actuarial valuations. The actuarial valuation involves making assumptions about, among others, discount rates, expected rates of return on assets, future salary increases and mortality rates. Due to the long-term nature of these plans, such estimates are subject to uncertainty.

Deferred tax assets

Deferred tax assets relate primarily to tax losses carried forward and to deductible temporary differences between reported amounts and the tax basis of assets and liabilities. The assets relating to the tax losses carried forward are recognized if it is probable that the Group will generate future taxable profits against which these tax losses can be offset. Evaluation of the Group's capacity to utilize tax losses carried forward relies on significant judgment. The Group analyses past events, and the positive and negative elements of certain economic factors that may affect its business in the foreseeable future to determine the probability of its future utilization of these tax losses carried forward.

Note 2—Main changes in the scope of consolidation

2.1 Dominican Republic

Tricom S.A. and Global Interlinks Limited ("Tricom" and "GLX", respectively)

On March 12, 2014, the Group, through its indirect subsidiary, Altice Dominican Republic, completed the acquisition of an approximately 97.2% stake in Tricom., a cable and mobile operator with a 4G license based in the Dominican Republic, and of GLX, the owner of a submarine cable, which it uses to sell data and voice transmission services to other operators based in the region (including Tricom). Through this acquisition, the Group expects to consolidate and expand its cable operations in the Caribbean Islands and explore synergies through the vertical integration of its operations in the region and synergies with other operations in the region.

Since March 12, 2014, Tricom and GLX contributed €82.0 million in revenue and €14.1 million in operating profit to the Group's result for the nine months ended September 30, 2014.

The following summarises certain of the major classes of consideration transferred and the provisionally determined amounts of identifiable assets and liabilities assumed at the acquisition date:

Total consideration paid to the vendors for the shares of the acquired entities amounted to €299.2 million on a cash-free, debt-free basis.

The total value of assets transferred in consideration for the values mentioned above amounted to €214.8 million, comprising mainly intangible assets for a net value of €4.4 million, property, plant and equipment for a total value of €133.2 million and trade and other receivables for a total amount of €67.3 million. Total liabilities amounted to €82.7 million, comprising €40.8 million of non-current liabilities and €41.9 million of current liabilities. Additionally, adjustments related to the conversion of the opening balance from US GAAP to IFRS standard led to an increase in fixed assets of €2.8 million, thus increasing the net value of assets transferred to €134.9 million. The residual value of €164.3 million was recognised provisionally as goodwill.

The values of the assets and liabilities assumed have been determined on a provisional basis as being equivalent to the book values in the accounting records of Tricom and GLX. The Company is continuously assessing the fair valuation of the identifiable assets and liabilities assumed and shall complete this exercise within twelve months from the acquisition date.

Note 2—Main changes in the scope of consolidation (Continued)

Altice Hispaniola (''ODO'' or ''Orange Dominicana S.A.'')

On April 9, 2014, the Group, through its direct subsidiary Altice International S.à r.l., completed the acquisition of a 97.2% stake in ODO, the leading mobile operator in the Dominican Republic. ODO operates a high end, 4G-enabled mobile network in the Dominican Republic covering up to 86% of the territory of the Dominican Republic.

Through this acquisition, the Group expects to further consolidate and expand its operations in the Caribbean Islands. This transaction complements the acquisition of Tricom and GLX mentioned above and completes the formation of an integrated telecom group in the Dominican Republic.

Since April 9, 2014, ODO contributed €218.6 million to the Group revenue and €62.7 million to the Group operating profit for the nine months ended September 30, 2014.

The following summarises certain of the major classes of consideration transferred and the provisionally determined amounts of identifiable assets and liabilities assumed at the acquisition date:

Total consideration paid to the vendors for the shares of the acquired entity amounted to €1,034.0 million on a cash free, debt free basis.

The total value of assets transferred in consideration for the values mentioned above amounted to €437.9 million, comprising mainly intangible assets for a net value of €34.8 million, property, plant and equipment for a total value of €229.0 million and trade and other receivables for a total amount of €113.5 million. Total liabilities amounted to €103.7 million, comprising €8.7 million of non-current liabilities and €94.1 million of current liabilities.

In addition to the assets transferred and as part of the provisionally purchase price allocation, two additional assets were identified being the capitalisation of subscriber acquisition costs and the intangible asset corresponding to the value of the Orange brand. Subscriber acquisition costs were capitalised as part of the alignment of accounting principles of ODO with Altice Group policies. The net book value of such assets was ascertained to be €2.7 million as at the date of acquisition. The right for the continued use of the Orange brand was valued on a preliminary basis at €19.9 million. This value is subject to revision, following the finalisation of the purchase price allocation for ODO.

As part of the purchase agreement, the vendor agreed to finance the acquisition of a spectrum license to provide 3G services in the Dominican Republic using ODO's existing network. The price of this license was adjusted when calculating the purchase price. The total amount due for the license amounted to €20.8 million ($ 28.5 million). This investment is recorded as capital investment in the accounts of Orange Dominicana as of September 30, 2014, however, it relates to an investment that was not paid for by the Group.

The values of the assets and liabilities assumed have been determined on a provisional basis as being equivalent to the book values in the accounting records of ODO. The Company is continuously assessing the fair valuation of the identifiable assets and liabilities assumed and shall complete this exercise within twelve months from the acquisition date.

Goodwill has been provisionally recognised as a result of the acquisitions (including Tricom and GLX) as follows:

Total consideration transferred	€1,333.2 million
Fair value of identifiable assets, liabilities and contingent liabilities	€ 491.7 million
Goodwill	€ 841.5 million

2.2 French Overseas Territories (''FOT'')

Mobius S.A.S. (''Mobius'')

On January 15, 2014, the Company, through its subsidiary, Altice Blue Two S.A.S., obtained control over Mobius, a telecommunications operator in the French Overseas Territories (specifically, La Reunion), by

Note 2—Main changes in the scope of consolidation (Continued)

acquiring 99.9% of the shares and voting interests in the company. This acquisition enables the Group to further expand and consolidate its footprint in the French Overseas Territories.

Since January 1, 2014, Mobius contributed €13.2 million to revenue and €1.0 million to the Group operating profit for the nine months ended September 30, 2014.

The following summarises certain of the major classes of consideration transferred and the provisionally determined amounts of identifiable assets and liabilities assumed at the acquisition date:

- Total consideration paid to the vendors for the shares of the acquired entity amounted to €18.8 million on a cash-free, debt-free basis.
- The total value of assets transferred in consideration for the values mentioned above amounted to €14.8 million, comprising mainly intangible assets for a net value of €7.1 million, property, plant and equipment for a total value of €1.2 million, financial assets for a total value of €3.2 million and trade and other receivables for a total amount of €2.9 million. Total liabilities amounted to €13.8 million, comprising €5.1 million of non-current liabilities and €8.7 million of current liabilities. The residual value of €17.8 million was recognised provisionally as goodwill.

The values of the assets and liabilities assumed have been determined on a provisional basis as being equivalent to the book values in the accounting records of Mobius. The Company is continuously assessing the fair valuation of the identifiable assets and liabilities assumed and shall complete this exercise within twelve months from the acquisition date.

Goodwill has been recognised as a result of the acquisition as follows:

Total consideration transferred	€18.8 million
Fair value of identifiable assets and liabilities	€ 1.0 million
Goodwill	€17.8 million

Profit and loss before acquisition by the group

The profit and loss of those new subsidiaries not consolidated from January 1, 2014, for the period from January 1, 2014 to the date of their entry into the Group's accounts is given below:

	Tricom	ODO
	(in € millions)	
Revenues	38.7	108.8
Purchases and subcontracting services	(11.1)	(27.4)
Gross Profit	**27.6**	**81.4**
Other operating expenses	(4.2)	(10.3)
General and administrative expenses	(1.7)	(6.7)
Other sales and marketing expenses	(2.2)	(19.0)
Staff costs and employee benefits	(5.3)	—
Operating profit before depreciation and amortization	**14.1**	**45.5**
Depreciation and amortization	(5.1)	(15.3)
Management fees	(0.8)	(2.9)
Operating profit	**8.2**	**27.4**
Profit for the period	**5.4**	**19.3**

2.3 Acquisition of non-controlling interests—Altice Blue Two S.A.S. ("ABT")

On June 27, 2014, Altice S.A., the direct shareholder of the Company, transferred its stake in Altice Blue Two to Altice Caribbean, the direct shareholder of Altice Blue Two. Following this transaction, Altice Caribbean now holds a 99.7% stake in Altice Blue Two.

Note 3—Goodwill

Goodwill is reviewed for impairment at each Cash Generating Unit (''CGU'') level, annually and whenever changes in circumstances indicate that its carrying amount may not be recoverable. For 2013, goodwill was tested for impairment at the CGU level as of December 31. CGUs were at the time determined to coincide with subsidiaries of the Company.

For the nine months period ended September 30, 2014, the Management has decided to reorganize the way the cash generating units (CGUs) are presented, in order to be consistent with the structuring process that the Group has undergone in its different jurisdictions and that is aligning to the way management operates the different segments of the Group (see note 8). To this end, CGUs now reflect specific geographic areas in which one or several legal structures can be found (eg. Cabovisao and ONI form Portugal, Tricom/GLX and ODO, Dominican Republic). Historically, each CGU was presented as a standalone legal entity, as the Group had only one operating entity per geography. The rapid expansion of the Group and the push to achieve synergies between fixed, cable and mobile networks in its relevant operating geographies prompted Board of Managers to acquire new structures in the regions where it was already operating. Management believes that combining individual acquired entities is the most economic method of capturing synergies between new, complementary businesses in each operational region. This is underlined by the technical synergies between the different networks, the fact that the teams are now integrated and as a result of the bundle offers to the client. An illustrative example is the integration of support functions in the French Overseas Territories (between OMT and Le Cable, together ''FOT''), in Portugal with Cabovisao and ONI and the on-going restructuring of the Dominican entities, in order to have a single, functional support team in the finance, marketing and technical departments. In addition to this, contracts with service providers are negotiated by one entity for the relevant geographies thus providing better purchasing power for the CGU as a whole. Moreover, internal tracking and monthly financial and operation reviews performed by Management are based on specific geographies and not on individual companies, thus the new presentation provides an accurate vision of how Management tracks and runs its businesses internally.

The recoverable amounts of the CGUs are determined based on their value in use. The Company determined value in use for the purpose of its impairment testing and, accordingly, did not determine the fair value of the CGUs as the carrying value of the CGUs was lower than their value in use. The key assumptions for the value in use calculations are primarily the pre-tax discount rates, the EBIT margin, the terminal growth rate and the churn rate during the period.

The value in use of the CGUs was determined by estimating cash flows for a period of five years, giving due consideration to the nature of the industry in which each CGU operates. Assumptions for churn rates and EBIT margin were based on historical experience and expectations of future changes in the market. Cash flow forecasts were derived from the most recent financial plans approved by management.

The Board of Managers has determined that there have not been any changes in circumstances indicating that the carrying amount of goodwill may not be recoverable and therefore no updated impairment model analysis has been carried out nor any impairment recorded for the period ended September 30, 2014.

Note 3—Goodwill (Continued)

Note 4—Restricted cash

The restricted cash presented on the statement of financial position as of December 31, 2013 has been fully used to consummate the Tricom/GLX and ODO transactions. See note 2 for more details.

Note 5—Issued capital and share premium

5.1 Issued capital

As of September 30, 2014, total issued capital of the Company amounted to €309.2 million, and was composed of 30,925,700,000 outstanding ordinary shares, with a nominal value of €0.01 each.

As part of its initial public offering, the Company's sole partner, Altice S.A. performed a restructuring of the equity structure of the Company.

Note 5—Issued capital and share premium (Continued)

As part of this restructuring, all convertible preferred equity certificates (CPECs) and other shareholder debts held by Altice S.A. were contributed in exchange for shares in the Company. Details are given below:

	September 30, 2014	December 31, 2013
	(in € millions)	
Opening balance	**7.4**	**7.4**
Conversion of convertible instruments (''CPECs'')	290.5	—
Conversion of Valemi Corp S.A. vendor note	0.7	—
Capital increase relating to Tricom S.A. closing	1.1	—
Capital increase relating to Orange Dominicana S.A. closing	8.6	—
Capital increase relating to transaction with non-controlling interests	0.9	
Closing balance	**309.2**	**7.4**

5.2 Additional Paid in Capital

Total additional paid in capital of the Group increased by €309.4 million to reach €318.4 million as of September 30, 2014 (€5.4 million as of December 31, 2013). This variation is explained below:

	September 30, 2014	December 31, 2013
	(in € millions)	
Opening balance	**5.4**	**—**
Share premium issuance	—	5.4
Conversion of shareholder debts	137.3	—
Conversion of Altice IV S.A. vendor note	13.9	—
Conversion of Valemi Corp S.A. vendor note	6.1	—
Share premium relating to Tricom S.A. closing	10.2	—
Share premium relating to the ODO closing	77.8	—
Share premium relating to the ABT contribution	59.7	—
Share premium relating to transaction with non-controlling interests	8.0	
Closing balance	**318.4**	**5.4**

A restructuring of the shareholder debts held by Next L.P. against Altice International was carried out at the beginning of 2014. As a result of this restructuring, the shareholder debts were contributed by Next L.P. to Altice S.A. in exchange for newly issued shares of Altice S.A.. All outstanding Yield Free Preferred Equity Certificates (€38.3 million), Asset Linked Preferred Equity Certificates (including accrued interests, €95.0 million) and interest free loans (€3.9 million) were then contributed to the Company at their nominal value.

Altice IV S.A. and Valemi Corp S.A., the holders of vendor notes against the Company (pertaining to the acquisition of Ma Chaine Sports S.A. and SportV S.A. in Q4 2013), contributed these assets to Altice S.A. at their nominal values of €13.9 million and €6.1 million respectively, in exchange for new shares issued by Altice S.A., who further contributed these instruments to Altice International, in exchange for new shares issued by the Company.

On March 12, 2014 and April 9, 2014, Altice S.A. subscribed to a capital issuance of the Company for amounts that included €10.2 million and €77.8 million of share premium, related to the closing of the Tricom S.A. and Orange Dominicana acquisitions respectively.

As mentioned in note 2.3, on June 27, 2014, Altice S.A. contributed its stake in Altice Blue Two to Altice Caribbean, through a series of cascading capital increases, starting with Altice International, of which €59.7 million was recognised as share premium.

Note 5—Issued capital and share premium (Continued)

On July 1, 2014, the Group acquired non-controlling interests in Green Ch and Green Data Center. These businesses are located in Switzerland and were already under the control of the Group as at acquisition date. The transaction have been financed by a cash contribution from the shareholder amounting to €8.9 million corresponding to a capital increase of 0.9 million (see note 5.1) and €8.0 million allocated to share premium.

Note 6—Reserves

	September 30, 2014	December 31, 2013
	(in millions of euros)	
CPEC reserve (see note 5.1)	—	290.5
Discounting reserve	—	25.3

—*Finance leases*	*10.6*	*11.4*
Current liabilities	**165.5**	**73.5**
Total	**3,933.1**	**3,865.6**

7.1 Borrowings

Borrowings are composed of loans from financial institutions and bonds. As at September 30, 2014, the details of the loans from financial institutions and bonds are given in the sections that follow.

Note 7—Borrowings and other financial liabilities (Continued)

The maturities of borrowings is given below:

	September 30, 2014	< 1 year	One year or more	December 31, 2013
	(in millions of euros)			
Bonds	2,696.3	27.1	2,669.2	2,554.0
Loans from financial institutions	924.7	12.3	912.4	894.1
Total	**3,621.0**	**39.4**	**3,581.6**	**3,448.1**

7.1.1 Bonds

The Group bonds are split as follows:

Issuer	Fair value in millions of euros September 30, 2014	Coupon	Year of maturity	Carrying amount September 30, 2014	Carrying amount December 31, 2013
—Debentures	289.9	Between 3.9% and 6.9% + Consumer Price Index	2018	261.3	280.1
—Senior Secured Notes USD 460 M	389.3	7.875%	2019	350.8	305.1
—Senior Secured Notes EUR 210M	227.9	8.00%	2019	202.9	201.8
—Senior Secured Notes EUR 300M	316.5	6.5%	2022	290.9	292.8
—Senior Secured Notes USD 900M	726.9	6.5%	2022	698.4	637.3
—Senior Notes USD 425M	378.6	9.875%	2020	337.4	309.1
—Senior Notes EUR 250M	282.8	9.00%	2023	245.6	245.3
—Senior Notes USD 400M	335.7	8.125%	2024	309.0	282.5
Total value of bonds	**2,947.6**			**2,696.3**	**2,554.0**
Of which due within one year	*27.1*			*27.1*	*26.8*
Of which due after one year	2,920.5			2,669.2	2,527.2

7.1.2 Borrowings from financial institutions

- In the period ended September 30, 2014, €17.5 million was repaid to lenders of the €60.0 million RCF facility, which was drawn in January 2014 to finance the acquisition of Mobius S.A.S.. The remaining portion of €3.5 million was repaid in July 2014.
- New debt was issued by Green Datacenter for a total amount of € 8.2 million in order to finance the construction of additional datacentre capacities to support its commercial development.
- The Group repaid a total of $ 7.8 million (€5.8 million) linked to the amortization of the $1,034 million term loan issued by Altice Financing.
- The overall increase is linked to the revaluation of the debt labelled in foreign currency at the closing rate as of September 30, 2014

7.2 Loans from related parties

As part of the initial public offering of Altice S.A., a restructuring of loans from related parties was carried out, following which all existing related party loans held by Next L.P. and issued by Altice International S.à r.l. were contributed to Altice S.A. by Next L.P., in exchange for shares of Altice S.A..

As per the accounting standards, such instruments, being interest free in nature, had been recorded at their fair value in the consolidated financial statements. In 2014, these instruments were contributed at their nominal value and converted into share capital and share premium of the Company thus, previous discounting reserves recorded in the accounts of Altice International were reversed, thus leading to an adjustment of €(1.1) million to the Group's consolidated reserves. See note 6.

As of September 30, 2014, no loans from related parties were outstanding.

Note 7—Borrowings and other financial liabilities (Continued)

7.3 Other financial liabilities

Variation in other financial liabilities is explained mainly by the cancellation of Altice Blue Two put. The minority shareholders of Altice Blue Two exchanged their shares in Altice Blue Two against common shares in Altice S.A. As a result of this exchange, the put agreement in place at Altice Blue Two was cancelled (considered to be unexercised), leading to the reversal of a debt amounting to €53.2 million.

In addition to the transaction described above, the company received a short term loan from its sole partner, Altice S.A. for an amount of €46 million, which explains the increase this caption for the nine month period ended September 30, 2014.

7.4 Classification and fair value of financial assets and liabilities

The Group has financial instruments with fair values that are determined by reference to significant unobservable inputs i.e. those that would be classified as level 3 in the fair value hierarchy. There have been no transfers of assets or liabilities between levels of the fair value hierarchy. There are no non-recurring fair value measurements.

The financial instruments that are presented in the condensed consolidated statement of financial position in accordance with their fair value are classified in accordance with groups that have similar characteristics, into hierarchical levels for fair values, as aforesaid, which are determined in accordance with the source of the input that was used for determining the fair value:

- Level 1—Quoted prices (without adjustments) in an active market for identical assets and liabilities.
- Level 2—Inputs other than quoted prices that are included in level 1, which can be observed directly or indirectly.
- Level 3—Inputs that are not based on observable market data (an evaluation technique that does not use observable market data).

As of September 30, 2014, the classification of financial instruments is summarized below:

For the nine month period ended September 30, 2014	Recorded Value in Condensed Consolidated Statement of Financial Position	Level 1 Quoted Prices in active markets for identical assets/liabilities	Level 2 Significant other observable inputs	Level 3 Inputs that are not based on observable market data
			(€ in millions)	
Recurring Fair Value Measurements				
Financial assets				
—Wananchi Group	31.9	—	—	31.9
—Partner Communications Co.	7.1	7.1	—	—
—Other financial assets at FVTPL	0.2	—	—	0.2
Financial liabilities				
—Other financial liabilities at FVTPL (derivative instruments)	126.4	—	124.4	2.0

Note 7—Borrowings and other financial liabilities (Continued)

For the year ended December 31, 2013	Recorded Value in Condensed Consolidated Statement of Financial Position	Level 1 Quoted Prices in active markets for identical assets/liabilities	Level 2 Significant other observable inputs	Level 3 Inputs that are not based on observable market data
			(€ in millions)	
Recurring Fair Value Measurements

—Partner Communication Co.	8.4	8.4	—	—
Financial liabilities				
—Other financial liabilities at FVTPL (derivative instruments)	142.3	—	142.3	—

Note 8—Segmental analysis

8.1 Definitions of segments

Given the geographic spread of the various Group entities, it logically follows that an analysis and control by geographical areas is inalienable to Group strategy of managing its different businesses. It has thus been decided by the Board of Managers to analyse the business across geographies and then by activity. The following geographies have been identified:

- Israel
- Belgium and Luxembourg (''Belux'')
- Portugal
- French Overseas Territories (''FOT'')
- Dominican Republic
- Others (Switzerland, others)

Activities have been split as follows:

- Fixed
- Mobile
- Others (Content/others)

Following the acquisition of ODO, Tricom and GLX, a new geographic segment, Dominican Republic, corresponding to the sole geographic zone of operation of these new entities, was added to the segmental analysis.

In addition, in the context of the anticipated acquisition and integration of the French mobile operator Société Francaise du Radiotéléphone S.A. (''SFR'') into the Altice S.A. Group, the Board of Directors of the latter has decided to amend the presentation of its operational segments, by regrouping the cable and B2B into a single line called 'Fixed', and by maintaining the mobile segment (SFR mainly has a mobile based activity). Other activities such as content, datacenters and holding company operations are classified under others. Such presentation is coherent with the presentation used by the Board of Managers of the Group.

Though this acquisition does not directly impact the Group, Altice S.A. Board of Directors expects to track the operational performance of its international segments (operating companies that are part of the Altice International perimeter) on the same basis as its French businesses (Numericable Group S.A. and SFR in the future) and thus has decided to apply the same split at Altice International as well.

Note 8—Segmental analysis (Continued)

The presentation was amended for comparative purposes for the three and nine months ended September 30, 2013. The businesses that the Group owns and operates do not show significant seasonality overall.

There are few operational transactions between the different segments defined by Management above. Intersegment revenues are considered to be non-material by Management and, hence, not in the scope of regular operational reviews. Intersegment revenues represented less than 0.5% of total revenues for the three and nine month periods ended September 30, 2014 and 2013, respectively.

All corporate entities revenues and expenses have been allocated to the segment ''Others''.

8.2 Segment information

Details regarding revenues, cost of sales and gross profit for our cable, mobile and other segments are as follows. The reconciliation to Profit before income tax expenses is presented below in accordance with the requirements of IFRS 8 (operating segments).

	For the nine months ended September 30, 2014

Note 9—Restructuring, non-recurring costs and other expenses/(income)

Restructuring, non-recurring costs and other expenses/(income) incurred in the three and nine month period ended September 30, 2014 pertain mainly to one-off payments and transaction costs relating to acquisitions or other similar operations. Details are given below:

	9 months ended September 30, 2014	9 months ended September 30, 2013 (restated)	3 months ended September 30, 2014	3 months ended September 30, 2013 (restated)
	(in millions of euros)			
HOT Mobile restructuring costs (related to network sharing deal)	15.1	—	0.6	—
Restructuring costs (employee provisions, contract negotiations)	26.1	9.0	14.8	2.8
Restructuring costs	**41.1**	**9.0**	**15.3**	**2.8**
Fees related to the closing of the ODO transaction	7.0	—	0.3	—
Other deal fees/other income*	10.4	3.3	0.3	(6.0)
Deal fees and other non-recurring costs/(income)	**17.4**	**3.3**	**0.6**	**(6.0)**
Total Restructuring, non-recurring costs and other expenses/(income)	**58.5**	**12.3**	**15.9**	**(3.5)**

* Deal fees incurred in the three and nine month period ended September 30, 2013 mainly relate to fees paid for the HOT take private transaction (December 2012) and the Cabovisao minority stake buyout (April 2013). The other income recorded in the three months ended September 30, 2013 arose mainly due to the write back of some provisions.

Note 11—Compensation of key management personnel

The compensation given to the senior management of the Group (including those managers who are also board members of Altice S.A.), for the 9 month period ended September 30, 2014, was €3.4 million and €1.3 million for the 9 month period ended September 30, 2013 (€1.7 million and €0.3 million for the three months ended September 30, 2014 and 2013 respectively).

Note 12—Income tax

The Group registered an income tax expense of €27.6 million for the nine month period ended September 30, 2014 compared to income tax expenses of €27.4 million for the nine month period ended September 30, 2013. For the nine month period ended September 30, 2014, the Group registered an income tax expense of €33.6 million, driven by increased profits in Israel and the Dominican Republic, which was offset by deferred tax credits of €7.5 million. For the comparative period ended September 30, 2013, the income tax expense was mostly composed of deferred tax expenses amounting to €21.9 million.

Note 13—Commitments and contingent liabilities

13.1.1 Provisions and contingent liabilities

13.1.1.A Israel

During the routine course of business, lawsuits have been filed against the companies that comprise the HOT group and various legal proceedings are outstanding against it.

In the opinion of the management of the Group, based, inter alia, on legal opinions in respect of the chances of the lawsuits, a fair provision of €11.8 million (NIS 55 million) has been recorded in the condensed consolidated financial statements as of September 30, 2014, where provisions are required, in order to cover the exposure as the result of the lawsuits.

In the opinion of the management of the Group, the amount of the additional exposure, in an amount of approximately €537.6 million (NIS 2.5 billion) (over and above the provisions that have been recorded in these Condensed Consolidated financial statements), as of September 30, 2014, as a result of lawsuits that have been filed against companies in the HOT group on various matters, is as follows:

- An amount of approximately €258.0 million (NIS 1.2 billion) to cover claims which HOT's management and legal team estimate to have less than a 50% chance of succeeding.
- An amount of approximately €172.0 million (NIS 0.8 billion) towards claims for which no assessment is possible, or towards those class action lawsuits that were presented very close to the date of the financial statements.
- An amount of approximately €150.5 million (NIS 0.7 billion) to cover claims which HOT's management and legal team estimate to have more than a 50% chance of succeeding.

The following is an abbreviated summary of the Hot group's contingent liabilities effective as of September 30, 2014, in accordance with groupings having similar characteristics:

The nature of the lawsuit	The amount of the additional exposure in excess of the provision recorded as of September 30, 2014	The amount of the lawsuits that cannot be assessed and which were presented close to the date of the financial statements (primarily applications for approval as class actions)	Provisions recorded in the financial statements as of September 30, 2014	Provisions recorded in the financial statements as of December 31, 2013	Updating of the expense (income), net in the reporting period
			(€ millions)		
Customers	522.5	162.4	2.6	4.3	(1.7)
Copyrights	1.1	0.6	3.7	6.5	(0.6)
Suppliers	14.2	—	0.9	0.4	0.4
Employees	1.3	—	0.2	0.2	0.2
The merger transaction	47.5	—	4.5	—	4.5
Total	586.6	163.0	11.8	11.4	2.8

13.1.1.B Portugal

As of September 30, 2014, the Oni Group and Cabovisao had bank guarantees given to third parties in order to secure the fulfilment of their obligations under some of their agreements for, respectively, a total amount of €5.3 million and €8.9 million.

As of September 30, 2014, Cabovisao recorded provisions for approximately €5.2 million for fiscal contingencies for withholding taxes. In addition, during first quarter 2014, the Instituto do Cinema e do Audiovisual (''ICA'') rendered an unfavourable decision regarding the Audiovisual and Cinema taxation

Note 13—Commitments and contingent liabilities (Continued)

for which an amount of €0.9 million was already recorded in the consolidated financial statements as at December 31, 2013.

13.1.1.C Dominican Republic

As of September 30, 2014, Altice Hispaniola had recorded provisions to account for litigations with commercial customers and with employees. As assessed by the legal department, the total amount of claims amounted to €69.0 million (DOP 3.8 billion) and the amount provided for, which is determined based on the probability of cash outflows, was assessed at €4.7 million (DOP 262.0 million), of which €4.0 million (DOP 240.6 million) related to commercial litigation and €0.4 million (DOP 21.4 million) related to employee litigation.

13.1.2 Commitments and contractual liabilities

Altice Hispaniola also has operating leases mainly for the rental of mobile tower sites and office property.

	< 1 year	Maturity 1 - 5 years	> 5 years	Total September 30, 2014
Operating leases	3.5	40.9	5.4	**49.8**
Total	**3.5**	**40.9**	**5.4**	**49.8**

Management has not identified any significant changes to the commitments of the other subsidiaries of the group as compared to the period ended December 31, 2013.

Note 14—Going concern

As of September 30, 2014, the Group had a net current liability position of €414.6 million (mainly due to current liabilities of €885.7 million). During the nine month period ended September 30, 2014, the Group recorded a net loss of €159.6 million (€89.4 million as of September 30, 2013), positive cash flow from operations of €503.8 million (€288.8 million for the nine months ended September 30, 2013), and negative working capital of €220.8 million. The positive cash flow from operations balance was mainly due to strong growth of the operating profit. The net loss recorded in the nine month period ended September 30, 2014 resulted mainly from finance costs related to the financial debt of the Group and revaluation of monetary items denominated in foreign currency.

The negative working capital position is structural and follows industry norms. Customers generally pay subscription revenues early or mid-month, with short DSOs (days of sales outstanding). Suppliers are generally paid from the beginning of the following month and after, thus generating a negative working capital, as evidenced by the difference in the level of receivables and payables (€292.9 million receivables as of September 30, 2014 compared to €535.6 million payable as of September 30, 2014). Payables due the following month are covered by revenues and operating cash (if needed). As of September 30, 2014, the Group had few short term current liabilities with amortization of debts limited to the local bonds in Israel (€13.4 million per half year), local debt in Switzerland (€1.2 million quarter) and on the Altice Financing term loan facility (€1.8 million per quarter).

As of September 30, 2014, the Company had a negative equity position of €93.2 million, of which €94.2 million attributable to the equity holders. The net equity position of the Company continued to improve (increase of €167.9 million compared to the year ended December 31, 2013 (€261.2 million), mainly driven by the conversion of loans from related parties granted by Altice S.A. into share capital and share premium of the Company. Going forward, the Company will have access to capital markets through its sole shareholder, Altice S.A., and this is expected to further improve the equity position of the Company.

In view of the current financial situation of the Company, Management is confident that the Group will continue to act as a going concern for the next twelve months, given its earnings and cash flow generating ability.

Note 14—Going concern (Continued)

In addition, the Group had cash reserves of €141.3 million as of September 30, 2014, considered sufficient to cover its operational needs. The Group also had access to revolving credit facilities (''RCF'') of up to €143.5 million to finance any liquidity needs it might have, which are undrawn as at September 30, 2014.

Note 15—Subsequent events

Additional investment in Wananchi

On October 2, 2014, Altice Africa S.à r.l., a 100% subsidiary of the Company, invested an additional $ 10.8 million into Wananchi, a cable company with operations in Kenya and other east African countries. This investment was part of a $ 130 million subordinated notes being issued by Wananchi and open to subscription by current and new shareholders. Altice Africa has pledged to fund up to $ 40 million in three tranches, with the next tranche of $ 20 million due within six months from the date of the payment of the first tranche (April 2, 2015). The notes bear cash interest at a rate of 11% or PIK interest at a rate of 13%. Before this additional investment, Altice Africa already held a 17.4% equity interest in Wananchi (valued at €31.9 million) and convertible notes for a total of €2.9 million. The Group also obtained a new board seat as part of the funding.

The new notes are also convertible at a strike price of $ 1.15/ note issued. If fully converted, the new tranche, when fully funded, will give Altice Africa an approximate 21% shareholding in Wananchi.

Disposal of assets (OMT)

Following the French Competition Authority's conditional approval, obtained on October 27, 2014, to the purchase of SFR by Numericable Group S.A. and Altice S.A., the Company and Altice have agreed to dispose of the OMT's mobile business in the Reunion Islands and Mayotte. OMT's Indian Ocean assets are included respectively in the reporting segment French Overseas Territories (FOT) in note 8—Segment analysis.

In particular, the sale will include the 2G and 3G licenses and frequencies in Reunion Island and Mayotte, the customer base and the relevant personnel.

As these assets were not considered as assets held for sale, as of the date of the statement of financial position, as per the requirements of IFRS 5, Non-current assets held for sale and discontinued operations, no significant accounting impact has been recorded in the condensed consolidated financial statements of the Group for the period ended September 30, 2014.

Offer for Portugal Telecom

On November 30, 2014, Altice S.A., the sole shareholder of the Company announced an exclusivity agreement with Oi to agree the purchase of the Portuguese assets of Portugal Telecom excluding Portugal Telecom's Rio Forte debt securities.

The fully financed, binding offer values Portugal Telecom at an enterprise value of €7.4bn on a cash and debt-free free basis which includes €500m consideration related to the future revenue generation of Portugal Telecom.

The transaction, net of financial debt, accrued post-retirement liabilities and other purchase price adjustments will be financed by new debt and existing cash from the Group.

Should a final agreement be entered in to, the transaction will require corporate approvals and will be subject to standard regulatory approvals for a transaction of this nature.

Note 16—Approval of the condensed consolidated financial statements

The condensed consolidated financial statements were approved by the Board of Managers and authorized for issue on December 1, 2014.

REVIEW REPORT OF THE REVISEUR D'ENTREPRISES AGREE ON CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Introduction

We have reviewed the accompanying condensed consolidated statement of financial position of Altice International S.à r.l. as of September 30, 2014, the related condensed consolidated statements of income and other comprehensive income for the three month and nine month periods then ended, the related condensed consolidated statements of changes in equity and cash flows for the nine month period then ended and the other explanatory notes (collectively, the ''Interim Financial Statements''). The Board of Managers is responsible for the preparation and fair presentation of the Interim Financial Statements in accordance with International Accounting Standard 34, *Interim Financial Reporting*, as adopted in the European Union. Our responsibility is to express a conclusion on these Interim Financial Statements based on our review.

Scope of Review

We conducted our review in accordance with International Standard on Review Engagements 2410, *Review of Interim Financial Information Performed by the Independent Auditor of the entity*. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying Interim Financial Statements are not prepared, in all material respects, in accordance with International Accounting Standard 34, *Interim Financial Reporting*, as adopted in the European Union.

REPORT OF THE REVISEUR D'ENTREPRISES AGREE

To the Sole Partner of
Altice VII S.à r.l.
3, boulevard Royal
L-2449 Luxembourg
Grand-Duchy of Luxembourg

Following our appointment by the Sole Partner, we have audited the accompanying consolidated financial statements of Altice VII S.à r.l., which comprise the consolidated statement of financial position as at December 31, 2013, and the consolidated statements of income, other comprehensive income, changes in equity and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

Responsibility of the Board of Managers for the consolidated financial statements

The Board of Managers is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards as adopted in the European Union, and for such internal control as the Board of Managers determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Responsibility of the réviseur d'entreprises agréé

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing as adopted for Luxembourg by the *Commission de Surveillance du Secteur Financier*. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the *réviseur d'entreprises agréé*'s judgement including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the *réviseur d'entreprises agréé* considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the Board of Managers, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements give a true and fair view of the consolidated financial position of Altice VII S.à r.l. as of December 31, 2013, and of its consolidated financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted in the European Union.

1—Notes to the consolidated financial statements

1.1 General description of the Group and its activities

Altice VII (the ''Company'') is a private limited liability company (*société à responsabilité limitée*) incorporated under the laws of the Grand Duchy of Luxembourg on December 15, 2008, and registered under the number B 143.725 in Luxembourg. The Group refers to the Company and it subsidiaries. The Company was initially established as a public limited company (société anonyme) and then converted to a private limited liability company on October 7, 2009.

The registered office of the Company is established at 3, boulevard Royal, L-2449 Luxembourg, and as at December 31, 2013 its sole equity holder is NEXT LP. The ultimate controlling party is considered to be Patrick Drahi.

On January 31, 2014, Next LP contributed all its economic interests in Altice VII S.à r.l. (''The Group'') to Altice S.A. (''Altice'') in exchange for shares in Altice S.A.

Altice is listed on Euronext in Amsterdam. The consolidated financial statements, which include Altice VII Group are available at the registered address of Altice: 3, boulevard Royal, L-2449 Luxembourg and on its website: www.altice.net.

Altice VII offers a variety of services over its cable and mobile infrastructure, including, but not limited to, pay television, broadband Internet access, fixed-line telephony and mobile telephony to residential customers, and, to a lesser extent, corporate customers, depending on the country. Available cable-based service offerings depend on the bandwidth capacity of its cable networks and whether they have been upgraded for two-way communications. Where possible, Altice VII Group intends to deploy the same technologies and equipment across its footprints to generate economies of scale and common knowledge. In addition, the Altice VII group companies aim at sharing skills and best practices across the various operations of Altice VII Group.

Television service offerings include basic and premium programming, and, in most markets, incremental product and service offerings such as enhanced pay-per-view programming, including video-on-demand (''VoD'') and near-video-on-demand (''NVoD''), digital video recorders (''DVR''), high definition (''HD'') television services and, in certain areas, exclusive content, purchased or produced. The Group tailors its basic and premium channel line-up to each country of operation according to culture, demographics, programming preferences and local regulation. The Altice VII Group also offers broadband Internet access services and fixed-line telephony in all its footprints. It also owns and operates mobile infrastructures in certain geographies (French Overseas Territories) and offers mobile services through an MVNO (Mobile Virtual Network Operator) arrangement in Belgium.

1.2. Application of new and revised International Financial Reporting Standards (IFRSs)

1.2.1 New and revised IFRSs affecting amounts reported and/or disclosures in the financial statements:

In the current year, the Group has applied a number of new and revised IFRSs issued by the International Accounting Standards Board (IASB) and endorsed by the European Union.

New and revised Standards on consolidation, joint arrangements, associates and disclosures

In May 2011, a package of five standards on consolidation, joint arrangements, associates and disclosures was issued comprising IFRS 10 Consolidated Financial Statements, IFRS 11 Joint Arrangements, IFRS 12 Disclosure of Interests in Other Entities, IAS 27 (as revised in 2011) Separate Financial Statements and IAS 28 (as revised in 2011) Investments in Associates and Joint Ventures. Subsequent to the issue of these standards, amendments to IFRS 10, IFRS 11 and IFRS 12 were issued to clarify certain transitional guidance on the first-time application of the standards.

In the current year, the Group has early applied for the first time IFRS 10, IFRS 11, IFRS 12 and IAS 28 (as revised in 2011) together with the amendments to IFRS 10, IFRS 11 and IFRS 12 regarding the

1—Notes to the consolidated financial statements (Continued)

transitional guidance. IAS 27 (as revised in 2011) is not applicable to the Group as it deals only with separate financial statements.

The impact of the application of these standards is set out below.

Impact of the application of IFRS 10

IFRS 10 replaces the parts of IAS 27 Consolidated and Separate Financial Statements that deal with consolidated financial statements and SIC-12 Consolidation—Special Purpose Entities. IFRS 10 changes the definition of control such that an investor has control over an investee when a) it has power over the investee, b) it is exposed, or has rights, to variable returns from its involvement with the investee and c) has the ability to use its power to affect its returns. All three of these criteria must be met for an investor to have control over an investee. Previously, control was defined as the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. Additional guidance has been included in IFRS 10 to explain when an investor has control over an investee.

The Managers of the Company made an assessment as at the date of initial application of IFRS 10 (i.e. 1 January 2013) and have not identified any impact in the scope of consolidation linked to application of IFRS 10.

Impact of the application of IFRS 11

IFRS 11 replaces IAS 31 Interests in Joint Ventures and SIC 13 Jointly Controlled Entities—Non-Monetary Contributions by Venturers.

IFRS 11 deals with how a joint arrangement should be classified where two or more parties have joint control. There are two types of joint arrangements under IFRS 11: joint operations and joint ventures. These two types of joint arrangements are distinguished by parties' rights and obligations under the arrangements.

Types of Joint Arrangement	Features	Accounting under IFRS 11
Joint venture	Joint ventures have rights to the net assets of the arrangement.	Equity method of accounting—Proportionate consolidation is no longer allowed
Joint operation	Joint operators have rights to the assets and obligations for the liabilities of the arrangement.	Each joint operator recognizes its assets, liabilities, revenue and expenses relating to its interest in joint operation in accordance with the IFRSs applicable to those particular assets, liabilities, revenues and expenses

Under IFRS 11, the existence of a separate vehicle is no longer a sufficient condition for a joint arrangement to be classified as a joint venture whereas, under IAS 31, the establishment of a separate legal vehicle was the key factor in determining whether a joint arrangement should be classified as a jointly controlled entity.

Application of IFRS 11 has no impact on the consolidated financial statements of the Group for the year ended December 31, 2013.

Impact of the application of IFRS 12

IFRS 12 is a new disclosure standard and is applicable to entities that have interests in subsidiaries, joint arrangements, associates and/or unconsolidated structured entities. In general, the application of IFRS 12 has resulted in more extensive disclosures in the consolidated financial statements.

1—Notes to the consolidated financial statements (Continued)

IFRS 13 Fair Value Measurement

The Group has applied IFRS 13 for the first time in the current year. IFRS 13 establishes a single source of guidance for fair value measurements and disclosures about fair value measurements. The scope of IFRS 13 is broad; the fair value measurement requirements of IFRS 13 apply to both financial instrument items and non-financial instrument items for which other IFRSs require or permit fair value measurements and disclosures about fair value measurements, except for share-based payment transactions that are within the scope of IFRS 2 Share-based Payment, leasing transactions that are within the scope of IAS 17 Leases, and measurements that have some similarities to fair value but are not fair value (e.g. net realisable value for the purposes of measuring inventories or value in use for impairment assessment purposes).

IFRS 13 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions. Fair value under IFRS 13 is an exit price regardless of whether that price is directly observable or estimated using another valuation technique. Also, IFRS 13 includes extensive disclosure requirements.

IFRS 13 requires prospective application from 1 January 2013. In addition, specific transitional provisions were given to entities such that they need not apply the disclosure requirements set out in the Standard in comparative information provided for periods before the initial application of the Standard. In accordance with these transitional provisions, the Group has not made any new disclosures required by IFRS 13 for the 2012 comparative period. Other than the additional disclosures, the application of IFRS 13 has not had any material impact on the amounts recognised in the consolidated financial statements.

Amendment to IFRS 7 disclosure—Offsetting Financial Assets and Financial Liabilities

The Group has applied the amendments to IFRS 7 disclosures—Offsetting financial assets and liabilities for the first time in the current period, The amendments to IFRS 7 require entities to disclose information about rights of offset and related arrangements (such as collateral pricing agreements) for financial instruments under an enforceable master netting agreement or similar arrangement.

The amendments have been applied retrospectively. As the Group does not have an offsetting arrangement in place, the application of the amendments has had no material impact on the disclosures or on the amounts recognised in the consolidated financial statements.

Annual improvements to IFRSs 2009-2011 cycle issued in May 2012

The Annual Improvements to IFRSs 2009-2011Cycle include a number of amendments to various IFRSs. The amendments are effective for annual periods beginning on or after January 1, 2013. Amendments to IFRS include:

Amendments to IAS 16 Property Plant and Equipment; and

Amendments to IAS 32 Financial Instruments: Presentation.

Amendments to IAS 16

The amendments to IAS 16 clarify that spare parts, stand-by equipment and servicing equipment should be classified as property, plant and equipment when they meet the definition of the property, plant and equipment in IAS 16 and as inventory otherwise. This amendment does not have a significant impact on the Group's consolidated financial statements.

Amendments to IAS 32

The amendments to IAS 32 clarify that income tax relating to distributions to holders of an equity instrument and to transaction costs of an equity transaction should be accounted for in accordance with

1—Notes to the consolidated financial statements (Continued)

IAS 12 income taxes. This amendment does not have a significant impact on the Group's consolidated financial statements.

Standards issued but not yet effective

In its financial statements, the Group has not anticipated the following standards and interpretations, for which application is not mandatory for periods opened from January 1, 2013. Their impact on the Group's financial statements is estimated not to be significant and/or not applicable.

IAS 36 Impairment of Assets: Recoverable Amounts Disclosures for Non-Financial Assets

This standard's objective is to amend the disclosure requirements in IAS 36 Impairment of Assets with regard to the measurement of the recoverable amount of impaired assets that were made as a consequence of issuing IFRS 13 Fair Value Measurement in May 2011.

The group anticipates additional disclosures in relation to the application of this standard.

IAS 39 Financial Instruments: Recognition and Measurement and IFRS 9 Financial Instruments: Novation of derivatives and continuation of hedge accounting

This standard's objective is to provide an exception to the requirement for the discontinuation of hedge accounting in IAS 39 and IFRS 9 in circumstances when a hedging instrument is required to be novated to a central counterparty as a result of laws or regulations.

The group does not apply hedge accounting and therefore does not expect any impact from the application of this Standard.

2—Significant accounting policies

2.1 Significant accounting policies

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards as adopted by the European Union.

2.2 Basis of preparation

The consolidated financial statements have been prepared on the historical cost basis except for certain properties and financial instruments that are measured at revalued amounts or fair values at the end of each reporting period, as explained in the accounting policies below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these consolidated financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of IFRS 2, leasing transactions that are within the scope of IAS 17, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in IAS 2 or value in use in IAS 36.

2—Significant accounting policies (Continued)

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and

Level 3 inputs are unobservable inputs for the asset or liability.

The principal accounting policies are set out below.

2.3 Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and entities (including structured entities) controlled by the Company and its subsidiaries. Control is achieved when the Company:

- has power over the investee;
- is exposed, or has rights, to variable returns from its involvement with the investee; and
- has the ability to use its power to affect its returns.

The Company reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

When the Company has less than a majority of the voting rights of an investee, it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Company considers all relevant facts and circumstances in assessing whether or not the Company's voting rights in an investee are sufficient to give it power, including:

- the size of the Company's holding of voting rights relative to the size and dispersion of holdings of the other vote holders;
- potential voting rights held by the Company, other vote holders or other parties;
- rights arising from other contractual arrangements; and
- any additional facts and circumstances that indicate that the Company has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including voting patterns at previous shareholders' meetings.

Consolidation of a subsidiary begins when the Company obtains control over the subsidiary and ceases when the Company loses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statements of income and other comprehensive income from the date the Company gains control until the date when the Company ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income are attributed to the owners of the Company and to the non-controlling interests. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies.

All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

2—Significant accounting policies (Continued)

All companies in which the Group has a controlling interest are fully consolidated. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases.

All intra-group transactions, balances, income and expenses are eliminated in full on consolidation. Non-controlling interests in subsidiaries are identified separately from the Group's equity therein.

2.4 Functional currency

The consolidated financial statements are presented in millions of euros. Euro is the functional of Altice VII and the presentation currency of the Group.

The functional currency, which is the currency that best reflects the economic environment in which the Group operates and conducts its transactions, is separately determined for each Group entity, including an associate accounted for using the equity method, and is used to measure its financial position and operating results.

2.5 Foreign currency translation

The presentation currency of the Group is euro. In individual companies, transactions in foreign currencies are recorded at the exchange rate at the date of the transaction. Monetary assets and liabilities in foreign currencies are translated at year-end rates. Any resulting exchange differences are accounted for in the income statement. On consolidation, assets and liabilities of the Group's entities reported in their functional currencies are translated into euro, the Group's presentation currency, using the year-end exchange rates. Income and expense items are translated into euro at the annual weighted average exchange rate or at the rate of the date the transaction occurred for significant items.

Differences arising from the translation of opening net assets of the Group entities, together with differences arising from the restatement of the net results for the year of the Group entities, are recognized in other comprehensive income.

2.6 Subsidiaries and associates

2.6.1 Subsidiaries

All companies in which the Group has a controlling interest are fully consolidated. Control exists when the Group has the power, directly or indirectly, to govern the financial and operating policies of an enterprise so as to obtain benefits from its activities. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases.

All intra-group transactions, balances, income and expenses are eliminated in full on consolidation. Non-controlling interests in subsidiaries are identified separately from the Group's equity therein.

2.6.2 Associates

Investments, over which the Group exercises significant influence, but not control, are accounted for under the equity method. Such investees are referred to as ''associates'' throughout these consolidated financial statements.

Significant influence is presumed to exist when the Group holds at least 20% of the voting power in the associates. Associates are initially recognized at cost at acquisition date. The Consolidated Financial Statements include the Group's share of income and expenses, from the date significant influence commences until the date that significant influence ceases.

As per the provisions of IAS 28 *Investment in associates* the interest income and expenses recorded in the consolidated financial statements of the Group on loans with associates have not been eliminated in

2—Significant accounting policies (Continued)

the consolidated statements of income and therefore are still recorded in the consolidated financial statements.

2.7 Operating profit before depreciation, amortization and non-recurring costs

The Group has included the subtotal ''Operating profit before depreciation, amortization and no-recurring costs'' on the face of the consolidated statements of income. The Group believes that this subtotal is useful to users of the Group's financial statements as it provides them with a measure of the operating results which excludes non-cash elements such as depreciation and amortization as well as non-recurring transactions and management fees, enhancing the predictive value of the Group's financial statements and providing information regarding the results of the Group's ongoing trading activities and cash-flow generation that allows investors to better identify trends in the Group's financial performance.

This non-IFRS measure is used by the Group internally to manage and assess the results of its operations, make decisions with respect to investments and allocation of resources, and assess the performance of management personnel.

The Group's subtotal within operating income may not be comparable to similarly titled measures used by other entities. Further, this measure should not be considered as an alternative for operating income as the effects of depreciation, amortization and impairment, excluded from this measure do ultimately affect the operating results, which is also presented within the consolidated financial statements in accordance with IFRS 1.

2.8 Revenue recognition

Revenue from the Group's activities is mainly composed of television, broadband Internet, fixed and mobile telephony subscription and installations fees invoiced to residential and business clients.

Revenue comprises the fair value of the consideration received or receivable for the sale of goods and services in the ordinary course of the Group's activities. Revenue is shown net of value-added tax, returns, rebates and discounts and after eliminating intercompany sales within the group.

Revenues on bundle packages sold by the Group are split into and recognised under each individual service sold in the bundle. For example, tripe play package revenues are booked under 'triple play television', 'triple play data' and 'triple play telephony' on a straight-line basis over their subscription period and revenues from telephone calls are recognized in revenue when the service is rendered.

Revenue is recognized as follows, in accordance with IAS 18 *Revenue*:

- Revenues from subscriptions for basic cable services, digital television pay, Internet and telephony (fixed and mobile) are recognized in revenue on a straight-line basis over the subscription period; revenues from telephone calls are recognized in revenue when the service is rendered ;
- When a promotion not related to a customer's past consumption and purchases (such as subscription's rate discount, service free period) is offered to customer in relation to a subscription, the Group recognizes the total amount of billable revenue on a straight-line basis over the term of the contract ;
- Installation and set-up fees (including connection) for residential customers are accounted for as revenues when the service is rendered, if consideration received is lower than the sales direct costs to acquire the contractual relationship. Service access fees for business clients, when they are only allowed access to the services that are sold associated to an equipment or a service, are deferred and the corresponding revenue is recognized along the statistical client lifetime duration and generally spread over the contractual engagement period ; and

2—Significant accounting policies (Continued)

- The revenue related to transmission capacity on terrestrial cables under indefeasible rights of use: Indefeasible Rights of Use (''IRU'') arrangements are recognized on a straight-line basis over the life of the contract.

Revenues from mobile services resulting from the sale of mobile services:

- Revenues from the sale of equipment includes the sale of mobile devices and ancillary equipment for those devices. The revenues from the sales are recognized where all of the significant risk and yields that are derived from the ownership of the equipment are transferred to the purchaser and the seller does not retain continuing managerial involvement. Generally, the time of the delivery is the time at which ownership is transferred. The charge in respect of terminal equipment is made separately from the monthly charge for the consumption of services, in accordance with the amounts that is denoted in a separate invoice, which reflects the fair value of the terminal equipment, which is not subsidized by the Group. In the light of the aforesaid, the Group recognizes revenues in respect of the sale of devices on the transfer of the ownership of the devices to its customers. The revenues are recognized on the first day in accordance with its fair value as of that time and the difference between the fair value and the denoted amount of the consideration is recognized as financing income over the course of the period of the installment payments.

Income from credit arrangements

- Revenues deriving from long-term credit arrangements (such as the sale of devices in installments) are recorded on the basis of the present value of the future cash flows (against long-term receivables) and are discounted in accordance with interest rates. The difference between the original amount of the credit and the present value, as aforesaid, is spread over the length of the credit period and recorded as interest income over the length of the credit period.

2.9 Finance costs

Finance costs primarily comprise:

- Interest charges and other expenses paid for financing operations recognized at amortized costs ;
- Changes in the fair value of interest rate derivative instruments that do not qualify as hedges for accounting purposes according to ''IAS 39'' ;
- Interest income relating to cash and cash equivalents; and
- Gains/losses on extinguishment of debt.

2.10 Income taxes

Taxes on income in the income statement include current taxes and deferred taxes. The tax expenses or income in respect of current taxes or deferred taxes are recognized in profit or loss unless they relate to items that are recorded directly in equity, in these cases the tax effect is reflected under the relevant equity item.

2.10.1 Current taxes

The current tax liability is measured using the tax rates and tax laws that have been enacted or substantively enacted by the end of reporting period as well as adjustments required in connection with the tax liability in respect of previous years.

2—Significant accounting policies (Continued)

2.10.2 Deferred taxes

Differences existing at closing between the tax base value of assets and liabilities and their carrying value in the Consolidated Statement of Financial Position give rise to temporary differences. Pursuant to the liability method, these temporary differences result in the accounting of:

- Deferred tax assets, when the tax base value is greater than the carrying value (expected future tax saving),
- Deferred tax liabilities, when the tax base value is lower than the carrying value (expected future tax expense).

Deferred tax assets and liabilities are measured at the expected tax rates for the year during which the asset will be realized or the liability settled, based on tax rates (and tax regulations) enacted or substantially enacted by the closing date. They are reviewed at the end of each year, in line with any changes in applicable tax rates.

Deferred tax assets are recognized for all deductible temporary differences, tax loss carry-forwards and unused tax credits, insofar as it is probable that a taxable profit will be available, or when a current tax liability exists to make use of those deductible temporary differences, tax loss carry-forwards and unused tax credits, except where the deferred tax asset associated with the deductible temporary difference is generated by initial recognition of an asset or liability in a transaction which is not a business combination, and that, at the transaction date, does not impact earnings, nor income tax profit or loss.

For deductible temporary differences arising from investments in subsidiaries, joint ventures and other associated entities, deferred tax assets are recorded to the extent that it is probable that the temporary difference will reverse in the foreseeable future and that a taxable profit will be available against which the temporary difference can be utilized.

The carrying value of deferred tax assets is reviewed at each closing date, and revalued or reduced to the extent that it is more or less probable that a taxable profit will be available to allow the deferred tax asset to be utilized. When assessing the probability of a taxable profit being available, account is taken, primarily, of prior years' results, forecasted future results, non-recurring items unlikely to occur in the future and the tax strategy. As such, the assessment of the group's ability to utilize tax losses carried forward is to a large extent judgment-based. If the future taxable results of the group proved to differ significantly from those expected, the group would be required to increase or decrease the carrying value of deferred tax assets with a potentially material impact on the Consolidated Statement of Financial Position and Consolidated Income Statement of the Group.

Deferred tax liabilities are recognized for all taxable temporary differences, except where the deferred tax liability results from goodwill or initial recognition of an asset or liability in a transaction which is not a business combination, and that, at the transaction date, does not impact earnings, nor income tax profit or loss.

For taxable temporary differences arising from investments in subsidiaries, joint ventures and other associated entities, deferred tax liabilities are recorded except to the extent that both of the following conditions are satisfied: the parent, investor or venturer is able to control the timing of the reversal of the temporary difference and it is probable that the temporary difference will not be reversed in the foreseeable future.

Current tax and deferred tax shall be charged or credited directly to other comprehensive income, and not earnings, if the tax relates to items that are credited or charged directly to other comprehensive income.

2.11 Goodwill and business combinations

Business combinations, not occurring under common control, are accounted for in accordance with the purchase method. The acquiree's identifiable assets, liabilities and contingent liabilities that meet the

2—Significant accounting policies (Continued)

conditions for recognition under IFRS 3 ''Business combinations'' are recognized at their fair value at acquisition date.

The Group recognizes goodwill as of the acquisition date and is measured as the excess of (a) over (b) as follows:

a) *The aggregate of:*

- The consideration transferred, which generally requires acquisition-date fair value;
- The amount of any non-controlling interests in the acquiree measured;
- In a business combination achieved in stages, the acquisition-date fair value of the acquirer's previously held equity interest in the acquiree.

b) *The net of the acquisition-date balances of the identifiable assets acquired and the liabilities measured in accordance with IFRS 3.*

Any excess of the cost of acquisition over the Group's share in the fair value of all identified assets and liabilities is recognized as goodwill.

The goodwill is determined provisionally by the end of the period. The Group recognizes any adjustments to those provisional values within twelve months after the acquisition date.

During the measurement period, the acquirer shall recognize adjustments to the provisional amounts as if the accounting for the business combination had been completed at the acquisition date. Thus, the acquirer shall revise comparative information for prior periods presented in financial statements as needed, including making any change in depreciation, amortization or other income effects recognized in completing the initial accounting.

If the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed exceeds the purchase price, a gain is recognized immediately.

Subsequently, goodwill is measured at its initial amount less recorded accumulated impairment losses. Impairment loss for goodwill is recorded in the income statement as a deduction from operating income (account ''Depreciation and amortization'') and is never reversed subsequently.

Changes in the Group's ownership interests in subsidiaries that do not result in the Group losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the Group's interests and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to owners of the Group.

For acquisitions under common control, the Group does not perform a purchase price allocation. Any difference between the consideration paid and the book value of the net assets acquired is directly attributed to the reserves of the Group and no residual goodwill is recorded.

2.12 Other intangible assets

Intangible assets acquired separately are recorded at cost on initial recognition, with the addition of direct acquisition costs. Intangible assets acquired in a business combination are measured at fair value as of the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and less any accumulated impairment losses. In our Israeli entity, the costs of producing in-house content is also considered to be an intangible assets and recognized at the cost of production of the shows. Following initial recognition, these intangible assets are carried at cost less any accumulated amortization and less any accumulated impairment losses.

According to Management, intangible assets have either definite or indefinite useful lives.

2—Significant accounting policies (Continued)

Assets with definite useful lives are amortized over their useful lives and assessed for impairment signs which would indicate impairment in value. The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least once a year. Changes in the expected useful life or the expected pattern of consumption of future economic benefits that are expected to derive from the asset are treated as a change in an accounting estimate which is treated prospectively. The amortization expenses regarding intangible assets with finite useful lives are recognized in the income statement.

The useful lives of the intangible assets are as follows:

	Duration
Software	3 years
Customer relations	7 to 37 years
Licences	5 years
Customer relations with a defined contractual term	3 years
Subscriber purchase costs	based on average duration of subscriptions

Assets with indefinite useful lives are tested for impairment annually as well as where there is an indication that it may be impaired by comparing their carrying amount with their recoverable amount.

2.13 Impairment of tangible and intangible assets

Each time events or changes in the economic environment indicate a current risk of impairment of goodwill, other intangible assets, property, plant and equipment and assets in progress, the Group re-examines the value of these assets. In addition, goodwill, other intangible assets with an indefinite useful life, and intangible assets in progress are all subject to an impairment test performed annually.

This test is performed in order to compare the recoverable amount of an asset to its carrying amount.

An asset's recoverable amount is the higher of an asset's fair value less costs to sell and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. In that case, recoverable amount is determined for the cash-generating unit to which the asset belongs. A Cash Generating Unit (''CGU'') is the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or groups of assets.

The value in use of each asset or group of assets is determined as the discounted value of future cash flows (discounted cash flow method or ''DCF'') by using a discount rate after tax specific to each asset or group of assets concerned.

The fair value less costs to sell is the amount obtained from the sale of the asset or group of assets in an arm's length transaction between knowledgeable and willing parties, less costs to sell.

When the carrying amount of an asset exceeds its recoverable amount, an impairment loss is recognized in the caption ''Depreciation and amortization'' in the income statement. Only impairment loss recognized on assets other than goodwill such as depreciable intangible assets, intangible assets with indefinite useful life and property, plant and equipment, may be reversed.

2.14 Property, plant and equipment

Property, plant and equipment are presented at cost with the addition of direct purchase costs less accumulated depreciation and accumulated losses on impairment and they do not include routine maintenance expenses. The cost includes spare parts and ancillary equipment that can only be used in connection with the plant and machinery.

2—Significant accounting policies (Continued)

Depreciation is calculated using the straight line method over the estimated useful lives of the assets, as follows:

	Duration
Buildings	25 to 50 years
Cables Network	4 to 20 years
Call center (primarly electronic equipment)	5 to 9 years
Converters and modems	7 years
Computers and ancillary equipment	3 to 6 years
Office furniture and equipment	6 to 16 years
Communication network infrastructure	6 to 16 years
Leasehold contracts	see below

Leasehold contracts are depreciated according to the straight line method during the rental period (including the option period for an extension by the Group, which it intends to exercise) or the estimated useful lifetime of the improvement.

Elements of a fixed asset item, having a cost that is significant in comparison to the overall cost of the item, are depreciated separately, using the components method. The depreciation is calculated in accordance with the straight line method at annual rates that are considered to be sufficient in order to depreciate the assets over the length of their estimated useful lives.

The useful life, depreciation method and residual value of an asset are reviewed at least annually and any changes are accounted for prospectively as a change in accounting estimate.

2.15 Leasing

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

2.15.1 The Group as lessor

Amounts due from lessees under finance leases are recognized as receivables at the amount of the Group's net investment in the leases. Finance lease income is allocated in an accounting periods so as to reflect a constant periodic rate of return on the Group's net investment outstanding in respect of the leases.

Rental income from operating leases is recognized on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognized on a straight-line basis over the lease term.

Rental income from the leasing of customer premises equipment (set top boxes, modems and decoders) is recognized on a straight-line basis over the term of the subscription held by the client. At the end of the contract or in case of voluntary contract termination by the client, this equipment is repossessed and thus remains in the inventory of the Group.

2.15.2 The Group as lessee

Assets held under finance leases are initially recognized as assets of the Group at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the consolidated statement of financial position as a finance lease obligation.

Lease payments are apportioned between finance expenses and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance expenses are recognized immediately in profit or loss, unless they are directly attributable to qualifying assets, in which case they are capitalized in accordance with the Group's general policy on borrowing costs (see

2—Significant accounting policies (Continued)

note 2.16 below). Contingent rentals are recognized as expenses in the periods in which they are incurred.

Operating lease payments are recognized as an expense on a straight-line basis over the lease term, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed. Contingent rentals arising under operating leases are recognized as an expense in the period in which they are incurred.

In the event that lease incentives are received to enter into operating leases, such incentives are recognized as a liability. The aggregate benefit of incentives is recognized as a reduction of rental expense on a straight-line basis, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

2.16 Borrowing costs

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized as part of the cost of that asset. According to management, it does not take a substantial period of time to get ready for the intended use because of the incremental deployment of the network. This standard has consequently no impact on the consolidated financial statements.

2.17 Government grants

Government grants are not recognized until there is reasonable assurance that the Group will comply with the conditions attaching to them and that the grants will be received.

Government grants are recognized in profit or loss on a systematic basis over the periods in which the Group recognizes as expenses the related costs for which the grants are intended to compensate. Specifically, government grants whose primary condition is that the Group should purchase, construct or otherwise acquire non-current assets are recognized as deferred revenue in the consolidated statement of financial position and transferred to the income statement on a systematic and rational basis over the useful lives of the related assets.

Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Group with no future related costs are recognized in profit or loss in the period in which they become receivable.

The benefit of a government loan at a below-market rate of interest is treated as a government grant, measured as the difference between proceeds received and the fair value of the loan based on prevailing market interest rates.

2.18 Financial assets

The Group classifies financial assets in four categories: available-for-sale, loans and receivables, held-to-maturity and financial assets at fair value through profit and loss. They are classified as current assets and non-current assets according to IAS 1 ''Presentation of financial statements''.

Purchases and sales of all financial assets are recognized on a trade date basis.

2.18.1 Available-for-sale financial assets

Available-for-sale financial assets are recognized initially at fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset. After initial recognition, they are reported at their fair value. Gains and losses arising from changes in their fair value are recognized directly in equity, until the security is disposed of or is determined to be impaired, at which time the cumulative gain or loss previously recognized in equity is included in the profit or loss for the period.

Available-for-sale financial assets consist mainly of shares in non-consolidated companies. Fair value corresponds to quote price for listed securities. For non-listed securities, and when a reliable estimate of

2—Significant accounting policies (Continued)

fair value cannot be made using valuation techniques, the group values financial assets at historical cost, less any impairment losses.

When there is objective evidence that available-for-sale assets are impaired, the cumulative impairment loss included in equity is reclassified from other comprehensive income to income. Objective evidence that an available-for-sale financial asset is impaired includes, among other things, a decrease in the estimated future cash flows arising from these assets, as a result of significant financial difficulty of the issuer, a material decrease in expected future profitability or a prolonged decrease in the fair value of the security. Impairment losses recognized in profit or loss for equity instruments classified as available-for-sale are never reversed through profit or loss.

2.18.2 Loans and receivables

Loans and receivables are recognized initially at fair value plus transaction costs that are directly attributable to the acquisition. After initial recognition, they are measured at amortized cost using the effective interest rate method.

This category mainly includes trade receivables.

If there is objective evidence that an impairment loss has occurred, the amount of this loss, measured as the difference between the financial assets' carrying value and its recoverable amount is recognized in the income statement. Impairment losses may be reversed if the recoverable amount of the asset subsequently increases in the future.

2.18.3 Held-to-maturity financial assets

Held-to-maturity financial assets are financial assets with fixed or determinable payments and fixed maturity that the Group has both the intention and ability to hold to maturity. Financial assets that are designated as held-to-maturity are measured at amortized cost, in accordance with the effective interest rate method.

They are reviewed for impairment on an individual basis if there is any indication that they may be impaired.

The Group currently does not hold any held to maturity financial assets.

2.18.4 Financial assets measured at fair value through profit or loss

These financial assets are measured at fair value with gains and losses recorded as finance income or costs.

This category mainly includes:

- Assets held for trading which the Group intends to sell in the near future (primarily marketable securities);
- Assets voluntarily classified at inception in this category;
- Derivatives financial assets.

2.19 Inventories

Inventories are measured at the lower of cost and net realizable value. The cost of inventories comprises costs of purchase and costs incurred in bringing the inventories to their present location and condition. Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated selling costs.

Cost of inventories is determined using the weighted average cost method.

2—Significant accounting policies (Continued)

The Group periodically evaluates the condition and age of inventories and makes provisions for slow moving inventories accordingly.

2.20 Cash and cash equivalents

Cash consists of cash in banks and deposits.

Cash equivalents are considered as highly liquid investments, including unrestricted short-term bank deposits with an original maturity of three months or less from the date of acquisition or with a maturity of more than three months, but which are redeemable on demand without penalty and which form part of the Group's cash management.

2.21 Restricted cash

Restricted cash is considered to be cash that is dedicated to the repayment of the Group's liabilities to banking entities in accordance with the Group's credit agreement and therefore amounts that the Group cannot use at its discretion.

Restricted cash can also consist of cash held in escrow to finance certain acquisitions (in the period between the agreement to acquire and the actual closing of the acquisition and the transfer of shares and cash and other considerations). Restricted cash may also consist of guarantees provided by different Group companies to financial institutions related to financing or other activities.

2.22 Derivatives

Derivatives are initially recognized at fair value on the date a derivative contract is entered into and are subsequently reassessed at their fair value.

The Group enters into interest rate swaps and caps to manage its interest or foreign currency exchange rate exposure. These contracts do not qualify as hedges for accounting purposes according to IAS 39, as there was no formal designation and documentation of the hedging relationship at inception. Changes in the fair value of any of these derivative instruments are recognized immediately in the income statement within financial income and expenses.

2.23 Share based payment arrangements

The Group's employees are entitled to remuneration in the form of equity-settled share-based payment transactions and certain employees are entitled to remuneration in the form of cash-settled share-based payment transactions that are measured based on the increase in the Company's share price. These stock options based remunerations mainly concerned the Israeli entity, HOT Telecom and these plans were terminated post the take private of the company in December 2012 and the delisting of all active shares of HOT Telecom on the Tel Aviv stock exchange.

2.24 Financial liabilities

Financial liabilities other than derivative instruments include:

2.24.1 Financial liabilities at amortized cost

These financial liabilities are measured at amortized cost calculated based on the effective interest rate method according to IAS 39. The effective interest rate is the internal yield rate that exactly discounts future cash flows through the term of the financial liability. Fees, debt issuance and transaction costs are included in the calculation of the effective interest rate over the expected life of the instrument.

2.24.2 Financial liabilities that are measured at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities classified as held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss.

2—Significant accounting policies (Continued)

Financial liabilities are classified as held for trading if they are acquired for the purpose of sale in the near term. Gains or losses on liabilities held for trading are recognized in profit or loss.

Derivatives, including bifurcated embedded derivatives, are classified as held for trading unless they are designated as effective hedging instruments. In the event of a financial instrument that contains one or more embedded derivatives, the entire combined instrument may be designated as a financial liability at fair value through profit or loss only upon initial recognition.

The Group assesses whether embedded derivatives are required to be bifurcated from host contracts when the Group first becomes party to the contract. Reassessment only occurs if there is a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required.

The fair value of financial instruments that are traded in an active market is determined by reference to quoted market prices at the close of business on the balance sheet date. For financial instruments for which there is no active market, fair value is determined by the use of valuation techniques. Such techniques include evaluation based on transactions that have been executed recently under market terms, reference to the current market value of another instrument, which is substantially the same, discounted cash flow analysis or other valuation models.

2.24.3 Classification as debt or equity

Debt and equity instruments issued by a group entity are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

2.24.4 Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by a group entity are recognized at the value of the proceeds received, net of direct issue costs.

Repurchase of the Company's own equity instruments is recognized and deducted directly in equity. No gain or loss is recognized in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

The Group also issued some CPECs (Convertible Preferred Equity Certificates). Details of these subordinated financial instruments are set out in note 17.4.

2.25 Other liabilities

2.25.1 Provisions

A provision in accordance with IAS 37 is recognized in the statement of financial position when the Group has a present obligation (legal or implicit) as the result of a past event and it is expected that the use of economic resources will be required in order to settle the obligation and it is possible to reliably estimate it. Where the impact is significant, the provision is measured by discounting the forecasted future cash flows, using a pre-tax interest rate that reflects the expectations of the market in respect of the time frame of the money and in certain cases, the risks that are specific to the liability.

The following types of provisions are recorded in the financial statements:

2.25.2 Legal claims

A provision regarding legal claims is recognized when the Group has a present legal commitment or an implicit commitment resulting from a past event; when it is more likely than not that the Group will be required to expand economic resources to clear the commitment, when it is possible to estimate it reliably and when the effect of time is significant, the provision is measured according to the present value.

2—Significant accounting policies (Continued)

2.25.3 Warranty

The Group recognizes a provision for warranty for the sale of its products. The warranty is limited to malfunctions as defined by the Group and does not include warranty for damages incurred by the customer.

2.25.4 Onerous contracts

Present obligations arising under onerous contracts are recognized and measured as provisions. An onerous contract is considered to exist where the Group has a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received from the contract.

2.25.5 Restructuring

A restructuring provision is recognized when the Group has developed a detailed formal plan for the restructuring and has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement the plan or announcing its main features to those affected by it. The measurement of a restructuring provision includes only the direct expenditures arising from the restructuring, which are those amounts that are both necessarily entailed by the restructuring and not associated with the ongoing activities of the Group.

2.26 Liabilities for employment benefits

In accordance with the laws and practices of each country in which it operates, the Group participates in, or maintains, several employee benefits. There are as follows:

2.26.1 Short-term benefits for employees

Short-term benefits for employees include salaries, vacation pay, sick leave, recuperation pay and employers' deposits for national insurance and are recognized as an expense when the services are provided. A liability in respect of a cash bonus or a profits participation scheme is recognized where the Group has a legal or an implicit commitment to pay the said amount in respect of service that has been provided by the employee in the past and where the amount can be reliably estimated.

2.26.2 Post-retirement benefits

In Israel, the Group operates a defined benefits plan in respect of the payment of severance pay in accordance with the Israeli Severance Pay Law. According to this law, employees are entitled to receive severance pay if they are dismissed or on their retirement. The liability in respect of the termination of employee-employer relations is measured in accordance with the actuarial value of a forecast unit of entitlement method. The actuarial calculation takes into account increases in salaries in the future and the rate at which employees leave the Group and this on the basis of an estimate of the timing of the payment. The amounts are presented on the basis of the discounting of the forecast future cash flows, in accordance with government bonds' interest rates, whose repayment dates are close to the period relating to the liability in respect of severance pay.

The Group deposits funds in respect of its severance pay liability in pension funds and insurance companies (hereafter—the plan assets). The plan assets are assets that are held by the employee benefits plan for the long-term or in qualifying insurance policies. The plan assets are not available for use by the Group's creditors, and cannot be paid directly to the Group.

The liability regarding employee benefits presented in the statement of financial position represents the present value of the defined benefits obligation less the fair value of the plan assets, and the past service costs. Actuarial gains and losses are reflected in the income statement in the period in which they arise, as part of the salary costs.

2—Significant accounting policies (Continued)

The Group has defined contribution plans pursuant to the Severance Pay Law under which the Group pays fixed contributions and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient amounts to pay all employee benefits relating to employee service in the current and prior periods. Contributions to the defined contribution plan in respect of severance or retirement pay are recognized as an expense when contributed simultaneously with receiving the employee's services and no additional provision is required in the financial statements.

2.26.3 Other long-term employee benefits

The Group's employees are entitled to benefits and other long-service grants. These benefits are accounted for as other long-term benefits since the Group estimates that these benefits will be used and the respective Group's obligation will be settled during the employment period and after one year from the end of the reporting period.

The Group's net obligation regarding other long-term employee benefits is in respect of the future benefit amount due to employees for services rendered in current and prior periods. This amount of benefits is discounted to its present value and the fair value of the assets relating to this obligation is deducted from said amount. The discount rate is determined by reference to the yields on Government bonds whose currency and term are consistent with the currency and term of the Group's obligation. The obligation is calculated using the projected unit credit method. Actuarial gains and losses are recognized in profit or loss in the period in which they occur.

2.26.4 Benefits in respect of the termination of employment

Severance pay for employees is reflected as an expense when the Group has made an undertaking, with no real possibility of cancellation, for the dismissal of employees before they reach the customary retirement age in accordance with a detailed formal plan. The benefits that are given to the employees who take voluntary retirement when the Group has offered the employees a plan that encourages voluntary retirement, it is expected that the offer will be accepted and the number of persons accepting the offer can be reliably estimated.

2.27 Significant accounting judgments and estimates used in the preparation of the financial statements

2.27.1 Judgments

In the process of applying the significant accounting policies, the Group has exercised its judgment and has taken into account matters which have the most significant impact on the amounts that have been recognized in the consolidated financial statements.

2.27.2 Estimates and assumptions

The preparation of the consolidated financial statements requires the Group to make estimates and assumptions that have an effect on the application of the accounting policies and on the reported amounts of assets, liabilities, revenues and expenses. These estimates and underlying assumptions are reviewed regularly. Changes in accounting estimates are reported in the period in which the estimate changes.

2.27.3 Impairment of goodwill

Determining whether goodwill is impaired requires an estimation of the value in use of the cash-generating units to which goodwill has been allocated. The value in use calculation requires the Managers to estimate the future cash flows expected to arise from the cash-generating unit and a suitable discount rate in order to calculate present value. Where the actual future cash flows are less than expected, a material impairment loss may arise.

2—Significant accounting policies (Continued)

The value in use of each CGU was determined by estimating cash flows for a period of five years for the operating activities. Cash flow forecasts are derived from the most recent business plans approved by the Board of Managers. Beyond the specifically forecasted period of five years, the Company extrapolates cash flows for the remaining years based on an estimated constant growth rate between 1.5-2%. This rate does not exceed the average long-term growth rate for the relevant markets. Discount rates have been computed using WACC approach and range from 6.3% to 11%.

2.27.4 Legal claims

In estimating the likelihood of outcome of legal claims filed against the Group and its investees, the Group companies rely on the opinion of their legal counsel. These estimates are based on the legal counsel's best professional judgment, taking into account the stage of proceedings and historical legal precedents in respect of the different issues. Since the outcome of the claims will be determined in courts, the results could differ from these estimates.

2.27.5 Post-employment benefits

The liability in respect of post-employment defined benefit plans is determined using actuarial valuations. The actuarial valuation involves making assumptions about, among others, discount rates, expected rates of return on assets, future salary increases and mortality rates. Due to the long-term nature of these plans, such estimates are subject to uncertainty.

2.27.6 Deferred tax asset

Deferred tax assets relate primarily to tax loss carry forwards and to deductible temporary differences between reported amounts and the tax bases of assets and liabilities. The assets relating to the tax loss carry forwards are recognized if it is probable that the Group will generate future taxable profits against which these tax losses can be set off. Evaluation of the Group's capacity to utilize tax loss carry-forwards relies on significant judgment. The Group analyses past events, and the positive and negative elements of certain economic factors that may affect its business in the foreseeable future to determine the probability of its future utilization of these tax loss carry forwards.

2.27.7 Discounting of Yield Free Preferred Equity Certificates and similar instruments (YFPEC)

The Group has loans with its equity holder which are currently non-interest bearing and therefore considered as not being at arm's length. In determining the present value, a discount rate of 4.76% has been used for YFPECs and a discount rate of 6.79% for the Interest Free Loans (IFLs) issued by the Group.

3.2 Modification of the scope of consolidation

3.2.1 Main acquisitions in 2013

3.2.1.1 Acquisition of OMT

On July 5, 2013 the Group obtained control of OMT, a telecommunications operator in the French Overseas Territories, by acquiring 77% of the shares and voting interests in the company. This acquisition enables the Group to expand its footprint in the French Overseas Territories.

Since July 5, 2013 OMT contributed €102.1 million to revenue and €13.5 million to operating profit to the Group's results for the year ended December 31, 2013.

3—Scope of consolidation (Continued)

A purchase price allocation was performed following the acquisition of OMT based on the assumptions described below.

Brand:

The ONLY brand was valued using the royalty relief method over an indefinite useful life and the method was built on the following assumptions:

- Discount rate—11.4%
- Royalty rate—1.5%

Clients:

The portfolio of clients has been valued using the excess earnings approach and based upon the following assumption:

- EBIT margin rate: 13.5% for fixed telephone clients, 12.4% for internet clients, 19.3% for mobile clients, 26.4% for B2B clients.
- Attrition rate: 9.7% for fixed telephone clients, 29.2% for internet clients, 48.5% for mobile clients, 16.4% for B2B clients.
- Discount rate: 11.4%
- Perpetuity growth rate: 2%

3.2.1.2 Acquisition of ONI Communication

On August 8, 2013 the Group obtained control of ONI, a business to business telecommunications operator in Portugal, by acquiring 100% of the shares and voting interests in the company. This acquisition enables the Group to expand its footprint in Portugal and eventually realise synergies with the Group's other business within the same country.

Since August 8, 2013 ONI contributed €41.8 million in revenue and €4.9 million in operating loss to the Group's result for the year ended December 31, 2013.

A purchase price allocation was performed following the acquisition of ONI based on the assumptions described below.

Brand:

The ONI brand was valued using the royalty relief method over an indefinite useful life and the method was built on the following assumptions:

- Discount rate—6.5%;
- Royalty rate—2.0%.

Clients:

The portfolio of clients has been valued using the excess earnings approach and based upon the following assumptions :

- EBIT margin rate: 14.1%;
- Attrition rate: 22.9% for B2B clients;
- Discount rate: 6.5%;
- Perpetuity growth rate: 0%.

3—Scope of consolidation (Continued)

3.2.1.3 Integration of content channels

On October 4, 2013 Ma Chaine Sport S.A.S. (''MCS'') and SportV S.A. (''SportV''), two exclusive content producing companies based in France and Luxembourg respectively were transferred to the Group by Altice IV and Valemi Corp, Altice IV S.A. being considered as a related party as it shares the same controlling shareholder as the Group at time of acquisition. In the absence of any specific guidance concerning the accounting for common control transactions within IFRS, no purchase price allocation was performed. These transactions allow the group to pursue a strategy of vertical integration and also provide a more integrated solution to its customers.

Since October 4, 2013, Ma Chaine Sport and SportV contributed €6.4 million in revenue and €0.3 million in operating profit to the Group's result for the year ended December 31, 2013.

3.2.2 Change in the Group's ownership interest in 2013

3.2.2.1 Acquisition of minority interests in Cabovisao

On April 23, 2013, the Company completed the acquisition of 40% of minority stake held by Apax Partners in its Portuguese subsidiary Cabovisao S.A, through an investment in the holding company of Cabovisao S.A, Altice Portugal.

The total consideration of EUR 105.0 million was paid on April 23, 2013, of which EUR 90.0 million was paid in consideration for the shares acquired and EUR 15.0 million towards the repayment of an existing vendor note. An amount of EUR 9.1 million (being the proportionate share of the carrying amount of the net assets of the entity) has been transferred between non-controlling interests to controlling interest. The difference of EUR 80.9 million between the decrease in the non-controlling interests and the consideration received has been debited from the retained earnings.

3.2.2.2 Disposal of Valvision

On June 6, 2013, the Company disposed of its interests in Valvision S.A.S, a cable based service provider in France to Altice VII Bis S.à r.l., a sister concern under common control of the Company's sole shareholder, Next L.P.

The difference of EUR 3.3 million gain generated on this transaction (representing the difference between the net asset value of the entity prior to transfer and the consideration received) has been recognized directly in equity.

3.2.2.3 Acquisition of minority interests in Coditel

Deficom Telecom S.à r.l., a majority owned subsidiary of Altice VII, is the owner of 60% of the outstanding shares of Coditel Holding Lux II and Coditel Management. On November 29, 2013, Altice Holdings S.à r.l. purchase 40% of the interest of Coditel Holding Lux II and Coditel Management held by Codilink S.à r.l. .

The total consideration of EUR 82.5 million was paid on November 29, 2013, of which EUR 30.6 million was paid in consideration for shares and EUR 51.9 million paid as repayment of subordinated debt instruments held by Codilink (the Coditel PECs). An amount of EUR (9.3) million (being the proportionate share of the carrying amount of the net assets of the entity) has been transferred from non-controlling interests to controlling interest. The difference of EUR 39.9 million between the decrease in the non-controlling interests and the consideration received has been debited from the retained earnings.

3—Scope of consolidation (Continued)

3.3 Acquisitions of businesses

Business combinations that occurred during the reporting period are described in note 3.2.

The major classes of assets acquired and liabilities assumed at the acquisition date are:

	Total Business Combinations	OMT	ONI	MCS[(1)]	SportV[(1)]
	(in millions of euros)				
Cost of acquisition[(2)]	280.6	223.3	22.3	23.0	12.0
ASSET					
Intangible assets	154.1	106.7	45.9	1.3	0.2
Property, plant and equipment	122.9	69.5	52.6	0.9	—
Non-current financial assets	1.6	1.6	—	—	—
Inventories	6.3	4.9	1.4	—	
Trade accounts receivable and other	55.7	28.1	19.6	6.0	2.0
Tax receivable	3.0	2.6	0.4	—	—
Cash and cash equivalents	36.3	33.6	0.7	0.3	1.7
Other current assets	13.0	3.2	8.7	0.6	0.5
Total assets	**393.0**	**250.2**	**129.3**	**9.1**	**4.4**
EQUITY AND LIABILITIES					
Non-current liabilities	253.1	205.3	47.5	0.3	—
Current liabilities	185.7	115.5	60.8	6.7	2.7
Total liabilities	**438.8**	**320.8**	**108.3**	**7.0**	**2.7**
Net assets	**(45.9)**	**(70.6)**	**21.0**	**2.1**	**1.7**
Residual goodwill	**295.2**	**293.9**	**1.3**	**—**	**—**
Including impact of non-controlling interests on goodwill	*67.7*	*67.7*		—	—

(1) No goodwill is attributed to neither MCS nor SportV as these were deemed by the Board of Managers to be integrations under common control and thus any difference in the net asset value and the purchase price is recorded directly in the reserves of the group attributable to the shareholders. See note 13 for more details.

(2) When acquiring OMT, ONI and MCS and Sport, the company did not, (i) pay the vendors of OMT and ONI directly as the cash was transferred directly from the lenders to the sellers' accounts, or to their debt holders in case of refinancing of the acquired entities debts or (ii) did not pay the entire amount in cash (as was the case for MCS and SportV), thus generating vendor notes held by the vendors. The total cash out from the accounts of the company amounted to EUR 13.0 million. These vendor notes were settled in 2014.

The acquisition of a controlling stake in OMT Invest S.A.S (''OMT'') and Winreason S.A. (''ONI'') are considered to be non-cash transactions, as the consideration paid to the vendors flows directly from the lending parties to final sellers, without transitioning through the company's accounts. Thus, the cost of such transactions is deducted directly from the issuance of debt in the consolidated statement of cash flows.

3—Scope of consolidation (Continued)

The main figures of the entity, since the beginning of the year, and until the business combination, are presented as follows:

	OMT	ONI	MCS	SportV
	(in millions of euros)			
Revenues	**96.5**	**59.0**	**13.8**	**4.5**
Cost of sales	(30.1)	(31.2)	(3.4)	(1.1)
Gross Profit	**66.4**	**27.8**	**10.5**	**3.3**
Other operating expenses	(19.8)	(11.2)	(1.4)	—
General and administrative expenses	(6.1)	(5.9)	(1.1)	(0.1)
Other sales and marketing expenses	(7.3)	(1.3)	(0.2)	(0.2)

Coditel Brabant	209.2	—	—	—	209.2
Coditel S.à r.l.	86.3	—	—	—	86.3
Hot Telecom	598.6	—	(121.9)	0.9	477.6
Total Net book value	**911.9**	**—**	**(121.9)**	**0.9**	**790.9**

The carrying amount of goodwill as at December 31, 2013 was EUR 1,100.7 million (December 31, 2012 was EUR 790.9 million).

Goodwill is reviewed at the Group of cash-generating unit (''CGU'') level for impairment annually and whenever changes in circumstances indicate that its carrying amount may not be recoverable. For 2013, goodwill was tested at the CGU level for impairment as of December 31. The CGU is at the subsidiary level of the Company. The recoverable amounts of the CGUs are determined based on their value in use. The Company determined to calculate value in use for purposes of its impairment testing and, accordingly, did not determine the fair value of the CGUs as the carrying value of the CGUs was lower than their value in use. The key assumptions for the value in use calculations are primarily the pre-tax discount rates, the terminal growth rate and the churn rate. The impairment tests did not result in impairment for any periods presented in these consolidated financial statements, except for EUR 121.9 million in Hot Telecom for the year ended December 31, 2012.

The value in use of the CGUs was determined by estimating cash flows for a period of five years, giving due consideration to the nature of the industry in which each CGU operates. Assumptions for churn rates and EBIT margin were based on historical experience and expectations of future changes in the market. Cash flow forecasts were derived from the most recent financial plans approved by management.

Beyond the specifically forecasted period of five years, the Company extrapolated cash flows for the remaining years based on an estimated constant growth rate between 1% and 2%. These rates did not exceed the average long-term growth rate for the relevant markets.

When estimating turnover for purposes of the 2013 impairment test, the Company used a growth rate between (3.6)-6% over the next 5 years. Those estimates were determined on the basis of the analysis of

4—Goodwill (Continued)

the markets where the Company is active in as well as on the basis of projections provided by external sources.

	Green. ch	Coditel	Hot Telecom
Average long term growth rate in 2012 (in %)	2.0	2.0	1.5 - 2
Average long term growth rate in 2103 (in %)	2.0	2.0	2.0

When estimating EBIT margin for purposes of the 2013 impairment test, the Company used a stable ratio of EBIT margin over the next 5 years.

Management estimated discount rates using post-tax rates that reflected current market rates for investments of similar risk. The discount rate for the CGUs was estimated from the weighted average cost of capital (''WACC'') of companies which operate a portfolio of assets similar to those of the Company's assets.

	Green ch	Coditel	Cabovisao	Hot Telecom
CGU weighted average post-tax WACC rate used in 2012 (in %)	7.0	8.0 - 8.5	—	10 - 11
CGU weighted average pre-tax WACC rate used in 2013 (in %)	6.5	6.6	6.3	10 - 11

The results of the goodwill impairment test of 2012 and 2013 for each CGU did not result in an impairment of goodwill as the value in use exceeded the carrying value of the CGU, except for EUR 121.9 million in Hot Telecom for the year ended December 31, 2012.

In validating the value in use determined for the CGU for the year ended December 31, 2013, key assumptions used in the discounted cash-flow model were sensitized to test the resilience of value in use and no impairments were noted in these sensitivity analysis.

	Green.ch	Coditel	Hot Telecom
Recoverable amount	124.4	466.6	1,357.1
Carrying amount	17.8	295.5	477.6
Excess of recoverable amount over carrying amount	106.6	171.1	879.5

The following changes in key assumptions in projected cash flows in every year of the initial five-year period, assuming unchanged values for the other assumptions, would cause the recoverable amount to equal the respective carrying value;

In addition, the Company analyzed the sensitivity of the estimated recoverable amounts to the reasonable expected changes in assumptions, assuming unchanged values for the other assumptions:

- Sensitivity of the recoverable amount was tested for a movement of 50 bps in the weighted average cost of capital (WACC), all other assumptions being stable and the impact would be:
  - Green.ch: an increase of 50 bps in the WACC decreases the excess of recoverable amount to EUR 90.2 million and therefore no impairment is required.
  - Coditel: an increase of 50 bps in the WACC decreases the excess of recoverable amount to EUR 103.9 million and therefore no impairment would be required.
  - HOT Mobile: an increase of 50 bps in the WACC decreases the recoverable amount to EUR 807.2 million and therefore no impairment would be required.
- Sensitivity of the recoverable amount was tested for a movement of 50 bps in the perpetuity growth rates, all other assumptions being stable and the impact would be:
  - Green.ch: an increase of 50 bps in the perpetuity growth rate decreases the excess of recoverable amount to EUR 93 million and therefore no impairment would be required.

4—Goodwill (Continued)

- Coditel: an increase of 50 bps in the perpetuity growth rate decreases the excess of recoverable amount to EUR 66.1 million and therefore no impairment would be required.
- HOT Mobile: an increase of 50 bps in the perpetuity growth rate decreases the recoverable amount to EUR 825.1 million and therefore no impairment would be required.

The analysis did not result in a scenario whereby a reasonable possible change in the aforementioned key assumptions would result in a recoverable amount for the CGU which is inferior to the carrying value.

(1) Cable network: the Group owns, directly and indirectly through its subsidiaries, cable or fibre network which allow it to supply cable-based pay television, broadband internet and fixed-line telephony services to its subscribers.

6—Property, Plant & Equipment (Continued)

(2) Call center represents centralized offices used for the purpose of receiving or transmitting a large volume of administrative, technical or commercial requests by telephone.

(3) Office furniture and equipment refers to furnishings and IT equipment.

(4) The Communication network infrastructure includes the digital technologies for the transmission of multi-channel television services.

The increase in the intangible and tangible assets of the group can mainly be attributed to the acquisition of Outremer Telecom and ONI Telecom during the course of 2013. These increases were slightly offset by the disposal of the Company's interests in Valvision.

7—Financial assets

	December 31, 2013	December 31, 2012
	(in millions of euros)	
Investments held as available for sale[(1)]	40.3	6.1
Loans and receivables[(2)]	3.0	18.7
Other financial assets	5.5	—
Restricted cash[(3)]	1.8	9.6
Total	**50.6**	**34.4**

(1) Investment in available for sale financial asset:s are composed of:

Partner Communications LTD: A subsidiary company, operating through Hot Net Internet Services LTD. (formerly Hot Properties) and Finance LTD. (hereinafter-Hot Net) holds 1 454 663 regular shares in Partner Communications LTD, (hereinafter-Partner), constituting approximately 0,9% of Partner's share capital which is engaged in the provision of mobile communications services and whose shares are traded on stock exchanges in the United States of America, in the United Kingdom and in Israel.

Wananchi Group Holdings Ltd. In February 2013, the Company exercised its right to convert loans and receivables held against Wananchi Group Holdings Ltd. into shares. These notes were initially recorded as a long term trade receivable for the year ended December 31, 2012 and subsequently converted into equity in February 2013. The Board of Managers considers the investment in Wananchi to be available for sale investment and has injected further funds in Wananchi during the course of the year ended December 31, 2013. Wananchi operates in the fast developing East-African market and given the evolving nature of the business in this region, the Board of Managers considers that the nominal value of its investment in Wananchi represents the fair value of the investment. As of December 31, 2013, Altice VII held 17.05% of the capital of Wananchi and the Board of Managers is of the opinion that it has no significant influence on the Board of Wananchi.

(2) As of December 31, 2013, this caption includes an additional investment made by the company in Wananchi, in return for which it was issued convertible notes, convertible at the discretion of the holder. The investment amounted to €3.0 million ($4 million equivalent). The decrease compared to December 31, 2012 is explained by the partial conversion of the notes from Wananchi to equity.

(3) Restricted cash (see Note 2.21)

As of December 31, 2013 the restricted cash caption contained cash accounts pledged at Cabovisao, HOT and Green.ch held as guarantees to various financial institutions. The decrease in the amount of restricted cash compared to the year ended December 31, 2012, was mainly due to substitution of a guarantee given to Banco Esprito Santo by Cabovisao by an amount of EUR 8.4 million drawn from the Company's guarantee facility.

8—Non current Trade and other receivables

	December 31, 2013	December 31, 2012
	(in millions of euros)	
Prepaid expenses	0.6	0.8
Other receivables[(1)]	22.2	23.7
Total	**22.8**	**24.6**

(1) The balance reflects customer's debts in respect of the sale of devices under long-term credit terms (sales in installments). The balance of the debt is presented at its value, as discounted using an interest rate of 5% for a period of up to 36 months, less the current maturities, which are presented under trade receivables.

9—Inventories

	December 31, 2013	December 31, 2012
	(in millions of euros)	
Work in progress	0.1	0.1
Finished/semi-finished goods	12.4	7.1
Total Gross Value	**12.5**	**7.2**
Work in progress	—	(0.1)
Finished/semi-finished goods	(1.5)	(1.0)
Total Depreciation	**(1.5)**	**(1.1)**
Work in progress	0.1	—
Finished/semi-finished goods	10.9	6.2
Total Net book value	**11.0**	**6.1**

Inventories are almost exclusively comprised finished goods corresponding to customer premises equipment (modems, decoders, mobile handsets etc.), which is used in the daily business activity of the Group. Management considers that inventory will be fully renewed in the next twelve months.

Movement for allowance for obsolescence of inventory or slow moving inventory:

Total Cumulative amortization and depreciation	**(1.9)**	**(0.1)**	**0.9**	**—**	**(1.1)**

The cost of inventories recognised as an expense during the year in respect of continuing operations was EUR 0.4 million (31 December 2012: EUR 0.1 million).

The cost of inventories recognised as an expense includes EUR 0.4 million (2012: EUR 0.1 million) in respect of write-downs of inventory to net realisable value. This write down mainly concerns the write off of mobile handsets and accessories at OMT to reflect their net recoverable value.

10—Trade and other receivables

10.1 Trade receivables

	December 31, 2012	Business Combinations	Net increase/ (decrease)	Reversal	Divestitures, changes in foreign currency translation adjustments and other	December 31, 2013
	(in millions of euros)					
Trade receivables	175.6	50.0	(6.8)	—	5.5	224.3
Allowance for doubtful debts	(24.8)	—	(10.1)	7.0	(2.4)	(30.3)
Trade receivable, net	**150.8**	**50.0**	**(16.9)**	**6.9**	**3.1**	**194.0**

	December 31, 2011	Business Combinations	Net increase/ (decrease)	Reversal	Divestitures, changes in foreign currency translation adjustments and other	December 31, 2012
	(in millions of euros)					
Trade receivables	129.1	5.9	40.4	—	0.1	175.6
Allowance for doubtful debts	(26.4)	—	(3.0)	4.4	0.2	(24.8)
Trade receivable, net	**102.7**	**5.9**	**37.4**	**4.4**	**0.3**	**150.8**

The increase in trade receivables in the year ended December 31, 2013, as compared to the year ended December 31, 2012 is mainly explained by the acquisition of OMT, ONI, MCS and SportV during the course of the year.

10—Trade and other receivables (Continued)

10.2 Age of trade receivables

	December 31, 2013	December 31, 2012
	(in millions of euros)	
Not yet due	137.1	116.7
30 - 90 days	22.1	14.0
91 - 121 days	34.8	20.2
Total	**194.0**	**150.8**

10.3 Other receivables

	December 31, 2013	December 31, 2012
	(in millions of euros)	
Loans to related party	0.1	3.8
Bank guarantee(1)	—	14.0
Prepaid expenses(2)	20.9	6.3
Other current receivables	15.9	8.2
Total	**36.9**	**32.3**

(1) Bank guarantees were provided to the Israeli regulator by HOT mobile in relation with the acquisition of the UMTS mobile license and then subsequently released after the occurrence of certain events. Please see note 22 for details on guarantees given by HOT and HOT mobile.

(2) The increase in prepaid expenses is mainly explained by the acquisition of ONI and the entry of MCS in the Group scope during the year ended December 31, 2013. The new entities contributed EUR 4.7 million and EUR 2.6 million to prepaid expenses and mainly concerned prepayments made on long term contracts.

The Group provides services on credit for an average of 16 days, 24 days and 96 days in average to its customers in the cable television field, the in-country fixed line communications field and the mobile communication field, respectively. The Group routinely evaluates the credit that is provided to its customers, while checking their financial situations; however it does not demand collateral for those debts. The Group records a provision for doubtful debts, based on the factors that affect the credit risks of certain customers, past experience and other information.

11—Cash and cash equivalents and current restricted cash

	December 31, 2013	December 31, 2012
	(in millions of euros)	
Term deposits	1.4	5.2
Bank overdraft	(0.3)	—
Bank balances	60.1	124.5
Cash and cash equivalents presented in the consolidated statement of cash flows	**61.3**	**129.7**
Restricted cash(1)	1,242.7	—
Restricted cash	**1,242.7**	**—**

(1) Current restricted cash refers to cash held in escrow accounts on behalf of Altice Finco and Altice Financing S.A., related to the acquisition of Orange Dominicana and Tricom. The Board of Managers expects the transactions to close in the first quarter of 2014, thus ensuring utilization of the cash in less than twelve months following December 31, 2013. As of the date of signing of these accounts, the Tricom acquisition had been successfully closed (See note 35).

12—Issued capital and share premium

On December 31, 2013, the share capital amounts to EUR 7.4 million and is divided into 743,011,510 fully paid shares with a nominal value of EUR 0.01.

	December 31, 2013	December 31, 2012
	(in millions of euros)	
Share capital	7.4	7.4
Share premium	5.4	—
Total	**12.8**	**7.4**

In June 2013, all the classes of shares were converted into one single class of shares with a nominal value of EUR 0.01 per share and equal voting rights. A capital increase amounting to EUR 4,500 took place on May 30, 2013 together with a share premium of EUR 1.8 million.

Share premium was also issued through the capitalization of a debt instrument for an amount of EUR 3.6 million.

Different classes of shares are summarized below:

Class of corporate units	December 31, 2013 Number
Common shares	743,011,510

Class of corporate units	December 31, 2012 Number

Total				***219.1***	**290.5**

13.2 Discounting Reserves

The Master Yield Free Preferred Equity Certificates (''YFPEC'') have been valued using a discount rate of 4.76% given their preferred interest rate which therefore values these certificates at €4.8 million as of December 31, 2013. This value is recorded as a loan from related parties in the accounts of Altice VII.

The nominal amount of outstanding YFPECs issued by Altice VII as of December 31, 2013 is given below. The initial discounting effect is recorded in the Group's reserves and includes the impact of deferred taxes arising as a result of the discounting for EUR 22.7 million as of December 31, 2013.

13—Other reserves (Continued)

Details of YFPECS (before impact of discounting) are presented as follows:

Name	Maturity date	Interest rate	Convertible	Principal amount as at the end 2012	Principal amount as at the end 2013
				in millions of euros	
YFPECs C	14/05/2058	—	No	22.07	—

IFL	26/04/2061	—		—	**2.6**

13.3 Employee benefits reserve

This reserve contains variations related to employee benefit plans in place at different group entities that apply IAS 19R. More information is provided in note 15.

13.4 Currency translation reserve

Exchange rate differences relating to the translation of the results and net assets of the Group's foreign operations from their functional currencies to the Group's presentation currency are recognized directly in other comprehensive income and accumulated in the foreign currency translation reserve.

Exchange differences previously accumulated in the foreign currency translation reserve (in respect of translating both the net assets of foreign operations and hedges of foreign operations) are reclassified to profit or loss on the disposal of the foreign operation.

13.5 Impact of changes in ownership structure

This reserves records the impact of the changes in ownership interests held by the Group in its different subsidiaries. As described in note 3.2., the Group acquired non-controlling interests held in Altice Portugal, Cabovisao and Coditel from non-controlling interests, leading to a net decrease of EUR 120.7 million in the Group's reserves, offset by a EUR 3.3 million gain realized on the sale of Valvision. In addition to these transfers of non-controlling interests, an adjustment of EUR 14.2 million, relating to the share of non-controlling interests was recorded in the reserves.

13.6 Integration of entities under common control

As described in note 3.2.1.3, the entry of Ma Chaine Sport S.A.S. and SportV S.A. in the scope of the Group's consolidation had an impact on the reserves equal to the difference between the acquisition price and the net asset position of the companies acquired. The total consideration paid for 100% of the shares MCS amounted to EUR 23.0 million, of which EUR 10.0 million was paid in cash with the remainder generating a vendor note of EUR 13.0 million. The net equity acquired amounted to EUR 2.1 million, thus generating an adjustment of the reserves accounts of EUR 20.9 million.

The total consideration paid for 100% of the shares of SportV was EUR 12.0 million, of which EUR 5.0 million was paid in cash with the rest generating a vendor note. The net equity acquired amounted to EUR 1.7 million, thus generating an adjustment of the reserves accounts of EUR 10.3 million.

13—Other reserves (Continued)

13.7 Legal reserve

According to the Luxemburg legal provisions, 5% of net profit must be obligatorily credited to a legal reserve account. The obligation to make this contribution ends when the legal reserve equal 10% or more of the share capital of the Group.

(1) Provisions for litigations : For the year ended December 31, 2013, HOT made payments to Tali, AGICOA and ESHKOLOT copyright owners. Total payments amounted to EUR 5.4 million. HOT also recorded additional provisions for litigation based on a class action lawsuit for a total of EUR 2.9 million.

Provisions for litigations are mainly relating to, (i) claims made by associations representing the owners of certain copyrights in Israel, (ii) class action suits filed by certain consumers in Israel and (iii) lawsuits pertaining to the take-private operation performed in December 2012.

More information on these provisions is provided in note 32.. Management considers that all potential risks of cash-outs on such litigations and claims is properly evaluated and represented correctly in the consolidated financial statements for the year ended December 31, 2013.

Total		**8.2**	**9.1**

15—Employee benefits (Continued)

15.1 Description of employee benefits by entity

15.1.1 HOT Telecom

(a) Defined Benefit Plans

Employee benefit liabilities

HOT Telecom has several employee benefit plans:

- *Short-term employee benefits*

  Short-term employee benefits are benefits that are forecast to be cleared in full within 12 months of the end of the annual reporting period in which the employees provide the related services. These benefits include salaries, paid annual leave, paid sick leave, recuperation and social security contributions and are recognized as expenses as the services are rendered. A liability in respect of a cash bonus is recognized when the Group has a legal or constructive obligation to make such payment as a result of past service rendered by an employee and a reliable estimate of the amount can be made.

- *Post-employment benefits*

  The plans are normally financed by contributions to insurance companies and classified as defined contribution plans or as defined benefit plans.

  Since 2011, the Group has defined contribution plans pursuant to Section 14 of the Severance Pay Law under which the Group pays regular contributions and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient amounts to pay all employee benefits relating to employee service in the current and prior periods.

  Contributions to the defined contribution plan in respect of severance or retirement pay are recognized as an expense when contributed concurrently with performance of the employee's services.

  In addition, the Group has a defined benefit plan in respect of severance pay pursuant to the Severance Pay Law. According to the Law, employees are entitled to receive severance pay upon dismissal or retirement. The liability for termination of employment is measured in accordance with an actuarial evaluation of the projected unit credit. The actuarial calculation takes into account the future salary costs and the rate at which employees leave the Group, which is done on the basis of an evaluation of the timing of the payment. The amounts are presented based on discounted expected future cash flows using a discount rate determined by reference to yields on Government bonds with a term that matches the estimated term of the obligation relating to severance pay.

  In respect of its severance pay obligation to certain of its employees, the Group makes current deposits in pension funds and insurance companies (''the plan assets''). Plan assets comprise assets held by a long-term employee benefit fund or qualifying insurance policies. Plan assets are not available to the Group's own creditors and cannot be returned directly to the Group.

  The employee benefit liabilities, which are presented in the statement of financial position, represents the present value of the defined benefit liabilities less the fair value of the plan assets.

  Re-measurements of the net liability are reflected under other comprehensive income as they arise.

  Actuarial gains and losses are reflected in other comprehensive income.

- *Other long-term employee benefits*

  The Group's net obligation in respect of other long-term employee benefits is calculated on the basis of an actuarial valuation and is in respect of the future benefit amount due to employees for services rendered in current and prior periods, taking the rate of expected salary increases into account. This amount of benefits is discounted to its present value. The discount rate is determined

15—Employee benefits (Continued)

by reference to the yields on Government bonds whose currency and term are consistent with the currency and term of the Group's obligation.

Re-measurements of the net liabilities are reflected in profit or loss in the period in which they arise.

- *Termination benefits*:

  Employee termination benefits are recognized as an expense at the earlier of such time at which the Group has committed to terminate employees before the normal retirement date and it is unable to cancel the proposal or where the Group recognized costs in respect of a structural change that includes the payment of termination benefits.

The portion of the severance pay payments that is not covered by deposits, is treated by the Group as a defined benefit plan in accordance with which a liability is recorded in respect of employee benefits, and the Group deposits amounts in central severance pay funds and in appropriate insurance policies in respect of it.

The Group has defined contribution plans, in accordance with section 14 of the Israeli Severance Pay Law, in accordance with which the Group makes regular payments without it having a legal or implicit commitment to pay additional payments even if sufficient funds have not accumulated in the funds to pay all of the benefits to an employee that relate to the employee's employment in the current period and in previous periods.

Deposits in a defined contribution plan in respect of severance pay or in respect of emoluments are recognized as expense at the time of the deposit in the plan, in parallel to the receipt of the labor services from the employee and no additional provision is required in the financial statements.

(1) New notes issued by Altice Finco S.A. and Altice Financing S.A. are held in escrow and are not used as of December 31, 2013 (See note 11).

During the year ended December 31, 2013, debentures issued by the Company included:

The Hot Telecom Debentures:

The Series A' debentures-EUR 167 million, linked to the Consumer Prices Index for Tel Aviv, bear yearly interest at a rate of 3,9%. Series A' debentures are repayable in 13 semi-annual payments commencing on September 30, 2012 and up to September 30, 2018.

The Series B' debentures-EUR 137 million bear yearly interest at a fixed rate of 6,9%. Series B' debentures are repayable in 13 semi-annual payments commencing on September 30, 2012 and up to September 30, 2018.

Altice Financing Senior Secured Notes:

Altice Financing S.A. has issued Senior Secured Notes in December 2012 and December 2013 to finance various acquisitions:

- $ 460.0 million senior secured notes, issued in December 2012, bearing a semi-annual coupon of 7.875% and maturing on December 15, 2019.
- €210.0 million senior notes, issued in December 2012, bearing a semi-annual coupon of 8.0% and maturing on June 15, 2023.
- $ 900.0 million senior secured notes issued in December 2013, bearing a semi-annual coupon of 6.5% and maturing in 2022. These notes were issued in relation with the Orange Dominicana

17—Borrowings and other financial liabilities (Continued)

acquisition and are currently in an escrow account and will be released upon closing of the Orange Dominicana acquisition.

- €300.0 million senior secured notes issued in December 2013, bearing a semi-annual coupon of 6.5% and maturing in 2022. These notes were issued in relation with the Orange Dominicana acquisition and are currently in an escrow account and will be released upon closing of the Orange Dominicana acquisition.

Altice Finco Senior Notes:

Altice Finco S.A. has issued Senior Notes in December 2012, June 2013 and December 2013 to finance various acquisitions:

- $ 425.0 million senior notes issued in December 2012, bearing a semi-annual coupon of 9.875% and maturing on December 15, 2020.
- €250.0 million senior notes, issued in June 2013, bearing a semi-annual coupon of 9.0% and maturing on June 15, 2023.
- $ 400.0 million senior notes issued in December 2013, bearing a semi-annual coupon of 8.125% and maturing in 2024. These notes were issued in relation with the Orange Dominicana acquisition and are currently in an escrow account and will be released upon closing of the Orange Dominicana acquisition.

The Senior and Senior Secured Notes are listed on the Official List of the Luxembourg Stock Exchange and traded on the Euro MTF Market of the Luxembourg Stock Exchange.

17.2 Covenants

17.2.1 Hot Telecom

The unsecured debentures issued on the Tel Aviv Stock Exchange by the Group's subsidiary Hot Telecom include financial covenants measured on Hot Telecom performance, which mainly include:

- A debt to EBITDA ratio, which is not to exceed 6 for a period that exceeds two consecutive quarters;
- No distribution of a dividend when Hot Telecom exceeds a debt to EBITDA ratio of 5.5.

As of December 31, 2013, Hot Telecom was in compliance with all of the required financial covenants.

17.2.2 Altice Blue One

As of December 31, 2012, Altice Blue One was in default of financial covenants, though it was not in default of any scheduled payments due to the lenders. As per the debt agreements, one consequence of this default could be early or accelerated repayment of the debts, if and only if such repayments are unanimously reclaimed by all of the lending agencies.

Altice Blue One debt has refinanced its external debt on July 2, 2013 and Altice Blue One is no longer subject to any debt covenants.

17.2.3 Coditel Holding

Financial covenants have been set for Coditel Holding, in the framework of the financing agreement entered into with a pool of financial institutions on December 2, 2011, based on the consolidated accounts of Coditel Holding S.A. On June 2, 2013, the senior facilities (A and B) were refinanced and repaid by anticipation, thus releasing Coditel Holding S.A. from any covenant requirements on the senior debt facility.

As of December 31, 2013, Coditel Holding S.A. was in compliance with all of the required financial covenants on the Coditel Mezzanine debt.

17—Borrowings and other financial liabilities (Continued)

17.2.4 Altice Finco and Altice Financing

Altice Finco and Altice Financing, the Senior and Senior Secured Notes issuers are subject to covenants that only come into effect every time new debts are issued with the following requirements:

- Secured net debt to EBITDA ratio: < 3:1
- Unsecured net debt to EBITDA ratio: <4:1

The Group is allowed to fully consolidate the EBITDA from any subsidiaries in which they have a controlling interest and that are contained in the restricted group as defined under the indenture. In addition, the Group is allowed to use a general debt basket adjustment amounting to 4% of the total assets of the group, against the net debt of the Group.

In case the Group exceeds any of the two conditions mentioned above, it cannot incur any new debt, till such time as the ratios are met again. No other penalties are applicable in case of a breach of covenant. The Group also has access to two super senior revolvers provided under the indenture, in case of any financing needs the Group may face (for a total EUR equivalent amount of EUR 118.0 million).

17.3 Borrowings from financial institutions

In addition to the bonds described above, the Group has issued the following debts:

- A mezzanine debt issued by Coditel Holding S.A. in 2011 with a principal amount of €100.0 million, bearing cash interest at 8.5% and a PIK interest at 5.25% which is capitalized annually. This debt matures in 2016.
- A covenant lite term loan issued by Altice Financing S.A for a total amount of $ 1,034 million (€795 million), bearing interest at Prime FFER, Libor + 4.5%) and maturing in June 2019.

Subordinated financial instruments have been issued by Altice VII and Coditel Holding.

(a) Altice VII

Subordinated financial instruments have been issued by Altice VII consists of:

YFPECs: Yield Free Preferred Equity Certificates;

ALPECs: Asset Linked Preferred Equity Certificate;

IFL: Interest Free Loans.

17—Borrowings and other financial liabilities (Continued)

Conversely, according to our appreciation, and upon application of IAS 32/39, following instruments have to be classified as debt instruments:

ALPECs instruments (about EUR 94.3 Million as at the end of 2013; 2012 amount: EUR 104.6 million)

YFPECs instruments (about EUR 4.8 Million as at the end of 2013; 2012 amount: EUR 4.4 million)

IFL instruments (about EUR 0.2 million at the end of 2013; 2012 amount: EUR 0.2 million)

The YFPECs have been valued using a discount rate of 4.76% given its preferred interest rate which therefore values the liabilities at EUR 4.8 million as at December 31, 2013.

17.5 Other financial liabilities

Other financial liabilities mainly consist of:

(i) Preferred equity certificates (PECs): These instruments bear a yield and shall have a maturity of 49 years.

On November 29, 2013, Altice Holding S.à r.l. acquired the PECs held by Codilink S.à r.l. (40% of the total amount). Following this transaction, all remaining PECs issued by Coditel Holding Lux II have been subscribed by Deficom Telecom, of which 26.2% is detained by Deficom Group S.A

TOTAL	**(1,038.5)**

18—Obligations under finance leases

18.1 Leasing arrangements

The Group leased certain of its office facilities under financial leases. The average lease term is 5 years (2012: 5 years). The Group has options to purchase the equipment for a nominal amount at the end of the lease terms. Obligations under finance leases are secured by the lessors' title to the leased assets. Entities with major lease contracts are, (i) HOT and HOT Mobile, (ii) Outremer Telecom and (iii) Auberimmo.

Interest rates underlying all obligations under finance leases are fixed at respective contract dates ranging from 3.5% to 5.5% (2012: 3.75% to 6%) per annum.

18—Obligations under finance leases (Continued)

18.1.1. Leasing arrangements

	Minimum lease payments	
	31 December 2013	31 December 2012
Less than one year	12.6	12.3

	31 December 2013	31 December 2012
Included in the consolidated financial statements as:		
Current borrowings (note 17)	23.4	27.1
Non-current borrowings (note 17)	11.4	7.8
Total	**34.8**	**34.9**

Current leasing obligations for HOT are listed below:

The HOT group (HOT Telecom and HOT Mobile) leases equipment under finance leasing agreements. An arrangement exists within the framework of the leases, which does not meet the legal definition of leasing, but which is treated as a leasing agreement, based upon its terms. The leased equipment serves as collateral for the liabilities under the lease contract. As of December 31, 2013 the net carrying value of the leased facilities and equipment is EUR 38.1 million (NIS 182 million) (2012 – EUR 41.7 million/NIS 205 million).

HOT Mobile has finance leasing in an amount of EUR 2.9 million in accordance with its rental contract with the company ''Airport City'' Ltd., which is for a period of 10 years ending in 2019. As of December 31, 2013, there is no balance recorded in the accounting records in respect of leasehold improvements (as of December 31, 2012, the net carrying value of leasehold improvements was EUR 3.0 million).

The Group has recorded finance leasing in respect of the Bezeq agreement. As of December 31, 2013, the finance leasing commitment in respect of the long-term Bezeq rental fees was updated by an amount of EUR 0.4 million (NIS 2 million), as a result of additional payments made in respect of the leasing in the reporting period (as of December 31, 2012 – EUR 0.4 million/NIS 2 million).

Other leasing contracts exist at Auberimmo, a datacenter owned by the Group and operating in France. The facility was purchased under a finance lease agreement for an initial amount of EUR 5.6 million. A second tranche was issued to carry out renovations and leasehold improvements, amounting to a total of EUR 3.0 million.

19—Financial risk factors

In the course of its business, the Group is exposed to a number of financial risks: credit risk, liquidity risk, market risk (including foreign currency risk and interest rate risk) and other risks (including equity price risk and settlement risk). This note presents the Group's objectives, policies and processes for managing its financial risk and capital.

Financial risk management is an integral part of the way the Group is managed. The Board of Managers establishes the Group's financial policies and the Chief Executive Officer establishes objectives in line with these policies.

19—Financial risk factors (Continued)

The Group is not subject to any externally imposed capital requirements.

19.1 Credit risk

The Group does not have significant concentrations of credit risk. The credit risk may arise from the exposures of commitments under a number of financial instruments with one body or as the result of commitments with a number of Groups of debtors with similar economic characteristics, whose ability to meet their commitments could be similarly affected by economic or other changes.

The Group's income mainly derives from customers in Israel, in the French Overseas Territories and in Europe (Belgium, Luxembourg, Portugal and Switzerland). The Group regularly monitors its customers' debts and provisions for doubtful debts are recorded in the consolidated financial statements, which provide a fair value of the loss that is inherent to debts whose collection lies in doubt.

The Group does not have significant concentration of credit risk, as a result of the Group's policy, which ensures that the sales are mostly made under standing orders or via credit cards.

19.2 Liquidity risk

Ultimate responsibility for liquidity risk management rests with the Board of Managers, which manages liquidity risk by maintaining adequate reserves, banking facilities and reserves borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

19.3 Market risks

The Group is exposed to risk from movements in foreign currency exchange rates, interest rates and market prices that affect its assets, liabilities and anticipated future transactions.

19.3.1 Interest rate risk

Interest rate risk comprises the interest price risk that results from borrowings at fixed rates and the interest cash flow risk that results from borrowings at variable rates.

The Group has an exposure to changes of interest rate in the market, deriving from long-term loans that have been received and which bear variable rate interest.

Interest structure of non-current financial debt (including interest effects of derivatives):

	December 31, 2013	December 31, 2012
	(in millions of euros)	
Financial debt at fixed rates	2,841.6	1,484.8
Financial debt at variable rates	1,023.7	287.1
TOTAL	**3,865.2**	**1,771.9**

	Weighted average effective interest rate	< 1 year	1 - 5 years	5+ years	Total	Carrying amount
31 December 2013						
Non-interest bearing	—	—	—	4.9	4.9	4.9
Variable interest rate instruments(1)	5.9%	58.7	989.89	481.1	1,529.7	1,023.7
Fixed interest rate instruments	7.7%	272.62	1,942.42	1,712.64	3,927.68	2,841.6

19—Financial risk factors (Continued)

	Weighted average effective interest rate	< 1 year	1 - 5 years	5+ years	Total	Carrying amount
31 December 2012						
Non-interest bearing	—	—	—	4.4	4.4	4.4
Variable interest rate instruments	5.1%	—	5.6	326.3	842.2	287.1
Fixed interest rate instruments	7.4%	—	—	839.4	839.4	1,484.8

(1) The carrying amount of variable interest rate instruments excludes the following items included in note 17.6: 'Accrued interest, Other financial liabilities and financial instruments'.

19.3.2 Israeli CPI risk

The Group has borrowed from banks and issued debentures that are linked to the changes in the Israeli CPI. Also, the Group has deposits and gave loans that are linked to the changes in the Israeli CPI. The net amount of the financial instruments that are linked to the Israeli CPI and for which the Group is exposed to changes in the Israeli CPI amounted to approximately EUR 187.0 million (NIS 895 million) as of December 31, 2013.

19.3.3 Foreign currency management

1. Foreign currency sensitivity analysis

The Group is exposed to foreign currency risk from transactions and translation. Transactional exposures are managed within a prudent and systematic hedging policy in accordance with the Group's specific business needs. Translation exposure arises from the consolidation of the financial statements of foreign operations in euros, which is, in principle, not hedged. The Group's objective is to manage its foreign currency exposure through the use of currency forwards, futures and swaps.

	December 31, 2013		
	Israeli Shekel	Swiss Franc	Total
	(in millions of euros)		
Profit for the year			
Increase of 10% in exchange rate	(12.8)	(0.2)	(12.9)
Decrease of 10% in exchange rate	12.8	0.2	12.9
Equity			
Increase of 10% in exchange rate	5.6	2.1	7.6
Decrease of 10% in exchange rate	(5.6)	(2.1)	(7.6)

	December 31, 2012		
	Israeli Shekel	Swiss Franc	Total
	(in millions of euros)		
Profit for the year			
Increase of 10% in exchange rate	(12.9)	(0.1)	(13.1)
Decrease of 10% in exchange rate	12.9	0.1	13.1
Equity			
Increase of 10% in exchange rate	23.3	3.0	26.3
Decrease of 10% in exchange rate	(23.3)	(3.0)	(26.3)

Exchange differences recorded in the income statement represented a profit of EUR 66.4 million in 2013 (2012: loss of EUR 22.5 million). They are allocated to the appropriate headings of expenses by nature.

The Group estimates that a 10% variation of foreign currencies against euro parity is a relevant change of variables and reasonably possible risk in a year and the presented above allows to assess the impact of

19—Financial risk factors (Continued)

a 10% increase of foreign currencies against euro on net result and reserves. A 10% decrease would have a symmetrical impact with the same amounts but in the opposite direction.

2. Foreign currency hedging

It is the policy of the Group to enter into hedging foreign exchange contracts to cover specific foreign currency payments and receipts.

The following table details the hedging contracts outstanding at the end of the financial year :

	31/12/13	31/12/13	31/12/13	31/12/13
Outstanding swap contracts	**Average exchange rate**	**Foreign currency**	**Notional Value**	**Fair Value of assets(1)**
Outstanding swap contracts (ILS coupons only)	4.34	3,201.8	620.6	(25.0)
Outstanding swap contracts (EUR coupons only)	0.79	415.5	392.0	(12.9)
Outstanding forward contracts (ILS coupons only)	4.31	2,154.3	426.7	(22.7)
Outstanding forward contracts (ILS nominal only)	5.07	2,125.0	362.6	(81.7)

(1) Fair value of swap and forward contracts as of December 31, 2012 amounted to EUR 62.5 million

19.3.4 Price risk

The Group has investments in listed financial instruments, shares and debentures that are classified as available-for-sale financial assets and financial assets at fair value through profit or loss in respect of which the Group is exposed to risk of fluctuations in the security price that is determined by reference to the quoted market price. As of December 31, 2013, the carrying amount of these investments was EUR 9.4 million (6.1 million as of December 31, 2012).

19.4 Gearing computation

For the year ended December 31, 2013, the Altice VII Group had a negative net equity position of EUR 261.2 million, thus resulting in a negative gearing ratio.

	December 31, 2013	December 31, 2012
	(in millions of euros)	
Net Debt	**3,865.6**	**1,771.5**
Cash and cash equivalents	(61.3)	(129.7)
Total equity	(261.2)	285.7
Gearing	**(1,456)%**	**575%**

19—Financial risk factors (Continued)

19.5 Fair value of financial assets and liabilities

19.5.1 Fair value of the Group's financial assets and financial liabilities that are measured at fair value on a recurring basis

Some of the Group's financial assets and financial liabilities are measured at fair value at the end of each reporting period. The following table gives information about how the fair values of these financial assets and financial liabilities are determined (in particular, the valuation technique(s) and inputs used).

Financial assets/ Financial liabilities	Fair value as at 31/12/2013	Fair value as at 31/12/2012	Fair value hierarchy	Valuation technique(s) and key input (s)	Significant unobservable differences	Relationship of unobservable differences
Foreign currency forward contracts (see notes17.8)	(104.9)	(52.6)	Level 2	Zero curve	N/A	N/A
					N/A	N/A
Interest rate swaps (see note 17.8)	(37.9)	(9.8)	Level 2	Zero curve	N/A	N/A
					N/A	N/A
AFS					N/A	N/A
—Wananchi[(1)]	31.9	—	Level 3	Internal approach using business plans	N/A	N/A
—Partner and Co.	8.4	6.1	Level 1	Quoted price in an active market	N/A	N/A

(1) In April 2012, the Group made an investment in the East-African cable operator Wananchi, to gain a foothold in the strategic and fast developing African cable and telecom market. To date the Group has invested a total of EUR 34.9 million ($48.4million, of which EUR 31.9 million in equity and EUR 3.0 as a convertible note, as of the year ended December 31, 2013) in this venture, alongside other industry peers, and has acquired a total stake of 17.5% in Wananchi. Given the specific geo-economic context of the zone that Wananchi operates in, the high growth rate, infrastructure development needs and volatilities associated with the region, the Board of Managers considers that the carrying amount of its investment reflects the fair value of the investment as of December 31, 2013.

19.5.2 Reconciliation of Level 3 fair value measurements

	Available for sale (unlisted shares)	Others	Total
31 December 2013			
Opening balance	0.0	—	0.0
Total gains or losses:			
—in profit or loss	0.0	—	0.0
—in other comprehensive income		—	
Purchases[(*)]	31.9		31.9
Issues	—	—	—
Disposals/settlements	—	—	—
Transfers in level 3	—	—	—
Transfers out of level 3	—	—	—
Closing balance	**31.9**	**—**	**31.9**

There were no available for sale instruments classified as level 3 for the year ended December 31, 2012.

(*) As at December 31, 2012 and during the year 2013, the Group invested into convertible bonds issued by Wanachi. Such bonds have been converted during the year in exchange for shares of Wananchi.

20—Trade and other payables

	December 31, 2013	December 31, 2012
	(in millions of euros)	
Trade payables	392.2	314.2
Corporate and social security contributions	29.8	24.5
Other payables	94.3	46.3
Amounts due to related parties	0.1	0.2
Deposit and guarantee received	0.4	—
Total current payables	**516.6**	**385.2**
Trade payables-acquisition of assets	13.0	5.9
Other payables	16.0	32.9
Total non-current payables	**29.0**	**38.8**

The increase in trade payables can mainly be attributed to the acquisitions of Outremer, ONI and integration of MCS and SportV in the scope of consolidation of the Group in 2013.

The increase in income tax payables can be attributed to an improvement in the profit before tax at HOT and a concomitant increase in the income tax rate in Israel from 25.0% to 26.5% as compared to FY2012.

21—Deferred revenues

	December 31, 2013	December 31, 2012
	(in millions of euros)	
Current deferred revenue	55.9	34.1
Non-current deferred revenue	10.6	10.8
Total deferred revenues	**66.5**	**44.9**

Current deferred revenues refer to revenues recognized from customers billed in advance of the monthly cut-off. Non-current deferred revenues result from multi-year contracts with business customers.

The increase in deferred revenues for the year ended December 31, 2013 was mainly due to an increase in price of certain products for the year ended December 31, 2013 and the subsequent billing and revenue collection of these subscriptions before the year end.

22—Classification and fair value of financial assets and liabilities

On December 31, 2013 and 2012, the principles for measuring financial instruments and their market value break down as follows:

	December 31, 2013			
			Fair Value	
	Book value	Amortized cost	Fair value through profit/loss	Assets available for sale
	(in millions of euros)			
Current assets				
Cash and cash equivalents	61.3	61.3	—	—
Restricted cash	1,242.7	1,242.7	—	—
Trade receivables	194.0	194.0	—	—
Other receivables	37.1	37.1	—	—
Non-current assets			—	—
Restricted cash	1.8	1.8	—	—
Loans and receivables	3.0	3.0		
Available for Sale	40.3	—	—	40.3
Long term trade receivables	5.5	5.5	—	—
Other long-term trade receivables	22.8	22.8	—	—
	1,608.5	**1,568.3**	**0.0**	**40.3**

	Book value	Amortized cost	Fair value
Current liabilities			
Credit from banking corporations and debentures	57.6	57.6	—
Loans from related parties	—	—	—
Trade payables	383.4	383.4	—
Others payables	246.0	246.0	—
Other current liabilities	15.9	15.9	—
Non-current liabilities			—
Loans from banking corporations and debentures	3,520.5	3,520.5	—
Other financial liabilities	271.6	129.3	142.3
Other non-current liabilities	39.6	39.6	—
	4,534.6	**4,392.3**	**142.3**

	December 31, 2012			
	Book value	Amortized cost	Fair value through profit/loss	Assets available for sale
Current assets				
Cash and cash equivalents	129.7	129.7	—	—
Trade receivables	150.8	150.8	—	—
Other receivables	37.9	37.9	—	—
Non-current assets				
Restricted cash	9.6	9.6	—	—
Investments in financial assets available for sale	—	—	—	—
Available for Sale	6.1	—	—	6.1
Long term trade receivables	18.7	18.7	—	—
Other long-term trade receivables	24.6	24.6	—	—
	377.4	**371.3**	**—**	**6.1**

22—Classification and fair value of financial assets and liabilities (Continued)

	Book value	Amortized cost	Fair value
Current liabilities			
Credit from banking corporations and debentures	113.2	113.2	—
Trade payables	311.3	311.3	—
Others payables	118.8	118.8	—
Short-term loans from related parties	2.7	2.7	—
Non-current liabilities			
Loans from banking corporations and debentures	1,365.7	1,365.7	—
Long-term loans from related parties	109.0	109.0	—
Other financial liabilities	174.5	112.0	62.5
Other non-current liabilities	49.5	49.5	—
	2,244.7	**2,182.2**	**—**

23—Taxes on income

23.1 Income tax (expense)/benefit

23.4 Tax assessments

23.4.1 Hot Telecom

On December 22, 2013, an agreement was signed between Cool Holdings Ltd and all of its subsidiary companies (except for HOT Mobile Ltd.) (hereinafter in this section—the companies) and the Israeli Income Tax Authority for the closure of disputes that had arisen in the assessment discussions for the years 2006 - 2011 and in continuation of the tax assessments that had been received in December 2009 and during the course of 2010 for the 2006 - 2008 tax years. Pursuant to the compromise agreements the companies will be required to pay an additional amount of tax in respect of the said tax years, primarily in respect of timing differences in respect of the depreciation of the infrastructure and the cables network and the amortization of intangible assets. The implementation of the compromise agreements will result in the Company having chargeable income in 2012 and 2013 as well.

23—Taxes on income (Continued)

HOT Telecom's management has recorded the provision relating to the assessments in its financial statements in the past.

The impact of such assessment agreement in HOT's financial statements, including in respect of the updating of the HOT's deferred tax balances, is a net income of EUR 5.0 million.

Most of the companies have been issued with final tax assessments up to and including the 2011 tax year. HOT Mobile has been issued with tax assessments up to and including the 2009 tax year, which are deemed to be final.

23.4.2 Cabovisao

For the years 2012 and 2013, Cabovisao is subject to corporate income tax (''IRC—Imposto sobre o Rendimento das Pessoas Colectivas'') at a rate of 25%, increased (i) up to a maximum of 1.5% of taxable income through a municipal tax (''Derrama''‘'); and (ii) by a 3% and 5% state tax (''Derrama Estadual'') applicable on taxable income between 1,5 million Euros and EUR 10 million (EUR 7.5 million as from January 1, 2013, following a change in Portuguese tax legislation occurred in December 2012) and on taxable income in excess of EUR 10 million (EUR 7.5 million as from January 1, 2013), respectively, in accordance with the article 87- A of the Portuguese Corporate Income Tax code, resulting in a maximum aggregate tax rate of approximately 31.5%.

In accordance with article 88° of the Portuguese Corporate Income Tax code, the Company is subject to an autonomous taxation over some expenses at the rates defined in that article.

As at December 31, 2013, the Company's tax returns, for the fiscal periods of 2006 until 2010, are being reviewed by Portuguese tax authorities. During the year ended December 31, 2013, the Company already received a tax notification, adjusting the Company's tax losses obtained in the fiscal year ended 2006, in the amount of approximately EUR 16.5 million. However, as of December 31, 2013, any carrying forward tax losses obtained in the fiscal year ended 2006 already expired, and therefore cannot be used to reduce future taxable profits.

The Company was subject to an inspection from the Portuguese tax authorities for the fiscal years 2003 to 2006, and the outcome was the following:

- An assessment of the Portuguese Tax Authorities related to 2005, requested an adjustment of tax losses in the amount of EUR 17.2 million, as well as an additional tax payment in the amount of EUR 4.1 million for withholding tax and stamp tax. The Company paid EUR 2.9 million and contested this decision through an appeal, but has not received the final decision yet. The unpaid amount of, approximately, EUR 1.0 million (excluding related late payment interests) was contested on appeal. In the year ended August 31, 2012, the Corporate Tax Authority accepted the claim. As of today, there were not any subsequent deliberations after that decision. The Board of Managers understands that the final outcome of this matter will be favorable to the Company.
- An assessment of the tax payable concluded that there was withholding tax due in the amount of approximately EUR 5.2 million (excluding related late payment interests). Cabovisao doesn't agree with this assessment, having filed a gracious complaint and submitted a bank guarantee in the amount of approximately EUR 6.8 million. As of December 31, 2013, the administrative and tax court of Almada didn't pronounce itself on that claim. The Board of Managers understands that the final outcome of this matter will be favorable to the Company.

23.4.3 Other entities

The Board of Managers has not identified any other material tax assessments in other Group entities.

23—Taxes on income (Continued)

23.5 Unrecognized deferred tax assets

As at December 31, 2013, unrecognized deferred tax assets amount to EUR 253.0 million and are mainly split as follows:

	December 31, 2013	December 31, 2012
	(in million Euros)	
Cool Holding and HOT Telecom	(13.9)	—
HOT Mobile	(118.9)	(10.8)
Altice Financing	(3.9)	—
Cabovisao	(56.0)	(51.3)
Altice Finco	(1.8)	—
Altice Holdings	(36.9)	—
Altice Caribbean	(1.5)	—
Altice Blue Two	(6.4)	—
ONI	(11.8)	—
Others	(2.0)	—
Total	**(253.0)**	**(62.2)**

24—Segment analysis

24.1 Definitions of segments

Given the geographic spread of the various Group entities, it logically follows that an analysis and control by geography is inalienable to Group strategy of managing its different businesses. It has thus been decided by the central management team to analyse the business across geographies and then by activity. The following geographies have been identified:

- Israel,
- Belgium and Luxembourg (Western Europe),
- Portugal (Western Europe),
- French Overseas Territories (Antilles and Indian Ocean),
- Others (Switzerland, Africa, France etc.).

Activities have been split as follows:

- Cable,
- Mobile,
- B2B and Others (Content/etc.).

Following the signature of agreements to acquire Tricom and Orange Dominicana in the Dominican Republic in October and November 2013 respectively, a new segment, ''Dominican Republic'', will be defined. Given the nature of the activities of the two firms, there will be no changes to the activities segment.

24.1.1 Operational KPIs

It has also been decided by Management that operating subsidiaries shall report operational KPIs every week together with financial KPIs every month, using a standard reporting format.

24—Segment analysis (Continued)

The main operational KPIs include:

The main operational KPIs that will be tracked will be:

Subscriber base evolution (both cable and mobile),

ARPU (Average Revenue per Unit) (cable and mobile),

Other relevant cost drivers.

These KPIs are benchmark indicators followed throughout the industry and allow for a thorough and accurate analysis of the business and strategic decision making.

24.1.2 Financial KPIs

Each local operational company will also report on a monthly basis the following financial KPIs by segment:

Revenues (Cable/Mobile/B2B and Others),

Cost of Sales (Cable/Mobile/B2B and Others),

Capex (Cable/Mobile/B2B and Others).

The central team believes that given the uniformity in the accounting and nature of operating expenses and given the experience and competence of the Group in managing operating costs, the main indicator that can vary between business units is the gross margin.

Capital expenditure (Capex) is an important indicator to follow, as the profile varies greatly between the two activities:

The cable business has fixed Capex requirements that are mainly discretionary (network, platforms, general), and variable Capex requirements related to the connection of new customers and the purchase of Customer Premise Equipment (TV decoder, modem, etc).

Mobile Capex are mainly driven by investment in new mobile sites, upgrade to new mobile technology and licences to operate. Once Capex are engaged and operational, there are limited Capex requirement.

Management believes that operations in Switzerland are currently not substantial enough to require a separate reporting segment, and will be reported under 'B2B and Others'. However, as these activities grow, it is intended that they are also reported under a separate segment with relevant operating KPIs specific to the activity.

24.2 Regional specificities

24.2.1 Israel

Israel is currently an important contributor to the Group revenues and EBITDA and has particularities that differentiate it. For this reason, it is classified as a separate region.

It is characterized by a high broadband and cable penetration and a very technology-savy population. Segments within the Israeli telecom market show different level of maturity and competition, with relatively frequent interventions from the regulator. Management is factoring expectations for price pressure and increasing competition in its strategic plan.

Triple play penetration is low and represents a valuable growth driver.

The regulatory environment does not yet allow for quadruple play packages (coupling fixed and mobile services), which Management need to consider when setting up integration plans and operational synergies. The prevailing political environment in the region can also have adverse impacts on the

24—Segment analysis (Continued)

development of the business, as a deterioration of the situation may have serious repercussions on the market environment and may even lead to physical damage of the infrastructure.

24.2.2 Belgium and Luxembourg

Even though Belgium/Luxembourg and Portugal can be considered to be the same sub-region, the challenges posed by these two regions are quite different.

The Belgian and Luxembourg territories have a high standard of living and well developed economies, which translates into higher prices for services. The markets are quite mature, with high broadband penetration. Customers are willing to pay more for premium services and hence price pressure appears limited.

These regions are marked by the presence of many well established local cable operators with no overlap thou. Customer retention is a key factor in maintaining strong profit margins.

Given the density and presence of mobile operators, the mobile strategy has been driven by Mobile Virtual Network operations, through the deployment of quadruple play packages.

24.2.3 Portugal

The Portuguese market is marked by a high concentration of double play subscribers and a mature telecommunications market, which, when coupled with slow economic recovery, makes it difficult to achieve revenue growth. This market is marked by high subscriber attrition and downward migration from high to low ARPU offers.

The challenge in Portugal is to maintain a subscriber base and migrate the customer base from double play to triple play offers.

24.2.4 French Overseas Territories

The French Overseas Territories present growth opportunities with relatively limited competition and room to attract more subscribers on our cable infrastructure. Additional growth potential exists notably through the deployment of multiple-play services and efficiency gains in distribution network, , as multiple-play packages penetration remains low. Price pressure is low in these regions and customers are willing to pay more for value added services.

Additional opportunities have been identified and pursued in the e-banking sector.

24—Segment analysis (Continued)

24.3 Segment information

Details regarding revenues, cost of sales and gross profit for our cable, mobile and other segments are as follows:

	December 31, 2013					
	Total	Belgium & Luxembourg	Israel	French Overseas Territories	Portugal	Others
			(in millions of euros)

25—Operating expenses

	December 31, 2013	December 31, 2012
	(in millions of euros)	
Technical and maintenance costs	(149.0)	(141.9)
Customer services	(32.9)	(18.3)
Taxes	(3.6)	(2.4)
Total	**(185.4)**	**(162.5)**

26—Depreciation, amortization and goodwill impairment

It consists in (i) amortization of intangible assets for a total of EUR 133.4 million (2012: EUR 245.7 million including EUR 121.9 million of goodwill impairment), (ii) depreciation of tangible assets for a total of EUR 251.4 (2012: EUR: 219.6 million) and (iii) other additions and reversals for a total of EUR 14.8 million (mainly representing additional depreciation on inventories and receivables) (2012: EUR 77.10 million, representing a net reversal for the year).

27—Other operating incomes and expenses

	December 31, 2013	December 31, 2012
	(in millions of euros)	
Other incomes and expenses	(17,0)	(24.9)
Other revenues	0.9	—
Disposal of tangible assets	1.0	(4.8)
Other expenses, net	**(15.1)**	**(29.8)**
Non-recurring costs(1)	(58.3)	(22.4)
Restructuring costs(2)	(2.9)	(6.7)
Restructuring and other non-recurring costs	**(61.2)**	**(20.8)**
Total	**(76.3)**	**(50.5)**

(1) The increase of non-recurring costs is mainly explained by a one-off EUR 31.6 million charge booked at HOT Mobile concerning the entering into a new network sharing agreement with Partner Telecommunication and the termination of the existing agreement with Pelephone. The provision relates to any cost overlap resulting from the use of Pelephone's network during the transition phase. In addition, Altice financing incurred costs related to consultants' fees and other outlays related to the acquisition of OMT Invest S.A.S and Winreason S.A.

(2) Restructuring costs decreased in the year ended December 31, 2013 as a result of the completion of restructuring at Cabovisao. The charge of EUR 2.9 million refers to the restructuring costs engaged at ONI telecom since its acquisition in august 2012.

28—Net finance costs

	December 31, 2013	December 31, 2012
	(in millions of euros)	
Gain arising on fair value of financial instruments(1)	0.1	0.5
Foreign exchange gains	91.0	24.7
Gain arising from fair value of subordinated financial instruments(1)	2.5	0.9
Finance income	**93.6**	**26.1**
Interest charges on borrowings and overdrafts(2)	(199.2)	(118.5)
Loss arising on fair value of financial instruments	(99.4)	(62.8)
Foreign exchange losses	(24.5)	(2.8)
Net book-value of disposal/financial assets	(13.6)	(16.7)
Finance costs	**(336.8)**	**(200.0)**
Total	**(243.2)**	**(174.1)**

(1) Gains arising on fair value variations of financial and subordinated financial instruments issued by the Company for a total amount of EUR 1.4 million and a gain on interest rate swaps recorded at Altice financing for a total amount of EUR 1.3 million.

(2) The increase in interest expense for the year ended December 31, 2013 was primarily due to (i) the issuance of new debt to finance the Outremer Telecom and ONI transactions (€12.9 million impact in 2013) and (ii) the full year impact of the debt incurred to finance the HOT take private in 2012 (€47.45 million in 2013).

29—Transactions with non-controlling interests

On April 23, 2013, the company repurchased the 40% minority interests held by Apax in its Portuguese subsidiary, Cabovisao for a total consideration of EUR 105.0 million, of which EUR 90.0 million was paid as consideration for equity acquired and EUR 15.0 million used in the repayment of a shareholder loan. The total amount of equity acquired was valued at EUR 13.1 million and the impact on the net equity of the Group was EUR 77.0 million following the consummation of the deal.

On November 29, 2013, the company repurchased the 40% minority interests held by Apax though its holding company Codilink S.à r.l. in Coditel Holding Lux and Coditel Management. The total

29—Transactions with non-controlling interests (Continued)

consideration paid was EUR 82.5 million, of which EUR 30.6 million was paid to acquire shares in Coditel Holding Lux II and EUR 51.9 paid to reimburse subordinated debt instruments (CPECs) held by the minority shareholder. The amount of equity acquired by the Group was valued at EUR 1.7 million, with a total impact of EUR 28.9 on the Group net equity following the consummation of the deal.

30—Average workforce

	December 31, 2013	December 31, 2012
Managers	352	268
Technicians	857	660
Employees	3,011	4,719
	4,220	**5,647**

31—Transaction with related parties

31.1 Trading and financial transaction

Transactions with related parties mainly related to transactions with Numericable Group, Next L.P. or Altice Six S.A.. Such transactions are limited to (i) re-invoicing of certain operational services granted by Numericable Group to certain subsidiaries of Altice VII, or (ii) shareholder preferred equity certificates or loan issued by Altice VII and held by Next L.P.

Transaction with related parties that directly impact the reserves of the Group are summarized in note 13.

Other related parties include consulting firms specialized in the management and operations of telecom companies and executive managers of Altice VII. The fees paid to the consulting companies include recurring fees paid based on service level agreements established with Altice VII, one-off success fees for the successful completion of acquisitions or negotiations with banks on debt contracts/bond issuance and reimbursement of any outlays and expenditures incurred by the employees of these companies when working on behalf of Altice VII. Transactions with executive managers include loans provided to them by the Company.

31.2 Compensation of key management personnel

The compensation given to the managers, in respect of their duties as Chairman of the Executive Board or member of the Executive Board of Altice S.A. for the financial year 2013, is EUR 2.3 million compared to EUR 1.7 million for the financial year 2012.

The remuneration of directors and other members of key management personnel during the year was as follows:

	December 31, 2013	December 31, 2012
Short-term benefits	2.3	1.7
Post-employment benefits	—	—
Other long-term benefits	—	—
Share-based payments	—	—
Termination benefits	—	—
TOTAL	**2.3**	**1.7**

32—Contractual obligations and commercial commitments

The Group has contractual obligations to various suppliers, customers and financial institutions that are summarized below. A detailed breakdown by operating entity is provided below.

	December 31, 2013					
Unrecognised contractual commitments	**< 1 year**	**Between 1 and 2 years**	**Between 2 and 3 years**	**Between 3 and 4 years**	**Five years or more**	**Total**
Good and service purchase commitments	103.4	70.0	36.0	1.4	21.9	232.7

Total	**160.1**	**132.9**	**39.3**	**7.7**	**45.4**	**385.3**

32.1 Hot Telecom Commitments

32.1.1 Commitments

A. *Contingent liabilities*

1. Within the framework of the merger of the cable companies on December 31, 2006, HOT Telecom (or ''HOT'') assumed responsibility for the existing claims in the field of activity of the acquired companies (the cable companies in their former format), furthermore, it was determined that the company would assume responsibility for any claim that might be filed in the interim period by any of the acquired companies after the time of the completion of the merger of the cable companies.

In addition, HOT has entered into a commitment under an indemnification agreement with each of the three previous holders of the rights in the HOT Gold Partnership (the Tevel Group, the Yedioth Communications and the Fishman Group) in accordance with which the company has undertaken to fully indemnify the partners in the HOT Gold Partnership, prior to the completion of the merger transaction, so that they will be released from all responsibility, commitment or debt of any sort whatsoever that HOT Gold had on December 31, 2006 or that HOT Gold might have had after that date, and which relate to the period prior to the completion of the merger, including in respect of claims and legal proceedings.

2. Lawsuits have been filed and are pending against companies in the Group in the routine course of business and various legal proceedings are outstanding against it (hereinafter—Lawsuits).

In the opinion of the managements of the Group companies, based, inter alia, on legal opinions in respect of the chances of the lawsuits, appropriate provisions have been recorded in the financial statements as of December 31, 2013 in an amount of EUR 11.1 million, were provisions are required, to cover the exposure in respect of the said lawsuits.

In the opinion of the management of the Group companies the additional exposure in an amount of approximately EUR 565 million (over and above the provisions that have been recorded in these financial statements), as of December 31, 2013 in respect of lawsuits that have been filed against companies in the Group on various issues is as follows:

a) An amount of approximately EUR 377 Million in respect of claims, the chances of which, in the assessment of the company's management, in reliance on opinions from its legal advisors, do not exceed 50%.

b) An amount of approximately EUR 105 Million in respect of claims, which it is not possible to evaluate at this stage, and which consist primarily of applications for approval as class actions that were filed shortly before the date of the financial statements.

c) An amount of approximately EUR 84 Million in respect of claims, where the chances of there being accepted in the assessment of the HOT's management, in reliance on the opinion of its legal advisers, exceed 50%.

32—Contractual obligations and commercial commitments (Continued)

The following table is an abbreviated summary of the Group's contingent liabilities, which are outstanding as of December 31, 2013, according to groupings having similar characteristics:

The subject matter of the lawsuit	Amount of the additional exposure over and above the provision as of December 31, 2013	Amount of the lawsuits that it is not possible to assess, which were presented shortly before the date of the financial statements (primarily applications for approval as class actions)	Provision recorded in the financial statements as of December 31, 2013	Provision recorded in the financial statements as of December 31, 2012	Updating of the expense (income) in the reporting period
			EUR in Million		
Customers[1]	490.0	82.0	4.2	2.1	2.1
Copyright	—	—	6.3	11.3	0.4
Suppliers[2]	22.6	11.3	0.4	0.6	—
Employees	1.0	—	0.2	0.2	—
The merger transaction	50.2	—	—	—	—
Total	**563.8**	**93.3**	**11.1**	**14.2**	**2.5**

(1) The amount includes EUR 10.5 Million in respect of claims after the balance sheet date.

(2) The amount includes EUR 9.4 Million in respect of claims after the balance sheet date.

B. Commitments

1. Royalties to the Ministry of Communications and other payments to the government

a) HOT Telecom used to be committed to pay annual royalties in accordance with the Telecommunications Regulations (Concessions)—1987. In accordance with the Telecommunications Regulations (Telecommunications and Broadcasting) (Royalties)—2001, HOT Telecom is required to pay annual royalties in respect of its income from in country operator services and HOT Mobile is required to pay annual royalties in respect of its radio telephone services (less payments to another license holder in respect of reciprocal connection or roaming services). The royalties rates that HOT Telecom and HOT Mobile have each been charged to pay stood at 1.75% in 2012 and decreased to 0% from 2013 onwards.

b) In July 2001, the cables companies, including HOT Telecom, entered into a commitment under an agreement with the State of Israel on the subject of a solution to the disputes between the cable companies and the State in respect of the right of each company to operate the existing cables infrastructure in each of the concession areas after the end of the period of the concessions. It was stipulated in the agreement that the State undertakes to waive all of its claims and its rights in respect of the cables infrastructure such that each cables company would be the owner of all of the rights, including property rights, in the cables infrastructure that it held in the area of its concession and that it would have available to it the right to continue to operate it even at the end of the concession period. In consideration for this, it was stipulated that each company was to pay to the State, on an annual basis and for a period of 12 years (commencing on January 1, 2003), its relative share, as determined in the agreement, of an amount that is equivalent to the multiple of certain incomes (as determined in the agreement) of each of the cable companies on a graduated scale (in accordance with the level of income, as aforesaid) at a rate of from 0% to 4%. The relative share of each company can be altered by agreement between the cables companies.

In addition, it was stipulated that each company is to pay approximately 12% of the overall consideration from the sale of operations that are executed through the cables infrastructure for a period of 12 years. It was also stipulated in the agreement that in so far as HOT has received any amount whatsoever in consideration for the issuance of its shares to the public or to an external investor or in consideration for the sale of shares of another company from among the cables companies, part of the consideration from the issue or the sale, as aforesaid, is to serve as an advance payment for the payment of the relevant

32—Contractual obligations and commercial commitments (Continued)

portion of the consideration that remains to be paid under the agreement, in accordance with a formula that will be determined by the parties by agreement. It is further stipulated in the agreement that it shall apply to the cables companies or to any company that is split or merged even if structural changes are made of any sort whatsoever, and accordingly, with the completion of the merger, the agreement applies to HOT as a merged company.

c) In accordance with the Wireless Telegraph Regulations (Licensing, Certification and Levies) − 1978, HOT Mobile is required to pay a fixed annual payment for each frequency that it uses. HOT Mobile paid amounts of EUR 6.1 million and EUR 5.4 million in respect of the years 2013 and 2012 respectively.

2. Other royalties

a) Within the framework of the Group's routine operations in the broadcasting field, the Group enters into commitments under arrangements and agreements under which the Group pays royalties to various authors' organizations. The amounts of the royalties that have been reflected by the Group within this context in the years 2013 and 2012 amounted to EUR 9.4 million and EUR 8.8 million respectively.

b) On January 30, 2012 a draft of the Authors and Performers Law (Judgment on Royalties Issues) 2012 (hereinafter, in this section—''The draft law'') was placed before the Knesset. The draft law was intended to create a royalties court by empowering one of the District Court Judges to hear cases on royalties issues, royalty rates and disputes in royalty issues (in other words, a dispute on the issue of royalty rates between a collective management entity and a user or users of a repertoire).

This draft, if it is accepted, may have an implication for the issue of the payment of royalties to various organizations. As of the date of this report, HOT is unable to assess what the impact of the said legislation will be on its business results, if it is passed.

3. A commitment to invest in original productions

In accordance with the provisions of the Communications Law, the principles of communications and decisions by the Council, HOT is required, inter alia, to invest amounts in original productions at a rate of 8% of its annual income from subscription fees. During the course of the years 2012 and 2013 HOT complied with the investment rate that is required, as aforesaid.

It should be noted in this connection that the Communications Law has empowered the Council to determine the rate of investment that is required, and solely that it may not exceed 12% and may not fall below 8% of the annual income from subscriber fees. In this connection, in October 2011 the Council informed HOT that as from the year 2012 its income from subscriber fees, which form the basis for the calculation for the requirement to invest in original productions, will be deemed to include all of the payments that are paid by its subscribers in order to receive broadcasts and to receive services, including income from users' terminal equipment and the installation thereof, whereas in accordance with the policy adopted by the Council up to them regarding the inclusion of income from terminal equipment for the purpose of the calculation of the requirement for original productions was made conditional upon a mechanism that was based on the profitability of this income, and in past years the income from users' terminal equipment and the installation thereof was not included in the basis for the calculation for original productions. On January 12, 2012, the Council determined that HOT will be entitled to complete the amount of the additional investment for the year 2012 over three investment years.

4. Agreement to deploy and maintain a cables network

On January 1, 1990 and on May 1, 1989, Tevel International Transmission for Israel Ltd. and HOT Gold & Co. (hereinafter together—The cable companies) entered into commitments under agreements for the provision of planning, installation and maintenance services of the cables network with the Bezeq company (the provisions of both of the two said agreements are similar, and they will hereinafter in this section be called—the agreement). This agreement was endorsed to HOT Telecom as part of the merger agreement.

32—Contractual obligations and commercial commitments (Continued)

In accordance with the agreement, Bezeq, Tevel and HOT Gold planned the cables network, inter alia, based on the Bezeq company's available infrastructure, which was deployed in the areas of the concession at the time of the signing of the agreement. Tevel and HOT Gold supplied the Bezeq company with the base equipment (as defined in the agreement) that comprises the cables network whereas the Bezeq company supplied the additional equipment (as defined in the agreement) that is used for setting up the cables network.

In accordance with the agreement, a cables network was set up and deployed in a number of major cities across Israel, and the Bezeq company conducts the routine maintenance of the cables network and also provides malfunction repair services. The provisions of the agreement also relate, inter alia, to the possibility of the expansion of the cables network to additional facilities, the connection of new houses and of new neighborhoods.

It is determined in the agreement that it will remain in force for the length of the period of the concession, and that it will continue to be in force if the concession or the rights in the concession are transferred or afforded to another, in whole or in part and directly or indirectly, during the course of the original concession period and during the extension of that period or after the end of it. The Bezeq company is only entitled to cancel the agreement in respect of a breach for which notice has been given in writing.

The total of the expenses recorded in HOT's accounting records for the network services payable to the Bezeq company in the years 2013 and 2012 amounted to EUR 9.8 million and EUR 10 million, respectively.

It should be noted that from time to time, during the routine course of business, disputes arise in connection with the implementation of the agreement, inter alia in respect of the division of the costs that are involved in the performance of some of the services that are supplied by the Bezeq company under the agreement, however the parties are continuing to operate in accordance with the agreement. It is further noted that over the course of the years additions have been signed to the agreement, primarily in connection with enhancement and upgrading work on the cables network.

5. Commitments to lease assets

The Group has commitments under agreements for the leasing of buildings and motor vehicles for various periods up to the end of the year 2020. The minimal future rental fees in respect of the rental contracts as of December 31, 2013, exclusive of the option period, are as follows:

	EUR Million December 31, 2013	EUR Million December 31, 2012
2014	37.3	37.8
2015	30.2	30.0
2016	19.7	24.4
2017	10.1	17.5
2018 and thereafter	7.3	61.7
	104.6	**171.3**

6. On July 19, 2011, HOT's Board of Directors approved a commitment under agreements for the execution of the upgrading of the fiber optic infrastructure (FTTX). In accordance with the said commitment, HOT Telecom will purchase advanced optic equipment, work and services from third parties, in order to upgrade the infrastructures, including maintenance services, in accordance with the deployment and the timetables that will be agreed upon between the parties from time to time. The upgrading of the infrastructure, as aforesaid, will enable the expansion of the traffic capacity on the network, in favor of the supply of enhanced VOD services, the increasing of the number of channels that the Group can offer to its subscribers, faster internet services and it will also enable HOT to deal with increased demand for traffic capacity on the network in the future, which is expected to arise as a result of increased uses and applications that require a considerable band width.

32—Contractual obligations and commercial commitments (Continued)

7. On May 27, 2010, a facility agreement was signed between HOT Mobile and Motorola for the purchase, licensing and installation of the infrastructure equipment (hardware and software) which is required in order to operate HOT Mobile's iDEN network. The agreement is in force for a period of five years from the time that it was signed (hereinafter -the initial period) and it will be renewed for additional periods of one year each (or for a longer period that is agreed between the parties), unless a party to the agreement gives notice to the other party, 90 days before the end of the initial period, or one of the extension periods, as the case may be, of its desire to terminate the commitment. The agreement arranged the commitment between the parties for the purpose of the execution of the work orders that will be presented to Motorola, from time to time, by HOT Mobile for the purpose of the supply of equipment or software for the iDEN network.

Within the framework of the agreement, Motorola has undertaken that during the initial period it will hold an inventory of equipment that will enable it to immediately supply the components that are required for the proper functioning of HOT Mobile's iDEN network, and so that it will be capable of supplying HOT Mobile with the maintenance services for the infrastructure equipment and the software that are required to operate the network for a period of seven years from the signing of the agreement, subject to the purchase of the said maintenance services by HOT Mobile.

In consideration for Motorola's commitment to sell the equipment and the licenses to HOT Mobile at the prices that are denoted in the agreement, HOT Mobile has made a commitment to purchase the infrastructure equipment and the software that is required to operate the iDEN network from Motorola alone during the period of the agreement.

8. As part of the commitment with Motorola in respect of the infrastructure for the iDEN network, HOT Mobile has signed on a system maintenance agreement with Motorola as well as on an agreement for the maintenance of the system's hardware, which arrange the repair of malfunctions and the provision of support by Motorola for HOT Mobile's iDEN network.

In December 2011, the system maintenance agreement was extended for an additional period of three years, until the end of 2014.

9. On May 26, 2010, as part of the sale of the control in HOT Mobile to Altice, HOT Mobile entered into a commitment under an agreement with Mobility for the purchase of terminal equipment that supports the iDEN technology.

The agreement is in force for a period of 5 years and it will be renewed for additional periods of one year each time unless a party to the agreement gives notice to the other party, 60 days before the end of the initial period, or one of the extension periods, as the case may be, of its desire to terminate the commitment.

The agreement arranged a mechanism for the ordering and supply of the terminal equipment (including quarterly forecasts by HOT Mobile) with HOT Mobile being responsible for the importing of the terminal equipment from abroad.

The supplier has received an option and the right of first refusal for the repurchase from HOT Mobile of all of the terminal equipment that it may be holding at the time of the termination of the agreement, in accordance with a mechanism that was set in the agreement.

10. On June 16, 2011, HOT Mobile entered into a commitment with Nokia Siemens Networks Israel Ltd. (hereinafter—the supplier) for the setting up of the infrastructure for HOT Mobile's new network.

In accordance with the terms of the agreement, the supplier will plan and set up the new network for HOT Mobile as a turnkey contractor. In the first stage, which was completed in May 2012, the supplier completed the setting up of the systems that are required for the purpose of operating the new system with a coverage of approximately 30%, which is in excess of the extent of the coverage which HOT Mobile is required to provide (20%) in accordance with the terms of the tender within two years from the time of the receipt of the new radio telephone license. After the completion of the first stage, HOT Mobile

32—Contractual obligations and commercial commitments (Continued)

has expanded and is expanding the new network, both from the perspective of the coverage and also from the perspective of the LTE capability.

The agreement is in force for 15 years, and it contains warranties for the proper functioning of the components of the system for a period of two years from the time of the handing over of each component in accordance with the agreement, as well as warranties for the entire period of the agreement that the system will operate in accordance with the system requirements that HOT Mobile placed (in terms of availability, functioning and capacity), subject to their being a maintenance agreement in force between the parties.

In consideration for the completion of the first, second and third stages in accordance with the agreement and the performance of all of the supplier's commitments by the year 2013, the Group will pay the supplier an amount of 52 million Dollars, which amount does not include the expansion of the coverage and the capacity over and beyond what is stipulated in the agreement.

11. In 2013 and at the beginning of 2014, a number of additions to the agreement were signed, within the framework of which the payments that were supposed to be paid under the agreement have been deferred to a later date, subject to HOT Mobile's signing on debt notes, with Hot acting as guarantor. Within this framework, HOT Mobile has signed on confirmation for the final receipt of significant portions of the said project.

12. On October 27, 2011, an agreement was signed between HOT Mobile and Comverse Ltd. (hereinafter—Comverse), in accordance with which Comverse will supply HOT with a BSS system (a billing system that is integrated with the customer relations management (CRM) system) (hereinafter—The system) and Comverse will also supply HOT with hardware, software and services, including the operation and maintenance of the system The agreement is for a period of five years. In consideration for Comverse's services, HOT Mobile will pay an amount of approximately 12.5 million US Dollars. In January 2012, the parties signed on an addendum to this agreement, in accordance with which Comverse is committed to allocate seven additional employees to be available for the project (instead of the manpower that HOT had to make available for the project), for a payment of 500,000 US Dollars.

13. On May 30, 2012, HOT Mobile International Communications Ltd (hereinafter—HOT International), a wholly owned subsidiary of HOT Mobile's, received an operator's license for the provision of international telecommunications services (hereinafter—The international license). On January 6, 2013 HOT International received operational approval for starting to provide international telecommunications services in accordance with the international license and on January 8, 2013, notification of the opening of the services was sent to all of the operators.

14. On November 11, 2013, HOT's Audit Committee approved HOT's commitment under a sub-leasing agreement with the Middle East Company Ltd. (hereinafter—the lessor) for the sub-leasing of a plot of land in the Jaffa Port, which HOT is leasing (hereinafter—the leased property), retroactively, as from July 2013.

The leased property will be used by the tenant, which is a company that produces broadcasts for a foreign news company, which is 85% owned by Mr. Patrick Drahi, the ultimate controlling interest in HOT.

The lease fees that will be paid to HOT in respect of the leased property have been set in accordance with the rental fees that HOT pays in respect of the property and under the same payment terms (back to back), with the addition of a monthly amount in respect of: (1) the tenant's relative share of the municipal taxes, electricity, water, security and cleaning expenses (back to back terms to those paid by HOT) and (2) adaptations to the leased property that HOT has executed at its own expense.

It is determined in the rental agreement that in any case in which the agreement ends before the end of the rental period, the tenant shall pay HOT the balance of the payments in respect of the adaptations that HOT made in the leased property, as discounted using a real annual interest rate that has been set in the agreement.

32—Contractual obligations and commercial commitments (Continued)

15. On November 8, 2013, HOT Mobile signed on agreements with Partner Communications Ltd. (hereinafter—Partner), which are subject to the receipt of all of the approvals that are required, as detailed below: HOT Mobile and Partner will set up a limited partnership, which will hold, develop and operate a single advanced cellular communications network, for both of the companies, each of which will hold half of the rights in it. In accordance with the agreement, each of the parties will continue to hold and to operate its core of the network separately and provide cellular communications services, including the marketing and the selling of such services, to its customers alone.

The agreement arranges the management of the joint network and its development, the manner of the management of the partnership, including a mechanism for the appointment of a board of directors, the resolution of disagreements, the bearing of the costs of upgrading the network and so on.

The agreement will be in force for a period up to December 31, 2028, and thereafter, the agreement will be extended automatically for additional periods of 5 years each, unless either of the parties gives notice of its desire to terminate the agreement by giving notice in advance of 24 months before each automatic renewal. Despite the aforesaid, as from the end of a period of 8 years from the entry of the agreement into force, it may be cancelled by either of the parties, in accordance with their own judgment and by giving two years notice in advance from that time. The agreement also sets a mechanism for the separating of the parties in the event of the termination of the agreement.

In consideration for the agreement, HOT Mobile will pay a non-recurring amount, which is to be paid by the beginning of 2017, and thereafter, each party will bear half of the capital investments that are required to set up and to upgrade the joint network and the bearing of the operating expenses for the joint network will be in accordance with a mechanism that is set in the agreement and which is based, inter alia, on the volume of the data traffic that each party consumes from the joint network.

As an interim stage and until the receipt of the approvals that are required under the law, Partner will extend to HOT Mobile the right to use its cellular communications network for the purposes of the provision of brad national cover to its customers. The services under the agreement will apply after the completion of the preparations and in accordance with any agreement or regulation.

In the light of the commitment with Partner in connection with the in-country roaming services, HOT Mobile and Pelephone Telecommunications Ltd. (with which HOT Mobile had entered into an exclusive agreement in the past for in-country roaming services up to December 31, 2014) reached agreement regarding the cancellation of the exclusivity clause.

16. In the reporting period, the management of HOT Mobile Ltd. (hereinafter—HOT Mobile), made a decision regarding the vacation of its offices at Airport City, in respect of which there is a long-term rental contract with Airport City, for the period up to and including 2019. As a result of this decision, HOT has recognized losses of EUR 7.1 million in the reporting period, which have been recorded under other expenses, reflecting the rental expenses, taxes and amortization of leasehold improvements, which in HOT Mobile's assessment are irrecoverable, and which meet the definition of an onerous contract.

17. Capitalized leasing rights on land from the Israel Lands Authority

Capitalized leasing rights on land from the Israel Lands Authority over an area of 20,713 square meters on which the Group's buildings are located. The amount that is attributed to the capitalized rights is presented as a prepaid expenses in respect of operating leases in the balance sheet and is amortized over the period of the leases. See also Note 2K. The lease periods end in the years 2021-2045.

C. Guarantees and liens

1. As collateral for HOT's commitments vis-à-vis the parent company under the credit agreement with it, the following charges have been placed

   a) A floating charge on HOT's assets.

32—Contractual obligations and commercial commitments (Continued)

b) A fixed charge on the shares in the subsidiary companies.

c) HOT Telecom has given a charge on some of its assets.

The said charges are in an unlimited amount, vis-à-vis HOT, the investee partnership—HOT Telecom and the subsidiary company—HOT Net, jointly and severally.

2. As collateral for the commitments of HOT, the investee partnership HOT Telecom and the subsidiary company HOT Net, first ranking floating charges have been placed in unlimited amounts in favor of the borrowers, on all of the assets and the rights belonging to debtors of companies in the Group and a fixed charge on the goodwill and the unpaid share capital of the Companies in the Group.

3. As collateral for HOT's commitments in respect of the royalties agreement, as set forth in section B(1) above, a second ranking floating charge has been placed in favor of the State.

4. As collateral for the Group's commitments, as determined in the Group's licenses and in the decisions by the Director and the Council, the Group has issued a number of guarantees, as follows:

a) Bank guarantees to the Ministry of Communications, in respect of the national operator license that was granted to HOT Telecom amounting to 8.4 million Dollars, in force until December 2017 and December 2025.

b) Guarantees in an amount of EUR 7.1 million (index-linked) to the Council in respect of the broadcasting license, which are in force until May 2015.

5. HOT has given a number of bank guarantees to various bodies in an overall amount of EUR 6.7 million.

6. Guarantees for HOT Telecom and HOT Mobile

a) The Group has extended guarantees in a cumulative amount of 22 million Dollars as collateral for payments by HOT Telecom to the Cisco company.

b) The Group has extended a guarantee in an amount of EUR 51.5 million (index-linked) as collateral for HOT Telecom's commitments vis-à-vis an interested party with which it has signed a rental agreement.

c) The Group has extended a guarantee in an amount of 36 million Dollars as collateral for HOT Mobile's commitments to Bank Crédit Agricole in connection with transactions with suppliers of equipment.

d) The Group has extended a guarantee in an amount of EUR 2.3 million as collateral for the commitments of HOT Telecom to various bodies.

7. On May 23, 2013, HOT signed on a credit agreement with Bank Discount Le'Israel Ltd., the First International Bank Le'Israel Ltd. and HSBC Bank PLC (hereinafter—the banks and the credit agreement, respectively).

The amounts of the credit are divided into a number of facilities: A working capital facility, which may be exploited by the drawing down of loans in an amount of up to EUR 41.9 million and a credit facility for guarantees in an amount of up to EUR 22 million.

The collateral that exists under the financing agreement that HOT signed with Altice Financing S.A., which is a related party of HOT, will serve as collateral, together with the creation of new, additional liens on HOT's holdings in subsidiary companies and partnerships, except for HOT Mobile. As of the balance sheet date, HOT has taken up a guarantee in an amount of EUR 17.6 million from these facilities, however it has not taken up credit for working capital from these facilities.

32—Contractual obligations and commercial commitments (Continued)

32.2 Cabovisao commitments

32.2.1 Contingent assets

During the year ended December 31, 2013 and the analysis of the Decree-Law n º 123/2009 of 21 May, Cabovisao made the decision not to pay any fees charged by municipalities, in addition to TMDP (Fees due for rights and charges related to the deployment of, passage within or crossing of systems, equipment and other resources of providers of publicly available electronic communications networks and services at a fixed location, of a public or private municipal domain). On December 31, 2013, Cabovisao had outstanding claims against several municipalities, totaling EUR 2.6 million. To present date, the Company received EUR 0.4 million from sixteen municipalities, and executed receivable plan of EUR 1.7 million for the next three years.

32.2.2 Contingent liabilities

a) Bank guarantees

	December 31, 2013
	In millions of euros
Tax Authority	9.6
City Council	0.9
Third Parties	0.1
Total	10.6

b) Commitments with third parties to add services to be provided in future years:

On December 31, 2013, the commitments with third parties to tangible assets and services to be provided in future years with an amount to approximately EUR 2.7 million Euros and EUR 65.7 million respectively.

c) Real guarantees:

During the year ended December 31, 2013, considering the refinancing and debt restructuring operations performed by Altice Group, headed by Altice VII S.à r.l., Cabovisao has signed a collateral agreement which involved the pledge of some Cabovisao's bank accounts, as well as a pledge on the Cabovisao's shares (representing 100% of Cabovisao's share capital and respective voting rights).

d) Other contingent liabilities:

As a result of the Cabovisao's decision to do not pay any taxes charged by municipalities (since September 2010), the municipality of Almada initiated a litigation process, regarding the municipality taxes charged for the period between 2006 and 2009, in the amount of EUR 595.000.. Until the present date, there are no subsequent deliberations. The Board of Managers understands that the final outcome will be favorable to Cabovisao, based on the legal counsels' opinion.

In addition, there are several legal proceedings, initiated by third parties, in particular claims by several suppliers, related to the supply of services and equipment, in the amount of approximately EUR 174.000. Until the present date, Cabovisao has not recognized any provision, since it is Board of Managers understanding that the final outcome will be favorable to the company, based on the legal counsels' opinion.

32—Contractual obligations and commercial commitments (Continued)

32.3 Coditel Holding commitments

As of December 31, 2013, off balance sheet commitments include:

The shares, bank accounts and receivables of Coditel Brabant S.p.r.l. and Coditel S.à r.l. have been pledged in the framework of the Coditel facility. Coditel Holding is not allowed to pledge these assets as security for other borrowings or to sell them to another entity.

32.4 Others

The shares, bank accounts and receivables of Altice VII and its following subsidiaries Altice Finco S.A., Altice Financing S.A., Altice Holdings S.à r.l., Altice West Europe S.à r.l., Altice Portugal S.A., Altice Carribean S. à r.l., Cool Holdings LTD S.A., H.Hadaros 2012 LTD., HOT Telecommunications System LTD, Cabovisao S.A., Altice Blue Two S.A.S. and its subsidiaries, Coditel Holding S.A., Winreason S.G.P.S and its subsidiaries have been pledged for the issued Senior Secured Notes and the Altice financing term loan. The Company is not allowed to pledge these assets as security for other borrowings or to sell them to another entity.

Altice financing has access to two super senior secured revolving credit facilities amounting to a total of USD 80 million and EUR 60 million respectively. In addition to these facilities, it also has access to a guarantee facility of EUR 75 million. As of December 31, 2013 the revolving credit facilities remain undrawn. EUR 8.4 million were drawn down on the guarantee facility, and recorded in the accounts of Cabovisao. All pledges applicable for the senior secured notes and the term loan are also applicable to these facilities.

33—Statutory Auditors' fees

In 2013, an amount of EUR 3.5 million was paid to various networks affiliates of the Group's auditors, split mainly between EUR 1.4 million for audit services, EUR 1.7 million for assurance services and EUR 0.4 million for non-audit services (tax and consultancy).

34—Going concern

During the financial year ended December 31, 2013, the company had a net current asset position of EUR 855.7 million (mainly due to current restricted cash of EUR 1,242.7 million), a net loss of EUR 208.3 million (down from a net loss of EUR 189.8 million in FY12), positive cash flow from operations of EUR 439.2 million and negative working capital of EUR 198.3 million. The positive cash flow from operations balance was mainly due to strong earnings growth and EBITDA generation. The net working capital of EUR 198.3 million is mainly driven by trade receivables and payables. The net loss recorded in FY13 was mainly driven by increased non-recurring expenses as compared to FY12 (+EUR 40.4 million) and increased financial expense, directly related to the issuance of new debt to finance acquisitions and buy back of minority stakes. The negative working capital position is structural and follows industry norms. Customers generally pay subscription revenues early or mid-month, with short DSOs (Days of Sales Outstanding) and suppliers are paid in the beginning of the following month, thus generating a negative working capital, as evidenced by the difference in the level of receivables and payables (EUR 194.0 million vs. EUR 392.3 million). Payables due the following month are covered by revenues and operating cash (if needed). As of December 31, 2013, the company had few short term loan payments (< 1y), and long term debt was refinanced in June 2013.

Despite the net current liability position, Management is of the view that the company will continue to act as a going concern for 12 months from the date of approval of these financial statements based on the following:

The Group has a strong track record of generating positive operating income before amortisation and depreciation and generated strong positive operating cash flows in 2013 (EUR 439.2 million). Operating income before D&A amounted to EUR 518.8 million, an increase of 28.7% compared to FY12, thus reaffirming management's ability to drive profits in the different operating companies.

34—Going concern (Continued)

The Group had healthy unrestricted cash reserves at the end of 2013 (EUR 61.3 million vs. EUR 129.7 million in 2012), which would allow it to cover any urgent cash needs. Additionally, the Group had access to a revolving credit facility (''RCF'') of up to USD 80.0 million and EUR 63.8 million (EUR 124 million equivalent), as well as access to a guarantee facility of up to EUR 75 million (of which EUR 8.4 million were drawn in FY2013 in order to unblock restricted cash at Cabovisao).

The Group had a negative net equity position of EUR 261.2 million as of December 31, 2013, resulting from accounting adjustments related to losses made on the acquisition of minority interests from non-controlling shareholders. It is management's view that these acquisitions have a strategic founding and will allow the Group to better integrate, absorb and utilize the cash generated by the concerned entities.

In addition to the points enumerated above, the Group has implemented a new budgeting exercise, with monthly account reviews with CFOs of operating companies to track budget accuracy. This exercise is complemented by a mid-year reforecast based on real first semester numbers.

Management also tracks operational key performance indicators (KPIs) on a weekly basis, thus closely tracking top line trends very closely. This allows management and local CEOs to ensure proper alignment with budget targets and respond with speed and flexibility to counter any unexpected events and ensure that the budgeted targets are met.

In the view of the initial public offering of the newly formed company Altice S.A., the new direct controlling shareholder of Altice VII Sà r.l., it was decided to convert all existing subordinated debt instruments issued by Altice VII and subscribed by Next L.P.., into share capital, before the contribution of Altice VII to Altice S.A. Thus, YPFECs and ALPECs issued by Altice VII were converted into equity at their nominal value, totalling EUR 133.3 million.

35—Events after the reporting period

Acquisition of the Mobius Group

On October 19, 2013, Altice Blue Two (a subsidiary of Altice VII) entered into an agreement pursuant to which Altice Blue Two will acquire the Mobius Group (the ''Mobius Acquisition''). The Mobius Group is a telecommunications operator in the Overseas Territory of La Reunion, providing Internet access to professional clients under the ''Mobius Technology'' brand and double and triple play services based on xDSL technology to residential customers under the ''IZI'' brand. The consummation of the Mobius Acquisition is expected to occur on January 15, 2014. Pursuant to an investment agreement dated October 19, 2013, certain managers of the Mobius Group (the ''Mobius Managers'') have agreed to reinvest a portion of the proceeds received from the Mobius Acquisition (approximately EUR 4.6 million) in Altice Blue Two. As a consequence of such reinvestment, the equity interest held by Altice Caribbean in Altice Blue Two would be reduced to approximately 77%. However, Altice Blue Two and the Mobius Managers are in advanced discussions to amend the existing investment agreement in order to provide that the Mobius Managers' reinvestment will be made directly in Altice S.A., through the subscription by the Mobius Managers, at the Offer Price, of Ordinary Shares of Altice S.A..

The transaction was completed on January 15, 2014 and was financed via the super senior revolving credit facility that the company has access to. A total of EUR 20.5 million was drawn from the RCF to finance the acquisition.

Conversion of Altice VII subordinated debts

On January 31, 2014, Next L.P. converted all subordinated debt instruments held against Altice VII S.à.r.l, before the planned initial public offering of Altice S.A., in exchange for common shares in the newly listed entity. All outstanding YFPECs and ALPECs issued by Altice VII were converted at their nominal value of EUR 133.2 million, which was directly attributed to the net equity of the company.

35—Events after the reporting period (Continued)

Initial public offering

On January 31, 2014, Altice S.A., a newly incorporated Luxembourg based entity and the new direct controlling shareholder of the Company, listed its shares in an initial public offering on Euronext Amsterdam.

Change in minority interests of Altice Blue Two

In January 2014, the Company entered into discussion with the management of Outremer Telecom (''OMT Managers''), holders of a 23% stake in Altice Blue Two, the holding company controlling Outremer Telecom, WSG and MTVC, to exchange their existing shares in Altice Blue Two S.A.S against shares in the newly floated mother company of Altice VII, Altice S.A.

As per the agreement, the OMT Managers will contribute all their shares held in Altice Blue Two and OMT Ocean 3 (an investment vehicle held by certain members of OMT's senior management), for a base value of EUR 55.1 million and two separate earn out clauses that would become applicable only upon the achievement of certain operational and financial targets and the settlement of certain lawsuits.

The OMT managers will receive Altice S.A. common shares at the listing price at IPO (EUR 28.25), except in case of the second earn out, for which the determining price will be the share price at closing on the day on which any proceeds from the pending lawsuits are perceived by Altice Blue Two.

Acquisition of the Tricom Group

On March 12, 2014 the Group obtained control of Tricom S.A. and Global Interlink Ltd. (together, ''Tricom''), a leading telecommunications operator in the Dominican Republic, providing (i) cable and xDSL-based multiple-play services and stand-alone pay television, broadband Internet and fixed-line telephony services and (ii) 3G and 4G mobile telephony services relying on its mobile network. This acquisition enables the Group to expand its footprint in the Carribean and more especially in the Dominican Republic. Control was obtained upon approval from Indotel, the Dominican Republic antitrust authority. As of the date of the transfer of the shares, the Group acquired 96% of the total equity in Tricom S.A. and 92% of the outstanding interests in Global Interlinks.

For the year ended December 31, 2013, Tricom would have contributed EUR 158.3 million to revenue and EUR 19.9 million to operating profit to the Group's results, if it had been purchased on January 1, 2013 (these figures are based on unaudited US GAAP figures).

The following summarises certain of the major classes of consideration transferred and the provisionally determined amounts of identifiable assets and liabilities assumed at the acquisition date:

Total consideration paid to the vendors for the shares of Tricom amounted to €291.3 million, using the proceeds raised in December 2013.

The total value of assets transferred in consideration for the values mentioned above amounted to EUR 145.7 million, comprising mainly of intangible assets for a net value of EUR 21.0 million, property, plant and equipment for a total value of EUR 133.8 million and trade receivables for a total amount of EUR 16.5 million. Total liabilities amounted to €97.9 million, comprising of EUR 45.1 of non-current liabilities and EUR 52.8 million of current liabilities. The residual value of EUR 145.6 million was recognised provisionally as goodwill (these figures are based on unaudited US GAAP figures).

The values of the assets and liabilities assumed have been determined on a provisional basis until the Group finalizes its assessment of the fair valuation of the identifiable assets and liabilities assumed and shall complete this exercise within twelve months from the acquisition date.

Goodwill has been recognised as a result of the acquisition as follows:

Total consideration transferred	EUR 291.3 million
Fair value of identifiable assets and liabilities	EUR (145.7) million
Goodwill	EUR 145.6 million

ALTICE VII S.à r.l.

Société à responsabilité limitée

2012 Annual Report

REPORT OF THE REVISEUR D'ENTREPRISES AGREE

To the Partners of
Altice VII S.à r.l.
3, boulevard Royal
L-2449 Luxembourg
Grand-Duchy of Luxembourg

Report on the consolidated financial statements

Following our appointment by the Board of Managers, we have audited the accompanying consolidated financial statements of Altice VII S.à r.l., which comprise the consolidated statement of financial position as at December 31, 2012, and the consolidated statements of income, comprehensive income, changes in equity and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

Responsibility of the Board of Managers for the consolidated financial statements

The Board of Managers is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards as adopted in the European Union, and for such internal control as the Board of Managers determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Responsibility of the réviseur d'entreprises agréé

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing as adopted for Luxembourg by the *Commission de Surveillance du Secteur Financier*. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the *réviseur d'entreprises agréé*'s judgement including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the *réviseur d'entreprises agréé* considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the Board of Managers, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements give a true and fair view of the consolidated financial position of Altice VII S.à r.l. as of December 31, 2012, and of its consolidated financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted in the European Union.

Report on other legal and regulatory requirements

The consolidated management report, which is the responsibility of the Board of Managers, is consistent with the consolidated financial statements.

For Deloitte Audit, *Cabinet de révision agréé*

John Psaila, *Réviseur d'entreprises agréé*

The accompanying notes form an integral part of these consolidated financial statements.

1—Notes to the consolidated financial statements

1.1 General description of the Group and its activities

Altice VII (the ''Company'') is a private limited liability company (*société à responsabilité limitée*) incorporated under the laws of the Grand Duchy of Luxembourg on December 15, 2008, and registered under the number B 143.725 in Luxembourg. The Group refers to the Company and it subsidiaries. The Company was initially established as a public limited company (société anonyme) and then converted to a private limited liability company on October 7, 2009.

The registered office of the Company is established at 3, boulevard Royal, L-2449 Luxembourg, and its sole equity holder is NEXT LP. The ultimate controlling party is considered to be Patrick Drahi.

The Group offers a variety of services over its cable and mobile infrastructure, including, but not limited to, pay television, broadband Internet access, fixed-line telephony and mobile telephony to residential customers, and, to a lesser extent, corporate customers, depending on the country. Available cable-based service offerings depend on the bandwidth capacity of its cable networks and whether they have been upgraded for two-way communications. Where possible, the Group intends to deploy the same technologies and equipments across its footprints to deploy economies of scale and common knowledge. In addition, the Group companies aim at sharing skills and best practices across the various operations of the Group.

Television service offerings include basic and premium programming, and, in most markets, incremental product and service offerings such as enhanced pay-per-view programming, including video-on-demand (''VoD'') and near-video-on-demand (''NVoD''), digital video recorders (''DVR''), high definition (''HD'') television services and, in certain areas, exclusive content, purchased or produced. The Group tailors its basic and premium channel line-up to each country of operation according to culture, demographics, programming preferences and local regulation. The Group also offers broadband Internet access services and fixed-line telephony in all of its broadband communications markets. It also owns and operates mobile infrastructures in certain geographies (Israel and the French Overseas Territories), and offers mobile services through an MVNO (Mobile virtual network operator) arrangement in Belgium.

2—Principles governing the preparation of the Consolidated Financial Statement

2.1 Basis of preparation of the consolidated financial statements:

The consolidated financial statements have been prepared on the historical cost basis, except for the liability in respect of share based payment transaction, derivatives and financial instruments at fair value through profit and loss, available for sale financial assets. The principal accounting policies are set out below.

2.1.1 Compliance with accounting standards

The 2012 consolidated financial statements of Altice VII Group, therein ''the Group'', have been prepared in accordance with International Financial Reporting Standards as adopted in the European Union (IFRS).

2.1.2 Standards issued but not yet effective

In its financial statements, the Group has not anticipated the following standards and interpretations, for which application is not mandatory for periods opened from January 1, 2012. Their impact on the Group's financial statements is estimated not to be significant and/or not applicable. This essentially relates to:

IFRIC 20 ''Overdraft expenses''.

IFRS 1 amended ''First application of IFRS'' concerning serious hyperinflation and the abolition of dates set for the first adopters, published by the IASB on December 20, 2010 and adopted by the

2—Principles governing the preparation of the Consolidated Financial Statement (Continued)

European Union on December 29, 2012. Application of this standard is mandatory from January 1, 2013.

2.2 Significant accounting judgments and estimates used in the preparation of the financial statements

2.2.1 Judgments

In the process of applying the significant accounting policies, the Group has exercised its judgment and has taken into account matters which have the most significant impact on the amounts that have been recognized in the consolidated financial statements.

2.2.2 Estimates and assumptions

The preparation of the financial statements requires the Group to make estimates and assumptions that have an effect on the application of the accounting policies and on the reported amounts of assets, liabilities, revenues and expenses. These estimates and underlying assumptions are reviewed regularly. Changes in accounting estimates are reported in the period in which the estimate changes.

2.2.3 Impairment of goodwill

Determining whether goodwill is impaired requires an estimation of the value in use of the cash-generating units to which goodwill has been allocated. The value in use calculation requires the managers to estimate the future cash flows expected to arise from the cash-generating unit and a suitable discount rate in order to calculate present value. Where the actual future cash flows are less than expected, a material impairment loss may arise.

The carrying amount of goodwill as at December 31, 2012 was EUR 790,9 million (December 31, 2011: EUR 911,9 million). Details of the impairments are set out in Note 2.8.

2.2.4 Legal claims

In estimating the likelihood of outcome of legal claims filed against the Group and its investees, the Group companies rely on the opinion of their legal counsel. These estimates are based on the legal counsel's best professional judgment, taking into account the stage of proceedings and historical legal precedents in respect of the different issues. Since the outcome of the claims will be determined in courts, the results could differ from these estimates.

2.2.5 Post-employment benefits

The liability in respect of post-employment defined benefit plans is determined using actuarial valuations. The actuarial valuation involves making assumptions about, among others, discount rates, expected rates of return on assets, future salary increases and mortality rates. Due to the long-term nature of these plans, such estimates are subject to uncertainty.

2.2.6 Deferred tax asset

Deferred tax assets are recognized for deductible temporary differences and carried forward tax losses as and when management estimates that it is probable that future taxable profits will be available to utilize those temporary differences and tax losses.

2.2.7 Discounting of YFPEC

The Group has loans with its equity holder which are currently non-interest bearing and therefore considered as not being at arm's length. In determining the present value, a discount rate of 4,76% has been used.

2—Principles governing the preparation of the Consolidated Financial Statement (Continued)

2.3 Basis of consolidation

2.3.1 Subsidiaries

All companies in which the Group has a controlling interest are fully consolidated. Control exists when the Group has the power, directly or indirectly, to govern the financial and operating policies of an enterprise so as to obtain benefits from its activities. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases.

All intra-group transactions, balances, income and expenses are eliminated in full on consolidation. Non-controlling interests in subsidiaries are identified separately from the Group's equity therein.

2.3.2 Associates

Investments, over which the Group exercises significant influence, but not control, are accounted for under the equity method. Such investees are referred to as ''associates'' throughout these consolidated financial statements.

Significant influence is presumed to exist when the Group holds at least 20% of the voting power in the associates. Associates are initially recognized at cost at acquisition date. The consolidated financial statements include the Group's share of income and expenses, from the date significant influence commences until the date that significant influence ceases.

2.3.3 Dates

The consolidated financial statements of the Group have been prepared as of the same date and for identical periods on an going concern basis. The accounting policies in the financial statements of the subsidiaries have been implemented in a uniform manner throughout the Group.

2.4 Functional currency

The Consolidated Financial Statements are presented in millions of euros. Euro is the functional currency of Altice VII, the parent company, and the presentation currency of the Group as well.

The functional currency, which is the currency that best reflects the economic environment in which the Group operates and conducts its transactions, is separately determined for each Group entity, including an associate accounted for using the equity method, and is used to measure its financial position and operating results.

2.5 Foreign currency translation

The functional currency of the Group is euro. In individual companies, transactions in foreign currencies are recorded at the exchange rate at the date of the transaction. Monetary assets and liabilities in foreign currencies are translated at year-end rates. Any resulting exchange differences are accounted for in the income statement. On consolidation, assets and liabilities of Group entities reported in their functional currencies are translated into euro, the Group's presentation currency, using the year-end exchange rates. Income and expense items are translated into euro at the annual weighted average exchange rate or at the rate of the date the transaction occurred for significant items.

Differences arising from the retranslation of opening net assets of Group entities, together with differences arising from the restatement of the net results for the year of Group entities, are recognized in other comprehensive income.

2—Principles governing the preparation of the Consolidated Financial Statement (Continued)

2.6 Goodwill and business combinations

Business combinations are accounted for in accordance with the purchase method. The acquiree's identifiable assets, liabilities and contingent liabilities that meet the conditions for recognition under IFRS 3 ''Business Combinations'' are recognized at their fair value at acquisition date.

The Group recognizes goodwill as of the acquisition date and is measured as the excess of (a) over (b) as follows :

(a) The aggregate of:

The consideration transferred, which generally requires acquisition-date fair value;

The amount of any non-controlling interests in the acquiree;

In a business combination achieved in stages, the acquisition-date fair value of the acquirer's previously held equity interest in the acquiree;

(b) The net of the acquisition-date balances of the identifiable assets acquired and the liabilities measured in accordance with IFRS 3.

Any excess of the cost of acquisition over the Group's share in the fair value of all identified assets and liabilities is recognized as goodwill.

The goodwill is determined provisionally by the end of the period. The Group recognizes any adjustments to those provisional values within twelve months after the acquisition date.

During the measurement period, the acquirer shall recognize adjustments to the provisional amounts as if the accounting for the business combination had been completed at the acquisition date. Thus, the acquirer shall revise comparative information for prior periods presented in financial statements as needed, including making any change in depreciation, amortization or other income effects recognized in completing the initial accounting.

If the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed exceeds the purchase price, a gain is recognized immediately.

Subsequently, goodwill is measured at its initial amount less recorded accumulated impairment losses. Impairment loss for goodwill is recorded in the income statement as a deduction from operating profit (account ''Depreciation and amortization'') and shall not be reversed subsequently.

Changes in the Group's ownership interests in subsidiaries that do not result in the Group losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the Group's interests and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to owners of the Group.

2.7 Other intangible assets

Intangible assets acquired separately are recorded at cost on initial recognition, with the addition of direct acquisition costs. Intangible assets acquired in a business combination are measured at fair value as of the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and less any accumulated impairment losses. In our Israeli entity, the costs of producing in-house content is also considered to be an intangible assets and recognized at the cost of production of the shows. . Following initial recognition, these intangible assets are carried at cost less any accumulated amortization and less any accumulated impairment losses.

According to management, intangible assets have either definite or indefinite useful lives.

2—Principles governing the preparation of the Consolidated Financial Statement (Continued)

Assets with definite useful lives are amortized over their useful lives and assessed for impairment signs which would indicate impairment in value. The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least once a year. Changes in the expected useful life or the expected pattern of consumption of future economic benefits that are expected to derive from the asset are treated as a change in an accounting estimate which is treated prospectively. The amortization expenses regarding intangible assets with finite useful lives are recognized in the income statement.

The useful lives of the intangible assets are as follows:

	Duration
Software	3 years
Customer relations	7 to 37 years
Licences	5 years
Customer relations with a defined contractual term	3 years
Content costs	3 years
Subscriber purchase costs	based on average duration of subscriptions

Assets with indefinite useful lives are tested for impairment annually as well as there is an indication that it may be impaired by comparing their carrying amount with their recoverable amount.

2.8 Impairment of tangible and intangible assets

Each time events or changes in the economic environment indicate a current risk of impairment of goodwill, other intangible assets, property, plant and equipment and assets in progress, the Group re-examines the value of these assets. In addition, goodwill, other intangible assets with an indefinite useful life, and intangible assets in progress are all subject to an impairment test performed each fiscal year.

This test is performed in order to compare the recoverable amount of an asset to its carrying amount.

An asset's recoverable amount is the higher of an asset's fair value less costs to sell and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. In that case, recoverable amount is determined for the cash-generating unit to which the asset belongs. A Cash Generating Unit (''CGU'') is the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or groups of assets.

The value in use of each asset or group of assets is determined as the discounted value of future cash flows (discounted cash flow method or ''DCF'') by using a discount rate after tax specific to each asset or group of assets concerned.

The fair value less costs to sell is the amount obtained from the sale of the asset or group of assets in an arm's length transaction between knowledgeable and willing parties, less costs to sell.

When the carrying amount of an asset exceeds its recoverable amount, an impairment loss is recognized in the caption ''Depreciation and amortization'' in the income statement. Only impairment loss recognized on assets other than goodwill such as depreciable intangible assets, intangible assets with indefinite useful life and property, plant and equipment, may be reversed.

2.9 Property, plant and equipment

Property, plant and equipment are presented at cost with the addition of direct purchase costs and less accumulated depreciation and accumulated losses on impairment and they do not include routine maintenance expenses. The cost includes spare parts and ancillary equipment that can only be used in connection with the plant and machinery.

2—Principles governing the preparation of the Consolidated Financial Statement (Continued)

Depreciation is calculated using the straight line method over the estimated useful lives of the assets, as follows:

	Duration
Buildings	25 to 50 years
Cables Network	4 to 20 years
Call center (primarily electronic equipment)	5 to 9 years
Converters and modems	7 years
Computers and ancillary equipment	3 to 6 years
Office furniture and equipment	6 to 16 years
Communication network infrastructure	6 to 16 years
Leasehold contracts	see below

Leasehold contracts are depreciated according to the straight line method during the rental period (including the option period for an extension by the Group, which it intends to exercise) or the estimated useful lifetime of the improvement.

Elements of a fixed asset item, having a cost that is significant in comparison to the overall cost of the item, are depreciated separately, using the components method. The depreciation is calculated in accordance with the straight line method at annual rates that are considered to be sufficient in order to depreciate the assets over the length of their estimated useful lives.

The useful life, depreciation method and residual value of an asset are reviewed at least each annually and any changes are accounted for prospectively as a change in accounting estimate.

2.10 Leasing

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

2.10.1 The Group as lessor

Amounts due from lessees under finance leases are recognized as receivables at the amount of the Group's net investment in the leases. Finance lease income is allocated in an accounting periods so as to reflect a constant periodic rate of return on the Group's net investment outstanding in respect of the leases.

Rental income from operating leases is recognized on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognized on a straight-line basis over the lease term.

Rental income from the leasing of customer premises equipment (set up boxes, modems and decoders) is recognized on a straight-line basis over the term of the subscription held by the client. At the end of the contract or in case of voluntary contract termination by the client, this equipment is repossessed and thus remains in the inventory of the Group.

2.10.2 The Group as lessee

Assets held under finance leases are initially recognized as assets of the Group at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the consolidated statement of financial position as a finance lease obligation.

Lease payments are apportioned between finance expenses and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance expenses are recognized immediately in profit or loss, unless they are directly attributable to qualifying assets, in

2—Principles governing the preparation of the Consolidated Financial Statement (Continued)

which case they are capitalized in accordance with the Group's general policy on borrowing costs (see note 2.12 below). Contingent rentals are recognized as expenses in the periods in which they are incurred.

Operating lease payments are recognized as an expense on a straight-line basis over the lease term, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed. Contingent rentals arising under operating leases are recognized as an expense in the period in which they are incurred.

In the event that lease incentives are received to enter into operating leases, such incentives are recognized as a liability. The aggregate benefit of incentives is recognized as a reduction of rental expense on a straight-line basis, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

2.11 Borrowing costs

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized as part of the cost of that asset. According to management, it does not take a substantial period of time to get ready for the intended use because of the incremental deployment of the network. This standard has consequently no impact on the consolidated financial statements.

2.12 Government grants

Government grants are not recognized until there is reasonable assurance that the Group will comply with the conditions attaching to them and that the grants will be received.

Government grants are recognized in profit or loss on a systematic basis over the periods in which the Group recognizes as expenses the related costs for which the grants are intended to compensate. Specifically, government grants whose primary condition is that the Group should purchase, construct or otherwise acquire non-current assets are recognized as deferred revenue in the consolidated statement of financial position and transferred to income statement on a systematic and rational basis over the useful lives of the related assets.

Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Group with no future related costs are recognized in profit or loss in the period in which they become receivable.

The benefit of a government loan at a below-market rate of interest is treated as a government grant, measured as the difference between proceeds received and the fair value of the loan based on prevailing market interest rates.

2.13 Financial assets

The Group classifies financial assets in four categories: available-for-sale, loans and receivables, held-to-maturity and financial assets at fair value through profit and loss. They are classified as current assets and non-current assets according to IAS 1 (''*Presentation of Financial Statements*'').

Purchases and sales of all financial assets are recognized on a trade date basis.

2.13.1 Available-for-sale financial assets

Available-for-sale financial assets are recognized initially at fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset. After initial recognition, they are reported at their fair value. Gains and losses arising from changes in their fair value are recognized directly in equity, until the security is disposed of or is determined to be impaired, at which time the cumulative gain or loss previously recognized in equity is included in the profit or loss for the period.

2—Principles governing the preparation of the Consolidated Financial Statement (Continued)

Available-for-sale financial assets consist mainly of shares in non-consolidated companies. Fair value corresponds to quote price for listed securities. For non-listed securities, and when a reliable estimate of fair value cannot be made using valuation techniques, the Group values financial assets at historical cost, less any impairment losses.

When there is objective evidence that available-for-sale assets are impaired, the cumulative impairment loss included in equity is reclassified from other comprehensive income to income. Objective evidence that an available-for-sale financial asset is impaired includes, among other things, a decrease in the estimated future cash flows arising from these assets, as a result of significant financial difficulty of the issuer, a material decrease in expected future profitability or a prolonged decrease in the fair value of the security. Impairment losses recognized in profit or loss for equity instruments classified as available-for-sale are never reversed through profit or loss.

2.13.2 Loans and receivables

Loans and receivables are recognized initially at fair value plus transaction costs that are directly attributable to the acquisition. After initial recognition, they are measured at amortized cost using the effective interest rate method.

This category mainly includes trade receivables.

If there is objective evidence that an impairment loss has occurred, the amount of this loss, measured as the difference between the financial assets' carrying value and its recoverable amount is recognized in the income statement. Impairment losses may be reversed if the recoverable amount of the asset subsequently increases in the future.

2.13.3 Held-to-maturity financial assets

Held-to-maturity financial assets are financial assets with fixed or determinable payments and fixed maturity that the Group has both the intention and ability to hold to maturity. Financial assets that are designated as held-to-maturity are measured at amortized cost, in accordance with the effective interest rate method.

They are reviewed for impairment on an individual basis if there is any indication that they may be impaired.

The Group currently does not hold any held to maturity financial assets.

2.13.4 Financial assets measured at fair value through profit or loss

These financial assets are measured at fair value with gains and losses recorded as finance income and costs.

This category mainly includes:

Assets held for trading which the Group intends to sell in the near future (primarily marketable securities);

Assets voluntarily classified at inception in this category;

Derivatives financial assets.

2.14 Inventories

Inventories are measured at the lower of cost and net realizable value. The cost of inventories comprises costs of purchase and costs incurred in bringing the inventories to their present location and condition. Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated selling costs.

2—Principles governing the preparation of the Consolidated Financial Statement (Continued)

Cost of inventories is determined using the weighted average cost method.

The Group periodically evaluates the condition and age of inventories and makes provisions for slow moving inventories accordingly.

2.15 Cash and cash equivalents

Cash consists of cash in banks and deposits.

Cash equivalents are considered as highly liquid investments, including unrestricted short-term bank deposits with an original maturity of three months or less from the date of acquisition or with a maturity of more than three months, but which are redeemable on demand without penalty and which form part of the Group's cash management.

2.16 Restricted cash

Restricted cash is considered to be cash that is dedicated to the repayment of the Group's liabilities to banking entities in accordance with the Group's credit agreement.

2.17 Derivatives

Derivatives are initially recognized at fair value on the date a derivative contract is entered into and are subsequently reassessed at their fair value.

The Group enters into interest rate swaps and caps to manage its interest or foreign currency exchange rate exposure. These contracts do not qualify as hedges for accounting purposes according to IAS 39, as there was no formal designation and documentation of the hedging relationship at inception. Changes in the fair value of any of these derivative instruments are recognized immediately in the income statement within financial income and expenses.

2.18 Share based payment arrangements

The Group's employees are entitled to remuneration in the form of equity-settled share-based payment transactions and certain employees are entitled to remuneration in the form of cash-settled share-based payment transactions that are measured based on the increase in the Group's share price. These stock options based remunerations mainly concerned the Israeli entity, HOT Telecom and these plans were terminated post the take private of the company in December 2012 and the delisting of all active shares of HOT Telecom in the Tel Aviv stock exchange.

2.19 Financial liabilities

Financial liabilities other than derivative instruments include:

2.19.1 Financial liabilities at amortized cost

These financial liabilities are measured at amortized cost calculated based on the effective interest rate method according to IAS 39. The effective interest rate is the internal yield rate that exactly discounts future cash flows through the term of the financial liability. Fees, debt issuance and transaction costs are included in the calculation of the effective interest rate over the expected life of the instrument. The accrued interests are included in ''Current portion of financial liabilities'' in the statement of financial position.

2.19.2 Financial liabilities that are measured at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities classified as held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss.

2—Principles governing the preparation of the Consolidated Financial Statement (Continued)

Financial liabilities are classified as held for trading if they are acquired for the purpose of sale in the near term. Gains or losses on liabilities held for trading are recognized in profit or loss.

Derivatives, including bifurcated embedded derivatives, are classified as held for trading unless they are designated as effective hedging instruments. In the event of a financial instrument that contains one or more embedded derivatives, the entire combined instrument may be designated as a financial liability at fair value through profit or loss only upon initial recognition.

The Group assesses whether embedded derivatives are required to be bifurcated from host contracts when the Group first becomes party to the contract. Reassessment only occurs if there is a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required.

The fair value of financial instruments that are traded in an active market is determined by reference to quoted market prices at the close of business on the balance sheet date. For financial instruments for which there is no active market, fair value is determined by the use of valuation techniques. Such techniques include evaluation based on transactions that have been executed recently under market terms, reference to the current market value of another instrument, which is substantially the same, discounted cash flow analysis or other valuation models.

2.19.3 Classification as debt or equity

Debt and equity instruments issued by a Group entity are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

2.19.4 Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by a group entity are recognized at the proceeds received, net of direct issue costs.

Repurchase of the Company's own equity instruments is recognized and deducted directly in equity. No gain or loss is recognized in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

The Company also issued some CPECs (Convertible Preferred Equity Certificates).

2.20 Other liabilities

2.20.1 Provisions

A provision in accordance with IAS 37 is recognized in the statement of financial position when the Group has a present obligation (legal or implicit) as the result of a past event and it is expected that the use of economic resources will be required in order to settle the obligation and it is possible to reliably estimate it. Where the impact is significant, the provision is measured by discounting the forecasted future cash flows, using a pre-tax interest rate that reflects the expectations of the market in respect of the time frame of the money and in certain cases, the risks that are specific to the liability.

The following types of provisions are recorded in the consolidated financial statements:

2.20.1.1 Legal claims

A provision regarding legal claims is recognized when the Group has a present legal commitment or an implicit commitment resulting from a past event; when it is more likely than not that the Group will be required to expand economic resources to clear the commitment, when it is possible to estimate it reliably and when the effect of time is significant, the provision is measured according to the present value.

2—Principles governing the preparation of the Consolidated Financial Statement (Continued)

2.20.1.2 Warranty

The Group recognizes a provision for warranty for the sale of its products. The warranty is limited to malfunctions as defined by the Group and does not include warranty for damages incurred by the customer.

2.20.1.3 Onerous contracts

Present obligations arising under onerous contracts are recognized and measured as provisions. An onerous contract is considered to exist where the Group has a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received from the contract.

2.20.1.4 Restructuring

A restructuring provision is recognized when the Group has developed a detailed formal plan for the restructuring and has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement the plan or announcing its main features to those affected by it. The measurement of a restructuring provision includes only the direct expenditures arising from the restructuring, which are those amounts that are both necessarily entailed by the restructuring and not associated with the ongoing activities of the entity.

2.20.2 Liabilities for employment benefits

In accordance with the laws and practices of each country in which it operates, the Group participates in, or maintains, several employee benefits. These are as follows:

2.20.2.1 Short-term benefits for employees

Short-term benefits for employees include salaries, vacation pay, sick leave, recuperation pay and employers' deposits for national insurance and are recognized as an expense when the services are provided. A liability in respect of a cash bonus or a profits participation scheme is recognized where the Group has a legal or an implicit commitment to pay the said amount in respect of service that has been provided by the employee in the past and where the amount can be reliably estimated.

2.20.2.2 Post-retirement benefits

In Israel, the Group operates a defined benefits plan in respect of the payment of severance pay in accordance with the Israeli Severance Pay Law. According to this Law, employees are entitled to receive severance pay if they are dismissed or on their retirement. The liability in respect of the termination of employee-employer relations is measured in accordance with the actuarial value of a forecast unit of entitlement method. The actuarial calculation takes into account increases in salaries in the future and the rate at which employees leave the Group and this on the basis of an estimate of the timing of the payment. The amounts are presented on the basis of the discounting of the forecast future cash flows, in accordance with government bonds' interest rates, whose repayment dates are close to the period relating to the liability in respect of severance pay.

The Group deposits funds in respect of its severance pay liability, in a routine manner, in pension funds and insurance companies (hereafter—the plan assets). The plan assets are assets that are held by the employee benefits plan for the long-term or in qualifying insurance policies. The plan assets are not available for use by the Group's creditors, and cannot be paid directly to the Group.

The liability regarding employee benefits presented in the statement of financial position represents the present value of the defined benefits obligation less the fair value of the plan assets, and the past service costs. Actuarial gains and losses are reflected in the income statement in the period in which they arise, as part of the salary costs.

2—Principles governing the preparation of the Consolidated Financial Statement (Continued)

The Group has defined contribution plans pursuant to the Severance Pay Law under which the Group pays fixed contributions and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient amounts to pay all employee benefits relating to employee service in the current and prior periods. Contributions to the defined contribution plan in respect of severance or retirement pay are recognized as an expense when contributed simultaneously with receiving the employee's services and no additional provision is required in the financial statements.

2.20.2.3 Other long-term employee benefits

The Group's employees are entitled to benefits and other long-service grants. These benefits are accounted for as other long-term benefits since the Group estimates that these benefits will be used and the respective Group's obligation will be settled during the employment period and after one year from the end of the reporting period.

The Group's net obligation regarding other long-term employee benefits is in respect of the future benefit amount due to employees for services rendered in current and prior periods. This amount of benefits is discounted to its present value and the fair value of the assets relating to this obligation is deducted from said amount. The discount rate is determined by reference to the yields on Government bonds whose currency and term are consistent with the currency and term of the Group's obligation. The obligation is calculated using the projected unit credit method. The projected unit credit method sees each period of service as giving rise to an additional unit of benefits and entitlements and measures each unit separately to build up the final obligation. Actuarial gains and losses are recognized in profit or loss in the period in which they occur.

2.20.2.4 Benefits in respect of the termination of employment

Severance pay for employees is reflected as an expense when the Group has made an undertaking, with no real possibility of cancellation, for the dismissal of employees before they reach the customary retirement age in accordance with a detailed formal plan. The benefits that are given to the employees who take voluntary retirement when the Group has offered the employees a plan that encourages voluntary retirement, it is expected that the offer will be accepted and the number of persons accepting the offer can be reliably estimated.

2.21 Income taxes

Taxes on income in the income statement include current taxes and deferred taxes. The tax expenses or income in respect of current taxes or deferred taxes are recognized in profit or loss unless they relate to items that are recorded directly in equity, in these cases the tax effect is reflected under the other comprehensive income items.

2.21.1 Current taxes

The current tax liability is measured using the tax rates and tax laws that have been enacted or substantively enacted by the end of reporting period as well as adjustments required in connection with the tax liability in respect of previous years.

2.21.2 Deferred taxes

Differences existing at closing between the tax base value of assets and liabilities and their carrying value in the Consolidated Statement of Financial Position give rise to temporary differences. Pursuant to the liability method, these temporary differences result in the accounting of:

Deferred tax assets, when the tax base value is greater than the carrying value (expected future tax saving),

2—Principles governing the preparation of the Consolidated Financial Statement (Continued)

Deferred tax liabilities, when the tax base value is lower than the carrying value (expected future tax expense).

Deferred tax assets and liabilities are measured at the expected tax rates for the year during which the asset will be realized or the liability settled, based on tax rates (and tax regulations) enacted or substantially enacted by the closing date. They are reviewed at the end of each year, in line with any changes in applicable tax rates.

Deferred tax assets are recognized for all deductible temporary differences, tax loss carry-forwards and unused tax credits, insofar as it is probable that a taxable profit will be available, or when a current tax liability exists to make use of those deductible temporary differences, tax loss carry-forwards and unused tax credits, except where the deferred tax asset associated with the deductible temporary difference is generated by initial recognition of an asset or liability in a transaction which is not a business combination, and that, at the transaction date, does not impact earnings, nor income tax loss or profit.

For deductible temporary differences arising from investments in subsidiaries, joint ventures and other associated entities, deferred tax assets are recorded to the extent that it is probable that the temporary difference will reverse in the foreseeable future and that a taxable profit will be available against which the temporary difference can be utilized.

The carrying value of deferred tax assets is reviewed at each closing date, and revalued or reduced to the extent that it is more or less probable that a taxable profit will be available to allow the deferred tax asset to be utilized. When assessing the probability of a taxable profit being available, account is taken, primarily, of prior years' results, forecasted future results, non-recurring items unlikely to occur in the future and the tax strategy. As such, the assessment of the Group's ability to utilize tax losses carried forward is to a large extent judgment-based. If the future taxable results of the Group proved to differ significantly from those expected, the Group would be required to increase or decrease the carrying value of deferred tax assets with a potentially material impact on the Statement of Financial Position and Income Statement of the Group.

Deferred tax liabilities are recognized for all taxable temporary differences, except where the deferred tax liability results from goodwill or initial recognition of an asset or liability in a transaction which is not a business combination, and that, at the transaction date, does not impact earnings, nor income tax loss or profit.

For taxable temporary differences arising from investments in subsidiaries, joint ventures and other associated entities, deferred tax liabilities are recorded except to the extent that both of the following conditions are satisfied: the parent, investor or venturer is able to control the timing of the reversal of the temporary difference and it is probable that the temporary difference will not be reversed in the foreseeable future.

Current tax and deferred tax shall be charged or credited directly to other comprehensive income, and not earnings, if the tax relates to items that are credited or charged directly to other comprehensive income.

2.22 Revenue recognition

Revenue from the Group's activities is mainly composed of television, broadband Internet, fixed and mobile telephony subscription and installations fees invoiced to residential and business clients.

Revenue comprises the fair value of the consideration received or receivable for the sale of goods and services in the ordinary course of the Group's activities. Revenue is shown net of value-added tax, returns, rebates and discounts and after eliminating intercompany sales within the Group.

Revenues on bundle packages sold by the Group are split into and recognized under each individual service sold in the bundle. For example, tripe play package revenues are booked under 'triple play

2—Principles governing the preparation of the Consolidated Financial Statement (Continued)

television', 'triple play data' and 'triple play telephony' on a straight-line basis over their subscription period and revenues from telephone calls are recognized in revenue when the service is rendered.

Revenue is recognized as follows, in accordance with IAS 18 *Revenue*:

Revenues from subscriptions for basic cable services, digital television pay, Internet and telephony are recognized in revenue on a straight-line basis over the subscription period; revenues from telephone calls are recognized in revenue when the service is rendered.

When a promotion not related to a customer's past consumption and purchases (such as subscription's rate discount, service free period) is offered to customer in relation to a subscription, the Group recognizes the total amount of billable revenue on a straight-line basis over the term of the contract.

Installation and set-up fees (including connection) for residential customers are accounted for as revenues when the service is rendered, if consideration received is lower than the sales direct costs to acquire the contractual relationship. Service access fees for business clients, when they are only allowed access to the services that are sold associated to an equipment or a service, are deferred and the corresponding revenue is recognized along the statistical client lifetime duration and generally spread over the contractual engagement period.

The revenue related to transmission capacity on terrestrial cables under indefeasible rights of use: Indefeasible Rights of Use (''IRU'') arrangements are recognized on a straight-line basis over the life of the contract.

2.23 Operating profit before depreciation and amortization

The Group has included the subtotal ''Operating profit before depreciation and amortization'' on the face of the consolidated statement of income (please refer to the Consolidated Statement of Income). The Group believes that this subtotal is useful to users of the Group's financial statements as it provides them with a measure of the operating results which excludes non-cash elements such as depreciation and amortization as well as non-recurring transactions and management fees, enhancing the predictive value of the Group's financial statements and providing information regarding the results of the Group's ongoing trading activities and cash-flow generation that allows investors to better identify trends in the Group's financial performance.

This non-IFRS measure is used by the Group internally to manage and assess the results of its operations, make decisions with respect to investments and allocation of resources, and assess the performance of management personnel.

The Group's subtotal within operating income may not be comparable to similarly titled measures used by other entities. Further, this measure should not be considered as an alternative for operating income as the effects of depreciation, amortization and impairment, excluded from this measure do ultimately affect the operating results. Similarly, the Group's subtotal do not take into account impact of management fees paid to related parties, in order to better reflect economic underlying of the business operated.

2.24 Finance costs

Finance costs primarily comprise:

interest charges and other expenses paid for financing operations recognized at amortized costs,

changes in the fair value of interest rate derivative instruments that do not qualify as hedges for accounting purposes according to ''IAS 39'',

interest income relating to cash and cash equivalents,

gains on extinguishment of debt.

3—Scope of consolidation (Continued)

3.2 Modification of the scope of consolidation

3.2.1 Main acquisitions in 2012

Altice Portugal S.A. acquired 100% of Cabovisao as at February 29, 2012, from Cogeco Cable Luxembourg Holding S.A.. The consideration amounted to EUR 45 million, of which 40% was subsequently sold to APAX in April 2013.

Goodwill allocation has been completed based on the accounts as at February 28, 2012.

While carrying out the purchase price allocation, the following identifiable assets have been identified:

Brands

The Cabovisao brand has been valued through the royalty relief method over an indefinite useful life and based upon following key parameters:

Discount rate amounts to 7%;

Royalty rate used amounts to 3%, consistent with the rates used for Coditel, Numericable and Everido;

Clients.

The portfolio of clients has been valued through the excess earnings approach, and basing upon following the key parameters:

Ebit margin rate: 21,59%;

Attrition rate: 20,81%;

Discount rate: 7%;

Acquired clients' growth rate: 0%.

3.2.2 Main companies' formation in 2012

The following companies were created during the period: Altice Caribbean S.à r.l., Altice Finco S.A., Altice Financing S.A. and Altice Portugal S.A.

3.3 Acquisitions of businesses

Business combinations that occurred during the reporting period are described in note 3.2.

3—Scope of consolidation (Continued)

The major classes of assets acquired and liabilities assumed at the acquisition date are:

	Total Business Combinations	Cabovisao
	(in millions of euros)	
Cost of acquisition	45,0	45,0
ASSET		
Intangible assets	37,8	37,8
Property, plant and equipment	123,0	123,0
Non-current financial assets	0,9	0,9
Inventories	—	—
Trade accounts receivable and other	6,5	6,5
Tax receivable	0,2	0,2
Cash and cash equivalents	9,0	9,0
Other current assets	1,6	1,6
Total assets	**178,9**	**178,9**
EQUITY AND LIABILITIES		
Non-current liabilities	37,7	37,7
Current liabilities	33,2	33,2

Management monitors its different businesses by geography. The businesses are split into different geographies as mentioned below:

Israel

Belgium and Luxembourg

French overseas Territories

Switzerland

Others

In addition to this geographical split, for the purpose of the testing for impairment of goodwill and intangible assets with an indefinite useful life, the goodwill, brand name and customer relationships have been allocated to the local businesses that represent cash-generating units (CGU) as follows:

WSG

Valvision

Everido

Coditel Brabant

Coditel S.à r.l.

Hot Telecom

4—Goodwill (Continued)

Goodwill is tested at the cash-generating units (''CGU'') level for impairment annually, as of December 31, or whenever changes in circumstances indicate that the carrying amount may not be recoverable. In all cases, the CGU represents the lowest level at which goodwill is monitored for internal management purposes. The recoverable amounts of the CGUs are determined based on their value in use. The key assumptions for the value in use calculations are primarily the discount rates, growth rates, expected changes to telecom prices and direct costs during the period.

The value in use of each CGU was determined by estimating cash flows for a period of five years for the operating activities. Cash flow forecasts are derived from the most recent business plans approved by the Board of Managers. Beyond the specifically forecasted period of five years, the Company extrapolates cash flows for the remaining years based on an estimated constant growth rate between 1,5-2%. This rate does not exceed the average long-term growth rate for the relevant markets. Discount rates have been computed using WACC approach and range from 7% to 7,5%, except in Israel where it ranges from 10-11%.The Board of Managers estimates discount rates using pre-tax rates that reflect current market rates for investments of similar risk. The rate for each CGU was estimated from the weighted average cost of capital.

The Board of Managers has determined the value in use of each cash generating unit, with the assistance of an external appraiser, and as a result of this valuation the Group concluded that the recoverable amount of the Israeli in-country fixed line is lower than its carrying amount and accordingly recorded in the reporting period an impairment of approximately EUR 121,9 million which was recorded as part of section ''depreciation and amortization''.

(1) Customer relations have been valued on the basis of the fair value of the existing customers. The amortization expenses are in accordance with the benefits expected for each customers in each period.

(2) Subscriber purchase costs were recognized in respect of the costs of acquisition of subscribers (including additional sales commissions). The amortization expenses are linked to the length of the average commitment of the subscribers.

The majority of the intangible assets movements for the year ended December 31, 2012 are related to the Cabovisao business combination (see Note 3.3).

(1) Cable network: the Group owns, directly and indirectly through its subsidiaries, cable or fibre network which allow it to supply cable-based pay television, broadband internet and fixed-line telephony services to its subscribers.

(2) Call center represents centralized offices used for the purpose of receiving or transmitting a large volume of administrative, technical or commercial requests by telephone.

(3) Office furniture and equipment refers to furnishings and IT equipment.

(4) The Communication network infrastructure includes the digital technologies for the transmission of multi-channel television services.

Most of the tangible assets increases as of December 31, 2012 is related to the Cabovisao business combination (see Note 3.3).

The additions in capital expenditures come mainly from Hot Telecom activity:

- Modems and converters related capital expenditures represented EUR 69,4 million for the year ended December 31, 2012, as compared to EUR 29,3 million for the year ended December 31, 2011. The increase in converters and modems related capital expenditures resulted from capital expenditure incurred during the first two quarters of 2012 relating to our new set top boxes (HOT Magic HD) for which delivery was delayed and which we had expected to incur during the second quarter of 2011 and did not received until the last quarter of 2011.
- Cable network related (including centers) capital expenditures represented EUR 84 million for the year ended December 31, 2012, as compared to EUR 51.6 million for the year ended December 31, 2011. The increase in our total cable network related (including centers) capital expenditure was as a result of the expenditure incurred to complete the upgrade to 100Mb capacity throughout our cable network and fiber roll out in certain areas in 2012.

7—Financial assets

	December 31, 2012	December 31, 2011
	(in millions of euros)	
Investments held as available for sale(1)	6,1	8,5

Loan term trade receivables(3)	—	—
Restricted cash(2)	—	—
Total Cumulative amortization and depreciation	**—**	**—**
Investments held as available for sale(1)	6,1	8,5
Loan term trade receivables(3)	18,7	2,4
Restricted cash(2)	9,6	41,4
Total Net book value	**34,4**	**52,3**

(1) Investment in available for sale financial asset:

A subsidiary company, operating through Hot Net Internet Services Ltd. (formerly Hot Properties) and Finance Ltd. (hereinafter—Hot Net) holds 1 454 663 regular shares in Partner Communications Ltd. (hereinafter—Partner), constituting approximately 0,9% of Partner's share capital which is engaged in the provision of mobile communications services and whose shares are traded on stock exchanges in the United States of America, in the United Kingdom and in Israel.

Partner's shares are subject to Israeli restrictions in accordance with the Radio Mobile Telephone license that was granted to Partner, in accordance with which the shares can only be sold to an Israeli buyer, as defined in the said license.

The subsidiary companies present the investment in Partner as an investment in an available for sale financial asset, which is measured at fair value.

(2) Restricted cash (see Note 2.18).

As of December 31, 2012 the cash is restricted for the purpose of collateralizing HOT's liabilities to banking entities. The restricted cash has been deposited in financial institutions and as of the statement of financial position date it bears interest based on the interest rate on daily bank deposits.

(3) On July 3, 2012, Altice Africa S.à r.l., as investor, entered into a convertible note purchase agreement with Wananchi Group (Holdings), Ltd (hereafter ''WGH'') for a principal amount of up to EUR 16 million. The promissory notes ((hereafter ''the notes'') plus any interest accrued shall be converted and capitalized into fully paid ordinary shares of WGH before the maturity date on December 31, 2012. In December 2012, it was decided to extend the maturities of the promissory notes till January 31, 2013. Hence the notes were treated as a loan to a related party and accrued interest (15% per annum, retroactive to the date of issue) was recognized on these notes in the accounts.

8—Other long-term trade receivables

	December 31, 2012	December 31, 2011

	(in millions of euros)	
Loans to related party	3,8	1,8
Bank guarantee	14,0	—
Tax and social security receivables	5,5	5,1
Income tax	0,3	—
Prepaid expenses	6,1	4,3
Other current receivables	8,1	10,9
Total	**37,9**	**22,1**

The Group provides services on credit for an average of 16 days, 24 days and 96 days in average to its customers in the cable television field, the in-country fixed line communications field and the mobile communication field, respectively. The Group routinely evaluates the credit that is provided to its customers, while checking their financial situations; however it does not demand collateral for those debts. The Group records a provision for doubtful debts, based on the factors that affect the credit risks of certain customers, past experience and other information.

The increase in other receivables in the year ended December 31, 2012 is mainly explained by an increase in bank guarantees provided by HOT Mobile to the national regulator in Israel, for a total amount of EUR 14 million (NIS 69 million), related to the expansion of its mobile network.

11—Cash and cash equivalents

	December 31, 2012	December 31, 2011
	(in millions of euros)	
Time deposits	5,2	0,1
Bank balances	124,5	19,7

12—Issued capital

On December 31, 2012, the share capital amounts to EUR 7,4 million and is divided into 742 561 510 fully paid shares with a nominal value of EUR 0,01.

	December 31, 2012	December 31, 2011
	(in millions of euros)	
Share capital	7,4	7,4
Total	**7,4**	**7,4**

The details of the different classes of shares are provided in the table below. The Group has defined three share classes; Shares designated with the letters A through H are referred to as specific shares. Shares designated 1A through 1H are referred to as class 1 shares and when grouped together with their corresponding letters (i.e. Class A shares with class 1A shares), form a share category referred to as the

12—Issued capital (Continued)

specific share class ('*classe specifique*'). In addition to this class, the other two classes of shares are: Ordinary shares ('*part sociale ordinaire*') and Class M shares ('*classe M'*) shares. All these shares put together make up the total shares of the Group.

Each specific share class is linked to the investment in the assets of companies acquired by the Group and hence intrinsically linked to the financial performance of these entities (tracking shares). Each specific class allows its holder to obtain a share of the net profit of the Group in a proportion determined by the Board of Managers.

In addition to the profit sharing defined above, the economic benefit arising from investment in any of the specific share classes is determined as follows:

At the end of the financial year, the Group reports a net income from its activities and based on this net income could attribute it to the different specific classes, as if the investment to which they are related were the only asset held by the Group. Any profits arising from this distribution could be credited to a specific account. Thus, a separate account must be maintained for each specific share class.

Dividends may be issued from these accounts only to the holders of the shares linked to each account.

Holders of ordinary and class M shares are eligible to receive a share of profits, if any such profits remain after distribution to the holders of the specific share classes. None of the class of shares are subordinated to each other.

Each share class allows the holder one right to vote in general assembly meetings, provided that there is one single representative holder of the share class. If shares in a class are held by more than one person, the voting right is suspended till the holder designates a single legal representative.

Different classes of shares are summarized below:

	December 31, 2012
Class of corporate units	**Number**
Class A	14 832 900
Class B	71 747 100
Class C	98 886 400
Class D	64 226 800
Class E	98 886 400
Class F	98 886 400
Class G	1 058 610
Class 1A	1 113 600
Class 1B	5 386 000
Class 1C	202 108 900
Class 1D	4 603 900
Class 1E	19 337 000
Class 1F	25 657 900
Class 1O	44 600
Class 1G	79 600
Class M	31 000 000
Class H	742 868
Class 1H	7 132
Ordinary	3 955 400

12—Issued capital (Continued)

December 31, 2011	
Class of corporate units	**Number**
Class A	14 832 900
Class B	71 747 100
Class C	98 886 400
Class D	64 226 800
Class E	98 886 400
Class F	98 886 400
Class G	1 058 610
Class M	31 000 000
Class 1A	1 113 600
Class 1B	5 386 000
Class 1D	4 603 900
Class 1E	19 337 000
Class 1F	25 657 900
Class 1O	44 600
Class 1G	79 600
Ordinary	3 955 400

	December 31, 2012	December 31, 2011
	Number of shares	
Opening balance	**741 811 510**	**783 283 510**
Issuance	750 000	124 200
Redemption	0	(41 596 200)
Closing balance	**742 561 510**	**741 811 510**

In 2012, the extraordinary general meeting of the equity holders decided to conduct three capital increases for a total amount of EUR 0,01 million through the issuance of 742 868 class H units and 7 132 class 1H units.

13—Earnings per share (EPS)

Non diluted EPS for 2012 has been computed dividing 2012's net income by weighted average number of shares as of December 31, 2012.

Diluted EPS for 2012 has been computed based on the assumption that the CPECs (Convertible Preferred Equity Certificates) would be converted at a 1 to 1 ratio.

	December 31, 2012	December 31, 2011
Net income (in millions of euros)	(189,80)	123,90
Non diluted weighted average number of shares	742 417 674	742 417 674
Basic earnings per share	**(0,26)**	**0,17**
Diluted weighted average number of shares	967 944 738	967 944 738
Diluted earnings per share	**(0,20)**	**0,13**

In June 2013, all the different classes of tracking shares were merged into one single class of ordinary shares. No dividends were paid to any of the equity holders during any period since the inception of the Group. The Board of Managers has determined that the disclosure of EPS metrics for each class of share in issuance during 2011 and 2012 is not qualitatively relevant to the users of the financial statements and has hence elected to disclose EPS on the basis of the merged single class of ordinary shares.

14—Reserves

	December 31, 2012	December 31, 2011
	(in millions of euros)	
CPEC'S reclassed in equity	219,1	219,1
Distribution to CPEC's holders	(17,4)	(17,4)
YFPEC'S	22,7	21,6
Employee benefits	0,3	0,2
Currency Translation Reserve	(6,7)	(3,0)
Impact of changes in ownership interests	61,3	13,1
Other	(1,6)	(0,7)
Group reserves	**277,5**	**232,9**

According to the Luxemburg legal provisions, 5% of net profits must be obligatorily credited to a legal reserve account. The obligation to make this contribution ends when the legal reserves equal 10% or more of the share capital of the Group. An allocation to the legal reserve has been performed for the year ended December 31, 2012 for an amount of EUR 277 thousands and is not distributable to the equity holders of the Company.

CPEC, which maturity comprises between 2058 and 2061, increases from EUR 219 million in 2011 to EUR 219,1 million in 2012, due to subscriptions of EUR 0,1 million. In substance, CPECs subordinated financial instruments (about EUR 219,1 million as at the end of 2011) are equity instruments as:

CPECs give issuer the opportunity to avoid delivering cash.

CPECs do not bear interests.

The YFPECs have been valued using a discount rate of 4,76% given its preferred interest rate which therefore values the liabilities at EUR 4,4 million as at December 31, 2012.

The change in impact from changes in ownership structure are explained by the buyout of minority interests in HOT in December 2012, following the take private of HOT (see note 27).

14—Reserves (Continued)

Details of YFPECS (before impact of discounting) and CPECS are presented as follows:

Total				***219,0***	***219,1***

Information on the parameters used to calculate the employee benefits is presented in note 16.

Exchange rate differences relating to the translation of the results and net assets of the Group's foreign operations from their functional currencies to the Group's presentation currency are recognized directly in other comprehensive income and accumulated in the foreign currency translation reserve.

Exchange differences previously accumulated in the foreign currency translation reserve (in respect of translating both the net assets of foreign operations and hedges of foreign operations) are reclassified to profit or loss on the disposal of the foreign operation.

15—Provisions

	December 31, 2011	Business Combinations	Addition	Utilization	Divestitures, changes in foreign currency translation adjustments and other	December 31, 2012
			(in millions of euros)			
Provision for retirement benefits	6,9	—	2,0	(0,8)	1,0	9,1
Litigations[(1)]	38,8	—	1,9	(24,0)	(0,9)	15,8
Other risks[(2)]	1,7	5,0	1,4	(0,1)	(0,1)	8,0
Provisions for other expenses	—	—	1,8	—	—	1,8
TOTAL	**47,4**	**5,1**	**7,1**	**(24,9)**	**0,1**	**34,7**

	December 31, 2010	Business Combinations	Addition	Utilization	Divestitures, changes in foreign currency translation adjustments and other	December 31, 2011
			(in millions of euros)			
Provision for retirement benefits	1,2	5,4	0,4	(2,5)	2,4	6,9
Litigations[(1)]	0,7	67,4	0,7	(26,6)	(3,4)	38,8
Other risks[(2)]	0,8	0,9	—	—	—	1,7

TOTAL	**2,9**	**73,7**	**1,1**	**(29,3)**	**(0,9)**	**47,4**

(1) Provisions for litigations and other risks decreased in FY12 compared to the previous period, mainly driven by a re-evaluation of the risk of pay-out on the various royalty and retransmission fees related lawsuits faced by HOT Telecom in Israel. The reversals on the three major litigations, namely TALI, AKUM and AGICOA, amounted to EUR 3, 13,5 and 3,5 million respectively. The total reversal on provision for litigation was EUR 20 million.

In 2012, HOT Telecom also recorded an additional provision of EUR 1,9 million to cover a contested withholding tax ruling.

(2) No major movements were recorded on provisions for risks in the French Caribbean entities. The increase in provisions for risk in FY12 was mainly attributed to the acquisition of Cabovisao in February 2012. Cabovisao had a provision of EUR 5 million on its statement of financial position to account for potential fines and penalties to be paid resulting from negative outcome on various tax rulings sought by Cabovisao.

16—Employee benefits

Breakdown of the employee benefits by entity:

	Notes	December 31, 2012	December 31, 2011

Solutions 25		2	1,4
Total		**9,1**	**6,9**

16—Employee benefits (Continued)

16.1 Hot Telecom

(a) Defined Benefit Plans

The portion of the severance pay payments that is not covered by deposits, is treated by the Group as a defined benefit plan in accordance with which a liability is recorded in respect of employee benefits, and the Group deposits amounts in central severance pay funds and in appropriate insurance policies in respect of it.

The Group has defined contribution plans, in accordance with section 14 of the Israeli Severance Pay Law, in accordance with which the Group makes regular payments without it having a legal or implicit commitment to pay additional payments even if sufficient funds have not accumulated in the funds to pay all of the benefits to an employee that relate to the employee's employment in the current period and in previous periods.

Deposits in a defined contribution plan in respect of severance pay or in respect of emoluments are recognized as expense at the time of the deposit in the plan, in parallel to the receipt of the labor services from the employee and no additional provision is required in the financial statements.

(b) Expenses reflected in the statement of comprehensive income

17—Borrowings and other financial liabilities (Continued)

17.1 Financial liabilities description

During the year ended December 31, 2012, bonds include the debentures in Hot Telecom:

The Series A' debentures—EUR 167 million (NIS 825 million par value), linked to the Consumer Prices Index for the month of February, 2011, that bear interest at a rate of 3,9% a year. Series A' debentures are repayable in 13 semi-annual payments commencing on September 30, 2012 and up to September 30, 2018.

The Series B' debentures—EUR 137 million (NIS 675 million par value) that bear interest at a fixed rate of 6,9% a year. Series B' debentures are repayable in 13 semi-annual payments commencing on September 30, 2012 and up to September 30, 2018.

Bonds also include Senior and Senior secured Notes in Altice Finco S.A. and Altice Financing S.A.:

The Senior Notes in U.S. dollar, issued by Altice Finco S.A and with a face value of $425,0 million (EUR 322,0 million) mature on December 15, 2020 and bear coupons of 9,875% annually.

The Senior Secured Notes in U.S. dollars, issued by Altice Financing S.A. and with a face value of $460 (EUR 348,5 million) mature on December 15, 2019 and bear coupons of 7,875% annually.

The Senior Secured Notes in Euro, issued by Altice Financing S.A and with a face value of EUR 210 million mature on December 15, 2019 and bear coupons of 8% annually.

The Senior and Senior Secured Notes are listed on the Official List of the Luxembourg Stock Exchange and traded on the Euro MTF Market of the Luxembourg Stock Exchange. The interest payment of the bonds is semi-annually on June 15 and on December 15 of each year and the first payment of the interest will be on June 15, 2013.

17.1.1 Hot Telecom

The unsecured debentures issued on the Tel Aviv stock exchange by the Group's subsidiary Hot Telecom include financial covenants measured on Hot Telecom performance, which mainly include:

a debt to EBITDA ratio, which is not to exceed 6 for a period that exceeds two consecutive quarters;

no distribution of a dividend when Hot Telecom exceeds a debt to EBITDA ratio of 5.5.

As of December 31, 2012, Hot Telecom was in compliance with all of the required financial covenants.

17.1.2 Altice Blue One

As part of the Altice Blue One (''ABO'') financing arranged in 2009, the ABO was required to respect certain covenants calculated on the basis of its consolidated accounts. As of December 31, 2012, the company was in default of financial covenants, though it was not in default of any scheduled payments due to the lenders. As per the debt contracts, one consequence of this default could be early or accelerated repayment of the debts, if and only if such repayments are unanimously reclaimed by all of the lending agencies.

ABO's management does not believe that these covenant defaults affect in any way the ability of the Group to effectively pursue its operations. This hypothesis was supported by advanced level talks with the lending parties, and based on the fact that none of the lenders ever demanded early repayment of the loan. Thus ABO's accounts for 2012 were closed and approved based on the hypothesis outlined above. On July 2, 2013, ABO refinanced the relevant facilities with funds granted by the Group, thereby solving any default situation.

17—Borrowings and other financial liabilities (Continued)

17.1.3 Coditel Holding

Financial covenants have been set for Coditel Holding, in the framework of the financing agreement entered into with a pool of financial institutions on December 2, 2011, based on the consolidated accounts of Coditel Holding S.A..

As of December 31, 2012, Coditel Holding S.A. was in compliance with all of the required financial covenants.

As at December 31, 2012, there were no breaches of covenants for the senior and senior secured notes mentioned in the note above.

17.2 Bonds

Issuer	Fair value in millions of euros December 31, 2012	Effective interest rate	Year of maturity	Carrying amount December 31, 2012	Carrying amount December 31, 2011
Bonds					
Hot Telecom					
—Debentures	269,2	Variable (3,9% and 6,9% + Consumer Price Index)	2018	269,2	291,4

—Senior Secured Notes	516,7	between 7,9% and 9,9%	2019/2020	516,7	
Altice Finco					
—Senior Secured Notes	322,7	between 7,9% and 9,9%	2019/2020	322,7	
Related party bonds					
Altice VII					
—Alpecs	104,6	Variable	2057 to 2061	104,6	69,8
—Yfpecs	4,4	4,76%	2058 to 2061	4,4	4,1
Nominal value of bonds	**1 322,6**			**1 217,6**	**365,3**
Of which due within one year					
Of which due after one year	1 322,6			1 217,6	365,3

The fair value of bonds amounts to EUR 1 322,6 million (2011: EUR 418 million). This value includes accrued interest of EUR 9,02 million on Alpecs (Altice VII) and EUR 8,6 million on Pecs (Coditel holding).

17.3 Related party bonds

Subordinated financial instruments have been issued by Altice VII and Coditel Holding.

(a) Altice VII

Subordinated financial instruments have been issued by Altice VII consists of:

YFPECs: Yield Free Preferred Equity Certificates;

ALPECs: Asset Linked Preferred Equity Certificate;

17—Borrowings and other financial liabilities (Continued)

ALN: Asset Linked Notes.

Conversely, according to our appreciation, and upon a strict application of IAS 32/39, following instruments have to be classified as debt instruments:

ALPECs instruments (about EUR 101,3 Million as at the end of 2012);

YFPECs instruments (about EUR 36,3 Million as at the end of 2012).

The YFPECs have been valued using a discount rate of 4,76% given its preferred interest rate which therefore values the liabilities at EUR 4,4 million as at December 31, 2012.

Details of ALPECs are summarized in the table below:

Name	Maturity date	Interest rate	Convertible	Principal amount as at the end 2011	Principal amount as at the end 2012

(1) Business Unit means any interests and proceeds received by the Issuer by virtue of the Subsidiary's PECs. Each instrument class is linked to the acquisition of a specific asset. This asset makes up the business unit mentioned earlier in the footnote.

(b) Coditel Holding

Subordinated financial instruments in Coditel Holding S.A. consist of PECs (Preferred Equity Certificates). Each PEC bears a yield and shall have a maturity of 49 years.

As at the end of 2012, the total of PECs instruments amounts to EUR 61,8 million (including interests):

Name	Issuing date	Maturity date	Number of instruments	Nominal value per instrument in euro	Interest rate	Convertible	Amount as at the end of 2011	Amount as at the end of 2012
			(in millions)	(in euro)			(in millions of euros)—including interests

17.7 Coditel Holding swaps

As of December 31, 2012, off balance sheet commitments include:

The shares, bank accounts and receivables of Coditel Brabant S.p.r.l. and Coditel S.à r.l. have been pledged. Coditel Holding is not allowed to pledge these assets as security for other borrowings or to sell them to another entity.

On February 2012, Coditel Holding has concluded the following swap transactions:

- a swap transaction with ING amounting to EUR 35 million with a maturity date on March 31, 2015 and an interest rate composed of a fixed rate of 0,770% and an EUR-euribor-reuters floating rate;

17—Borrowings and other financial liabilities (Continued)

- a swap transaction with ING amounting to EUR 17,5 million with a maturity date on March 31, 2015 a fixed rate of 0,775% and an EUR-euribor-reuters floating rate;
- a swap transaction with ING amounting to EUR 50 million with a maturity date on March 31, 2015 a fixed rate of 0,710% and an EUR-euribor-reuters floating rate;
- a swap transaction with KBC amounting to EUR 20 million with a maturity date on March 31, 2015 a fixed rate of 0,755% and an EUR-euribor-reuters floating rate;
- a swap transaction with HSBC amounting to EUR 17 million with a maturity date on March 31, 2015 a fixed rate of 0,770% and an EUR-euribor-reuters floating rate.

18—Financial risk factors

In the course of its business, the Group is exposed to a number of financial risks: credit risk, liquidity risk, market risk (including foreign currency risk and interest rate risk), commodity price risk and other risks (including equity price risk and settlement risk). This note presents the Group's objectives, policies and processes for managing its financial risk and capital.

Financial risk management is an integral part of the way the Group is managed. The Board of Managers establishes the Group's financial policies and the Chief Executive Officer establishes objectives in line with these policies.

The Group is not subject to any externally imposed capital requirements.

18.1 Credit risk

The Group does not have significant concentrations of credit risk. The credit risk may arise from the exposures of commitments under a number of financial instruments with one body or as the result of commitments with a number of Groups of debtors with similar economic characteristics, whose ability to meet their commitments could be similarly affected by economic or other changes.

Qualities that could cause a concentration of risk include the significance of the activities that the debtors are involved in, such as the branch in which the geographical region in which they conduct their activities and the level of their financial stability.

The Group's income mainly derives from customers in Israel, in the French Overseas Territories and in Europe (Belgium, Luxembourg, Portugal and Switzerland). The Group regularly monitors its customers' debts and provisions for doubtful debts are recorded in the financial statements, which provide a fair value of the loss that is inherent to debts whose collection lies in doubt.

The Group does not have significant concentration of credit risk, as a result of the Group's policy, which ensures that the sales are mostly made under standing orders or via credit cards.

18.2 Liquidity risk

Ultimate responsibility for liquidity risk management rests with management, which have established an appropriate liquidity risk management framework for the management of the short, medium and long-term funding and liquidity management requirements of the Group. The Group manages liquidity risk by maintaining adequate reserves, banking facilities and reserves borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

18.3 Market risks

The Group is exposed to risk from movements in foreign currency exchange rates, interest rates and market prices that affect its assets, liabilities and anticipated future transactions.

18—Financial risk factors (Continued)

18.3.1 Interest rate risk

Interest rate risk comprises the interest price risk that results from borrowings at fixed rates and the interest cash flow risk that results from borrowings at variable rates.

The Group has an exposure to risk in respect of changes in the interest rate in the market, deriving from long-term loans that have been received and which bear variable rate interest.

Interest structure of non-current financial debt (including interest effects of derivatives):

	December 31, 2012	December 31, 2011
	(in millions of euros)	
Financial debt at fixed rates	1 484,8	404,6
Financial debt at variable rates	287,1	834,6
TOTAL	**1,771,9**	**1,239,2**

18.3.2 Israeli CPI risk

The Group has borrowed from banks and issued debentures that are linked to the changes in the Israeli CPI. Also, the Group has deposits and gave loans that are linked to the changes in the Israeli CPI. The net amount of the financial instruments that are linked to the Israeli CPI and for which the Group is exposed to changes in the Israeli CPI amounted to approximately EUR 247 million as of December 31, 2012.

18.3.3 Foreign currency risk

The Group is exposed to foreign currency risk from transactions and translation. Transactional exposures are managed within a prudent and systematic hedging policy in accordance with the Group's specific business needs. Translation exposure arises from the consolidation of the financial statements of foreign operations in euros, which is, in principle, not hedged. The Group's objective is to manage its foreign currency exposure through the use of currency forwards, futures, swaps and options.

	December 31, 2012		
	Israeli Shekel	Swiss Franc	Total
	(in millions of euros)		
Profit for the year			
Increase of 10% in exchange rate	(12,9)	(0,1)	(13,1)
Decrease of 10% in exchange rate	12,9	0,1	13,1
Equity			
Increase of 10% in exchange rate	23,3	3,0	26,3
Decrease of 10% in exchange rate	(23,3)	(3,0)	(26,3)

	December 31, 2011		
	Israeli Shekel	Swiss Franc	Total
	(in millions of euros)		
Profit for the year			
Increase of 10% in exchange rate	(10,7)	(0,1)	(10,9)
Decrease of 10% in exchange rate	10,7	0,1	10,9
Equity			
Increase of 10% in exchange rate	(1,3)	(2,1)	(3,4)
Decrease of 10% in exchange rate	1,3	2,1	3,4

18—Financial risk factors (Continued)

Exchange differences recorded in the income statement represented a loss of EUR 22,5 million in 2012 (2011: loss of EUR 14,0 million). They are allocated to the appropriate headings of expenses by nature.

The Group estimates that a 10% variation of foreign currencies against euro parity is a relevant change of variables and reasonably possible risk in a year and the presented above allows to assess the impact of a 10% increase of foreign currencies against euro on net result and reserves. A 10% decrease would have a symmetrical impact with the same amounts but in the opposite direction.

18.3.4 Price risk

The Group has investments in listed financial instruments, shares and debentures that are classified as available-for-sale financial assets and financial assets at fair value through profit or loss in respect of which the Group is exposed to risk of fluctuations in the security price that is determined by reference to the quoted market price. As of December 31, 2012, the carrying amount of these investments was EUR 5,7 million.

18.4 Sensitivity tests in respect of a change in market factors

The sensitivity analysis in respect of financial instruments was performed under the assumption that the amount that was in force as of the statement of financial position date was in force throughout the reporting period.

The changes that have been selected as variables for the relevant risk were determined in accordance with management's assessment in respect of the possible reasonable changes in those risk variables.

18.5 Gearing computation

Gearing ratio (net debt (1) /total equity holders' equity (2)) amounts, respectively in 2012 and 2011, to 5,4 and 1,6.

Consolidated Statement of financial position	December 31, 2012	December 31, 2011
	(in millions of euros)	
Total assets in balance sheet	**2,720,0**	**2,503,7**

(1) Excluding loan from related parties

18—Financial risk factors (Continued)

18.6 Fair value of financial assets and liabilities

18.6.1 Fair value of financial instruments carried at amortized cost

The managers consider that the carrying amounts of financial assets and financial liabilities recognized in the consolidated financial statements and accounted for at their amortized cost approximate their fair value.

18.6.2 Valuation techniques and assumptions applied for the purposes of measuring fair value

The fair value of financial assets and financial liabilities are determined as follow:

The fair values of financial assets and financial liabilities with standard terms and conditions and traded an active liquid markets are determined with reference to quoted market prices (includes listed redeemable notes, bills of exchange, debentures and perpetual notes);

The fair value of derivatives instruments are calculated using quote prices. Where such prices are not available, a discounted cash flow analysis is performed using the applicable yield curve for the duration of the instruments for non-optional derivatives, and option pricing models for optional derivatives. Foreign currency forward contracts are measured using quoted forward exchange rates and yield curves derived from quoted interest rates matching maturities of the contracts. Interest rate swaps are measured at the present value of future cash flows estimated and discounted based on the applicable yield curves derived from quoted interest rates; and

The fair value of other financial assets and financial liabilities (excluding those described above) are determined in accordance with generally accepted pricing models based on discounted cash flow analysis.

Specially, significant assumptions used in determining the fair value of the following financial assets and liabilities are set out below.

19—Trade and other payables

	December 31, 2012	December 31, 2011
	(in millions of euros)	
Trade payable	311,3	208,2
Trade payables—acquisition of assets	2,9	3,5
Corporate and social security contributions	24,5	26,2
Corporate income tax payable	10,7	7,2
Deferred revenue	34,1	31,3
Other payables	46,3	37,4
Liabilities from related parties	0,2	—
Total	**430,1**	**313,8**

A part of the trade payable increase as of December 31, 2012 results from the Cabovisao business combination. The rest is explained by the increase in business of other subsidiaries of the Group.

20—Other non current liabilities

	December 31, 2012	December 31, 2011
	(in millions of euros)	
Trade payables—acquisition of assets	5,9	—
Deferred revenue	10,8	9,4
Other payables	32,9	36,7
Total	**49,5**	**46,1**

21—Classification and fair value of financial assets and liabilities

	December 31, 2012

Investments in financial assets available for sale	—	—	—	—	—
Available for Sale	8,5	—	—	8,5	—
Long term trade receivables	2,4	2,4	—	—	—
Other long-term trade receivables	28,4	24,2	—	—	4,3
	220,3	**207,5**	**—**	**8,5**	**4,3**
Current liabilities					
Credit from banking corporations and debentures	241,8	241,8	—	—	—
Trade payables	208,2	208,2	—	—	—
Others payables	98,4	98,4	—	—	—
Short-term loans from related parties	2,9	2,9	—	—	—
Non-current liabilities					
Loans from banking corporations and debentures	835,2	835,2	—	—	
Long-term loans from related parties	127,1	127,1	—	—	—
Other financial liabilities	32,1	28,3	3,8	—	—
Other non-current liabilities	46,1	46,1	—	—	—
	1 591,8	**1 588**	**3,8**	**—**	**—**

The classification of financial instruments in accordance with hierarchical levels for fair values:

The financial instruments that are presented in the consolidated statement of financial position in accordance with their fair value are classified into hierarchical levels for fair values, as aforesaid, which are determined in accordance with the source of the input that was used for determining the fair value:

- Level 1—Quoted prices (without adjustments) in an active market for identical assets and liabilities.
- Level 2—Inputs other than quoted prices that are included in level 1, which can be observed directly or indirectly.
- Level 3—Inputs that are not based on observable market data (an evaluation technique that does not use observable market data).

21—Classification and fair value of financial assets and liabilities (Continued)

As result, as of December 31, 2012, classification of financial instruments are as follows:

	December 31, 2012			
	Level 1	Level 2	Level 3	Total
	(in millions of euros)			
Financial liabilities at FVTPL				
Other derivatives financial liabilities	—	62,5	—	62,5
AFS				
AFS HOT Telecom (Level 1)	5,7		—	5,7
	5,7	**62,5**	**—**	**68,2**

The notional principal amounts of the outstanding forward foreign exchange contracts at December 31, 2012 as follows:

- FX Forward contract: USD 550 million, the maturity date will be on December 15, 2017 and swap to NIS at the aggregate rate of 4,1700, this contract relates to a hedge of the notional of the debt and also the rate accretes up to 4,17 in December 15, 2017;
- FX Forward contract: USD 98,9 million, the maturity date is based on the interest date payment from June 17, 2013 to December 15, 2017 and swap to NIS at the aggregate rate of each interest payment period, this contract is related to interest rate hedging, exchanging fixed Euro and USD interest payments into fixed NIS payments.
- FX Forward contract: EUR 40,1 million, the maturity date is based on the interest date payment from June 17, 2013 to December 15, 2017 and swap to NIS at the aggregate rate of each interest payment period, this contract is related to interest rate hedging, exchanging fixed Euro and USD interest payments into fixed NIS payments.

The notional principal amounts of the outstanding forward foreign exchange contracts at December 31, 2012 as follows:

- Cross currency swap: USD 200 million, the maturity date will be on December 15, 2017 swap NIS at the aggregate rate of 7,7550%,
- Cross currency swap: USD 225 million, the maturity date will be on December 15, 2017 swap NIS at the aggregate rate of 5,6850%,
- Cross currency swap: EUR 100 million, the maturity date will be on December 15, 2017 swap NIS at the aggregate rate of 5,7750%.

Those contracts are effectively fixed Euro and USD interest payments in NIS.

21—Classification and fair value of financial assets and liabilities (Continued)

As of December 31, 2011, classification of financial instruments' issue mainly concerns HOT Telecom perimeter:

HOT Telecom	As of December 31, 2011 Level 1	Level 2	Level 3
	(in millions of euros)		
Available for sale financial asset:			
Shares	8,5		—
Financial assets at fair value through profit or loss:			
Forward contracts in foreign currency that are not defined as accounting hedges		5,1	
Financial liabilities at fair value through profit or loss:			
Embedded derivatives		(0,4)	
Interest rate swap contract		(0,2)	
Liability to the Ministry of Communications			(3,8)

22.3 Reconciliation between the effective tax rate and the theoretical tax rate

	December 31, 2012	December 31, 2011
	(in millions of euros)	
Net income	**(189,8)**	**123,9**
Share of net income—associates	**—**	**(11,7)**
Share of net income—equity holders	**(189,8)**	**112,3**
Tax charge [(−) expenses/(+) income]	(26,0)	32,5
Earnings/(Loss) before tax	**(215,8)**	**156,6**
Theoretical tax rate	28,80%	28,80%
Income tax calculated on theorical tax	62,1	(45,0)
Impact of:		
Effect of different tax rates of subsidiaries depending in other jurisdictions	(5,8)	
Permanent differences	(57,0)	7,9
Restatements without tax impact	18,7	10,6
Utilization of previously non capitalized tax credit	20,0	3,6
Carry-back	0,1	(0,2)
Tax loss carry forwards of the periods non activated	(13,2)	(9,7)
Effect of unused tax losses not recognized as Deferred tax asset	1,0	0,3
Effective Tax	**25,9**	**(32,5)**
Effective tax rate		**27,66%**

Permanent differences stated above are almost exclusively present at the Cool Holdings sub consolidated level. Permanent differences totaled EUR 50,4 million and were comprised of EUR 30,0 million arising from the adjustment on the Goodwill at Cool Holdings Limited and another EUR 20,4 million related to finance costs at Cool Holdings Limited.

22.4 Tax assessments

22.4.1 Hot Telecom

In December 2009 and in the course of the year 2010, HOT received tax assessments for the 2006-2008 tax years, in accordance with section 145(A)(2)(b) of the Income Tax Ordinance. In accordance with the tax assessments, expenses amounting to approximately EUR 220 million were adjusted for HOT for tax purposes as of the end of the year 2008, and this was as a result of a disagreement between HOT and the Tax Authority in Israel, primarily in respect of the pace of the recognition of depreciation expenses in respect of the cables network and additional issues. If the said position of the Tax Authority in relation to the assessments that were issued to HOT in respect of the 2006, 2007 and 2008 tax years is received, HOT will be exposed to a demand for the payment of tax in a cumulative amount of EUR 24 million. Linkage differentials and interest will be added to this amount. Furthermore, HOT will be exposed to a demand for the payment of additional taxation in significantly larger amounts in respect of the tax years after 2008.

HOT's management, on the basis of its position in the self-assessments and based upon its legal advice, has presented an objection against the tax assessments for the years 2006–2008 and in the opinion of HOT's management and its professional advisers, HOT has well founded complaints against the claims made in the tax assessments for the years 2006–2008, which could significantly change the results of the tax assessments for those years and could also significantly change the implications deriving from them in respect of the tax years after 2008.

22—Taxes on income (Continued)

At the present time, discussions are being held on the assessments, within the framework of Stage B for the years 2006–2008 and within the framework of Stage A for the 2009–2010 tax years. A number of issues have come within the framework of the discussions including the manner of the depreciation of the cables network infrastructure and the manner of the amortization of the intangible assets—brand, goodwill and customer connections. Up to the time of the publication of the financial statements, no assessment has yet been issued in respect of the aforesaid.

A provision of EUR 2 million has been recorded within the framework of the financial statements in respect of HOT estimated exposure in respect of the dispute with the tax authorities in respect of open tax years.

HOT has been issued with final tax assessments up to and including the 2005 tax year. The consolidated companies HOT Vision, HOT Haifa and HOT Eidan have been issued with final tax assessments up to and including the 2001 tax year. The consolidated companies HOT Edom and HOT Net (formerly HOT Investments and Finance) have been issued with final tax assessments up to and including the 2002 tax year. The consolidated company HOT T.L.M. has been issued with final tax assessments up to and including the 2004 tax year. The consolidated companies Drom Hasharon and HOT Properties have been issued with final tax assessments up to and including the 2008 tax year.

The consolidated companies HOT T.L.M., HOT Eidan and HOT Haifa have tax assessments that are considered to be final up to and including the 2005 tax year. The consolidated company HOT Mobile have tax assessments that are considered to be final up to and including the 2008 tax year. The consolidated companies HOT Vision, HOT Edom and Hot Net (formerly HOT Investments and Finance) have tax assessments that are considered to be final up to and including the 2007 tax year. The said assessments are considered to be final subject to the powers that have been afforded to the Director of the Tax Authority in Israel in accordance with section 145, 147 and 152 of the Income Tax Ordinance.

22.4.2 Cabovisao

Cabovisao is subject to corporate income tax at the rate of 25%, increased by a municipal surcharge at the applicable rate up to 1.5%, resulting in an aggregate rate of a maximum of 26.5%. Additionally, any taxable profit in excess of EUR 1,5 million is subject to a State surcharge of 3%, being 5% if the taxable net, or exceeds EUR 10 million, according to article 87-A of the corporate income tax law.

In accordance with the article 88 of the corporate income tax law, Cabovisao is subject to autonomous taxation over some costs incurred by Cabovisao at the rates provided for in the above-mentioned article.

In accordance with current legislation, tax returns are subject to review and correction by the tax authorities during a four-year period or, if tax losses are carried forward or a deduction or tax credit used, for the period for which such right is exercised (five years for Social Security). These periods can be suspended when there are tax inspections, claims or appeals in progress. Consequently, Cabovisao's tax returns for the years 2009 to 2012 are subject to review by the tax authorities.

Cabovisao was subject to an inspection from the Portuguese tax authorities for the fiscal years 2003 to 2006, and the outcome was the following:

Notification for fiscal year 2003 to adjust tax losses by EUR 7,2 million and an additional payment of stamp taxes for fiscal years 2000 to 2002 in the amount of EUR 1,3 million. The Company did not agree with the additional payment of stamp taxes, having claimed through a lawsuit appeal against the Portuguese Tax Authorities, presenting a bank guarantee in the amount of EUR 1,7 million. During the year ended August 31, 2011, the Almada Administrative and Fiscal Court decided the appeal was unfounded. Cabovisao has appealed against that decision before the Almada Administrative and Fiscal Court.

Assessment of the Portuguese Tax Authorities related to 2005, requests an adjustment to tax losses in the amount of EUR 17,1 million, as well as an additional tax payment in the amount of EUR 4 million, for

22—Taxes on income (Continued)

withholding tax and stamp tax. Cabovisao paid EUR 2,6 million and contested this decision of the assessment through a gracious complaint and hierarchical appeal, but has not received the final decision yet. The unpaid amount of, approximately, EUR 1 million, was contested by hierarchic appeal. In the year ended 31 August, 2012, the Corporate Tax accepted the claim. As of the date of this report, there were not any subsequent deliberations after that decision.

For 2006, an assessment of tax payable on withholding tax linked to interest due to CSII in the amount of approximately EUR 4,9 million. Cabovisao doesn't agree with this assessment, having filed a gracious complaint and submitted a bank guarantee in the amount of approximately EUR 6,8 million. As of December 31, 2012, the administrative and tax court of Almada didn't pronounce on that claim, therefore it wasn't taken any subsequent deliberations.

The Board of Managers believes that any adjustments resulting from tax revisions to the tax returns of these exercises, taking into account the provisions recorded will not have a significant effect on the financial statements on December 31, 2012.

22.5 Unrecognized deferred tax assets

As at December 31, 2012, unrecognized deferred tax assets amount to EUR 33,4 million and split as follows:

- Cool Holding: EUR 21,2 million,
- Coditel Holding Lux S.à r.l.: EUR 13,63 million,
- Cabovisao: EUR 51,3 million.

23—Segment analysis

23.1 Definitions of segments

Given the geographic spread of the various Group entities, it logically follows that an analysis and control by geography is inalienable to Group strategy of managing its different businesses. It has thus been decided by the central management team to analyse the business across geographies and then by activity. The following geographies have been identified:

Israel,

Belgium and Luxembourg (Western Europe),

Portugal (Western Europe),

French Overseas Territories (Antilles and Indian Ocean),

Other (Switzerland, Africa etc.).

Activities have been split as follows:

Cable,

Mobile,

Others (B2B/Content/etc.).

23.1.1 Operational KPIs

It has also been decided by the central team that local operational teams in each geography shall report operational KPIs every week and operational and financial KPIs every month using a standard reporting format defined by the central team.

23—Segment analysis (Continued)

The main operational KPIs that will be tracked will be:

Subscriber base evolution (both cable and mobile),

ARPU (Average Revenue per Unit) (cable and mobile),

Other relevant cost drivers.

These KPIs are benchmark indicators followed throughout the industry and allow for a thorough and accurate analysis of the business and strategic decision making.

23.1.2 Financial KPIs

Each local operational company will also report the following financial KPIs by segment:

Revenues (Cable/Mobile/Other),

Cost of Sales (Cable/Mobile/Other),

Capex (Cable/Mobile/Other).

The central team believes that given the uniformity in the accounting and nature of operating expenses and given the experience and competence of the Group in managing operating costs, the main indicator that can vary between business units is the gross margin.

HOT Telecom however will report EBITDA on cable and mobile, in addition to the KPIs mentioned above. This derives from the size of the mobile business and the fact that historically, this business had separate reporting for these two activities and also because local regulation require operators to report the EBITDA on these segments.

Capital expenditure (Capex) is an important indicator to follow, as the profile varies greatly between the two activities:

The cable business has small fixed Capex requirements and initial Capex is quite low, but variable Capex is high, as an increase in customers drives the cash needs for Customer Premise Equipment (CPE) and installation.

Mobile Capex is one-off and mainly driven by investment in new mobile sites and licences to operate. Once the Capex is engaged and the business operational, there is limited Capex requirement.

Thus, the central team places a great emphasis on the proper tracking of capital expenditures and reviewing them against the costs budgeted for the year.

Management believes that operations in Switzerland and activities such as B2B sales are not yet substantial enough to warrant a separate reporting segment and will be reported under 'Others'. However, as these activities grow, it is intended that they are also reported under a separate segment with relevant operating KPIs specific to the activity. Financial KPIs are expected to remain the same. The same applies to any new line(s) of business that the Group may decide to venture into (for e.g., content etc.).

23.2 Regional specificities

23.2.1 Israel

Israel is currently an important contributor to the Group revenues and EBITDA and, for this reason, is classified as a separate region. Apart from this, this region has particularities that differentiate it.

It is characterised by a high broadband and cable penetration and the general population is very technology focussed. The market is maturing but highly regulated, which means that while opportunities

23—Segment analysis (Continued)

for growth exist, they may be limited by specific regulatory challenges and also by high competition, thus leading to price pressures on ARPU development.

Triple play penetration is low and this represents the biggest development path. Customer retention is difficult as contractual terms heavily favour the customer and, hence, price increases, even when coupled with high value content, can be negatively perceived and lead to an erosion of the customer base.

The regulatory environment does not yet allow for quadruple play packages, which heavily restricts achieving full integration and operational synergies with the mobile business. The prevailing political environment in the region can also have adverse impacts on the development of the business, as a deterioration of the situation may have serious repercussions on the market environment and may even lead to physical damage of the infrastructure.

23.2.2 Belgium and Luxembourg

Even though Belgium/Luxembourg and Portugal can be considered to be the same sub-region, the challenges posed by these two regions are quite distinctly different.

The Belgian and Luxembourg territories have a high standard of living and well developed economies, which translates into higher prices for services. The markets are quite mature, with high broadband penetration and a high percentage of triple play customers. Customers are willing to pay more for premium services (high ARPU/subs) and hence price pressures are low.

These regions are marked by the presence of many well established cable operators and customer retention is a key factor in maintain strong profit margins.

Given the density and presence of mobile operators, the mobile strategy is driven by MVN operations, which allows the presence of quadruple play packages.

23.2.3 Portugal

The Portuguese market is marked by a high concentration of double play subscribers and a mature telecommunications market, which, when coupled with slow economic recovery after the crisis, makes it difficult to achieve high sales growth. This market is marked by high subscriber attrition and downward migration from high to low ARPU offers.

The challenge in Portugal is to maintain a subscriber base and then slowly migrating the customer base from double play to triple play offers.

23.2.4 French Overseas Territories

The French Overseas Territories represent an attractive market with high scope of growth in cable operations, owing to relatively limited competition and relatively low cable penetration. There is also a large scope for synergies between the cable and mobile businesses, as triple play penetration remains low and regulatory flexibility allows the marketing of quadruple play options.

Price pressures are low in these markets and customers are willing to pay more for value added services. Double play (TV and Internet) offers are predominant in these regions and the migration of new and existing customers to triple and quadruple play packages in the future will be an important factor in growing sales.

There are other opportunities for growth in the sector, most notably in the e-banking sector.

23—Segment analysis (Continued)

23.3 Segment information

Details regarding revenues, cost of sales and gross profit for our cable, mobile and other segments are as follows:

	December 31, 2012					
	Total	Belgium & Luxembourg	Israel	French Overseas Territories	Portugal	Others
	(in millions of euros)

24—Operating expenses

	December 31, 2012	December 31, 2011
	(in millions of euros)	
Technical and maintenance costs	(228,2)	(185,0)
Customer services	(18,3)	(9,9)
Taxes	(2,4)	(0,5)
Total	**(248,9)**	**(195,4)**

The increase in operating expenses was mainly related to the acquisition of Cabovisao, a Portuguese cable operator in February 2012 and the full year impact of the consolidation of HOT's cable business in 2012 (full 12 months vs. 9 months in 2011).

25—Equity based compensation

Equity based compensations are included in the line item ''General & administrative expenses'' in these consolidated financial statements and amounted to EUR 3,8 million.

26—Other operating incomes and expenses

	December 31, 2012	December 31, 2011
	(in millions of euros)	
Other incomes and expenses	(24,9)	(5,6)
Disposal of tangible assets—selling price and book-value of disposal/ tangible assets	(4,8)	(7,4)
Subvention	—	—
Other expenses, net	**(29,8)**	**(13,0)**
Gain arising on step acquisition(1)	—	133,1
Other revenues	8,3	1,7
Expenses from prior periods(2)	(22,4)	(7,5)
Restructuring costs	(6,7)	(0,1)
Reorganization and extraordinary costs	**(20,8)**	**127,2**
Total	**(50,5)**	**114,2**

(1) In the prior year, the gain from achieving control is linked to acquisition of Hot Telecom: the amount of the investment in HOT Telecom prior to achieving control, in accordance with the equity method of accounting has been revalued in accordance with the HOT's share price as of the said time, such that in the Altice VII financial statements as of December 31, 2011 income has been recorded on the revaluation of the investment in the affiliate, which became a consolidated company; as a result, HOT's assets and liabilities previously accounted for in accordance with equity method of accounting have been revalued for EUR 133,0 million.

(2) The increase in expenses from prior periods is mainly explained by fines and penalties paid by HOT relating to the early breakage of mortgage contracts and disputes with other suppliers. The total charge registered was of EUR 22.8 million, offset by a reversal in the provision for these charges for EUR 7.7 million, thus resulting in a net expense of EUR 14.9 million.

(3) Restructuring costs refer to the non-recurring costs incurred by Cabovisao in the year ended December 31, 2012, arising from the restructuring carried out at this company level, post-acquisition by the Group. The costs engaged are made up entirely of personnel costs and are associated with dismissal indemnities paid to employees.

27—Net finance costs

	December 31, 2012	December 31, 2011
	(in millions of euros)	
Cash and cash equivalent income	—	—
Gain arising on fair value financial instruments	0,4	6,4
Foreign exchange gains	24,7	6,8
Disposal of financial assets—selling price	4,5	3,0
Other financial incomes and expenses	0,9	0,4
Finance income	**30,5**	**16,6**
Interest charges on borrowings and overdrafts	(118,5)	(70,2)
Fair value financial instruments (losses)	(62,8)	—
Foreign exchange losses	(2,1)	(20,8)
Book-value of disposal/financial assets	(21,2)	(20,7)
Finance costs	**(204,7)**	**(111,6)**
Total	**(174,1)**	**(95,0)**

28—Transactions with non-controlling interests

On December 27, 2012, the Group sucessfully completed the take-private of HOT Telecom and thus the buyout of the non controlling interests in Cool Holding Limited. The total consideration paid to acquire this minority stake amounted to EUR 172,9 million.

On February 19, 2012 HOT distributed a dividend of NIS 365 million (EUR 73,4 million). Of this total amount, NIS 129 million (EUR 26,0 million) was paid to the non-controlling interests.

29—Average workforce

	December 31, 2012	December 31, 2011
Managers	268	280
Technicians	660	604
Employees	4 719	5 152
	5 647	**6 036**

30—Transaction with related parties

30.1 Trading and financial transaction

Transactions with related parties mainly related to the companies Adevintel, Titan consulting and DOK, all consulting firms specialized in the management and operations of telecom companies. The fees paid to these companies include recurring fees paid based on service level agreements established with Altice VII, one-off success fees for the successful completion of acquisitions or negotiations with banks

30—Transaction with related parties (Continued)

on debt contracts/bond issuance and reimbursement of any outlays and expenditures incurred by the employees of these companies when working on behalf of Altice VII.

30.2 Compensation of key management personnel

The compensation given to the managers, in respect of their duties as Chairman of the Executive Board or member of the Executive Board of Altice VII, for the financial year 2012, is EUR 1,7 million compared to EUR 0,9 million for the financial year 2011.

31—Contractual obligations and commercial commitments

31.1 Hot Telecom Commitments

31.1.1 Commitments

Royalties to the Ministry of Communications and other payments to the government

(a) HOT is committed to pay annual royalties out of its overall income that are chargeable with royalties (hereinafter—the chargeable income) in accordance with the Telecommunications Regulations (Concessions)—1987. In accordance with the Telecommunications Regulations (Telecommunications and Broadcasting) (Royalties)—2001, HOT Telecom is required to pay annual royalties in respect of its income from in country operator services and HOT Mobile is required to

31—Contractual obligations and commercial commitments (Continued)

pay annual royalties in respect of its radio telephone services (less payments to another license holder in respect of reciprocal connection or roaming services). The royalty rates that HOT, HOT Telecom and HOT Mobile have each been charged to pay in respect of their chargeable income, as aforesaid, stood at 2,5% in 2007, 2% in 2008, 1,5% in 2009 and 1% in 2010. In accordance with a Temporary Order, the annual royalty rate for the years 2011 and 2012 stood at 1,75%.

In accordance with the Amendment to the Telecommunications Regulations (Concessions) and the Amendment to the Telecommunications Regulations (Telecommunications and Broadcasting) (Royalties) (Temporary Order)—2012, as from 2013 the royalty rate that is paid by HOT, HOT Telecom and HOT Mobile on its chargeable income, as aforesaid, stands at 0%.

(b) In July 2001 the cables companies, including HOT, entered into a commitment under an agreement with the State of Israel on the subject of a solution to the disputes between the cable companies and the State in respect of the right of each company to operate the existing cables infrastructure in each of the concession areas after the end of the period of the concessions. It was stipulated in the agreement that the State undertakes to waive all of its claims and its rights in respect of the cables infrastructure such that each cables company would be the owner of all of the rights, including property rights, in the cables infrastructure that it held in the area of its concession and that it would have available to it the right to continue to operate it even at the end of the concession period. In consideration for this, it was stipulated that each company was to pay to the State, on an annual basis and for a period of 12 years (commencing on January 1, 2003), its relative share, as determined in the agreement, of an amount that is equivalent to the multiple of certain incomes (as determined in the agreement) of each of the cable companies on a graduated scale (in accordance with the level of income, as aforesaid) at a rate of from 0% to 4%. The relative share of each company can be altered by agreement between the cables companies.

In addition, it was stipulated that each company is to pay approximately 12% of the overall consideration from the sale of operations that are executed through the cables infrastructure or which touch upon the cables infrastructure (as defined in the agreement) for a period of 12 years. It was also stipulated in the agreement that in so far as HOT has received any amount whatsoever in consideration for the issuance of its shares to the public or to an external investor or in consideration for the sale of shares of another company from among the cables companies, part of the consideration from the issue or the sale, as aforesaid, is to serve as an advance payment for the payment of the relevant portion of the consideration that remains to be paid under the agreement, in accordance with a formula that will be determined by the parties by agreement. It is further stipulated in the agreement that it shall apply to the cables companies or to any company that is split or merged even if structural changes are made of any sort whatsoever, and accordingly, with the completion of the merger, the agreement applies to HOT as a merged company.

(c) In accordance with the Wireless Telegraph Regulations (Licensing, Certification and Levies)—1978, HOT Mobile is required to pay a fixed annual payment for each frequency that it uses. HOT Mobile paid amounts of NIS 26 million and NIS 20 million in respect of the years 2012 and 2011 respectively (an amount of NIS 2 million in respect of December 2011).

(d) The license to operate a broadcasting center: It is stipulated in the broadcasting center operating license that the license holder is to pay a fee for the license at such rates and at such times as may be determined by the Ministry of Communications in accordance with the Communications Law and the Wireless Telegraph Ordinance (New Version)—1972.

Other royalties

(a) Within the framework of the Group's routine operations in the broadcasting field, the Group enters into commitments under arrangements and agreements under which the Group pays royalties to various authors' organizations. The amounts of the royalties that have been reflected by the Group

31—Contractual obligations and commercial commitments (Continued)

within this context in the years 2012, 2011 and 2010 amounted to NIS 42 million, NIS 43 million and NIS 47 million respectively.

(b) On January 30, 2012 a draft of the Authors and Performers Law (Judgment on Royalties Issues) 2012 was placed before the Knesset. The draft law was intended to create a royalties court by empowering one of the District Court Judges to hear cases on royalties issues, royalty rates and disputes in royalty issues (in other words, a dispute on the issue of royalty rates between a collective management entity and a user or users of a repertoire).

This draft, if it is accepted, may have an implication for the issue of the payment of royalties to various organizations. As of the date of this report, HOT is unable to assess what the impact of the said legislation will be on its business results, of it is passed.

A commitment to invest in original productions

In accordance with the provisions of the Communications Law, the principles of communications and decisions by the Council, HOT is required, inter alia, to invest amounts in original productions at a rate of 8% of its annual income from subscription fees. During the course of the years 2010, 2011 and 2012 HOT complied with the investment rate that is required, as aforesaid.

It should be noted in this connection that the Communications Law has empowered the Council to determine the rate of investment that is required, provided that it may not exceed 12% and may not fall below 8% of the annual income from subscriber fees. In October 2011 the Council informed HOT that with effect from the year 2012 its income from subscriber fees, which form the basis for the calculation for the requirement to invest in original productions, will be deemed to include all of the payments that are paid by its subscribers in order to record broadcasts and to receive services, including income from users' terminal equipment and the installation thereof, whereas in accordance with the policy adopted by the Council up to such time the inclusion of income from terminal equipment for the purpose of this calculation was made conditional upon a mechanism that was based on the profitability of this income, and in past years the income from users' terminal equipment and the installation thereof was not included in the basis for the calculation for original productions. On January 12, 2012, the Council determined that HOT will be entitled to complete the amount of the additional investment for the year 2012 over three investment years.

Agreement to deploy and maintain a cables network

On January 1, 1990 and on May 1, 1989 Tevel International Transmission for Israel Ltd. and HOT Gold & Co. (hereinafter together—The cable companies) entered into commitments under agreements for the provision of planning, installation and maintenance services of the cables network with Bezeq (the provisions of both of the two said agreements are similar, and they will hereinafter in this section be called—the agreement). This agreement was endorsed to HOT Telecom as part of the merger agreement.

In accordance with the agreement, Bezeq, Tevel and HOT Gold planned the cables network, inter alia, based on Bezeq's available infrastructure, which was deployed in the areas of the concession at the time of the signing of the agreement. Tevel and HOT Gold supplied Bezeq with the base equipment (as defined in the agreement) that comprises the cables network whereas Bezeq supplied the additional equipment (as defined in the agreement) that is used for setting up the cables network.

In accordance with the agreement, a cables network was set up and deployed in a number of major cities across Israel, and Bezeq conducts the routine maintenance of the cables network and also provides malfunction repair services. The provisions of the agreement also relate, inter alia, to the possibility of the expansion of the cables network to additional facilities, the connection of new houses and of new neighborhoods.

31—Contractual obligations and commercial commitments (Continued)

The agreement will remain in force for the length of the period of the concession, and will continue to be in force if the concession or the rights in the concession are transferred or afforded to another, in whole or in part and directly or indirectly, during the course of the original concession period and during the extension of that period or after the end of it. Bezeq is only entitled to cancel the agreement in respect of a breach for which notice has been given in writing, and which has not been repaired within six months.

A consideration mechanism was set in the agreement, according to which HOT Telecom pays sums against the performance of Bezeq's commitments to setup, to maintain and to provide malfunction repair services, which are calculated in accordance with the length of the cables networks that have been deployed, in accordance with the various types of networks and it also makes non-recurring payments in respect of certain activities. In accordance with the agreement, the amount of the consideration in respect of the length of the cable, as aforesaid, is reduced by approximately 65% after 12 years from the time of the handing over of each section.

The total of the expenses recorded in HOT's accounting records for the network services payable to Bezeq in the years 2012, 2011 and 2010 amounted to NIS 48 million, NIS 46 million and NIS 43 million, respectively.

It should be noted that from time to time, during the routine course of business, disputes arise in connection with the implementation of the agreement, inter alia in respect of the division of the costs that are involved in the performance of some of the services that are supplied by the Bezeq company under the agreement, however the parties are continuing to operate in accordance with the agreement. It is further noted that over the course of the years additions have been signed to the agreement, primarily in connection with enhancement and upgrading work on the cables network.

Commitments to lease assets

The Group has commitments under agreements for the leasing of buildings and motor vehicles for various periods up to the end of the year 2020. The minimum future rental fees in respect of the rental contracts as of December 31, 2012, exclusive of the option period, are as follows:

	NIS in millions	EUR in millions
2013	186	37,7
2014	148	30,0
2015	120	24,3
2016	86	17,4
2017 and thereafter	304	61,7
TOTAL	**844**	**171,3**

On July 19, 2011 HOT's Board of Directors approved a commitment under agreements for the execution of the upgrading of the fiber optic infrastructure (FTTX). In accordance with the said commitment, HOT Telecom will purchase advanced optic equipment, work and services from third parties, in order to upgrade the infrastructures, including maintenance services, in accordance with the deployment and the timetables that will be agreed upon between the parties from time to time. The upgrading of the infrastructure, as aforesaid, will enable the expansion of the traffic capacity on the network, in favor of the supply of enhanced VOD services, the increasing of the number of channels that the Group can offer to its subscribers, faster internet services and it will also enable HOT to deal with increased demand for traffic capacity on the network in the future, which is expected to arrive as a result of the increased use of applications that require a considerable band width.

On May 27, 2010 a facility agreement was signed between HOT Mobile and Motorola for the purchase, licensing and installation of the infrastructure equipment (hardware and software) which is required in order to operate HOT Mobile's iDEN network. The agreement is in force for a period of five years from the time that it was signed (hereinafter—the initial period) and it will be renewed for additional periods of one

31—Contractual obligations and commercial commitments (Continued)

year each (or for a longer period that is agreed between the parties), unless a party to the agreement gives notice to the other party, 90 days before the end of the initial period, or one of the extension periods, as the case may be, of its desire to terminate the commitment. The agreement arranged the commitment between the parties for the purpose of the execution of the work orders that will be presented to Motorola, from time to time, by HOT Mobile for the purpose of the supply of equipment or software for the iDEN network.

Within the framework of the agreement, Motorola has undertaken that during the initial period it will hold an inventory of equipment that will enable it to immediately supply the components that are required for the proper functioning of HOT Mobile's iDEN network, and so that it will be capable of supplying HOT Mobile with the maintenance services for the infrastructure equipment and the software that is required to operate the network for a period of seven years from the signing of the agreement, subject to the purchase of the said maintenance services by HOT Mobile.

In consideration for Motorola's commitment to sell the equipment and the licenses to HOT Mobile at the prices that are denoted in the agreement, HOT Mobile has made a commitment to purchase the infrastructure equipment and the software that is required to operate the iDEN network exclusively from Motorola alone during the period of the agreement.

As part of the commitment with Motorola in respect of the infrastructure for the iDEN network, HOT Mobile has signed on a system maintenance agreement with Motorola as well as on an agreement for the maintenance of the system's hardware, which arrange the manner of the repair of malfunctions and the provision of support by Motorola for HOT Mobile's iDEN network.

In December 2011 the system maintenance agreement was extended for an additional period of three years, until the end of 2014.

On May 26, 2010, as part of the sale of the control in HOT Mobile to Altice, HOT Mobile entered into a commitment under an agreement with Mobility for the purchase of terminal equipment that supports the iDEN technology.

The agreement is in force for a period of 5 years and it will be renewed for additional periods of one year each time unless a party to the agreement gives notice to the other party,60 days before the end of the initial period, or one of the extension periods, as the case may be, of its desire to terminate the commitment.

The agreement arranged a mechanism for the ordering and supply of the terminal equipment (including quarterly forecasts by HOT Mobile) with HOT Mobile being responsible for the importing of the terminal equipment from abroad.

The supplier has received an option and the right of first refusal for the repurchase from HOT Mobile of all of the terminal equipment that it may be holding at the time of the termination of the agreement, in accordance with a mechanism that was set in the agreement.

Within the framework of the preparations for the setting up of the new network, HOT Mobile entered into commitments under agreements with various suppliers for the purchase of terminal equipment that it will use on the UMTS network.

On June 16, 2011 HOT Mobile entered into a commitment with Nokia Siemens Networks Israel Ltd. (hereinafter—the supplier) for the setting up of the infrastructure for HOT Mobile's new network.

In accordance with the terms of the agreement, the supplier will plan and set up the new network for HOT Mobile as a turnkey contractor. In the first stage, which was completed in May 2012, the supplier completed the setting up of the systems that are required for the purpose of operating the new system with a coverage of approximately 30%, which is in excess of the extent of the coverage which is HOT Mobile required to provide (20%) in accordance with the terms of the tender within two years from the time of the receipt of the new radio telephone license. After the completion of the first stage, HOT Mobile

31—Contractual obligations and commercial commitments (Continued)

has expanded and is expanding the new network, both from the perspective of the coverage and also from the perspective of the LTE capability.

The agreement arranges the work arrangements between the supplier and HOT Mobile, the manner of the handing over of the system to HOT Mobile and the manner of the maintenance of the system by the supplier.

The agreement is in force for 15 years, and it contains warranties for the proper functioning of the components of the system for a period of two years from the time of the handing over of each component in accordance with the agreement, as well as warranties for the entire period of the agreement that the system will operate in accordance with the system requirements that HOT Mobile placed (in terms of availability, functioning and capacity), subject to their being a maintenance agreement in force between the parties.

In consideration for the completion of the first, second and third stages in accordance with the agreement and the performance of all of the supplier's commitments by the year 2013, the Group will pay the supplier an amount of USD 52 million, which amount does not include the expansion of the coverage and the capacity over and beyond what is stipulated in the agreement. The overall consideration in the agreement for all of the services up to the year 2017 is approximately USD 120 million, according to HOT Mobile's assessment.

On January 31, 2013, an addition to the agreement was signed, within the framework of which the payments that were supposed to be paid under the agreement have been deferred to a later date, subject to HOT Mobile's signing on debt notes, with HOT acting as guarantor. Within this framework, HOT Mobile has signed on confirmation for the final receipt of significant portions of the said project.

On October 27, 2011 an agreement was signed between HOT Mobile and Comverse Ltd. (hereinafter—Comverse), in accordance with which Comverse will supply HOT with a BSS system (a billing system that is integrated with the customer relations management (CRM) system) (hereinafter—The system) and Comverse will also supply HOT with hardware, software and services, including the operation and maintenance of the system. In consideration for Comverse's services, HOT Mobile will pay an amount of approximately USD 12.5 million. In January 2012, the parties signed on an addition to this agreement, in accordance with which Comverse is committed to allocating seven additional employees to be available for the project (instead of the manpower that HOT had to make available for the project), for a payment of USD 500 000.

On October 6, 2005, HOT Mobile won a tender for the provision of Mobile services to the IDF. Following Cellcom's winning of a tender, which was published by the Ministry of Defense in 2012 for the selection of a new mobile operator for the IDF, in the third quarter of 2012, a gradual transfer of IDF customers to Cellcom's network began. HOT Mobile's revenues from the IDF in the years 2010, 2011 and 2012 amounted to NIS 139,3 million, NIS 112.4 million and NIS 83,7 million, respectively, which constituted approximately 13,5%, 12,5% and 9,8% of HOT Mobile revenues in the said periods, respectively. Of the said revenues, an amount of NIS 10 million a year was in respect of the PTT services, which are supplied to the IDF without reference to the tender.

On May 30, 2012, HOT Mobile International Communications Ltd (hereinafter—HOT International), a wholly owned subsidiary of HOT Mobile's, received an operator's license for the provision of international telecommunications services (hereinafter—The international license). On January 6, 2013 HOT International received operational approval for starting to provide international telecommunications services in accordance with the international license and on January 8, 2013, notification of the opening of the services was sent to all of the operators.

Marketing and distribution (for iDEN technology products and services)

In 2012 HOT Mobile operated through marketing and distribution channels, which included: sales personnel, who were employed by HOT Mobile, inter alia, through services and sales centers, which

31—Contractual obligations and commercial commitments (Continued)

HOT Mobile operates across the country, a national distribution channel that works ''door to door'' using an external contractor and authorized marketing agents. In 2012 and as of the date of this report, HOT Mobile distributes its products via sales staff who are employed by it, the Israel Post company in some 200 branches and some 150 branches of the Menta chain in the Delek Group's filling stations. In the ultra-orthodox sector, HOT Mobile operates through an external marketer who markets HOT Mobile's products and services in that sector.

In addition, HOT Mobile is acting to recruit private subscribers through its business/institutional customers, by way of offering attractive packages and paths to the family members of the business/institutional customers.

Commitment with an external marketer

As aforesaid, in 2012, one of the distribution channels for the Group's products and services in the iDEN field of operations was through an external contractor, S.D.M. Sales and Direct Marketing Ltd. (hereinafter—SDM), which provided HOT Mobile with marketing services for the iDEN products, though the operation of sales staff in order to market the iDEN products in the private and business markets, by operating a nationwide set-up, using a specialist marketing method involving initiated personal approaches whilst going door to door.

The consideration that SDM is entitled to is based on a fixed monthly consideration and commissions which are derived from SDM's results in respect of the sales of the iDEN products.

The original commitment was up to December 31, 2013. However, on December 6, 2012 a compromise arrangement was signed between HOT Mobile and SDM, in accordance with which HOT Mobile will pay SDM an amount of NIS 8 million and the commitment between the parties will be terminated, with each party waiving its claims against the other party.

Marketing and distribution (for UMTS technology products and services)

The marketing and distribution of UMTS products is performed by means of HOT Mobile's and HOT's marketing and distribution channels and through third parties, within the restriction places in the radio telephone license.

Capitalized leasing rights on land from the Israel Lands Authority

Capitalized leasing rights on land from the Israel Lands Authority over an area of 20 713 square meters on which the Group's buildings are located. The amount that is attributed to the capitalized rights is presented as a prepaid expenses in respect of operating leases in the balance sheet and is amortized over the period of the leases. The lease periods end in the years 2021-2045.

31.1.2 Guarantees and liens

As collateral for HOT's commitments vis-à-vis the parent company under the credit agreement with it, the following charges have been placed

A floating charge on HOT's assets.

A fixed charge on the shares in the subsidiary companies.

HOT Telecom has given a charge on some of its assets.

The said charges are in an unlimited amount, vis-à-vis HOT, the investee partnership—HOT Telecom and the subsidiary company—HOT Net, jointly and severally.

As collateral for the commitments of HOT, the investee partnership HOT Telecom and the subsidiary company HOT Net, first ranking floating charges have been placed in unlimited amounts in favor of the

31—Contractual obligations and commercial commitments (Continued)

borrowers, on all of the chargeable assets and the rights of companies in the Group and a fixed charge on the goodwill and the unpaid share capital of the Companies in the Group.

As collateral for HOT's commitments in respect of the royalties agreement, as set forth in section B(1) above, a second ranking floating charge has been placed in favor of the State.

As collateral for the Group's commitments, as determined in the Group's licenses and in the decisions by the Director and the Council, the Group has issued a number of guarantees, as follows:

Bank guarantees to the Ministry of Communications, in respect of the national operator license that was granted to HOT Telecom amounting to 8,4 million Dollars, in force until December 2017 and December 2025.

Guarantees in an amount of NIS 34 million (index-linked) to the Council in respect of the broadcasting license, which are in force until April and June 2014.

A bank guarantee in an amount of 2 million Dollars to the Director in respect of HOT's compliance with the terms of the merger as determined by the Director, which is in force until December 2014.

A bank guarantee in an amount of NIS 695 million, which was made available by HOT Mobile within the framework of its win in a tender for the allocation of frequencies and as collateral for its commitment in favor of the Ministry of Communications, which is in force until December 31, 2018.

In accordance with the wording of the guarantee that was written by the Ministry of Communications, there is no restriction in the guarantee on the endorsement, assignment or transfer of the guarantee to a third party. Furthermore, HOT Mobile has a duty to bear any expense that is involved in the exercise or the extension of the guarantee.

In the light of the aforesaid terms, HOT Mobile has signed on a letter of undertaking and endorsement vis-à-vis a bank, according to which HOT waives and is prevented from raising any claim against the bank in connection with the wording of the said guarantee, and it will indemnify and compensate the bank in respect of any expenses incurred for the purpose of conducting administrative and legal proceedings in connection with the said issues.

On November 28, 2011, HOT Mobile and the former parent company signed on an irrevocable letter of commitment vis-à-vis Bank Hapoalim Ltd. (hereinafter the bank). The letter of undertaking was signed as a condition for the making available of a bank guarantee in an amount of NIS 695 million, as collateral for HOT's commitments vis-à-vis the Ministry of Communications within the context of HOT's win in a frequencies tender for the setting up of a third generation mobile network (UMTS).

The Group has given a number of bank guarantees to various bodies in an overall amount of NIS 59 million.

Guarantees to HOT Telecom

The Group has given guarantees in a cumulative amount of 23 million Dollars as collateral for payments by HOT Telecom to the Cisco company.

The Group has given a guarantee in an amount of NIS 242 million (index-linked) as collateral for HOT Telecom's commitments vis-à-vis an interested party with which it has signed a rental agreement.

There exist mutual guarantees between HOT and companies in the Group, in unrestricted amounts, in favor of financial institutions as collateral for the repayment of the Group's liabilities to those financial institutions.

31.1.3 Other contingent liabilities

During the routine course of business, lawsuits have been filed against the companies in the Group and various legal proceedings are outstanding against it (hereinafter, ''The Legal Claims'').

31—Contractual obligations and commercial commitments (Continued)

In the opinion of the management of the Company and each of its subsidiaries, as at signature date, the amount of the additional exposure, in an amount of approximately NIS 3 billion (EUR 628,5 million) (over and above the provisions that have been recorded in these financial statements), as a result of the legal proceedings that have been filed against the Company's Subsidiaries on various matters, is as follows:

(a) An amount of approximately NIS 1.7 billion (EUR 356,1 million) in respect of claims, in respect of which in the assessment of the Company's management, in reliance on the opinion of its legal advisors, the chances of their being accepted do not exceed 50%.

(b) An amount of approximately NIS 0,1 billion (EUR 20,9 million) in respect of claims, which it is not yet possible, at this stage, to make an assessment, the main ones being in connection with applications for the approval of class actions that were presented close to the date of the financial statements

(c) An amount of approximately NIS 1,42 billion (EUR 297,5 million) in respect of claims which, in the assessment of the Company's management, in reliance upon the opinions of its legal advisors, their chances of being accepted exceed 50% and in respect of which a provision has been recorded in accordance with the assessments of the managements of the Company's Subsidiaries, as aforesaid.

The following is an abbreviated summary of the Group's contingent liabilities effective as of signature date, in accordance with groupings having similar characteristics:

The nature of the lawsuit (EUR in millions)	The amount of the additional exposure in excess of the provision recorded as of signature date	The amount of the lawsuits that cannot be assessed and which were presented close to the date of the financial statements (primarily applications for approval as class actions)
Customers	574	21
Lawsuits after the balance sheet date in respect of customers	33	33
Suppliers	13	5
Employees	1	—
The merger transaction	50	—
Total	**671**	**59**

31.2 Cabovisao commitments

31.2.1 Contingent assets

During the year ended December 31, 2012, Cabovisao made the decision not to pay any fees charged by municipalities, in addition to TMDP (Fees due for rights and charges related to the deployment of, passage within or crossing of systems, equipment and other resources of providers of publicly available electronic communications networks and services at a fixed location, of a public or private municipal domain). On December 31, 2012, Cabovisao had outstanding claims against several municipalities, totaling EUR 3,6 million. To present date, Cabovisao received 102 004 Euros from seven municipalities.

31—Contractual obligations and commercial commitments (Continued)

31.2.2 Contingent liabilities

31.2.2.1 Bank guarantees

	December 31, 2012
	In millions of euros
Tax Authority	8,4
City Council	0,9
Third Parties	0,01
Total	**9,3**

31.2.2.2 Real guarantees

On December 31, 2012, Cabovisao issued a bond amounting to EUR 25 million which was fully underwritten by Goldman Sachs International together with a financial first degree collateral of all bank accounts held by Cabovisao (except the bank deposit account in HSBC France and a current account with Caixa Geral de Depositos, S.A.) and pledge the shares representing Cabovisao's share capital and equity holders' rights.

31.2.2.3 Other contingent liabilities

As a result of the refusal by Cabovisao to pay the municipal taxes referred to above (since September 2010), the municipality of Almada initiated a process executive for payment of fees from 2006 to 2009, amounting to approximately EUR 0,7 million. It is the understanding of the Board of Managers, based on the opinion of its legal counsel, that the likelihood of loss is very low in the process.

31.2.2.4 Contingent assets

Cabovisao has outstanding claims against various municipalities for municipal taxes that it deems were charged illegally. The amount of such outstanding claims was EUR 3.6 million for the year ended December 31, 2012, of which EUR 0,1 million have been received from seven municipalities, while recovery is on-going with others.

31.3 Coditel Holding commitments

As of December 31, 2012, off balance sheet commitments include:

The shares, bank accounts and receivables of Coditel Brabant S.p.r.l. and Coditel S.à r.l. have been pledged. Coditel Holding is not allowed to pledge these assets as security for other borrowings or to sell them to another entity.

31.4 Others

The shares, bank accounts and receivables of Altice VII and its following subsidiaries Altice Finco S.A., Altice Financing S.A., Cool Holdings Ltd S.A., H.Hadaros 2012 Ltd., Hot Telecommunications System Ltd, Cabovisao S.A., Altice Blue Two S.A.S. and its subsidaries, Coditel Holding S.A. and its subsidiaries have been pledged for the issued Senior Secured Notes and Senior Notes. The Company is not allowed to pledge these assets as security for other borrowings or to sell them to another entity.

32—Statutory Auditors' fees

In 2012, an amount of EUR 0,3 million was paid to various network affiliates of the Group's auditors, of which 0,2 million was paid as fees for audit services and EUR 0,1 million as fees for non-audit fee services.

33—Going concern

During the year ended December 31, 2012, the company had a net current liability position of EUR 221,4 million (mainly due to other payables of EUR 118,7 million and trade payables of EUR 311,3 million), a net loss of EUR 189,8 million (down from a net gain of EUR 123,9 million in FY11), positive cash flow from operations of EUR 467,8 and negative working capital of EUR 230,1 million. The positive cash flow from operations balance was mainly due to strong earnings growth and EBITDA generation. The net working capital of EUR 230,1 million is mainly driven by trade receivables and payables. The net loss recorded in FY12 was mainly driven by increased depreciation and amortisation charges as compared to FY11 (+EUR 211,7 million), increased financial charges and with the issuance of public debt at the time of the take private operation of HOT Telecom. In addition to this, an exceptional revenue was recognised in FY11, owing to the switch from equity method to global integration consolidation of HOT Telecom, which was non-recurrent in FY12 (an impact of EUR 133,1 million).

The negative working capital position is structural and follows industry norms. Customers generally pay subscription revenues early or mid-month, with short DSOs (Days of Sales Outstanding) and suppliers are paid in the beginning of the following month, thus generating a negative working capital, as evidenced by the difference in the level of receivables and payables (EUR 150,8 million vs. EUR 311,3 million). Payables due the following month are covered by revenues and operating cash (if needed). As of December 31, 2012, the company had many short term loan payments (< 1y), and long term debt was refinanced at the end of 2012 and in June 2013.

Despite the net current liability position, Management is of the view that the company will continue to act as a going concern for 12 months from the date of approval of these financial statements based on the following:

The Group has a strong track record of generating positive operating income before amortisation and depreciation and generated strong positive operating cash flows in 2012 (EUR 467,8 million). Operating income before D&A amounted to EUR 403,2 million, an increase of 35% compared to FY11, thus reaffirming management's ability to drive profits in the different operating companies.

The Group had a marked improvement in cash reserves at the end of 2012 compared to December 31, 2011 (EUR 129,6 million vs. EUR 19,8 million), which would allow it to cover any urgent cash needs. Additionally, the Group had access to a revolving credit facility (''RCF'') of up to USD 80,0 million (EUR 60,9 million).

The Group has sufficient reserves to absorb the impact of the net loss incurred in the year ended December 31, 2012. Net equity amounted to EUR 285,7 million on December 31, 2012.

In addition to the points enumerated above, the Group has implemented a new budgeting exercise, with monthly account reviews with CFOs of operating companies to track budget accuracy. This exercise will be complemented by a mid-year reforecast based on real first semester numbers.

34—Events after the reporting period

On May 31, 2013, Altice Holdings entered into a sale and purchase agreement to acquire Winreason (the ''ONI Purchase Agreement''), the owner of the Portuguese telecommunications group, ONI, pursuant to which Cabovisao purchased all of the outstanding shares of ONI and refinanced the outstanding indebtedness of ONI (the ''ONI Transaction''). The deal was consummated on August 8, 2013.

On June 7, 2013, Altice VII and certain of its subsidiaries entered into a sale and purchase agreement (the ''Outremer Purchase Agreement'') with the owners of OMT Invest and certain of its affiliates pursuant to which (i) the Group had agreed to purchase all of the outstanding share capital of OMT Invest other than shares to be contributed separately pursuant to the Outremer Investment Agreement on completion of the Outremer Transaction and (ii) all of the outstanding indebtedness of OMT Invest and its subsidiaries were to be refinanced using a portion of the proceeds of the June 24, 2013 bond issuance (see below). The parties to the Outremer Purchase Agreement entered into an investment agreement (the ''Outremer Investment Agreement'') pursuant to which (i) the Group contributed all of

34—Events after the reporting period (Continued)

the outstanding share capital of Le Cable Martinique and Le Cable Guadeloupe and (ii) managers of OMT Invest contributed all of the outstanding shares of OMT Invest not sold to the Group under the Outremer Purchase Agreement. The transaction was completed on the July 5, 2013.

On June 14, 2013, Altice Finco issued EUR 250 million aggregate principal amount of its 9% senior notes due 2023 (the ''2013 Senior Notes'').

On June 24, 2013, Altice Financing entered into a senior secured term loan credit facility (as amended from time to time, the ''2013 Term Loan Facility'') which provides for U.S. dollar term loans (the ''2013 Term Loans'') up to an aggregate principal amount equivalent to USD 1 034 million. Altice Financing may draw under the 2013 Term Loan, in up to four tranches, at any time on or prior to November 30, 2013, as long as, among other things, the incurrence of the indebtedness would have been permitted by the covenants in the existing Altice Financing debt documents. On July 2, 2013 and July 5, 2013, Altice Financing borrowed USD 584,2 million and U.S. dollar-equivalent USD 81,9 million under the 2013 Term Loan (the ''First Draw''). The proceeds, together with the proceeds of the 2013 Senior Notes and cash on the balance sheet of the Group were applied to complete the Cabovisao Refinancing, the Coditel Refinancing, the Le Cable Refinancing and the ABO Refinancing on July 2, 2013 (described above), and the Outremer Transaction on July 5, 2013.

On March 7, 2013, Altice VII purchased the 40% remaining shares held by Codilink S.à r.l in Altice Portugal S.A..

Cabovisao Refinancing

On July 2, 2013, Altice Financing repaid the outstanding indebtedness under the existing Cabovisao Bridge Facility of EUR 203 million (the ''Cabovisao Refinancing'').

Coditel Refinancing

In July 2, 2013, Coditel Holding prepaid approximately EUR 7 million of its EUR 138 million indebtedness outstanding under the existing Coditel Senior Facility and Altice Holdings purchased substantially all of the remaining interests of the existing lenders under the existing Coditel Senior Facility.

ABO Refinancing

On July 2, 2013 ABO refinanced approximately EUR 70 million of its existing indebtedness to third parties (the ''ABO Refinancing'').

WSG and MTVC Refinancing

WSG and MTVC are indirect subsidiaries of the Group. On July 2, 2013, Altice Pool refinanced approximately (x) EUR 8 million of indebtedness of MTVC and (y) EUR 14 million of indebtedness of WSG (collectively, the ''Le Cable Refinancing'').

MCS & SportV

In October 2013, the Group completed the acquisition of two sports based content delivery channels, Ma Chaine Sport and SportV. This acquisition was completed in October 2013 and total consideration paid amounted to EUR 15 million. These channels are focussed on providing quality sports programming and are intended to serve as a platform for the potential new business segment for the Company (Content). The acquisition was fully financed using equity holders' equity.

34—Events after the reporting period (Continued)

Tricom

In November 2013, the Group confirmed that it has signed an agreement to acquire a controlling stake in Tricom, the second largest cable operator in the Dominican Republic. This acquisition is expected to explore significant synergies with the Group's French Overseas Territories operations.

Network Sharing Agreement

On November 8, 2013, HOT Mobile entered in to a network sharing agreement (the ''Network Sharing Agreement'') with Partner Communications Company Ltd. Pursuant to the terms of the Network Sharing Agreement, HOT Mobile and Partner will each own 50% of a newly formed limited partnership, which shall hold, develop and operate an advanced shared mobile network for both companies. Network Sharing Agreement enables HOT Mobile and Partner to share antennas and frequencies, and facilitates optimum utilization of the spectrum. In addition, while HOT Mobile and Partner will continue to maintain and operate separate core networks, Partner has agreed to grant HOT Mobile a right of use in its cellular communication network for the purpose of providing nation-wide cellular coverage to HOT Mobile's customers.

Also, as part of the engagement the Group will grant a guarantee on behalf of Hot Mobile Ltd. In addition, in several cases as determined in the agreements the Company will be required to grant an additional guarantee for example in case of a change in the finance ranking of the Company. The Network Sharing Agreement is subject to regulatory approvals of the Ministry of communication and the restrictive trade practices controller, which as of the balance sheet date were not achieved.

As a result of this new agreement, the existing agreement with Pelephone will be phased out until the contractual end of the agreement in 2014.

Reduction of Guarantees to the State of Israel

HOT Mobile has informed the Ministry of Communications that as of September 26, 2013, it had reached an average market share in the private sector of 11,3%, constituting an addition of 9.52% on HOT Mobile's market share at the time of the expansion of the general license for the provision of mobile radio telephone services under the cellular method (hereinafter—the license), on September 26, 2011.

In the light of HOT Mobile achieving the market share that is required as of the time of the first check, HOT Mobile has requested the Ministry to reduce the amount of the guarantee that was deposited by HOT Mobile, from an amount of NIS 695,0 (EUR 144,6 million) million to an amount of NIS 80 (EUR 16,6 million) million. This was in addition to an amount of NIS 10,0 (EUR 2,0 million) million that it paid upon the receipt of the license.

As of the date of the approval of the financial statements, the response of the Ministry of Communications has not yet been received and the guarantee therefore remained in the same amount.

ILLUSTRATIVE AGGREGATED SELECTED FINANCIAL INFORMATION OF THE GROUP

The following unaudited illustrative aggregated statements of income as of and for the years ended December 31, 2011 and 2012 (collectively, the ''Illustrative Aggregated Selected Financial Information'') present an aggregation of the amounts as derived from the audited historical consolidated financial statements of Altice VII as of and for the years ended December 31, 2011 and 2012 (the ''Historical Financial Statements''), the audited or reviewed financial information of each of the business undertakings acquired between January 1, 2011 and October 15, 2013 if such amounts are not already included within the Historical Financial Statements (the ''Pre-Acquisition Financial Information'') and any adjustments needed to align the Pre-Acquisition Financial Statement with the measurement and recognition criteria of IFRS and the accounting policies adopted for the Historical Financial Statements. Such adjustments are made where the measurements and recognition criteria and the accounting policy elections used for the Pre-Acquisition Financial Information differ substantially from the corresponding criteria applicable under the IFRS and the accounting policies used for the purposes of the Historical Financial Statements. These financial statements have not been audited or reviewed. The Illustrative Aggregated Selected Financial Information does not aggregate the financial information of Mobius Group Tricom or ODO. For further information regarding the basis of the preparation of the Illustrative Aggregated Selected Financial Information, including certain limitations with respect to such financial information, please refer to ''*Presentation of Financial and Other Information—Illustrative Aggregated Selected Financial Information*'' and Note 1 below.

The Illustrative Aggregated Selected Financial Information should be read in conjunction with the assumptions underlying the adjustments which are described in the notes accompanying them below as well as the historical and other financial statements of Altice VII included elsewhere in the Offering Memorandum. See ''*Presentation of Financial and Other Information—Financial Data*''.

To the Board of Managers of
Altice International S.à r.l.

ASSURANCE REPORT OF THE REVISEUR D'ENTREPRISES AGREE ON THE COMPILATION OF UNAUDITED ILLUSTRATIVE AGGREGATED SELECTED COMBINED FINANCIAL INFORMATION

We have completed our assurance engagement to report on the compilation of the Unaudited Illustrative Aggregated Selected Combined Financial Information of Altice International S.à r.l. (the ''Company'') by its Board of Managers (the ''Board of Managers''). The Unaudited Illustrative Aggregated Selected Combined Financial Information consists of selected statement of income and cash flow items for the years ended December 31, 2011 and December 31, 2012 (the ''Selected Items'') and related notes as set out in the Offering Memorandum to be issued by the Company on or around January 22, 2015. The applicable criteria on the basis of which the Board of Managers has compiled Unaudited Illustrative Aggregated Selected Combined Financial Information are described in Note 1 thereto.

The Unaudited Illustrative Aggregated Selected Combined Financial Information has been compiled by the Board of Managers to illustrate the impact of the transactions set out in Note 1 on the Selected Items as if the transactions described in Note 1 (the ''Transactions'') had taken place on January 1, 2011. As part of this process, the Selected Items pertaining to the Company have been extracted by the Board of Managers from the Company's consolidated financial statements as of and for the years ended December 31, 2012 and December 31, 2011on which an audit report has been published. Also, the Selected Items pertaining to the entities involved in the Transactions have been extracted by the Board of Managers from the relevant financial statements described in Note 1 to the Unaudited Illustrative Aggregated Selected Combined Financial Information.

Board of Director's responsibility for the Unaudited Illustrative Aggregated Selected Combined Financial Information

The Board of Managers is responsible for compiling the Unaudited Illustrative Aggregated Selected Combined Financial Information in accordance with the basis of preparation described in Note 1.

Responsibility of the réviseur d'entreprises agréé

Our responsibility is to express an opinion, about whether the Unaudited Illustrative Aggregated Selected Combined Financial Information has been compiled, in all material respects, by the Board of Managers in accordance with the basis of preparation described in Note 1.

We conducted our engagement in accordance with International Standard on Assurance Engagements (ISAE) 3420, *Assurance Engagements to Report on the Compilation of Pro Forma Financial Information Included in a Prospectus*, issued by the International Auditing and Assurance Standards Board. This standard requires that the *réviseur d'entreprises agréé* complies with ethical requirements and plans and performs procedures to obtain reasonable assurance about whether the Board of Managers has compiled, in all material respects, the Unaudited Illustrative Aggregated Selected Combined Financial Information in accordance with the basis of preparation described in Note 1.

For purposes of this engagement, we are not responsible for updating or reissuing any reports or opinions on any historical financial information used in compiling the Unaudited Illustrative Aggregated Selected Combined Financial Information, nor have we, in the course of this engagement, performed an audit or review of the financial information used in compiling the Unaudited Illustrative Aggregated Selected Combined Financial Information.

The purpose of the Unaudited Illustrative Aggregated Selected Combined Financial Information included in an Offering Memorandum is solely to illustrate the impact of significant events or transactions on unadjusted financial information of the entity as if the events have occurred or the transactions had been undertaken at an earlier date selected for purposes of the illustration. Accordingly, we do not provide any assurance that the actual outcome of the events or transactions at any date would have been as presented.

A reasonable assurance engagement to report on whether the Unaudited Illustrative Aggregated Selected Combined Financial Information has been compiled, in all material respects, in accordance with the criteria within a defined basis of preparation involves performing procedures to assess whether the applicable criteria used by the Board of Managers in the compilation of the Unaudited Illustrative Aggregated Selected Combined Financial Information provide a reasonable basis for presenting the significant effects directly attributable to the events or transactions, and to obtain sufficient appropriate evidence about whether:

- The related pro forma adjustments give appropriate effect to those criteria; and
- The Unaudited Illustrative Aggregated Selected Combined Financial Information reflects the proper application of those adjustments to the unadjusted financial information.

The procedures selected depend on the judgment of the *réviseur d'entreprises agréé*, having regard to the *réviseur d'entreprise agréé*'s understanding of the nature of the company, the event or transaction in respect of which the Unaudited Illustrative Aggregated Selected Combined Financial Information has been compiled, and other relevant engagement circumstances. The engagement also involves evaluating the overall presentation of the Unaudited Illustrative Aggregated Selected Combined Financial Information.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Opinion

In our opinion, the Unaudited Illustrative Aggregated Selected Combined Financial Information has been compiled, in all material respects, in accordance with the basis of preparation described in Note 1 thereto.

Restriction on distribution and use

The Unaudited Illustrative Aggregated Selected Combined Financial Information has been prepared for the purposes of inclusion within the Offering Memorandum issued by the Company on or around January 22, 2015. As a result, the Unaudited Illustrative Aggregated Selected Combined Financial Information may not be suitable for any other purpose. Our report has been prepared solely for inclusion in the aforementioned Offering Memorandum and may not be suitable for any other purpose.

1. BASIS OF PREPARATION

(a) Compilation of available financial information for the Company and the Acquired Businesses

The Illustrative Aggregated Selected Financial Information for the years ended December 31, 2011 and 2012 has been compiled under the responsibility of the Board of Managers of Altice VII S.à r.l. (the ''Company''); by aggregating for each of the selected financial statement items the following:

- the amounts relating to the selected financial statement items as derived from the audited historical consolidated financial statements of the Company as of and for each of the years ended December 31, 2011 and 2012 (collectively the ''Historical Financial Statements'') drawn up in accordance with International Financial Reporting Standards as adopted in the European Union (''IFRS'');
- the amounts relating to the selected financial statement items as derived from the audited or reviewed financial information of each of the business undertakings acquired between January 1, 2011 and October 15, 2013 (the ''Acquired Businesses'') for the periods during which such amounts are not included within the Historical Financial Statements (collectively the ''the Pre-Acquisition Financial Information''); and
- the amounts relating to adjustments that have been identified for the purposes of aligning the Pre-Acquisition Financial Information with the measurement and recognition criteria of IFRS and the accounting policies adopted by the Company for the purposes of the Historical Financial Statements (the ''Alignment Adjustments'').

(b) The Pre-Acquisition Financial Information

The Pre-Acquisition Financial Information has been derived from the following financial information pertaining to the Acquired Businesses:

Year ended December 31, 2011

- the financial statements of Outremer Telecom S.A. (''OMT'') as of and for the year ended December 31, 2011 drawn up in accordance with IFRS. Such financial statements have been audited by Constantin Associes and Ernst & Young et Autres who have issued an unmodified audit opinion thereon on March 23, 2012;
- the financial statements of Coditel Brabant S.p.r.l. (''CodiBe'') as of and for the period ended July 31, 2011 drawn up in accordance with accounting policies and practices applicable in Belgium (''Belgian GAAP''). Such financial statements have been audited by Deloitte Réviseurs d'entreprises S.c r.l. who have issued an unmodified audit opinion thereon on October 1, 2011;
- the annual accounts of Coditel S.à r.l. (''CodiLu'') as of and for the period ended July 31, 2011 drawn up in accordance with accounting policies and practices applicable in Luxembourg (''Lux GAAP''). Such annual accounts have been audited by Deloitte S.A. who have issued an unmodified audit opinion thereon on May 31, 2012;
- the special-purpose financial statements of Cabovisao S.A. as of and for the year ended December 31, 2011 drawn up in accordance with IASB IFRS. Such financial statements have been audited by Baker Tilly, PG & Associados, SROC S.A. have issued a modified review opinion thereon on November 21, 2013; and
- the special-purpose consolidated financial statements of Winreason S.A. as of and for the year ended December 31, 2011 drawn up in accordance with IFRS. Such financial statements have been audited by Deloitte & Associados SROC, S.A. who have issued a modified audit opinion thereon on September 25, 2013; and
- the financial statements of Ma Chaine Sport S.A.S. (''MCS'') as of and for the year ended December 31, 2011 drawn up in accordance with French GAAP. Such financial statements have been audited by KPMG Audit who have issued an unmodified audit opinion thereon on May 31, 2012.

Year ended December 31, 2012

- the financial statements of Outremer Telecom S.A. (''OMT'') as of and for the year ended December 31, 2012 drawn up in accordance with IFRS. Such financial statements have been audited by Constantin Associes and Ernst & Young et Autres who have issued an unmodified audit opinion thereon on April 18, 2013;
- the special-purpose financial statements of Cabovisao S.A. as of and for the period ended February 29, 2012 drawn up in accordance with IASB IFRS. Such financial statements have been reviewed by Baker Tilly, PG & Associados, SROC, S.A. who have issued a modified audit opinion thereon on October 14, 2013;
- the special-purpose consolidated financial statements of Winreason S.A. as of and for the year ended December 31, 2012 drawn up in accordance with IFRS. Such financial statements have been audited by Deloitte & Associados SROC, S.A. who have issued a modified audit opinion thereon on September 25, 2013;
- the financial statements of Ma Chaine Sport S.A.S. (''MCS'') as of and for the year ended December 31, 2012 drawn up in accordance with French GAAP. Such financial statements have been audited by KPMG Audit who have issued an unmodified audit opinion thereon on May 23, 2013; and
- the unaudited financial statements of Sportv as of and for the year ended December 31, 2012 drawn up in accordance with IFRS.

The presentation and classification of the selected financial statement items that have been derived from the historical financial statements of the Acquired Businesses have been modified in order to align with the presentation and classification criteria that have been retained for the purposes of the Historical

Financial Statements of the Company. Accordingly, certain reclassifications discussed below have been made to the selected financial statement items derived from the historical financial statements of the Acquired Businesses to present the Illustrative Aggregated Selected Financial Information that is aligned with the presentation and classification criteria applied by the Company in the preparation of its Historical Consolidated Financial Information.

(c) The Alignment Adjustments

The Alignment Adjustments are primarily composed of the following elements:

- In those instances where the amounts included in the Pre-Acquisition Financial Information have been drawn up in accordance with an accounting framework the measurement and recognition criteria of which differs substantially from the corresponding criteria applicable under IFRS, alignment adjustments have been prepared by the Board of Managers in order to substantially align the contribution of the Acquired Businesses to the Illustrative Aggregated Selected Financial Information with the measurement and recognition criteria of IFRS. The key adjustments and any exceptions thereto are described in note 2.
- In those instances where the amounts included in the Pre-Acquisition Financial Information have been drawn up in accordance with accounting policy elections that differ substantially from the accounting policies retained by the Company for the purposes of the Historical Financial Statements no alignment adjustments have been prepared by the Board of Managers in order to substantially align the contribution of the Acquired Businesses to the Illustrative Aggregated Selected Financial Information with the accounting policies retained by the Company.

(d) Translation of historical financial information denominated in currencies other than the Euro

The historical financial statements of HOT, from which amounts have been derived in preparing the Illustrative Aggregated Selected Financial Information for the year ended December 31, 2011, have been drawn up in Israeli Shekel (''NIS''). The relevant amounts have been translated into Euro (''EUR''), for the purposes of their inclusion within the Illustrative Aggregated Selected Financial Information, using the average daily exchange rates over the relevant period as described below:

Period from January 1, 2011 to March 16, 2011 . . . . 1 NIS = 0.201 EUR

(e) Key limitations to the basis of preparation

The Illustrative Aggregated Selected Financial Information for the years ended December 31, 2011 and 2012 do not purport to represent the performance, cash flows or financial position that the Company would have reported had the Acquired Businesses been subsidiaries of the Company during the entire length of the periods presented. They also do not purport to represent the performance and cash flows of the Company for any future period or its financial position at any future date. The Illustrative Aggregated Selected Financial Information do not reflect the effect of any anticipated synergies and efficiencies associated with combining the ONI group, the OMT Group and the other subsidiaries of the Altice VII Group.

In addition, only a complete set of consolidated financial statements as defined in IAS 1 can provide a fair presentation of the financial position, financial performance and cash flows of an entity in accordance with IFRS. The Illustrative Aggregated Selected Financial Information do not purport to represent a complete set of financial statements drawn up in accordance with IFRS, and are solely prepared to illustrate the aggregation of the Historical Financial Statements with the Pre-Acquisition Financial Information.

In preparing the Illustrative Aggregated Selected Financial Information, the Board of Managers has determined that the extent of any transactions between the Company and the Acquired Businesses is negligible, and hence no adjustments relating to the elimination of such transactions or balances have been made.

2. ACCOUNTING FRAMEWORK ALIGNMENT ADJUSTMENTS

(a) Revenues and expenses

IFRS requires discounts to be recognized as a reduction of revenues over the length of the contractual arrangement with the customer. In addition, certain expenses may be restated as capital expenditure based on the nature of the expense.

Alignment adjustment in relation to Coditel S.à r.l.

The Pre-Acquisition Financial Information relating to Coditel S.à r.l. is drawn up in accordance with the measurement and recognition criteria of Lux GAAP, which does not require mandatory accounting for disconnection fees. Had Coditel S.à r.l. adopted the aforementioned measurement and recognition criteria of IFRS, illustrative adjustments result in an increase in other operating expenses of 0.1 million EUR for the year ended December 31, 2011.

The Pre-Acquisition Financial Information relating to Coditel S.à r.l. relates to the period from January 1, 2011 to July 31, 2011. For the purpose of building the Selected Aggregated Financial Information the Board of Managers recorded the following adjustments which reflect the activity for the period from July 1, 2011 to July 31, 2011: (i) revenues decreased by 1.4 million EUR; (ii) other operating expenses decreased by 0.1 million EUR; (iii) general and administrative expenses decreased by 0.1 million EUR.

Alignment adjustment in relation to Coditel Brabant S.p.r.l.

The Pre-Acquisition Financial Information relating to Coditel Brabant S.p.r.l. is drawn up in accordance with the measurement and recognition criteria of Belgian GAAP, which permits such discounts to be recognized immediately as a reduction to revenues at inception of the contract. Alignment adjustments have been made to record the changes that would result to revenues had Coditel S.p.r.l. adopted the aforementioned measurement and recognition criteria of IFRS. Such illustrative adjustments result in increase to revenue of 0.2 thousand EUR for the year ended December 31, 2011. In addition, Coditel Brabant also applied IFRS adjustments related to the accounting for employee pension benefits and disconnection fees, which resulted in an increase in other operating expenses of 0.3 million EUR.

The Pre-Acquisition Financial Information relating to Coditel Brabant S.p.r.l relates to the period from January 1, 2011 to July 31, 2011. For the purpose of building the Selected Aggregated Financial Information the Board of Managers recorded the following adjustments which reflect the activity for the period from July 1, 2011 to July 31, 2011: (i) revenues decreased by 4.0 million EUR; (ii) purchases and subcontracting services decreased by 0.6 million EUR; (iii) other operating expenses decreased by 0.4 million EUR; (iv) other sales and marketing expenses decreased by 0.2 million EUR; and (v) general and administrative expenses decreased by 0.2 million EUR.

Alignment adjustment in relation to Ma Chaine Sport SAS.

The Pre-Acquisition Financial Information relating to Ma Chaine Sport S.A.S. is drawn up in accordance with the measurement and recognition criteria of French GAAP, which permits no capitalisation of costs related to the acquisition of content for delivery to final customers. Given the exclusive nature of such content, IFRS rules allow the capitalisation and recognition of such costs as intangible assets. Had Ma Chaine Sport adopted the aforementioned measurement and recognition criteria of IFRS, such illustrative adjustments result in a decrease in purchasing and subcontracting costs of 3.4 million EUR and in other operating expenses of 1.1 million EUR for the year ended December 31, 2011 and 4.7 million EUR and 1.6 million EUR for the year ended December 31, 2012.

3. SUPPLEMENTS NOTES TO THE ILLUSTRATIVE STATEMENT OF SELECTED AGGREGATED FINANCIA

The Illustrative Aggregated Selected Financial Information for the years ended December 31, 2011 and 2012 has b

Statutory auditors' review report on the condensed consolidated interim financial statements

Period from January 1 to September 30, 2014

This is a free translation into English of the statutory auditors' limited review report on the condensed consolidated interim financial statements for the period from January 1 to September 30rd, 2014 issued in the French language and is provided solely for the convenience of English speaking users. This report should be read in conjunction with, and is construed in accordance with, French law and professional standards applicable in France.

To the Chairman and Chief Executive Officer,

As statutory auditors of Numericable Group S.A. and at your request, we have performed a review of the accompanying condensed consolidated interim financial statements of the Company for the period from January 1 to September 30, 2014.

These condensed consolidated interim financial statements are the responsibility of the Board of Directors. Our role is to express a conclusion on these financial statements based on our limited review.

We conducted our review in accordance with professional standards applicable in France. A review primarily consists of making inquiries of persons responsible for financial and accounting matters and applying analytical procedures. A review is substantially less in scope than an audit conducted in accordance with professional standards applicable in France and consequently the assurance obtained that the condensed consolidated interim financial statements, taken as a whole, are free of material misstatement is moderate and less than that obtained by an audit.

Based on our review, we did not identify any material misstatements likely to call into question the compliance of the condensed consolidated interim financial statements with IAS 34, standard of the IFRSs as adopted by the European Union and applicable to Interim Financial Reporting.

Without qualifying the conclusion expressed above, we draw your attention to Notes 2.1, 2.3 and 2.4, that describe the terms and conditions of the agreement entered into with Vivendi regarding the acquisition of SFR and the financing conditions related to this acquisition.

Paris La Défense and Neuilly-sur-Seine, October 24, 2014

Numericable Group

CONSOLIDATED STATEMENT OF COMPREHENSIVE INCOME

(in thousands of euros)	Notes	September 30, 2014	September 30, 2013
Net income (loss) attributable to owners of the Company		**(177,825)**	**60,046**
Items that may subsequently be reclassified to profit or loss:			
Cumulative translation adjustments		—	—
Cash flow hedges[(1)]	**2.4/16**	(207,394)	—
Change in Fair value gains (losses) on available-for-sale financial assets		—	—
Tax on items recognized directly in other comprehensive income[(1)]	**2.4/10.2**	78,809	—
Items that will not subsequently be reclassified to profit or loss:			
Amortization of actuarial net gain (loss)[(2)]		—	—
Tax on items recognized directly in other comprehensive income		—	—
Total comprehensive income (loss) attributable to owners of the Company		**(306,410)**	**60,046**

As the Group operates only in France, the functional and presentation currency of all the entities within the Group is the euro. As a result, no cumulative exchange adjustments were recognized as of September 30, 2014 or 2013.

(1) As indicated in Note 2.4, the effective portion of the change in fair value of derivative instruments qualified as cash flow hedges is recognized through other comprehensive income. It is reclassified to profit or loss when the hedged item impacts net income.

As of September 30, 2014, the fair value of these financial instruments, excluding accrued interest not yet due, was thus recorded in other comprehensive income for 207,394 thousand euros. The Group also recorded a deferred tax asset on these instruments in other comprehensive income for 78,809 thousand euros.

(2) The application of IAS 19R has no significant impact on the condensed interim financial statements for the periods ended September 30, 2014 and September 30, 2013. Thus, no actuarial gains and losses were recognized in other comprehensive income.

Net increase (decrease) in cash and cash equivalents		**(87,188)**	**12,905**
Cash and cash equivalents—opening balance		**101,365**	**7,996**
Cash and cash equivalents—closing balance		**14,177**	**20,901**

(1) As of September 30, 2014, other non-cash items mainly include:

- — the amortization of borrowing costs using the effective interest rate method for 37.6 million euros (without any impact on cash and cash equivalents);
- — expenses relating to stock option plans for 3.2 million euros, without any impact on cash and cash equivalents.

(2) Investments in property, plant, equipment and intangible assets purchased under finance leases had no impact on the Statement of Cash Flows at the time of acquisition. They represent 25 million euros as of September 30, 2014 and September 30, 2013.

(3) Reflects, as of September 30, 2013, the price paid within the context of the acquisition of Valvision, which was completed in June 2013 (3.3 million euros).

(4) Corresponds to the amount originally placed in the escrow accounts, within the context of the acquisition of SFR. The escrow accounts (line ''Restricted cash'' of the Consolidated Statement of Financial Position) show a balance of 9,509,077 thousand euros as of September 30, 2014 due to the revaluation of the dollar as of September 30, 2014 that led to revalue the escrow accounts by 615,145 thousand euros (also refer to Note 13).

(5) Correspond (i) to the implementation of the new financing in the total amount of 11,653 million euros net of expenses paid of 77 million euros (see also Note 2.3) and (ii) to the drawdown of the Revolving Credit Facility (''RCF'') facility for 50 million euros.

(6) This amount primarily reflects debt extinguished during refinancing transactions in May 2014 in the total amount of 2,638 million euros (see also Note 2.3).

NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS

NUMERICABLE Group

Condensed Interim Consolidated Financial Statements

for the nine months period ended September 30, 2014

1 Basis of preparation of the Condensed Interim Consolidated Financial Statements

1.1 Numericable Group

Numericable Group (hereinafter the ''**Company**'') is a limited liability company (*société anonyme*) governed by French law incorporated in August 2013, with its registered office located in France.

On November 7, 2013, Numericable Group received, within the framework of the Company's IPO, the contribution of two holding companies incorporated in Luxembourg, Ypso Holding SARL and Altice Lux Holding SARL, the parent companies of Ypso France and Altice B2B France respectively.

Ypso France, which operates the Numericable business, is a French cable television service provider. Its core products are premium digital television packages, which are available to households in areas that are triple-play enabled. Ypso France also provides French residential customers with broadband Internet, fixed telephone lines and mobile telecommunications services.

Altice B2B France, through Completel, its main operational entity, manages the largest French alternative ''FTTO'' (fiber-to-the-office) network, and is the third largest French alternative Digital Subscriber Line network. Completel SAS provides business customers with a comprehensive service offering, including data transmission, very high speed Internet, telecommunications services, convergence and mobility solutions, through fiber and DSL networks.

On November 7, 2013, the Board of Directors:

- priced the IPO at 24.80 euros per share;
- decided to increase share capital by a total amount of 250,000 thousand euros through a public offering (including a 10,081 thousand euros capital increase through the issuance of new shares and 239,919 thousand euros in additional paid-in capital);
- proposed a capital increase reserved for employees, which was ultimately carried out for 1,034 thousand euros (including a 52 thousand euros capital increase through the issuance of new shares and 982 thousand euros in additional paid-in capital).

Trading on the shares began on November 8, 2013.

1.2 Basis of preparation of the Interim Consolidated Financial Statements

The Condensed Interim Consolidated Financial Statements as of September 30, 2014 were approved by the Company's Board of Directors on October 24, 2014. The Condensed Interim Consolidated Financial Statements for the nine months period ended September 30, 2014 include the Company and its subsidiaries (referred to together as ''**the Consolidated Group**'') and the Group's share in associates and jointly controlled companies. They are presented in euros, the functional currency of the Company.

The Condensed Interim Consolidated Financial Statements as of September 30, 2014 were prepared in conformity with international accounting standard IAS 34, ***Interim Financial Reporting***, as adopted by the European Union (''**EU**'').

They must be read in conjunction with the Group's Consolidated Financial Statements for the year ended December 31, 2013 and prepared in accordance with ***International Financial Reporting Standards*** as adopted by the European Union (''**IFRS**'').

With the exception of the principles described below and the specific valuation methods applied for Interim Financial Reporting, the bases of preparation, accounting methods and policies applied in preparing the Interim Consolidated Financial Statements are unchanged on those used for the preparation of the Consolidated Financial Statements for the year ended December 31, 2013, as specifically described in Note 1 on the bases for preparing condensed interim consolidated financial statements, in Note 2 on the accounting rules and methods, and in Note 3 on the significant accounting policies.

1 Basis of preparation of the Condensed Interim Consolidated Financial Statements (Continued)

1.3 Applicable standards as of September 30, 2014

The following texts were applied in preparing the Condensed Interim Consolidated Financial Statements from January 1, 2014.

As mentioned above, the accounting methods and policies applied in the Condensed Interim Consolidated Financial Statements are identical to those adopted for the Consolidated Financial Statements for the year ended December 31, 2013, with the exception of the standards and interpretations adopted by the European Union, for which application is mandatory as of January 1, 2014. Application of these new standards and interpretations did not have a material impact for the Group:

– IAS 27 (revised in 2011) Separate Financial Statements (''**IAS 27 revised**'');
– IAS 28 (revised in 2011) Investments in associates and joint ventures (''**IAS 28 revised**'');
– IFRS 10 Consolidated Financial Statements (''**IFRS 10**'');
– IFRS 11 Joint arrangements (''**IFRS 11**'');
– IFRS 12 Disclosure of interests in other entities (applicable as of January 1, 2014 at the latest for the Group) (''**IFRS 12**'');
– Amendment to IAS 32 ''Presentation—Offsetting of Financial Assets and Financial Liabilities'';
– Amendment to IAS 36 ''Recoverable Amount Disclosures for Non-Financial Assets'';
– Amendment to IAS 39 ''Novation of derivatives and continuation of hedge accounting.''

These new standards and amendments had no significant impact on the condensed interim consolidated financial statements as of September 30, 2014 or had impacts solely in terms of presentation and disclosures in the notes.

Incidentally, the Group did not opt for early application of the standards and interpretations which will become mandatory after December 31, 2014.

Management is currently assessing the potential impact of the application of these standards and amendments on the Statement of Income, the Financial Position Statement, the Cash Flows Statement and the Notes to the Financial Statements. At this stage it does not anticipate any material impact resulting from the application of these standards, interpretations and amendments with the exception of the application of IFRIC 21, the impacts of which are currently being assessed by the Group.

1.4 Management's main estimates and judgment

The drafting of the Condensed Interim Consolidated Financial Statements, prepared in conformity with IFRS, entails the Group making a certain number of estimates and assumptions, which have been deemed to be realistic and reasonable.

Therefore, in applying accounting policies during the preparation of the Consolidated Financial Statements as described in Note 2 to the Consolidated Financial Statements for the year ended December 31, 2013, management is required to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses.

Such estimates are prepared based on the going concern assumption, established using currently available information and in view of the current economic environment. In the prevailing economic environment, changes in facts and circumstances may result in revised estimates or assumptions, which could affect the financial position, results of operations and cash flows of the Group.

1 Basis of preparation of the Condensed Interim Consolidated Financial Statements (Continued)

The significant estimates made by Management in preparing the Condensed Interim Consolidated Financial Statements are similar to those described in Note 3 to the Consolidated Financial Statements for the year ended December 31, 2013.

1.5 Seasonal nature of activity

Revenues from standard analog TV services, basic and premium cable TV services and high bandwidth Internet services are mainly based on a fixed monthly fee and are thus not subject to seasonal variations. The number of B2C customers generally increases from September to January as households tend to make more purchases during back-to-school and end of year periods. The number of B2B customers usually increases in June and December when private and public companies establish their budget, whereas revenues arising from B2B telephony services tend to follow the cycle of school holidays, with especially low activity during summer and winter holidays, as well as in May due to the numerous public holidays.

1.6 Comparative information

The comparative data presented for the nine-month period ended September 30, 2013 corresponds to the combined financial statements of the two sub-groups, Ypso and Altice B2B (hereinafter referred to as the ''**Two Groups**'').

Before being contributed to Numericable Group on November 7, 2013, the Two Groups were entities under joint control (controlled jointly by the Carlyle, Cinven and Altice private equity funds).

Accordingly, the financial data presented for comparative purposes in the Statement of Income and in the Statement of Cash Flows reflects the historical revenues, expenses and cash flows that were directly related to the subgroups, Ypso and Altice B2B, which formed two separate groups on September 30, 2013.

1.7 List of entities included in the scope of consolidation

The list of entities included in the 2013 consolidated financial statements is detailed in Note 1.4 to the Group's 2013 consolidated financial statements.

During the nine-month period ended September 30, 2014, two new companies were added to the scope of consolidation: Numericable US SAS (a company governed by French law) and Numericable US LLC (a company governed by US law) which were formed as part of the acquisition of SFR in order to include portion of the new funding raised by the Group in May 2014 (see Note 2.3).

These two companies are wholly-owned and fully consolidated as of September 30, 2014.

1.8 Going concern assumption

The Group was formed by a series of acquisitions, which were essentially financed by outside loans. The construction and subsequent modernization of the network have also required substantial investment. These two factors, along with the pending acquisition of SFR, explain the Group's financial structure, namely the significant proportion of financial liabilities in relation to consolidated equity, as well as the significant finance cost.

Currently, the Group services its debt and funds its investments through net cash flows from operations. Note 2.3 moreover specifies:

– that in May 2014 the Group refinanced its Senior Debts, which allowed it to reschedule a large portion of its long-term financial debt;

1 Basis of preparation of the Condensed Interim Consolidated Financial Statements (Continued)

– the terms and conditions of the financing of the acquisition of SFR and the impact, should the operation not be carried out.

Under these conditions, and in view of the latest updated cash flow projections, the Board of Directors believes that the Group will be able to finance its cash requirements at a minimum during the 12-month period following the close of the condensed interim consolidated financial statements as of September 30, 2014, and to meet its obligations in respect of its debt during this period.

As a result, the Condensed Interim Consolidated Financial Statements of the Group as of September 30, 2014 and 2013 have been prepared on a going concern basis.

2 Significant events

2.1 Agreement with Vivendi to purchase SFR

On April 5, 2014, the supervisory board of the Vivendi Group announced it had accepted an offer from Altice, the majority shareholder of Numericable Group, to purchase its subsidiary SFR.

On June 20, 2014, Vivendi, Altice and Numericable Group announced they had signed a final agreement to combine SFR and Numericable Group following a discussion with the representative bodies of the personnel concerned.

On the date this agreement is finalized, Vivendi will receive 13.5 billion euros in cash (excluding earn-out) and will keep a 20% equity interest in the new entity, with the possibility of subsequently transferring it to Altice, after a one-year lock-up period.

Vivendi may likewise receive an earn-out of 750 million euros depending on the new Group's future financial performance.

Completion of this agreement is subject to certain conditions, in particular obtaining approval from the competition authority, which declared the dossier filed by Numericable Group as complete on June 24, 2014.

2.2 Agreement to purchase Virgin Mobile

On May 16, 2014 Numericable Group announced it had entered into exclusive negotiations with Omer Telecom for the acquisition of Virgin Mobile.

The takeover offer submitted by the Company proposed a price corresponding to an enterprise value of 325 million euros. Vivendi will invest 200 million euros as its share in financing this acquisition.

Numericable Group announced on June 27, 2014 that it had signed with the shareholders of the Group's holding company operating in France as Virgin Mobile, Omer Telecom Limited, the final purchase agreement for the entirety of the capital of Omer Telecom Limited after consulting with the representative bodies of the personnel concerned.

Completion of this agreement is subject to certain conditions, in particular obtaining approval from the competition authority.

2.3 Financing the acquisition of SFR and refinancing the existing debt

In order to finance the acquisition of SFR, in May 2014 Numericable Group raised the equivalent of 11,653 million euros through bond issues and secured new bank loans in both euros and dollars.

Bonds issued on May 8, 2014

The bonds, which were issued on May 8, 2014, enabled the equivalent of 7,873 million euros to be raised, comprising the equivalent of 5,623 million euros in dollars and 2,250 million euros. The proceeds

2 Significant events (Continued)

from these bonds were entirely placed in escrow accounts, and appear on the line ''Restricted cash'' of the Consolidated Statement of Financial Position as of September 30, 2014.

The bonds break down as follows:

Bond currency	Maturity	Coupon in foreign currency	Coupon in euros*	Original amount in millions of currency	Original amount in millions of euros**	Outstandings as of September 30, 2014 in millions of euros***
EUR	May 2022	5.375%	5.375%	1,000	1,000	1,000
EUR	May 2024	5.625%	5.625%	1,250	1,250	1,250
USD	May 2019	4.875%	4.354%	2,400	1,736	1,900
USD	May 2022	6.000%	5.141%	4,000	2,893	3,167
USD	May 2024	6.250%	5.381%	1,375	994	1,089
Total					**7,873**	**8,406**

* Interest rate of the hedge instruments.

** Equivalent value at the exchange rate of the hedge instruments.

*** Amounts excluding accrued interest and the impact of the effective interest rate.

See also Note 16.

Bank borrowings secured on May 21, 2014

The new bank loans were drawn on May 21, 2014, in a total amount equivalent to 3,780 million euros, comprising the equivalent of 1,880 million euros in dollars, and 1,900 million euros.

The bank borrowings break down as follows:

Loan currency	Maturity	Benchmark interest rate	Margin in currency*	Margin in euros	Original amount in millions of currency	Original amount in millions of euros**	Outstandings as of September 30, 2014 in millions of euros***
EUR	May 2020	3M Euribor	4.500%	4.500%	1,900	1,900	1,900
USD	May 2020	3M Libor	3.813%	4.380%	1,394	1,008	1,104
USD	May 2020	3M Libor	3.809%	4.375%	1,206	872	955
Total						**3,780**	**3,959**

* With a minimum (''**floor**'') of 0.75%.

** Equivalent value at the exchange rate of the hedge instruments.

*** Amounts excluding accrued interest and the impact of the effective interest rate.

The money raised through these new loans was primarily used by the Group for 2,750 million euros in order to:

– repay all of the Group's former Senior Debt for 2,638 million euros;

– pay early repayment fees on bonds for 89 million euros;

– pay a portion of the fees for securing new financing.

2 Significant events (Continued)

The repayment of the Group's former Senior Debt represents the settlement of existing debt, and consequently:

- the costs of settling the bond loans incurred by the Group were recorded under other financial expenses for 88.8 million euros;
- the costs relating to the settlement of the extinguished debt, which were originally recorded at amortized cost, were recognized in other financial expenses for 22.1 million euros;

The unused proceeds from the bank borrowings, i.e. 1,030 million euros, were placed in the escrow accounts, thereby bringing the total amount recorded in the escrow accounts to an equivalent of 8,894 million euros (after deduction of the (OID) banking fees on the bank loans which were drawn but not used as of September 30, 2014. These costs, which represent an equivalent of 9.5 million euros, will only be due if the acquisition of SFR is finalized, and were recorded under prepaid expenses in the Statement of Financial Position as of September 30, 2014).

The balance of the total amount payable in cash to Vivendi on the date the acquisition is finalized (i.e. 4.6 billion euros, to reach 13.5 billion euros, excluding any earn-out) will be financed by a capital increase of Numericable Group, subject to obtaining prior approval for the operation from the competition authority. Altice SA, the Group's majority shareholder, has committed to subscribing to this capital increase for 75%. The remaining 25% is being guaranteed by banks.

Moreover, on May 21, 2014, the Group signed a new Revolving Credit Facility (''**RCF**'') agreement for a maximum amount of 750 million euros, 300 million euros of which is immediately available, with the balance becoming available upon finalization of the acquisition of SFR (this line has been drawn for 50 million euros as of September 30, 2014).

The costs linked to securing the bonds, bank loans and the RCF, i.e. 250 million euros, are recognized at amortized cost using the effective interest method in conformity with IAS 39, and are thus spread over the maturity of the debt.

It is noted that as of September 30, 2014, the Group has only paid the portion of expenses which corresponds to the tranches drawn and used, i.e. 77 million euros. The balance of the expenses, i.e. 173 million euros, will only be due and thus paid if the acquisition of SFR is finalized.

If SFR is not purchased:

In the event that the acquisition of SFR is not ultimately carried out:

- the cash deposited in the escrow accounts on May 8 and May 21, which results from financing as described above, will be fully used to repay all of the bonds and a portion of the bank loans;
- Numericable Group will remain responsible for the payment of interests on the debt. The amount of interest paid since the set-up of the financing represents around 44 million euros per month.

2.4 Derivative instruments and hedge accounting

In May 2014, in parallel with the various debts drawn noted above, Numericable Group established several derivative instruments which have the aim of neutralizing the foreign exchange risk affecting future financial flows (nominal and coupons).

The derivative instruments taken out by the Group are twofold in nature:

- Cross currency swaps through which, in addition to swapping nominal amounts, the Group receives a fixed rate in dollars and pays a fixed rate in euros. These derivatives hedge the bonds issued in dollars and are qualified as cash flow hedges. The effective portion of the change in fair value of these derivatives is recorded through other comprehensive income. It will be released to profit or loss when the hedged item impacts net income.

2 Significant events (Continued)

As of September 30, 2014, the fair value of these financial instruments was recorded in other comprehensive income for 207,394 thousand euros. The Group also recorded deferred tax on these instruments in other comprehensive income for 78,809 thousand euros as of September 30, 2014.

– Cross currency swaps through which, in addition to swapping nominal amounts, the Group receives a floating rate in dollars (3 month LIBOR) and pays a floating rate in euros (3 month EURIBOR). These derivative instruments hedge the bank loans issued in dollars, and are recorded at Fair Value through the Statement of Income (derivative instruments held for trading). These derivatives are thus recorded at fair value in the Statement of Financial Position, with changes in value taken to profit or loss.

  As of September 30, 2014, the fair value of these financial instruments was recognized as a financial income for 78,854 thousand euros. The Group also recorded deferred tax on these instruments in its net income for (33,354) thousand euros as of September 30, 2014.

See also Notes 10.2, 16.3 and 17.

2.5 Liquidity contract signed with Exane BNP Paribas

In early 2014, the Group signed a Liquidity Contract with Exane BNP Paribas in order to improve the liquidity of its securities and the regularity of their prices on NYSE Euronext Paris. A liquidity account of 3 million euros was opened to allow Exane BNP Paribas to make transactions under the terms of the liquidity contract. The Group owns 40,544 shares as of September 30, 2014.

2.6 Granting of new stock option plans

Stock option plan—January 2014

On January 10, 2014, the Board of Directors adopted a stock option plan in favor of certain corporate officers and employees of Numericable Group.

This plan covers a total of 287,618 subscription options for 287,618 shares. The strike price is €27.62 per share.

Stock option plan—May 2014:

On May 28, 2014, the Board of Directors adopted a stock option plan in favor of an employee of the Group.

This plan covers a total of 50,000 subscription options for 50,000 shares. The strike price is €38.91 per share.

See also Note 6.

2.7 Deferred tax assets on losses carried forward

During the first-half of 2014, a new tax group was set up at Numericable Group level, effective retroactively as of January 1, 2014. This new tax group comprises Numericable Group as Group head, and the companies resulting from the two former tax groups, Ypso and Altice, which chose to apply the expanded base mechanism.

Based on updated forecasts on the use of loss carryforwards existing within the new tax group thus established and deemed probable over a 5-year period, an additional deferred tax asset of 70 million euros was recognized as of September 30, 2014.

The total amount of deferred tax assets on loss carryforwards was thus brought to 186 million euros as of September 30, 2014.

See also Note 10.2.

2 Significant events (Continued)

2.8 Tax audits

In June 2014, the Group received notices of an accounting audit (corporate income tax) for the 2010, 2011 and 2012 fiscal years for NC Numericable, Numericable and Est Videocommunication.

See Note 21.

3 Segment information

As explained in Note 2.7 to the Consolidated Financial Statements for the year ended December 31, 2013, the Group has identified three operating segments:

- B2B Operations
- B2C Operations
- Wholesale

3.1 Statement of Income

The following tables provide, for each period presented, the contribution of each segment to the Statement of Income (from ''Revenue'' to ''Operating income before depreciation, amortization and impairment''). Intra-segment sales have been eliminated in the column ''Eliminations''.

September 30, 2014 (in thousands of euros)	B2C	B2B	Wholesale	Eliminations	Total
Revenue	**664,889**	**243,320**	**155,973**	**(68,764)**	**995,419**
Purchases and subcontracting services	(315,368)	(151,979)	(66,251)	68,764	(464,834)
Staff costs and employee benefits expense	(65,970)	(47,711)	(4,566)	—	(118,247)
Taxes and duties	(15,620)	(5,556)	(3,163)	—	(24,339)
Provisions	(10,610)	660	—	—	(9,950)
Other operating income	49,303	17,141	—	—	66,444
Other operating expense	(1,373)	(9)	—	—	(1,382)
Operating income before depreciation, amortization and impairment (EBITDA)	**305,251**	**55,866**	**81,994**	**—**	**443,111**

September 30, 2013 (in thousands of euros)	B2C	B2B	Wholesale	Eliminations	Total
Revenue	**648,510**	**227,770**	**140,729**	**(48,100)**	**968,909**
Purchases and subcontracting services	(301,241)	(130,478)	(64,920)	48,100	(448,539)
Staff costs and employee benefits expense	(60,509)	(43,637)	(4,839)	—	(108,985)
Taxes and duties	(15,784)	(5,936)	(3,848)	—	(25,568)
Provisions	(954)	(298)	33	—	(1,219)
Other operating income	42,613	15,890	11	—	58,514
Other operating expense	(6,793)	—	—	—	(6,793)
Operating income before depreciation, amortization and impairment (EBITDA)	**305,842**	**63,311**	**67,166**	**—**	**436,319**

3 Segment information (Continued)

3.2 Goodwill

Goodwill breaks down by segment as follows as of September 30, 2014 and December 31, 2013:

Net carrying amount (in thousands of euros)	September 30, 2014	December 31, 2013
B2C	984,583	984,583
B2B[(a)]	500,309	499,045
Wholesale	—	—
Total	**1,484,892**	**1,483,628**

(a) See Note 11 for an explanation of the 1.3 million euros increase in B2B goodwill during the nine-month period ended September 30, 2014.

As of September 30, 2014, the Group did not identify any indication of impairment.

3.3 Investments

Investments in property, plant and equipment and intangible assets (net of investment grants received) break down by segment as follows as of September 30, 2014 and 2013:

(in thousands of euros)	September 30, 2014	September 30, 2013
B2C	159,184	112,183
B2B	44,732	50,028
Wholesale	46,283	43,697
Total	**250,199**	**205,907**

4 Revenue

Consolidated revenue breaks down by segment as follows:

(in thousands of euros)	September 30, 2014	September 30, 2013
B2C revenue	660,644	645,385
B2B revenue	240,301	225,483
Wholesale revenue	94,475	98,040
Total revenues	**995,419**	**968,909**

It is stipulated that all revenues are generated in France.

5 Purchases and subcontracting services

Purchases and subcontracting services break down as follows:

(in thousands of euros)	September 30, 2014	September 30, 2013
TV content, Internet and telephony costs	(242,900)	(236,436)
Outsourcing and purchased services	(70,706)	(71,240)
Advertising	(22,802)	(27,942)
Fees paid to other third parties	(42,421)	(25,227)
Royalties and license fees paid	(9,038)	(9,164)
Rights of way paid	(8,073)	(10,802)
Rental and leasehold charges	(22,148)	(19,877)
Energy	(19,641)	(18,550)
Bad debt expense	(1,976)	(6,088)
Postal expense	(3,496)	(3,035)
Transportation expense	(3,484)	(3,017)
Repair and maintenance expense	(9,246)	(8,515)
Miscellaneous operating expenses	(8,903)	(8,645)
Purchases and subcontracting services	**(464,834)**	**(448,539)**

6 Staff costs and employee benefits expense

The staff costs and employee benefits expense breaks down as follows:

(in thousands of euros)	September 30, 2014	September 30, 2013
Wages and salaries	(75,403)	(71,020)
Social security charges	(34,414)	(33,462)
Employee profit-sharing	(4,759)	(4,503)
Costs relating to stock option plans[a]	(3,671)	—
Staff costs and employee benefits expense	**(118,247)**	**(108,985)**

(a) Includes 424 thousand euros in respect of employer contributions due on the allocation of shares and 3,247 thousand euros for the cost of the plan recognized in 2014.

The main assumptions underlying the valuation of the various stock option plans are listed below:

	Stock options— November 2013	Stock options— January 2014	Stock options— May 2014
Number of options granted	2,845,229	287,618	50,000
Unit fair value at the grant date (in euros)	3.41	3.98	5.38
Total fair value at the grant date (in thousands of euros)	9,702	1,145	269
Share price at the grant date (in euros)	24.80	28.34	39.50
Strike price of the option (in euros)	24.80	27.62	38.91
Expected volatility (weighted average)	25%	25%	25%
Expiry date (maturity)	November 2021	January 2022	May 2022
Expected dividends	4%	4%	4%
Risk-free interest rate (government bonds)	0.75%	1%	0.50%

In the nine-month period ended September 30, 2014, the staff costs and employee benefits expense includes income of 1,472 thousand euros in respect of the French Competitive Employment Tax Credit (CICE). No income was recognized in respect of the CICE tax credit as of September 30, 2013.

7 Other operating income

The majority of other operating income breaks down as follows:

(in thousands of euros)	September 30, 2014	September 30, 2013
Own work capitalized[(a)]	62,251	53,139
Proceeds from sale of assets	3,750	5,134
Other	443	241
Other operating income	**66,444**	**58,514**

(a) Own work capitalized relates to work on the network performed by employees of the Group with a view to upgrading the cable network.

8 Other operating expense

The majority of other operating expenses breaks down as follows:

(in thousands of euros)	September 30, 2014	September 30, 2013
Net carrying amount of assets sold	(1)	(4,235)
Fees paid in connection with refinancing	(1,375)	(1,457)
Management fees paid to shareholders[(a)]	(6)	(1,101)
Miscellaneous operating expenses	—	—
Other operating expense	**(1,382)**	**(6,793)**

(a) Management fees have been paid to the shareholders of the Combined Group Altice, Cinven and Carlyle for certain management, financing and advisory services provided. These contracts ended on September 30, 2013 within the framework of the IPO.

9 Finance costs, net

Net finance costs break down as follows as of September 30, 2014 and 2013:

(in thousands of euros)	Note	September 30, 2014	September 30, 2013
Interest income received on cash, cash equivalents and restricted cash		4,357	25
Other financial income		999	6,870
Financial income	**9.1**	**5,356**	**6,895**
Interest expense on financing excluding the impact of the effective interest method		(284,519)	(144,102)
Other financial expense	**9.2**	(148,083)	(11,614)
Financial expense		**(432,602)**	**(155,716)**
Finance costs, net		**(427,246)**	**(148,824)**

9 Finance costs, net (Continued)

9.1 Financial income

As of September 30, 2014 and September 30, 2013, financial income breaks down as follows:

(in thousands of euros)	September 30, 2014	September 30, 2013
Interest income on escrow accounts	4,176	—
Lehman Brothers Claim[a]	845	4,506
Reversal of provisions for financial risks	81	1,903
Other	254	463
Other financial income	**5,356**	**6,872**

(a) Payments received within the context of the claim filed by the Group following the bankruptcy of Lehman Brothers in September 2008 of 0.8 million euros and 4.5 million euros as of September 30, 2014 and September 30, 2013, respectively. Part of the Group's financial debt was hedged by interest rate swaps entered into with Lehman Brothers. As a result of the bankruptcy, Lehman Brothers defaulted on the swaps. The Group filed a claim with Lehman Brothers for a total amount of approximately 11.2 million euros. To date, the Group has recovered a total of 10.7 million euros of the amount claimed.

9.2 Other financial expense

As of September 30, 2013 and September 30, 2014, other financial expense break down as follows:

(in thousands of euros)	September 30, 2014	September 30, 2013
Fees for settling former debts within the context of refinancing operations[a]	(88,795)	—
Foreign exchange differences[b]	(95,809)	—
Expenses amortized according to the effective interest rate method[c]	(37,594)	5,996
Change in fair value of derivative instruments[d]	78,854	—
Late payment interest	(3,543)	4,928
Provisions for financial risks	(843)	385
Other	(353)	305
Other financial expense	**(148,083)**	**11,614**

(a) Premiums paid within the context of advance repayments of bonds;

(b) Net impact of the revaluation of financial debts in dollars and of funds deposits in escrow accounts, also denominated in dollars;

(c) Includes, for the nine-month period ended September 30, 2014, 22,081 thousand euros for the non-amortized portion of the expenses relating to debts settled in May 2014;

(d) Relates to the market value, as of September 30, 2014, of swap agreements on instruments not qualifying for hedge accounting, resulting in a financial income (with no impact on cash) of 78,854 thousand euros for the nine-month period ended September 30, 2014. See also Note 17.

10 Income tax

10.1 Income tax expense

The income tax expense breaks down as follows:

(in thousands of euros)	September 30, 2014	September 30, 2013
Current income tax expense	(14)	(8,349)
Deferred tax income[a]	36,472	—
Tax Income/Expense	**36,458**	**(8,349)**

(a) See Note 10.2 below.

10.2 Deferred tax assets by type

(in thousands of euros)	December 31, 2013	2014 Statement of Income	Other 2014 comprehensive income	September 30, 2014
Loss carryforwards[a]	132,662	70,006	—	202,668
Fair value of swaps[b]	—	(33,534)	78,809	45,275
Deferred tax assets	**132,662**	**36,472**	**78,809**	**247,943**

(a) As explained in Note 2.7, a new tax group was set up at the Numericable Group level during the first-half of 2014, effective retroactively as of January 1, 2014. This new tax group was established by Numericable Group and the companies resulting from the two former tax groups, Ypso and Altice, which chose to apply the expanded base mechanism.

Based on updated forecasts regarding the use of tax loss carryforwards existing within the new tax group and deemed probable over a 5-year horizon, an additional deferred tax asset of 70 million euros was recognized.

The total amount of deferred tax assets on loss carryforwards therefore stood at 203 million euros as of September 30, 2014.

(b) The Group recorded a deferred tax asset of 45.3 million euros on derivative instruments negotiated in May 2014, of which:

- (33.5) million euros in income on swap instruments qualifying for hedge accounting (swap on bank loans);
- 78.8 million euros in other comprehensive income on instruments qualifying for hedge accounting (swap on bonds),

11 Goodwill

(in thousands of euros)	September 30, 2014	December 31, 2013
Net carrying amount		
Balance at beginning of year	1,483,628	1,458,686
Additional goodwill recognized during the period[1]	1,264	24,942
Balance at end of year	**1,484,892**	**1,483,628**

(1) As of December 31, 2013, the additional goodwill of 24.9 million euros is explained by the Group's acquisition on October 31, 2013 of 100% of the shares of the Invescom holding company, which owns 100% of the B2B operator, LTI Telecom. This provisional goodwill was increased by 1.3 million euros during the nine-month period ended September 30, 2014, considering the revaluation of certain liabilities.

As the Group has until October 31, 2014 to complete the exercise of the allocation of the acquisition price to the identifiable assets acquired and liabilities, the difference between the acquisition price and the share of equity of the subgroup acquired remains provisionally recorded in goodwill as of September 30, 2014 for a total amount of 26 million euros.

11 Goodwill (Continued)

The LTI contribution to the Group's consolidated EBITDA as of September 30, 2014 is as follows:

September 30, 2014 (in thousands of euros)	LTI
Revenue	**25,289**
Purchases and subcontracting services	(16,261)
Staff costs and employee benefits expense	(5,260)
Taxes and duties	(594)
Provisions	110
Other operating income	485
Other operating expense	(9)
Operating income before depreciation, amortization and impairment (EBITDA)	**3,760**

12 Trade and other receivables

(in thousands of euros)	September 30, 2014	December 31, 2013
Trade receivables	353,104	309,998
Provision for bad debts	(40,287)	(33,371)
Trade receivables, net	**312,817**	**276,627**

Other receivables	4,103	6,998
Trade and other receivables, net	**439,812**	**402,888**

13 Restricted cash

Restricted cash comprises amounts placed in escrow accounts and intended to partially finance the acquisition of SFR.

Restricted cash breaks down by original currency as follows:

	Original nominal amount*		Amounts outstanding as of September 30, 2014
	In thousands of currency	In thousands of euros	In thousands of euros
Original currency			
USD	8,966,438	6,484,732	7,099,877
EUR	2,409,200	2,409,200	2,409,200
Restricted cash		**8,893,932**	**9,509,077**

* after deduction of bank fees (Original Issue Discount: ''OID'') for bank loans drawn but not used as of September 30, 2014. These costs, which represent an amount equivalent to 9.5 million euros, will only be due if the acquisition of SFR is finalized, and were recorded in prepaid expenses in the Statement of Financial Position as of September 30, 2014.

The escrow accounts are under the control of Deutsche Bank AG as escrow agent, and are pledged first for the benefit of the banks.

Pending release of the amounts placed in escrow in view of the acquisition of SFR, the funds are invested in certain authorized investments, such as liquid assets and/or money market funds with a stable net liquidation value benefiting from a high credit rating.

13 Restricted cash (Continued)

The amounts placed in the escrow accounts will be released on April 30, 2015 or earlier, provided that:

– the Group signs the documents to acquire SFR according to the form and terms of the offer submitted by the Group to Vivendi on April 5, 2014;

– the acquisition of SFR is completed quickly after the payment of the amounts placed in the escrow accounts;

– immediately after acquiring SFR, the Group directly or indirectly owns 100% of the outstanding share capital of SFR (less ten shares belonging to a third party); and

– the Group is not subject to a bankruptcy, insolvency or legal protection proceeding.

If (i) the acquisition of SFR does not take place on April 30, 2015 or earlier, or (ii) the documents for completing the acquisition of SFR expire at any point before April 30, 2015; or (iii) in the event of bankruptcy, insolvency or a legal protection measure against the Group on April 30, 2015 or earlier, the Group will be obligated to repay all new financial debts subscribed in May 2014 to finance the acquisition at a price that is equal to 100% of the initial issue price of each of these new debts, plus accrued interest. This repayment will be performed with the help of amounts that have been placed in the escrow accounts. Any remaining amounts placed in the escrow accounts will be returned to the Group. Should the amounts in the escrow accounts be insufficient, the remainder must be financed by the Group from its cash assets.

14 Cash and cash equivalents

Cash and cash equivalents presented in the Consolidated Statement of Cash Flows include cash on hand and short-term deposits. The cash position presented in the Consolidated Cash Flows Statement and the funds presented under the heading ''Cash and cash equivalents'' in the Consolidated Statement of Financial Position can be reconciled as follows:

(in thousands of euros)	September 30, 2014	December 31, 2013
Cash	8,370	101,365
Cash equivalents[(1)]	5,807	—
Cash and cash equivalents presented in the Consolidated Statement of Financial Position	**14,177**	**101,365**
Cash of discontinued operations	—	—
Bank overdrafts recorded in financial debts	—	—
Cash and cash equivalents presented in the Consolidated Statement of Cash Flows	**14,177**	**101,365**

(1) Corresponding, as of September 30, 2014, to the amounts invested by Exane BNP Paribas in money market mutual funds within the context of the liquidity contract for 1.6 million euros, as well as interest income received on amounts invested in escrow accounts totaling 4.2 million euros.

15 Other comprehensive income

Changes in other comprehensive income break down as follows:

	Attributable to owners of the Company			
(in thousands of euros)	Hedging financial instruments	Actuarial gains and losses	Deferred tax	Total
Balance as of December 31, 2012	**—**	**(1,496)**	**—**	**(1,496)**

Total financial liabilities		**177,098**	**64,249**	**12,528,610**	**2,701,894**	**12,705,708**	**2,766,143**

* Derivative instruments are presented in the above schedule at their maturity date, and including accrued interest not yet due.

16.1 Bonds

On May 8, 2014, the Group issued several bonds, in euros and dollars, to partially finance the acquisition of SFR. The issuer of the bonds is Numericable Group. The bonds raised the equivalent of 7,873 million euros, including the equivalent of 5,623 million euros in dollars and 2,250 million euros.

The proceeds from these bonds were placed in full in escrow accounts until the finalization of the SFR acquisition.

The bonds break down as follows:

Bond currency	Maturity	Coupon in foreign currency	Coupon in euros*	Original amount in millions of currency	Original amount in millions of euros**	Outstandings as of September 30, 2014 in millions of euros***
EUR	May 2022	5.375%	5.375%	1,000	1,000	1,000
EUR	May 2024	5.625%	5.625%	1,250	1,250	1,250
USD	May 2019	4.875%	4.354%	2,400	1,736	1,900
USD	May 2022	6.000%	5.141%	4,000	2,893	3,167
USD	May 2024	6.250%	5.381%	1,375	994	1,089
Total					**7,873**	**8,406**

* Interest rate of the hedge instruments.

** Equivalent value at the exchange rate of the hedge instruments.

16 Financial liabilities (Continued)

*** Amounts excluding accrued interest and the impact of the effective interest rate.

16.2 Bank borrowings

The Group took out new bank loans on May 21, 2014 in a total equivalent amount of 3,780 million euros.

Bank borrowings break down as follows:

Loan currency	Maturity	Interest rate	Margin in currency*	Margin in euros	Original amount in millions of currency	Original amount in millions of euros**	Outstandings as of September 30, 2014 in millions of euros***
EUR	May 2020	3M Euribor	4.500%	4.500%	1,900	1,900	1,900
USD	May 2020	3M Libor	3.813%	4.380%	1,394	1,008	1,104
USD	May 2020	3M Libor	3.809%	4.375%	1,206	872	955
Total						**3,780**	**3,959**

* With a minimum (''**floor**'') of 0.75%.

** Equivalent value at the exchange rate of the hedge instruments.

*** Amounts excluding accrued interest and the impact of the effective interest rate.

The money raised through these new loans was used by the Group for 2,750 million euros in order to notably:

- repay all of the Group's former senior debt for 2,638 million euros;
- pay early repayment fees on former bond loans for 88 million euros;
- pay a portion of the fees for securing new financing.

The unused balance resulting from the bank borrowings, i.e. 1,030 million euros, was placed into the escrow accounts, thereby bringing the total amount recorded in the escrow accounts to an amount equivalent to 8,903 million euros. See also Note 13.

Moreover, on May 21, 2014, the Group signed a new Revolving Credit Facility (''**RCF**'') agreement for a maximum amount of 750 million euros, 300 million of which is immediately available, with the balance becoming available upon finalization of the acquisition of SFR. The RCF has been drawn for 50 million euros as of September 30, 2014.

16.3 Derivative instruments

On April 23 and April 28, 2014, the Company entered into various swap agreements with Goldman Sachs International. On May 1, 2014, Numericable Group and Goldman Sachs International transferred (by novation) a certain number of swap agreements to various leading international banks.

These swap agreements may be classified within five different categories (in thousands of euros):

	Dollar Bond 2019	Dollar Bond 2022	Dollar Bond 2024	Bank Loan Refi	Bank Non-Refi
Notinal amount USDM/EURM	2,400/1,736	4,000/2,893	1,375/994	1,394/1,008	1,206/872

Special clause		Five-year break clause in favor of the banks	Five-year break clause in favor of the banks		

16 Financial liabilities (Continued)

These contracts meet the following three main objectives:

Hedge of dollar amounts in escrow accounts

Cross currency swap agreements have the aim of hedging against the euro/US dollar exchange rate risk associated with the net proceeds in US dollars of the bonds and bank loans placed in escrow (7,775 million dollars in proceeds from the bonds and 1,170 million dollars in proceeds from bank loans), considering the SFR Acquisition price, payable entirely in euros to Vivendi. In conformity with these swap agreements, on April 30, 2015 the Company will pay 8,809 million dollars to all swap counterparties (using the amounts released from escrow) and will receive 6,371 million euros from the latter, based on an exchange rate of €1.00 = $1.3827. The difference between the proceeds placed in the escrow account and the amounts paid upon completion to the counterparties represents commitment commission and the OID on the bonds and bank loans.

Hedging of payments of interest and principal at 5 and 8 years in US dollars

The cross currency swap agreements have the aim of hedging against the euro/US dollar exchange rate risk associated with the payment of interest in US dollars on the bonds and bank loans. In conformity with these swap agreements, the Company will swap amounts in euros for amounts in US dollars to be paid at each date of payment of semiannual or quarterly interest, based on an exchange rate of €1.00 = $1.3827.

The swap agreements for the bonds hedge interest payments as of the first semiannual payments, on August 15, 2014, and through May 15, 2019 for the 2019 Dollar Bonds (last payments) and May 15, 2022 for the 2022 Dollar Bonds (last payments) and the 2024 Dollar Bonds. The swap agreements for drawings in US dollars for bank loans hedge interest payments between the first quarterly payments to be made as of July 30, 2014, up to May 21, 2019.

The Company has also hedged the principal amount of these bonds and bank loans in dollars through these swap agreements:

On May 15, 2019, Numericable Group will pay 1,736 million euros and will receive 2,400 million dollars, corresponding to the principal of the 2019 bonds and will pay 870 million euros and will receive 1,203 million dollars, corresponding to the principal of the bank loan, even though said loan has a maturity date in May 2020.

On May 15, 2022, Numericable Group will pay 2,893 million euros and will receive 4,000 million dollars, corresponding to the principal of the 2022 bonds and will pay 994 million euros and will receive 1,375 million dollars, corresponding to the principal of the 2024 bonds, even though the maturity date is in May 2024.

It is noteworthy that Numericable's counterparties to the hedge agreements benefit from an early termination clause after five years (i.e. in May 2019) on the 8-year hedge agreements, i.e. concerning the interest and principal of the 2022 and 2024 bonds in dollars. The latter may unilaterally revoke the hedge agreement three years prior to its maturity and require Numericable Group to pay, or pay to Numericable Group (according to the market conditions at that date) the balance of the contract.

Hedging of interest payments based on LIBOR

In addition to the two objectives described above, the hedge instruments allow the Group's LIBOR exposure to be converted for drawings in US dollars under the Term Loan into EURIBOR exposure. The Group's risk is nevertheless not entirely hedged, since drawings in US dollars under the Term Loan bear interest at the LIBOR rate, plus a margin, subject to a 0.75% limit on LIBOR, while swap agreements do not include this limit.

16 Financial liabilities (Continued)

The swap agreements for drawings in US dollars under the Term Loan hedge interest payments starting with the first quarterly payments to be made as of July 30, 2014, and until May 21, 2019.

Security and guarantees

The swap agreements described above are guaranteed and benefit from the same security as those granted for bank loans (see Note 20.1).

16.4 Other financial liabilities

As of September 30, 2014, the other financial liabilities include various bank loans taken out by Numericable with several banks (primarily Caisse d'Épargne in Alsace-Lorraine) for 1,400 thousand euros, and by Completel with various banking institutions for 201 thousand euros.

16.5 Net financial debt

Net financial debt, as defined and used by Numericable Group corresponds (a) to the nominal amounts of financial liabilities (excluding accrued interest, the impact of the EIR and the fair value of derivative instruments), excluding perpetual subordinated notes and debts linked to operations (guarantee deposits paid by customers), all of these liabilities being converted at the closing exchange rate, less (b): cash and restricted cash.

Composition of net financial debt:

(in millions of euros)	September 30, 2014	December 31, 2013
Bonds	8,406	380
Bank borrowings	4,009	2,258
Finance lease liabilities	44	41
Other financial liabilities	2	3
Liabilities contributing to net financial debt (a)	**12,461**	**2,682**
Restricted cash	9,509	—
Cash and cash equivalents	14	101
Assets contributing to net financial debt (b)	**9,523**	**101**
Net financial debt (a) – (b)	**2,938**	**2,581**

17 Financial instruments

17.1 Liquidity risk management

Lines of credit

As of September 30, 2014, the liquidity position of Numericable Group is greater than repayments due on the current financial debt:

Available amounts (in thousands of euros)	
Cash	8,370
Cash equivalents	5,807
Available amount for drawdown on lines of credit	250,000
Liquidity position	**264,177**

17 Financial instruments (Continued)

Credit rating of Numericable Group

The Group's current credit rating is as follows:

Agency	Rating
Standard & Poor's	B+
Moody's	B1 (positive outlook)

Following Numericable Group's IPO, the acquisition of subgroup Altice by subgroup Ypso France, and the refinancing of several of the Group's loans, the two credit rating agencies decided (i) to withdraw the rating of subgroup Altice B2B and (ii) to upgrade the rating of subgroup Ypso France from B2/B to B1/B+, the Group's new rating.

Moody's rated the new financing raised in May 2014 at Ba3 and announced that it estimated that the Group's rating would be Ba3 after completion of the acquisition of SFR; S&P confirmed the Group's B+ rating.

Maturity date of foreign currency denominated financial liabilities

The residual payments on financial liabilities denominated in foreign currency (bonds and bank loans) were analyzed as follows as of September 30, 2014 (including future interest). The expected cash flows correspond to the contractual flows (no early repayment has been planned.)

The USD flows are expressed in euro translated at the closing exchange rate as of September 30, 2014, i.e. €1 = USD1.2629. Interest is calculated based on the Euribor and Libor rates as of September 30, 2014.

		Total	< 1 year	1 to 5 years	> 5 years

17 Financial instruments (Continued)

17.2 Currency risk management

The Group's currency risk concerns:

- bonds and bank loans denominated in dollars;
- amounts placed in escrow accounts in view of the acquisition of SFR, also denominated in dollars, to the extent that payments to Vivendi must be made in euros.

The Group's dollar loan issues as well as the amounts placed in escrow accounts were fully hedged by derivative instruments through cross-currency swaps. The table below shows the impact of hedging operations on the initial debt and escrow accounts before and after hedging.

		Initial position		Hedge instrument		Final position	
Original amounts, expressed in millions	**Currency**	**In currency**	**In euros**	**In currency**	**In euros**	**In currency**	**In euros**

17.3 Recognition of derivative instruments

The derivative instruments taken out by the Group are twofold in nature:

- Cross currency swaps through which, in addition to swapping nominal amounts, the Group receives a fixed rate in dollars and pays a fixed rate in euros. These derivatives hedge the bonds issued in dollars and are qualified as cash flow hedges. The effective portion of the change in fair value of these derivatives is recorded through other comprehensive income. It will be released to profit or loss when the hedged item impacts net income.

  As of September 30, 2014, the fair value of these financial instruments was recorded in other comprehensive income for 207,394 thousand euros. The Group also recorded deferred tax on these instruments in other comprehensive income for 78,809 thousand euros as of September 30, 2014.

- Cross currency swaps through which, in addition to swapping nominal amounts, the Group receives a floating rate in dollars (3 month LIBOR) and pays a floating rate in euros (3 month EURIBOR). These derivative instruments hedge the bank loans issued in dollars, and are recorded at Fair Value through the Statement of Income (derivative instruments held for trading). These derivatives are thus recorded at fair value in the Statement of Financial Position, with changes in value taken to profit or loss.

  As of September 30, 2014, the fair value of these financial instruments was recognized as a financial income for 78,854 thousand euros. The Group also recorded deferred tax on these instruments in its net income for (33,534) thousand euros as of September 30, 2014.

17 Financial instruments (Continued)

The following table shows the notional amounts and fair values of the cross currency swaps as of September 30, 2014:

in millions of euros	Notional Amount	Fair value (including accrued interest)	Fair value (excluding accrued interest)
2019 Bonds	1,736	43,2	45,4
2022 Bonds	2,893	116,1	121,4
2024 Bonds	994	38,7	40,6
2020 Loan (''refi'')	1,008	(78,8)	(78,8)
2020 Loan (''non-refi'')	872	(0,1)	(0,1)
Total	**7,503**	**119,1**	**128,5**

A positive (negative) fair value indicates an amount in favor of the banks (of the Group).

17.4 Valuation of derivative instruments

In conformity with IAS 39, the Group primarily uses fair value to record its derivative instruments.

The fair value of derivative financial instruments (cross currency swaps) traded over the counter is calculated based on the models commonly used by participants to measure these types of instruments. Fair values are checked with bank valuations.

The fair value measurement of derivative financial instruments incorporates a ''counterparty risk'' component for asset derivative instruments, and an ''own credit risk'' component for liability derivative instruments. Credit risk is measured using standard mathematical models and market data (implicit credit spreads).

The fair values are ordered according to three levels:

– Level 1: prices listed on an active market;

– Level 2: internal model with observable inputs using internal valuation techniques: these techniques call on standard mathematical calculation methods, integrating observable market data (futures prices, interest rate curve, etc.);

– Level 3: internal model with unobservable inputs.

As of September 30, 2014, the fair value of the derivatives is at level 2.

17.5 Credit and counterparty risk

Numericable Group is exposed to bank counterparty risk within the context of its investments and derivative products, and thus strictly selects the public, financial or industrial institutions with which it makes investments or enters into contracts for derivative products, in particular as concerns their financial credit rating.

18 Other non-current liabilities

(in thousands of euros)	September 30, 2014	December 31, 2013
Non-current deferred income (more than one year)	94,910	97,429

20 Commitments and contractual obligations (Continued)

Commitments given with respect to the acquisition of SFR:

On completion of the acquisition of SFR, and as explained in Note 2.3, the Group will have to pay the bank fees relating to the implementation of the new issued debts that have not yet been used for an amount of about 173 million euros (this amount is not reflected in the above table).

The Group will also have to pay other fees which will be due only in the event of completion of the acquisition of SFR that have been recorded for 6.8 million euros as of September 30, 2014.

The Group also gave commitments in terms of employment within the new structure, with respect to the acquisition of SFR.

Guarantees and commitments given with respect to the new Senior Secured Notes:

Pending completion of the acquisition of SFR, the new Senior Secured Notes are secured by a pledge over the Escrow Accounts.

On the completion date of the acquisition of SFR, the Senior Secured Notes will be guaranteed by most of the companies of the Group and will be secured by senior pledges over all of the capital of the guarantors, over the business (*fonds de commerce*) of NC Numericable and over most of the bank accounts, intercompany receivables and intellectual property rights of the guarantors at the completion date.

Contracts relative to the new Senior Secured Notes include certain restrictions in favor of Note holders. These contracts limit, among other things, the ability of the Group to (i) incur or guarantee additional indebtedness; (ii) make investments or other restricted payments (including dividends), (iii) create liens, (iv) sell assets, (v) engage in certain transactions with affiliates, (vi) enter into agreements that restrict the payment of dividends by subsidiaries or the repayment of intercompany loans and advances; and (vii) engage in mergers or consolidations.

Guarantees and commitments given with respect to the new Term Loans and the new Revolving Credit Facility:

Before the completion of the acquisition of SFR, the new Term Loans are guaranteed by most of the companies of the Group (the ''Guarantors'') and are secured by senior pledges over all of the capital of the guarantors, over certain intercompany loans concluded in the context of these transactions, over the business (*fonds de commerce*) of NC Numericable and over most of the bank accounts, and intellectual property rights of the Guarantors.

Within 90 days after the completion date, the new Term Loans will benefit from (i) a senior pledge over SFR, (ii) a senior pledge over shares of SFR held by Numericable Group and the capital of all subsidiaries which become guarantor after the completion date, a senior pledge over certain SFR bank accounts, a senior pledge over the business (*fond de commerce*) including the intellectual property rights of SFR, and senior pledges over intercompany receivables due to SFR by certain of its subsidiaries.

The Term Loans include restrictions that reflect the commitments given under the Senior Secured Notes and limit, among other things, the ability of the Group to (i) incur or guarantee additional indebtedness, subject to a Consolidated Net Leverage ratio test; (ii) make investments or other restricted payments (including dividends), (iii) create liens, (iv) sell assets, (v) pay dividends or make other distributions or repurchase or redeem capital or subordinated debt, (vi) engage in certain transactions with affiliates, (vii) enter into agreements that restrict the payment of dividends by subsidiaries or the repayment of intercompany loans and advances; and (viii) engage in mergers or consolidations. Certain of those restrictions will be modified if the completion date does not occur before April 30, 2015.

20 Commitments and contractual obligations (Continued)

20.2Commitments received

Commitments received with respect to the perpetual subordinated notes (TSDI):

The Group has received a commitment of a total amount of 25 million euros from GDF Suez to subscribe to perpetual floating rate notes, which will provide financing for the construction of the Sipperec network. The Group has already received 23.8 million euros in principal from GDF Suez as of September 30, 2014.

Commitment received from Altice:

The balance of the total amount payable in cash to Vivendi on the date the acquisition of SFR is finalized (i.e. 4.6 billion euros, in order to reach the price of 13.5 billion euros excluding any earn-out) will be financed by a capital increase of Numericable Group. Altice SA, majority shareholder of the Group, has undertaken to subscribe to this capital increase to the tune of 75% (the Group will bear the fees related to this capital increase for approximately 0.30% of the total amount of the capital increase), the remaining 25% being secured by banks.

21 Litigation

The Group is involved in legal and administrative proceedings that have arisen in the ordinary course of its business.

Litigation in which the Group is involved are described in Note 24 to the Consolidated Financial Statements for the year ended December 31, 2013. The following paragraphs correspond to an update as of October 24, 2014, date of the meeting of the Company's Board of Directors approving the Condensed Interim Consolidated Financial Statements for the nine months ended September 30, 2014.

A provision is recorded by the Group when there is a sufficient probability that such disputes will lead to costs that the Group will bear and when the amount of these costs can be reasonably estimated. Certain companies of the Group are involved in a certain number of disputes related to the ordinary activities of the Group. Only the most significant disputes and proceedings in which the Group is involved are described below.

The Group is not aware of any governmental, legal or arbitration proceedings (including any proceedings of which the Group is aware, which are pending or threatened) other than those mentioned below in this section that may have or have had in the last 12 months a material impact on the financial position or profitability of the Group.

Tax audits

The Group received tax assessment notifications dated June 6, 2014 for fiscal years 2010 (income tax), 2011 and 2012 for the entities NC Numericable, Numericable and Est Videocommunication.

No provision has been recorded in the Condensed Interim Consolidated Financial Statements for the nine months ended September 30, 2014 with respect to these latest tax audits.

Litigation concerning the DSP 92:

A disagreement arose between the department of Hauts-de-Seine (''CG 92'') and Sequalum on the conditions of execution of the Service Concession agreement ''THD Seine'' entered into on March 13, 2006 between Sequalum, subsidiary of the Group and the department of Hauts-de-Seine. This public service concession arrangement is aimed at building a high-capacity fiber network throughout the department of the Hauts-de-Seine. As of September 30, 2014 the net book value of the network build by Sequalum represents approximately 123 million euros and the Group received 25 million euros of subsidies from the department of Hauts-de-Seine.

21 Litigation (Continued)

During its assembly dated October 17, 2014, the department of Hauts-de-Seine decided to terminate the Service Concession agreement signed with Sequalum for ''fault and full responsibility of the delegatee''. The department of Hauts-de-Seine also asked Sequalum to pay penalties for an approximate total amount of 45 million euros, arguing that there were delays in the construction of the network, which is contested by Sequalum.

Within the framework of the Service Concession Agreement, the department of Hauts-de-Seine also asked the financial institution involved to implement the guarantee granted by Sequalum for 10 million euros, this amount corresponding to the maximum amount that could be guaranted with respect to the Service Concession Agreement. So far, the bank did not respond favorably to this request, considering that the request was not sufficient, in terms of form and documentation, to allow the implementation of the guarantee.

The penalities were contested through a request recorded by the administrative court on September 3, 2014. The execution and the payment of the penalities are suspended until a decision is made on this litigation.

The decision of the department of Hauts-de-Seine to terminate the agreement has not yet been notified to Sequalum who intends to contest the resiliation before the competent courts. Looking forward to the reception of this notification, Sequalum continues to perform the contract, subject to potential requests the delegator may impose. Should the courts confirm the arguments of the department of Hauts-de-Seine, Sequalum could be obliged to reimburse the grants received (the portion of grants not yet amortized). The department of Hauts-de-Seine, for its part, would receive all the assets built within the framework of the DSP 92 on July 1, 2015. The department of Hauts-de-Seine would have to indemnify Sequalum at a level corresponding to the net book value of the assets.

On October 16, 2014 Sequalum deposited a request before the administrative court of Cergy Pontoise which aims at ending the Service Concession agreement due to ''*force majeure*'' in the context of irreversible changes in the contractual economy.

The management examined the risk related to these procedures and noted that at this stage there are too many uncertainties to measure the possible risk for the Group. Under these conditions, the criteria allowing the booking of a provision were not met.

22 Related party transactions and other transactions

The historical majority shareholders of the Group are the private investment funds Altice, Cinven and Carlyle.

On July 24, 2014, Altice repurchased all of the shares held by Cinven and Carlyl (i.e. 34.6% of Numericable Group's capital). Following this operation, Altice held 74.6% of Numericable Group's shares.

Balances in the Statement of Financial Position and reciprocal flows between entities of the Group were eliminated during preparation of the Condensed Interim Consolidated Financial Statements. Details of transactions between the Group and other related parties are disclosed below.

22 Related party transactions and other transactions (Continued)

22.1 Trading and financing transactions

During the year, Group entities entered into the following transactions with related parties that are not part of the combination scope:

	Purchase of goods and services		Amounts owed by related parties		Amounts owed to related parties	
(in thousands of euros)	September 30, 2014	September 30, 2013	September 30, 2014	December 31, 2013	September 30, 2014	December 31, 2013
Shareholders						
Altice	—	459	—	—	—	—
Cinven	—	192	—	—	—	639
Carlyle	—	450	—	—	—	900
Associate						
Alsace Connexia Participation SAS	—	—	2,223	2,280	—	—

Management fees have been paid to our shareholders (Cinven, Altice and Carlyle) in relation to certain management, financing and advisory services provided (726 thousand euros in the first-half of 2013). These contracts ended on September 30, 2013.

22.2 Other related party relationships

No new significant transactions with related parties took place during the nine months ended September 30, 2014, other than those described in Note 29.2 to the Consolidated Financial Statements for the fiscal years ended December 31, 2013 and 2012.

22.3 Transactions with SFR

During the nine-month period ended September 30, 2014, the Group invoiced various services to SFR and its subsidiaries for a total amount of 25 million euros. During the same period, SFR and its subsidiaries invoiced an overall amount of 33 million euros to the subsidiaries of the Group.

23 Lease arrangements

23.1 The Group as lessor

Finance leases

The Group has not entered into any finance leases as a lessor.

Operating leases

Operating leases relate to the investment property owned by the Group and leased to other companies in the telecommunications industry, with lease terms of between 15 to 30 years. All operating lease contracts contain market review clauses in the event that the lessee exercises its option to renew. The lessee does not have an option to purchase the property at the expiry of the lease period.

23 Lease arrangements (Continued)

Future revenues related to these leases (recorded in deferred income) break down as follows:

(in thousands of euros)	Future minimum lease payments September 30, 2014	 December 31, 2013
Less than one year	55,769	53,930
1 to 5 years	40,576	42,224
More than 5 years	54,164	54,997
Total	**150,509**	**151,151**

23.2 The Group as lessee

Finance leases

The Group has entered into various finance leases related to property, for which the lease term is generally between 20 and 30 years, and office equipment, for which the lease term is 4 years.

The main finance lease arrangements relate to network equipment bought from Cisco and the property lease for the Group headquarters in Champs-sur-Marne, for which the Group has an option to purchase the property at the end of the lease term at a price that is expected to be sufficiently lower than the fair value at the date the option becomes exercisable.

All contracts are denominated in euros. Certain property lease arrangements stipulate that the annual payments will be set at a fixed amount at the beginning of the lease, but will be increased in line with inflation in subsequent years (i.e. a percentage increase).

	Minimum lease payments		Present value of minimum lease payments	
(in thousands of euros)	September 30, 2014	December 31, 2013	September 30, 2014	December 31, 2013
Less than one year	25,515	22,100	24,567	21,257
1 to 5 years	20,738	21,069	18,912	19,246
More than 5 years	1,009	1,342	927	990
	47,262	**44,510**	**44,406**	**41,493**
Less future finance charges	(2,856)	(3,017)	—	—
Present value of minimum lease payments	44,406	41,493	44,406	41,493
Finance lease liabilities—current portion			24,567	21,257
Finance lease liabilities—non-current portion			19,938	20,238

The interest rate implicit in the leases is fixed at the contract date for the entire lease term. The average effective annual interest rate is approximately 3.97% and 3.96% as of September 30, 2014 and December 31, 2013, respectively.

Operating leases

The Group also has simple operating lease commitments concerning vehicles and real estate. The lease term for property under operating leases is generally 3, 6 or 9 years, a standard lease term for commercial real estate in France. The lease term for vehicles under operating lease is 3 years.

Leases involving equipment and network IRUs (rights of use of the local loop, backbone) or other rental contracts (rights of way) were not considered material.

23 Lease arrangements (Continued)

In connection with its entertainment business activities, the Group has also entered operating leases and agreements to purchase TV programs.

As of September 30, 2014 and December 31, 2013, simple operating lease commitments break down as follows:

(in thousands of euros)	September 30, 2014	December 31, 2013
Less than one year	9,906	10,381
1 to 5 years	31,446	34,798
More than 5 years	9,018	12,978
Total	**50,370**	**58,156**

24 Earnings per share

(in thousands of euros)	September 30, 2014	September 30, 2013
Net income used for calculating basic earnings per share	**(177,825)**	**60,046**
Impact of dilutive instruments:		
Stock option plans(2)	—	—
Net income used for calculating diluted earnings per share	**(177,825)**	**60,046**

The following table shows the weighted average number of ordinary shares used to calculate basic and diluted earnings per share:

(number of shares)	September 30, 2014	September 30, 2013
Weighted average number of ordinary shares outstanding(1)	**123,942,012**	**113,772,229**
Impact of dilutive instruments:		
Stock option plans(2)	—	—
Weighted average number of shares outstanding—diluted	**123,942,012**	**113,772,229**

(1) The weighted average number of ordinary shares used in calculating earnings per share corresponds, until the date of the IPO, to the number of shares issued in exchange for contributions (see Note 22.1 ''Change in share capital'' of the 2013 Consolidated Financial Statements.)

(2) Stock options granted in 2013 and 2014 (3,182,847 options) are non-dilutive in view of the average share price between the grant date and the balance sheet date, and the valuation of the plan.

25 Events after the end of the reporting period

Litigation concerning the DSP 92:

During its assembly dated October 17, 2014, the department of Hauts-de-Seine decided to terminate the Service Concession agreement signed with Sequalum for ''fault and full responsibility of the delegatee''. The department of Hauts-de-Seine also asked Sequalum to pay penalties for an approximate total amount of 45 million euros, arguing that there were delays in the construction of the network, which is contested by Sequalum.

Please refer to Note 21.

Numericable Group

Consolidated financial statements

for the year ended December 31, 2013

Numericable Group
Tour Ariane
5, place de la Pyramide
92088 Puteaux La Défense Cedex

This is a free translation into English of the statutory auditors' report on the consolidated financial statements issued in French and is provided solely for the convenience of English-speaking users.

The statutory auditors' report includes information specifically required by French law in such reports, whether modified or not. This information is presented below the audit opinion on the consolidated financial statements and includes an explanatory paragraph discussing the auditors' assessments of certain significant accounting and auditing matters. These assessments were considered for the purpose of issuing an audit opinion on the consolidated financial statements taken as a whole and not to provide separate assurance on individual account balances, transactions, or disclosures.

This report also includes information relating to the specific verification of information given in the Group's management report.

This report should be read in conjunction with, and construed in accordance with, French law and professional auditing standards applicable in France.

Numericable Group S.A.

Registered office: Tour Ariane—5, place de la Pyramide—92088 Paris La Défense Cedex

Share capital: €.123 942 012

Statutory auditors' report on the consolidated financial statements

To the Shareholders,

In compliance with the assignment entrusted to us by your by-laws and Shareholders' general meeting, we hereby report to you, for the year ended December 31, 2013, on:

- the audit of the accompanying consolidated financial statements of Numericable Group S.A.;
- the justification of our assessments;
- the specific verification required by law.

These consolidated financial statements have been approved by the Board of Directors. Our role is to express an opinion on these consolidated financial statements based on our audit.

1 Opinion on the consolidated financial statements

We conducted our audit in accordance with professional standards applicable in France; those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit involves performing procedures, using sampling techniques or other methods of selection, to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made, as well as the overall presentation of the consolidated financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

In our opinion, the consolidated financial statements give a true and fair view of the assets and liabilities and of the financial position of the Group as at December 31, 2013 and of the results of its operations for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union.

Without qualifying our opinion, we draw your attention to the matter set out in the following notes to the consolidated financial statements:

- Notes 1.2 «Basis of preparation of the consolidated financial statements» and 1.3 «Comparative information» describe respectively the accounting treatment of the contribution operations to the group and their impact on the preparation and presentation of the consolidated financial statements and the comparative information;
- Notes 4.1.2 «IPO and capital increase» and 4.1.6 «Refinancing of Senior Debt» describe the initial public offering and the refinancing operations which occurred at the end of 2013 and their impact on

the hypothesis made to adopt the going concern assumption for the group as described in note 1.5 «Going concern assumption»;

- Notes 1.3 «Comparative information» and 2.1 «Accounting principles governing the preparation of the consolidated financial statements» describe the change in accounting method resulting from the first implementation of the revised IAS 19 standard.

2 Justification of our assessments

In accordance with the requirements of article L.823-9 of the French Commercial Code *(Code de commerce),* we bring to your attention the following matters:

Note 3 «Critical accounting judgment and key sources of uncertainty in respect of estimates» to the consolidated financial statements describes the critical accounting policies and main sources of uncertainty in respect to estimates. This note also states that changes in facts and circumstances may result in revised estimates or assumptions which could affect the financial position, results of operations and cash flows of the Group. Amongst the significant estimates, there are goodwill and deferred tax assets:

- The company systematically performs, at each closing date, impairment tests on goodwill according to the methods described in note 2.14 «Impairment of goodwill and non-current assets» and note 3 «Critical accounting judgment and key sources of uncertainty in respect of estimates» to the consolidated financial statements.

  We examined the methods used to test for impairment as well as cash flow projections and assumptions used and ensured that note 16 «Impairment testing» provides appropriate disclosures thereon.

- The Group presents in its statement of financial position deferred tax assets for an amount of 132.7 million euros as at December 31, 2013, as described in note 4.1.7 «Recognition of deferred tax assets» to the consolidated financial statements.

  We assessed the information and assumptions used for the forecasted future use of tax losses to carry forward, reviewed the calculations performed by the company and ensured that Note 3, 4.17 and 12 provide appropriate disclosures thereon.

These assessments were made as part of our audit of the consolidated financial statements taken as a whole, and therefore contributed to the opinion we formed which is expressed in the first part of this report.

3 Specific verification

As required by law we have also verified, in accordance with professional standards applicable in France, the information presented in the group's management report.

We have no matters to report as to its fair presentation and its consistency with the consolidated financial statements.

Numericable Group

CONSOLIDATED STATEMENT OF COMPREHENSIVE INCOME

	2013	2012
	(in thousands of euros)	
Net income (loss) attributable to owners of the entity	**64,550**	**86,377**
Items that may subsequently be reclassified in profit or loss:		
Cumulative translation adjustments	—	—
Change in fair value of available-for-sale financial assets	—	—
Tax on items recognized directly in other comprehensive income	—	—
Items that will not subsequently be reclassified in profit or loss:		
Actuarial gains and losses[1]	(458)	(1,496)
Tax on items recognized directly in other comprehensive income	—	—
Total other comprehensive income (loss) attributable to owners of the entity	**64,092**	**84,881**

(1) As indicated in Note 2.1, the Group has applied IAS 19R from 1 January 2013, by recognizing actuarial gains and losses in ''Other comprehensive income.''

The application of IAS 19R has resulted in a change in accounting policy that has also been reflected in the 2012 financial statements (see Note 1.3).

As the Group operates only in France, the functional and presentation currency of all the entities within the Group is the euro. As a result, no cumulative translation adjustments were recognized as of December 31, 2013 or 2012.

Available-for-sale financial assets consist of various investments in unlisted entities not included in the scope of consolidation (see Note 17) and for which there are no reliable indicators allowing the Group to determine a fair value other than its share of equity. Due to the fact that these investments are not material, these investments are measured at historical cost; accordingly, no unrealized gain or loss is recognized in the consolidated statement of comprehensive income.

(1) Contributions of Ypso Holding SARL and Altice B2B Luxembourg SARL to Numericable Group, which resulted in a capital increase of 1,995.5 million euros (see Note 4.1.1);

(2) Capital increases carried out within the framework of the Company's IPO (public offer in the amount of 250 million euros and offer reserved for employees in the amount of 1 million euros) net of expenses incurred in connection with the IPO, which were charged to additional paid-in capital in the amount of 14.6 million euros (expenses recorded without tax effect) (see Note 4.1.2);

(3) Cost of the stock option plan granted on November 7, 2013 in favor of certain officers and employees of the Group (see Note 4.1.3);

(4) Extinguishment of shareholders debts within the framework of the contributions made to Numericable Group prior to the IPO (Super PECs) (see Note 4.1.1).

Net cash provided (used) by investing activities		**(342,657)**	**(285,217)**
Capital increases of the parent company[4]	4.1.2	236,490	—
Issuance of debt[5]	4.1.6	797,223	830,975
Repayment of debt[6]	4.1.6	(987,420)	(957,189)
Interest paid		(180,546)	(152,113)
Net cash provided (used) by financing activities		**(134,253)**	**(278,327)**
Net cash flow from continuing operations		**93,369**	**(32,584)**
Net cash flow from discontinued operations		—	—
Net increase (decrease) in cash and cash equivalents		**93,369**	**(32,584)**
Cash and cash equivalents—opening balance		**7,996**	**40,580**
Cash and cash equivalents—closing balance		**101,365**	**7,996**

(1) In 2013, other non-cash items mainly relate to:

— expenses relating to the extinguishment of shareholder debts (''premiums'' relative to the cancellation of Super PECs) in the amount of 81.6 million euros (see Note 4.1.1);

— the staggering of borrowing costs using the amortized cost method, with no effect on cash, in the amount of 20.0 million euros.

(2) Investments in property, plant, equipment and intangible assets financed through finance leases in the amount of 39 million euros (21 million euros in 2012) had no impact on the statement of cash flows at the time of the purchases.

(3) Mainly the price paid in connection with the acquisitions of LTI (25.5 million euros) and Valvision (3.3 million euros), net of cash acquired (1.5 million euros). See Notes 4.1.4 and 4.1.5.

(4) Capital increases carried out within the framework of the company's IPO (public offer in the amount of 250 million euros and offer reserved for employees in the amount of 1 million euros) net of expenses incurred in connection with the IPO in the amount of 14.6 million euros (see Note 4.1.2).

(5) Mainly the implementation of the new Tranche D in the amount of 800 million euros net of expenses paid in the amount of 10 million euros (see Note 4.1.6).

(6) This amount primarily reflects debt extinguished during refinancing transactions in December 2013 (bonds in the amount of 480 million euros, Altice B2B senior debt in the amount of 451 million euros, see Note 4.1.6).

Numericable Group

INDEX

Numericable Group

Consolidated Financial Statements

for the year ended December 31, 2013

1 Basis of preparation of the consolidated financial statements

1.1 Numericable Group

Numericable Group (hereinafter referred to as ''**the Company**'') is a limited company incorporated under French law in August 2013, and is headquartered in France.

On November 7, 2013, Numericable Group received, within the framework of the Company's prospective IPO, the contribution of two holding companies incorporated in Luxembourg, Ypso Holding SARL and Altice Lux Holding SARL, the parent companies of Ypso France and Altice B2B France respectively.

Ypso France, which operates the Numericable business, is a French cable television service provider. Its core products are premium digital television packages, which are available to households in areas that are triple-play enabled. Ypso France also provides French residential customers with broadband Internet, fixed telephony and mobile telecommunications services.

Altice B2B France, through its main operational entity, Completel SAS, operates the largest alternative fiber-to-the-office (''FTTO'') network in France, constituting the third-largest alternative Digital Subscriber Line (''DSL'') network in France. Completel SAS provides business customers with a comprehensive service offering, including data transmission, very high speed Internet, telecommunications services, convergence and mobility solutions, through fiber and DSL networks.

1.2 Basis of preparation of the consolidated financial statements

The consolidated financial statements for the year ended December 31, 2013, which comprise the consolidated statement of financial position, the consolidated statement of income, the consolidated statement of comprehensive income, the consolidated statement of cash flows, the consolidated statement of changes in equity and the related notes, have been prepared in accordance with International Financial Reporting Standards (''IFRS'') as issued by the International Accounting Standards Board (''IASB'') and adopted in the European Union as of December 31, 2013. These international standards include IAS (International Accounting Standards), IFRS (International Financial Reporting Standards) and their interpretations (SIC and IFRIC).

The consolidated accounts were prepared under the responsibility of the Board of Directors, and approved by the Board of Directors on April 1st, 2014.

In accordance with French law, the consolidated financial statements will be considered final once they have been approved by the Group's shareholders at the Ordinary Shareholders' Meeting in May 2014.

As Ypso Holding SARL and Altice Lux Holding SARL, before being contributed to Numericable Group and after the IPO, were and remained entities under joint control (controlled by the Carlyle, Cinven and Altice private equity funds acting in concert), the contribution transactions do not constitute an acquisition within the meaning of IFRS 3 *Business Combinations*. The Group has opted to account for this transaction in carrying amounts, and the consolidated financial statements are prepared as if the contribution of the equity securities of Ypso Holding SARL and Altice Lux Holding SARL had occurred before January 1, 2012, the opening of the comparative period presented. The consolidated financial statements as of December 31, 2013 accordingly cover a period of 12 months.

1.3 Comparative information

The comparative data presented in respect of the 12 months ended December 31, 2012 correspond— with the exception of the application of IAS 19R (as disclosed hereafter)—to the combined financial statements of the two subgroups Ypso and Altice B2B (hereinafter referred to as the ''**Two Groups**'').

Before being contributed to Numericable Group on November 7, 2013, the Two Groups were entities under common control (controlled by the Carlyle, Cinven and Altice private equity funds).

1 Basis of preparation of the consolidated financial statements (Continued)

Accordingly, the financial datas presented for comparative purposes reflect the historical assets, liabilities, revenues, expenses and cash flows that were directly related to the sub-groups, Ypso and Altice B2B, which formed two separate groups as of December 31, 2012.

Moreover, as indicated in Note 2.1, the Group has applied IAS 19R from 1 January 2013, recognizing actuarial gains and losses in ''Other comprehensive income.'' The application of IAS 19R has resulted in a change in accounting policy that has also been reflected in the 2012 financial statements.

The impact of this adjustment on the items and main aggregates of the 2012 statement of income is set out in the following table (reconciliation of the 2012 combined financial statements with the restated 2012 financial statements presented for comparison purposes in this document).

	Reported 2012 financial statements	IAS 19R adjustment	Restated 2012 financial statements
	(in thousands of euros)		
Provisions	(7,715)	1,496	(6,219)
Operating income before depreciation and amortization (EBITDA)	**590,769**	**1,496**	**592,265**
Operating income	**299,045**	**1,496**	**300,541**
Net income (loss)	**84,930**	**1,496**	**86,426**
Other comprehensive income	**0**	**(1,496)**	**(1,496)**
Comprehensive income	**84,930**	**—**	**84,930**

1.4 List of entities included in the scope of consolidation

Subsidiaries

Consolidated entities are companies controlled by the Group (including special-purpose entities), i.e. entities in which the Group has the power to govern financial and operating policies so as to obtain benefits. Control exists when the Group has the power, directly or indirectly, to govern the financial and operating policies of a company so as to obtain benefits from its activities. The financial statements of subsidiaries are included in the consolidated financial statements from the date at which control commences until the date at which control ceases. Non-controlling interests in subsidiaries are identified separately in the statement of changes in equity.

Associates

Investments, in which the Group exercises significant influence, but not control or joint control, are accounted for under the equity method. Such investments are referred to as ''associates'' throughout these consolidated financial statements. Significant influence is the power to participate in the financial and operating policy decisions of the associate, but not control or joint control over said decisions. Associates are initially recognized at historical cost. The consolidated financial statements include the consolidated Group's share of income and expenses, from the date at which significant influence commences until the date at which significant influence ceases.

As of December 31, 2013 and 2012, the consolidated financial statements include the following entities:

Company and legal form of incorporation	Registered office	Basis of consolidation as of December 31, 2013	% control		% interest	
			2013	2012	2013	2012

(1) Numericable and Est Vidéocommunications were merged in NC Numericable in December 2013.

(2) Invescom and LTI Telecom were acquired on October 31, 2013, as mentioned in ''Significant events.''

1.5 Going concern assumption

The Group was formed by a series of acquisitions, funded mainly by external borrowings. The construction and subsequent modernization of the network have also required substantial investments. These two factors explain the Group's financial structure, namely the significant proportion of financial liabilities in relation to consolidated equity, as well as the significant interest expense.

The Group currently services its debt and funds its investments through net cash from operations. Furthermore, the Group's covenants under its loan agreements require it to comply with certain liquidity ratios (see section 23.1) and to maintain certain cash levels.

Furthermore, as explained in Note 4.1.6, the Group refinanced its Senior Debt in 2013, rescheduling a large portion of its debt.

Under these conditions, and in view of the updated cash flow projections, the Board of Directors believes that the Group will be able to finance its cash requirements for the 12 months from the close of the 2013 consolidated financial statements, and to meet its obligations in respect of its debt during this period.

As a result, the consolidated financial statements for the year ended December 31, 2013 have been prepared on a going concern basis.

2 Significant accounting policies

2.1 Accounting principles governing the preparation of the consolidated financial statements

Standards and interpretations applied by the Group as of December 31, 2013

The accounting policies for recognition and measurement used in preparing the consolidated financial statements for the year ended December 31, 2013 are the same as those used for the combined financial statements of Numericable Group, prepared in accordance with IFRS.

As mentioned in Note 1, the consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (''**IFRS**'') as adopted by the European Union (''**EU**''), with

2 Significant accounting policies (Continued)

mandatory application for annual periods ended December 31, 2013. The recognition and measurement principles of International Financial Reporting Standards as adopted by the European Union have been applied in preparing the consolidated financial statements. They are available on the following website:

http://ec.europa.eu/internal_market/accounting/ias/index_en.htm

Standards and interpretations adopted by the European Union with mandatory application as of December 31, 2013 are similar to the standards and interpretations published by the International Accounting Standards Board (''**IASB**''), with the exception of IAS 39 *Financial Instruments: Recognition and Measurement* (''**IAS 39**'') and the following standards and interpretations adopted by the EU but not yet mandatory in the EU from December 31, 2013.

Standards and interpretations mandatory for the year ended December 31, 2013

– IAS 19R (revised in 2011) *Employee Benefits* (applicable no later than January 1, 2013 for the Group) (''**IAS 19R**'')

The main changes resulting from this revision are:

- the recognition of actuarial gains and losses through ''Other comprehensive income.'' This results in a change in accounting principles, as the Group previously recognized actuarial gains and losses through profit or loss;
- the modification of the calculation of the financial component, due to the removal of the expected return on plan assets, which did not have an impact on the Group's financial statements;
- the immediate expensing of non-vested past service costs.

In accordance with the provisions of IAS 19R, the Group has applied the new provisions retrospectively. The effect of the changes is described in Note 1.3 above.

Other amendments and interpretations applicable from December 31, 2013, but without material impact on the Group are as follows:

– Amendments to IAS 1 *Presentation of Items of Other Comprehensive Income* and *Separate Financial Statements*

  This amendment to IAS 1 requires changing the presentation of other comprehensive income in the consolidated statement of comprehensive income, in order to present items liable to be reclassified in profit or loss separately from items that will never be reclassified in this manner. Comparative information is also presented in the same way.

– IFRIC 20 *Stripping Costs in the Production Phase of a Surface Mine* (''**IFRIC 20**'')

– Amendments to IFRS 7 *Disclosures: Offsetting Financial Assets and Financial Liabilities*

– Amendments to IFRS 32 *Disclosures: Offsetting Financial Assets and Financial Liabilities*

– Amendments to IAS 12 *Deferred Tax: Recovery of Underlying Assets*

– Amendments to IFRS 1 *Severe Hyperinflation and Removal of Fixed Dates for First-time Adopters*

– IFRS 13 *Fair value Measurement* (''**IFRS 13**'')

  IFRS 13 is a single source of fair value measurement and disclosure requirements for use across IFRSs. It defines fair value, sets out a framework for measuring fair value and lists disclosure requirements in respect of fair value measurements, including the fair value hierarchy currently set out in IFRS 7 *Financial Instruments: Disclosures*.

  In accordance with the transitional provisions of IFRS 13, the Group has applied the new provisions in respect of fair value prospectively.

2 Significant accounting policies (Continued)

Standards and interpretations mandatory after December 31, 2013 and not adopted early

The following are standards and interpretations that had been issued by the IASB and the IFRS Interpretations Committee and adopted by the EU at the date of these consolidated financial statements but which are not yet mandatory. The Group has not elected to adopt them early.

– IAS 27 (revised in 2011) *Separate Financial Statements* (applicable no later than January 1, 2014 for the Group) (''**IAS 27 Revised**'')

This standard sets out recognition and disclosure provisions for separate financial statements, i.e. financial statements prepared by a parent, an investor, a joint venture or an associate, when such investments are carried at acquisition cost or in accordance with IAS 39. The standard also outlines the accounting requirements for dividends, and contains numerous disclosure requirements.

– IAS 28 (revised in 2011) *Investments in Associates and Joint Ventures* (applicable no later than January 1, 2014 for the Group) (''**IAS 28 Revised**'')

This standard relates to the consolidation of joint ventures and associates under the equity method.

Some clarifications have been included with respect to accounting for changes in ownership interests (with or without loss of control). These disclosures are now covered by IFRS 12 *Disclosure of Interests in Other Entities*.

– IFRS 10 *Consolidated Financial Statements* (applicable no later than January 1, 2014 for the Group) (''**IFRS 10**'')

IFRS 10 supersedes SIC-12 *Consolidation of Special-Purpose Entities* and IAS 27 for the part relating to consolidated financial statements. This standard deals with the consolidation of subsidiaries and special-purpose entities, and redefines control, which is the basis of consolidation.

– IFRS 11 *Joint Arrangements* (applicable no later than January 1, 2014 for the Group) (''**IFRS 11**'')

IFRS 11 supersedes IAS 31 *Interests in Joint Ventures* and SIC-13 *Jointly Controlled Entities: Non-Monetary Contributions by Venturers*.

This standard deals with the accounting for joint arrangements. The definition of joint control is based on the existence of an arrangement and the unanimous consent of the parties sharing control.

Joint arrangements are classified into two categories: (i) joint ventures, where each party has an interest in the net assets of the entity, which is accordingly consolidated at equity, a method already applied by the Group; and (ii) joint operations, where each party has direct rights to the assets and direct obligations in respect of the liabilities of the entity, which is consolidated in accordance with the contractual arrangement.

– IFRS 12 *Disclosure of Interests in Other Entities* (applicable no later than January 1, 2014 for the Group) (''**IFRS 12**'')

IFRS 12 replaces provisions relating to disclosures previously included in IAS 27, IAS 28 and IAS 31.

This standard combines and supplements disclosures related to subsidiaries, joint ventures, associates, consolidated and unconsolidated SPEs.

– Amendment to IAS 32 *Disclosures: Offsetting Financial Assets and Financial Liabilities* (applicable on a mandatory basis for annual periods beginning on or after 1 January 2014)

Management is currently assessing the potential impact of the application of these standards and amendments on the statement of income, the statement of financial position, the statement of cash flows and the notes to the financial statements, but at this stage does not anticipate any material effect related to the application of these standards, interpretations and amendments.

2 Significant accounting policies (Continued)

The financial statements have been prepared according to the historical cost principle, with the exception of certain assets and liabilities detailed below:

– derivative financial instruments measured at fair value;
– financial assets at fair value through profit and loss measured at fair value;
– available-for-sale financial assets measured at fair value.

2.2 Foreign Currency Translation Adjustments

The consolidated financial statements are presented in euros, the functional currency of the Group. All financial data are rounded to the nearest thousand euro.

Foreign currency transactions are initially recorded in the functional currency at the exchange rate prevailing at the date of the transaction. At the closing date, monetary assets and liabilities denominated in a foreign currency are translated into the functional currency at the exchange rate prevailing on that date. All foreign currency differences are expensed. Non-monetary assets and liabilities that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of initial transaction. All foreign currency differences are recognized in profit or loss.

2.3 Revenue

Revenue from the Group's activities is mainly composed of:

– TV subscriptions, broadband Internet, basic cable services, telephony and installation fees invoiced to residential and business clients.
– Data transmission and very high speed Internet services, telecommunications services, convergence and mobility solutions invoiced to business clients.
– Network infrastructure services, including indefeasible rights of use (''IRUs'') arrangements and bandwidth capacity on the network, provided to other telecommunications operators, as well as the related maintenance services.

Revenue comprises the fair value of the consideration received or receivable for the sale of goods and services in the ordinary course of the Group's activities. Revenue is shown net of value-added tax, returns, rebates and discounts and after eliminating intercompany sales between entities included in the scope of consolidation.

Revenue is recognized and presented as follows, in accordance with IAS 18 *Revenue* (IAS 18):

– Revenues from subscriptions for basic cable services, digital pay TV, Internet and telephony are recognized on a straight-line basis over the subscription period; revenues from telephone calls made outside plans are recognized when the service is rendered.
– When a promotion not related to a customer's past consumption and purchases (such as a discount on the subscription price or free subscription for a given period) is offered to a customer, the Group recognizes the total amount of billable revenue on a straight-line basis over the term of the contract provided that the Group has the enforceable and contractual right to deliver the products after the free promotional period offered to the customer. If a promotion is not related to the subscription for a contract including a non-cancellable period, the Company recognizes revenues during the promotional period in the amount of the consideration received or receivable, as the customer's continuance is not assured.
– Installation and set-up fees (including connection) for residential customers are recognized as revenues when the service is rendered.

2 Significant accounting policies (Continued)

- Service access fees for business clients, when the access to the services is provided and they are associated to equipment or a service, are deferred, and the revenue is recognized along the estimated duration of the customer relationship, based on statistical data. They are generally staggered over the term of the contract.
- The revenue related to transmission capacity on terrestrial cables under IRU arrangements are recognized on a straight-line basis over the term of the contract.

2.4 Deferred revenue

For certain arrangements entered into with its non-residential customers, the Group receives up-front cash payments in relation to IRUs and connection fees. For these arrangements, the revenue is generally recognized on a straight-line basis over the term of the contract. Deferred revenue at the end of the reporting period represents unrecognized network lease revenue.

2.5 Operating income before depreciation and amortization

The Group has included the aggregate ''Operating income before depreciation and amortization'' or ''EBITDA'' in the consolidated statement of income because management believes that this aggregate is useful: it provides a measure of operating results that excludes non-cash items such as depreciation and amortization, thereby enhancing the predictive value of the financial statements.

Furthermore, EBITDA is an indicator used internally by management to measure the Company's operational and financial results, to make investment and resource-allocation decisions, and to assess the performance of management personnel.

EBITDA may not be comparable with similarly named measures used by other entities. Further, this aggregate should not be considered as a proxy for operating income, as the effects of depreciation, amortization and impairment, which are excluded from this measure, ultimately have an impact on operating income, which is also presented in the consolidated financial statements in accordance with IFRS 1.

2.6 Financial income and expense

Financial income and expense primarily comprise:

- interest expense and other expenses paid for financing transactions recognized at amortized cost and changes in the fair value of interest rate derivative instruments that do not qualify as hedges within the meaning of IAS 39 *Financial Instruments: Recognition and Measurement* (''**IAS 39**''), and which are recognized in ''Interest relative to gross financial debt'' in the consolidated statement of income;
- interest income relating to cash and cash equivalents.

2.7 Segment information

IFRS 8 *Operating Segments* requires segment information to be presented on the same basis as that used for internal reporting purposes. The Group has identified the following three segments:

- B2C Operations
- B2B Operations
- Wholesale Services

2 Significant accounting policies (Continued)

B2C Operations

The Group provides residential and business customers with TV subscription services, broadband Internet, basic cable services, telephony and installation services.

B2B Operations

The Group provides business customers with a comprehensive service offering, including data transmission and very high speed Internet, telecommunications services, convergence and mobility solutions, through fiber and DSL networks.

Wholesale Services

The Group sells network infrastructure services, including IRUs and bandwidth capacity on its network, to other telecommunications operators, as well as the related maintenance services.

2.8 Income taxes

Income tax expense comprises current and deferred tax. Income tax expense is recognized in profit or loss except if it relates to items recognized directly in equity, in which case it is recognized in equity (see Note 4.1.7).

Current tax is the tax payable on the taxable income for the year, estimated using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognized for the following temporary differences: (i) the initial recognition of goodwill; (ii) the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit; and (iii) investments in subsidiaries, joint ventures and associates when the Group is able to control the timing of the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

Accordingly, for companies included in the scope of consolidation, a deferred tax liability may be recognized in respect of prospective dividend payments by these companies.

Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted at the reporting date.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and if they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities when the taxable entity intends to settle current tax liabilities and assets on a net basis or when tax assets and liabilities are to be realized simultaneously.

Deferred taxes are reviewed at each reporting date to take into account changes in tax legislation and the possibility of recovering deductible temporary differences and tax losses. A deferred tax asset is recognized when it is probable that future taxable profits against which the temporary difference can be utilized will be available within a foreseeable timeframe.

2.9 Government grants and investment subsidies

Entities of the Group may receive government grants and investment subsidies in the form of direct or indirect funding of investment projects, mainly provided by local and regional authorities. These grants are deducted from the cost of the related assets and recognized in the consolidated statement of

2 Significant accounting policies (Continued)

income, based on the pattern in which the related asset's expected future economic benefits are consumed.

2.10 Goodwill and business combinations

Business combinations are accounted for in accordance with the purchase method. The acquiree's identifiable assets, liabilities and contingent liabilities that meet the conditions for recognition under IFRS 3R are recognized at their fair value at the acquisition date, except for non-current assets (or groups earmarked for disposal), which are classified as held for sale in accordance with IFRS 5 *Non-current Assets Held for Sale and Discontinued Operations* and measured at the lower of their carrying amount and fair value less costs to sell.

The consideration transferred corresponds to the fair value, at the acquisition date, of assets given, liabilities incurred or assumed, and equity instruments issued by the Group in exchange for control of the acquiree. The goodwill arising from a business combination is equal to the difference between:

– the sum of the consideration paid, the value of any non-controlling interest that remains outstanding after the business combination and, where applicable, the acquisition-date fair value of the acquirer's previously held equity interest in the target, and

– the net of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed.

Goodwill is recognized in assets in the consolidated statement of financial position. When the difference is negative, it is directly recognized through profit or loss.

The secondary costs directly attributable to an acquisition giving control are recorded in expenses in the period during which the costs are incurred, except for the borrowing costs, which must be recorded in accordance with IAS 32 *Financial Instruments: Presentation* (''**IAS 32**'') and IAS 39.

When goodwill is determined provisionally at the end of the period in which the combination is effected, any adjustments to the provisional values within 12 months of the acquisition date are recognized in goodwill.

With respect to the acquisition of non-controlling interests (i.e. non-controlling interests in a subsidiary that is already included in the scope of combination), the Group fully allocates the difference between the price paid and the share in net assets acquired to equity in accordance with IAS 27, with no revaluation of the assets and liabilities acquired.

Goodwill resulting from the acquisition of subsidiaries or joint ventures is presented separately in the consolidated statement of financial position. Impairment relative to this goodwill is presented on the ''Depreciation and amortization'' line of the consolidated statement of income.

Goodwill resulting from the acquisition of associates is included in the carrying amount of the investment. Impairment relative to this goodwill is presented on the ''Share in net income (loss) of associates'' line.

Goodwill is not amortized, but is subject to impairment testing whenever there is any indication that an asset may be impaired, and at least once a year in accordance with the methods and assumptions described in Note 16.

After initial recognition, goodwill is recorded at cost less accumulated impairment losses.

2.11 Intangible assets

Recognition and measurement principles

Intangible assets are measured at cost less accumulated amortization and impairment losses. Cost comprises all directly attributable costs necessary to buy, create, produce and prepare the asset for use.

2 Significant accounting policies (Continued)

Intangible assets consist mainly of indefeasible rights of use, patents, and purchased and internally developed software.

IRUs correspond to the right to use a portion of the capacity of a terrestrial or submarine transmission cable granted for a fixed period. IRUs are recognized as an asset when the Group has the specific indefeasible right to use an identified portion of the underlying asset, generally optical fibers or dedicated wavelength bandwidth, and the duration of the right is for the major part of the underlying asset's economic life. They are amortized over the shorter of the expected period of use and the life of the contract between 3 and 20 years.

Patents are amortized on a straight-line basis over the expected period of use, generally not exceeding 10 years.

Software is amortized on a straight-line basis over its expected useful life, which generally does not exceed 3 years.

The cost of an internally developed intangible asset is the sum of personnel expenses incurred from the date the intangible asset first meets the recognition criteria of IAS 38. An intangible asset arising from the development phase of an internal project is recognized if an entity can demonstrate all of the following:

- the technical feasibility of completing the intangible asset so that it will be available for use or sale;
- its intention of completing the intangible asset and use or sell it;
- its ability to use or sell the intangible asset;
- the capacity of the intangible asset to generate probable future economic benefits. Among other things, the Group must demonstrate the existence of a market for the output of the intangible asset or the intangible asset itself or, if it is to be used internally, the usefulness of the intangible asset;
- the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset;
- its ability to measure reliably the expenditures attributable to the intangible asset during its development.

Capitalization of costs ceases when the project is finalized and the asset is available for use.

The cost of an internally developed intangible asset arising from the development phase of an internal IT project is amortized on a straight-line basis over its expected useful life, which generally does not exceed three years.

Agreements entered into with local authorities

To set up and operate its networks, the companies of the Group have in the past (and often before entering the Group) entered into various agreements with local authorities and representative bodies under successive legal frameworks (French cable network plan, Freedom of Communication Act of 1986, etc.). Many of these agreements convey exclusive rights to the operator and lay down obligations in terms of local television service provision, programming, pricing policy, and the associated license fees payable. Some of the agreements are public service concessions with ''return property'' clauses, whereby ownership of the technical equipment and civil engineering work reverts to the local authorities at the end of the concession.

The EU Telecoms Directives of 2002, known as the ''Telecoms Package,'' establish the principle of open competition among operators in the telecommunications market, requiring national regulatory authorities to enforce fair competition conditions, without granting exclusive or special rights for setting up and operating networks. The French law of July 9, 2004, which transposed the Telecoms Package into French law, required that existing agreements be brought into compliance by the end of July 2007 at

2 Significant accounting policies (Continued)

the latest, removing all exclusive rights clauses and ensuring the shared use of public civil engineering infrastructure.

Only a minority of agreements entered into with local authorities were liable to be classified in the category of public service concessions when these agreements were concluded. As such, IFRIC 12 *Service Concessions* applies solely to the public service concession arrangement with the department of Hauts-de-Seine (*Délégation de Service Public 92*).

Service Concession agreement entered into with the department of Hauts-de-Seine

Sequalum, a subsidiary of the Group, was selected in 2007 by the department of Hauts-de-Seine to plan, deploy and operate a Fiber To The Home (''FTTH'') high-capacity fiber network throughout the department under a public service concession arrangement (*Délégation de Service Public*—DSP) known as DSP 92. A DSP is a form of public-private partnership under French law, pursuant to which a public authority entrusts private entities to operate a public service in return for remuneration that is based on the revenue generated by the service in question.

The terms of the service arrangement signed between Sequalum and the department of Hauts-de-Seine require Sequalum to construct the network—completing construction by 2015—and maintain and operate the network to a specified standard for 25 years. At the end of the 25th year, the service arrangement will end.

Sequalum provides construction services to the department of Hauts-de-Seine in exchange for an intangible asset, i.e. a right to collect revenue from the network users. In accordance with IAS 38 and IFRIC 12, Sequalum recognizes the intangible asset at cost, net of grants, i.e. the fair value of the consideration transferred to acquire the asset, which is the fair value of the consideration received or receivable for the construction services delivered.

Main characteristics of the agreement:

Control and regulation of prices	Origin of revenues	Subsidy granted by grantor	Residual value	End of agreement	Accounting model
Rates are defined in the service agreement	Users	59 million euro subsidy to finance the construction	The network will be returned to the grantor with no indemnity, except for some assets (*actifs de reprise*)	Contract will end after 25 years	Intangible assets

2.12 Property, plant and equipment

Property, plant and equipment are measured at cost less accumulated depreciation and impairment losses.

Land is not depreciated. Buildings and premises are amortized on a straight-line basis over 20 years.

2 Significant accounting policies (Continued)

When property, plant and equipment include significant components with different useful lives, the components are recorded and amortized separately. With respect to network and technical equipment, depreciation is calculated on a straight-line basis. The main depreciation periods are as follows:

Network and technical equipment	Method	Duration
Network hubs	Straight line	10 to 15 years
Optical cables	Straight line	15 to 30 years
Engineering facilities	Straight line	20 to 40 years
Connections	Straight line	5 years
Digital terminals	Straight line	3 to 5 years
Furniture	Straight line	5 to 10 years
Fixtures and fittings	Straight line	8 to 10 years
Transport equipment	Straight line	2 to 5 years
Office equipment	Straight line	3 to 5 years
Computer equipment	Straight line	3 to 5 years

Gains or losses on disposal of property, plant and equipment are the difference between the profit from the disposal and the carrying amount of the asset and are recognized in the caption ''Other operating income/expenses'' of the consolidated statement of income.

2.13 Lease arrangements

Leases are classified as finance leases whenever the terms of the lease substantially transfer the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

The Group as lessor

Amounts due from lessees under finance leases are recognized as receivables in the amount of the Group's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Group's net investment in respect of the leases.

Rental income from operating leases is recognized on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognized on a straight-line basis over the term of the lease.

The Group as lessee

Assets held under finance leases are initially recognized as assets of the Group at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation. Lease payments are apportioned between finance expenses and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance expenses are recognized immediately in profit or loss. Contingent rentals are expensed in the period in which they are incurred.

Operating lease payments are expensed on a straight-line basis over the term of the lease, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed. Contingent rentals arising under operating leases are expensed in the period in which they are incurred. In the event that incentives are received to enter into operating leases, such incentives are recognized as a liability. The aggregate benefit of incentives is recognized as a reduction of rental expense on a straight-line basis, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

2 Significant accounting policies (Continued)

2.14 Impairment of goodwill and non-current assets

Whenever events or changes in the economic environment indicate a risk of impairment of goodwill, or other intangible assets, property, plant and equipment and assets in progress, the Group re-examines the value of these assets. In addition, goodwill, other intangible assets with indefinite useful lives and intangible assets in progress are subject to annual impairment testing during the second half of each fiscal year.

This testing is performed in order to compare the recoverable amount of an asset or a Cash Generating Unit (''**CGU**'') with its carrying amount.

An asset's or CGU's recoverable amount is the greater of its fair value less costs to sell or its value in use. The recoverable amount is determined for each individual asset, unless the asset does not generate cash inflows that are largely independent of those derived from other assets or groups of assets. In that case, the recoverable amount is determined for the CGU to which the asset belongs.

A CGU is the smallest identifiable group of assets that generate cash inflows that are largely independent of the cash inflows from other assets or groups of assets. The CGUs for the Group are ''B2C Operations,'' ''B2B Operations'' and ''Wholesale Services.''

The value in use of each asset or group of assets is determined as the present value of future cash flows (discounted cash flow method or ''DCF'') by using a discount rate after tax specific to each asset or group of assets concerned.

The fair value less costs to sell is the amount obtainable from the sale of the asset or group of assets in an arm's length transaction between knowledgeable and willing parties, less costs to sell.

When the carrying amount of an asset exceeds its recoverable amount, an impairment loss is recognized in the caption ''Depreciation and amortization'' of the statement of income. Only impairment losses recognized on assets other than goodwill such as depreciable intangible assets, intangible assets with indefinite useful lives and property, plant and equipment may be reversed.

2.15 Financial assets

The Group classifies financial assets in four categories: available-for-sale; loans and receivables; held-to-maturity; and financial assets at fair value through profit and loss. They are classified as current assets and non-current assets in accordance with IAS 1.

Purchases and sales of all financial assets are recognized at the settlement date.

Available-for-sale financial assets

Available-for-sale financial assets are recognized initially at fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset. After initial recognition, they are reported at their fair value. Gains and losses arising from changes in their fair value are recognized directly in equity, until the security is sold or is determined to be impaired, at which time the cumulative gain or loss previously recognized in equity is reclassified in profit or loss for the period.

Available-for-sale financial assets consist mainly of shares in companies that are not included in the scope of consolidation. Fair value corresponds to the quoted price for listed securities. For non-listed securities, the Group values financial assets at historical cost, less any impairment losses, when a reliable estimate of fair value cannot be made using valuation techniques in the absence of an active market.

When there is objective evidence that available-for-sale assets are impaired, the cumulative impairment loss included in equity is reclassified from equity to profit or loss. Objective evidence that an available-for-sale financial asset is impaired includes, among other things, a decrease in the estimated future cash flows arising from these assets, as a result of significant financial difficulty of the issuer, a

2 Significant accounting policies (Continued)

material decrease in expected future profitability or a prolonged decrease in the fair value of the security. Impairment losses recognized in profit or loss for equity instruments classified as available-for-sale are never reversed.

Available-for-sale financial assets are included in non-current assets unless management intends to dispose of the investment within 12 months of the date of the statement of financial position.

Loans and receivables

Loans and receivables are initially recognized at fair value plus transaction costs that are directly attributable to the acquisition. After initial recognition, they are measured at amortized cost using the effective interest method.

This category mainly includes trade and other receivables.

If there is objective evidence that an impairment loss has been incurred, the amount of this loss, measured as the difference between the financial asset's carrying value and its recoverable amount, is recognized in profit or loss. Impairment losses may be reversed if the recoverable amount of the asset subsequently increases.

Held-to-maturity financial assets

Held-to-maturity financial assets are financial assets with fixed or determinable payments and fixed maturities that the Group intends and has the ability to hold to maturity. Financial assets that are designated as held-to-maturity are measured at amortized cost, using the effective interest method.

They are reviewed for impairment on an individual basis if there is any indication that they may be impaired.

The Group does not classify any financial asset in this category.

Financial assets measured at fair value through profit or loss

These financial assets are measured at fair value, with gains and losses recorded as financial income or expenses.

This category mainly includes:

- assets held for trading that the Group intends to sell in the near future (primarily marketable securities);
- assets voluntarily classified at inception in this category;
- derivative financial assets.

2.16 Inventories

Inventories, mainly set-top boxes and technical equipment, are carried at the lower of cost and net realizable value. Cost is determined using the weighted-average cost method, and includes the acquisition cost of materials.

Net realizable value is the estimated selling price in the ordinary course of business, less the estimated selling expenses.

2.17 Cash and cash equivalents

Cash consists of cash in bank accounts and deposits.

Cash equivalents consist of highly liquid investments not subject to significant changes in value and with an original maturity date generally less than three months from the time of purchase.

2 Significant accounting policies (Continued)

2.18 Financial liabilities and equity instruments

Classification as debt or equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangement.

Equity instruments

An equity instrument is any contract resulting in a residual interest in the assets of an entity after deducting all of its liabilities. The equity instruments issued by the Group are recorded for the proceeds received, net of direct issuance costs.

Financial liabilities

Financial liabilities other than derivative instruments include borrowings under the Senior Facility Agreement (''SFA''), debt related to finance leases, guarantee deposits, advances received and bank overdrafts.

They are measured at amortized cost, using the effective interest method in accordance with IAS 39. The effective interest rate is the internal rate or return that exactly discounts future cash flows through the term of the financial liability. Fees, debt issuance and transaction costs are included in the calculation of the effective interest rate over the expected life of the instrument. Accrued interest is included in ''Current portion of financial liabilities'' in the statement of financial position.

2.19 Derivative instruments

Derivatives are initially recognized at fair value on the date of inception of a derivative contract, and are subsequently remeasured at their fair value.

The Group enters into interest rate swaps and caps to manage its interest rate exposure. The objective is to convert variable rate financial instruments into fixed rate financial instruments. These contracts do not qualify as hedges for accounting purposes according to IAS 39, as there was no formal designation and documentation of the hedging relationship at inception. Changes in the fair value of any these derivative instruments are recognized immediately in the statement of income, under financial income and expenses.

2.20 Employee benefits, provisions and contingent liabilities

Provisions are recognized when the Group has a legal obligation (legal, regulatory or contractual) or a constructive obligation, as a result of past events, and it is probable that economic benefits in the form of an outflow of resources will be required to settle the obligation, and when the amount of the obligation can be reliably estimated. Provisions are reviewed at the end of each reporting period, and adjusted to reflect the current best estimate.

A contingent liability is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity, or a present obligation that arises from past events but is not recognized because it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation or the amount of the obligation cannot be measured with sufficient reliability. Contingent liabilities are disclosed in the notes, but are not recognized.

2 Significant accounting policies (Continued)

Employee benefits

The Group provides employee benefits through contributions to defined-contribution plans and defined-benefit plans. The Group recognizes pension costs related to defined-contribution plans as they are incurred in personnel expenses in the statement of income.

Estimates of the Group's pension and end-of-service benefit obligations are calculated annually, in accordance with the provisions of IAS 19 Revised *Employee Benefits* (''**IAS 19R**''), with the assistance of independent actuaries, using the projected unit credit method and considering actuarial assumptions including the probable turnover of beneficiaries, salary increases, expected life expectancy, the probable future length of employees' service and an appropriate discount rate updated annually.

Actuarial gains and losses arising from experience, adjustments and changes in actuarial assumptions are recognized in other comprehensive income.

Litigation

The amount of provisions for litigation is based on the Group's assessment of the level of risk, and depends on its assessment of the basis for the claims.

Restructuring

Provisions for restructuring expenses are recognized when restructuring plans have been finalized and approved by the Group's management, and when the Group has raised a valid expectation among the employees concerned that it will carry out the plan either by starting to implement the plan or announcing its main features. These provisions only include direct expenditure arising from restructuring, notably severance payments, early retirement costs, costs for notice periods not worked and other costs directly related to the closure of facilities.

2.21 Share-based payment

The Group has granted options that will be settled as equity instruments. In accordance with IFRS 2, the benefit granted to employees under stock option plans, assessed at the time of the grant of the option, is additional remuneration.

Plans granting instruments settled as equity instruments are measured at the grant date based on the fair value of the equity instruments granted. They are recognized as personnel expenses over the vesting period, taking into account an estimate of the number of options that will vest at the end of the period. In addition, for plans based on non-market performance conditions, the probability of achieving the performance objective is assessed each year and the expense adjusted accordingly.

The fair value of options granted is determined using the Black-Scholes valuation model, which takes into account an annual reassessment of the expected number of exercisable options. The expense recognized is adjusted accordingly.

2.22 Borrowing costs

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized as part of the cost of that asset. The Group notes that it does not take a substantial amount of time to get assets ready for their intended use because of the incremental deployment of the network. IAS 23 *Borrowing Costs* consequently has no impact on the consolidated financial statements.

2.23 Earnings per share

Basic earnings per share are calculated by dividing the profit attributable to holders of ordinary shares of the parent by the weighted average number of ordinary shares outstanding during the period, excluding any treasury shares held by the Group.

2 Significant accounting policies (Continued)

Diluted earnings per share are calculated by dividing the profit attributable to holders of ordinary shares of the parent by the weighted average number of ordinary shares outstanding during the period, based on the assumption that all potentially dilutive instruments are converted and that the assumed proceeds from the conversion of these instruments has been used to acquire shares of the Group at the average market price for the period during which these instruments were outstanding.

Potentially dilutive instruments include stock options, if dilutive.

3 Critical accounting judgments and key sources of uncertainty in respect of estimates

The preparation of the consolidated financial statements in accordance with IFRS requires the Group to make a certain number of estimates and assumptions that are realistic and reasonable.

In applying accounting policies during the preparation of the consolidated financial statements described in Note 2, management is required to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses.

Such estimates are prepared based on the going concern assumption, established using currently available information and in view of the current economic environment. In the prevailing economic environment, changes in facts and circumstances may result in revised estimates or assumptions, which could affect the financial position, results of operations and cash flows of the Group.

The valuation of certain assets and liabilities in the preparation of these financial statements required management to make estimates and assumptions, particularly in respect of:

- *Revenue recognition:* as indicated in Note 2.3, revenue is recognized at the fair value of the consideration received or to be received when the risks and rewards of ownership of a product have been substantially transferred to the buyer or when the service is rendered. With respect to contracts that include installation, connection and set-up fees for residential customers, significant judgments must be made as to whether the recognition criteria set out in IAS 18 should be applied separately and whether installation, set-up and connection should be considered separable services. With respect to service access fees for business customers, revenue is recognized on a straight-line basis over the term of the contract. Accordingly, depending upon how judgment is exercised and how estimates are determined, the timing and amount of revenue recognized can differ significantly.
- *Capitalization of development costs:* the criteria for capitalizing development costs are set out in Note 2.11. Once capitalized, these costs are amortized over the estimated useful lives of the respective products (generally three years). The Group must therefore evaluate the commercial and technical feasibility of its development projects and estimate the useful lives of the products resulting from these projects. Should a product fail to substantiate these assumptions, the Group may be required to impair or write off some of the capitalized development costs in the future. Note 14 provides information on the amount of capitalized costs in the consolidated statement of financial position.
- *Fair value of financial instruments* (see Note 28.3): fair value is determined by reference to the market price at the end of the period. For financial instruments for which there is no active market such as interest rate swaps, which the Group currently uses to hedge its interest rate risk, fair value is estimated based on models that rely on observable market data or by the use of various valuation techniques, such as discounted future cash flows.
- *Recognition of deferred tax assets on unrealized tax loss carryforwards* (see Notes 2.8, 4.1.7 and 12): deferred tax assets relate primarily to tax loss carryforwards. The assets relating to tax loss carryforwards are recognized if it is probable that the Group will generate future taxable profits against which these tax losses can be offset. Evaluation of the Group's capacity to utilize tax loss carry-forwards relies on an in-depth review. The Group analyzes past events, and the positive and

3 Critical accounting judgments and key sources of uncertainty in respect of estimates (Continued)

negative elements of certain economic factors that may affect its business in the foreseeable future to determine the probability of its future utilization of these tax loss carryforwards. As of December 31, 2013 the Group recognized deferred tax assets in a total amount of 132.7 million euros in respect of loss carryforwards whose future use was deemed probable within the forecast period of five years.

- *Impairment tests* (see Notes 2.10 and 16): the determination of recoverable amounts of the CGUs assessed in the annual impairment test requires an estimate of their fair value less costs to sell as well as their value in use. The assessment of the value in use requires assumptions to be made with respect to the operating cash flows of the CGUs, as well as discount rates.

  The determination of the value in use is based on assumptions such as the weighted average cost of capital and the perpetual growth rate beyond the projection period. These assumptions can vary, potentially causing the recoverable amount to fall below the carrying amount, and as such requiring the recognition of an impairment loss.

  As of December 31, 2013 and 2012, the assumptions used to determine the value in use of the CGUs for which goodwill is allocated were as follows:

CGU "B2C Operations"	2013	2012
Length of forecast period	5 years	8 years
Discount rate	7.30%	7.56%
Growth rate beyond forecast period for terminal value	2.00%	1.75%

CGU "B2B Operations" and "Wholesale"	2013	2012
Length of forecast period	5 years	6 years
Discount rate	7.14%	9.42%
Growth rate beyond forecast period for terminal value	2.00%	1.00%

  The calculation of value in use is based on financial budgets approved by management, the period of which was reduced to five years in 2013 in accordance with the recommendations of IAS 36. Projections in respect of subscribers, revenue, costs, and capital expenditure are based on reasonable and acceptable assumptions that represent management's best estimates. Key assumptions are the estimated number of subscribers, average revenue per user and the level of upgraded network infrastructure. The projections are based on both past experience and the expected future market penetration of the various products.

4 Significant events

4.1 Year ended December 31, 2013

4.1.1 Constitution of Numericable Group

Numericable Group was established in July 2013 by way of cash contributions in an initial amount of 37 thousand euros.

On November 7, 2013, Numericable Group received, within the framework of the Company's prospective IPO, the contribution of two holding companies incorporated in Luxembourg, Ypso Holding SARL and Altice Lux Holding SARL, the parent companies of Ypso France and Altice B2B France respectively.

The contributions of Ypso and Altice B2B Numericable Group increased the capital of the Company by a total of 1,995,489 thousand euros, breaking down into a 113,772 thousand euro increase in share capital and a 1,881,717 thousand euro increase in additional paid-in capital.

4 Significant events (Continued)

Following the contributions, the Company's share capital accordingly amounted to 113,809 thousand euros, and additional paid-in capital to 1,881,717 thousand euros.

Moreover, during the restructuring of the Group's debt in 2009, during which the Group's shareholders acquired certain loans in respect of SFA Ypso France, Ypso Holding SARL issued securities subscribed by the shareholders, including 132,664,023 subordinated interest preferred equity certificates (''Super PECs'') with a nominal value of 1 euro each, the interest on which was capitalized.

Cinven, Carlyle and Altice contributed the Super PECs to Numericable Group on November 7, 2013, within the framework of the legal transactions related to the IPO. This debt was therefore extinguished in exchange for newly issued securities. Subsequently, the expense related to the extinguishment of the debt (''Premium'') was recognized as financial expense in the amount of 81.6 million euros. This expense had no impact on the Group's cash position.

4.1.2 IPO and capital increases

On October 25, 2013, the Board of Directors of Numericable Group decided in principle to undertake an initial public offering of the Company on NYSE Euronext Paris.

On November 7, 2013, the Board of Directors:

- priced the IPO at 24.80 euros per share;
- decided to increase share capital by a total amount of 250,000 thousand euros through a public offering (including a 10,081 thousand euro capital increase through the issuance of new shares and 239,919 thousand euros in additional paid-in capital);
- proposed a capital increase reserved for employees, which was ultimately carried out in the amount of 1,034 thousand euros (including a 52 thousand euro capital increase through the issuance of new shares and 982 thousand euros in additional paid-in capital).

Trading on the shares began on November 8, 2013.

The costs incurred in connection with the IPO were fully charged to additional paid-in capital in a total amount of 14,582 thousand euros. These costs, borne entirely by Numericable Group, were accounted for without tax effect.

Following the IPO, the Numericable Group's share capital amounted to 123,942 thousand euros, and additional paid-in capital to 2,108,037 thousand euros. See Note 22.1 for information on the constitution of the share capital of Numericable Group.

4.1.3 Granting of stock option plans

On November 7, 2013, the Board of Directors also adopted a stock option plan in favor of certain officers and employees of Numericable Group.

The plan covers a total of 2,845,229 options for 2,845,229 shares.

As of December 31, 2013, the fair value of options granted was estimated at 9,702 thousand euros. An amount of 640 thousand euros was expensed in 2013 in respect of this plan.

See Note 25.2 for further details on this stock option plan.

4.1.4 Acquisition of Valvision

On 27 June 2013, the Group acquired 100% of the share capital of Valvision, a cable operator operating in eastern France.

4 Significant events (Continued)

The difference between the acquisition price (3,340 thousand euros) and the share of equity acquired (219 thousand euros), representing the acquired customer base, was 3,121 thousand euros. It was fully allocated to ''Other intangible assets,'' and will be amortized over a period of three years.

No additional payment is provided for under the acquisition agreement.

4.1.5 Acquisition of LTI Telecom

On October 31, 2013, the Group acquired 100% of the shares of Invescom, a holding company that owns 100% of LTI, a B2B telecom operator.

The acquisition price amounted to 25,550 thousand euros for a share of equity acquired of 609 thousand euros. No additional payment is provided for under the acquisition agreement.

In view of the date of the acquisition, the allocation of the price to identifiable assets acquired and liabilities assumed had not been finalized as of December 31, 2013. The Company has until September 30, 2014 to finalize this process.

Therefore, the difference of 24,941 thousand euros between the acquisition price and the share of equity as reflected in the accounts of the acquired subgroup was recognized as goodwill as of December 31, 2013 (see Note 13).

4.1.6 Refinancing of Senior Debt

Amendments in July-August 2013

In July and August 2013, the Group amended its Senior Facility Agreements, allowing a large portion of its debt to be rescheduled. This renegotiation also led to a change in certain contractual conditions, including the margin applicable to the Senior Debt of Altice B2B.

This renegotiation of Senior Debt is a simple modification of existing debt. As such, the costs stemming from the renegotiation (6.2 million euros) have been measured at amortized cost in accordance with the effective interest method pursuant to IAS 39.

Refinancing in December 2013

In December 2013, the Group raised a new tranche of Senior Debt in a total amount of 800 million euros (Tranche D). This tranche is repayable by December 31, 2018 and bears interest at Euribor plus a margin of 3.75%.

The Group used the proceeds of this issue (800 million euros) and the proceeds of the capital increase carried out in the context of the public offer (250 million euros) to reimburse some of its existing debt, as follows:

– all of the Senior Debt originally subscribed by Altice B2B France in the amount of 451 million euros;
– all of the 275 million euro bond issue (Tranche C-Two B) subscribed in October 2012;
– part of the 225 million euro bond issue (Tranche C-Two A) subscribed in October 2012 (repayment of 78.8 million euros);
– part of the 360 million euro bond issue (Tranche C-One) subscribed in February 2012 (repayment of 126.1 million euros).

The renegotiation of Senior Debt represents the settlement of existing debt. Accordingly:

– the cost of settling bonds (''Premium'') incurred by the Group were recognized in other financial expenses in the amount of 28.0 million euros;

4 Significant events (Continued)

– costs relating to the implementation of the extinguished debt in December 2013, which were originally recorded at amortized cost, has been recognized in other financial expenses in the amount of 15.2 million euros;

– costs relating to the implementation of the new Tranche D (7.25 million euros) have been recognized at amortized cost using the effective interest method in accordance with IAS 39.

Following the refinancing in 2013, the maturity of Senior Debt was as follows as of December 31, 2013 (nominal amounts):

Maturity	2014	2015	2016	2017	2018	2019	Total
in millions of euros	42.6	63.4	102.1	821.0	1,223.2	380.0	2,632.4

4.1.7 Recognition of deferred tax assets

In the year ended December 31, 2013, the Group recognized deferred tax assets in a total amount of 132.7 million euros in respect of loss carryforwards whose future use was deemed probable within the forecast period of five years.

In view of the large amount of unrecognized deficits remaining as of December 31, 2013 (see Note 12.4), all of the deferred tax income recognized in 2013 was recorded in the statement of income, and no deferred tax assets were recorded in respect of actuarial gains and losses recognized in other comprehensive income or capital increase expenses charged to additional paid-in capital.

4.1.8 In-depth inquiry of the European Commission into the transfer of cable infrastructures by certain local authorities

On July 17, 2013 the European Commission signaled that it had decided to open an investigation to verify whether the transfer of public cable infrastructure to Numericable by several French municipalities between 2003 and 2006 was in line with European Union State aid rules. The European Commission expressed doubts as to the compatibility of such aid with EU rules because of the economic advantage conferred on Numericable by virtue of the conditions of the transfer.

As the Group disputes this position, and as the potential risk relating to this investigation cannot be measured reliably, no provision was recorded in the financial statements as of December 31, 2013.

4.1.9 Leaseback of modems

In May 2013 and June 2013, the Group entered into two sale and leaseback contracts with Lease Expansion, in respective amounts of 12.7 million euros and 5.9 million euros for new modems known as ''La Box.''

The term of the lease is three years for each contract.

4.1.10 Tax audits

In 2013, the tax administration initiated a tax audit of Altice B2B France and Completel in respect of fiscal years 2010 and 2011, resulting in the submission of proposed adjustments on December 19, 2013. The adjustments stem exclusively from the rejection of the deductibility of certain shareholder services expensed in 2009, 2010 and 2011. A tax contingency provision totaling 11.4 million euros was recorded as of December 31, 2013 to cover the proposed adjustments (income tax, VAT, withholding tax, fines, penalties and default interest).

4 Significant events (Continued)

4.1.11 Lehman Brothers compensation

The Group received two further payments of 4.5 million euros and 2.6 million euros in June 2013 and December 2013 respectively, as part of its claim following the bankruptcy of Lehman Brothers in September 2008 (see Note 28.4).

4.1.12 Cancellation of the 5 million euro fine imposed by ARCEP

In July 2013, the Constitutional Court ruled that the power to sanction held by the French regulator (*Autorité de régulation des communications électroniques et des postes*—ARCEP) did not meet the principles of independence and impartiality required by the Constitution.

On October 21, 2013, the Group obtained the annulment by the Council of State of the penalty imposed by ARCEP on December 20, 2011, which condemned Numericable and NC Numericable to a fine of 5 million euros for non-compliance with the ARCEP decision of November 4, 2010.

The Group recorded the proceeds relative to the annulment of the fine in the financial statements for the year ended December 31, 2013 under ''Other operating income'' (see Note 9).

4.1.13 Litigation with Free

On December 13, 2013, the Commercial Court of Paris condemned the Group to pay the sum of 6,411 thousand euros to Free as part of a dispute over an advertising campaign run by Numericable that Free claimed harmed its brand and its image (see Note 24.2 for details on the procedure). The Group appealed this decision.

The Group recognised a provision for the entire fine in the consolidated financial statements for the year ended December 31, 2013. The decision having been executed in early January 2014, the provision was classified under ''Current provisions'' in the consolidated statement of financial position as of December 31, 2013.

4.2 Year ended December 31, 2012

4.2.1 Bond issues

In 2012, the Group issued several bonds to refinance part of its existing financial debt.

In February 2012, the Group issued a 360 million euro bond. The issuer was Numericable Finance & Co. SCA, an unregulated securitization company in the form of a corporate partnership limited by shares incorporated under the laws of the Grand Duchy of Luxembourg. The proceeds of the notes were used by Numericable Finance & Co. to fund a buy-back of 100% of the Lending Bank's (JP Morgan) participation in a loan (the ''C-One'' Facility Loan), whose sole lender was the bank itself under the Senior Facility Agreement, in favor of the Group, and which allowed it to reimburse certain facilities under the SFA in the amount of 350 million euros.

The notes mature on February 15, 2019 and bear interest at 12.375%. Interests on the notes are paid semiannually on February 15 and August 15 of each year.

In February 2012, the Group also obtained a new Revolving Credit Facility under the SFA. The maximum amount that can be drawn is 65 million euros (''Revolving Credit Facility''). It matures in March 2016. The amount used under this facility bears interest equal to Euribor plus 4.5%. The amount not used under this facility, which amounted to 65 million euros as of December 31, 2013, bears interest equal to a commitment fee of 2.25%.

According to the terms of the amendment of the September 2011 Senior Facility Agreement, maturities of certain lenders' commitments were extended by two years (comprising one-half of Tranche A and the Capex Facility and two-thirds of Tranches B & C). Along with the extension of the maturities, the

4 Significant events (Continued)

amendment changed the margin on the extended tranches and put a new set of financial covenants in place. The September 2011 Senior Facility Agreement became effective on February 15, 2012.

In October 2012, the Group issued another two bonds in amounts of 225 and 275 million euros respectively through the same issuer, Numericable Finance & Co. SCA. The proceeds of the notes were used by Numericable Finance & Co. to fund a buy-back of 100% of the Lending Bank's (JP Morgan) participation in two new loans, the ''C-Two A Facility Loan'' and the ''C-Two B facility Loan,'' whose sole lender was the Lending Bank itself under the Senior Facility Agreement, in favor of the Group, which allowed it to reimburse certain facilities under the SFA in the amount of 490 million euros.

The ''C-Two A facility'' amounts to 225 million euros. It matures on February 15, 2019 and bears a fixed interest rate of 8.75% per annum. Interest is paid semiannually on February 15 and August 15 of each year, commencing on February 15, 2013.

The ''C-Two B facility'' amounts to 275 million euros. It matures in October 2018 and bears a floating interest rate equal to three-month Euribor plus 7.85% per annum. Interest is paid quarterly on January 15, April 15, July 15 and October 15 of each year, commencing on January 15, 2013.

The Group paid 55 million euros in fees in connection with the implementation of these new facilities (C-One, C-Two A and C-Two B) and the amendments relative to the Senior Facility Agreement. This amount includes:

- bond issuance costs of 30.2 million euros, which are amortized over the length of the notes using the effective interest method;
- waiver fees of 17.4 million euros, which are recorded in ''Other financial expense'' in the consolidated statement of income for the period ended December 31, 2012;
- advisory fees of 7.4 million euros, which are recorded in ''Other operating expenses'' in the consolidated statement of income for the period ended December 31, 2012.

4.2.2 Purchase of the Nice network

In April 2012, the Group signed an agreement with the city of Nice for the purchase of the cable network of Nice for 20 million euros.

The purchase price repayment is scheduled as follows:

- 2.5 million euros in July 2012 and 2.5 million euros in January 2013;
- the remaining 15 million euros payable over 20 years (0.75 million euros each year from 2013 to 2032), with interest of 4%.

4.2.3 Tax audits

During the third quarter of 2012, the tax audits mentioned in Note 12.5 were extended to fiscal year 2010. Tax penalties related to the fiscal years 2005 to 2009 have been reduced.

As of December 31, 2012, the amount of the provision recognized in relation to these tax audits had not been adjusted, as management believes that the financial risk related to penalties for fiscal year 2010 will represent the same amount as the reductions notified by the administration concerning the penalties for fiscal years 2005 to 2009.

5 Segment information

As stated in Note 2.7, the Group has three operating segments:

- B2B Operations
- B2C Operations
- Wholesale Services

5 Segment information (Continued)

5.1 Statement of income

The following tables provide, for each period presented, the contribution of each segment to the statement of Income (from ''Revenue'' to ''Operating income before depreciation and amortization'').

Intra-segments sales have been eliminated under the column ''Eliminations.''

2013	B2C	B2B	Wholesale	Eliminations	2013 Total
	(in thousands of euros)				
Revenue	**869,448**	**312,640**	**200,794**	**(68,640)**	**1,314,242**
Purchases and subcontracting services	(415,127)	(180,195)	(84,333)	68,640	(611,016)
Staff costs and employee benefits expense	(87,144)	(60,504)	(6,982)	—	(154,631)
Taxes and duties	(20,469)	(8,073)	(5,355)	—	(33,896)
Provisions	(8,616)	(11,567)	(283)	—	(20,466)
Other operating income	65,499	20,763	59	—	86,321
Other operating expense	(18,588)	(1,878)	—	—	(20,466)
Operating income before depreciation and amortization (EBITDA)	**385,003**	**71,186**	**103,900**	**—**	**560,088**

2012	B2C	B2B	Wholesale	Eliminations	2012 Total
	(in thousands of euros)				
Revenue	**832,568**	**324,506**	**211,476**	**(66,125)**	**1,302,425**
Purchases and subcontracting services	(386,060)	(178,420)	(103,766)	66,125	(602,121)
Staff costs and employee benefits expense	(77,592)	(57,186)	(6,697)	—	(141,475)
Taxes and duties	(19,901)	(7,569)	(4,926)	—	(32,396)
Provisions	(4,516)	(1,323)	(380)	—	(6,219)
Other operating income	68,095	21,108	26	—	89,229
Other operating expense	(16,030)	(1,148)	—	—	(17,178)
Operating income before depreciation and amortization (EBITDA)	**396,564**	**99,968**	**95,733**	**—**	**592,265**

5.2 Goodwill

Goodwill breaks down by segment as follows as of December 31, 2013 and 2012:

Carrying amount	December 31, 2013	December 31, 2012
	(in thousands of euros)	
B2C	984,583	984,583
B2B	499,045	474,103
Wholesale	—	—
Total	**1,483,628**	**1,458,686**

5 Segment information (Continued)

5.3 Investments

Investments on property, plant and equipment and intangible assets (net of investment grants received) break down by segment as follows as of December 31, 2013:

	December 31, 2013
	(in thousands of euros)
B2C	165,473
B2B	73,904
Wholesale	80,452
Total	**319,829**

6 Revenue

Consolidated revenue breaks down by segment as follows:

	December 31, 2013	December 31, 2012
	(in thousands of euros)	
B2B revenue	864,589	826,171
B2B revenue	309,646	323,201
Wholesale revenue	140,007	153,053
Total revenues	**1,314,242**	**1,302,425**

It is stipulated that all revenues are generated in France.

7 Purchases and subcontracting services

Purchases and subcontracting services break down as follows:

	December 31, 2013	December 31, 2012
	(in thousands of euros)	
TV content, Internet and telephony costs	(315,318)	(332,853)
Outsourcing and purchased services	(98,082)	(90,752)
Advertising	(38,834)	(30,120)
Fees paid to other third parties	(35,991)	(31,936)
Royalties and license fees paid	(12,183)	(12,089)
Rights of way paid	(14,936)	(15,316)
Rental and leasehold charges	(27,023)	(25,790)
Energy	(25,846)	(23,938)
Bad debt expense	(8,000)	(9,173)
Postal expense	(4,389)	(4,378)
Transportation expense	(4,654)	(4,286)
Repair and maintenance expense	(11,830)	(11,911)
Miscellaneous operating expense	(13,930)	(9,579)
Purchases and subcontracting services	**(611,016)**	**(602,121)**

8 Personnel expenses

Personnel expenses break down as follows:

	December 31, 2013	December 31, 2012
	(in thousands of euros)	
Wages and salaries	(99,947)	(91,343)
Social security charges	(45,923)	(43,889)
Employee profit-sharing	(5,210)	(6,243)
Costs related to the stock option plan[a]	(3,551)	—
Staff costs and employee benefits expense	**(154,631)**	**(141,475)**

(a) Includes 2.9 million euros in respect of employer contributions due on the allocation of shares and 0.6 million euros for the cost of the plan recognized in 2013 (see Note 4.1.3).

As of December 31, 2013, the Group employed a total of 2,182 people (of which 2,077 permanent contracts), compared with 1,979 as of December 31, 2012 (of which 1,910 permanent contracts).

The following table breaks down the numbers of permanent contracts by occupational category as of December 31, 2013 and 2012:

Occupational category	December 31, 2013	December 31, 2012
Managers	1,096	1,015
Senior technicians and supervisors	356	322
Operators, employees and technicians (Non Managers)	625	573
Total	**2,077**	**1,910**

9 Other operating income

Other operating income breaks down as follows:

	December 31, 2013	December 31, 2012
	(in thousands of euros)	
Own work capitalized[a]	75,853	82,217
Proceeds from sale of assets	5,078	3,817
Other[b]	5,390	3,195
Other operating income	**86,321**	**89,229**

(a) Own work capitalized work on the network performed by employees of the Group with a view to upgrading the cable network.

(b) In 2013, this item included the repayment of the 5 million euro fine imposed by ARCEP in 2012. In 2012, this item mainly included various transfers of expenses in the amount of 2.7 million euros.

10 Other operating expense

Other operating expenses break down as follows:

	December 31, 2013	December 31, 2012
	(in thousands of euros)	
Net carrying amount of assets sold	(14,741)	(7,382)
Fees paid in connection with refinancing	(4,619)	(7,372)
Management fees paid to shareholders[(a)]	(1,106)	(2,424)
Miscellaneous operating expenses	—	—
Other operating expense	**(20,466)**	**(17,178)**

(a) Until the date of IPO, after which the agreements were terminated.

11 Finance costs, net

Net finance costs broke down as follows as of December 31, 2013 and 2012:

	Note	December 31, 2013	December 31, 2012
		(in thousands of euros)	
Interest income received on cash and cash equivalents		111	106
Other financial income	11.1	9,593	4,220
Financial income		**9,704**	**4,326**
Change in fair value of interest rate derivatives		—	—
Interest expense on financing determined using the effective interest method		(184,839)	(183,057)
Interest relative to gross financial debt		**(184,839)**	**(183,057)**
Other financial expense	11.2	(148,513)	(32,699)
Finance costs, net		**(323,648)**	**(211,430)**

11.1 Other financial income

As of December 31, 2013, other interest income broke down primarily as follows:

– Payments received within the framework of the compensation sought after the bankruptcy of Lehman Brothers in September 2008 (see Note 28.4) in the amount of 7.1 million euros (compared with 2.8 million euros in 2012);

– Reversals of provisions for financial risks and charges in the amount of 1.9 million euros.

11.2 Other interest expense

As of December 31, 2013, other interest expense broke down primarily as follows:

– the cost of settling bonds (''Premium'') incurred by the Group in the amount of 28 million euros through the reimbursement of the Senior Facilty Agreement as explained in Note 4.1.6 above;

– the costs incurred with respect to the settlement of SuperPecs in the amount of 81 million (without impact on the Group's cash position as this debt was extinguished through the issuance of shares in the context of the IPO as explained in Note 4.1.1 above);

– the unamortized portion of costs related to the debt settled in December 2013 (initially measured at amortized cost) in the amount of 15.2 million euros;

11 Finance costs, net (Continued)

- the amortization of fees paid for the establishment of funding still in place at end-2013 in the amount of 8.3 million euros;
- penalties for late customer deployments in the amount of 4 million euros.

As of December 31, 2012, other interest expense broke down primarily as follows:

- early repayment of penalties paid in connection with debt refinancing in the amount of 17.4 million euros;
- amortization of fees paid for the establishment of funding in the amount of 6.2 million euros valued using the effective interest method;
- default interest in the amount of 5.6 million euros.

12 Income tax

12.1 Income tax expense

Income tax expense breaks down as follows:

	December 31, 2013	December 31, 2012
	(in thousands of euros)	
Current tax expense/income	130	(2,486)
Deferred tax expense/income	132,662	—
Tax expense/income	**132,792**	**(2,486)**

12.2 Reconciliation between the effective tax rate and the theoretical tax rate

	December 31, 2013	December 31, 2012
	(in thousands of euros)	
Net income (loss) before tax	(68,086)	88,912
Less: Share of net income (loss) of associates	484	199
	67,602	89,111
Corporate tax rate in France	38%	34.43%
Income tax expense calculated at 38%	**25,689**	**(30,681)**
Reconciliation of income tax expense		
Deferred tax assets	132,662	—
Effect of revenue that is exempt from taxation and effect of expenses that are not deductible in determining taxable profit(1)	(26,231)	(13,315)
Effect of unused tax losses and tax offsets not recognized as deferred tax assets	—	41,083
Tax credits	673	420
Effect of other differences	—	8
Income tax expense recognized in profit or loss	**132,792**	**(2,486)**
Effective tax rate(2)	(196.43)%	2.79%

(1) Consists primarily of interest expense not deductible under thin capitalization rules (15.2 million euros as of December 31, 2013, compared with 9.9 million euros as of December 31, 2012).

(2) The effective tax rate in 2013 was negative taking into account deferred tax assets during the year.

12 Income tax (Continued)

In view of the large amount of unrecognized tax losses remaining as of December 31, 2013 (see Note 12.4), the deferred tax income recognized in 2013 in respect of tax loss carryforwards whose future use is considered probable within the five-year forecast period was recorded in the statement of income, and no deferred tax assets were recorded in respect of actuarial gains and losses, which are recognized in other comprehensive income, or capital increase expenses, which are charged to additional paid-in capital.

12.3 Current tax assets and liabilities

Current tax assets as of December 31, 2013 amounted to 3.4 million euros, corresponding to installments of income tax and competitiveness and employment tax credits (CICE), for which the Group must request reimbursement.

The income tax payable is classified in ''Current tax liabilities,'' and amounts to 71 thousand euros and 2,604 thousand euros as of December 31, 2013 and 2012 respectively.

12.4 Unrecognized deferred tax assets

Aggregate unused tax loss carryforwards amounted to 2,316 million euros as of December 31, 2013, representing a theoretical tax asset of 876 million euros. A deferred tax asset of 132.7 million euros was recognized as of December 31, 2013.

Total net tax loss carryforwards break down as follows:

	December 31, 2013	December 31, 2012
	(in thousands of euros)	
Ypso France and its subsidiaries[1]	1,857,400	1,852,028
Altice B2B France and its subsidiaries	413,401	402,544
Ypso Holding Lux	45,561	256,173
Total tax loss carryforwards	**2,316,362**	**2,510,745**
Deferred tax assets calculated at the standard rate	**876,217**	**851,103**
Of which deferred tax assets recognized	*132,662*	—
Of which deferred tax assets not recognized	*743,555*	*851,103*

(1) Including tax losses contested by the tax authorities (56 million euros as of December 31, 2013).

12.5 Tax audits

Certain subsidiaries of the Group, Ypso France, NC Numericable (including Numericable and Est Videocommunication, merged in 2013) were subject to a tax audit by the French tax authorities for the fiscal years ended from December 31, 2007 to December 31, 2010. As a result, a tax contingency provision in the amount of 24,9 million euros was recognized as of December 31, 2013 (compared with 25.1 million euros as of December 31, 2012) to cover the risk represented by this audit.

In 2013, the tax administration initiated a tax audit of Altice B2B France and Completel in respect of fiscal years 2010 and 2011, resulting in the submission of proposed adjustments on December 19, 2013. The adjustments focus exclusively on the rejection of the deductibility of certain shareholder services expensed in 2009, 2010 and 2011. A tax contingency provision totaling 11.4 million euros was recorded as of December 31, 2013 to cover the proposed adjustments (income tax, VAT, withholding tax, fines, penalties and default interest).

The total tax contingency provision was 36.3 million euros as of December 31, 2013, compared with 25.1 million euros as of December 31, 2012.

13 Goodwill

	December 31, 2013	December 31, 2012
	(in thousands of euros)	
Net carrying amount		
Balance at beginning of year	1,458,686	1,458,638
Additional goodwill recognized during the period[(1)]	24,942	48
Balance at end of year[(2)]	**1,483,628**	**1,458,686**

(1) The additional goodwill of 24.9 million euros recognized as of December 31, 2013 was attributable to the acquisition of LTI Telecom (described in Note 4.1.5). The allocation of the acquisition price is provisional, and will be finalized within 12 months of the date of acquisition. The goodwill was allocated to the B2B Operations CGU.

(2) Goodwill breaks down as follows:

Carrying amount	December 31, 2013	December 31, 2012
	(in thousands of euros)	
B2C Operations	984,583	984,583
B2B Operations	499,045	474,103
Total	**1,483,628**	**1,458,686**

14 Other intangible assets

	Capitalized development costs	Rights of use, patents and licenses[(a)]	Commercial rights	Other intangible assets[(b)]	Total
		(in thousands of euros)

Balance as of December 31, 2012	(3,242)	(413,473)	(34,690)	(30,871)	**(482,275)**
Net carrying amount					
Balance as of January 1, 2012	3,341	327,285	1,259	14,170	**346,056**
Balance as of December 31, 2012	2,606	307,262	7,340	8,976	**326,187**

(a) Rights of use represent the majority of ''rights of use, patents and licenses.'' They reflect the rights to use civil engineering installations and infrastructure built by the incumbent operator, France Telecom, as well as investments made through the DSP.

(b) Other intangible assets primarily include customer lists (including the customers of Valvision, acquired in 2013, see Note 4.1.4) and capitalized production within the framework of IT projects relating to the network.

* As explained in note 2.11, the Group applied IFRIC 12 with respect to the contract entered into in relation to the public service concession arrangement with the department of Hauts-de-Seine (DSP 92).

The application of this principle had the following impacts on the 2012 consolidated statement of financial position:

- Recognition of the net carrying amount of 17.2 million euros classified in ''Other intangible assets'' (26.6 million euros of investments less 9.5 million euros of grants received as of December 31, 2011);
- Recognition of 26.4 million euros of capital expenditure in 2012 in ''Rights of use, patents and licenses'' (38.0 million euros of investments less 11.5 million euros of grants received in 2012).

In addition, 26.4 million euros of capital expenditure in relation to the public service concession arrangement with the department of Hauts-de-Seine (DSP 92). This amount is classified in investing activities in the consolidated statement of cash flows.

As of December 31, 2013, the total amount of investments (net of subsidies) made under DSP 92 and classified as intangible assets amounted to 71.8 million euros.

15 Property, plant and equipment

15 Property, plant and equipment (Continued)

The carrying amount of assets classified as finance leases breaks down as follows:

	December 31, 2013	December 31, 2012
	(in thousands of euros)	
Land	1,029	1,029
Buildings	6,558	6,868
Network and technical equipment	53,048	31,632
Other	79	160
	60,714	**39,689**

16 Impairment testing

16.1 Allocation of goodwill between cash-generating units (“CGU”)

In accordance with IAS 36 *Impairment of Assets* (‘‘**IAS 36**’’), goodwill has been allocated to two CGUs: ‘‘B2C Operations’’ (mainly NC Numericable) and ‘‘B2B Operations’’ (mainly Completel SAS and LTI Telecom).

16.2 Key assumptions used to determine the recoverable amount of the CGUs

Impairment testing of goodwill is done within the cash-generating units defined above. In accordance with IAS 36 *Impairment of Assets*, impairment testing is performed by comparing the carrying amount with the recoverable amount. The recoverable amount is determined based on the value in use using a discounted cash flow model.

The determination of the value in use is established using cash flow projections based on financial budgets approved by senior management covering a planning period of five years.

Projections of subscribers, revenue, costs and capital expenditure are based on reasonable and acceptable assumptions that represent management’s best estimates. Key assumptions are the estimated number of subscribers and the level of expenditure on network infrastructure upgrades. The projections are based on both past experience and the expected future market penetration of the various products.

As mentioned in Note 3, the determination of the value in use is based on assumptions such as the weighted average cost of capital and the growth rate beyond the projection period. These assumptions can vary, potentially causing the recoverable amount to fall below the carrying amount, and as such the recognition of an impairment loss.

No impairment was recognized for either of the periods presented.

The determination of the value in use is based on the following estimates as of December 31, 2013 and 2012:

CGU “B2C Operations”	2013	2012
Length of forecast period	5 years	8 years
Discount rate applied to cash flow projections	7.30%	7.56%
Perpetual growth rate used to calculate terminal value	2.00%	1.75%

In terms of the sensitivity of recoverable amounts, a change of plus or minus 0.25% in the discount rate would decrease or increase the recoverable amount by approximately 143 million euros. Likewise, a change of plus or minus 0.25% in the perpetual growth rate would increase or decrease the recoverable amount by approximately 116 million euros.

16 Impairment testing (Continued)

As of December 31, 2013, the amounts by which the key assumptions would have to change for the recoverable amount to equal the carrying amount were as follows:

- Increase in WACC from 7.30% to 8.73%;
- Reduction in the perpetual growth rate from 2.00% to 0.12%;
- Reduction in gross margin (calculated based on internal reporting) from an average of 50.7% to an average of 46.0% over the five-year period.

CGU "B2B Operations"	2013	2012
Length of forecast period	5 years	6 years
Discount rate applied to cash flow projections	7.14%	9.42%
Growth rate beyond projection period for terminal value	2.00%	1.00%

In terms of the sensitivity of recoverable amounts, a change of plus or minus 0.25% in the discount rate would decrease or increase the recoverable amount by approximately 74 million euros. Likewise, a change of plus or minus 0.25% in the perpetual growth rate would increase or decrease the recoverable amount by approximately 56 million euros.

As of December 31, 2013, the amounts by which the key assumptions would have to change for the recoverable amount to equal the carrying amount were as follows:

- Increase in WACC from 7.14% to 10.62%;
- Reduction in the perpetual growth rate from 2.00% to-3.70%;
- Reduction in gross margin (calculated based on internal reporting) from an average of 38.3% to an average of 32.1% over the five-year period.

17 Investments in associates

The Group exercises significant influence over Alsace Connexia Participation, an associate consolidated under the equity method. Alsace Connexia Participation's initial shareholding structure was as follows: 38.14% held by Ypso France, 38.15% by LD Collectivités and 23.71% by Sogetrel Réseaux. In 2009, LD Collectivités bought the interest held by Sogetrel Réseaux, giving it a controlling interest (61.86%) in Alsace Connexia Participation.

Alsace Connexia Participation owns a 70% stake in Alsace Connexia, which has been granted a public service concession by the regional authority of Alsace to design, build, fund, operate and market telecommunications infrastructure in the region over a 15-year period. The concession contract took effect on February 3, 2005.

The following tables provide information on the net assets and operating results of Alsace Connexia Participation:

	December 31, 2013	December 31, 2012
	(in thousands of euros)	
Net assets[1]	7,614	8,888
Share of net assets	2,893	3,378

17 Investments in associates (Continued)

	2013	2012
	(in thousands of euros)	
Revenues (Alsace Connexia)	14,463	13,050
Net income (loss)	(1,274)	(524)
Share of net income (loss)	(484)	(199)

(1) No goodwill is recognized in net assets.

18 Other current and non-current financial assets

	Current		Non-current	
	December 31, 2013	December 31, 2012	December 31, 2013	December 31, 2012
	(in thousands of euros)			
Derivative instruments[1]	—	—	—	5
Investments in entities that are not consolidated[2]	—	—	35	35
Other financial assets[3]	4,020	4,034	7,228	6,791
Total financial assets	**4,020**	**4,034**	**7,263**	**6,831**

(1) As indicated in Note 28.4, the Group held until the end of 2012 interest rate cap contracts that allowed it to limit its exposure to interest rates, but these instruments were not considered as hedging instruments within the meaning of IAS 39. Consequently, changes in the fair value of these derivative instruments were recognized immediately in the statement of income under financial income (expense), the instruments in question being directly related to the implementation of the management of the Group's interest rate risk, even though they do not qualify for hedge accounting under IAS 39.

These interest-rate derivatives are presented as non-current financial assets because they are not held for trading purposes, but under a non-qualifying hedge accounting relationship.

(2) Investments in entities that are not consolidated and are classified as available-for-sale financial assets include Câble Toulousain de Vidéocommunication, Médiamétrie Expansion, Rennes Cité Média and TV7 Bordeaux. These companies are not included in the scope of consolidation due to the Group's lack of control or influence over them.

(3) As of December 31, 2013 and 2012 other financial assets include 4 million euros of cash pledged within the framework of DSP 92 (classified as current, see also Note 2.11). Remaining amounts correspond to deposits made by the Group for building leases.

19 Inventories

	December 31, 2013	December 31, 2012
	(in thousands of euros)	
Gross amount	50,858	46,808
Impairment losses	(1,290)	(1,199)
Net carrying amount	**49,568**	**45,609**

Inventories are primarily comprised of set-top boxes used by customers to receive programming distributed via digital channels. The amount of impairment recognized to bring inventories down to their recoverable amount was not material in fiscal 2013 or 2012.

20 Trade receivables and other receivables

	December 31, 2013	December 31, 2012
	(in thousands of euros)	
Trade receivables	309,998	272,864
Impairment losses	(33,371)	(27,167)
Trade receivables, net	**276,627**	**245,697**
Advances and down payments	2,181	2,211
Tax and social security receivables	84,826	141,806
Prepaid expenses	32,256	18,025
Other receivables	6,998	9,632
Trade receivables and other receivables, net	**402,888**	**417,371**

Trade receivables disclosed above are measured at amortized cost. Due to their short-term maturity, fair value and amortized cost are a proxy for the nominal amount of trade receivables.

Trade receivables are primarily from B2C customers, a large number of customers spread across diverse geographical areas.

B2C Customers

The average credit term for residential customers is five days. No interest is charged on outstanding balances. As of December 31, 2013, excluding some specific cases, the Group had depreciated 81% of B2C customer receivables that were over 90 days past due, based on historical experience implying that 19% of receivables over 90 days past due are recoverable. Provisions on residential customer receivables due between 0 and 90 days are also depreciated on a case-by-case basis, based on historic collection data and analysis of the customer's financial situation.

B2B Customers

As of December 31, 2013, the Group had depreciated 60% of the B2B customer receivables that were over 90 days past due, based on historical experience implying that 40% of receivables over 90 days past due are recoverable.

Trade receivables disclosed above include amounts (see below for aged analysis) that are past due at the end of the reporting period but against which the Group has not recognized a provision for doubtful accounts because there has not been a significant change in credit quality and the amounts are still considered recoverable. The Group does not hold any collateral or other credit enhancements against these balances, nor does it have a legal right of offset against any amounts owed by the Group to the counterparty.

Ageing of past due receivables

	December 31, 2013	December 31, 2012
	(in thousands of euros)	
Not due	92,610	121,232
0-90 days	67,888	62,825
> 90 days	149,508	88,808
Total	**309,998**	**272,864**

The concentration of credit risk is limited due to the customer base being large and unrelated. No customer represents more than 5% of the total balance of trade receivables.

20 Trade receivables and other receivables (Continued)

Change in impairment losses for trade receivables is as follows:

	December 31, 2013	December 31, 2012
	(in thousands of euros)	
Balance at beginning of year	**(27,167)**	**(26,770)**
Impairment during the year	(12,961)	(9,322)
Losses on irrecoverable receivables	8,000	8,925
Reversal of impairment losses	—	—
Receivables classified as held for sale	—	—
Business combinations	(1,243)	—
Balance at end of year	**(33,371)**	**(27,167)**

21 Cash and cash equivalents

Cash and cash equivalents presented in the consolidated statement of cash flows include cash on hand and short-term deposits. Reconciliation between cash and cash equivalents presented in the consolidated statement of cash flows and cash and cash equivalents presented in the consolidated statement of financial position is presented below:

	December 31, 2013	December 31, 2012
	(in thousands of euros)	
Cash	101,365	7,996
Cash equivalents	—	—
Cash and cash equivalents presented in the consolidated statement of financial position	**101,365**	**7,996**
Cash from discontinued operations	—	—
Bank overdrafts classified as financial liabilities in the consolidated statement of financial position	—	—
Cash and cash equivalents presented in the consolidated statement of cash flows	**101,365**	**7,996**

As of December 31, 2013 and 2012, the Group had no cash equivalents.

22 Equity

As of December 31, 2013, Numericable Group's share capital, based on the number of shares issued at that date, amounted to 123,942,012 euros, comprising 123,942,012 ordinary shares with a par value of 1 euro each.

22.1 Change in share capital

The share capital broke as follows as of December 31, 2013:

Date	Transaction	Shares issued
August 2013	Constitution through cash contributions	37,000
November 2013	In-kind contributions from shareholders	113,772,229
November 2013	Capital increase by public offering	10,080,645
November 2013	Capital increase reserved for employees	52,138
Total as of December 31, 2013		**123,942,012**

22 Equity (Continued)

22.2 Treasury shares

The Group did not implement a share buyback program in 2013 or 2012.

Accordingly, it did not hold any treasury shares as of December 31, 2013 or December 31, 2012.

22.3 Earnings per share

	2013	2012
	(in thousands of euros)	
Net income used for calculating basic earnings per share	**64,550**	**86,377**
Impact of dilutive instruments:		
Stock option plans(2)	—	—
Net income used for calculating diluted earnings per share	**64,550**	**86,377**

The following table shows the weighted average number of ordinary shares used for calculating basic and diluted earnings per share:

	December 31, 2013	December 31, 2012
	(number of shares)	
Weighted average number of ordinary shares outstanding(1)	**115,271,326**	**113,772,229**
Impact of dilutive instruments:		
Stock option plans(2)	—	—
Weighted average number of shares outstanding—diluted	**115,271,326**	**113,772,229**

(1) The weighted average number of ordinary shares used in calculating earnings per share corresponds, until the date of the IPO, to the number of shares issued in exchange for contributions (see Note 22.1 ''Change in share capital''). Shares issued as part of the public offering and capital increase reserved for employees were prorated.

(2) Stock options granted in 2013 (2,845,229 options) are non-dilutive in view of the average share price between the grant date and the balance sheet date, and the valuation of the plan.

22.4 Dividends

The Group did not pay dividends to its shareholders in 2013 or 2012.

23 Financial liabilities

Financial liabilities break down as follows:

		Current		Non-current		Total	
	Note	12/31/2013	12/31/2012	12/31/2013	12/31/2012	12/31/2013	12/31/2012
				(in thousands of euros)			
Financial liabilities under Senior Facility Agreements	23.1	42,575	93,187	2,589,784	2,707,498	2,632,359	2,800,685
Perpetual subordinated notes	23.2	—	—	37,695	35,208	37,695	35,208
Financial liabilities under finance leases	30.2	20,578	19,432	20,915	7,886	41,493	27,318
Other financial liabilities	23.4	1,096	2,113	1,568	131,234	2,664	133,347
Total loans and financial liabilities		**64,249**	**114,732**	**2,649,962**	**2,881,826**	**2,714,211**	**2,996,558**
Derivative instruments		—	—	—	—	—	—
Deposits received from customers	23.3	—	—	51,932	44,517	51,932	44,517
Bank overdrafts		—	—	—	—	—	—
Total financial liabilities		**64,249**	**114,732**	**2,701,894**	**2,926,343**	**2,766,143**	**3,041,075**

23.1 Financial liabilities under Senior Facility Agreements

Senior Facility agreement granted to Ypso

The Group entered into a Senior Facility Agreement (''**SFA**'') dated June 6, 2006 (as amended March 2, 2007, December 9, 2009, September 8, 2011, July 31, 2013 and November 22, 2013) with BNP Paribas, CALYON, Lehman Brothers Bankhaus AG, London Branch, and Morgan Stanley Bank International Limited as the Mandated Lead Arrangers, BNP Paribas as Agent and Security Agent, and others lenders. In addition, certain subsidiaries of the Group are guarantors under the SFA, each guaranteeing, subject to certain limitations, the obligations of the other borrowers and guarantors within the SFA.

The SFA contains financial covenants that may affect the interest rates to be paid by the Group as well as the applicable margins on the SFA (see details below).

In 2012, the Group issued three bonds to refinance a portion of its current Senior Debt under the SFA. The issuer was Numericable Finance & Co. SCA, a Luxembourg company. The proceeds from the bonds were used by Numericable Finance & Co. to fund three new loans issued if favor of the Group by the Lending Bank (JP Morgan) under the Senior Facility Agreement:

- a C-One facility of 360 million euros;
- a C-Two A facility of 225 million euros;
- a C-Two B facility of 275 million euros.

In December 2013, the Group raised a new tranche of Senior Debt in a total amount of 800 million euros (Tranche D). This tranche is repayable by December 31, 2018 and bears interest at Euribor plus a margin of 3.75%.

The Group used the proceeds of this issue (800 million euros) and the proceeds of the capital increase carried out in the context of the public offer (250 million euros) to reimburse some of its existing debts, as follows:

- all of the Senior Debt originally subscribed by Altice B2B France in the amount of 451 million euros;

23 Financial liabilities (Continued)

- all of the 275 million euro bond issue (Tranche C-Two B) subscribed in October 2012;
- part of the bond issue of 225 million euros (Tranche C-Two A) subscribed in October 2012 (repayment of 78.8 million euros)—the balance of this bond amounted to 146.3 million euros as of December 31, 2013;
- part of the bond issue of 360 million euros (Tranche C-One) subscribed in February 2012 (repayment of 126.1 million euros)—the balance of this bond amounted to 234.1 million euros as of December 31, 2013.

The table below summarizes the various tranches in place under the Senior Debt contract as of end-December 2013, their maturity, the applicable margin and the outstanding amount of the debt as of December 31, 2013:

Facility	Maturity	Margin/ Coupon(1)	Nominal (December) 2013(2)
A2 and capex 2	June 2015	E + 3.875%	51.9
B1	June 2014	E + 3.50%	11.2
B2	June 2016	E + 4.75%	106.5
B3	December 2017	E + 4.75%	672.1
C1	December 2015	E + 4.00%	36.0
C2	December 2017	E + 5.25%	42.3
C3	December 2017	E + 4.75%	110.9
C4	December 2018	E + 5.00%	426.8
D	December 2018	E + 3.75%	800.0
C-One (Bond)	February 2019	12.375%	234.1
C-Two A (Bond)	February 2019	8.750%	146.3

(1) Euribor (''E'') + margin applicable to the facility;

(2) Nominal amount expressed in millions of euros as of December 31, 2013, excluding accrued interest and the impact of the effective interest rate.

Guarantees and Security

The Term Facilities are guaranteed irrevocably and unconditionally on a joint and several basis by each guarantor (Ypso France SAS and its subsidiaries) under the Senior Facility Agreement, subject to certain legal limitations.

The Term Facilities are secured by various security interests, such as a pledge on the shares of Ypso France SAS and its subsidiaries.

Covenants

The availability of the senior facilities mentioned in Note 23.1 is not dependent upon the Group's credit ratings, but is conditioned on its compliance with financial covenants related to the capacity of the Group to generate sufficient cash to repay its net debt. Accordingly, the Senior Facility Agreement contains customary operating and financial covenants, subject to certain agreed exceptions, including covenants restricting the ability of the Group to, among other things:

- amalgamate, merge or consolidate with any other company or be the subject of any reconstruction or materially change the nature of the business of the Group as a whole;
- sell, transfer, lease out, lend or otherwise dispose of any of its assets or agree to do so;
- enter into a material transaction that is not on an arm's length basis and for full market value;

23 Financial liabilities (Continued)

- make acquisitions or investments;
- open or maintain an account with a bank or other financial institution providing like services other than a bank or credit institution entitled to engage in banking transactions in France, Belgium or Luxembourg;
- allot or issue shares or securities;
- change the end of its fiscal year.

The Senior Facility Agreement also requires the Group to comply with the following financial covenants:

- a maximum ratio of consolidated total net borrowings to annualized EBITDA;
- a minimum ratio of consolidated cash flows to consolidated total interest expense;
- a minimum ratio of annualized EBITDA to consolidated total net cash interest payable; and
- a maximum level of capital expenditures per fiscal year.

Compliance is tested quarterly and audited annually as of December 31 when the consolidated financial statements of Ypso France prepared in accordance with French GAAP are released. Since the SFA was established, the Group has complied every year with the financial covenants set out in the agreement.

As agreed under the SFA, the covenants are calculated on the basis of financial aggregates determined from the consolidated accounts drawn up by Ypso France in accordance with French GAAP and not IFRS. Accordingly, the EBITDA used to calculate the covenant is different from that presented in the Group's consolidated statement of income.

23.2 Perpetual subordinated notes (''TSDI'')

In 2006, 23.65 million euros of perpetual subordinated notes (''*Titres Subordonnés à Durée Indéterminée*''—''**TSDI**'') were issued by a subsidiary of the Group, NC Numericable, to a single subscriber, GDF Suez (Vilorex) (excluding capitalized interest). The proceeds of this borrowing were to be used to finance the construction of connectors in towns in the southern part of the SIPPEREC (''*Syndicat Intercommunal de la Périphérie de Paris pour l'Electricité et les Réseaux de Communication*''), a group of cities located in the Paris metropolitan area. The perpetual subordinated notes bear interest at a rate of 7% per annum. Interest on the notes is capitalized. Interest amortization is conditional. The total accrued interest payable on the notes amounted to 14 million euros and 11.6 million euros as of December 31, 2013 and 2012 respectively, and is classified as non-current in the table above in Note 23.

The instrument includes a contractual obligation to deliver cash (including interest) when cash inflows arising from revenues allow the Group to reimburse the notes. Pursuant to this contract, the payment of interest and the reimbursement of the debt are contingent upon the level of cash inflows generated; however, the Group does not have an unconditional right to avoid delivering cash. As a consequence, the instrument is recognized as a financial liability at amortized cost in accordance with IAS 32.

23.3 Deposits received from customers

Deposits received from customers amounted to 51.9 million euros and 44.5 million euros as of December 31, 2013 and 2012 respectively. Deposits are made when customers receive equipment from the Company, and are reimbursed when customers terminate their subscriptions if the customers have paid all outstanding invoices and have returned the equipment.

23 Financial liabilities (Continued)

23.4 Other financial liabilities

As of December 31, 2013, other financial liabilities included various bank borrowings by Numericable against several banks (mainly *Caisse d'Epargne d'Alsace-Lorraine*) in the amount of 1,648 thousand euros and by Completel against various banks in the amount of 609 thousand euros.

As of December 31, 2012, other financial liabilities also included the debt of Ypso Holding Lux SARL against shareholders in the amount of 128,962 thousand euros, which was settled in 2013 as part of contributions to Numericable Group.

24 Provisions and contingent liabilities

The breakdown and change in provisions for the years ended December 31, 2013 and 2012 are as follows:

	January 1, 2013	Change in scope	Increase	Utilization	Reversal	Reclassification	December 31, 2013
				(in thousands of euros)			
Provisions for retirement benefits	8,455	157	1,556	—	—	—	10,168
Provisions for litigation with employees	4,068	40	1,309	(1,409)	(29)	—	3,979
Provisions for commercial litigation	18,043	—	6,646	(5,245)	(2,071)	—	17,373
Provisions for tax contingencies	25,096	38	18,250	(7,087)	—	—	36,297
Other[(1)]	10,720	76	1,876	(96)	(349)	—	12,227
Total	66,382	311	29,637	(13,837)	(2,449)	—	80,044
Current portion	2,409	—	6,161	(2,409)	—	250	6,411
Non-current portion	63,973	311	23,476	(11,428)	(2,449)	(250)	73,633

(1) Mainly provisions for risks relating to the cost of customers failing to return equipment.

	January 1, 2012	Increase	Utilization	Reversal	Reclassification	December 31, 2012
			(in thousands of euros)

Current portion	8,998	—	(8,998)	—	2,409	2,409
Non-current portion	62,847	11,399	(6,545)	(1,318)	(2,409)	63,973

The Group is involved in legal and administrative proceedings that have arisen in the ordinary course of its business.

24 Provisions and contingent liabilities (Continued)

A provision is recorded by the Group when there is a sufficient probability that such disputes will lead to costs that the Group will bear and when the amount of these costs can be reasonably estimated. Certain companies of the Group are involved in a certain number of disputes related to the ordinary activities of the Group. Only the most significant disputes and proceedings in which the Group is involved are described below.

The Group is not aware of any governmental, legal or arbitration proceedings (including any proceedings of which the Group is aware, which are pending or threatened) other than those mentioned below in this section that may have or have had in the last 12 months significant effects on the financial position or profitability of the Company or the Group.

24.1 Tax audits

The French tax authorities have conducted audits of various companies of the Group since 2005 with respect to the VAT rates applicable to our multiple-play offerings. Under French tax law, television services are subject to a 5.5% VAT rate, which increased to 7% as of January 1, 2012, while Internet and telephony services are subject to a 19.6% VAT rate. When marketing multiple-play offerings, the Group allocates a price reduction compared with the price the Group would charge for its services on a stand-alone basis. This price reduction is primarily applied to its Internet and telephony services, because such services are newer products. As a result, the VAT charged to the subscribers was lower than the VAT that would have been charged if the Group had deemed the price reduction to apply primarily to the television portion of its packages.

The French tax authorities assert that these price reductions should have been calculated pro rata of the stand-alone prices of each of the services (television, broadband Internet, fixed and/or mobile telephony) included in the multiple-play packages of the Group and proposed adjustments for fiscal years 2006 to 2010.

The Group has formally challenged the tax assessments for the fiscal years from 2006 to 2009. The Group also referred the matter to the Ministry of Finance in December 2011 and sought a comprehensive settlement of the adjustments made by the tax administration in respect of the various Group companies for the period 2006-2009. Following this request, the tax administration lowered the amounts of adjustments for 2008 and 2009 by including in its calculation a limitation based on the 50/50 rule applicable on composite VAT, which was in force from 2008 to 2010. The new amounts of adjustments, totaling 17.1 million euros (excluding penalties of 40%) for the period 2006-2009, were communicated to the Group end of August 2012.

Furthermore, in 2012, the tax authorities also initiated a tax audit of fiscal year 2010, in the same matters and scope as the audits described above. These procedures gave rise to proposed adjustments at the end of June 2013, calculated in the same manner as for fiscal years 2007 to 2009, in a total amount of 6.1 million euros (excluding penalties of 40%). The Group replied on August 21, 2013, challenging the proposed adjustments. The tax administration sent replies to the Group's observations in late October 2013, pursuant to which it maintains its adjustments. To date, the 2011 and subsequent years have not been subject to VAT audits on the Numericable scope. The tax administration has also demanded payment for the 2006 adjustment on NC Numericable (approximately 2 million euros of the 17.1 million euros mentioned above for the 2006-2009 period). The Group asked for a payment deferral and filed a complaint in September 2012, which was rejected by the tax administration on June 27, 2013. The Group filed an additional request on August 20, 2013.

VAT rules applicable to multiple-play packages changed starting January 1, 2011.

As of December 31, 2012, a tax contingency provision of 24.9 million euros (compared with 25.1 million euros as of December 31, 2012) was recognized to cover all the risks related to VAT (excluding penalties of 40%, which would amount to 7.1 million euros) related to the adjustments notified for fiscal years 2006

24 Provisions and contingent liabilities (Continued)

to 2010 (i.e. 23.5 million euros). The Group replied on August 21, 2013, challenging the proposed adjustments.

In 2013, the tax administration initiated a tax audit of Altice B2B France and Completel in respect of fiscal years 2010 and 2011, resulting in the submission on December 19, 2013 of proposed adjustments. The adjustments focus on the challenge of charges for services provided to the companies in 2009, 2010 and 2011. A tax contingency provision covering all adjustments considered (income tax, VAT, withholding tax, penalties, surcharges and default interest) in the amount of 11.4 million euros was recorded as of December 31, 2013. In addition, the proposed adjustment results in a reduction of tax loss carryforwards in the amount of 28.5 million euros. The Group challenged all adjustments on February 17, 2014.

As of December 31, 2013, a tax contingency provision of 36.3 million was recognized to cover all the risks related to VAT (excluding penalties of 40%, which represents 7.1 million euros) related to the adjustments notified for fiscal years 2006-2010 (i.e. 24.9 million euros) and the risks associated with the challenging of charges for services under the adjustments notified for fiscal years 2009-2011 (11.4 million euros).

24.2 Commercial disputes

24.2.1 In-depth inquiry of the European Commission into the transfer of cable infrastructures by certain local authorities

On July 17, 2013 the European Commission signaled that it had decided to open an investigation to verify whether the transfer of public cable infrastructure between 2003 and 2006 by several French municipalities to Numericable was consistent with European Union State aid rules. In announcing the opening of this in-depth investigation, the European Commission indicated that it believes that the sale of public assets to a private company without proper compensation gives it an economic advantage not enjoyed by its competitors, and that it therefore constitutes state aid within the meaning of the rules of the European Union. It argues that the transfer free of charge of the cable networks and ducts by 33 French municipalities in favor of Numericable confers a benefit of this type and, as such, state aid. The European Commission has expressed doubts about the compatibility of the alleged aid with the rules of the European Union.

The Group firmly denies the existence of any state aid. In addition, the decision to open an investigation concerns a relatively small number of network connections (200,000), the majority of which have not been migrated to EuroDocsis 3.0 and accordingly only allow access to a limited number of the Group's television services. The European Commission's decision of July 17, 2013 was published in the Official Journal of the European Union on September 17, 2013. Since then, discussions have continued within the framework of the procedure in respect of observations of third parties as well as those of the parties to the proceedings as to the allegation of the existence of aid and its extent, with the Group firmly challenging the existence of any state aid.

24.2.2 Litigation with Orange relating to IRUs

The Group entered into four non-exclusive IRUs with Orange on May 6, 1999, May 18, 2001, July 2, 2004 and December 21, 2004, in connection with the acquisition by the Group of certain companies operating cable networks built by Orange. These cable networks, accessible only through the civil engineering installations of Orange (mainly its ducts), are made available to the Group by Orange through these non-exclusive IRUs over such civil engineering installations. Each of these IRUs covers a different geographical area and was entered into for a term of 20 years.

Following ARCEP's decision 2008-0835 of July 24, 2008, Orange published, on September 15, 2008, a technical and commercial offer made to telecommunication operators pursuant to which such operators can roll out their own fiber networks in Orange's ducts. The terms of this mandatory technical and commercial offer are more restrictive than the terms that the Group enjoys under the Orange IRUs. As a

24 Provisions and contingent liabilities (Continued)

result, Orange asked the Group to comply with the general rules regarding access to Orange's ducts for the purpose of maintaining and upgrading its network. This issue was litigated, and both ARCEP and the Paris Court of Appeal ruled in favor of Orange on November 4, 2010 and June 23, 2011 respectively. Numericable appealed the decision before the French Supreme Court (*Cour de Cassation*), which upheld, for the most part, the decision of the Paris Court of Appeal.

Moreover, on October 21, 2011, ARCEP initiated penalty proceedings against Numericable, arguing that it had not complied with its November 4, 2010 decision. Consequently, in December 2011, Numericable and Orange signed amendments to the IRUs in order to comply with the November 4, 2010 ARCEP decision and to align the operating procedures set out in the IRUs with the procedures set out in the Orange generic technical and commercial offer.

In the meantime, the penalty proceedings initiated by ARCEP were not stopped by the execution of the amendments to the IRUs, and Numericable was fined 5.0 million euros on December 20, 2011 for noncompliance with ARCEP's November 4, 2010 decision. The fine was paid in full during fiscal 2012. Numericable filed an appeal against the decision before the Council of State. Within the framework of this appeal, Numericable having raised a question of Constitutional law, referred to the Constitutional Court, on the compliance with the Constitution of Article L. 36-11 of the CPCE, which sets out ARCEP's powers. On July 5, 2013, the Constitutional Court found in Numericable's favor and invalidated paragraphs 1 to 12 of Article L. 36-11 of the CPCE, on the basis of which ARCEP's December 20, 2011 decision to impose the aforementioned penalty was made. Numericable asked the Council of State to take the conclusions of this decision into consideration and accordingly to cancel ARCEP's December 20, 2011 decision. On October 21, 2013, the Council of State annulled the penalty imposed by ARCEP on December 20, 2011, which had condemned Numericable and NC Numericable to a fine of 5 million euros for non-compliance with ARCEP's November 4, 2010 ruling.

Lastly, Numericable initiated parallel proceedings against Orange before the Commercial Court of Paris on October 7, 2010 claiming damages of 2.7 billion euros for breach and modification of the IRUs by Orange. On April 23, 2012, the Commercial Court of Paris ruled in favor of Orange and dismissed the Group's claims for damages, ruling that there were no material differences between the original operational procedures and the new operational procedures published by Orange on September 15, 2008. Numericable appealed this decision before the Paris Court of Appeal and claimed the same amount of damages. Orange, in turn, claims that the proceedings materially impaired its brand and image, and claims damages of 50 million euros. The Commercial Court of Paris is expected to hear this case during the second quarter of 2014.

24.2.3 Litigation with Free relating to an advertising campaign

A claim was filed against NC Numéricable before the Commercial Court of Paris by telecommunication operator Free on August 3, 2011 in relation to the launch of the mobile offer by the Group in spring 2011 through an advertising campaign entitled ''*La révolution du mobile continue*.''

Free, which used the term ''revolution'' to refer to its launch of mobile phone services and whose latest offering was named the ''Freebox Revolution,'' argues that Numericable's campaign led to customer confusion and damaged its brand and image. The case is currently pending before the Paris Commercial Court. Free is claiming damages of 10.0 million euros. After the hearing, the Court asked for an opinion from the French competition authority (''*Direction générale de la concurrence, de la consommation et de la répression des fraudes*''—DGCCRF) related to the reality of the assertions of Free with regard to the laws governing advertising. The DGCCRF returned an opinion in which it indicated that the questions raised by Free did not constitute a fault under the applicable law. However, on December 13, 2013, the Commercial Court of Paris condemned NC Numericable to pay Free the sum of 6,391,000 euros. NC Numericable appealed this decision. As the decision is enforceable and the amount was paid in early 2014, the risk was fully provisioned as of December 31, 2013.

24 Provisions and contingent liabilities (Continued)

24.2.4 Litigation with several editors of value-added services (AVS)

On February 19, 2013, five companies editing value-added telephone services offering their services to the public through premium numbers (0899), jointly assigned Completel before the Commercial Court of Nanterre. The plaintiffs asked for the condemnation of Completel to pay 350,000 euros in repayment of sums corresponding to deductions made by Completel from the sums collected on their behalf. Completel made these deductions in response to practices by these companies that it considers contrary to the agreements between these companies and Completel, as well as ethical standards in the industry. They also sought payment of damages in a total amount of 12 million euros in compensation for the prejudice allegedly suffered as a result of the withholding of money by Completel.

Furthermore, in November 2012, Completel, having decided in November 2012 to put an end to this activity, suspended certain repayments and applied various contractual penalties on companies selling this type of value-added telephony services. Some of these companies assigned Completel before various Commercial Courts and sought an order for the payment of the amounts withheld by Completel or the cancellation of penalties applied by Completel. The overall claim amounts to approximately 400,000 euros, mainly representing sums collected for these companies.

24.2.5 Dispute with the Ligue de Football Professionnel

In a submission to the Commercial Court of Nanterre dated April 26 2013, the Professional Football League (''*Ligue de Football Professionnel*''—LFP) argued that Numericable had abused its dominant position in breach of its obligation of non-discrimination against the LFP when it was in charge of the production of the CFoot channel. The LFP requested 4.1 million euros in damages in compensation for the prejudice. More particularly, the LFP criticized Numericable for the low level of remuneration for the marketing of the CFoot channel compared with the remuneration of certain sports channels sold in packages. A hearing on the matter is expected in 2014.

24.2.6 Action by Colt, Free and Orange before the General Court of the European Union concerning the DSP 92 project

Colt, Free, and Orange, in three separate proceedings against the European Commission, filed a request with the General Court of the European Union for the cancellation of the final decision of the European Commission dated September 30, 2009 (Decision No. C (2009) 7426), which held that the compensation of 59 million euros granted within the framework of the public service concession for the establishment and operation of a high-capacity electronic communications network in the department of Hauts de Seine does not constitute state aid within the meaning of the rules of the European Union. The Group is not party to this proceeding. Its subsidiary Sequalum is acting as the civil party, as well as the French state and the department of Hauts de Seine. In three rulings dated September 16, 2013, the General Court of the European Union rejected the requests of the three applicants and confirmed the aforementioned decision of the European Commission. Free and Orange have appealed to the Court of Justice of the European Union.

24.2.7 Complaint of Bouygues Telecom

In late October 2013, the Group received a claim from Bouygues Telecom on the ''white label'' contract concluded between the two companies on May 14, 2009, initially for five years and extended once for an additional five years for the supply to Bouygues Telecom of double- and triple-play broadband offers. In its letter, Bouygues Télécom claimed damages totaling 53 million euros as a result of this contract. Bouygues Telecom alleges a prejudice that justifies, according to Bouygues Telecom, damages including (i) an amount of 17.3 million euros due to an alleged pre-contractual fraud (provision of incorrect information prior to the conclusion of the contract), (ii) an amount of 33.3 million euros as a result of alleged failure by Group companies in the execution of the contract and (iii) an amount of 2.4 million euros to repair the alleged damage to Bouygues Telecom's image. The Group considers

24 Provisions and contingent liabilities (Continued)

these claims unfounded both in fact and in contractual terms, and rejects both the allegations of Bouygues Telecom and the amount of damages claimed. It nevertheless intends to continue regular discussions between the parties regarding the implementation of this contract, for which Bouygues Telecom is requesting modifications in the context of its claim. Notwithstanding this claim, which has not been brought before the courts, the parties have continued their day-to-day cooperation in conditions identical to those prevailing before October 2013. The contract, which runs until 2019, generated 37.3 million euros in revenues in 2012, 49.6% of total white label B2C revenues of 75.3 million euros and 2.8% of the Group's total revenues.

24.2.8 Investigation of DSP 92 by the Regional Auditor of Ile-de-France

In mid-November 2013, a number of press articles reported that the Regional Auditor of Ile-de-France had opened an investigation into the management of the department of Hauts-de-Seine between 2004 and 2007. The articles reported that the investigation would focus primarily on the DSP 92 project awarded to Numericable, and in particular the granting of 59 million euros in consideration for public service costs for the establishment and operating of a high-capacity electronic communications network in Hauts de Seine. The Group has no information as to the object or the timing of the investigation, and as such to its exact nature or its potential impact on the Group. However, the Group notes, as indicated above, that DSP 92 has been validated by French administrative courts, by the European Commission and by the General Court of the European Union, before which action against the DSP 92 contract has successively been brought, and that the Court of Auditors has no power to act against a non-governmental entity.

24.2.9 Litigation with employees

The Group is involved in litigation with a certain number of employees, a large part of which is due to the last merger period in 2006-2007, involving UPC-Noos, which gave rise to adjustments and harmonization in practices leading to disputes until 2009. The overall risk for this litigation is approximately 4 million euros. Most of this litigation consists of the challenge by an employee of the grounds for or the form of his or her dismissal.

25 Employee benefits

25.1 Provisions for retirement benefits

In France, the employees of the Group benefit from a general pension plan. Accordingly, the Group contributes to mandatory social security plans. This regime is considered to be a defined-contribution plan within the meaning of IAS 19. The employees of the Group are covered by the Telecom Industry Collective Bargaining Agreement (''*Convention Collective Nationale des Télécommunications*,'' which determines the amount of the pension due to the employee upon retirement).

The rights to conventional retirement benefits vested by employees were evaluated individually, based on various parameters and assumptions such as the employee's age, position, length of service in the Group and salary, according to the terms of their employment agreement.

25 Employee benefits (Continued)

25.1.1 Assumptions used for defined-benefit plans

	December 31, 2013	December 31, 2012
	(in thousands of euros)	
Discount rate	3.0%	3.0%
Expected salary increase rate	3.0%	3.0%
Inflation rate	2.0%	2.0%
Turnover—managers (mean)	9.0%	7.0%
Turnover—other employees (mean)	18.0%	15.0%

The turnover rate can vary significantly depending on length of service.

25.1.2 Components of Net Periodic Benefit (Cost)

	December 31, 2013	December 31, 2012
	(in thousands of euros)	
Service cost	881	713
Interest cost	253	287
Expected return on plan assets	—	—
Recognition of actuarial net (gain) loss	458	1,496
Past service cost	—	—
Amounts recognized due to plan combinations	157	—
Curtailments/Settlements	(36)	(57)
Expense in respect of post-employment benefits	**1,714**	**2,439**
Including losses (gains) recognized in other comprehensive income	458	1,496
Percentage of present value of plan liabilities	4.5%	17.7%

Actuarial gains and losses arising from experience, adjustments and changes in actuarial assumptions are recognized directly in other comprehensive income.

25.1.3 Change in defined-benefit obligations

	December 31, 2013	December 31, 2012
	(in thousands of euros)	
Defined-benefit obligations—beginning of year	**8.455**	**6.101**
Service cost	881	713
Interest cost	253	287
Contributions paid	—	—
Amortization of actuarial net gain (loss)	458	1,496
Benefits paid	(36)	(87)
Past service cost	—	—
Business combinations	157	—
Curtailments/Settlements	—	(57)
Defined benefit obligation—end of year	**10.168**	**8.455**

25.2 Stock option plans

On November 7, 2013, the Board of Directors adopted a stock option plan in favor of certain officers and employees of Numericable Group.

25 Employee benefits (Continued)

The plan covers a total of 2,845,229 options for 2,845,229 shares. The exercise price of the option is 24.80 euros per share (the price set at the Company's IPO).

The plan has a term of eight years from November 7, 2013 until November 7, 2021.

The exercise of options is subject to conditions of presence and performance (based on consolidated revenue and EBITDA—Capex).

The vesting occurs in three periods:

– 50% in November 2015;

– 25% in November 2016;

– 25% in November 2017;

As of December 31, 2013, the fair value of options was estimated at 9,702 thousand euros. An amount of 640 thousand euros was expensed in 2013 in respect of this plan.

The main assumptions used for the valuation of the plan are listed in the table below:

	Stock options—November 2013
Unit fair value at the grant date	3.41
Share price at the grant date	24.80
Exercise price of the option	24.80
Anticipated volatility (weighted average)	25%
Expiry date (maturity)	November 2021
Anticipated dividends	4%
Risk-free interest rate (government bonds)	0.75%

26 Other non-current liabilities

	December 31, 2013	December 31, 2012
	(in thousands of euros)	
Non-current deferred revenue (more than one year)	97,429	105,791
Non-current trade payables	4,874	5,175
Non-current tax and social security payables	282	300
Other non-current liabilities	**102,585**	**111,266**

Deferred revenue at the end of the reporting period mainly represents unrecognized network lease revenue.

For certain arrangements entered into with its non-residential customers, the Group receives up-front cash payments, namely in relation to indefeasible right of use arrangements (''IRUs'') and connection fees. For these arrangements, the revenue is generally recognized over the duration of the lease contract.

The non-current part of deferred revenue disclosed in the above table corresponds to revenue that will be recognized in more than one year.

The current-part of deferred revenue (i.e. revenue to be recognized in less than one year) is presented in ''Trade payables and other liabilities.''

27 Trade payables and other liabilities

	December 31, 2013	December 31, 2012
	(in thousands of euros)	
Current trade payables	513,979	416,183
Trade payables—acquisition of assets	78,494	87,145
Advances and down payments received	20,464	19,884
Current accounts payables	49	21,219
Liabilities related to tax and duties	24,987	87,358
Corporate and social security contributions	54,412	45,871
Current deferred revenue (less than one year)	57,441	45,319
Other payables	7,592	3,054
Trade payables and other liabilities	**757,418**	**726,033**

28 Financial instruments

Details of the significant accounting policies and methods adopted (including the criteria for recognition, the basis of measurement, and the basis for recognition of income and expenses) for each class of financial asset, financial liability and equity instrument are disclosed in Notes 2.15 and 2.19.

28.1 Fair value of financial instruments

Valuation techniques and assumptions applied to measure fair value for derivative instruments

The fair values of derivative instruments are calculated using market prices. When such prices are not available, a discounted cash flow analysis is performed using the applicable yield curve for the duration of the instruments for non-optional derivatives, and option pricing models for optional derivatives. Interest rate swaps are measured at the present value of estimated future cash flows, discounted based on the applicable yield curves derived from market interest rates.

In accordance with the amendments to IFRS 7, the Group classifies its financial instruments measured at fair value into three levels (the fair value hierarchy).

- Level 1 fair value measurements are those derived from market prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 fair value measurements are those derived from inputs other than market prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Levels of fair value are presented in the tables below.

Fair value measurement other financial assets

Due to their short-term nature, the fair value of cash and cash equivalents, trade receivables and other current receivables and trade payables and other liabilities, is a proxy for the net carrying amount.

Investments in entities not included in the combination are unlisted equity securities. As a result, their fair value cannot be measured reliably, and these investments are accordingly measured at cost.

Financial guarantees and collateral

Under the SFA, the Group's assets have been pledged as collateral to bank lenders.

28 Financial instruments (Continued)

28.2 Financial assets

	Level of fair value	December 31, 2013—Financial assets Available for sale	Loans and receivables	Designated at fair value through profit and loss	Held to maturity	Total financial assets
		(in thousands of euros)				
Trade receivables and other receivables	2	—	402,888	—	—	402,888
Investments in associates	3	2,893	—	—	—	2,893
Non-current financial assets	2	35	7,228	—	—	7,263
Current financial assets	2	—	4,020	—	—	4,020

Financial assets		**2,928**	**414,136**	**101,365**	**—**	**518,429**

	Level of fair value	December 31, 2012—Financial assets Available for sale	Loans and receivables	Designated at fair value through profit and loss	Held to maturity	Total financial assets
		(in thousands of euros)				
Trade receivable and other receivables	2	—	417,371	—	—	417,371
Investments in associates	3	3,377	—	—	—	3,377
Non-current financial assets	2	35	6,791	—	5	6,831
Current financial assets	2	—	4,034	—	—	4,034
Derivative instruments		—	—	—	—	—
Cash and cash equivalents	1	—	—	7,996	—	7,996
Financial assets		**3,412**	**428,196**	**7,996**	**5**	**439,609**

28.3 Financial liabilities

Except for interest-rate derivatives, financial liabilities are measured at amortized cost, which is the amount at which the financial liability is measured at initial recognition less principal repayments, plus or minus the cumulative amortization using the effective interest method of any difference between that initial amount and the maturity amount, and less any reduction for impairment or irrecoverability.

Interest-rate derivatives held to maturity are measured at fair value through profit and loss.

Bonds are traded on the Irish Stock Exchange, market prices as of December 31, 2013 are as follows:

- Tranche C-One, coupon 12.375%, maturing February 2019: 122.83;
- Tranche C-TwoA, coupon 8.75%, maturing February 2019: 113.94.

28.4 Financial risk management objectives

Objective of the Corporate Treasury function

The Group's Corporate Treasury function provides services to the business, coordinates access to domestic and international financial markets, monitors and manages the financial risks relating to the operations of the Group through internal reports that analyze exposures by degree and magnitude of risks. These risks include market risk (primarily interest rate risk since the Group's activities do not expose it to risks of changes in foreign currency exchange rates), credit risk and liquidity risk. The Group

28 Financial instruments (Continued)

seeks to minimize the effects of these risks by using derivative financial instruments to hedge risk exposures. The Group does not hold or trade in financial instruments, including derivative financial instruments, for speculative purposes.

Interest rate risk management

The Group is exposed to interest rate risk because the Group borrows funds, mostly at floating interest rates. The risk is managed by the Group, when deemed appropriate, through the use of interest rate swaps and interest rate caps. Even though the Group does not apply IAS 39 in terms of hedge accounting, hedging activities are evaluated regularly to align with interest rate views and defined risk appetite, ensuring the most cost-effective hedging strategies are applied, in compliance with the requirements of the SFA.

The Group's exposures to interest rates on financial assets and financial liabilities are detailed in the liquidity risk management section of this note.

Interest rate sensitivity analysis

The sensitivity analyses below have been determined based on the exposure to interest rates for both derivatives and non-derivative instruments at the end of the reporting period. For floating rate liabilities, the analysis is prepared assuming the amount of the liability outstanding at the end of the reporting period was outstanding for the whole year. A 50 basis point decrease is used when reporting interest rate risk internally to key management personnel. This represents management's assessment of the reasonably possible change in interest rates.

If interest rates had been roughly 50 basis points higher (lower) and all other variables were held constant, the Group's net income (loss) for the year ended December 31, 2013 would have decreased (increased) by 12 million euros. This is mainly attributable to the Group's exposure to interest rates on its variable rate borrowings.

Interest rate swap contracts

Under interest rate swap contracts, the Group agrees to exchange the difference between fixed and floating rate interest amounts calculated on agreed notional principal amounts. Such contracts enable the Group to mitigate the risk of changing interest rates on the fair value of issued fixed rate debt and the cash flow exposures on the issued variable rate debt. The fair value of interest rate swaps at the end of the reporting period is determined by discounting the future cash flows using the curves at the end of the reporting period and the credit risk inherent in the contract.

The Group did not hold any swap contracts during the years ended December 31, 2013 and 2012.

Credit risk management

Credit risk refers to the risk that counterparty will default on its contractual obligations resulting in financial loss to the Group.

Financial instruments that could potentially subject the Group to concentrations of counterparty risk consist primarily of trade receivables, cash and cash equivalents, investments and derivative financial instruments. Overall, the carrying amount of financial assets recognized in the financial statements, which is net of impairment losses, represents the Group's maximum exposure to credit risk.

As mentioned in Note 20, the Group considers that it has extremely limited exposure to concentrations of credit risk with respect to trade accounts receivable due to its large and diverse customer base (residential and public institutions) operating in numerous industries and located across France. In addition, the maximum value of the counterparty risk on these financial assets is equal to their

28 Financial instruments (Continued)

recognized net carrying amount. An analysis of credit risk on net trade receivables past due is provided in Note 20.

The Group's policy is to invest its cash, cash equivalents and marketable securities with financial institutions and industrial groups with a long-term rating of A-/A3 or above.

However, in September 2008, Lehman Brothers filed for bankruptcy. Part of the Group's financial liabilities was hedged by interest rate swaps entered into with Lehman Brothers. As a result of the bankruptcy, Lehman Brothers defaulted on the swaps. There is currently a claim with Lehman Brothers for a total amount of approximately 11.2 million euros. In 2012, the Group received a first payment 2.8 million euros in relation to this claim. In 2013, the Group received two further installments in a total amount of 7.1 million euros. As such a contingent gain of 1.3 million euros remains for the Group, but has not been recognized as of December 31, 2013.

Liquidity risk management

Ultimate responsibility for liquidity risk management rests with the Board of Directors, which has established an appropriate liquidity risk management framework for the management of the Group's short-, medium- and long-term funding and liquidity management requirements. The Group manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

The following tables detail the Group's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods (excluding amortized costs and future interests). The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Group can be required to pay. The tables include both interest and principal cash flows. The contractual maturity is based on the earliest date on which the Group may be required to pay.

	December 31, 2013			
	Less than 1 year	1-5 years	More than 5 years	Total
	(in thousands of euros)			
Financial liabilities under Senior Facility Agreements	47,341	2,226,717	380,380	2,654,438

The Group considers that its available cash and cash equivalents and the anticipated cash flows from operations are sufficient to cover its operating expenses, capital expenditure and its financial debt requirements for the next twelve months.

29 Related party transactions

The majority shareholders of the Group are a group of investment and private equity firms: Altice, Cinven and Carlyle.

Balances and transactions between entities forming the Group have been eliminated in preparing the consolidated financial statements and are not disclosed herein. Details of transactions between the Group and other related parties are disclosed below.

29.1 Trading and financing transactions

During the year, group entities entered into the following trading transactions with related parties that are not members of the Group:

	Purchase of goods and services		Amounts owed by related parties		Amounts owed to related parties	
	2013	2012	2013	2012	2013	2012
	(in thousands of euros)					
Shareholders						
Cinven	474	610	—	—	639	—
Altice	181	1,214	—	—	—	—
Carlyle	450	600	—	—	900	450
Associate						
Alsace Connexia Participation SAS	—	—	2,280	2,235	—	—

Management fees have been paid to the shareholders (Cinven, Altice and Carlyle) in relation to certain management, financing and advisory services provided (1,106 thousands euros in 2013 and 2,424 thousand euros in 2012). These contracts ended on September 30, 2013 within the framework of the IPO.

Moreover, as mentioned in Note 4.1.1, during the restructuring of the Group's debt in 2009, in which the Group's shareholders acquired certain loans in respect of SFA Ypso France, Ypso Holding SARL issued

29 Related party transactions (Continued)

securities subscribed by the shareholders, including 132,664,023 subordinated interest preferred equity certificates (''Super PECs'') with a nominal value of 1 euro each, the interest on which was capitalized.

Cinven, Carlyle and Altice contributed the Super PECs to Numericable Group on November 7, 2013, within the framework of the legal transactions related to the IPO. This debt was therefore extinguished in exchange for newly issued securities. Consecutively, the expense related to the extinguishment of the debt (''Premium'') was recognized as financial expense in the amount of 81.6 million euros. This charge had no impact on the Group's cash position.

29.2 Related-party relationships

(1) Relationships with shareholders

Relationships with Altice

Altice owns cable networks in the French West Indies (Antilles), and the Group pays call termination charges to these networks for calls made by subscribers of its network to subscribers of networks in the West Indies. Conversely, the Group receives call termination charges for calls made by subscribers of these networks to subscribers of the Group.

Finally, Altice owns Auberimmo, which is a company that rents infrastructures to the Group. Auberimmo has a sole client, Completel SAS, which is a member of the Group. Rents invoiced in 2013 amounted to 1,132 thousand euros, compared with 1,081 thousand euros in 2012.

Relationships with Carlyle

Sagemcom, one of the Group's key suppliers of set-top boxes, was acquired by funds managed by Carlyle on August 17, 2011.

NC Numericable and Completel also signed a contract for services with B&B Hotels and Econonich (together, ''Group B&B Hotels''), acquired by Carlyle Group in 2010, on December 31, 2013. The contract was concluded for a period of five years, after which the parties will meet for a possible contract extension. Under the terms of the contract, NC Numericable and Completel have committed to provide the following services:

- access to broadband internet;
- creation of an IP network on all relevant sites;
- security services;
- fixed telephony services;
- TV services; and
- various other cross-cutting services.

(2) Relationships with Coditel, an entity owned by Altice and by other parties unrelated to the Group

As part of the sale of Coditel Belgium and Coditel Luxembourg in June 2011, the Group entered into a service agreement and a trademark license agreement with Coditel Holding S.A. to ensure the continuity of its operations.

29 Related party transactions (Continued)

Service agreement

On June 30, 2011, Numericable SAS entered into a service agreement (the ''Coditel Service Agreement'') with Coditel. Pursuant to the Coditel Service Agreement, the Group will continue to provide Coditel with all the services it provided prior to its sale, including:

- VOD platform services and VOD content services;
- television, IP and voice engineering services;
- support and assistance in purchasing hardware and devices needed for its operations, in particular set-top boxes and software, modems, routers and mobile handsets, and also television and VOD content;
- delivery of television channels signals and existing data flows over the Group's backbone;
- upgrade of Coditel's billing software; and
- continued support of Coditel's systems currently located in the Group's premises or currently supported from the Group's systems.

In consideration of the services provided, Coditel agreed to pay the Group a total of 100,000 euros per year. In addition, Coditel will pay the Group 10% of its monthly VOD revenues.

Trademark License Agreement

On June 30, 2011, Coditel and Numericable also entered into a trademark license agreement (the ''Trademark Agreement''). Pursuant to the Trademark Agreement, the Group will provide Coditel with a license to use the ''Numericable'' trademark, registered under Ma14502, exclusively in Belgium and Luxembourg in relation to the offering, promotion and commercialization of television, Internet and telephone products and services. The license fee is included in the annual fee of 100,000 euros under the Service Agreement. The Trademark Agreement terminates automatically on June 30, 2017, upon termination of all services under the Service Agreement or upon expiry of the Service Agreement.

29.3 Compensation of key management personnel

Compensation of members of the Executive Committee amounted to 2,226 thousand euros and 2,100 thousand euros in 2013 and 2012 respectively. This amount includes only short-term benefits such as salaries, wages and bonuses.

The Group has also recorded 303 thousand euros as of December 31, 2013 for retirement benefits (general regime) for Executive Committee members.

Lastly, the expense related to stock option plan (employer contribution + IFRS 2 expense) represents 3,409 thousand euros for members of the Executive Committee for 2013 (nil in 2012).

30 Lease arrangements

30.1 The Group as lessor

Finance leases

The Group has not any contracted finance leases as a lessor.

Operating leases

Operating leases relate to the investment property owned by the Group and leased to other companies in the telecommunications industry, with lease terms of between 15 to 30 years. All operating lease contracts contain market review clauses in the event that the lessee exercises its option to renew. The lessee does not have an option to purchase the property at the expiry of the lease period.

30 Lease arrangements (Continued)

Future revenues related to these leases (recorded in deferred income) break down as follows:

	Future minimum amount of rents	
	December 31, 2013	December 31, 2012
	(in thousands of euros)	
Not later than 1 year	53,930	45,318
Later than 1 year and not later than 5 years	42,224	40,930
More than 5 years	54,997	64,545
Total	**151,151**	**150,793**

30.2 The Group as lessor

Finance leases

The Group has entered into various finance leases related to property, for which the lease term is generally between 20 and 30 years, and office equipment, for which the lease term is 4 years.

The main finance lease arrangements relate to network equipment bought from Cisco and the property lease for the headquarters offices of the Group in Champs-sur-Marne, for which the Group has an option to purchase the property at the end of the lease term at a price that is expected to be sufficiently lower than the fair value at the date the option becomes exercisable.

All leases are denominated in euros. Certain property lease arrangements stipulate that the annual payments will be set at a fixed amount at the beginning of the lease, but will be increased in line with the inflation rate in subsequent years (i.e. a percentage increase).

	Minimum lease payments		Present value of minimum lease payments	
	December 31, 2013	December 31, 2012	December 31, 2013	December 31, 2012
	(in thousands of euros)			
Not later than 1 year	22,100	11,685	21,257	11,302
Later than 1 year and not later than 5 years	21,069	13,883	19,246	12,830
More than 5 years	1,342	721	989	595
	44,510	**26,288**	**41,492**	**24,728**
Less future finance charges	(3,018)	(1,560)	—	—
Present value of minimum lease payments	41,492	24,728	41,492	24,728
Financial liabilities related to finance leases—current portion			21,257	11,302
Financial liabilities related to finance leases—non-current portion			20,235	13,426

The interest rate inherent in the leases is fixed at the contract date for the entire lease term. The average effective interest rate contracted is approximately 3.96% and 3.24% per annum for 2013 and 2012 respectively.

Operating leases

The Group also has property and vehicle lease commitments under operating leases. The lease term for property under operating leases is generally 3, 6 or 9 years, a standard lease term for commercial real estate in France. The lease term for vehicle under operating lease is 3 years.

As part of the networks business, leases involving equipment and network IRUs (rights of use of the local loop, backbone) or other rental contracts (rights of way) were not considered material.

30 Lease arrangements (Continued)

In connection with its entertainment business activities, the Group has also entered into operating leases and agreements to purchase TV programs.

As of December 31, 2013, non-cancellable operating lease commitments amounted to:

	December 31, 2013
	(in thousands of euros)
Not later than 1 year	10,381
Later than 1 year and not later than 5 years	34,798
More than 5 years	12,978
	58,156

31 Non-current assets held for sale and discontinued operations

None.

32 Commitments and contractual obligations

32.1 Commitments given

Guarantees in relation to the Senior Facility Agreement

As part of the SFA entered into by the subsidiaries of the Group, the following commitments were given to the lending banks:

- Compliance with financial covenants;
- Stable tax consolidation scope;
- Compliance with conditions governing the acquisition, disposal, use and control of assets.

All the assets of the Group's subsidiaries have been pledged to the banks.

Commitments in relation to business operations

The Group is committed to build 75,000 connectors for a total amount of 4.5 million euros on behalf of the city of Le Havre, France.

To operate telecommunications networks, the Group needs licenses, authorizations or rights of use to infrastructure in the public and private domain. Consequently, the Group generally pays fees to the public administration in charge of managing the infrastructure (local authorities) or to the owners. In the course of its normal business activities, the Group has also entered into outsourcing contracts, particularly for certain network maintenance services.

Lease commitments in relation to business operations

As disclosed in Note 30, the Group has entered into various lease arrangements.

32 Commitments and contractual obligations (Continued)

Contractual obligations

The following table sets out the maturity of financial commitments in respect of borrowings and leases entered into by the Group (see the corresponding Notes):

	Note	< 1 year	Maturity 1-5 years	> 5 years	Total December 31, 2013
			(in thousands of euros)		
Loans and financial liabilities	23	64,249	2,283,075	418,818	2,766,142
Operating leases	30	10,381	34,798	12,978	58,157
Total		**74,630**	**2,317,873**	**431,796**	**2,824,299**

32.2 Commitments received

The Group has received a commitment of a total amount of 25 million euros from GDF Suez to subscribe to perpetual floating rate notes, which will provide financing for the construction of the Sipperec network. The Group has already received 23.8 million euros in principal from GDF Suez as of December 31, 2013.

33 Events after the end of the reporting period

33.1 Liquidity contract signed with Exane BNP Paribas

In early 2014, the Group signed a liquidity contract with Exane BNP Paribas in order to improve the liquidity of its securities and the regularity of their prices on NYSE Euronext Paris. A liquidity account of 3 million euros has been opened to allow Exane BNP Paribas to make transactions under the terms of the liquidity contract.

33.2 Granting of a new stock option plan

On January 10, 2014, the Board of Directors adopted a stock option in favor of certain officers and employees of Numericable Group.

This plan covers a total of 287,618 options for 287,618 shares.

The exercise price is 27.62 per share.

33.3 Exclusive talks with Vivendi for the acquisition of SFR

On March 14th, 2014, the board of directors of Vivendi announced that it entered into exclusive talks with Altice, the majority shareholder of Numericable Group, for a period of three weeks, in order to discuss the possible acquisition of its subsidiary SFR.

Numericable Group

Statutory Auditor's Report on the Numericable Group Combined Financial Statements for each of the three years ended December 31, 2012, 2011 and 2010

To the Chairman and Chief Executive Officer of Numericable Group,

In our capacity as statutory auditor of Numericable Group (the ''**Company**'') and in accordance with Regulation (EC) No 809/2004, we have audited the accompanying combined financial statements of the group described in Note 1.5, which comprise the combined statement of financial position of the Company as of December 31, 2012, 2011 and 2010, the combined statement of income, the combined statement of comprehensive income, the combined statement of cash flows and the combined statement of changes in equity for each of the three years then ended and a summary of significant accounting policies and other explanatory notes (together the ''**Combined Financial Statements**'').

The Combined Financial Statements have been established under the responsibility of the Board of Directors of the Company in the context of the contemplated initial public offering of the shares of Numericable Group and in connection with the contemplated restructuration of the Ypso France SAS and Altice B2B France SAS operations under Ypso France SAS. Our responsibility is to express an opinion on the Combined Financial Statements based on our audit.

We conducted our audit in accordance with professional standards applicable in France. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the Combined Financial Statements are free from material misstatement. An audit involves performing procedures, using sampling techniques or other methods of selection, to obtain audit evidence about the amounts and disclosures in the Combined Financial Statements. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made, as well as the overall presentation of the Combined Financial Statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

In our opinion, the Combined Financial Statements prepared for the purpose of the prospectus give a true and fair view of the assets and liabilities and of the financial position of the combined group as at December 31, 2012, 2011 and 2010 and the results of the operations and of its cash flows for each of the three years then ended in accordance with International Financial Reporting Standards as adopted by the European Union.

Without qualifying our opinion, we draw your attention to:

- The basis of preparation in Note 1.4, which describes notably in section ''Basis of combination'', the accounting method used for the combination of the two groups being under common control in the absence of specific guidance under IFRS as adopted by the European Union;
- The fact set out in Note 1.6 to the Combined Financial Statements which discloses the facts upon which management of the Company has based its evaluation of the ability of the combined group to meet its financing needs in 2013 and the reason supporting the continuing use of the going concern principle for preparing the Combined Financial Statements.

Neuilly-sur-Seine, September 6, 2013
The statutory auditor
Deloitte & Associés

Christophe Saubiez

Change in fair value of available-for-sale financial assets	—	—	—
Actuarial gains and losses	—	—	—
Tax on items recognized directly in equity	—	—	—
Total other comprehensive income/(loss) attributable to owners of the entity	**84,881**	**194,859**	**58,039**

In accordance with IAS 1 *Presentation of financial statements (2007)* (**IAS 1**), the Combined Group, as defined in Note 1, presents a statement of other comprehensive income. However, as the Combined Group operates only in France, the functional and presentation currency of all the entities within the Combined Group is the euro. As a result, no cumulative translation adjustment has been recognized as of December 31, 2012, 2011 and 2010.

Available-for-sale financial assets are comprised of various investments in entities not comprised in the combination, that are not listed (see Note 17) for which fair value cannot be measured reliably. Due to the fact that these investments are not material, these investments are measured at cost and accordingly, no unrealized gain/loss is recognized in the statement of other comprehensive income.

As mentioned in Note 2.20, the Combined Group recognizes actuarial gains and losses immediately through income. Accordingly, there are no actuarial gains and losses recognized directly in equity.

Numericable Group

INDEX

Numericable Group

Combined Financial Statements

for the three years ended December 31, 2012

1 Basis of preparation of the combined financial statements

1.1 Presentation of the Two Groups forming Numericable Group

Numericable Group (the ''**Company**'') is a limited company under French law, whose head office is located in France and has been formed in August 2013. In relation to the admission of the shares of the Company on Euronext Paris, the Company will receive the contribution of two entities incorporated in Luxembourg, Ypso Holding S.à.r.l and Altice Lux Hold S.à.r.l., which are holding companies that are respectively parent companies of Ypso France SAS and Altice B2B France SAS. Ypso Holding S.à.r.l, Ypso France SAS and its subsidiaries are hereafter referred to as ''Ypso'' and Altice Lux Hold S.à.r.l., Altice B2B France SAS and its subsidiaries are hereafter referred to as ''Altice B2B''.

Ypso France SAS

Ypso France SAS, which operates the Numericable business, is a French cable television service provider. Its core products are premium digital television packages, which are available to households in areas that are triple-play enabled. Ypso France SAS also provides French consumers with broadband Internet, fixed telephony, and mobile telecommunications services.

Altice B2B France SAS

Altice B2B France SAS, through its main operational entity, Completel SAS, operates the largest alternative fiber-to-the-office, or FTTO, network in France, constituting the third alternative Digital Subscriber Line (''DSL'') network in France. Completel SAS provides business customers with a comprehensive service offering, which includes data transmission, very high speed Internet, telecommunications services, convergence and mobility solutions, through fiber and DSL networks.

1.2 Description of the context

Ypso and Altice (collectively the ''**Two Groups**'' or the ''**Combined Group**'') are currently entities under common control. The Two Groups are ultimately controlled by three private equity funds Carlyle, Cinven and Altice. The purpose of the combined financial statements is to present a fair depiction of the financial condition, and the assets and liabilities of the Two Groups, using historical bases in the assets, liabilities and results of operations and cash flows for each period presented in the combined financial statements. Accordingly, the combined financial statements reflect the historical assets, liabilities, revenues, expenses and cash flows that were directly related to the sub-groups, Ypso and Altice B2B, which are separate legal groups at December 31, 2012, 2011 and 2010.

The combined financial statements have been prepared for the three-year period ended December 31, 2012, 2011 and 2010 (collectively the ''Combined Financial Statements'') in conjunction with the contemplated initial public offering of the shares of Numericable Group (the **''Offering''**). It is expected that Ypso will acquire 100% of the share capital of Altice B2B (the **''Combination''**) in order to reflect the combination of the Two Groups.

1.3 Statement of compliance

The combined financial statements of Numericable Group include a combined statement of financial position as of December 31, 2012, 2011 and 2010, a combined statement of income, a combined statement of comprehensive income, a combined statement of cash flows and a combined statement of changes in equity for each of the three years in the period ended December 31, 2012 and the underlying Notes. The combined financial statements have been prepared in compliance with International Financial Reporting Standards (**''IFRS''**) as published by the International Accounting Standards Board (''**IASB**'') and as adopted by the European Union at December 31, 2012.

The Combined Financial Statements were approved by the Board of Directors on September 6, 2013.

1 Basis of preparation of the combined financial statements (Continued)

1.4 Basis of presentation of the Combined Financial Statements

IFRS financial statements.

For the purpose of preparing the Combined Financial Statements, accounting principles effective as of December 31, 2012 have been applied to all years presented in these Combined Financial Statements.

Ypso France and Altice B2B France prepare separate consolidated financial statements in accordance with the accounting rules and principles generally accepted in France (''**French GAAP**''), in application of Regulations n° 99.02 and n° 2005.10 of the Accounting Regulations Board, in connection with the financing agreement entered into with the banks on June 6, 2006 and subsequently amended on July 18, 2006, March 2, 2007 and June 24, 2008.

Ypso France SAS also prepares consolidated financial statements in accordance with IFRS to comply with its reporting requirements in relation to the issuance of the Ypso High-Yield Notes (as defined in Note 4.1.1).

In preparing the Combined Financial Statements, Altice B2B France prepared consolidated financial statements in accordance with French GAAP and converted them to IFRS which resulted in the following adjustments:

- Connection fees for business clients have been amortized over the contractual engagement period in accordance with IAS 18 *Revenue*;
- Under IFRS, certain lease arrangements relating to offices and equipment have been analyzed as finance leases as a result of applying the criteria defined under IAS 17 *Leases*. Under French GAAP, these lease arrangements were analyzed as operating leases and need to be reclassified as finance leases under IFRS;
- In accordance with the exemption provided for in IFRS 1 *First-time adoption of IFRS*, past business combinations that occurred prior to January 1, 2010 have not been restated and no amortization of goodwill has been recognized under IFRS;
- Under IFRS, transaction costs (including debt issuance costs) that are directly attributable to the acquisition or issue of a financial liability are deducted from the liability's carrying value. Debt issuance costs are amortized over the debt term using the effective interest method (as opposed to the immediate recognition of a financial expense under French GAAP);
- Changes in the fair value of interest-rate derivative instruments have been recognized immediately in the combined statement of income within financial income and expenses under IFRS whereas under French GAAP, these interest rate swaps are considered as off-balance sheet commitments. Changes in fair value of interest rate derivatives are reported as other assets and liabilities under IFRS;
- The research tax credit is determined based on a certain amount of qualifying R&D staff costs, which are capitalized under IAS 38 *Intangible Assets* (''**IAS 38**''). As a result, the amount of research tax credit has been recognized ratably over the useful life of the capitalized costs, that is 3 years;
- Certain non-recurring income and expenses have been reclassified to EBITDA and/or financial income in the combined statement of income under IFRS.

Subsequent events.

The Combined Financial Statements of Numericable Group were prepared under the responsibility of the Chairman of Ypso and Altice B2B and approved by the Board of Directors of the Company on September 6, 2013. The preparation of the Combined Financial Statements is consistent with estimates reflected in the consolidated financial statements of Ypso and Altice B2B as of December 31, 2012, which were respectively authorized for issue on April 10, 2013 and April 18, 2013 by the Chairman. With

1 Basis of preparation of the combined financial statements (Continued)

the exception of the adjustments made in connection with the conversion of the consolidated financial statements of Altice B2B from French GAAP to IFRS, no adjustment has been reflected in the Combined Financial Statements for any subsequent events since April 18, 2013 to reflect exactly the position that was presented in the consolidated financial statements of the Ypso and Altice for which the Combined Financial Statements are being prepared as disclosed hereafter with the exception of the adjustments made in connection with the conversion in IFRS of the Financial Statements of Altice B2B prepared in accordance with French GAAP.

Basis of combination.

The Combined Financial Statements were prepared using the accounting records that were used to prepare the consolidated financial statements of the Ypso and Altice B2B sub-groups for the year ended December 31, 2012, 2011 and 2010.

All intra-group balances and transactions have been eliminated in preparing the Combined Financial Statements, including the transactions between Ypso and Altice B2B and their respective subsidiaries.

As described above, the Combination of the Two Groups is considered a combination of entities under common control of Carlyle, Cinven and Altice and the Combined Financial Statements reflects the combination of Ypso and Altice using the following methods and principles:

- In accordance with IAS 8 *Accounting Policies, Changes in Accounting Estimates and Errors* paragraph 10, judgment has been applied in developing and applying an accounting policy that results in information that is relevant and reflect the economic substance of the transaction. As a result, the acquisition method, as defined in IFRS 3 *Business Combinations (Revised 2008)* (''**IFRS 3**''), has not been applied to reflect the combination of the Two Groups. In the absence of specific guidance under IFRS for transactions between entities under common control, we considered and applied standards on business combination and transactions between entities under common control issued by the regulators in the United States (Accounting Standards Codification Topic 810-10-45-10 and Topic 810-10-55-1B *Consolidation* and SEC Regulation S-X Article 3A—*Consolidated and Combined Financial Statements*) and in the United Kingdom (FRS 6 *Acquisitions and mergers*) to prepare the Combined Financial Statements.
- Likewise, the Combined Financial Statements were prepared by aggregating the separate consolidated financial statements of Ypso and Altice B2B at their historical book value:
  - Assets, liabilities, income and expenses of the Two Groups have been extracted from the accounting records of the respective Ypso and Altice B2B sub-groups and fully aggregated at their historical book value without being revalued;
  - Preexisting non-controlling interests have been maintained at their book value in the combined statements of financial position. They primarily represent the 0.6% ownership in Completel Europe NV (a subsidiary fully consolidated in the consolidated financial statements of Altice B2B France) that was repurchased by Altice B2B France for approximately €5 million in 2010;
  - The combined equity has been determined by aggregating the consolidated equity of the sub-groups Ypso and Altice;
  - No goodwill has been recognized and the net assets and liabilities have been recognized at their historical book value; however, historical goodwill balances of the Two Groups existing before the combination have been maintained at their book value in the Combined Financial Statements;
  - The effects of transactions between the Two Groups on assets, liabilities, revenue, and expenses for periods presented have been eliminated;

1 Basis of preparation of the combined financial statements (Continued)

- Subordinated debt instruments from ultimate shareholders, which are recorded in the liabilities of Ypso Holding and Altice B2BLux, have been classified directly in equity as they will be contributed to Numericable Group by the shareholders as a result of the contemplated reorganization and then be converted into share capital.

With respect to the presentation of comparative information, the comparative information for 2010 has been adjusted to reflect the combination at the beginning of the earliest period presented, that is, January 1, 2010, date as of which both Groups were under common control.

1.5 List of entities comprised in the Combination

Subsidiaries

Entities forming the Combined Group are companies in which the Two Groups have a controlling interest through Ypso or Altice, that is, entities in which the Two Groups have the power to govern financial and operational policies in order to obtain benefits from their operations. Control exists when the Combined Group has the power, directly or indirectly, to govern the financial and operating policies of an enterprise so as to obtain benefits from its activities. The financial statements of subsidiaries are included in the Combined Financial Statements from the date that control commences until the date that control ceases. Non-controlling interests in subsidiaries are identified separately from the Combined Group's equity therein.

Associates

Investments in which the Combined Group exercises significant influence, but not control or joint control, are accounted for under the equity method. Such investees are referred to as ''associates'' throughout these Combined Financial Statements. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies. Associates are initially recognized at cost. The Combined Financial Statements include the Combined Group's share of income and expenses, from the date significant influence commences until the date that significant influence ceases.

1 Basis of preparation of the combined financial statements (Continued)

As of 31 December 2012, 2011 and 2010, the Combined Financial Statements result from the combination of the following entities:

Company and legal form of incorporation	Registered office	Consolidation method as of December 31 2012, 2011 and 2010	Percentage of control			Percentage of interest		
			2012	2011	2010	2012	2011	2010
Entities comprising the Ypso sub-group								
Ypso Holding S.à.r.l	37, rue d'Anvers, L1130 Luxembourg	Parent company		N/A			N/A

B3G NV	Netherlands	Full consolidation	100%	100%	100%	100%	100%	100%

(1) The Combined Group acquired in January 2012 the shares of Sequalum Participation that were held by Eiffage (15.78%). After this operation, the Combined Group owned 95% of Sequalum Participation.

(2) The entities Altitude Telecom, B3G SA and B3G Online were merged in 2011 in Completel SAS.

1 Basis of preparation of the combined financial statements (Continued)

1.6 Going concern assumption

The Combined Group was formed by a series of acquisitions, mainly funded through external borrowings. In addition, the construction and subsequent modernization of the network have required substantial investments. These two factors explain the structure of the statement of financial position and the proportion of financial liabilities in relation to total equity as well as the significant amount of amortization expense and net finance cost.

Currently, the Combined Group services its debt and funds its investments through net cash from operations. Furthermore, the Combined Group's covenants under its facility agreements require the Combined Group to comply with certain liquidity ratios and to maintain certain cash levels.

Furthermore, as explained in Note 32, the Combined Group amended its Senior Facility Agreements in July and August 2013 which allowed the Combined Group to reschedule a large portion of its debt.

Under these conditions and given the updated cash flow projections, management believes that the Combined Group will be able to finance its cash requirements for the next twelve months from the date of approval of the Combined Financial Statements for the three years ended December 31, 2012 and meet its financial debt obligations during the period.

As a result, the Combined Financial Statements of the Combined Group for the three years ended December 31, 2012 have been prepared on a going concern basis.

2 Significant accounting policies

2.1 Accounting principles governing the preparation of the Combined Financial Statements

Standards and interpretations applied by the Combined Group as of December 31, 2012

With the exception of the principles used for the combination, as disclosed in Note 1, the accounting policies for recognition and measurement used in preparing the Combined Financial Statements at December 31, 2012 are the same as those used in the previous consolidated financial statements of Ypso under IFRS. Adjustments have been recognized to convert the consolidated financial statements of Altice B2B (prepared under French GAAP) to IFRS (see Note 1.4).

As mentioned in Note 1, the Combined Financial Statements have been prepared in accordance with International Financial Reporting Standards (''**IFRS**'') as adopted by the European Union (''**EU**'') with mandatory application as of December 31, 2012. The recognition and measurement principles of International Financial Reporting Standards as adopted by the European Union have been applied in preparing the Combined Financial Statements. They are available on the following website:

http://ec.europa.eu/internal_market/accounting/ias/index_en.htm

Standards and interpretations adopted by the European Union with mandatory application as of December 31, 2012 are similar to the standards and interpretations published by the International Accounting Standards Board (''**IASB**''), with the exception of the carve-out of IAS 39 *Financial Instruments: Recognition and Measurement* (''**IAS 39**'') and the below standards and interpretations adopted by the EU but not yet mandatory in EU as of December 31, 2012. However, those standards and interpretations are not applicable to the Combined Group. As a result, the Combined Financial Statements comply with International Financial Reporting Standards as published by the IASB.

The standards and interpretations applicable from January 1, 2012 have no significant effect on the Combined Financial Statements as of date

2 Significant accounting policies (Continued)

Standards and interpretations compulsory after December 31, 2012 and not early adopted by the Combined Group

The following are standards and interpretations that have been issued by the IASB and the IFRS Interpretations Committee and adopted by the EU at the date of preparation of these Combined Financial Statements but that are not yet mandatory. The Combined Group has not elected an earlier application:

– IAS 27 (revised 2011): Separate Financial Statement (applicable on or after January 1, 2014 for the Combined Group) (''**IAS 27**'')

This standard outlines the accounting and disclosure requirements for 'separate financial statements', which are financial statements prepared by a parent, or an investor in a joint venture or associate, where those investments are accounted for either at cost or in accordance with IAS 39 *Financial Instruments: Recognition and Measurement*. The standard also outlines the accounting requirements for dividends and contains numerous disclosure requirements.

– IAS 28 (revised 2011): *Investments in Associates and Joint Ventures* (applicable on or after January 1, 2014 for the Combined Group) (''**IAS 28**'')

This standard relates to the accounting for joint ventures and associates under the equity method.

Some clarifications have been included with respect to the accounting for changes in ownership interests (with or without loss of control) whereas disclosures are now covered by IFRS 12.

– IFRS 10: *Consolidated Financial Statements* (applicable on or after January 1, 2014 for the Combined Group) (''**IFRS 10**'')

IFRS 10 supersedes SIC-12 and IAS 27 for the part relating to the consolidated financial statements. This standard deals with the consolidation of subsidiaries and structured entities, and redefines control which is the basis of consolidation.

– IFRS 11*: Joint Arrangements* (applicable on or after January 1, 2014 for the Combined Group) (''**IFRS 11**'').

IFRS 11 supersedes IAS 31 and SIC-13.

This standard deals with the accounting for joint arrangements. The definition of joint control is based on the existence of an arrangement and the unanimous consent of the parties which share the control.

There are two types of joint arrangements (i) *joint ventures*: the joint venturer has rights to the net assets of the entity to be accounted for using the equity method, which is the method already applied by the Combined Group; and (ii) *joint operations*: the parties to joint operations have direct rights to the assets and direct obligations for the liabilities of the entities which should be accounted for as arising from the arrangement.

– IFRS 12: *Disclosure of interest in Other Entities* (applicable on or after January 1, 2014 for the Combined Group) (''**IFRS 12**'')

IFRS 12 supersedes disclosures previously included in IAS 27, IAS 28 and IAS 31.

This standard groups and develops all the disclosures related to subsidiaries, joint ventures, associates, consolidated and unconsolidated structured entities.

– IFRS 13*: Fair value Measurement* (applicable for annual periods beginning on or after January 1, 2013) (''**IFRS 13**'')

IFRS 13 is a single source of fair value measurement and disclosure requirements for use across IFRSs. It defines fair value, sets out a framework for measuring fair value and requires disclosures about fair value measurements, including the fair value hierarchy already set out in IFRS 7.

2 Significant accounting policies (Continued)

– IAS 19 *(revised 2011): Employee Benefits* (applicable on or after January 1, 2013 for the Combined Group) (''**IAS 19**'')

The main changes are:

- the recognition of actuarial gains and losses through Other Comprehensive Income, which will result in a change in accounting principles as the Combined Group recognizes actuarial gains and losses through income as at December 31, 2012 ; and
- the modification of the calculation of the finance cost component, due to the removal of the expected return on plan assets, which is not expected to have a material effect on the Combined Group's financial statements;
- the immediate expense of non-vested past service costs which has no expected material effect to date on the Combined Group's financial statements.

The other amendments and interpretations not yet adopted by the Combined Group as at December 31, 2012 are as follows:

– Amendments to IAS 1—Presentation of Items of Other Comprehensive Income and Separate *Financial Statements* (applicable on January 1, 2013 for the Combined Group)

– IFRIC 20, *Stripping Costs in the Production Phase of a Surface Mine* (applicable on January 1, 2013 for the Combined Group) (''**IFRS 20**'')

– Amendments to IFRS 7 *Disclosures—Offsetting Financial Assets and Financial* Liabilities (applicable on January 1, 2013 for the Combined Group)

– Amendments to IAS 32 *Offsetting Financial Assets and Financial Liabilities* (applicable on January 1, 2013 for the Combined Group)

– Amendments to IAS 12 *Deferred Tax—Recovery of Underlying Assets* (for annual periods beginning on January 1, 2013 for the Combined Group)

– Amendments to IFRS 1 *Severe Hyperinflation and Removal of Fixed Dates for First-Time Adopters* (applicable on January 1, 2013 for the Combined Group)

Management is currently assessing the potential impact of the application of these standards and amendments on the combined statement of income, the combined statement of financial position, the combined statement of cash flows and the content of the notes to the Combined Financial Statements but at this stage does not anticipate any material effect related to the application of these standards, interpretations and amendments.

The Combined Financial Statements have been prepared according to the historical cost principle, with the exception of certain assets and liabilities detailed below:

– derivative financial instruments measured at fair value;

– financial assets at fair value through profit and loss measured at fair value;

– available-for-sale financial assets measured at fair value.

2.2 Foreign Currency Translation Adjustments

The Combined Financial Statements are presented in euros, the functional and presentation currency of the Two Groups. All financial data are rounded to the nearest thousand of euro.

Foreign currency transactions are initially recorded in the functional currency at the exchange rate prevailing at the date of the transaction. At the closing date, monetary assets and liabilities denominated in a foreign currency are translated into the functional currency at the exchange rate prevailing on that date. All foreign currency differences are expensed. Non-monetary assets and liabilities that are

2 Significant accounting policies (Continued)

measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of initial transaction. All foreign currency differences are recognized in profit and loss.

2.3 Revenue

Revenue from the Combined Group's activities is mainly composed of:

- TV subscriptions (TV), broadband Internet, basic cable services, telephony and installations fees invoiced to residential and business clients.
- Data transmission and very high speed Internet services, telecommunications services, convergence and mobility solutions, invoiced to business clients.
- Network infrastructure-based services, including indefeasible rights of use (''IRUs'') arrangements or bandwidth capacity on our network, to other telecommunications operators and offer related maintenance services.

Revenue comprises the fair value of the consideration received or receivable for the sale of goods and services in the ordinary course of the Combined Group's activities. Revenue is shown net of value-added tax, returns, rebates and discounts and after eliminating intercompany sales between entities comprised in the scope of combination.

Revenue is recognized and presented as follows, in accordance with IAS 18 *Revenue* (IAS 18):

- Revenues from subscriptions for basic cable services, digital TV pay, internet and telephony are recognized on a straight-line basis over the subscription period; revenues from telephone calls are recognized when the service is rendered.
- When a promotion not related to a customer's past consumption and purchases (such as subscription rate discount, service free period) is offered to a customer in relation to a subscription, the Combined Group recognizes the total amount of billable revenue on a straight-line basis over the term of the contract provided that the Combined Group has the enforceable and contractual right to deliver the products after the promotional free month period to the customer. If a promotion is not related to the subscription for a contract including a non-cancellable period, the company recognizes revenues during the promotion period up to the consideration received or receivable, as the customer's continuance is not assured.
- Installation and set-up fees (including connection) for residential customers are accounted for as revenues when the service is rendered, if consideration received is lower than the sales direct costs to acquire the contractual relationship.
- Service access fees for business clients, when the access to the services is provided and they are associated to equipment or a service, are deferred and the revenue is recognized along the estimated client lifetime duration. They generally spread over the contractual engagement period.
- The revenue related to transmission capacity on terrestrial cables under IRUs arrangements are recognized on a straight-line basis over the life of the contract.

2.4 Deferred revenue

For certain arrangements entered into with its non-residential customers, the Combined Group receives up-front cash payments, namely in relation to indefeasible right of use arrangements and connection fees. For these arrangements, the revenue is generally recognized ratably over the term of the lease contract. Deferred revenue at the end of the reporting period represents unrecognized network lease revenue.

2 Significant accounting policies (Continued)

2.5 Operating income before depreciation and amortization

The Combined Group has included the subtotal ''Operating income before depreciation and amortization'' or ''EBITDA'' on the face of the combined statement of income because management believes that this subtotal is useful as it provides a measure of operating results that excludes non-cash elements such as depreciation and amortization, thus enhancing the predictive value of the financial statements.

Furthermore, EBITDA is an indicator used internally by management to measure the operational and financial results, to make decisions with respect to investments and allocation of resources, and to assess the performance of management personnel.

The subtotal EBITDA may not be comparable to similarly titled measures used by other entities. Further, this measure should not be considered as an alternative for operating income as the effects of depreciation, amortization and impairment, excluded from this measure do ultimately affect the operating results, which is also presented within the combined financial statements in accordance with IFRS 1.

2.6 Finance costs

Finance costs primarily comprise:

– interest charges and other expenses paid for financing operations recognized at amortized costs and changes in the fair value of interest rate derivative instruments that do not qualify as hedges according to IAS 39, which are classified in ''Interest relative to gross financial debt'' in the combined statements of income;

– interest income relating to cash and cash equivalents;

Impact of discounting provisions for retirement benefits is recognized in operating income in ''Staff costs and employee benefits expense'' with the related charges.

2.7 Segment information

IFRS 8 *Operating Segments* requires segment information to be presented on the same basis as the one used for internal reporting purposes. As the Combined Group intends to report on that basis in the future, the three following operating segments have been identified:

– B2C operations

– B2B operations

– Wholesale services

B2C operations

The Combined Group provides residential and business clients with TV subscriptions services, broadband Internet, basic cable services, telephony and installations fees.

B2B operations

The Combined Group provides business customers with a comprehensive service offering, which includes data transmission and very high speed Internet, telecommunications services, convergence and mobility solutions, through fiber and DSL networks.

Wholesale services

The Combined Group sells network infrastructure-based services, including IRUs or bandwidth capacity on its network, to other telecommunications operators and offer related maintenance services.

2 Significant accounting policies (Continued)

2.8 Income taxes

Income tax expense comprises current and deferred tax. Income tax expense is recognized in profit and loss except to the extent that it relates to items recognized directly in equity, in which case it is recognized in equity.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognized for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognized for the following temporary differences: (i) the initial recognition of goodwill, (ii) the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit, and (iii) investments in subsidiaries, branches and associates when the Combined Group is able to control the timing of the reversal of the temporary difference and when it is probable that the temporary difference will not reverse in the foreseeable future.

Accordingly, for companies included in the scope of combination, a deferred tax liability may be recognized in the amount of taxes payable on planned dividend distributions by these companies.

Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

Deferred taxes are reviewed at each reporting date to take into account changes in fiscal legislation and perspectives of recovering deductible temporary differences. A deferred tax asset is recognized to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilized in a predictable horizon.

2.9 Government grants and investment subsidies

Entities of the Combined Group may receive non-repayable government grants and investment subsidies in the form of direct or indirect funding of capital projects, mainly provided by local and regional authorities. These grants are deducted from the cost of the related assets and recognized in the combined statement of income, based on the pattern in which the related asset’s expected future economic benefits are consumed.

2.10 Goodwill and Business Combinations

Business combinations are accounted for in accordance with the purchase method. The acquiree’s identifiable assets, liabilities and contingent liabilities that meet the conditions for recognition under IFRS 3 are recognized at their fair value at acquisition date, except for non-current assets (or disposal groups) that are classified as held for sale in accordance with IFRS 5 *Non-current Assets Held for Sale and Discontinued Operations* (IFRS 5) and measured at the lower of their carrying amount and fair value less cost to sell.

The consideration transferred corresponds to the fair value, at the date of acquisition, of assets given, liabilities incurred or assumed, and equity instruments issued by the Combined Group in exchange for control of the acquiree. The goodwill arising from a business combination is equal to the difference between the sum of the consideration paid, the value of any non-controlling interest that remains outstanding after the business combination and, where applicable, the acquisition-date fair value of the

2 Significant accounting policies (Continued)

acquirer's previously-held equity interest in the target, minus the net of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed. This goodwill is recognized in assets in the combined statement of financial position. When the difference is negative, it is directly accounted in net income.

The secondary costs directly attributable to an acquisition giving the control are recorded in expenses in the period during which the costs are incurred, except for the borrowing costs which must be recorded according to standards IAS 32 *Financial Instruments: Presentation* (''**IAS 32**'') and IAS 39.

When goodwill is determined provisionally at the end of the period in which the combination is effected any adjustments to those provisional values within twelve months of the acquisition date are recognized in goodwill.

With respect to the acquisition of non-controlling interests (i.e. non-controlling interest in a subsidiary that is already included in the scope of combination), the Combined Group fully allocates the difference between the price paid and the share in net assets acquired to equity in accordance with IAS 27 (2008), with no revaluation of the assets and liabilities acquired.

Goodwill resulting from the acquisition of subsidiaries or joint ventures is presented separately in the Combined Statement of Financial Position. Impairment relative to this goodwill is presented on the line ''Depreciation and amortization'' of the Combined Statement of Income.

Goodwill resulting from the acquisition of associates is included in the book value of the participation. Impairment relative to this goodwill is presented on the line ''Share in net income (loss) of associates''.

Goodwill is not amortized but is subject to an impairment test whenever there is any indication that an asset may be impaired and at least once a year according to the methods and hypotheses described in Note 15.

After initial recording, goodwill is recorded at cost less recorded accumulated impairment losses.

2.11 Intangible assets

Recognition and measurement principles

Intangible assets are measured at cost less accumulated depreciation and accumulated impairment losses. Cost comprises all directly attributable costs necessary to buy, create, produce, and prepare the asset to be capable of operating. Intangible assets consist mainly of indefeasible rights of use, patents, acquired and internally generated software.

IRUs correspond to the right to use a portion of the capacity of a terrestrial or submarine transmission cable granted for a fixed period. IRUs are recognized as an asset when the Combined Group has the specific indefeasible right to use an identified portion of the underlying asset, generally optical fibers or dedicated wavelength bandwidth, and the duration of the right is for the major part of the underlying asset's economic life. They are depreciated over the shorter of the expected period of use and the life of the contract between 3 and 20 years.

Patents are amortized on a straight-line basis over the expected period of use, generally not exceeding 10 years.

Software is amortized on a straight-line basis over its expected useful life which generally does not exceed 3 years.

The cost of an internally generated intangible asset is the sum of personnel expenditures incurred from the date the intangible asset first meets the recognition criteria of IAS 38. An intangible asset arising from the development phase of an internal project shall be recognized if, and only if, an entity can demonstrate all of the following:

– the technical feasibility of completing the intangible asset so that it will be available for use or sale;

2 Significant accounting policies (Continued)

- its intention to complete the intangible asset and use or sell it;
- its ability to use or sell the intangible asset;
- how the intangible asset will generate probable future economic benefits;

  Among other things, the entity can demonstrate the existence of a market for the output of the intangible asset or the intangible asset itself or, if it is to be used internally, the usefulness of the intangible asset;
- the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset;
- its ability to measure reliably the expenditures attributable to the intangible asset during its development.

Capitalization of costs ceases when the project is finalized and the asset is available for use. The cost of an internally generated intangible asset arising from the development phase of an IT internal project is amortized on a straight-line basis over its expected useful life which generally does not exceed 3 years.

Conformity with agreements entered into with local authorities

To set up and operate its networks, the company has entered into various agreements with the local authorities and representative bodies under successive legal frameworks (French cable network plan, Freedom of Communication Act of 1986, etc.). Many of these agreements convey exclusive rights to the operator and also lay down obligations in terms of local television service provision, programming, pricing policy, and the associated license fees payable. Some of the agreements are public service concessions with ''return property'' clauses, whereby ownership of the technical plant and civil engineering work reverts to the local authorities at the end of the concession.

The EU Telecoms Directives of 2002, referred to as the ''Telecoms Package'', set forth the principle of open competition among operators in the telecommunications market, requiring national regulatory authorities to enforce fair competition conditions, without granting exclusive or special rights for setting up and operating networks. The French law of July 9, 2004, which transposed the Telecoms Package into French law, required existing agreements to be brought into compliance by the end of July 2007 at the latest, in order to remove all exclusive rights clauses and ensure the shared use of public civil engineering infrastructure.

The Combined Group believes that only a minority of the agreements entered into with the local authorities were classified as public service concessions when concluded and that IFRIC 12 does not apply, with the exception of the contract entered into in relation to the public service delegation arrangement with the department of Hauts-de-Seine (*Délégation de Service Public 92)*.

Service Concession agreement entered into with the department of Hauts-de-Seine

Sequalum, a subsidiary of the Combined Group, was selected in 2007 by the district of Hauts-de-Seine to plan, deploy and operate a Fiber To The Home (''FTTH'') very-high-speed fiber network throughout the district under a Délégation de Service Public (''DSP''), called DSP 92. A DSP is a form of public—private partnership under French law pursuant to which a public authority entrusts private entities to operate a public service in return for remuneration that is based on the results of operations of the service in question.

The terms of the service arrangement signed between Sequalum and the department of Hauts-de-Seine require Sequalum to construct the network—completing construction within 72 months—and maintain and operate the network to a specified standard for 25 years. At the end of the 25th year, the service arrangement will end.

2 Significant accounting policies (Continued)

Sequalum provides construction services to the department of Hauts-de-Seine in exchange for an intangible asset, ie a right to collect revenue from the network users. In accordance with IAS 38, Sequalum recognizes the intangible asset at cost, i.e. the fair value of consideration transferred to acquire the asset, which is the fair value of the consideration received or receivable for the construction services delivered.

Main characteristics of the agreement are:

Control and regulation of prices	Origin of the revenue	Subsidy granted by the grantor	Residual value	End of the agreement	Accounting model
Rates are defined in the service agreement	Users	€59 million subsidy to finance the construction	Network will be returned to the grantor with no indemnity, except for some assets (actifs de reprise)	Contract will end after 25 years	Intangible asset/financial receivable

2.12 Property, plant and equipment

Property, plant and equipment are measured at cost less accumulated depreciation and accumulated impairment losses.

Land is not depreciated. Buildings and premises are amortized on a straight-line basis over 20 years.

When property, plant and equipment include significant components with different useful lives, they are recorded and amortized separately. With respect to network and technical equipment, amortization and depreciation are calculated on a straight-line basis and the main amortization and depreciation periods are as follows:

Network and technical and equipment	Method	Duration
Network hubs	Straight line	10 to 15 years
Optical cables	Straight line	15 to 30 years
Engineering facilities	Straight line	20 to 40 years
Connections	Straight line	5 years
Digital terminals	Straight line	3 to 5 years
Furniture	Straight line	5 to 10 years
Fixtures and fittings	Straight line	8 to 10 years
Transport equipment	Straight line	2 to 5 years
Office equipment	Straight line	3 to 5 years
Computer equipment	Straight line	3 to 5 years

Gains or losses on disposal of property, plant and equipment are calculated as the difference between the profit from the disposal and the carrying amount of the asset and are recognized as other operating income or expenses.

2.13 Lease arrangements

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

2 Significant accounting policies (Continued)

The Combined Group as lessor

Amounts due from lessees under finance leases are recognized as receivables at the amount of the Combined Group's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Combined Group's net investment outstanding in respect of the leases.

Rental income from operating leases is recognized on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognized on a straight-line basis over the lease term.

The Combined Group as lessee

Assets held under finance leases are initially recognized as assets of the Combined Group at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation. Lease payments are apportioned between finance expenses and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance expenses are recognized immediately in profit or loss. Contingent rentals are recognized as expenses in the period in which they are incurred.

Operating lease payments are recognized as an expense on a straight-line basis over the lease term, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed. Contingent rentals arising under operating leases are recognized as an expense in the period in which they are incurred. In the event that lease incentives are received to enter into operating leases, such incentives are recognized as a liability. The aggregate benefit of incentives is recognized as a reduction of rental expense on a straight-line basis, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

2.14 Impairment of goodwill and non-current assets

Each time events or changes in the economic environment indicate a current risk of impairment of goodwill, or other intangible assets, property, plant and equipment and assets in progress, the Combined Group re-examines the value of these assets. In addition, goodwill, other indefinite life intangible assets and intangible assets in progress are all subject to an annual impairment test during the second semester of each fiscal year.

This test is performed in order to compare the recoverable amount of an asset or a Cash Generating Unit (''**CGU**'') to its carrying amount.

An asset's or CGU's recoverable amount is the higher of its fair value less costs to sell and its value in use. Recoverable amount is determined for each individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. In that case, recoverable amount is determined for the CGU to which the asset belongs. A CGU is the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or groups of assets, which are, for the Combined Group, ''B2C operations'', ''B2B operations'' and ''Wholesale services''

The value in use of each asset or group of assets is determined as the discounted value of future cash flows (discounted cash flow method or ''DCF'') by using a discount rate after tax specific to each asset or group of assets concerned.

The fair value less costs to sell is the amount obtainable from the sale of the asset or group of assets in an arm's length transaction between knowledgeable and willing parties, less costs to sell.

2 Significant accounting policies (Continued)

Where the carrying amount of an asset exceeds its recoverable amount, an impairment loss is recognized in the caption ''Depreciation and amortization'' in the statement of income. Only impairment loss recognized on assets other than goodwill such as depreciable intangible assets, intangible assets with indefinite useful life and property, plant and equipment may be reversed.

2.15 Financial assets

The Combined Group classifies financial assets in four categories: available-for-sale, loans and receivables, held-to-maturity and financial assets at fair value through profit and loss. They are classified as current assets and non-current assets according to IAS 1.

Purchases and sales of all financial assets are accounted for at the settlement date.

Available-for-sale financial assets

Available-for-sale financial assets are recognized initially at fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset. After initial recognition, they are reported at their fair value. Gains and losses arising from changes in their fair value are recognized directly in equity, until the security is disposed of or is determined to be impaired, at which time the cumulative gain or loss previously recognized in equity is included in the profit or loss for the period.

Available-for-sale financial assets consist mainly of shares in companies that are not included in the combination. Fair value corresponds to the quoted price for listed securities or, for non-listed securities, the group values financial assets at historical cost, less any impairment losses, when a reliable estimate of fair value cannot be made using valuation techniques in the absence of an active market.

When there is objective evidence that available-for-sale assets are impaired, the cumulative impairment loss included in equity is reclassified from equity to income. Objective evidence that an available-for-sale financial asset is impaired includes, among other things, a decrease in the estimated future cash flows arising from these assets, as a result of significant financial difficulty of the issuer, a material decrease in expected future profitability or a prolonged decrease in the fair value of the security. Impairment losses recognized in profit or loss for equity instruments classified as available-for-sale are never reversed through profit or loss.

Available-for-sale financial assets are included in non-current asset unless management intends to dispose of the investment within 12 months of the statements of position date.

Loans and receivables

Loans and receivables are recognized initially at fair value plus transaction costs that are directly attributable to the acquisition. After initial recognition, they are measured at amortized cost using the effective interest rate method.

This category mainly includes trade receivables.

If there is objective evidence that an impairment loss has been incurred, the amount of this loss, measured as the difference between the financial asset's carrying value and its recoverable amount is recognized in profit or loss. Impairment losses may be reversed if the recoverable amount of the asset subsequently increases in the future.

Held-to-maturity financial assets

Held-to-maturity financial assets are financial assets with fixed or determinable payments and fixed maturity that the Combined Group has a positive intent and ability to hold to maturity. Financial assets that are designated as held-to-maturity are measured at amortized cost, using the effective interest rate method.

2 Significant accounting policies (Continued)

They are reviewed for impairment on an individual basis if there is any indication they may be impaired. The Combined Group does not classify any financial asset in this category.

Financial assets measured at fair value through profit or loss

These financial assets are measured at fair value with gains and losses recorded as financial income or expenses.

This category mainly includes:

- assets held for trading which the Combined Group intends to sell in the near future (primarily marketable securities);
- assets voluntarily classified at inception in this category;
- derivative financial assets.

2.16 Inventories

Inventories, mainly set-top boxes, other 'TV boxes' and technical equipment, are stated at the lower of cost and net realizable value. Cost is determined using the weighted-average method and includes expenditures incurred in acquiring the inventories.

Net realizable value is the estimated selling price in the ordinary course of business, less the estimated selling expenses.

2.17 Cash and cash equivalents

Cash consists of cash in banks and deposits.

Cash equivalents consist of highly liquid investments not subject to significant changes in value and with an original maturity date of generally less than three months from the time of purchase.

2.18 Financial Liabilities

Financial liabilities other than derivative instruments include borrowings under the Senior Facility Agreement (''**SFA**''), debt related to finance leases, guarantee deposits, advances received, bank overdrafts.

These financial liabilities are measured at amortized cost calculated based on the effective interest rate method according to IAS 39. The effective interest rate is the internal yield rate that exactly discounts future cash flows through the term of the financial liability. Fees, debt issuance and transaction costs are included in the calculation of the effective interest rate over the expected life of the instrument. The accrued interests are included in ''Current portion of financial liabilities'' in the statement of financial position.

2.19 Derivatives

Derivatives are initially recognized at fair value on the date a derivative contract is entered into and are subsequently remeasured at their fair value.

The Combined Group enters into interest rate swaps and caps to manage its interest rate exposure. The objective is to convert variable interest rate financial instruments into fix interest rate financial instruments. These contracts do not qualify as hedges for accounting purposes according to IAS 39, as there was no formal designation and documentation of the hedging relationship at inception. Changes in the fair value of any these derivative instruments are recognized immediately in the statement of income within financial income and expenses.

2 Significant accounting policies (Continued)

2.20 Employee benefits, provisions and contingent liabilities

Provisions are recognized when the Combined Group has a legal obligation (legal, regulatory or contractual) or a constructive obligation, as a result of past events, and it is probable that economic benefits in the form of outflow of resources will be required to settle the obligation and the obligation can be reliably estimated. Provisions shall be reviewed at the end of each reporting period and adjusted to reflect the current best estimate.

A contingent liability is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity, or a present obligation that arises from past events but is not recognized because it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation or the amount of the obligation cannot be measured with sufficient reliability. A contingent liability is not recognized, but disclosed.

Employee benefits

The Combined Group participates in employee benefit plans through defined contribution plans, and defined benefit plans. The Combined Group accounts for pension costs related to defined contribution plans as they are incurred within personnel expenses in the statement of income.

Estimates of the Combined Group's pension and end-of-service benefit obligations are calculated annually, in accordance with the provisions of IAS 19 *Employee Benefits* (IAS 19), with the assistance of independent actuaries, using the projected unit credit method and considering actuarial assumptions including the probable turn-over of beneficiaries, salary increases, the expected average life span, the probable future length of the employees' service and an appropriate discount rate updated annually.

Actuarial gains and losses arising from experience, adjustments and changes in actuarial assumptions are recognized in profit and loss when they are incurred.

Litigations

The amount of provisions for litigation is based on the Combined Group's assessment of the level of risk and depends on its assessment of the basis for the claims.

Restructuring

Provisions for restructuring costs are recognized when the restructuring plans have been finalized and approved by the Combined Group's management, and when the Combined Group has raised a valid expectation, that it will carry out the plan either by starting to implement the plan or announcing its main features to employees affected by it. These provisions only include direct expenditures arising from the restructuring, notably severance payments, early retirement costs, costs for notice periods not worked and other costs directly linked with the closure of the facilities.

2.21 Borrowing costs

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized as part of the cost of that asset. According to the Combined Group, it does not take a substantial amount of time to get ready for the intended use because of the incremental deployment of the network. IAS 23 *Borrowing Costs* has consequently no impact on the Combined Financial Statements.

3 Critical accounting judgements and key sources of estimation uncertainty

The preparation of the Combined Financial Statements in accordance with IFRS implies that the Group makes a certain number of estimates and assumptions that are realistic and reasonable.

3 Critical accounting judgements and key sources of estimation uncertainty (Continued)

In applying accounting policies during the preparation of the Combined Financial Statements, which are described in Note 2, management is required to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses.

Such estimates are prepared based on the going concern assumption, established using currently available information and the current economic environment. In the actual economic environment, changes in facts and circumstances may result in revised estimates or assumptions, which could affect the financial position, results of operations and cash flows of the Group.

The preparation of these financial statements require management to make estimates and assumptions. Items subject to such estimates and assumptions mainly include:

- *Revenue recognition:* As indicated in Note 2.3, revenue under IAS 18 is measured at the fair value of the consideration received or to be received when the Combined Group has transferred the significant risks and rewards of ownership of a product to the buyer or when service is rendered. With respect to contracts that includes installation, connection and set-up fees for residential customers, significant judgment is required to determine whether the recognition criteria set forth in IAS 18 should be applied separately and whether installation, set-up and connection should be considered a separable service. With respect to service access fees for business clients, management estimates the statistical client lifetime duration and generally recognizes revenue ratably over the contractual engagement period, which is estimated at the inception of the arrangement based on historical information. Accordingly, depending upon how judgment is exercised and how estimates are determined, the timing and amount of revenue recognized could differ significantly.
- *Capitalization of development costs:* the criteria for capitalizing development costs are set out in Note 2.11. Once capitalized, these costs are amortized over the estimated useful lives of the respective products (generally 3 years). The Combined Group must therefore evaluate the commercial and technical feasibility of these development projects and estimate the useful lives of the products resulting from the projects. Should a product fail to substantiate these assumptions, the Combined Group may be required to impair or write off some of the capitalized development costs in the future. Note 13 provides information on the amount of capitalized costs in the combined statement of financial position.
- *Fair value of financial instruments* (see Note 27.3): fair value is determined by reference to the published market price at period end. For financial instruments for which there is no published market price in an active market such as the interest-rate swaps, which the Combined Group currently uses to hedge its interest rate risk, fair value is then estimated based on models that rely on market observable data or by the use of various valuation techniques, such as present value of future cash flows.
- *Recognition of deferred tax assets on unrealized tax loss carryforward* (see Notes 2.8 and 11): deferred tax assets relate primarily to tax loss carryforwards and to deductible temporary differences between reported amounts and the tax bases of assets and liabilities. The assets relating to the tax loss carryforwards are recognized if it is probable that the Combined Group will generate future taxable profits against which these tax losses can be set off. Evaluation of the Group's capacity to utilize tax loss carry-forwards relies on significant judgment. The Combined Group analyzes past events, and the positive and negative elements of certain economic factors that may affect its business in the foreseeable future to determine the probability of its future utilization of these tax loss carryforwards. As of December 31, 2012, 2011 and 2010, in evaluating whether deferred tax assets should be recognized, management considered the weight of one form of negative evidence being a significant amount of cumulative losses in recent years and concluded that it is not probable that future taxable profit will be available against which the unused tax loss carryforward can be utilized. The application of this recognition principle has not resulted in any deferred tax asset recognized as at December 31, 2012, 2011 and 2010.

3 Critical accounting judgements and key sources of estimation uncertainty (Continued)

- *Impairment tests* (see Notes 2.10 and 15): the determination of recoverable amounts of the CGUs assessed in the annual impairment test requires an estimate of their fair value net of disposal costs as well as their value in use. The assessment of the value in use requires assumptions to be made with respect to the operating cash flows of the CGUs as well as the discount rates.

  The determination of the value in use is based on assumptions such as the weighted average cost of capital and the growth rate beyond the projection period. These assumptions can vary, which may result in the recoverable amount to decrease below the carrying amount, and therefore, to the recognition of an impairment charge.

  As of December 31, 2012, 2011 and 2010, the assumptions used to determine the value in use of the CGUs for which goodwill is allocated were as follows:

CGU ''B2C operations''	2012	2011	2010
Length of projection period	8 years	8 years	8 years
Weighted average cost of capital	7.56%	8.18%	8.02%
Growth rate beyond projection period for terminal value	1.75%	1.75%	1.50%

CGU ''B2B operations'' and ''Wholesale''	2012	2011	2010
Length of projection period	6 years	6 years	6 years
Weighted average cost of capital	9.42%	10.25%	9.77%
Growth rate beyond projection period for terminal value	1.00%	1.00%	1.00%

  The determination of the value in use has been determined by using cash flow projections based on financial budgets approved by senior management covering a planning period of respectively 6 and 8 years. The relatively long projection period for estimating future cash flows is justified by the long contractual relationship with the customers. The projections of subscribers, revenue, costs, and capital expenditures are based on reasonable and supportable assumptions that represent management's best estimates. Key assumptions are the estimated number of subscribers and the level of upgraded network infrastructure. The projections are based on both past experience and expected future market penetration with the various products.

4 Significant events for the period

4.1 Year ended December 31, 2012

4.1.1 Bond Issuances

In 2012, Ypso France SAS issued several bonds in order to refinance part of its existing financial debt.

In February 2012, Ypso France SAS issued a €360 million bond. The issuer was Numericable Finance & Co. S.C.A. (an unregulated securitization company in the form of a corporate partnership limited by shares incorporated under the laws of the Grand Duchy of Luxembourg). The proceeds from the notes have been used by Numericable Finance & Co. to fund a buy-back of 100% of the Lending Bank's (JP Morgan) participation in a loan (the ''C-One'' Facility Loan) whose sole lender was the bank itself under the Senior Facility Agreement to Ypso France SAS and which allowed Ypso France SAS to reimburse certain facilities under the SFA for €350 million.

The notes mature on February 15, 2019 and bear interest of 12.375%. Interests on the notes are paid semiannually on February 15 and August 15 of each year.

In February 2012, Ypso France SAS also obtained a new Revolving Credit Facility under the SFA for which the maximum amount that can be drawn is €65 million (''Revolving Credit Facility''). The revolving Credit Facility matures in March 2016. The used amount under this facility bears interest equal to Euribor plus 4.5%. The unused amount under this facility, which amounts to €65 million as of December 31, 2012, bears interest equal to a commitment fee of 2.25%.

4 Significant events for the period (Continued)

According to the terms of the September 2011 Senior Facility Amendment and Restatement, maturities of certain lenders' commitments were extended by two years (comprising 50% of A and Capex Facilities and 2/3rd of B & C Facilities). Along with the extension of the maturities, the September 2011 Senior Facility Amendment and Restatement changed the margin level for the extended tranches and put a new set of financial covenants in place. The September 2011 Senior Facility Amendment and Restatement became effective on February 15th, 2012.

In October 2012, Ypso France SAS issued two other bonds for respectively €225 million and €275 million through the same issuer, Numericable Finance & Co. S.C.A. The proceeds from the notes have been used by Numericable Finance & Co. to fund a buy-back of 100% of the Lending Bank's (JP Morgan) participation in two new loans, the ''C-Two A Facility Loan'' and the ''C-Two B facility Loan'', whose sole lender was the Lending Bank itself under the Senior Facility Agreement to Ypso France SAS and which allowed Ypso France SAS to reimburse certain facilities under the SFA for €490 million.

The ''C-Two A facility'' amounts to €225 million. It matures on February 15, 2019 and bears a fixed interest rate of 8.75% per annum. Interests are paid semiannually on February 15 and August 15 of each year, commencing on February 15, 2013.

The ''C-Two B facility'' amount to €275 million. It matures in October 2018 and bears a floating interest rate equal to three-month EURIBOR plus 7.85% per annum. Interests are paid quarterly on January 15, April 15, July 15 and October 15 of each year, commencing on January 15, 2013.

Ypso France SAS paid €55 million in fees in connection with the implementation of these new facilities (C-One Facility, C-Two A Facility and C-Two B Facility) and the relative amendments to the Senior Facility Agreement. This amount includes:

- Bond issuance costs of €30.2 million which are amortized over the length of the notes using the effective interest rate method (this represents an additional finance cost of €3.8 million in 2012 as disclosed in Note 10);
- Waiver fees of €17.4 million which are recorded in ''Other financial expense'' in the combined statement of income for the period ended December 31, 2012;
- Advisory fees of €7.4 million which are recorded in ''Other operating expenses'' in the combined statement of income for the period ended December 31, 2012.

4.1.2 Purchase of the network of Nice

In April 2012, the Combined Group signed an agreement with the city of Nice in order to purchase the cable network of Nice for a value of €20 million.

The purchase price repayment is scheduled as follows:

- €2.5 million were paid in July 2012 and €2.5 million in January 2013;
- The remaining €15 million are payable over 20 years (€0.75 million each year from 2013 to 2032) with interest of 4%.

4.1.3 Tax audits

During the third quarter of 2012, the tax audits mentioned in Note 11.5 have been extended to fiscal year 2010. In the meantime, tax penalties related to the fiscal years 2005 to 2009 have been reduced.

As of December 31, 2012, the amount of provision recognized in relation to these tax audits has not been adjusted as management believes that the financial risk related to penalties for fiscal year 2010 will represent the same amount as the reductions notified by the administration concerning the penalties for fiscal years 2005 to 2009.

4 Significant events for the period (Continued)

4.2 Year ended December 31, 2011

4.2.1 Disposal of Coditel Belgium and Coditel Luxembourg

In 2010, the management of Ypso France engaged in the sale of two subsidiaries: Coditel Belgium and Coditel Luxembourg. On May 19, 2011, the Group thus entered into a share purchase agreement with Altice, Deficom and Apax Partners to dispose of its activities in Belgium and Luxembourg. As a result, all of the outstanding shares in Coditel Belgium and Coditel Luxembourg were transferred on June 30, 2011 to Coditel Holding S.A., an entity based in Luxembourg, owned by Altice, Deficom and Apax MidMarket upon completion of the transaction. The proceeds from the sale of Coditel amounted to approximately €369 million.

In accordance with IFRS 5:

- the results of Coditel Belgium and Coditel Luxembourg are presented separately in the statements of income under ''Net income resulting from discontinued operations'' for all the periods presented;
- the cash flows from Coditel Belgium and Coditel Luxembourg are presented separately in the 2010 and 2011 statements of cash flows under ''Net cash flow from discontinued operations'' for all the periods presented.

The impact of the application of IFRS 5 is further detailed in Note 30.

4.2.2 Restructuring

In 2011, the merger between Altitude Telecom and Completel SAS led to a restructuring plan involving approximately 135 persons.

The costs related to this plan amounted to €4 million in 2011 and an additional provision of €4 million was recorded at December 31, 2011 in order to face all the expenses that the Combined Group planned to bear in 2012.

4.3 Year ended December 31, 2010

4.3.1 Purchase of Altitude Telecom

On December 29, 2010, the Combined Group acquired 100% of the shares of Altitude Telecom, a network operator mainly located in the West of France. The price of the transaction was approximately €58 million and was mainly financed through a new debt under the SFA, the ''C Facility'', for an amount of €45 million.

This operation generated an additional goodwill of €49 million in 2010.

4.3.2 Tax audits

As explained in Note 11.5, certain subsidiaries of the Combined Group (Ypso France SAS, NC Numericable SAS, Numericable SAS, Est Videocommunication and Completel SAS) are subject to tax audits by the French tax authorities.

In 2010, these tax audits have been extended from December 31, 2007 to December 31, 2009.

5 Segment information

As explained in Note 2.7, the Combined Group identified three operating segments which are:

- B2B operations
- B2C operations
- Wholesale services

5 Segment information (Continued)

The following tables provide, for each period presented, the contribution of each segment to the Combined Statements of Income (from ''Revenue'' to ''Operating income before depreciation and amortization'').

Intra-segments sales have been eliminated under the column ''Eliminations''.

FY 2012	B2C	B2B	Wholesale	Eliminations	FY 2012 Total
	(in thousands of euros)				
Revenue	**832,568**	**324, 506**	**211,476**	**(66,125)**	**1,302,425**
Purchases and subcontracting services	(386,060)	(178,420)	(103,766)	66,125	(602,121)
Staff costs and employee benefits expense	(77,592)	(57,186)	(6,697)	—	(141,475)
Taxes and duties	(19,902)	(7,569)	(4,926)	—	(32,396)
Provisions	(5,658)	(1,676)	(380)	—	(7,715)
Other operating income	68,096	21,108	26	—	89,229

6 Revenue

Revenue by nature breaks down as follows:

	Years Ended December 31,		
	2012	2011	2010
	(in thousands of euros)		
B2C revenues	826,171	830,299	832,566
B2B revenues	323,201	328,235	252,573
Wholesale revenues	153,053	148,323	123,556
Total revenues	**1,302,425**	**1,306,856**	**1,208,695**

7 Purchases and subcontracting services

Purchases and subcontracting services are primarily comprised of the following:

	December 31, 2012	December 31, 2011	December 31, 2010
	(in thousands of euros)		
TV Content, Internet and Telephony costs	(332,853)	(345,603)	(324,751)
Outsourcing and purchased services	(90,752)	(91,908)	(70,129)
Advertising fees	(30,120)	(30,993)	(22,197)
Fees paid to other third parties	(31,936)	(31,962)	(31,619)
Royalties and license fees paid	(12,089)	(12,810)	(14,031)
Rights of way paid	(15,316)	(15,983)	(14,241)
Rental and leasehold charges	(25,790)	(26,224)	(20,900)
Energy	(23,938)	(22,789)	(19,868)
Bad debt expense	(9,173)	(10,048)	(9,993)
Postal expenses	(4,378)	(4,676)	(5,158)
Transportation expenses	(4,286)	(4,643)	(3,155)
Repair and maintenance expenses	(11,911)	(13,321)	(10,577)
Miscellaneous operating expense	(9,579)	(10,736)	(11,184)
Purchases and subcontracting services	**(602,121)**	**(621,696)**	**(557,803)**

8 Other operating income

Other operating income is primarily comprised of the following:

	December 31, 2012	December 31, 2011	December 31, 2010
	(in thousands of euros)		
Own work capitalized[a]	82,217	64,002	52,537
Proceeds from sale of assets	3,817	5,042	8,142
Other[b]	3,195	11,368	3,645
Other operating income	**89,229**	**80,412**	**64,324**

(a) Own work capitalized relates to network projects staffed by in-house employees resulting from increased upgrade activity of the cable footprint.

(b) In 2011, a fine of €10 million was paid by France Telecom as a result of a civil action enforced by the Court of Paris in March 2011 due to restrictive trade practices on the ADSL market in 2001 and 2002.

9 Other operating expenses

Other operating expenses are primarily comprised of the following:

	December 31, 2012	December 31, 2011	December 31, 2010
	(in thousands of euros)		
Net book value of assets sold	(7,382)	(10,003)	(11,500)
Fees paid in connection with refinancing	(7,372)	(3,526)	(1,050)
Management fees paid to our shareholders	(2,424)	(11,509)	(14,651)
Miscellaneous operating expense	—	(39)	(133)
Other operating expense	**(17,178)**	**(25,077)**	**(27,334)**

Management fees have been paid to our shareholders, Altice, Cinven and Carlyle, in relation to certain management, financing and advisory services provided.

10 Finance costs, net

Finance costs, net as of December 31, 2012, December 31, 2011 and 2010 can be analyzed as follows:

	December 31, 2012	December 31, 2011	December 31, 2010
	(in thousands of euros)		
Interest income received on cash and cash equivalents	106	479	635
Other interest income	4,220	729	173
Interest Income	**4,326**	**1,208**	**808**
Change in fair value of interest rate derivatives	—	26,982	48,468
Interest expense on financing determined using the effective interest rate	(183,057)	(204,326)	(223,530)
Interest relative to gross financial debt	**(183,057)**	**(177,343)**	**(175,062)**
Other financial expenses	(32,699)	(9,883)	(4,162)
Finance costs, net	**(211,430)**	**(186,019)**	**(178,416)**

As of December 31, 2012, other financial expenses mainly included:

– Waiver fees of €17.4 million paid in connection with the refinancing of the debt;

– Amortization expense of €3.8 million calculated using the effective interest method related to fees paid in connection with the implementation of the new facilities (C-One Facility, C-Two A Facility and C-Two B Facility).

– Provisions for financial risks of €1.9 million.

As of December 31, 2012, other interest income mainly includes a first payment of €2.8 million received regarding the Claim with Lehman Brothers following the bankruptcy of Lehman Brothers in September 2008 (see Note 27.3).

11 Income tax

11.1 Income tax expense

Income tax expense is comprised of the following:

	December 31, 2012	December 31, 2011	December 31, 2010
	(in thousands of euros)		
Current income tax expense	(2,486)	(13,387)	(3,841)
Deferred income tax expense	—	—	—
Income tax expense	**(2,486)**	**(13,387)**	**(3,841)**

11.2 Reconciliation between the effective tax rate and the theoretical tax rate

	December 31, 2012	December 31, 2011	December 31, 2010
	(in thousands of euros)		
Net income (loss) before tax	87,416	82,385	30,401
Less: Share in net income (loss) of equity affiliates	199	309	(368)
	87,615	82,694	30,033
Corporate tax rate in France	34.43%	34.43%	34.43%
Income tax expense calculated at 34.43%	**(30,166)**	**(28,471)**	**(10,340)**
Reconciliation of income tax expense			
Effect of revenue that is exempt from taxation and effect of expenses that are not deductible in determining taxable profit(1)	(13,830)	(8,696)	24,724
Effect of unused tax losses and tax offsets not recognized as deferred tax assets	41,083	23,731	(18,438)
Research tax credit (commonly known as the ''CIR'')	420	54	322
Effect of other differences	8	(3)	(107)
Income tax expense recognized in profit or loss	**(2,486)**	**(13,387)**	**(3,840)**
Effective tax rate(2)	2.84%	16.19%	12.79%

(1) For fiscal year 2012, amount mainly represents non-deductible interest expenses of €9.9 million as a result of the thin capitalization rules.

(2) The decrease in the effective tax rate from fiscal year 2011 to fiscal year 2012 is mainly due to the increase in the provision for tax audits (see Note 11.5) in 2011 of €10 million being recorded in income tax expense.

The tax rate used for the 2012, 2011 and 2010 reconciliations above is the corporate tax rate of 34.43% payable by corporate entities in France on taxable profits under tax law in that jurisdiction.

11.3 Current tax assets and liabilities

Tax refund receivables were not material as of December 31, 2012, December 31, 2011 and 2010.

The income tax payable is classified in ''Current tax liabilities'' and amounts to €2,604 thousand, €3,448 thousand and €194 thousand as of December 31, 2012, 2011 and 2010 respectively.

11 Income tax (Continued)

11.4 Unrecognized deferred tax assets

Aggregate unused loss carryforwards at December 31, 2012 amounted to €2,302 million representing a tax asset of €790 million. The tax asset for loss carryforwards was not recognized in the financial statements as its recovery depends on future earnings, which are uncertain.

The total net tax loss carryforward breaks down as follows:

	December 31, 2012	December 31, 2011	December 31, 2010
	(in thousands of euros)		
Ypso France and its subsidiaries	1,852,028	1,846,090	1,819,782
Altice B2B France and its subsidiaries	402,544	448,713	492,449
Ypso Holding Lux and Altice B2B Lux	47,785	235,890	235,328
Total tax loss carryforwards	**2,302,357**	**2,530,693**	**2,547,559**
Unrecognized deferred tax assets	**790,212**	**859,028**	**864,864**

Total tax loss carryforward includes a loss contested by the tax authorities (€56 million as of December 31, 2012).

11.5 Tax audits

Certain subsidiaries of the Combined Group, Ypso France SAS, NC Numericable SAS, Numericable SAS, Est Videocommunication and Completel SAS are subject to a tax audit by the French tax authorities for fiscal years ended from December 31, 2007 to December 31, 2010. As a result, a tax contingency for an amount of €25.1 million is recognized as of December 31, 2012 (€27 million as of December 31, 2011 and €15.7 as of December 31, 2010).

12 Goodwill

	December 31, 2012	December 31, 2011	December 31, 2010
	(in thousands of euros)		
Carrying amount, net:			
Balance as of the beginning of the year	1,458,638	1,458,585	1,618,485
Additional goodwill recognized during the period(1)	48	53	50,295
Disposal of Coditel	—	—	(210,195)
Balance as of the end of the year(2)	**1,458,686**	**1,458,638**	**1,458,585**

(1) In 2010, the additional goodwill of €50.3 million is mainly due to the acquisition of Altitude Telecom (as disclosed in the significant events) for €49.4 million.

(2) In January 2012, the Group acquired the shares of Sequalum Participation that were held by Eiffage (15.78%). After this operation, the Group owned 95% of Sequalum Participation. The purchase price was €6 thousand for a negative equity value of (€41) thousand. Thus, this operation resulted in the recognition of an additional goodwill of €48 thousand.

The Combined Group is the result of a series of acquisitions.

12 Goodwill (Continued)

As at December 31, 2012, goodwill breaks down as follows:

	Net book value (in thousands of euros)
B2C Operations	984,583
B2B Operations	474,103
Total	**1,458,686**

13 Other intangible assets

	Capitalized development costs	Usage rights, patents and licenses	Commercial rights	Other intangible assets	Total
		(in thousands of euros)

13 Other intangible assets (Continued)

Usage rights represent the majority of the ''usage rights, patents and licenses'' balances. They reflect the rights to use the civil engineering installations and infrastructure built by the historical operator, France Telecom.

The application of this principle had the following impacts on the 2012 combined statement of financial position:

– Recognition of the net book value of €17.2 million classified in ''Other intangible assets'' (€26.6 million of investments less €9.5 million of grants received at December 31, 2011);

– Recognition of €26.4 million of capital expenditures in 2012 in ''Usage rights, patents and licenses'' (€38.0 million of investments less €11.5 million of grants received in 2012).

In addition, €26.4 million of capital expenditures have been incurred in relation to the public service delegation arrangement with the department of Hauts-de-Seine (Délégation de Service Public 92) and are classified in investing activities in the combined statements of cash flows.

	39,689	**34,213**	**27,604**

15 Impairment test

15.1 Allocation of goodwill to the cash-generating units ("CGU")

In accordance with IAS 36 *Impairment of assets* ("**IAS 36**"), goodwill has been allocated to two CGUs. The first CGU, "B2C operations" includes the operational subsidiaries from the Ypso group, namely Numericable, NC Numericable and Est Videocommunication. The second CGU, "B2B operations", corresponds to the main operating entity of the Altice group, Completel SAS.

15.2 Key assumptions used to determine the recoverable amount of the CGUs

The impairment test of goodwill is done based on the respective cash generating units defined above. In accordance with IAS 36 *Impairment of Assets*, the impairment test is performed by comparing the

15 Impairment test (Continued)

carrying amount with the recoverable amount. The recoverable amount is determined based on the value in use using a discounted cash flow approach.

The determination of the value in use has been established by using cash flow projections based on financial budgets approved by senior management covering a planning period of respectively 8 years (CGU B2C) and 6 years (CGU B2B). The relatively long projection period for estimating future cash flows is justified by the long contractual relationship with the customers.

The projections of subscribers, revenue, costs, and capital expenditures are based on reasonable and supportable assumptions that represent management's best estimates. Key assumptions are the estimated number of subscribers and the level of upgraded network infrastructure. The projections are based on both past experience and expected future market penetration with the various products.

As mentioned in Note 3, the determination of the value in use is based on assumptions such as the weighted average cost of capital and the growth rate beyond the projection period. These assumptions can vary, which may result in the recoverable amount to decrease below the carrying amount, and therefore to the recognition of an impairment charge.

No impairment has been recognized for any of the periods presented.

The determination of the value in use is based on the following estimates as of December 31, 2012, 2011 and 2010:

CGU "B2C operations"	2012	2011	2010
Length of projection period	8 years	8 years	8 years
Discount rate applied to the cash flow projections	7.56%	8.18%	8.02%
Growth rate beyond ("GTP") projection period for terminal value	1.75%	1.75%	1.50%

In terms of sensitivity of recoverable amounts, a change of plus or minus 0.25% in the discount rate would decrease or increase the recoverable amount by approximately €145 million. Likewise, a change of plus or minus 0.25% in the GTP rate would increase or decrease the recoverable amount by approximately €100 million.

As of December 31, 2012, the amounts by which the key assumptions would have to change for the change to result in the recoverable amount equaling the carrying amount are as follows:

- WACC increase from 7.56% to 10.60%;
- GTP rate decrease point from 1.75% to −3.62%;
- Gross margin fall by 10.1% from an average gross margin of 49.4% to an average gross margin of 39.3%.

CGU "B2B operations"	2012	2011	2010
Length of projection period	6 years	6 years	6 years
Discount rate applied to the cash flow projections	9.42%	10.25%	9.77%
Growth rate beyond projection period for terminal value	1.00%	1.00%	1.00%

In terms of sensitivity of recoverable amounts, a change of plus or minus 0.25% in the discount rate would decrease or increase the recoverable amount by roughly €60 million. Likewise, a change of plus or minus 0.25% in the GTP rate would increase or decrease the recoverable amount by approximately €40 million.

As at December 31, 2012, the amounts by which the key assumptions would have to change where the change would result in the recoverable amount equaling the carrying amount are as follows:

- WACC increase from 9.42% to 18.75%;

15 Impairment test (Continued)

- GTP rate decrease from 1% to −26.25%;
- Gross margin fall from an average gross margin of 38.9% to an average gross margin of 24.4%.

16 Investment in associates

The Combined Group exercises significant influence over Alsace Connexia Participation, an associate accounted for under the equity method of accounting. Alsace Connexia Participation was initially owned 38.14% by Ypso France, 38.15% by LD Collectivités and 23.71% by Sogetrel Réseaux. In 2009, LD Collectivités bought the equity interest held by Sogetrel Réseaux and now holds a controlling interest (61.86%) in Alsace Connexia Participation.

Alsace Connexia Participation owns a 70% stake in Alsace Connexia, which has been granted a public service concession by the regional authority of Alsace to design, build, fund, operate and market telecommunications infrastructure in the region over a 15-year period. The concession contract took effect on February 3, 2005.

The following tables provide information on the net assets and operating results of Alsace Connexia Participation:

	December 31, 2012	December 31, 2011	December 31, 2010
	(in thousands of euros)		
Net assets	8,888	9,413	10,227
Share of net assets of Ypso France SAS	3,378	3,577	3,886

	December 31, 2012	December 31, 2011	December 31, 2010
	(in thousands of euros)		
Turnover (Alsace Connexia)	13,050	12,027	12,674
Net income (loss)	(524)	(815)	968
Share of net income (loss) of Ypso France SAS	(199)	(310)	368

17 Other current and non-current financial assets

	Current			Non-current		
	December 31, 2012	December 31, 2011	December 31, 2010	December 31, 2012	December 31, 2011	December 31, 2010
	(in thousands of euros)					
Interest-rate derivatives	—	—	—	5	313	2,380
Investments in entities that are not comprised in the combination classified as available-for-sale	—	—	—	35	52	71
Other financial assets	4,034	42	249	6,791	7,396	4,920
Total financial assets	**4,034**	**42**	**249**	**6,831**	**7,761**	**7,371**

As disclosed in Note 27.3, the Combined Group enters into interest rate caps to manage its interest rate exposure but these derivatives do not qualify as hedges for accounting purposes according to IAS 39. Accordingly, changes in the fair value of any of these derivative instruments are recognized immediately

17 Other current and non-current financial assets (Continued)

in the statement of income as part of finance costs, net as these interest-rate derivatives are directly related to the application of our interest rate risk management policy even though they do not qualify for hedge accounting under IAS 39.

Such interest-rate derivatives are presented as non-current financial assets because they are not held primarily for trading purposes, designated under a non-qualifying hedge accounting relationship.

In 2009, the Combined Group entered into interest rate options, referred to as caps in order to compensate if interest rates rise above a predetermined rate (strike rate). Caps are measured at their fair values and classified as a non-current financial asset for €5 thousand as of December 31, 2012 and €313 thousand as of December 31, 2011.

The investments in entities not comprised in the combination and classified as available-for-sale financial assets are related to equity interests held by the Combined Group in entities not comprised in the combination such as Cable Toulousain de Videocom, Médiamétrie Expansion, Rennes Cité Média and TV7 Bordeaux. These companies are not included in the combination due to the Combined Group's lack of control or influence over them.

As at December 31, 2012, other financial assets include €4 million of cash pledged in the context of the DSP 92 (see Note 2.11). Remaining amounts correspond to deposits made by the group (building leases, ...).

18 Inventories

	December 31, 2012	December 31, 2011	December 31, 2010
	(in thousands of euros)		
Gross value	46,808	40,033	35,035
Valuation allowance	(1,199)	(1,035)	(1,035)
Net book value	**45,609**	**38,998**	**33,843**

Inventories are primarily comprised of set-top boxes used to receive programming distributed via digital channels. The amount of inventory write-downs to net realizable value recognized is immaterial for 2012, 2011 and 2010.

19 Trade receivables and other receivables

	December 31, 2012	December 31, 2011	December 31, 2010
	(in thousands of euros)		
Trade receivables	272,864	248,239	242,379
Valuation allowance	(27,167)	(26,770)	(33,069)
Trade receivables, net	**245,697**	**221,469**	**209,310**
Advances and down payments	2,211	2,090	4,691
Current accounts receivable	50	50	2,075
Tax and social security receivables	141,806	117,961	117,358
Prepaid expenses	18,025	8,155	9,019
Other current receivables	9,582	13,256	14,637
Trade receivables and other receivables, net	**417,371**	**362,981**	**357,090**

Trade receivables disclosed above are classified as loans and receivables and are therefore measured at amortized cost. Due to their short-term maturity, fair value and amortized cost approximate the

19 Trade receivables and other receivables (Continued)

nominal amount of trade receivables. Trade receivables are primarily from our B2C customers, a large number of customers, spread across diverse geographical areas.

B2C Customers

The average credit term for residential customers is 5 days. No interest is charged on outstanding balances. As of December 31, 2012, the Combined Group has reserved 81% of the B2C customers receivables that were over 90 days past due. This reserve was estimated considering that historically only 19% of receivables that are over 90 days past due are recoverable. Allowances for doubtful accounts are recognized against trade receivables that are between 0 and 90 days past due based on estimated uncollectible amounts which are determined based upon to the counterparty's past default experience and an analysis of the counterparty's current financial position.

B2B Customers

As at December 31, 2012, the Combined Group has reserved 60% of the B2B customers' receivables that were over 90 days past due based on historical experience evidencing that 40% of receivables that are past due beyond 90 days are collectable.

Trade receivables disclosed above include amounts (see below for aged analysis) that are past due at the end of the reporting period but against which the Combined Group has not recognized an allowance for doubtful accounts because there has not been a significant change in credit quality and the amounts are still considered collectable. The Combined Group does not hold any collateral or other credit enhancements against these balances nor does it have a legal right of offset against any amounts owed by the Combined Group to the counterparty.

Ageing of past due receivables	December 31, 2012	December 31, 2011	December 31, 2010
	(in thousands of euros)		
Not due	121,232	101,927	73,809
0-90 days	62,825	43,983	53,739
>90 days	88,808	102,329	114,831
Total	**272,864**	**248,239**	**242,379**

The concentration of credit risk is limited due to the customer base being large and unrelated. There is no customer which represents more than 5% of the total balance of trade receivables.

Change in valuation allowance for trade receivables is as follows:

	December 31, 2012	December 31, 2011	December 31, 2010
	(in thousands of euros)		
Balance as of the beginning of the year	**(26,770)**	**(33,068)**	**(32,558)**
Additional allowance	(9,322)	—	(6,435)
Bad debt expense	8,925	4,395	3,746
Reversal of valuation allowance	—	1,903	—
Receivables classified as held for sale	—	—	2,924
Business combinations	—	—	(745)
Balance as of the end of the year	**(27,167)**	**(26,770)**	**(33,068)**

20 Cash and cash equivalents

Cash and cash equivalents presented in the combined statements of cash flows include cash on hand and short-term deposits. Reconciliation between cash and cash equivalents presented in the combined

20 Cash and cash equivalents (Continued)

statements of cash flows and cash and cash equivalents presented in the combined statements of financial position is presented below:

	December 31, 2012	December 31, 2011	December 31, 2010
	(in thousands of euros)		
Cash on hand	7,996	40,580	30,897
Cash equivalents	—	—	—
Cash and cash equivalents presented in the combined statements of financial position	**7,996**	**40,580**	**30,897**
Cash from discontinued operations	—	—	3,656
Bank overdrafts classified as financial liabilities in the combined statements of financial position	—	—	—
Cash and cash equivalents presented in the combined statements of cash flows	**7,996**	**40,580**	**34,553**

As of December 31, 2012, 2011 and 2010, the Combined Group had no cash equivalents.

21 Invested equity

As of December 31, 2012, 2011, 2010 and January 1, 2010, the invested equity consisted of the sum of the individual share capital amounts and consolidated reserves of the Ypso and Altice B2B sub-groups.

21.1 Dividends

During the years ended December 31, 2012, 2011 and 2010, the Combined Group did not distribute dividends to its shareholders. The Combined Group does not expect to distribute dividends in 2013.

21.2 Capital risk management

The Combined Group manages its capital to ensure that entities in the Combined Group will be able to continue as a going concern while maximizing the return to stakeholders through the optimization of debt and equity balances, especially through early repayments of debt. The Combined Group's overall strategy remains unchanged from 2010 to 2012.

The capital structure of the Combined Group consists of net debt (financial liabilities as detailed in Note 22 offset by cash and cash equivalents) and equity of the Combined Group (including reserves, retained earnings and non-controlling interests as detailed above and in the combined statements of changes in equity).

22 Financial liabilities

Total financial liabilities are comprised of:

		Current			Non-current		
	Note	December 31, 2012	December 31, 2011	December 31, 2010	December 31, 2012	December 31, 2011	December 31, 2010
				(in thousands of euros)

The schedule of financial liabilities under the *Senior Facility Agreement* has been modified as a result of the renegotiations that occurred in July and August 2013 as described in note 32.

22.1 Financial liabilities under Senior Facility Agreements

Senior Facility agreement granted to Ypso

The Combined Group entered into a Senior Facility Agreement dated June 6, 2006 (as amended and restated on July 18, 2006, July 28, 2006 and March 2, 2007, as amended by a letter dated June 24, 2008, as amended and restated on December 9, 2009 and September 8, 2011 and as amended by a letter dated January 12, 2012 and accepted by the Agent on January 24, 2012 and amended most recently by a letter dated September 25, 2012 and accepted by the Agent on October 12, 2012) with BNP Paribas, CALYON, Lehman Brothers Bankhaus AG, London Branch and Morgan Stanley Bank International Limited, as the Mandated Lead Arrangers, BNP Paribas as Agent and Security Agent and others lenders (the ''Senior Facility Agreement'' or the ''SFA''). In addition, certain subsidiaries of the Combined Group are guarantors under the SFA, each guaranteeing, subject to certain limitations, the obligations of the other borrowers and guarantors under the SFA.

The initial amount available under the SFA was €3,225 million. The outstanding balance on this loan amounts to €2,347 million as of December 31, 2012.

The SFA contains financial covenants, which may affect the interest rates to be paid by the Combined Group as well as the applicable margins on the SFA (see details below).

Senior Facility agreement granted to Altice

The Combined Group entered into a Senior Facility Agreement dated August 29, 2007 (as amended and restated on March 12, 2008, on August 12, 2008, on September 30, 2009, on December 10, 2010 and on February 28, 2011) with CALYON as Mandated Lead Arranger and Security Agent and others lenders (the ''Senior Facility Agreement'' or the ''SFA''). In addition, certain subsidiaries of the Combined Group are guarantors under the SFA, each guaranteeing, subject to certain limitations, the obligations of the other borrowers and guarantors under the SFA.

The initial amount available under the SFA was €551 million. The outstanding balance on this loan amounts to €453 million as of December 31, 2012.

22 Financial liabilities (Continued)

The SFA contains financial covenants, which may affect the interest rates to be paid by the Combined Group as well as the applicable margins on the SFA (see details below).

Refinancing of the debt in 2012

In 2012, as disclosed in the Significant Events note, the Group issued three bonds in order to refinance part of its existing short-term debt under the SFA. The issuer of the bonds is Numericable Finance & Co. S.C.A. (an unregulated securitization company in the form of a corporate partnership limited by shares incorporated under the laws of the Grand Duchy of Luxembourg).

The proceeds from the notes have been used by Numericable Finance & Co. to fund three new loans issued by the Lending Bank (JP Morgan) under the Senior Facility Agreement to Ypso France SAS:

- a C-One facility of €360 million;
- a C-Two A facility of €225 million;
- a C-Two B facility of €275 million.

In 2012, the September 2011 Senior Facility Amendment and Restatement became effective. This Amendment and Restatement split all the Facilities in two, with non-extended and extended facilities referred to Facility I and Facility II respectively. Extended and non-extended facilities have different maturity dates (extended facilities maturities are two year later than the ones of the non-extended maturities) and a different pricing (see table below).

Facility	Maturity
A (Recap) I	June 15, 2013
A (Recap) II	June 6, 2015
A (Acq) I	June 15, 2013
A (Acq) II	June 6, 2015
B (Recap) I	June 15, 2014
B (Recap) II	June 6, 2016
B (Acq) I	June, 15, 2014
B (Acq) II	June 6, 2016
C (Recap) I	December 31, 2015
C (Recap) II	December 31, 2017
C (Acq) I	December 31, 2015
C (Acq) II	December 31, 2017
Capital Investment I	June 15, 2013
Capital Investment II	June 6, 2015
Additional Revolving Facility	No earlier than March 31, 2016

Guarantees and Security

The Term Facilities are guaranteed irrevocably and unconditionally on a joint and several bases by each guarantor under the Senior Facility Agreement, subject to certain legal limitations.

The Term Facilities are secured by various security interests, such as a pledge over the shares of Ypso France SAS and certain of its subsidiaries.

Covenants

The availability of the senior facilities mentioned in Note 22.1 is not dependent upon the Combined Group's credit ratings but rather is conditioned upon its compliance with a financial covenant related to the capacity of the Combined Group to generate sufficient cash to repay its net debt. Accordingly, the Senior Facility Agreement contains customary operating and financial covenants, subject to certain

22 Financial liabilities (Continued)

agreed exceptions, including covenants restricting the ability of the Combined Group to, among other things:

- amalgamate, merge or consolidate with any other person or be the subject of any reconstruction or materially change the nature of the business of the Combined Group as a whole;
- sell, transfer, lease out, lend or otherwise dispose of any of its assets or all or any part of its undertaking or agree to do so;
- enter into a material transaction that would not be on an arm's length basis and for full market value;
- make acquisitions or investments;
- open or maintain an account with a bank or other financial institution providing like services other than a bank or credit institution entitled to engage in banking transactions in France, Belgium or Luxembourg;
- allot or issue shares or securities;
- change the end of its fiscal year.

The Senior Facility Agreement also requires the Combined Group to comply with the following financial covenants:

- a maximum ratio of consolidated total net borrowings to annualized EBITDA;
- a minimum ratio of consolidated cash flows to consolidated total debt service;
- a minimum ratio of annualized EBITDA to consolidated total net cash interest payable; and
- a maximum level of capital expenditures per fiscal year.

Compliance is tested quarterly and audited annually as of December 31 when we release our consolidated financial statements under French GAAP. Since the SFA was established, the Combined Group has complied every year with the financial covenants included in the agreement.

As required under the SFAs, the covenants are based on financial measures that are determined in accordance with French GAAP and not IFRS and, as a result, the definition of ''Annualized EBITDA'' set forth in the SFA is different from the EBITDA as it appears in the combined statement of income in accordance with IFRS.

Annualized EBITDA is calculated by adding EBITDA for the last two quarters and multiplying the result by two, and thus cannot be reconciled with EBITDA disclosed in the financial statements prepared under French GAAP.

22.2 Perpetual subordinated notes (''TSDI'')

In 2006, €23.7 million of perpetual subordinated notes (''Titres Subordonnés à Durée Indéterminée'' or ''**TSDI**'') were issued by a subsidiary of the Combined Group, NC Numericable to a single subscriber, the GDF Suez Group (Vilorex) (excluding capitalized interest). The proceeds of this borrowing are to be used for financing the construction of connectors in towns in the southern part of the SIPPEREC (''Syndicat Intercommunal de la Périphérie de Paris pour l'Electricité et les Réseaux de Communication''), which is a group of cities located in the Paris metropolitan area. The perpetual subordinated notes bear interest at a rate of 7% per annum. Interest on the notes is capitalized. Interest amortization is conditional. The total accrued interest payable on the notes amounted to €11.6 million and €9.2 million as of December 31, 2012 and 2011, respectively, and has been classified as non-current in the table above in Note 22.

The instrument includes a contractual obligation to deliver cash (including interest) when cash inflows arising from revenues allow the Combined Group to reimburse the notes according to the terms of the

22 Financial liabilities (Continued)

contract. Pursuant to this contract, the payment of interest and the reimbursement of the debt are contingent upon the level of cash inflows generated; however, the Combined Group does not have an unconditional right to avoid delivering cash. As a consequence, the instrument is recognized as a financial liability at amortized cost according to IAS 32.

22.3 Deposits received from customers

Deposits received from customers amount to €44.5 million, €42.9 million and €50.7 million as of December 31, 2012, 2011 and 2010 respectively. These deposits are made when customers receive equipment from the company and are reimbursed when customers terminate their subscriptions only if the customers have paid all outstanding invoices and have returned the equipment. For each year end, the guarantee deposits were recorded as items due within more than one year.

22.4 Other financial liabilities

As of December 31, 2012, other financial liabilities are mainly comprised of the following:

- Debt of €128,962 thousand owed by Ypso Holding Lux S.a.r.l. to the shareholders. This subordinated shareholder debt is planned to be entirely reimbursed when the shares of the Company are admitted for negotiations on Euronext Paris.
- Debt of €2,374 thousand owed by Numericable to several banks (mainly *Caisse d'Epargne d'Alsace-Lorrraine*).

23 Provisions and contingent liabilities

The nature and change in provisions for the years ended December 31, 2012, 2011 and 2010 are as follows:

	January 1, 2012	Increase	Utilization	Reversal	Reclass.	December 31, 2012
			(in thousands of euros)

Other	7,841	9,558	(1,373)	—	3,078	(851)	18,253
	47,198	19,390	(2,538)	(7,929)	1	(7,446)	48,677

Provisions are primarily non-current as of December 31, 2012, 2011 and 2010.

The Combined Group is involved in legal and administrative proceedings that have arisen in the ordinary course of business.

A provision is recorded by the Combined Group when there is a sufficient probability that such disputes will lead to costs that the Combined Group will bear and when the amount of these costs can be reasonably estimated. Certain companies of the Combined Group are involved in a certain number of disputes in the ordinary activities of the Combined Group. Only the most significant disputes and proceedings in which the Combined Group is involved are described below.

Other than as discussed below, the Combined Group does not expect the legal proceedings in which it is involved, or with which it has been threatened, to have a material adverse effect on its business or on its combined financial position.

23.1 Tax matters

The French tax authorities have conducted audits on various companies of the Combined Group since 2005 with respect to the VAT rates applicable to our multiple-play offerings. Under French tax law, television services are subject to a 5.5% VAT rate, which increased to 7% as of January 1, 2012, while Internet and telephony services are subject to a 19.6% VAT rate. When marketing multiple-play offerings, the Combined Group allocates a price reduction compared to the price the Group would charge for its services on a stand-alone basis. This price reduction is primarily applied to its Internet and telephony services, because such services are newer products. As a result, the VAT charged to the subscribers was lower than the VAT that would have been charged if the Combined Group had deemed the price reduction to apply primarily to the television services portion of our packages.

23 Provisions and contingent liabilities (Continued)

The French tax authorities assert that these price reductions should have been computed pro rata of the stand-alone prices of each of the services (television, broadband Internet, fixed and/or mobile telephony) included in the multiple-play packages of the Group and proposed adjustments for fiscal years 2006 to 2010.

The Combined Group has formally contested the tax adjustments for fiscal years 2006 to 2009. The Combined Group asked the Ministry of Finance in December 2011 for a settlement of all the rectifications proposed by the Administration for all the companies of the Combined Group for fiscal years 2006 to 2009. Further to these requests, the tax authorities revised downwards the amounts of rectifications for fiscal years 2008 and 2009 by including in its calculation a limitation based on the 50/50 rule applicable on the composite VAT which was effective from 2008 to 2010. The new amounts of rectifications, amounting to €17.3 million (except penalties of 40%) for fiscal years 2006 to 2009, were communicated to the Combined Group at the end of August 2012.

Furthermore, in 2012, the Tax authorities have also initiated a tax audit of fiscal year 2010, in the same matters and scope as the audits described above. These procedures gave rise to proposed adjustments at the end of June 2013, calculated in the same manner as for fiscal years 2007 to 2009, for a total amount of €6.1 million (except penalties of 40%). The Combined Group contested the proposed assessments at the end of August 2013.

The Tax authorities also placed into collection the rectification of fiscal year 2006 on NC Numericable (approximately €2 million). The Combined Group asked for a payment deferral and deposited a complaint in September 2012 which was rejected by the Tax authorities on June 27, 2013. The Combined Group filed an additional request on August 20, 2013.

As of December 31, 2012, a tax provision of €25.1 million was recognized, including all the risks related to VAT (except the penalties of 40% which represents €7.1 million) related to the reassessments notified for fiscal years 2006 to 2010 (i.e. €23.5 million). The Group contested the proposed notifications on August 21, 2013. Fiscal year 2011 is not subject to a tax audit.

VAT rules applicable to multiple-play packages changed starting January 1, 2011.

23.2 Commercial disputes

23.2.1 Dispute with Orange relating to certain IRUs

The Combined Group entered into four non-exclusive IRUs with Orange on May 6, 1999, May 18, 2001, July 2, 2004 and December 21, 2004, in connection with the acquisition by the Combined Group of certain companies which operated cable networks built by Orange. These cable networks, accessible only through the civil engineering installations of Orange (mainly its ducts), are made available to the Combined Group by Orange through these non-exclusive IRUs over such civil engineering installations. Each of these IRUs covers a different geographical area and was entered into for a term of 20 years. Following the ARCEP's decision 2008-0835 of July 24, 2008, Orange published on September 15, 2008, a technical and commercial offer made to telecommunication operators pursuant to which such operators can roll-out their own fiber networks in Orange's ducts. The terms of this mandatory technical and commercial offer are more restrictive than the terms that the Combined Group benefit from under the Orange IRUs. As a result, Orange requested the Combined Group to comply with the general rules regarding accessing Orange's ducts for the purpose of maintaining and upgrading its network. This issue was litigated and both the ARCEP and the Paris Court of Appeal ruled in favor of Orange on November 4, 2010 and June 23, 2011, respectively. We appealed the decision before the French Supreme Court (Cour de Cassation) but it upheld, for the most significant part, the decision of the Paris Court of Appeal on September 25, 2012.

Moreover, on October 21, 2011, the ARCEP initiated penalty proceedings against the Combined Group, arguing that it had not complied with its November 4, 2010 decision. Consequently, in December 2011, the Combined Group executed Orange amendments to the IRUs in order to comply with the

23 Provisions and contingent liabilities (Continued)

November 4, 2010 ARCEP decision and to align the operating procedures set forth in the IRUs with the procedures set forth in the Orange generic technical and commercial offer.

In the meantime, the penalty proceedings initiated by the ARCEP were not stopped by the execution of the amendments to the IRUs and we were sentenced on December 20, 2011 to a fine of €5.0 million for noncompliance with the ARCEP November 4, 2010 decision. The Combined Group appealed this decision before the Conseil d'Etat. The case is still pending. Within the framework of this appeal, Numericable raised a constitutionality question, that was sent back to the Constitutional Council, on the conformity with the Constitution of the Article L. 36-11 of the CPCE which plans the powers of penalty of the ARCEP. On July 5, 2013, the Constitutional Council granted Numericable's request and invalidated paragraphs 1 to 12 of the Article L. 36-11 of the CPCE on the foundation of which the decision of penalty of the ARCEP of December 20, 2011 mentioned above was returned. Numericable asked the Council of State to give effect to this decision and to accordingly invalidate the decision of the ARCEP of December 20, 2011.

Lastly, Numericable initiated parallel proceedings against Orange before the Commercial Court of Paris on October 7, 2010 claiming damages of €2.7 billion for breach and modification of the IRUs by Orange.

On April 23, 2012, the Commercial Court of Paris ruled in favor of Orange and dismissed the Combined Group's claims for damages, ruling that there were no material differences between the original operational procedures and the new operational procedures published by Orange on September 15, 2008. Numericable appealed this decision before the Paris Court of Appeal and claimed the same amount of damages. Orange, in turn, claims that the proceedings materially impaired its brand and image and claims damages of €50 million. The Paris Court of Appeal is expected to render its decision during the second quarter of 2014.

23.2.2 Dispute with Free relating to the advertising of mobile services

On August 3, 2011, a claim was filed against Numericable SAS and NC Numéricable before the Commercial Court of Paris by telecommunication operator Free in relation to the launch of the mobile offer by the Combined Group in spring 2011 through an advertising campaign entitled ''The mobile revolution''.

Free, who used the term ''revolution'' to refer to its initial launch of mobile phone services and whose latest offering was named the ''Freebox Revolution'', argues that our campaign led to customer confusion and damaged its brand and image. Free claims damages of €10.0 million. The case is currently pending before the Paris commercial court. After the hearing, the Court asked for an opinion of the ''direction générale de la concurrence, de la consommation et de la répression des fraudes (DGCCRF)'' as to whether the assertions of Free were justified with regards to the laws of advertising. The DGCCRF issued an opinion in which it indicated that the questions raised by Free did not constitute a fault under unfair competition law. The ruling of the Commercial Court of Paris is expected during the second half of 2013.

23.2.3 Dispute with Orange relating to unpaid invoices

Orange filed a claim against Numericable before the Paris Commercial Court on September 6, 2011. Orange claimed that invoices in the amount of €3.1 million remained unpaid. These invoices related to physical infrastructure occupied by Numericable between 2005 and 2007, following the sale by Orange of its cable networks for Numericable. Numericable argued that Orange prevented the Combined Group from moving out of these infrastructures and therefore that the litigation's invoices were not due. Orange filed another claim against Numericable before the Paris Commercial Court on February 1, 2012 and, for similar grounds, claiming that invoices in the amount of €0.5 million remained unpaid. These cases are still pending before the Paris Commercial Court. The date of the hearing has not been settled yet.

23 Provisions and contingent liabilities (Continued)

23.2.4 Disputes with various providers of value-added services (VAS)

By related complaints dated February 10th, 2013, five providers of value-added telephony services which offer their services to the public through surcharged numbers (0899), commenced litigation against Completel before the Commercial Court of Nanterre. Those companies asked for the condemnation of Completel to the payment of €350,000 for the repayment of sums corresponding to restraints made by Completel from the amounts it collected on their behalf.

Completel withheld these amounts in response to the practices of these these companies which in Completel's view violate their agreements with Completel as well as the industry's ethics rules. They seek damages of a global amount of €12 million.

Furthermore, in November 2012, Completel decided to terminate this activity, and suspended certain repayments and applied various contractual penalties to companies marketing this kind of value-added telephony services. Some of these companies assigned Completel before several Commercial Courts and asked for its condemnation to the payment of the sums retained by Completel and/or the cancellation of the penalties applied by Completel. The global claim amounts to approximately €900 000, including €850,000 in amounts collected on behalf of these companies.

23.2.5 Dispute with Orange relating to access to the DSL market

On August 5, 2010, Completel filed a claim against Orange before the Paris Commercial Court, claiming damages of approximately €500 million resulting from anticompetitive practices from Orange which would have delayed the access to the DSL market for the competitors of Orange during the years 1999 to 2003. On December 13, 2011, the Paris Commercial Court rejected the request of Completel. Completel appealed this decision. The decision of the Paris Court of Appeal should intervene during the course of the year 2014.

23.2.6 Labor disputes

The Group is involved in a certain number of labor disputes, of which a significant amount result from the last period of substantial mergers in 2006-2007 involving UPC-Noos, which until 2009 gave rise to potentially contentious adjustments and harmonization in labor practices . The claims related to these disputes could amount to approximately €4 million. These disputes largely consist of employees contesting the reasons or the form of their dismissals.

24 Employee benefits

In France, employees of the Combined Group benefit from a retirement indemnity plan. Accordingly, the Combined Group participates in mandatory social security plans organized at the state level, for which contributions expenses correspond to the contributions due to the French state. The plan is considered to be a defined contribution plan as defined in IAS 19. Employees of the Combined Group are covered by the Telecom Industry Branch Social Agreement (''Convention Collective Nationale des Télécommunications'', which determines the amount of retirement indemnity to be paid to the employee upon retirement).

The rights to conventional retirement benefits vested by employees were evaluated individually, based on various parameters and assumptions such as the employee's age, position, length of service in the Combined Group and salary, according to the terms of their employment agreement.

24 Employee benefits (Continued)

24.1 Assumptions used for defined benefit plans

	December 31, 2012	December 31, 2011	December 31, 2010
	(in thousands of euros)		
Discount rate	3.0%	4.75%	4.75%
Expected salary increase rate	3.0%	3.0%	3.0%
Inflation rate	2.0%	2.0%	2.0%
Turnover—managers (mean)	7.0%	7.0%	7.0%
Turnover—other employees (mean)	15.0%	15.0%	15.0%

The turnover rate can vary significantly depending on length of service.

24.2 Components of Net Periodic Benefit (Cost)

	December 31, 2012	December 31, 2011	December 31, 2010
	(in thousands of euros)		
Service cost	713	660	555
Interest cost	287	263	221
Expected return on plan assets	—	—	—
Recognition of actuarial net (gain) loss	1,496	(244)	281
Past service cost	—	—	—
Amounts recognized due to plan combinations	—	22	58
Curtailments/Settlements	(57)	(145)	—
Net periodic (benefit) cost	**2,439**	**556**	**1,115**
Experience loss (gain) on plan liabilities	1,496	(244)	281
Percentage of present value of plan liabilities	17.7%	(4.0%)	5.1%

Actuarial gains and losses arising from changes in actuarial assumptions are recognized in profit and loss when they are incurred.

Impact of discounting provisions for retirement benefits is recognized in operating income in ''Staff costs and employee benefits expense'' with the related charges.

24.3 Change in defined benefit obligation

	December 31, 2012	December 31, 2011	December 31, 2010
	(in thousands of euros)		
Defined benefit obligation—beginning of year	**6,101**	**5,545**	**3,936**
Service cost	713	660	555
Interest cost	287	263	221
Contributions paid	—	—	—
Amortization of actuarial net gain (loss)	1,496	(244)	281
Benefits paid	(87)	—	—
Past service cost	—	—	—
Amounts recognized due to plan combinations	—	22	58
Curtailments/Settlements	(57)	(145)	—
Defined benefit obligation—end of year	**8,455**	**6,101**	**5,545**

25 Other non-current liabilities

	December 31, 2012	December 31, 2011	December 31, 2010
	(in thousands of euros)		
Non-current deferred revenue (more than one year)	105,791	94,777	101,402
Non-current trade payables	5,175	5,906	6,634
Non-current tax and social security payables	300	300	2,303
Other non-current liabilities	**111,266**	**100,983**	**110,339**

Deferred revenue at the end of the reporting period mainly represents unrecognized network lease revenue.

For certain arrangements entered into with its non-residential customers, the Combined Group receives up-front cash payments, namely in relation to indefeasible right of use arrangements (''IRUs'') and connection fees. For these arrangements, the revenue is generally recognized reliably over the duration of the lease contract.

The non-current part of deferred revenue disclosed in the above table corresponds to revenue that will be recognized in more than one year.

The current-part of deferred revenue (i.e. revenue to be recognized in less than one year) is presented in ''Trade payables and other payables''.

26 Trade payables and other payables

	December 31, 2012	December 31, 2011	December 31, 2010
	(in thousands of euros)		
Trade payables—general	416,183	424,334	392,170
Trade payables—acquisition of assets	87,145	65,640	69,492
Advances and down payments received	19,884	30,564	34,703
Current accounts payables	21,219	13,062	232
Liabilities related to tax and duties	87,358	64,353	58,927
Corporate and social security contributions	45,871	39,937	38,490
Current deferred revenue (less than one year)	45,319	37,574	36,189
Other payables	3,054	23,206	53,670
Trade payables and other payables	**726,033**	**698,670**	**639,282**

27 Financial instruments

Details of the significant accounting policies and methods adopted (including the criteria for recognition, the bases of measurement, and the bases for recognition of income and expenses) for each class of financial asset, financial liability and equity instrument are disclosed in Notes 2.15 and 2.19.

27.1 Fair value of financial instruments

Valuation techniques and assumptions applied to measure fair value for derivative instruments

The fair values of derivative instruments are calculated using quoted prices. When such prices are not available, a discounted cash flow analysis is performed using the applicable yield curve for the duration of the instruments for non-optional derivatives, and option pricing models for optional derivatives. Interest rate swaps are measured at the present value of future cash flows estimated and discounted based on the applicable yield curves derived from quoted interest rates.

27 Financial instruments (Continued)

In accordance with the amendments to IFRS 7, the Combined Group classifies its financial instruments measured at fair value into three levels (the fair value hierarchy):

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Level 2 fair value measurements have been used for interest-rate derivatives. There are no significant financial instruments for which level 1 or level 3 measurements have been used and no transfer of financial instruments between levels have occurred.

Fair value measurement other financial assets

Due to their short-term nature, the fair value of cash and cash equivalents, trade receivables and other current receivables and trade payables and other payables, approximates the net carrying amount.

Investments in entities not included in the combination are unquoted equity securities. As a result, their fair value cannot be measured reliably and accordingly, these investments are measured at cost.

Financial guarantees and collaterals

Under the SFA, the assets of the Combined Group have been given as collateral to the bank lenders.

27.2 Financial assets

	December 31, 2012				
			Financial assets at fair value through profit and loss		
	Available-for-sale	Loans and receivables	Designated at fair value through profit and loss	Held for trading	Total Assets
	(in thousands of euros)

	(in thousands of euros)				
Non-current financial assets	71	4,920	—	2,380	7,371
Trade receivables and other receivables	—	357,090	—	—	357,090
Interest-rate derivatives	—	—	—	—	—
Cash and cash equivalents	—	30,897	—	—	30,897
Financial assets	**71**	**392,907**	**—**	**2,380**	**395,358**

27.3 Financial liabilities

Except for interest-rate derivatives, financial liabilities are measured at amortized cost, which is the amount at which the financial liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortization using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction for impairment or uncollectibility.

Interest-rate derivatives held for trading are measured at fair value through profit and loss.

27.4 Financial risk management objectives

Objective of the Corporate Treasury function

The Combined Group's Corporate Treasury function provides services to the business, coordinates access to domestic and international financial markets, monitors and manages the financial risks relating to the operations of the Combined Group through internal risk reports which analyze exposures by degree and magnitude of risks. These risks include market risk (primarily interest rate risk since the Combined Group's activities does not expose it to risks of changes in foreign currency exchange rates), credit risk and liquidity risk. The Combined Group seeks to minimize the effects of these risks by using derivative financial instruments to hedge risk exposures. The Combined Group does not enter into or trade financial instruments, including derivative financial instruments, for speculative purposes.

The Corporate Treasury function reports monthly to the Group's chief operating decision maker, which monitors risks and policies implemented to mitigate risk exposures.

27 Financial instruments (Continued)

Interest rate risk management

The Combined Group is exposed to interest rate risk because the Combined Group borrows funds, mostly at floating interest rates. The risk is managed by the Combined Group through the use of interest rate swap contracts and caps interest rate contracts. Even though the Combined Group does not apply IAS 39 in terms of hedge accounting, hedging activities are evaluated regularly to align with interest rate views and defined risk appetite, ensuring the most cost-effective hedging strategies are applied, in compliance with the requirements of the SFA.

The Combined Group's exposures to interest rates on financial assets and financial liabilities are detailed in the liquidity risk management section of this note.

Interest rate sensitivity analysis

The sensitivity analyses below have been determined based on the exposure to interest rates for both derivatives and non-derivative instruments at the end of the reporting period. For floating rate liabilities, the analysis is prepared assuming the amount of the liability outstanding at the end of the reporting period was outstanding for the whole year. A 50 basis point increase or decrease is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.

If interest rates had been 50 basis points higher/lower and all other variables were held constant, the Combined Group's net income (loss) for the year ended December 31, 2012 would decrease/increase by €13 million. This is mainly attributable to the Combined Group's exposure to interest rates on its variable rate borrowings.

Interest rate swap contracts

Under interest rate swap contracts, the Combined Group agrees to exchange the difference between fixed and floating rate interest amounts calculated on agreed notional principal amounts. Such contracts enable the Combined Group to mitigate the risk of changing interest rates on the fair value of issued fixed rate debt and the cash flow exposures on the issued variable rate debt. The fair value of interest rate swaps at the end of the reporting period is determined by discounting the future cash flows using the curves at the end of the reporting period and the credit risk inherent in the contract.

Credit risk management

Credit risk refers to the risk that counterparty will default on its contractual obligations resulting in financial loss to the Combined Group.

Financial instruments that could potentially subject the Combined Group to concentrations of counterparty risk consist primarily of trade receivables, cash and cash equivalents, investments and derivative financial instruments. Overall, the carrying amount of financial assets recognized in the financial statements, which is net of impairment losses, represents the Combined Group's maximum exposure to credit risk.

As mentioned in Note 19, the Combined Group considers that it has an extremely limited exposure to concentrations of credit risk with respect to trade accounts receivable due to its large and diverse customer base (residential and public institutions) operating in numerous industries and located across France. In addition, the maximum value of the counterparty risk on these financial assets is equal to their recognized net book value. An analysis of credit risk on net trade receivables past due is provided in Note 19.

The Combined Group's policy is to invest its cash, cash equivalents and marketable securities with financial institutions and industrial groups with a long-term rating of A−/A3 or above. The Combined Group's enters into interest rate contracts with leading financial institutions and currently believes that

27 Financial instruments (Continued)

the risk of these counterparties defaulting is extremely low, since their credit ratings are monitored and financial exposure to any one financial institution is limited.

However, in September 2008, Lehman Brothers filed for bankruptcy. Part of the Combined Group's financial liabilities was hedged by interest rate swaps entered into with Lehman Brothers. As a result of the bankruptcy, Lehman Brothers defaulted on the swaps. There is currently a claim with Lehman Brothers for a total amount of approximately €11.2 million. In 2012, the Combined Group received a first payment €2.8 million in relation to this claim. Thus a contingent gain of €8.4 million remains for the Company but has not been recognized as at December 31, 2012.

Liquidity risk management

Ultimate responsibility for liquidity risk management rests with the Board of Directors, which has established an appropriate liquidity risk management framework for the management of the Combined Group's short-, medium- and long-term funding and liquidity management requirements. The Combined Group manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

The following tables detail the Combined Group's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Combined Group can be required to pay. The tables include both interest and principal cash flows. To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate curves at the end of the reporting period. The contractual maturity is based on the earliest date on which the Combined Group may be required to pay.

	December 31, 2012			
	Less than 1 year	1-5 years	5+ years	Total

The Combined Group considers that its available cash and cash equivalent balances and the expected operating cash flows to be generated are sufficient to cover its operating expenses, capital expenditures and its financial debt requirements for the next twelve months.

28 Related party transactions

The ultimate shareholders of the Combined Group are a group of investment and private equity firms: Altice, Cinven and Carlyle.

Balances and transactions between entities forming the Combined Group have been eliminated in preparing the Combined Financial Statements and are not disclosed herein. Details of transactions between the Combined Group and other related parties are disclosed below.

28 Related party transactions (Continued)

28.1 Trading and financing transactions

During the year, group entities entered into the following trading transactions with related parties that are not members of the Combined Group:

	Purchase of goods and services			Amounts owed by related parties			Amounts owed to related parties		
	2012	2011	2010	2012	2011	2010	2012	2011	2010
	(in thousands of euros)								
Shareholders									
Cinven	610	622	641	—	—	—	—	185	748
Altice	1,214	10,287	13,410	—	—	—	—	—	2,091

Associate									
Alsace Connexia Participation SAS	—	—	—	2,235	2,574	2,518	—	—	—

Management fees have been paid to the shareholders (Cinven, Altice and Carlyle) in relation to certain management, financing and advisory services provided (€2,424 thousands in 2012 compared to €11,509 thousands in 2011 and €14,651 thousands in 2010).

The shareholders of the Combined Group also provided several subordinated shareholder financings.

28.2 Related party relationships

(1) Relationships with our Shareholders

Relationships with Altice

On June 30, 2011, we completed the sale of Coditel Belgium and Coditel Luxembourg to a consortium of investors, including Altice, for a purchase price of €369.2 million.

Altice owns cable networks in the French West Indies (*Antilles*). We pay telephony termination fees to such networks for the calls originating from our subscribers to subscribers of such networks, and receive telephony termination fees from such networks for the calls originating from their subscribers to our subscribers.

Finally, Altice owns Auberimmo which is a company that rents infrastructures to the Combined Group. Auberimmo has a sole client, Completel SAS which is a member of the Combined Group.

Relationships with Carlyle

Sagemcom, one of our key suppliers of set-top boxes, was acquired by funds managed by Carlyle on August 17, 2011.

(2) Relationships with Coditel

As part of the sale of Coditel Belgium and Coditel Luxembourg in June 2011, we entered into a services agreement and a trademark license agreement with Coditel Holding S.A. to ensure the continuity of its operations

Services Agreement

On June 30, 2011, Numericable SAS entered into a services agreement (the ''Coditel Services Agreement'') with Coditel. Pursuant to the Coditel Services Agreement, we will continue to provide Coditel with all the services we were providing prior to its sale, including:

- VOD platform services and VOD content services;

28 Related party transactions (Continued)

- television, IP and voice engineering services;
- support and assistance in purchasing hardware and devices needed for its operations, in particular set-top boxes and software, modems, routers and mobile handsets, and also television and VOD content;
- delivery of television channels signals and existing data flows over our backbone;
- upgrade of Coditel's billing software; and
- continued support of Coditel's systems currently located in our premises or currently supported from our systems.

In consideration of the services provided, Coditel agreed to pay to us a total of €100,000 per year. In addition, Coditel will pay to us 10% of its monthly VOD revenues.

Trade Mark License Agreement

On June 30, 2011, Coditel and Numericable also entered into a trademark license agreement (the ''Trade Mark Agreement''). Pursuant to the Trade Mark Agreement, we will provide Coditel with a license to use our trademark ''Numericable'', registered under Ma14502, exclusively in Belgium and Luxembourg in relation to the offering, promotion and commercialization of television, Internet and telephone products and services. The license fee is included in the €100,000 annual fee under the Services Agreement. The Trade Mark Agreement terminates automatically on June 30, 2017, upon termination of all services under the Services Agreement or upon expiry of the Services Agreement.

28.3 Compensation of key management personnel

Compensation of directors and other members of key management personnel (i.e. members of our Executive Committee) during the year was €2,100 thousands, €2,039 thousands and €2,325 thousands for 2012, 2011 and 2010 respectively. These amounts only comprise short-term benefits such as wages, salaries and bonuses.

The Combined Group does not offer any share-based arrangement and employment benefits related to key management personnel are insignificant in aggregate.

29 Leases arrangements

29.1 The Combined Group as a lessor

Finance leases

The Combined Group has not contracted finance leases as a lessor.

Operating leases

Operating leases relate to the investment property owned by the Combined Group and leased to other companies in the telecommunications industry, with lease terms of between 15 to 30 years. All operating lease contracts contain market review clauses in the event that the lessee exercises its option to renew. The lessee does not have an option to purchase the property at the expiry of the lease period.

29 Leases arrangements (Continued)

Future minimum rental income under non-cancellable operating leases is as follows:

	Future minimum rental income		
	December 31, 2012	December 31, 2011	December 31, 2010
	(in thousands of euros)		
Not later than 1 year	45,318	38,815	35,459
Later than 1 year and not later than 5 years	40,930	30,621	34,848
Later than 5 years	64,545	62,381	64,214
	150,793	**131,817**	**134,521**

29.2 The Combined Group as a lessee

Finance leases

The Combined Group entered into various finance leases related to property, for which the lease term is generally between 20 and 30 years, and office equipment, for which the lease term is 4 years.

The most significant finance lease arrangements relate to network equipment bought from Cisco and to the property lease for the headquarters offices of the Combined Group in Champs-sur-Marne for which the Combined Group has an option to purchase the property at the end of the lease term at a price that is expected to be sufficiently lower than the fair value at the date the option becomes exercisable.

All leases are denominated in euros. Certain property lease arrangements specify that at the beginning of the lease the annual payments will be set at a fixed amount, but in future years will be increased by a rate of inflation (i.e. a percentage increase).

	Minimum lease payments		Present value of minimum lease payments	
	December 31, 2012	December 31, 2011	December 31, 2012	December 31, 2011
	(in thousands of euros)			
Not later than 1 year	11,685	20,219	11,302	19,529
Later than 1 year and not later than 5 years	13,883	7,229	12,830	6,621
Later than 5 years	721	928	595	753
	26,288	**28,376**	**24,728**	**26,903**
Less future finance charges	(1,560)	(1,473)	—	—
Present value of minimum lease payments	24,728	26,903	24,728	26,903
Financial liabilities related to finance leases—current portion			11,302	19,529
Financial liabilities related to finance leases—non-current portion			13,426	7,374

The interest rate inherent in the leases is fixed at the contract date for the entire lease term. The average effective interest rate contracted is approximately 3.24% and 3.53% per annum for 2012 and 2011 respectively.

Operating leases

The Combined Group also has property and vehicle lease commitments under operating leases. The lease term for property under operating leases is generally 3, 6 or 9 years, a standard lease term for commercial real estate in France. The lease term for vehicle under operating lease is 3 years.

As part of the networks business, leases involving equipment and networks IRUs (usage rights on local loop, backbone) or other rental contracts (rights of way) were not considered material.

29 Leases arrangements (Continued)

In connection with its entertainment business activities, the Combined Group has also entered into operating leases and agreements to purchase TV programs.

As of December 31, 2012, non-cancellable operating lease commitments amounted to:

(in thousands of euros)	December 31, 2012
Not later than 1 year	5,554
Later than 1 year and not later than 5 years	19,513
Later than 5 years	5,717
	30,784

30 Non current assets held for sale and discontinued operations

This section provides details of the contents of the items relating to the activities of the Combined Group in Belgium and Luxembourg classified as discontinued operations as reported in the Combined Statement of Income and Combined Statement of Cash Flows. As explained in Note 4, discontinued operations correspond to the Coditel subsidiaries in Belgium and Luxembourg.

Details of statement of income items included in discontinued operations in 2011 and 2010 are as follows:

	2011 6 months	2010 12 months
	(in thousands of euros)	
Revenue	31,978	62,256
Operating income	**16,525**	**42,290**
Finance costs, net	(4,074)	(7,800)
Profit (loss) of discontinued operations before tax	**12,451**	**34,490**
Income tax expense	(1,296)	(3,252)
Net income (loss)	**11,154**	**31,237**
Proceeds from the sale of Coditel	118,486	—
Fees paid in connection with the sale of Coditel	(3,580)	—
Net income (loss) from discontinued operations	**126,059**	**31,237**

30 Non current assets held for sale and discontinued operations (Continued)

As at December 31, 2010, assets and liabilities held for sale were presented separately on the face of the statement of financial position and may be analyzed as follows:

	(in thousands of euros)
ASSETS	
Goodwill	210,195
Other intangible assets	1,852
Property, plant and equipment	43,142
Other non-current financial assets	71
Non-current assets	**225,260**
Inventories	539

Cash received from the sale of Coditel	350,184	
Issuance of debt	1,101	2,654
Repayment of debt	(186,684)	(17,035)
Interest paid	(4,105)	(7,828)
Net cash provided (used) by financing activities	**160,497**	**(22,209)**
Net cash flow from discontinued operations	**156,258**	**15,196**

31 Commitments and contractual obligations

31.1 Commitments given

Guarantees in relation to the Senior Facility Agreement

As part of the SFA entered into by the subsidiaries of the Combined Group, the following commitments were given to the lending banks:

- Compliance with financial covenants;
- Stable tax consolidation scope;
- Compliance with conditions governing the acquisition, disposal, use and control of assets.

All the assets of the Combined Group's subsidiaries have been pledged to the banks.

Commitments in relation to business operations

The Combined Group is committed to build 75,000 connectors for a total amount of €4.5 million on behalf of the city of Le Havre, France.

To operate telecommunications networks, the Combined Group needs licenses, authorizations or usage rights to infrastructure in the public and private domain. Consequently, the Combined Group generally pays fees to the public administration in charge of managing the infrastructure (local authorities) or to the owners. In the course of its normal business activities, the company has also entered into outsourcing contracts, particularly for certain network maintenance services.

31 Commitments and contractual obligations (Continued)

In 2010, the Combined Group entered into several long-term MVNO agreements for voice and data transmission with Bouygues Telecom, pursuant to which we provide mobile telephony services to residential customers under our own brand but through the nationwide network of Bouygues Telecom. The agreements relating to voice transmission services are due to expire in 2017 and those relating to data transmission services are due to expire in 2013, and each of these will be automatically renewed unless otherwise notified by either party with six months' notice prior to their respective initial expiry dates. Pursuant to the financial terms of each of these agreements, we are under obligation to pay Bouygues Telecom a flat fee corresponding to a minimum level of consumption by our end-customers of the relevant voice or data transmission services.

Lease commitments in relation to business operations

As disclosed in Note 29, the Combined Group has entered into various lease arrangements.

Contractual obligations

	< 1 year	Maturity 1–5 years	> 5 years	Total December 31, 2012
		(in thousands of euros)		
Loans and financial liabilities	114,732	1,904,440	1,021,903	3,041,075
Operating leases arrangements	5,554	19,513	5,717	30,784
Total	**120,286**	**1,923,953**	**1,027,620**	**3,071,859**

31.2 Commitments received

The Combined Group has received a commitment of a total amount of €25 million from GDF Suez to subscribe to perpetual floating rate notes, which will provide financing for the construction of the Sipperec network. The Combined Group has already received €23.8 million in principal from GDF Suez as at December 31, 2012.

Within the framework of the transfer of NC Numericable on March 31, 2005 by the groups France Télécom, TDF and Vivendi / Canal+, the transferors granted specific guarantees until 2014 to the Combined Group, including in particular fiscal and social risks as well as specific risks connected to cable networks exploited by NC Numéricâble.

32 Events after the end of the reporting period

Refinancing of the debt in July 2013

In July and August 2013, the Combined Group amended its debt under the Senior Facility Agreements which allowed the Combined Group to reschedule a large portion of its debt.

The new scheduling of the debt under Senior Facility Agreements is as follows:

Maturity	2013	2014	2015	2016	2017	2018	2019	Total
				(in millions of euros)				
	41.7	26.3	63.1	102.2	1,246.7	698.4	584.4	2,762.8

The scheduling of the debt under Senior Facility Agreements before the refinancing which occurred in July and August 2013 was as follows:

Maturity	2013	2014	2015	2016	2017	2018	2019	Total
				(in millions of euros)				
	54.0	125.0	453.9	808.7	465.2	271.6	584.4	2,762.8

32 Events after the end of the reporting period (Continued)

As part of the refinancing of the debt of August 2013, the Combined Group also obtained a new Revolving Credit Facility (the *Revolving Credit Facility)* of €24 million. Thus, the total available under the revolving facilities amounts to €89 million.

In-depth inquiry of the European Commission into transfer of cable infrastructures by certain local authorities

On July 17, 2013 the European Commission indicated that it decided to open an investigation to verify whether the transfer of public cable infrastructure between 2003 and 2006 by several French municipalities to Numericable was in line with European Union State aid rules. At this stage, the European Commission has doubts that such aid could be found compatible with EU rules because of the economic advantage that would have resulted from these transfers, depending on their conditions.

COMBINED FINANCIAL STATEMENTS AND ACCOMPANYING NOTES

INTERIM COMBINED FINANCIAL STATEMENTS AND ACCOMPANYING NOTES
30 SEPTEMBER 2014

SFR—SIG 50, AND THEIR SUBSIDIARIES

NUMERICABLE-SFR S.A.

Statutory auditor's review report on the condensed combined financial statements of the companies SFR, SIG 50 and subsidiaries for the period from January 1st to September 30, 2014

This is a free translation into English of a report issued in French and it is provided solely for the convenience of English-speaking users. This report should be read in conjunction with and is construed in accordance with French law and professional standards applicable in France.

Period from January 1st, to September 30, 2014

To the Executive Director,

In our capacity as Statutory Auditors of Numéricâble-SFR and in response to your request, in the framework of the implementation by Altice, the principal shareholder of Numéricâble-SFR, of the planned issuance of bonds to finance the acquisition by Altice of the Portuguese assets of the Brazilian telecom group Oi, we have reviewed the condensed combined financial statements of the companies SFR, SIG 50 and subsidiaries (hereinafter 'the Group') for the period from January 1st to September 30, 2014 (hereinafter 'the Combined Financial Statements') as attached to this report.

Please note that your company prepared the Combined Financial Statements of the Group for the first time at September 30, 2014. The comparative information relating to the period from January 1st to September 30, 2013 has not been audited or reviewed.

These Combined Financial Statements have been prepared by your Management Board. Our role is to express an opinion on these statements, based on our review.

We conducted our review in accordance with professional standards applicable in France. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with professional standards applicable in France and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Based on our review, nothing has come to our attention that causes us to believe that the accompanying Combined Financial Statements are not prepared in all material respects in accordance with IAS 34—the standard of the IFRS as adopted by the European Union applicable to interim financial statements.

Without qualifying our opinion above, we draw your attention to note ''Basis of preparation'' which describes the particular context, the scope of combination and accounting policies used in the preparation of the Combined Financial Statements.

(a) Details in the statement of comprehensive income

(b) Contribution of Vivendi by offsetting receivable in connection with the assignment of SPT; refer to Basis for Preparation of Combined Accounts

The Accompanying Notes are an integral part of the Combined Financial Statements

Notes to the Condensed Interim Combined Financial Statements

Basis of Preparation

These interim combined financial statements have been drawn up on December 23, 2014 by Numericable-SFR S.A. (hereinafter referred to as Numericable) in its capacity as new controlling shareholder of the companies SFR S.A. and SIG 50 S.A. (hereinafter referred to respectively as SFR and SIG 50).

They have been drawn up on the basis of the accounting data of the companies SFR and SIG 50 and their subsidiaries, for the 9 months ended as of September 30, 2014, as reported in the quarterly consolidation packages provided to Vivendi SA until the takeover of SFRS.A., SIG 50 S.A. and their subsidiaries by Numericable-SFR S.A. (previously Numericable Group S.A.).

They must be read in conjunction with the annual combined statements as at the end of December 2013 and the condensed interim combined financial statements as at the end of June 2014 which are attached to the Numericable Group Reference Document update filed with the French Autorité des Marchés Financiers on October 28, 2014.

Context

During its meetings on April 4 and 5, 2014, the Supervisory Board of Vivendi learned the result of the negotiations with Altice/Numericable, in the context of the reciprocal exclusivity granted on March 14, with a view to a partnership between SFR and Numericable, and unanimously decided to select the bid of Altice/Numericable.

In the context of a new reciprocal exclusivity undertaking with Altice/Numericable, and after obtaining the advisory opinion of the staff representative bodies of Numericable, Vivendi and SFR on this plan, the deal was signed on June 20, 2014.

The completion of this agreement was subject to certain conditions, in particular obtaining the approvals of the competent regulatory authorities. On October 27, 2014 the Competition Authority, after an in-depth examination of the file, authorized, subject to conditions, the purchase of SFR by Numericable Group. This operation was finalized on November 27, 2014.

Altice main shareolder of Numericable-SFR, has announced that it has signed a definitive agreement to purchase the Portuguese assets of the Brazilian telecom group Oi. These assets comprise the existing business of Portugal Telecom outside of Africa and excludes others, among which Portugal Telecom's Rio Forte debt securities. The transaction, net of financial debt, accrued post-retirement liabilities and other purchase price adjustments will be financed by new debt and existing cash from Altice.

To finance this acquisition, Altice plans to carry out a bond issue. These interim combined financial statements have been drawn up so as to be included in the corresponding offering memorandum.

Combination scope

The arrangement that constitutes the combined group (hereinafter referred to as the ''Group'') has no independent legal existence prior to the separation, and is made up of entities under the common control of Vivendi on September 30th 2014.

As of September 30, 2014, the Group principally comprised the following companies:

- the entities held directly and indirectly by SFR and its subsidiaries,
- the entities held directly or indirectly by SIG 50 and its new subsidiary, Groupe Telindus France S.A.

The combination scope presented in Note 27—List of Entities Combined of the accompanying notes to the 2013 annual combined accounts—includes in particular three new subsidiaries as of September 30, 2014. These are the companies Groupe Telindus France S.A., Telindus France S.A.S. and Telindus Morocco S.A.S.

As a reminder, the combination scope as at December 31, 2013 excluded SPT, held by SFR and owner of the interest in Maroc Telecom. This company was sold to Etisalat on May 14, 2014.

Terms of treatment of the holding company SPT owning the interest in Maroc Telecom:

As a reminder, in the historical combined accounts:

- the shares of SPT were cancelled in return for a reduction in equity,
- the dividends received from SPT, net of withholding tax, were presented in the Changes in Equity and in the Cash Flow statements, reducing the dividends paid by SFR to Vivendi.

In the interim combined statements as of September 30, 2014,

- the proceeds of sale, net of the tax on the capital gain generated in the sum of 4 billion euros, was recorded in exchange for the combined equity, insofar as it is considered as a contribution by offsetting of receivables of the shareholder Vivendi,
- the amount received on the sale reduces the Vivendi current account.

Presentation of the business

The business in France comprises mainly:

- the telephony business of SFR in France, which develops mobile, fixed-line, internet and television services with consumers and with business, corporate, community and operator clients. SFR operates in mainland France, as well as in La Réunion and Mayotte,
- the business of distributing telecommunications services and products in France,
- the business of telecoms and network integration, in particular via Telindus

Conventions used when preparing the combined accounts

Intercompany transactions between the Group and the other entities of the Vivendi Group

All balances relative to current operations between the entities of the Group and the other entities of the Vivendi Group have been presented on the balance sheet as third party asset or liability accounts in the combined accounts. All loans and borrowing between the entities of the Group and the other entities of the Vivendi Group have been presented as financial assets or liabilities in the combined accounts.

The transactions with the other entities of the Vivendi Group are presented in Note 24—Transactions with Related Parties of the annual combined statements as of December 31, 2013. The main changes concern the financial debts to Vivendi presented in Note 11—Borrowing and Financial Debts.

Earnings per share

As the combined group is not legally constituted on this date, the number of shares in circulation cannot be established. Consequently, no earnings per share are presented in the Combined Financial Statements.

Income tax

The deferred taxes recorded as tax loss carry-forwards were determined by taking into account the effect of the tax consolidation implemented within Vivendi.

The tax results of the companies included in the tax consolidation perimeter have been taken into account as part of the tax consolidation arrangements implemented by Vivendi, pursuant to the provisions of Article 223-A of the General Tax Code. Pursuant to the tax consolidation convention, carry-forward losses recorded during the period of tax consolidation will remain the property of Vivendi. Consequently, no deferred tax asset has been recognized in respect of these carry-forwards in the combined financial statements presented.

Note 1. Accounting Principles and Valuation Methods

1.1. Interim financial statements

The condensed interim financial statements of the nine months period ending September 30th 2014 are presented and have been prepared on the basis of standard IAS 34—*Interim Financial Reporting*, as

Note 1. Accounting Principles and Valuation Methods (Continued)

adopted in the European Union (EU) and published by the IASB (*International Accounting Standards Board*). Thus, with the exception of the elements described in paragraph 1.2, the combined group applied the same accounting methods as in its combined financial statements for the financial year ended December 31, 2013 (refer in particular to Note 1—Accounting Principles for Combined Financial Statements), and the following provisions have been upheld:

- The calculation of the tax for the period is the result of the product of the annual effective rate of estimated tax, applied to the pre-tax accounts result for the period,
- The expenditure recorded over the period in remunerations paid in shares, staff benefits and employee profit sharing corresponds to the proportion of the estimated expenses for the year, possibly restated with non-recurring events that have occurred over the period.
- Actuarial assumptions used for post-employee benefits accounted for the nine-months ended September 30, 2014 are based on actuarial studies done for the year 2013; meaning no significant impact related to actuarial assumptions has been recorded in shareholders' equity during that period.

1.2. New IFRS standards and interpretations applicable from January 1, 2014

From the first quarter of 2014, the Group applied the IFRIC 21—*Levies* interpretation, published by the IFRIC on May 20, 2013, adopted in the EU on June 13, 2014, and published in the Official Journal of the EU on June 14, 2014. This clarifies certain accounts treatments applicable to levies, in compliance with IAS 37—*Provisions, Contingent Liabilities and Contingent Assets*.

IFRIC 21 specifically deals with the accounting of liabilities in respect of a levy or tax payable imposed by the public authorities on companies in accordance with legal or regulatory provisions, with the exception, specifically, of income tax and VAT. The application of this interpretation could therefore lead to changes in the timing of recognition of liabilities for taxes. This interpretation, mandatory from January 1, 2014 with retrospective effect to January 1, 2013, had no material impact on the financial statements of SFR

Furthermore, and as a reminder, with retrospective effect to January 1, 2012, the Group chose to apply early the standards on the consolidation methods: IFRS 10—*Consolidated Financial Statements*, IFRS 11—*Joint Arrangements*, IFRS 12—*Disclosure of Interests in Other Entities*, IAS 27—*Separate Financial Statements*, and IAS 28—*Investments in Associates and Joint Ventures*, the impacts of which are described in note 1 accompanying the combined financial statements for the financial year ended December 31, 2013. The application of these standards had no material impact on the financial statements of the Group.

1.3. Presentation of the combined financial statements

1.3.1. Combined income statement

The principal captions presented in the combined income statement are revenues, operating profit, financial income, share of profit of companies accounted for under the equity method, income tax and profit.

Operating profit is the result of operations after taking account of net depreciation and amortization expense, additions to provisions, and non-recurring items, classified under other operating income and expenses.

Other operating income and expenses mainly cover restructuring costs, amortization charged against intangible assets acquired in a business combination, gains and losses on the sale of intangible assets and property, plant and equipment, and other non-financial non-recurring income and expenses.

Financial income (expenses) comprises interest expense on loans, interest income generated by cash and cash equivalents, and other financial income and expenses (in particular, the effect of unwinding the discount on assets and liabilities).

Note 1. Accounting Principles and Valuation Methods (Continued)

1.3.2. Other comprehensive income

Other comprehensive income consists principally of translation adjustments, changes in the fair value of cash flow hedging instruments (foreign exchange and interest rate hedges), actuarial gains and losses on post-employment benefits, and the effects of related taxes.

These items are classified according to their nature and are shown separately according to whether or not they will be subsequently reclassified to income.

1.3.3. Combined balance sheet

Assets and liabilities with a maturity shorter than the operating cycle, i.e., generally 12 months, are classified under current assets and liabilities. Assets and liabilities maturing after 12 months are generally classified within non-current items, except for deferred taxes which are always classified within non-current items.

1.3.4. Statement of cash flows

Net cash flow from operating activities

To determine the net cash flow from operating activities, profit is restated for items with no cash impact and for the net change in working capital. Profit is also restated for current and deferred taxes, and for all components of financial income and expenses. Net cash flow from (used in) operating activities also excludes the net change in working capital linked to intangible assets and property, plant and equipment.

Net cash flow from investing activities

Net cash flow from investing activities includes, in particular, acquisitions and sales of intangible assets, property, plant and equipment and financial fixed assets; the net change in working capital linked to intangible assets and property, plant and equipment; and cash flow derived from the gain or loss of control of a subsidiary.

Net cash flow from financing activities

Net cash flow from financing activities includes, in particular, increases and decreases in loans, changes in amounts owed to Vivendi S.A., dividends paid, capital increases and borrowing costs, as well as all cash flow impacts of other financing activities.

1.3.5. Group operational performance

The Group considers EBITDA and cash flow from operations (CFFO) to be relevant indicators of the Group's operational performance.

EBITDA

The Group considers EBITDA, a non-accounting indicator, to be a measure of performance. EBITDA shows the profit generated by the Group's activities independently of financing conditions, taxes (corporate income tax) and the obsolescence of plant and equipment (net depreciation/amortization expense and provisions). EBITDA as defined by the Group corresponds to operating profit restated for other operating income and expenses and for net depreciation and amortization expense and provisions for impairment of intangible assets and property, plant and equipment.

CFFO

The Group considers CFFO, a non-accounting measurement, to be a relevant indicator of the Group's operating performance. CFFO chiefly relates to the net cash flow derived from operating activities in the statement of cash flows (SCF), after deducting investments net of disposals and changes in the related working capital, and before deducting corporate income tax payments.

Note 1. Accounting Principles and Valuation Methods (Continued)

1.3.6. Segment information

In light of prevailing trends in the Group's business resulting in the increased convergence of mobile telephony and high-speed telephony and fixed internet services, Group management monitors operations in a comprehensive, unified manner. The chief decision-maker on operations verifies results and operating plans and decides on the allocation of resources at Group level. The Group has therefore identified a single operating segment meeting the criteria of IFRS 8.

Similarly, since virtually all of the Group's business is carried out on French territory, a single geographic segment has been identified.

This presentation could be modified in the future to reflect developments in the Group's businesses and operating criteria.

Note 2. Significant events over the period

Purchase of SFR by Altice / Numericable

During its meetings of April 4 and 5, 2014, the Supervisory Board of Vivendi unanimously decided to select the purchase bid of Altice/Numericable for SFR.

The transaction was signed on June 20, 2014. Closing took place on November 27, 2014 (see Note 17—Post-Closing Events).

Acquisition of Groupe Telindus France

On April 30, 2014, SIG 50 acquired all shares of Groupe Telindus France from the Belgacom Group for a total amount of €88 million, net of the cash acquired for €6 million. The main subsidiary, Telindus France, is one of the leaders in the French telecoms integration and ICT (Information and Communication Technology) market, and is the leading Cisco distributor in France. Thanks to this transaction, SFR will thus considerably strengthen its presence in the adjacent market of telecoms integration and this will enable it to offer new services to its corporate clients in addition to the offers from SFR Business Team.

Note 3. Operating Income

3.1. Breakdown of Revenues

(in millions of euros)	September 2014	September 2013
Sales of goods	376	357
Sales of services	7,020	7,259
Revenues	**7,396**	**7,616**

3.2. Selling, general and administrative expenses

Excluding a non-recurring charge of €196 million, and excluding Telindus France, which entered the scope of consolidation on May 1, 2014, Selling, general and administrative expenses decreased by €31 million in the nine months ended September 30, 2014, as compared to the nine months ended September 30, 2013.

Note 3. Operating Income (Continued)

3.3. Other Operating Income and Expenses

(in millions of euros)	September 2014	September 2013
Other operating income	**2**	**1**
Amortization of customer bases recognized in business combinations[(a)]	(50)	(50)
Restructuring costs[(b)]	(15)	(22)
Other[(c)]	(53)	(5)
Other operating expenses	**(117)**	**(76)**

(a) The amortization of customer bases recognized in business combinations represents the amortization of the customer bases recognized at the time of the acquisition of the Neuf Cegetel Group in 2008.

(b) The restructuring costs include the settlement payments and other costs linked to GPEC (Provisional Jobs and Skills Management).

(c) This amount includes, among other things, an additional profit sharing and incentive payment totaling €26 million, paid to employees of SFR's EEU (Economic and Employee Unit) as part of the planned sale of SFR to Numericable.

Note 4. Financial Income

As net financing costs are presented directly in the income statement, other financial income and expenses are detailed hereunder:

(in millions of euros)	September 2014	September 2013
Other financial income	**2**	**1**
Effect of undiscounting liabilities[(a)]	(5)	(5)
Effect of undiscounting provision for risks and liabilities[(b)]	(2)	(2)
Other	(2)	(7)
Other financial expenses	**(9)**	**(13)**

(a) Principally concerns the debt related to the GSM license.

(b) Principally concerns the provision for employment benefits plans and the provision for site rehabilitation presented in Note 10—Provisions.

Note 5. Goodwill

5.1. Net Change in Goodwill

The net change in goodwill can be analyzed as follows:

(in millions of euros)	September 2014	December 2013
Gross value at opening balance	**5,194**	**5,194**
Acquisitions[(a)]	77	0
Transfers	—	—
Gross value at closing balance	**5,272**	**5,194**
Impairment losses at opening balance	**(6)**	**(6)**
Change	—	—
Impairment losses at closing balance	**(6)**	**(6)**
Net value at end of period	**5,266**	**5,188**

(a) Concerns the provisional goodwill (before works allocating the purchase price) generated by the acquisition of Groupe Telindus France. The allocation of the price of acquisition will be finalized within 12 months of the date of acquisition, in compliance with IFRS standards. The value of the goodwill will only become final after this period.

Note 5. Goodwill (Continued)

5.2. Goodwill Impairment Test

The return on investment of acquisitions is monitored at Group level, the only operating sector on which impairment tests are carried out.

As at September 30, 2014, the Group has not identified any indication of loss of value that may require a goodwill impairment test.

Note 6. Tangible and Intangible Assets

6.1. Net intangible assets

	September 2014			December 2013		
(in millions of euros)	**Gross**	**Amort and impairment losses**	**Net**	**Gross**	**Amort and impairment losses**	**Net**
Acquired software	2,020	(1,726)	294	2,061	(1,737)	323
Software developed internally	2,418	(1,588)	830	2,695	(1,854)	841
Licenses[a]	2,505	(724)	1,781	2,505	(620)	1,885
Customer databases[b]	568	(526)	42	562	(476)	86
Other[c]	1,592	(783)	810	1,532	(736)	796
	9,103	**(5,346)**	**3,757**	**9,355**	**(5,424)**	**3,931**

(a) The gross amount includes in particular:

- the UMTS license for €619 million acquired in 2001, commissioned in June 2004, and amortizable until the end of the period granting the right (August 2021). The frequencies acquired in June 2010 for €300 million are amortizable over 20 years;
- the GSM license for €278 million acquired in March 2006, recorded at the discounted value at 4% of the annual fixed royalty of €25 million, and amortizable until the end of the period granting the right (March 2021);
- the LTE license for €150 million acquired in October 2011 under the allocation of 4G frequencies in the 2.6 GHz band, commissioned in November 2012 and amortizable until the end of the period granting the right (October 2031);
- the LTE license for €1,065 million acquired in January 2012 under the allocation of 4G frequencies in the 800 MHz band, commissioned on 3 June 2013 and amortizable until the end of the period granting the right (January 2032).

(b) Includes in particular:

- the Neuf Cegetel customer base, valued upon acquisition at €464 million,
- the FrNet2 customer base, valued upon acquisition at €98 million.

(c) Mainly includes site search costs, concession contracts (IFRIC 12), rights of way and service access costs.

The analysis of the change of intangible assets is as follows:

(in millions of euros)	**September 2014**	**December 2013**
Opening balance	**3,931**	**4,082**
Amortization and impairment losses	(556)	(729)
Acquisitions	358	586
Disposals / Write-down	(2)	(4)
Changes in combination scope	9	0
Other	17	(4)
Closing balance	**3,757**	**3,931**

Note 6. Tangible and Intangible Assets (Continued)

6.2. Net tangible assets

(in millions of euros)	September 2014 Gross	September 2014 Amort and impairment losses	September 2014 Net	December 2013 Gross	December 2013 Amort and impairment losses	December 2013 Net
Land	80	(1)	79	78	(1)	76
Buildings	2,971	(1,682)	1,289	2,900	(1,614)	1,286
Equipment and machinery	5,488	(3,467)	2,021	5,326	(3,267)	2,058
Work in progress	255	—	255	301	—	301
Other	2,496	(1,726)	770	2,397	(1,587)	810
	11,291	**(6,877)**	**4,413**	**11,002**	**(6,470)**	**4,532**

Analysis of the changes in tangible assets is as follows:

(in millions of euros)	September 2014	December 2013
Opening balance	**4,532**	**4,468**
Amortization and write-off	(648)	(932)
Acquisitions / Increase	573	1,079
Disposal	(28)	(21)
Changes in combination scope	5	(61)
Other	(20)	(2)
Closing balance	**4,413**	**4,532**

Note 7. Other Current and Non-Current Assets

(in millions of euros)	September 2014	December 2013
Non-current operating assets	**79**	**79**
Advances to equity-accounted and non-combined companies	44	65
Non-combined equity securities	10	12
Other	27	29
Non-current financial assets	**81**	**106**
Total other non-current assets	**160**	**185**
Other current financial assets	**8**	**2**

The decrease of non-current financial assets is due to the repayment of shareholder advances of the Foncière Rimbaud 1 and Foncière Rimbaud 2 companies, following the sale of these companies' assets.

Note 8. Trade Accounts Receivable and Other Receivables

(in millions of euros)	September 2014	December 2013
Accounts receivable	2 256	2 147
Bad debt allowance[(a)]	(460)	(465)
Net accounts receivable	**1 796**	**1 681**
Receivables from suppliers	183	228
Employee and tax receivables	454	529
Prepaid expenses	186	103
Income taxes	8	3
Receivables linked to tax integration[(b)]	186	9
Other non-operating receivables	5	5
Accounts receivable and other receivables	**2 817**	**2 558**

(a) The Group considers that there is no significant collectability risk for unprovisioned overdue receivables.

(b) In the interim financial statements receivables and payables linked to tax integration are not offset (See. Note 12—Trade Accounts Payable and Other Payables).

Note 9. Cash and Cash Equivalents

(in millions of euros)	September 2014	December 2013
Cash	40	297
Cash equivalents	95	98
Cash and cash equivalents	**135**	**394**

Note 10. Provisions

(in millions of euros)	Opening Balance Dec. 2013	Allocations	Utilization	Recoveries and changes of estimates	Other changes	Closing Balance Sep. 2014
Staff benefit schemes	76	7	(0)	—	4	87
Restructuring[(a)]	85	0	(41)	(0)	—	44
Site renovation costs[(b)]	61	—	(1)	—	—	60
Litigation and other[(c)]	269	214	(63)	(39)	11	391
Provisions	**491**	**221**	**(105)**	**(40)**	**15**	**582**
Current provisions	*335*	*214*	*(104)*	*(40)*	*2*	*407*
Non-current provisions	*156*	*7*	*(1)*	*(0)*	*13*	*175*

(a) Restructuring: the recovery of €41 million only concerns the voluntary redundancy plan provisioned in 2012 and 2013.

(b) Site renovation costs: the Group is required to renovate the technical sites of its network upon expiry of the lease, in the event of its non-renewal or in the event of early termination.

(c) Litigation and other: this includes, among other things, provisions whose amount and type are not detailed because their disclosure could harm the Group. The provisions made for litigation cover the risks relating to contentious proceedings instigated against the Group. All provisioned litigation is currently awaiting a hearing or pleadings before a court. The unused part of the provisions recognized at opening corresponds to litigations which have been settled with sums, paid by the Group, that are lower than those provisioned (refer to Note 16—Litigation).

Note 11. Borrowing and Financial Debt

11.1. Analysis of borrowing and financial debt

(in millions of euros)	September 2014	December 2013
Shareholder debt[a]	—	1,200
Debt relative to finance leasing	6	8
Other financial debt	27	40
Non-current borrowing and financial debt	**33**	**1,248**
Shareholder debt[a]	4,855	7,472
Bond loan[b]	—	300
Bank loans	13	50
Debt relative to finance leasing	3	3
Other financial debt	18	20
Current borrowing and financial debt	**4,889**	**7,846**
Borrowing and financial debt	**4,923**	**9,094**

(a) Shareholder debt: this category corresponds to the financial debt contracted with Vivendi in the form of:

- cash current account: this is an advance on current account granted to the Group by Vivendi:
  - to SFR in June 2011. This facility was drawn to the level of €7.5 billion as of December 31, 2013 and €3.6 billion as of September 30, 2014 respectively. This advance is denominated almost entirely in euros. The interest rate has been variable since January 1, 2014 (Euribor 1 month +3%);
  - to SIG 50 in 2002. This facility, not drawn as of December 31, 2013, was drawn to the level of €96 million as of September 30, 2014;
- shareholder loan: the loan, entered into with SFR in December 2011 for €1.2 billion at the Euribor +0.825% rate with maturity in June 2015, has been reclassified in current financial debts.

(b) Bond loan (net of amortized cost): the Group issued a bond loan of €300 million in July 2009 at the rate of 5%, with maturity on July 9, 2014 (repaid on time).

11.2. Breakdown by Maturity of Future Cash Flow linked to Borrowing and Financial Debt

The table below is a schedule of the contractual cash flow of borrowing and financial debt, including interest coupons, on a non-discounted basis, as of September 30, 2014. The interest payable is calculated on the basis of the debt and the interest rates on that date.

The annual effective percentage rate over the period is 2.92%.

		September 2014		
		Schedule of repayments		
(in millions of euros)	Book value	Under one year	Two to five years	Over five years
Shareholder debt	4 855	4 855	—	—
Bond loan	—	—	—	—
Borrowing in respect of leasing	9	3	5	1
Other financial debts	58	31	22	5
Borrowing and financial debts	**4 923**	**4 889**	**27**	**6**

Note 12. Trade Accounts Payable and Other Payables

(in millions of euros)	September 2014	December 2013
Trade accounts payable	2 644	2 878
Customer's credit balances	374	622
Tax debts	520	508
Social security debts	326	338
Prepaid income	525	524
Income tax	3	3
Tax integration debt[(a)]	236	1
Other	1	1
Trade accounts payable and other payables	**4 629**	**4 874**

(a) In the interim financial statements receivables and payables linked to tax integration are not offset (See. Note 8—Trade Accounts Receivable and Other Receivables).

Note 13. Other Current and Non-Current Liabilities

(in millions of euros)	September 2014	December 2013
Deferred income[(a)]	302	309
GSM license	110	136
Other	25	28
Other non-current liabilities	**437**	**473**
Uncalled share capital (Numergy)	63	63
Other	1	5
Non-current financial liabilities	**64**	**68**
Total other non-current liabilities	**501**	**540**
Uncalled share capital (Numergy)	16	16
Other	6	1
Other current financial liabilities	**22**	**17**

(a) Including linked to IRU (Irrevocable Rights of Use) contracts: €248 million as of end of September 2014.

Note 14. Transactions with Related Parties

During the first nine months, no transaction with related parties had any significant effect on the financial situation or the profitability of the Group, with the exception of the transactions presented in Note 11—Borrowing and Financial Debts.

Note 15. Contractual Commitments

15.1. New significant commitments of the period

The new significant contractual commitments made and/or received by the Group during the first nine months are detailed hereunder:

Commitments related to the sharing of the networks with Bouygues Telecom

The network sharing agreement signed with Bouygues Telecom on January 31, 2014, and its amendment dated October 24, 2014 (see Note 17—Post-Closing Events), represents given commitments for approximately €1,830 million and received commitments for approximately €2,210 million, representing a net commitment received by SFR of approximately €380 million, which applies over the entire duration of the long-term agreement.

Note 15. Contractual Commitments (Continued)

Commitments related to the signing of the Oise THD contract on March 27, 2014

As part of the public service delegation (DSP) in the Oise area, the SFR Group has launched a new ''Oise Very High Speed Internet'' project for the operation and marketing of 280,000 FTTH plugs. The related investment commitment amounts to €125 million over 15 years.

Commitments related to the signing of the Eure-et-Loire Digital on May 27, 2014

As part of the public service delegation (DSP) in the Eure-et-Loire area, the SFR Group has launched a new ''Eure-et-Loire Very High Speed Internet'' project for the operation and marketing of 90,000 FTTH plugs by 2020. The related commitment amounts to €28 million.

15.2. Other Commitments

Apart from the commitments indicated above, the net contractual commitments made by the combined Group are described in the notes to the condensed interim combined financial statements as of June 30, 2014.

Note 16. Litigations

Legal Proceedings

In the normal course of its business, SFR is subject to various lawsuits, arbitrations and governmental, administrative or other proceedings.

The costs which may result from these proceedings are only recognized as provisions when they are likely to be incurred, and when the obligation can be reasonably quantified or estimated, in which case the amount of the provision represents our best estimate of the risk, provided that we may, at any time, reassess such risk if events occur during such proceedings.

To the company's knowledge, there is no lawsuit, arbitration and governmental or other proceedings, or exceptional event (including any proceedings of which the issuer is aware which are pending or threatened) which may have or which have had a significant impact on the company's and on its group's financial position, profit, business and property during the previous nine months, other than those described below.

Are mentioned in the present note all significant litigations in which SFR is in request and defense.

Claim of Orange Against SFR and Bouygues Telecom

On April 29, 2014, Orange brought a claim before the Competition Authority on the subject of an agreement for sharing part of the mobile access networks between Bouygues Telecom and SFR, signed on January 31, 2014. Orange considers that this agreement constitutes a collusive practice, through concerted action and horizontal agreement, between rival companies. Orange demanded the immediate suspension of its implementation as an interim measure. The Competition Authority rejected Orange's demand of interim measures on September 25th, 2014. Orange filed an appeal before the Paris court of Appeal against this decision. In parallel, the case is still under investigation by the Competition Authority, on the merits.

Bouygues Telecom's Complaint against SFR and Orange in connection with the wholesale mobile call termination and retail mobile telephony markets

Claim Before the French Competition Council

Bouygues Telecom brought a claim before the French Competition Council against SFR and Orange for certain alleged unfair trading practices on the call termination and mobile markets (''price scissoring''). On May 15, 2009, the French Competition Authority resolved to postpone its decision on the issue and remanded the case for further investigation. On December 13, 2010, SFR was heard on these allegations by the instructing magistrate. On August 18, 2011, SFR received a notification of grievances in which the Competition Authority noted the existence of abusive price discrimination practices. On December 13,

Note 16. Litigations (Continued)

2012, the Competition Authority fined SFR €66 million. SFR appealed against this decision. The case was argued before the Paris Court of Appeal on February 20, 2014. The Paris Court of Appeal gave its deliberation on June 19, 2014, under the terms of which it dismissed SFR's procedural arguments, demanded *Amicus Curiae* at the European Commission on the economic and legal matters raised in this case, and postponed its decision on the merits of the case pending the opinion of the Commission.. The Commission gave its opinion on December 1st, 2014. A new hearing by the Court of Appeal is expected on February 25, 2014. On July 9, 2014, SFR filed an appeal before the Cour de Cassation (French Supreme Court) regarding the procedural claims.

Third-Party Damages Litigation

Following the decision of the Competition Authority of December 13, 2012, Bouygues Telecom, OMEA and El Telecom (NRJ Mobile) brought a claim before the Paris Commercial Court against SFR for damages suffered. They are seeking damages of €623.6 million, €67.9 million and €28.6 million, respectively. In compliance with the settlement agreed between SFR and Bouygues Telecom in June 2014, the hearing to close the mediation process was held on September 5, 2014. Notification of the decision on September 11, 2014 did put an end to the litigation between the two companies.

Regarding OMEA and El Telecom's claims, SFR asked the court to stay the damages proceedings pending a final decision or at least the decision of the Paris Court of Appeal. On October 14th, 2014, the Court decided to stay the proceeding until the Paris Court of Appeal decision.

Complaint against Orange before the French Competition Authority (NRA ZO)

On December 9, 2009, SFR and SFR Collectivités brought a claim before the French Competition Authority against Orange for unfair practices.

Following the filing of this claim, SFR brought a claim for damages before the Paris Commercial Court (NRA ZO) against Orange.

Complaint against Orange before the Paris Commercial Court (call termination—call origination)

On February 22, 2010, SFR brought a claim against Orange seeking the rescindment of the Orange call origination charge for the period 2006-2007 and its replacement by a charge that is 2% lower for 2006 and 15% lower for 2007.

On June 25, 2013, all of SFR's claims were dismissed. On July 25, 2013, SFR filed an appeal against the judgment of the Commercial Court.

Complaint by Orange Réunion, Orange Mayotte, and Outremer Télécom against Société Réunionnaise du Radiotéléphone (SRR)

Orange Réunion, Orange Mayotte and Outremer Télécom notified the French Competition Authority of alleged unfair price differentiation practices implemented by SRR on the Consumer market and on the Business market. On September 16, 2009, the Competition Authority delivered interim measures against SRR, pending its decision on the merits.

SRR had to put an end to a price difference exceeding that of the costs borne by SRR according to the on-net/off-net network. As the Competition Authority found that SRR had not fully respected the order it had delivered, on January 24, 2012 it fined it €2 million. With regard to the procedure on the merits, on July 31, 2013 SRR signed a statement of non-contestation of grievances and a letter of commitments. Consequently, the general reporting judge proposed a reduction in the fine incurred by SRR to the board of the Authority.

Following the Authority's decision of September 16, 2009, Outremer Telecom brought action for damages against SRR on June 17, 2013 before the Commercial Court of Paris for the loss it alleges it suffered owing to the practices of SRR. On November 13, 2013, the Court postponed its decision until the decision on the merits by the Competition Authority.

Note 16. Litigations (Continued)

On June 13, 2014, the Authority handed down its decision on the ''Consumer'' portion of the complaint, fining SFR and its subsidiary SRR €45.9 million. The ''Business'' portion is still under investigation by the Competition Authority.

On October 8, 2014, Orange brought action for damages against SRR and SFR before the Commercial Court for the loss it alleges it suffered owing to the practices of SRR. Orange is seeking damages of €135.2 million

Complaint against Orange before the French Competition Authority regarding the mobile telephony services to professionals market

On August 9, 2010, SFR filed a complaint before the French Competition Authority against Orange for anti-competitive practices on the professional mobile market.

Complaint of Orange Against SFR (''Overflow'' Case)

In a complaint filed on August 10, 2011, Orange asked the Paris Commercial Court to compel SFR to immediately stop its practices of unfair ''overflow'' of interconnection to their respective networks.

On December 10, 2013, SFR was ordered to pay €22.1 million to Orange. On January 10, 2014, SFR appealed against this decision.

Complaint against Orange (Abuse of Dominant Position on the Retail Mobile Telephony Secondary Home Market)

On April 24, 2012, SFR filed a complaint before the Commercial Court of Paris against Orange for practices constituting an abuse of its dominant position on the secondary residence market. On February 12, 2014, the Commercial Court of Paris ordered Orange to pay €51 million in damages.

Orange appealed against this judgment. On April 2, 2014, Orange also asked for suspension of the provisional execution of the decision of the Commercial Court. On July 4, 2014, this request was rejected. The Paris Court of Appeal cancelled to commercial court's decision on October 8th 2014. On November 19, 2014, SFR brought the case to the French Supreme Court.

Litigation with Free

On May 21, 2012, Free filed a complaint against SFR before the Paris Commercial Court. Free is challenging the subsidy model associated with SFR's *Carrées* offerings sold over the Internet from June 2011 to December 2012, claiming that it constitutes a consumer credit mechanism and that, as such, SFR is guilty of unfair practices by not respecting the provisions inherent to consumer credit, including providing prior information to customers. Free has asked, among other things, that the Paris Commercial Court compel SFR to inform its customers, and to award damages of €29 million. On January 15, 2013, the Paris Commercial Court dismissed all of Free's claims and awarded SFR the sum of €0.3 million in damages. On January 31, 2013, Free appealed this decision.

Litigation with the UFC

On June 7, 2012, the French Federal Union of Consumers (UFC) filed a complaint before the Paris Court of First Instance (*Tribunal de Grande Instance*) against SFR alleging that the general conditions of use of SFR's *La Carte* offering contain unfair clauses. The UFC is seeking the removal of these clauses and damages.

Complaint against Orange (Unbundled Zones Case)

On November 26, 2012, SFR notified the French Competition Authority of practices constituting an abuse of dominant position on the retail high-speed internet access market in non-unbundled areas.

Note 16. Litigations (Continued)

Complaint against Iliad, Free and Free Mobile

In June 2014, SFR summonsed Iliad, Free and Free Mobile before the Commercial Court of Paris for acts of unfair competition in order to have it recognized that at the time of the launch of Free Mobile and subsequently, Iliad/Free were guilty of disparagement against the services of SFR.

Litigation with the CLCV

On January 7, 2013, the French consumer protection association, CLCV (Consumption, Housing and Quality of Life) filed a complaint before the Commercial Court of Paris against SFR.

The CLCV considers certain clauses contained in the general conditions of subscription of SFR (as well as those of other telephone operators) to be unfair. It is also seeking compensation for the collective loss.

Employee litigation arising from the transfer of customer relations centers in Toulouse, Lyon, and Poitiers

Following the transfer of the customer relations centers located in Toulouse and Lyon to the company Infomobile, and of the center in Poitiers to a subsidiary of the Bertelsmann Group, former employees of these sites filed complaints with the industrial tribunals (*conseils des prud'hommes*) of each of these cities, claiming unfair execution of their employment contracts and fraudulent breach of Article L.1224-1 of the French Labor Code and of the legal provisions relating to dismissal on economic grounds. The findings of the courts on this issue in 2013 were not consistent; the Toulouse Court of Appeal sanctioned the SFR and Téléperformance groups in half the cases, while the courts of Lyon and Poitiers rendered judgments which were favorable to SFR. The cases are at different stages of proceedings: industrial tribunal, Court of Appeal and Supreme Court. On June 18, 2014, the Court of Cassation confirmed the decision of the Court of Appeal of Toulouse.

Disputes with independent distributors (B2C and SFR Business Team)

SFR, like other companies that use an indirect distribution model, faces complaints by its distributors, and almost systematically by its former distributors. These recurring disputes revolve around the abrupt termination of the contractual relationship, the abuse of economic dependency and/or requests for reclassification of a distributor as a commercial agent and, more recently, applications for reclassification of a manager as a branch manager and reclassification of the employment contracts of the employees working at these points-of-sale as employment contracts with SFR. Following several adverse rulings of the Supreme Court in relation to the status of branch managers, various Courts of Appeal have recently issued a number of decisions favorable to SFR. With regard to the reclassification of employment and sales contracts in these disputes, apart from a few exceptions, SFR has benefited from favorable case law.

Note 17. Subsequent Events

Network sharing agreement with Bouygues Telecom

On January 31, 2014, SFR and Bouygues Telecom entered into strategic network sharing agreement. They will roll out a new shared network in an area covering 57% of the French population. This agreement will enable both operators to improve their mobile coverage and generate significant savings over time.

The agreement is based on two principles:

- First, the creation of a joint venture to manage shared radio site assets, in particular passive infrastructure and geographical locations in which the infrastructure and telecom equipment are deployed. SFR and Bouygues Telecom will retain full ownership of their telecom equipment assets and their frequencies;

Note 17. Subsequent Events (Continued)

- Secondly, the provision of RAN-sharing services that the operators mutually provide in 2G, 3G and 4G on shared territory. Each operator is responsible for a percentage of the shared territory, in which it ensures the design, deployment, operation and maintenance of the RAN-sharing service

This network-sharing agreement is similar to numerous arrangements already existing in other European countries. Each operator will retain its own innovative capacity as well as complete commercial and pricing independence. The first cell coverage plans were delivered by each party on April 30, 2014. At this date, each operator was able to review the other's deployment plan, since exchanging technical information on-site during the establishment of sharing agreements is prohibited by the ARCEP. This exchange of information led, on October 24, 2014, to the adaptation of the agreement and in particular regarding certain engineering choices that had been made at the time of negotiation when each party did not have all of the pertinent information about the other's network. The completion of the target network, initially expected for the end of 2017, has been delayed by one year to the end of 2018, to take into account the prior deployment delays.

Altice-Numericable Understanding

On 27th November 2014 Altice and Numericable Group announced the closing of the transaction to combine SFR and Numericable. Vivendi received €13.366 billion in cash of which €200 million will be contributed to the financing of the acquisition of Virgin Mobile by Numericable Group. Vivendi will keep a 20% stake in the new combined entity, which it will be free to sell after a one year lock-up period, subject to Altice's pre-emption right. That day, the company Numericable Group changed its name into Numericable-SFR.

COMBINED FINANCIAL STATEMENTS AND ACCOMPANYING NOTES

Vivendi S.A.
Registered office: 42, avenue de Friedland—75008 Paris

Statutory auditors' report on the Combined Financial Statements of the companies SFR, SIG 50 and subsidiaries for the years ended 31 December 2013, 2012 and 2011

This is a free translation into English of a report issued in French and it is provided solely for the convenience of English-speaking users. This report should be read in conjunction with and is construed in accordance with French law and professional standards applicable in France.

To the Chairman of the Management Board,

In our capacity as Statutory Auditors of Vivendi S.A. and in response to your request, in the framework of the implementation, if applicable, the unbundling project of Media and Telecoms activities of Vivendi Group, we have audited the Combined Financial Statements of the companies SFR, SIG 50 and subsidiaries (hereinafter 'the Group') for the years ended December 31, 2013, 2012 and 2011 (hereinafter 'the Combined Financial Statements') as attached to this report.

These Combined Financial Statements have been approved by your Management Board. Our role is to express an opinion on these statements, based on our audit.

We conducted our audit in accordance with professional standards applicable in France; those standards require that we plan and perform the audit to obtain reasonable assurance about whether the Combined Financial Statements are free of material misstatement. An audit involves performing procedures, using sampling techniques or other methods of selection, to obtain audit evidence about the amounts and disclosures in the Combined Financial Statements. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made, as well as the overall presentation of the Consolidated Financial Statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

In our opinion, the Combined Financial Statements present fairly in all material respects the financial position of the Group as at 31 December 2013, 2012, 2011 and of its financial performance for each of the years then ended, in all material aspects and in accordance with International Financial Reporting Standards (IFRS) as adopted by the European Union.

Without qualifying our opinion above, we draw your attention to note ''Basis of preparation'' which describes the particular context, the scope of combination and accounting policies used in the preparation of the Combined Financial Statements.

SFR

Notes to the Combined Financial Statements

Basis of Preparation

These combined financial statements have been prepared by Vivendi, in its capacity of controlling shareholder of the companies SFR and SIG 50, in the context of potential implementation of the plan to separate the Media and Telecoms businesses of the Vivendi Group.

They have been drawn up on the basis of the accounting data of the companies SFR and SIG 50 and their subsidiaries, as approved for their financial years ending on December 31, 2011, 2012 and 2013, and prepared for the purpose of preparing the consolidated accounts of the Vivendi Group.

These combined financial statements of SFR and SIG 50 and their subsidiaries were approved by the Management board of Vivendi at its meeting on April 8th, 2014.

Context

As they informed the shareholders regularly in 2012 and 2013, Vivendi's Management Board and Supervisory Board have instigated a review of the Group's strategic orientations. In 2013, Vivendi sold the majority of its interest in Activision Blizzard and finalized an agreement with Etisalat for the sale of its shares in Maroc Telecom. The Group decided to concentrate on its media and content businesses, which are in leader positions and are benefiting from a strongly growing digital market. It has strengthened its interest in Canal+ France, in which it now holds 100% of the share capital. Vivendi is also working on the reconfiguration of SFR. The operator is experiencing the first positive effects of its transformation plan, reflecting its benefits at a commercial level while reducing its costs. A network sharing agreement has been concluded with Bouygues Telecom, on part of the mobile network, which will enable it to offer its customers better coverage and improved quality of service. On these bases the Group intends to position the future Vivendi as a dynamic player in media and content. With SFR, it wishes to participate in the reshaping of the telecommunications sector in France by actively exploring all opportunities.

On November 26, 2013, the Supervisory Board approved the appropriateness of the plan to separate the Group into two separate companies: firstly, a new international media group based in France, with very strong positions in music (where it is the worldwide leader), in movies in Europe, in pay-TV in France, Africa, Vietnam and Poland, and in Internet and associated services in Brazil; and secondly the **Telecoms business France**.

Presentation of Telecoms business in France

Telephony business in France comprises mainly:

- the telephony business of SFR SA in France, which is developing mobile, fixed-line, internet and television services with consumers and with business, corporate, community and operator clients. SFR SA operates in mainland France, as well as in La Réunion and Mayotte,
- the business of distributing telecommunications services and products in France.

In order to present the historic financial information of the Group for financial years 2013, 2012 and 2011, combined accounts have been drawn up.

Combination scope

The arrangement that constitute the new autonomous group (hereinafter referred to as the ''Group'') has no independent legal existence prior to the separation, and is made up of entities under the common control of Vivendi.

As of January 1, 2011, the Group principally comprised the following companies:

- the entities held directly and indirectly by SFR SA and its subsidiaries,
- the interest of Vivendi, through SIG 50, in the businesses of distribution of telecommunications products and services, owing to their operational attachment to the business of the Group.

The scope of combination thus excludes the company SPT, held by SFR SA and holder of Maroc Telecom.

The combination scope is presented in Note 27—List of Entities Combined.

Accounting for related to the holding company SPT owning the interest in Maroc Telecom:

- the shares of SPT were cancelled in return for a reduction in equity,
- the dividends received from SPT, net of withholding tax were presented in the Changes in Equity and in the Cash Flow statements, reducing the dividends paid by SFR SA to Vivendi SA.

Conventions used when preparing the combined accounts

The combination of entities under common control as envisaged were recorded in the combined financial statements of the Group at historic book values. These historic combined financial statements of the Group were drawn up on the basis of the values presented in Vivendi's Consolidated Financial Statements, restated for consolidation adjustments and the accounting impact of operations to acquire stakes in the France telephony business by Vivendi.

In the absence of a specific IFRS text dealing with combined financial statements, the Group defined the principles and conventions for combination presented hereunder.

The net debt level accepted in these combined financial statements reflects the debt level and its historic compensation levels with regard to the Vivendi Group or third parties of the entities included in the combined accounts.

Intercompany transactions between the Group and the other entities of the Vivendi Group

All balances relative to current operations between the entities of the Group and the other entities of the Vivendi Group have been presented on the balance sheet as third party asset or liability accounts in the combined accounts.

All loans and borrowing between the entities of the Group and the other entities of the Vivendi Group have been presented as financial assets or liabilities in the combined accounts.

The operations with the other entities of the Vivendi Group are presented in Note 24—Transactions with Related Parties.

Earnings per share

As the combined group is not legally constituted on this date, the number of shares in circulation cannot be established. Consequently, no earnings per share are presented in the Combined Financial Statements.

Income tax

The deferred taxes recorded as tax loss carry-forwards were determined by taking into account the effect of the tax consolidation implemented within Vivendi.

The tax results of the companies included in the tax consolidation perimeter have been taken into account as part of the tax consolidation arrangements implemented by Vivendi, pursuant to the provisions of Article 223-A of the General Tax Code. Pursuant to the tax consolidation convention, carry-forward losses recorded during the period of tax consolidation, and up to December 31, 2013, will remain the property of Vivendi. Consequently, no deferred tax asset has been recognized in respect of these carry-forwards in the combined financial statements presented.

Note 1. Accounting Principles

1.1. General framework

Pursuant to European Regulation 1606/2002 of July 19, 2002, the basis for preparation set out above describes how the International Financial Reporting Standards (IFRS) as adopted by the European Union were applied to prepare the historic combined financial statements as of December 31, 2011, December 31, 2012 and December 31, 2013.

The new Group has never prepared IFRS financial statements, nor has it published financial statements for previous financial years.

Consequently, as a first-time adopter, the Group has prepared its combined financial statements for the financial year ended December 31, 2013 in accordance with IFRS 1—*First-Time Adoption of International Financial Reporting Standards*.

Under IFRS 1, if a subsidiary adopts IFRS after its parent company, the assets and liabilities in the subsidiary's opening balance sheet may be measured:

- either at the carrying amounts based on the subsidiary's contribution to the parent company's historic consolidated financial statements, after restating adjustments relating to the consolidation and to the impacts of accounting for the business combination as a result of which the parent acquired the subsidiary; or
- at the carrying amounts as determined in accordance with IFRS 1, applied at the date of the subsidiary's transition to IFRS. In this case, the IFRS 1 options applied by the subsidiary may differ from those applied by the parent.

In compliance with the option available under IFRS 1, the Group has chosen to draw up its first IFRS combined financial statements on the basis of the carrying amounts of its assets and liabilities as per its contribution to Vivendi's historic financial statements, taking account of the date of Vivendi's transition to IFRS, after eliminating adjustments relating to the Vivendi group consolidation and to the impacts of accounting for the business combinations as a result of which Vivendi acquired interests in SFR and in distribution activities in France.

The transitional provisions for first-time adoption used by the Group are therefore identical to those applied by the Vivendi group upon its transition to IFRS, i.e.:

- Business combinations: business combinations carried out by Group entities prior to January 1, 2004 (the date of Vivendi's transition to IFRS) are not restated.
- Employee benefits: any unrecognized actuarial gains and losses existing at January 1, 2004 are recognized within consolidated equity.
- Share-based payment: IFRS 2 was retrospectively applied as from the opening balance sheet at January 1, 2004. Accordingly, all share-based payment plans for which the rights had not yet vested at January 1, 2004 are recognized in accordance with IFRS 2.
- Cumulative translation differences: gains and losses resulting from the translation into euros of the financial statements of subsidiaries with a functional currency other than the euro were transferred to consolidated reserves as of January 1, 2004.

Vivendi chose not to adopt the exemption available under IFRS 1 allowing certain intangible assets and property, plant and equipment to be remeasured at fair value on its transition to IFRS.

Standards, amendments and interpretations in force

The combined financial statements of the Group as of December 31, 2013 were drawn up in compliance with IFRS as adopted in the European Union (EU) and in compliance with IFRS as published by the International Accounting Standards Board (IASB), effective as of December 31, 2013.

Note 1. Accounting Principles (Continued)

In its 2013 combined financial statements, the Group applied the following new standards and amendments adopted by the European Union with a mandatory effective date of January 1, 2013:

- Amendments to IAS 1—*Presentation of Financial Statements: Presentation of Items of Other Comprehensive Income*, published by the IASB on June 16, 2011, adopted by the EU on June 5, 2012, and published in the EU Official Journal on June 6, 2012. These amendments deal with the presentation of other comprehensive income (''income and expenses recognized in other comprehensive income'' in the combined statement of comprehensive income), which are now shown according to whether or not they are to be subsequently reclassified to the income statement.
- Amendments to IAS 19—*Employee Benefits*, published by the IASB on June 16, 2011, adopted by the EU on June 5, 2012, and published in the EU Official Journal on June 6, 2012. The accounting principles and basis of measurement for employee benefits are presented in Note 1.3.15—Employee benefits.
- IFRS 13—*Fair Value Measurement*, providing a definition of fair value in terms of measurement and prescribing required fair value disclosures, published by the IASB on May 12, 2011, adopted by the EU on December 11, 2012, and published in the EU Official Journal on December 29, 2012. Its application has no material impact on the bases of measurement used by the Group or on the information disclosed in the notes to its financial statements.
- Amendments to various IFRS standards contained in the Annual Improvements to IFRS 2009-2011, published by the IASB in May 2012, adopted by the EU on March 27, 2013, and published in the EU Official Journal on March 28, 2013.

In its combined financial statements as of December 31, 2013, the Group decided to early adopt the new standards on consolidation: IFRS 10—*Consolidated Financial Statements*, IFRS 11—*Joint Arrangements*, IFRS 12—*Disclosure of Interests in Other Entities*, and IAS 28—*Investments in Associates and Joint Ventures*, published by the IASB on May 12, 2011, adopted by the EU on December 11, 2012, and published in the EU Official Journal on December 29, 2012. These standards are effective as of January 1, 2014 in the European Union.

The principles relative to methods of combination introduced by these new standards are presented below in Note 1.3.2—Basis of combination.

New IFRS standards and IFRIC interpretations published but not yet in force

The other main IFRS standards and IFRIC interpretations issued by the IASB/IFRS IC but not yet in force, which the Group has not early adopted and which are likely to affect the Group, include IFRIC 21—*Levies*, published by the IFRS IC on May 20, 2013. The effective date of IFRIC 21 is not yet known since it has not yet been adopted by the EU. The application of this interpretation could lead to changes in the timing of recognition of liabilities for taxes.

The Group is in the process of analyzing the potential impacts of IFRIC 21 on its combined financial statements and on the contents of the notes to the combined financial statements.

Furthermore, the Group is monitoring changes to IFRS 9—*Financial Instruments*, which is intended to replace IAS 39. The IASB has provisionally decided to defer the mandatory effective date of the standard (initially planned for 2015), without deciding on another date.

1.2. Presentation of the combined financial statements

1.2.1. Combined income statement

The principal captions presented in the combined income statement are revenues, operating profit, financial income (expenses), share of profit of associates (companies accounted for under the equity method), income tax and profit.

Note 1. Accounting Principles (Continued)

Operating profit is the result of operations after taking account of net depreciation and amortization expense, additions to provisions, and non-recurring items, classified under other operating income and expenses.

Other operating income and expenses mainly cover restructuring costs, amortization charged against intangible assets acquired in a business combination, gains and losses on the sale of intangible assets and property, plant and equipment, and other non-financial non-recurring income and expenses.

Financial income (expenses) comprises interest expense on loans, interest income generated by cash and cash equivalents, and other financial income and expenses (in particular, the effect of unwinding the discount on assets and liabilities).

1.2.2. Combined other comprehensive income

Other comprehensive income consists principally of translation adjustments, changes in the fair value of cash flow hedging instruments (foreign exchange and interest rate hedges), actuarial gains and losses on post-employment benefits, and the effects of related taxes.

These items are classified according to their nature and shown separately according to whether or not they will be subsequently reclassified to income.

1.2.3. Combined balance sheet

Assets and liabilities with a maturity shorter than the operating cycle, i.e., generally 12 months, are classified under current assets and liabilities. Assets and liabilities maturing after 12 months are generally classified within non-current items, except for deferred taxes which are always classified within non-current items.

1.2.4. Combined statement of cash flows

Net cash flow from (used in) operating activities

To determine the net cash flow from (used in) operating activities, profit is restated for items with no cash impact and for the net change in working capital. Profit is also restated for current and deferred taxes, and for all components of financial income and expenses. Net cash flow from (used in) operating activities also excludes the net change in working capital linked to intangible assets and property, plant and equipment.

Net cash flow from (used in) investing activities

Net cash flow from (used in) investing activities includes acquisitions and sales of intangible assets, property, plant and equipment and financial fixed assets; the net change in working capital linked to intangible assets and property, plant and equipment; and cash flow derived from the gain or loss of control of a subsidiary.

Net cash flow from (used in) financing activities

Net cash flow from (used in) financing activities includes increases and decreases in loans, changes in amounts owed to Vivendi SA, dividends paid, capital increases and borrowing costs, as well as all cash flow impacts of other financing activities.

1.2.5. Group operational performance

The Group considers EBITDA and cash flow from operations (CFFO) to be relevant indicators of the Group's operational performance.

Note 1. Accounting Principles (Continued)

EBITDA

The Group considers EBITDA, a non-accounting indicator, to be a measure of performance. EBITDA shows the profit generated by the Group's activities independently of financing conditions, taxes (corporate income tax) and the obsolescence of plant and equipment (net depreciation/amortization expense and provisions). EBITDA as defined by the Group corresponds to operating profit restated for other operating income and expenses and for net depreciation and amortization expense and provisions for impairment of intangible assets and property, plant and equipment.

CFFO

The Group considers CFFO, a non-accounting measurement, to be a relevant indicator of the Group's operating performance. CFFO chiefly relates to the net cash flow derived from operating activities in the statement of cash flows (SCF), after deducting investments net of disposals and changes in the related working capital, and before deducting corporate income tax payments.

1.2.6. Segment information

In light of prevailing trends in the Group's business resulting in the increased convergence of mobile telephony and high-speed telephony and fixed internet services, Group management monitors operations in a comprehensive, unified manner. The chief operating decision-maker verifies results and operating plans and decides on the allocation of resources at Group level. The Group has identified a single operating segment meeting the criteria of IFRS 8.

Similarly, since virtually all of the Group's business is carried out on French territory, a single geographic segment has been identified.

This presentation could be modified in the future to reflect developments in the Group's businesses and operating criteria.

1.3. Basis of preparation of the combined financial statements

1.3.1. Use of estimates

Preparation of the combined financial statements in compliance with IFRS requires the Group to make certain estimates and assumptions that it deems reasonable and realistic. Even though these estimates and assumptions are regularly reviewed, particularly on the basis of past experience and forecasts, certain facts and circumstances may lead to changes in these estimates and assumptions, which could affect the carrying amount of the Group's assets, liabilities, equity and profit.

The main estimates and assumptions used relate to the measurement of:

- Provisions: risks are estimated on a case-by-case basis, on the understanding that developments in current events may require the risks to be reassessed at any time (see Notes 1.3.14 and 18).
- Employee benefits: assumptions are updated annually, such as the probability that employees will remain employed by the Group up to their retirement, expected changes in future compensation, discount rate and inflation rate, and life expectancy (see Notes 1.3.15 and 19).
- Goodwill: intangible assets with indefinite useful lives and fixed assets under construction: assumptions are updated annually within the framework of impairment tests and relate to cash-generating units (CGUs), future cash flows and discount rates (see Notes 1.3.6 and 8).
- Deferred taxes: estimates concerning the recognition of deferred tax assets are updated annually on the basis of the Group's expected future taxable income or probable changes in temporary differences for assets and liabilities (see Notes 1.3.16 and 6).
- Revenues: the separable elements of a bundled offer must be identified and allocated according to the fair values of each component; the period over which revenues linked to costs of accessing

Note 1. Accounting Principles (Continued)

services should be recognized is to be determined based on the type of product and duration of the contract; and revenues are to be presented either on a net or gross basis according to whether the Group acts as agent or principal (see Notes 1.3.4 and 4.1).

- Intangible assets and property, plant and equipment: estimates of useful lives are based in particular on the effective obsolescence of fixed assets and the use made of those assets (see Notes 1.3.7 and 9, and Notes 1.3.8 and 10).

1.3.2. Basis of combination

The list of combined entities is presented in Note 27—List of combined companies.

Controlled entities

The new model of control introduced by IFRS 10 to replace the revised IAS 27—*Consolidated and Separate Financial Statements* and interpretation SIC 12—*Consolidation—Special Purpose Entities*, is based on the following three criteria, which must be met simultaneously to conclude that control is exercised by the parent company:

- The parent company holds power over the investee when it has effective rights giving it the current ability to direct the relevant activities of the investee, namely activities which have a significant impact on the investee's profitability. Power may result from existing and/or potential voting rights and/or contractual agreements. Voting rights must be substantial, i.e., they must be able to be exercised at any time without limitation, and particularly in connection with decisions relating to key activities. The assessment of whether or not an entity exercises control depends on the nature of the investee's relevant activities, the investee's decision-making process, and the distribution of rights of other shareholders of the investee.
- The parent company is exposed to, or has rights, to variable returns from its involvement with the investee, which may vary according to the investee's performance. The concept of returns is defined broadly, and includes dividends and other types of economic benefit distributed, changes in the value of the investment, cost savings, synergies, etc.
- The parent company has the capacity to exercise its power in order to influence the returns. Power which does not lead to such influence over these returns cannot be defined as control.

Controlled entities are combined in accordance with the full consolidation method.

Full consolidation method

This consists of including in the combined financial statements the asset, liability, income, expense and cash flow items of the companies controlled within the meaning of IFRS 10; making the necessary restatements; and eliminating intragroup transactions and accounts along with intragroup gains and losses. Equity and profit are allocated between the portion attributable to owners of the parent company and the portion attributable to non-controlling interests.

The combined income statement includes the results of subsidiaries acquired during the financial year as from the date of their acquisition. The results of subsidiaries sold during the same period are taken into account up to the date of their sale.

Non-controlling interests in the net assets of the subsidiaries are presented on a separate line of equity under ''Non-controlling interests''. They include the amount of non-controlling interests at the date control was acquired and the share of non-controlling interests in changes in equity as from this date. Except in the case of a contractual agreement specifying otherwise, losses of subsidiaries are systematically divided between equity attributable to owners of the parent company and non-controlling interests, on the basis of their respective percentages of interest, even if these are negative.

Note 1. Accounting Principles (Continued)

Joint Arrangements

IFRS 11—*Joint Arrangements,* which replaces IAS 31—*Interests in Joint Ventures* and interpretation SIC 13—*Jointly Controlled Entities—Non-Monetary Contributions by Venturers*, aims to establish the principles for financial reporting by entities with interests in jointly controlled companies (joint arrangements).

In a joint arrangement, the parties are bound by a contractual agreement that gives them joint control of the arrangement. An entity that is party to an arrangement must therefore determine whether the contractual agreement gives all or certain parties joint control of the arrangement. The existence of joint control is then determined if decisions concerning the relevant activities require the unanimous consent of the parties jointly controlling the arrangement.

Joint arrangements are classified into two categories:

- Joint operations: these are joint arrangements whereby the parties that have joint control over the arrangement have rights to the assets, and obligations for the liabilities, relating to the arrangements. Those parties are called joint operators. The joint operator recognizes the full amount of its assets, liabilities, income and expenses, including the share of any such elements held jointly. These arrangements concern joint investment contracts signed by the Group.
- Joint ventures: these are joint arrangements whereby the parties that have joint control of the arrangements have rights to the net assets of the arrangement. Those parties are called joint venturers. Each venturer accounts for its interest in the net assets of the venture in accordance with the equity accounting method (see the section dealing specifically with the equity accounting method).

Associates

Associates over which the Group exercises significant influence are accounted for by the Group under the equity method (see the section dealing specifically with the equity accounting method).

Significant influence is presumed to exist when the Group holds, directly or indirectly, 20% or more of the voting rights of an entity, except where it is clearly demonstrated that this is not the case. Significant influence can also be indicated by representation on the board of directors or on the management board of the entity held, by participation in its policy-making process, by material transactions with the entity, or by interchange of managerial personnel between the Group and the entity.

Equity accounting method

According to the equity accounting method, interests in associates and joint ventures are recorded on the balance sheet at their cost of acquisition, including goodwill and transaction costs. Earn-outs initially measured at fair value and subsequent adjustments are recorded as part of the cost of the investment, when their payment can be measured with sufficient reliability.

The Group's share in the profit or loss of associates and joint ventures is recognized in the income statement, and its share in movements of reserves after the acquisition is recognized in reserves. Movements after the acquisition are recorded as an adjustment to the value of the investment. The Group's share in the losses recorded by an associate and joint venture is recorded to the extent of its investment, except where the Group has a legal or implicit obligation to support the company.

Goodwill is recognized if the acquisition cost exceeds the Group's share in the net fair value of the associate's identifiable assets, liabilities, and contingent liabilities at the date of acquisition. Goodwill is included in the carrying amount of the investment and is taken into consideration in the impairment test relative to this asset.

Note 1. Accounting Principles (Continued)

1.3.3. Foreign currency translation

Translation of foreign currency transactions

Transactions in foreign currency are initially recorded in the functional currency of the entity at the exchange rate in force on the transaction date. At the end of the reporting period, monetary assets and liabilities denominated in foreign currency are translated into the functional currency at the closing exchange rate. All resulting translation differences are taken to profit or loss for the period.

Translation of financial statements of foreign companies

The financial statements of foreign companies whose functional currency is not the euro are translated into euros as follows:

- balance sheet items are translated at the closing exchange rate;
- income statement and cash flow items are translated at the average exchange rate for the financial year.

The resulting translation adjustments are recorded directly in ''Cumulative translation adjustments'' under equity. When the net investments in foreign operations are subsequently sold, the related cumulative translation differences carried in equity are taken to profit or loss.

1.3.4. Revenues

Group revenues are recognized as soon as future economic benefits are likely to flow to the Group and the revenues can be measured reliably.

Group revenues principally comprise sales of equipment, provision of services and rental of telecommunications equipment.

Sales of equipment

Proceeds from the sale of handsets are recognized in revenues when the risks and rewards inherent to ownership are transferred to the buyer.

Separable elements of a bundled offer

Revenues from telephone packages are recorded as a sale with multiple components. Revenues from sales of handsets (mobile phones and other) are recorded upon activation of the line, net of discounts granted to the customer via the points of sale and the costs of activation.

Other acquisition and retention costs, consisting in particular of premiums not associated with sales of handsets as part of telephone packages and commissions paid to distributors, are recorded in administrative and commercial expenses.

When elements of these transactions cannot be identified or analyzed separately from the main offer, they are considered as related elements and the associated revenues are recognized in full over the duration of the contract or the expected duration of the customer relationship.

Provision of services

Revenues from internet access subscriptions or telephone call plans (fixed or mobile) are recorded on a straight-line basis over the duration of the corresponding service.

The Group sells certain telephone subscriptions based on plans under which the call minutes for a given month can be carried over to the next month if they are not used. The minutes carried over are recorded based on the proportion of total telephone subscription revenues they represent, when the minutes are used or when they expire.

Note 1. Accounting Principles (Continued)

Revenues relative to incoming and outgoing calls and off-plan calls are recorded when the service is provided.

Revenues generated by vouchers sold to distributors and by prepaid mobile cards are recorded each time use is made by the end customer, as from when the vouchers and cards are activated. Any unused portion is recorded in deferred revenues at the end of the reporting period. Revenues are in any case recognized upon the expiry date of the cards, or when the use of the vouchers is statistically unlikely.

Sales of services to subscribers managed by the Group on behalf of content providers (principally special numbers and SMS+) are recorded on a gross basis, or net of repayments to the content providers in accordance with IAS 18, and in particular when the content providers are responsible for the content and determine the pricing applied to the subscriber.

The costs of access to the service or installation costs principally billed to operator and corporate clients in relation to ADSL connection services, bandwidth services, and IP connectivity services, are recognized over the expected duration of the contractual relationship and the provision of the principal service.

Revenues linked to switched services are recognized each time traffic is routed.

Revenues from bandwidth, IP connectivity, high-speed local access and telecommunications services are recorded as and when the services are delivered to the customers.

Access to telecommunications infrastructures

The Group provides its operator clients with access to its telecommunications infrastructures by means of different types of contracts: rental, hosting contracts or concessions of Indefeasible Rights of Use (''IRU''). The IRU contracts grant the use of an asset (ducting, fiber optic or bandwidth) for a specified—generally long—period. The Group remains the owner of the asset. Proceeds generated by rental contracts, hosting contracts in Netcenters, and infrastructure IRUs are recognized over the duration of the corresponding contracts, except where these are defined as a finance lease, in which case the equipment is considered as having been sold on credit.

In the case of IRUs, and sometimes rentals or service agreements, the service is paid in advance in the first year. These prepayments, which are non-refundable, are recorded in prepaid income and amortized over the expected term of the related agreements. Amortization is provided over a period of between 10 years and 25 years for IRUs and between 1 year and 25 years for rentals and service agreements.

Sales of infrastructure

The Group builds infrastructure on behalf of certain clients. Since the average duration of the construction work is less than one year, the revenues are taken into account when ownership is transferred. Revenues relative to sales of infrastructures are taken into account when ownership is transferred. A provision is recognized when any contracts are expected to prove onerous.

Loyalty programs

Pursuant to interpretation IFRIC 13, the Group measures the fair value of the incremental benefit granted under loyalty programs. Since this fair value was not material for the periods presented, no revenues have been deferred in this respect.

1.3.5. Cost of sales, and commercial and distribution costs

Cost of sales comprises the purchase cost of goods acquired (including handsets), interconnection costs, network costs and the share of personnel costs and related taxes and duties.

Commercial and distribution costs represent advertising and marketing costs, commercial costs, and customer loyalty and management costs, and are recorded in expenses as incurred.

Note 1. Accounting Principles (Continued)

1.3.6. Goodwill and business combinations

Business combinations after January 1, 2009

Business combinations are recorded under the acquisition method.

The acquisition price (also called ''consideration transferred'') of a subsidiary is the sum of the fair values of the assets transferred and the liabilities assumed by the purchaser on the date of acquisition and the equity instruments issued by the purchaser. The acquisition price includes any earn-outs recognized and measured at acquisition-date fair value.

Earn-outs are recorded initially at fair value, with subsequent changes in fair value taken to profit or loss.

Any costs directly attributable to the acquisition are recorded in expenses in the period in which they are incurred.

At the date of acquisition, goodwill is determined as the difference between:

- the fair value of the consideration transferred, plus any non-controlling interest in the company acquired; and
- the net balance of identifiable assets acquired and liabilities assumed at their acquisition-date fair value.

The initial valuation of the acquisition price and the fair values of the assets acquired and liabilities assumed must be finalized within 12 months of the date of acquisition (measurement period), and any adjustment is recorded as a retroactive adjustment to goodwill. Beyond the measurement period, adjustments are recorded directly in profit or loss. For each business combination, the Group can decide whether to recognize the share of non-controlling interests:

- at fair value on the date of acquisition, whereby goodwill is recognized on these non-controlling interests (full goodwill method); or
- on the basis of its share in the net identifiable assets of the acquired company measured at fair value, whereby only goodwill attributable to owners of the parent company is recognized (partial goodwill method).

Negative goodwill is recorded directly in profit or loss on the income statement.

Goodwill is not amortized but is tested for impairment whenever there is an indication that it may be impaired, and at least once a year at the reporting date. Subsequently, goodwill is measured at its original amount, less any cumulative impairment losses recorded (see Note 8.3—Goodwill impairment tests).

The following principles apply to business combinations:

- In the event of a business combination carried out in stages (step acquisition), the purchaser must remeasure any previously-held equity interest at its fair value on the date of acquisition, and record the resulting gain or loss in the income statement.
- In the event of the acquisition of an additional interest in a subsidiary, the Group records the difference between the acquisition price and the carrying amount of the non-controlling interests within changes in equity attributable to owners of the parent.

Business combinations prior to January 1, 2009

In compliance with IFRS 1, the Group has chosen not to restate business combinations that took place prior to January 1, 2004. The acquisition method of accounting for business combinations was already

Note 1. Accounting Principles (Continued)

accepted by IFRS 3 as published by the IASB in March 2004. However, there are several key differences with the revised standard:

- Minority (non-controlling) interests are measured on the basis of their share in the net identifiable assets of the entity acquired and no fair value option exists.
- Any adjustments to the acquisition price are recorded in the cost of the acquisition only if they are likely to occur and the amounts can be measured reliably.
- Costs directly attributable to the acquisition are recorded as part of the cost of the combination.
- In the event of the acquisition of an additional interest in a combined subsidiary, the difference between the cost of the acquisition and the carrying amount of the minority (non-controlling) interests acquired is recorded in goodwill.

1.3.7. Intangible assets

Intangible assets acquired

Intangible assets acquired separately are recorded at their historical cost less accumulated amortization and impairment losses.

Intangible assets acquired as part of a business combination are recorded at their fair value on the date of acquisition. After initial recognition, intangible assets are recorded at historical cost.

Operating licenses

Operating licenses for telephony services on French territory are recorded based on the fixed amount paid upon acquisition of the license. The variable portion of the license fees, amounting to 1% of the revenues generated by these activities, cannot be reliably measured and is therefore recorded in expenses for the period in which it is incurred.

- The UMTS license is recorded at its historical cost and is amortized on a straight-line basis as from June 2004 (when the service starts) until the end of the licensing period (August 2021), which is its expected useful life.
- The GSM license, renewed in March 2006, is recorded at present value based on 4% of the annual fixed fee of €25 million and is amortized on a straight-line basis from this date until the end of the licensing period (March 2021), which is its expected useful life.
- The LTE license is recorded at its historical cost and is amortized on a straight-line basis as from the date the service starts until the end of the licensing period. The license concerning the 2.6 GHz band, acquired in October 2011, has been amortized since the end of November 2012 (end of licensing period: October 2031). The license concerning the 800 MHz band, acquired in January 2012, was activated on June 3, 2013 and will be amortized over a residual period of 18 years (end of licensing period: January 2032).

Other intangible assets acquired

The costs of identifying sites for relay antennas are capitalized and amortized over their useful life, which is generally ten years and corresponds to the estimated average duration of a lease.

Investments made in the context of concessions or public service contracts, and linked to the rollout of the telecommunications network, are recorded in intangible assets in accordance with interpretation IFRIC 12. The ''intangible asset'' model stipulated by this interpretation applies when the concession holder receives a right to bill users of the public service and the concession holder is essentially paid by the user. These intangible assets are amortized over the shorter of the estimated useful life of the categories of assets in question and the duration of the concession.

Note 1. Accounting Principles (Continued)

Intangible assets also comprise rights of way or access rights obtained. Amortization is generally calculated on a straight-line basis over the shorter of the contractual term and 30 years.

DSL connection costs (service access costs or SAC) billed by the local network operator on setting up unbundling for a customer are capitalized and amortized over the estimated period in which the economic benefits are expected to be consumed, i.e., between two and four years.

Intangible assets generated internally

Intangible assets generated internally are recorded at their historical cost less accumulated amortization and impairment losses.

Research costs are expensed as incurred. Development expenses are capitalized when the Group can demonstrate all of the following:

- the technical feasibility of completing the asset;
- its intention to complete the asset and use or sell it;
- the availability of adequate technical and financial resources to complete the asset;
- its ability to use or sell the asset;
- how the intangible asset will generate probable future economic benefits;
- its ability to measure reliably the expenditure attributable to the intangible asset during its development.

Trademarks and market shares generated internally are not recognized as intangible assets.

Capitalized development costs relating to computer software represent the costs incurred in developing products in-house. Development costs relating to computer software are capitalized when the technical feasibility can be demonstrated and the costs are considered to be recoverable.

Internal and external direct costs incurred to develop software for internal use are capitalized during the software's development phase. The costs resulting from the software's development phase generally include configuration of the software, coding, installation and testing. The costs of major upgrades and improvements that result in additional functionalities are also capitalized. These capitalized costs are amortized over four to eight years.

Subsequent expenses relative to intangible assets are capitalized only if they increase the future economic benefits associated with the corresponding specific asset. Other costs are expensed as incurred.

Borrowing costs

Since the method of rolling out intangible assets in stages does not generally involve a long period of preparation, the Group does not generally capitalize the borrowing costs incurred during the acquisition or production of intangible assets.

1.3.8. Property, plant and equipment

Property, plant and equipment are recorded at their historical cost less accumulated depreciation and impairment losses. Historical cost includes acquisition or production cost, any costs directly attributable to bringing the asset to the necessary location and condition, and the estimated costs of dismantling and removing the item and restoring the site on which it is located, to the extent of the obligations incurred. Borrowing costs that are directly attributable to assets requiring over one year to be ready for their intended use are capitalized as part of the cost of property, plant and equipment.

Note 1. Accounting Principles (Continued)

However, subsequent upkeep costs (repairs and maintenance) relating to property, plant and equipment are recorded in profit or loss. Other subsequent expenditure that helps to increase the productivity or useful life of the asset are recorded as part of the cost of that asset.

When an item of property, plant and equipment consists of significant components with different useful lives, the components are recorded and depreciated separately. Depreciation is calculated on a straight-line basis over the useful life of the asset.

In the specific case of Netcenter buildings, the depreciable amount takes account of a residual value at the end of the useful life.

Property, plant and equipment principally comprise network equipment.

Useful lives are as follows:

Buildings, incl. technical buildings	15 to 25 years
Fixtures, fittings and furniture	5 to 10 years
Equipment and industrial tools	5 years
Set-top boxes and access costs	4 years
Network equipment:	
—Fiber optic/FTTH	50 years
—Pylons	20 years
—Other network equipment	4 to 8 years
Miscellaneous equipment	3 to 5 years

The estimated useful lives are regularly reviewed and any changes to estimates are recorded on a prospective basis.

Depreciation expense is recorded in either cost of sales, commercial and distribution costs, or general expenses according to the function of the asset to which it relates.

Telecommunications equipment and hardware are investments which are largely affected by technological developments: retirements or accelerated depreciation may be recorded if the Group has to retire certain technical models earlier than expected or if it has to review the estimated useful life of certain categories of equipment.

The costs of links and connections are classified as property, plant and equipment. These costs are depreciated over their useful life, i.e., eight years.

Commercial contracts under which the Group supplies telecommunications capacity are analyzed in light of interpretation IFRIC 4—*Determining Whether an Agreement Contains a Lease*:

- Indefeasible Rights of Use (''IRU'') contracts grant the use of an asset over a specified term. IRU contracts that grant a specific right of use over a determined part of the underlying asset in the form of fibers or dedicated wavelengths are treated as leases. IRU contract costs are capitalized if the duration of the right granted is for the majority of the useful life of the underlying asset, and are depreciated over the term of the contract.
- Some commercial contracts to provide capacity are defined as service agreements since in general no specific asset is made available in such contacts. Contractual fees are recorded in expenses over the period.

FTTH rollout

Decision No. 2009-1106 of the *Autorité de Régulation des Communications Electroniques et des Postes* (ARCEP) [French Post and Electronic Communications Regulation Authority] dated December 22, 2009 governs the rollout of fiber optic in very densely populated areas by creating joint investment rules for telephone operators. The reference offers published by the operators in compliance with the provisions of this decision are covered by IFRS, specifically IFRS 11—*Joint Arrangements*. Thus, when the Group is

Note 1. Accounting Principles (Continued)

joint investor from the outset, only its share of the assets is kept in property, plant and equipment, and when it is an investor *a posteriori*, the IRU or right of use is recorded in property, plant and equipment. The same treatment is applied to joint investments in less dense populated areas as defined by the ARCEP.

Finance lease agreements

Lease agreements for property, plant and equipment for which substantially all risks and rewards inherent to ownership are transferred to the Group are considered as finance lease agreements.

Property, plant and equipment acquired under finance leases are recorded in property, plant and equipment with a matching entry to a liability account. Assets acquired under finance leases are capitalized based on the lower of the present value of future lease payments and market value, and the corresponding liability is recorded in ''Borrowing and other financial liabilities''. These assets are generally depreciated on a straight-line basis over their estimated useful life, corresponding to the useful life applied to assets of the same type owned outright, or, if the duration of the lease is shorter than the useful life of the asset leased and if it is not reasonably certain that ownership of the asset will be transferred to the lessee at the end of the lease term, over the duration of the lease.

Site dismantling and restoration

The Group has a contractual obligation to dismantle and restore the sites of its mobile and fixed network upon expiry of a lease, if the lease is not renewed. In light of this obligation, site restoration costs are capitalized on the basis of:

- an average unit cost of restoring sites;
- assumptions concerning the lifespan of the dismantling asset; and
- a discount rate.

Investment subsidies

Investment subsidies received are recorded on the balance sheet as a deduction from the property, plant and equipment to which they relate. Investment subsidies are taken to profit or loss in line with the depreciation charged against the assets financed.

1.3.9. Impairment of goodwill, property, plant and equipment and intangible assets

The Group reviews the carrying amount of goodwill, other intangible assets, property, plant and equipment and assets under construction each time events or changes in the market environment indicate that they may be impaired. Goodwill, intangible assets with indefinite useful lives and intangible assets under development are tested for impairment in the fourth quarter of each financial year.

The impairment test consists of comparing the recoverable amount of a fixed asset or cash-generating unit (CGU) with its carrying amount. If the recoverable amount of an asset or CGU is less than its carrying amount, the carrying amount is written down to the recoverable amount and the impairment loss is immediately recorded in the income statement under other operating expenses. In testing goodwill allocated to a CGU or group of CGUs for impairment, the impairment loss is charged first to the carrying amount of goodwill and then to the other assets pro rata to their carrying amount.

A CGU is the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows generated by other assets or groups of assets. If an asset does not generate cash inflows that are largely independent of cash inflows generated by other assets or groups of assets, recoverable amount is determined by reference to cash-generating units.

Note 1. Accounting Principles (Continued)

Group management monitors the return on investment relating to its acquisitions on an aggregate basis at Group level. This operating entity is the only CGU at the level of which the impairment tests are carried out.

Recoverable amount is determined as the higher of value in use and fair value less costs to sell.

The value in use of each asset or group of assets is determined using the discounted cash flows method (DCF), based on cash flow projections consistent with the most recent budget and business plan approved by management over periods spanning one to six years. The growth rates used to value the CGU are those used when preparing the CGU's budget and the business plan. For subsequent periods, the growth rates are estimated by the Group by extrapolating the rates used in the budgets and business plans. These rates do not exceed the medium- to long-term growth rates for the markets in which the Group operates. The discount rates used reflect current assessments by market participants of the time value of money and the risks specific to each asset or group of assets.

Fair value less costs to sell corresponds to the amount that could be obtained from the sale of an asset or group of assets between knowledgeable, willing parties in an arm's length transaction, less the costs of the sale. These amounts are determined by reference to market data (comparison with similar listed companies, with the value attributed to similar assets or companies during recent transactions, or stock market prices) or otherwise using the discounted cash flow method.

Impairment losses recorded against property, plant and equipment and intangible assets (excluding goodwill) may be reversed at a later date if the recoverable amount becomes once again higher than the carrying amount. However, the increased carrying amount attributable to the reversal of the impairment loss shall not exceed the carrying amount that would have been determined (net of amortization or depreciation) had no impairment loss been recognized for the asset in prior periods. Impairment losses recorded against goodwill are irreversible.

1.3.10. Non-derivative financial assets

In accordance with IAS 39, financial assets are classified in one of the following four categories:

- assets at fair value through profit or loss;
- held-to-maturity assets;
- loans and receivables;
- financial assets available for sale.

In accordance with IFRS 7, the information provided in the notes to the financial statements concerning financial instruments enables:

- the items to be reconciled with those presented in the balance sheet;
- the importance of financial instruments to be assessed in light of the Group's situation and financial performance;
- the nature and extent of the Group's exposure to risks arising on financial instruments to be assessed at the end of the reporting period.

Purchases and sales of financial assets are recorded at the transaction date, which is the date on which the Group has committed to the purchase or sale of assets. A financial asset is derecognized if the contractual rights to the related cash flows expire or if the asset is transferred.

At the time of initial recognition, financial assets are recorded on the balance sheet at their fair value, plus any transaction costs directly attributable to the acquisition or issuance of the asset (except for financial assets at fair value through profit or loss, for which transaction costs are recorded in profit or loss).

The fair value of the principal financial assets and liabilities on the Group's balance sheet was calculated as detailed in Note 23—Financial instruments.

Note 1. Accounting Principles (Continued)

A financial asset is defined as current when the maturity of the cash flows expected to derive from the instrument is less than one year.

Financial assets at fair value through profit or loss

These are financial assets held for trading purposes and intended to be resold in the near term.

Gains and losses resulting from changes in the fair value of financial assets in this category are recorded in profit or loss in the period in which they occur.

The main financial assets at fair value through profit or loss include UCITS.

The large majority of these assets are classified on the balance sheet under cash and cash equivalents.

Held-to-maturity financial assets

Financial assets held until maturity are non-derivative financial assets other than loans and receivables that have fixed or determinable payments and fixed maturity and which the Group has the intention and ability to hold to maturity. After their initial recognition, they are carried at amortized cost using the effective interest rate method.

The main held-to-maturity financial assets include financial assets linked to the Qualified Technology Equipment (QTE) operations settled in 2012. These assets are classified on the balance sheet as non-current financial assets.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments which are not listed on an active market. These assets are recognized at amortized cost using the effective interest rate method.

This category principally includes trade accounts receivable and other receivables detailed in Note 14—Trade accounts receivable and other receivables, along with the other assets such as guarantee deposits and advances to associates mentioned in Note 12—Other current and non-current assets.

Trade accounts receivable and other receivables are initially recorded on the balance sheet at their fair value. Due to their fairly short maturities, the fair value of these items generally corresponds to their nominal value, except when the impact of discounting is material.

Trade accounts receivable resulting from the Group's commercial offers include certain past-due receivables that have been impaired according to the rules defined by the Recovery and Litigation department. The impairment rates used differ according to the category of clients and/or offers, and are regularly updated to reflect the latest trends and in particular, recovery history. Where applicable, impairment may be recognized against other receivables based on the estimated risk of non-recovery.

Financial assets available for sale

Financial assets available for sale include non-derivative financial assets which are designated as available for sale or are not allocated to other categories of financial assets.

Financial assets available for sale are recorded at their fair value. Gains and losses on financial assets available for sale are recorded in other comprehensive income until the investment is derecognized or until it is demonstrated that it has suffered a material and other-than-temporary loss in value, on which date the cumulative gains and losses carried in other comprehensive income are reclassified to the income statement.

This category includes non-combined equity securities. These assets are classified on the balance sheet under non-current financial assets.

Note 1. Accounting Principles (Continued)

Impairment of non-derivative financial assets

An impairment loss is recorded on an asset or a group of financial assets if there is an objective indication of impairment resulting from one or more events occurring after the initial recognition of the asset, and these events have a negative impact on the future cash flows expected to derive from the financial asset or group of financial assets.

Impairment recognized against a financial asset at amortized cost corresponds to the difference between its carrying amount and the present value of the estimated future cash flows, discounted at the effective original interest rate.

Impairment recognized against a financial asset available for sale is calculated by reference to its fair value.

An impairment test is carried out on each material financial asset. Other assets with similar risk characteristics are grouped together for impairment testing purposes.

Impairment losses are recognized in profit or loss. Where impairment is charged against assets available for sale, the cumulative negative changes in fair value previously recognized in equity are transferred to profit or loss.

Impairment is reversed if the reversal can be objectively linked to an event occurring after it was recognized. Reversals of impairment charged against financial assets carried at amortized cost and financial assets available for sale representing interest rate instruments are recognized in profit or loss. Reversals of impairment charged against financial assets available for sale representing equity instruments are recorded directly in equity.

Impairment relative to assets recognized at cost may not be reversed.

1.3.11. Inventories

Inventories principally comprise packs (mobiles associated with a right to access SFR services), individual mobile phones, ADSL boxes and accessories.

Inventories are carried at the lower of cost and net realizable value. Cost principally comprises purchase costs and other supply costs, and is calculated in accordance with the weighted average cost method. Net realizable value is the estimated selling price in the normal course of business, less the estimated costs necessary to complete the sale.

1.3.12. Cash and cash equivalents

The ''Cash and cash equivalents'' caption includes bank balances, monetary UCITS which meet the specifications of AMF position No. 2011-13 and highly liquid short-term investments with an initial maturity of three months or less, readily convertible into a known amount of cash and subject to an insignificant risk of changes in value.

Marketable securities are carried at fair value through profit or loss.

1.3.13. Non-derivative financial liabilities

Financial liabilities include bond debt, amounts payable to Vivendi SA, commitments to purchase non-controlling interests, and other borrowings such as commercial paper, syndicated loans and finance lease liabilities. Financial liabilities also include other non-derivative financial liabilities.

Borrowings

The loans taken out by the Group are initially recorded at their fair value less any directly attributable costs. Subsequent to initial recognition, they are carried at amortized cost using the effective interest rate method. Issue premiums and issue costs are presented under liabilities on the balance sheet as a

Note 1. Accounting Principles (Continued)

deduction of the nominal amount of the liability. Under this method, interest expense is recognized on an actuarial basis over the duration of the loan.

Other non-derivative financial liabilities

Other non-derivative financial liabilities comprise trade accounts payable and other payables, which are carried at their fair value on initial recognition. In light of their fairly short maturities, the fair value of other non-derivative financial liabilities mostly corresponds to their nominal value. These items are subsequently carried at amortized cost.

Derivative financial instruments

The Group uses various derivative financial instruments to hedge its exposure to the risk of changes in foreign exchange rates. These instruments include foreign exchange futures. All derivative financial instruments are recorded on the balance sheet at their fair value at the transaction date and are remeasured to fair value at the end of each reporting period.

The principal hedging instruments and the calculation of the fair value of derivative instruments are detailed in Note 23—Financial instruments.

1.3.14. Provisions

Provisions are recorded when, at the end of the period, the Group has a legal, regulatory, contractual or implicit obligation resulting from past events; it is probable that an outflow of resources representing economic benefits will be required to settle the obligation; and the amount of the obligation can be measured reliably.

If the effect of the discounting is material, provisions are determined by discounting the expected future cash flows at a pre-tax discount rate which reflects current market assessments of the time value of money. If no reliable estimate of the amount of the obligation can be made, no provision is recorded and information is provided in the notes.

Provisions mainly include:

- provisions intended to cover disputes and litigation arising in the ordinary course of the Group's operations. The estimated amount of these provisions is based on assessment of the level of risk on a case-by-case basis. The occurrence of events during proceedings may require these provisions to be re-estimated at any time;
- provisions for restructuring, which are booked when the restructuring has been announced and a detailed plan has been drawn up or its implementation begun. These provisions are not generally discounted owing to their short-term nature;
- provisions for site dismantling and restoration, which are assessed on the basis of the number of sites in question, an average unit cost of restoring sites and assumptions regarding the useful life of the dismantling asset and discount rate. When a site is dismantled, the corresponding provision is written back;
- provisions for employee benefits, which are detailed in the section below.

1.3.15. Employee benefit schemes

Pursuant to obligations resulting from French legislation and company agreements, the Group offers its employees retirement benefits that can take the form of an indemnity payment upon retirement, or pensions.

For defined benefit schemes, a net liability is recorded on the balance sheet. This liability is determined by independent actuaries using the projected unit credit method. This method is based on assumptions which are updated annually, such as the probability that beneficiaries will continue to be employed by

Note 1. Accounting Principles (Continued)

the Group on retirement, expected changes in future compensation and associated contributions, and an appropriate discount rate.

In terms of funding for these schemes, the Group has taken out insurance contracts aimed at outsourcing some or all of its obligations.

If these plan assets exceed the obligations recorded, a financial asset is recognized within the limit of the present value of future repayments and expected reductions in future contributions to the plan.

The Group records de facto employee benefit assets and liabilities together with the corresponding net expense over the entire estimated service lives of employees. Actuarial gains and losses relative to post-employment benefits are recognized in full in ''Other comprehensive income'' when they arise.

The cost of the schemes is recorded in operating profit, with the exception of the cost of unwinding the discount and the theoretical return on plan assets, which are recorded in other financial income and expenses.

All past service costs relating to plan changes and curtailments are immediately recorded on the income statement.

1.3.16. Income Tax

The Group calculates its income taxes in compliance with the tax legislation in force in the countries where earnings are taxable.

Current tax expense is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period in the countries where the Group operates and generates taxable profit. Management periodically evaluates the tax positions taken with regard to applicable tax legislation when this is subject to interpretation, and where appropriate, determines the amounts it expects to pay to the tax authorities.

Differences at the end of the reporting period between the carrying amount of assets and liabilities in the balance sheet and their tax base represent temporary differences. In accordance with the balance sheet liability method, these temporary differences give rise to the recognition of:

- deferred tax assets, when the value of an asset for tax purposes is higher than its carrying amount and when the value of a liability for tax purposes is lower than its carrying amount (expected future tax benefit); or
- deferred tax liabilities, when the value of an asset for tax purposes is less than its carrying amount or when the value of a liability for tax purposes is higher than its carrying amount (expected future tax expense).

Deferred tax assets and liabilities are determined on the basis of the tax rates and tax laws expected to apply in the financial year in which the asset will be realized or the liability settled. These estimates are reviewed at the end of each reporting period in order to reflect any changes to the applicable tax rates.

Deferred tax assets are recorded for all deductible temporary differences, tax loss carryforwards and unused tax credits; to the extent that it is likely taxable profit will be available. The carrying amount of deferred tax assets is reviewed at the end of each reporting period and, where applicable, adjusted to take account of the probability that taxable profit will be available against which they can be utilized. To assess the probability that taxable profit will be available, elements taken into account include the Group's earnings in previous years, future profit forecasts, and non-recurring items that are not likely to recur in the future. Accordingly, any assessment of the Group's ability to utilize its deferred tax assets is largely based on judgment. If the Group's future taxable earnings prove significantly different to those anticipated, the Group would be obliged to adjust the carrying amount of the deferred tax assets and this could have a significant impact on its balance sheet and profit.

Note 1. Accounting Principles (Continued)

The accounting for deferred taxes arising on the taxable earnings of companies included in the scope of Vivendi's tax consolidation is detailed in the ''Corporate income tax'' paragraph within the section describing the basis for preparing the combined financial statements.

Deferred tax assets and liabilities are offset when the following two conditions are met:

- the Group has a legal right to set off current tax assets and liabilities; and
- the deferred tax assets and liabilities relate to taxes levied by the same tax entity.

Taxes relative to items recognized directly in other comprehensive income are recorded in other comprehensive income and not in the income statement.

1.3.17. Share-based payment

In order to align the interests of directors and employees with those of shareholders by giving them an additional incentive to improve the company's performance and increase the share price over the long term, Vivendi has set up payment plans for Group directors and employees based on the Vivendi share (share purchase plans, performance share plans, free share plans) or other equity-settled equity instruments based on the Vivendi share price (share subscription options). Vivendi's Management Board and Supervisory Board have approved these awards. They have also set performance criteria for the share subscription options and performance shares that determine whether or not these instruments vest. All plans are awarded on condition that the beneficiary continues to be employed by the Group on the vesting date.

The share of plans relative to Group employees is rebilled by Vivendi SA to SFR SA.

Recognition

Equity-settled share-based payment plans are recognized as personnel costs at the fair value of the instruments awarded, with a matching entry to a payables account.

The fair value of the instruments awarded is estimated and fixed at the grant date using a binomial model based on assumptions revised at the measurement date such as the estimated volatility of the shares in question and a discount rate corresponding to the risk-free interest rate and estimated dividend rate. The estimated life of an option is calculated as the average of the vesting period of the rights and the contractual life of the instrument.

1.3.18. Earnings per share

Basic earnings per share is obtained by dividing profit for the period by the weighted average number of shares in circulation during the period.

Diluted earnings per share is obtained by dividing profit for the period by the weighted average number of shares in circulation during the period, adjusted for the effect of all existing diluting instruments.

1.3.19. Contractual commitments, contingent assets and liabilities

Each year, the Group draws up a detailed list of all contractual obligations, financial and commercial commitments and contingent obligations to which it is party or to which it is exposed. This list is regularly updated by the competent departments and reviewed by Group management.

Note 2. Changes in Combination Scope

Financial Year 2011

La Poste Telecom

In 2011, SFR and La Poste created a joint subsidiary, La Poste Telecom, owning 49% and 51% respectively. This subsidiary is a mobile virtual network operator (MVNO) addressing the mass market

Note 2. Changes in Combination Scope (Continued)

and providing a wide range of mobile telephone services under the brand La Poste Mobile through the La Poste outlet network. This company is accounted under equity method in the combined financial statements of the Group.

Financial Year 2012

Numergy

On August 31, 2012, SFR together with Bull and the Caisse des Dépôts et Consignations created the company Numergy. SFR holds 46.7% stake. Numergy provides to all economic players IT infrastructures capable of hosting remotely accessed and secure data and applications, i.e. ''cloud computing'' services. This company is accounted under equity method in the combined financial statements of the Group.

Note 3. Segment information

As indicated in the basis of preparation of the combined financial statements presented in the introduction of Note 1—Accounting Principles, the Group has only identified a single operating segment in compliance with IFRS 8—*Operating Segments.*

Geographic information

Moreover, as the Group's operations are located in France, a single geographical area is used.

Information on main customers

No customer represents more than 10% of the Group's revenues.

Note 4. Operating Income

The breakdown of the elements included in the operating income is presented in Notes 1.3.4—Revenues, 1.3.5—Cost of sales, commercial and distribution costs, and 1.2.1—Combined income statement.

4.1. Breakdown of Revenues

	2013	2012	2011
	(in millions of euros)		
Sales of goods	540	516	568
Sales of services	9,658	10,772	11,615
Revenues	**10,199**	**11,288**	**12,183**

4.2. Other Operating Income and Expenses

	2013	2012	2011
	(in millions of euros)		
Other operating income	**2**	**11**	**14**
Amortization of customer bases recognized in business combinations[a]	(66)	(66)	(67)
Restructuring costs[b]	(93)	(187)	(12)
Other	(10)	(17)	(6)
Other operating expenses	**(169)**	**(270)**	**(84)**

(a) The amortization of customer bases recognized in business combination represents the amortization of the customer bases recognized at the acquisition of the Neuf Cegetel Group in 2008 (refer to Note 9—Intangible Assets).

Note 4. Operating Income (Continued)

(b) The restructuring costs principally include the voluntary redundancy plan launched by SFR in 2012. In 2013, the Group continued its transformation plan to adapt its business for the changing market environment and maintain its investment in very high-speed fixed and mobile. The voluntary redundancy plan closed in August 2013, and concerned 873 employees.

4.3. Personnel Costs and Average Employee Numbers

	2013	2012	2011
	(in millions of euros, except number of employees)		
Annual average number of full-time equivalents	**13,870**	**14,277**	**14,455**
Of which UES SFR[a]	9,106	9,524	9,529
Of which other combined entities	4,764	4,753	4,926
Salaries and wages[b]	(734)	(652)	(632)
Social security contributions	(301)	(294)	(271)
Capitalized personnel costs	88	79	76
Salaries and related costs	**(947)**	**(867)**	**(828)**
Share-based compensation[c]	(27)	(32)	(23)
Employee benefit[d]	6	(4)	(3)
Other personnel costs[e]	(109)	(153)	(170)
Personnel costs	**(1,077)**	**(1,056)**	**(1,025)**

(a) UES means the social and economic unit.

(b) The 2013 versus 2012 change essentially results from the voluntary redundancy plan.

(c) Re-invoiced in totality by Vivendi (refer to Note 17—Remunerations based on equity instruments).

(d) Cost of services delivered related to pension schemes, of which the detail is presented in Note 19—Post-Employment Benefits.

(e) The other personnel costs include profit sharing, performance-based bonuses, social security and related contributions an other employee benefits (such as contributions to employee welfare schemes, etc.).

Note 5. Financial Income

As net financing costs are presented directly in the income statement, other financial income and expenses are detailed hereunder:

	2013	2012	2011
	(in millions of euros)		
Other financial income[a]	**2**	**2**	**8**
Change in value of derivative instruments	—	0	(40)
Effect of undiscounting liabilities[b]	(7)	(10)	(11)
Effect of undiscounting impairment[c]	(6)	(5)	(5)
Change in impairment on financial assets	(1)	(9)	(0)
Other	(10)	(10)	(12)
Other financial expenses	**(24)**	**(34)**	**(70)**

(a) The other financial income mainly includes, default interest, various proceeds of bank management, and interest on long-term advances granted to equity-accounted companies.

(b) Principally concerns the debt related to the license GSM.

(c) Principally concerns the provision for employment benefits plans and the provision for site rehabilitation presented in Note 18—Provisions.

Note 6. Income Tax

For information, some companies belong to a group integrated under the French Tax Group System for tax purposes as authorized under *Article 223 A du CGI et suivants*:

- SFR S.A., since 2011, and since 2012 a few subsidiaries more than 95% owned, are included in the tax group system, where Vivendi is the head company of the Group. The tax each member company is liable to pay is paid by Vivendi, which is alone liable to the tax authorities.
- CID S.A. formed a tax group system from January 1, 2010 with the subsidiaries more than 95% owned by it. CID is also solely liable for corporate income tax of which it is the parent company.

6.1. Breakdown of income tax

	2013	2012	2011
	(in millions of euros)		
Income tax expense			
Current	(282)	(559)	(566)
Deferred	(33)	43	31
Income tax	**(315)**	**(516)**	**(535)**
Total income tax paid	**(299)**	**(537)**	**(643)**

6.2. Tax proof

	2013	2012	2011
	(in millions of euros)		
Net income	426	752	1,400
Adjustment:			
Income tax	(315)	(516)	(535)
Net income from discontinued operations	—	—	—
Pretax income from continuing operations	**742**	**1,267**	**1,935**
French statutory tax rate	38.0%	36.1%	36.1%
Theoretical income tax	**(282)**	**(458)**	**(699)**
Reconciliation of the theoretical and effective tax rate			
Permanent differences[(a)]	(22)	(40)	(4)
Tax credits/Additional tax demands	(2)	(1)	4
Assessment of deferred tax assets[(b)]	(5)	(7)	169
Net income(loss) of equity-accounted affiliates	(5)	(10)	(6)
Income tax	**(315)**	**(516)**	**(535)**
Effective tax rate	42.5%	40.7%	27.6%

(a) Mainly includes, the impact of consolidating 15% of the financial interest calculated on amounts provided to the Group and the tax loss carry-forwards passed on to Vivendi under the Consolidated Global Profit Tax System.

(b) As of December 12, 2011, an amount of €452 million in tax loss carry-forwards was transferred to SFR SA as part of the merger with VTI. These tax loss carry-forwards, which were not recognized, were entirely used up over financial year 2011. The impact on the reconciliation between theoretical income tax and actual income tax at end 2011 amounted to €163 million.

Note 6. Income Tax (Continued)

6.3. Changes in Deferred Taxes by Type Changes in deferred tax assets/(liabilities)

The breakdown of deferred tax assets and liabilities by nature for years ended 2011 to 2013 is as follows:

Financial year 2013

	Opening Balance	Income statements	Other	Closing Balance
		(in millions of euros)		
Deferred tax assets				
Tax losses carry forward	65	8	(0)	73
Provisions	134	(45)	3	92
Fixed assets	105	10	(0)	115
Other	67	(7)	(0)	60
Offsetting[(a)]	(136)	—	12	(124)
Gross deferred tax assets	**235**	**(34)**	**15**	**216**
Unrecognized assets				
Tax losses carry forward	(61)	(9)	0	(69)
Other	(17)	(3)	(0)	(20)
Net deferred tax assets	**157**	**(45)**	**15**	**127**
Deferred tax liabilities				
Fixed assets	(104)	23	(0)	(82)
Other	(33)	(10)	0	(44)
Offsetting[(a)]	136	—	(12)	124
Deferred tax liabilities	**(1)**	**12**	**(12)**	**(2)**
Net deferred tax assets (liabilities)	**156**	**(33)**	**2**	**125**

Financial Year 2012

	Opening Balance	Income statement	Other	Closing Balance
		(in millions of euros)		
Deferred tax assets				
Tax losses carry forward	61	3	0	65
Provisions	60	69	5	134
Fixed assets	127	(21)	0	105
Other	81	(14)	(0)	67
Offsetting[(a)]	(157)	—	20	(136)
Gross deferred tax assets	**173**	**36**	**26**	**235**
Unrecognized assets				
Tax losses carry forward	(51)	(9)	—	(61)
Other	(13)	(4)	(0)	(17)
Net deferred tax assets	**109**	**23**	**26**	**157**
Deferred tax liabilities				
Fixed assets	(133)	30	(1)	(104)
Other	(24)	(10)	0	(33)
Offsetting[(a)]	157	—	(20)	136
Deferred tax liabilities	**(0)**	**20**	**(21)**	**(1)**
Net deferred tax assets (liabilities)	**108**	**43**	**5**	**156**

Note 6. Income Tax (Continued)

Financial Year 2011

	Opening Balance	Income statement	Other	Closing Balances
	(in millions of euros)			
Deferred tax assets				
Tax losses carry forward	55	(156)	162	61
Provisions	57	5	(2)	60
Fixed assets	131	(8)	4	127
Other	124	(18)	(25)	81
Offsetting[(a)]	(195)	—	38	(157)
Gross deferred tax assets	**171**	**(176)**	**178**	**173**
Unrecognized assets				
Tax losses carry forward	(42)	153	(162)	(51)
Other	(29)	17	(1)	(13)
Net deferred tax assets	**100**	**(7)**	**15**	**109**
Deferred tax liabilities				
Fixed assets	(151)	17	0	(133)
Other	(46)	21	2	(24)
Offsetting[(a)]	195	—	(38)	157
Deferred tax liabilities	**(2)**	**38**	**(36)**	**(0)**
Net deferred tax assets (liabilities)	**98**	**31**	**(21)**	**108**

(a) In accordance with IAS 12, the deferred tax assets and liabilities of the same tax entity are offset insofar as they are related to income taxes levied by the same tax authority. The company has the legal right to offset its tax assets and liabilities.

Note 7. Earnings Per Share

As the combined group was not constituted on this date, the number of shares in circulation is not determinable. Consequently, no earnings per share are presented in the Combined Financial Statements.

Note 8. Goodwill

8.1. Goodwill

	2013	2012	2011
	(in millions of euros)		
Goodwill, Gross	5,194	5,194	5,194
Impairment	(6)	(6)	(6)
Goodwill	**5,188**	**5,188**	**5,188**

This amount includes notably the goodwill generated on the goodwill of Neuf Cegetel, which was €4,837 million.

Note 8. Goodwill (Continued)

8.2. Net change in Goodwill

	2013	2012	2011
	(in millions of euros)		
Gross value at opening balance	**5,194**	**5,194**	**5,212**
Acquisitions	0	1	—
Decreases	—	—	(18)
Gross value at closing balance	**5,194**	**5,194**	**5,194**
Impairment losses at opening balance	**(6)**	**(6)**	**(6)**
Change	—	—	—
Impairment losses at closing balance	**(6)**	**(6)**	**(6)**
Net value at end of period	**5,188**	**5,188**	**5,188**

8.3. Goodwill impairment Test

The return on investment of acquisitions is monitored at Group level, the only operating sector on which impairment tests are carried out.

Main assumptions applied to determine the recoverable values

The recoverable value is determined upon the basis of the usual valuation methods, particularly the value in use, based upon the DCF approach.

In this respect, for 2013 the projected cash flow and the financial parameters used are the most recent approved by Management and updated to take account of the strong impact on revenues from the pricing policies decided by the Group in a tougher competitive environment, partially offset by cost savings in line with expectations under the company transformation plan, while maintaining a high level of investments, principally due to the increasing rate of investment in very high-speed mobile.

The projection is based on the 2014-2019 business plan established by Management, which has been projected over five additional years.

The assumptions used for discounting rates and the perpetual growth rate are presented as follows:

	2013	2012	2011
Basis used for recoverable value	Value in use	Value in use	Value in use
Methodology	DCF & comparables model	DCF & comparables model	DCF & comparables model
Discount rate after tax	7.30%	7.30%	7.00%
Perpetual growth rate	0.5%	0.5%	1.0%

On the basis of these assumptions, Management, with the help of independent evaluators, has implemented an impairment test for goodwill, and concluded that the recoverable value of the Group exceeded its book value as of December 31, 2013. The Group therefore did not record any impairment loss as of December 31, 2013 or during the previous periods presented.

Note 8. Goodwill (Continued)

Sensitivity of recoverable amounts

Over the periods analyzed, the recoverable amount would be equal to the carrying amount if the main assumptions evolved as follows:

	Discount rate		Perpetual growth rate		Discounted cash flows
	Applied rate (%)	Increase in the discount rate in order for the recoverable amount to be equal the carrying amount (in number of points)	Applied rate (%)	Decrease in the perpetual growth rate in order for the recoverable amount to be equal to the carrying amount (in number of points)	Decrease in the discounted cash flows in order for the recoverable amount to be equal to the carrying amount (%)
2013	7.30%	0.60 pt	0.50%	−1.25 pt	−10%
2012	7.30%	3.00 pt	0.50%	−7.00 pt	−34%
2011	7.00%	5.30 pt	1.00%	−14.03 pt	−51%

Note 9. Intangible Assets

9.1. Intangible Assets by nature

The breakdown of intangible assets by nature is as follows:

	2013		
	Gross	Amortization and impairment losses	Net
	(in millions of euros)		
Acquired software	2,061	(1,737)	323
Software developed internally	2,695	(1,854)	841
Licenses[a]	2,505	(620)	1,885
Customer databases[b]	562	(476)	86
Other[c]	1,532	(736)	796
	9,355	**(5,424)**	**3,931**

	2012			2011		
	Gross	Amortization and impairment losses	Net	Gross	Amortization and impairment losses	Net
	(in millions of euros)					
Acquired software	1,967	(1,653)	314	1,870	(1,527)	343
Software developed internally	2,438	(1,629)	810	2,135	(1,417)	719
Licenses[a]	2,505	(503)	2,002	1,244	(430)	814
Customer databases[b]	562	(410)	152	562	(344)	218
Other[c]	1,451	(646)	805	1,541	(516)	1,024
	8,923	**(4,841)**	**4,082**	**7,352**	**(4,235)**	**3,117**

(a) The gross amount includes notably:

- the UMTS license for €619 million (acquired in 2001 for the provision of third-generation mobile telephone services in France) and the new frequencies, acquired in June 2010 for €300 million, amortizable over 20 years;
- the GSM license for €278 million. In March 2006, the French government granted SFR S.A. the right to continue to operate this license for 15 years. The license is recorded for its present value (refer to Note 1.3.7—Intangible Assets);

Note 9. Intangible Assets (Continued)

- the LTE license for €150 million acquired in October 2011 under the allocation of 4G frequencies in the 2.6 Ghz band, and for €1,065 million acquired in January 2012 under the allocation of 4G frequencies in the 800 MHz band.

(b) Includes:

- the Neuf Cegetel customer base, valued upon acquisition at €464 million,
- the FrNet2 customer base, valued upon acquisition at €98 million.

(c) Mainly includes site search costs, concession contracts (IFRIC 12), rights of way and service access costs.

9.2. Net Changes in Intangible Assets

The analysis of the change of intangible assets is as follows:

	2013	2012	2011
	(in millions of euros)		
Opening balance	**4,082**	**3,117**	**3,077**
Amortization and impairment losses	(729)	(709)	(661)
Acquisitions	586	1,685	718
Disposals/Write-down	(4)	(4)	(6)
Changes in combination scope	0	—	(5)
Other	(4)	(8)	(5)
Closing balance	**3,931**	**4,082**	**3,117**

The LTE license in the 800 MHz band was activated on June 3, 2013 and will be amortized over a remaining duration of 18 years (end of licensing: January 2032).

9.3. Breakdown of Net Allocations to Amortizations and Impairment Losses

The changes in amortizations and impairment losses are included by destination in the various components of the operating income.

They concern:

	2013	2012	2011
	(in millions of euros)		
Acquired software	(144)	(162)	(178)
Software developed internally	(229)	(215)	(194)
Licenses	(117)	(73)	(72)
Customer bases	(66)	(66)	(67)
Other intangible assets	(172)	(193)	(151)
	(729)	**(709)**	**(661)**

Expenses incurred during the development phases of the Network service projects and the information system development projects are eligible for capitalization. The capitalized amount under intangible assets amounted to €249 million in 2013, as compared with €263 million in 2012 and €264 million in 2011.

Note 10. Tangible Assets

10.1. Property, plant and equipment by nature

The breakdown of Property, plant and equipment is as follows:

	2013		
	Gross	Amortization and impairment losses	Net
	(in millions of euros)		
Land	78	(1)	76
Buildings	2,900	(1,614)	1,286
Equipement and machinery	5,326	(3,267)	2,058
Work in progress	301	—	301
Other	2,397	(1,587)	810
	11,002	**(6,470)**	**4,532**

	2012			2011		
	Gross	Amortization and impairment losses	Net	Gross	Amortization and impairment losses	Net
	(in millions of euros)					
Land	98	(1)	97	84	(1)	83
Buildings	2,744	(1,563)	1,182	1,938	(1,083)	855
Equipement and machinery	5,237	(3,207)	2,030	5,532	(3,310)	2,221
Work in progress	315	—	315	284	—	284
Other	2,218	(1,374)	844	2,168	(1,367)	801
	10,613	**(6,145)**	**4,468**	**10,005**	**(5,762)**	**4,244**

The buildings are principally composed of the hosting of technical sites, buildings and their respective fittings. Technical equipment principally includes network equipment (radio, switching, network administration, network core) and transmissions.

Work in progress, among other things, equipment and network infrastructures.

10.2. Net Changes in Property, plant and equipment

Analysis of the changes in Property, plant and equipment is as follows:

	2013	2012	2011
	(in millions of euros)		
Opening balance	**4,468**	**4,244**	**4,041**
Amortization and write-off	(932)	(868)	(914)
Acquisitions/Increase	1,079	1,080	1,127
Disposal	(21)	(17)	(15)
Changes in combination scope	(61)	12	(1)
Other	(2)	17	6
Closing balance	**4,532**	**4,468**	**4,244**

10.3. Breakdown of Depreciation and Impairment Losses

The changes in depreciation and impairment losses are included by destination in the various components of the operating income.

Note 10. Tangible Assets (Continued)

They concern:

	2013	2012	2011
	(in millions of euros)		
Buildings	(118)	(115)	(124)
Equipment and machinery	(395)	(393)	(420)
Other property, plant and equipment	(419)	(361)	(369)
	(932)	**(868)**	**(914)**

10.4. Property, plant and equipment held under finance leases

The breakdown of property, plant and equipment held under finance leases is as follows:

	2013	2012	2011
	(in millions of euros)		
Lands	5	5	5
Buildings	90	90	90
Technical plant, machinery and equipment	176	176	176
Property, plant and equipment held under finance leases	**270**	**270**	**270**

The minimum future lease payments for Property, plant and equipment held under finance leases is detailed as follows:

	2013	2012	2011
	(in millions of euros)		
Under one year	3	4	9
Two to five years	7	8	12
Over five years	1	3	4
Minimum future lease payments	**11**	**15**	**25**

Note 11. Equity-Accounted Affiliates

11.1. Main Equity-Accounted Affiliates

	2013	2012	2011
	(in millions of euros)		
Numergy[(a)]	95	103	—
La Poste Telecom[(b)]	—	—	17
Other associates	23	19	24
Associates	**119**	**123**	**41**
Synerail[(c)]	—	—	—
Foncière Rimbaud[(d)]	33	15	7
Joint ventures	**33**	**15**	**7**
	152	**138**	**49**

(a) SFR, Bull and the Caisse des Dépôts created the company Numergy, which offer secure IT infrastructures capable of hosting remotely accessible and secure data and applications, i.e.''cloud computing'' services (cf. Note 2—Changes in consolidation scope). Only 25% of the Group's share (in the total amount of €105 million), has been paid up. The remaining unpaid portion was recognized as Liabilities in the amount of €79 million (cf. Note 22—Other current and non-current liabilities).

Note 11. Equity-Accounted Affiliates (Continued)

(b) SFR and La Poste created La Poste Telecom, holding 49% and 51% respectively. This subsidiary is a mobile virtual network operator (MVNO) in the retail market under the La Poste Mobile brand name (cf. Note 2—Changes in Consolidation scope).

The negative value of the equity-accounted associated of La Poste Telecom was recognized at zero with an offsetting entry in provisions for contingencies and liabilities in the amount of €14 million at end 2013.

(c) On February 18, 2010, a consortium formed with SFR, Vinci and AXA (each at 30%) and TDF (10%) signed the GSM-R public/private partnership agreement with Réseau Ferré de France. This agreement, of a duration of 15 years and a total amount of €1 billion, covers the financing, construction, operation and maintenance of a digital telecommunications network that enables to conference mode communications (voice and data) between train drivers and team on the ground. It will be rolled out progressively over 14,000 km of conventional and high-speed railway lines in France. The negative value of the equity-accounted associated of Synerail was recognized at reduced to zero with an offsetting entry in provisions for contingencies and liabilities in the amount of €5 million at end 2013.

(d) SFR and Vinci Immobilier, a subsidiary of Vinci Group, have four equally owned joint subsidiaries, Foncière Rimbaud 1, Foncière Rimbaud 2, Foncière Rimbaud 3 and Foncière Rimbaud 4, within the framework of construction of the registered office of SFR in Saint-Denis. This project, which may change over time, will be undertaken in two stages, and works will be staggered until the end of 2015. The first stage of buildings (surface area of 74,000 m^2) carried by Foncière Rimbaud 1 and Foncière Rimbaud 2 was delivered at end 2013. The second stage carried by Foncière Rimbaud 3 and Foncière Rimbaud 4 is under construction.

Foncière Rimbaud 3 and 4, which used to be fully consolidated, have been equity-accounted since April 2013.

The group % interests of these main equity-accounted affiliates are indicated in Note 27—List of combined entities.

11.2. Condensed Financial Information

The condensed financial information relative to equity-accounted affiliates is presented in the following tables.

	Numergy		La Poste Telecom		
	2013	2012	2013	2012	2011
	(in millions of euros)				
Revenues	1	—	147	141	76
Net Income[a]	(18)	(3)	(19)	(19)	(62)
Total Equity	204	222	(62)	(43)	(24)
Cash (−)/Net debt (+)	(20)	(56)	48	34	27
Total assets	208	228	36	42	58

(a) Including depreciation of the goodwill of La Poste Telecom recorded in 2011 but communicated to SFR post its consolidation process (€27 million).

	Synerail	
	2013	2012
	(in millions of euros)	
Revenues	153	119
Net Income	2	1
Total Equity	(16)	(26)
Cash (−)/Net debt (+)	288	148
Total assets	344	221

Note 12. Other Current and Non-Current Assets

	2013	2012	2011
	(in millions of euros)		
Non-current operating assets	**79**	**78**	**1**
Advances to equity-accounted and non-combined companies	65	38	34
Non-combined equity securities	12	13	20
Other[(a)]	29	32	94
Non-current financial assets	**106**	**83**	**148**
Total other non-current assets	**185**	**161**	**149**
Other current assets	**2**	**2**	**2**

(a) In 2011, included €53 million related to deposits as guarantee of pre-financing of the arrangement fees for QTE lease/sub-lease agreements set up in 2001 by Neuf Cegetel. The latest QTE contract was early repaid in December 2012.

Note 13. Inventories

	2013	2012	2011
	(in millions of euros)		
Inventories of handsets and accessories	259	256	364
Other	2	7	13
Inventories—gross value	**262**	**263**	**377**
Total depreciations	**(22)**	**(18)**	**(21)**
Inventories—net value	**240**	**245**	**356**

The handset inventories include handsets under consignment with distributors in the amount of €122 million in 2013 (€132 million in 2012 and €151 million in 2011).

Note 14. Trade Accounts Receivable and Other Receivables

	2013	2012	2011
	(in millions of euros)		
Accounts receivable	2,147	2,225	2,349
Bad debt allowance[(a)]	(465)	(477)	(398)
Net accounts receivable	**1,681**	**1,748**	**1,951**
Receivables from suppliers	228	276	283
Employee and tax receivables[(b)]	529	407	681
Prepaid expenses	103	105	88
Income taxes	3	6	7
Other receivables	14	0	4
Total account receivable and other receivables	**2,558**	**2,544**	**3,015**

(a) The Group considers that there is no significant uncollectibility risk for unprovisioned overdue receivables (refer to Note 23.6—Credit and counterparty risks—paragraph ''Accounts receivable and other receivables'').

(b) At end 2013, employee and tax receivables were principally made up of the following elements:

- Value-added tax: €355 million
- Territorial economic tax (CET): €71 million
- Tax on electronic communications (TCE—Copé): €61 million
- Tax on television services (TST—COSIP): €26 million

Note 15. Cash and Cash Equivalents

	2013	2012	2011
	(in millions of euros)		
Cash	297	187	165
Cash equivalents	98	79	63
Cash and cash equivalents	**394**	**267**	**228**

Note 16. Information on Equity

Dividends paid to shareholders during financial years 2011, 2012 and 2013:

The dividends paid for financial year 2010 amounted to €1,000 million. These dividends were paid in the form of an interim dividend in January 2011.

The dividends paid for financial year 2011 amounted to €1,423 million. These dividends were paid in the form of an interim dividend in June 2011 in the amount of €454 million, and the balance in April 2012 in the amount of €968 million.

The dividends paid for financial year 2012 amounted to €982 million. These dividends were paid in March 2013.

The Group does not plan to distribute dividends for financial year 2013.

Management of capital risk:

The financial structure of the Group comprises borrowing and financial debts, cash and cash equivalents and equity, which includes reserves and equity attributable to non-controlling interests as detailed in the statement of change of equity.

Note 17. Remunerations based on Equity Instruments

17.1. Plans allocated by Vivendi to Employees of SFR

17.1.1. Characteristics of the Various Plans Allocated by Vivendi

Vivendi has granted several share-based compensation plans founded on the Vivendi share and intended for employees of SFR.

During 2012 and 2011, Vivendi granted stock option and performance share plans, wherever the fiscal residence of the beneficiaries and bonus share plan for employees of all the group's French subsidiaries.

In 2013, the Supervisory Board decided, upon the recommendation of the Management Board and General Management and the advice of the Human Resources Committee, that all grants would be made in the form of performance shares, wherever the fiscal residence of the beneficiaries.

In addition, in 2013, 2012 and 2011, Vivendi granted stock purchase plans to its employees and retirees (employee stock purchase and leveraged plans).

The accounting methods applied to value and recognize these granted plans are described in Note 1.3.18—Remunerations paid in shares. More specifically, the risk-free interest rate applied is the rate of French ''Obligations Assimilables du Trésor'' (OAT) with a maturity corresponding to the expected term of the instrument at the valuation date, and the expected dividend yield at grant date is based on Vivendi's dividend distribution policy.

As a reminder, the volatility applied in valuing the stock option plans granted by Vivendi in 2012 and 2011 was calculated as the weighted average of (a) 75% of the historical volatility of Vivendi shares computed on a 6.5-year period and (b) 25% of the implied volatility based on Vivendi put and call options traded on a liquid market with a maturity of 6 months or more.

Note 17. Remunerations based on Equity Instruments (Continued)

Instruments settled by the issuance of shares

The definitive grant of equity-settled instruments, excluding the 2012 bonus share plan, is subject to the satisfaction of performance conditions. Such performance conditions include an external indicator, thus following AFEP and MEDEF recommendations. The objectives underlying the performance conditions are determined by the Supervisory Board upon proposal by the Human Resources Committee.

The value of the equity-settled instruments is estimated and set at grant date. For the main 2013, 2012 and 2011 performance share, stock option and bonus share plans, the applied assumptions were as follows:

	2013	2012	2011	
Date of grant	February 22	July 16[a]	April 17	April 13
Data at grant date:				
Option strike price (in euros)[b]	N/A	N/A	13.63	19.93
Share price (in euros)	14.91	15.75	12.53	20.56
Expected volatility	N/A	N/A	27%	25%
Expected dividend yield	6.71%	6.35%	7.98%	7.30%
Performance conditions achievement rate[c]	100%	N/A	100%	100%

N/A: not applicable.

(a) Vivendi granted 50 bonus shares to the employees of all the group's French subsidiaries, including SFR (refer to *infra*).

(b) In accordance with legal requirements, the number and strike price of stock options, as well as the number of performance shares in connection with outstanding plans, were adjusted to take into account the impact, for the beneficiaries of the following distributions by a withdrawal from reserves:

- on May 9, 2012: grant to each shareholder of one bonus share per 30 shares held; and
- on May 17, 2013: dividend distribution with respect to fiscal year 2012.

These adjustments have no impact on share-based compensation expense related to the relevant stock option and performance share plans.

(c) Since 2012, achievement of the objectives underlying the performance conditions has been assessed over two years (each year over two years for the plans allocated in 2011). The final grant is effective according to fulfillment of the following performance criteria:

- internal indicator (70%): EBITA margin as a function of the cumulative income from the past two fiscal years, for the plans allocated in 2013 and 2012 (compared to the adjusted net income (45%), and cash flow from operations (25%) for the plans allocated in 2011);
- external indicators (30%): performance of Vivendi's share price over two years, according to the Dow Jones Stoxx Telecom index (21% for plans allocated in 2013 and 2012, compared to 18% for the plans allocated in 2011) and according to the Media index comprised of a pre-established panel (9% for plans allocated in 2013 and 2012, compared to 12% for plans allocated in 2011).
- The definitive grant of stock options and performance shares of April 17, 2012 became effective as of December 31, 2013. The acquisition of these instruments is conditional upon active employment at the vesting date.

With regard to stock options and performance shares of April 13, 2011, the final grant became effective as of December 31, 2012.

Performance share plans based on the value of Vivendi

Performance shares granted in 2013, 2012 and 2011 will vest at the end of a two-year period. The compensation cost is therefore recognized on a straight-line basis over the vesting period. Performance shares are available at the end of a four-year period from the date of grant. However, as the shares granted are ordinary shares of the same class as existing shares making up the share capital of Vivendi SA, employee shareholders are entitled to the dividends and voting rights attached to these shares from the end of the two-year vesting period. The recognized compensation cost corresponds to

Note 17. Remunerations based on Equity Instruments (Continued)

the value of the equity instruments received by the beneficiary, and is equal to the difference between the fair value of the shares to be received and the discounted value of dividends that were not received over the vesting period.

On February 22, 2013, 717,000 performance shares were granted, compared to 552,000 granted on April 17, 2012 and 492,000 granted on April 13, 2011. After taking account of a discount for non-transferability, 8.3% of the share price as of February 22, 2013 (7.1% as of April 17, 2012 and 4.5% as of April 13, 2011), the fair value of each granted performance share was €11.79, as compared with €9.80 per share as of April 17, 2012 and €16.84 as of April 13, 2011, corresponding to a global fair value of €8 million (€5 million in 2012 and €8 million in 2011).

Stock option plans based on the value of Vivendi

Stock options granted in 2012 and 2011 will vest at the end of a three-year period and expire at the end of a ten-year period (with a 6.5 year expected term) and the compensation cost determined at grant date is recognized on a straight-line basis over the vesting period. In 2013, Vivendi did not grant any stock options. On April 17, 2012, 495,000 stock options were granted, compared to 610,000 options on April 13, 2011. After taking into account a 2.35% risk-free interest rate (3.21% in 2011), the fair value of each option granted was €0.96 (compared to €2.16 per option as of April 13, 2011), corresponding to a global fair value of €0.5 million (€1.3 million in 2011).

Free allocation plan of 50 shares

On July 16, 2012, Vivendi granted a 50 bonus share plan per employee of all the group's French subsidiaries, including SFR. These shares will be issued at the end of a two-year period, i.e., July 17, 2014, subject to the employee being in active employment at this date and without any performance conditions. The compensation cost is therefore recognized on a straight-line basis over this period. The shares will only be available after another two-year period. However, as the shares granted are ordinary shares of the same class as existing shares making up the share capital of Vivendi SA, employee shareholders will be entitled to the dividend and voting rights relating to these shares from the end of the two year vesting period.

On July 16, 2012, 500,000 bonus shares were granted. After taking into account a discount for non-transferability of 9.3% of the share price on July 16, 2012, the fair value of each granted bonus share was €12.40, a total of €6 million.

Employee stock purchase and leveraged plans subscribed by the employees of SFR

Vivendi also maintains share purchase plans (stock purchase and leveraged plans) that allow substantially all of SFR employees and retirees to purchase Vivendi shares through capital increases reserved to them. These shares, which are subject to certain sale or transfer restrictions, may be purchased by employees with a maximum discount of 20% on the average opening market price for Vivendi shares during the 20 trading days preceding the date of approval of the share capital increase by the Management Board (purchase date). The difference between the subscription price of the shares and the share price on the date of grant (corresponding to the subscription period closing date) represents the benefit granted to the beneficiaries. Furthermore, Vivendi applies a discount for non-transferability in respect of the restrictions on the sale or transfer of the shares during a five-year period, which is deducted from the benefit granted to the employees. The value of the stock purchase plans granted is estimated and fixed at the grant date.

Note 17. Remunerations based on Equity Instruments (Continued)

For the employee stock purchase and leveraged plans subscribed in 2013, 2012 and 2011, the applied valuation assumptions were as follows:

For the Group savings plans and leverage plans subscribed in 2013, 2012 and 2011, the valuation assumptions used are as follows:

	2013	2012	2011
Grant date	June 28	June 25	June 23
Subscription price (in euros)	12.10	10.31	15.27
Data at grant date:			
Share price (in euros)	14.55	13.57	18.39
Discount to face value	16.82%	24.02%	16.97%
Expected dividend yield	6.87%	7.37%	8.16%
Risk-free interest rate	1.19%	1.37%	2.44%
5-year interest rate in fine	6.08%	6.51%	6.15%
Repo rate	0.36%	0.36%	0.36%

Under the employee stock purchase plans 1,505,000 shares were subscribed in 2013 (compared to 1,541,000 shares in 2012 and 1,381,000 shares in 2011). After taking into account a 15.2% discount for non-transferability to the share price on the grant date (15.3% in 2012 and 10.0% in 2011), the fair value per subscribed share on June 28, 2013 was €0.24, compared to €1.18 per share subscribed on June 25, 2012 and €1.28 per share subscribed on June 23, 2011.

Under the leveraged plans, virtually all employees and retired employees of SFR were entitled to subscribe for Vivendi shares through a reserved share capital increase, while obtaining a discounted subscription price, and to ultimately receive the capital gain (calculated pursuant to the terms and conditions of the plan) corresponding to 10 shares for one subscribed share. A financial institution mandated by Vivendi hedges this transaction.

In 2013, 6,225,000 shares were subscribed under the leverage plan (compared to 6,591,000 shares subscribed in 2012 and 4,537,000 shares subscribed in 2011). After taking into account a 1.5% discount for non-transferability measured after the leveraged impact (unchanged in relation to 2012 and 1.0% in 2011), the fair value per share subscribed on June 28, 2013 amounted to €2.23, compared with €3.05 per share subscribed on June 25, 2012 and €2.94 per share subscribed on June 23, 2011.

In 2013, the charge recognized with respect to employee stock purchase and leveraged plans amounted to €14 million (as compared with €22 million in 2012 and €15 million in 2011).

Note 17. Remunerations based on Equity Instruments (Continued)

17.1.2. Information on outstanding SFR Plans Based on the Value of Vivendi since January 1, 2011

Equity-settled instruments

	Stock options		Performance shares

N/A: not applicable

(a) The weighted average share price for Vivendi shares at the dates of exercise for the options was €16.71 (compared to €16.50 for stock options exercised in 2012 and €20.85 for the stock options exercised in 2011).

(b) The total intrinsic value of outstanding stock options was €17 million.

(c) The weighted-average remaining period before issuing shares was 0.8 years.

Regarding the grant of 50 bonus shares in 2012, the remaining number of bonus shares was 455,000 as of December 31, 2013 (474,000 as of December 31, 2012). During 2013, 19,000 shares were cancelled (26,000 in 2012).

Note 17. Remunerations based on Equity Instruments (Continued)

Information on stock options as of December 31, 2013 is as follows:

Range of strike price	Outstanding stock options: Number	Outstanding stock options: Weighted average strike price	Outstanding stock options: Weighted average remaining contractual life	Vested stock options: Number	Vested stock options: Weighted average strike price

Non-current provisions	*173*	*11*	*(34)*	*(1)*	*7*	*156*

(a) Staff benefit schemes: refer to Note 19—Post-employment benefits

(b) Restructuring: refer to Note 4.2—Other operating income and expenditure

(c) Site renovation costs: the Group is required to renovate the technical sites of its network upon expiry of the lease, in the event of its non-renewal or in the event of early termination.

(d) Litigation and other: this includes, among other things, provisions whose amount and type are not detailed because their disclosure could harm the Group. The provisions made for litigation cover the risks relating to contentious proceedings instigated against the Group. All provisioned litigation is currently awaiting a hearing or pleadings before a court. The unused part of the provisions recognized at opening corresponds to litigations which have been settled with sums, paid by the Group, that are lower than those provisioned.

Note 18. Provisions (Continued)

The tables of the previous financial years are presented below:

	2012					
	Opening Balance	Allocations	Utilization	Recoveries and changes of estimates	Other changes	Closing Balance
	(in millions of euros)

Note 19. Post-Employment Benefits

All employees of the Group benefit from severance pay in accordance with the collective agreement of the company to which they are attached.

19.1. Assumptions used for Evaluation

The actuarial debt is evaluated using the following assumptions:

	2013	2012	2011
Discount rate	3.00%	3.25%	4.50%
Salary increase rate	2.75%	2.75%	2.75%

The demographic assumptions are specific to each company. The discount rate is based on the ''iBoxx € Corporates AA'' rate.

The proceeds of interest on the hedging assets are determined on the basis of the discount rate.

These hedging assets are invested in the general fund Cardif, which is principally composed of bonds.

Note 19. Post-Employment Benefits (Continued)

19.2. Analysis of Net Benefit obligation under Pensions and Post retirement Benefits

The analysis of the change in net benefit obligations is presented in the tables below:

Changes in the value of Benefit obligations

	2013	2012	2011
	(in millions of euros)		
Benefit obligation at the beginning of the year	73	52	48
Current services cost	7	5	5
Interest cost	2	2	2
Benefits for the period	(0)	(0)	(1)
Scheme reduction[(a)]	(12)	(1)	—
Settlement	—	—	(0)
Curtailment	—	—	(1)
Actuarial differences (profits)/losses	7	15	(0)
Benefit obligation at the end of year	**77**	**73**	**52**
Including commitments not financed	*76*	*71*	*50*
Including commitments totally or partially financed	*0*	*2*	*2*

(a) The scheme reduction of €12 million in 2013 corresponds to the impact of the voluntary redundancy scheme launched by SFR in 2012 (refer to Note 4.2—Other operating income and expenditure).

Changes to fair value of plan assets

	2013	2012	2011
	(in millions of euros)		
Fair value of plan assets at start of year	3	3	3
Benefits paid by the fund	—	—	(1)
Actuarial differences (profits)/losses on return	—	0	—
Return expected from the hedge funds	0	0	0
Fair value of plan assets at end of year	**3**	**3**	**3**

Net liabilities recorded

	2013	2012	2011
	(in millions of euros)		
Net liabilities recorded at start of year	(70)	(49)	(45)
Expenditure for the period	(9)	(7)	(5)
Benefits reducing commitment	0	0	0
Scheme reduction	12	1	—
Scheme settlement	—	—	0
Actuarial differences profits/(losses) in overall earnings	(7)	(15)	0
Net liabilities recorded at end of year	**(74)**	**(70)**	**(49)**

Note 19. Post-Employment Benefits (Continued)

Value of commitments, fair value of assets and financial sub-hedge over 3 financial years

	2013	2012	2011
	(in millions of euros)		
Value of commitments	77	73	52
Fair value of plan assets	3	3	3
Financial sub-hedge	**74**	**70**	**49**

Sensitivities to the discount rate

An increase of 50 base points to the discount rate expected in 2013 (or a fall of 50 base points) would be reflected in a reduction in the commitment of €7 million (or an increase of €7 million).

19.3. Analysis of the Expenditure Recorded on the Income Statement

Expenditure recorded for defined benefit schemes can be broken down as follows:

	2013	2012	2011
	(in millions of euros)		
Current service cost	7	5	5
Interest costs	2	2	2
Expected return on plan assets	(0)	(0)	(0)
Past services cost	—	—	(1)
Expenditure for the financial year	**9**	**7**	**5**
Scheme reduction	(12)	(1)	—
Scheme settlement	—	—	(0)
Total expenditure	**(3)**	**6**	**5**

19.4. Actuarial Differences Recorded in Overall Earnings

	2013	2012	2011
	(in millions of euros)		
Actuarial differences from experience	1	—	2
Actuarial differences from assumptions	6	14	(2)
Actuarial differences recorded in overall earnings	**7**	**15**	**—**
Actuarial differences accumulated in equity	**21**	**14**	**—**

The amount of the 2013 actuarial differences relative to the hedging assets is not significant. The amount relative to the commitments is detailed as follows:

	Total	Commitment	
	(in millions of euros)		
Actuarial differences from experience	1	1	1.0%
Actuarial differences from assumptions	6	6	7.7%
Total	**7**	**7**	

Note 19. Post-Employment Benefits (Continued)

19.5. Allocation of pension plan assets

The allocation of plan assets is presented in the table hereunder:

	2013	2012	2011
Shares	12.6%	11.4%	11.8%
Bonds	80.7%	78.2%	81.5%
Real estate	6.7%	6.5%	6.1%
Other	0.0%	3.9%	0.6%
Total	**100.0%**	**100.0%**	**100.0%**

Apart from real estate investments, all these assets are exchange-listed.

19.6. Schedule of Post-Employment Benefits

The estimated amount (in nominal value) of the benefits to be paid in the next ten years is as follows:

	Under one year	Two to five years	Six to ten years	Total
		(in millions of euros)		
Estimated benefits payable	0	2	12	**14**

Note 20. Borrowing and Financial Debt

20.1. Analysis of the Expenditure Recorded on the Income Statement

	2013	2012	2011
	(in millions of euros)		
Shareholder debt[(a)]	1,200	1,200	3,700
Bond loan[(b)]	—	300	300
Securitization of receivables[(c)]	—	—	422
Debt relative to finance leasing	8	11	15
Other financial debt	40	50	53
Non-current borrowing and financial debt	**1,248**	**1,561**	**4,490**
Shareholder debt[(a)]	7,472	6,409	1,761
Bond loan[(b)]	300	—	996
Bank loan	50	66	48
Debt relative to finance leasing	3	4	9
Other financial debt[(d)]	20	27	83
Current borrowing and financial debt	**7,846**	**6,506**	**2,896**
Borrowing and financial debt	**9,094**	**8,067**	**7,385**

(a) Shareholder debt: this category corresponds to the financial debt contracted with Vivendi in the form of:

- cash current account: this is an advance on current account granted to the Group by Vivendi in June 2011. This facility was drawn respectively to the level of €7.5 billion, €4.9 billion and €1.8 billion as of December 31, 2013, 2012 and 2011. This advance is denominated almost entirely in euros. The interest rate, which was fixed in accordance with market conditions, has remained fixed since January 1, 2013 (2.79%);
- shareholder loan: these are loans or credit facilities entered into between the Group and Vivendi:
  - The Revolving Credit facility entered into in January 2011 for €1 billion, bearing interest at the Euribor rate + 2.5%, matured in 2012,
  - The Revolving Credit facility in the sum of €1.5 billion, entered into in June 2009 at the Euribor interest rate + 2.5%, matured in June 2013,

Note 20. Borrowing and Financial Debt (Continued)

- ○ The loan entered into in December 2011 for €1.2 billion, bearing interest at the Euribor rate + 0.825%, maturity of which is June 2015, was still in force as of December 31, 2013;

(b) Bond loan (net of amortized cost): The Group issued a bond loan of €300 million in July 2009, maturity of which is July 9, 2014, bearing interest at the rate of 5%. Another loan, resulting from several bond issues from 2005 to 2009 for a total of €1 billion, was repaid in full upon maturity in July 2012.

(c) A receivables securitization program was set up in 2011. This program was settled ahead of the original due date in June 2012.

(d) The commercial papers were repaid in full in 2012.

20.2. Breakdown by Interest Rate Type of the Repayment Value of Borrowing and Financial Debt

	2013		2012		2011	
	(in millions of euros)					
Breakdown by type of interest rate:						
Fixed interest rate (after hedge)	7,769	85%	300	4%	1,296	18%
Variable interest rate	1,324	15%	7,767	96%	6,090	82%
Total	**9,094**		**8,067**		**7,385**	

20.3. Breakdown by Maturity of Future Cash Flow linked to Borrowing and Financial Debt

The table below is a schedule of the contractual cash flow of borrowing and financial debt, including interest coupons, on a non-discounted basis. The interest payable is calculated on the basis of the debt as of December 31, 2013. The variable interest rates are the rates applicable as of December 31, 2013.

The effective annual percentage rate over the year 2013 is 2.80%.

		2013 Schedule of repayments		
	Book value	Under one year	Two to five years	Over five years
	(in millions of euros)			
Shareholder debt	8,672	7,472	1,200	—
Bond loan	300	300	—	—
Borrowing relative to leasing	11	3	6	2
Other financial debts	110	70	33	7
Borrowing and financial debts	**9,094**	**7,846**	**1,239**	**9**

Note 21. Trade Accounts Payable and Other Payables

	2013	2012	2011
	(in millions of euros)		
Trade accounts payable	2,878	2,943	3,114
Customer's credit balances	622	512	478
Tax and social contributions[(a)]	846	1,028	1,100
Short term prepaid income	524	630	710
Income tax	3	9	6
Other	1	13	4
Trade accounts payable and other payables	**4,874**	**5,136**	**5,412**

(a) As of the end of 2013, tax and social contributions can be broken down principally into the following elements:

- Value-added tax payable: €331 million
- Social contributions: €338 million

Note 21. Trade Accounts Payable and Other Payables (Continued)

- Territorial economic tax (CET): €77 million
- Tax on electronic communications (TCE—Copé): €54 million
- Tax on television services (TST—COSIP): €24 million

Note 22. Other Current and Non-Current Liabilities

	2013	2012	2011
	(in millions of euros)		
Deferred income	309	339	346
GSM license	136	154	172
Uncalled share capital (Numergy)	63	63	—
Other[(a)]	33	41	114
Other non-current liabilities	**540**	**597**	**633**
Uncalled share capital (Numergy)	16	16	—
Other current liabilities	1	1	3
Other current financial liabilities	**17**	**17**	**3**

(a) In 2011, includes €53 million QTE settled early in December 2012 (refer to Note 12—Other current and non-current assets).

Note 23. Financial Instruments

23.1. Fair Value of Financial Instruments Recorded in the Balance Sheet and Accounting Categories

The table below presents the net carrying value by category and the fair value of the Group's financial instruments as of December 31, of each year.

		2013						
	Note	Assets/ liabilities at fair value by earnings	Available-for-sale securities	Loans and receivables	Assets/ liabilities at amortized cost	Hedge derivatives	Total net carrying value	Fair value
		(in millions of euros)						
Assets								
Other non-current financial assets	12	8	12	86			106	106
Derivative instruments	12					2	2	2
Other current financial assets	12	0					0	0
Other non-current operating assets	12				79		79	79
Trade accounts receivable and other	14				2,558		2,558	2,558
Cash and cash equivalents	15	394					394	394
Liabilities								
Non-current borrowings and financial debts	20				1,248		1,248	1,248
Current borrowings and financial debts	20				7,844		7,844	7,851
Derivative instruments	20					2	2	2
Trade accounts payable and other	21				4,874		4,874	4,874
Other non-current liabilities	22				540		540	540
Other current financial liabilities	22				17		17	17

Note 23. Financial Instruments (Continued)

For the record, as of December 31, 2012

	Note	2012 Assets/ liabilities at fair value by earnings	Available-for-sale securities	Loans and receivables	Assets/ liabilities at amortized cost	Hedge derivatives	Total net carrying value	Fair value
		(in millions of euros)						
Assets								
Other non-current financial assets	12	8	13	63			83	83
Derivative instruments	12					2	2	2
Other current financial assets	12	1					1	1
Other non-current operating assets	12				78		78	78
Trade accounts receivable and other	14				2,544		2,544	2,544
Cash and cash equivalents	15	267					267	267
Liabilities								
Non-current borrowings and financial debts	20				1,561		1,561	1,578
Current borrowings and financial debts	20				6,505		6,505	6,505
Derivative instruments	20					2	2	2
Trade accounts payable and other	21				5,136		5,136	5,136
Other non-current liabilities	22				597		597	597
Other current financial liabilities	22				17		17	17

Note 23. Financial Instruments (Continued)

For the record, as of December 31, 2011

	Note	2011 Assets/ liabilities at fair value through earnings	Available-for-sale securities	Loans and receivables	Assets/ liabilities at amortized cost	Hedge derivatives	Total net carrying value	Fair value
		(in millions of euros)						
Assets								
Other non-current financial assets	12	8	20	120			148	148
Derivative instruments	12					0	0	0
Other current financial assets	12	2					2	2
Other non-current operating assets	12				1		1	1
Trade accounts receivable and other	14				3,015		3,015	3,015
Cash and cash equivalents	15	228					228	228
Liabilities								
Non-current borrowings and financial debts	20				4,490		4,490	4,504
Current borrowings and financial debts	20				2,895		2,895	2,907
Derivative instruments	20							
Commitments to purchase non-controlling interests	12	1					1	1
Trade accounts payable and other	21				5,412		5,412	5,412
Other non-current liabilities	22				633		633	633
Other current financial liabilities	22				3		3	3

The carrying value of the operating receivables and other, cash and cash equivalents and trade accounts payable and other is a reasonable approximation of fair value, due to the short maturity of these instruments.

The fair value of the borrowings and financial debts is calculated either from the market price for the bond loan or, for the rest of the debt, by discounting future contractual flows, taking account of market conditions as of December 31 each year.

Valuation method for financial instruments at fair value on the balance sheet

In compliance with IFRS 7, financial assets and liabilities at fair value are classified according to a fair value hierarchy at fair value of the financial instruments (level 1 to 3) as follows:

- the fair value of financial instruments exchanged in active markets (for example monetary UCITS) is based on the market price listed on the date of closure. This valuation method is described as level 1 in the hierarchy defined by IFRS 7;
- the fair value of financial instruments not traded in active markets (for example rate swaps) is determined using valuation techniques. The assumptions used can be observed either directly (i.e. such as prices) or indirectly (i.e. determined from prices). This valuation method is described as level 2 in the hierarchy defined by IFRS 7;
- the fair value of the instruments classified in level 3 (for example, available—for-sale securities) is determined using a valuation technique not based on observable market data.

Note 23. Financial Instruments (Continued)

The tables below present the method of valuation used for the financial assets and liabilities at fair value as of December 31, of each year.

	2013			
	Fair value	Level 1	Level 2	Level 3
	(in millions of euros)			
Financial assets at fair value				
Other non-current financial assets	20	8		12
of which cash management assets	*8*	*8*		
available-for-sale securities	*12*			*12*

Other current financial assets	2	2		
Cash and cash equivalents	228	228		
Financial liabilities at fair value				
Derivative instruments				
Commitments to purchase non-controlling interests	1			1

23.2. Management of Financial Risks and Derivative Financial Instruments

As part of its business, the Group is exposed to several types of financial risks: market risk, credit (or counterparty) risk and liquidity risk. Market risks are defined as the risks of fluctuation in future cash flow of financial instruments that depend on the changes in financial markets. For the Group, market risks may therefore primarily impact interest rates and foreign currency exchange positions, in the absence of significant investment in the stock markets.

Note 23. Financial Instruments (Continued)

As part of the Vivendi Group as of December 31, 2013, the Group follows group policy with regard to management of financial risks and derivative financial instruments, which is centrally managed by Vivendi's Financing and Treasury department.

The Group uses derivative instruments to manage its exposure to market risks. The valuation of these instruments is not significant over the periods presented.

Valuation linked to the credit risk of derivative instruments is calculated from historic probabilities of default, as resulting from the calculations of a leading ratings agency, to which a recovery rate is applied. As of December 31, 2013, the impact of the adjustment recommended by IFRS 13 was not significant.

23.3. Interest Rate Risk

The exposure of the Group to interest rate risk is linked to its net variable rate financial debt level.

As of December 31, 2013 and as of December 31, 2012, this exposure was not hedged by rate derivative instruments.

Sensitivity analysis to interest rate risk

Sensitivity analysis to interest rate changes for variable rate instruments was determined considering all variable rates of financial instruments. The analysis was conducted assuming that the amounts of debts and financial instruments on the balance sheet as of December 31, 2013 will remain constant over a year. For the purposes of this analysis, all other variables, particularly the exchange rates, are assumed to remain constant.

A change of 50 basis points in the interest rate on date of closure would have resulted in an increase (decrease) in the cost of debt of €7 million.

23.4. Foreign Exchange Risk

To hedge its currency purchases, related in particular to the acquisition of telecoms equipment, the Group uses forward contracts which it buys from the Financing and Treasury department of the Vivendi Group.

As of December 31, 2013, the Group held foreign exchange hedge instruments for a notional amount of 115 million US dollars (USD). All contracts are US dollar (USD) forward contracts with a maturity between 1 and 7 months.

The forward contracts are defined as cash flow hedges. Their ineffectiveness over the period is not significant.

The residual exposure of the Group after hedging the USD fluctuations is barely significant over the financial year. As of December 31, 2013, the exposure to foreign exchange risk on the balance sheet of the Group in USD amounts to 2 million, and is completely hedged.

Sensitivity analysis to foreign exchange risk

As of December 31, 2013, an instant change of 10% of the euro in relation to the dollar would, on the assets and liabilities recorded on the balance sheet, have quite a significant impact on the foreign exchange earnings of the Group. For the purposes of this analysis, all other variables, and in particular the interest rates, are assumed to remain constant.

23.5. Liquidity Risk

The Group manages the liquidity risk by continually supervising the cash flow projections and the actual cash flow. As of December 31, 2013, the financial flexibility of the Group was assured by the current account provided by Vivendi.

Note 23. Financial Instruments (Continued)

A liquidity schedule is detailed in Note 20.3—Breakdown by maturity of future cash flow linked to borrowings and financial debts.

23.6. Credit and Counterparty Risk

The main financial assets potentially generating a credit risk for the Group are:

- cash investments,
- trade accounts receivable and other .

The maximum exposure of the financial assets to the credit risk corresponds to their net carrying value.

Cash investments and derivative instruments

The Group makes its cash investments (monetary UCITS that meet the specifications of AMF position No. 2011-13, and other short-term highly liquid investments with an original maturity less than or equal to three months) with leading banking counterparties.

As of December 31, 2013:

- cash investments are made with counterparties enjoying high credit ratings,
- derivative instruments, forward purchases of dollars, were bought from Vivendi and not directly from banking partners.

Trade accounts receivable and other

The concentration of the counterparty risk related to trade accounts receivable is limited because the client portfolio of the Group is highly diversified and not concentrated, considering the large number of clients, in particular the Retail business, with several million individual customers.

With regard to the B2B business, the 20 main clients represent less than 3% of the Group's revenues.

With regard to the Wholesale business, revenues are more concentrated, with the biggest clients being telecommunications operators (such as Orange, Bouygues Telecom, Free Mobile) whose risk is moderate considering the interconnection flows equilibrium. Orange, the first client operator, is also the first supplier of the Group.

Note 24. Transactions with Related Parties

The related parties of the Group are:

- All companies included in the scope of combination, whether fully integrated or accounted for by the equity method,
- Vivendi S.A. and its consolidated entities (the ''Vivendi Group''),
- The Vodafone Group up to June 16, 2011, when Vodafone sold its 44% holding in SFR to Vivendi S.A.,
- All members of the executive committee of SFR S.A.,
- All companies in which a member of the executive committee exercises control, participates in the joint control, exercises a significant influence, or is one of its principal directors.

The transactions between the companies fully integrated within the scope of combination were eliminated when preparing the combined accounts. The breakdown of operations between the Group and the other related parties is presented below.

Note 24. Transactions with Related Parties (Continued)

24.1. Compensation of the Managers

The managers of the combined group include the members of the executive committee of its main entity SFR S.A.

The table below presents the compensation allocated to the people who were, upon closure or during the financial years presented members of the executive committee.

	2013	2012	2011
	(in millions of euros)		
Short-term benefits[(a)]	5	6	6
Post-employment benefits[(b)]	1	1	2
Share-based compensation[(c)]	3	4	3
Compensation of managers	**8**	**10**	**11**

(a) Includes gross salaries, fixed and variable compensations, profit sharing and benefits in kind recorded during the financial year. The variable part includes bonuses provisioned at closure of the financial year. The 2013 bonus for the corporate representatives will be finally approved later by the Supervisory Board of Vivendi S.A. at the recommendation of the Human Resources Committee of Vivendi S.A.

(b) Corresponds to the cost of services delivered.

(c) Expense recorded on the profit and loss account by way of share option plans and offers reserved to employees.

24.2. The Shareholder Companies and Joint Ventures

Shareholder companies and joint ventures, equity-accounted, are presented in Note 11—Equity-accounted securities.

Transactions with the related parties summarized below concern the principal current operations undertaken with shareholder companies and joint ventures.

	Affiliated companies			Joint ventures		
	2013	2012	2011	2013	2012	2011
	(in millions of euros)					
Assets	**66**	**54**	**52**	**53**	**24**	**22**
Non-current assets	—	—	—	43	18	17
Current assets	66	54	52	10	6	5
Liabilities	**80**	**79**	**15**	**5**	**—**	**—**
Current liabilities	18	16	15	5	—	—
Non-current liabilities	63	63	—	—	—	—
Net earnings	**67**	**76**	**77**	**21**	**20**	**17**
Operating income	67	76	77	25	20	17
Operating expenses	—	—	—	(4)	—	—
Off-balance sheet commitments	**56**	**79**	**70**	**569**	**319**	**303**
Operating	—	—	—	413	228	228
Financial	56	79	70	86	58	50
Pledges	—	—	—	70	34	25

The principal transactions with the equity-accounted companies are with:

- La Poste Telecom as part of telephony business,
- Numergy as part of services relative to ''cloud computing'',
- Synerail as part of the GSM-R Public/Private Partnership,
- Foncière Rimbaud (1 to 4) with the Vinci Group as part construction of the registered office of SFR S.A.

(refer to Note 11—Equity-accounted securities)

Note 24. Transactions with Related Parties (Continued)

24.3. The Historic Shareholders

From 2011 to 2013, the principal operations with the Vivendi Group and the Vodafone Group were as follows:

Financing by Vivendi S.A.

	2013	2012	2011
	(in millions of euros)		
Under balance sheet liabilities			
Shareholder debt[(a)]	8,673	7,609	5,461
On the profit and loss account			
Interest linked to shareholder debt	(212)	(170)	(87)

(a) The breakdown of the shareholder debt is presented in Note 20—Borrowings and financial debts.

Services billed by Vivendi S.A.

	2013	2012	2011
	(in millions of euros)		
Head office costs	(15)	(28)	(26)
Employee benefits	(26)	(32)	(23)
Staff on secondment	(7)	(6)	(6)
Services billed by Vivendi	**(48)**	**(66)**	**(55)**

Operations carried out with the Vodafone Group from January 1 to June 16, 2011

Cooperation with Vodafone: in 2003, Vodafone and SFR S.A. entered into an agreement which enabled them to intensify their cooperation and increase their scale economies in several areas: development and launch of new products and services, reinforcement of operating synergies, notably with regard to purchasing (notably IT and technology) and the sharing of expertise.

SFR S.A. recorded an expense of €21 million for this agreement as of June 30, 2011.

The cooperation agreement with Vodafone was maintained following Vodafone's exit from the share capital of SFR S.A., but no longer falls within the scope of affiliated operations.

Interconnection flow with subsidiaries of the Vodafone Group: as part of the rebilling of flow (''roaming in'' and ''roaming out''), on June 30, 2011 the Group recorded an income of €23 million and an expense of €13 million vis-à-vis the Vodafone Group.

Other operations undertaken with subsidiaries of the Vivendi Group

	2013	2012	2011
	(in millions of euros)		
Total income	25	24	13
Total expenses	(49)	(61)	(57)

The Canal +, UMG and Maroc Telecom Groups are consolidated within the Vivendi Group. These operations fall within the current business of the Group.

Note 25. Contractual Commitments

The significant contractual commitments made or received by the Group are detailed hereunder:

25.1. Commitments related to Fixed Assets

The amount of contractual commitments for the acquisition of tangible and intangible assets amounted to €888 million as of December 31, 2013. This amount includes commitments linked to the rollout of telecommunications networks.

The schedule of these commitments is as follows:

	Minimum future payments	Schedule			2012	2011
		Under one year	Two to five years	Over five years		
	(in millions of euros)					
Commitments related to Public Service Concessions	72	27	22	23	262	336
Commitments related to MDPA[(a)]	216	19	99	99	8	—
Other investments[(b)]	600	582	19	—	702	1,776
Investment commitments	**888**	**628**	**139**	**122**	**972**	**2,112**

(a) Commitments related to the rollout of the FTTH (Fiber-To-The-Home) within the less dense areas.

(b) In 2011, the amount includes the commitment to acquire the LTE license, in the amount of €1,065 million.

25.2. Commitments related to the Telecommunications Licenses

Commitments given		Amount	Maturity
(a)	UMTS license on French territory	1% of revenues generated	2021-2030
(a)	GSM license on French territory	1% of revenues generated	2021
(a)	LTE license on French territory	1% of revenues generated	2031-2032
(b)	3G network coverage	Not costed	2013
(c)	4G network coverage	Not costed	2023-2027

Commitments received		Amount	Maturity
(a)	Network operating and telecommunications service provision authorizations on French territory	Not costed	2021/2032

(a) The Group is the holder of operating authorizations for its networks and for the provision of telecommunications services in France, under the following financial conditions:

- payment of a fixed part, either recorded in debt (GSM) or paid at the time of allocation (UMTS and LTE),
- payment of a variable part corresponding to 1% of the revenues generated by these licenses.

(refer to Note 1.3.7—Intangible assets; Note 9—Intangible assets).

(b) On November 30, 2009, the ARCEP called on the Group to comply with its obligations to roll out the UMTS networks no later than December 31, 2013, which were to provide a rate of cover of the metropolitan population of 99.3%.

As of December 31, 2013, with 99.3% of the population covered, the Group had fulfilled its coverage obligations.

Note 25. Contractual Commitments (Continued)

(c) Within the framework of allocation of the first block of LTE frequencies in October 2011, the Group undertook to respect the rollout obligations for very high-speed mobile in accordance with the timeline below:

- 25% of the metropolitan population by 11 October 2015,
- 60% of the metropolitan population by 11 October 2019,
- 75% of the metropolitan population by 11 October 2023.

These coverage obligations may be met by the use of 2.6 GHz frequencies or through the use of other frequencies held by the Group.

Through Decision No. 2012-0039 of the ARCEP dated January 17, 2012, the Group was allocated 2*10 MHz in the 800 MHz band for the sum of €1,065 million. The commitments linked to this allocation are as follows:

- The Group undertook to fulfill the following obligations for rollout of very high-speed mobile:
  - coverage of 98% of the metropolitan population by January 17, 2024 and 99.6% of the metropolitan population by January 17, 2027;
  - coverage in the priority rollout area (around 18% of the metropolitan population and 63% of the territory): the Group must cover 40% of the population of this priority rollout area by January 17, 2017 and 90% of the population of this same area by January 17, 2022;
  - departmental coverage: the Group must cover 90% of the population of each French département by January 17, 2024 and 95% of the population of each département by January 17, 2027.
- SFR and Bouygues Telecom have a mutual obligation to share the network or share frequencies in the priority rollout area.
- The Group has an obligation to host Free Mobile roaming in the priority rollout area when it has covered 25% of the French population with its own network at 2.6 GHz, and if it has not signed a national roaming agreement with another operator.
- The Group must cover, jointly with the other holders of the 800 MHz band, the town centers identified by the public authorities within the framework of the ‘‘white areas’’ program (above 98% of the population) within a maximum period of 15 years.

Note 25. Contractual Commitments (Continued)

25.3. Commitments linked to operating lease agreements

The amount of the minimum future rents for operating lease agreements is detailed in the table hereunder:

	Minimum future rents	Schedule: Under one year	Two to five years	Over five years	2012	2011
	(in millions of euros)					
Land	5	0	2	3	4	5
Buildings	1,842	287	899	656	1,701	1,560
of which administrative premises	*566*	*61*	*206*	*299*	*521*	*585*
technical premises	*1,273*	*226*	*692*	*356*	*1,181*	*952*
Other	159	44	67	48	146	168
Rentals	**2,006**	**331**	**968**	**707**	**1,851**	**1,732**
Buildings	(216)	(40)	(101)	(75)	(109)	(41)
Of which technical rents	*(216)*	*(40)*	*(101)*	*(75)*	*(109)*	*(41)*
Sub-leases	**(216)**	**(40)**	**(101)**	**(75)**	**(109)**	**(41)**
Net Total	**1,790**	**291**	**867**	**632**	**1,742**	**1,691**

The total amount of future technical rents includes rights of way and rents linked to the use of fiber optics. The amount of the net rents recognized for 2013, 2012 and 2011 respectively is €284 million, €276 million and €277 million.

The future finance leasing rent amounts are presented in Note 10.3—Tangible assets.

25.4. Commitments related to Long-Term Contracts

Commitments related to long-term contracts principally concern contracts for maintenance of the telecommunications network.

	Minimum future payments 2013	Schedule: Under one year	Two to five years	Over five years	2012	2011
	(in millions of euros)					
Given commitments	178	62	79	37	172	63
Received commitments	(127)	(14)	(50)	(63)	—	(80)
Total	**51**	**48**	**29**	**(25)**	**172**	**(17)**

Note 25. Contractual Commitments (Continued)

25.5. Other Commitments

		2013	Schedule	2012	2011
			(in millions of euros)		
(a)	GSM-R bank guarantees, joint and several guarantees	105	According to construction	92	66
	Other bank guarantees	65	2026	64	90
(b)	Share purchase commitments	16	2026	16	18
	Pledges	84	2017	51	46
	Given commitments	**269**		**223**	**219**
	Other bank guarantees	(1)		(1)	(1)
	Received commitments	**(1)**		**(1)**	**(1)**

(a) This is the Public/Private Partnership (PPP) between the Groups SFR, Vinci, AXA and TDF with Réseau Ferré de France (RFF). (Refer to Note 11—Equity-accounted securities).

(b) The Group has made unilateral promises to buy back the stakes of a minority financial partner within certain entities. These promises may only be carried out in the event that the entities of the Group do not respect the contractual commitments made upon entering into the shareholders' agreements.

25.6. Employees' Individual Right to Training (DIF)

Law No. 2004-391 of May 4, 2004 on professional training and social dialogue created, for permanent employees, an individual training entitlement of a minimum of 20 hours per year, which can be accumulated over a period of six years but limited to 120 hours. The total volume of training hours corresponding to the rights acquired under the DIF at end 2013, 2012 and 2011 is estimated respectively at 1,184,635 hours, 1,194,180 hours and 1,117,215 hours.

25.7. Contingent Assets and Liabilities

Following the successful takeover bid of June 2008 which enabled the Group to acquire a 96.41% stake in Neuf Cegetel, the Group initiated a squeeze-out procedure for the outstanding shares of Neuf Cegetel. The amounts set aside as compensation for Neuf Cegetel shares, which have not been claimed by the depositary institutions on behalf of rights holders, will be retained by the CACEIS Corporate Trust for ten years from the initiation date of the squeeze-out procedure(June 24, 2008). After this date they will be transferred to the Caisse des Dépôts et Consignations. These funds may be claimed at any time by rights holders subject to the French government's thirty-year prescription period.

Note 26. Litigation

In the normal course of its business, SFR is subject to various lawsuits, arbitrations and governmental, administrative or other proceedings (collectively referred to herein as ''Legal Proceedings'').

The costs which may result from these proceedings are only recognized as provisions when they are likely to be incurred, and when the obligation can be reasonably quantified or estimated, in which case, the amount of the provision represents our best estimate of the risk, provided that we may, at any time, reassess such risk if events occur during such proceedings.

To the company's knowledge, there are no Legal Proceedings or any facts of an exceptional nature, including to the company's knowledge, any pending or threatened proceedings in which it is a defendant, which may have or have had during the previous twelve months a significant impact on the company's and on its group's financial position, profit, business and property, other than those described below.

All material Legal Proceedings in which SFR is a plaintiff or a defendant are disclosed in this note.

Note 26. Litigation (Continued)

Complaint of Bouygues Telecom against SFR and Orange concerning the call termination and mobile markets

Bouygues Telecom brought a claim before the French Competition Council against SFR and Orange for certain alleged unfair trading practices on the call termination and mobile markets (''price scissoring''). On May 15, 2009, the French Competition Authority (the ''Competition Authority'') resolved to postpone its decision on the issue and remanded the case for further investigation. On December 13, 2010, SFR was heard on these allegations by the instructing magistrate. On August 18, 2011, SFR received a notification of grievances in which the Competition Authority noted the existence of abusive price discrimination practices. On December 13, 2012, the Competition Authority fined SFR €66 million. SFR appealed against this decision. The case was argued before the Paris Court of Appeal on February 20, 2014.

Following the decision of the Competition Authority of December 13, 2012, Bouygues Telecom, OMEA and EI Telecom (NRJ Mobile) brought a claim before the Paris Commercial Court against SFR for damages suffered. They are seeking damages of €623.6 million, €67.9 million and €28.6 million, respectively. SFR strongly disputes the validity and amount of these claims, which Vivendi believes cannot, in any case, exceed €250 million in total. Pending the decision of the Paris Court of Appeal, the mediation process underway in the Paris Commercial Court between Bouygues Telecom and has been suspended.

Complaint against Orange before the French Competition Authority (NRA ZO)

On December 9, 2009, SFR and SFR Collectivités brought a claim before the French Competition Authority against Orange for unfair practices.

Following the filing of this claim, SFR brought a claim for damages before the Paris Commercial Court of (NRA ZO) against Orange.

Complaint against Orange before the Paris Commercial Court (call termination—call origination)

On February 22, 2010, SFR brought a claim against Orange seeking the rescindment of the Orange call origination charge for the period 2006-2007 and its replacement by a charge that is 2% lower for 2006 and 15% lower for 2007.

Complaint by Orange Réunion, Orange Mayotte and Outremer Telecom against SRR

On June 6, 2009, Orange Réunion, Orange Mayotte and Outremer Télécom notified the French Competition Authority about alleged on-net/off-net pricing discrimination practices implemented by SRR on the mobile market in Mayotte and Réunion.

On September 16, 2009, the French Competition Authority (the ''Competition Authority'') imposed protective measures on SRR, pending its decision on the merits. Following this decision, on June 17, 2013, Outremer Telecom filed a claim before the Paris Commercial Court against SFR and SRR in respect of the consumer market and the business market for damages it claims to have suffered as a result of the practices reported in the notification to the Competition Authority. The Court has issued a stay of these proceedings. On July 12, 2013, SRR received a notification of grievances concerning its practices on the consumer market and did not contest it. The amount of the fine to be imposed on SRR is currently under review by the Competition Authority.

Complaint against Orange before the French Competition Authority

On August 9, 2010, SFR filed a complaint before the French Competition Authority against Orange for anti-competitive practices on the professional mobile market.

Note 26. Litigation (Continued)

Complaint of Orange against SFR before the Paris Commercial Court (overflow case)

In a complaint filed on August 10, 2011, Orange asked the Paris Commercial Court to compel SFR to immediately stop its practices of unfair ''overflow'' and to order SFR to pay the sum of €309.5 million in penalties established by mutual agreement. SFR is accused of having deliberately organized the overflow onto the Orange network for the purpose of optimizing the economic performance of its own network (undersizing of ''PDB''/[''BPN''] commands). On December 10, 2013, the Court ordered SFR to pay €22.1 million to Orange. SFR and Orange have appealed this decision.

SFR against Orange: abuse of dominant position on the secondary residence market

On April 24, 2012, SFR filed a complaint before the Commercial Court of Paris against Orange for practices constituting an abuse of its dominant position on the retail market for mobile telephony services to non-residential customers, and seeking damages of between €122 million and €129 million.

On February 12, 2014, the Commercial Court of Paris ordered Orange to pay €51.4 million to SFR for abuse of its dominant position on the secondary residence market.

Free against SFR: unfair competition for non-compliance with provisions inherent to consumer credit in respect of offers with subsidies

On May 21, 2012, Free filed a complaint before the Paris Commercial Court against SFR. Free is challenging the subsidy model associated with SFR's *Carrée* offerings sold over the Internet from June 2011 to December 2012, claiming that it constitutes a consumer credit mechanism and as such, SFR is guilty of unfair practices, by not respecting the provisions inherent to consumer credit including providing prior information to customers. Free has asked, among other things, that the Paris Commercial Court compel SFR to inform its customers, and to award damages of €29 million. On January 15, 2013, the Paris Commercial Court dismissed all of Free's claims and awarded SFR the sum of €0.3 million in damages. On January 31, 2013, Free appealed this decision.

UFC against SFR: abusive clauses

On June 7, 2012, the French Federal Union of Consumers (UFC) filed a complaint before the Paris Court of First Instance (Tribunal de Grande Instance) against SFR alleging that the general conditions of use of SFR's *La Carte* offering contain abusive clauses. The UFC is seeking the removal of these clauses and damages.

SFR against Orange (ZND case)

On November 26, 2012, SFR notified the French Competition Authority about practices constituting an abuse of dominant position on the retail high-speed internet access market in non-unbundled areas.

CLCV summons against SFR

On January 7, 2013, the French consumer protection association, CLCV (Consumption housing and quality of life) filed a complaint before the Paris Tribunal of First Instance against SFR.

The CLCV considers certain clauses contained in the general conditions of subscription of SFR (as well as those of other telephone operators) to be abusive and is seeking the removal of such clauses. It is also seeking compensation for the collective loss.

Employee litigation arising from the transfer of customer relations centers in Toulouse, Lyon and Poitiers

Following the transfer of the customer relations centers located in Toulouse and Lyon to the company Infomobile, and of the center in Poitiers to a subsidiary of the Bertelsmann Group, former employees of these sites filed complaints with the industrial tribunals (Conseils des Prud'hommes) of each of these

Note 26. Litigation (Continued)

cities, claiming unfair execution of their employment contracts and fraudulent breach of Article L.1224-1 of the French Labor Code and of the legal provisions relating to dismissal on economic grounds. The findings of the courts on this issue in 2013 were not consistent; the Toulouse Court of Appeal sanctioned the SFR and Téléperformance groups in half the cases, while the courts of Lyon and Poitiers rendered judgments which were favorable to SFR. The cases are at different stages of proceedings: industrial tribunal, Court of Appeal and Supreme Court.

Disputes with independent distributors (Consumers and SFR Business Team)

SFR, like other companies that use an indirect distribution model, faces complaints by its distributors, and almost systematically, by its former distributors. These recurring disputes concern the abrupt termination of the contractual relationship, the abuse of economic dependency and/or requests for reclassification of a distributor as commercial agent, and, more recently, applications for reclassification of a manager as a branch manager and reclassification of the employment contracts of the employees working at these points-of-sale as employment contracts with SFR . Following several adverse rulings of the Supreme Court in relation to the status of branch managers, various Courts of Appeal have recently issued a number of decisions favorable to SFR. With regard to the reclassification of employment and sales contracts in these disputes, apart from a few exceptions, SFR has benefited from favorable case law.

Note 27. List of Combined Entities (Continued)

At December 31, 2011, there remained one Dutch company (SPADIX BV) specifically created under the lease/sublease agreements entered into in 2001, in which the combined group has no shareholding. This company departed from the scope of combination in 2012.

Note 28. Subsequent Events

On January 31, 2014, SFR and Bouygues signed a strategic network sharing agreement. The two operators are to roll out a new shared mobile network over an area covering 57% of the population. This agreement will enable both operators to improve their mobile coverage and generate significant savings. The agreement is effective upon signature with the creation of a joint venture, and the shared network is expected to be completed by the end of 2017. This agreement had no impact on the combined financial statements as of December 31, 2013. Pending its implementation, this agreement represents a net commitment received by SFR of approximately €460 million, which applies over the entire duration of the long-term agreement.

On February 13, 2014, Vivendi announced it had entered into exclusive negotiations with the Belgacom Group in order to acquire 100% of the shares of Groupe Telindus France. Groupe Telindus France is one of the leaders in the French telecoms integration and ICT (Information and Communication Technology) market, and is the leading Cisco distributor in France. Telindus France aims to reinforce the Vivendi French telecoms segment alongside SFR, which will thus considerably strengthen its presence on the adjacent market of telecoms integration and will enable to offer new services to its corporate clients in addition to the offers from SFR Business Team.

Within the framework of its public service outsourcing activity since 2004 in Oise département, the Group has committed to launching a new project ''Oise THD'' (''Oise Very High Speed Internet'') for the operation and marketing of 280,000 FTTH outlets. The contract is to be signed in March 2014. The total commitment should amount to €125 million over 15 years.

INDEPENDENT AUDITORS' REVIEW REPORT

To the Board of Directors and Shareholders of Orange Dominicana

We have reviewed the accompanying condensed statement of financial position of Orange Dominicana (the ''Company'') as of September 30, 2013, and the related condensed statements of income, shareholders' equity and of cash flows for the nine-month periods ended September 30, 2013 and 2012 (the ''interim financial statements''). These interim financial statements are the responsibility of the Company's management.

We conducted our review in accordance with auditing standards generally accepted in the United States of America (''US GAAS'') applicable to reviews of interim financial statements. A review of interim financial statements consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with US GAAS, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to such interim financial statements for them to be in conformity with International Financial Reporting Standards as issued by the IASB.

Notes to the unaudited condensed interim standalone financial statements

Note 1—Basis of preparation of the condensed interim standalone financial statements

This note describes the changes in accounting policies which were used by Orange Dominicana S.A. (hereafter called ''ODO'') to prepare its condensed interim financial statements as of September 30, 2013 and for the nine-month periods ended September 30, 2013 and 2012 (the ''Interim Financial Statements''). The financial statements as of December 31, 2012 and 2011 and for the two years then ended were audited by Deloitte & Associés and signed off on September 18, 2013 (the Financial Statements).

1.1 Basis of presentation and purpose of the financial statements

The condensed financial statements and notes were prepared for the purpose of the disposal of ODO by the Orange Group.

The Interim Financial Statements were prepared in accordance with IAS 34 ''Interim Financial Reporting'', as issued by the IASB.

The Interim Financial Statements were prepared using the same accounting policies as the Financial Statements, with the exception of the specific requirements of IAS 34 and the application of the new standards presented in note 1.4.

Where a specific transaction is not dealt with any standard or interpretation, management uses its judgment to define and apply an accounting policy that will result in relevant and reliable information, such that the financial statements:

- present fairly ODO's financial position, financial performance and cash flows;
- reflect the economic substance of the transactions;
- are neutral;
- are prepared on a prudent basis; and
- are complete in all material respects.

1.2 Uses of estimates and judgment

In preparing ODO's financial statements, ODO's management is required to make estimates insofar as many elements included in the financial statements cannot be measured with precision. The underlying assumptions used for the main estimates are similar to those described in the Financial Statements. The management revises these estimates if the underlying circumstances evolve or in light of new information or experience. Consequently, estimates made at September 30, 2013 may subsequently be changed. ODO's management also uses its judgment to define appropriate accounting policies to apply to certain transactions when the current IFRS standards and interpretations do not specifically deal with related accounting issues.

1.3 New standards and interpretations

- Standard applied from January 1, 2013

Standard		Consequences for ODO
IFRS 13	Fair Value Measurement	This standard is applicable prospectively and has no effect on the fair value currently measured by ODO: The requirements provided by the standard have no effect on the measurements of the fair value of the Company's financial assets and liabilities.

Note 1—Basis of preparation of the condensed interim standalone financial statements (Continued)

- Interpretation issued but not earlier applied

Standard		Consequences for ODO
IFRIC 21	Levies	The principal issue raised by this interpretation is about when an entity should recognise a liability to pay a levy imposed by government (other than income taxes). The application of this interpretation might impact the interim net income and its effects are currently being analyzed by ODO. This interpretation is applicable retrospectively from January 1, 2014.

Note 2—Sales

Note 6—Equity

6.1 Share capital

At September 30, 2013, based on the number of issued shares at that date, ODO's share capital amounted to RD$5,800,000,000, comprising 58,000,000 shares with a par value of RD$100 each.

6.2 Legal reserve

In accordance with the article 58 of the commercial Code of the Dominican Republic, the legal reserve is annually contributed by 5% of the net income until the total amount equals 10% of paid-in capital. This reserve cannot be capitalized, transferred to retained earnings or to be used to pay dividends.

6.3 Dividends

ODO's shareholders meeting approved the payment of dividends in May 2013 for a total amount of RD$1,855,350,000.

The Tax Reform Act, No. 253-12, enacted on November 9, 2012 establishes a 10% withholding tax on dividends due by the distributing entity (accounted for as a reduction of equity in accordance with IAS 12—Income Tax). This new act supersedes the prior regime that consisted in a 29% withholding tax on dividends, which was subsequently refunded as a tax credit to the distributing entity, in the same fiscal period.

Note 7—Litigation and unrecognized contractual commitments

7.1 Litigation

As of September 30, 2013, ODO is party to certain judicial procedures with former distributors or dealers, for which no provision is recorded as ODO considers at this stage of the procedure that the claims are without merit.

No significant litigation has occurred since December 31, 2012.

Note 7—Litigation and unrecognized contractual commitments (Continued)

7.2 Unrecognized contractual commitments

No event has significantly impacted the unrecognized contractual commitments since December 31, 2012.

Note 8—Subsequent events

None.

INDEPENDENT AUDITORS' REPORT

To the Board of Directors and Stockholders of Orange Dominicana

We have audited the accompanying balance sheets of Orange Dominicana (the ''Company'') as of December 31, 2013 and 2012, and the related statements of income, stockholders' equity, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2013 and 2012, and the results of its operations and its cash flows for the years then ended in conformity with International Financial Reporting Standards (''IFRS'') as issued by the IASB.

Orange Dominicana, S. A.

Notes to the Financial Statements

December 31, 2013 and 2012

(Amounts expressed in Dominican pesos-RD$)

1 Description of business and basis of preparation of the standalone financial statements

1.1 Description of business

Orange Dominicana, S.A. (hereafter called ''ODO''), a Company incorporated in accordance with the Dominican Republic laws, began operations on November 13th, 2000. ODO is an indirectly wholly owned subsidiary of Orange S.A., French listed Company.

ODO operates under a service concession agreement for the operation of telecommunications services.

ODO provides consumers, businesses and other telecommunication operators with a wide range of services including mobile telecommunications, data transmission and other value-added services.

1.2 Basis of presentation and purpose of the financial statements

These financial statements have been prepared in accordance with International Financial Reporting Standards (IFRSs).

The principles applied to prepare financial data are based on:

- All standards and interpretations compulsory as of December 31, 2013;
- The recognition and measurement alternatives allowed by the IFRSs:

Standard		Alternative used
IAS 2	Inventories	Measurement of inventories determined by the weighted average unit cost method.
IAS 16	Property, Plant and Equipment	Measurement at amortized historical cost
IAS 38	Intangible Assets	Measurement at amortized historical cost

- The available exemptions regarding the retrospective application of IFRSs at the transition date (January 1, 2004 for ODO):

Standard		IFRS 1 alternative used
IAS 16	Property, Plant and Equipment	Measurement of property, plant and equipment and intangible assets at historical cost
IAS 38	Intangible Assets	

In the absence of any accounting standard or interpretation, management uses its judgment to define and apply an accounting policy that will result in relevant and reliable information, such that the financial statements:

- Present fairly the ODO's financial position, financial performance and cash flows;
- Reflect the economic substance of transactions;
- Are neutral;
- Are prepared on a prudent basis; and
- Are complete in all material respects.

1.3 Standards and interpretations compulsory after December 31, 2012 with no early application elected by ODO.

IFRS 13—Fair value measurement—defines fair value, sets out a framework for measuring fair value and requires disclosures about fair value measurements, including the fair value hierarchy already set out in

1 Description of business and basis of preparation of the standalone financial statements (Continued)

IFRS 7. This standard is applicable prospectively and has no expected effect on the fair value currently measured by ODO.

1.4 Use of estimates and judgment

In preparing ODO's financial statements, the management makes estimates, insofar as many elements included in the financial statements cannot be measured with precision. These estimates are revised if the underlying circumstances evolve or in light of new information or experience. Consequently, estimates made at December 31, 2013 may subsequently be changed.

ODO's management also uses its judgment to define appropriate accounting policies to apply to certain transactions when the current IFRS standards and interpretations do not specifically deal with related accounting issues.

The underlying assumptions used for significant estimates are outlined below:

Estimate		Nature of estimate
Note 2.3	Revenue	Identification of separable components of a bundled offer based on the individual components relative fair value period of straight-line recognition of revenue relating to invoiced service access fees depending onthe nature of product and historical contractual relationship. Reporting of revenue on a net versus gross basis (depending on an analysis of the ODO's involvement as either principal or agent).
Note 2.5	Purchases and other expenses	Provision for claims and litigation: assumptions underlying legal assessment and risk measurement.
Note 2.10.2	Property, plant and equipment, intangible assets	Assessment of assets' useful life based on assessment of the technological, legal or economic environments.
Note 2.11	Income tax ISR	Assumptions used for the computation of the income tax charge to be recorded in the financial statements, together with the technical merit of tax positions. Assumptions used for recognition of deferred tax assets arising.

2 Accounting policies

2.1 Financial statements preparation principle

Income statement

Expenses are presented in the income statement based on their nature.

Operating income corresponds to net income before:

- Finance income;
- Finance costs;
- Income tax (current and deferred taxes).

2 Accounting policies (Continued)

Statement of financial position

Current and non-current items are presented separately in the statement of financial position: assets and liabilities with a term of no more than twelvemonths are classified as current whereas, assets and liabilities with a term of more than twelve months are classified as non-current.

Statement of cash flows

The statement of cash flows is reported using the indirect method starting with the net income and is broken down into three categories:

- Cash flows arising from operating activities (including finance costs and income taxes);
- Cash flows arising from investing activities (mainly purchase and disposal of intangible and tangible assets);
- Cash flows arising from financing activities (dividends paid).

2.2 Foreign operations

The amounts in financial statements are expressed in Dominican pesos. All of the amounts of assets and liabilities in foreign currency are translated into Dominican pesos, at the rate in effect of the date of the financial statements. Transactions of revenues, expenses and others, occurred during current years are translated at the rate in effect on the date of the transaction. Gain and losses resulting from the differences between exchange rates are included as other income (expenses) in the accompanying income statements.

As of December 31, 2013 and 2012, the exchange rates used to exchange the amounts in foreign currency were RD$42.78 and RD$40.25 per US$1.00, respectively for cash, accounts receivable and accounts payable; Euro rate is RD$59.52 and RD$53.78 per €1.00, respectively.

2.3 Revenues

Revenues from ODO's activities are recognized as follows:

2.3.1 Separable components of bundled offers

Certain service offers include two components: an equipment component (e.g. a mobile handset) and a service component (e.g. a talk plan). For the sale of multiple products or services, ODO evaluates all deliverables in the arrangement to determine whether they represent separate units of accounting. A delivered item is considered a separate unit of accounting if (i) it has value to the customer on a standalone basis and (ii) there is objective and reliable evidence of the fair value of the undelivered item(s). The total fixed or determinable amount of the arrangement is allocated to the separate units of accounting based on its relative fair value. However, when an amount allocated to a delivered item is contingent upon the delivery of additional items or meeting specified performance conditions, the amount allocated to that delivered item is limited to the non-contingent amount. This case arises when selling bundled offers that include a handset sold at a discounted price and a telecommunications service contract.

The handset is considered to have value on a standalone basis to the customer, and there is objective and reliable evidence of fair value for the telecommunications service to be delivered. As the amount allocable to the handset generally exceeds the amount received from the customer at the date the handset is delivered, revenue recognized for the handset sale is generally limited to the amount of the arrangement that is not contingent upon the rendering of telecommunication services, i.e. the amount paid by the customer for the handset.

2 Accounting policies (Continued)

For offers that cannot be separated into identifiable components, revenues are recognized in full over the life of the contract. The main example is connection to the service: this does not represent a separately identifiable transaction from the subscription and communications, and connection fees are therefore recognized over the average expected life of the contractual relationship.

2.3.2 Equipment sales

Revenues from mobile sales are recognized when the significant risks and rewards of ownership are transferred to the buyer.

When equipment—associated to the subscription of telecommunication services—is sold by a third party retailer who purchases it from ODO and receives a commission for signing up the customer, the related revenue is:

- Recognized when the equipment is sold to the end-customer;
- Measured by ODO taking into account the best estimate of the retail price and any subsidies granted to the retailer at the time of the sale and passed on to the end-customer in the form of a rebate on the equipment.

2.3.3 Service revenues

Considerations from telephone service are recognized in revenue on a straight-line basis over the subscription period.

Revenue for airtime usage and messaging bý customers is recognized as services are performed, with unbilled revenue resulting from services already provided accrued at the end of each period and unearned revenue from services to be provided in future periods deferred. Revenue from the sale of prepaid credit is deferred until such time as the customer uses the airtime, or the credit expires.

2.3.4 Loyalty programs

Points awarded to customers are treated as a separable component to be delivered in the transaction that triggered the acquisition of points. Part of the invoiced revenue is allocated to these points based on their fair value taking into account an estimated utilization rate, and deferred until the date at which the points are definitively converted into benefits. Fair value is defined as the excess price over the sales incentive that would be granted to any new customer. This principle is applied for both types of loyalty programs that exist within ODO, those with and those without a contractual renewal obligation.

2.4 Trade receivables

The trade receivables are mainly short-term, bearing no interest rate and measured at original invoice amount.

The valuation allowance on trade receivables is determined as follows:

- **For mobile telephone services:** The allowance is computed based on expected loss rates depending upon their aging. These rates are reviewed and adjusted periodically. When a client is determined to be in bankruptcy or subject to equivalent judicial proceedings, the associated receivables are then excluded from the statistical database and individually written-off;
- **For dealers, wholesalers, interconnection (local and roaming) and carriers:** The impairment loss is determined on a case by case analysis based on the ODO's experience.

2 Accounting policies (Continued)

2.5 Purchases and operating expenses

Subscriber acquisition and retention costs

Subscriber acquisition and retention costs, other than loyalty programs costs, are recognized as an expense for the period in which they are incurred.

Advertising and sponsoring costs

Advertising, promotion, sponsoring, communications and brand marketing costs are expensed as incurred.

Financing expenses

Expenses from commissions, foreign currency exchange and other financing expenses are recorded with charge to the period result.

2.6 Inventories

The inventories comprise mainly mobile handsets either located in ODO's premises or at distributors until the customer service activation.

The inventories are stated at the lower of cost or net realizable value taking into account expected revenues from the sales of mobile phones. Cost corresponds to purchase cost determined using the weighted average cost method.

2.7 Trade payables

Payables are recorded at their nominal value.

2.8 Provisions and contingent liabilities

2.8.1 Provisions

In the ordinary course of business, ODO is involved in certain legal and arbitration proceedings and administrative actions.

The costs which may result from these proceedings are accrued when ODO has a present obligation towards a third party and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and the amount of that liability can be quantified or estimated within a reasonable range. The amount of provision recorded is based on a case-by-case assessment of the risk level, and events arising during the course of legal proceedings may require a reassessment of this risk.

2.8.2 Contingent liabilities

Contingent liabilities are:

- Possible obligations that are not recognized because their existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within ODO's control; or
- Present obligations arising from past events that are not recognized because it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation or because the amount of the obligation cannot be measured with sufficient reliability.

2 Accounting policies (Continued)

2.9 Employee benefits

Labor costs are expensed as incurred including social costs contributed by the Company in accordance with the law 87-01.

This law establishes that the employer will contribute to the financing of the contributing regime, as much for old aged insurance; handicaps (AFP) with 7.10% and family health (SFS) with 7.09% based on the wages and the employee will cover 2.87% and 3.04% respectively.

Employees are not provided with postemployment benefits.

2.10Intangible assets, property, plant and equipment

2.10.1 Intangible assets

Intangible assets comprise mainly licenses for software and international telecommunication, frequency rights and Indefeasible Rights of Use (IRUs).

IRUs acquired by ODO correspond to the right to use cable or capacity transmission cable granted for a fixed period. They are recognized as an asset when ODO has the specific indefeasible right to use an identified portion of the underlying asset, generally optical fibers or dedicated wavelength bandwidth, and the duration of the right is for the major part of the underlying asset's economic life.

2.10.2 Property, plant and equipments

Property, plant and equipment comprised mainly network equipment.

The gross value of tangible assets corresponds to their acquisition or production cost, including costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

Due to 2004 and 2005 hyperinflation in Dominican Republic, ODO restated its 2004 and 2005 financial statements applying IAS 29 *Financial Reporting in Hyperinflationary Economies* and adjusted consequently the gross value of assets with the corresponding balance within Shareholders' equity (i.e. Hyperinflation reserve).

The cost of networks includes design and construction costs. Maintenance and repair costs are expensed as incurred, except where they increase the asset's productivity or extend its useful life.

2.10.3 Depreciation

Assets are depreciated, generally with no residual value, on a basis that reflects the pattern in which their future economic benefits are expected to be consumed. The straight-line basis is usually applied. The

2 Accounting policies (Continued)

useful lives are reviewed annually and are adjusted if current estimated useful lives differ from previous estimates: these changes in accounting estimates are recognized prospectively.

Main assets categories	Useful Lives in Years
Licences	3 - 5
Frequencies	10 - 15
IRU (Indefeasible rights of use)	10 - 15
Buildings	30
Antennas and technical equipment installed (sites)	8 - 28
Other technical equipment	3 - 8
Office material and software	3 - 5
Office furniture and equipment	5 - 10
Leased improvements	10

2.10.4 Dismantling

ODO is required to dismantle equipment and restore sites.

The provision is based on dismantling costs (on a per-unit basis for telephone poles, terminals and public phones, and on a per-site basis for mobile antennae) incurred by ODO to meet its environmental commitments and annual estimated asset dismantling and site restorations. The provision is assessed on the basis of the identified costs for the current financial year, extrapolated for future years using the best estimate of the commitment settlement. It is discounted at a risk-free rate. This estimate is revised annually and adjusted where appropriate against the asset to which it relates.

2.11Financial instruments

The International Financial Reporting Standards (IFRS) require the disclosure of the estimated value of financial instruments, when it is practical to estimate their fair market value. The method and assumptions used to estimate the fair value of the active financial instruments like cash and cash equivalents, trade accounts receivable and payable, consisted in the approximate book value given the short expiration time of these instruments.

2.12Income tax

Current tax is measured by ODO at the amount expected to be paid or recovered from the taxation authorities, based on its interpretation with regard to the application of tax legislation.

Deferred taxes are recognized for all temporary differences between the book values of assets and liabilities and their tax basis, using the liability method. Deferred tax assets are recognized only when their recovery is considered probable.

Deferred tax assets and liabilities are not discounted.

At reporting period end, ODO reviews the recoverable amount of the deferred tax assets.

In accordance with these principles, ODO calculates the tax assets, liabilities and accruals recognized in the statement of financial position based on the technical merits of the positions it defends versus that of the tax authorities.

Deferred tax assets and liabilities are measured at the expected tax rates for the year during which the assets will be realized and the liabilities settled on the basis of tax rates in force or substantially in force at the period end.

2.13Cash and cash equivalents

Cash and cash equivalents are defined as cash on hand, demand deposits and short-term investments with original maturity at the date of acquisition of three month or less.

3 Financial risk management

The Company is exposed to the following risks related to the use of financial instruments:

- Credit Risk
- Liquidity Risk
- Market Risk

3.1 Credit Risk

It is the risk of financial loss of the company if a client or the counterpart of a financial instrument, do not fulfill its contractual obligations. It comes from Cash and Receivables accounts mainly. This risk is primarily impacted by the quality and characteristics of every client.

The revenues of the Company are the results from the telecommunication services and the sale of mobiles. Accounts receivable arise with the billing to our customers and sales to wholesalers and distributors.

The company estimates the potential losses on the trade receivable accounts and other receivables based on specific components related to individual characteristics for which there is a reserve for bad debt.

3.2 Liquidity Risk

It is the risk that the company does not meet its financial obligations when dues. The policy of the company in regards to the management of the liquidity risk is to have, to the extent possible, sufficient liquidity to redeem all the current liabilities at their corresponding maturities, under normal circumstances as well as in economic crisis also without having to incur in unacceptable losses or risk damaging the company's reputation.

3.3 Market Risk

It is the risk of changes in the market price (or rates) such as exchange rates of foreign currency and interest rates that might have an impact on the net results or the value of the financial instruments owned by the company. The objective of this management is to control the exposure to this risk within acceptable parameters while improving the return of this risk.

The company is exposed to the foreign exchange risk in the purchase of goods and services denominated in dollars (US$) and euros (EUR), which are currencies different from the reporting currency of the company, as well as for keeping assets and liabilities in those currencies without having a financial instrument to cover the exchange risk.

4 Revenues

A detail of revenues as of December 31,2013 and 2012 is as follows:

	2013	2012
Mobile	20,503,053,000	19,436,051,000
Wholesale	1,815,813,000	1,662,445,000
Internet	644,159,000	507,036,000
Equipment	1,151,349,000	866,134,000
Other	290,350,867	282,707,505
	24,404,724,867	**22,754,373,505**

5 Trade receivables

A detail of the trade receivables as of December 31,2013 and 2012 is as follows:

	2013	2012
Customers (gross)	2,293,630,201	2,424,943,725
Provision for doubtful accounts	(460,743,090)	(487,534,820)
Customers (net of provision)	**1,832,887,111**	**1,937,408,905**

A detail of accounts receivables with an aging as of December 31, 2013 and 2012 is as follows:

	2013	2012
Not due or less than 30 days	1,438,538,202	1,251,365,210
Between 30 and 60 days	238,936,495	654,176,575
Between 60 and 90 days	106,597,280	181,345,679
More than 90 days	509,558,224	338,056,261
	2,293,630,201	**2,424,943,725**

ODO 2012 figures have been restated in order to make possible the comparability between years 2013 and 2012. The restatement consisted in a netting between the trade receivables and the trade payables for an amount of RD$633,372,811.

6 Other receivables

A detail of the other receivables as of December 31, 2013 and 2012 is as follows:

	2013	2012
Advances to suppliers	171,599,490	296,156,659
VAT	216,507,994	158,393,560
Cash pooling—current account	2,566,699,740	135,623,414
Others	17,707,835	39,281,085
	2,972,515,059	**629,454,718**

7 Deferred income

A detail of deferred income as of December 31, 2013 and 2012 is as follow:

	2013	2012
Prepaid telephone cards	906,677,451	768,069,643
Loyalty program	481,072,839	511,072,839
Monthly fee	119,517,977	130,045,686
Handsets	91,950,897	237,384,310
Sim cards	(1,915,891)	68,415,160
	1,597,303,273	**1,714,987,638**

8 Cost of equipment sold

The costs of equipment sold comprise purchases of handsets and other Sim and phone cards, as well as all costs directly attributable to them (mainly import duties and freight charges). A detail of cost of equipment sold as of December 31, 2013 and 2012 is as follow:

	2013	2012
Terminals	(3,005,732,352)	(2,691,685,132)
SIM cards	(117,495,603)	(134,380,975)
Import duties and freight costs	(95,833,246)	(123,264,823)
Phone cards	(37,918,765)	(50,750,362)
Accessories	(167,880)	168,291
Other	(1,743,347)	(196,166)
	(3,258,891,193)	**(3,000,109,167)**

9 Selling, distribution and traffic costs

A detail of the selling, distribution and traffic costs as of December 31, 2013 and 2012 is as follows:

	2013	2012
Selling and distribution costs	(2,280,230,331)	(2,181,628,470)
National voice mobile terminations	(1,798,145,387)	(1,766,511,266)
National voice fixed line terminations	(170,473,269)	(222,273,638)
International terminations	(501,946,684)	(497,571,059)
Data terminations (SMS)	(227,304,467)	(215,589,932)
International roaming	(66,724,930)	(76,658,280)
Other	(1,217,784,156)	(900,958,904)
	(6,262,609,226)	**(5,861,191,549)**

10 Others costs and income

A detail of the other costs and income as of December 31, 2013 and 2012 is as follows:

	2013	2012
Other income	192,711,837	127,281,750
Purchase of services	(442,714,740)	(453,543,414)
Network energy	(509,614,096)	(432,777,929)
Consulting, contractors & prof. serv.	(258,883,238)	(309,892,025)
Bad debt expense	(183,177,721)	(212,931,032)
IT expenses	(169,508,120)	(178,198,199)
Temporary staff / interim net[a]	(77,145,048)	(78,477,569)
Purchases of supplies	(133,406,463)	(137,764,003)
Operating tax	(49,702,291)	(137,062,235)
Other	(712,147,693)	(759,148,594)
	(2,343,587,573)	**(2,572,513,250)**

(a) The temporary labor expenses attributable to the network development are net of costs capitalized (RD$ 89,832,817 and RD$ 71,335,720, respectively for 2013 and 2012).

11 Inventories

As of December 31, 2013 and 2012, inventories are composed of equipments, accessories and prepaid cards and a detail of the same is as follows:

	2013	2012
ODO's warehouse	933,564,620	572,890,663
ODO's distributors (dealers)	100,784,043	310,070,460
	1,034,348,663	**882,961,123**

12 Trade payables

A detail of trade payables as of December 31, 2013 and 2012 is as follows:

	2013	2012
Fixed assets and operating suppliers	1,974,180,451	2,476,250,462
Related companies (see note 24)	327,464,583	314,449,212
Distributors (dealer)	175,108,372	164,294,562
Merchandises suppliers	646,847,845	540,481,470
Others	128,521,664	9,176,095
	3,252,122,915	**3,504,651,801**

ODO 2012 figures have been restated in order to make possible the comparability between years 2013 and 2012. The restatement consisted in a netting between the trade receivables and the trade payables for an amount of RD$633,372,811.

13 Other current liabilities

A detail of the other current liabilities as of December 31, 2013 and 2012 is as follows:

	2013	2012
Taxes and VAT	464,918,913	455,803,544
Staff bonuses	228,037,124	213,293,578
Vacations and other	28,086,482	28,631,492
	721,042,519	**697,728,614**

14 Labor expenses

A detail of labor expenses as of December 31, 2013 and 2012 is as follows:

	2013	2012
Salaries and wages[a]	(766,797,062)	(758,861,075)
Employee profit sharing	(181,597,181)	(167,749,604)
Social contribution	(156,712,236)	(143,296,628)
Others	(128,786,005)	(104,821,663)
	(1,233,892,484)	**(1,174,728,970)**

(a) According to the Company's policies and standards, personnel expenses that work at Network development are capitalized at the project for which such personnel is working. As of December 31, 2013 and 2012 the capitalized amounts for this concept are for RD$296,338,497 and RD$266,039,069, respectively.

15 Intangible assets

A detail of intangible assets as of December 31, 2013 and 2012 is as follows:

	2013				
	Frequencies	**Software licenses & IRU**	**Rights of use corporate solutions**	**Total**	**2012**
Acquisition cost at beginning of the year	1,192,676,947	4,094,656,072	132,852,964	5,420,185,983	4,782,110,362
Acquisition	—	571,843,256	20,830,486	592,673,742	696,046,488

	—	**(993,262,077)**	**(14,710,499,827)**	**(1,649,670,324)**	**(112,172,817)**	**(17,465,605,045)**	**(16,115,140,675)**
	160,306,109	**779,292,734**	**11,962,710,751**	**703,089,393**	**84,043,163**	**13,689,442,150**	**13,873,521,204**

For the period ended December 31, 2013, the reallocations mainly comprise a reclassification between gross value and depreciation due to hyperinflation effect for an amount of MDOP 1,461. ODO stopped the Hyperinflation restatement in the year 2006.

17 Non-current liabilities

A detail of the non-current liabilities as of December 31, 2013 and 2012 is as follows:

	2013	2012
Customer deposit	213,025,325	203,084,345
Provisions	259,834,847	343,923,698
ARO provisions	159,247,179	97,667,735
	632,107,351	**644,675,778**

18 Income Tax

The tax expense shown in the income statement as of December 31, 2013 and 2012 is as follows:

	2013	2012
Current Income Tax	(1,625,181,190)	(1,462,560,892)
Deferred Income Tax	184,181,317	332,500,698
Dividends Credits	—	329,753,087
Tax credits from Law 57-2007 incentives	51,065,771	10,375,360
	(1,389,934,101)	**(789,931,748)**

The reconciliation between the profit before income tax as per the income statements, and the income tax expense is as follows:

	2013	2012
Profit before income tax	**5,286,960,759**	**4,236,199,291**
29% Income tax rate on profit before income tax	(1,533,218,620)	(1,228,497,795)
Tax effect of:		
Dividends credits	—	329,753,087
Inflation adjustment applied to depreciable fixed assets	180,034,077	168,732,345
Effect of change in tax rate on deferred income tax	(15,882,170)	46,475,938
Adjustment to current tax of prior year	9,418,271	(63,714,428)
Other	(30,285,660)	(42,680,895)
Effective income tax	**(1,389,934,101)**	**(789,931,748)**
Effective tax rate	**26.3%**	**18.6%**

The reconciliation of the income tax payable/receivable as of December 31, 2013 and 2012 is as follows:

	2013	2012
Advances of the period	1,003,996,777	497,442,249
Prior year tax credit carried forward	272,645,963	796,762,816
Tax credit from Law 57-2007 incentives	51,065,771	10,387,949
Credit arising from dividends withholdings	—	329,753,087
Current tax provision	(1,625,181,190)	(1,398,846,464)
	(297,472,679)	**235,499,637**

18 Income Tax (Continued)

The deferred income tax as of December 31, 2013 and 2012 is composed as follows:

	2013		2012	
	Balance Sheet	Income Statement	Balance Sheet	Income Statement
Deferred tax assets				
Provisión for Loyalty Program	129,889,667	8,100,000	137,989,667	15,151,457
Depreciable fixed assets	1,275,118,503	(174,222,770)	1,100,895,733	(257,394,884)

	(112,776,591)	(10,519,975)	(123,296,567)	9,559,672
Net deferred tax	**1,806,330,478**	**(184,181,317)**	**1,622,149,160**	**(332,500,698)**

19 Cash and cash equivalents

A detail of cash and cash equivalents as of December 31, 2013 and 2012 is as follows:

	2013	2012
Cash on hand	1,357,000	944,811
Cash at banks	1,037,568,338	1,158,645,957
	1,038,925,338	**1,159,590,768**

20 Share capital

The General Assembly of Shareholders decided on December 19, 2012 the capitalization of retained earnings to increase the authorized capital by adding 38,000,000 shares. Therefore the new amount of shares is 58,000,000 at RD$100 each.

As of December 31, 2013 and 2012 the outstanding capital paid is composed by 58,000,000 shares for a total amount of RD$5,800,000,000.

21 Legal reserve

The Commercial Code of the Dominican Republic in its article number 58 provides that the Company appropriate no less than 5% annually of net annual result until the total appropriated amount equals 10% of paid in capital. This reserve cannot be capitalized, transferred to retained earnings or to use to pay dividends.

22 Remittance of dividends

ODO shareholders meeting approved the payment of dividends in May 2013 for a total amount of RD$1,855,350,000.

In November 2012 was enacted the law 253-12 of fiscal reform, establishing that dividend payments will be subject to withholding and payment of 10% of income tax as a unique payment, but not constitute anymore a tax credit for the Company.

23 Foreign currency balances

ODO is exposed to foreign exchange risk due both to its revenues and purchases denominated in US dollars and euros. As a consequence, these foreign operations have a direct effect on the operating, finance income and the trade receivables and payables.

	2013	2012

Other operational expenses, net	(66,568,920)	(102,414,970)
Other operational income	195,501	12,636,008

(a) In February 2009, Orange S. A. and ODO signed a centralized treasury management agreement (CTMA). Orange S. A. thus optimizes the Group liquidity .ODO lends or borrows tits cash surplus/needs through a current account with Orange S. A.

The cash pooling accounts bear interest which is calculated on a daily balance and on a daily basis using:

- for the EUR account: EONIA rate for a credit balance and EONIA plus 2.15% margin for a debit balance
- for the USD account: LIBOR Overnight rate for a credit balance and LIBOR Overnight plus 2.15% margin for a debit balance

(b) The utilization of the Orange brand name is defined in a brand license agreement signed with Orange Group and costs a 1.6% fee of the ODO's monthly operating revenue.

(c) Management fees are determined in accordance with an agreement signed with Orange S. A. and are charged using a 1.03% on the monthly contributive operational revenue in 2012.

25 Unrecognized contractual commitments

As at December 31, 2013 and 2012 the contractual commitments are as follows:

Leasing commitments

The Company keeps operating rent agreements with enterprises and physical persons for the concept of commercial offices rent, parking, housing, and signal transmission antennas. Almost always these agreements are automatically renewable and are monthly, quarterly or four-monthly paid. During the years ended as of December 2013 and 2012, the Company paid for this concept the amounts of RD$632,221,641 and RD$563,689,755, respectively. The commitment for 2014 for this concept is an estimated RD$604,992,425.

	1 year	1 to 5 years	over 5 years	Total
Rental commitments by year of expiration	604,992,425	1,405,898,412	433,504,377	**2,444,395,214**

25 Unrecognized contractual commitments (Continued)

Other purchase and investment commitments

A detail of other purchase and investment commitments as of December 31, 2013 is as follows:

	2013
Other opex commitments	400,809,386
Capex commitments	1,122,622,135
Handset purchase commitments	1,095,445,309

- Other opex commitment are relating to marketing, network, gas distribution and civil engineering.
- Capital expenditures mainly related to network projects.

26 Litigation

As of December 31, 2013, ODO is party of certain judicial procedures with former distributors or dealers, for which no provision is recorded as ODO considers at this stage of the procedure that the claims are without merit.

27 Financial Instruments

The financial risks to which the Company is exposed are presented in the following paragraphs.

Foreign exchange risks

The Company is exposed to risk profit or loss in the fluctuation of the exchange rates of foreign currencies that arise, principally the US dollar and Euro. During the year 2003 an accelerated depreciation of the local currency occurred. Nevertheless since the middle of the year 2005 and 2006, the Dominican currency (DOP) has strengthened in relation to the American dollar and Euro and has been quite stable ever since. As of December 2013 and 2012, the Company has assets and liabilities in US dollars and Euros. See note 23.

Credit risk

As of December 31, 2013, credit risk exposure is very limited. Such risk is that Company cannot recover the accounts receivable. The major credit risk is represented by balance of each financial asset. The Company for controlling the credit risks and collects the balances with local distributors imposes to open letters of credit as a warranty to cover any issue that may come up from those clients.

Liquidity Risk

Management is conscious of the implications of liquidity risk. In that sense, it maintains an adequate cash balance.

28 Fair Value of financial instruments

A detail of the balances booked and the estimated as fair value of the Company financial instruments as of December 31, 2013 and 2012 is as follow:

	2013		2012	
	Accounting Amount	Fair Value	Accounting Amount	Fair Value
Financial Assets:				
Cash	1,038,925,338	1,038,925,338	1,159,590,768	1,159,590,768
Trade receivables	1,832,887,111	1,832,887,111	1,937,408,905	1,937,408,905
Other receivables	2,972,515,059	2,972,515,059	629,454,718	629,454,718
Financial Liabilities:				
Trade payables	3,252,122,915	3,252,122,915	3,504,651,801	3,504,651,801
Other current liabilities	721,042,519	721,042,519	697,728,614	697,728,614

29 Non-recurring transaction

On November 26th, 2013 the Company Wirefree Services Denmark A / S, the major shareholder of Orange Dominicana, S. A., signed a contract with the economic Group Altice, of Luxembourg, for the sale of the 100% of the shares of Orange Dominicana, S. A. As at December 31st, 2013 such transaction is still in the process of validation by the Instituto Dominicano de las Telecomunicaciones (INDOTEL).

30 Subsequent events

No event other than those described above has occurred since the year end.

INDEPENDENT AUDITORS' REPORT

To the Board of Directors and Shareholders of Orange Dominicana

We have audited the accompanying balance sheets of Orange Dominicana (the ''Company'') as of December 31, 2012 and 2011, and the related statements of income, shareholders' equity, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2012 and 2011, and the results of its operations and its cash flows for the years then ended in conformity with International Financial Reporting Standards (''IFRS'') as issued by the IASB.

Note 1—Description of business and basis of preparation of the standalone financial statements

1.1 Description of business

Orange Dominicana, S.A. (hereafter called ''ODO''), a company incorporated in accordance with the Dominican Republic laws, began operations on November 13th 2000. ODO is an indirectly wholly-owned subsidiary of Orange S.A., a French listed company.

ODO operates under a service concession agreement for the operation of telecommunications services.

ODO provides consumers, businesses and other telecommunication operators with a wide range of services including mobile telecommunications, data transmission and other value added services.

1.2 Basis of presentation and purpose of the financial statements

These financial statements have been prepared in the context of the proposed sale of ODO by its sole shareholder and for use in any offering documents relating to securities that may be offered by ODO.

They have been prepared in accordance with International Financial Reporting Standards (IFRSs).

The principles applied to prepare financial data are based on:

- all standards and interpretations compulsory as of December 31, 2012;
- the recognition and measurement alternatives allowed by the IFRSs:

Standard		Alternative used
IAS 2	Inventories	Measurement of inventories determined by the weighted average unit cost method
IAS 16	Property, Plant and Equipment	Measurement at amortized historical cost
IAS 38	Intangible Assets	Measurement at amortized historical cost

- the available exemptions regarding the retrospective application of IFRSs at the transition date (January 1, 2004 for ODO):

Standard		IFRS 1 alternative used
IAS 16 and IAS 38	Property, Plant and Equipment and Intangible Assets	Measurement of property, plant and equipment and intangible assets at historical cost

In the absence of any accounting standard or interpretation, management uses its judgment to define and apply an accounting policy that will result in relevant and reliable information, such that the financial statements:

- present fairly the ODO's financial position, financial performance and cash flows;
- reflect the economic substance of transactions;
- are neutral;
- are prepared on a prudent basis; and
- are complete in all material respects.

1.3 Standards and interpretations compulsory after December 31, 2012 with no early application elected by ODO

IFRS 13—Fair value measurement—defines fair value, sets out a framework for measuring fair value and requires disclosures about fair value measurements, including the fair value hierarchy already set out in

Note 1—Description of business and basis of preparation of the standalone financial statements (Continued)

IFRS 7. This standard is applicable prospectively and has no expected effect on the fair value currently measured by ODO.

1.4 Use of estimates and judgment

In preparing ODO's financial statements, the management makes estimates, insofar as many elements included in the financial statements cannot be measured with precision. These estimates are revised if the underlying circumstances evolve or in light of new information or experience. Consequently, estimates made at December 31, 2012 may subsequently be changed.

ODO's management also uses its judgment to define appropriate accounting policies to apply to certain transactions when the current IFRS standards and interpretations do not specifically deal with related accounting issues.

The underlying assumptions used for significant estimates are outlined below:

Estimate		Nature of estimate
Note 3.1	Revenue	Identification of separable components of a bundled offer based on the individual components relative fair value
		Period of straight-line recognition of revenue relating to invoiced service access fees depending on the nature of product and historical contractual relationship
		Reporting of revenue on a net versus gross basis (depending on an analysis of the ODO's involvement as either principal or agent)
Note 4	Purchases and other expenses	Provision for claims and litigation: assumptions underlying legal assessment and risk measurement
Note 6	Property, plant and equipment, intangible assets	Assessment of assets' useful life based on assessment of the technological, legal or economic environments
Note 7	Income tax	Assumptions used for the computation of the income tax charge to be recorded in the financial statements, together with the technical merit of tax positions
		Assumptions used for recognition of deferred tax assets arising

Note 2—Accounting policies

2.1 Financial statements preparation principle

Presentation

Income statement

Expenses are presented in the income statement based on their nature.

Operating income corresponds to net income before:

- finance income;
- finance costs;
- income tax (current and deferred taxes).

Note 2—Accounting policies (Continued)

Statement of financial position

Current and non-current items are presented separately in the statement of financial position: assets and liabilities with a term of no more than twelve months are classified as current whereas, assets and liabilities with a term of more than twelve months are classified as noncurrent.

Statement of cash flows

The statement of cash flows is reported using the indirect method starting with the net income and is broken down into three categories:

- cash flows arising from operating activities (including finance costs and income taxes);
- cash flows arising from investing activities (mainly purchase and disposal of intangible and tangible assets);
- cash flows arising from financing activities (dividends paid).

Foreign operations

The financial statements are expressed in Dominican pesos.

Monetary assets and liabilities in foreign currency are translated into Dominican pesos at the year-end exchange rate at the end of each reporting period and the resulting translation differences are recorded in:

- in operating income for commercial transactions;
- in finance income or finance costs for financial transactions.

Foreign operations are recorded on initial recognition at the spot exchange rate at the date of the transaction.

2.2 Revenues

Revenues

Revenues from ODO's activities are recognized as follows:

Separable components of bundled offers

Certain service offers include two components: an equipment component (e.g. a mobile handset) and a service component (e.g. a talk plan).

For the sale of multiple products or services, ODO evaluates all deliverables in the arrangement to determine whether they represent separate units of accounting. A delivered item is considered a separate unit of accounting if (i) it has value to the customer on a standalone basis and (ii) there is objective and reliable evidence of the fair value of the undelivered item(s). The total fixed or determinable amount of the arrangement is allocated to the separate units of accounting based on its relative fair value. However, when an amount allocated to a delivered item is contingent upon the delivery of additional items or meeting specified performance conditions, the amount allocated to that delivered item is limited to the non-contingent amount. This case arises when selling bundled offers that include a handset sold at a discounted price and a telecommunications service contract. The handset is considered to have value on a standalone basis to the customer, and there is objective and reliable evidence of fair value for the telecommunications service to be delivered. As the amount allocable to the handset generally exceeds the amount received from the customer at the date the handset is delivered, revenue recognized for the handset sale is generally limited to the amount of the arrangement that is not contingent upon the rendering of telecommunication services, i.e. the amount paid by the customer for the handset.

Note 2—Accounting policies (Continued)

For offers that cannot be separated into identifiable components, revenues are recognized in full over the life of the contract. The main example is connection to the service: this does not represent a separately identifiable transaction from the subscription and communications, and connection fees are therefore recognized over the average expected life of the contractual relationship.

Equipment sales

Revenues from mobile sales are recognized when the significant risks and rewards of ownership are transferred to the buyer.

When equipment—associated to the subscription of telecommunication services—is sold by a third party retailer who purchases it from ODO and receives a commission for signing up the customer, the related revenue is:

- recognized when the equipment is sold to the end-customer;
- measured by ODO taking into account the best estimate of the retail price and any subsidies granted to the retailer at the time of the sale and passed on to the end-customer in the form of a rebate on the equipment

Service revenues

Considerations from telephone service are recognized in revenue on a straight-line basis over the subscription period.

Revenue for airtime usage and messaging by customers is recognized as services are performed, with unbilled revenue resulting from services already provided accrued at the end of each period and unearned revenue from services to be provided in future periods deferred. Revenue from the sale of prepaid credit is deferred until such time as the customer uses the airtime, or the credit expires.

Loyalty programs

Points awarded to customers are treated as a separable component to be delivered in the transaction that triggered the acquisition of points. Part of the invoiced revenue is allocated to these points based on their fair value taking into account an estimated utilization rate, and deferred until the date at which the points are definitively converted into benefits. Fair value is defined as the excess price over the sales incentive that would be granted to any new customer. This principle is applied for both types of loyalty programs that exist within ODO, those with and those without a contractual renewal obligation.

Trade receivables

The trade receivables are mainly short-term, bearing no interest rate and measured at original invoice amount.

The valuation allowance on trade receivables is determined as follows:

- for mobile telephone services: the allowance is computed based on expected loss rates depending upon their aging. These rates are reviewed and adjusted periodically. When a client is determined to be in bankruptcy or subject to equivalent judicial proceedings, the associated receivables are then excluded from the statistical database and individually written-off;
- for dealers, wholesalers, interconnection (local and roaming) and carriers: the impairment loss is determined on a case by case analysis based on the ODO's experience.

Note 2—Accounting policies (Continued)

2.3 Purchases and operating expenses

Subscriber acquisition and retention costs

Subscriber acquisition and retention costs, other than loyalty programs costs, are recognized as an expense for the period in which they are incurred.

Advertising and sponsoring costs

Advertising, promotion, sponsoring, communications and brand marketing costs are expensed as incurred.

Inventories

The inventories comprise mainly mobile handsets either located in ODO's premises or at distributors until the customer service activation.

The inventories are stated at the lower of cost or net realizable value taking into account expected revenues from the sales of mobile phones. Cost corresponds to purchase cost determined using the weighted average cost method.

Trade payables

Payables are recorded at their nominal value

Provisions and contingent liabilities

Provisions

In the ordinary course of business, ODO is involved in certain legal and arbitration proceedings and administrative actions.

The costs which may result from these proceedings are accrued when ODO has a present obligation towards a third party and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and the amount of that liability can be quantified or estimated within a reasonable range. The amount of provision recorded is based on a case-by-case assessment of the risk level, and events arising during the course of legal proceedings may require a reassessment of this risk.

Contingent liabilities

Contingent liabilities are:

- possible obligations that are not recognized because their existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within ODO's control; or
- present obligations arising from past events that are not recognized because it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation or because the amount of the obligation cannot be measured with sufficient reliability.

2.4 Employee benefits

Labor costs are expensed as incurred including social costs contributed by the Company in accordance with the law 87-01.

Employees are not provided with postemployment benefits.

Note 2—Accounting policies (Continued)

2.5 Intangible assets, property, plant and equipment

Intangible assets

Intangible assets comprise mainly licenses for software and international telecommunication, frequency rights and Indefeasible Rights of Use (IRUs).

IRUs acquired by ODO correspond to the right to use cable or capacity transmission cable granted for a fixed period. They are recognized as an asset when ODO has the specific indefeasible right to use an identified portion of the underlying asset, generally optical fibers or dedicated wavelength bandwidth, and the duration of the right is for the major part of the underlying asset's economic life.

Property, plant and equipment

Property, plant and equipment comprised mainly network equipment.

The gross value of tangible assets corresponds to their acquisition or production cost, including costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

Due to 2004 and 2005 hyperinflation in Dominican Republic, ODO restated its 2004 and 2005 financial statements applying IAS 29 Financial Reporting in Hyperinflationary Economies and adjusted consequently the gross value of assets with the corresponding balance within Shareholders' equity (i.e. Hyperinflation reserve).

The cost of networks includes design and construction costs. Maintenance and repair costs are expensed as incurred, except where they increase the asset's productivity or extend its useful life.

Depreciation

Assets are depreciated, generally with no residual value, on a basis that reflects the pattern in which their future economic benefits are expected to be consumed. The straight-line basis is usually applied. The useful lives are reviewed annually and are adjusted if current estimated useful lives differ from previous estimates: these changes in accounting estimates are recognized prospectively.

Main assets categories	Useful life (in years)
Licences	3–5
Frequencies	10–15
IRU (Indefeasible rights of use)	10–15
Buildings	30
Antennas and technical equipment (sites)	8–28
Other technical equipment	3–8
Office material and software	3–5
Office furniture and equipment	5–10
Leasehold improvements	10

Dismantling

ODO is required to dismantle equipment and restore sites.

The provision is based on dismantling costs (on a per-unit basis for telephone poles, terminals and public phones, and on a per-site basis for mobile antennae) incurred by ODO to meet its environmental commitments and annual estimated asset dismantling and site restorations. The provision is assessed on the basis of the identified costs for the current financial year, extrapolated for future years using the best estimate of the commitment settlement. It is discounted at a risk-free rate. This estimate is revised annually and adjusted where appropriate against the asset to which it relates.

Note 2—Accounting policies (Continued)

2.6 Income tax

Current tax is measured by ODO at the amount expected to be paid or recovered from the taxation authorities, based on its interpretation with regard to the application of tax legislation.

Deferred taxes are recognized for all temporary differences between the book values of assets and liabilities and their tax basis, using the liability method. Deferred tax assets are recognized only when their recovery is considered probable.

Deferred tax assets and liabilities are not discounted.

At reporting period end, ODO reviews the recoverable amount of the deferred tax assets.

In accordance with these principles, ODO calculates the tax assets, liabilities and accruals recognized in the statement of financial position based on the technical merits of the positions it defends versus that of the tax authorities.

Deferred tax assets and liabilities are measured at the expected tax rates for the year during which the assets will be realized and the liabilities settled on the basis of tax rates in force or substantially in force at the period end.

2.7 Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and cash at banks as well as short-term investments with an original maturity of three months or less from the date of acquisition.

Note 3—Sales

3.1 Revenues

Revenues	2012	2011
	(in thousand Dominican pesos)	
Mobile	19,436,051	18,820,409
Wholesale	1,662,446	1,729,426
Internet	507,036	351,824

The Jaw No.309-12 was enacted on December 7, 2012, with the objective of granting the possibility of a tax amnesty to tax payers regarding the following taxes: income tax, value added tax, asset tax, transfer tax, inheritance tax, property taxes and customs taxes. The main benefits of the tax amnesty include closing fiscal periods up to 2011 for tax audit purposes; waive of penalties regarding existing tax liabilities, including those appealed by the tax payer. Orange did not apply for the tax amnesty.

Note 8—Cash and cash equivalents

Cash and cash equivalents	2012	2011
	(in Dominican pesos)	
Cash on hand	944,811	1,901,350
Cash at banks	1,158,645,957	1,142,755,184
Total	**1,159,590,768**	**1,144,656,534**

Note 9—Equity

9.1 Share capital

The shareholders' meeting decided the conversion of the retained earnings into share capital on December 19, 2012. The share capital therefore, increased by 38,000,000 shares, and is now made of 58,000,000 shares each at a par value of RD$100. There are no outstanding shares as of December 31, 2012.

9.2 Legal reserve

In accordance with the article 58 of the commercial Code of the Dominican Republic, the legal reserve is annually contributed by 5% of the net income until the total amount equals 10% of paid-in capital. This reserve cannot be capitalized, transferred to retained earnings or to use to pay dividends.

Note 9—Equity (Continued)

9.3 Dividends

ODO's shareholders meeting approved the payment of dividends in April, September and November 2012 for a total amount of RD$469,320,000; 667,760,000 and RD$2,207,700,000 respectively.

The Tax Reform Act, No. 253-12, enacted on November 9, 2012 establishes a 10% withholding tax on dividends due by the distributing entity. This new act supersedes the prior regime that consisted in a 29% withholding tax on dividends, which was subsequently refunded as a tax credit to the distributing entity, in the same fiscal period. The dividends paid in April and September 2012 were taxed under the former regime.

Note 10—Foreign currency

ODO is exposed to foreign exchange risk due both to its revenues and purchases denominated in US dollars and euros. As a consequence, these foreign operations have a direct effect on the operating, finance income and the trade receivables and payables.

Note 11—Related parties transactions

ODO's financial position and income statement elements with Orange SA and its subsidiaries is detailed below:

Related parties transactions	2012	2011
	(in Dominican pesos)	
Statement of financial position		
Accounts receivable	29,223,556	32,674,022
Cash pooling—current account[(a)]	135,623,414	33,157,227
Accounts payable	(314,449,212)	(506,839,042)
Income statement		
Revenue (Traffic, interconnection and other income)	218,902,968	161,468,498
Selling, distribution and traffic costs	(66,186,205)	(67,159,342)
Brand fees[(b)]	(351,549,524)	(336,388,654)
Corporate management fees[(c)]	(231,146,089)	(243,777,326)
General maintenance and services	(9,896,989)	(8,221,594)
Other operating expenses, net	(102,414,970)	(100,489,891)
Other operating income	12,636,008	—

(a) In February 2009, Orange SA and ODO signed a centralized treasury management agreement (CTMA). Orange S.A. thus optimizes the Group liquidity. ODO lends or borrows its cash surplus/needs through a current account with Orange SA. The cash pooling accounts bear interest which is calculated on a daily balance and on a daily basis using:

- for the EUR account: EONIA rate for a credit balance and EONIA plus 2.15% margin for a debit balance
- for the USD account: LIBOR Overnight rate for a credit balance and LIBOR Overnight plus 2.15% margin for a debit balance

(b) The utilization of the Orange brand name is defined in a brand license agreement signed with Orange Group and costs a 1.6% fee of the ODO's monthly operating revenue.

(c) Management fees are determined in accordance with an agreement signed with Orange SA and are charged using a 1.03% on the monthly contributive operational revenue in 2012.

Note 12—Unrecognized contractual commitments

12.1 Leasing commitments

Rental commitments by year of expiration	<1 year	1 - 5 years	over 5 years	Total
		(in Dominican pesos)		
Total	**474,094,831**	**1,100,473,583**	**400,133,861**	**1,974,702,275**

The Company enters into operating lease agreements in its ordinary course of business (mainly commercial offices and antennas sites).

12.2 Other purchase and investment commitments

Other purchase and investment commitments	2012
	(in Dominican pesos)
Other opex commitments	458,756,888
Cap ex commitments	965,744,919
Handset purchase commitments	631,578,716

- Other opex commitment are relating to marketing, network, gas distribution and civil engineering.
- Capital expenditures mainly related to network projects.

Note 13—Litigation

As of December 31, 2012, ODO is party to certain judicial procedures with former distributors or dealers, for which no provision is recorded as ODO considers at this stage of the procedure that the claims are without merit.

Note 14—Subsequent events

None.

INDEX

PT Comunicações
Notes to the Financial Statements
As at 30 September 2014
(Amounts stated in Euros)

1. Introduction

PT Comunicações, S.A. (''PT Comunicações'' or the ''Company'') was incorporated in 2000, in accordance with a resolution from the General Meeting of Portugal Telecom, S.A. on April 27, 2000 within the business restructuring process in Portugal Telecom Group and by spin-off from Portugal Telecom, S.A. The conditions for this spin-off were defined under Decree-Law no. 219/00, of September 9, and Joint Order no. 936-A/2000 issued by the Ministers for Social Provision and for Finance on September 14. On 30 September 2006, under the restructuring process of the Group Portugal Telecom, Portugal Telecom, SGPS, S.A. (''PT SGPS'') sold to PT Portugal, SGPS, S.A. (''PT Portugal''—a sub-Holding company of the Group) all of the shares of PT Comunicações.

The concession that had been granted by the Portuguese government to PT Comunicações, with an initial term expiring in 2025, was formally revoked on 1 June 2014, as from which Zon Optimus replaced the Company as the universal service provider of access to a public electronic communications network at a fixed location. Under the terms of an agreement entered into with the Portuguese Government in November 2013, the Company was entitled to a compensation for the termination of the concession agreement, which was received in September 2014, amounting to Euro 32 million.

On 5 May 2014, Portugal Telecom SGPS, S.A. (''Portugal Telecom'') subscribed a share capital increase of Oi, S.A. (''Oi'') through the contribution in kind of its 100% interest in PT Portugal SGPS, S.A. (''PT Portugal''). Following this transaction, PT Portugal became a wholly-owned subsidiary of Oi and is now the parent company of the group in Portugal, while Portugal Telecom no longer controls PT Portugal and its subsidiaries. The Company's only shareholder continues to be PT Comunicações which in turn also continues to be a wholly-owned subsidiary of PT Portugal. Consequently, as from 5 May 2014, the Company is indirectly a wholly-owned subsidiary of Oi.

During the nine months period ended 30 September 2014, in connection with an internal corporate restructuring of PT Group for purposes of the Oi share capital increase undertaken on 5 May 2014, the following transactions involving either the company or its subsidiaries were completed:

– On 30 April 2014, PT Móveis, SGPS, S.A. (''PT Móveis''), a wholly-owned subsidiary of Meo, S.A., subscribed a share capital increase of Bratel BV by an amount of Euro 1,303 million;

– On 2 May 2014, PT Móveis disposed to Portugal Telecom, for an amount of Euro 4,195 million its 100% interest in Bratel BV, the company that held the investment in Oi, indirectly through Bratel Brasil, S.A. (''Bratel Brasil''). This operation generate a net loss of Euro 950 million recorded by PT Móveis which includes, (1) a capital gain of Euro 50 million reflecting the difference between the selling price (Euro 4,195 million) and the carrying value of the investment in Bratel BV (Euro 4,145 million) and (2) the transfer to net income of the cumulative amount of negative foreign currency translation adjustments that were recorded directly in shareholders' equity between March 2011 (Oi's acquisition date) and 2 May 2014, in the amount of Euro 950 million;

– On 2 May 2014, Portugal Telecom disposed to PT Móveis, for a total amount of Euro 2.240 million, its 100% interest in PT Participações, SGPS, S.A., the company that held, indirectly, a 75% interest in Africatel Holdings BV.

2. Basis of presentation

These financial statements were prepared in accordance with Portuguese legislation, based on Decree-law nº. 158/2009, which approved the new Portuguese accounting system, named Sistema de Normalização Contabilística (''SNC''), including the conceptual structure, Normas Contabilísticas e de Relato Financeiro (''NCRF'') and Interpretative Standards, as approved by Notices nº 15652/2009, 15655/2009 and 15653/2009, respectively. As permitted by Decree-Law nº. 158/2009, the Company also applies the International Financial Reporting Standards (''IAS/IFRS'') and related interpretations (''SIC/IFRIC'') issued by International Accounting Standards Board (IASB), in order to fill in the gaps or omissions in SNC regarding specific situations of certain transactions.

2. Basis of presentation (Continued)

As the Portuguese accounting system does not cover interim financial reporting, these interim financial statements have been presented in accordance with IAS 34 Interim Financial Reporting (''IAS 34'') and therefore do not include all the information required by above mentioned Portuguese accounting system. Accordingly, these interim financial statements should be read in conjunction with the financial statements for the year ended 31 December 2013.

3. Cash flows

For the purposes of the cash flow statement, the caption ''Cash and cash equivalents'' includes cash, bank deposits immediately available, net of bank overdrafts.

The Company is exposed to a liquidity risk if its sources of funding, including cash balance, operating cash inflows, divestments and cash flows obtained from financing operations, do not match with our financing needs, such as operating and financing outflows, investments, shareholder remuneration and debt repayments. Based on the cash flows generated by its operations, on the available cash and in the possibility to obtain financing from PT Portugal under the centralized cash management system, the Company believes that it is able to meet its obligations.

The cash flow statement was prepared in accordance with ''*NCRF 2 Statement of Cash Flows*'', which includes the following:

(a) Cash receipts (payments) relating to income taxes

Under the special taxation regime for Groups of companies the Company paid to PT Portugal Euro 3,604,738 and Euro 1,775,430 in the nine-month periods ended 30 September 2014 and 2013, respectively (Note 6).

(b) Cash receipts resulting from the disposal of tangible fixed assets

The increase in this caption reflects primarily the sale of tangible fixed assets to PT Cloud e Data Centers, a group company, in connection with an internal restructuring of the group.

(c) Cash receipts resulting from the disposal of financial investments

In the nine months period ended 30 September 2013, this caption corresponds to the proceeds of Euro 35,966,391 obtained from the disposal of the 3% interest previously held in CTM.

(d) Cash receipts resulting from loans granted

This caption corresponds to repayments of Euro 5,677,520 by Fibroglobal in the nine months period ended 30 September 2014 and repayments of Euro 340,000,000 by Meo, S.A. in the nine months period ended 30 September 2013, both of which relating to loans granted by PT Comunicações to these entities in previous periods.

(e) Dividends received

In the nine-month periods ended 30 September 2014 and 2013, PT Comunicações received dividends from Multicert, amounting to Euro 235,706 (Note 5), and from CTM, amounting to Euro 2,703,029, respectively.

(Amounts stated in Euros)

3. Cash flows (Continued)

(f) Payments resulting from financial investments

In the nine-month periods ended 30 September 2014 and 2013, this caption consists of:

	9M14	9M13

Intangible assets, net	**191,195,300**	**506,383**	**1,122,494**	**192,824,177**

Total capital expenditures for tangible fixed assets and intangible assets amounted to Euro 170.0 million in the nine months period ended 30 September 2014, reflecting investments in tangible fixed assets allocated essentially toward reinforcing the quality and expanding the coverage of the FTTH network. In the nine months period ended 30 September 2013, total capital expenditures for tangible fixed assets and intangible assets amounted to Euro 229.3 million.

(Amounts stated in Euros)

4. Tangible fixed assets and Intangible assets (Continued)

In the nine-month periods ended 30 September 2014 and 2013, the composition of depreciation and amortization expenses is as follows:

	9M14	9M13
	Euro	
Tangible fixed assets	305,832,622	335,563,636
Intangible assets	23,627,154	23,616,011
Investment properties	(2,500)	1,104,465
	329,457,276	**360,284,112**

During the nine months period ended 30 September 2014, the following expenses were included in the carrying value of tangible assets and intangible assets in progress:

	9M14	9M13
	Euro	
Materials consumed	787,412	2,953,030
Wages and salaries	29,095,686	28,066,523
Other expenses and losses	3,981,214	5,141,352
	33,864,312	**36,160,905**

5. Financial investments—Equity method of accounting

During the nine months period ended 30 September 2014, the movements occurred under this caption were as follows:

	Investments in subsidiary companies	Additional paid in capital contributions to subsidiary companies	Additional paid in capital contributions to associated companies	Investments in associated companies	Loans in associated companies	Total
			Euro			
Gross value						
Opening balance	6,916,578,976	150,000	—	3,824,742	3,117,210	6,923,670,928

In the nine months period ended 30 September 2014, the movements occurred in investments in subsidiary and associated companies resulting from the application of the equity method of accounting were recorded as follows:

		31 Dec 2013
	Euro	Euro
Gains in affiliated companies net (Note 14)	(1,021,297,173)	201,666,539
Adjustments to financial assets	1,133,556,589	(541,439,013)
	112,259,416	**(339,772,474)**

5. Financial investments—Equity method of accounting (Continued)

In the nine months period ended 30 September 2014, Multicert paid dividends to the Company amounting to Euro 235.706 (Note 3.d).

The movements under the caption ''Non-current assets held for sale'' correspond to the carrying value of the investment in Sportinveste, which was classified as held for sale as at 31 December 2013 and is no longer classified as held for sale as at 30 September 2014 since the Portuguese Competition Authority rejected the business combination that supported the held for sale classification as at 31 December 2013.

6. Income tax

In 2013, companies located in mainland Portugal are subject to Corporate Income Tax at a base rate of 25%, increased (1) up to a maximum of 1.5% of taxable income through a municipal tax, and (2) by a state surcharge levied at the rate of 3.0% on taxable income between Euro 1.5 million and Euro 7.5 million and at the rate of 5.0% on taxable income in excess of Euro 7.5 million.

In 2014, companies located in mainland Portugal are subject to Corporate Income Tax at a base rate of 23%, increased (1) up to a maximum of 1.5% of taxable income through a municipal tax, and (2) by a state surcharge levied at the rates of 3.0% on taxable income between Euro 1.5 million and Euro 7.5 million, 5.0% on taxable income between Euro 7.5 million and Euro 35.0 million and 7.0% on taxable income in excess of Euro 35.0 million, resulting in a maximum aggregate tax rate of approximately 31.5% for taxable income higher than Euro 35.0 million.

As the Company reported tax losses for both nine-month periods ended 30 September 2014 and 2013, neither the 1.5% municipal tax nor the state taxes are applicable.

The Company's income taxes are computed based on the tax rate mentioned above and are determined on the basis of profit before-tax adjusted in accordance with tax legislation.

PT Portugal has adopted the tax consolidation regime in Portugal (currently known as the Special Regime for the Taxation of Groups of Companies), under which the provision for income taxes is determined on the basis of the estimated taxable income for all the companies in which PT Portugal holds at least 75% of the share capital and that are domiciled in Portugal and subject to Corporate Income Tax (IRC). PT Portugal is still waiting for the approval from the tax authorities in relation to the use of this tax consolidation regime in 2014, since PT Portugal only became the parent company of the group in Portugal as from 5 May 2014, following the contribution in kind made by Portugal Telecom to the Oi share capital increase consisting of its 100% interest in PT Portugal (Note 1). The Company is part of the Special Taxation Regime for Groups of Companies and, as a result, the income tax estimate and deductions made by third parties are recorded on the balance sheet as accounts payable and receivable of PT Portugal.

(Amounts stated in Euros)

6.1. Deferred taxes

Movements in deferred tax assets during the nine-month periods ended 30 September 2014 were as follows:

	Post retirement benefits	Impairment of accounts receivable	Depreciation and amortisation of tangible assets	Other provision and adjustments	Other temporary differences	Total
			Euro			
Opening balance	285,609,807	6,650,220	10,548,118	2,598,294	6,129,203	**311,535,642**
Increases (reductions)						
Net income	(55,737,853)	1,502,099	(698,685)	81,582	2,170,865	**(52,595,452)**

Movements in deferred tax liabilities during the nine-month periods ended 30 September 2014 were as follows:

	30 Sep 2014		
	Assets revaluation	Capital gain with deferred taxation	Total
		Euro	
Opening balance	148,113,149	490,380	**148,603,529**
Increases (reductions)			
Net income	(7,076,078)	(37,422)	**(7,113,500)**
Closing balance	**141,037,071**	**452,958**	**141,490,029**

(Amounts stated in Euros)

6.2. Tax rate reconciliation

In the nine-month periods ended 30 September 2014 and 2013, the reconciliation between the expected tax computed by applying the nominal tax rate to income before taxes and the total income tax is as follows:

	9M14	9M13
	Euro	
Income before taxes	**(1,209,749,794)**	**(141,691,121)**
Nominal tax rate	23.00%	25.00%
Expected tax	**(278,242,453)**	**(35,422,780)**
Permanent differences[(a)]	231,867,383	(34,287,299)
Tax loss used in connection with RETGS[(b)]	95,695,016	65,085,279
Surplus of prior year accrued income tax	682,732	742,270
Reversal os deferred taxes from previous years	(3,837,994)	1,089,109
Other	575,301	244,732
	46,739,985	**(2,548,689)**
Income tax		
Income tax-current	1,258,033	1,938,105
Deferred tax	45,481,952	(4,486,794)
	46,739,985	**(2,548,689)**

(a) Permanent differences are as follows:

	9M14	9M13
	Euro	
Equity method of accounting (Note14)	1,021,321,598	(128,598,002)
Recognition of capital gains and losses	(11,553,401)	(5,993,283)
Tax benefits	(3,082,921)	(3,153,658)
Other	1,433,779	595,748
	1,008,119,055	**(137,149,195)**
Nominal tax rate	23.00%	25.00%
	231,867,383	**(34,287,299)**

(b) This caption corresponds to the taxable loss computed in both years by the Company in accordance with Income Tax legislation. In accordance with the fiscal policy set by the Group, the gain related to the use of these tax losses has been recorded at the group level by the dominant entity of the tax consolidation group.

(Amounts stated in Euros)

7. Accounts receivables and unbilled revenues

As at 30 September 2014 and 31 December 2013, these captions are made up as follows:

	30 Sep 2014			31 Dec 2013		
	Gross value	Impairment losses	Net value	Gross value	Impairment losses	Net value
			Euro			
Trade accounts receivable—current assets	575,671,437	(119,142,674)	456,528,763	589,980,787	(128,449,223)	461,531,564
Trade accounts receivable—non-current assets	366,358	—	366,358	76,189	—	76,189
Accounts receivable	**576,037,795**	**(119,142,674)**	**456,895,121**	**590,056,976**	**(128,449,223)**	**461,607,753**
Unbilled revenues	83,452,667	—	83,452,667	88,412,138	—	88,412,138
	659,490,462	**(119,142,674)**	**540,347,788**	**678,469,114**	**(128,449,223)**	**550,019,891**

In the nine months period ended 30 September 2014, changes in accumulated impairment losses related to accounts receivable were as follows:

	Euro
Opening balance	128,449,223
Increases (reversals)	12,184,504
Utilizations[(a)]	(21,491,053)
Closing balance	**119,142,674**

(a) This line item refers to the use of accrued impairment losses to face of credits of doubtful collection that were deemed uncollectible and that were fully adjusted.

8. Provisions and contingent liabilities

8.1. Movements occurred in provisions

The movements in provisions during the nine months period ended 30 September 2014 were as follows:

	Tax claims	Other litigation	Provision for negative financial investments	Other provisions	Total
			Euro		
Opening balance	**5,118,418**	**6,473,487**	**400,260**	**978,408**	**12,970,573**

Reductions	(232,205)	(98,227)	(12,294)	—	**(342,726)**
Utilizations	(383,100)	—	—	(545,296)	**(928,396)**
Others[(a)]	13,125,100	—	300	—	**13,125,400**
Closing balance	**18,294,375**	**6,619,562**	**412,691**	**433,112**	**25,759,740**
Current	18,294,375	6,619,562	—	433,112	**25,347,049**
Non-current	—	—	412,691	—	**412,691**

(a) Includes an amount of Euro 13,125,100 relating to provisions that were previously recorded at Portugal Telecom and were transferred to the Company in connection with an internal restructuring of the PT Group for purposes of the Oi share capital increase (Note 1).

(Amounts stated in Euros)

8. Provisions and contingent liabilities (Continued)

8.2. Tax contingencies and legal actions

a) Proceedings with probable losses

The provision for taxes is to cover several Corporate Income Tax and Social Security contingencies, as well as other taxes and fees.

The provision for legal processes in progress is to cover liabilities resulting from processes brought against the Company, estimated based on information from its lawyers.

As at 30 September 2014, the Company, based on the opinion of its internal and external lawyers, classified several legal and arbitration processes in progress and tax contingencies as of probable loss and so it recorded provisions in accordance with NCRF 21—Provisions, Contingent Liabilities and Contingent Assets to cover the probable outflow of resources. As at 30 September 2014 and 31 December 2013, the nature of these proceeding is as follows:

	30 Sep 2014	31 Dec 2013
	Euro	
Legal proceedings		
Civil contingencies	1,328,590	1,372,668
Labor contingencies	2,374,625	2,130,323
Other contingencies	2,916,347	2,970,496
	6,619,562	**6,473,487**
Tax contingencies	18,294,375	5,118,418
	24,913,937	**11,591,905**

b) Proceedings with possible losses

As at 30 September 2014, the Company, in accordance with NCRF 21 and based on the opinion of internal and external legal counsel, had classified a variety of ongoing judicial and arbitral actions and tax contingencies as proceedings with possible losses. The nature of these proceedings is as follows:

	30 Sep 2014	31 Dec 2013
	Euro	
Legal proceedings		
Civil contingencies	70,092,713	70,241,929
Labor contingencies	298,009	542,461
Other contingencies	11,797,934	13,682,689
	82,188,656	**84,467,079**
Tax contingencies	34,077,308	22,475,467
	116,265,964	**106,942,546**

8.3. Description of the main claims with regulatory entities and other legal proceedings

The following litigation processes relate to the main claims and legal proceedings filed by regulatory entities against PT Comunicações, some of which the Company considers, based on the advice of its internal and external legal counsels that related losses are remote, in accordance with the definitions of NCRF 21.

8. Provisions and contingent liabilities (Continued)

a) Claims for municipal taxes and fees

Pursuant to a statute enacted on 1 August 1997, as an operator of a basic telecommunications network, Portugal Telecom was exempt from municipal taxes and rights-of-way and other fees with respect to its network in connection with its obligations under the Concession. The Portuguese Government has advised Portugal Telecom in the past that this statute confirmed the tax exemption under our Concession. The Portuguese Government has informed Portugal Telecom it will continue to take the necessary actions in order for PT Comunicações to maintain the economic benefits contemplated by the Concession.

Law 5/2004, dated 10 February 2004, established a new rights-of-way regime in Portugal whereby each municipality may establish a fee, up to a maximum of 0.25% of each wireline services bill, to be paid by the customers of those wireline operators whose network infrastructures are located in each such municipality. This regime was implemented in 2005 but does not affect the lawsuit described above based on the former statute. Meanwhile, Decree-Law 123/2009, dated 21 May 2009, clarified that no other tax should be levied by the municipalities in addition to the tax established by Law 5/2004. This interpretation was confirmed by the Supreme Administrative Court of Portugal in various legal actions.

Some municipalities however, continue to interpret that the Law 5/2004 does not expressly revoke other taxes that the municipalities wish to establish, because Law 5/2004 is not applicable to the public municipality domain. Currently, there are legal proceedings filed by some municipalities regarding this matter.

b) Regulatory proceedings

Portugal Telecom's operations are regularly subject to regulatory inquiries and investigations involving their operations. In addition, ANACOM (the telecommunications regulator), the European Commission, and the Autoridade da Concorrência (the competition authority) regularly make inquiries and conduct investigations concerning compliance with applicable laws and regulations. Current inquires and investigations include several investigations by the (Autoridade da Concorrência) related to PT Comunicações for alleged anti-competitive practices in the Digital Terrestrial Television market. The Company believes that most of the complaints that have resulted in such investigations should be dismissed due to the nature of the alleged abuses and the novelty of the relevant antitrust laws. However, if PT Comunicações is found to be in violation of applicable laws and regulations in these or other regulatory inquiries and investigations, it could become subject to penalties, fines, damages or other sanctions. It is however permitted under Portuguese law to appeal any adverse decision to the Courts.

c) Other legal proceedings

In March 2004, TV TEL Grande Porto—Comunicações, SA. (''TVTEL''), a telecommunications company based in Oporto, filed a claim against PT Comunicações in the Lisbon Judicial Court. TV TEL alleged that, since 2001, PT Comunicações has unlawfully restricted access to its telecommunication ducts in Oporto, thereby undermining and delaying the installation and development of TV TEL's telecommunications network. TV TEL alleges that PT Comunicações intended to favor both itself and CATVP—TV Cabo Portugal, S.A, a PT Multimedia subsidiary and at the time a direct competitor of TV TEL. TV TEL is claiming an amount of approximately Euro 15 million from Portugal Telecom for damages and losses allegedly caused and yet to be sustained by that company as a result of the delay in the installation of its telecommunications network in Oporto. In addition, TV TEL has demanded that PT Comunicações be required to give full access to its ducts in Oporto. PT Comunicações submitted its defence to these claims, stating that: (1) TV TEL did not have a general right to install its network in PT Comunicações' ducts; (2) all of TV TEL's requests were lawfully and timely responded to by PT Comunicações according to its general infra-structure management policy; and (3) TV TEL's claims for damages and losses were not factually sustainable. On February 2013, the court decided a

(Amounts stated in Euros)

8. Provisions and contingent liabilities (Continued)

compensation related to increased costs of financing incurred and a value regarding loss of clients to be liquidated by TV TEL. Both parties have appealed and the Lisbon Judicial Court has ruled a decision in favour of PT Comunicações on 5 June 2014, decision that extended the scope of the trial, as a result of which a new trial date is expected.

In March 2011, Optimus—Comunicações S.A. (''Optimus'') filed a claim against Portugal Telecom in the Judicial Court of Lisbon for the payment of approximately Euro 11 million related to a proceeding of the Autoridade da Concorrência that terminated in 2011 for prescription reasons, in relation to which Autoridade da Concorrência had imposed a fine to Portugal Telecom of approximately Euro 45 million. Optimus sustained his position by arguing that suffered losses and damages as a result of the Company's conduct. Currently, a collegial expertise is underway.

8.4. Tax contingencies

In addition to the tax contingencies mentioned above, the risk of loss of which was deemed as either probable or possible (Note 8.2), there are other tax claims pending appeal or judicial decision, totalling Euro 22 million, which include primarily (1) tax assessments filed by the tax authorities with respect to the income tax from 1997 to 1998 of Portugal Telecom, SA and Marconi, and for 2002 and 2010 of PT Comunicações, and (2) additional payments of VAT from 2000 to 2004. The Company's opinion, based on the advice of its tax and legal counsel, is that the risk of loss associated with these claims is remote.

9. Loans obtained

Loans obtained as at 30 September 2014 and 31 December 2013 are as follows:

	30 Sep 2014		31 Dec 2013	
	Non-current	Current	Non-current	Current
	Euro			
Intragroup loans	6,337,350,000	—	3,779,000,000	—
Centralized cash management	—	—	—	342,322,714
Commercial programme	953,400,000	—	3,086,750,000	—
Leases	11,327,483	15,898,343	11,656,946	20,576,337
	7,302,077,483	**15,898,343**	**6,877,406,946**	**362,899,051**

9.1. Loans to Group companies

During the nine-month periods ended 30 September 2013 and 2014, the Company obtained additional loans from PT Portugal amounting to Euro 252,000,000 and Euro 2,558,350,000 (Note 3), respectively, as a result of which the outstanding amount was increased to Euro 3,779,000,000 and to Euro 6,337,350,000. These loans have no defined maturity, but shall be repaid, partially or entirely, in more than one year, subject to the cash needs of the Company. The interest on these loans is linked to market rates.

9.2. Centralized cash management

As from March 2006, Portugal Telecom centralized all cash receipts and payments from Group companies located in Portugal. In 2014, PT Portugal replaced Portugal Telecom as the parent company of the Group in Portugal and accordingly also replaced Portugal Telecom in its role under this centralized cash management system. The financings obtained by the Company under this system have short term maturities and bear interest at market rates.

(Amounts stated in Euros)

9. Loans obtained (Continued)

9.3. Commercial paper

During the nine months period ended 30 September 2014, the Company reduced the outstanding amounts due under commercial paper programmes by Euro 2,133,350,000, as a result of which the total amount outstanding as at 30 September 2014 was decreased to Euro 953,400,000. These commercial paper programmmes have basically the same features as described in the 2013 annual report.

10. Post-retirement benefits

As at 30 September 2014, the Company did not obtain an actuarial valuation to recognize post retirement benefits and, therefore, costs recorded during the nine months period ended 30 September 2014 are based on the 31 December 2013 actuarial valuation, adjusted by curtailment costs incurred during that period.

As at 30 September 2014, the projected post retirement benefits obligations, which relate to pension complements and healthcare benefits, totalled Euro 515 million and the fair value of plan assets amounted to Euro 253 million, as compared to Euro 492 million and Euro 386 million as at 31 December 2013, respectively. In addition, PT Comunicações had liabilities with salaries payable to suspended and pre-retired employees amounting to Euro 802 million as at 30 September 2014, as compared to Euro 836 million as at 31 December 2013, which are not subject to any legal funding requirement. These salaries are paid on a monthly basis directly by PT Comunicações to beneficiaries until retirement age. Consequently, as at 30 September 2014, net benefits obligations amounted to Euro 1,064 million, as compared to Euro 942 million as at 31 December 2013.

The fair value of plan assets as at 30 September 2014, amounting to Euro 253 million, include funds incorporated to cover pensions supplements and healthcare benefits obligations, amounting to Euro 94 million and Euro 158 million, respectively. The healthcare fund, which was incorporated in 2004, is managed independently by PT Prestações in accordance with an investment policy and includes shares, bonds and other investments. As at 30 September 2014, the total exposure of these investments to private equity funds managed by Global Investment Opportunities SICAV of Rocha dos Santos Holding amounted to Euro 80 million.

During the nine months period ended 30 September 2014, the changes in post retirement benefits obligations, net of the fair value of plan assets, were as follows:

	Pension complements benefits	Healthcare benefits	Salaries due to Pre-retired and suspended employees	Total
			Euro	
Balance as at 31 December 2013	**21,697,157**	**83,990,552**	**836,277,930**	**941,965,639**
Periodic post retirement benefits costs	705,750	4,494,750	11,288,250	**16,488,750**
Work force reduction costs	710,080	710,080	28,403,205	**29,823,365**
Curtailment gain due to change in benefits	—	(51,873,000)	—	**(51,873,000)**
Net actuarial losses (gains)	(2,580,963)	209,807,751	41,300,000	**248,526,788**
Payments, contributions and reimbursements	(2,022,807)	(3,635,558)	(115,528,598)	**(121,186,963)**
Balance as at 30 September 2014	**18,509,217**	**243,494,575**	**801,740,787**	**1,063,744,579**

Certain post retirement benefits plans for which the fair value of plan assets exceed the projected post-retirement benefit obligation, and an asset can be recorded as it is possible for the Company to use the surplus, are presented in the Balance Sheet separately from those plans with a projected post-retirement benefits obligations exceeding the fair value of their plan assets. As at 30 September

(Amounts stated in Euros)

10. Post-retirement benefits (Continued)

2014 and 31 December 2013, net post retirement obligations were recognized in the Balance Sheet as follows:

	30 Sep 2014	31 Dec 2013
	Euro	
Pension plans with a deficit position	20,444,269	23,531,157
Salaries to pre-retired and suspended employees	801,740,787	836,277,930
Healthcare plans with a deficit position	243,494,575	83,990,552
Plans with a deficit position	**1,065,679,631**	**943,799,639**
Pension plans with a surplus position	(1,935,052)	(1,834,000)
	1,063,744,579	**941,965,639**

The detail of post retirement benefits costs in the nine-month periods ended 30 September 2014 and 2013 is as follows:

	9M14	9M13
	Euro	
Post retirement benefits costs		
Periodic service cost	2,842,500	3,095,129
Net interest cost	13,646,250	12,383,791
	16,488,750	**15,478,920**
Service cost related to liabilities transferred to the Portuguese State(i)	14,720,805	16,184,481
Total post retirement benefits costs	**31,209,555**	**31,663,401**
Work force reduction costs		
Work force reduction costs	29,823,365	102,002,172
Curtailment gain due to change in benefits(ii)	(51,873,000)	—
Termination payments	172,133	287,919
Total work force reduction costs	**(21,877,502)**	**102,290,091**

(i) This caption relates to a contribution to the Portuguese Social Security System, regarding the annual service of active employees that were entitled to pension benefits under the Company's post retirement benefits plans transferred to the Portuguese State in December 2010.

(ii) This caption corresponds to the estimated net gain resulting from the reduction in benefits granted under the healthcare plan, as a result of which the related projected benefit obligations were decreased by this amount.

Net actuarial losses, which are recorded directly in shareholders' equity, have the following composition in the nine-month periods ended 30 September 2014 and 2013:

	9M14	9M13
	Euro	
Differences between actual data and actuarial assumptions(i)	128,126,788	13,539,460
Changes in actuarial assumptions(ii)	120,400,000	—
	248,526,788	**13,539,460**

(i) This caption corresponds to the net actuarial losses recorded in both periods reflecting the difference between actual return on plan assets and the expected return on plan assets computed based on the discount rates for the related obligations. Net actuarial losses recorded in the nine months period ended 30 September 2014 reflect basically the impairment of the investment in Banco Espírito Santo (''BES'') shares, as a result of the BES corporate reorganization announced on 3 August 2014, under which the former shareholders of BES became holders of an entity with assets not related to the banking business and not listed in the stock market.

(Amounts stated in Euros)

10. Post-retirement benefits (Continued)

(ii) This caption corresponds to the estimated impact resulting from the decrease in discount rates use to compute the presented value of projected benefit obligations. Given the evolution of long-term yield rates of Euro Zone high-rating corporate bonds, the Company decided to reduce the discount rates for all responsibilities, namely (1) from 3.00% to 2.00% for pension supplements, (2) from 4.00% to 2.50% for healthcare benefits, and (3) from 2.00% to 0.75% for salaries payable to pre-retired and suspended employees.

Net cash out flows relating to post retirement benefits in the nine-month periods ended 30 September 2014 and 2013 are as follows:

	9M14	9M13
	Euro	
Payments of salaries to pre-retired and suspended employees	115,528,598	114,939,611
Contributions to the pension funds	1,120,000	478,805
Reimbursements related to healthcare expenses	3,635,558	1,801,360
Payments of pension complements benefits	902,807	621,239
	121,186,963	**117,841,015**
Service cost related to liabilities transferred to the Portuguese State[(i)]	14,806,631	16,048,946
Termination payments	172,133	287,919
	136,165,727	**134,177,880**

(i) This caption corresponds to the contribution paid by Portugal Telecom to the Portuguese Social Security System, relating to the annual service of active employees that were entitled to pension benefits under the Company's post retirement benefits plans transferred to the Portuguese State in December 2010.

11. Suppliers and Investment suppliers

As at 30 September 2014 and 31 December 2013, the captions ''Suppliers'' and ''Investment suppliers'' have the following composition:

	30 Sep 2014	31 Dec 2013
	Euro	
Trade suppliers		
Current	434,917,433	319,470,088
Invoices to be received	20,926,614	25,651,226
	455,844,047	**345,121,314**
Investment suppliers		
Current	24,278,354	74,443,261
Invoices to be received	8,808,876	25,684,107
	33,087,230	**100,127,368**

(Amounts stated in Euros)

12. Accrued expenses

As at 30 September 2014 and 31 December 2013, this caption is made up as follows:

	30 Sep 2014	31 Dec 2013
	Euro	
Direct costs of services rendered	89,598,983	84,806,581
Interest and other financial expenses payable	86,848,626	107,973,460
Charges for vacations, vacation subsidies and other payroll costs	51,729,701	42,964,245
Other supplies and external services	17,504,882	16,132,996
Support services	8,502,920	8,186,121
Credits related to invoices issued	8,291,931	10,153,020
Rentals	5,024,670	4,495,887
Maintenance and repairs	4,449,050	3,957,839
Specialized work	2,268,143	3,176,246
Marketing and publicity	1,808,872	2,192,106
Other	7,361,209	9,266,319
	283,388,987	**293,304,820**

13. Services rendered and sales

In the nine-month periods ended 30 September 2014 and 2013, these captions are made up as follows:

	9M14	9M13
	Euro	
Services rendered		
Television services	445,671,040	419,319,848
Fixed telephone services	386,707,289	409,009,559
Leased lines and capacity	113,442,058	125,271,558
Internet	111,354,021	117,269,762
System solutions and information technology and outsourcing	69,878,540	69,143,422
Data communications (services)	54,030,683	58,760,738
Directories	15,195,098	19,401,588
Publicity	9,598,110	8,427,056
Other	45,740,236	39,048,596
Sales	17,977,131	13,283,358

14. Equity in earnings (losses) of affiliated companies

In the nine-month periods ended 30 September 2014 and 2013, this caption consists of the following:

	9M14	9M13
	Euro	
Gains and losses in affiliated companies		
Gains	1,179,331	230,603,403
Losses	(1,022,500,929)	(102,005,401)
Gains and losses on the disposal of affiliated companies		
Gains[(a)]	—	32,729,942
Losses	—	(521)
	(1,021,321,598)	**161,327,423**

(a) In 2013, this caption corresponds to the gain recorded with the disposal of the investment in CTM.

(Amounts stated in Euros)

14. Equity in earnings (losses) of affiliated companies (Continued)

In the nine-month periods ended 30 September 2014 and 2013, gains and losses in affiliated companies, resulting from the application of the equity method of accounting (Note 5), were recognized in the following captions:

	9M14	9M13
	Euro	
Financial investments (Note 5)		
Meo, SA	(1,021,658,153)	128,702,013
Sportinveste Multimédia	(353,060)	—
Infonet	(237,774)	(147,622)
Multicert	(223,178)	24,664
PT Brasil	—	100
Janela Digital	1,137,341	—

PT Cloud e Data Centers, S.A.	78	—
	(1,021,297,173)	**128,604,064**
Provision for negative financial investments (Note 8)		
Yunit Serviços	(28,764)	—
PT Cloud e Data Centers, S.A.	3,079	(6,294)
PT Prestações	1,260	232
	(24,425)	**(6,062)**
	(1,021,321,598)	**128,598,002**

The Company's share in net losses of MEO, SA, amounting to Euro 1,021,658,153, reflects primarily MEO, S.A.'s share in net losses of its subsidiary PT Móveis, amounting to Euro 1,034,664,295, which in turn reflects mainly a net loss of Euro 950 million recorded by PT Móveis in connection with the disposal of its 100% interest in Bratel BV to Portugal Telecom, which includes (1) a capital gain of Euro 50 million reflecting the difference between the sale price (Euro 4,195 million) and the carrying value of the total investment in Bratel BV (Euro 4,145 million, already reflecting the share capital increase realized by PT Móveis in Bratel BV prior to the sale, amounting to Euro 1,303 million), and (2) the cumulative amount of negative currency translation adjustments, amounting to Euro 1,000 million, which were generated since the acquisition of the investment in Oi in March 2011 and transferred to net income upon the sale of this investment through Bratel BV on 2 May 2014.

15. Direct costs

In the nine-month periods ended 30 September 2014 and 2013, this caption consists of the following:

	9M14	9M13
	Euro	
Telecommunications costs	245,094,911	237,894,739
Programming costs	94,420,974	94,810,563
Directories	13,280,192	15,956,472
Contents of internet and mobile service	6,958,639	6,868,513
Other	12,431,545	12,584,342
	372,186,261	**368,114,629**

(Amounts stated in Euros)

16. Supplies and external services

In the nine-month periods ended 30 September 2014 and 2013, this caption consists of the following:

	9M14	9M13
	Euro	
Support services	146,271,549	127,110,742
Maintenance and repairs	46,468,984	53,796,724
Commissions	44,527,874	44,523,927
Electricity	22,270,644	24,692,436
Rentals	16,445,224	15,811,325
Communications	10,251,244	10,574,846
Specialized work	10,058,911	12,589,487
Fuel, water and other fluids	4,434,407	5,283,040
Other	18,123,413	19,787,283
	318,852,250	**314,169,810**

17. Wages and salaries

In the nine-month periods ended 30 September 2014 and 2013, this caption consists of the following:

	9M14	9M13
	Euro	
Salaries	151,643,687	150,368,659
Social Security charges	18,546,694	17,618,394
Social events	2,120,828	2,584,430
Training	1,485,682	752,579
Healthcare	1,460,225	1,624,486
Other	895,179	1,337,400
	176,152,295	**174,285,948**

18. Interest and related income/expense

In the nine-month periods ended 30 September 2014 and 2013, this caption consists of the following:

	9M14	9M13
	Euro	
Interest and related income		
Interest income	768,180	3,063,174
Gains on exchange rate differences	1,892,399	1,552,170
Other	8,148	119,931
	2,668,727	**4,735,275**
Interest and related expenses		
Interest expense	276,094,431	267,589,385
Bank commissions and expenses	7,202,913	4,170,487
Losses on exchange rate differences	1,181,369	2,539,385
Finance leases	663,961	973,042
Other	197,910	370,700
	285,340,584	**275,642,999**

(Amounts stated in Euros)

18. Interest and related income/expense (Continued)

The breakdown of interest income and interest expense in the nine-month periods ended 30 September 2014 and 2013 is as follows:

	9M14	9M13
	Euro	
Interest income		
Intragroup loans[(a)]	637,669	2,890,693
Other	130,511	172,481
	768,180	**3,063,174**
Interest expense		
Intragroup loans[(b)]	214,242,817	145,983,523
Bank loans[(b)]	61,269,445	121,454,383
Other	582,169	151,479
	276,094,431	**267,589,385**

(a) The decrease in interest income reflects primarily the repayment of the intercompany loans granted to Meo, S.A..

(b) The increase in interest expenses from intragroup loans reflects an increase in intercompany loans due to PT Portugal and the reduction in interest expense from bank loans reflects the decrease in outstanding amounts regarding commercial paper issued by the Company.

19. Earnings per share

Earnings per share for the nine-month periods ended 30 September 2014 and 2013 were computed as follows:

	9M14	9M13
Net income	(1,256,489,779)	(139,142,432)
Number of shares	1,150,000,000	1,150,000,000
Basic earnings per share	**(1.09)**	**(0.12)**

There are no situations that create a dilutive effect, so the diluted earnings per share are the same as basic earnings per share.

(Amounts stated in Euros)

20. Guarantees

As at 30 September 2014 and 31 December 2013, the Company had presented the following guarantees in favour of third parties:

	30 Sep 2014	31 Dec 2013
	Euro	
Guarantees in favour of courts	**1,519,886**	**1,608,722**
Bank guarantees in favor of other entities:		
Highway construction entities	5,030,089	5,734,356
Ministry of Education	3,795,748	3,161,016
Ministry of Justice	3,550,393	7,789,951
Municipalities	2,185,842	2,496,807
CTT	3,009,150	2,007,831
Ministry of Health	1,155,000	1,038,512
Other	5,876,440	6,714,826
	24,602,662	**28,943,299**
Total guarantees	**26,122,548**	**30,552,021**
Commitments of purchase before:		
Fixed asset and content suppliers	20,001,786	19,956,279
Suppliers of inventories	18,417,258	20,398,178
Other services	41,936,315	46,780,174
	80,355,359	**87,134,631**

Bank guarantees presented to the tax authorities relate primarily to additional income tax assessments for which the Company submitted a claim or an appeal.

As of 30 September 2014, Portugal Telecom, SGPS, S.A. had presented bank guarantees in favor of the tax authorities in relation to additional tax assessments received by Portugal Telecom regarding the tax consolidation of the years 2005 to 2010, thus including the tax contingencies of PT Comunicações, S.A. as well as tax contingencies of other entities included in the tax consolidation group, namely Meo, S.A. and Portugal Telecom. These bank guarantees totaled Euro 353 million as of 30 September 2014. In accordance with Portuguese tax legislation, Portugal Telecom has presented these guarantees and submitted a claim or an appeal to the tax authorities in order to be able to hold open discussions with the tax authorities and avoid the payment of a given tax assessment. In Portugal, these two conditions are required and must be complied with before the process can continue, regardless of the amount of the tax assessment or the likelihood of success of the appeal or the claim.

21. Events occurred after the balance sheet date

The financial statements as of and for the nine months period ended 30 September 2014 were approved by the Board of Directors and authorised for issuance on 13 January 2015.

On 1 December 2014, Oi entered into an exclusivity agreement with Altice, S.A. to allow both entities to negotiated and agree on the final terms of the sale of PT Portugal. On 8 December 2014, the Board of Directors of Oi finalized the formalities to approve the general terms and conditions for the sale of all shares of PT Portugal to Altice Portugal, S.A., a wholly-owned subsidiary of Altice, S.A.. The sale substantially involves PT Portugal's operations in Portugal and Hungary. The effectiveness of the purchase and sale contract will depend on the approvals by the shareholders of Portugal Telecom SGPS, S.A., scheduled for 12 January 2015, and by the proper regulatory entities. With this approval, Oi will transfer to Altice all of the shares issued by PT Portugal for an enterprise value of Euro 7.4 billion, adjusting for cash and debt and including an earn-out of Euro 500 million related to PT Portugal's

21. Events occurred after the balance sheet date (Continued)

generation of future revenue. The price to be paid by Altice will suffer adjustments usually adopted in similar transactions, in accordance with PT Portugal's cash holdings on the closing of this transaction.

On 29 December 2014, Meo, S.A. was merged into PT Comunicações and accordingly ceased to exist, but its assets and liabilities were entirely transferred to the Company and thus Meo, S.A.'s activity will continue in the future. This merger produced effects as from 1 January 2014. Following this merger, PT Comunicações was renamed *MEO—Serviços de Comunicações e Multimédia, S.A.*.

STATUTORY AUDITORS' REPORT

(Translation of a report originally issued in Portuguese—Note 39)

Introduction

1. We have audited the accompanying financial statements of PT Comunicações, S.A. (''the Company''), which comprise the balance sheet as of 31 December 2013 that presents a total of 13,888,129,071 Euros and shareholders' equity of 4,653,549,363 Euros, including a net loss of 210,225,304 Euros, the statements of income by nature, of changes in shareholders' equity and of cash flows for the year then ended and the corresponding notes.

Responsibilities

2. The preparation of financial statements that present a true and fair view of the financial position of the Company, the results of its operations, the changes in its shareholders' equity and its cash flows, as well as the adoption of adequate accounting principles and criteria and the maintenance of an appropriate system of internal control are the responsibility of the Company's Board of Directors. Our responsibility is to express a professional and independent opinion on these financial statements, based on our audit.

Scope

3. Our audit was performed in accordance with the auditing standards *(''Normas Técnicas e as Directrizes de Revisão/Auditoria'')* issued by the Portuguese Institute of Statutory Auditors *(''Ordem dos Revisores Oficiais de Contas'')*, which require that the audit be planned and performed with the objective of obtaining reasonable assurance about whether the financial statements are free of material misstatement. An audit includes verifying, on a sample basis, evidence supporting the amounts and disclosures in the financial statements and assessing the significant estimates, based on judgements and criteria defined by the Board of Directors, used in their preparation. An audit also includes assessing the adequacy of the accounting principles used and their disclosure, taking into consideration the circumstances, verifying the applicability of the going concern concept and assessing the adequacy of the overall presentation of the financial statements. Our audit also included verifying that the financial information contained in the Managements' Report is in accordance with the financial statements. We believe that our audit provides a reasonable basis for expressing our opinion.

Opinion

4. In our opinion, the financial statements referred to in paragraph 1 above, present fairly, for the purpose explained in paragraph 5 below, in all material respects, the financial position of PT Comunicações, S.A. as of 31 December 2013 and the results of its operations, the changes in its shareholders' equity and its cash flows for the year then ended, in conformity with generally accepted accounting principles in Portugal.

Emphasis

5. The financial statements mentioned in paragraph 1 above refer to the Company on a standalone basis and were prepared in accordance with current legislation for approval and publication. The Company will not prepare consolidated financial statements as, in accordance with number 3 of article 7 of Decree-Law 158/2009, of 13 July 2009 is not required to do so, as its financial statements will be included in the consolidated financial statements of Portugal Telecom, SGPS, S.A.. As described in Note 3.7, although the financial investments have been accounted for by the equity method, under which the Company´s net profit for the year and shareholders' equity include the effect of consolidating the subsidiary and associated companies, the accompanying financial statements do not include the effects of a full consolidation of their assets, liabilities, revenues and costs.

Report on other legal requirements

6. It is also our opinion that the financial information contained in the Managements' Report is consistent with the financial statements for the year.

Lisbon, 11 February 2014

INDEX

PT Comunicações
Notes to Financial Statements
As at 31 December 2013
(Amounts in Euro)

1. Introduction

(a) Development of the company

PT Comunicações, S.A. (''PT Comunicações'' or the ''Company'') was incorporated in 2000, in accordance with a resolution from the General Meeting of Portugal Telecom, S.A. on April 27, 2000 within the business restructuring process in Portugal Telecom Group and by spin-off from Portugal Telecom, S.A. The conditions for this spin-off were defined under Decree-Law no. 219/00, of September 9, and Joint Order no. 936-A/2000 issued by the Ministers for Social Provision and for Finance on September 14.

On 30 September 2006, under the restructuring process of the Group Portugal Telecom, Portugal Telecom, SGPS, S.A. (''PT SGPS''—Holding company of the Group) sold to PT Portugal, SGPS, S.A. (''PT Portugal''—a sub-Holding company of the Group) all of the shares of PT Comunicações.

On 27 December 2002, PT Comunicações and the Portuguese Government signed the Contract of Purchase and Sale of the Basic Telecommunications Network (''Basic Network'') and the Telex Network, under which the State transferred the full property of the Basic Network and the Telex Network to PT Comunicações, free of any lien or encumbrance. Under the terms of this contract, PT Comunicações is obliged to: i) guarantee the functioning of the Basic Network as an open network, serving as support for the transmission of a general range of services and available to all telecommunications operators and service providers under equal conditions; and ii) provide the acquired network, during the concession period, with the necessary infrastructure for the provision of the concession services and without prejudice to the possibility of its transfer, replacement and/or encumbrance, provided that this does not affect those services.

On 17 February 2003 Decree-Law no. 31/2003 was published, approving the Amendment Agreement to the Concession Contract, which changed the conditions for the concession of public telecommunications services approved by Decree-Law no. 40/95 of February 15. This decree introduced the following fundamental changes to the previous Concession Contract: i) rent payment will no longer be made to the Portuguese State; ii) rights and assets subject to the concession will not revert to the State upon termination; and iii) the State will compensate the Company, under certain compensation mechanisms, for possible negative margins incurred by the Company arising from compliance with the obligations inherent to the provision of the fixed telex, telegraphic and broadcasting services and the mobile marine service.

Under the terms of the above-mentioned Amendment Agreement, the objectives of the concession are: the development and operation of the infrastructure that make up the basic network for telecommunications and signal transmission and emission; the provision of a universal telecommunications service, as defined under Decree-Law no. 458/99, of 5 November; the provision of a telex service; the provision of a data transmission service; the provision of a service for the emission and distribution of telecommunications broadcasts; and the provision of a telegraphic service.

The provision of the universal telecommunications service includes the following: i) connection to the fixed telephone network and access to fixed telephone services; ii) availability of public telephones in public places; and iii) availability of telephone directories and an information service.

The concession period expires in March 2025. As mentioned above, both the Amendment Agreement to the Concession Contract and the Portuguese Law impose certain obligations to PT Comunicações as a universal service provider. On February 2012, following a public hearing about the selection of the universal service provider, Anacom issued a final decision splitting the universal service into three functions: (1) connection to a public communications network in a fixed location and rendering of a telephone service through this network (Tender 1); (2) public phones offer (Tender 2); and (3) make available a complete telephone list and a related service (Tender 3). In 2012, the Portuguese State launched a public tender to select the universal service providers, approved the definition of the universal service cost and established a compensation fund for the universal service providers.

1. Introduction (Continued)

PT Comunicações is qualified to receive compensation from that fund to cover the costs incurred up to date with the universal service. In 2013, the outcome of the tender offer became public, with the universal service related to the fixed line service (tender 1) being attributed to Zon and Optimus. This service is the main purpose of the Concession Agreement, and as such PT Comunicações and the Portuguese State agreed that the Concession Agreement should be terminated, as a result of which PT Comunicações would be entitled to a compensation corresponding to the investments realized in the universal service and not yet amortized as at the termination date.

On 11 February 2004, Law 5/2004 or the ''Electronic Communications Act'' was published, which establishes the legal regime applicable to electronic communications networks and services, and to the associated resources and services, and defines the authority of the national regulatory agency in this area.

On 9 December 2008, ANACOM attributed to PT Comunicações the rights to the use frequencies, on a national basis, to provide digital television services (TDT) for the broadcasting television programs with unconditional access (also known as public access channels) which is associated with Multiplexer A (Mux A). During the year 2011, ANACOM defined the obligations associated with such rights, and as a result PT Comunicações recognized an intangible asset corresponding to the present value of the commitments under such rights (Note 9).

(b) Corporate transactions

During 2007, PT Comunicações acquired the shares of PT Prime—Enterprise Solutions and Telecommunication Systems, SA (''PT Prime''), PT Corporate—Enterprise Solutions for Telecommunications and Information Systems, SA (''PT Corporate'') and PT.Com—Interactive Communications, SA (''PT.COM''), previously held by PT SGPS, seeking to consolidate all fixed line services into PT Comunicações.

In March 2008, PT.Com and PT Corporate were merged through their incorporation into PT Comunicações and, consequently, the equity, rights and obligations of those companies were transferred to PT Comunicações, and PT.Com and PT Corporate ceased to exist as separate entities.

In July 2009, PT Comunicações acquired from Novabase—Sociedade Gestora de Participações Sociais, SGPS, S.A. (''Novabase'') a 36.25% stake in Superemprego—Sistemas de Informação para a Gestão de Recursos Humanos, S.A. (''Superemprego''), and therefore Superemprego became fully owned by Portugal Telecom Group. In November 2009, Superemprego was merged through its incorporation into PT Comunicações and, consequently, its equity, rights and obligations were transferred to PT Comunicações and Superemprego was ceased to exist as a separate entity.

On 30 November 2010, and considering the need to adjust the corporate structure to reflect the consolidation of its fixed-line and mobile business, PT Comunicações acquired from PT Portugal the full stake in TMN—Telecomunicações Móveis Nacionais, S.A. (''TMN''), company whose name was changed to Meo-. Multimedia Communications and Services, SA (''Meo, SA'') on 27 January 2014. This change aimed to fixed-mobile convergence, so the services of residential and personal segments started to be provided by the same brand.

On 29 December 2011, PT Prime was merged into PT Comunicações through the incorporation of its shareholders' equity and rights and obligations. For accounting purposes, this merger was reported as of 1 January 2011 and, accordingly, all transactions made by PT Prime as from that date were made on behalf of PT Comunicações.

On 3 May 2012, PT Comunicações concluded the acquisition from TVI—Televisão Independente, S.A. (''TVI'') of its former wholly-owned subsidiary RETI—Rede Teledifusora Independente, S.A. (''RETI''), which therefore became a wholly-owned subsidiary of PT Comunicações (Note 10). On 12 December

1. Introduction (Continued)

2012, RETI was merged into PT Comunicações through the incorporation of its shareholders' equity and rights and obligations. For accounting purposes, this merger was reported as of 3 May 2012 and, accordingly, all transactions made by RETI as from that date were made on behalf of PT Comunicações.

On June 2013, Portugal Telecom concluded the sale of its 28% stake in Companhia de Telecomunicações de Macau, S.A.R.L. (CTM), to CITIC Telecom International Holdings Limited (CITIC Telecom), that included stakes of 25% and 3% owned by PT Participações and PT Comunicações, respectively, for a total amount of USD 443.0 million, equivalent to approximately Euro 335.7 million, having PT Comunicações received the amount of Euro 35,966,391 (Note 4 b) and 20 a)), corresponding to their share capital held in the CTM.

On 17 July 2013, Auto Venda Já, S.A. (''Auto Sapo'') was incorporated with a share capital of Euro 50,000. PT Comunicações subscribed and realized an amount of Euro 25,000, corresponding to 50% in the share capital of that entity, and in addition granted paid-in capital in the amount of Euro 150,000 (Note 10). The activity of this entity consists of the acquisition and resale of cars through sales channels that are made available to the owners of those cars, including a sales electronic platform, and all related or complementary services.

On 1 December 2013, PT Comunicações sale 0,005% stake in Portugal Telecom Brasil, S.A. (''PT Brasil'') to PT SGPS, and therefore PT Brasil became fully owned by PT SGPS (Note 10).

On 30 December 2013, as part of an internal reorganization of the PT Group, PT Comunicações acquired all the shares that PT SGPS held in a number of companies, including:

- the 50% interest in Sportinveste Multimédia, SGPS, S.A. (''Sportinveste Multimédia''), corresponding to 2,500,000 shares of its share capital, and paid-in capital and loans granted to this entity; the investment in Sportinveste Multimédia was recorded as a non-current asset held for sale, as a result of the ongoing restructuring process of this company (Note 20.b);
- the 33.33% interest in Yunit Services, S.A. (''Yunit''), corresponding to 33,334 shares of its share capital, and the related loans granted to this entity (Notes 10 and 22);
- the 26.36% interest in INESC—Instituto de Engenharia de Sistemas e Computadores, S.A. (''INESC'') and the related loans granted to this entity; this interest plus the 9.53% interest that was previously owned by PT Comunicações results in a 35.89% total interest in the share capital of INESC (Note 10);
- the 8.54% interest in Vortal S.G.P.S., S.A. (''Vortal''), corresponding to 474,254 shares of its share capital;
- the 0.0004% interest in Multicert—Serviços de Certificação Electrónica, S.A. (''Multicert''), corresponding to 10 shares of its share capital; this interest plus the 19.9996% interest that was previously owned by PT Comunicações results in a total 20% interest in the share capital of Multicert (Note 10).

(c) Other information

Under the terms of article 7 of Decree-Law no. 158/2009, despite holding financial stakes in group companies and associates, the Company is not required to prepare consolidated financial statements, given that it is indirectly fully held by PT SGPS, which already presents consolidated financial statements which include the financial statements of the Company and its affiliated companies.

2. Basis of presentation

These financial statements were prepared in accordance with Portuguese legislation, based on Decree-law nº. 158/2009, which approved the new Portuguese accounting system, named Sistema de

2. Basis of presentation (Continued)

Normalização Contabilística (''SNC''), including the conceptual structure, Normas Contabilísticas e de Relato Financeiro (''NCRF'') and Interpretative Standards, as approved by Notices nº 15652/2009, 15655/2009 and 15653/2009, respectively.

The Company adopted NCRF for the first time in 2010 and applied for this purpose the *''NCRF 3 First Time Adoption Of NCRF''* (''NCRF 3''), with the transition date being 1 January 2009 for the purposes of the presentation of these financial statements. Previously, the Company's financial statements were prepared in accordance with accounting standards as previously in effect in Portugal (Plano Oficial de Contabilidade—''POC'') and other complementary legislation, which were modified by SNC. The conversion adjustments made to the financial statements as at 1 January 2009 were computed retrospectively, as determined by NCRF 3.

As permitted by Decree-Law nº. 158/2009, the Company also applies the International Financial Reporting Standards (''IAS/IFRS'') and related interpretations (''SIC/IFRIC'') issued by International Accounting Standards Board (IASB), in order to fill in the gaps or omissions in SNC regarding specific situations of certain transactions.

3. Main accounting policies, judgments and estimates

These financial statements were prepared assuming the continuity of operations. The main accounting policies used in the preparation of these financial statements are described below and were applied consistently, unless indicated otherwise.

3.1. Tangible fixed assets

Tangible fixed assets other than land and buildings and ducts infrastructure are stated at acquisition or production cost, which includes the purchase price and any expenses directly attributable to bringing the asset to the location and making them operational.

Land, buildings and the ducts infrastructure are presented in accordance with the revaluation model based on regular assessments, at least tri-annually, deducted from subsequent depreciation for buildings and infrastructure. The fair value of real estate properties is determined by external appraisers based on market prices or the income obtained by these assets, under the provisions of NCRF 7 Tangible Fixed Assets. Regarding the ducts infrastructure, the Company, has applied IAS/IFRS by assessing the fair value of these assets based on the depreciated replacement cost method, as this methodology is not provided under NCRF 7. The Company maintained these assets recognized at the revaluation model, although the valuation methodology is not provided under NCRF 7, in order to ensure the consistency with Portugal Telecom's consolidated financial statements regarding the valuation of this type of asset, through the application of IAS/IFRS.

Subsequent expenses are included in the asset's carrying amount only when it is probable that future economic benefits flow to the Company and the cost can be measured reliably. The costs of maintenance and repair that are not likely to generate future economic benefits are recognized as an expense in the period they are incurred.

Increases resulting from revaluations are recorded in equity under the caption ''Revaluation surplus'', except for increases that reverse a decline previously recognized in earnings. Decreases resulting from revaluations are recorded directly under the caption ''Revaluation surplus'' up to the credit balance of the revaluation surplus for the relevant asset. Any excess in relation to the relevant credit balance is recognized in earnings. When the revalued asset is written off, the revaluation surplus included in equity regarding the asset is not reclassified to net income and is instead transferred to retained earnings. Annually, the revaluation surpluses are transferred to retained earnings in the same proportion of their depreciation.

(Amounts in Euro)

3. Main accounting policies, judgments and estimates (Continued)

With the exception of lands that are not depreciated, the depreciation of other tangible fixed assets is recognized, from the month in which the asset is available for use, on a straight-line basis over the useful life of asset, which is determined according to expected utility. The amortization period of tangible assets is reviewed on an annual basis and adjusted in order to reflect the estimated useful lives. The annual rates applied reflect the estimated useful life for each class of assets, as follows:

Asset Class	Years of useful life
Buildings and other constructions	3 - 50
Basic equipment	
Network installations and equipment	7 - 40
Ducts infra-structure	40
Telephones, switchboards and other	4 - 10
Submarine cables	15 - 20
Other basic equipment	4 - 20
Transportation equipment	4 - 8
Administrative equipment	3 - 10
Other tangible fixed assets	4 - 8

Following the approval of the Amendment Agreement to the Concession Contract, concluded in 2003 in connection with the acquisition of the Basic Network from the Portuguese Government, which now provides that the fixed assets related to the concessions will no longer be returned to the Portuguese State after the concession, the Company revised the amortization period of the assets which previously had useful lives that exceeded the term of the Concession Contract.

The useful lives and depreciation methods are reviewed annually, and the effect of any changes to these estimates is recognized prospectively in the income statement.

Gains or losses arising from the write-off or disposal of tangible fixed assets are determined as the difference between the amount received and the net recorded amount of the asset, and are recognized in the income statement.

3.2. Leases

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. The remaining lease contracts are considered operating leases. The classification of leases depends on the substance of the transaction and not on the form of the contract.

Assets acquired under finance leases and the corresponding liabilities are accounted at the beginning of the contract as the lesser amount between the fair value of the assets and the present value of minimum lease payments. Rents include interest and capital amortisation, with the first being recognized in the income statement in the related period.

Under operating leases, rents are recognized on a straight-line basis during the period of the lease.

3.3. Investment properties

Investment properties includes mainly buildings and land held to earn rent and/or capital appreciation and not for use in the normal course of the business.

Investment properties are stated at acquisition cost plus transaction expenses and reduced by accumulated depreciation and accumulated impairment losses, if any. Expenditures incurred (maintenance, repairs, insurance and real estate taxes) and income and rents obtained are recognized in the income statement of the period.

3. Main accounting policies, judgments and estimates (Continued)

Investment properties are depreciated on a straight-line basis, during their expected useful lives. Generally depreciation rates correspond to the respective estimated useful lives (Note 3.1).

3.4. Business combinations and goodwill

Acquisitions of subsidiaries are recorded based on the purchase method (NCRF 14). The purchase price includes, on the acquisition date, the following components: (a) the fair value of assets acquired; (b) the fair value of liabilities incurred; (c) the fair value of equity instruments issued by the Company in exchange for the control of the subsidiary; and (d) expenses directly attributable to the acquisition. When applicable, the purchase price includes the effect of contingent payments agreed under the transaction, with subsequent changes in those payments being recorded as an adjustment to goodwill.

Any excess of the acquisition cost over the fair value of net assets acquired and contingent liabilities of the acquired company at the date of acquisition is recorded as goodwill, in accordance with NCRF 14. If the acquisition cost is lower than the fair value of identifiable net assets, the difference is recorded as a gain in the net income. As provided for in NCRF 3, the Company will apply NCRF 14 only to acquisitions after 1 January 2009 and accordingly goodwill related to acquisitions prior to that date were maintained as initially computed under POC.

Goodwill resulting from the acquisition of subsidiaries is included in the balance sheet under the caption ''Goodwill''.

Goodwill is not amortised, but tested, on an annual basis or whenever there is evidence of a potential loss of value, for impairment losses. For impairment test purposes, goodwill is allocated to cash generating units. Any impairment loss is recognized in the income statement of the period, and cannot be reversed in a subsequent period.

3.5. Intangible assets

Intangible assets include mainly (1) the amount for the acquisition of the Basic Network, (2) software licenses, (3) TDT license acquisition cost and (4) satellite capacity rights. Intangible assets acquired separately are recorded at cost net of accumulated amortisation and accumulated impairment losses, if any.

Intangible assets are amortised on a straight-line basis and over a period of three years, except: (a) the value of the acquisition of the property of the Basic Network, which is amortised over the remaining period until the end of the concession (2025), (b) the value of the commitments assumed under the of TDT license, which is amortized until the end of the first renewal period of the same (2038); and (c) the satellite capacity rights, which are amortised over the period of their respective contracts. The useful lives and depreciation method of the intangible assets are reviewed annually, and the effect of any changes to these estimates is recognized prospectively in the income statement.

Expenses with research activities are recognized in earnings when incurred. Development expenses are capitalized when it is demonstrated the technical and economic feasibility of the product, and the Company has the intention and ability to complete its development and starts its commercialization or use, as provided in the ''NCRF 6 Intangible Assets''.

3.6. Impairment of tangible and intangible assets

The Company performs impairment tests for its tangible and intangible assets if any event or change results in an indication of impairment. In case of any such indication, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. When it is not possible to determine the recoverable amount of an individual asset, the estimated recoverable amount of the cash-generating unit to which the asset belongs is used.

(Amounts in Euro)

3. Main accounting policies, judgments and estimates (Continued)

The recoverable amount is the greater of fair value less cost to sell and the value in use. The net selling price is the amount that could be received from a transaction between independent parties, reduced by direct costs related to the sale. In assessing the value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the specific risk to the asset.

If the recoverable amount of an asset is estimated to be less than its carrying amount, an impairment loss is recognized in the income statement.

3.7. Financial investments

Subsidiaries are those entities over which the Company has the power to govern the financial and operating policies generally represented by the majority of the voting rights. Associated companies are entities over which the Company has significant influence but does not control, generally represented by stakes between 20% and 50% of voting rights.

Financial investments in subsidiaries and associated companies are recorded under the equity method of accounting. Under this method, financial investments are initially recorded at acquisition cost and subsequently adjusted for the changes, after the acquisition date, in the Company's share in the net assets of those entities. The entity's earnings include its share in the earnings of those companies.

Under the application of the equity method of accounting, adjustments are made to the financial statements of affiliated companies in order to (1) conform their accounting policies with those adopted by the Company, (2) reflect the impacts of purchase price allocation processes and, (3) eliminate gains and losses resulting from transactions between affiliated companies of PT Comunicações.

Financial investments in foreign entities are translated to Euros using the exchange rates prevailing at the balance sheet date, while the Company's share in the earnings of those entities is computed based on the average exchange rates for the reported period. The effect of translation differences is recognized in shareholders' equity under the caption ''Adjustments in financial assets''.

The exchange rates used in the translation of the main financial statements of the foreign entities are as follows:

	2013		2012	
Currency	Closing	Average	Closing	Average
Macao Pataca	11.0141	10.6094	10.5328	10.2624
Brazilian Real	3.2576	2.8685	2.7036	2.5084

Financial investments are evaluated whenever there is evidence that it might be impaired, with impairment losses being recorded in the income statement.

3.8. Non-current assets held for sale

Non-current assets are classified as held for sale when its carrying value will be recovered mainly through a sale transaction and not continuing use, which occurs when the sale is highly probable and the non-current asset or disposal group is available for immediate sale in its present condition. The sale should be concluded one year after the non-current asset was classified as held for sale.

Non-current assets held for sale are measured at the lower amount between the carrying value and the fair value less costs to sell.

3. Main accounting policies, judgments and estimates (Continued)

3.9. Post-retirement benefits

(a) Post-retirement pensions

The Company has the obligation to pay to a group of employees a pension supplement. In order to finance these obligations, various funds were incorporated by PT Comunicações (Note 11.1).

In order to estimate the amount of the Company's liabilities under these pension plans, the Company obtains periodically actuarial valuations, using the ''Projected Unit Credit Method''. As mentioned above, according to ''NCRF 28—Employee Benefits'' and ''IAS 19—Employee Benefits'', PT Comunicações has decided to adopt the alternative treatment referred in IAS 19 for recognition of actuarial gains and losses directly in equity, namely those resulting from changes in actuarial assumptions and from differences between actual data and actuarial assumptions.

Plan amendments related to reduction or increase of the benefits granted to employees are recorded as prior years' service gains or losses. Prior years' service gains or losses are recognized under the caption ''Costs with post-retirement benefits'' when they occur. Gains obtained with the settlement of any plan are recognized when incurred under the caption ''Curtailment and settlement costs''.

Liabilities stated in the balance sheet correspond to the difference between the Projected Benefit Obligation (''PBO'') related to pensions deducted from the fair value of fund assets.

For the plans that report an actuarial surplus, assets are recorded when there is an express authorization for offsetting them against future employer contributions, or if a reimbursement of the excess finance is expressly authorized or permitted.

Contributions made by the Company to defined contribution pension plans are recognized in net income when incurred.

(b) Health care benefits

Under a defined benefit plan, PT Comunicações is responsible to pay, after the retirement date, health care expenses to a group of employees and relatives. This health care plan is managed by Portugal Telecom—Associação de Cuidados de Saúde (''PT-ACS''). In 2004, the Group established PT Prestações—Mandatária de Aquisições e Gestão de Bens, S.A. (''PT Prestações'') to manage an autonomous fund to finance these obligations (Note 11.2).

The amount of the Company's liabilities with respect to these benefits after the respective retirement date is estimated based on actuarial valuations, using the ''Projected Unit Credit Method''. The Company recognises actuarial gains and losses directly in equity, namely those resulting from changes in actuarial assumptions and from differences between actual data and actuarial assumptions.

Plan amendments related to reduction or increase of the benefits granted to employees are recorded as prior years' service gains or losses under the caption ''Post-retirement benefit costs''. Gains obtained with the settlement of any plan are recognized when incurred under the caption ''Curtailment and settlement costs''.

Accrued post-retirement health care liabilities stated in the Balance sheet correspond to the present value of obligations from defined benefit plans, deducted from the fair value of fund assets and any prior years' service gains or losses not yet recognized.

(c) Pre-retired and suspended employees

In connection with the programs related to employees that are under a suspended contract agreement or that have been pre-retired, the Company recognises a liability in the balance sheet equivalent to the

3. Main accounting policies, judgments and estimates (Continued)

present value of salaries payable up to the retirement age. The related cost is recorded in the income statement under the caption ''Curtailment and settlement costs'' (Note 11.3).

3.10. Accruals and deferrals

The Company records its revenue and expenses as they are generated or incurred, regardless of when they are received or paid, respectively.

3.11. Income taxes

Income tax expense corresponds to the sum of current and deferred taxes. Deferred taxes are recognized in the income statement except when they relate to items recorded directly in shareholders' equity and accordingly are also recorded in shareholders' equity.

Current taxes are computed based on the taxable income of the period computed under the Corporate Income Tax (''IRC'').

Portugal Telecom adopted the special taxation regime for Groups of companies, in which PT Comunicações is included. Consequently, the income tax due, net of withholding taxes and payments on accounts are recorded on the balance sheet as accounts payable or receivable from Portugal Telecom.

The income tax recorded in the financial statements was assessed in accordance with the terms of ''*NCRF 25 Income Taxes''.* In assessing the cost of income tax for the year, besides the current tax determined on the basis of profit before-tax adjusted in accordance with the tax legislation, we also consider the effects resulting from temporary differences between the carrying value of assets and liabilities and the related tax amounts. Deferred tax assets and liabilities are computed and analysed annually, based on the expected tax rate that will be effective on the date on which such temporary differences are no longer applicable.

Deferred tax assets are recorded only when there is a reasonable expectation of sufficient future tax profits. As at the balance sheet date the Company conducts a reassessment of the above-mentioned temporary differences with respect to the deferred tax assets, in order to record deferred tax assets that were not recognized previously because they had not met the necessary conditions for their recognition, and/or reduce the amount of deferred tax assets which are recognized based on the current estimate of their future recoverable amounts.

3.12. Inventories

Inventories are stated at average acquisition cost. Adjustments to the carrying value of inventories are recognized based on technological obsolescence or low rotation.

Work in progress relating to installation of telecommunication equipments for clients is valued at production cost, which mainly includes expenses on equipment and various materials used, as well as wages and salaries related to the project.

Impairment losses on inventories includes the value of materials for which there is no intended use due to obsolescence and/or low rotation, as well as the difference between prices of materials that have a fair value lower than the average acquisition cost, when the difference is higher than the discount granted in current market conditions. Impairment losses and related reversals are recorded in earnings primarily under the caption ''Impairment of inventories ((losses)/reversals)''.

3. Main accounting policies, judgments and estimates (Continued)

3.13. Trade receivables and other

Trade receivables and other receivables are initially recognized at fair value and subsequently measured at cost or amortised cost, based on the effective interest method, deducted from impairment losses.

Impairment losses for doubtful accounts receivable are computed based on the evaluation of estimated risks resulting from the non-collection of receivables, and are recognized in the income statement of the period in which they are calculated.

3.14. Subsidies

Subsidies are only recognized when they are received and after reasonable assurance that the Company will comply with their respective requirements for their assignment.

Subsidies associated with the acquisition or production of non-current assets (investment subsidies) are initially recognized in equity under the caption ''Other shareholders' equity'', and subsequently allocated on a straight-line basis as income for the year, during the useful lives of the assets to which they relate.

Operating subsidies are recognized in the income statement on a constant basis over the periods in which expenses that they intended to compensate are recognized.

3.15. Provisions and contingent liabilities

Provisions are recognized when (i) there is a present obligation as a result of a past event, (ii) it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and (iii) a reliable estimate can be made of the amount of the obligation. Where any of the above-mentioned criteria is not met, the Company discloses the event as a contingent liability, unless the chance of cash outflow is remote.

Provisions are recognized for an amount corresponding to the present value of the best available estimate, at the reporting date, of the resources required to settle the obligation. That estimate is determined considering the risks and uncertainties associated with the obligation. Provisions are reviewed at the end of each year and adjusted in order to reflect the best available estimate as of that date.

The present obligations arising from onerous contracts (in which the cost of meeting the obligations under the contract exceed the economic benefits expected there under) are calculated and recorded as provisions.

3.16. Loans obtained

Loans obtained are initially recognized at fair value, net of transaction costs incurred, and subsequently presented at amortised cost, based on the effective interest method.

3.17. Borrowing costs

The Company has the policy of capitalizing of borrowing costs related to loans obtained to finance the acquisition, construction or production of tangible assets. However, the Company has recognized borrowing costs as expenses when incurred, since the construction period of tangible assets is usually short.

3.18. Vacation pay and vacation subsidies

Vacation pay and vacation subsidies and related social charges are recorded as a cost for the period in which the employee acquires the right to receive them. Consequently, the amount of vacation pay and

(Amounts in Euro)

3. Main accounting policies, judgments and estimates (Continued)

subsidies and related social charges due and unpaid at the balance sheet date are estimated and included under the caption ''Accrued expenses''.

3.19. Balance classification

Realizable assets and liabilities under which the Company has an unconditional right to defer its settlement for a period over one year from the balance sheet date are classified under non-current assets and non-current liabilities, respectively, at present value.

3.20. Foreign currency transactions and balances

Transactions denominated in foreign currencies (different from the domestic currency of the Company) are recorded at the exchange rates prevailing at the time the transactions are made. Assets and liabilities in foreign currency for which there is no agreement for fixing an exchange rate are translated to Euros using the exchange rates prevailing at the balance sheet date. Gains or losses arising from the differences between exchange rates in force at the date of the respective transactions and those applying on the date of collection, payment or balance sheet date are recorded as income and losses, respectively, in the income statement.

Assets and liabilities as at 31 December 2013 and 2012 were translated to Euro using the following exchange rates reported by the Bank of Portugal:

Currency	2013	2012
Special Drawing Rights	1.1173	1.1658
American dollar	1.3791	1.3194
Namibian dollar	14.5660	11.1727
Cape Verde escudo	110.2650	110.2650
Swiss franc	1.2276	1.2072
Angolan Kwanza	134.5920	126.8460
British pound	0.8337	0.8161
Mozambique metical	41.2400	39.2400
Brazilian real	3.2576	2.7036

3.21. Revenue recognition

Revenue is measured at fair value of the amount received or receivable. Revenue recognition is deducted from the estimated amount of returns, discounts and other rebates and does not include the Value Added Tax (VAT) and other taxes paid related to the sale.

Revenue from the services rendered is recognized by reference to the stage of completion of the transaction at the reporting date, if all the following conditions are met: (1) the revenue amount can be reliably measured; (2) it is probable that future economic benefits associated with the transaction will flow to the Company; (3) the expenses incurred or to be incurred with the transaction can be measured reliably; and (4) the stage of completion of the transaction at the reporting date can be reasonably estimated.

(a) National fixed national communications

Revenues from telecommunication activities are recognized at their gross amounts when services are rendered. Billings for these services are made on a monthly basis throughout the month. Amounts not yet invoiced but already due or incurred are recorded based on estimates and included under the caption ''Unbilled revenues''. Differences between accrued amounts and the actual unbilled revenues are recognized in the following period.

3. Main accounting policies, judgments and estimates (Continued)

(b) International fixed communications

The income from international telecommunication services are calculated according to fixed termination rates under bilateral agreements with several telecom operators. These agreements also establish whether it is the operator of the sending network that must submit the credit to the operator of the receiving network or whether the operator of the network receiving must provide the debit first.

(c) Internet Protocol Television (''IPTV'') and Direct to Home (''DTH'') services

The income from the television service through Internet Protocol Television (IPTV) and satellite are recognized as follows: (i) the amounts charged for monthly subscription of services used are recognized in the period in which the service is rendered; (ii) equipment rental is recognized over the lease period; (iii) equipment sales are recognized upon sale; and (iv) penalties imposed to customers are recognized when received.

(d) Internet services

Revenues from ISP services result essentially from monthly subscription fees and telephone traffic when the service is used by customers. These revenues are recognized when the service is rendered.

(e) Advertising services

Advertising revenues from telephone directories and related costs are recognized in the period in which the directories are effective. PT Comunicações has a contract with Páginas Amarelas whereby the latter is responsible for production, publishing and distribution of PT Comunicações telephone directories, as well as for selling advertising space in the directories. The total cost to be paid by PT Comunicações for such services is set at a fixed 78% of its gross revenues from the sale of advertising space in telephone directories. The prices of advertising space are fixed, not contingent, and based on the expected volume of the distributed directories (approximately one to every telephone number). Revenues from the sale of advertising space are invoiced directly by PT Comunicações to its corporate clients during the one-year advertising period. These revenues are recognized in earnings on a monthly basis during the period for the respective directory.

(f) Leased lines and rental of ducts and capacity

Income from leased lines is recorded as operating leases in the respective period, under the caption ''Services rendered''.

(g) Interest

Interest revenue is recognized based on the effective interest method.

Income relative to advance payments made by customers are deferred and recognized when the service is rendered.

3.22. Own work capitalized

Internal expenses incurred by the Company in the construction of tangible fixed assets, which correspond to materials, work force and transportation, at cost, are capitalized under the caption ''Own work capitalized'', only when the following requirements are met: (a) the tangible fixed assets are identifiable; (b) the tangible fixed assets will generate future economic benefits; and (c) development expenses can be reliably measured.

3. Main accounting policies, judgments and estimates (Continued)

3.23. Losses and gains recognised under projects

The Company records losses and gains associated with projects based on their stage of completion. Accordingly, invoices issued related to work not yet performed are recorded under the caption ''Deferrals'', unbilled revenues related to work in progress are recorded under the caption ''Unbilled revenues'' and expenses related to unbilled performed work are recorded as work in progress under the caption ''Inventories''.

3.24. Financial assets and liabilities

Financial assets and liabilities are recognized in the balance sheet when the Company becomes party to the corresponding contractual terms, and are classified at cost or amortised cost.

(a) Financial assets and liabilities at cost or amortised cost

Assets and liabilities are classified at cost or amortised cost if they present the following characteristics: (a) have a defined maturity; (b) have a fixed or determined income; and (c) do not represent a derivative financial instrument or do not include a derivative financial instrument.

Assets and liabilities classified in this category are measured at amortised cost reduced by accumulated impairment losses (for financial assets) and correspond primarily to the following asset and liability captions included in the Company's balance sheet:

- Accounts payable to Group companies
- Accounts receivable—trade
- Unbilled revenues and accrued expenses
- Advances to suppliers and from accounts receivable
- State and other public entities
- Other accounts receivable and payable
- Other financial assets and liabilities
- Cash and bank deposits
- Loans obtained
- Suppliers and investments suppliers

Amortized cost is determined through the effective interest method. The effective interest rate is the one that discounts the estimated future payments and receipts until the term of the financial instrument to the carrying value of the financial asset or liability.

(b) Impairments on financial assets

Financial assets included under the caption ''cost or amortised cost'' are subject to impairment tests at each year end. Such assets are impaired when there is clear evidence that, as a result of one or more events occurred after its initial recognition, their future estimated cash flows will be negatively affected.

For assets measured at amortised cost, the impairment loss corresponds to the difference between the carrying amount of the asset and the present value of the revised future estimated cash flows discounted using the initial effective interest rate. For financial assets measured at cost, the impairment loss corresponds to the difference between the carrying amount of the asset and the best available estimate of the asset's fair value.

3. Main accounting policies, judgments and estimates (Continued)

Subsequently, if there is a reduction in the impairment loss as a result of an event occurring after the initial recognition of the loss, the impairment should be reversed through earnings. The reversal is recognized up to the amount that would be recorded if the loss had not been initially recognized.

Impairment losses and related reversals are recorded in earnings mainly under the captions ''Impairment of accounts receivable ((losses)/reversals)''.

(c) Derecognition of financial assets and liabilities

The Company derecognizes financial assets when its contractual rights to obtain the asset's cash flows expire, or when it transfers to another entity all the significant risks and rewards associated with the ownership of such assets. We also derecognize financial assets transferred in respect to which the Company has retained some significant risks and benefits, in the case that control over them has been assigned. The Company derecognizes financial liabilities only when the corresponding obligation is settled, cancelled or expired.

3.25. Main accounting estimates and judgements

To prepare the standalone financial statements under NCRF, the Company's Board of Directors uses estimates and assumptions that affect in the application of accounting policies and the amounts reported. Estimates and judgements are continually evaluated and are based on historical experience and on other factors including expectations of future events that are believed to be reasonable under the circumstances on which the estimate was based, or as a result of new information or more experience.

The most significant accounting estimates reflected in the financial statements are the following:

(a) Post-employment benefits

The present value of liabilities for post-employment benefits is calculated based on actuarial methodologies, which use certain actuarial assumptions that are reviewed annually by the Company. Any change in these assumptions will impact the carrying value of liabilities. The main assumptions used are described in Note 11.

(b) Analysis of goodwill impairment

The Company tests annually whether goodwill has suffered any impairment. The recoverable amounts of cash-generating assets are determined based on value-in-use calculations. The use of this method requires the estimate of future cash flows expected to arise from the continuing operation of the cash generating asset, the choice of a growth rate to extrapolate cash flow projections and the estimate of a suitable discount rate for each cash generating asset. The main assumptions used in the goodwill analysis are disclosed in Note 8.

(c) Useful life of tangible fixed assets

The Company used estimates in order to determine to the useful life of tangible fixed assets.

(d) Provisions recognition

The Company is party to several legal proceedings in progress for which, based on the opinion of its lawyers, judgments are made to determine the recognition of any necessary provisions to meet these contingencies.

3. Main accounting policies, judgments and estimates (Continued)

(e) Impairment recognition

Impairment on accounts receivable are calculated mainly based on receivables seniority, the clients risk profile and their financial situation.

(f) Determining the fair value of assets measured by revaluation model

The Company uses the revaluation model to measure the book value of the asset classes ''Land and natural resources'', ''Buildings and other constructions'' and the ''Telecommunication infrastructure'' included under the caption ''Basic equipment'' under tangible fixed assets. In order to assess the fair value of real estate properties included under the assets classes ''Land and natural resources'' and ''Buildings and other constructions'', the Company uses external appraisers to determine their value based on certain specific indicators related to the real estate market. In order to assess the revalued amount of the asset class ''Telecommunication infrastructure'', the Company applied the cost replacement method based on current and observable prices of materials and construction work related to the installation underground of the telecommunication infrastructure.

Estimates used are based on the best information available during the preparation of financial statements, although future events, neither controlled nor foreseeable by the Company, could occur and have an impact on those estimates. In accordance with ''NCRF 4 Accounting Policies, Changes in Estimates and Errors'' (''NCRF 4''), changes to these estimates that occur after the date of the financial statements are recognized in net income, using a prospective methodology. For this reason and given the degree of uncertainty, real results of the transactions in question may differ from the corresponding estimates.

3.26. Events occurred after the balance sheet date

Events after the balance sheet date that provide additional information about conditions existing at the balance sheet date are reflected in the financial statements. Events after the balance sheet date that provide information about conditions that occur after the balance sheet date are not reflected in the financial statements, but are disclosed in the notes to the financial statements, if material.

4. Cash flows

For the purposes of the cash flow statement, the caption ''Cash and cash equivalents'' includes cash, bank deposits immediately available and other short-term investments with high liquidity and with initial maturities up to three months, net of bank overdrafts.

The Company is exposed to a liquidity risk if its sources of funding, including cash balance, operating cash inflows, divestments and cash flows obtained from financing operations, do not match with our financing needs, such as operating and financing outflows, investments, shareholder remuneration and debt repayments. Based on the cash flows generated by its operations, on the available cash and in the possibility to obtain financing from Portugal Telecom under the centralized cash management system implemented in the Group, the Company believes that it is able to meet its obligations.

The cash flow statement was prepared in accordance with *''NCRF 2 Statement of Cash Flows''*, which includes the following:

(a) Cash receipts of income taxes

The Company is part of the special taxation regime for Groups of companies adopted by Portugal Telecom, and as such income taxes and withholding taxes by third parties are recorded on the balance sheet as payables and receivables from Portugal Telecom (Note 12). In this context, the Company paid in 2013 an amount of Euro 6,289,893 and received in 2012 an amount of Euro 35,940,339.

(Amounts in Euro)

4. Cash flows (Continued)

As a result of the merger of PT Prime company undertaken at the end of 2011, effective as from 1 January, and because PT Comunicações presented a tax loss in 2011, the Company recovered in 2012 the payments on account made by PT Prime in 2011, amounting to Euro 38,662,510, which explains the high amount received in 2012.

(b) Cash receipts resulting from the disposal of financial investments

In 2013, this caption includes basically the proceeds obtained from the disposals of the investments in CTM and PT Brasil, amounting to Euro 35,966,391 and Euro 8,869, respectively (Note 10) and the amount of Euro 500,000 which refers to the last part related with the disposal of the investment in WT Vision achieved in 2009.

(c) Cash receipts resulting from loans granted

In 2013, this caption relates to reimbursement, amounting to Euro 340,000,000 (Note 12.1), regarding loans granted in prior years to MEO, SA.

(d) Dividends received

In 2013 and 2012, PT Comunicações received dividends from the following companies:

	2013	2012
	Euro	
CTM[(i)]	2,703,029	2,625,352
Meo, SA (Nota 10)	—	235,479,275
Multicert—Serviços de Certificação Electrónica, S.A. (Nota 10)	—	117,198
Infonet Portugal—Serviços de Valor Acrescentado, Lda. (Nota 10)	—	51,328
	2,703,029	**238,273,153**

(i) The amounts received from this affiliated company differed from the attributable amounts of Euro 2,759,950 in 2013 and Euro 2,700,796 in 2012 (Note 10), as a result of exchange rate differences between the attribution and payment dates.

(Amounts in Euro)

4. Cash flows (Continued)

(e) Payments resulting from financial investments

In 2013 and 2012, this caption is composed as follows:

	2013	2012
	Euro	
Acquisition of Sportinveste Multimédia (Note 20)	32,618,669	—
Acquisition of Yunit (''Yunit'') (Note 1 b))	2,228,329	—
Constitution of Auto Sapo joint venture (Note 10)		
—Realization of share capital	25,000	—
—Additional paid capital contributions	150,000	—
Advances for the aquision of RETI (Note 10)	—	1,094,382
Acquisition of Fibroglobal—Comunicações Electrónicas, S. A. (''Fibroglobal'')[(i)]	—	1,000,000
Acquisition of PT Blueclip—Serviços de Gestão, S. A. (''PT Blue Clip'') (Note 10)	—	50,000
Other	10	15,990
	35,022,008	**2,160,372**

(i) During the year 2012, PT Comunicações subscribed a share capital increase of this company for a total amount of Euro 1,000,000, a result of which obtained a 5% interest in Fibroglobal, which was recorded under the caption ''Financial investments—other methods''.

(f) Cash receipts (payments) related to loans obtained

In 2013 and 2012, cash receipts from loans obtained, net of cash payments from loans obtained, has the following composition:

	2013	2012
	Euro	
Receipts (payments) obtained under commercial paper programmes	(592,000,000)	1,092,000,000
Loans granted by PT Portugal (Note 23.1)	252,000,000	—
Intercompany loans within centralized cash management	224,360,440	(472,161,084)
Leases and other loans obtained	(16,650,977)	(21,390,512)
Payments to the ''Caixa Geral de Aposentações''[(i)]	—	(454,316,000)
	(132,290,537)	**144,132,404**

(i) As at 31 December 2010 and following the transfer of unfunded regulatory pension obligations, the Company had recognized an account payable to the Portuguese State for the amount of Euro 921.7 million. Of this outstanding amount, the Company repaid Euro 17.4 million and Euro 450.0 million in January and December 2011, respectively, and the remaining amount due of Euro 454.3 million was repaid in December 2012.

(g) Cash and cash equivalents

In 2013 and 2012, this caption is composed as follows:

	2013	2012
	Euro	
Cash	1,078,695	14,669,035
Bank deposits immediately available	20,658,318	6,496,946
Cash and bank deposits	**21,737,013**	**21,165,981**

(Amounts in Euro)

5. Changes in accounting policies and estimates and errors

During the year ended 31 December 2013, the Company adopted the revised version of IAS 19 *Employee Benefits* (''IAS 19''), issued in June 2011 and applicable for years beginning on or after 1 January 2013. The revised version of this standard was adopted since the Portuguese local standard NCRF 28 *Employee Benefits* states that the accounting for post-retirement defined benefits should be based on IAS 19.

As a result of the adoption of the amendments to IAS 19, the tables below present the adjustments made to the previously reported Statements of Financial Position for the year ended 31 December 2012:

Balance sheet as at 31 December 2012

The additions occurred in 2013 and 2012 under the captions ''Basic equipment'', ''Administrative equipment'' and ''Tangible fixed assets in progress'' relate primarily to the acquisition of software, network infrastructure and terminal equipment focused mainly on the Pay-TV business.

6. Tangible fixed assets (Continued)

6.2. Revaluations

In 2008, PT Comunicações has changed the accounting policy on the valuation of real estate assets and ducts infra-structure, from the cost model to the revaluation model. The revaluations of real estate assets and ducts infra-structure were recorded as at 30 June and 30 September 2008 and resulted in the revaluation of those assets by Euro 208,268,320 and Euro 866,764,702, respectively. PT Comunicações, following the adoption of the SNC, maintained the accounting policy to use the revaluation model for these classes of assets, under which shall compute revaluation amounts, at maximum, every three years, and evaluates between those 3 year periods the possible existence of evidence that might result in a significant change in the revalued amount of those assets.

The determination of the fair value of real estate properties was made by an independent appraiser based primarily on: (i) observable prices of recent market transactions in an active market; (ii) profitability method for commercial and administrative real estate; and (iii) the cost of acquiring or producing similar real estate with the same purpose for technical buildings. Under the first methodology, the main assumptions used in 2008 were the discount rate (average of 8%) and the monthly rent per square meter (average of Euro 6).

The determination of the fair value of the ducts infra-structure was made internally based on the replacement cost approach. This valuation process was based primarily on: (i) current and observable prices of materials and construction work related to the installation of the ducts underground; (ii) the nature of the soil and road surface where ducts are installed, which has an impact on the construction cost; (iii) internal costs directly attributable to the construction of the ducts infra-structure network; (iv) a depreciation factor, in order to ensure that the replacement cost is consistent with the remaining useful life of the assets revalued; and (v) a technological factor, which reflects the technological changes occurred, namely related to the kinds of ducts which no longer exist and were replaced by other ones. Generally, the prices of materials and construction work together with other qualitative assumptions referred to above resulted in a valuation of the ducts infra-structure in 2008 which reflects an average cost per meter of duct between Euro 58 and Euro 119, depending on the area where the infra-structure is located.

In accordance with the Company's accounting policy to revalue these assets every three years, PT Comunicações performed another revaluation of the real estate assets and transmission infrastructure in 2011, through the same methodology described above. These revaluations were effective as at 31 December 2011 and resulted in a net reduction of tangible assets amounting to Euro 131,418,996, of which Euro 126,167,563 was recognized directly in shareholders' equity, under the caption ''Revaluation surplus'', and an impairment loss of Euro 5,251,433 was recognized in earnings.

The split of these impacts between real estate and telecommunication ducts infrastructure is as follows:

- A reduction in the carrying value of the telecommunication infrastructure amounting to Euro 189,372,570, recognized directly in shareholders' equity in order to reduce the existing revaluation reserves regarding these assets, which is primarily explained by a decrease in the construction cost and also technological improvements, leading to a reduction in the average cost per meter of duct to between Euro 42 and Euro 70, depending on the area where the infra-structure is located; and
- A net increase in the carrying value of real estate assets amounting to Euro 57,953,574, including a gain of Euro 63,205,007 recorded directly in shareholders' equity and a loss of Euro 5,251,433 recognized in the Income Statement. The increase in the carrying value of real estate assets recognized as a result of this revaluation reflects mainly the depreciation expenses recorded over the last three years, which more than offset the reduction in the fair value of these assets. Regarding the main assumption related to this revaluation, the average monthly rent per square meter for the real estate assets that were revalued in both 2008 and 2011 remained broadly stable at Euro 6,

(Amounts in Euro)

6. Tangible fixed assets (Continued)

although the overall average monthly rent per square meter increased to Euro 7, as a result of real estate assets acquired in 2009 and 2010.

The amortization of the surplus resulting from the revaluation of real estate properties and ducts infra-structure amounted to approximately Euro 9 million and Euro 32 million in 2013, respectively, and to Euro 10 million and Euro 32 million in 2012, respectively. If these assets had been carried under the cost model, the carrying amounts of the real estate properties and the ducts infra-structure as of 31 December 2013 would have been reduced by approximately Euro 178 million and Euro 466 million, respectively.

For other classes of assets that were previously revalued to the date of transition to NCRF, the Company opted, under the adoption of new accounting standards, to consider the book value at the date of transition as deemed cost, as permitted by the exception foreseen in paragraph 10 of NCRF 3, so that these assets are measured according to the cost model.

In accordance with the applicable legislation, a portion (40%) of the increase in depreciation resulting from legal revaluations made in previous years, and the entire increase in depreciation resulting from revaluations recognized in 2008 do not constitute a cost for the purpose of determining corporate income tax payable (except the revaluations resulting from Decree-Law no. 126/77 of April 2, which are included in their entirety). Consequently, a deferred tax liability was recorded corresponding to the revaluation surplus to be realized (Note 15).

6.3. Other situations related to tangible fixed assets

During the years ended 31 December 2013 and 2012, the following expenses were included in the carrying value of tangible assets and intangible assets in progress:

	2013	2012
	Euro	
Materials consumed	4,062,335	3,094,392
Wages and salaries	39,920,165	33,646,133
Other expenses and losses	5,654,791	5,323,514
	49,637,291	**42,064,039**

The nature of the main projects that include own work capitalized relates to the planning, supervision and monitoring of installation of terminal equipment, namely IPTV equipment and Fiber-to-the-Home (''FTTH'').

For the net carrying value of tangible fixed assets as at 31 December 2013, we note the following:

- There are buildings installed in properties of third parties in the total amount of Euro 7,761,392;
- There are assets of PT Comunicações composed mainly of real estate, that were not registered under the Company's name amounting to Euro 8,598,796, of which Euro 1,503,353 are registered under the name of PT SGPS;
- The Company has tangible fixed assets located overseas with a net book value of Euro 11,867,428, including primarily participation in submarine cable consortiums;
- The tangible fixed assets which, under the terms of article 5 of the Annex to Decree-Law no. 31/2003 of February 17 which constituted the Bases for the Concession of Public Telecommunications Service (Note 1), are subject to the Concession, had a carrying value of Euro 1,709,598,507.

(Amounts in Euro)

7. Investment properties

During the years ended 31 December 2013 and 2012, movements occurred in this caption were as follows:

	2013	2012
	Euro	
Gross value

Net value	**12,987,051**	**8,863,837**

Land and buildings that were not used in operating activities as at 31 December 2013 and 2012 were classified under this caption, according to the accounting policy adopted by the Company.

These assets are stated at acquisition cost less accumulated depreciation and impairment losses, if any. PT Comunicações makes periodic valuations of these assets. As at 31 December 2013, the real estate book value with acquisition cost exceeding Euro 50,000 amounted to approximately Euro 12.8 million, whereas the corresponding market value amounted to Euro 14.3 million.

During the years ended 31 December 2013 and 2012, PT Comunicações has obtained rental income from this real estate amounting to Euro 620,062 and Euro 638,953, respectively , which were classified under the caption ''Other income and gains'' (Note 32).

8. Goodwill

The composition of goodwill as at 31 December 2013, computed following the acquisition of subsidiaries, some of which were subsequently merged into the Company, is as follows:

Entity	Year of acquisition	Carrying value
		Euro
Mobile Business (Meo, SA)	2010	2,145,416,586
Wireline Business		
Internet Business / portal (ex- PT.Com)	2007	560,447,103
Corporate Business (ex- PT Prime)	2007	235,323,593
International Business (ex- Marconi)	2000	41,255,121
		2,982,442,403

For the purposes of impairment tests, goodwill was allocated to cash generating units. The recoverable amount was determined from the respective value in use through the discounted cash flows methodology, using a cash flow forecast of a four year period, which was prepared internally. The discount rate applied to projected cash flows, which was determined taking into account the risk

(Amounts in Euro)

8. Goodwill (Continued)

associated with each business, and the growth rates used to extrapolate cash flow projections beyond the period covered by the forecasts prepared internally were as follows:

Assumptions	Internet Business	Corporate Business
Growth rate	1.0% - 1.5%	1.0% - 1.5%
Discount rate	7.7% - 8.7%	7.7% - 8.7%

The recoverable amount of each cash generating unit was determined for the minimum and maximum values listed in the table above and the Company's management concluded that, as at 31 December 2013, the book value of the cash generating unit, including goodwill, did not exceed its recoverable amount.

9. Intangible assets

During the years ended 31 December 2013 and 2012, movements occurred in intangible assets were as follows:

	2013			
	Industrial property and other rights	Other intangible assets	Intangible assets in progress	Total

In 2013 and 2012, additions under the caption ''Industrial property and other rights'' relate primarily to the acquisition of software licenses regarding projects to develop new applications and features in the commercial, financials and logistic areas.

As at 31 December 2013, the net book value of the caption ''Industrial property and other rights'' includes mainly:

– An amount of Euro 170 million related to the acquisition of full ownership of the Basic Network by PT Comunicações to the Portuguese State, concluded in December 2002, which corresponds to the gross value capitalized in 2002 amounting Euro 339.9 million net of accumulated depreciation;

– An amount of Euro 9.2 million related to a contract entered into by PT Comunicações in 2007 and 2009 for the acquisition of satellite capacity rights until 2015, which was recorded as a financial lease; and

– An amount of Euro 22.4 million, corresponding to the TDT licenses recorded in 2011 (Note 1 (a)).

In 2013 and 2012, the Company performed innovation, research and development activities under which the following expenses and fixed assets were recorded:

	2013	2012
	Euro	
Tangible fixed assets	60,176,061	72,940,479
Intangible assets	563,532	1,424,785
Other operation expenses	14,565,478	10,796,763
Total	**75,305,071**	**85,162,027**

(Amounts in Euro)

10. Financial investments-equity method of accounting

During the years ended 31 December 2013 and 2012, the movements occurred under this caption were as follows:

	2013

(a) On 3 May 2012, PT Comunicações concluded the acquisition of an investment in RETI that was previously held by TVI, through the payment of the fifth and last installment, amounting to Euro 1,094,382 (Note 4), that was considered in an agreement entered in December 2009, and following the amounts already paid in previous years as advances for financial investments, for the total amount of Euro 6,771,730. These amounts were fully adjusted based on the Company's

(Amounts in Euro)

10. Financial investments-equity method of accounting (Continued)

expectation that RETI's analogical network was redundant considering the network of PT Comunicações. As a result of the acquisition of this investment, the Company recorded an investment of Euro 71,699, corresponding to the shareholders' equity of the acquired company, and recorded a goodwill of Euro 7,794,413, corresponding to the difference between the acquisition price of Euro 7,866,112 and the financial investment. Both the goodwill and the impairment losses recognized in previous years over payments made or to be made under the agreement entered into in December 2009, amounting to Euro 7,866,112, were transferred to net income. In December 2012, the Board of Directors of both companies approved the merger of RETI into PT Comunicações as from 3 May 2012 and, as such, the Company eliminated the financial investment in RETI, amounting to Euro 71,699, and recorded in its balance sheet the assets and liabilities of RETI as of that date that were transferred to PT Comunicações.

(b) In the year ended 31 December 2012, the Company's investment in CTM amounting to Euro 5,069,882 (Note 20 a)), representing 3% of the capital of that company, was classified as a non-current asset held for sale. The disposal of this investment was completed in June 2013.

In 2013 and 2012, increases the gross value of financial investments accounted for by the equity method gross were as follows:

	2013	2012
	Euro	
Aquisition of Yunit—loans granted	2,228,328	—
Aquisition of INESC (Note 1) (b)		
Share capital	1,995,192	—
Additional paid in capital contributions	888,882	—
Constitution of Auto Sapo (Notes 1 and 4 (e))		
Share capital	25,000	—
Additional paid in capital contributions	150,000	—
Aquisition of Multicert (Notes 1 and 4 (e))	10	—
Advances for the aquision of financial investments (Note 4 (e))	—	1,094,382
Acquisition of PT Blueclip (Note 4 (e))	—	50,000
	5,287,412	**1,144,382**

During the year ended 31 December 2013, the reduction amounting to Euro 9,390 in gross value of investments in subsidiary companies relates sale of the investment in PT Brasil, in the amount of Euro 8,869 (Notes 1 (b) and 4 (b)), has been recorded an accounting loss on disposal in the amount of Euro 521 (Note 27).

In 2013 and 2012, the movements occurred in investments in subsidiaries and associated companies resulting from the application of the equity method of accounting were recorded as follows:

	2013	2012
	Euro	
Gains in affiliated companies net (Note 27)	201,666,539	120,535,593
Adjustments to financial assets (Note 21.5)	(541,439,013)	(301,338,547)
	(339,772,474)	**(180,802,954)**

During the year ended 31 December 2013 were not paid dividends by subsidiaries and associated companies, accounted for by equity method. The detail of dividends attributed by subsidiaries and associated companies in 2012 is as follows (Note 4):

	2012
	Euro
Meo, SA	235,479,275
CTM	2,700,796
Multicert	117,19 8
Infonet	51,328
	238,348,597

(Amounts in Euro)

11. Post-retirement benefits

As referred to in Note 3, PT Comunicações is responsible for the payment of post-retirement benefits under defined benefit plans, which include pensions and pension supplements to retired and active employees, healthcare services after retirement age and salaries to suspended and pre-retired employees.

The actuarial valuations of Portugal Telecom's defined benefit plans as at 31 December 2013, 2012 and 2011 were computed based on the projected unit credit method and considered the following main financial and demographic actuarial assumptions:

	2013	2012	2011
		Euro	
Financial assumptions			
Discount rate for obligations related to:			
Pension supplements	3.00%	3.00%	4.75%
Salaries to suspended and pre-retired employees	2.00%	2.00%	3.75%
Healthcare	4.00%	4.00%	4.75%
Salary growth rate for obligations related to:			
Pension supplements and healthcare	1.75%	1.75%	1.75%
Salaries to suspended and pre-retired employees[(i)]	0.00% - 1.75%	0.00% - 1.75%	0.00% - 1.75%
Pension growth rate	GDP linked	GDP linked	GDP linked
Social Security sustainability factor	Applicable	Applicable	Not applicable
Inflation rate	2.00%	2.00%	2.00%
Healthcare cost trend growth rate	3.00%	3.00%	3.00%

(i) For salaries payable until 2017, the salary growth rate ranges from 0% to 1% depending on the amount of the salary. As from 2018, the salary growth rate is 1.75% for all situations.

	2013	2012	2011
		Euro	
Demographic assumptions			
Mortality tables for active beneficiaries:			
Males	PA (90)m adjusted	PA (90)m adjusted	AM (92)
Females	PA (90)f adjusted	PA (90)f adjusted	AF (92)
Mortality tables for non-active beneficiaries:			
Males	PA (90)m adjusted	PA (90)m adjusted	PA (90)m adjusted
Females	PA (90)f adjusted	PA (90)f adjusted	PA (90)f adjusted
Retirement age[(i)]	65 - 66	65	65
Disability table (Swiss Reinsurance Company)	25%	25%	25%
Active employees with spouses under the plan	35%	35%	35%
Turnover of employees	Nil	Nil	Nil

(i) In 2013, the Portuguese retirement age changed from 65 to 66 years old, applicable for the majority of Portugal Telecom's beneficiaries under post retirement benefit plans, although the retirement at 65 years old is still applicable for certain other employees.

11. Post-retirement benefits (Continued)

The discount rate was computed based on long-term yield rates of high-rating bonds as of the date of the Balance sheet for durations comparable to the liabilities for pensions and pension supplements, salaries and health care benefits (between 4 and 15 years).

After the adoption of the amendment of IAS 19, the rate of return on long-term fund assets is the same as the discount rate used.

Salary growth rate was established in accordance with Group policy for wages and salaries and pension growth rates and the sustainability factor was established in line with Portuguese Government information.

Demographic assumptions considered by Portugal Telecom are based on mortality tables generally accepted for actuarial valuation purposes, with these tables being periodically adjusted to reflect the actual mortality rates observed among the plan participants.

In 2013 and 2012, the total impact of changes in actuarial assumptions a net losses of Euro 100,906,000, and Euro 136,212,106 (Notes 11.7), respectively, and was recognized directly in shareholders' equity.

The impact of an increase by 25 bp on the average discount rate actuarial assumption would be a decrease of the responsibilities for post retirement benefits by approximately Euro 23 million as at 31 December 2013, while the impact of an increase (decrease) in the health care cost trend rate by 1% would be an increase (decrease) of the responsibilities for post retirement benefits by approximately Euro 69 million (Euro 56 million) as at 31 December 2013.

The impact of an increase (decrease) by 1% in the discount rate actuarial assumption would be a increase (decrease) of post retirement benefit costs in the year 2013 by approximately Euro 8 million, corresponding to the increase (decrease) in net interest cost.

11.1. Supplement benefits

As referred to in Note 3, prior to the transfer of pension obligations to the Portuguese State, PT Comunicações was responsible for the payment of regulatory pensions and pension supplements to retired and active employees, and is no longer responsible for the payment of regulatory pensions following that transfer. These liabilities, which were estimated based on actuarial valuations, are as follows:

a) Retirees and employees of Companhia Portuguesa Rádio Marconi, SA (''Marconi'', a company merged into PT Comunicações in 2002) hired prior to 1 February 1998 are entitled to a supplemental pension benefit (''Marconi Complementary Fund''). In addition, PT Comunicações contributes to the fund ''Fundo de Melhoria Marconi'' with 1.55% of the salaries paid to these employees, which is responsible to pay the additional pension supplement.

b) Retirees and employees of TLP and TDP hired prior to 23 June 1994 are entitled to receive a pension supplement from PT Comunicações, which complements the pension paid by the Portuguese social security system.

c) On retirement, PT Comunicações pays a lump sum gratuity of a fixed amount which depends on the length of service completed by the employee.

Employees hired by PT Comunicações or any of its predecessor companies after the dates indicated above are not entitled to these benefits, as they are covered by the general Portuguese Government social security system.

As at 31 December 2013 and 2012, plans from PT Comunicações covered 19,763 and 19,814 beneficiaries, respectively, of which approximately 64% and 63%, are non active, respectively.

(Amounts in Euro)

11. Post-retirement benefits (Continued)

Based on the actuarial reports, the pension benefit obligation and the fair value of the pension funds as at 31 December 2013 and 2012 were as follows:

	2013	2012
	Euro	
Projected benefit obligations related to pension, pension supplements and gratuities	116,358,866	126,751,790
Pension funds assets at fair value	(94,660,571)	(99,529,441)
Net liabilities recognized (Note 11.4)	**21,698,295**	**27,222,349**

During the years ended 31 December 2013 and 2012, the movement in the projected benefit obligations was as follows:

Cash, treasury bills, short- term stocks and other assets(ii)	15,751,190	16.6%	16,860,001	16.9%
	94,660,571	**100.0%**	**99,529,441**	**100.0%**

(i) The fair value of equity investments and bonds is quoted on active markets.

(ii) This caption includes term deposits amounting to Euro 5 million and 6 million as at 31 December 2013 and 2012, respectively.

Portugal Telecom is exposed to risks related to the changes in the fair value of the plan assets associated with Portugal Telecom's post-retirement defined pension supplement plans. The main purpose of the established investment policy is capital preservation through five main principles: (1) diversification; (2) stable strategic asset allocation and disciplined rebalancing; (3) lower exposure to currency fluctuations; (4) specialized instruments for each class of assets; and (5) cost control.

(Amounts in Euro)

11. Post-retirement benefits (Continued)

During the years ended 31 December 2013 and 2012, the movement in the plan assets was as follows:

	2013	2012
	Euro	
Opening balance of the plan assets	**99,529,441**	**98,480,548**
Actual return on assets	3,660,130	9,341,252
Payments of benefits	(9,008,399)	(9,392,359)
Contributions made by the Company (Note 11.5)	479,399	1,100,000
Closing balance of the plan assets	**94,660,571**	**99,529,441**

A summary of the components of the pension net cost recorded in the years ended 31 December 2013 and 2012 is presented below:

	2013	2012
	Euro	
Service cost	562,000	442,893
Net interest cost	614,000	885,671
Prior years' service gains recognized in the period	(2,168,000)	—
Current pension cost (Notes 11.4 and 11.6)	**(992,000)**	**1,328,564**
Work force reduction program	498,000	87,682
Total cost of redundancy programme (Notes 11.4 and 11.6)	**498,000**	**87,682**
Total pension cost	**(494,000)**	**1,416,246**

Actuarial gains and losses, which result from changes in actuarial assumptions and from differences between those actuarial assumptions and actual data, are recognized directly in shareholders' equity. During the years ended 31 December 2013 and 2012, the movement in accumulated net actuarial losses was as follows:

	2013	2012
	Euro	
Opening balance	**126,801,616**	**121,803,871**
Change in actuarial assumptions (Note 11.7)	(1,044,000)	17,334,547
Differences between actual data and actuarial assumptions (Note 11.7)		
Pension benefit obligation related[(a)]	(1,914,000)	(7,455,642)
Asset related	(807,130)	(4,881,160)
Closing balance	**123,036,486**	**126,801,616**

(a) Differences between actual data and actuarial assumptions related to the PBO, results mainly from updated information regarding beneficiaries.

11.2. Health care benefits

As referred to in Note 3, PT Comunicações is responsible for the payment of post-retirement health care benefits to certain employees, suspended employees, pre-retired employees, retired employees and their eligible relatives. Health care services are rendered by PT-ACS, which was incorporated with the sole purpose of managing the Company's Health Care Plan.

This plan, sponsored by PT Comunicações, includes all employees hired by PT Comunicações until 31 December 2000 and by Marconi until 1 February 1998.

(Amounts in Euro)

11. Post-retirement benefits (Continued)

As at 31 December 2013 and 2012, healthcare plans from PT Comunicações covered 23,402 and 23,894 beneficiaries related to employees and former employees, of which approximately 77% and 76% were non-active, respectively. In addition, as at 31 December 2013 and 2012, these plans also covered 10,265 and 10,850 beneficiaries related to relatives of employees and former employees.

The financing of the Health Care Plan is assured by defined contributions made by participants to PT ACS and the remainder by PT Comunicações, which incorporated a fund in 2004 that is managed independently for this purpose.

Based on the actuarial reports, the defined benefit obligations and the fair value of the health care plan assets as at 31 December 2013 and 2012 are as follows:

	2013	2012
	Euro	
Projected benefit obligations	375,657,623	374,474,961
Plan assets at fair value	(291,667,072)	(299,865,329)
Present value of unfunded obligations (Note 11.4)	**83,990,551**	**74,609,632**

During the years ended 31 December 2013 and 2012, the movement in the projected benefit obligations was as follows:

	2013	2012
	Euro	
Opening balance of the projected benefit obligations	**374,474,961**	**351,843,072**

(a) As at 31 December 2013 and 2012, this caption corresponds to investments in shares of Banco Espírito Santo, which is quoted on an active market.

(b) As at 31 December 2013 and 2012, this caption includes mainly investments in bonds of Portugal Telecom, which is quoted on an active market.

(c) As at 31 December 2013 and 2012, this caption includes investments in the private equity funds ''Ongoing International Capital Markets'' and ''Ongoing International Private Equity'' totalling Euro 95 million and Euro 104 million, respectively, which are managed by Global investment Opportunities SICAV. In addition, this caption also includes term deposits

(Amounts in Euro)

11. Post-retirement benefits (Continued)

amounting to Euro 14 million and Euro 11 million as at 31 December 2013 and 2012, respectively, and receivables from customers of PT Group companies totalling Euro 15 million as at 31 December 2013, following an agreement entered into with those companies for the transfer of those receivables to the fund assets.

During 2013 and 2012, the movement in the plan assets was as follows:

	2013	2012
	Euro	
Opening balance of the plan assets	**299,865,329**	**246,214,842**
Actual return on assets	13,840,743	74,473,916
Refunds (Note 11.5)[(a)]	(22,039,000)	(20,823,429)
Closing balance of the plan assets	**291,667,072**	**299,865,329**

(a) This caption relates to refunds of expenses paid by PT Comunicações on behalf of PT ACS.

A summary of the components of the net periodic post-retirement health care cost in 2013 and 2012 is presented below:

	2013	2012
	Euro	
Service cost	3,565,000	2,988,477
Net interest cost	2,676,000	5,017,341
Current cost (Notes 11.4 and 11.6)	**6,241,000**	**8,005,818**
Work force reduction program costs	1,324,000	(163,036)
Total cost of redundancy programme (Notes 11.4 and 11.6)	**1,324,000**	**(163,036)**
Health care cost	**7,565,000**	**7,842,782**

Actuarial gains and losses, which result from changes in actuarial assumptions and from differences between those actuarial assumptions and actual data, are recognized directly in shareholder's equity. During the years ended 31 December 2013 and 2012, the movement in accumulated net actuarial losses was as follows:

	2013	2012
	Euro	
Opening balance	**277,244,343**	**317,951,850**
Change in actuarial assumptions (Note 11.7)	(1,073,000)	37,439,494
Differences between actual data and actuarial assumptions (Note 11.7):		
Health care benefit obligation related	1,513,000	(14,981,745)
Assets related	(1,845,743)	(63,165,256)
Closing balance	**275,838,600**	**277,244,343**

11.3. Pre-retired and suspended employees

As mentioned in Note 3, PT Comunicações is also responsible for the payment of salaries to suspended and pre-retired employees until they reach the Portuguese social security retirement age. As at 31 December 2013 and 2012, there were 5,304 and 5,441 suspended and pre-retired employees, respectively.

(Amounts in Euro)

11. Post-retirement benefits (Continued)

These liabilities are not subject to any legal funding requirement, therefore the monthly payment of salaries is made directly by PT Comunicações.

During the years ended 31 December 2013 and 2012, the movement in the projected benefit obligation was as follows:

	2013	2012
	Euro	
Opening balance of the projected benefit obligation	**727,258,078**	**779,921,779**
Benefits paid by the Company (Notes 11.4 and 11.5)	(156,387,158)	(159,183,194)
Interest cost (Notes 11.4 e 11.6)	13,222,000	25,657,325
Work force reduction costs (Notas 11.4 e 11.6)	108,227,000	(246,969)
Net actuarial losses (Notes 11.4 and 11.7)	143,956,873	81,313,510
Transfers between plans (Note 11.1)	—	(204,373)
Closing balance of the projected benefit obligation (Note 11.4)	**836,276,793**	**727,258,078**

Actuarial gains and losses, which result from changes in actuarial assumptions and from differences between those actuarial assumptions and actual data, are recognized directly in shareholders' equity. During the years ended 31 December 2013 and 2012, the movement in accumulated net actuarial losses was as follows:

	2013	2012
	Euro	
Opening balance	**164,466,120**	**83,152,610**
Change in actuarial assumptions (Note 11.7)	103,023,000	81,438,065
Differences between actual data and actuarial assumptions (Note 11.7)	40,933,873	(124,555)
Closing balance	**308,422,993**	**164,466,120**

(Amounts in Euro)

11. Post-retirement benefits (Continued)

11.4. Responsibilities for post-retirement benefits

The movements observed in post-retirement benefit obligations, net of the related asset funds, during the years ended 31 December 2013 and 2012 were as follows:

	Pension benefits (Note 11.1)	Health care benefits (Note 11.2)	Salaries to pre-retired and suspended employees (Note 11.3)	Total
			Euro	
Balance as at 31 December 2011	**22,687,628**	**105,628,230**	**779,921,779**	**908,237,637**
Transfers between plans	204,373	—	(204,373)	—
Net periodic pension cost/(gain) (Note 11.6)	1,328,564	8,005,818	25,657,325	34,991,707
Work force reduction costs (Note 11.6)	87,682	(163,036)	(246,969)	(322,323)
Payments, contributions and refunds (Note 11.5)	(2,083,643)	1,846,127	(159,183,194)	(159,420,710)
Net atuarial losses (gains) (Notes 11.7 and 11.8)	4,997,745	(40,707,507)	81,313,510	45,603,748
Balance as at 31 December 2012	**27,222,349**	**74,609,632**	**727,258,078**	**829,090,059**
Net periodic pension cost/(gain) (Note 11.6)	(992,000)	6,241,000	13,222,000	18,471,000
Work force reduction costs (Note 11.6)	498,000	1,324,000	108,227,000	110,049,000
Payments, contributions and refunds (Note 11.5)	(1,264,924)	3,221,662	(156,387,158)	(154,430,420)
Net atuarial losses/(gains) (Notes 11.7 and 11.8)	(3,765,130)	(1,405,743)	143,956,873	138,786,000
Balance as at 31 December 2013	**21,698,295**	**83,990,551**	**836,276,793**	**941,965,639**

Certain post-retirement benefit plans have a surplus position and therefore were presented in the Balance sheet separately from those plans with a deficit position. As at 31 December 2013 and 2012, net post-retirement obligations were recognized in the Balance sheet as follows:

	2013	2012
	Euro	
Plans with a deficit position:		
Pensions	23,532,295	28,855,189
Healthcare	83,990,551	74,609,632
Salaries to pre- retired and suspended employees	836,276,793	727,258,078
	943,799,639	**830,722,899**
Plans with a surplus position:		
Pensions	(1,834,000)	(1,632,840)
	(1,834,000)	**(1,632,840)**
	941,965,639	**829,090,059**

(Amounts in Euro)

11. Post-retirement benefits (Continued)

11.5. Cash flows relating to post-retirement benefit plans

During the years ended 31 December 2013 and 2012, the payments and contributions regarding post-retirement benefits were as follows:

	2013	2012
	Euro	
Pensions		
Contributions to the funds (Note 11.1)	479,399	1,100,000
Payments of pension supplements (Note 11.1)	785,525	983,643
Sub total (Note 11.4)	**1,264,924**	**2,083,643**
Health care		
Refunds (Note 11.2)	(22,039,000)	(20,823,429)
Payments of health care expenses (Note 11.2)	18,817,338	18,977,302
Sub total (Note 11.4)	**(3,221,662)**	**(1,846,127)**
Other payments		
Payments of salaries to pre- retired and suspended employees (Notes 11.3 and 11.4)	156,387,158	159,183,194
Termination payments (Note 11.6)	2,751,916	1,482,772
Service cost related to liabilities tranferred to the Portuguese State[(a)]	21,751,776	25,482,982
Sub total	**180,890,850**	**186,148,948**
	178,934,112	**186,386,464**

(a) This caption corresponds to a fixed contribution paid by PT Comunicações to the Portuguese Social Security System relating to the annual service of active and suspended employees that were entitled to pension benefits under the Company's post-retirement benefit plans that were transferred to the Portuguese State in December 2010.

11.6. Post-retirement benefit costs

In 2013 and 2012, post-retirement benefit costs and curtailment and settlement costs were as follows:

	2013	2012
	Euro	
Post retirement benefits, net		
Pension supplements (Notes 11.1 and 11.4)	(992,000)	1,328,564
Health care benefits (Notes 11.2 and 11.4)	6,241,000	8,005,818
Salaries (Notes 11.3 and 11.4)	13,222,000	25,657,325
Service cost related to liabilities transfered to the Portuguese state[(a)]	21,783,067	22,337,313
	40,254,067	**57,329,020**
Redundancy costs and liquidation		
Pension supplements (Notes 11.1 and 11.4)	498,000	87,682
Health care (Notes 11.2 and 11.4)	1,324,000	(163,036)
Salaries (Notes 11.3 and 11.4)	108,227,000	(246,969)
Termination payments (Note 11.5)	2,751,916	1,482,772
	112,800,916	**1,160,449**

(a) This caption corresponds to a fixed contribution paid by PT Comunicações to the Portuguese Social Security System relating to the annual service of active and suspended employees that were entitled to pension benefits under the Company's post-retirement benefit plans that were transferred to the Portuguese State in December 2010.

(Amounts in Euro)

11. Post-retirement benefits (Continued)

11.7. Net actuarial losses (gains)

In 2013 and 2012, the net actuarial gains and losses recorded in shareholders' equity were as follows:

	2013	2012
	Euro	
Changes in actuarial assumptions		
Pension benefits (Note 11.1)	(1,044,000)	17,334,547
Health care benefits (Note 11.2)	(1,073,000)	37,439,494
Salaries (Note 11.3)	103,023,000	81,438,065
Sub-total (Note 11)	**100,906,000**	**136,212,106**
Differences between actual data and actuarial assumptions		
Pension benefits (Note 11.1)	(2,721,130)	(12,336,802)
Health care benefits (Note 11.2)	(332,743)	(78,147,001)
Salaries (Note 11.3)	40,933,873	(124,555)
Sub-total	**37,880,000**	**(90,608,358)**
Total (Notes 11.4, 11.8 and 20.4)	**138,786,000**	**45,603,748**

Net actuarial losses and gains recorded in 2013 and 2012 related to changes in actuarial assumptions mainly resulting from the changes in the financial and demographic actuarial assumptions detailed above, as follows:

- Net actuarial losses recognized in 2013 amounting to Euro 101 million correspond to the impact of the change in the Portuguese retirement age from 65 to 66 years old;
- Net actuarial losses recorded in 2012, amounting to Euro 136 million, include primarily the impacts resulting from (1) the suspension of the early retirement regime (loss of Euro 39 million), either permanently for employees under the CGA regime or during the financial assistance programme to Portugal for the remaining employees, (2) the reduction in the discount rates for responsibilities with pension supplements, health care benefits and salaries payable to suspended and pre-retired employees (loss of Euro 102 million), and (3) the change in the mortality tables for active beneficiaries;

The detail of net actuarial gains and losses resulting from differences between actual data and actuarial assumptions is as follows:

- Net actuarial losses recognized in 2013 amounting to Euro 38 million include (1) a gain of Euro 3 million related to the difference between actual return on plan assets (+4.5%) and expected return on plan assets calculated based on discount rates used to compute PBO, and (2) a loss of Euro 41 million related to the difference between actual data and actuarial assumptions related to projected benefits obligations, namely those assumptions related to the salary, pension and healthcare cost trend growth rates;
- Actuarial gains recognized in 2012, amounting to Euro 91 million, include (i) a gain of Euro 68 million related to the difference between actual (+25.2%) and expected return on plan assets calculated based on discount rates used to compute PBO, and (ii) a gain of Euro 23 million corresponding to the difference between actual data and actuarial assumptions regarding projected responsibilities, particular assumptions about growth rates of wages, pensions and health care;

(Amounts in Euro)

11. Post-retirement benefits (Continued)

11.8. Other disclosures

The table below presents historical data for a five year period about the present value of projected benefit obligations, the fair value of the plan assets, the surplus or deficit in the plans and the net actuarial gains and losses. The detail of this data for all the plans mentioned above as at 31 December 2013, 2012, 2011, 2010 and 2009 and for the years then ended is as follows:

	2013	2012	2011	2010	2009
			Euro		
Projected benefit obligations[a]	1,328,293,282	1,228,484,830	1,252,933,027	1,393,777,823	3,836,029,063
Plan assets at fair value[a]	(386,327,643)	(399,394,770)	(344,695,390)	(448,145,688)	(2,369,524,484)
Net unfunded obligations	**941,965,639**	**829,090,060**	**908,237,637**	**945,632,135**	**1,466,504,579**

	2013	2012	2011	2010	2009
Changes in actuarial assumptions	100,906,000	136,212,106	(19,337,022)	441,557,656	(1,594,152)
Differences between actual data and actuarial assumptions					
Projected benefit obligations related	40,532,873	(22,561,941)	(7,065,466)	(67,501,464)	15,827,000
Plan assets related	(2,652,873)	(68,046,417)	92,782,990	72,411,885	(184,120,001)
Total net actuarial losses (gains) (Notes 11.4 and 11.7)	**138,786,000**	**45,603,748**	**66,380,502**	**446,468,077**	**(169,887,153)**

(a) The decrease in this caption in the year ended 31 December 2010, is mainly related to the Company's post-retirement benefit plans that were transferred to the Portuguese State.

As at 31 December 2013, the estimate of future undiscounted payments to be made by PT Comunicações related to salaries due to pre-retired and suspended employees and to expected contributions to the funds is as follows:

	Million Euro
2014	155.2
2015 - 2016	268.5
2017 - 2018	216.6
More than 5 years	394.5
Total	**1,034.8**

(Amounts in Euro)

(a) Loans granted to MEO, SA in November 2010, in connection with the acquisition of this company, for an amount of Euro 500,000,000, were repaid in 2011 and 2013 for the amounts of Euro 160,000,000 and Euro 340,000,000, respectively (Note 4 (c)).

(b) During the years ended as at 31 December 2013 and 2012, PT Comunicações reported tax losses that were used by PT SGPS consolidated tax, rather than being recognized as a gain in the Company's financial statements. The accounts payable at 31 December 2013 and 2012 correspond mainly to autonomous taxation.

12.2. Financial investments in subsidiaries and associated companies

As mentioned in the Introduction Note, Portugal Telecom is 100% held by PT Portugal which is fully held by PT SGPS. Consequently, all companies included in the Group were considered as PT Comunicações related parties, including not only its own subsidiaries and associates but also other subsidiaries of PT SGPS.

Total current	**92,590,506**	**74,318,913**
Total deferred income	**92,590,506**	**74,984,058**

(a) The increase in this caption relates to penalties for violation of contracts by customers of the Pay-tv service and certain irregularities undertaken by other operators regarding the portability of customers.

14. Other financial assets

As at 31 December 2013 and 2012, these captions consist of the following:

	2013	2012
	Euro	
Accounts receivable—trade (Note 17)	76,189	365,032
Other[(a)]	4,001,661	8,599
Total	**4,077,850**	**373,631**

(a) This caption includes loans granted in 2013 to the subsidiary Fibroglobal amounting to Euro 4,000,000.

15. Income taxes

15.1. Introduction

In 2013, companies located in mainland Portugal are subject to Corporate Income Tax at a base rate of 25%, increased (1) up to a maximum of 1.5% of taxable income through a municipal tax, and (2) by a state surcharge levied at the rate of 3.0% on taxable income between Euro 1.5 million and Euro 7.5 million (Euro 10.0 million in 2012) and at the rate of 5.0% on taxable income in excess of Euro 7.5 million (Euro 10.0 million in 2012).

As from 2014, companies located in mainland Portugal are subject to Corporate Income Tax at a base rate of 23%, increased (1) up to a maximum of 1.5% of taxable income through a municipal tax, and (2) by a state surcharge levied at the rates of 3.0% on taxable income between Euro 1.5 million and Euro 7.5 million, 5.0% on taxable income between Euro 7.5 million and Euro 35.0 million and 7.0% on taxable income in excess of Euro 35.0 million, resulting in a maximum aggregate tax rate of approximately 31.5% for taxable income higher than Euro 35.0 million.

As the Company reported tax losses for both years ended 31 December 2013 and 2012, neither the 1.5% municipal tax nor the state taxes are applicable. Consequently, and based on its expectations regarding future taxable results, PT Comunicações used the 23% and 25% tax rates for purposes of computing deferred taxes, at 31 December 2013 and 2012, respectively.

The Company's income taxes are computed based on the tax rate mentioned above and are determined on the basis of profit before-tax adjusted in accordance with tax legislation.

The Company is part of the Special Taxation Regime for Groups of Companies (RETGS) whose dominant company is PT SGPS, so the income tax estimate and deductions made by third parties are recorded on the balance sheet as accounts payable and receivable of PT SGPS.

In accordance with the prevailing legislation, taxation returns are subject to review and correction by the tax authorities during a period of four years (five years for Social Security, Security), except where there have been tax losses, fiscal benefits have been granted, or there are inspections, claims or challenges pending; in such cases, these periods may be extended or suspended, depending on the circumstances. Based upon the information supplied by its tax advisory services, the Board of Directors considers that any corrections to the tax returns that might result from reviews carried out by the tax authorities will not have a significant effect on the financial statements as at 31 December 2013, considering the provisions recorded and the current expectations of settlement regarding tax contingencies described in Note 22.

15.2. Deferred taxes

As mentioned in Note 3.11, deferred tax assets are recognised to the extent that it is reasonably likely that taxable income will be available against which deductible temporary differences can be used, or when there are deferred tax liabilities the reversal of which is expected in the same period in which the deferred tax assets reverse. PT Comunicações believes that deferred tax assets recorded in the Balance Sheet are recoverable either through its future taxable income, based on its budget for the year 2014 and projections of results for the subsequent years adjusted for differences between the accounting and taxable earnings and for certain financial operations to be undertaken in the future, or through the reversal of deferred tax liabilities.

In assessing income tax expenses for the year, in addition to the current tax determined on the basis of profit before-tax adjusted in accordance with tax legislation, the effects of temporary differences between income before tax and taxable earnings arising in the given year or in previous years is also considered.

(Amounts in Euro)

15. Income taxes (Continued)

Movements occurred in deferred tax assets during the years ended 31 December 2013 and 2012 were as follows:

15. Income taxes (Continued)

15.3. Tax rate reconciliation

In 2013 and 2012, the reconciliation between the expected tax computed by applying the nominal tax rate to income before taxes and the total income tax is as follows:

	2013	2012
	Euro	
Income before taxes	**(200,347,849)**	**(93,674,776)**
Nominal tax rate	25.00%	25.00%
Expected tax	**(50,086,962)**	**(23,418,694)**
Permanent differences[a]	(45,972,128)	(28,719,166)
Tax loss used in connection with RETGS[b]	90,846,088	170,121,916
Effect of the change in tax rate	13,498,854	—
Collection adjustments	1,819,982	1,909,491
Write- off / Derecognition of deferred tax assets[c]	—	(113,579,000)
Surplus of prior year accrued income tax	(257,730)	(1,859,485)
Other	29,351	(6,799,524)
	9,877,455	**(2,344,462)**
Income tax		
Income tax- current	1,562,254	50,007
Deferred tax	8,315,201	(2,394,469)
	9,877,455	**(2,344,462)**

(a) Permanent differences are as follows:

	2013	2012
	Euro	
Equity method of accounting (Note 27)[i]	(201,666,537)	(117,696,638)
Provisions and adjustments not deductible for tax purposes	23,683,108	7,495,389
Disposal of CTM[ii]	(2,112,732)	—
Write- off of accounts receivable	534,816	743,000
Recognition of capital gains and losses[iii]	(1,592,844)	(660,323)
Tax benefits	(3,969,590)	(3,185,478)
Other	1,235,269	(1,572,614)
	(183,888,510)	**(114,876,664)**
Nominal tax rate	25.00%	25.00%
	(45,972,128)	**(28,719,166)**

(i) In 2012, except for the Company's share in the earnings of CTM, for which we recognized a positive deferred tax, gains and losses in affiliated companies represent permanent differences.

(ii) This caption reflects the impact non-taxable gains, recorded upon the disposal of the investment in CTM (Note 20).

(iii) This caption refers to the difference between the accounting capital gains and losses and corresponding tax capital gains and losses related to the disposal of fixed assets.

(b) This caption corresponds to the taxable loss computed in both years by the Company in accordance with Income Tax legislation. In accordance with the fiscal policy set by Portugal Telecom Group, the gain related to the use of these tax losses has been recorded at the group level in PT SGPS' financial statements.

(Amounts in Euro)

15. Income taxes (Continued)

(c) Based on its expectation regarding its individual tax results, the Company in 2011 wrote off a portion of deferred tax assets related to post-retirement benefits that would have been used in 2012, since it believes that the referred tax results will not be enough to allow the use of these deferred tax assets. In 2012, the Company incurred in the tax costs associated with the deferred taxes derecognized in 2011, which therefore contributed to the tax loss generated in the year 2012, as detailed in the table above, and led to the permanent difference presented in 2012.

15.4. Other information

In connection with the Law 40/2005, of August 3, which approved the program SIFIDE—Tax Incentives on Research and Development System, the Company filed in 2013 the application related to the year 2012, amounting to Euro 578,170.

Under the law 10/2009 of March 10, which approved the RFAI—Tax Regime to Support Investment, the Company included in its 2012 income tax declaration form a tax benefit amounting to Euro 5,769,684, related to the significant investments made on the creation of new generation broadband networks.

In 2013, it was approved the Law 49/2013 of 16 July, which establishes an Extraordinary Tax Credit on Investment in the form of an income tax deduction amounting to 20% of the investments related to the company's operations that are realized after 1 June 2013. In the entities that are included in the tax consolidation regime, that deduction will be realized based on the Group's taxable income, and the amount that cannot be deducted may be used in the subsequent five fiscal years, in the same conditions. The Company is evaluation weather will use this benefit or not, based on the investment realized in 2013, the maximum amount of which eligible for tax purposes is Euro 5,122,814, and as such did not reflect this matter in the financial statements.

16. Inventories

As at 31 December 2013 and 2012, this caption consists of the following:

	2013			2012		
	Gross value	Impairment losses	Net value	Gross value	Impairment losses	Net value
	Euro					
Goods	24,238,390	(9,554,491)	14,683,899	39,253,567	(10,310,480)	**28,943,087**
Raw materials and consumables	18,401,315	(1,577,504)	16,823,811	22,264,647	(1,574,336)	**20,690,311**

In the years ended as at 31 December 2013 and 2012, the evolution of accumulated impairment losses related to accounts receivable was as follows:

	2013	2012
	Euro	
Opening balance	154,117,676	177,563,099
Reti merger	—	1,953
Increases (reversals)	22,960,728	25,750,763
Utilizations[a]	(48,629,181)	(49,198,139)
Closing balance	**128,449,223**	**154,117,676**

(a) This caption corresponds to the write-off of receivables that were previously fully adjusted for through the use of accumulated impairment losses.

(Amounts in Euro)

17. Accounts receivables and unbilled revenues (Continued)

The Company is exposed to the credit risk arising from the possibility that a third party does not fulfil its contractual obligations, resulting in a financial loss. The credit risk is primarily related to accounts receivable from services provided to customers and is monitored regularly with the following objectives: (a) limit the credit granted to customers, considering their profile and aging of receivables; (b) monitor the evolution of the credit level granted; (c) make regular reviews of the receivables recoverability; (d) analysis of market risk where the customer is located. The Company is not exposed to any significant credit risk related to a particular customer, to the extent that its receivables arise from a large number of customers.

As at 31 December 2013 and 2012, the aging of receivables, net of impairment losses, was as follows:

	2013			2012		
	Accounts receivable from group companies	Accounts receivable from other companies	Total	Accounts receivable from group companies	Accounts receivable from other companies	Total
	Euro					
Unexpired balance	42,608,964	221,010,359	263,619,323	69,799,276	200,206,525	270,005,801
Expired balance						
0 - 60 days	12,989,475	59,198,336	72,187,811	21,946,132	59,967,759	81,913,891
60 - 90 days	1,394,253	12,051,217	13,445,470	1,523,605	13,832,752	15,356,357
90 - 180 days	4,679,416	24,538,629	29,218,045	3,633,891	25,682,526	29,316,417
180 - 360 days	7,430,439	28,506,439	35,936,878	5,089,602	29,449,088	34,538,690
360 - 720 days	4,715,807	14,327,098	19,042,905	1,457,161	22,052,724	23,509,885
More than 720 days	1,238,234	26,919,087	28,157,321	781,305	15,097,785	15,879,090
Accounts receivable	**75,056,588**	**386,551,165**	**461,607,753**	**104,230,972**	**366,289,159**	**470,520,131**

Some of the accounts receivable with a higher aging relate to penalties for contracts violation imposed to customers and other operators, the revenues of which were deferred, as mentioned in Note 13.

18. State and other public entities

As at 31 December 2013 and 2012, the balances with these entities were as follows:

	2013		2012	
	Debit balances	Credit balances	Debit balances	Credit balances
	Euro			
Value added tax[(a)]	—	2,988,848	150,458	18,247,876
Social security taxes	—	8,199,142	—	7,518,077

Total other accounts receivable	**123,456,398**	**117,888,755**
OTHER ACCOUNTS PAYABLE		
Current		
PT ACS	1,287,448	2,327,116
Personnel	917,618	829,894
Group companies	38,309	15,942
Other accounts payable[(e)]	26,539,020	11,783,064
Total current	**28,782,395**	**14,956,016**

(a) The reduction in this caption correspond mainly to interest in connection with loans granted, which were repaid in 2013 (Note 12).

(b) This caption includes mainly accounts receivable related with equipment's sale to occasional customers.

(c) The balances related to Serviço Nacional de Saúde correspond to the amount receivable by the Company regarding the State co-participation in the costs of healthcare plan.

(d) The increase in this caption reflects mainly a gain of approximately Euro 31 million recorded in 2013 related to (i) an amount of Euro 5 million relates to the net compensation receivable from the Portuguese State for prior years costs supported by PT Comunicações with the universal service obligation under the Concession Agreement, in accordance with Law 66/2012, and (ii) an amount of Euro 26 million following the early termination of the concession contract by the Portuguese State assigning the universal service to other operator.

(e) The change in this caption is primarily explained by an amount of Euro 15,236,897 paid by PT Prestações in 2013, in connection with a transfer of receivables from public entities to this company.

During the years ended 31 December 2013 and 2012, the evolution in accumulated impairment losses related to accounts receivable was as follows:

	2013	2012
	Euro

(Amounts in Euro)

20. Non-current assets held for sale

The composition of non-current assets held for sale as at 31 December 2013 and 2012 is as follows:

	2013	2012
	Euro	
Opening balance	5,069,882	—
Acquisition of Sportinvest Multimédia[(i)]	4,653,742	—
Transfer of the CTM from the caption ''Financial investments-equity method of accounting'' (Note 10)	—	5,069,882
Sale of the stake in CTM (Note 10)	(2,309,932)	—
Dividends CTM (Note 10)	(2,759,950)	—
Closing balance	**4,653,742**	**5,069,882**

(i) This stake was acquired for an amount of 32,618,669 euros (Note 4), corresponding to the nominal value of additional paid and supplies granted to this entity, and was recognized an impairment loss in the amount of EUR 27,964,927 (Note 33) to meet the estimated realizable value.

a) CTM

On 13 January 2013, Portugal Telecom entered into a definitive agreement for the sale to CITIC Telecom of its 28% equity stake held in CTM and as such this investment was classified as a non-current asset held for sale as at 31 December 2012. Upon the closing of this transaction on 20 June 2013, PT Comunicações received a total amount of Euro 35,966,391 (Notes 1 (b), 4 (b) and 10) by its 3% stake in the share capital of CTM, and recognized a gain of Euro 32,729,421 (Note 27), which includes: (1) a gain of Euro 33,656,459 corresponding to the difference between the proceeds obtained from this transaction and the carrying value of this investment as at 31 December 2012, of Euro 5,069,882, net of dividends received during the first quarter of 2013, amounting to Euro 2,759,950 and a loss of Euro 927,038 (Note 21.5) corresponding to the cumulative amount of negative foreign currency translation adjustments relating to this investment that were reclassified to profit and loss upon the completion of the sale.

b) Sportinveste Multimédia

On 20 December 2012, Portugal Telecom reached an agreement on a number of transactions that will allow Portugal Telecom to have a 25% stake in a joint-venture that will combine Sport TV Portugal S.A. (''Sport TV''), Sportinveste Multimédia SGPS, S.A. (''Sportinveste Multimédia'') and P.P. TV—Publicidade de Portugal e Televisão, S.A. (''PPTV''). Portugal Telecom will contribute its current 50% stake in Sportinveste Multimédia and invest, through a rights issue in Sport TV, a net amount of up to Euro 21 million. Following these transactions, Portugal Telecom will own 25% of Sport TV, which will incorporate PPTV and Sportinveste Multimédia. As a result of this agreement, Portugal Telecom's investment in Sportinveste Multimédia was classified as a non-current asset held for sale as at 31 December 2012, the carrying value of which amounted to Euro 5 million as of that date. This investment in Sportinveste Multimédia was disposed of in 2013 by PT SGPS to PT Comunicações (Note 1 b)), having been also classified as non-current asset held for sale by the recoverable amount of this investment.

Sport TV produces one of the most complete and broad sports content offering worldwide and PPTV promotes television rights. Sportinveste Multimédia is currently equally owned by Portugal Telecom and Sportinveste SGPS and its core business is the production and development of sports contents through any multimedia platform. This transaction will result in a joint-venture that will allow a higher operational efficiency in management of sports contents in the various distribution platforms, including pay-TV, mobile networks and Internet. This will benefit all operators in the market as well as their customers. Taking into consideration that sports contents are core to its strategy in the various market segments,

(Amounts in Euro)

20. Non-current assets held for sale (Continued)

Portugal Telecom will continue to distribute other sports contents thus striving to retain a diversified and competitive offer to its customers.

On 31 December 2013, these corporate transactions are subject to the approval of the competent authorities, particularly the Competition Authority—Autoridade da Concorrência, and the accomplishment of certain contractual conditions by the companies involved, including the conclusion of Sport TV's refinancing following the transaction.

21. Shareholders' equity

21.1. Share capital

As at 31 December 2013 and 2012, the Company's share capital was fully paid and amounted to Euro 1,150,000,000 and was represented by 1,150,000,000 nominal shares (Note 36), with a nominal value of 1 Euro each. As at 31 December 2013 and 2012, the entirety of the Company's share capital was held by PT Portugal.

21.2. Other shareholders' equity instruments

This caption corresponds to additional paid in capital contributions granted by PT Portugal, which do not bear interest and have no reimbursement term defined. In accordance with applicable law, reimbursement may be made only if, after payment, shareholders' equity is greater than the sum of capital, legal reserves and unrealised revaluation reserves.

21.3. Legal reserve

Portuguese law provides that at least 5% of annual profits must be appropriated to a legal reserve until this reserve equals the minimum requirement of 20% of share capital. This reserve is not available for distribution to shareholders but may be capitalized or used to absorb losses, once all other reserves and retained earnings have been exhausted.

21.4. Other reserves

During the years ended 31 December 2013 and 2012, the movements under this caption were as follows:

	Net actuarial losses	Free reserves	Total
		Euro	
Balance as at 1 January 2012	**(369,029,838)**	**699,003,873**	**329,974,035**
Actuarial losses			
Base (Note 11.7)	(45,603,748)	—	**(45,603,748)**
Tax effect (Note 15)	11,400,936	—	**11,400,936**
Balance as at 31 December 2012	**(403,232,650)**	**699,003,873**	**295,771,223**

Alienation of CTM (Note 20 a))	—	927,038	879,912	**1,806,950**
Alienation of PT Brasil	—	5,667	8,605	**14,272**
Deferred taxes (Note 15.2)	—	182,856	—	**182,856**
Balance as at 31 December 2013	**326,944,322**	**(1,114,750,063)**	**42,192,707**	**(745,613,034)**

(a) The foreign currency exchange differences determined following the application of the equity method of accounting are related to the update of financial investment in Oi, which is indirectly owned through the affiliated company MEO, SA.

(b) In 2012, other changes in shareholders' equity resulting from the equity method of accounting include primarily a gain recorded by Bratel Brasil (a company of PT Group that holds the investment in Oi Group and is held indirectly by MEO, SA), amounting to Euro 49 million, corresponding to the impact of a corporate restructuring undertaken by the Oi Group in March 2012.

Movements related to the equity method of accounting were recorded under the following captions:

	2013	2012
	Euro	
Investments in subsidiaries and associated companies (Note 10)	(541,439,013)	(301,338,547)
Provision for negative financial investments (Note 22.5)	674	(181)
	(541,438,339)	**(301,338,728)**

(Amounts in Euro)

21. Shareholders' equity (Continued)

21.6. Revaluation surplus

During the years ended 31 December 2013 and 2012, the movements under this caption were as follows:

	2013	2012
	Euro	
Opening balance	**589,044,034**	**623,874,447**
Realization of revaluation surplus		
Base	(44,956,340)	(45,768,002)
Tax effect	10,526,934	10,937,589
Impact of change in tax rate (Note 15.2)	12,879,404	—
Closing balance	**567,494,032**	**589,044,034**

In accordance with the applicable legislation and the accounting practices used in Portugal, the revaluation reserves cannot be distributed to shareholders; they can only be used, under certain circumstances and in accordance with Portuguese legislation, for future capital increases.

The revaluation reserves recognized under this caption are related to both (1) assets measured in accordance with the revaluation model, and also (Note 6.2), (2) other assets revalued previously, for which the Company, in connection with the adoption of SNC and as permitted by NCRF 3, adopted the cost model. The Company decided to include both of these revaluation reserves under this caption as they are both non-distributable to shareholders, as mentioned above.

Annually, PT Comunicações transfers to retained earnings the revaluation reserve realized in the year, primarily through the depreciation of the asset that originated these reserves. The amounts transferred during the years ended 31 December 2013 and 2012, net of the corresponding tax effects, amounted to Euro 34,429,406 and Euro 34,830,413, respectively.

21.7. Other shareholders' equity

PT Comunicações recognises under this caption subsidies associated with the acquisition or production of non-current assets (investment subsidies), which were entirely received and are non-refundable, where the Company is not under obligation to comply with conditions associated with the subsidy.

These subsidies are subsequently recognized in earnings during the useful lives of the related assets for which those subsidies were granted. The Company recognized gains amounting to Euro 2,150,776 in 2013 and Euro 2,997,997 in 2012 (Note 32). The balance of this caption corresponds to the remaining amount of subsidies that have not yet been recognized in earnings.

21.8. Application of earnings

In 2012, as approved by the General Shareholders Meeting held on 29 March 2012, the negative net income of 2011, was entirely transferred to the caption ''Retained earnings''.

In 2013, as approved by the General Shareholders Meeting held on 27 March 2013, the negative net income of 2012 was entirely transferred to the caption ''Retained earnings''.

(Amounts in Euro)

22. Provisions, contingent liabilities and contingent assets

22.1. Movements occurred in provisions

During the years ended 31 December 2013 and 2012, the movements in provisions were as follows:

	2013				
	Tax claims	Other litigation	Provision for negative financial investments (Note 12)	Other provisions	Total
			Euro		
Opening balance	**14,908,002**	**9,674,993**	**297,348**	**61,240**	**24,941,583**

Non-current	—	—	297,348	—	**297,348**

22.2 Claims and legal proceedings

a) Proceedings with probable losses

Provisions for tax claims and legal proceedings are related to liabilities arising from legal proceedings against the Company, and are computed based on the advice of PT Comunicações' tax and legal advisors.

(Amounts in Euro)

22. Provisions, contingent liabilities and contingent assets (Continued)

As at 31 December 2013 and 2012, there were several legal proceedings and tax contingencies which, in accordance with "NCRF 21 Provisions, Contingent Liabilities and Contingent Assets" ("NCRF 21") and based on the opinion of the Company's internal and external tax and legal counsels, were considered as probable losses, since the Company considered probable the outflow of resources to settle the obligation. The nature of these claims is as follows:

	2013	2012
	Euro	
Legal proceedings		
Civil contingencies	1,372,668	3,321,484
Labor contingencies	2,130,323	2,504,227
Other contingencies	2,970,496	3,849,282
	6,473,487	**9,674,993**
Tax contingencies	5,118,418	14,908,002
	11,591,905	**24,582,995**

Set forth below are several tax claims assessed as constituting a probable loss, namely related to a portion of the VAT and IRC tax assessments in regard to the years 1998 of Marconi and 1999 of Portugal Telecom, S.A., and the years 2002 to 2012 of PT Comunicações, among others, the Company has recorded a provision amounting to Euro 5,118,418 in 2013, including tax and interest. However, the Company is contesting these claims with the tax authorities.

b) Proceedings with possible losses

As at 31 December 2013 and 2012, the Company, in accordance with the definitions of NCRF 21 and based on the advice of its internal and external tax and legal counsels, had classified several claims and legal proceedings and tax contingencies as proceedings with possible losses. The nature of these proceedings is as follows:

	2013	2012
	Euro	
Legal proceedings		
Civil contingencies	70,241,929	74,163,129
Labor contingencies	542,461	478,806
Other contingencies	13,682,689	21,125,828
	84,467,079	**95,767,763**
Tax contingencies	1,764,553	2,562,502
	86,231,632	**98,330,265**

22.3 Description of the main claims with regulatory entities and other legal proceedings

The following litigation processes relate to the main claims and legal proceedings filed by regulatory entities against PT Comunicações, some of which the Company considers, based on the advice of its internal and external legal counsels that related losses are remote, in accordance with the definitions of NCRF 21.

a) Claims for municipal taxes and fees

Pursuant to a statute enacted on 1 August 1997, as an operator of a basic telecommunications network, Portugal Telecom was exempt from municipal taxes and rights-of-way and other fees with respect to its

22. Provisions, contingent liabilities and contingent assets (Continued)

network in connection with its obligations under the Concession. The Portuguese Government has advised Portugal Telecom in the past that this statute confirmed the tax exemption under our Concession. The Portuguese Government has informed Portugal Telecom it will continue to take the necessary actions in order for PT Comunicações to maintain the economic benefits contemplated by the Concession.

Law 5/2004, dated 10 February 2004, established a new rights-of-way regime in Portugal whereby each municipality may establish a fee, up to a maximum of 0.25% of each wireline services bill, to be paid by the customers of those wireline operators whose network infrastructures are located in each such municipality. This regime was implemented in 2005 but does not affect the lawsuit described above based on the former statute. Meanwhile, Decree-Law 123/2009, dated 21 May 2009, clarified that no other tax should be levied by the municipalities in addition to the tax established by Law 5/2004. This interpretation was confirmed by the Supreme Administrative Court of Portugal in various legal actions.

Some municipalities however, continue to interpret that the Law 5/2004 does not expressly revoke other taxes that the municipalities wish to establish, because Law 5/2004 is not applicable to the public municipality domain. Currently, there are legal proceedings filed by some municipalities regarding this matter.

b) Regulatory proceedings

Portugal Telecom's operations are regularly subject to regulatory inquiries and investigations involving their operations. In addition, ANACOM (the telecommunications regulator), the European Commission, and the Autoridade da Concorrência (the competition authority) regularly make inquiries and conduct investigations concerning compliance with applicable laws and regulations. Current inquires and investigations include several investigations by the (Autoridade da Concorrência) related to PT Comunicações for alleged anti-competitive practices in the Digital Terrestrial Television market. The Company believes that most of the complaints that have resulted in such investigations should be dismissed due to the nature of the alleged abuses and the novelty of the relevant antitrust laws. However, if PT Comunicações is found to be in violation of applicable laws and regulations in these or other regulatory inquiries and investigations, it could become subject to penalties, fines, damages or other sanctions. It is however permitted under Portuguese law to appeal any adverse decision to the Courts.

In April 2007, the Autoridade da Concorrência filed a complaint alleging that PT Comunicações abused its dominant market position by granting, in 2003, discriminatory discounts on lease lines. PT Comunicações challenged this claim with the authorities. However, on 1 September 2008, the Autoridade da Concorrência imposed a fine of Euro 2.1 million on PT Comunicações. PT Comunicações appealed to the Commerce Court of Lisbon, on 29 September 2008 and, on 29 February 2012, the Commerce Court of Lisbon cleared PT Comunicações of the fine. The Company, based on the opinion of its internal and external legal counsels, has not recorded any provision for this matter.

c) Other legal proceedings

In March 2004, TV TEL Grande Porto—Comunicações, SA. (''TVTEL''), a telecommunications company based in Oporto, filed a claim against PT Comunicações in the Lisbon Judicial Court. TV TEL alleged that, since 2001, PT Comunicações has unlawfully restricted access to its telecommunication ducts in Oporto, thereby undermining and delaying the installation and development of TV TEL's telecommunications network. TV TEL alleges that PT Comunicações intended to favor both itself and CATVP—TV Cabo Portugal, S.A, a PT Multimedia subsidiary and at the time a direct competitor of TV TEL. TV TEL is claiming an amount of approximately Euro 15 million from Portugal Telecom for damages and losses allegedly caused and yet to be sustained by that company as a result of the delay in the installation of its telecommunications network in Oporto. In addition, TV TEL has demanded that PT Comunicações be required to give full access to its ducts in Oporto. PT Comunicações submitted its

(Amounts in Euro)

22. Provisions, contingent liabilities and contingent assets (Continued)

defence to these claims, stating that: (1) TV TEL did not have a general right to install its network in PT Comunicações' ducts; (2) all of TV TEL's requests were lawfully and timely responded to by PT Comunicações according to its general infra-structure management policy; and (3) TV TEL's claims for damages and losses were not factually sustainable. On February 2013, the court decided a compensation related to increased costs of financing incurred and a value regarding loss of clients to be liquidated by TV TEL. Both parties have appealed.

In March 2011, Optimus—Comunicações S.A. (''Optimus'') filed a claim against Portugal Telecom in the Judicial Court of Lisbon for the payment of approximately Euro 11 million and, in October 2011, Onitelecom—Infocomunicações, S.A (''Oni'') filed a claim against Portugal Telecom in the same court for the payment of approximately Euro 1.5 million, both related to a proceeding of the Autoridade da Concorrência that terminated in 2011 for prescription reasons, in relation to which Autoridade da Concorrência had imposed a fine to Portugal Telecom of approximately Euro 45 million. Optimus and Oni sustained their position by arguing that they suffered losses and damages as a result of Portugal Telecom's conduct. In the Optimus action, the Company is waiting for the schedule of the trial, while regarding the Oni legal action, Portugal Telecom was acquitted due to prescription reasons.

22.4 Other tax contingencies

In addition to the tax contingencies mentioned above, the risk of loss of which was deemed as either probable or possible (Note 22.2), there are other tax claims pending appeal or judicial decision, totalling Euro 21 million, which include primarily (1) tax assessments filed by the tax authorities with respect to the income tax from 1997 to 1998 of Portugal Telecom, SA and Marconi, and for 2002 and 2010 of PT Comunicações, and (2) additional payments of VAT from 2000 to 2004. The Company's opinion, based on the advice of its tax and legal counsel, is that the risk of loss associated with these claims is remote.

22.5 Provisions for losses on financial investments

Provisions for losses on financial investments are related to losses in subsidiaries and associated companies that have negative shareholders' equity (Note 12), and are computed based on the Company's share in the shareholders' equity of those entities. Movements in these provisions during the years ended 31 December 2013 and 2012 were as follows:

	2013	2012
	Euro	
Equity method		
Losses in subsidiaries and associated companies (Note 27)	2,446	5,110
Gains in subsidiaries and associated companies (Note 27)	(2,444)	—
Adjustments to financial assets (Note 21.5)	(674)	181
Acquisition of Yunit (Notes 1 and 4)	103,584	—
	102,912	**5,291**

22.6 Contingent assets

As at 31 December 2013, the main contingent asset relates to a request for the transmission of tax losses from PT.Com, a company that was merged into PT Comunicações in 2004, amounting to Euro 56 million. The recovery of this amount depends on the appeal filed by the Company. The request filed by the Company was overruled by the tax authorities on 2 February 2007, and the Company challenged this decision on 15 May 2007 through a special administrative proceeding, which is pending a final decision.

(Amounts in Euro)

23. Loans obtained

Loans obtained as at 31 December 2013 and 2012 have the following composition:

	2013		2012	
	Non-current	Current	Non-current	Current
			Euro	
Intragroup loans (Note 12.3)	3,779,000,000	—	3,527,000,000	—
Centralized cash management (Note 12.3)	—	342,322,714	—	117,962,274
Commercial programme	3,086,750,000	—	2,631,600,000	1,047,150,000
Leases	11,656,946	20,576,337	20,261,415	19,142,242
	6,877,406,946	**362,899,051**	**6,178,861,415**	**1,184,254,516**

23.1 Loans to Group companies

In March 2013, the Company obtained a loan from PT Portugal, amounting to Euro 252,000,000 (Note 4), as a result of which the total amount due increased to Euro 3,779,000,000. These loans have no defined maturity, but shall be repaid, partially or entirely, in more than one year, subject to the cash needs of the Company. The interest on these loans is linked to market rates.

23.2 Centralized cash management

As from March 2006, Portugal Telecom centralized all cash receipts and payments from Group companies located in Portugal. The financings obtained by the Company under this system have short term maturities and bear interest at market rates.

23.3 Commercial paper

On 25 June 1999, Portugal Telecom established a commercial paper program. Following subsequent amendments to this program, the maximum amount under this program as at 31 December 2013 is Euro 3,500,000,000. This program is in place until 7 July 2015, and is automatically renewable for two year periods, until 7 July 2025, unless one of the parties objects to it. As at 31 December 2013 and 2012, the Company had issued an amount of Euro 898,400,000 and Euro 1,440,400,000, respectively, under this program, which was fully subscribed by PT Finance.

On 1 June 2000, Portugal Telecom had issued another commercial paper program. Following subsequent amendments to this program, the maximum amount under this program as at 31 December 2013 is Euro 3,000,000,000. This program is in place until 1 June 2014, and is automatically renewable for two year periods, until 1 June 2020, unless one of the parties objects to it. As at 31 December 2013 and 2012, the Company had issued an amount of Euro 2,188,350,000 and Euro 2,238,350,000, respectively, under this program, which was fully subscribed by PT Finance.

23.4 Finance leases

Financial leasing obligations are essentially the result of: (i) lease contracts with respect to vehicles, under which there are generally purchase options at the end of their term, and (ii) contracts for the acquisition of satellite capacity, under which the Company has the right to use this capacity in the normal course of telecommunications operations, a right that is recorded by the Company as an intangible asset. The contracts for the acquisition of satellite capacity do not include purchase options but, generally, the Company has a preference in the allocation of future transponders' capacity.

(Amounts in Euro)

23. Loans obtained (Continued)

As at 31 December 2013 and 2012, the Company had recorded in the balance sheet the following assets under finance leases:

	2013			2012		
	Gross value	Accumulated depreciation	Carrying value	Gross value	Accumulated depreciation	Carrying value
			Euro			
Tangible fixed assets						
Transport equipment	25,273,664	10,407,145	14,866,519	25,029,846	11,068,954	13,960,892

More than 5 years	1,551,949	25,464	**1,577,413**	—	—	**—**
	32,233,283	**1,650,614**	**33,883,897**	**39,403,657**	**2,817,344**	**42,221,001**

23.5 Other information

As at 31 December 2013, the Company was party, along with PT SGPS and PT Finance, to one Credit Facilities, with the amount of Euro 800 million, with maturity in June 2016.

As at 31 December 2013, the Company was also part, along with PT SGPS and PT Finance, in an Export Credit Facility, amounting to Euro 180 million, with a maturity in 2023. As at 31 December 2013, the amount used under the Credit Facilities, mentioned above, by PT Finance was Euro 400 million and Euro 70 million, respectively.

As at 31 December 2013, the main covenants included in financing contracts, in relation to which the Company is collectively responsible along with PT SGPS and PT Finance, are as follows and refer to the consolidated accounts:

- **Change in control:** The exchangeable bonds, the credit facilities amounting to Euro 670 million and the loans obtained from the European Investment Bank (''EIB'') totalling Euro 527 million establish penalties in the case of a change in control of PT SGPS. According to the terms and conditions of these debt instruments, a change of control would occur if any person or group of persons acting in concert acquires or controls more than 50 per cent of voting rights, whether obtained by ownership of share capital, the holding of voting rights or pursuant to the terms of a shareholders' agreement. In certain cases, gaining the power to appoint or remove all, or the majority, of the directors or other equivalent officers of PT SGPS or to give directions with respect to

(Amounts in Euro)

23. Loans obtained (Continued)

the operating and financial policies of PT SGPS with which the directors or equivalent officers of the company are obliged to comply are also considered a change of control.

The Euro 750 million Eurobond issued in 2009, the Euro 600 million Eurobond issued in 2011, the Euro 750 million Eurobond issued in 2012 and the Euro 1,000 million Eurobonds issued in 2013, establish penalties in the case of any change of control of Portugal Telecom, as described above, only if simultaneously a rating downgrade to sub-investment grade occurs (in case the securities are investment grade securities) or a rating downgrade occurs (in case the securities are sub-investment grade securities) during the Change of Control Period, as defined under the terms and conditions of these notes.

- **Control/disposal of subsidies:** Certain revolving credit facilities amounting to Euro 670 million require PT SGPS to, directly or indirectly, maintain majority ownership and control of each material subsidiary. Material subsidiaries are those companies whose total assets are equal or exceed 10% of total consolidated assets or whose total revenues are also equal or exceed 10% of total consolidated revenues.
- **Disposal of assets:** The loans obtained from the EIB totalling Euro 527 million as at 31 December 2013 include certain restrictions regarding the disposal of assets by PT SGPS.
- **Financial ratios:** Certain revolving credit facilities totalling Euro 670 million require that Consolidated Net Debt/EBITDA PT SGPS's ratio does not exceed certain values, which vary depending on each financing.
- **Negative Pledge:** The Euro Medium Term Notes, the exchangeable bonds, the credit facilities, under which Portugal Telecom Group had contracted loans amounting to Euro 670 million, the loans obtained from the EIB and the commercial paper programmes are subject to negative pledge clauses, which restrict the pledge of security interests in the assets of companies included in the consolidation.

The penalties applicable in the event of default in any of these covenants are generally the early payment of the loans obtained or the termination of available credit facilities. As at 31 December 2013, Portugal Telecom and PT Comunicações had fully complied with the covenants mentioned above.

Although current liabilities exceed current assets, the Company is not subject to liquidity risk, because of its ability to obtain needed capital from within the Portugal Telecom Group.

24 Suppliers

The captions ''Suppliers'' and ''Investment suppliers'' as at 31 December 2013 and 2012 consist of the following:

	2013	2012
	Euro	
Trade suppliers		
Current	319,470,088	259,336,226

(Amounts in Euro)

25 Accrued expenses

As at 31 December 2013 and 2012, this caption consisted of the following:

	2013	2012
	Euro	
Interest and other financial expenses payable[(a)]	107,973,460	67,038,381
Direct costs of services rendered[(b)]	84,806,581	64,347,556
Charges for vacations, vacation subsidies and other payroll costs	42,964,245	43,592,100
Other supplies and external services	16,132,996	15,159,167
Credits related to invoices issued	10,153,020	8,427,354
Support services[(c)]	8,186,121	38,711,199
Rentals	4,495,887	5,693,006
Maintenance and repairs	3,957,839	2,840,937
Specialized work	3,176,246	2,469,338
Marketing and publicity	2,192,106	2,560,743
Other	9,266,319	17,179,148
	293,304,820	**268,018,929**

(a) The increase in this caption reflects primarily (i) the loans obtained from PT Portugal, the accrued interest of which increased from Euro 62.1 million as at 31 December 2012 to Euro 86.9 million as at 31 December 2013, (ii) the interest associated with commercial paper programs which increased from Euro 3.4 million as at 31 December 2012 to Euro 18.4 million as at 31 December 2013.

(b) The increase in this caption reflects primarily to amounts billed by the MEO, SA, relating to sales made on behalf of the company, under the provision of converged products and services from fixed and mobile businesses called ''M4O'', which was launched commercially at the beginning of year 2013.

(c) The decrease in this caption is related primarily with the accrued expenses with PT Communicators Group companies.

26 Services rendered and sales

	6,917,719	**15,267,912**
Interest and related expenses		
Interest expense	358,573,654	311,664,796
Bank commissions and expenses	5,556,369	3,954,254
Losses on exchange rate differences	4,848,196	288,259
Finance leases	1,319,353	2,730,486
Other	2,748,135	2,369,712
	373,045,707	**321,007,507**

(Amounts in Euro)

35 Interest and related income/expenses (Continued)

The detail of interest income and interest expenses in 2013 and 2012 is as follows:

	2013	2012
	Euro	
Interest income		
Intragroup loans[a]	3,006,362	14,059,430
Other	342,977	131,552
	3,349,339	**14,190,982**
Interest expense		
Intragroup loans[b]	197,313,572	158,957,483
Other	161,260,082	152,707,313
	358,573,654	**311,664,796**

(a) The decrease in interest income under this caption results primarily from the full repayment of loans granted to MEO, SA, in the amount of Euro 340,000,000 at 1 March 2013 (Note 12.3).

(b) The increase in this caption reflects mainly a higher level of loans obtained from PT Portugal (Note 23.1).

36 Earnings per share

Earnings per share for the years 2013 and 2012 were computed as follows:

	2013	2012
		restated
Net income	(210,225,304)	(91,330,314)
Number of shares (Note 21)	1,150,000,000	1,150,000,000
Basic earnings per share	**(0.18)**	**(0.08)**

There are no situations that create a dilutive effect, so the diluted earnings per share are the same as basic earnings per share.

(Amounts in Euro)

37 Guarantees and other financial commitments

As at 31 December 2013 and 2012, the Company had presented guarantees and comfort letters to third parties, as follows:

	2013	2012
	Euro	
Guarantees in favour of courts	**1,608,722**	**1,871,435**
Bank guarantees in favor of other entities:		
Highway construction entities	5,734,356	4,325,822
Ministry of Education	3,161,016	3,041,118
Ministry of Justice	7,789,951	2,487,978
Municipalities	2,496,807	5,501,487
CTT	2,007,831	2,007,831
Ministry of Health	1,038,512	1,038,512
Other	6,714,826	4,518,108
	28,943,299	**22,920,856**
Total guarantees	**30,552,021**	**24,792,291**
Commitments of purchase before:		
Fixed asset and content suppliers	19,956,279	34,242,977
Suppliers of inventories	20,398,178	27,768,745
Other services	46,780,174	58,700,454
	87,134,631	**120,712,176**

Bank guarantees presented to the tax authorities relate primarily to additional income tax assessments for which the Company submitted a claim or an appeal.

Purchase commitments refer to orders placed and not rendered, essentially for the acquisition of materials of infrastructure and telecommunications equipment in the normal course of operations.

38 Events occurred after the balance sheet date

The financial statements for the year ended 31 December 2013 were approved by the Board of Directors and authorized for issuance on 4 February 2014, but are still subject to General Shareholders Meeting approval, under the terms of Portuguese law.

There were no significant events after 31 December 2013 that would require adjustment or disclosure in these financial statements.

39 Note added for translation

These financial statements are a translation of the financial statements originally issued in Portuguese, in accordance with generally accepted accounting principles in Portugal. In case of discrepancies, the original version, in Portuguese, prevails.

STATUTORY AUDITORS' REPORT

(Translation of a report originally issued in Portuguese—Note 38)

Introduction

1. We have audited the accompanying financial statements of PT Comunicações, S.A. (''the Company''), which comprise the balance sheet as of 31 December 2012 that presents a total of 14,708,347,412 Euros and shareholders' equity of 5,500,363,405 Euros, including a net loss of 86,901,669 Euros, the statements of income by nature, of changes in shareholders' equity and of cash flows for the year then ended and the corresponding notes.

Responsibilities

2. The preparation of financial statements that present a true and fair view of the financial position of the Company, the results of its operations, the changes in its shareholders' equity and its cash flows, as well as the adoption of adequate accounting principles and criteria and the maintenance of an appropriate system of internal control are the responsibility of the Company's Board of Directors. Our responsibility is to express a professional and independent opinion on these financial statements, based on our audit.

Scope

3. Our audit was performed in accordance with the auditing standards *(''Normas Técnicas e as Directrizes de Revisão/Auditoria'')* issued by the Portuguese Institute of Statutory Auditors *(''Ordem dos Revisores Oficiais de Contas'')*, which require that the audit be planned and performed with the objective of obtaining reasonable assurance about whether the financial statements are free of material misstatement. An audit includes verifying, on a sample basis, evidence supporting the amounts and disclosures in the financial statements and assessing the significant estimates, based on judgements and criteria defined by the Board of Directors, used in their preparation. An audit also includes assessing the adequacy of the accounting principles used and their disclosure, taking into consideration the circumstances, verifying the applicability of the going concern concept and assessing the adequacy of the overall presentation of the financial statements. Our audit also included verifying that the financial information contained in the Managements' Report is in accordance with the financial statements. We believe that our audit provides a reasonable basis for expressing our opinion.

Opinion

4. In our opinion, the financial statements referred to in paragraph 1 above, present fairly, in all material respects, the financial position of PT Comunicações, S.A. as of 31 December 2012 and the results of its operations, the changes in its shareholders' equity and its cash flows for the year then ended, in conformity with generally accepted accounting principles in Portugal.

Emphasis

5. The financial statements mentioned in paragraph 1 above refer to the Company on a standalone basis and were prepared in accordance with current legislation for approval and publication. The Company will not prepare consolidated financial statements as, in accordance with number 3 of article 7 of Decree-Law 158/2009, of 13 July 2009 is not required to do so, as its financial statements will be included in the consolidated financial statements of Portugal Telecom, SGPS, S.A.. As described in Note 3.7, although the financial investments have been accounted for by the equity method, under which the Company´s net profit for the year and shareholders' equity include the effect of consolidating the subsidiary and associated companies, the accompanying financial statements do not include the effects of a full consolidation of their assets, liabilities, revenues and costs.

Report on other legal requirements

6. It is also our opinion that the financial information contained in the Managements' Report is consistent with the financial statements for the year.

Lisbon, 14 March 2013

INDEX

PT Comunicações
Notes to Financial Statements
As at 31 December 2012
(Amounts in Euro)

1. Introduction

(a) Development of the company

PT Comunicações, S.A. (''PT Comunicações'' or the ''Company'') was incorporated in 2000, in accordance with a resolution from the General Meeting of Portugal Telecom, S.A. on April 27, 2000 within the business restructuring process in Portugal Telecom Group and by spin-off from Portugal Telecom, S.A. The conditions for this spin-off were defined under Decree-Law no. 219/00, of September 9, and Joint Order no. 936-A/2000 issued by the Ministers for Social Provision and for Finance on September 14.

On 30 September 2006, under the restructuring process of the Group Portugal Telecom, Portugal Telecom, SGPS, S.A. (''PT SGPS''—Holding company of the Group) sold to PT Portugal, SGPS, S.A. (''PT Portugal''—a sub-Holding company of the Group) all of the shares of PT Comunicações.

On 27 December 2002, PT Comunicações and the Portuguese Government signed the Contract of Purchase and Sale of the Basic Telecommunications Network (''Basic Network'') and the Telex Network, under which the State transferred the full property of the Basic Network and the Telex Network to PT Comunicações, free of any lien or encumbrance. Under the terms of this contract, PT Comunicações is obliged to: i) guarantee the functioning of the Basic Network as an open network, serving as support for the transmission of a general range of services and available to all telecommunications operators and service providers under equal conditions; and ii) provide the acquired network, during the concession period, with the necessary infrastructure for the provision of the concession services and without prejudice to the possibility of its transfer, replacement and/or encumbrance, provided that this does not affect those services.

On 17 February 2003 Decree-Law no. 31/2003 was published, approving the Amendment Agreement to the Concession Contract, which changed the conditions for the concession of public telecommunications services approved by Decree-Law no. 40/95 of February 15. This decree introduced the following fundamental changes to the previous Concession Contract: i) rent payment will no longer be made to the Portuguese State; ii) rights and assets subject to the concession will not revert to the State upon termination; and iii) the State will compensate the Company, under certain compensation mechanisms, for possible negative margins incurred by the Company arising from compliance with the obligations inherent to the provision of the fixed telex, telegraphic and broadcasting services and the mobile marine service.

Under the terms of the above-mentioned Amendment Agreement, the objectives of the concession are: the development and operation of the infrastructure that make up the basic network for telecommunications and signal transmission and emission; the provision of a universal telecommunications service, as defined under Decree-Law no. 458/99, of 5 November; the provision of a telex service; the provision of a data transmission service; the provision of a service for the emission and distribution of telecommunications broadcasts; and the provision of a telegraphic service.

The provision of the universal telecommunications service includes the following: i) connection to the fixed telephone network and access to fixed telephone services; ii) availability of public telephones in public places; and iii) availability of telephone directories and an information service.

The concession period expires in March 2025. As mentioned above, both the Amendment Agreement to the Concession Contract and the Portuguese Law impose certain obligations to PT Comunicações as a universal service provider. On February 2012, following a public hearing about the selection of the universal service provider, Anacom issued a final decision splitting the universal service into three functions: (1) connection to a public communications network in a fixed location and rendering of a telephone service through this network (Tender 1); (2) public phones offer (Tender 2); and (3) make available a complete telephone list and a related service (Tender 3). In 2012, the Portuguese State launched a public tender to select the universal service providers, approved the definition of the universal service cost and established a compensation fund for the universal service providers. PT

1. Introduction (Continued)

Comunicações is qualified to receive compensation from the fund established by Anacom to cover the costs incurred up to date with the universal service.

On 11 February 2004, Law 5/2004 or the ''Electronic Communications Act'' was published, which establishes the legal regime applicable to electronic communications networks and services, and to the associated resources and services, and defines the authority of the national regulatory agency in this area.

On 9 December 2008, ANACOM attributed to PT Comunicações the rights to the use frequencies, on a national basis, to provide digital television services (TDT) for the broadcasting television programs with unconditional access (also known as public access channels) which is associated with Multiplexer A (Mux A). During the year 2011, ANACOM defined the obligations associated with such rights, and as a result PT Comunicações recognized an intangible asset corresponding to the present value of the commitments under such rights (Note 9).

(b) Corporate transactions

During 2007, PT Comunicações acquired the shares of PT Prime—Enterprise Solutions and Telecommunication Systems, SA (''PT Prime''), PT Corporate—Enterprise Solutions for Telecommunications and Information Systems, SA (''PT Corporate'') and PT.Com—Interactive Communications, SA (''PT.COM''), previously held by PT SGPS, seeking to consolidate all fixed line services into PT Comunicações.

In March 2008, PT.Com and PT Corporate were merged through their incorporation into PT Comunicações and, consequently, the equity, rights and obligations of those companies were transferred to PT Comunicações, and PT.Com and PT Corporate ceased to exist as separate entities.

In July 2009, PT Comunicações acquired from Novabase—Sociedade Gestora de Participações Sociais, SGPS, S.A. (''Novabase'') a 36.25% stake in Superemprego—Sistemas de Informação para a Gestão de Recursos Humanos, S.A. (''Superemprego''), and therefore Superemprego became fully owned by Portugal Telecom Group. In November 2009, Superemprego was merged through its incorporation into PT Comunicações and, consequently, its equity, rights and obligations were transferred to PT Comunicações and Superemprego was ceased to exist as a separate entity.

On 30 November 2010, and considering the need to adjust the corporate structure to reflect the consolidation of its fixed-line and mobile business, PT Comunicações acquired from PT Portugal the full stake in TMN—Telecomunicações Móveis Nacionais, S.A. (''TMN'').

On 29 December 2011, PT Prime was merged into PT Comunicações through the incorporation of its shareholders' equity and rights and obligations. For accounting purposes, this merger was reported as of 1 January 2011 and, accordingly, all transactions made by PT Prime as from that date were made on behalf of PT Comunicações.

On 3 May 2012, PT Comunicações concluded the acquisition from TVI—Televisão Independente, S.A. (''TVI'') of its former wholly-owned subsidiary RETI—Rede Teledifusora Independente, S.A. (''RETI''), which therefore became a wholly-owned subsidiary of PT Comunicações (Notes 4 and 10). On 12 December 2012, RETI was merged into PT Comunicações through the incorporation of its shareholders' equity and rights and obligations. For accounting purposes, this merger was reported as of 3 May 2012 and, accordingly, all transactions made by RETI as from that date were made on behalf of PT Comunicações.

(c) Other information

Under the terms of article 7 of Decree-Law no. 158/2009, despite holding financial stakes in group companies and associates, the Company is not required to prepare consolidated financial statements,

1. Introduction (Continued)

given that it is indirectly fully held by PT SGPS, which already presents consolidated financial statements which include the financial statements of the Company and its affiliated companies.

2. Basis of presentation

These financial statements were prepared in accordance with Portuguese legislation, based on Decree-law nº. 158/2009, which approved the new Portuguese accounting system, named Sistema de Normalização Contabilística (''SNC''), including the conceptual structure, Normas Contabilísticas e de Relato Financeiro (''NCRF'') and Interpretative Standards, as approved by Notices nº 15652/2009, 15655/2009 and 15653/2009, respectively.

The Company adopted NCRF for the first time in 2010 and applied for this purpose the *''NCRF 3 First Time Adoption Of NCRF''* (''NCRF 3''), with the transition date being 1 January 2009 for the purposes of the presentation of these financial statements. Previously, the Company's financial statements were prepared in accordance with accounting standards as previously in effect in Portugal (Plano Oficial de Contabilidade—''POC'') and other complementary legislation, which were modified by SNC. The conversion adjustments made to the financial statements as at 1 January 2009 were computed retrospectively, as determined by NCRF 3.

As permitted by Decree-Law nº. 158/2009, the Company also applies the International Financial Reporting Standards (''IAS/IFRS'') and related interpretations (''SIC/IFRIC'') issued by International Accounting Standards Board (IASB), in order to fill in the gaps or omissions in SNC regarding specific situations of certain transactions.

3. Main accounting policies, judgments and estimates

These financial statements were prepared assuming the continuity of operations. The main accounting policies used in the preparation of these financial statements are described below and were applied consistently, unless indicated otherwise.

3.1. Tangible fixed assets

Tangible fixed assets other than land and buildings and ducts infrastructure are stated at acquisition or production cost, which includes the purchase price and any expenses directly attributable to bringing the asset to the location and making them operational.

Land, buildings and the ducts infrastructure are presented in accordance with the revaluation model based on regular assessments, at least tri-annually, deducted from subsequent depreciation for buildings and infrastructure. The fair value of real estate properties is determined by external appraisers based on market prices or the income obtained by these assets, under the provisions of NCRF 7 Tangible Fixed Assets. Regarding the ducts infra-structure, the Company, has applied IAS/IFRS by assessing the fair value of these assets based on the depreciated replacement cost method, as this methodology is not provided under NCRF 7. The Company maintained these assets recognized at the revaluation model, although the valuation methodology is not provided under NCRF 7, in order to ensure the consistency with Portugal Telecom's consolidated financial statements regarding the valuation of this type of asset, through the application of IAS/IFRS.

Subsequent expenses are included in the asset's carrying amount only when it is probable that future economic benefits flow to the Company and the cost can be measured reliably. The costs of maintenance and repair that are not likely to generate future economic benefits are recognized as an expense in the period they are incurred.

Increases resulting from revaluations are recorded in equity under the caption ''Revaluation surplus'', except for increases that reverse a decline previously recognized in earnings. Decreases resulting from

(Amounts in Euro)

3. Main accounting policies, judgments and estimates (Continued)

revaluations are recorded directly under the caption ''Revaluation surplus'' up to the credit balance of the revaluation surplus for the relevant asset. Any excess in relation to the relevant credit balance is recognized in earnings. When the revalued asset is written off, the revaluation surplus included in equity regarding the asset is not reclassified to net income and is instead transferred to retained earnings. Annually, the revaluation surpluses are transferred to retained earnings in the same proportion of their depreciation.

With the exception of lands that are not depreciated, the depreciation of other tangible fixed assets is recognized, from the month in which the asset is available for use, on a straight-line basis over the useful life of asset, which is determined according to expected utility. The amortization period of tangible assets is reviewed on an annual basis and adjusted in order to reflect the estimated useful lives. The annual rates applied reflect the estimated useful life for each class of assets, as follows:

Asset Class	Years of useful life
Buildings and other constructions	3 - 50
Basic equipment	
Network installations and equipment	7 - 40
Ducts infra-structure	40
Telephones, switchboards and other	4 - 10
Submarine cables	15 - 20
Other basic equipment	4 - 20
Transportation equipment	4 - 8
Administrative equipment	3 - 10
Other tangible fixed assets	4 - 8

Following the approval of the Amendment Agreement to the Concession Contract, concluded in 2003 in connection with the acquisition of the Basic Network from the Portuguese Government, which now provides that the fixed assets related to the concessions will no longer be returned to the Portuguese State after the concession, the Company revised the amortization period of the assets which previously had useful lives that exceeded the term of the Concession Contract.

The useful lives and depreciation methods are reviewed annually, and the effect of any changes to these estimates is recognized prospectively in the income statement.

Gains or losses arising from the write-off or disposal of tangible fixed assets are determined as the difference between the amount received and the net recorded amount of the asset, and are recognized in the income statement.

3.2. Leases

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. The remaining lease contracts are considered operating leases. The classification of leases depends on the substance of the transaction and not on the form of the contract.

Assets acquired under finance leases and the corresponding liabilities are accounted at the beginning of the contract as the lesser amount between the fair value of the assets and the present value of minimum lease payments. Rents include interest and capital amortisation, with the first being recognized in the income statement in the related period.

Under operating leases, rents are recognized on a straight-line basis during the period of the lease.

3. Main accounting policies, judgments and estimates (Continued)

3.3. Investment properties

Investment properties includes mainly buildings and land held to earn rent and/or capital appreciation and not for use in the normal course of the business.

Investment properties are stated at acquisition cost plus transaction expenses and reduced by accumulated depreciation and accumulated impairment losses, if any. Expenditures incurred (maintenance, repairs, insurance and real estate taxes) and income and rents obtained are recognized in the income statement of the period.

Investment properties are depreciated on a straight-line basis, during their expected useful lives. Generally depreciation rates correspond to the respective estimated useful lives (Note 3.1).

3.4. Business combinations and goodwill

Acquisitions of subsidiaries are recorded based on the purchase method (NCRF 14). The purchase price includes, on the acquisition date, the following components: (a) the fair value of assets acquired; (b) the fair value of liabilities incurred; (c) the fair value of equity instruments issued by the Company in exchange for the control of the subsidiary; and (d) expenses directly attributable to the acquisition. When applicable, the purchase price includes the effect of contingent payments agreed under the transaction, with subsequent changes in those payments being recorded as an adjustment to goodwill.

Any excess of the acquisition cost over the fair value of net assets acquired and contingent liabilities of the acquired company at the date of acquisition is recorded as goodwill, in accordance with NCRF 14. If the acquisition cost is lower than the fair value of identifiable net assets, the difference is recorded as a gain in the net income. As provided for in NCRF 3, the Company will apply NCRF 14 only to acquisitions after 1 January 2009 and accordingly goodwill related to acquisitions prior to that date were maintained as initially computed under POC.

Goodwill resulting from the acquisition of subsidiaries is included in the balance sheet under the caption ''Goodwill''.

Goodwill is not amortised, but tested, on an annual basis or whenever there is evidence of a potential loss of value, for impairment losses. For impairment test purposes, goodwill is allocated to cash generating units. Any impairment loss is recognized in the income statement of the period, and cannot be reversed in a subsequent period.

3.5. Intangible assets

Intangible assets include mainly (1) the amount for the acquisition of the Basic Network, (2) software licenses, (3) TDT license acquisition cost and (4) satellite capacity rights. Intangible assets acquired separately are recorded at cost net of accumulated amortisation and accumulated impairment losses, if any.

Intangible assets are amortised on a straight-line basis and over a period of three years, except: (a) the value of the acquisition of the property of the Basic Network, which is amortised over the remaining period until the end of the concession (2025), (b) the value of the commitments assumed under the of TDT license, which is amortized until the end of the first renewal period of the same (2038); and (c) the satellite capacity rights, which are amortised over the period of their respective contracts. The useful lives and depreciation method of the intangible assets are reviewed annually, and the effect of any changes to these estimates is recognized prospectively in the income statement.

Expenses with research activities are recognized in earnings when incurred. Development expenses are capitalized when it is demonstrated the technical and economic feasibility of the product, and the

(Amounts in Euro)

3. Main accounting policies, judgments and estimates (Continued)

Company has the intention and ability to complete its development and starts its commercialization or use, as provided in the ''NCRF 6 Intangible Assets''.

3.6. Impairment of tangible and intangible assets

The Company performs impairment tests for its tangible and intangible assets if any event or change results in an indication of impairment. In case of any such indication, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. When it is not possible to determine the recoverable amount of an individual asset, the estimated recoverable amount of the cash-generating unit to which the asset belongs is used.

The recoverable amount is the greater of fair value less cost to sell and the value in use. The net selling price is the amount that could be received from a transaction between independent parties, reduced by direct costs related to the sale. In assessing the value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the specific risk to the asset.

If the recoverable amount of an asset is estimated to be less than its carrying amount, an impairment loss is recognized in the income statement.

3.7. Financial investments

Subsidiaries are those entities over which the Company has the power to govern the financial and operating policies generally represented by the majority of the voting rights. Associated companies are entities over which the Company has significant influence but does not control, generally represented by stakes between 20% and 50% of voting rights.

Financial investments in subsidiaries and associated companies are recorded under the equity method of accounting. Under this method, financial investments are initially recorded at acquisition cost and subsequently adjusted for the changes, after the acquisition date, in the Company's share in the net assets of those entities. The entity's earnings include its share in the earnings of those companies.

Under the application of the equity method of accounting, adjustments are made to the financial statements of affiliated companies in order to (1) conform their accounting policies with those adopted by the Company, (2) reflect the impacts of purchase price allocation processes and, (3) eliminate gains and losses resulting from transactions between affiliated companies of PT Comunicações.

Financial investments in foreign entities are translated to Euros using the exchange rates prevailing at the balance sheet date, while the Company's share in the earnings of those entities is computed based on the average exchange rates for the reported period. The effect of translation differences is recognized in shareholders' equity under the caption ''Adjustments in financial assets''.

The exchange rates used in the translation of the main financial statements of the foreign entities are as follows:

	2012		2011	
Currency	Closing	Average	Closing	Average
Macao Pataca	10.5328	10.2624	10.3525	11.1619
Brazilian Real	2.7036	2.5084	2.4159	2.3265

Financial investments are evaluated whenever there is evidence that it might be impaired, with impairment losses being recorded in the income statement.

3. Main accounting policies, judgments and estimates (Continued)

3.8. Post-retirement benefits

(a) Post-retirement pensions

The Company has the obligation to pay to a group of employees a pension supplement. In order to finance these obligations, various funds were incorporated by PT Comunicações (Note 11.1).

In order to estimate the amount of the Company's liabilities under these pension plans, the Company obtains periodically actuarial valuations, using the ''Projected Unit Credit Method''. As mentioned above, according to ''NCRF 28—Employee Benefits'' and ''IAS 19—Employee Benefits'', PT Comunicações has decided to adopt the alternative treatment referred in IAS 19 for recognition of actuarial gains and losses directly in equity, namely those resulting from changes in actuarial assumptions and from differences between actual data and actuarial assumptions.

Plan amendments related to reduction or increase of the benefits granted to employees are recorded as prior years' service gains or losses. Prior years' service gains or losses related to vested rights are recognized under the caption ''Costs with post-retirement benefits'' when they occur. Those related to unvested rights are recognized on a straight-line basis until they become vested (generally corresponding to the retirement date). Gains obtained with the settlement of any plan are recognized when incurred under the caption ''Curtailment and settlement costs''.

Liabilities stated in the balance sheet correspond to the difference between the Projected Benefit Obligation (''PBO'') related to pensions deducted from the fair value of pension fund assets and any prior years' service gains or losses not yet recognized.

Contributions made by the Company to defined contribution pension plans are recognized in net income when incurred.

(b) Health care benefits

Under a defined benefit plan, PT Comunicações is responsible to pay, after the retirement date, health care expenses to a group of employees and relatives. This health care plan is managed by Portugal Telecom—Associação de Cuidados de Saúde (''PT-ACS''). In 2004, the Group established PT Prestações—Mandatária de Aquisições e Gestão de Bens, SA (''PT Prestações'') to manage an autonomous fund to finance these obligations (Note 11.2).

The amount of the Company's liabilities with respect to these benefits after the respective retirement date is estimated based on actuarial valuations, using the ''Projected Unit Credit Method''. As mentioned above, the Company recognises actuarial gains and losses directly in equity, namely those resulting from changes in actuarial assumptions and from differences between actual data and actuarial assumptions.

Plan amendments related to reduction or increase of the benefits granted to employees are recorded as prior years' service gains or losses. Prior years' service gains or losses related to vested rights are recognized under the caption ''Post-retirement benefit costs'' when they occur and those related to unvested rights are recognized on a straight-line basis until they become vested, which usually corresponds to the retirement date. Gains obtained with the settlement of any plan are recognized when incurred under the caption ''Curtailment and settlement costs''.

Accrued post-retirement health care liabilities stated in the Balance sheet correspond to the present value of obligations from defined benefit plans, deducted from the fair value of fund assets and any prior years' service gains or losses not yet recognized.

3. Main accounting policies, judgments and estimates (Continued)

(c) Pre-retired and suspended employees

In connection with the programs related to employees that are under a suspended contract agreement or that have been pre-retired, the Company recognises a liability in the balance sheet equivalent to the present value of salaries payable up to the retirement age. The related cost is recorded in the income statement under the caption ''Curtailment and settlement costs'' (Note 11.3).

3.9. Accruals and deferrals

The Company records its revenue and expenses as they are generated or incurred, regardless of when they are received or paid, respectively.

3.10. Income taxes

Income tax expense corresponds to the sum of current and deferred taxes. Deferred taxes are recognized in the income statement except when they relate to items recorded directly in shareholders' equity and accordingly are also recorded in shareholders' equity.

Current taxes are computed based on the taxable income of the period computed under the Corporate Income Tax (''IRC'').

Portugal Telecom adopted the special taxation regime for Groups of companies, in which PT Comunicações is included. Consequently, the income tax due, net of withholding taxes and payments on accounts are recorded on the balance sheet as accounts payable or receivable from Portugal Telecom.

The income tax recorded in the financial statements was assessed in accordance with the terms of *''NCRF 25 Income Taxes''.* In assessing the cost of income tax for the year, besides the current tax determined on the basis of profit before-tax adjusted in accordance with the tax legislation, we also consider the effects resulting from temporary differences between the carrying value of assets and liabilities and the related tax amounts. Deferred tax assets and liabilities are computed and analysed annually, based on the expected tax rate that will be effective on the date on which such temporary differences are no longer applicable.

Deferred tax assets are recorded only when there is a reasonable expectation of sufficient future tax profits. As at the balance sheet date the Company conducts a reassessment of the above-mentioned temporary differences with respect to the deferred tax assets, in order to record deferred tax assets that were not recognized previously because they had not met the necessary conditions for their recognition, and/or reduce the amount of deferred tax assets which are recognized based on the current estimate of their future recoverable amounts.

3.11. Inventories

Inventories are stated at average acquisition cost. Adjustments to the carrying value of inventories are recognized based on technological obsolescence or low rotation.

Work in progress relating to installation of telecommunication equipments for clients is valued at production cost, which mainly includes expenses on equipment and various materials used, as well as wages and salaries related to the project.

Impairment losses on inventories includes the value of materials for which there is no intended use due to obsolescence and/or low rotation, as well as the difference between prices of materials that have a fair value lower than the average acquisition cost, when the difference is higher than the discount granted in current market conditions. Impairment losses and related reversals are recorded in earnings primarily under the caption ''Impairment of inventories ((losses)/reversals)''.

3. Main accounting policies, judgments and estimates (Continued)

3.12. Trade receivables and other

Trade receivables and other receivables are initially recognized at fair value and subsequently measured at cost or amortised cost, based on the effective interest method, deducted from impairment losses.

Impairment losses for doubtful accounts receivable are computed based on the evaluation of estimated risks resulting from the non-collection of receivables, and are recognized in the income statement of the period in which they are calculated.

3.13. Subsidies

Subsidies are only recognized when they are received and after reasonable assurance that the Company will comply with their respective requirements for their assignment.

Subsidies associated with the acquisition or production of non-current assets (investment subsidies) are initially recognized in equity under the caption ''Other shareholders' equity'', and subsequently allocated on a straight-line basis as income for the year, during the useful lives of the assets to which they relate.

Operating subsidies are recognized in the income statement on a constant basis over the periods in which expenses that they intended to compensate are recognized.

3.14. Provisions and contingent liabilities

Provisions are recognized when (i) there is a present obligation as a result of a past event, (ii) it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and (iii) a reliable estimate can be made of the amount of the obligation. Where any of the above-mentioned criteria is not met, the Company discloses the event as a contingent liability, unless the chance of cash outflow is remote.

Provisions are recognized for an amount corresponding to the present value of the best available estimate, at the reporting date, of the resources required to settle the obligation. That estimate is determined considering the risks and uncertainties associated with the obligation. Provisions are reviewed at the end of each year and adjusted in order to reflect the best available estimate as of that date.

The present obligations arising from onerous contracts (in which the cost of meeting the obligations under the contract exceed the economic benefits expected thereunder) are calculated and recorded as provisions.

3.15. Loans obtained

Loans obtained are initially recognized at fair value, net of transaction costs incurred, and subsequently presented at amortised cost, based on the effective interest method.

3.16. Borrowing costs

The Company has the policy of capitalizing of borrowing costs related to loans obtained to finance the acquisition, construction or production of tangible assets. However, the Company has recognized borrowing costs as expenses when incurred, since the construction period of tangible assets is usually short.

3.17. Vacation pay and vacation subsidies

Vacation pay and vacation subsidies and related social charges are recorded as a cost for the period in which the employee acquires the right to receive them. Consequently, the amount of vacation pay and

(Amounts in Euro)

3. Main accounting policies, judgments and estimates (Continued)

subsidies and related social charges due and unpaid at the balance sheet date are estimated and included under the caption ''Accrued expenses''.

3.18. Balance classification

Realizable assets and liabilities under which the Company has an unconditional right to defer its settlement for a period over one year from the balance sheet date are classified under non-current assets and non-current liabilities, respectively, at present value.

3.19. Foreign currency transactions and balances

Transactions denominated in foreign currencies (different from the domestic currency of the Company) are recorded at the exchange rates prevailing at the time the transactions are made. Assets and liabilities in foreign currency for which there is no agreement for fixing an exchange rate are translated to Euros using the exchange rates prevailing at the balance sheet date. Gains or losses arising from the differences between exchange rates in force at the date of the respective transactions and those applying on the date of collection, payment or balance sheet date are recorded as income and losses, respectively, in the income statement.

Assets and liabilities as at 31 December 2012 and 2011 were translated to Euro using the following exchange rates reported by the Bank of Portugal:

Currency	2012	2011
Special Drawing Rights	1.1658	1.1865
American dollar	1.3194	1.2939
Namibian dollar	11.1727	10.4830
Cape Verde escudo	110.2650	110.2650
Swiss franc	1.2072	1.2156
Angolan Kwanza	126.8460	133.9285
British pound	0.8161	0.8353
Mozambique metical	39.2400	34.9600
Brazilian real	2.7036	2.4159

3.20. Revenue recognition

Revenue is measured at fair value of the amount received or receivable. Revenue recognition is deducted from the estimated amount of returns, discounts and other rebates and does not include the Value Added Tax (VAT) and other taxes paid related to the sale.

Revenue from the services rendered is recognized by reference to the stage of completion of the transaction at the reporting date, if all the following conditions are met: (1) the revenue amount can be reliably measured; (2) it is probable that future economic benefits associated with the transaction will flow to the Company; (3) the expenses incurred or to be incurred with the transaction can be measured reliably; and (4) the stage of completion of the transaction at the reporting date can be reasonably estimated.

(a) National fixed national communications

Revenues from telecommunication activities are recognized at their gross amounts when services are rendered. Billings for these services are made on a monthly basis throughout the month. Amounts not yet invoiced but already due or incurred are recorded based on estimates and included under the caption ''Unbilled revenues''. Differences between accrued amounts and the actual unbilled revenues are recognized in the following period.

3. Main accounting policies, judgments and estimates (Continued)

(b) International fixed communications

The income from international telecommunication services are calculated according to fixed termination rates under bilateral agreements with several telecom operators. These agreements also establish whether it is the operator of the sending network that must submit the credit to the operator of the receiving network or whether the operator of the network receiving must provide the debit first.

(c) Internet Protocol Television (''IPTV'') and Direct to Home (''DTH'') services

The income from the television service through Internet Protocol Television (IPTV) and satellite are recognized as follows: (i) the amounts charged for monthly subscription of services used are recognized in the period in which the service is rendered; (ii) equipment rental is recognized over the lease period; (iii) equipment sales are recognized upon sale; and (iv) penalties imposed to customers are recognized when received.

(d) Internet services

Revenues from ISP services result essentially from monthly subscription fees and telephone traffic when the service is used by customers. These revenues are recognized when the service is rendered.

(e) Advertising services

Advertising revenues from telephone directories and related costs are recognized in the period in which the directories are effective. PT Comunicações has a contract with Páginas Amarelas whereby the latter is responsible for production, publishing and distribution of PT Comunicações' telephone directories, as well as for selling advertising space in the directories. The total cost to be paid by PT Comunicações for such services is set at a fixed 78% of its gross revenues from the sale of advertising space in telephone directories. The prices of advertising space are fixed, not contingent, and based on the expected volume of the distributed directories (approximately one to every telephone number). Revenues from the sale of advertising space are invoiced directly by PT Comunicações to its corporate clients during the one-year advertising period. These revenues are recognized in earnings on a monthly basis during the period for the respective directory.

(f) Leased lines and rental of ducts and capacity

Income from leased lines is recorded as operating leases in the respective period, under the caption ''Services rendered''.

(g) Interest

Interest revenue is recognized based on the effective interest method.

Income relative to advance payments made by customers are deferred and recognized when the service is rendered.

3.21. Own work capitalized

Internal expenses incurred by the Company in the construction of fixed assets, which correspond to materials, work force and transportation, at cost, are capitalized under the caption ''Own work capitalized'', only when the following requirements are met: (a) the tangible assets are identifiable; (b) the tangible assets will generate future economic benefits; and (c) development expenses can be reliably measured.

3. Main accounting policies, judgments and estimates (Continued)

3.22. Losses and gains recognised under projects

The Company records losses and gains associated with projects based on their stage of completion. Accordingly, invoices issued related to work not yet performed are recorded under the caption ''Deferrals'', unbilled revenues related to work in progress are recorded under the caption ''Unbilled revenues'' and expenses related to unbilled performed work are recorded as work in progress under the caption ''Inventories''.

3.23. Financial assets and liabilities

Financial assets and liabilities are recognized in the balance sheet when the Company becomes party to the corresponding contractual terms, and are classified at cost or amortised cost.

(a) Financial assets and liabilities at cost or amortised cost

Assets and liabilities are classified at cost or amortised cost if they present the following characteristics: (a) have a defined maturity; (b) have a fixed or determined income; and (c) do not represent a derivative financial instrument or do not include a derivative financial instrument.

Assets and liabilities classified in this category are measured at amortised cost reduced by accumulated impairment losses (for financial assets) and correspond primarily to the following asset and liability captions included in the Company's balance sheet:

- Accounts payable to Group companies
- Accounts receivable—trade
- Unbilled revenues and accrued expenses
- Advances to suppliers and from accounts receivable
- State and other public entities
- Other accounts receivable and payable
- Other financial assets and liabilities
- Cash and bank deposits
- Loans obtained
- Suppliers and investments suppliers

Amortized cost is determined through the effective interest method. The effective interest rate is the one that discounts the estimated future payments and receipts until the term of the financial instrument to the carrying value of the financial asset or liability.

(b) Impairments on financial assets

Financial assets included under the caption ''cost or amortised cost'' are subject to impairment tests at each year end. Such assets are impaired when there is clear evidence that, as a result of one or more events occurred after its initial recognition, their future estimated cash flows will be affected.

For assets measured at amortised cost, the impairment loss corresponds to the difference between the carrying amount of the asset and the present value of the revised future estimated cash flows discounted using the initial effective interest rate. For financial assets measured at cost, the impairment loss corresponds to the difference between the carrying amount of the asset and the best available estimate of the asset's fair value.

3. Main accounting policies, judgments and estimates (Continued)

Subsequently, if there is a reduction in the impairment loss as a result of an event occurring after the initial recognition of the loss, the impairment should be reversed through earnings. The reversal is recognized up to the amount that would be recorded if the loss had not been initially recognized.

Impairment losses and related reversals are recorded in earnings mainly under the captions ''Impairment of accounts receivable ((losses)/reversals)''.

(c) Derecognition of financial assets and liabilities

The Company derecognizes financial assets when its contractual rights to obtain the asset's cash flows expire, or when it transfers to another entity all the significant risks and rewards associated with the ownership of such assets. We also derecognize financial assets transferred in respect to which the Company has retained some significant risks and benefits, in the case that control over them has been assigned. The Company derecognizes financial liabilities only when the corresponding obligation is settled, cancelled or expired.

3.24. Main accounting estimates and judgements

To prepare the standalone financial statements under NCRF, the Company's Board of Directors uses estimates and assumptions that affect in the application of accounting policies and the amounts reported. Estimates and judgements are continually evaluated and are based on historical experience and on other factors including expectations of future events that are believed to be reasonable under the circumstances on which the estimate was based, or as a result of new information or more experience.

The most significant accounting estimates reflected in the financial statements are the following:

(i) Post-employment benefits

The present value of liabilities for post-employment benefits is calculated based on actuarial methodologies, which use certain actuarial assumptions that are reviewed annually by the Company. Any change in these assumptions will impact the carrying value of liabilities. The main assumptions used are described in Note 11.

(ii) Analysis of goodwill impairment

The Company tests annually whether goodwill has suffered any impairment. The recoverable amounts of cash-generating assets are determined based on value-in-use calculations. The use of this method requires the estimate of future cash flows expected to arise from the continuing operation of the cash generating asset, the choice of a growth rate to extrapolate cash flow projections and the estimate of a suitable discount rate for each cash generating asset. The main assumptions used in the goodwill analysis are disclosed in Note 8.

(iii) Useful life of tangible fixed assets

The Company used estimates in order to determine to the useful life of tangible fixed assets.

(iv) Provisions recognition

The Company is party to several legal proceedings in progress for which, based on the opinion of its lawyers, judgments are made to determine the recognition of any necessary provisions to meet these contingencies.

3. Main accounting policies, judgments and estimates (Continued)

(v) Impairment recognition

Impairment on accounts receivable are calculated mainly based on receivables seniority, the clients risk profile and their financial situation.

(vi) Determining the fair value of assets measured by revaluation model

The Company uses the revaluation model to measure the book value of the asset classes ''Land and natural resources'', ''Buildings and other constructions'' and the ''Telecommunication infrastructure'' included under the caption ''Basic equipment'' under tangible fixed assets. In order to assess the fair value of real estate properties included under the assets classes ''Land and natural resources'' and ''Buildings and other constructions'', the Company uses external appraisers to determine their value based on certain specific indicators related to the real estate market. In order to assess the revalued amount of the asset class ''Telecommunication infrastructure'', the Company applied the cost replacement method based on current and observable prices of materials and construction work related to the installation underground of the telecommunication infrastructure.

(vii) Purchase price allocation of the investment in TMN

In connection with the acquisition of TMN completed on 30 November 2010, the Company completed in 2011 the purchase price allocation of this investment. For that purpose, certain intangible assets of TMN were adjusted to fair value, based on a valuation methodology that required the estimate of future cash flows resulting from the operations of this affiliated company, the choice of a growth rate to extrapolate cash flow projections beyond the time horizon covered and the definition of a suitable discount rate to compute the present value of those cash flows.

Estimates used are based on the best information available during the preparation of financial statements, although future events, neither controlled nor foreseeable by the Company, could occur and have an impact on those estimates. In accordance with ''NCRF 4 Accounting Policies, Changes in Estimates and Errors'' (''NCRF 4''), changes to these estimates that occur after the date of the financial statements are recognized in net income, using a prospective methodology. For this reason and given the degree of uncertainty, real results of the transactions in question may differ from the corresponding estimates.

3.25. Events occurred after the balance sheet date

Events after the balance sheet date that provide additional information about conditions existing at the balance sheet date are reflected in the financial statements. Events after the balance sheet date that provide information about conditions that occur after the balance sheet date are not reflected in the financial statements, but are disclosed in the notes to the financial statements, if material.

4. Cash flows

For the purposes of the cash flow statement, the caption ''Cash and cash equivalents'' includes cash, bank deposits immediately available and other short-term investments with high liquidity and with initial maturities up to three months, net of bank overdrafts.

The Company is exposed to a liquidity risk if its sources of funding, including cash balance, operating cash inflows, divestments and cash flows obtained from financing operations, do not match with our financing needs, such as operating and financing outflows, investments, shareholder remuneration and debt repayments. Based on the cash flows generated by its operations, on the available cash and in the possibility to obtain financing from Portugal Telecom under the centralized cash management system implemented in the Group, the Company believes that it is able to meet its obligations.

(Amounts in Euro)

4. Cash flows (Continued)

The cash flow statement was prepared in accordance with ''*NCRF 2 Statement of Cash Flows*'', which includes the following:

(a) Cash receipts of income taxes

The Company is part of the special taxation regime for Groups of companies adopted by Portugal Telecom, and as such income taxes and withholding taxes by third parties are recorded on the balance sheet as payables and receivables from Portugal Telecom (Note 12). In this context, the Company received in 2012 an amount of Euro 35,940,339 and paid in 2011 an amount of Euro 52,218,724.

The payments made in 2011 reflect primarily the payments made by PT Prime on behalf of PT Comunicações, amounting to Euro 57,295,923, which relate mainly to payments on account related to the 2011 income tax payable in 2012 and the settlement of the fourth and last instalment due on the 2010 income tax. As a result of the merger of this affiliated company undertaken at the end of 2011, effective as from 1 January, and because PT Comunicações presented a tax loss in 2011, the Company recovered in 2012 the payments on account made in 2011, amounting to Euro 38,662,510.

(b) Cash receipts resulting from loans granted

In 2011, this caption relates to a partial reimbursement, amounting to Euro 160,000,000 (Note 12.1), regarding loans granted to TMN.

(c) Dividends received

In 2012 and 2011, PT Comunicações received dividends from the following companies:

	2012	2011
	Euro	
TMN (Nota 10)	235,479,275	—
CTM—Companhia de Telecomunicações, S.A.R.L. (''CTM'')(i)	2,625,352	2,134,792
Multicert—Serviços de Certificação Electrónica, S.A. (Nota 10)	117,198	—
Infonet Portugal—Serviços de Valor Acrescentado, Lda. (Nota 10)	51,328	255,241
	238,273,153	**2,390,033**

(i) The amounts received from this affiliated company differed from the attributable amounts of Euro 2,700,796 and Euro 2,280,036 (Note 10), respectively, as a result of exchange rate differences between the attribution and payment dates.

(d) Payments resulting from financial investments

In 2012 and 2011, this caption is composed as follows:

	2012	2011
	Euro	
Advances for the aquision of RETI (Note 10)	1,094,382	2,271,730
Acquisition of Fibroglobal—Comunicações Electrónicas, S. A. (''Fibroglobal'') (Note 10)(i)	1,000,000	—
Acquisition of PT Blueclip—Serviços de Gestão, S. A. (''PT Blue Clip'') (Note 10)	50,000	—
Other	15,990	4,252
	2,160,372	**2,275,982**

(i) During the year 2012, PT Comunicações subscribed a share capital increase of this company for a total amount of Euro 1,000,000, a result of which obtained a 5% interest in Fibroglobal, which was recorded under the caption ''Financial investments—other methods''.

(Amounts in Euro)

4. Cash flows (Continued)

(e) Cash receipts (payments) related to loans obtained

In 2012 and 2011, cash receipts from loans obtained, net of cash payments from loans obtained, has the following composition:

	2012	2011
	Euro	
Receipts (payments) obtained under commercial paper programmes	1,092,000,000	(227,000,000)
Loans granted by PT Portugal (Note 22.1)	—	727,000,000
Leases and other loans obtained	(21,390,512)	(12,914,385)
Payments to the ''Caixa Geral de Aposentações'' (Note 22.4)(i)	(454,316,000)	(467,360,397)
Intercompany loans within centralized cash management	(472,161,084)	4,761,996
	144,132,404	**24,487,214**

(i) As at 31 December 2010 and following the transfer of unfunded regulatory pension obligations, the Company had recognized an account payable to the Portuguese State for the amount of Euro 921.7 million. Of this outstanding amount, the Company repaid Euro 17.4 million and Euro 450.0 million in January and December 2011 (Note 22.4), respectively, and the remaining amount due of Euro 454.3 million (Note 22.4) was repaid in December 2012.

(f) Interest and related expenses

The increase in payments of interest and related expenses, from Euro 155,756,690 in 2011 to Euro 426,211,970 in 2012, reflects primarily lower accrued expenses, which amounted to Euro 163,750,159 and Euro 67,038,381 as at 31 December 2011 and 2012 (Note 24), respectively, corresponding to interest and similar expenses incurred in 2011 and 2012, respectively, but which payment occurred only in the following year.

(g) Cash and cash equivalents

In 2012 and 2011, this caption is composed as follows:

	2012	2011
	Euro	
Cash	14,669,035	35,473,531
Bank deposits immediately available	6,496,946	19,717,856
Cash and bank deposits	**21,165,981**	**55,191,387**

5. Changes in accounting policies and estimates and errors

In the year ended 31 December 2012, the Company did not adopt any new or revised standard or interpretation and did not voluntarily change any other accounting policy. In 2012, PT Comunicações reviewed the useful life of certain tangible assets, including mainly transmission equipments, which resulted in lower depreciation and amortization costs by approximately Euro 19 million.

In 2012, no other regulations or new or revised interpretations were issued that are not already in force.

In 2012, no restatements of any material errors or significant changes in accounting estimates were made with respect to previous years.

(Amounts in Euro)

6. Tangible fixed assets

6.1. Movements in tangible fixed assets

During the years ended 31 December 2012 and 2011, movements occurred in tangible fixed assets were as follows:

	2012								
	Land and natural resources	Buildings and other constructions	Basic equipment	Transportation equipment	Administrative equipment	Other tangible fixed assets	Tangible fixed assets in progress	Advances to suppliers of assets	Total
					Euro

The additions occurred in 2012 and 2011 under the captions ''Basic equipment'', ''Administrative equipment'' and ''Tangible fixed assets in progress'' relate primarily to the acquisition of software, network infrastructure and terminal equipment focused mainly on the Pay-TV business.

6.2. Revaluations

In 2008, PT Comunicações has changed the accounting policy on the valuation of real estate assets and ducts infra-structure, from the cost model to the revaluation model. The revaluations of real estate assets and ducts infra-structure were recorded as at 30 June and 30 September 2008 and resulted in the revaluation of those assets by Euro 208,268,320 and Euro 866,764,702, respectively. PT Comunicações, following the adoption of the SNC, maintained the accounting policy to use the revaluation model for these classes of assets, under which shall compute revaluation amounts, at maximum, every three years, and evaluates between those 3 year periods the possible existence of evidence that might result in a significant change in the revalued amount of those assets.

6. Tangible fixed assets (Continued)

The determination of the fair value of real estate properties was made by an independent appraiser based primarily on: (i) observable prices of recent market transactions in an active market; (ii) profitability method for commercial and administrative real estate; and (iii) the cost of acquiring or producing similar real estate with the same purpose for technical buildings. Under the first methodology, the main assumptions used in 2008 were the discount rate (average of 8%) and the monthly rent per square meter (average of Euro 6).

The determination of the fair value of the ducts infra-structure was made internally based on the replacement cost approach. This valuation process was based primarily on: (i) current and observable prices of materials and construction work related to the installation of the ducts underground; (ii) the nature of the soil and road surface where ducts are installed, which has an impact on the construction cost; (iii) internal costs directly attributable to the construction of the ducts infra-structure network; (iv) a depreciation factor, in order to ensure that the replacement cost is consistent with the remaining useful life of the assets revalued; and (v) a technological factor, which reflects the technological changes occurred, namely related to the kinds of ducts which no longer exist and were replaced by other ones. Generally, the prices of materials and construction work together with other qualitative assumptions referred to above resulted in a valuation of the ducts infra-structure in 2008 which reflects an average cost per meter of duct between Euro 58 and Euro 119, depending on the area where the infra-structure is located.

In accordance with the Company's accounting policy to revalue these assets every three years, PT Comunicações performed another revaluation of the real estate assets and transmission infrastructure in 2011, through the same methodology described above. These revaluations were effective as at 31 December 2011 and resulted in a net reduction of tangible assets amounting to Euro 131,418,996, of which Euro 126,167,563 was recognized directly in shareholders' equity, under the caption ''Revaluation surplus'' (Note 20.6), and an impairment loss of Euro 5,251,433 was recognized in earnings under the caption ''Depreciation and amortization ((losses)/reversals)''.

The split of these impacts between real estate and telecommunication ducts infrastructure is as follows:

- A reduction in the carrying value of the telecommunication infrastructure amounting to Euro 189,372,570, recognized directly in shareholders' equity in order to reduce the existing revaluation reserves regarding these assets, which is primarily explained by a decrease in the construction cost and also technological improvements, leading to a reduction in the average cost per meter of duct to between Euro 42 and Euro 70, depending on the area where the infra-structure is located; and

- A net increase in the carrying value of real estate assets amounting to Euro 57,953,574, including a gain of Euro 63,205,007 recorded directly in shareholders' equity and a loss of Euro 5,251,433 recognized in the Income Statement. The increase in the carrying value of real estate assets recognized as a result of this revaluation reflects mainly the depreciation expenses recorded over the last three years, which more than offset the reduction in the fair value of these assets. Regarding the main assumption related to this revaluation, the average monthly rent per square meter for the real estate assets that were revalued in both 2008 and 2011 remained broadly stable at Euro 6, although the overall average monthly rent per square meter increased to Euro 7, as a result of real estate assets acquired in 2009 and 2010.

The amortization of the surplus resulting from the revaluation of real estate properties and ducts infra-structure amounted to approximately Euro 10 million and Euro 32 million in 2012, respectively, and to Euro 11 million and Euro 45 million in 2011, respectively. Consequently, if these assets had been carried under the cost model, the carrying amounts of the real estate properties and the ducts infra-structure as of 31 December 2012 would have been reduced by approximately Euro 179 million and Euro 498 million, respectively.

(Amounts in Euro)

6. Tangible fixed assets (Continued)

For other classes of assets that were previously revalued to the date of transition to NCRF, the Company opted, under the adoption of new accounting standards, to consider the book value at the date of transition as deemed cost, as permitted by the exception foreseen in paragraph 10 of NCRF 3, so that these assets are measured according to the cost model.

In accordance with the applicable legislation, a portion (40%) of the increase in depreciation resulting from legal revaluations made in previous years, and the entire increase in depreciation resulting from revaluations recognized in 2008 do not constitute a cost for the purpose of determining corporate income tax payable (except the revaluations resulting from Decree-Law no. 126/77 of April 2, which are included in their entirety). Consequently, a deferred tax liability was recorded corresponding to the revaluation surplus to be realized (Note 15).

6.3. Other situations related to tangible fixed assets

During the years ended 31 December 2012 and 2011, the following expenses were included in the carrying value of tangible assets and intangible assets in progress:

	2012	2011
	Euro	
Materials consumed	3,094,392	4,020,725
Wages and salaries	33,646,133	31,817,292
Other expenses and losses	5,323,514	4,681,663
	42,064,039	**40,519,680**

The nature of the main projects that include own work capitalized relates to the planning, supervision and monitoring of installation of terminal equipment, namely IPTV equipment and Fiber-to-the-Home (''FTTH'').

For the net carrying value of tangible fixed assets as at 31 December 2012, we note the following:

- There are buildings installed in properties of third parties in the total amount of Euro 8,415,303;
- There are assets of PT Comunicações composed mainly of real estate, that were not registered under the Company's name amounting to Euro 9,240,550, of which Euro 1,570,804 are registered under the name of PT SGPS;
- The Company has tangible fixed assets located overseas with a net book value of Euro 15,448,762, including primarily participation in submarine cable consortiums;
- The tangible fixed assets which, under the terms of article 5 of the Annex to Decree-Law no. 31/2003 of February 17 which constituted the Bases for the Concession of Public Telecommunications Service (Note 1), are subject to the Concession, had a carrying value of Euro 1,765,103,812.

(Amounts in Euro)

7. Investment properties

During the years ended 31 December 2012 and 2011, movements occurred in this caption were as follows:

	2012	2011
	Euro	
Gross value		
Opening balance	17,791,958	25,818,088
Transfers, adjustments and other	(999,538)	(8,026,130)
Closing balance	**16,792,420**	**17,791,958**
Accumulated amortisation and impairment losses		
Opening balance	5,399,654	11,064,079
Amortisation (Nota 33)	482,639	450,348
Transfers, adjustments and other	2,046,290	(6,114,773)
Closing balance	**7,928,583**	**5,399,654**
Net value	**8,863,837**	**12,392,304**

Land and buildings that were not used in operating activities as at 31 December 2012 and 2011 were classified under this caption, according to the accounting policy adopted by the Company.

These assets are stated at acquisition cost less accumulated depreciation and impairment losses, if any. PT Comunicações makes periodic valuations of these assets. As at 31 December 2012, the real estate book value with acquisition cost exceeding Euro 50,000 amounted to approximately Euro 8.9 million, whereas the corresponding market value amounted to Euro 9.1 million.

During the years ended 31 December 2012 and 2011, PT Comunicações has obtained rental income from this real estate amounting to Euro 638,953 and Euro 640,122, respectively , which were classified under the caption ''Other income and gains'' (Note 31).

8. Goodwill

The composition of goodwill as at 31 December 2012 and 2011, computed following the acquisition of subsidiaries, some of which were subsequently merged into the Company, is as follows:

Entity	Year of acquisition	Carrying value
		Euro
Mobile Business (TMN)	2010	2,145,416,586
Wireline Business		
Internet Business / portal (ex-PT.Com)	2007	560,447,103
Corporate Business (ex-PT Prime)	2007	235,323,593
International Business (ex-Marconi)	2000	41,255,121
		2,982,442,403

For the purposes of impairment tests, goodwill was allocated to cash generating units. The recoverable amount was determined from the respective value in use through the discounted cash flows methodology, using a cash flow forecast of a four year period, which was prepared internally. The discount rate applied to projected cash flows, which was determined taking into account the risk

(Amounts in Euro)

8. Goodwill (Continued)

associated with each business, and the growth rates used to extrapolate cash flow projections beyond the period covered by the forecasts prepared internally were as follows:

Assumptions	Internet Business	Corporate Business
Growth rate	1.0% - 1.5%	1.0% - 1.5%
Discount rate	8.9% - 9.9%	8.9% - 9.9%

The recoverable amount of each cash generating unit was determined for the minimum and maximum values listed in the table above and the Company's management concluded that, as at 31 December 2012, the book value of the cash generating unit, including goodwill, did not exceed its recoverable amount.

9. Intangible assets

During the years ended 31 December 2012 and 2011, movements occurred in intangible assets were as follows:

In 2012, additions under the caption ''Industrial property and other rights'' relate primarily to (1) the acquisition of software licenses regarding projects to develop new applications and features in the commercial, financials and logistic areas. In 2011, additions include primarily (1) the commitments assumed under the DTT license (Note 1), amounting to Euro 23,595,180, and (2) the acquisition of software licenses with same nature of those mentioned above.

As at 31 December 2012, the net book value of the caption ''Industrial property and other rights'' includes mainly:

– An amount of Euro 185 million related to the acquisition of full ownership of the Basic Network by PT Comunicações to the Portuguese State, concluded in December 2002, which corresponds to the gross value capitalized in 2002 amounting Euro 339 million net of accumulated depreciation;

– An amount of Euro 16 million related to a contract entered into by PT Comunicações in 2007 and 2009 for the acquisition of satellite capacity rights until 2015, which was recorded as a financial lease; and

– An amount of Euro 23 million, corresponding to the TDT licenses recorded in 2011.

In 2012 and 2011, the Company performed innovation, research and development activities under which the following expenses and fixed assets were recorded:

	2012	2011
	Euro	
Tangible fixed assets	72,940,479	134,591,146
Intangible assets	1,424,785	2,021,607
Other operation expenses	10,796,763	11,611,026
Total	**85,162,027**	**148,223,779**

(Amounts in Euro)

10. Financial investments—equity method of accounting

During the years ended 31 December 2012 and 2011, the movements occurred under this caption were as follows (Note 12):

	2012

(a) On 3 May 2012, PT Comunicações concluded the acquisition of an investment in RETI that was previously held by TVI, through the payment of the fifth and last installment, amounting to Euro 1,094,382, that was considered in an agreement entered in December 2009, and following the amounts already paid in previous years as advances for financial investments, for the total amount of Euro 6,771,730. These amounts were fully adjusted based on the Company's expectation that RETI's analogical network was redundant considering the network of PT Comunicações. As a result of the acquisition of this investment, the Company recorded an investment of Euro 71,699, corresponding to the shareholders' equity of the acquired company, and recorded a goodwill of Euro 7,794,413, corresponding to the difference between the acquisition price of Euro 7,866,112 and the financial investment. Both the goodwill and the impairment losses recognized in previous years over payments made or to be made under the agreement entered into in December 2009, amounting to Euro 7,866,112, were transferred to net income. In December 2012, the Board of Directors of both companies approved the merger of RETI into PT Comunicações as from 3 May 2012 and, as such, the Company eliminated the financial investment in RETI, amounting to Euro 71,699, and recorded in its balance sheet the assets and liabilities of RETI as of that date that were transferred to PT Comunicações.

(b) On 13 January 2013, as mentioned in Note 37, Portugal Telecom entered into a definitive agreement for the sale of the 28% stake held by the Group in the share capital of CTM, including the 25% and 3% interests held by PT Participações and PT Comunicações, respectively. Consequently, the Company's investment in CTM was classified as a non-current asset held for sale as at 31 December 2012. This transaction, which is still pending the satisfaction of a set of precedent conditions will

(Amounts in Euro)

10. Financial investments—equity method of accounting (Continued)

allow the Group to receive a total amount of 411.6 million US dollars, subject to certain cash flow adjustments, amount that should be spitted proportionally between the companies that hold this investment.

(a) This caption includes: (i) the elimination of the Company's financial investment recorded as at 31 December 2010 in relation to its former affiliated company PT Prime, corresponding to the shareholders' equity of such company on that date, amounting to Euro 157,378,990, and (ii) the financial investments of PT Prime in its affiliated companies, which were transferred to the Company as a result of this merger, amounting to Euro 2,559,075.

(b) This caption relates to the disposal of certain network assets to TMN and corresponds to the difference between the disposal price (fair value) and the respective carrying value, since as this was a transaction with an affiliated company, the related capital gain was eliminated and recorded as a reduction to the financial investment in TMN, in order to offset the excess depreciation that TMN will recognize regarding these assets in relation to the depreciation that would have been recognized if these assets had not been disposed of.

In 2012 and 2011, increases the gross value of financial investments accounted for by the equity method gross were as follows:

	2012	2011
	Euro	
Acquisition of PT Blueclip (Note 4)	50,000	—
Advances for the aquision of financial investments (Note 4)	1,094,382	2,271,730
	1,144,382	**2,271,730**

During the year ended 31 December 2011, the reduction in gross value of investments recorded under the equity method of accounting, amounting to Euro 169,172, relates to the liquidation of Tele Larm, in which the Company held a 50% interest.

(Amounts in Euro)

10. Financial investments—equity method of accounting (Continued)

In 2012 and 2011, the movements occurred in investments in subsidiaries and associated companies resulting from the application of the equity method of accounting were recorded as follows:

	2012	2011
	Euro	
Gains in affiliated companies net (Note 26)	120,535,593	153,286,767
Adjustments to financial assets (Note 20.5)	(301,338,547)	(229,883,184)
	(180,802,954)	**(76,596,417)**

The detail of dividends attributed by subsidiaries and associated companies in 2012 and 2011 is as follows (Note 4):

	2012	2011
	Euro	
TMN	235,479,275	—
CTM	2,700,796	2,280,036
Multicert	117,198	—
Infonet	51,328	255,241
	238,348,597	**2,535,277**

11. Post-retirement benefits

As referred to in Note 3, PT Comunicações is responsible for the payment of post-retirement benefits under defined benefit plans, which include pensions and pension supplements to retired and active employees, healthcare services after retirement age and salaries to suspended and pre-retired employees.

The actuarial valuations of Portugal Telecom's defined benefit plans as at 31 December 2012, 2011 and 2010 were computed based on the projected unit credit method and considered the following main financial and demographic actuarial assumptions:

	2012	2011	2010
		Euro	
Financial assumptions			
Discount rate for obligations related to:			
Pension supplements	3.00%	4.75%	4.75%
Salaries to suspended and pre-retired employees	2.00%	3.75%	3.75%
Healthcare	4.00%	4.75%	4.75%
Salary growth rate for obligations related to:			
Pension supplements and healthcare	1.75%	1.75%	1.75%
Salaries to suspended and pre-retired employees	0,00%—1,75%[(i)]	0,00%—1,75%[(i)]	1.75%
Pension growth rate	GDP linked	GDP linked	GDP linked
Social Security sustainability factor	Applicable	Applicable	Not applicable
Inflation rate	2.00%	2.00%	2.00%
Healthcare cost trend growth rate	3.00%	3.00%	3.00%
Expected return on assets	6.00%	6.00%	6.00%

(i) For salaries payable between 2013 and 2017, the salary growth rate ranges from 0% to 1% depending on the amount of the salary. As from 2018, the salary growth rate is 1.75% for all situations.

(Amounts in Euro)

11. Post-retirement benefits (Continued)

	2012	2011	2010
		Euro	
Demographic assumptions			
Mortality tables for active beneficiaries:			
Males	PA (90)m adjusted	AM (92)	AM (92)
Females	PA (90)m adjusted	AF (92)	AF (92)
Mortality tables for non-active beneficiaries:			
Males	PA (90)m adjusted	PA (90)m adjusted	PA (90)m adjusted
Females	PA (90)f adjusted	PA (90)f adjusted	PA (90)f adjusted
Disability table (Swiss Reinsurance Company)	25%	25%	25%
Active employees with spouses under the plan	35%	35%	35%
Turnover of employees	Nil	Nil	Nil

The changes in actuarial assumptions were primarily due to changes occurred in market conditions.

The discount rate was computed based on long-term yield rates of high-rating bonds as of the date of the Balance sheet for durations comparable to the liabilities for pensions and pension supplements, salaries and health care benefits (between 4 and 15 years).

The rate of return on long-term fund assets was estimated based on historical information on the return of portfolio assets, the expected portfolio in future years and certain financial market performance indicators usually considered in market analysis.

Salary growth rate was established in accordance with Group policy for wages and salaries and pension growth rates and the sustainability factor was established in line with Portuguese Government information.

Demographic assumptions considered by Portugal Telecom are based on mortality tables generally accepted for actuarial valuation purposes, with these tables being periodically adjusted to reflect the actual mortality rates observed among the plan participants.

In 2012 and 2011, the total impact of changes in actuarial assumptions a net loss of Euro 136,212,106, and a net gain of Euro 19,337,022 (Notes 11.7), respectively, and was recognized directly in shareholders' equity.

The impact of an increase by 25 basis points on the average discount rate actuarial assumption would be a decrease of the responsibilities for post-retirement benefits by approximately Euro 21 million as at 31 December 2012, while the impact of an increase (decrease) in the health care cost trend rate by 1% would be an increase (decrease) of the responsibilities for post-retirement benefits by approximately Euro 71 million (Euro 58 million) as at 31 December 2012.

The impact of an increase (decrease) by 1% in the rate of return on long-term fund assets would be a decrease (increase) of post-retirement benefit costs in the year 2012 by approximately Euro 3 million, corresponding to the increase (decrease) in expected return on assets, and the impact of an increase (decrease) by 1% in the health care cost trend rate would be an increase (decrease) of post-retirement benefit costs in the year 2012 by approximately Euro 4 million (Euro 3 million).

11.1. Supplement benefits

As referred to in Note 3, prior to the transfer of pension obligations to the Portuguese State, PT Comunicações was responsible for the payment of regulatory pensions and pension supplements to

(Amounts in Euro)

11. Post-retirement benefits (Continued)

retired and active employees, and is no longer responsible for the payment of regulatory pensions following that transfer. These liabilities, which were estimated based on actuarial valuations, are as follows:

a) Retirees and employees of TLP and TDP hired prior to 23 June 1994 are entitled to receive a pension supplement from PT Comunicações, which complements the pension paid by the Portuguese social security system.

b) Retirees and employees of Companhia Portuguesa Rádio Marconi, SA (''Marconi'', a company merged into PT Comunicações in 2002) hired prior to 1 February 1998 are entitled to a supplemental pension benefit (''Marconi Complementary Fund''). In addition, PT Comunicações contributes to the fund ''Fundo de Melhoria Marconi'' with 1.55% of the salaries paid to these employees, which is responsible to pay the additional pension supplement.

c) On retirement, PT Comunicações pays a lump sum gratuity of a fixed amount which depends on the length of service completed by the employee.

Employees hired by PT Comunicações or any of its predecessor companies after the dates indicated above are not entitled to these benefits, as they are covered by the general Portuguese Government social security system.

As at 31 December 2012, pension supplement plans from PT Comunicações covered 19,814 beneficiaries, of which approximately 63% are non active.

Based on the actuarial reports, the pension benefit obligation and the fair value of the pension funds as at 31 December 2012 and 2011 were as follows:

	2012	2011
	Euro	
Projected benefit obligations related to pension, pension supplements and gratuities	126,751,790	121,168,176
Pension funds assets at fair value	(99,529,441)	(98,480,548)
Unfunded pension obligations	**27,222,349**	**22,687,628**
Prior years' service gains[(a)]	3,079,179	3,998,608
Present value of unfunded pension obligations (Note 11.4)	**30,301,528**	**26,686,236**

(a) This caption refers to the component of the prior years' service gains resulting from the changes in the benefits granted under pension supplement plans related to unvested rights. This amount will be recognized in earnings during the estimated period in which those benefits will be used by employees (9 years).

(Amounts in Euro)

11. Post-retirement benefits (Continued)

During the years ended 31 December 2012 and 2011, the movement in the projected benefit obligations was as follows:

	2012	2011
	Euro	
Opening balance of the projected benefit obligation	**121,168,176**	**129,290,651**
Payments of benefits and contributions		
Benefits paid by the Company (Note 11.5)	(983,643)	(1,109,982)
Benefits paid by the funds	(9,392,359)	(9,692,964)
Pension costs		
Service cost	442,893	460,701
Interest cost	5,345,763	5,712,999
Work force reduction programme costs	87,682	10,245
Net actuarial losses	9,878,905	(3,503,474)
Transfers between plans (Note 11.3)	204,373	—
Closing balance of the projected benefit obligation	**126,751,790**	**121,168,176**

During the years ended 31 December 2012 and 2011, the movement in the projected benefit obligations was as follows:

	2012		2011	
	Amount	%	Amount	%
		Euro		
Equities	19,922,371	20.0%	19,994,550	20.3%
Bonds	60,201,161	60.5%	58,907,519	59.8%
Property[(a)]	2,545,908	2.6%	2,713,542	2.8%
Cash, treasury bills, short-term stocks and other assets	16,860,001	16.9%	16,864,937	17.1%
	99,529,441	**100.0%**	**98,480,548**	**100.0%**

(a) During the years ended 31 December 2011, in connection with the transfer of unfunded pension obligations to the Portuguese State, Portugal Telecom acquired from the pension funds all real estate properties that were rented to Group companies and recognized them under the caption ''Tangible fixed assets'' for an amount of Euro 3 million.

Portugal Telecom is exposed to risks related to the changes in the fair value of the plan assets associated with Portugal Telecom's post-retirement defined pension supplement plans. The main purpose of the established investment policy is capital preservation through five main principles: (1) diversification; (2) stable strategic asset allocation and disciplined rebalancing; (3) lower exposure to currency fluctuations; (4) specialized instruments for each class of assets; and (5) cost control.

During the years ended 31 December 2012 and 2011, the movement in the plan assets was as follows:

	2012	2011
	Euro	
Opening balance of the plan assets	**98,480,548**	**109,335,604**
Actual return on assets	9,341,252	(2,812,092)
Payments of benefits	(9,392,359)	(9,692,964)
Contributions made by the Company (Note 11.5)	1,100,000	1,650,000
Closing balance of the plan assets	**99,529,441**	**98,480,548**

(Amounts in Euro)

11. Post-retirement benefits (Continued)

A summary of the components of the pension net cost recorded in the years ended 31 December 2012 and 2011 is presented below:

	2012	2011
	Euro	
Service cost	442,893	460,701
Interest cost	5,345,763	5,712,999
Expected return on plan assets	(5,633,800)	(6,278,854)
Amortization of prior years' service gains[a]	(622,156)	(624,094)
Current pension cost (Notes 11. 4 and 11.6)	**(467,300)**	**(729,248)**
Work force reduction program	87,682	10,245
Prior years' service gains (extraordinary amortization)	(297,273)	(12,281)
Total cost of redundancy programme (Notes 11. 4 and 11.6)	**(209,591)**	**(2,036)**
Total pension cost	**(676,891)**	**(731,284)**

(a) In 2012 and 2011, this caption corresponds to the annual amortisation of unrecognized prior year service gains obtained in previous years.

Actuarial gains and losses, which result from changes in actuarial assumptions and from differences between those actuarial assumptions and actual data, are recognized directly in shareholders' equity. During the years ended 31 December 2012 and 2011, the movement in accumulated net actuarial losses was as follows:

	2012	2011
	Euro	
Opening balance	**121,803,871**	**116,216,399**
Change in actuarial assumptions (Note 11.7)	17,334,547	(374,801)
Differences between actual data and actuarial assumptions (Note 11.7)		
Pension benefit obligation related[a]	(7,455,642)	(3,128,673)
Asset related	**(3,707,452)**	**9,090,946**
Closing balance	**127,975,324**	**121,803,871**

(a) Differences between actual data and actuarial assumptions related to the PBO, results mainly from updated information regarding beneficiaries.

11.2. Health care benefits

As referred to in Note 3, PT Comunicações is responsible for the payment of post-retirement health care benefits to certain employees, suspended employees, pre-retired employees, retired employees and their eligible relatives. Health care services are rendered by PT-ACS, which was incorporated with the sole purpose of managing the Company's Health Care Plan.

This plan, sponsored by PT Comunicações, includes all employees hired by PT Comunicações until 31 December 2000 and by Marconi until 1 February 1998.

As at 31 December 2012, healthcare plan from PT Comunicações covered 23.894 beneficiaries related to employees and former employees, of which approximately 76% are non-active at both dates. In addition, as at 31 December 2011, these plans also covered 10.850 beneficiaries related to relatives of employees and former employees, respectively.

(Amounts in Euro)

11. Post-retirement benefits (Continued)

The financing of the Health Care Plan is assured by defined contributions made by participants to PT ACS and the remainder by PT Comunicações, which incorporated a fund in 2004 that is managed independently for this purpose.

Based on the actuarial reports, the benefit obligation and the fair value of health care funds and prior year's service gains not yet recognized as at 31 December 2012 and 2011 are as follows:

	2012	2011
	Euro	
Projected benefit obligations	374,474,961	351,843,072
Plan assets at fair value	(299,865,329)	(246,214,842)
Net unfunded obligations	**74,609,632**	**105,628,230**
Prior years' service gains[a]	11,119,675	11,955,435
Present value of net unfunded obligations (Note 11.4)	**85,729,307**	**117,583,665**

(a) This caption refers to the component of the prior years' service gains resulting from the changes in the health care plan made in previous years related to those benefits that are not yet vested. This amount was deferred and will be recognized in earnings during the estimated period in which those benefits will be earned by employees.

During the years ended 31 December 2012 and 2011, the movement in the projected benefit obligations was as follows:

	2012	2011
	Euro	
Opening balance of the projected benefit obligations	**351,843,072**	**341,823,966**
Benefits paid by the Company (Note 11.5)	(18,977,302)	(17,964,841)
Pension costs		
Service cost	2,988,477	2,975,899
Interest cost	16,326,001	15,839,912
Work force reduction costs	(163,036)	186,854
Net actuarial losses	22,457,749	8,981,282
Closing balance of the projected benefit obligations	**374,474,961**	**351,843,072**

As at 31 December 2012 and 2011, the portfolio of the Company's autonomous fund to cover post-retirement health care benefit obligations was as follows:

	Amount 2012	%	Amount 2011	%
		Euro		
Equities[a]	75,277,597	25.1%	41,289,896	16.8%
Bonds[b]	88,178,641	29.4%	89,155,632	36.2%
Cash, treasury bills, short-term stocks and other assets[c]	136,409,091	45.5%	115,769,314	47.0%
	299,865,329	**100.0%**	**246,214,842**	**100.0%**

(a) As at 31 December 2012 and 2011, this caption corresponds to investments in shares of Banco Espírito Santo, one Portugal Telecom's shareholder.

(b) As at 31 December 2012 and 2011, this caption includes investments in bonds of Portugal Telecom amounting to Euro 66 million and Euro 56 million, respectively

(c) As at 31 December 2012 and 2011, this caption includes investments in the private equity funds ''Ongoing International Capital Markets'' and ''Ongoing International Private Equity'' totalling Euro 104 million and Euro 79 million, respectively, which are managed by Global Investment Opportunities SICAV, former Ongoing International, a Portugal Telecom's shareholder.

(Amounts in Euro)

11. Post-retirement benefits (Continued)

During 2012 and 2011, the movement in the plan assets was as follows:

	2012	2011
	Euro	
Opening balance of the plan assets	**246,214,842**	**338,810,084**
Actual return on assets	74,473,916	(69,303,386)
Refunds (Note 11.5)[(a)]	(20,823,429)	(23,291,856)
Closing balance of the plan assets	**299,865,329**	**246,214,842**

(a) This caption relates to refunds of expenses paid by PT Comunicações on behalf of PT ACS.

A summary of the components of the net periodic post-retirement health care cost in 2012 and 2011 is presented below:

	2012	2011
	Euro	
Service cost	2,988,477	2,975,899
Interest cost	16,326,001	15,839,912
Expected return on plan assets	(14,284,623)	(19,827,477)
Prior years' service gains	(840,553)	(841,263)
Current cost (Notes 11.4 and 11.6)	**4,189,302**	**(1,852,929)**
Work force reduction program costs	(163,036)	186,854
Prior years' service gains (extraordinary amortization)	4,793	(6,302)
Total cost of redundancy programme (Notes 11.4 and 11.6)	**(158,243)**	**180,552**
Health care cost	**4,031,059**	**(1,672,377)**

Actuarial gains and losses, which result from changes in actuarial assumptions and from differences between those actuarial assumptions and actual data, are recognized directly in shareholder's equity. During the years ended 31 December 2012 and 2011, the movement in accumulated net actuarial losses was as follows:

	2012	2011
	Euro	
Opening balance	**317,951,850**	**219,839,705**
Change in actuarial assumptions (Note 11.7)	37,439,494	—
Differences between actual data and actuarial assumptions (Note 11.7):		
Health care benefit obligation related	(14,981,745)	8,981282
Assets related	(60,189,293)	89,130,863
Closing balance	**280,220,306**	**317,951,850**

11.3. Pre-retired and suspended employees

As mentioned in Note 3, PT Comunicações is also responsible for the payment of salaries to suspended and pre-retired employees until they reach the Portuguese social security retirement age. As at 31 December 2012, there were 5,441 suspended and pre-retired employees.

These liabilities are not subject to any legal funding requirement, therefore the monthly payment of salaries is made directly by PT Comunicações.

(Amounts in Euro)

11. Post-retirement benefits (Continued)

During the years ended 31 December 2012 and 2011, the movement in the projected benefit obligation was as follows:

	2012	2011
	Euro	
Opening balance of the projected benefit obligation	**779,921,779**	**922,663,206**
Merger PT Prime (Note 11.4)	—	296,073
Benefits paid by the Company (Notes 11.4 and 11.5)	(159,183,194)	(173,540,423)
Interest cost (Notas 11.4 e 11.6)	25,657,325	31,348,662
Work force reduction costs (Notas 11.4 e 11.6)	(246,969)	31,034,557
Net actuarial losses (Note 11.7)	81,313,511	(31,880,296)
Transfers between plans (Note 11.1)	(204,373)	—
Closing balance of the projected benefit obligation (Note 11.4)	**727,258,079**	**779,921,779**

Actuarial gains and losses, which result from changes in actuarial assumptions and from differences between those actuarial assumptions and actual data, are recognized directly in shareholders' equity. During the years ended 31 December 2012 and 2011, the movement in accumulated net actuarial losses was as follows:

	2012	2011
	Euro	
Opening balance	**83,152,610**	**115,032,906**
Change in actuarial assumptions (Note 11.7)	81,438,065	(18,962,221)
Differences between actual data and actuarial assumptions (Note 11.7)	(124,554)	(12,918,075)
Closing balance	**164,466,121**	**83,152,610**

(Amounts in Euro)

11. Post-retirement benefits (Continued)

11.4. Responsibilities for post-retirement benefits

The movements observed in post-retirement benefit obligations, net of the related asset funds, during the years ended 31 December 2012 and 2011 were as follows:

	Pension benefits (Note 11.1)	Health care benefits (Note 11.2)	Salaries to pre-retired and suspended employees	Total
			Euro	
Balance as at 1 January 2011	**24,590,030**	**15,816,882**	**922,663,206**	**963,070,118**
PT Prime merger (Note 11.3)	—	—	296,073	296,073
Net periodic pension cost/(gain) (Note 11.6)	(729,248)	(1,852,929)	31,348,662	28,766,485
Work force reduction costs (Note 11.6)	(2,036)	180,552	31,034,557	31,213,073
Payments, contributions and refunds (Note 11.5)	(2,759,982)	5,327,015	(173,540,423)	(170,973,390)
Net atuarial losses (gains) (Notes 11.7 and 11.8)	5,587,472	98,112,145	(31,880,296)	71,819,321
Balance as at 31 December 2011	**26,686,236**	**117,583,665**	**779,921,779**	**924,191,680**
Transfers between plans	204,373	—	(204,373)	—
Net periodic pension cost/(gain) (Note 11.6)	(467,300)	4,189,302	25,657,325	29,379,327
Work force reduction costs (Note 11.6)	(209,591)	(158,243)	(246,969)	(614,803)
Payments, contributions and refunds (Note 11.5)	(2,083,643)	1,846,127	(159,183,194)	(159,420,710)
Net atuarial losses/(gains) (Notes 11.7 and 11.8)	6,171,453	(37,731,544)	81,313,511	49,753,420
Balance as at 31 December 2012	**30,301,528**	**85,729,307**	**727,258,079**	**843,288,914**

Certain post-retirement benefit plans have a surplus position and therefore were presented in the Balance sheet separately from those plans with a deficit position. As at 31 December 2012 and 2011, net post-retirement obligations were recognized in the Balance sheet as follows:

	2012	2011
	Euro	
Plans with a deficit position:		
Pensions	31,934,368	28,374,789
Healthcare (Note 11.2)	85,729,307	117,583,665
Salaries to pre-retired and suspended employees (Note 11.3)	727,258,079	779,921,779
	844,921,754	**925,880,233**
Plans with a surplus position:		
Pensions	(1,632,840)	(1,688,553)
	(1,632,840)	**(1,688,553)**
	843,288,914	**924,191,680**

(Amounts in Euro)

11. Post-retirement benefits (Continued)

11.5. Cash flows relating to post-retirement benefit plans

During the years ended 31 December 2012 and 2011, the payments and contributions regarding post-retirement benefits were as follows:

	2012	2011
	Euro	
Pensions		
Contributions to the funds (Note 11.1)	1,100,000	1,650,000
Payments of pension supplements (Note 11.1)	983,643	1,109,982
Sub total (Note 11.4)	**2,083,643**	**2,759,982**
Health care		
Refunds (Note 11.2)	(20,823,429)	(23,291,856)
Payments of health care expenses (Note 11.2)	18,977,302	17,964,841
Sub total (Note 11.4)	**(1,846,127)**	**(5,327,015)**
Other payments		
Payments of salaries to pre-retired and suspended employees (Notes 11.3 and 11.4)	159,183,194	173,540,423
Termination payments (Note 11.6)	1,482,772	1,707,171
Service cost related to liabilities tranferred to the Portuguese State[(a)]	25,482,982	21,783,360
Sub total	**186,148,948**	**197,030,954**
	186,386,464	**194,463,921**

(a) This caption corresponds to a fixed contribution paid by PT Comunicações to the Portuguese Social Security System relating to the annual service of active and suspended employees that were entitled to pension benefits under the Company's post-retirement benefit plans that were transferred to the Portuguese State in December 2010.

11.6. Post-retirement benefit costs

In 2012 and 2011, post-retirement benefit costs and curtailment and settlement costs were as follows:

	2012	2011
	Euro	
Post retirement benefits, net		
Pension benefits (Notes 11.1 and 11.4)	(467,300)	(729,248)
Health care benefits (Notes 11.2 and 11.4)	4,189,302	(1,852,929)
Salaries (Notes 11.3 and 11.4)	25,657,325	31,348,662
Service cost related to liabilities transfered to the Portuguese state[(a)]	22,337,313	25,112,665
	51,716,640	**53,879,150**
Redundancy costs and liquidation		
Pensions (Notes 11.1 and 11.4)	(209,591)	(2,036)
Health care (Notes 11.2 and 11.4)	(158,243)	180,552
Salaries (Notes 11.3 and 11.4)	(246,969)	31,034,557
Termination payments (Note 11.5)	1,482,772	1,707,171
	867,969	**32,920,244**

(a) This caption corresponds to a fixed contribution paid by PT Comunicações to the Portuguese Social Security System relating to the annual service of active and suspended employees that were entitled to pension benefits under the Company's post-retirement benefit plans that were transferred to the Portuguese State in December 2010.

(Amounts in Euro)

11. Post-retirement benefits (Continued)

11.7. Net actuarial losses (gains)

In 2012 and 2011, the net actuarial gains and losses recorded in shareholders' equity were as follows:

	2012	2011
	Euro	
Changes in actuarial assumptions		
Pension benefits (Note 11.1)	17,334,547	(374,801)
Health care benefits (Note 11.2)	37,439,494	—
Salaries (Note 11.3)	81,438,065	(18,962,221)
Sub-total (Note 11)	**136,212,106**	**(19,337,022)**
Differences between actual data and actuarial assumptions		
Pension benefits (Note 11.1)	(11,163,094)	5,962,273
Health care benefits (Note 11.2)	(75,171,038)	98,112,145
Salaries (Note 11.3)	(124,554)	(12,918,075)
Sub-total	**(86,458,686)**	**91,156,343**
Total (Notes 11.4, 11. 8 and 20.4)	**49,753,420**	**71,819,321**

Net actuarial losses and gains recorded in 2012 and 2011 related to changes in actuarial assumptions mainly resulting from the changes in the financial and demographic actuarial assumptions detailed above, as follows:

— Net actuarial losses recorded in 2012, amounting to Euro 136 million, include primarily the impacts resulting from (1) the suspension of the early retirement regime (loss of Euro 39 million), either permanently for employees under the CGA regime or during the financial assistance programme to Portugal for the remaining employees, (2) the reduction in the discount rates for responsibilities with pension supplements, health care benefits and salaries payable to suspended and pre-retired employees (loss of Euro 102 million), and (3) the change in the mortality tables for active beneficiaries;

— Actuarial gains recognized in 2011, amounting to Euro 19 million, relate mainly to the reduction in the salary growth rate for obligations in connection with salaries payable to suspended and pre-retired employees.

The detail of net actuarial gains and losses resulting from differences between actual data and actuarial assumptions is as follows:

— Actuarial gains recognized in 2012, amounting to Euro 86 million, include (i) a gain of Euro 64 million related to the difference between actual (+25,2%) and expected (+6.0%) return on fund assets, and (ii) a gain of Euro 23 million corresponding to the difference between actual data and actuarial assumptions regarding projected responsibilities, particular assumptions about growth rates of wages, pensions and health care;

— Actuarial losses recognized in 2011, amounting to Euro 91 million, include (i) a loss of Euro 98 million related to the difference between actual (−16.6%) and expected (+6.0%) return on fund assets, and (ii) a gain of Euro 7 million corresponding to the difference between actual data and actuarial assumptions regarding projected responsibilities.

11.8. Other disclosures

The table below presents historical data for a five year period about the present value of projected benefit obligations, the fair value of the plan assets, the surplus or deficit in the plans and the net actuarial

(Amounts in Euro)

Total credit balances with shareholders and group companies	**1,657,243**	**—**

(a) The outstanding amount due as at 31 December 2012 relates to loans granted to TMN amounting to Euro 340,000,000, which were initially acquired in November 2010 in connection with the acquisition of this company, for an amount of Euro 500,000,000, of which an amount of Euro 160,000,000 was repaid in 2011 (Note 4 (b)).

(b) During the years ended as at 31 December 2012 and 2011, PT Comunicações reported tax losses that were used by PT SGPS consolidated tax, rather than being recognized as a gain in the Company's financial statements. The accounts payable at 31 December 2012 correspond mainly to autonomous taxation. The accounts receivable at 31 December 2011 correspond mainly to amounts of PT Prime that were included in the Company's balance sheet following the merger occurred in 2011, and include primarily the following amounts: (i) Euro 38,662,510 related to payments on accounts made in 2011 and that were recovered in 2012; (ii) Euro 3,006,791 received in 2012, under a program of tax incentives for investment (SIFIDE) regarding the years 2007 and 2010; and (iii) Euro 2,033,092 paid in 2012 regarding autonomous taxation.

12.2. Financial investments in subsidiaries and associated companies

As mentioned in the Introduction Note, Portugal Telecom is 100% held by PT Portugal which is fully held by PT SGPS. Consequently, all companies included in the Group were considered as PT Comunicações related parties, including not only its own subsidiaries and associates but also other subsidiaries of PT SGPS.

(Amounts in Euro)

12. Related parties (Continued)

As at 31 December 2012 and 2011, the detail of Portugal Telecom's financial investments in its subsidiaries and associated companies and the main financial information of these entities is detailed as follows (Notes 10, 21 and 26):

	2012				2011

(a) Transactions with related parties included under this caption correspond primarily to gains resulting from amounts charged to other Group entities related to the Company's employees which are currently working in those other entities.

12.4. Other information

Remunerations of the Company's executive and non-executive board members in 2012 and 2011 were as follows:

	2012	2011
	Euro	
Board of Directors		
Fixed remuneration	—	635,236
Variable remuneration	—	384,875
Acountant		
Statutory audit fees	50,000	63,970
Audit related services fees	7,000	10,000
	57,000	**1,094,081**

(Amounts in Euro)

12. Related parties (Continued)

In 2012, the remunerations of Board members were fully supported by PT Portugal. In 2011, no compensation was given to some Board members, since they are paid for performing functions in other PT Group companies.

13. Deferrals

As at 31 December 2012 and 2011, this caption consisted of the following:

	2012	2011
	Euro	
PREPAID EXPENSES		
Current		
Interest and other financial expenses	7,458,782	3,829,240
Direct costs	7,242,623	5,339,160

Non-Current		
Accounts receivable—trade (Note 17)	365,032	2,118,135
Other	8,599	510,830
Total non-current	**373,631**	**2,628,965**
Total other financial assets	**373,631**	**2,628,965**

15. Income taxes

15.1. Introduction

As from 1 January 2012, following a change in Portuguese tax legislation occurred in December 2011, most companies are subject to Corporate Income Tax at a base rate of 25%, increased (1) up to a maximum of 1.5% of taxable income through a municipal tax, and (2) by a state surcharge levied at the rate of 3.0% on taxable income between Euro 1.5 million and Euro 10.0 million (Euro 7.5 million as from 1 January 2013, following a change in Portuguese tax legislation occurred in December 2012) and at the rate of 5.0% on taxable income in excess of Euro 10.0 million (Euro 7.5 million as from 1 January 2013).

As the Company reported tax losses for both years ended 31 December 2012 and 2011, neither the 1.5% municipal tax nor the state taxes are applicable. Consequently, and based on its expectations regarding future taxable results, PT Comunicações will continue to use the 25% tax rate for purposes of computing deferred taxes.

The Company's income taxes are computed based on the tax rate mentioned above and are determined on the basis of profit before-tax adjusted in accordance with tax legislation.

The Company is part of the Special Taxation Regime for Groups of Companies (RETGS) whose dominant company is PT SGPS, so the income tax estimate and deductions made by third parties are recorded on the balance sheet as accounts payable and receivable of PT SGPS.

In accordance with the prevailing legislation, taxation returns are subject to review and correction by the tax authorities during a period of four years (five years for Social Security, Security), except where there have been tax losses, fiscal benefits have been granted, or there are inspections, claims or challenges pending; in such cases, these periods may be extended or suspended, depending on the circumstances. Based upon the information supplied by its tax advisory services, the Board of Directors considers that any corrections to the tax returns that might result from reviews carried out by the tax authorities will not have a significant effect on the financial statements as at 31 December 2012, considering the provisions recorded and the current expectations of settlement regarding tax contingencies described in Note 21.

(Amounts in Euro)

15. Income taxes (Continued)

15.2. Deferred taxes

As mentioned in Note 3.10, deferred tax assets are recognised to the extent that it is reasonably likely that taxable income will be available against which deductible temporary differences can be used, or when there are deferred tax liabilities the reversal of which is expected in the same period in which the deferred tax assets reverse. PT Comunicações believes that deferred tax assets recorded in the Balance Sheet are recoverable either through its future taxable income, based on its budget for the year 2013 and projections of results for the subsequent years adjusted for differences between the accounting and taxable earnings and for certain financial operations to be undertaken in the future, or through the reversal of deferred tax liabilities.

In assessing income tax expenses for the year, in addition to the current tax determined on the basis of profit before-tax adjusted in accordance with tax legislation, the effects of temporary differences between income before tax and taxable earnings arising in the given year or in previous years is also considered.

Movements occurred in deferred tax assets during the years ended 31 December 2012 and 2011 were as follows:

	2012						
	Post retirement benefits	Additional contribution to pension funds	Impairment of accounts receivable	Depreciation and amortisation of tangible assets	Other provision and adjustments	Other temporary differences	Total

15.3. Tax rate reconciliation

In 2012 and 2011, the reconciliation between the expected tax computed by applying the nominal tax rate to income before taxes and the total income tax is as follows:

	2012	2011
	Euro	
Income before taxes	**(87,769,916)**	**(107,220,185)**
Nominal tax rate	25.00%	25.00%
Expected tax	**(21,942,479)**	**(26,805,046)**
Permanent differences[a]	(28,719,166)	(34,457,660)
Surplus of prior year accrued income tax	(1,859,485)	(8,106,042)
Tax loss used in connection with RETGS[b]	170,121,916	217,045,018
Write-off / Derecognition of deferred tax assets[c]	(113,579,000)	113,579,000
Collection adjustments	1,909,491	2,033,092
Effect of the change in tax rate	—	107,720
Other	(6,799,524)	(1,262,914)
	(868,247)	**262,133,168**
Income tax		
Income tax-current	50,007	(6,072,951)
Deferred tax	(918,254)	268,206,119
	(868,247)	**262,133,168**

(a) Permanent differences are as follows:

	2012	2011
	Euro	
Equity method of accounting (Note 26)[i]	(117,696,638)	(150,759,036)
Provisions and adjustments not deductible for tax purposes	7,495,389	8,306,555
Write-off of accounts receivable	743,000	3,318,630
Recognition of capital gains and losses[ii]	(660,323)	4,519,462
Tax benefits	(3,185,478)	(3,323,409)
Other	(1,572,614)	107,158
	(114,876,664)	**(137,830,640)**
Nominal tax rate	25.00%	25.00%
	(28,719,166)	**(34,457,660)**

(i) Except for the Company's share in the earnings of CTM, for which we recognize a deferred tax liability, gains and losses in affiliated companies represent permanent differences.

(ii) This caption refers to the difference between the accounting capital gains and losses and corresponding tax capital gains and losses related to the disposal of fixed assets.

(b) This caption corresponds to the taxable loss computed in both years by the Company in accordance with Income Tax legislation. In accordance with the fiscal policy set by Portugal Telecom Group, the gain related to the use of these tax losses has been recorded at the group level in PT SGPS' financial statements.

(c) Based on its expectation regarding its individual tax results, the Company in 2011 wrote off a portion of deferred tax assets related to post-retirement benefits that would have been used in 2012, since it believes that the referred tax results will not be enough to allow the use of these deferred tax assets. In 2012, the Company incurred in the tax costs associated with the deferred taxes derecognized in 2011, which therefore contributed to the tax loss generated in the year 2012, as detailed in the table above, and led to the permanent difference presented in 2012.

(Amounts in Euro)

15. Income taxes (Continued)

15.4. Other information

In connection with the Law 40/2005, of August 3, which approved the program SIFIDE—Tax Incentives on Research and Development System, the Company filed in 2012 the application related to the year 2011, amounting to Euro 1,593,543.

Under the law 10/2009 of March 10, which approved the RFAI—Tax Regime to Support Investment, the Company included in its 2011 income tax declaration form a tax benefit amounting to Euro 7,355,416, related to the significant investments made on the creation of new generation broadband networks.

16. Inventories

As at 31 December 2012 and 2011, this caption consists of the following:

	2012			2011		
	Gross value	Impairment losses	Net value	Gross value	Impairment Losses	Net value
	Euro					
Goods	39,253,567	(10,310,480)	28,943,087	47,441,728	(15,851,031)	31,590,697
Raw materials and consumables	22,264,647	(1,574,336)	20,690,311	24,094,933	(2,389,398)	21,705,535

In the years ended as at 31 December 2012 and 2011, the evolution of accumulated impairment losses related to accounts receivable was as follows:

	2012	2011
	Euro	
Opening balance	177,563,099	174,901,870
PT Prime merger	—	19,332,326
Reti merger	1,953	—
Increases (reversals)	25,750,763	13,692,613
Utilizations[(a)]	(49,198,139)	(30,363,710)
Closing balance	**154,117,676**	**177,563,099**

(a) This caption corresponds to the write-off of receivables that were previously fully adjusted for through the use of accumulated impairment losses.

The Company is exposed to the credit risk arising from the possibility that a third party does not fulfil its contractual obligations, resulting in a financial loss. The credit risk is primarily related to accounts receivable from services provided to customers and is monitored regularly with the following objectives: (a) limit the credit granted to customers, considering their profile and aging of receivables; (b) monitor the evolution of the credit level granted; (c) make regular reviews of the receivables recoverability;

(Amounts in Euro)

17. Accounts receivables and unbilled revenues (Continued)

(d) analysis of market risk where the customer is located. The Company is not exposed to any significant credit risk related to a particular customer, to the extent that its receivables arise from a large number of customers.

As at 31 December 2012 and 2011, the aging of receivables, net of impairment losses, was as follows:

	2012			2011		
	Accounts receivable from group companies	Accounts receivable from other companies	Total	Accounts receivable from group Companies	Accounts receivable from other companies	Total
	Euro					
Unexpired balance	69,799,276	200,206,525	270,005,801	73,143,468	213,538,611	286,682,079
Expired balance						
0 - 60 days	21,946,132	59,967,759	81,913,891	8,463,263	89,572,301	98,035,564
60 - 90 days	1,523,605	13,832,752	15,356,357	1,232,515	15,819,724	17,052,239
90 - 180 days	3,633,891	25,682,526	29,316,417	3,958,112	30,095,322	34,053,434
180 - 360 days	5,089,602	29,449,088	34,538,690	2,093,566	26,249,083	28,342,649
360 - 720 days	1,457,161	22,052,724	23,509,885	1,570,134	17,707,583	19,277,717
More than 720 days	781,305	15,097,785	15,879,090	932,787	29,855,087	30,787,874
Accounts receivable	**104,230,972**	**366,289,159**	**470,520,131**	**91,393,845**	**422,837,711**	**514,231,556**

Some of the accounts receivable with a higher aging relate to penalties for contracts violation imposed to customers, the revenues of which were deferred, as mentioned in Note 13.

18. State and other public entities

As at 31 December 2012 and 2011, the balances with these entities were as follows:

	2012		2011	
	Debit balances	Credit balances	Debit balances	Credit balances
	Euro			
Value added tax[(a)]	150,458	18,247,876	—	10,284,747

(a) In the years ended 31 December 2012 and 2011, this caption corresponds mainly to accrued interest in connection with loans granted to affiliated companies, amounting to Euro 27,440,391 and Euro 13,380,962, respectively, which relate mainly to the loans granted to TMN (Note 12).

(b) This caption includes mainly equipment's sale to occasional customers.

(c) The balances related to Serviço Nacional de Saúde correspond to the amount receivable by the Company regarding the State co-participation in the costs of healthcare plan.

(d) The increase in this caption reflects mainly a gain of approximately Euro 60 million (Note 31) recorded in 2012 related to a net compensation receivable from the Portuguese State for prior years costs supported by PT Comunicações with the universal service obligation under the Concession Agreement, in accordance with Law 66/2012.

(e) The change in this caption is primarily explained by: (i) a reduction in the present value of the outstanding future commitments assumed under the Digital Terrestrial Television license, which amounted to Euro 2.9 million and 20.8 million at 31 December 2012 and 2011, respectively; and (ii) an amount of Euro 14.9 million paid to PT Prestações in 2012 that was outstanding as at 31 December 2011, in connection with a transfer of receivables from public entities to this company.

During the years ended 31 December 2012 and 2011, the evolution in accumulated impairment losses related to accounts receivable was as follows:

	2012	2011
	Euro	
Opening balance	8,721,353	8,711,396
Increases	9,319	9,957
Reversals	(485,660)	—
Closing balance	**8,245,012**	**8,721,353**

(Amounts in Euro)

20. Shareholders' equity

20.1. Share capital

As at 31 December 2012 and 2011, the Company's share capital was fully paid and amounted to Euro 1,150,000,000 and was represented by 1,150,000,000 nominal shares (Note 35), with a nominal value of 1 Euro each. As at 31 December 2012 and 2011, the entirety of the Company's share capital was held by PT Portugal.

In 2011, as approved by the General Shareholders Meeting held on 30 September 2011, the Company carried out a share capital increase amounting to Euro 1,598,500,000, through the increase in the nominal value of each share. The Company also approved a share capital reduction of Euro 1,598,500,000, with the purpose of offsetting accumulated losses and negative fair value reserves, through the decrease in the nominal value of each share, of which Euro 899,496,127 was transferred to retained earnings and Euro 699,003,873 (Note 20.4) was transferred to other reserves.

20.2. Other shareholders' equity instruments

This caption corresponds to additional paid in capital contributions granted by PT Portugal, which do not bear interest and have no reimbursement term defined. In accordance with applicable law, reimbursement may be made only if, after payment, shareholders' equity is greater than the sum of capital, legal reserves and unrealised revaluation reserves.

In 2011, as approved by the General Shareholders Meeting held on 30 September, the paid in capital contributions were reimbursed to the shareholder in the amount of Euro 1,598,500,000.

20.3. Legal reserve

Portuguese law provides that at least 5% of annual profits must be appropriated to a legal reserve until this reserve equals the minimum requirement of 20% of share capital. This reserve is not available for distribution to shareholders but may be capitalized or used to absorb losses, once all other reserves and retained earnings have been exhausted.

20.4. Other reserves

During the years ended 31 December 2012 and 2011, the movements under this caption were as follows:

	Net actuarial losses	Free reserves	Total

Deferred taxes (Note 15.2)	—	30,434	—	**30,434**
Balance as at 31 December 2012	**76,300,853**	**(581,254,011)**	**48,130,916**	**(456,822,242)**

(a) The foreign currency exchange differences determined following the application of the equity method of accounting are related to the update of financial investment in Oi, which is indirectly owned through the affiliated company TMN.

(b) In 2012, other changes in shareholders' equity resulting from the equity method of accounting include primarily a gain recorded by Bratel Brasil (a company of PT Group that holds the investment in Oi Group and is held indirectly by TMN), amounting to Euro 49 million, corresponding to the impact of a corporate restructuring undertaken by the Oi Group in March 2012.

Movements related to the equity method of accounting were recorded under the following captions:

	2012	2011
	Euro	
Investments in subsidiaries and associated companies (Note 10)	(301,338,547)	(229,883,184)
Provision for negative financial investments (Note 21)	(181)	463
	(301,338,728)	**(229,882,721)**

(Amounts in Euro)

20. Shareholders' equity (Continued)

20.6. Revaluation surplus

During the years ended 31 December 2012 and 2011, the movements under this caption were as follows:

	2012	2011
	Euro	
Opening balance	**623,874,447**	**763,950,232**
Revaluation of assets		
Base (Note 6.2)	—	(126,167,563)
Tax effect (Note 15.2)	—	31,541,890
Realization of revaluation surplus		
Base	(45,768,002)	(59,856,032)
Tax effect	10,937,589	14,405,920
Closing balance	**589,044,034**	**623,874,447**

In accordance with the applicable legislation and the accounting practices used in Portugal, the revaluation reserves cannot be distributed to shareholders; they can only be used, under certain circumstances and in accordance with Portuguese legislation, for future capital increases.

The revaluation reserves recognized under this caption are related to both (1) assets measured in accordance with the revaluation model, and also (Note 6.2) (2) other assets revalued previously, for which the Company, in connection with the adoption of SNC and as permitted by NCRF 3, adopted the cost model. The Company decided to include both of these revaluation reserves under this caption as they are both non-distributable to shareholders, as mentioned above.

During the year ended 31 December 2011, as mentioned in Note 6.2, the Company performed a new revaluation of its real estate properties and telecommunication infrastructure, having reduced the revaluation surplus recorded in shareholders' equity by an amount of Euro 126,167,563 (Note 6.2), net of the related tax effect amounting to Euro 31,541,890 (Note 15.2).

Annually, PT Comunicações transfers to retained earnings the revaluation reserve realized in the year, primarily through the depreciation of the asset that originated these reserves. The amounts transferred during the years ended 31 December 2012 and 2011, net of the corresponding tax effects, amounted to Euro 34,830,413 and Euro 45,450,112, respectively.

20.7. Other shareholders' equity

PT Comunicações recognises under this caption subsidies associated with the acquisition or production of non-current assets (investment subsidies), which were entirely received and are non-refundable, where the Company is not under obligation to comply with conditions associated with the subsidy.

These subsidies are subsequently recognized in earnings during the useful lives of the related assets for which those subsidies were granted. The Company recognized gains amounting to Euro 2,997,997 in 2012 and Euro 3,008,528 in 2011 (Note 31). The balance of this caption corresponds to the remaining amount of subsidies that have not yet been recognized in earnings.

20.8. Application of earnings

In 2011, as approved by the General Shareholders Meeting held on 25 March 2011, the negative net income of 2010, in the amount of Euro 138,658,825 was entirely transferred to the caption ''Retained earnings''.

(Amounts in Euro)

20. Shareholders' equity (Continued)

In 2012, as approved by the General Shareholders Meeting held on 29 March 2012, the negative net income of 2011, in the amount of Euro 369,353,353 was entirely transferred to the caption ''Retained earnings''.

21. Provisions, contingent liabilities and contingent assets

21.1. Movements occurred in provisions

During the years ended 31 December 2012 and 2011, the movements in provisions were as follows:

	2012

21.2. Claims and legal proceedings

a) Proceedings with probable losses

Provisions for tax claims and legal proceedings are related to liabilities arising from legal proceedings against the Company, and are computed based on the advice of PT Comunicações' tax and legal advisors.

(Amounts in Euro)

21. Provisions, contingent liabilities and contingent assets (Continued)

As at 31 December 2012 and 2011, there were several legal proceedings and tax contingencies which, in accordance with ''NCRF 21 Provisions, Contingent Liabilities and Contingent Assets'' (''NCRF 21'') and based on the opinion of the Company's internal and external tax and legal counsels, were considered as probable losses, since the Company considered probable the outflow of resources to settle the obligation. The nature of these claims is as follows:

	2012	2011
	Euro	
Legal proceedings		
Civil contingencies	3,321,484	3,288,009
Labor contingencies	2,504,227	2,857,219
Other contingencies	3,849,282	3,529,060
	9,674,993	**9,674,288**
Tax contingencies	14,908,002	14,629,879
	24,582,995	**24,304,167**

Set forth below are several tax claims assessed as constituting a probable loss, namely related to a portion of the VAT and IRC tax assessments in regard to the years 1997 and 1998 of Marconi and 1999 of Portugal Telecom, S.A., and the years 2002 to 2011 of PT Comunicações, among others, the Company has recorded a provision amounting to Euro 14,908,002 in 2012, including tax and interest. However, the Company is contesting these claims with the tax authorities.

b) Proceedings with possible losses

As at 31 December 2012 and 2011, the Company, in accordance with the definitions of NCRF 21 and based on the advice of its internal and external tax and legal counsels, had classified several claims and legal proceedings and tax contingencies as proceedings with possible losses. The nature of these proceedings is as follows:

	2012	2011
	Euro	
Legal proceedings		
Civil contingencies	74,163,129	67,154,450
Labor contingencies	478,806	457,197
Other contingencies	21,125,828	14,129,869
	95,767,763	**81,741,516**
Tax contingencies	2,562,502	6,351,520
	98,330,265	**88,093,036**

21.3. Description of the main claims with regulatory entities and other legal proceedings

The following litigation processes relate to the main claims and legal proceedings filed by regulatory entities against PT Comunicações, some of which the Company considers, based on the advice of its internal and external legal counsels that related losses are remote, in accordance with the definitions of NCRF 21.

a) Claims for municipal taxes and fees

Pursuant to a statute enacted on 1 August 1997, as an operator of a basic telecommunications network, Portugal Telecom was exempt from municipal taxes and rights-of-way and other fees with respect to its

21. Provisions, contingent liabilities and contingent assets (Continued)

network in connection with its obligations under the Concession. The Portuguese Government has advised Portugal Telecom in the past that this statute confirmed the tax exemption under our Concession. The Portuguese Government has informed Portugal Telecom it will continue to take the necessary actions in order for PT Comunicações to maintain the economic benefits contemplated by the Concession.

Law 5/2004, dated 10 February 2004, established a new rights-of-way regime in Portugal whereby each municipality may establish a fee, up to a maximum of 0.25% of each wireline services bill, to be paid by the customers of those wireline operators whose network infrastructures are located in each such municipality. This regime was implemented in 2005 but does not affect the lawsuit described above based on the former statute. Meanwhile, Decree-Law 123/2009, dated 21 May 2009, clarified that no other tax should be levied by the municipalities in addition to the tax established by Law 5/2004. This interpretation was confirmed by the Supreme Administrative Court of Portugal in various legal actions.

Some municipalities however, continue to interpret that the Law 5/2004 does not expressly revoke other taxes that the municipalities wish to establish, because Law 5/2004 is not applicable to the public municipality domain. Currently, there are legal proceedings filed by some municipalities regarding this matter.

b) Regulatory proceedings

Portugal Telecom's operations are regularly subject to regulatory inquiries and investigations involving their operations. In addition, ANACOM (the telecommunications regulator), the European Commission, and the Autoridade da Concorrência (the competition authority) regularly make inquiries and conduct investigations concerning compliance with applicable laws and regulations. Current inquires and investigations include several investigations by the (Autoridade da Concorrência) related to PT Comunicações for alleged anti-competitive practices in the public wireline telephone market. The Company believes that most of the complaints that have resulted in such investigations should be dismissed due to the nature of the alleged abuses and the novelty of the relevant antitrust laws. However, if PT Comunicações is found to be in violation of applicable laws and regulations in these or other regulatory inquiries and investigations, it could become subject to penalties, fines, damages or other sanctions. It is however permitted under Portuguese law to appeal any adverse decision to the Courts.

In April 2007, the Autoridade da Concorrência filed a complaint alleging that PT Comunicações abused its dominant market position by granting, in 2003, discriminatory discounts on lease lines. PT Comunicações challenged this claim with the authorities. However, on 1 September 2008, the Autoridade da Concorrência imposed a fine of Euro 2.1 million on PT Comunicações. PT Comunicações appealed to the Commerce Court of Lisbon, on 29 September 2008 and, on 29 February 2012, the Commerce Court of Lisbon cleared PT Comunicações of the fine. The Company, based on the opinion of its internal and external legal counsels, has not recorded any provision for this matter.

c) Other legal proceedings

In March 2004, TV TEL Grande Porto—Comunicações, SA. (''TVTEL''), a telecommunications company based in Oporto, filed a claim against PT Comunicações in the Lisbon Judicial Court. TV TEL alleged that, since 2001, PT Comunicações has unlawfully restricted access to its telecommunication ducts in Oporto, thereby undermining and delaying the installation and development of TV TEL's telecommunications network. TV TEL alleges that PT Comunicações intended to favor both itself and CATVP—TV Cabo Portugal, S.A, a PT Multimedia subsidiary and at the time a direct competitor of TV TEL. TV TEL is claiming an amount of approximately Euro 15 million from Portugal Telecom for damages and losses allegedly caused and yet to be sustained by that company as a result of the delay in the installation of its telecommunications network in Oporto. In addition, TV TEL has demanded that PT Comunicações be required to give full access to its ducts in Oporto. PT Comunicações submitted its

(Amounts in Euro)

21. Provisions, contingent liabilities and contingent assets (Continued)

defence to these claims, stating that: (1) TV TEL did not have a general right to install its network in PT Comunicações' ducts; (2) all of TV TEL's requests were lawfully and timely responded to by PT Comunicações according to its general infra-structure management policy; and (3) TV TEL's claims for damages and losses were not factually sustainable. The trial was concluded in 2011 and the parties wait for the judicial decision.

In March 2011, Optimus—Comunicações S.A. (''Optimus'') filed a claim against PT Comunicações in the Judicial Court of Lisbon for the payment of approximately Euro 11 million and, in October 2011, Onitelecom—Infocomunicações, S.A (''Oni'') filed a claim against PT Comunicações in the same court for the payment of approximately Euro 1.5 million, both related to the proceeding of the Autoridade da Concorrência that terminated in 2011 for prescription purposes, in relation to which Autoridade da Concorrência had imposed a fine to the Company of approximately Euro 45 million, as referred to above. Optimus and Oni sustained their position by arguing that they incurred losses and damages as a result of the Company's conduct. Regarding the Optimus legal action, the Company is waiting for the schedule of the trial, while In the Optimus action, the Company is waiting for the schedule of the trial, while regarding the Oni legal action, PT Comunicações was acquitted due to prescription reasons.

21.4. Other tax contingencies

In addition to the tax contingencies mentioned above, the risk of loss of which was deemed as either probable or possible (Note 21.2), there are other tax claims pending appeal or judicial decision, totalling Euro 23 million, which include primarily (1) tax assessments filed by the tax authorities with respect to the income tax from 1997 to 1998 of Portugal Telecom, SA and Marconi, and from 2002 to 2010 of PT Comunicações, and (2) additional payments of VAT from 2000 to 2004. The Company's opinion, based on the advice of its tax and legal counsel, is that the risk of loss associated with these claims is remote.

21.5. Provisions for losses on financial investments

Provisions for losses on financial investments are related to losses in subsidiaries and associated companies that have negative shareholders' equity (Note 12), and are computed based on the Company's share in the shareholders' equity of those entities. Movements in these provisions during the years ended 31 December 2012 and 2011 were as follows:

	2012	2011
	Euro	
Equity method		
Losses in subsidiaries and associated companies (Note 26)	5,110	19,974
Adjustments to financial assets (Note 20.5)	181	(463)
Liquidation of PT Ásia	—	(89)
	5,291	**19,422**

21.6. Contingent assets

As at 31 December 2012, the main contingent asset relates to a request for the transmission of tax losses from PT.Com, a company that was merged into PT Comunicações in 2004, amounting to Euro 56 million. The recovery of this amount depends on the appeal filed by the Company. The request filed by the Company was overruled by the tax authorities on 2 February 2007, and the Company challenged this decision on 15 May 2007 through a special administrative proceeding, which is pending a final decision.

(Amounts in Euro)

22. Loans obtained

Loans obtained as at 31 December 2012 and 2011 have the following composition:

	2012		2011	
	Non-current	Current	Non-current	Current
	Euro			
Intragroup loans (Note 12.3)	3,527,000,000	—	3,527,000,000	—
Centralized cash management (Note 12.3)	—	117,962,274	—	590,123,358
Commercial programme	2,631,600,000	1,047,150,000	1,667,250,000	919,500,000
Other financings	—	—	—	454,316,000
Leases	20,261,415	19,142,242	29,587,526	21,523,352
	6,178,861,415	**1,184,254,516**	**5,223,837,526**	**1,985,462,710**

22.1. Loans to Group companies

In February 2011, the Company obtained a loan from PT Portugal, amounting to Euro 727,000,000 (Note 4), as a result of which the total amount due increased to Euro 3,527,000,000. These loans have no defined maturity, but shall be repaid, partially or entirely, in more than one year, subject to the cash needs of the Company. The interest on these loans is linked to market rates.

22.2. Centralized cash management

As from March 2006, Portugal Telecom centralized all cash receipts and payments from Group companies located in Portugal. The financings obtained by the Company under this system have short term maturities and bear interest at market rates.

22.3. Commercial paper

On 25 June 1999, Portugal Telecom established a commercial paper program up to the amount of Euro 1,000,000,000. Following subsequent amendments to this program, the maximum amount under this program as at 31 December 2012 is Euro 3,500,000,000. This program is in place until 7 July 2013, and is automatically renewable for two year periods, until 7 July 2025, unless one of the parties objects to it. As at 31 December 2012 and 2011, the Company had issued an amount of Euro 1,440,400,000 and Euro 698,400,000, respectively, under this program, which was fully subscribed by PT Finance.

On 1 June 1999, Portugal Telecom had issued another commercial paper program up to the amount of Euro 1,350,000,000. Following subsequent amendments to this program, the maximum amount under this program as at 31 December 2012 is Euro 3,000,000,000. This program is in place until 1 June 2014, and is automatically renewable for two year periods, until 1 June 2020, unless one of the parties objects to it. As at 31 December 2012 and 2011, the Company had issued an amount of Euro 2,238,350,000 and Euro 1,888,350,000, respectively, under this program, which was fully subscribed by PT Finance.

22.4. Other loans

This caption relates to the amounts due to the Portuguese State in connection with the transfer of unfunded regulatory pension obligations concluded in 31 December 2010, which amounted to Euro 921.7 million as at 31 December 2010. The Company settled Euro 17.4 million and Euro 450.0 million in January and December 2011 (Note 4), respectively, having paid the remaining amount of Euro 454.3 million in December 2012 (Note 4).

The amounts reimbursed in 2012 and 2011 earned interest at an annual interest rate of 3.25% and 2.74%, respectively.

(Amounts in Euro)

22. Loans obtained (Continued)

22.5. Finance leases

Financial leasing obligations are essentially the result of: (i) lease contracts with respect to vehicles, under which there are generally purchase options at the end of their term, and (ii) contracts for the acquisition of satellite capacity, under which the Company has the right to use this capacity in the normal course of telecommunications operations, a right that is recorded by the Company as an intangible asset. The contracts for the acquisition of satellite capacity do not include purchase options but, generally, the Company has a preference in the allocation of future transponders' capacity.

As at 31 December 2012 and 2011, the Company had recorded in the balance sheet the following assets under finance leases:

	2012			2011		
	Gross value	Accumulated depreciation	Carrying value	Gross value	Accumulated depreciation	Carrying value
	Euro					
Tangible fixed assets						
Transport equipment	25,029,846	11,068,954	13,960,892	23,255,040	11,411,423	11,843,617
Other tangible fixed assets	1,441,277	467,471	973,806	1,269,542	170,676	1,098,866
	26,471,123	11,536,425	14,934,698	24,524,582	11,582,099	12,942,483
Intangible assets						
Industrial property and other rights	51,562,961	35,076,858	16,486,103	52,491,450	27,394,237	25,097,213
	78,034,084	**46,613,283**	**31,420,801**	**77,016,032**	**38,976,336**	**38,039,696**

As at 31 December 2012 and 2011, the maturity of minimum lease payments of leasing contracts was as follows:

	2012			2011		
	Capital	Interest	Total	Capital	Interest	Total
	Euro					
Up to 1 year	19,142,242	1,695,621	**20,837,863**	21,523,352	2,257,423	**23,780,775**
Between 1 and 2 years	14,479,139	883,072	**15,362,211**	12,310,260	1,373,531	**13,683,791**
Between 2 and 3 years	4,252,715	152,839	**4,405,554**	14,147,200	692,326	**14,839,526**
Between 3 and 4 years	835,871	63,208	**899,079**	3,079,467	41,974	**3,121,441**
Between 4 and 5 years	693,690	22,604	**716,294**	50,599	1,545	**52,144**
	39,403,657	**2,817,344**	**42,221,001**	**51,110,878**	**4,366,799**	**55,477,677**

22.6. Other information

As at 31 December 2012, the Company was party, along with PT SGPS and PT Finance, to three Credit Facilities, with the following amounts and maturities:

- Euro 800 million, with maturity in June 2016;
- Euro 100 million, with maturity in January 2015;
- Euro 50 million, with maturity in January 2013.

As at 31 December 2012, the amount used by the PT Group within these three Facilities was Euro 750 million.

22. Loans obtained (Continued)

As at 31 December 2012, the Company was also part, along with PT SGPS and PT Finance, in an Export Credit Facility, amounting to Euro 180 million, with a maturity in 2023. As at 31 December 2012, the amount used under this contract by PT Group was Euro 61 million.

As at 31 December 2012, the main covenants included in financing contracts, in relation to which the Company is collectively responsible along with PT SGPS and PT Finance, are as follows and refer to the consolidated accounts:

- **Change in control:** The exchangeable bonds, the credit facilities amounting to Euro 1,180 million and the loans obtained from the European Investment Bank (''EIB'') totalling Euro 602 million as at 31 December 2012 establish penalties in the case of a change in control of PT SGPS. According to the terms and conditions of these debt instruments, a change of control would occur if any person or group of persons acting in concert acquires or controls more than 50 per cent of voting rights, whether obtained by ownership of share capital, the holding of voting rights or pursuant to the terms of a shareholders' agreement. In certain cases, gaining the power to appoint or remove all, or the majority, of the directors or other equivalent officers of PT SGPS or to give directions with respect to the operating and financial policies of PT SGPS with which the directors or equivalent officers of the company are obliged to comply are also considered a change of control.

  The Euro 750 million Eurobond issued in 2012, the Euro 600 million Eurobond issued in 2011 and the Euro 1,000 million and Euro 750 million Eurobonds issued in 2009, establish penalties in the case of any change of control of Portugal Telecom, as described above, only if simultaneously a rating downgrade to sub-investment grade occurs (in case the securities are investment grade securities) or a rating downgrade occurs (in case the securities are sub-investment grade securities) during the Change of Control Period, as defined under the terms and conditions of these notes.

- **Control/disposal of subsidies:** Certain revolving credit facilities amounting to Euro 980 million require PT SGPS to, directly or indirectly, maintain majority ownership and control of each material subsidiary. Material subsidiaries are those companies whose total assets are equal or exceed 10% of total consolidated assets or whose total revenues are also equal or exceed 10% of total consolidated revenues.

- **Disposal of assets:** Revolving credit facilities totalling Euro 150 million and loans obtained from the EIB totalling Euro 602 million as at 31 December 2012 include certain restrictions regarding the disposal of assets by PT SGPS.

- **Financial ratios:** Certain revolving credit facilities totalling Euro 1,180 million require that Consolidated Net Debt/EBITDA PT SGPS's ratio does not exceed certain values, which vary depending on each financing. As at 31 December 2012 and 2011, the ratio of Consolidated Net Debt / EBITDA consolidated was 3.3 and 2.6, respectively.

- **Negative Pledge:** The Euro Medium Term Notes, the exchangeable bonds, the credit facilities, the loans obtained from the EIB and the commercial paper programmes are subject to negative pledge clauses, which restrict the pledge of security interests in the assets of companies included in the consolidation.

The penalties applicable in the event of default in any of these covenants are generally the early payment of the loans obtained or the termination of available credit facilities. As at 31 December 2012, Portugal Telecom and PT Comunicações had fully complied with the covenants mentioned above.

Although current liabilities exceed current assets, the Company is not subject to liquidity risk, because of its ability to obtain needed capital from within the Portugal Telecom Group.

(Amounts in Euro)

23. Suppliers

The captions ''Suppliers'' and ''Investment suppliers'' as at 31 December 2012 and 2011 consist of the following:

	2012	2011
	Euro	
Trade suppliers		
Current	259,336,226	300,013,459
Invoices to be issued	28,605,385	40,319,127
	287,941,611	**340,332,586**
Investment suppliers		
Current	78,225,664	137,317,132
Invoices to be issued	29,906,857	39,626,895
	108,132,521	**176,944,027**

24. Accrued expenses

As at 31 December 2012 and 2011, this caption consisted of the following:

	2012	2011
	Euro	
Interest and other financial expenses payable(a)	67,038,381	163,750,159
Direct costs of services rendered	64,347,556	93,701,308
Charges for vacations, vacation subsidies and other payroll costs	43,592,100	47,496,496
Support services	38,711,199	32,933,161
Other supplies and external services	17,628,505	19,488,011
Commissions	13,643,220	19,180,337
Credits related to invoices issued	8,427,354	7,109,590
Rentals	5,693,006	5,107,684
Maintenance and repairs	2,840,937	4,205,083
Marketing and publicity	2,560,743	4,125,302
Other	3,535,928	4,453,299
	268,018,929	**401,550,430**

(a) The reduction in this caption reflects primarily (i) the loans obtained from PT Portugal, the accrued interest of which decreased from Euro 122.7 million as at 31 December 2011 to Euro 62.1 million as at 31 December 2012, (ii) a reduction of Euro 17.8 million in the accrued interest under the loans obtained from Portugal Telecom under the centralized cash management system, and (iii) a decrease of Euro 14.8 million related to the amount of accrued interest as at 31 December 2011 in connection with the debt relating to the transfer to the Portuguese State of unfunded pension obligations, which had been fully repaid by the end of 2012.

(Amounts in Euro)

25. Services rendered and sales

As at 31 December 2012 and 2011, these captions consisted of the following:

	2012	2011
	Euro	
Services rendered		
Fixed telephone services	560,932,329	641,767,805
Television services	504,959,708	410,708,946
Leased lines and capacity	205,970,299	211,126,286
Internet	131,382,406	150,163,097
Data communications (services)	88,946,049	91,745,568

(Amounts in Euro)

27. Direct costs

For the year ended 31 December 2012 and 2011, this caption consisted of the following:

	2012	2011
	Euro	
Telecommunications costs	313,292,455	234,860,603
Programming costs	122,587,397	120,025,755
Directories	26,422,716	35,565,918
Contents of internet and mobile service	8,892,759	7,910,408
Other	12,849,356	15,066,687
	484,044,683	**413,429,371**

28. Supplies and external services

For the year ended 31 December 2012 and 2011, this caption consisted of the following:

	2012	2011
	Euro	
Support services	179,003,249	190,826,237
Maintenance and repairs	74,820,724	95,426,317
Commissions	65,991,475	63,959,266
Electricity	33,370,729	30,358,332
Rentals	21,467,867	24,876,953
Specialized work	19,385,996	20,053,533
Communications	14,200,652	14,756,311
Fuel, water and other fluids	7,276,597	7,224,101
Other	29,887,307	26,500,418
	445,404,596	**473,981,468**

As at 31 December 2012 and 2011, the Company's obligations under operating lease contracts mature as follows:

	2012	2011
	Euro	
Up to 1 year	12,644,928	16,727,316
Between 1 and 2 years	3,172,757	5,154,812
Between 2 and 3 years	1,826,511	2,354,544
Between 3 and 4 years	1,120,629	1,113,356
Between 4 and 5 years	984,529	927,520
More than 5 years	2,314,921	2,504,675
	22,064,275	**28,782,223**

(Amounts in Euro)

29. Wages and salaries

For the year ended 31 December 2012 and 2011, this caption consisted of the following:

	2012	2011
	Euro	
Salaries	206,325,671	209,937,268
Social Security charges	21,517,595	21,759,053
Social events	3,481,623	3,365,744
Healthcare	1,788,231	2,112,494
Training	1,129,498	1,791,377
Other	1,247,970	1,089,703
	235,490,588	**240,055,639**

30. Indirect taxes

As at 31 December 2012 and 2011, this caption consists of the following:

	2012	2011
	Euro	
Anacom taxes	11,390,709	9,620,836
Direct taxes	1,411,517	1,637,930
Value Added Tax	1,036,709	1,157,838
Other	1,559,638	1,363,194
	15,398,573	**13,779,798**

31. Other income and gains

As at 31 December 2012 and 2011, this caption consists of the following:

	2012	2011
	Euro	
Suplemental income		
Studies, projects and technical assistance	3,755,443	4,082,629
Lease	14,174,671	13,168,135
Other suplemental income[(a)]	94,520,141	21,162,744
Investment subsidies (Note 20.7)	2,997,997	3,008,528
Interest due	2,457,716	3,190,132
Gains on exchange rate differences	1,293,338	3,041,125
Recovery of accounts receivable	837,609	1,031,875
Income from investment properties (Note 7)	638,953	640,122
Other	3,161,986	1,815,227
	123,837,854	**51,140,517**

(a) The increase in this caption reflects a gain of approximately Euro 60 million (Note 19) recorded in 2012 related to a net compensation receivable from the Portuguese State for prior years costs supported by PT Comunicações with the universal service obligation under the Concession Agreement, in accordance with Law 66/XII.

(Amounts in Euro)

32. Other expenses and losses

For the year ended 31 December 2012 and 2011, this caption consisted of the following:

	2012	2011
	Euro	
Write-off of tangible fixed assets	11,830,758	4,240,926
Losses in inventories	2,526,114	1,321,033
Losses on exchange rate differences	1,687,604	2,746,908
Contractual penalties incurred	1,463,704	556,791
Direct write-off of accounts receivable	868,315	3,603,447
Donations	693,260	1,329,381
Other	9,446,749	8,960,363
	28,516,504	**22,758,849**

33. Depreciation and amortisation ((losses)/reversals)

For the year ended 31 December 2012 and 2011, this caption consisted of the following:

	2012	2011
	Euro	
Tangible fixed assets (Note 6)	466,841,602	487,364,880
Intangible assets (Note 9)	30,330,408	30,165,225
Investment properties (Note 7)	482,639	450,348
	497,654,649	**517,980,453**

34. Interest and related income/expenses

The detail of these captions in the year ended 31 December 2012 and 2011 were as follows:

	2012	2011
	Euro	
Interest and related income		
Interest income	14,190,982	21,884,583
Gains on exchange rate differences	262,517	2,095,524
Other	814,413	506,858
	15,267,912	**24,486,965**
Interest and related expenses		
Interest expense	311,664,796	315,284,596
Bank commissions and expenses	3,954,254	2,913,514
Finance leases	2,730,486	2,723,547
Losses on exchange rate differences	288,259	1,610,548
Other	2,369,712	960,515
	321,007,507	**323,492,720**

(Amounts in Euro)

34. Interest and related income/expenses (Continued)

The detail of interest income and interest expenses in 2012 and 2011 is as follows:

	2012	2011
	Euro	
Interest income		
Intragroup loans[a]	14,059,430	21,286,966
Other	131,552	597,617
	14,190,982	**21,884,583**
Interest expense		
Intragroup loans[b]	158,957,483	177,010,434
Other[c]	152,707,313	138,274,162
	311,664,796	**315,284,596**

(a) The decrease in interest income under this caption results primarily from the reduction in the amount of loans granted to TMN, which were reduced from Euro 500,000,000 to Euro 340,000,000 as at 25 December 2011 (Note 12.3).

(b) The reduction in this caption reflects mainly a decrease in financial charges associated with a lower level of loans obtained under the centralized cash management system (Note 22.2).

(c) The increase in this caption reflects mainly two effects: (i) an increase of Euro 26,848,423 associated with the outstanding amounts due under Commercial Paper Programmes (Note 22.3); and (ii) a reduction of Euro 12,363,939 in financial charges associated with the outstanding debt regarding the transfer of unfunded pension obligations to the Portuguese State (Note 22.4).

35. Earnings per share

Earnings per share for the years 2012 and 2011 were computed as follows:

	2012	2011
Net income	(86,901,669)	(369,353,353)
Number of shares (Note 20)	1,150,000,000	1,150,000,000
Basic earnings per share	**(0.08)**	**(0.32)**

There are no situations that create a dilutive effect, so the diluted earnings per share are the same as basic earnings per share.

(Amounts in Euro)

36. Guarantees and other financial commitments

As at 31 December 2012 and 2011, the Company had presented guarantees and comfort letters to third parties, as follows:

	2012	2011
	Euro	
Guarantees in favour of courts	**1,871,435**	**1,779,313**
Bank guarantees in favor of other entities:		
Municipalities	5,501,487	7,164,057
Highway construction entities	4,325,822	3,379,785
Ministry of Education	3,041,118	2,927,315
Ministry of Justice	2,487,978	1,592,915
CTT	2,007,831	2,039,000
Ministry of Health	1,038,512	—
Anacom	—	750,000
Other	4,518,108	5,531,458
	22,920,856	**23,384,530**
Total guarantees	**24,792,291**	**25,163,843**
Commitments of purchase before:		
Fixed asset and content suppliers	34,242,977	31,007,157
Suppliers of inventories	27,768,745	65,614,774
Other services	58,700,454	37,281,981
	120,712,176	**133,903,912**
Other commitments:		
Aquisition of RETI	—	1,094,382
	—	**1,094,382**

Bank guarantees presented to the tax authorities relate primarily to additional income tax assessments for which the Company submitted a claim or an appeal.

Purchase commitments refer to orders placed and not rendered, essentially for the acquisition of materials of infrastructure and telecommunications equipment in the normal course of operations.

37. Events occurred after the balance sheet date

On 13 January 2013, as mentioned in Note 10, Portugal Telecom entered into a definitive agreement for the sale of the 28% stake held by the Group in the share capital of CTM, including the 25% and 3% interests held by PT Participações and PT Comunicações, respectively.

The financial statements for the year ended 31 December 2012 were approved by the Board of Directors and authorized for issuance on 20 February 2013, but are still subject to General Shareholders Meeting approval, under the terms of Portuguese law.

Except for the above mentioned, there were no significant events after 31 December 2012 that would require adjustment or disclosure in these financial statements.

38. Note added for translation

These financial statements are a translation of the financial statements originally issued in Portuguese, in accordance with generally accepted accounting principles in Portugal. In case of discrepancies, the original version, in Portuguese, prevails.

INDEX

MEO—Serviços de Comunicações e Multimédia, S.A.
Notes to the Financial Statements
As at 30 September 2014
(Amounts stated in Euros)

1. Introduction

MEO—Serviços de Comunicações e Multimédia, S.A. (the ''Company'' or ''Meo, S.A.''), formerly named TMN—Telecomunicações Móveis Nacionais, S.A., was incorporated on 22 March 1991; its principal activity is to provide mobile telecommunications services, and it is licensed by the Instituto das Comunicações de Portugal (''ICP''), currently the ICP—Autoridade Nacional de Comunicações (''ANACOM''), to provide complementary (land-based) mobile telecommunications services in Portugal, under the terms of license ICP—011/TCM, dated 16 March 1992. By resolution of the ANACOM Board of Directors on 28 February 2007, the right to utilise these frequencies was renewed for an additional period of 15 years, i.e., until 16 March 2022. At the end of the year 2000, Meo, S.A. was licensed by ANACOM to do business in the international mobile telecommunications system, under the terms of license IMT 2000/UMTS, dated 19 December 2000, under ICP number 02 / UMTS, effective until 11 January 2016 with the possibility of subsequent renewal for an additional 15 years. In December 2011, ANACOM notified Meo, S.A., in the context of an auction of spectrum held on 28-30 November, that it had acquired spectrum in the frequency bands at 800 MHz, 1.8 GHz and 2.6 GHz, allowing Meo, S.A. to provide 4G mobile services through the Long Term Evolution (''LTE'') technology, which represents an evolution from GSM and UMTS technologies. Meo, S.A. was licensed to use these frequencies for an initial period of 15 years, renewable for an additional period of 15 years.

On 5 May 2014, Portugal Telecom SGPS, S.A. (''Portugal Telecom'') subscribed a share capital increase of Oi, S.A. (''Oi'') through the contribution in kind of its 100% interest in PT Portugal SGPS, S.A. (''PT Portugal''). Following this transaction, PT Portugal became a wholly-owned subsidiary of Oi and is now the parent company of the group in Portugal, while Portugal Telecom no longer controls PT Portugal and its subsidiaries. The Company's only shareholder continues to be PT Comunicações which in turn also continues to be a wholly-owned subsidiary of PT Portugal. Consequently, as from 5 May 2014, the Company is indirectly a wholly-owned subsidiary of Oi.

During the nine months period ended 30 September 2014, in connection with an internal corporate restructuring of PT Group for purposes of the Oi share capital increase undertaken on 5 May 2014, the following transactions involving either the company or its subsidiaries were completed:

- On 30 April 2014, PT Móveis, SGPS, S.A. (''PT Móveis''), a wholly-owned subsidiary of Meo, S.A., subscribed a share capital increase of Bratel BV by an amount of Euro 1,303 million;
- On 2 May 2014, PT Móveis disposed to Portugal Telecom, for an amount of Euro 4,195 million its 100% interest in Bratel BV, the company that held the investment in Oi, indirectly through Bratel Brasil, S.A. (''Bratel Brasil''). This operation generate a net loss of Euro 950 million recorded by PT Móveis which includes, (1) a capital gain of Euro 50 million reflecting the difference between the selling price (Euro 4,195 million) and the carrying value of the investment in Bratel BV (Euro 4,145 million) and (2) the transfer to net income of the cumulative amount of negative foreign currency translation adjustments that were recorded directly in shareholders' equity between March 2011 (Oi's acquisition date) and 2 May 2014, in the amount of Euro 950 million;
- On 2 May 2014, Portugal Telecom disposed to PT Móveis, for a total amount of Euro 2.240 million, its 100% interest in PT Participações, SGPS, S.A., the company that held, indirectly, a 75% interest in Africatel Holdings BV.

2. Basis of Presentation

These financial statements were prepared in accordance with Portuguese legislation, based on Decree-law nº. 158/2009, which approved the new Portuguese accounting system, named Sistema de Normalização Contabilística (''SNC''), including the conceptual structure, Normas Contabilísticas e de Relato Financeiro (''NCRF'') and Interpretative Standards, as approved by Notices nº 15652/2009, 15655/2009 and 15653/2009, respectively. As permitted by Decree-Law nº. 158/2009, the Company also applies the International Financial Reporting Standards (''IAS/IFRS'') and related interpretations (''SIC/

(Amounts stated in Euros)

2. Basis of Presentation (Continued)

IFRIC'') issued by International Accounting Standards Board (IASB), in order to fill in the gaps or omissions in SNC regarding specific situations of certain transactions.

As the Portuguese accounting system does not cover interim financial reporting, these interim financial statements have been presented in accordance with IAS 34 Interim Financial Reporting (''IAS 34'') and therefore do not include all the information required by above mentioned Portuguese accounting system. Accordingly, these interim financial statements should be read in conjunction with the financial statements for the year ended 31 December 2013.

3. Cash Flows

For the purposes of the cash flow statement, the caption ''Cash and cash equivalents'' includes cash, bank deposits immediately available, net of bank overdrafts.

The Company is exposed to a liquidity risk if its sources of funding, including cash balance, operating cash inflows, divestments and cash flows obtained from financing operations, do not match with our financing needs, such as operating and financing outflows, investments, shareholder remuneration and debt repayments. Based on the cash flows generated by its operations, on the available cash and in the possibility to obtain financing from PT Portugal under the centralized cash management system, the Company believes that it is able to meet its obligations.

The cash flow statement was prepared in accordance with ''*NCRF 2 Statement of Cash Flows*'', which includes the following:

(a) Cash receipts (payments) relating to income taxes

Under the special taxation regime for Groups of companies, the Company received Euro 9,182,500 from PT Portugal in the nine months period ended 30 September 2014 and paid Euro 46,285,729 to Portugal Telecom in the nine months period ended 30 September 2013. The change between both periods reflects the payments on account made by Meo, S.A. in the nine months period ended 30 September 2013, which did not take place in the nine months period ended 30 September 2014.

(b) Other payments, net

This caption includes essentially Value Added Tax and spectrum fees paid to the regulator ICP -Anacom.

(c) Dividends received

In the nine-month periods ended 30 September 2014 and 2013, this caption corresponds to dividends received from PT Móveis, amounting to Euro 194,000,000 and Euro 67,900,000, respectively (Note 5).

(d) Cash receipts (payments) resulting from loans obtained

In the nine-month periods ended 30 September 2014 and 2013, payments resulting from loans obtained, net of cash receipts resulting from loans obtained, consisted of the following:

	9M14	9M13
	Euro	
Receipts (payments) obtained under commercial paper programmes	(250,000,000)	260,000,000
Leases and other loans obtained	(3,125,643)	(1,590,779)
Intercompany loans within centralized cash management	8,106,528	(36,083,933)
Repayments of loans granted by PT Comunicações	—	(340,000,000)
	(245,019,115)	**(117,674,712)**

(Amounts stated in Euros)

3. Cash Flows (Continued)

(e) Cash and cash equivalents

As at 30 September 2014 and 2013, this caption had the following detail:

	9M14	9M13
	Euro	
Bank deposits immediately available	71,317,604	36,330,147
Cash	7,263,524	3,304,487

(Amounts stated in Euros)

4. Tangible fixed assets and Intangible assets (Continued)

During the nine months period ended 30 September 2014, movements in intangible assets were as follows:

	Industrial property and other rights	Other intangible assets	Intangible assets in progress	Total
	Euro			
Gross value				
Opening balance	860,661,648	2,993,745	185,534	863,840,927
Acquisitions	20,719,275	—	102,945	20,822,220
Disposals	(1,541,656)	—	—	(1,541,656)
Transfers and write-offs	1,355,396	—	(170,590)	1,184,806
Closing balance	**881,194,663**	**2,993,745**	**117,889**	**884,306,297**
Accumulated amortisation and impairment losses				
Opening balance	487,754,641	2,668,189	—	490,422,830
Amortisation	39,156,129	124,892	—	39,281,021
Disposals	(1,107,721)	—	—	(1,107,721)
Transfers and write-offs	558,855	—	—	558,855
Closing balance	**526,361,904**	**2,793,081**	**—**	**529,154,985**
Intangible assets, net	**354,832,759**	**200,664**	**117,889**	**355,151,312**

Total capital expenditures for tangible fixed assets and intangible assets amounted to Euro 42.3 million in the nine months period ended 30 September 2014, reflecting investments in tangible fixed assets allocated essentially toward reinforcing mobile data capacity and network quality and expanding the coverage of the 3G/3.5G and 4G networks, and investments in intangible assets related to loyalty programme contracts with customers, which are amortised over the contract period (2 years). In the nine months period ended 30 September 2013, total capital expenditures for tangible fixed assets and intangible assets amounted to Euro 70.2 million.

Total depreciation and amortization expenses amounted to Euro 122,839,414 in the nine months period ended 30 September 2014, reflecting depreciation of tangible fixed assets amounting to Euro 83,558,393 and amortization of intangible assets amounting to Euro 39,281,021. In the nine months period ended 30 September 2013, total depreciation and amortization expenses amounted to Euro 125,206,407.

During the nine months period ended 30 September 2014, the carrying amount of intangible assets included amounts in respect of personnel expenses of Euro 3,533,209, relating to own work capitalized (payroll cost and external supplies).

5. Financial investments—Equity method of accounting

During the nine months period ended 30 September 2014, the movements occurred under this caption were as follows:

	Euro
Opening balance	5,018,409,027
Dividends	(194,000,000)
Equity method	98,896,831
Closing balance	**4,923,305,858**

(Amounts stated in Euros)

5. Financial investments—Equity method of accounting (Continued)

In the nine months period ended 30 September 2014, the movements occurred in investments in subsidiary resulting from the application of the equity method of accounting were recorded as follows:

	Euro
Gains in affiliated companies, net (Note 13)	(1,034,664,217)
Adjustments to financial assets	1,133,561,048
	98,896,831

6. Accounts receivable and unbilled revenues

As at 30 September 2014 and 31 December 2013, these captions consist of:

	30 Sep 2014			31 Dec 2013		
	Gross value	Impairment losses	Net value	Gross value	Impairment losses	Net value
	Euro					
Trade accounts receivable—current assets	462,246,233	(79,324,689)	382,921,544	329,562,219	(85,831,116)	243,731,103
Trade accounts receivable—non-current assets	55,361	—	55,361	128,127	—	128,127
Accounts receivable	**462,301,594**	**(79,324,689)**	**382,976,905**	**329,690,346**	**(85,831,116)**	**243,859,230**
Unbilled revenues	98,922,540	—	98,922,540	90,207,873	—	90,207,873
	561,224,134	**(79,324,689)**	**481,899,445**	**419,898,219**	**(85,831,116)**	**334,067,103**

The increase in accounts receivable reflects mainly receivables from group companies, especially from PT Comunicações. This increase, together with the lower services rendered, explains the reduction in collections from clients in the nine months period ended 30 September 2014, as compared to the same period of last year.

In the nine months period ended 30 September 2014, changes in accumulated impairment losses related to accounts receivable were as follows:

	Euro
Opening balance	85,831,116
Increases (reversals)	4,533,639
Utilizations[(a)]	(11,040,066)
Closing balance	**79,324,689**

(a) This line item refers to the use of accrued impairment losses to face of credits of doubtful collection that were deemed uncollectible and that were fully adjusted.

(Amounts stated in Euros)

7. Shareholders and Group companies

As at 30 September 2014 and 31 December 2013, these captions consist of:

	30 Sep 2014	31 Dec 2013
	Euro	
DEBIT BALANCES		
Current		
Intercompany loans granted within centralized cash management	277,772	8,384,405
Accounts receivable from PT SGPS within tax consolidation[(a)]	—	18,423,167
Other	445,467	—
Total debit balances with shareholders and group companies	**723,239**	**26,807,572**
CREDIT BALANCES		
Current		
Accounts payable to PT Portugal within tax consolidation[(a)]	46,824,345	—
Other	4,125,887	2,755,033
Total credit balances with shareholders and group companies	**50,950,232**	**2,755,033**

(a) The receivable as at 31 December 2013 corresponds to the difference between withholding income tax and payments on account made during the year 2013 and the estimated income tax for the year 2013. During the nine months period ended 30 September 2014, the Company have not yet made any payments on account to PT Portugal under the tax consolidation regime, and as a result the Company recorded a net payable as at 30 September 2014 corresponding basically to the estimated income tax for the nine months period ended 30 September 2014.

8. Provisions and contingent liabilities

8.1. Movements occurred in provisions

The movements in provisions during the nine months period ended 30 September 2014 were as follows:

	Tax claims	Other litigation	Provision for negative financial investments (Note 13)	Other provisions	Total
			Euro		
Opening balance	1,273,630	10,849,818	2,779	6,888,982	**19,015,209**
Increases	313,588	53,018	—	—	**366,606**
Reductions	(67,801)	(529,208)	(3,079)	(5,240,216)	**(5,840,304)**
Utilizations	(1,205,829)	—	—	—	**(1,205,829)**
Other movements	4,297,973	—	300	—	**4,298,273**
Closing balance	**4,611,561**	**10,373,628**	**—**	**1,648,766**	**16,633,955**

8.2. Proceedings with probable losses

The provision for taxes is to cover several Corporate Income Tax and Social Security contingencies, as well as other taxes and fees.

The provision for legal processes in progress is to cover liabilities resulting from processes brought against the Company, estimated based on information from its lawyers.

As at 30 September 2014, the Company, based on the opinion of its internal and external lawyers, classified several legal and arbitration processes in progress and tax contingencies as of probable loss and so it recorded provisions in accordance with NCRF 21—Provisions, Contingent Liabilities and

(Amounts stated in Euros)

8. Provisions and contingent liabilities (Continued)

Contingent Assets to cover the probable outflow of resources. As at 30 September 2014 and 31 December 2013, the nature of these proceedings is as follows:

	30 Sep 2014	31 Dec 2013
	Euro	
Legal proceedings		
Civil contingencies	9,818,334	10,245,469
Labor contingencies	29,662	24,632
Other contingencies	525,632	579,717
	10,373,628	**10,849,818**
Tax contingencies	4,611,561	1,273,630
	14,985,189	**12,123,448**

8.3. Proceedings with possible losses

As at 30 September 2014, the Company, in accordance with NCRF 21 and based on the opinion of internal and external legal counsel, had classified a variety of ongoing judicial and arbitral actions and tax contingencies as proceedings with possible losses. The nature of these proceedings is as follows:

	30 Sep 2014	31 Dec 2013
	Euro	
Legal proceedings		
Civil contingencies	750,000	780,759
Labor contingencies	1,887	1,683
Other contingencies	7,407,217	2,180,597
	8,159,104	**2,963,039**

The Board of Directors believes that any corrections resulting from audits/inspections of tax returns by the tax authorities will not have a significant effect on the financial statements as of and for the nine months period ended 30 September 2014, considering the provisions constituted and the expectations at the date hereof with respect to the final resolution of the above-referenced matters.

8.4. Other proceedings

The Company received additional income tax assessments relating to the financial years from 2004 to 2010, which essentially question the deductibility of certain financial costs, in the total amount of Euro 204 million of taxes. The Company disagrees with these assessments and conclusions, and considers, based on the opinion of its tax counsel, that there are solid arguments to oppose the position of the tax authorities. As such, the company consider that this proceeding with possible loss.

(Amounts stated in Euros)

9. Loans obtained

Loans obtained as of 30 September 2014 and 31 December 2013 consisted of the following:

	30 Sep 2014		31 Dec 2013	
	Non-current	Current	Non-current	Current
	Euro			
Commercial programme	—	—	230,000,000	20,000,000
Other financings	—	10,942	—	2,020,914
Leases	1,634,962	1,416,349	1,429,085	1,239,737
	1,634,962	**1,427,291**	**231,429,085**	**23,260,651**

During the nine months period ended 30 September 2014, the reduction in outstanding amounts due under loans obtained reflects primarily the repayment of the amounts due under commercial paper programmes, amounting to Euro 250,000,000.

10. Suppliers and Investment suppliers

The captions ''Suppliers'' and ''Investment suppliers'' as at 30 September 2014 and 31 December 2013 consist of the following:

	30 Sep 2014	31 Dec 2013
	Euro	
Trade suppliers		
Current	189,272,682	162,474,110
Invoices to be received	6,080,506	4,320,533
	195,353,188	**166,794,643**
Investment suppliers		
Current	4,519,121	24,020,629
Invoices to be received	5,272,907	3,893,380
	9,792,028	**27,914,009**

11. Accrued expenses

As at 30 September 2014 and 31 December 2013, this caption had the following detail:

	30 Sep 2014	31 Dec 2013
	Euro	
Support services	51,270,891	55,519,444
Commissions	42,614,061	32,235,530
Direct costs of services rendered	21,564,041	19,565,533
Other supplies and external services	13,044,383	11,333,716
Specialized work	7,851,355	6,338,406
Charges for vacations, vacation subsidies and other payroll costs	7,587,366	6,576,148
Litigation and legal actions	7,353,215	9,014,706
Interest and other financial expenses payable	222,560	1,836,321
Other	6,960,838	5,362,407
	158,468,710	**147,782,211**

(Amounts stated in Euros)

12. Services rendered and sales

In the nine-month periods ended 30 September 2014 and 2013, these captions had the following detail:

	9M14	9M13
	Euro	
Services rendered		
Billing	622,669,523	678,736,662
Interconnection	49,450,250	39,573,940
Roaming operators	6,445,451	8,736,245
Sales	60,258,874	71,783,209
	738,824,098	**798,830,056**

13. Equity in earnings (losses) of affiliated companies

In the nine-month periods ended 30 September 2014 and 2013, this caption corresponds to the Company's share in the earnings and losses of the following affiliated companies:

	9M14	9M13
	Euro	
Gains and losses in affiliated companies		
PT Móveis	(1,034,664,295)	123,119,789
PT Cloud e Data Centers, S.A.	3,157	(6,293)
	(1,034,661,138)	**123,113,496**

The total net losses of Euro 1,034,661,138 recorded in the nine months period ended 30 September 2014 include a loss of Euro 1,034,664,217 recorded on financial investments (Note 5) and a gain of Euro 3,079 recorded on provisions for negative financial investments (Note 8).

The Company's share in net losses of PT Móveis, amounting to Euro 1,034,664,295, reflects primarily a net loss of Euro 950 million recorded by PT Móveis, in connection with the disposal of its 100% interest in Bratel BV to Portugal Telecom, which includes (1) a capital gain of Euro 50 million reflecting the difference between the sale price (Euro 4,195 million) and the carrying value of the total investment in Bratel BV (Euro 4,145 million, already reflecting the share capital increase realized by PT Móveis in Bratel BV prior to the sale, amounting to Euro 1,303 million), and (2) the cumulative amount of negative currency translation adjustments, amounting to Euro 1,000 million, which were generated since the acquisition of the investment in Oi in March 2011 and transferred to net income upon the sale of this investment through Bratel BV on 2 May 2014.

14. Direct costs

In the nine-month periods ended 30 September 2014 and 2013, this caption is made up as follows:

	9M14	9M13
	Euro	
Capacity to rental costs	80,248,186	85,040,347
Interconnection costs	47,895,157	43,987,556
Leases	16,154,276	15,840,391
Contents of internet	6,747,867	6,569,027
Other	549,649	644,757
	151,595,135	**152,082,078**

(Amounts stated in Euros)

15. Supplies and external services

In the nine-month periods ended 30 September 2014 and 2013, this caption is made up as follows:

	9M14	9M13
	Euro	
Support services	67,329,889	70,088,008
Commissions	46,591,684	51,672,589
Maintenance and repairs	17,621,898	21,362,576
Specialized work	15,764,581	18,781,364
Electricity	10,648,875	11,135,506
Rentals	10,026,633	10,245,442
Provide access	6,158,950	6,201,547
Communications	3,354,241	3,956,948
Transportation	2,198,417	2,934,431
Other	4,632,576	1, 116,249
	184,327,744	**197,494,660**

16. Income tax

In 2013, companies located in mainland Portugal are subject to Corporate Income Tax at a base rate of 25%, increased (1) up to a maximum of 1.5% of taxable income through a municipal tax, and (2) by a state surcharge levied at the rate of 3.0% on taxable income between Euro 1.5 million and Euro 7.5 million and at the rate of 5.0% on taxable income in excess of Euro 7.5 million.

As from 2014, companies located in mainland Portugal are subject to Corporate Income Tax at a base rate of 23%, increased (1) up to a maximum of 1.5% of taxable income through a municipal tax, and (2) by a state surcharge levied at the rates of 3.0% on taxable income between Euro 1.5 million and Euro 7.5 million, 5.0% on taxable income between Euro 7.5 million and Euro 35.0 million and 7.0% on taxable income in excess of Euro 35.0 million, resulting in a maximum aggregate tax rate of approximately 31.5% for taxable income higher than Euro 35.0 million.

Since the Company's tax profits in the nine-month periods ended 30 September 2014 and 2013 exceeded the Euro 35.0 million and Euro 7.5 million thresholds mentioned above, the Company applied the tax rate of 31.5% to compute its income tax estimate.

The Company's income taxes are computed based on the tax rate mentioned above and are determined on the basis of profit before-tax adjusted in accordance with tax legislation.

PT Portugal has adopted the tax consolidation regime in Portugal (currently known as the Special Regime for the Taxation of Groups of Companies), under which the provision for income taxes is determined on the basis of the estimated taxable income for all the companies in which PT Portugal holds at least 75% of the share capital and that are domiciled in Portugal and subject to Corporate Income Tax (IRC). PT Portugal is still waiting for the approval from the tax authorities in relation to the use of this tax consolidation regime in 2014, since PT Portugal only became the parent company of the group in Portugal as from 5 May 2014, following the contribution in kind made by Portugal Telecom to the Oi share capital increase consisting of its 100% interest in PT Portugal (Note 1). The Company is part of the Special Taxation Regime for Groups of Companies and, as a result, the income tax estimate and deductions made by third parties are recorded on the balance sheet as accounts payable and receivable of PT Portugal.

(Amounts stated in Euros)

16. Income tax (Continued)

In the nine-month periods ended 30 September 2014 and 2013, the reconciliation between the expected tax by applying the nominal tax rate to income before taxes and the total income tax is as follows:

	9M14	9M13
	Euro	
Income before taxes	**(869,953,846)**	**275,518,923**
Nominal tax rate	31.5%	31.5%
Expected tax	**(274,035,461)**	**86,788,461**
Permanent differences[(i)]	325,723,924	(38,871,277)
Adjustments to prior years' current income tax	4,306,443	(2,980,526)
Reversal of deferred taxes from previous years	(4,055,987)	1,495,180
Other	(578,994)	40,690
	51,359,925	**46,472,528**
Income tax		
Income tax-current	51,146,904	42,384,291
Deferred tax	213,021	4,088,237
	51,359,925	**46,472,528**

(i) Permanent differences are as follows:

	9M14	9M13
	Euro	
Equity method of accounting (Note 13)	1,034,661,138	(123,113,496)
Tax benefits	(560,038)	(545,332)
Other	(56,896)	257,950
	1,034,044,204	**(123,400,878)**
Nominal tax rate	31.5%	31.5%
	325,723,924	**(38,871,277)**

17. Earnings per share

Earnings per share for the nine-month periods ended 30 September 2014 and 2013 were computed as follows:

	9M14	9M13
	Euro	
Net income	(921,313,771)	229,046,395
Number of shares	9,400,000	9,400,000
Basic earnings per share	**(98.01)**	**24.37**

There are no situations that create a dilutive effect, so the diluted earnings per share are the same as basic earnings per share.

(Amounts stated in Euros)

18. Guarantees

As at 30 September 2014 and 31 December 2013, the Company had presented the following guarantees in favour of third parties:

	30 Sep 2014	31 Dec 2013
	Euro	
Guarantees in favour of courts	**180,543**	**105,370**
Bank guarantees in favor of other entities:		
Anacom	18,000,000	24,000,000
Ministry of Justice	—	2,859,806
Outros	2,347,196	2,023,980
	20,347,196	**28,883,786**
Total guarantees	**20,527,739**	**28,989,156**
Commitments of purchase before:		
Fixed asset and content suppliers	3,083,611	8,981,302
Suppliers of inventories	17,233,504	8,264,400
Other services	10,168,742	12,387,759
	30,485,857	**29,633,461**

The bank guarantee provided in favour of Anacom as at 30 September 2014, in the amount of Euro 18 million, was requested by Anacom in the context of the auction of spectrum usage rights, and corresponds to the total amount of the three outstanding instalments.

As at 30 September 2014, the value for the bank guarantees provided in favour of other entities includes, essentially, the amount of Euro 1.5 million in respect of contracts to use stores.

As of 30 September 2014, Portugal Telecom had presented bank guarantees in favor of the tax authorities in relation to additional tax assessments received by Portugal Telecom regarding the tax consolidation of the years 2005 to 2010, thus including the tax contingencies of Meo, S.A. as well as tax contingencies of other entities included in the tax consolidation group, namely PT Comunicações, S.A. and Portugal Telecom. These bank guarantees totaled Euro 353 million as of 30 September 2014. In accordance with Portuguese tax legislation, Portugal Telecom has presented these guarantees and submitted a claim or an appeal to the tax authorities in order to be able to hold open discussions with the tax authorities and avoid the payment of a given tax assessment. In Portugal, these two conditions are required and must be complied with before the process can continue, regardless of the amount of the tax assessment or the likelihood of success of the appeal or the claim.

19. Events occurred after the balance sheet date

The financial statements as of and for the nine months period ended 30 September 2014 were approved by the Board of Directors and authorised for issuance on 13 January 2015.

On 1 December 2014, Oi entered into an exclusivity agreement with Altice, S.A. to allow both entities to negotiated and agree on the final terms of the sale of PT Portugal, excluding certain details. On 8 December 2014, the Board of Directors of Oi finalized the formalities to approve the general terms and conditions for the sale of all shares of PT Portugal to Altice Portugal, S.A., a wholly-owned subsidiary of Altice, S.A.. The sale substantially involves PT Portugal's operations in Portugal and Hungary. The effectiveness of the purchase and sale contract will depend on the approvals by the shareholders of Portugal Telecom SGPS, S.A., the meeting of which was initially scheduled for 12 January 2015 and then postponed to 22 January 2015, and by the proper regulatory entities. With this approval, Oi will transfer to Altice all of the shares issued by PT Portugal for an enterprise value of Euro 7.4 billion, adjusting for cash and debt and including an earn-out of Euro 500 million related to PT Portugal's generation of future

19. Events occurred after the balance sheet date (Continued)

revenue. The price to be paid by Altice will suffer adjustments usually adopted in similar transactions, in accordance with PT Portugal's cash holdings on the closing of this transaction.

On 29 December 2014, Meo, S.A. was merged into PT Comunicações and accordingly ceased to exist, but as its assets and liabilities were entirely transferred into PT Comunicações, the Company's activity will continue in the future. This merger produced effects as from 1 January 2014. Following this merger, PT Comunicações was renamed MEO—Serviços de Comunicações e Multimédia, S.A..

Meo, S.A.

Financial Statements

AUDITORS' REPORT

Introduction

1. We have audited the accompanying financial statements of MEO—Serviços de Comunicações e Multimédia, S.A. (''the Company''), formerly named TMN—Telecomunicações Móveis Nacionais, S.A., which comprise the balance sheet as of 31 December 2013 that presents a total of 6,344,784,096 Euros and shareholders' equity of 5,596,922,716 Euros, including a net income of 336,146,179 Euros, the statements of income by nature, of changes in shareholders' equity and of cash flows for the year then ended and the corresponding notes.

Responsibilities

2. The preparation of financial statements that present a true and fair view of the financial position of the Company, the results of its operations, the changes in its shareholders' equity and its cash flows, as well as the adoption of adequate accounting principles and criteria and the maintenance of an appropriate system of internal control are the responsibility of the Company's Board of Directors. Our responsibility is to express a professional and independent opinion on these financial statements, based on our audit.

Scope

3. Our audit was performed in accordance with the auditing standards *(''Normas Técnicas e as Directrizes de Revisão/Auditoria'')* issued by the Portuguese Institute of Statutory Auditors *(''Ordem dos Revisores Oficiais de Contas'')*, which require that the audit be planned and performed with the objective of obtaining reasonable assurance about whether the financial statements are free of material misstatement. An audit includes verifying, on a sample basis, evidence supporting the amounts and disclosures in the financial statements and assessing the significant estimates, based on judgements and criteria defined by the Board of Directors, used in their preparation. An audit also includes assessing the adequacy of the accounting principles used and their disclosure, taking into consideration the circumstances, verifying the applicability of the going concern concept and assessing the adequacy of the overall presentation of the financial statements. We believe that our audit provides a reasonable basis for expressing our opinion.

Opinion

4. In our opinion, the financial statements referred to in paragraph 1 above, present fairly, for the purpose explained in paragraph 5 below, in all material respects, the financial position of MEO—Serviços de Comunicações e Multimédia, S.A. as of 31 December 2013 and the results of its operations, the changes in its shareholders' equity and its cash flows for the year then ended, in conformity with generally accepted accounting principles in Portugal.

Emphases

5. The financial statements mentioned in paragraph 1 above refer to the Company on a standalone basis and were prepared in accordance with current legislation for approval and publication. The Company did not prepared consolidated financial statements as, in accordance with number 3 of article 7 of Decree-Law 158/2009, of 13 July 2009 was not required to do so, as its financial statements were included in the consolidated financial statements of Portugal Telecom, SGPS, S.A.. As described in Note 3.6, although the financial investments have been accounted for by the equity method, under which the Company´s net profit for the year and shareholders' equity include the effect of consolidating the subsidiaries, the accompanying financial statements do not include the effects of a full consolidation of their assets, liabilities, revenues and costs.

6. As of 31 December 2013, the Company's financial investments included the wholly-owned subsidiary PT Móveis, S.A. (''PT Móveis''), which owned 100% interest in Bratel BV, a holding company that essentially owned the investment in Oi, S.A. and its controlling shareholders in the total amount of 2,589 million Euros. In connection with the business combination between Portugal Telecom, SGPS, S.A. (''PT SGPS'') and Oi, as of 2 May 2014 this investment was sold to PT SGPS and PT Móveis incurred in a net loss of approximately 950 million Euros, of which 1,000 million Euros did not have an impact in the PT Móveis shareholders' equity as it corresponds to a transfer to net income of the cumulative amount of negative foreign currency translations adjustments that

were recorded directly in shareholders' equity between March 2011 (Oi's acquisition date) and 2 May 2014 (of which 885 million Euros recorded at 31 December 2013), while the remaining 50 million Euros corresponds to a capital gain reflecting the difference between the selling price and the carrying value of the investment in the books of PT Móveis.

TABLE OF CONTENTS

MEO—Serviços de Comunicações e Multimédia, S.A.
Annex to the Financial Statements
As of and for 31 December 2013
(Amounts expressed in Euros)

1. Introduction

MEO—Serviços de Comunicações e Multimédia, S.A. (the ''Company'' or ''Meo, S.A.''), formerly named TMN—Telecomunicações Móveis Nacionais, S.A., was incorporated on 22 March 1991; its principal activity is to provide mobile telecommunications services, and it is licensed by the *Instituto das Comunicações de Portugal* (''ICP''), currently the ICP—*Autoridade Nacional de Comunicações* (''ANACOM''), to provide complementary (land-based) mobile telecommunications services in Portugal, under the terms of license ICP—011/TCM, dated 16 March 1992. By resolution of the ANACOM Board of Directors on 28 February 2007, the right to utilise these frequencies was renewed for an additional 15 years, i.e., until 16 March 2022. At the end of the year 2000, Meo, S.A. was licensed by ANACOM to do business in the international mobile telecommunications system, under the terms of license IMT 2000/UMTS, dated 19 December 2000, under ICP number 02 / UMTS, effective until 11 January 2016 with the possibility of subsequent renewal for an additional 15 years.

In December 2011, ANACOM notified Meo, S.A., in the context of an auction of spectrum held November 28-30, that it had acquired spectrum in the frequency bands at 800 MHz, 1.8 GHz and 2.6 GHz, for a total of 113 million Euros. This allows Meo, S.A. to provide 4G mobile services, through Long Term Evolution (''LTE'') technology, representing an evolution from GSM and UMTS technologies. Meo, S.A. was licensed to use these frequencies for an initial period of 15 years, renewable for an additional 15 years.

In addition, the Company may also provide other telecommunications services in Portugal, highlighted by the following:

a) Meo, S.A. is registered to exercise the activity of telecommunications of public use;

b) Meo, S.A. is licensed by ANACOM to provide land-line telephone service, under the terms of license ICP—010/99/99-SFT, and to establish and supply a public telecommunications network, under the terms of license ICP—017/99-RPT, both for the entirety of the Portuguese territory and dated 25 November 1999;

c) Meo, S.A. is authorised to provide private virtual network services, having been assigned access code ''70596.''

Among other regulations pursuant to Law 12/2008—Provision of Essential Public Services, as published in February 2008, the Company is afforded 6 months to bring suit against clients for non-payment, failing which, the debt lapses. In accordance with this Law, all electronic communications services (and not just landline telephone service) became subject to new regulations.

In 2008, in the context of the reorganisation process of the Portugal Telecom Group, Meo, S.A. acquired from Portugal Telecom, SGPS, S.A. (''PT SGPS'' or ''Portugal Telecom'') the stake it held in PT Acessos de Internet Wi-Fi, S.A (''PT Wi-Fi''), which was merged into Meo, S.A., as of 1 January 2008.

Meo, S.A. holds one hundred percent of the share capital of PT Móveis—Serviços de Telecomunicações, SGPS, S.A. (''PT Móveis''). On 27 September 2010, PT Móveis sold to Telefónica Móviles, S.A. the 50% stake it held in the capital of Brasilcel N.V. (a joint venture controlling Vivo that was constituted at the end of 2002 between the Portugal Telecom Group—through PT Móveis—and the Telefónica Group—through Telefónica Móviles, S.A.). Subsequently, on 28 March 2011, Portugal Telecom completed the process of acquiring an effective stake of 25.3% in Telemar Norte Leste, S.A. (''Oi'') and 14.1% in Contax, S.A. and the agreements with the controlling shareholders of these companies, for a total of 8.437 billion Brazilian *Reais*. This investment was effected by the Portugal Telecom Group through Bratel Brasil, in which PT Móveis indirectly holds a 99% stake. The terms of these agreements allow Portugal Telecom to share decision-making power on the strategic financial and operating policies of the acquired companies, such that these are classified as jointly controlled entities, in accordance with the terms of IFRS 11—Joint Arrangements, and are recognised indirectly under the equity method. On 1 October 2013, Portugal Telecom, Oi and some of the principal shareholders of

1. Introduction (Continued)

these entities signed a memorandum of understanding that establishes the essential principles for a merger proposal among PT, Oi and Oi's controlling shareholders with the objective of creating a single integrated company listed in Brazil. The Oi Group is a leading operator of telecommunications services in the Brazilian market and the largest operator of landline telecommunications in South America in terms of active clients, and Contax is one of the leading companies in corporate services and the leading company in contact centre services in Brazil.

On 30 November 2010, PT Portugal, SGPS, S.A. (''PT Portugal'') sold to PT Comunicações, S.A. (''PT Comunicações'') its entire stake in Meo, S.A., such that the Company came to be wholly owned by PT Comunicações.

Under the terms of article 7 of Decree-Law nº 158/2009, despite holding financial investments in group and associated companies, the Company is exempt from preparing consolidated financial statements since it is wholly owned, directly or indirectly, by Portugal Telecom, SGPS S.A. (''Portugal Telecom''), which in turn presents consolidated financial statements which include the financial statements of the Company and the entities in which it has a stake.

2. Basis of presentation

The financial statements annexed here were prepared in accordance with applicable provisions of Portuguese law, as set forth in Decree-Law nº 158/2009, which approved the *Sistema de Normalização Contabilística* (''SNC''), and in accordance with the conceptual framework, *Normas Contabilísticas e de Relato Financeiro* (''NCRF'') and *Normas Interpretativas* issued, respectively, in notices 15652/2009, 15655/2009 and 15653/2009.

The Company first adopted the NCRF in 2010, applying NCRF 3 *Adoção Pela Primeira Vez Das NCRF* (''NCRF 3''), using 1 January 2009 as the transition date for the effects of presenting these financial statements. As provided in the Annex to Decree-Law nº 158/2009, the Company supplementarily applies the International Accounting Standards and International Financial Reporting Standards (''IAS/IFRS'') and the respective interpretations (''SIC/IFRIC'') of the IASB, to bridge gaps or omissions relating to specific aspects of some transactions or particular situations not provided for by the SNC.

3. Main accounting policies, judgments and estimates

The financial statements annexed here were prepared assuming ongoing operations. The main accounting policies adopted in preparing these financial statements are described below and were applied on a consistent basis, except as otherwise indicated.

3.1. Tangible fixed assets

Tangible fixed assets are recorded at the cost of acquisition or production, which includes the cost of purchase, any costs directly attributable to putting the assets in place in the conditions needed to operate as intended and, when applicable, the initial estimate of the costs that the company expects to incur in dismantling and removing the assets and restoring the respective premises where they were installed.

The subsequent expenses are included in the carrying amount for the asset only when it is probable that future economic benefits will flow to the Company and the cost can be reliably measured. Maintenance and repair costs not likely to generate future economic benefits are recognised as an expense in the period in which they are incurred.

3. Main accounting policies, judgments and estimates (Continued)

Except for land that is not depreciated, depreciation of the other tangible fixed assets is recognised on a straight-line basis, as of such time as the asset is ready for use, with duodecimal imputation. The annual rates applied reflect the estimated useful life for each asset class, as follows:

Asset class	Years of useful life
Buildings and other constructions	3-50
Basic equipment	3-20
Transportation equipment	4-5
Administrative equipment	3-10
Other tangible fixed assets	4-8

The useful lives and the amortisation method are reviewed regularly, and the effect of any change in these estimates is recognised prospectively in the income statement.

Gains or losses stemming from a write-off or sale are determined as the difference between the amount received and the carrying amount for the asset, and are recognised in the income statement.

3.2. Leases

Leases are classified as financial leases if they transfer to the lessee substantially all the risks and rewards inherent to possessing the corresponding assets. All other leases are classified as operating leases. Leases are classified as a function of their substance and not their form.

Assets acquired by means of financial leases, as well as the corresponding liabilities, are recorded at the beginning of the lease at the lesser of the fair value of the assets and the present value of the minimum lease payments. The rents include financial expense and amortisation of the capital, wherein financial expenses are imputed in accordance with a constant periodic interest rate on the remaining balance of the liability.

In operating leases, rents owed are recognised as an expense on a linear basis during the lease period.

3.3. Concentrations of business activities and goodwill

Acquisitions of financial investments in subsidiary companies are recorded using the purchase method. The acquisition cost is determined by aggregating, at the acquisition date, the following components: (a) the fair value of the assets delivered or deliverable; (b) the fair value of the liabilities incurred or assumed; (c) the fair value of equity instruments issued by the Company in exchange for obtaining control over the subsidiary; and (d) the costs directly attributable to the acquisition. When applicable, the acquisition cost includes the effect of contingent payments agreed upon in the context of the transaction, and subsequent changes in such payments are recorded as a counter-entry to the corresponding goodwill.

Goodwill represents the excess of the acquisition cost over the fair value of the identifiable assets, liabilities and contingent liabilities of the acquired company, at the acquisition date, pursuant to NCRF 14 *Concentrações de Atividades Empresariais* (''NCRF 14''). If the difference between the acquisition cost and the fair value of the assets and liabilities acquired is negative, it is recognised as income for the year. Pursuant to the exception provided in NCRF 3, the Company applied the provisions of NCRF 14 only to acquisitions after 1 January 2009, such that the amounts of goodwill relating to acquisitions prior to such date were retained as initially calculated in accordance with the standard applicable at the time.

Goodwill arising from acquiring subsidiary companies is included on the balance sheet as ''Goodwill.''

Goodwill is not amortised, and is subject to tests for impairment on an annual basis or whenever there is indication of a loss of value. For purposes of impairment testing, goodwill is allocated to cash-generating

3. Main accounting policies, judgments and estimates (Continued)

units. Any impairment loss is immediately recorded as an expense in the income statement for the period and cannot later be reversed.

3.4. Intangible assets

Intangible assets include, basically, (1) rights and licenses, (2) commercial goodwill, (3) terminal equipment assigned to clients pursuant to service contracts with them, and (4) development expenses. Intangible assets acquired separately are recorded at cost, less accrued amortisations and impairment losses.

Intangible assets are amortised on a straight-line basis in accordance with the following estimated useful lives:

Asset class	Useful life
License UMTS (3G)	Period of the license with a renewal period (until 2030)
License LTE (4G)	Period of the license with a renewal period (until 2042)
Rights over terminal equipment assigned to clients	Contractual terms (2 years)
Other intangible assets	3 years

The useful lives and method of amortising the various intangible assets are reviewed annually, and the effects of any changes in these estimates are recognised in the income statement prospectively.

Research expenses are recognised in the income statement when incurred. Development expenses are capitalized when the technical and economic feasibility of the product or process under development can be shown and the Company has the intention and capability to complete its development and begin marketing or using it, as provided in NCRF 6 *Activos Intangíveis*.

3.5. Impairments of tangible fixed assets and intangible assets

The Company tests for impairment its tangible and intangible assets whenever there is an event or change that indicates that the amount at which the asset is booked may not be recovered. Should there be such indication, the Company proceeds to determine the recoverable value of the asset, so as to determine the extent of the impairment loss. When it is not possible to determine the recoverable amount of an asset, the recoverable amount for the cash-generating unit to which such asset belongs is estimated.

In addition, in the specific case of terminal equipment assigned to clients pursuant to loyalty programme contracts, impairment is tested periodically, and the assets are fully written off in cases where the revenue associated with the client giving rise to the intangible asset is not assured.

The recoverable amount is determined as the higher of the sale price and the use value. The sale price is the amount that would be obtained by selling the asset in a transaction between knowledgeable independent entities, less the costs directly attributable to the sale. The use value derives from future cash flows as discounted to reflect the cost of capital and the specific risk of the asset.

Whenever the book value of the asset or of the cash-generating unit exceeds its recoverable amount, an impairment loss is recognised and recorded in the income statement.

3. Main accounting policies, judgments and estimates (Continued)

3.6. Financial investments

Subsidiary companies are all the entities over which the Company has decision-making power over financial and operating policies, generally represented by more than half of the voting rights. Associated companies are entities over which the Company exercises significant influence, but does not have control, generally with stakes of between 20% and 50% of the voting rights.

Investments in the Company's subsidiaries are recorded using the equity method of accounting. In accordance with this method, financial investments are initially recorded at their acquisition cost and subsequently adjusted as a function of observed changes, after the acquisition, in the Company's interest in the net assets of the corresponding entities. The Company's results include its interest in the corresponding results of these entities.

Financial investments are tested whenever there is an indication that the asset may be impaired, and existing impairment losses are recorded as expenses in the income statement.

Unrealised gains in transactions with subsidiaries are eliminated in proportion to the Company's interest in them, with a counter-entry to the corresponding investment line item.

3.7. Accrual accounting

The Company records its revenue and expenses on an accrual basis, under which revenues and expenses are recognised to the extent they are generated or incurred, regardless of when they are received or paid, respectively.

3.8. Income taxes

Income taxes correspond to the sum of current and deferred taxes, which are recorded in the income statement except when they relate to items recorded directly in shareholders' equity, in which case they are likewise recorded in shareholders' equity.

Income taxes are estimated based on the estimate of the tax base under the *Imposto sobre o Rendimento das Pessoas Coletivas* (''IRC'').

Portugal Telecom makes use of tax consolidation under the *Regime Especial de Tributação de Grupos de Sociedades* (''RETGS''), in which Meo, S.A. is included. Consequently, the estimated IRC amounts, less withholding effected by third parties and advance payments, are recorded on the balance sheet as accounts payable to Portugal Telecom.

The income taxes for the year recorded in the financial statements are calculated pursuant to NCRF 25 *Impostos Sobre o Rendimento*. In measuring income taxes for the year, in addition to the current tax determined based on pre-tax results as adjusted in accordance with tax law, the effects of temporary differences between the amounts of assets and liabilities for accounting purposes and the respective amounts for tax purposes are also taken into account. Deferred tax assets and liabilities are calculated and assessed annually, using the tax rates that are expected to be in effect at the date of the reversal of the temporary differences.

Deferred tax assets are recorded only when there is a reasonable expectation of sufficient future taxable profits to use them. At the balance sheet date, the temporary differences underlying the deferred tax assets are reappraised, for the purposes of recognising deferred tax assets that had gone unrecorded for not having fulfilled the conditions for recording, and/or reducing the amount of the deferred tax assets that are recognised as a function of current expectations of their future recovery.

3. Main accounting policies, judgments and estimates (Continued)

3.9. Inventories

Inventories are recorded at the lesser of the acquisition cost and the net realisation value. The net realisation value represents the estimated sale price less all costs deemed necessary to complete the sale. The Company uses the average cost method.

Inventory impairment losses include the value of unutilised materials forecast by dint of technological obsolescence and/or turnover, as well as the difference of prices for materials whose realisation value is less than the average acquisition cost, to the extent that it exceeds the discount level considered normal in the business.

3.10. Accounts receivable from clients and other debtors

Accounts receivable from clients and other debtors are recognised initially at fair value, and are subsequently measured at cost or amortised cost, utilising the effective interest method, less impairment losses.

Impairments for debts of doubtful collection are calculated based on an evaluation of the estimated risks arising from non-collection of accounts receivable, and are recognised in the income statement in the period in which they arise.

3.11. Provisions, obligations and contingent liabilities

Provisions are recognised by the Company when there is a current obligation resulting from past events, provided it is probable that there will be an outlay of internal resources to settle such obligation and the amount of such outlay can be reasonably estimated. When any of these conditions is not fulfilled, the Company moves to disclose the events as contingent liabilities, unless the possibility of an outflow of funds is remote.

Provisions are recognised in an amount corresponding to the present value of the best estimate, at the reporting date, of the resources needed to settle the obligation. This estimate is determined considering the risks and uncertainties associated with the obligation. Provisions are reviewed at the end of each year and adjusted so as to reflect the best estimate at that date.

Obligations entailing the costs of dismantling and removing assets installed on others' property and restoring the respective premises are recognised when the assets start to be utilised and if it is possible to reliably estimate the respective obligation. The recognised amount of the obligation recognised corresponds to the present value of the obligation, and financial updating is recorded under ''Other expenses and losses.''

3.12. Loans obtained

Loans obtained are initially recognised at fair value, net of transaction costs incurred, and are subsequently presented at amortised cost, utilising the effective interest method.

3.13. Financial charges on loans obtained

The Company's policy is to capitalise the financial charges relating to loans obtained for the acquisition, construction or production of tangible assets. However, the Company has recognised financial charges as expenses when incurred, given that the construction period for the tangible and intangible assets has been relatively short.

(Amounts expressed in Euros)

3. Main accounting policies, judgments and estimates (Continued)

3.14. Classification on the balance sheet

Assets realisable and liabilities due more than one year from the balance sheet date are classified, respectively, in non-current assets and liabilities, at their present value.

3.15. Transactions and balances in foreign currency

Transactions in foreign currency (i.e., not in the Company's functional currency) are recorded at the exchange rates at the dates of the transactions. Assets and liabilities expressed in foreign currency for which there is no agreement for setting the exchange rate are converted into Euros using the exchange rates in effect at the balance sheet date. Exchange rate differences, be they favourable or unfavourable, originating from differences between the exchange rates in effect at the date of the transactions and those in effect at the date of the collections or payments or at the balance sheet date, are recorded as revenue and expenses in the income statement.

At 31 December 2013 and 2012, assets and liabilities were converted to Euros based on the following exchange rates for the Euro, as published by Bank of Portugal (*Banco de Portugal*):

Currency	2013	2012
	Euro	
Swedish krona	8.8591	8.5820
Special Drawing Rights	1.1173	1.1658
American dollar	1.3791	1.3194
Swiss franc	1.2276	1.2072
Pound	0.8337	0.8161

3.16. Revenue

Revenue is measured at the fair value of the consideration received or receivable. Revenue to be recognised is netted of the estimated amount of refunds, discounts and other rebates, and does not include Value Added Tax (''VAT'') and other taxes paid in connection with the sale.

Revenue from service provision is recognised with reference to the degree of completion of the transaction at the reporting date, provided all the following conditions are satisfied: (1) the amount of the revenue can be reliably measured; (2) it is probable that future economic benefits associated with the transaction will flow to the Company; (3) the expenses incurred or to be incurred in the transaction can be reliably measured; and (4) the degree of completion of the transaction at the reporting date can be reasonably estimated.

Revenues from telecommunications activities are recorded at their gross value, and unbilled amounts due or generated at the date of the financial statements, are recorded based on estimates and included under ''Unbilled revenues.'' Differences between the estimated and actual amounts are recorded in the subsequent period.

Revenues relating to advances from clients are deferred, and are recognised only when the service is provided.

Revenues from international telecommunications services are calculated as a function of the termination rates established in bilateral agreements with the various telecommunications operators. These agreements also establish whether it is the operator of origin of the traffic that should present the credit to the operator of the destination country, or whether this latter must present the debit to the former.

The Company operates loyalty programmes for some of its customers, under which, as a function of consumption, clients have the right to loyalty points that can be exchanged for equipment, accessories and discounts on subsequent purchases of services. In the absence of specific SNC standards or

3. Main accounting policies, judgments and estimates (Continued)

interpretations relating to this topic, the Company applies IFRIC 13 Customer Loyalty Programmes (''IFRIC 13''), in accordance with which it accounts for these operations as transactions containing multiple elements, such that the amount initially received is allocated between the revenue relating to the traffic consumed and the points that the customer obtains. Accordingly, the deferred revenue relating to the latter component is recognised when the points are used or expire.

Interest revenue is recognised based on the effective interest method.

3.17. Own work capitalized

Internal expenses incurred by the Company in forming fixed assets, essentially in respect of labour, are capitalized with a counter-entry to ''Own work capitalized,'' provided the following requirements are fulfilled: (a) the fixed assets that are developed are identifiable; (b) there is a strong probability that the fixed assets will generate future economic benefits; and (c) the development expenses are reliably measurable.

3.18. Financial assets and liabilities

Financial assets and liabilities are recognised on the balance sheet when the Company becomes party to the corresponding contractual provisions, and are classified at cost or amortised cost.

(a) Financial assets and liabilities at cost or amortised cost

Financial assets and liabilities are classified in the ''at cost or amortised cost'' category when they present the following characteristics: (a) they are on demand or have established maturities; (b) they have a fixed or determinable return associated with them; and (c) they neither are derivative financial instruments nor incorporate derivative financial instruments.

Financial assets and liabilities falling in this category are measured at cost or amortised cost, less accrued impairment losses (in the case of financial assets), and correspond essentially to the following line items of assets and liabilities included on the Company's balance sheet:

- Loans obtained
- Shareholders and Group companies
- Accounts receivable—trade
- Suppliers and investment suppliers
- Unbilled revenues and accrued expenses
- Advances to suppliers and from clients
- State and other public entities
- Other accounts receivable and payable
- Other financial assets and liabilities
- Cash and bank deposits

The amortised cost is determined using the effective interest method. The effective interest rate is that which discounts exactly the estimated future payments or receipts during the expected life of the financial instrument in the net carrying amount of the financial asset or liability.

3. Main accounting policies, judgments and estimates (Continued)

(b) Impairment of financial assets

Financial assets classified in the ''at cost or amortised cost'' category are tested for impairment at the end of each year. These financial assets are impaired when there is objective evidence that, as a result of one or more events occurring after initial recognition, their estimated future cash flows will be affected.

For financial assets measured at amortised cost, the impairment loss corresponds to the difference between the carrying amount of the asset and the present value of the new future estimated cash flows discounted at the respective original effective interest rate. For financial assets measured at cost, impairment loss corresponds to the difference between the carrying amount of the asset and the best estimate of the fair value of the asset.

Subsequently, if the impairment loss decreases as a result of an event occurring after the initial recognition of the loss, the impairment must be reversed per results. The reversal is effected only up to the limit of the amount that would be recognised (amortised cost) had the loss not been initially recorded.

Impairment losses and the respective reversals are recorded to the income statement essentially under ''Impairment of accounts receivable ((losses)/reversals).''

(c) Derecognition of financial assets and liabilities

The Company derecongnises financial assets only when its contractual rights to the cash flows from these assets expire, or when its transfers to another entity the financial assets and all the significant risks and benefits associated with their possession. Transferred financial assets in respect of which the Company has retained some significant risks and benefits are derecognised, provided control over them has been assigned.

The Company derecognises financial liabilities only when the corresponding obligation is settled, cancelled or expires.

3.19. Main accounting estimates and judgments

In preparing the financial statements in accordance with the NCRF, the Company's Board of Directors uses estimates and assumptions that affect the application of policies and the amounts reported. The estimates and judgments are continuously evaluated and are based on the experience of past events and other factors, including expectations relating to future events deemed probable in light of the circumstances on which the estimates are based or as the result of information or experience. The most significant accounting estimates reflected in the financial statements are the following:

(a) Useful lives of tangible fixed assets and intangible assets

The Company utilised estimates to calculate the useful lives of tangible fixed assets and intangible assets.

(b) Recognition of provisions and impairments

The Company is party to a variety of ongoing judicial proceedings for which, based on the opinion of its lawyers, it used judgment to determine if it should recognise any provision in respect of these contingencies. Impairments for accounts receivable are calculated essentially based on the age of the accounts receivable, the risk profile of the clients and their financial situation.

The estimates were determined based on the best information available at the date the financial statements were prepared. As such, there may be events in subsequent periods that, not having been foreseeable at the time, were not considered in these estimates. In accordance with NCRF 4 *Políticas*

(Amounts expressed in Euros)

3. Main accounting policies, judgments and estimates (Continued)

Contabilísticas, Alterações nas Estimativas Contabilísticas e Erros (''NCRF 4''), changes to these estimates that occur after the date of the financial statements are corrected in the income statement prospectively. For this reason and given the associated degree of uncertainty, actual results for the transactions in question may differ from the corresponding estimates.

3.20. Events occurred after the balance sheet date

Events occurred after the balance sheet date that provide additional information about conditions that existed at the balance sheet date are reflected in the financial statements. Events after the balance sheet date that provide information about conditions that arose after the balance sheet date are not reflected in the financial statements, and are only disclosed if deemed material.

4. Cash Flows

For the purposes of the statement of cash flows, ''Cash and cash equivalents'' includes cash, bank deposits immediately available and other short-term investments with elevated liquidity and initial maturities of up to three months, net of bank overdrafts, when applicable.

The Company is subject to liquidity risk if the sources of financing, such as available cash, operating cash flows and cash flows from disinvestment transactions and financing, do not meet existing needs, such as cash outflows relating to operations, investments, shareholder returns and the payment of principal and interest on debt. Based on the cash flows generated by its operations, available cash and the possibility of obtaining financing from Portugal Telecom in under the centralized cash management implemented in the Group, the Company believes it has the capacity to fulfil its obligations.

The statement of cash flows was prepared in accordance with NCRF 2 *Demonstração de Fluxos de Caixa,* with the following notable aspects:

(a) Other payments, net

This line item includes essentially Value Added Tax and spectrum fees paid to the regulator ICP—Anacom.

(b) Cash receipts resulting from dividends

In the years ended 31 December 2013 and 2012, this line item reflects dividends received from investee PT Móveis, in the amounts of 67,900,000 Euros and 5,000,000 Euros, respectively (Note 9).

(c) Receipts (payments) relating to loans obtained

In 2013 and 2012, payments resulting from loans obtained, net of cash receipts resulting from loans obtained, consisted of the following:

	2013	2012
	Euro	
Receipts obtained under commercial paper programmes (Note 20.3)	250,000,000	—
Leases and other loans obtained	(124,130)	(2,446,589)
Intercompany loans within centralized cash management	(46,200,260)	47,025,471
Reimbursement of the loans obtained to intercompany (Note 20.1)	(340,000,000)	—
	(136,324,390)	**44,578,882**

(Amounts expressed in Euros)

4. Cash Flows (Continued)

(d) Cash and cash equivalents

At 31 December 2013 and 2012, this line item consisted of the following:

	2013	2012
	Euro	
Bank deposits immediately available	6,907,986	666,374
Cash	3,342,111	7,090,836
Cash and bank deposits	**10,250,097**	**7,757,210**

5. Changes in accounting policies and estimates and errors

No new or revised standards or interpretations were adopted in the year ended 31 December 2013, nor were there any voluntary changes in other accounting policies or changes in accounting estimates.

In the year ended 31 December 2013, no other new or revised standards or interpretations were issued that are not yet in force.

In the year ended 31 December 2013, there were no corrections of material errors from prior years.

6. Tangible fixed assets

6.1. Movement in tangible fixed assets

During the years ended 31 December 2013 and 2012, the movement in tangible fixed assets was as follows:

	2013							
	Land and natural resources	Buildings and other constructions	Basic equipment	Transportation equipment	Administrative equipment	Other tangible fixed assets	Tangible fixed assets in progress	Total
	Euro							
Gross value								
Opening balance	1,022,830	361,009,230	1,177,171,210	8,939,324	338,724,314	5,937,300	68,998,892	1,961,803,100

Closing balance	**1,022,830**	**361,009,230**	**1,177,171,210**	**8,939,324**	**338,724,314**	**5,937,300**	**68,998,892**	**1,961,803,100**
Accumulated depreciation and impairment losses								
Opening balance	—	227,023,601	803,787,019	5,593,181	288,466,022	5,038,866	—	1,329,908,689
Depreciation of the period (Note 31)	—	11,802,448	80,906,266	1,493,905	23,358,750	223,610	—	117,784,979
Disposals	—	(10,271)	(68,271)	(884,331)	(80,800)	—	—	(1,043,673)
Transfers and write-offs	—	(41,496)	(13,310,831)	(8,518)	(2,024,697)	—	—	(15,385,541)
Closing balance	**—**	**238,774,282**	**871,314,183**	**6,194,237**	**309,719,275**	**5,262,476**	**—**	**1,431,264,454**
Net value	**1,022,830**	**122,234,948**	**305,857,027**	**2,745,087**	**29,005,039**	**674,824**	**68,998,892**	**530,538,646**

As concerns the activity in 2013 and 2012, it is worth noting the investments in tangible fixed assets allocated essentially toward reinforcing mobile data capacity and network quality and expanding the coverage of the 3G/3.5G and 4G networks.

6.2. Other situations relating to tangible fixed assets

In relation to tangible fixed assets, it is worth mentioning that at 31 December 2013, the Company had assets held by third parties in the net amount of 18,027,536 Euros.

7. Goodwill

Goodwill at 31 December 2013 and 2012, in the amount of 10,169,655 Euros, was determined in 2007 following the acquisition of investee PT Wi-Fi, a company that in 2008 was merged into Meo, S.A., as noted in Note 1.

(Amounts expressed in Euros)

8. Intangible assets

During the years ended 31 December 2013 and 2012, the movement in intangible assets was as follows:

	2013			
	Industrial property and other rights	Other intangible assets	Intangible assets in progress	Total
	Euro			
Gross value				
Opening balance	847,610,560	2,994,846	1,243,424	851,848,830

Intangible assets, net	**395,443,800**	**499,448**	**1,243,424**	**397,186,672**

The acquisitions of intangible assets in the years ended 31 December 2013 and 2012 relate fundamentally to the expenses incurred under loyalty programme contracts with customers, which are amortised over their durations.

(Amounts expressed in Euros)

8. Intangible assets (Continued)

At 31 December 2013, the net book value of ''Industrial property and other rights'' included essentially:

- An amount of 343 million Euros relating to the 3G and 4G licenses acquired in 2000 and 2011, respectively, corresponding to a gross amount of 500 million Euros net of accrued amortisation of 157 million Euros. The gross amount includes essentially:
  - (i) 133 million Euros relating to the UMTS license acquired in 2000;
  - (ii) 242 million Euros recorded in 2007, pursuant to the commitments assumed in 2000 by Meo, S.A. and the other mobile operators to contribute to the information company during the term of the license, and 11.5 million Euros recorded in 2009 relating to additional commitments under the terms of the UMTS license. At the date the license was assigned it was not possible to reliably determine how these commitments would be fulfilled, such that the Company did not record any asset or liability at that date;
  - (iii) 106 million Euros relating to the 4G license acquired in 2011.
- An amount of 25 million Euros relating to expenses incurred under post-paid mobile services customer loyalty contracts, which are to be amortised over the duration of the respective loyalty programme contracts (2 years); and
- An amount of 3.8 million Euros relating to software usage licenses.

During the years ended 31 December 2013 and 2012, the carrying amount of intangible assets included amounts in respect of personnel expenses of 4,499,166 Euros and 3,933,263 Euros, respectively, relating to own work capitalized.

In 2013 and 2012, the Company undertook research, development and innovation activities under which other operation expenses and fixed assets in the following amounts respectively were recognised:

	2013	2012
	Euro	
Tangible fixed assets	22,525,056	39,471,223
Intangible assets	433,893	976,270
Other operation expenses	3,670,307	3,688,018
Total	**26,629,256**	**44,135,511**

9. Financial investments—Equity method of accounting

During the years ended 31 December 2013 and 2012, the movement in this line item was as follows (Note 10.2):

	2013	2012
	Euro	
Investments in subsidiary companies		
Opening balance	5,432,502,015	5,670,077,380
Dividends (Note 4.b)	(67,900,000)	(5,000,000)
Equity method	(346,192,988)	(232,575,365)
Financial investments, net	**5,018,409,027**	**5,432,502,015**

(Amounts expressed in Euros)

9. Financial investments—Equity method of accounting (Continued)

In the years ended 31 December 2013 and 2012, the movement in investments in subsidiary companies stemming from the application of the equity method was recorded as follows:

	2013	2012
	Euro	
Gains in affiliated companies net (Note 24)	194,737,007	68,574,455
Adjustments to financial assets (Note 18)	(540,929,995)	(301,149,820)
	(346,192,988)	**(232,575,365)**

10. Related parties

10.1. Shareholders and Group companies

At 31 December 2013 and 2012, the detail for ''Shareholders and Group companies'' under current assets and liabilities consisted of the following:

	2013	2012
	Euro	
DEBIT BALANCES		
Current		
Intercompany loans granted within centralized cash management	8,384,405	—
Accounts receivable from PT SGPS within tax consolidation[(a)]	18,423,167	—
Total debit balances with shareholders and group companies (Note 10.3)	**26,807,572**	**—**
CREDIT BALANCES		
Current		
Accounts payable from PT SGPS within tax consolidation[(a)]	—	613,816
Other	2,755,033	2,280,951
Total credit balances with shareholders and group companies (Note 10.3)	**2,755,033**	**2,894,767**

(a) In 2013, the line item reflected the amount receivable from PT SGPS corresponding to the difference between the advance payments and withholding effected in 2013 and the estimated IRC for 2013. In 2012, the estimated IRC exceeded advance payments and withholding, such that the company owed IRC to PT SGPS, the parent company for RETGS tax consolidation purposes.

10.2. Financial investments in subsidiary companies

As mentioned in Note 1, the Company is wholly owned by PT Comunicações, which in turn is wholly owned by PT Portugal, which in turn is held by Portugal Telecom. Consequently, all the companies that form part of the PT Group were deemed related parties of Meo, S.A., including not just its own subsidiaries, but also Portugal Telecom's other subsidiary companies.

(Amounts expressed in Euros)

10. Related parties (Continued)

The detail, at 31 December 2013 and 2012, of the financial investments in the Company's subsidiaries and the main financial information on these entities is as follows:

	2013

(a) This line item includes personnel assigned to other companies in the Portugal Telecom Group, in the amounts of 6,855,925 Euros in 2013 and 6,348,474 Euros in 2012, which were invoiced to these entities and recognised as a deduction to ''Wages and salaries.'' The expenses supported by the Company on personnel assigned by other companies in the Portugal Telecom Group refer essentially to personnel assigned by PT Comunicações, which amounted to 4,163,590 Euros in 2013 and 4,233,652 Euros in 2012.

10.4. Other information

The compensation attributed to members of the Company's corporate organs in the years ended 31 December 2013 and 2012 amounted to 40,000 Euros in both years and refer exclusively to fees for the legal review of accounts allocated to the Fiscal Council.

Compensation of the members of the Board of Directors is to be borne in full by PT Portugal.

(Amounts expressed in Euros)

(a) At 31 December 2013 and 2012, this line item reflects obligations to dismantle and remove assets installed on others' property and to restore the respective premises (Note 3.11).

13. Income taxes

13.1. Framework

As of 1 January 2013, pursuant to a change in tax law in December of 2012, companies generally became subject to income tax under the *Imposto sobre o Rendimento das Pessoas Coletivas* (IRC) at the rate of 25%, plus (i) a municipal tax of up to 1.5% of the IRC tax base and (ii) a state tax of 3%, applicable to the tax base between 1.5 and 7.5 million Euros, and 5%, applicable to the tax base in excess of 7.5 million Euros (this limit was 10 million Euros in 2012), resulting in a maximum aggregate rate of approximately 31.5% for taxable profits in excess of 7.5 million Euros.

As of 2014, companies located in Continental Portugal will be taxed under the IRC at a base rate of 23%, plus (i) a Municipal Tax of up to 1.5% on the tax base, and (ii) a State Tax of 3.0% applicable to taxable profits between 1.5 and 7.5 million Euros, 5.0% applicable to taxable profits between 7.5 and 35 million Euros, and 7.0% applicable to taxable profits in excess of 35 million Euros, resulting in a maximum aggregate rate of approximately 31.5% for taxable profits in excess of 35 million Euros.

The Company's tax profit in 2013 and 2012 exceeded the 7.5 and 10 million Euro limits mentioned above, such that the Company applied a tax rate of 31.5% to calculate the income tax estimates, having corrected the effect of the tax rates applicable to taxable profit up to the above-referenced limits.

In calculating the taxable income to which the above-referenced tax rate is applied, excluded tax expenses and revenues are added to or deducted from accounting income.

The Company participates in the *Regime Especial de Tributação dos Grupos de Sociedades* (''RETGS'') tax consolidation, where the parent company is PT SGPS, such that estimated income taxes and withholding effected by third parties are recorded on the balance sheet as PT SGPS accounts payable and receivable.

In accordance with applicable law, tax returns are subject to review and correction by the tax authorities for four years (five years for Social Security) except when there have been tax losses, when tax benefits have been conceded, or there are ongoing audits, complaints or challenges, in which cases, depending on the circumstances, the periods are extended or suspended. The Company's Board of Directors, as supported by information from its tax advisors, believes that any tax contingencies should not significantly affect the financial statements as of and for 31 December 2013, considering the provisions constituted and the existing expectations at the date hereof with respect to the resolution of the tax contingencies described in Note 19.

13.2. Deferred taxes

In measuring the expense relating to income taxes for the year, in addition to the current tax as determined based on income before taxes as adjusted in accordance with tax law, the effects resulting from temporary differences between income before taxes and taxable profits, originating in the year or in years prior, are also taken into account.

(Amounts expressed in Euros)

13. Income taxes (Continued)

The movement in deferred tax assets during the years ended 31 December 2013 and 2012 was as follows:

	2013					
	Impairment of accounts receivable	Depreciation and amortisation of tangible assets	Impairment of inventories	Other provision and adjustments	Other temporary differences	Total
			Euro

Nominal tax rate	31.5%	31.5%
	(62,547,845)	**(22,024,852)**

13.4. Other Information

In accordance with Law 40/2005, of 3 August, which approved the SIFIDE—*Sistema de Incentivos Fiscais em Investigação e Desenvolvimento Empresarial*, the Company applied in 2013 for business research and development tax incentives relating to 2012 in the amount of 572,669 Euros.

Under Law 10/2009 of 10 March, which approved the RFAI—*Regime Fiscal de Apoio ao Investimento*, the Company's periodic income tax return for 2012 included a deduction in the amount of 2,344,049 Euros, based on significant investments in new generation broadband networks.

During the 2013 financial year, Law 49/2013, of 16 July 2013, established a *Crédito Fiscal Extraordinário ao Investimento*, which is a deduction from IRC collection in the amount of 20% of investment expenses relating to operating assets carried out after 1 June 2013. In companies participating in RETGS tax consolidation, the deduction will be effected based on the tax base of the Group and the limitations provided in the law, and amounts that cannot be deducted can be utilised in the five subsequent tax periods, under the same conditions. The Company is evaluating whether it will use this benefit or not, as

(Amounts expressed in Euros)

13. Income taxes (Continued)

a function of investment made in 2013 in the maximum amount of 5,008,055.93 Euros that can be considered eligible, and for this reason has not reflected this situation in the financial statements.

14. Inventories

This line item consisted of the following at 31 December 2013 and 2012:

	2013			2012		
	Gross value	Impairment losses	Net value	Gross value	Impairment losses	Net value
	Euro					
Goods	39,732,401	(15,955,792)	23,776,609	34,344,331	(14,459,940)	19,884,391
Raw materials and consumables	1,587,017	(218,116)	1,368,901	1,584,085	(121,895)	1,462,190

Unbilled revenues	90,207,873	—	90,207,873	104,201,086	—	104,201,086
	419,898,219	**(85,831,116)**	**334,067,103**	**400,016,584**	**(93,909,837)**	**306,106,747**

(Amounts expressed in Euros)

15. Accounts receivable and unbilled revenues (Continued)

In the years ended 31 December 2013 and 2012, the change in accrued impairment losses on debts receivable from clients was as follows:

	2013	2012
	Euro	
Opening balance	93,909,837	98,875,939
Increases (reversals)	9,832,211	11,166,860
Utilizations[(a)]	(17,910,932)	(16,132,962)
Closing balance	**85,831,116**	**93,909,837**

(a) This line item refers to the use of accrued impairment losses to face of credits of doubtful collection that were deemed uncollectible and that were fully adjusted.

The Company is exposed to credit risk due to the possibility a counterparty might not fulfil its contractual obligations, resulting in financial loss. Credit risk relates essentially to accounts receivable for services rendered to clients and is monitored regularly with the following objectives: (a) limiting the credit extended to clients, considering the respective profile and the age of the accounts receivable; (b) monitoring trends in the level of credit extended; (c) regularly testing for impairment of amounts receivable; and (d) analyzing market risk where the client is located. The Company is not exposed to any significant credit risk relating to any particular client, as its accounts receivable derive from a large number of clients.

At 31 December 2013 and 2012, the age of client accounts receivable, net of impairment losses, was as follows:

	2013			2012		
	Accounts receivable from group companies	Accounts receivable from other companies	Total	Accounts receivable from group companies	Accounts receivable from other companies	Total
	Euro					
Unexpired balance	83,563,701	42,809,016	126,372,717	21,994,249	40,473,715	62,467,964

16. State and other public entities

As of 31 December 2013 and 2012, the debit and credit balances with the State and Other Public Entities were as follows:

	2013		2012	
	Debit balances	Credit balances	Debit balances	Credit balances
	Euro			
Value added tax	—	23,691,396	—	8,731,468
Social security taxes	—	982,036	—	896,308
Personnel income taxes	—	980,507	—	723,989
Other taxes	991	24,448	275,246	10,043
	991	**25,678,387**	**275,246**	**10,361,808**

(Amounts expressed in Euros)

17. Other accounts receivable and payable

As of 31 December 2013 and 2012, these line items consisted of the following:

	2013	2012
	Euro	
OTHER ACCOUNTS RECEIVABLE		
Current		
Group companies (Note 10.3)	321,140	943,457
Other accounts receivable	8,107,161	9,367,525
Total other accounts receivable	**8,428,301**	**10,310,982**
OTHER ACCOUNTS PAYABLE		
Non-Current		
License LTE(a)	14,840,169	19,082,848

Current		
Commitments related to the license UMTS	8,354,115	35,555,145
License LTE(a)	6,000,000	6,000,000
Commissions payable to agents	2,128,921	3,293,131
Group companies (Note 10.3)	124,952	54,601
Other accounts payable	2,517,259	3,430,361
Total current	**19,125,247**	**48,333,238**
Total other accounts payable	**33,965,416**	**67,416,086**

(a) These items correspond to the present value of the amounts owed in the context of the acquisition of the 4G license, completed in December 2011. The payment plan established for the amounts owed at 31 December 2013 provides for payment in 4 annual instalments of 6 million Euros each, the last is payable in January 2017, for an aggregate of 24 million Euros, where the present value at 31 December 2013 amounts to 20,840,169 Euros.

18. Shareholders' equity

18.1. Share capital

As of 31 December 2013 and 2012, the Company's share capital was fully subscribed and paid-in, amounting to 47,000,000 Euros, and was represented by 9,400,000 book-entry shares, with a nominal value of 5 Euros each. The Company's share capital is wholly held by PT Comunicações (Note 1).

18.2. Legal reserve

Commercial law and the Company's bylaws establish that at least 5% of annual net income must be allocated to reinforce the legal reserve until it represents 20% of the share capital. This reserve cannot be distributed other than in the event of the liquidation of the company, but can be utilised to absorb losses, after exhausting all other reserves, or for incorporation in the capital.

As of 31 December 2013 and 2012, the legal reserve was fully constituted in accordance with applicable commercial law, amounting to 9,400,000 Euros.

(Amounts expressed in Euros)

18. Shareholders' equity (Continued)

18.3. Adjustments to financial assets

During the years ended 31 December 2013 and 2012, the movement in this line item was as follows:

	Unpaid dividends	Foreign currency exchange differences[(a)]	Other changes in shareholders' equity[(b)]	Total
		Euro		
Balance as at 1 January 2012	**5,689,039,641**	**(229,436,015)**	**(404,029)**	**5,459,199,597**
Equity method	—	(350,110,383)	48,960,382	**(301,150,001)**
Dividends not received from PT Móveis	45,340,711	—	—	**45,340,711**
Balance as at 31 December 2012	**5,734,380,352**	**(579,546,398)**	**48,556,353**	**5,203,390,307**
Equity method	—	(534,610,065)	(6,319,256)	**(540,929,321)**
Dividends not received from PT Móveis	676,645	—	—	**676,645**
Balance as at 31 December 2013	**5,735,056,997**	**(1,114,156,463)**	**42,237,097**	**4,663,137,631**

(a) This line item basically reflects the Company's interest in changes in shareholders' equity in PT Móveis other than those arising from the interest in the net (loss)/income of this investee. In 2013 and 2012, this line item reflected essentially negative adjustments for exchange rate conversion, due to the depreciation of the Brazilian *Real* against the Euro in the investment held indirectly in the Oi Group, which was acquired on 28 March 2011 by Bratel Brasil, as noted in Note 1.

(b) In 2012, the other changes in shareholders' equity due to application of the equity method relate essentially to a gain recorded by Bratel Brasil, in the amount of 49 million Euros, relating to the Oi Group's corporate reorganisation in March 2012.

The variations relating to application of the equity method were recorded by counter-entry for the appreciated financial investments in accordance with the equity method as follows:

	2013	2012
	Euro	
Investments in subsidiaries and associated companies (Note 9)	(540,929,995)	(301,149,820)
Provision for negative financial investments (Note 19)	674	(181)
	(540,929,321)	**(301,150,001)**

18.4. Allocation of earnings

In 2012, as resolved at the General Shareholders' Meeting held on 28 March 2012, the net earnings for 2011, in the total amount of 285,819,986.56 Euros, were allocated as follows: (1) 235,479,275.19 Euros for dividend distribution, and (2) 50,340,711.37 Euros for retained earnings.

In 2013, as resolved at the General Shareholders' Meeting held on 27 March 2013, the entire net earnings for 2012, in the total amount of 251,574,188.89 Euros, were transferred to ''Retained earnings.''

(Amounts expressed in Euros)

19. Provisions, contingent liabilities and contingent assets

19.1. Movements in the provisions

During the years ended 31 December 2013 and 2012, the movements in the provisions were as follows:

	2013				
	Tax claims	Other litigation	Provision for negative financial investments (Note 10)	Other provisions	Total
			Euro		
Opening balance	3,583,639	10,981,608	1,006	4,911,670	**19,477,923**
Increases	754,139	—	1,773	1,977,312	**2,733,224**
Reductions	(979,369)	(131,790)	—	—	**(1,111,159)**
Utilizations	(2,084,779)	—	—	—	**(2,084,779)**
Closing balance	**1,273,630**	**10,849,818**	**2,779**	**6,888,982**	**19,015,209**

	2012				
	Tax claims	Other Litigation	Provision for negative financial investments (Note 10)	Other provisions	Total
			Euro		
Opening balance	3,613,271	11,284,872	—	5,043,895	**19,942,038**
Increases	1,461,158	—	1,006	—	**1,462,164**
Reductions	(628,805)	(303,264)	—	(132,225)	**(1,064,294)**
Utilizations	(33,063)	—	—	—	**(33,063)**
Other movements	(828,922)	—	—	—	**(828,922)**
Closing balance	**3,583,639**	**10,981,608**	**1,006**	**4,911,670**	**19,477,923**

The provisions for negative financial investments are allocated to deal with losses in investee companies that have negative shareholders' equity (Note 10), and are calculated as a function of the percentage of interest in the capital of these companies. The movements in these provisions during the years ended 31 December 2013 and 2012 were as follows:

	2013	2012
	Euro	
Losses in subsidiaries and associated companies (Note 24)	2,447	825
Adjustments to financial assets (Note 18)	(674)	181
	1,773	**1,006**

19.2. Proceedings with probable losses

The provisions for taxes are allocated to handle various tax contingencies relating to IRC and Social Security, among other taxes and charges.

The provisions for ongoing judicial proceedings are allocated to handle liabilities arising from proceedings brought against the Company, estimated based on information from its lawyers.

At 31 December 2013 and 2012, the Company, in accordance with NCRF 21 *Provisões, Passivos Contingentes e Ativos Contingentes* (''NCRF 21'') and based on the opinion of internal and external legal counsel, had classified a variety of ongoing judicial and arbitral actions and tax contingencies as

(Amounts expressed in Euros)

19. Provisions, contingent liabilities and contingent assets (Continued)

proceedings with probable losses, to bear the probable outflow of resources as a result of these proceedings. The nature of these proceedings is as follows:

	2013	2012
	Euro	
Legal proceedings		
Civil contingencies	10,245,469	10,084,018
Labor contingencies	24,632	286,871
Other contingencies	579,717	610,719
	10,849,818	**10,981,608**
Tax contingencies	1,273,630	3,583,639
	12,123,448	**14,565,247**

19.3. Proceedings with possible losses

At 31 December 2013 and 2012, the Company, in accordance with NCRF 21 and based on the opinion of internal and external legal counsel, had classified a variety of ongoing judicial and arbitral actions and tax contingencies as proceedings with possible losses. The nature of these proceedings is as follows:

	2013	2012
	Euro	
Legal proceedings		
Civil contingencies[a]	780,759	8,203,539
Labor contingencies	1,683	—
Other contingencies	2,180,597	3,869,544
	2,963,039	**12,073,083**

(a) At 31 December 2012, this line item included a Noxitel proceeding in the amount of 6,000,000 Euros, regarding breach of contract, which ended in 2013 without any penalty for the Company.

The Board of Directors believes that any corrections resulting from audits/inspections of tax returns by the tax authorities will not have a significant effect on the financial statements as of and for 31 December 2013, considering the provisions constituted and the expectations at the date hereof with respect to the final resolution of the above-referenced matters.

19.4. Other proceedings

The Company received additional IRC assessments relating to the financial years from 2004 to 2010, and the tax audit report relating to 2010, which essentially question the deductibility of certain financial costs, in the total amount of 204 million Euros of taxes. The Company disagrees with these assessments and conclusions, and considers, based on the opinion of its tax counsel, that there are solid arguments to oppose the position of the tax authorities.

19.5. Contingent assets

The value of contingent assets at 31 December 2013 amounted to approximately 4.6 million Euros, referring essentially to proceedings brought by the company against third parties, relating to situations of breach of 2G equipment sales contracts, service provision and lack of payment for Wi-Fi service.

(Amounts expressed in Euros)

20. Loans obtained

Loans obtained as of 31 December 2013 and 2012 consisted of the following:

	2013		2012	
	Non-current	Current	Non-current	Current
	Euro			
Intragroup loans (Note 10)	—	—	340,000,000	—
Centralized cash management (Note 10)	—	—	—	37,803,523
Commercial programme	230,000,000	20,000,000	—	—
Other financings	—	2,020,914	—	21,719
Leases	1,429,085	1,239,737	1,311,519	2,577,104
	231,429,085	**23,260,651**	**341,311,519**	**40,402,346**

20.1. Intragroup loans

In June 2010, the Company obtained advances from PT Portugal, its previous shareholder, in the amount of 500,000,000 Euros, which did not have an established maturity. On 30 November 2010, these advances were assigned by PT Portugal to PT Comunicações at their respective nominal amount, in the context of the sale by the former to the latter of the financial interest in Meo, S.A. On 2 December 2011, the Company repaid the amount of 160,000,000 Euros relating to these advances and on 1 March 2013 it repaid the remaining 340,000,000 Euros (Note 4).

20.2. Centralised cash management

As of March 2006, Portugal Telecom began to centralise all receipts and payments of the Group companies headquartered in Portugal. The loans obtained by the Company pursuant to this centralized cash management system have short-term maturities and bear interest at market rates.

20.3. Commercial paper programme

On 25 June 1999, Portugal Telecom established a Framework Agreement for the Issuance of Commercial Paper, in which the Company participates, which was amended several times and had, at 31 December 2013, a maximum amount of 3,500,000,000 Euros. The agreement is in effect until 7 July 2015, and is automatically renewable for successive 2-year periods, until 7 July 2025, except if terminated by any of the parties.

On 1 June 2000, Portugal Telecom established a Framework Agreement for the Issuance of Commercial Paper, in which the Company participates, which was amended several times and had, at 31 December 2013, a maximum amount of 3,000,000,000 Euros. The contract is in effect until 1 June 2014, and is automatically renewable for successive 2-year periods, until 1 June 2020, except if terminated by any of the parties.

At 31 December 2012, the Company was not using any amount under these programmes. During 2013, the Company used an amount of 250,000,000 Euros (Note 4), which was outstanding at the end of the year.

20.4. Leases

Financial lease obligations result essentially from: (i) vehicle leases, which generally include purchase options; and (ii) rights to use transmission capacity over fibre optic circuits.

(Amounts expressed in Euros)

20. Loans obtained (Continued)

As of 31 December 2013 and 2012, the Company had recorded the following assets in the balance sheet under the financial lease regime:

	2013			2012		
	Gross value	Accumulated depreciation	Carrying value	Gross value	Accumulated depreciation	Carrying value
	Euro					
Tangible fixed assets						
Transport equipment	3,940,616	1,595,861	2,344,755	4,797,856	2,986,250	1,811,606
Other tangible fixed assets	736,562	433,200	303,362	737,926	272,224	465,702
	4,677,178	2,029,061	2,648,117	5,535,782	3,258,474	2,277,308
Intangible assets						
Industrial property and other rights	2,864,046	2,266,332	597,714	2,864,046	1,311,650	1,552,396
	7,541,224	**4,295,393**	**3,245,831**	**8,399,828**	**4,570,124**	**3,829,704**

The maturity of the minimum payments for the financial leases at 31 December 2013 and 2012 was as follows:

	2013			2012		
	Capital	Interest	Total	Capital	Interest	Total
	Euro					
Up to 1 year	1,239,737	97,059	1,336,796	2,577,104	203,515	2,780,619
Between 1 and 2 years	713,538	45,516	759,054	671,392	48,671	720,063

Invoices to be issued	3,893,380	1,792,312
	27,914,009	**48,393,524**

(Amounts expressed in Euros)

22. Accrued expenses

At 31 December 2013 and 2012, this line item consisted of the following:

	2013	2012
	Euro	
Support services	55,519,444	48,931,816
Commissions	32,235,530	20,123,148
Direct costs of services rendered	19,565,533	18,013,062
Other supplies and external services	11,333,716	9,379,785
Litigation and Notaries	9,014,706	1,227,675
Charges for vacations, vacation subsidies and other payroll costs	6,576,148	6,179,096
Specialized work	6,338,406	5,817,463
Interest and other financial expenses payable[(a)]	1,836,321	27,519,410
Other	5,362,407	2,298,645
	147,782,211	**139,490,100**

(a) The decrease in the balance of this line item relates essentially to repayment of advances to PT Comunicações (Note 20.1).

23. Services rendered and sales

In the years ended 31 December 2013 and 2012, these line items consisted of the following:

	2013	2012
	Euro	
Services rendered		
Billing	888,263,041	977,459,009
Interrelation	53,019,889	68,409,374
Operators roaming	10,733,634	18,749,961
Sales	102,547,893	88,691,659
	1,054,564,457	**1,153,310,003**

24. Equity in earnings of affiliated companies

In the years ended 31 December 2013 and 2012, the gains and losses in affiliated companies, arising from application of the equity method of accounting (Notes 10.2 and 13.3), were recognised through counter-entries to the following line items:

	2013	2012
	Euro	
Financial investments (Note 9)		
PT Móveis	194,737,007	68,576,645
PT Sistemas de Informação	—	(2,190)
	194,737,007	**68,574,455**
Provision for negative financial investments (Note 19)		
PT Sistemas de Informação	(2,447)	(825)
	194,734,560	**68,573,630**

(Amounts expressed in Euros)

25. Direct costs

In the financial years ended 31 December 2013 and 2012, this line item consisted of the following:

	2013	2012
	Euro	
Rental costs for capacity	109,817,252	116,950,631
Interconnection costs	58,079,681	74,815,235
Leases	21,287,425	20,898,905
Contents of internet and mobile service	8,631,042	12,377,473
Other	755,674	212,179
	198,571,074	**225,254,423**

26. Supplies and external services

In the financial years ended 31 December 2013 and 2012, this line item consisted of the following:

	2013	2012
	Euro	
Support services	92,036,982	84,095,238
Commissions	70,766,272	64,287,368
Specialized work	25,024,286	31,483,543
Maintenance and repairs	29,356,171	30,835,907
Electricity	15,153,555	14,167,250
Rentals	13,669,486	12,405,388
Disposal of space	8,203,280	6,483,923
Communications	5,170,197	5,935,293
Transportation	3,809,897	4,070,337
Other	3,153,085	8,132,492
	266,343,211	**261,896,739**

At 31 December 2013 and 2012, the Company's future liabilities for operating leases had the following maturities:

	2013	2012
	Euro	
Up to 1 year	53,265,651	61,647,285
Between 1 and 2 years	13,658,387	40,467,372
Between 2 and 3 years	11,066,696	11,149,980
Between 3 and 4 years	9,845,863	9,395,535
Between 4 and 5 years	8,736,038	8,279,865
More than 5 years	23,696,640	26,024,967
	120,269,275	**156,965,004**

(Amounts expressed in Euros)

27. Wages and salaries

In the financial years ended 31 December 2013 and 2012, this line item consisted of the following:

	2013	2012
	Euro	
Salaries	37,569,513	35,607,140
Social Security charges	7,964,807	8,025,560
Healthcare	582,896	574,649
Training	426,949	181,315
Social events	269,209	227,052
Other	252,294	253,098
	47,065,668	**44,868,814**

28. Indirect taxes

In the financial years ended 31 December 2013 and 2012, this line item consisted of the following:

	2013	2012
	Euro	
Anacom taxes	13,772,974	15,256,934
Value Added Tax	303,542	16,275
Other	500,872	498,886
	14,577,388	**15,772,095**

29. Other income and gains

In the financial years ended 31 December 2013 and 2012, the detail for this line item was as follows:

	2013	2012
	Euro	
Suplemental income[(a)]	8,197,625	9,917,138
Interest due	1,737,568	1,918,363
Recovery of accounts receivable	1,905,591	1,655,043
Gains on exchange rate differences	1,447,051	1,316,873
Gains in inventories	183,906	261,121
Other	1,420,212	899,290
	14,891,953	**15,967,828**

(a) This line item includes essentially income from renting out space.

(Amounts expressed in Euros)

30. Other expenses and losses

In the financial years ended 31 December 2013 and 2012, this line item consisted of the following:

	2013	2012
	Euro	
Write-off of tangible fixed assets[(a)]	1,921,812	2,400,905
Losses in inventories	1,758,740	1,503,287
Losses on exchange rate differences	1,458,853	1,434,249
Discounts granted	326,162	362,514
Direct write-off of accounts receivable	243,190	310,136
Other[(b)]	8,824,330	16,044,013
	14,533,087	**22,055,104**

(a) The amounts in this line item in 2013 and 2012 are explained essentially by write-offs due to the process of inventorying hardware and software.

(b) This item essentially reflects non-recurring adjustments to handle collection risk for certain accounts receivable.

31. Depreciation and amortisation ((losses)/reversals)

This line item in the financial years ended 31 December 2013 and 2012 consisted of the following:

	2013	2012
	Euro	
Tangible fixed assets (Note 6)	113,655,271	117,784,979
Intangible assets (Note 8)	54,576,214	63,001,196
	168,231,485	**180,786,175**

32. Interest and related income/expenses

In the financial years ended 31 December 2013 and 2012, these line items consisted of the following:

	2013	2012
	Euro	
Interest and related income		
Interest income	410,326	468,450
Other	27,861	914,203
	438,187	**1,382,653**
Interest and related expenses		
Interest expense	18,043,431	18,364,882
Bank commissions and expenses	474,685	610,516
Finance leases	144,752	166,137
Other	156,913	3,323,362
	18,819,781	**22,464,897**

(Amounts expressed in Euros)

32. Interest and related income/expenses (Continued)

The details for interest income and expense in the financial years ended 31 December 2013 and 2012 are as follows:

	2013	2012
	Euro	
Interest income		
Short-term investments	410,326	463,290
Intragroup loans	—	5,160
	410,326	**468,450**
Interest expense		
Intragroup loans	16,202,563	16,213,321
Other[(a)]	1,840,868	2,151,561
	18,043,431	**18,364,882**

(a) This line item essentially reflects the effect of the financial updating of the liability associated with the acquisition of the 4G/LTE license (Note 17), completed in December 2011.

33. Earnings per share

Earnings per share in the financial years ended 31 December 2013 and 2012 were calculated as follows:

	2013	2012
	Euro	
Net income	336,146,179	251,574,189
Number of shares	9,400,000	9,400,000
Basic earnings per share	**35.76**	**26.76**

There are no situations that give rise to dilution, such that diluted earnings per share are equal to basic earnings per share.

34. Guarantees and other financial commitments

At 31 December 2013 and 2012, the Company had the following guarantees and other financial commitments in favour of third parties:

	2013	2012
	Euro	
Guarantees in favour of courts	**105,370**	**112,031**
Bank guarantees in favor of other entities:		
Anacom	24,000,000	30,000,000
Ministry of Justice	2,859,806	2,863,418
Other	2,023,980	2,397,784
	28,883,786	**35,261,202**
Total guarantees	**28,989,156**	**35,373,233**
Commitments of purchase before:		
Fixed asset and content suppliers	8,981,302	21,383,567
Suppliers of inventories	8,264,400	30,193,567
Other services	12,387,759	14,608,520
	29,633,461	**66,185,654**

34. Guarantees and other financial commitments (Continued)

The bank guarantee provided in favour of Anacom at 31 December 2013, in the amount of 24,000,000 Euros, was requested by Anacom in the context of the auction of spectrum usage rights, and corresponds to the total amount of the outstanding instalments (Note 17).

At 31 December 2013, the value for the bank guarantees provided in favour of other entities includes, essentially, the amount of 1.5 million Euros in respect of contracts to use stores.

The commitments of purchase refer to: (i) orders placed and not satisfied, essentially to acquire telecommunications infrastructure and equipment, in the normal course of business, in the total amount of 17,245,702 Euros; and (ii) service orders placed and not satisfied, in the normal course of business, in the amount of 12,387,759 Euros.

35. Events occurred after the balance sheet date

The financial statements as of and for the year ended 31 December 2013 were approved by the Board of Directors and authorised for issuance on 4 February 2014, and are still subject to approval at the General Shareholders' Meeting, under the terms of applicable commercial law in Portugal.

There were no significant events after 31 December 2013 that would require adjustments or disclosure in these financial statements.

36. Note added for translation

The accompanying financial statements are a translation of financial statements originally issued in Portuguese in conformity with the NCRF, some of which may not conform to or be required by generally accepted accounting principles in other countries. In the event of discrepancies, the Portuguese language version prevails.

AUDITORS' REPORT

Introduction

1. We have audited the accompanying financial statements of TMN—Telecomunicações Móveis Nacionais, S.A. (''the Company''), presently denominated MEO—Serviços de Comunicações e Multimédia, S.A., which comprise the balance sheet as of 31 December 2012 that presents a total of 6,777,665,631 Euros and shareholders' equity of 5,802,214,129 Euros, including a net income of 251,574,189 Euros, the statements of income by nature, of changes in shareholders' equity and of cash flows for the year then ended and the corresponding notes.

Responsibilities

2. The preparation of financial statements that present a true and fair view of the financial position of the Company, the results of its operations, the changes in its shareholders' equity and its cash flows, as well as the adoption of adequate accounting principles and criteria and the maintenance of an appropriate system of internal control are the responsibility of the Company's Board of Directors. Our responsibility is to express a professional and independent opinion on these financial statements, based on our audit.

Scope

3. Our audit was performed in accordance with the auditing standards *(''Normas Técnicas e as Directrizes de Revisão/Auditoria'')* issued by the Portuguese Institute of Statutory Auditors *(''Ordem dos Revisores Oficiais de Contas'')*, which require that the audit be planned and performed with the objective of obtaining reasonable assurance about whether the financial statements are free of material misstatement. An audit includes verifying, on a sample basis, evidence supporting the amounts and disclosures in the financial statements and assessing the significant estimates, based on judgements and criteria defined by the Board of Directors, used in their preparation. An audit also includes assessing the adequacy of the accounting principles used and their disclosure, taking into consideration the circumstances, verifying the applicability of the going concern concept and assessing the adequacy of the overall presentation of the financial statements. We believe that our audit provides a reasonable basis for expressing our opinion.

Opinion

4. In our opinion, the financial statements referred to in paragraph 1 above, present fairly, for the purpose explained in paragraph 5 below, in all material respects, the financial position of TMN—Telecomunicações Móveis Nacionais, S.A. as of 31 December 2012 and the results of its operations, the changes in its shareholders' equity and its cash flows for the year then ended, in conformity with generally accepted accounting principles in Portugal.

Emphases

5. The financial statements mentioned in paragraph 1 above refer to the Company on a standalone basis and were prepared in accordance with current legislation for approval and publication. The Company did not prepared consolidated financial statements as, in accordance with number 3 of article 7 of Decree-Law 158/2009, of 13 July 2009 was not required to do so, as its financial statements were included in the consolidated financial statements of Portugal Telecom, SGPS, S.A.. As described in Note 3.6, although the financial investments have been accounted for by the equity method, under which the Company´s net profit for the year and shareholders' equity include the effect of consolidating the subsidiaries, the accompanying financial statements do not include the effects of a full consolidation of their assets, liabilities, revenues and costs.

6. As of 31 December 2012, the Company's financial investments included the wholly-owned subsidiary PT Móveis, S.A. (''PT Móveis''), which owned 100% interest in Bratel BV, a holding company that essentially owned the investment in Oi, S.A. and its controlling shareholders in the total amount of 2,979 million Euros. In connection with the business combination between Portugal Telecom, SGPS, S.A. (''PT SGPS'') and Oi, as of 2 May 2014 this investment was sold to PT SGPS and PT Móveis incurred in a net loss of approximately 950 million Euros, of which 1,000 million Euros did not have an impact in the PT Móveis shareholders' equity as it corresponds to a transfer to net income of the cumulative amount of negative foreign currency translations adjustments that

were recorded directly in shareholders' equity between March 2011 (Oi's acquisition date) and 2 May 2014 (of which 350 million Euros recorded at 31 December 2012), while the remaining 50 million Euros corresponds to a capital gain reflecting the difference between the selling price and the carrying value of the investment in the books of PT Móveis.

Lisbon, 14 November 2014

The Accountant The Board of Directors

CONTENTS

TMN—Telecomunicações Móveis Nacionais, S.A.
Notes to the financial statements
As of 31 December 2012
(Amounts expressed in euros)

1. Introductory note

TMN—Telecomunicações Móveis Nacionais, S.A. (''the Company'' or ''TMN'') was founded on 22 March 1991, its main activity being the rendering mobile communication services. It is licenced by *Instituto das Comunicações de Portugal* (''ICP''), currently ICP—*Autoridade Nacional de Comunicações* (''ANACOM'') to render complementary telecommunications services—mobile land services—on national territory, under the terms of the ICP—011/TCM license of 16 March 1992. In accordance with a decision of the Board of Directors of ANACOM of 28 February 2007 the right to use these frequencies was renewed for an additional period of 15 years, up to 16 March 2022. At the end of 2000, TMN was licensed by ANACOM to exploit international mobile communication services under the terms of the IMT 2000/UMTS license of 19 December 2000 under number ICP—02 / UMTS up to 11 January 2016, with the possibility of being renewed for an additional period of 15 years.

In December 2011, TMN was notified by ANACOM, under a spectrum auction carried out between 28 and 30 November that it had acquired a spectrum in the 800 MHz, 1.8 GHz and 2.6 GHz frequency bands for 113 million euros. This enables TMN to render fourth generation mobile services, through Long Term Evolution (''LTE'') technology, which corresponds to evolution of the GSM and UMTS technologies. TMN was licenced to use these frequencies for an initial period of 15 years, renewable for an additional period of 15 years.

In addition the Company can render other telecommunication services in Portugal, including:

a) TMN is registered to exercise public telecommunication services;

b) TMN is licensed by ANACOM to render land line telephone services under the terms of ICP—010/99/99-SFT license and to establish and supply a public telecommunications network under the terms of ICP—017/99-RPT license, both for the whole national territory, dated 25 November 1999;

c) TMN is authorized to render private virtual network services, the access code ''70596'' having been attributed to it.

In February 2008, Law 12/2008—rendering of Essential Public Services was published, in accordance with which the Company was given a period of 6 months to bring legal action against clients for non-payment, after which, if nothing is done, the liability lapses. In accordance with the law all electronic communication services (and not only land line telephone services) became subject to the new rules.

In 2008, under the Portugal Telecom Group reorganization process, TMN acquired from Portugal Telecom, SGPS, S.A. (''PT SGPS'' or ''Portugal Telecom''), the participation it held in PT Acessos de Internet Wi-Fi, S.A (''PT Wi-Fi'') having merged it into TMN, effective as of 1 January 2008.

TMN is the sole shareholder of PT Móveis—Serviços de Telecomunicações, SGPS, S.A. (''PT Móveis''). On 27 September 2010, PT Móveis sold to Telefónica Móviles, S.A. the 50% participation that it held in Brasilcel N.V. (a joint venture that controls Vivo, that was founded at the end of 2002 between the Portugal Telecom Group—through PT Móveis—and the Telefónica Group—through Telefónica Móviles, S.A.). Subsequently, on 28 March 2011, Portugal Telecom completed the acquisition process of effective participations of 25.3% in Telemar Norte Leste, S.A. (''Oi'') and 14.1% in Contax, S.A. from the controlling shareholders of the companies for 8,437 million Brazilian Reais. This investment was made by the Portugal Telecom Group through the company Bratel Brasil, in which PT Móveis has an indirect participation of 99%. The terms of the agreements enable Portugal Telecom to share decision making power on financial and operating strategies of the companies acquired and so they have been classified as jointly controlled entities in accordance with IAS 31—Joint Ventures. Consequently, as permitted by the standard, the entities acquired were consolidated proportionately in the consolidated financial statements of Portugal Telecom for 2012, the participations being recognized indirectly in the individual non-consolidated financial statements in accordance with the equity method in the same way as investments in subsidiaries. The Oi Group is the leading operator in telecommunication services in the Brazilian market and the largest land line telecommunication service operator in the South American

1. Introductory note (Continued)

market in terms of active clients and Contax is one of the leading companies in corporate services and is the leading company in contact service centers in Brazil.

On 30 November 2010 PT Portugal, SGPS, S.A. (''PT Portugal'') sold to PT Comunicações, S.A. (''PT Comunicações'') the entire participation it held in TMN, and so the Company became wholly owned by PT Comunicações.

Under the terms of article 7 of Decree-Law 158/2009, despite having investments in group and associated companies, the Company is exempt from preparing consolidated financial statements since it is directly or indirectly wholly owned by Portugal Telecom, SGPS S.A. (''Portugal Telecom''), which in turn presents consolidated financial statements which include the financial statements of the Company and its subsidiaries.

2. Basis of presentation

The accompanying financial statements were prepared in accordance with the applicable provisions of Portuguese law, as set forth in Decree-Law 158/2009, which approved the Accounting System (*Sistema de Normalização Contabilística*—''SNC''), and in accordance with the conceptual framework, Accounting and Financial Statement Standards (*Normas Contabilísticas e de Relato Financeiro*—''NCRF'') and Interpretation Standards (*Normas Interpretativas*) issued in notices 15652/2009, 15655/2009 and 15653/2009, respectively. The Company first adopted NCRF in 2010, applying NCRF 3—*Adoção Pela Primeira Vez Das NCRF* (''NCRF 3'') is using 1 January 2009 as the transition date for the purpose of presenting these financial statements. As provided for in the Attachment to Decree-Law 158/2009, the Company also applies the International Accounting Standards and International Financial Reporting Standards (''IAS/IFRS'') and respective interpretations (''SIC/IFRIC'') of the IASB, to cover the gaps or omissions relating to specific matters of some transactions or particular situations not provided for by the SNC.

3. Main accounting policies, judgments and estimates

The accompanying financial statements were prepared on a going concern basis. The main accounting policies adopted in preparing these financial statements are explained below and were applied on a consistent basis, unless otherwise indicated.

3.1. Tangible fixed assets

Tangible fixed assets are recorded at the cost of acquisition or production, which includes purchase cost, any costs directly attributable to putting the assets in place in the condition needed to operate as intended and, when applicable, the initial estimated cost the Company expects to incur to dismantle and remove the assets and restore to their original condition the locations in which they were installed.

Subsequent costs are added to the book value for the asset only when it is probable that future economic benefits will flow to the Company and the cost can be reliably measured. Maintenance and repair costs not likely to generate future economic benefits are recognized as an expense in the period in which they are incurred.

3. Main accounting policies, judgments and estimates (Continued)

Except for land that is not depreciated, depreciation of the other tangible fixed assets is recognized on a straight-line monthly basis, as from the time the asset is ready for use. The annual rates applied reflect the estimated useful life for each asset class, as follows:

Class of asset	Years of useful life
Buildings and other constructions	3-50
Machinery and equipment	3-20
Transport equipment	4-5
Administrative equipment	3-10
Other tangible fixed assets	4-8

The useful lives and the depreciation method are reviewed regularly, the effect of any change in these estimates being recognized prospectively in the income statement.

Gains or losses resulting from a write-off or sale are determined as the difference between the amount received and the book value of the asset, and are recognized in the income statement.

3.2. Leases

Leases are classified as finance leases if they transfer to the lessee substantially all the risks and rewards inherent to possessing the corresponding assets. All other leases are classified as operating leases. Leases are classified based on their substance and not their form.

Assets acquired under finance lease contracts, as well as the corresponding liabilities, are recorded at the beginning of the lease at the lesser of the fair value of the assets and the present value of the minimum lease payments. The lease payments include financial expense and amortization of the capital, financial expenses being imputed in accordance with a constant periodic interest rate on the remaining balance of the liability.

In leases considered as operating leases, the lease payments are recognized as an expense on a straight-line basis over the lease period.

3.3. Concentration of business activities and goodwill

Acquisitions of investments in subsidiary companies are recorded using the purchase method. Acquisition cost is determined as the aggregate, at the acquisition date, of the following components: (a) the fair value of the assets received or receivable; (b) the fair value of the liabilities incurred or assumed; (c) the fair value of equity instruments issued by the Company in exchange for obtaining control over the subsidiary; and (d) the costs directly attributable to the acquisition. When applicable, acquisition cost includes the effect of contingent payments agreed for the transaction, and subsequent changes in such payments are recorded by corresponding entry to the corresponding goodwill.

Goodwill corresponds to the excess of acquisition cost over the fair value of the identifiable assets, liabilities and contingent liabilities of the acquired company, at the acquisition date, in accordance with NCRF 14 *Concentrações de Atividades Empresariais*—''NCRF 14'' (Concentration of business activities). If the difference between cost and the fair value of the assets and liabilities acquired is negative, it is recognized as income for the year. Considering the exception provided for in NCRF 3, the Company applied the provisions of NCRF 14 only to acquisitions after 1 January 2009, so that the amounts of goodwill relating to acquisitions prior to that date were retained as initially calculated in accordance with the standard applicable at the time.

Goodwill resulting from the acquisition of subsidiary companies is included on the balance sheet caption ''Goodwill.''

3. Main accounting policies, judgments and estimates (Continued)

Goodwill is not amortized, being subject to impairment tests on an annual basis or whenever there are indications of a possible loss in value. For purposes of testing impairment, goodwill is allocated to cash-generating units. Any impairment loss is immediately recorded as an expense in the income statement for the period and cannot later be reversed.

3.4. Intangible assets

Intangible assets include, basically (1) rights and licenses, (2) commercial lease rights, (3) terminal equipment assigned to clients under service contracts, and (4) the cost of development activities. Intangible assets acquired separately are recorded at cost, less accumulated amortisation and impairment losses.

Intangible assets are amortised on a straight-line basis in accordance with the following estimated useful lives:

Class of asset	Useful life
UMTS (3G) license	Period of the license with a renewal period (up to 2030)
LTE (4G) license	Period of the license with a renewal period (up to 2042))
Rights over terminal equipment assigned to clients	Contract period (2 Years)
Other intangible assets	3 years

The useful lives and method of amortizing the various intangible assets are reviewed annually, and the effect of any changes in these estimates being recognized prospectively in the income statement.

Research expenses are recognized in the income statement when incurred. Development expenses are capitalized when the technical and economic feasibility of the product or process being developed can be shown and the Company has the intention and capability to complete its development and begin marketing or using it, as provided for in NCRF 6 *Activos Intangíveis* (Intangible assets).

3.5. Impairment of tangible fixed assets and intangible assets

The Company makes impairment tests of its tangible and intangible assets whenever there is an event or change that indicates that the amount at which the asset is recorded may not be recovered. Where there are such indications, the Company determines the recoverable amount of the asset, so as to determine the extent of the impairment loss. When it is not possible to determine the recoverable amount of an asset, the recoverable amount for the cash-generating unit to which the asset belongs is estimated.

In addition, in the specific case of terminal equipment assigned to clients under loyalty contracts, impairment is tested periodically, and the assets are fully written off in cases where the revenue associated with the client giving rise to the intangible asset is not assured.

The recoverable amount is determined as the greater of the sales price and value in use. The sales price is the amount that would be obtained by selling the asset in a transaction between independent knowledgeable entities, fewer costs directly attributable to the sale. Value in use results from future cash flows discounted to reflect the cost of capital and the specific risk of the asset.

Whenever the book value of the asset or of the cash-generating unit exceeds its recoverable amount, an impairment loss is recognized and recorded in the income statement.

3. Main accounting policies, judgments and estimates (Continued)

3.6. Financial investments

Subsidiary companies are all the entities over which the Company has decision-making power over their financial and operating policies, generally represented by more than half of the voting rights. Associated companies are entities over which the Company exercises significant influence, but do not have control, generally with participations of between 20% and 50% of the voting rights.

Investments in the Company's subsidiaries are recorded using the equity method of accounting.

In accordance with this method, investments are initially recorded at cost and subsequently adjusted based on post-acquisition changes in the Company's interest in the net assets of the corresponding entities. The Company's results include its interest in the corresponding results of these entities.

Investments are tested whenever there are indications that the asset may be impaired, the impairment losses are recorded as expenses in the income statement.

Gains obtained in transactions with subsidiaries are eliminated in proportion to the Company's interest in them, with a corresponding entry to the investment caption.

3.7. Accruals basis

The Company records its income and expenses on an accruals basis, under which income and expenses are recognized as they are generated or incurred, regardless of when they are received or paid, respectively.

3.8. ''Qualified Technological Equipment'' operations

In prior years the Company entered into ''Qualified Technological Equipment'' (''QTE'') operations under which it sold telecommunication equipment to certain foreign investors. At the same time the investors entered into lease contracts for the equipment with entities founded specifically for the purpose, which signed conditional sales contracts of that equipment with the Company. The Company maintains legal title to the equipment.

The operations correspond to sale and lease-back transactions, the equipment remaining recorded on the balance sheet. Therefore, the Company recorded a current and non-current asset for the sales amount of the equipment and a current and non-current liability for the amount of the lease payments not yet due in the other assets and financial liabilities captions, respectively (Note 12).

In 2012 the contracts in force were terminated early and so the corresponding assets and liabilities were derecognized on the balance sheet.

3.9. Income tax

Income tax corresponds to the sum of current and deferred tax, which are recorded in the income statement except when they relate to items recorded directly in shareholders' equity, in which case they are also recorded in shareholders' equity.

Income tax is estimated based on the estimated taxable income for Corporate Income tax purposes.

Portugal Telecom uses the tax consolidation regime under the *Regime Especial de Tributação de Grupos de Sociedades* (''RETGS''), in which TMN is included. Consequently, estimated Corporate Income Tax, less amounts withheld by third parties and payments in advance, are recorded on the balance sheet as accounts payable to Portugal Telecom.

Income tax for the year recorded in the financial statements is calculated in accordance with NCRF 25 *Impostos Sobre o Rendimento* (Income Tax). In measuring income tax for the year, in addition to current tax determined based on pre-tax results adjusted in accordance with tax law, the effect of temporary

3. Main accounting policies, judgments and estimates (Continued)

differences between the amounts of assets and liabilities for accounting purposes and the respective amounts for tax purposes are also taken into account. Deferred tax assets and liabilities are calculated annually, using the tax rates that are expected to be in effect on the date of the temporary differences reverse.

Deferred tax assets are recorded only when there is reasonable expectation of the existence of sufficient future taxable profit to use them. At the balance sheet date, the temporary differences underlying the deferred tax assets are reappraised, for the purpose of recognizing unrecorded deferred tax assets due to not having fulfilled the conditions required for recording them, and/or decreasing the amount of the deferred tax assets recognized, due to the current expectation of their future recovery.

3.10. Inventories

Inventories are recorded at the lower of cost and net realizable value. Net realizable value represents estimated sale price less all the estimated costs necessary to complete the sale. The Company uses the average cost method.

Inventory impairment losses include the value of expected unused materials due to technological obsolescence and/or turnover, as well as price differences of materials, the realizable value is less than the average cost, to the extent that it exceeds the discount level considered normal in the business.

3.11. Trade and other accounts receivable

Trade and other accounts receivable are recognized initially at fair value, and are subsequently measured at cost or amortized cost, utilizing the effective interest rate method, less impairment losses.

Impairment of debts of doubtful collection is calculated based on an evaluation of the estimated risks arising from non-collection of accounts receivable, and is recognized in the income statement in the period in which it arises.

3.12. Provisions, liabilities and contingent liabilities

Provisions are recognized by the Company when there is a current obligation resulting from past events, provided it is probable that there will be an outlay of internal resources to settle the obligation and the amount of the outlay can be reasonably estimated. When any of these conditions is not fulfilled, the Company discloses the events as contingent liabilities, unless the possibility of an outflow of funds is remote.

Provisions are recognized at the amount corresponding to the present value of the best estimate, at the reporting date, of the resources needed to settle the liability. The estimate is determined considering the risks and uncertainties associated with the liability. Provisions are reviewed at the end of each year and adjusted so as to reflect the best estimate at that date.

Liabilities relating to costs of dismantling and removing assets installed on third party property and restoring the respective premises to their original condition are recognized when the assets start to be utilized and if it is possible to reliably estimate the respective liability. The amount of the liability recognized corresponds to the present value of the liability, adjustments being recognized in the caption ‘‘Other expenses.’’

3.13. Loans obtained

Loans obtained are initially recognized at fair value, net of transaction costs incurred, and are subsequently adjusted to amortized cost, using the effective interest method.

(Amounts expressed in euros)

3. Main accounting policies, judgments and estimates (Continued)

3.14. Financial expenses on loans obtained

The Company has the policy of capitalizing financial charges relating to loans obtained for the acquisition, construction or production of tangible assets. However, the Company has recognized financial charges as expenses when incurred, given that the construction period for the tangible and intangible assets has been relatively short.

3.15. Balance sheet classification

Assets realizable and liabilities payable in more than one year from the balance sheet date are classified, respectively, as non-current assets and liabilities, at their present value.

3.16. Foreign currency balances and transactions

Foreign currency transactions (those not in the Company's functional currency) are recorded at the exchange rates at the dates of the transactions. Assets and liabilities expressed in foreign currency for which there is no agreement for fixing the exchange rate are translated to Euros using the exchange rates in effect at the balance sheet date. Favorable and unfavorable exchange rate differences, resulting from differences between the exchange rates in effect at the date of the transactions and those in effect at the date of the collections or payments or at the balance sheet date, are recorded as income and expenses in the income statement.

At 31 December 2012 and 2011 assets and liabilities were translated to Euros at the following exchange rates in relation to Euro, as published by Bank of Portugal:

Currency	2012	2011
	Euros	
Swedish Crown	8.5820	8.9120
Special Drawing Right	1.1658	1.1865
US Dollar	1.3194	1.2939
Swiss Franc	1.2072	1.2156
Pound Sterling	0.8161	0.8353

3.17. Revenue

Revenue is measured at the fair value of the consideration received or receivable. Income to be recognized is net of the estimated amount of returns, discounts and other rebates, and does not include Value Added Tax (''VAT'') and other taxes paid in connection with the sale.

Revenue from services rendered is recognized by reference to the degree of completion of the transaction at the reporting date, provided that all the following conditions are satisfied: (1) the amount of income can be reliably measured; (2) it is probable that future economic benefits associated with the transaction will flow to the Company; (3) the expenses incurred or to be incurred in the transaction can be reliably measured; and (4) the degree of completion of the transaction at the reporting date can be reasonably estimated.

Revenue from telecommunications activities is recorded at gross value, and unbilled amounts due or generated at the date of the financial statements, are recorded based on estimates and included in the caption ''Unbilled income.'' Differences between the estimated and actual amounts are recorded in the subsequent period.

Revenue relating to advances from clients is deferred, and recognized only when the service is provided.

3. Main accounting policies, judgments and estimates (Continued)

Revenue from international telecommunications services is calculated based on the termination rates established in bilateral agreements with the various telecommunications operators. The agreements also establish whether it is the operator of origin of the traffic that should present the credit to the operator of the destination country, or whether the latter must present the debit to the former.

The Company operates loyalty programs for some of its customers, under which, based on consumption, clients have the right to loyalty points that can be exchanged for equipment, accessories and discounts on subsequent purchases of services. In the absence of specific SNC standards or interpretations relating to this topic, the Company applies IFRIC 13 Customer Loyalty Programs (''IFRIC 13''), in accordance with which it records these operations as transactions containing multiple elements, such that the amount initially received is allocated between the income relating to the traffic consumed and the points that the customer obtained. Accordingly, the deferred revenue relating to the latter component is recognized when the points are used or expire.

Interest revenue is recognized based on the effective interest method.

3.18. Own work capitalized

Internal expenses incurred by the Company in developing fixed assets, essentially relating to labor, are capitalized with a corresponding entry to the caption ''Own work capitalized,'' provided the following requirements are fulfilled: (a) the fixed assets developed are identifiable; (b) there is a strong probability that the fixed assets will generate future economic benefits; and (c) the development expenses can be reliably measured.

3.19. Financial assets and liabilities

Financial assets and liabilities are recognized on the balance sheet when the Company becomes party to the corresponding contractual provisions, and are classified as cost or amortized cost.

(a) Financial assets and liabilities at cost or amortized cost

Financial assets and liabilities are classified in the ''at cost or amortized cost'' category when they present the following characteristics: (a) they are on demand or have established maturities; (b) they have an associated fixed or determinable return; and (c) they are not a derivative financial instrument and do not incorporate a derivative financial instrument.

Financial assets and liabilities considered in this category are measured at cost or amortized cost, less accumulated impairment losses (in the case of financial assets), and correspond essentially to the following asset and liability captions included on the Company's balance sheet:

- Loans obtained
- Shareholders and Group companies
- Trade receivables
- Trade payables and investment suppliers
- Accrued income and expenses
- Advances to suppliers and from clients
- State and other public entities
- Other receivables and payables
- Other financial assets and liabilities
- Cash and bank deposits

3. Main accounting policies, judgments and estimates (Continued)

Amortized cost is determined using the effective interest method. The effective interest rate is that which exactly discounts the estimated future payments or receipts during the expected life of the financial instrument to the net book value of the financial asset or liability.

(b) Impairment of financial assets

Financial assets classified in the ''at cost or amortized cost'' category are subject to impairment tests at the end of each year. The financial assets are impaired when there is objective evidence that, as a result of one or more events occurring after initial recognition, their estimated future cash flows will be affected.

For financial assets measured at amortized cost, impairment loss corresponds to the difference between the book value of the asset and the present value of the new estimated future cash flows discounted at the respective original effective interest rate. For financial assets measured at cost, impairment loss corresponds to the difference between the book value of the asset and the best estimate of the fair value of the asset.

If the impairment loss decreases subsequently as a result of an event occurring after initial recognition of the loss, the impairment must be reversed to results. The reversal is carried out only up to the limit of the amount that would be recognized (amortized cost) had the loss not been initially recorded.

Impairment losses and the respective reversals are recorded in the income statement essentially under the caption ''Impairment of accounts receivable ((losses)/reversals).

(c) Derecognition of financial assets and liabilities

The Company derecognizes financial assets only when the contractual rights to the cash flows from the assets expire, or when the financial assets and all the significant risks and benefits associated with their ownership are transferred to another entity. Financial assets transferred for which the Company has retained some significant risks and benefits are derecognized, provided that control over them has been ceded.

The Company derecognizes financial liabilities only when the corresponding obligation is settled, cancelled or expires.

3.20. Main accounting estimates and judgments

In preparing the financial statements in accordance with the NCRF, the Company's Board of Directors uses estimates and assumptions that affect the application of policies and the amounts reported. The estimates and judgments are continuously evaluated and are based on the experience of past events and other factors, including expectations relating to future events deemed probable in light of the circumstances on which the estimates are based or as the result of information or experience acquired. The most significant accounting estimates reflected in the financial statements are the following:

(a) Useful life of tangible and intangible fixed assets

The Company uses estimates to calculate the useful lives of tangible and intangible fixed assets.

(b) Recognition of provisions and impairment losses

The Company is party to several ongoing legal proceedings for which, based on the opinion of its lawyers, it used its judgment to determine if it should recognize any provision in respect of the contingencies. Impairment of accounts receivable is calculated essentially based on the age of the accounts receivable, the risk profile of the clients and their financial situation.

The estimates were determined based on the best information available at the date the financial statements were prepared. However, there may be events in subsequent periods that, not being foreseeable at the time, were not considered in these estimates. In accordance with NCRF 4 *Políticas*

(Amounts expressed in euros)

3. Main accounting policies, judgments and estimates (Continued)

Contabilísticas, Alterações nas Estimativas Contabilísticas e Erros—''NCRF 4'' (Accounting policies, Changes in accounting estimates and Errors), changes to the estimates that occur after the date of the financial statements are corrected prospectively in the income statement. Therefore, given the associated degree of uncertainty, actual results for the transactions in question may differ from the corresponding estimates.

3.21. Post balance sheet date occurrences

Events occurring after the balance sheet date that provide additional information about conditions that existed at the balance sheet date are reflected in the financial statements. Events that occur after the balance sheet date that provide information on conditions that occur after the balance sheet date are not reflected in the financial statements, and are only disclosed if deemed material.

4. Cash flow

For the purposes of the statement of cash flow, ''Cash and cash equivalents'' includes cash, bank deposits repayable on demand and other very liquid short-term investments with initial maturities of up to three months, net of bank overdrafts, when applicable.

The Company is subject to liquidity risk if the sources of financing, such as cash, operating cash flows and cash flows from divestment transactions and financing, do not meet the existing needs, such as operating cash outflows, investments, shareholder returns and the payment of principal and interest on debt. Based on the cash flows generated by its operations, available cash and the possibility of obtaining financing from Portugal Telecom under the centralized cash management system implemented in the Group, the Company believes it has the capacity to comply with its obligations.

The statement of cash flows was prepared in accordance with NCRF 2 *Demonstração de Fluxos de Caixa* (Statement of Cash Flow), with the following notable aspects:

(a) Other payments, net

This caption includes essentially Value Added Tax and spectrum fees paid to the regulator ICP—Anacom.

(b) Dividend income

In the years ended 31 December 2012 this caption corresponds to dividends received from the subsidiary PT Móveis, in the amount 5,000,000 Euros (Note 9).

(c) Receipts (payments) relating to loans obtained

In 2012 and 2011, payments relating to loans obtained, net of cash receipts relating to loans obtained, is made up as follows:

	2012	2011
	Euros	
Financing under the centralized treasury system	47,025,471	(52,799,489)
Repayment of financing obtained under the commercial paper program (Note 20.3)	—	(49,900,000)
Repayment of shareholders' loans from Group companies (Note 20.1)	—	(160,000,000)
Finance lease contracts and other financing	(2,446,589)	(5,495,879)
	44,578,882	**(268,195,368)**

(Amounts expressed in euros)

4. Cash flow (Continued)

(d) Cash and cash equivalentes

This caption was made up as follows at 31 December 2012 and 2011:

	2012	2011
	Euros	
Bank deposits repayable on demand	666,374	45,609,699
Cash	7,090,836	7,177,400
Cash and bank deposits	**7,757,210**	**52,787,099**

5. Changes in accounting policies and estimates and errors

No new or revised standards or interpretations were adopted in the year ended 31 December 2012, nor were there any voluntary changes in other accounting policies or changes in accounting estimates.

In the year ended 31 December 2012, no other new or revised standards or interpretations were issued that are not yet in force.

In the year ended 31 December 2012 there were no corrections of material prior year errors.

6. Tangible fixed assets

6.1. Changes in tangible fixed assets

The changes in tangible fixed assets in the years ended 31 December 2012 and 2011 were as follows:

The changes in 2012 include investment in tangible fixed assets to be used essentially to increase the capacity of mobile data and quality of the network and expansion of the coverage of the 3G/3,5G and 4G networks;

The changes in 2011 include investments in tangible fixed assets to be used essentially to expand the capacity coverage of the 3G/3,5G network. The sale of basic equipment in 2011 in the net book value of 2.8 million euros, corresponds essentially to sale of the 2G network equipment, which was substituted throughout the year by equipment to render fourth generation services (4G).

6.2. Other matters relating to tangible fixed assets

In prior years, TMN carried out operations with property reserve with foreign investors for the sale of certain telecommunications equipment of its basic network. At the same time the investors signed lease contracts for the equipment with entities founded specifically for the purpose, which in turn signed conditional sales contracts for the equipment with TMN, for the amount of the initial sale. In 2012 the contracts in force were terminated early without significant cost to the Company.

At 31 December 2012 the Company had tangible fixed assets with a net book value of 19,797,082 euros in the hands of third parties.

7. Goodwill

Goodwill at 31 December 2012 and 2011, in the amount of 10,169,655 Euros, was determined in 2007 following the acquisition of the subsidiary PT Wi-Fi, a company that in 2008 was merged into Meo, S.A., as mentioned in Note 1.

(Amounts expressed in euros)

8. Intangible assets

The changes in intangible assets in the years ended 31 December 2012 and 2011 were as follows:

	2012			
	Industrial property and other rights	Other intangible assets	Intangible assets in progress	Total

The acquisitions of intangible assets in the year ended 31 December 2012 relate fundamentally to expenses incurred under loyalty program contracts entered into with clients.

(Amounts expressed in euros)

8. Intangible assets (Continued)

The acquisitions of intangible assets in the year ended 31 December 2011 correspond essentially to (1) the acquisition of rights to use 4G network frequencies (LTE) under which an intangible asset of 106.1 million euros, corresponding to the present value of 113 million euros payable to Anacom, was recorded (Notes 1 and 17) and (2) the present value of terminal equipment ceded to clients under service contracts with them.

At 31 December 2012 the net book value of the caption ''Industrial property and other rights'' included essentially:

- The amount of 360 million euros relating to the 3G and 4G licenses acquired in 2000 and 2011, respectively, corresponding to a gross amount of 500 million euros net of accumulated amortization of 140 million euros. The gross amount includes essentially:
  - (i) 133 million euros relating to the UMTS license acquired in 2000;
  - (ii) 242 million euros recorded in 2007, under commitments assumed in 2000 by TMN and the other mobile operators to make contributions to the information society during the term of the license, and 11.5 million Euros recorded in 2009 relating to additional commitments under the terms of the UMTS license. At the date the license was granted it was not possible to reliably determine how these commitments would be realized, and so the Company did not record any asset or liability at that date;
  - (iii) 106 million euros relating to the 4G license acquired in 2011.
- The amount of 29 million Euros relating to the cost incurred under post-paid mobile service customer loyalty contracts, which are amortized over the duration of the respective loyalty program contracts (2 years); and
- The amount of 3 million euros relating to software utilization licenses.

During the years ended 31 December 2012 and 2011, the book value of intangible assets included 3,933,263 euros 2,909,014 euros, respectively, for personnel expenses relating to own work capitalized.

In 2012 and 2011 the Company carried out research, development and innovation activities for which other operation expenses and fixed assets in the following amounts were recognized:

	2012	2011
	Euros	
Tangible fixed assets	39,471,223	39,408,128
Intangible assets	976,270	470,687
Operating costs	3,688,018	3,616,135
Total	**44,135,511**	**43,494,950**

(Amounts expressed in euros)

9. Investments—Equity method

During the years ended 31 December 2012 and 2011 the changes in this caption were as follows (Note 10.2):

	2012	2011
	Euros	
Investment in subsidiary companies		
Opening balance	5,670,077,380	5,849,576,875
Equity method	(232,575,365)	(179,499,495)
Dividends	(5,000,000)	—
Financial investments, net	**5,432,502,015**	**5,670,077,380**

In the years ended 31 December 2012 and 2011 changes in investments in subsidiary companies resulting from application of the equity method were recorded as follows:

	2012	2011
	Euros	
Gain on subsidiaries (Note 24)	68,574,455	50,340,710
Adjustment in investments (Note 18)	(301,149,820)	(229,840,205)
	(232,575,365)	**(179,499,495)**

10. Related parties

10.1. Shareholders and group companies

At 31 December 2012 and 2011 the current asset and liability captions ''Shareholders and Group companies'' were made up as follows:

	2012	2011
	Euros	
DEBIT BALANCES		
Loans granted under the centralized treasury system (Note 10.3)	—	9,221,948
Total debit balances with shareholders and Group companies	**—**	**9,221,948**
CREDIT BALANCES		
Accounts payable to PT SGPS under the tax consolidation (RETGS)(a)	613,816	8,892,468
Others	2,280,951	—
Total credit balances with shareholders and Group companies (Note 10.3)	**2,894,767**	**8,892,468**

(a) This caption corresponds to accounts payable to PT SGPS under the tax consolidation (RETGS) and relate to estimated Corporate Income Tax, less withholdings at source made by third parties and payments on account.

10.2. Investments in subsidiaries

As mentioned in Note 1, the Company is wholly owned by PT Comunicações, which in turn is wholly owned by PT Portugal, which in turn is owned by Portugal Telecom. Consequently, all the companies that form part of the PT Group were considered as related parties of TMN, including not just its own subsidiaries, but also Portugal Telecom's other subsidiary companies.

(Amounts expressed in euros)

Accounts payable related to QTE operations(a)	—	37,124,881
Total current	**—**	**37,124,881**
Total other financial liabilities	**34,932,378**	**167,642,392**

(a) As explained in Note 3.8, in prior years the Company entered into QTE operations under which it recognized accounts receivable and payable of the same amount, corresponding to the amount of the sale of equipment and the amount of income not yet due under the lease contracts for the equipment, respectively. In 2012 the contracts signed for these operations were terminated early without significant costs for the Company.

(b) At 31 December 2012 and 2011 this caption reflected essentially obligations to dismantle and remove assets installed on third party property and to restore the respective locations to their original condition (Note 3.12), in the amounts of 32,705,960 euros and 32,388,113 euros, respectively.

13. Income tax

13.1. Framework

In 2011 the Company was subject to Corporate Income Tax at the rate of 25%, plus a municipal tax of up to 1.5% on taxable income and a state surcharge of 2.5% on taxable income in excess of 2 million euros, totaling an aggregate maximum of 29.0%. In 2012 the Company is subject to Corporate Income Tax at the rate of 25% plus (i) a municipal tax of up to 1.5% on taxable income and (ii) a state surcharge of 3% and 5% on taxable income between 1.5 and 10 million euros and on taxable income exceeding 10 million euros, respectively, resulting in a maximum aggregate rate of 31.5%. The Company's taxable income for 2012 and 2011 exceeded the above mentioned 10 million and 2 million euro limits and so it applied the tax rates of 31.5% and 29.0% to calculate estimated income tax for 2012 and 2011, respectively, having adjusted the effect of the tax rates applicable to taxable income up to the limits referred to above.

(Amounts expressed in euros)

13. Income tax (Continued)

In the calculation of taxable income, to which the tax rates referred to earlier are applicable, costs and income not acceptable for tax purposes are deducted or added to the accounting results.

The Company is included in the tax consolidation (*Regime Especial de Tributação dos Grupos de Sociedades*—''RETGS'') in which the parent company, PT SGPS, is dominant, and so estimated income tax and withholdings by third parties are recorded on the balance sheet as accounts payable to and receivable from PT SGPS.

In accordance with current legislation, tax returns are subject to review and correction by the tax authorities for four years (five years for Social Security) except when there have been tax losses, tax benefits have been granted, or there are ongoing inspections, complaints or challenges, in which case, depending on the circumstances, the periods are extended or suspended. The Company's Board of Directors believes, supported by information from its tax advisors that any tax contingencies should not significantly affect the financial statements as of 31 December 2012, considering the provisions recorded and the existing expectations at this time regarding the resolution of the tax contingencies described in Note 19.

13.2. Deferred tax

In determining income tax expense for the year, in addition to current tax determined based on income before tax adjusted in accordance with tax legislation, the effect of temporary differences between income before tax and taxable income, arising in the year or in prior years, are also taken into account.

The changes in deferred tax assets during the years ended 31 December 2012 and 2011 were as follows:

	2012					
	Impairment of accounts receivable	Depreciation and amortization of fixed assets	Impairment of inventories	Provisions and adjustments	Other temporary differences	Total
	Euros					
Opening balance	—	20,501,141	—	22,775,930	736,725	**44,013,796**

(Amounts expressed in euros)

13. Income tax (Continued)

The changes in deferred tax liabilities in the years ended 31 December 2012 and 2011 were as follows:

	2012	
	Other temporary differences	Total
	Euros	
Opening balance	319,159	**319,159**
Increase/(decrease)		
Net income	(106,386)	**(106,386)**
Closing balance	**212,773**	**212,773**

	2011	
	Other temporary differences	Total
	Euros	
Beginning balance	391,772	**391,772**
Increase/(decrease)		
Net result	(97,943)	**(97,943)**
Change in the tax rate		
Net result	25,330	**25,330**
Closing balance	**319,159**	**319,159**

13.3. Reconciliation of the tax rate

In the years ended 31 December 2012 and 2011, reconciliation between the theoretical amount resulting from applying the nominal tax rate to income before tax and income tax expense is as follows:

	2012	2011
	Euros	
Income before tax	**331,654,062**	**375,342,443**
Nominal tax rate	31.5%	29.0%
Expected tax	**104,471,030**	**108,849,308**
Permanent differences (i)	(22,024,852)	(14,614,284)
Reversal of prior year deferred tax	(4,533,837)	(877,941)
Insufficiency /excess of prior year income tax	2,132,056	(708,292)
Impact of change in the rate on the calculation of deferred tax (ii)	—	(3,460,899)
Others	35,476	334,564
	80,079,873	**89,522,456**
Income tax		
Current tax	83,159,123	84,663,369
Deferred tax	(3,079,250)	4,859,087
	80,079,873	**89,522,456**

(Amounts expressed in euros)

13. Income tax (Continued)

(i) Permanent differences are made up as follows:

	2012	2011
	Euros	
Effect of applying the equity method (Note 24)	(68,573,630)	(50,340,710)
Tax benefits	(1,057,306)	(629,560)
Difference between the accounting and tax gains and losses	(8,342)	(606,594)
Provisions and impairment losses not considered for deferred tax purposes	840,940	773,867
Others	(1,121,826)	408,915
	(69,920,164)	**(50,394,082)**
Nominal tax rate	31.5%	29.0%
	(22,024,852)	**(14,614,284)**

(ii) This caption corresponds to the impact of a change in the tax rate used to calculate deferred tax, from 29.0% to 31.5% on 31 December 2010 and 2011, respectively, as a result of the change in tax legislation at the end of 2011

13.4. Other information

In accordance with Law 40/2005 of 3 August, which approved the SIFIDE—*Sistema de Incentivos Fiscais em Investigação e Desenvolvimento Empresarial* (System of Tax Incentives for Investigation and Business Development), in 2012 the Company presented its application for 2011 in the amount of 417,152 euros.

The Company included a deduction of 2,344,049 Euros in its tax return for 2012 in accordance with Law 10/2009 of 10 March, which approved the RFAI—*Regime Fiscal de Apoio ao Investimento* (Tax Regime for the Support of Investment), based on significant investments made in new generation broadband networks.

14. Inventories

This caption was made up as follows at 31 December 2012 and 2011:

	2012			2011		
	Gross value	Impairment losses	Net value	Gross value	Impairment losses	Net value
	Euros					
Goods	34,344,331	(14,459,940)	19,884,391	43,860,085	(18,365,977)	25,494,108
Raw, subsidiary and consumable materials	1,584,085	(121,895)	1,462,190	1,607,738	(276,919)	1,330,819

(Amounts expressed in euros)

15. Accounts receivable and unbilled revenues (Continued)

The changes in accumulated impairment losses on trade accounts receivable in 2012 and 20 were as follows:

	2012	2011
	Euros	
Opening balance	98,875,939	114,325,998
Increase/(reversal)	11,166,860	5,006,649
Utilization (a)	(16,132,962)	(20,456,708)
Closing balance	**93,909,837**	**98,875,939**

(a) This caption corresponds to the utilization of accumulated impairment losses to cover doubtful receivables that were considered as uncollectible and had been fully adjusted.

The Company is exposed to credit risk due to the possibility that a counterparty might not fulfill its contractual obligations, resulting in financial loss. Credit risk relates essentially to accounts receivable for services rendered to clients and is monitored regularly with the following objectives: (a) limiting the credit extended to clients, considering their respective profiles and the age of the accounts receivable; (b) monitoring evolution of the level of credit extended; (c) regularly testing of amounts receivable for impairment; and (d) analyzing market risk where the client is located. The Company is not exposed to any significant credit risk relating to any particular client, as its accounts receivable result from a large number of clients.

The aging of accounts receivable net of impairment losses at 31 December 2012 and 2011 was as follows:

	2012			2011		
	Receivables from PT Group companies	Receivables from other companies	Total	Receivables from PT Group companies	Receivables from other companies	Total
	Euros					
Balance not yet due	21,994,249	40,473,715	62,467,964	18,989,514	66,250,113	85,239,627

18. Shareholders' equity

18.1. Capital

At 31 December 2012 and 2011 the Company's share capital was fully paid up and amounted to 47,000,000 Euros, being represented by 9,400,000 nominal shares of 5 Euros each. The Company's share capital is fully owned by PT Comunicações (Note 1).

18.2. Legal reserve

Commercial legislation and the Company's bylaws establish that at least 5% of annual net income must be appropriated to a legal reserve until the reserve represents 20% of share capital. The reserve cannot be distributed other than in the event of the liquidation of the company, but can be used to absorb losses, after all the other reserves have been exhausted, or for incorporation into capital.

At 31 December 2012 and 2011 the legal reserve was fully constituted in accordance with applicable commercial legislation and amounted to 9,400,000 Euros.

18.3. Adjustments to financial assets

The changes in this caption in 2012 and 2011 were as follows:

	Unpaid dividends	Foreign currency exchanges differences	Other changes in shareholders' equity(b)	Total
		Euros		
Balance at 1 January 2011	**2,165**	**—**	**(302)**	**1,863**

Unappropriated profit of PT Móveis	5,689,037,476	—	—	**5,689,037,476**
Balance at 31 December 2011	**5,689,039,641**	**(229,436,015)**	**(404,029)**	**5,459,199,597**
Equity method	—	(350,110,383)	48,960,382	**(301,150,001)**
Unappropriated profit of PT Móveis	45,340,711	—	—	**45,340,711**
Balance at 31 December 2012	**5,734,380,352**	**(579,546,398)**	**48,556,353**	**5,203,390,307**

(a) This caption corresponds basically to the Company's participation in other changes in shareholders' equity of PT Móveis not resulting from participation in the net result of the subsidiary. In 2012 and 2011 this caption corresponded essentially to negative translation adjustments resulting from depreciation of the Brazilian Real in relation to the Euro in the investment held indirectly in the Oi Group, which was acquired on 28 March 2011 by Bratel Brasil, as explained in Note 1.

(b) The other changes in shareholders' equity in 2012 resulting from application of the equity method relate essentially to gain recorded by Bratel Brasil, in the amount of 49 million euros, resulting from the Oi Group's corporate reorganization in March 2012.

The changes relating to application of the equity method were recorded by corresponding entry to investments recorded in accordance with the equity method as follows:

	2012	2011
	Euros	
Equity investments in subsidiary and associated companies (Note 9)	(301,149,820)	(229,840,205)
Provision for negative investments (Note 19)	(181)	463
	(301,150,001)	**(229,839,742)**

(Amounts expressed in euros)

18. Shareholders' equity (Continued)

18.4. Appropriation of earnings

In 2011, as decided at the Shareholders' General Meeting held on 25 March 2011, net earnings for 2010, amounting to 5,889,053,625 euros, were appropriated in full to retained earnings.

In 2012, as decided at the Shareholders' General Meeting held on 28 March 2012, net earnings for 2011, amounting to 285,819,986.56 euros, were appropriated as follows: (1) dividends to be distributed of 235,479,275.19 euros; (2) retained earnings of 50,340,711.37 euros.

19. Provisions, contingent liabilities and contingent assets

19.1. Changes in provisions

The changes in provisions in 2012 and 2011 were as follows:

	2012				
	Taxes	Legal processes in progress	Negative investments (Note 10)	Other provisions	Total
			Euros		
Opening balance	3,613,271	11,284,872	—	5,043,895	**19,942,038**
Increase	1,461,158	—	1,006	—	**1,462,164**
Decrease	(628,805)	(303,264)	—	(132,225)	**(1,064,294)**
Utilization	(33,063)	—	—	—	**(33,063)**
Other changes	(828,922)	—	—	—	**(828,922)**
Closing balance	**3,583,639**	**10,981,608**	**1,006**	**4,911,670**	**19,477,923**

	2011				
	Taxes	Legal processes in progress	Negative investments (Note 10)	Other provisions	Total
			Euros		
Opening balance	3,175,235	15,586,554	463	35,098,297	**53,860,549**
Increase	789,524	—	—	1,241,158	**2,030,682**
Decrease	(351,488)	(4,301,682)	(463)	—	**(4,653,633)**
Other changes	—	—	—	(31,295,560)	**(31,295,560)**
Closing balance	**3,613,271**	**11,284,872**	**—**	**5,043,895**	**19,942,038**

The provision for negative investments is to cover losses in subsidiaries that have negative shareholders' equity (Note 10), and is calculated based on the percentage participation in the capital of these companies. The changes in the provisions in the years ended 31 December 2012 and 2011 were as follows:

	2012	2011
	Euros	
Equity method		
Losses in subsidiary and associated companies (Note 24)	825	—
Adjustments to financial assets (Note 18)	181	(463)
	1.006	**(463)**

(Amounts expressed in euros)

19. Provisions, contingent liabilities and contingent assets (Continued)

19.2. Processes with probable loss

The provision for taxes is to cover several Corporate Income Tax and Social Security contingencies, as well as other taxes and rates.

The provision for legal processes in progress is to cover liabilities resulting from processes brought against the Company, estimated based on information from its lawyers.

At 31 December 2012 and 2011 the Company, based on the opinion of its internal and external lawyers, classified several legal and arbitration processes in progress and tax contingencies as of probable loss and so it recorded provisions in accordance with NCRF 21—Provisions, Contingent Liabilities and Contingent Assets to cover the probable outflow of resources. The nature of the processes is as follows:

	2012	2011
	Euros	
Legal processes in progress		
Civil responsibility	10,084,018	10,147,398
Labour responsibility	286,871	462,161
Other responsibilities	610,719	675,313
	10,981,608	**11,284,872**
Tax contingencies	3,583,639	3,613,271
	14,565,247	**14,898,143**

Processes with possible loss

At 31 December 2012 and 2011, the Company, based on the opinion of its internal and external lawyers, classified several legal and arbitration processes in progress and tax contingencies as of possible loss in accordance with NCRF. The nature of the processes is as follows:

	2012	2011
	Euros	
Legal processes in progress		
Civil responsibility (a)	8,203,539	455,394
Other responsibilities	3,869,544	4,153,953
	12,073,083	**4,609,347**

(a) The increase in these processes in relation to the preceding year results essentially from the new Noxitel process, dated May 2012, in the amount of 6,000,000 euros, regarding non-contractual compliance, which ended in 2013 without any penalty for the Company.

The Board of Directors believes that any corrections resulting from revisions/inspections of tax returns by the tax authorities will not have a significant effect on the financial statements as of 31 December 2012, considering the provisions recorded and the expectations at this time with respect to the final resolution of the above mentioned matters.

19.3. Other processes

The Company received additional Corporate Income Tax assessments relating to the financial years 2004 to 2009, and a tax inspection report relating to 2010, which essentially question the deductibility of certain financial costs, in the total amount tax amount of 198.5 million euros. The Company disagrees with these assessments and conclusions, and considers, based on the opinion of its tax consultants, that there are solid arguments to oppose the position of the tax authorities.

(Amounts expressed in euros)

19. Provisions, contingent liabilities and contingent assets (Continued)

19.4. Contingent assets

Contingent assets at 31 December 2012 amounted to approximately 4.4 million Euros and correspond essentially to processes brought by the Company against third parties, relating to situations of breach of 2G equipment sales contracts, the rendering of services and lack of payment for Wi-Fi services.

20. Loans obtained

Loans obtained at 31 December 2012 and 2011 are made up as follows:

	2012		2011	
	Non-current	Current	Non-current	Current
	Euros			
Loans from Group companies (Note 10)	340,000,000	—	340,000,000	—
Centralized treasury system (Note 10)	—	37,803,523	—	—
Finance leasing	1,311,519	2,577,104	3,367,496	6,375,667
Other financing	—	21,719	—	111,508
	341,311,519	**40,402,346**	**343,367,496**	**6,487,175**

20.1. Loans from Group companies

In June 2010 the Company obtained shareholders' loans from PT Portugal, its previous shareholder, in the amount of 500,000,000 Euros, which did not have an established maturity. On 30 November 2010, these advances were ceded by PT Portugal to PT Comunicações at their nominal amount, under the sale of the participation in TMN. On 2 December 2011, the Company repaid the amount of 160,000,000 Euros relating to these shareholders' loans (Note 4).

20.2. Centralized treasury

Starting on March 2006 Portugal Telecom began centralizing all receipts and payments of the Group companies headquartered in Portugal. The loans obtained by the Company under the centralized cash management system have short-term maturities and bear interest at market rates.

20.3. Commercial paper

On 25 June 1999 Portugal Telecom established a Framework Agreement for the Issuance of Commercial Paper, in which the Company participates, which has been amended several times and at 31 December 2012 was for a maximum of 3,500,000,000 Euros. The framework agreement is in effect until 7 July 2013, and is automatically renewable for successive 2-year periods, until 7 July 2025, unless it is terminated by any of the parties.

On 1 June 2000 Portugal Telecom established a Framework Agreement for the Issuance of Commercial Paper, in which the Company participates, which has been amended several times and, at 31 December 2013, was for a maximum amount of 3,000,000,000 Euros. The contract is in effect until 1 June 2014 and is automatically renewable for successive 2-year periods, until 1 June 2020, unless it is terminated by any of the parties.

At 31 December 2012 and 2011 the Company was not drawn any amount under these programs. In 2011 the Company repaid 49,900,000 euros which was outstanding at 31 December 2010 (Note 4).

20.4. Finance leasing

Financial lease obligations result essentially from: (i) vehicle leases, which generally include purchase options upon termination; and (ii) rights to use transmission capacity over fiber optic circuits.

(Amounts expressed in euros)

20. Loans obtained (Continued)

At 31 December 2012 and 2011 the Company had the following assets recorded on the balance sheet under the finance lease:

	2012			2011		
	Gross value	Accumulated depreciation	Net value	Gross value	Accumulated depreciation	Net Value
	Euros					
Tangible fixed assets						
Transport equipment	4,797,856	2,986,250	1,811,606	5,667,617	3,108,984	2,558,633
Other tangible fixed assets	737,926	272,224	465,702	181,688	68,133	113,555
	5,535,782	3,258,474	2,277,308	5,849,305	3,177,117	2,672,188
Intangible assets						
Industrial property and other rights	2,864,046	1,311,650	1,552,396	14,678,357	8,233,175	6,445,182
	8,399,828	4,570,124	3,829,704	20,527,662	11,410,292	9,117,370

The minimum finance lease contractual payments at 31 December 2012 and 2011 mature as follows

	2012			2011		
	Principal	Interest	Total	Principal	Interest	Total
	Euros					
Up to 1 year	2,577,104	203,515	2,780,619	6,375,667	677,434	7,053,101

Others	498,886	475,577
	15,772,095	**15,388,176**

(a) This caption in 2011 includes the reversal of costs recorded in prior years relating to Value Added Tax on credit notes issued to clients as the Company believes it will be recovered.

(Amounts expressed in euros)

29. Other income

This caption is made up as follows for the years ended 31 December 2012 and 2011:

	2012	2011
	Euros	
Supplementary income[(a)]	9,917,138	11,350,431
Interest on overdue payments	1,918,363	2,272,280
Recovery of receivables	1,655,043	1,192,075
Exchange gain	1,316,873	2,698,409
Gain on inventories	261,121	687,380
Others	899,290	175,231
	15,967,828	**18,375,806**

(a) This caption includes essentially income from the rent of space

30. Other expenses

This caption is made up as follows for the years ended 31 December 2012 and 2011:

	2012	2011
	Euros	
Write-off of tangible fixed assets[(a)]	2,400,905	126,168
Losses on inventories	1,503,287	1,774,341
Losses on exchange rate differences	1,434,249	2,711,971
Financial discount allowed	362,514	456,871
Uncollectible receivables	310,136	3,485,196
Others[(b)]	16,044,013	10,867,861
	22,055,104	**19,422,408**

(a) The increase in this caption in 2012 is due essentially to the substitution of hardware and software equipment due to updating of the NGIN platform that resulted in its write-off.

(b) This item essentially reflects non-recurring adjustments to cover the collection risk of certain accounts receivable.

31. Depreciation and amortization

This caption is made up as follows for the years ended 31 December 2012 and 2011:

	2012	2011
	Euros	
Tangible fixed assets (Note 6)	117,784,979	129,000,972
Intangible assets (Note 8)	63,001,196	65,420,666
	180,786,175	**194,421,638**

(Amounts expressed in euros)

32. Interest and related income/expenses

These captions are made up as follows for the years ended 31 December 2012 and 2011:

	2012	2011
	Euros	
Interest and related income		
Interest income	468,450	5,414,562
Others	914,203	212,565
	1,382,653	**5,627,127**
Interest and related expenses		
Interest expense	18,364,882	22,155,201
Finance leasing	166,137	169,742
Commission and other bank charges	610,516	97,582
Others	3,323,362	505,724
	22,464,897	**22,928,249**

Interest income and expense for the years ended 31 December 2012 and 2011 are made up as follows:

	2012	2011
	Euros	
Interest income		
Term deposits	463,290	5,378,575
Group companies	5,160	35,987
	468,450	**5,414,562**
Interest cost		
Group companies	16,213,321	21,620,363
Bank loans	2,014	1,863
Others[(a)]	2,149,547	532,975
	18,364,882	**22,155,201**

(a) The increase in this caption is due essentially to the effect of updating the liability for the acquisition of the 4G/LTE license (Note 17), concluded in December 2011.

33. Earnings per share

Earnings per share for the years ended 31 December 2012 and 2011 were calculated as follows:

	2012	2011
	Euros	
Net income	251,574,189	285,819,987
Number of shares	9,400,000	9,400,000
Basic earnings per share	**26.76**	**30.41**

There are no situations that result in dilution and so diluted earnings per share are the same as basic earnings per share.

(Amounts expressed in euros)

34. Guarantees and other financial commitments

At 31 December 2012 and 2011 the Company had the following guarantees and other financial commitments in favour of third parties:

	2012	2011
	Euros	
Bank guarantees in favour of the courts	**112,031**	**109,116**
Bank guarantees requested by the Company in favour of third parties:		
Anacom	30,000,000	15,000,000
Tax administration	2,863,418	2,874,128
Others	2,397,784	2,206,927
	35,261,202	**20,081,055**
Total guarantees	**35,373,233**	**20,190,171**
Purchase commitments to:		
Suppliers of fixed assets	21,383,567	34,286,840
Suppliers of inventories	30,193,567	20,826,447
Others	14,608,520	9,433,834
	66,185,654	**64,547,121**

The bank guarantee provided in favor of Anacom at 31 December 2012, in the amount of 30,000,000 Euros, was requested by Anacom in the auction of spectrum usage rights, and corresponds to the total amount of the outstanding instalments (Note 17).

The bank guarantees provided in favor of other entities at 31 December 2012 includes essentially the amount of 1.7 million Euros in respect of contracts to use shops.

The purchase commitments refer to: (i) orders placed and not satisfied, essentially to acquire telecommunications infrastructure and equipment, in the normal course of business, in the total amount of 51,577,134 euros; and (ii) service orders for the supply of services placed and not satisfied, in the normal course of business, in the amount of 14,608,520 euros.

35. Post balance sheet date occurrences

The financial statements as of 31 December 2012 were approved by the Board of Directors and authorized for issuance on 20 February 2013, being still subject to approval at the Shareholders' General Meeting, under the terms of applicable commercial legislation in Portugal.

There have been no significant events after 31 December 2012 that would require adjustments or disclosure in the accompanying financial statements.

36. Note added for translation

The accompanying financial statements are a translation of financial statements originally issued in Portuguese in conformity with the NCRF, some of which may not conform to or be required by generally accepted accounting principles in other countries. In the event of discrepancies, the Portuguese language version prevails.

REPORT OF THE REVISEUR D'ENTREPRISES AGREE

Following our appointment by the General Meeting of the Shareholders, we have audited the accompanying annual accounts of Altice France S.A. (formerly Altice Six S.A.), which comprise the balance sheet as at December 31, 2013 and the profit and loss account for the year then ended, and a summary of significant accounting policies and other explanatory information.

Responsibility of the Board of Directors for the annual accounts

The Board of Directors is responsible for the preparation and fair presentation of these annual accounts in accordance with Luxembourg legal and regulatory requirements relating to the preparation of the annual accounts, and for such internal control as the Board of Directors determines is necessary to enable the preparation of annual accounts that are free from material misstatement, whether due to fraud or error.

Responsibility of the réviseur d'entreprises agréé

Our responsibility is to express an opinion on these annual accounts based on our audit. We conducted our audit in accordance with International Standards on Auditing as adopted for Luxembourg by the *Commission de Surveillance du Secteur Financier*. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the annual accounts are free from material misstatement.

Deloitte.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the annual accounts. The procedures selected depend on the *réviseur d'entreprises agréé's* judgement, including the assessment of the risks of material misstatement of the annual accounts, whether due to fraud or error. In making those risk assessments, the *réviseur d'entreprises agréé* considers internal control relevant to the entity's preparation and fair presentation of the annual accounts in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the Board of Directors, as well as evaluating the overall presentation of the annual accounts.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the annual accounts give a true and fair view of the financial position of Altice France S.A. (formerly Altice Six S.A.) as of December 31, 2013, and of the results of its operations for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation of the annual accounts.

For Deloitte Audit, *Cabinet de révision agréé*

John Psaila, *Réviseur d'entreprises agréé*

ALTICE FRANCE S.A. (formerly ALTICE SIX S.A.)

Notes to the accounts as of December 31, 2013

Note 1 - General information

ALTICE FRANCE S.A., formerly ALTICE SIX S.A. (hereinafter referred to as the “Company”) was incorporated on December 18, 2007 and organized under the law of Luxembourg as a “société anonyme” for an unlimited period.

The registered office of the Company is established at 3, Boulevard Royal, L-2449 Luxembourg. The Company is registered to the Trade Register under number B 135 296 in Luxembourg.

On January 31, 2014, Next LP (Sole Shareholder of the Company) contributed all its economic interests in Altice France S.A. to Altice S.A. in exchange for shares in Altice S.A..

The Company’s financial year starts on January 1 and ends on December 31 of each year.

The purpose of the Company is the acquisition, the management, the development and the transfer of participations in any form whatsoever, in Luxembourg and foreign companies.

Furthermore, the Company can acquire and transfer other sorts of securities, by subscription, purchase, exchange, sale or any other manner, to contract various loans and to proceed to the issue of bonds or of convertible bonds and debt securities, to grant any assistance, loan, moves forward or guaranteed to the companies in which it holds a direct or indirect participation or to any companies being a member of the same group of companies as the Company.

Generally speaking, the Company is authorized to make any commercial, industrial and financial operation which could be in the field of the immovable securities or the property, susceptible to increase or to complete objects mentioned above.

The Company is part of the Altice S.A. group (“Altice”). The annual accounts are included in the combined financial statements of Altice S.A. and are available at 3, Boulevard Royal, L-2449 Luxembourg.

Based on the criteria defined by Luxembourg Law (article 314 of the commercial law), the Company is exempted from the obligation to draw up consolidated accounts and a consolidated management report. Therefore, in accordance with legal provisions, these annual accounts were presented on a non-consolidated basis for the approval of the shareholders during the Annual General Meeting.

ALTICE FRANCE S.A. (formerly ALTICE SIX S.A.)

Notes to the accounts as of December 31, 2013

Note 2 - Summary of significant accounting policies

2.1 Basis of presentation

The annual accounts have been prepared in accordance with Luxembourg legal and regulatory requirements under the historical cost convention.

Accounting policies and valuation rules are, besides the ones laid down by the Law of December 19, 2002, determined and applied by the Board of Directors.

The preparation of annual accounts requires the use of certain critical accounting estimates. It also requires the Board of Directors to exercise its judgement in the process of applying the accounting policies. Changes in assumptions may have a significant impact on the annual accounts in the period in which the assumptions changed. The Board of Directors believes that the underlying assumptions are appropriate and that the annual accounts therefore present the financial position and results fairly.

The Company makes estimates and assumptions that affect the reported amounts of assets and liabilities in the next financial year. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

2.2 Significant accounting policies

The main valuation rules applied by the Company are the following:

2.2.1 Formation expenses

Formation expenses are written off on a straight-line basis over a period of 5 years.

2.2.2 Financial assets

Shares in undertakings and loans to these undertakings are valued at purchase price including the expenses incidental thereto.

In the case of durable depreciation in value according to the opinion of the Board of Directors, value adjustments are made in respect of fixed assets, so that they are valued at the lower figure to be attributed to them at balance sheet date. These value adjustments are not continued if the reasons for which the value adjustments were made have ceased to apply.

2.2.3 Debtors

Debtors are valued at their nominal value. They are subject to value adjustments where their recovery is compromised. These value adjustments are not continued if the reasons for which the value adjustments were made have ceased to apply.

2.2.4 Foreign currency translation

Transactions expressed in currencies other than EUR are translated into EUR at the exchange rate effective at the time of transaction.

Formation expenses and financial fixed assets expressed in currencies other than EUR are translated into EUR at the exchange rate effective at the time of the transaction. At the balance sheet date, these assets remain translated at historical exchange rates.

Cash at bank is translated at the exchange rate effective at the balance sheet date. Exchange losses and gains are recorded in the profit and loss account of the year.

Other assets and liabilities are translated separately respectively at the lower or at the higher of the value converted at the historical exchange rate or the value determined on the basis of the exchange rates effective at the balance sheet date. The realised and unrealised exchange losses are recorded in the profit and loss account. The realised exchange gains are recorded in the profit and loss account at the moment of their realisation.

Where there is an economic link between an asset and a liability, these are valued in total according to the method described above and the net unrealised losses are recorded in the profit and loss account and the net unrealised exchange gains are not recognised.

Assets and liabilities items which are fair valued are converted at the exchange rates effective at the balance sheet date. Foreign exchange differences on those items which are accounted at fair value are recognised in the profit and loss account or revaluation reserves with the change in fair value.

2.2.5 Provisions

Provisions for taxation corresponding to the tax liability estimated by the Company for the financial years for which the tax return has not yet been filed are recorded under the caption "Tax debts". The advance payments are shown in the assets of the balance sheet under the "Other debtors" caption.

2.2.6 Debts

Debts are recorded at their reimbursement value. Where the amount repayable on account is greater than the amount received, the difference is shown as an asset and is written off over the period of the debt on a linear method.

Subordinated debts are recorded under subordinated debtors when their status is subordinated to unsecured debts.

2.2.7 Prepayments

This asset item includes expenditures incurred during the financial year but related to a subsequent financial year. Initial costs in relation to the issuance of the external loan are expensed over the duration of the corresponding loan.

ALTICE FRANCE S.A. (formerly ALTICE SIX S.A.)

Notes to the accounts as of December 31, 2013

Note 3 - Formation expenses

Formation expenses comprise incorporation expenses incurred for the creation of the Company and capital increase expenses.

The movements for the year are as follows:

	2013 EUR	2012 EUR
Gross book value - opening balance	**155.079**	**155.079**
Additions for the year	-	-
Gross book value - closing balance	**155.079**	**155.079**
Accumulated value adjustement - opening balance	**(154.855)**	**(125.700)**
Allocations for the year	(224)	(29.155)
Accumulated value adjustement - closing balance	**(155.079)**	**(154.855)**
Net book value - closing balance	-	**224**
Net book value - opening balance	**224**	**29.379**

Note 4 – Financial assets

The movements for the year are as follows:

	Shares in undertakings with which the company is linked by virtue of participating interests EUR	Amounts owed by undertakings with which the company is linked by virtue of participating interests EUR
Gross book value - opening balance	**31.660.501**	**385.549.357**
Additions/(decrease) for the year	581.551.547	(385.549.357)
Gross book value - closing balance	**613.212.048**	**-**
Accumulated value adjustement - opening balance	**-**	**(2.800.894)**
(Value adjustment)/Reversal for the year (*)	-	2.800.894
Accumulated value adjustement - closing balance	**-**	**-**
Net book value - closing balance	**613.212.048**	**-**
Net book value - opening balance	**31.660.501**	**382.748.463**

The fair value of undertakings with which the Company is linked by virtue of participating interests exceed the book value of the shares and the book value of the amounts owed by undertakings with which the Company is linked by virtue of participating interests. As a consequence, no value adjustments have been recorded as at December 31, 2013.

ALTICE FRANCE S.A. (formerly ALTICE SIX S.A.)

Notes to the accounts as of December 31, 2013

4.1Shares in undertakings with which the company is linked by virtue of participating interests

As at 31 December 2013, the breakdown of shares in undertakings with which the company is linked by virtue of participating interests is as follows:

		As at 31/12/2012		As at 31/12/2013			
Company name	Registered offices	Book value EUR	Share capital %	Book value EUR	Share capital %	Net equity as of 31/12/2013 EUR	Profit/(Loss) for the EUR
Fiberman S.C.A. (*)	5, rue Guillaume Kroll L-1882 Luxembourg	775.767	12,67%	792.707	12,84%	6.041.703	(17.998)
Fiberman Management S.à	5, rue Guillaume Kroll L-1882 Luxembourg	9.083	24,30%	9.083	24,30%	(14.669)	(14.087)
Altice B2B Lux. Holding S.à r.l.	3, boulevard Royal L-2449 Luxembourg	5.160.597	24,06%	-	-	-	-
Ypso Holding S.à r.l.	3, boulevard Royal L-2449 Luxembourg	25.715.055	24,06%	-	-	-	-
Numericable Group S.A.	5, place de la Pyramide 92088 Puteaux la Defense Cedex	-	-	612.410.258	27,38%	2.230.352.734	(1.626.175)
		31.660.501		**613.212.048**			

(*)The financial statements for Fiberman S.C.A. and Fiberman Management S.à r.l. are not subject to audit

Numericable Group S.A. ("Numericable Group") was incorporated in August 2013 by Carlyle, Cinven and the Company. Prior to Numericable Group's initial public offering ("IPO") which occurred on November 7, 2013, Carlyle, Cinven and the Company together with minority shareholders, contributed all of their economic interests in Ypso Holding S.à r.l. ("Ypso")and Altice B2B Lux Holding S.à r.l. ("Altice B2B") to Numericable Group in exchange for shares (the "Contribution").

This Contribution has been considered as a transaction under common control, as Carlyle, Cinven and the Company were acting in concert.

Numericable Group is therefore considered to be the successor entity of Ypso and Altice B2B.

The value of the Contribution by the Company was assessed at EUR 449.213.745 split between the shares in Ypso and Altice B2B for EUR 25.715.055 and 5.160.597 respectively, the instruments issued by Ypso for EUR 311.182.162 and the instruments issued by Altice B2B for an amount of EUR 107.155.931.

On November 7, 2013, the Company acquired from Carlyle and Cinven an additional 9.827.758 shares of Numericable Group for a price consideration of EUR 243.728.398.

On November 11, 2013, some non-controlling interests of the Company have been granted a total of 3.247.612 million shares of Numericable Group in connection with the redemption of subordinated financial liabilities issued by the Company and held by these entities for a total amount of EUR
80.540.778. The Company has pre-emption rights on these shares and a call option over these shares for a period of 3 years. On June 5, 2014, this call option was exercised (see note 20). As At December 31, 2013, the value of such option was EUR 670.000 as determined by the Board of Directors

As at December 31, 2013, the Company holds 33.935.277 of shares of Numericable Group. Based on the share price as of December 31, 2013 being EUR 26.4 per share, the fair value of the investment amounted to EUR 895.891.313. Based on this valuation, it is concluded that the fair value is greater than the net book value of the investment and therefore no impairment shall be recorded in the annual accounts as of and for the year ended December 31, 2013.

4.2Amounts owed by undertakings with which the company is linked by virtue of participating interests

As at November 7, 2013, as mentioned in note 4.1, all the loans and receivables being the CPECs, YFPECs, IFPECs, PECs, Super PECs and the related accrued interests against Ypso Holdings S.à r.l. and Altice B2B Lux Holding S.à r.l. have been contributed to Numericable Group in exchange for shares of Numericable Group.

Following the IPO of Numericable Group and the contribution of the investments held in Ypso Holding S.à r.l. and Altice B2B Lux Holding S.à r.l. (defined as the “Exit” in the debt instruments agreements), the Super PECs should bear an interest of 20% per annum since the subscription of the instruments. Therefore, interest income for a total amount of approximately EUR 21.710.873 have been recorded under the caption “Income from financial fixed assets: other income from participating interests” in the profit and loss account in order to catch up the interest income from the issuance of the Super PECs to the Contribution date. The interest incomes for the previous years have been recognized entirely in the profit and loss accounts for the year ended 2013. The remaining amount under the same caption corresponds to the interest income on the PECs bearing an interest of 7,38% per annum.

Additionally, under the caption “Income from financial fixed assets: other income from participating interests”, EUR 4.606.974 were recoginized as interests on the PECs against Altice B2B Lux Holding S.à r.l.

Note 5 - Other receivables

5.1Other receivables becoming due and payable within one year

As at December 31, 2013, this caption is mainly composed of:

- A loan of EUR 300.000 granted to New Ypso Management Benetti S.C.A. (a related company) on April 11, 2013. This loan does not bear interest and was transferred to Next LP in January 2014.
- An advance of EUR 178.661 granted to the shareholder which was settled in January 2014.
- 3 credit lines granted by the Company to members of the group totalling EUR 660.000. These credit lines generate interest at a rate of EURIBOR 3M + 1%. The maturity date is set at August 31, 2014. As at December 31, 2013, accumulated interest amounts to EUR 25.150.

Note 6 - Subscribed capital

As at December 31, 2013, the Company’s share capital was set at EUR 203.674.129, divided into 203.674.129 shares, i.e., 40.734.827 Class A shares, 40.734.827 Class B shares, 40.734.827 Class C shares, 40.734.827 Class D shares and 40.734.821 Class E shares, all fully paid with a nominal value of EUR 1.

During the years 2013 and 2012, no shares have been issued by the Company.

All shares issued by the Company bear the same rights and obligations to the holder.

Note 7 - Legal reserve

Luxembourg companies are required to allocate to a legal reserve a minimum of 5% of the annual net income, until this reserve equals 10% of the subscribed share capital. This reserve may not be distributed.

Note 8 – Share premium and similar premiums

Upon redemption of debt instruments, existing shareholders have partly contributed their receivable for a total of EUR 151.883.946 to the Company. This was recorded in the account share premium ("Capital contribution not remunerated in shares").

Note 9 - Movements for the year on the reserve and profit and loss items

	Profit or loss brought forward EUR	Profit or loss for the financial year EUR
As at 31.12.2012	**(502.882.411)**	**150.770.556**
Movements during the year :		
• Allocation of previous year's profit	150.770.556	(150.770.556)
• Loss for the financial year	-	(52.437.157)
As at 31.12.2013	**(352.111.855)**	**(52.437.157)**

Note 10 – Subordinated debts

As at December 31, 2013, subordinated debts excluding accrued interests amounted to EUR 341.175.696 (2012: EUR 561.382.128)

All debt instruments previously issued by the Company have been redeemed in November 2013 for a total amount of EUR 648.629.802, resulting in a loss of EUR 43.024.738, being the difference between the redemption price and the net book value of such instruments (the "Redemption").

Part of the redemption proceeds have been repaid in cash or in kind (see note 4). An amount of EUR 151.883.946 was contributed to the Company and recorded as share premium (see note 8).

Following the IPO of Numericable Group and the contribution of the investments held in Ypso Holding S.à r.l. and Altice B2B Lux Holding S.à r.l. (defined as the "Exit" in the debt instruments agreements), the interest rate from the issuance date to the Redemption date should be computed as to obtain an Internal Rate Return of 20% over the life of the instruments. As a consequence, interest charges for a total amount of approximately EUR 28.799.395 have been recorded under the caption "Interest and other financial charges concerning affiliated undertakings" in the profit and loss account in order to catch up the interest charges since the issuance of the Super PECs. The interest charges for the previous years have been recognized entirely in the profit and loss accounts for the year ended 2013. The remaining amount under the same caption corresponds to the interests charges on the PECs bearing an interest of 7,38% per annum and the realized loss on the Redemption (see above).

The remaining amount has been offset against the issuance of new YFCPECs (Yield Free Convertible Preferred Equity Certificates) and CPECs (Convertible Preferred Equity Certificates) issued by the Company on November 12, 2013 and subscribed by the sole shareholder.

As at December 31, 2013, the financial instruments are composed as follows:

Type of financial instruments	Maturity date	Number of certificates	Par value per certificate (in EUR)	Interest rate	Nominal value (in EUR)
YFPECs	12/11/2088	241.041.345	1	None	241.041.345
CPECs	12/11/2062	100.134.351	1	None	100.134.351
					341.175.696

On January 31, 2014, all subordinated debt instruments issued by the Company have been contributed by the sole shareholder against issuance of additional shares.

Note 11 – Amounts owed to credit institutions

In November 2013, the Company entered into a margin loan facility agreement (“Margin Loan”), with a principal amount of EUR 323.986.270, bearing interest at a variable rate of 12 months Euribor + 4,25% for the first period, then 6 months Euribor + 4,25% and maturing in November 2016.

The accrued interest as at December 31, 2013 amounts to EUR 2.097.307 and the interest charges for the year then ended for the same amount have been recorded under the caption “Interest and other financial charges: other interest and similar financial charges” in the profit and loss account.

The initial costs (EUR 4.446.957) incurred in relation to the issuance of the “Margin Loan” are recorded in the balance sheet as “prepayments” less cumulated amortization (EUR 197.643). Those costs are amortized on a straight line basis up to the maturity of the Margin Loan and the amortization of the year is included in the caption “Interest and other financial charges: other interest and similar financial charges” in the profit and loss account (EUR 197.643).

On June 4, 2014 an additional tranche of EUR 121.748.934 has been drawn down to finance the acquisition of 3.247.612 shares of Numericable Group (See Note 20).
On July 3, 2014, the Margin Loan (principal + accrued interest) has been fully reimbursed using the proceeds of a capital increase (See Note 20).

Note 12 – Tax debts

The Company is subject to all taxes applicable to a commercial company in Luxembourg.

Note 13 – Other creditors

This caption is mainly composed of an advance of EUR 292.200 of Altice VII Bis S.à r.l. (a related party of the Company). This advance does not bear interest.

Note 14 – Other external charges

The increase of this caption is mainly due to the expenses incurred in connection with the structuring of the IPO of Numericable Group on November 7, 2013.

Note 15 – Staff

The Company had no employee during the financial year.

Note 16 – Off-balance sheet commitments

- Pledge agreement in connection with the ING loan (Pledge over all cash balances and all shares held in Numericable Group);
- Call option on the shares held by Pechel and Five Arrows in Numericable Group (Duration 20 years). The call option was exercised on June 5, 2014 (see note 20).

Note 17 – Going concern

During the year ended December 31, 2013, the Company had a net current liability position of EUR 1.290.333 (arising mainly from accrued interests of EUR 2.097.307, related to the Company's external debt issued to finance the acquisition of a 6% stake in Numericable Group) and loss of EUR 52.437.157 (down from a gain of EUR 150.770.556 as of December 31, 2012).

As of December 31, 2013, the Company's liabilities consist mainly of external debt amounting to a total of EUR 323.986.270 and shareholder debt amounting to a total of EUR 341.175.696. The current liability position mainly arises from the interest accrued on the Margin Loan.

Subsequently to the initial public offering of the newly formed company Altice S.A., the new direct controlling shareholder of the Company, the former parent company NEXT LP has contributed to Altice S.A. all the existing subordinated debt instruments issued by the Company and subscribed by NEXT L.P.. Altice S.A. has subsequently converted all the instruments into share capital of the Company.

The external debt together with accrued interests has been fully reimbursed in July 2014 (see Notes 11 and 20).

Thus, Management is of the view that the Company will continue to act as a going concern for 12 months from the date of approval of these annual accounts for the year ended December 31, 2013.

Note 18 – Transactions with related parties

Transactions with related parties are disclosed in the notes 4, 5, 6, 8, 10, 13 and 19.

Note 19 – Emoluments granted to the management and to the supervisory bodies and commitments in relation to the retirement pensions for former directors.

As at December 31, 2013, there are no emoluments granted to members of the administrative, managerial and or supervisory bodies in the capacity of the Company nor commitments in relation to the retirement pensions for former directors.

Note 20 - Subsequent events

Acquisition of additional shares in Numericable

On November 18, 2013, the Company entered into an agreement with other major shareholders in the Numericable Group to purchase an additional 10% stake, thus increasing its shareholding to 40% (inclusive of the 2.6% option provided to other shareholders). Regulatory approval has been obtained in January 2014 and this acquisition has triggered a change in control of the Numericable Group. The transaction was consummated on February 4, 2014, with the primary proceeds from Altice S.A.'s IPO and thus the Company became the controlling shareholder of Numericable Group.

Total consideration paid to the vendors for the shares of Numericable Group amounted to EUR 317.046.092. An additional price has been paid during the second quarter of 2014 that amounted to EUR 42.135.133.

On June 5, 2014, a call option on 3.247.612 Numericable Group shares (i.e 2,6% of the share capital) held by Pechel Industries and Five Arrows was exercised at EUR 37,4139 per share, for a total amount of EUR 121.500.000. This transaction wass financed through the increase of the Margin Loan subscribed by the Company with ING.
As a consequence the shareholders agreement entered between Altice France, Pechel and Five Arrows in November 2013 has been terminated.

Agreement between Altice S.A., Carlyle and Cinven

On April 5, 2014, Altice S.A. has entered into an agreement with Carlyle Cable Investment SC (« Carlyle », an affiliate of The Carlyle Group) and CCI (F3) S.a.r.l (« Cinven », and affiliate of Cinven), according to which Altice S.A. would acquire the entirety of their respective stake in the share capital of Numericable Group. This acquisition of approximately 34,6% of Numericable Group's share capital was implemented (i) for up to approximately 14% of the share capital of Numericable Group by a sale of shares at a price of 30,50 EUR per share to be paid in cash and (ii) for the remainder, by a contribution in kind, remunerated in shares of Altice SA (one share of Numericable Group for 0,97 share of Altice).

On July 24, 2014, the transaction was consummated and Altice S.A. contributed to Altice France a 20.6% stake in Numericable Group through a contribution in kind.
The remaining portion will be settled in cash by Altice France at the latest on January 31, 2015.

Following these two transactions, Altice France's stake in the share capital of Numericable increased from 40% to 74.6%. The completion of these transactions was preceded by the granting to Altice France of a waiver from the obligation to launch a tender offer on all the Numericable's shares of common stock by the French Autorité des Marchés Financiers.

These transactions terminate the shareholders' agreement entered into between Altice France, Carlyle and Cinven, in place since the initial public offering of Numericable on the Euronext Paris Market of NYSE Euronext in November 2013.

Company's capital increases

On January 31, 2014, the sole shareholder converted all subordinated debt instruments held against the Company after the planned initial public offering of Altice S.A., in exchange for common shares in the newly listed entity. All outstanding YFPECs (Yield Free Convertible Preferred Equity Certificates) and CPECs (Convertible Preferred Equity Certificates) issued by the Company were converted into 34.117.569 new common shares of the Company at their nominal value for a total amount of EUR 340.875.696 million, including a share premium of EUR 306.758.127.

On May 12, 2014, the Sole Shareholder has decided to increase the share capital of the company for an amount of EUR 302 through the issuance of 302 new shares at EUR 1 per share plus a share premium of EUR 42.199.698. The capital increase has been entirely subscribed by Altice S.A..

On July 3, 2014, the Sole Shareholder has decided to increase the share capital of the company for an amount of EUR 45.608.000 through the issuance of 45.608.000 new shares at EUR 1 per share plus a share premium of EUR 411.392.000. The capital increase has been entirely subscribed by Altice S.A.. and the proceeds have been used to repay the Margin Loan and accrued interest (see Note 11).

On July 23, 2014, the Sole Shareholder has decided to increase the share capital of the company for an amount of EUR 68.500 through the issuance of 68.500 new shares at EUR 1 per share plus a share premium of EUR 671.500. The capital increase has been entirely subscribed by Altice S.A..

On July 24, 2014, the Sole Shareholder has decided to increase the share capital of the company for an amount of EUR 1.000 through the issuance of 1.000 new shares at EUR 1 per share plus a share premium of EUR 778.279.578. The capital increase has been entirely subscribed by Altice S.A. through the contribution of 25.517.936 shares of Numericable Group.

The share capital amounts to EUR 283.469.500 and is divided into 283.469.500 paid shares with a nominal value of EUR 1.

Acquisition of SFR

On April 5, 2014, the supervisory board of Vivendi S.A. approved the offer of Altice S.A. regarding the acquisition of Société du Radiotéléphone S.A. (“SFR”) an affiliate of Vivendi S.A..

On June 23, 2014, Vivendi S.A., Altice S.A. and Numericable Group S.A. announced that they have signed the definitive agreement regarding a combination between SFR and Numericable following a very constructive dialogue with the Employee Works Councils concerned. At closing, Vivendi S.A. will receive EUR 13.500.000.000 (excluding adjustments) and will keep a 20% stake in the new combination, which it could sell at a later stage after a one year lock-up period. It will also receive an earn-out of EUR 750.000.000 million depending on the future financial performance of the new group (EBITDA- Capex at least equal to EUR 2.000.000.000 during one fiscal year).

Exclusive negotiations between Numericable Group and Omer Telecom Limited for the acquisition of Virgin Mobile

On May 16, 2014, Omer Telecom Limited, shareholders of Virgin Mobile have decided to accept the purchase offer of Numericable Group amounting EUR 325.000.000. Both parties have entered into exclusive talk in order to finalize the transaction. Vivendi will participate up to EUR 200.000.000 in the financing of this acquisition.

On June 30, 2014, following constructive talks with employee representatives, the closing agreement to acquire 100% of the capital of Omer Telecom Limited, has been signed with Numericable Group. The agreement is dependent upon obtaining approval from the administrative authorities concerned.
