In deciding whether to purchase Notes in this Offering, investors should pay particular attention to the risks described below as well as to the other information and descriptions of risks contained in this Offering Circular. The occurrence or existence of the events and circumstances described below could have a material adverse effect on our business activity, financial position, results of operations and business prospects. These events or the occurrence or existence of other risks that are currently unknown or considered insignificant could also have negative consequences for the market price of the Notes or the Shares.

Risks related to the semiconductor industry

Our business could suffer from periodic downturns

The semiconductor industry is highly cyclical and has suffered significant economic downturns at various times. These downturns have involved periods of production overcapacity, oversupply, lower prices and lower revenues.

According to trade association data, worldwide sales of all semiconductor products have fluctuated significantly over the past several years. Sales increased in 1995, 1997, 1999 and 2000, but decreased in 1996, 1998 and 2001. In 2001, the decrease was approximately 32%. In 2002, sales increased slightly by 1%. Throughout 2001, 2002 and in the first quarter 2003 there has been substantial downward price pressure, although in 2002 and in the first quarter 2003 we have seen increasing demand in some of our business segments, especially for memory products and for automotive and industrial products. Our revenues for the six month period ended March 31, 2003 were €2,925 million, an increase of 28% from the comparative 2002 period.

There can be no assurance that the market will stabilize or improve in the near term or that the growth rates experienced in the 1999 and 2000 financial years will be attainable again in the coming years. A prolonged downturn in the industry could result in further substantially reduced volumes of sales and prices for our products, severely adversely impacting our results of operations.

Industry overcapacity could require us to lower our prices, particularly for memory products

Both semiconductor companies with their own manufacturing facilities and specialist semiconductor foundries, which are subcontractors that manufacture semiconductors designed by others, have added significant capacity in recent years and are expected to continue to do so. Additions to capacity have in the past sometimes exceeded capacity reductions due to obsolescence, thereby contributing to increases of supply over demand and to downturns in the industry. Average per-Mbit selling prices for our memory products declined by approximately 68% in the 1997 financial year, 65% in the 1998 financial year and 21% in the 1999 financial year before rising by 11% in the 2000 financial year and then decreasing by approximately 70% in the 2001 financial year. This decrease continued by a rate of 30% in the 2002 financial year. This trend of decreasing prices has continued during the first six months of the 2003 financial year. Downturns in the industry, including the current downturn, have severely hurt the profitability of the DRAM industry generally, including our DRAM business. The current downturn may be prolonged and the volatility of the semiconductor industry may lead to future downturns, which could have similar effects. Fluctuations in the rate at which industry capacity is growing relative to the growth rate in demand for semiconductor products may in the future put pressure on our average selling prices and hurt our results of operations.

Risks related to our operations

We may not be able to protect our proprietary intellectual property and may be accused of infringing the intellectual property rights of others

Our success depends on our ability to obtain patents, licenses and other intellectual property rights covering our products and our design and manufacturing processes. The process of seeking patent protection can be long and expensive. Patents may not be granted on currently pending or future applications or may not be of sufficient scope or strength to provide us with meaningful protection or commercial advantage. In addition, effective copyright and trade secret protection may be unavailable or limited in some countries, and our trade secrets may be vulnerable to disclosure or misappropriation by employees, contractors and other persons.

Competitors may also develop technologies that are protected by patents and other intellectual property rights. These technologies may therefore either be unavailable to us or be made available to us only on unfavorable terms and conditions. Litigation, which could cost us financial and management resources, may be necessary to enforce our patents or other intellectual property rights or to defend against claims of infringement of intellectual property rights brought against us by others. For example, Rambus Inc. filed suits against us in the United States and Germany in August 2000, alleging infringement of its intellectual property rights. Although we have prevailed at the trial court in the U.S. proceedings, Rambus has appealed the decision. In January 2003 the U.S. Appeals Court has revised the District Court's decision on 4 claim terms and remanded the case back to the District Court for a jury trial on these 4 claim terms. The German case is still pending in the first instance. The final outcome of these suits may adversely affect our business. We may be forced either to stop producing substantially all of our memory products or to license the underlying technology upon economically unfavorable terms and conditions, and possibly to pay damages for prior use of the Rambus technology at issue. See "General Information — Legal Matters — Litigation" for a description of these proceedings.

Our results may suffer if we are not able to match our production capacity to demand

During periods of industry overcapacity and declining selling prices, such as we are experiencing currently, customers do not generally order products as far in advance of the scheduled shipment date as they do during periods when our industry is operating closer to capacity. We therefore experienced lower levels of backlog during the last downturn, and are again doing so during the current downturn. This development has made it more difficult to forecast production levels and revenues.

We are currently in a period of industry-wide overcapacity and low levels of demand in most of our markets. Despite deflated demand, we have decided to maintain our production capacity, resulting in the risk of under-utilization of some of our facilities. Further erosion in market conditions has resulted in write-offs of inventories and could expose us to further losses on these products.

During periods of increased demand we may not have sufficient capacity to meet customer orders. In particular, we suffered capacity constraints throughout the 2000 financial year. Such constraints affect our customers' ability to deliver products in accordance with their planned manufacturing schedules, making relationships with affected customers difficult. As a result, we lost sales as customers turned to other manufacturers that could satisfy their increased demand. We may face similar difficulties if and when capacity constraints recur.

In the past we have responded to fluctuations in industry capacity and demand by adapting production levels, closing existing production facilities or opening new production facilities. We have incurred high costs as a result. We have also made increasing use of semiconductor foundries to meet higher levels of demand and have incurred higher cost of goods sold as a result. In order to expand or reduce our production capacity in the future, we may have to spend substantial amounts, which could hurt our results of operations.

Our business could suffer from problems with manufacturing

The semiconductor industry is characterized by the introduction of new or enhanced products with short life cycles in a rapidly changing technological environment. We manufacture our products using processes that are highly complex, require advanced and costly equipment and must continuously be

modified to improve yields and performance. Difficulties in the manufacturing process can reduce yields or interrupt production, and we may not be able to deliver products on time or in a cost-effective, competitive manner.

If production at a fabrication facility is interrupted, we may not be able to shift production to other facilities on a timely basis or customers may purchase products from other suppliers. In either case, the loss of revenues and damage to the relationship with our customers could be significant.

While for example the flooding in Dresden, Germany, did not directly affect production at our facilities there, manufacturing processes were hampered by indirect effects of the flooding on our suppliers and our workforce. Because we had advance notice that flooding was likely to occur, we were able to implement contingency plans in order to minimize the effects of the flooding. We may not always be able to foresee such situations and prepare for every contingency.

Increasing our production capacity to reduce our exposure to potential production interruptions would increase our fixed costs. If we do not increase our net sales to meet these higher costs, our operating results could be harmed.

We may at times outsource production of some of our products to third-party suppliers. Using third-party suppliers exposes us to manufacturing problems experienced by those suppliers and may be less cost-effective than manufacturing at our own facilities.

We could lose the value of our investment in our ProMOS joint venture if we cannot reach agreement with the other principal shareholder

We have made substantial investments in our Taiwanese joint venture, ProMOS Technologies, which produces and sells DRAM chips. At March 31, 2003, we owned 26.1 percent of ProMOS' shares, with a book value of €213 million.

In January 2003, the Company announced its intention to liquidate its investment in ProMOS, depending on market conditions, and in accordance with Taiwanese security regulations. The share price of ProMOS' stock could be adversely affected as a result of these events and the corresponding value of our investment in ProMOS could be substantially impaired. The Company does not believe that the liquidation of its ProMOS investment will result in a material adverse effect on the Company's results of operations or financial position.

We have a limited number of suppliers and could suffer shortages if they were to interrupt supply or increase prices

Our manufacturing operations depend upon obtaining deliveries of equipment and adequate supplies of materials on a timely basis. We purchase equipment and materials from a number of suppliers on a just-in-time basis. From time to time, suppliers may extend lead times, limit supply to us or increase prices due to capacity constraints or other factors. Because the equipment that we purchase is complex, it is difficult for us to substitute one supplier for another or one piece of equipment for another. Some materials are only available from a limited number of suppliers. Although we believe that supplies of the materials we use are currently adequate, shortages could occur in critical materials, such as silicon wafers or specialized chemicals used in production, due to interruption of supply or increased industry demand. Our results of operations would be hurt if we could not obtain adequate supplies of quality equipment or materials in a timely manner or if there were significant increases in the costs of equipment or materials.

Our business could suffer if we do not have adequate access to capital

Semiconductor companies that operate their own manufacturing facilities require significant amounts of capital to build, expand, modernize and maintain them. Semiconductor companies also require significant amounts of capital to fund research and development. Net cash used in our investing activities was €2,327 million in the 2000 financial year, €1,813 million in the 2001 financial year, €1,244 million in the 2002 financial year and €663 million for the first six months of the 2003 financial year. Our research and development expenses were €1,025 million in the 2000 financial year, €1,189 million in the 2001 financial year, €1,060 million in the 2002 financial year and €519 million for

the first six months of the 2003 financial year. We reduced capital expenditures substantially during financial year 2001 and financial year 2002. However, we intend to continue to invest heavily in research and development and manufacturing facilities, while continuing the policy of cooperation with other semiconductor companies to share these costs with us.

Under our agreements with the two other investors in the joint venture for our 300-millimeter manufacturing facility in Dresden, each of them has the right to sell its interest in the joint venture to us on September 30, 2005 and every third anniversary thereafter. We are entitled to purchase such interests once every three years, commencing March 31, 2004. Each of the other investors also has the right to sell its interest to us upon the occurrence of specified events, such as capital increases it does not agree to, the admission of new investors, substantial budget overruns, or our ceasing to exercise control over the joint venture. If both of the other investors were to elect to sell their interests to us, the total purchase price we would have to pay would be an amount equal to the capital contributed by these investors, plus interest. As of September 30, 2002, this amount would have been approximately €218 million.

In the future, we may not be able to raise the amount of capital required for our business on acceptable terms due to a number of factors, such as general market and economic conditions, inadequate cash flow from operations or unsuccessful asset management. Our business may be hurt if we are not able to make expected capital expenditures and meet expected research and development expenses.

For a description of certain financial arrangements entered into since the end of March 31, 2003, see "Infineon Technologies AG — Operating and Financial Review".

The Siemens Group is our largest customer and our results could suffer if it were to buy fewer semiconductors from us

In the 2000, 2001 and 2002 financial years, 10%, 14% and 12%, respectively, of our consolidated net sales resulted from direct sales to the Siemens Group. An additional 5%, 2% and 2%, respectively, of our net sales in each of the three years resulted from sales through the Siemens Group's sales organization for resale to third parties. For the six months of financial year 2003 sales to the Siemens Group were 14% of net sales. We expect the Siemens Group to continue to be one of our largest customers, but we cannot assure you that it will continue to purchase as many semiconductors from us as it has in the past. Our results could be harmed if the Siemens Group purchases fewer semiconductors from us in the future and other customers do not increase their orders to make up the shortfall.

We rely on our strategic partners, and provisions in our agreements with them could allow them to terminate those agreements if our ownership changes

As part of our strategy, we have entered into a number of long-term strategic alliances with leading industry participants, both to manufacture semiconductors and to develop new manufacturing process technologies and products. If our strategic partners encounter financial difficulty, they may no longer be able to participate in our alliances. Our business could be hurt if we were unable to continue many of our alliances.

Some of the agreements governing our strategic alliances allow our partner to terminate the agreement if our equity ownership changes so that a third party other than the Siemens Group gains control of our company or of a significant portion of our company's shares. Our business could be harmed if any of our strategic partners were to discontinue its participation in a strategic alliance.

Our business could suffer as a result of volatility in different parts of the world

We operate globally, with production facilities in 12 countries. In the 2002 financial year, 74% of our revenues were generated outside Germany and 55% of our revenues were generated outside Europe. For the first six months of our 2003 financial year, 75% of our revenues were generated outside of Germany and 56% of our revenues were generated outside Europe. Our business is therefore subject to risks involved in international business, including:

- negative economic developments in foreign economies and instability of foreign governments, including the threat of war or civil unrest;

- changes in laws and policies affecting trade and investment; and
- varying practices of the regulatory, tax, judicial and administrative bodies in the jurisdictions where we operate.

Substantial changes in any of these conditions could have an adverse effect on our business and results of operations. For example, the economic slowdown in Asia in 1997 and 1998, and the worldwide economic downturn during 2001 and 2002, reduced demand for semiconductors, and we suffered losses due to the resulting fall in sales volumes and semiconductor prices. Our results of operations could also be hurt if demand for the products made by our customers decreases due to adverse economic conditions in any of the regions where they sell their own products.

The recent outbreak of Severe Acute Respiratory Syndrome (“SARS”) may have an adverse effect on the economies and financial markets of certain Asian countries

In March 2003, the Guangdong Province of China, Hong Kong, Singapore and certain other Asian countries encountered an outbreak of SARS, a highly contagious form of atypical pneumonia. While the long-term impact of the SARS outbreak is unclear at this time, the prolonged existence of the SARS outbreak, or the perception that the SARS outbreak has not been contained, may have an adverse effect on the trade and tourism industries as well as on the economies and financial markets of certain countries in Asia. Any economic downturn resulting from the SARS outbreak may have an adverse effect on our business in the Asian region and as a result may adversely affect our results of operations.

Our business can be hurt by changes in exchange rates

Our results of operations can be hurt by changes in exchange rates, particularly between the Euro and the U.S. dollar and the Japanese yen. Many of our receivables are denominated in U.S. dollars, while our payables are denominated largely in Euro. In addition, the balance sheet impact of currency translation adjustments has been, and may continue to be, material.

Foreign currency derivative and transaction gains totaled €184 million in the 2000 financial year and €34 million in the 2001 financial year. We had foreign currency derivative and transaction losses of €16 million in the 2002 financial year. For the first six months of the 2003 financial year, we had currency derivative and transaction losses of €21 million.

Since its introduction on January 1, 1999, the Euro has declined substantially against the U.S. dollar, ranging from a high of €1.00 = \$1.1812 on January 1, 1999 to a low of €1.00 = \$0.8270 on October 25, 2000. The relative weakness of the euro against the dollar positively affected our revenues and results of operations in the 2000, 2001 and 2002 financial years. In the second half of the 2002 financial year, the dollar has fallen against the Euro and most other major currencies and this trend continued since the end of the 2002 financial year. At May 27, 2003, the exchange rate was €1.00 = \$1.1901. Further weakening of the dollar against the Euro could negatively affect our results of operations.

Environmental laws and regulations may expose us to liability and increase our costs

Our operations are subject to many environmental laws and regulations wherever we operate governing, among other things, air emissions, wastewater discharges, the use and handling of hazardous substances, waste disposal and the investigation and remediation of soil and ground-water contamination. A proposal of the European Commission, which has been, in principle, approved by the European Parliament, and legislation proposed in various countries, including Germany, would result in “take-back” obligations of manufacturers and/or the responsibility of manufacturers for the financing of the collection, recovery and disposal of electrical and electronic equipment. A further proposal of the European Commission forming part of the package submitted provides for a ban on the use of lead and some flame retardants in manufacturing electronic components. Those proposals, if adopted, could adversely effect our manufacturing costs or product sales by forcing us to change production processes or use more costly materials. Our customers may require us to conform to the proposed new standards in advance of their adoption by the European Commission.

As with other companies engaged in similar activities, we face inherent risks of environmental liability in our current and historical manufacturing activities. Costs associated with future additional environmental compliance or remediation obligations could adversely effect our business.

Reductions in the amount of government subsidies we receive or demands for repayment could increase our reported expense or harm our ability to fund our capital expenditures

As is the case with many other semiconductor companies, our reported expenses have been reduced in recent years by various subsidies received from governmental entities. In particular, we have received, and expect to continue to receive, subsidies for investment projects, in particular for the construction and equipment of our facilities in Dresden, as well as for research and development projects. We recognized governmental subsidies in an aggregate amount of €115 million in the 2000 financial year, €81 million in the 2001 financial year and €93 million in the 2002 financial year.

As the general availability of government funding is outside our control, we cannot assure you that we will continue to benefit from such support, that sufficient alternative funding would be available if necessary or that any such alternative funding would be provided on terms as favorable to us as those we currently receive.

The application for and implementation of such subsidies often involves compliance with extensive regulatory requirements, including, in the case of subsidies to be granted within the European Union, notification to the European Commission of the contemplated grant prior to disbursement. In particular, establishment of compliance with project-related ceilings on aggregate subsidies defined under European Union law often involves highly complex economic evaluations. If we fail to meet applicable formal or other requirements, we may not be able to receive the relevant subsidies or may be obliged to repay them, which could have a material adverse effect on our business.

The terms of certain of the subsidies we have received impose conditions which may limit our flexibility to utilize the subsidized facility as we deem appropriate, to divert equipment to other facilities, to reduce employment at the site, or to use related intellectual property outside the European Union. This could impair our ability to operate our business in the manner we believe is most cost effective.

We might be faced with product liability or warranty claims

Despite extensive quality assurance measures, there remains a risk that defects may occur in our products. The occurrence of such defects could give rise to warranty claims or to liability for damages caused by such defects and for consequential damages and could, moreover, impair the market's acceptance of our products. Both could have a material adverse effect on our business and financial condition. Also, customers have from time to time notified us of potential contractual warranty claims in respect of products supplied by us, and may do so in the future. See "General Information — Legal Matters — Other Matters" for a description of these and other proceedings.

We are being investigated for potential antitrust violations in the DRAM industry

Our North American subsidiary received a grand jury subpoena from the U.S. District Court for the Northern District of California on June 19, 2002, seeking information regarding a Department of Justice probe into possible U.S. antitrust violations in the DRAM industry. Since then, a number of class action lawsuits have been filed against us and other DRAM manufacturers alleging violations of the Sherman Act relating to the sale and pricing of memory products. All of these cases have been stayed pending a decision from the Joint Panel on Multidistrict Litigation on consolidation. In addition, a number of cases have been filed in California alleging violation of the Cartwright Act; those are also subject to a stay. In April 2003, we received a request for information from the European Commission (the "Commission") to enable the Commission to assess the compatibility with the Commission rules on competition of certain practices of which the Commission has become aware in the European market of DRAM memory products. The Company is in the process of responding. We are unable to predict the outcome of these matters.

We may be unable to successfully integrate businesses we acquire

We are increasingly engaged in acquiring other businesses, such as our acquisition of Ericsson Microelectronics in September 2002. We intend to continue acquisitions of, and investments in, other

companies in the future. We face risks resulting from the expansion of our operations through acquisitions. These include the risk that we might be unable to integrate new businesses with our culture and strategies. We also cannot be certain that we will be able to achieve the benefits we expect from a particular acquisition or investment. For example, in April 2001 we acquired Ardent Technologies, a California-based company engaged in internet-based LAN switching. During the second half of 2001, we changed our view of the importance of this market to our business and as a component of our 2001 restructuring plan, terminated a significant number of the Ardent employees, abandoned certain acquired technology and significantly reduced future R&D expenditures for the Ardent business. Acquisitions may also strain our managerial and operational resources, as the challenge of managing new operations may divert our managers and employees from monitoring and improving operations in our existing businesses. Our business, financial condition and results of operations may suffer if we fail to coordinate our resources effectively to manage both our existing businesses and any businesses we acquire.

Siemens may use all of the intellectual property rights it transferred to us at the formation of our company

In connection with our formation as a legal entity, Siemens transferred approximately 20,000 patent rights to us. Under the terms of this transfer and related agreements, however, Siemens retained the right to use these patent rights within the scope of its business for an unlimited period of time, subject to various restrictions in the case of patents relating to information handling systems.

Siemens has entered into a non-competition agreement with us. Under this agreement, Siemens has agreed that no member of the Siemens Group will engage in or carry out any research or development, production or distribution of semiconductor devices or license or sublicense any of our patents to any party for use in research or development, production or distribution of semiconductor devices. The agreement is subject to certain exceptions relating to such matters as application-specific semiconductor devices designed specifically for use in or in connection with Siemens Group products, spare parts for those products, and the application in equipment and systems of circuitry from patents in which both we and Siemens have rights, as well as to various de minimis exceptions.

We have also agreed with Siemens not to carry out research or development, production or distribution of certain types of optoelectronic semiconductor devices. The OSRAM Opto joint venture, in which we sold our interest to OSRAM GmbH in September 2001, produces optoelectronic semiconductor devices. The agreement provides for certain standard exceptions, including the procurement of such devices for incorporation into chipsets or systems for sale as integrated parts of such chipsets or systems.

These non-competition restrictions will remain in force until March 2004 or two years following the point at which Siemens' direct or indirect equity ownership of our company drops to 50% or less, whichever occurs earlier. After that time, should it ever decide to re-enter the semiconductor business, Siemens could use these patent rights to compete against us.

Siemens exercises partial control over some of our intellectual property rights

Siemens has retained the right to assert infringement claims against third parties with respect to approximately 15% of the 20,000 patent rights that it transferred to us, insofar as these patents relate to the technical field of the Siemens Group's business activities. Siemens has agreed that it will not exercise this right against any of our customers in respect of any part of such customer's products that contains one of our products, unless this right is asserted for defensive purposes. Nevertheless, we can provide no assurance that these safeguards will be sufficient to protect all of our customers against claims by Siemens with respect to those of their products that incorporate technology covered by these patents. It may therefore be difficult for us to sell our products or grant licenses of these patents to third parties, and they may not be able to use our products without infringing these patents or incurring license fees to Siemens.

The Siemens Group companies may have conflicts of interest that affect our ongoing business arrangements with them

We have extensive contractual and other business relationships with the Siemens Group, including reliance on the Siemens Group for some of our administrative functions, particularly the

Siemens Group's information technology systems. Since becoming an independent company, we have built up certain of our own administrative functions. We also lease office and production space from the Siemens Group. We may also engage in significant transactions from time to time with the Siemens Group. Although we expect that any such transactions and agreements will be on terms no less favorable to us than we could obtain in comparable arrangements with unaffiliated third parties, conflicts of interest may arise between us and the Siemens Group.

Sales of substantial number of shares in the public market could adversely affect the market price of the shares and ADSs

Siemens AG has the right, directly or indirectly, to direct the disposition of up to 286,292,363 shares of our Company, representing approximately 39.7% of the currently issued shares of our Company. These shares are held by Siemens Nederland N.V., a wholly-owned subsidiary of Siemens AG, and by Wachovia Trust Company, a trust which holds the shares for the benefit of Siemens AG. Siemens has announced publicly its intention to divest its ownership interest in our company through direct or indirect sales, as and when business and market conditions permit. Any such disposal could occur at any time or from time to time. Sales of substantial numbers of the shares of our company controlled by Siemens, either in the public market or in private transactions, or the perception that such sales may occur, could adversely affect the market price of the shares and ADSs and could adversely affect our ability to raise capital through subsequent offerings of equity.

Such subordination shall mean that in any event of liquidation, bankruptcy or other proceedings to avoid bankruptcy any payment which might become due under the Notes shall be made only after all claims against the Issuer which are senior and not subordinated have been satisfied. Any right to set-off claims arising from the Notes against claims of the Issuer shall be excluded. The exercise of the Conversion Right (§ 7(1)) in reliance on § 194(1) sentence 2 of the German Stock Corporation Act (*Aktiengesetz*) shall not be affected by the subordination.
- (3) *Negative Pledge.* So long as any Notes shall remain outstanding, but only up to the time at which all amounts payable to the Noteholders under the Notes in accordance with these Conditions of Issue have been placed at the disposal of the Principal Paying Agent (§ 18(1)) and all obligations pursuant to § 7 have been fulfilled, the Issuer undertakes not to secure any subordinated Capital Market Indebtedness, including any guarantees or other indemnities assumed in respect thereof, upon any of its assets without at the same time providing that the Noteholders share equally and rateably in such security. Eine nach Satz 1 zu leistende Sicherheit kann auch zugunsten eines Treuhänders der Anleihegläubiger bestellt werden.

- (4) *Kapitalmarktverbindlichkeiten.* **“Kapitalmarktverbindlichkeiten”** im Sinne dieser Anleihebedingungen bedeutet jede Verbindlichkeit, Geldbeträge zurückzuzahlen, die im Wege der Ausgabe von Schuldverschreibungen oder anderer Wertpapiere, die an einer Börse oder an einem anderen organisierten Markt zum Handel zugelassen oder gehandelt werden können, aufgenommen wurden; ausgenommen hiervon sind, soweit vorstehend nicht ausdrücklich etwas anderes geregelt ist, außerbilanzielle Vermögensgegenstände und Verbindlichkeiten.

§ 3

(Verzinsung)

- (1) *Zinssatz.* Die Schuldverschreibungen werden ab einschließlich dem 5. Juni 2003 (**“der Ausgabetag”**) mit jährlich 5% auf ihren Nennbetrag verzinst. Die Zinsen sind jährlich nachträglich am 5. Juni eines jeden Jahres (jeweils ein **“Zinszahlungstag”**), erstmals am 5. Juni 2004, in Höhe von €2.500 je Schuldverschreibung zahlbar. Letzter Zinszahlungstag ist der Endfälligkeitstermin (§ 4(1)) (sofern nicht die Schuldverschreibungen zuvor zurückgezahlt, gewandelt oder zurückgekauft und entwertet wurden). Die Verzinsung der Schuldverschreibungen endet mit Beginn des Tages, an dem die Schuldverschreibungen zur Rückzahlung fällig werden. Im Falle der Ausübung des Wandlungsrechtes (§ 7(1)) hinsichtlich einer Schuldverschreibung endet die Verzinsung dieser Schuldverschreibung mit Ablauf des Tages, der dem letzten Zinszahlungstag vor dem Ausübungstag (§ 8(4)) unmittelbar vorausgeht, bzw., sofern es bis dahin keinen Zinszahlungstag gegeben hat, am Ausgabetag.
- (2) *Verzug.* Sofern die Anleiheschuldnerin die Schuldverschreibungen nicht bei Fälligkeit zurückzahlt, fallen vom Zahlungstag (einschließlich) bis zum Tag der tatsächlichen Rückzahlung der Schuldverschreibungen (ausschließlich) Zinsen in Höhe des gesetzlich festgelegten Satzes für Verzugszinsen auf den Nennbetrag an.
- (3) *Zinstagequotient.* Sind Zinsen für einen Zeitraum von weniger als einem Jahr zu berechnen, erfolgt die Berechnung auf der Grundlage der

Any security which is to be provided pursuant to sentence 1 may also be provided to a person acting as trustee for the Noteholders.

- (4) *Capital Market Indebtedness.* For the purpose of these Conditions of Issue **“Capital Market Indebtedness”** means any obligation to repay money that is borrowed through the issuance of bonds, notes or other debt securities which are capable of being listed or traded on a stock exchange or other recognised securities market; except as expressly provided above, it does not include any off-balance sheet assets and obligations.

§ 3

(Interest)

- (1) *Interest Rate.* The Notes shall bear interest on their Principal Amount at the rate of 5% per annum from and including June 5, 2003 (the **“Issue Date”**). Interest shall be payable annually in arrears in the amount of €2,500 per Note on June 5 of each year (each a **“Coupon Date”**), commencing on June 5, 2004. The last Coupon Date shall be the Maturity Date (§ 4(1)) (unless the Notes have previously been redeemed, converted, repurchased or cancelled). Interest shall cease to accrue as of the beginning of the date on which the Notes become due for redemption. In the event of an exercise of the Conversion Right (§ 7(1)) in respect of any Note, interest shall cease to accrue on that Note as of the end of the day immediately preceding the last Coupon Date prior to the Conversion Date (§ 8(4)) or, if there was no Coupon Date, the Issue Date.
- (2) *Late Payments of Principal.* Should the Issuer fail to redeem the Notes when due, interest shall continue to accrue at the default rate of interest established by law on their Principal Amount from the payment date (inclusive) until (but not including) the date of actual redemption of the Notes.
- (3) *Day Count Fraction.* If interest is to be calculated for a period of less than one year, it shall be calculated on the basis of the actual

§ 4

(Tilgung am Endfälligkeitstermin durch Zahlung eines Geldbetrages; Rückkauf; Vorzeitige Rückzahlung)

- (1) *Tilgung durch Zahlung eines Geldbetrages.* Die Anleiheschuldnerin wird am 5. Juni 2010 (dem "**Endfälligkeitstermin**") die Schuldverschreibungen durch Zahlung eines Geldbetrages in Höhe des Nennbetrages zuzüglich der bis zum Endfälligkeitstermin (ausschließlich) angefallenen Zinsen tilgen, sofern nicht die jeweilige Schuldverschreibung vorher zurückgezahlt, gewandelt oder zurückerworben und entwertet worden ist.
- (2) *Rückkauf.* Die Anleiheschuldnerin und/oder Infineon Technologies AG, München ("**Infineon Technologies AG**" oder "**Garantin**") und/oder ein mit diesen im Sinne des § 15 AktG verbundenes Unternehmen sind berechtigt, jederzeit Schuldverschreibungen im Markt oder auf andere Weise zu kaufen. Zurückgekauft Schuldverschreibungen können entwertet, gehalten oder wieder veräußert werden.
- (3) *Vorzeitige Rückzahlung nach Wahl der Anleiheschuldnerin infolge der Kursentwicklung der Aktien.* Die Anleiheschuldnerin ist berechtigt, die ausstehenden Schuldverschreibungen insgesamt, nicht jedoch teilweise, nach Bekanntmachung gemäß § 19, die mindestens 20 und höchstens 40 Tage vor dieser Rückzahlung zu erfolgen hat, vorzeitig zum Nennbetrag zuzüglich hierauf bis zum Rückzahlungstag (ausschließlich) aufgelaufener Zinsen zurückzuzahlen, wenn die XETRA-Notierung (wie nachstehend definiert) der Aktien (§ 7(1)) an 15 Handelstagen (jeweils ein "**Börsenhandelstag**") innerhalb eines Zeitraums von 30 aufeinanderfolgenden Börsenhandeltagen an der Frankfurter Wertpapierbörse (die "**FWB**") beginnend am oder nach dem 5. Juni 2006 125% des Wandlungspreises gemäß § 7(1) übersteigt. Die Bekanntmachung zur vorzeitigen Rückzahlung ist unwiderruflich und muß innerhalb von fünf Geschäftstagen (§ 5(3)) nach dem jeweils letzten Tag des in Satz 1 genannten Zeitraums von 30 aufeinanderfolgenden Börsenhandeltagen erklärt werden; nach Ablauf dieser Frist von fünf Geschäftstagen erlischt bezüglich dieses Zeitraums von 30 aufeinanderfolgenden Börsenhandeltagen das Kündigungsrecht. Fällt das Ende der Kündigungsfrist in einen Nichtausübungszeitraum (§ 7(4)), so wird die Kündigung erst fünf Geschäftstage nach dem Ende des betreffenden Nichtausübungszeitraumes (§ 7(4)) wirksam. Die Bekanntmachung gemäß Satz 1 muß den Rückzahlungstag und den Gesamtnennbetrag der zurückzuzahlenden Schuldverschreibungen bestimmen und die Tatsachen angeben, die das

§ 4

(Redemption at Maturity for Cash; Repurchase; Early Redemption)

- (1) *Redemption at Maturity for Cash.* The Issuer shall redeem the Notes for cash at their Principal Amount together with interest accrued thereon until (but not including) the date of such redemption on June 5, 2010 (the "**Maturity Date**") unless they have previously been redeemed, converted or repurchased and cancelled.
- (2) *Repurchase.* The Issuer and/or Infineon Technologies AG, Munich ("**Infineon Technologies AG**" or the "**Guarantor**"), and/or any of their affiliates within the meaning of § 15 German Stock Corporation Act (*Aktiengesetz*) shall be entitled at any time to purchase Notes in the market or otherwise. Such purchased Notes may be cancelled, held or resold.
- (3) *Early Redemption at the Option of the Issuer for Reasons of Share Price.* The Issuer may at its option, on giving not less than 20 nor more than 40 days' notice by publication in accordance with § 19, redeem the Notes outstanding in whole, but not in part, at their Principal Amount together with interest accrued thereon until (but not including) the date of redemption, if the XETRA-Quotation (as defined below) of the Shares (§ 7(1)) on 15 trading days (each a "**Stock Exchange Trading Day**") on the Frankfurt Stock Exchange (the "**FSE**") during a period of 30 consecutive Stock Exchange Trading Days commencing on or after June 5, 2006 exceeds 125% of the Conversion Price pursuant to § 7(1). Such notice of early redemption shall be irrevocable and shall be given within five Business Days (§ 5(3)) after the respective last day of the period of 30 consecutive Stock Exchange Trading Days referred to in sentence 1; upon the expiration of such period of five Business Days such right shall in respect of such period of 30 consecutive Stock Exchange Trading Days expire. If the end of the notice period falls within an Excluded Period (§ 7(4)), then the notice shall become effective only five Business Days after the end of that Excluded Period (§ 7(4)). The notice pursuant to sentence 1 shall determine the date of redemption, the aggregate principal amount of Notes to be redeemed and state the facts which establish the right of the Issuer to redeem the Notes.

“XETRA-Notierung” an einem Tag ist der Schlußkurs in XETRA derjenigen Aktien (§ 7(1)), die zum Zeitpunkt der Kursfeststellung uneingeschränkt dividendenberechtigt sind, oder, falls kein Schlußkurs festgestellt wird, der Einheitskurs an der FWB, oder, falls kein Einheitskurs festgestellt wird, der letzte veröffentlichte Börsenkurs für die Aktien (§ 7(1)) an der FWB an diesem Tag, oder, falls kein Börsenkurs veröffentlicht wird, das Mittel der letzten Brief- und Geldkurse. Falls Brief- und Geldkurse nicht verfügbar sind, bestimmt die Hauptumtauschstelle (§ 18(1)) die XETRA-Notierung auf der Grundlage derjenigen Informationen, die sie für maßgeblich hält. Falls bei einer Ersetzung (§ 7(5)) die Neuen Aktien (§ 7(5)) nicht in XETRA oder an der FWB gehandelt werden oder falls das Handelsvolumen in XETRA oder an der FWB nicht das höchste Handelsvolumen dieser Neuen Aktien (§ 7(5)) in einem elektronischen Handelssystem oder an einer Wertpapierbörse während einer der Zeiträume in diesen Anleihebedingungen darstellt, für den XETRA-Notierungen oder Kurse der Aktien (§ 7(1)) an der FWB von Bedeutung sind, wird das elektronische Handelssystem oder die Wertpapierbörse mit dem höchsten Handelsvolumen der Neuen Aktien (§ 7(5)) anstelle von XETRA und FWB herangezogen und die Begriffe XETRA-Notierung, FWB und Börsenhandelstag werden durch die entsprechenden Begriffe ersetzt, die in einem solchen anderen elektronischen Handelssystem oder an einer solchen anderen Wertpapierbörse benutzt werden, und jede Bezugnahme auf XETRA-Notierung, FWB oder Börsenhandelstag gilt danach als Bezugnahme auf diese entsprechenden Begriffe.

- (4) *Recht der Anleiheschuldnerin zur vorzeitigen Rückzahlung wegen eines geringfügigen ausstehenden Nennbetrages.* Wenn zu irgendeinem Zeitpunkt der auf die Schuldverschreibungen ausstehende Gesamtnennbetrag (einschließlich solcher ausstehender Schuldverschreibungen, die gemäß § 20 begeben wurden) unter €140.000.000 Gesamtnennbetrag (einschließlich solcher Schuldverschreibungen, die gemäß § 20 begeben wurden) fällt, ist die Anleiheschuldnerin berechtigt, durch Bekanntmachung gemäß § 19 mit einer Frist von mindestens 20 und höchstens 40 Tagen, die verbliebenen Schuldverschreibungen insgesamt, jedoch nicht teilweise, zu ihrem Nennbetrag zuzüglich der bis zum Tag der Tilgung (ausschließlich) aufgelaufenen Zinsen zurückzahlen. Die Bekanntmachung ist unwiderruflich und hat den Tag der vorzeitigen Rückzahlung zu bestimmen.

§ 5

(Währung; Zahlungen)

- (1) *Währung.* Sämtliche Zahlungen auf die Schuldverschreibungen, einschließlich gegebenenfalls zu zahlender Beträge gemäß § 4, § 9(2) und § 10(1), werden in Euro geleistet.

“XETRA-Quotation” on any day means the closing quotation in XETRA of the Shares (§ 7(1)) entitled at the time of fixing of the quotation to full dividend rights or, in the case that no such quotation is reported, the official quotation (*Einheitskurs*) on the FSE or, in the case that no official quotation is reported, the last reported per share sale price on such day of the Shares (§ 7(1)) on the FSE or, if no sale price is reported, the average of the last bid and ask prices. If no bid and ask prices are available, the Principal Conversion Agent (§ 18(1)) shall determine the XETRA-Quotation on the basis of such information as it considers appropriate. If in the event of a Substitution (§ 7(5)) the New Shares (§ 7(5)) are not traded in XETRA or on the FSE or if the trading volume in XETRA or on the FSE does not represent the highest trading volume of the New Shares (§ 7(5)) on an electronic trading system or a stock exchange during any of the periods in these Conditions of Issue for which the XETRA-Quotations or Share (§ 7(1)) prices on the FSE are relevant then the electronic trading system or stock exchange with the highest trading volume of the New Shares (§ 7(5)) shall be substituted for XETRA or the FSE and the terms XETRA-Quotation, FSE and Stock Exchange Trading Day shall be replaced by the corresponding terms used on such other electronic trading system or stock exchange and any reference to XETRA-Quotation, FSE or Stock Exchange Trading Day shall thereafter be deemed to refer to those corresponding terms.

- (4) *Early Redemption at the Option of the Issuer for Reasons of Minimal Outstanding Principal Amount.* If at any time the aggregate principal amount of Notes outstanding (including any Notes outstanding pursuant to § 20) falls below €140,000,000 in aggregate principal amount (including any Notes issued pursuant to § 20), the Issuer is entitled, by giving not less than 20 nor more than 40 days' notice by publication in accordance with § 19, to redeem the remaining Notes in whole, but not in part, at their Principal Amount together with interest accrued thereon until (but not including) the date of redemption. Such notice will be irrevocable and shall state the date of early redemption.

§ 5

(Currency; Payments)

- (1) *Currency.* All payments on the Notes including amounts payable pursuant to § 4, § 9(2) and § 10(1) shall be made in Euro.

- (2) *Zahlungen von Kapital und Zinsen.* Zahlungen von Kapital und Zinsen auf die Schuldverschreibungen erfolgen am jeweiligen Zahlungstag an die Hauptzahlstelle (§ 18(1)) zur Weiterleitung an das Clearing System oder dessen Order in Euro zwecks Gutschrift auf den Konten der jeweiligen Kontoinhaber bei dem Clearing System. Zahlungen der Anleiheschuldnerin oder der Garantin an das Clearing System oder an dessen Order befreien die Anleiheschuldnerin und die Garantin in Höhe der geleisteten Zahlungen von ihren Verbindlichkeiten aus den Schuldverschreibungen und der Garantie (§ 14(1)).
- (3) *Geschäftstage.* Ist ein Fälligkeitstag für Zahlungen auf eine Schuldverschreibung kein Geschäftstag, so wird die betreffende Zahlung erst am nächstfolgenden Geschäftstag geleistet, ohne daß wegen dieser Zahlungsverzögerung Zinsen gezahlt werden. Ein **“Geschäftstag”** ist jeder Tag (mit Ausnahme von Samstagen und Sonntagen), an dem das Clearing System sowie Geschäftsbanken in München und in Frankfurt am Main für den Geschäftsverkehr geöffnet sind und Zahlungen in Euro abwickeln.
- (4) *Zahlungstag/Fälligkeitstag.* Im Sinne dieser Anleihebedingungen ist ein **“Zahlungstag”** der Tag, an dem, gegebenenfalls aufgrund einer Verschiebung gemäß § 5(3), eine Zahlung tatsächlich zu leisten ist, und ein **“Fälligkeitstag”** ist der in diesen Anleihebedingungen vorgesehene Zahlungstermin ohne Berücksichtigung einer solchen Verschiebung.
- (5) *Hinterlegung bei Gericht.* Die Anleiheschuldnerin kann Beträge an Zinsen und Kapital, sowie gegebenenfalls nach § 4, § 9(2) und § 10(2) zu zahlende Beträge, auf die von einem Anleihegläubiger innerhalb von zwölf Monaten nach dem jeweiligen Fälligkeitstag nicht Anspruch erhoben worden ist, und die Garantin kann gegebenenfalls unter der Garantie (§ 14(1)) zu zahlende Beträge bei dem Amtsgericht in München hinterlegen. Soweit die Anleiheschuldnerin bzw. die Garantin auf das Recht zur Rücknahme der hinterlegten Beträge verzichtet, erlöschen die betreffenden Ansprüche der Anleihegläubiger.
- (2) *Payments of Principal and Interest.* Payments of principal of, and interest on, the Notes shall be made on the relevant payment date to the Principal Paying Agent (§ 18(1)) for on-payment to the Clearing System or to its order in Euro for credit to the respective accountholders of the Clearing System. All payments made by the Issuer or the Guarantor to the Clearing System or to its order shall discharge the liability of the Issuer and the Guarantor under the Notes and the Guarantee (§ 14(1)) to the extent of the sums so paid.
- (3) *Business Days.* If any due date for payments in respect of any Notes is not a Business Day, such payment will not be made until the next following Business Day, and no interest shall be paid in respect of the delay in such payment. A **“Business Day”** shall be any day (with the exception of Saturdays and Sundays) on which the Clearing System and commercial banks in Munich and Frankfurt am Main are open for business and settle payments in Euro.
- (4) *Payment Date/Due Date.* For the purposes of these Conditions of Issue, **“payment date”** means the day on which the payment is actually to be made, where applicable as adjusted in accordance with § 5(3), and **“due date”** means the payment date provided for herein, without taking account of any such adjustment.
- (5) *Depositing in Court.* The Issuer may deposit amounts due pursuant to § 4, § 9(2) and § 10(1), if any, and principal and interest not claimed by a Noteholder within twelve months after the respective due dates, and the Guarantor may deposit amounts due under the Guarantee (§ 14(1)), if any, with the Local Court (*Amtsgericht*) in Munich. To the extent the Issuer or the Guarantor waives its right to withdraw such deposit, the relevant claims of the Noteholders shall cease.

§ 6
(Steuern)

Alle Zahlungen der Anleiheschuldnerin in bezug auf die Schuldverschreibungen und der Garantin in bezug auf die Garantie (§ 14(1)) werden ohne Abzug oder Einbehalt gegenwärtiger oder zukünftiger Steuern, Abgaben oder amtlicher Gebühren gleich welcher Art, die von oder in den Niederlanden oder der Bundesrepublik Deutschland oder von oder für Rechnung einer dort zur Steuererhebung ermächtigten Gebietskörperschaft oder Behörde durch Abzug oder Einbehalt an der Quelle auferlegt, erhoben oder eingezogen werden, geleistet, es sei denn, ein solcher Abzug oder Einbehalt ist gesetzlich vorgeschrieben.

§ 6
(Taxes)

All amounts payable by the Issuer in respect of the Notes and by the Guarantor in respect of the Guarantee (§ 14(1)) will be made free and clear of, and without deduction or withholding for or on account of, any present or future taxes, duties or governmental charges of any nature whatsoever imposed, levied or collected by way of deduction or withholding at source by or in or on behalf of The Netherlands or the Federal Republic of Germany or by or on behalf of any political subdivision or authority thereof or therein having power to tax, unless such deduction or withholding is required by law.

§ 7

(Wandlungsrecht; Beendigung der Verpflichtungserklärung; Neue Verpflichtungserklärung)

- (1) *Wandlungsrecht.* Infineon Technologies AG hat sich am 2. Juni 2003 gegenüber der JPMorgan Chase Bank zugunsten der Anleihegläubiger verpflichtet (die "**Verpflichtungserklärung**"), jedem Anleihegläubiger das Recht zu gewähren (das "**Wandlungsrecht**"), jede Schuldverschreibung gemäß den Bestimmungen dieses § 7 jederzeit während des Ausübungszeitraums (§ 7(2)) ganz, nicht jedoch teilweise, zum Wandlungspreis von €10,2346 pro Aktie (der "**Wandlungspreis**") in 4.885,3888 auf den Namen lautende nennwertlose Stückaktien (das "**Wandlungsverhältnis**") der Infineon Technologies AG, jeweils mit einem auf die einzelne Stückaktie entfallenden anteiligen Betrag des Grundkapitals von €2 (die "**Aktien**"), zu wandeln, wobei der Wandlungspreis und das Wandlungsverhältnis Anpassungen nach § 12 und § 15(3) unterliegen können. Die Lieferung der Aktien hat in Übereinstimmung mit § 9(1) zu erfolgen. Werden durch denselben Anleihegläubiger gleichzeitig mehrere Schuldverschreibungen gewandelt, errechnet sich die Anzahl der infolge der Wandlung zu liefernden Aktien auf der Grundlage des Gesamtnennbetrages der von diesem Anleihegläubiger gleichzeitig gewandelten Schuldverschreibungen. Verbleibende Bruchteile von Aktien werden nach § 9(2) in Geld ausgeglichen. Kopien der Verpflichtungserklärung werden bei der Hauptzahlstelle (§ 18(1)) zur kostenlosen Ausgabe bereitgehalten. Die Verpflichtungserklärung ist ein Vertrag zugunsten der Anleihegläubiger als begünstigte Dritte im Sinne des § 328(1) BGB, der jedem Anleihegläubiger das Recht gewährt, Erfüllung unmittelbar von der Infineon Technologies AG zu verlangen und die Verpflichtungserklärung unmittelbar gegen die Infineon Technologies AG durchzusetzen. Die Verpflichtungserklärung steht unter der auflösenden Bedingung (§ 158(2) BGB) einer Ersetzung (§ 7(5)). Im Falle einer Ersetzung (§ 7(5)) endet die Verpflichtungserklärung und wird durch die Neue Verpflichtungserklärung (§ 7(5)) ersetzt; dementsprechend endet das Recht eines Anleihegläubigers zum Erhalt von Aktien bei Wandlung und wird durch das Recht zum Erhalt von Neuen Aktien (§ 7(5)) bei Wandlung ersetzt.
- (2) *Ausübungszeitraum.* Soweit nicht abweichend in Absatz (3) und (4) dieses § 7 geregelt, kann das Wandlungsrecht durch einen Anleihegläubiger während eines Zeitraums ausgeübt werden, der am 40. Tag nach dem Ausgabetag, d.h. am 15. Juli 2003, beginnt und am 22. Mai 2010 endet (beide Tage einschließlich) (der "**Ausübungszeitraum**"). Wenn das Ende des Ausübungszeitraums auf einen Tag fällt, der kein Geschäftstag ist, endet der Ausübungszeitraum an dem Geschäftstag, der diesem Tag unmittelbar vorangeht. Wenn der letzte Tag des Ausübungszeitraumes in einen Nichtausübungszeitraum (§ 7(4)) fällt, endet der Ausübungszeitraum am letzten Geschäftstag vor dem Beginn eines solchen Nichtausübungszeitraumes.

§ 7

(Conversion Right; Termination of the Undertaking; New Undertaking)

- (1) *Conversion Right.* Infineon Technologies AG on June 2, 2003 has undertaken towards JPMorgan Chase Bank for the benefit of the Noteholders (the "**Undertaking**") to grant each Noteholder the right (the "**Conversion Right**") to convert in accordance with this § 7 at any time during the Conversion Period (§ 7(2)) each Note in whole, but not in part, at a conversion price for each share of €10.2346 (the "**Conversion Price**") into 4,885.3888 ordinary registered shares with no par value (**Stückaktien**) (the "**Conversion Ratio**") of Infineon Technologies AG with a portion of the share capital allotted to each share corresponding to €2 (the "**Shares**"), subject to adjustments pursuant to § 12 and § 15(3). Delivery of Shares shall be made in accordance with § 9(1). If more than one Note is converted at any one time by the same Noteholder, the number of Shares to be delivered upon such conversion will be calculated on the basis of the aggregate principal amount of such Notes to be converted. Remaining fractions of Shares shall be compensated in cash pursuant to § 9(2). Copies of the Undertaking are available free of charge at the Principal Paying Agent (§ 18(1)). The Undertaking constitutes a contract for the benefit of the Noteholders as third party beneficiaries pursuant to § 328(1) of the German Civil Code (*Bürgerliches Gesetzbuch*) giving rise to the right of each Noteholder to require performance of the obligations undertaken therein directly from Infineon Technologies AG and to enforce such obligations directly against Infineon Technologies AG. The Undertaking is subject to the condition subsequent (*auflösende Bedingung*) within the meaning of § 158(2) of the German Civil Code of a Substitution (§ 7(5)). In the case of a Substitution (§ 7(5)) the Undertaking will terminate and will be replaced by the New Undertaking (§ 7(5)); accordingly the right of any Noteholder to receive Shares upon conversion will terminate and will be replaced by the right to receive New Shares (§ 7(5)) upon conversion.
- (2) *Conversion Period.* To the extent not otherwise provided for in subparagraph (3) and (4) of this § 7, the Conversion Right may be exercised by a Noteholder from the 40th day after the Issue Date, which is July 15, 2003, until May 22, 2010 (both dates inclusive) (the "**Conversion Period**"). If the end of the Conversion Period falls on a day which is not a Business Day, the Conversion Period shall terminate on the Business Day immediately preceding such day. If the last day of the Conversion Period falls in an Excluded Period (§ 7(4)), the Conversion Period shall terminate on the last Business Day prior to the commencement of such Excluded Period.

- (3) *Vorzeitiges Ende des Ausübungszeitraumes bei fällig gestellten Schuldverschreibungen.* Für den Fall, daß die Schuldverschreibungen durch die Anleiheschuldnerin gemäß § 4(3) oder (4) zur Rückzahlung fällig gestellt werden, endet der Ausübungszeitraum im Hinblick auf diese Schuldverschreibungen mit Ablauf des fünften Geschäftstages, der dem Tag vorangeht, der zur Rückzahlung bestimmt ist, es sei denn, die Anleiheschuldnerin erfüllt ihre Rückzahlungsverpflichtungen an dem für die Rückzahlung bestimmten Tag nicht.
- (4) *Nichtausübungszeitraum.* Die Ausübung des Wandlungsrechts ist während der nachfolgenden Zeiträume (jeweils ein "**Nichtausübungszeitraum**") ausgeschlossen:
- (a) anlässlich von Hauptversammlungen der Infineon Technologies AG während eines Zeitraums, der am dritten Geschäftstag vor dem letzten für die Anmeldung bestimmten Tag beginnt, und der am Geschäftstag nach der Hauptversammlung (jeweils ausschließlich) endet;
- (b) während eines Zeitraums von 14 Tagen vor dem Ende des Geschäftsjahres der Infineon Technologies AG; und
- (c) während des Zeitraums ab dem Tag, an dem die Infineon Technologies AG ein Angebot an ihre Aktionäre zum Bezug von Aktien, Optionsrechten auf eigene Aktien, Schuldverschreibungen mit Wandlungs- oder Optionsrechten oder -pflichten, Gewinnschuldverschreibungen oder von Genußscheinen in einem überregionalen Pflichtblatt einer der deutschen Wertpapierbörsen, an denen die Aktien zum Handel zugelassen sind, oder im gedruckten oder elektronischen Bundesanzeiger veröffentlicht (wobei die erste Veröffentlichung maßgebend ist), bis zum letzten Tag der für die Ausübung des Bezugsrechts bestimmten Frist (jeweils einschließlich).
- (5) *Ersetzung.* Wenn eine gesellschaftsrechtliche Restrukturierung der Gruppe von Gesellschaften, deren Muttergesellschaft zur Zeit die Infineon Technologies AG ist ("**Infineon Gruppe**"), erfolgt und diese Restrukturierung den Zweck verfolgt, den Sitz der Muttergesellschaft der Infineon Gruppe in einem Land, Territorium oder Hoheitsgebiet außerhalb der Bundesrepublik Deutschland zu begründen und (i) eine neue Gesellschaft (die "**Neue Gesellschaft**"), die nicht Gesamtrechtsnachfolger der Infineon Technologies AG ist, die Muttergesellschaft der Infineon Gruppe wird, und (ii) Inhaber von mindestens 85% der Aktien ihre Aktien gegen Aktien der Neuen Gesellschaft (die "**Neuen Aktien**") tauschen und dabei einen Anteil von zusammen mindestens 85% am Kapital der Neuen Gesellschaft erhalten (die "**Restrukturierung**"), endet, vorausgesetzt, die nachfolgenden Bedingungen sind erfüllt, das Recht eines Anleihegläubigers zum Erhalt von Aktien bei Wandlung und wird durch das Recht zum Erhalt von Neuen Aktien bei Wandlung ersetzt (die "**Ersetzung**"):
- (3) *Early Termination of the Conversion Period for Notes called for Redemption.* In the event the Notes are declared due for redemption by the Issuer pursuant to § 4(3) or (4), the Conversion Period with respect to such Notes shall terminate at the end of the fifth Business Day prior to the day fixed for redemption unless the Issuer fails to satisfy its redemption payment obligations on the date fixed for redemption.
- (4) *Excluded Period.* The exercise of the Conversion Right shall be excluded during any of the following periods (each an "**Excluded Period**"):
- (a) in connection with any shareholders' meetings of Infineon Technologies AG, a period commencing three Business Days prior to the last day for notification of participation (*Anmeldung*) and ending on the Business Day following such shareholders' meeting (both dates exclusive);
- (b) a period of 14 days before the end of the financial year of Infineon Technologies AG; and
- (c) a period commencing on the date on which an offer by Infineon Technologies AG to its shareholders to subscribe Shares, warrants on own Shares, notes with conversion or option rights or obligations, profit-linked bonds or profit participation rights is published in a mandatory newspaper of one of the German stock exchanges where the Shares are admitted for trading, or in the printed or electronic German Federal Gazette (*Bundesanzeiger*), whichever is earlier, and ending on the last day of the subscription period (both dates inclusive).
- (5) *Substitution.* If a corporate restructuring of the group of companies of which Infineon Technologies AG is presently the parent company (the "**Infineon Group**") occurs, the objective of which is to establish the legal domicile of the parent company of the Infineon Group in a country, territory or jurisdiction other than the Federal Republic of Germany, and (i) a new company becomes the parent company of the Infineon Group which is not the legal successor (*Gesamtrechtsnachfolger*) of Infineon Technologies AG (the "**New Company**"), and (ii) holders of at least 85% of the Shares tender their Shares for shares in the New Company (the "**New Shares**") thereby receiving an aggregate holding of at least 85% of the equity in the New Company (the "**Restructuring**"), the right of any Noteholder to receive Shares upon conversion will terminate and will be replaced by the right to receive New Shares upon conversion (the "**Substitution**"), *provided that:*

- (a) die Neue Gesellschaft hat sich gegenüber der Hauptzahlstelle (§ 18(1)) zugunsten der Anleihegläubiger verpflichtet (die "**Neue Verpflichtungserklärung**"), jedem Anleihegläubiger das Recht zu gewähren, jede Schuldverschreibung gemäß den Bestimmungen dieses § 7 jederzeit während des Ausübungszeitraumes ganz, nicht jedoch teilweise, in Neue Aktien zu wandeln und die Neue Gesellschaft ist in der Lage, ihre Verpflichtungen unter der Neuen Verpflichtungserklärung in der Art und Weise zu erfüllen, als ob diese Verpflichtungen von Infineon Technologies AG unter der Verpflichtungserklärung erfüllt würden. Die Verpflichtungen der Neuen Gesellschaft unter der Neuen Verpflichtungserklärung müssen den Verpflichtungen der Infineon Technologies AG unter der Verpflichtungserklärung entsprechen mit der Ausnahme, daß bei Wandlung Neue Aktien zu liefern sind.
- (b) Infineon Technologies AG und die Neue Gesellschaft, falls rechtlich erforderlich zusammen mit der Hauptzahlstelle (§ 18(1)), haben rechtswirksam vereinbart, daß die Neue Gesellschaft im Wege einer befreienden Schuldübernahme gemäß §§ 414 ff. BGB oder durch Schuldbeitritt die Rechte, Verbindlichkeiten und Verpflichtungen der Infineon Technologies AG unter der Garantie (§ 14(1)) übernimmt;
- (c) die Neue Gesellschaft ist eine Gesellschaft, die, entweder unmittelbar oder mit Hilfe eines Dritten, eine Bonität aufweist, die nicht schlechter ist als die von Infineon Technologies AG unmittelbar vor der Lieferung der Neuen Aktien;
- (d) zum Zeitpunkt des Wirksamwerdens der Ersetzung werden die Neuen Aktien in Euro gehandelt und sind an einer Börse in einem Mitgliedsstaat der Europäischen Union oder in der Schweiz zum Handel zugelassen;
- (e) die Neue Gesellschaft hat einen Zustellungsbevollmächtigten mit Sitz in der Bundesrepublik Deutschland für etwaige Rechtsstreitigkeiten oder sonstige Verfahren vor deutschen Gerichten bestellt; und

In either case the Principal Conversion Agent shall be authorised to deliver the subscription certificate pursuant to § 198(1) of the German Stock Corporation Act or the respective certificate required by the law of domicile of the New Company in the event of a Substitution for the Noteholder while the Notes shall be transferred to the Principal Conversion Agent to be held for the account of the Noteholder until all claims of such Noteholder under the Notes have been satisfied and, thereafter, for further appropriate action.
- (3) *Review of Conversion Notice.* Upon fulfillment of all requirements specified in § 8(1) and (2) for the exercise of the Conversion Right, the respective Conversion Agent (§ 18(1)) will verify whether the number of Notes delivered to such Conversion Agent exceeds or falls short of the number of Notes specified in the Conversion Notice. In the event of any such excess or shortfall, such Conversion Agent shall subscribe from Infineon Technologies AG and deliver to the Noteholder the lower of (i) such total number of Shares which corresponds to the number of Notes set forth in the Conversion Notice or (ii) such total number of Shares which corresponds to the number of Notes in fact delivered. - (1) *Lieferung der Aktien.* Nach Ausübung des Wandlungsrechts werden ausschließlich ganze Aktien in Übereinstimmung mit der zur Zeit der Lieferung geltenden Satzung der Infineon Technologies AG geliefert. Die zu liefernden Aktien werden nach Durchführung der Wandlung alsbald nach dem Ausübungstag auf das in der Ausübungserklärung angegebene Wertpapierkonto des Anleihegläubigers übertragen. Bis zur Übertragung bestehen keine Ansprüche aus den Aktien.
- (2) *Bruchteile von Aktien.* Verbleibende Bruchteile von Aktien werden nicht geliefert; sie werden in Geld ausgeglichen, wobei ein entsprechender Bruchteil des volumengewichteten Durchschnitts der XETRA-Notierungen an den zehn Börsenhandelstagen unmittelbar vor dem Tag der Abgabe der Ausübungserklärung bei der betreffenden Umtauschstelle (§ 18(1)), gerundet auf den nächsten Cent, wobei 0,005 aufgerundet wird, in Geld ausgeglichen wird.

§ 9

(Delivery of Shares; Compensation for Fractions of Shares)

- (1) *Delivery of Shares.* Upon any exercise of the Conversion Right only full Shares shall be delivered in accordance with the Articles of Association of Infineon Technologies AG in effect at the time of such delivery. Fractions of Shares shall not be issued. To the extent that any conversion of one or several Note(s) results in fractions of Shares, the fractions of Shares resulting from the conversion of a Note shall be aggregated and full Shares resulting from such aggregation of fractions of Shares shall be delivered to the extent the respective Conversion Agent (§ 18(1)) (without any obligation to do so) has ascertained that several Notes have been converted at the same time for the same Noteholder. The Shares to be delivered shall be transferred as soon as practicable after the Conversion Date to a securities account of the Noteholder designated in the Conversion Notice. Until transfer of the Shares has been made no claims arising from the Shares shall exist.
- (2) *Fractions of Shares.* Remaining fractions of Shares shall not be delivered and shall be compensated in cash proportional to the respective fraction of the volume weighted average of the XETRA-Quotations on each of the ten Stock Exchange Trading Days immediately prior to delivery of the Conversion Notice to the respective Conversion Agent (§ 18(1)), rounded to the nearest full cent with 0.005 being rounded upwards.
- (3) *Payment.* Any compensation in cash for fractions of Shares pursuant to § 9(2) shall be effected as soon as practicable after the Conversion Date. No interest shall be due on such amount.
- (4) *Taxes.* Delivery of Shares and any payment pursuant to § 9(3) are subject to payment by a Noteholder of any taxes or other duties which may be imposed in connection with the exercise of the Conversion Right or the delivery of the Shares or payment of any amount by the Issuer pursuant to § 9(3). Taxes and duties may be set-off against a payment obligation pursuant to § 9(3), unless the Noteholder has already paid such taxes or duties.

Anleihegläubiger solche Steuern oder Abgaben nicht bereits gezahlt hat.

- (5) *Ausübungspreis unter dem anteiligen Betrag des Grundkapitals.* Soweit nach Auffassung der Infineon Technologies AG eine Zahlung gemäß § 9(2) oder eine Anpassung gemäß § 12(1) bis (6) oder (9) oder § 15(3) als Ermäßigung des Wandlungspreises oder als Erhöhung des Wandlungsverhältnisses anzusehen ist, erfolgt keine Zahlung, soweit der Wandlungspreis für eine Aktie dadurch unter den auf die einzelne Aktie entfallenden anteiligen Betrag des Grundkapitals der Infineon Technologies AG herabgesetzt würde.

- (5) *Conversion Price below Notional Par Value.* To the extent that any payment pursuant to § 9(2) or any adjustment pursuant to § 12(1) through (6) or (9) or § 15(3) is, in the opinion of Infineon Technologies AG, considered to be a reduction of the Conversion Price or an increase of the Conversion Ratio, no payment shall be made to the extent that the Conversion Price for one Share would thereby be reduced below the portion of the share capital of Infineon Technologies AG allotted to each Share.

§ 10

(Barzahlung anstelle der Lieferung von Aktien)

- (1) *Barzahlung im Falle der Ausübung des Wandlungsrechts.* Die Anleiheschuldnerin ist bei Ausübung des Wandlungsrechts durch einen Anleihegläubiger nach ihrem alleinigen Ermessen berechtigt, anstelle der Lieferung von allen oder von Teilen der dem ausgeübten Wandlungsrecht entsprechenden Aktien einen Geldbetrag für die Aktien an den Anleihegläubiger zu zahlen, welche die Anleiheschuldnerin gemäß ihrer Entscheidung nicht liefert (der jeweilige Geldbetrag der **“Barausgleichbetrag”**). Dieser Barausgleichbetrag ist hinsichtlich der Gesamtzahl von Aktien (einschließlich Bruchteilen von Aktien), für die das Wandlungsrecht ausgeübt wurde und die nicht geliefert werden, nach § 10(2) zu berechnen, wobei die Gesamtzahl von Aktien gemäß den Bestimmungen des § 7(1) errechnet wird. Zinsen sind auf einen Barausgleichbetrag nicht zu zahlen.
- (2) *Benachrichtigung, Berechnung und Zahlung.* Die Anleiheschuldnerin wird nicht später als am dritten Geschäftstag nach dem Ausübungstag (schriftlich, per Telefax, oder auf andere Art und Weise unter Benutzung der in der Ausübungserklärung angegebenen Anschrift) den Anleihegläubiger, der eine Ausübungserklärung abgegeben hat, benachrichtigen, falls die Anleiheschuldnerin die Zahlung des Barausgleichbetrages gewählt hat (der Tag, an dem die Anleiheschuldnerin eine solche Nachricht abschickt, wird nachfolgend als **“Benachrichtigungstag”** bezeichnet). Erfolgt keine solche Benachrichtigung, gilt dies als Wahl der Anleiheschuldnerin, keinen Barausgleichbetrag zu zahlen. Wenn die Anleiheschuldnerin die Zahlung des Barausgleichbetrages wählt, entspricht der Barausgleichbetrag für eine Aktie dem volumengewichteten Durchschnitt der XETRA-Notierungen an den zehn aufeinanderfolgenden Börsenhandelstagen beginnend am zweiten Börsenhandelstag, der auf den Benachrichtigungstag folgt (der **“Berechnungszeitraum”**); die Zahlung des Barausgleichbetrages wird nicht später als fünf Geschäftstage nach dem Ende des Berechnungszeitraums erfolgen.

§ 10

(Cash Payment in Lieu of Delivery of Shares)

- (1) *Cash Payment in the Event of Exercise of Conversion Right.* The Issuer shall, at its sole discretion, be entitled upon the exercise of the Conversion Right by a Noteholder in lieu of the delivery of all or part of the Shares corresponding to the exercised Conversion Rights to pay to the Noteholder a cash amount with regard to the Shares the Issuer decides not to deliver (the relevant cash payment, the **“Cash Payment”**). Such Cash Payment shall be calculated in accordance with § 10(2) with respect to the total number of Shares (including fractional Shares) for which the Conversion Right has been exercised and for which no Shares will be delivered such number of Shares to be calculated in accordance with the provisions of § 7(1). No interest shall be payable with respect to a Cash Payment.
- (2) *Notification, Calculation and Payment.* The Issuer shall notify not later than on the third Business Day after the Conversion Date (in writing, by telefax, or otherwise using the address stated in the Conversion Notice) the Noteholder who has delivered a Conversion Notice whether the Issuer has chosen to effect a Cash Payment (the day on which such notification is dispatched by the Issuer is hereinafter referred to as the **“Notification Day”**). Failure to give such notification will be deemed to be an election by the Issuer not to make a Cash Payment. Where the Issuer has chosen to effect a Cash Payment, the Cash Payment relating to one Share shall be calculated as an amount equal to the volume weighted average of the XETRA-Quotations on each of the ten consecutive Stock Exchange Trading Days beginning on the second Stock Exchange Trading Day following the Notification Day (the **“Calculation Period”**), and payment of the Cash Payment shall be effected not later than five Business Days following the end of the Calculation Period.

- (ii) reduces its capital by combining its Shares,

the Conversion Ratio shall be adjusted in accordance with subsection (a) to the extent not otherwise provided for in the following provisions.

(c) *Kapitalherabsetzung.* Im Falle einer Herabsetzung des Grundkapitals der Infineon Technologies AG vor dem letzten Tag des Ausübungszeitraums oder einem früheren Rückzahlungstag allein durch Herabsetzung des auf die einzelne Aktie entfallenden anteiligen Betrages des Grundkapitals bleibt das Wandlungsverhältnis bei Ausübung des Wandlungsrechts unverändert, jedoch mit der Maßgabe, daß die betreffenden Aktien mit ihrem jeweiligen neuen, auf die einzelne Aktie entfallenden anteiligen Betrag des Grundkapitals geliefert werden.

(2) *Kapitalerhöhung gegen Einlagen mit Bezugsrecht.* Wenn die Infineon Technologies AG vor dem letzten Tag des Ausübungszeitraums oder einem früheren Rückzahlungstag unter Einräumung eines unmittelbaren oder mittelbaren Bezugsrechts an ihre Aktionäre ihr Grundkapital durch Ausgabe neuer Aktien gegen Einlagen erhöht (§§ 182, 186 AktG), wird nach Wahl der Infineon Technologies AG (i) die Infineon Technologies AG jedem Anleihegläubiger ein Bezugsrecht auf die Anzahl von Aktien einräumen, die der Anleihegläubiger hätte beziehen können, wenn er das Wandlungsrecht unmittelbar vor dem Stichtag (§ 12(12)) ausgeübt hätte, oder (ii) das Wandlungsverhältnis gemäß der nachstehenden Formel angepaßt:

$$E' = E \times \frac{1}{\frac{N_o}{N_n} \times \left(1 - \frac{I+D}{K}\right) + \frac{I+D}{K}}$$

wobei:

- E' = das angepaßte Wandlungsverhältnis,
- E = das Wandlungsverhältnis am Stichtag,
- No = die Anzahl von ausstehenden Aktien vor der Kapitalerhöhung.
- Nn = die Anzahl von ausstehenden Aktien nach der Kapitalerhöhung, und
- I = der Bezugspreis der neuen Aktien,
- D = der Dividendennachteil (nicht diskontiert) der neuen Aktien gegenüber Altaktien, wie er von der Eurex Deutschland ("**Eurex**") bestimmt wird oder, falls (weil Optionen auf die Aktie an der Eurex nicht gehandelt werden oder aus sonstigen Gründen) durch Eurex nicht bis zum Stichtag erhältlich, von der Hauptumtastelle (§ 18(1)) nach billigem Ermessen (§ 317 BGB) geschätzt wird, und
- K = der volumengewichtete Durchschnitt der XETRA-Notierungen an den letzten drei Börsenhandelstagen, an denen die Aktien "cum" gehandelt werden, wie von der Hauptumtastelle (§ 18(1)) berechnet.

Bei der Abtretung entfällt auf jede Schuldverschreibung ein Teilbetrag aus dem Darlehen (jeweils der "**Zugehörige Darlehensanspruch**"), der sich nach folgender Formel bestimmt:

Hinsichtlich jeder Schuldverschreibung erfolgt die Sicherungsabtretung auflösend bedingt durch die Rückzahlung der Schuldverschreibungen ohne Ausübung des Wandlungsrechts oder die Barzahlung anstelle der Lieferung von Aktien gemäß § 10. Die JPMorgan Chase Bank ist ermächtigt, die Abtretung für Rechnung der Anleihegläubiger anzunehmen.

In respect of each Note, such transfer for security purposes will be subject to the conditions subsequent (*auflösende Bedingung*) of the redemption of the Notes with Appertaining Claims without exercise of the Conversion Right or the cash payment in lieu of delivery of Shares pursuant to § 10. JPMorgan Chase Bank shall be authorised to accept the transfer on account of the Noteholders.

Die Garantin hat sich in der Garantie verpflichtet, solange Schuldverschreibungen ausstehen, jedoch nur bis zu dem Zeitpunkt, an dem sämtliche nach diesen Anleihebedingungen an die Anleihegläubiger zahlbaren Beträge der Hauptzahlstelle (§ 18(1)) zur Verfügung gestellt und alle sich aus § 7 ergebenden Pflichten erfüllt wurden, keine Sicherheiten an ihren Vermögensgegenständen zur Besicherung von nachrangigen Kapitalmarktverbindlichkeiten einschließlich hierfür abgegebener Garantien und anderer Gewährleistungen zu bestellen, ohne daß die Anleihegläubiger gleichzeitig im gleichen Rang anteilig an dieser Sicherheit teilnehmen. German Civil Code pursuant to the Loan Agreement and § 13(1) above will have no impact on the security assignment except for the fact that the claims upon transfer of the Loan from Infineon Technologies AG to the New Company will no longer be against Infineon Technologies AG but against the New Company.

BGB in jeder Hinsicht unter der Garantie ersetzt wird, wobei die Hauptzahlstelle (§ 18(1)) bereits jetzt ermächtigt wird, einer solchen befreienden Schuldübernahme zuzustimmen. Jeder Anleihegläubiger stimmt bereits durch einen Erwerb von Schuldverschreibungen einer solchen befreienden Schuldübernahme oder gegebenenfalls einem solchen Schuldbeitritt zu.

- (2) *Vertrag zugunsten Dritter.* Die Garantie stellt einen Vertrag zugunsten der Anleihegläubiger als begünstigte Dritte im Sinne des § 328(1) BGB dar, der jedem Anleihegläubiger, vorbehaltlich § 7(5) bis § 7(12), das Recht gibt, Erfüllung der in der Garantie übernommenen Verpflichtungen unmittelbar von der Garantin zu verlangen und diese Verpflichtungen, vorbehaltlich § 7(5) bis § 7(12), unmittelbar gegen die Garantin durchzusetzen.

- (1) The Issuer, pursuant to a Loan Agreement (the "**Loan Agreement**") between the Issuer as lender and Infineon Technologies AG as borrower, has disbursed to Infineon Technologies AG the proceeds from the sale of the Notes in an amount of €700,000,000 by way of loan (the "**Loan**"). The due dates for payments under the Loan correspond to the due dates for payments under the Notes; in the event of an early redemption of Notes the Loan is likewise subject to early repayment in an amount equal to the respective Appertaining Claims (subparagraph (2)); finally, the amount of the Loan will be reduced in an amount equal to the Appertaining Claim (subparagraph (2)) if the Conversion Right is validly exercised by delivering Notes pursuant to § 8(2) of the Conditions of Issue of the Notes (the "**Conditions**").
- (2) In accordance with the provisions of the Loan Agreement, the Issuer has assigned the claims against Infineon Technologies AG for payment of principal under the Loan Agreement in an amount equal to the aggregate Appertaining Claims (§ 13(2)(a) of the Conditions) to JPMorgan Chase Bank acting on account of the Noteholders for purposes of securing the claims for payment of principal of the Notes. Upon such transfer, a partial amount of the Loan equal to the Appertaining Claim will be attributable to each Note. In respect of each Note, such transfer for security purposes will be subject to the condition subsequent (*auflösende Bedingung*) of the redemption of the Note with Appertaining Claim without exercise of the Conversion Right or the cash payment in lieu of delivery of Shares pursuant to § 10 of the Conditions to the extent the Issuer decides not to deliver in the form of Shares.

- (3) Der Zugehörige Darlehensanspruch, der sich auf eine Schuldverschreibung bezieht, ist mit der jeweiligen Schuldverschreibung untrennbar verbunden. Mit der Übertragung einer Schuldverschreibung geht auch der Zugehörige Darlehensanspruch über, ohne daß es dafür einer ausdrücklichen rechtsgeschäftlichen Erklärung bedarf. Jede gesonderte Verfügung über den Zugehörigen Darlehensanspruch, insbesondere jede gesonderte Abtretung, Verpfändung oder sonstige Belastung ist nichtig. Bei Ausübung des Wandlungsrechts durch Übertragung der Schuldverschreibungen geht der Zugehörige Darlehensanspruch auf die Infineon Technologies AG über und erlischt damit.
- (4) Die Infineon Technologies AG gewährt hiermit, vorbehaltlich des Eintritts der nachstehend genannten auflösenden Bedingung unwiderruflich jedem Anleihegläubiger das Recht, im Einklang mit den Anleihebedingungen (insbesondere den Bestimmungen der §§ 7, 8 und 9 der Anleihebedingungen) jederzeit während des Ausübungszeitraums eine Schuldverschreibung mit Zugehörigem Darlehensanspruch ganz, nicht jedoch teilweise, in Aktien umzutauschen und gegebenenfalls zusätzliche Ausgleichsbeträge gemäß § 9(2) und Barausgleichbeträge gemäß § 10 der Anleihebedingungen zu erhalten. § 22 der Anleihebedingungen findet Anwendung. Die Verpflichtungserklärung steht unter der auflösenden Bedingung (§ 158(2) BGB) einer Ersetzung (§ 7(5) der Anleihebedingungen). Im Falle einer Ersetzung (§ 7(5) der Anleihebedingungen) endet die Verpflichtungserklärung und wird durch die Neue Verpflichtungserklärung (§ 7(5) der Anleihebedingungen) ersetzt; dementsprechend endet das Recht eines Anleihegläubigers zum Erhalt von Aktien bei Wandlung und wird durch das Recht zum Erhalt von Neuen Aktien (§ 7(5) der Anleihebedingungen) bei Wandlung ersetzt.
- (5) Diese Verpflichtungserklärung begründet unmittelbare, nicht dinglich besicherte und nicht nachrangige Verbindlichkeiten der Infineon Technologies AG und steht im gleichen Rang mit allen anderen gegenwärtigen und zukünftigen nicht dinglich besicherten Verbindlichkeiten der Infineon Technologies AG, soweit nicht zwingende gesetzliche Bestimmungen etwas anderes vorschreiben.
- (6) Diese Verpflichtungserklärung stellt einen Vertrag zugunsten der Anleihegläubiger als begünstigte Dritte im Sinne des § 328(1) BGB dar, der jedem Anleihegläubiger das Recht gibt, Erfüllung unmittelbar von der Infineon Technologies AG zu verlangen und die Verpflichtungserklärung, unmittelbar gegen die Infineon Technologies AG durchzusetzen.
- (3) The Appertaining Claim related to each Note is undetachable from the relevant Note. Any transfer of a Note results in the transfer of the Appertaining Claim without any explicit declaration of transfer being required. Any separate disposal, in particular any separate assignment, pledge or other encumbrance of the Appertaining Claim shall be void. In the event of the exercise of the Conversion Right by delivering Notes the Appertaining Claim shall pass to Infineon Technologies AG and expire therewith.
- (4) Infineon Technologies AG hereby irrevocably, but subject to the condition subsequent (*auflösende Bedingung*) mentioned below grants to each Noteholder the right to convert, in accordance with the Conditions (in particular §§ 7, 8 and 9 of the Conditions), at any time during the Conversion Period each Note together with the Appertaining Claim in whole, but not in part, into Shares and to receive additional compensation amounts payable pursuant to § 9(2) and cash payments pursuant to § 10 of the Conditions, if any. § 22 of the Conditions shall apply. The Undertaking is subject to the condition subsequent (*auflösende Bedingung*) within the meaning of § 158(2) of the German Civil Code of a Substitution (§ 7(5) of the Conditions). In the case of a Substitution (§ 7(5) of the Conditions) the Undertaking will terminate and will be replaced by the New Undertaking (§ 7(5) of the Conditions); accordingly the right of any Noteholder to receive Shares upon conversion will terminate and will be replaced by the right to receive New Shares (§ 7(5) of the Conditions) upon conversion.
- (5) This Undertaking constitutes direct, unsecured and unsubordinated obligations of Infineon Technologies AG and ranks *pari passu* with all other present and future unsecured obligations of Infineon Technologies AG, except as otherwise provided by mandatory rules of law.
- (6) This Undertaking constitutes a contract for the benefit of the Noteholders as third party beneficiaries pursuant to § 328(1) of the German Civil Code giving rise to the right of each Noteholder to require performance of the obligations undertaken herein directly from Infineon Technologies AG and to enforce such obligations directly against Infineon Technologies AG.

- (7) Begriffe, die in dieser Verpflichtungserklärung verwendet werden und in den Anleihebedingungen oder dem Darlehensvertrag definiert sind, haben in dieser Verpflichtungserklärung die gleiche Bedeutung wie in den Anleihebedingungen bzw. dem Darlehensvertrag, soweit sie in dieser Verpflichtungserklärung nicht anderweitig definiert sind.
- (8) Die Infineon Technologies AG und die JPMorgan Chase Bank vereinbaren, daß die JPMorgan Chase Bank nicht als Treuhänderin oder in ähnlicher Funktion für die Anleihegläubiger handelt. Die JPMorgan Chase Bank verpflichtet sich, das Original dieser Verpflichtungserklärung bis zur Erfüllung der Verpflichtungen aus den Schuldverschreibungen und dieser Verpflichtungserklärung zu verwahren.

International Limited haben einen Übernahmevertrag (wie von Zeit zu Zeit geändert, ergänzt oder neugefaßt, der "**Übernahmevertrag**"), mit Datum dieses Vertrages abgeschlossen, wonach sich die Anleiheschuldnerin verpflichtet hat, nachrangige Wandelschuldverschreibungen (die "**Schuldverschreibungen**") im Gesamtnennbetrag von €700.000.000 zu begeben und an die Underwriter zu verkaufen. Der Übernahmevertrag sieht vor, daß die Begebung und die Übernahme der Schuldverschreibungen am 5. (C) Die Anleihebedingungen der Schuldverschreibungen (die "**Anleihebedingungen**") sehen vor, daß die Ansprüche der Anleihegläubiger auf Zahlung des Kapitals aus sämtlichen Schuldverschreibungen durch die Ansprüche der Anleiheschuldnerin gegen die Infineon Technologies AG aus dem Darlehen auf Zahlung des Kapitals dieses Darlehens in Höhe sämtlicher Zugehöriger Darlehensansprüche (§ 13(2)(a) der Anleihebedingungen) besichert werden.

(D) Die Anleihebedingungen sind als Anlage 1 beigefügt.

WHEREAS:

(A) The Issuer, Infineon Technologies AG and a syndicate of banks and financial institutions (the "**Underwriters**") under the lead management of Goldman Sachs International and Morgan Stanley & Co. International Limited have entered into an underwriting agreement (as amended, supplemented or restated from time to time, the "**Underwriting Agreement**") of even date herewith pursuant to which the Issuer has undertaken to issue and sell to the Underwriters subordinated convertible notes (the "**Notes**") in the aggregate principal amount of €700,000,000. The Underwriting Agreement provides that the issue and subscription of the Notes shall be effected on June 5, 2003, or such other date as the Issuer, Infineon Technologies AG and Goldman Sachs International and Morgan Stanley & Co. International Limited acting on behalf of the Underwriters may agree (the "**Closing Date**").

(B) The Issuer has undertaken in the Underwriting Agreement to pass on to Infineon Technologies AG the full proceeds from the issue of the Notes pursuant to (A) (the "**Proceeds**") without any deduction by way of loan (the "**Loan**").

(C) The Conditions of Issue of the Notes (the "**Conditions**") provide that the claims of the Noteholders for payment of principal of all Notes are to be secured by the claims of the Issuer against Infineon Technologies AG under the Loan for payment of principal of such Loan in an amount equal to the aggregate Appertaining Claims (§ 13(2)(a) of the Conditions).

(D) The Conditions are set forth in Exhibit 1.

Dies vorausgeschickt, kommen die Parteien wie folgt überein:

**§ 1
(Definitionen)**

In diesem Vertrag haben Begriffe, die in den Anleihebedingungen definiert sind, die gleiche Bedeutung wie in den Anleihebedingungen, soweit nicht der Zusammenhang etwas anderes erfordert.

**§ 2
(Das Darlehen)**

- (1) Die Anleiheschuldnerin gewährt der Infineon Technologies AG vorbehaltlich der Auszahlung des Emissionserlöses an die Anleiheschuldnerin am Zahltag ein Darlehen im Nennbetrag von

€700.000.000 (Euro siebenhundert Millionen)
(der **“Darlehensbetrag”**).

- (2) Der Darlehensbetrag ist am Zahltag an die Infineon Technologies AG auszuführen.
- (3) Die Auszahlung des Darlehensbetrages erfolgt, indem die Underwriter den jeweiligen Emissionserlös ohne Abzüge auf ein von der Anleiheschuldnerin bestimmtes Konto der Anleiheschuldnerin zahlen und die Anleiheschuldnerin unverzüglich diesen Emissionserlös auf ein von der Infineon Technologies AG bestimmtes Konto der Infineon Technologies AG auszahlt.
- (4) Die Ansprüche der Anleiheschuldnerin auf Zahlung von Kapital und Zinsen und jeglicher anderer unter dem Darlehen anfallenden Beträge sind nachrangig gegenüber ranghöheren, nicht nachrangigen Forderungen sämtlicher sonstigen Gläubiger der Infineon Technologies AG. Diese Nachrangigkeit hat zur Folge, daß im Fall der Auflösung, der Insolvenz oder anderer Verfahren zur Abwendung der Insolvenz jede Zahlung, die unter dem Darlehen fällig wird, erst erfolgt, nachdem alle Forderungen gegen die Infineon Technologies AG erfüllt worden sind, die ranghöher und nicht nachrangig sind. Jedes Recht der Aufrechnung mit Ansprüchen aus dem Darlehen gegen Ansprüche der Infineon Technologies AG ist ausgeschlossen. Die im vorangehenden Satz geregelte Nachrangigkeit im Hinblick auf einen Zugehörigen Darlehensanspruch (§ 13(2)(a) der Anleihebedingungen), der einer Schuldverschreibung zuzurechnen ist, für die das Wandlungsrecht (§ 7(1) der Anleihebedingungen) wirksam ausgeübt worden ist, ist auflösend bedingt durch die Ausübung des Wandlungsrechts (§ 7 der Anleihebedingungen) und endet mit Wirkung zum Ausgabebetrag (§ 3(1) der Anleihebedingungen) am Tag unmittelbar vor dem Ausübungstag (§ 8(4) der Anleihebedingungen) um 24:00 Uhr. Die Nachrangigkeit darf die Ausübung des Wandlungsrechts (§ 7(1) der Anleihebedingungen) auf der Grundlage des § 194 Abs. 1 S. 2 AktG nicht beeinträchtigen.

Now, therefore, it is agreed as follows:

**§ 1
(Definitions)**

In this Agreement terms defined in the Conditions shall have the same meaning herein, unless otherwise required by the context.

**§ 2
(The Loan)**

- (1) Subject to disbursement to the Issuer of the Proceeds on the Closing Date, the Issuer grants to Infineon Technologies AG a loan in the principal amount of

€700,000,000 (Euro seven hundred million)
(the **“Loan Amount”**).

- (2) The Loan Amount shall be disbursed to Infineon Technologies AG on the Closing Date.
- (3) Disbursements of the Loan Amount shall be effected by the Underwriters' paying the relevant Proceeds without deduction to an account of the Issuer specified by the Issuer and by the Issuer's immediate on-payment of such Proceeds to an account of Infineon Technologies AG specified by Infineon Technologies AG.
- (4) The claims of the Issuer for payment of principal and interest and any other amounts arising under the Loan shall be subordinated to the claims of all other creditors of Infineon Technologies AG which are senior and not subordinated. Such subordination shall mean that in any event of liquidation, bankruptcy or other proceedings to avoid bankruptcy any payment which might become due under the Loan shall be made only after all claims against Infineon Technologies AG which are senior and not subordinated have been satisfied. Any right to set-off claims arising from the Loan against claims of Infineon Technologies AG shall be excluded. The subordination specified in the foregoing sentence with respect to the Appertaining Claim (§ 13(2)(a) of the Conditions) attributable to a Note for which the Conversion Right (§ 7(1) of the Conditions) has been validly exercised shall be subject to the condition subsequent (*auflösende Bedingung*) of the exercise of the Conversion Right (§ 7(1) of the Conditions) and terminate with effect as of the Issue Date (§ 3(1) of the Conditions) on the day immediately prior to the Conversion Date (§ 8(4) of the Conditions) at 24 hours. The exercise of the Conversion Right (§ 7(1) of the Conditions) in reliance on § 194(1) sentence 2 of the German Stock Corporation Act (*Aktiengesetz*) shall not be affected by the subordination.

§ 3
(Sicherungsabtretung)

- (1) Am Zahltag wird die Anleiheschuldnerin die Ansprüche gemäß § 4(2) dieses Vertrages auf Zahlung des Kapitals des Darlehens in Höhe sämtlicher Zugehörigen Darlehensansprüche (§13(2)(a) der Anleihebedingungen) an die für Rechnung der Anleihegläubiger handelnde JPMorgan Chase Bank in Übereinstimmung mit dem als Anlage 2 beigefügten Abtretungsvertrag als Sicherheit für die Ansprüche auf Zahlung von Kapital aus den Schuldverschreibungen abtreten. Bei der Abtretung entfällt auf jede Schuldverschreibung ein Teilbetrag aus dem Darlehen, der dem Zugehörigen Darlehensanspruch entspricht.
- (2) Der Zugehörige Darlehensanspruch, der sich auf eine Schuldverschreibung bezieht, ist mit der jeweiligen Schuldverschreibung untrennbar verbunden. Mit jeder Übertragung einer Schuldverschreibung geht auch der Zugehörige Darlehensanspruch über, ohne daß es dafür einer besonderen rechtsgeschäftlichen Erklärung bedarf. Jede gesonderte Verfügung über den Zugehörigen Darlehensanspruch, insbesondere jede gesonderte Abtretung, Verpfändung oder sonstige Belastung des Zugehörigen Darlehensanspruchs, ist nichtig. Bei Ausübung des Wandlungsrechts geht der Zugehörige Darlehensanspruch mit der Lieferung der Schuldverschreibungen auf die Infineon Technologies AG über und erlischt damit.
- (3) Sämtliche weiteren Zahlungsansprüche aus diesem Vertrag, insbesondere die Ansprüche auf Zahlung von Zinsen, verbleiben bei der Anleiheschuldnerin und werden nicht abgetreten.

§ 4
(Zinsen; Rückzahlungen; Konfusion)

- (1) Der Darlehensbetrag (§ 2(1)) wird mit einem gesondert festzulegenden jährlichen Zinssatz verzinst. An jedem Tag, an dem die Zahlung von Zinsen auf die Schuldverschreibungen fällig wird, wird ein Betrag, der mindestens diesen Zinsen entspricht, als Zinsen auf das Darlehen fällig. Falls die Fälligkeit von Zahlungen auf die Schuldverschreibungen gemäß § 5(3) der Anleihebedingungen hinausgeschoben wird, wird die Fälligkeit von Zahlungen auf das Darlehen in gleicher Weise hinausgeschoben. Sind Zinsen für einen Zeitraum von weniger als einem Jahr zu berechnen, so werden sie berechnet auf der Grundlage der tatsächlich verstrichenen Tage, geteilt durch 365 (bzw., falls ein Teil dieses Zeitraums in ein Schaltjahr fällt, auf der Grundlage der Summe von (A) der tatsächlichen Anzahl von Tagen des Zeitraums, die in dieses Schaltjahr fallen, dividiert durch 366, und (B) der tatsächlichen Anzahl von Tagen des Zeitraums, die nicht in das Schaltjahr fallen, dividiert durch 365).
- (2) An dem Tag, an dem Kapital auf die Schuldverschreibungen (ob zum Endfälligkeitstermin (§ 4(1) der Anleihebedingungen) oder davor gemäß § 4(3), § 4(4) oder § 16 der Anleihebedingungen) fällig und zahlbar ist, ist das Darlehen in Höhe der Zugehörigen Darlehensansprüche zur Rückzahlung fällig.

§ 3
(Security Assignment)

- (1) As of the Closing Date, the Issuer shall assign the claims under § 4(2) of this Agreement for payment of principal of the Loan in an amount equal to the aggregate Appertaining Claims (§ 13(2)(a) of the Conditions) to JPMorgan Chase Bank acting on account of the Noteholders as security for the claims for payment of principal of the Notes in accordance with the assignment agreement attached hereto as Exhibit 2. A partial amount of the Loan equal to the Appertaining Claim shall be attributable to each Note.
- (2) The Appertaining Claim related to each Note is undetachable from the relevant Note. Any transfer of a Note results in the transfer of the Appertaining Claim without any explicit declaration of transfer being required. Any separate disposal, in particular any separate assignment, pledge or other encumbrance of the Appertaining Claim shall be void. In the event of the exercise of the Conversion Right by delivering Notes the Appertaining Claim shall pass to Infineon Technologies AG and expire therewith.
- (3) All further claims for payment under this Agreement, in particular the claims for payment of interest, shall remain with the Issuer and are not assigned.

§ 4
(Interest; Repayments; Discharge)

- (1) The Loan Amount (§ 2(1)) shall bear interest at a rate per annum to be separately agreed. On each date on which payment of any interest in respect of the Notes becomes due an amount equal to at least such interest shall be payable as interest on the Loan. In case the due date for payments on the Notes has been extended pursuant to § 5(3) of the Conditions, the due date of the payments on the Loan shall be extended accordingly. If it is necessary to calculate interest for a period of less than one year, interest shall be calculated on the basis of the actual number of days elapsed, divided by 365 (or, if any portion of that period falls in a leap year, the sum of (A) the actual number of days in that period falling in a leap year divided by 366 and (B) the actual number of days in that period falling in a non-leap year divided by 365).
- (2) On each date on which principal in respect of the Notes is due and payable (whether on the Maturity Date (§ 4(1) of the Conditions) or prior thereto pursuant to § 4(3), § 4(4) or § 16 of the Conditions), the Loan shall be due for repayment in an amount equal to the respective Appertaining Claims.

- (3) Falls und sobald die nach diesem Darlehensvertrag zahlbaren Ansprüche durch die Anleihegläubiger im Wege der Abtretung im Zusammenhang mit der Ausübung des Wandlungsrechts auf die Infineon Technologies AG übertragen werden, erlöschen im Umfang dieser Übertragung sämtliche Rechte und Ansprüche aus diesem Darlehensvertrag. Diese Rechtslage tritt unabhängig davon ein, ob der Darlehensanspruch mit der Lieferung der Schuldverschreibungen an die Infineon Technologies AG tatsächlich übergegangen ist.
- (4) Zahlungen unter dem Darlehen erfolgen in der Währung, in der die entsprechenden Zahlungen unter den Schuldverschreibungen geleistet werden.

§ 5 (Steuern)

Sämtliche Zahlungen auf das Darlehen sind ohne Einbehalt oder Abzug von oder wegen gegenwärtiger oder zukünftiger Steuern, Abgaben oder amtlicher Gebühren gleich welcher Art, die von oder in der Bundesrepublik Deutschland oder den Niederlanden oder von oder für Rechnung einer dort zur Steuererhebung ermächtigten Gebietskörperschaft oder Behörde auferlegt, erhoben, oder eingezogen werden, zu leisten, es sei denn, die Infineon Technologies AG ist gesetzlich verpflichtet, solche Steuern oder Abgaben einzubehalten oder abzuziehen. Die Parteien sind darüber einig, daß etwaige Einbehalte oder Abzüge auf Kapital des Darlehens gemäß Satz (1) nicht den Darlehensbetrag reduzieren.

§ 6 (Änderung oder Aufhebung dieses Vertrages)

Die Anleiheschuldnerin und die Infineon Technologies AG verpflichten sich (vorbehaltlich der nachfolgenden Sätze), die Bestimmungen dieses Vertrages nicht zu ändern oder aufzuheben und alles zu unterlassen, was die Rechte der Anleihegläubiger aus der Sicherungsabtretung (§ 3) oder sonstige Rechte der Anleihegläubiger beeinträchtigen könnte. Eine Änderung oder Aufhebung dieses Vertrages wird nur erfolgen, wenn die Rechte der Anleihegläubiger dadurch nicht beeinträchtigt werden. Die Anleiheschuldnerin und Infineon Technologies AG sind sich einig, daß im Falle einer Ersetzung die Neue Gesellschaft im Wege einer befreienden Schuldübernahme gemäß §§ 414 ff. BGB alle Rechte, Verbindlichkeiten und Verpflichtungen der Infineon Technologies AG aus diesem Vertrag übernehmen darf und im Falle, daß dies rechtlich erforderlich ist, um bei wirksamer Ausübung des Wandlungsrechts durch Anleihegläubiger die Lieferung vollgezahlter Neuer Aktien zu ermöglichen, auch übernehmen wird. Falls die Neue Gesellschaft ihren Sitz nicht in den Niederlanden hat, tritt in § 6 neben die Bezugnahme auf die Niederlande und die Bundesrepublik Deutschland eine alternative Bezugnahme auf das Land, in dem die Neue Gesellschaft ihren Sitz hat.

§ 7 (Verzicht auf Aufrechnungsrechte)

Die Infineon Technologies AG verzichtet hinsichtlich sämtlicher Ansprüche der Anleiheschuld-

- (3) If and when the claims payable under this Loan Agreement are transferred by Noteholders by way of assignment to Infineon Technologies AG in connection with the exercise of the Conversion Right, all rights and claims under this Loan Agreement shall expire to the extent of such transfer. This shall apply irrespectively whether the Appertaining Claim has in fact been transferred to Infineon Technologies AG in connection with the delivery of the Notes.
- (4) Payments under the Loan shall be made in the currency in which the corresponding payments under the Notes are effected.

§ 5 (Taxes)

All payments on the Loan shall be made without withholding or deduction of any present or future taxes, duties or governmental charges of whatever nature imposed, levied or withheld by or in the Federal Republic of Germany or The Netherlands or by or on behalf of any political subdivision or authority thereof or therein having power to tax, unless Infineon Technologies AG is required by law to withhold or deduct such taxes or duties. The parties agree that any withholdings or deductions on principal of the Loan pursuant to sentence (1) shall not reduce the Loan Amount.

§ 6 (Amendment or Termination of this Agreement)

The Issuer and Infineon Technologies AG undertake (subject to the following sentences) not to amend or terminate any provisions of this Agreement and to refrain from anything that could impair the rights of the Noteholders under the security assignment (§ 3) or otherwise. An amendment or termination of this Agreement shall only be effected if the rights of the Noteholders are not impaired thereby. The Issuer and Infineon Technologies AG hereby agree that in the case of a Substitution, the New Company may, and if legally required to ensure that upon a valid exercise of the Conversion Rights of the Noteholders fully paid New Shares can be delivered shall, assume by way of a liberating debt assumption (*befreiende Schuldübernahme*) within the meaning of §§ 414 et seq. German Civil Code all rights, liabilities and obligations of Infineon Technologies AG under this Agreement. If the New Company is not domiciled in The Netherlands, an alternative reference to the country of domicile of the New Company shall be made in § 5 in addition to the reference to the Federal Republic of Germany and The Netherlands.

§ 7 (Waiver of Rights of Set-Off)

With respect to all claims of the Issuer under this Agreement, Infineon Technologies AG agrees not to

ABTRETUNGSVERTRAG

- (1) Infineon Technologies Holding B.V., Rotterdam (die "**Anleihschuldnerin**"), hat aufgrund eines zwischen ihr als Darlehensgeberin und der Infineon Technologies AG, München ("**Infineon Technologies AG**"), als Darlehensnehmerin abgeschlossenen Darlehensvertrages mit Datum vom 2. Juni 2003 (der "**Darlehensvertrag**") den Erlös aus dem Verkauf der Schuldverschreibungen in Höhe von €700.000.000 an die Infineon Technologies AG als Darlehen ausgezahlt (das "**Darlehen**"). Die Fälligkeiten von Zahlungen aus dem Darlehen entsprechen den Fälligkeiten von Zahlungen auf die Schuldverschreibungen; bei vorzeitiger Rückzahlung von Schuldverschreibungen ist das Darlehen entsprechend in Höhe des Zugehörigen Darlehensanspruchs (Absatz (2)) zur vorzeitigen Rückzahlung fällig; schließlich ermäßigt sich der Betrag des Darlehens in Höhe des Zugehörigen Darlehensanspruchs (Absatz (2)) bei wirksamer Ausübung der Wandlungsrechte durch Übertragung von Schuldverschreibungen gemäß § 8(2) der Bedingungen der Schuldverschreibungen (die "**Anleihebedingungen**").
- (2) Die Anleihschuldnerin tritt hiermit ihre Ansprüche gegen Infineon Technologies AG aus dem Darlehensvertrag auf Zahlung von Kapital in Höhe sämtlicher Zugehöriger Darlehensansprüche an die für Rechnung der Anleihegläubiger (dieser Begriff schließt für die Zwecke dieses Vertrages sämtliche Anleihegläubiger hinsichtlich zusätzlicher von der Anleihschuldnerin gemäß § 20 der Anleihebedingungen begebener Schuldverschreibungen ein) handelnde JPMorgan Chase Bank als Sicherheit für die Ansprüche auf Zahlung von Kapital aus den Schuldverschreibungen ab. Bei der Abtretung entfällt auf jede Schuldverschreibung ein Teilbetrag aus dem Darlehen (je ein "**Zugehöriger Darlehensanspruch**"), der sich nach folgender Formel bestimmt:

$$\text{Zugehöriger Darlehensanspruch} = \frac{\text{Gesamtnennbetrag des Darlehens}}{\text{Zahl der Schuldverschreibungen}}$$

Hinsichtlich jeder Schuldverschreibung erfolgt die Sicherungsabtretung auflösend bedingt durch die Rückzahlung der Schuldverschreibung mit Zugehörigem Darlehensanspruch ohne Ausübung des Wandlungsrechts oder die Barzahlung anstelle der Lieferung von Aktien gemäß § 10 der Anleihebedingungen insoweit die Anleihschuldnerin beschließt, nicht in Form von Aktien zu liefern. JPMorgan Chase Bank ist ermächtigt, die Abtretung für die Anleihegläubiger anzunehmen. Die Erklärung der Abtretung und die Annahme bedürfen nicht der Bekanntmachung.

ASSIGNMENT AGREEMENT

- (1) Infineon Technologies Holding B.V., Rotterdam (the "**Issuer**"), pursuant to a loan agreement dated June 2, 2003 (the "**Loan Agreement**") between the Issuer as lender and Infineon Technologies AG, Munich ("**Infineon Technologies AG**"), as borrower, has disbursed to Infineon Technologies AG the proceeds from the sale of the Notes in an amount of €700,000,000 by way of loan (the "**Loan**"). The due dates for payments under the Loan correspond to the due dates for payments under the Notes; in the event of an early redemption of Notes the Loan is likewise subject to early repayment in an amount equal to the respective Appertaining Claims (subparagraph (2)); finally, the amount of the Loan will be reduced in an amount equal to the Appertaining Claim (subparagraph (2)) if the Conversion Right is validly exercised by delivering Notes pursuant to § 8(2) of the Conditions of Issue of the Notes (the "**Conditions**").
- (2) The Issuer hereby assigns the claims against Infineon Technologies AG for payment of principal under the Loan Agreement in an amount equal to the aggregate Appertaining Claims to JPMorgan Chase Bank acting on account of the Noteholders (which expression shall, for the purposes of this Agreement, include any Noteholders under any additional Notes issued by the Issuer under § 20 of the Conditions) for purposes of securing the claims for payment of principal of the Notes. Upon such transfer, a partial amount of the Loan (each, an "**Appertaining Claim**") will be attributable to each Note, such partial amount being determined in accordance with the following formula:

$$\text{Appertaining Claim} = \frac{\text{Principal Amount of the Loan}}{\text{Number of Notes}}$$

In respect of each Note, such transfer for security purposes will be subject to the condition subsequent (*auflösende Bedingung*) of the redemption of the Note with Appertaining Claim without exercise of the Conversion Right or the cash payment in lieu of delivery of Shares pursuant to § 10 of the Conditions to the extent the Issuer decides not to deliver in the form of Shares. JPMorgan Chase Bank shall be authorized to accept the transfer on account of the Noteholders. The declarations of the transfer and its acceptance need not be published.

- (3) JPMorgan Chase Bank nimmt hiermit die Abtretung gemäß Absatz (2) an.
- (4) Der Zugehörige Darlehensanspruch, der sich auf eine Schuldverschreibung bezieht, ist mit der jeweiligen Schuldverschreibung untrennbar verbunden. Mit jeder Übertragung einer Schuldverschreibung geht auch der Zugehörige Darlehensanspruch über, ohne daß es dafür einer ausdrücklichen rechtsgeschäftlichen Erklärung bedarf. Jede gesonderte Verfügung über den Zugehörigen Darlehensanspruch, insbesondere jede gesonderte Abtretung, Verpfändung oder sonstige Belastung, ist nichtig. Bei Ausübung des Wandlungsrechts durch Lieferung der Schuldverschreibungen geht der Zugehörige Darlehensanspruch auf die Infineon Technologies AG über und erlischt damit.
- (5) Die Übernahme der Rechte, Verbindlichkeiten und Verpflichtungen der Infineon Technologies AG aus dem Darlehensvertrag im Wege der befreienden Schuldübernahme gemäß §§ 414 ff. BGB durch die Neue Gesellschaft gemäß dem Darlehensvertrag und § 13(1) der Anleihebedingungen läßt die Sicherungsabtretung unberührt, ausgenommen daß die Ansprüche gegen Infineon Technologies AG nach der Übertragung des Darlehens von Infineon Technologies AG an die Neue Gesellschaft nicht mehr gegen Infineon Technologies AG, sondern gegen die Neue Gesellschaft bestehen.
- (6) Begriffe, die in diesem Abtretungsvertrag verwendet werden und in dem Darlehensvertrag oder den Anleihebedingungen definiert sind, haben in diesem Abtretungsvertrag die gleiche Bedeutung wie in dem Darlehensvertrag bzw. den Anleihebedingungen, soweit sie in diesem Abtretungsvertrag nicht anderweitig definiert sind.
- (7) JPMorgan Chase Bank verpflichtet sich, das Original dieses Vertrages bis zur Erfüllung der Verpflichtungen aus den Schuldverschreibungen und diesem Abtretungsvertrag zu verwahren.

The registered seat and head office of Infineon Technologies AG is located at St.-Martin-Strasse 53, D-81669 Munich, Germany. Recently, the Company has indicated that, as part of the ongoing strategic evaluation of the Company and its business, it is reviewing the advisability of relocating outside Germany the corporate headquarters and corporate seat of the Infineon group parent company, currently the Company. No decision has been taken in respect of any such relocation. However, if such relocation were to be carried out, then, in certain circumstances, a new guarantor of the Notes (See § 14 of the Conditions) and a new issuer of the Shares could be substituted for Infineon Technologies AG (See § 7(5) to (11) of the Conditions of Issue).

The duration of Infineon Technologies AG is indefinite.

The objectives of Infineon Technologies AG, described in § 2 of the Articles of Association, are direct or indirect activity in the field of research, development, manufacture and marketing of electronic components, electronic systems and software, as well as the performance of related services. Infineon Technologies AG is the parent company of the Infineon group and carries out the management and corporate functions of the group.

Financial Year

Infineon Technologies AG's financial year runs from October 1 to September 30 of the next year.

Business

Infineon Technologies designs, develops, manufactures and markets a broad range of semiconductors and complete system solutions targeted at selected industries. Our products serve applications in the wireless and wireline communications, automotive, industrial, computer, security and chipcard markets. Our product portfolio consists of both memory and logic products and includes digital, mixed-signal and analog integrated circuits, or ICs, as well as discrete semiconductor products and system solutions. We are the successor to the Siemens Semiconductor Group and have actively participated in the semiconductor industry since 1952.

We are organized into four main segments, three of which are application-focused — Wireline Communications, Secure Mobile Solutions and Automotive & Industrial; and one of which is product-focused — Memory Products.

The Company decided to merge the activities of the Wireless Solutions and Security & Chipcard ICs segments into one operating segment called Secure Mobile Solutions and to report it as such with effect from October 1, 2002. Segment financial data through March 31, 2003 has been reclassified to reflect this change and also excludes the results of the Company's opto-electronics business, which is accounted for as a discontinued operation.

Our Wireline Communications segment designs, develops, manufactures and markets semiconductors and fiber optic components for the communications Access, Wide Area Network ("WAN") and Metropolitan Area Network ("MAN") sectors of the wireline communications market.

Our Secure Mobile Solutions segment designs, develops, manufactures and markets semiconductors and secure mobile solutions, combining wireless communication technology, such as wide area wireless networks, local area wireless networks, personal area wireless networks, with security technologies like platform security, encryption and biometrics.

Our Automotive & Industrial segment develops, manufactures and markets semiconductors and complete systems solutions for use in automotive and industrial applications. Automotive applications have typically accounted for approximately 60% of the segment's net sales, with the balance represented by industrial applications.

Our Memory Products segment develops, manufactures and markets semiconductor memory products with various packaging and configuration options and performance characteristics for use in standard and embedded memory applications.

Intellectual property rights in various Infineon Technologies products include patents, copyrights, trade secrets, trademarks, utility models, design patents and maskwork rights. Our patents primarily relate to IC design and process technologies. We believe that our intellectual property is a valuable asset and intend to protect our investment in technology.

Upon ceasing to be a majority-controlled subsidiary of Siemens, the Company lost rights under a number of patent cross-license agreements originally entered into by Siemens and third parties. In anticipation of this possibility, the Company has entered into patent cross-license agreements with many of these third parties that extend or transfer to the Company the relevant third party's cross-license arrangements with Siemens. In addition, the Company has negotiated new contracts and is engaged in continuing negotiations with several major industry participants.

The Siemens Group is our largest customer. Our sales to the Siemens Group comprise both direct sales and sales for resale to third parties. Our total net sales to the Siemens Group as a customer amounted to 14% of our consolidated net sales in the 2002 financial year and 14% of our consolidated net sales in the six months ended 31 March 2003.

Operating And Financial Review

This discussion of our consolidated financial condition and results of operations should be read in conjunction with our consolidated financial statements and the other financial information included elsewhere in this Offering Circular.

This Operating and Financial Review contains forward-looking statements. Statements that are not statements of historical facts, including expressions of our beliefs and expectations, are forward-looking in nature and are based on current plans, estimates and projections. Forward-looking statements speak only as of the date they are made, and we undertake no obligation to update any of them in light of new information or future events. Forward-looking statements involve inherent risks and uncertainties. A number of important factors could cause actual results or outcomes to differ materially from those expressed in any forward-looking statement.

The Company transferred its opto-electronics business to Osram GmbH effective March 31, 2003. Accordingly, the results of operations of the opto-electronics business are presented as a discontinued operation for the six month period ended March 31, 2003. Pursuant to the provisions of Statement of Financial Accounting Standards 144, Accounting for the Impairment or Disposal of Long-Lived Assets, previously issued financial statements presented for comparative purposes, including the condensed consolidated financial statements for the six month period ended March 31, 2002, as well as the consolidated financial statements for the years ended September 30, 2001 and 2002, incorporated by reference as noted above, have been reclassified to present the operations of the opto-electronics business as a discontinued operation for all periods presented. Additionally, the Company merged the activities of the Wireless Solutions and Security and Chipcard ICs segments into one operating segment called Secure Mobile Solutions effective October 1, 2002. The segment data and results of operations included in the Operating and Financial Review, including the discussion of the results of the first half 2003 financial year compared to the first half 2002 financial year and the 2002 financial year as compared to the 2001 financial year, have been revised to incorporate these changes.

First Half 2003 Financial Year compared to First Half 2002 Financial Year

Significant developments

- First half 2003 revenues were €2,925 million, an increase of 28% compared to 2002 revenues of €2,284 million. This increase was mainly driven by increased sales for Memory Products, a strong performance in the Automotive & Industrial segment, and strong improvement in Secure Mobile Solutions.
- Continued gain of market share in key segments despite ongoing difficult market environment.
- First half 2003 net loss of €368 million; EBIT loss of €254 million was primarily attributable to disappointing results in the Memory Products segment, resulting from significant reduction in DRAM selling prices.
- Continued solid cash position and significantly improved cash flow from operations.

We ended the first six months of financial year 2003 on March 31, 2003, with revenues from continuing operations of €2,925 million, an increase of 28% compared to the first six months of financial year 2002 revenues of €2,284 million. The net loss for the first half of the 2003 fiscal year amounted to €368 million compared to a net loss of €439 million for the comparable period in the 2002 fiscal year. Basic and diluted loss per share from continuing operations for the first half of fiscal year 2003 was €0.51, compared to a loss per share from continuing operations of €0.63 in the previous year. All segments reflected improved operating results in 2003, especially Memory Products, despite extremely difficult market conditions, which resulted in an increase in gross margin from €206 million for the first six months of 2002 to €603 million for the comparable 2003 period. First half 2002 results include gains associated with the sale of our infrared component business. The first half 2003 tax provision includes the impact of providing for a valuation allowance in tax jurisdictions which have incurred cumulative losses over the preceding three year period.

We generated revenue growth and produced further market share gains (based upon industry data published by Semiconductor Industry Association) in a continued difficult market environment, which were mainly driven by increased sales for all segments, especially Memory Products, Secure Mobile Solutions and Automotive & Industrial.

Revenues outside Europe constituted 56% of total revenues for the first half of 2003, up from 52% in 2002, reflecting our increased sales in Asia, including Japan. As of March 31, 2003, we had approximately 31,200 employees worldwide, including about 5,500 engaged in research and development.

Pursuant to an agreement reached with Osram GmbH, the Company transferred all its opto-electronic activities to Osram as of March 31, 2003. Accordingly, the results of the opto-electronics business (previously in other operating segments) are reflected as a discontinued operation, and the operating results (e.g. sales, cost of sales and operating expenses) through March 31, 2003 have been reclassified to ensure comparability with the results of our continuing operations.

Segment revenue developments during the first half of the 2003 financial year as compared to the corresponding period of the 2002 financial year were as follows:

- The Automotive & Industrial segment's 2003 revenues were €688 million, an increase of 20% from the 2002 comparative period's level of €573 million. The increase resulted mainly from higher sales volumes in automotive power as well as power management & supply products.
- Wireline Communications revenues improved to €217 million in the first half of the 2003 financial year, an increase of 21% from €179 million generated in the 2002 comparable period. The revenue increase was principally due to higher sales in the Asian markets of Ethernet over VDSL access technology and next generation ADSL technology for central office applications. This reflects the successful alignment of our portfolio of leading edge broadband access products to current market needs.
- Secure Mobile Solutions' first half 2003 financial year revenues were €788 million, an increase of 36% from the 2002 level of €580 million, which is mainly due to the recovery of the cellular market in combination with a strong Christmas business in 2002 and an increased market share of our key customers, as well as the acquisition of the Ericsson Microelectronics business.
- The Memory Products segment's first half 2003 financial year revenues were €1,151 million, an increase of 32% from the comparative 2002 level of €875 million, based on significantly increased volumes attributable to our Dresden, Germany facility. Also included in Memory Products revenues in 2003 was €60 million of previously deferred licensing revenue related to the ProMOS joint venture, which was recognized as a result of the extinguishment of ProMOS indebtedness subject to our guarantee. From the beginning of January 2003, the spot market price for our major volume product, 256-Mbit DDR DRAM, declined by approximately 50% from \$6 to slightly below \$3 by the end of February. The price increased in March 2003 to a level of slightly above \$3 by the end of the month, according to DRAM Exchange.
- Revenues in the other operating segment for the first half of the 2003 financial year were €64 million, an increase of 14% for the comparable 2002 period.

Expenditures for research and development in the first half of the 2003 financial year totaled €519 million, or 18% of sales, a moderate reduction from €531 million. Selling, general and administrative expenses totaled €336 million or 11% of total revenues, declining from €329 million or 14% of total revenues in the first half of 2002. The decrease in these expenditures was mainly due to our ongoing cost reduction measures.

Other operating income (loss) for the six month period ending March 31, 2002 declined from €42 million to negative €7 million for the comparable 2003 period. This decline is attributable to the gains recognized in 2002 relating to the sale of the infrared component business. Equity in (losses) earnings of associated companies improved from a loss of €45 million to earnings of €25 million for the six month periods ended March 31, 2002 and 2003 respectively. This variance is primarily related to improved operating results at the ProMOS joint venture. Other expense, net for the March 31 six month period declined from €70 million in 2002 to €7 million in 2003, due principally to reduced foreign currency losses.

EBIT (earnings from continuing operations before interest, minority interest and taxes) for the first half of the 2003 fiscal year amounted to a loss of €254 million, compared to a loss of €735 million in the first half of 2002, due to improved performance in all segments, especially the Memory Products and Automotive & Industrial segments.

Liquidity

Our gross cash position, representing cash and cash equivalents, marketable securities and restricted cash amounted to €1.5 billion at March 31, 2003, compared to €2.0 billion at September 30, 2002. The decrease in gross cash was mainly due to investing activities, principally capital expenditures, exceeding cash flow from operations during the six month period. Free cash flow, representing cash flows from continuing operations, investing activities and discontinued operations, excluding purchases or sales of marketable securities, significantly improved to negative €452 million, compared to negative €634 million, which is an improvement of €182 million during the six month period ended March 31, 2003. This improvement mainly stems from higher operating cash flow, despite higher capital expenditures, compared to the previous six month period.

Outlook for the second half of financial year 2003

The current difficult global economic environment and the international uncertainties do not allow for any significant market visibility. In the second quarter, of the 2003 financial year we have seen a further positive development of demand in most of our segments, although price pressure remains intense in all segments. Looking forward, we expect a further positive development of demand in most of our segments. To compensate for the ongoing pricing pressure, we will continue to focus on improving productivity, further reducing costs and implementing our restructuring programs, as well as our Agenda 5-to-1. As announced in April 2003, we anticipate further reducing our workforce by up to 900 employees.

For our Secure Mobile Solutions segment, we expect a further moderate increase of demand for GSM/GPRS mobile handsets, which is likely to have a positive effect on the demand for Bluetooth products as well. We also expect an ongoing difficult market environment with continued strong pricing pressure for silicon discretes. Industry analysts are predicting a reduction of capital expenditures in the global wireline telecom infrastructure market in 2003, but with regional differences, including moderate growth in Europe. We expect continuing pricing pressure in our fiber optics business, but improved demand for broadband access technology (ADSL, VDSL), particularly in Asia and Japan.

In the automotive electronics and automotive semiconductor markets, we expect the pricing pressure to continue. However, the Company anticipates that further productivity increases combined with its strong portfolio for automotive power and power management and supply products could lead to additional market share gains. On May 20, 2003, we announced that we are planning to acquire SensoNor ASA, Horten, Norway, a leading developer and producer of tire pressure and acceleration sensors. With this acquisition we aim to strengthen our position in semiconductor sensors for the automotive business. We expect to pay an aggregate consideration of approximately €48 million which will include a capital increase of SensoNor ASA of approximately €13 million. The Company has made a tender offer to the shareholders of SensoNor ASA subject to certain conditions. The management board of SensoNor ASA has recommended that the tender offer be accepted.

At the beginning of the third quarter of the 2003 financial year, we have seen strong demand from OEMs for memory products and a slightly improved pricing environment. However, near-term visibility for the DRAM market remains poor. A positive development of demand and a sustained improvement in prices are still dependent upon an acceleration of the corporate IT equipment replacement cycle, increased infrastructure investments, and higher Megabit per box sales.

2002 Financial Year compared with 2001 Financial Year

Net Sales

Net sales decreased by 9 percent to €4,890 million from €5,347 million in the 2001 financial year. The decrease in net sales was primarily due to significantly lower net sales in our Wireline Communications and Secure Mobile Solutions segments, brought upon by the dramatically reduced capital spending of global telecommunication carriers, weak demand and strong overall pricing pressure. This decrease could only be partially offset by increased sales in our Memory Products and Automotive & Industrial segments. Memory Products continued to be the largest business segment, representing 38 percent of total net sales for the 2002 financial year, compared to 30 percent in the prior year. During the first three quarters of the 2002 financial year, net sales improved on a sequential quarterly basis, before decreasing in the fourth quarter, primarily as a result of the decline in prices for memory products.

The following section describes the net sales of our main business segments during the 2002 financial year, compared to the 2001 financial year:

- Wireline Communications — Total net sales of our Wireline Communications segment decreased by nearly 50 percent to €386 million in the 2002 financial year from €766 million in the 2001 financial year. Net sales declined in the second half of the 2001 financial year, and reached the lowest level in the first quarter of the 2002 financial year. Since then, consecutive quarterly sequential growth has been achieved.

The year-on-year reduction in sales was primarily caused by dramatic declines in the fiber optics market and traditional telecommunications market sectors such as ISDN, analog technology, high-speed data transmission and enterprise telephony. The telecommunications boom of 2000 eventually resulted in a broad-based market collapse, especially in the USA and Europe. The fiber optics market suffered a more severe collapse than the traditional telecom markets. This resulted in an approximate 30 percent decline in our fiber optics revenues. The successful market penetration of our VDSL/10BaseS and xDSL technologies — especially in the Asia/Pacific region — partially offset the dramatic decline in the traditional telecom segments.

- Secure Mobile Solutions — Net sales of our Secure Mobile Solutions segment decreased by 16 percent to €1,278 million in the 2002 financial year from €1,522 million in the 2001 financial year. This was mainly due to the decreased demand in mobile communications and lower prices of Security and Chip Card ICs in the 2002 financial year.
- Automotive & Industrial — Net sales of our Automotive & Industrial segment increased by 4 percent to €1,201 million in the 2002 financial year from €1,153 million in the 2001 financial year. Sales increased on a quarterly sequential basis throughout the year. The increase was mainly due to higher volumes, especially for power management and supply products, but this was partially offset by lower prices, mainly for automotive applications. The increase took place despite the worldwide decline in automobile production through expanding business for power management solutions in Asia and for power ICs.

In particular, we achieved a significant gain in market share in automotive applications (2nd worldwide for chips used in automotive applications, market leader in Europe) and power ICs (23 percent market share for IGBT modules according to WSTS). In the field of power management solutions, we continued our success with our CoolMOS™ and OptiMOS™ products.

- Memory Products — Net sales of the Memory Products segment increased by 15 percent to €1,861 million in the 2002 financial year from €1,614 million in the 2001 financial year. The increase in net sales was principally due to higher bit-volume sold, despite lower average DRAM prices during the 2002 financial year compared to the previous year.

Overall Megabit volume substantially increased during the 2002 financial year, as a result of the commercial production of 256-Mbit DRAM chips exceeding the production of 128-Mbit DRAM, and the introduction of 512-Mbit DRAM chips to the market.

The price of memory ICs more than doubled during the first half of the year, before declining again towards the end of the year. Price levels at the end of the financial year were still slightly higher than at the beginning. For some of our products, the sales prices at the end of the 2002 financial year were lower than our full production costs. Price differentials between SDRAM and DDR DRAM, 128-Mbit and 256-Mbit as well as contract and spot market prices fluctuated throughout the year. This resulted in a low price differential between 128-Mbit and 256-Mbit and a high price premium for DDR chips at the end of the financial 2002 year. We are continuing our efforts to optimize our product mix between DDR DRAM and SDRAM to take advantage of these market price differentials, and aim to increase our focus on high-end products such as 512-Mbit and specialty DRAM products. Our average per Megabit selling prices declined by approximately 30 percent in the 2002 financial year.

Net sales of hard disk drive controllers further declined compared to the 2001 financial year. This was due to delays in the development and introduction of new products.

We recognized license revenues of €147 million in the 2002 financial year, compared to €88 million in the 2001 financial year.

- Other Operating Segments — Net sales of our Other Operating segments decreased by 50 percent to €117 million in the 2002 financial year from €236 million in the 2001 financial year, which is principally due to the sale of our infrared component business in the first quarter of the 2002 financial year.

Net Sales by Region and Customer

On a regional basis, sales in Europe represented 45 percent of total sales in the 2002 financial year, compared to 53 percent in the prior year. At the same time, we generated 55 percent of our sales outside of Europe, compared to 47 percent in the previous year. Higher volume sales of memory products in the United States and the Asia/Pacific regions accounted for the higher share in our non-European business.

Only one customer, Siemens Group, accounted for more than 5 percent of our net sales in each of the 2001 and 2002 financial years. Sales to Siemens Group comprise both direct sales to the Siemens Group, which accounted for 14 percent and 12 percent of net sales in the two years respectively, as well as sales designated for resale to third parties, which accounted for 2 percent of net sales in each of the two years, respectively. Sales to Siemens Group are made primarily by our Secure Mobile Solutions and Automotive & Industrial segments.

Cost of Goods Sold

Cost of goods sold decreased by 6 percent to €4,289 million from €4,580 million in the 2001 financial year.

Cost of goods sold as a percentage of net sales improved in the first half of the 2002 financial year from the negative margin levels experienced in the second half of the 2001 financial year, but declined in the second half of the 2002 financial year, principally due to pricing pressure for memory products. In the 2001 financial year we recorded inventory write-downs of €358 million as a result of significant price declines and order cancellations. The cost of underutilized non-memory products capacity reduced the margin improvement experienced in the first half of the 2002 financial year. This trend was reversed in the second half of the 2002 financial year, mainly due to increased volume in our communications segments.

In the 2002 financial year, the cost of goods sold represented 88 percent of sales compared to 86 percent in the 2001 financial year. Accordingly, for the 2002 financial year, gross margin was 12 percent of sales compared to 14 percent for the 2001 financial year. Due to our efforts in our Impact cost reduction program, the effect of the decline in sales was partially offset by cost savings and production efficiencies.

The following represents a description of developments in the cost of goods sold for each of our core business segments as a percentage of net sales:

- Wireline Communications — a relative increase in the cost of goods sold to 71 percent of sales compared to 55 percent in the 2001 financial year. The increase was mainly due to the substantial decline in sales volume attributable to overall lower industry demand, resulting from reduced capital spending by global telecommunication carriers. This decline in sales volume led to lower coverage of fixed costs, especially in the facilities producing fiber optics.

Furthermore, cost of goods sold was negatively impacted by changes in the mix of products sold compared to the prior year. This was characterized by a dramatic decrease in traditionally high-margin products in the telecommunication and datacom segments, the phasing out of mature products with relatively low production costs, as well as the introduction of new products with higher ramp-up costs.

- Secure Mobile Solutions — a relative decrease in the cost of goods sold to 70 percent compared to 74 percent of sales in the 2001 financial year. This resulted from a combined effect of a reduced cost of goods sold percentage for wireless products and an increased cost of goods sold percentage for Security & Chip Card ICs products. The reduction of cost of goods sold percentage for wireless products was mainly due to a change in the product mix, whereby higher margin baseband products were introduced and improvements in operational manufacturing performance were made. The increase of cost of goods sold percentage of Security & Chip Card ICs resulted from adversely impacted margins caused by idle capacity costs, resulting from lower demand, and strong pricing pressure, especially for SIM card ICs.
- Automotive & Industrial — a relative increase in the cost of goods sold to 67 percent compared to 64 percent in the 2001 financial year. Although sales were at record levels, strong competitive pricing pressure resulted in overall lower gross margins in the 2002 financial year.

- Memory Products — a relative decrease in the cost in goods sold to 106 percent compared to 125 percent in the 2001 financial year. This improvement was mainly attributable to increased productivity and cost reductions, as well as the benefit from higher volume sales. The decrease was partially offset by the effect of sales price declines, specifically at the end of the fourth quarter of the 2002 financial year. Gross margins in the 2001 financial year were negatively impacted by inventory write-downs.

Cost of sales in corporate and reconciliation increased from €84 million to €272 million in the 2002 financial year, mainly reflecting an increase in the unallocated cost of underutilized capacity over the prior year.

We report as cost of goods sold the cost of inventory purchased from our joint ventures ProMOS and ALTIS Semiconductor, and in the 2001 financial year also from our OSRAM Opto joint venture. Our purchases from these joint ventures and other associated and related companies amounted to €686 million in the 2002 financial year and €1,040 million in the 2001 financial year.

Research and Development (R&D) Expenses

R&D decreased 11 percent to €1,060 million from €1,189 million in the 2001 financial year. This reflects the overall decrease in R&D spending within the framework of the Impact cost reduction program. The majority of R&D expenses were project-related expenses for our key markets, and comprised costs for human resources, licensing fees, laboratory facilities and software. Additional amounts were spent on the development of CPUs for products and developmental libraries for basic circuits. In-process research and development charges amounted to €37 million in the 2002 financial year, compared to €69 million in the 2001 financial year. R&D expenses were 22% of net sales in the 2001 and 2002 financial years. R&D expenditure trends in our segments included the following:

- Wireline Communications — a relative increase in R&D expenses to 60 percent of sales in the 2002 financial year compared to 40 percent in the 2001 financial year. This is primarily due to the substantial decrease in revenues compared to the previous year. However, in absolute terms, R&D expenses decreased significantly, mainly because acquired in-process R&D of €69 million charged in the 2001 financial year related to the Ardent and Catamaran acquisitions did not recur in the 2002 financial year. Excluding in-process R&D, R&D expenses were comparable in the two financial years.
- Secure Mobile Solutions — a relative increase in R&D expenses to 28 percent of sales in the 2002 financial year compared to 25 percent in the 2001 financial year. This increase is a combined effect of wireless products as well as Security & Chipcard IC products. For wireless products, the increase reflects the decrease in sales and acquired in-process R&D of €37 million related to the Ericsson Microelectronics (MIC) acquisition in the 2002 financial year. In absolute terms, R&D expenditures, excluding acquired in-process R&D, decreased compared to the 2001 financial year. For Security & Chipcard IC products the increase was due to the fact that the decrease in sales more than offset the decrease in R&D in absolute terms. Such decrease was facilitated by portfolio optimization and restructuring measures.
- Automotive & Industrial — a relative increase in R&D expenses to 13 percent of sales in the 2002 financial year compared to 12 percent in the 2001 financial year.
- Memory Products — a relative decrease of R&D expenses to 16 percent of sales in the 2002 financial year compared to 20 percent in the 2001 financial year. This was the result of cost reduction efforts and an overall increase in sales volume, as well as a decrease in R&D costs for hard disc drive controllers in absolute terms.

Government subsidies for our R&D activities were €59 million in the 2002 financial year and €71 million in the previous year.

Selling, General and Administrative (SG&A) Expenses

SG&A expenses comprise both selling expenses and general administrative expenses. The balance of SG&A expenses in each year comprises overhead, personnel, advisors' fees and other administrative expenses. SG&A expenses decreased by 18 percent to €643 million in the 2002 financial year compared to €782 million in the 2001 financial year. SG&A expenses declined to 13 percent of sales in the 2002 financial year compared to 15 percent in the previous year, mainly due to the Impact cost reduction program and the decline in sales.

Selling expenses decreased 24 percent to €341 million, or 7 percent of sales, from €449 million, or 8 percent of sales, in the 2001 financial year. This reflects the impact of cost reduction measures taken since the previous year, including headcount reductions and optimization of selling and marketing functions and processes.

General and Administrative (G&A) expenses decreased 9 percent to €302 million, or 6 percent of sales, from €333 million, or 6 percent of sales, in the 2001 financial year. G&A expenses decreased in absolute as well as in relative terms due to optimization of processes and successful implementation of our Impact cost reduction program, including headcount reductions and IT-cost savings. We also donated €2 million to support the victims of the flood catastrophe in Dresden in the summer of 2002.

Restructuring

In the fourth quarter of the 2001 financial year, we approved plans to restructure our organization and reduce costs under a comprehensive program called "Impact". In connection with this program, we recorded restructuring charges of €117 million in the fourth quarter of the 2001 financial year.

We completed our announced headcount reduction in the 2002 financial year. In completing this program, we recorded additional restructuring expenses of €16 million in the 2002 financial year, principally relating to non-cancelable commitments.

Other Operating Income, Net

Other operating income, net, amounted to €46 million in the 2002 financial year, reflecting the pre-tax gains of €39 million from the sale of the remaining part of the infrared components business and €2 million from the sale of our gallium arsenide business. In the 2001 financial year, other net operating income amounted to €200 million, which reflected the pre-tax gains of €202 million from the sale of the image & video business and €26 million from the sale of the infrared components business.

Earnings Before Interest and Taxes (EBIT)

We recorded an EBIT loss of €1,142 million in the 2002 financial year, compared to an EBIT loss of €1,024 in the 2001 financial year.

Equity in Earnings (Losses) of Associated Companies

Equity in the earnings (losses) of associated companies is reflected primarily in the results of the Memory Products segment. Equity in the losses of associated companies amounted to €47 million in the 2002 financial year compared to earnings of €21 million in the 2001 financial year. Our share of losses of the ProMOS joint venture amounted to €53 million in the 2002 financial year compared to earnings of €17 million in the 2001 financial year, reflecting continuing weakness in the DRAM market.

Interest Expense, Net

We recorded net interest expense of €25 million in the 2002 financial year compared to €1 million in the 2001 financial year. This increase is mainly due to the interest on our convertible bond and financing costs for the 300-millimeter production facility in Dresden, which was partially offset by €12 million of additional interest earned from liquid investments.

Income Taxes

We recorded an income tax benefit of €143 million in the 2002 financial year, which represents an effective income tax rate of 12 percent. This compares with income tax benefits of €427 million in the 2001 financial year, representing an effective income tax rate of 42 percent. The change in the effective tax rate in the 2002 financial year mainly reflects an additional valuation allowance on deferred tax assets of €271 million.

We have evaluated our deferred tax asset position and the need for a valuation allowance. The assessment requires the exercise of judgment on the part of our management, with respect to, among other things, benefits that could be realized from available tax strategies and future taxable income, as well as other positive and negative factors. The ultimate realization of deferred tax assets is dependent upon our ability to generate the appropriate character of future taxable income sufficient to utilize loss

carry forwards or tax credits before their expiration. Since we have incurred a cumulative loss in certain tax jurisdictions over the three-year period ended September 30, 2002, the impact of forecasted future taxable income is excluded from such an assessment, pursuant to the provisions of Statement of Financial Accounting Standards (“SFAS”) No. 109. For these tax jurisdictions, the assessment was therefore only based on the benefits that could be realized from available tax strategies and the reversal of temporary differences in future periods. As a result of this assessment, we recognized an additional deferred tax asset valuation allowance as of September 30, 2002 of €271 million related to continuing operations, to reduce the deferred tax asset to an amount that is more likely than not expected to be realized in the future.

We assess our deferred tax asset position on a regular basis. Our ability to realize deferred tax assets is dependent on our ability to generate future taxable income sufficient to utilize tax loss carryforwards or tax credits before their expiration. As a result of recently incurred tax losses, we expect to recognize deferred tax benefits in the 2003 financial year at a lower rate than in the past, until such time as taxable income is generated from operations in tax jurisdictions that would utilize our tax loss carryforwards in those jurisdictions.

Generally German tax loss carryforwards do not expire. The German Government’s proposal to reduce the ability to offset current tax losses against taxable income earned in future years has not been enacted. However, there are ongoing political discussions about some further restrictions. Under US GAAP, we would recognize the effect of such changes upon the date of their enactment into law. We cannot now determine the content, timing or impact of such amendments, if enacted.

EBIT

We define EBIT as earnings (loss) from continuing operations before interest, minority interest and taxes. Management uses EBIT as a measure to establish budgets and operational goals, to manage the Company’s business and to evaluate its performance. We report EBIT information because we believe that it provides investors with meaningful information about the operating performance of the Company. EBIT is determined as follows from the statement of operations, without adjustment to the US GAAP amounts presented:

Cash Flow

	For the year ended September 30,	
	2001	2002
	<i>(€ in millions)</i>	
Net cash provided by operating activities from continuing operations	221	226
Net cash used in investing activities	(1,813)	(1,244)
Net cash provided by financing activities	1,846	1,448
Cash and cash equivalents at period end	757	1,199

The statement of cash flows shows the sources and uses of cash during the reported periods. It is of key importance for the evaluation of our financial position.

Cash flows from investing and financing activities are both determined based on payments and receipts. Cash flows from operating activities are determined indirectly from net income (loss). The changes in balance sheet items in connection with operating activities have been adjusted for the effects of the foreign currency exchange calculations and for changes in the scope of consolidation. Therefore, they do not conform to the corresponding changes in the respective balance sheet line items.

Cash provided by operating activities from continuing operations for the 2002 financial year increased to €226 million from €221 million in the 2001 financial year. Significant non-cash items impacting cash flows from operating activities include an increase in depreciation and amortization of €249 million and a decrease in deferred tax benefit of €216 million, primarily due to an additional valuation allowance of €271 million. Significant changes in operating assets and liabilities include an increase in trade accounts receivables of €131 million, offset by an increase in other net liabilities of €181 million.

Cash used in investing activities in the 2002 financial year decreased to €1,244 million (2001: €1,813), principally attributable to purchases of property and equipment purchases of €643 million (2001: €2,282 million). This primarily related to the completion of the 300-millimeter facility in Dresden, and investments in marketable securities of €709 million (2001: €82 million). Additionally, we made investments in associated and related companies and intangible assets of €127 million (2001: €296 million). Cash provided by investing activities mainly related to proceeds from sales of non-core businesses of €96 million (2001: €346 million) and cash of €50 million received through the acquisition of MIC.

Cash provided by financing activities totaled €1,448 million in the 2002 financial year (2001: €1,846 million). This includes a €450 million loan for the 300-millimeter production facility in Dresden and €981 million in net proceeds from our convertible bond offering in February 2002. Cash flow from financing activities in the 2001 financial year included €1,475 million from our secondary share offering.

Cash and cash equivalents at the end of the 2002 financial year increased to €1,199 million from €757 million at the end of the 2001 financial year.

Financial Condition

As of September 30, 2002, our total assets amounted to €10,918 million, an increase of 12 percent compared to €9,743 million at the end of the 2001 financial year. Cash, cash equivalents and marketable securities increased to €1,937 million, from €850 million at the end of the 2001 financial year. The increase principally reflects the proceeds derived from the convertible bond offering launched in January 2002 and the loan for the 300-millimeter production facility in Dresden, partially offset by cash used in investing activities. Non-current assets decreased by 2 percent to €6,727 million from €6,867 million at the end of the 2001 financial year. This decrease mainly relates to property, plant and equipment, due to the fact that depreciation expense exceeded capital expenditures by €677 million. The decrease was partially offset by capitalized deferred income taxes and increased other assets due to the acquisition of MIC.

Total liabilities increased by 67 percent to €4,760 million, up from €2,843 million in the 2001 financial year. This increase was mainly due to the increase in long-term debt of €1,461 million to €1,710 million, attributable to our convertible bond offering and the loan for the 300-millimeter production facility in Dresden. Other non-current liabilities increased by 80 percent to €609 million, mainly due to deferred government grants. The unfunded status of our pension plans increased to €103 million from €70 million at the end of the 2001 financial year, mainly due to lower-than-expected equity market returns. Our funding requirements for these plans may be adversely affected in the future if such trends continue. However, during the 2002 financial year, contributions to our pension plans offset the decline in fair value of their assets.

Our shareholders' equity decreased by 11 percent to €6,158 million, down from €6,900 million in the 2001 financial year. This mainly reflects the issuance of new shares of €325 million related to the purchase of MIC in September 2002, and the net loss of €1,021 million. At September 30, 2002, shareholders' equity as a percentage of total assets was 56 percent, down from 71 percent at September 30, 2001.

Capital Requirements

Our net cash position — meaning cash and cash equivalents, plus marketable securities and restricted cash, less total financial debt — decreased by €391 million to €177 million at September 30, 2002, compared to €568 million at September 30, 2001.

As of September 30, 2002, we had debt of €120 million scheduled to become due within one year. We believe we will be in a position to fund all these payments through existing cash balances, cash flows from operations, borrowings and the renewal of debt in the ordinary course of business.

On February 6, 2002, we (as guarantor), through our subsidiary Infineon Technologies Holding B.V. (as issuer), issued €1,000 million in subordinated convertible notes at par in an underwritten offering to institutional investors in Europe. The notes are convertible, at the option of the holders of the notes, into our shares at a conversion price of €35.43 per share. Upon conversion, we may pay a cash amount in lieu of delivery of all or part of the shares. The convertible notes accrue interest at 4.25 percent per year and have a five-year maturity. We may redeem the convertible notes after three years at their principal amount plus interest accrued thereon, if our share price exceeds 115 percent of the conversion price for a 30-day period. The convertible notes are listed on the Luxembourg Stock Exchange.

The above table should be read in conjunction with Note 31 to our consolidated financial statements for the year ended September 30, 2002.

- (1) US dollar amounts have been translated to euro at the rate of €1 = \$0.9879, which was the noon buying rate on September 30, 2002.
- (2) Certain payments of obligations or expiration of commitments that are based on the achievement of milestones or other events that are not date-certain, are included for purposes of this table, based on our estimate of the reasonably likely timing of payments or expirations in the particular case. Actual outcomes could differ from those estimates.
- (3) Product purchase commitments associated with capacity reservation agreements are not included in this table, since the purchase prices are based, in part, on future market prices, and are accordingly not quantifiable at September 30, 2002.

Included in the above table:

- We will be required to make additional investments of technology and cash contributions in the UMCi joint venture totaling \$405 million over the next two years.
- Further to our formation as a separate legal entity, we agreed to indemnify Siemens against any losses it may suffer under a small number of guaranty and financing arrangements that relate to our business but that could not be transferred to us for legal, technical or practical reasons. These arrangements, as of September 30, 2002, include a guaranty of a letter of credit of €313 million, relating to contingent liabilities for government grants previously received.
- Siemens AG has guaranteed the indebtedness of ProMOS up to the amount of \$61 million. We provided Siemens with a backup guaranty. This indebtedness was satisfied subsequent to September 30, 2002.

Not included in the above table are commitments of €550 million to be made over a three-year period ending September 30, 2005 relating to agreements entered into on November 13, 2002 with Nanya for the joint development of advanced DRAM technologies and the construction of a jointly-owned 300-millimeter manufacturing facility in Taiwan.

We have established independent financing arrangements with several financial institutions, in the form of both short and long-term credit facilities, which are available for anticipated funding purposes. These facilities (which include the amended revolving credit facility of €750 million and syndicated credit facility of €450 million as described below) aggregate €2,183 million, of which €1,340 million was available at September 30, 2002, and are comprised of the following components:

Credit Facilities			As of September 30, 2002		
Term	Nature of financial institution commitment	Purpose/intended use	Aggregate facility	Drawn	Available
			<i>(€ in millions)</i>		
short-term	firm commitment	working capital, guarantees, cash pooling	911	96	815
short-term	no firm commitment	working capital	152	–	152

long-term ⁽¹⁾	firm commitment	project finance	736	736	–
			<u>2,183</u>	<u>843</u>	<u>1,340</u>

(1) Including current maturities.

We have a €450 million syndicated credit facility relating to the expansion of the Dresden manufacturing facility. The credit facility is supported by a partial guarantee of the Federal Republic of Germany and another governmental entity. The credit facility contains specified financial covenants, provides for annual payments of interest and matures on September 30, 2005.

On September 30, 2002, we entered into a new revolving credit facility with a syndicate of financial institutions to replace our previous facility. As amended, the total amount of the facility is €750 million, which is divided into two equal tranches. The first tranche of €375 million expires in September 2003. The second tranche of €375 million expires in September 2005. The facility has customary financial covenants and bears market related interest. At September 30, 2002, there were no amounts outstanding under this facility.

At September 30, 2002, we were in compliance with our covenants related to the relevant credit facilities.

Capital Expenditures

	Year ended September 30,		Planned
	2001	2002	2003
	<i>(€ in millions)</i>		
Memory products	1,380	470	630
Non-memory products	902	173	350
Total	<u>2,282</u>	<u>643</u>	<u>980</u>

We expect to invest approximately €980 million in capital expenditures in the 2003 financial year, largely for improving productivity and upgrading technology at existing facilities. Due to the lead times between ordering and delivery of equipment, a substantial amount of capital expenditures typically is committed well in advance. Approximately 64 percent of these expected capital expenditures will be made in the Memory Products business group's front-end and back-end processes. Approximately 36 percent of these planned capital expenditures will be invested in our non-memory facilities. In addition, certain of the commitments and contingencies summarised on pages 81 and 82 include significant capital expenditure investments of Infineon Technologies AG's joint-ventures.

We plan to fund our working capital and capital requirements from cash provided by operations, available funds, bank loans, government subsidies and, depending on market conditions, the issuance of debt or additional equity securities. We have also applied for governmental subsidies in connection with certain capital expenditure projects, but can provide no assurance that such subsidies will be granted in a timely fashion or at all. We cannot assure you that we will be able to obtain additional financing for our research and development, working capital or investment requirements or that any such financing, if available, will be on terms favorable to us.

Capitalization

The following table sets forth, as of March 31, 2003, our actual and as adjusted consolidated capitalization to reflect the sale of the guaranteed subordinated convertible notes we are selling in this offering, after deducting the fees and commissions payable to the Underwriters and our estimated offering expenses.

Save as disclosed in the section entitled "General Information — Material Adverse Change", there has been no material change in the capitalization of the Guarantor since September 30, 2002.

Other than the Notes, which are the subject of this Offering Circular and the €1 billion 4.25% Guaranteed Subordinated Convertible Notes due 2007, the Company has no outstanding convertible debt securities, exchangeable debt securities or securities with warrants attached.

Compensation of management and supervisory boards

Under our Articles of Association, the annual compensation is €25,000 for each member of the supervisory board. The chairman of the supervisory board receives 200% of this amount and each of the deputy chairman and each member of certain committees receive 150% of this amount. The aggregate compensation of the members of our supervisory board for the 2002 financial year was €526,833 (consisting of fixed components €526,833, variable components €0 and consideration for other personally rendered services €0). In addition, all members of the supervisory board receive 1,500 share appreciation rights (*Wertsteigerungsrechte*) per year, which are granted and may be exercised for cash under the same conditions as options granted under the then-current long-term incentive plan.

The aggregate remuneration of the five members of our management board in respect of the 2002 financial year consisted of €1.6 million in fixed salaries, plus options to purchase an aggregate of 290,000 shares. These options had an aggregate fair value at their grant date of €2.8 million (which is not reflected as compensation expense under U.S. GAAP). These options have an exercise price of €23.70 per share; will become exercisable no earlier than December 4, 2003, subject to the condition that the trading price of our ordinary shares on the Frankfurt Stock Exchange will have reached the exercise price on at least one trading day; and will expire on December 3, 2008. Bonuses in the aggregate amount of €3.2 million were accrued with respect to members of the management board for the 2002 financial year.

During the 2002 financial year, we made the standard annual grant of 1,500 share appreciation rights to each member of our supervisory board, as described above, but did not grant any additional options to the members of our supervisory board.

Long-Term Incentive Plans

1999 Share Option Plan

Under our 1999 Share Option Plan, we granted non-transferable share options to members of our management board, directors of subsidiaries and affiliates, managers and key employees.

As of September 30, 2002, options to purchase an aggregate of 10,471,570 shares were outstanding under the 1999 plan, of which options to purchase 1,302,000 shares were held by members of our management board. The 1999 plan was discontinued and, accordingly, we no longer grant options under that plan. When options are exercised, our company may either issue new shares from its conditional capital or deliver previously issued shares.

2001 International Long-Term Incentive Plan

In April 2001, we adopted the Infineon Technologies AG 2001 International Long-Term Incentive Plan, which we refer to as the 2001 plan. Under the 2001 plan, we have the authority to grant, over a five-year period, non-transferable share options to members of our management board, the top management of our subsidiaries and other senior level executives and employees with exceptional performance at Infineon Technologies AG and our subsidiaries. We may grant options covering up to 2.5 million shares to members of our management board, 6.3 million shares to members of the top management of our German and foreign subsidiaries and 42.7 million shares to senior level executives and employees with exceptional performance below management board level of Infineon Technologies AG and below top management level of domestic and foreign subsidiaries. We may not grant options under the 2001 plan covering more than 51.5 million shares in our company in the aggregate. As of September 30, 2002 options to purchase an aggregate of 9,411,640 shares were outstanding under the 2001 plan, of which options to purchase 290,000 shares were held by members of our management board.

When options are exercised, our company may either issue new shares from its conditional capital, deliver previously issued shares or elect to settle the options in cash.

Employee Share Purchase Program

We have implemented an employee share purchase program ("ESPP") under which most of our employees, including employees of designated subsidiaries, will be offered the opportunity to purchase our shares at a discount. It is generally contemplated that our shares will be offered to employees at a discount of 15% from the then current market price of our company's shares on the Frankfurt Stock Exchange. We expect that there would be offerings under the ESPP in each financial year, but there will be no offering in the 2003 financial year.

We have also adopted two separate plans that allow our eligible employees who are based in Germany, as well as eligible employees of our participating German subsidiaries, to purchase additional shares under the ESPP.

We issued 355,460 shares under the ESPP for the 2002 financial year. Employees who purchase shares under the ESPP may not transfer those shares for a period of time to be determined by a committee of our management board prior to each offering period.

Principal Shareholders

The following table shows the ownership of our Company's share capital by the principal shareholders (each person or entity who owns 5% or more of our shares) as of May 30, 2003. We are not directly or indirectly owned or controlled by any foreign government.

	Shares owned

Wachovia Trust Company, as trustee ⁽¹⁾	200,000,000	27.7
Siemens Nederland N.V. ⁽²⁾	86,292,363	12.0
Fidelity Management & Research Company	37,580,186	5.08

(1) Siemens AG reported that it transferred these shares to the Wachovia Trust Company (formerly First Union Trust Co.), as trustee under a trust agreement dated December 4, 2001. We understand that under the terms of the trust agreement, the shares transferred to the trust may not be voted, as Siemens has relinquished its voting rights in those shares while they are held in trust and the trustee is not permitted to vote the shares it holds in trust. We also understand that Siemens continues to be entitled to all of the benefits of economic ownership of these shares held by the trustee. Further information and a copy of the trust agreement may be obtained from Siemens AG's annual report on Form 20-F for its financial year ended September 30, 2002.

(2) Siemens Nederland N.V. is a wholly-owned subsidiary of Siemens AG.

In August 2000, Siemens Nederland N.V. issued 25,000 bonds with a nominal value of €100,000 each, each of which is exchangeable at the option of the holders thereof into 1,000 of our company's shares at an exchange price of €100 per share. The exchange feature may be exercised on any business day during the exchange period, which commenced on August 10, 2001, inclusive, and ends

ten business days before August 10, 2005, which is July 27, 2005, or, in the event of early redemption by the issuer on and including the fourth business day immediately preceding the day fixed for such early redemption.

Under German law, as long as Siemens holds more than 25% of the shares in our company represented at a shareholders' general meeting, it would be in a position to block shareholder action on a variety of matters, including the exclusion of preemptive rights in a capital increase, or any capital decrease, merger, consolidation, spin-off, sale or other transfer of all or substantially all of our assets, a change in the corporate form or business purpose of our company or the dissolution of our company.

TAXATION

The following summary of certain Dutch and German taxation consequences is based on the laws and practice in force as of the date of this Offering Circular and is subject to any changes in law and practices (and the interpretation and application thereof) occurring after such date, which changes could be made on a retroactive basis. The following summary does not purport to be a comprehensive description of all the tax considerations that may be relevant to a decision to acquire, hold or dispose of the Notes or to convert Notes into Shares, and does not purport to deal with the tax consequences applicable to all categories of investors, some of which (such as dealers in securities) may be subject to special rules. This summary is of a general nature based on the understanding of the Issuer and the Guarantor of current law and practice. It does not address any changes which may arise from a corporate restructuring of the Infineon Technologies group in accordance with § 7(5) of the Conditions or the substitution of Infineon Technologies AG as guarantor for any other reason in accordance with § 14(1) of the Conditions. The occurrence of such an event may have an impact on the considerations dealt with in the following summary. The noteholders are advised to consult their own tax advisors as to the tax consequences of such changes. Save as otherwise indicated, this summary only addresses the position of investors who do not have any connection with The Netherlands other than the holding of the Notes. Investors should consult their professional advisers on the possible tax consequences of their subscribing for, acquiring, holding, selling or redeeming Notes or converting Notes into Shares under the laws of their country of citizenship, residence, domicile or incorporation.

The Netherlands

Withholding Tax

All payments by the Issuer of interest and principal under the Notes can be made free of withholding or deduction for, or on account of, any taxes of whatsoever nature imposed, levied, withheld or assessed by The Netherlands or any political subdivision or taxing authority thereof or therein.

Taxes on Income and Capital Gains

A holder of a Note who derives income from a Note or who realises a gain on the disposal, the conversion into Shares, or redemption of a Note will not be subject to Dutch taxation on such income or capital gains unless:

- (i) the holder is, or is deemed to be, resident of The Netherlands or, if the holder is an individual, such holder has elected to be treated as a resident of The Netherlands; or
- (ii) such income or gain is attributable to an enterprise or part thereof which is either effectively managed in The Netherlands or carried on through a permanent establishment (*vaste inrichting*) or permanent representative (*vaste vertegenwoordiger*) in The Netherlands; or
- (iii) the holder is not an individual and the holder has, directly or indirectly, a substantial interest (*aanmerkelijk belang*) or a deemed substantial interest in the Issuer and such interest does not form part of the assets of an enterprise, or
- (iv) the holder is an individual and the holder has, directly or indirectly, a substantial interest (*aanmerkelijk belang*) in the Issuer or such income or gain otherwise qualifies as income from miscellaneous activities (*belastbaar resultaat uit overige werkzaamheden*) in The Netherlands as defined in the Dutch Income Tax Act 2001 (*Wet inkomstenbelasting 2001*).

Gift, Estate or Inheritance Taxes

Dutch gift, estate or inheritance taxes will not be levied on the occasion of the transfer of a Note by way of gift by, or on the death of, a holder, unless:

- (i) the holder is, or is deemed to be, resident of The Netherlands for the purpose of the relevant provisions; or
- (ii) the transfer is construed as an inheritance or as a gift made by, or on behalf of, a person who, at the time of the gift or death, is or is deemed to be, resident of The Netherlands for the purpose of the relevant provisions; or
- (iii) such Note is attributable to an enterprise or part thereof which is carried on through a permanent establishment or a permanent representative in The Netherlands.

Value Added Tax

There is no Dutch value added tax payable in respect of payments in consideration for the issue of the Notes or in respect of the payment of interest or principal under the Notes, or the transfer of the Notes.

Other Taxes and Duties

There is no Dutch registration tax, capital tax, stamp duty or any other similar tax or duty payable in The Netherlands by a holder of a Note in respect of or in connection with the execution, delivery and/or enforcement by legal proceedings (including any foreign judgement in the courts of The Netherlands) of the Notes or the performance of the Issuer's or Guarantor's obligations under the Notes.

Residence

A holder of a Note will not become resident, or deemed to be resident, of The Netherlands by reason only of the holding of a Note or the execution, performance delivery and/or enforcement of the Notes.

Federal Republic of Germany

Although the Notes qualify as convertible notes (*Wandelanleihen*) pursuant to section 221 paragraph 1 German Stock Corporation Act for corporate law purposes, there is no clear guidance whether the Notes also qualify as convertible notes for German tax purposes. In light of the recent change of section 20 paragraph 2 no. 4 of the German Income Tax Act, it can, therefore, not be excluded that the German tax authorities will qualify the Notes as financial innovations. This applies in particular if the Notes will be converted into shares of another company than Infineon Technologies AG. The German tax consequences in this case are included in the following description.

Taxation of the Notes

Noteholders resident in Germany

Interest Payments. Individual or corporate Noteholders who are resident in the Federal Republic of Germany (individuals or entities whose residence, customary place of abode, statutory seat, head office or place of effective management or control is located in the Federal Republic of Germany) are subject to German personal or corporate income tax and solidarity surcharge thereon with any interest payment received on the Notes. Such interest is also subject to trade tax if the Notes are part of the assets of a German trade or business.

As the Notes are not issued by a German resident issuer the interest payments should not be subject to German withholding tax on interest from convertible notes (*Kapitalertragsteuer auf Zinsen aus Wandelanleihen*). However, if the Notes are kept or administered in a domestic securities deposit account by a German financial or financial service institution ("Disbursing Agent"), which term includes a German branch of a foreign financial or financial service institution but excludes a foreign branch of a German financial or financial service institution, ("German Administered Notes") a 30% withholding tax on interest payments plus a 5.5% solidarity surcharge thereon will be levied on interest payments, resulting in a total withholding tax charge of 31.65%.

Such withholding tax and solidarity surcharge thereon are credited against the German personal or corporate income tax and the respective solidarity surcharge of the Noteholder and any excess amount is refunded to the Noteholder.

Sale or Redemption of the Notes. If the Notes are sold or redeemed during a current interest period, the accrued interest received as part of the purchase price will be subject to personal or corporate income tax and solidarity surcharge thereon as well as to trade tax, where applicable. Accrued interest paid by a purchaser as part of the purchase price for the Notes can be deducted from the personal or corporate income tax base. The capital gains received on the sale of the Notes are only taxable if (i) the Notes are disposed of within one year after their acquisition or (ii) the Noteholder (or, in

the case of a transfer without consideration, his or her predecessor) at any time during the five years preceding the sale held an interest (including, among other things, shares and convertible bonds or convertible notes) of at least 1% in the issued share capital of Infineon Technologies AG or (iii) the Notes are held as business assets of a German trade or business of the Noteholder in which case the capital gains may also be subject to trade tax. However, after the amendment of the Income Tax Act by the Tax Amendment Act, it cannot be excluded entirely that the tax authorities will qualify the Notes as financial innovations in which case any positive difference between the purchase price paid by the Noteholder for the Notes and the proceeds received by the Noteholder from the sale or redemption is subject to income tax plus solidarity surcharge thereon as well as trade tax, where applicable, as additional deemed interest.

If the Notes are German Administered Notes the Disbursing Agent will be required to withhold tax (*Zinsabschlagsteuer*) on accrued interest included in the sale price at a rate of 30% (plus solidarity surcharge at a rate of 5.5% thereon), resulting in a total tax charge of 31.65%. If the accrued interest is separately invoiced, the tax base is the invoiced interest. If the accrued interest is not separately invoiced and the Notes were held in the same securities deposit account of the seller since the date of their acquisition by the seller, the tax base is the difference between the sales proceeds and the issue or purchase price of the Notes. If the accrued interest is not separately invoiced and the Notes are sold after a transfer from one securities deposit account to another securities deposit account kept at a different bank, the basis for the withholding tax and the solidarity surcharge on accrued interest will be the amount of 30% of the sales price.

Exercise of Conversion Right. According to administrative guidance the conversion of the Notes into Shares in case of a convertible note (*Wandelanleihe*) does not give rise to a taxable capital gain for purposes of personal or corporate income tax or trade tax. The purchase price for the Notes is carried over as acquisition costs for the Shares.

However, it cannot be excluded entirely that the German tax authorities will qualify the Notes as financial innovations. In that case, the conversion may be treated as a disposal of the Notes for tax purposes and the difference between the purchase price paid by the Noteholder for the Notes and, in principle, the fair market value of the Shares at the time of the exchange or the Cash Payment in lieu of the delivery of all or part of the Shares is also subject to income tax plus solidarity surcharge thereon. The 30% withholding tax plus solidarity surcharge applies in this case if the Notes are German Administered Notes. If any potential cash payment should not be sufficient to pay withholding tax plus solidarity surcharge, the Noteholder may be required to pay the entire amount of withholding tax plus solidarity surcharge or a part of that amount to the Disbursing Agent which is obliged to withhold the tax. If the Shares are delivered to the Noteholder, the fair market value for the Shares at the time of the exchange is considered to be the acquisition costs for the Shares.

If the Noteholder receives a Cash Payment in lieu of the delivery of all or a part of the Shares, any amount received in addition to the (*pro rata*) repayment of the principal of the Notes will be subject to tax as additional deemed interest.

Expenses related to the income from the Notes; special tax exemption. The Noteholder may deduct expenses related to the income from the Notes. Where no higher expenses related to income from capital investment are shown, the Noteholder is entitled for a standard deduction (*Werbungskosten-Pauschbetrag*) of €51 p.a. (€102 p.a. in the case of married couples filing joint returns), if the Notes are not held as business assets. In addition, Noteholders who do not hold the Notes as business assets are entitled to an annual special tax exemption (*Sparerfreibetrag*) for all capital investment income of €1,550 p.a. (€3,100 p.a. in the case of married couples filing joint returns). Income from the Notes is free of withholding tax up to these limits if an exemption order (*Freistellungsauftrag*) has been filed with the deposit bank. The same applies if the shareholder provides the deposit bank with a non-assessment certificate (*Nichtveranlagungsbescheinigung*) issued by the relevant tax office. The standard deduction and the special exemption apply to all investment income from capital investments (net of related expenses) received during the year including dividend income.

Noteholders not resident in Germany

Individuals or corporate Noteholders, who are not tax resident in Germany are in general not subject to German income tax with their interest income from the Notes unless the Notes are held as

business assets of a permanent establishment or a fixed base maintained in Germany in which case similar tax consequences as in case of Noteholders resident in Germany would apply.

Capital gains derived from a sale of the Notes will in general be subject to German personal or corporate income tax plus solidarity surcharge thereon if (i) the Notes are held as business assets of a German permanent establishment or fixed base of the Noteholder in which case also trade tax may apply, or (ii) if the Noteholder (or, in case of a transfer without consideration, his or her predecessor) at any time during the five years preceding the disposition held an interest (including among other things, shares and convertible bonds or convertible notes) of 1% or more in the issued share capital of Infineon Technologies AG. Most tax treaties to which Germany is a party provide for a complete exemption from German taxation in the case of (ii).

Taxation of the Shares received in Conversion of the Notes

Shareholders resident in Germany

Dividend taxation. Only half of the dividends received by a German-resident individual are subject to income tax (plus solidarity surcharge of 5.5% thereon) (so-called half income system). Accordingly, only one half of the expenses attributable to the shareholding are deductible. If an individual holds the Shares as assets of a German commercial business of such shareholder, the dividend is subject to trade tax, unless the shareholder holds 10% or more of the share capital of Infineon Technologies AG. For corporate shareholders such dividend income is in general free of corporate income tax and, if the shareholder held 10% or more of the share capital of Infineon Technologies AG, in general also free of trade tax. In this case, however, expenses directly economically related to the shareholding will only be deductible to the extent they exceed the amount of dividends received during the tax year.

Dividends are also subject to 20% withholding tax plus 5.5% solidarity surcharge (in total 21.1%), which will be credited or refunded to the shareholder.

Taxation of Capital Gains. Half of the capital gains from the disposal of the Shares received in exchange for the Notes by an individual as Noteholder are taxable, if (i) the Shares are held as business assets of a trade or business, (ii) the Shares are sold within one year after the exchange, or (iii) the Noteholder (or, in the case of a transfer without consideration, his or her predecessor) at any time during the five years preceding the disposition held an interest (including, among other things, shares and convertible bonds or convertible notes) representing 1% or more of the issued share capital of Infineon Technologies AG. For corporate shareholders capital gains from the disposal of the Shares are in general tax-free.

If and to the extent that capital gains would be tax-free, losses are also not deductible. Losses from the sale of the Shares held as personal (non-business) assets within the one-year period can only be set off against certain capital gains realized in the same year, the preceding year and the subsequent years.

Shareholders not resident in Germany

Dividend taxation. Dividend income received by a non-resident shareholder who does not hold the Shares as business assets of a permanent establishment or a fixed base in Germany is subject to withholding tax (plus solidarity surcharge thereon) only. The rate is the same as applicable to resident shareholders, unless a tax treaty reduces the withholding to a lower rate. The difference between the withholding tax including solidarity surcharge which was levied and the maximum rate of withholding tax permitted by an applicable tax treaty is refunded to the shareholder by the German Federal Tax Office upon application.

Capital gains. Capital gains from the disposition of the Shares are only subject to German tax if (i) such shareholder (or, in the case of the transfer without consideration, his or her predecessor) at any time during the five years preceding the disposition, directly or indirectly, held an interest (including, among other things, shares and convertible bonds or convertible notes) of 1% or more in the issued share capital of Infineon Technologies AG or (ii) if the Shares were held as assets of a permanent establishment or fixed base in Germany. Most tax treaties to which Germany is a party provide for a complete exemption from German taxation in the case of (i).

Inheritance and Gift Tax

Under German law, the transfer of the Notes or of the Shares will be subject to German inheritance or gift tax on a transfer by reason of death or as a gift if at the time of the transfer of the assets:

- (i) the donor or transferor or the heir, donee or other beneficiary is resident in Germany at the time of the transfer, or, if a German citizen, was not continuously outside of Germany and without German residence for more than five years; or
- (ii) except as mentioned under (i) the Notes or Shares belong to the business assets of a permanent establishment maintained in Germany by the deceased or donor; or
- (iii) in case of the transfer of the Shares, the deceased or donor has held, alone or together with related persons, directly or indirectly, 10% or more of the registered share capital of Infineon Technologies AG at the time of the transfer.

The few presently existing German estate tax treaties usually provide that German inheritance or gift tax may only be imposed in cases (i) and (ii) above.

Special rules may apply to certain German expatriates (German citizens or former German citizens living abroad).

Other Taxes

No stamp, issue, registration or similar taxes or duties will be payable in Germany in connection with the issuance, delivery or execution of the Notes. Currently, net assets tax is not levied in Germany.

Proposed EU Savings Directive

On 21 January 2003 the EU Council of Economic and Finance Ministers agreed to adopt a new directive regarding the taxation of savings income. It is proposed that each Member State will be required to provide to the tax authorities of another Member State details of payments of interest or other similar income paid by a person within its jurisdiction to an individual resident in that other Member State; however, Austria, Belgium and Luxembourg will instead apply a withholding system for a transitional period in relation to such payments. The proposed directive may be subject to further amendment and/or clarification.

DESCRIPTION OF THE SHARES

Share Capital

The issued share capital of our Company consists of €1,441,761,208 divided into 720,880,604 individual shares in registered form with a notional value of €2.00 each.

According to German law, the individual shares do not have a par value, but they do have a notional value that may be determined by dividing the share capital amount by the number of shares.

Authorized Capital

Under the German Stock Corporation Act, a stock corporation's shareholders can authorize the management board to issue shares in a specified aggregate nominal amount of up to 50% of the issued share capital at the time the resolution is passed. The shareholders' authorization may extend for a period of no more than five years.

The Articles of Association of our Company authorize the management board to increase the share capital with the supervisory board's consent. The management board may use these authorizations to issue new shares in one or more tranches:

- in an aggregate amount of up to €119 million through March 30, 2004 to issue shares to employees of the Infineon group companies (in which case preemptive rights of the existing shareholders are excluded); or
- in an aggregate amount of up to €295 million through January 21, 2007 to issue shares for cash (in which case preemptive rights of existing shareholders may be excluded under certain circumstances by the Management Board with the consent of the Supervisory Board) or in exchange for contributions in kind (in which case preemptive rights of the existing shareholders may be excluded by the Management Board with the consent of the Supervisory Board).

Conditional Capital

Our Company has conditional capital of up to €96 million that may be used to issue up to 48 million new registered shares in connection with our 1999 and our 2001 long term incentive plans and additional conditional capital of up to €29 million that may be used to issue up to 14.5 million new registered shares in connection with our 2001 long term incentive plan. These shares will have dividend rights from the beginning of the financial year in which they are issued.

Our Company also has conditional capital of up to €50 million that may be used to issue up to 25 million new registered shares upon conversion of the convertible debt securities issued in February 2002. These shares will have dividend rights from the beginning of the financial year in which they are issued.

Furthermore, our Company has conditional capital of up to €350 million that may be used to issue up to 175 million new registered shares upon conversion of debt securities, if those securities are not issued later than January 21, 2007. These shares will have dividend rights from the beginning of the financial year in which they are issued. Of these shares, up to 68.4 million shares may be delivered upon conversion of the Notes.

Preemptive Rights

Under the German Stock Corporation Act, an existing shareholder in a stock corporation has a preferential right to subscribe for issues of new shares by that corporation in proportion to the number of shares he holds in the corporation's existing share capital. These rights do not apply to shares issued out of conditional capital. Preemptive rights also apply to securities that may be converted into shares, securities with warrants, profit-sharing certificates and securities with dividend rights. The German Stock Corporation Act only allows the exclusion of this preferential right in limited circumstances. At least three-fourths of the share capital represented at the meeting must vote for exclusion. In addition to approval by the shareholders, the exclusion of preemptive rights requires a justification. The justification must be based on the principle that the interest of the company in excluding preemptive rights outweighs the shareholders' interest in their preemptive rights.

Preemptive rights resulting from a capital increase generally may be transferred and may be traded on any of the German stock exchanges upon which our shares are traded for a limited number of days prior to the final date on which the preemptive rights may be exercised.

Dividend Rights

Shareholders participate in profit distributions in proportion to the number of shares they hold. We have not declared a dividend in respect of the 2001 and 2002 financial years and currently do not expect to declare future dividends.

Transfer of Shares

The transfer of the registered shares is not restricted and the approval of Infineon Technologies AG is not required. As the shares are booked into the settlement system of Clearstream Banking AG, Frankfurt am Main, the transfer of the shares is effected by delivery. The registration of any acquiror of shares as the shareholders in the share register of Infineon Technologies AG is not required to effect the transfer of ownership. However, the rights to attend and vote at shareholders' meetings and to receive dividend payments are dependent on the registration of the acquiror as the shareholder in the share register of Infineon Technologies AG.

Disclosure Requirement

The German Securities Trading Act requires each person whose shareholding reaches, exceeds or, after exceeding, falls below the 5%, 10%, 25%, 50% or 75% voting rights thresholds of a listed corporation to notify the relevant issuer and the German Federal Supervisory Authority for Securities Trading in writing within seven calendar days after they have reached, exceeded or fallen below such a threshold. In their notification such shareholders must also state the number of shares they hold. Such shareholders cannot exercise any rights from those shares until they have satisfied this disclosure requirement. In addition, the German Securities Trading Act contains various rules designed to ensure the attribution of shares to the person who has effective control over the exercise of the voting rights attached to those shares.

Repurchase of Own Shares

We may not acquire our own shares unless authorized by the shareholders' at the general shareholders' meeting or in other very limited circumstances set out in the German Stock Corporation Act. Shareholders may not grant a share repurchase authorization lasting for more than 18 months. The rules in the German Stock Corporation Act generally limit repurchases to 10% of our share capital and resales must be made either on a stock exchange, in a manner that treats all shareholders equally or in accordance with the rules that apply to preemptive rights relating to a capital increase. We are not currently authorized to repurchase our own shares.

 - (c) in compliance with any other applicable notification requirement or limitation which may be imposed by CONSOB or the Bank of Italy; or
- (2) to Italian residents who submit unsolicited offers to any of the Underwriters to purchase the Notes.

Legal Matters

Litigation

Rambus. On August 7, 2000 and August 8, 2000, Rambus Inc. ("**Rambus**"), filed separate actions against the Company in the U.S. and Germany. Rambus alleges that the Company has infringed patents owned by Rambus that relate to the SDRAM and DDR DRAM products. The SDRAM product is a significant component of the Company's DRAM product line. If the Company were to be enjoined from producing SDRAM and DDR DRAM products, the Company's financial position and results of operations would be materially and adversely affected, as the Company would have to discontinue the SDRAM and DDR DRAM product lines or enter into a licensing arrangement with Rambus, which could require the payment of substantial licensing fees. The affected products currently constitute substantially all of the products of the Memory Products segment.

On May 4, 2001 and May 9, 2001, the Federal District Court for the Eastern District of Virginia dismissed all 57 of Rambus' patent infringement claims against the Company. In addition, the court found that Rambus committed fraud by its conduct in the JEDEC standard setting organization and awarded damages to Infineon. On January 29, 2003 the U.S. Court of Appeals for the Federal Circuit revised the District Court's claim construction on 4 claim terms, and remanded the infringement case back to the District Court for a jury trial on 4 remaining claims. The Company believes it has meritorious defenses to the allegations of infringement.

The Court of Appeals also reversed the District Court's finding that Rambus had committed fraud by its conduct in JEDEC. On February 26, 2003, the Company asked for a rehearing of this decision at

the Court of Appeals, but cannot predict the likelihood of a favourable outcome or whether the Company will ultimately prevail in the matter. The initial hearings on the German action commenced in May 2001. In its brief on February 9, 2001, Rambus amended its initial injunctive relief complaint to include a request for payment of damages for alleged infringement of the patents. No amount of damages have yet been declared. The initial hearing took place on May 18, 2001, at which time the Court noted the decisions of the parallel infringement suit in the U.S. The court has appointed a technical expert to render an opinion on the infringement issue. The opinion has been rendered but no decision has been made by the court yet.

In addition, the European Patent office declared on September 11, 2002, that the Rambus Patent had been unduly broadened, thus making it easier for the Company to defend against allegations of direct infringement. The Company believes that it has meritorious defenses and intends to vigorously defend itself in this matter.

If we were to be enjoined from producing SDRAM and DDR DRAM products, our financial condition and results of operations would be materially and adversely affected, as we would have either to stop producing our SDRAM and DDR DRAM products or enter into licensing arrangements with Rambus, under which we might have to pay substantial licensing fees. The affected products currently constitute substantially all of the products of our Memory Products business group. This business group contributed net sales of €1,844 million and a loss before interest, minority interest and taxes of €616 million in the 2002 financial year.

We also license RDRAM technology from Rambus. Our use of this technology is not in dispute in these proceedings.

In December 2002 Infineon AG was named party in a lawsuit before the regional court in Munich, Germany, alleging that it had misappropriated certain trade secrets and other proprietary information related to access cards for digital television systems. The complaint made against Infineon AG was made in connection with a lawsuit in the US, where the plaintiff in the Munich action is a defendant in a lawsuit by a provider of satellite TV services against allegations that it had misappropriated trade secrets of the satellite TV system provider. The claim in Munich also alleges that Infineon conspired to infringe the third party's patents and had colluded to create unfair competition. The complaint seeks unspecified damages and an injunction against further violations. The lawsuit is still at a very preliminary stage and no oral hearing has taken place yet. Additionally, the parent company of the plaintiff has acquired a controlling interest in the voting stock of the satellite TV system provider and is awaiting approval of a merger. As a result, the parties of the US law suit agreed to a mediation procedure to settle the case and that would influence the German action against Infineon. At this point in time, a stay of all of the proceedings is most likely at least until the final decision to approve the merger in the US is made within the next 10 to 12 months. If the merger is approved, the lawsuit will be stayed permanently with prejudice.

Other Matters. In October 1999, Deutsche Telekom AG ("DT") notified the Company of a potential contractual warranty claim in respect of chips supplied by the Company for DT calling cards. The claim relates to damages allegedly suffered by DT as a result of such cards being fraudulently reloaded by third parties. DT originally alleged damages of approximately €90 million as a result of these activities, reflecting damages suffered and the cost of remedial measures, and sought compensation from both Siemens and the Company.

In November, 2001, however, DT brought an action in court against Siemens alone. Siemens gave a third party notice to the Company and the Company has joined the court proceedings on the side of Siemens. DT currently claims damages of approximately €150 million. After an initial hearing, a court decision is expected to be rendered by end of May 2003. Should Siemens be found liable, the Company could be responsible for payments to Siemens in connection with certain indemnifications provided to Siemens at the Company's formation. The Company has investigated the DT claim and believes that it is without merit. The Company does not anticipate that the ultimate resolution of the DT claim will have a material adverse effect on the Company's financial position, results of operations or cash flows will result in connection with the DT claim.

In June 2002, Infineon Technologies AG's U.S. subsidiary, Infineon Technologies North America Corp., as well as other manufacturers of memory products, received a subpoena from a grand jury

sitting in the U.S. District Court for the Northern District of California in connection with an investigation of possible violations of U.S. federal antitrust laws involving pricing in the dynamic random access memory (DRAM) industry. The Company has been requested to provide information to the grand jury to assist with its investigation and intends to cooperate with any requests by officials involved in the investigation. In connection with this investigation Infineon Technologies AG and Infineon Technologies North America Corp. have been sued in several separate class actions by direct and indirect purchasers of DRAM. All actions allege that Infineon and other competitors conspired to fix the price of DRAM. The Company is in the process of investigating these allegations. The Company is unable to predict the outcome of these suits.

ProMOS and the Company have filed a series of preliminary injunctions, criminal and civil complaints against each other and representatives of each party relating to actions taken at the January 10, 2003 special meeting of the shareholders of ProMOS, alleged actions of breach of fiduciary duty and trust, as well as actions associated with the use of the Company's licensed technology by ProMOS. The Company intends to both vigorously defend itself and its representatives in all courses of action initiated by ProMOS, as well as vigorously pursue its actions filed against ProMOS and its representatives. The shareholders agreement, the product purchase and capacity reservation agreement and the technology license agreement provide for the use of an arbitration proceeding to resolve certain disputes.

ProMOS has initiated an arbitration proceeding relating to this dispute pursuant to International Chamber of Commerce (ICC) regulations which is to be conducted in Munich, Germany. The Company has received the statement of claim and is in the process of responding.

The Company has become aware, through published reports in media outlets, that MVI has apparently defaulted on indebtedness of NTD 4.7 billion, which is collateralized by a substantial portion of MVI's stockholdings in ProMOS. These published reports indicate that a bondholders meeting will be held on May 28, 2003 to discuss the resolution of this matter, including the potential disposition of such collateral. The Company is unable to predict the potential impact this event may have on its investment in ProMOS.

In April 2003, Infineon Technologies AG received a Request for Information from the European Commission (the "Commission") to enable the Commission to assess the compatibility with the Commission rules on competition of certain practices of which the Commission has become aware in the European market of DRAM memory products. The Company is in the process of responding.

The Company and Ericsson Holding International B.V. ("Ericsson") are in discussions relating to potential amendments to the June 2002 agreement for the acquisition by the Company of Ericsson's microelectronics business. Based on the results of these discussions, the Company believes that an amendment of the agreement is reasonably possible, which could result in the reduction or elimination of remaining acquisition indebtedness due to Ericsson, as well as modifications to existing purchase commitments of Ericsson. There can be no assurance that such negotiations will be successfully concluded.

Irrespective of the validity or the successful assertion of the above-referenced claims, however, we could incur significant costs with respect to defending against such claims, which could have a material adverse effect on our results of operations or financial condition. We are currently involved in other legal proceedings. However, we do not believe that the ultimate resolution of these other legal proceedings will have a material adverse effect on our results of operations or financial condition.
