Under this base prospectus (together with any documents incorporated by reference herein, the “**Base Prospectus**” or “**Prospectus**”), Allianz SE, Allianz Finance II B.V. and Allianz Finance III B.V. (each an “**Issuer**” and together the “**Issuers**”), subject to compliance with all relevant laws, regulations and directives, may from time to time issue unsubordinated bearer notes in a minimum denomination of EUR 1,000 per Note (together the “**Notes**”). The payments of all amounts due in respect of Notes issued by Allianz Finance II B.V. and Allianz Finance III B.V. will be unconditionally and irrevocably guaranteed by Allianz SE (the “**Guarantor**”). The aggregate principal amount of Notes issued under the Debt Issuance Programme described in this Base Prospectus (the “**Programme**”) is not subject to any maximum aggregate principal amount.

The principal amount of the Notes, the issue currency, the interest payable in respect of the Notes, the issue prices and maturities of the Notes and all other terms and conditions which are applicable to a particular Tranche of Notes (each term as defined below, see “*General description of the Programme*”) will be set out in the document containing the final terms (each “**Final Terms**”) within the meaning of Art. 8(4) of the Prospectus Regulation.

This Base Prospectus has been approved by the *Luxembourg Commission de Surveillance du Secteur Financier* (the “**CSSF**”) as competent authority under the Prospectus Regulation. The CSSF only approves this Base Prospectus as meeting the standards of completeness, comprehensibility and consistency imposed by the Prospectus Regulation and gives no undertakings as to the economic and financial soundness of the transaction or the quality or solvency of the Issuers or the Guarantor (if any) in line with the provisions of article 6(4) of the Luxembourg act relating to prospectuses for securities (*loi relative aux prospectus pour valeurs mobilières*) dated 16 July 2019 (the “**Luxembourg Prospectus Law**”). Such approval should not be considered as an endorsement of the Issuers or of the quality of the Notes that are the subject of this Base Prospectus. Investors should make their own assessment as to the suitability of investing in the Notes.

Each Issuer may request the CSSF to provide competent authorities in host member states within the European Economic Area with a certificate of approval attesting that this Base Prospectus has been drawn up in accordance with the Prospectus Regulation.

Application has also been made to the Luxembourg Stock Exchange for Notes issued under the Programme to be listed on the official list of the Luxembourg Stock Exchange (the “**Official List**”) and to be admitted to trading on the Luxembourg Stock Exchange’s regulated market “**Bourse de Luxembourg**”. The Luxembourg Stock Exchange’s regulated market is a regulated market for the purposes of the Markets in Financial Instruments Directive 2014/65/EU (as amended, “**MiFID II**”). However, Notes may be listed on any other stock exchange or may be unlisted as specified in the relevant Final Terms.

This Base Prospectus and any supplement to this Base Prospectus will be published by the Issuer in electronic form together with all documents incorporated by reference on the website of the Luxembourg Stock Exchange (“www.bourse.lu”). This Base Prospectus is valid for a period of

twelve months after its approval. The validity ends upon expiration of 19 May 2023. The obligation to supplement this Base Prospectus in the event of significant new factors, material mistakes or material inaccuracies does not apply when this Base Prospectus is no longer valid.

This Base Prospectus does not constitute an offer to sell, or the solicitation of an offer to buy, the Notes in any jurisdiction where such offer or solicitation is unlawful.

The Notes have not been and will not be registered under the U.S. Securities Act of 1933, as amended (the "Securities Act") and subject to certain exceptions, the Notes may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons.

Investing in the Notes involves certain risks. Please review the section entitled "*Risk Factors*" beginning on page 10 of this Base Prospectus.

MIFID II PRODUCT GOVERNANCE / TARGET MARKET

The Final Terms in respect of any Notes may include a legend entitled “MiFID II Product Governance” which will outline the target market assessment in respect of the Notes and which channels for distribution of the Notes are appropriate. Any person subsequently offering, selling or

recommending the Notes (a “distributor”) should take into consideration the target market assessment; however, a distributor subject to Directive 2014/65/EU (as amended, “MiFID II”) is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the target market assessment) and determining appropriate distribution channels.

A determination will be made in relation to each issue about whether, for the purpose of the MiFID Product Governance rules under EU Delegated Directive 2017/593 (the “MiFID Product Governance Rules”), any Dealer subscribing for any Notes is a manufacturer in respect of such Notes, but otherwise neither the Arranger nor the Dealers nor any of their respective affiliates will be a manufacturer for the purpose of the MiFID Product Governance Rules.

UK MIFIR PRODUCT GOVERNANCE / TARGET MARKET

The Final Terms in respect of any Notes may include a legend entitled “UK MiFIR Product Governance” which will outline the target market assessment in respect of the Notes and which channels for distribution of the Notes are appropriate. Any person subsequently offering, selling or recommending the Notes (a “distributor”) should take into consideration the target market assessment; however, a distributor subject to the FCA Handbook Product Intervention and Product Governance Sourcebook (the “UK MiFIR Product Governance Rules”) is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the target market assessment) and determining appropriate distribution channels.

A determination will be made in relation to each issue about whether, for the purpose of the UK MiFIR Product Governance Rules, any Dealer subscribing for any Notes is a manufacturer in respect of such Notes, but otherwise neither the Arranger nor the Dealers nor any of their respective affiliates will be a manufacturer for the purpose of the UK MiFIR Product Governance Rules.

PRIIPS REGULATION / EEA RETAIL INVESTORS

If the Final Terms in respect of any Notes include a legend entitled “Prohibition of Sales to EEA Retail Investors”, the Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area (“EEA”). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of MiFID II; or (ii) a customer within the meaning of Directive 2016/97/EU as amended (the “Insurance Distribution Directive”), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in the Prospectus Regulation. Where such a Prohibition of Sales to EEA Retail Investors is included in the Final Terms, no key information document required by Regulation (EU) No 1286/2014 (as amended, the “PRIIPs Regulation”) for offering or selling the Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling such Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

UK PRIIPS REGULATION / UK RETAIL INVESTORS

If the Final Terms in respect of any Notes include a legend entitled “Prohibition of Sales to UK Retail Investors”, the Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the United Kingdom (“UK”). For the purposes of this provision the expression “retail investor” means a person who is one (or more) of the following: (i) a retail client, as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 (“EUWA”); or (ii) a customer within the meaning of the provisions of the Financial Services and Markets Act 2000 (the “FSMA”) and any rules or regulations made under the FSMA to implement Directive (EU) 2016/97, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA; or (iii) not a qualified investor as defined in Article 2 of the Prospectus Regulation as it forms part of domestic law by virtue of the EUWA. Where such a Prohibition of Sales to UK Retail Investors is included in the Final Terms, no key information document required by Regulation (EU) No 1286/2014 as it forms part of domestic law by virtue of the EUWA (the “UK PRIIPs Regulation”) for offering or selling the Notes or otherwise making them available to retail investors in the UK has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the UK may be unlawful under the UK PRIIPs Regulation.

NOTIFICATION UNDER SECTION 309B(1) OF THE SECURITIES AND FUTURES ACT 2001 OF SINGAPORE (THE “SFA”)

Unless otherwise stated in the Final Terms in respect of any Notes, all Notes issued or to be issued under the Programme shall be prescribed capital markets products (as defined in the Securities and Futures (Capital Markets Products) Regulations 2018) and Excluded Investment Products (as defined in the Monetary Authority of Singapore (the “MAS”) Notice SFA 04-N12: Notice on the Sale of Investment Products and MAS Notice FAA-N16: Notice on Recommendations on Investment Products).

NOTICE TO CANADIAN INVESTORS

The Notes may be sold only to purchasers purchasing, or deemed to be purchasing, as principal that are accredited investors, as defined in National Instrument 45-106 Prospectus Exemptions or subsection 73.3(1) of the Securities Act (Ontario), and are permitted clients, as defined in National Instrument 31-103 Registration Requirements, Exemptions and Ongoing Registrant Obligations. Any resale of the Notes must be made

in accordance with an exemption from, or in a transaction not subject to, the prospectus requirements of applicable securities laws. Securities legislation in certain provinces or territories of Canada may provide a purchaser with remedies for rescission or damages if this Base Prospectus (including any supplement hereto and/or any Final Terms) contains a misrepresentation, provided that the remedies for rescission or damages are exercised by the purchaser within the time limit prescribed by the securities legislation of the purchaser's province or territory. The purchaser should refer to any applicable provisions of the securities legislation of the purchaser's province or territory for particulars of these rights or consult with a legal advisor. Pursuant to section 3A.3 (or, in the case of securities issued or guaranteed by the government of a non-Canadian jurisdiction, section 3A.4) of National Instrument 33-105 Underwriting Conflicts (NI 33-105), the Dealers are not required to comply with the disclosure requirements of NI 33-105 regarding underwriter conflicts of interest in connection with an offering of Notes.

BENCHMARKS REGULATION / STATEMENT IN RELATION TO ADMINISTRATOR'S REGISTRATION

Interest amounts payable under floating rate notes issued under this Programme are calculated by reference to EURIBOR (Euro Interbank Offered Rate) which is provided by the European Money Markets Institute (EMMI). As at the date of this Base Prospectus, EMMI appears on the register of administrators and benchmarks established and maintained by the European Securities and Markets Authority (ESMA) pursuant to Article 36 of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, as amended (the "**Benchmarks Regulation**").

STABILIZATION

In connection with the issue of any Tranche of Notes under the Programme, the Dealer or Dealers (if any) named as stabilizing manager(s) in the applicable Final Terms (or persons acting on behalf of a stabilizing manager) may over-allot Notes or effect transactions with a view to supporting the price of the Notes at a level higher than that which might otherwise prevail. However, stabilization may not necessarily occur. Any stabilization action may begin on or after the date on which adequate public disclosure of the terms of the offer of the relevant Tranche of Notes is made and, if begun, may cease at any time, but it must end no later than the earlier of 30 days after the Issue Date of the relevant Tranche of Notes and 60 days after the date of the allotment of the relevant Tranche of Notes. Any stabilization action or over-allotment must be conducted by the relevant stabilizing manager(s) (or person(s) acting on behalf of any stabilizing manager(s)) in accordance with all applicable laws and rules.

FORWARD-LOOKING STATEMENTS

This Prospectus contains certain forward-looking statements, including statements using the words "believes", "anticipates", "intends", "expects" or other similar terms. This applies in particular to statements under the caption "Description of Allianz SE and Allianz Group" and statements elsewhere in this Prospectus relating to, among other things, the future financial performance, plans and expectations regarding developments in the business of Allianz SE. These forward-looking statements, including prospects or expectations, that are based on Allianz SE's current views and assumptions are subject to a number of known and unknown risks, uncertainties, assumptions and other factors that may cause the actual results, including the financial position and profitability of Allianz SE, to be materially different from or worse than those expressed or implied by these forward-looking statements. Deviations may arise due to changes in factors including, but not limited to, the following: (i) the general economic and competitive situation in the Allianz's core business and core markets, (ii) the performance of financial markets (in particular market volatility, liquidity, and credit events), (iii) adverse publicity, regulatory actions or litigation with respect to the Allianz Group, other well-known companies and the financial services industry generally, (iv) the frequency and severity of insured loss events, including those resulting from natural catastrophes, and the development of loss expenses, (v) mortality and morbidity levels and trends, (vi) persistency levels, (vii) the extent of credit defaults, (viii) interest rate levels, (ix) currency exchange rates, most notably the EUR/USD exchange rate, (x) changes in laws and regulations, including tax regulations, (xi) the impact of acquisitions including and related integration issues and reorganization measures, and (xii) the general competitive conditions that, in each individual case, apply at a local, regional, national, and/or global level. Many of these changes can be exacerbated by acts of war or terrorism. Accordingly, investors are strongly advised to read the following sections of this Prospectus: "*Risk Factors*" and "*Description of Allianz SE and Allianz Group*". These sections include more detailed descriptions of factors that might have an impact on Allianz Group's business and the markets in which it operates.

In light of these risks, uncertainties and assumptions, future events described in this Prospectus may not occur. In addition, neither the Issuer nor the Managers assume any obligation to update such forward-looking statements and to adapt them to future events or developments.

ALTERNATIVE PERFORMANCE MEASURES

Certain financial measures presented in this Base Prospectus and in the documents incorporated by reference are not recognized financial measures under International Financial Reporting Standards as adopted by the European Union ("**IFRS**") ("**Alternative Performance Measures**") and may therefore not be considered as an alternative to the financial measures defined in the accounting standards in accordance with generally accepted accounting principles. The Alternative Performance Measures are intended to supplement investors' understanding of the Issuers' financial information by providing measures which investors, financial analysts and management use to help evaluate the Issuers' financial leverage and operating performance. The definition of the Alternative Performance Measures may vary from the definition of identically named alternative performance measures used by other companies. Special items which the Issuer does not believe to be indicative of on-going business performance are excluded from these calculations so that investors can better evaluate and analyze historical and future business

GENERAL DESCRIPTION OF THE PROGRAMME

GENERAL

Under the Programme, Allianz SE, Allianz Finance II B.V. and Allianz Finance III B.V., subject to compliance with all relevant laws, regulations and directives, may from time to time issue notes (the “Notes”) to one or more Dealers. Each of the Issuers and Guarantor (as applicable) may from time to time appoint any institution as a Dealer in relation to a single Tranche. References in this Base Prospectus to “Dealer(s)” means, in relation to any Tranche, each person who is appointed as a Dealer under the Programme Agreement.

Commerzbank Aktiengesellschaft acts as arranger in respect of the Programme (the “Arranger”).

Deutsche Bank Aktiengesellschaft acts as fiscal agent (the “Fiscal Agent”) and paying agent (the “Paying Agent”).

Deutsche Bank Luxembourg S.A. acts as Luxembourg listing agent (the “Luxembourg Listing Agent”).

The aggregate principal amount of the Notes outstanding at any one time under the Programme is not subject to any maximum aggregate principal amount.

PROSPECTUS

Notes issued under the Programme may be issued either: (1) pursuant to this Base Prospectus and associated Final Terms; or (2) pursuant to a Specific Prospectus (as defined below); or (3) in relation to Notes not publicly offered in, and not admitted to trading on a regulated market of, any member state of the European Economic Area, in such form as agreed between the relevant Issuer, the relevant Dealer(s) and, if relevant for the Fiscal Agent, the Fiscal Agent.

“Specific Prospectus” means any prospectus prepared by an Issuer in relation to Notes issued under the Programme and having terms not contemplated by the Base Prospectus as Option I or Option II, which may incorporate by reference certain parts of the Base Prospectus and which constitutes a prospectus for the purposes of Article 6(3) of the Prospectus Regulation, including any documents which are from time to time incorporated by reference in the Specific Prospectus, as such Specific Prospectus is amended, supplemented or replaced from time to time.

ISSUES OF NOTES

Notes may be issued on a continuing basis to one or more of the Dealers.

The Notes issued under this Base Prospectus will be issued as fixed rate notes (the “Fixed Rate Notes”), non-interest bearing notes (the “non-interest bearing Notes”) or euro-denominated floating rate notes (the “Floating Rate Notes”).

The Notes issued by Allianz Finance II B.V. and Allianz Finance III B.V. will have the benefit of a guarantee, dated 18 May 2022, given by the Guarantor (the “Guarantee”). The Guarantee constitutes an irrevocable, unsecured and unsubordinated obligation of the Guarantor ranking *pari passu* with all other unsecured and unsubordinated obligations of the Guarantor. The Guarantee will be governed by German law.

Notes will be issued in series (each a “Series”) having one or more issue dates and on terms otherwise identical (or identical other than in respect of the first payment of interest), the Notes of each Series being intended to be interchangeable with all other Notes of that Series. Each Series may be issued in tranches (each a “Tranche”) on the same or different issue dates. The specific terms of each Tranche (which will be completed, where necessary, with the relevant Terms and Conditions and, save in respect of the issue date, issue price, first payment of interest (if any) and nominal amount of the Tranche, will be identical to the terms of other Tranches of the same Series) will be completed in the final terms.

Notes of any Tranche may be issued at a price (the “Issue Price”) equal to their principal amount or at a discount or premium to their principal amount. The Issue Price for the Notes of any Tranche issued on a syndicated basis will be determined at the time of pricing on the basis of a yield which will be determined on the basis of the orders of the investors which are received by the Dealers during the placement of such Notes. Orders will specify a minimum yield and may only be confirmed at or above such yield. The resulting yield will be used to determine the Issue Price.

Notes will be issued in such denominations as may be agreed between the relevant Issuer and the relevant Dealer(s) and as indicated in the applicable Final Terms save that the minimum denomination of the Notes will be, if in euro, EUR 1,000, and, if in any currency other than euro, an amount in such other currency at least equivalent to EUR 1,000 at the time of the issue of Notes. Subject to any applicable legal or regulatory restrictions, and requirements of relevant central banks, Notes may be issued in euro or any other currency.

Notes will be issued with such maturities as may be agreed between the relevant Issuer and the relevant Dealer(s), subject to such minimum or maximum maturities as may be allowed or required from time to time by any laws, regulations and directives applicable to the relevant Issuer or the relevant currency. However, Notes will be issued with a minimum maturity of twelve months or more.

The principal amount of the Notes, the currency, the interest payable in respect of the Notes, if any, the Issue Price and maturities of the Notes which are applicable to a particular Tranche will be set out in the relevant Final Terms.

The yield for Notes with fixed interest rates and non-interest bearing Notes will be calculated by the use of the International Capital Market Association (“**ICMA**”) method, which determines the effective interest rate of notes taking into account accrued interest (if any) on a daily basis.

Each Tranche of Notes will be represented, on issue, either

- (i) initially by a temporary global note which will be exchangeable, in whole or in part, for interest in a permanent global Note on or after the date 40 days after the later of the commencement of the offering and the relevant issue date (the “**Exchange Date**”), upon certification as to non-U.S. beneficial ownership, or
- (ii) by a permanent global note.

The Notes will be freely transferable in accordance with the rules and regulations of the relevant Clearing System.

DISTRIBUTION OF NOTES

Notes may be distributed by way of public offer or private placements and, in each case, on a syndicated or non-syndicated basis. The method of distribution of each Tranche will be stated in the relevant Final Terms. The Notes may be offered to qualified and non-qualified investors.

The Issuers may request the CSSF to provide competent authorities in host member states within the European Economic Area with a certificate of approval attesting that this Base Prospectus has been drawn up in accordance with the Prospectus Regulation. The Notes may be offered to the public in Luxembourg and, following notification, in any such other additional host member state.

The offer and distribution of any Notes of any Tranche will be subject to selling restrictions, including those for the United States, the European Economic Area and the United Kingdom. See section “*Subscription and Sale*” below.

The Final Terms in respect of any Notes may include a legend entitled “*MiFID II Product Governance*” and/or “*UK MiFIR Product Governance*” which will outline the target market assessment in respect of the Notes and which channels for distribution of the Notes are appropriate. Any person subsequently offering, selling or recommending the Notes (a “**distributor**”) should take into consideration the target market assessment; however, a distributor subject to MiFID II and/or the FCA Handbook Product Intervention and Product Governance Sourcebook is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the target market assessment) and determining appropriate distribution channels.

LISTING OF NOTES

Application has also been made to the Luxembourg Stock Exchange for Notes issued pursuant to this Base Prospectus to be listed on the official list of the Luxembourg Stock Exchange (the “**Official List**”) and to be admitted to trading on the Luxembourg Stock Exchange’s regulated market “Bourse de Luxembourg”, appearing on the list of regulated markets issued by the European Commission. The Luxembourg Stock Exchange’s regulated market is a regulated market included on the list of regulated markets published by ESMA for the purposes of MiFID II. However, Notes may be listed on any other stock exchange, subject to the notification of the Base Prospectus in accordance with Art. 25 of the Prospectus Regulation, or may be unlisted as specified in the relevant Final Terms.

RISK FACTORS

Allianz SE and the Allianz Group are exposed to a variety of risks, including market, credit, underwriting, business, operational, strategic, liquidity, and reputational risks. The following is a description of the material risk factors in relation to Allianz SE as Issuer and the Allianz Group in relation to the Notes. The realization of any of the risks described below may affect the ability of Allianz SE to fulfill its obligations and/or may adversely affect the market price of the Notes and can lead to losses for the holders of the Notes (the “**Noteholders**” and each a “**Noteholder**”). As a result, Noteholders are exposed to the risk of losing their investment in whole or in part. Additional risks not included in the risk factors below, e.g., because they are now deemed immaterial by or not currently known to Allianz SE or Allianz Group, may result in material risks in the future. This is in particular true with a view to rapid and unforeseen changes as may occur, for example, with geopolitical crises as well as with risks related to the crisis resulting from the outbreak of SARS-CoV-2 and its associated disease (“**Covid-19**”). Noteholders should be aware that Allianz SE as the ultimate parent of the Allianz Group may face the same risks as the Allianz Group.

The following risk factors are organized in categories depending on their respective nature. In each category the most material risk factors, based on the probability of their occurrence and the expected magnitude of their negative impact, are mentioned first.

Risk factors relating to Allianz SE / Allianz Group

I. MARKET RISKS

The market risks of the Allianz Group include equity risk, credit spread risk, interest rate risk, real estate and other alternative investment risk, currency risk and inflation risk. In our assessment, equity and credit spread risk are the most material risks for the Allianz Group in the category of market risks.

THE ALLIANZ GROUP IS EXPOSED TO EQUITY RISK.

The Allianz Group holds a significant equity portfolio. This portfolio is subject to volatility in equity markets affecting the market value and liquidity of these holdings. Investments are reviewed regularly for impairment, with write-downs to fair value charged to income if there is objective evidence that the cost may not be recovered. The Allianz Group holds interests in a number of financial institutions as part of its portfolios, which are particularly exposed to uncertain market conditions affecting the financial services sector generally.

In prior years, the Allianz Group has incurred significant impairments on the value of the securities and other financial assets that it holds and there is the risk that the Allianz Group will also recognize significant impairments in the future, which may have an adverse effect on the Allianz Group’s earnings and on the Allianz Group’s business and its financial condition.

THE ALLIANZ GROUP IS EXPOSED TO CREDIT SPREAD RISK.

The Allianz Group holds a significant portfolio of fixed-income assets such as bonds. The value of this portfolio changes in case of moving credit spreads. It may lose value if credit spreads widen. This may happen in case the perception of risk in the market changes, i.e., investors demand higher compensation for taking on risks, which can happen for several reasons, for example, following a political crisis, an economic recession or changed monetary policy.

THE ALLIANZ GROUP IS EXPOSED TO INTEREST RATE RISK.

Changes in prevailing interest rates (including changes in the difference between the levels of prevailing short- and long-term rates, or enduring negative rates) may adversely affect the Allianz Group’s insurance, asset management, corporate and other results.

An increase in interest rates could substantially decrease the value of the Allianz Group’s fixed-income portfolio, and any unexpected change in interest rates could materially adversely affect the Allianz Group’s bond and interest rate derivative positions.

Assets and liabilities from an Allianz Group perspective are not necessarily matched in terms of interest rate sensitivities and therefore any significant change in interest rates could materially adversely affect the Allianz Group’s bond and interest rate derivative positions and the fair value of liabilities. A change in prevailing interest rates may accordingly have a negative impact on the capitalization of the Allianz Group.

Results of the Allianz Group’s asset management business may also be affected by movements in interest rates, as management fees are generally based on the value of assets under management, which fluctuate with changes in the level of interest rates.

Changes in interest rates will impact the Allianz Group’s Life/Health business to the extent they result in changes to current interest income, impact the value of the Allianz Group’s fixed-income portfolio and the fair value of the liabilities and affect the levels of new product sales or surrenders of business in force. Reductions in the effective investment income below the rates prevailing at the issue date of the policy, or below the long-term guarantees in countries such as Germany and Switzerland, would reduce the profit margins or lead to losses on the Life/Health insurance

business written by the Allianz Group's Life/Health subsidiaries to the extent the maturity composition of the assets does not match the maturity composition of the insurance obligations they are backing. In particular, if low interest rates persist, the effective investment income will decrease over time due to reducing reinvestment yields. Similarly, reductions in the effective investment income of the fixed income trust assets backing the Allianz Group's pension reserves may lead to deficits of the internal pension plans, and these deficits would have to be covered by the Allianz Group. Interest rate volatility risk could substantially impact the economic capitalization in a low interest rate environment, as long-term guarantees in Life/Health business increase in value.

The interest rate risks described above may have an adverse effect on the Allianz Group's business, financial condition and results of operations. In particular, a decrease in the Allianz Group's profitability as a result of sustained low or negative interest rates may adversely affect our Solvency II capitalization and solvency capital ratio.

THE ALLIANZ GROUP IS EXPOSED TO REAL ESTATE AND OTHER ALTERNATIVE INVESTMENT RISK.

The Allianz Group holds a significant alternative investments portfolio. Alternative investments include real estate, private equity, renewable energy and infrastructure investments. These investments are subject to volatility in real estate, equity and alternative investment markets affecting the market value and liquidity of these holdings and are generally covered by either the real estate or the equity risk capital modelling depending on their characteristics. Investments are reviewed regularly for impairment, with write-downs to fair value charged to income if there is objective evidence that the cost may not be recovered.

In prior years the Allianz Group has incurred significant impairments on the value of the assets that it holds, and there is the risk that the Allianz Group will also recognize significant impairments in the future, which may have an adverse effect on the Allianz Group's earnings, the Allianz Group's business and its financial condition.

THE ALLIANZ GROUP IS EXPOSED TO CURRENCY RISK.

The Allianz Group prepares its consolidated financial statements in Euro. However, a significant portion of the revenues and expenses from the Allianz Group companies outside the Euro zone, originates in currencies other than the Euro. As a result, although the Allianz Group's non-Euro zone subsidiaries generally record their revenues and expenses in the same currency, changes in the exchange rates used to translate foreign currencies into Euro may adversely affect the Allianz Group's results of operations and the net asset value of subsidiaries from an Allianz Group perspective.

THE ALLIANZ GROUP IS EXPOSED TO INFLATION RISK.

Allianz Group is exposed to changing inflation rates, predominantly due to the Non-Life insurance obligations but also due to inflation-indexed internal pension obligations. In addition, extremely high inflation rates in some regions where Allianz entities operate may adversely impact the performance of these entities. Inflation increases both claims and expenses, leading to greater liabilities and payments to policyholders.

II. CREDIT RISKS

The Allianz Group companies are subject to a potential economic loss in the value of their portfolio that would result from either changes in the credit quality of counterparties ("migration risk") or the inability or unwillingness of a counterparty to fulfill contractual obligations ("default risk"). Allianz Group's credit risk profile is derived from three sources:

- Investment portfolio: Credit risk results from Allianz Group's investments in fixed-income bonds, loans, derivatives, cash positions, and receivables whose value may decrease depending on the credit quality of the obligor. As a result, defaults by one or more of these parties on their obligations to the Allianz Group companies due to bankruptcy, lack of liquidity, downturns in the economy or real estate values, operational failure or other reasons, or even rumors about potential defaults by one or more of these parties or regarding the financial services industry generally, could lead to losses or defaults by the Allianz Group companies or by other institutions. In addition, with respect to secured transactions, the Allianz Group companies' credit risk may be exacerbated when the collateral held by them cannot be realized or is liquidated at prices not sufficient to recover the full amount of the loan or derivative exposure. The Allianz Group companies also have exposure to a number of financial institutions in the form of unsecured debt instruments, derivative transactions and equity investments. Losses on or impairments to the carrying value of these assets may materially and adversely affect the Allianz Group's business or results of operations. In our assessment, the credit risk related to the investment portfolio of the Allianz Group is the most material risk in the category of credit risk.
- Credit insurance: Credit risk arises from potential claim payments on limits granted by Euler Hermes to its policyholders. Euler Hermes insures its policyholders from credit risk associated with short-term trade credits advanced to clients of the policyholder. If the client of the policyholder is unable to meet its payment obligations, Euler Hermes indemnifies the loss to the policyholder.
- Reinsurance: The Allianz Group transfers exposure to certain risks in the Property-Casualty and Life/Health insurance businesses to others through reinsurance arrangements. Under these arrangements, other insurers assume a portion of the Allianz Group's losses and expenses associated with reported and unreported losses in exchange for a portion of policy premiums. Credit risk arises from potential losses from non-recoverability of reinsurance receivables or due to default on benefits under in-force reinsurance treaties.

If any of the above-mentioned risks materialize, this may materially and adversely affect the Allianz Group's business or results of operations. In prior years the Allianz Group has incurred significant impairments on the value of the securities and other financial assets that it holds, and there

is the risk that the Allianz Group will recognize significant impairments in the future again, which may have an adverse effect on the Allianz Group's earnings and on the Allianz Group's business and its financial condition.

III. UNDERWRITING RISK OF THE ALLIANZ GROUP

Underwriting risk consists of premium and reserve risks in the Property-Casualty business segment as well as biometric risks in the Life/Health business segment. In our assessment, the underwriting risk related to the Property-Casualty business is the most material in this category.

UNDERWRITING RISK RELATED TO PROPERTY-CASUALTY BUSINESS

Our Property-Casualty insurance businesses are exposed to premium risk-related adverse developments in the current year's new and renewed business as well as to reserve risks related to the business in force. Premium risk represents the risk that actual claims for the business in the current year develop adversely relative to the expected ratio of claims costs relative to premiums earned. Reserve risk represents the risk of adverse developments in best-estimate reserves over a one-year time horizon, resulting from fluctuations in the timing and/or amount of claims settlement.

Loss reserves for the Allianz Group's Property-Casualty insurance and reinsurance policies are based on estimates as to claims liabilities. Adverse developments relating to claims could lead to further reserve additions and materially adversely impact the Allianz Group's results of operations. In accordance with industry practice, accounting and regulatory requirements, the Allianz Group establishes reserves for losses and loss adjustment expenses related to its Property-Casualty insurance and reinsurance businesses, including Property-Casualty business in run-off. Reserves are based on estimates of future payments that will be made in respect of claims, including expenses relating to such claims. Such estimates are made both on a case-by-case basis as well as in respect of losses that have been incurred but not reported ("IBNR") to the Allianz Group. These reserves represent the estimated ultimate cost necessary to bring all pending reported and IBNR claims to final settlement. Reserves are subject to change due to a number of variables that affect the ultimate cost of claims, such as exchange rates, changes in the legal environment and results of litigation as well as effects closely related to (super-imposed) inflation that may adversely affect costs of repairs and medical costs. The Allianz Group's reserves for asbestos and environmental and other latent claims are particularly subject to such variables. Established loss reserves estimates are periodically adjusted in the ordinary course of settlement, using the most current information available to management, and any adjustments resulting from changes in reserve estimates are reflected in current results of operations.

To the extent that the Allianz Group's actual claims experience is less favorable than the underlying assumptions used in setting the prices for products and establishing reserves, the Allianz Group may be required to increase its reserves, which may materially adversely affect its results of operations. On a quarterly basis, Allianz Group monitors reserve levels, movements and trends. This monitoring is conducted on the basis of quarterly data submitted by the subsidiaries as well as through frequent dialogue with local actuaries. However, ultimate losses may materially exceed the established reserves and have a material adverse effect on the Allianz Group's results of operations.

Allianz Group is exposed to various sources of premium risk such as natural catastrophes, terror events and non-catastrophic events including man-made losses. Allianz Group's Property-Casualty insurance covers to a large extent losses from major unpredictable events like natural catastrophes (e.g., hurricanes, earthquakes, floods) and man-made events (e.g., fires, industrial explosions, cyberattacks) but also acts of terror. The likelihood of such events can change due to natural climate cycles, changes in the portfolios, but also through a changing market or geopolitical environment. Consequently, geopolitical tensions may increase the risk of terror losses significantly in some regions. Also, increasing urbanization and increasing concentration of industrial facilities in natural catastrophe prone regions has increased losses over the past years, a trend that is expected to continue and even to accelerate in the long-term driven by developing climate changes. In addition, increasing digitalization introduces new risks in regard to cybercrime, i.e. manipulation of software or loss of sensitive data. However, the incidence and severity of all these catastrophes in any given period are inherently unpredictable. All risk models are subject to uncertainty arising from both scientific and management assumptions as well as underlying data.

The Allianz Group monitors its overall exposure to catastrophes and other unpredictable events in each geographic region and each of the Allianz Group's subsidiaries within the Allianz Group's limit framework. In addition, local entities have implemented their own underwriting limits related to insurance coverage for losses from catastrophic events. However, a series of unlikely catastrophes in a year may result in unusually high levels of losses with a material adverse effect on the Allianz Group's financial position or results of operations.

Furthermore, the occurrence of extreme large-scale natural catastrophes, pandemics and man-made disasters (e.g., terror events) can have a negative impact on local or even global economy in general, and capital markets in particular, and thus also on the Allianz Group's financial position and results of operations.

UNDERWRITING RISK RELATED TO LIFE-HEALTH BUSINESS

Underwriting risks in our Life/Health operations (biometric risks) include mortality, disability, morbidity, and longevity risks. Mortality, disability, and morbidity risks are associated with the unexpected increase in the occurrence of death, disability, or medical claims. Longevity risk is the risk that the reserves covering life annuities and group pension products might not be sufficient due to longer life expectancies of the insured. Life/Health underwriting risk arises from profitability being lower than expected. As profitability calculations are based on several parameters –

such as historical loss information and assumptions on inflation, mortality, or morbidity – realized parameters may differ from the ones used for underwriting. For example, higher-than-expected inflation may lead to higher medical claims in the future.

The assumptions the Allianz Group makes in assessing its Life/Health insurance reserves may differ from what the Allianz Group may experience in the future. The Allianz Group derives its Life/Health insurance reserves using “best estimate” actuarial practices and assumptions. These assumptions include the assessment of the long-term development of interest rates, investment returns, the allocation of investments between equity, fixed-income and other categories, policyholder bonus rates (some of which are guaranteed), mortality and morbidity rates, policyholder lapses and future expense levels. The Allianz Group monitors its actual experience of these assumptions, and to the extent that it considers that this experience will continue in the longer term it refines its long-term assumptions. Similarly, estimates of the Allianz Group’s own pension obligations necessarily depend on assumptions concerning future actuarial, demographic, macroeconomic and financial markets developments. Changes in any such assumptions may lead to changes in the estimates of Life/Health insurance reserves or pension obligations.

The Allianz Group companies have a significant portfolio of contracts with guaranteed investment returns, including endowment and annuity products for the German market as well as certain guaranteed contracts in other markets. The amounts payable by the Allianz Group companies at maturity of an endowment policy in Germany and in certain other markets include a “guaranteed benefit”, an amount that, in practice, is equal to a legally mandated minimum rate of return on actuarial reserves. If interest rates further decline or remain at historically low levels for a long period, the Allianz Group could be required to provide additional funds to the Allianz Group’s Life/Health subsidiaries to support their obligations in respect of products with higher guaranteed returns or their pension obligations, or increase reserves in respect of such products, which could in turn have a material adverse effect on the Allianz Group’s results of operations.

In the United States, in particular in the variable and fixed-indexed annuity products, and to a lesser extent in Europe and Asia, the Allianz Group has a portfolio of contracts where policyholder crediting is contractually tied to equity market performance. The hedging arrangements (if any) may not cover the returns due to policyholders or may increase corresponding costs during prolonged volatile markets, which could in turn have a material adverse effect on the Allianz Group’s results of operations.

IV. BUSINESS RISKS

ALLIANZ GROUP IS EXPOSED TO BUSINESS RISKS WHICH INCLUDE COST RISKS AND POLICYHOLDER BEHAVIOR RISKS.

Business risks include cost risks and policyholder behavior risks and are mostly driven by the Life/Health business and to a lesser extent by the Property-Casualty business. In our assessment, cost and policyholder behavior risk is the most material risk factor in the category of business risks. Cost risks are associated with the risk that expenses incurred in administering policies are higher than expected or that new business volume decreases to a level that does not allow Allianz to absorb its fixed costs. Policyholder behavior risks are risks related to the unpredictable, adverse behavior of policyholders in exercising their contractual options, associated with major market and economical changes, including for example the early termination of contracts, surrenders, partial withdrawals, renewals, and annuity take-up options.

Allianz Group is exposed to business risks attributable primarily to the Life/Health business segment. Business risk is measured relative to baseline plans. Assumptions on policyholder behavior are set in line with accepted actuarial methods and are based on own historical and industry-wide data or expert judgement. A risk for Allianz may arise when underlying business risk assumptions deviate from their development in reality.

GERMAN LIFE INSURANCE UNDERTAKINGS OF THE ALLIANZ GROUP MAY HAVE INCREASED OBLIGATIONS UNDER THE GERMAN POLICY HOLDER PROTECTION SCHEME FOR LIFE INSURERS (PROTEKTOR).

German life insurance undertakings of the Allianz Group are members of the German policy holder protection scheme for life insurers (“Protektor”). In case of an adverse development of the situation of German life insurance companies outside Allianz Group, German life insurance undertakings of the Allianz Group may be required, in line with German regulation and the contract between these undertakings and Protektor, to make substantial contributions to Protektor that are considerably higher than at the current moment.

IF THE ALLIANZ GROUP’S ASSET MANAGEMENT BUSINESS UNDERPERFORMS, IT MAY EXPERIENCE A DECLINE IN ASSETS UNDER MANAGEMENT, RELATED FEE INCOME AND A REDUCTION OF PERFORMANCE FEES.

While the assets under management in the Allianz Group’s Asset Management segment include a significant amount of funds related to the Allianz Group’s insurance operations, third-party assets under management (“AUM”) represent the majority.

Results of the Allianz Group’s asset management activities are driven by variations in management and performance fees. Background for such variations may be AUM-movements which are induced by valuation changes resulting from market movements. In addition, AUM may fluctuate due to net flows which can be attributed to the relative performance of Allianz Group’s investment activities compared to competitors and benchmarks. Moreover, the result of Allianz Group’s asset management business can potentially be impacted by adverse credit or operational loss events incl. reputational damage, if any.

V. LEGAL AND REGULATORY RISK

THE ALLIANZ GROUP'S BUSINESS MAY BE NEGATIVELY AFFECTED BY ADVERSE PUBLICITY, REGULATORY ACTIONS OR LITIGATION WITH RESPECT TO THE ALLIANZ GROUP, OTHER WELL-KNOWN COMPANIES AND THE FINANCIAL SERVICES INDUSTRY GENERALLY.

Adverse publicity and damage to the Allianz Group's reputation might arise from financial reporting irregularities or compliance irregularities, data protection irregularities, involving Allianz Group or other large and well-known companies, increasing regulatory and law enforcement scrutiny of "know your customer", anti-money laundering, anti-corruption and anti-terrorist-financing procedures and their effectiveness, and regulatory investigations of the asset management, banking and insurance industries or other regulatory actions. Any of the above could also lead to increased regulatory supervision, affect the Allianz Group's ability to attract and retain customers, impair the ability to make distributions on own-fund items and access to the capital markets or have other adverse effects on the Allianz Group in ways that are not predictable.

The Allianz Group companies are involved in legal, regulatory, and arbitration proceedings in Germany and a number of foreign jurisdictions, including the United States. Such proceedings arise in the ordinary course of our business, including, among others, our activities as an insurance, banking and asset management company, employer, investor and taxpayer. While it is not feasible to predict or determine the ultimate outcome of such proceedings, they may result in substantial damages or other payments or penalties or result in adverse publicity and damage to the Allianz Group's reputation. As a result, such proceedings could have an adverse effect on the Allianz Group's business, financial condition and results of operations.

In particular, as announced by ad-hoc disclosure on 1 August 2021, the Board of Management of Allianz SE has come to the conclusion that there is a relevant risk that the matters relating to the Allianz Global Investors U.S. LLC Structured Alpha Funds could materially impact future financial results of Allianz Group. Likewise, as announced by ad-hoc disclosure on 17 February 2022, with respect to the pending court and governmental proceedings in the U.S. in relation to the Structured Alpha Funds Allianz anticipated settlements with major investors in those Funds and therefore, and in light of ongoing discussions with U.S. governmental authorities, Allianz decided to book a provision of EUR 3.7 billion in the financial statements 2021.

Pursuant to its active efforts to compensate investors in the Structured Alpha Funds of Allianz Global Investors U.S. LLC Allianz has achieved additional settlements. In light thereof and progressing discussions with governmental authorities in the U.S., Allianz SE has decided on 11 May 2022 to book an additional provision of EUR 1.9 billion in Q1 2022 before tax. Allianz SE believes that this provision booked is a fair estimate of its remaining financial exposure in relation to compensation payments to investors and to payments under the resolution of the governmental proceedings.

As announced by ad-hoc disclosure on 17 May 2022, Allianz SE's indirect subsidiary Allianz Global Investors U.S. LLC has entered into settlements with the U.S. Department of Justice ("DOJ") and the Securities and Exchange Commission ("SEC") in connection with the Structured Alpha matter. Pursuant to the DOJ resolution, Allianz Global Investors U.S. LLC will plead guilty to one count of criminal securities fraud, and the SEC resolution establishes that Allianz Global Investors U.S. LLC violated relevant U.S. securities laws. These settlements fully resolve the U.S. governmental investigations of the Structured Alpha matter for Allianz.

CHANGES IN EXISTING, OR NEW, LAWS AND REGULATIONS, OR ENFORCEMENT INITIATIVES IN RESPECT THEREOF, IN THE COUNTRIES IN WHICH THE ALLIANZ GROUP COMPANIES OPERATE MAY MATERIALLY IMPACT THE ALLIANZ GROUP AND COULD ADVERSELY AFFECT THE ALLIANZ GROUP'S BUSINESS.

The Allianz Group's insurance, asset management and banking businesses as well as the financial steering activities of Allianz SE are subject to detailed, comprehensive laws and regulations as well as supervision in all the countries in which the Allianz Group companies do business.

Regulatory authorities have broad administrative power over many aspects of the insurance and financial services business, affecting *inter alia* requirements relating to liquidity, capital adequacy, permitted investments, corporate governance, business conduct, anti-money laundering and "know your customer" processes, privacy and data protection, record keeping, marketing and distribution practices as well as determining which transactions with countries and individuals are subject to sanctions or otherwise blacklisted. Failure to comply with any laws and regulations could lead to disciplinary action, the imposition of fines and/or revocation of a license, permission or authorization necessary for the conduct of our business or civil or criminal liability, all or any of which could have a materially adverse effect on our business, revenues, results and financial condition.

In addition, insurance, banking and other financial services laws, regulations and policies currently governing Allianz SE and its subsidiaries may change at any time in ways which have an adverse effect on the Allianz Group's business.

Changes in existing laws and regulations, or in their interpretation by the authorities, may affect Allianz Group's tax burden, its capital requirements, the way in which the Allianz Group companies conduct their business and the products they may offer. Governments, regulatory authorities and others have made and continue to make proposals to reform the regulatory framework for the financial services industry to enhance its resilience against future crises and to enhance consumer protection. Proposals include, among others, requests for more stringent regulatory capital and liquidity standards, regulation of specific types of business perceived as inherently risky and expansion of the resolution powers of regulators. It is possible that the future regulatory framework for the financial industry may change. This could result from the current review of

European Directive 2009/138/EC (“**Solvency II**”) and the proposed Insurance Recovery and Resolution Directive (“**Draft IRRD**”), which may impact Allianz’ capitalization and convey certain new powers to regulatory authorities in case of a financial deterioration of Allianz SE or the Allianz Group. The regulatory framework relevant for Allianz Group could also change due to the fact that the Allianz Group has been designated as a “Global Systemically Important Insurer” by the Financial Stability Board and would be subject to the respective policy measures which may apply to such groups. In addition, it is unclear how the Common Framework for the Supervision of Internationally Active Insurance Groups (“**Comframe**”) of the International Association of Insurance Supervisors (“**IAIS**”) will finally be implemented. Effects of the regulatory changes on the Allianz Group may range from additional administrative cost to implement and comply with new rules to increased cost of capital and a materially adverse effect on the Allianz Group’s business, results of operation and prospects. Finally, the potential for a multiplicity of different regulatory regimes, capital standards and reporting requirements will increase operational complexity and costs.

Regulators are increasingly focused on promoting the protection of customer/client information and the integrity of information technology systems of regulated firms, utilizing data protection regulations such as the EU General Data Protection Regulation (Regulation (EU) 2016/679) (the “**EU GDPR**”) and the cyber laws of individual states of the United States that have been adopted based in part on the Insurance Data Security Model Law developed by the National Association of Insurance Commissioners (“**NAIC**”). These initiatives increase the risk of potential liability and could lead to more conservative approaches to the sharing of data, which in turn could impact assessments of risks. Increased regulatory activity may also include greater scrutiny of personal data processing within the insurance sector, which may give rise to regulatory intervention and reputational harm. Failure to comply with applicable regulations may expose us to significant regulatory fines (for example, the maximum fine for non-compliance with certain EU GDPR requirements would be up to EUR 20 million or 4% of our global turnover (whichever is greater)), damages claims and reputational damage.

The Allianz Group is further subject to antitrust regulation in the European Union and other jurisdictions and is therefore exposed to risks regarding related enforcement actions and damage claims. A finding of an infringement of antitrust regulations could adversely affect the Allianz Group in a variety of ways, including significant fines (based, among other factors, on the value of the relevant sales); private enforcement claims by third parties, such as customers and/or competitors; changes in business practices that may result in reduced revenues and/or margins; and reputational damage.

Governments in jurisdictions in which the Allianz Group does business may consider changes to tax laws – for example in the US related to the Build Better Plan proposed by President Biden before his inauguration or the “minimum effective tax rate” rules as part of the OECD / G20’s initiative to address tax challenges associated with the digitalization of the economy – which may adversely affect the attractiveness of certain of the Allianz Group’s products; if enacted, such changes could result in a significant reduction in the sale of such products.

REGULATORY ACTIONS IN CASE OF A BREACH OF REGULATORY CAPITAL REQUIREMENTS.

In the event of a failure by Allianz SE or the Allianz Group to meet regulatory capital requirements, regulators have broad authority to take various regulatory actions including limiting or prohibiting the writing of new business, prohibiting payment of dividends or coupon payments and suspend repayments of senior and subordinated debt. A breach of regulatory capital requirements or a reduction of solvency ratios by subsidiaries may result in Allianz SE injecting capital into its subsidiaries which could in turn adversely affect Allianz SE’s own financial position and risk exposure. Regulatory restrictions can reduce Allianz SE’s ability to move capital within Allianz Group which in turn can adversely affect the liquidity and financial position of Allianz SE and the Allianz Group. Under the Solvency II regime, the powers of intervention of supervisory authorities with respect to reinsurers like Allianz SE are extensive and, in particular, allow for a restriction on all payments (in particular, payments under the Notes or the Guarantee, if any) in a potential crisis.

Such powers are proposed to be extended in the current review of Solvency II and the proposed Draft IRRD, namely by introducing macroprudential intervention powers and early intervention powers, which may be available to supervisory or other authorities before or without a breach of regulatory capital requirements, and resolution powers of the resolution authority. However, the proposals are not yet in final form, and accordingly, it is not yet possible to assess the full impact of the amendment of Solvency II and the Draft IRRD or any German legislation implementing the respective provisions.

VI. INTERNAL CONTROL RISK AND OTHER OPERATIONAL RISK

The Allianz Group has an internal risk and control system for verifying and monitoring its operating activities and business processes, in particular financial reporting, as well as compliance with regulatory requirements. There can be no assurance that this internal risk and control system fully protects the Allianz Group against material misstatements in its public reporting and other disclosure (including, but not limited to, as a result of the operational risks described below), that it is adequate to prevent, discover and remediate breaches of laws or that it will be adequate for an enterprise of the Allianz Group’s scale and complexity. Any failure to effectively prevent, identify or address violations of our legal obligations as a result of inadequate internal controls, procedures, compliance systems and risk management systems could result in penalties and other sanctions, liabilities, the assertion of damages claims by third parties, and reputational damage, each of which could materially and adversely affect our financial condition and results of operations.

The Allianz Group is exposed to operational risks resulting from inadequate or failed internal processes, human errors, system failures, and external events that can stem from a wide variety of sources such as:

- Potential losses due to a failure to meet a professional obligation or from the design of a product. Examples include mis-selling and other illegal or unethical sales practices, non-compliance with internal or external requirements related to products, employee fraud and other misconduct, antitrust behavior, data protection, sanctions and embargoes, etc. These losses tend to be of a lower frequency but with a potentially high financial impact.
- Potential losses arising from transaction or process management failures. Examples include interest and penalties from non-payment or under-payment of taxes or losses associated with broker and agent distribution processes. These losses tend to be of a relatively higher frequency but with little financial impact (although single large loss events can occur).
- Other operational risks, including, for example, internal or external fraud, financial misstatement risk, a breach of cybersecurity incident causing business disruption or fines, a potential failure at Allianz Group's outsourcing partners causing a disruption to its working environment. For example, the Allianz Group relies on complex IT systems and could suffer financial losses, a disruption of its businesses, liabilities to clients, regulatory interventions or reputational damage in case of events such as operational errors, software and hardware errors, power blackouts, damage, computer viruses, terrorist or other acts of sabotage as well as other internal or external threats. Operational risks also include legal and compliance risks.

VII. OTHER RISKS

Other risks include geopolitical risk, ongoing uncertainty around the evolution of the SARS-COV-2 Pandemic as well as strategic, liquidity, and reputational risk. In our assessment, geopolitical risk is the most material risk in this category.

GEOPOLITICAL RISK

Geopolitical risk intensified significantly at the beginning of 2022 with the Russian military invasion in Ukraine.

The immediate impact of the Russian aggression on energy and raw material prices was substantial, and further aggravated the fears of a sustained rise in inflation that was already prevalent then due to (i) the disruption of global supply chains due to the Covid-19 pandemic, and (ii) the increased tendency to limit international trade flows via tariffs that has been witnessed in several countries in recent years. As a consequence of the war in Ukraine, volatility of financial asset prices of equity and debt instruments, as well as of other traded goods, increased substantially. The economic sanctions against Russia and Belarus that were imposed by the USA, the European Union, other NATO members or other Western states following the invasion may materially disrupt the Russian and Belarusian economy, their public finances and their financial system.

The risk of further escalation of both the military conflict as well as the political reaction thereto is high. Any potential counter-sanctions imposed by Russia and Belarus against Western states may trigger a reaction by the affected countries, including an expansion of the scope and extent of sanctions already imposed on Russia and Belarus. In addition, following Russia's invasion of Ukraine, cyberattacks against Ukraine have already been witnessed and reported, and there is an increased likelihood of Russian state-approved or even state-sponsored cyberattacks on critical infrastructure in Western countries. Should such attacks occur, a response by Western states potentially leading to outright cyberwar cannot be ruled out. Further military escalation is possible, and a direct conflict of Russia with other countries cannot be ruled out.

As a consequence of the crisis and its potential escalation, a revision of the growth outlook for the international economies is expected, and there is a significant risk of (i) persistent lower and / or volatile equity market valuations, (ii) widening bond credit spreads (including for bonds issued by corporates, financial institutions or governments), (iii) a rise in credit defaults, and (iv) generally higher price volatility and uncertainty across all asset classes. The ultimate impact of this potentially escalating political and military conflict are unpredictable.

The exposure of the Allianz Group that is immediately impacted by the Russian crisis, i.e. Russia, Belarus and Ukraine, includes the following:

- Allianz Group's participations in entities based in Russia, Belarus and Ukraine;
- Allianz Group's proprietary investments in these countries which stood at approximately EUR 0.6 billion of equity and debt market values in Russia and in Belarus after impairments and EUR 0.3 billion of debt market values in Ukraine as of 31 March 2022; and
- Insurance policies underwritten by Allianz Group, in particular, through its global lines of business (AGCS, Allianz Partners, Euler Hermes), for example, credit insurance and aviation insurance policies).

In addition, Allianz Group may also be impacted by any further escalation of the military or political conflict, in which case a substantially negative impact on Allianz entities in countries beyond Russia or Ukraine cannot be ruled out. This includes the possibility of cyberattacks against financial institutions like the members of Allianz Group. Key risks relate to the underwriting result, the value of our investments and risks related to broader financial market volatility, as well as risks to general business continuity.

The Allianz Group is also indirectly affected by the conflict, given the more general impact on international financial markets as well as on customers of and suppliers to Allianz SE.

The crisis has led to significant impairments on the value of the Russian and Belarusian investments of the Allianz Group. In case Allianz Group had to completely discontinue its Russian insurance subsidiaries it would expect a profit and loss impact of approx. EUR -0.4 billion to EUR -0.5 billion largely driven by recycling of negative other comprehensive income reserves from historic F/X changes, with no expected impact on the Group SII ratio or the cash position of Allianz SE.

It is likely that the crisis will lead to significant impairments on the value of the relevant participations and investments of the Allianz Group. As of the date of this Prospectus and thereafter, the crisis may have further adverse effects on the business and financial results of Allianz Group that cannot be anticipated or estimated either.

RISKS RELATED TO THE SARS-COV-2 PANDEMIC

The lasting uncertainty around the evolution of the Covid-19 pandemic remains a significant risk. Full economic and social recovery is not expected to occur until the health concerns are forcefully and credibly removed, i.e. highly effective medication is available or herd immunity is achieved. The results of operations, financial condition, and liquidity and capital resources of the Allianz Group have been adversely impacted by the Covid-19 pandemic, and the future impact of the pandemic, in particular in combination with the war in Ukraine, is difficult to predict. Future increase of financial, underwriting, liquidity and operational risks for the Allianz Group cannot be completely excluded which, ultimately, may have material adverse effects on the operating results of the Allianz Group and its business and financial situation. Such developments have had and continue to have a number of effects on the Allianz Group's business and risk profile, including the following:

- Property and Casualty business: Global business lines offered by some subsidiaries are expected to continue to be impacted by the crisis, such as travel insurance (Allianz Partners), credit insurance (Euler Hermes) and to some extent business interruption lines of business (e.g. UK, France). In credit insurance, a potential increase in defaults may lead to higher expected losses. Additional uncertainty may arise on both insurance and reinsurance due to legislative and regulatory responses such as, for example, premium deferrals, customer friendly interpretation of policy cover and retroactive extension of insurance coverage.
- Life and Health business: Despite the performance relief in 2021, the Covid-19 pandemic could increase frequency of claims and medical costs in health insurance.
- Asset management: Potential adverse market developments, including significant market volatility, or investor behavior triggered by the further development of the pandemic incl. for example the appearance of new virus mutations or measures taken by governments or regulators may decrease assets under management, with associated negative earnings impact.
- Market and Credit risk: The Covid-19 pandemic continues to have an impact on all market risks of the Allianz Group, although with the outbreak of the war in Ukraine the impacts by the pandemic in particular are not distinctly measurable anymore, as it has the potential to cause significant price movements on the financial markets especially for equities and credit spreads. Allianz also expects continued impact of the crisis on credit risk, in particular associated with loans granted, investments in fixed-income securities and reinsurance. Depending on the further development of the Covid-19 pandemic and the post-pandemic trends, it may also have adverse impacts on the valuation of the real estate investments of the Allianz Group in the event, for example, there is a sustained and significant decrease in rental income from such properties.
- Liquidity risk: In the current market environment, caused by the Covid-19 pandemic, the liquidity situation of Allianz Group is influenced especially by the economic and solvency situation of its subsidiaries, as well as the political and regulatory requirements regarding corporate capital management activities, such as the general ability to pay dividends. Potential risks may continue to arise in relation to the occurrence of disturbances in the financial market as well as recapitalization needs of related undertakings.
- Operational risk: Allianz Group's operational risks associated with the Covid-19 pandemic could result in particular from operational delays due to public measures to restrict social contacts, unexpected employee health problems, costs of implementing business continuity plans and delays or failures in external services. The increasing reliance on digital technologies has been greatly accelerated by the Covid-19 pandemic. The wide move to remote working during the pandemic is expected to constitute a key part of the future working model at Allianz which increases the risk of technology obsolescence, cyberattacks, data breaches, system failures as well as the risk of non-compliance with increasing regulation covering IT-related business processes.
- Modelling risk: Emerging events, such as the Covid-19 pandemic, are analyzed and taken into account as part of the specific analyses or model reviews carried out by Allianz Group's experts. Allianz Group utilizes assumptions, estimates and models to evaluate the potential impact on its business, results of operations and financial condition as a result of the Covid-19 pandemic and the response thereto. If actual events differ materially from those assumptions, estimates or models, the potential estimated losses could be materially higher than those reflected in Allianz Group's capital plans, and its business, financial condition, and results of operations could be materially adversely affected.

Furthermore, the Allianz Group may be subject to government and/or regulatory action that would require us to cover losses related to the impact of Covid-19 even if the insurance policies offered by the Allianz Group were not designed, drafted or priced to cover such losses. In some jurisdictions, including in multiple U.S. states, legislative proposals have been introduced that could, if enacted, require insurers operating in such jurisdictions, including the Allianz Group, to cover certain business interruption claims due to Covid-19, even if such losses are not currently covered under the terms of the relevant policy. There is no assurance that, if such laws are enacted, insurers would be compensated for such payments, and such policies could have a negative impact on the business and financial condition of the Allianz Group. U.S. federal legislative proposals are also under consideration that would, if enacted, establish a U.S. federal program for covering business interruption losses resulting from a public health emergency. In the event such or similar legislative proposals are enacted, our insurance contracts may ultimately be interpreted to provide broader coverage for business interruption losses than the Allianz Group anticipated or intended. Finally, the adverse impacts of Covid-19 on tax revenues in countries in which the Allianz Group operates could lead to increased taxes and assessments on insurers in order to address budget shortfalls.

REPUTATIONAL RISK

Allianz Group's reputation as a well-respected and socially aware provider of financial services is influenced by its behavior in a range of areas such as product quality, corporate governance, financial performance, customer service, employee relations, intellectual capital, and corporate responsibility. Environmental, Social and Governance (ESG) issues, in particular, may emerge in all risk categories. Unproper identification or integration of ESG aspects into core investment and insurance activities may increase Allianz reputational risks or even lead to unexpected economical losses.

Any misbehavior can lead to adverse publicity and damage the Allianz Group's reputation and trigger increased regulatory supervision, affect the Allianz Group's ability to attract and retain customers, impair access to the capital markets or have other adverse effects on the Allianz Group in ways that are not predictable. Reputational risk is the risk of an unexpected drop in the value of the Allianz SE share price, the value of the in-force business, or the value of future business caused by a decline in the reputation in external stakeholders' judgement.

STRATEGIC RISK

Strategic risk is the risk of a decrease in Allianz Group's value arising from adverse management decisions on business strategies and their implementation. Strategic risks are identified and evaluated as part of the Allianz Group's Top Risk Assessment process and discussed in various Board of Management-level committees (e.g., Group Finance and Risk Committee). Allianz Group also monitors market and competitive conditions, capital market requirements and regulatory conditions, to decide if strategic adjustments are necessary.

Strategic risk includes, in particular, risks associated with the fact that the markets in which the Allianz Group operates are generally quite competitive. This basically applies to all of the Allianz Group's primary business areas, i.e., insurance, asset management and banking businesses. Key factors affecting competition in these areas include price, product features, commission structures, financial strength, claims-paying ability, ratings, administrative performance, support services and name recognition.

In particular, the Allianz Group's more mature insurance markets (e.g., Germany, France, Italy and the United States) are highly competitive. In recent years, the Allianz Group has also experienced increasing competition in emerging markets, as large insurance companies and other financial services providers have also entered these markets to participate in their high growth potential. In addition, local institutions have become more experienced and have established strategic relationships, alliances or mergers also with the Allianz Group's competitors. Furthermore, new competitors from the technology segment may increase their market share or sustainably shape the way how the insurance sector operates. Downturns in the economies of these markets might even increase the competitive pressure, potentially resulting in lower margins or business volumes for the Allianz Group.

If the Allianz Group fails to offer attractive products and services suitable to changing consumer demands, technological trends and regulation, revenues could be materially adversely affected and the Allianz Group may lose market shares in important areas of the Allianz Group's business, which might also have a material adverse impact on the Allianz Group. In addition, ongoing pricing pressure in certain highly competitive markets may negatively impact the Allianz Group's profitability.

Strategic risk also includes the risk that acquisitions by the Allianz Group can have adverse effects on its financial position and results of operations. A variety of factors, which vary with the nature of the underlying transaction, that are partially or entirely beyond the Allianz Group's control could cause actual business results of the acquired undertakings being materially different from what was initially expected, and any synergies due to the acquisition, therefore, could, as a result, be materially smaller or realized at a later stage than initially expected.

LIQUIDITY RISK

Liquidity risk is the risk that current or future payment obligations cannot be met or can only be met on the basis of adversely altered conditions. Liquidity risk can arise primarily if there are mismatches in the timing of cash in- and out-flows.

Allianz Group's operating entities manage liquidity risk locally, using asset/liability management systems designed to ensure that assets and liabilities are adequately matched. The major sources of liquidity for operational activities are primary and reinsurance premiums received, reinsurance receivables collected, investment income, and proceeds generated from the maturity or sale of investments. These funds are mainly used to pay claims arising from the Property-Casualty insurance business and related expenses, life policy benefits, surrenders and cancellations, acquisition costs, and operating costs.

The main sources of liquidity available for Allianz SE are dividends received from subsidiaries and funding provided by capital markets. Liquidity resources are readily available assets – specifically cash, money market investments, and highly liquid government bonds. Allianz SE's funds are primarily used for principal and interest payments on debt funding, operating costs, internal and external growth investments, and distributions to shareholders. Allianz SE's access to external funds depends on various factors such as capital market conditions, access to credit facilities, credit ratings, and credit capacity as well as the possibility that customers or lenders could develop a negative perception of the Allianz Group's long- or short-term financial prospects or negative actions by regulators or rating agencies. The financing of the Allianz Group's activities includes, among other means, funding through commercial paper facilities and medium- and long-term debt issuances. A break-down of such markets such as in the last global financial crisis could have a materially adverse impact on the availability and cost of funding as well as on the refinancing structure of the Allianz Group.

The overall liquidity of Allianz Group's insurance operations depends on capital market developments, interest rate levels, and the ability to realize the market value of the investment portfolio to meet insurance claims and policyholder benefits. Other factors affecting the liquidity of the Property-Casualty insurance operations include the timing, frequency, and severity of losses underlying the policies and policy renewal rates. In Life operations, liquidity needs are generally influenced by trends in actual mortality rates compared to the assumptions underlying the life insurance reserves. Market returns, crediting rates, and the behavior of life insurance clients – for example, regarding the level of surrenders and withdrawals – can also have significant impacts.

Major contingent liquidity requirements include market risk scenarios for Allianz SE and its subsidiaries, non-availability of external capital markets, and reinsurance risk scenarios for Allianz SE.

RATING DOWNGRADE RISK

Claims paying ability as expressed by the insurance financial strength ratings is a factor in establishing the competitive position of insurers. Allianz SE's financial strength rating has a significant impact on the individual ratings of key subsidiaries. If a rating of certain subsidiaries falls below a certain threshold, the respective operating business may be significantly impacted. A ratings downgrade, or the potential for such a downgrade, of the Allianz Group or any of its insurance subsidiaries could, among other things, adversely affect relationships with agents, brokers and other distributors of the Allianz Group's products and services, thereby negatively impacting new sales, adversely affect the Allianz Group's ability to compete in the respective markets and increase the cost of borrowing. In particular, in those countries where primary distribution of the Allianz Group's products is done through independent agents, future ratings downgrades could adversely impact sales of the life insurance and annuity products. Any future ratings downgrades could also materially adversely affect the cost of raising capital and could, in addition, give rise to additional financial obligations or accelerate existing financial obligations which are dependent on maintaining specified rating levels. For some lines of business, a downgrade might also have impact on current business in case agreements provide for cancellation clauses which allow policyholders to cancel the agreements in case a certain downgrade occurs. This would trigger a repayment of (parts) of the received premium.

Rating agencies can be expected to continue to monitor the Allianz Group's financial strength and claims paying ability. Future ratings downgrades may occur at any time, whether due to changes in the Allianz Group's performance, its regulatory capital position, changes in the rating agencies' industry views or ratings methodologies, or a combination of these and other factors. In December 2021, for example, Standard and Poor's announced proposed changes to its rating methodologies. The proposed changes have not been finalized. Thus, the impact, if any, that these changes may have on Allianz SE's ratings is unknown.

MARKET AND OTHER FACTORS COULD ADVERSELY AFFECT GOODWILL, DEFERRED POLICY ACQUISITION COSTS AND DEFERRED TAX ASSETS; THE ALLIANZ GROUP'S DEFERRED TAX ASSETS ARE ALSO POTENTIALLY IMPACTED BY CHANGES IN TAX LEGISLATION.

Business and market conditions may impact the amount of goodwill the Allianz Group carries in its consolidated financial statements as well as other intangible assets. As the value of certain parts of the Allianz Group's businesses, including in particular the Allianz Group's asset management business, are significantly impacted by such factors as the state of financial markets and ongoing operating performance, significant declines in financial markets or operating performance could also result in impairment of other goodwill carried by the Allianz Group companies and result in significant write-downs, which could be material.

The assumptions the Allianz Group made with respect to recoverability of deferred policy acquisition costs ("DAC") are also affected by such factors as operating performance and market conditions. DAC is incurred in connection with the production of new and renewal insurance business and is deferred and amortized generally in proportion to profits or to premium income expected to be generated over the life of the underlying policies, depending on the classification of the product. If the assumptions on which expected profits are based prove to be incorrect, it may be necessary to accelerate amortization of DAC, even to the extent of writing down DAC, which could materially adversely affect results of operations.

Allianz Group carries in its consolidated financial statements deferred tax assets and deferred tax liabilities. The calculation of the respective tax assets and liabilities is based on current tax laws and IFRS and depends on applicable valuation parameters as well as on the performance of Allianz SE and of certain business units in particular.

Changes in German or other tax legislation or regulations or an operating performance below currently anticipated levels or any circumstances which result in an expiration of tax losses may lead to an impairment or revaluation of deferred tax assets, in which case the Allianz Group could be obligated to write-down certain tax assets. Tax assets may also need to be written down if certain assumptions of profitability prove to be incorrect, as losses incurred for longer than expected could make the usability of tax assets more unlikely. Any such development may have a material adverse impact on the Allianz Group's net income.

EMERGING RISKS

Certain ongoing systemic changes may affect the future financial performance, capitalization and liquidity of Allianz Group. These developments are by their nature difficult to predict and depend generally on factors beyond our control. Examples of such risks that may affect Allianz Group include:

- Environmental Matters: Climate change may lead to natural catastrophes, political instability, emerging diseases or changed social behavior that differ from historical experience and may thus be difficult to predict using traditional models. Consequently, climate change and its related impact has the potential to affect the quality of our underwriting, pricing and retrocession processes and may adversely affect our financial condition, results of operations and business activities.
- Regulatory Reform: Judicial or legislative changes to retroactively expand policy coverage may expose us in the future to higher than expected losses which would require additional reserve strengthening and higher loss payments. Such retroactive changes to the provision of business interruption insurance have already begun to occur during the Covid-19 crisis.
- Technological Developments: Insurance companies are required to adapt to multiple emerging technologies that are changing customer behavior, affecting how business is conducted, and potentially creating new sources of risks. Allianz Group may be adversely affected if we are unable to adapt to the impact of such technologies on our operations and unable to adequately anticipate and model such risks. Such potential emerging risks related to technological change include cybersecurity, as well as new risks relating to new technologies such as autonomous cars and nanotechnologies.

RISK FACTORS RELATING TO ALLIANZ FINANCE II B.V.

Allianz Finance II B.V. is a funding vehicle for the Allianz Group. As such, it, *inter alia*, raises funds and on-lends monies to group companies within the Allianz Group by way of intra-group loans. In the event that a group company fails to make a payment under an intra-group loan, the Issuer may not be able to meet its payment obligations under the Notes.

RISK FACTORS RELATING TO ALLIANZ FINANCE III B.V.

Allianz Finance III B.V. is a funding vehicle for the Allianz Group. As such, it, *inter alia*, raises funds and on-lends monies to group companies within the Allianz Group by way of intra-group loans. In the event that a group company fails to make a payment under an intra-group loan, the Issuer may not be able to meet its payment obligations under the Notes.

RISK FACTORS RELATING TO THE NOTES

VIII. RISKS RELATED TO THE NATURE OF THE NOTES

NOTEHOLDERS ARE SUBJECT TO THE RISK OF A PARTIAL OR TOTAL FAILURE OF THE RELEVANT ISSUER OR, IF APPLICABLE, THE GUARANTOR TO MAKE INTEREST AND/OR REDEMPTION PAYMENTS.

Any person who purchases the Notes is relying on the creditworthiness of the relevant Issuer and, if applicable, the Guarantor, and has no rights against any other person. Noteholders are subject to the risk of a partial or total failure of the relevant Issuer or, if applicable, the Guarantor to make interest and/or redemption payments that such Issuer or, if applicable, the Guarantor is obliged to make under the Notes or the Guarantee. The worse the creditworthiness of the relevant Issuer or, if applicable, the Guarantor, the higher the risk of loss (see also “*Risk Factors relating to Allianz SE/Allianz Group*”, “*Risk Factors relating to Allianz Finance II B.V.*” and “*Risk Factors relating to Allianz Finance III B.V.*” above). A materialization of the credit risk may result in partial or total failure of the relevant Issuer or, if applicable, the Guarantor to make interest and/or redemption payments under the Notes or the Guarantee.

In addition, even if the likelihood that the relevant Issuer or, if applicable, the Guarantor, will be in a position to fully perform all obligations under the Notes or the Guarantee when they fall due actually has not decreased, market participants could nevertheless be of that opinion. Market participants may in particular be of such opinion if market participants’ assessment of the creditworthiness of corporate debtors in general or debtors operating in the insurance sector adversely change. If any of these risks materializes, third parties would only be willing to purchase the Notes for a lower price than before and the market value of the Notes may therefore decrease.

THE NOTES WILL BE EFFECTIVELY SUBORDINATED TO ALLIANZ GROUP’S DEBT TO THE EXTENT SUCH DEBT IS SECURED BY ASSETS THAT ARE NOT ALSO SECURING THE NOTES.

Although the Terms and Conditions restrict the relevant Issuer’s and, if applicable, the Guarantor’s ability to provide asset security for the benefit of other debt and require the relevant Issuer and, if applicable, the Guarantor to secure the Notes equally if they provide security for the benefit of Capital Markets Indebtedness (as defined in the Terms and Conditions), the requirement to provide equal security to the Notes is subject to a number of significant exceptions and carve-outs. To the extent the relevant Issuer or, if applicable, the Guarantor provide asset security for the benefit of other debt without also securing the Notes, the Notes will be effectively junior to such debt to the extent of such assets.

As a result of the foregoing, holders of any secured debt of Allianz Group may recover disproportionately more on their claims than the Noteholders in bankruptcy, administration, reorganization, insolvency, receivership or similar proceedings. The relevant Issuer or, if applicable, the Guarantor may not have sufficient assets remaining to make payments on the Notes.

THE NOTES ARE STRUCTURALLY SUBORDINATED TO CREDITORS OF THE RELEVANT ISSUER'S OR THE GUARANTOR'S SUBSIDIARIES

The Notes will not be guaranteed by any of the subsidiaries of the relevant Issuer or, if applicable, of the Guarantor. Generally, claims of creditors of a subsidiary, including trade creditors, secured creditors, and creditors holding indebtedness and guarantees issued by the subsidiary, will have priority with respect to the assets and earnings of the subsidiary over the claims of creditors of its parent company. In the event of a liquidation, winding-up or dissolution or a bankruptcy, administration, reorganization, insolvency, receivership or similar proceeding of any subsidiary of the relevant Issuer or the Guarantor, such subsidiary will pay the holders of its own debt (including holders of third-party debt which such subsidiaries have guaranteed) before they would be able to distribute any of their assets to the relevant Issuer or the Guarantor. As a result, the relevant Issuer or the Guarantor may not have sufficient assets to make payments on the Notes.

MARKET PRICE RISK

The development of market prices of the Notes depends on various factors, such as changes of market interest rate levels, the policies of central banks, overall economic developments, inflation rates, or the lack of or excess demand for the relevant type of Note. The Noteholders are therefore exposed to the risk of an unfavorable development of market prices of their Notes, which materializes if the Noteholders sell the Notes prior to the final maturity of such Notes. If a Noteholder decides to hold the Notes until final maturity, the Notes will be redeemed at the amount set out in the relevant Final Terms.

Investment in Fixed Rate Notes or in non-interest bearing Notes involves the risk that subsequent changes in market interest rates may adversely affect the value of the Notes. While the nominal interest rate (i.e. the coupon) of the Notes is fixed, the market yield typically changes on a daily basis. As the market yield changes, the price of the Notes changes in the opposite direction. If the market yield increases, the price of the Notes falls. If the market yield falls, the price of the Notes increases.

Noteholders should also be aware that the market yield has two components, namely the risk free rate and the credit spread. The credit spread is reflective of the yield that investors require in addition to the yield on a risk free investment of equal tenor as a compensation for the risks inherent in the Notes. The credit spread changes over time and can decrease as well as increase for many reasons. The market yield of the Notes can change due to changes of the credit spread, the risk free rate, or both.

In addition, Noteholders are exposed to reinvestment risk with respect to proceeds from coupon payments or early redemptions by the Issuer. If the market yield (or market spread respectively) declines, and if Noteholders want to invest such proceeds in comparable transactions, Noteholders will only be able to reinvest such proceeds in comparable transactions at the then prevailing lower market yields (or market spreads respectively).

A key difference between Floating Rate Notes on the one hand and Fixed Rate Notes or non-interest bearing Notes on the other hand is that interest income on Floating Rate Notes cannot be anticipated. Due to varying interest income, investors are not able to determine a definite yield of Floating Rate Notes at the time they purchase them, so that their return on investment cannot be compared with that of investments having a longer term with fixed or no interest.

Since the Margin, if any, is fixed at issuance of the Floating Rate Notes, Noteholders are subject to the risk that the Margin does not reflect the spread that investors require in addition to the relevant reference interest rate as a compensation for the risks inherent in the Notes ("market spread"). The market spread typically changes on a daily basis. As the market spread changes, the price of the Note changes in the opposite direction. A decrease of the market spread has a positive impact on the price of the Note, an increase of the market spread has a negative impact on the price of the Note. However, the price of the Notes is subject to changes in the market spread, changes in the reference interest rate or both. Noteholders should be aware that movements of the market spread can adversely affect the price of the Notes and can lead to losses for the Noteholders.

In addition, Noteholders are exposed to reinvestment risk with respect to proceeds from interest payments or any early redemptions by the Issuer. If the market yield (or market spread respectively) declines, and if Noteholders want to invest such proceeds in comparable transactions, Noteholders will only be able to reinvest such proceeds in comparable transactions at the then prevailing lower market yields (or market spreads respectively).

LIQUIDITY RISK

Application has been made to the Luxembourg Stock Exchange for Notes issued under this Base Prospectus to be admitted to trading on the regulated market and to be listed on the official list of the Luxembourg Stock Exchange. However, Series of Notes issued under the Programme can also be listed on other stock exchanges or may not be listed at all, as specified in the relevant Final Terms.

Regardless of whether Series of Notes are admitted to trading on a regulated market or not, there is a risk that no liquid secondary market for such Notes will develop or, if it does develop, that it will not continue. The fact that Notes may be admitted to trading on a regulated market (or some other market) does not necessarily lead to better liquidity as compared to unlisted Notes. If Notes are not listed on any exchange, pricing information for such Notes may, however, be more difficult to obtain which may affect the liquidity of the Notes adversely.

The liquidity of a Series of Notes may also be subject to fluctuations during the term of such Notes and may deteriorate, in particular as a result of repurchases by the Issuer or its affiliates (in case of issuance by Allianz SE).

In an illiquid market, an investor is subject to the risk that he will not be able to sell his Notes at any time at fair market prices.

AMENDMENTS TO THE TERMS AND CONDITIONS BY RESOLUTION OF THE NOTEHOLDERS AND APPOINTMENT OF A JOINT REPRESENTATIVE

Since the Terms and Conditions for a Series of Notes may be amended by the relevant Issuer with consent of the relevant Noteholders by way of a majority resolution in a Noteholders' Meeting or by a vote not requiring a physical meeting (*Abstimmung ohne Versammlung*) as described in Sections 5 et seq. of the German Act on Issues of Debt Securities (*Gesetz über Schuldverschreibungen aus Gesamtemissionen*, "SchVG"), the relevant Issuer may subsequently amend the Terms and Conditions with the consent of the majority of Noteholders as described in § 14 of the Terms and Conditions, which amendment will be binding on all Noteholders of the relevant Series of Notes, even on those who voted against the change. As the relevant majority for Noteholders' resolutions is generally based on votes cast, rather than on the aggregate principal amount of the relevant Series of Notes outstanding, any such resolution may technically be passed with the consent of less than a majority of the aggregate principal amount of the relevant Series of Notes outstanding.

Therefore, a Noteholder is subject to the risk of being outvoted by a majority resolution of the Noteholders. As such majority resolution is binding on all Noteholders of a particular Series of Notes, certain rights of such Noteholder against the relevant Issuer under the Terms and Conditions may be amended or reduced or cancelled, even for Noteholders who have declared their claims arising from the Notes due and payable but who have not received payment from the relevant Issuer prior to the amendment taking effect, which may have significant negative effects on the value of the Notes and the return from the Notes.

The Noteholders may by majority resolution provide for the appointment or dismissal of a joint representative. If a joint representative is appointed a Noteholder may be deprived of its individual right to pursue and enforce a part or all of its rights under the Terms and Conditions against the relevant Issuer, such right passing to the Noteholders' joint representative who is then exclusively responsible to claim and enforce the rights of all the Noteholders.

RISKS IN CONNECTION WITH THE ADOPTION OF A RECOVERY AND RESOLUTION REGIME FOR INSURERS AND REINSURERS

On 22 September 2021, the European Commission adopted a proposal for an Insurance Recovery and Resolution Directive (such proposal hereinafter referred to as the "Draft IRRD"). If adopted and implemented into national law, the directive will allow authorities to protect policyholders, beneficiaries and claimants, maintain financial stability, ensure the continuity of the (re)insurer's critical functions and protect public funds by minimising reliance on extraordinary public financial support.

According to the Draft IRRD, the IRRD will provide authorities with comprehensive and effective intervention powers of national resolution authorities to prepare for and deal with (near) failures of (re)insurers at national level and cooperation arrangements to tackle cross-border (re)insurance failures. To this end the resolution authorities are proposed to be provided with necessary powers to apply the resolution tools (as defined in the Draft IRRD) to undertakings that meet the applicable conditions for resolution.

One of the resolution tools proposed in the Draft IRRD is the power to write down or convert capital instruments and eligible liabilities, on which basis the competent resolution authority may write down, or (with the exception of shares) convert into shares, Tier 1, Tier 2 and Tier 3 instruments and other eligible liabilities issued or borrowed by an undertaking (which may include senior notes issued by the undertaking such as senior Notes issued by Allianz under the Programme) if the undertaking is failing or likely to fail and certain other conditions are met, or if the conditions for group resolution are met.

The Draft IRRD foresees that in certain circumstances the resolution authority shall exercise the power to write down or convert capital instruments and eligible liabilities as a prioritised tool, individually or in combination with another resolution tool.

Normal insolvency proceedings will remain the alternative path for the whole or parts of a (re)insurer that cannot be resolved, and the Draft IRRD provides for a no creditor worse off principle, the exact extent of which remains to be determined.

It is not yet possible to assess the full impact of the Draft IRRD or any corresponding implementing German legislation.

Should the Draft IRRD or similar provisions enter into force and be implemented into German law, they may, despite the no creditor worse off principle being applicable, severely affect the rights of the Noteholders and may result in the loss of their entire investment in the event of resolution of Allianz. Any perceptions in the market that these provisions may become applicable to Allianz may reduce the market value of the Notes even before Allianz has actually reached the point of non-viability or resolution.

IX. RISKS RELATED TO THE SPECIFIC CONDITIONS OF THE NOTES

RISK OF EARLY REDEMPTION

At the Issuer's option, the Notes may be redeemed prior to the Maturity Date at par plus accrued interest if, as a result of a future change of applicable laws, the Issuer or the Guarantor (as applicable) will be obliged to pay Additional Amounts.

If provided for in any Final Terms for a particular Series of Notes, the Notes may be redeemed prior to the Maturity Date in one or more of the following cases: (i) if, as a result of a future change of applicable laws, any interest expense (*Zinsaufwand*) which includes interest payable by the Issuer in respect of the Notes or any payment to be made by the Guarantor under the Guarantee (as applicable) is no longer fully deductible by the Issuer or the Guarantor (as applicable) for income tax purposes, or (ii) at the option of the Issuer on any Call Redemption Date, or (iii) in case the nominal amount outstanding is equal to or lower than 25 per cent. of the aggregate principal amount of the Notes of the Series previously issued or (iv) following a Benchmark Event.

If the Notes of any Series are redeemed earlier than expected by a Noteholder, a Noteholder is exposed to the risk that due to the early redemption his investment will have a lower than expected yield. In addition, the Noteholder is exposed to the risk that arises from having to reinvest the cash proceeds of such early redemption earlier than expected. The redemption amount may be lower than the market price prevailing immediately prior to the publication of the call notice by the Issuer. The redemption amount may also be lower than the purchase price for the Notes paid by the Noteholder for the Notes so that the Noteholder in such case would incur a loss.

RISK RELATED TO THE REFORM OF INTEREST RATE "BENCHMARKS" AND POSSIBLE REPLACEMENT OF A BENCHMARK

The interest rates of Floating Rate Notes are linked to the Euro Interbank Offered Rate (EURIBOR). "Benchmarks" such as the EURIBOR (each a "Benchmark" and together, the "Benchmarks") have, in recent years, been the subject of political and regulatory scrutiny as to how they are created and operated. This has resulted in regulatory reform and changes to existing Benchmarks, with further changes anticipated.

International proposals for reform of Benchmarks include in particular the European Council's regulation (EU) 2016/1011 of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds and amending Directives 2008/48/EC and 2014/17/EU and Regulation (EU) No 596/2014 (the "Benchmarks Regulation") which is fully applicable since 1 January 2018.

Following the implementation of such reforms, the manner of administration of Benchmarks may change, with the result that they perform differently than in the past, or Benchmarks could be eliminated entirely, or there could be consequences which cannot be predicted. Any changes to a Benchmark as a result of the Benchmarks Regulation or other initiatives could have a material adverse effect on the costs of obtaining a Benchmark or the costs and risks of administering or otherwise participating in the setting of a Benchmark and complying with any such regulations or requirements. Such factors may have the effect of discouraging market participants from continuing to administer or participate in certain Benchmarks, trigger changes in the rules or methodologies used in certain Benchmarks or lead to the disappearance of certain Benchmarks.

Investors should be aware that, if a Benchmark were discontinued or otherwise unavailable, the rate of interest on Floating Rate Notes which are linked to or which reference such Benchmark will be determined for the relevant interest period by the fallback provisions applicable to such Notes.

Under the Terms and Conditions of Floating Rate Notes certain benchmark replacement provisions will apply in case a Benchmark used as a reference for calculation of amounts payable under the Notes issued under this Programme were to be discontinued or otherwise unavailable (whereby a material alteration of the methodology used by the administrator on the interest commencement date for the determination of the original benchmark rate will be deemed as discontinuation).

If a Benchmark Event occurs, the relevant Issuer shall endeavor to appoint an Independent Adviser, which must be an independent financial institution of international repute or other independent financial adviser experienced in the international capital markets. Such Independent Adviser will be tasked with determining whether an officially recognized successor rate to the discontinued Benchmark exists. If that is not the case, the Independent Adviser will attempt to find an alternative rate which, possibly after application of adjustments or spreads, can replace the discontinued Benchmark. If the Independent Adviser determines a successor rate or alternative rate (the "New Benchmark Rate"), such rate will replace the previous Benchmark for purposes of determining the relevant rate of interest. Such determination will be binding for the relevant Issuer, if applicable, the Guarantor, the Calculation Agent, the Paying Agents and the Noteholders of such Notes. Any amendments pursuant to these fallback provisions will apply with effect from the effective date specified in the Terms and Conditions.

If (i) the relevant Issuer fails to appoint an Independent Adviser or if (ii) the Independent Adviser fails to determine a New Benchmark Rate prior to the relevant interest determination date, then the Issuer may, using reasonable discretion, determine the New Benchmark Rate in those cases where Issuer determination is provided for by the Final Terms. If the Issuer fails to appoint an Independent Adviser, or where (i) the Independent Adviser (in cases where no Issuer determination is provided for by the Final terms) or (ii) neither the Independent Adviser nor the Issuer (in cases where Issuer determination is provided for by the Final terms) determine a New Benchmark Rate the reference rate applicable to the immediately

following interest period shall be the reference rate applicable as at the last preceding interest determination date. Any subsequent interest period may be subject to the subsequent operation of the fallback provisions.

The replacement of a Benchmark could have adverse effects on the economic return of the Noteholders of the relevant Notes compared to the applicable original benchmark rate.

If a Benchmark Event occurs, the Terms and Conditions may provide for an option for the relevant Issuer to call and redeem the affected Notes (in whole but not in part) with effect as of the date fixed for redemption in the notice. Please see "*Risk of early redemption*" above for risks related to such an early redemption.

REDENOMINATION RISK

In the case of any Notes for which the redenomination clause (§ 5(b)) is applicable, the Specified Currency of the Series may be redenominated (in whole but not in part) to the New Currency if the relevant member state of the European Monetary Union identified by the Final Terms redenominates its public debt to a currency other than the Euro (the "**New Currency**"). An investor could become newly exposed to the exchange rate risks and risk of exchange controls resulting from such redenomination.

DUTCH WITHHOLDING TAX ACT 2021

Dutch withholding tax may apply on certain (deemed) interest due and payable to an affiliated (*gelieerde*) entity of a Dutch Issuer if such entity (i) is considered to be resident of a jurisdiction that is listed in the yearly updated Dutch Regulation on low-taxing states and non-cooperative jurisdictions for tax purposes (*Regeling laagbelastende staten en niet-coöperatieve rechtsgebieden voor belastingdoeleinden*), or (ii) has a permanent establishment located in such jurisdiction to which the interest is attributable, or (iii) is entitled to the interest payable for the main purpose or one of the main purposes to avoid taxation of another person, or (iv) is not considered to be the recipient of the interest in its jurisdiction of residence because such jurisdiction treats another (lower-tier) entity as the recipient of the interest (hybrid mismatch), or (v) is not treated as resident anywhere (also a hybrid mismatch), or (vi) is a reverse hybrid whereby the jurisdiction of residence of a participant that has a qualifying interest (*kwalificerend belang*) in the reverse hybrid treats the reverse hybrid as tax transparent and that participant would have been taxable based on one (or more) of the items in (i)-(v) above had the interest been due to him directly, all within the meaning of the Dutch Withholding Tax Act 2021 (*Wet bronbelasting 2021*).

An entity is generally affiliated within the meaning of the Dutch Withholding Tax Act 2021 if it can directly or indirectly – either alone or as part of a cooperating group – control the decisions made by a Dutch Issuer. A general non-exhaustive example of such control includes a situation in which an entity has more than 50% of the voting rights in a Dutch Issuer. An entity is also affiliated if, broadly speaking, a Dutch Issuer can directly or indirectly – either alone or as part of a cooperating group – control the decisions made by that entity. Lastly, an entity is affiliated to a Dutch Issuer if a third party can directly or indirectly – either alone or as part of a cooperating group – control the decisions of both a Dutch Issuer and the other entity. ISSUE PROCEDURES

General

The relevant Issuer and the relevant Dealer(s) will agree on the terms and conditions applicable to each particular Tranche of Notes (the “**Conditions**”). The Conditions will be constituted by the relevant set of Terms and Conditions of the Notes set forth below (the “**Terms and Conditions**”) as further specified by the Final Terms (the “**Final Terms**”) as described below.

Options for sets of Terms and Conditions

A separate set of Terms and Conditions applies to each type of Notes, as set forth below. The Final Terms provide for the relevant Issuer to choose between the following Options:

- Option I - Terms and Conditions for Fixed Rate Notes and non-interest bearing Notes; and
- Option II - Terms and Conditions for Floating Rate Notes.

Documentation of the Conditions

The relevant Issuer may document the Conditions of an individual issue of Notes in either of the following ways:

- The Final Terms shall be completed as set out therein. The Final Terms shall determine which of the Option I or Option II, including certain further options contained therein, respectively, shall be applicable to the individual issue of Notes by replicating the relevant provisions and completing the relevant placeholders of the relevant set of Terms and Conditions as set out in the Base Prospectus in the Final Terms. The replicated and completed provisions of the set of Terms and Conditions alone shall constitute the Conditions, which will be attached to each global note representing the Notes of the relevant Tranche. This type of documentation of the Conditions will be required where the Notes are publicly offered, in whole or in part, or are to be initially distributed, in whole or in part, to non-qualified investors.
- Alternatively, the Final Terms shall determine which of Option I or Option II and of the respective further options contained in each of Option I and Option II are applicable to the individual issue by referring to the relevant provisions of the relevant set of Terms and Conditions as set out in the Base Prospectus only. The Final Terms will specify that the information contained in Part I of the Final Terms and the relevant set of Terms and Conditions as set out in the Base Prospectus, taken together, shall constitute the Conditions. Each global note representing a particular Tranche of Notes will have the information contained in Part I of the Final Terms and the relevant set of Terms and Conditions as set out in the Base Prospectus attached.

Determination of Options / Completion of Placeholders

The Final Terms shall determine which of the Option I or Option II shall be applicable to the individual issue of Notes. Each of the sets of Terms and Conditions of Option I and Option II contains also certain further options (characterized by indicating the respective optional provision through instructions and explanatory notes set out either on the left of or in square brackets within the text of the relevant set of Terms and Conditions as set out in the Base Prospectus) as well as placeholders (characterized by square brackets which include the relevant items) which will be determined by the Final Terms as follows:

DETERMINATION OF OPTIONS

The relevant Issuer will determine which options will be applicable to the individual issue either by replicating the relevant provisions in the Final Terms or by reference of the Final Terms to the respective sections of the relevant set of Terms and Conditions as set out in the Base Prospectus. If the Final Terms do not refer to an alternative or optional provision or such alternative or optional provision is not replicated therein it shall be deemed to be deleted from the Conditions.

COMPLETION OF PLACEHOLDERS

The Final Terms will specify the information with which the placeholders in the relevant set of Terms and Conditions will be completed. In the case the provisions of the Final Terms and the relevant set of Terms and Conditions, taken together, shall constitute the Conditions the relevant set of Terms and Conditions shall be deemed to be completed by the information contained in the Final Terms as if such information were inserted in the placeholders of such provisions.

All instructions and explanatory notes and text set out in square brackets in the relevant set of Terms and Conditions and any footnotes and explanatory text in the Final Terms will be deemed to be deleted from the Conditions.

Controlling Language

As to the controlling language of the respective Conditions, the relevant Issuer may elect to draft the Conditions either in the German language with an English translation, with the German being the controlling language, or in the English language only.

Falls ein kurzer oder langer erster Kupon vorliegt und Interpolation anzuwenden ist, gilt Folgendes

Für die erste Zinsperiode legt die Berechnungsstelle den Referenzsatz am Zinsfestsetzungstag in kaufmännisch vernünftiger Weise durch lineare Interpolation zwischen zwei Referenzsätzen fest, von denen (i) der eine Referenzsatz für einen Zeitraum zu bestimmen ist, für den es einen dem Referenzsatz vergleichbaren Referenzsatz gibt und der der Länge der anwendbaren Zinsperiode am nächsten kommt, aber kürzer als diese ist und (ii) der andere Referenzsatz für einen Zeitraum zu bestimmen ist, für den es einen dem Referenzsatz vergleichbaren Referenzsatz gibt und der der Länge der anwendbaren Zinsperiode am nächsten kommt, aber länger als diese ist.

In respect of the first Interest Period, the Reference Rate shall be determined by the Calculation Agent on the Interest Determination Date in a commercially reasonable manner using the straight-line interpolation by reference to two reference rates, (i) one of which shall be determined for a term for which a reference rate similar to the Reference Rate is available and which is next closest to but shorter than the applicable Interest Period and (ii) the other of which shall be determined for a term for which a reference rate similar to the Reference Rate is available and which is next closest to but longer than the applicable Interest Period.

If a short/long first coupon is applicable and interpolation is applicable, the following applies

(d) *Benchmark-Ereignis.*

Wenn ein Benchmark-Ereignis (wie in §3(d)(vi) definiert) in Bezug auf den Ursprünglichen Benchmarksatz eintritt, gilt für die Bestimmung des betreffenden Referenzsatzes und die Verzinsung der Schuldverschreibungen gemäß § 3 Folgendes:

- (i) *Unabhängiger Berater.* Die Emittentin wird sich bemühen, sobald dies (nach Ansicht der Emittentin) nach Eintritt des Benchmark-Ereignisses und vor dem nächsten Zinsfestsetzungstag erforderlich ist, einen Unabhängigen Berater (wie in § 3(d)(vi) definiert) zu benennen, der einen Neuen Benchmarksatz (wie in § 3(d)(vi) definiert), die Anpassungsspanne (wie in § 3(d)(vi) definiert) und etwaige Benchmark-Änderungen (wie in § 3(d)(iv) definiert) festlegt.

(d) *Benchmark Event.*

If a Benchmark Event (as defined in § 3(d)(vi)) occurs in relation to the Original Benchmark Rate, the relevant Reference Rate and the interest on the Notes in accordance with § 3 will be determined as follows:

- (i) *Independent Adviser.* The Issuer shall, as soon as this is (in the Issuer's view) required following the occurrence of the Benchmark Event and prior to the next Interest Determination Date, endeavor to appoint an Independent Adviser (as defined in § 3(d)(vi)), who will determine a New Benchmark Rate (as defined in § 3(d)(vi)), the Adjustment Spread (as defined in § 3(d)(vi)) and any Benchmark Amendments (as defined in § 3(d)(iv)).

Wenn Festlegung durch die Emittentin nicht anwendbar ist, gilt Folgendes:

(ii) *Ausweichsatz (Fallback)*. Wenn vor dem 10. Geschäftstag vor dem betreffenden Zinsfestsetzungstag

- (A) die Emittentin keinen Unabhängigen Berater ernannt hat; oder
- (B) der ernannte Unabhängige Berater keinen Neuen Benchmarksatz, keine Anpassungsspanne und/oder keine Benchmark-Änderungen (sofern erforderlich) gemäß diesem § 3(d) festgelegt hat,

dann entspricht der Referenzsatz für die nächste Zinsperiode dem an dem letzten, unmittelbar vor Eintritt des relevanten Stichtags liegenden Zinsfestsetzungstag festgestellten Referenzsatz.

(ii) *Fallback rate*. If, prior to the 10th Business Day prior to the relevant *Interest Determination Date*,

- (A) the Issuer has not appointed an Independent Adviser; or
- (B) the Independent Adviser appointed by it has not determined a New Benchmark Rate, has not determined the Adjustment Spread and/or has not determined any Benchmark Amendments (if required) in accordance with this § 3(d),

then the Reference Rate applicable to the immediately following Interest Period shall be the Reference Rate determined on the last Interest Determination Date immediately preceding the relevant Effective Date.

- (e) *Interest Amount.* The Calculation Agent will, on or without undue delay (*unverzüglich*) after each Interest Determination Date, calculate the amount of interest (the "**Interest Amount**") payable on the Notes in respect of each Specified Denomination for the relevant Interest Period. Each Interest Amount shall be calculated by applying the Rate of Interest and the Day Count Fraction (as defined below) to each Specified Denomination and rounding the resulting figure to the nearest EUR 0.01, EUR 0.005 being rounded upwards.

- (f) *Mitteilungen.* Die Berechnungsstelle wird veranlassen, dass der Zinssatz, der Zinsbetrag für die jeweilige Zinsperiode, die jeweilige Zinsperiode und der relevante Zinszahlungstag der Emittentin, den Anleihegläubigern durch Mitteilung gemäß § 11 und jeder Börse, an der die Schuldverschreibungen zu diesem Zeitpunkt auf Veranlassung der Emittentin notiert sind und deren Regeln eine Mitteilung an die Börse verlangen, unverzüglich, aber keinesfalls später als am ersten Tag der jeweiligen Zinsperiode mitgeteilt werden. Im Fall einer Verlängerung oder Verkürzung der Zinsperiode können der mitgeteilte Zinsbetrag und Zinszahlungstag ohne Vorankündigung nachträglich angepasst (oder andere geeignete Anpassungsregelungen getroffen) werden. Jede solche Anpassung wird unverzüglich allen maßgeblichen Börsen, an denen die Schuldverschreibungen zu diesem Zeitpunkt auf Veranlassung der Emittentin notiert sind, sowie den Anleihegläubigern gemäß § 11 mitgeteilt.
- (g) *Verbindlichkeit der Festsetzungen.* Alle Bescheinigungen, Mitteilungen, Gutachten, Festsetzungen, Berechnungen, Quotierungen und Entscheidungen, die von der Berechnungsstelle für die Zwecke dieses § 3 gemacht, abgegeben, getroffen oder eingeholt werden, sind (sofern nicht ein offensichtlicher Irrtum vorliegt) für die Emittentin, den Fiscal Agent, die Zahlstellen und die Anleihegläubiger bindend.
- (h) *Ende des Zinslaufs.* Der Zinslauf der Schuldverschreibungen endet an dem Ende des Tages, der dem Tag vorausgeht, an dem sie zur Rückzahlung fällig werden. Falls die Emittentin die Schuldverschreibungen bei Fälligkeit nicht zurückzahlt, ist der festgelegte Nennbetrag jeder Schuldverschreibungen ab dem Tag der Fälligkeit (einschließlich) bis zu dem Tag der tatsächlichen Rückzahlung der Schuldverschreibungen (ausschließlich) in Höhe des gesetzlich festgelegten Zinssatzes für Verzugszinsen zu verzinsen.¹
- (f) *Notifications.* The Calculation Agent will cause the Rate of Interest, each Interest Amount for each Interest Period, each Interest Period and the relevant Interest Payment Date to be notified to the Issuer, to the Noteholders by notice in accordance with § 11 and, if required by the rules of any stock exchange on which the Notes are from time to time listed at the initiative of the Issuer, to such stock exchange, without undue delay (*unverzüglich*), but in no event later than the first day of the relevant Interest Period. Each Interest Amount and Interest Payment Date so notified may subsequently be amended (or appropriate alternative arrangements made by way of adjustment) without notice in the event of an extension or shortening of the Interest Period. Any such amendment will be notified without undue delay (*unverzüglich*) to any relevant stock exchange on which the Notes are then listed at the initiative of the Issuer and to the Noteholders in accordance with § 11.
- (g) *Determinations binding.* All certificates, communications, opinions, determinations, calculations, quotations and decisions given, expressed, made or obtained for the purposes of the provisions of this § 3 by the Calculation Agent shall (in the absence of manifest error) be binding on the Issuer, the Fiscal Agent, any Paying Agents and the Noteholders.
- (h) *Cessation of Interest Accrual.* The Notes shall cease to bear interest from the end of the day preceding the date on which they fall due (*fällig*) for redemption. If the Issuer fails to redeem the Notes when due (*fällig*), each Note will bear interest on its Specified Denomination from and including the due date to but excluding the day of actual redemption of the Notes at the statutory default rate of interest.²

Wenn [*Name des EWU-Mitgliedsstaats*] seine Staatsschulden auf eine andere Währung als Euro (die "**Neue Währung**") umstellt, wird mit Wirkung ab dem Tag dieser Umstellung (der "**Umstellungstag**") die Festgelegte Währung der Schuldverschreibungen (insgesamt, jedoch nicht teilweise) auf die Neue Währung umgestellt. The Issuer shall give notice of such fact without undue delay (*unverzüglich*) in accordance with § 11.

In the case of Notes for which the redenomination clause is applicable, the following applies:

Mit Wirkung ab dem Umstellungstag gilt jede in diesen Bedingungen enthaltene Bezugnahme auf die Festgelegte Währung als durch eine Bezugnahme auf die Neue Währung ersetzt und die Umstellung der Festgelegten Währung auf die Neue Währung als bewirkt. Die Emittentin wird den Festgelegten Nennbetrag und alle übrigen sich aus einer Schuldverschreibung ergebenden Zahlungsverpflichtungen in die Neue Währung konvertieren, indem sie den offiziell für den Zeitpunkt der Umstellung der Staatsschulden auf die Neue Währung festgelegten Umrechnungskurs anwendet und die sich ergebende Zahl auf die nächste kleinste Einheit der Neuen Währung rundet (wobei 0,005 Einheiten aufgerundet werden).

Die vor der Umstellung anwendbare Definition des Begriffs "Geschäftstag" findet auch nach der Umstellung auf die Schuldverschreibungen Anwendung, es sei denn, die Emittentin legt in der Mitteilung der Umstellung der Schuldverschreibungen diejenige Definition des Begriffs "Geschäftstag" fest, die mit der dann bestehenden oder erwarteten Marktpraxis für auf die Neue Währung lautende Schuldverschreibungen, die in internationalen Clearing Systemen gehalten werden, übereinstimmt.

Der vor der Umstellung anwendbare Referenzsatz findet auch nach der Umstellung auf die Schuldverschreibungen Anwendung (mit der Maßgabe, dass alle Bezugnahmen auf die Festgelegte Währung durch Bezugnahmen auf die Neue Währung ersetzt werden), es sei denn, die Emittentin legt zur Zeit der Umstellung denjenigen Referenzzinssatz als Referenzsatz fest, der mit der dann bestehenden oder erwarteten Marktpraxis für auf die Neue Währung lautende, variabel verzinsliche Schuldverschreibungen, die in internationalen Clearing Systemen gehalten werden, übereinstimmt.

The definition of the term "Business Day" that applies to the Notes prior to the redenomination shall also apply to the Notes after the redenomination, unless the Issuer, in the notice regarding the redenomination of the Notes elects to apply to the Notes such definition of the term "Business Day" which is consistent with the then existing or anticipated market practice for notes issued in the New Currency and held in international clearing systems.

The Reference Rate that shall apply to the Notes after the redenomination shall be the reference interest rate which applied to the Notes prior to the redenomination (provided that all references to the Specified Currency be replaced by references to the New Currency), unless the Issuer elects, at the time of the redenomination, to apply to the Notes the reference interest rate as Reference Rate which is consistent with the then existing or anticipated market practice for floating rate notes issued in the New Currency and held in international clearing systems.

If the reference interest rate for floating rate public debt or for benchmark issues in the New Currency is only changed with effect on a date that falls after the Redenomination Date, the Issuer may fix such reference interest rate to become the Reference Rate that is applicable on the relevant Series of Notes from that date.

If on or after the redenomination the Reference Rate which applied to the Notes prior to the redenomination is no longer available, the Issuer shall apply to the Notes the reference interest rate which is consistent with the then existing or anticipated market practice

¹ Legende einfügen, sofern nicht die Endgültigen Bedingungen das "Verkaufsverbot an Kleinanleger im EWR" für "Nicht anwendbar" erklären.

² Include legend unless the Final Terms specify "Prohibition of Sales to UK Retail Investors" as "Not Applicable". The assumption is that if there are potentially sales in the European Economic Area it is likely that there will also potentially be sales in the United Kingdom and vice versa such that the United Kingdom Prohibition and European Economic Area Prohibition would both be included unless specified as "Not Applicable".

³ Legende einfügen, sofern nicht die Endgültigen Bedingungen das "Verkaufsverbot an Kleinanleger in GB" für "Nicht anwendbar" erklären. Es wird davon ausgegangen, dass, wenn es potenziell Verkäufe im Europäischen Wirtschaftsraum gibt, es potenziell auch Verkäufe im Vereinigten Königreich gibt und umgekehrt, sodass sowohl das Verkaufsverbot im Vereinigten Königreich als auch das Verkaufsverbot im Europäischen Wirtschaftsraum einfügen wären, sofern sie nicht für "Nicht anwendbar" erklärt wurden.

M&A

On 3 December 2021, Allianz announced that it is entering into a reinsurance agreement with affiliates of Sixth Street, including Talcott Resolution Life Insurance Company, and Resolution Life, for a USD 35 billion fixed index annuity portfolio. The agreement will unlock USD 4.1 billion in value and free up regulatory capital for Allianz. The transaction closed as of 7 January 2022.

On 28 January 2022, Allianz and UniCredit signed a multi-country framework agreement, setting the basis for enhanced collaboration, benefiting clients of both companies and building on the companies' longstanding bancassurance partnership since 1996. The agreement covers UniCredit's footprint in Italy, Germany, Central and Eastern Europe and appropriately recognizes both partners' contribution to the value that is being created. The agreement encompasses joint investments aimed at seamlessly integrating and accelerating the digitalization of processes. It will also pave the way for a cooperation between the two groups in the insure-banking business.

On 11 February 2022, Allianz entered into certain share purchase agreements to acquire 72 per cent. of European Reliance General Insurance Company SA, a leading Greek insurer with EUR 223 million in gross written premiums (GWP), with a network of 110 retail offices and 5,667 agents. Allianz will pay EUR 7.80 per share or approximately EUR 207 million to acquire 100% outstanding shares of European Reliance via the share purchase agreements combined with a voluntary tender offer ("VTO"). Following the approval by the Bank of Greece, the Hellenic Competition Commission and the Hellenic Capital Market Commission, Allianz intends to publish the approved information circular and proceed with the VTO for the shares in European Reliance at the same price.

On 4 May 2022, Allianz and Sanlam have agreed to combine their current and future pan-African operations. The joint venture will house the business units of both Sanlam and Allianz in the African countries where one or both companies have a presence. The entity is expected to have a combined total group equity value (GEV) in excess of 33 billion South African rand (approximately EUR 2 billion). The initial shareholding split of Sanlam and Allianz in the joint venture will be 60:40 respectively, with the ability for Allianz to increase its shareholding to a maximum of 49% over time. The agreement is subject to certain conditions precedent, including but not limited to the receipt of required approvals from competition authorities, financial/insurance regulatory authorities and any customary conditions that Sanlam and/or Allianz are required to fulfil for each jurisdiction. Closing of the transaction is expected to take place in Q2 2023.

On 17 May 2022, Allianz Global Investors ("AllianzGI") announced that it had entered into a memorandum of understanding ("MOU") with Voya Financial. For details, see below section "Disclosures of 17 February, 11 and 17 May 2022".

DISCLOSURES OF 17 FEBRUARY, 11 AND 17 MAY 2022

On 17 February 2022, Allianz disclosed the following inside information according to Article 17 EU Market Abuse Regulation (No. 596/2014):

"Allianz SE: Allianz to book a provision with respect to risks relating to the AllianzGI US Structured Alpha Funds for the financial year 2021; Allianz resolves on new share buy-back of up to EUR 1 bn

With respect to the pending court and governmental proceedings in the U.S. in relation to the Structured Alpha Funds Allianz anticipates settlements with major investors in those Funds shortly. In anticipation thereof and in light of current discussions with U.S. governmental authorities Allianz today decided to book a provision of EUR 3.7 billion in the financial statements 2021. This provision reduced the 2021 Group net income by EUR 2.8 billion.

The anticipated settlements are an important step towards a resolution of the various proceedings. Discussions with remaining plaintiffs, the U.S. Department of Justice and the U.S. Securities and Exchange Commission remain ongoing and the timing and nature of any global or coordinated resolution of these matters is not certain. Therefore, as of today, the total financial impact of the Structured Alpha matter cannot be reliably estimated and Allianz SE expects to incur additional expenses before these matters are finally resolved.

In fiscal 2021 operating profit of Allianz Group increased by 24.6% to EUR 13.4 billion. Shareholder's net income declined by 2.9% to EUR 6.6 billion. The Solvency II ratio reached 209%. In line with the dividend policy announced on 2nd December 2021 the Board of Management intends to propose a dividend in the amount of EUR 10.80 per share after EUR 9.60 last year.

Allianz SE has further resolved today on a new share buy-back program for 2022. The volume of such new program will amount to up to EUR 1 billion. Allianz SE will cancel all repurchased shares."

On 11 May 2022, Allianz disclosed the following inside information according to Article 17 EU Market Abuse Regulation (No. 596/2014):

"Allianz SE: Allianz SE books provision in 1Q 2022 for Structured Alpha to address the remaining financial exposure in relation to compensation payments and under any resolution of the governmental proceedings

Pursuant to its active efforts to compensate investors in the Structured Alpha Funds of Allianz Global Investors U.S. Allianz has achieved additional settlements. In light thereof and progressing discussions with governmental authorities in the U.S., Allianz SE has decided today to book an additional provision of EUR 1.9 billion in Q1 2022 before tax. Allianz SE believes that this provision booked is a fair estimate of its remaining financial exposure in relation to compensation payments to investors and to payments under any resolution of the governmental proceedings.

Allianz SE is seeking a timely resolution to the governmental proceedings in ongoing discussions with the U.S. Department of Justice and the U.S. Securities and Exchange Commission. Allianz SE will inform about a resolution and its consequences for Allianz Global Investors beyond the aforementioned payment obligations once an agreement with the authorities has been reached.

The provision will negatively impact the Q1 Group net income by EUR 1.6 billion after tax, resulting in a net income attributable to shareholders of EUR 0.6 billion. Group operating profit in the first Quarter 2022 amounts to EUR 3.2 billion, while the Solvency II capitalization ratio stands at 199%. Net income attributable to shareholders will be adjusted for the Structured Alpha provision for the calculation of the dividend payout. Allianz SE policy to offer a dividend per share which is the higher of a 50% payout ratio or a 5% increase from the preceding year's dividend remains unchanged."

On 17 May 2022, Allianz disclosed the following inside information according to Article 17 EU Market Abuse Regulation (No. 596/2014):

"Allianz SE announces resolution of U.S. governmental investigations concerning Structured Alpha with a guilty plea by AGI US. Allianz SE also announces signing of a MoU for a new long-term partnership

Allianz SE announces that its indirect subsidiary Allianz Global Investors U.S. LLC ("AGI U.S.") today has entered into settlements with the U.S. Department of Justice ("DOJ") and the Securities and Exchange Commission ("SEC") in connection with the Structured Alpha matter. Pursuant to the DOJ resolution, AGI U.S. will plead guilty to one count of criminal securities fraud, and the SEC resolution establishes that AGI US violated relevant U.S. securities laws. These settlements fully resolve the U.S. governmental investigations of the Structured Alpha matter for Allianz.

The Statement of Facts accompanying the DOJ resolution states that the criminal misconduct regarding the Structured Alpha funds was limited to a handful of individuals in the Structured Products Group of AGI U.S. who are no longer employed by the company, and that the DOJ's investigation did not otherwise find any knowledge of, or participation in, the misconduct at Allianz SE or any other entity of the Allianz Group.

The guilty plea will result in the disqualification of AGI U.S. from advising U.S. registered mutual funds and certain type of pension funds after expiry of a temporary relief period. Allianz expects the SEC to issue waivers later today that will ensure that AGI U.S.'s resolution with the DOJ does not impact PIMCO and Allianz Life's business activities.

Allianz SE has signed a Memorandum of Understanding to enter into a long-term strategic partnership including a transition of AGI U.S.'s investment management activities with currently appr. USD 120 billion in assets under management in scope to a new partner in the US. The transferred activities do not include any part of the Structured Products Group, which has previously been dissolved. As consideration for the transfer, Allianz Global Investors would receive a stake in the enlarged entity and long-term, global, cross-distribution agreements. Execution of definitive agreements is targeted within the next weeks.

In connection with the settlements AGI U.S. will pay forfeiture of USD 174.3 million to the DOJ, and USD 675 million as a penalty to the SEC that may be used in some part as compensation for investors. Other monetary obligations addressed by the DOJ and the SEC have been or will be satisfied by the approximately USD 5 billion in compensation paid to Structured Alpha investors. Any such amounts payable and the USD 5 billion of compensation have already been reflected in the provisions set for 2021 and Q1 2022."

On 17 May 2022, Allianz Group published the following press release:

"AllianzGI and Voya Financial announce plans to enter long-term strategic partnership"

Allianz Global Investors ("AllianzGI") announced today that it had entered into a memorandum of understanding ("MOU") with Voya Financial relating to a strategic partnership whereby AllianzGI would transfer selected investment teams and assets comprising most of its US business ("AGI US") to Voya Investment Management ("Voya IM") in return for an up to 24% equity stake in the enlarged asset manager. Definitive documentation is anticipated to be finalised in the coming weeks, and completion of the transaction is subject to customary closing conditions.

Underpinning the partnership will be the anticipated transfer of highly complementary and internationally established investment teams, select client service and sales professionals, and associated assets under management from AGI US to Voya IM. The in-scope investment teams, which include income & growth, fundamental equities and private placements, manage approximately USD 120 billion. On a pro forma basis, Voya IM's AUM would increase to approximately USD 370 billion (based on AUM as at 31 Mar 2022). The addition of AllianzGI's income & growth, fundamental equities and private placement teams would complement Voya IM's existing capabilities and investment platforms, including fixed income and alternatives. Following completion of the transfer, US vehicles and clients of the transferred investment teams will continue to be managed and advised by those teams.

A second, important pillar of the planned partnership will be the establishment of a global, long-term, strategic-distribution partnership whereby AllianzGI distribute Voya IM's investment strategies outside the US, providing its global client base with a broader range of complementary investment strategies.

As consideration for the transfer of assets, AllianzGI will receive an equity stake in Voya IM of up to 24% of the enlarged US manager.

Commenting on the announcement, Tobias C. Pross, CEO of AllianzGI, said:

“We are very much looking forward to beginning a new chapter in AllianzGI’s development with a partner in the U.S. that complements our own strengths and footprint, and supports long-term growth for both firms. AllianzGI’s stake in Voya IM will underscore our commitment to the global success of their soon-to-be enlarged business.”

Further details of the transaction will be announced upon execution of definitive agreements. AllianzGI and Voya are working expeditiously to finalize the terms of the transaction and are targeting execution of a definitive asset purchase agreement and distribution agreement within the next several weeks.

Execution and ultimate completion of any definitive transaction remains subject to conditions.

RATINGS⁽¹⁾

As of the date of this Prospectus, Allianz SE had the following ratings:

	S&P ⁽²⁾	Moody's ⁽³⁾	A.M. Best ⁽⁴⁾
Insurer financial strength	AA	Aa3	A+
Outlook	Stable	Stable	Stable
Counterparty credit	AA	Not rated	aa ⁽⁵⁾
Outlook	Stable		Stable
Senior unsecured debt	AA	Aa3	aa
Outlook	Stable	Stable	Stable

⁽¹⁾ Includes ratings for securities issued by Allianz Finance II B.V. and Allianz Finance III B.V.

⁽²⁾ S&P rating scale for Insurer Financial Strength Ratings consists of the following categories. “AAA”, “AA”, “A”, “BBB”, “BB”, “B”, “CCC”, “CC” (in descending order). In addition, an “R” rating is assigned to issuers being under regulatory supervision. Ratings from “AA” to “CCC” may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

S&P defines the issued ratings as follows:

"An insurer rated 'AA' has very strong financial security characteristics, differing only slightly from those rated higher."

"An obligor rated 'AA' has very strong capacity to meet its financial commitments. It differs from the highest-rated obligors only to a small degree."

"An obligation rated 'AA' differs from the highest-rated obligations only to a small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong."

"An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong."

"A short-term obligation rated 'A-1' is rated in the highest category by S&P. The obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong."

- (3) Moody's uses nine rating symbols ("Aaa", "Aa", "A", "Baa", "Ba", "B", "Caa", "Ca" and "C"). The symbols range from "Aaa", used to designate least credit risk, to "C", denoting greatest credit risk. In addition Moody's appends numerical modifiers 1, 2 and 3 to each generic rating classification from "Aa" through "Caa". The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Moody's defines the issued ratings as follows:

"Insurance companies rated Aa offer excellent financial security. Together with the Aaa group, they constitute what are generally known as high-grade companies. They are rated lower than Aaa companies because long-term risks appear somewhat larger."

"Obligations rated Aa are judged to be of high quality and are subject to very low credit risk."

"Obligations rated A are considered upper-medium grade and are subject to low credit risk."

"Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations."

- (4) The rating scale of A.M. Best Financial Strength Rating ranges from "A++", "A+", "A", "A-" to "C-". In addition the scale provides for the ratings "D" (Poor), "E" (Under Regulatory Supervision), "F" (In Liquidation) and "S" (Suspended).

A.M. Best defines the issued ratings as follows:

A+: "Assigned to companies that have, in A.M. Best's opinion, a superior ability to meet their ongoing insurance obligations."

aa: "Assigned to issues where, in A.M. Best's opinion, the issuer has a very strong ability to meet the terms of the obligation."

a: "Assigned to issues where, in A.M. Best's opinion, the issuer has a strong ability to meet the terms of the obligation."

"Ratings from "aa" to "ccc" may be enhanced with "+" (plus) or "-" (minus) to indicate whether credit quality is near the top or bottom of a category."

- (5) Issuer credit rating.

Notes to be issued under the Programme may be rated or unrated. Where an issue of Notes is rated a security rating is not a recommendation to buy, sell or hold securities and may be revised or withdrawn by the rating agency at any time. Any negative change in the credit rating of the Issuer could adversely affect the trading price of the Notes. Investors should consider each rating individually and obtain additional and more detailed understanding of the significance of the respective credit rating information provided by the respective rating agency.

Credit ratings included or referred to in this Base Prospectus have been issued by A.M. Best (EU) Rating Services B.V. ("**A.M. Best**"), S&P Global Ratings Europe Limited ("**S&P**") and Moody's Deutschland GmbH ("**Moody's**"), each of which is established in the European Union, is registered under Regulation (EC) No 1060/2009 of the European Parliament and of the Council of 16 September 2009 on credit rating agencies, and is included in the list of registered credit rating agencies published on the website of the European Securities and Markets Authority at <https://www.esma.europa.eu/supervision/credit-rating-agencies/risk>.

Simplified Overview of the Allianz Group Structure

This overview is simplified. It focuses on major operating entities and does not contain all entities of the Allianz Group. Also, it does not show whether a shareholding is direct or indirect. This overview shows the status as of 31 December 2021.

INSURANCE OPERATIONS

Allianz Group offers a wide range of property-casualty and life/health insurance products to both retail and corporate customers. For the Property-Casualty business segment, these include motor, accident, property, general liability, travel insurances, and assistance services. The Life/Health business segment offers savings and investment-oriented products in addition to life and health insurance. The Allianz Group is the leading property-casualty insurer worldwide and rank among the top five in the life/health insurance business.¹ Its key markets (in terms of premiums) are Germany, France, Italy, and the United States.

Most of Allianz Group's insurance markets are served by local Allianz companies. However, some business lines – such as Allianz Global Corporate & Specialty (AGCS), Allianz Partners (AP), and Allianz Trade (renamed from Euler Hermes in March 2022) – are run globally.

ASSET MANAGEMENT

Allianz Group's two major asset management entities, PIMCO and AllianzGI, operate under the governance of Allianz Asset Management (AAM). The Allianz Group is one of the largest asset managers in the world that actively manages assets. Allianz's offerings cover a wide range of equity, fixed income, cash, and multi-assets products as well as a strongly growing number of alternative investment products, such as real estate, infrastructure debt/equity, real assets, liquid alternatives, and solution business. The core markets are the United States, Canada, Germany, France, Italy, the United Kingdom, and the Asia-Pacific region.

CORPORATE AND OTHER

The Corporate and Other business segment's activities include the management and support of the Allianz Group's businesses through its central Holding functions, Banking and Alternative as well as Digital Investments. The Holding functions manage and support the Group's businesses through its strategy, risk, corporate finance, treasury, financial reporting, controlling, communication, legal, human resources, technology, and other functions. The Banking operations, which place a primary focus on retail clients, support the insurance business and complement the products Allianz offers in Italy, France, and Bulgaria. Digital Investments identifies and invests in digital growth companies for the Allianz Group.

SIGNIFICANT CHANGE IN THE FINANCIAL PERFORMANCE OF THE ALLIANZ GROUP

Except as disclosed in the section "Recent events" above, there has been no significant change in the financial performance of the Allianz Group since 31 December 2021.

INFORMATION ON KNOWN TRENDS, UNCERTAINTIES, DEMANDS, COMMITMENTS OR EVENTS THAT ARE REASONABLY LIKELY TO HAVE A MATERIAL EFFECT ON THE ISSUER'S PROSPECTS FOR 2022

ECONOMIC OUTLOOK

The war in Ukraine has dramatically darkened the economic outlook for 2022. The immediate consequences are significantly rising raw material prices and significantly higher volatility of financial asset prices. In addition, business with Ukraine – as a direct result of the war – and with Russia – as a result of sanctions and counter-sanctions – has largely come to a standstill. This, coupled with repeated lockdowns in China, is putting renewed stress on international supply chains, which had not yet recovered from the impacts of the Covid-19 crisis; in some parts of the world, food crises loom.

Given the uncertainty about future developments, the economic outlook is also fraught with uncertainty. In its latest forecasts, Allianz Research assumes in its base scenario that the global economy will grow by only 3.2% in 2022 (instead of 4.1%). In Europe, which is particularly dependent on Russian energy supplies, the decline is likely to be more than 1 percentage point: growth of only 2.6% is expected for the euro zone. At the same time, inflation is likely to rise to 6.5% on average for the year. If, in the course of a continued escalation, Russian energy supplies to Europe are severely impaired, growth is expected to fall to 1.5% and inflation may climb even higher. This means that in the adverse scenario there is a threat of stagflation as last seen in the 1970s.

Monetary policy is thus expected to face challenges in 2022. On the one hand, ever-higher inflation calls for a resolute monetary policy response; on the other hand, the simultaneous weakness in growth and demand and the high level of nervousness in the markets argue for further monetary support. The planned tightening of monetary policy in Europe is likely to be delayed in this situation. Similarly, the expected consolidation in fiscal

¹ The statement is based on an internal analysis by the Issuer of the available peer data as per Financial Year 2020.

policy is likely to be postponed. Aid for affected companies and households as well as high investment in Europe's sovereignty – in terms of both security and energy policy – should keep fiscal policy on an expansionary course.

INSURANCE INDUSTRY OUTLOOK

The insurance market will not be able to escape the gloomier economic outlook. Although the continued heightened risk awareness of households and companies and rising prices, particularly in commercial lines, are supporting premium income, weaker economic growth and declining real incomes are likely to weigh on demand. Therefore, Allianz Group expects premium growth in 2022 to be only moderate and below original expectations. At the same time, the investment environment remains very challenging due to elevated market volatility.

However, other developments remain unaffected by this clouding of the economic environment. 2022 will also be characterized by ever faster digitization, with the aim of simplifying and scaling processes and offering customers simple, fast, and intuitively understandable solutions. In the context of sustainability, social aspects will play a growing role, not least against the backdrop of increasing inequality due to the Covid-19 crisis and the effects of war. This offers the insurance industry the opportunity to position itself as a partner for strengthening social resilience. At the same time, greater attention needs to be paid to potential reputational risks arising from the growing social, political and cultural demands on companies in general and insurance companies in particular.

In the **non-life sector**, premium growth is likely to slow in line with the weaker economic development. However, corporate business should continue to benefit from rising prices, albeit to a lesser extent. With the expected expiry of the Covid-19 restrictions, claims development is also expected to return to pre-crisis levels, especially in the motor business. In addition, the further increase in inflation will lead to higher expenses in many lines of business.

In the **life sector**, premium income is likely to recover further in 2022, but less strongly than originally expected. Greater awareness of the need for risk protection and increased savings following the Covid-19 crisis should prove supportive. In view of high market volatility, profitability is likely to remain under pressure. However, some relief could come from the expected decline in excess mortality thanks to the successful vaccination campaign in advanced markets; in addition, inflation risks in the life business are generally low.

ASSET MANAGEMENT INDUSTRY OUTLOOK

Ongoing supply chain disruptions and higher inflation around the globe have led investors to become more cautious. As described, 2022 is likely to be another year of great volatility, and the asset management industry will have to navigate a complex environment.

Adding to this, profitability in the asset management industry continues to be affected by ongoing flows into passive products as well as margin pressure in traditional active investments. The strengthening of regulatory oversight and reporting will be an additional burden on profitability across the sector. In view of these developments, Allianz Group expects the trend towards industry consolidation to persist, accompanied by growing cost awareness. On the other hand, Allianz Group sees ample opportunities in the area of active asset management, particularly in alternative and ESG (Environment, Social, Governance) investment strategies. Digital channels, such as robo-advisory platforms, will also continue to gain traction.

All told, Allianz Group expects further nominal growth in the asset management sector, along with a continued focus on efficient operations and strong investment performance.

SOLVENCY AND REGULATORY CAPITAL

REGULATORY BACKGROUND

The Solvency II framework that came into force on 1 January 2016 imposes prudential requirements at the Allianz Group level as well on the individual European Economic Area (EEA) based insurance and reinsurance companies in the Allianz Group. Insurance supervision is exercised by national supervisors at the level of the individual insurance and reinsurance companies of the Allianz Group and by the BaFin as the Allianz Group supervisor at the Allianz Group level. The Solvency II rules provide for economic, risk-based capital requirements for insurance and reinsurance companies in all EEA member states, as well as for groups with insurance and/or reinsurance activities in the EEA. Solvency requirements are based on market valuations and take asset-side as well as liability-side risks into account, but also provide detailed rules regarding governance, risk management, risk assessment and risks associated with the other entities within the Allianz Group. Solvency II is a regulatory framework where the insurers' material risks and their interactions are considered.

The Solvency II framework is structured along three pillars. Pillar 1 comprises quantitative requirements (including rules regarding the valuation of assets and liabilities such as technical provisions, risk capital requirements and own fund requirements). Pillar 2 defines governance and risk management requirements. Pillar 3 consists of disclosure and supervisory reporting requirements. These three pillars should not only be considered in isolation, but also in terms of how they interact with one another. More complex risks, for instance, require a stronger risk management and governance structure and may lead to higher capital requirements. In addition to these requirements, which apply to individual EEA insurers and reinsurers, the Solvency II framework is complemented by requirements that apply at group level (group supervision). This means that a number of requirements from the Solvency II framework that apply to the individual EEA insurance and reinsurance undertakings apply, with necessary modifications, at group level. The Solvency II framework is currently subject to a review and is proposed to be accompanied by a new recovery and resolution regime. The European Commission published on 22 September 2021 (i) a proposal for changes to the Solvency II Directive

and (ii) a legislative proposal for a directive establishing a framework for recovery and resolution of insurance and reinsurance undertakings, namely the Insurance Recovery and Resolution Directive (“**Draft IRRD**”).

PILLAR 1 REQUIREMENTS

Solvency II requires EEA insurance and reinsurance companies to determine technical provisions at a value that corresponds with the exit value of their insurance and reinsurance obligations towards policyholders and other beneficiaries of insurance and reinsurance contracts. The calculation of technical provisions should be based on market consistent information to the extent to which that information is available.

The value of the technical provisions is equal to the sum of a best estimate of the value of the insurance contracts and a risk margin which is reflective of the cost of capital a third-party buyer would expect to earn if it wanted to acquire the portfolio upon an exit by us. The discount rates based on which technical provisions are calculated are an important element in order to determine the value of the technical provisions. There are detailed Solvency II rules that clarify how discount rates must be derived. These rules and other parameters to determine the technical provisions may have an important effect on the amount and volatility of the own funds that insurance and reinsurance undertakings are required to maintain. The Solvency II framework contains several measures (in particular the volatility adjustment and matching adjustment) that should reduce the volatility of the own funds that is due solely to credit spread movements.

Insurers and reinsurers are required to hold a sufficient amount of “eligible own funds” to cover losses in an adverse scenario. The amount of eligible own funds that insurance and reinsurance companies are required to hold is the Solvency Capital Requirement (“**SCR**”) and is calibrated to a confidence level of 99.5% (reflecting the ability of insurance or reinsurance companies to withstand a 1-in-200-year event) and a “holding period” of one year. Insurance and reinsurance companies are allowed to: (a) use a standard formula to calculate their SCR (the rules for which are set out in detail in the Solvency II rules and guidelines); or (b) use an internal model (for which the approval of the supervisory authorities is required); or (c) use a partial internal model (which is a combination of the standard formula being applied to some group entities, and an internal model to other group entities). An internal model has been developed by Allianz Group to better reflect the actual risk profile than the standard formula. The Allianz Group determines its regulatory capital requirements on the basis of a partial internal model since 1 January 2016.¹

In addition to the SCR, insurance and reinsurance companies also calculate a Minimum Capital Requirement (“**MCR**”). The MCR represents a lower threshold than the SCR, below which the level of eligible own funds held by the insurance or reinsurance company is not allowed to drop. An irreparable or prolonged breach of the MCR would lead to a withdrawal of an insurance or reinsurance company’s license, and may, if the resolution regime proposed by the European Commission in September 2021 is enacted and implemented into law, lead to the resolution of the insurance or reinsurance company, or, if the additional criteria for group resolution are met, to a resolution of the group of the insurance or reinsurance company. Insurance and reinsurance companies are required to hold eligible own funds sufficient to cover the SCR and the MCR.

For purposes of the Allianz Group, the Group SCR substantially consists of the sum of capital requirements (including diversification effects where applicable) from (a) entities applying either internal or standard models in accordance with Solvency II, (b) entities regulated under insurance regulation regimes that are deemed equivalent to Solvency II (to the extent they are not included in the Allianz Group based on an internal or the standard model), and (c) entities regulated otherwise (including banks, asset managers, and Institutions for Occupational Retirement Provision (“**IORPs**”). Immaterial non-EEA (re)insurance entities are considered via book value deduction (Art. 229 Directive 2009/138/EC) and neither contribute to the Group SCR nor to Group own funds. The Group SCR is also often referred to as the Allianz Group’s Solvency II capital requirement in the external communication of Allianz Group.

The Group MCR is currently represented by the minimum consolidated group solvency capital requirement applicable to the Allianz Group, which is calculated as the sum of the Solo MCR of all entities in the group included via an internal or standard model. The scope of the Allianz Group for purposes of the Group MCR is limited to consolidated entities applying either internal or standard models in accordance with Solvency II. Allianz Group entities that are (a) regulated under insurance regulation regimes that are deemed equivalent to Solvency II and included in the group solvency calculation with method 2 (deduction and aggregation method), and (b) financial institutions regulated otherwise (including banks, asset managers, and IORPs) are outside the scope of the Group MCR Ratio (no contribution to the Group MCR, no contribution to own fund items eligible to cover the Group MCR). See footnote 4 regarding the table of historical solvency ratios of Allianz SE and Allianz Group in the section “*Description of Allianz SE and Allianz Group—Solvency and Regulatory Capital—Application of transitional measures on technical provisions in the calculation of Solvency and Minimum Capital Requirement ratios of Allianz SE and the Allianz Group*” below.

In September 2021, the European Commission has proposed to clarify the determination of the Group SCR and the Group MCR if, as the Allianz Group does, a combination of method 1 (consolidation) and method 2 (deduction and aggregation) is applied to the calculation of those measures. Such change may impact both the Group SCR Ratio and the Group MCR Ratio.

The proposal further foresees that in case of a combination of method 1 and method 2, the Group MCR should be subject to a cap and defines the potential future Group MCR as the lower of (i) the sum (a) of the Solo MCR of all consolidated EU/EEA insurance and reinsurance entities of the group, (b) the local minimum capital requirement at which the authorisation would be withdrawn for all consolidated third country insurance

¹ From a formal perspective, the German Supervisory Authority deems Allianz Group’s model to be partial because it does not cover all of Allianz Group’s operations: some of Allianz Group’s smaller operations report under the standard model and others under the deduction and aggregation method.

and reinsurance entities of the group, and (c) the notional Solo MCR for all consolidated insurance holding companies and mixed financial holding companies of the group, and (ii) 45% of the contribution to the Group SCR from all entities included in the group via method 1 including all consolidated insurance and reinsurance entities and entities of other financial sectors.

Own funds are derived from the market value balance sheet (“MVBS”) in line with the provisions of Solvency II, and are divided into three tiers in accordance with the quality of the own funds. Tier 1, such as common equity and retained earnings (which are represented as one of the components of the so-called “reconciliation reserve” in the MVBS), is the highest quality of own funds and must be able to absorb losses on a ‘going-concern’ basis. Tier 1 is divided into restricted (i.e., subject to a regulatory maximum limit) and unrestricted Tier 1 (i.e., not subject to a regulatory maximum limit). Tier 2 is of a lower quality than Tier 1 and is available to absorb losses on a ‘gone concern’ basis (insolvency). Tier 3 represents funds of the lowest quality and has only limited loss-absorbing capacity.

The Allianz Group’s and Allianz SE’s tiers of own funds comprise:

- Unrestricted Tier 1 (“**UT1**”): UT1 consists primarily of share capital and the share premium account, surplus funds as well as the reconciliation reserve, minus related deductions. The reconciliation reserve represents the excess of assets over liabilities derived from the MVBS, reduced by mainly share capital, share premium account, surplus funds, net deferred tax assets, and deductions for own shares as well as foreseeable dividends and distributions.
- Restricted Tier 1 (“**RT1**”): RT1 consists of perpetual subordinated liabilities issued by the Allianz Group that meet certain requirements or that benefit from grandfathering under Solvency II.
- Tier 2 (“**T2**”): T2 consists of subordinated liabilities of the Allianz Group that meet certain requirements (or benefit from grandfathering under Solvency II), but do not qualify as RT1.
- Tier 3 (“**T3**”): T3 relates mainly to the available part of net deferred tax assets.

For compliance with the Group SCR and Solo SCR rules, the following quantitative limits apply: (a) the eligible amount of Tier 1 must be at least one half of the SCR; (b) the eligible amount of RT1 is limited to a maximum of 20% of total Tier 1; (c) the eligible amount of Tier 3 is limited to a maximum of 15% of the SCR; and (d) the sum of the eligible amounts of Tier 2 and Tier 3 is limited to a maximum of 50% of the SCR.

For compliance with the Group MCR and Solo MCR rules, the following quantitative limits apply: (a) the eligible amount of Tier 1 must be at least 80% of the MCR; (b) the eligible amount of RT1 is limited to a maximum of 20% of total Tier 1; and (c) the eligible amount of Tier 2 is limited to a maximum of 20% of the MCR. Tier 3 is not eligible to cover the MCR.

APPLICATION OF TRANSITIONAL MEASURES ON TECHNICAL PROVISIONS IN THE CALCULATION OF SOLVENCY AND MINIMUM CAPITAL REQUIREMENT RATIOS OF ALLIANZ SE AND THE ALLIANZ GROUP

Solvency II foresees transitional measures to allow EEA entities to gradually move to a full implementation of Solvency II over a period of time. However, in connection with the ongoing review of the Solvency II Directive, the European Commission proposed that insurers should only be allowed to start applying such transitional measures to technical provisions in very limited cases. Prior to the year 2020, the Issuer had treated the ability to apply for such transitional measures as one of its potential recovery tools in the context of its recovery plan. Accordingly, in order to avoid losing the ability to avail itself of such transitional measures, the Issuer caused two of its subsidiaries (Allianz Leben and Allianz Private Krankenversicherung) to apply for transitional measures for their technical provisions, and BaFin granted its approval in June 2020.

The application of transitional measures on technical provisions reduces the Solvency II MVBS value of technical provisions. The reduction is, in principle, calculated based on the difference between the value of technical provisions under the prior regulatory regime (known as “**Solvency I**”) and their value under the current Solvency II regime, as per January 1, 2016. The reduction of technical provisions increases the excess of assets over liabilities (MVBS) of Allianz Group, which in turn leads to an increase of the own funds of Allianz Group (net of potential deferred tax). In addition, the Group SCR and Group MCR capital requirements and other items of group own funds can also be impacted. As a result, as of 31 March 2022, the eligible own funds of Allianz Group to cover the Group SCR increased by EUR 11.3 billion due to the application of transitional measures on technical provisions, and the Allianz Group SCR Ratio increased by 27 percentage points from 199% to 226%. The eligible own funds of Allianz Group to cover the Group MCR increased by EUR 11.5 billion due to the application of transitional measures on technical provisions. The Group MCR Ratio increased by 34 percentage points from 266% to 300%.

The increase of the excess of assets over liabilities of Allianz Leben and Allianz Private Krankenversicherung also impact the value of Allianz SE’s equity participations and thus of total assets in the MVBS of Allianz SE on an individual basis (known as the “**Solo MVBS**”). As a consequence, the transitional measures on technical provisions applied by its two subsidiaries also increase the excess of assets over liabilities (MVBS) of Allianz SE, which in turn leads to an increase of the solo own funds of Allianz SE (net of potential deferred tax). The higher equity participation values also have a meaningful impact on the Solo SCR and Solo MCR capital requirements of Allianz SE. As a result, as of 31 March 2022, the solo own funds eligible to cover the solo SCR of Allianz SE increased by EUR 11.3 billion due to the application of transitional measures on technical provisions, whereas the solo own funds eligible to cover the solo MCR of Allianz SE increased by EUR 11.5 billion. At the same time, the Allianz Solo SCR and Solo MCR increased by EUR 3.7 billion and EUR 0.9 billion respectively. The Solo SCR Ratio increased by 5 percentage points from 255% to 259%. The Solo MCR increased by 30 percentage points from 930% to 959%.

The effect of the application of transitional measures on technical provisions decreases over time until January 1, 2032, when such measures will cease to have an effect on the MVBS of either the Allianz Group or the Issuer (solo). The base amount by which technical provisions can be reduced, and by which the excess of assets over liabilities (MVBS) is increased, is calculated based on a portion of the difference between the value of technical provisions under Solvency I and that under the current Solvency II regime, as per January 1, 2016. The maximum deductible portion of this base amount decreases linearly from 100% during the year starting from January 1, 2016 to zero on January 1, 2032. The BaFin can request a recalculation of the benefit from transitional measures on technical provisions every 24 months, or more frequently where the risk profile of the relevant undertakings has materially changed. Such a recalculation may result in a faster reduction of the deductible amount, and hence lower solvency ratios, than is the case under the current calculation methodology.

In addition, in connection with the ongoing review of the Solvency II Directive, the European Commission has also proposed that, where a group materially relies on own funds at group level that are derived from benefits from transitional measures on technical provisions, the group supervisor shall have the power to take appropriate measures, including the power to treat such own funds as non-available to cover the group SCR. If this proposal would be cast into law, the effect of the transitional measures on eligible own funds of the Allianz Group for purposes of the Group SCR Ratio and the Group MCR Ratio could lead to supervisory measures lowering their impact at the Allianz Group level.

1_The Group SCR Ratio is calculated by dividing (i) the amount of own-fund items of the Allianz Group eligible to cover the Group SCR by (ii) the Group SCR. The Group SCR represents the Solvency II capital requirement of the Allianz Group (or Group SCR) substantially consisting of the capital requirements from (a) entities applying either internal or standard models in accordance with Solvency II, (b) entities regulated under insurance regulation regimes that are deemed equivalent to Solvency II (to the extent they are not included in the Allianz Group based on an internal or the standard model), and (c) entities regulated otherwise (including banks, asset managers, and IORPs). Immaterial non-EEA (re)insurance entities are considered via book value deduction (Art. 229 Directive 2009/138/EC). For the purposes of determining the "Group SCR Ratio" applicable to the Notes, Group SCR Ratio will include transitional measures under the applicable supervisory requirements.

2_The Group MCR Ratio is calculated by dividing (i) the amount of own-fund items of the Allianz Group eligible to cover the Group MCR by (ii) the Group MCR. The Group MCR represents the minimum consolidated group solvency capital requirement applicable to the Allianz Group. The scope of the Allianz Group for purposes of the Group MCR Ratio is limited to entities applying either internal or standard models in accordance with Solvency II. Group entities that are (a) regulated under insurance regulation regimes that are deemed equivalent to Solvency II, and (b) financial institutions regulated otherwise (including banks, asset managers, and IORPs) are outside the scope of the Group MCR Ratio (no contribution to the Group MCR, no contribution to own fund items eligible to cover the Group MCR). For the purpose of determining the "Group MCR Ratio" applicable to the Notes, the Group MCR Ratio will include transitional measures under the applicable supervisory requirements.

3_The Solo SCR Ratio is calculated by dividing (i) the amount of own-fund items of the Issuer (i.e., on an individual, not on a consolidated, basis) eligible to cover the Solo SCR by (ii) the Solo SCR. The Solo SCR represents the solvency capital requirement applicable to the Issuer (i.e., on an individual, not on a consolidated, basis). For the purpose of determining the "Solo SCR Ratio" applicable to the Notes, the Solo SCR Ratio will include transitional measures under the applicable supervisory requirements.

For the purpose of determining the "Solo MCR Ratio" applicable to the Notes, the Solo MCR Ratio will include transitional measures under the applicable supervisory requirements.

5_Distance to trigger breach is calculated as the amount of own-fund items eligible to cover the respective capital requirement minus the respective capital requirement.

LEGAL AND ARBITRATION PROCEEDINGS

Allianz Group companies are involved in legal, regulatory, and arbitration proceedings in Germany and a number of foreign jurisdictions, including the United States. Such proceedings arise in the ordinary course of business, including, amongst others, their activities as insurance, banking and asset management companies, employers, investors and taxpayers. While it is not feasible to predict or determine the ultimate outcome of such proceedings, they may result in substantial damages or other payments or penalties or result in adverse publicity and damage to the Allianz Group's reputation. As a result, such proceedings could have an adverse effect on the Allianz Group's business, financial condition and results of operations. Apart from the proceedings discussed below, Allianz SE is not aware of any threatened or pending legal, regulatory or arbitration proceedings which may have, or have had in the recent past, significant effects on its and/or the Allianz Group's financial position or profitability. Material proceedings in which Allianz Group companies are involved are in particular the following:

In September 2015 and in January 2017, two separate putative class action complaints were filed against Allianz Life Insurance Company of North America ("Allianz Life") making allegations similar to those made in prior class actions regarding the sale of Allianz Life's annuity products, including allegations of breach of contract and violation of California unfair competition law. In one matter, the Court denied class certification. The case, which continued as an individual action, was settled between the parties with no effect on Allianz Group's financial position. The ultimate outcome of the remaining case cannot yet be determined.

Since July 2020, multiple complaints have been filed in U.S. Federal Courts and also in certain U.S. State Courts against Allianz Global Investors U.S. LLC ("AllianzGI U.S.") and in certain complaints, against certain of AllianzGI U.S.'s affiliates, including Allianz SE and Allianz Asset Management GmbH ("Affiliate Allianz Defendants"), in connection with losses suffered by investors in AllianzGI U.S.'s Structured Alpha funds ("Funds") during

the COVID-19 related market downturn. The actions included institutional investor plaintiffs and individual plaintiffs, with certain plaintiffs asserting claims on behalf of putative classes. An investment consultant has also asserted third-party claims against AllianzGI U.S..

Upon request from the U.S. Securities and Exchange Commission ("SEC"), AllianzGI U.S. has provided substantial information to the SEC in connection with an SEC investigation of the Funds, and Allianz fully cooperated with the SEC's investigation.

In addition, the U.S. Department of Justice ("DOJ") was conducting an investigation concerning the Funds, and AllianzGI U.S. also fully cooperated with the DOJ in the investigation and is continuing its own review of the matter.

On 1 August 2021, in light of the DOJ investigation and based on information then available to Allianz, the Board of Management of Allianz SE reassessed the Structured Alpha matter and came to the conclusion, as also announced by Ad-hoc disclosure, that there is a relevant risk that the matters relating to the Funds could materially impact future financial results of Allianz Group.

In light of the discussions with plaintiffs and U.S. Governmental Authorities concerning the Structured Alpha matter and in anticipation of settlements with major investors in the Funds Allianz decided, as announced by Ad-hoc disclosure on 17 February 2022, to recognize a provision of EUR 3.7 billion for the fourth quarter of 2021. Settlements with major investors were reached shortly thereafter.

Additional settlements with almost all remaining plaintiffs and also some other investors could be reached in April and early May 2022. In light thereof and progressing discussions with governmental authorities in the U.S., Allianz SE has decided on 11 May 2022, as announced by ad-hoc disclosure on that same day, to recognize an additional provision for the Structured Alpha matter of EUR 1.9 billion in the first quarter 2022. Allianz SE believes that this provision booked is a fair estimate of its remaining financial exposure in relation to compensation payments to investors and to payments under the resolution of the governmental proceedings. Allianz expects that the disclosure of additional information could have a negative impact on its position in the ongoing discussions and therefore, in accordance with IAS 37.92, management refrains from providing further details on the provision recognized as well as on any contingent liabilities.

As announced by ad-hoc disclosure on 17 May 2022, Allianz SE's indirect subsidiary AllianzGI U.S. has entered into settlements with the DOJ and the SEC in connection with the Structured Alpha matter. Pursuant to the DOJ resolution, AllianzGI U.S. will plead guilty to one count of criminal securities fraud, and the SEC resolution establishes that AllianzGI US violated relevant U.S. securities laws. These settlements fully resolve the U.S. governmental investigations of the Structured Alpha matter for Allianz.

Alternative Performance Measures

The Allianz Group uses, throughout its financial publications, alternative performance measures ("APMs") in addition to the figures which are prepared in accordance with the International Financial Reporting Standards (IFRS), as adopted by the European Union. We believe that these measures provide useful information to investors and enhance the understanding of our results. These financial measures are designed to measure performance, growth, profit generation and capital efficiency. The APMs should be viewed as complementary to, rather than a substitute for, the figures determined according to IFRS and should be considered in conjunction with the IFRS.

The Allianz Group uses the following major alternative performance measures:

- Total revenues
- Operating profit
- Return on equity
- Combined ratio
- New business margin
- Cost-income ratio

Investors should consider that similarly titled APMs reported by other companies may be calculated differently. For that reason, the comparability of APMs across companies might be limited.

In accordance with the guidelines of the European Securities and Markets Authority (ESMA), the following information is given in regards to the above mentioned alternative performance measures:

- Definition of the APMs, their use and limitations on the usefulness: section "Definitions, use and limitations" below.
- Reconciliation of the APMs to the most directly reconcilable line item, subtotal or total presented in the financial statements: sections "Reconciliations" below.

Definitions, use and limitations

TOTAL REVENUES

DEFINITION AND USEFULNESS

Total revenues are the "top line" figure from which costs and expenses are subtracted to determine operating profit and net income. According to our business segments, total revenues in the Allianz Group comprise gross premiums written and fee and commission income in Property-Casualty, statutory premiums in Life/Health, operating revenues in Asset Management and total revenues in Corporate and Other (Banking).

Total revenues Allianz Group = Total revenues Property-Casualty¹
+ Statutory premiums Life/Health
+ Operating revenues Asset Management
+ Total revenues Corporate and Other (Banking)

¹ _Comprising gross premiums written and fee and commission income.

We consider total revenues as a key performance indicator and believe that it is useful and meaningful to our external audience because it is an important financial measure for the performance and growth of the Allianz Group during a specific time period.

LIMITATIONS ON THE USEFULNESS

Total revenues do not provide any information as to the profitability of the Allianz Group. Therefore, total revenues should always be viewed in conjunction with e.g. operating profit or net income.

Furthermore, total revenues are subject to fluctuations which do not derive from the performance of the Allianz Group. These fluctuations result from the effects of price changes, foreign currency translation as well as acquisitions, disposals and transfers.

OPERATING PROFIT (OP)

DEFINITION AND USEFULNESS

The Allianz Group uses operating profit to evaluate the performance of its reportable segments as well as of the Allianz Group as a whole. Operating profit highlights the portion of income before income taxes that is attributable to the ongoing core operations of the Allianz Group.

The Allianz Group considers the presentation of operating profit to be useful and meaningful to investors because it enhances the understanding of the Allianz Group's underlying operating performance and the comparability of its operating performance over time.

Operating profit is used as one of the decision metrics by Allianz Group's management.

Effective 1 January 2021, the Allianz Group has complemented its operating profit definition by excluding income taxes related incidental benefits/expenses, and one-time effects from significant reinsurance transactions with disposal character. These items are not attendant to the Allianz Group's sustainable performance. Therefore, the Allianz Group believes that the amended definition of operating profit provides more relevant information for investors. In addition, this year, the Allianz Group recognized for the first time material litigation expenses and - in application of the general definition of operating profit - specified that those expenses are presented outside operating profit as these items are not attendant to the Allianz Group's sustainable performance.

To better understand the ongoing operations of the business, operating profit generally excludes the following non-operating effects:

- income from financial assets and liabilities carried at fair value through income (net),
- realized gains and losses (net),
- impairments of investments (net),
- interest expenses from external debt,
- specific acquisition and administrative expenses (net), consisting of acquisition-related expenses (from business combinations), income taxes related incidental benefits/expenses, litigation expenses, and one-time effects from significant reinsurance transactions with disposal character,
- amortization of intangible assets,
- restructuring and integration expenses,
- profit (loss) of substantial subsidiaries classified as held for sale.

The following exceptions apply to this general rule:

- In all reportable segments, income from financial assets and liabilities carried at fair value through income (net) is treated as operating profit if the income relates to operating business.
- For life/health insurance business and property-casualty insurance products with premium refunds, all items listed above are included in operating profit if the profit sources are shared with policyholders. There is one exception from this general rule with regard to policyholder participation in extraordinary tax benefits and expenses. As IFRS require that the consolidated income statements present all tax benefits in the income taxes line item, even when they belong to policyholders, the corresponding expenses for premium refunds are shown as non-operating as well.

Operating profit should be viewed as complementary to, and not as a substitute for, income before income taxes or net income, each as determined in accordance with IFRS.

LIMITATIONS ON THE USEFULNESS

Operating profit is subject to fluctuations which do not derive from the performance of the Allianz Group such as changes in foreign currency rates or acquisitions, disposals and transfers between reportable segments.

RETURN ON EQUITY (ROE)

DEFINITION AND USEFULNESS

For the Allianz Group, return on equity represents the ratio of net income attributable to shareholders to the average shareholders' equity at the beginning of the period and at the end of the period. The net income attributable to shareholders is adjusted for net financial charges related to undated subordinated bonds classified as shareholders' equity. From the average shareholders' equity undated subordinated bonds classified

as shareholders' equity and unrealized gains/losses on bonds net of shadow accounting are excluded. The Allianz Group uses RoE as a key performance indicator. This indicator combines the view of business profitability and capital efficiency. Therefore, management uses RoE in steering the business.

There were no undated subordinated bonds classified as shareholders' equity prior to the issuance of two such instruments in November 2020. Before November 2020, return on equity represented the ratio of net income attributable to shareholders to the average shareholders' equity excluding unrealized gains/losses on bonds, net of shadow accounting, at the beginning of the year and at the end of the year. In November 2020, the Allianz Group issued undated subordinated bonds which qualify as equity under IFRS. For that reason, the RoE calculation was updated as the undated subordinated bonds are treated as subordinated liabilities for the calculation.

$$\text{RoE}_{\text{AZ Group}} = \frac{\text{Net income attributable to shareholders}^1}{(\text{Shareholders' equity}^2 \text{ beginning of period} + \text{Shareholders' equity}^2 \text{ end of period})/2}$$

¹ Net income attributable to shareholders adjusted for net financial charges related to undated subordinated bonds classified as shareholders' equity.

² Shareholders' equity excluding undated subordinated bonds classified as shareholders' equity and excluding unrealized gains/losses on bonds net of shadow accounting.

LIMITATIONS ON THE USEFULNESS

The RoE of the Allianz Group include items which are not indicative of management performance.

The performance indicator RoE is inherently limited by the fact that it represents a ratio and thus does not provide any information as to the absolute amount of net income or shareholders' equity excluding undated subordinated bonds classified as shareholders' equity and excluding unrealized gains/losses on bonds net of shadow accounting.

COMBINED RATIO (CR)

DEFINITION AND USEFULNESS

The Allianz Group uses the combined ratio as a measure of underwriting profitability in the Property-Casualty segment. The combined ratio represents the total of acquisition and administrative expenses (net) and claims and insurance benefits incurred (net) divided by premiums earned (net).

$$\text{CR}_{\text{PC Segment}} = \frac{\text{Acq. and admin. expenses (net)}^1 + \text{Claims and ins. benefits inc. (net)}^1}{\text{Premiums earned (net)}^1}$$

¹ In insurance terminology the term "net" means after reinsurance.

The combined ratio is typically expressed as a percentage. A ratio of below 100% indicates that the underwriting result is profitable, whereas a ratio of above 100% indicates an underwriting loss.

The combined ratio can be further broken down into the loss ratio and the expense ratio. The loss ratio represents claims and insurance benefits incurred (net) divided by premiums earned (net), and thus expresses the percentage of net earned premiums used to settle claims.

$$\text{Loss Ratio}_{\text{PC Segment}} = \frac{\text{Claims and ins. benefits inc. (net)}}{\text{Premiums earned (net)}}$$

The expense ratio represents acquisition and administrative expenses (net) divided by premiums earned (net). It expresses the percentage of net earned premiums used to cover underwriting expenses for the acquisition of new or renewal business and for administrative expenses.

$$\text{Expense Ratio}_{\text{PC Segment}} = \frac{\text{Acq. and admin. expenses (net)}}{\text{Premiums earned (net)}}$$

LIMITATIONS ON THE USEFULNESS

The combined ratio is used to measure underwriting profitability, but it does not capture the profitability of the investment result or the non-operating result. Even in case of a combined ratio of above 100%, the operating profit and/or the net income can still be positive due to a positive investment income and/or a positive non-operating result.

Moreover, the usefulness of the combined ratio is inherently limited by the fact that it is a ratio and thus it does not provide information on the absolute amount of the underwriting result.

NEW BUSINESS MARGIN (NBM)

DEFINITION AND USEFULNESS

The new business margin is a common key performance indicator to measure the profitability of new business in our Life/Health segment. The NBM is calculated as the Value of new business (VNB) divided by the Present value of new business premiums (PVNBP). All three components are shown after non-controlling interests unless otherwise stated.

$$\text{NBM}_{\text{LH Segment}} = \frac{\text{Value of new business (VNB)}}{\text{Present value of new business premium (PVNBP)}}$$

The VNB is the additional value to the shareholder which is created through the activity of writing new business in the current period. It is defined as the present value of future profits (PVFP) after acquisition expenses overrun or underrun, minus the time value of financial options and guarantees (O & G) and minus the risk margin (RM), all determined at the date of issue. Value of new business is calculated at point of sale, interpreted as at beginning of each quarter assumptions. In the case of the USA a more frequent valuation, using updated assumptions, is performed (bi-weekly).

The PVNBP is the present value of projected new regular premiums, discounted with risk-free rates, plus the total amount of single premiums received.

VNB and PVNBP are determined by using an actuarial platform. In the actuarial platform, insurance contracts are projected deterministically using best estimate assumptions for lapse, mortality, disability and expenses until maturity. Contracts are projected no longer than 60 years. Premiums are before reinsurance. To receive a valid and meaningful NBM, the calculation of VNB and PVNBP need to be based on the same assumptions.

LIMITATIONS ON THE USEFULNESS

Limitations come from the best estimate assumptions, including risk-free rate, and the long projection period of up to 60 years. The best estimate assumptions are derived from historical data. That means that a different future customer behavior could lead to variances. The same is applicable for the risk-free rate, which is based on current market data. Furthermore, the long projection period is worthy of discussion, because changes such as regulatory changes or a new currency are not reflected in the projection.

COST-INCOME RATIO (CIR)

DEFINITION AND USEFULNESS

The Allianz Group uses the cost-income ratio as a key performance indicator in the Asset Management segment. The CIR sets operating expenses in relation to operating revenues in a given period.

$$\text{CIR}_{\text{AM Segment}} = \frac{\text{Operating expenses}^1}{\text{Operating revenues}^2}$$

¹ Operating expenses consist of administrative expenses (net), excluding acquisition-related expenses.

² Operating revenues are the sum of net fee and commission income, net interest income, income from financial assets and liabilities carried at fair value through income and other income. The term "net" means that the relevant expenses have already been deducted.

The Allianz Group uses CIR in order to measure the efficiency of its activities in the Asset Management segment. Changes in the ratio indicate a change in efficiency.

LIMITATIONS ON THE USEFULNESS

The CIR in a given period of time can be influenced by special items, one-offs or foreign exchange effects on the revenue and/or expense side which lead to a change in CIR without a long-term change of efficiency.

Moreover, the usefulness of the cost-income ratio is inherently limited by the fact that it is a ratio and thus it does not provide information on the absolute amount of the operating revenues and expenses.

Selling Restrictions

GENERAL

These selling restrictions may be modified by the agreement of the relevant Issuer and the Dealers following a change in a relevant law, regulation or directive. Any such modification will be set out in a supplement to this Base Prospectus.

No action has been taken in any jurisdiction that would permit a public offering of any of the Notes, or possession or distribution of the Base Prospectus or any other offering material or any Final Terms, in any country or jurisdiction where action for that purpose is required.

Each Dealer appointed will be required to represent and agree that it will, to the best of its knowledge, comply with all relevant laws, regulations and directives in each jurisdiction in which it purchases, offers, sells or delivers Notes or has in its possession or distributes the Base Prospectus, any other offering material or any Final Terms in all cases at its own expense, and neither any Issuer, the Guarantor, nor any other Dealer shall have responsibility therefore.

UNITED STATES OF AMERICA (THE “UNITED STATES”)

The Notes and the Guarantee have not been and will not be registered under the Securities Act, as amended and may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons except in certain transactions exempt from the registration requirements of the Securities Act. Terms used in this paragraph have the meanings given to them by Regulation S under the Securities Act.

The Notes are subject to U.S. tax law requirements and may not be offered, sold or delivered within the United States or its possessions or to a United States person, except in certain transactions permitted by U.S. tax regulations. Terms used in this paragraph have the meanings given to them by the Code and regulations thereunder.

Each Dealer has agreed that, except as permitted by the Programme Agreement, it has not offered, sold or delivered and will not offer, sell or deliver the Notes of any identifiable Tranche and the Guarantee (i) as part of their distribution at any time or (ii) otherwise until 40 days after completion of the distribution of such Tranche as determined, and certified to the relevant Issuer, by the Fiscal Agent, or in the case of Notes issued on a syndicated basis, the Lead Manager, within the United States or to, or for the account or benefit of, U.S. persons, and it will have sent to each dealer to which it sells Notes and the Guarantee during the distribution compliance period a confirmation or other notice setting forth the restrictions on offers and sales of the Notes and the Guarantee within the United States or to, or for the account or benefit of, U.S. persons. Terms used in this paragraph have the meanings given to them by Regulation S.

In addition, until 40 days after the commencement of the offering, an offer or sale of Notes and the Guarantee within the United States by any dealer (whether or not participating in the offering) may violate the registration requirements of the Securities Act.

PROHIBITION OF SALES TO EEA RETAIL INVESTORS

Unless the Final Terms in respect of any Notes specify the *"Prohibition of Sales to EEA Retail Investors"* as *"Not Applicable"*, each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that it has not offered, sold or otherwise made available and will not offer, sell or otherwise make available any Notes which are the subject of the offering contemplated by this Base Prospectus as completed by the Final Terms in relation thereto to any retail investor in the European Economic Area. provided that no such offer of Notes referred to in (b) to (d) above shall require the relevant Issuer or any Dealer to publish a prospectus pursuant to Article 3 of the Prospectus Regulation or supplement a prospectus pursuant to Article 23 of the Prospectus Regulation.

For the purposes of this provision, the expression "offer of Notes to the public" in relation to any Notes in any Relevant State means the communication in any form and by any means of sufficient information on the terms of the offer and the Notes to be offered so as to enable an investor to decide to purchase or subscribe for the Notes and the expression "**Prospectus Regulation**" means Regulation (EU) 2017/1129.

provided that no such offer of Notes referred to in (b) to (d) above shall require the relevant Issuer or any Dealer to publish a prospectus pursuant to section 85 of the FSMA or supplement a prospectus pursuant to Article 23 of the UK Prospectus Regulation.
