This document has been approved as a base prospectus by the *Commission de Surveillance du Secteur Financier* (the "**CSSF**") in its capacity as competent authority under the Luxembourg Act dated 10 July 2005 (the "**Law**") on prospectuses for securities which implements the Prospectus Directive (as defined below) into Luxembourg law. By approving this base prospectus the CSSF assumes no responsibility for the economic and financial soundness of the transactions contemplated by this base prospectus or the quality or solvency of the Issuer in accordance with Article 7(7) of the Law. The Issuer has also requested the CSSF to provide the competent authorities in Austria, Belgium, Denmark, France, Germany, Ireland, Italy, the Netherlands, Portugal, Spain, Sweden and the United Kingdom of Great Britain and Northern Ireland, with a certificate of approval (a "**Notification**") attesting that this base prospectus has been drawn up in accordance with the Law. The Issuer may request the CSSF to provide competent authorities in additional Member States within the European Economic Area (the "**EEA**") with a Notification.

The requirement to publish a base prospectus under the Prospectus Directive only applies to Securities which are to be admitted to trading on a regulated market in the EEA and/or offered to the public in the EEA other than in circumstances where an exemption is available under Article 3.2 of the Prospectus Directive. When used in this base prospectus, "**Prospectus Directive**" means Directive 2003/71/EC (as amended or superseded), and includes any relevant implementing measure in a relevant Member State of the EEA. References in this base prospectus to "**Exempt Securities**" are to Securities for which no base prospectus is required to be published under the Prospectus Directive. The CSSF has neither approved nor reviewed information contained in this base prospectus in connection with Exempt Securities.

This document comprises a base prospectus in respect of all Securities other than Exempt Securities issued under the Programme for the purpose of article 5.4 of the Prospectus Directive. This base prospectus (the "**Prospectus**") will be published in electronic form on the website of the Luxembourg Stock Exchange ([www.bourse.lu](http://www.bourse.lu)) and on the website ([www.db.com/ir](http://www.db.com/ir)) of the Issuer. ## IMPORTANT NOTICES

Notice of the aggregate principal amount of Securities, interest (if any) payable in respect of Securities, the issue price of Securities and certain other information which is applicable to each tranche of Securities (each, a "**Tranche**") will (other than in the case of Exempt Securities, as defined above) be set out in a final terms document (the "**Final Terms**") which will be filed with the CSSF in case the Securities are to be admitted to trading on a regulated market in the EEA and/or offered to the public in the EEA other than in circumstances where an exemption is available under Article 3.2 of the Prospectus Directive. The applicable Final Terms will (if applicable) contain information relating to any underlying equity security, index, inflation index, credit risk to which the relevant Securities relate and which is contained in such Final Terms. In the case of Exempt Securities, notice of the aggregate principal amount of Securities, interest (if any) payable in respect of Securities, the issue price of Securities and certain other information which is applicable to each Tranche will be set out in a pricing supplement document (the "**Pricing Supplement**"). The applicable Pricing Supplement will (if applicable) contain information relating to any underlying equity security, index, inflation index, currency, commodity, fund unit or share, credit risk or other item(s) (each a "**Reference Item**") to which the relevant Securities relate and which is contained in such Pricing Supplement. However, unless otherwise expressly stated in the applicable Final Terms (or Pricing Supplement, in the case of Exempt Securities), any information contained therein relating to a Reference Item will only consist of extracts from, or summaries of, information contained in financial and other information released publicly in respect of such Reference Item. The Issuer will, unless otherwise expressly stated in the applicable Final Terms (or Pricing Supplement, in the case of Exempt Securities), confirm that such extracts or summaries have been accurately reproduced and that, so far as it is aware, and is able to ascertain from information published in respect of such Reference Item, no facts have been omitted that would render the reproduced inaccurate or misleading.

Copies of Final Terms (or Pricing Supplements, in the case of Exempt Securities) will be available from the registered office of the Issuer and the specified office set out below of each of the Paying Agents (save that a Pricing Supplement will only be available for inspection by a holder of the relevant Security and such holder must produce evidence satisfactory to the Issuer and the Paying Agent as to its holding of Securities and identity). In the case of Securities that are to be listed on the Official List of, and admitted to trading on, the Luxembourg Stock Exchange or offered to the public in any EEA member state, the applicable Final Terms will be published on the Luxembourg Stock Exchange's website at [www.bourse.lu](http://www.bourse.lu), but only for so long as such admission to trading and listing is maintained and the rules of the Luxembourg Stock Exchange or the laws or regulations so require.

This Prospectus should be read and understood in conjunction with any supplement hereto and with any other documents incorporated herein by reference (see the section entitled "*Documents Incorporated by Reference*"). Full information on the Issuer and any Securities issued under the Programme is only available on the basis of the combination of this Prospectus (including any supplement and any document incorporated by reference herein) and the relevant Final Terms (or Pricing Supplement, in the case of Exempt Securities).

No person is or has been authorised to give any information or to make any representations, other than those contained in this Prospectus, in connection with the Programme or the issue and sale of the Securities and, if given or made, such information or representations must not be relied upon as having been authorised by Deutsche Bank. Neither the delivery of this Prospectus nor any sale made hereunder shall, under any circumstances, create any implication that the information herein is correct as of any time subsequent to the date hereof.

Neither this Prospectus nor any other information supplied in connection with the Programme or any Securities (i) is intended to provide the basis of any credit or other evaluation or (ii) should be considered as a recommendation by the Issuer or any of the Dealers that any recipient of this Prospectus or any recipient of any other information supplied in connection with the Programme or any Securities should purchase any Securities. Each investor contemplating purchasing any Securities should make its own independent investigation of the financial condition and affairs, and its own appraisal of the creditworthiness, of the Issuer. Neither this Prospectus nor any other information supplied in connection with the Programme or the issue of any Securities constitutes an offer or invitation by or on behalf of the Issuer or any of the Dealers to subscribe for or to purchase any Securities.

This Prospectus is valid for twelve months upon its date of approval and it and any supplement hereto as well as any Final Terms (or Pricing Supplement, in the case of Exempt Securities) reflect the status as of their respective dates of issue. Neither the delivery of this Prospectus nor the offering, sale or delivery of any Securities shall in any circumstances imply that the information contained in the related documents is accurate and complete subsequent to the date hereof or that there has been no adverse change in the financial condition of the Issuer since such date or that any other information supplied in connection with the Programme is correct at any time subsequent to the date on which it is supplied or, if different, the date indicated in the document containing the same.

The Issuer has undertaken for the benefit of any Dealer to amend or supplement this Prospectus or publish a new Prospectus if and when the information herein should become materially inaccurate or incomplete and has further agreed with the Dealers to furnish a supplement to this Prospectus in the event of any significant new factor, material mistake or inaccuracy relating to the information included in this Prospectus which is capable of affecting the assessment of the Securities and which arises or is noted between the time when this Prospectus has been approved and the final closing of any Tranche of Securities offered to the public or, as the case may be, when trading of any Tranche of Securities on a regulated market begins.

If the Final Terms in respect of any Securities (or Pricing Supplement, in the case of Exempt Securities) includes a legend entitled "*Prohibition of Sales to Retail Investors in the European Economic Area*", the Securities are not intended to be offered, sold or otherwise made available to and, with effect from such date, should not be offered, sold or otherwise made available to any retail investor in the EEA. For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of MiFID II; (ii) a customer within the meaning of Directive (EU) 2016/97 (as amended), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in the Prospectus Directive. If the relevant Final Terms (or Pricing Supplement, in the case of Exempt Securities) include the above-mentioned legend, no key information document required by Regulation (EU) No. 1286/2014 (the "**PRIPs Regulation**") for offering or selling those Securities or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling those Securities or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

The Final Terms (or the Pricing Supplement, in the case of Exempt Securities) in respect of any Securities may include a legend entitled "*MiFID II Product Governance*" which will outline the target market assessment in respect of the Securities and which channels for distribution of the Securities are appropriate. Any person subsequently offering, selling or recommending the Instruments (a "**Distributor**") should take into consideration the target market assessment; however, a Distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Securities (by either adopting or refining the target market assessment) and determining appropriate distribution channels.

A determination will be made in relation to each issue about whether, for the purpose of the Product Governance Rules under EU Delegated Directive 2017/593 (the "**MiFID Product Governance Rules**"), any Dealer subscribing for any Securities is a manufacturer in respect of such Securities, but otherwise neither any of the Arranger nor any other Dealer nor any of their respective affiliates will be a manufacturer for the purpose of the MiFID Product Governance Rules.

This Prospectus does not constitute an offer to sell or the solicitation of an offer to buy any Securities in any jurisdiction to any person to whom it is unlawful to make the offer or solicitation in such jurisdiction. The distribution of this Prospectus and the offer or sale of Securities may be restricted by law in certain jurisdictions. The Issuer and the Dealers do not represent that this Prospectus may be lawfully distributed, or that any Securities may be lawfully offered, in compliance with any applicable registration or other requirements in any such jurisdiction, or pursuant to an exemption available thereunder, or assume any responsibility for facilitating any such distribution or offering. In particular, no action has been taken by the Issuer or the Dealers which would permit a public offering of any Securities in any jurisdiction other than each Member State of the EEA which has implemented the Prospectus Directive as at the date of this Prospectus or distribution of this document in any jurisdiction where action for that purpose is required. Accordingly, no Securities may be offered or sold, directly or indirectly, and neither this Prospectus nor any advertisement or other offering material may be distributed or published in any jurisdiction, except under circumstances that will result in compliance with any applicable laws and regulations. Persons into whose possession this Prospectus or any Securities may come

must inform themselves about, and observe, any such restrictions on the distribution of this Prospectus and the offering and sale of Securities. In particular, there are restrictions on the distribution of this Prospectus and the offer or sale of Securities in the United States, the EEA (in particular the United Kingdom, Austria, Belgium, the Czech Republic, Denmark, France, Ireland, Italy, the Netherlands, Poland, Portugal, Spain and Sweden), Australia, Hong Kong, Israel, Japan, Mexico, the Russian Federation, Saudi Arabia, Singapore, South Africa, Switzerland, Taiwan, Turkey and the United Arab Emirates (see the section entitled "*Transfer and Selling Restrictions*"). In making an investment decision, investors must rely on their own examination of the Issuer and the terms of the Securities being offered, including the merits and risks involved. The Securities have not been approved or disapproved by the United States Securities and Exchange Commission or any other securities commission or other regulatory authority in the United States, nor have the foregoing authorities approved this Prospectus or confirmed the accuracy or the adequacy of the information contained in this Prospectus. Any representation to the contrary is unlawful.

In particular, the Securities have not been and will not be registered under the United States Securities Act of 1933 (as amended) (the "**Securities Act**") and may not be offered or sold in the United States or to, or for the account or benefit of, (a) a "U.S. person" as defined in Regulation S under the Securities Act, (b) a person other than a "Non-United States person" as defined in Rule 4.7 under the United States Commodity Exchange Act of 1936, as amended (the "**Commodity Exchange Act**"), or (c) a "U.S. person" as defined in the Interpretive Guidance and Policy Statement Regarding Compliance with Certain Swap Regulations promulgated by the Commodity Futures Trading Commission (the "**CFTC**") pursuant to the Commodity Exchange Act, or in regulations or guidance adopted under the Commodity Exchange Act (each such person, a "**U.S. person**"), unless the Securities are registered under the Securities Act or an exemption from the registration requirements of the Securities Act is available. See the section entitled "*Description of the Securities – Form of the Securities*" for a description of the manner in which Securities will be issued. Registered Securities are subject to certain restrictions on transfer (see the section entitled "*Transfer and Selling Restrictions*"). Registered Securities may be offered or sold within the United States only to QIBs (as defined under "*Description of the Securities – Form of the Securities*") in transactions exempt from registration under the Securities Act (see the section entitled "*U.S. Information*" below).

The Securities do not constitute, and have not been marketed as, contracts of sale of a commodity for future delivery (or options thereon) subject to the Commodity Exchange Act, and trading in the Securities has not been approved by the CFTC pursuant to the Commodity Exchange Act.

The Securities are not deposits. The Securities are not insured by the U.S. Federal Deposit Insurance Corporation or any other agency, and are subject to investment risk, including the possible loss of principal. The Securities have not been approved or disapproved by the U.S. Federal Deposit Insurance Corporation nor has the U.S. Federal Deposit Insurance Corporation passed on the adequacy or accuracy of this Prospectus. Any representation of the contrary is unlawful. The Securities are subordinate to the claims of depositors.

The language of this Prospectus is English. In respect of the issue of any Tranche of Securities under the Programme, the German text of the Terms and Conditions may be controlling and binding if specified in the applicable Final Terms (or Pricing Supplement, in the case of Exempt Securities).

**Neither this Prospectus nor any Final Terms (or Pricing Supplement, in the case of Exempt Securities) may be used for the purpose of an offer or solicitation by anyone in any jurisdiction in which such offer or solicitation is not authorised or to any person to whom it is unlawful to make such an offer or solicitation.**

Neither this Prospectus nor any Final Terms (or Pricing Supplement, in the case of Exempt Securities) constitutes an offer or an invitation to subscribe for or purchase any Securities and should not be considered as a recommendation or a statement of an opinion (or a report of either of those things) by Deutsche Bank, the Dealers or any of them that any recipient of this Prospectus or any Final Terms (or Pricing Supplement, in the case of Exempt Securities) should subscribe for or purchase any Securities. Each recipient of this Prospectus or any Final Terms (or Pricing Supplement, in the case of Exempt Securities) shall be taken to have made its own appraisal of the condition (financial or otherwise) of the Issuer.

None of the Dealers or the Issuer makes any representation to any purchaser of the Securities regarding the legality of its investment under any applicable laws. Any purchaser of the Securities should be able to bear the economic risk of an investment in the Securities for an indefinite period of time.

Pursuant to the Prospectus, Securities may be issued whose interest and/or redemption payment will be calculated by reference to a specific benchmark which will be provided by an administrator (the "**Benchmark linked Securities**").

As at the date of this Prospectus, the specific benchmark applicable to an issue of Benchmark linked Securities has not yet been determined. However, amounts payable under Benchmark linked Securities may be calculated by reference to (i) BBSW (Bank Bill Swap Rate) which is provided by ASX Limited ("**ASX**"), (ii) EURIBOR (Euro Interbank Offered Rate) which is provided by the European Money Markets Institute ("**EMMI**"), (iii) LIBOR (London Interbank Offered Rate) and certain CMS (constant maturity swap) rates which are provided by ICE Benchmark Administration Limited ("**IBA**"), (iv) NIBOR (Norwegian Interbank Offered Rate) which is provided by Norske Finansielle Referanser AS ("**NoRe**"), (v) SONIA (Sterling Overnight Index Average) which is provided by the Bank of England ("**BoE**"); (vi) STIBOR (Stockholm Interbank Offered Rate) which is provided by the Financial Benchmarks Sweden AB ("**FBS**"), or (vii) another benchmark (an "**Other Benchmark**"). As at the date of this Prospectus, only IBA appears on the register (the "**ESMA Register**") of administrators and benchmarks established and maintained by the European Securities and Markets Authority (the "**ESMA**") pursuant to Article 36 of the Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds and amending Directives 2008/48/EC and 2014/17/EU and Regulation (EU) No 596/2014 (the "**Benchmarks Regulation**"). As at the date of the Prospectus, neither ASX, EMMI, NoRe, FBS nor BoE appear on the ESMA Register. As far as the Issuer is aware, (i) the transitional provisions in Article 51 of the Benchmarks Regulation apply, so that neither ASX, EMMI, NoRe nor FBS are currently required to obtain authorisation or registration (or, if located outside the European Union, recognition, endorsement or equivalence), and (ii) BoE is not required to obtain authorisation or registration pursuant to Article 2 (2) (a) of the Benchmarks Regulation.

In case Securities are issued which make reference to an Other Benchmark, the relevant Final Terms will specify the name of the specific benchmark and the relevant administrator. In such case the Final Terms will further specify if the relevant administrator is included in the ESMA Register or whether the transitional provisions in Article 51 of the Benchmarks Regulation apply.

## SUMMARY

Summaries are made up of disclosure requirements known as 'Elements'. These Elements are numbered in Sections A – E (A.1 – E.7).

This summary contains all the Elements required to be included in a summary for securities of the type of the Securities and an issuer of the type of the Issuer. Because some Elements are not required to be addressed, there may be gaps in the numbering sequence of the Elements.

Even though an Element may be required to be inserted in this summary because of the type of Securities and Issuer, it is possible that no relevant information can be given regarding the Element. In this case a short description of the Element is included in this summary with the statement of 'Not applicable'.

| D.2     | Key information on the key risks that are specific to the Issuer | <p>Investors will be exposed to the risk of the Issuer becoming insolvent as result of being overindebted or unable to pay debts, i.e. to the risk of a temporary or permanent inability to meet interest and/or principal payments on time. The Issuer's credit ratings reflect the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> <li>While the global economy showed robust growth in 2018, significant macroeconomic risks remain that could negatively affect the results of operations and financial condition in some of Deutsche Bank's businesses as well as its strategic plans, including deterioration of the economic outlook for the euro area and slowing in emerging markets, trade tensions between the United States and China as well between the United States and Europe, inflation risks, Brexit, European elections and geopolitical risks.</li> <li>In the European Union, continued elevated levels of political uncertainty could have unpredictable consequences for the financial system and the greater economy, and could contribute to European de-integration in certain areas, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks is limited.</li> <li>The potential withdrawal of the United Kingdom from the European Union – Brexit – may have adverse effects on Deutsche Bank's business, results of operations or strategic plans.</li> <li>Deutsche Bank may be required to take impairments on its exposures to the sovereign debt of European or other countries if the European sovereign debt crisis reignites. The credit default swaps into which Deutsche Bank has entered to manage sovereign credit risk may not be available to offset these losses.</li> <li>Deutsche Bank's results of operation and financial condition, in particular those of Deutsche Bank's Corporate &amp; Investment Bank, continue to be negatively impacted by the challenging market environment, uncertain macro-economic and geopolitical conditions, lower levels of client activity, increased competition and regulation, and the immediate impact of Deutsche Bank's strategic decisions. If Deutsche Bank is unable to improve its profitability as it continues to face these headwinds, Deutsche Bank may be unable to meet many of its strategic aspirations, and may have difficulty maintaining capital, liquidity and leverage at levels expected by market participants and Deutsche</li> </ul> |

It is generally not feasible for Deutsche Bank to consider reviews of any business with which Deutsche Bank might engage in a combination to be complete in all respects. As a result, a combination may not perform as well as expected. In addition, Deutsche Bank may fail to integrate its operations successfully with any entity with which it participates in a business combination. Failure to complete announced business combinations or failure to achieve the expected benefits of any such combination could materially and adversely affect Deutsche Bank's profitability. Such failures could also affect investors' perception of Deutsche Bank's business prospects and management. They could also lead to departures of key employees, or lead to increased costs and reduced profitability if Deutsche Bank felt compelled to offer them financial incentives to remain.</li> </ul> <p>Market speculation about potential consolidation in the financial sector in Europe and Deutsche Bank's role in that consolidation could also have adverse effects on its business and revenue levels. Although speculation concerning consolidation is frequent, there are numerous impediments to completing transactions in Deutsche Bank's sector, including those posed by the regulatory environment, differing business models, valuation issues and the protracted headwinds facing the industry, including the low interest rate environment, market pressures and the high costs associated with rationalizing and simplifying institutions' businesses. Accordingly, Deutsche Bank may determine to cease consideration of business combinations, or may determine not to pursue available opportunities.</p> <p>If Deutsche Bank avoids entering into business combination transactions or if announced or expected transactions fail to materialize, market participants may perceive Deutsche Bank negatively. Deutsche Bank may also be unable to expand its businesses, especially into new business areas, as quickly or successfully as its competitors if Deutsche Bank does so through organic growth alone. These perceptions and limitations could cost Deutsche Bank business and harm its reputation, which could have material adverse effects on Deutsche Bank's financial condition, results of operations and liquidity.</p> <ul style="list-style-type: none"> <li>– Adverse market conditions, asset price deteriorations, volatility and cautious investor sentiment have affected and may in the future materially and adversely affect Deutsche Bank's revenues and profits, particularly in Deutsche Bank's investment banking, brokerage and other commission- and fee-based businesses. Investors who purchase securities with a fixed rate of interest are exposed to the risk that market interest rates rise and the fixed amount of interest they receive is less than the amount they would have received had they invested in a security with a floating rate of interest. The market value of securities with a fixed rate of interest will decrease if potential investors perceive that they can achieve a greater return on an investment by investing in alternative products.]</p> <p><b>[In case of floating or other variable rate Securities insert:</b> The Securities will pay a variable amount of interest on specified interest payment dates. Securities which bear floating interest rates can be volatile investments. Investors who purchase Securities with a floating rate of interest will be exposed to the risk of a fluctuating rate of interest and consequently variable interest amounts. On 27 July 2017, and in a subsequent speech by its Chief Executive on 12 July 2018, the UK Financial Conduct Authority (the "<b>FCA</b>"), which regulates the LIBOR, confirmed that it will no longer persuade or compel banks to submit rates for the calculation of the LIBOR Benchmark after 2021 (the "<b>FCA Announcements</b>"). FCA Announcements indicated that the continuation of LIBOR on the current basis cannot and will not be guaranteed after 2021. In addition, on 29 November 2017, the Bank of England and the FCA announced that, from January 2018, its Working Group on Sterling Risk-Free Rates has been mandated with implementing a broad-based transition to the Sterling Overnight Index Average ("<b>SONIA</b>") over the next four years across sterling bond, loan and derivative markets, so that SONIA is established as the primary sterling interest rate benchmark by the end of 2021.]</p> <p><b>[In case of floating rate Securities linked to EURIBOR insert:</b></p> <p>Separate workstreams are also underway in Europe to reform EURIBOR using a hybrid methodology and to provide a fallback by reference to a euro risk-free rate (based on a euro overnight risk-free rate as adjusted by a methodology to create a term rate). On 13 September 2018, the working group on euro risk-free rates recommended Euro Short-term Rate ("<b>€STR</b>") as the new risk free rate. €STR is expected to be published by the ECB by October 2019. In addition, on 21 January 2019, the euro risk free-rate working group published a set of guiding principles for fallback provisions in new euro denominated cash products (including bonds). The guiding principles indicate, among other things, that continuing to reference EURIBOR in relevant contracts may increase the risk to the euro area financial system.]</p> <p>It is not possible to predict with certainty whether, and to what extent, Benchmarks (including the <b>[insert relevant Reference Rate(s)]</b>) will continue to be supported going forwards. Such factors may have the following effects on the <b>[insert relevant Reference Rate(s)]</b>: (i) discouraging market participants from continuing to administer or contribute to the <b>[insert relevant Reference Rate(s)]</b>; (ii) triggering changes in the rules or methodologies used in the <b>[insert relevant Reference Rate(s)]</b>, and/or (iii) leading to the disappearance of the <b>[insert relevant Reference Rate(s)]</b>. During the life of each Series of Securities risks specified in each of the above sections may impact such Securities at different points in time and for different lengths of time. Each Series of Securities may have a risk profile that changes over time. Prospective investors should seek advice from a professional financial adviser in order to further discuss and understand how the risk profile of a particular Series of Securities will affect their overall investment portfolio.

More than one risk factor may have simultaneous effect with regard to the Securities such that the effect of a particular risk factor may not be predictable. In addition, more than one risk factor may have a compounding effect which may not be predictable. No assurance can be given as to the effect that any combination of risk factors may have on the value of the Securities.

If one or more of the risks described below occurs, this may result in material decreases in the price of the Securities or, in the worst-case scenario, in total loss of interest and capital invested by the investor.

Where Securities are linked to one or more Reference Items an investment in such Securities should only be made after assessing the direction, timing and magnitude of potential future changes in the value of such Reference Item(s), and/or the in the composition or method of calculation of such Reference Item(s), as the return of any such investment will be dependent, *inter alia*, upon such changes.

Terms used in this section and not otherwise defined shall have the meanings given to them in section entitled "*Terms and Conditions of the Securities*".

### RISK FACTORS IN RESPECT OF THE ISSUER

An investment in debt securities issued by Deutsche Bank bears the risk that Deutsche Bank is not able to fulfil its obligations created by the issuance of the securities on the relevant due date. Thus, investors may lose all or part of their investment.

In order to assess the risk, prospective investors should consider all information provided in this Prospectus and consult with their own professional advisers if they consider it necessary.

The risk related to an issuer's ability to fulfil its obligations created by the issuance of debt securities is described by reference to the credit ratings assigned by independent rating agencies. A credit rating is an assessment of the solvency or credit-worthiness of borrowers and/or bond-issuers according to established credit review procedures. These ratings and associated research help investors to analyse the credit risks associated with fixed-income securities by providing detailed information on the ability of issuers to meet their obligations. The lower the assigned rating is on the respective scale, the higher the respective rating agency assesses the risk that obligations will not, not fully and/or not timely be met. A rating is not a recommendation to

buy, sell or hold any notes issued and may be subject to suspension, reduction or withdrawal at any time by the assigning rating agency. A suspension, reduction or withdrawal of any rating assigned may adversely affect the market price of the notes issued.

Deutsche Bank is rated by Moody's Investors Service, Inc. ("**Moody's**"), S&P Global Ratings Europe Limited ("**S&P**"), Fitch Ratings Limited ("**Fitch**"), and DBRS Ratings GmbH ("**DBRS**", and together with Fitch, S&P and Moody's, the "**Rating Agencies**").

S&P, Fitch and DBRS are established in the European Union and have been registered in accordance with Regulation (EC) No 1060/2009 of the European Parliament and of the Council of 16 September 2009, as amended, on credit rating agencies ("**CRA Regulation**"). With respect to Moody's, the credit ratings are endorsed by Moody's office in the UK (Moody's Investors Service Ltd.) in accordance with Article 4(3) of the CRA Regulation.

As of the date of this Prospectus or the latest supplement thereto, if applicable, the following ratings were assigned to Deutsche Bank for its long-term senior debt (or, where available, for its long-term non-preferred senior debt) and its short-term senior debt. For information on the distinction between preferred and non-preferred senior debt and the ratings assigned to Deutsche Bank for its long-term preferred senior debt, see the section entitled "*Description of the Securities*" – "*Ranking of Unsubordinated Notes*".

## Moody's

Long-term non-preferred senior debt: Baa3

Short-term senior debt: P-2

Moody's defines:

**Baa3:** Obligations rated "Baa" are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

Moody's long-term obligation ratings are divided into several categories ranging from "Aaa", reflecting the highest quality, subject to the lowest level of credit risk, over categories "Aa", "A", "Baa", "Ba", "B", "Caa", "Ca" to category "C", reflecting the lowest rated obligations which are typically in default, with little prospect for recovery of principal or interest. Moody's appends numerical modifiers 1, 2 and 3 to each generic rating classification from "Aa" through "Caa". The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

**P-2:** Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

Moody's short-term obligation ratings are divided into several categories ranging from "P-1", reflecting a superior ability of an issuer to repay short-term debt obligations, over categories "P-2" and "P-3" to category "NP", reflecting that an issuer does not fall within any of the Prime rating categories.

**Rating Outlook / Review:** A rating outlook is an opinion regarding the likely rating direction over the medium term. Rating outlooks fall into four categories: Positive (POS), Negative (NEG), Stable (STA), and Developing (DEV). A designation of RUR (Rating(s) Under Review) indicates that an issuer has one or more ratings under review, which overrides the outlook designation. A stable outlook indicates a low likelihood of a rating change over the medium term. A negative, positive or developing outlook indicates a higher likelihood of a rating change over the medium term.

A review indicates that a rating is under consideration for a change in the near term. A rating can be placed on review for upgrade (UPG), downgrade (DNG), or more rarely with direction uncertain (UNC). A review may end with a rating being upgraded, downgraded, or confirmed without a change to the rating. Ratings on review are said to be on Moody's "Watchlist" or "On Watch". Ratings are placed on review when a rating action may be warranted in the

near term but further information or analysis is needed to reach a decision on the need for a rating change or the magnitude of the potential change.

## **S&P**

Long-term non-preferred senior debt: BBB-

Short-term senior debt: A-2

S&P defines:

BBB-: An obligation rated "BBB" exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

Long-term issue credit ratings by S&P are divided into several categories ranging from "AAA", reflecting an extremely strong capacity of the obligor to meet its financial commitment on the obligation, over categories "AA", "A", "BBB", "BB", "B", "CCC", "CC", "C" to category "D", reflecting that an obligation is in default or in breach of an imputed promise. The ratings from "AA" to "CCC" may be modified by the addition of a plus "+" or minus "-" sign to show relative standing within the major rating categories.

A-2: An obligation rated "A-2" is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitment on the obligation is satisfactory.

Short-term issue credit ratings by S&P are divided into several categories ranging from "A-1", reflecting a strong capacity of the obligor to meet its financial commitment on the obligation, over categories "A-2", "A-3", "B", "C" to category "D", reflecting that an obligation is in default or in breach of an imputed promise.

Outlook / An S&P rating outlook assesses the potential direction of a long-term credit rating over the  
CreditWatch: intermediate term (typically six months to two years). In determining a rating outlook, consideration is given to any changes in the economic and/or fundamental business conditions. An outlook is not necessarily a precursor of a rating change or future CreditWatch action. Rating outlooks fall into five categories: positive, negative, stable, developing and n.m. (not meaningful).

CreditWatch highlights S&P's opinion regarding the potential direction of a short-term or long-term rating. It focuses on identifiable events and short-term trends that cause ratings to be placed under special surveillance by S&P's analytical staff. A CreditWatch listing, however, does not mean a rating change is inevitable, and when appropriate, a range of potential alternative ratings will be shown. CreditWatch is not intended to include all ratings under review, and rating changes may occur without the ratings having first appeared on CreditWatch. The "positive" designation means that a rating may be raised; "negative" means a rating may be lowered; and "developing" means that a rating may be raised, lowered, or affirmed.

## **Fitch**

Long-term non-preferred senior debt: BBB

Short-term senior debt: F2

Fitch defines:

BBB: A rating of "BBB" denotes expectations of low credit risk. The capacity for payment of financial commitments is considered adequate. This capacity may, nevertheless, be more likely to be impaired by adverse business or economic conditions than in the case of higher ratings.

Fitch's long-term ratings are divided into several major categories ranging from "AAA", reflecting the lowest expectation of credit risk, over categories "AA", "A", "BBB", "BB", "B", "CCC", "CC" to category "C", reflecting exceptionally high levels of credit risk. Defaulted obligations typically are not assigned "RD" or "D" ratings, but are instead rated in the "B" to "C" rating categories, depending upon their recovery prospects and other relevant characteristics. The modifiers "+" or "-" may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the "AAA" obligation rating category or to obligation ratings below "CCC".

The subscript "emr" is appended to a rating to denote embedded market risk which is beyond the scope of the rating. The designation is intended to make clear that the rating solely addresses the counterparty risk of the issuing bank. It is not meant to indicate any limitation in the analysis of the counterparty risk, which in all other respects follows published Fitch criteria for analysing the issuing financial institution.

**F2:** A rating of "F2" indicates the good intrinsic capacity for timely payment of financial commitments. It may have an added "+" to denote any exceptionally good credit feature.

Fitch's short-term ratings are divided into several categories ranging from "F1", reflecting the strongest intrinsic capacity for timely payment of financial commitments, over categories "F2", "F3", "B", "C", "RD" to category "D" which indicates a broad-based default event for an entity, or the default of a short-term obligation.

**Outlook / Rating Watch:** Rating Outlooks indicate the direction a rating is likely to move over a one- to two-year period. They reflect financial or other trends that have not yet reached the level that would trigger a rating action, but which may do so if such trends continue. Positive or Negative rating Outlooks do not imply that a rating change is inevitable and, similarly, ratings with Stable Outlooks can be raised or lowered without a prior revision to the Outlook, if circumstances warrant such an action. Occasionally, where the fundamental trend has strong, conflicting elements of both positive and negative, the Rating Outlook may be described as Evolving.

Rating Watches indicate that there is a heightened probability of a rating change and the likely direction of such a change. These are designated as "Positive", indicating a potential upgrade, "Negative", for a potential downgrade, or "Evolving" if ratings may be raised, lowered or affirmed. However, ratings that are not on Rating Watch can be raised or lowered without being placed on Rating Watch first, if circumstances warrant such an action.

## DBRS

Long-term non-preferred senior debt: BBB (high) (negative)

Short-term senior debt: R-1 (low) (stable)

DBRS defines:

**BBB (high):** Adequate credit quality. The capacity for the payment of financial obligations is considered acceptable. May be vulnerable to future events.

Long-term obligations ratings by DBRS are divided into several categories ranging from "AAA", reflecting the highest credit quality, over categories "AA", "A", "BBB", "BB", "B", "CCC", "CC", "C" to category "D", reflecting when the issuer has filed under any applicable bankruptcy, insolvency or winding up statute or there is a failure to satisfy an obligation after the exhaustion of grace periods. All rating categories other than "AAA" and "D" also contain subcategories "(high)" and "(low)". The absence of either a "(high)" or "(low)" designation indicates the rating is in the middle of the category.

**R-1 (low):** Good credit quality. The capacity for the payment of short-term financial obligations as they fall due is substantial. Overall strength is not as favourable as higher rating categories. May be vulnerable to future events, but qualifying negative factors are considered manageable.

DBRS's short-term debt ratings are divided into several categories ranging from "R-1",

reflecting the highest credit quality, over categories “R-2”, “R-3”, “R-4”, “R-5” to category “D” reflecting when the issuer has filed under any applicable bankruptcy, insolvency or winding up statute or there is a failure to satisfy an obligation after the exhaustion of grace periods. The “R-1” and “R-2” rating categories are further denoted by the subcategories “(high)”, “(middle)”, and “(low)”.

Trend /  
Under  
Review:

Rating trends provide guidance in respect of DBRS's opinion regarding the outlook for a rating. Rating trends have three categories: "positive", "stable" or "negative". The rating trend indicates the direction in which DBRS considers the rating may move if present circumstances continue, or in certain cases, unless challenges are addressed by the issuer.

It is often the rating trend that reflects the initial pressures or benefits of a changing environment rather than an immediate change in the rating. A positive or negative trend is not an indication that a rating change is imminent. Rather, a positive or negative trend represents an indication that there is a greater likelihood that the rating could change in the future than would be the case if a stable trend was assigned to the security.

Generally, the conditions that lead to the assignment of a negative or positive trend are resolved within a twelve month period. However, in some instances, new factors emerge which may cause the positive or negative trend to be maintained, even as the original factors become clarified or resolved.

DBRS places ratings "Under Review" in situations where a significant event occurs that directly impacts the credit quality of a particular entity or group of entities and if there is uncertainty regarding the outcome of the event and DBRS therefore is unable to provide an objective, forward-looking opinion in a timely fashion. DBRS also places ratings "Under Review" in situations where, in the opinion of DBRS, the current rating on the security may no longer be appropriate due to a change in the credit status of the issuing entity for other reasons and additional time is required for further analysis. Furthermore, DBRS may also place a rating "Under Review" if DBRS has announced that one or more of its methodologies that apply to such a rating is being revised and the announcement indicates that the outcome of the rating affected by the revision is uncertain. Using "Under Review – Positive" or "Under Review – Negative" is a more significant action than changing a rating trend to positive or negative as rating changes are considered more likely with the former than the latter

### ***Rating of Subordinated Obligations***

If Deutsche Bank enters into subordinated obligations, these obligations may be rated lower because, in the case of an insolvency or liquidation of the Bank, the claims and interest claims resulting from these obligations are subordinate to those claims of creditors of the Bank that are not also subordinated. Deutsche Bank will disclose the ratings of subordinated obligations (if any).

### ***Factors that May Adversely Affect Deutsche Bank's Financial Strength***

Deutsche Bank's financial strength, which is also reflected in its ratings described above, depends in particular on its profitability. The following describes factors which may adversely affect Deutsche Bank's profitability:

- While the global economy showed robust growth in 2018, significant macroeconomic risks remain that could negatively affect the results of operations and financial condition in some of Deutsche Bank's businesses as well as its strategic plans, including deterioration of the economic outlook for the euro area and slowing in emerging markets, trade tensions between the United States and China as well as between the United States and Europe, inflation risks, Brexit, European elections and geopolitical risks.
- In the European Union, continued elevated levels of political uncertainty could have unpredictable consequences for the financial system and the greater economy, and could contribute to European de-integration in certain areas, potentially leading to declines in business levels, write-downs of assets and

losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks is limited.

- The potential withdrawal of the United Kingdom from the European Union – Brexit – may have adverse effects on Deutsche Bank's business, results of operations or strategic plans.
- Deutsche Bank may be required to take impairments on its exposures to the sovereign debt of European or other countries if the European sovereign debt crisis reignites. The credit default swaps into which Deutsche Bank has entered to manage sovereign credit risk may not be available to offset these losses.
- Deutsche Bank's results of operation and financial condition, in particular those of Deutsche Bank's Corporate & Investment Bank, continue to be negatively impacted by the challenging market environment, uncertain macro-economic and geopolitical conditions, lower levels of client activity, increased competition and regulation, and the immediate impact of Deutsche Bank's strategic decisions. If Deutsche Bank is unable to improve its profitability as it continues to face these headwinds, Deutsche Bank may be unable to meet many of its strategic aspirations, and may have difficulty maintaining capital, liquidity and leverage at levels expected by market participants and Deutsche Bank's regulators.
- Deutsche Bank considers business combinations from time to time. It is generally not feasible for Deutsche Bank to consider reviews of any business with which Deutsche Bank might engage in a combination to be complete in all respects. As a result, a combination may not perform as well as expected. In addition, Deutsche Bank may fail to integrate its operations successfully with any entity with which it participates in a business combination. Failure to complete announced business combinations or failure to achieve the expected benefits of any such combination could materially and adversely affect Deutsche Bank's profitability. Such failures could also affect investors' perception of Deutsche Bank's business prospects and management. They could also lead to departures of key employees, or lead to increased costs and reduced profitability if Deutsche Bank felt compelled to offer them financial incentives to remain.

Market speculation about potential consolidation in the financial sector in Europe and Deutsche Bank's role in that consolidation could also have adverse effects on its business and revenue levels. Although speculation concerning consolidation is frequent, there are numerous impediments to completing transactions in Deutsche Bank's sector, including those posed by the regulatory environment, differing business models, valuation issues and the protracted headwinds facing the industry, including the low interest rate environment, market pressures and the high costs associated with rationalizing and simplifying institutions' businesses. Accordingly, Deutsche Bank may determine to cease consideration of business combinations, or may determine not to pursue available opportunities.

If Deutsche Bank avoids entering into business combination transactions or if announced or expected transactions fail to materialize, market participants may perceive Deutsche Bank negatively. Deutsche Bank may also be unable to expand its businesses, especially into new business areas, as quickly or successfully as its competitors if Deutsche Bank does so through organic growth alone. These perceptions and limitations could cost Deutsche Bank business and harm its reputation, which could have material adverse effects on Deutsche Bank's financial condition, results of operations and liquidity.

- Adverse market conditions, asset price deteriorations, volatility and cautious investor sentiment have affected and may in the future materially and adversely affect Deutsche Bank's revenues and profits, particularly in Deutsche Bank's investment banking, brokerage and other commission- and fee-based businesses. As a result, Deutsche Bank has in the past incurred and may in the future incur significant losses from its trading and investment activities.

- Deutsche Bank's liquidity, business activities and profitability may be adversely affected by an inability to access the debt capital markets or to sell assets during periods of market-wide or firm-specific liquidity constraints. Credit rating downgrades have contributed to an increase in Deutsche Bank's funding costs, and any future downgrade could materially adversely affect its funding costs, the willingness of counterparties to continue to do business with it and significant aspects of its business model.
- In the second quarter of 2018, Deutsche Bank announced changes to its strategy and updates to its financial targets. If Deutsche Bank is unable to implement its strategic plans successfully, Deutsche Bank may be unable to achieve its financial objectives, or it may incur losses or low profitability, and its financial condition, results of operations and share price may be materially and adversely affected.
- Deutsche Bank may have difficulties selling companies, businesses or assets at favorable prices or at all and may experience material losses from these assets and other investments irrespective of market developments.
- Intense competition, in Deutsche Bank's home market of Germany as well as in international markets, has and could continue to materially adversely impact its revenues and profitability.
- Regulatory reforms enacted and proposed in response to weaknesses in the financial sector, together with increased regulatory scrutiny more generally, have had and continue to have a significant impact on Deutsche Bank and may adversely affect its business and ability to execute its strategic plans. Competent regulators may prohibit Deutsche Bank from making dividend payments or payments on its regulatory capital instruments or take other actions if Deutsche Bank fails to comply with regulatory requirements.
- Regulatory and legislative changes require Deutsche Bank to maintain increased capital and abide by tightened liquidity requirements. These requirements may significantly affect Deutsche Bank's business model, financial condition and results of operations as well as the competitive environment generally. Any perceptions in the market that Deutsche Bank may be unable to meet its capital or liquidity requirements with an adequate buffer, or that Deutsche Bank should maintain capital or liquidity in excess of these requirements or another failure to meet these requirements could intensify the effect of these factors on Deutsche Bank's business and results.
- In some cases, Deutsche Bank is required to hold and calculate capital and to comply with rules on liquidity and risk management separately for its local operations in different jurisdictions, in particular in the United States.
- Deutsche Bank's regulatory capital and liquidity ratios and its funds available for distributions on its shares or regulatory capital instruments will be affected by Deutsche Bank's business decisions and, in making such decisions, Deutsche Bank's interests and those of the holders of such instruments may not be aligned, and Deutsche Bank may make decisions in accordance with applicable law and the terms of the relevant instruments that result in no or lower payments being made on Deutsche Bank's shares or regulatory capital instruments.
- European and German legislation regarding the recovery and resolution of banks and investment firms could, if steps were taken to ensure Deutsche Bank's resolvability or resolution measures were imposed on it, significantly affect its business operations, and lead to losses for its shareholders and creditors.
- Other regulatory reforms adopted or proposed in the wake of the financial crisis – for example, extensive new regulations governing Deutsche Bank's derivatives activities, compensation, bank levies, deposit protection, data protection, or a possible financial transaction tax – may materially increase Deutsche Bank's operating costs and negatively impact its business model.

- A robust and effective internal control environment and adequate infrastructure (comprising people, policies and procedures, controls testing and IT systems) are necessary to ensure that Deutsche Bank conducts its business in compliance with the laws, regulations and associated supervisory expectations applicable to it. Deutsche Bank has identified the need to strengthen its internal control environment and infrastructure and has embarked on initiatives to accomplish this. If these initiatives are not successful or are delayed, Deutsche Bank's reputation, regulatory position and financial condition may be materially adversely affected, and Deutsche Bank's ability to achieve its strategic ambitions may be impaired.
- The BaFin has ordered Deutsche Bank to improve its control and compliance infrastructure relating to anti-money laundering and know-your-client processes in CIB, and appointed a special representative to monitor these measures' implementation. Deutsche Bank's results of operations, financial condition and reputation could be materially and adversely affected if Deutsche Bank is unable to significantly improve its infrastructure and control environment by the set deadline.
- Deutsche Bank operates in a highly and increasingly regulated and litigious environment, potentially exposing Deutsche Bank to liability and other costs, the amounts of which may be substantial and difficult to estimate, as well as to legal and regulatory sanctions and reputational harm.
- Deutsche Bank is currently the subject of industry-wide investigations by regulatory and law enforcement agencies relating to interbank and dealer offered rates, as well as civil actions. Due to a number of uncertainties, including those related to the high profile of the matters and other banks' settlement negotiations, the eventual outcome of these matters is unpredictable, and may materially and adversely affect Deutsche Bank's results of operations, financial condition and reputation.
- Regulators and law enforcement authorities are investigating, among other things, Deutsche Bank's compliance with the U.S. Foreign Corrupt Practices Act and other laws with respect to Deutsche Bank's hiring practices related to candidates referred by clients, potential clients and government officials, and Deutsche Bank's engagement of finders and consultants.
- Deutsche Bank is currently involved in civil proceedings in connection with its voluntary takeover offer for the acquisition of all shares of Postbank. The extent of Deutsche Bank's financial exposure to this matter could be material, and its reputation may be harmed.
- Deutsche Bank has investigated the circumstances around equity trades entered into by certain clients in Moscow and London and has advised regulators and law enforcement authorities in several jurisdictions about those trades. In the event that violations of law or regulation are found to have occurred, any resulting penalties against Deutsche Bank may materially and adversely affect its results of operations, financial condition and reputation.
- Deutsche Bank is currently involved in civil and criminal proceedings in connection with transactions with Monte dei Paschi di Siena. The extent of Deutsche Bank's financial exposure to these matters could be material, and its reputation may be harmed.
- Deutsche Bank is under continuous examination by tax authorities in the jurisdictions in which Deutsche Bank operates. Tax laws are increasingly complex and are evolving. The cost to Deutsche Bank arising from the conclusion and resolution of routine tax examinations, tax litigation and other forms of tax proceedings or tax disputes may increase and may adversely affect its business, financial condition and results of operation.
- Deutsche Bank is currently involved in a legal dispute with the German tax authorities in relation to the tax treatment of certain income received with respect to its pension plan assets. The proceeding is pending in front of the German supreme fiscal court (*Bundesfinanzhof*). Should the courts ultimately rule in favor of the German tax authorities, the outcome could have a material effect on Deutsche Bank's comprehensive income and financial condition.
- US Congressional committees and other U.S. governmental entities have sought and may seek information from Deutsche Bank concerning potential dealings between Deutsche Bank and the U.S.

executive branch, the President, his family and other close associates, exposing Deutsche Bank in particular to risk to its reputation and potential loss of business as a result of extensive media attention

- Deutsche Bank has received requests for information from regulatory and law enforcement agencies concerning its correspondent banking relationship with Danske Bank, exposing Deutsche Bank in particular to risk to its reputation and potential loss of business as a result of extensive media attention.
- In November 2018, Deutsche Bank's offices in Frankfurt were searched by German law enforcement authorities on the suspicion that two employees and as-yet unidentified further individuals deliberately abstained from issuing suspicious activity reports (SARs) in a timely manner and aided and abetted money laundering, exposing Deutsche Bank in particular to risk to its reputation and potential loss of business as a result of extensive media attention.
- Guilty pleas by or convictions of Deutsche Bank or its affiliates in criminal proceedings may have consequences that have adverse effects on certain of its businesses.
- In addition to its traditional banking businesses of deposit-taking and lending, Deutsche Bank also engages in nontraditional credit businesses in which credit is extended in transactions that include, for example, its holding of securities of third parties or its engaging in complex derivative transactions. These nontraditional credit businesses materially increase Deutsche Bank's exposure to credit risk.
- A substantial proportion of the assets and liabilities comprise financial instruments that it carries at fair value, with changes in fair value recognized in its income statement. As a result of such changes, Deutsche Bank has incurred losses in the past, and may incur further losses in the future.
- Pursuant to accounting rules, Deutsche Bank must periodically test the value of the goodwill of its businesses and the value of its other intangible assets for impairment. In the event such test determines that criteria for impairment exists, Deutsche Bank is required under accounting rules to write down the value of such asset. Impairments of goodwill and other intangible assets have had and may have a material adverse effect on Deutsche Bank's profitability results of operations.
- Pursuant to accounting rules, Deutsche Bank must review its deferred tax assets at the end of each reporting period. To the extent that it is no longer probable that sufficient taxable income will be available to allow the benefit of part or all of deferred tax assets to be utilized, Deutsche Bank has to reduce the carrying amounts. These reductions have had and may in the future have material adverse effects on its profitability, equity and financial condition.
- Deutsche Bank's risk management policies, procedures and methods leave it exposed to unidentified or unanticipated risks, which could lead to material losses.
- Operational risks, which may arise from errors in the performance of Deutsche Bank's processes, the conduct of Deutsche Bank's employees, instability, malfunction or outage of Deutsche Bank's IT system and infrastructure, or loss of business continuity, or comparable issues with respect to Deutsche Bank's vendors, may disrupt Deutsche Bank's businesses and lead to material losses.
- Deutsche Bank utilizes a variety of vendors in support of its business and operations. Services provided by vendors pose risks to Deutsche Bank comparable to those Deutsche Bank bears when it performs the services itself, and Deutsche Bank remains ultimately responsible for the services its vendors provide. Furthermore, if a vendor does not conduct business in accordance with applicable standards or Deutsche Bank's expectations, Deutsche Bank could be exposed to material losses or regulatory action or litigation or fail to achieve the benefits it sought from the relationship.
- Deutsche Bank's operational systems are subject to an increasing risk of cyber-attacks and other internet crime, which could result in material losses of client or customer information, damage Deutsche Bank's reputation and lead to regulatory penalties and financial losses.

- The size of Deutsche Bank's clearing operations exposes Deutsche Bank to a heightened risk of material losses should these operations fail to function properly.
- Ongoing global benchmark reform efforts initiated by the Financial Stability Board, specifically the transition from interbank offered rates to alternative reference rates, including so-called "risk-free-rates", that are under development, introduce a number of inherent risks to Deutsche Bank's business and the financial industry. These risks, should they materialize, may have adverse effects on Deutsche Bank's business, results of operations and profitability.
- Deutsche Bank is subject to laws and other requirements relating to financial and trade sanctions and embargoes. If Deutsche Bank breaches such laws and requirements, it can be subject, and have in the past been subject, to material regulatory enforcement actions and penalties.
- Transactions with counterparties in countries designated by the U.S. State Department as state sponsors of terrorism or persons targeted by U.S. economic sanctions may lead potential customers and investors to avoid doing business with Deutsche Bank or investing in Deutsche Bank's securities, harm Deutsche Bank's reputation or result in regulatory or enforcement action which could materially and adversely affect Deutsche Bank's business.

## **RISK FACTORS IN RESPECT OF THE SECURITIES**

*The Issuer believes that the following factors may affect its ability to fulfil its obligations under Securities issued under the Programme and/or are material for the purpose of assessing the market risks associated with Securities issued under the Programme. All of these factors are contingencies which may or may not occur and the Issuer is not in a position to express a view on the likelihood of any such contingency occurring.*

### **GENERAL**

#### **Securities May not be a Suitable Investment for all Investors**

The Securities may not be a suitable investment for all investors. Each potential investor in the Securities must determine the suitability of that investment in light of its own circumstances. In particular, each potential investor should:

- (a) have sufficient knowledge and experience to make a meaningful evaluation of the Securities, the merits and risks of investing in the Securities and the information contained or incorporated by reference in this Prospectus or any applicable supplement and all the information contained in the applicable Final Terms (or Pricing Supplement, in the case of Exempt Securities);
- (b) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation, an investment in the Securities and the impact the Securities will have on its overall investment portfolio;
- (c) have sufficient financial resources and liquidity to bear all of the risks of an investment in the Securities;
- (d) understand thoroughly the terms of the Securities and be familiar with the behaviour of any relevant indices and financial markets; and
- (e) be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

The Programme contemplates the issue of a wide variety of Securities with different interest and redemption provisions. The risk factors below represent the principal risks associated with the interest and redemption provisions detailed in "*Description of the Securities – Description of the Interest Rate and Redemption Provisions*".

## Interest

The Securities to be issued under the Programme may pay either (a) a fixed amount of interest, (b) a variable amount of interest or (c) no interest at all.

### Fixed Rate Interest

Securities bearing or paying a fixed rate of interest either will pay or, depending on the fulfilment of certain conditions, may pay a fixed amount of interest on specified interest payment dates. Investors who purchase Securities with a fixed rate of interest are exposed to the risk that market interest rates rise and the fixed amount of interest they receive is less than the amount they would have received had they invested in a Security with a floating rate of interest. The market value of Securities with a fixed rate of interest will decrease if potential investors perceive that they can achieve a greater return on an investment by investing in alternative products. If an investor holds a Security bearing a fixed rate of interest through to maturity, changes in the market interest rate may become less relevant to the value as the maturity date approaches.

### Floating and Other Variable Rate Interest

Securities bearing or paying a floating or other variable rate of interest either will pay or, depending on the fulfilment of certain conditions, may pay a variable amount of interest on specified interest payment dates. Securities which bear or pay floating or other variable interest rates can be volatile investments. Investors who purchase Securities with a floating or other variable rate of interest will be exposed to the risk of a fluctuating rate of interest and consequently variable interest amounts. Fluctuating interest rate levels make it impossible to determine the profitability of Floating Rate Securities. If floating or other variable rate securities are structured to include multipliers or other leverage factors, or caps or floors, or any combination of those features, the market value of those securities may be more volatile than that for securities that do not include these features.

Floating Rate Securities or other variable rate Securities may be subject to a maximum amount of interest, which may limit the total amount of interest that an investor may receive.

### *Securities Linked to LIBOR, EURIBOR or another "Benchmark"*

Interest rates and indices or other figures which are deemed to be "benchmarks" (including the London Interbank Offered Rate ("**LIBOR**"), the Euro Interbank Offered Rate ("**EURIBOR**") and other interest rates and indices) are the subject of recent national, international and other regulatory guidance and proposals for reform. Some of these reforms are already effective while others are still to be implemented. These reforms may cause such benchmarks to perform differently than in the past, to disappear entirely, or to have other consequences which cannot be predicted. Any such consequence could have a material adverse effect on any Securities linked to or referencing such a benchmark.

Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds and amending Directives 2008/48/EC and 2014/17/EU and Regulation (EU) No 596/2014 (the "**Benchmarks Regulation**") was published in the Official Journal of the EU on 29 June 2016 and mostly applies, subject to certain transitional provisions, since 1 January 2018. The Benchmarks Regulation applies to the provision of benchmarks, the contribution of input data to a benchmark and the use of a benchmark within the EU. Among other things, it (i) requires benchmark administrators to be authorised or registered (or, if non-EU-based, to be subject to an equivalent regime or otherwise recognised or endorsed) and (ii) prevents certain uses by EU supervised entities (such as the Issuer) of benchmarks of administrators that are not authorised or registered (or, if non-EU based, not deemed equivalent or recognised or endorsed).

The Benchmarks Regulation could have a material impact on any Securities linked to or referencing LIBOR, EURIBOR or any other benchmark, in particular, if the methodology or other terms of LIBOR, EURIBOR or such other benchmark are changed in order to comply with the requirements of the Benchmarks Regulation. Such changes could, among other things, have the effect of reducing, increasing or otherwise affecting the volatility of the published rate or level of LIBOR, EURIBOR or such other benchmark.

More broadly, any of the international or national reforms, or the general increased regulatory scrutiny of benchmarks, could increase the costs and risks of administering or otherwise participating in the setting of a benchmark and complying with any such regulations or requirements.

Specifically, the sustainability of LIBOR has been questioned as a result of the absence of relevant active underlying markets and possible disincentives (including possibly as a result of benchmark reforms) for market participants to continue contributing to such benchmarks. On 27 July 2017, and in a subsequent speech by its Chief Executive on 12 July 2018, the UK Financial Conduct Authority (the "**FCA**"), which regulates the LIBOR, confirmed that it will no longer persuade or compel banks to submit rates for the calculation of the LIBOR benchmark after 2021 (the "**FCA Announcements**"). The FCA Announcements indicated that the continuation of LIBOR on the current basis cannot and will not be guaranteed after 2021.

In addition, on 29 November 2017, the Bank of England and the FCA announced that, from January 2018, its Working Group on Sterling Risk-Free Rates has been mandated with implementing a broad-based transition to the Sterling Overnight Index Average ("**SONIA**") over the next four years across sterling bond, loan and derivative markets, so that SONIA is established as the primary sterling interest rate benchmark by the end of 2021. See further "*The Market continues to develop in relation to SONIA as a reference rate*" below.

Separate workstreams are also underway in Europe to reform EURIBOR using a hybrid methodology and to provide a fallback by reference to a euro risk-free rate (based on a euro overnight risk-free rate as adjusted by a methodology to create a term rate). On 13 September 2018, the working group on euro risk-free rates recommended Euro Short-term Rate ("**€STR**") as the new risk free rate. €STR is expected to be published by the ECB by October 2019. In addition, on 21 January 2019, the euro risk free-rate working group published a set of guiding principles for fallback provisions in new euro denominated cash products (including bonds). The guiding principles indicate, among other things, that continuing to reference EURIBOR in relevant contracts may increase the risk to the euro area financial system.

It is not possible to predict with certainty whether, and to what extent, benchmarks (including LIBOR and EURIBOR) will continue to be supported going forwards. This may cause benchmarks to perform differently than they have done in the past, and may have other consequences which cannot be predicted. Any of the above factors may have (without limitation) the following effects on certain benchmarks: (i) discouraging market participants from continuing to administer or contribute to a benchmark; (ii) triggering changes in the rules or methodologies used in the benchmark and/or (iii) leading to the disappearance of the benchmark. Any of the above changes or any other consequential changes as a result of international or national reforms or other initiatives or investigations, could have a material adverse effect on the value of and return on any Securities linked to, referencing, or otherwise dependent (in whole or in part) upon, a benchmark and the Calculation Agent may be entitled to make corresponding adjustments to the conditions of Reference Item linked Securities.

Investors should be aware that if a benchmark used to calculate the Interest Rate under the Securities were discontinued or otherwise unavailable, were no longer permitted for use by the Issuer or were its methodology of calculation to be materially changed, the benchmark used in the calculation of the Rate of Interest will then be determined by the fall-back provisions set out in the Terms and Conditions which may (depending on market circumstances at the relevant time, including uncertainty concerning availability of replacement rates) not operate as intended. The fall-back provisions may in certain circumstances (i) result in the Calculation Agent or an Independent Adviser appointed by the Issuer, or the Issuer itself, determining a replacement rate (if any at the relevant time) to be used, with or without the application of an adjustment spread (which, if applied, could be positive or negative, and would be applied with a view to reducing or eliminating, to the extent reasonably practicable in the circumstances, any transfer of economic value between the Issuer and Securityholders arising out of the replacement of the relevant rate) and making such other adjustments to the terms of the Securities as it determines appropriate to account for such replacement; (ii) result in the effective application of a fixed rate based on the rate which applied in the previous period when the benchmark was available; (iii) result in the early redemption of the Securities; or (iv) result in paragraphs (i) and (ii), or (ii) and (iii), both applying. Any such replacement and adjustment may result in an Interest Rate in respect of the Securities which is different and may perform differently from the rate originally anticipated (and result in a lower Rate of Interest) and unless any

such replacement rate is itself discontinued or otherwise unavailable, is no longer permitted for use by the Issuer or its methodology of calculation is materially changed, such replacement rate will be used to calculate the Interest Rate for the remainder of the life of the Securities, regardless of any change in industry or market practice as to the appropriate replacement for the rate originally anticipated. Due to the uncertainty concerning the availability of replacement rates, the involvement of an Independent Adviser and the potential for further regulatory developments, there is a risk that the relevant fall-back provisions may not operate as intended at the relevant time. All of this could have an adverse effect on the value or liquidity of, and return on, the Securities.

In addition, in the case of Securities linked to other types of benchmarks, the occurrence of an Administrator/Benchmark Event may cause early redemption or adjustment of the Securities, which may include selecting one or more successor benchmarks and making related adjustments to the Securities, including if applicable to reflect increased costs. An Administrator/Benchmark Event may arise if any of the following circumstances occurs or may occur: (1) a benchmark is materially changed or cancelled; or (2) (i) the relevant authorisation, registration, recognition, endorsement, equivalence decision or approval in respect of the benchmark or the administrator or sponsor of the benchmark is not obtained, (ii) an application for authorisation, registration, recognition, endorsement, equivalence decision, approval or inclusion in any official register is rejected or (iii) any authorisation, registration, recognition, endorsement, equivalence decision or approval is suspended or inclusion in any official register is withdrawn; (3) it is not fair and commercially reasonable from the perspective of the Issuer or the Calculation Agent to continue the use of the benchmark or the Issuer or the Calculation Agent suffer increased costs in each case due to licensing restrictions or changes in licence costs; or (4) a relevant supervisor officially announces a benchmark is longer representative of any relevant underlying market(s).

Investors should consult their own independent advisers and make their own assessment about the potential risks imposed by the Benchmarks Regulation or any other relevant international or national reforms and the possible application of any benchmark provisions of Securities as described above in making any investment decision with respect to any Securities linked to or referencing a benchmark.

#### *The Market Continues to Develop in Relation to SONIA as a Reference Rate*

Where the applicable Final Terms (or Pricing Supplement, in the case of Exempt Securities) for a Series of Floating Rate Securities identifies that the Rate of Interest for such Securities will be determined by reference to SONIA, the Rate of Interest will be determined on the basis of compounded daily SONIA. Compounded daily SONIA differs from LIBOR in a number of material respects, including (without limitation) that compounded daily SONIA is a backwards-looking, compounded, risk-free overnight rate, whereas LIBOR is expressed on the basis of a forward-looking term and includes a risk-element based on inter-bank lending. As such, investors should be aware that LIBOR and SONIA may behave materially differently as interest reference rates for Securities issued under the Programme. The use of compounded daily SONIA as a reference rate for Eurobonds is nascent, and is subject to change and development, both in terms of the substance of the calculation and in the development and adoption of market infrastructure for the issuance and trading of bonds referencing compounded daily SONIA.

Accordingly, prospective investors in any Securities referencing compounded daily SONIA should be aware that the market continues to develop in relation to SONIA as a reference rate in the capital markets and its adoption as an alternative to Sterling LIBOR. For example, in the context of backwards-looking SONIA rates, market participants and relevant working groups are currently assessing the differences between compounded rates and weighted average rates, and such groups are also exploring forward-looking 'term' SONIA reference rates (which seek to measure the market's forward expectation of an average SONIA rate over a designated term). The adoption of SONIA may also see component inputs into swap rates or other composite rates transferring from LIBOR or another reference rate to SONIA.

The market or a significant part thereof may adopt an application of SONIA that differs significantly from that set out in the Terms and Conditions and used in relation to Securities referencing SONIA that are issued under the Programme. Furthermore, the Issuer may in future issue Securities referencing SONIA that differ materially in

terms of interest determination when compared with any previous SONIA-referenced Securities issued under the Programme. The nascent development of compounded daily SONIA as an interest reference rate for the Eurobond markets, as well as continued development of SONIA-based rates for such market and the market infrastructure for adopting such rates, could result in reduced liquidity or increased volatility or could otherwise affect the market price of any SONIA-referenced Securities issued under the Programme from time to time.

Furthermore, the Rate of Interest on Securities which reference compounded daily SONIA is only capable of being determined at the end of the relevant Interest Period prior to the relevant Interest Payment Date. It may be difficult for investors in Securities which reference compounded daily SONIA to estimate reliably the amount of interest which will be payable on such Securities, and some investors may be unable or unwilling to trade such Securities without changes to their IT systems, both of which factors could adversely impact the liquidity of such Securities. Further, in contrast to LIBOR-based Securities, if Securities referencing compounded daily SONIA are redeemed early and accrued interest is payable on such redemption in respect of a period which is not an Interest Period, the final Rate of Interest payable in respect of such Securities shall only be determined immediately prior to the due date for redemption.

In addition, the manner of adoption or application of SONIA reference rates in the Eurobond markets may differ materially compared with the application and adoption of SONIA in other markets, such as the derivatives and loan markets. Investors should carefully consider how any mismatch between the adoption of SONIA reference rates across these markets may impact any hedging or other financial arrangements which they may put in place in connection with any acquisition, holding or disposal of Securities referencing compounded daily SONIA.

To the extent the daily SONIA rate is discontinued or is no longer published on the SONIA Screen Page or published by authorised distributors, the applicable rate to be used to calculate the Interest Rate on Securities referencing SONIA will be determined using the fall-back provisions set out in the Terms and Conditions. Any of these fall-back provisions may result in interest payments that are lower than, or do not otherwise correlate over time with, the payments that would have been made on the Securities if the SONIA rate had been so published in its current form. In addition, use of the fall-back provisions may result in the effective application of a fixed rate of interest to the Securities.

Investors should carefully consider all of these matters when making their investment decision with respect to any such Securities.

#### Zero Coupon Securities

In the absence of periodical interest payments, Zero Coupon Securities are issued at a discount to their principal amount and redeem at their principal amount. The difference between the redemption amount and the purchase price of such Securities constitutes the return on the Securities. The price of such Securities will fall if the market interest rate is greater than the return at any point in time. The market prices of Zero Coupon Securities may be more volatile than the market price of Securities with a fixed rate of interest and are likely to respond to a greater degree to market interest rate movements than interest bearing Securities with a similar maturity.

#### Variable Interest Securities

Variable Interest Securities bear or pay interest at a rate that may at the election of the Issuer convert from one interest basis to another, for example from a fixed rate to a floating or other variable rate, or from a floating or other variable rate to a fixed rate. The Issuer's right to convert the interest rate will affect the secondary market in and the market value of, the Securities because the Issuer may be expected to elect to convert the rate when it is likely to produce a lower overall cost of borrowing. For example if the Issuer elects to convert the interest rate from a fixed rate to a floating or other variable rate, the spread on the Securities may be less favourable than the then prevailing spreads on comparable floating or other variable rate securities relating to the same reference rate. In addition, the new floating or other variable rate at any time may be lower than the interest rates payable on other securities. If the Issuer elects to convert the interest rate from a floating or other variable rate to a fixed rate, the fixed rate may be lower than the then prevailing interest rates payable on its securities.

Variable Interest Securities (which bear or pay interest on a variable basis (whether fixed to floating/variable, floating/variable to fixed or one floating/variable to another)) are distinguishable from variable rate interest securities which pay interest at a variable rate but not (unless otherwise stated) on a variable basis.

## Redemption

The Securities to be issued under the Programme may either be redeemed at maturity or prior to maturity. The redemption amount or early redemption amount, as the case may be, received by an investor may be either (i) par, (ii) below par or (iii) above par. The redemption amount may be in the form of either cash or physical settlement.

## Reference Items

This section relates to Securities issued in the form of Notes only.

As described in the section entitled "*Description of the Securities – Description of Interest Rate and Redemption Provisions*", Securities may be issued where the amount of interest payable or the amount payable, or, if "Physical Settlement" or "Physical Delivery" is specified as an applicable settlement method for the Securities in the applicable Final Terms (or Pricing Supplement, in the case of Exempt Securities), assets deliverable, on redemption are linked to one or more Reference Items. These Securities will derive some or all of their value by reference to one or more underlying assets or other bases of reference.

The purchase of, or investment in, Securities linked to Reference Item(s) involves substantial risks. These Securities are not conventional debt securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in these Securities should be familiar with securities having characteristics similar to such Securities and should fully review all documentation for and understand the Terms and Conditions of the Securities and the nature and extent of its exposure to risk of loss.

*By investing in such Securities each investor represents that:*

- (a) *Non-Reliance. It is acting for its own account, and it has made its own independent decisions to invest in the Securities and as to whether the investment in the Securities is appropriate or proper for it based upon its own judgement and upon advice from such advisers as it has deemed necessary. It is not relying on any communication (written or oral) of the Issuer or any Dealer as investment advice or as a recommendation to invest in the Securities, it being understood that information and explanations related to the terms and conditions of the Securities shall not be considered to be investment advice or a recommendation to invest in the Securities. No communication (written or oral) received from the Issuer or any Dealer shall be deemed to be an assurance or guarantee as to the expected results of the investment in the Securities.*
- (b) *Assessment and Understanding. It is capable of assessing the merits of and understanding (on its own behalf or through independent professional advice), and understands and accepts the terms and conditions and the risks of the investment in the Securities. It is also capable of assuming, and assumes, the risks of the investment in the Securities.*
- (c) *Status of Parties. Neither the Issuer nor any Dealer is acting as a fiduciary for or adviser to it in respect of the investment in the Securities.*

The Issuer may issue Securities where the amount of interest or principal payable or the amount of assets deliverable is dependent upon:

- (a) the price or changes in the price of, one or more equity securities;
- (b) the level or changes in the level of one or more indices;
- (c) movements in currency exchange rates and/or the circumstance that capital or interest payments are payable in one or more currencies different from the currency in which the Securities are denominated;

- (d) whether certain events have occurred in respect of one or more specified entities (each a "**Reference Entity**") and, for certain types of Securities, whether amounts would be received by a holder of specified assets of such Reference Entity; or

In relation to Exempt Securities the Issuer may issue, in addition to (a) to d) above, Securities where the amount of interest or principal payable or the amount of assets deliverable is dependent upon:

- (a) in the case of Exempt Securities, the price or changes in the price of one or more commodities;
- (b) in the case of Exempt Securities, the price or changes in the price of units or shares in one or more funds;
- (c) in the case of Exempt Securities, other underlying assets or bases of reference.

The Issuer may also issue Securities where the amount of interest or principal payable or the amount of assets deliverable is dependent upon more than one Reference Item.

Prospective investors in any such Securities should be aware that depending on the terms of such Securities (i) they may receive no or a limited amount of interest or principal and/or deliverable assets, (ii) payment of interest or principal and/or assets delivered may occur at different times than expected or in a different currency than expected and (iii) they may lose all or a substantial portion of their investment upon redemption.

In addition, the movements in:

- (a) the price of the equity securities in respect of Equity Linked Notes;
- (b) the level of the index or indices in respect of Index Linked Notes;
- (c) the level of the inflation index or inflation indices in respect of Inflation Index Linked Notes;
- (d) currency exchange rates in respect of Currency Linked Notes (Exempt Securities only) or other Securities whose terms include a currency exchange rate and/or payments of capital or interest payments being due in one or more currencies different from the currency in which the Securities are denominated;
- (e) the price of the commodity or commodities in respect of Commodity Linked Notes (Exempt Securities only);
- (f) the price of the units or shares in one or more funds in respect of Fund Linked Notes (Exempt Securities only);
- (g) the creditworthiness of each Reference Entity in respect of Credit Linked Notes; or
- (h) the movement in the level of any underlying asset or basis of reference (Exempt Securities only),

may be subject to significant fluctuations that may not correlate with changes in interest rates, currencies or other economic factors or indices and the timing of changes in the relevant price or level of the Reference Item may affect the actual yield to investors, even if the average level is consistent with their expectations. In general, the earlier the change in the price or level of the Reference Item, the greater the effect on yield.

If the amount of interest or principal payable and/or assets deliverable is determined by reference to a multiplier greater than one or by reference to some other leverage factor, the effect of changes in the price or level of the Reference Item will be magnified.

The market price of such Securities may be volatile and may be affected by:

- (a) the time remaining to the redemption date;

- (b) the volatility of the Reference Item or other underlying asset or basis of reference;
- (c) the dividend rate (if any) and the financial results and prospects of the issuer(s) of the equity securities in respect of Equity Linked Notes or the issuers of the equity securities comprised in an Index in respect of Index Linked Notes;
- (d) movements in exchange rates and the volatility of currency exchange rates in respect of Currency Linked Notes or other Securities whose terms include a currency exchange rate and/or payments of capital or interest payments being due in one or more currencies different from the currency in which the Securities are denominated; or
- (e) the volatility of the price of units or shares in the fund or funds in respect of Fund Linked Notes,

as well as economic, financial and political events in one or more jurisdictions, including factors affecting the exchange(s) or quotation system(s) on which any such commodities, fund units or shares or equities may be traded.

#### Equity Linked Notes

Equity linked redemption Notes may be redeemed by the Issuer by payment of the par value amount and/or, in the case of Exempt Securities, by the physical delivery of a given number of specified assets and/or by payment of an amount determined by reference to the value of one or more equity securities. Accordingly, an investment in equity linked redemption Notes may bear similar market risks to a direct equity investment and prospective investors should take advice accordingly. Equity linked interest Securities will bear or pay interest by reference to the value of one or more equity securities.

Equity Linked Notes may not benefit from the same ratings assigned to other Securities to be issued under the Programme. Investors should note that no specific rating for the Securities may have been applied for or sought.

#### *Corporate Actions and Events*

Equity Linked Notes may be subject to early redemption in the event of certain corporate actions or events occurring in respect of the issuer(s) of the equity security(ies). On such early redemption Securityholders will receive an early redemption amount equal to the fair market value of the Securities less Early Redemption Unwind Costs (see page 75 below). Unless the rules of the market or trading facility upon which the Securities are listed and admitted to trading require otherwise, the early redemption amount may be less than an investors' original investment and may in certain circumstances be zero.

#### *Disruption Provisions for Equity Linked Notes*

Where "Disrupted Day" is specified as applying in the applicable Final Terms (or Pricing Supplement, in the case of Exempt Securities), the Calculation Agent may determine that an event giving rise to a Disrupted Day has occurred at any relevant time. Any such determination may have an effect on the timing of valuation and consequently the value of the Securities and/or may delay payment, or in the case of equity linked redemption Notes, settlement in respect of the Securities.

Where equity linked redemption Exempt Securities provide for physical delivery, the Calculation Agent may determine that a Settlement Disruption Event is subsisting. A Settlement Disruption Event is an event beyond the control of the Issuer as a result of which, in the opinion of the Calculation Agent, delivery of the specified assets to be delivered by or on behalf of the Issuer is not practicable. Any such determination may affect the value of the Securities and/or may delay settlement in respect of the Securities.

#### Index Linked Notes

Index linked redemption Notes may be redeemed by the Issuer by payment of the par value amount and/or by payment of an amount determined by reference to the value of one or more indices. Accordingly, an investment in index linked redemption Notes may bear similar market risks to a direct investment in the components of the

Index comprising such index or indices and prospective investors should take advice accordingly. Index linked interest Securities will bear or pay interest calculated by reference to the value of one or more indices.

Index Linked Notes may not benefit from the same ratings assigned to other Securities to be issued under the Programme. Investors should note that no specific rating for the Securities may have been applied for or sought.

#### *Index Adjustment Events*

Index Linked Notes may be subject to early redemption following an Index Adjustment Event. An Index Adjustment Event can be either:

- (a) a failure to calculate and announce the relevant index by the index sponsor;
- (b) a material modification in the way that the relevant index is calculated from that originally intended; or
- (c) a permanent cancellation of the relevant index with no successor index.

On such early redemption, Securityholders will receive an early redemption amount equal to the fair market value of the Securities less Early Redemption Unwind Costs (see page 75 below). Unless the rules of the market or trading facility upon which the Securities are listed and admitted to trading require otherwise the early redemption amount may be less than an investors' original investment amount and may in certain circumstances be zero.

#### *Disruption Provisions for Index Linked Redemption Notes*

Where "Disrupted Day" is specified as applying in the applicable Final Terms (or Pricing Supplement, in the case of Exempt Securities), the Calculation Agent may determine that an event giving rise to a Disrupted Day has occurred at any relevant time. Any such determination may have an effect on the timing of valuation and consequently the value of the Securities and may delay settlement in respect of the Securities.

#### *Inflation Linked Notes*

Inflation index linked redemption Notes may be redeemed by the Issuer by payment of the par value amount and/or by payment of an amount determined by reference to the value of one or, in the case of Exempt Securities, more indices.

Index Linked Notes may not benefit from the same ratings assigned to other Securities to be issued under the Programme. Investors should note that no specific rating for the Securities may have been applied for or sought.

#### *Currency Linked Notes (Exempt Securities only)*

Currency linked redemption Notes may be redeemed by the Issuer by payment of the par value amount and/or by payment of an amount determined by reference to the rate of exchange between one or more currencies. Accordingly, an investment in currency linked redemption Notes may bear similar market risks to a direct currency investment and investors should take advice accordingly. Currency linked interest Securities will bear or pay interest calculated by reference to the rate of exchange between one or more currencies.

Currency Linked Notes may not benefit from the same ratings assigned to other Securities to be issued under the Programme. Investors should note that no specific rating for the Securities may have been applied for or sought.

#### *Commodity Linked Notes (Exempt Securities only)*

Commodity linked redemption Notes may be redeemed by the Issuer by payment of the par value amount or by payment of an amount determined by reference to the value of one or more commodities. Accordingly, an investment in commodity linked redemption Notes whose redemption is commodity linked may bear similar

market risks to a direct commodity investment and investors should take advice accordingly. Commodity linked interest Securities will bear or pay interest calculated by reference to the value of one or more commodities.

Commodity Linked Notes may not benefit from the same ratings assigned to other Securities to be issued under the Programme. Investors should note that no specific rating for the Securities may have been applied for or sought.

#### Fund Linked Notes (Exempt Securities only)

Fund linked redemption Notes may be redeemed by the Issuer by payment of the par value amount or by payment of an amount determined by reference to the value of one or more shares or units in a fund. Accordingly, an investment in fund linked redemption Notes may bear similar market risks to a direct fund investment and investors should take advice accordingly. Fund linked interest Securities will bear or pay interest calculated by reference to the value of one or more shares or units in a fund.

Fund Linked Notes may not benefit from the same ratings assigned to other Securities to be issued under the Programme. Investors should note that no specific rating for the Securities may have been applied for or sought.

#### *Market Disruption and Termination/Adjustment Provisions for Fund Linked Notes*

The market disruption and termination/adjustment provisions will vary on a case-by-case basis depending on the nature of the relevant fund. Prospective investors should review the relevant fund documentation and the applicable Pricing Supplement in respect of an issue of Fund Linked Notes.

#### Credit Linked Notes

##### *General*

Credit Linked Notes may only be governed by English law and may be redeemed by the Issuer by payment of the par value amount and/or by the physical delivery of a given number of specified assets and/or by payment of an amount depending on whether certain events ("**Credit Events**") have occurred in respect of one or more Reference Entities and, if so, on the value of certain specified assets of the Reference Entity(ies) or where, if such events have occurred, on redemption the Issuer's obligation is to deliver certain specified assets. Since the relevant assets will be issued, guaranteed or insured by the Reference Entity affected by the Credit Event, the value of such assets at the relevant time may be considerably less than would be the case if the Credit Event had not occurred.

In certain circumstances Credit Events may occur with respect to an entity other than the Reference Entity or an obligation which has not been directly issued or incurred by the Reference Entity (for example if the provisions taken from the ISDA Sukuk Transaction Types supplement apply to the Securities, a Credit Event may occur in respect of a Sukuk Issuer or an obligation issued by a Sukuk Issuer, being an entity which has recourse to the Reference Entity for the purposes of funding amounts due under certain of its instruments. Similarly, if the provisions taken from the ISDA LPN Reference Entities supplement applies to the Securities, a Credit Event may occur in respect of a LPN Issuer or an obligation of a LPN Issuer, being an entity which issues loan participation notes solely to provide funds to finance the Reference Entity). In addition, the relevant assets determined for settlement purposes may be obligations of an entity other than the Reference Entity (for example the Sukuk Issuer or LPN Issuer) and these risk factors will be construed accordingly.

Investors should note that each of the Credit Event Redemption Amount, any Asset Amount and any Cash Settlement Amount (if "Unwind Costs" is specified as applicable in the applicable Final Terms (or Pricing Supplement, in the case of Exempt Securities)) and any Early Redemption Amount will have deducted from it an amount equal to either (a) the amount specified in the relevant Final Terms (or Pricing Supplement, in the case of Exempt Securities) to be the unwind costs or (b) an amount determined by the Calculation Agent equal to the sum of (without duplication) all costs, fees, charges, expenses (including loss of funding), tax and duties incurred by the Issuer and/or any of its Affiliates in connection with the redemption of the Credit Linked Notes and the related termination, settlement or re-establishment of any hedge or related trading position, such amount to be apportioned *pro rata* amongst the Credit Linked Notes. Investors may therefore receive back less

than their initial investment or, in the case of redemption following the occurrence of a Credit Event, losses may be greater than if the investor were to hold obligations of the Reference Entity directly.

The market price of the Securities may be volatile and may be affected by, among other things, the creditworthiness of the Reference Entity (which in turn may be affected by the economic, financial and political events in one or more jurisdictions) and the time remaining until maturity.

#### *Credit Events*

Events that will constitute a "Credit Event" for these purposes are as specified in the applicable Final Terms (or Pricing Supplement, in the case of Exempt Securities) and, depending on which is specified as applicable in the applicable Final Terms (or Pricing Supplement in the case of Exempt Securities), as further described in Credit Linked Notes Annex A or Credit Linked Notes Annex B (each a "**Credit Linked Notes Annex**" and together the "**Credit Linked Notes Annexes**"). The Credit Events that apply to the Securities will be specified in the applicable Final Terms (or Pricing Supplement, in the case of Exempt Securities) and may include, without limitation, the occurrence of one or more of the following:

- (a) Bankruptcy - the Reference Entity goes bankrupt;
- (b) Failure to Pay - subject to a minimum threshold amount, the Reference Entity fails to pay any amounts due on any of its borrowings (including its bonds or loans) or, where applicable, guarantees (which, for the purposes of these risk factors, includes guarantees and insurance pursuant to a guarantee);
- (c) Obligation Acceleration - the Reference Entity defaults on a minimum amount of its borrowings (including its bonds or loans) or, where applicable, guarantees and as a result such obligations are accelerated;
- (d) Obligation Default - the Reference Entity defaults on a minimum amount of its borrowings (including its bonds or loans) or, where applicable, guarantees and as a result such obligations are capable of being accelerated;
- (e) Restructuring - following a deterioration of the Reference Entity's creditworthiness, any of its borrowings or, where applicable, guarantees, subject to a minimum threshold amount of such borrowings or, where applicable, guarantees, are restructured in such a way as to adversely affect a creditor (such as a reduction or postponement of the interest or principal payable on a bond or loan); and
- (f) Repudiation/Moratorium - (i) the Reference Entity repudiates or rejects, in whole or in part, its obligations in relation to its borrowings or, where applicable, its guarantees, or it declares or imposes a moratorium with respect to its borrowings or, where applicable, guarantees and (ii) thereafter within a certain period it fails to pay any amounts due on any of its borrowings (including its bonds or loans) or, where applicable, its guarantees, or it restructures any of its borrowings or, where applicable, guarantees in such a way as to adversely affect a creditor; and
- (g) if Credit Linked Notes Annex B applies to the Credit Linked Notes, Governmental Intervention – any of the Reference Entity's borrowings or, where applicable, guarantees are restructured in such a way as to adversely affect a creditor (such as a reduction or postponement of the interest or principal payable on a bond or loan), are expropriated or amended in such a way that the beneficial holder is changed or are mandatorily cancelled, converted or exchanged or any similar event occurs with respect thereto, in each case as a result of Governmental Authority action or announcement pursuant to or by means of a restructuring and resolution law or regulation (or similar).

Prospective investors should note that not all of the possible Credit Events require an actual default with respect to the obligations of a relevant Reference Entity. Securityholders could bear losses based on deterioration in the credit of any relevant Reference Entity(ies) short of a default, subject to the provisions set out in the applicable Final Terms (or Pricing Supplement, in the case of Exempt Securities).

### *Early Redemption upon Merger Event*

If applicable, in the event that in the determination of the Calculation Agent a Merger Event has occurred the Issuer may redeem the Credit Linked Notes early at the Early Redemption Amount.

### *Early Redemption on Redemption in whole of Reference Obligation for Reference Obligation Only Securities Relating to a Single Reference Entity*

If Credit Linked Notes Annex B applies and the Credit Linked Notes are Reference Obligation Only Securities relating to a single Reference Entity and the Reference Obligation is redeemed in whole, the Issuer will redeem the Credit Linked Notes early at the Early Redemption Amount.

### *ISDA Credit Derivatives Definitions*

This Prospectus contains Terms and Conditions for Credit Linked Notes some of which terms are based on the 2003 ISDA Credit Derivatives Definitions (as supplemented) (the "**2003 ISDA Definitions**") (see the section entitled "*Annexes to the Terms and Conditions - Credit Linked Notes Annex A*") and further Terms and Conditions for Credit Linked Notes some of which terms are based on the 2014 Credit Derivatives Definitions (the "**2014 ISDA Definitions**") (see the section entitled "*Annexes to the Terms and Conditions - Credit Linked Notes Annex B*"). While there are similarities between the terms used in such Annexes and the terms used in the 2003 ISDA Definitions or 2014 ISDA Definitions, as applicable, there are a number of differences (including, without limitation, whether or not Credit Derivatives Determinations Committee determinations are applicable (see further below), the operation of the credit protection period and, if auction settlement applies, the auction(s) which may be applicable on a M(M)R Restructuring Credit Event). In particular, the Issuer has determined that certain provisions of the Credit Derivatives Definitions, which are intended for use by market participants in "over the counter" transactions, require amendment when incorporated in the terms of an offering of securities such as the Credit Linked Notes. Therefore, a prospective investor should understand that the complete terms and conditions of the Credit Linked Notes are as set out in this Base Prospectus and the applicable Final Terms (or Pricing Supplement, in the case of Exempt Securities) and that neither the 2003 ISDA Definitions nor the 2014 ISDA Definitions are incorporated by reference herein. Consequently, investing in Credit Linked Notes is not necessarily equivalent to investing a credit default swap that incorporates either set of ISDA Definitions.

While ISDA has published and, where applicable, supplemented the 2003 ISDA Definitions and 2014 ISDA Definitions in order to facilitate transactions and promote uniformity in the credit derivatives market, the credit derivatives market has evolved over time and is expected to continue to change. Consequently, the 2003 ISDA Definitions and 2014 ISDA Definitions and the terms applied to credit derivatives, including Credit Linked Notes are subject to further evolution. Past events have shown that the view of market participants may differ as to how the Credit Derivatives Definitions operate or should operate. As a result of the continued evolution of the market, the Credit Linked Notes may not conform to future market standards. Such a result may have a negative impact on the Credit Linked Notes. Furthermore, there can be no assurances that changes to the terms applicable to credit derivatives generally will be predicable or favourable to the Issuer or the Securityholders.

### *Differences between the 2003 ISDA Definitions and the 2014 ISDA Definitions*

There are a number of important differences between the 2003 ISDA Definitions and the 2014 ISDA Definitions. In particular the 2014 ISDA Definitions have:

- (a) introduced a new Credit Event of "Governmental Intervention", which is intended to capture "bail-in" procedures to which financial institutions may be subject;
- (b) made certain amendments to the Restructuring Credit Event to provide for the possibility of a Euro exit;
- (c) reduced the number of buckets applicable in circumstances where Mod Mod R is applicable and deleted the concept of the "Enabling Obligation" which was previously applicable to both Mod R and Mod Mod R;

- (d) introduced the concept of Asset Package Delivery in respect of certain Financial Reference Entities and Sovereigns. This provides that if Deliverable Obligations are exchanged into non-Deliverable assets or written-down in part or in full, in certain circumstances, the credit protection buyer will be able to deliver the resultant package of Assets or the written-down Deliverable Obligation to realise its protection;
- (e) split credit protection between senior and subordinated coverage in respect of a Governmental Intervention and Restructuring Credit Event for Financial Reference Entities, *i.e.* a Senior Transaction will only be triggered by a Restructuring or Governmental Intervention of Senior Obligations and a Subordinated Transaction will not be capable of being triggered by a Restructuring or Governmental Intervention of an obligation which is Subordinated to the Subordinated Reference Obligation;
- (f) made a number of changes to the provisions for determining a Successor to a Reference Entity, particularly with respect to Financial and Sovereign Reference Entities;
- (g) provided for a new election of "Standard Reference Obligation" which, if chosen, will mean that the Reference Obligation will be the obligation of the relevant seniority level published in respect of the relevant Reference Entity on a List maintained by ISDA. A transaction on the terms of the 2014 ISDA Definitions may elect not to apply that election such that the Reference Obligation would remain as chosen by the parties, although, if this is the case, the procedure for selecting a Substitute Reference Obligation has also changed significantly in the 2014 ISDA Definitions;
- (h) replaced the Not Contingent Deliverable Obligation Characteristic with the concept of Outstanding Principal Balance. In order for an obligation (including the Reference Obligation) to constitute a Deliverable Obligation, it must have an Outstanding Principal Balance greater than zero;
- (i) amended the definition of "Qualifying Guarantee" to expand the universe of guarantees that can constitute Qualifying Guarantees (with a particular emphasis on including, to some extent, guarantees with caps or transfer provisions); and
- (j) introduced a large number of technical and other changes.

These changes in the 2014 ISDA Definitions as compared to the 2003 ISDA Definitions have been reflected in Credit Linked Notes Annex B, but in each case subject to important differences, including to reflect the nature of the Credit Linked Notes as compared to "over-the-counter" transactions and to reflect hedging arrangement of the Issuer. Some changes, such as the inclusion of a new Credit Event, may have significant economic effect on the Credit Linked Notes and may mean the value of the Credit Linked Notes and the return (if any) to investors is significantly different from Credit Linked Notes using Credit Linked Notes Annex A. Some changes may be disadvantageous to Securityholders and prospective investors should review carefully the terms of any issue of Credit Linked Notes and, where in any doubt, take advice from suitably qualified professional advisers.

#### *Credit Derivatives Determinations Committees and ISDA Auctions*

As further provided in the Credit Linked Notes Annexes, the determination as to whether or not a Credit Event has occurred may, if "DC Determinations" is specified as applicable in the applicable Final Terms (or Pricing Supplement in the case of Exempt Securities) be made on the basis of a determination of a committee established by ISDA pursuant to the 2009 ISDA Credit Derivatives Determinations Committees and Auction Settlement Supplement to the 2003 ISDA Definitions (published on 12 March 2009) (the "**2009 Supplement**") for the purposes of making certain determinations in connection with credit derivative transactions (a "**Credit Derivatives Determinations Committee**").

In such circumstances the relevant determination pursuant to the terms and conditions of the Credit Linked Notes is subject to the announcements, publications, determinations and resolutions made by ISDA and/or the Credit Derivatives Determinations Committees, unless the Calculation Agent determines that it is inappropriate to follow such announcements, publications, determinations and resolutions as provided therein (see the section entitled "*Disapplication of DC Resolution*" below).

Credit Derivatives Determinations Committees also apply under the 2014 ISDA Definitions and if Credit Linked Notes Annex B applies to the Credit Linked Notes and "DC Determinations" is specified as applicable in the

Final Terms (or Pricing Supplement, in the case of Exempt Securities), the determination as to whether or not a Credit Event has occurred may also be subject to the announcements, publications, determinations and resolutions made by those Credit Derivatives Determinations Committees (unless the Calculation Agent determines inappropriate).

Certain other determinations under the Credit Linked Notes, including without limitation determinations with respect to Successors and Substitute Reference Obligations, may also follow determinations and/or approvals of the relevant Credit Derivatives Determinations Committee (unless the Calculation Agent determines inappropriate).

In any such cases any such announcements, publications, determinations and resolutions could therefore affect the amount and timing of payments of interest on and principal of the Credit Linked Notes or deliveries pursuant to the terms of the Credit Linked Notes. The Issuer, the Dealer and no other related person will have any liability to any person for any determination or calculation and/or any delay or suspension of payments and/or redemption of the Credit Linked Notes resulting from or relating to any announcements, publications, determinations and resolutions made by ISDA and/or any of the Credit Derivatives Determinations Committees. Further information regarding the ISDA Credit Derivatives Determinations Committees can be found at [www.isda.org/credit](http://www.isda.org/credit).

In certain circumstances, following the occurrence of a Credit Event if the relevant Credit Derivatives Determinations Committee determines that one or more auctions will be held in accordance with any Credit Derivatives Auction Settlement Terms published by ISDA in relation to obligations of appropriate seniority of the Reference Entity (in the case of Credit Linked Notes to which Credit Linked Notes Annex A applies, applicable to credit derivatives transactions incorporating the 2009 Supplement or the case of Credit Linked Notes to which Credit Linked Notes Annex B applies, applicable to credit derivatives transactions incorporating the 2014 ISDA Definitions), Credit Linked Notes may be redeemed by the Issuer by payment of an amount linked to the value determined pursuant to the relevant auction. Investors should note that the value determined pursuant to such ISDA auction (if applicable) will be determined by reference to obligations of the Reference Entity which may not include the Reference Obligation and such value may be lower than the market value that would otherwise have been determined in respect of the Reference Obligation. In addition, if the Credit Event is a Restructuring Credit Event, in certain circumstances the ISDA auction determined to be applicable may be for obligations of the Reference Entity of considerably longer tenor than the Reference Obligation, and as a result it is very likely that the value determined pursuant to such ISDA auction will be lower than the market value that would otherwise have been determined in respect of the Reference Obligation.

Prospective investors should note that Deutsche Bank or an affiliate of Deutsche Bank may be a member of the Credit Derivatives Determinations Committee responsible for determining the occurrence of Credit Events for the purposes of certain credit derivatives transactions. This may cause conflicts of interest which could affect its voting behaviour, and thus the determinations made by a Credit Derivatives Determinations Committee, which may be detrimental to investors.

Any references in these "*Credit Linked Notes*" risk factors to ISDA will include any other entity which succeeds to or is performing functions previously undertaken by ISDA in relation to Credit Derivatives Determinations Committees and references to Credit Derivatives Determinations Committees in relation to ISDA will include any successor thereto. The Calculation Agent may make such adjustments to the Credit Conditions and the applicable Final Terms (or Pricing Supplement, in the case of Exempt Securities) as it determines appropriate to account for any other entity so succeeding to or performing functions previously undertaken by ISDA.

If a Reference Obligation is a subordinated debt obligation, investors in the Securities should be aware that, on the occurrence of a Credit Event, the value of that Reference Obligation or the value determined pursuant to the ISDA auction in respect of obligations of appropriate seniority (being subordinated obligations) and (if the Credit Event is a restructuring) tenor of the relevant Reference Entity, as applicable, will be less than that of senior unsecured obligations of the Reference Entity and therefore the amount (if any) payable to investors in the Securities on redemption following a Credit Event will be lower (and is more likely to be zero) than if that Reference Obligation were a senior unsecured obligation.

### *Disapplication of DC Resolution*

The Calculation Agent may in certain circumstances taking into account the differences between the 2003 ISDA Definitions or 2014 ISDA Definitions, as applicable, and the terms of the Credit Linked Notes and such other factor(s) as it deems appropriate, determine that a DC Resolution is inappropriate to follow for the purposes of the Credit Linked Notes including in relation to the determination of whether a Credit Event has occurred and the determination of a Successor.

### *Amendment of Terms in Accordance with Market Convention*

The Calculation Agent may from time to time amend the terms of the Credit Linked Notes in any manner which the Calculation Agent determines in a commercially reasonable manner is necessary or desirable from the perspective of the Issuer, the Calculation Agent or any Affiliate of the Issuer hedging the Issuer's obligations in respect of the Securities:

- (i) to incorporate and/or reflect further or alternative documents or protocols from time to time published by ISDA with respect to the documentation, trading or settlement of credit derivative transactions and/or the operation or application of determinations by the ISDA Credit Derivatives Determinations Committees; and/or
- (ii) to reflect or account for market practice for credit derivative transactions.

### *Physically Settled Credit Linked Notes*

Where the Securities provide for physical delivery, the Issuer may determine that the specified assets to be delivered are either (a) assets which for any reason (including, without limitation, failure of the relevant clearance system or due to any law, regulation, court order or market conditions or the non-receipt of any requisite consents with respect to the delivery of assets which are loans) it is impossible or illegal to deliver on the Settlement Date or (b) assets which the Issuer and/or any Affiliate has not received under the terms of any transaction entered into by the Issuer and/or such Affiliate to hedge the Issuer's obligations in respect of the Securities. Any such determination may delay settlement in respect of the Securities and/or cause the obligation to deliver such specified assets to be replaced by an obligation to pay a cash amount which, in either case, may affect the value of the Securities and, in the case of payment of a cash amount, will affect the timing of the valuation of such Securities and as a result, the amount of principal payable on redemption. Prospective purchasers should carefully review the Terms and Conditions of the Securities and the applicable Final Terms (or Pricing Supplement, in the case of Exempt Securities) to ascertain whether and how such provisions should apply to the Securities.

### *No Investigation or Due Diligence of Reference Entities*

No investigation, due diligence or other enquiries have been made by the Issuer, any Dealer or any other related person in respect of any Reference Entity (including its existing or future creditworthiness) or any Reference Obligation, Obligation, Deliverable Obligation or other obligations of the Reference Entity (as applicable). No representations, warranties or undertakings whatsoever have been or will be made by the Issuer, any Dealer or any other related person in respect of the Reference Entity (including its existing or future creditworthiness) or any Reference Obligation, Obligation, Deliverable Obligation or other obligations of the Reference Entity (as applicable). Prospective investors in Credit Linked Notes should make their own evaluation as to the creditworthiness of each Reference Entity and the likelihood of the occurrence of a Credit Event.

### *Sovereign Reference Entities*

Credit Linked Notes may be linked to the credit of one or more sovereign or governmental entity or quasi-governmental entity, and therefore payment of amounts due or delivery of any assets pursuant to the terms and conditions of the Credit Linked Notes, including any applicable interest payments, may be subject to sovereign risks. These include the potential default by such sovereign, government/quasi government issuer or the occurrence of political or economic events resulting in or from governmental action such as the declaration of a moratorium on debt repayment or negating repayment obligations of the sovereign issuer. If any such event

were to occur, holders of such Credit Linked Notes may lose up to all of their initial investment in such Credit Linked Notes.

#### *No Claim against any Reference Entity*

A Credit Linked Note will not represent a claim against any Reference Entity in respect of which any amount of principal and/or interest payable or, if "Physical Delivery" is specified as an applicable settlement method for the Credit Linked Notes in the applicable Final Terms (or Pricing Supplement, in the case of exempt Securities), the amount of assets deliverable in respect of the Credit Linked Notes, is dependent and, in the event that the amount paid by the Issuer or value of the specified assets delivered on settlement of the Credit Linked Notes is less than the principal amount of the Credit Linked Notes, a Securityholder will not have recourse under a Credit Linked Note to the Issuer or any Reference Entity.

An investment in Credit Linked Notes linked to one or more Reference Entities may entail significant risks which are not associated with investments associated with conventional debt securities, including but not limited to the risks set out in this section. The amount paid or value of the specified assets delivered by the Issuer on redemption or settlement of such Credit Linked Notes may be less than the principal amount of the Credit Linked Notes, together with any accrued interest, and may in certain circumstances be zero.

#### *No Exposure to Reference Entities*

The Issuer's obligations in respect of Credit Linked Notes are irrespective of the existence or amount of the Issuer's and/or any affiliates' credit exposure to a Reference Entity and the Issuer and/or any affiliate need not suffer any loss nor provide evidence of any loss as a result of the occurrence of a Credit Event.

#### *Postponed Maturity Date*

Where Conditions to Settlement have not been satisfied (in the case of Credit Linked Notes to which Credit Linked Notes Annex A applies) or a Credit Event Determination Date has not occurred (in the case of Credit Linked Notes to which Credit Linked Notes Annex B applies) in each case on or prior to the Scheduled Maturity Date but (a) the Repudiation/Moratorium Extension Condition has been satisfied, (b) a Potential Failure to Pay has occurred or (c) if on the Scheduled Maturity Date, the Repudiation/Moratorium Evaluation Date or the Grace Period Extension Date (as applicable) the Calculation Agent determines that a Credit Event may have occurred or a Potential Repudiation/Moratorium may have occurred, the relevant Maturity Date of the Credit Linked Notes may be extended pursuant to the terms and conditions of the Credit Linked Notes such that investors may experience delays in receipt of payments or deliveries that would otherwise have occurred in accordance with the terms of the Credit Linked Notes.

#### *Other Types of Credit Linked Notes*

Credit Linked Notes may also be "**first to default credit linked securities**" which refers to the exposure to the credit risk of a basket of Reference Entities. Where a Credit Event occurs in relation to a Reference Entity and Conditions to Settlement are satisfied (in the case of Credit Linked Notes to which Credit Linked Notes Annex A applies) or a Credit Event Determination Date occurs (in the case of Credit Linked Notes to which Credit Linked Notes Annex B applies), the Securities may be redeemed by the Issuer as set out above but Conditions to Settlement may only be satisfied or a Credit Event Determination Date may only occur, as applicable, on one occasion, unless the Calculation Agent delivers a Credit Event Notice in respect of only part of the principal amount outstanding of each Security, in which case Conditions to Settlement may be satisfied or a Credit Event Determination Date may occur, as applicable, on a further occasion and in respect of any Reference Entity. If Conditions to Settlement are satisfied or a Credit Event Determination Date occurs, as applicable, in respect of more than one Reference Entity on the same date, the Calculation Agent will determine which Reference Entity is the Reference Entity in respect of which Conditions to Settlement are satisfied or the Credit Event Determination Date has occurred. The basket of Reference Entities increases the likelihood that a Credit Event may occur prior to the maturity date of the Securities.

The Issuer may issue "**Portfolio Credit Linked Securities**" which are Credit Linked Notes linked to the performance of a portfolio of Reference Entities. Under Portfolio Credit Linked Notes the amount of principal and interest (if any) payable by the Issuer is dependent on whether a Credit Event in respect of one or more of

Reference Entities has occurred. Where such Securities are "zero recovery" Portfolio Credit Linked Notes, the loss suffered by investors on a Credit Event occurring in respect of a Reference Entity will be equal to the entire weighting of that Reference Entity in the portfolio.

The Issuer may issue "**Single Name Zero Recovery Credit Linked Securities**" which are Credit Linked Notes linked to the performance of a single Reference Entity under which if a Credit Event occurs in respect of the Reference Entity, the Credit Linked Notes will cease to pay interest and will be cancelled at zero and investors will lose their entire investment.

The Issuer may issue "**Fixed Recovery Securities**" which are Credit Linked Notes where the amount payable on redemption of the Securities following the occurrence of a Credit Event is fixed.

The amount of interest payable on Credit linked interest Notes will depend on whether or not a Credit Event has occurred in respect of one or more Reference Entities.

The Issuer may also issue "**pass-through Securities**" which are Credit Linked Notes under which the amount of interest and/or principal (in each case if any) payable is dependent on amount(s) paid under a "holding" of specified obligations of the Reference Entity. Further risk factors in relation to EM Pass-Through Securities, a type of pass-through Securities, are set out below. Other types of pass-through Securities will be Exempt Securities.

#### *EM Pass-Through Securities*

EM Pass-Through Securities are credit-linked to the performance of the Reference Entity and Obligations of the Reference Entity (including the Reference Obligation comprising the Holding) and currency linked to the convertibility of the currency in which the Securities are denominated from or into the Specified Currency of the Securities and early redemption of the Securities may be triggered through certain events which are linked to the performance and creditworthiness of the Reference Entity. Investors should note that the amounts payable by the Issuer in respect of the Securities are linked to the value of and amounts that would be received by a Holding Party in respect of the Holding (and therefore such amounts as they would be reduced by deductions for withholding taxes as applicable) and that in certain circumstances the Securities will not pay interest and the amount paid to Securityholders on redemption may be less than the amounts paid by it in respect of the Securities and may in certain circumstances be zero.

Investors should also note that (a) if an Inconvertibility Event has occurred and is subsisting, in lieu of paying amounts in respect of the Securities in the Specified Currency, the Issuer may pay such amounts in the currency in which the Securities are denominated and (b) if it is unlawful, impossible, or otherwise impracticable for the Issuer to make payment of any such denomination currency amount, the Issuer may postpone payment of such amount.

#### *No Claim against any Reference Item*

A Security will not represent a claim against any Reference Item to which the amount of principal and/or interest payable, or, if "Physical Settlement" or "Physical Delivery" is specified as an applicable settlement method for the Securities in the applicable Final Terms (or Pricing Supplement, in the case of Exempt Securities), the amount of assets deliverable in respect of the Securities, is dependent and, in the event that the amount paid by the Issuer or value of the specified assets delivered on redemption of the Securities is less than the principal amount of the Securities, a Securityholder will not have recourse under a Security to the Issuer or any Reference Item.

An investment in Securities linked to one or more Reference Items may entail significant risks not associated with investments in conventional debt securities, including but not limited to the risks set out in this section "*Reference Items*". The amount paid or value of the specified assets delivered by the Issuer on redemption of such Securities may be less than the principal amount of the Securities, together with any accrued interest, and may in certain circumstances be zero.

## **Reference Rates**

As described in the section entitled "*Description of the Securities – Description of Interest Rate and Redemption Provisions*", Securities may be issued where the amount of interest payable or the amount payable on redemption are linked to a Reference Rate.

Securities where the amount of interest payable or the amount payable on redemption are linked to a Reference Rate can be volatile investments. Investors who purchase such Securities will be exposed to the risk of a fluctuating Reference Rate and consequently variable interest amounts or redemption amounts which cannot be pre-estimated. If such Securities are structured to include multipliers or other leverage factors, or caps or floors, or any combination of those features, the market value of those securities may be more volatile than that for securities that do not include these features.

## **RISK FACTORS RELATING TO CERTAIN FEATURES OF SECURITIES**

A wide range of Securities may be issued under the Programme. The Issuer may issue Securities which may have one or more of the features described below which contain particular risks for potential investors. The amount of interest and/or principal payable and/or the amount of assets deliverable may depend on these features alone and/or in combination with other features and Reference Items. Prospective investors should be aware that they may lose all or a substantial portion of their investment. A combination of more than one of the features outlined below may increase the volatility of the price of the Securities in the secondary market.

### **Inverse Variable Rate Securities**

The market value of Securities which bear or pay interest at a variable rate inversely linked to a specified reference rate typically is more volatile than the market value of other more conventional floating or other variable rate securities based on the same reference rate. These Securities are more volatile because an increase in the relevant reference rate not only decreases the interest rate payable on the Securities, but may also reflect an increase in prevailing interest rates, which may further adversely affect the market value of these Securities.

### **Capped Variable Rate Securities**

The maximum amount of interest payable in respect of Securities that bear or pay interest with a capped variable rate will equal the sum of the reference rate and any specified margin subject to a specified maximum rate. Consequently investors in these Securities will not benefit from any increase in the relevant reference rate if, when added to the specified margin, such resulting rate is equal to or greater than the maximum specified rate. The market value of these Securities would typically fall the closer the sum of the relevant reference rate and any margin is to the maximum specified rate. The yield of Securities with a capped variable rate may be considerably lower than that of similar Securities without a cap.

### **Securities whose Interest and/or Redemption Amount is Calculated by Reference to a Formula**

Where an issue of Securities references a formula in the applicable Terms and Conditions (which may be replicated in the applicable Final Terms or Pricing Supplement, in the case of Exempt Securities) or, in the case of Exempt Securities, the Pricing Supplement as the basis upon which the interest payable and/or the amount payable and/or assets deliverable on redemption is calculated potential investors should ensure that they understand the relevant formula and if necessary seek advice from their own financial adviser.

In addition the effects of the formula may be complex with respect to expected amounts of interest and/or amounts payable and/or assets deliverable on redemption and in certain circumstances may result in increases or decreases in these amounts.

### **Participation in Performance**

Where the amount of interest payable and/or amounts payable and/or assets deliverable on redemption of Securities may be determined by reference to a ratio greater than one, prospective investors should note that the effect of changes in the price or level of the floating rate or Reference Item(s) payable will be magnified.

Conversely, where the ratio is less than one, the effect will be reduced and investors will not benefit (as applicable) from the full performance of the floating rate or Reference Item(s).

### **Securities Issued at a Substantial Discount or Premium**

The market value of securities issued at a substantial discount or premium from their principal amount tend to fluctuate more in relation to general changes in interest rates than do prices for conventional interest-bearing securities. Generally, the longer the remaining term of the securities, the greater the price volatility as compared to conventional interest-bearing securities with comparable maturities.

### **Partly-paid Securities (Exempt Securities only)**

The Issuer may issue Securities (except within the United States or to U.S. persons) where the issue price is payable in more than one instalment. Failure to pay any subsequent instalment could result in an investor losing all of its investment.

### **Securities Subject to Optional Redemption by the Issuer**

Securities which include a redemption option by the Issuer are likely to have a lower market value than similar securities which do not contain an Issuer redemption option. An optional redemption feature is likely to limit the market value of Securities. During any period when the Issuer may elect to redeem the Securities, the market value of those Securities generally will not rise substantially above the price at which they may be redeemed. This may also be the case prior to any redemption period.

The Issuer may be expected to redeem Securities when its cost of borrowing is lower than the interest rate on the Securities. At those times, an investor generally would not be able to reinvest the redemption proceeds at an effective interest rate as high as the interest rate on the Securities being redeemed and may only be able to do so at a significantly lower rate. Potential investors should consider reinvestment risk in light of other investments available at that time.

The applicable Final Terms (or Pricing Supplement, in the case of Exempt Securities) will indicate whether the Issuer has the right to redeem the Securities prior to maturity. The Issuer may exercise its right to redeem the Securities if the yield on comparable Securities in the market falls which may result in the investor only being able to invest the redemption proceeds in Securities with a lower yield. If specified in the applicable Final Terms (or Pricing Supplement, in the case of Exempt Securities), the Issuer will have the right to redeem the Securities, if the Issuer is required to gross-up payments as a result of the imposition of certain taxes. If the Issuer redeems the Securities prior to maturity, a holder of such Securities is exposed to the risk that as a result of such early redemption its investment will have a lower than expected yield.

### **Subordinated Notes**

The Issuer may issue Subordinated Notes. The obligations of the Issuer under Subordinated Notes constitute unsecured and subordinated obligations and will rank junior in priority of payment to unsubordinated obligations. In the event of insolvency or liquidation of the Issuer, such obligations will be subordinated to the claims of all unsubordinated creditors of the Issuer so that in any such event no amounts will be payable in respect of such obligations until the claims of all unsubordinated creditors of the Issuer have been satisfied in full. The Issuer expects from time to time to incur additional indebtedness or other obligations that will constitute senior indebtedness, and the Subordinated Notes do not contain any provisions restricting the Issuer's ability to incur senior indebtedness. Although the Subordinated Notes may pay a higher rate of interest than comparable Securities which are not so subordinated, there is a real risk that an investor will lose all or some of its investment should the Issuer become insolvent since its assets would be available to pay such amounts only after all of its senior creditors have been paid in full.

Subordinated Notes are intended to qualify as Tier 2 capital instruments within the meaning of Article 63 of the Regulation (EU) No 575/2013 of the European Parliament and of the Council of 26 June 2013 on prudential requirements for credit institutions and investment firms and amending Regulation (EU) No 648/2012, as amended by the Regulation (EU) No. 2019/876 of the European Parliament and of the Council of 20 May 2019 (including any provisions of regulatory law supplementing this Regulation) ("**CRR**"); to the extent that any

provisions of the CRR are amended or replaced, the term "CRR" shall refer to such amended provisions or successor provisions.

In the context of a Regulatory Bail-in the Subordinated Notes will be written down or converted to common equity tier 1 capital instruments of the Issuer before any non-subordinated liabilities of the Issuer are affected by such measures. Accordingly, trading behaviour in respect of the Subordinated Notes may not follow the trading behaviour associated with other types of securities.

The Issuer may redeem all, but not some, of the Subordinated Notes at its option at any time prior to maturity upon the occurrence of certain regulatory events. If the Issuer redeems the Subordinated Notes, holders of such Securities may not be able to reinvest the amounts they receive upon redemption at a rate that will provide the same rate of return as did the investment in the Subordinated Notes.

In the event of the dissolution, liquidation, insolvency, composition or other proceedings for the avoidance of insolvency of, or against, the Issuer, the obligations under the Subordinated Notes will be fully subordinated to the claims of other unsubordinated creditors of the Issuer. Accordingly, in any such event no amounts shall be payable in respect of the Subordinated Notes until in any such event no amounts shall be payable in respect of the Subordinated Notes until the claims of such other unsubordinated creditors of the Issuer have been satisfied in full. Accordingly, the Securityholder's rights under the Securities will rank behind all unsubordinated creditors of the Issuer in the event of the insolvency or liquidation of the Issuer. The Issuer's payment obligations under the Securities will rank *pari passu* amongst themselves and with all claims in respect of existing and future instruments classified as Tier 2 capital (*Ergänzungskapital*) of the Issuer and the payment of interest payments thereunder.

The only remedy against the Issuer available to Securityholders for recovery of amounts which have become due in respect of the Subordinated Notes will be the institution of legal proceedings to enforce payment of the amounts. In an insolvency or liquidation of the Issuer, any Securityholder may only claim amounts due under the Subordinated Notes after the Issuer has discharged or secured in full (*i.e.* not only with a quota) all claims that rank senior to the Subordinated Notes.

### **Integral Multiples of the Specified Denomination**

If Securities are issued in one or more integral multiples of a minimum Specified Denomination plus one or more higher integral multiples of another smaller amount, it is possible that such Securities may be traded in amounts in excess of the minimum Specified Denomination that are not integral multiples of such minimum Specified Denomination. In such a case a holder who, as a result of trading such amounts, holds an amount which is less than such minimum Specified Denomination in its account with the relevant clearing system would not be able to sell the remainder of such holding without first purchasing a principal amount of Securities at or in excess of the minimum Specified Denomination such that its holding amounts to a Specified Denomination. Further, a holder who, as a result of trading such amounts, holds an amount which is less than the minimum Specified Denomination in its account with the relevant clearing system at the relevant time may not receive a definitive Security in respect of such holding (should definitive Securities be printed) and would need to purchase a principal amount of Securities at or in excess of the minimum Specified Denomination such that its holding amounts to Specified Denomination.

If definitive Securities are issued, holders should be aware that definitive Securities which have a denomination that is not an integral multiple of the minimum Specified Denomination may be illiquid and difficult to trade.

### **RISK FACTORS RELATING TO SECURITIES GENERALLY**

Set out below is a brief description of certain risks relating to the Securities generally:

#### **Modification and Waivers**

Meetings of Securityholders may be called to consider their interests generally either (a) in the case of English law governed Securities, pursuant to the Terms and Conditions of the Securities; and (b) in the case of German law governed Securities, in accordance with and subject to the German Bond Act (*Schuldverschreibungsgesetz*). At such meetings a defined majority of Securityholders may bind all

Securityholders, including Securityholders who did not attend and vote at the relevant meeting and Securityholders who voted in a manner contrary to the majority.

In respect of English law governed Securities, the Terms and Conditions of the Securities also provide that the Fiscal Agent and the Issuer may, without the consent of Securityholders, agree to (a) any modification (subject to certain specific exceptions) of the Securities, the Coupons or the Receipts or the Agency Agreement which is not prejudicial to the interests of the Securityholders or (b) any modification of the Securities, the Coupons, the Receipts or the Agency Agreement which is of a formal, minor or technical nature or is made to correct a manifest error or proven error or to comply with mandatory provisions of law.

## **Taxation**

Potential purchasers and sellers of Securities should be aware that they may be required to pay stamp taxes or other documentary charges in accordance with the laws and practices of the country where the Securities are transferred and/or any asset(s) are delivered.

Potential purchasers who are in any doubt as to their tax position should consult their own independent tax advisers. In addition, potential purchasers should be aware that tax regulations and their application by the relevant taxation authorities change from time to time. Accordingly, it is not possible to predict the precise tax treatment which will apply at any given time.

## **No Tax Gross-Up in Respect of Certain Series of Securities**

If the applicable Final Terms (or Pricing Supplement, in the case of Exempt Securities) specify that no withholding tax gross-up is applicable, the Issuer is not obliged to gross up any payments in respect of the Securities and all amounts payable in respect of the Securities shall be made with such deduction or withholding of taxes duties or governmental charges of any nature whatsoever imposed, levied or collected by way of deduction or withholding, if such deduction or withholding is required by law (including pursuant to an agreement described in Section 1471(b) of the U.S. Internal Revenue Code of 1986 (the "**Code**") or otherwise pursuant to Sections 1471 through 1474 of the Code and any regulations or agreements thereunder or official interpretations thereof ("**FATCA**") or pursuant to any law implementing an intergovernmental approach thereto).

## **U.S. Foreign Account Tax Compliance Act Withholding**

While the Securities issued by a branch or office outside the United States ("**Non-U.S. Securities**") are in global form and held within Euroclear Bank SA/NV or Clearstream Banking S.A., Luxembourg (together, the "**ICSDs**"), Clearstream Banking AG, Frankfurt ("**CBF**") or SIX SIS AG, Olten, Switzerland ("**SIS**"), in all but the most remote circumstances, it is not expected that the new reporting regime and potential withholding tax imposed by FATCA will affect the amount of any payment received by the ICSDs, CBF or SIS, as applicable (see the section entitled "*Taxation – United States – Foreign Account Tax Compliance Act*"). However, FATCA may affect payments made to custodians or intermediaries in the subsequent payment chain leading to the ultimate investor if any such custodian or intermediary generally is unable to receive payments free of FATCA withholding. It also may affect payment to any ultimate investor that is a financial institution that is not entitled to receive payments free of withholding under FATCA, or an ultimate investor that fails to provide its broker (or other custodian or intermediary from which it receives payment) with any information, forms, other documentation or consents that may be necessary for the payments to be made free of FATCA withholding. Investors should choose the custodians or intermediaries with care (to ensure each is compliant with FATCA or other laws or agreements related to FATCA) and provide each custodian or intermediary with any information, forms, other documentation or consents that may be necessary for such custodian or intermediary to make a payment free of FATCA withholding. Investors should consult their own tax adviser to obtain a more detailed explanation of FATCA and how FATCA may affect them. The Issuer's obligations under the Non-U.S. Securities are discharged once it has made payment to, or to the order of, the common depository or common safekeeper for the ICSDs (as bearer or registered holder of the Non-U.S. Securities) or CBF or SIS and the Issuer has therefore no responsibility for any amount thereafter transmitted through the ICSDs, CBF or SIS and custodians or intermediaries.

Payments on Securities issued by Deutsche Bank AG, New York Branch may be subject to withholding under FATCA if the Holder, beneficial owner or an intermediary in the chain of payments is not compliant with FATCA.

The Issuer will have no obligation to pay Additional Amounts or otherwise indemnify a Securityholder in connection with any such non-compliance.

### **Hiring Incentives to Restore Employment Act Withholding**

The U.S. Hiring Incentives to Restore Employment Act imposes a 30 per cent. withholding tax on amounts attributable to U.S. source dividends that are paid or "deemed paid" under certain financial instruments if certain conditions are met. If the Issuer or any withholding agent determines that withholding is required, neither the Issuer nor any withholding agent will be required to pay any additional amounts with respect to amounts so withheld. Prospective investors should refer to the section "*Taxation – United States – Hiring Incentives to Restore Employment Act*".

### **Early Redemption Unwind Costs**

Prospective investors should note that, if so specified in the applicable Final Terms (or Pricing Supplement, in the case of Exempt Securities), the Early Redemption Amount in respect of certain Series of Securities will include a deduction in respect of Early Redemption Unwind Costs. If the Early Redemption Unwind Costs are stated to be Standard Early Redemption Costs, then such amount will comprise an amount determined by the Calculation Agent equal to the sum of (without duplication) of all costs, expenses (including loss of funding), tax and duties incurred by the Issuer in connection with the redemption of the Securities and the related termination, settlement or re-establishment of any hedge or related trading position.

### **Hedging**

In the ordinary course of its business, including without limitation in connection with its market making activities, the Issuer and/or any of its affiliates may effect transactions for its own account or for the account of its customers and hold long or short positions in Reference Item(s) or related derivatives. In addition, in connection with the offering of the Securities, the Issuer and/or any of its affiliates may enter into one or more hedging transactions with respect to the Reference Item(s) or related derivatives. In connection with such hedging or market-making activities or other trading activities by the Issuer and/or any of its affiliates, the Issuer and/or any of its affiliates may enter into transactions in the Reference Item(s) or related derivatives which may affect the market price, liquidity or value of the Securities and which could be adverse to the interests of the relevant Securityholders.

### **Conflicts of Interest**

Where the Issuer acts as Calculation Agent or the Calculation Agent is an affiliate of the Issuer, potential conflicts of interest may exist between the Calculation Agent and Securityholders, including with respect to certain determinations and judgements that the Calculation Agent may make pursuant to the Securities that may influence the amount receivable or specified assets deliverable on redemption of the Securities.

The Issuer and any Dealer may at the date hereof or at any time hereafter, be in possession of information in relation to a Reference Item that is or may be material in the context of the Securities and may or may not be publicly available to Securityholders. There is no obligation on the Issuer or any Dealer to disclose to Securityholders any such information.

The Issuer and/or any of its affiliates may have existing or future business relationships with any Reference Item(s) (including, but not limited to, lending, depositary, risk management, advisory and banking relationships), and will pursue actions and take steps that they or it deems necessary or appropriate to protect their and/or its interests arising therefrom without regard to the consequences for a Securityholder.

### **Substitution of the Issuer**

Subject to certain requirements, the Terms and Conditions contain provisions allowing for substitution of the Issuer or a change of the office (*Niederlassung*) through which the Issuer acts. Without prejudice to the requirements of any jurisdiction where any Securities are admitted to trading, for so long as any substitution of the Issuer or the office through which the Issuer acts may be subject to certain further conditions or requirements of such Stock Exchange or regulated market. Where any further conditions or requirements apply

and the Issuer wishes to substitute itself or change the branch through which the Issuer acts, the Issuer may delist the relevant Securities from the relevant Stock Exchange or regulated market and is not obliged to list the Securities on any other Stock Exchange or regulated market.

### **Regulatory Bail-in and Other Resolution Measures**

On 15 May 2014, the European Parliament and the Council of the European Union adopted Directive 2014/59/EU establishing a framework for the recovery and resolution of credit institutions and investment firms (commonly referred to as the "Bank Recovery and Resolution Directive" or the "**BRRD**") which was transposed into German law by the Recovery and Resolution Act (*Sanierungs- und Abwicklungsgesetz*, or the "**SAG**") with effect from 1 January 2015. For banks established in the eurozone, such as the Issuer, which are supervised within the framework of the Single Supervisory Mechanism (the "**SSM**"), Regulation (EU) No 806/2014 of the European Parliament and of the Council (the "**SRM Regulation**") provides for a coherent application of the resolution rules across the SSM under responsibility of the European Single Resolution Board, with effect since 1 January 2016 (referred to as the "Single Resolution Mechanism" or the "**SRM**"). Under the SRM, the Single Resolution Board is responsible for adopting resolution decisions in close cooperation with the European Central Bank, the European Commission, and national resolution authorities in the event that a significant bank directly supervised by the European Central Bank, such as the Issuer, is failing or likely to fail and certain other conditions are met. National resolution authorities in the European Union member states concerned would implement such resolution decisions adopted by the Single Resolution Board in accordance with the powers conferred on them under national law transposing the BRRD.

If the competent authority determines that the Issuer is failing or likely to fail and certain other conditions are met (as set forth in the SRM Regulation, the SAG and other applicable rules and regulations), the competent resolution authority has the power to write down, including to write down to zero, claims for payment of the principal, interest or any other amount in respect of the Notes, to convert the Notes into ordinary shares or other instruments qualifying as common equity tier 1 capital (the write-down and conversion powers are hereinafter referred to as the "**Bail-in tool**"), or to apply any other resolution measure including (but not limited to) a transfer of the Notes to another entity, a variation of the terms and conditions of the Notes (including, but not limited to, the variation of maturity of the Notes) or a cancellation of the Notes. The Bail-in tool and each of these other resolution measures are hereinafter referred to as a "**Resolution Measure**". The competent resolution authority may apply Resolution Measures individually or in any combination.

The competent resolution authority will have to exercise the Bail-in tool in a way that results in (i) common equity tier 1 instruments (such as ordinary shares of the Issuer) being written down first in proportion to the relevant losses, (ii) subsequently, the principal amount of other capital instruments (additional tier 1 instruments and tier 2 instruments) being written down on a permanent basis or converted into common equity tier 1 instruments in accordance with their order of priority and (iii) finally, the Issuer's unsecured and unsubordinated liabilities (unless exempted by the SRM Regulation, the BRRD or the SAG) – such as those under the unsubordinated Notes – being written down on a permanent basis or converted into common equity tier 1 instruments in accordance with their order of priority under Section 46f(5)-(7) of the German Banking Act (*Kreditwesengesetz*, "**KWG**") as set out below (see *Risk factor "Ranking of senior non-preferred debt instruments"*)

The holders of Notes are bound by any Resolution Measure. They would have no claim or any other right against the Issuer arising out of any Resolution Measure. Depending on the Resolution Measure, there would be no obligation of the Issuer to make payments under the Notes. The extent to which payment obligations under the Notes may be affected by Resolution Measures would depend on a number of factors that are outside the Issuer's control, and it will be difficult to predict when, if at all, Resolution Measures will occur. The exercise of any Resolution Measure would not constitute any right to terminate the Notes. Potential investors should consider the risk that they may lose all of their investment, including the principal amount plus any accrued interest, if Resolution Measures are initiated, and should be aware that extraordinary public financial support for troubled banks, if any, would only potentially be used as a last resort after having assessed and exploited, to the maximum extent practicable, the Resolution Measures, including the Bail-in tool.

### **Ranking of senior non-preferred debt instruments**

The German Banking Act (*Kreditwesengesetz*, "**KWG**") establishes a category of notes which are not subordinated, but rank below other unsubordinated notes of banks (Section 46f(6) KWG). As a consequence, in the event of insolvency proceedings or Resolution Measures affecting the Issuer, these senior non-preferred debt instruments rank below other unsubordinated (senior preferred) obligations of the Issuer, such as debt instruments that are "structured" as defined in Section 46f(7) KWG, derivatives, money market instruments and deposits, and in priority to tier 2 instruments of the Issuer. Thus, such senior non-preferred debt instruments would bear losses before other unsubordinated liabilities of the Issuer.

Since 21 July 2018, only those unsecured and unsubordinated debt instruments will qualify as senior non-preferred debt instruments, which are not only "non structured" and have at the time of their issuance a maturity of at least one year, but also explicitly refer to the lower ranking in their terms and conditions and any related prospectus.

## **RISKS FACTORS RELATING TO THE MARKET GENERALLY**

Set out below is a brief description of certain market risks.

### **The Secondary Market Generally**

Securities may have no established trading market when issued, and one may never develop. If a market for the Securities does develop, it may not be very liquid and may be sensitive to changes in financial markets. Therefore, investors may not be able to sell their Securities easily or at prices that will provide them with a yield comparable to similar investments that have a developed secondary market. This is particularly the case should the Issuer be in financial distress, which may result in any sale of the Securities having to be at a substantial discount to their principal amount or for Securities that are especially sensitive to interest rate, currency or market risks, are designed for specific investment objectives or strategies or have been structured to meet the investment requirements of limited categories of investors. These types of Securities generally would have a more limited secondary market and more price volatility than conventional debt securities. Illiquidity may have a severely adverse effect on the market value of Securities.

### **Market Price Risk**

The market prices of the Securities depends on various factors, such as changes of interest rate levels, the policy of central banks, overall economic developments, inflation rates or the supply and demand for the relevant type of Security. The market price of the Securities may also be negatively affected by an increase in the Issuer's credit spreads, *i.e.* the difference between yields on the Issuer's debt and the yield of government bonds or swap rates of similar maturity. The Issuer's credit spreads are mainly based on its perceived creditworthiness but also influenced by other factors such as general market trends as well as supply and demand for such Securities.

### **Exchange Rate Risks and Exchange Controls**

The Issuer will pay principal and interest on the Securities in the Specified Currency. This presents certain risks relating to currency conversion if an investor's financial activities are denominated principally in a currency or currency unit (the "**Investor's Currency**") other than the Specified Currency. These include the risk that exchange rates may significantly change (including changes due to devaluation of the Specified Currency or revaluation of the Investor's Currency) and the risk that authorities with jurisdiction over the Investor's Currency may impose or modify exchange controls. An appreciation in the value of the Investor's Currency relative to the Specified Currency would decrease (a) the Investor's Currency-equivalent yield on the Securities, (b) the Investor's Currency equivalent value of the principal payable on the Securities and (c) the Investor's Currency equivalent market value of the Securities.

Government and monetary authorities may impose (as some have done in the past) exchange controls that could adversely affect an applicable exchange rate. As a result, investors may receive less interest or principal than expected, or no interest or principal.

In addition, there is the risk that the Specified Currency is or becomes illiquid and/or subject to currency restrictions including conversion restrictions and exchange controls imposed by authorities with jurisdiction over

the Specified Currency. The applicable Final Terms (or Pricing Supplement, in the case of Exempt Securities) may determine that payments under the Securities may be made in another currency as the Specified Currency due to certain currency restrictions or the illiquidity of the Specified Currency. In such cases the Securityholders could be exposed to specific risks connected to the currency in which payments are actually made. Investors may also suffer disadvantages and losses due to the circumstance that they do not receive payment in the Specified Currency, e.g. if amounts in the Specified Currency are needed to fulfil own payment obligations in the Specified Currency.

Such currency risks generally depend on factors over which the Issuer and the Securityholder have no control, such as economic and political events and the supply of and demand for the relevant currencies. In recent years, rates of exchange for certain currencies have been highly volatile, and such volatility may be expected to continue in the future. Fluctuations in any particular exchange rate that have occurred in the past are not necessarily indicative, however, of fluctuations in the rate that may occur during the term of any Security.

### **Currency Related Risks in Relation to Rouble**

There are risks associated with new debt instruments that are both denominated and settled in Roubles and the inexperience of both the Clearing Systems and the Russian and international banking systems in dealing with them.

The Securities may be denominated and settled in Russian Roubles. Offerings of debt instruments that are both denominated and settled in Russian Roubles are a relatively new development in the international capital markets. This, coupled with the relative inexperience of Euroclear France, Euroclear and Clearstream (the "**Clearing Systems**") and the Russian and international banking systems in dealing with Russian Roubles payments, could lead to unforeseen difficulties, which may have an adverse effect on the liquidity, marketability or trading price of the Securities.

In particular debt instruments that are both denominated and settled in Russian Roubles only became accepted by the Clearing Systems in early 2007. Due to the lack of experience of the Clearing Systems with settling, clearing and trading debt instruments that are both denominated and settled in Russian Roubles, there can be no guarantee that such clearing, settlement and trading procedures will progress smoothly or in a way which is comparable to procedures carried out in more conventionally settled currencies, such as U.S. Dollars or Euros.

Russian law previously prohibited or otherwise severely restricted the transfer and holding of Russian Roubles offshore and their repatriation onshore. Although these restrictions have now been lifted for non-residents (save for some restrictions which apply to the regime of residents' accounts held outside of the Russian Federation), there is still no specific tested framework under Russian law for transferring or holding Russian Roubles in offshore Russian Rouble accounts. As with much recent Russian legislation, there is extremely limited or non-existent regulatory or court practice in interpreting these regulations. If restrictions or prohibitions were placed on the transfer and holding of Russian Roubles offshore or if such legislation was reinterpreted by the Russian regulators or courts to the effect that restrictions were still deemed to apply to the transfer and holding of Russian Roubles offshore, this would severely hinder Securityholders' ability to receive payments of principal or interest under the Securities or proceeds from the sale of the Securities.

Payments of principal and interest under the Securities and proceeds from the sale of the Securities will be made in Russian Roubles. All payments of Russian Roubles to, from, or between Russian Roubles accounts located outside the Russian Federation will be made via onshore correspondent accounts within the Russian banking system. The Russian banking system is less developed than many of its Western counterparts and at present has little experience in dealing with payments relating to Eurobonds or similar international debt instruments. Consequently, there is a risk that payments of both principal and interest under the relevant Securities and proceeds from the sale of such Securities, which need to pass through the Russian banking system, will be subject to delays and disruptions which may not exist in more mature banking markets.

In order for Securityholders to remove Russian Roubles received from payments of principal and interest on the Securities and proceeds from the sale of the Securities from the Clearing Systems, they will need to hold a bank account denominated in Russian Roubles. The administrative difficulties associated with opening Russian Roubles accounts outside the Russian Federation are significant. Securityholders that are not resident in the Russian Federation may also encounter considerable procedural difficulties with opening Russian Roubles

accounts onshore in the Russian Federation. There can therefore be no guarantee that Securityholders will be able to successfully open a Russian Roubles bank account either offshore or in the Russian Federation or transfer Russian Roubles payments made under the Securities out of the Clearing Systems.

The Russian Rouble experienced significant depreciation against the U.S. dollar in 2014 and 2015, due to a substantial decrease in oil prices, slowing growth and contraction of Russia's gross domestic product, the imposition of economic sanctions and capital outflows. The Russian Rouble depreciated by 71.9 per cent. from RUB 32.73 per U.S.\$1.00 as of 31 December 2013 to RUB 56.26 per U.S.\$1.00 as of 31 December 2014. In 2015, the Russian Rouble / U.S.\$ exchange rate fluctuated significantly, ranging from RUB 49.18 per U.S.\$1.00 to RUB 72.88 per U.S.\$1.00. In 2017 and 2018, the Russian Rouble / U.S.\$ exchange rate experienced some stabilisation but remained volatile at certain times. The Russian Rouble amounted to RUB 65.4176 per U.S.\$1.00 on 2 April 2019.

Fluctuations in foreign currency exchange rates could have a material adverse effect on the value of an investor's investment in RUB.

### **Currency Related Risks in Relation to Turkish Lira**

The Turkish foreign exchange markets have historically been volatile, which has increased in recent periods. As a result of the rapid depreciation of the Turkish Lira over the first half of 2018, the Turkish government and monetary authorities announced measures to support the financial markets and prevent volatility in the currency market. Currently, there is no restriction on an investor receiving payments on those Securities denominated in Turkish Lira. However, Turkish government and monetary authorities may impose exchange controls that could adversely affect an applicable exchange rate or the ability of the Issuer to make payments in respect of the Notes. As a result, investors may receive less interest or principal than expected, or no interest or principal. An investor may also not be able to convert (at a reasonable exchange rate or at all) amounts received in Turkish Lira into the currency of its home jurisdiction.

### **Credit Ratings may not Reflect all Risks**

One or more independent credit rating agencies may assign credit ratings to the Securities. Where a Series of Securities is rated, such rating will not necessarily be the same as the rating assigned to the Securities to be issued under the Programme. The ratings may not reflect the potential impact of all risks related to structure, market, additional factors discussed above, and other factors that may affect the value of the Securities. A credit rating is not a recommendation to buy, sell or hold securities and may be revised or withdrawn by the rating agency at any time. Any ratings assigned to Securities as at the date of this Prospectus are not indicative of future performance of the Issuer's business or its future creditworthiness.

In general, European regulated investors are restricted under the CRA Regulation from using credit ratings for regulatory purposes, unless such ratings are issued by a credit rating agency established in the EU and registered under the CRA Regulation (and such registration has not been withdrawn or suspended, subject to transitional provisions that apply in certain circumstances). Such general restriction will also apply in the case of credit ratings issued by non-EU credit rating agencies, unless the relevant credit ratings are endorsed by an EU-registered credit rating agency or the relevant non-EU rating agency is certified in accordance with the CRA Regulation (and such endorsement action or certification, as the case may be, has not been withdrawn or suspended, subject to transitional provisions that apply in certain circumstances). The list of registered and certified rating agencies published by the European Securities and Markets Authority ("**ESMA**") on its website in accordance with the CRA Regulation is not conclusive evidence of the status of the relevant rating agency included in such list, as there may be delays between certain supervisory measures being taken against a relevant rating agency and the publication of the updated ESMA list."

### **Legal Investment Considerations may Restrict Certain Investments**

The investment activities of certain investors are subject to legal investment laws and regulations, or review or regulation by certain authorities. Each potential investor should consult its legal advisers to determine whether and to what extent (a) Securities are legal investments for it, (b) Securities can be used as collateral for various types of borrowing and (c) other restrictions apply to its purchase or pledge of any Securities. Financial

institutions should consult their legal advisers or the appropriate regulators to determine the appropriate treatment of Securities under any applicable risk-based capital or similar rules.

### **Certain Considerations Relating to Public Offers of Securities in Italy**

As described in the applicable Final Terms, Securities may be distributed by means of a public offer made during an offer period specified in the applicable Final Terms. During such offer period, the Issuer and/or any other person specified in the applicable Final Terms may reserve the right to cancel such offer and/or to scale back applications for such offer in the event of over-subscription. In such circumstances, an applicant investor may not be issued any Securities or may be issued a number of Securities which is less than the amount for which such applicant investor applied. Any payments made by an applicant investor for Securities that are not issued to such applicant investor for any such reason will be refunded. However, there will be a time lag in making any reimbursement, no interest will be payable in respect of any such amounts. The applicant investor may be subject to reinvestment risk.

Further, investors should note that, in certain circumstances, Securities may not be issued on the originally designated issue date, for example because either the Issuer and/or any other person specified in the applicable Final Terms has reserved the right to postpone such issue date or, following the publication of a supplement to this Prospectus the Issuer has decided to postpone such issue date to allow investors who had made applications to subscribe for Securities before the date of publication of such supplement to exercise their right to withdraw their acceptances. In the event that the issue date is so delayed, no interest shall accrue (if applicable) until the issue date of the Securities and no compensation shall be payable.

## GENERAL DESCRIPTION OF THE PROGRAMME

### GENERAL

#### Securities to be issued under the programme

The Programme allows for the issue of Notes and Pfandbriefe (together "**Securities**"). Securities may be issued as Non-Exempt Securities or Exempt Securities. "**Non-Exempt Securities**" means Securities which are to be admitted to trading on a regulated market for the purposes of MiFID II and/or offered in the European Economic Area (the "**EEA**") in circumstances where no exemption is available under Article 3.2 of Directive 2003/71/EC (as amended or superseded, the "**Prospectus Directive**") (as implemented in the relevant Member State(s)) and therefore where a prospectus is required to be published thereunder. "**Exempt Securities**" means Securities which are neither to be admitted to trading on a regulated market in the EEA nor offered in the EEA in circumstances where a prospectus is required to be published under the Prospectus Directive.

#### Non-Exempt Securities

The following types of Securities may be issued under the Programme as Non-Exempt Securities:

##### 1. Fixed Rate Securities and Zero Coupon Securities

If Fixed Rate or Zero Coupon Securities are issued as Notes, the terms and conditions of such Securities are set out in the set of Terms and Conditions for fixed rate Notes and zero coupon Notes ("**Option I**"), as described in more detail in the sections "*Issue Procedures*" and "*Terms and Conditions*". If Fixed Rate or Zero Coupon Notes are issued in registered form and not in bearer form (as described in "*Form*" below) the terms and conditions of such Securities are formed by both Option I and the terms and conditions set out in the section "*Registered Securities Annex*". If Fixed Rate or Zero Coupon Securities are issued as Pfandbriefe, the terms and conditions of such Securities are set out in the set of Terms and Conditions for fixed rate or zero coupon Pfandbriefe ("**Option III**"), as described in more detail in the sections "*Issue Procedures*" and "*Terms and Conditions*". Pfandbriefe cannot be issued in registered form. The other sets of Terms and Conditions available under the Programme, *i.e.* Options II to V in the case of Fixed Rate or Zero Coupon Notes, and Options I, II, IV and V in the case of Fixed Rate or Zero Coupon Pfandbriefe, respectively, are not relevant for Fixed Rate or Zero Coupon Securities.

##### 2. Floating Rate Securities

If Floating Rate Securities are issued as Notes, the terms and conditions of such Securities are set out in the set of Terms and Conditions for floating rate Notes ("**Option II**"), as described in more detail in the sections "*Issue Procedures*" and "*Terms and Conditions*". If Floating Rate Notes are issued in registered form and not in bearer form (as described in "*Form*" below) the terms and conditions of such Securities are formed by both Option II and the terms and conditions set out in the section "*Registered Securities Annex*". If Floating Rate Securities are issued as Pfandbriefe, the terms and conditions of such Securities are set out in the set of Terms and Conditions for floating rate Pfandbriefe ("**Option IV**"), as described in more detail in the sections "*Issue Procedures*" and "*Terms and Conditions*". Pfandbriefe cannot be issued in registered form. The other sets of Terms and Conditions available under the Programme, *i.e.* Options I, III, IV, and V in the case of Floating Rate Notes, and Options I, II, III, and V in the case of Floating Rate Pfandbriefe, respectively, are not relevant for Floating Rate Securities.

##### 3. Structured Notes

The Programme allows for Notes to be issued which are equity linked, index linked and/or inflation index linked in the form of (i) Equity Linked Redemption Notes, (ii) Equity Linked Interest Notes, (iii) Index Linked Redemption Notes, (iv) Index Linked Interest Notes and (v) Inflation Index Linked Interest Notes. The terms and conditions of such Structured Notes are set out in the set of Terms and Conditions for Structured Notes ("**Option V**"), as described in more detail in the sections "*Issue*

*Procedures*" and *"Terms and Conditions"*. Structured Notes cannot be issued as Pfandbriefe. If Structured Notes are issued in registered form and not in bearer form (as described in *"Form"* below) the terms and conditions of such Securities are formed by both Option V and the terms and conditions set out in the section *"Registered Securities Annex"*. The other sets of Terms and Conditions available under the Programme, *i.e.* Options I to IV are not relevant for Structured Notes.

#### **4. Credit Linked Notes**

The Programme allows for Notes to be issued which are credit linked in the form of Credit Linked Notes. Credit Linked Notes may only be governed by English law. The terms and conditions of Credit Linked Notes are set out in the applicable Credit Linked Notes Annex set out in the section *"Credit Linked Notes Annex A"* or in the section *"Credit Linked Notes Annex B"*, depending on which is specified as applicable in the applicable Final Terms (or Pricing Supplement, in the case of Exempt Securities) together with either Option I (if the Securities bear fixed rate interest), Option II (if the Securities bear floating rate interest) or Option V (if the Securities bear structured interest). If the Credit Linked Notes are issued in registered form and not in bearer form (as described in *"Form"* below) the terms and conditions of such Securities are formed by (i) the applicable Credit Linked Notes Annex, (ii) either Option I, Option II or Option V, and (iii) the terms and conditions set out in the section *"Registered Securities Annex"*. The other sets of Terms and Conditions available under the Programme, *i.e.* Options II to V (if the Securities bear fixed rate interest), Options I and III to V (if the Securities bear floating rate interest) or Options I to IV (if the Securities bear structured interest) are not relevant for Credit Linked Notes.

#### *Exempt Securities*

The same type of Securities described under 1. to 4. above may also be issued as Exempt Securities. Thus the description set out under 1. to 4. above also applies to Exempt Securities with regard to the terms and conditions of such Securities. The Programme furthermore allows the issue of additional types of Structured Securities which may only be issued as Notes which are Exempt Securities, *i.e.*

- Commodity Linked Notes;
- Currency Linked Notes;
- Fund Linked Notes; or
- other types of Securities agreed between the relevant Dealer or Lead Manager and the Issuer.

In addition to the options set out above the relevant Options and Annexes, respectively, there will also be further options depending on the applicable law or jurisdiction of the issuing branch.

#### *Governing law of the Securities*

Both Non-Exempt Securities and Exempt Securities may be governed by German law or English law, as specified in the applicable Final Terms (or Pricing Supplement, in the case of Exempt Securities).

#### **Dealers**

Under this Programme, the Issuer may from time to time issue Securities to one or more of Deutsche Bank Aktiengesellschaft, Deutsche Bank AG, London Branch, Deutsche Bank AG, Zurich Branch, Deutsche Bank Luxembourg S.A., Deutsche Bank AG, Hong Kong Branch, Deutsche Bank AG, Singapore Branch, in each case acting as a Dealer and/or to any other Dealer appointed from time to time in accordance with the Dealer Agreement which appointment may be for a specific issue or on an ongoing basis (each a **"Dealer"** and together the **"Dealers"**).   - Terms and Conditions for floating rate Notes (Option II);
  - Terms and Conditions for fixed rate Pfandbriefe and zero coupon Pfandbriefe (Option III);
  - Terms and Conditions for floating rate Pfandbriefe (Option IV); and

  - Registered Securities Annex.

The Annexes may only apply to Option I, Option II or Option V, as specified in the applicable Final Terms or, in the case of Exempt Securities, the Pricing Supplement.

### Documentation of the Conditions

The Issuer may document the Conditions in respect of a Tranche of Securities in either of the following ways:

- (a) in the case of Securities other than Registered Securities or Credit Linked Notes, by completing the Final Terms (or Pricing Supplement, in the case of Exempt Securities) as set out therein, which will specify which Option(s), in each case including certain further options contained therein, will apply to such Securities, by replicating the relevant provisions and completing the relevant placeholders of the relevant Terms and Conditions set out in this Prospectus in the Final Terms (or Pricing Supplement, in the case of Exempt Securities) ("**Replicated and Completed set of Terms and Conditions**"). The replicated and completed provisions of the sets of Terms and Conditions shall constitute the Conditions, which will be attached to each global note representing the Securities of the relevant Tranche. This type of documentation of the Conditions will generally be used for Securities which are sold and distributed on a syndicated basis in Germany and/or publicly offered or distributed, in whole or in part, to non-professional investors in Germany; or
- (b) by completing the Final Terms (or Pricing Supplement, in the case of Exempt Securities), which will specify which Option(s) and (as applicable) Annex(es), in each case including the further options contained therein, will apply to such Securities, by referring to the relevant provisions of the relevant

Terms and Conditions and, as applicable, Annex(es) in each case set out in this Prospectus ("**Reference to the Terms and Conditions set out in the Prospectus**"). The Final Terms (or Pricing Supplement, in the case of Exempt Securities) will specify that the provisions of the Final Terms (or Pricing Supplement) and the relevant Terms and Conditions and, as applicable, Annex(es) in each case set out in this Prospectus, as completed by such Final Terms, such Final Terms (or Pricing Supplement) (or completed and amended by such Pricing Supplement) will together constitute the Conditions and such Final Terms (or Pricing Supplements) will be attached to each global note representing such Securities. This type of documentation of the Conditions will generally be used for Securities sold on a non-syndicated basis (or, if sold outside of Germany, syndicated basis) and which are not publicly offered.

### **Selection of Options / Completion of Placeholders**

The Final Terms (or Pricing Supplement, in the case of Exempt Securities) for a Tranche of Securities will specify which of Option I to Option V and (as applicable) Annex(es) will apply to such Securities. The relevant Terms and Conditions and, as applicable, Annex(es) also contain certain further options (characterised, in certain cases, by indicating the respective optional provision through instructions and explanatory notes set out either on the left of or in square brackets within the text of the relevant set of Terms and Conditions and, as applicable, Annex(es) as set out in this Prospectus) as well as placeholders (characterised by square brackets which include the relevant items) which will be specified in and/or completed by the Final Terms (or Pricing Supplement, in the case of Exempt Securities) as follows:

*Selection of Options.* The Issuer will determine which options will apply to a Tranche of Securities either by replicating the relevant provisions in the Final Terms (or Pricing Supplement, in the case of Exempt Securities) or by referencing the relevant provisions of the relevant Terms and Conditions and, as applicable, Annex(es) set out in this Prospectus in the Final Terms (or Pricing Supplement). If the Final Terms (or Pricing Supplement, in the case of Exempt Securities) do not refer to an alternative or optional provision or such alternative or optional provision is not replicated therein it shall be deemed to be deleted from the Conditions.

*Completion of Placeholders.* The Final Terms (or Pricing Supplement, in the case of Exempt Securities) will specify the information with which the placeholders in the relevant set of Terms and Conditions and, as applicable, Annex(es) will be completed. For a Tranche of Securities for which the provisions of the Final Terms (or Pricing Supplement, in the case of Exempt Securities) and the relevant Terms and Conditions and, as applicable, Annex(es) together constitute the Conditions, the relevant Terms and Conditions and, as applicable, Annex(es) shall be deemed to be completed by the information contained in the Final Terms (or completed and amended by the information contained in the Pricing Supplement, in the case of Exempt Securities) as if such information were inserted in the placeholders of such provisions.

All instructions and explanatory notes and text set out in square brackets in the relevant set of Terms and Conditions and, as applicable annex(es) and any footnotes and explanatory text in the Final Terms (or Pricing Supplement, in the case of Exempt Securities) will be deemed to be deleted from the Conditions.

### **Controlling Language**

As to the controlling language of the respective Conditions, the Issuer anticipates that, in general, subject to any stock exchange or legal requirements applicable from time to time, and unless otherwise agreed between the Issuer and the relevant Dealer:

- (a) in the case of Securities sold and distributed on a syndicated basis in Germany, German shall be the controlling language;
- (b) in the case of Securities sold and distributed on a syndicated basis outside Germany, English shall (unless otherwise specified) be the controlling language;
- (c) in the case of Securities publicly offered, in whole or in part, in Germany, or distributed, in whole or in part, to non-professional investors in Germany, German shall be the controlling language. If, in the event of such public offer or distribution to non-professional investors in Germany, however, English is

chosen as the controlling language, a German language translation of the Conditions will be available from the specified office of the Fiscal Agent and Issuer, as specified in this Prospectus; and

- (d) in the case of Securities publicly offered, in whole or in part, in any jurisdiction aside from Germany, or distributed, in whole or in part, to non-professional investors, English shall be the controlling language. Where required, a translation of the Summary will be provided in the language applicable to the jurisdiction where the public offer is made.

## **TREND INFORMATION**

### ***Statement of No Material Adverse Change***

There has been no material adverse change in the prospects of Deutsche Bank since 31 December 2018.

## Recent Developments

On 24 May 2018, Deutsche Bank announced that it will significantly reshape its Equities Sales & Trading business. Overall, Deutsche Bank aims to reduce headcount in this area by approximately 25 per cent. In Cash Equities, it will concentrate on electronic solutions and its most significant clients globally. In Prime Finance, Deutsche Bank will reduce leverage exposure by a quarter, equivalent to a reduction of approximately EUR 50 billion. These business reductions will contribute to a decrease in leverage exposure in the Corporate & Investment Bank of over EUR 100 billion. This is approximately 10 per cent. of the EUR 1,050 billion of leverage exposure reported at the end of the first quarter of 2018. The majority of this reduction is expected to be achieved by the end of 2018. Together with Deutsche Bank's decision to right-size the expense base in the Corporate & Investment Bank, Deutsche Bank will accelerate the pace of cost reduction across the organisation. In 2018, as announced earlier, Deutsche Bank envisages adjusted costs not to exceed EUR 23 billion. For 2019, the Management Board plans to reduce adjusted costs to EUR 22 billion with no further significant disposals currently planned. In connection with the implementation of these plans, the number of full-time equivalent positions is expected to fall from just over 97,000 currently to well below 90,000. The associated personnel reductions are underway. The Management Board reaffirms its target of a post-tax return on average tangible equity of approximately ten per cent. in a normalised business environment. Deutsche Bank will seek to reach this goal from 2021 onwards. Although results in 2018 will reflect the impact of the aforementioned actions, including planned restructuring charges of up to EUR 800 million, Deutsche Bank aims to deliver steady growth in return on capital over the coming years.

On 17 March 2019, Deutsche Bank announced that in light of arising opportunities the Management Board of Deutsche Bank has decided to review strategic options. However, there is no certainty that any transaction will occur. In this context Deutsche Bank confirmed discussions with Commerzbank Aktiengesellschaft.

On 25 April 2019, Deutsche Bank announced that after careful analysis, the Management Board of Deutsche Bank has concluded on that day that a combination with Commerzbank would not have created sufficient benefits to offset the additional execution risks, restructuring costs and capital requirements associated with such a large-scale integration. As a result, the two banks have decided to discontinue discussions. Deutsche Bank will continue to review all alternatives to improve long-term profitability and shareholder returns.

## Outlook

In 2019, Deutsche Bank intends to build on the progress made last year to pursue Deutsche Bank's near-term operating targets for adjusted costs and employees. Deutsche Bank is also working towards its 2019 Post-tax Return on Average Tangible Equity target. Achieving its near-term Post-tax Return on Average Tangible Equity target requires amongst other things growth in Deutsche Bank's more market-sensitive businesses, which will in part depend on market conditions. Market conditions have improved as compared to those experienced in the fourth quarter of 2018, however, they are somewhat weaker than Deutsche Bank had anticipated. Deutsche Bank aims to achieve its other key performance indicators over time, consistent with becoming a simpler and safer bank.

Deutsche Bank's most important key performance indicators are shown in the table below:

\* Extracted from the Earnings Report as of 31 March 2019.

<sup>1</sup> Based on Net Income attributable to Deutsche Bank shareholders.

<sup>2</sup> Adjusted costs are noninterest expenses excluding impairment of goodwill and other intangible assets, litigation and restructuring and severance.

<sup>3</sup> Internal full-time equivalents.

The subsection "Non-GAAP Financial Measures" set forth in the Earnings Report of the Issuer as of 31 March 2019 is incorporated by reference in, and forms part of, this Prospectus (see the section "Documents Incorporated by Reference").

Deutsche Bank is committed to working towards a target for its Post-tax Return on Average Tangible Equity of greater than 4 per cent. in 2019. Reaching Deutsche Bank's 2019 target of 4 per cent. Post-Tax Return on Tangible Equity depends on factors within Deutsche Bank's direct control, but also on factors which are more market-sensitive and event-sensitive.

Deutsche Bank expects revenues in 2019 to be essentially flat compared to 2018. It aims to improve revenue in particular through investments in targeted growth areas including loan and volume growth as well as through liquidity and balance sheet optimization and redeployment. Deutsche Bank's outlook also takes into account that market environment and client activity in the first quarter of 2019 were not supportive of a more pronounced revenue recovery in its more market-sensitive businesses.

For the Group, Deutsche Bank is committed to reducing its adjusted costs in 2019 to € 21.8 billion and to reducing its internal workforce to below 90,000 full-time employees by year-end 2019. Deutsche Bank's expectation is to benefit from the run-rate impact of measures executed in 2018, as well as from the impact of Postbank integration and from the exit of retail business in Portugal. Deutsche Bank will continue to address structural cost issues and optimize processes while also striving for additional cost savings if the revenue environment does not develop as Deutsche Bank expects. Over time, Deutsche Bank aspires to achieve a Post-tax Return on Average Tangible Equity of approximately 10 per cent., in a normalized environment and on the basis of the achievement of Deutsche Bank's cost targets.

Deutsche Bank assumes an increase in provision in credit losses in 2019 compared to last year, and to benefit from a more normalized tax rate.

Deutsche Bank expects its CRR/CRD 4 Common Equity Tier 1 capital ratio to be negatively impacted by pending supervisory assessments but to remain above 13 per cent. throughout the year 2019. Deutsche Bank expects its CRR/CRD 4 leverage ratio (phase-in) to remain above 4 per cent. in 2019. Deutsche Bank

anticipates year-end 2019 risk weighted assets (RWA) to stay essentially flat and CRR/CRD 4 leverage exposure to be slightly higher compared to year end 2018. With the transition to IFRS 16 as of 1 January 2019, Deutsche Bank expects to see a further decline in its CRR/CRD 4 Common Equity Tier 1 capital ratio of approximately 20 basis points as Deutsche Bank recognizes certain lease contracts on its balance sheet.

Deutsche Bank targets a competitive dividend payout ratio. Deutsche Bank's dividend payments are subject to its ability to maintain sufficient levels of distributable profits under its standalone financial statements in accordance with German accounting rules (HGB) for the respective fiscal year.

By the nature of its business, Deutsche Bank is involved in litigation, arbitration and regulatory proceedings and investigations in Germany and in a number of jurisdictions outside Germany, especially in the US. Such matters are subject to many uncertainties. While Deutsche Bank has resolved a number of important legal matters and made progress on others, it expects the litigation and enforcement environment to remain challenging in the short term. Litigation expenses in 2018 were relatively low as a result of Deutsche Bank's successful efforts in resolving a number of matters at or below estimated provisions. For 2019, and with a caveat that forecasting litigation expense is subject to many uncertainties, Deutsche Bank expects litigation expense to be significantly higher than in 2018.

## The Business Segments of Deutsche Bank

### *Corporate & Investment Bank (CIB)*

CIB's aim is to provide efficient and seamless client coverage for Deutsche Bank's offering of investment and transaction banking products and services for corporate and institutional clients and thereby generate attractive returns for its shareholders.

After completing the targeted headcount and resource reductions as part of Deutsche Bank's strategic reshaping in 2018, the division's focus is now on revenue growth in 2019. CIB should also benefit from the Group wide re-deployment of excess liquidity into higher-yielding assets, which is expected to reduce liquidity-related funding costs.

For Global Transaction Banking, Deutsche Bank expects revenues adjusted for a gain on sale in 2018 to be slightly higher in 2019 compared to the prior year, due to the benefits from expected interest rate increases in the US, in addition to treasury and deposit initiatives. Deutsche Bank expects Trade revenues to be higher, driven by increased income from structured transactions. Cash Management revenues are expected to be higher from net interest income growth and deposit initiatives. Trust and Agency and Securities Services revenues adjusted for the aforementioned gain on sale are expected to be slightly lower.

Origination & Advisory revenues are expected to be higher in 2019 year over year, driven by market share growth. Deutsche Bank expects Debt Origination revenues to be higher as the business aims to build on the market share gains achieved during 2018 especially in Leveraged Finance, combined with an intensified focus on Investment Grade acquisition financing. Equity Origination revenues are also expected to be higher year over year with a renewed focus on initial public offerings and acquisition financing. Advisory revenues are expected to be essentially flat in 2019 compared to 2018.

Deutsche Bank expects Sales & Trading Fixed Income and Currencies (FIC) revenues to be higher in 2019 compared to 2018 driven by an expected increase in client activity levels and a more favorable trading environment after difficult conditions, especially in the fourth quarter. Revenues in FIC should also benefit from improved client coverage provided by the integrated Institutional and Treasury Coverage Group, targeted resource deployment in Credit, an increased focus on cross-selling with GTB and the aforementioned lower funding costs as a result of re-deployment of the Group's excess liquidity.

Sales & Trading Equity revenues are expected to be slightly higher in 2019 compared to 2018. Equity Trading is expected to benefit from platform stabilization and investment in electronic trading platforms. Deutsche Bank expects Equity Derivatives to see growth in structured products from funding optimization, targeted hires and system investment. Within Prime Finance, a focus on client balances and spreads in addition to the

aforementioned lower funding costs as a result of re-deployment of the Group's excess liquidity are expected to drive higher revenues.

Noninterest expenses for 2019 are expected to be essentially flat. Costs excluding litigation, severance and restructuring and goodwill impairment are expected to be slightly lower, driven by lower non-compensation costs and reduced infrastructure related costs. In 2019, Deutsche Bank expects CIB to benefit from the full-year run-rate impact of the headcount reductions in 2018. Further expense management initiatives in 2019 are focused on middle and back office functions. For 2019, Deutsche Bank expects RWA in CIB to be essentially flat as targeted Credit Risk RWA increases should be offset by reduced Market Risk RWA and slightly lower Operational Risk RWA. Deutsche Bank continues to focus on regulatory compliance, know-your-client (KYC) and client on-boarding process enhancement, system stability and control and conduct.

Risks to Deutsche Bank's outlook include potential impacts on its business model from Brexit and other macro and global geopolitical uncertainty. Risks regarding a potential deterioration of international trade relations cause further concerns. Uncertainty around central bank policies, ongoing regulatory developments (e.g. Basel III framework agreement) also pose risks, while challenges such as event risks and levels of client activity may also have an adverse impact.

For CIB, the first quarter of 2019 saw an unfavorable macroeconomic and financial market environment for the industry. Uncertainty was driven by a number of geopolitical factors such as, but not limited to, Brexit, U.S. - China trade relations and the U.S. government shutdown in January, all of which suppressed client activity and negatively impacted revenues, specifically in Sales & Trading and broadly in line with the overall industry trend. Deutsche Bank does expect to see some improvement in the macroeconomic and financial market environment as the year progresses, with March having been more favorable than the first two months of the quarter. Should Deutsche Bank experience continued recovery, Deutsche Bank expects CIB revenues for 2019 to be slightly higher compared to 2018.

### *Private & Commercial Bank (PCB)*

PCB provides private, corporate and wealth management clients with a comprehensive range of products from standard banking services to individual investment and financing advice. Deutsche Bank intends to keep its focus on the transformation and growth of its core businesses in 2019. In its German home market, Deutsche Bank aims to continue the execution of its integration plans within DB Privat- und Firmenkundenbank AG and to deliver synergies and savings potential from the merger transaction. In Deutsche Bank's Private and Commercial Business (International), Deutsche Bank will also execute identified measures consistent with the bank's strategy. The sale of Deutsche Bank's retail banking business in Portugal is well on track and envisaged to be closed in the first half of 2019. In Deutsche Bank's remaining countries, Deutsche Bank intends to continue the transformation of its businesses with the objective to improve client coverage and efficiency. In its global Wealth Management business, Deutsche Bank's emphasis will be on further transforming and growing its global presence by hiring relationship managers in key markets. Deutsche Bank also plans to continue to invest in its digital technologies across all business units.

In PCB, Deutsche Bank expects growth in its investment and loan businesses in 2019. In the investment businesses, Deutsche Bank plans to grow net new assets, and to continue to hire relationship managers in core markets and Deutsche Bank expects to be able to leverage pricing opportunities in a normalizing market environment. In the loan businesses, Deutsche Bank plans to benefit from the growth achieved in 2018 and target to further accelerate growth in 2019 within Deutsche Bank's existing risk management framework and with a focus on consumer and commercial loans. Deutsche Bank expects the year-over-year revenue development will be negatively impacted by lower specific items, which Deutsche Bank does not expect to repeat in the same magnitude as in 2018. Deutsche Bank also expects the margin pressure on its deposit products to continue in the ongoing low interest rate environment and that Deutsche Bank's revenue base declines as a result of its business divestitures in Poland and Portugal. Given these aforementioned opposing revenue trends, Deutsche Bank expects PCB revenues to remain essentially flat in 2019 compared to 2018.

Associated with this growth in its loan businesses, Deutsche Bank expects higher provision for credit losses and RWA in 2019. The increase in RWA will also reflect the implementation of regulatory changes including effects from the ECB's targeted review of internal models. Assets under management are expected to be slightly higher

in 2019, in line with Deutsche Bank's growth initiatives and slightly offset by a deconsolidation impact subsequent to the announced disposal of its business in Portugal.

Deutsche Bank expects noninterest expenses and adjusted costs in 2019 to be slightly lower compared to 2018. The decline will be driven by further savings from Deutsche Bank's executed reorganization measures, including the merger of Deutsche Bank Privat- und Geschäftskunden AG and Postbank and the impact of its business divestitures in Poland and Portugal. Savings will be offset in part by inflationary effects and by continued investments in targeted growth initiatives, including the further development of Deutsche Bank's digital technologies and the further expansion of its Wealth Management franchise.

Specific risks to Deutsche Bank's outlook are slower economic growth in its major operating countries, a delayed or less pronounced interest rate recovery than expected, and lower client activity in the investment business. Client activity could be affected by adverse developments or market uncertainties, including higher than expected volatility in equity and credit markets. The implementation of regulatory requirements including consumer protection measures and delays in the implementation of Deutsche Bank's strategic projects could also have a negative impact on its revenues and costs.

### *Asset Management (AM)*

Deutsche Bank believes that Asset Management, with its strong and diverse investment capabilities, is well positioned to address the challenges facing the industry and capture opportunities.

Developing economies are growing and increasing in wealth, offering new opportunities for managers as local investors expand their investment horizons globally. In developed markets, low interest rates are causing a shift from unmanaged assets, such as cash and deposit accounts, into managed portfolios. New digital technology, such as robo-advisory, is enhancing distribution capabilities giving investors online access, while the wider adoption of artificial intelligence is expanding product choice and enhancing performance. Asset managers are playing a progressively larger role in providing capital to the economy, taking advantage of bank retrenchment due to regulatory and capital constraints and diminished ability of national governments to fund infrastructure investment. However, pressure on fees and costs will persist, in an environment of heightened competition and growing regulatory and compliance requirements.

Over the medium term, the industry's global assets under management are expected to substantially increase, driven by strong net flows in passive strategies, alternatives and multi asset solutions, as clients increasingly demand value-for-money, transparency and outcome oriented products. Due to its capabilities in active and passive products, alternative investments and multi asset solutions, Deutsche Bank believes that AM is well positioned to grow market share amid these industry growth trends. While AM's digital capabilities are also creating new channels for it to distribute products and services, bottom line results are expected to be challenged by fee compression, rising costs of regulation and competitive dynamics. In the face of this challenge, AM intends to focus its growth initiatives on products and services where it has a competitive advantage and can differentiate itself, while also maintaining cost discipline.

Deutsche Bank expects assets under management at the end of 2019 to be higher compared to the end of 2018. Net flows are expected to be positive across all major asset classes driven by passive products, alternative investments and multi asset solutions, thereby contributing to the flow target of 3 per cent. to 5 per cent. per annum.

Deutsche Bank expects 2019 revenues to be essentially flat compared to 2018. Management fees are assumed to be essentially flat compared to 2018 reflecting anticipated assets under management growth, offset by margin compression, the unfavorable impact from net outflows in 2018 as well as the most recent market downturn during the fourth quarter of 2018. Performance and transaction fees are expected to be lower than 2018, contributing 3 per cent. to 5 per cent. of Deutsche Bank's total net revenues. Other revenues are expected to be significantly higher mainly driven by lower funding costs. While Deutsche Bank remains constructive on equity markets, it anticipates the management fee margin to be further challenged following one of the worst equity performances ever in December 2018.

In 2019, Deutsche Bank intends to continue to keep its focus on tight cost management, with the aim of achieving reduced noninterest expenses and cost income ratio (CIR), together with slightly lower adjusted costs. Deutsche Bank is on track to achieve its mid-term CIR target of below 65 per cent.

Risks to Deutsche Bank's outlook include the longevity of the bull market, continued low interest rates in developed markets, the pace of growth in emerging economies growth and increase in wealth, as well as the increasing demand for retirement products in developed countries' aging populations. Continued elevated levels of political uncertainty worldwide, protectionist and anti-trade policies, and the United Kingdom's decision to leave the European Union could have unpredictable consequences in the economy, market volatility and investors' confidence, which may lead to declines in business and could affect Deutsche Bank's revenues and profits as well as the execution of its strategic plans. In addition, the evolving regulatory framework could lead to unforeseen regulatory compliance costs and possible delays in the implementation of Deutsche Bank's efficiency measures due to jurisdictional restrictions, which could have an adverse impact on its cost base.

Deutsche Bank is neither directly nor indirectly majority-owned or controlled by any other corporation, by any government or by any other natural or legal person severally or jointly.

Pursuant to German law and the Deutsche Bank's Articles of Association, to the extent that the Bank may have major shareholders at any time, it may not give them different voting rights from any of the other shareholders.

To the Bank's knowledge, there are only six shareholders holding more than 3 per cent. of the Issuer's shares or to whom more than 3 per cent. of voting rights are attributed, and none of these shareholders holds more than 10 per cent. of the Issuer's shares or voting rights.

### **Challenge of the General Meeting's Resolution Not to Pay a Dividend for the 2015 Fiscal Year**

In May 2016, Deutsche Bank AG's General Meeting resolved that no dividend was to be paid to Deutsche Bank's shareholders for the 2015 fiscal year. Some shareholders filed a lawsuit with the Regional Court Frankfurt am Main (*Landgericht*), challenging (among other things) the resolution on the grounds that Deutsche Bank was required by law to pay a minimum dividend in an amount equal to 4 per cent. of Deutsche Bank's share capital. In December 2016, the Regional Court ruled in favor of the plaintiffs. Deutsche Bank initially appealed the court's decision. However, consistent with Deutsche Bank's updated strategy, Deutsche Bank withdrew its appeal prior to Deutsche Bank's 2017 General Meeting, as a result of which the challenged resolution became void. Deutsche Bank's General Meeting in May 2017 resolved the payment of a dividend of approximately € 400 million from Deutsche Bank's distributable profit for 2016 which amount contains a component reflecting the distributable profit carried forward from 2015 of approximately € 165 million. Such dividend was paid to the shareholders shortly after the annual General Meeting. The resolution was also challenged in court based on the argument that the way the decision was taken was not correct. On 18 January 2018, the Regional Court Frankfurt am Main dismissed the shareholder actions as regards the dividend resolution taken in May 2017. The plaintiffs appealed to the Higher Regional Court Frankfurt am Main. On 26 March 2019, the Higher Regional Court Frankfurt am Main confirmed the decision of the Regional Court and dismissed the appeal.

## CO2 Emission Rights

The Frankfurt am Main Office of Public Prosecution (the OPP) has investigated alleged value-added tax (VAT) fraud in connection with the trading of CO2 emission rights by certain trading firms, some of which also engaged in trading activity with Deutsche Bank. The OPP alleges that certain employees of Deutsche Bank knew that their counterparties were part of a fraudulent scheme to avoid VAT on transactions in CO2 emission rights, and it searched Deutsche Bank in April 2010 and December 2012. On 13 June 2016, the Regional Court Frankfurt am Main sentenced seven former Deutsche Bank employees for VAT evasion and for aiding and abetting VAT evasion in connection with their involvement in CO2 emissions trading. On 15 May 2018, the Federal Supreme Court (*Bundesgerichtshof*) handed down its decision in the appeal proceedings. The Federal Supreme Court partly granted the appeal of one former employee and referred the case back to the trial court. In relation to the other cases where appeal proceedings were pending, the Federal Supreme Court confirmed the trial court's judgment, which meant that the judgment became final and binding and the cases are closed. The majority of the other investigations by the OPP against former and current employees which were ongoing have meanwhile been closed. In addition to the case which was referred back to the trial court, investigations remain ongoing against one current and one former employee.

## Cum-ex Investigations and Litigations

Deutsche Bank has received inquiries from law enforcement authorities, including requests for information and documents, in relation to cum-ex transactions of clients. "Cum-ex" refers to trading activities in German shares around dividend record dates (trade date before and settlement date after dividend record date) for the purpose of obtaining German tax credits or refunds in relation to withholding tax levied on dividend payments including, in particular, transaction structures that have resulted in more than one market participant claiming such credit or refund with respect to the same dividend payment. Deutsche Bank is cooperating with the law enforcement authorities in these matters.

The Public Prosecutor in Cologne has been conducting a criminal investigation since August 2017 concerning two former employees of Deutsche Bank in relation to cum-ex transactions of certain former clients of the Bank. Deutsche Bank is a potential secondary participant pursuant to Section 30 of the German Law on Administrative Offences in this proceeding. Deutsche Bank is cooperating with this investigation.

In February 2018, Deutsche Bank received from the Federal Central Tax Office (Bundeszentralamt für Steuern) a demand of approximately € 49 million for tax refunds paid to a former custody client. Deutsche Bank had filed withholding tax refund claims through the electronic refund procedure (elektronisches Datenträgerverfahren) on behalf of the client in connection with the client's cum-ex transactions. Deutsche Bank expects to receive a formal notice for the same amount in the near future.

By letter dated 26 February 2018, The Bank of New York Mellon SA/NV ("BNY") informed Deutsche Bank of its intention to seek indemnification for potential cum-ex related tax liabilities incurred by BHF Asset Servicing GmbH ("BAS") and/or Frankfurter Service Kapitalanlage-GmbH ("FSKAG"). Deutsche Bank had acquired BAS and FSKAG as part of the acquisition of Sal. Oppenheim in 2010 and sold them to BNY in the same year. BNY estimates the potential tax liability to amount to up to € 120 million.

On 6 February 2019, the Regional Court Frankfurt am Main (Landgericht) served Deutsche Bank with a claim by M.M.Warburg & CO Gruppe GmbH and M.M.Warburg & CO (AG & Co.) KGaA (together "Warburg") in connection with cum-ex transactions of Warburg with a custody client of Deutsche Bank during 2007 to 2011. Warburg claims from Deutsche Bank indemnification against German taxes in relation to transactions conducted in the years 2010 and 2011. Further, Warburg claims compensation of unspecified damages relating to these transactions and declaratory relief that Deutsche Bank will have to indemnify Warburg against any potential future tax assessments for cum-ex transactions conducted in the years 2007 to 2009.

According to Warburg's claim, the Hamburg Tax Office has claimed from Warburg German taxes of approximately € 42.7 million plus interest of approximately € 14.6 million for 2010 and German taxes of approximately € 4 million plus interest of approximately € 1.6 million for 2011. According to the claim, neither taxes nor interest have yet been assessed against Warburg for the years 2007 to 2009. Deutsche Bank estimates that for the years 2007 to 2009 the aggregate amount of German taxes and interest could be as high as approximately € 88.9 million and approximately € 45.9 million, respectively.

### Danske Bank Estonia Investigations

Deutsche Bank has received requests for information from regulatory and law enforcement agencies concerning the Bank's correspondent banking relationship with Danske Bank, including the Bank's historical processing of correspondent banking transactions on behalf of customers of Danske Bank's Estonia branch prior to cessation of the correspondent banking relationship with that branch in 2015. Deutsche Bank is providing information to and otherwise cooperating with the investigating agencies. The Bank is also conducting an internal investigation into these matters, including of whether any violations of law, regulation or policy occurred and the effectiveness of the related internal control environment.

The Group has not established a provision or contingent liability with respect to this matter.

### Deutsche Bank Shareholder Litigations

Deutsche Bank and certain of its current and former officers and management board members are the subject of a purported class action, filed in the U.S. District Court for the Southern District of New York, asserting claims under Sections 10(b) and 20(a) of the U.S. Securities Exchange Act of 1934 on behalf of persons who purchased or otherwise acquired securities of Deutsche Bank on a United States exchange or pursuant to other transactions within the United States between 31 January 2013 and 26 July 2016. Plaintiffs allege that Deutsche Bank's SEC Annual Reports on Form 20-F for the years 2012, 2013, 2014 and 2015 were materially false and misleading in failing to disclose (i) serious and systemic failings in controls against financing terrorism, money laundering, aiding organizations subject to international sanctions and committing financial crime and (ii) that the Bank's internal control over financial reporting and its disclosure controls and procedures were not effective. On 21 February 2017, Deutsche Bank and the individual defendants served at the time with the summons and complaint moved to dismiss the consolidated amended complaint. On 28 June 2017, the court granted the motion to dismiss as to all defendants, without leave to replead. On 30 June 2017, the court entered judgment dismissing the lawsuit. The plaintiffs appealed the court's decision. Following completion of briefing, the Court of Appeals held oral argument on 28 March 2018. On 13 April 2018, the Court of Appeals issued a Summary Opinion affirming the dismissal of the action.

Deutsche Bank and certain of its current and former officers and management board members are the subject of a purported class action, filed in the United States District Court for the Southern District of New York, asserting claims under Sections 10(b) and 20(a) of the Securities Exchange Act of 1934 on behalf of persons who purchased or otherwise acquired securities of Deutsche Bank on a United States exchange or pursuant to other transactions within the United States between 20 March 2017 and 30 May 2018. Plaintiffs allege that Deutsche Bank's SEC Annual Reports on Form 20-F for the years 2016 and 2017 and its quarterly interim reports on Form 6-K for calendar 2017 contained materially false and misleading statements regarding its business, operational and compliance policies and internal control environment. On 25 January 2019, the lead plaintiff filed an amended class action complaint. Deutsche Bank has moved to dismiss the action.

### Esch Funds Litigation

Prior to its acquisition by Deutsche Bank in 2010, Sal. Oppenheim jr. & Cie. AG & Co. KGaA ("Sal. Oppenheim") was involved in the marketing and financing of participations in closed end real estate funds. These funds were structured as partnerships under German law. Usually, Josef Esch Fonds-Projekt GmbH carried out the planning and project development in connection with the funds' investments. Sal. Oppenheim held an indirect interest in this company via a joint venture. In relation to this business, a number of civil claims have been filed against Sal. Oppenheim. Some, but not all, of these claims are also directed against former managing partners of Sal. Oppenheim and other individuals. The investors are seeking to unwind their fund participation and to be indemnified against potential losses incurred in connection with the investment. The claims are based in part, on an alleged failure of Sal. Oppenheim to adequately disclose related risks and other material aspects important for the investors' investment decision. The claims brought against Sal. Oppenheim relate to investments in an amount of originally approximately € 1.1 billion. After certain claims have either been dismissed or settled, claims relating to investments in an amount of originally approximately € 6 million are still pending. Based on the facts of the individual cases, some courts have decided in favor and some against Sal. Oppenheim. In some cases, appeals are pending. Currently, the aggregate amount claimed in the pending proceedings is approximately € 10 million.

## FX Investigations and Litigations

Deutsche Bank has received requests for information from certain regulatory and law enforcement agencies globally who investigated trading in, and various other aspects of, the foreign exchange market. Deutsche Bank cooperated with these investigations. Relatedly, Deutsche Bank has conducted its own internal global review of foreign exchange trading and other aspects of its foreign exchange business.

On 19 October 2016, the U.S. Commodity Futures Trading Commission (CFTC), Division of Enforcement issued a letter ("CFTC Letter") notifying Deutsche Bank that the CFTC Division of Enforcement "is not taking any further action at this time and has closed the investigation of Deutsche Bank" regarding foreign exchange. As is customary, the CFTC Letter states that the CFTC Division of Enforcement "maintains the discretion to decide to reopen the investigation at any time in the future." The CFTC Letter has no binding impact on other regulatory and law enforcement agency investigations regarding Deutsche Bank's foreign exchange trading and practices, which remain pending.

On 7 December 2016, it was announced that Deutsche Bank reached an agreement with CADE, the Brazilian antitrust enforcement agency, to settle an investigation into conduct by a former Brazil-based Deutsche Bank trader. As part of that settlement, Deutsche Bank paid a fine of BRL 51 million and agreed to continue to comply with the CADE's administrative process until it is concluded. This resolves CADE's administrative process as it relates to Deutsche Bank, subject to Deutsche Bank's continued compliance with the settlement terms.

On 13 February 2017, the U.S. Department of Justice (DOJ), Criminal Division, Fraud Section, issued a letter (DOJ Letter) notifying Deutsche Bank that the DOJ has closed its criminal inquiry "concerning possible violations of federal criminal law in connection with the foreign exchange markets." As is customary, the DOJ Letter states that the DOJ may reopen its inquiry if it obtains additional information or evidence regarding the inquiry. The DOJ Letter has no binding impact on other regulatory and law enforcement agency investigations regarding Deutsche Bank's foreign exchange trading and practices, which remain pending.

On 20 April 2017, it was announced that Deutsche Bank AG, DB USA Corporation and Deutsche Bank AG New York Branch reached an agreement with the Board of Governors of the Federal Reserve System to settle an investigation into Deutsche Bank's foreign exchange trading and practices. Under the terms of the settlement, Deutsche Bank entered into a cease-and-desist order, and agreed to pay a civil monetary penalty of U.S.\$ 137 million. In addition, the Federal Reserve ordered Deutsche Bank to "continue to implement additional improvements in its oversight, internal controls, compliance, risk management and audit programs" for its foreign exchange business and other similar products, and to periodically report to the Federal Reserve on its progress.

On 20 June 2018, it was announced that Deutsche Bank AG and Deutsche Bank AG New York Branch reached an agreement with the New York State Department of Financial Services (DFS) to settle an investigation into Deutsche Bank's foreign exchange trading and sales practices. Under the terms of the settlement, Deutsche Bank entered into a consent order, and agreed to pay a civil monetary penalty of U.S.\$ 205 million. In addition, the DFS ordered Deutsche Bank to continue to implement improvements in its oversight, internal controls, compliance, risk management and audit programs for its foreign exchange business, and to periodically report to the DFS on its progress.

Investigations conducted by certain other regulatory agencies are ongoing, and Deutsche Bank has cooperated with these investigations.

On 6 August 2018, the U.S. District Court for the Southern District of New York issued a final order approving Deutsche Bank's U.S.\$ 190 million settlement and plaintiffs' dismissal with prejudice of the consolidated action (In re Foreign Exchange Benchmark Rates Antitrust Litigation). The consolidated action was brought on behalf of a putative class of over-the-counter traders and a putative class of central-exchange traders, who are domiciled in or traded in the United States or its territories, and alleged illegal agreements to restrain competition with respect to and to manipulate both benchmark rates and spot rates, particularly the spreads quoted on those spot rates. On 10 July 2018, the U.S. Court of Appeals for the Second Circuit affirmed the district court's dismissal of *Doris Sue Allen v. Bank of America, et al.*, a putative class action that tracked the allegations in the consolidated action and asserted that such purported conduct gave rise to, and resulted in a breach of, defendants' fiduciary duties under the U.S. Employment Retirement Income Security Act of 1974. On

6 September 2018, the U.S. District Court for the Southern District of New York denied Axiom Investment Advisors, LLC's ("Axiom") motion for class certification in *Axiom v. Deutsche Bank AG*. Axiom's motion for voluntary dismissal with prejudice was granted on 18 January 2019. This putative class action alleged that Deutsche Bank rejected FX orders placed over electronic trading platforms through the application of a function referred to as "Last Look" and that these orders were later filled at prices less favorable to putative class members. One U.S. putative class action remains pending against Deutsche Bank. Filed on 26 September 2016, amended on 24 March 2017, and later consolidated with a similar action that was filed on 28 April 2017, the "Indirect Purchasers" action (*Contant, et al. v. Bank of America Corp., et al.*) tracks the allegations in the consolidated action and asserts that such purported conduct injured "indirect purchasers" of FX instruments. These claims are brought pursuant to the Sherman Act and various states' consumer protection statutes. On 15 March 2018, the court granted Deutsche Bank's motion to dismiss this action. Plaintiffs filed a motion to replead and proposed an amended complaint on 5 April 2018, which Deutsche Bank opposed. On 25 October 2018, the U.S. District Court for the Southern District of New York granted plaintiffs' motion and a second amended complaint was filed on 28 November 2018. Discovery has commenced in the Indirect Purchasers action. Filed on 7 November 2018, *Allianz, et al. v. Bank of America Corporation, et al.*, was brought on an individual basis by a group of asset managers who opted out of the settlement in the consolidated action. Plaintiffs filed an amended complaint on 1 March 2019. Deutsche Bank's response to that complaint is due on 1 April 2019. Limited discovery has commenced pending resolution of defendants' motion to dismiss.

Deutsche Bank also has been named as a defendant in two Canadian class proceedings brought in the provinces of Ontario and Quebec. Filed on 10 September 2015, these class actions assert factual allegations similar to those made in the consolidated action in the United States and seek damages pursuant to the Canadian Competition Act as well as other causes of action. Plaintiffs in the Ontario action have moved for class certification and completed service of their class certification motion record on 23 June 2017. Deutsche Bank has opposed class certification, and a hearing on the class certification motion is scheduled for 10 to 14 June 2019. Deutsche Bank has also been named as a defendant in two putative class actions filed in Israel in September 2018. These actions assert factual allegations similar to those made in the consolidated action in the United States and seek damages pursuant to Israeli antitrust law as well as other causes of action. These actions are in preliminary stages and Deutsche Bank has not been formally served.

The Group has not disclosed whether it has established a provision or contingent liability with respect to these matters because it has concluded that such disclosure can be expected to prejudice seriously their outcome.

*Interbank and Dealer Offered Rates Matters.* Regulatory and Law Enforcement Matters. Deutsche Bank has responded to requests for information from, and cooperated with, various regulatory and law enforcement agencies, in connection with industry-wide investigations concerning the setting of the London Interbank Offered Rate (LIBOR), Euro Interbank Offered Rate (EURIBOR), Tokyo Interbank Offered Rate (TIBOR) and other interbank and/or dealer offered rates. As previously reported, Deutsche Bank paid € 725 million to the European Commission pursuant to a settlement agreement dated 4 December 2013 in relation to anticompetitive conduct in the trading of interest rate derivatives.

Also as previously reported, on 23 April 2015, Deutsche Bank entered into separate settlements with the DOJ, the CFTC, the UK Financial Conduct Authority (FCA), and the New York State Department of Financial Services (DFS) to resolve investigations into misconduct concerning the setting of LIBOR, EURIBOR, and TIBOR. Under the terms of these agreements, Deutsche Bank agreed to pay penalties of U.S.\$ 2.175 billion to the DOJ, CFTC and DFS and GBP 226.8 million to the FCA. As part of the resolution with the DOJ, DB Group Services (UK) Limited (an indirectly-held, wholly-owned subsidiary of Deutsche Bank) pled guilty to one count of wire fraud in the U.S. District Court for the District of Connecticut and Deutsche Bank entered into a Deferred Prosecution Agreement with a three year term pursuant to which it agreed (among other things) to the filing of an Information in the U.S. District Court for the District of Connecticut charging Deutsche Bank with one count of wire fraud and one count of price fixing in violation of the Sherman Act. On 23 April 2018, the Deferred Prosecution Agreement expired, and the U.S. District Court for the District of Connecticut subsequently dismissed the criminal Information against Deutsche Bank. The fines referred to above, which include a U.S.\$ 150 million fine paid in April 2017 following the 28 March 2017 sentencing of DB Group Services (UK) Limited, have been paid in full and do not form part of the Bank's provisions.

As previously reported, on 20 March 2017, Deutsche Bank paid CHF 5.4 million to the Swiss Competition Commission (WEKO) pursuant to a settlement agreement in relation to Yen LIBOR.

On 25 October 2017, Deutsche Bank entered into a settlement with a working group of U.S. state attorneys general resolving their interbank offered rate investigation. Among other conditions, Deutsche Bank agreed to make a settlement payment of U.S.\$ 220 million. The settlement amount has been paid in full and does not form part of the Bank's provisions.

Other investigations of Deutsche Bank concerning the setting of various interbank and/or dealer offered rates remain ongoing.

The Group has not disclosed whether it has established a provision or contingent liability with respect to the remaining investigations because it has concluded that such disclosure can be expected to prejudice seriously their outcome.

*Overview of Civil Litigations.* Deutsche Bank is party to 45 U.S. civil actions concerning alleged manipulation relating to the setting of various interbank and/or dealer offered rates which are described in the following paragraphs, as well as single actions pending in each of the UK, Israel and Argentina. Most of the civil actions, including putative class actions, are pending in the U.S. District Court for the Southern District of New York (SDNY), against Deutsche Bank and numerous other defendants. All but four of the U.S. civil actions were filed on behalf of parties who allege losses as a result of manipulation relating to the setting of U.S. dollar LIBOR. The four civil actions pending against Deutsche Bank that do not relate to U.S. dollar LIBOR are also pending in the SDNY, and include one consolidated action concerning Pound Sterling (GBP) LIBOR, one action concerning Swiss franc (CHF) LIBOR, one action concerning two Singapore Dollar (SGD) benchmark rates, the Singapore Interbank Offered Rate (SIBOR) and the Swap Offer Rate (SOR), and one action concerning the Canadian Dealer Offered Rate (CDOR).

Claims for damages for all 45 of the U.S. civil actions discussed have been asserted under various legal theories, including violations of the U.S. Commodity Exchange Act, federal and state antitrust laws, the U.S. Racketeer Influenced and Corrupt Organizations Act, and other federal and state laws. The Group has not disclosed whether it has established a provision or contingent liability with respect to these matters because it has concluded that such disclosure can be expected to prejudice seriously their outcome.

*U.S. dollar LIBOR.* With three exceptions, all of the U.S. civil actions concerning U.S. dollar LIBOR are being coordinated as part of a multidistrict litigation (the "**U.S. dollar LIBOR MDL**") in the SDNY. In light of the large number of individual cases pending against Deutsche Bank and their similarity, the civil actions included in the U.S. dollar LIBOR MDL are now subsumed under the following general description of the litigation pertaining to all such actions, without disclosure of individual actions except when the circumstances or the resolution of an individual case is material to Deutsche Bank.

Following a series of decisions in the U.S. dollar LIBOR MDL between March 2013 and March 2019 narrowing their claims, plaintiffs are currently asserting antitrust claims, claims under the U.S. Commodity Exchange Act and US Securities Exchange Act and state law fraud, contract, unjust enrichment and other tort claims. The court has also issued decisions dismissing certain plaintiffs' claims for lack of personal jurisdiction and on statute of limitations grounds.

On 20 December 2016, the district court issued a ruling dismissing certain antitrust claims while allowing others to proceed. Multiple plaintiffs have filed appeals of the district court's 20 December 2016 ruling to the U.S. Court of Appeals for the Second Circuit, and those appeals are proceeding in parallel with the ongoing proceedings in the district court. Briefing of the appeals is complete.

On 13 July 2017, Deutsche Bank executed a settlement agreement in the amount of U.S.\$ 80 million with plaintiffs to resolve a putative class action pending as part of the U.S. dollar LIBOR MDL asserting claims based on alleged transactions in Eurodollar futures and options traded on the Chicago Mercantile Exchange (*Metzler Investment GmbH v. Credit Suisse Group AG*). The settlement agreement was submitted to the court for preliminary approval on 11 October 2017. The settlement amount is already fully reflected in existing litigation provisions and no additional provisions have been taken for this settlement. The settlement agreement is subject to further review and approval by the court.

On 6 February 2018, Deutsche Bank executed a settlement agreement in the amount of U.S.\$ 240 million with plaintiffs to resolve a putative class action pending as part of the U.S. dollar LIBOR MDL asserting claims based

on alleged transactions in U.S. dollar LIBOR-linked financial instruments purchased over the counter directly from LIBOR panel banks (*Mayor & City Council of Baltimore v. Credit Suisse AG*). The agreement was submitted to the court for approval, and the court granted final approval of the settlement on 25 October 2018. Accordingly, the action is not included in the total number of actions above. The settlement amount, which Deutsche Bank has paid, is no longer reflected in Deutsche Bank's litigation provisions.

Plaintiff in one of the non-MDL cases proceeding in the SDNY moved to amend its complaint following a dismissal of its claims. On 20 March 2018, the court denied plaintiff's motion for leave to amend and entered judgment in the action, closing the case. Plaintiff has appealed the court's decision, and a decision is pending. On 15 and 31 January 2019, plaintiffs filed two putative class action complaints in the SDNY against several financial institutions, alleging that the defendants, members of the panel of banks that provided U.S. dollar LIBOR submissions, the organization that administers LIBOR, and their affiliates, conspired to suppress U.S. dollar LIBOR submissions from 1 February 2014 through the present. These actions were subsequently consolidated. A third putative class action complaint was filed on 4 March 2019. These actions are not part of the U.S. dollar LIBOR MDL.

There is a further UK civil action regarding U.S. dollar LIBOR brought by the U.S. Federal Deposit Insurance Corporation, in which a claim for damages has been asserted pursuant to Article 101 of The Treaty on the Functioning of the European Union, Section 2 of Chapter 1 of the UK Competition Act 1998 and U.S. state laws. Deutsche Bank is defending this action.

A further class action regarding LIBOR, EURIBOR and TIBOR has been filed in Israel seeking damages for losses incurred by Israeli individuals and entities. Deutsche Bank is contesting service and jurisdiction.

*Yen LIBOR and Euroyen TIBOR.* On 21 July 2017, Deutsche Bank executed a settlement agreement in the amount of U.S.\$ 77 million with plaintiffs to resolve two putative class actions pending in the SDNY alleging manipulation of Yen LIBOR and Euroyen TIBOR (*Laydon v. Mizuho Bank, Ltd. and Sonterra Capital Master Fund Ltd. v. UBS AG*). The agreement was submitted to the court for approval, and the court granted final approval of the settlement on 7 December 2017. Accordingly, these two actions are not included in the total number of actions above. The settlement amount, which Deutsche Bank paid on 1 August 2017, is no longer reflected in Deutsche Bank's litigation provisions.

*EURIBOR.* On 10 May 2017, Deutsche Bank executed a settlement agreement in the amount of U.S.\$ 170 million with plaintiffs to resolve a putative class action pending in the SDNY alleging manipulation of EURIBOR (*Sullivan v. Barclays PLC*). The agreement was submitted to the court for approval, and the court granted final approval of the settlement on 18 May 2018. Accordingly, the action is not included in the total number of actions above. The settlement amount, which Deutsche Bank has paid, is no longer reflected in Deutsche Bank's litigation provisions.

*GBP LIBOR.* A putative class action alleging manipulation of the Pound Sterling (GBP) LIBOR remains pending in the SDNY. On 21 December 2018, the court partially granted defendants' motions to dismiss the action, dismissing all claims against Deutsche Bank. On 22 January 2019, the plaintiffs moved for partial reconsideration of the court's decision; that motion is fully briefed.

*CHF LIBOR.* A putative class action alleging manipulation of the Swiss Franc (CHF) LIBOR remains pending in the SDNY. It is the subject of fully briefed motions to dismiss.

*SIBOR and SOR.* A putative class action alleging manipulation of the Singapore Interbank Offered Rate (SIBOR) and Swap Offer Rate (SOR) remains pending in the SDNY. On 25 October 2018, the plaintiff filed a third amended complaint, which is the subject of a fully briefed motion to dismiss. On 26 December 2018, plaintiff moved the court for leave to file a fourth amended complaint; that motion is fully briefed.

*CDOR.* A putative class action alleging manipulation of the Canadian Dealer Offered Rate (CDOR) is pending in the SDNY. On 14 March 2019, the court granted defendants' motions to dismiss the amended complaint, dismissing all claims against Deutsche Bank. Plaintiff has filed a notice of appeal.

*Bank Bill Swap Rate Claims.* On 16 August 2016, a putative class action was filed in the U.S. District Court for the Southern District of New York against Deutsche Bank and other defendants, bringing claims based on alleged collusion and manipulation in connection with the Australian Bank Bill Swap Rate ("BBSW") on behalf of persons and entities that engaged in US-based transactions in BBSW-linked financial instruments from 2003 through the

date on which the effects of the alleged unlawful conduct ceased. The complaint alleges that the defendants, among other things, engaged in money market transactions intended to influence the BBSW fixing, made false BBSW submissions, and used their control over BBSW rules to further the alleged misconduct. An amended complaint was filed on 16 December 2016. On 26 November 2018, the court partially granted defendants' motions to dismiss the amended complaint, dismissing all claims against Deutsche Bank. On 3 April 2019, the plaintiffs filed a second amended complaint.

#### Investigations into Referral Hiring Practices and Certain Business Relationships

Certain regulators and law enforcement authorities in various jurisdictions, including the U.S. Securities and Exchange Commission and the DOJ, are investigating, among other things, Deutsche Bank's compliance with the U.S. Foreign Corrupt Practices Act and other laws with respect to the Bank's hiring practices related to candidates referred by clients, potential clients and government officials, and the Bank's engagement of finders and consultants. Deutsche Bank is responding to and continuing to cooperate with these investigations. Certain regulators in other jurisdictions have also been briefed on these investigations. The Group has recorded a provision with respect to certain of these regulatory investigations. The Group has not disclosed the amount of this provision because it has concluded that such disclosure can be expected to prejudice seriously the outcome of these regulatory investigations. Based on the facts currently known, it is not practicable at this time for the Bank to predict the timing of a resolution.

#### ISDAFIX

On 1 February 2018, the Bank entered into a settlement with the U.S. Commodity Futures Trading Commission (CFTC) to resolve the CFTC's investigation concerning the Bank's involvement in the setting of U.S. dollar ISDAFIX benchmark. The Bank agreed to pay a civil monetary penalty of U.S.\$ 70 million and to remedial undertakings, including maintaining systems and controls reasonably designed to prevent potential manipulation of interest rate swaps benchmarks.

In addition, the Bank has been named as a defendant in five putative class actions that were consolidated in the U.S. District Court for the Southern District of New York asserting antitrust, fraud, and other claims relating to an alleged conspiracy to manipulate the U.S. dollar ISDAFIX benchmark. On 8 April 2016, Deutsche Bank settled the class actions for U.S.\$ 50 million, subject to final court approval. The court approved the settlement on 30 May 2018.

#### Kirch

The public prosecutor's office in Munich (Staatsanwaltschaft München I) has conducted and is currently conducting criminal investigations in connection with the Kirch case inter alia with regard to former Deutsche Bank Management Board members. The Kirch case involved several civil proceedings between Deutsche Bank AG and Dr. Leo Kirch as well as media companies controlled by him. The key issue was whether an interview given by Dr. Rolf Breuer, then Spokesman of Deutsche Bank's Management Board, in 2002 with Bloomberg television, during which Dr. Breuer commented on Dr. Kirch's (and his companies') inability to obtain financing, caused the insolvency of the Kirch companies. In February 2014, Deutsche Bank and the Kirch heirs reached a comprehensive settlement, which has ended all legal disputes between them.

The allegations of the public prosecutor are that the relevant former Management Board members failed to correct in a timely manner factual statements made by Deutsche Bank's litigation counsel in submissions filed in one of the civil cases between Kirch and Deutsche Bank AG before the Munich Higher Regional Court and the Federal Court of Justice, after allegedly having become aware that such statements were not correct, and/or made incorrect statements in such proceedings, respectively.

On 25 April 2016, following the trial before the Regional Court Munich regarding the main investigation involving Jürgen Fitschen and four other former Management Board members, the Regional Court acquitted all of the accused, as well as the Bank, which was a secondary participant in such proceedings. On 26 April 2016, the public prosecutor filed an appeal. An appeal is limited to a review of legal errors rather than facts. On 18 October 2016, a few weeks after the written judgment was served, the public prosecutor provided notice that it will uphold its appeal only with respect to former Management Board members Jürgen Fitschen, Dr. Rolf Breuer and Dr. Josef Ackermann and that it will withdraw its appeal with respect to former Management Board members

Dr. Clemens Börsig and Dr. Tessen von Heydebreck for whom the acquittal thereby becomes binding. On 24 January 2018, the Attorney General's Office applied to convene an oral hearing before the Federal Supreme Court to decide about the Munich public prosecutor's appeal.

The other investigations by the public prosecutor (which also deal with attempted litigation fraud in the Kirch civil proceedings) are ongoing. Deutsche Bank is fully cooperating with the Munich public prosecutor's office.

The Group does not expect these proceedings to have significant economic consequences for it and has not recorded a provision or contingent liability with respect thereto.

#### KOSPI Index Unwind Matters

Following the decline of the Korea Composite Stock Price Index 200 (the "KOSPI 200") in the closing auction on 11 November 2010 by approximately 2.7 per cent., the Korean Financial Supervisory Service ("FSS") commenced an investigation and expressed concerns that the fall in the KOSPI 200 was attributable to a sale by Deutsche Bank of a basket of stocks, worth approximately € 1.6 billion, that was held as part of an index arbitrage position on the KOSPI 200. On 23 February 2011, the Korean Financial Services Commission, which oversees the work of the FSS, reviewed the FSS' findings and recommendations and resolved to take the following actions: (i) to file a criminal complaint to the Korean Prosecutor's Office for alleged market manipulation against five employees of Deutsche Bank group and Deutsche Bank's subsidiary Deutsche Securities Korea Co. (DSK) for vicarious corporate criminal liability; and (ii) to impose a suspension of six months, commencing 1 April 2011 and ending 30 September 2011, of DSK's business for proprietary trading of cash equities and listed derivatives and DMA (direct market access) cash equities trading, and the requirement that DSK suspend the employment of one named employee for six months. On 19 August 2011, the Korean Prosecutor's Office announced its decision to indict DSK and four employees of Deutsche Bank group on charges of spot/futures linked market manipulation. The criminal trial commenced in January 2012. On 25 January 2016, the Seoul Central District Court rendered guilty verdicts against a DSK trader and DSK. A criminal fine of KRW 1.5 billion (less than € 2.0 million) was imposed on DSK. The Court also ordered forfeiture of the profits generated on the underlying trading activity. The Group disgorged the profits on the underlying trading activity in 2011. The criminal trial verdicts against both the DSK trader and against DSK were overturned on appeal in a decision rendered by the Seoul High Court on 12 December 2018. The Korean Prosecutor's Office has appealed the Seoul High Court decision.

In addition, a number of civil actions have been filed in Korean courts against Deutsche Bank and DSK by certain parties who allege they incurred losses as a consequence of the fall in the KOSPI 200 on 11 November 2010. First instance court decisions were rendered against the Bank and DSK in some of these cases starting in the fourth quarter of 2015. The outstanding claims known to Deutsche Bank have an aggregate claim amount of less than € 50 million (at present exchange rates).

#### Life Settlements Investigation

On 2 May 2017, the U.S. Attorney's Office for the Southern District of New York notified the Bank that it has closed its investigation of the Bank's historical life settlements business, which included the origination and purchase of investments in life insurance assets during the 2005 to 2008 period. As is customary, the U.S. Attorney's Office further informed the Bank that it may reopen its investigation if it obtains additional information or evidence.

#### Monte Dei Paschi

In March 2013, Banca Monte dei Paschi di Siena ("MPS") initiated civil proceedings in Italy against Deutsche Bank alleging that Deutsche Bank assisted former MPS senior management in an accounting fraud on MPS, by undertaking repo transactions with MPS and "Santorini", a wholly owned special-purpose vehicle of MPS, which helped MPS defer losses on a previous transaction undertaken with Deutsche Bank. Subsequently, in July 2013, the Fondazione Monte dei Paschi di Siena ("FMPS"), MPS' largest shareholder, also commenced civil proceedings in Italy for damages based on substantially the same facts. In December 2013, Deutsche Bank reached an agreement with MPS to settle the civil proceedings and the transactions were unwound. The civil proceedings initiated by FMPS, in which damages of between € 220 million and € 381 million were claimed, were also recently settled upon payment by Deutsche Bank of € 17.5 million. . FMPS's separate claim filed in July 2014

against FMPS's former administrators and a syndicate of 12 banks including Deutsche Bank S.p.A. for € 286 million continues to be pending before the first instance Florence courts.

A criminal investigation was launched by the Siena Public Prosecutor into the transactions entered into by MPS with Deutsche Bank and certain unrelated transactions entered into by MPS with other parties. Such investigation was moved in summer 2014 from Siena to the Milan Public Prosecutors as a result of a change in the alleged charges being investigated. On 16 February 2016, the Milan Public Prosecutors issued a request of committal to trial against Deutsche Bank and six current and former employees. The committal process concluded with a hearing on 1 October 2016, during which the Milan court committed all defendants in the criminal proceedings to trial. Deutsche Bank's potential exposure is for administrative liability under Italian Legislative Decree n. 231/2001 and for civil vicarious liability as an employer of current and former Deutsche Bank employees who are being criminally prosecuted. A verdict is not expected before summer 2019.

On 22 May 2018, CONSOB, the authority responsible for regulating the Italian financial markets, issued fines of € 100,000 each against the six current and former employees of Deutsche Bank who are individual defendants in the criminal proceedings. The six individuals were also banned from performing management functions in Italy and for Italian based institutions for three to six months each. No separate fine or sanction was imposed on Deutsche Bank but it is jointly and severally liable for the six current/former Deutsche Bank employees' fines. On 14 June 2018, Deutsche Bank and the six individuals filed an appeal in the Milan Court of Appeal challenging CONSOB's decision and one of the individuals sought a stay of enforcement of the fine against that individual. The stay was granted on 21 July 2018. The hearing of the appeal is scheduled for 5 June 2019 with a verdict expected by the end of 2019.

#### Mortgage-Related and Asset-Backed Securities Matters and Investigation

*Regulatory and Governmental Matters.* Deutsche Bank, along with certain affiliates (collectively referred in these paragraphs to as "Deutsche Bank"), have received subpoenas and requests for information from certain regulators and government entities, including members of the Residential Mortgage-Backed Securities Working Group of the U.S. Financial Fraud Enforcement Task Force, concerning its activities regarding the origination, purchase, securitization, sale, valuation and/or trading of mortgage loans, residential mortgage-backed securities (RMBS), commercial mortgage-backed securities (CMBS), collateralized debt obligations (CDOs), other asset-backed securities and credit derivatives. Deutsche Bank is cooperating fully in response to those subpoenas and requests for information.

On 23 December 2016, Deutsche Bank announced that it reached a settlement-in-principle with the DOJ to resolve potential claims related to its RMBS business conducted from 2005 to 2007. The settlement became final and was announced by the DOJ on 17 January 2017. Under the settlement, Deutsche Bank paid a civil monetary penalty of U.S.\$ 3.1 billion and agreed to provide U.S.\$ 4.1 billion in consumer relief.

In September 2016, Deutsche Bank received administrative subpoenas from the Maryland Attorney General seeking information concerning Deutsche Bank's RMBS and CDO businesses from 2002 to 2009. On 1 June 2017, Deutsche Bank and the Maryland Attorney General reached a settlement to resolve the matter for U.S.\$ 15 million in cash and U.S.\$ 80 million in consumer relief (to be allocated from the overall U.S.\$ 4.1 billion consumer relief obligation agreed to as part of Deutsche Bank's settlement with the DOJ).

The Group has recorded provisions with respect to some of the outstanding regulatory investigations but not others, a portion of which relates to the consumer relief being provided under the DOJ settlement. The Group has not disclosed the amount of these provisions because it has concluded that such disclosure can be expected to prejudice seriously the resolution of these matters.

*Issuer and Underwriter Civil Litigation.* Deutsche Bank has been named as defendant in numerous civil litigations brought by private parties in connection with its various roles, including issuer or underwriter, in offerings of RMBS and other asset-backed securities. These cases, described below, allege that the offering documents contained material misrepresentations and omissions, including with regard to the underwriting standards pursuant to which the underlying mortgage loans were issued, or assert that various representations or warranties relating to the loans were breached at the time of origination. The Group has recorded provisions with respect to several of these civil cases, but has not recorded provisions with respect to all of these matters. The Group has not disclosed the

amount of these provisions because it has concluded that such disclosure can be expected to prejudice seriously the resolution of these matters.

Deutsche Bank is a defendant in a class action relating to its role as one of the underwriters of six RMBS offerings issued by Novastar Mortgage Corporation. No specific damages are alleged in the complaint. The lawsuit was brought by plaintiffs representing a class of investors who purchased certificates in those offerings. The parties reached a settlement to resolve the matter for a total of U.S.\$ 165 million, a portion of which was paid by the Bank. On 30 August 2017, FHFA/Freddie Mac filed an objection to the settlement and shortly thereafter appealed the district court's denial of their request to stay settlement approval proceedings, which appeal was resolved against FHFA/Freddie Mac. The court approved the settlement on 7. March 2019 over FHFA/Freddie Mac's objections. The parties have 60 days from entry of the order to file an appeal.

Deutsche Bank is a defendant in three actions related to RMBS offerings brought by the U.S. Federal Deposit Insurance Corporation (FDIC) as receiver for: (a) Colonial Bank (alleging no less than U.S.\$ 213 million in damages against all defendants), (b) Guaranty Bank (alleging no less than U.S.\$ 901 million in damages against all defendants), and (c) Citizens National Bank and Strategic Capital Bank (alleging an unspecified amount in damages against all defendants). In each of these actions, the appellate courts reinstated claims previously dismissed on statute of limitations grounds and petitions for rehearing and certiorari to the U.S. Supreme Court were denied. In the case concerning Colonial Bank, on 21 June 2017, the FDIC filed a second amended complaint, which defendants moved to dismiss on 7 September 2017. On 2 March 2018, the court granted in part and denied in part defendants' motion to dismiss. Fact discovery largely concluded in March 2019, and the parties are discussing a schedule for expert discovery. In the case concerning Guaranty Bank, on 14 September 2017, the court granted in part Deutsche Bank's motion for summary judgment regarding the proper method of calculating pre-judgment interest. On 31 August 2018, the court vacated the March 2019 trial date. On 27 September 2018, the court ordered that the case must go to mediation before 11 January 2019, and that it is stayed in the meantime. The parties engaged in mediation on 27 November 2018. No settlement was reached during the mediation. The court re-opened the case and, on 2 January 2019, set a trial date of 26 August 2019. On 25 March 2019, the court granted in part Deutsche Bank's motion to preclude the FDIC from asserting certain damages testimony, and denied the FDIC's motion to strike one of Deutsche Bank's damages experts. In the case concerning Citizens National Bank and Strategic Capital Bank, on 31 July 2017, the FDIC filed a second amended complaint, which defendants moved to dismiss on 14 September 2017.

The case is stayed pending resolution of defendants' motion to dismiss. Deutsche Bank is a defendant in an action brought by Royal Park Investments (as purported assignee of claims of a special-purpose vehicle created to acquire certain assets of Fortis Bank) alleging common law claims related to the purchase of RMBS. The complaint did not specify the amount of damages sought. On 17 April 2017, the court dismissed the complaint, and on 13 February 2018 the plaintiff filed its appeal. On 9 October 2018, the dismissal was affirmed by the appellate court. Plaintiff filed a motion for leave to appeal to the New York Court of Appeals on 8 November 2018. Defendants filed an opposition on 21 November 2018, which completed the briefing. On 15 January 2019, the New York Court of Appeals denied the motion.

In June 2014, HSBC, as trustee, brought an action in New York state court against Deutsche Bank to revive a prior action, alleging that Deutsche Bank failed to repurchase mortgage loans in the ACE Securities Corp. 2006-SL2 RMBS offering. The revival action was stayed during the pendency of an appeal of the dismissal of a separate action wherein HSBC, as trustee, brought an action against Deutsche Bank alleging breaches of representations and warranties made by Deutsche Bank concerning the mortgage loans in the same offering. On 29 March 2016, the court dismissed the revival action, and on 29 April 2016, plaintiff filed a notice of appeal. Plaintiff's appeal has been adjourned to the appellate court's September 2019 term. Deutsche Bank is a defendant in two cases brought initially by RMBS investors and subsequently by HSBC, as trustee, in New York state court. The cases allege breaches of loan-level representations and warranties in the ACE Securities Corp. 2006-FM1 and ACE Securities Corp. 2007-ASAP1 RMBS offerings, respectively. Both cases were dismissed on statute of limitations grounds by the trial court on 28 March 2018. Plaintiff has appealed the dismissals, which appeals remain pending.

In the actions against Deutsche Bank solely as an underwriter of other issuers' RMBS offerings, Deutsche Bank has contractual rights to indemnification from the issuers, but those indemnity rights may in whole or in part prove effectively unenforceable where the issuers are now or may in the future be in bankruptcy or otherwise defunct.

*Trustee Civil Litigation.* Deutsche Bank is a defendant in civil lawsuits brought by various groups of investors concerning its role as trustee of certain RMBS trusts. The actions generally allege claims for breach of contract, breach of fiduciary duty, breach of the duty to avoid conflicts of interest, negligence and/or violations of the U.S. Trust Indenture Act of 1939, based on the trustees' alleged failure to perform adequately certain obligations and/or duties as trustee for the trusts. Two putative class actions brought by a group of investors, including funds managed by BlackRock Advisors, LLC, PIMCO-Advisors, L.P., and others recently were settled. One of these putative class actions was pending in the Superior Court of California until the court dismissed the action with prejudice on 11 January 2019. The second putative class action was pending in the U.S. District Court for the Southern District of New York and was dismissed with prejudice on 6 December 2018. Deutsche Bank was also a defendant in a lawsuit brought by the Western and Southern Life Insurance Company and five related entities, but on 28 September 2017, plaintiffs filed a notice of voluntary dismissal of their claims. Deutsche Bank is currently a defendant in six separate civil lawsuits – two putative class actions and four individual lawsuits. The putative class actions were brought by Royal Park Investments SA/NV, concern 10 trusts, and are pending in the U.S. District Court for the Southern District of New York. In the first case, which plaintiff filed on 18 June 2014, plaintiff alleges that the trusts suffered total realized collateral losses of more than U.S.\$ 3.1 billion, although the complaint does not specify a damage amount. On 29 March 2018, the court issued an order denying plaintiff's renewed motion for class certification, and on 7 August 2018, the court of appeals denied plaintiff's motion for leave to immediately appeal the denial of class certification. On 28 September 2018, the court denied plaintiff's motion seeking permission to prove liability and damages using a statistical sample of the loans at issue in the case. Discovery is ongoing. On 4 August 2017, Royal Park filed a separate, additional class action complaint against the trustee asserting claims for breach of contract, unjust enrichment, conversion, breach of trust, equitable accounting and declaratory and injunctive relief arising out of the payment from trust funds of the trustee's legal fees and expenses in the other, ongoing Royal Park litigation. On 13 August 2018, the court stayed the action pending resolution of the underlying Royal Park litigation and denied the trustee's motion to dismiss without prejudice to its refiling once the stay is lifted.

The four individual lawsuits include actions by (a) the National Credit Union Administration Board ("NCUA"), as an investor in 37 trusts, which allegedly suffered total realized collateral losses of U.S.\$ 8.5 billion; (b) certain CDOs (collectively, "Phoenix Light") that hold RMBS certificates issued by 43 RMBS trusts, and seeking "hundreds of millions of dollars in damages"; (c) Commerzbank AG, as an investor in 50 RMBS trusts, seeking recovery for alleged "hundreds of millions of dollars in losses;" and (d) IKB International, S.A. in Liquidation and IKB Deutsche Industriebank AG (collectively, "IKB"), as an investor in 30 RMBS trusts, seeking more than U.S. \$ 268 million of damages. In the NCUA case, NCUA notified the court on 31 August 2018 that it was dismissing claims relating to 60 out of the 97 trusts originally at issue; NCUA's a motion for leave to amend its complaint and Deutsche Bank's motion to dismiss the complaint if the court grants NCUA's motion for leave to amend are fully briefed as of 19 December 2018. In the Phoenix Light case, the plaintiffs filed an amended complaint on 27 September 2017, and the trustees filed an answer to the complaint on 13 November 2017. On 7 December 2018, the parties filed motions for summary judgment. In the Commerzbank case, the plaintiff filed an amended complaint on 30 November 2017, and the trustees filed an answer to the complaint on 29 January 2018. On 7 December 2018, the parties filed motions for summary judgment. In the IKB case, the court heard oral argument on the trustee's motion to dismiss on 3 May 2017, but has not yet issued a decision. On 20 June 2017, the IKB plaintiffs stipulated to the dismissal with prejudice of all claims asserted against Deutsche Bank concerning four trusts. Discovery is ongoing.

The Group has established contingent liabilities and provisions with respect to certain of these matters but the Group has not disclosed the amounts because it has concluded that such disclosure can be expected to prejudice seriously the outcome of these matters.

#### Parmalat Litigation

Following the bankruptcy of the Italian company Parmalat, prosecutors in Parma conducted a criminal investigation against various bank employees, including employees of Deutsche Bank, and brought charges of fraudulent bankruptcy and usury against a number of Deutsche Bank employees and others. The trial commenced in September 2009 and a verdict was recently delivered in July 2017. The Deutsche Bank employees were acquitted and, as a result thereof, Deutsche Bank will not be held to have vicarious liability in connection with the actions of the bank employees. The court published its reasoning in January 2018, and the prosecutor did not appeal within the applicable time period, so that the criminal proceedings can now be considered to be at an end.

On 28 June 2018, Deutsche Bank received formal certification from the Court of Parma that its decision had become final.

#### Pas-de-Calais Habitat

On 31 May 2012, Pas-de-Calais Habitat ("PDCH"), a public housing office, initiated proceedings before the Paris Commercial Court against Deutsche Bank in relation to four swap contracts entered into in 2006, restructured on 19 March 2007 and 18 January 2008 and subsequently restructured in 2009 and on 15 June 2010. PDCH asked the Court to declare the 19 March 2007 and 18 January 2008 swap contracts null and void, or terminated, or to grant damages to PDCH in an amount of approximately € 170 million on the grounds that, inter alia, Deutsche Bank committed fraudulent and deceitful acts, manipulated the LIBOR and EURIBOR rates which are used as a basis for calculating the sums due by PDCH under the swap contracts and breached its obligations to warn, advise and inform PDCH. In December 2018, Deutsche Bank and PDCH reached an agreement to settle these proceedings.

#### Pension Plan Assets

The Group sponsors a number of post-employment benefit plans on behalf of its employees. In Germany, the pension assets that fund the obligations under these pension plans are held by Benefit Trust GmbH. The German tax authorities are challenging the tax treatment of certain income received by Benefit Trust GmbH in the years 2010 to 2013 with respect to its pension plan assets. For the year 2010 Benefit Trust GmbH paid the amount of tax and interest assessed of € 160 million to the tax authorities and is seeking a refund of the amounts paid in litigation. For 2011 to 2013 the matter is stayed pending the outcome of the 2010 tax litigation. The amount of tax and interest under dispute for years 2011 to 2013, which also has been paid to the tax authorities, amounts to € 456 million. In March 2017, the lower fiscal court ruled in favor of Benefit Trust GmbH and in September 2017 the tax authorities appealed the decision to the German supreme fiscal court (*Bundesfinanzhof*). A decision by the supreme fiscal court is not expected for a number of years.

#### Postbank Voluntary Public Takeover Offer

On 12 September 2010, Deutsche Bank announced the decision to make a voluntary takeover offer for the acquisition of all shares in Deutsche Postbank AG (Postbank). On 7 October 2010, the Bank published the official offer document. In its takeover offer, Deutsche Bank offered Postbank shareholders consideration of € 25 for each Postbank share. The takeover offer was accepted for a total of approximately 48.2 million Postbank shares.

In November 2010, a former shareholder of Postbank, Effecten-Spiegel AG, which had accepted the takeover offer, brought a claim against Deutsche Bank alleging that the offer price was too low and was not determined in accordance with the applicable law of the Federal Republic of Germany. The plaintiff alleges that Deutsche Bank had been obliged to make a mandatory takeover offer for all shares in Postbank, at the latest, in 2009. The plaintiff avers that, at the latest in 2009, the voting rights of Deutsche Post AG in Postbank had to be attributed to Deutsche Bank AG pursuant to Section 30 of the German Takeover Act. Based thereon, the plaintiff alleges that the consideration offered by Deutsche Bank AG for the shares in Postbank in the 2010 voluntary takeover offer needed to be raised to € 57.25 per share.

The Regional Court Cologne (Landgericht) dismissed the claim in 2011 and the Cologne appellate court dismissed the appeal in 2012. The Federal Court set aside the Cologne appellate court's judgment and referred the case back to the appellate court. In its judgment, the Federal Court stated that the appellate court had not sufficiently considered the plaintiff's allegation that Deutsche Bank AG and Deutsche Post AG "acted in concert" in 2009.

Starting in 2014, additional former shareholders of Postbank, who accepted the 2010 tender offer, brought similar claims as Effecten-Spiegel AG against Deutsche Bank which are pending with the Regional Court Cologne and the Higher Regional Court of Cologne, respectively. On 20 October 2017, the Regional Court Cologne handed down a decision granting the claims in a total of 14 cases which were combined in one proceeding. The Regional Court Cologne took the view that Deutsche Bank was obliged to make a mandatory takeover offer already in 2008 so that the appropriate consideration to be offered in the takeover offer should have been € 57.25 per share. Taking the consideration paid into account, the additional consideration per share owed to shareholders which have accepted the takeover offer would thus amount to € 32.25. Deutsche Bank appealed this decision and the

appeal has been assigned to the 13th Senate of the Higher Regional Court of Cologne, which also is hearing the appeal of Effecten-Spiegel AG.

On 8 November 2017, a hearing took place before the Higher Regional Court of Cologne in the Effecten-Spiegel case. In that hearing, the Higher Regional Court indicated that it disagreed with the conclusions of the Regional Court Cologne and took the preliminary view that Deutsche Bank was not obliged to make a mandatory takeover offer in 2008 or 2009. Initially the Higher Regional Court resolved to announce a decision on 13 December 2017. However, this was postponed to February 2018 because the plaintiff challenged the three members of the 13th Senate of the Higher Regional Court of Cologne for alleged prejudice. The challenge was rejected by the Higher Regional Court of Cologne at the end of January 2018. In February 2018, the court granted a motion by Effecten-Spiegel AG to re-open the hearing.

The Higher Regional Court informed the parties by notice dated 19 February 2019 that it has doubts that an acting in concert can be based on the contractual clauses which the Regional Court Cologne found to be sufficient to assume an acting in concert (and to grant the plaintiffs' claims in October 2017). Against this background, the Higher Regional Court resolved to take further evidence and to call a number of witnesses in both cases who shall be heard from 30 October 2019 until at least 11 December 2019 in weekly hearings. The individuals to be heard include current and former board members of Deutsche Bank, Deutsche Post AG and Postbank as well as other persons involved in the Postbank transaction. In addition, the court had informed the parties that it was considering to request from Deutsche Bank the production of relevant transaction documents. Thereafter, on 15 April 2019, the Higher Regional Court Cologne issued non-appealable orders for the production of relevant transaction documents by 6 May 2019. The documents to be produced by Deutsche Bank include the original sale and purchase agreement related to the acquisition of Postbank shares between Deutsche Bank and Deutsche Post AG dated 12 September 2008, the related postponement agreement dated 22 December 2008 and the related amendment agreement dated 14 January 2009. In addition, Deutsche Bank was ordered to produce the indenture for a mandatory exchangeable bond dated 25 February 2009 as well as a pledge agreement dated 30 December 2008. The court orders currently only relate to the main bodies of the respective contracts, but the court may extend its orders to exhibits of those contracts at a later point in time. This extension of the taking of evidence may further delay the proceedings. Stefan Krause, a former Deutsche Bank Management Board member, (who is to testify on request of the plaintiffs) has invoked the right to refuse to give testimony because in February 2018 a law firm representing some plaintiffs in the above-mentioned civil actions had filed a criminal complaint with the public prosecutor in Frankfurt am Main against certain Deutsche Bank personnel alleging that they engaged in fraudulent conduct in connection with the takeover offer. However, the competent public prosecutors rejected opening proceedings. On 10 April 2019, the Higher Regional Court Cologne issued a non-appealable decision acknowledging Mr. Krause's right to refuse to give testimony. Deutsche Bank has been served with a large number of additional lawsuits filed against Deutsche Bank shortly before the end of 2017, almost all of which are now pending with the Regional Court Cologne. Some of the new plaintiffs allege that the consideration offered by Deutsche Bank AG for the shares in Postbank in the 2010 voluntary takeover should be raised to € 64.25 per share. The claims for payment against Deutsche Bank in relation to these matters total almost € 700 million (excluding interest).

The Group has established a contingent liability with respect to these matters but the Group has not disclosed the amount of this contingent liability because it has concluded that such disclosure can be expected to prejudice seriously the outcome of these matters.

#### Further Proceedings Relating to the Postbank Takeover

In September 2015, former shareholders of Postbank filed in the Regional Court Cologne shareholder actions against Postbank to set aside the squeeze-out resolution taken in the shareholders meeting of Postbank in August 2015. Among other things, the plaintiffs allege that Deutsche Bank was subject to a suspension of voting rights with respect to its shares in Postbank based on the allegation that Deutsche Bank failed to make a mandatory takeover offer at a higher price in 2009. The squeeze out is final and the proceeding itself has no reversal effect, but may result in damage payments. The claimants in this proceeding refer to legal arguments similar to those asserted in the Effecten-Spiegel proceeding described above. In a decision on 20 October 2017, the Regional Court Cologne declared the squeeze-out resolution to be void. The court, however, did not rely on a suspension of voting rights due to an alleged failure of Deutsche Bank to make a mandatory takeover offer, but argued that Postbank violated information rights of Postbank shareholders in Postbank's shareholders meeting in August 2015. Postbank has appealed this decision.

The legal question of whether Deutsche Bank had been obliged to make a mandatory takeover offer for all Postbank shares prior to its 2010 voluntary takeover may also impact two pending appraisal proceedings (*Spruchverfahren*). These proceedings were initiated by former Postbank shareholders with the aim to increase the cash compensation offered in connection with the squeeze-out of Postbank shareholders in 2015 and the cash compensation offered and annual guaranteed dividend paid in connection with the execution of a domination and profit and loss transfer agreement (*Beherrschungs- und Gewinnabführungsvertrag*) between DB Finanz-Holding AG (now DB Beteiligungs-Holding GmbH) and Postbank in 2012. The Regional Court Cologne issued resolutions indicating that it is inclined to consider a potential obligation of Deutsche Bank to make a mandatory takeover offer for Postbank at an offer price of € 57.25 when determining the adequate cash compensation in the appraisal proceedings. The cash compensation paid in connection with the domination and profit and loss transfer agreement was € 25.18 and was accepted for approximately 0.5 million shares. The squeeze-out compensation paid in 2015 was € 35.05 and approximately 7 million shares were squeezed-out.

The Group has not disclosed whether it has established a provision or contingent liability with respect to this matter because it has concluded that such disclosure can be expected to prejudice seriously its outcome.

#### Precious Metals Investigations and Litigations

Deutsche Bank received inquiries from certain regulatory and law enforcement authorities, including requests for information and documents, pertaining to investigations of precious metals trading and related conduct. Deutsche Bank is cooperating with these investigations, and engaging with relevant authorities, as appropriate. On 29 January 2018, the Bank entered into a U.S.\$ 30 million settlement with the U.S. Commodity Futures Trading Commission ("CFTC") to resolve the CFTC's investigation concerning spoofing, manipulation and attempted manipulation in precious metals futures, as well as the manipulation and attempted manipulation of stop loss orders. The order requires that the Bank, among other things, maintain systems and controls reasonably designed to detect spoofing, and maintain training regarding spoofing, manipulation and attempted manipulation. The order also requires the Bank to continue to cooperate with the CFTC.

Deutsche Bank is a defendant in two consolidated class action lawsuits pending in the U.S. District Court for the Southern District of New York. The suits allege violations of U.S. antitrust law, the U.S. Commodity Exchange Act and related state law arising out of the alleged manipulation of gold and silver prices through participation in the Gold and Silver Fixes, but do not specify the damages sought. Deutsche Bank has reached agreements to settle the gold action for U.S.\$ 60 million and the silver action for U.S.\$ 38 million. The agreements remain subject to final court approval.

In addition, Deutsche Bank is a defendant in Canadian class action proceedings in the provinces of Ontario and Quebec concerning gold and silver. Each of the proceedings seeks damages for alleged violations of the Canadian Competition Act and other causes of action. Deutsche Bank has reached agreements to settle these actions. The agreements remain subject to court approval, and the amounts are not material to the Bank.

#### Pre-Release ADRs

Deutsche Bank and certain affiliates have received inquiries from certain European regulatory, tax and law enforcement authorities, including requests for documents and information, with respect to American Depositary Receipts (ADRs), including ADRs that have been issued on a "pre-release" basis ("pre-release ADRs"). Deutsche Bank is cooperating with these inquiries.

On 20 July 2018, the U.S. Securities and Exchange Commission (SEC) announced that it had reached civil settlements with Deutsche Bank Trust Company Americas ("DBTCA") and Deutsche Bank Securities Inc. ("DBSI") in this matter. The settlements resolved SEC claims that DBTCA was negligent in issuing pre-release ADRs under certain circumstances, and that DBSI failed reasonably to supervise employees who were negligent in borrowing and lending pre-release ADRs. The settlements required DBTCA and DBSI to pay a combined financial sanction of approximately US\$ 75 million, and the SEC ordered DBTCA to cease and desist from committing or causing any violations and any future violations of Section 17(a)(3) of the Securities Act of 1933.

### Regula Ltd. Clients AML Investigations

On 29 November 2018, based on a search warrant issued by the Local Court (Amtsgericht) in Frankfurt, Deutsche Bank's offices in Frankfurt were searched by German law enforcement authorities on the suspicion that two employees – and as-yet unidentified further individuals – deliberately abstained from issuing suspicious activity reports (SARs) in a timely manner and aided and abetted money laundering in connection with Deutsche Bank's offshore trust business. The physical searches ended on 30 November 2018. Nevertheless, the search remains formally open until Deutsche Bank has completed additional data deliveries. The Bank is cooperating in the investigation, as has been publicly acknowledged by the Frankfurt Public Prosecutor's Office.

### Russia/UK Equities Trading Investigation

Deutsche Bank has investigated the circumstances around equity trades entered into by certain clients with Deutsche Bank in Moscow and London that offset one another. The total volume of transactions reviewed is significant. Deutsche Bank's internal investigation of potential violations of law, regulation and policy and into the related internal control environment has concluded, and Deutsche Bank has assessed the findings identified during the investigation; to date it has identified certain violations of Deutsche Bank's policies and deficiencies in Deutsche Bank's control environment. Deutsche Bank has advised regulators and law enforcement authorities in several jurisdictions (including Germany, Russia, the UK and the United States) of this investigation. Deutsche Bank has taken disciplinary measures with regards to certain individuals in this matter.

On 30 and 31 January 2017, the DFS and the FCA announced settlements with the Bank related to their investigations into this matter. The settlements conclude the DFS and the FCA's investigations into the Bank's anti-money laundering (AML) control function in its investment banking division, including in relation to the equity trading described above. Under the terms of the settlement agreement with the DFS, Deutsche Bank entered into a consent order, and agreed to pay civil monetary penalties of U.S.\$ 425 million and to engage an independent monitor for a term of up to two years. Under the terms of the settlement agreement with the FCA, Deutsche Bank agreed to pay civil monetary penalties of approximately GBP 163 million. On 30 May 2017, the Federal Reserve announced its settlement with the Bank resolving this matter as well as additional AML issues identified by the Federal Reserve. Deutsche Bank paid a penalty of U.S.\$ 41 million. Deutsche Bank also agreed to retain independent third parties to assess its Bank Secrecy Act/AML program and review certain foreign correspondent banking activity of its subsidiary Deutsche Bank Trust Company Americas. The Bank is also required to submit written remediation plans and programs.

Deutsche Bank continues to cooperate with regulators and law enforcement authorities, including the DOJ, which has its own ongoing investigation into these securities trades. The Group has recorded a provision with respect to the remaining investigation. The Group has not disclosed the amount of this provision because it has concluded that such disclosure can be expected to prejudice seriously the outcome of this matter.

### Sebastian Holdings Litigation

Litigation with Sebastian Holdings Inc. (SHI) in respect of claims arising from FX trading activities concluded in the UK Commercial Court in November 2013 when the court awarded Deutsche Bank approximately U.S.\$ 236 million plus interest and dismissed all of SHI's claims. On 27 January 2016, a New York court dismissed substantially similar claims by SHI against Deutsche Bank when it granted Deutsche Bank's motion for summary judgment based on the UK Commercial Court's judgment. The New York court also denied SHI's motion for leave to file an amended complaint. The New York court's decisions were affirmed on appeal on 28 February 2017. The New York State Court of Appeals denied SHI's motion for leave to appeal on 6 June 2017. The time for SHI to seek review by the U.S. Supreme Court has expired, and the decision is now final.

### Sovereign, Supranational and Agency Bonds (SSA) Investigations and Litigations

Deutsche Bank has received inquiries from certain regulatory and law enforcement authorities, including requests for information and documents, pertaining to SSA bond trading. Deutsche Bank is cooperating with these investigations. On 20 December 2018, the European Commission sent a Statement of Objections to Deutsche Bank regarding a potential breach of EU antitrust rules in relation to secondary market trading of SSA bonds denominated in U.S. dollars. The sending of a Statement of Objections is a step in the European Commission's investigation and does not prejudice the outcome of the investigation. Deutsche Bank has proactively cooperated with the European Commission in this matter and as a result has been granted immunity. In accordance with the European Commission's guidelines, Deutsche Bank does not expect a financial penalty.

Deutsche Bank is a defendant in several putative class action complaints filed in the U.S. District Court for the Southern District of New York by alleged direct and indirect market participants claiming violations of U.S. antitrust law and common law related to alleged manipulation of the secondary trading market for SSA bonds. Deutsche Bank has reached an agreement to settle the actions by direct market participants for the amount of U.S.\$ 48.5 million and has recorded a provision in the same amount. The settlement is subject to court approval. The action filed on behalf of alleged indirect market participants is in its early stages.

Deutsche Bank is also a defendant in putative class actions filed on 7 November and 5 December 2017 in the Ontario Superior Court of Justice and Federal Court of Canada respectively, claiming violations of antitrust law and the common law relating to alleged manipulation of secondary trading of SSA bonds. The complaints rely on allegations similar to those in the U.S. class actions involving SSA bond trading, and seek compensatory and punitive damages. The cases are in their early stages.

Deutsche Bank was named as a defendant in several putative class action complaints filed in the U.S. District Court for the Southern District of New York alleging violations of U.S. antitrust law and a claim for unjust enrichment relating to Mexican government bond trading. The case is in its early stages. Deutsche Bank has also been named as a defendant in several putative class action complaints filed in the U.S. District Court for the Southern District of New York alleging violations of antitrust law and common law related to alleged manipulation of the secondary trading market for U.S. Agency bonds. These cases are in the early stages.

Other than as noted above, the Group has not disclosed whether it has established provisions or contingent liabilities with respect to the matters referred to above because it has concluded that such disclosure can be expected to prejudice seriously their outcome.

### Transfer of Lease Assets

In December 2017, a claim for damages was filed with the Regional Court Frankfurt am Main against Deutsche Bank AG in the amount of approximately € 155 million (excluding interest). In 2006, Deutsche Bank AG (indirectly, through a special-purpose vehicle) entered into transactions according to which the plaintiff transferred certain lease assets to the special-purpose vehicle against, among others things, receipt of a preference dividend. The plaintiff alleges that Deutsche Bank had entered into an agreement with it under which Deutsche Bank provided flawed contractual documentation as a result of which the German tax authorities have disallowed the plaintiff's expected tax savings. At a hearing in September 2018, the court indicated that it intended to dismiss the claims. The plaintiff filed a post-hearing brief arguing that the claims should not be dismissed. In December 2018, the court issued an advisory order according to which Deutsche Bank AG is required to respond to the plaintiff's brief, and scheduled a further hearing for the end of June 2019.

### Trust Preferred Securities Litigation

Deutsche Bank and certain of its affiliates and former officers are the subject of a consolidated putative class action, filed in the United States District Court for the Southern District of New York, asserting claims under the federal securities laws on behalf of persons who purchased certain trust preferred securities issued by Deutsche Bank and its affiliates between October 2006 and May 2008. In a series of opinions, the court dismissed all claims as to four of the six offerings at issue, but allowed certain alleged omissions claims relating to the November 2007 and February 2008 offerings to proceed. The district court limited claims relating to the two offerings remaining in the case to alleged failures (i) to disclose "any known trends or uncertainties that have had or that the registrant reasonably expects will have a material favorable or unfavorable impact on net sales or revenues or income from

continuing operations" and (ii) to disclose "the most significant factors that make the offering speculative or risky" pursuant to Items 303 and 503 of Regulation S-K. Defendants have served Answers denying all wrongdoing. On 2 October 2018, the district court certified a plaintiff class as to both offerings. Merits discovery is ongoing.

The Group has not disclosed whether it has established a provision or contingent liability with respect to this matter because it has concluded that such disclosure can be expected to prejudice seriously its outcome.

#### U.S. Embargoes-Related Matters

Deutsche Bank has received requests for information from certain U.S. regulatory and law enforcement agencies concerning its historical processing of U.S. dollar payment orders through U.S. financial institutions for parties from countries subject to U.S. embargo laws in connection with investigations into whether such processing complied with U.S. federal and state laws. In 2006, Deutsche Bank voluntarily decided that it would not engage in new U.S. dollar business with counterparties in Iran, Sudan, North Korea and Cuba and with certain Syrian banks, and to exit existing U.S. dollar business with such counterparties to the extent legally possible. In 2007, Deutsche Bank decided that it would not engage in any new business, in any currency, with counterparties in Iran, Syria, Sudan and North Korea and to exit existing business, in any currency, with such counterparties to the extent legally possible; it also decided to limit its non-U.S. dollar business with counterparties in Cuba. On 3 November 2015, Deutsche Bank entered into agreements with the New York State Department of Financial Services and the Federal Reserve Bank of New York to resolve their investigations of Deutsche Bank. Deutsche Bank paid the two agencies U.S.\$ 200 million and U.S.\$ 58 million, respectively, and agreed not to rehire certain former employees. In addition, the New York State Department of Financial Services ordered Deutsche Bank to terminate certain employees and Deutsche Bank agreed to retain an independent monitor for one year, and the Federal Reserve Bank of New York ordered certain remedial measures including ensuring an effective OFAC compliance program and an annual review of such program by an independent party until the Federal Reserve Bank of New York is satisfied as to its effectiveness.

The Group has not disclosed whether it has established a provision or contingent liability with respect to this matter because it has concluded that such disclosure can be expected to prejudice seriously its outcome.

#### U.S. Treasury Securities Investigations and Litigations

Deutsche Bank has received inquiries from certain regulatory and law enforcement authorities, including requests for information and documents, pertaining to U.S. Treasuries auctions, trading, and related market activity. Deutsche Bank is cooperating with these investigations.

Deutsche Bank's subsidiary Deutsche Bank Securities Inc. (DBSI) was a defendant in several putative class actions alleging violations of U.S. antitrust law, the U.S. Commodity Exchange Act and common law related to the alleged manipulation of the U.S. Treasury securities market. These cases have been consolidated in the Southern District of New York. On 16 November 2017, plaintiffs filed a consolidated amended complaint, which did not name DBSI as a defendant. On 11 December 2017, the court dismissed DBSI from the class action without prejudice.

The Group has not disclosed whether it has established a provision or contingent liability with respect to these matters because it has concluded that such disclosure can be expected to prejudice seriously their outcome.

#### Vestia

In December 2016, Stichting Vestia, a Dutch housing association, commenced proceedings against Deutsche Bank in England. The proceedings relate to derivatives entered into between Stichting Vestia and Deutsche Bank between 2005 and 2012. Stichting Vestia alleges that certain of the transactions entered into by it with Deutsche Bank should be set aside on the grounds that they were not within its capacity and/or were induced by the bribery of Vestia's treasurer by an intermediary involved in those transactions. The sums claimed by Stichting Vestia are made up of different elements, some of which have not yet been quantified. The amount claimed at this stage ranges between € 757 million and € 837 million, plus compound interest. The trial is due to commence on 9 May 2019 and is scheduled to last for 8 to 10 weeks. Deutsche Bank is defending against the claim.

## DESCRIPTION OF THE SECURITIES

### DESCRIPTION OF INTEREST RATE AND REDEMPTION PROVISIONS

The Programme contemplates the issue of a wide variety of Securities with different interest and redemption provisions.

#### Interest

The Securities to be issued under the Programme may pay either (a) fixed amounts of interest, (b) variable amounts of interest or (c) no interest at all. An overview of the different interest rate provisions is set out below, where applicable specifying provisions which may occur in relation to certain types of Exempt Securities only.

##### *Fixed Rate Interest*

Securities bearing or paying a fixed rate of interest may either pay a specified fixed amount of interest on specified interest payment dates or, depending on the fulfilment of certain conditions, pay a fixed amount of interest on specified interest payment dates.

The fixed rate of interest may apply to the Securities for the duration of the Securities or for a limited period of time during the life of the Securities. Where the specified interest payment dates provide for irregular interest accrual periods, a day count fraction agreed between the Issuer and the relevant Dealer will be applied and the amount of interest will be calculated on the basis of that day count fraction.

##### *Floating and other Variable Rate Interest*

Securities bearing or paying a floating or other variable rate of interest may either pay a variable amount of interest on specified interest payment dates or, depending on the fulfilment of certain conditions, pay a variable amount of interest on specified interest payment dates.

The floating or other variable rate of interest may apply to the Securities for the duration of the Securities or for a limited period of time during the life of the Securities. Interest in respect of each interest period will be calculated on the basis of the day count fraction agreed between the Issuer and the relevant Dealer and will be payable on specified interest payment dates.

Floating or other variable rates of interest may be determined by reference to a rate determined:

- (a) on the basis of a reference rate appearing on the agreed screen page of a commercial quotation service; or
- (b) on the same basis as the floating rate under a notional interest rate swap incorporating the 2006 ISDA Definitions; or
- (c) by reference to the value or performance of an underlying reference item which is an inflation index, underlying reference items comprising one or more indices or equities or, in the case of Exempt Securities, one or more other underlying reference items ("**Reference Items**", and each a "**Reference Item**") (described below); or
- (d) in the case of Exempt Securities, on such other basis as may be agreed between the Issuer and the relevant Dealer.

In addition, a margin agreed between the Issuer and the relevant Dealer may be applied to the floating or other variable rate of interest.

Securities bearing or paying Reference Item linked interest may only be Notes.

### *Inverse Floating Rate Notes*

Inverse Floating Rate Notes have an interest rate equal to a fixed rate minus a rate based upon a reference rate.

#### **Reference Rates**

A reference rate may be any one or more of EURIBOR (the European Interbank Offered Rate), LIBOR (the London Interbank Offered Rate), STIBOR (the Stockholm Interbank Offered Rate), NIBOR (the Norwegian Interbank Offered Rate), BBSW (the Australian Bank Bill Swap Rate), SONIA (the daily Sterling Overnight Index Average), a CMS (constant maturity swap) rate or any other interest or other rate that appears on a reference page.

If the reference rate for the Securities is EURIBOR, LIBOR, STIBOR, NIBOR, BBSW or SONIA, the floating rate will be determined by reference to the relevant reference page.

EURIBOR is the rate of interest quoted by banks operating in the European interbank market for the Euro.

LIBOR is the rate of interest quoted by banks operating in the London interbank market for certain specified currencies.

STIBOR is the rate of interest based on the interest rates at which banks offer to lend unsecured funds to other banks in the Stockholm interbank market.

NIBOR is the rate of interest lenders require for unsecured money market lending in Norwegian Kroner (NOK).

BBSW is the rate for Australian prime bank eligible securities with tenors of 1 to 6 months.

SONIA is the average of the interest rates that banks pay to borrow Sterling in unsecured overnight transactions from other financial institutions in the London market.

If the reference rate for interest payments is a CMS rate, the floating rate will be determined by reference to the relevant reference page. The rate is reset periodically. Details of the relevant CMS rate will be specified in the applicable Final Terms (or Pricing Supplement, in the case of Exempt Securities).

If the floating or other variable rate of interest is calculated by reference to a reference rate that is different to those contemplated above, then the reference page for such reference rate will be set out in the applicable Final Terms (or Pricing Supplement, in the case of Exempt Securities) or, in the case of Exempt Securities, if the reference rate is not available on a recognised reference page published by an information provider, details on how the reference rate is calculated will be set out in the applicable Pricing Supplement. For the avoidance of doubt, potential investors should note that the rates specified above can be used in the calculation of the redemption amount in respect of a series of Securities.

#### *Other*

Interest bearing Securities may be issued which bear or pay interest based on any combination of the above, for example bearing or paying interest based on a combination of fixed and variable rates.

#### *Non-Interest Bearing Securities and Zero Coupon Securities*

Securities may be issued under the Programme that do not bear or pay any interest including Zero Coupon Securities which amortise over the life of the Securities. Zero Coupon Securities may be issued at a discount to par.

#### **Redemption**

The Securities issued under the Programme may be redeemed at maturity or in certain circumstances prior to maturity.

If Securities are redeemed at maturity the redemption amount may be equal to the principal amount (redemption at par) or determined by reference to:

- (a) the value or performance of one or more underlying Reference Items (as explained below in "*Reference Items*"); or
- (b) a reference rate appearing on the agreed screen page of a commercial quotation service; or
- (c) in the case of Exempt Securities, the floating rate under a notional interest rate swap incorporating the 2006 ISDA Definitions; or
- (d) in the case of Exempt Securities, on such other basis as may be agreed between the Issuer and the relevant Dealer.

If the Securities are redeemed prior to maturity and if specified in the applicable Final Terms (or Pricing Supplement, in the case of Exempt Securities), early redemption unwind costs may be deducted from the early redemption amount. The early redemption unwind costs may include, but are not limited to, the Issuer's costs associated with unwinding any related hedging arrangements related to the Securities it may have in place.

The Securities may be redeemed prior to maturity in the following circumstances:

- (a) at the option of the Issuer (in the case of (i) Securities where the Issuer Call option is specified as applicable in the applicable Final Terms or Pricing Supplement, in the case of Exempt Securities or (ii) certain Securities bearing or paying a floating or other variable rate of interest following a rate replacement event);
- (b) at the option of the Securityholder (in the case of Securities where the Investor Put option is specified as applicable in the applicable Final Terms or Pricing Supplement, in the case of Exempt Securities);
- (c) for taxation reasons (if specified in the applicable Final Terms or Pricing Supplement, in the case of Exempt Securities);
- (d) following an illegality;
- (e) following a regulatory event (if specified in the applicable Final Terms or Pricing Supplement, in the case of Exempt Securities);

In each case the amount received by an investor may be (i) par, (ii) below par or (iii) above par, as specified in the applicable Final Terms (or Pricing Supplement, in the case of Exempt Securities).

Depending on the nature of the Securities, redemption at maturity or prior to maturity may be by way of (A) cash settlement, (B) physical settlement or (C) cash and/or physical settlement.

Securities for which redemption is Reference Item linked may only be Notes.

An overview of certain redemption provisions is set out below.

#### *Early Redemption at the option of the Issuer*

#### *Redemption following an Illegality*

## REGULATORY BAIL-IN AND OTHER RESOLUTION MEASURES

On 15 May 2014, the European Parliament and the Council of the European Union adopted Directive 2014/59/EU establishing a framework for the recovery and resolution of credit institutions and investment firms (commonly referred to as the "Bank Recovery and Resolution Directive" or the "**BRRD**") which was transposed into German law by the Recovery and Resolution Act (*Sanierungs- und Abwicklungsgesetz*, or the "**SAG**") with effect from 1 January 2015. For banks established in the eurozone, such as the Issuer, which are supervised within the framework of the Single Supervisory Mechanism (the "**SSM**"), Regulation (EU) No 806/2014 of the European Parliament and of the Council (the "**SRM Regulation**") provides for a coherent application of the resolution rules across the SSM under responsibility of the European Single Resolution Board, with effect since 1 January 2016 (referred to as the "Single Resolution Mechanism" or "**SRM**"). Under the SRM, the Single Resolution Board is responsible for adopting resolution decisions in close cooperation with the European Central Bank, the European Commission, and national resolution authorities in the event that a significant bank directly supervised by the European Central Bank, such as the Issuer, is failing or likely to fail and certain other conditions are met. National resolution authorities in the European Union member states concerned would implement such resolution decisions adopted by the Single Resolution Board in accordance with the powers conferred on them under national law transposing the BRRD.

If the competent authority determines that the Issuer is failing or likely to fail and certain other conditions are met (as set forth in the SRM Regulation, the SAG and other applicable rules and regulations), the competent resolution authority has the power to write down, including to write down to zero, claims for payment of the principal, interest or any other amount in respect of the Notes, to convert the Notes into ordinary shares or other instruments qualifying as common equity tier 1 capital (the write-down and conversion powers are hereinafter referred to as the "**Bail-in tool**"), or to apply any other resolution measure including (but not limited to) a transfer of the Notes to another entity, a variation of the terms and conditions of the Notes (including, but not limited to, the variation of maturity of the Notes) or a cancellation of the Notes. The Bail-in tool and each of these other resolution measures are hereinafter referred to as a "**Resolution Measure**". The competent resolution authority may apply Resolution Measures individually or in any combination.

The competent resolution authority will have to exercise the Bail-in tool in a way that results in (i) common equity tier 1 instruments (such as ordinary shares of the Issuer) being written down first in proportion to the relevant losses, (ii) subsequently, the principal amount of other capital instruments (additional tier 1 instruments and tier 2 instruments) being written down on a permanent basis or converted into common equity tier 1 instruments in accordance with their order of priority and (iii) finally, the Issuer's unsecured and unsubordinated liabilities (unless exempted by the SRM Regulation or the SAG) – such as those under the unsubordinated Notes – being written down on a permanent basis or converted into common equity tier 1 instruments in accordance with their order of priority under Section 46f(5)-(7) of the German Banking Act (*Kreditwesengesetz*, "**KWG**") as set out below.

## RANKING OF UNSUBORDINATED NOTES

Under the German Banking Act (*Kreditwesengesetz*, "**KWG**") certain unsecured and unsubordinated debt instruments of the Issuer (hereinafter referred to as "**Non-Preferred Senior Obligations**") rank below the Issuer's other senior liabilities (hereinafter referred to as "**Preferred Senior Obligations**") in insolvency or in the event of the imposition of resolution measures, such as a bail-in, affecting the Issuer. Non-Preferred Senior Obligations will rank above the Issuer's contractually subordinated liabilities, including Subordinated Notes issued under the Programme. Unsecured and unsubordinated Securities issued under this Programme will qualify as Non-Preferred Senior Obligations only if (i) they are not structured and (ii) they have at the time of their issuance a maturity of at least one year, and (iii) their Final Terms (or Pricing Supplement, in the case of Exempt Securities) explicitly refer to the lower ranking under Section 46f(5) KWG. In addition, Section 46f(7) KWG further specifies the delineation between structured and non structured obligations in that it clarifies that the amount of the repayment or the amount of the interest payments do not qualify as depending on the occurrence or non-occurrence of an event which is uncertain at the point in time when the senior unsecured debt instruments are issued only due to the fact that the instrument is issued in a currency other than the home currency of the issuer if the principal amount, the repayment amount and the interest claim have the same currency.

Securities, qualifying as Non-Preferred Senior Obligations rank *pari passu* among themselves and junior to any Preferred Senior Obligations. In the event of insolvency proceedings or Resolution Measures affecting the Issuer, such Non-Preferred Senior Obligations would bear losses before other unsubordinated liabilities of the Issuer, including Preferred Senior Obligations. In contrast, unsecured and unsubordinated Securities issued under this Programme that do not meet the requirements of (i), (ii) and (iii) above, qualify as Preferred Senior Obligations and rank in priority to Non-Preferred Senior Obligations and *pari passu* among themselves, derivatives, money market instruments and deposits not subject to protection and junior to, in particular, protected deposits.

As of the date of this Prospectus or the latest supplement hereto, if applicable, the following ratings were assigned to Deutsche Bank for its long-term preferred senior debt (Preferred Senior Obligations): A3 (Negative) by Moody's, BBB+ by S&P and BBB+ by Fitch. For information on the definitions employed by the Rating Agencies, see the section entitled "*Risk Factors – Risk Factors in Respect of the Issuer*".

## REFERENCE ITEMS

This section relates to Securities issued in the form of Notes only.

A Reference Item is the asset or other basis of reference from which the amount payable in interest and/or redemption on the Securities may be calculated.

A Reference Item can be any of the following items:

- (a) an equity or a basket of equities ("**Equity Linked Notes**"); or
- (b) an index or a basket of indices ("**Index Linked Notes**"); or
- (c) an inflation index or, in the case of Exempt Securities, a basket of inflation indices ("**Inflation Index Linked Notes**"); or
- (d) in the case of Exempt Securities, a currency or a basket of currencies ("**Currency Linked Notes**"); or
- (e) in the case of Exempt Securities, a commodity or basket of commodities ("**Commodity Linked Notes**"); or
- (f) in the case of Exempt Securities, a fund share or unit or a basket of fund shares or units ("**Fund Linked Notes**"); or
- (g) the credit risk of one or more reference entities ("**Credit Linked Notes**"); or
- (h) in the case of Exempt Securities, some other asset or basis of reference.

*Equity Linked Notes* – The amount payable in interest and/or on redemption, whether at maturity or otherwise, in respect of Equity Linked Notes will be calculated by reference to a single equity security or basket of equity securities. **Equity Linked Notes providing for physical delivery do not qualify as "equity securities" in the sense of Article 2 of the Luxembourg Prospectus Law (i.e. the underlying shares which may be delivered are neither shares of the Issuer nor of an entity belonging to the group of the Issuer).**

*Index Linked Notes* – The amount payable in interest and/or on redemption in respect of Index Linked Notes will be calculated by reference to a single index or a basket of indices. Such index or constituent of a basket of indices may be a well known and widely published index or an index of Deutsche Bank Aktiengesellschaft (in the case of Exempt Securities only) or other entity which may not be widely published or available.

*Inflation Index Linked Notes* – The amount payable in interest and/or on redemption in respect of Inflation Index Linked Notes will be calculated by reference to a single inflation index or a basket of inflation indices.

*Currency Linked Notes (Exempt Securities only)* – The amount payable in interest and/or on redemption in respect of Currency Linked Notes will be calculated by reference to such rates of exchange as may be agreed between the Issuer and the relevant Dealer and specified in the applicable Pricing Supplement.

*Commodity Linked Notes (Exempt Securities only)* – The amount payable in interest and/or on redemption in respect of Commodity Linked Notes will be calculated by reference to a single commodity or basket of commodities on such terms as may be agreed between the Issuer and the relevant Dealer and specified in the applicable Pricing Supplement.

*Fund Linked Notes (Exempt Securities only)* – The amount payable in interest and/or on redemption in respect of Fund Linked Notes will be calculated by reference to units or shares in a fund or basket of funds on such terms as may be agreed between the Issuer and the relevant Dealer and specified in the applicable Pricing Supplement.

*Credit Linked Notes* – Securities with respect to which the amount payable in interest and/or on redemption is linked to the credit of a specified entity or entities will be issued on such terms as may be agreed between the Issuer and the relevant Dealer and specified in the applicable Final Terms (or Pricing Supplement, in the case of Exempt Securities). If a Credit Event has occurred and the Conditions to Settlement are satisfied, the Issuer will redeem the Securities at an amount which depends on the value of certain specified assets of the Reference Entity, if "Cash Settlement" is specified as applicable in the applicable Final Terms (or Pricing Supplement, in the case of Exempt Securities), or by Delivery of the Deliverable Obligations comprising the Asset Amount, if "Physical Delivery" is specified as applicable in the applicable Final Terms (or Pricing Supplement, in the case of Exempt Securities). **Credit Linked Notes providing for physical delivery do not qualify as "equity securities" in the sense of Article 2 of the Luxembourg Prospectus Law.**

*Other (Exempt Securities only)* – The amount payable in interest and/or on redemption of Securities linked to other assets or bases of reference may be issued on such terms as may be agreed between the Issuer and the relevant Dealer and specified in the applicable Pricing Supplement.

## FEATURES OF CERTAIN SECURITIES

A wide range of Securities may be issued under the Programme. The Issuer may issue Securities which have one or more of the features described below. The amount of interest and/or principal payable and/or the amount of assets deliverable may depend on these features alone and/or in combination with other features and Reference Items.

*Inverse Variable Rate Securities* – The amount of interest payable in respect of the Securities is inversely linked to a specified reference rate.

*Capped Variable Rate Securities* – The maximum amount of interest payable in respect of Securities with a capped variable rate will equal the sum of the reference rate and any specified margin subject to a specified maximum rate.

*Securities whose interest and or redemption amount is calculated by reference to a formula* – The formula on the basis of which the interest payable and/or the amount of payable and/or assets deliverable on redemption is calculated will be stated in the Terms and Conditions of the Securities and may be replicated in the applicable Final Terms (or Pricing Supplement, in the case of Exempt Securities) or, in the case of Exempt Securities, will be stated in the applicable Pricing Supplement.

*Participation Securities* – The amount of interest payable and/or amounts payable and/or assets deliverable on redemption of Securities may be determined by reference to a ratio greater or less than one.

*Securities issued at a substantial discount or premium* – The issue price of the Securities is substantially lower or greater than the principal amount of the Securities.

*Partly-paid Securities (Exempt Securities only)* – The issue price for the Securities is payable in more than one instalment.

*Securities subject to optional redemption by the Issuer* – The Issuer may redeem the Securities prior to maturity.

*Subordinated Notes (German law governed Securities only)* – In the event of Resolution Measures insolvency or liquidation of the Issuer the Subordinated Notes will rank junior in priority of payment to all unsubordinated obligations and no amounts will be payable in respect of the Subordinated Notes until the claims of all unsubordinated creditors of the Issuer have been satisfied in full. Accordingly, there is a higher risk that an investor in Subordinated Notes will lose all or some of its investment should the Issuer become insolvent. In addition, no holder may set off its claims arising under the Securities against any claims of the Issuer. There will be no security in respect of the Securities.

Subordinated Notes are intended to qualify as Tier 2 instruments within the meaning of Art. 63 CRR means Regulation (EU) No 575/2013 of the European Parliament and of the Council of 26 June 2013 on prudential requirements for credit institutions and investment firms and amending Regulation (EU) No 648/2012, as amended by Regulation (EU) No. 2019/876 of the European Parliament and of the Council of 20 May 2019 (including any provisions of regulatory law supplementing this Regulation) ("**CRR**"); to the extent that any provisions of the CRR are amended or replaced, the term "CRR" shall refer to such amended provisions or successor provisions. In the context of a Regulatory Bail-in the Subordinated Notes will be written down or converted to common equity tier 1 capital instruments of the Issuer before any non-subordinated liabilities of the Issuer are affected by such measures.

*Non-Preferred Senior Notes* – Unsecured and unsubordinated debt instruments of the Issuer will qualify as Non-Preferred Senior Notes if (i) they are not structured, (ii) have at the time of their issuance a maturity of at least one year and, (iii) their Final Terms (or Pricing Supplement, in the case of Exempt Securities) explicitly refer to the lower ranking under Section 46f(5) KWG. Non-Preferred Senior Obligations will continue to rank above the Issuer's contractually subordinated liabilities, including Subordinated Notes issued under the Programme, but will rank below the Issuer's other non subordinated liabilities in insolvency or in the event of the imposition of Resolution Measures, such as a bail-in, affecting the Issuer. Accordingly, there is a higher risk that an investor in Non-Preferred Senior Notes will lose all or some of its investment should the Issuer become insolvent.

Non-Preferred Senior Notes are intended to qualify as eligible liabilities within the meaning of Sec. 91 of the German Recovery and Resolution Act (*Sanierungs- und Abwicklungsgesetz*) and eligible liabilities instruments within the meaning of Art. 72b CRR.

*Preferred Senior Notes* – Unsecured and unsubordinated debt instruments of the Issuer will qualify as Preferred Senior Notes if (i) they are structured, or (ii) have at the time of their issuance a maturity of less than one year or, (iii) their Final Terms (or Pricing Supplement, in the case of Exempt Securities) do not refer to the lower ranking under Section 46f(5) KWG. Preferred Senior Obligations will rank above the Issuer's contractually subordinated liabilities, including Subordinated Notes issued under the Programme, and its Non-Preferred Senior Notes and will rank below pari passu with other non subordinated liabilities in insolvency or in the event of the imposition of Resolution Measures, such as a bail-in, affecting the Issuer.

The Final Terms (or the Pricing Supplement in the case of Exempted Securities) will specify if an issuance of Preferred Senior Notes is intended to qualify as eligible liabilities within the meaning of Sec. 91 of the German Recovery and Resolution Act (*Sanierungs- und Abwicklungsgesetz*) and eligible liabilities instruments within the meaning of Art. 72b CRR.

*Minimum Redemption Securities (Exempt Securities only)* – The redemption amount payable at maturity of the Securities will be no less than the stated minimum amount.

## **Form of the Securities**

*Any reference in this section to "Final Terms" shall be deemed to include, in respect of Exempt Securities only, a reference to "Pricing Supplement".*

## **SECURITIES**

The Securities of each Series will be in either bearer form ("**Bearer Securities**") without interest coupons attached or, in the case of definitive Securities and if applicable, with interest coupons attached, or registered

form ("**Registered Securities**") without interest coupons attached. Bearer Securities will be issued outside the United States in reliance on Regulation S under the Securities Act ("**Regulation S**") and Registered Securities will be issued both outside the United States in reliance on the exemption from registration provided by Regulation S and within the United States pursuant to the exemption from registration under Rule 144A.

Any reference herein to CBF, Euroclear, CBL, SIS, and/or DTC shall, whenever the context so permits, be deemed to include a reference to any permitted additional or alternative clearing system specified in the applicable Final Terms.

### **Bearer Securities**

Each Tranche of Bearer Securities will be initially issued in the form of either a Temporary Global Bearer Security (a "**Temporary Global Bearer Security**") without interest coupons or, if so specified in the applicable Final Terms, a permanent bearer global security (a "**Permanent Bearer Global Security**" and, together with the Temporary Global Bearer Security, the "**Global Bearer Securities**") without interest coupons which, in either case, will:

- (i) if the Global Bearer Securities are intended to be issued in new global note ("**NGN**") form, as stated in the applicable Final Terms, be delivered on or prior to the original issue date of the Tranche to a common safekeeper (the "**Common Safekeeper**") for Euroclear Bank SA/NV ("**Euroclear**"), Clearstream Banking S.A. ("**CBL**"); and
- (ii) if the Global Bearer Securities are not intended to be issued in NGN form, be delivered on or prior to the original issue date of the Tranche to Clearstream Banking AG, Frankfurt ("**CBF**") or SIX SIS AG ("**SIS**") or a common depositary (the "**Common Depositary**") for Euroclear and CBL.

Where the Global Securities issued in respect of any Tranche are in NGN form, the Final Terms or, as the case may be, Pricing Supplement will also indicate whether such Global Securities are intended to be held in a manner which would allow Eurosystem eligibility. Any indication that the Global Securities are to be so held does not necessarily mean that the Securities of the relevant Tranche will be recognised as eligible collateral for Eurosystem monetary policy and intra-day credit operations by the Eurosystem either upon issue or at any times during their life as such recognition depends upon satisfaction of the Eurosystem eligibility criteria. The common safekeeper for NGNs will either be Euroclear or CBL or another entity approved by Euroclear and CBL.

Whilst any Bearer Security is represented by a Temporary Global Bearer Security, payments of principal, interest (if any) and any other amount payable in respect of the Bearer Securities due prior to the Exchange Date (as defined below) will be made (against presentation of the Temporary Global Bearer Security if the Temporary Global Bearer Security is not intended to be issued in NGN form) only to the extent that certification (in a form to be provided) to the effect that the beneficial owners of interests in such Bearer Security are not U.S. persons or persons who have purchased for resale to any U.S. person, as required by U.S. Treasury regulations, has been received by Euroclear and/or CBL and/or CBF and/or SIS and Euroclear and/or CBL and/or CBF and/or SIS, as applicable, has given a like certification (based on the certifications it has received) to the Fiscal Agent.

If the applicable Final Terms state that the Temporary Global Bearer Security is exchangeable for a Permanent Bearer Global Security, on and after the date (the "**Exchange Date**") which is forty days after a Temporary Global Bearer Security is issued, interests in such Temporary Global Bearer Security will be exchangeable (free of charge) as described in the Temporary Global Bearer Security either for (i) interests in a Permanent Bearer Global Security of the same Series or (ii) for definitive Bearer Securities of the same Series with, where applicable, interest coupons, receipts and talons attached (as indicated in the applicable Final Terms and subject, in the case of definitive Bearer Securities, to such notice period as is specified in the applicable Final Terms), in each case against certification of beneficial ownership as described above unless such certification has already been given, provided that purchasers in the United States and certain U.S. persons will not be able to receive definitive Bearer Securities. The holder of a Temporary Global Bearer Security will not be entitled to collect any payment of principal, interest or other amount due on or after the Exchange Date unless, upon due certification, exchange of the Temporary Global Bearer Security for an interest in a Permanent Bearer Global Security or for definitive Bearer Securities is improperly withheld or refused.

Payments of principal, interest (if any) or any other amounts on a Permanent Bearer Global Security will be made through Euroclear and/or CBL or CBF or SIS (as the case may be, against presentation or surrender of the Permanent Bearer Global Security except in cases where the Permanent Bearer Global Security is intended to be issued in NGN form or other cases where the Permanent Bearer Global Security is directly held by the Clearing System) without any requirement for certification.

The applicable Final Terms may specify that a Permanent Bearer Global Security will be exchangeable (free of charge), in whole or in part, for definitive Bearer Securities with, where applicable, interest coupons, receipts and talons attached upon either (A) not less than 60 days' written notice from Euroclear and/or CBL and/or CBF (acting on the instructions of any holder of an interest in such Permanent Bearer Global Security) to the Fiscal Agent as described therein or (B) only upon the occurrence of an Exchange Event. For these purposes, **"Exchange Event"** means that (i) an Event of Default has occurred and is continuing (other than for Securities for which Eligible Liabilities Format is specified as applicable in the applicable Final Terms), (ii) the Issuer has been notified that both Euroclear, CBL (in respect of Securities settled through Euroclear or CBL) or CBF (in respect of Securities settled through CBF) have been closed for business for a continuous period of fourteen days (other than by reason of holiday, statutory or otherwise) or have announced an intention permanently to cease business or have in fact done so and no successor clearing system is available or (iii) the Issuer has or will become subject to adverse tax consequences which would not be suffered were the Securities represented by the Permanent Bearer Global Security in definitive form. The Issuer will promptly give notice to Securityholders in accordance with the Terms and Conditions if an Exchange Event occurs. In the event of the occurrence of an Exchange Event, Euroclear and/or CBL or CBF (acting on the instructions of any Holder of an interest in such Permanent Bearer Global Security) may give notice to the Fiscal Agent requesting exchange and, in the event of the occurrence of an Exchange Event as described in (iii) above, the Issuer may also give notice to the Fiscal Agent requesting exchange. Any such exchange shall occur not later than 45 days after the date of receipt of the first relevant notice by the Fiscal Agent.

The following legend will appear on all Bearer Securities (other than Temporary Global Bearer Securities), interest coupons and receipts relating to such Securities where "TEFRA D" is specified in the applicable Final Terms or Pricing Supplement, as the case may be:

"ANY UNITED STATES PERSON WHO HOLDS THIS OBLIGATION WILL BE SUBJECT TO LIMITATIONS UNDER THE UNITED STATES INCOME TAX LAWS, INCLUDING THE LIMITATIONS PROVIDED IN SECTIONS 165(j) AND 1287(a) OF THE INTERNAL REVENUE CODE."

The sections referred to provide that United States holders, with certain exceptions, will not be entitled to deduct any loss on Bearer Securities, interest coupons or receipts and will not be entitled to capital gains treatment of any gain on any sale, disposition, redemption or payment of principal in respect of such Securities, interest coupons or receipts.

Securities which are represented by a Bearer Global Security will only be transferable in accordance with the rules and procedures for the time being of CBF, Euroclear, CBL or SIS, as the case may be.

### **Swiss Global Securities**

The applicable Final Terms may specify that the Securities are represented by a Swiss Global Security. The Swiss Global Security shall be a permanent global note deposited with SIX SIS Ltd or any other Intermediary in Switzerland recognized for such purposes by SIX Swiss Exchange Ltd (SIX SIS Ltd or any such other Intermediary, the **"Intermediary"** or the **"Clearing System"**) until final redemption of the Securities. Once the permanent global note has been deposited with the Intermediary and entered into the accounts of one or more participants of the Intermediary, the Securities will, for Swiss law purposes, constitute intermediated securities (*Bucheffekten*) (**"Intermediated Securities"**) in accordance with the provisions of the Swiss Federal Intermediated Securities Act (*Bucheffektengesetz*). The holders of such Securities (the **"Securityholders"**) will be the persons holding the Securities in a securities account (*Effektenkonto*) which is in their own name and for their own account or, or in the case of Intermediaries (*Verwahrungsstellen*), the Intermediaries holding the Securities for their own account in a securities account (*Effektenkonto*) which is in their name.

The Securityholders shall not at any time have the right to effect or demand the conversion of the permanent global note into, or the delivery of, uncertificated securities (*Wertrechte*) or definitive Securities (*Wertpapiere*).

## Registered Securities

The Registered Securities of each Tranche offered and sold in reliance on Regulation S, which will be sold to non-U.S. persons outside the United States, will initially be represented by a global security in registered form (a "**Regulation S Global Security**"). Prior to expiry of the distribution compliance period (as defined in Regulation S) applicable to each Tranche of Securities, beneficial interests in a Regulation S Global Security may not be offered or sold to, or for the account or benefit of, a U.S. person save as otherwise provided in the Annex for Registered Securities and may not be held otherwise than through Euroclear or CBL and such Regulation S Global Security will bear a legend regarding such restrictions on transfer.

The Registered Securities of each Tranche may only be offered and sold in the United States or to U.S. persons in private transactions to "qualified institutional buyers" within the meaning of Rule 144A under the Securities Act ("**QIBs**"). The Registered Securities of each Tranche sold to QIBs will be represented by a global security in registered form (a "**Rule 144A Global Security**" and, together with a Regulation S Global Security, the "**Registered Global Securities**").

Registered Global Securities will either (i) be deposited with a custodian for, and registered in the name of a nominee of, the Depository Trust Company ("**DTC**") or (ii) be deposited with a common depository for Euroclear and CBL, and registered in the name of the common nominee for the Common Depository of, Euroclear and CBL, as specified in the applicable Final Terms. Persons holding beneficial interests in Registered Global Securities will be entitled or required, as the case may be, under the circumstances described below, to receive physical delivery of definitive Securities in fully registered form.

The Rule 144A Global Security will be subject to certain restrictions on transfer set forth therein and will bear a legend regarding such restrictions.

Payments of principal, interest and any other amount in respect of the Registered Global Securities will, in the absence of provision to the contrary, be made to the person shown on the Register (as defined in the Terms and Conditions) as the registered holder of the Registered Global Securities. None of the Issuer, any Paying Agent or the Registrar will have any responsibility or liability for any aspect of the records relating to or payments or deliveries made on account of beneficial ownership interests in the Registered Global Securities or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests.

Payments of principal, interest or any other amount in respect of the Registered Securities in definitive form will, in the absence of provision to the contrary, be made to the persons shown on the Register on the relevant Record Date (as defined in § 4 (*Payments*) of the Terms and Conditions) immediately preceding the due date for payment in the manner provided in that paragraph.

Interests in a Registered Global Security will be exchangeable (free of charge), in whole but not in part, for definitive Registered Securities without interest coupons, receipts or talons attached only upon the occurrence of an Exchange Event. For these purposes, "**Exchange Event**" means that (i) an Event of Default has occurred and is continuing (other than for Securities for which Eligible Liabilities Format is specified as applicable in the applicable Final Terms), (ii) in the case of Securities registered in the name of a nominee for DTC, either DTC has notified the Issuer that it is unwilling or unable to continue to act as depository for the Securities and no alternative clearing system is available or DTC has ceased to constitute a clearing agency registered under the Exchange Act, (iii) in the case of Securities registered in the name of a nominee for a common depository for Euroclear and CBL, the Issuer has been notified that both Euroclear and CBL have been closed for business for a continuous period of fourteen days (other than by reason of holiday, statutory or otherwise) or have announced an intention permanently to cease business or have in fact done so and, in any such case, no successor clearing system is available or (iv) the Issuer has or will become subject to adverse tax consequences which would not be suffered were the Securities represented by the Registered Global Security in definitive form.

The Issuer will promptly give notice to Securityholders in accordance with the Terms and Conditions if an Exchange Event occurs. In the event of the occurrence of an Exchange Event, DTC, Euroclear and/or CBL (acting on the instructions of any holder of an interest in such Registered Global Security) may give notice to the Registrar requesting exchange and, in the event of the occurrence of an Exchange Event as described in (iv) above, the Issuer may also give notice to the Registrar requesting exchange. Any such exchange shall occur

not later than ten days after the date of receipt of the first relevant notice by the Registrar. Where Registered Securities are only to be issued to non-U.S. persons outside the United States (pursuant to Regulation S or otherwise) an alternative Registrar should be appointed and amendments may be required to the Registered Security Annex and the Agency Agreement.

## SECURITYHOLDERS AND TRANSFER OF INTERESTS

### Interests in Global Securities

Interests in a Registered Global Security may, subject to compliance with all applicable restrictions, be transferred to a person who wishes to hold such interest in another Registered Global Security. No beneficial owner of an interest in a Registered Global Security will be able to transfer such interest, except in accordance with the applicable procedures of DTC, Euroclear and CBL, in each case to the extent applicable. **Registered Securities are also subject to the restrictions on transfer set forth therein and will bear a legend regarding such restrictions, see the section entitled "*Transfer and Selling Restrictions*".**

For so long as any of the English law governed Securities is represented by one or more Global Securities held by CBF or on behalf of Euroclear and/or CBL each person (other than Euroclear or CBL) who is for the time being shown in the records of CBF, Euroclear or of CBL as the holder of a particular principal amount of such Securities (in which regard any certificate or other document issued by CBF or Euroclear or CBL as to the principal amount of such Securities standing to the account of any person shall be conclusive and binding for all purposes save in the case of manifest error) shall be treated by the Issuer and its agents as the holder of such principal amount of such Securities for all purposes other than with respect to the payment of principal or interest on such principal amount of such Securities, for which purpose the bearer of the relevant Bearer Global Securities or the registered holder of the relevant Registered Global Security shall be treated by the Issuer and its agents as the holder of such principal amount of such Securities or Securities in accordance with and subject to the terms of the relevant Global Security or Security, as the case may be, and the expressions "**Noteholder**", "**Securityholder**", "**holder of Notes**", and "**holder of Securities**" and related expressions shall be construed accordingly.

So long as DTC or its nominee is the registered owner or holder of a Registered Global Security, DTC or such nominee, as the case may be, will be considered the sole owner or holder of the Securities represented by such Registered Global Security for all purposes under the Agency Agreement and such Securities except to the extent that in accordance with DTC's published rules and procedures any ownership rights may be exercised by its participants or beneficial owners through participants.

## ACCELERATION OF SECURITIES

A Security (other than a Security for which Eligible Liabilities Format is specified as applicable in the applicable Final Terms) may be accelerated by the holder thereof in certain circumstances described in the "Events of Default" Condition of the Terms and Conditions. In such circumstances, where any Security is still represented by a Global Security and the Global Security (or any part thereof) has become due and repayable in accordance with the Terms and Conditions of such Securities and redemption has not occurred in accordance with the provisions of the Global Security then holders of interests in such Global Security credited to accounts with Euroclear and/or CBL and/or CBF and/or SIS and/or DTC, as the case may be, will become entitled to proceed directly against the Issuer on the basis of statements of account provided by CBF, Euroclear, CBL and DTC on and subject to, in respect of Securities governed by English law, the terms of a deed of covenant executed by the Issuer and dated 21 June 2019 (the "**Deed of Covenant**"). In addition, holders of interests in such Global Security credited to their accounts with DTC may require DTC to deliver definitive Securities in registered form in exchange for their interest in such Global Security in accordance with DTC's standard operating procedures.

## FUNGIBLE ISSUES OF SECURITIES

Pursuant to the Agency Agreement (as defined under "*Terms and Conditions of the Securities*"), the Fiscal Agent shall arrange that, where a further tranche of Securities is issued which is intended to form a single Series with an existing tranche of Securities, the Securities of such further tranche shall be assigned a common code and International Securities Identification Number ("**ISIN**") and, where applicable, a Committee on Uniform Securities Identification Procedures ("**CUSIP**") and CUSIP International Number ("**CINS**"),

*Wertpapierkennnummer* ("WKN") or *Valorennummer*, which are different from the common code, ISIN, WKN, CUSIP, CINS or *Valorennummer* assigned to Securities of any other Tranche of the same Series until the expiry of any applicable period that by law or regulation would require such Securities not to be fungible.

## PFANDBRIEFE

The following is a description of some of the more fundamental principles governing the laws regarding Pfandbriefe and Pfandbrief Banks in summary form. It does not address all the laws' complexities and details. Accordingly, it is qualified in its entirety by reference to the applicable laws.

The German Pfandbrief Act (*Pfandbriefgesetz*; the "**Pfandbrief Act**") was published on 27 May 2005 and came into force on 19 July 2005. As from such date, the legislation accompanying the Pfandbrief Act, *i.e.*, the Act on the Reorganisation of the Law on Pfandbriefe (*Gesetz zur Neuordnung des Pfandbriefrechts*), rescinded all existing special legislation regarding the Pfandbrief business in Germany, including, *inter alia*, (i) the Mortgage Bank Act (*Hypothekbankgesetz*) applicable to the existing mortgage banks being specialist institutions authorised to issue Mortgage Pfandbriefe (*Hypothekpfandbriefe*) covered by mortgage loans as well as Public Sector Pfandbriefe (*Öffentliche Pfandbriefe*) covered by obligations of public sector debtors (and, in either case, by certain other qualifying assets), (ii) the Act on Pfandbriefe and Related Bonds of Public-Law Credit Institutions (*Gesetz über die Pfandbriefe und verwandten Schuldverschreibungen öffentlich-rechtlicher Kreditanstalten*) in the version as published on 9 September 1998, as amended, applicable to various types of public sector banks, including in particular the Landesbanken, in respect of Mortgage Pfandbriefe and Public Sector Pfandbriefe issued by them, and (iii) finally, the Ship Bank Act (*Schiffsbankgesetz*), as last amended on 5 April 2004, governing the operations of ship mortgage banks issuing Ship Mortgage Pfandbriefe (*Schiffspfandbriefe*). Also, since 19 July 2005, the Pfandbrief operations of the Issuer are subject to the Pfandbrief Act dated 22 May 2005.

The Pfandbrief Act abolished the concept of specialist Pfandbrief institutions hitherto prevailing in respect of the existing mortgage banks and ship mortgage banks. It established a new and uniform regulatory regime for all German credit institutions. Since 19 July 2005, all German credit institutions are permitted, subject to authorisation and fulfilment of certain requirements of the Pfandbrief Act, to engage in the Pfandbrief business and to issue Mortgage Pfandbriefe, Public Sector Pfandbriefe as well as Ship Mortgage Pfandbriefe, and, since that date, existing mortgage banks and ship mortgage banks are authorised to engage in other types of banking transactions, eliminating the limitations in respect of the scope of their permitted business which existed in the past. The Pfandbrief Act thus created a level playing field for all German credit institutions, including the Landesbanken, operating as universal banks and engaged in the issuance of Pfandbriefe.

German credit institutions wishing to take up the Pfandbrief business must obtain special authorisation under the German Banking Act (*Kreditwesengesetz*) from the German Federal Financial Supervisory Authority (*Bundesanstalt für Finanzdienstleistungsaufsicht*, the "**BaFin**") and, for that purpose, must meet some additional requirements as specified in the Pfandbrief Act.

Mortgage banks and ship mortgage banks, which were operating as such up to 19 July 2005 as well as public sector banks (including the *Landesbanken*) carrying on the Pfandbrief business up to such date, have all been grandfathered in respect of authorisation for the particular type of Pfandbrief business in which they were engaged at such time. They were required, though, to give a comprehensive notice to the BaFin by 18 October 2005, failing which the BaFin would have had the right to withdraw the authorisation. Mortgage banks and ship mortgage banks are since 19 July 2005 also authorised to engage in other banking transactions, including, *inter alia*, deposit taking, the extension of credits, the guarantee business, underwriting as well as others, up to then not permitted to be carried out by them, contrary to the Landesbanken, to which all types of banking transactions have always been open (subject to authorisation).

The operations of all banks engaged in the issuance of Pfandbriefe are since 19 July 2005 regulated by the Pfandbrief Act and the Banking Act, and are subject to the prudential supervision of the BaFin. In particular, the BaFin will carry out audits of the assets forming part of any Cover Pool, regularly in bi-annual intervals.

In 2009, the Pfandbrief Act was amended. Among other changes, the new Pfandbrief category of Airplane Mortgage Pfandbriefe (*Flugzeugpfandbriefe*) was introduced, rules requiring a certain liquidity cushion of the Cover Pool from 1 November 2009 onwards were established, and the list of assets qualifying as Cover Pool for

Public Sector Pfandbriefe was extended to include payment claims against certain qualifying public bodies in Switzerland, the United States of America, Canada or Japan.

The Pfandbrief Act was further amended in 2010 (in particular with respect to clarifications regarding the quality of Pfandbriefe in the case of insolvency of the Pfandbrief Bank), in 2013 and in 2015.

In this description, banks authorised to issue Pfandbriefe will generally be referred to as "Pfandbrief Banks" which is the term applied by the Pfandbrief Act.

Pfandbriefe are standardised debt instruments issued by a Pfandbrief Bank. The quality and standards of Pfandbriefe are strictly governed by provisions of the Pfandbrief Act and subject to the prudential supervision of the BaFin. Pfandbriefe generally are medium- to long-term bonds, typically with an original maturity of two to ten years, which are secured or "covered" at all times by a pool of specified qualifying assets (*Deckung*), as described below. Pfandbriefe are recourse obligations of the issuing bank, and no separate vehicle is created for their issuance or for the issuance of any specific series of Pfandbriefe. Pfandbriefe may not be redeemed at the option of the Holders prior to maturity.

Pfandbriefe may either be Mortgage Pfandbriefe, Public Sector Pfandbriefe, Ship Mortgage Pfandbriefe or Airplane Mortgage Pfandbriefe. The outstanding Pfandbriefe of any one of these types must be covered by a separate pool of specified qualifying assets: a pool for Mortgage Pfandbriefe only, a pool for Public Sector Pfandbriefe only, a pool covering all outstanding Ship Mortgage Pfandbriefe only and a pool covering all outstanding Airplane Mortgage Pfandbriefe only (each a "**Cover Pool**"). An independent cover pool monitor appointed by the BaFin has wide responsibilities in monitoring the compliance by the Pfandbrief Bank with the provisions of the Pfandbrief Act. In particular, the cover pool monitor shall ensure that the prescribed cover for the Pfandbriefe exists at all times and that the cover assets are recorded in the respective register. Prior to issue this will be certified by the cover pool monitor on the Pfandbrief certificate.

The aggregate principal amount of assets in any Cover Pool must at all times at least be equal to or greater than the aggregate principal amount of the outstanding Pfandbriefe issued against any such Cover Pool and the aggregate interest yield on any such Cover Pool must at all times be at least equal to or greater than the aggregate interest payable on all outstanding Pfandbriefe issued against such Cover Pool. In addition, the coverage of all outstanding Pfandbriefe with respect to principal and interest must at all times be ensured on the basis of the net present value (*Barwert*). Finally, the net present value of the assets contained in any Cover Pool must exceed the net present value of liabilities from the corresponding Pfandbriefe and derivatives by at least 2 per cent. (*sichernde Überdeckung*).

Such 2 per cent. excess cover must consist of highly liquid assets. Qualifying assets for the excess cover are, *inter alia*, (i) debt securities of Germany, a special fund of Germany, a German state, the European Communities, another member state of the European Union, another contracting state on the agreement on the European Economic Area, the European Investment Bank, the International Bank for Reconstruction and Development, the Council of Europe Development Bank or the European Bank for Reconstruction and Development; (ii) debt securities of Switzerland, the United Kingdom of Great Britain and Northern Ireland, the United States of America, Canada or Japan, provided that the risk weighting such countries have received pursuant to a rating by an approved international rating agency is credit quality step 1 (according to table 1 of Article 114 (2) of Commission Regulation (EU) No. 575/2013 on prudential requirements for credit institutions and investment firms and amending Regulation (EU) No. 648/2012 as amended by the Regulation (EU) No. 2019/876 of the European Parliament and of the Council of 20 May 2019 ("**CRR**")); (iii) debt securities guaranteed by any of the foregoing institutions; and (iv) credit balances maintained with the European Central Bank, any central bank of a member state of the European Union or any other suitable credit institution having its registered office in one of the countries listed under (i) and (ii) above, provided that those have received a risk weighting in accordance with Article 119 (1) CRR which is comparable with credit quality step 1 or, in case of initial maturities of up to 100 days, credit quality step 1 or 2 (each according to table 3 of Article 120 (1) or table 5 of Article 121 (1) CRR). In addition, to safeguard liquidity, a certain liquidity cushion must be established.

The Pfandbrief Bank must record in the register of cover assets for any Cover Pool of a given Pfandbrief type each asset and the liabilities arising from derivatives. Derivatives may be entered in such register only with the consent of the cover pool monitor and the counterparty.

In case that any cover asset recorded in the register of cover assets for any Cover Pool is intended for partial cover only, the register of cover assets must clearly state the amount of the intended cover and its status in relation to the part of the asset which is not intended for the Cover Pool.

The Pfandbrief Bank must command over an appropriate risk management system meeting the requirements specified in detail in the Pfandbrief Act and must comply with comprehensive disclosure requirements on a quarterly and annual basis set out in detail in the Pfandbrief Act.

### **Cover Pool for Mortgage Pfandbriefe**

The Cover Pool for Mortgage Pfandbriefe mainly consists of mortgage loans with a ratio between the loan and the value of the underlying assets of not more than 60 per cent. This lending value is established by an expert of the Pfandbrief issuer who is not involved in the loan decision-making process in accordance with comprehensive value assessment rules on the basis of which the market value of a property is to be determined. Qualifying mortgages must encumber properties, rights equivalent to real property or such rights under a foreign legal system which are comparable with the equivalent rights under German law. The encumbered properties and the properties in respect of which the encumbered rights exist must be situated in a EU or EEA member state, in Switzerland, the United Kingdom of Great Britain and Northern Ireland, the United States of America, Canada, Japan, Australia, New Zealand or Singapore. Land charges and such foreign security interests which offer comparable security and entitle the relevant holder of Pfandbriefe to satisfy its claim also by realising the encumbered property or equivalent right rank equal with mortgages.

The Cover Pool covering Mortgage Pfandbriefe may also, to a limited extent, contain the following assets: (i) compensation claims converted into notes in bearer form, (ii) subject to certain restrictions the assets that may also be included in the 2 per cent. Excess Cover described above, up to a total of 10 per cent. of the aggregate amount of the outstanding Mortgage Pfandbriefe, (iii) notes that may also be included in the cover pool for Public Sector Pfandbriefe (e.g. notes of specified public sector debtors such as (without limitation) (a) the German Federal Government, the Federal States, political subdivisions and other suitable public law corporations within Germany, (b) EU or EEA member states and their central banks and political subdivisions, (c) the United States of America, Japan, Switzerland, the United Kingdom of Great Britain and Northern Ireland or Canada if they fulfil certain rating criteria, (d) political subdivisions of the countries listed under (c) above if such political subdivisions are equated by the competent authorities to the central state or if they fulfil certain rating criteria, (e) the European Central Bank and certain multilateral development banks and international organisations, (f) public authorities of EU or EEA member states, (g) public authorities of the countries listed under (c) above if such authorities are equated by the competent authorities to the central state or if they fulfil certain rating criteria, (h) entities for the liabilities of which any one of the public law entities referred to under (a) to (e) above or certain qualifying export credit insurance companies have assumed a full guarantee), up to a total of 20 per cent. of the aggregate amount of the outstanding Mortgage Pfandbriefe, with the cover assets set out under (ii) above being taken into account, and (iv) claims under derivative transactions concluded with specified suitable counterparties on the basis of standardised master agreements, provided that it is ensured that the claims under these derivative transactions cannot be impaired in the event of insolvency of the Pfandbrief issuer or of the other cover pools held by it. The share of the Pfandbrief issuer's claims under the derivative transactions included in the cover pool in the total amount of the cover assets as well as the Pfandbrief issuer's share in the liabilities under these derivatives in the total amount of Mortgage Pfandbriefe outstanding plus the liabilities under these derivatives must not exceed 12 per cent., in each case, the calculation being made on the basis of their net present values.

### **Insolvency Proceedings**

In the event of the institution of insolvency proceedings over the assets of the Pfandbrief Bank, any assets of a Cover Pool maintained by it and registered in the respective register of cover assets would not be part of the insolvency estate, and, therefore, such insolvency would not result in an insolvency of any Cover Pool. Only if at the same time or thereafter the relevant Cover Pool were to become insolvent, separate insolvency proceedings would be initiated against such Cover Pool by the BaFin. In this case, Holders of Pfandbriefe would have the first claim on the respective Cover Pool. Their preferential right would also extend to interest on the Pfandbriefe accrued after the commencement of insolvency proceedings. Furthermore, but only to the extent that Holders of Pfandbriefe suffer a loss, Holders would also have recourse to any assets of the Pfandbrief Bank not included in

the Cover Pools. As regards those assets, Holders of the Pfandbriefe would rank equal with other unsecured and unsubordinated creditors of the Pfandbrief Bank.

Up to three administrators (*Sachwalter*, the "**Administrator**") will be appointed in the case of the insolvency of the Pfandbrief Bank to administer each Cover Pool for the sole benefit of the Holders of Pfandbriefe. The Administrator will be appointed by the court having jurisdiction at the location of the head office of the Pfandbrief Bank at the request of the BaFin before or after the institution of insolvency proceedings. The Administrator will be subject to the supervision of the court and also of the BaFin with respect to the duties of the Pfandbrief Bank arising in connection with the administration of the assets included in the relevant Cover Pool. The Administrator will be entitled to dispose of the Cover Pool's assets and receive all payments on the relevant assets to ensure full satisfaction of the claims of the Holders of Pfandbriefe. To the extent, however, that those assets are obviously not necessary to satisfy such claims and in case that assets are not subject to the trustee's administration, the insolvency receiver of the Pfandbrief Bank is entitled to demand the transfer of such assets to the insolvency estate.

Subject to the consent of the BaFin, the Administrator may transfer all or part of the cover assets and the liabilities arising from the Pfandbriefe issued against such assets to another Pfandbrief Bank.

### **Jumbo Pfandbriefe**

Jumbo Pfandbriefe are governed by the same laws as Pfandbriefe and therefore cannot be classified as a type of assets apart from Pfandbriefe. However, in order to improve the liquidity of the Pfandbrief market certain Pfandbrief issuers have agreed upon certain minimum requirements for Jumbo Pfandbriefe (*Mindeststandards von Jumbo-Pfandbriefen*) applicable to such Pfandbriefe which are issued as Jumbo Pfandbriefe. These minimum requirements are not statutory provisions. Instead, they should be regarded as voluntary self-restrictions which limit the options issuers have when structuring Pfandbriefe. The minimum requirements include the following provisions:

- (i) *Minimum issue size.* The minimum issue size of a Jumbo Pfandbrief is EUR 1 billion. If the minimum size is not reached within the initial issue, a Pfandbrief may be increased by way of a tap to give it Jumbo Pfandbrief status, provided all the requirements stated under Nos. ii to vii are fulfilled.
- (ii) *Format.* Only Pfandbriefe of straight bond format (*i.e.* fixed coupon payable annually in arrears, bullet redemption) may be offered as Jumbo Pfandbriefe.
- (iii) *Stock market listing.* Jumbo Pfandbriefe must be listed on a regulated market in an EU or EEA member state immediately after issue, or not later than 30 calendar days after the settlement date.
- (iv) *Syndicate banks.* Jumbo Pfandbriefe must be placed by a syndicate consisting of at least five banks (syndicate banks).
- (v) *Quoting.* The syndicate banks act as market makers; in addition to their own system, they pledge to quote prices upon application and bid/ask (two-way) prices at the request of investors on an electronic trading platform and in telephone trading.
- (vi) *Publishing of average spreads.* The syndicate banks pledge to report daily for each Jumbo Pfandbrief outstanding (life to maturity from 24 months upwards) the spread vs. asset swap. The average spreads, which are calculated for each Jumbo Pfandbrief by following a defined procedure, are published on the website of the Association of German Pfandbrief Banks (*Verband Deutscher Pfandbriefbanken*, vdp).
- (vii) *Transfer and buyback.* A subsequent transfer to the name of an investor is not permitted (restriction on transferability). It is permitted to buy back securities for redemption purposes or for cover pool monitor administration if the outstanding volume of the issue does not fall below EUR 1 billion at any time. The issuer must publicly announce any buyback, the planned volume thereof and the issue envisaged for repurchase at least 3 banking days in advance, and make sure that extensive transparency is given in the market. After a buyback transaction it is not permitted to tap the issue in question for a period of one year.

- (viii) *Loss of status.* If one of the aforementioned requirements is not met, the issue will lose its Jumbo Pfandbrief status. Jumbo Pfandbriefe that were issued before 28 April 2004, and have a volume of less than EUR 1 billion retain the status of a Jumbo Pfandbrief notwithstanding the requirements set out under (i) if the other aforementioned provisions are met.

The minimum requirements are supplemented by additional recommendations (*Empfehlungen*) and a code of conduct applicable to issuers of Jumbo Pfandbriefe (*Wohlverhaltensregeln für Emittenten und Syndikatsbanken*). Neither the recommendations nor the code of conduct are statutory provisions.

With the consent of the BaFin, the administrator may transfer all or part of the Pfandbrief liabilities and the corresponding cover assets to another Pfandbrief issuer.

Where the application of the preceding sentence requires some but not all of the unmatured Coupons relating to a Definitive Security to become void, the relevant Paying Agent shall determine which unmatured Coupons are to become void, and shall select for such purpose Coupons maturing on later dates in preference to Coupons maturing on earlier dates.

(3) *Permanent Global Note.* The Securities and all rights in connection therewith are documented in the form of a Permanent Global Note (the "**Permanent Global Note**") which shall be deposited by the Swiss Principal Paying Agent with SIX SIS Ltd or any other Intermediary in Switzerland recognized for such purposes by SIX Swiss Exchange Ltd (SIX SIS Ltd or any such other Intermediary, the "**Intermediary**" or the "**Clearing System**") until final redemption of the Securities. Once the Permanent Global Note has been deposited with the Intermediary and entered into the accounts of one or more participants of the Intermediary, the Securities will, for Swiss law purposes, constitute intermediated securities (*Bucheffekten*) ("**Intermediated Securities**") in accordance with the provisions of the Swiss Federal Intermediated Securities Act (*Bucheffektengesetz*).

Each Securityholder shall, for Swiss law purposes, have a co-ownership interest (*Miteigentumsanteil*) in the Permanent Global Note to the extent of his claim against the Issuer, provided that for so long as the Securities constitute Intermediated Securities the co-ownership interest shall be suspended and the Securities may only be transferred by the entry of the transferred Securities in a securities account of the transferee.

The records of the Intermediary will determine the number of Securities held through each participant in that Intermediary. In respect of the Securities held in the form of Intermediated Securities, the holders of such Securities (the "**Securityholders**") will be the persons holding the Securities in a securities account (*Effektenkonto*) which is in their own name and for their own account

or, or in the case of Intermediaries (*Verwahrungsstellen*), the Intermediaries holding the Securities for their own account in a securities account (*Effektenkonto*) which is in their name.

The Securityholders shall not at any time have the right to effect or demand the conversion of the Permanent Global Note into, or the delivery of, uncertificated securities (*Wertrechte*) or definitive Securities (*Wertpapiere*).

The Replacement Rate (if any) so determined, subject to the application of the Adjustment Spread as set out herein, shall replace the relevant Floating Rate and the Conditions shall be furthermore modified by the Replacement Rate Adjustments so determined for the purposes of determining the Rate of Interest in each case for the Interest Period related to the Interest Determination Day falling on or, if none, immediately following the Replacement Rate

Determination Date and each Interest Period thereafter (subject to the subsequent occurrence of a Rate Replacement Event in respect of the Replacement Rate). The Issuer shall give notice to the Pfandbriefholders in accordance with § 10 of the Replacement Rate and the Replacement Rate Adjustments as soon as practicable after the Replacement Rate Determination Date and shall request the Clearing System to attach the documents submitted to the Global Note in an appropriate manner to reflect the modification of the Conditions.

If a Replacement Rate, any necessary Adjustment Spread and all other relevant Replacement Rate Adjustments are not determined in accordance with the foregoing, the Issuer may, on giving at least 15 Business Days notice to the Pfandbriefholders in accordance with § 10 up until (but excluding) the Interest Determination Day immediately following the Relevant Interest Determination Day, redeem all but not some only of the Securities at the Early Redemption Amount together with interest accrued to (but excluding) the date of redemption. which the relevant Asset Transfer Notice relates.

An Asset Transfer Notice must:

- (i) specify the name and address of the Securityholder, the person from whom the Issuer may obtain details for the delivery of the Asset Amount and any details required for delivery of the Asset Amount;
- (ii) if such Security is represented by a Global Security, specify the principal amount of Securities which are the subject of such notice and the number of the Securityholder's account at the relevant Clearing System to be debited with such Securities and irrevocably instruct and authorise the relevant Clearing System to debit the Securityholder's account with such Securities on or before the Delivery Date;
- (iii) include an undertaking to pay all Delivery Expenses and if the Security is represented by a Global Security, an authority to debit a specified account of the Securityholder at the relevant Clearing System in respect thereof and to pay such Delivery Expenses;
- (iv) specify an account to which dividends (if any) payable pursuant to this subsection or any other cash amounts are to be paid; and
- (v) authorise the production of such notice in any applicable administrative or legal proceedings.

**[(vi)] [additional requirements]**

No Asset Transfer Notice may be withdrawn after receipt thereof by the relevant Clearing System or a Paying Agent, as the case may be, as provided above. After delivery of an Asset Transfer Notice, the Securityholder may not transfer the Securities which are the subject of such notice.

In case of Securities represented by a Global Security, upon receipt of such notice, the relevant Clearing System shall verify that the person specified therein as the Securityholder is the holder of the specified principal amount of Securities according to its books.

Failure properly to complete and deliver an Asset Transfer Notice may result in such notice being treated as null and void. Any determination as to whether such notice has been properly completed and delivered as provided in these Conditions shall be made in case of Securities represented by a Global Security by the relevant Clearing System after consultation with the Issuer and shall be conclusive and binding on the Issuer and the Securityholder and, if such Security is a Definitive Security, by the relevant Paying Agent after consultation with the Issuer, and shall be conclusive and binding on the Issuer and the Securityholder.

- (b) Delivery of the Asset Amount in respect of each Security shall be [made at the risk of the Securityholder in such commercially reasonable manner as the Calculation Agent shall in its [sole discretion] determine and notify to the person designated by the

Securityholder in the relevant Asset Transfer Notice] **[alternative manner of delivery]**.

In relation to each Security which is to be redeemed by delivery of the Asset Amount, the Asset Amount will be delivered at the risk of the Securityholder, in the manner provided above on the Maturity Date (such date, subject to adjustment in accordance with this § [6] the "**Delivery Date**"), provided that the Asset Transfer Notice is duly delivered to the Clearing System or any Paying Agent, as the case may be, with a copy to the Issuer, as provided above, not later than the close of business in each place of receipt on **[Cut-Off Date]** (the "**Cut-Off Date**").

If the Securityholder fails to give an Asset Transfer Notice as provided herein with a copy to the Issuer, not later than the close of business in each place of receipt on the Cut-Off Date, then the Asset Amount will be delivered as soon as practicable after the Maturity Date (in which case, such date of delivery shall be the Delivery Date) at the risk of the relevant Securityholder in the manner provided above. For the avoidance of doubt, in such circumstances the relevant Securityholder shall not be entitled to any payment, whether of interest or otherwise, as a result of such Delivery Date falling after the originally designated Delivery Date and no liability in respect thereof shall attach to the Issuer.

- (c) All Delivery Expenses arising from the delivery of the Asset Amount in respect of the Securities shall be for the account of the Securityholder and no delivery of the Asset Amount shall be made until all Delivery Expenses have been paid to the satisfaction of the Issuer by the Securityholder.

After delivery of the Asset Amount and for such period of time as any person other than the relevant Securityholder shall continue to be registered as the legal owner of any such securities or other obligations comprising the Asset Amount ("**Intervening Period**"), none of the Issuer, the Calculation Agent nor any other person shall at any time (i) be under any obligation to deliver or procure delivery to the Securityholder any letter, certificate, notice, circular or any other document or, except as provided herein, payment whatsoever received by that person in respect of such securities or obligations, (ii) be under any obligation to exercise or procure exercise of any or all rights attaching to such securities or obligations or (iii) be under any liability to the Securityholder in respect of any loss or damage which the Securityholder may sustain or suffer as a result, whether directly or indirectly, of that person being registered during such Intervening Period as legal owner of such securities or obligations.

If, prior to the delivery of the Asset Amount in accordance with this § [6], a Settlement Disruption Event is subsisting, then the Delivery Date in respect of such Security shall be postponed until the date on which no Settlement Disruption Event is subsisting and notice thereof shall be given to the Securityholder, in accordance with § [15]. The Securityholder shall not be entitled to any payment, whether of interest or otherwise, on such Security as a result of any delay in the delivery of the Asset Amount pursuant to this paragraph. Where delivery of the Asset Amount has been postponed as provided in this paragraph the Issuer shall not be in breach of these Conditions and no liability in respect thereof shall attach to the Issuer.

For so long as delivery of the Asset Amount in respect of any Security is not practicable by reason of a Settlement Disruption Event, then in lieu of physical settlement and notwithstanding any other provision hereof, the Issuer may elect in its sole discretion to satisfy its obligations in respect of the relevant Security by payment to the Securityholder of the Disruption Cash Settlement Price (as defined below) not later than on the third Business Day following the date that the notice of such election (the "**Election Notice**") is given to the Securityholders in accordance with § [15]. Payment of the Disruption Cash Settlement Price will be made in such manner as shall be notified to the Securityholders in accordance with § [15].

Where the Asset Amount is, in the determination of the Issuer, an amount other than an amount of the Relevant Assets capable of being delivered, the Securityholders will receive an Asset Amount comprising of the nearest number (rounded down) of the Relevant Assets capable of being delivered by the Issuer (taking into account that a Securityholder's entire holding may be aggregated at the Issuer's discretion for the purpose of delivering the Asset Amounts), and an amount in the Specified Currency which shall be the value of the amount of the Relevant Assets so rounded down, as calculated by the Calculation Agent in a fair and commercially reasonable manner from such source(s) as it may select, after consultation with the Issuer (converted if necessary into the Specified Currency by reference to such exchange rate as the Calculation Agent deems appropriate). Payment will be made in such manner as shall be notified to the Securityholders in accordance with § [15].

For the purposes of the Securities (i) the Issuer shall be under no obligation to register or procure the registration of the Securityholder or any other person as the registered shareholder in the register of members of the Equity Issuer, (ii) the Issuer shall not be obliged to account to any Securityholder or any other person for any entitlement received or that is receivable in respect of Underlying Equities comprising the Asset Amount in respect of any Security if the date on which the Underlying Equities are first traded on the Relevant Exchange ex such entitlement is on or prior to the Maturity Date and (iii) any interest, dividend or other distribution in respect of any Asset Amount will be payable to the party that would receive such interest, dividend or other distribution according to market practice for a sale of the Underlying Equities executed on the Delivery Date and to be delivered in the same manner as the Asset Amount. In that case (i) the eighth Scheduled Trading Day shall be deemed to be the [Valuation Date] [or] [relevant] [Underlying Determination Date] [, as the case may be], notwithstanding the fact that such day is a Disrupted Day, and (ii) the Calculation Agent shall determine the [Reference Price] [relevant] [Determination Price] by determining the level of the Index as of the [Valuation Time] [Determination Time] on that eighth Scheduled Trading Day in accordance with the formula for and method of calculating the Index last in effect prior to the occurrence of the first Disrupted Day using the Exchange traded or quoted price as of the [Valuation Time] [Determination Time] on that eighth Scheduled Trading Day of each security comprised in the Index (or, if an event giving rise to a Disrupted Day has occurred in respect of the relevant security on that eighth Scheduled Trading Day, its good faith estimate of the value for the relevant

**[If the Securities relate to a basket of Indices the following applies:** the [Valuation Date] [or] [relevant] [Underlying Determination Date] [, as the case may be] for each Index not affected by the occurrence of a Disrupted Day shall be the [Scheduled Valuation Date] [or] [Scheduled Underlying Determination Date] [, as the case may be], and the [Valuation Date] [or] [relevant] [Underlying Determination Date] [, as the case may be] for each Index affected by the occurrence of a Disrupted Day (each an "Affected Index") shall be the first succeeding Scheduled Trading Day that is not a Disrupted Day relating to the Affected Index, unless each of the eight Scheduled Trading Days immediately following the [Scheduled Valuation Date] [or] [Scheduled Underlying Determination Date] [, as the case may be] is a Disrupted Day relating to the Affected Index. In that case (i) that eighth Scheduled Trading Day shall be deemed to be the [Valuation Date] [or] [relevant] [Underlying Determination Date] [, as the case may be] for the Affected Index, notwithstanding the fact that such day is a Disrupted Day, and (ii) the Calculation Agent shall determine the [Reference Price] [relevant] [Determination Price] using, in relation to the Affected Index, the level of that Index as of the [Valuation Time] [Determination Time] on that eighth Scheduled Trading Day in accordance with the formula for and method of calculating that Index last in effect prior to the occurrence of the first Disrupted Day using the Exchange traded or quoted price as of the [Valuation Time] [Determination Time] on that eighth Scheduled Trading Day of each security comprised in that Index (or, if an event giving rise to a Disrupted Day has occurred in respect of the relevant security on that eighth Scheduled Trading Day, its good faith estimate of the value for the relevant security as of the [Valuation Time] [Determination Time] on that eighth Scheduled Trading Day).]

**[in case of Index Linked Interest Securities: "Determination Time"** means [●] [the Scheduled Closing Time on the relevant Exchange on the Underlying Determination Date in relation to [each Index to be valued] [the Index]. If the relevant Exchange closes prior to its Scheduled Closing Time and the specified Determination Time is after the actual closing time for its regular trading session, then the Determination Time shall be such actual closing time.]

**"Disrupted Day"** means (a) where an Index is not a Multi-Exchange Index, any Scheduled Trading Day on which [the] [a relevant] Exchange or any Related Exchange fails to open for trading during its regular trading session or on which a Market Disruption Event has occurred; or (b) where an Index is a Multi-Exchange Index, any Scheduled Trading Day on which: (i) the Index Sponsor fails to publish the level of the Index; (ii) any Related Exchange fails to open for trading during its regular trading session; or (iii) a Market Disruption Event has occurred.

- (b) in relation to an Index which is a Multi-Exchange Index, the closure on any Exchange Business Day of the Exchange in respect of any Component Security

or the Related Exchange prior to its Scheduled Closing Time unless such earlier closing is announced by such Exchange or Related Exchange (as the case may be) at least one hour prior to the earlier of: (i) the actual closing time for the regular trading session on such Exchange or Related Exchange (as the case may be) on such Exchange Business Day; and (ii) the submission deadline for orders to be entered into the relevant Exchange or Related Exchange system for execution at the relevant [Valuation Time] [Determination Time] on such Exchange Business Day.

**"Exchange Business Day"** means: (a) where an Index is not a Multi-Exchange Index, any Scheduled Trading Day on which [the] [each] Exchange and each Related Exchange are open for trading during their respective regular trading sessions, notwithstanding any such Exchange or Related Exchange closing prior to its Scheduled Closing Time; or (b) where an Index is a Multi-Exchange Index, any Scheduled Trading Day on which: (i) the Index Sponsor publishes the level of the Index; and (ii) the Related Exchange is open for trading during its regular trading session, notwithstanding any Exchange or the Related Exchange closing prior to its Scheduled Closing Time.

- (b) in relation to an Index which is a Multi-Exchange Index, any event (other than an Early Closure) that disrupts or impairs (as determined by the Calculation Agent) the ability of market participants in general to effect transactions in, or obtain market values for: (i) any Component Security on the Exchange in respect of such Component Security; or (ii) futures or options contracts relating to the Index on the relevant Related Exchange.

**"Market Disruption Event"** means:

For the purposes of determining whether a Market Disruption Event in respect of an Index exists at any time, if a Market Disruption Event occurs in respect of a security included in the Index or such Component Security at any time, then the relevant percentage contribution of that security or Component Security, as the case may be, to the level of the Index shall be based on a comparison of (i) the portion of the level of the Index attributable to that security or Component Security, as the case may be, and (ii) the overall level of the Index, in each case either (x) except where the Index is not a Multi-Exchange Index, immediately before the occurrence of such Market Disruption Event or (y) where that Index is a Multi-Exchange Index, using the official opening weightings as published by the Index Sponsor as part of the market "opening data".

APPLIES:

(1) *Delay in Publication.* If the Calculation Agent determines that a Delayed Index Level Event in respect of an Index has occurred with respect to any Determination Date, then the Relevant Level for such Index the subject of such Delayed Index Event (the "**Substitute Index Level**") shall be determined by the Calculation Agent [the following applies if Related Bond is not applicable: by reference to the following formula:] [the following applies if Related Bond is applicable: as follows:

- (a) the Calculation Agent shall determine the Substitute Index Level by reference to the corresponding index level determined under the terms and conditions of the relevant Related Bond; or
- (b) if the Calculation Agent is not able to determine a Substitute Index Level under (a) above, the Calculation Agent shall determine the Substitute Index Level by reference to the following formula:]

Substitute Index Level = Base Level x (Latest Level/Reference Level)

where:

**"Base Level"** means, in respect of an Inflation Index, the level of such Inflation Index (excluding any "flash" estimates) published or announced by the relevant Inflation Index Sponsor in respect of the month which is 12 calendar months prior to the month for which the Substitute Index Level is being determined.

**"Latest Level"** means, in respect of an Inflation Index, the latest level of such Inflation Index (excluding any "flash" estimates) published or announced by the relevant Inflation Index Sponsor prior to the month in respect of which the Substitute Index Level is being determined.

**"Reference Level"** means, in respect of an Inflation Index, the level of such Inflation Index (excluding any "flash" estimates) published or announced by the relevant Inflation Index Sponsor in respect of the month that is 12 calendar months prior to the month in respect of the Latest Level.

The Issuer shall give notice to the Securityholders in accordance with § [15] of any Substitute Index Level calculated pursuant to this § [8](1).

(2) *Cessation of Publication.* If a level for the Inflation Index has not been published or announced for two consecutive months or the Inflation Index Sponsor announces that it will no longer continue to publish or announce the Inflation Index then the Calculation Agent shall determine a successor index (in lieu of any previously applicable Inflation Index) for the purposes of the Inflation Linked Securities by using the following methodology:

- (i) [the following applies if Related Bond is applicable: if at any time, a successor index has been designated by the Calculation Agent pursuant to the terms and conditions of the Related Bond, such successor index shall be designated a "Successor Index" notwithstanding that any other Successor Index may previously have been determined under sub-paragraphs (ii), (iii) or (iv) below; or]
- (ii) if [the following applies if Related Bond is applicable: a Successor

Index has not been determined pursuant to § [8](2)(i) and] a notice has been given or an announcement has been made by the Inflation Index Sponsor, specifying that the Inflation Index will be superseded by a replacement Inflation Index specified by the Inflation Index Sponsor, and the Calculation Agent determines that such replacement index is calculated using the same or substantially similar formula or method of calculation as used in the calculation of the previously applicable Inflation Index, such replacement index shall be the Inflation Index for purposes of the Inflation Linked Securities from the date that such replacement Inflation Index comes into effect; or

- (iii) if a Successor Index has not been determined pursuant to § [8](2)(i) **[the following applies if Related Bond is applicable: or § [8](2)(ii)],** the Calculation Agent shall, after consultation with the Issuer, ask five leading independent dealers to state what the replacement index for the Inflation Index should be. If between four and five responses are received, and of those four or five responses, three or more leading independent dealers state the same index, this index will be deemed the "Successor Inflation Index". If three responses are received, and two or more leading independent dealers state the same index, this index will be deemed the "Successor Inflation Index". If fewer than three responses are received, the Calculation Agent will proceed to § [8](2)(iv); or
  - (iv) if no replacement index or Successor Inflation Index has been deemed under § [8](2)(i), § [8](2)(ii) **[the following applies if Related Bond is applicable: or § [8](2)(iii)],** by the next occurring Cut-Off Date the Calculation Agent will determine an appropriate alternative index from such Cut-Off Date, and such index will be deemed a "Successor Inflation Index"; or
  - (v) if the Calculation Agent determines that there is no appropriate alternative index, in relation to Securities, the Issuer shall give notice to the Securityholders in accordance with § [15] and redeem all but not some only of the Securities, each principal amount of Securities equal to **[in case of German law Securities the following applies: the Specified Denomination] [in case of English law Securities the following applies: the Calculation Amount]** being redeemed at the Early Redemption Amount.
- (3) *Rebasing of the Inflation Index.* If the Calculation Agent determines that the Inflation Index has been or will be rebased at any time, the Inflation Index as so rebased (the "**Rebased Index**") will be used for purposes of determining the level of the Inflation Index from the date of such rebasing; provided, however, that the Calculation Agent shall make adjustments **[the following applies if Related Bond is applicable: as are made by the calculation agent pursuant to the terms and conditions of the Related Bond]** to the levels of the Rebased Index so that the Rebased Index levels reflect the same rate of inflation as the Index before it was rebased.
- (4) *Material Modification Prior to Last Occurring Cut-Off.* If, on or prior to the last occurring Cut-Off Date, the Inflation Index Sponsor announces that it will make a material change to the Inflation Index then the Calculation Agent shall make **[the following applies if Related Bond is applicable: any such adjustments consistent with adjustments made to the Related Bond] [the following applies if Related Bond is not applicable: only those adjustments to the Inflation Index necessary for the modified Inflation Index to continue as the Inflation Index].**

If the Fallback Bond redeems, the Calculation Agent will select a new Fallback Bond on the same basis, but selected from all eligible bonds in issue at the time the original Fallback Bond redeems (including any bond for which the redeemed bond is exchanged).]

**"Reference Month"** means the calendar month for which the level of the Inflation Index was reported, regardless of when this information is published or announced. ## TERMS AND CONDITIONS – GERMAN LANGUAGE VERSION

### Emissionsbedingungen – Deutschsprachige Fassung

#### Einleitung

Die Emissionsbedingungen der *Schuldverschreibungen* (die "**Emissionsbedingungen**"), die durch die *Endgültigen Bedingungen* (oder im Fall von *Befreiten Schuldverschreibungen* (*Exempt Securities*) durch ein *Konditionenblatt* (*Pricing Supplement*)) vervollständigt werden, sind nachfolgend für fünf Optionen aufgeführt. Im Fall von *Namensschuldverschreibungen* (*Registered Securities*) oder *Kreditbezogenen Anleihen* (*Credit Linked Notes*) werden die Emissionsbedingungen zudem durch den anwendbaren Annex (bzw. anwendbare Annexe, falls sowohl der Annex für *Namensschuldverschreibungen* (*Registered Securities Annex*) als auch einer der Annexe für *Kreditbezogene Anleihen* (*Credit Linked Notes Annex*) Anwendung finden) ergänzt.

- Emissionsbedingungen für festverzinsliche Anleihen und Nullkupon-Anleihen (Option I),
- Emissionsbedingungen für variabel verzinsliche Anleihen (Option II),
- Emissionsbedingungen für festverzinsliche Pfandbriefe und Nullkupon-Pfandbriefe (Option III),
- Emissionsbedingungen für variabel verzinsliche Pfandbriefe (Option IV), und
- Emissionsbedingungen für Strukturierte Anleihen (Option V).

Der Satz von Emissionsbedingungen für jede dieser Optionen enthält bestimmte weitere Optionen, die entsprechend gekennzeichnet sind, indem die jeweilige optionale Bestimmung durch Instruktionen und Erklärungen entweder in der linken Spalte der Emissionsbedingungen oder in eckigen Klammern innerhalb der Emissionsbedingungen bezeichnet wird.

In den *Endgültigen Bedingungen* (bzw. im *Konditionenblatt* im Fall von *Befreiten Schuldverschreibungen*) wird die Emittentin festlegen, welche der Option I, Option II, Option III, Option IV oder Option V (einschließlich der jeweils darin enthaltenen bestimmten weiteren Optionen) für die einzelne Emission von *Schuldverschreibungen* Anwendung findet, indem entweder die betreffenden Angaben wiederholt werden oder auf die betreffenden Optionen verwiesen wird.

Soweit die Emittentin zum Zeitpunkt der Billigung des Debt Issuance Programme Prospekts keine Kenntnis von bestimmten Angaben hatte, die auf eine einzelne Emission von *Schuldverschreibungen* anwendbar sind und bei denen es sich um Kategorie B oder C Informationen gemäß der EU Prospektverordnung (EG 809/2004) handelt, enthält dieser Prospekt Leerstellen in eckigen Klammern, die die maßgeblichen durch die *Endgültigen Bedingungen* (bzw. das *Konditionenblatt* im Fall von *Befreiten Schuldverschreibungen*) zu vervollständigenden Angaben enthalten.

## Emissionsbedingungen für Festverzinsliche Anleihen und Nullkupon-Anleihen (Option I)

Diese Serie von Anleihen (die "**Schuldverschreibungen**") wird gemäß einem Zahlstellenvertrag vom 21. Kopien des Agency Agreement können kostenfrei bei der bezeichneten Geschäftsstelle des Fiscal Agent, der bezeichneten Geschäftsstelle jeder Zahlstelle sowie der Hauptgeschäftsstelle der Emittentin bezogen werden.

Für jede Tranche von Schuldverschreibungen, bei denen es sich nicht um Befreite Schuldverschreibungen (wie nachstehend definiert) handelt, gelten endgültige Bedingungen (jeweils die "**Endgültigen Bedingungen**"), und für jede Tranche von Befreiten Schuldverschreibungen gilt ein Konditionenblatt (jeweils ein "**Konditionenblatt**"), sofern nichts anderes bestimmt ist. Jede Bezugnahme in diesen Bedingungen auf die "Endgültigen Bedingungen" ist auch als Bezugnahme auf das "Konditionenblatt" zu verstehen (soweit anwendbar). Die Bestimmungen der nachstehenden Bedingungen gelten für die Schuldverschreibungen in der jeweils durch die Bestimmungen von Teil I der anwendbaren Endgültigen Bedingungen vervollständigten Form oder, sofern die Schuldverschreibungen weder zum Handel an einem geregelten Markt innerhalb des Europäischen Wirtschaftsraums zugelassen sind noch im Europäischen Wirtschaftsraum in Fällen angeboten werden, in denen nach Maßgabe der Prospektrichtlinie die Veröffentlichung eines Prospekts vorgeschrieben ist ("**Befreite Schuldverschreibungen**"), wie jeweils durch das anwendbare Konditionenblatt für die Zwecke der Schuldverschreibungen ergänzt, ersetzt oder geändert. "**Prospektrichtlinie**" bezeichnet die Richtlinie 2003/71/EG (in der jeweils geänderten oder ersetzten Fassung) und umfasst alle maßgeblichen Umsetzungsmaßnahmen in einem maßgeblichen Mitgliedstaat des Europäischen Wirtschaftsraums. *Dauerglobalurkunde.* Die Schuldverschreibungen und alle damit verbundenen Rechte sind in der Form einer Dauerglobalurkunde (die "**Dauerglobalurkunde**") verbrieft, die durch die Schweizer Hauptzahlstelle bei der SIX SIS AG oder einer anderen von der SIX Swiss Exchange AG für diese Zwecke anerkannten anerkannten Verwahrungsstelle in der Schweiz (SIX SIS AG oder jede andere Verwahrungsstelle in der Schweiz, die "**Verwahrungsstelle**" bzw. das "**Clearing System**") bis zur endgültigen Rückzahlung der Schuldverschreibungen hinterlegt wird. Sobald die Dauerglobalurkunde bei der Verwahrungsstelle hinterlegt und den Effektenkonten eines oder mehrerer Teilnehmer der Verwahrungsstelle gutgeschrieben wurde, stellen die Schuldverschreibungen, für die Zwecke des Schweizer Rechts, Bucheffekten ("**Bucheffekten**") gemäss den Bestimmungen des Schweizer Bucheffektengesetzes dar.

Jedem Gläubiger der Schuldverschreibungen steht für Zwecke des Schweizer Rechts im Umfang seiner Forderung gegen die Emittentin ein Miteigentumsanteil an der Dauerglobalurkunde zu, wobei, solange die Schuldverschreibungen Bucheffekten darstellen, der Miteigentumsanteil außer Kraft gesetzt ist und die Schuldverschreibungen nur durch Gutschrift der zu übertragenden Schuldverschreibungen in einem Effektenkonto des Empfängers übertragen werden können.

Die Unterlagen der Verwahrungsstelle bestimmen die Anzahl Schuldverschreibungen, die durch jeden Teilnehmer der Verwahrungsstelle gehalten wird. In Bezug auf Schuldverschreibungen, welche Bucheffekten darstellen, gelten diejenigen Personen als Gläubiger der Schuldverschreibungen (die "**Gläubiger der Schuldverschreibungen**"), die die Schuldverschreibungen in einem auf ihren Namen lautenden Effektenkonto für eigene Rechnung halten, bzw. im Falle von Verwahrungsstellen, die die Schuldverschreibungen in einem auf ihren Namen lautenden Effektenkonto auf eigene Rechnung halten.

*Vorläufige Globalurkunde – Austausch.*

(a) Die Schuldverschreibungen sind anfänglich durch eine vorläufige Globalurkunde (die "**Vorläufige Globalurkunde**") ohne Zinsscheine oder Rückzahlungsscheine verbrieft. Die Vorläufige Globalurkunde wird gegen eine Dauerglobalurkunde (die "**Dauerglobalurkunde**" und zusammen mit der Vorläufigen Globalurkunde die "**Globalurkunden**" und jeweils eine "**Globalurkunde**") ohne Zinsscheine oder Rückzahlungsscheine ausgetauscht. weniger als 40 Tage nach dem Tag der Ausgabe der Vorläufigen Globalurkunde liegen. Ein solcher Austausch darf nur nach Vorlage von Bescheinigungen erfolgen, wonach der bzw. die wirtschaftliche(n) Eigentümer (*beneficial owner(s)*) der durch die Vorläufige Globalurkunde verbrieften Schuldverschreibungen keine US-Person ist bzw. keine US-Personen sind (ausgenommen bestimmte Finanzinstitute oder bestimmte Personen, die Schuldverschreibungen über solche Finanzinstitute halten). **[Im Fall von Schuldverschreibungen, bei denen es sich nicht um Nullkupon-Anleihen handelt, gilt Folgendes:** Zinszahlungen auf durch eine Vorläufige Globalurkunde verbriefte Schuldverschreibungen erfolgen erst nach Vorlage solcher Bescheinigungen.] Eine gesonderte Bescheinigung ist für jede solche Zinszahlung erforderlich. Jede Bescheinigung, die am oder nach dem 40. (3) Vorläufige Globalurkunde – Austausch.

- (a) Die Schuldverschreibungen sind anfänglich durch eine vorläufige Globalurkunde (die "**Vorläufige Globalurkunde**") ohne Zinsscheine oder Rückzahlungsscheine verbrieft. Die Vorläufige Globalurkunde wird gegen eine Dauerglobalurkunde (die "**Dauerglobalurkunde**" und zusammen mit der Vorläufigen Globalurkunde die "**Globalurkunden**" und jeweils eine "**Globalurkunde**") ohne Zinsscheine oder Rückzahlungsscheine ausgetauscht. Solange Schuldverschreibungen durch eine Vorläufige Globalurkunde verbrieft sind, erfolgen Zahlungen von Kapital- und etwaigen Zinsbeträgen sowie allen sonstigen gegebenenfalls in Bezug auf die Schuldverschreibungen zahlbaren Beträgen, die vor dem Austausch tag (wie nachstehend definiert) fällig werden, gegen Vorlage der Vorläufigen Globalurkunde nur insoweit, als dem betreffenden Clearing System eine Bescheinigung (gemäß einem vorzugebenden Muster) vorgelegt wird, wonach es sich gemäß den US-Steuervorschriften (*U.S. Treasury regulations*) bei den wirtschaftlichen Eigentümern (*beneficial owners*) der Anteile an den Schuldverschreibungen nicht um US-Personen oder um Personen, die diese Anteile zum Weiterverkauf an US-Personen erworben haben, handelt, und das betreffende Clearing System eine entsprechende Bescheinigung (basierend auf den bei ihm eingegangenen Bescheinigungen) gegenüber dem Fiscal Agent abgegeben hat.
- (b) Die Vorläufige Globalurkunde kann auf Verlangen wie in der Vorläufigen Globalurkunde beschrieben an oder nach dem 40. Tag nach der Ausgabe der Vorläufigen Globalurkunde (der "**Austauschtag**") und unter Vorlage (soweit nicht bereits vorher erfolgt) einer Bescheinigung betreffend das wirtschaftliche Eigentum (*beneficial ownership*) (wie vorstehend beschrieben) kostenfrei gegen Anteile an

der Dauerglobalurkunde ausgetauscht werden.

- (c) Der Inhaber einer Vorläufigen Globalurkunde ist nicht berechtigt, Zahlungen von Kapital-, Zins- oder sonstigen Beträgen zu vereinnahmen, die an oder nach dem Austauschtag fällig werden, es sei denn, der Austausch der Vorläufigen Globalurkunde gegen einen Anteil an der Dauerglobalurkunde wird nach ordnungsgemäßer Vorlage einer Bescheinigung bezüglich des wirtschaftlichen Eigentums unberechtigtweise vorenthalten oder verweigert.

Die Emittentin unterrichtet die Gläubiger der Schuldverschreibungen unverzüglich durch Mitteilung gemäß § [12] über den Eintritt eines Austauschereignisses. Im Fall des Eintritts eines Austauschereignisses kann das betreffende Clearing System (auf Anweisung eines Inhabers eines Anteils an dieser Dauerglobalurkunde) dem Fiscal Agent ein Austauschverlangen übermitteln; im Fall des Eintritts eines Austauschereignisses gemäß vorstehendem Unterabsatz [(ii)][(iii)] kann ein solches Austauschverlangen dem Fiscal Agent auch von der Emittentin übermittelt werden. Werden Schuldverschreibungen mit einer Fälligkeit und einem [Zinssatz] [Zinssätzen] begeben, die dazu führen würden, dass der wie vorstehend beschrieben in Abzug zu bringende Betrag den ansonsten zu zahlenden Rückzahlungsbetrag übersteigt, wenn bei Vorlage der betreffenden Einzelurkunde zur Zahlung die noch nicht fälligen Zinsscheine nicht beigelegt sind und nicht mit eingereicht werden, so

werden diese noch nicht fälligen Zinsscheine (unabhängig davon, ob sie beigelegt sind oder nicht) zum Zeitpunkt der Fälligkeit solcher Einzelkunden zur Rückzahlung insoweit ungültig (und es werden diesbezüglich keine Zahlungen geleistet), insoweit dies erforderlich ist, damit der gemäß der vorstehenden Regelung in Abzug zu bringende Betrag den ansonsten zur Zahlung fälligen Rückzahlungsbetrag nicht übersteigt. Sofern die Anwendung des vorstehenden Satzes die Entwertung einiger, aber nicht sämtlicher noch nicht fälliger zu einer Einzelkunde gehörenden Zinsscheine erfordert, bestimmt die betreffende Zahlstelle, welche nicht fälligen Zinsscheine ungültig werden sollen, wobei zu diesem Zweck später fällige Zinsscheine vor früher fälligen Zinsscheinen für ungültig zu erklären sind.

- (5) *Gemeinsamer Vertreter.* Die Gläubiger der Schuldverschreibungen können durch Mehrheitsbeschluss zur Wahrnehmung ihrer Rechte einen gemeinsamen Vertreter (der "**Gemeinsame Vertreter**") für alle Gläubiger bestellen oder diesen abberufen, die Aufgaben und Befugnisse des Gemeinsamen Vertreters festlegen, Rechte der Gläubiger der Schuldverschreibungen auf den Gemeinsamen Vertreter übertragen und die Beschränkung der Haftung des Gemeinsamen Vertreters bestimmen. **[Falls ein Gemeinsamer Vertreter in den Bedingungen bestimmt wird, gilt Folgendes:**

- (5) *Gemeinsamer Vertreter.* Gemeinsamer Vertreter (der "**Gemeinsame Vertreter**") für alle Gläubiger der Schuldverschreibungen zur Wahrnehmung ihrer Rechte

Der Gemeinsame Vertreter hat die Weisungen der Gläubiger der Schuldverschreibungen zu befolgen. Soweit er zur Geltendmachung von Rechten der Gläubiger der Schuldverschreibungen ermächtigt ist, sind die einzelnen Gläubiger der Schuldverschreibungen zur selbständigen Geltendmachung dieser Rechte nicht befugt, es sei denn, die Gläubiger bestimmen durch Mehrheitsbeschluss etwas anderes. Über seine Tätigkeit hat der Gemeinsame Vertreter den Gläubigern zu berichten.

Der Gemeinsame Vertreter haftet den Gläubigern als Gesamtgläubiger für die ordnungsgemäße Erfüllung seiner Aufgaben; bei seiner Tätigkeit hat er die Sorgfalt eines ordentlichen und gewissenhaften Geschäftsleiters anzuwenden. Die Haftung des Gemeinsamen Vertreters ist auf das Zehnfache seiner jährlichen Vergütung beschränkt, es sei denn, dem Gemeinsamen Vertreter fällt Vorsatz oder grobe Fahrlässigkeit zur Last. Die Haftung des Gemeinsamen Vertreters kann durch Beschluss der Gläubiger weiter beschränkt werden. Über die Geltendmachung von Ersatzansprüchen der Gläubiger gegen den Gemeinsamen Vertreter entscheiden die Gläubiger.]
