| 30. Delivery: | Delivery against payment |
| 31. Registrar and Transfer Agent (if any): | Citibank, N.A., London Branch |
| 32. Intended to be held in a manner which would allow Eurosystem eligibility: | No |

GENERAL INFORMATION

IBRD's most recent Information Statement was issued on 18 September 2013.

SUPPLEMENTAL PROSPECTUS INFORMATION

The Prospectus is hereby supplemented with the following information, which shall be deemed to be incorporated in, and to form part of, the Prospectus.

The Executive Directors of IBRD approved two Management proposals on February 11, 2014.

The Executive Directors approved a package of measures designed to enhance IBRD's financial capacity to meet borrowing country needs, comprised of the following four elements:

- IBRD's target minimum equity-to-loans ratio was revised from 23 percent to 20 percent, reflecting improvement in IBRD's portfolio credit quality since the previous target was adopted in 2008; as of December 31, 2013, IBRD's equity-to-loans ratio was 25.8 percent;
- IBRD's Single Borrower Limit (SBL) was increased to \$20 billion for India and \$19 billion for other SBL-eligible borrowing countries, with a surcharge of 50 basis points per annum on loan balances in excess of the previous SBL (\$17.5 billion for India and \$16.5 billion for other SBL-eligible borrowing countries) in order to help support the increase in the SBL;
- Commitment fees of 25 basis points per annum on undisbursed balances on IBRD loans will be restored, effective July 1, 2014; and
- The maximum maturity for most IBRD loans and guarantees will be extended from the current limits of 30 years final/18 years average to 35 years final/20 years average, with the application of a revised maturity premium schedule, effective July 1, 2014; the maturity premium charges will increase, with the starting point for these charges starting at 8 years average maturity rather than the prior level of 12 years average maturity.

The Executive Directors also approved a new Equity Management Framework (EMF), which shares the same objective as the equity duration extension strategy approved in 2007 - namely, to reduce the sensitivity of IBRD's equity income to fluctuations in short-term interest rates. The EMF provides more flexibility to manage equity income. In particular, the EMF allows for the possibility of shortening the duration of IBRD's equity, when warranted by market and macroeconomic conditions, whereas the equity duration extension strategy required that duration be maintained within a range of 4 to 5 years. The EMF also provides for a wider variety of tools and strategies for managing equity income than the equity duration extension strategy. The Executive Directors approved Management's

recommendation to maintain a short duration for equity in the short-term, with the authority to enter into other approved strategies or combinations thereof as market conditions warrant.

LISTING APPLICATION
