GENERAL INFORMATION

IBRD's most recent Information Statement was issued on 18 September 2013.

SUPPLEMENTAL PROSPECTUS INFORMATION

The Prospectus is hereby supplemented with the following information, which shall be deemed to be incorporated in, and to form part of, the Prospectus.

The Executive Directors of IBRD approved two Management proposals on February 11, 2014.

The Executive Directors approved a package of measures designed to enhance IBRD's financial capacity to meet borrowing country needs, comprised of the following four elements:

- IBRD's target minimum equity-to-loans ratio was revised from 23 per cent. to 20 per cent., reflecting improvement in IBRD's portfolio credit quality since the previous target was adopted in 2008; as of December 31, 2013, IBRD's equity-to-loans ratio was 25.8 per cent.;
- IBRD's Single Borrower Limit (SBL) was increased to \$20 billion for India and \$19 billion for other SBL-eligible borrowing countries, with a surcharge of 50 basis points per annum on loan balances in excess of the previous SBL (\$17.5 billion for India and \$16.5 billion for other SBL-eligible borrowing countries) in order to help support the increase in the SBL;
- Commitment fees of 25 basis points per annum on undisbursed balances on IBRD loans will be restored, effective July 1, 2014; and
- The maximum maturity for most IBRD loans and guarantees will be extended from the current limits of 30 years final/18 years average to 35 years final/20 years average, with the application of a revised maturity premium schedule, effective July 1, 2014; the maturity premium charges will increase, with the starting point for these charges starting at 8 years average maturity rather than the prior level of 12 years average maturity.

The Executive Directors also approved a new Equity Management Framework (EMF), which shares the same objective as the equity duration extension strategy approved in 2007 - namely, to reduce the sensitivity of IBRD's equity income to fluctuations in short-term interest rates. The EMF provides more flexibility to manage equity income. In particular, the EMF allows for the possibility of shortening the duration of IBRD's equity, when warranted by market and macroeconomic conditions, whereas the equity duration extension strategy required that duration be maintained within a range of 4 to 5 years. The EMF also provides for a wider variety of tools and strategies for managing equity income than the equity duration extension strategy. The Executive Directors approved Management's recommendation to maintain a short duration for equity in the short-term, with the authority to enter into other approved strategies or combinations thereof as market conditions warrant.

SPECIAL ACCOUNT

An amount equal to the net proceeds of the issue of the Notes will be credited to a special account that will support IBRD's lending for Eligible Projects. So long as the Notes are outstanding and the special account has a positive balance, at the end of every fiscal quarter, funds will be deducted from the special account and added to IBRD's lending pool in an amount equal to all disbursements from that pool made during such quarter in respect of Eligible Projects.

ELIGIBLE PROJECTS

"Eligible Projects" means all projects funded, in whole or in part, by IBRD that promote the transition to low-carbon and climate resilient growth in the recipient country, as determined by IBRD. Eligible Projects may include projects that target (a) mitigation of climate change, including investments in low-carbon and clean technology programs, such as energy efficiency and renewable energy programs and

projects (“**Mitigation Projects**”) or (b) adaptation to climate change, including investments in climate-resilient growth (“**Adaptation Projects**”).

Examples of Mitigation Projects include, without limitation:

- Rehabilitation of power plants and transmission facilities to reduce greenhouse gas emissions
- Solar and wind installations
- Funding for new technologies that permit significant reductions in GHG emissions
- Greater efficiency in transportation, including fuel switching and mass transport
- Waste management (methane emission) and construction of energy-efficient buildings
- Carbon reduction through reforestation and avoided deforestation

Examples of Adaptation Projects include, without limitation:

- Protection against flooding (including reforestation and watershed management)
- Food security improvement and stress-resilient agricultural systems which slow down deforestation
- Sustainable forest management and avoided deforestation

The above examples of Mitigation Projects and Adaptation Projects are for illustrative purposes only and no assurance can be provided that disbursements for projects with these specific characteristics will be made by IBRD during the term of the Notes.
