The CSSF only approves this Prospectus as meeting the standards of completeness, comprehensibility and consistency imposed by the Prospectus Regulation and the Luxembourg Prospectus Act. Approval by the CSSF should not be considered as an endorsement of the Issuers (as defined below) or the quality of the Notes (as defined below) that are the subject of this Prospectus. In accordance with Article 6 (4) of the Luxembourg Prospectus Act (with regard to the Base Prospectuses) and in accordance with Article 34 (3) of the Luxembourg Prospectus Act (with regard to the Alleviated Base Prospectuses), by approving this Prospectus, the CSSF assumes no responsibility for the economic or financial soundness of the transactions contemplated by this Prospectus or the quality and solvency of any of the Issuers. Investors should make their own assessment as to the suitability of investing in the Notes.

In addition, the Issuers have requested the CSSF to provide (i) the German Federal Financial Supervisory Authority (*Bundesanstalt für Finanzdienstleistungsaufsicht*) in its capacity as competent authority in the Federal Republic of Germany under the Prospectus Regulation, and (ii) the Netherlands Authority for the Financial Markets (*Stichting Autoriteit Financiële Markten*) in its capacity as competent authority in the Netherlands under the Prospectus Regulation with certificates of approval in accordance with Article 25 (1) of the Prospectus Regulation attesting that the Base Prospectuses have been drawn up in accordance with the Prospectus Regulation (each, a "**Notification**"). This Prospectus (as supplemented as at the relevant time, if applicable) is valid for a period of twelve months from its Date of Approval (in relation to Notes which are to be admitted to trading on a regulated market in the EEA and/or offered to the public in the EEA other than in circumstances where an exemption is available under Article 1(4) and/or Article 3(2) of the Prospectus Regulation) i.e. until (and including) May 17, 2023. IMPORTANT NOTICE

The purpose of this Prospectus is to give information with regard to Mercedes-Benz Group AG (formerly: Daimler AG ("**DAG**")) ("**MBG**" or the "**Guarantor**" and, together with its subsidiaries, the "**Mercedes-Benz Group**", the "**Group**" or "**Mercedes-Benz**"), Mercedes-Benz Australia/Pacific Pty Ltd (ABN 23 004 411 410) ("**MBAP**"), Mercedes-Benz International Finance B.V. (formerly: Daimler International Finance B.V. ("**DIF**")) ("**MBIF**"), Daimler Canada Finance Inc. ("**DCFI**"), Daimler Finance North America LLC ("**DFNA**") and Mercedes-Benz Finance Co., Ltd. ("**MBFJ**") (each an "**Issuer**" and together, the "**Issuers**") and the EUR 70,000,000,000 Euro Medium Term Note Programme of the Issuers.

This Prospectus is to be read and construed in conjunction with any supplement hereto and all documents which are incorporated by reference herein (see the section entitled "*Documents Incorporated by Reference*") and, in relation to any Tranches (as defined below) of Notes, together with the relevant Final Terms (as defined below). This Prospectus shall be read and construed on the basis that such documents are incorporated by reference in and form part of this Prospectus.

The binding language of this Prospectus is English (with the exception of the section entitled "*Form of the Guarantee*", whose binding language is German). Each of the sections entitled "*Form of the Final Terms*" and "*Terms and Conditions of the Notes*" is accompanied by a German language translation. The binding language of the Final Terms and the Conditions (as defined below) prepared in relation to Notes to be issued under the Programme may be German or English as set out in the relevant Final Terms and/or the relevant Conditions.

The Dealers (as defined below) have not separately verified the information contained herein. Accordingly, no representation, warranty or undertaking, express or implied, is made and no responsibility is accepted by the Dealers as to the accuracy or completeness of the information contained in, or incorporated by reference in, this Prospectus or any other information provided by the Issuers in connection with the Programme or the Notes to be issued under the Programme. The Dealers accept no liability in relation to the information contained in, or incorporated by reference in, this Prospectus or any other information provided by the Issuers in connection with the Programme or the Notes to be issued under the Programme or their distribution. The statements made in this paragraph are without prejudice to the respective responsibilities of the Issuers and the Guarantor under the Programme.

Neither this Prospectus nor any Final Terms nor any other information supplied in connection with the Programme or any Notes constitutes an offer or an invitation to subscribe for or purchase any Notes or is intended to provide the basis of any credit or other evaluation and should not be considered as a recommendation by either the Issuers, the Guarantor, the Dealers or any of them that any recipient of this Prospectus or any Final Terms or any other information supplied in connection with the Programme or the Notes should subscribe for or purchase any of the Notes. Each investor contemplating subscribing for or purchasing Notes should make its own independent investigation of the financial condition and affairs and its own appraisal of the creditworthiness of the relevant Issuer and the Guarantor and each recipient of this Prospectus or any Final Terms shall be taken to have made its own investigation and appraisal of the condition (financial or otherwise) of the relevant Issuer and the Guarantor.

No person has been authorized by any of the Issuers or the Guarantor to give any information or to make any representations not contained in or not consistent with the information and the representations set out in this Prospectus or any other document entered into in connection with the issue or sale of any Notes under the Programme, and, if given or made, such information or representations must not be relied upon as having been authorized by the Issuers, the Guarantor or the Dealers.

Neither the delivery of this Prospectus nor the offering, sale, issue or delivery of any Notes shall, in any circumstances, imply that the information contained herein is correct at any time subsequent to the date hereof or that any other information supplied in connection with the Programme is correct as of any time subsequent to the date indicated in the document containing the same. The Dealers expressly do not undertake to review

the financial condition or affairs of the Issuers and the Guarantor during the life of the Programme or to advise any investor in the Notes of any information coming to their attention. Investors should review, *inter alia*, the most recently published financial statements of the relevant Issuer and the Guarantor (if applicable) when deciding whether or not to subscribe for or purchase any Notes.

Each Issuer and the Guarantor have undertaken with the Dealers to supplement this Prospectus in accordance with Article 23 of the Prospectus Regulation or publish a new Prospectus in the event that any significant new factor, material mistake or material inaccuracy relating to the information included in this Prospectus which is capable of affecting the assessment of the Notes to be issued under the Programme arises or is noted between the time when this Prospectus is approved and the final closing of any Tranche of Notes offered to the public or, as the case may be, trading of any Tranche of Notes on a regulated market begins, whichever occurs later. Such supplement or new Prospectus will be viewable on, and obtainable free of charge from, the website of the Luxembourg Stock Exchange (<https://www.bourse.lu/programme/Programme-MercedesBenzGrp/2370>).

The Notes and the unconditional and irrevocable guarantee (the "Guarantee") given by MBG for the due payment of amounts due on any Notes (issued by any Issuer other than MBG under the Programme) have not been and will not be registered under the United States Securities Act of 1933, as amended (the "Securities Act"). The Notes may be subject to U.S. tax law requirements. The Notes may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act. See the section entitled "*Selling Restrictions*".

This document may not be passed on to any person in the United Kingdom except to investment professionals or other persons in circumstances in which Section 21(1) of the Financial Services and Markets Act 2000 (the "FSMA") does not apply.

The Notes have not been and will not be qualified for sale under the securities laws of Canada or any province or territory thereof and may not be offered or sold, directly or indirectly, in Canada, or to, or for the benefit of, any resident thereof, in contravention of any such laws.

The Notes may not be offered or sold, directly or indirectly, and neither this document nor any other offering material may be distributed or published in any jurisdiction, except under circumstances that will result in compliance with any applicable laws or regulations.

Prohibition of Sales to Retail Investors in the European Economic Area – If the relevant Final Terms include a legend entitled "*Prohibition of Sales to Retail Investors in the European Economic Area*", the Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in any member state of the EEA. For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of MiFID II; (ii) a customer within the meaning of Directive (EU) 2016/97 of the European Parliament and of the Council of January 20, 2016 on insurance distribution, as amended (the "**Insurance Distribution Directive**"), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in the Prospectus Regulation. If the relevant Final Terms include the above-mentioned legend, no key information document required by Regulation (EU) No. 1286/2014, as amended (the "**PRIIPs Regulation**") for offering or selling the Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

If the relevant Final Terms specify "*Prohibition of Sales to Retail Investors in the European Economic Area*" as "*Not Applicable*", except to the extent sub-paragraph (ii) below may apply, in relation to each Member State of the EEA (each, a "**Relevant Member State**"), any offer of Notes will be made pursuant to an exemption under the Prospectus Regulation from the requirement to publish a prospectus for offers of Notes. Accordingly, any person making or intending to make an offer in that Relevant Member State of Notes which are the subject

of an offering/placement contemplated in this Prospectus as completed by Final Terms in relation to the offer of those Notes may only do so (i) in circumstances in which no obligation arises for the Issuer or any Dealer to publish a prospectus pursuant to Article 3 of the Prospectus Regulation or supplement a prospectus pursuant to Article 23 of the Prospectus Regulation, in each case, in relation to such offer, or (ii) if a prospectus for such offer has been approved by the competent authority in that Relevant Member State or, where appropriate, approved in another Relevant Member State and notified to the competent authority in that Relevant Member State and (in either case) published, all in accordance with the Prospectus Regulation, provided that any such prospectus has subsequently been completed by Final Terms which specify that offers may be made other than pursuant to Article 1(4) of the Prospectus Regulation in that Relevant Member State and such offer is made in the period beginning and ending on the dates specified for such purpose in such prospectus or relevant Final Terms, as applicable, and the Issuer has consented in writing to the use of such prospectus for the purpose of such offer. Except to the extent sub-paragraph (ii) above may apply, neither the Issuers nor the Guarantor nor any Dealer have authorized, nor do they authorize, the making of any offer of Notes in circumstances in which an obligation arises for the Issuers or the Guarantor or any Dealer to publish or supplement a prospectus for such offer.

Prohibition of Sales to Retail Investors in the United Kingdom – If the relevant Final Terms include a legend entitled "*Prohibition of Sales to Retail Investors in the United Kingdom*", the Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the United Kingdom. For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client, as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of the domestic law of the United Kingdom by virtue of the European Union (Withdrawal) Act 2018 (the "**EUWA**"); or (ii) a customer within the meaning of the provisions of the UK Financial Services and Markets Act 2000 (as amended, the "**FSMA**") and any rules or regulations made under the FSMA to implement the Insurance Distribution Directive, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of the domestic law of the United Kingdom by virtue of the EUWA; or (iii) if so specified in the relevant Final Terms, not a qualified investor as defined in Article 2 of the Prospectus Regulation as it forms part of the domestic law of the United Kingdom by virtue of the EUWA (the "**UK Prospectus Regulation**"). Consequently, no key information document required by Regulation (EU) No 1286/2014 (as amended) as it forms part of the domestic law of the United Kingdom by virtue of the EUWA (the "**UK PRIIPs Regulation**") for offering or selling the Notes or otherwise making them available to retail investors in the United Kingdom has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the United Kingdom may be unlawful under the UK PRIIPs Regulation.

If the relevant Final Terms specify "*Prohibition of Sales to Retail Investors in the United Kingdom*" as "*Not Applicable*", except to the extent sub-paragraph (ii) below may apply, in relation to the United Kingdom, any offer of Notes will be made pursuant to an exemption under the UK Prospectus Regulation from the requirement to publish a prospectus for offers of Notes. Accordingly, any person making or intending to make an offer in the United Kingdom of Notes which are the subject of an offering/placement contemplated in this Prospectus as completed by Final Terms in relation to the offer of those Notes may only do so (i) in circumstances in which no obligation arises for the Issuer or any Dealer to publish a prospectus pursuant to section 85 of the FSMA or supplement a prospectus pursuant to Article 23 of the UK Prospectus Regulation, in each case, in relation to such offer, or (ii) if a prospectus for such offer has been approved by the competent authority in the United Kingdom and published, all in accordance with the UK Prospectus Regulation, provided that any such prospectus has subsequently been completed by Final Terms which specify that offers may be made other than pursuant to Article 1(4) of the UK Prospectus Regulation and such offer is made in the period beginning and ending on the dates specified for such purpose in such prospectus or relevant Final Terms, as applicable, and the Issuer has consented in writing to the use of such prospectus for the purpose of such offer. Except to the extent sub-paragraph (ii) above may apply, neither the Issuers nor the Guarantor nor any Dealer have authorized, nor do they authorize, the making of any offer of Notes in circumstances in which an obligation arises for the Issuers or the Guarantor or any Dealer to publish or supplement a prospectus for such offer.

Each Dealer and/or further financial intermediary subsequently reselling or finally placing Notes to be issued under the Programme may be entitled to use this Prospectus as set out in the section entitled "*Consent to the Use of this Prospectus*".

Tranches of Notes may be rated or unrated. Where a Tranche of Notes is rated, such credit rating and the respective rating agency will be specified in the relevant Final Terms. Any credit ratings assigned to the Notes are not recommendations to purchase, hold or sell the Notes inasmuch as such ratings do not comment as to market price or suitability for a particular investor. There is no assurance that these ratings will remain in effect for any given period of time or that the ratings will not be revised or withdrawn entirely in the future by the respective rating organizations if in their judgment circumstances so warrant.

Any credit ratings assigned to the Notes may not reflect the potential impact of all risks related to structure and other factors on the value of the Notes. In addition, real or anticipated changes in any credit ratings assigned to the Notes will generally affect the market value of the Notes.

Any credit ratings in respect of the Notes or an Issuer are, in respect of an offer or invitation for the issue, sale or purchase of Notes in Australia (including an offer or invitation which is received by a person in Australia), for disclosure or distribution only to a person who is not a "retail client" within the meaning of section 761G of the Corporations Act 2001 of Australia (the "**Corporations Act**") but is a sophisticated investor, professional investor or other investor in respect of whom disclosure is not required under Part 6D.2 or Chapter 7 of the Corporations Act and, in all cases, who is otherwise permitted to receive credit ratings in accordance with applicable law in any jurisdiction in which the person may be located. Anyone who is not such a person is not entitled to receive this Prospectus and anyone who receives this Prospectus must not distribute it to any person who is not entitled to receive it.

This Prospectus and any Notes to be issued under the Programme are not for distribution to any person in Australia who is a retail client for the purposes of section 761G of the Corporations Act. No target market determination has been or will be made for the purposes of Part 7.8A of the Corporations Act.

Prospective investors should not construe anything in this Prospectus as "financial product advice" for the purposes of Chapter 7 of the Corporations Act.

Product Classification pursuant to Section 309B of the Securities and Futures Act 2011 (the "SFA"): In connection with Section 309B of the SFA and the Securities and Futures (Capital Markets Products) Regulations 2018 of Singapore (the "**CMP Regulations**"), each Issuer has determined and hereby notifies all relevant persons (as defined in Section 309(A)(1) of the SFA), that the Notes are "prescribed capital markets products" (as defined in the CMP Regulations) and Excluded Investment Products (as defined in MAS Notice SFA 04-N12: Notice on the Sale of Investment Products and MAS Notice FAA-N16: Notice on Recommendations on Investment Products).

Where Notes (other than Fixed Rate Notes which bear an interest rate of zero per cent.) are issued by (a) MBFJ or (b) MBG, MBAP, MBIF or DCFI, in circumstances where any interest on the Notes is attributable to a business conducted by such Issuer of the Notes through its permanent establishment in Japan in the manner provided for in the Special Taxation Measures Law of Japan, interest payments on the Notes will generally be subject to Japanese withholding tax, unless the Holder establishes that the Notes are held by or for the account of (i) a Holder that is not an individual resident of Japan or a Japanese corporation for Japanese tax purposes and that is not a person having a special relationship with the Issuer as described in Article 6, paragraph 4 of the Special Taxation Measures Law of Japan ("**Specially-related Person of the Issuer**"), (ii) a designated Japanese financial institution described in Article 6, paragraph 11 of the Special Taxation Measures Law of Japan which complies with the requirement for tax exemption under that paragraph or (iii) a public corporation, a financial institution, a financial instruments business operator or certain other entity which has complied with the requirement for tax exemption under Article 3-3, paragraph 6 of the Special Taxation Measures Law of

Japan which has received such payments through a Japanese payment handling agent as provided in Article 3-3, Paragraph 6 of the Special Taxation Measures Law of Japan.

Interest payments on such Notes to an individual resident of Japan or a Japanese corporation (except for the designated Japanese financial institution and the public corporation, the financial institution, the financial instruments business operator and certain other entity described in the preceding paragraph) or to an individual non-resident of Japan or a non-Japanese corporation that is a Specially-related Person of the Issuer will be subject to deduction in respect of Japanese income tax at a rate of 15 per cent. (from, and including, January 1, 2013 to, and including, December 31, 2037, at a rate of 15.315 per cent.) of the amount of such interest.

MiFID II Product Governance / Target Market – The relevant Final Terms may include a legend entitled "*MiFID II Product Governance*" which will outline the target market assessment in respect of the Notes and which channels for distribution of the Notes are appropriate. Any person subsequently offering, selling or recommending the Notes (a "**Distributor**") should take into consideration the target market assessment; however, a Distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the target market assessment) and determining appropriate distribution channels.

A determination will be made in relation to each issue about whether, for the purpose of the Product Governance Rules under EU Delegated Directive 2017/593 (the "**MiFID II Product Governance Rules**"), any Dealer subscribing for any Notes is a manufacturer in respect of such Notes, but otherwise neither the relevant Issuer, the Guarantor, the Arranger, any of the Dealers nor any of their respective affiliates will be a manufacturer for the purpose of the MiFID II Product Governance Rules.

UK MiFIR Product Governance / Target Market – The relevant Final Terms may include a legend entitled "*UK MiFIR Product Governance*" which will outline the target market assessment in respect of the Notes and which channels for distribution of the Notes are appropriate. Any Distributor should take into consideration the target market assessment; however, a Distributor subject to the FCA Handbook Product Intervention and Product Governance Sourcebook (the "**UK MiFIR Product Governance Rules**") is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the target market assessment) and determining appropriate distribution channels.

A determination will be made in relation to each issue about whether, for the purpose of the UK MiFIR Product Governance Rules, any Dealer subscribing for any Notes is a manufacturer in respect of such Notes, but otherwise neither the Issuer nor the Arranger nor the other Dealers nor any of their respective affiliates will be a manufacturer for the purpose of the UK MiFIR Product Governance Rules.

Interest amounts payable on Notes with a fluctuating rate of interest ("**Floating Rate Notes**") will be calculated by reference to a specific benchmark which will be provided by an administrator.

As at the date of this Prospectus, the specific benchmark applicable to an issue of Floating Rate Notes has not yet been determined. However, amounts payable under Floating Rate Notes may be calculated by reference to (i) BBSW (Australian Bank Bill Swap Rate) which is administered by ASX Benchmarks Pty Limited ("**ASX Benchmarks**"), (ii) CDOR (Canadian Dollar Offered Rate) which is provided by Refinitiv Benchmark Services (UK) Limited ("**RBSL**"), (iii) EURIBOR (Euro Interbank Offered Rate) which is provided by the European Money Markets Institute ("**EMMI**"), (iv) SIBOR (Singapore Interbank Offered Rate) which is provided by ABS Benchmarks Administration Co Pte Ltd ("**ABS Co.**"), (v) SOFR (Secured Overnight Financing Rate) which is provided by the Federal Reserve Bank of New York (the "**Federal Reserve**"), (vi) SONIA (Sterling Overnight Index Average) which is provided by the Bank of England ("**BoE**"), (vii) STIBOR (Stockholm Interbank Offered Rate) which is provided by Swedish Financial Benchmark Facility AB ("**SFBF**"), or (viii) another benchmark (any "**Other Benchmark**").

As at the date of this Prospectus, only ABS Co., ASX Benchmarks and EMMI appear on the register of administrators and benchmarks (the "**ESMA Register**") established and maintained by the European Securities and Markets Authority ("**ESMA**") pursuant to Article 36 of Regulation (EU) 2016/1011 of the European Parliament and of the Council of June 8, 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds and amending Directives 2008/48/EC and 2014/17/EU and Regulation (EU) No 596/2014 (the "**Benchmarks Regulation**").

As at the date of this Prospectus, none of BoE, the Federal Reserve, RBSL or SFBF appear in the ESMA Register. As far as the Issuers are aware,

(i) the transitional provisions in Article 51 of the Benchmarks Regulation apply to RBSL so that CDOR may currently continue to be used without any recognition, endorsement or equivalence,

(ii) SFBF submitted an application for authorisation so that STIBOR may currently continue to be used under the transitional provisions in Article 51 of the Benchmarks Regulation, and

(iii) the exemption set out in point (a) of Article 2 (2) of the Benchmarks Regulation applies to BoE and the Federal Reserve so that SONIA and SOFR may be used without any recognition, endorsement or equivalence.

In case Notes are issued which make reference to any Other Benchmark, the relevant Final Terms will specify the name of the specific benchmark and the relevant administrator. In such case the Final Terms will further specify (i) whether the relevant administrator is included in the ESMA Register, (ii) whether the transitional provisions in Article 51 of the Benchmarks Regulation apply or (iii) whether the relevant benchmark does not fall within the scope of the Benchmarks Regulation by virtue of Article 2 of the Benchmarks Regulation.

IN CONNECTION WITH THE ISSUE OF ANY TRANCHE OF NOTES, THE DEALER OR DEALERS (IF ANY) NAMED AS THE STABILISATION MANAGER(S) IN THE APPLICABLE FINAL TERMS (OR PERSONS ACTING ON BEHALF OF ANY STABILISATION MANAGER(S)) MAY OVER-ALLOT NOTES OR EFFECT TRANSACTIONS (IN EACH CASE OUTSIDE AUSTRALIA AND NOT ON A FINANCIAL MARKET OPERATED IN AUSTRALIA) WITH A VIEW TO SUPPORTING THE MARKET PRICE OF THE NOTES AT A LEVEL HIGHER THAN THAT WHICH MIGHT OTHERWISE PREVAIL. HOWEVER, STABILISATION MAY NOT NECESSARILY OCCUR. ANY STABILISATION ACTION MAY BEGIN ON OR AFTER THE DATE ON WHICH ADEQUATE PUBLIC DISCLOSURE OF THE TERMS OF THE OFFER OF THE RELEVANT TRANCHE OF NOTES IS MADE AND, IF BEGUN, MAY CEASE AT ANY TIME, BUT IT MUST END NO LATER THAN THE EARLIER OF 30 DAYS AFTER THE ISSUE DATE OF THE RELEVANT TRANCHE OF NOTES AND 60 DAYS AFTER THE DATE OF THE ALLOTMENT OF THE RELEVANT TRANCHE OF NOTES. ANY STABILISATION ACTION OR OVER-ALLOTMENT MUST BE CONDUCTED BY THE RELEVANT STABILISATION MANAGER(S) (OR PERSONS ACTING ON BEHALF OF ANY STABILISATION MANAGER(S)) IN ACCORDANCE WITH ALL APPLICABLE LAWS AND RULES.

GENERAL DESCRIPTION OF THE PROGRAMME

Under the Programme, the Issuers may from time to time issue Notes with a fixed rate of interest (the "**Fixed Rate Notes**") or with a floating rate of interest (the "**Floating Rate Notes**") and denominated in any currency agreed between the relevant Issuer and the relevant Dealer(s).

The maximum aggregate nominal amount of all Notes from time to time outstanding under the Programme will not exceed EUR 70,000,000,000 (or its equivalent in other currencies), subject to any increase in accordance with the terms of the dealer agreement dated May 17, 2022 (the "**Dealer Agreement**").

The Notes may be issued on a continuing basis to one or more of the Dealers specified on the cover page of this Prospectus and any additional Dealer to be appointed under the Programme from time to time by the Issuers, which appointment may be for a specific issue or on an ongoing basis (each a "**Dealer**" and, together, the "**Dealers**"). References in this Prospectus to the "**relevant Dealer**" shall, in the case of an issue of Notes being (or intended to be) subscribed by more than one Dealer, be to all Dealers agreeing to subscribe such Notes.

The Issuer and the relevant Dealer will agree on the terms and conditions (the "**Conditions**") applicable to each tranche of Notes (the "**Tranche**"). The Conditions will be set out in a document specific to such Tranche referred to as final terms (the "**Final Terms**"). Copies of Final Terms prepared in connection with the issue and admission to trading on a regulated market or public offer of Notes will be viewable on, and obtainable free of charge from, the website of the Luxembourg Stock Exchange (<https://www.bourse.lu/programme/Programme-MercedesBenzGrp/2370>).

Notes will be issued in series (each a "**Series**"). Each Series of Notes may comprise one or more Tranches issued on different dates. The Notes of each Series will all be subject to identical terms whether as to currency, interest (if any), maturity or otherwise, or terms which are identical except that the issue price, issue date, the first interest payment date (if any) and/or the amount of the first payment of interest (if any) may be different. The Notes of each Tranche will all be subject to identical terms in all respects.

The Notes may be distributed by way of offers to the public or private placements and, in each case, on a syndicated or non-syndicated basis. The method of distribution of each Tranche will be set out in the Final Terms applicable to such Tranche. The Notes may be offered to qualified and/or non-qualified investors.

The Notes will be issued in such denominations as may be agreed between the relevant Issuer and the relevant Dealer, save that the minimum denomination of any Notes will be, (i) in the case of Notes to be issued by MBG, MBAP, MBIF, DCFI or DFNA and admitted to trading on the regulated market of a stock exchange located in a Member State of the EEA or offered to the public in a Member State of the EEA, Euro 1,000 or its foreign currency equivalent on the relevant date of issue, (ii) in the case of Notes to be issued by MBFJ and admitted to trading on the regulated market of a stock exchange located in a Member State of the EEA or offered (which offer shall be an offer which is exempt from the obligation to publish a prospectus pursuant to the Prospectus Regulation) in a Member State of the EEA, Euro 100,000 or its foreign currency equivalent on the relevant date of issue, and (iii) such amount as may be allowed or required from time to time by the relevant central bank (or equivalent body) or any laws or regulations applicable to the relevant specified currency. In the following, Notes with a minimum denomination of at least Euro 100,000 or its foreign currency equivalent will be referred to as "**Wholesale Notes**".

Where Notes have a maturity of less than one year and either (a) the issue proceeds are received by the relevant Issuer in the United Kingdom or (b) the activity of issuing the Notes is carried on from an establishment maintained by the relevant Issuer in the United Kingdom, such Notes must: (i) have a minimum denomination of at least £100,000 or its foreign currency equivalent and be issued only to persons whose ordinary activities involve them in acquiring, holding, managing or disposing of investments (as principal or agent) for the purposes of their businesses or who it is reasonable to expect will acquire, hold, manage or dispose of

investments (as principal or agent) for the purposes of their businesses where the issue of the Notes would otherwise constitute a contravention of Section 19 of the FSMA by the relevant Issuer; or (ii) be issued in other circumstances which do not constitute a contravention of Section 19 of the FSMA by the relevant Issuer or the Guarantor.

Certain selling restrictions set out in the section entitled "*Selling Restrictions*" apply to the Notes. Other than that, the Notes will be freely transferable.

Notes may be issued at an issue price which is at par or at a discount to, or premium over, par (as specified in the relevant Final Terms). The issue price for Notes to be issued will be determined at the time of pricing on the basis of a yield which will be determined on the basis of the orders of the investors which are received by the relevant Dealers during the offer period of the Notes. Orders will specify a minimum yield or spread level and may only be confirmed at or above such yield or level. The resulting yield will be used to determine an issue price corresponding to the yield.

The yield for Fixed Rate Notes will be set out in the relevant Final Terms and will be calculated pursuant to the ICMA method, which determines the effective interest rate of notes by taking into account accrued interest on a daily basis.

Notes will be accepted for clearing through one or more Clearing Systems as specified in the relevant Final Terms. These systems may comprise those operated by Euroclear Bank SA/NV (1 Boulevard du Roi Albert II, 1210 Brussels, Belgium) ("**Euroclear**") and Clearstream Banking S.A. (42, Avenue J. F. Kennedy, L-1855 Luxembourg) ("**CBL**") or Clearstream Banking AG (Mergenthalerallee 61, 65760 Eschborn, Germany) ("**CBF**") or any other relevant Clearing System (as specified in the relevant Final Terms). The appropriate codes for each Tranche allocated by Euroclear, CBL and/or CBF will be contained in the relevant Final Terms.

Citibank, N.A, London Branch will act as Issuing and Principal Paying Agent and BNP Paribas Securities Services, Luxembourg Branch will act as Luxembourg Listing Agent.

The risk factors set out in the section entitled "*Risk Factors*" are limited to the description of risks which are (i) specific to MBG, MBAP, MBIF, DCFI, DFNA and MBFJ as Issuers and Guarantor, as the case may be, as well as the Notes, and (ii) material for making an informed investment decision. They are presented in a limited number of categories depending on their nature. In each category the most material risk factor is mentioned first.

Where required by Article 7 of the Prospectus Regulation, a summary (the "**Issue-Specific Summary**") will be prepared in connection with an issue of Notes under this Prospectus. Such Issue-Specific Summary will be annexed to the Final Terms prepared in connection with such Notes.

RISK FACTORS

In purchasing the Notes, investors assume the risk that the Issuer or the Guarantor may become insolvent or otherwise be unable to make payments due in respect of the Notes or (in the case of MBG) the Guarantee. There is a wide range of factors which individually or together could result in the Issuer or the Guarantor becoming unable to make payments due in respect of the Notes or (in the case of MBG) the Guarantee. The Issuers and the Guarantor may not be aware of all relevant factors and certain factors which the Issuer and the Guarantor may currently deem not to be material may become material over time and could likewise impair the business operations of the Issuers and the Guarantor and have a material adverse effect on their business, cash flows, results of operations and their financial condition.

The Issuers and the Guarantor have identified in the following subsection entitled "*Risk Factors Relating to MBG, MBAP, MBIF, DCFI, DFNA and MBFJ*" a number of factors which could materially adversely affect their business, net assets, financial condition and results of operations as well as their ability to make payments due under any Notes or (in the case of MBG) the Guarantee.

In addition, certain factors which are material for the purpose of assessing the market risks associated with Notes to be issued under the Programme and risks relating to the structure of Notes to be issued under the Programme are also described below in the subsection entitled "*Risks Relating to the Notes*".

Prospective investors should consider these risk factors before deciding to purchase Notes to be issued under the Programme. In addition, prospective investors should be aware that the risks described below may combine and thus intensify one another.

Prospective investors should consider all information provided in this Prospectus and should consult with their own professional advisers (including their financial, accounting, legal and tax advisers) prior to making any investment decision.

Risk Factors Relating to MBG, MBAP, MBIF, DCFI, DFNA and MBFJ

MBAP, MBIF, DCFI, DFNA and MBFJ are direct or indirect subsidiaries of MBG. All Notes to be issued by MBAP, MBIF, DCFI, DFNA or MBFJ are unconditionally and irrevocably guaranteed by MBG in respect of principal and interest payments. Accordingly, MBAP, MBIF, DCFI, DFNA and MBFJ are affected, substantially, by the same risks as those that affect the business and operations of MBG and/or its consolidated subsidiaries. Therefore, references in this section to MBG and/or its consolidated subsidiaries and/or Mercedes-Benz Group shall include references to the Issuer (if applicable).

MBG is subject to various risks resulting from changing economic, political, social, industry, business and financial conditions. The principal risks which could affect MBG's business, financial condition, profitability, cash flows, results of operations and future business results are described below. MBG's overall risk situation is the sum of the individual risks of all risk categories for the segments, the corporate functions and legal entities. In general, the description of risks takes place in relation to the individual segments. Following the spin-off and hive-down of the Daimler commercial vehicle business, the business operations of the Mercedes-Benz Group are managed in the Mercedes-Benz Cars, Mercedes-Benz Vans and Mercedes-Benz Mobility segments. If no segment is explicitly mentioned, the risks described relate to all segments.

In addition, risks that are not yet known or assessed as not material can influence profitability, cash flows and financial position.

As a matter of the nature of Mercedes-Benz Group's business it is exposed to the following risks, which are presented in the categories below depending on their nature with the most material risk factor mentioned first in each category:

1. Industry and Business Risks,

2. Financial Risks,

3. Legal and Tax Risks, and

4. Other Risks.

1. Industry and Business Risks

The Mercedes-Benz Group is subject to various industry and business-related risks. Should any of the following risks materialize, this could have material adverse effects on the Mercedes-Benz Group's business, net assets, financial condition and results of operations.

Industry and business risks constitute the framework for the risks listed in the following paragraphs. Overall economic conditions have a significant influence on vehicle sales markets and thus on the Group's success.

Industry and business risks are also linked to assumptions and forecasts concerning general developments.

General Market Risks

The risks for the economic development of automotive markets are strongly affected by the cyclical situation of the global economy. The possibility of markets developing worse than assumed in the planning, or of changing market conditions, generally exists for all segments of the Group.

Possible declines in vehicle sales may be caused in particular by the partially unstable macroeconomic environment and in the context of political or economic uncertainties. The situation in the Chinese real-estate sector remains tense. If, instead of the expected orderly consolidation, there is an uncontrolled collapse of the real estate sector in China, this would have significant negative consequences for economic growth and the financial markets. Other highly indebted companies, also outside the real-estate sector, could be affected by the crisis. In an extreme scenario, this could lead to a banking and financial crisis in China with possible global repercussions.

Rising energy and oil prices and volatile exchange rates can also lead to market uncertainty and thus to falling demand for vehicles. A lack of market acceptance for electric vehicles can also lead to risks in the development of unit sales – especially in the Mercedes-Benz Vans segment – and would have a negative impact on earnings.

High energy prices, along with other factors, are a major driver of the recent exceptionally high inflation rates in the United States and some European and Latin American economies. If inflation remains significantly higher than currently expected over the course of the year 2022, private consumption, economic growth and demand for cars and vans could suffer. In addition, important central banks could see themselves forced by this development to raise interest rates strongly, which could result in turbulence on the financial markets, lower consumer demand, restraint in companies' investment and weaker economic development overall. Continued high inflation may lead to a weakening of purchasing power and thus to a decline of demand in the automotive sector, which could have a negative impact on earnings.

Due to the partly difficult financial situation of some dealerships and vehicle importers, support actions might become necessary to ensure the performance of the business partners. The loss of important dealerships and vehicle importers can lead to customer demand not being fully served and lower unit sales.

Taking over the costs of contract cancellations and of processing outstanding customer contracts cannot be ruled out as a result of dealer insolvencies, which could have a negative impact on earnings.

The launch of new products by competitors, more aggressive pricing policies and poorer effective pricing for products such as electric vehicles can lead to increasing competitive and price pressure in the automotive segments and have a negative impact on profitability. The discontinuation of government subsidies for electric vehicles can also negatively affect their pricing and minimize profit margins.

Risks Related to the General Legal and Political Framework

The automotive industry is subject to extensive governmental regulation worldwide. Risks from the legal and political framework have a considerable influence on the Mercedes-Benz Group's future business success. Regulations concerning vehicles' emissions, fuel consumption, safety and certification, as well as tariff aspects and taxes in connection with the sale or purchase of vehicles or vehicle parts, play an important role. Complying with these varied and often diverging regulations all over the world requires strenuous efforts on the part of the automotive industry.

In particular, changes in the legal and political framework at short notice can cause additional costs or higher investments for the Mercedes-Benz Group. Accordingly, risks related to the legal and political framework increased compared to the year 2021, in particular due to the fact Russia has been at war with Ukraine since the end of February 2022 (the "**Russia-Ukraine War**").

Many countries and regions have implemented legal limits for the fuel consumption and/or CO₂ emissions of car fleets, with varying target limits. Non-compliance with regulations applicable in the various markets might result in significant penalties and reputational harm, and might even mean that vehicles with conventional drive systems could not or could no longer be registered in the relevant markets.

Mercedes-Benz Cars and also Mercedes-Benz Vans face the above-mentioned risks with respect to regulations on mandatory targets for the average fleet fuel consumption and CO₂ emissions of new vehicles especially in the markets of China, Europe and the United States. The increasingly challenging target of a fully electric future requires significant proportions of actual unit sales of plug-in hybrids and cars with other types of electric drive. To meet the ambitious statutory targets in some markets, the modalities for target achievement granted by law will have to be utilized including the acquisition of external credits, which could have a negative impact on earnings. The market success of alternative drive systems is greatly influenced not only by customer acceptance but also by regional market conditions such as the battery-charging infrastructure and state support.

Stricter regulations on the protection of personal data can also lead to higher costs in the event of violations of the law, for example, if the authorities prescribe measures to be taken, impose penalties and/or decide on the suspension of business licences.

Geopolitical Risks

Uncertainties for the global economy and the business development of the Mercedes-Benz Group may arise in particular from geopolitical and trade policy developments worldwide.

Those uncertainties are primarily characterized by the various effects of the Russia-Ukraine War. In particular, there continue to be risks associated with energy supplies and from a potential expropriation of assets of Russian subsidiaries. Additional risks result from the fact that business activities in Russia have, until further notice, been adjusted in accordance with the sanctions requirements.

The Russia-Ukraine War could have a negative impact on the development of unit sales, production processes, procurement and logistics, for example through interruptions in supply chains or energy supply, or bottleneck situations for components as well as raw materials and upstream products. Even higher cyber risks by opposing

attacks cannot be ruled out. Collaboration with partners and cooperative ventures are also subject to higher risks. Outstanding trade receivables could be subject to higher default, country and currency risks due to restrictions on cross-border payment transactions and limited convertibility of the Russian rouble. The higher country risks mainly include potential impairments on trade receivables as well as property, plant and equipment and inventories of the automotive segments. In the Mercedes-Benz Mobility segment, negative effects may result from sanctions and a weaker economic environment for Mercedes-Benz Group's customers in Russia and other markets, which may be reflected in increased payment arrears and credit defaults. Furthermore, as a result of higher inflation, rising refinancing costs in the capital markets may lead to negative effects on the segment's interest margin as well as its cost development. In addition, temporary capital bottlenecks may arise in the context of refinancing in the Russian banking market, which may result in a claim on a global guarantee provided by MBG for the benefit of Russian subsidiaries in connection with outstanding financial liabilities of those Russian subsidiaries to banks. Higher risks may also arise from the insolvency of these subsidiaries. These risks could be exacerbated by the potential expropriation of assets of Russian subsidiaries of the Mercedes-Benz Group.

In addition, further exacerbation of tensions between the United States and China and a further deterioration of political relations between the European Union and China could lead to increased uncertainty and adversely affect both global economic prospects and the business development of the Mercedes-Benz Group. Industry-specific and country-specific barriers to trade in foreign markets that are important for the Mercedes-Benz Group could have a negative impact on both production costs and the entire value chain. The position of the Mercedes-Benz Group in key foreign markets could also be affected by an increase in or changes in free-trade agreements. If free-trade agreements are concluded without the participation of countries in which Mercedes-Benz has production facilities, this could result in a competitive disadvantage for Mercedes-Benz compared with competitors that produce in those countries which participate in these free-trade agreements. In addition, if the content of the free-trade agreements used by Mercedes-Benz is made significantly stricter, or the conditions of future free-trade agreements are more restrictive, this could also significantly impair the position of the Mercedes-Benz Group, as the Mercedes-Benz Group could no longer benefit from those free-trade agreements.

The danger exists that individual countries will attempt to defend and improve their competitiveness in the world's markets by resorting to interventionist and protectionist measures. The automotive industry is often seen as a key factor to attract investment into a country and increase local value added. This can lead to increased costs if production facilities have to be established or expanded or local purchasing has to be increased. Cutting technological and economic links between major markets can also adversely affect earnings if research and development have to be conducted locally or value chains have to be adjusted because certain technologies are not allowed to be used in the final products. In addition, attempts are being made to limit growth in imports through barriers to market access such as by making certification processes more difficult, delaying certification and imposing other complicated tariff procedures.

Risks Relating to the COVID-19 Pandemic

Another significant risk is the further course of the COVID-19 pandemic, which represents a significant uncertainty factor. Insufficient vaccination progress, further waves of infection and new virus variants could make even more comprehensive and drastic containment measures necessary than currently assumed. Mobility restrictions or even further lockdowns could affect economic growth and automotive markets regionally or even globally, causing even more pronounced disruptions in international trade routes and global supply chains. As a result of the COVID-19 pandemic, risks still exist for the development of unit sales and the availability of components in the aftersales business. In particular, the availability of semiconductors and other important industrial precursors as well as the further course of the COVID-19 pandemic worldwide, including the consequences of the zero-COVID strategy in China, will continue to impact the business for the remainder of the year 2022.

Risks Relating to the Leasing and Sales-Financing Business

In connection with the sale of vehicles, Mercedes-Benz Group offers its customers a wide range of financing and leasing options. The resulting risks for the Mercedes-Benz Mobility segment are mainly due to borrowers' worsening creditworthiness, so receivables might not be recoverable in whole or in part because of customers' insolvency (default or credit risk).

In connection with leasing agreements, risks arise if the market value of a leased vehicle at the end of the agreement term is lower than the residual value originally calculated and forecasted at the time the agreement was concluded and used as a basis for the leasing installments. Therefore, risks result from the development of the used car markets and thus from the residual values of the vehicles produced. As part of the established residual-value management process, certain assumptions are made at local and corporate levels regarding the expected level of prices, based upon which the cars to be returned in the leasing business are evaluated. If changing market developments lead to a negative deviation from assumptions, there is a risk of lower residual values of used cars. This can adversely affect the proceeds from the sale of used cars.

In addition, a residual-value risk from non-Mercedes-Benz vehicles exists for the Mercedes-Benz Mobility companies that operate commercial fleet management and leasing management, because most of those vehicles are not covered by manufacturers' residual-value guarantees. The negative development of sale prices for used cars on stock can adversely affect earnings.

Risks Related to Research and Development

Technical developments and innovations are of key importance for the safe and sustainable mobility of the future. The transformation towards electric mobility and comprehensive digitization have resulted in ambitious development targets and the market launch of new technologies. Through the design of the product range, technical innovations are integrated in the strategic product planning of the automotive segments.

In the year 2020, MBG and Mercedes-Benz USA, LLC ("**MBUSA**") reached agreements with various US authorities to settle civil and environmental claims regarding emission control systems of certain Mercedes-Benz diesel vehicles, which have taken legal effect in March 2021 (for further explanations please refer to the subsection entitled "*3. Legal and Tax Risks*").

With the settlements reached, MBG and MBUSA have agreed to, among other things, pay civil penalties, conduct an emission modification program for affected vehicles, provide extended warranties, undertake a nationwide mitigation project, take certain corporate compliance measures and make other payments. In the event of non-compliance with the aforementioned obligations, there will be the risk that more cost-intensive measures will have to be taken and/or significant stipulated penalties will become due.

Production Risks

Technical developments and innovations are of key importance for the safe and sustainable mobility of the future. Through the design of the product range, technical innovations are integrated in the strategic product planning of the automotive segments. Technological risks can arise especially as a result of increasing technical complexity, the continually rising scope of requirements to be fulfilled in terms of emissions, fuel consumption and safety, as well as meeting and steadily raising the Mercedes-Benz Group's quality standards. These risks exist in the automotive segments particularly in connection with launching and manufacturing products and could have a negative impact on earnings also in relation to the increasing automation and connectivity of vehicles and production facilities.

In the context of product launches - especially also with the expansion of sub-brands - the required components and equipment must be available. In order to secure and enhance the long-term future viability of production facilities in the automotive segments, modernization, expansion, construction and restructuring measures are

carried out as required. The launch of new products of the brands Mercedes-Benz, Mercedes-AMG, Mercedes-Maybach, Mercedes-EQ and the G-Class usually entails high investments. In addition, there may be inefficiencies in the production process and, as a result, a temporary reduction in production volumes.

Due to low plant availability or failures of production or factory equipment, there is a risk of internal delays in vehicle production and consequential costs being incurred. Warranty and goodwill cases could arise if the quality of the products or the parts installed in the products do not meet requirements, if regulations are not fully complied with, or if support cannot be provided in the required form in the event of problems and product maintenance. The Mercedes-Benz Group recognizes appropriate provisions for warranty and goodwill cases. Nevertheless, it cannot be ruled out that recalls and field measures will lead to additional expenses.

Risks from Purchasing and Logistics

Risks arise for the automotive segments in particular from fluctuations in prices of commodities, raw materials and energy. Certain raw materials are required for the manufacture of vehicle components and vehicles, which are purchased on the world market. The level of costs depends on the price development of commodities, raw materials and energy. Price fluctuations are expected with uncertain and inconsistent trends also for the year 2022. For example, raw material markets can be impacted by uncertainties and political crises as well as – combined with possible supply bottlenecks – volatile demand for specific raw materials. In general, the ability to pass on the higher costs of commodities and other materials in the form of higher prices for manufactured vehicles is limited because of strong competitive pressure in the international automotive markets. Interruptions in global supply chains, especially caused by bottlenecks for electronic components and other important parts, as well as possible failures in supply by energy providers, can cause bottlenecks. Rising raw material prices and interruptions in global supply chains may therefore have a negative impact on the profit margins of the vehicles sold and thus lead to lower earnings in the respective segment.

In addition to pandemic-related disruptions in supply chains, bottlenecks for semiconductors and other important industrial components also constitute uncertainties. Persistently high or even further rises in energy and raw material prices can also have an impact on Mercedes-Benz Group's business. Lack of availability and quality problems with certain vehicle parts can lead to production downtimes and cause costs, which could have a negative impact on earnings.

The financial situation of some suppliers remains difficult. This can be caused by continuing uncertainty in connection with the COVID-19 pandemic, higher prices of commodities, raw materials and energy as well as the lack of availability of components, but also by changed delivery schedules in connection with advancing electrification. The resulting possible production stoppages or underutilization of production capacities at suppliers can also cause disruption of the supply chain in the Group's automotive segments and prevent vehicles from being completed and delivered to customers on time. Support measures may be necessary to ensure the continuation of suppliers' production and sales. If suppliers cannot cover their fixed costs, there is also the risk that they may demand compensation payments. Necessary capacity expansion at suppliers' plants could also require participation in their costs.

Information Technology Risks

The systematically pursued digitization strategy enables the Mercedes-Benz Group to utilize new opportunities to increase customer benefit and the value of the Group. Nonetheless, the high penetration of information technology (IT) at all segments also brings risks for their business and production processes, as well as for their services and products. Extensive changes in the existing system landscape, for example, the focus on strategic partnerships for the transformation of the IT infrastructure, as well as the ever-growing threat from cybercrime and the spread of aggressive malicious code brings risks that can affect the availability, integrity and confidentiality of information and IT-supported operating resources. In a worst-case scenario, this can lead to a temporary interruption of IT-supported business processes with severe negative effects on the Group's earnings. In addition, the loss or the misuse of sensitive data may under certain circumstances lead to a loss of

reputation. In particular, stricter regulatory requirements such as the EU Data Protection Directive and related legislation may, among other things, give rise to claims by third parties and result in costly regulatory requirements and penalties with an impact on earnings.

It is essential for the globally active Mercedes-Benz Group and its wide-ranging business and production processes that information is available and can be exchanged in an up-to-date, complete and correct form. Mercedes-Benz' internal framework for IT security is based on international standards and its protective measures also apply industry standards and good practice. Appropriately secure IT systems and a reliable IT infrastructure must be used to protect information. Cyber threats must be identified over the entire lifecycle of applications and IT systems and dealt with in line with their seriousness. In particular, risks could result in the interruption of business processes due to the failure of IT systems or which could cause the loss or corruption of data.

Personnel Risks

The success of the Mercedes-Benz Group is highly dependent on its employees and their expertise.

Competition for highly qualified staff and management is still very intense in the industry and the regions in which the Mercedes-Benz Group operates. The Group's future success also depends on the extent to which it succeeds over the long term in recruiting, integrating and retaining specialist employees.

In addition to the demographic development, the digital transformation also requires that the Group continues to adapt to changes and derives measures such as securing a qualified next generation of specialists and managers, especially with regard to technical developments. In order to achieve the long-term reduction in personnel costs necessary for the transformation, the Group's management and the General Works Council concluded an agreement in 2019, which includes a staff-reduction program. Due to the COVID-19 pandemic and the fact that the staff-reduction program is voluntary for both parties, there is a risk that implementation may not be able to take place to the full extent planned. Risks also exist in particular due to upcoming negotiations on wage conditions in the metal and electrical industry and the associated possible production losses.

Risks Relating to Equity Investments and Partnerships

Cooperation with partners in shareholdings and partnerships is of key importance to the Mercedes-Benz Group, both in the transformation towards electric mobility and comprehensive digitization and in connection with mobility solutions.

The Mercedes-Benz Group generally participates in the risks of shareholdings in line with its equity interest, and is also subject to share-price risks if such companies are listed on a stock exchange. After the spin-off and hive-down of the Mercedes-Benz commercial vehicle business, this also applies to the shareholding in Daimler Truck Holding AG.

The remeasurement of shareholdings in relation to its carrying value can lead to risks for the segment to which it is allocated. Furthermore, ongoing business activities, especially the integration of employees, technologies and products, can result in risks. In addition, further financial obligations or an additional financing requirement can arise. Risks from shareholdings exist above all at Mercedes-Benz Mobility, as well as at the shareholdings directly allocated to the Group. The risks related to equity investments and partnerships have increased as a result of the intensified geopolitical and trade policy risks compared to the year 2021.

2. Financial Risks

The Mercedes-Benz Group is generally exposed to various financial risks, including risks from changes in market prices such as currency exchange rates, interest rates and commodity prices. In addition, the Mercedes-

Benz Group is exposed to credit risks, country risks, liquidity risks and risks of restricted access to capital markets, risks from changes in credit ratings and risks relating to pension plans. Should any of the following risks materialize, this could have material adverse effects on the Mercedes-Benz Group's business, net assets, financial condition and results of operations.

Further information on financial risks is provided in Note 34 (*Management of financial risks*) of the Notes to the Annual Consolidated Financial Statements 2021 of MBG, incorporated by reference in this Prospectus. Information on the Group's financial instruments is provided in Note 33 (*Financial instruments*) of the Notes to the Annual Consolidated Financial Statements 2021 of MBG.

Exchange Rate Risks

The Mercedes-Benz Group's global orientation means that its business operations and financial transactions are connected with risks related to fluctuations in currency exchange rates. This applies in particular to fluctuations of the euro against the US dollar, Chinese renminbi, British pound and other currencies such as those of growth markets. An exchange rate risk arises in business operations primarily when revenue is generated in a currency different from that of the related costs (transaction risk). Exchange rate risks also exist in connection with the translation into euros of the net assets, revenues and expenses of the companies of the Group outside the euro zone (translation risk); these risks are not generally hedged.

Interest Rate Risks

Changes in interest rates can create risks for business operations as well as for financial transactions. The Mercedes-Benz Group employs a variety of interest-rate sensitive financial instruments to manage the cash requirements of its business operations on a day-to-day basis. Most of these financial instruments are held in connection with the financial services business of Mercedes-Benz Mobility. To a certain extent, the funding between the asset and liability sides of the balance sheet does not match in terms of maturities and interest rates, which gives rise to the risk of changes in interest rates.

Commodity Price Risks

As already described in the subsection entitled "*1. Industry and Business Risks – Risks from Purchasing and Logistics*", the Group's business operations are exposed to changes in the market prices of purchased parts and raw materials.

Credit Risks

Credit risk describes the risk of financial loss resulting from a counterparty failing to meet its contractual payment obligations. Credit risk includes both the direct risk of default and the risk of a deterioration in creditworthiness, as well as concentration risks.

The Group is exposed to credit risks which result primarily from its financial services activities and from the operations of its vehicle business. Risks related to leasing and sales financing are addressed in the subsection entitled "*1. Industry and Business Risks – Risks Relating to the Leasing and Sales-Financing Business*". Credit risks also arise from the Group's liquid assets.

Should defaults occur, this would adversely affect the Group's financial position, cash flows and profitability.

Country Risks

Country risk describes the risk of financial loss resulting from changes in political, economic, legal or social conditions in the respective country, for example due to sovereign measures such as expropriation or a ban on currency transfers. The Mercedes-Benz Group is exposed to country risks that primarily result from cross-

border financing or collateralization for Group companies or customers, from investments in subsidiaries and joint ventures, and from cross-border trade receivables. Country risks also arise from cross-border cash deposits with financial institutions.

Liquidity Risks and Risks of Restricted Access to Capital Markets

Liquidity risks arise when a company is unable to fully meet its financial obligations. In the normal course of business, the Mercedes-Benz Group uses bonds, commercial paper and securitized transactions, as well as bank loans in various currencies, primarily with the aim of refinancing its leasing and sales-financing business. An increase in the cost of refinancing would have a negative impact on the competitiveness and profitability of the financial services business to the extent that the higher refinancing costs cannot be passed on to customers; a limitation of the financial services business would also have negative consequences for the vehicle business. Access to capital markets in individual countries may be limited by government regulations or by a temporary lack of absorption capacity. In addition, pending legal proceedings as well as the Group's own business policy considerations and developments may temporarily prevent the Group from covering any liquidity requirements by means of borrowing in the capital markets.

Risks from Changes in Credit Ratings

Mercedes-Benz' creditworthiness is assessed by the rating agencies DBRS Ratings GmbH, Moody's Deutschland GmbH, Scope Ratings GmbH and S&P Global Ratings Europe Limited. Risks exist in connection with potential downgrades to credit ratings by the rating agencies, and thus to Mercedes-Benz' creditworthiness. Downgrades could have a negative impact on the Group's financing if such a downgrade leads to an increase in the costs for external financing or restricts the Group's ability to obtain financing. A credit rating downgrade could also discourage investors from investing in MBG or notes to be issued by MBG or another Group company. A risk to the credit rating of the Mercedes-Benz Group can also arise if the earnings and cash flows from the anticipated Group's growth cannot be realized.

Risks Relating to Pension Plans

The companies of the Mercedes-Benz Group grant defined-benefit pension commitments, which are largely covered by plan assets, as well as healthcare commitments to a small extent. The balance of pension obligations less plan assets constitutes the carrying amount or funded status of those employee benefit plans. The measurement of pension obligations and the calculation of net pension expense are based on certain assumptions. Even small changes in those assumptions such as a change in the discount rate or changed inflation assumptions have a negative or positive effect on the funded status and Group equity in the current financial year, and lead to changes in the periodic net pension expense in the following financial year. The fair value of plan assets is determined to a large degree by developments in the capital markets. Unfavorable developments, especially relating to share prices and fixed-interest securities, reduce the carrying value of plan assets. A change in the composition of plan assets can also have a negative impact on the future development of the fair value of plan assets.

Further information on the pension plans and their risks is provided in Note 23 (*Pensions and similar obligations*) of the Notes to the Annual Consolidated Financial Statements 2021 of MBG, incorporated by reference in this Prospectus.

3. Legal and Tax Risks

The Mercedes-Benz Group is exposed to legal and tax risks. Should any of the following risks materialize, this could have material adverse effects on the Mercedes-Benz Group's business, net assets, financial condition and results of operations.

Regulatory Risks

The automotive industry is subject to extensive governmental regulations worldwide. Laws in various jurisdictions govern occupant safety and the environmental impact of vehicles, including emissions levels, fuel economy and noise, as well as the emissions of the plants where vehicles or parts thereof are produced. In case regulations applicable in the different regions are not complied with, this could result in significant penalties and reputational harm or the inability to certify vehicles in the relevant markets. The cost of compliance with these regulations is considerable, and in this context, Mercedes-Benz Group continues to expect a significant level of costs.

Risks from Legal Proceedings in General

MBG and its subsidiaries are confronted with various legal proceedings and claims as well as governmental investigations and orders (legal proceedings) on a large number of topics, including vehicle safety, emissions, fuel economy, financial services, dealer, supplier and other contractual relationships, intellectual property rights (especially patent infringement lawsuits), warranty claims, environmental matters, antitrust matters (including actions for damages) as well as investor litigation. Product-related litigation involves claims alleging faults in vehicles. Some of these claims are asserted by way of class actions. If the outcome of such legal proceedings is detrimental to Mercedes-Benz or such proceedings are settled, the Group may be required to pay substantial compensatory and punitive damages or to undertake service actions, recall campaigns, monetary penalties or other costly actions, which would adversely affect the earnings of the Group. Some of these proceedings and related settlements may have an impact on the Group's reputation.

Risks from Legal Proceedings in Connection with Diesel Exhaust Gas Emissions – Governmental Proceedings

Mercedes-Benz is continuously subject to governmental information requests, inquiries, investigations, administrative orders and proceedings relating to environmental, criminal, antitrust and other laws and regulations in connection with diesel exhaust emissions.

Several authorities and institutions worldwide were, and still are, active in the form of inquiries, investigations, procedures and/or orders. These activities particularly relate to test results, the emission control systems used in Mercedes-Benz diesel vehicles and/or the interactions of Mercedes-Benz with the relevant authorities as well as related legal issues and implications, including, but not limited to, under applicable environmental, criminal, consumer protection and antitrust laws.

In the United States, MBG and Mercedes-Benz USA, LLC ("**MBUSA**") reached agreements in the third quarter of 2020 with various authorities to settle civil environmental claims regarding the emission control systems of certain diesel vehicles, which have become final and effective.

The authorities take the position that Mercedes-Benz failed to disclose Auxiliary Emission Control Devices ("**AECDs**") in certain of its US diesel vehicles and that several of these AECDS are illegal defeat devices. As part of these settlements, Mercedes-Benz denies the allegations by the authorities and does not admit liability, but has agreed to, among other things, pay civil penalties, conduct an emission modification programme for affected vehicles, and take certain other measures. The failure to meet certain of those obligations may trigger additional stipulated penalties.

The estimated cost of the US consumer class action described in the subsection set out below and entitled "*Risks from Legal Proceedings in Connection with Diesel Exhaust Gas Emissions – Civil Court Proceedings*" amounts to around USD 700 million. In addition, Mercedes-Benz estimates further expenses of a mid three-digit-million euro amount to fulfill requirements of these settlements. Mercedes-Benz paid the civil penalties.

In April 2016, the U.S. Department of Justice ("**DOJ**") requested that Mercedes-Benz conduct an internal investigation. Mercedes-Benz conducted such internal investigation in cooperation with DOJ's investigation;

the DOJ's investigation remains open. In addition, further US state authorities have opened investigations pursuant to both state environmental and consumer protection laws and have requested documents and information. In Canada, the Canadian environmental regulator Environment and Climate Change Canada ("**ECCC**") is conducting an investigation in connection with Diesel exhaust emissions based on the suspicion of potential violations of, among others, the Canadian Environmental Protection Act as well as potential undisclosed AECDs and defeat devices. Mercedes-Benz continues to cooperate with the investigating authorities.

In Germany, the Stuttgart public prosecutor's office issued a fine notice against Mercedes-Benz in September 2019 based on a negligent violation of supervisory duties which has become legally binding, thereby concluding the related administrative offense proceedings against Mercedes-Benz. The Stuttgart public prosecutor's office is still conducting criminal investigation proceedings against Mercedes-Benz employees on the suspicion of, among others, fraud. In July 2021, the local court (*Amtsgericht*) of Böblingen issued penal orders against three Mercedes-Benz employees based on, among others, fraud, which have become final.

Between 2018 and 2020, the German Federal Motor Transport Authority ("**KBA**") issued subsequent auxiliary provisions for the EC type approvals of certain Mercedes-Benz diesel vehicles, and ordered mandatory recalls as well as, in some cases, stops of the first registration. In each of those cases, it held that certain calibrations of specified functionalities are to be qualified as impermissible defeat devices. Mercedes-Benz has a contrary legal opinion on this question. Since 2018, however, Mercedes-Benz has (in view of the KBA's interpretation of the law as a precautionary measure) implemented a temporary delivery and registration stop with respect to certain models, also covering the used car, leasing and financing businesses, and is constantly reviewing whether it can lift this delivery and registration stop in whole or in part. Mercedes-Benz has filed timely objections against the KBA's administrative orders mentioned above. In early 2021, the KBA issued objection orders (*Widerspruchsbescheide*) in these proceedings, thereby not following the arguments brought forward by Mercedes-Benz. Since Mercedes-Benz continues to have a different understanding of the relevant legal provisions, it has filed lawsuits with the competent administrative court to have the controversial questions at issue clarified in a court of law. Irrespective of such objections and the lawsuits that are now pending, Mercedes-Benz continues to cooperate fully with the KBA. The new calibrations requested by the KBA have been developed by Mercedes-Benz and assessed and approved by the KBA; the related recalls have been initiated. It cannot be ruled out that under certain circumstances, software updates may have to be reworked, or further delivery and registration stops may be ordered or resolved by Mercedes-Benz as a precautionary measure, also with regard to the used car, leasing and financing businesses. In the course of its regular market supervision, the KBA is routinely conducting further reviews of Mercedes-Benz vehicles and is asking questions about technical elements of the vehicles. In addition, Mercedes-Benz continues to be in a dialogue with the German Ministry for Digital and Transport Infrastructure ("**BMDV**") to conclude the analysis of the diesel-related emissions matter and to further the update of affected customer vehicles. In light of the aforementioned administrative orders issued by the KBA and continued discussions with the KBA and the BMDV, it cannot be ruled out completely that additional administrative orders may be issued in the course of the ongoing and/or further investigations. Since September 1, 2020, this also applies to other responsible authorities of other Member States and the European Commission which conduct market surveillance under the new European Type Approval Regulation and can take measures upon assumed non-compliance, irrespective of the place of the original type approval, and also to the British market surveillance authority DVSA (Driver and Vehicle Standards Agency).

In the course of its formal investigation into possible collusion on clean emission technology, the European Commission sent a statement of objections to Mercedes-Benz and other automobile manufacturers in April 2019. In this context, MBG had filed an application for immunity from fines (leniency application) with the European Commission some time ago. On July 8, 2021, the proceedings were closed by way of a settlement with the European Commission. During the entire proceedings, MBG cooperated closely with the European Commission, and the European Commission granted MBG complete immunity from fines.

In addition to the above-mentioned authorities, national cartel authorities and other authorities of various foreign States, the South Korean Ministry of Environment, the South Korean competition authority (Korea Fair Trade Commission) and the Seoul public prosecutor's office (South Korea) are conducting various investigations and/or procedures in connection with Diesel exhaust emissions.

Mercedes-Benz continues to fully cooperate with the responsible authorities and institutions. Irrespective of such cooperation and in light of the past developments, it is possible that further regulatory, criminal and administrative investigative and enforcement actions and measures relating to Mercedes-Benz and/or its employees will be taken or administrative orders will be issued. Additionally, further delays in obtaining regulatory approvals necessary to introduce new or recertify existing vehicle models could occur.

In light of the legal positions taken by U.S. regulatory authorities and the KBA as well as the South Korean Ministry of Environment, among others it is not unlikely that, besides these authorities one or more authorities worldwide will reach the conclusion that other passenger cars and/or commercial vehicles with the brand name Mercedes-Benz or other brand names of the Group are equipped with impermissible defeat devices. Likewise, such authorities could take the view that certain functionalities and/or calibrations are not proper and/or were not properly disclosed. Mercedes-Benz cannot predict the outcome of the still ongoing proceedings. Particularly in light of the fine notice issued by the Stuttgart public prosecutor's office against Mercedes-Benz, the penal orders against Mercedes-Benz employees and the civil settlements with the US authorities, as well as any ongoing and potential other information requests, orders and proceedings, it cannot be ruled out that Mercedes-Benz will become subject to, as the case may be, significant additional fines and other sanctions, measures and actions. The occurrence of the aforementioned events in whole or in part could cause significant collateral damage including reputational harm. Further, due to negative allegations or findings with respect to technical or legal issues by one of the various governmental agencies, other agencies – or also plaintiffs – could also adopt such allegations or findings. Thus, a negative allegation or finding in one proceeding, such as the fine notice issued by the Stuttgart public prosecutor's office, the penal orders against Mercedes-Benz employees or the allegations underlying the civil settlements with the US authorities, carries the risk of being able to have an adverse effect on other proceedings, also potentially leading to new or expanded investigations or proceedings, including lawsuits.

In addition, the ability of Mercedes-Benz to defend itself in proceedings could be impaired by the fine notice issued by the Stuttgart public prosecutor's office, the penal orders against Mercedes-Benz employees, the civil settlements with the US authorities and by the underlying allegations and other unfavorable allegations, as well as by findings, results or developments in any of the information requests, inquiries, investigations, administrative or criminal orders, legal actions and/or proceedings discussed above.

Risks from Legal Proceedings in Connection with Diesel Exhaust Gas Emissions – Civil Court Proceedings

In a consolidated class action against MBG and MBUSA before the US District Court for New Jersey, plaintiffs alleged that MBG and MBUSA used devices that impermissibly impair the effectiveness of emission control systems in reducing nitrogen-oxide (NO_x) emissions and which cause excessive emissions from vehicles with diesel engines. In addition, plaintiffs alleged that consumers were deliberately deceived in connection with the advertising of Mercedes-Benz diesel vehicles.

In the third quarter of 2020, MBG and MBUSA reached a settlement with plaintiffs' counsel of this consumer class action. As part of the settlement, MBG and MBUSA deny the material factual allegations and legal claims asserted by the class action plaintiffs, but have agreed to provide payments to certain current and former diesel vehicle owners and lessees. The relevant court granted final approval of the settlement and issued a final judgment in the case.

The estimated costs of the class action settlement amount to approximately USD 700 million. In addition, Mercedes-Benz estimates further expenses of a mid three-digit-million euro amount to fulfil the requirements of this settlement and the aforementioned settlements with the US authorities.

A consumer class action making similar allegations and seeking similar remedies as to vehicles sold or leased in Canada was filed against MBG and other Group companies in Ontario in April 2016. In the fourth quarter of 2021, MBG and the other Group companies reached a settlement with plaintiffs' counsel of the consumer class action. As part of the settlement, MBG and the other Group companies deny the material factual allegations and legal claims asserted by the class action plaintiffs, but have agreed to make payments to certain current and former diesel vehicle owners and lessees. The estimated costs of this settlement amount to approximately CAD 250 million (approximately equivalent to EUR 175 million).

In a separate lawsuit filed by the State of Arizona in January 2019, the plaintiff claims that, among others, MBG and MBUSA deliberately deceived consumers in connection with advertising Mercedes-Benz diesel vehicles. Consumer class actions containing similar allegations were filed against MBG and further Group companies in the United Kingdom since May 2020, in the Netherlands in June and December 2020 as well as against MBG in Israel in February 2019. In a separate lawsuit filed by the Environmental Protection Commission of Hillsborough County, Florida in September 2020, the plaintiff claims that, among others, MBG and MBUSA violated municipal regulations prohibiting vehicle tampering and other conduct by using alleged devices claimed to impair the effectiveness of emissions control systems.

In Germany, a large number of customers of diesel vehicles have filed lawsuits for damages or rescission of sales contracts. They assert that the vehicles contained illegal defeat devices and/or showed impermissibly high levels of emissions or fuel consumption. They refer to, in particular, the KBA's recall orders mentioned in the subsection set out above and entitled "*Risks from Legal Proceedings in Connection with Diesel Exhaust Gas Emissions – Governmental Proceedings*". Given the current development of case numbers, Mercedes-Benz expects a continued high number of lawsuits to be filed in this respect. In this context, the Federation of German Consumer Organizations (*Verbraucherzentrale Bundesverband e.V.*) filed a model declaratory action (*Musterfeststellungsklage*) against MBG with the Stuttgart Higher Regional Court (*Oberlandesgericht*) on July 7, 2021. Such action seeks a ruling that certain preconditions of alleged consumer claims are met.

Furthermore, class actions have been filed in the United States and Canada alleging anticompetitive behavior relating to vehicle technology, costs, suppliers, markets, and other competitive attributes, including diesel emissions control technology.

In addition, a multitude of investors from Germany and abroad have filed lawsuits for damages with the Stuttgart Regional Court (*Landgericht*) alleging the violation of disclosure requirements (main proceedings) and also raised out-of-court claims for damages. In January 2021, the Stuttgart Regional Court (*Landgericht*) issued in the context of the main proceedings an order for reference to commence a model case proceeding before the Stuttgart Higher Regional Court (*Oberlandesgericht*) (model case proceedings). In December 2021, the Stuttgart Higher Regional Court (*Oberlandesgericht*) determined a model case plaintiff and announced the model case proceedings in the German register for model case proceedings. Thereafter, multiple investors used the possibility to register claims in a considerable amount with the model case proceedings in order to suspend the period of limitation.

If court proceedings have an unfavorable outcome for Mercedes-Benz, this could result in significant damages and punitive damages payments, remedial works or other cost-intensive measures. Court proceedings can in part also have an adverse effect on the reputation of the Group.

Furthermore, the ability of Mercedes-Benz to defend itself in the court proceedings could be impaired by the settlements of the consumer class actions in the US and in Canada, as well as by unfavorable allegations, findings, results or developments in any of the governmental or other court proceedings discussed above, in particular by the fine notice issued by the Stuttgart public prosecutor's office, the penal orders against Mercedes-Benz employees and the civil settlements with the US authorities.

Risks from Other Legal Proceedings

Following the settlement decision by the European Commission adopted on July 19, 2016 concluding the trucks antitrust proceedings, MBG and Daimler Truck AG are facing customers' claims for damages to a considerable degree. Respective legal actions, class actions and other forms of legal redress have been initiated in various states in and outside of Europe and should further be expected.

In September 2021, individual persons associated with the Environmental Action Germany (*Deutsche Umwelthilfe e.V.* ("**DUH**")) filed a lawsuit before the Stuttgart Regional Court (*Landgericht*) against Mercedes-Benz AG. They claim injunctive relief, demanding that Mercedes-Benz AG refrains from distributing passenger cars with combustion engines after November 2030 and reduces its respective sales prior to this point in time.

Accounting Estimates and Management Judgments Relating to All Legal Proceedings

The Group recognizes provisions in connection with pending or threatened proceedings to the extent a loss is probable and can be reasonably estimated. Such provisions are recognized in the Group's consolidated financial statements and are based on estimates. If quantifiable, contingent liabilities in connection with legal proceedings are disclosed in the Group's consolidated financial statements. Risks resulting from legal proceedings sometimes cannot be assessed reliably or only to a limited extent. Consequently, provisions recognized for some legal proceedings may turn out to be insufficient once such proceedings have ended. The Group may also become liable for payments in legal proceedings for which no provisions were recognized and/or contingent liabilities were disclosed. Uncertainty exists with regard to the amounts or due dates of possible cash outflows.

It cannot be ruled out that the regulatory risks and risks from legal proceedings discussed above individually or in the aggregate may materially adversely impact the profitability, cash flows and financial position of the Group or any of its segments.

Further information on legal proceedings is provided in Note 24 (*Provisions for other risks*), Note 31 (*Legal proceedings*) and Note 32 (*Contingent liabilities and other financial obligations*) of the Notes to the Annual Consolidated Financial Statements 2021 of MBG incorporated by reference in this Prospectus.

Tax Risks

Mercedes-Benz Group and its subsidiaries operate in many countries worldwide and are therefore subject to numerous different statutory provisions and tax audits. Any changes in legislation and jurisdiction, as well as different interpretations of the law by the fiscal authorities – especially in the field of cross-border transactions – may be subject to considerable uncertainty. It is therefore possible that the provisions recognized will not be sufficient, which could have negative effects on the Group's net profit and cash flows.

In addition, if future taxable income is not earned or is too low, there is a risk that the tax benefit from loss carryforwards and tax-deductible temporary differences may not be recognized or may no longer be recognized in full, which could have a negative impact on net profit.

4. Other Risks

As well as the risk categories described above, unpredictable events such as natural disasters, political instability or terrorist attacks can disturb production and business processes. Disruptions of business processes can also occur in connection with projects as a result of system changes. In addition to the described risks, other risks can occur that adversely affect the public perception and therefore the reputation of the Mercedes-

Benz Group. Public interest is focused on Mercedes-Benz' position with regard to individual issues in the fields of sustainability, integrity and social responsibility. Furthermore, customers, business partners and capital markets are interested in how the Group reacts to the technological challenges of the future, how it succeeds in offering up-to-date and technologically leading products in the markets, and how business operations are conducted under the given conditions.

New competitors in the IT sector for example and the Group's current strategy, among other things in connection with electric mobility, pose further challenges for the Mercedes-Benz Group and are connected with risks.

Finally, there will be a negative effect from the continuing high advance expenditure for new products and technologies.

Risk Factors Relating to the Notes

The risk factors relating to the Notes are presented in the following categories depending on their nature with the most material risk factor presented first in each category:

- 1. Risks Relating to All Notes to be Issued under the Programme,**
- 2. Risks Relating to the Structure of Certain Types of Notes to be Issued under the Programme,**
- 3. Risks Relating to Notes Denominated in Renminbi,**
- 4. Risks Relating to Green Bonds, and**
- 5. Other Related Risks.**

1. Risks Relating to All Notes to be Issued under the Programme

Holders May Face Liquidity Risks

Application has been made to list Notes issued under the Programme on the official list, and admit them for trading on, the regulated market of the Luxembourg Stock Exchange appearing on the list of regulated markets issued by the European Commission or on the professional segment of the regulated market of the Luxembourg Stock Exchange. In addition, the Programme provides that Notes may be listed on an alternative stock exchange or may not be listed at all. Regardless of whether the Notes are listed or not, there can be no assurance that a liquid secondary market for the Notes will develop or, if it does develop, that it will continue. The fact that the Notes may be listed does not necessarily lead to greater liquidity as compared to unlisted Notes. If the Notes are not listed on any stock exchange, pricing information for such Notes may, however, be more difficult to obtain which may affect the liquidity of the Notes adversely. In an illiquid market, an investor might not be able to sell his Notes at any time at fair market prices. The possibility to sell the Notes might additionally be restricted by country specific reasons.

Holders May Face Foreign Exchange Risks

A Holder of Notes denominated in a foreign currency is exposed to the risk of changes in currency exchange rates which may affect the yield of such Notes. Changes in currency exchange rates result from various factors such as macro-economic factors, speculative transactions and interventions by central banks and governments.

A change in the value of any foreign currency against the Euro, for example, will result in a corresponding change in the Euro value of Notes denominated in a currency other than Euro and a corresponding change in the Euro value of interest and principal payments made in a currency other than in Euro in accordance with the terms of such Notes. If the underlying exchange rate falls and the value of the Euro correspondingly rises, the price of the Notes and the value of interest and principal payments made thereunder, expressed in Euro, falls correspondingly.

In addition, government and monetary authorities may impose (as some have done in the past) exchange controls that could adversely affect an applicable currency exchange rate. As a result, Holders may receive less interest or principal than expected, or no interest or principal.

Holders May Face Taxation Risks

Potential purchasers of Notes should be aware that stamp duty and other taxes and/or charges may be levied in accordance with the laws and practices in the countries where the Notes are transferred and other relevant jurisdictions. In addition, payments of interest on the Notes or income derived from the Notes may be subject to taxation, including withholding taxes, in the jurisdiction of the relevant Issuer, in the jurisdiction of the Holder, or in other jurisdictions in which the Holder is required to pay taxes. Any such tax consequences may have an impact on the net income received from the Notes. Potential purchasers of Notes should carefully consider the tax consequences of investing in the Notes and consult their own independent tax advisers about their tax situation. In addition, potential purchasers should be aware that tax regulations and their application by the relevant taxation authorities may change from time to time. Accordingly, it is not possible to predict the precise tax treatment of the Notes which will apply at any given time.

Holders May Face Risks Related to FATCA and the U.S. Tax Treatment of the Notes

While the Notes issued by MBG, MBAP, MBIF, MBFJ and DCFI (together, the "**Non-U.S. Issuers**") are in global form and held within Clearstream Banking S.A. or Euroclear Bank SA/NV (together, the "**ICSDs**") or Clearstream Banking AG ("**CBF**"), in all but the most remote circumstances, it is not expected that the new reporting regime and potential withholding tax imposed by sections 1471 through 1474 of the U.S. Internal Revenue Code of 1986 ("**FATCA**") will affect the amount of any payment received by the ICSDs or CBF. However, FATCA may affect payments made to custodians or intermediaries in the subsequent payment chain leading to the ultimate investor if any such custodian or intermediary generally is unable to receive payments free of FATCA withholding. It also may affect payment to any ultimate investor that is a financial institution that is not entitled to receive payments free of withholding under FATCA, or an ultimate investor that fails to provide its broker (or other custodian or intermediary from which it receives payment) with any information, forms, other documentation or consents that may be necessary for the payments to be made free of FATCA withholding. Investors should choose the custodians or intermediaries with care (to ensure each is compliant with FATCA or other laws or agreements related to FATCA) and provide each custodian or intermediary with any information, forms, other documentation or consents that may be necessary for such custodian or intermediary to make a payment free of FATCA withholding. Investors should consult their own tax adviser to obtain a more detailed explanation of FATCA and how FATCA may affect them. The relevant Non-U.S. Issuer's obligations under the Notes are discharged once it has made payment to, or to the order of, the ICSDs or CBF and the relevant Non-U.S. Issuer has therefore no responsibility for any amount thereafter transmitted through the ICSDs or CBF and custodians or intermediaries. Further, foreign financial institutions in a jurisdiction which has entered into an intergovernmental agreement with the United States (an "**IGA**") are generally not expected to be required to withhold under FATCA or an IGA (or any law implementing an IGA) from payments they make.

Payments on Notes issued by DFNA will be subject to withholding under FATCA if the holder, beneficial owner or an intermediary in the chain of payments is not FATCA compliant.

In addition, an Issuer may also redeem early any Notes under the Programme if certain payments made to the Issuer or the Guarantor (if applicable) become subject to withholding under FATCA or if the Issuer is required, under FATCA, to redeem such Notes. In such case, all Notes of a series may be redeemed early.

Finally, in the case of Notes to be issued by DCFI (if such Notes increase an issue originally issued under the 2013 Prospectus or the 2014 Prospectus) or DFNA, the Issuer may redeem early such Notes if the Notes are or will be treated as being in bearer form for U.S. federal income tax purposes.

Holders May Face Risks from the Implementation of the Proposed Financial Transactions Tax

On February 14, 2013, the European Commission published a proposal (the "**Commission's Proposal**") for a Directive for a common financial transactions tax.

The Commission's Proposal has very broad scope and could, if introduced, apply to certain dealings in the Notes (including secondary market transactions) in certain circumstances.

However, the financial transactions tax proposal remains subject to negotiation between the participating EU Member States. It may therefore be altered prior to any implementation, the timing of which remains unclear. Therefore, it is currently uncertain whether and when the proposed financial transactions tax will be enacted and when it will take effect with regard to dealings in the Notes.

Prospective investors in the Notes are advised to seek their own professional advice in relation to the consequences of the financial transactions tax.

No Gross-Up for Withholding Tax Imposed under the German Anti-Tax-Haven Legislation.

In 2021, Germany introduced legislation for, *inter alia*, financing relations between German resident debtors and creditors, which are resident in a jurisdiction, which is a non-cooperative tax jurisdiction (*nicht kooperatives Steuerhoheitsgebiet*) within the meaning of the Act to Prevent Tax Evasion and Unfair Tax Competition (*Gesetz zur Abwehr von Steuervermeidung und unfairem Steuerwettbewerb*, the "**StAbwG**").

This legislation provides that – different to the general rules on German non-resident taxation of interest income – interest paid by a German resident debtor to a creditor, which is resident in a non-cooperative tax jurisdiction within the meaning of the StAbwG is subject to German non-resident taxation and the German resident debtor is also obliged to effect a withholding tax deduction. The applicable tax rate is 15% on the gross payment.

Jurisdictions that are included in the EU list of non-cooperative jurisdictions (the "**EU List**") are generally considered non-cooperative whereas changes to the EU List need to be transposed into German law and the German law may, therefore, show deviations in comparison to the EU List from time to time. As of the date of this Prospectus, the following jurisdictions were listed on the EU List: American Samoa, Fiji, Guam, Palau, Panama, Samoa, Trinidad and Tobago, Vanuatu and the U.S. Virgin Islands.

MBG may therefore be obliged to effect a withholding tax deduction in connection with payments it makes under any Notes or the Guarantee, if a Holder is resident in a non-cooperative tax jurisdiction within the meaning of the StAbwG (which should basically be such jurisdictions which are listed in the EU List).

No Gross-Up for New Withholding Tax on Interest in the Netherlands in Respect of Payments Made by MBIF to Certain Holders That Are Entities Related to MBIF

The Netherlands has introduced a new withholding tax on interest payments as of January 1, 2021 pursuant to the Dutch Withholding Tax Act 2021 (*Wet bronbelasting 2021*). The new withholding tax generally applies to interest payments made by an entity tax resident in the Netherlands, like MBIF, to a related entity (as described below) tax resident in a Listed Jurisdiction (as defined below).

For purposes of the Dutch Withholding Tax Act 2021, an entity is considered a related entity if (i) such entity has a Qualifying Interest (as defined below) in MBIF; (ii) MBIF has a Qualifying Interest in such entity; or (iii) a third party has a Qualifying Interest in both MBIF and such entity. The term "**Qualifying Interest**" means a directly or indirectly held interest – either individually or jointly as part of a collaborating group (*samenwerkende groep*) – that confers a definite influence over the company's decisions and allows the holder of such interest to determine its activities (within the meaning of case law of the European Court of Justice on the right of freedom of establishment (*vrijheid van vestiging*)).

A jurisdiction is considered a listed jurisdiction (a "**Listed Jurisdiction**"), if it is listed in the yearly updated Dutch Regulation on low-taxing states and non-cooperative jurisdictions for tax purposes (*Regeling laagbelastende staten en niet-coöperatieve rechtsgebieden voor belastingdoeleinden*) which includes (i)

jurisdictions with a corporation tax on business profits with a general statutory rate of less than 9% and (ii) jurisdictions that are included in the EU list of non-cooperative jurisdictions. For the fiscal year 2022, the following 23 jurisdictions are Listed Jurisdictions: American Samoa, Anguilla, Bahamas, Bahrain, Barbados, Bermuda, the British Virgin Islands, the Cayman Islands, Fiji, Guam, Guernsey, Isle of Man, Jersey, Palau, Panama, Samoa, Seychelles, Trinidad and Tobago, Turkmenistan, Turks and Caicos Islands, Vanuatu, the United Arab Emirates and the U.S. Virgin Islands.

The new withholding tax may also apply in situations where artificial structures are put in place with the main purpose or one of the main purposes to avoid the Dutch withholding tax, e.g., where an interest payment to a Listed Jurisdiction is artificially routed via an intermediate entity in a non-Listed Jurisdiction, or in the event of a hybrid mismatch.

In practice, MBIF may not always be able to assess whether a Holder is related to MBIF or located in a Listed Jurisdiction. The parliamentary history is unclear on MBIF's responsibilities to determine the absence of affiliation in respect of notes issued in the market, like the Notes.

If payments in respect of the Notes become subject to withholding tax on interest in the Netherlands pursuant to the Dutch Withholding Tax Act 2021, MBIF would make the required withholding or deduction for the account of the Holder and would not be required to pay additional amounts in respect of the withholding or deduction (see Condition 7 (Taxation)). This may have an impact on the net income received from the Notes.

Prospective investors in the Notes should consult their own tax advisers as to whether this new withholding tax on interest in the Netherlands could be relevant to them.

Holders May Face Risks from a Change of the Law Underlying the Notes

The terms and conditions of the Notes are based on German law in effect as at the date of this Prospectus. No assurance can be given as to the impact of any possible judicial decision or change to German law (or law applicable in Germany) or administrative practice after the date of this Prospectus.

2. Risks Relating to the Structure of Certain Types of Notes to be Issued under the Programme

Holders Are Exposed to Market Price Risks in Relation to the Notes

The development of market prices of the Notes depends on various factors, such as changes of market interest rate levels, the policy of central banks, overall economic developments, inflation rates or the lack of or excess demand for the relevant type of Notes. The market price of the Notes may also be negatively affected by an increase in the Issuer's credit spreads, i.e. the difference between yields on the Issuer's debt and the yield of government bonds or swap rates of similar maturity. The Issuer's credit spreads are mainly based on its perceived creditworthiness but also influenced by other factors such as general market trends as well as supply and demand for such Notes. The Holder of Notes is therefore exposed to the risk of an unfavorable development of market prices of his Notes which materializes if the Holder sells the Notes prior to the final maturity of such Notes. If the Holder decides to hold the Notes until final maturity the Notes will be redeemed at the amount set out in the relevant Final Terms.

Holders of Fixed Rate Notes Are Exposed to the Risk that the Price of Such Notes Falls as a Result of Changes in the Market Interest Rate

A Holder of a Fixed Rate Note is exposed to the risk that the price of such Note falls as a result of changes in the current interest rate on the capital markets (the "**Market Interest Rate**") for comparable debt securities of the same maturity. While the nominal interest rate of a Fixed Rate Note as specified in the applicable Final Terms is fixed during the life of such Note, the Market Interest Rate typically changes on a daily basis. As the Market Interest Rate changes, the price of a Fixed Rate Note also changes, but in the opposite direction. If the Market Interest Rate increases, the price of a Fixed Rate Note typically falls, until the yield of such Note is

approximately equal to the Market Interest Rate. If the Market Interest Rate falls, the price of a Fixed Rate Note typically increases, until the yield of such Note is approximately equal to the Market Interest Rate. Potential purchasers of Fixed Rate Notes should be aware that movements of the Market Interest Rate could adversely affect the market price of the Notes.

Fixed Rate Notes may also bear an interest rate of zero per cent., in which case no interest will be paid. If a Holder purchases such Notes at a price (which term shall include any possible issue surcharge or any provisions, commissions or transactional costs in connection with such purchase) higher than the redemption amount of such Notes, the yield of the Notes so purchased may be negative and the Holder may suffer a loss.

Holder of Floating Rate Notes Are Exposed to the Risk of Fluctuating Interest Rate Levels

Floating Rate Notes pay a variable amount of interest based on a reference interest rate on specified interest payment dates. Floating Rate Notes tend to be volatile investments. A Holder of a Floating Rate Note is exposed to the risk of fluctuating interest rate levels and, consequently, uncertain interest income. Fluctuating interest rate levels make it impossible to determine the yield of Floating Rate Notes in advance. Neither the current nor the historical value of the relevant floating rate should be taken as an indication of the future development of such floating rate during the term of any Floating Rate Notes.

Floating Rate Notes may be structured to include caps and/or floors. In such case, their market value may be more volatile than the market value of Floating Rate Notes that do not include these features. The effect of a cap is that the amount of interest will never rise above the predetermined cap, so that Holders will not be able to benefit from any actual favorable development beyond the cap. The yield could therefore be considerably lower than that of similar Floating Rate Notes without a cap.

Specific Risks Arise in Case Floating Rate Notes Are Linked to a Benchmark as Reference Interest Rate

Interest rates and indices which are deemed to be benchmarks, (including the Euro Interbank Offered Rate ("**EURIBOR**") and other interest rates and indices) are the subject of recent national and international regulatory guidance and proposals for reform. Some of these reforms are already effective while others are still to be implemented. These reforms may cause such benchmarks to perform differently than in the past, to disappear entirely, or to have other consequences which cannot be predicted. Any such consequence could have a material adverse effect on any Notes linked to or referencing such a benchmark.

The Benchmarks Regulation applies, subject to certain transitional provisions, to the provision of benchmarks, the contribution of input data to a benchmark and the use of a benchmark within the EU. Among other things, it (i) requires benchmark administrators to be authorized or registered (or, if non-EU-based, to be subject to an equivalent regime or otherwise recognised or endorsed), and (ii) prevents certain uses by EU supervised entities of benchmarks of administrators that are not authorized or registered (or, if non-EU based, not deemed equivalent or recognised or endorsed), unless such benchmark administrators are exempt from the application of the Benchmarks Regulation, such as, for example, central banks and certain public authorities.

The Benchmarks Regulation, as far as applicable, could have a material impact on any Notes linked to or referencing EURIBOR or any other benchmark, in particular, if the methodology or other terms of the EURIBOR or such other benchmark are changed in order to comply with the requirements of the Benchmarks Regulation. Such changes could, among other things, have the effect of reducing, increasing or otherwise affecting the volatility of the published rate or level of the EURIBOR or such other benchmark.

In Australia, examples of reforms that are already effective include changes to the methodology for calculation of BBSW, and the Treasury Laws Amendment (2017 Measures No. 5) Act 2018 of Australia, which, among other things, enables the Australian Securities and Investment Commission ("**ASIC**") to make rules relating to the generation and administration of benchmark indices. On June 6, 2018, ASIC designated BBSW as a "significant financial benchmark" and made the ASIC Financial Benchmark (Administration) Rules 2018 and

the ASIC Financial Benchmarks (Compelled) Rules 2018. On June 27, 2019, ASIC granted ASX Benchmarks a licence to administer BBSW with effect from July 1, 2019.

More broadly, any of the international or national reforms, or the general increased regulatory scrutiny of benchmarks, could increase the costs and risks of administering or otherwise participating in the setting of a benchmark and complying with any such regulations or requirements.

The euro risk free-rate working group for the euro area has published a set of guiding principles for fallback provisions in new euro denominated cash products (including bonds) referencing EURIBOR. The guiding principles indicate, among other things, that continuing to reference EURIBOR in relevant contracts (without robust fallback provisions) may increase the risk to the euro area financial system. These recommendations have been complemented by additional ones issued on May 11, 2021.

It is not possible to predict with certainty whether, and to what extent certain benchmarks will continue to be supported going forwards. This may cause such benchmarks to perform differently than they have done in the past, and may have other consequences which cannot be predicted. Such factors may have the following effects on the relevant benchmark: (i) discourage market participants from continuing to administer or contribute to the benchmark; (ii) trigger changes in the rules or methodologies used in the benchmarks, or (iii) lead to the disappearance of the benchmark. Any of the above changes or any other consequential changes as a result of international or national reforms or other initiatives or investigations, could have a material adverse effect on the value or liquidity of, and return on any Notes linked to or referencing a benchmark.

The Terms and Conditions of the Notes linked to or referencing EURIBOR or any other benchmark (other than SOFR or SONIA) provide for certain fallback arrangements in the event that a benchmark and/or any page on which a benchmark may be published (or any successor service) becomes unavailable or a Rate Replacement Event (as defined in the Terms and Conditions) in respect of a benchmark, which is used to determine the Reference (Interest) Rate (as defined in the Terms and Conditions) applicable to Notes with a floating rate of interest, occurs, including if (1) a benchmark ceases to be published for a period of at least ten business days prior to and including the relevant Determination Day (as defined in the Terms and Conditions), (2) public announcements are made by the administrator of a benchmark that such benchmark is no longer representative, or will no longer be representative of the underlying market it purports to measure as of a certain date, and that such representativeness will not be restored, (3) public announcements are made by, *inter alia*, administrators, supervisors of administrators, the central bank for the specified currency and/or any entity with insolvency or resolution authority over the administrator of a benchmark that, *inter alia*, (i) the publication of such benchmark will cease permanently or indefinitely, (ii) such benchmark has been or will be permanently or indefinitely discontinued, (iii) such benchmark will permanently or indefinitely cease to be provided by its administrator, (iv) such benchmark will be prohibited from being used, or (v) that a material change of the methodology of calculation of such benchmark has occurred or will occur.

The rate of interest on Notes linked to or referencing EURIBOR or any other benchmark (other than SOFR or SONIA) may cease to be determined by reference to the original benchmark which is used to determine the rate of interest applicable to those Notes, and instead be determined by reference to the Replacement Rate, even if the original benchmark continues to be published. Such rate may be lower than the original benchmark rate for so long as that benchmark continues to be published, and the value of and return on the Notes may be adversely affected.

Such fallback arrangements include the possibility that the Rate of Interest could be determined by reference to a Replacement Rate (as defined in the Terms and Conditions), with or without the application of an Adjustment Spread (as defined in the Terms and Conditions) and may include adjustments to the Terms and Conditions of the Notes to ensure the proper operation of the Replacement Rate, all as determined by an Independent Adviser (as defined in the Terms and Conditions) or the Issuer (as the case may be). An Adjustment Spread, if applied, may be positive or negative or zero and would be applied with a view to reducing or eliminating, to the extent reasonably practicable, any transfer of economic value between the

relevant Issuer and Holders arising as a result of the replacement of a Reference (Interest) Rate. However, it may not be possible to determine or apply an Adjustment Spread and even if an adjustment is applied, such Adjustment Spread may not be effective to reduce or eliminate economic prejudice to the Holders. The use of a Replacement Rate (including with the application of an Adjustment Spread) will still result in any Notes linked to or referencing a benchmark (other than SOFR or SONIA) performing differently (which may include payment of a lower Rate of Interest) than they would if such benchmark were to continue to apply in its current form.

If, following the occurrence of a Rate Replacement Event, no Replacement Rate, Adjustment Spread or Replacement Rate Adjustments can be determined, the ultimate fallback for the purposes of calculation of the Rate of Interest for a particular interest period will result in the Reference (Interest) Rate for the last preceding interest period being used. This could result in the same Rate of Interest being applied to the Notes until their maturity, effectively turning the Notes, which are supposed to pay a floating rate of interest, into debt instruments with a fixed rate of interest, unless the relevant Issuer makes use of an early termination right available to it in these circumstances (in which case the risks described in "*Risk of Early Redemption*" above apply). Due to the uncertainty concerning the availability of Replacement Rates, the involvement of an Independent Adviser, and the potential for further regulatory developments, there is a risk that the relevant fallback provisions may not operate as intended at the relevant time.

Furthermore, if the Rate of Interest payable under any Notes referencing or linked to a benchmark (other than SOFR or SONIA) cannot be determined due to any reason other than a Rate Replacement Event certain fallback provisions will apply with regard to interest determination. The application of these fallback provisions could result in the same Rate of Interest being applied to the Notes until their maturity, effectively turning the Notes, which are supposed to pay a floating rate of interest, into debt instruments with a fixed rate of interest.

Finally, under the terms of the Benchmarks Regulation, the European Commission was also granted powers to designate a replacement for certain critical benchmarks contained in contracts governed by the laws of an EU Member State (such as the Notes), where that contract does not already contain a suitable fallback. There can be no assurance that the fallback provisions of the Notes would be considered suitable. Accordingly, there is a risk that any Notes linked to or referencing a Benchmark would be transitioned to a replacement Benchmark selected by the European Commission. There is no certainty at this stage what any such replacement Benchmark would be.

Investors should consult their own independent advisers and make their own assessment about the potential risks imposed by the Benchmarks Regulation or the reforms mentioned above in making any investment decision with respect to any Notes referencing a benchmark.

Specific Risks Arise in Case Floating Rate Notes Are Linked to SOFR

The Secured Overnight Financing Rate ("**SOFR**") is published by the Federal Reserve Bank of New York (the "**Federal Reserve**") and is intended to be a broad measure of the cost of borrowing cash overnight collateralised by securities issued by the United States Department of the Treasury (the "**Treasury**"). The Federal Reserve reports that the SOFR includes all trades in the Broad General Collateral Rate, being a measure of rates on overnight Treasury general collateral repurchase agreement (repo) transactions, plus bilateral Treasury repurchase agreement transactions cleared through the delivery-versus-payment service offered by the Fixed Income Clearing Corporation (the "**FICC**"), a subsidiary of the Depository Trust and Clearing Corporation ("**DTCC**"). The SOFR is filtered by the Federal Reserve to remove a portion of the foregoing transactions considered to be "specials".

The Federal Reserve reports that the SOFR is calculated as a volume-weighted median of transaction-level tri-party repo data collected from The Bank of New York Mellon as well as transaction data from repurchase agreements in the form of general collateral financing trades and data on bilateral Treasury repurchase

transactions cleared through the FICC's delivery-versus-payment service. The Federal Reserve notes that it obtains information from DTCC Solutions LLC, an affiliate of DTCC. The Federal Reserve further notes on its publication page for the SOFR that use of the SOFR is subject to important limitations and disclaimers, including that the Federal Reserve may alter the methods of calculation, publication schedule, rate revision practices or availability of the SOFR at any time without prior notice.

Because the SOFR is published by the Federal Reserve based on data received from other sources, the Issuer has no control over its determination, calculation or publication. There can be no guarantee that the SOFR will not be discontinued or fundamentally altered in a manner that is materially adverse to the interests of investors in any Notes linked to SOFR. If the manner in which the SOFR is calculated is changed, that change may result in a reduction of the amount of interest payable on any Notes linked to SOFR and the trading prices of such Notes. The SOFR in respect of any calendar day may decline to zero or become negative.

The Federal Reserve began to publish the SOFR in April 2018. The Federal Reserve has also begun publishing historical indicative SOFR going back to 2014. Investors should not rely on any historical changes or trends in the SOFR as an indicator of future changes in the SOFR. Also, since the SOFR is a relatively new market index, any Notes referencing SOFR will likely have no established trading market when issued, and an established trading market may never develop or may not be very liquid. Market terms for debt instruments indexed to the SOFR, such as the spread over the index reflected in interest rate provisions, may evolve over time, and trading prices of any Notes referencing SOFR may be lower than those of later-issued indexed debt instruments as a result.

The Issuer may in the future also issue Notes referencing SOFR that differ materially in terms of interest determination when compared with any previous Notes referencing SOFR issued under the Programme. The nascent development of SOFR as reference interest rate for the Eurobond markets, as well as continued development of rates based on the SOFR for such markets and market infrastructure for adopting such rates, could result in reduced liquidity or increased volatility or otherwise affect the market price of any Notes referencing SOFR to be issued under the Programme from time to time.

Interest on any Notes referencing SOFR is only capable of being determined at the end of the relevant interest period and immediately prior to the relevant Interest Payment Date. It may be difficult for investors in such Notes to reliably estimate the amount of interest that will be payable on such Notes.

In addition, the manner of adoption or application of reference rates based on the SOFR in the Eurobond markets may differ materially compared with the application and adoption of the SOFR in other markets, such as the derivatives and loan markets. Investors should carefully consider how any mismatch between the adoption of reference rates based on the SOFR across these markets may impact any hedging or other financial arrangements which they may put in place in connection with any acquisition, holding or disposal of any Notes referencing SOFR.

Further, if SOFR does not prove to be widely used in securities like the Notes, the trading price of any Notes referencing SOFR may be lower than those of debt instruments linked to indices that are more widely used. Investors in Notes referencing SOFR may not be able to sell their Notes at all or may not be able to sell their Notes at prices that will provide them with a yield comparable to similar investments that have a developed secondary market, and may consequently suffer from increased pricing volatility and market risk.

Investors should be aware that, if SOFR were temporarily unavailable or permanently discontinued, the rate of interest on any Notes referencing SOFR will be determined for the relevant interest period by the fallback provisions applicable to such Notes, which include, *inter alia*, the application of certain successor rates.

Investors should further be aware that, if SOFR were permanently discontinued, the rate of interest on any Notes referencing SOFR will be determined for the relevant interest period by fallback provisions which differ from those applicable in case SOFR were temporarily unavailable.

The application of these fallback provisions could result in the same interest rate being applied to such Notes until their maturity, effectively turning the Notes, which are supposed to pay a floating rate of interest, into debt instruments with a fixed rate of interest.

Investors should consult their own independent advisers and make their own assessment about the potential risks involved in making any investment decision with respect to any Notes referencing SOFR.

Specific Risks Arise in Case Floating Rate Notes Are Linked to SONIA

Where the relevant Final Terms for a Series of Floating Rate Notes identifies that the Rate of Interest for such Notes will be determined by reference to SONIA, the Rate of Interest will be determined on the basis of Compounded Daily SONIA. Compounded Daily SONIA differs from the London Interbank Offered Rate ("**LIBOR**") in a number of material respects, including (without limitation) that Compounded Daily SONIA is a backwards-looking, compounded, risk-free overnight rate, whereas LIBOR is expressed on the basis of a forward-looking term and includes a risk-element based on inter-bank lending. As such, investors should be aware that LIBOR and SONIA may behave materially differently as reference interest rates. As of the date of this Prospectus, Compounded Daily SONIA is subject to change and development, both in terms of the substance of the calculation and in the development and adoption of market infrastructure for the issuance and trading of bonds referencing Compounded Daily SONIA.

Accordingly, prospective investors in any Notes referencing Compounded Daily SONIA should be aware that the market continues to develop in relation to SONIA as a reference rate in the capital markets and its adoption as an alternative to Sterling LIBOR. For example, in the context of backwards-looking SONIA rates, market participants and relevant working groups are currently assessing the differences between compounded rates and weighted average rates, and such groups are also exploring forward-looking 'term' SONIA reference rates (which seek to measure the market's forward expectation of an average SONIA rate over a designated term).

The market or a significant part thereof may adopt an application of SONIA that differs significantly from that set out in the Terms and Conditions as applicable to Notes referencing Compounded Daily SONIA that are to be issued under this Prospectus.

Furthermore, the Issuer may in the future issue Notes referencing SONIA that differ materially in terms of interest determination when compared with any previous SONIA-referenced Notes issued by it under the Programme. The nascent development of SONIA as a reference interest rate for the debt capital markets, as well as continued development of SONIA-based rates for such markets and market infrastructure for adopting such rates, could result in reduced liquidity or increased volatility or could otherwise affect the market price of any Notes referencing the Compounded Daily SONIA to be issued under the Programme from time to time.

Furthermore, the Rate of Interest on Notes which reference Compounded Daily SONIA is only capable of being determined at the end of the relevant interest period and immediately prior to the relevant Interest Payment Date. It may be difficult for investors in such Notes to estimate reliably the amount of interest which will be payable on the Notes.

In addition, the manner of adoption or application of reference rates based on SONIA in the Eurobond markets may differ materially compared with the application and adoption of SONIA in other markets, such as the derivatives and loan markets. Investors should carefully consider how any mismatch between the adoption of reference rates based on SONIA across these markets may impact any hedging or other financial arrangements which they may put in place in connection with the acquisition, holding or disposal of any Notes referencing Compounded Daily SONIA to be issued under the Programme from time to time.

Investors should be aware that, if the Calculation Agent cannot determine the Compounded Daily SONIA due to the SONIA Reference Rate not having been made available, the Rate of Interest on Notes referencing Compounded Daily SONIA will be determined for the relevant interest period by the fallback provisions

applicable to the Notes. The fallback provisions applicable to the Notes rely on a first level upon the SONIA Reference Rate being replaced by, *inter alia*, the Bank of England's Bank Rate which, depending on market circumstances, may not be available at the relevant time, in which case, on a second level, the fallback provisions applicable to the Notes require the Calculation Agent to determine the Rate of Interest on the Notes by making use of the Compounded Daily SONIA last determined in relation to the Notes in respect of the last preceding interest period (or in case there is no such preceding interest period, the Compounded Daily SONIA which would have been applicable to the Notes for the first scheduled interest period had the Notes been in issue for a period equal in duration to the first scheduled interest period but ending on (and excluding) the Interest Commencement Date).

The application of these fallback provisions could result in the same interest rate being applied to such Notes until their maturity, effectively turning the Notes, which are supposed to pay a floating rate of interest, into debt instruments with a fixed rate of interest.

Investors should consult their own independent advisers and make their own assessment about the potential risks involved in making any investment decision with respect to any Notes referencing Compounded Daily SONIA.

Holders Are Exposed to the Risk of Early Redemption of the Notes by the Issuer

The applicable Final Terms will indicate whether the Issuer may have the right to call the Notes prior to maturity for reasons of taxation or at the option of the Issuer (optional call right) or whether the Notes will be subject to early redemption in case of the occurrence of an event specified in the applicable Conditions (early redemption event).

An optional call right is likely to limit the market value of the relevant Notes. Prior to or during any period when the Issuer may elect to redeem the Notes, the market value of those Notes generally will not rise substantially above the price at which they can be redeemed.

If the Issuer redeems the Notes prior to maturity or the Notes are subject to early redemption due to an early redemption event, a Holder of such Notes is exposed to the risk that due to early redemption his investment may have a lower than expected or even a negative yield, depending on the price at which such Holder purchased its Notes. In addition, the Holders may have to reinvest the funds they receive upon early redemption on less favorable conditions as compared to the original investment.

The Issuer might exercise its optional call right if the yield on comparable notes in the capital market falls and the Issuer's cost of any new borrowing is lower than the interest rate payable under the relevant Notes. At those times, an investor may only be able to reinvest the redemption proceeds in notes with a lower yield. Prospective investors should consider reinvestment risk in light of other investments available at the time when they are deciding whether to invest in the relevant Notes.

It should be noted that the Issuer may exercise any optional call right irrespective of the Market Interest Rates which are relevant on a certain call date.

A Holder is Subject to the Risk of Being Outvoted by a Majority Resolutions of the Holders

If the relevant Conditions provide for resolutions of Holders a Holder is subject to the risk of being outvoted by a majority resolution of the Holders. As such majority resolution properly adopted is binding on all Holders, certain rights of such Holder against the relevant Issuer under the relevant Conditions may be amended or reduced or even cancelled.

The Appointment of a Joint Representative May Restrict a Holder's Right to Pursue and Enforce its Rights Under the Conditions

If the relevant Conditions provide for the appointment of a Joint Representative it is possible that a Holder may be deprived of its individual right to pursue and enforce its rights under the relevant Conditions against the relevant Issuer, such right passing to the Joint Representative who is then exclusively responsible to claim and enforce the rights of all Holders.

3. Risks Relating to Notes Denominated in Renminbi

Restrictions on Convertibility of Renminbi and Remittance of Proceeds into or outside the PRC

At the date of this Prospectus, Renminbi is not completely freely convertible. The People's Republic of China ("PRC", which, for the purpose of this Prospectus shall exclude Hong Kong and Macau Special Administrative Regions of the People's Republic of China and Taiwan) government continues to regulate conversion between Renminbi and foreign currencies, including the EUR.

Remittance of Renminbi by foreign investors into the PRC for purposes such as capital contributions, known as capital account items, is generally subject to specific approvals from (or registrations with) the relevant currency control authorities or a close review by qualified local banks, on a case-by-case basis and subject to a strict monitoring system. Regulation in the PRC on the remittance of Renminbi into the PRC for settlement of capital account items is developing gradually.

Although from October 1, 2016, Renminbi has been added to the Special Drawing Rights basket created by the International Monetary Fund and policies further improving accessibility to Renminbi to settle cross-border transactions in foreign currencies were implemented by the People's Bank of China (the "PBoC") in 2018, there is no assurance that the PRC government will liberalise control over crossborder remittance of Renminbi in the future or that new regulations in the PRC will not be promulgated in the future which have the effect of restricting or eliminating the remittance of Renminbi into or outside the PRC. In the event that the Issuer does remit some or all of the proceeds into the PRC in Renminbi and the Issuer subsequently is not able to repatriate funds outside the PRC in Renminbi, it will need to source Renminbi offshore to finance its obligations under the Notes, and its ability to do so will be subject to the overall availability of Renminbi outside the PRC.

Limited Availability of Renminbi Outside the PRC

As a result of the restrictions by the PRC government on cross-border Renminbi fund flows, the availability of Renminbi outside the PRC is limited. The current size of Renminbi denominated financial assets outside the PRC is also limited.

Renminbi business participating banks do not have direct Renminbi liquidity support from the PBoC. The relevant financial institution that has been permitted to engage in the settlement of current account trade transactions in Renminbi in certain financial centres and cities (the "RMB Clearing Bank") only has access to onshore liquidity support from the PBoC for the purpose of squaring open positions of participating banks for limited types of transactions and is not obliged to square for participating banks any open positions resulting from other foreign exchange transactions or conversion services. In such cases, the participating banks will need to source Renminbi from outside the PRC to square such open positions.

The offshore Renminbi market is subject to many constraints as a result of PRC laws and regulations on foreign exchange control. There is no assurance that no new PRC regulations will be promulgated and the agreements on the clearing of Renminbi entered into by the PBoC and the relevant RMB Clearing Bank may not be terminated or amended so as to have the effect of restricting availability of Renminbi offshore. The limited availability of Renminbi outside the PRC may affect the liquidity of the Notes. To the extent the Issuer is

required to source Renminbi in the offshore market to service the Notes, there is no assurance that the Issuer will be able to source such Renminbi on satisfactory terms, if at all.

Risk of Depreciation of Renminbi

The value of Renminbi against the EUR and other foreign currencies fluctuates from time to time and is affected by changes in the PRC and international political and economic conditions as well as many other factors. In August 2015, the PBoC implemented changes to the way it calculates the midpoint against the US Dollar to take into account market-maker quotes before announcing the daily midpoint. This change, among others that may be implemented, may increase the volatility in the value of Renminbi against other currencies. The Issuer will make all payments of interest and principal with respect to the Notes in Renminbi unless otherwise specified. As a result, the value of these Renminbi payments may vary with the changes in the prevailing exchange rates in the marketplace. If the value of Renminbi depreciates against the EUR or other foreign currencies, the value of the investment made by a Holder of the Notes in EUR or any other foreign currency terms will decline.

Risk of Notes Being Settled in U.S. Dollar

If the Issuer is not able to satisfy its obligation to pay interest and principal on the Notes as a result of RMB Inconvertibility, RMB Non Transferability or RMB Illiquidity (each, as defined in the section entitled "*Terms and Conditions of the Notes*"), the Issuer shall be entitled, on giving not less than five or more than 30 calendar days' irrevocable notice to the Holders prior to the due date for payment, to settle any such payment in U.S. dollar on the due date at the US Dollar Equivalent (as defined in the section entitled "*Terms and Conditions of the Notes*") of any such interest or principal, as the case may be. As a result, the value of these Renminbi payments may vary with the prevailing exchange rates in the marketplace. If the value of the Renminbi depreciates against the US Dollar or other foreign currencies, the value of a Holder's investment in US Dollar or other foreign currency terms will decline.

Risk of Increased Interest Rate Volatility

The PRC government has gradually liberalised its regulation of interest rates in recent years. Further liberalisation may increase interest rate volatility. In addition, the interest rate for Renminbi in markets outside the PRC may significantly deviate from the interest rate for Renminbi in the PRC as a result of foreign exchange controls imposed by PRC law and regulations and prevailing market conditions. In case the Notes carry a fixed interest rate, the trading price of the Notes will vary with the fluctuations in the Renminbi interest rates. If Holders of the Notes propose to sell their Notes before their maturity, they may receive an offer lower than the amount they have invested.

PRC Tax Laws

In considering whether to invest in Notes denominated in Renminbi, investors should consult their individual tax advisers with regard to the application of PRC tax laws to their particular situations as well as any tax consequences arising under the laws of any other tax jurisdictions. The value of the Holder's investment in Notes denominated in Renminbi may be materially and adversely affected if the Holder is required to pay PRC tax with respect to acquiring, holding or disposing of and receiving payments under those Notes.

4. Risks Relating to Green Bonds

The Issuers may decide to apply an amount equal to the net proceeds from any series of Notes issued under the Programme (each such series of Notes, a "**Green Bond**") specifically for projects and activities that promote green or environmental purposes (the "**Green Projects**") in accordance with a framework (the "**Green Finance Framework**") which further specifies the eligibility criteria for such Green Projects. For the avoidance of doubt, such Green Finance Framework is not, nor shall be deemed to be, incorporated in and/or

form part of this Prospectus and may be amended from time to time. The Final Terms for each Green Bond issued under the Programme and the Green Finance Framework will contain further information on the envisaged use of proceeds. The Green Finance Framework is available on the website of MBG (<https://group.mercedes-benz.com/investors/refinancing/green-finance/>). For the avoidance of doubt, such Green Finance Framework or any information contained in the aforementioned website is not incorporated in, and does not form part of, this Prospectus and has not been scrutinized or approved by the CSSF.

Green Bonds may not be a suitable investment for all investors seeking exposure to green assets. Prospective investors who intend to invest in Green Bonds must determine for themselves the relevance of the information in this Prospectus (in particular, regarding the reasons for the offer and the use of proceeds) for the purpose of any investment in the Green Bonds together with any other investigation such investors deem necessary. In particular, no assurance is given by the Issuers, the Arranger or any of the Dealers that the use of proceeds of the Green Bonds will meet or continue to meet on an ongoing basis any or all investor expectations regarding investment in "green bond", "green" or "sustainable" or similarly labelled projects.

Furthermore, it should be noted that the definition (legal, regulatory or otherwise) of, and market consensus as to what constitutes, or may be classified as a "green" or "sustainable" or an equivalently-labelled project is currently under development. In addition, it is an area which has been, and continues to be, the subject of many and wide-ranging voluntary and regulatory initiatives to develop rules, guidelines, standards, taxonomies and objectives. For example, at the European level, Regulation (EU) 2020/852 of the European Parliament and of the Council of June 18, 2020 on the establishment of a framework to facilitate sustainable investment, and amending Regulation (EU) 2019/2088 (the "**Taxonomy Regulation**") entered into force on July 18, 2020 and applies in part from January 1, 2022 and in whole from January 1, 2023. The Taxonomy Regulation empowers the European Commission to adopt delegated acts and to establish technical screening criteria to specify the requirements set out in the Taxonomy Regulation. Furthermore, on July 6, 2021, the European Commission published a proposal for a Regulation of the European Parliament and of the Council on European green bonds that intends to create a voluntary standard for bonds financing sustainable investment (the "**European Green Bond Standard**"). The proposed regulation lays down uniform requirements for issuers of bonds that wish to use the designation "European green bond" or "EuGB" for their environmentally sustainable bonds. The proposed European Green Bond Standard will use the definitions set out in the Taxonomy Regulation and the delegated acts to define what is considered to be a green investment. The Green Bonds of the Issuers may not be eligible to use the designation of "European green bond" or "EuGB". Neither any of the Issuers nor the Arranger nor any of the Dealers is under any obligation to take steps to have any Green Bonds become eligible for such designation.

While it is the intention of the Issuers and the Guarantor to apply an amount equal to the net proceeds of such Green Bonds specifically for a portfolio of Green Projects as described in the Green Finance Framework, there can be no assurance that the relevant project(s) or use(s) (including those the subject of, or related to, any Green Projects) will be capable of being implemented in or substantially in such manner and/or in accordance with any timing schedule and that accordingly such proceeds will be totally or partially disbursed for such project(s) or use(s). Any such event or failure by the Issuer will not constitute an event of default under the terms and conditions of any Green Bond.

In connection with the issue of Green Bonds, the Issuers may appoint one or more external provider(s) to provide a green evaluation (the "**Green Evaluation**"). The Green Evaluation is available on the website of MBG (<https://group.mercedes-benz.com/investors/refinancing/green-finance/>). For the avoidance of doubt, such Green Evaluation or any information contained in the aforementioned website is not incorporated in, and does not form part of, this Prospectus and has not been scrutinized or approved by the CSSF. Such Green Evaluation provides an opinion on certain environmental and related considerations and is not intended to address any credit, market or other aspects of an investment in Green Bonds including without limitation market price, marketability, investor preference or suitability of any security. Such Green Evaluation is a statement of opinion, not a statement of fact. Such Green Evaluation is not a recommendation to buy, sell or hold Green Bonds. No assurance is given that such Green Evaluation correctly assesses the potential

environmental impact of the issue of Green Bonds or the Issuers generally. Such Green Evaluation generally is only current as of the date it is released and may be updated, suspended or withdrawn by the relevant provider(s) at any time. Currently the providers of green evaluations are not subject to any specific regulatory regime or other regime or oversight. Prospective investors must determine for themselves the relevance of any Green Evaluation for the purpose of any investment in Green Bonds. In particular, no assurance or representation is made or given that any such Green Evaluation reflects any present or future requirements, investment criteria or guidelines which may apply to any investor or its investments. Holders of Green Bonds will have no recourse against the provider(s) of any Green Evaluation. In addition, it would not constitute an event of default under the terms and conditions of any Green Bond if the Issuer or the Guarantor (if applicable) were to fail to observe the provisions in the Final Terms for the Green Bonds relating to the use of proceeds of the Green Bonds or the Issuer's or the Guarantor's intentions as regards reporting. A negative change to, or a withdrawal of, any Green Evaluation may affect the value of the Green Bonds and may have consequences for certain investors with portfolio mandates to invest in green assets.

In the event that any of the Green Bonds are listed or admitted to trading on any dedicated "green", "environmental", "sustainable" or other similarly labelled segment of any stock exchange or securities market (whether or not regulated), or are included in any dedicated "green", "environmental", "sustainable" or other equivalently-labelled index, no representation or assurance is given by the Issuers, the Guarantor, the Arranger, the Dealers or any other person that such listing or admission, or inclusion in such index, satisfies any present or future investor expectations or requirements as regards any investment criteria or guidelines with which such investor or its investments are required to comply, whether by any present or future applicable law or regulations or by its own by-laws or other governing rules or investment portfolio mandates. Furthermore, it should be noted that the criteria for any such listings or admission to trading may vary from one stock exchange or securities market to another and also the criteria for inclusion in such index may vary from one index to another. No representation or assurance is given or made by the Issuers, the Guarantor (if applicable), the Arranger, the Dealers or any other person that any such listing or admission to trading, or inclusion in any such index, will be obtained in respect of Green Bonds or, if obtained, that any such listing or admission to trading, or inclusion in such index, will be maintained during the life of Green Bonds.

Additionally, no representation or assurance is given by the Issuers, the Guarantor (if applicable), the Arranger, the Dealers or any other person as to the suitability of Green Bonds to fulfil environmental and sustainability criteria required by prospective investors. Neither the Issuers nor the Guarantor (if applicable), nor the Arranger, nor any of the Dealers is responsible for any third party assessment of the Green Bonds. Nor is the Arranger nor any Dealer responsible for (i) any assessment of Green Bonds, or (ii) the monitoring of the use of proceeds.

Any failure to apply the proceeds of Green Bonds as set out in the Final Terms for an issue of Green Bonds and/or negative change to, or withdrawal or suspension of, any Green Evaluation and/or listing or admission to trading on any stock exchange or securities market as aforesaid may have a material adverse effect on the value of Green Bonds and/or result in adverse consequences for certain investors with portfolio mandates to invest in securities to be used for a particular purpose.

5. Other Related Risks

The Notes may not be a Suitable Investment for all Investors

The Notes to be issued under the Programme may not be a suitable investment for all investors. Therefore, each potential investor in Notes must determine the suitability of that investment in light of its own circumstances. In particular, each potential investor should:

- (i) have sufficient knowledge and experience to make a meaningful evaluation of the relevant Notes, the merits and risks of investing in the relevant Notes and the information contained or incorporated by reference in this Prospectus or any applicable supplement hereto;

- (ii) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation and the investment(s) it is considering, an investment in the Notes and the impact the Notes will have on its overall investment portfolio;
- (iii) have sufficient financial resources and liquidity to bear all of the risks of an investment in the relevant Notes, including where the currency for principal or interest payments is different from the potential investor's currency;
- (iv) understand thoroughly the terms of the relevant Notes and be familiar with the behavior of any relevant indices and financial markets; and
- (v) be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

Sophisticated institutional investors generally do not purchase financial instruments as stand-alone investments. They purchase financial instruments as a way to reduce risk or enhance yield with an understood, measured, appropriate addition of risk to their overall portfolio. A potential investor should not invest in the Notes unless it has the expertise (either alone or with a financial adviser) to evaluate how the Notes will perform under changing conditions, the resulting effects on the value of the Notes and the impact this investment will have on the potential investor's overall investment portfolio.

Credit Ratings May not Reflect All Risks Associated with an Investment in the Notes

Notes to be issued under the Programme may be rated or unrated. Where a Tranche of Notes is rated, such rating will not necessarily be the same as the rating assigned to other debt securities issued by the Issuer. In addition, the rating may not reflect the potential impact of all risks relating to structure, market and other factors that may affect the value of the Notes. A credit rating is not a recommendation to buy, sell or hold securities and may be revised, suspended or withdrawn by the rating agency at any time. Any ratings assigned to debt securities of the Issuer as at the date of this Prospectus are not indicative of the future performance of the Issuer's business or its future creditworthiness.

In general, European regulated investors are restricted under the Regulation (EC) No 1060/2009 of the European Parliament and of the Council of September 16, 2009 on credit rating agencies, as amended, (the "**CRA Regulation**") from using credit ratings for regulatory purposes, unless such ratings are issued by a credit rating agency established in the EU and registered under the CRA Regulation (and such registration has not been withdrawn or suspended, subject to transitional provisions that apply in certain circumstances). Such general restriction will also apply in the case of credit ratings issued by non-EU credit rating agencies, unless the relevant credit ratings are endorsed by an EU-registered credit rating agency or the relevant non-EU rating agency is certified in accordance with the CRA Regulation (and such endorsement action or certification, as the case may be, has not been withdrawn or suspended, subject to transitional provisions that apply in certain circumstances). If the status of the rating agency rating the Notes changes, European regulated investors may no longer be able to use the rating for regulatory purposes and the Notes may have a different regulatory treatment. This may result in European regulated investors selling the Notes which may impact the value of the Notes and any secondary market. The list of registered and certified rating agencies published by the European Securities and Markets Authority ("**ESMA**") on its website in accordance with the CRA Regulation is not conclusive evidence of the status of the relevant rating agency included in such list, as there may be delays between certain supervisory measures being taken against a relevant rating agency and the publication of the updated ESMA list.

In addition, UK regulated investors are, in general, restricted under the CRA Regulation as it forms part of the domestic law of the UK by virtue of the EUWA (the "**UK CRA Regulation**") from using credit ratings for regulatory purposes, unless such ratings are issued by a credit rating agency established in the UK and registered under the UK CRA Regulation (and such registration has not been withdrawn or suspended). Such

general restriction will also apply in the case of credit ratings issued by non-UK credit rating agencies, unless the relevant credit ratings are endorsed by a UK credit rating agency or the relevant non-UK registered credit rating agency is certified in accordance with the UK CRA Regulation (and such endorsement action or certification, as the case may be, has not been withdrawn or suspended).

Interests of Natural and Legal Persons Involved in the Issue or the Offer

Certain of the Dealers and/or their affiliates have engaged, and may in the future engage, in investment banking and/or commercial banking transactions with, and may perform services for, the Issuer and the Guarantor (if applicable) in the ordinary course of business. In addition, in the ordinary course of their business activities, these Dealers and/or their affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers. Such investments and securities activities may involve securities and/or instruments of the Issuer or the Guarantor (if applicable). Certain of the Dealers and/or their affiliates that have a lending relationship with the Issuer or the Guarantor (if applicable) routinely hedge their credit exposure to the Issuer or the Guarantor (if applicable) consistent with their customary risk management policies. Typically, such Dealers and/or their affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in securities, including potentially the Notes. Any such short positions could adversely affect future trading prices of the Notes. The Dealers and their affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

FORM OF THE NOTES

Each Tranche of Notes will initially be in the form of either a temporary global bearer note (the "**Temporary Global Note**"), without interest coupons, or a permanent global bearer note (the "**Permanent Global Note**" and, together with the Temporary Global Note, the "**Global Notes**"), without interest coupons, in each case as specified in the relevant Final Terms, which will be delivered on or prior to the issue date of such Tranche to a (common) depository of Clearstream Banking S.A. ("**CBL**") and/or Euroclear Bank SA/NV ("**Euroclear**") or to Clearstream Banking AG ("**CBF**" and, together with CBL and Euroclear, the "**Clearing Systems**" and, each, a "**Clearing System**").

Each Global Note issued will be kept in custody by or on behalf of the relevant Clearing System that maintains a book-entry system for transfers of interest in the Global Note until all obligations thereunder have been satisfied. Definitive Notes and coupons will not be issued.

The relevant Final Terms will specify whether United States Treasury Regulation § 1.163-5(c)(2)(i)(C) or any successor provision in substantially similar form (the "**TEFRA C Rules**" or "**TEFRA C**") or United States Treasury Regulation § 1.163-5(c)(2)(i)(D) or any successor provision in substantially similar form (the "**TEFRA D Rules**" or "**TEFRA D**") are applicable in relation to the Notes or that neither the TEFRA C Rules nor the TEFRA D Rules are applicable. Each Tranche of Notes for which the relevant Final Terms specify TEFRA C will be represented by a Permanent Global Note, each Tranche of Notes for which the relevant Final Terms specify TEFRA D will initially be represented by a Temporary Global Note exchangeable for a Permanent Global Note and each Tranche of Notes for which the relevant Final Terms specify that neither the TEFRA C Rules nor the TEFRA D Rules are applicable will be represented by a Permanent Global Note.

It is the intention of DFNA that each Tranche of Notes issued by DFNA (the "**U.S. Notes**") will be treated as "immobilized" and issued in registered form for U.S. federal income tax purposes. Each U.S. Note will be represented by a Global Note (the "**U.S. Global Note**"). U.S. Global Notes will only be issued to CBF pursuant to a book-entry registration agreement (the "**Book-Entry Registration Agreement**"). CBF will hold the U.S. Global Notes in custody for the holders of interests in the U.S. Notes until all obligations of DFNA under the U.S. Notes have been satisfied. CBF and DFNA will provide a certified copy of a U.S. Global Note to any holder of an interest in such U.S. Global Note upon request. Such copy shall not itself be an enforceable bearer instrument.

Payment of interest on the U.S. Notes will be made only after delivery of a properly completed U.S. Internal Revenue Service (IRS) form certifying that the holder is a non-United States person and demonstrating a complete exemption from withholding taxes pursuant to Sections 1471 through 1474 of the U.S. Internal Revenue Code of 1986 in respect of interest payments.

Temporary Global Note Exchangeable for Permanent Global Note

If the relevant Final Terms specify the form of the Notes as being "Temporary Global Note exchangeable for Permanent Global Note", the Notes will initially be in the form of a Temporary Global Note, without interest coupons, which will be exchangeable for interests in a Permanent Global Note, without interest coupons, not earlier than 40 days (or later than 180 days) after the issue date of the relevant Tranche of the Notes (the "**Exchange Date**") upon certification as to non-U.S. beneficial ownership. No payments of principal, interest or any other amounts will be made under the Temporary Global Note prior to such certification of non-U.S. beneficial ownership having been received by the relevant Clearing System and such Clearing System having given a like certification (based on the certifications it has received) to the Issuing Agent.

Whenever any interest in the Temporary Global Note is to be exchanged for an interest in a Permanent Global Note, the Issuer shall procure (in the case of first exchange) the prompt delivery (free of charge to the bearer) of such Permanent Global Note to the bearer of the Temporary Global Note or (in the case of any subsequent

exchange) an increase in the principal amount of the Permanent Global Note in accordance with its terms against:

- (i) presentation and (in the case of final exchange) surrender of the Temporary Global Note at the specified office of the Issuing Agent; and
- (ii) receipt by the Issuing Agent of a certificate or certificates of non-U.S. beneficial ownership.

The principal amount of the Permanent Global Note shall be equal to the aggregate of the principal amounts specified in the certificates of non-U.S. beneficial ownership; provided, however, that in no circumstances shall the principal amount of the Permanent Global Note exceed the initial principal amount of the Temporary Global Note. Payments of principal, interest (if any) or any other amounts on a Permanent Global Note will be made through the relevant Clearing System (against presentation or surrender (as the case may be) of the Permanent Global Note) without any requirement for certification.

Terms and Conditions of the Notes Applicable to the Notes

The Terms and Conditions of the Notes applicable to any Global Note will be attached to such Global Note, as more fully described in the section entitled "*Issue Procedures*".

Legend Concerning United States Persons

In the case of a Tranche issued in accordance with TEFRA C or TEFRA D, any Global Note will bear a legend to the following effect:

"ANY UNITED STATES PERSON WHO HOLDS THIS OBLIGATION WILL BE SUBJECT TO LIMITATIONS UNDER THE UNITED STATES INCOME TAX LAWS, INCLUDING THE LIMITATIONS PROVIDED IN SECTIONS 165(j) AND 1287(a) OF THE INTERNAL REVENUE CODE."

The sections referred to provide that United States Holders, with certain exceptions, will not be entitled to deduct any loss on a Note and will not be entitled to capital gains treatment of any gain on any sale, disposition, redemption or payment of principal in respect of such Note.

ISSUE PROCEDURES

General

The Issuer and the relevant Dealer will agree on the terms and conditions applicable to each particular Tranche of Notes (the "**Conditions**"). These Conditions will be constituted by the relevant set of terms and conditions set out in the section entitled "*Terms and Conditions of the Notes*" (the "**Terms and Conditions**") as completed by the Final Terms (the "**Final Terms**") as described below.

Sets of Terms and Conditions

A separate set of Terms and Conditions shall apply to each type of Notes, as set out below. The Final Terms shall provide for the Issuer to choose among the following Options:

Option I - Terms and Conditions for Notes with fixed interest rates; and

Option II - Terms and Conditions for Notes with floating interest rates.

Documentation of the Conditions

The Issuer shall document the Conditions in any of the following ways:

- The Final Terms shall determine whether Option I or Option II and whether certain further options contained in Option I or Option II shall be applicable to the individual issue of Notes by replicating the relevant provisions of, and completing the relevant placeholders set out in, Option I or Option II in the Final Terms. The replicated and completed provisions of the set of Terms and Conditions alone shall constitute the Conditions (the "**Integrated Conditions**"). The Integrated Conditions shall be attached to each global note representing the Notes of the relevant Tranche. The Issuer shall document the Conditions in this way if the Notes shall be offered, in whole or in part, or initially distributed, in whole or in part, to non-qualified investors.
- Alternatively, the Final Terms shall determine whether Option I or Option II and whether certain further options contained in Option I or Option II shall be applicable to the individual issue of Notes by making reference to the specific sections of the relevant set of Terms and Conditions. The Final Terms and the relevant set of Terms and Conditions (the "**Long-form Conditions**"), taken together, shall constitute the Conditions. The Final Terms and the Long-form Conditions shall be attached to each global note representing the Notes of the relevant Tranche. The Issuer shall document the Conditions in this way if Notes with a minimum denomination of at least Euro 100,000 or its foreign currency equivalent at the time of issue will be issued.

Determination of Options / Completion of Placeholders

The Final Terms shall determine whether Option I or Option II shall be applicable to the individual issue of Notes. Each set of Terms and Conditions constituting Option I or Option II contains certain further options (characterised by indicating the respective optional provision through instructions and explanatory notes set out in square brackets within the text of the relevant set of Terms and Conditions as set out in this Prospectus) as well as placeholders (characterised by square brackets which include the relevant items) which shall be determined by the Final Terms as follows:

Determination of Options

The Issuer shall determine which options shall be applicable to the individual issue of Notes by either replicating the relevant provisions in the Final Terms or by making reference in the Final Terms to the relevant sections of

the relevant set of Terms and Conditions. If the Final Terms do not replicate or make reference to an alternative or optional provision (as set out in the relevant set of Terms and Conditions) such provision shall be deemed to have been deleted from the Conditions.

Completion of Placeholders

The Final Terms shall specify the information completing the placeholders in the relevant set of Terms and Conditions. In case the provisions of the Final Terms and the relevant set of Terms and Conditions, taken together, shall constitute the Conditions the relevant set of Terms and Conditions shall be deemed to have been completed by the information contained in the Final Terms as if such information were inserted in the placeholders of such provisions.

In that case, all instructions and explanatory notes and text set out in square brackets in the relevant set of Terms and Conditions and any footnotes and explanatory text set out in the Final Terms shall be deemed to have been deleted from the Conditions.

Binding Language

The Terms and Conditions have been prepared in the German and the English language. The following shall apply with regard to the language in which the Conditions shall be prepared:

- In the case of Notes which shall be (i) offered, in whole or in part, or (ii) initially distributed, in whole or in part, to non-qualified investors, German will be the binding language. If, in the event of such public offer or distribution to non-qualified investors, however, English is chosen as the binding language, a German language translation of the Conditions shall be either set out in the relevant Final Terms or be available from the principal offices of the Issuing Agent and the Issuer as specified at the back of this Prospectus.
- In other cases the Issuer shall elect either German or English to be the binding language.

FORM OF THE FINAL TERMS MUSTER DER ENDGÜLTIGEN BEDINGUNGEN

Set out below is the form of Final Terms which will be completed for each Tranche of Notes to be issued under the Programme.

Portfolio Changes

On March 9, 2021, BMW Group and Daimler Mobility AG announced that they would be selling their joint venture PARK NOW Group to EasyPark Group. After the authorities gave their approval, the transaction was concluded on June 1, 2021.

It was announced on May 25, 2021 that Mercedes-Benz has become the first car manufacturer to participate in the Swedish start-up H2 Green Steel (H2GS), in order to use CO2-free steel in series-produced vehicles.

As announced on September 24, 2021, Mercedes-Benz has acquired an interest in the European battery-cell manufacturer Automotive Cells Company SE ("**ACC**") in order to promote the development and production of next-generation high-performance battery cells and modules. Together with its partners Stellantis and TotalEnergies, Mercedes-Benz intends to accelerate the development of ACC to achieve sustainable cell technology, competitive costs and a cell capacity of at least 120 gigawatt-hours by the end of this decade. The partners plan to build eight cell factories worldwide, of which four will be located in Europe.

Mercedes-Benz AG entered into a development cooperation with NVIDIA Corporation, Santa Clara, California, United States, in November 2021. The goal of the development cooperation is to develop one of the most advanced computer and software architectures in the automotive industry for use in Mercedes-Benz model series. This new architecture will enable future vehicles to be equipped with automated driving and parking functions starting in 2024.

Spin-Off of Daimler Truck

On February 3, 2021, Daimler's Supervisory Board and Board of Management decided to evaluate the spin-off of the truck and bus business and to start preparations for an initial public offering of shares in Daimler Trucks & Buses including significant parts (but less than a majority) of the assets and liabilities of the Daimler Mobility division (together, "**Daimler Truck**").

On August 17, 2021, DAG published the convocation (invitation) for an extraordinary general meeting of its shareholders, to be held on October 1, 2021 (the "**Extraordinary General Meeting**"). In this Extraordinary General Meeting, the shareholders of DAG approved the spin-off and hive-down of Daimler Truck from Daimler's commercial vehicle business and the subsequent listing of Daimler Truck Holding AG as an independent company on the Frankfurt Stock Exchange with 99.90 % of the capital stock represented for the resolution, and the renaming of DAG as "Mercedes-Benz Group AG" effective as of February 1, 2022 with 99.89 % of the capital stock represented for the resolution. This transaction included: (i) the spin-off of a majority interest of 65.00 % in the (increased) share capital of Daimler Truck AG as well as of the control and profit and loss transfer agreement existing between DAG and Daimler Truck AG to Daimler Truck Holding AG, as a result of which the shareholders of DAG received shares of Daimler Truck Holding AG in addition to their DAG shares; (ii) the hive-down by DAG of shares in Daimler Truck AG to Daimler Truck Holding AG against the issuance of new shares in Daimler Truck Holding AG to DAG; and (iii) the contribution by Daimler Verwaltungsgesellschaft für Grundbesitz mbH ("**Daimler Grund**") of its shares in Daimler Truck AG (received as consideration for contributing several real estate management partnerships which are attributable to the Trucks & Buses division into Daimler Truck Holding AG), immediately in connection with the spin-off and hive-down.

Following the implementation of the three aforementioned steps on December 9, 2021, DAG held 35.00 % in the share capital of Daimler Truck Holding AG, thereof 28.43 % directly (as a consequence of the spin-off as per step (i) above) and 6.57 % indirectly, via Daimler Grund (as a consequence of the contribution in kind as per step (iii) above), with the remaining 65.00 % being held by the existing shareholders of DAG in addition to their unchanged shareholding in DAG. Out of its shareholding, DAG intended to transfer a shareholding in Daimler Truck Holding AG of 5 % to Daimler Pension Trust e.V. Both the spin-off and the hive-down have become effective upon registration in the commercial register of DAG on December 9, 2021. The shareholders

of DAG participated in Daimler Truck Holding AG, which has been listed on the stock exchange since December 10, 2021. The activities that were spun-off and hived-down were deconsolidated as of December 9, 2021. In January 2022, about 5% of the shares of Daimler Truck Holding AG were transferred to Daimler Pension Trust e.V. and contributed to the pension-plan assets. As of March 31, 2022, as a result of the transaction, Mercedes-Benz Group holds a minority interest of about 30 % in Daimler Truck Holding AG.

As agreed between DAG and Daimler Truck Holding AG in the Demerger Agreement (as defined below), the transfer of the assets to be spun off and hived down was made with effect as of January 1, 2021, 0:00 a.m. CET.

The basis of the spin-off and hive-down is the spin-off and hive-down agreement dated August 6, 2021 and concluded between DAG and Daimler Truck Holding AG, which was approved by the aforementioned Extraordinary General Meeting of DAG (the "**Demerger Agreement**"). In connection with the Extraordinary General Meeting, DAG published the joint spin-off and hive-down report of the board of management of DAG and the board of management of Daimler Truck Holding AG (the "**Demerger Report**") as well as the Demerger Agreement.

Immediately upon the consummation of the Demerger Agreement, as of December 10, 2021, all shares of Daimler Truck Holding AG were admitted for trading on the regulated market of the Frankfurt Stock Exchange and additionally on the sub-segment of the regulated market of the Frankfurt Stock Exchange with additional post-admission obligations (Prime Standard).

The Demerger Report contains, *inter alia*, the following sections:

Financing

As a consequence of the spin-off, the financial liabilities existing towards DAG and companies of the new Daimler Group (the Daimler Group without the companies of the New Daimler Truck Group (as defined below) hereinafter referred to as the "**New Daimler Group**") will be settled by Daimler Truck AG and the companies of the new Daimler Truck Group (Daimler Truck Holding AG with its direct and indirect subsidiaries existing after the spin-off hereinafter referred to as the "**New Daimler Truck Group**") and, if necessary, have been or will be replaced by external financing or financing within the New Daimler Truck Group.

Separation of Group-Wide Securities and Guarantees

For the separation of the commercial vehicles business, Daimler Group's suretyships, guarantees, letters of comfort and other declarations of indemnity (hereinafter collectively referred to as "**Guarantees**") have been or will be replaced by new and essentially equivalent guarantees issued by the companies of the New Daimler Truck Group. With respect to the financial guarantees, DAG's global Guarantees and the individual financial Guarantees of DAG have been or will be replaced by corresponding global guarantees or individual guarantees of Daimler Truck AG and Daimler Truck Holding AG, who will be jointly and severally liable thereunder. As of the spin-off taking effect, no new financial guarantees and operational guarantees have been or will be issued by DAG or the companies of the New Daimler Group to secure obligations of the companies of the New Daimler Truck Group. However, to the extent that the existing Guarantees issued by the Daimler Group cannot be successfully replaced by the New Daimler Truck Group, there is a risk that the New Daimler Group will continue to be liable for obligations of the commercial vehicles business until the relevant Guarantees issued by the Daimler Group expire, which could adversely impact the New Daimler Group's financial results or financial condition.

Deconsolidation

Due to the (direct and indirect) minority shareholding of DAG in Daimler Truck Holding AG, it cannot be excluded that DAG (directly and indirectly) will have a majority presence in the shareholders' meeting of

Daimler Truck Holding AG. In order to ensure the independence of Daimler Truck Holding AG, DAG and Daimler Grund, on the one hand, and Daimler Truck Holding AG, on the other hand, have entered into a deconsolidation agreement on August 6, 2021. This ensures that Daimler Truck Holding AG can operate in the market as an independent company and be perceived as such.

Principal Investments

Investment in property, plant and equipment

A main feature of investment in property, plant and equipment at the Mercedes-Benz Cars segment ("**Mercedes-Benz Cars**") will be the start of production of battery-electric vehicles on the EVA2 platform and of the new GLC model. In addition, Mercedes-Benz Cars will push ahead with investment in alternative drive systems. Investment in property, plant and equipment at Mercedes-Benz Cars is expected to increase slightly compared to the year 2021.

The Mercedes-Benz Vans segment ("**Mercedes-Benz Vans**") anticipates a significant increase in investment in property, plant and equipment in 2022, as the investment in property, plant and equipment at Mercedes-Benz Vans was rather low in the year 2021. This increase will be primarily driven by the transition to a fully electric Mercedes-Benz van fleet in the next generation, as well as "green" investments with the goal of CO₂ neutrality. MBG also continues to move ahead with digitalization at Mercedes-Benz Vans in order to develop additional profitable business models.

Investments and expenditure on research and development

MBG's research and development expenditure amounted to €9.1 billion in 2021 and was thus slightly higher than in the previous year (2020: €8.6 billion). This amount corresponds to the forecast for the year published in the DAG Annual Report 2020. €2.4 billion (2020: €2.5 billion) of the development costs were capitalized, which represents a capitalization rate of 27% (2020: 29%). The amortization of capitalized research and development expenditure totalled €2.1 billion during the year 2021 (2020: €1.9 billion). Research and development expenditure at Mercedes-Benz Cars and Mercedes-Benz Vans amounted to €7.7 billion (2020: €7.2 billion) and was thus slightly higher than in the year 2020. The focus was on topics such as the next generation of electric vehicles and battery production. In addition, MBG intensified its research and development expenditure for digitalization and automated driving. Research and development expenditure amounted to €7.2 billion at Mercedes-Benz Cars and €0.5 billion at Mercedes-Benz Vans.

At Mercedes-Benz Cars, a large proportion of the research and development expenditure flows into the areas of digitalization, automated driving and electric drive systems. In addition, MBG is investing in the renewal of the product portfolio on the basis of the new MMA (Mercedes-Benz Modular Architecture) and AMG.EA (AMG Electric Architecture) platforms. Research and development expenditure is expected to increase slightly in the 2022 financial year.

MBG is also pushing ahead with the renewal and expansion of the product portfolio at Mercedes-Benz Vans. The topics of digitalization, automated driving and electric drive systems are at the focus of its activities.

Refinancing Measures

The funds raised by Mercedes-Benz in the year 2020 and in the year 2021 primarily served to refinance the leasing and sales-financing business. For that purpose, Mercedes-Benz made use of a broad spectrum of various financing instruments in various currencies and markets. They include bank loans, commercial paper in the money market, bonds with medium and long maturities, promissory-note loans, customer deposits at Mercedes-Benz Bank, and the securitization of receivables from customers in the financial services business (asset-backed securities).

The Audit Committee of MBG (the "**Audit Committee**") is composed of four members, who are elected by a majority of the votes cast on the relevant resolution of the Supervisory Board. The Chairman of the Supervisory Board is not simultaneously the Chairman of the Audit Committee.

Both the Chairman of the Audit Committee, Olaf Koch, and the other shareholder representative on the Audit Committee, Timotheus Höttges, fulfill the criteria for independence and have expertise in the field of financial reporting, as well as special knowledge and experience in the application of accounting principles and methods of internal control.

Current members of the Audit Committee are:

Olaf Koch – Chairman
Michael Brecht – Representative of the employees
Timotheus Höttges
Ergun Lümalı – Representative of the employees

The Audit Committee deals with the supervision of the accounting and its process as well as with the annual audit. At least once a year, it discusses with the Board of Management the effectiveness and functionality of the internal control and risk management system, the internal auditing system and the compliance management system. It regularly receives reports on the work of the Internal Auditing department and the Compliance Organization. At least four times a year, the Audit Committee receives a report from the whistleblower system BPO (Business Practices Office) on complaints and information about any breaches of regulations or guidelines by high-level executives, as well as violations by other employees of the regulations in a defined catalog of legal provisions. It regularly receives information about the handling of these complaints and

notifications. The Audit Committee discusses with the Board of Management the interim reports before they are published. On the basis of the report of the external auditors, the Audit Committee reviews the annual financial statements of MBG and the annual consolidated financial statements of the Group, as well as the management reports of MBG and the Group, and discusses them with the external auditors. The Audit Committee makes a proposal to the Supervisory Board on the adoption of the annual financial statements of MBG, on the approval of the annual consolidated financial statements of the Group, and on the appropriation of profits. The Audit Committee also makes recommendations for the Supervisory Board's proposal on the election of external auditors, assesses those auditors' suitability, qualifications and independence, and, after the external auditors are elected by the Annual Shareholders' Meeting, it engages them to conduct the audit of the financial statements of MBG and the annual consolidated financial statements of the Group and to review the interim reports, negotiates an audit fee, and determines the focus of the annual audit. The external auditors report to the Audit Committee on all accounting matters that might be regarded as critical and on any material weaknesses of the internal control and risk management system with regard to accounting that might be discovered during the audit. Finally, the Audit Committee approves in advance permitted services that are not directly related to the annual audit and which are provided by the firm of external auditors or its affiliates to MBG or to companies of the Mercedes-Benz Group.

Corporate Governance

Declaration (the "Declaration") by the Board of Management and the Supervisory Board of MBG pursuant to Section 161 of the German Stock Corporation Act (AktG) regarding the German Corporate Governance Code

In December 2021, Daimler AG (now: Mercedes-Benz Group AG) declared that Daimler AG complies with the recommendations of the German Corporate Governance Code as amended on December 16, 2019 and published in the official section of the German Federal Gazette on March 20, 2020, with the exception of Recommendations C.4 and C.5 (Maximum number of mandates of Supervisory Board), and Recommendations G.8 and G.12 (Subsequent change of targets and comparison parameters of variable remuneration components of the Board of Management) and has complied with the recommendations, with the exceptions mentioned, since issuing the last Declaration of Compliance in July 2021. Daimler AG shall continue to comply with the recommendations in the future, subject to the aforesaid deviations.

Maximum number of Supervisory Board Mandates (C.4 and C.5). According to Recommendation C.4, Supervisory Board members who are not members of any Management Board of a listed company shall not accept more than a total of five Supervisory Board Mandates in non-group listed companies or comparable functions, whereby a mandate as Supervisory Board Chair counts twice. According to Recommendation C.5, members of the Management Board of listed companies shall not have a total of more than two Supervisory Board Mandates in non-group listed companies or comparable functions, and shall not accept Chairmanship of a Supervisory Board in a non-group listed company. Whether the number of mandates held by members of the Management Boards and Supervisory Boards of listed companies still appears to be appropriate is to be assessed more appropriately on a case-by-case basis than by a rigid upper limit. The individual workload expected of a member of the Management Board as a result of the total number of mandates held does not necessarily increase in proportion to their number.

Targets and comparison parameters of variable components of the remuneration of the Board of Management (G.8 and G.12). According to Recommendation G.8, subsequent changes to the target values or comparison parameters of the Management Board remuneration shall be excluded. According to Recommendation G.12, if the contract of a Management Board member is terminated, the disbursement of any remaining variable remuneration components attributable to the period up to the contract termination are to be based, among others, on the originally agreed targets and comparison parameters. On October 1, 2021, the Extraordinary Shareholders' Meeting of Daimler AG approved the spin-off of a majority interest in Daimler Truck AG. The spin-off comes into effect with the registration in the Commercial Register of Daimler AG. Consequently, the commercial vehicle business is separated from the Daimler Group. The effects of the spin-off of a significant

part of the company are not reflected in the target values and comparison parameters for the annual bonus (short-term and medium-term variable remuneration component) and the performance phantom share plans (long-term variable remuneration component). That is why the target values and comparison parameters for the annual bonuses and performance phantom share plans that are not yet due as of the effective date of the spin-off must be adjusted. This also applies with regard to any member of the Management Board who leaves the company on the occasion of the spin-off and to their variable remuneration components that are still outstanding at the time of his/her departure.

Product-related litigation involves claims alleging faults in vehicles. Some of these claims are asserted by way of class actions. If the outcome of such legal proceedings is detrimental to Mercedes-Benz or such legal proceedings are settled, the Group may be required to pay substantial compensatory and punitive damages or to undertake service actions, recall campaigns, monetary penalties or other costly actions, which would adversely affect the earnings of the Group. Legal proceedings and related settlements may have an impact on the Group's reputation.

Up until the effective date of the spin-off of a majority interest in Daimler Truck AG to Daimler Truck Holding AG on December 9, 2021, Daimler Truck AG and its consolidated subsidiaries (including its Truck & Bus companies) were group companies of Daimler AG (now: Mercedes-Benz Group AG). Insofar as risks resulting from the legal proceedings mentioned above materialize, and to the extent that the facts underlying such risks relate to the aforementioned Truck & Bus companies, Mercedes-Benz Group AG is entitled to indemnification claims. Such claims arise vis-à-vis Daimler Truck AG based on the hive-down of assets and liabilities of the former Daimler Trucks and Daimler Buses segments to Daimler Truck AG in 2019. Vis-à-vis Daimler Truck Holding AG, such claims arise from the spin-off of the majority interest in Daimler Truck AG to Daimler Truck Holding AG in 2021.

Diesel emission behavior: governmental proceedings

Several authorities and institutions worldwide were, and still are, active in the form of inquiries, investigations, procedures and/or orders. These activities particularly relate to test results, the emission control systems used in Mercedes-Benz diesel vehicles and/or the interactions of Mercedes-Benz with the relevant authorities as well as related legal issues and implications, including, but not limited to, under applicable environmental, criminal, consumer protection and antitrust laws.

In the United States, MBG and Mercedes-Benz USA, LLC ("MBUSA") reached agreements in the third quarter of 2020 with various authorities to settle civil environmental claims regarding the emission control systems of certain diesel vehicles which have become final and effective.

The authorities take the position that Mercedes-Benz failed to disclose Auxiliary Emission Control Devices ("AECs") in certain of its US diesel vehicles and that several of these AECs are illegal defeat devices. As part of these settlements, Mercedes-Benz denies the allegations by the authorities and does not admit liability, but has agreed to, among other things, pay civil penalties, conduct an emission modification programme for affected vehicles, and take other compliance measures. The failure to meet certain of those obligations may trigger additional stipulated penalties. Mercedes-Benz paid the civil penalties and provisions have been recognized for the emission modification programme and other measures.

In April 2016, the U.S. Department of Justice ("DOJ") requested that Mercedes-Benz conduct an internal investigation. Mercedes-Benz has conducted such internal investigation in cooperation with DOJ's investigation; the DOJ's investigation remains open. In addition, further US state authorities have opened investigations pursuant to both state environmental and consumer protection laws and have requested documents and information. In Canada, the Canadian environmental regulator Environment and Climate Change Canada ("ECCC") is conducting an investigation in connection with Diesel exhaust emissions based on the suspicion of potential violations of, among others, the Canadian Environmental Protection Act, as well as undisclosed AECs and defeat devices. Mercedes-Benz continues to cooperate with the investigating authorities.

In Germany, the Stuttgart public prosecutor's office issued a fine notice against Mercedes-Benz in September 2019 based on a negligent violation of supervisory duties which has become legally binding, thereby concluding the related administrative offense proceedings against Mercedes-Benz. The Stuttgart public prosecutor's office is still conducting criminal investigation proceedings against Mercedes-Benz employees on the suspicion of, among others, fraud. In July 2021, the local court (*Amtsgericht*) of Böblingen issued penal orders against three Mercedes-Benz employees based on, among others, fraud, which have become final.

Between 2018 and 2020, the German Federal Motor Transport Authority ("KBA") issued subsequent auxiliary provisions for the EC type approvals of certain Mercedes-Benz diesel vehicles, and ordered mandatory recalls as well as, in some cases, stops of the first registration. In each of those cases, it held that certain calibrations of specified functionalities are to be qualified as impermissible defeat devices. Mercedes-Benz has a contrary legal opinion on this question. Since 2018, however, Mercedes-Benz has (in view of the KBA's interpretation of the law as a precautionary measure) implemented a temporary delivery and registration stop with respect to certain models, also covering the used car, leasing and financing businesses, and is constantly reviewing whether it can lift this delivery and registration stop in whole or in part. Mercedes-Benz has filed timely objections against the KBA's administrative orders mentioned above. In early 2021, the KBA issued objection orders (*Widerspruchsbescheide*) in these proceedings, thereby not following the arguments brought forward by Mercedes-Benz. Since Mercedes-Benz continues to have a different understanding of the relevant legal provisions, it has filed lawsuits with the competent administrative court to have the controversial questions at issue clarified in a court of law. Irrespective of such objections and the lawsuits that are now pending, Mercedes-Benz continues to cooperate fully with the KBA. The new calibrations requested by the KBA have been developed by Mercedes-Benz and assessed and approved by the KBA; the related recalls have been initiated. It cannot be ruled out that under certain circumstances, software updates may have to be reworked, or further delivery and registration stops may be ordered or resolved by Mercedes-Benz as a precautionary measure, also with regard to the used car, leasing and financing businesses. In the course of its regular market supervision, the KBA is routinely conducting further reviews of Mercedes-Benz vehicles and is asking questions about technical elements of the vehicles. In addition, Mercedes-Benz continues to be in a dialogue with the German Ministry for Digital and Transport Infrastructure ("BMDV") to conclude the analysis of the diesel-related emissions matter and to further the update of affected customer vehicles. In light of the aforementioned administrative orders issued by the KBA and continued discussions with the KBA and the BMDV, it cannot be ruled out completely that additional administrative orders may be issued in the course of the ongoing and/or further investigations. Since September 1, 2020, this also applies to other responsible authorities of other Member States and the European Commission which conduct market surveillance under the new European Type Approval Regulation and can take measures upon assumed non-compliance,

irrespective of the place of the original type approval, and also to the British market surveillance authority DVSA (Driver and Vehicle Standards Agency).

In the course of its formal investigation into possible collusion on clean emission technology, the European Commission sent a statement of objections to Mercedes-Benz and other automobile manufacturers in April 2019. In this context, MBG had filed an application for immunity from fines (leniency application) with the European Commission some time ago. On July 8, 2021, the proceedings were closed by way of a settlement with the European Commission. During the entire proceedings, MBG cooperated closely with the European Commission, and the European Commission granted MBG complete immunity from fines.

In addition to the above-mentioned authorities, national cartel authorities and other authorities of various foreign States, the South Korean Ministry of Environment, the South Korean competition authority (Korea Fair Trade Commission) and the Seoul public prosecutor's office (South Korea) are conducting various investigations and/or procedures in connection with Diesel exhaust emissions.

Mercedes-Benz continues to fully cooperate with the responsible authorities and institutions.

Diesel emission behavior: consumer actions and other lawsuits in the United States, Canada, Germany and other states

In a consolidated class action against MBG and MBUSA before the US District Court for New Jersey, plaintiffs alleged that MBG and MBUSA used devices that impermissibly impair the effectiveness of emission control systems in reducing nitrogen-oxide (NO_x) emissions and which cause excessive emissions from vehicles with diesel engines. In addition, plaintiffs alleged that consumers were deliberately deceived in connection with the advertising of Mercedes-Benz diesel vehicles.

In the third quarter of 2020, MBG and MBUSA reached a settlement with plaintiffs' counsel of this consumer class action. As part of the settlement, MBG and MBUSA deny the material factual allegations and legal claims asserted by the class action plaintiffs, but have agreed to provide payments to certain current and former diesel vehicle owners and lessees. The relevant court has granted final approval of the settlement and issued a final judgment in the case. The estimated costs of the class action settlement amount to approximately USD 700 million. In addition, Mercedes-Benz estimates further expenses of a mid three-digit-million euro amount to fulfill the requirements of this settlement and the aforementioned settlements with the US authorities. Provisions have been recognized accordingly.

A consumer class action making similar allegations and seeking similar remedies as to vehicles sold or leased in Canada was filed against MBG and other Group companies in Ontario in April 2016. In the fourth quarter of 2021, Mercedes-Benz Group AG and the other Group companies reached a settlement with plaintiffs' counsel of the consumer class action. As part of the settlement, MBG and the other Group companies deny the material factual allegations and legal claims asserted by the class action plaintiffs, but have agreed to make payments to certain current and former diesel vehicle owners and lessees. The estimated costs of this settlement amount to approximately CAD 250 million (equivalent to approximately EUR 175 million).

In a separate lawsuit filed by the State of Arizona in January 2019, the plaintiff claims that, among others, MBG and MBUSA deliberately deceived consumers in connection with advertising Mercedes-Benz diesel vehicles. Consumer class actions containing similar allegations were filed against MBG and further Group companies in the United Kingdom since May 2020 as well as against MBG in Israel in February 2019. In a separate lawsuit filed by the Environmental Protection Commission of Hillsborough County, Florida in September 2020, the plaintiff claims that, among others, MBG and MBUSA violated municipal regulations prohibiting vehicle tampering and other conduct by using alleged devices claimed to impair the effectiveness of emissions control systems.

In Germany, a large number of customers of diesel vehicles have filed lawsuits for damages or rescission of sales contracts. They assert that the vehicles contained illegal defeat devices and/or showed impermissibly

high levels of emissions or fuel consumption. They refer to, in particular, the KBA's recall orders mentioned in the subsection set out above and entitled "*Diesel emission behavior: governmental proceedings*". Given the current development of case numbers, Mercedes-Benz expects a continued high number of lawsuits to be filed in this respect. In this context, the Federation of German Consumer Organizations (*Verbraucherzentrale Bundesverband e.V.*) filed a model declaratory action (*Musterfeststellungsklage*) against MBG with the Stuttgart Higher Regional Court (*Oberlandesgericht*) on July 7, 2021. Such action seeks a ruling that certain preconditions of alleged consumer claims are met.

Furthermore, a class action against MBG and other Group companies was filed in the Netherlands on June 23, 2020. The class action makes allegations comparable to the aforementioned US and Canadian class actions relating to all Euro 5 and 6 diesel vehicles sold in the EU between 2009 and 2019. The plaintiff, a foundation under the laws of the Netherlands, is representing Dutch claimants and seeks certification of an opt-out Netherlands class (Dutch claimants are participating in the class action by law). In the course of the proceedings, other claimants who bought such vehicles in the EU market have the option to declare participation in the class action (opt-in). Furthermore, the plaintiff is seeking declarations of law concerning the customers' entitlement to nullify or rescind their vehicle purchase contracts, to demand replacement of their vehicles and/or to demand damages.

After the extension of the deadline granted by court, two further foundations filed statements of claim in court on December 30, 2020. The court still has to determine the lead plaintiff.

In addition, a multitude of investors from Germany and abroad have filed lawsuits for damages with the Stuttgart Regional Court (*Landgericht*) alleging the violation of disclosure requirements (main proceedings) and also raised out-of-court claims for damages. The investors allege that Mercedes-Benz Group AG did not immediately disclose inside information in connection with the emission behavior of its diesel vehicles and that it had made false and misleading public statements. They further claim that the purchase price of the financial instruments acquired by them (in particular Daimler AG shares) would have been lower if Mercedes-Benz Group AG had complied with its disclosure obligations. In January 2021, the Stuttgart Regional Court (*Landgericht*) issued in the context of the main proceedings an order for reference (*Vorlagebeschluss*) to commence model case proceedings in accordance with the Act on Model Proceedings in Capital Markets Disputes (*KapMuG*) before the Stuttgart Higher Regional Court (*Oberlandesgericht*) (model case proceedings). The purpose of the model case proceedings is to reach a decision that is binding for the main proceedings regarding common factual and legal questions. The main proceedings before the Stuttgart Regional Court (*Landgericht*) will be suspended until a decision is reached on the questions submitted, insofar as they cannot be dismissed independently of the questions to be decided in the model case proceedings. The decision in the model case proceedings is binding for the suspended main proceedings. In December 2021, the Stuttgart Higher Regional Court (*Oberlandesgericht*) determined a model case plaintiff and announced the model case proceedings in the German register for model case proceedings. Thereafter, multiple investors used the possibility to register claims in a considerable amount with the model case proceedings in order to suspend the period of limitation.

Accounting assessment of the legal proceedings in connection with diesel emission behavior

With respect to the legal proceedings described in the two preceding chapters, in accordance with IAS 37.92 no further information is disclosed with respect to whether, or to what extent, provisions have been recognized and/or contingent liabilities have been disclosed, so as not to prejudice Mercedes-Benz' position. For recognized provisions, this does not apply to the extent any settlement has been reached or any proceeding has been concluded. A contingent liability from the class actions in the Netherlands cannot currently be measured.

Antitrust law proceedings (including actions for damages)

Starting in July 2017, a number of class actions were filed in the United States and Canada against MBG and other manufacturers of automobiles as well as various of their North American subsidiaries. Plaintiffs allege to have suffered damages because defendants engaged in anticompetitive behavior relating to vehicle

technology, costs, suppliers, markets, and other competitive attributes, including diesel emissions control technology, since the 1990s. All pending US class actions were centralized in one proceeding by the Judicial Panel on multidistrict litigation and transferred to the US District Court for the Northern District of California. In 2018, plaintiffs in the US antitrust class action amended and consolidated their complaints into two pleadings, one on behalf of consumers and the other on behalf of dealers.

On October 23, 2020, the court granted motions to dismiss the complaints in their entirety, with prejudice, ending the litigation in the US district court. On August 30, 2021, the consumer plaintiffs withdrew the appeal they had filed, ending their case. On October 26, 2021, the US Court of Appeals for the Ninth Circuit affirmed the dismissal of the dealer plaintiffs' claims.

In the course of its formal investigation into possible collusion on clean emission technology the European Commission sent a statement of objections to Mercedes-Benz and other automobile manufacturers in April 2019. In this context, MBG filed an application for immunity from fines (leniency application) with the European Commission some time ago. On July 8, 2021, the proceedings were closed by way of a settlement with the European Commission. During the entire proceedings, MBG cooperated closely with the European Commission, and the European Commission has granted MBG complete immunity from fines.

Following the settlement decision by the European Commission adopted on July 19, 2016, concluding the trucks antitrust proceedings, MBG and Daimler Truck AG are facing customers' claims for damages to a considerable degree. Respective legal actions, class actions and other forms of legal redress have been initiated in various states in and outside of Europe and should further be expected. MBG is entitled to indemnification claims against Daimler Truck Holding AG and Daimler Truck AG, should the aforementioned claims materialize.

Other legal proceedings

Class actions in connection with Takata airbags are pending in Canada, the United States, Israel and Argentina. The lawsuits are based on the allegation that, along with Takata entities and many other companies that sold vehicles equipped with Takata airbag inflators, Mercedes-Benz entities and others were allegedly negligent in selling such vehicles, purportedly not recalling them quickly enough, and failing to warn consumers about a potential defect and/or to provide an adequate replacement airbag inflator. One of the complaints in the United States also asserts claims by automotive recyclers who allege injury because they are not able to re-sell salvaged airbag inflators that are subject to the Takata recall. Contingent liabilities were disclosed to a low extent for this topic.

On October 18, 2021 a number of Australian Mercedes-Benz dealers lodged a claim against Mercedes-Benz Australia/Pacific Pty Ltd ("**MBAP**") with a Federal Court in Australia. They allege that MBAP forced the dealers to accept a change in their business model from a dealership model to an agency model and thus deprived them of the goodwill they created through their investments in the Australian Mercedes-Benz dealership network. They seek reinstatement of the dealership model or, alternatively, compensation for the damage they allegedly incurred.

Accounting estimates and management judgments relating to all legal proceedings

The Group recognizes provisions in connection with pending or threatened proceedings to the extent a loss is probable and can be reasonably estimated. Such provisions are recognized in the Group's consolidated financial statements and are based on estimates. If quantifiable, contingent liabilities in connection with legal proceedings are disclosed in the Group's consolidated financial statements. Risks resulting from legal proceedings sometimes cannot be assessed reliably or only to a limited extent. Consequently, provisions recognized for some legal proceedings may turn out to be insufficient once such proceedings have ended. The Group may also become liable for payments in legal proceedings for which no provisions were recognized and/or contingent liabilities were disclosed. Uncertainty exists with regard to the amounts or due dates of possible cash outflows.

Further information on legal proceedings

Further information on legal proceedings is provided in Note 24 (*Provisions for other risks*), Note 31 (*Legal proceedings*) and Note 32 (*Contingent liabilities and other financial obligations*) of the Notes to the Annual Consolidated Financial Statements 2021 of MBG incorporated by reference in this Prospectus.

10. Additional Information

Share Capital

MBG's capital stock consists of ordinary shares without par value (*Stückaktien*). The ordinary shares are issued in registered form. Under MBG's Articles of Incorporation, each ordinary share represents one vote. Major shareholders do not have different voting rights.

As at the date of this Prospectus, the share capital of MBG amounted to approximately €3,070 million divided in 1,069,837,447 registered ordinary shares of no par value. Each share represents a nominal value of approximately €2.87 of capital stock. The shares are fully paid.

11. Material Contracts

There are no material contracts that have been entered into in the ordinary course of MBG's business, which could result in any Group member being under an obligation or entitlement that is material to MBG's ability to meet its obligation to Holders in respect of the Notes to be issued under the Programme.

12. Ratings

MBG has received the following short-term and long-term ratings from DBRS Ratings GmbH ("**DBRS**"), Moody's Deutschland GmbH ("**Moody's**"), Scope Ratings GmbH ("**Scope**") and S&P Global Ratings Europe Limited ("**Standard & Poor's**").

Short-term ratings:

DBRS: R-1 (low)

Moody's: P-2

Scope: S-1

Standard & Poor's: A-2

Long-term ratings:

DBRS: A (low); outlook stable

Moody's: A3; outlook positive

Scope: A; outlook stable

Standard & Poor's: A-; outlook stable

For the purposes of DBRS ratings, an R-1 (low) rating means good credit quality. The capacity for the payment of short-term financial obligations as they fall due is substantial. Overall strength is not as favorable as higher rating categories. May be vulnerable to future events, but qualifying negative factors are considered manageable. An A (low) rating means good credit quality. The capacity for the payment of financial

obligations is substantial, but of lesser credit quality than AA. May be vulnerable to future events, but qualifying negative factors are considered manageable. All long-term rating categories other than AAA and D also contain subcategories "(high)" and "(low)". The absence of either a "(high)" or "(low)" designation indicates the rating is in the middle of the category. Rating trends provide guidance in respect of DBRS's opinion regarding the outlook for the rating in question, with rating trends falling into one of three categories - "Positive", "Stable" or "Negative". The rating trend indicates the direction in which DBRS considers the rating is headed should present tendencies continue, or in some cases, unless challenges are addressed. In general, the DBRS view is based primarily on an evaluation of the entity itself, but may also include consideration of the outlook for the industry or industries in which the entity operates.

For the purposes of Moody's ratings, a P-2 rating means that an issuer has a strong ability to repay short-term debt obligations. An A rating means that an obligation is judged to be upper-medium grade and is subject to low credit risk. Moody's appends numerical modifiers 1, 2 and 3 to each generic rating classification from Aa through Caa. The modifier 3 indicates a ranking in the lower range of that generic rating category. A Moody's rating outlook is an opinion regarding the likely direction of an issuer's rating over the medium term. Where assigned, rating outlooks fall into the following four categories: Positive, Negative, Stable, and Developing. A stable outlook indicates a low likelihood of a rating change over the medium term. A negative, positive or developing outlook indicates a higher likelihood of a rating change over the medium term. A rating committee that assigns an outlook of stable, negative, positive, or developing to an issuer's rating is also indicating its belief that the issuer's credit profile is consistent with the relevant rating level at that point in time. Moody's uses the watchlist to indicate that a rating is under review for possible change in the short-term. A rating can be placed on review for possible upgrade, on review for possible downgrade, or more rarely with direction uncertain. A credit is removed from the watchlist when the rating is upgraded, downgraded or confirmed.

For the purposes of Scope ratings, an S-1 rating reflects an opinion of very low credit risk with high capacity to repay short-term obligations. An A rating reflects an opinion of strong credit quality. Scope's long-term ratings are expressed with symbols from 'AAA to D', with '+' and '-' as additional sub-categories for each category from 'AA' to 'B' (inclusive), that is, 20 levels in total. A rating can be accompanied by a rating outlook, which can be 'Stable', 'Positive' or 'Negative'. The 'Positive' and 'Negative' outlooks normally refer to a time period of 12-18 months. These outlooks do not necessarily signal that rating upgrades or downgrades, respectively, will automatically follow.

For the purposes of Standard & Poor's ratings, an A-2 rating means that an obligor has satisfactory capacity to meet its financial commitments but is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligors in the higher-rated categories. An A rating means that an obligor has strong capacity to meet its financial commitments but is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligors in higher-rated categories. The ratings from "AA" to "CCC" may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories. A Standard & Poor's rating outlook assesses the potential direction of a long-term credit rating over the intermediate term (typically six months to two years). In determining a rating outlook, consideration is given to any changes in the economic and/or fundamental business conditions. An outlook is not necessarily a precursor of a rating change or future CreditWatch action. Stable means that a rating is not likely to change.

In case Notes to be issued by MBG under the Programme will be rated such ratings and any explanations of the meanings of such ratings published by the rating agencies will be set out in the relevant Final Terms.

13. Recent Developments

On February 1, 2022, Daimler AG became Mercedes-Benz Group AG. Following the successful stock market debut of Daimler Truck AG, the Mercedes-Benz Group's renewed focus on the automotive business is being underlined with a new name. The change of name from "Daimler AG" to "Mercedes-Benz Group AG" was given effect by registration of the corresponding amendment of the articles of incorporation of MBG in the commercial register of the local court (*Amtsgericht*) of Stuttgart, Germany.

On March 2, 2022, due to the Russia-Ukraine War, the Mercedes-Benz Group decided to discontinue the export of cars and vans to Russia as well as local production in Russia until further notice.

Due to the still not fully foreseeable global consequences of the Russia-Ukraine War, the estimates and management judgements regarding the recognized assets and liabilities relating to adjustments to business activities in Russia are both particularly subject to increased uncertainty. A degree of discretion has been exercised in the consideration and subsequent derivation of the effects of the sanctions and countersanctions on business activities, in particular the processing of existing transactions in Russia. In this connection expenses totalling €658 million were incurred in the Mercedes-Benz Cars segment and €51 million were incurred in the Mercedes-Benz Vans segment. In the Mercedes-Benz Mobility segment, expenses of €104 million arose primarily from the assessment of credit default risks and increased refinancing costs. Most of the expenses are included in the cost of sales. In addition, there was an increase of around €1.1 billion in contingent liabilities between the end of 2021 and March 31, 2022.

In May 2022, Mercedes-Benz decided to start a worldwide recall and to contact the owners of potentially affected vehicles of the ML, GL (BR 164) and R-Class (BR 251) series from the production period 2004 – 2015. Based on analysis of isolated reports for these vehicles, Mercedes-Benz has found that in some of these vehicles the function of the brake booster could be affected by advanced corrosion in the joint area of the housing. The recall process will involve inspecting these vehicles and, depending on the results of the inspection, replacing the parts where necessary. Until the inspection takes place, Mercedes-Benz is asking its customers not to drive these vehicles. In the event a repair would be necessary and cannot be carried out immediately, an authorized Mercedes-Benz dealer will help coordinate an individual solution for the customer, including alternate mobility.

14. Outlook

Following the realignment of the Mercedes-Benz Group, the Group is concentrating on achieving profitable growth in the market for luxury cars and premium vans, as well as for sales financing. However, high advance expenditure will still be required for the necessary transformation towards a CO₂-neutral future. The geopolitical and macroeconomic conditions continue to be characterized by an exceptional degree of uncertainty, including the Russia-Ukraine War, its impacts on supply chains, and the development of prices for raw materials and energy. Further effects due to the rapidly changing situation in Russia and Ukraine are

not currently known but could possibly have substantial negative consequences for the business activities of Mercedes-Benz, should it escalate beyond its current state. Mercedes-Benz expects supply constraints related to semiconductors and other industrial upstream products and the COVID-19 pandemic to impact business in the near future and continues to monitor supply chain risks closely to react flexibly if needed. Strict COVID-19 countermeasures in China hold uncertainties for the expected development of the market, supply chains and production.
