

This document constitutes a base prospectus for the purposes of Art. 5(4) of Directive 2003/71/EC of the European Parliament and of the Council of 4 November 2003, as amended (the "**Prospectus Directive**") relating to issues of non-equity securities ("**Non-Equity Securities**") within the meaning of Art. 22 No. 6(4) of Commission Regulation (EC) No. 809/2004 of 29 April 2004, as amended (the "**Prospectus Regulation**") under the Programme (as defined below) by Covestro AG.

COVESTRO AG

(incorporated as a stock corporation (Aktiengesellschaft) in the Federal Republic of Germany)

EUR 5,000,000,000 Debt Issuance Programme

Under this base prospectus (together with any documents incorporated by reference therein, the "**Base Prospectus**"), Covestro AG (the "**Issuer**"), subject to compliance with all relevant laws, regulations and directives, may from time to time issue unsubordinated bearer notes in a minimum denomination of EUR 1,000 per Note (together the "**Notes**"). The aggregate principal amount of Notes issued under the Debt Issuance Programme described in this Base Prospectus (the "**Programme**") outstanding will not at any time exceed EUR 5,000,000,000 (or the equivalent in other currencies). The principal amount of the Notes, the issue currency, the interest payable in respect of the Notes, the issue prices and maturities of the Notes and all other terms and conditions which are applicable to a particular Series and, if applicable, Tranche of Notes (each term as defined below, see "General description of the Programme") will be set out in the document containing the final terms (each "**Final Terms**") within the meaning of Art. 26(5) of the Prospectus Regulation.

The Commission de Surveillance du Secteur Financier (the "**CSSF**") of the Grand Duchy of Luxembourg in its capacity as competent authority (the "**Competent Authority**") under the Prospectus Directive has approved this Base Prospectus as a base prospectus within the meaning of Art. 5(4) of the Prospectus Directive pursuant to article 7 of the Luxembourg act relating to prospectuses for securities (*loi relative aux prospectus pour valeurs mobilières*) dated 10 July 2005, as amended, which implements the Prospectus Directive into Luxembourg law (the "**Luxembourg Prospectus Law**"). By approving this Base Prospectus, CSSF gives no undertaking as to the economic and financial soundness of the operation or the quality or solvency of the Issuer.

The Issuer has requested the CSSF to provide the competent authorities in the Federal Republic of Germany ("**Germany**"), the Republic of Austria ("**Austria**") and The Netherlands with a certificate of approval attesting that this Base Prospectus has been drawn up in accordance with the Luxembourg Prospectus Law. The Issuer may request the CSSF to provide competent authorities in additional host member states within the European Economic Area with such notification.

Application has also been made to the Luxembourg Stock Exchange for Notes issued under the Programme to be listed on the official list of the Luxembourg Stock Exchange (the "**Official List**") and to be admitted to trading on the Luxembourg Stock Exchange's regulated market "Bourse de Luxembourg", appearing on the list of regulated markets issued by the European Commission. The Luxembourg Stock Exchange's regulated market is a regulated market for the purposes of the Markets in Financial Instruments Directive 2004/39/EC ("**MiFID**"). However, Notes may be listed on any other stock exchange or may be unlisted as specified in the relevant Final Terms.

Each Tranche of Notes will be represented on issue by a temporary global note (each a "**Temporary Global Note**"). Interests in a Temporary Global Note will be exchangeable, in whole or in part, for interest in a permanent global note (each a "**Permanent Global Note**") on or after the date 40 days after the later of the commencement of the offering and the relevant issue date (the "**Exchange Date**"), upon certification as to non-U.S. beneficial ownership. The Notes are intended to be held in a manner which would allow Eurosystem eligibility. Therefore, the Global Notes will be deposited on the issue date either (i) in classical global note form with Clearstream Banking AG, Frankfurt am Main ("**Clearstream, Frankfurt**") or (ii) in new global note form with a common safekeeper for Euroclear Bank SA/NV ("**Euroclear**") and Clearstream Banking, société anonyme ("**Clearstream, Luxembourg**"). It does not necessarily mean that the Notes will be recognised as eligible collateral for Eurosystem monetary policy and intra-day credit operations by the Eurosystem either upon issue or at any or all times during their life. Such recognition will depend upon satisfaction of the Eurosystem eligibility criteria applicable from time to time.

This Base Prospectus will be published in electronic form on the website of the Luxembourg Stock Exchange (www.bourse.lu). This Base Prospectus is valid for a period of twelve months after its approval.

Element	Section B – Issuer	
B.1	Legal and commercial name	Covestro AG (together with its consolidated subsidiaries, " Covestro Group " or the " Group ").
B.2	Domicile / Legal form / Legislation / Country of incorporation	Covestro AG is a stock corporation (<i>Aktiengesellschaft</i>) established and operating under German law and incorporated in the Federal Republic of Germany. Covestro AG is registered in the commercial register at the local court (<i>Amtsgericht</i>) in Cologne under HRB 85281 and conducts its business under the commercial name "Covestro". The registered seat (<i>Sitz</i>) and business address of Covestro AG is at Kaiser-Wilhelm-Allee 60, 51373 Leverkusen, Germany.
B.4b	Known trends affecting the Issuer and the industries in which it operates	<p>General economic trends worldwide and, in particular, in the geographic regions Europe, Middle East, Africa and Latin America ("EMLA"), Asia and Pacific ("APAC") and United States, Canada and Mexico ("NAFTA") in which the Group operates, are a key factor affecting the Group's results of operations given that their effect on the industries in which the Group's direct and indirect customers operate impacts demand for the Group's products. Negative economic developments usually result in decreases in the Group's sales volume and negatively impact the Group's results of operations.</p> <p>The Group's results of operations are also affected by the dynamics between supply and demand which have an impact on capacity utilization rates in the industry. Supply is primarily driven by the production capacity available in the industry. Decreases in demand and sales volume, respectively, eventually lead to decreases in capacity utilization, which negatively impact margins due to the high fixed cost base in the polymer industry and due to decreasing selling prices. When increases in capacity outpace growth in demand, prices tend to decline. On the other hand, when growth in demand outpaces increases in capacity, prices can be expected to rise.</p> <p>Raw materials constitute a large proportion of the Group's total production costs. The Group's primary raw materials are petrochemical derivatives such as benzene, phenol propylene oxide, toluene, acetone and hexamethylenediamine ("HDA"). Recently, the Group's results of operations were positively affected by the Group's ability to limit the reduction of overall selling prices despite general decreases in raw material prices towards the end of the fiscal year ended December 31, 2015 ("Fiscal Year 2015"). The Group may not be able to maintain its overall selling prices, which could negatively affect margins in Fiscal Year 2016.</p> <p>In recent years currency effects negatively impacted the Group's results of operations, primarily as a result of the strengthening Euro. However, since the beginning of the Fiscal Year 2015, currency effects positively impacted the Group's results of operations as a result of a weaker Euro.</p>
B.5	Description of the group and the Issuer's position within the group	Covestro AG acts as a holding company and as parent company of Covestro Group. The following diagram sets forth a summary (in simplified form) of the Covestro Group:

Element Section D – Risks

D.3 Key information on the key risks that are specific to the securities

Notes may not be a suitable Investment

- Each potential investor in Notes must determine the suitability of that investment in light of its own circumstances.

Risks related to the structure of a particular issue of the Notes

- A Noteholder is exposed to the risk that due to early redemption his investment will have a lower than expected yield.
- The market values of Notes issued at a substantial discount or premium from their principal amount tend to fluctuate more in relation to general changes in interest rates than do prices for conventional interest-bearing securities.
- There is no restriction on the amount of liabilities which the Issuer may issue. If the Issuer's financial condition were to deteriorate, the relevant Noteholders could suffer direct and materially adverse consequences and if the Issuer were liquidated, the relevant Noteholders could lose their entire investment.
- A Noteholder is subject to the risk of being outvoted by a binding majority resolution of the Noteholders since the terms and conditions of the Notes may be amended by the Issuer with consent of the Noteholders by way of a majority resolution in a Noteholders Meeting or by a vote not requiring a physical meeting (*Abstimmung ohne Versammlung*).

A Noteholder may be deprived of its individual right to pursue and enforce a part or all of its rights under the terms and conditions of the Notes against the Issuer upon the appointment of a Noteholders' joint representative.

Market risks

- The trading market for debt securities may be volatile and may be adversely impacted by many events.
- An active trading market for the Notes may not develop.

- A holder of Notes denominated in a foreign currency is exposed to the risk that changes in currency exchange rates may affect the yield of such Notes.
- [Fixed Rate Notes
A Noteholder of fixed rate Notes is exposed to the risk that the price of such Notes falls as a result of changes in the market yield.]
- [Floating Rate Notes
The price of the Notes is subject to changes in the market spread, changes in the reference interest rate or both. Movements of the market spread can adversely affect the price of the Notes and can lead to losses for the Noteholders.]
- One or more independent credit rating agencies may assign credit ratings to the Notes. If the rating agencies were to change their practices for rating such securities in the future and the ratings of the Notes were to be subsequently lowered, this may have a negative impact on the trading price of the Notes.
- The market value of the Notes could decrease if the creditworthiness of the Issuer and/or the Group worsens or the market participants' estimation of the creditworthiness of corporate debtors in general or of debtors operating in the same business as the Issuer and/or the Group adversely changes.
- The investment activities of certain investors are subject to legal investment laws and regulations, or review or regulation by certain authorities. Therefore, each potential investor should consult its legal advisers.

Special investment risks

- An actual yield on the Notes may be reduced from the stated yield by transaction costs.
- If a loan is used to finance the acquisition of the Notes and the Notes subsequently go into default, or if the trading price diminishes significantly, the Noteholder not only has to face a potential loss on its investment, but it will also have to repay the loan and pay interest thereon.
- An effective yield on the Notes may be diminished by the tax impact on an investment in the Notes.
- The Issuer or the Paying Agent may be required to withhold U.S. tax at a rate of 30 per cent. on all, or a portion of, payments made after 31 December 2016 in respect of (i) Notes issued or materially modified on or after the later of (a) 1 July 2014, and (b) the date that is six months after the date on which the final regulations applicable to "foreign passthru payments" are filed in the Federal Register or (ii) Notes treated as equity for U.S. federal tax purposes, whenever issued, pursuant to the foreign account provisions of the "U.S. Hiring Incentives to Restore Employment Act of 2010 – FATCA".

Punkt	Abschnitt B – Emittentin	
B.1	Juristische und kommerzielle Bezeichnung	Covestro AG (zusammen mit ihren Tochterunternehmen, die " Covestro Gruppe " oder die " Gruppe ").
B.2	Sitz, Rechtsform, für den Emittenten geltendes Recht, Land der Gründung	Die Covestro AG ist eine nach deutschem Recht gegründete und deutschem Recht unterliegende Aktiengesellschaft, die in der Bundesrepublik Deutschland gegründet wurde. Die Covestro AG ist im Handelsregister des Amtsgerichts Köln unter HRB 85281 eingetragen. Die Gesellschaft ist unter der kommerziellen Bezeichnung "Covestro" tätig. Die Covestro AG hat ihren eingetragenen Sitz und die Unternehmensanschrift in der Kaiser-Wilhelm-Allee 60, 51373 Leverkusen, Deutschland.
B.4b	Bereits bekannte Trends, die sich auf den Emittenten und die Branchen, in denen er tätig ist, auswirken	<p>Die ökonomischen Entwicklungen weltweit und insbesondere in den geografischen Märkten Europas, des Mittleren Ostens, Afrikas und Lateinamerikas ("EMLA"), Asien und den Pazifikstaaten ("APAC") und den Vereinigten Staaten von Amerika, Kanada und Mexiko ("NAFTA"), in denen die Gruppe tätig ist, gehören zu den wichtigsten Faktoren die sich auf die Ertragslage der Emittentin auswirken, soweit diese Entwicklungen die Nachfrage nach den Produkten der Gruppe in den Branchen verändern, in denen die direkten und indirekten Kunden der Gruppe tätig sind. Negative ökonomische Entwicklungen resultieren üblicherweise in einer Abnahme des Verkaufsvolumens der Gruppe, was wiederum negativen Einfluss auf die Ertragslage der Gruppe hat.</p> <p>Die Ertragslage der Gruppe wird auch durch die Dynamik von Angebot und Nachfrage beeinflusst, welche sich auf die Kapazitätsauslastungsraten in der Industrie auswirken. Das Angebot wird hauptsächlich durch die in der Branche verfügbare Produktionskapazität beeinflusst. Eine Abnahme der Nachfrage bzw. des Verkaufsvolumens führt entsprechend zu einer Abnahme der Kapazitätsauslastung, was die Margen wegen des hohen Fixkostenanteils in der Polymerindustrie und wegen der fallenden Verkaufspreise negativ beeinflusst. Wenn die Kapazität schneller aufgebaut wird als die Nachfrage steigt, werden die Preise eher fallen. Auf der anderen Seite ist ein Anstieg der Preise zu erwarten, wenn die Nachfrage schneller steigt als die Kapazität aufgebaut wird.</p> <p>Für Rohstoffe wird ein Großteil der gesamten Produktionskosten der Covestro Gruppe aufgewendet. Die hauptsächlichsten Rohstoffe der Gruppe sind petrochemische Derivate wie Benzol und Phenol, Propylenoxid, Toluol, Azeton und Hexamethyldiamin ("HDA"). Obwohl zum Beginn des am 31. Dezember 2015 endenden Geschäftsjahres ("Geschäftsjahr 2015") die Preise für Rohstoffe im Allgemeinen fielen, konnte die Gruppe in jüngster Zeit Preisnachlässe bei ihren Produkten begrenzen, was einen positiven Einfluss auf die Ertragslage der Gruppe hatte. Die Gruppe wird möglicherweise nicht in der Lage sein, das Niveau ihrer Verkaufspreise beizubehalten, was einen negativen Einfluss auf die Margen der Gruppe im Geschäftsjahr 2016 haben könnte.</p> <p>In den vergangenen Jahren hatten Währungseffekte – hauptsächlich aufgrund des stärker werdenden Euro –</p>

nachteilige Auswirkungen auf die Ertragslage der Gruppe. Demgegenüber sorgte der schwächere Euro seit Beginn des Geschäftsjahres 2015 für einen positiven Einfluss auf die Ertragslage der Gruppe.

- B.14.** Abhängigkeit von anderen Unternehmen in der Gruppe Entfällt. Die Covestro AG ist die Muttergesellschaft der Covestro Gruppe und nicht abhängig von anderen Unternehmen in der Gruppe. Siehe Punkt B.5 oben.
- B.15** Beschreibung der Haupttätigkeiten Auf Grundlage einer internen Marktanalyse ist die Gruppe der Auffassung, einer der weltweit führenden Anbieter von Hightech-Materiallösungen zu sein. Die Tätigkeiten der Gruppe umfassen die Produktion und Lieferung von Rohstoffen für Polyurethane, Polycarbonatgranulate und -platten, von Lack- und Klebstoffen sowie chemischen Zwischenprodukten. Das Produktportfolio der Gruppe beinhaltet auch Nischenprodukte wie Thermoplastische Polyurethane ("TPU"), polycarbonat- und TPU-basierte Folien, Heißgießelastomere und andere, auf textile, kosmetische und medizinische Anwendungen zugeschnittene Produkte. Die Gruppe verfügt über umfangreiche Erfahrung bei der Prozess- und Produktinnovation sowie über enge Kundenbeziehungen, die untermauern, dass die Gruppe seit langem marktgerechte Lösungen entwickelt. Die von der Gruppe hergestellten Produkte werden von den Kunden verarbeitet, um Produkte zu schaffen, die in verschiedenen Endmärkten, insbesondere den Automobil-/Transport-, Bau-, Holz-/Möbel-, Elektro-/Elektronik-, Sport-/Freizeit-, Kosmetik-, Gesundheits- und Chemikalien-Endmärkten,

verwendet werden.

Die Gruppe profitiert von leistungsfähigen Produktionsanlagen mit nach ihrer Auffassung führender Prozesstechnik und einer nominalen Gesamtproduktionskapazität von 4.700 Kilotonnen ("kt") Kernprodukten in ihren Geschäftsbereichen für Polycarbonate und Polyurethane, einschließlich acht Produktionsanlagen mit "World-Scale" Kapazität in Europa, den Vereinigten Staaten und Asien. Der selektiv rückwärts integrierte Produktionsprozess der Gruppe zielt darauf ab, kritische Rohstoffe wie Chlor, Propylenoxid und andere Einsatzmaterialien intern oder über Joint Ventures zu beziehen und so die Abhängigkeit der Gruppe von externen Bezugsquellen zu verringern.

Das Geschäft der Gruppe vereint die Vorteile standardisierter Produkte und maßgeschneiderter, hochwertiger Lösungen, die den Bedürfnissen der Kunden, die sich fundamentalen Makrotrends wie dem Klimawandel, einer zunehmenden Mobilität, dem Bevölkerungswachstum und einer zunehmenden Urbanisierung stellen müssen, gerecht werden sollen. Die Gruppe ist der Auffassung, dass sie aufgrund ihrer Wettbewerbsvorteile in einer guten Position ist, um das von diesen Trends getriebene Branchenwachstum zu nutzen. Gemäß der internen Marktanalyse der Gruppe wird erwartet, dass die Branche aufgrund einer günstigen Nachfrageentwicklung in den nächsten fünf Jahren wächst.

RISK FACTORS

The following is a description of risk factors in relation to Covestro AG and the Group. The realisation of any of the risks described below may affect the ability of Covestro AG and the Group to fulfil its obligations as Issuer and/or may adversely affect the market price of Notes and can lead to losses for the Noteholders if they sell Notes before they fall due for redemption. As a result, investors are exposed to the risk of losing their investment in whole or in part. Additional risks not currently known to Covestro AG or Covestro Group that are now immaterial may result in material risks in the future.

Words and expressions defined in the Terms and Conditions shall have the same meanings in this section.

Risks related to the Group's business and industry

The polymer industry is affected by economic factors including risks associated with volatile economic conditions.

General economic conditions affect the polymer industry, including the polyurethanes, polycarbonates and coatings, adhesives and sealants industry segments in which the Group operates. Deteriorating economic conditions, negative perceptions about economic conditions or a negative or uncertain economic outlook could result in a substantial decrease in demand for the Group's products and negatively impact capacity utilization, selling prices and volumes, hence affecting the Group's profit margins. Due to the Group's significant fixed cost base, a decrease in sales volume could have a material adverse impact on the Group's results of operations. If gross domestic product ("**GDP**") declines, the Group typically experiences a greater decline in sales. The economic environment may be negatively affected by volatile financial markets, rising interest rates, international or regional conflicts, political instability or unrest, epidemics, terrorism, natural disasters or other events.

The Group's results of operations are substantially dependent on regional economic conditions in Europe, the Middle East, Africa and Latin America excluding Mexico ("**EMLA**"), Asia and the Pacific ("**APAC**"), and the United States, Canada and Mexico ("**NAFTA**") and in certain emerging economies that are generally more volatile than developed markets.

Uncertain global economic factors and changes in GDP growth in key countries make it difficult for the Group to forecast demand trends for its products and its profitability. It can be difficult to accurately predict the development of factors affecting the industry segments, and negative developments could materially adversely affect the Group's business, financial condition, results of operations and prospects.

The Group is dependent on the development of its customers' end markets, in particular the automotive/transport, construction, wood/furniture, electrical/electronics and chemicals end markets, which are cyclical.

The Group is highly dependent on demand in the end markets in which the Group's customers operate, in particular the automotive/transport, construction, wood/furniture, electrical/electronics and chemicals end markets, which together account for a majority of the Group's total net sales. A smaller portion of the Group's total net sales are attributable to sales in the sports/leisure, cosmetics, health and other end markets. Since the Group's business is characterized by high fixed costs, any material decline in demand in one of the Group's core end markets that results in falling production volumes will decrease the Group's earnings.

The Group's end markets are cyclical in nature; however, the level of cyclicity differs by end market and region. The level of activity in the Group's end markets is generally affected by economic developments (including GDP growth and disposable income) as well as a wide range of other factors beyond the control of the Group and its customers.

Customers of chemical and polymer companies such as the Group typically adapt their procurement activities to the expected growth rates in their relevant end market. In an actual or expected economic downturn, customers try to reduce their working capital and their inventories, which can lead to a significant decline in the Group's sales volumes and net sales. In times of recovery, customers tend to increase their inventories, leading to increased demand for the Group's products.

The Group bases its projections of future developments in supply and demand in each of the end markets upon which it is dependent on publicly available sources and internal estimates. Such future market developments, including expected net sales and results of operations, are difficult to forecast because of the cyclical nature of the

end markets and other factors beyond the Group's control. Furthermore, the Group's results of operations are highly correlated with volume, prices, raw material and energy costs as well as production capacity utilization within the polyurethanes and polycarbonates segments of the polymer industry and of its production facilities, all of which are difficult to project and could materially adversely affect the Group's ability to predict future financial results and plan capital expenditures accurately. A decline in demand in any of the Group's end markets, even during periods of strong general economic conditions, may materially adversely affect the Group's business, financial condition, results of operations and prospects.

The polymer industry is characterized by periods of supply/demand imbalances due to production overcapacity that will result in periodic downward pressure on prices and short term price volatility.

Historically, the markets for most of the Group's products have experienced alternating periods of tight supply, causing prices and profit margins to increase, followed by periods of significant capacity additions, resulting in oversupply and declining prices and profit margins. The cycles often occur on short notice and are in part caused by the capacity additions of new world-scale production facilities or the expansion of existing production facilities, which are necessary to create or sustain economies of scale, and the decline of industry-wide utilization rates that often follows capacity additions.

Any oversupply may lead to a decline in capacity utilization rates of the entire industry and, in particular, the Group, which may negatively impact profit margins due to the high fixed cost base of production facilities. The materially adverse effects of supply and demand imbalances can be significantly exacerbated by economic conditions.

The Group expects that competitors from developed as well as emerging economies will continue to add production capacity. In addition, the Group has planned to increase its production of certain products in the short term.

Moreover, the construction of new production facilities, or the expansion of capacity at existing production facilities, often begins years in advance of that capacity entering operation. Accordingly, there is a risk that such new capacity eventually enters operation when economic conditions are weak which may further depress prices and profit margins. The materially adverse effects of supply and demand imbalances can be significantly exacerbated by economic conditions.

In addition, other factors largely beyond the Group's control, such as the actual or perceived changes in levels of supply and demand, the availability and cost of substitute materials and inventory maintained by competitors, all influence product prices and may lead to short-term price volatility and a downward pressure on prices, which may ultimately decrease the Group's margins. Levels of supply in the industry segments that outpace demand for products, such as those produced by the Group, can materially adversely affect the Group's ability to generate profit and materially adversely affect the Group's business, financial condition, results of operations and prospects.

Fluctuations in the prices of raw materials may have a material adverse effect on the Group's results of operations.

Raw materials constitute a large proportion of the Covestro Group's total production costs. In consequence, the Group has significant exposure to fluctuations in the prices of raw materials. The Group's primary raw materials are petrochemical derivatives, such as benzene and phenol, propylene oxide, toluene, acetone, hexamethylenediamine ("HDA"). The volatility in the prices the Group has to pay for raw materials, which generally change on a monthly basis, makes it challenging to manage product pricing and pass the increases on to customers. The extent of the impact of price fluctuations on the Group's net sales and results of operations depends primarily on whether the Group is able to pass on increases in raw material prices to its customers through higher selling prices without significant delays or to maintain its selling prices despite decreases in raw material prices. The Group's ability to do so primarily depends on the conditions of supply and demand in the industry and resulting industry capacity utilization as well as competition. Oversupply and low utilization of the production capacity in the industry have affected and will continue to affect the Group's ability to pass on increases in raw material prices to its customers, which negatively affects the Group's margins. An unfavourable balance between supply and demand or decreasing demand and utilization of production capacity in the industry will reduce the Group's ability to maintain its selling prices or to delay decreases in its selling prices despite decreases in raw material prices.

As the Group's primary raw materials are petrochemical derivatives, their prices are typically determined based on the price of crude oil, which generally creates the floor for prices of petrochemical derivatives, and the supply and

demand dynamics for the relevant raw material. Political instabilities, wars or other conflicts with oil producing or refining countries could negatively affect the supply of oil and result in a significant increase in prices for oil and petrochemical derivatives.

The Group purchases raw materials primarily pursuant to long-term framework agreements with suppliers with defined volumes, which generally require the Group to purchase certain volumes monthly at a price determined at the beginning of each month. In addition, the Group has entered into some take-or-pay supply agreements, which require the Group to pay for a raw material irrespective of whether the Group actually takes delivery of that raw material.

Increases in the prices of raw materials that cannot be passed on to customers through corresponding increases in selling prices or otherwise be compensated for will result in reduced margins. Even if the Group is able to pass on raw material price increases to customers, the increase in selling prices may result in decreased demand and lower sales volume as customers reduce their purchases or shift to substitute products.

The Group is dependent on the availability of certain raw materials, and any disruptions in the supply or logistics chain may have a material adverse effect on the Group's business, financial condition and results of operations.

The Group's production processes are dependent on the availability and timely delivery of raw materials, including petrochemical derivatives, intermediates and other materials needed for its production, including additives, carbon monoxide and chlorine. The continuous nature of the Group's production processes, the desire to keep inventories at a minimum and the difficulty of storing hazardous, gaseous, bulky and/or packed materials increase the importance of a well-functioning supply and logistics chain.

Any significant disruptions in the Group's logistics chain that transports its raw materials and certain of its by-products within the integrated production platforms is likely to result in production interruptions, a loss of customers, damage claims and significant downstream consequences. In addition, if the Group exits a site with a production platform that is integrated with a third party, the Group may incur substantial additional costs related to obligations to such a party.

If certain of the Group's suppliers or logistics partners are unable or unwilling to meet their contractual obligations under existing agreements, the Group may be forced to pay higher prices to obtain the necessary raw materials from other sources and it may not be able to increase prices for its products to offset the higher raw materials costs.

If certain raw materials become unavailable within a geographic region from which they are currently sourced, then the Group may not be able to obtain suitable or cost-effective substitutes. The raw materials used by the Group may become unavailable due to regulatory restrictions related to various factors including transportation and the environment and health and safety, and no suitable or cost-effective alternative raw materials may be available. The inability to obtain suitable or cost-effective raw materials may require the Group to close certain production operations, entire production facilities or product lines, which in turn may result in a shortfall in the Group's production of certain chemical intermediates and by-products that it consumes internally. In consequence, the Group may be required to purchase such substances from third-parties at a significantly higher cost or close certain other production operations. Certain customers of the Group may be materially dependent on the Group's products and may seek an alternative supplier or hold the Group liable for its inability to supply its products at agreed quantities and times.

Any disruptions in the Group's supply or logistics chain could materially adversely affect the Group's business, financial condition, results of operations and prospects.

Volatility in energy prices and factors impacting energy supply and prices could have a material adverse effect on the Group's business.

The Group requires large quantities of energy from various sources for use in its production operations, the most important of which are electricity, natural gas and steam. The Group's energy costs are affected by various factors, including the availability of supplies of particular sources of energy, energy prices and regulatory decisions. The prices for electricity and steam under the Group's supply agreements are generally driven by the price of the fossil fuel used for the electricity and steam production, which is generally either natural gas or coal. In the past, prices for natural gas and coal have been volatile. Such volatility may increase as a result of political instability. The Group's main production facilities are located in China, the United States and Germany and are therefore subject to the developments regarding energy prices in these countries, such as governmental influence on the pricing mechanics or regulation to promote the usage of renewable energies.

Any significant increase in energy prices, transportation costs, grid fees or taxes associated with the supply of energy would increase the Group's operating costs and, thus, may negatively affect its results of operations if it is unable to pass the increased costs on to customers. Any inability or delay in passing on increases in energy costs to the Group's customers or any interruption or shortage of energy supply may materially adversely affect the Group's business, financial condition, results of operations and prospects. The competitiveness of the Group's production facilities in EMLA, APAC and NAFTA depends on whether the Group has access to energy at competitive rates. Significant increases in energy prices in certain regions that the Group is unable to pass on to customers, may result in a loss of competitiveness of any of the Group's production facilities in such regions, which could have a material adverse effect on the Group's business, financial condition, results of operations and prospects.

The Group operates in a highly competitive industry and faces competition from large, well established producers as well as new entrants across each of the regions in which the Group operates, who may each compete more effectively than the Group and materially adversely affect the Group's profitability.

The Group operates in a highly competitive landscape characterized by significant regional differences in terms of the importance of factors such as selling prices, products, product properties, quality, logistics, availability, reliability and innovation. The Group competes against large international producers as well as smaller regional producers.

Some competitors of the Group, mainly in emerging economies, may supply certain products below global prices and, thereby, compel the Group to lower its prices, which could materially adversely affect the Group's margins and profitability. Several factors can influence the price at which a competitor is willing to supply its products, including access to favourably priced raw materials and government subsidies to which the Group does not have access. Furthermore, state owned or state subsidized competitors may take actions such as adding capacity and lowering their prices to a level below that which is profitable for the Group regardless of their production cost and prices.

The Group's ability to maintain or increase its profitability is dependent upon its ability to offset decreases in the prices and margins of its products by improving production efficiency and volumes sold, shifting to customized products with higher margins and improving existing products and their applications through innovation, all of which competitors may do better and more cost efficiently than the Group. Competitors may be more successful at meeting the product characteristics required by customers and producing more cost effectively. Going forward, price competition with respect to a larger portion of the Group's products may become more intense, forcing the Group to lower its prices.

Competition may also increase due to new entrants or companies that consolidate operations and thereby achieve greater scale. Some of the Group's competitors have or may develop greater production capacity than the Group and may have greater financial resources. Those competitors may also be able to maintain significantly greater operating and financial flexibility than the Group. As a result, those competitors may be better able to withstand volatility within the polymer industry, changes in the prices of raw materials and energy and adverse economic conditions. The Group may also experience increased competition from companies that offer products based on alternative materials, technologies and processes that may be more competitive or better in terms of price or performance, causing the Group to lose customers, which could result in a decline in its sales and volumes sold and, in turn, could materially adversely affect the Group's business, financial condition, results of operations and prospects. Any inability to compete effectively could have an adverse effect on the Group's profitability.

The Group may be unable to successfully execute its strategy for achieving profitable growth, and therefore, may grow much less than expected, if at all.

The Group is executing a number of strategic initiatives designed to achieve profitable growth. The anticipated benefits from these strategic initiatives are based on several assumptions and projections that may prove to be inaccurate.

The Group may not be able to successfully implement these strategies and realize any of the expected benefits, including growth targets and cost savings, it aims to achieve or it may be more costly to do so than the Group currently anticipates. A variety of risks could cause the Group not to realize some or all of the targeted benefits. These risks include, among others, delays in the anticipated timing of key implementing measures or difficulties in implementing its asset optimization and general cost saving measures for any reason including conditions imposed by regulatory authorities. Moreover, the Group's continued implementation of its strategic initiatives may disrupt its operations and performance.

As a result, there can be no assurance that the Group will be able to successfully execute its strategy and achieve profitable growth. If, for any reason, the benefits the Group realizes are less than expected or the implementation of its strategy adversely affects its operations or costs more or takes longer than the Group expects, or if assumptions and projections prove inaccurate, the Group's business, financial condition, results of operations and prospects may be materially adversely affected.

With limited exceptions, the Group generally does not have long-term agreements with its customers, and the loss of a significant number of customers could materially adversely affect its sales and profitability.

The Group generally does not have long-term agreements with its customers and customers may choose to obtain products similar to those produced by the Group from the Group's competitors at short notice. Customers have consolidated their operations in certain geographic areas and any other consolidation of a customer's operations from one region to another may result in the loss of that customer. In addition, significant levels of customer consolidation may enable customers to exert substantial pricing pressure on the Group. The negative effects set out above may be amplified in those regions where the Group is required to pay for raw materials due to long-term supply agreements with defined volumes or, in exceptional cases, with take-or-pay obligations despite the change in customer demand. If, as a result, demand for the Group's products declines, it may be required to decrease its production volumes while not able to reduce the raw material purchase to the optimal level, which could materially adversely affect its business, financial condition, results of operations and prospects.

The Group's business may be affected by its inability to meet its customers' requirements in terms of product quality and specifications.

As many of the Group's products are critical to, or enhance the performance of, its customers' applications and products, many customers rely on the Group for products and services that meet their specifications and quality requirements. The Group's differentiated polyurethane raw materials and systems, polycarbonates, and coatings, adhesives, sealants and other specialties raw materials are produced to meet customers' requirements. Any failure by the Group's products to meet customers' requirements or expectations in terms of quality, performance or otherwise may result in reputational harm, customers reducing the volume of orders they place with the Group or having to replace products at the Group's expense.

The Group's customers typically have high standards of product quality and detailed product specifications, and require that the Group is a registered supplier of the relevant chemical or that the chemical has been approved for use in the intended application. The Group's quality control systems and in-process production controls provide for regular inspection of its products. However, there can be no assurance that the Group's products will meet agreed upon specifications or quality requirements, will not contain impurities or will not be mistakenly commingled with other products. If the Group fails to detect such quality deficiencies or otherwise delivers products that do not meet its customers' requirements, the Group may be required to deliver replacement products at the Group's expense or pay damages. Such failures could also result in reputational harm and customers placing orders for lower volumes with the Group or terminating their relationship with the Group, which could also have a material adverse effect on the Group's business, financial condition, results of operations and prospects.

Financial difficulties and any related problems of the Group's customers could have a material adverse effect on its business.

Volatile global economic conditions may materially adversely affect the Group's customers' access to the capital and liquidity with which they maintain their inventories, production levels and product quality, causing them to raise prices or lower production levels or to increase pressure to procure raw materials at lower prices or on adjusted payment terms. During periods of economic volatility and periods of heightened competition in end markets, the Group's customers may experience financial difficulties, including insolvency, restructurings and liquidations. In jurisdictions where insolvency laws and practices may vary, the Group may experience difficulty collecting receivables from insolvent customers as unpaid debts are generally not covered by credit insurance. Difficulties faced by the Group's customers could adversely affect the prices at which the Group can sell its products and/or lead the Group to extend trade credit to customers, thereby reducing the Group's cash flows. A significant adverse change in a customer relationship or in a customer's financial position could cause the Group to limit or discontinue business with that customer, require it to assume more credit risk relating to that customer's receivables and/or limit its ability to collect accounts receivable from that customer and could materially adversely affect the Group's business, financial condition, results of operations and prospects.

Production at the Group's facilities may be subject to planned and unplanned production interruptions, which could have a material impact on its ability to produce products for sale or maintain business operations and therefore, may materially adversely affect its business.

The Group operates multiple and complex technical processes, which may be subject to breakdowns, inefficiencies, operational human errors, sabotage and technical failures that may interrupt production operations or delay a resumption of production following a plant modification or a turnaround. Any material disruption at any of the Group's production facilities, in particular the Group's facilities with large production capacity, could impair its ability to use its facilities, have a material impact on its ability to produce products for sale or maintain business operations.

Production disruptions may be caused by several factors including natural disasters, weather, severe pandemic/epidemic, supply disruptions - particularly from sole-source suppliers or the unanticipated unavailability of one of the Group's reusable by-products - strikes, transportation interruption, government regulation, political unrest or terrorism, or internal reasons, such as fires, equipment failure, unplanned maintenance, operational human errors or other production problems.

Disruptions at one or more of the Group's production facilities, at any of the Group's suppliers' fence-to-fence production facilities or at the Group's owned and operated infrastructure, may also interrupt production further up or down the production chain and lead to a decrease in volumes and sales, potential loss of customers and damage claims by customers. Adequate spare parts and maintenance services may not be available in a timely manner to secure the continuation of the operations. If disruptions occur, alternative facilities with sufficient capacity or capabilities may not be available (or may be located in another region), may be characterized by substantially higher costs or may take significant time to start production. Moreover, long-term production disruptions may cause the Group's customers to seek alternative sources of supply, which could exacerbate any adverse effects experienced by the Group. Material disruptions at any of the Group's production facilities could materially adversely affect the Group's business, financial condition, results of operations and prospects.

While the Group has defined operation recovery plans that are intended to allow it to recover from natural disasters or other events that could disrupt its operations, it cannot provide assurances that its plans would fully protect it from all such disasters or events. In addition, insurance may not adequately compensate the Group from any losses incurred as a result of natural or other disasters. In areas prone to frequent natural or other disasters, insurance may become increasingly expensive or not available at all. Any failure to ensure continuous production, due to failures in planning or due to unforeseen events, could result in a loss of business and customers and materially adversely affect the Group's business, financial condition, results of operations and prospects.

The Group's production processes and operations are subject to the inherent hazards and other risks associated with chemical processing, production, storage, and transportation.

The Group's production processes and operations are subject to the hazards and risks associated with chemical processing, production and the related storage and transportation by the Group or its subcontractors. The Group's production processes rely on hazardous substances such as chlorine, phosgene, carbon monoxide, phenol, ethylene oxide, propylene oxide, isocyanates and the corresponding amines, which can present major risks to the health and safety of workers, neighbouring populations and the environment. Other potential hazards associated with chemical production and operations include accidents, explosions, fires, inclement weather, transport risks, terrorist attacks, natural disasters, mechanical failure, transportation interruptions, remediation, pipeline leaks and ruptures, storage tank leaks, chemical spills, discharges or releases of toxic or hazardous substances or gases and other risks. These hazards could expose workers, suppliers, the community and others to toxic chemicals and other hazards, contaminate property and the environment, damage property, result in personal injury or death, lead to an interruption, relocation or suspension of operations and materially adversely affect the productivity and profitability of a particular production facility or the Group's business operations as a whole, and result in governmental enforcement, regulatory shutdowns, the imposition of government fines and penalties and claims brought by governmental entities or third parties. The occurrence of any such event, which is not entirely preventable despite the application of a high standard of care, could be seriously detrimental to the Group's reputation and harm the Group's ability to obtain or maintain its existing licenses or its key commercial, regulatory, and governmental relationships. In addition, the Group uses contractors, over whom the Group has little control, who may perform duties on behalf of the Group in a manner that may cause harm to the health and safety of other workers, neighbouring populations and the environment. The costs associated with any of these events may be substantial and could exceed or otherwise not be covered by the Group's insurance coverage. Each of these

scenarios could materially adversely affect the Group's business, financial condition, results of operations and prospects.

If the Group is unable to sell, store, re-utilize or dispose of certain raw materials and by-products that it produces or acquires from third-parties, it may be required to limit or reduce its overall production levels and could also be materially adversely affected if the prices at which the Group sells certain raw materials and by-products decline.

The Group's operations are dependent on its ability to sell, store, re-utilize or otherwise dispose of certain raw materials and by-products of the Group's production processes such as styrene monomers, caustic soda and hydrochloric acid. To a large extent, the Group either sells the by-products resulting from one production step or uses them in the production of further individual products, often at the same location, by using an integrated production structure or disposes of them. Cost efficient operations of many of the Group's production facilities are dependent in part on the sales price or the costs in connection with disposing of the by-products including the availability of waste water disposal facilities as well as waste incinerators, and on the re-utilization levels thereof. The inventory expense related to storing hazardous and bulky materials, such as certain raw materials and the Group's by-products may be significant. Such inventories may ultimately become obsolete or decline in value, thereby adversely affecting the Group's earnings.

There can be no assurance that the Group will be able to sell, store, re-utilize or dispose of raw materials or by-products in the future. In addition, the Group may have historically had the ability to sell such raw materials or by-products at prices that may not be available in the future which may result in a decline in the Group's sales. The Group's ability to sell raw materials and by-products and the prices at which the Group is able to sell them, can have a material impact on the Group's net sales. The demand and prices for some of these raw materials and by-products, in particular styrene monomers, have historically been volatile and may continue to be volatile, which may affect the Group's results of operations. In the event that the Group is unable to sell such by-products, it may be required to reduce its production levels at all or some of its production facilities, invest in new treatment processes or incur substantial costs in connection with disposing of these by-products, which may have a material adverse effect on its business, financial condition, results of operations and prospects.

Any failure to successfully develop new, improved, or more cost-effective materials, production processes and technologies, or delays in development, may lead to the Group's products becoming superseded and could reduce the Group's future sales and profitability.

The Group depends on its continued ability to develop new, improved, or more cost-effective materials for end market applications, methods of production, technologies, and to successfully commercialize and distribute products.

The trend towards commoditization and standardization in major parts of the Group's industry segments has increased the importance of research and development in supporting profitability, particularly in terms of cost-efficient production technologies. Furthermore, the Group must offer ever more specialized or better performance products that are intended to offer higher value to customers while managing production costs in order to achieve satisfactory margins.

The Group may be unable to develop new methods or technologies to gain additional efficiencies in its production processes in the future, and its products may not perform as well as anticipated, which may decrease the profitability of some or all of the Group's products. If the Group's competitors develop better and more cost-efficient production technologies, the value of the Group's proprietary production technologies and its competitiveness in the market could be significantly reduced. The Group's ability to compete effectively also depends to a significant extent on its continuous ability to manage its cost base and its competitors may be more successful than it is in achieving or maintaining a competitive cost base by lowering their production costs.

The Group may also not be successful in expanding or improving its product portfolio or may lack the expertise or financial resources to develop new products. In addition, competitors may develop new materials with more favourable properties or which comply more effectively with government regulations for content or production, or may improve existing products in a similar manner. Competitors may also develop materials with similar characteristics that can be produced at lower costs relative to the Group. Further, the risk of technological substitution of the use of products, which the Group currently provides, by other products provided by competitors could have a material adverse effect on the Group's business. If the Group is unable to provide end market relevant products or to otherwise maintain its competitive position, it may lose customers to its competitors. The Group expects that its competitors will continue to develop and introduce new and enhanced products, which could cause

a decline in customer acceptance of the Group's products. An inability to compete effectively could have a material adverse effect on its business, financial condition, result of operations and prospects.

The Group may commit errors or misjudgements in its planning and misallocate resources, for instance, by developing materials, methods or technologies that require large investments in research and development and capital expenditure but that are not commercially viable. Any failure to successfully develop new, improved, or more cost-effective materials, production processes and technologies, or delays in development may lead to the Group's products or technologies becoming outdated, which could cause impairments and could reduce the Group's future sales. Any material failures in the Group's research and development processes could materially adversely affect the Group's business, financial condition, results of operations and prospects.

The Group is likely to incur costs in connection with the construction, modernization, maintenance, repair or expansion of production facilities, which may prove more costly than budgeted, require a longer shut down period and ultimately may lead to production capacity constraints.

Production facilities and infrastructure require a significant amount of investment to maintain, repair, modernize and expand. The Group has dedicated and will continue to dedicate significant expenditures to the maintenance of its production facilities.

Scheduled maintenance and intermittent repairs may disrupt production processes and interfere with the ordinary operation of production facilities and infrastructure. Investments relating to scheduled maintenance and intermittent repairs may also prove more costly than budgeted, require longer shut down periods than planned, and may ultimately lead to production capacity constraints. At times the contractors the Group uses to perform maintenance or repairs at the Group's facilities or infrastructure may prove more costly than expected, may not be available or may only be available with reduced resources. In addition, costs anticipated in connection with the maintenance of the Group's facilities or infrastructure may significantly increase at production facilities that operate at high capacity utilization levels for extended periods of time.

The mechanisms the Group uses to manage the risk of delays and cost overruns may prove insufficient. Any unanticipated costs in connection with the construction, modernization, maintenance, repair or expansion of production facilities may have a material adverse effect on the Group's business, financial condition, results of operations and prospects.

The Group relies on the proper functioning of its computer and data processing systems and a larger- scale malfunction could result in material disruptions to its business.

The Group relies primarily on globally and locally functioning information technology systems across its operations, including for management, supply chain and financial information and various other processes and transactions. Information technology system failures, network disruptions or breaches of security could materially disrupt its operations, cause material delays or cancellations of customer orders or impede the production or shipment of products, processing of transactions or reporting of financial results. An attack on or other problems with the Group's systems could also result in the disclosure of proprietary information about its business or confidential information concerning its customers or employees, which could result in significant damage to its business and its reputation.

The Group has put in place security measures designed to protect against the misappropriation or corruption of its systems, intentional or unintentional disclosure of confidential information, or disruption of its operations. However, these security measures may prove ineffective or insufficient. Any breach of the Group's security measures could result in unauthorized access to and misappropriation of its information, corruption of data or disruption of operations or transactions, any of which could materially adversely affect the Group's business, financial condition, results of operations and prospects.

The Group could be required to expend significant amounts to respond to unanticipated information technology issues. The Group may not have been able and may not be able to effectively implement measures that will protect against all of the significant risks to its information technology systems. Failure to implement these measures that could protect against all significant risks could materially adversely affect the Group's business, financial condition, results of operations and prospects.

Increased obligations and expenses related to the Group's post-employment benefit plans could negatively affect the Group's financial condition and results of operations.

The Group has obligations to current and former employees related to pensions and other post-employment benefits in Germany and a number of other countries. Changes in relevant measurement parameters such as interest rates, mortality and salary increase rates may raise the present value of the Group's pension obligations. This may lead to increased costs in connection with the Group's pension plans, diminish equity due to the recognition of actuarial losses or put pressure on the Group's credit rating. A large proportion of the Group's pension and other post-employment benefit obligations are covered by plan assets including fixed-income securities, shares, real estate and other investments. Declining or even negative returns on these investments may adversely affect the future fair value of plan assets. Both of these effects may negatively impact the development of equity, and may require additional payments by the Group. Also, future changes in certain legal environments, especially in local regulation, may in the future have negative effects on the Group's results and may also trigger the necessity for additional payments by the Group.

The Group may not be able to recruit or retain qualified employees, senior executives and other key members of management in the future, which could disrupt the Group's business.

Skilled and engaged employees, in particular chemists, engineers, senior executives and other key members of management, are essential to the Group's success. There is strong competition among companies for highly qualified personnel, particularly in countries with high levels of employment and in emerging economies such as those in APAC. If the Group is unable to create its own employer brand and/or recruit and retain a sufficient number of qualified employees, senior executives and other members of management, the Group's development could suffer significant adverse consequences.

The Group depends on good relations with its employees, unions and employee representatives to avoid business disruptions, implement restructurings, amend existing collective agreements and facilitate the negotiation of reasonable and fair wages, as well as other key working conditions.

Personnel expenses make up a significant portion of the Group's costs. Employees have traditionally been unionized, particularly in Germany and elsewhere in Europe. Some of the Group's employees in NAFTA, APAC and elsewhere are also organized in country-specific organizations. The Group regularly conducts, or is involved in, negotiations with labour union representatives and other employee representative bodies, such as works councils, and is obliged to comply with various collective agreements, such as collective bargaining agreements and works council agreements. Any failure by the Group or the employers' association of which it is a part to negotiate salaries, wages, and other key employment conditions that are reasonable and fair in the Group's perspective could materially adversely affect the Group's business, financial condition, results of operations and prospects. In addition, the successful implementation of restructurings is possible only if both a viable agreement with the Group's employees and their representatives and an agreement on any necessary amendment to existing works council agreements can be reached. Any material industrial action could adversely affect the Group's business, financial condition, results of operations and prospects.

Changes in foreign exchange rates could have material adverse effects on the Group's results of operations

Foreign currency risks for the Group result from exchange rate changes of financial and operational booked exposure (including receivables and payables) as well as from anticipated operational exposure. The exposures include raw materials and/or the sales of products priced in other currencies than the functional currency of the operating subsidiary. Unfavourable exchange rates may lead to higher costs or lower sales than expected at the time of signing the contract and may reduce margins.

The Group's reporting currency is the Euro. However, the Group conducts its business in a large number of countries across the globe and in several international currencies. In terms of the Group's results of operations, the U.S. dollar and the Chinese renminbi are the most important foreign currencies. Any change in exchange rates between foreign currencies and the Euro affects the Group's reported results of operations and assets and liabilities when the results of those subsidiaries are translated into Euro for reporting purposes. Unfavourable fluctuations in the values of the currencies in which the Group's international subsidiaries' financial statements are prepared against the Euro could have a material negative impact on the Group's future consolidated financial statements.

The exposure to exchange rate volatility could materially adversely affect the Group's business, financial condition, results of operations and prospects.

The terms of the Group's existing debt financings as well as credit market conditions, changes in interest rates and declines in credit ratings may restrict the Group's financial and operational flexibility.

Some of the financing agreements the Group has entered into with banks, other financial institutions or other creditors contain restrictions, undertakings, warranties, limitations as to further financing, covenants and definitions of events of default that may reduce the Group's financial and operational flexibility. Through cross-default clauses, the breach of covenants or other obligations of one or more financing agreements may lead to a default under other financing agreements. Any such restrictions contained in the Group's financing arrangements could also have a material adverse effect on its ability to react to changes in its business environment and its ability to incur additional debt to fund future liquidity requirements or re-financing. If the Group cannot meet its repayment obligations, it may have to pursue financial restructuring, which may be achieved only at increased cost or not at all and could materially adversely affect the Group's business, financial condition, results of operations and prospects.

Interest rate fluctuations could increase the interest expense on any outstanding floating interest debt of the Group, the cost of new financing and the valuation of the Group's defined benefit obligations. Furthermore a downgrade in the ratings of the Group or the debt securities of the Group could result in increased interest and other financial expenses related to future borrowings of the Group and could restrict the Group's access to additional capital or financing.

The Group's failure to protect its intellectual property and other proprietary information may materially adversely affect its business.

The Group's success depends to a significant degree upon its ability to protect, preserve and enforce its intellectual property and other proprietary information. However, the Group may be unable to prevent third parties from using its intellectual property and other proprietary information without its authorization or independently developing intellectual property that is similar to or competes with the Group's, particularly in those countries where the laws do not protect proprietary rights to the same degree as in Germany, the European Union or the United States. Any inability by the Group to effectively prevent the unauthorized use of its intellectual property and other proprietary information by others could reduce or eliminate any competitive advantage it has developed, cause it to lose sales or otherwise harm its business. If it becomes necessary for the Group to initiate litigation to protect its proprietary rights, any proceedings could be burdensome and costly, and the Group may not prevail.

The failure of the Group to protect its processes, product know-how, apparatuses, technology, trade secrets or proprietary know-how or the failure of adequate legal remedies for related actions could materially adversely affect the Group's business, financial condition, results of operations and prospects.

The Group may inadvertently infringe on the intellectual property rights of third parties and could be required to pay substantial damages and/or be enjoined from using or selling the infringing products or technology.

The Group continually seeks to improve its business processes and develop new production technologies and new products and applications. Many of its competitors have a substantial amount of intellectual property that the Group must continually strive to avoid infringing. Although it is the Group's policy and intention not to infringe valid patents of which it is aware, the Group cannot provide assurances that its processes and products and other activities do not and will not infringe issued patents (whether present or future) or other intellectual property rights belonging to others. The Group could be liable for infringement of intellectual property rights of third parties or could experience supply and production restrictions and disruptions as a result of actual or alleged infringements of intellectual property rights. The Group may also be subject to indemnity claims by its customers and business partners arising out of claims of their alleged infringement of the patents, trademarks and other intellectual property rights of third parties in connection with their use of the Group's products.

The Group may have to obtain third-party licenses to gain access to technology, which could entail considerable costs. The Group may be unable to acquire licenses that it will need for its future business with the appropriate scope, under acceptable conditions or at all. In addition, licenses the Group currently holds may not continue to be effective, and the Group may be prevented from making or marketing products.

Intellectual property litigation often is expensive and time-consuming, regardless of the merits of any claim, and the Group's involvement in such litigation could divert its management's attention from operating its business. Moreover, if the Group is sued for infringement and loses, the Group could be required to pay substantial damages and/or be enjoined from using or selling the infringing products or technology. Failure to avoid infringement of the

intellectual property held by third parties or disputes related to intellectual property could materially adversely affect the Group's business, financial condition, results of operations and prospects.

The Group may not have validly acquired intellectual property rights from its present or former employees and cooperation partners such as customers and research organizations in the past and potentially may not always validly acquire them in the future.

It is possible that the Group's present or former employees' and cooperation partners' intellectual property rights may not have been validly claimed by the Group. Present or former employees and cooperation partners could continue to hold rights to their intellectual property may demand the registration of intellectual property rights solely in their name and may also claim damages. In such cases, the Group may not be able to use the relevant intellectual property because the inventor may obtain an injunction prohibiting use. Furthermore, it is also possible that current or former employees and cooperation partners may have claims to inventor remuneration that must be fulfilled or that have not been completely fulfilled. In addition, it is possible that cooperation partners may have claims with respect to inventions made within the scope of cooperation. The realization of any of these risks could materially adversely affect the Group's business, financial condition, results of operations and prospects.

The Group's growth strategy contemplates business integrations and/or future acquisitions and divestments that the Group may not execute successfully.

The Group continuously evaluates opportunities for growth and change. These initiatives may involve making acquisitions, entering into partnerships, divesting assets and creating new financial structures—any of which could require a significant investment and subject it to new kinds of risks. The Group's failure to timely and effectively integrate and develop past and future acquisitions may materially adversely affect its results. If expected synergies are not fully realized, commitments are imposed or restructurings or integrations are more costly than initially anticipated, this may result in lower than expected results of operations and impaired goodwill. Anticipated synergies may not materialize and liabilities that are unknown at the time of the acquisition may also materialize and as a result the purchase price may later prove to have been too high. Acquisitions, in particular, may expose the Group to liabilities that are unknown at the time of the acquisition and which the Group may be unable to settle effectively such as legacy tax claims, claims from former employees and claims for breach of contract. In addition, the acquired company may not perform according to the Group's expectations or may fail. The Group may incur indebtedness to finance future initiatives. It could also issue additional shares of the Group or its subsidiaries to finance such initiatives. If the Group's strategies for growth and change are not successful, it could face increased financial pressure, such as increased cash flow demands, reduced liquidity and diminished access to financial markets and the equity value of its businesses could be diluted.

Although the Group's current and expected liquidity needs are covered in the medium term, the Group may require additional financial resources to fund any strategy for growth in the medium to long term, which may be difficult to obtain, or may result in higher costs and additional covenants.

The implementation of strategies for growth and change may create additional risks for the Group, including problems with effective integration of operations or separation of divested assets, diversion of management time and attention away from existing operations, requiring capital investment that could otherwise be used for the operation and growth of its existing businesses, disruptions to important business relationships, increased operating costs, usage of limited investment and other baskets under its debt covenants, difficulties due to lack of or limited prior experience in any new markets it may enter and difficulties in realizing projected efficiencies, synergies and cost savings, which could materially adversely affect the Group's business, financial condition, results of operations and prospects.

The Group may fail to realize anticipated benefits from joint ventures and may be unable to exit a joint venture in a timely manner or without penalty.

The Group has entered into, and may continue to enter into, joint ventures for a variety of reasons including to gain access to end markets, relevant know-how or to raw materials on preferential terms.

In some cases, the relevant partners provide or may provide a major portion of the capital investment for a project and/or provide raw or other materials, real estate, or other services. In the corresponding agreements, the Group may agree with the joint venture partners or the joint ventures to provide raw or other materials or to perform certain services for the project. If the Group fails to fulfil, or if a partner alleges that the Group failed to fulfil, its obligations under these contracts, either in whole or in part, the consequences may be claims for damages, contractual penalties, or termination of the joint venture by the partner or by the joint venture.

The success of a joint venture requires that the respective partners constructively pursue the same goals and may therefore be jeopardized or impaired due to a deadlock with or a breach of contract by, a partner, the joint venture, or through other unforeseen events. The Group may lack sufficient control over, and information regarding, its joint venture partners and must, to a certain extent, rely on their integrity. This is especially true for joint ventures in regions where the Group is a new entrant. Illegal or unethical activities by the joint venture partner may have negative consequences for the Group's reputation and may result in legal disputes, fines or other adverse consequences. In addition, technology and know-how may also be revealed or required to be revealed to joint venture partners and, particularly in countries with comparatively less stringent intellectual property protection, these partners may use this technology and know-how for their own purposes outside the scope of the venture. Non-competition and exclusivity undertakings in joint venture agreements may prevent the Group from rendering services or producing, marketing and distributing the relevant products for its own account in certain areas. Moreover, the Group may not be able to exit a joint venture in a timely manner, on acceptable terms, or at all, and such an action may be subject to the written approval of the joint venture partner, the Group's acquiring full ownership of the joint venture or rights of first offer.

To the extent such joint venture has been consolidated in the past, the Group may not be able to deconsolidate the joint venture. In the event of the loss of a joint venture partner, the Group may be required to make a compensation payment to such partner, and considerable resources may need to be invested in a new partnership. Alternatively, the Group may decide to exit a particular venture, in which case it may not be able to recover the investments it has made. In addition, conflicts with its partners or the failure of one of its joint ventures or joint undertakings could lead to the loss of the respective investment or financial penalties and prevent the Group from implementing its strategy. In many cases, joint venture agreements are subject to foreign laws, the effects of which is in some instances difficult to predict. Potential disputes with joint venture partners may fall under the jurisdiction of foreign courts or arbitral tribunals, which might lead to unforeseen obstacles or results. The realization of one or more of the above factors could materially adversely affect the Group's business, financial condition, results of operations and prospects.

The Group's international presence, complex group structure, competitive environment and large customer accounts create risks of illegal business practices and it must rely on a compliance system to prevent irregularities in its business activities.

The Group's significant global footprint across APAC, EMLA and NAFTA, its competitive environment and number of customer accounts create risks of illegal business practices, which could lead to sanctions from national or supranational authorities such as the European Commission, reputational damage or other risks. Furthermore, the Group's operations are located across many countries, and its size and complex group structure may lead to inefficiencies, inconsistent application of Group wide compliance and management standards and inadequate or delayed internal reporting to Covestro AG as publicly listed company. Although the Group maintains a compliance program—including a compliance management system—throughout the Group to mitigate legal compliance risks such as corruption or violations of antitrust laws, violations of the relevant laws and regulations may result in criminal or civil sanctions, including material monetary fines, penalties and other costs against the Group or its employees, and may have a material adverse effect on its business.

A compliance program is expensive to operate and maintain, and may prevent the Group from acting as rapidly as it otherwise could in pursuit of potentially profitable business opportunities or entering into some ventures. In addition, the complexities of such a program may require certain processes that are not completed in accordance with an imposed time frame and, therefore, lead the Group to forgo certain beneficial opportunities.

These risks, if they materialize, could materially adversely affect the Group's business, financial condition, results of operations and prospects.

The international nature of the Group's business exposes it to substantial changes in economic, political and social conditions and related risks that may be detrimental to its business and have a material adverse effect on the Group's prospects.

The Group sells its products worldwide and has a global production platform across countries, including emerging economies. Many of the agreements that the Group enters in connection with customers and suppliers are subject to foreign laws, the effects of which are in some instances difficult to predict. The general conditions in some of the countries in which the Group has production operations or into which it supplies products are different from, and the general economic, political and legal environment may be less stable than, those in Western Europe and North America. In particular, the Group's operations and its growth in emerging economies require it to respond to rapid

changes in conditions within legal and regulatory systems that are less developed and less well enforced than those in Western Europe and North America, which often has consequences on the prevailing political and social conditions. There is a risk that changes in these frameworks may materially adversely affect the Group's business environment. International operations are also at risk of being adversely affected by a variety of trade barriers, limits on the repatriation of profits, tariffs and exchange controls. Furthermore, processes of law may vary from country to country and the Group may experience difficulty enforcing agreements. The Group may face difficulties in managing sales, research and development operations and post-sales logistics and support across the regions in which it operates. The Group's overall success depends, in part, on its ability to succeed under a variety of different conditions. The Group may fail to develop and implement policies and strategies that are effective in each region and country in which it operates and such failure could materially adversely affect the Group's business, financial condition, results of operations and prospects.

Conflicts, military action, terrorist attacks, and general instability throughout the world could materially adversely affect the Group's business.

Conflicts, military action and terrorist attacks have precipitated economic instability and turmoil in the economies of some countries in which the Group operates, sells its products or on which the industry is particularly dependent such as energy-producing nations. Instability and turmoil, particularly in, or affecting, such countries, may lead to plant disruptions or result in raw material supply constraints, cost increases or an inability of the Group to conduct its business. The uncertainty and economic disruption resulting from hostilities, military action and acts of terrorism may impact any or all of the Group's facilities and operations or those of its suppliers or customers. Accordingly, any conflict, military action or terrorist attack could severely impact the supply of the Group's raw materials, sales, production operations and logistics, could lead to a loss of markets and could have a material adverse effect on its business, financial condition, results of operations and prospects.

The Group may be forced to make write-downs or additional impairments, in particular on tangible assets that reduce the value of the Group.

The Group is active in an industry that requires significant investments in its production facilities. Any such property, plant and equipment associated with the Group's operations and recorded on the balance sheet, as well as the existing intangibles including goodwill make the Group susceptible to impairments. Assets with a determined useful life are amortized accordingly on a straight-line basis over a period of up to 30 years. An impairment test is performed if there is an indication of possible impairment. Goodwill and other intangible assets are tested for impairment on an annual basis or in case of an indication of possible impairment. If the carrying amount of an asset or asset group may not be recoverable, impairment losses may be recorded in accordance with applicable accounting standards. Impairment charges could become necessary in the future if, for example, the Group's prospects deteriorate such that the carrying amounts of its assets are no longer recoverable under applicable accounting rules. According to applicable accounting rules the Group has to perform quantitative testing for all cash generating units. Since the Group utilizes a discounted cash flow methodology to calculate the fair value of its cash generating units, continued weak demand for a specific product line, oversupply in the industry, and high raw material prices could result in impairment. Accordingly, any impairment test requiring the write-down or additional impairment could materially adversely affect the Group's business, financial condition, results of operations and prospects.

The Group's reputation is one of its key assets and if it is harmed, the Group's business and results of operations may suffer.

The Group is exposed to the risk of negative publicity, press speculation and potential or actual legal proceedings concerning its business, which may harm its reputation. The development of a negative social perception for the chemical industry in general or the processes or products of the Group in particular could also have a negative impact on the reputation of the Group. The incorrect use and handling of the Group's products by third parties can also harm the Group's reputation. In addition, concerns about product safety and environmental protection could influence public perceptions regarding the Group's products and operations, the viability of certain products, its reputation, and the ability to attract and retain employees. Any significant damage to the Group's reputation could cause existing customers to terminate their relationship with the Group or prevent it from winning new contracts. Such general concerns may also lead to the increased scrutiny of authorities and more restrictive legislation. Any of these negative effects could materially adversely affect the Group's business, financial condition, results of operations and prospects.

The Group's business is subject to many operational risks for which it may not be adequately insured.

The Group believes that Covestro AG and its subsidiaries have reasonable insurance protection, to the extent customary in the industry. However, such insurance does not cover all risks associated with the operation of its business such as accidents and other events that could potentially lead to interruptions of its business operations or to it incurring significant costs, or with its production processes and the related use, storage and transportation of hazardous and non-hazardous raw materials, products and wastes in or from its production facilities or its distribution centres. In addition, the Group is exposed to legal liabilities such as environmental and product liability which may also not be fully covered by insurance. While the Group has purchased what it deems to be insurance coverage customary in the industry, such coverage is subject to limitations or exclusions, self-insured retentions and maximum limits of insurance. The Group is potentially at additional risk if one or more of the insurance companies it uses became insolvent. Additionally, severe disruptions in the financial markets could materially adversely impact the ratings and survival of some insurers. Future downgrades in the ratings of several insurers could materially adversely impact both the availability of appropriate insurance coverage and its cost. In the future, the Group may not be able to obtain coverage at current levels, if at all, and its premiums may increase significantly on coverage that it maintains, which may have a material adverse effect on its business, financial condition, results of operations and prospects.

The Group has a significant amount of debt that could materially adversely affect the Group's business.

The amount of debt that the Group has incurred could significantly affect the Group and the Group's investors: The Group may be required to use a substantial portion of the Group's cash flow from operations to make interest payments on this debt, which in turn reduces the cash flow available to fund capital expenditures and other corporate purposes and to grow the Group's business. As a consequence, the Group's vulnerability to generally adverse economic and industry conditions as well as the risk of a future downgrade of the Group's credit rating could increase. Further, future debt costs could increase and limit at the same time the future availability of debt financing, limiting the Group's ability to borrow additional funds as needed or take advantage of business opportunities as they arise. This could also limit the Group's flexibility in planning for, or reacting to, changes in the Group's business and the industry. The Group could consequently be placed at a competitive disadvantage to the Group's competitors that may not be as highly leveraged.

In addition, the Group's actual cash requirements in the future may be greater than expected. The Group's cash flow from operations may not be sufficient to repay all of the outstanding debt, and the Group may not be able to borrow money, sell assets or otherwise raise funds on acceptable terms, or at all, to refinance the debt. The significant amount of debt that the Group will carry after the separation may limit the flexibility of the Group to respond to future events and could materially adversely affect the Group's business, financial condition, results of operations and prospects.

Risks related to legal, regulatory and tax matters

Legal and regulatory changes in the jurisdictions in which it operates and trades may have an adverse effect on the Group.

Due to the international nature of its business, the Group must comply with, and is affected by, a large number of different legal and regulatory frameworks, including tax laws. There is a risk that changes in these frameworks may materially adversely affect the Group's legal and regulatory environment. The risks faced by the Group include, but are not limited to:

- foreign currency control regulations and other regulations related to exchange rates and foreign currencies (such as the abandonment of exchange rate pegs);
- changes in laws and regulations, in particular related to environment, health and safety;
- measures to counter foreign trade imbalances such as foreign direct investment controls and export controls;
- restrictions on the ability to repatriate funds from subsidiaries;
- restrictions on the ability to own or operate subsidiaries or acquire new businesses in certain countries, including rules on local ownership of businesses;

- differences in legal and administrative systems, which could lead to insufficient protection of intellectual property, impair the Group's ability to enforce contracts or jeopardize its ability to collect accounts receivables and other claims outstanding;
- nationalizations; and
- imposition of withholding or other taxes and transfer pricing regulations.

The materialization of any of these risks could severely impact the Group's sourcing, sales, production operations and logistics, could lead to a loss of customers and access to customers, know-how and tangible and intangible property, and could have material adverse effects on its business, net assets, financial condition, and results of operations.

The costs of complying with changing environmental, health and safety regulatory requirements could negatively impact the Group's financial results.

The Group uses large quantities of hazardous substances, generates hazardous wastes and emits wastewater and air pollutants in its production operations. Consequently, its operations are subject to extensive environmental, health and safety ("EHS") laws, regulations, rules and ordinances at the supranational, national and local level in multiple jurisdictions across APAC, EMLA and NAFTA. EHS regulations apply to most of the Group's activities and the Group must dedicate substantial resources to complying with them. The Group's cost of compliance with EHS regulations is part of its operating cost and, ultimately, must be covered by the prices at which the Group is able to sell its products.

Compliance with more stringent EHS regulations will likely increase the Group's operating costs including costs related to the transportation and storage of raw materials and finished products, as well as the costs of storage and disposal of waste. The Group's capital expenditures and costs relating to the implementation of EHS regulations will fluctuate due to factors that are out of the Group's control, such as the timing of the promulgation and enforcement of specific standards which impose requirements on the Group's operations. Capital expenditures and costs beyond those currently anticipated may therefore be required under existing or future EHS regulations. Accordingly, EHS regulations may cause the Group to incur significant unanticipated losses, costs or liabilities, which could reduce its profitability. In addition, laws and regulations may be newly imposed or amended on short notice, becoming more stringent in a short period of time. The Group may incur substantial costs, including penalties, fines, damages, criminal or civil sanctions and remediation costs, experience interruptions in its operations, or be required to cease operations in certain locations for failure to comply with these laws or permit requirements.

Changes in EHS regulations in jurisdictions where the Group produces and sells its products could also lead to a decrease in demand for its products. Concerns about product safety and environmental protection could influence public perception of the Group's products and operations, the viability of some or all of its products, its reputation, and the ability to attract and retain employees. Further to regulatory changes, health and safety concerns could increase the costs incurred by the Group's customers to use its products and otherwise limit the use of the Group's products, which could lead to decreased demand for these products. Such a decrease in demand would have a materially adverse effect on the Group's business and results of operation.

Given the diversification and global operations of the Group's business, there is an elevated risk that the Group may not comply with all applicable laws, regulations or permits in all the jurisdictions in which it operates. The significant number of EHS regulations differs across jurisdictions and results in a complex regulatory environment with which the Group must continually comply.

Moreover, even if the Group is in compliance with regulatory and permit requirements, the actions or regulatory non-compliance of other companies may lead to industry-wide investigations by regulatory authorities that could interrupt some or all of the Group's production operations for significant periods. The costs of complying with changing EHS regulations and the liabilities including penalties, fines, damages, criminal or civil sanctions and remediation costs the Group may incur for failing to adequately comply with applicable EHS regulations could materially adversely affect the Group's business, financial condition, results of operations and prospects.

Regulatory requirements to reduce emissions of greenhouse gases could have an adverse effect on the Group's results of operations.

Globally, the Group's operations are increasingly subject to regulations that seek to reduce emissions of greenhouse gases ("GHGs"), such as carbon dioxide and methane, which may be contributing to changes in the earth's climate.

Additional future regulation of GHGs could occur pursuant to future international treaty obligations, regulatory changes under national or local law in multiple jurisdictions or regional adoption of GHG regulatory schemes, or any combination of the foregoing or otherwise. Potential consequences of such regulations include capital costs to modify operations as necessary to meet GHG emission limits and additional energy costs, as well as direct compliance costs. Currently, however, it is not possible to estimate the likely financial impact of potential future regulation on any of the Group's production facilities, its products or its business. Regulatory requirements to reduce emissions of GHGs could materially adversely affect the Group's business, financial condition, results of operations and prospects.

The Group may be subject to losses due to liabilities or lawsuits related to contaminated land that it owns or operates or arising out of environmental damage or personal injuries associated with exposure to chemicals, the release of chemicals or other hazardous substances.

Many of the Group's sites have an extensive history of industrial operations, storage and related activities and some of the Group's buildings have in the past contained and may still contain asbestos or other harmful substances. In addition, the Group owns a large number of industrial sites containing, in some cases, pre-existing contamination requiring securing or remediation and the associated costs often cannot be estimated. The Group has been and is likely in the future to be liable for the costs of investigating and cleaning up or stabilizing environmental contamination on or from its properties or at off-site locations where it transported, disposed of or arranged for the disposal or treatment of hazardous materials and waste or from disposal activities that predated its purchase of its businesses. The Group may therefore incur additional costs and expenditures beyond those currently anticipated to address all such known and unknown situations under existing and future EHS regulations. In some countries in which the Group operates, the Group may also be exposed to claims for damages, penalties, operating restrictions or the revocation of permits to operate its sites.

In addition, the Group faces the risk that individuals could seek damages for personal injury due to exposure to chemicals or other hazardous substances at its production facilities or other business sites, chemicals or other hazardous substances that have been released from its production facilities or other business sites, chemicals or other hazardous substances otherwise owned or controlled by the Group, or chemicals or other hazardous substances that allegedly migrated from products containing the Group's products. Risks are inherent in the industry segments, particularly risks associated with safety, health and the environment. The Group is subject to numerous laws in the national and local jurisdictions in which it operates relating to the management of workplace risks associated with highly hazardous chemicals. Failure to comply with such laws could subject the Group to both civil and criminal penalties, which could affect its product sales, reputation and profitability. The Group may be subject to claims with respect to workplace exposure, workers' compensation and other health and safety matters.

The environmental liabilities at any particular production facility could increase as a result of, among other things, changes in laws and regulations, modifications to the site's investigation and remediation plans, unanticipated construction problems, identification of additional areas or quantities of contamination, increases in labor, equipment and technology costs, significant changes in the financial condition of the Group or other responsible parties and the outcome of any related legal and administrative proceedings to which the Group may become a party. Any increase in liability may be found to be outside the scope of the indemnity provided by the Bayer Group to the Group in the separation related agreements, resulting in increased costs payable by the Group. It is not possible for the Group to reasonably estimate the amount and timing of all future expenditures related to environmental or other contingent matters. Accruals for environmental matters are recorded by the Group when it is probable that a liability has been incurred and the amount of the liability can be reasonably estimated based on current law and existing technologies.

Liabilities or lawsuits related to contaminated land that the Group owns or operates or arising out of environmental damage or personal injuries associated with exposure to chemicals and the release of chemicals or other hazardous substances may materially adversely affect the Group's business, reputation, financial condition, results of operations and prospects.

The Group is exposed to ongoing litigation and other legal and regulatory actions and risks in the course of its business, and could incur significant liabilities and substantial legal fees.

The Group is subject to litigation and other legal and regulatory actions in the ordinary course of business. The results of litigation and other legal and regulatory actions cannot be predicted with certainty. The Group cannot guarantee that the results of current or future proceedings will not materially harm its business, reputation or

brands, nor can it guarantee that it will not incur losses in connection with current or future legal proceedings that exceed any provisions it may have set aside with respect to such proceedings or that exceed any applicable insurance coverage.

If any disputes, litigation or other legal or regulatory actions are resolved against the Group, it could incur significant liabilities or materially adversely affect the Group's business, reputation, financial condition, results of operations and prospects.

The Group may be liable for damages based on product liability claims brought against it or its customers or may be accused of having sold harmful products.

Many of the Group's products provide critical performance attributes to customers' products, which are in turn sold to consumers. If a product fails to perform in a manner consistent with quality specifications, a customer could seek replacement of the product or damages for costs incurred as a result of the product failing to perform as designed and marketed. The sale of these products may also give rise to product liability claims or other claims based on damage caused by the Group's products. If a consumer were to bring a product liability claim with respect to a product that contains the Group's products, the Group could be named as a defendant in that claim or could become subject to separate litigation brought by one of its customers. A successful claim or series of claims against the Group could cause reputational harm and could result in a loss of customers.

In addition, the Group's product portfolio contains some substances that are harmful to human health. Other products of the Group that are not currently considered harmful to human health may be discovered to be harmful to human health in the future, which could lead to liability claims. In addition, the Group's products, once integrated into consumer end products, may also be found to be harmful as medical knowledge about health risks related to exposure evolves. Any allegation of harm caused by a product of the Group may significantly negatively affect the Group's reputation. Any threatened or actual future claims for damages based on product liability could significantly harm the Group's reputation and, in turn, could materially adversely affect the Group's business, financial condition, results of operations and prospects.

The Group's business may suffer from trading sanctions and embargoes.

In the past the United States, the EU and the United Nations have increased their imposition of various export control regulations, sanctions and embargoes on trading with countries such as Iran, Syria, Sudan and others. Given the global nature of the Group's activities and operations, the Group conducts business with customers in countries that are subject to such export control regulations, embargoes, sanctions or other forms of trade restrictions. In case of non-compliance with such export control regulations, embargoes, sanctions or other forms of trade restrictions, civil or criminal penalties, including substantial monetary fines, may be imposed and/or other adverse financial consequences that could materially adversely affect the Group's business, financial condition, results of operations and prospects are possible. Furthermore, new or tightened export control regulations, sanctions, embargoes or other forms of trade restrictions imposed on countries in which the Group does business may result in a curtailment of its existing business in such countries and require it to amend and adapt its policies accordingly. The curtailment on the Group's activities in sanctioned countries may also expose it to customer claims and other actions. This may have a negative impact on the Group's business, financial condition, results of operations and prospects. In addition, competitors, distributors, suppliers and customers may not be able to comply with or may be otherwise affected by trading sanctions and embargoes. This may materially adversely impact the reputation of the Group and its products and in turn the Group's business.

The Group's tax burden could increase, in particular, as a result of tax audits, reassessments by the competent authorities and potential changes in applicable tax laws.

As an international group operating in multiple jurisdictions, the Group is subject to laws and regulations on tax levies and other charges or contributions in many countries throughout the world, which often do not provide clear-cut or definitive guidance. The tax charge included in the financial statements is the Group's best estimate of the due tax. There is a degree of uncertainty regarding the final tax liability for any period until completion of tax audits by the relevant authorities.

In connection with the separation from the Bayer Group, the Group is responsible for and has also agreed to indemnify certain companies of the Bayer Group, in particular, against additional tax liabilities arising from risks relating to transfer pricing adjustments and the unintended maintenance of permanent establishments, each in connection with activities of the MaterialScience business.

Reassessments of taxes, changes to tax laws, rules and regulations, including changes in the interpretation or implementation of tax laws, rules and regulations by domestic or foreign governmental bodies, could affect the Group in substantial and unpredictable ways. Such reassessments and changes could subject the Group to additional compliance costs and tax liabilities, which could materially adversely affect the Group's business, financial condition, results of operations and prospects.

The Group operates in a significant number of jurisdictions, which contributes to the volatility of its effective tax rate. Changes in tax laws or the interpretation of tax laws in the jurisdictions in which it operates may affect its effective tax rate. National and international adverse tax developments could thus materially adversely affect the Group's business, financial condition, results of operations and prospects.

There can be no assurance that the Group will be able to renew or maintain all necessary licenses, certificates, approvals and permits for its operations.

The Group, including its production facilities, infrastructure, products and waste disposal, is subject to various licenses, certificates, approvals and permits in different foreign jurisdictions. There can be no assurance that the Group will be able to renew or maintain its licenses, certificates, approvals and permits upon their expiration. In addition, licenses, certificates, approvals and permits currently held by the Group may be challenged in court by third parties. The introduction of any new and/or more stringent laws, regulation, licenses, certificates, approvals and permits requirements relevant to the Group's business operations may incur significant additional investment and maintenance costs to fulfil new regulatory requirements or may preclude it from continuing with its existing operation at some or all of its production facilities or may limit or prohibit it from expanding its business. In addition, relevant regulatory authorities may not grant licenses, certificates, approvals and permits as quickly as anticipated, which may result in project delays or the Group's production facilities laying idle for significant periods of time. The Group's inability to renew or maintain all necessary licenses, certificates, approvals and permits needed for its operations could materially adversely affect the Group's business, financial condition, results of operations and prospects.

Risks related to the Group's separation from the Bayer Group

The Group has no operating history as a separate company.

Prior to the separation from the Bayer Group, the Group's business was integrated with the other subgroups of the Bayer Group. Historically, the Group has shared economies of scale in costs, employees, and vendor relationships. While the Group has entered into transitional agreements that will govern certain commercial and other relationships between the Group and the Bayer Group, those transitional arrangements will not fully capture the benefits the Group's business has enjoyed as a result of being part of the Bayer Group. The loss of these benefits could have a material adverse effect on the Group.

Generally, the Group's working capital requirements and capital for the Group's general corporate purposes, including acquisitions, research and development and capital expenditures have historically been satisfied as part of the corporate wide cash management policies of the Bayer Group. As a separate company, the Group now needs to obtain additional financing from banks, public offerings or private placements of debt or equity securities, strategic relationships or other arrangements. As a fully stand-alone publicly-traded entity listed in the regulated market of the Frankfurt Stock Exchange (*Frankfurter Wertpapierbörse*) (Prime Standard), the cost of obtaining additional capital for the Group's business is likely to be higher than if it were a part of the Bayer Group.

It is uncertain how the Group will perform as a fully stand-alone publicly-traded entity. Significant changes may occur in the Group's cost structure, management, financing and business operations as a result of operating as a stand-alone publicly-traded entity separate from the Bayer Group, which could materially adversely affect the Group's business, financial condition, results of operations and prospects.

The Group's structure and business activities have recently undergone substantial organizational changes in the context of the separation.

The Group's structure and business activities have experienced substantial changes in recent periods in the context of the separation from the Bayer Group. The further implementation of such reorganization measures may require additional administrative resources and lead to additional expenses. The recent and prospective organizational changes made in connection with the Group's separation from the Bayer Group could materially adversely affect the Group's business, financial condition, results of operations and prospects.

The separation from the Bayer Group may lead to the loss of business opportunities and decreased purchasing power and result in a loss of synergies.

As part of the Bayer Group, the Group was able to take advantage of the Bayer Group's long-standing reputation, size and purchasing power in procuring goods, services and technology, such as management information services, software licenses, health insurance, pension and other employee benefits, payroll administration, risk management, tax, various forms of energy such as electricity and steam and other services. As a separate, stand-alone entity the Group may lose, or may find it difficult to access, certain goods, services and technologies. The Group may have to pay higher costs due to a decline in purchasing scale if the Group is unable to obtain other similar goods, services and technologies at prices or on terms as favourable as those obtained prior to the separation from the Bayer Group. The operation as a separate company could materially adversely affect the Group's business, financial condition, results of operations and prospects.

The Group has not previously operated as a stand-alone publicly listed company and may be unable to operate effectively and fully implement its business strategy.

The Group has not previously operated as a stand-alone publicly listed company, and the Group's management has limited experience, as a group, in operating the Group's business as a stand-alone publicly listed company. As a separate company the Group is now fully responsible for arranging the Group's own funding, managing all of the Group's own administrative and employee arrangements and supervising all of the Group's legal and financial affairs, including financial reporting requirements. The inability of the management board or senior management to function cohesively could delay or prevent the Group from fully implementing the Group's business strategy, which could materially adversely affect the Group's business, financial condition, results of operations and prospects.

The Group may not realize potential benefits from the separation of its business from the Bayer Group's other businesses.

The Group may be unable to realize the potential benefits that it expects by separating from Bayer Group. These benefits include the ability of the Group to focus on its own strategic and operational plans, a more efficient allocation of capital for the Group, a distinct investment identity allowing investors to evaluate the merits, performance and future prospects of the Group separately from those of the Bayer Group, and a better tailoring of internal procedures to the nature of the Group's business and developing effective equity-based compensation to achieve greater alignment of management interests with the Group's business.

If the Group is unable to achieve some or all of the benefits expected to result from the separation from the Bayer Group, or if such benefits are delayed, it could materially adversely affect the Group's business, financial condition, results of operations and prospects.

The Group may be unable to subsequently perform or replace the transitional services provided to the Group by the Bayer Group for a limited period of time without operational problems or additional cost.

The Group has entered into various transitional services agreements with the Bayer Group pursuant to which the Group and the Bayer Group and the Group's and the Bayer Group's respective affiliates provide to each other certain transitional services for a period of time after the separation from the Bayer Group. These services include, among others, information technology services, human resource services, accounting services, and other support services.

It is possible that the transitional services agreements together with additional long-term service agreements will be insufficient to cover the Group's needs as a stand-alone company or that it may contain terms and conditions that are not favourable or competitive. Failure by Bayer Group to perform the services provided for under the transitional services agreements may result in operational problems and increased costs to the Group. If, after the expiration of the transitional services agreements, the Group is unable to perform these services or replace them in a timely manner or on reasonable terms, the Group may experience operational problems and increased costs to the Group. The transitional services to be provided by the Bayer Group may not function as efficiently as they did when the Group was a part of the Bayer Group and the Group may find it difficult to find an adequate replacement to provide similar services, which could materially adversely affect the Group's business, financial condition, results of operations and prospects.

The Group may be required to indemnify Bayer AG against possible tax claims

In connection with a Contribution, Indemnification and Post-Formation Agreement between Bayer AG and Covestro AG dated September 17, 2015 arrangements were made to settle possible claims for taxes. These arrangements may result in corresponding cash outflows at Covestro Group.

Furthermore, the Covestro Group may be required to indemnify Bayer AG against possible U.S. tax claims. Covestro LLC (formerly Bayer MaterialScience LLC) is an indirect wholly owned subsidiary of Covestro AG. Prior to Covestro AG's acquisition of its indirect ownership of the shares of Covestro LLC and in furtherance of the separation of the MaterialScience division from other Bayer business divisions, the MaterialScience division in the United States was reorganized such that ownership of Covestro LLC was transferred in a series of transactions that were intended to enable Bayer Corporation and Covestro LLC to operate as independent companies. In connection with the separation, Bayer Corporation distributed the stock of Covestro LLC to Bayer US Holding LP, Bayer US Holding LP distributed the stock of Covestro LLC to Bayer Worldwide Investments BV, and Bayer Worldwide Investments BV distributed the stock of Covestro LLC to Bayer AG in transactions that were intended to be tax-free for U.S. federal income tax purposes (the "**Distributions**"). Bayer Corporation received opinions of tax counsel as to the tax-free nature of the Distributions. Notwithstanding receipt by Bayer Corporation of the opinions of tax counsel, the U.S. Internal Revenue Service (the "**IRS**") could assert that the Distributions do not qualify for tax-free treatment for U.S. federal income tax purposes. If the IRS were successful in taking this position, Bayer Corporation and Bayer US Holding LP could be subject to significant U.S. federal income tax liability. In addition, the Distributions would be taxable to Bayer Corporation if the Distributions were later determined to be part of a plan (or series of related transactions) pursuant to which one or more persons acquire directly or indirectly stock representing a 50% or greater interest in Covestro LLC. For this purpose, direct or indirect acquisitions of the stock of Covestro LLC within the period beginning two years before the Distributions and ending two years after the Distributions are generally presumed to be part of such a plan, although this presumption is rebuttable.

Pursuant to the tax sharing agreement between Bayer AG, Bayer US Holding LP, Bayer Corporation, Covestro LLC and Covestro Deutschland AG dated December 31, 2014 as amended by an amendment agreement dated September 16, 2015 (the "**Tax Sharing Agreement**") Covestro LLC has agreed to indemnify Bayer US Holding LP and its affiliates against tax-related liabilities, if any, caused by the failure of the Distributions to qualify as tax-free transactions if the failure to so qualify is attributable to actions by Covestro Deutschland AG, Covestro LLC or its affiliates after the Distributions, including actions that are inconsistent with the representations and covenants provided in connection with the opinions of tax counsel issued in connection with the Distributions. In addition, pursuant to the tax covenants agreement dated September 17, 2015, between Bayer AG, Bayer US Holding LP, Bayer Corporation, and Covestro AG (the "**Tax Covenants Agreement**"), Covestro AG agreed (i) to compensate Bayer AG in the amount resulting from tax-related liabilities caused by the failure of the Distributions to qualify as tax-free transactions (if the breach of the restrictions imposed on Covestro AG causes such tax-related liabilities) or (ii) to indemnify Bayer AG and its affiliates, as well as their respective directors, officers and employees, and hold them harmless from and against any tax-related liabilities caused by the failure of the Distributions to qualify as tax-free transactions (unless Covestro AG can prove that (x) an action of Bayer AG or any of its affiliates did cause such tax-related liabilities or (y) such tax-related liabilities would have been triggered even if Covestro AG had not breached the restrictions imposed on it). If the failure of the Distributions to qualify for tax-free treatment is for any reason for which none of Bayer AG, Bayer US Holding LP (and its affiliates), Covestro AG, Covestro Deutschland AG or Covestro LLC (and its affiliates) is responsible, each of Bayer US Holding LP and Covestro LLC has agreed in the Tax Sharing Agreement to be responsible for 50% of the tax-related liabilities arising from the failure of the Distributions to qualify as tax-free transactions. Covestro LLC's indemnification obligations to Bayer US Holding LP and its affiliates are not limited in amount or subject to any cap and Covestro AG's indemnification obligations to Bayer AG and its affiliates is under some circumstances subject to a cap agreed with Bayer AG. The amount to be indemnified by Covestro LLC and/or Covestro AG could be significant notwithstanding the cap that is applicable in some circumstances.

Risk Factors relating to the Notes

The Notes may not be a suitable investment for all investors

Each potential investor in the Notes must determine whether or not the Notes represent a suitable investment in light of that investor's own circumstances. The Notes are only suitable for sophisticated investors that:

- (i) have sufficient knowledge and experience to make a meaningful evaluation of the Notes, the merits and risks of investing in the Notes and the information contained or incorporated by reference in this Base Prospectus or any applicable supplement;
- (ii) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation, an investment in the Notes and the impact the Notes will have on its overall investment portfolio;
- (iii) have sufficient financial resources and liquidity to bear all of the risks of an investment in the Notes, including Notes where the currency for principal or interest payments is different from the potential investor's currency;
- (iv) understand thoroughly the terms of the Notes and be familiar with the behaviour of any relevant indices and financial markets; and
- (v) be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

Risks related to the structure of a particular issue of Notes

A wide range of Notes may be issued under the Programme. A number of these Notes may have features which contain particular risks for potential investors. Set out below is a description of the most common such features:

Early Redemption by the Issuer

At the Issuer's option, the Notes may be redeemed prior to the Maturity Date at par plus accrued interest if, as a result of a future change of the laws applicable in Germany the Issuer will be obliged to pay Additional Amounts.

If provided for in any Final Terms for a particular Series of Notes, the Notes may be redeemed prior to the Maturity Date (i) at the option of the Issuer on any Call Redemption Date or (iii) at the option of the Issuer at the Make-Whole Redemption Amount, or (iii) at the option of the issuer upon occurrence of a transaction related event, or (iv) for a minimal outstanding principal amount. If the Notes of any Series are redeemed earlier than expected by a Noteholder, a Noteholder is exposed to the risk that due to the early redemption his investment will have a lower than expected yield and to the risks connected with any reinvestment of the cash proceeds received as a result of the early redemption. The redemption amount may be lower than the then prevailing market price of and the purchase price for the Notes paid by the Noteholder for the Notes so that the Noteholder in such case would not receive the total amount of the capital.

Notes issued at a substantial discount or premium

The market values of Notes issued at a substantial discount or premium from their principal amount tend to fluctuate more in relation to general changes in interest rates than do prices for conventional interest-bearing securities. Generally, the longer the remaining term of the Notes, the greater the price volatility as compared to conventional interest-bearing securities.

No limitation on issuing debt

There is no restriction on the amount of liabilities which the Issuer may issue. The Issuer and its subsidiaries and affiliates may incur additional indebtedness or grant guarantees in respect of indebtedness of third parties. If the Issuer's financial condition were to deteriorate, the relevant Noteholders could suffer direct and materially adverse consequences, including (if so specified in the relevant Final Terms) suspension, deferral or cancellation of interest and, if the Issuer were liquidated (whether voluntarily or involuntarily), loss by the relevant Noteholders of their entire investment.

Amendments to the Terms and Conditions by resolution of the Noteholders

The Terms and Conditions may be amended by the Issuer with consent of the Noteholders by way of a majority resolution in a Noteholders Meeting or by a vote not requiring a physical meeting (*Abstimmung ohne Versammlung*) as described in Sections 5 et seq. of the German Act on Issues of Debt Securities (*Gesetz über Schuldverschreibungen aus Gesamtemissionen*, "**SchVG**"), the Issuer may subsequently amend the Terms and Conditions with the consent of the majority of Noteholders as described in § 14 of the Terms and Conditions, which amendment will be binding on all Noteholders of the relevant Series of Notes, even on those who voted against the change.

Therefore, a Noteholder is subject to the risk of being outvoted by a majority resolution of the Noteholders. As such majority resolution is binding on all Noteholders of a particular Series of Notes, certain rights of such Noteholder against the Issuer under the Terms and Conditions may be amended or reduced or even cancelled, which may have significant negative effects on the value of the Notes and the return from the Notes.

The Noteholders may by majority resolution provide for the appointment or dismissal of a joint representative. If a joint representative is appointed a Noteholder may be deprived of its individual right to pursue and enforce a part or all of its rights under the Terms and Conditions against the Issuer, such right passing to the Noteholders' joint representative who is then exclusively responsible to claim and enforce the rights of all the Noteholders.

Market risks

Market volatility and other factors

The trading market for debt securities may be volatile and may be adversely impacted by many events.

The market for debt securities is influenced by economic and market conditions in Germany and, to varying degrees, by market conditions, interest rates, currency exchange rates and inflation rates in other European and other industrialised countries. There can be no assurance that events in Germany, Europe or elsewhere will not cause market volatility or that such volatility will not adversely affect the price of Notes or that economic and market conditions will not have any other adverse effect.

No active trading market

An active trading market for the Notes may not develop.

There can be no assurance that an active trading market for the Notes will develop or, if one does develop, that it will be maintained. If an active trading market for the Notes does not develop or is not maintained, the market or trading price and liquidity of the Notes may be adversely affected.

The Issuer or its affiliates are entitled to buy and sell the Notes for their own account or for the account of others, and to issue further Notes. Such transactions may favourably or adversely affect the price development of the Notes. If additional and competing products are introduced in the markets, this may adversely affect the value of the Notes.

Exchange rate risk, exchange controls and redenomination risk

The Issuer will pay principal and interest on the Notes in the Specified Currency. This presents certain risks relating to currency conversions if an investor's financial activities are denominated principally in a currency or currency unit (the "**Investor's Currency**") other than the Specified Currency. These include the risk that exchange rates may significantly change (including changes due to devaluation of the Specified Currency or revaluation of the Investor's Currency) and the risk that authorities with jurisdiction over the Investor's Currency may impose or modify exchange controls. An appreciation in the value of the Investor's Currency relative to the Specified Currency would decrease (i) the Investor's Currency-equivalent yield on the Notes, (ii) the Investor's Currency equivalent value of the principal payable on the Notes and (iii) the Investor's Currency equivalent market value of the Notes.

Government and monetary authorities may impose (as some have done in the past) exchange controls that could adversely affect an applicable exchange rate. As a result, investors may receive less interest or principal than expected, or no interest or principal.

In the case of any Notes for which the redenomination clause is applicable, the Specified Currency of the Series may be redenominated (in whole but not in part) to the New Currency if the relevant member state of the European

Monetary Union identified by the Final Terms redenominates its public debt to a currency other than the Euro (the "**New Currency**"). An investor could become newly exposed to the exchange rate risks and risk of exchange controls described above by such redenomination.

Interest rate risks for Fixed Rate Notes

Investment in Fixed Rate Notes involves the risk that subsequent changes in market interest rates may adversely affect the value of the Fixed Rate Notes. Noteholders are exposed to the risk that the price of such Notes may fall because of changes in the market yield. While the nominal interest rate (i.e. the coupon) of the Notes is fixed, the market yield typically changes on a daily basis. As the market yield changes, the price of the Notes changes in the opposite direction. If the market yield increases, the price of the Notes falls. If the market yield falls, the price of the Notes increases. Noteholders should be aware that movements of the market yield can adversely affect the price of the Notes and can lead to losses for the Noteholders.

Noteholders should also be aware that the market yield has two components, namely the risk free rate and the credit spread. The credit spread is reflective of the yield that investors require in addition to the yield on a risk free investment of equal tenor as a compensation for the risks inherent in the Notes. The credit spread changes over time and can decrease as well as increase for a large number of different reasons. The market yield of the Notes can change due to changes of the credit spread, the risk free rate, or both.

In addition, Noteholders are exposed to reinvestment risk with respect to proceeds from coupon payments or early redemptions by the issuer. If the market yield (or market spread respectively) declines, and if Noteholders want to invest such proceeds in comparable transactions, Noteholders will only be able to reinvest such proceeds in comparable transactions at the then prevailing lower market yields (or market spreads respectively).

Interest rate risks for Floating Rate Notes.

A key difference between Floating Rate Notes and Fixed Rate Notes is that interest income on Floating Rate Notes cannot be anticipated. Due to varying interest income, investors are not able to determine a definite yield of Floating Rate Notes at the time they purchase them, so that their return on investment cannot be compared with that of investments having a longer term with fixed interests.

Since the Margin, if any, is fixed at issuance of the Notes, Noteholders are subject to the risk that the Margin does not reflect the spread that investors require in addition to the relevant reference interest rate as a compensation for the risks inherent in the Notes ("market spread"). The market spread typically changes on a daily basis. As the market spread changes, the price of the Note changes in the opposite direction. A decrease of the market spread has a positive impact on the price of the Note, an increase of the market spread has a negative impact on the price of the Note. However, the price of the Notes is subject to changes in the market spread, changes in the reference interest rate or both. Noteholders should be aware that movements of the market spread can adversely affect the price of the Notes and can lead to losses for the Noteholders.

In addition, Noteholders are exposed to reinvestment risk with respect to proceeds from interest payments or any early redemptions by the Issuer. If the market yield (or market spread respectively) declines, and if Noteholders want to invest such proceeds in comparable transactions, Noteholders will only be able to reinvest such proceeds in comparable transactions at the then prevailing lower market yields (or market spreads respectively).

Credit ratings may not reflect all risks and may be subject to change at all times

One or more independent credit rating agencies may assign credit ratings to the Notes.

The ratings may not reflect the potential impact of all risks related to structure, market, additional factors discussed above, and other factors that may affect the value of the Notes. A credit rating is not a recommendation to buy, sell or hold securities and may be revised or withdrawn by the rating agency at any time. Rating agencies may also change their methodologies for rating securities in the future. If the rating agencies were to change their practices for rating such securities in the future and the ratings of the Notes were to be subsequently lowered, this may have a negative impact on the trading price of the Notes.

The market value of the Notes could decrease if the creditworthiness of the Covestro Group worsens

If the likelihood that the Issuer will be in a position to fully perform all obligations under the Notes when they fall due decreases, for example, because of the materialisation of any of the risks regarding the Covestro Group or Covestro AG, the market value of the Notes will suffer. In addition, even if the likelihood that the Issuer will be in

position to fully perform all obligations under the Notes when they fall due actually has not decreased, market participants could nevertheless have a different perception. In addition, the market participants' estimation of the creditworthiness of corporate debtors in general or debtors operating in the same business as the Covestro Group could adversely change. If any of these risks occurs, third parties would only be willing to purchase Notes for a lower price than before the materialisation of this risk. Under these circumstances, the market value of the Notes will decrease.

Legal investment considerations may restrict certain investments

The investment activities of certain investors are subject to legal investment laws and regulations, or review or regulation by certain authorities. Each potential investor should consult its legal advisers to determine whether and to what extent (i) Notes are legal investments for it, (ii) Notes can be used as collateral for various types of borrowing and (iii) other restrictions apply to its purchase or pledge of any Notes. Financial institutions should consult their legal advisors or the appropriate regulators to determine the appropriate treatment of Notes under any applicable risk-based capital or similar rules.

Special investment risks

Transaction costs

An actual yield on the Notes may be reduced from the stated yield by transaction costs.

When Notes are purchased or sold, several types of incidental costs (including transaction fees and commissions) are incurred in addition to the current price of the security. These incidental costs may significantly reduce or even exclude the profit potential of the Notes. For instance, credit institutions as a rule charge their clients for own commissions which are either fixed minimum commissions or pro-rata commissions depending on the order value. To the extent that additional – domestic or foreign – parties are involved in the execution of an order, including but not limited to domestic dealers or brokers in foreign markets, Noteholders must take into account that they may also be charged for the brokerage fees, commissions and other fees and expenses of such parties (third party costs).

In addition to such costs directly related to the purchase of Notes (direct costs), Noteholders must also take into account any follow-up costs (such as custody fees). Investors should inform themselves about any additional costs incurred in connection with the purchase, custody or sale of the Notes before investing in the Notes.

Noteholders must further take into account that upon sales or purchases of Notes prior to an interest payment date (depending on their type and features), respectively, no accrued interest might be paid or charged, as the case may be.

Margin lending

Margin lending, where it is permitted, can materially increase the risk to a Noteholder of non-performance of the Notes.

If a loan is used to finance the acquisition of the Notes and the Notes subsequently go into default, or if the trading price diminishes significantly, the Noteholder not only has to face a potential loss on its investment, but it will also have to repay the loan and pay interest thereon. This may significantly increase the risk of a loss. Investors should not assume that they will be able to repay the loan or pay interest thereon from the profits of a transaction. Instead, investors should assess their financial situation prior to an investment, as to whether they are able to pay interest on the loan, or to repay the loan on demand, even if they may suffer losses instead of realising gains.

Tax impact of the investment

An effective yield on the Notes may be diminished by the tax impact on an investment in the Notes.

Payments of interest on the Notes, or profits realised by the Noteholder upon the sale or repayment of the Notes, may be subject to taxation in its home jurisdiction or in other jurisdictions in which it is required to pay taxes. The tax impact on Noteholders generally in Germany is described below, see "TAXATION – Federal Republic of Germany". However, the tax impact on an individual Noteholder may differ from the situation described for Noteholders generally.

All investors are advised to contact their own tax advisors for advice on the tax impact of an investment in the Notes. Examples of taxation risks that investors should consider together with their advisors include the risk of double taxation (in Germany and their home jurisdiction) and uncertainties as to financial transaction tax.

U.S. Foreign Account Tax Compliance Withholding

The United States enacted rules, commonly referred to as the Foreign Account Tax Compliance Act ("**FATCA**"), that generally impose a new reporting and withholding regime with respect to certain U.S. source payments (including dividends and interest), gross proceeds from the disposition of property that can produce U.S. source interest and dividends and certain other payments made by entities that are classified as financial institutions under FATCA. The United States has entered into intergovernmental agreements ("**IGA**") regarding the implementation of FATCA with several other states, including Germany. Currently the Issuer qualifies as non-financial institution according to the German IGA and the Paying Agent qualifies as a Reporting Model 1 FFI under FATCA and thus payments made on or with respect to the Notes are not expected to be subject to withholding under FATCA. However, significant aspects of when and how FATCA will apply remain unclear or may change, and the status of the Issuer and the Paying Agent under FATCA may also change, and no assurance can be given that withholding under FATCA will not become relevant with respect to payments made on or with respect to the Notes in the future.

FATCA may affect payments to any ultimate investor that is a financial institution that is not entitled to receive payments free of withholding under FATCA, or an ultimate investor that fails to provide a financial institution with any information, forms, other documentation or consents that may be necessary for the payments to be made free of FATCA withholding. Investors should consult their own tax adviser to obtain a more detailed explanation of FATCA and how FATCA may affect them.

GENERAL DESCRIPTION OF THE PROGRAMME

Under the EUR 5,000,000,000 Debt Issuance Programme (the "**Programme**"), Covestro AG (the "**Issuer**"), subject to compliance with all relevant laws, regulations and directives, may from time to time issue notes (the "**Notes**") to one or more of the following Dealers: Deutsche Bank Aktiengesellschaft, Citigroup Global Markets Limited, J.P. Morgan Securities plc, Société Générale, Merrill Lynch International, UniCredit Bank AG and any additional Dealer appointed under the Programme from time to time by the Issuer, which appointment may be for a specific issue ("**Dealer of the Day**") or on an ongoing basis (together, the "**Dealers**").

Deutsche Bank Aktiengesellschaft acts also as arranger in respect of the Programme (the "**Arranger**")

The aggregate principal amount of Notes outstanding will not at any time exceed EUR 5,000,000,000 (or the equivalent in other currencies) (the "**Programme Amount**"). The Issuer may increase the Programme Amount in accordance with the terms of the Dealer Agreement (as defined below) from time to time.

Notes issued under the Programme may be issued either: (1) pursuant to this Base Prospectus and associated Final Terms; or (2) pursuant to a Specific Prospectus (as defined below); or (3) in relation to Notes not publicly offered in, and not listed on a regulated market of, any member state of the European Economic Area in such form as agreed between the Issuer, the relevant Dealer(s) and, if relevant for the Fiscal Agent (as defined below), the Fiscal Agent.

"**Specific Prospectus**" means any prospectus prepared by the Issuer in relation to Notes issued under the Programme and having terms not contemplated by the Base Prospectus as Option I or Option II, which may incorporate by reference certain parts of the Base Prospectus and which constitutes a prospectus for the purposes of Article 5.3 or 5.4, as the case may be, of the Prospectus Directive, including any documents which are from time to time incorporated by reference in the Specific Prospectus, as such Specific Prospectus is amended, supplemented or replaced from time to time.

Deutsche Bank Aktiengesellschaft will act as fiscal agent (the "**Fiscal Agent**") and paying agent (the "**Paying Agent**").

The Notes will be issued in series (each a "**Series**"). Each Series may be issued in tranches (each a "**Tranche**") being intended to be interchangeable with all other Notes of the same Series issued on the same or different issue dates. The specific terms of each Tranche issued under this Base Prospectus (which, save in respect of the issue date, issue price, first payment of interest and principal amount of the Tranche, will be identical to the terms of all other Tranches of the same Series) will be set out in the relevant final terms for such Tranche (the "**Final Terms**").

Notes may be distributed by way of public offer or private placements and, in each case, on a syndicated or non-syndicated basis. The method of distribution of each Tranche will be stated in the relevant Final Terms. The Notes may be offered to qualified and non-qualified investors.

The Commission de Surveillance du Secteur Financier (the "**CSSF**") of the Grand Duchy of Luxembourg in its capacity as competent authority (the "**Competent Authority**") under the Prospectus Directive has approved this Base Prospectus as a base prospectus within the meaning of Art. 5(4) of the Prospectus Directive pursuant to article 7 of the Luxembourg Prospectus Law. By approving this Base Prospectus, CSSF gives no undertaking as to the economic and financial soundness of the operation or the quality or solvency of the Issuer.

Application has also been made to the Luxembourg Stock Exchange for Notes issued under the Programme to be listed on the official list of the Luxembourg Stock Exchange (the "**Official List**") and to be admitted to trading on the Luxembourg Stock Exchange's regulated market "Bourse de Luxembourg", appearing on the list of regulated markets issued by the European Commission) and may be made on any other regulated market in a Member State (a "**Regulated Market**") of the European Economic Area ("**EEA**"). The Luxembourg Stock Exchange's regulated market is a regulated market for the purposes of MiFID. However, Notes may be listed on any other stock exchange or may be unlisted as specified in the relevant Final Terms.

The Notes may be offered to the public in the Grand Duchy of Luxembourg (Luxembourg). The Issuer has requested the CSSF in its capacity as Competent Authority under Luxembourg Prospectus Law to provide the competent authorities in Germany, Austria and The Netherlands with a certificate of approval attesting that this Base Prospectus has been drawn up in accordance with the Luxembourg Prospectus Law. The Issuer may request the CSSF to provide competent authorities in additional host member states within the European Economic Area with such notification.

The offer and distribution of any Notes of any Tranche in jurisdictions other than Luxembourg will be subject to selling restrictions, including those for the United States, the European Economic Area and the United Kingdom. See "*Subscription and Sale*" below.

The Notes will be issued in compliance with U.S. Treas. Reg. §1.163-5(c)(2)(i)(D) (the "**D Rules**").

Issuances of Notes under the Programme will be made pursuant to Category 2 for the purposes of Regulation S under the United States Securities Act of 1933, as amended.

Each Tranche of Notes will be represented on issue by a temporary global note (each a "**Temporary Global Note**"). Interests in a Temporary Global Note will be exchangeable, in whole or in part, for interest in a permanent global note (each a "**Permanent Global Note**") on or after the date 40 days after the later of the commencement of the offering and the relevant issue date (the "**Exchange Date**"), upon certification as to non-U.S. beneficial ownership. The Notes are intended to be held in a manner, which would allow Eurosystem eligibility. Therefore, the Global Notes will be deposited on the issue date either (i) in classical global note form with Clearstream Banking AG, Frankfurt am Main or (ii) in new global note form with a common safekeeper for Euroclear and Clearstream, Luxembourg and/or any other agreed clearing system. It does not necessarily mean that the Notes will be recognised as eligible collateral for Eurosystem monetary policy and intra-day credit operations by the Eurosystem either upon issue or at any or all times during their life. Such recognition will depend upon satisfaction of the Eurosystem eligibility criteria applicable from time to time.

The Notes will be freely transferable in accordance with the rules and regulations of the relevant Clearing System.

Notes will be issued in such denominations as may be agreed between the Issuer and the relevant Dealer(s) and as indicated in the applicable Final Terms save that the minimum denomination of the Notes will be, if in euro, EUR 1,000, and, if in any currency other than euro, an amount in such other currency at least equivalent to EUR 1,000 at the time of the issue of Notes. Subject to any applicable legal or regulatory restrictions, and requirements of relevant central banks, Notes may be issued in euro or any other currency.

Notes will be issued with such maturities as may be agreed between the Issuer and the relevant Dealer(s), subject to such minimum or maximum maturities as may be allowed or required from time to time by any laws, regulations and directives applicable to the Issuer or the relevant currency.

The principal amount of the Notes, the currency, the interest payable in respect of the Notes, if any, the issue price (which may be at par or at a discount to, or premium over, par) and maturities of the Notes which are applicable to a particular Series and, if applicable, Tranche will be set out in the relevant Final Terms.

Notes of any Tranche may be issued at a price (the "**Issue Price**") equal to their principal amount or at a discount or premium to their principal amount. The Issue Price for the Notes of any Tranche issued on a syndicated basis will be determined at the time of pricing on the basis of a yield which will be determined on the basis of the orders of the investors which are received by the Dealers during the offer period. Orders will specify a minimum yield and may only be confirmed at or above such yield. The resulting yield will be used to determine the Issue Price all to correspond to the yield.

The Notes issued under this Base Prospectus will be issued as fixed or floating rate Notes.

The yield for Notes with fixed interest rates will be calculated by the use of the ICMA method, which determines the effective interest rate of notes taking into account accrued interest on a daily basis.

ISSUE PROCEDURES

General

The Issuer and the relevant Dealer(s) will agree on the terms and conditions applicable to each particular Series and Tranche of Notes (the "**Conditions**"). The Conditions will be constituted by the relevant set of Terms and Conditions set forth below in the Base Prospectus as further specified by the relevant Final Terms as described below.

Options for sets of Terms and Conditions

A separate set of Terms and Conditions applies to each type of Notes, as set forth below. The Final Terms provide for the Issuer to choose between the following Options:

- Option I – Terms and Conditions for Notes with fixed interest rates; and
- Option II – Terms and Conditions for Notes with floating interest rates.

Documentation of the Conditions

The Issuer may document the Conditions of an individual issue of Notes in either of the following ways:

- The Final Terms shall be completed as set out therein. The Final Terms shall determine which of the Option I or Option II, including certain further options contained therein, respectively, shall be applicable to the individual Series and Tranche of Notes by replicating the relevant provisions and completing the relevant placeholders of the relevant set of Terms and Conditions as set out in the Base Prospectus in the Final Terms. The replicated and completed provisions of the set of Terms and Conditions alone shall constitute the Conditions which will be attached to each global note representing the Notes of the relevant Tranche. This type of documentation of the Conditions will be required where the Notes are publicly offered, in whole or in part, or are to be initially distributed, in whole or in part, to non-qualified investors.
- Alternatively, the Final Terms shall determine which of Option I or Option II and of the respective further options contained therein are applicable to the individual issue by referring to the relevant provisions of the relevant set of Terms and Conditions as set out in the Base Prospectus only. The Final Terms will specify that the provisions of the Final Terms and the relevant set of Terms and Conditions as set out in the Base Prospectus, taken together, shall constitute the Conditions. Each global note representing a particular Tranche of Notes will have the Final Terms and the relevant set of Terms and Conditions as set out in the Base Prospectus attached.

Determination of Options / Completion of Placeholders

The Final Terms shall determine which of the Option I or Option II shall be applicable to the individual issue of Notes. Each of the sets of Terms and Conditions of Option I or Option II contains also certain further options (characterised by indicating the respective optional provision through instructions and explanatory notes set out in square brackets within the text of the relevant set of Terms and Conditions as set out in the Base Prospectus) as well as placeholders (characterised by square brackets which include the relevant items) which will be determined by the Final Terms as follows:

Determination of Options

The Issuer will determine which options will be applicable to the individual issue either by replicating the relevant provisions in the Final Terms or by reference of the Final Terms to the respective sections of the relevant set of Terms and Conditions as set out in the Base Prospectus. If the Final Terms do not refer to an alternative or optional provision or such alternative or optional provision is not replicated therein it shall be deemed to be deleted from the Terms and Conditions.

Completion of Placeholders

The Final Terms will specify the information with which the placeholders in the relevant set of Terms and Conditions will be completed. In the case the provisions of the Final Terms and the relevant set of Terms and Conditions, taken together, shall constitute the Conditions, the relevant set of Terms and Conditions shall be deemed to be completed by the information contained in the Final Terms as if such information were inserted in the placeholders of such provisions.

All instructions and explanatory notes and text set out on the side or in square brackets in the relevant set of Terms and Conditions and any footnotes and explanatory text in the Final Terms will be deemed to be deleted from the Terms and Conditions.

Language of the Conditions

As to the language of the respective Terms and Conditions the Issuer may elect to draft the Conditions either in the German language with an English translation, with the German being the controlling language, or in the English language only.

The Issuer may at any time, without the consent of the Noteholders, substitute for the Issuer any other company which is directly or indirectly controlled by the Issuer ("Affiliated Companies", as defined in Section 15 German Stock Corporation Act –*Aktiengesetz*), as new issuer (the "**New Issuer**") in respect of all obligations arising under or in connection with the Notes with the effect of releasing the Issuer of all such obligations, if:

- (vi) der Emissionsstelle ein oder mehrere Rechtsgutachten von anerkannten Rechtsanwälten vorgelegt werden, welche bestätigen, dass die Bestimmungen in den vorstehenden Unterabsätzen (i) bis (v) erfüllt wurden.

(b) *Bezugnahmen.*

- (i) Im Fall einer Schuldnerersetzung gemäß § 10(a) gilt jede Bezugnahme in diesen Anleihebedingungen auf die Emittentin als eine solche auf die Neue Emittentin.

Klarstellend sei erwähnt, dass dies nur gilt, soweit sich nicht aus Sinn und Zweck der jeweiligen Bedingung ergibt, dass die Bezugnahme entweder weiterhin nur auf die Covestro AG erfolgen soll, oder dass die Bezugnahme auf die Neue Emittentin und gleichzeitig auch auf die Covestro AG, im Hinblick auf deren Verpflichtungen aus der Garantie gemäß § 10(a)(iv) erfolgen soll.

- (ii) In § 8 gilt ein weiterer Kündigungsgrund als aufgenommen, der dann besteht, wenn die Garantie gemäß § 10(a)(iv) mit rechtskräftiger Entscheidung eines zuständigen Gerichts für nicht vollumfänglich wirksam erklärt wird, oder die Garantin einen Mangel der Wirksamkeit behauptet und dieser Mangel nicht innerhalb von zehn Geschäftstagen behoben wird.

For the avoidance of doubt this shall apply only to the extent that the meaning and purpose of the relevant condition requires that the relevant reference shall continue to be a reference only to Covestro AG, or that the reference shall be to the New Issuer and Covestro AG, in relation to Covestro AG's obligations under the guarantee pursuant to § 10(a)(iv) at the same time.

- (ii) In § 8 a further event of default shall be deemed to have been included; such event of default shall exist in the case that the guarantee pursuant to § 10(a)(iv) is determined by the final decision of a competent court or is claimed by the guarantor not to be in full force and effect and such defect is not corrected within ten business days.

Der Begriff "Schuldverschreibungen" umfasst im Fall einer solchen weiteren Begebung auch solche zusätzlich begebenen Schuldverschreibungen.

§ 12 Further Issues

The Issuer reserves the right from time to time, without the consent of the Noteholders to issue additional notes with identical terms and conditions as the Notes in all respects (or in all respects except for the date of issue, the interest commencement date and/or the issue price) so as to be consolidated and form a single series with such Notes. Der gemeinsame Vertreter hat die Aufgaben und Befugnisse, welche ihm durch Gesetz oder von den Anleihegläubigern durch Mehrheitsbeschluss eingeräumt wurden. History

Prior to its separation (the "**Separation**"), the Covestro Group was part of the German multinational chemical and pharmaceutical company Bayer (the "**Bayer Group**") as a subgroup.

In the process of Separation, the entire MaterialScience business of the Bayer Group was concentrated underneath Covestro Deutschland AG (formerly Bayer MaterialScience Aktiengesellschaft) through several share and asset transactions. The separation of the MaterialScience business is governed by a master agreement (the "**Master Agreement**") between Bayer AG and Covestro Deutschland AG, in which the parties agreed on a number of overarching rules and principles. Pursuant to the principles outlined in the Master Agreement, Covestro Deutschland AG has assumed certain responsibility inter alia for: (i) environmental contamination arising in connection with properties owned by it or its subsidiaries or transferred to it or its subsidiaries as part of the formation of the MaterialScience business or transferred to it or its subsidiaries in the course of the carve-out and reorganization, (ii) warranty and product liability claims of third parties arising out of or in connection with defective products which were put on the market prior to August 31, 2015 and (iii) liabilities resulting from violations of law.

With effect as of September 1, 2015, Bayer AG contributed all shares in Covestro Deutschland AG to the unrestricted capital reserves (*ungebundene Kapitalrücklage*) of Covestro AG. From the date of this contribution the Group operated under the name "Covestro" independently from the Bayer Group.

On September 4, 2015 Bayer announced to proceed with an Initial Public Offering of Covestro AG. Beginning from September 21, 2015 shares in Covestro AG were offered to the public in Germany and Luxembourg and to institutional and qualified investors in certain other jurisdictions including the United States. The offer concluded on October 2, 2015, the offer price was fixed at EUR 24.00 per share. The gross proceeds from the offering amounted to EUR 1.5 billion.

On October 6, 2015 Covestro AG was listed and traded for the first time on the regulated market (Prime Standard) of the Frankfurt Stock Exchange (*Frankfurter Wertpapierbörse*).

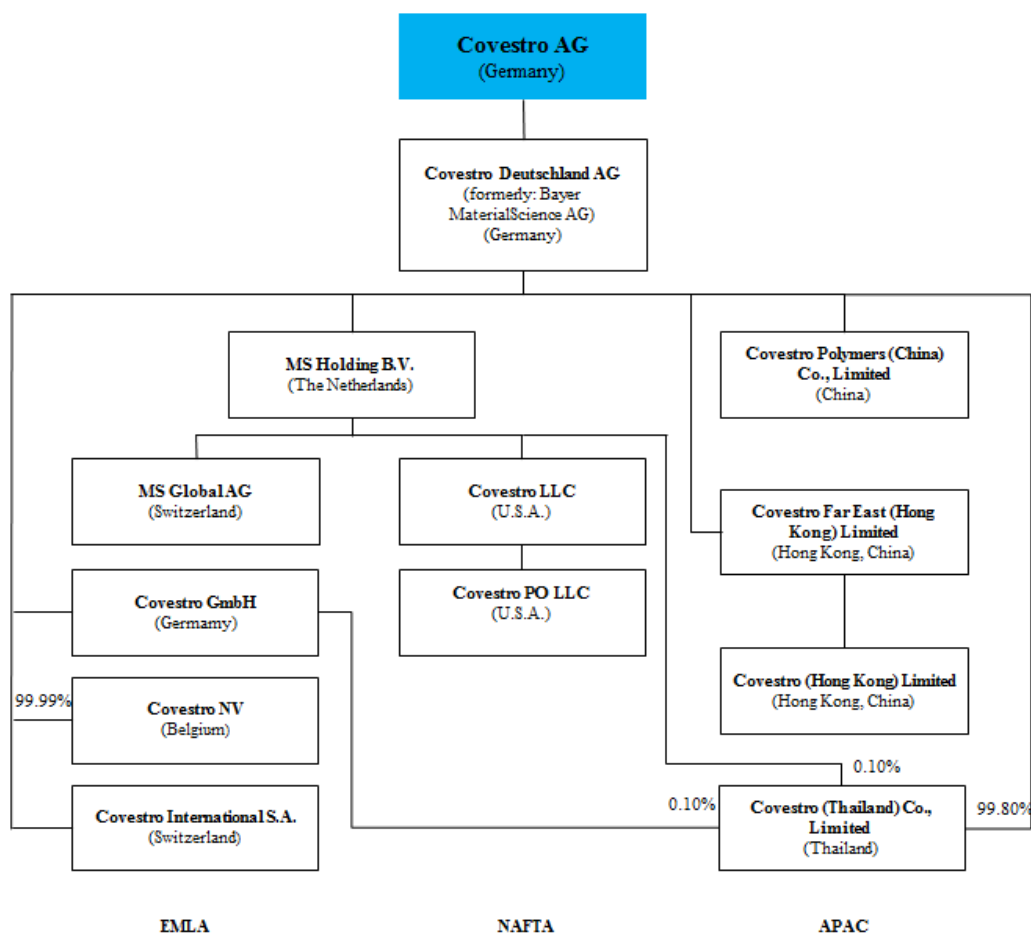

⁹ Moody's defines "Baa2" as follows: "Obligations rated Baa are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics. Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category"

Business Overview

Based on its internal market analysis, the Group considers itself one of the world's leading providers of high-tech material solutions. Its activities comprise the production and supply of raw materials for polyurethanes, polycarbonate resins and sheets, and raw materials for coatings, adhesives and sealants, as well as selected chemical intermediates. The Covestro Group's product portfolio also includes niche products such as TPU, polycarbonate- and TPU-based films, hot cast elastomers and other products tailored to textile, cosmetic and medical applications. The Covestro Group has a strong track record of process and product innovation as well as close customer relationships that underpin its tradition of developing market-driven solutions. The products manufactured by the Covestro Group are processed by customers to create products used in various end markets, including, in particular, automotive/transport, construction, wood/furniture, electrical/electronics, sports/leisure, cosmetics, health and chemicals.

The Covestro Group benefits from a well-invested asset base with what it believes is leading process technology and a total nameplate production capacity of 4,700 kt of core products in its Polyurethanes and Polycarbonates business units, including eight world-scale production sites across Europe, the United States and Asia. The Covestro Group's selectively backward integrated production process is aimed at sourcing critical raw materials such as chlorine, propylene oxide and other feedstock internally or through joint ventures, thereby reducing its dependency on external sourcing.

The Covestro Group's business combines the benefits of standardized products and customized high-value solutions, which aim to meet the needs of customers as they confront fundamental macro trends such as climate change, increasing mobility, population growth and increasing urbanization. The Covestro Group believes that it is well-positioned to capture industry growth driven by such trends due to its competitive advantages. According to the internal market analysis of the Group, the industry is expected to grow due to favourable demand trends over the next five years.

The Group's business is divided into three business units, which are also the Group's three reportable segments:

- The Group's Polyurethanes business unit produces a variety of grades of MDI, TDI and polyether polyols mainly for rigid and flexible foams. Rigid foams are primarily used for building insulation, cold-chain insulation and for automotive parts, while flexible foams are primarily used for furniture, mattresses and car seats. The business unit also produces other products such as TPU, styrene and TDA.
- The Group's Polycarbonates business unit produces polycarbonate resins, compounded resins and polycarbonate sheets. Polycarbonates have unique properties that facilitate their use in a wide range of applications in the electrical/electronics, automotive, construction, consumer appliance, medical, packaging and optical media end markets.
- The Coatings, Adhesives and Specialties business unit produces mainly aliphatic isocyanates and their derivatives, aromatic isocyanate derivatives, polyurethane dispersions and other specialties. The business unit produces approximately 2,300 products for more than 4,300 customers in more than ten end markets, including automotive, construction, wood/furniture, footwear, packaging/textiles/clothing and electronics.

All other business activities by the Group that cannot be allocated to one of the three reportable segments are recorded under "All other segments," which mainly includes external net sales of chlorine and certain by-products that are created during the production of chlorine and processing of chlorine during the isocyanate production, in particular caustic soda and hydrochloric acid.

The Group is engaged in continuous programs of research and development of new products and production processes, improvement and refinement of existing products and processes, and development of new applications for existing products, often conducted in close collaboration with customers.

The Group has a regional sales and marketing structure with supply chain centres and local operations supported by an e-commerce platform and regional or local distributors. The Group's sales for each business unit are organized in three regions - EMLA, APAC and NAFTA. In each of these regions, the Group's customers include global, regional and local operating businesses, many of whom are long-term customers of the Group.

In the Fiscal Year 2015, the Group had external net sales of EUR 12,082 million and Adjusted EBITDA of EUR 1,641 million. The Group defines "**Adjusted EBITDA**" as earnings before interest, tax, depreciation and amortization adjusted for special items that are nonrecurring or do not regularly recur or attain similar magnitudes.

The Group is headquartered in Leverkusen, Germany. As of the date of the Base Prospectus, the Covestro Group has approximately 15,800 employees.

Business Units and Centrally Organized Sales

The Group conducts its operations through its three business units: Polyurethanes, Polycarbonates, and Coatings, Adhesives and Specialties. The following diagram provides a simplified overview of the Group's operations.

In addition, the Group centrally coordinates the sale of certain by-products created by the Group's operations as raw materials to customers. Such third-party sales primarily consist of sales of chemical intermediates such as chlorine, caustic soda and hydrochloric acid.

Polyurethanes Business Unit

The Polyurethanes business unit focuses on the development, production and marketing of polyurethane raw materials, either on a stand-alone basis or as a formulation of an isocyanate and a polyether polyol, i.e. a system. The raw materials and systems ultimately enable customers to produce rigid and flexible polyurethanes. The business unit also develops, produces and markets other products such as TPU, which is a high-performance thermoplastic elastomer resin. In the Fiscal Year 2015, the Polyurethanes business unit had external net sales of EUR 6.1 billion, accounted for 50.4% of total Group net sales and had Adjusted EBITDA of EUR 624 million. The Polyurethanes business unit is organized into the three strategic business entities MDI, TDI and polyether polyols.

According to the Group's internal market analysis, the business unit is the leading global producer of polyurethane raw materials, the second largest global producer of MDI, the largest global producer of TDI and the second largest global producer of polyether polyols. The business unit's product portfolio includes various grades of MDI, TDI and polyether polyols, which are the key raw materials for the production of polyurethanes. The polyurethanes based on the business unit's raw materials are widely used in a broad range of end markets, including furniture, construction, automotive, appliances, chemicals and others such as footwear for a wide range of applications within

those end markets. The business unit's operations are supported by state-of-the-art isocyanate and polyol production technologies, the scale of several of its plants, and its selected backward integration into various key raw materials needed for production. The Group believes it has leading positions in key regions with respect to its TPU products.

The business unit operates a global production platform comprising 21 production facilities across Europe, the United States and Asia, with a total nameplate production capacity of approximately 3,400 kt of isocyanates and polyether polyols in 2014. In Fiscal Year 2015, the production facilities in Belford Roxo, Brazil, were closed with respect to MDI and polyether polyol production; TDI production at the site of Brunsbüttel, Germany, has been discontinued. In December 2015, the Group also announced its intention to close its MDI production facility in Tarragona, Spain, by the end of 2017 as part of its strategy to optimize its production operations. The business unit uses a global network of four innovation centres to support customers and drive the development of new products.

Polycarbonates Business Unit

The Polycarbonates business unit's focus is on the development, production and marketing of polycarbonates, which are an engineering thermoplastic and are easily worked, molded and thermoformed. The business unit's polycarbonate resins and compounded resins are suitable for standard and high value applications where the Group's ability to provide comprehensive technical service is key. The business unit also produces and sells bisphenol-A, a key raw material to produce polycarbonates. In addition, the business unit is forward integrated into producing polycarbonate-based extruded sheets, which are produced from its resins. The business unit is also active in application technology development with customers in connection with polycarbonates processing. In the Fiscal Year 2015, the business unit had external net sales of EUR 3.2 billion, accounted for 26.3% of total Group net sales and had Adjusted EBITDA of EUR 560 million.

According to the Group's internal market analysis, the Group's Polycarbonates business unit is one of the two leading global suppliers of polycarbonates. Because of their unique properties, polycarbonates are used in a wide range of applications, including those in end markets such as automotive, consumer, appliance, medical packaging, construction, electronics, and optical media.

The Polycarbonates business unit is headquartered in Shanghai, China, and operates a well-invested global network of five world-scale production facilities that together have a total nameplate production capacity of approximately 1,300 kt of polycarbonate resins, thus benefiting from economies of scale and scope. The business unit also operates production facilities that manufacture polycarbonate sheets from the business unit's resins and seven compounding centres, where it produces compounded resins. It also uses a global network of technology centres to develop bespoke polycarbonate formulations for customers.

Coatings, Adhesives and Specialties Business Unit

According to the Group's internal market analysis, the Coatings, Adhesives and Specialties business unit is a global leading supplier of high performance materials to the industrial coatings, adhesives, sealants and other specialties industry segments. As a niche specialty material provider, the business unit has strong focus on technology and innovation, which is as a key element to produce highly-value-added products that provide superior performance relative to other, more standard, chemistries. The business unit believes it is the technology leader with respect to the production of isocyanate derivatives for coatings, adhesives and sealants. The business unit produces approximately 2,300 products that are primarily based on six monomers, for more than 4,300 customers across more than 10 high-end end markets. This excludes the business unit's recently developed PDI and xylylene diisocyanate ("**XDI**") monomers. The business unit's product portfolio includes aliphatic isocyanates and their derivatives, aromatic isocyanate derivatives, and polyurethane dispersions. In addition, the business unit's product portfolio includes a wide range of TPU- and polycarbonate-based specialty films, hot cast elastomers, products tailored to specialty textile, cosmetic and medical applications, and other products. In the Fiscal Year 2015, the business unit had external net sales of EUR 2.1 billion, accounted for 17.3% of total Group net sales and had Adjusted EBITDA of EUR 491 million.

According to the Group's internal market analysis, the business unit is the leading worldwide producer of aliphatic isocyanate derivatives, aromatic isocyanate derivatives, polyurethane dispersions and TPU films as well as the second leading worldwide producer of polycarbonate films. The business unit's customers are primarily formulators in the industrial coatings, adhesives and sealants industry segment who use the business unit's isocyanate derivatives to cater to the automotive, construction, wood/furniture, footwear, packaging/textiles/clothing and electrical/electronic end markets. The products of the business unit are critical to

the performance of the end products in which they are used, yet form a small proportion of the overall costs of the end product.

The Coatings, Adhesives and Specialties business unit operates a global asset base with three world-scale monomer production facilities that are complemented by regional isocyanate derivative production facilities, and additional production facilities for resins, elastomers and specialty films across EMLA, APAC and NAFTA. The production facilities are capable of providing reliable supply to customers in all regions while fulfilling required quality standards. The production facilities are complemented by nine technical centres. The technical centres offer technical support and are an important element in facilitating close, long-term relationships with customers.

Centrally Organized Sales

To the extent they are not consumed internally, the Group centrally coordinates the sale of by-products created by the Group's operations as raw materials to customers. Such third-party sales primarily consist of sales of chemical intermediates such as hydrochloric acid, caustic soda and chlorine, which amounted to external net sales of EUR 729 million or 6.0% of total net sales of the Group in the Fiscal Year 2015, which are reported under "All other segments". According to the Group's internal market analysis, the Group was the fifth largest global producer of chlorine in 2014. Customers typically purchase the Group's chemical intermediates as precursors to their higher-value chemicals, such as plastics, polyurethanes, textile fibers, resins, paints, surfactants, colorants, coatings, pharmaceuticals and agricultural products.

The Group looks forward and backward along its production value chains to find potential efficiencies by examining every input and output of the Group's production operations. The Group uses by-products to a maximum extent as raw materials for other internal processes. In the Fiscal Year 2015, the majority of by-products created by the Group's operations were consumed internally. The Group believes, that it is one of the most cost-effective producers of hydrochloric acid, caustic soda and chlorine, due to its use of oxygen-depolarized cathode and membrane electrolysis technologies.

The Group is also responsible for licensing and selling oxygen-depolarized cathodes, licensing certain technologies such as the IMPACT technology and leasing certain real estate holdings to third parties.

Internal functions

Sales and Marketing

The Group has a regional sales and marketing structure in which each business unit independently manages its sales and marketing activities in a similar fashion with respect to the products it manufactures. Each business unit sells its products through its own sales force as well as through distributors. The sale and marketing of certain chemical intermediates is managed centrally by the Group, while others are managed by the relevant business unit.

Allocating the sales and marketing activities to each business unit facilitates a high level of customer proximity and allows for sophisticated marketing strategies. The Group regularly reviews and tailors its marketing activities on the basis of customer satisfaction surveys and spontaneous customer feedback. In order to facilitate its customers' operations and use of the Group's products, the Group also provides technical application support and technical service laboratories.

The Group regularly evaluates the complaints received from customers. Through dialogue with internal and external stakeholders, corrective and preventive measures are taken by the Group where necessary to further increase quality and customer satisfaction, while lowering production error rates and ultimately the incidence of complaints.

Procurement and Trading

The Group relies on the procurement of a wide range of raw materials, technical goods, energy and services in order to produce its products. Procurement and management of operative road transportation and finished goods warehousing services, including transportation network optimization, are handled by the Group's Supply Chain Centres ("SCCs"). The SCCs are responsible for the regional outbound supply chain operations of the business units. They are located in Leverkusen, Germany, covering EMEA plus Latin America through a local hub in Sao Paulo, Brazil, in Hong Kong, China, as well as hubs in several major countries across Asia with responsibility for operations in APAC, and in Pittsburgh, Pennsylvania, United States, for NAFTA with a local hub in Mexico City, Mexico.

The Group looks forward and backward along its production value chain to find potential efficiencies by examining every input and output of the Group's production processes. The Group uses by-products of chemical reactions, which might otherwise have to be sold or disposed of, to the maximum extent as raw materials for other production operations. Certain production facilities of the respective business unit are linked by pipeline, by rail or by waterway to the production facilities of other business units to enable the by-product of one production process to act as a reactant in another production process.

The Group centrally manages and bundles worldwide procurement processes in order to leverage synergies within the Group and to ensure the selection of appropriate suppliers on a global basis, while individual procurement decisions are formed at a local level. The Group's procurement teams act as intermediaries between suppliers and the business units. To support natural currency hedging and to realize logistical advantages, the Group pursues a balanced local and regional sourcing strategy and maximizes regional or worldwide demand where appropriate to generate economies of scale.

The Group has a key supply relationship with Currenta GmbH & Co. OHG ("**Currenta**") that operates the chemical parks in Leverkusen, Dormagen, and Krefeld-Uerdingen in Germany in which the Group has production facilities and other business operations. Currenta provides various services to the Group's operations located at the chemical parks, including utilities such as electricity, water, heat, and waste water removal.

Real Property and Production Facilities

The Group operates production facilities worldwide and uses land with office buildings, warehouses, research and development facilities, and other facilities in a large number of countries as either owner, holder of hereditary building right or lessee.

Real Property

As of the date of this Base Prospectus, the Group owns approximately 14,000,000 m² worldwide. Pursuant to a notarized real estate purchase agreement (*Grundstückskaufvertrag*), dated August 31, 2015, certain members of the Group, have purchased (i) land parcels at the production site in Brunsbüttel, Germany, and at the chemical park sites in Leverkusen, Dormagen and Krefeld-Uerdingen, Germany, on which the Group currently operates its business, (ii) certain supplementary real estate property which the Group may use in the future and (iii) significant additional real property outside the scope of the Group's current and foreseeable future use. The notarized real estate purchase agreement relates to an area totaling approximately 12,000,000 m². Additionally the Group currently leases and uses real property located at the chemical parks in Germany pursuant to lease agreements with Bayer Real Estate Group or related companies and other third parties regarding three other locations.

Production Facilities

The headquarters of the Group and the headquarters of the Polyurethanes and Coatings, Adhesives and Specialties business units are located in Leverkusen, Germany, and the headquarters of the Polycarbonates business unit is located in Shanghai, China. The regional headquarters of the Group and business units are located, respectively, in Pittsburgh, Pennsylvania, United States, for North America, Leverkusen, Germany, for Europe and Hong Kong and Shanghai, China, for Asia.

The Group operates world-scale plants in key locations to ensure efficient and reliable production, and operates smaller-scale plants in other locations that are dedicated to one business unit or shared between two business units. A local presence allows customized support and tailor-made solutions for local customers. The main production facilities of the Group are located in: Leverkusen, Krefeld-Uerdingen, Brunsbüttel and Dormagen, Germany; Antwerp, Belgium; Baytown, Texas, United States; Map Ta Phut, Thailand and Shanghai, China. These are the production facilities which support the business units.

Many of the Group's sites have an extensive history of industrial operations, storage and related activities and some of the Group's buildings have in the past contained and may still contain asbestos or other harmful substances. As is typical for such businesses, soil and ground water contamination have occurred in the past at some sites such as those in Leverkusen, Dormagen and Krefeld-Uerdingen and may occur or be discovered at the Group's sites in the future. The Group also owns a large number of industrial sites containing, in some cases, pre-existing contamination requiring securing or remediation. The Group has been and is likely in the future to be liable for the costs of investigating and cleaning up or stabilizing environmental contamination on or from its properties or at off-site locations where it transported, disposed of or arranged for the disposal or treatment of hazardous materials and waste or from disposal activities that predated its purchase of its businesses. At December 31, 2015, the

Covestro Group had other provisions of EUR 45 million for probable environmental remediation and restoration costs.

Investments

The Group bases its investment decisions on the long term attractiveness and sustainability of the investment. The Group benefits from extensive investments made in its asset base, which totaled approximately EUR 7 billion since 2005, of which approximately EUR 4 billion related to growth. In line with the Group's strategic targets, it intends to comprehensively complete its switch to longer turnaround cycles. Following the significant expansion of capacities in recent years, the Group plans to reduce its levels of investment through 2020 and focus on maintaining and improving existing production facilities.

Research and Development

The Group's research and development activities are intended to maintain and strengthen the position of the Group within the industry and focus on product- and process-related innovation development. The Group's research and development activities are driven by underlying demand for higher quality applications, increased functionality, design flexibility, lower cost production processes and sustainability. In addition, the use of renewable raw materials is also a key objective. The Group believes that new technologies and the use of alternative raw materials can significantly increase the Group's production efficiency and decrease the environmental impact of industrial operations, which will ultimately strengthen the position of the Group. However, the implementation of these innovations may require a substantial change in the Group's asset setup or, occasionally, investment in new production assets. In addition, the Group's research and development objectives aim to secure future leadership with new product variants in life cycles of new and existing applications that build on the Group's expertise in its core technologies.

The Group pursues innovation projects in line with the principles of "People, Planet and Profit", delivering benefits to society, the environment and profit. The Group's perspective covers the whole product life cycle, from raw materials sourcing to production, and product use to end of life.

The Group has a track record in continuously developing improved fire resistant products, insulation properties to reduce energy consumption, high flow and lightweight solutions or alternative feedstock, leading to greater resource efficiency and environmental sustainability for customers. In the past years, amongst many other Group innovations, the Group has successfully advanced microcell insulation, pultrusion technology, new Bayblend grades suitable for information technology applications, high flow APEC, Makrolon, and Bayblend grades for optimized surfaces and complex parts, waterborne coatings for textiles and specialty films for identification cards.

Employees

As of the date of the Base Prospectus, the Covestro Group has approximately 15,800 employees.

This is achieved by effective management of the Group's intellectual property rights, including patents, trademarks and know-how. A high priority is placed on protecting innovation and the actual and future business value that the Group can derive therefrom.

Patents and Know-How

In the future, the Group intends, in general, to register new trademarks in all countries in which significant sales of the relevant product are expected. The business name "Covestro", the Covestro logo and numerous product markings are trademark protected.

Licenses

The Group has approximately 340 active licensing agreements with third parties under which it obtains or grants licenses. Licensing agreements may be concluded to provide for freedom of operations, to enhance acceptance of a new technology in the industry, make sustainability solutions available, enable cooperative ventures, or provide for net sales.

The Group has entered into cross-license agreements or non-assertion agreements with some key competitors which cover selected patents and patent applications. Pursuant to these agreements, the contractual parties are allowed to use patents of the counterparty in the fields covered by the respective cross-license agreement.

In addition to cross-license agreements, the Group has granted to and has been granted from competitors or other third parties one-way licenses in certain fields for which the Group receives or pays license fees.

Covestro AG and its subsidiaries are not, and have not been in the twelve month prior to the date of this Base Prospectus, subject to any governmental, legal or arbitration proceedings, including any such proceedings which are pending or threatened of which Covestro AG or the Group is aware, which may have, or have had in the recent past significant effects on Covestro AG and/or the Group's financial position or profitability, except for the following:

German Pipeline Planning Administrative Litigation

The Higher Administrative Court Münster (*Oberverwaltungsgericht*) issued two preliminary decisions (*Beschlüsse im vorläufigen Rechtsschutz*) on December 17, 2007, according to which the prior decision of the Administrative Court Düsseldorf (*Verwaltungsgericht*) was partly overruled and the suspensive effect of the law-suits against the planning approval (*Planfeststellungsbeschluss*) was reestablished as far as the operation of the carbon monoxide ("CO")-pipeline was concerned. The carbon monoxide pipeline is intended to connect the chemical production sites at Dormagen and Krefeld-Uerdingen and complement the network already existing between Dormagen and Leverkusen. The aim is to ensure a safe and reliable supply of carbon monoxide to and across all sites. In two other proceedings before the Higher Administrative Court Münster which related to orders of granting possession (*Besitzeinweisungen*), the Higher Administrative Court Münster decided in accordance with the above-mentioned ruling - meaning that the suspensive effect of the law-suits against the granting possession orders was also reestablished as far as the operation of the CO-pipeline was concerned. On May 26, 2009, the Administrative Court Düsseldorf dismissed an injunction of Covestro Deutschland AG applying for reinstatement of the immediate operation permit of the pipeline. Covestro Deutschland AG continues to request the approval for the operation of the pipeline.

In a judgment on May 25, 2011, the Administrative Court Düsseldorf confirmed the material parts of the planning approval, in particular the safety of all materials, the choice of the pipeline's route, the compliance of the expropriation law set forth in the North Rhine-Westphalian Pipeline Act ("**Rohrleitungsgesetz Nordrhein-Westfalen**") with the German Federal Constitution (*Grundgesetz*) and - in principle - also earthquake safety. The Administrative Court Düsseldorf, however, identified certain areas which require further activity by the planning authority, including (i) analysis of soil liquefaction potential for a few areas, (ii) analysis of earthquake safety of those parts of the pipeline which are not built into the ground (e.g. pipe rack), and (iii) a regulation to assess a certain area for subterranean cavities, which were identified as relevant at a later stage of the proceedings. These issues were resolved by the planning authority in a further amendment of the planning approval on August 27, 2012. On April 19, 2012, Covestro Deutschland AG filed an application for a further amendment of the planning approval to cover further minor deviations from the original approval. The public hearing with regard to this amendment proceeding took place in November 2013 and the decision of the regional government has not yet been issued.

The plaintiffs and the planning authority appealed against the judgment of the Administrative Court Düsseldorf. The appeal is pending before the Higher Administrative Court Münster. On August 28, 2014, a public hearing took

place before the Higher Administrative Court Münster. In the court hearing, the parties discussed the legality of the pipeline with respect to its safety, route and constitutional conformity. With regard to safety and route, the court had no concerns regarding the basic design and configuration of the pipeline. However, the Higher Administrative Court Münster expressed its view that it considered the underlying law to be unconstitutional. The court criticized the vagueness of the legal wording regarding the reasons for expropriation in section 2 North Rhine-Westphalian Pipeline Act. With respect to the "common good" (*Allgemeinwohl*), it stated that the legal requirements of the North Rhine-Westphalian Pipeline Act aimed at binding private entities to further the "common good" were not sufficient. As the Higher Administrative Court Münster had no other concerns that would have justified the cancellation of the planning approval, constitutional conformity was the only relevant issue for deciding the case. Consequently, the Higher Administrative Court Münster referred the case to the Federal Constitutional Court. The Federal Constitutional Court accepted to hear the case and Covestro Deutschland AG is preparing further submissions. On March 23, 2015, Covestro Deutschland AG filed a third-party response brief, requesting the Federal Constitutional Court to uphold the constitutionality of the North Rhine- Westphalian Pipeline Act. It is not clear when the hearing will take place. This proceeding may result in the Group having to deconstruct the pipeline at its cost and its inability to source carbon monoxide cost-effectively at certain production facilities.

German Litigation Relating to Carbon Monoxide Pipeline Leverkusen – Dormagen

On January 13, 2015, the Administrative Court Cologne (*Verwaltungsgericht Köln*) issued a third-party summons (*Beiladung*) addressed to Covestro Deutschland AG, making it a party to a lawsuit initiated by an individual as plaintiff against the regional district council Cologne (*Bezirksregierung Köln*) as defendant. The plaintiff requests that the regional district council Cologne revoke its order dated March 26, 2014 dismissing the plaintiff's previous complaint against the operation permit for a CO-pipeline operated by the Group between Dormagen and Leverkusen and the regional district council's original approval for this operation. The original approval had been granted by the president of the regional district council Cologne (*Regierungspräsident Köln*) in 1966 following an administrative proceeding. The pipeline provides the chemical park in Leverkusen, Germany, with carbon monoxide which is of particular relevance for the production facilities of the Coatings, Adhesives and Specialties business unit. Without this supply, the Group would have to build up a new supply source for carbon monoxide, which would generate additional costs. Furthermore, there is a threat of a loss of production. The plaintiff claims that the pipeline constitutes a danger for the health and safety of the neighborhood, which requires the withdrawal of the approval. On March 25, 2015, Covestro Deutschland AG filed a third-party response brief, requesting the court to dismiss the plaintiff's claim. The court dismissed the action as inadmissible on January 19, 2016.

Dutch Arbitration Relating to CO2-Certificates

In June 2014, Utility Centre Maasvlakte Leftbank B.V. ("UCML"), a Dutch affiliate of the German energy supplier E.ON, initiated arbitration proceedings before the Netherlands Arbitration Institute against the European Joint Venture Lyondell Bayer Manufacturing Maasvlakte V.O.F., its two general partners, Covestro Polyurethanes B.V. (formerly Bayer Polyurethanes B.V.) and Lyondell PO-11 C.V., and Lyondell Chemie (POSM) B.V., the general partner of Lyondell PO-11 C.V., for the reimbursement of costs incurred for the purchase of CO2-certificates acquired under the European Trading Scheme during NAP I (2005 - 2007) and NAP II (2008 - 2012) to fulfill a supply contract with the Joint Venture. The amount claimed comprises EUR 30.7 million incl. the statutory interest and VAT for commercial transactions in the Netherlands since the alleged payment due date (February 5, 2013) and Covestro Polyurethanes B.V. (formerly Bayer Polyurethanes B.V.), a subsidiary of Covestro AG, as joint venture partner would, if the Netherlands Arbitration Institute ruled in favor of UCML, be obligated to bear 50% of this claim (not taking into account potential costs for the legal proceedings and attorney fees). The Joint Venture denies the grounds and the amount of UCML's alleged claims. The Joint Venture takes the view that (i) there is no provision contained in the underlying supply agreement and its amendments upon which such a claim may be based, (ii) UCML failed to closely involve the Joint Venture in the solution-finding process in a situation which was unforeseeable at the date of the signing of the supply agreement, and (iii) UCML made severe mistakes in the application and allocation process which ultimately caused the current situation, i.e. the lack of sufficient CO2-certificates.

UCML, before initiating the above arbitration proceedings, obtained an expert opinion of a Dutch energy consultancy company which allegedly confirmed the correctness of UCML's application and allocation procedure for CO2- certificates. The Joint Venture asked a Dutch consultancy firm to provide an expert opinion on the CO2 emissions allocation by UCML for the relevant periods. On the basis of the Dutch consultancy firm's final report, and after obtaining advice of external legal counsel, the Joint Venture rejected UCML's claims for CO2 emission allowances in a letter dated May 2, 2013. In the second quarter of 2014, UCML indicated its willingness to settle. After the Joint Venture informed UCML that it would not be willing to settle at the offered amount, UCML

initiated the above arbitration. The parties selected arbitrators and agreed on rules of procedure. The first hearing in the course of the arbitration took place on December 3rd and 4th, 2015. Final pleas have been submitted in January 2016. An arbitration award is expected by end of March 2016.

Insurance

The Group believes that Covestro AG and its subsidiaries have reasonable insurance protection, to the extent customary in the industry.

Material Agreements

The following section provides a summary of material agreements to which any member of the Group is a party.

Financing Agreements

Covestro AG entered into a facilities agreement (the "**Facilities Agreement**") dated September 4, 2015, that provides for credit facilities in a total principal amount of EUR 2.7 billion with a syndicate of lending banks and with Deutsche Bank, UniCredit Bank AG, Citigroup Global Markets Limited, and Bank of America Merrill Lynch International Limited as mandated lead arrangers and Deutsche Bank Luxembourg S.A. as facilities agent. Subsidiaries in which Covestro AG holds directly or indirectly more than 50% of the voting capital may become additional borrowers by means of accession to the contract (*Vertragsbeitritt*) provided that, in the case of any subsidiary other than Covestro Deutschland AG, all lenders have consented to such accession; Covestro AG guarantees for obligations of the additional borrowers. The base currency under the Facilities Agreement is Euro and for the revolving credit facility optional currencies are US dollar or a currency previously approved for these purposes by the lenders and readily available.

The Facilities Agreement provides for a multicurrency revolving credit facility in an amount of EUR 1.5 billion and a term loan facility in an amount of EUR 1.2 billion. The Facilities Agreement contains customary representations, general covenants (including a negative pledge undertaking and restrictions on disposals and mergers, each subject to baskets and/or exceptions) and events of default (including cross-default-payment and cross-acceleration provisions). No financial covenants are included. The facilities are not secured by any security in rem.

The revolving credit facility in the amount of EUR 1.5 billion has a maturity of five years, that can be extended after one or two years in one or two steps, for one or two years in aggregate (with the consent of each respective lender). The revolving credit facility may be used for general corporate purposes, including working capital purposes, the refinancing of indebtedness and acquisitions. Up to EUR 500 million of the revolving credit commitments may be used as ancillary facilities on a bilateral basis with revolving lenders or their affiliates in the form of overdraft facilities, guarantees, bonding, documentary or stand-by letters of credit facilities, short term loan facilities, derivatives facilities, foreign exchange facilities or any other facility or accommodation required in connection with the business of the Group and which is agreed by Covestro AG with an ancillary lender.

The term loan facility in the amount of EUR 1.2 billion has a maturity of three years; the term loan shall be repaid in full at final maturity. Amounts borrowed under the term loan facility shall be applied towards the refinancing of indebtedness incurred under shareholder loans granted to the Group by the Bayer Group after the separation.

Voluntary prepayments by the borrower are permitted subject to certain customary requirements. A lender may cancel its commitments and demand prepayment of all its participations in any loans outstanding under the Facilities Agreement in case of illegality or a change of control (in each case as described in the Facilities Agreement).

In addition, the Covestro Group has some mainly uncommitted external local financing agreements in place.

On December 31, 2015 the Group had presented warranty contracts, guarantees and other contingent liabilities in the amount of EUR 20 million.

Joint Venture Agreements

The Group has entered into a large number of joint venture agreements with partners to support its business in various areas. The most important joint ventures are described below:

Lyondell European Joint Venture

Covestro AG's affiliate Covestro Polyurethanes B.V. (formerly Bayer Polyurethanes B.V.), a Dutch private limited liability company (*besloten vennootschap met beperkte aansprakelijkheid*), and LyondellBasell's affiliate Lyondell PO-11 C.V., a Dutch limited partnership (*commanditaire vennootschap*), established in December 2000 a long-term manufacturing joint venture now called LyondellBasell Covestro Manufacturing Maasvlakte VOF ("**Lyondell European Joint Venture**") in the legal form of a Dutch general partnership (*vennootschap onder firma*) with its seat in Rotterdam, the Netherlands. Lyondell PO-11 C.V. and Covestro Polyurethanes B.V. are the only partners of the Lyondell European Joint Venture (each a "**Partner**" and jointly the "**Partners**"). The Lyondell European Joint Venture owns a grassroots propylene oxide and styrene monomer plant near Rotterdam, the Netherlands, employing proprietary technology of one of LyondellBasell's affiliates which is licensed to the Partners. Its business comprises the production of propylene oxide and a styrene monomer for the account of the Partners. Each Partner holds a 50% interest in the Lyondell European Joint Venture and corresponding percentage of voting rights, participates in 50% of its profits and losses and is entitled to offtake 50% of the propylene oxide and styrene monomer produced.

The general partnership agreement generally prohibits Covestro Polyurethanes B.V. from transferring its interest in the Lyondell European Joint Venture without the consent of Lyondell PO-11 C.V., subject to certain exceptions. In this context, Bayer AG and LyondellBasell's affiliate Lyondell Chemical Company entered into an agreement which governs the relationship of the parent companies of the Partners with regard to the Lyondell European Joint Venture and which contains certain transfer restrictions regarding the direct or indirect transfer of interests in the Partners.

Pursuant to a consent and release agreement dated August 28, 2015, between Bayer AG, Covestro AG, Lyondell Chemical Company as well as certain affiliates of Bayer AG and Lyondell Chemical Company (the "**Consent Agreement**"), Lyondell Chemical Company and certain of its respective affiliates consented to certain transactions in connection with the Separation and certain transactions subsequent to the Separation. On August 31, 2015, Covestro AG acceded to the Consent Agreement.

Lyondell US Joint Venture and Lyondell Technology Joint Venture

Covestro AG's affiliate, Covestro PO LLC (formerly BAYPO Limited Partnership), a Delaware limited partnership, and LyondellBasell's affiliate, PO Offtake LP, a Delaware limited partnership, established in March, 2000 PO JV, LP, a Delaware limited partnership (the "**Lyondell US Joint Venture**"), as a long-term joint venture for the production and offtake of propylene oxide with manufacturing facilities located in Texas, United States. Covestro AG's indirect interest of approximately 39.4% in the Lyondell US Joint Venture represents ownership of an in kind portion of the propylene oxide production of the Lyondell US Joint Venture. LyondellBasell indirectly holds the remaining interest of approximately 60.6% in the Lyondell US Joint Venture.

Simultaneously with the establishment of the Lyondell US Joint Venture, Bayer AG's affiliate, BIPPO Corporation, a Delaware corporation, and LyondellBasell's affiliates, Lyondell POTechGP, Inc. and Lyondell POTechLP, Inc., both Delaware corporations, established in March 2000 Technology JV, LP, a Delaware limited partnership (the "**Lyondell Technology Joint Venture**"), as a long-term joint venture for the joint development and licensing of technology relating to the production process of propylene oxide under the Lyondell US Joint Venture. Covestro AG holds an indirect 50% interest with LyondellBasell indirectly holding the remaining 50% interest of the Lyondell Technology Joint Venture.

Covestro PO LLC is generally prohibited from transferring its ownership interests in the Lyondell US Joint Venture and the Lyondell Technology Joint Venture or withdrawing from either joint venture without the consent of LyondellBasell's affiliate for the respective joint venture except under certain circumstances. In the context of the establishment of the Lyondell US Joint Venture and the Lyondell Technology Joint Venture, Bayer AG, Bayer Corporation and LyondellBasell's affiliate Lyondell Chemical Company agreed transfer restrictions regarding the direct and indirect transfer of interests in the entities party to the Lyondell US Joint Venture and the Lyondell Technology Joint Venture.

Pursuant to the Consent Agreement, Lyondell Chemical Company and certain of its affiliates consented to certain transfers of interests and assignments of agreements related to the Lyondell European Joint Venture, the Lyondell US Joint Venture and the Lyondell Technology Joint Venture. In particular, Lyondell Chemical Company consented to the transfer of interests in Covestro Polyurethanes B.V. and Covestro PO LLC in connection with the Separation. Additional consent is needed in the event of a sale or disposal of shares in Covestro AG subsequent to Separation by the Bayer Group or Covestro AG in certain limited circumstances. Pursuant to the Consent Agreement, the

LyondellBasell affiliates may request certain changes to the payment terms of the agreements concluded in connection with the Lyondell European Joint Venture, the Lyondell US Joint Venture and the Lyondell Technology Joint Venture in case of a significant change in the rating of Covestro AG and if certain other requirements are fulfilled. By acceding to the Consent Agreement, Covestro AG has assumed the existing guarantees for performance of certain affiliates under certain agreements connected with the Lyondell European Joint Venture, the Lyondell US Joint Venture and the Lyondell Technology Joint Venture.

Sumika Covestro Urethane Co., Ltd., JV in Japan

Sumika Covestro Urethane Co., Ltd. ("SCU") is a stock company under the laws of Japan (*kabushiki kaisha*) and was established as a 50%/50% joint venture between Bayer AG and Sumitomo Chemical Co., Ltd. ("Sumitomo"). Shares in SCU were originally held by Bayer AG and Sumitomo, but the shares held by Bayer AG were transferred from Bayer AG to Bayer Ltd. in 1999. The shareholding ratio has been changed to 60%/40% in December 2000, of which Bayer Ltd. holds 60%. After a reorganization, Bayer MaterialScience Ltd. (which is now Covestro Japan Ltd.) has become a shareholder holding 60%. The current parties to the joint venture agreement are Covestro Deutschland AG and Sumitomo.

SCU's business purpose is (i) to manufacture and sell polyurethanes products and (ii) to sell (as agent) pigment, dye and chemical industry products. SCU has constructed and operated its plant facilities within the premise of Sumitomo's Ehime works in Ehime, Japan, for the production of those products, and Bayer AG has licensed to SCU special processes for the production of such products. The license agreement for such processes was transferred from Bayer AG to Covestro Deutschland AG.

DIC Covestro Polymer Ltd. JV in Japan

DIC Covestro Polymer Ltd. ("DCP") is a stock company under the laws of Japan and was established as a 50%/50% joint venture between Bayer Ltd. and Dainippon Ink and Chemicals, Inc. (which is now DIC Corporation, "DIC"). After a reorganization Bayer MaterialScience Ltd. (which is now Covestro Japan Ltd.) has become a shareholder and holds 50% of the shares.

DCP's business purpose is manufacturing and selling of TPU resins and processed products thereof. Bayer AG has granted DCP a patent and technology license and a right to use certain trademarks of Bayer AG for molding TPU manufactured and sold by DCP. The license agreement for such patent and technology was transferred from Bayer AG to Covestro Deutschland AG. DIC has granted DCP a right to use certain trademarks of DIC for molding TPU.

The joint venture agreement will terminate automatically if either Covestro Deutschland AG, Covestro Japan Ltd. or DIC ceases to be a shareholder of DCP. Either party has a right to immediately terminate the joint venture agreement if the other party commits any material breach of the agreement that cannot be cured within 45 days or goes into liquidation or any similar process. In such case, the party who exercised the termination right has an option to cause the breaching party to purchase all shares at book value or to acquire all shares held by the breaching party at book value.

Agreements with the Bayer Group

As a previously wholly owned subsidiary of Bayer AG, the Covestro Group has and in the past had various relationships with the Bayer Group and its direct and indirect subsidiaries and will continue to have - modified and reduced - relationships with Bayer Group in the future. In particular, the Group received certain services relating to human resources, real estate, IT, intellectual property, legal, compliance, procurement, trade and customs compliance, treasury and other areas and was part of the cash management system and global insurance cover from the Bayer Group; a limited number of services in some areas will to some extent continue for a transitional period, although the Group has already built up its own resources for other areas.

Master Agreement between Covestro Deutschland AG and Bayer AG

Bayer AG and Covestro Deutschland AG entered into a master agreement (the "**Master Agreement**"), dated August 24, 2015. Pursuant to this Master Agreement, both parties intend, among other things, to conclusively determine the apportionment of liability as between Covestro Deutschland AG and the Bayer Group, in particular in the areas of environmental contamination, product liability, violations of the law and employment, and establish certain reciprocal rules of conduct and duties of cooperation for the period following the separation. The Master Agreement also contains provisions with regard to release of securities, IT resources and data as well as subsidies, and treatment of confidential information and personal data. In a later and separate agreement with Bayer AG,

Covestro AG has undertaken the obligation to ensure that Covestro Deutschland AG as well as other companies of the Covestro Group will adhere to the provisions of the Master Agreement.

Purchase Agreement regarding pension liabilities between Bayer AG and Covestro AG

In the context of the restructuring of Bayer AG's activities in 2003 into the three subgroups Bayer HealthCare, Bayer CropScience and Bayer MaterialScience, Bayer AG and Bayer Polymers Aktiengesellschaft (renamed to Bayer MaterialScience Aktiengesellschaft and as of September 1, 2015 Covestro Deutschland AG) entered on March 11, 2003 into a hive-down and transfer agreement (*Ausgliederungs- und Übernahmevertrag*). According to this hive-down and transfer agreement, pension liabilities of certain employees attributable to the Polymers activities were transferred to Covestro Deutschland AG. Pension liabilities with respect to employees whose employment contracts terminated prior to July 1, 2002 were not transferred to Covestro Deutschland AG and remained with Bayer AG, but Covestro Deutschland AG assumed the obligation to reimburse payments to be made in this context by Bayer AG ("**Reimbursement Claims**").

On August 28, 2015, Bayer AG and Covestro Deutschland AG entered into a purchase agreement pursuant to which Covestro Deutschland AG purchased the Reimbursement Claims from Bayer AG for an amount of EUR 216,646,281.

If and to the extent that Covestro Deutschland AG should realize certain tax benefits due to the fact that the competent tax authorities deviate from the joint understanding of Bayer AG and Covestro Deutschland AG with respect to the tax treatment of the purchase of the Reimbursement Claims, Covestro Deutschland AG shall pay on an after tax basis the net present value of such tax benefits to Bayer AG. In such case, the parties have agreed on principles regarding the calculation of the net present value of such tax benefits and on a payment mechanism in installments.

Sales Support Services Agreements between Covestro Deutschland AG and Companies of the Bayer Group

Companies of the Bayer Group will continue to provide contractually agreed sales support services to the Group in certain countries for a transitional period. In these countries, these services will be provided only for a limited period of time until the Group has received the required operational licenses.

Intellectual Property Rights

Covestro Deutschland AG and Bayer AG have entered into agreements with regard to patents, utility models, registered designs, trademarks and domains.

Financing

At the date of this Base Prospectus, two intra-group loans in the total amount of EUR 2,060 million (the "**Intra-Group Debt**") are owed by the Covestro Group to Bayer Antwerpen NV, a subsidiary of Bayer AG. The intra-group loans bear interest at rates of 0.64% and 0.69% per annum, which is regarded by Covestro AG as having been negotiated at arm's length. The intra-group loan in an amount of EUR 1,250 million due on March 30, 2016 and the intra-group loan in an amount of EUR 810 million due on June 29, 2016 are currently planned to be repaid with the proceeds from future bond issuances or other financial instruments and operating cash generated by the Group.

In connection with the replacement of financing previously provided by the Bayer Group, Covestro Deutschland AG has entered into a Facilities Agreement with a number of financial institutions. In case the repayment of the two intra-group loans due in March 2016 and June 2016, respectively, is not made as currently planned from the proceeds of future bond issuances or other financial instruments and operating cash generated by the Group, the Group plans to draw the term loan facility and to partially draw the revolving credit facility, which both form part of the Facilities Agreement and use the proceeds for the repayment of the two intra-group loans at their maturity.

The guarantees issued by the Bayer Group to third parties for the Group amounted to EUR 156 million as of December 31, 2015. In the context of the carve out of the Group, Covestro Deutschland AG has agreed to indemnify and hold harmless those companies of the Bayer Group which have granted guarantees.

Furthermore, the Bayer Group as well as banks, insurance companies and other financial institutions instructed by the Bayer Group have granted guarantees or other types of collateral for the benefit of suppliers, customers and partners of the Group, which were drawn only to a minor extent. The Group has begun to obtain the release of the collateral granted by the Bayer Group. Such discharge occurs in the form of a substitution by collateral granted by the Group or based on its guarantee facilities.

Covestro Deutschland AG has agreed with the Bayer Group that any collateral granted that has not yet been released and any remaining liability of the Bayer Group shall be fully released. At that time, Covestro Deutschland AG will have to substitute or otherwise discharge Bayer from all existing obligations. Covestro Deutschland AG is required to reimburse the Bayer Group for fees, costs and expenses the Bayer Group incurs in connection of the relevant security. In addition, Covestro Deutschland AG has agreed to hold the Bayer Group harmless from and against any and all liabilities and costs, especially against payment claims raised in respect of the aforementioned security.

Pension Schemes

The Group provides retirement benefits for most of its employees in various countries, either directly or by contributing to privately or publicly administered funds or other institutions. The way these benefits are provided varies according to the legal, fiscal and economic conditions of each country, with benefits generally being based on employee compensation and years of service. The obligations of the Group relate both to existing retirees' pensions and to pension entitlements of future retirees. In Germany, there are two main pension systems in place, the old pension system (until December 31, 2004) and the new pension system (since January 1, 2005). The old pension system for entries until December 31, 2004 was made up of a three-layer arrangement, (i) the basic pension (*Grundrente Bayer Pensionskasse*) provided by Bayer-Pensionskasse VVaG, (ii) the additional pension (*Zusatzrente*) based on a direct pension promise and (iii) the third pension provision layer (*Dritte Versorgungsstufe*) based on a direct pension promise. The third pension provision layer offers matching components (voluntary employee contributions and corresponding employer matching contributions). The new pension system consists of two layers and provides pension entitlements for persons who joined the Bayer Group in Germany on or after January 1, 2005. The basic pension is granted via Rheinische Pensionskasse VVaG (RPK) and employees and employer both contribute a certain percentage of the base salary. Future pension payments from this plan are based on contributions and the return on plan assets, and a guaranteed interest rate applies. Above the social security contribution ceiling (West) for the statutory pension insurance plan, the pension system is supplemented by a further direct pension promise with matching components (voluntary employee contributions and corresponding employer matching contributions).

As of December 31, 2015, the present value of the Covestro Group's pension obligations (defined benefit obligations) was EUR 3.420 million and the fair value of the plan assets was EUR 1.961 million with a net defined benefit liability of EUR 1.462 million. Germany is the country with the highest net defined benefit liability amounting to a provision of EUR 1.148 million.

Currently, certain direct German pension liabilities (e.g. for certain parts of employees' retirement income, deferred compensation etc.) are partially funded within a Contractual Trust Arrangement with Metzler Trust e.V. The corresponding assets of the Covestro Group have been transferred in October 2015 and amount to EUR 293 million.

Bayer Business Services GmbH and Covestro Deutschland AG have established a service agreement on the administration of company pension schemes. Pursuant to this agreement, Bayer Business Services GmbH will provide support services such as actuarial valuation, assisting pensioners, processing of compensation payments and providing consulting on pension schemes and on the statutory pension insurance.

TAXATION

The following comments are of a general nature. They are based on the relevant laws currently in force and as applied on the date of this prospect, which are subject to change, possibly with retroactive effect. These comments do not purport to be a comprehensive description of all tax considerations, which may be relevant to a decision to purchase the Notes and cannot replace legal or tax advice. No representation with respect to the consequences to any particular prospective holder of a Note is made hereby. Prospective holders of a Note should consult their own tax advisers in each country which they are resident and in all relevant jurisdictions.

Federal Republic of Germany

The following general overview does not consider all aspects of income taxation in the Federal Republic of Germany ("**Germany**") that may be relevant to a Noteholder in the light of its particular circumstances and income tax situation. This general overview is based on German tax laws and regulations, all as currently in effect, save for the proposed financial transaction tax, and all subject to change at any time, possibly with retroactive effect. Prospective Noteholders should consult their own tax advisers as to the particular tax consequences to them of subscribing, purchasing, holding and disposing of the Notes, including the application and effect of state, local, foreign and other tax laws and the possible effects of changes in the tax laws of Germany.

German tax residents holding Notes as private assets

Taxation of income from the Notes

If the Notes are held as private assets (*Privatvermögen*) by an individual investor whose residence or habitual abode is in Germany, payments of interest under the Notes are taxed as investment income (*Einkünfte aus Kapitalvermögen*) at a 25% flat tax (*Abgeltungsteuer*) (plus a 5.5% solidarity surcharge thereon and, if applicable to the individual investor, church tax (*Kirchensteuer*)).

The same applies to capital gains from the sale or redemption of the Notes. The capital gain is generally determined as the difference between the proceeds from the sale or redemption of the Notes and the acquisition costs. Expenses directly and factually related (*unmittelbar sachlicher Zusammenhang*) to the sale or redemption are taken into account in computing the taxable gain. Otherwise the deduction of related expenses for tax purposes is not permitted.

Where the Notes are acquired and/or sold in a currency other than Euro, the acquisition costs will be converted into Euro at the time of acquisition, the sales proceeds will be converted in Euro at the time of sale, and only the difference will then be computed in Euro.

The flat tax is generally collected by way of withholding (see succeeding paragraph – *Withholding tax*) and the tax withheld shall generally satisfy the individual investor's tax liability with respect to the Notes. If, however, no or not sufficient tax was withheld (e.g., in case there is no Domestic Paying Agent as defined in the subsequent paragraph – *Withholding Tax*), the investor will have to include the income received from its investment in the Notes in its income tax return and the flat tax will then be collected by way of tax assessment. The investor may also opt for inclusion of investment income in its income tax return if the aggregated amount of tax withheld on investment income during the year exceeded the investor's aggregated flat tax liability on investment income (e.g., because of an available loss carry forward or a foreign tax credit). If the investor's total income tax liability on all taxable income including the investment income determined by generally applicable individual progressive tax rates is lower than 25% the investor may opt to be taxed at individual progressive tax rates with respect to its investment income.

Capital losses from the Notes held as private assets are tax-recognised irrespective of the holding period of the Notes. The losses may, however, not be used to offset other income like employment or business income but may only be offset against investment income subject to certain limitations. Losses not utilised in one year may be carried forward into subsequent years but may not be carried back into preceding years. Capital losses might not be recognised by the German tax authorities if the Notes are sold at a market price, which is lower than the transaction costs. This view has however been challenged in 2014 by a final judgement of a German lower fiscal court.

Individual investors are entitled to a saver's lump sum tax allowance (*Sparer-Pauschbetrag*) for investment income of 801 Euro per year (1,602 Euro for jointly assessed investors). The saver's lump sum tax allowance is considered for purposes of the withholding tax (see subsequent paragraph – *Withholding tax*) if the investor has filed a

withholding tax exemption request (*Freistellungsauftrag*) with the respective Domestic Paying Agent (as defined below). The deduction of related expenses for tax purposes is not possible.

Withholding tax

If the Notes are kept or administered in a domestic securities deposit account by a German credit or financial services institution (*Kredit- oder Finanzdienstleistungsinstitut*) (or by a German branch of a foreign credit or financial services institution), or by a German securities trading firm (*Wertpapierhandelsunternehmen*) or by a German securities trading bank (*Wertpapierhandelsbank*) (each a "**Domestic Paying Agent**") which pays or credits the interest, a 25% withholding tax, plus a 5.5% solidarity surcharge thereon, resulting in a total withholding tax charge of 26.375%, is levied on the interest payments. The applicable withholding tax rate is in excess of the aforementioned rate if church tax is collected for the individual investor by way of withholding which, in the case of interest received as of January 1, 2015, is provided for as a standard procedure unless the Noteholder has filed a blocking notice (*Sperrvermerk*) with the German Federal Central Tax Office (*Bundeszentralamt für Steuern*).

Capital gains are also subject to the 25% withholding tax, plus a 5.5% solidarity surcharge thereon, if the Notes are kept or administered by a Domestic Paying Agent effecting the sale or redemption since their acquisition. If the Notes were sold or redeemed after being transferred to a securities deposit account with a Domestic Paying Agent, 25% withholding tax (plus solidarity surcharge thereon) would be levied on 30% of the proceeds from the sale or the redemption, as the case may be, unless the investor or the previous depository bank was able and allowed to prove evidence for the investor's actual acquisition costs to the current Domestic Paying Agent. The applicable withholding tax rate is in excess of the aforementioned rate if church tax is collected for the individual investor by way of withholding which, in the case of capital gains received as of January 1, 2015, is provided for as a standard procedure unless the Noteholder has filed a blocking notice with the German Federal Central Tax Office.

German resident investors holding the Notes as business assets

Taxation of income from the Notes

If the Notes are held as business assets (*Betriebsvermögen*) by an individual or corporate investor who is tax resident in Germany (i.e., a corporation with its statutory seat or place of management in Germany), interest income and capital gains from the Notes are subject to personal income tax at individual progressive rates or corporate income tax (plus a 5.5% solidarity surcharge thereon and church tax, if applicable) and, in general, trade tax. The effective trade tax rate depends on the applicable trade tax factor (*Gewerbesteuer-Hebesatz*) of the relevant municipality where the business is located. In case of individual investors the trade tax may, however, be partially or fully creditable against the investor's personal income tax liability depending on the applicable trade tax factor and the investor's particular circumstances. Losses from the disposal or redemption of the Notes will generally be tax-recognised and may generally be offset by income subject to certain limitations.

Withholding tax

If the Notes are kept or administered by a Domestic Paying Agent which pays or credits the interest, a 25% withholding tax, plus a 5.5% solidarity surcharge thereon, resulting in a total withholding tax charge of 26.375%, is levied on the interest payments. The applicable withholding tax rate is in excess of the aforementioned rate if church tax is collected for the individual investor by way of withholding which, in the case of interest received as of January 1, 2015, is provided for as a standard procedure unless the Noteholder has filed a blocking notice with the German Federal Central Tax Office.

No withholding is generally required on capital gains from the disposal or redemption of the Notes which is derived by German resident corporate investors and, upon application, by individual investors holding the Notes as business assets, subject to certain requirements. Any losses incurred from the disposal or redemption of the Notes will not be taken into account for withholding tax purposes. The withholding tax does not satisfy the investor's personal or corporate income tax liability with respect to the Notes. The income from the Notes will have to be included in the investor's personal or corporate income tax return. Any German withholding tax (including surcharges) is generally fully creditable against the investor's personal or corporate income tax liability or refundable, as the case may be.

Non-German resident investors

Income derived from the Notes by Noteholders who are not tax resident in Germany is in general exempt from German income taxation, and no withholding tax shall be withheld, unless (i) the Notes are held as business assets

of a German permanent establishment of the investor or by a permanent German representative of the investor, (ii) the income derived from the Notes does otherwise constitute German source income (such as income from the letting and leasing of certain property located in Germany) or (iii) the income is paid by a Domestic Paying Agent against presentation of the Notes or interest coupons (so-called over-the-counter transaction, *Tafelgeschäfte*). If the income derived from the Notes is subject to German taxation according to (i) through (iii) above, the income is subject to withholding tax similar to that described above under the paragraphs *Withholding tax*. Under certain circumstances, foreign investors may benefit from tax reductions or tax exemptions under applicable double tax treaties (*Doppelbesteuerungsabkommen*) entered into with Germany.

Inheritance tax / gift tax

The transfer of Notes to another person by way of gift or inheritance is subject to German gift or inheritance tax, respectively, if *inter alia*

- (i) the testator, the donor, the heir, the donee or any other acquirer had his residence, habitual abode or, in case of a corporation, association (*Personenvereinigung*) or estate (*Vermögensmasse*), had its seat or place of management in Germany at the time of the transfer of property,
- (ii) except as provided under (i), the testator's or donor's Notes belong to a business asset attributable to a permanent establishment or a permanent representative in Germany.

Special regulations apply to certain German expatriates.

Prospective investors are urged to consult with their tax advisor to determine the particular inheritance or gift tax consequences in light of their particular circumstances.

Other taxes

The purchase, sale or other disposal of Notes does not give rise to capital transfer tax, value added tax, stamp duties or similar taxes or charges in Germany (despite the European initiative on financial transaction tax). However, under certain circumstances entrepreneurs may choose liability to value added tax with regard to the sales of Notes which would otherwise be tax exempt. Net wealth tax (*Vermögensteuer*) is, at present, not levied in Germany.

The proposed financial transactions tax

On 14 February 2013, the European Commission published a proposal (the "**Commission's Proposal**") for a Directive for a common financial transaction tax ("**FTT**") in Belgium, Germany, Estonia, Greece, Spain, France, Italy, Austria, Portugal, Slovenia and Slovakia (the "**participating Member States**"). However, Estonia has since stated that it will not participate.

The Commission's Proposal has very broad scope and could, if introduced, apply to certain dealings in the Notes (including secondary market transactions) in certain circumstances.

Under the Commission's Proposal the FTT could apply in certain circumstances to persons both within and outside of the participating Member States. Generally, it would apply to certain dealings in the Notes where at least one party is a financial institution, and at least one party is established in a participating Member State. A financial institution may be, or be deemed to be, "established" in a participating Member State in a broad range of circumstances, including (a) by transacting with a person established in a participating Member State or (b) where the financial instrument which is subject to the dealings is issued in a participating Member State.

However, the FTT proposal remains subject to negotiation between participating Member States. It may therefore be altered prior to any implementation, the timing of which remains unclear. Additional EU Member States may decide to participate.

Prospective Noteholder are advised to seek their own professional advice in relation to the FTT.

The Netherlands

General

The following describes the principal Netherlands tax consequences of the acquisition, holding and disposal of the Notes. This summary does not purport to be a comprehensive description of all Netherlands tax considerations that may be relevant to a decision to acquire, to hold and to dispose of the Notes. Each investor should consult his or

her own professional tax adviser with respect to the tax consequences of an investment in the Notes. The discussion of certain Netherlands taxes set forth below is included for general information purposes only.

For the purposes of this section, "The Netherlands" shall mean that part of the Kingdom of the Netherlands that is in Europe.

Scope

Regardless of whether or not a holder of Notes is, or is treated as being, a resident of the Netherlands, with the exception of the section on withholding tax below, this summary does not address the Netherlands tax consequences for such a holder:

- (i) having a substantial interest (*aanmerkelijk belang*) in the Issuer or of whom a certain related person holds a substantial interest in the Issuer (such a substantial interest is generally present if a person, alone or, where such person is an individual, together with his or her partner (statutory defined term), directly or indirectly holds an equity stake of at least 5%, or a right to acquire such a stake, in each case by reference to the Issuer's total issued share capital, or the issued capital of a certain class of shares);
- (ii) who is a private individual and who may be taxed in box 1 for the purposes of Netherlands income tax (*inkomstenbelasting*) as an entrepreneur (*ondernemer*) having an enterprise (*onderneming*) to which the Notes are attributable, or who may otherwise be taxed in box 1 with respect to benefits derived from the Notes;
- (iii) which is a corporate entity and a taxpayer for the purposes of Netherlands corporate income tax (*vennootschapsbelasting*), having a participation (*deelneming*) in the Issuer (such a participation is generally present in the case of an interest of at least 5% of the Issuer's nominal paid-in capital);
- (iv) which is a corporate entity and an exempt investment institution (*vrijgestelde beleggingsinstelling*) or investment institution (*beleggingsinstelling*) for the purposes of Netherlands corporate income tax, a pension fund, or otherwise not a taxpayer or exempt for tax purposes;
- (v) which is a corporate entity and a resident of Aruba, Curaçao or Sint Maarten; or
- (vi) which is not considered the beneficial owner (*uiteindelijk gerechtigde*) of the Notes and/or the benefits derived from the Notes.

This summary does not describe the Netherlands tax consequences for a person to whom the Notes are attributed on the basis of the separated private assets provisions (*afgezonderd particulier vermogen*) in the Netherlands Income Tax Act 2001 (*Wet inkomstenbelasting 2001*) and/or the Netherlands Gift and Inheritance Tax Act 1956 (*Successiewet 1956*).

Withholding tax

All payments made by the Issuer under the Notes may be made free of withholding or deduction for any taxes of whatsoever nature imposed, levied, withheld or assessed by The Netherlands or any political subdivision or taxing authority thereof or therein.

Income tax

Resident holders: A holder who is a private individual and a resident, or treated as being a resident of the Netherlands for the purposes of Netherlands income tax, must record Notes as assets that are held in box 3. Taxable income with regard to the Notes is then determined on the basis of a deemed return on income from savings and investments (*sparen en beleggen*), rather than on the basis of income actually received or gains actually realised. This deemed return is fixed at a rate of 4% of the holder's yield basis (*rendementsgrondslag*) at the beginning of the calendar year, insofar as the yield basis exceeds a certain threshold (*heffingvrij vermogen*). Such yield basis is determined as the fair market value of certain qualifying assets held by the holder of the Notes, less the fair market value of certain qualifying liabilities at the beginning of the calendar year. The fair market value of the Notes will be included as an asset in the holder's yield basis. As from January 2017 the fixed rate of 4% will be changed into three graduated rates of which the first two (2.9% and 4.7%) will be adjusted annually and the third one (5.5%) may be adjusted after five years. The deemed return on income from savings and investments is taxed at a rate of 30%.

Non-resident holders: A holder who is a private individual and neither a resident, nor treated as being a resident, of The Netherlands for the purposes of Netherlands income tax, will not be subject to such tax in respect of benefits derived from the Notes, unless such holder is entitled to a share in the profits of an enterprise or a co-entitlement to

the net worth of an enterprise which is effectively managed in The Netherlands, to which enterprise the Notes are attributable.

Corporate income tax

Resident holders: A holder which is a corporate entity and, for the purposes of Netherlands corporate income tax, a resident, or treated as being a resident, of The Netherlands, is taxed in respect of benefits derived from the Notes at rates of up to 25%.

Non-resident holders: A holder which is a corporate entity and, for the purposes of Netherlands corporate income tax, is neither a resident, nor treated as being a resident, of The Netherlands, will not be subject to corporate income tax, unless such holder has an interest in an enterprise that is, in whole or in part, carried on through a permanent establishment or a permanent representative in The Netherlands, a Netherlands Enterprise (*Nederlandse onderneming*), to which Netherlands Enterprise the Notes are attributable, or such holder is (other than by way of securities) entitled to a share in the profits of an enterprise or a co-entitlement to the net worth of an enterprise, which is effectively managed in The Netherlands and to which enterprise the Notes are attributable. Such holder is taxed in respect of benefits derived from the Notes at rates of up to 25%.

Gift and inheritance tax

Resident holders: Netherlands gift tax or inheritance tax (*schenk- of erfbelasting*) will arise in respect of an acquisition (or deemed acquisition) of Notes by way of a gift by, or on the death of, a holder of Notes who is a resident, or treated as being a resident, of The Netherlands for the purposes of Netherlands gift and inheritance tax.

Non-resident holders: No Netherlands gift tax or inheritance tax will arise in respect of an acquisition (or deemed acquisition) of Notes by way of a gift by, or on the death of, a holder of Notes who is neither a resident, nor treated as being a resident, of The Netherlands for the purposes of Netherlands gift and inheritance tax.

Other taxes

No Netherlands turnover tax (*omzetbelasting*) will arise in respect of any payment in consideration for the issue of Notes, with respect to any cash settlement of Notes or with respect to the delivery of Notes. Furthermore, no Netherlands registration tax, capital tax, transfer tax or stamp duty (nor any other similar tax or duty) will be payable in connection with the issue or acquisition of the Notes.

Residency

A holder will not become a resident, or a deemed resident, of The Netherlands for Netherlands tax purposes by reason only of holding the Notes.

Luxembourg

There is no withholding tax on payments of interest (including accrued but unpaid interest) made to a Luxembourg non-resident Holder of the Notes. There is also no Luxembourg withholding tax, upon repayment of the principal or upon redemption or exchange of the Notes.

Residents

According to the law of 23 December 2005, as amended, interest on Notes paid by a Luxembourg paying agent to an individual Holder who is a resident of Luxembourg or to a residual entity established in another EU Member State or in certain dependent or associated territories of the European Union securing the payment for such individual will be subject to a withholding tax of 10%. Such withholding tax will be in full discharge of income tax if the beneficial owner is an individual acting in the course of the management or his/her private wealth.

Interest on Notes paid by a Luxembourg paying agent to a resident Holder who is not an individual is not subject to withholding tax.

Responsibility for the withholding tax will be assumed by the Luxembourg paying agent.

Further, pursuant to the law of 23 December 2005, as amended, Luxembourg resident individuals who are the beneficial owners of interest payments and other similar income made by a paying agent established outside Luxembourg in a Member State of the European Union or of the European Economic Area or in a jurisdiction having concluded an agreement with Luxembourg in connection with the Council Directive 2003/48/EC of June 3, 2003 on taxation of savings income in the form of interest payments ("**EU Savings Directive**"), may also opt for a final 10% levy. In such case, the 10% levy is calculated on the same amounts as for the payments made by

Luxembourg resident paying agents. The option for the 10% levy must cover all interest payments made by the paying agent to the Luxembourg resident beneficial owner during the entire civil year.

When used in the preceding paragraphs "*interest*", "*paying agent*" and "*residual entity*" have the meaning given thereto in the Luxembourg laws of 21 June 2005 (or the relevant agreements) and 23 December 2005, as amended. "Interest" will include accrued (since July 1, 2005) or capitalised interest at the sale, repurchase or redemption of the Notes.

Republic of Austria

The following is a brief summary of certain Austrian tax law considerations relating to an investment in the Notes based on Austrian tax laws applicable as of the date of this Base Prospectus. Those laws and the application thereof are subject to change, possibly with retroactive effect. This summary only describes tax implications relating to Noteholders who are Austrian tax residents and does not address any tax law consequences relating to an investment in the Notes that arise under the laws of any other jurisdiction. This section is for general information purposes only and does not purport to address all aspects of Austrian taxation that may be relevant for Noteholders who plan to acquire Notes and does therefore not purport to be a comprehensive description of all the tax considerations which may be relevant for a decision to invest in, hold or dispose of the Notes. The summary is not a substitute for obtaining individual tax advice from a tax law advisor. Prospective Noteholders are therefore urged to consult their own tax advisers as to the particular tax consequences and tax refund procedures of their acquiring, holding or disposing of the Notes, including the applicability and effect of local, foreign and other tax laws and tax regulations and possible changes in tax law and tax regulations prior to investing, since only a specific tax law advice may evaluate the individual tax situation of Noteholders in light of their particular facts and circumstances.

Also, tax considerations relevant to Noteholders that are subject to a special tax regime such as, e.g., private foundations (*Privatstiftungen*), governmental authorities, investment or pension funds or credit institutions are not addressed herein.

General

Income derived by individuals having a domicile or their habitual abode in Austria or corporations having their corporate seat or place of management in Austria (considered as "residents") are taxable pursuant to the Austrian Income Tax Act (*Einkommensteuergesetz*) or the Austrian Corporate Income Tax Act (*Körperschaftsteuergesetz*). Individuals who have neither a domicile nor their habitual abode in Austria or corporate investors that have neither their corporate seat nor their place of management in Austria ("non-residents") are not taxable in Austria with their income from the Notes provided the income is not attributable to a permanent establishment in Austria.

The corporate income tax rate amounts to 25%, the income tax rate is progressive with the highest level of progression amounting to 55% in the highest bracket (for income exceeding €1 million per year). Generally, for investment income a special income tax rate of 27.5% applies (except for certain income received from credit institutions, e.g., interest on bank deposits).

Both, in case of unlimited and limited tax liability, Austria's right to tax may be restricted or reduced by applicable double tax treaties.

Taxation of Noteholders resident in Austria

Notes Held as private Assets

Generally income arising with respect to the Notes in the form of fixed or floating interest payments (*Zinserträge*) or realized capital gains (*Einkünfte aus realisierten Wertsteigerungen*) qualifies as 'investment income' (*Einkünfte aus Kapitalvermögen*) and is, as such, taxed under a special regime at a flat rate of 27.5%. Realized capital gains are the difference between (a) the amount realized (e.g., the sale proceeds, the redemption or other pay-off amount, or the fair market value in case of a deemed realization) and (b) the acquisition costs; in both cases (amount realized and acquisition costs) including accrued interest, if any.

For Notes held as private assets, the acquisition costs do not include ancillary acquisition costs (*Anschaffungsnebenkosten*). An average price is determined regarding Notes, not acquired at the same time, but held in the same securities account with the same securities identification number. Expenses and costs (*Aufwendungen und Ausgaben*) that are directly connected with investment income are not tax effective.

Capital gains are not only taxed upon an actual disposition or redemption of the Notes, but also upon a deemed realization.

- A deemed realization takes place due to a loss of the Austrian taxing right in the Notes (e.g. move abroad, donation to a non-resident, etc.). In case of relocation of the Noteholder to another EU member state the possibility of a tax deferral exists, to be elected for in the tax return of the Noteholder in the year of his relocation. In case that the Notes are held on an Austrian securities account the Austrian withholding agent (custodian or paying agent) has to impose the withholding tax and such withholding tax needs to be deducted only upon actual disposition of the Notes or withdrawal from the account. If the holder of the notes has timely notified the Austrian custodian or paying agent of his or her relocation to the other EU member state, not more than the value increase in the Notes until relocation is subject to Austrian withholding tax. An exemption of withholding tax applies in case of moving to another EU member state if the Noteholder presents to the Austrian custodian or paying agent a tax assessment notice of the year of migration in which the option for a deferral of tax has been exercised.
- A deemed realization also takes place upon withdrawals (*Entnahmen*) from an Austrian securities account and other transfers of Notes from one Austrian securities account to another one. Exemptions apply in this case for a transfer of the Notes to another deposit account, if certain information procedures are fulfilled and no loss of the Austrian taxing right is given (e.g. no donation to a non-resident).

If an Austrian custodian (*depotführende Stelle*) or an Austrian paying agent (*auszahlende Stelle*) is involved in paying out investment income, 27.5% withholding tax is imposed. The Austrian custodian or the Austrian paying agent has the responsibility to deduct and pay the withholding tax to the respective tax office.

There is no obligation of the Issuer to deduct or pay the withholding tax to the respective tax office if the issuer does not use a branch or permanent establishment in Austria for the payment of the interest under the Notes or does not pay out the interest directly to the Noteholders.

The withholding tax generally results in a final income taxation; an option to assess the income at the progressive income tax rate exists (in particular for Noteholders whose regular personal income tax rate is lower than the flat withholding tax). If no withholding tax is imposed (e.g., because the Notes are not held through an Austrian custodian or paying agent), the investment income arising from the Notes generally has to be included into the Noteholder's income tax return in accordance with the law and will generally be subject to the special flat tax rate.

Losses from Notes held as private assets may only offset other investment income (excluding, inter alia, interest income from bank deposits and other claims against banks as well as donations from private foundations) and must not offset any other income. Mandatory loss-offsetting rules to be handled by Austrian custodians apply. A carry-forward of losses is not possible in this context.

Notes Held as Business Assets

Generally, the same rules as described in the previous heading apply regarding Notes that are held as business assets by tax residents who are individuals. The most important differences are the following:

- Realized capital gains, contrary to interest income, have to be included in the annual tax return, since despite a 27.5% withholding taxation that is also imposed in the context of Notes held as business assets if an Austrian custodian is involved, no final income taxation applies.
- Write-downs and realized losses regarding the Notes held as business assets may be offset with positive income from realized capital gains and derivatives in the first place; 55% of the remaining losses may be offset against other income or carried forward. The custodian agent does not implement the offsetting of losses (as mentioned above) with respect to deposit accounts that are not privately held; instead losses are taken into account upon assessment.
- The acquisition costs of Notes held as business assets may also include ancillary costs incurred upon the acquisition.

It is noted that expenses and costs (*Aufwendungen und Ausgaben*) directly connected with investment income are also not tax effective in case the Notes are held as business assets.

Resident Corporations

Capital gains derived from the Notes by corporate Noteholders are generally subject to corporate income tax at the general corporate income tax rate of 25%. If the corporate Noteholder holds Notes through a securities account with an Austrian paying agent, the bank, as withholding agent, will deduct 27.5% Austrian withholding tax. Corporate Noteholders deriving business income from the Notes may avoid the application of such withholding tax by filing a declaration of exemption (*Befreiungserklärung*) with the Austrian withholding tax agent, who has to forward a copy thereof to the finance office. Loss off-setting can only be made in the assessment of the corporation. If no declaration of exemption is submitted, the retained withholding tax can be charged towards the corporate tax debt in the corporate income tax assessment or (the exceeding amount) may be refunded.

A special tax regime applies for private foundations (*Privatstiftungen*).

Non-resident Noteholders

Individuals who have neither a domicile nor their habitual abode in Austria or corporate investors that have neither their corporate seat nor their place of management in Austria ("non-residents") are not taxable in Austria with their income from the Notes provided the income is not attributable to a permanent establishment in Austria.

Non-resident Noteholders who are resident individuals of an EU Member State and who hold the Notes through an Austrian paying agent have to consider the EU Savings Directive regarding particular withholding tax rules (as described below under "*European Withholding Tax*").

Since 1 January 2015, interest income from the Notes paid to non-resident Noteholders who are individuals and not covered by the EU Savings Directive is subject to taxation in Austria if withholding taxation fell due, because the interest was paid by an Austrian withholding tax agent (i.e. an Austrian paying agent or an Austrian custodian), and if the debtor of the interest income has its seat or its place of management in Austria or is an Austrian branch of a foreign bank. Since the Issuer has its seat and place of management in Germany and does not have a branch or permanent establishment in Austria paying out the interest under the Notes, non-resident Noteholders not covered by the EU Savings Directive are not subject to taxation with interest payments received from the Notes through an Austrian withholding tax agent. Therefore, such non-resident Noteholders may, if they receive income from the Notes through an Austrian withholding tax agent, avoid Austrian withholding taxation by way of evidencing their non-resident-status vis-à-vis the withholding tax agent. If Austrian withholding tax is imposed, the Noteholder may apply for a refund thereof.

However, many of Austria's tax treaties provide, in general, for exemption of capital gains provided that the Notes are not attributable to an Austrian permanent establishment.

Inheritance and Gift Tax

The Austrian inheritance and gift tax (*Erbschafts- und Schenkungssteuer*) was abolished in 2008. However, certain gift notification obligations may apply in case gratuitous transfers of assets exceed specific thresholds. According to the Gift Notification Act 2008 (*Schenkungsmitteilungsgesetz 2008*) gifts may have to be notified to the tax authorities within a three-month notification period. There are certain exemptions from such notification obligation, e.g., for gifts among relatives that do not exceed EUR 50,000 within a year or gifts among unrelated persons that do not exceed EUR 15,000 within five years.

Other Taxes

No Austrian stock exchange transfer tax, value added tax or stamp duty will be levied on the purchase, sale or other disposition of the Notes.

U.S. Foreign Account Tax Compliance Withholding

TO ENSURE COMPLIANCE WITH TREASURY DEPARTMENT CIRCULAR 230, PROSPECTIVE PURCHASERS ARE HEREBY NOTIFIED THAT: (A) ANY DISCUSSION OF U.S. FEDERAL INCOME TAX ISSUES IN THIS BASE PROSPECTUS IS NOT INTENDED OR WRITTEN TO BE RELIED UPON, AND CANNOT BE RELIED UPON, BY ANY PERSON FOR THE PURPOSE OF AVOIDING PENALTIES THAT MAY BE IMPOSED ON SUCH PERSON UNDER THE INTERNAL REVENUE CODE; (B) SUCH DISCUSSION IS INCLUDED HEREIN BY THE ISSUER IN CONNECTION WITH THE PROMOTION OR MARKETING (WITHIN THE MEANING OF CIRCULAR 230) BY THE ISSUER OF THE TRANSACTIONS OR MATTERS ADDRESSED HEREIN; AND (C) PROSPECTIVE PURCHASERS SHOULD SEEK ADVICE BASED ON THEIR PARTICULAR CIRCUMSTANCES FROM AN INDEPENDENT TAX ADVISER

The United States enacted rules, commonly referred to as FATCA, that generally impose a new reporting and withholding regime with respect to certain U.S. source payments (including dividends and interest), gross proceeds from the disposition of property that can produce U.S. source interest and dividends and certain other payments made by entities that are classified as financial institutions under FATCA. The United States has entered into IGAs regarding the implementation of FATCA with several other states, including Germany and the Netherlands.

Pursuant to FATCA, non-U.S. financial institutions through which payments on financial instruments are made may be required to withhold U.S. tax at a rate of 30 per cent. on all, or a portion of, payments made after 31 December 2016 in respect of (i) financial instruments issued or materially modified on or after the later of (a) 1 July 2014, and (b) the date that is six months after the date on which the final regulations applicable to "foreign passthru payments" are filed in the Federal Register and (ii) financial instruments which are treated as equity for U.S. federal tax purposes, whenever issued. Under the existing guidance, this withholding tax may be triggered if (i) an issuer a guarantor or paying agent as applicable, is a foreign financial institution ("FFI") (as defined in FATCA) which is obliged to provide certain information on its account holders (making the FFI, as applicable, a "Participating FFI" or if based in Germany or the Netherlands a "Reporting Model 1 FFI"), (ii) the FFI is required to withhold on "foreign passthru payments", and (iii)(a) an investor does not provide information sufficient for the relevant FFI to determine whether the investor is subject to withholding under FATCA, or (b) any FFI to or through which payment on such financial instruments is made is not a Participating FFI or a Reporting Model 1 FFI or otherwise exempt from FATCA withholding.

According to the IGAs with Germany and the Netherlands Reporting Model 1 FFIs are required to report certain information on their U.S. account holders to the competent government of Germany or the Netherlands in order (i) to obtain an exemption from FATCA withholding on payments it receives as Participating FFI and/or (ii) to comply with any applicable law. Certain details of the impact of each IGA on Reporting Model 1 FFIs and reporting and withholding responsibilities under FATCA are still unclear. It is not yet certain how the United States, Germany or the Netherlands will address withholding on "foreign passthru payments" (as described in FATCA) or if such withholding will be required at all.

Currently the Issuer qualifies as non-financial institutions and the Paying Agent as a Reporting Model 1 FFI under FATCA and thus payments made on or with respect to the Notes are not expected to be subject to withholding under FATCA. However, significant aspects of when and how FATCA will apply remain unclear or may change, and the status of the Issuer and the Paying Agent under FATCA may also change, and no assurance can be given that withholding under FATCA will not become relevant with respect to payments made on or with respect to the Notes in the future.

If an amount in respect of U.S. withholding tax were to be deducted or withheld from interest, principal or other payments on the Notes as a result of FATCA, none of the Issuer, any paying agent or any other person would, pursuant to the Terms and Conditions of the Notes be required to pay additional amounts as a result of the deduction or withholding. As a result, investors may receive less interest or principal than expected.

The application of FATCA to Notes issued or materially modified on or after the later of (a) 1 January 2014 and (b) the date that is six months after the date on which the final regulations applicable to "foreign passthru payments" are filed in the Federal Register (or whenever issued, in the case of Notes treated as equity for U.S. federal tax purposes) may be addressed in a supplement to this Base Prospectus, as applicable.

FATCA IS PARTICULARLY COMPLEX AND ITS APPLICATION TO THE ISSUER, THE NOTES AND THE HOLDERS IS UNCERTAIN AT THIS TIME. EACH HOLDER SHOULD CONSULT ITS OWN TAX ADVISER TO OBTAIN A MORE DETAILED EXPLANATION OF FATCA AND TO LEARN HOW THIS LEGISLATION MIGHT AFFECT EACH HOLDER IN ITS PARTICULAR CIRCUMSTANCE.

SUBSCRIPTION AND SALE

Underwriting

The Notes may be issued on a continuous basis to one or more of the Dealers and any additional Dealer appointed under the Programme from time to time by the Issuer, which appointment may be for a specific issue or on an ongoing basis. Notes may be distributed by way of public offers to qualified investors pursuant to the Prospectus Directive and/or non-qualified investors, as specified in the relevant Final Terms, or private placements and, in each case, on a syndicated or non-syndicated basis. The method of distribution of each Tranche of Notes will be stated in the relevant Final Terms.

The Issuer and the Dealers have entered into a dealer agreement dated 26 February 2016 (the "**Dealer Agreement**") which sets out, inter alia, the arrangements under which Notes, issued under the Programme, may from time to time be agreed to be purchased by any one or more Dealers from the Issuer. Any such agreement will, inter alia, contain provisions dealing with the form and terms and conditions of the relevant Notes, the price at which such Notes will be purchased by the Dealer(s) and the commissions or any other agreed deductibles payable or allowable by the Issuer in respect of such purchase. Further, the Dealer Agreement provides for the resignation or termination of appointment of existing Dealers and for the appointment of additional or other Dealers either generally in respect of the Programme or in relation to a particular Tranche of Notes. A subscription agreement prepared in relation to a particular Tranche of Notes will typically be dated on or about the date of the relevant Final Terms applicable to such Tranche of Notes.

Method for determining the issue price and the process for its disclosure

The price and amount of Notes to be issued under the Programme will be determined by the Issuer and each relevant Dealer at the time of issue in accordance with prevailing market conditions.

Selling Restrictions

General

These selling restrictions may be modified by the agreement of the Issuer and the Dealers following a change in a relevant law, regulation or directive. Any such modification will be set out in the Final Terms issued in respect of the issue of Notes to which it relates or in a supplement to this Base Prospectus.

No action has been taken in any jurisdiction that would permit a public offering of any of the Notes, or possession or distribution of the Base Prospectus or any other offering material or any Final Terms, in any country or jurisdiction where action for that purpose is required.

Each Dealer appointed will be required to represent, warrant and agree that it will, to the best of its knowledge, comply with all relevant laws, regulations and directives in each jurisdiction in which it purchases, offers, sells or delivers Notes or has in its possession or distributes the Base Prospectus, any other offering material or any Final Terms in all cases at its own expense, and neither the Issuer nor any other Dealer shall have responsibility therefore.

United States

The Notes have not been and will not be registered under the Securities Act, as amended and may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons except in certain transactions exempt from the registration requirements of the Securities Act. Terms used in this paragraph have the meanings given to them by Regulation S under the Securities Act.

The Notes are subject to U.S. tax law requirements and may not be offered, sold or delivered within the United States or its possessions or to a United States person, except in certain transactions permitted by U.S. tax regulations. Terms used in this paragraph have the meanings given to them by the Code and regulations thereunder.

Each Dealer has agreed that, except as permitted by the Dealer Agreement, it has not offered, sold or delivered and will not offer, sell or deliver the Notes of any identifiable Tranche (i) as part of their distribution at any time or (ii) otherwise until 40 days after completion of the distribution of such Tranche as determined, and certified to the Issuer, by the Fiscal Agent, or in the case of Notes issued on a syndicated basis, the Lead Manager, within the

United States or to, or for the account or benefit of, U.S. persons, and it will have sent to each dealer to which it sells Notes during the distribution compliance period a confirmation or other notice setting forth the restrictions on offers and sales of the Notes within the United States or to, or for the account or benefit of, U.S. persons. Terms used in this paragraph have the meanings given to them by Regulation S.

In addition, until 40 days after the commencement of the offering, an offer or sale of Notes within the United States by any dealer (whether or not participating in the offering) may violate the registration requirements of the Securities Act.

European Economic Area

In relation to each Member State of the European Economic Area¹⁰ which has implemented the Prospectus Directive (each, a "**Relevant Member State**"), each Dealer appointed will be required to represent, warrant and agree that with effect from and including the date on which the Prospectus Directive is implemented in that Relevant Member State (the "**Relevant Implementation Date**") it has not made and will not make an offer of Notes which are the subject of the offering contemplated by this Base Prospectus as completed by the final terms in relation thereto to the public in that Relevant Member State except that it may, with effect from and including the Relevant Implementation Date, make an offer of such Notes to the public in that Relevant Member State:

- (i) if the final terms in relation to the Notes specify that an offer of those Notes may be made other than pursuant to Article 3(2) of the Prospectus Directive in that Relevant Member State (a "**Non-exempt Offer**"), following the date of publication of a prospectus in relation to such Notes which has been approved by the competent authority in that Relevant Member State or, where appropriate, approved in another Relevant Member State and notified to the competent authority in that Relevant Member State, provided that any such prospectus has subsequently been completed by the final terms contemplating such Non-exempt Offer, in accordance with the Prospectus Directive, in the period beginning and ending on the dates specified in such prospectus or final terms, as applicable and the Issuer has consented in writing to its use for the purpose of that Non-exempt Offer;
- (ii) at any time to any legal entity which is a qualified investor as defined in the Prospectus Directive;
- (iii) at any time to fewer than 150 natural or legal persons (other than qualified investors as defined in the Prospectus Directive), subject to obtaining the prior consent of the relevant Dealer or Dealers nominated by the Issuer for any such offer; or
- (iv) at any time in any other circumstances falling within Article 3(2) of the Prospectus Directive,

provided that no such offer of Notes referred to in (ii) to (iv) above shall require the Issuer or any Dealer to publish a prospectus pursuant to Article 3 of the Prospectus Directive or supplement a prospectus pursuant to Article 16 of the Prospectus Directive.

For the purposes of this provision, the expression an "offer of Notes to the public" in relation to any Notes in any Relevant Member State means the communication in any form and by any means of sufficient information on the terms of the offer and the Notes to be offered so as to enable an investor to decide to purchase or subscribe the Notes, as the same may be varied in that Member State by any measure implementing the Prospectus Directive in that Member State, the expression "**Prospectus Directive**" means Directive 2003/71/EC (and amendments thereto, including by Directive 2010/73/EU, as amended), and includes any relevant implementing measure in each Relevant Member State.

United Kingdom

Each Dealer appointed will be required to represent, warrant and agree that:

1. in relation to any Notes which have a maturity of less than one year, (a) it is a person whose ordinary activities involve it in acquiring, holding, managing or disposing of investments (as principal or agent) for the purposes of its business and (b) it has not offered or sold and will not offer or sell any Notes other than to persons whose ordinary activities involve them in acquiring, holding, managing or disposing of investments (as principal or agent) for the purposes of their businesses or who it is reasonable to expect will acquire, hold,

manage or dispose of investments (as principal or agent) for the purposes of their businesses where the issue of the Notes would otherwise constitute a contravention of section 19 of the Financial Services and Markets Act 2000 (the "FSMA") by the Issuer,

2. it has only communicated or caused to be communicated and will only communicate or cause to be communicated any invitation or inducement to engage in investment activity (within the meaning of section 21 of the FSMA) received by it in connection with the issue or sale of any Notes in circumstances in which section 21(1) of the FSMA does not apply to the Issuer, and
3. it has complied and will comply with all applicable provisions of the FSMA with respect to anything done by it in relation to such Notes in, from or otherwise involving the United Kingdom.

⁷ The minimum Specified Denomination of the Notes will be, if in euro, EUR 1,000, and, if in any currency other than euro, an amount in such other currency at least equivalent to EUR 1,000 at the time of the issue of the Notes. Notes (including Notes denominated in Pound Sterling) in respect of which the issue proceeds are to be accepted by the Issuer in the United Kingdom or whose issue otherwise constitutes a contravention of section 19 of the FSMA and which have a maturity of less than one year must have a minimum denomination redemption value of £100,000 (or its equivalent in other currencies).

recognition will depend upon the ECB being satisfied that Eurosystem eligibility criteria have been met.

Im Fall der Anwendbarkeit dieses Punktes ist damit beabsichtigt, die Schuldverschreibungen zum Zeitpunkt ihrer Emission bei einer der internationalen zentralen Verwahrstellen (ICSDs) als gemeinsame Sicherheitsverwahrstelle (common safekeeper) einzureichen. Das bedeutet nicht notwendigerweise, dass die Schuldverschreibungen zum Zeitpunkt ihrer Emission oder zu einem anderen Zeitpunkt während ihrer Laufzeit als geeignete Sicherheit im Sinne der Geldpolitik des Eurosystems und für Zwecke der untertägigen Kreditfähigkeit durch das Eurosystem anerkannt werden. Eine solche Anerkennung hängt davon ab, ob die EZB die Kriterien der Eignung des Eurosystems als erfüllt ansieht.

Im Falle der Nichtanwendbarkeit dieses Punktes zum Zeitpunkt dieser Endgültigen Bedingungen könnten die Schuldverschreibungen bei einer der internationalen zentralen Verwahrstellen (ICSDs) als gemeinsame Sicherheitsverwahrstelle (common safekeeper) eingereicht werden, wenn die Kriterien der Eignung des Eurosystems zu einem späteren Zeitpunkt so geändert werden, dass die Schuldverschreibungen diese erfüllen könnten. Das bedeutet nicht notwendigerweise, dass die Schuldverschreibungen dann als geeignete Sicherheit im Sinne der Geldpolitik des Eurosystems und für Zwecke der untertägigen Kreditfähigkeit durch das Eurosystem anerkannt würden. Eine solche Anerkennung hängt davon ab, ob die EZB die Kriterien der Eignung des Eurosystems als erfüllt ansieht.

Clearing Systems

Notes have been accepted for clearance through the Euroclear Bank SA/NV, 1 Boulevard du Roi Albert II, B-1210 Brussels, Belgium and Clearstream Banking, société anonyme, 42 Avenue JF Kennedy L-1855, Luxembourg and Clearstream Banking AG, Frankfurt am Main, Mergenthalerallee 61, 65760 Eschborn, Germany. The Common Code, the International Securities Identification Number (ISIN) and (where applicable) the identification number for any other relevant clearing system for each Series of Notes will be set out in the relevant Final Terms.

Notes potentially eligible as collateral for the Eurosystem monetary policy and intra-day credit operations may be (i) deposited with either Clearstream, Frankfurt as classical global notes or (ii) issued in a form compliant with the new global note structure for international bearer debt securities and will be kept in safe custody with a common safekeeper ("CSK") to Euroclear and Clearstream, Luxembourg, the International Central Securities Depositories (the "ICSDs").

If Notes will be issued in the new global note structure this will be set out in the relevant Final Terms.

Interests of the Dealers

Certain of the Dealers and their affiliates have engaged, and may in the future engage, in investment banking and/or commercial banking transactions with, and may perform services for, the Issuer and their affiliates in the ordinary course of business. In addition, in the ordinary course of their business activities, the Dealers and their affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers. Such investments and securities activities may involve securities and/or instruments of the Issuer or Issuer's affiliates. Certain of the Dealers or their affiliates that have a lending relationship with the Issuer routinely hedge their credit exposure to the Issuer consistent with their customary risk management policies. Typically, such Dealers and their affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in securities, including potentially the Notes issued under the Programme. Any such short positions could adversely affect future trading prices of Notes issued under the Programme. The Dealers and their affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.
