Element	Section D - Risks	
	Risks specific to Deutsche Telekom AG as [Issuer] [Guarantor]	
D.2	Key information on the key risks that are specific to the Issuer	General Economic Development The economic development and outlook are positive for most of Deutsche Telekom's markets. The European economies are profiting from strong consumption, low oil and energy prices, an expansive monetary policy, and favorable euro exchange rates. However, an economic downturn, an intensification of the European debt crisis, a considerably slowdown in consumer spending or radical escalation of current or future geopolitical crises, resulting for example from the increased terror threat or large numbers of refugees, could adversely affect Deutsche Telekom's customers' purchases of products and services in each of the operating segments, which could have a negative impact on the operating results and financial condition of Deutsche Telekom. Government austerity measures, could have negative effects on demand for telecommunications services – caused by reduced public demand or lower disposable incomes in the private sector. On account of national efforts at consolidation, Deutsche Telekom's operational business also faces the risk of further, unannounced tax rises or special taxes, in particularly in the Southern and Eastern European markets. Furthermore, the risks arising from the sovereign debt crisis also gives rise to volatile exchange rates. Decisions of Regulatory Authorities Because Deutsche Telekom operates in heavily regulated business environments, decisions that regulatory authorities impose on Deutsche Telekom restrict flexibility in managing its business and may force it to offer services to competitors or reduce the prices it charges for products and services, either of which could have a material negative impact on Deutsche Telekom's revenues, profits and market shares. Intense Business Competition Deutsche Telekom faces intense competition in all areas of its business, which could lead to reduced prices for its

		products and services and a decrease in market share in certain service areas, thereby adversely affecting Deutsche Telekom's revenues and net profit. Non-Realisation of Expected Revenues Deutsche Telekom may not realise either the expected level of demand for its new/existing products and services or the expected level and timing of revenues generated by those products and services, on account of the lack of market acceptance or technological change, which could adversely affect Deutsche Telekom's cash flows. Uncertainties for strategic transformations and integration A substantive or temporal deviation from planned measures for strategic transformations and integration may reduce its benefits and could have a negative impact on Deutsche Telekom's business situation, financial position and results of operations. Uncertainty of Meeting Restructuring Goals Failure to achieve the planned reduction and restructuring of personnel or the human resources-related cost-savings goals could negatively affect the reputation and achievement of Deutsche Telekom's financial objectives and profitability. Return of Civil Servants As a result of dispositions of certain non-core businesses in Germany, there is an increased risk of return of civil servants transferred out of Deutsche Telekom Group, which could have a negative impact on the staff and cost reduction objectives. Health Risks of Wireless Communications Devices Alleged health risks of wireless communications devices have led to litigation affecting markets with Deutsche Telekom's mobile telecommunications operations subsidiaries and could lead to decreased wireless communications usage or increased difficulty in obtaining sites for base stations and, as a result, adversely affect the financial condition and results of operations of Deutsche Telekom's wireless services business. Risks in Connection with Implementation of IT- and NT-Programs Deutsche Telekom regularly engages in large-scale programs to reshape the information technology ("IT") and network infrastructure ("NT") to adapt to changing customer needs and organisational and accounting requirements. The implementation of any of these programs may require substantial investments and a failure to effectively plan and monitor them could lead to misallocations of resources and impaired processes with negative consequences for Deutsche Telekom's operations. System Failures and Disruptions System failures due to natural or man-made disruptions and loss of data could result in reduced user traffic and reduced revenues and could harm Deutsche Telekom's reputation
--	--	--

		and results. Shortcomings in Supply or Procurement Shortcomings in Deutsche Telekom's supply and procurement process could negatively affect its product portfolio, revenues and profits. Litigations Deutsche Telekom is continuously involved in disputes and litigation with government agencies, competition authorities, competitors and other parties. The ultimate outcome of such legal proceedings is generally uncertain. When finally concluded, they may have a material adverse effect on Deutsche Telekom's results of operations and financial condition. Liquidity and credit risk and changes in Currency Exchange Rates, Interest rates, Rating and Tax statutory provisions Liquidity, credit, currency, interest rate risks, rating risks and tax risks have had, and may continue to have, an adverse effect on Deutsche Telekom's revenue and cost development. Potential Breaches of Compliance Requirements Potential breaches of compliance requirements or the identification of material weaknesses in Deutsche Telekom's internal control over financial reporting may have an adverse impact on Deutsche Telekom's corporate reputation, financial condition and the trading price of its securities. Brand, communication, and reputation An unforeseeable negative media report on products and services or corporate activities and responsibilities of Deutsche Telekom Group can have a huge impact on the reputation, the standing and the brand image of Deutsche Telekom Group. General Developments in Telecommunication Sector Developments in the telecommunications sector have resulted, and may in the future result, in substantial write-downs of the carrying value of certain of Deutsche Telekom Group's assets.

D.3	Key information on the key risks that are specific to the	Notes may not be a suitable investment for all investors Each potential investor in Notes must determine the suitability of that investment in light of its own circumstances.

	securities	Liquidity Risk There can be no assurance that a liquid secondary market for the Notes will develop or, if it does develop, that it will continue. In an illiquid market, an investor might not be able to sell his Notes at any time at fair market prices. The possibility to sell the Notes might additionally be restricted by country specific reasons. Market Price Risk The Holder of Notes is exposed to the risk of an unfavourable development of market prices of its Notes, which materialises if the Holder sells the Notes prior to the final maturity of such Notes. Risk of Early Redemption A Holder of Notes is exposed to the risk that due to early redemption his investment will have a lower than expected yield. Also, the Holder may only be able to reinvest on less favourable conditions as compared to the original investment. [Currency Risk] A Holder of Notes denominated in a foreign currency is exposed to the risk, that changes in currency exchange rates may affect the yield of such Notes.] [Fixed Rate Notes] A Holder of Fixed Rate Notes is exposed to the risk that the price of such Notes falls as a result of changes in the market interest rate.] [Floating Rate Notes] A Holder of Floating Rate Notes is exposed to the risk of fluctuating interest rate levels and uncertain interest income. Fluctuating interest rate levels make it impossible to determine the profitability of Floating Rate Notes in advance.]

Punkt	Abschnitt D – Risiken	
	Risiken, die der Deutsche Telekom AG als [Emittentin] [Garantin] eigen sind	
D.2	Zentrale Angaben zu den zentralen Risiken, die dem Emittenten eigen sind	Allgemeine konjunkturelle Entwicklung Die konjunkturelle Entwicklung und die Aussichten für die meisten Märkte, in denen die Deutsche Telekom tätig ist, sind positiv. Die europäischen Volkswirtschaften profitieren vom starken Konsum, von niedrigen Öl- und Energiepreisen, einer expansiven Geldpolitik und vorteilhaften Euro-Wechselkursen. Jedoch könnten ein wirtschaftlicher Abschwung, eine Intensivierung der europäischen Schuldenkrise, deutlich rückläufige Verbraucherausgaben oder eine radikale Eskalation der aktuellen oder zukünftigen geopolitischen Krisen, zum Beispiel infolge der erhöhten Terrorgefahr oder einer großen Zahl von Flüchtlingen, zur Zurückhaltung der Kunden für Käufe von Produkten und Dienstleistungen der Deutschen Telekom in jedem der Segmente führen, was sich negativ auf die operativen Ergebnisse und die finanzielle Lage der Deutschen Telekom auswirken könnte. Daneben könnten auch staatliche Sparmaßnahmen negative Auswirkungen auf die Nachfrage nach Telekommunikationsdienstleistungen haben – als Folge einer reduzierten Staatsnachfrage oder eines verringerten verfügbaren Einkommens im Privatsektor. Wegen staatlicher Konsolidierungsanstrengungen droht für das operative Geschäft der Deutschen Telekom zudem das Risiko unangekündigter und weiterer Steuererhöhungen bzw. Sondersteuern, speziell in den süd- und osteuropäischen Märkten. Darüber hinaus resultieren aus den Risiken der Staatsschuldenkrise weiterhin volatile Wechselkursbewegungen. Entscheidungen von Aufsichtsbehörden Da die Deutsche Telekom in stark regulierten Wirtschaftssektoren tätig ist, schränken Entscheidungen, die ihr von Aufsichtsbehörden auferlegt werden, ihre Flexibilität im Geschäftsmanagement ein und könnten sie dazu zwingen, ihren Mitbewerbern Dienstleistungen anzubieten oder die Preise für ihre Produkte und Dienstleistungen zu senken. Beides könnte die Umsätze, Gewinne und Marktanteile der Deutschen Telekom sehr nachteilig beeinflussen. Intensiver Wettbewerb Die Deutsche Telekom ist in allen ihren Geschäftsfeldern mit intensivem Wettbewerb konfrontiert, was zu Preissenkungen für ihre Produkte und Dienstleistungen und einem rückläufigen Marktanteil in bestimmten Dienstbereichen führen und damit ihre Umsatz- und Gewinnsituation nachteilig beeinflussen könnte. Nicht-Realisierung von erwarteten Einnahmen Es ist möglich, dass die Deutsche Telekom weder die erwartete Nachfrage für ihre neuen/existierenden Produkte

		und Dienstleistungen noch die erwartete Höhe und den Zeitpunkt der mit diesen Produkten und Dienstleistungen generierten Umsätzen aufgrund eines Mangels an Marktakzeptanz oder technologischer Veränderung realisieren kann, was sich nachteilig auf ihre Cash-Flows auswirken könnte. Unsicherheiten in Verbindung aus strategischen Transformationen und Integration Eine inhaltliche oder zeitliche Abweichung von geplanten Maßnahmen für strategischen Transformationen und Integration kann deren Nutzen verringern und sich negativ auf die Geschäfts-, Vermögens-, Finanz- und Ertragslage der Deutschen Telekom auswirken. Unsicherheiten in Verbindung mit Personalabbau Sollte es der Deutschen Telekom nicht gelingen, ihre geplanten Maßnahmen für den Personalabbau und –umbau bzw. ihre personalbezogenen Kostensparziele umzusetzen, könnte sich dies negativ auf das Ansehen und auf die Erreichung ihrer Finanzzielsetzungen und Profitabilität auswirken. Rückkehr von Beamten Aufgrund von Veräußerungen bestimmter, nicht zum Kerngeschäft gehörender Unternehmen in Deutschland besteht ein erhöhtes Risiko der Rückkehr von aus der Deutsche Telekom Gruppe ausgegliederten Beamten, was einen negativen Einfluss auf die Personal- und Kostensenkungsziele der Deutschen Telekom Gruppe haben könnte. Gesundheitsrisiken drahtloser Kommunikationsgeräte Vermeintliche Gesundheitsrisiken drahtloser Kommunikationsgeräte haben zu Gerichtsverfahren geführt und die Märkte im Mobilfunkgeschäft der Deutschen Telekom beeinträchtigt. Dies könnte einen Rückgang der Mobilfunknutzung nach sich ziehen oder die Beschaffung von Standorten für Basisstationen erschweren, was wiederum negative Auswirkungen auf die Finanzlage und operativen Ergebnisse des Mobilfunkgeschäfts der Deutschen Telekom Gruppe haben könnte. Risiken in Verbindung mit Implementierung von IT- und NT-Programmen Im Rahmen groß angelegter Programme zur Neugestaltung ihrer Informationstechnologie ("IT") und Netzinfrastruktur ("NT") ist die Deutsche Telekom stets darum bemüht, immer neuen Kundenbedürfnissen, organisatorischen und buchhalterischen Anforderungen Rechnung zu tragen. Die Umsetzung dieser Programme erfordert erhebliche Investitionen und wenn diese Aktivitäten nicht effektiv geplant und überwacht werden, kann dies eine falsche Ressourcenzuweisung sowie eine Behinderung von Prozessen mit negativen Konsequenzen für ihren Geschäftsbetrieb nach sich ziehen. Systemausfälle und Störungen Systemausfälle aufgrund naturbedingter oder menschlich
--	--	--

		verursachter Störungen und Datenverluste könnten zu Verkehrseinbußen und rückläufigen Umsätzen führen und das Ansehen der Deutschen Telekom und ihre Ergebnisse schädigen. Defizite im Versorgungs- und Beschaffungsprozess Defizite im Versorgungs- und Beschaffungsprozess der Deutschen Telekom könnten sich negativ auf ihr Produktportfolio, ihre Umsätze und Gewinne auswirken. Rechtsstreitigkeiten Die Deutsche Telekom befindet sich laufend mit staatlichen Aufsichts- und Wettbewerbsbehörden, Mitbewerbern und anderen Parteien im Rechtsstreit. Das Endergebnis solcher Gerichtsverfahren ist generell ungewiss. Nach deren endgültigem Abschluss können sie erhebliche nachteilige Auswirkungen auf die operativen Ergebnisse der Deutschen Telekom und ihre Finanzlage haben. Liquiditäts- und Kreditrisiken sowie Veränderungen von Wechselkursen-, Zinsen, des Ratings- und der Steuergesetzgebung Liquiditäts-, Kredit-, Währungs-, Zins-, Rating- und Steuer-Risiken haben nachteilige Auswirkungen auf die Umsatz- und Kostenentwicklung der Deutschen Telekom gehabt und werden dies möglicherweise auch in Zukunft haben. Potenzielle Nichterfüllung von Compliance-Anforderungen Die potenzielle Nichterfüllung von Compliance-Anforderungen oder die Ermittlung wesentlicher Schwächen der internen Kontrolle der Finanzberichterstattung der Deutschen Telekom könnten einen negativen Einfluss auf den Ruf des Unternehmens, auf seine Finanzlage und die Kurse seiner Wertpapiere haben. Marke, Kommunikation und Reputation Eine unvorhersehbare negative mediale Berichterstattung über die Produkte und Dienstleistungen oder unternehmerische Tätigkeit und Verantwortung der Deutschen Telekom kann einen großen Einfluss auf die Reputation, den Ruf und das Marken-Image der Deutschen Telekom haben. Allgemeine Entwicklungen im Telekommunikationssektor Entwicklungen im Telekommunikationssektor resultierten in der Vergangenheit und könnten auch zukünftig in umfangreichen Abschreibungen des Buchwertes bestimmter Vermögenswerte resultieren.

Risk Factors

Prospective investors should consider all information provided in this Prospectus and the Reference Documents and consult with their own professional advisers if they consider it necessary. In addition, investors should be aware that the risks described may combine and thus accumulate.

Certain of the Dealers and their affiliates have engaged, and may in the future engage, in investment banking and/or commercial banking transactions with, and may perform services for, the Issuer and its affiliates in the ordinary course of business.

Risk Factors regarding the Issuers

The following is a disclosure of risk factors that are material to each Issuer and that may affect each Issuer's ability to fulfill its obligations under the Notes or the Guarantee, as the case may be. Prospective investors should consider these risk factors before deciding to purchase Notes issued under the Programme.

Risk Factors regarding Deutsche Telekom AG

The risk related to Deutsche Telekom AG's ability to fulfill its obligations as Issuer of debt securities is described by reference to the ratings assigned to Deutsche Telekom AG. Deutsche Telekom AG is rated by Fitch Ratings CIS Limited ("**Fitch**")^{1,2} Moody's Investors Service España SA ("**Moody's**")^{3,2} and by Standard & Poor's Credit Market Services Europe Limited ("**S&P**")^{4,2} together with Fitch and Moody's, the "**Rating Agencies**".

As of the publication date of the Prospectus, the ratings assigned to Deutsche Telekom by the Rating Agencies were as follows:

by Fitch:	long-term rating:	BBB ⁵
	short-term rating:	F2 ⁵

Fitch defines:

BBB: "BBB" ratings indicate that expectations of default risk are currently low. The capacity for payment of financial commitments is considered adequate but adverse business or economic conditions are more likely to impair this capacity.

F2: Indicates satisfactory capacity for timely payment of financial commitments.

by Moody's:	long-term rating:	Baa1 ⁵
	short-term rating:	P-2 ⁵

¹ Fitch is established in the European Community and is registered under Regulation (EC) No 1060/2009 of the European Parliament and of the Council of 16 September 2009 on credit rating agencies, as amended (the "**CRA Regulation**").

² The European Securities and Markets Authority publishes on its website (<http://www.esma.europa.eu/page/Listregistered-and-certified-CRAs>) a list of credit rating agencies registered in accordance with the CRA Regulation. That list is updated within five working days following the adoption of a decision under Article 16, 17 or 20 CRA Regulation. The European Commission shall publish that updated list in the Official Journal of the European Union within 30 days following such update.

³ Moody's is established in the European Community and is registered under the CRA Regulation.

⁴ S&P is established in the European Community and is registered under the CRA Regulation.

⁵ A credit rating assesses the creditworthiness of an entity and informs an investor therefore about the probability of the entity being able to redeem invested capital. It is not a recommendation to buy, sell or hold securities and may be revised or withdrawn by the rating agency at any time.

Baa1: Obligations rated Baa are subject to moderate credit risks. They are considered medium-grade and as such may possess certain speculative characteristics.

by S&P: long-term rating: BBB+⁵
short-term rating: A-2⁵

BBB+: An obligation rated "BBB" exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

¹ Note: "+" or "-" may be appended to a rating to denote the relative status within major rating categories. Such suffixes are not added to the "AAA" category or to categories below "CCC".

² Note: Moody's appends numerical modifiers 1, 2 and 3 to each generic rating classification from Aa to Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

³ Note: Plus (+) or minus (-): The ratings from "AA" to "CCC" may be modified by the addition of a plus or minus sign to show relative standing within the major rating categories.

The economic development and outlook are positive for most of Deutsche Telekom markets. The European economies are profiting from strong consumption, low oil and energy prices, an expansive monetary policy, and favorable euro exchange rates. Deutsche Telekom expects stable growth in the U. S. economy over the next few years. However, economic and political developments have shown that uncertainties have increased with regard to the economic situation globally and in Deutsche Telekom footprint countries. Geopolitical crises, resulting for example from the increased terror threat or large numbers of refugees, can have an adverse effect on the economies of the countries in which Deutsche Telekom operate. In addition, persistent economic weakness, especially in the emerging economies, could negatively impact on global trade and the markets of Deutsche Telekom's operating segments. Especially for the European countries in which Deutsche Telekom operate, the biggest economic risk remains a renewed intensification of the sovereign debt crisis with a potential impact on the banks and financial markets of an individual country or an entire region. The political situation in Greece essentially stabilised in 2015 following the new elections and the agreement on the European Stability Mechanism (ESM). However, risk factors remain, such as the marginal parliamentary majority of the governing coalition and potentially growing resistance among the population to austerity measures such as the pensions reform. For this reason, a renewed escalation towards crisis in the political situation cannot be entirely ruled out. Risks to economic development could manifest themselves in different ways in some of Deutsche Telekom AG countries, where consumers and business customers could rein in their consumption if the economy slows again sharply and uncertainty continues to rise. Government austerity measures could also have negative effects on demand for telecommunications services – caused by reduced public demand or lower disposable

incomes in the private sector. On account of national efforts at consolidation, Deutsche Telekom's operational business also faces the risk of further, unannounced tax rises or special taxes, in particular in the Southern and Eastern European markets. Furthermore, the risks arising from the sovereign debt crisis also gives rise to volatile exchange rates.

Because Deutsche Telekom operates in heavily regulated business environments, decisions that regulatory authorities impose on Deutsche Telekom restrict flexibility in managing its business and may force it to offer services to competitors, or reduce the prices it charges for products and services, either of which could have a material negative impact on Deutsche Telekom's revenues, profits and market shares.

Deutsche Telekom AG and its international companies remain subject to sector-specific market regulation. The national regulatory authorities have extensive powers to intervene in product design and pricing, with significant effects on operations. Deutsche Telekom can only to a limited extent anticipate such regulatory interventions, which may additionally intensify existing price and competitive pressure.

Furthermore, the European Commission is issuing recommendations which are not directly binding but do have to be taken into account by the national regulatory authorities.

There are concerns that regulatory interventions in Germany and other European countries may continue to impact the revenue trend in the fixed-network and mobile market in the medium and long term.

In the following section, the main regulatory and political risks are described that, from today's perspective, have an influence on the results of operations, financial position or cash flows and / or reputation.

Awarding of frequencies.

In terms of risks and opportunities regarding spectrum regulation and policy, particular note should be made of the spectrum allocation processes currently in preparation or being planned in some countries. The allocation procedures mainly relate to the auctioning of spectrum in the 0.8 GHz, 1.8 GHz, and 2.6 GHz ranges.

Risks could arise from the fact that inappropriate auction rules and frequency usage requirements, excessive launch price demands and disproportionately high annual spectrum fees can jeopardise the acquisition of Deutsche Telekom's target spectrum. By contrast, there is an opportunity in the fact that via such spectrum allocation procedures, mobile operators can acquire sufficient spectrum that is ideal for their purposes. Allocation procedures are currently being prepared in Albania, Greece, the Czech Republic, and Slovakia, which are expected to take place in the first half of 2016. In addition, according to current estimates, frequency auctions will also be held in the medium term in the United Kingdom, Montenegro, Hungary, and the United States.

Consumer protection

In February 2014, the German Federal Network Agency presented a draft regulation designed to achieve more transparency and greater cost control in telecommunications services. The extensive requirements will give consumers and other end users the opportunity to check their Internet speeds in the mobile and fixed network on request, for example. At present, these new regulations mean substantial modification costs for Telekom Deutschland. In the main part, the draft regulation takes up the EU regulations on the single market for electronic communications, which entered into force at the end of November 2015 with a transposition period until the end of April 2016. Since the Federal Network Agency's draft regulation is expected to be adopted by the end of the first quarter of 2016 following agreement with the relevant ministries, the Federal Network Agency has already begun to develop a measuring system to be used throughout Germany to show available access line bandwidths. The regulation will enter into force after a six-month transposition period. An extended transposition period of twelve months is envisaged for individual rules.

Retrospective new ruling on rate approvals

In Germany, in addition to the general regulatory risks already described, there are also uncertainties arising from the fact that administrative courts can reverse rate rulings made by the national regulatory authority. The regulatory authority then has to decide again on the rates for past periods. It is generally

not clear at all, whether, to what extent, and in which direction rates will be revised.

At EU level, the relevant regulatory framework is largely determined by regulations to be applied directly by the member states, by directives to be transposed into national law by the member states, and by recommendations by the European Commission that, while not directly binding, must be taken into account by the national regulatory authorities. The further development of the European legal framework in the form of new EU regulations or guidelines could have additional regulatory restrictions.

As part of a strategy for the digital single market, the European Commission announced its upcoming European regulation initiatives in early May 2015. These include, for example, a complete review of the applicable EU legal framework for telecommunications, initiated in fall of 2015 with a public consultation. The process comprises a review of the current ex-ante regulation for network access, a reform of service regulation whose aims include more equal treatment of telecommunications services and Internet-based (communications) services, as well as a renewed initiative to create a more harmonised framework for the awarding of mobile spectrum. Furthermore, the Commission announced a review of the role of Internet platforms in the digital economy with a view to potential legislative measures. The review began in fall 2015 with a consultation. All these initiatives offer the opportunity to achieve more balanced competitive conditions between telecommunications and Internet companies. At the same time, risks arise for additional obligations, for example in the area of customer protection or universal service.

Deutsche Telekom faces intense competition in all areas of its business, which could lead to reduced prices for its products and services and a decrease in market share in certain service areas, thereby adversely affecting Deutsche Telekom's revenues and net profit.

Competitive pressure will increase further, especially in the fixed network in Germany and Europe. In the broadband market, Deutsche Telekom continues to observe a growing dominance of cable network operators in the new customer business, especially in Germany. Furthermore, regional telecommunications carriers will further increase their market coverage. In certain regions, Deutsche Telekom competitors are extending their own fiber-optic network to the home so that they are independent of Deutsche Telekom's network in the local loop too. Another competitive risk lies in the fact that Deutsche Telekom is increasingly faced with competitors who are not part of the telecommunications sector as such but rather major players in the Internet and consumer electronics industries. Deutsche Telekom continues to be exposed to the risk of a further loss of market share and falling margins.

Deutsche Telekom also expects prices in mobile voice telephony and mobile data services to decline further, which could adversely affect on the mobile revenue. Among the main reasons for the decrease in prices are providers that are pursuing aggressive pricing policies (MVNOs) and expanding in Germany and other European markets.

Pure eSIM smartphone offerings could put even more downward pressure on prices for mobile voice telephony and mobile data services. Deutsche Telekom national companies in Europe continue operates in a highly competitive environment. Even though partnerships and consolidations, e.g., in Austria, are providing impetus for stabilisation, competition remains intense. This is due to new players entering the market through frequency auctions and wholesale agreements, in particular in mobile communications. In addition, the risk remains that smaller competitors will take unforeseen, aggressive pricing measures.

Deutsche Telekom's relative market position in the United States entails particular risks, especially in connection with its market shares, brand positioning, network coverage - including in roaming agreements -, and network quality. Deutsche Telekom expect joint ventures, mergers, acquisitions and strategic business combinations in the U.S. mobile industry to result in increased competition in the U.S. market. Thanks to their market position and market shares, Deutsche Telekom's three strongest competitors (Verizon Wireless, AT&T, Sprint) can react faster and more effectively to market opportunities and invest more in customer acquisition. In the future, Deutsche Telekom will require additional spectrum in order to meet the rising demand for capacity. If spectrum is not acquired, risks primarily include a deterioration in the quality of services due to saturated frequency capacities.

Deutsche Telekom Systems Solutions operating segment also faces challenges; after all, the information and communications technology market is dominated by continued strong competition,

persistent price erosion, long sales cycles, and restraint in the awarding of projects. This creates a potential risk of revenue losses and declining margins at T-Systems.

Deutsche Telekom may not realise either the expected level of demand for its new/existing products and services, or the expected level and timing of revenues generated by those products and services, on account of the lack of market acceptance or technological change, which could adversely affect Deutsche Telekom's cash flows.

There is a risk that Deutsche Telekom will not succeed in making customers sufficiently aware of existing and future value-added services or in creating customer acceptance of these services at the prices Deutsche Telekom would want to charge. In addition, market acceptance for these new products and services could be negatively affected by an unwillingness to pay for additional features. These risks exist, in particular, with respect to Deutsche Telekom's anticipated future growth drivers in the mobile and the fixed-line telecommunications area.

Ever shorter innovation cycles confront the telecommunications sector with the challenge of bringing out new products and services at shorter and shorter intervals. New technologies are superseding existing technologies, products, or services in part, in some cases even completely. This could lead to lower prices and revenues in both voice and data traffic. These substitution risks could impact Deutsche Telekom's revenue and earnings in particular in the Europe and United States operating segments.

A substantive or temporal deviation from planned measures for strategic transformation and integration may reduce its benefits and this could negatively impact Deutsche Telekom's business situation, financial position and results of operations.

Deutsche Telekom is in a continuous process of strategic adjustments and cost-cutting initiatives. If Deutsche Telekom is unable to implement these projects as planned, they will be exposed to risks. This means the benefits could be less than originally estimated or they could arrive later than expected or not at all. Each of these factors, on their own or combined with others, could have a negative impact on Deutsche Telekom's business situation, financial position and results of operations.

Failure to achieve the planned reduction and restructuring of personnel or the human resources-related cost-savings goals could negatively affect the reputation and achievement of Deutsche Telekom's financial objectives and profitability.

In 2015, Deutsche Telekom once again used socially responsible measures to restructure the workforce in the Group, essentially by means of voluntary redundancies, partial and early retirement, and employment opportunities for civil servants and employees offered by Vivento/Telekom Placement Services, especially in the public sector. Staff restructuring will continue in the coming financial year. If it is not possible to implement the measures as planned or at all, this may have negative effects on Deutsche Telekom's financial targets.

As a result of dispositions of certain non-core businesses in Germany, there is an increased risk of return of civil servants transferred out of Deutsche Telekom Group, which could have a negative impact on the staff and cost reduction objectives.

When Group entities that employ civil servants are disposed of, it is generally possible to continue to employ them at the Group entity to be sold, provided the civil servant agrees or submits an application to be employed at the respective unit in future. However, there is a risk that they may return to Deutsche Telekom from a sold entity, for instance after the end of their temporary leave from civil servant status, without the Company being able to offer them jobs.

There are currently around 2,138 civil servants who are entitled to return to Deutsche Telekom in this way (as of 31 December 2015). On the assumption that all these civil servants return to Deutsche Telekom, the direct maximum risk would be around EUR 0.13 billion per year. The maximum risk is calculated as an average cost per civil servant, based on the assumption that adequate productive deployment is no longer possible (worst case scenario). This risk could be reduced by compensation payments, for example, but not completely eliminated.

Alleged health risks of wireless communications devices have led to litigation affecting markets with Deutsche Telekom's mobile telecommunications operations subsidiaries, and could lead to decreased wireless communications usage or increased difficulty in obtaining sites for base stations and, as a result, adversely affect the financial condition and results of operations of Deutsche Telekom's wireless services business.

Mobile communications, or the electromagnetic fields used in mobile communications, regularly give rise to concerns among the general population about potential health risks. There is intense public, political, and scientific debate of this issue. Acceptance problems among the general public concern both mobile communications networks and the use of mobile handsets. In mobile communications, this affects projects like the build-out of mobile networks and the use of mobile terminal devices. In the fixed network, it affects sales of traditional DECT (digital cordless) phones and devices that use WiFi technology. There is a risk of regulatory interventions, such as reduced EMF thresholds or the implementation of precautionary measures in mobile communications, e.g., amendments to building law or labeling requirements for handsets.

Over the past few years, recognised expert organisations such as the World Health Organisation (WHO) and the International Commission on Non-Ionizing Radiation Protection (ICNIRP) have repeatedly reviewed the current limit values for mobile communications and confirmed that - if these values are complied with - the use of mobile technology is safely based on current scientific knowledge. ICNIRP regularly reviews the recommendations for the limit values based on current scientific knowledge.

Deutsche Telekom is convinced that mobile communications technology is safe if specific threshold values are complied with. It is supported in this conviction by the assessment of recognised bodies. The basis of Deutsche Telekom's responsible management of mobile communications is its EMF Policy. With this policy, Deutsche Telekom is committing itself to more transparency, information, participation and financial support of independent research on mobile communications, far beyond that which is stipulated by legal requirements. Deutsche Telekom aims to overcome uncertainty among the general public by pursuing an objective, scientifically well-founded and transparent information policy. Thus, Deutsche Telekom remains committed to maintaining its trust-based, successful communication with local authorities over and above the statutory requirements. This also applies after many years of collaboration with municipalities with regard to building out the mobile network were enshrined in law in 2013; previously, this collaboration was based on voluntary self-commitments by the network operators.

Deutsche Telekom regularly engages in large-scale programs to reshape the information technology ("IT") and network infrastructure ("NT") to adapt to changing customer needs and organisational and accounting requirements. The implementation of any of these programs may require substantial investments and a failure to effectively plan and monitor them could lead to misallocations of resources and impaired processes with negative consequences for Deutsche Telekom's operations.

Deutsche Telekom's IT and network resources and infrastructure represents its organisational and technical backbone. This infrastructure is the basis for innovative telecommunications products and services that Deutsche Telekom offers or plans to offer in the future.

Deutsche Telekom implemented comprehensive programs to adapt its IT systems and infrastructure to changing customer needs and its new organisational structure resulting from the consolidation of its fixed-line and mobile networks in Germany.

Deutsche Telekom is replacing the various architectures, access types and services with a standardised architecture. Risks could arise in this area relating to all IT systems and products that require Internet access.

Due to the enormous complexity of the implementation of this IT initiative, malfunctions, connectivity issues, implementation delays, inadequate planning and management and other unforeseen problems could result in costly process impairments and remediation and possible extended down-times of IT processes. These problems could result in revenue losses and may hamper the attainment of Deutsche Telekom's goals in terms of cost savings and quality improvements.

In addition, one of Deutsche Telekom's most important IT programs deals with the long-term development and implementation of a comprehensive IP platform that will support both fixed-line and

mobile telephony services. This means that the traditional platform will be completely replaced by an IP-based system. Upon implementing this joint IP platform, Deutsche Telekom will be subject to risks inherent in all IT systems connected to the Internet, such as hacker attacks, "spam calls" and other disruptions. These risks could lead to a temporary interruption of Deutsche Telekom's IT resources and, as a result, impair the performance of Deutsche Telekom's technical infrastructure.

Deutsche Telekom is exposed to risks in relation to its existing IT architecture: The Systems for sales and service have become less efficient over time, leading to interruptions or outages. For as long as it takes to upgrade their IT systems, they will have to continue to expect limitations in the sales process and service.

Future viability of the IT architecture: If Deutsche Telekom is not ready in time to exploit the benefits of technological advances, they will have reason to fear a decline in demand for their services. System failures, security breaches, data protection violations, disruption of operations and unauthorised use or impairment of Deutsche Telekom network and other systems could damage Deutsche Telekom's reputation and adversely impact its financial situation. In the United States, Deutsche Telekom is in the process of transferring its customer billing systems from its existing third-party vendor to a new third-party vendor. Any unanticipated difficulties, disruption or significant delays could have adverse operational, financial and reputational effects on its business.

System failures due to natural or man-made disruptions and loss of data could result in reduced user traffic and reduced revenues and could harm Deutsche Telekom's reputation and results.

Deutsche Telekom has a complex information/network technology (IT/NT) infrastructure, which Deutsche Telekom constantly expands and upgrades to ensure the best customer experience and consolidate Deutsche Telekom technology leadership. Outages in the current and also future technical infrastructure cannot be completely ruled out and could in individual cases result in revenue losses or increased costs. After all, Deutsche Telekom IT/NT resources and structures are the key organisational and technical platform for Deutsche Telekom operations.

Risks could arise in this area relating to all IT/NT systems and products that require Internet access. For instance, faults between newly developed and existing IT/NT systems could cause interruptions to business processes, products and services, such as smartphones and Entertain. In order to avoid the risk of failures, e.g., arising from natural disasters or fire, Deutsche Telekom uses technical early warning systems and duplicate IT/NT systems. The Computer Emergency Response Team (CERT) at T-Systems provides security for corporate customers' servers. In cloud computing, all data and applications are stored at a data centre. Deutsche Telekom's data centres have security certification and meet strict legal data protection provisions and EU regulations. All data relating to companies and private persons are protected from external access. Constant maintenance and automatic updates keep the security precautions up to date at all times. Based on a standardised Group-wide Business Continuity Management process, Deutsche Telekom is also taking organisational and technical measures to prevent or reduce any damage. Furthermore, Deutsche Telekom has Group-wide insurance cover for insurable risks.

Data privacy and data security.

Deutsche Telekom's products and services are subject to risks in relation to data privacy and data security, especially in connection with unauthorised access to customer, partner or employee data.

The security and privacy of this data are always Deutsche Telekom's top priority. This also applies to the growing cloud computing business, which is subject to the same rigorous requirements for security and data privacy as all other products of Deutsche Telekom. In order to maintain these high standards and largely exclude risks, Deutsche Telekom welcomes the European General Data Protection Regulation, which has laid the foundation for the same rules to apply for all companies offering their services on the European market. Thus consumers have the same rights and there is a level playing field all over Europe.

With regard to IT security, Deutsche Telekom is faced with numerous new challenges. In recent years, the focus has shifted from prevention to analysis. This is where Deutsche Telekom's early warning system comes in: It detects new sources and types of cyber attack, analyses the behaviour of the attackers while maintaining strict data privacy, and identifies new trends in the field of security. Along with the honeypot systems, which simulate weaknesses in IT systems, Deutsche Telekom's early

warning system includes alerts and analytical tools for spam mails, viruses, and Trojans. Deutsche Telekom exchanges the information it receives from all these systems with public and private bodies to enable new attack patterns to be detected and new protection systems to be developed.

Cyber crime and industrial espionage are on the rise. Deutsche Telekom is addressing these risks with comprehensive security concepts. In order to create greater transparency and thus be better able to tackle the threats, Deutsche Telekom is increasingly engaging in partnerships, e.g., with public and private organisations. With the Security by Design principle Deutsche Telekom have established security as a fixed component in its development process for new products and information systems. In addition, Deutsche Telekom carries out intensive and mandatory digital security tests.

Shortcomings in Deutsche Telekom's supply and procurement process could negatively affect its product portfolio, revenues and profits.

As a service provider and an operator and provider of telecommunications and IT products, Deutsche Telekom cooperate with a variety of suppliers of technical components, such as software, hardware, transmission systems, switching systems, outside plant, and terminal equipment.

Supply risks cannot be entirely ruled out. Delivery bottlenecks, price increases, changes in the prevailing economic conditions or suppliers' product strategies may have a negative impact on Deutsche Telekom's business processes and results. Risks may result from the dependence on individual suppliers or from individual vendors' defaulting. Deutsche Telekom employs organisational, contractual, and procurement strategy measures to counteract such risks.

Deutsche Telekom is continuously involved in disputes and litigation with government agencies, competition authorities, competitors and other parties. The ultimate outcome of such legal proceedings is generally uncertain. When finally concluded, they may have a material adverse effect on Deutsche Telekom's results of operations and financial condition.

Deutsche Telekom is subject to numerous risks relating to legal and regulatory proceedings, in which Deutsche Telekom is currently a party or which could develop in the future. Litigation and regulatory proceedings, including patent infringement lawsuits, are inherently unpredictable. Legal or regulatory proceedings in which Deutsche Telekom is or comes to be involved (or settlements thereof) may have a material adverse effect on Deutsche Telekom's results of operations or financial condition.

Liquidity, credit, currency, interest rate risks, rating risks and tax risks have had, and may continue to have, an adverse effect on Deutsche Telekom's revenue and cost development.

With regard to its assets, liabilities and planned transactions, Deutsche Telekom Group is particularly exposed to liquidity risks, credit risks, and the risk of changes in exchange and interest rates. Deutsche Telekom's financial risk management aims to contain these risks through ongoing operational and finance activities.

To ensure the Group's and Deutsche Telekom AG's solvency and financial flexibility at all times, Deutsche Telekom maintains a liquidity reserve in the form of credit lines and cash as part of its liquidity management. This liquidity reserve is to cover the capital market maturities of the next 24 months at any time. For medium- to long-term financing, Deutsche Telekom primarily use bonds issued in a variety of currencies and jurisdictions.

Through Deutsche Telekom's operating business and certain financing activities, Deutsche Telekom is exposed to a credit risk, i. e., the risk that a counterparty will not fulfill its contractual obligations. As a rule, Deutsche Telekom only conclude transactions with regard to financing activities with counterparties that have at least a credit rating of BBB+/Baa1; this is connected with an operational credit management system.

Deutsche Telekom is exposed to currency risks from its investing, financing, and operating activities. Risks from foreign currency fluctuations are hedged if they affect the Group's cash flows (i.e., if the cash flow is not denominated in the functional currency of the respective Group company). Foreign-currency risks that do not influence the Group's cash flows (i.e., the risks resulting from the translation of statements of assets and liabilities of foreign operations into the Group's reporting currency) are generally not hedged, however. Deutsche Telekom may nevertheless also hedge this foreign-currency risk under certain circumstances.

Deutsche Telekom's interest rate risks mainly result from interest-bearing liabilities and exist primarily in the euro zone and the United States. To minimise the effects of interest rate fluctuations in these regions, Deutsche Telekom manages the interest rate risk for net debt denominated in euros and U.S. dollars separately. Once a year, the Board of Management stipulates the desired mix of fixed- and variable-interest net debt for a planning period of at least three years. Taking account of the Group's existing and planned debt structure. Treasury uses interest rate derivatives to adjust the interest structure for the net debt of the composition specified by the Board of Management.

In many countries, Deutsche Telekom is subject to the applicable legal tax provisions. Risks can arise from changes in local taxation laws or case law and different interpretations of existing provisions. As a result, they can affect on Deutsche Telekom tax expense and benefit as well as tax receivables and liabilities.

Deutsche Telekom's credit rating with Moody's is Baa1, while Fitch and Standard & Poor's rate Deutsche Telekom BBB+. All three agencies give Deutsche Telekom a "stable" outlook. A lower rating would result in interest rate rises for some of the bonds issued.

As of 31 December 2015, the Federal Republic and KfW Bankengruppe jointly held approximately 31.8 percent in Deutsche Telekom AG. It is possible that the Federal Republic will continue its policy of privatisation and sell further equity interests in a manner designed not to disrupt the capital markets and with the involvement of KfW Bankengruppe. There is a risk that the sale of a significant volume of Deutsche Telekom AG shares by the Federal Republic or KfW, or any speculation to this effect, could have a negative impact on the price of the T-Share.

Developments in the telecommunications sector have resulted, and may in the future result, in substantial write-downs of the carrying value of certain of Deutsche Telekom's assets.

The value of the assets of Deutsche Telekom AG and its subsidiaries is reviewed periodically. In addition to the regular annual measurements, specific impairment tests may be carried out, for example where changes in the economic, regulatory, business or political environment suggest that the value of goodwill, intangible assets or property, plant and equipment might have decreased. These tests may lead to the recognition of impairment losses that do not, however, result in cash outflows. This could impact to a considerable extent on Deutsche Telekom's results, which in turn may negatively affect the T-Share price.

Potential breaches of compliance requirements or the identification of material weaknesses in Deutsche Telekom's internal control over financial reporting may have an adverse impact on Deutsche Telekom's corporate reputation, financial condition and the trading price of its securities.

In general, compliance requirements for publicly-traded companies and, in particular, the investigation of potential breaches and corporate misconduct are increasing and leading to major financial implications for the companies concerned. At the same time, the legal framework governing the monitoring of companies is becoming more comprehensive, which increases the liability risks for executive bodies and associated costs.

While Deutsche Telekom believes that it has established an appropriate compliance organisation to detect, assess, reduce and manage these risks, the global and diverse nature of Deutsche Telekom's operations means that these risks and their related consequences will continue to exist. Although Deutsche Telekom intends to take prompt measures to remediate any identified shortcomings in its internal controls over financial reporting, activities of this kind may involve significant effort and expense, and disclosure of any failures, material weakness or other conditions, may result in a deterioration of Deutsche Telekom's corporate image and negative market reactions.

An unforeseeable negative media report on products and services or corporate activities and responsibilities of Deutsche Telekom Group can have a huge impact on the reputation, the standing and the brand image of Deutsche Telekom Group.

An unforeseeable negative media report on products and services or corporate activities and responsibilities of Deutsche Telekom can have a huge impact on the reputation of the Company, the standing and the brand image. Social networks have made it possible that such information and opinions can spread much more quickly and extensively than they could just a few years ago.

Ultimately, negative reports can impact on revenue and brand value. In order to avoid this, Deutsche Telekom engage in a constant, intensive and constructive dialog, in particular with Deutsche Telekom's customers, the media, and the financial world. For Deutsche Telekom, the top priority is to take as balanced a view as possible of the interests of all stakeholders and thereby uphold Deutsche Telekom's reputation as a reliable partner. .

Risk Factors regarding Deutsche Telekom International Finance B.V.

Payment of principal of and interest on notes issued by Finance are guaranteed by Deutsche Telekom AG. Therefore the risks in respect of Finance substantially correspond with the ones of Deutsche Telekom AG.

Risk Factors regarding the Notes

The following is a disclosure of risk factors that are material to the Notes issued under the Programme in order to assess the market risk associated with these Notes. Prospective investors should consider these risk factors before deciding to purchase Notes issued under the Programme.

Notes may not be a suitable investment for all investors

Each potential investor in Notes must determine the suitability of that investment in light of its own circumstances. In particular, each potential investor should:

- (i) have sufficient knowledge and experience to make a meaningful evaluation of the relevant Notes, the merits and risks of investing in the relevant Notes and the information contained or incorporated by reference in this Prospectus or any applicable supplement;
- (ii) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation and the investment(s) it is considering, an investment in the Notes and the impact the Notes will have on its overall investment portfolio;
- (iii) have sufficient financial resources and liquidity to bear all of the risks of an investment in the relevant Notes, including where the currency for principal or interest payments is different from the potential investor's currency;
- (iv) understand thoroughly the terms of the relevant Notes and be familiar with the behaviour of financial markets; and
- (v) be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

Liquidity Risk

Application has been made to list Notes to be issued under the Programme on the official list of and to admit such Notes to trading on the Regulated Market of the Luxembourg Stock Exchange. In addition, the Programme provides that Notes may not be listed at all. Regardless of whether the Notes are listed or not, there can be no assurance that a liquid secondary market for the Notes will develop or, if it does develop, that it will continue. The fact that the Notes may be listed does not necessarily lead to greater liquidity than if they were not listed. If the Notes are not listed on any exchange, pricing information for such Notes may, however, be more difficult to obtain which may affect the liquidity of the Notes adversely. In an illiquid market, an investor might not be able to sell his Notes at any time at fair market prices. The possibility to sell the Notes might additionally be restricted by country specific reasons.

Market Price Risk

The development of market prices of the Notes depends on various factors, such as changes of market interest rate levels, the policy of central banks, overall economic developments, inflation rates or the lack of or excess demand for the relevant type of Note. The holder of a Note is therefore exposed to the risk of an unfavourable development of market prices of its Note which materialises if the holder sells the Notes prior to the final maturity of such Notes.

Currency Risk

A holder of a Note denominated in a foreign currency is exposed to the risk of changes in currency exchange rates which may affect the yield of such Notes. Changes in currency exchange rates result from various factors such as macro-economic factors, speculative transactions and interventions by central banks.

A change in the value of any currency other than euro against the euro, for example, will result in a corresponding change in the euro value of a Note denominated in a currency other than euro and the euro value of interest and principal payments made in accordance with the terms of such Note. If the underlying exchange rate falls and the value of the euro correspondingly rises, the price of the Note

and the value of interest payments made thereunder expressed in euro falls.

Risk of Early Redemption

The applicable Final Terms will indicate whether an Issuer may have the right to call the Notes prior to maturity (optional call right) on one or several dates determined beforehand or whether the Notes will be subject to early redemption upon the occurrence of an event specified in the applicable Final Terms (early redemption event). In addition, each Issuer will always have the right to redeem the Notes if the relevant Issuer is required to pay additional amounts (gross-up payments) on the Notes for reasons of taxation as set out in the Terms and Conditions. If the relevant Issuer redeems the Notes prior to maturity or the Notes are subject to early redemption due to an early redemption event, a holder of such Notes is exposed to the risk that due to such early redemption his investment will have a lower than expected yield. The Issuer can be expected to exercise his optional call right if the yield on comparable Notes in the capital market has fallen which means that the investor may only be able to reinvest the redemption proceeds in comparable Notes with a lower yield. On the other hand, the Issuer can be expected not to exercise his optional call right if the yield on comparable Notes in the capital market has increased. In this event an investor will not be able to reinvest the redemption proceeds in comparable Notes with a higher yield. It should be noted, however, that the relevant Issuer may exercise any optional call right irrespective of market interest rates on a call date.

Fixed Rate Notes

A holder of a Fixed Rate Note is exposed to the risk that the price of such Note falls as a result of changes in the market interest rate. While the nominal interest rate of a Fixed Rate Note as specified in the applicable Final Terms is fixed during the life of such Note, the current interest rate on the capital market ("**market interest rate**") typically changes on a daily basis. As the market interest rate changes, the price of a Fixed Rate Note also changes, but in the opposite direction. If the market interest rate increases, the price of a Fixed Rate Note typically falls, until the yield of such Note is approximately equal to the market interest rate of comparable issues. If the market interest rate falls, the price of a Fixed Rate Note typically increases, until the yield of such Note is approximately equal to the market interest rate of comparable issues. If the holder of a Fixed Rate Note holds such Note until maturity, changes in the market interest rate for comparable issuers are without relevance to such holder as the Note will be redeemed at the principal amount of such Note.

Floating Rate Notes

A holder of a Floating Rate Note is exposed to the risk of fluctuating interest rate levels and uncertain interest income. Fluctuating interest rate levels make it impossible to determine the profitability of Floating Rate Notes in advance.

A Floating Rate Note may include caps or floors. In such case, their market value may be more volatile than those for Floating Rate Notes that do not include these features. The effect of a cap is that the amount of interest will never rise above and beyond the predetermined cap, so that the holder will not be able to benefit from any actual favourable development beyond the cap. The yield could therefore be considerably lower than that of similar Floating Rate Notes without a cap.

Neither the current nor the historical value of the relevant floating rate should be taken as an indication of the future development of such floating rate during the term of any Notes.

Historical Background

Deutsche Telekom is an integrated telecommunications provider offering its customers around the world a comprehensive portfolio of state-of-the-art services in the areas of telecommunications and IT. The provision of public telecommunications services in Germany was long a state monopoly, as formerly provided in the constitution of Germany. In 1989, Germany began to transform the postal, telephone and telegraph services administered by the former monopoly provider of such services into market-oriented businesses, and ordered the former monopoly into three distinct entities along their lines of business, one of which was Deutsche Telekom's predecessor, Deutsche Bundespost Telekom. At the same time, Germany also began the liberalisation of the German telecommunications market. Deutsche Telekom was transformed into a private stock corporation effective 1 January 1995. The operation of networks (including cable networks) for all telecommunications services, other than public fixed-line voice telephony, was opened to competition in Germany on 1 August 1996, when the new legal framework for the regulation of the telecommunications sector in Germany, the Telecommunications Act, became effective. As required by the Telecommunications Act, and mandated by the directives of the E.U. Commission, the telecommunications sector in Germany was further liberalised on 1 January 1998, through the opening of the public fixed-line voice telephony services to competition. Since then, Deutsche Telekom has faced intense competition and has been required, among other things, to offer competitors access to its fixed-line network at regulated interconnection rates.

DESCRIPTION OF BUSINESS

Group Organisation

Overview of Business Activities

Deutsche Telekom is an integrated telecommunications company with around 156 million mobile customers, 29 million fixed-network and around 18 million broadband lines. Deutsche Telekom provides fixed-network/broadband, mobile communications, Internet, and internet-based TV products

and services for consumers, and ICT solutions for business customers and corporate customers. Deutsche Telekom has an international focus and is represented in more than 50 countries. In the 2015 financial year, Deutsche Telekom generated around 64 percent of net revenue, i.e., EUR 44.2 billion outside Germany. Overall, Deutsche Telekom employs around 225,200 people (31 December 2015).

The fixed-network business encompasses all voice and data communications activities based on fixed-network and broadband technology. This includes the sale of terminal equipment and other hardware, as well as the sale of services to resellers.

The mobile communications business offers mobile voice and data services to consumers and business customers. When marketing these services, Deutsche Telekom also sells mobile handsets and other hardware. In addition, Deutsche Telekom also sells mobile services to resellers and to companies that buy network services and market them independently to third parties (mobile virtual network operator, or MVNOs).

Drawing on a global infrastructure of data centers and networks, T-Systems, the Group's corporate customer arm, operates information and communication technology ("ICT") systems for multinational corporations and public sector institutions.

Deutsche Telekom is broken down into four operating segments whose business activities are assigned in three segments by region and in one segment by customer and product.

The **Germany** operating segment comprises all fixed-network and mobile activities in Germany. In addition, it provides wholesale telecommunications services for the Group's other operating segments.

The **United States** operating segment combines all mobile activities in the U.S. market.

The **Europe** operating segment comprises all fixed-network and mobile operations of the national companies in Greece, Romania, Hungary, Poland, the Czech Republic, Croatia, the Netherlands, Slovakia, Austria, Albania, the F.Y.R.O. Macedonia, and Montenegro.

In addition to consumer business, most of Deutsche Telekom's national companies also offer ICT solutions to business customers. The Europe operating segment also comprises the units International Carrier Sales & Solutions (ICSS), Group Technology, and the Global Network Factory (GNF): ICSS primarily provides wholesale telecommunications services for the other operating segments in the Group; Group Technology ensures efficient and customised provision of technologies, platforms, and services for mobile and fixed-network communications. GNF designs and operates a global network for providing wholesale customers with voice and data communication.

Drawing on a global infrastructure of data centers and networks, the **Systems Solutions** operating segment operates ICT systems for multinational corporations and public sector institutions. But the operating segment also offers ICT solutions tailored to the needs of small and medium-sized enterprises. The offering primarily includes services from the cloud, M2M and security solutions, complementary, highly standardised mobile and fixed-network products, as well as solutions for virtual collaboration and IT platforms. They form the basis for the digital business models of corporate customers.

The Systems Solutions operating segment comprises two business areas: Market Unit and Telekom IT. The Market Unit mainly comprises business with external customers. Telekom IT focuses on the Group's internal national IT projects.

Group Headquarters & Group Services comprises all Group units that cannot be allocated directly to one of the operating segments. Group Headquarters sets the direction and provides momentum. It defines strategic aims for the Group, ensures they are met, and becomes directly involved in selected Group projects. Group Services provides services to the entire Group: in addition to typical services such as financial accounting, human resources services, and operational procurement, Group Services also includes Vivento, the Group's personnel service provider. Vivento is in charge of securing external employment opportunities for civil servants and employees predominantly in the public sector. In addition, Vivento also seeks to strategically place employees internally, with the aim of retaining professional expertise within the Group, so as to reduce the use of external staff. Further units are Group Real Estate Management and MobilitySolutions, full-service providers for fleet management and mobility services. The Digital Business Unit, Deutsche Telekom's central innovation unit is responsible for the development of new business areas and products in dialog with the

operating segments.

START-UP FUNDING

In May 2012, Deutsche Telekom opened an incubator, a start-up support center, of its own in Berlin under the name "hub:raum". The object is to support young companies with new ideas for telecommunications and Internet services during the start-up phase. Deutsche Telekom uses hub:raum to regularly monitor over 1,000 start-ups and maintain close contact with them.

In order to improve networking and support among the start-ups and help them in their internationalisation efforts, Deutsche Telekom set up a Telecom Start-up Alliance. It includes the French partners from Orange with their Fab incubator, the Spanish colleagues from Telefónica with Wayra and Singtel from Singapore with Innov8. Besides this, Deutsche Telekom cooperated with Intel and Cisco to launch the first ChallengeUp IoT Accelerator program in 2015. The core task is to help IoT/IoE start-ups on the way to a faster market launch.

Deutsche Telekom plans to greatly expand and restructure its commitment in the areas of venture capital and technology innovation for the subsequent phases, the early/late or growth phases, with Deutsche Telekom Capital Partners ("**DTCP**"), a company Deutsche Telekom formed at the beginning of 2015. DTCP is Deutsche Telekom's investment management group and is positioned at the center of the redesigned investment concept. DTCP offers growth capital for the early and late growth phases, investments in SMEs and mature companies, and strategic consulting in the technology, media, and telecommunications sectors. Deutsche Telekom plans to invest a total of EUR 500 million over the next five years via DTCP. Although DTCP also has a strategic focus, its investments will have a strong financial drive. DTCP aims to acquire shares in companies, to see these companies grow, and to sell the shareholdings again at a profit.

In cooperation with DTCP, Deutsche Telekom launched the new Deutsche Telekom Strategic Investment unit ("**DTSI**") at the end of October 2015 to handle investments that are primarily strategically motivated. DTSI focuses its investment activities not only on external start-ups that are identified as being of major strategic relevance but also supports and implements in-house ventures as spin-offs. In this case, ideas from Deutsche Telekom are spun off as young companies, making greater entrepreneurial freedom and shorter decision paths possible. Additionally, DTSI manages the existing portfolio of DTVF (Deutsche Telekom Venture Funds GmbH), which was closed for new investments, with the object of supporting the further development of around 90 existing shareholdings (including follow-up investments) and divesting them at a profit.

CORPORATE TRANSACTIONS

On 5 February 2015, Deutsche Telekom and the French telecommunications operator Orange reached an agreement with the British telecommunications operator BT on the sale of the EE joint venture. The transaction was approved by the United Kingdom's Competition and Markets Authority (cma) in January 2016, unconditionally and without remedies. Deutsche Telekom and Orange consummated the transaction on January 29, 2016 at an adjusted purchase price of GBP 13.2 billion. In return for its stake in the EE joint venture, Deutsche Telekom received a financial stake of 12.0 percent in BT and a cash payment of GBP 25.7 million. Since closing Deutsche Telekom is the largest shareholder in BT with a financial stake of 12 percent.

On 19 May 2015 Deutsche Telekom signed a purchase agreement for the acquisition of the remaining 49 percent of shares in Slovak Telekom which Deutsche Telekom did not yet own, for a purchase price of EUR 0.9 billion. Previously, the shares had been held by the National Property Fund of the Slovak Republic. As part of the agreement, EUR 0.1 billion of the purchase price was paid into a trust account for a certain period to hedge certain risks. The transaction was closed on 18 June 2015. It did not require approval from the supervisory authorities.

In connection with the initial public offering of Scout24 AG on 1 October 2015, Deutsche Telekom sold a total of 13.3 million shares in the company at EUR 30.00 per share, for which Deutsche Telekom received around EUR 0.4 billion in cash.

On 14 April 2016, Deutsche Telekom has placed another 2.6 million shares in Scout24 AG in an accelerated book-building process at a price of EUR 30.00 per share. Deutsche Telekom received gross proceeds of about EUR 79 million. Following the sale Deutsche Telekom still holds a stake of approximately 10.9 percent in Scout24 AG.

On 2 November 2015, Deutsche Telekom consummated the sale of the online platform t-online.de and the digital marketing company InteractiveMedia to Ströer. The transaction took the form of a capital increase of Ströer in return for the non-cash contribution by Deutsche Telekom of the online platform t-online.de and InteractiveMedia. In return, Deutsche Telekom received newly issued shares in Ströer worth some EUR 0.3 billion: This corresponded to a stake of around 11.6 percent of the increased share capital after all closing conditions had entered into force.

INVESTMENTS IN NETWORKS AND NEW SPECTRUM

Deutsche Telekom increased fiber-optic coverage in Germany from over 44 percent to just under 55 percent in 2015, which corresponds to around 23 million households. Deutsche Telekom's LTE network now covers 90 percent of the population and the number of LTE customers is now more than 8 million. Deutsche Telekom has also picked up the pace in the IP transformation: At the end of 2015, 9.5 million fixed-network lines (retail and wholesale) were already IP-based, which corresponds to a rate of 40 percent.

In June 2015, Deutsche Telekom participated in the frequency auction in Germany. Of the total 270 MHz from four ranges between 0.7 and 1.8 GHz that the Federal Network Agency put up for auction, Deutsche Telekom secured 100 MHz at a price of just under EUR 1.8 billion. Deutsche Telekom paid a deposit of EUR 0.6 billion to the Federal Network Agency in the course of the frequency auction and a further payment of EUR 1.0 billion was made at the end of June 2015. The remaining amount of EUR 0.2 billion is scheduled to be paid by mid-2017 in accordance with the award rules.

In the Europe operating segment, Deutsche Telekom increased the reach of its LTE coverage to 71 percent as of the end of 2015; overall, Deutsche Telekom now reaches around 92 million inhabitants. In total, investments of some EUR 29 million were made in spectrum, primarily in Albania. The T-Mobile US 4G/LTE network covered 304 million people at the end of the 2015, up from 265 million at the end of 2014. Wideband LTE was already available in 268 market regions as of the end of 2015.

In January 2015, the U. S. Federal Communications Commission ("**FCC**") announced that T-Mobile US was the winning bidder of AWS-3 spectrum licenses covering approximately 97 million people for an aggregate bid price of EUR 1.6 billion. T-Mobile US paid the FCC EUR 1.3 billion for the AWS spectrum licenses in the first quarter of 2015, which is in addition to a deposit of EUR 0.3 billion provided in connection with the auction in 2014. The FCC formally assigned the AWS-3 frequencies acquired at auction to T-Mobile US on 8 April 2015.

In January 2016, T-Mobile US acquired spectrum licenses covering nearly 20 million people in seven major metropolitan markets for approximately USD 0.6 billion in cash. In January 2016, T-Mobile US entered into agreements with third parties for the exchange and acquisition of spectrum licenses covering approximately 23 million people in seven major metropolitan markets. The closing of the exchange transaction is expected to occur in mid-2016, subject to regulatory approval and other customary closing conditions.

At the spectrum auction in Poland which ended in October 2015, T-Mobile Polska was the highest bidder, acquiring spectrum of some EUR 0.5 billion, which was paid at the start of February 2016. T-Mobile Polska is also in negotiations with the Polish regulatory authority UKE to accept additional spectrum amounting to around EUR 0.5 billion. This was offered to T-Mobile Polska by UKE after the highest bidder had declined to accept the spectrum. In accordance with the rules of the auction, T-Mobile Polska was offered the spectrum for purchase as the second highest bidder. T-Mobile Polska submitted an application for the allocation of this spectrum block on 8 February 2016. The final allocation is expected until the end of the second quarter in 2016.

Spectrum allocation procedures are currently being prepared in the Czech Republic, Hungary and Montenegro as well as in Albania, Greece, Slovakia and the United Kingdom. In the United States of America, the so-called incentive auction for the 600 MHz band has already started.

Deutsche Telekom is pursuing a pot financing structure. Funding is not triggered by specific projects but depends on the overall liquidity need of Deutsche Telekom Group. The main sources of external funding are bonds and bank loans (including *Schuldscheindarlehen*). In addition, off-balance sheet financing transactions, such as factoring, could be used as well.

Markets and Regulation

Telecommunications Market

Worldwide, the market for information and communications technologies ("ICT") grew by 3.8 percent in 2015 to EUR 2.81 trillion. This increase was due to strong demand for telecommunications equipment and services, especially in India, China, and the United States. The high-tech association BITKOM (Federal Association for Information Technology, Telecommunications and New Media) and the EITO (European Information Technology Observatory) expect the telecommunications market segment to record an increase of 4.3 percent to EUR 1.62 trillion and the information technology (IT) market segment to record an increase of 3.1 percent for 2015. The global market for telecommunications services increased by 2.2 percent.

In Europe, however, telecommunications service revenues declined for the seventh year in a row. According to ETNO (European Telecommunications Network Operators' Association) and IDATE (a leading European ICT market research institute), revenue for the entire European telecommunications market (including Turkey, excluding Russia, Ukraine, and Georgia) stood at EUR 240 billion in 2015, down 1.1 percent against the prior-year figure of EUR 243 billion. This decline is attributable in part to regulatory interventions such as the reduction in roaming and termination charges. In addition, the substitution of traditional voice and messaging services with OTT players had a negative impact on the European telecommunications markets.

The digitisation of the economy and society changes on the one hand the existing market structures, and on the other, the market realities of many industries that have previously been analog. Use of data services is growing exponentially. Demand is also rising for more speed - for both download and upload, for fixed and mobile networks. New technologies, like the Internet of Things, Industry 4.0, big data or cloud computing place high demands on network infrastructure: ubiquitous connectivity and high performance standards and security are critical to success for many applications. In a market environment in which the network infrastructure needs to be substantially upgraded and a broad ecosystem of rival market players has developed.

Consolidation pressure remains high in the European telecommunications industry, primarily as a result of declining revenues due to growing competition. At the same time, high investments are needed for the network build-out. In light of this, the failed consolidation plan in Denmark has given rise to continued uncertainty in the industry: In September 2015, Telenor and TeliaSonera canceled their merger plans after the companies were unable to agree suitable terms with the EU Commission. It remains to be seen what impact this decision will have on current and future consolidation plans in the European Union. Talks are currently taking place, for example, between Orange and Bouygues Telecom in France. Furthermore, the UK Competition and Markets Authority (CMA) approved the acquisition of EE by BT in January 2016, unconditionally and without remedies. Moves towards consolidation can also be seen in Italy, where VimpelCom and Hutchison are planning to merge their mobile activities. The EU Commission is also reviewing the planned mergers between Hutchison 3G and O2 in the United Kingdom, and Liberty Global and BASE in Belgium.

European regulatory environment

In December 2015 an informal agreement was reached between the European Commission, the EU Council, and the European Parliament on the European General Data Protection Regulation; this reform of data protection is part of the strategy for the digital single market. The Regulation will enter into force in May or June 2016 and will be applicable from 2018 after a two-year transposition period. With this new data privacy law, the EU is closing a large gap in regulation relevant for service providers outside of the EU and essentially imposing the same rules for all market players operating in the EU. The Regulation ensures a high level of data protection in Europe and enables new digital business models.

In a judgment on 6 October 2015, the European Court of Justice ("ECJ") declared the European Commission's Safe Harbor Decision to be void. Safe Harbor refers to an agreement between the European Commission and the U. S. Department of Commerce, which enabled the personal data of EU citizens to be stored and processed in the United States. The ECJ reasoned that the level of protection for personal data in the United States were inadequate: The data of European customers were not sufficiently protected from access by U. S. security agencies; in addition, legal protection in the United States for the affected European citizens were not ensured. The European Commission Directorate-General for Justice has just negotiated the EU-US Privacy Shield agreement with the United States. Details of this agreement still need to be worked out over the coming months. The agreement will only become effective once all member states have approved it.

Work on the new Payment Service Directive 2 at EU level is complete. The Directive will replace Payment Directive 1 from 2007 and must be implemented by the member states by the start of 2018. Under the new rules, billing models for voice and non-voice services will cap the amounts that can be charged for third-party services through telephone bills (max. EUR 200 per month and EUR 50 per transaction), unless a payment service license is in place. Depending on the transposition into national law, this will lead to restrictions in business models for billing third-party services and to costs for implementing compliance with the thresholds. Furthermore, there will be additional obligations in terms of reporting to the Federal Financial Supervisory Authority (BaFin).

Germany

According to BITKOM, revenue from IT products and services, telecommunications and the entertainment industry increased by some 1.9 percent to around EUR 156 billion in Germany in 2015. Information technology in particular recorded strong growth of more than 3 percent. After declining for the last two years, telecommunications revenue (telecommunications services, terminal devices, and infrastructure systems) increased by 0.9 percent to around EUR 66 billion in 2015, according to BITKOM's estimate. Revenue from telecommunications services decreased slightly by 0.3 percent – hence less sharply than in prior years. Clear growth in revenue from terminal equipment and infrastructure offset the slight decline in revenue from telecommunications services.

The German broadband market grew by more than 3.5 percent in 2015. There are some 31 million broadband lines in Germany. The main benefactors of the market growth were cable network operators, but the telecommunications operators, as well as traditional resellers and regional providers, who use the (V)DSL network, also gained. More and more lines with high bandwidths/transmission rates are being marketed, both in the cable network and in the VDSL/vectoring network; the products offered also include hybrid line technologies, which combine fixed-network and mobile communications. The availability of high bandwidths in Germany is also accelerating IPTV customer growth in the market (10 percent), driven in particular by wide-ranging HD content and video-on-demand services. The trend towards integrated offers continued in Germany in 2015. The telecommunications providers are constantly developing their offering further, for example, in the areas of connected home, security services, mobile payment, cloud, and IT services.

In the German mobile market, mobile service revenues decreased slightly by around 0.6 percent to approximately EUR 18 billion in 2015 compared to 2014, mainly due to regulatory effects, for example in connection with roaming and termination, and the improvement of the existing customer base in response to strong competition. The use of data services in the mobile Internet is growing exponentially, the percentage of voice and data rate plans is rising steadily. Traditional voice and text messaging services are increasingly being replaced by free IP messaging services like WhatsApp and social networks like Facebook; use of these services requires use of the mobile Internet and typically data flat rates. The growing popularity of connected products such as smartphones and tablets, but as of recently also watches, shoes, bicycles, etc., is pushing up demand for mobile broadband speeds and for growing data volumes in the rate plan portfolios.

Digitisation continues to make progress and is taking hold in industry and in production processes. Connecting machines and production facilities requires extensive IT and cloud solutions. This market segment grew by 18 percent in 2015. Forward-looking business models that drive more market growth are also being established in the M2M (machine-to-machine) segment.

United States

The mobile communications market in the United States continues to be divided between four major nationwide providers – and various regional network operators – AT&T, Verizon Wireless, Sprint, and T-Mobile US. In addition there are a number of mobile virtual network operators, which rely on the networks of one or more of the four national carriers to transport their mobile and data traffic. The two largest national network operators are AT&T and Verizon Wireless. The market continues to be very dynamic. A takeover attempt of Time Warner Cable by Comcast was prohibited. In July 2015, AT&T received permission for a USD 48.5 billion transaction to acquire DirecTV. The Dutch company Altice announced in September 2015 an acquisition of Cablevision Systems Corp. in the range of around USD 17.7 billion. The consolidation of the U. S. telecommunications market is expected to continue.

Growth has slowed as a result of the high market penetration. Voice revenues continued to decline slightly in 2015. However, the persistent data revenue surplus could more than compensate the decline. Mobile data usage remains at a high level, in line with the rapid development of LTE networks

and the high use of smartphones, which now account for around 80 percent of all handsets. Data revenue is growing steadily year after year and is accompanied by tough price competition from the main market players.

The fierce competition is accompanied by regulatory announcements of the **"FCC"** (Federal Communications Commission). In June 2015, the FCC's Open Internet Order entered into force, updating the net neutrality rules it first established in 2010. The provisions define a standard, which in the future is to apply to the conduct of the affected companies. For the first time, this also includes interconnection agreements between Internet service providers (ISPs) and third parties. The FCC reserves the right to carry out case-by-case reviews with regard to the conduct of the -affected companies.

The Broadcast Incentive Auctions for frequencies initiated by the FCC will be held in 2016. The underlying intention is for television providers to voluntarily hand back their licensed frequencies in exchange for a portion of the proceeds from the auction of the returned spectrum to mobile providers. In 2015, T-Mobile US has brought about a significant operational turnaround and intensified competition in the U. S. mobile market. This is mainly due to the improvements in their network, as well as the successful implementation of the Un-carrier initiatives.

Europe

The traditional communications markets in the Europe operating segment remained more or less stable overall in 2015. The fixed network business is still declining. The positive trend in broadband and pay TV lines could not fully offset the declines in fixed-network telephony. The mobile markets recorded slight year-on-year growth overall, primarily due to a small decrease in regulation-induced termination charges and increased mobile data usage as a result of the continued fast-growing popularity of smartphones, especially in Eastern Europe. This growth in mobile data usage comes at the expense of traditional voice telephony and text messages. Special taxes levied on telecommunications services, in Croatia and Romania for example, and the costs of spectrum auctions, for instance in Albania, impacted on the telecommunications industry in a number of Deutsche Telekom's footprint countries in 2015.

Competition and price pressure persisted in the markets of the Europe operating segment in 2015 – despite business combinations and partnerships. This is due in part to an intensified FMC trend in Europe: Providers are positioning themselves through cut-price bundled products and MVNOs are using aggressive pricing, e. g., RCS and RDS in Romania, Play in Poland, or Ziggo in the Netherlands. Added to this, products offered by OTT players such as WhatsApp are increasingly replacing traditional voice and text messaging solutions. In countries where Deutsche Telekom already has a fixed-network and mobile infrastructure, Deutsche Telekom has been able to position itself with fixed-mobile-conversion (FMC) offerings. Even the mobile-centric national companies are moving towards convergence and aiming for integrated business models. Corresponding measures have been put in place and some are already being implemented, such as the integration of GTS in the business customer segment.

The conversion from traditional switching to Internet technology continues to progress in the Europe operating segment: Deutsche Telekom had already completed the migration from PSTN lines to IP in four countries by the end of 2015. In mobile communications and fixed networks, the trend towards broadband build-out continued unabated. In many countries, Deutsche Telekom is consolidating its strong position with considerable investments in the roll-out of LTE and optical fiber. With Pan-Net – the pan-European all-IP network – Deutsche Telekom is building a single, international network architecture in Europe, which will efficiently produce and provide virtualised, centralised services for all national companies. Due to the ongoing trend towards IP-based TV offerings, Deutsche Telekom is constantly renewing and acquiring exclusive broadcasting rights (e. g., UEFA Champions League in the F.Y.R.O. Macedonia, Hollywood channels in Greece) and collaborating with OTT TV providers (Netflix in Austria, Pickbox in the Czech Republic, Montenegro, and the F.Y.R.O. Macedonia).

Systems Solutions

The volume in the information and communication technology (ICT) market in Western Europe addressed by the Systems Solutions operating segment and the T-Systems brand, increased by 2.8 percent, from EUR 170 billion in 2014 to EUR 175 billion in 2015. However, this general trend impacted the individual business areas in very different ways.

In the telecommunications (TC) segment, the market was dominated by continued price erosion in telecommunications services and by intense competition, while the economic recovery had relatively little impact. The focus here remains on substituting parts of the portfolio, but also on demand for stable, intelligent network solutions with ever expanding bandwidths. Growth in cyber security, cloud computing, and Unified Communications is leading to stable growth in the long term. The substitution effects (e.g., within data/Internet Protocol (IP), between fixed network and mobile communications) continue to increase. The migration to "all-IP" solutions (e.g., the combination of Internet access, Voice over IP, IP VPN) and Unified Communications solutions has increased.

In terms of IT services, demand has grown for cloud services and cyber security services, as has the importance of digitisation, intelligent networks, the Internet of Things (including Industry 4.0), and communication between machines (M2M). The move to cloud solutions is also transforming demand in the systems integration business. Traditional project business (application development and integration) has seen a slight decline of 0.3 percent. By contrast, the market for consultation and integration services, infrastructure and platforms in "as-a-Service" models grew by 35 percent.

The market for outsourcing business in the computing and desktop services (CDS) segment fell by 0.4 percent in 2015 to EUR 59 billion. There are two contrary trends in particular at work here. On the one hand, there was a 6-percent decline in long-term, more traditional outsourcing agreements, and on the other, an 18-percent increase in the business in the cloud computing environment (the provision of IT services over the Internet).

Competitive and price pressure persisted in all submarkets of the Systems Solutions operating segment. In addition to the known competitors such as BT, OBS, and NTT in the telecommunications market and IBM, HP, and Capgemini in the IT segment, the latter in particular came under price pressure from cloud providers such as Amazon Web Services, Google, and Salesforce. This pressure was further intensified by providers of services rendered primarily offshore. In this environment, Deutsche Telekom is positioning itself against these competitors as a player who focuses on quality, data security, and overall responsibility for transformation, integration and the operation of ICT services (end-to-end responsibility). But Deutsche Telekom is also continuing to enter increasingly into strategic partnerships with its competitors so as to offer its customers solutions.

Major Regulatory Decisions

Deutsche Telekom's business activities are largely subject to national and European regulation, which is associated with extensive powers to intervene in its product design and pricing. Deutsche Telekom was again subject to extensive regulation in the mobile and fixed-network businesses in 2015.

The focus was mainly on the regulation of services for wholesale customers and the corresponding charges as well as the award of mobile frequencies.

Regulation of Services for Wholesale Customers

On 23 February 2015, Deutsche Telekom applied to the Federal Network Agency to be exempted from the obligation to give competitors access to the main distribution frames for the provision of VDSL lines. On 7 April 2016, the Federal Network Agency notified a draft decision to the European Commission. Similar to the Federal Network Agency's consultation draft, the draft decision largely grants Deutsche Telekom exclusive rights to local-area roll-out, although competitors are now granted additional rights to local-area vectoring roll-out by themselves compared to the earlier version of the draft decision.

If the authority approves Deutsche Telekom's request, Deutsche Telekom can create the necessary conditions to provide approximately 6 million more households with Internet surfing speeds of up to 100 Mbit/s. Going forward, transmission rates of up to 250 Mbit/s (super vectoring) will even be possible. By the end of 2018, high-speed access would be available to around 80 percent of households in Germany.

Comments by the European Commission are due until the beginning of May 2016. If the commission does not have serious concerns, the regulatory process is expected to be completed in the second quarter of 2016. However, the regulatory requirements for actual implementation will not be met until the reference offer has been adjusted, which is expected to be completed in the fourth quarter of 2016.

On 28 October 2015, the Federal Network Agency issued the regulatory decision for the bitstream

market. In addition to the current ex-post regulation for Layer 3 bitstream access products, this decision requires an ex-ante license for Layer 2 bitstream products, although it does not require cost-based regulation of charges. Deutsche Telekom plans to offer a Layer 2 bitstream access product by 1 July 2016 at the latest.

Since the start of 2015, Deutsche Telekom has been offering MagentaZuhause Hybrid rate plans to retail customers that combine fixed-network capacities (DSL) with mobile communications (LTE) in a single access product on the basis of innovative network technology. On 6 July 2015, 1&1 Telecom GmbH initiated proceedings with the Federal Network Agency for a review of Deutsche Telekom's MagentaZuhause Hybrid rate plans with the aim of being provided with a corresponding wholesale product. The Federal Network Agency rejected 1&1's applications in rulings dated 30 October 2015 and 23 December 2015.

Regulation of Pricing and Special Taxes

In the first quarter of 2016, Deutsche Telekom has submitted a rate application for the new Layer 2 BSA to the Federal Network Agency: The main rates Deutsche Telekom will apply for are the monthly charges for a VDSL retail line and for the handover point on the Broadband Network Gateway (BNG). A preliminary decision in the rates approval proceedings is expected at the start of the second quarter of 2016. This will then be followed by national and EU consultations, such that final approval of the rates can be expected as of 1 July 2016.

Deutsche Telekom submitted an application for monthly charges for unbundled local loop lines (ULLs) at the start of February 2016. Deutsche Telekom expects the consultation draft for the rate ruling to be available in April 2016. This will be followed by national and international consultations. The new rates will apply from 1 July 2016.

On 1 April and 24 April 2015, the Federal Network Agency published its final rulings on fixed-network and mobile termination rates, thereby finally setting the charges that had already been provisionally approved as of 1 December 2014.

In addition to the already known special taxes, e. g., in Greece, Hungary, Romania, and Croatia, a tax on mobile masts is currently being discussed in Austria. However, positive signs are currently coming out of Hungary, where the government has held out the prospect of a reduction in VAT and telecommunications tax.

Results of Operations of the Group

Net Revenue

In 2015, Deutsche Telekom generated net revenue of EUR 69.2 billion, which was above the prior-year level with growth of EUR 6.6 billion. In addition to exchange rate effects, the business development of the United States operating segment contributed substantially to this positive trend: T-Mobile US' successful Un-carrier initiatives gave a strong boost to the number of new customers. By contrast, terminal equipment revenue was adversely affected. In connection with the device leasing business model introduced by T-Mobile US in June 2015, customers are increasingly choosing to lease high-value terminal equipment. The Germany operating segment performed well, especially in the mobile market, and generated a small increase in revenue of 0.7 percent. In the Europe operating segment there was a decline in revenue of 2.0 percent; although the trend was an improvement on the prior year. Despite the consistent focus of the national companies on growth areas, revenue decreased due to decisions by regulatory authorities and competition-related price reductions, especially in mobile communications. In the Systems Solutions operating segment, the revenue increase at the Market Unit, i.e., essentially business with external customers, largely offset the planned decline in revenue at Telekom IT, which deals with internal IT project. Revenue from the Group Headquarters & Group Services segment decreased compared with 2014, mainly due to the continued efforts to optimise the use of land and buildings; added to this was the revenue lost in connection with the sale of 70 percent of the shares in the Scout24 group, which was consummated in February 2014, and the sale of the online platform t-online.de and the digital marketing company InteractiveMedia in November 2015.

Excluding the positive exchange rate effects of EUR 4.5 billion in total – in particular from the translation of U. S. dollars into euros – and positive effects of changes in the composition of the Group of EUR 0.1 billion, revenue increased by EUR 2.0 billion or 3.0 percent year-on-year.

Group Headquarters & Group Services	2,275	2,516	(241)	(9.6)
Intersegment revenue	(5,703)	(6,096)	393	6.4

At 41.8 percent, the United States operating segment provided the largest contribution to net revenue of the Group, increasing its share of net revenue by 6.0 percentage points compared with the previous year, partly due to the continued strong customer growth. By contrast, the contribution to net revenue by the Germany, Europe, and Systems Solutions operating segments and the Group Headquarters & Group Services segment declines. The proportion of net revenue generated internationally continued to increase, up from 60.1 percent in 2014 to 63.8 percent in 2015.

EBITDA, adjusted EBITDA

The EBITDA increased by EUR 0.6 billion to EUR 18.4 billion in 2015 compared to 2014; this included negative net special factors of EUR 1.5 billion. They mainly comprised expenses incurred in connection with staff-related measures and non-staff related restructuring expenses of EUR 1.6 billion, which on a netted basis were EUR 0.4 billion higher than in 2014. In addition, expenses from the decommissioning of the MetroPCS CDMA network of around EUR 0.4 billion had a negative impact; in 2014, these expenses amounted to EUR 0.3 billion. Income from the sale of part of Deutsche Telekom's share package in Scout24 AG had an offsetting effect: The IPO of Scout24 AG was completed on 1 October 2015; in this connection, Deutsche Telekom sold a share package with a total of 13.3 million shares in the company for some EUR 0.3 billion. The sale of the online platform t-online.de and the digital content marketing company InteractiveMedia in November 2015 also generated income of EUR 0.3 billion from the divestitures. In 2014, special factors included income of EUR 1.7 billion from the disposal of the Scout24 group and EUR 0.4 billion from a spectrum transaction concluded between T-Mobile US and Verizon Communications.

Excluding special factors, adjusted EBITDA increased by EUR 2.3 billion to EUR 19.9 billion in 2015 compared to 2014. This development was primarily driven by the United States operating segment, which recorded an increase in its adjusted EBITDA contribution of EUR 2.4 billion, mainly as a result of its Un-carrier initiatives. The revenue effects from device leasing also contributed to the increase in adjusted EBITDA as the related costs were depreciated over the lease term and thus were excluded from adjusted EBITDA. Exchange rate effects, primarily from the translation of U. S. dollars into euros, had a positive overall effect of EUR 0.9 billion on development. The agreement to settle an ongoing complaints procedure under anti-trust law resulted in income of EUR 175 million in the Group Headquarters & Group Services segment.

EBIT

Group EBIT stood at EUR 7.0 billion in 2015, down EUR 0.2 billion against 2014. Apart from the effects described under EBITDA, reasons for the decrease include the increase of EUR 0.8 billion in depreciation and amortisation compared with 2014, primarily in connection with the build-out of the 4G/LTE network and the launch of the device leasing program in the United States operating segment.

Profit/loss before income taxes

Profit before income taxes increased by EUR 0.4 billion to EUR 4.8 billion in 2015 compared to 2014, due to the decrease of EUR 0.6 billion in the loss from financial activities. This is attributable in particular to the dividend payments of EUR 0.4 billion received from the EE joint venture. These dividend payments recognised in profit or loss related to the reclassification in December 2014 of the stake in the joint venture as non-current assets and disposal groups held for sale. Remeasurement effects resulting primarily from the subsequent measurement of embedded derivatives at T-Mobile US had an offsetting effect. These remeasurement losses were mainly attributable to the increase in the share price of T-Mobile US.

Net profit/loss

Net profit increased by EUR 0.3 billion or 11.3 percent to EUR 3.3 billion. Tax expense for the 2015 financial year amounted to EUR 1.3 billion and was thus EUR 0.2 billion higher than in 2014.

Profit attributable to non-controlling interests decreased only slightly compared with 2014.

Net debt increased by EUR 5.1 to EUR 47.6 billion at the end of 2015 compared to 2014. Factors positively influencing net debt were the positive Free cash flow of EUR 4.5 billion and the sale of a share package in Scout24 group of EUR 0.4 billion. Spectrum acquisition increased net debt by EUR 3.8 billion, as well as Dividend payments including non-controlling interests (EUR 1.3 billion). Additional effects leading to higher net debt were exchange rate effects (EUR 1.9 billion), the acquisition of the remaining shares of Slovak Telecom (EUR 0.9 billion), the allocation under the contractual trust agreement on pension commitments (EUR 0.3 billion) and other effects (EUR 1.8 billion). Other effects include financing options under which the payments for trade payables from investing and operating activities become due at a later point in time by involving banks in the process.

In addition to the assets recognised in the statement of financial position, Deutsche Telekom uses off-balance sheet assets. This primarily relates to leased property.

Off-balance-sheet financial instruments mainly relate to the sale of receivables by means of factoring. Total receivables sold as of 31 December 2015 amounted to EUR 3.5 billion (31 December 2014: EUR 1.4 billion). This mainly comprises the renewed conclusion in 2015 of a factoring agreement in the Germany operating segment that was terminated in 2014 and a new factoring agreement concluded in the United States operating segment. The agreements are mainly used for active receivables management.

Furthermore, in 2015, Deutsche Telekom chose financing options totaling EUR 0.7 billion (2014: EUR 0.6 billion) which extended the period of payment for trade payables from operating and investing activities by involving banks in the process and which upon payment are shown under cash flows used in/from financing activities.

In 2015, Deutsche Telekom primarily leased network equipment for a total of EUR 0.6 billion, which is recognised as a finance lease.

Free cash flow of the Group before dividend payments and spectrum investment grew from EUR 4.1 billion in 2014 to EUR 4.5 billion in 2015. On the one hand, net cash from operating activities increased by EUR 1.6 billion. On the other hand, cash outflows for investments in intangible assets (excluding goodwill and before spectrum investment) and property, plant and equipment also increased by EUR 1.3 billion.

The increase in net cash from operating activities was mainly attributable to the positive business development of the United States operating segment. In 2015, Deutsche Telekom concluded factoring agreements concerning monthly revolving sales of trade receivables, which resulted in a positive effect of EUR 0.8 billion on net cash from operating activities. This mainly comprises a renewed conclusion in 2015 of a factoring agreement in the Germany operating segment that was terminated in 2014 and a new factoring agreement concluded in the United States operating segment. The effect from factoring agreements in 2014 totaled EUR 0.2 billion. Cash inflows of EUR 0.2 billion also resulted from an agreement to settle an ongoing complaints procedure under anti-trust law. Offsetting effects included payments made in 2015 in connection with the European Commission proceedings against Slovak Telekom and Deutsche Telekom. The dividend payment received for the first time from Scout24 AG of EUR 0.1 billion and an increase of EUR 0.1 billion in the dividend payments from the EE joint venture increased net cash from operating activities.

The increase in cash capex from 2014 to 2015 primarily relate to the United States and Germany operating segments where cash capex increased as a result of the investments made in connection with the network build-out and the network modernisation.

Research and Development

Expenditure and investment in research and development

Research and development expenditure includes pre-production research and development, such as the search for alternative products, processes, systems, and services. By contrast, Deutsche Telekom does not class as research and development expenditure the costs of developing system and user software which is designed to improve productivity and make the business processes more effective. In 2015, research and development expenditure in the Deutsche Telekom Group amounted to EUR 108.1 million, above the level of 2014. As the parent company, Deutsche Telekom AG bears part of the Group's research and development expenditure. At EUR 86 million, this amount lay above the prior-year level (2014: EUR 60 million). However, this figure may not be viewed in isolation from

the three-pronged innovation strategy of in-house developments, innovations from external partners and start-up funding.

Deutsche Telekom's investments in internally generated intangible assets to be capitalised were EUR 101.3 million in 2015, compared with EUR 93.2 million in 2014. These investments predominantly relate to internally developed software, mainly in the Systems Solutions operating segment. In 2015, some 2,800 employees (2014: around 2,900) were involved in projects and activities to create new products and market them more efficiently.

Total revenue

Revenue increased by 0.7 percent in 2015 compared to 2014. This development was mainly driven by revenue from mobile business, which grew by 4.8 percent, especially in non-contract terminal equipment business, and the ongoing positive revenue trend recorded for Deutsche Telekom's second brand "congstar". Increased TV, IT, and terminal equipment revenues had a positive impact on fixed-network revenue development. However, this was not sufficient to completely offset declines in other areas. As a result, revenue in the fixed-network business decreased by 2.1 percent.

Revenue from Consumers increased by 1.0 percent in 2015 compared with 2014. Volume- and price-related revenue decreases continued to dominate traditional fixed-network business, which declined by 2.7 percent. Revenue from broadband business continued to grow, increasing by 0.3 percent in 2015. The 5.8-percent revenue growth in mobile business more than compensated for the losses in

the fixed-network business. The increase was primarily attributable to increased terminal equipment revenue from the marketing of smartphones. Mobile service revenues edged up 0.5 percent in 2015. Data revenue grew by 5.9 percent. By contrast, there was a negative trend in prepay revenues, especially from the Telekom brand.

Revenue from Business Customers increased by 1.0 percent, mainly due to growing mobile revenues, which were up 2.8 percent. This increase was primarily driven by terminal equipment revenues. The decline in fixed-network revenue from traditional voice telephony had an offsetting effect; the growth in IT revenues was not sufficient to compensate for this in full.

Wholesale revenue declined slightly by 0.5 percent in 2015, mainly due to lower volumes of minutes and regulation-induced reductions in prices for interconnection calls (from 1 December 2014), as well as falling numbers of unbundled local loop lines. This decline was partially offset by the positive trend in unbundled lines, mainly due to the contingent model.

Revenue from Value-Added Services decreased by 6.6 percent, primarily as a result of expiring business models such as public phones and directory inquiries as well as decreased use of premium rate numbers.

EBITDA, adjusted EBITDA

EBITDA adjusted for special factors decreased slightly by 0.2 percent to EUR 8.8 billion in 2015 compared to 2014, mainly due to higher personnel costs in connection with collectively agreed pay increases and the increased use of personnel for the network build-out and the IP migration. The adjusted EBITDA margin of 39.2 percent, is slightly short of the target level of 40 percent. EBITDA amounted to EUR 8.2 billion in 2015, a decline of 3.6 percent against 2014, due in particular to higher special factors for expenses in connection with staff restructuring.

EBIT

Profit from operations decreased by 3.7 percent to EUR 4.5 billion in 2015 compared with 2014. This was mainly attributable to higher expenses incurred in connection with staff-related measures and non-staff-related restructuring expenses. Offsetting effects resulted from a 3.5-percent-decrease in depreciation and amortisation.

Cash capex

Cash capex increased by EUR 1.8 billion in 2015 compared to 2014, due in particular to the spectrum auction in June 2015. Excluding spectrum investment, cash capex increased slightly compared with 2014. During 2015 Deutsche Telekom made significant investments in the vectoring and fiber-optic cable roll-out, IP transformation, and LTE infrastructure as part of the integrated network strategy.

Total revenue

Total revenue for the United States operating segment of EUR 28.9 billion in 2015 increased by 29.1 percent compared to EUR 22.4 billion in 2014 substantially due to fluctuations in the currency exchange rate. In U. S. dollars, T-Mobile US' total revenues increased by 8.1 percent in 2015 due primarily to service revenue growth resulting from increases in the customer base from the continued success of T-Mobile US' Un-carrier initiatives and strong customer response to promotional activities targeting families. Equipment revenues decreased primarily attributable to a lower average revenue per device sold, due in part to the impact of customers shifting to leasing higher-end, partially offset by growth in the number of devices and accessories sold.

EBITDA, adjusted EBITDA, adjusted EBITDA margin

Adjusted EBITDA increased by 54.9 percent to EUR 6.7 billion compared to EUR 4.3 billion in 2014. In U. S. dollars, adjusted EBITDA increased by 29.5 percent in 2015. Adjusted EBITDA was positively impacted by increased branded postpaid and prepay service revenues resulting from the success of Un-carrier initiatives and strong customer response to promotional activities. Revenues from the impact of customers shifting to leasing devices also contributed to the increase in adjusted EBITDA as the related handset costs are depreciated over the lease term and are excluded from adjusted EBITDA. Additionally, synergies realised from the decommissioning of the MetroPCS CDMA network and focused cost control contributed to the adjusted EBITDA increase during 2015. These effects were partially offset by higher employee-related costs, an increased loss on equipment sales due to higher volumes of smartphone sales, higher promotional costs and increases in bad debt expense and losses on sales of receivables. The adjusted EBITDA margin increased from 19.2 percent in 2014 to 23.0 percent in 2015 due to the factors described above.

Adjusted EBITDA in 2015 excludes EUR 0.4 billion special factors primarily relating to the decommissioning of the MetroPCS CDMA network and stock-based compensation costs. Overall, EBITDA increased by 46.8 percent to EUR 6.2 billion in 2015 compared to EUR 4.2 billion in 2014.

EBIT

EBIT increased by 74.7 percent to EUR 2.5 billion in 2015 compared to EUR 1.4 billion in 2014. This was driven by higher adjusted EBITDA partially offset by higher depreciation expense and the recognition of costs associated with the decommissioning of the MetroPCS CDMA network. The build-out of the T-Mobile US 4G/LTE network and the launch of the device leasing program resulted in increased depreciation for 2015.

Cash capex

Cash capex increased to EUR 6.4 billion in 2015 compared to EUR 5.1 billion in 2014 due primarily to the build-out of the 4G/LTE network. Additionally, in 2015, T-Mobile US purchased AWS and 700 MHz A-Block spectrum licenses totaling EUR 2.2 billion, of which the majority was related to the AWS spectrum licenses acquired through the U. S. FCC auction in January 2015.

The contributions of the national companies correspond to their respective unconsolidated financial statements and do not take consolidation effects at operating segment level into account.

^a As of 1 January 2015, the entities of the GTS Central Europe group in Poland and the Czech Republic were integrated in the respective national companies.

The integration in Hungary became effective as of 1 April 2015.

^b Other: national companies of Albania, the F.Y.R.O. Macedonia, and Montenegro, as well as ICSS (International Carrier Sales & Solutions), the ICSS/GNF business of the Local Business Units, GNF (Global Network Factory), GTS Central Europe group in Romania, Europe Headquarters, and Group Technology.

Total revenue

The Europe operating segment generated total revenue of EUR 12.7 billion in 2015, a decrease of 2.0 percent compared to 2014. In organic terms, i. e., assuming full inclusion of the GTS Central Europe group in the 2014 period as well as constant exchange rates, segment revenue decreased by 3.0 percent.

Decisions by regulatory authorities continue to have a substantial impact on revenue. Reduced mobile termination rates and roaming regulations in many countries of the operating segment accounted for most of the organic revenue decline. In addition, revenue continued to come under pressure from persistently intense competition in the telecommunications markets in the national companies. Given Deutsche Telekom's strategy of gradually withdrawing from the Voice Hubbing business (termination of international calls), there was a negative trend in wholesale business, as expected. Excluding Voice Hubbing revenues and regulatory effects, organic revenue remained essentially stable year-on-year.

Because the national companies consistently focused on growth areas, Deutsche Telekom partially compensated the negative revenue effects at segment level. As of 31 December 2015, growth areas accounted for as much as 29 percent of segment revenue. Revenue from mobile data business increased by 9.7 percent adjusted for exchange rate effects to EUR 1.7 billion in 2015 compared to 2014, with all countries of the operating segment contributing, in particular the Netherlands, Greece, and the Czech Republic. The largest share of revenue from mobile data business was attributable to consumers. Attractive rate plans combined with a broad portfolio of terminal equipment resulted in a substantial further increase in the usage of data services, especially among contract customers. In 2015, broadband/TV revenue increased by 7.3 percent (adjusted for exchange rate effects), such that it now accounts for a quarter of fixed-network revenue. Greece, Hungary, and the Czech Republic, in particular, contributed to this growth. In addition to the acquisition of the GTS Central Europe group in 2014, the expanded product and service portfolio contributed to higher revenue in B2B/ICT business with business customers compared with 2014, especially in the Czech Republic, Slovakia, and Poland. The energy resale business in Hungary also recorded revenue growth.

In addition to the growth areas, revenues from sales of mobile devices increased by 4.8 percent. The alternative model launched in some of Deutsche Telekom's footprint countries (whereby the customer concludes separate contracts for the service and the device) developed at the same level as in 2014.

EBITDA, adjusted EBITDA

The Europe operating segment generated adjusted EBITDA of EUR 4.3 billion in 2015, a decrease of 3.2 percent compared to 2014. Assuming full inclusion of the GTS Central Europe group in 2014 and constant exchange rates, adjusted EBITDA declined by 4.1 percent. Overall, the decrease in organic revenue at segment level in particular had a negative impact on the development of the adjusted EBITDA. Furthermore, changes in legislation, taxes and duties, national austerity programs, and regulatory decisions put additional pressure on earnings.

EBITDA decreased by 5.4 percent to EUR 4.1 billion, mainly due to higher special factors, such as expenses for staff-related measures and the expense to settle a claim for damages against Slovak Telekom in the first quarter of 2015.

EBIT

EBIT in the Europe operating segment totaled EUR 1.5 billion in 2015, down 14.9 percent compared

to 2014, mainly due to the decline in EBITDA. Goodwill impairment losses of EUR 43 million were recognised in Hungary in the reporting year. Depreciation and amortisation in 2015 were at around the same level as in 2014.

Cash capex

In 2015, the Europe operating segment reported cash capex of EUR 1.7 billion, i. e., down by 21.4 percent, mainly due to the acquisition of mobile licenses in Hungary, the Czech Republic, Poland, and Slovakia in 2014. Deutsche Telekom acquired mobile spectrum in 2015, in particular in Albania, but to a lesser extent. Adjusted for the effects of spectrum acquisition, cash capex in 2015 was almost unchanged compared to 2014.

SYSTEMS SOLUTIONS

Development of operations

Total revenue

Total revenue in the Systems Solutions operating segment in 2015 amounted to EUR 8.6 billion, almost the same level as in 2014. The revenue increase in the Market Unit largely offset the planned decline in revenue in the Telekom IT unit.

Revenue of the Market Unit, i. e., essentially business with external customers, was up 2.6 percent compared with 2014 to EUR 7.1 billion in 2015; with international revenue in particular increasing by 3.7 percent compared with 2014. The general downward price trend in ICT business was more than offset by the revenue from new contracts, especially in cloud business. Furthermore, exchange rate effects had a positive impact on the Market Unit's revenue.

In the Telekom IT business unit, which mainly pools the Group's domestic internal IT projects, revenue was down 11.0 percent to EUR 1.5 billion in 2015 compared to 2014. This decrease is primarily due to lower internal revenues from the licensing of the Group-wide ERP system and, in particular, the Group's planned savings in IT costs.

EBITDA, adjusted EBITDA

Adjusted EBITDA in the Systems Solutions operating segment decreased by EUR 53 million or 6.3 percent in 2015 due to a substantially lower contribution from Telekom IT. The upward trend in

adjusted EBITDA continued in the Market Unit, which contributed 3.5 percent more to earnings than in 2014. The reasons for this include improved customer profitability and the effects resulting from cost-cutting and efficiency enhancement measures. These positive effects were partially impaired by necessary expenses in connection with the realignment of the business model with the aim of ensuring sustainably profitable growth. The adjusted EBITDA margin of the Systems Solutions operating segment decreased from 9.7 percent in 2014 to 9.1 percent in 2015.

EBITDA declined by 54.9 percent to EUR 133 million, due to the effects described under adjusted EBITDA in connection with the realignment of the business model. Special factors were higher than in 2014, mainly due to restructuring programs, the settlement of differences, and the optimisation of transactions.

EBIT, adjusted EBIT

Adjusted EBIT in 2015 improved by EUR 73 million against 2014. The key factors were the effects described under adjusted EBITDA and lower depreciation, amortisation and impairment losses, especially in connection with the licensing of the Group-wide ERP system. The adjusted EBIT margin improved from 1.5 to 2.3 percent in 2015 compared to 2014.

Cash capex

At EUR 1.2 billion, cash capex remained in 2015 at the same level as in 2014. The level of investment remains high and is attributable to the realignment of the business model, which Deutsche Telekom is developing further in line with the increasing digitisation of enterprises. For this reason, Deutsche Telekom is investing in growth areas such as connected car and healthcare, as well as in digital innovation areas like cloud computing and cyber security. Enhanced efficiency, for example as a result of the standardisation of the ICT platforms and the consolidation of data centers, had an offsetting effect.

GROUP HEADQUARTERS & GROUP SERVICES

Total revenue

Total revenue in the Group Headquarters & Group Services segment in 2015 decreased by 9.6 percent compared to 2014. Efficiency enhancement measures, in particular the continued efforts to optimise the use of land and buildings, resulted in a decline in intragroup revenue. Further reasons for the decline include the revenue lost in connection with the sale of 70 percent of the shares in the Scout24 group, which was consummated in early February 2014, with the sale of the online platform t-online.de and the digital marketing company InteractiveMedia in November 2015, and with the realignment of the Group Innovation unit.

EBITDA, adjusted EBITDA

Adjusted EBITDA at Group Headquarters & Group Services increased by EUR 115 million in 2015 compared with 2014, primarily due to income of EUR 175 million resulting from an agreement to settle an ongoing complaints procedure under anti-trust law in the first quarter of 2015. Lower personnel costs as a result of the continued staff restructuring as well as increased income from the real estate sales also had a positive impact on earnings. By contrast, adjusted EBITDA was negatively affected by the following factors: efficiency gains achieved through continued cost management and passed on to the operating segments; the loss of the contribution to earnings of the Scout24 group, and lower income at Vivento due to a decrease in headcount and order volume.

Overall, positive special factors of EUR 0.3 billion affected EBITDA in 2015; they resulted in particular from the IPO of Scout24 AG, in which Deutsche Telekom sold a share package of a total 13.3 million shares, resulting in income of EUR 0.3 billion. The sale of the online platform and the digital marketing company InteractiveMedia also generated income of some EUR 0.3 billion. EBITDA was negatively affected by expenses – in particular in connection with socially responsible staff restructuring – of EUR 0.3 billion. In 2014, special factors were dominated in particular by income from the disposal of the Scout24 group.

EBIT

The decline in EBIT in 2015 compared to 2014 is primarily attributable to income from the disposal of the Scout24 group recognised in 2014. The improvement in adjusted EBITDA had a positive effect in 2015.

Cash capex

Cash capex decreased by EUR 39 million in 2015 compared to 2014, mainly due to the set-up of the new Group Innovation unit and a decrease in the purchase of software licenses. This was partially offset by the procurement of more vehicles.

Outlook

Market Expectations

Germany

Deutsche Telekom expects the telecommunications market in Germany to be still on a slight downward trend in 2016; positive growth is forecast from 2017. EITO (European Information Technology Observatory) expects a market decline of 0.6 percent for 2016, with the growth in mobile and stationary data services almost completely compensating the clear revenue decline in traditional and mobile voice telephony as a result of changes in the EU roaming regulation. Innovative, integrated products and attractive solutions offered together with partners play an ever greater role for positioning in competition. Other important differentiators include the available download and upload bandwidths and the data volumes included in rate plans. At the level of products and services, Deutsche Telekom expects consumer business to grow, especially in market segments like television and Smart Home, and both business customer and consumer business to grow in terms of cloud services and data security.

While the infrastructure in the mobile market has a comparable structure and now the majority of the population also has access to high-speed mobile Internet with 4G/LTE, the market for fixed-network broadband is characterised by a large number of competitors and different infrastructures. Deutsche Telekom expects continued growth not only for cable network operators, but also for providers with DSL- or fiber-optic-based networks.

In terms of a broader-based ICT market that includes IT services as well as telecommunications, EITO even expects slight growth of a little over 1 percent in Germany for 2016. This is attributable to growth of 2.5 percent in the IT market, driven above all by strong growth in services for business customers, e. g., outsourcing, projects, and consulting, as well as in software.

United States

The U. S. mobile market continues to be characterised by intense competition among mobile carriers. Competitive factors within the U. S. mobile market include dynamic changes in pricing, voice market saturation, service and product offerings, customer experience, network quality, development and deployment of technologies, availability of spectrum licenses, and regulatory changes. The mobile postpaid market in the United States is embracing device financing options, such as T-Mobile US' equipment installment plans and device leasing, allowing customers to subscribe for wireless services separately without the purchase of or payment for a bundled device. Additionally, data services continue to be a growth driver, and despite the high level of competition, the U. S. mobile market is expected to grow from mobile broadband data services in 2016 and 2017 further supporting network investment by mobile carriers in the U. S. mobile market.

Europe

The European markets will continue to be dominated in 2016 and 2017 by intense competition between market players from the traditional telecommunications industry, alternative broadband providers, such as cable and fiber-optic network operators, and providers of Internet-based services such as short messaging (e. g., WhatsApp) and Internet TV (e. g., Netflix).

In Europe, the trend towards convergent products comprising fixed-network and mobile (FMC) offerings continued to accelerate in 2015. Deutsche Telekom expects most market players to move towards an integrated business model in the future. As a result, consolidation pressure will continue to grow in the telecommunications market, especially on non-integrated providers, and at the same time, the already high competitive and price pressure will increase.

Deutsche Telekom expects the macro-economic framework conditions in most of the European markets to continue improving. Fiscal interventions again had a negative impact on telecommunications markets, in Croatia and Romania, for example. Furthermore, Deutsche Telekom expects decisions by national regulatory authorities and the European Union, which will put the markets under pressure and have a negative impact on mobile revenues in future, such as the EU roaming regulation. Overall, Deutsche Telekom expects the decline in revenue in the telecommunications markets in the individual countries of the Europe operating segment to be less pronounced in 2016 than in 2015 and to stabilise from 2017. This is due to the fact that the reduction in termination rates is lower than in prior years and the propagation of smartphones with mobile broadband is growing, especially in Eastern Europe, as is demand for broadband and pay-TV lines in the fixed network.

Systems Solutions

Deutsche Telekom expects the global economic recovery to hold such that the growth trend in the ICT market intensifies again over the next two years. In Deutsche Telekom's view, the ICT market will be shaped by digitisation, ongoing cost pressure, and strong competition. Digitisation is leading to greater demand for solutions from the areas of cloud services, big data, intelligent network services like Industry 4.0, the Internet of Things, and M2M, as well as the mobilisation of business processes.

Deutsche Telekom expects the ICT markets in both of its market segments to develop in different ways:

- A range of factors are leading to new challenges in the intensely contested telecommunications market. Innovative change, the high intensity of competition, and persistent price erosion, as well as interventions by national regulatory authorities result in a steady market decline, even though business with mobile data services will continue to grow over the next few years.
- After clear growth in the 2015, Deutsche Telekom expects the market for IT services to grow steadily in 2016 and 2017. The IT services market is undergoing major change, however, brought about by progressive standardisation, demand for intelligent services, changes in outsourcing business caused by cloud services, and new challenges posed by issues such as ICT security, big data, and increasing mobility. Traditional ICT business will only grow slightly due to price competition, whereas growth in areas such as cloud services, mobility, and cyber security may even reach double digits. Deutsche Telekom will continue to increase investments in growth markets such as cloud services, cyber security, and intelligent network solutions for the healthcare sector or the automotive industry.

The Supervisory Board

The Supervisory Board advises the Board of Management and oversees its management of business. In accordance with the German Stock Corporation Act (*Aktiengesetz*) and the German Co-Determination Act of 1976 (*Mitbestimmungsgesetz*), Deutsche Telekom AG's Supervisory Board consists of twenty members, ten of whom represent its shareholders and ten of whom represent its employees. Members of the Supervisory Board may be elected for a term of up to five years and re-election is permitted. The Chairman and the Deputy Chairman are elected by the Supervisory Board in accordance with the rules of the German Co-Determination Act.

Supervisory Board members representing Deutsche Telekom AG's shareholders are elected at the annual shareholders' meeting. The terms of office of the shareholder representatives expire at the end of the shareholders' meeting at which the shareholders discharge the Supervisory Board members in respect of the fourth financial year following the member's commencement of tenure of office. The financial year in which tenure of office commences is not counted for this purpose.

Supervisory Board members representing Deutsche Telekom AG's employees are elected by its employees in accordance with the provisions of the German Co-Determination Act. Employees elect ten representatives, made up of workers, regular employees, at least one senior management employee and three union representatives. Under the laws that governed Deutsche Telekom AG's privatisation, civil servants, who are not otherwise covered by the German Co-Determination Act, are included in these groups of employee representatives for purposes of these elections.

A member of the Supervisory Board elected by Deutsche Telekom AG's shareholders may be removed by a shareholders' resolution by simple majority of the votes cast. A member of the Supervisory Board elected by Deutsche Telekom AG's employees may be removed by a majority of at least three-quarters of the votes cast by the relevant class of employees or union representatives who elected the relevant Supervisory Board members in accordance with the German Co-Determination Act.

The Supervisory Board is required by law to meet at least twice every six months. To achieve a quorum, at least ten of the members of the Supervisory Board must be present or cast their votes in writing. Except in situations in which a different majority is required by law, such as the appointment of Management Board members or the election of the Chairman and Deputy Chairman, the Supervisory Board makes decisions by simple majority of the votes cast. If, in the event of a deadlock, a second vote again results in a tie, the chairman of the Supervisory Board can cast the deciding vote.

Basis of Board of Management compensation

On 24 February 2010, the Supervisory Board resolved on a new system for the compensation of the Board of Management members, taking into account the provisions specified in the German Act on the Appropriateness of Management Board Remuneration (Gesetz zur Angemessenheit der Vorstandsvergütung – VorstAG) that has been in effect since 5 August 2009. The shareholders' meeting of Deutsche Telekom AG on 3 May 2010 approved this new system.

The compensation of Board of Management members comprises various components. Under the terms of their service contracts, members of the Board of Management are entitled to an annual fixed remuneration and annual variable performance-based remuneration, a long-term variable remuneration component, as well as fringe benefits and deferred benefits based on a company pension entitlement. The Supervisory Board defines the structure of the compensation system for the Board of Management and reviews this structure and the appropriateness of compensation at regular intervals.

The fixed remuneration is determined for all Board of Management members based on market conditions in accordance with the requirements of stock corporation law. It is ensured that Board of Management compensation is oriented toward the sustained development of the Company and that there is a multi-year measurement base for the variable components.

The variable remuneration of the members of the Board of Management is divided into Variables I and II. Variable I contains both short-term and long-term components consisting of the realisation of

budget figures for specific performance indicators, the implementation of the strategy and adherence to the Group's Guiding Principles. Variable II is oriented solely toward the long term. This ensures that the variable remuneration is oriented toward the sustained development of the Company and that there is a predominantly long-term incentive effect. The variable compensation elements include clear upper limits, while the amount of compensation was capped overall.

At its discretion and after due consideration, the Supervisory Board may also reward extraordinary performance by individual or all Board of Management members in the form of a special bonus.

In accordance with market-oriented and corporate standards, the Company grants all members of the Board of Management additional benefits under the terms of their service contracts, some of which are viewed as non-cash benefits and taxed accordingly. This mainly includes being furnished with a company car and accident and liability insurance, and reimbursements in connection with maintaining a second household. Sideline employment generally requires prior approval. Generally, no additional compensation is paid for being a member of the management or supervisory board of other Group entities.

In the event of temporary incapacity for work caused by illness, accident, or any other reason for which the respective Board of Management member is not responsible, the fixed basic remuneration continues to be paid; in the event of an uninterrupted period of absence due to illness of more than one month, claims to variable remuneration are reduced pro rata in line with the uninterrupted period of absence. The continued payment of remuneration ends at the latest after an uninterrupted period of absence of six months, or for a maximum of three months following the end of the month in which the Board of Management member's permanent incapacity for work is established.

Employees

Deutsche Telekom Group's headcount decreased slightly by 1.1 percent in 2015 compared with the end of 2014. The operating segments showed countervailing trends to some extent. In the Germany operating segment, the headcount decreased slightly by 0.2 percent in 2015 compared with the end of 2014 with the staff taken on for network build-out offset by the staff downsizing measures implemented primarily in shared functions. The total number of employees in the United States operating segment increased by 11.5 percent due to an increase in retail, customer support and administrative employees to support the growing T-Mobile U.S. customer base. In the Europe operating segment, staff levels decreased by 4.5 percent in 2015 compared with 31 December 2014, due in particular to efficiency enhancement measures in several countries in the operating segment. Headcount in the Systems Solutions operating segment declined by 3.7 percent, largely due to staff restructuring measures in Germany and abroad. The number of employees in the Group Headquarters & Group Services segment was down 14.7 percent in 2015 compared with the end of 2014, mainly due to the continued staff restructuring program – including the placement of employees within the Group – and the sale of the online platform t-online.de and the digital content marketing company InteractiveMedia in November 2015.

Civil Servants

Although no employees hired after 1 January 1995 have been granted civil servant status, Deutsche Telekom employs a substantial number of civil servants. Pursuant to the law governing Deutsche Telekom's privatisation, its civil servant employees retained their civil servant status. Accordingly, the terms and conditions of their employment and the benefits owed to them continue to be governed by German regulations regarding civil servants. In particular, civil servant salaries are set by statute and not by Deutsche Telekom or by collective bargaining agreements. In addition, civil servants are tenured employees and may not be unilaterally terminated except in extraordinary, statutorily defined circumstances. Civil servants are not permitted to participate in work-related actions such as strikes, but are permitted to join labor unions. Although Deutsche Telekom is authorised, pursuant to the law governing its privatisation, to exercise generally the rights and duties of Germany as the employer of civil servants, the Federal Postal and Telecommunication Agency (*Bundesanstalt für Post und Telekommunikation* or the Federal Agency) has a right of consultation in the implementation of certain aspects of the terms under which Deutsche Telekom employs civil servants.

Under the German Postal Employees Act (*Postpersonalrechtsgesetz*), which governs the legal position of civil servants at Deutsche Telekom AG, Deutsche Telekom has been given greater flexibility with respect to its relationship with its civil servants. The agreement provides the option of assigning tasks in companies within or outside the Group to active civil servants. The civil servants' compensation, healthcare and pension entitlements have been maintained. Under certain circumstances, civil servants may also be transferred, even without their consent, to companies in which Deutsche Telekom AG has a direct or indirect majority shareholding. However, there is a risk that civil servants temporarily without civil servant status may return to Deutsche Telekom AG, for example, after the completion of their work at one of Deutsche Telekom's subsidiaries. Although Deutsche Telekom attempts to reduce this risk through compensation payments from the subsidiaries to Deutsche Telekom AG, Deutsche Telekom cannot eliminate it completely.

Civil servants employed by Deutsche Telekom are entitled to pension benefits provided by the German federal government pursuant to the German Civil Servants' Benefits Act (*Beamtenversorgungsgesetz*). Pursuant to the law governing its privatisation, Deutsche Telekom is required to make annual contributions to a special pension fund established to fund such pension obligations. The special pension fund was merged in 2000 with the special pension funds of Deutsche Post AG and Deutsche Postbank AG to form a joint pension fund, the Federal Pension Service for Post and Telecommunication (*Bundes-Pensions-Service für Post und Telekommunikation* e.V., the "**BPS-PT**"). The BPS-PT works for the funds of all three companies and also handles financial administration for Germany on a trust basis. All transactions for pension and allowance payments to employees are made by BPS-PT for the companies Deutsche Post AG, Deutsche Postbank AG and Deutsche Telekom AG.

Provisions for Civil Servants in the Group

On 16 November 2006, the "Second Bill to Amend the Act for the Improvement of the Staff Structure at the Residual Special Asset of the Federal Railways and the Successor Companies of the Former Deutsche Bundespost" (*Zweites Gesetz zur Änderung des Gesetzes zur Verbesserung der personellen Struktur beim Bundeseisenbahnvermögen und in den Unternehmen der Deutschen Bundespost*) entered into force. Among other things, this Act was intended to help correct the negative consequences of a structural feature of the successor companies to Deutsche Bundespost (Deutsche Telekom AG, Deutsche Post AG, Deutsche Postbank AG). These successor companies employ a high proportion of civil servants in Western Germany, while staff covered by collective agreements make up the majority of the workforce in Eastern Germany. On the basis of the 2006 law, Deutsche Telekom became able to include civil servants in staff restructuring measures. Civil servants of all service grades, who are working in areas where there is a surplus of staff and for whom employment in another area is not possible or cannot reasonably be expected in line with civil service legislation,

have been able to apply for early retirement from the age of 55. The Board of Management has resolved to make use of this provision for 2016.

MAJOR SHAREHOLDERS

Below the holders of more than 3 percent of Deutsche Telekom's ordinary shares and their percentage of ownership, based on information supplied to Deutsche Telekom AG by such holders.

KfW:	17.45 percent
Federal Republic of Germany:	14.34 percent
Blackrock:	5.10 percent

The Federal Republic of Germany administers its shareholdings and exercises its rights as a shareholder of Deutsche Telekom AG through the German Finance Ministry. In their capacities as shareholders, the Federal Republic of Germany and KfW may exercise only those rights that they have under the Stock Corporation Act and Deutsche Telekom AG's Articles of Incorporation, which are the same for all of Deutsche Telekom AG's shareholders.

At present, the Finance Ministry and KfW each have one representative on Deutsche Telekom AG's Supervisory Board.

Major Shareholders do not have different voting rights from any of Deutsche Telekom AG's other shareholders.

KfW is 80 percent owned by the Federal Republic of Germany. The Federal Republic of Germany has publicly stated its intention to reduce its holdings of Deutsche Telekom AG shares. Deutsche Telekom AG does not expect that a reduction in the holdings of Deutsche Telekom AG's shares by the Federal Republic of Germany or KfW will have a material negative effect on Deutsche Telekom AG's governance or business.

Share Capital

As of 31 December 2015 the share capital of Deutsche Telekom AG amounted to EUR 11,793,028,787.20 divided into 4,606,651,870 registered ordinary shares without par value (*Stückaktien*). All shares have been issued and are fully paid.

Voting Rights

Each share entitles the holder to one vote. These voting rights are restricted, however, in relation to treasury shares and shares allocable to Deutsche Telekom in the same way as treasury shares (at 31 December 2015: around 20 million in total).

Capital increase

The resolution on the dividend payout of EUR 0.50 per share for the 2014 financial year gave shareholders the choice between payment in cash or having their dividend entitlement converted into Deutsche Telekom AG shares. Dividend entitlements of Deutsche Telekom AG shareholders amounting to EUR 1.1 billion for shares from authorised capital (2013 authorised capital) were contributed in June 2015 and thus did not have an impact on cash flows. Deutsche Telekom AG carried out an increase in issued capital of EUR 0.2 billion against contribution of dividend entitlements for this purpose in June 2015. This increased capital reserves by EUR 0.8 billion, the number of shares by 71,080,623.

LITIGATION AND ARBITRATION PROCEEDINGS

The companies of Deutsche Telekom Group are involved in a number of legal proceedings in the ordinary course of Deutsche Telekom's business. In addition, proceedings involving alleged abuse of a market-dominant position by Deutsche Telekom and other alleged antitrust violations, as well as other regulatory controversies, are pending before competition and regulatory authorities.

Securities and Corporate Law-Related Proceedings

German Prospectus Liability Suits

Since 2001, around 16,000 purported purchasers of Deutsche Telekom AG's shares sold pursuant to prospectuses dated 25 June 1999 ("DT2"), and 26 May 2000 ("DT3"), have filed more than 2,600 lawsuits in Germany predominantly alleging that the book values of Deutsche Telekom AG's real property portfolio were improperly established and maintained under German GAAP and that Deutsche Telekom AG allegedly failed to adequately disclose detailed information relating to merger negotiations between Deutsche Telekom and VoiceStream Wireless Corporation (the predecessor of T-Mobile USA). These lawsuits are pending before the Regional Court (*Landgericht*) in Frankfurt am Main. The aggregate amount of all shareholders' claims filed in Germany in these lawsuits is approximately EUR 80 million.

On 11 July 2006 (with respect to the DT3 offering prospectus) and on 22 November 2006 (with respect to the DT2 offering prospectus), the court issued orders for model proceedings (*Vorlagebeschlüsse*) with respect to these lawsuits based on the German Act on Model Case Proceedings in Disputes under Capital Markets Law (*Kapitalanleger-Musterverfahrensgesetz*) seeking a decision of the Frankfurt Court of Appeals (*Oberlandesgericht Frankfurt*) as to common questions of law and fact with respect to the above-mentioned allegations. The master decision by the Frankfurt Court of Appeals will be binding for all parties in the main proceedings. On 16 May 2012, the Frankfurt Higher Regional Court had ruled in the DT3 - model proceedings that there were no errors in the prospectus for Deutsche Telekom AG's third public offering and that Deutsche Telekom is not liable. In its decision on 21 October 2014, the Federal Court of Justice revoked this ruling, determined that there was a mistake in the prospectus, and referred the case back to the Frankfurt/Main Higher Regional Court. A decision on possible liability for damages was not made. On 3 July 2013 the Frankfurt Higher Regional Court ruled that as well in the DT2 class action proceedings the prospectus for DT's second public offering (1999) did not contain any errors. The plaintiffs' side has filed an appeal (*Rechtsbeschwerde*) against the decision with the Federal Court of Justice.

Toll Collect

The Federal Republic of Germany initiated arbitration proceedings against Daimler Financial Services AG, Deutsche Telekom AG and the Toll Collect consortium for damages suffered as a result of the delay in the commencement of operations of the German highway toll collection system and alleged breaches of the related operating agreement.

The Federal Republic of Germany, in its statement of claims received on 2 August 2005, asserted claims for damages of approximately EUR 5.2 billion plus interest. This amount includes contractual penalties of EUR 1.7 billion relating to the allegation that the agreement of the Federal Republic of Germany was not sought prior to the execution of certain subcontractor agreements. As some of the contractual penalties are time-related and further claims for contractual penalties have been asserted by the Federal Republic of Germany, the amount claimed as contractual penalties may increase. Daimler Financial Services AG, Deutsche Telekom AG and the Toll Collect consortium filed their answer to the claim on 30 June 2006 and to the subsequent counterplea of the Federal Republic of

Germany on 1 October 2007. The Federal Republic of Germany served further briefs on 7 January 2008 and 16 February 2008, to which Daimler Financial Services AG, Deutsche Telekom AG and the Toll Collect consortium answered by a further brief on 16 May 2008. The Federal Republic of Germany has slightly modified its claims for damages, now amounting to approximately EUR 4.98 billion plus interest. Further exchanges of briefs in this matter have occurred since then. Various witnesses and experts were heard at a hearing in December 2010.

Additionally, in December 2006, Toll Collect GmbH initiated an arbitration proceeding seeking a determination that the Federal Republic of Germany's basis for denying the issuance of the final operating permit is unfounded and claiming that additional remuneration is due to Toll Collect in accordance with the operating agreement. The Statement of Claims of Toll Collect GmbH was served on the Federal Republic of Germany on 25 May 2007. The answer of the Federal Republic of Germany together with a counterclaim claiming overpayment of remuneration to Toll Collect GmbH was received on 31 January 2008. The Chairman of the arbitral tribunal stood down as of 31 March 2012. At the end of October 2012, following administrative proceedings, Dr. Wolfgang Nitsche was named as his successor. The arbitral tribunal has held an organisational meeting with the parties at the end of May 2013. Further hearings took place in spring and fall 2014. In connection with the hearing in spring 2014, the proceedings and the share of the risk borne by Deutsche Telekom were reexamined and, as a result, appropriate provisions for risk were recognised in the statement of financial position. A further hearing took place in June 2015, which was resumed in January 2016.

Damages for Subscriber Data Costs

In 2005, two lawsuits were served on Deutsche Telekom; one by telegate for damages of approximately EUR 86 million, plus interest, and another by telegate's founding shareholder, Dr. Klaus Harisch, for damages of approximately EUR 329 million, plus interest. In the latter claim, the claimant subsequently increased the amount claimed to approximately EUR 612 million, plus interest. Both plaintiffs claim that they incurred losses, due to the alleged adverse effect that Deutsche Telekom's alleged inclusion of inadmissible costs in Deutsche Telekom's provision of customer data had on telegate's position in the market, the resulting capital increases that this required, and the weaker development of telegate's share price and the loss of shares of certain shareholders. The Cologne Regional Court dismissed both actions in its rulings on 28 May 2013. Both Dr. Harisch and telegate AG have appealed against the rulings. In its ruling on 2 July 2014, the Düsseldorf Higher Regional Court dismissed the appeal filed by Dr. Harisch. In its ruling on 2 July 2014, the Düsseldorf Higher Regional Court dismissed the appeal filed by Dr. Harisch. Dr. Harisch filed a complaint against the non-allowance of appeal with the Federal Court of Justice on 8 July 2014, which the Federal Court of Justice rejected on 14 April 2015. Dr. Harisch's claim of approximately EUR 612 million plus interest has therefore been dismissed with final and binding effect. The appeal filed by telegate was dismissed by the Düsseldorf Higher Regional Court on 22 April 2015. telegate AG filed a complaint against the non-allowance of appeal with the Federal Court of Justice in May 2015.

Claims relating to charges for shared use of cable ducts

With an action filed on 14 June 2012, Kabel Deutschland Vertrieb und Service GmbH (KDG) – now Vodafone Kabel Deutschland GmbH – is asserting two claims: first, Telekom Deutschland GmbH is to reduce the annual charge for the rights to use cable duct capacities in the future; second, it is to partially refund payments made in this connection since 2004, which meanwhile KDG puts at approximately EUR 340 million plus interest and approximately EUR 10 million for unlawful gained savings of interests. The Frankfurt Regional Court dismissed the action in its ruling on 28 August 2013. KDG has appealed the decision. On 9 December 2014, the Frankfurt/Main Higher Regional Court rejected the appeal and disallowed a further appeal. KDG has filed a complaint against the non-allowance of appeal with the Federal Court of Justice. In response to the subsequent complaint against non-allowance of appeal filed by KDG, the Federal Court of Justice allowed KDG's appeal in a ruling dated 15 December 2015.

On 23 January 2013, Telekom Deutschland GmbH also received a claim filed by Unitymedia Hessen GmbH & Co. KG, Unitymedia NRW GmbH, and Kabel BW GmbH, demanding that Telekom Deutschland GmbH cease charging the complainants more than a specific and precisely stated amount for the shared use of cable ducts. Unitymedia Hessen GmbH & Co. KG is also demanding payment of approximately EUR 36.5 million plus interest, Unitymedia NRW GmbH EUR 90.8 million plus interest, and Kabel BW GmbH EUR 61.5 million plus interest for allegedly excessive charges paid since 2009 to 2012 for the shared use of cable ducts.

Claims by partnering publishers of telephone directories

Several publishers that edit and publish subscriber directories together with DeTeMedien GmbH, filed claims against DeTeMedien GmbH and/or Deutsche Telekom AG. The complainants claimed damages or refund of approximately EUR 470 million plus interest in total from DeTeMedien GmbH and to a certain extent from Deutsche Telekom AG as joint and several debtor next to DeTeMedien. The complainants base their claims on allegedly excessive charges for the provision of subscriber data. The Frankfurt/Main Regional Court rejected 22 out of 81 claims. Two of these decisions have become final and legally binding, in the other cases the complainants have filed an appeal with the Frankfurt/Main Higher Regional Court. On 22 October 2015, Deutsche Telekom AG, DeTeMedien GmbH and the majority of the partnering publishers of telephone directories concluded an agreement to settle their disputes, as a result of which, 54 publishers applied to the court to waive their claims. Seven publishers withdrew their appeals, as a result of which the rulings of the first instance that rejected the claims became legally binding with immediate effect upon receipt by the court of the withdrawals. At present, 18 proceedings are still pending with a remaining claim total of approximately EUR 132 million (plus interest).

Proceedings against Decisions of the Federal Network Agency

With the exception of the approval of one-time charges from 1999, 2001, 2005, and 2010 approvals for monthly charges of unbundled local loop lines (ULLs) are not binding for all companies demanding ULLs, because they have applied to have them revoked by the competent courts. Certain approvals have been revoked with final and binding effect, so the Federal Network Agency has to decide again on the charges in relation to the former complainants. Currently, this applies specifically to the rate approvals of the ULL monthly charges from 2003, 2005 and 2007 to the new ruling on the ULL one-time charges from 2002 with regard to the cancellation charges.

Damage claim in Malaysia following a binding arbitrational award

Celcom Malaysia Berhad ("**Celcom**") and Technology Resources Industries Berhad ("**TRI**") filed lawsuits at public courts in Kuala Lumpur, Malaysia, against eleven defendants, including DeteAsia Holding GmbH ("**DTAH**"), a subsidiary of Deutsche Telekom AG. The claimants claim damages and compensation in an amount of USD 232 million (plus interest). This amount was enforced by DTAH in 2005 on basis of a final and binding arbitrational award in favour of DTAH. The first instance main proceedings will be conducted in October 2016.

Other Proceedings

Intellectual Property Rights

Like many other large network operators, Deutsche Telekom is exposed to an increasing number of intellectual property disputes, especially patent litigation. Generally, this leads to a higher risk of having to pay license fees and compensation. Some disputes may even result in cease-and-desist orders, blocking Deutsche Telekom's access to, and ability to use, key network technologies.

Spectrum Allocation

Appeals are pending against the decisions by the Federal Network Agency on the allocation of certain frequencies to individual mobile carriers, including Telekom Deutschland GmbH.

Auction of LTE Frequencies

In 2010, the Federal Network Agency auctioned off additional frequencies in the 800 MHz, 1.8 GHz, 2.0 GHz and 2.6 GHz ranges, with all four German mobile network operators participating in the auction. Alongside the complaints brought by broadcasters and cable network operators that were dismissed with final and legally binding effect, the complaint by a telecommunications company that was still pending was dismissed by the Cologne Administrative Court in a ruling on 3 September 2014. This decision now is final and legally binding. All complainants have also appealed against the allocation of frequencies to Telekom Deutschland GmbH, however this has not yet been ruled upon.

Radio Frequency Emissions

Beginning in 2000, plaintiffs filed numerous state court class-action lawsuits against T-Mobile USA and several other wireless service operators and wireless telephone manufacturers, asserting product liability, breach of warranty and other claims relating to radio frequency transmissions to and from wireless mobile devices. On 2 September 2008, the court granted the defendants' motion to dismiss,

which was affirmed on appeal. On 3 October 2011, the United States Supreme Court denied the plaintiff's request for a writ of certiorari. In 2011, several new lawsuits were filed by individual plaintiffs against T-Mobile USA, as well as other wireless service operators and telephone manufacturers, alleging personal injury and product liability related claims allegedly caused by radio frequency emissions. T-Mobile USA believes these cases have no merit and is vigorously defending them. T-Mobile USA believes these cases have no merit and is vigorously defending them. The DC Court of Appeals is currently considering an interlocutory appeal filed by the wireless defendants, asking the Court to revise the legal standard for the admissibility of expert witness testimony. The cases are on hold pending a decision by the Court. Oral argument on this legal issue was heard on 24 November 2015 and a decision is expected in Spring 2016.

Claim for compensation against OTE

In May 2009, Lannet Communications S.A. filed an action against OTE claiming compensation for damages of around EUR 176 million plus interest arising from an allegedly unlawful termination of services by OTE – mainly interconnection services, unbundling of local loops, and leasing of dedicated lines. A hearing took place on 30 May 2013; a ruling has not yet been issued.

Anti-Trust Proceedings

Like all companies, Deutsche Telekom's Group is subject to the regulations of anti-trust law. Deutsche Telekom and its subsidiaries, joint ventures and associates are subject to proceedings under competition law or civil follow-on actions in individual countries.

The major anti-trust and consumer protection actions are described below.

Following the decision of the European Commission on 15 October 2014 in Case 39.523 – Slovak Telekom, both Orange Slovensko and SWAN filed civil follow-on actions against Slovak Telekom in Bratislava in August 2015, claiming compensation for damages plus interest in the amount of EUR 232 million and EUR 50 million respectively. These claims seek compensation for alleged damages due to Slovak Telekom's abuse of a dominant market position, as determined by the European Commission. In December 2014, Slovak Telekom and Deutsche Telekom filed an appeal against the decision of the European Commission with the Court of the European Union; in addition, Slovak Telekom considers the complaint by Orange Slovensko to be largely unfounded. The action by SWAN has not yet been officially served to Slovak Telekom. It is uncertain whether SWAN is waiting for the outcome of the proceedings in relation to Orange Slovensko or, following publication of the European Commission's decision, considers it unlikely that a claim will be successful. It is currently not possible to estimate the financial impact of these proceedings with sufficient certainty. Furthermore, Deutsche Telekom intends to defend itself and/or pursue its claims resolutely in each of these court, conciliatory, and arbitration proceedings.

For this purpose, a change of control over Deutsche Telekom shall be deemed to have taken place if one or several entities, with the exception of the Federal Republic of Germany, directly or indirectly acquire 35 percent of the voting rights in Deutsche Telekom AG.

Consent to the use of the Prospectus

Each Dealer and/or each further financial intermediary subsequently reselling or finally placing Notes issued under the Programme is entitled to use the Prospectus in the Grand Duchy of Luxembourg, the Republic of Austria, the Federal Republic of Germany, the United Kingdom of Great Britain and Northern Ireland, the Republic of Ireland and The Netherlands for the subsequent resale or final placement of the relevant Notes during the respective offer period (as determined in the applicable Final Terms) during which subsequent resale or final placement of the relevant Notes can be made, provided however, that the Prospectus is still valid in accordance with Article 11(2) of the Luxembourg Law which implements Directive 2003/71/EC of the European Parliament and of the Council of 4 November 2003, as amended. The Issuer accepts responsibility for the information given in this Prospectus also with respect to such subsequent resale or final placement of the relevant Notes.

The Prospectus may only be delivered to potential investors together with all supplements published before such delivery. Any supplement to the Prospectus is available for viewing in electronic form on the website of the Luxembourg Stock Exchange (www.bourse.lu) and on the website of Deutsche Telekom (<http://www.telekom.com/bonds>).

When using the Prospectus, each Dealer and/or relevant further financial intermediary must make certain that it complies with all applicable laws and regulations in force in the respective jurisdictions.

In the event of an offer being made by a Dealer and/or a further financial intermediary the Dealer and/or the further financial intermediary shall provide information to investors on the terms and conditions of the Notes at the time of that offer.

Any Dealer and/or a further financial intermediary using the Prospectus shall state on its website that it uses the Prospectus in accordance with this consent and the conditions attached to this consent.

General Description of the Programme

Under this EUR 25,000,000,000 Debt Issuance Programme, Deutsche Telekom and Finance may from time to time issue notes, (the "**Notes**"). The maximum aggregate principal amount of the Notes from time to time outstanding under the Programme will not exceed EUR 25,000,000,000 (or its equivalent in any other currency). The Issuers may increase the amount of the Programme in accordance with the terms of the Dealer Agreement (as defined herein) from time to time.

The Guarantor has given its unconditional and irrevocable guarantee (the "**Guarantee**") for the due payment of the amounts corresponding to the principal of and interest on the Notes issued by Deutsche Telekom International Finance B.V. The Guarantee will be governed by German law.

The Notes may be issued on a continuing basis to one or more of the Dealers and any additional Dealer appointed under the Programme from time to time by the Issuer(s), which appointment may be for a specific issue or on an ongoing basis. Notes may be distributed by way of offer to the public or private placements and, in each case, on a syndicated or non-syndicated basis. The method of distribution of each Tranche will be stated in the relevant Final Terms. Notes may be offered to qualified and non-qualified investors.

Notes will be issued in tranches (each a "**Tranche**"), each Tranche consisting of Notes which are identical in all respects. One or more Tranches, which are expressed to be consolidated and forming a single series and identical in all respects, except for issue dates, interest commencement dates and/or issue prices may form a series ("**Series**") of Notes. Further Notes may be issued as part of existing Series.

Notes will be issued in such denominations as may be agreed between the relevant Issuer and the relevant Dealer(s) and as indicated in the applicable Final Terms save that the minimum denomination of the Notes will be, if in euro, EUR 1,000 and if in any currency other than euro, in an amount in such other currency nearly equivalent to EUR 1,000 at the time of the issue of the Notes. The minimum denomination of the Notes may be smaller than EUR 1,000 if the Notes are not listed or are listed on an unregulated market and may not be part of any offer to the public. Notes will be issued with a maturity of twelve months or more. The Notes will be freely transferable.

Notes may be issued at an issue price which is at par or at a discount to, or premium over, par. The issue price for Notes to be issued will be determined at the time of pricing on the basis of a yield which will be determined on the basis of the orders of the investors which are received by the Dealers during the offer period. Orders will specify a minimum yield and may only be confirmed at or above such yield. The resulting yield will be used to determine an issue price, all to correspond to the yield.

The yield for Notes with fixed interest rates will be calculated by the use of the ICMA method, which determines the effective interest rate of notes taking into account accrued interest on a daily basis.

Unless otherwise permitted by then current laws and regulations, Notes in respect of which the issue proceeds are to be accepted by the Issuer in the United Kingdom will have a minimum redemption amount of GBP 100,000 (or its equivalent in other currencies), unless such Notes may not be redeemed until on or after the first anniversary of their date of issue.

Application has been made to list Notes issued under the Programme on the official list of and to admit such Notes to trading on the Regulated Market of the Luxembourg Stock Exchange. Under the Programme Notes may also be issued which will not be listed on any Stock Exchange.

Notes will be accepted for clearing through one or more Clearing Systems as specified in the applicable Final Terms. These systems will include those operated by Clearstream Banking AG, Frankfurt am Main (CBF), Clearstream Banking, société anonyme (CBL) and Euroclear Bank SA/NV (Euroclear). Notes denominated in euro or, as the case may be, such other currency recognised from time to time for the purposes of eligible collateral for Eurosystem monetary policy and intra-day credit operations by the Eurosystem, are intended to be held in a manner, which would allow Eurosystem eligibility. Therefore, these Notes will initially be deposited upon issue with in the case of (i) a new global note either Clearstream Banking société anonyme, Luxembourg or Euroclear Bank SA/NV as common safekeeper or, (ii) a classical global note Clearstream Banking AG, Frankfurt am Main. It does not necessarily mean that the Notes will be recognised as eligible collateral for Eurosystem monetary

policy and intra-day credit operations by the Eurosystem either upon issue or at any or all times during their life. Such recognition will depend upon satisfaction of the Eurosystem eligibility criteria.

Issue Procedures

The Issuer and the relevant Dealer(s) will agree on the terms and conditions applicable to each Tranche of Notes (the "**Conditions**"). The Conditions will be constituted by the relevant set of Terms and Conditions set forth below as further specified by the provisions of the applicable Final Terms as provided below.

Options for sets of Terms and Conditions

A separate set of Terms and Conditions applies to each type of Notes, as set forth below. The Final Terms provide for the relevant Issuer to choose between the following Options:

- Option I: Terms and Conditions for Notes with fixed interest rates;
- Option II: Terms and Conditions for Notes with floating interest rates.

Documentation of the Conditions

The relevant Issuer may document the Conditions of an individual issue of Notes in either of the following ways:

- The Final Terms shall be completed as set out therein. The Final Terms shall determine which of the Option I or Option II, including certain further options contained therein, respectively, shall be applicable to the individual issue of Notes by replicating the relevant provisions and completing the relevant placeholders of the relevant set of Terms and Conditions as set out in the Prospectus in the Final Terms. The replicated and completed provisions of the set of Terms and Conditions shall constitute the Conditions, which will be attached to each global note representing the Notes of the relevant Tranche. This type of documentation of the Conditions will be required where the Notes are publicly offered, in whole or in part, or are to be initially distributed, in whole or in part, to non-qualified investors.
- Alternatively, the Final Terms shall determine which of Option I or Option II and of the respective further options contained in each of Option I and Option II are applicable to the individual issue by referring to the relevant provisions of the relevant set of Terms and Conditions as set out in the Prospectus only. The Final Terms will specify that the provisions of the Final Terms and the relevant set of Terms and Conditions as set out in the Prospectus, taken together, shall constitute the Conditions. Each global note representing a particular Tranche of Notes will have the Final Terms and the relevant set of Terms and Conditions as set out in the Prospectus attached.

Determination of Options / Completion of Placeholders

The Final Terms shall determine which of the Option I or Option II shall be applicable to the individual issue of Notes. Each of the sets of Terms and Conditions of Option I or Option II contains also certain further options (characterised by indicating the respective optional provision through instructions and explanatory notes set out either on the left of or in square brackets within the text of the relevant set of Terms and Conditions as set out in the Prospectus) as well as placeholders (characterised by square brackets which include the relevant items) which will be determined by the Final Terms as follows:

Determination of Options

The relevant Issuer will determine which options will be applicable to the individual issue either by replicating the relevant provisions in the Final Terms or by reference of the Final Terms to the respective sections of the relevant set of Terms and Conditions as set out in the Prospectus. If the Final Terms do not refer to an alternative or optional provision or such alternative or optional provision is not replicated therein it shall be deemed to be deleted from the Conditions.

Completion of Placeholders

The Final Terms will specify the information with which the placeholders in the relevant set of Terms and Conditions will be completed. In the case the provisions of the Final Terms and the relevant set of

Terms and Conditions, taken together, shall constitute the Conditions the relevant set of Terms and Conditions shall be deemed to be completed by the information contained in the Final Terms as if such information were inserted in the placeholders of such provisions.

All instructions and explanatory notes and text set out in square brackets in the relevant set of Terms and Conditions and any footnotes and explanatory text in the Final Terms will be deemed to be deleted from the Conditions.

Controlling Language

As to the controlling language of the respective Conditions, the following applies:

If, in the event of such public offer or distribution to non-qualified investors, however, English is chosen as controlling language, a German language translation of the Conditions will be available from the respective offices of the Paying Agent in Germany and the Issuer, specified under "*Names and Addresses*" below.

The set of Terms and Conditions for each of these Options contains certain further options, which are characterised accordingly by indicating the respective optional provision through instructions and explanatory notes set out either on the left of or in square brackets within the set of Terms and Conditions.

In the Final Terms the Issuer will determine, which of the Option I or Option II including certain further options contained therein, respectively, shall apply with respect to an individual issue of Notes, either by replicating the relevant provisions or by referring to the relevant options.

To the extent that upon the approval of the Prospectus neither the Issuer nor the Guarantor had knowledge of certain items which are applicable to an individual issue of Notes, this Prospectus contains placeholders set out in square brackets which include the relevant items that will be completed by the Final Terms.

In the case the Final Terms applicable to an individual issue only refer to the further options contained in the set of Terms and Conditions for Option I or Option II, the following applies

[The provisions of the following Terms and Conditions apply to the Notes as completed by the final terms which are attached hereto (the "**Final Terms**"). The blanks in the provisions of these Terms and Conditions which are applicable to the Notes shall be deemed to be completed by the information contained in the Final Terms as if such information were inserted in the blanks of such provisions; alternative or optional provisions of these Terms and Conditions as to which the corresponding provisions of the Final Terms are not completed or are deleted shall be deemed to be deleted from these Terms and Conditions; and all provisions of these Terms and Conditions which are inapplicable to the Notes (including instructions, explanatory notes and texts set out in square brackets) shall be deemed to be deleted from these Terms and Conditions, as required to give effect to the terms of the Final Terms. Copies of the Final Terms may be obtained free of charge at the specified offices of the Paying Agents; provided that, in the case of Notes which are not listed on any stock exchange, copies of the relevant Final Terms will only be made available to Holders of such Notes.]

**OPTION I – Anleihebedingungen für Schuldverschreibungen mit fester
Verzinsung**

ANLEIHEBEDINGUNGEN DER SCHULDVERSCHREIBUNGEN

(German Language Version)

§ 1

**WÄHRUNG, NENNBETRAG, FORM UND EIGENTUMSRECHT
BESTIMMTE DEFINITIONEN**

(1) *Währung und Nennbetrag.* Diese Serie der Schuldverschreibungen der [Deutsche Telekom AG] [Deutsche Telekom International Finance B.V.] (["**Deutsche Telekom**"] ["**Finance**"] oder die "**Emittentin**") wird in [**festgelegte Währung**] (die "**festgelegte Währung**") im Gesamtnennbetrag von [**Falls die Globalurkunde eine NGN ist, ist folgendes anwendbar:** (vorbehaltlich § 1 Absatz 6)) [**Gesamtnennbetrag**] (in Worten: [**Gesamtnennbetrag in Worten**]) begeben und ist eingeteilt in [**Anzahl der Schuldverschreibungen**] Schuldverschreibungen im Nennbetrag von [**festgelegter Nennbetrag**] (der "**festgelegte Nennbetrag**").

(2) *Form und Eigentumsrecht.* Die Schuldverschreibungen lauten auf den Inhaber und sind durch eine Globalurkunde verbrieft. Die Übertragung des Eigentumsrechts an den Schuldverschreibungen erfolgt nach den Vorschriften des jeweils anwendbaren Rechts.

(3) *Vorläufige Globalurkunde - Austausch.*

- (a) Die Schuldverschreibungen sind anfänglich in einer vorläufigen Globalurkunde (die "**vorläufige Globalurkunde**") ohne Zinsscheine verbrieft. Die vorläufige Globalurkunde wird, wie nachstehend bestimmt, gegen Schuldverschreibungen in dem festgelegten Nennbetrag, die durch eine Dauerglobalurkunde (die "**Dauerglobalurkunde**") ohne Zinsscheine verbrieft sind ausgetauscht. Einzelurkunden und Zinsscheine werden nicht ausgegeben.
- (b) Die vorläufige Globalurkunde wird frühestens an einem Tag (der "**Austauschtag**") gegen eine Dauerglobalurkunde austauschbar, der 40 Tage nach dem Tag der Ausgabe der vorläufigen Globalurkunde liegt und zwar nach Vorlage von Bescheinigungen gemäß U.S. Steuerrecht durch den jeweiligen Kontoinhaber bei dem Clearing-System sowie durch das Clearing-System bei dem Fiscal Agent, in der Form von für diese Zwecke bei dem Fiscal Agent erhältlichen Formularen. Darin wird bescheinigt, dass der bzw. die wirtschaftlichen Eigentümer der durch die vorläufige Globalurkunde verbrieften Schuldverschreibungen keine U.S.-Personen sind, ausgenommen bestimmte Finanzinstitute oder bestimmte Personen, die die Schuldverschreibungen über solche Finanzinstitute halten. Zinszahlungen auf durch eine vorläufige Globalurkunde verbrieft Schuldverschreibungen erfolgen erst nach Vorlage solcher Bescheinigungen. Eine gesonderte Bescheinigung ist für jede solche Zinszahlung erforderlich. Jede Bescheinigung, die am oder nach dem 40. Tag nach dem Tag der Ausgabe der durch die vorläufige Globalurkunde verbrieften Schuldverschreibungen eingeht, wird als ein Ersuchen behandelt werden, diese vorläufige Globalurkunde gemäß diesem Absatz (b) dieses § 1 Absatz 3 auszutauschen. Wertpapiere, die im Austausch für die vorläufige Globalurkunde geliefert werden, dürfen nur außerhalb der Vereinigten Staaten (wie in § 5 Absatz 1 definiert) geliefert werden. Dauerglobalurkunden, die im Austausch für die vorläufige Globalurkunde geliefert werden, werden ausschließlich außerhalb der Vereinigten Staaten (wie in § 5 Absatz 1 definiert) ausgeliefert.

(4) *Bei Austausch von Globalurkunden zahlbare Gebühren.* Der Austausch einer

Globalurkunde gemäß diesem § 1 erfolgt für die Inhaber der Schuldverschreibungen kostenfrei.

(5) *Unterzeichnung der Schuldverschreibungen.* Die Globalurkunden sind namens der Emittentin durch zwei vertretungsberechtigte Personen der Emittentin zu unterschreiben. Sie tragen die Kontrollunterschrift des Fiscal Agent oder seines Beauftragten.

(6) *Clearing System.* Jede Schuldverschreibungen verbriefende Globalurkunde wird von einem oder im Namen eines Clearing Systems verwahrt, bis sämtliche Verbindlichkeiten der Emittentin aus den Schuldverschreibungen erfüllt sind.

"Clearing-System" bedeutet **[Bei mehr als einem Clearing System ist folgendes anwendbar: sowohl] [Clearstream Banking AG, Neue Börsenstraße 1, 60487 Frankfurt am Main, Bundesrepublik Deutschland ("CBF"))]**, **[als auch] [Clearstream Banking, société anonyme, 42 Avenue JF Kennedy, 1855 Luxembourg, Großherzogtum Luxemburg ("CBL"), Euroclear Bank SA/NV, Boulevard du Roi Albert II, 1210 Brüssel, Belgien ("Euroclear") (CBL and Euroclear jeweils ein "ICSD" und zusammen die "ICSDs"))]** und jeder Funktionsnachfolger.

Im Fall von Schuldverschreibungen, die im Namen der ICSDs verwahrt werden und die Globalurkunde eine NGN ist, ist folgendes anwendbar

[Die Schuldverschreibungen werden in Form einer new global note ("**NGN**") ausgegeben und von einem common safekeeper im Namen beider ICSDs verwahrt.]

Der Gesamtnennbetrag der durch die Globalurkunde verbrieften Schuldverschreibungen entspricht dem jeweils in den Registern beider ICSDs eingetragenen Gesamtbetrag. Die Register der ICSDs (unter denen man die Register versteht, die jeder ICSD für seine Kunden über den Betrag ihres Anteils an den Schuldverschreibungen führt) sind maßgeblicher Nachweis über den Gesamtnennbetrag der durch die Globalurkunde verbrieften Schuldverschreibungen, und ein zu diesen Zwecken von einem ICSD jeweils ausgestellte Bescheinigung mit dem Betrag der so verbrieften Schuldverschreibungen ist ein maßgeblicher Nachweis über den Inhalt des Registers des jeweiligen ICSD zu diesem Zeitpunkt.

Bei Rückzahlung oder einer Zinszahlung bezüglich der durch die Globalurkunde verbrieften Schuldverschreibungen bzw. bei Kauf und Entwertung der durch die Globalurkunde verbrieften Schuldverschreibungen stellt die Emittentin sicher, dass die Einzelheiten über Rückzahlung und Zahlung bzw. Kauf und Löschung bezüglich der Globalurkunde *pro rata* in die Unterlagen der ICSDs eingetragen werden, und dass, nach dieser Eintragung, vom Gesamtnennbetrag der in die Register der ICSDs aufgenommenen und durch die Globalurkunde verbrieften Schuldverschreibungen der Gesamtnennbetrag der zurückgekauften bzw. gekauften und entwerteten Schuldverschreibungen abgezogen wird.]

[Falls die vorläufige Globalurkunde eine NGN ist, ist folgendes anwendbar: Bei Austausch eines Anteils von ausschließlich durch eine vorläufige Globalurkunde verbrieften Schuldverschreibungen wird die Emittentin sicherstellen, dass die Einzelheiten dieses Austauschs *pro rata* in die Aufzeichnungen der ICSDs aufgenommen werden.]

Im Fall von Schuldverschreibungen, die im Namen der ICSDs verwahrt werden und die Globalurkunde eine CGN ist, ist folgendes anwendbar

[Die Schuldverschreibungen werden in Form einer classical global note ("**CGN**") ausgegeben und von einer gemeinsamen Verwahrstelle im Namen beider ICSDs verwahrt.]

(7) *Bestimmte Definitionen.* In diesen Anleihebedingungen bedeutet:

"Globalurkunde" die vorläufige Globalurkunde oder die Dauerglobalurkunde.

"Gläubiger" in Bezug auf die bei einem Clearing-System oder einem sonstigen zentralen Wertpapierverwahrer hinterlegten Schuldverschreibungen der Inhaber eines Miteigentumsanteils oder anderen Rechts an den hinterlegten Schuldverschreibungen, und andernfalls der Inhaber einer Schuldverschreibung.

"Zahlstelle" den Fiscal Agent in seiner Eigenschaft als Zahlstelle handelnd durch ihre nachstehend in § 7 bezeichnete Geschäftsstelle, die in § 7 genannte(n) Zahlstelle(n) oder eine gemäß § 7 ernannte Ersatz- oder weitere Zahlstelle.

Bezugnahmen in diesen Anleihebedingungen auf die *"Schuldverschreibungen"* beziehen sich auf die Schuldverschreibungen dieser Serie und schließen, wenn der Zusammenhang dies erfordert, Globalurkunden ein.

Bezugnahmen auf die *"festgelegte Währung"* schließen jede Nachfolge-Währung ein, die entweder durch Gesetz in dem Hoheitsgebiet, in dem die festgelegte Währung ausgegeben wird, oder durch eine zwischen-staatliche Vereinbarung eingeführt wird (die **"Nachfolgewährung"**), sofern Zahlungen in der ursprünglichen Währung nicht mehr als zulässiges Zahlungsmittel für Zahlungen der Emittentin hinsichtlich der Schuldverschreibungen **[Bei von Finance begebenen Schuldverschreibungen ist folgendes anwendbar:** bzw. für Zahlungen der Garantin hinsichtlich der Garantie] gelten.

§ 2 STATUS

Die Schuldverschreibungen begründen nicht besicherte und nicht nachrangige Verbindlichkeiten der Emittentin, die untereinander und mit allen anderen nicht besicherten und nicht nachrangigen Verbindlichkeiten der Emittentin gleichrangig sind.

§ 3 NEGATIVVERPFLICHTUNG DER EMITTENTIN

[Im Fall von Schuldverschreibungen, die von Finance begeben werden ist folgendes anwendbar:; GARANTIE UND NEGATIVVERPFLICHTUNG DER GARANTIN]

[(1)] *Negativverpflichtung.* Die Emittentin verpflichtet sich, solange Schuldverschreibungen ausstehen, jedoch nur bis zu dem Zeitpunkt, an dem alle Beträge an Kapital und Zinsen dem Fiscal Agent zur Verfügung gestellt worden sind, weder ihr gegenwärtiges noch ihr zukünftiges Vermögen ganz oder teilweise in irgendeiner Weise zur Besicherung einer gegenwärtigen oder zukünftigen Kapitalmarktverbindlichkeit, die von der Emittentin oder einer anderen Person eingegangen oder gewährleistet ist, zu belasten oder eine solche Belastung zu diesem Zweck bestehen zu lassen, ohne gleichzeitig die Gläubiger an derselben Sicherheit im gleichen Rang und gleichen Verhältnis teilnehmen zu lassen. **"Kapitalmarktverbindlichkeit"** ist jede Verbindlichkeit zur Zahlung aufgenommener Gelder, die durch Schuldscheine verbrieft, verkörpert oder dokumentiert ist oder durch Schuldverschreibungen oder sonstige Wertpapiere, die an einer Börse oder an einem anderen anerkannten Wertpapiermarkt notiert oder gehandelt werden oder werden können. Um etwaige Zweifel bezüglich von asset-backed financings der Emittentin zu vermeiden, schließt das in diesem § 3 benutzte Wort *"Vermögen"* nicht solche Vermögensgegenstände der Emittentin ein, die nach dem jeweils auf die Transaktion anwendbaren Zivilrecht ohne Rückgriffsmöglichkeiten veräußert sind.

[(2)] *Garantie und Negativverpflichtung der Garantin.* Die Garantin hat die unbedingte und unwiderrufliche Garantie (die **"Garantie"**) für die ordnungsgemäße und pünktliche Zahlung von Kapital und Zinsen und sonstiger auf die Schuldverschreibungen zahlbarer Beträge übernommen. Die Garantin hat sich außerdem in einer Negativverpflichtung (die **"Negativverpflichtung"**)

verpflichtet, solange Schuldverschreibungen ausstehen, jedoch nur bis zu dem Zeitpunkt, an dem alle Beträge an Kapital und Zinsen dem Fiscal Agent zur Verfügung gestellt worden sind, weder ihr gegenwärtiges noch ihr zukünftiges Vermögen ganz oder teilweise in irgendeiner Weise zur Besicherung einer gegenwärtigen oder zukünftigen Kapitalmarktverbindlichkeit (wie vorstehend definiert), die von der Garantin oder einer anderen Person eingegangen oder gewährleistet ist, zu belasten oder eine solche Belastung zu diesem Zweck bestehen zu lassen, ohne gleichzeitig die Gläubiger an derselben Sicherheit im gleichen Rang und gleichem Verhältnis teilnehmen zu lassen. Die Garantie und die Negativverpflichtung stellen einen Vertrag zugunsten jedes Gläubigers als begünstigtem Dritten gemäß § 328 BGB dar, welcher das Recht jedes Gläubigers begründet, Erfüllung aus der Garantie und der Negativverpflichtung unmittelbar von der Garantin zu verlangen und die Garantie und die Negativverpflichtung unmittelbar gegen die Garantin durchzusetzen. Um etwaige Zweifel bezüglich von asset-backed financings der Garantin zu vermeiden, schließt das in diesem § 3 benutzte Wort "Vermögen" nicht solche Vermögensgegenstände der Garantin ein, die nach dem jeweils auf die Transaktion anwendbaren Zivilrecht ohne Rückgriffsmöglichkeiten veräußert sind. Kopien der Garantie und Negativverpflichtung werden bei den bezeichneten Geschäftsstellen der Zahlstellen zur kostenlosen Ausgabe bereitgehalten.]

§ 4 ZINSEN

(1) *Zinssatz und Zinszahlungstage.* Die Schuldverschreibungen werden in Höhe ihres Gesamtnennbetrages verzinst, und zwar vom **[Verzinsungsbeginn]** (einschließlich) bis zum Fälligkeitstag (wie in § 6 Absatz 1 definiert) (ausschließlich) mit jährlich **[Zinssatz]** %. Die Zinsen sind nachträglich am **[Festzinstermine]** eines jeden Jahres zahlbar (jeweils ein "Zinszahlungstag"). Die erste Zinszahlung erfolgt am **[erster Zinszahlungstag]** **[sofern der erste Zinszahlungstag nicht der erste Jahrestag des Verzinsungsbeginns ist, ist folgendes anwendbar: und beläuft sich auf [anfänglicher Bruchteilzinsbetrag je festgelegter Nennbetrag] je festgelegtem Nennbetrag.] [Sofern der Fälligkeitstag kein Festzinstermine ist, ist folgendes anwendbar: Die Zinsen für den Zeitraum vom [der letzte dem Fälligkeitstag vorausgehende Festzinstermine] (einschließlich) bis zum Fälligkeitstag (ausschließlich) belaufen sich auf [abschließender Bruchteilzinsbetrag je festgelegter Nennbetrag] je festgelegtem Nennbetrag.]**

(2) *Auflaufende Zinsen.* Der Zinslauf der Schuldverschreibungen endet mit Ablauf des Tages, der dem Tag vorangeht, an dem sie zur Rückzahlung fällig werden. Falls die Emittentin die Schuldverschreibungen bei Fälligkeit nicht einlöst, erfolgt die Verzinsung der Schuldverschreibungen vom Tag der Fälligkeit bis zu dem Tag, der dem Tag der tatsächlichen Rückzahlung der Schuldverschreibungen vorangeht, in Höhe des gesetzlich festgelegten Satzes für Verzugszinsen.¹

(3) *Berechnung der Zinsen für gebrochene Zeiträume.* Sofern Zinsen für einen Zeitraum von weniger als einem Jahr zu berechnen sind, erfolgt die Berechnung

¹ Der gesetzliche Verzugszinssatz beträgt für das Jahr fünf Prozentpunkte über dem von der Deutsche Bundesbank von Zeit zu Zeit veröffentlichten Basiszinssatz, §§ 288 Absatz 1, 247 BGB.

auf der Grundlage des Zinstagequotienten (wie nachstehend definiert).

(4) *Zinstagequotient*. "**Zinstagequotient**" bezeichnet im Hinblick auf die Berechnung eines Zinsbetrages auf eine Schuldverschreibung für einen beliebigen Zeitraum (der "**Zinsberechnungszeitraum**"):

[die Anzahl von Tagen in dem Zinsberechnungszeitraum, geteilt durch die Anzahl der Tage in der Bezugsperiode, in die der Zinsberechnungszeitraum fällt.]

[die Anzahl von Tagen in dem Zinsberechnungszeitraum, geteilt durch das Produkt aus (1) der Anzahl der Tage in der Bezugsperiode, in die der Zinsberechnungszeitraum fällt, und (2) der Anzahl von Zinszahlungstagen, die angenommen, dass Zinsen für das gesamte Jahr zu zahlen wären in ein Kalenderjahr fallen oder fallen würden.]

Im Fall von Actual/Actual (ICMA Regelung 251) und wenn der Zinsberechnungszeitraum länger ist als eine Bezugsperiode (langer Kupon) ist folgendes anwendbar

[die Summe aus:

- (a) der Anzahl von Tagen in dem Zinsberechnungszeitraum, die in die Bezugsperiode fallen, in welcher der Zinsberechnungszeitraum beginnt, geteilt durch **[Im Fall von Bezugsperioden, die kürzer sind als ein Jahr, ist folgendes anwendbar: das Produkt aus (x)]** [die] [der] Anzahl der Tage in dieser Bezugsperiode **[Im Fall von Bezugsperioden, die kürzer sind als ein Jahr, ist folgendes anwendbar: und (y) der Anzahl von Bezugsperioden, die in ein Kalenderjahr fallen oder fallen würden, falls Zinsen für das gesamte Jahr zu zahlen wären];** und

["Bezugsperiode" bezeichnet den Zeitraum ab dem Verzinsungsbeginn (einschließlich) bis zum ersten Zinszahlungstag (ausschließlich) oder von jedem Zinszahlungstag (einschließlich) bis zum nächsten Zinszahlungstag (ausschließlich). **[Im Fall eines ersten oder letzten kurzen Zinsberechnungszeitraumes ist folgendes anwendbar:** Zum Zwecke der Bestimmung der maßgeblichen Bezugsperiode gilt der **[Fiktive Zinszahlungstag]** als Zinszahlungstag.] **[Im Fall eines ersten oder letzten langen Zinsberechnungszeitraumes ist folgendes anwendbar:** Zum Zwecke der Bestimmung der maßgeblichen Bezugsperiode gelten der **[Fiktiver Zinszahlungstag]** als Zinszahlungstage].]

Tag eines Monats, während der erste Tag des Zinsberechnungszeitraumes weder auf den 30. noch den 31. Tag eines Monats fällt, in welchem Fall der diesen Tag enthaltende Monat nicht als ein auf 30 Tage gekürzter Monat zu behandeln ist, oder (B) der letzte Tag des Zinsberechnungszeitraumes fällt auf den letzten Tag des Monats Februar, in welchem Fall der Monat Februar nicht als ein auf 30 Tage verlängerter Monat zu behandeln ist).]

Im Falle von 30E/360 oder Eurobond Basis ist folgendes anwendbar

OPTION II – Anleihebedingungen für Schuldverschreibungen mit variabler Verzinsung

ANLEIHEBEDINGUNGEN DER SCHULDVERSCHREIBUNGEN

(German Language Version)

§ 1

**WÄHRUNG, NENNBETRAG, FORM UND EIGENTUMSRECHT
BESTIMMTE DEFINITIONEN**

(1) *Währung und Nennbetrag.* Diese Serie der Schuldverschreibungen der [Deutsche Telekom AG] [Deutsche Telekom International Finance B.V.] (**"Deutsche Telekom"**) [**"Finance"**] oder die **"Emittentin"**) wird in [**festgelegte Währung**] (die **"festgelegte Währung"**) im Gesamtnennbetrag von [**Falls die Globalurkunde eine NGN ist, ist folgendes anwendbar:** (vorbehaltlich § 1 Absatz 6)] [**Gesamtnennbetrag**] (in Worten: [**Gesamtnennbetrag in Worten**]) begeben und ist eingeteilt in [**Anzahl der Schuldverschreibungen**] Schuldverschreibungen im Nennbetrag von [**festgelegter Nennbetrag**] (der **"festgelegte Nennbetrag"**).

(2) *Form und Eigentumsrecht.* Die Schuldverschreibungen lauten auf den Inhaber und sind durch eine Globalurkunde verbrieft. Die Übertragung des Eigentumsrechts an den Schuldverschreibungen erfolgt nach den Vorschriften des jeweils anwendbaren Rechts.

(3) *Vorläufige Globalurkunde - Austausch.*

(a) Die Schuldverschreibungen sind anfänglich in einer vorläufigen Globalurkunde (die **"vorläufige Globalurkunde"**) ohne Zinsscheine verbrieft. Die vorläufige Globalurkunde wird, wie nachstehend bestimmt, gegen Schuldverschreibungen in dem festgelegten Nennbetrag, die durch eine Dauerglobalurkunde (die **"Dauerglobalurkunde"**) ohne Zinsscheine verbrieft sind ausgetauscht. Einzelurkunden und Zinsscheine werden nicht ausgegeben.

(b) Die vorläufige Globalurkunde wird frühestens an einem Tag (der **"Austauschtag"**) gegen eine Dauerglobalurkunde austauschbar, der 40 Tage nach dem Tag der Ausgabe der vorläufigen Globalurkunde liegt und zwar nach Vorlage von Bescheinigungen gemäß U.S. Steuerrecht durch den jeweiligen Kontoinhaber bei dem Clearing-System sowie durch das Clearing-System bei dem Fiscal Agent, in der Form von für diese Zwecke bei dem Fiscal Agent erhältlichen Formularen. Darin wird bescheinigt, dass der bzw. die wirtschaftlichen Eigentümer der durch die vorläufige Globalurkunde verbrieften Schuldverschreibungen keine U.S.-Personen sind, ausgenommen bestimmte Finanzinstitute oder bestimmte Personen, die Schuldverschreibungen über solche Finanzinstitute halten. Zinszahlungen auf durch eine vorläufige Globalurkunde verbrieften Schuldverschreibungen erfolgen erst nach Vorlage solcher Bescheinigungen. Eine gesonderte Bescheinigung ist für jede solche Zinszahlung erforderlich. Jede Bescheinigung, die am oder nach dem 40. Tag nach dem Tag der Ausgabe der durch die vorläufige Globalurkunde verbrieften Schuldverschreibungen eingeht, wird als ein Ersuchen behandelt werden, diese vorläufige Globalurkunde gemäß diesem Absatz (b) dieses § 1 Absatz 3 auszutauschen. Wertpapiere, die im Austausch für die vorläufige Globalurkunde geliefert werden, dürfen nur außerhalb der Vereinigten Staaten (wie in § 5 Absatz 1 definiert) geliefert werden. Dauerglobalurkunden, die im Austausch für die vorläufige Globalurkunde geliefert werden, werden ausschließlich außerhalb der Vereinigten Staaten (wie in § 5 Absatz 1 definiert) ausgeliefert.

(4) *Bei Austausch von Globalurkunden zahlbare Gebühren.* Der Austausch einer Globalurkunde gemäß diesem § 1 erfolgt für die Inhaber der Schuldverschreibungen kostenfrei.

(5) *Unterzeichnung der Schuldverschreibungen.* Die Globalurkunden sind namens der Emittentin durch zwei vertretungsberechtigte Personen der Emittentin zu unterschreiben. Sie tragen die Kontrollunterschrift des Fiscal Agent oder seines Beauftragten.

(6) *Clearing System.* Jede Schuldverschreibungen verbriefende Globalurkunde wird von einem oder im Namen eines Clearing Systems verwahrt, bis sämtliche Verbindlichkeiten der Emittentin aus den Schuldverschreibungen erfüllt sind.

"Clearing-System" bedeutet **[Bei mehr als einem Clearing System ist folgendes anwendbar: sowohl]** [Clearstream Banking AG, Neue Börsenstraße 1, 60487 Frankfurt am Main, Bundesrepublik Deutschland ("**CBF**")][.][als auch] [Clearstream Banking, société anonyme, 42 Avenue JF Kennedy, 1855 Luxembourg, Großherzogtum Luxemburg ("**CBL**"), Euroclear Bank SA/NV, Boulevard du Roi Albert II, 1210 Brüssel, Belgien ("**Euroclear**") (CBL and Euroclear jeweils ein "**ICSD**" und zusammen die "**ICSDs**")][und jeder Funktionsnachfolger.

Im Fall von Schuldverschreibungen, die im Namen der ICSDs verwahrt werden, und die Globalurkunde eine NGN ist, ist folgendes anwendbar

[Die Schuldverschreibungen werden in Form einer new global note ("**NGN**") ausgegeben und von einem common safekeeper im Namen beider ICSDs verwahrt.

Der Gesamtnennbetrag der durch die Globalurkunde verbrieften Schuldverschreibungen entspricht dem jeweils in den Registern beider ICSDs eingetragenen Gesamtbetrag. Die Register der ICSDs (unter denen man die Register versteht, die jeder ICSD für seine Kunden über den Betrag ihres Anteils an den Schuldverschreibungen führt) sind maßgeblicher Nachweis über den Gesamtnennbetrag der durch die Globalurkunde verbrieften Schuldverschreibungen, und ein zu diesen Zwecken von einem ICSD jeweils ausgestellte Bescheinigung mit dem Betrag der so verbrieften Schuldverschreibungen ist ein maßgeblicher Nachweis über den Inhalt des Registers des jeweiligen ICSD zu diesem Zeitpunkt.

Bei Rückzahlung oder einer Zinszahlung bezüglich der durch die Globalurkunde verbrieften Schuldverschreibungen bzw. bei Kauf und Entwertung der durch die Globalurkunde verbrieften Schuldverschreibungen stellt die Emittentin sicher, dass die Einzelheiten über Rückzahlung und Zahlung bzw. Kauf und Löschung bezüglich der Globalurkunde *pro rata* in die Unterlagen der ICSDs eingetragen werden, und dass, nach dieser Eintragung, vom Gesamtnennbetrag der in die Register der ICSDs aufgenommenen und durch die Globalurkunde verbrieften Schuldverschreibungen der Gesamtnennbetrag der zurückgekauften bzw. gekauften und entwerteten Schuldverschreibungen abgezogen wird.]

[Falls die vorläufige Globalurkunde eine NGN ist, ist folgendes anwendbar: Bei Austausch eines Anteils von ausschließlich durch eine vorläufige Globalurkunde verbrieften Schuldverschreibungen wird die Emittentin sicherstellen, dass die Einzelheiten dieses Austauschs *pro rata* in die Aufzeichnungen der ICSDs aufgenommen werden.]

Im Fall von Schuldverschreibungen, die im Namen der ICSDs verwahrt werden, und die Globalurkunde eine CGN ist, ist folgendes anwendbar

[Die Schuldverschreibungen werden in Form einer classical global note ("**CGN**") ausgegeben und von einer gemeinsamen Verwahrstelle im Namen beider ICSDs verwahrt.]

(7) *Bestimmte Definitionen.* In diesen Anleihebedingungen bedeutet:

"Globalurkunde" die vorläufige Globalurkunde oder Dauerglobalurkunde.

"Gläubiger" in Bezug auf die bei einem Clearing-System oder einem sonstigen zentralen Wertpapierverwahrer hinterlegten Schuldverschreibungen der Inhaber eines Miteigentumsanteils oder anderen Rechts an den hinterlegten Schuldverschreibungen, und andernfalls der Inhaber einer Schuldverschreibung.

"Zahlstelle" den Fiscal Agent in seiner Eigenschaft als Zahlstelle handelnd durch ihre nachstehend in § 7 bezeichnete Geschäftsstelle, die in § 7 genannte(n) Zahlstelle(n) oder eine gemäß § 7 ernannte Ersatz- oder weitere Zahlstelle.

Bezugnahmen in diesen Anleihebedingungen auf die *"Schuldverschreibungen"* beziehen sich auf die Schuldverschreibungen dieser Serie und schließen, wenn der Zusammenhang dies erfordert, Globalurkunden ein.

Guarantee
and
Negative Pledge
of
DEUTSCHE TELEKOM AG
Bonn, Federal Republic of Germany,
for the benefit of the Holders of Notes (the "**Notes**")
issued by
Deutsche Telekom International Finance B.V.
(incorporated with limited liability in The Netherlands)
under the Debt Issuance Programme (the "**Programme**")
as in force from time to time

WHEREAS:

(A) Deutsche Telekom AG (the "**Guarantor**") and Deutsche Telekom International Finance B.V. ("**Finance**") intend to issue from time to time Notes under the Programme;

(B) the Guarantor wishes to guarantee the payment of principal and interest and any other amounts payable in respect of any and all Notes that may be issued by Finance under the Programme;

(C) the Guarantor wishes to enter into a negative pledge for the benefit of each Holder of Notes that may be issued by Finance under the Programme;

IT IS AGREED AS FOLLOWS:

- (1) (a) The Guarantor unconditionally and irrevocably guarantees to the holder of each Note (which expression shall include any Temporary Global Note or Permanent Global Note representing Notes) (each a "**Holder**"), now or at any time hereafter issued by Finance under the Programme, the due and punctual payment of the principal of, and interest on, the Notes and any other amounts which may be expressed to be payable under any Note in accordance with the Terms and Conditions, as and when the same shall become due in accordance with the Terms and Conditions.
- (b) This Guarantee constitutes an unconditional, unsecured and unsubordinated obligation of the Guarantor and ranks *pari passu* with all other unsecured and unsubordinated obligations of the Guarantor from time to time outstanding.
- (c) All payments under this Guarantee shall be made without deduction or withholding for or on account of any present or future taxes, duties or governmental charges of any nature whatsoever imposed, levied or collected by or in or on behalf of the Federal Republic of Germany or by or on behalf of any political subdivision or authority therein having power to tax (hereinafter together called "**Withholding Taxes**"), unless such deduction or withholding is required by law. In such event, the Guarantor shall pay such additional amounts as may be necessary in order that the net amounts received by the Holder after such deduction or withholding shall equal the respective amounts of principal and interest which would have been receivable had no such deduction or withholding been required. No such additional amounts shall, however, be payable on account of any taxes, duties or governmental charges which
- (i) are payable by any person acting as custodian bank or collecting agent on behalf of a Holder, or otherwise in any manner which does not constitute a deduction or withholding by the Guarantor from payments made by it; or
- (ii) are payable by reason of the Holder having, or having had, some personal or business connection with the Federal Republic of Germany and not merely by reason of the fact that payments in respect of the Notes are, or for

- purposes of taxation are deemed to be, derived from sources in, or are secured in the Federal Republic of Germany; or
- (iii) are deducted or withheld pursuant to (x) any European Union directive or regulation concerning the taxation of interest income, or (y) any international treaty or understanding relating to such taxation and to which the Federal Republic of Germany or the European Union is a party, or (z) any provision of law implementing, or complying with, or introduced to conform with such directive, regulation, treaty or understanding; or
 - (iv) are payable by reason of a change in law that becomes effective more than 30 days after the relevant payment of principal or interest becomes due, or is duly provided for and notice thereof is published in accordance with the Terms and Conditions whichever occurs later.
- (d) The obligations of the Guarantor under this Guarantee (i) shall be separate and independent from the obligations of Finance under the Notes, (ii) shall exist irrespective of the legality, validity and binding effect or enforceability of the Notes, and (iii) shall not be affected by any event, condition or circumstance of whatever nature, whether factual or legal, save the full, definitive and irrevocable satisfaction of any and all payment obligations expressed to be assumed under the Notes.
 - (e) The obligations of the Guarantor under this Guarantee shall, without any further act or thing being required to be done or to occur, extend to the obligations of any Substituted Debtor which is not the Guarantor arising in respect of any Note by virtue of a substitution pursuant to the Terms and Conditions.
 - (f) This Guarantee is given in respect of any and all Notes which are or will be issued by Finance under the Programme on or after the date hereof. The Guarantee dated 31 October 1997 extends to any and all Notes which have been issued by Finance during the period beginning on 31 October 1997 through 9 November 1999. The Guarantee dated 10 November 1999 extends to any and all Notes which have been issued by Finance during the period beginning on 10 November 1999 through 5 June 2001. The Guarantee dated 6 June 2001 extends to any and all Notes which have been issued by Finance on or after 6 June 2001 and prior to the date hereof. The Guarantee dated 1 September 2005 extends to any and all Notes which have been issued by Finance on or after 1 September 2005 and prior to the date hereof.

(2) The Guarantor undertakes towards each Holder, so long as any of the Notes remains outstanding, but only up to the time all amounts of principal and interest have been placed at the disposal of the Fiscal Agent, not to grant or permit to subsist any encumbrance over any or all of its present or future assets, as security of any present or future Capital Market Indebtedness issued or guaranteed by the Guarantor or by any other person, without at the same time having the Holders share equally and rateably in such security. "**Capital Market Indebtedness**" means any obligation for the payment of borrowed money which is in the form of, or represented or evidenced by, a certificate of indebtedness or in the form of, or represented or evidenced by, bonds, notes or other securities which are, or are capable of being, quoted, listed, dealt in or traded on a stock exchange or other recognised securities market. For the purposes of avoiding any doubt in respect of asset-backed financings originated by the Guarantor, the expression "assets" as used in this subparagraph (2) does not include assets of the Guarantor that are sold on a non-recourse basis determined in accordance with the civil law applicable to such transaction.

(3) This Agreement and all undertakings herein contained constitute a contract for the benefit of the Holders from time to time as third party beneficiaries pursuant to § 328 (1) of the German Civil Code. They give rise to the right of each such Holder to require performance of the obligations undertaken herein directly from the Guarantor and to enforce such obligations directly against the Guarantor.

(4) Deutsche Bank Aktiengesellschaft does not act as fiduciary or in any similar capacity for the Holders.

(5) Terms used in this Agreement and not otherwise defined herein shall have the meanings attributed to them in the Terms and Conditions.

(6) This Agreement shall be governed by, and construed in accordance with, German law.

(7) This Agreement is written in the English language and attached hereto is a non-binding German language translation.

(8) The original version of this Agreement shall be delivered to, and kept by, Deutsche Bank Aktiengesellschaft.

(9) The place of jurisdiction for all legal proceedings arising out of or in connection with this Agreement shall be Frankfurt am Main. Each Holder, however, may pursue his claims also before any other court of competent jurisdiction.

(10) Each Holder may in any legal proceedings against the Guarantor or to which such Holder and the Guarantor are parties protect and enforce in his own name his rights arising under this Agreement on the basis of a copy of this Agreement certified as being a true copy by a duly authorised officer of Deutsche Bank Aktiengesellschaft, without the need for production in such proceedings of this Guarantee.

Garantie
und
Negativverpflichtung
der
DEUTSCHE TELEKOM AG
Bonn, Bundesrepublik Deutschland,
zugunsten der Gläubiger von Schuldverschreibungen (die "**Schuldverschreibungen**"),
die von der
Deutsche Telekom International Finance B.V.
(einer mit beschränkter Haftung in den Niederlanden errichteten Gesellschaft)
im Rahmen des Debt Issuance Programme (das "**Programm**")
in seiner jeweils geltenden Fassung begeben werden.

IM HINBLICK DARAUF DASS:

(A) Deutsche Telekom AG (die "**Garantin**") und Deutsche Telekom International Finance B.V. ("**Finance**") beabsichtigt, von Zeit zu Zeit Schuldverschreibungen im Rahmen des Programms zu begeben;

(B) die Garantin die Zahlung von Kapital und Zinsen sowie von allen sonstigen Beträgen, die aufgrund der von Finance im Rahmen des Programms begebenen Schuldverschreibungen zu leisten sind, garantieren möchte;

(C) die Garantin gegenüber jedem Gläubiger der von Finance im Rahmen des Programms begebenen Schuldverschreibungen eine Negativverpflichtung eingehen möchte;

WIRD FOLGENDES VEREINBART:

- (1) (a) Die Garantin übernimmt gegenüber jedem Gläubiger ("**Gläubiger**") der Schuldverschreibungen (wobei dieser Begriff jede vorläufige oder Dauerglobalurkunde, die Schuldverschreibungen verbrieft, einschließt), die jetzt oder zu irgendeinem Zeitpunkt nach dem Datum dieser Garantie von Finance im Rahmen des Programms begeben werden, die unbedingte und unwiderrufliche Garantie für die ordnungsgemäße und pünktliche Zahlung von Kapital und Zinsen auf die Schuldverschreibungen sowie von allen sonstigen Beträgen, die gemäß den Anleihebedingungen auf Schuldverschreibungen zahlbar sind, bei deren Fälligkeit gemäß den Anleihebedingungen.
- (b) Diese Garantie begründet eine unbedingte, unbesicherte und nicht nachrangige Verbindlichkeit der Garantin, die mit allen anderen jeweils bestehenden, nicht besicherten und nicht nachrangigen Verbindlichkeiten der Garantin gleichrangig ist.
- (c) Sämtliche Zahlungen aufgrund dieser Garantie sind ohne Abzug oder Einbehalt wegen gegenwärtiger oder zukünftiger Steuern, Abgaben oder amtlicher Gebühren gleich welcher Art zu leisten, die von oder in der Bundesrepublik Deutschland oder für deren Rechnung oder von oder für Rechnung einer dort zur Steuererhebung ermächtigten Gebietskörperschaft oder Behörde auferlegt, erhoben oder eingezogen werden (nachstehend zusammen "**Quellensteuern**" genannt), es sei denn, ein solcher Abzug oder Einbehalt ist gesetzlich vorgeschrieben. In diesem letzteren Fall wird die Garantin die zusätzlichen Beträge zahlen, die erforderlich sind, damit der dem Gläubiger nach diesem Abzug oder Einbehalt zufließende Nettobetrag jeweils den Beträgen an Kapital und Zinsen entspricht, die ihm zustehen würden, wenn der Abzug oder Einbehalt nicht erforderlich wäre. Solche zusätzlichen Beträge sind jedoch nicht zahlbar wegen Steuern, Abgaben oder amtlicher Gebühren, die

- (i) von einer als Depotbank oder Inkassobeauftragter des Gläubigers handelnden Person oder sonst auf andere Weise zu entrichten sind als dadurch, dass die Garantin aus den von ihr zu leistenden Zahlungen einen Abzug oder Einbehalt vornimmt; oder
 - (ii) wegen gegenwärtiger oder früherer persönlicher oder geschäftlicher Beziehungen des Gläubigers zu der Bundesrepublik Deutschland zu zahlen sind, und nicht allein deshalb, weil Zahlungen auf die Schuldverschreibungen aus Quellen in der Bundesrepublik Deutschland stammen (oder für Zwecke der Besteuerung so behandelt werden) oder dort besichert sind; oder
 - (iii) aufgrund (x) einer Richtlinie oder Verordnung der Europäischen Union betreffend die Besteuerung von Zinserträgen oder (y) einer zwischenstaatlichen Vereinbarung über deren Besteuerung, an der die Bundesrepublik Deutschland oder die Europäische Union beteiligt ist, oder (z) einer gesetzlichen Vorschrift, die diese Richtlinie, Verordnung oder Vereinbarung umsetzt oder befolgt, abzuziehen oder einzubehalten sind; oder
 - (iv) aufgrund einer Rechtsänderung zahlbar sind, die später als 30 Tage nach Fälligkeit der betreffenden Zahlung von Kapital oder Zinsen oder, wenn dies später erfolgt, ordnungsgemäßer Bereitstellung aller fälligen Beträge und einer diesbezüglichen Bekanntmachung gemäß den Anleihebedingungen wirksam wird.
- (d) Die Verpflichtungen der Garantin aus dieser Garantie (i) sind selbständig und unabhängig von den Verpflichtungen der Finance aus den Schuldverschreibungen (ii) bestehen unabhängig von der Rechtmäßigkeit, Gültigkeit, Verbindlichkeit und Durchsetzbarkeit der Schuldverschreibungen und (iii) werden nicht durch Ereignisse, Bedingungen oder Umstände tatsächlicher oder rechtlicher Art berührt, außer durch die vollständige, endgültige und unwiderrufliche Erfüllung sämtlicher in den Schuldverschreibungen eingegangenen Zahlungsverpflichtungen.
- (e) Die Verpflichtungen der Garantin aus dieser Garantie erstrecken sich, ohne dass eine weitere Handlung vorgenommen wird oder ein weiterer Umstand eintreten muss, auf die Verpflichtungen einer nicht mit der Garantin identischen Nachfolgeschuldnerin, die infolge einer Schuldnerersetzung gemäß den Anleihebedingungen in Bezug auf die Schuldverschreibungen entstehen.
- (f) Diese Garantie erstreckt sich auf sämtliche Schuldverschreibungen, die am oder nach dem Datum dieser Garantie von Finance unter dem Programm begeben werden. Die Garantie mit Datum vom 31. Oktober 1997 gilt für sämtliche Schuldverschreibungen, die von Finance in der Zeit vom 31. Oktober 1997 bis zum 9. November 1999 begeben worden sind. Die Garantie mit Datum vom 10. November 1999 gilt für sämtliche Schuldverschreibungen, die von Finance in der Zeit vom 10. November 1999 bis zum 5. Juni 2001 begeben worden sind. Die Garantie mit Datum vom 6. Juni 2001 gilt für sämtliche Schuldverschreibungen, die von Finance am oder nach dem 6. Juni 2001 und vor dem Datum dieser Garantie begeben worden sind. Die Garantie mit Datum vom 1. September 2005 gilt für sämtliche Schuldverschreibungen, die von Finance am oder nach dem 1. September 2005 und vor dem Datum dieser Garantie begeben worden sind.

(2) Die Garantin verpflichtet sich gegenüber jedem Gläubiger, solange Schuldverschreibungen ausstehen, jedoch nur bis zu dem Zeitpunkt, an dem alle Beträge an Kapital und Zinsen dem Fiscal Agent zur Verfügung gestellt worden sind, weder ihr gegenwärtiges noch ihr zukünftiges Vermögen ganz oder teilweise in irgendeiner Weise zur Besicherung einer gegenwärtigen oder zukünftigen Kapitalmarktverbindlichkeit, die von der Garantin oder einer anderen Person eingegangen oder gewährleistet ist, zu belasten oder eine solche Belastung zu diesem Zweck bestehen zu lassen, ohne gleichzeitig die Gläubiger an derselben Sicherheit im gleichen Rang und gleichem Verhältnis teilnehmen zu lassen. "**Kapitalmarktverbindlichkeit**" ist jede Verbindlichkeit zur Zahlung aufgenommener Gelder, die durch Schuldscheine verbrieft, verkörpert oder dokumentiert ist oder durch Schuldverschreibungen oder sonstige Wertpapiere, die an einer Börse oder an einem anderen anerkannten Wertpapiermarkt notiert oder gehandelt werden oder werden können. Um etwaige Zweifel bezüglich von asset-backed financings der Garantin zu vermeiden, schließt das in diesem

Absatz (2) benutzte Wort "*Vermögen*" nicht solche Vermögensgegenstände der Garantin ein, die nach dem jeweils auf die Transaktion anwendbaren Zivilrecht ohne Rückgriffsmöglichkeiten veräußert sind.

(3) Dieser Vertrag und alle darin enthaltenen Vereinbarungen stellen einen Vertrag zugunsten der Gläubiger als begünstigte Dritte gemäß § 328 Absatz 1 BGB dar. Sie begründen das Recht eines jeden Gläubigers, die Erfüllung der hierin eingegangenen Verpflichtungen unmittelbar von der Garantin zu fordern und diese Verpflichtungen unmittelbar gegenüber der Garantin durchzusetzen.

(4) Die Deutsche Bank Aktiengesellschaft handelt nicht als Treuhänder oder in einer ähnlichen Eigenschaft für die Gläubiger.

(5) Die in diesem Vertrag verwendeten und darin nicht anders definierten Begriffe haben die ihnen in den Anleihebedingungen zugewiesene Bedeutung.

(6) Dieser Vertrag unterliegt deutschem Recht.

(7) Dieser Vertrag ist in englischer Sprache abgefasst und ihm ist eine unverbindliche Übersetzung in die deutsche Sprache beigelegt.

(8) Das Original dieses Vertrages wird der Deutsche Bank Aktiengesellschaft ausgehändigt und von dieser verwahrt.

(9) Gerichtsstand für alle Rechtsstreitigkeiten aus oder im Zusammenhang mit diesem Vertrag ist Frankfurt am Main. Jeder Gläubiger kann seine Ansprüche jedoch auch vor jedem anderen zuständigen Gericht geltend machen.

(10) Jeder Gläubiger kann in jedem Rechtsstreit gegen die Garantin und in jedem Rechtsstreit, in dem er und die Garantin Partei sind, seine Rechte aus diesem Vertrag auf der Grundlage einer von einer vertretungsberechtigten Person der Deutsche Bank Aktiengesellschaft beglaubigten Kopie dieses Vertrages ohne Vorlage des Originals im eigenen Namen wahrnehmen und durchsetzen.

A. Essential information
Grundlegende Angaben

Interests of natural and legal persons involved in the issue/offer
Interessen von Seiten natürlicher und juristischer Personen, die an der Emission/dem Angebot beteiligt sind

- ☐ As far as the Issuer is aware, no person involved in the offer of the Notes has an interest material to the offer, except that certain Dealers and their affiliates may be customers of, and borrowers from the Issuer and its affiliates. In addition, certain Dealers and their affiliates have engaged, and may in the future engage, in investment banking and/or commercial banking transactions with, and may perform services for the Issuer and its affiliates in the ordinary course of business.
Nach Kenntnis der Emittentin bestehen bei den an der Emission beteiligten Personen keine Interessen, die für das Angebot bedeutsam sind, außer, dass bestimmte Platzeure und mit ihnen verbundene Unternehmen Kunden von und Kreditnehmer der Emittentin und mit ihr verbundener Unternehmen sein können. Außerdem sind bestimmte Platzeure an Investment Banking Transaktionen und/oder Commercial Banking Transaktionen mit der Emittentin beteiligt, oder könnten sich in Zukunft daran beteiligen, und könnten im gewöhnlichen Geschäftsverkehr Dienstleistungen für die Emittentin und mit ihr verbundene Unternehmen erbringen.

¹³ To be determined in consultation with the Issuer. In the case of Notes in bearer form publicly offered, in whole or in part, in the Federal Republic of Germany, or distributed, in whole or in part, to non-qualified investors in the Federal Republic of Germany, German will be the controlling language. If, in the event of such public offer or distribution to non-qualified investors, however, English is chosen as the controlling language, a German language translation of the Conditions will be available from the principal office of Deutsche Telekom AG, Friedrich Ebert-Allee 140, 63105 Bonn, Federal Republic of Germany.

In Abstimmung mit der Emittentin festzulegen. Falls Inhaberschuldverschreibungen insgesamt oder teilweise öffentlich zum Verkauf in der Bundesrepublik Deutschland angeboten oder an nicht qualifizierte Investoren in der Bundesrepublik Deutschland verkauft werden, wird die deutsche Sprache maßgeblich sein. Falls bei einem solchen öffentlichen Verkaufsangebot oder Verkauf an nicht qualifizierte Investoren die englische Sprache als maßgeblich bestimmt wird, wird eine deutschsprachige Übersetzung der Bedingungen bei der Hauptgeschäftsstelle der Deutsche Telekom AG, Friedrich Ebert-Allee 140, 63105 Bonn, Bundesrepublik Deutschland erhältlich sein.

Eurosystem eligibility
EZB-Fähigkeit

- ☐ Intended to be held in a manner which would allow Eurosystem eligibility (NGN)¹⁷
Soll in EZB-fähiger Weise gehalten werden (NGN)

[Note that the ticked box in the case of an NGN means that the Notes are intended upon issue to be deposited with one of the ICSDs as common safekeeper and does not necessarily mean that the Notes will be recognised as eligible collateral for Eurosystem monetary policy and intra-day credit operations by the Eurosystem either upon issue or at any or all times during their life. Such recognition will depend upon satisfaction of the Eurosystem eligibility criteria.]

[Whilst this box is not ticked at the date of these Final Terms, should the Eurosystem eligibility criteria be amended in the future such that the Notes are capable of meeting them the Notes in the case of an NGN may then be deposited with one of the ICSDs as common safekeeper. Note that this does not necessarily mean that the Notes will then be recognised as eligible collateral for Eurosystem monetary policy and intra day credit operations by the Eurosystem at any time during their life. Such recognition will depend upon the ECB being satisfied that Eurosystem eligibility criteria have been met.]

[Es wird darauf hingewiesen, dass das Häkchen in dem Kästchen im Fall einer NGN hier lediglich bedeutet, dass die Schuldverschreibungen nach ihrer Begebung bei einem der ICSDs als gemeinsamen Verwahrer verwahrt werden; es bedeutet nicht notwendigerweise, dass die Schuldverschreibungen bei ihrer Begebung, zu irgendeinem Zeitpunkt während ihrer Laufzeit oder während ihrer gesamten Laufzeit als zulässige Sicherheiten für die Zwecke der Geldpolitik oder für Innertageskredite des Eurosystems anerkannt werden. Eine solche Anerkennung ist abhängig davon, ob die Zulassungskriterien des Eurosystems erfüllt sind.]

[Auch wenn kein Häkchen in dieser Box mit Datum dieser Endgültigen Bedingungen gesetzt wurde, sollten die Zulassungskriterien des Eurosystems sich zukünftig dergestalt ändern, dass die Schuldverschreibungen diese erfüllen können, könnten die Schuldverschreibungen im Fall einer NGN dann bei einem der ICSDs als gemeinsamen Verwahrer verwahrt werden. Es wird darauf hingewiesen, dass dies jedoch nicht notwendigerweise bedeutet, dass die Schuldverschreibungen dann zu irgendeinem Zeitpunkt während ihrer Laufzeit als zulässige Sicherheiten für die Zwecke der Geldpolitik oder für Innertageskredite des Eurosystems anerkannt werden. Eine solche Anerkennung ist abhängig davon, ob die Zulassungskriterien des Eurosystems erfüllt sind.]

¹⁵ If reasons for the offer are different from making profit and/or hedging certain risks include those reasons here. Not to be completed in case of Notes with a Specified Denomination of at least EUR 100,000.

Sofern die Gründe für das Angebot nicht in der Gewinnerzielung und/oder der Absicherung bestimmter Risiken bestehen, sind die Gründe hier anzugeben. Nicht auszufüllen bei Schuldverschreibungen mit einer festgelegten Stückelung von mindestens EUR 100.000.

¹⁶ If proceeds are intended for more than one use will need to split out and present in order of priority. *Sofern die Erträge für verschiedene Verwendungszwecke bestimmt sind, sind diese aufzuschlüsseln und nach der Priorität der Verwendungszwecke darzustellen.*

¹⁷ If selected, the Notes must be issued in NGN form and are to be kept in custody by an ICSD as common safekeeper. *Falls gewählt, müssen die Schuldverschreibungen in Form einer NGN begeben und von einem ICSD als common safekeeper gehalten werden.*

Taxation

The following is a general discussion of certain German, Dutch, Luxembourg, UK, Irish and Austrian tax consequences of the acquisition and ownership of Notes. This discussion does not purport to be a comprehensive description of all tax considerations which may be relevant to a decision to purchase Notes. In particular, this discussion does not consider any specific facts or circumstances that may apply to a particular purchaser. Moreover, this summary does not consider other taxes than taxes on income, in particular not inheritance or gift tax. This summary is based on the laws of Germany, The Netherlands, the Grand-Duchy of Luxembourg, the United Kingdom of Great Britain and Northern Ireland, the Republic of Ireland and the Republic of Austria currently in force and as applied on the date of this prospectus, which are subject to change, possibly with retroactive or retrospective effect.

PROSPECTIVE PURCHASERS OF NOTES ARE ADVISED TO CONSULT THEIR OWN TAX ADVISORS AS TO THE TAX CONSEQUENCES OF THE PURCHASE, OWNERSHIP AND DISPOSITION OF NOTES, INCLUDING THE EFFECT OF ANY STATE OR LOCAL TAXES, UNDER THE TAX LAWS OF GERMANY, THE NETHERLANDS, THE GRAND DUCHY OF LUXEMBOURG, THE UNITED KINGDOM OF GREAT BRITAIN AND NORTHERN IRELAND, THE REPUBLIC OF IRELAND, THE REPUBLIC OF AUSTRIA AND EACH COUNTRY OF WHICH THEY ARE RESIDENTS.

1. Germany

Income Tax

Notes held by Tax Residents as Private Assets

- Taxation of Interest

Payments of interest on the Notes to Holders who are tax residents of Germany (*i.e.*, persons whose residence or habitual abode is located in Germany) are subject to German income tax. In each case where German income tax arises, a solidarity surcharge (*Solidaritätszuschlag*) is levied in addition. Furthermore, church tax may be levied, where applicable. If coupons or interest claims are disposed of separately (*i.e.* without the Notes), the proceeds from the disposition are subject to income tax. The same applies to proceeds from the redemption of coupons or interest claims if the Note is disposed of separately.

On payments of interest on the Notes to individual tax residents of Germany income tax is generally levied as a flat income tax at a rate of 25 percent (plus solidarity surcharge in an amount of 5.5 percent of such tax, resulting in a total tax charge of 26.375 percent, plus, if applicable, church tax). As from 1 January 2015, the church tax is generally levied by way of withholding unless the Holder has filed a blocking notice (*Sperrvermerk*) with the German Federal Tax Office (*Bundeszentralamt für Steuern*). The total investment income of an individual will be decreased by a lump sum deduction (*Sparer-Pauschbetrag*) of EUR 801 (EUR 1,602 for married couples filing jointly), not by a deduction of expenses actually incurred.

If the Notes are held in a custodial account which the Holder maintains with a German branch of a German or non-German bank or financial services institution or with a securities trading business or bank in Germany (the "**Disbursing Agent**") the flat income tax will be levied by way of withholding at the aforementioned rate from the gross interest payment to be made by the Disbursing Agent.

In general, no withholding tax will be levied if the Holder is an individual (i) whose Note does not form part of the property of a trade or business and (ii) who filed a withholding exemption certificate (*Freistellungsauftrag*) with the Disbursing Agent but only to the extent the interest income derived from the Note together with other investment income does not exceed the maximum exemption amount shown on the withholding exemption certificate. Similarly, no withholding tax will be deducted if the Holder has submitted to the Disbursing Agent a certificate of non-assessment (*Nichtveranlagungs-Bescheinigung*) issued by the relevant local tax office.

If no Disbursing Agent (as defined above) is involved in the payment process the Holder will have to include its income on the Notes in its tax return and the flat income tax of 25 percent plus solidarity surcharge and, if applicable, church tax will be collected by way of assessment.

Payment of the flat income tax will generally satisfy any income tax liability (including solidarity surcharge and, if applicable, church tax) of the Holder in respect of such investment income. Holders may apply for a tax assessment on the basis of general rules applicable to them if the resulting income tax burden is lower than 25 percent. In this case as well income-related expenses cannot be deducted from the investment income, except for the aforementioned annual lump sum deduction.

- Taxation of capital gains

From 1 January 2009, also capital gains realised by individual tax residents of Germany from the disposition or redemption of the Notes acquired after 31 December 2008 will be subject to the flat income tax on investment income at a rate of 25 percent (plus solidarity surcharge in an amount of 5.5 percent of such tax, resulting in a total tax charge of 26.375 percent, plus, if applicable, church tax), irrespective of any holding period. As from 1 January 2015, the church tax is generally levied by way of withholding unless the Holder has filed a blocking notice with the German Federal Tax Office. This will also apply to Notes on which the principal is effectively repaid in whole or in part although the repayment was not guaranteed.

If the Notes are held in a custodial account which the Holder maintains with a Disbursing Agent (as defined above) the flat income tax will be levied by way of withholding from the difference between the redemption amount (or the proceeds from the disposition) and the issue price (or the purchase price) of the Notes. If the Notes have been transferred into the custodial account of the Disbursing Agent only after their acquisition, and no evidence on the acquisition data has been provided to the new Disbursing Agent by the Disbursing Agent which previously kept the Notes in its custodial account, withholding tax will be levied on 30 percent of the proceeds from the disposition or redemption of the Notes.

If no Disbursing Agent is involved in the payment process the Holder will have to include capital gains from the disposition or redemption of the Notes in its tax return and the flat income tax of 25 percent plus solidarity surcharge and, if applicable, church tax will be collected by way of assessment.

Payment of the flat income tax will generally satisfy any income tax liability (including solidarity surcharge and, if applicable, church tax) of the Holder in respect of such investment income. Holders may apply for a tax assessment on the basis of general rules applicable to them if the resulting income tax burden is lower than 25 percent. In this case as well income-related expenses cannot be deducted from the investment income, except for the aforementioned annual lump sum deduction.

Notes held by tax Residents as business assets

Payments of interest on Notes and capital gains from the disposition or redemption of Notes held as business assets by German tax resident individuals or corporations (including via a partnership, as the case may be), are generally subject to German income tax or corporate income tax (in each case plus solidarity surcharge and, if applicable, church tax). The interest and capital gain will also be subject to trade tax if the Notes form part of the property of a German trade or business.

If the Notes are held in a custodial account which the Holder maintains with a Disbursing Agent (as defined above) tax at a rate of 25 percent (plus a solidarity surcharge of 5.5 percent of such tax and, if applicable, church tax) will also be withheld from interest payments on Notes and (since 1 January 2009) generally also from capital gains from the disposition or redemption of Notes held as business assets. In these cases the withholding tax does not satisfy the income tax liability of the Holder, as in the case of the flat income tax, but will be credited as advance payment against the personal income or corporate income tax liability and the solidarity surcharge (and, if applicable, against the church tax) of the Holder. Pursuant to the senior official's draft (*Referentenentwurf*) of an Act to Reform German Investment Taxation (*Investmentsteuerreformgesetz*), it shall not be possible to credit withholding tax levied on investment income if this would lead to a circumvention of taxes.

With regard to capital gains no withholding will generally be required in the case of Notes held by corporations resident in Germany, provided that in the case of corporations of certain legal forms the status of corporation has been evidenced by a certificate of the competent tax office, and upon application in the case of Notes held by individuals or partnerships as business assets.

Notes held by non-residents

Interest and capital gains are not subject to German taxation in the case of non-residents, *i.e.* persons having neither their residence nor their habitual abode nor legal domicile nor place of effective

management in Germany, unless the Notes form part of the business property of a permanent establishment maintained in Germany. Interest may, however, also be subject to German income tax if it otherwise constitutes income taxable in Germany, such as income from the letting and leasing of certain German-situs property or income from certain capital investments directly or indirectly secured by German situs real estate.

Non-residents of Germany are in general exempt from German withholding tax on interest and capital gains and from solidarity surcharge thereon. However, if the interest or capital gain is subject to German taxation as set forth in the preceding paragraph and the Notes are held in a custodial account with a Disbursing Agent (as defined above), withholding tax will be levied as explained above at "*Notes held by tax residents as business assets*" or at "*Notes held by tax residents as private assets*", respectively.

Inheritance and Gift Tax

No inheritance or gift taxes with respect to any Note will generally arise under the laws of Germany, if, in the case of inheritance tax, neither the decedent nor the beneficiary, or, in the case of gift tax, neither the donor nor the donee, is a resident of Germany and such Note is not attributable to a German trade or business for which a permanent establishment is maintained, or a permanent representative has been appointed, in Germany. Exceptions from this rule apply to certain German citizens who previously maintained a residence in Germany.

Other Taxes

No stamp, issue, registration or similar taxes or duties will be payable in Germany in connection with the issuance, delivery or execution of the Notes. Currently, net assets tax (*Vermögensteuer*) and financial transaction tax (*Finanztransaktionssteuer*) is not levied in Germany.

2. The Netherlands

For the purpose of this summary it is assumed that a holder of a Note, being an individual or a non-resident entity, does not have or will have a substantial interest, or - in the case of a holder of a Note being an entity - a deemed substantial interest, in the Issuer and that no connected person (*verbonden persoon*) to the holder of a Note has or will have a substantial interest in the Issuer.

Generally speaking, an individual holding a Note has a substantial interest in the Issuer if (a) such individual, either alone or together with his partner, directly or indirectly has, or (b) certain relatives of such individual or his partner directly or indirectly have or are deemed to have, (i) the ownership of, a right to acquire the ownership of, or certain rights over, shares representing 5 percent or more of either the total issued and outstanding capital of the Issuer or the issued and outstanding capital of any class of shares of the Issuer, or (ii) the ownership of, or certain rights over, profit participating certificates (*winstbewijzen*) that relate to 5 percent or more of either the annual profit or the liquidation proceeds of the Issuer.

Generally speaking, a non-resident entity holding a Note has a substantial interest in the Issuer if such entity, directly or indirectly has (i) the ownership of, a right to acquire the ownership of, or certain rights over, shares representing 5 percent or more of either the total issued and outstanding capital of the Issuer or the issued and outstanding capital of any class of shares of the Issuer, or (ii) the ownership of, or certain rights over, profit participating certificates (*winstbewijzen*) that relate to 5 percent or more of either the annual profit or the liquidation proceeds of the Issuer. An entity holding a Note has a deemed substantial interest in the Issuer if such entity has disposed of or is deemed to have disposed of all or part of a substantial interest on a non-recognition basis.

For the purpose of this summary, the term "entity" means a corporation as well as any other person that is taxable as a corporation for Dutch corporate tax purposes.

Where this summary refers to "The Netherlands" or "Dutch", it refers only to the European part of the Kingdom of the Netherlands.

Where this summary refers to a holder of a Note, an individual holding a Note or an entity holding a Note, such reference is restricted to an individual or entity holding legal title to as well as an economic interest in such Note or otherwise being regarded as owning a Note for Dutch tax purposes. It is noted

that for purposes of Dutch income, corporate, gift and inheritance tax, assets legally owned by a third party such as a trustee, foundation or similar entity, may be treated as assets owned by the (deemed) settlor, grantor or similar originator or the beneficiaries in proportion to their interest in such arrangement.

Withholding Tax

All payments made by the Issuer of interest and principal under the Notes can be made free of withholding or deduction of any taxes of whatsoever nature imposed, levied, withheld or assessed by The Netherlands or any political subdivision or taxing authority thereof or therein, unless the Notes qualify as debt that effectively functions as equity for purposes of article 10, paragraph 1, sub d of the Corporate Tax Act (*Wet op de vennootschapsbelasting 1969*).

Taxes on Income and Capital Gains

Residents

- Resident entities

An entity holding a Note which is, or is deemed to be, resident in The Netherlands for corporate tax purposes and which is not tax exempt, will generally be subject to corporate tax in respect of income or a capital gain derived from a Note at the prevailing statutory rates.

- Resident individuals

An individual holding a Note who is and is deemed to be resident in The Netherlands for income tax purposes will be subject to income tax in respect of income or a capital gain derived from a Note at rates up to 52 percent if:

- (i) the income or capital gain is attributable to an enterprise from which the holder derives profits (other than as a shareholder); or
- (ii) the income or capital gain qualifies as income from miscellaneous activities (*belastbaar resultaat uit overige werkzaamheden*) as defined in the Income Tax Act (*Wet inkomstenbelasting 2001*), including, without limitation, activities that exceed normal, active asset management (*normaal, actief vermogensbeheer*).

If neither condition (i) nor (ii) applies, an individual holding a Note will be subject to income tax on the basis of a deemed return, regardless of any actual income or capital gain derived from a Note. The deemed return amounts to 4 percent of the value of the individual's net assets as at 1 January of the relevant fiscal year (including the Note). Subject to application of certain allowances, the deemed return will be taxed at a rate of 30 percent. As per 1 January 2017 the rate of 4 percent will be replaced by variable progressive rates. For the year 2017 the rates are set from 2.9 to 5.5 percent. The applicable rates will be updated annually on the basis of historic market yields.

Non-residents

A holder of a Note which is not and is not deemed to be resident in The Netherlands for the relevant tax purposes will not be subject to taxation on income or a capital gain derived from a Note unless:

- (i) the income or capital gain is attributable to an enterprise or part thereof which is either effectively managed in The Netherlands or carried on through a permanent establishment (*vaste inrichting*) or permanent representative (*vaste vertegenwoordiger*) in The Netherlands and the holder of a Note derives profits from such enterprise (other than by way of securities); or
- (ii) the holder is an individual and the income or capital gain qualifies as income from miscellaneous activities (*belastbaar resultaat uit overige werkzaamheden*) in The Netherlands as defined in the Income Tax Act (*Wet inkomstenbelasting 2001*), including, without limitation, activities that exceed normal, active asset management (*normaal, actief vermogensbeheer*).

Gift and Inheritance Taxes

Dutch gift or inheritance taxes will not be levied on the occasion of the transfer of a Note by way of gift by, or on the death of, a holder of a Note, unless:

- (i) the holder of a Note is, or is deemed to be, resident in The Netherlands for the purpose of the relevant provisions; or
- (ii) the transfer is construed as an inheritance or gift made by, or on behalf of, a person who, at the time of the gift or death, is or is deemed to be resident in The Netherlands for the purpose of the relevant provisions.

Value added Tax

There is no Dutch value added tax payable by a holder of a Note in respect of payments in consideration for the issue of the Notes or in respect of the payment of interest or principal under the Notes, or the transfer of the Notes.

Other Taxes and Duties

The subscription, issue, placement, allotment, delivery or transfer of a Note will not be subject to registration tax, stamp duty or any other similar tax or duty payable in The Netherlands.

Residence

A holder of a Note will not be, or will not be deemed to be, resident in The Netherlands for tax purposes and, subject to the assumptions and exceptions set out above, will not otherwise be subject to Dutch taxation, by reason only of acquiring, holding or disposing of a Note or the execution, performance, delivery and/or enforcement of a Note.

3. Luxembourg

Non-Residents

Under the existing laws of Luxembourg there is no withholding tax on the payment of interest on, or reimbursement of principal of, the Notes made to non-residents of Luxembourg through a paying agent established in Luxembourg.

Since 1 January 2015 the exchange of information procedure provided for under the Luxembourg laws of 21 June 2005 (or the relevant Accords) apply.

Residents

According to the law of 23 December 2005, as amended, interest on Notes paid by a Luxembourg paying agent or paying agents established in the EU, the EEA or in a State which has concluded with Luxembourg an international agreement related to the EU Savings Tax Directive to an individual Holder of Notes who is a resident of Luxembourg or to a residual entity established in another EU Member State or in the dependent and associated territories securing the payment for such individual will be subject to a withholding tax of 10 percent. In case of payment through a paying agent established in the EU, the EEA or in a State which has concluded with Luxembourg an international agreement related to the EU Savings Tax Directive, the Luxembourg resident individual Holder of Notes must under a specific procedure remit 10 percent tax to the Luxembourg Treasury.

If the individual Holder holds the Notes in the course of the management of his or her private wealth, the aforementioned 10 percent withholding tax will operate a full discharge of income tax due on such payments.

Interest on Notes paid by a Luxembourg paying agent to a resident Holder of Notes who is not an individual is not subject to withholding tax.

When used in the preceding paragraphs "*interest*", "*paying agent*" and "*residual entity*" have the meaning given thereto in the Luxembourg laws of 21 June 2005 (or the relevant Accords) and

23 December 2005, as amended. "Interest" will include accrued or capitalised interest at the sale, repayment or redemption of the Notes.

Payments of interest or similar income under the Notes to Clearstream Banking AG, Clearstream Banking, société anonyme and Euroclear Bank SA/NV and payments by or on behalf of Clearstream Banking, société anonyme to financial intermediaries will not give rise to a withholding tax under Luxembourg law.

4. The United Kingdom of Great Britain and Northern Ireland

The comments below, which are of a general nature and are based on the Issuers' understanding of current United Kingdom law and H.M. Revenue & Customs practice, describe only the United Kingdom withholding tax treatment of payments in respect of the Notes. They are not exhaustive. They do not deal with any other United Kingdom taxation implications of acquiring, holding or disposing of the Notes. Prospective holders of Notes who are in any doubt as to their tax position or who may be subject to tax in a jurisdiction other than the United Kingdom are strongly advised to consult their own professional advisers.

Withholding tax

So long as the Notes are and continue to be admitted to trading on the Regulated Market of the Luxembourg Stock Exchange and listed on the official list of the Luxembourg Stock Exchange, payment of interest on the Notes may be made without withholding or deduction for or on account of income tax.

Interest on the Notes may also be paid without withholding or deduction for or on account of tax where at the time the payment is made, the Issuer reasonably believes (and any person by or through whom interest on the Notes is paid reasonably believes) that the beneficial owner of the interest is within the charge to United Kingdom corporation tax as regards the payment of interest, provided H.M. Revenue & Customs has not given a direction that the interest should be paid under deduction of tax.

In other cases, absent any other relief or exemption (such as a direction by H.M. Revenue & Customs that interest may be paid without withholding or deduction for or on account of tax to a specified Holder following an application by that Holder under an applicable double tax treaty), an amount must generally be withheld on account of income tax at the basic rate (currently 20 percent) from payments of interest on the Notes.

Where Notes are issued on terms that a premium is or may be payable on redemption, as opposed to being issued at a discount, then it is possible that any such element of premium may constitute a payment of interest and be subject to withholding on account of income tax as outlined in the preceding paragraphs.

Where Notes are issued at an issue price of less than 100 percent of their principal amount, any payments in respect of the accrued discount element on any such Notes will not be made subject to any withholding or deduction for or on account of income tax as long as they do not constitute payments in respect of interest.

Where interest has been paid under deduction of income tax, Holders who are not resident in the United Kingdom may be able to recover all or part of the tax deducted under an appropriate provision of an applicable double taxation treaty

5. Republic of Ireland

*The following is a summary based on the laws and practices currently in force in Ireland regarding the tax position of investors beneficially owning their notes and should be treated with appropriate caution. Particular rules may apply to certain classes of taxpayers holding notes. The summary does not constitute tax or legal advice and the comments below are of a general nature only. **This summary only relates to the potential application of Irish withholding taxes to payments made under the Notes.** It does not deal with any other matters and in particular does not describe the taxation consequences for Irish resident or ordinarily resident Noteholders in respect of the purchase, holding, redemption or sale of the notes and the receipt of interest thereon. The comments are made on the assumption that the Issuers are not resident in Ireland for Irish tax purposes and do not carry on a trade in Ireland through a branch or agency. Prospective investors in the notes should consult their*

professional advisors on the tax implications of the purchase, holding, redemption or sale of the Notes and the receipt of interest thereon under the laws of their country of residence, citizenship or domicile.

Irish Withholding Tax

Under Irish tax law there is no obligation on the Issuers to operate any withholding tax on payments of interest on the Notes except where the interest has an Irish source and is annual in nature. The interest could be considered to have an Irish source, where, for example, interest is paid out of funds maintained in Ireland or where the Notes are secured on Irish situate assets. The mere offering of the Notes to Irish investors will not cause the interest to have an Irish source.

In certain circumstances, collection agents and other persons receiving interest on the Notes in Ireland on behalf of a Noteholder, will be obliged to operate a withholding tax.

Provision of Information

Noteholders should be aware that where any interest or other payment on Notes is paid to them by or through an Irish paying agent or collection agent then the relevant person may be required to supply the Irish Revenue Commissioners with details of the payment and certain details relating to the Noteholder. Where the Noteholder is not Irish resident, the details provided to the Irish Revenue Commissioners may, in certain cases, be passed by them to the tax authorities of the jurisdiction in which the Noteholder is resident for taxation purposes.

6. Republic of Austria

Income tax

Austrian Resident Taxpayers

Individuals having a domicile or their habitual abode in Austria or corporations having their corporate seat or their place of management in Austria are considered residents for Austrian income and corporate income tax law purposes, respectively.

Individual residents

- Notes held as private assets

Generally income arising with respect to the Notes in the form of either

- (i) fixed or floating interest payments (*Zinserträge*) or
- (ii) realised capital gains (*Einkünfte aus realisierten Wertsteigerungen*)

qualifies as "investment income" (*Einkünfte aus Kapitalvermögen*) and, as such, is taxed under a special regime at a flat rate of 27.5 percent. Realised capital gains are the difference between (a) the amount realised (e.g., the sale proceeds, the redemption or other pay-off amount, or the fair market value in case of a deemed realisation) and (b) the acquisition costs; in both cases (amount realised and acquisition costs) including accrued interest, if any.

For Notes held as private assets, the acquisition costs do not include ancillary acquisition costs (*Anschaffungsnebenkosten*). An average price is determined regarding Notes not acquired at the same time, but held in the same securities account with the same securities identification number. Expenses and costs (*Aufwendungen und Ausgaben*) that are directly connected with investment income are not tax effective.

Capital gains are not only taxed upon an actual disposition or redemption of the Notes, but also upon a deemed realisation.

- A deemed realisation takes place due to a loss of the Austrian taxing right in the Notes (e.g. move abroad, donation to a non-resident, etc.). In case of relocation of the Noteholder to another EU member state the possibility of a tax deferral exists, to be elected for in the tax return of the Noteholder in the year of his or her relocation. If the Notes are held in an Austrian securities account, the Austrian withholding agent (custodian or paying agent) has to impose the withholding tax only upon an actual disposition of the Notes or withdrawal from the account. If the holder of the notes has timely notified the Austrian withholding agent of his or her relocation to another EU Member State, not more than the value increase in the Notes until relocation is subject to Austria withholding tax. An exemption of withholding tax applies in

case of moving to another EU Member State if the Noteholder presents to the Austrian withholding agent a tax assessment notice of the year of migration in which the option for a deferral of tax has been exercised.

- A deemed realisation also takes place upon withdrawals (*Entnahmen*) from an Austrian securities account and other transfers of Notes from one Austrian securities account to another one. Exemptions apply in this case for a transfer of the Notes to another deposit account, if certain information procedures are fulfilled and no loss of the Austrian taxing right occurs (e.g., no donation to a non-resident).

If an Austrian custodian (*inländische depotführende Stelle*, also referred to as "securities account keeping agent") or an Austrian paying agent (*auszahlende Stelle*) is involved in paying investment income (interest or capital gains), 27.5 percent withholding taxation is imposed. The Austrian custodian or paying agent has the responsibility to deduct and pay the withholding tax to the respective tax office.

The withholding tax generally results in a final income taxation; an option to assess the income at the progressive income tax rate exists (in particular for investors whose regular personal income tax rate is lower than 27.5 percent). If no withholding tax is imposed (e.g., because the Notes are held through a foreign paying agent), the investment income arising from the Notes generally has to be included into the income tax return in accordance with the law and will be subject to the special flat tax rate of 27.5 percent.

Losses from Notes held as private assets may only offset other investment income (excluding, *inter alia*, interest income from bank deposits and other claims against banks) and must not offset any other income. Mandatory loss-offsetting rules to be handled by Austrian custodians apply. A carry-forward of losses is not possible in this context.

- Notes held as business assets

Generally, the same rules as described in the previous heading apply regarding Notes that are held as business assets by tax residents who are individuals. The most important differences are the following:

- Realised capital gains, contrary to interest income, have to be included in the annual tax return, since despite a 27.5 percent withholding taxation that is also imposed in the context of Notes held as business assets if an Austrian custodian is involved, no final income taxation applies.
- Write-downs and realised losses regarding the Notes held as business assets may be offset with positive income from realised capital gains that are investment income in the first place; 55 percent of the remaining losses may be offset against other income or carried forward.
- The acquisition costs of Notes held as business assets may also include ancillary costs incurred upon the acquisition.
- Loss off-setting is not made by the custodian, but can only be made in the assessment of the individual.

It is noted that expenses and costs (*Aufwendungen und Ausgaben*) directly connected with investment income are also not tax effective in case the Notes are held as business assets.

- Corporate residents

Corporate investors deriving business income from the Notes may avoid the application of withholding tax by filing a declaration of exemption (*Befreiungserklärung*) with the Austrian withholding tax agent, who has to forward a copy thereof to the finance office. Income derived from the Notes by corporate investors (including any capital gains) is subject to corporate income tax at the general corporate income tax rate of 25 percent.

A special tax regime applies for private foundations (*Privatstiftungen*).

Notes held by non-residents

Individuals who have neither a domicile nor their habitual abode in Austria or corporate investors that have neither their corporate seat nor their place of management in Austria ("*non-residents*") are not

taxable in Austria with their income from the Notes provided the income is not attributable to a permanent establishment in Austria.

Non-resident investors who are resident individuals of an EU Member State and who hold the Notes through an Austrian paying agent have to consider the EU Savings Tax Directive regarding particular withholding tax rules (see in this respect below under the heading "*EU Savings Tax Directive*").

Since 1 January 2015, interest income from the Notes paid to non-resident investors who are individuals and not covered by the EU Savings Tax Directive would be subject to taxation in Austria if withholding taxation fell due, because the interest was paid by an Austrian withholding tax agent (i.e. an Austrian paying agent or an Austrian custodian), and if the debtor of the interest income had its seat or its place of management in Austria. Since the Issuers have their seats and place of management in Germany and The Netherlands, respectively, non-resident investors not covered by the EU Savings Tax Directive are not subject to taxation with interest payments received from the Notes through an Austrian withholding tax agent.

Therefore, such non-resident investors may if they receive income from the Notes through an Austrian withholding tax agent avoid Austrian withholding taxation by way of evidencing their non-resident-status vis-à-vis the withholding tax agent. If Austrian withholding tax is imposed, the investor may apply for a refund thereof.

If non-residents receive income from the Notes through an Austrian permanent establishment, they are to a large extent subject to the same tax treatment as resident investors.

Final note on withholding tax imposed in Austria

Assuming that neither of the Issuers uses a branch or permanent establishment in Austria for the payment of interest under the Notes, neither of the Issuers do assume any responsibility for Austrian withholding tax (*Kapitalertragsteuer*) or EU Withholding Tax (*EU-Quellensteuer*) charged in Austria at source and is not obliged to make additional payments in case of withholding tax deductions at source.

7. EU Savings Tax Directive

Under the EU Council Directive 2003/48/EC dated 3 June 2003 on the taxation of savings income in the form of interest payments (the "**EU Savings Tax Directive**") each EU Member State must require paying agents (within the meaning of such directive) established within its territory to provide to the competent authority of this state details of the payment of interest made to any individual resident in another EU Member State as the beneficial owner of the interest. The competent authority of the EU Member State of the paying agent is then required to communicate this information to the competent authority of the EU Member State of which the beneficial owner of the interest is a resident.

For a transitional period, Austria, Belgium and Luxembourg may opt instead to withhold tax from interest payments within the meaning of the EU Savings Tax Directive at a rate of 20 percent from 1 July 2008, and of 35 percent from 1 July 2011. As from 2010 Belgium and as from 2015 also Luxembourg applies the information procedure described above.

In Germany, provisions for implementing the EU Savings Tax Directive were enacted by legislative regulations of the Federal Government. These provisions apply since 1 July 2005.

On 24 March 2014, the European Council adopted an EU Council Directive amending and broadening the scope of the requirements described above (the "**Amending Directive**"). In particular, the changes expand the range of payments covered by the EU Savings Tax Directive to include certain additional types of income, and widen the range of recipients payments to whom are covered by the EU Savings Tax Directive, to also include (in addition to individuals) certain types of entities and legal arrangements. EU Member States are required to implement national legislation giving effect to these changes by 1 January 2016 (which national legislation must apply from 1 January 2017).

It should, however, be noted that on 10 November 2015 the EU Savings Tax Directive has been repealed from 1 January 2017 in the case of Austria and from 1 January 2016 in the case of all other EU Member States (subject to ongoing requirements to fulfil administrative obligations such as the reporting and exchange of information relating to, and accounting for withholding taxes on, payments made before those dates). This was to prevent an overlap between the EU Savings Tax Directive and a new automatic exchange of information regime to be implemented under EU Council Directive

2011/16/EU (as amended by EU Council Directive 2014/107/EU) on administrative cooperation in the field of taxation. Consequently, the EU Member States are no longer required to apply the new requirements of the Amending Directive.

Holders who are individuals should note that the Issuer will not pay additional amounts under § 7(c) of the Terms and Conditions of the Notes in respect of any withholding tax imposed as a result of the EU Savings Tax Directive.

General Information

General

The relevant Final Terms will specify which clearing system or systems (including CBF, CBL and Euroclear) has/have accepted the relevant Notes for clearance and provide any further appropriate information.

Interest of Natural and Legal Persons involved in the issue of Notes

Certain of the Dealers and their affiliates have engaged, and may in the future engage, in investment banking and/or commercial banking transactions with, and may perform services for, one or both of the Issuers and their affiliates in the ordinary course of business. In addition, in the ordinary course of their business activities, the Dealers and their affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers. Such investments and securities activities may involve securities and/or instruments of the Issuers or the Issuers' affiliates. Certain of the Dealers or their affiliates that have a lending relationship with either of the Issuers routinely hedge their credit exposure to the Issuer consistent with their customary risk management policies. Typically, such Dealers and their affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in securities, including potentially the Notes issued under the Programme. Any such short positions could adversely affect future trading prices of Notes issued under the Programme. The Dealers and their affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

 - (iii) if such Dealer is a United States person, it has represented that it is acquiring the Notes for purposes of resale in connection with their original issuance and if such Dealer retains Notes for its own account, it will only do so in accordance with the requirements of the D Rules; and
 - (iv) with respect to each affiliate that acquires from such Dealer Notes in bearer form for the purposes of offering or selling such Notes during the restricted period, such Dealer either (x) has repeated and confirmed the representations and the agreements contained in sub-clauses (i), (ii) and (iii) on such affiliate's behalf or (y) has agreed that it will obtain from such affiliate for the benefit of the Issuer the agreements contained in sub-clauses (i), (ii) and (iii).

Terms used in this paragraph (e) have the meanings given to them by the U.S. Internal Revenue Code and regulations thereunder, including the D Rules.

3. European Economic Area

In relation to each Member State of the European Economic Area (the EU plus Iceland, Norway and Liechtenstein) which has implemented the Prospectus Directive (each, a "**Relevant Member State**"), each Dealer has represented and agreed that with effect from and including the date on which the Prospectus Directive is implemented in that Relevant Member State (the "**Relevant Implementation Date**") it has not made and will not make an offer of Notes which are the subject of the offering contemplated by this Prospectus as completed by the Final Terms in relation thereto to the public in that Relevant Member State except that it may, with effect from and including the Relevant Implementation Date, make an offer of such Notes to the public in that Relevant Member State:

- (a) if the Final Terms in relation to the Notes specify an offer of those Notes other than pursuant to Article 3 (2) of the Prospectus Directive in that Relevant Member State (a "**Non-exempt Offer**"), following the date of publication of a prospectus in relation to such Notes which has been approved by the competent authority in that Relevant Member State or, where appropriate, approved in another Relevant Member State and notified to the competent authority in that Relevant Member State, provided that any such prospectus has subsequently been completed by the Final Terms contemplating such Non-exempt Offer, in accordance with the Prospectus Directive, in the period beginning and ending on the dates specified in such prospectus or Final Terms, as applicable and the Issuer has consented in writing to its use for the purpose of that Non-exempt Offer;
- (b) at any time to any legal entity which is a qualified investor as defined in the Prospectus Directive;
- (c) at any time to fewer than 150, natural or legal persons (other than qualified investors as defined in the Prospectus Directive) subject to obtaining the prior consent of the relevant Dealer(s) nominated by the Issuer for any such offer; or
- (d) at any time in any other circumstances falling within Article 3 (2) of the Prospectus Directive, provided that no such offer of Notes referred to in (b) to (d) above shall require the Issuer or any Dealer to publish a prospectus pursuant to Article 3 of the Prospectus Directive or supplement a prospectus pursuant to Article 16 of the Prospectus Directive.

For the purposes of this provision, the expression an "**offer of Notes to the public**" in relation to any Notes in any Relevant Member State means the communication in any form and by any means of sufficient information on the terms of the offer and the Notes to be offered so as to enable an investor to decide to purchase or subscribe the Notes, as the same may be varied in that Member State by any measure implementing the Prospectus Directive in that Member State and the expression "**Prospectus Directive**" means Directive 2003/71/EC (as amended including by Directive 2010/73/EU) and includes the relevant implementing measure in the Relevant Member State.
