Infineon Technologies AG, incorporated in the Federal Republic of Germany, (the "Issuer" or "**Infineon**") will issue EUR 600,000,000 in aggregate principal amount of subordinated notes subject to interest rate reset at 5 year intervals commencing on the first reset date on 1 April 2025, ISIN: XS2056730323 (the "NC5.5 Notes") and EUR 600,000,000 in aggregate principal amount of subordinated notes subject to interest rate reset at 5 year intervals commencing on the first reset date on 1 April 2028, ISIN: XS2056730679 (the "NC8.5 Notes" and, together with the NC5.5 Notes, the "Notes" and each a "Series"), each on 1 October 2019 (the "**Issue Date**") at an issue price of 99.385% of their principal amount in respect of the NC5.5 Notes (the "NC5.5 Issue Price") and 99.121% of their principal amount in respect of the NC8.5 Notes (the "NC8.5 Issue Price", the NC5.5 Issue Price and the NC8.5 Issue Price, each an "**Issue Price**"). The Notes are issued in denominations of EUR 100,000 each (the "**Specified Denomination**"). The Notes will be governed by the laws of the Federal Republic of Germany.

The NC5.5 Notes shall bear interest on their principal amount (i) from and including the Issue Date to but excluding 1 April 2025 (the "NC5.5 First Reset Date") at a rate of 2.875% *per annum*; (ii) from and including the NC5.5 First Reset Date to but excluding 1 April 2030 at the relevant 5 year swap rate for the relevant reset period plus a margin of 338.8 basis points *per annum* (the "NC5.5 Initial Margin"); (iii) from and including 1 April 2030 to but excluding 1 April 2045 at the relevant 5 year swap rate for the relevant reset period plus a first step-up margin (being equal to the NC5.5 Initial Margin plus 25 basis points *per annum*); and (iv) from and including 1 April 2045 at the relevant 5 year swap rate for the relevant reset period plus a second step-up margin (being equal to the NC5.5 Initial Margin plus 100 basis points *per annum*).

The NC8.5 Notes shall bear interest on their principal amount (i) from and including the Issue Date to but excluding 1 April 2028 (the "NC8.5 First Reset Date", the NC5.5 First Reset Date and the NC8.5 First Reset Date, each a "**First Reset Date**") at a rate of 3.625% *per annum*; (ii) from and including the NC8.5 First Reset Date to but excluding 1 April 2033 at the relevant 5 year swap rate for the relevant reset period plus a margin of 399.6 basis points *per annum* (the "NC8.5 Initial Margin"); (iii) from and including 1 April 2033 to but excluding 1 April 2048 at the relevant 5 year swap rate for the relevant reset period plus a first step-up margin (being equal to the NC8.5 Initial Margin plus 25 basis points *per annum*); and (iv) from and including 1 April 2048 at the relevant 5 year swap rate for the relevant reset period plus a second step-up margin (being equal to the NC8.5 Initial Margin plus 100 basis points *per annum*).

During each interest period interest is scheduled to be paid annually in arrear, with respect to the NC5.5 Notes, on 1 April of each year, and, with respect to the NC8.5 Notes, on 1 April of each year (each an "**Interest Payment Date**"), commencing, with respect to the NC5.5 Notes, on 1 April 2020 (short first coupon), and, with respect to the NC8.5 Notes, on 1 April 2020 (short first coupon).

Upon the occurrence of a Change of Control Event (as defined in § 5(5)(c) of the terms and conditions of the NC5.5 Notes (the "NC5.5 Terms and Conditions") and of the terms and conditions of the NC8.5 Notes (the "NC8.5 Terms and Conditions" and, together with the NC5.5 Terms and Conditions, the "**Terms and Conditions**"), the interest rate payable on the Notes will be increased by an additional 500 basis points *per annum* above the otherwise applicable rate, if the Issuer does not redeem the Notes in whole (as set out in § 3(2)(f) of the Terms and Conditions).

The Issuer is entitled to defer payments of interest on any Interest Payment Date ("**Deferred Interest Payments**") and may pay such Deferred Interest Payments voluntarily at any time, but only has to pay such Deferred Interest Payments under certain circumstances as set out in the relevant Terms and Conditions.

Unless previously redeemed or purchased and cancelled, the Notes will not mature.

Each Series of Notes may be separately redeemed in whole but not in part at the option of the Issuer at an amount per Note equal to the Specified Denomination plus (i) interest accrued on the Note to but excluding the date of redemption but yet unpaid and (ii) any outstanding Deferred Interest Payments due and payable, (A) in case of the NC5.5 Notes, with effect (i) as of any date during the period from and

including 1 January 2025 to and including the NC5.5 First Reset Date and (ii) on any Interest Payment Date thereafter, and (B) in case of the NC8.5 Notes, with effect (i) as of any date during the period from and including 1 January 2028 (each a "**First Call Date**") to and including the NC8.5 First Reset Date and (ii) on any Interest Payment Date thereafter.

The Issuer may also redeem each Series of Notes separately in whole but not in part at any time following a Tax Event, an Accounting Event, a Rating Agency Event or an Acquisition Event (each as defined in the relevant Terms and Conditions), in each case, at an amount per Note (i) equal to 101.00% of the Specified Denomination if the redemption occurs prior to the relevant First Call Date or (ii) equal to the Specified Denomination if the redemption occurs on or after the relevant First Call Date, plus, in each case, (i) interest accrued on the Note to but excluding the date of redemption but yet unpaid and (ii) any outstanding Deferred Interest Payments due and payable on the Note. Additionally, the Issuer may redeem the Notes in whole but not in part at any time following a Gross-up Event and a Change of Control Event (each as defined in the Terms and Conditions) or if the Issuer has redeemed or repurchased and cancelled at least 75% of the originally issued aggregate principal amount of the relevant Series, in each case, at an amount per Note equal to the Specified Denomination plus (i) interest accrued to but excluding the date of redemption but yet unpaid and (ii) any outstanding Deferred Interest Payments.

Each Series of Notes will initially be represented by a temporary global note in bearer form (a "**Temporary Global Note**"). The Temporary Global Note will be exchangeable for a permanent global note in bearer form (a "**Permanent Global Note**" and together with the Temporary Global Notes, the "**Global Notes**") not earlier than 40 and not later than 180 days after the Issue Date upon certification as to non-U.S. beneficial ownership. The Global Notes will be deposited with a common depositary for Clearstream Banking S.A., Luxembourg and Euroclear Bank SA/NV (together, the "**Clearing System**").

This prospectus (the "**Prospectus**") constitutes a prospectus within the meaning of Article 6.3 of the Regulation (EU) 2017/1129 of the European Parliament and of the Council of 14 June 2017 (the "**Prospectus Regulation**"). This Prospectus will be published in electronic form together with any supplement thereto and all documents incorporated by reference on the website of the Luxembourg Stock Exchange (www.bourse.lu) and on the website of the Issuer (www.infineon.com).

This Prospectus has been approved by the *Commission de Surveillance du Secteur Financier* of the Grand Duchy of Luxembourg (the "**CSSF**") in its capacity as competent authority under the Prospectus Regulation. CSSF has only approved this prospectus as meeting the standards of completeness, comprehensibility and consistency imposed by the Prospectus Regulation. Such approval should not be considered as an endorsement of the Issuer that is the subject of this Prospectus nor of the quality of the securities that are the subject of this Prospectus. By approving a prospectus, in accordance with Article 20 of the Prospectus Regulation, the CSSF does not engage in respect of economic or financial opportunity of the operation or the quality and solvency of the Issuer.

This Prospectus will be valid until 26 September 2020 and may in this period be used for admission of the Notes to trading on a regulated market. In case of a significant new factor, material mistake or material inaccuracy relating to the information included in this Prospectus which may affect the assessment of the Notes, the Issuer will prepare and publish a supplement to the Prospectus without undue delay in accordance with Article 23 of the Prospectus Regulation. The obligation of the Issuer to supplement this Prospectus will cease to apply once the Notes have been admitted to trading on the regulated market of the Luxembourg Stock Exchange and at the latest upon expiry of the validity period of this Prospectus.

Application has been made to the Luxembourg Stock Exchange for the Notes to be listed on the official list of the Luxembourg Stock Exchange (the "**Official List**") and to be admitted to trading on the Luxembourg Stock Exchange's regulated market "Bourse de Luxembourg", appearing on the list of regulated markets issued by the European Commission. The Luxembourg Stock Exchange's regulated market is a regulated market for the purposes of Directive 2014/65/EU (as amended, "**MiFID II**").

The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area ("**EEA**"). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of MiFID II; or (ii) a customer within the meaning of Directive (EU) 2016/97 (as amended, the "**Insurance Distribution Directive**"), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II. Consequently, no key information document required by Regulation (EU) No 1286/2014 (as amended, the "**PRIIPs Regulation**") for offering or selling the Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

Following the respective First Reset Date, amounts payable under the Notes are calculated by reference to the annual swap rate for swap transactions denominated in Euro with a term of 5 years, which appears on the Reuters Screen Page ICESWAP2/EURFIXA and which is provided by ICE Benchmark Administration Limited ("**IBA**"). As at the date of this Prospectus, IBA appears on the register of administrators and benchmarks established and maintained by the European Securities and Markets Authority ("**ESMA**") pursuant to article 36 of the Benchmark Regulation (Regulation (EU) 2016/1011) (the "**Benchmark Regulation**").

MIFID II PRODUCT GOVERNANCE / PROFESSIONAL INVESTORS AND ECPS ARE THE ONLY TARGET MARKET

Solely for the purposes of each manufacturer's product approval process, the target market assessment in respect of the Notes has led to the conclusion that: (i) the target market for the Notes is eligible counterparties and professional clients only, each as defined in MiFID II; and (ii) all channels for distribution of the Notes to eligible counterparties and professional clients are appropriate. Any person subsequently offering, selling or recommending the Notes (a "**distributor**") should take into consideration the manufacturers' target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the manufacturers' target market assessment) and determining appropriate distribution channels.

ALTERNATIVE PERFORMANCE MEASURES

Certain terms used in this Prospectus and financial measures presented in the documents incorporated by reference are not recognized financial measures under International Financial Reporting Standards (IFRS) ("Alternative Performance Measures") and may therefore not be considered as an alternative to the financial measures defined in the accounting standards in accordance with generally accepted accounting principles. The Issuer has provided these Alternative Performance Measures because it believes they provide investors with additional information to assess the economic situation of the Issuer's business activities. The definition of the Alternative Performance Measures may vary from the definition of identically named alternative performance measures used by other companies. The Alternative Performance Measures used by the Issuer should not be considered as an alternative to measures derived in accordance with IFRS as measures of operating performance. These Alternative Performance Measures have limitations as analytical tools and should not be considered in isolation or as substitutes for analysis of results as reported under IFRS.

FORWARD-LOOKING STATEMENTS

This Prospectus contains certain forward-looking statements. A forward-looking statement is a statement that does not relate to historical facts and events. They are based on analyses or forecasts of

future results and estimates of amounts not yet determinable or foreseeable. These forward-looking statements are identified by the use of terms and phrases such as "anticipate", "believe", "could", "estimate", "expect", "intend", "may", "plan", "predict", "project", "will" and similar terms and phrases, including references and assumptions. This applies, in particular, to statements in this Prospectus containing information on future earning capacity, plans and expectations regarding the Infineon Group's business and management, its growth and profitability, and general economic and regulatory conditions and other factors that affect it.

Forward-looking statements in this Prospectus are based on current estimates and assumptions that the Issuer makes to the best of its present knowledge. These forward-looking statements are subject to risks, uncertainties and other factors which could cause actual results, including the Infineon Group's financial condition and results of operations, to differ materially from and be worse than results that have expressly or implicitly been assumed or described in these forward-looking statements. The Infineon Group's business is also subject to a number of risks and uncertainties that could cause a forward-looking statement, estimate or prediction in this Prospectus to become inaccurate. Accordingly, investors are strongly advised to read the section "*Information about Infineon — Business Overview*" of this Prospectus. This section includes more detailed descriptions of factors that might have an impact on the Infineon Group's business and the markets in which it operates.

In light of these risks, uncertainties and assumptions, future events described in this Prospectus may not occur. In addition, neither the Issuer nor the Joint Bookrunners assume any obligation, except as required by law, to update any forward-looking statement or to conform these forward-looking statements to actual events or developments.

RISK FACTORS

Before deciding to purchase the Notes, investors should carefully review and consider the following risk factors and the other information contained in this Prospectus (including any document incorporated by reference) or any supplement to this Prospectus. The occurrence of one or more of the risks described below alone or in combination with other circumstances may have a material adverse effect on the business, cash flows, results of operations and financial conditions of the Issuer and the Infineon Group. Moreover, if any of these risks materialize, the market value of the Notes and the likelihood that the Issuer will be in a position to fulfill its payment obligations under the Notes may decrease, in which case the holders of the Notes (the "**Holders**") could lose all or part of their investment. Additional risks and uncertainties, which are not currently known to the Issuer, or which the Issuer currently believes are immaterial, could likewise impair the business operations of the Issuer or the Infineon Group and have a material adverse effect on the business, cash flows, financial condition and results of operations. The order in which the risks are presented reflects, in Infineon's current view, the likelihood of their occurrence and the magnitude of their potential impact on the business, cash flows, results of operations and financial condition of the Infineon Group.

The proposed acquisition of Cypress Semiconductor Corporation ("**Cypress**") will expose the Infineon Group to the specific risks associated with Cypress. Following the integration of Cypress into the Infineon Group all the risks associated with both businesses will apply to the newly formed group combining the Infineon Group and Cypress.

Words and expressions defined in the section "*Terms and Conditions*" shall have the same meanings in this section of the Prospectus.

Risks related to Infineon and the Infineon Group

I. Market Risks

Adverse developments in the global economic environment could have an adverse impact on the Infineon Group's business, financial condition and operating results.

As a globally operating company, the Infineon Group is highly dependent on global economic developments. A worldwide economic downturn, particularly in the semiconductor markets and the markets of the Infineon Group's customers, may result in lower revenues.

The current economic environment may deteriorate, being affected by geopolitical instability. Growing tendencies globally towards protectionism and potential restrictions and limitations impacting international trade may have a negative impact on the export economy in general, and on the Infineon Group's sales and results of operations in particular. The Infineon Group sees the risk that individual countries might take protectionist measures when trying to protect or improve their competitiveness on the global market, and other countries may institute corresponding counter-measures. This might result in market access barriers, such as higher import duties or more complicated certification processes in order to reduce imports. Due to the current increase in protectionist tendencies, the Infineon Group particularly sees itself at risk from additional or higher tariffs on semiconductors and on the products, components and raw materials the Infineon Group supplies or purchases, with import duties instituted between the United States and China posing a particular ongoing threat and uncertainty. These and other tariffs and/or measures could lead to a growing uncertainty on the demand side and a decrease in the sales of semiconductors, in particular in demand for automotive products, causing demand for the Infineon Group's products to drop and/or costs to increase (total revenue attributable to the Infineon Group's Automotive segment amounted to 43% in the fiscal year 2018).

In addition, the impending withdrawal of the United Kingdom from the European Union (Brexit) may adversely affect the EU integration process and the trade relationship between the U.K. and the EU, negatively impacting economies and businesses. Declines in demand for the Infineon Group's products as well as potential trade difficulties may be the consequence.

Any downturn in the European and global economies could cause demand in the Infineon Group's relevant market segments to decline and adversely affect the Infineon Group's business, cash flows, financial position and results of operations, which could in turn (in particular in the event of a significant and sudden decline of the Infineon Group's sales) adversely affect the Infineon Group's financing conditions and ability to meet its financial covenants and other obligations under its credit facilities or other indebtedness, and to fulfill its obligations under the Notes or cause the market price of the Notes to decline.

The Infineon Group operates in a highly cyclical industry and its business could be adversely impacted by periodic downturns in target markets.

The worldwide semiconductor industry is highly cyclical and the Infineon Group therefore faces risks of rapid changes in its target markets. As a result, the Infineon Group's forecasts and expectations of business developments are subject to a high degree of uncertainty.

In the past, the cyclical pattern of the semiconductor industry was relatively predictable. It is, however, possible that future market downturns will follow other patterns. The absence of market growth or market contractions would make it considerably more difficult for the Infineon Group to reach its own growth targets. There is no assurance that the markets in which the Infineon Group operates will continue to grow, that the growth rates experienced in past years will be attainable again in future years, or that the Infineon Group will be successful in managing any future downturn or substantial decline in selling prices. In the event that the Infineon Group is unprepared for market fluctuations, or its response strategy to such fluctuations turns out to be inappropriate, this could have a material adverse effect on the Infineon Group's financial condition, results of operations and cash flows.

The industry in which the Infineon Group operates is characterized by intense competition, consolidation and commoditization of products, which could reduce the Infineon Group's sales or put continued pressure on the Infineon Group's sales prices.

The semiconductor industry is highly competitive, and is characterized by rapid technological change, high capital expenditures, short product lifecycles and continuous advancements in process technologies and manufacturing facilities. The rapid pace of technological change in the semiconductor market also results in greater interchangeability of products. This may lead to aggressive pricing tactics in the marketplace which may hinder the Infineon Group from achieving its long-term strategic targets with respect to market share gains and product pricing. Increased competitive pressure or the relative weakening of the Infineon Group's competitive position could materially and adversely affect the Infineon Group's business, cash flows, financial condition and results of operations.

The highly competitive environment of the semiconductor industry and the high costs associated with manufacturing technologies and developing marketable products have resulted in significant consolidation in the industry and are likely to lead to further consolidation in the future. Such consolidation can allow competitors of the Infineon Group to further benefit from economies of scale, enjoy improved or more comprehensive product portfolios and increase the size of their serviceable markets. Consequently, the Infineon Group's competitive position may be adversely impacted by consolidation among other industry participants.

Political or social changes in countries in which the Infineon Group manufactures and/or sells products could have an adverse impact on the Infineon Group's business, financial condition and operating results.

Risks can arise due to political or social changes in countries in which the Infineon Group manufactures and/or sells its products. Asian markets are particularly important to the Infineon Group's long-term strategy. In the nine-month period ended 30 June 2019, the Infineon Group generated 26% of its revenue in China, similar to previous financial years. The Infineon Group's operations in China are impacted by the fact that the Chinese legal system is still evolving and may change rapidly. For example, local regulations may require Infineon to enter into partnerships with local companies. These circumstances could lead to the Infineon Group's intellectual property no longer being sufficiently protected. Furthermore, intellectual property developed in China may not be freely transferred to other countries and locations, all of which could impair the Infineon Group's business and thus have an adverse impact on its financial condition and results of operations.

II. Operational Risks

Infineon may be unable to successfully integrate businesses it acquires or to effectively manage its own growth or to develop or raise the resources necessary in order to control or support its growth. Infineon may be required to record charges related to the goodwill or other long-lived assets associated with the acquired businesses.

Infineon (directly or through its subsidiaries) occasionally acquires or makes investments in other companies, businesses and technologies or enters into various forms of cooperation arrangements and face risks resulting from the expansion of their operations through acquisitions or co-operations. In case of acquisitions, the Infineon Group might be unable to successfully integrate new businesses or teams with the Infineon Group's culture, structures and strategies on a timely basis or at all. Neither can the Infineon Group be certain that it will be able to achieve the full scope of the benefits it expects from a particular acquisition or investment. The Infineon Group's business, financial condition and results of operations may suffer if it fails to coordinate its resources effectively to manage both its existing businesses and any businesses it acquires.

The Infineon Group reviews the goodwill associated with its acquisitions for impairment at least once a year. Changes in the Infineon Group's expectations due to changes in market developments which the Infineon Group cannot foresee have in the past resulted in the Infineon Group writing off amounts associated with the goodwill of acquired companies, and future changes may require additional write-offs in future periods, which could have a material adverse effect on its financial results.

The acquisition of all outstanding Cypress' shares represents approximately 40% of the Infineon Group's market capitalization as of 30 June 2019 (Cypress market capitalization calculated based on the number of shares as of 30 June 2019 and the offer price) and is therefore of great significance for the Infineon Group's future success. The risks described above, especially in terms of integrating the two businesses, are therefore highly relevant.

Also, the integration of Cypress into the Infineon Group may result in a loss of Cypress' key personnel and may disrupt Cypress' sales and marketing or other key business activities as well as its relationships with third parties, including customers, which may have an adverse impact on Cypress' and thus the Infineon Group's financial performance. Additionally, Cypress and the Infineon Group have incurred substantial financial advisory, legal, and other professional fees and expenses in connection with the acquisition and might continue to incur such expenses going forward (see also "*Risks associated with the proposed acquisition of Cypress as well as other future acquisitions, divestments and/or other strategic partnerships.*").

The Infineon Group's business could suffer due to decreases in market demand for its customers' products.

The Infineon Group's sales volume depends significantly on the market success of the Infineon Group's customers in developing, manufacturing and selling end-products that incorporate the Infineon Group's products. The fast pace of technological change, difficulties in the execution of individual projects, general economic conditions and other factors may limit the market success of the Infineon Group's customers, resulting in a decrease in the volume of demand for the Infineon Group's products and adversely affecting the Infineon Group's results of operations.

The Infineon Group's operations rely on complex information technology systems and networks, and any disruptions, security breaches, data protection or data privacy breaches or cyber-attacks in such systems or networks could have a material adverse impact on the Infineon Group's business and results of operations.

The Infineon Group may be subject to cyber-attacks from time to time. Computer programmers and hackers may be able to penetrate its network security and misappropriate or compromise its confidential information, potentially without being detected. Computer programmers and hackers also may be able to develop and deploy viruses, worms, and other malicious software programs that attack the Infineon Groups' products. The costs to the Infineon Group to eliminate or alleviate cyber or other security problems could be significant, and its efforts to address these problems may not be successful and could result in interruptions and delays that may impede its sales, manufacturing, distribution or other critical functions.

In addition, the Infineon Group relies heavily on information technology systems and networks to support business processes as well as internal and external communications. The reliability and security of the Infineon Group's information technology systems is therefore of crucial importance. However, these systems and networks are potentially vulnerable to damage or interruption from a variety of sources. Despite precautionary measures the Infineon Group has put in place to manage its data and information technology risks an extended outage in a communications network utilized by the Infineon Group's systems or a similar event could lead to an extended unanticipated interruption of the Infineon Group's systems or networks. Furthermore, confidential information and relevant intellectual property data could be leaked as a result of information technology security breaches. Additionally, potential virus attacks, in particular on the Infineon Group's information technology systems for production processes, present additional risks that could result in loss of production or supply bottlenecks.

Such disruptions and security breaches could endanger the confidentiality, availability and reliability of data and systems used in development, production, selling or administration functions, which, in turn, could have an adverse impact on the Infineon Group's reputation, competitiveness and ultimately its business operations.

Products that do not meet customer specifications or that contain, or are perceived to contain, defects or errors or that are otherwise incompatible with their intended end use could impose significant costs on Infineon. Quality problems could also damage the Infineon Group's reputation and, consequently, negatively affect demand for its products.

The design and production processes for the Infineon Group's products are highly complex. The Infineon Group might bring products to the market that do not meet customer specifications, contain or are perceived to contain defects or errors, or are otherwise incompatible with their intended uses.

The smallest shortfall in product quality can lead to product recalls and potential costs related to liability claims. The Infineon Group may incur substantial costs in remedying such defects or errors,

which could include material inventory write-downs. Moreover, if actual or perceived problems with nonconforming, defective or incompatible products occur after the Infineon Group has shipped the products, the Infineon Group might not only bear direct liability for providing replacements or otherwise compensating customers, but could also suffer from long-term damage to the Infineon Group's relationship with important customers or to the Infineon Group's reputation in the industry generally. Any perception that products are defective would likely result in reduced sales, loss of customers and harm to the Infineon Group's business and reputation.

This could have a material adverse effect on the Infineon Group's business, financial condition and results of operations.

The Infineon Group's business could suffer if the Infineon Group is not able to secure the development of new technologies or if the Infineon Group cannot keep pace with the technology development of its competitors.

The semiconductor industry is characterized by rapid technological development. The frequent introduction of new process technologies leads to an increase of functions per chip and to the improvement of performance parameters, such as power consumption or processing speed. In addition, using smaller feature sizes offering better performance characteristics entails that smaller chips offering the same functionality can be produced which in turn means a considerable reduction in costs per function. In order to remain competitive, it is essential that the Infineon Group secures the capabilities to develop and qualify new technologies for the manufacturing of new products. However, the increasing complexity of technologies and products, shorter development cycles and increased customer expectations can add pressure on product development. Buffer times built into development and qualification processes to compensate for potential delays are reduced accordingly. If the Infineon Group is unable to develop and qualify new technologies and products or to execute its development plans at the desired quality levels or if the Infineon Group devotes resources to the pursuit of technologies or products that fail to be accepted in the marketplace or that fail to be commercially viable, development delays and increased or failed development costs could have an adverse impact on the Infineon Group's business, cash flows, financial condition and results of operations.

If the Infineon Group's outside foundry suppliers fail to meet the Infineon Group's expectations, the Infineon Group's results of operations could be adversely affected.

The Infineon Group outsources production of some of its products to third-party suppliers, including semiconductor foundry manufacturers and assembly and test facilities. If the Infineon Group's outside suppliers are unable to satisfy the Infineon Group's demand, or experience manufacturing difficulties, delays or reduced production yields, the Infineon Group's results of operations and ability to satisfy customer demand could suffer. In addition, purchasing rather than manufacturing these products may adversely affect the Infineon Group's gross profit margin if the purchase costs of these products are higher than the Infineon Group's own manufacturing costs. The Infineon Group's internal manufacturing costs include depreciation and other fixed costs, while costs for products outsourced are based in large part on market conditions. Prices for foundry products also vary depending on capacity utilization rates at the Infineon Group's suppliers, quantities demanded, product technology and geometry. Furthermore, these outsourcing costs can vary materially from quarter to quarter and, in cases of industry shortages, they can increase significantly and negatively impact the Infineon Group's results of operations.

The Infineon Group relies on a limited number of suppliers of services, manufacturing equipment and raw materials and could suffer shortages if these suppliers were to interrupt supply or increase their prices.

The Infineon Group's manufacturing operations depend on the delivery of services and adequate supplies of raw materials on a timely basis. The Infineon Group purchases materials from a number of suppliers on a just-in-time basis. From time to time, suppliers may extend lead times, limit supply to the Infineon Group or increase prices due to capacity constraints or other factors. The Infineon Group does not always have alternative sources for some of these suppliers and therefore depends on their ability to deliver products of the required quality at the required time. Regarding equipment, due to the complex nature of the equipment that the Infineon Group purchases, it is difficult to substitute one supplier for another or one piece of equipment for another. The Infineon Group's results of operations would be negatively affected if the Infineon Group were not able to obtain adequate supplies of quality services or materials on the one hand, and equipment on the other hand in a timely manner or if there were significant increases in the respective costs.

The Infineon Group is dependent on individual Asian production sites.

The Infineon Group's South East Asian manufacturing sites are of critical importance for its production. If, for example, political instability or natural disasters in the respective region were to impede the Infineon Group's ability to manufacture at these or other important sites on the planned scale or to export products manufactured at those sites, it could have an adverse impact on the Infineon Group's business, financial condition and results of operations. Furthermore, the Infineon Group's current production capacities in the South East Asian region are to a large extent not insured against political risks such as expropriation of assets. A transfer of manufacturing capacities from these sites would therefore not only involve a great deal of time and technical effort, Infineon would also be required to bear the necessary cost of re-investment, which could have a material adverse effect on the Infineon Group's results of operations.

The loss or insolvency of one or more of the Infineon Group's key customers may adversely affect the Infineon Group's business.

Historically, a significant portion of the Infineon Group's revenue has come from a relatively small number of customers and distributors. The loss or financial failure or insolvency of any significant customer or distributor, or any reduction in orders by any of the Infineon Group's key customers or distributors could materially and adversely affect the Infineon Group's business.

The Infineon Group may not be able to match its production capacity to demand.

It is difficult to predict future growth and contraction of the markets that the Infineon Group serves, making it hard to estimate requirements for production capacity. If markets do not develop as the Infineon Group has anticipated, the Infineon Group risks underutilization of its facilities or insufficient capacity to meet customer demand. Underutilization of the Infineon Group's facilities may result in idle capacity costs, write-offs of inventories and losses on products. In the past, the net increases of supply sometimes exceeded demand requirements, leading to oversupply situations and downturns in the industry. Such a development could potentially require the Infineon Group to undertake restructuring activities that may involve costs. Fluctuations in the rate at which industry capacity grows relative to the growth rate in demand for semiconductor products may in the future put pressure on the Infineon Group's average selling prices and negatively affect the Infineon Group's results of operations.

In addition, during periods of increased demand, the Infineon Group may not have sufficient capacity to meet customer orders. The Infineon Group could lose future business and design wins in case it is unable to deliver volumes above its contractual obligations if called upon by its customers to do so. In the past, the Infineon Group responded to increased demand by opening new production facilities or entering into strategic production alliances, which in many cases resulted in significant expenditures. The Infineon Group has also purchased an increasing number of processed wafers and packages from semiconductor foundries and subcontractors to meet higher levels of demand and has incurred higher costs of goods sold as a result. To expand the Infineon Group's production capacity in the future, the Infineon Group may have to spend substantial amounts which could negatively affect the Infineon Group's results of operations.

In view of the rapid pace of technological change and increasingly stringent customer requirements, coordination processes have become increasingly sophisticated. Failure in continuing to make progress in this area could result in quality problems or delays in time-to-market as well as higher research and development ("R&D") expenses and hence adversely impact the Infineon Group's revenue and earnings.

The Infineon Group's main business focus is on power semiconductors with significant in-house manufacturing. Semiconductor companies operating in-house production facilities typically face the risk of delays in the ramping-up of production volumes at new production sites, coupled with the required transfer of technology to those sites. For example, in the Automotive segment customers' product approval and testing processes can take place over an extended period of time and thus influence the Infineon Group's global production strategy as well as short- and medium-term capacity utilization. Failure to anticipate necessary production changes in time could result in capacity shortages and hence lower revenue on the one hand and costs caused by under-utilization on the other.

The Infineon Group relies on strategic partners and other third parties, and the Infineon Group's business could be harmed if they fail to perform as expected or relationships with them were to be terminated.

The Infineon Group has entered into a number of long-term strategic alliances with leading industry participants, on the one hand to manufacture semiconductors and on the other hand to develop new products and manufacturing process technologies. If the Infineon Group's strategic partners encounter financial difficulties or change their business strategies, they may no longer be able or willing to participate in these alliances. Some of the agreements governing the Infineon Group's strategic alliances allow the Infineon Group's partners to terminate the agreement if a third party gains control of Infineon or of a significant portion of Infineon's shares. The Infineon Group's business could be harmed if any of the Infineon Group's strategic partners were to discontinue the Infineon Group's participation in a strategic alliance or if the alliance were otherwise terminated. To the extent the Infineon Group relies on alliances and third-party design and/or manufacturing relationships, the Infineon Group faces the risks of:

- reduced control over delivery schedules and product costs;
- manufacturing costs that are higher than anticipated;
- the inability of the Infineon Group's manufacturing partners to develop manufacturing methods appropriate for the Infineon Group's products and their unwillingness to devote adequate capacity to produce the Infineon Group's products;
- a decline in product reliability;
- an inability to maintain continuing relationships with the Infineon Group's suppliers; and
- limited ability to meet customer demand when faced with product shortages.

If any of these risks materialize, the Infineon Group could experience an interruption in its supply chain or an increase in costs, which could delay or decrease the Infineon Group's revenues or adversely affect the Infineon Group's business, financial condition and results of operations.

The Infineon Group's success depends on its ability to recruit and retain qualified key personnel.

The Infineon Group's success depends significantly on the recruitment and retention of highly skilled personnel, particularly in the areas of R&D, marketing, production management and general management. The competition for such highly skilled employees is intense and the loss of the services of key personnel without adequate replacement or the inability to attract new qualified personnel could have a material adverse effect on the Infineon Group. The Infineon Group can provide no assurance that it will be able to successfully retain and/or recruit the key personnel it requires.

The Infineon Group could be adversely affected by property damage or loss and business interruption.

Disturbances at its semiconductor facilities or within the Infineon Group's supply chain – at customers or at suppliers side which may be caused by various reasons, e.g. fire, natural hazards, earthquakes, supply shortage, terrorism, power failures – have resulted in the past and can result in the future in severe damage and loss. Such far-reaching negative consequences can also arise from political unrest or instability, especially in emerging economies. The risks arising from business interruption and loss of production are insured up to levels considered economically reasonable by the Infineon Group. The Infineon Group believes that it has taken out the business liability insurance that is necessary and customary in the industry (including product and environmental liability), as well as property insurance, business interruption insurance, insurance for damages resulting from earthquakes and other insurance, but its insurance coverage could prove insufficient in individual cases. Furthermore, such events could injure or damage individuals, third-party property or the environment, which could, among other things, lead to considerable financial costs for the Infineon Group. The materialization of any of these risks could have a material adverse effect on the Infineon Group's business, financial condition and results of operations.

III. Financial Risks

The financial resources available to the Infineon Group may be insufficient to meet the Infineon Group's capital needs.

Although Infineon was able to conclude a financing agreement for the acquisition of Cypress, the Infineon Group's cash from operating activities, current cash resources, existing sources of external financing and the proceeds from the offering of the Notes may be insufficient to meet the Infineon Group's further capital needs.

Furthermore, the Infineon Group may be unable to successfully place the Notes that are the subject of the offering. If the offering fails to raise the anticipated amount of capital or if the Infineon Group is unable to obtain financing from other sources on commercially reasonable terms at any time in the future, or at all, then the Infineon Group may face difficulties in repaying or be unable to repay its debts as they come due.

The Infineon Group's results of operations and financial condition can be adversely impacted by changes in exchange rates and interest rates.

The Infineon Group's results of operations can be negatively affected by changes in exchange rates, particularly between the euro ("EUR") and the US dollar ("USD"), the Japanese yen, the Malaysian ringgit, the Singapore dollar and the Chinese renminbi. In addition, the impact of currency translation

adjustments on the consolidated financial position has been, and may continue to be, material. While the Infineon Group operates in an industry with prices primarily denominated in USD and Japanese yen and therefore receives a large portion of its revenues in USD and Japanese yen, a large portion of its expenses are in EUR, Malaysian ringgit, Singapore dollar or Chinese renminbi and it reports its financial results in EUR, which is its operational currency. As a result, the Infineon Group's financial results can to a significant extent be negatively affected by exchange rate fluctuations of such currencies against the EUR. Specified currencies are hedged group-wide by means of derivative financial instruments. Depending on how exchange rates develop, these hedging contracts could have a significant influence on cash flows. In these circumstances, exchange rate fluctuations could also have an impact on earnings.

The Infineon Group is exposed to interest rate risk through its financial assets and debt instruments resulting from its debt financing. Furthermore, the Infineon Group holds a relatively high amount of liquid financial assets that are invested in short-term fixed-interest instruments due to the cyclical nature of its core business and the need to maintain high operational flexibility. These investments generally have a contract duration of between one day and twelve months. Although Infineon partially offsets the risk to these assets of changing interest rates by financial liabilities, some of which may be based on variable interest rates, and potentially by using interest rate derivatives, such as interest swaps, in order to align the fixed interest periods of assets and liabilities, the Infineon Group's results of operations and financial condition can be adversely impacted by changes in interest rates.

The Infineon Group may be adversely affected by rising raw material and energy prices.

The Infineon Group is exposed to fluctuations in raw material prices. In particular gold, copper and petroleum-based organic polymer prices fluctuate constantly. The Infineon Group also depends on supplies of rare earths required for selected production processes within the process integration. The Infineon Group uses financial instruments to hedge short-term price risk exposure to gold, however, there is no assurance that these hedges will be sufficient. The prices of raw materials and energy have recently been subject to significant fluctuation, and there is no reason to assume the situation will change in the near future. If the Infineon Group is unable to offset cost rises or pass them on to customers, such price increases could have a material adverse effect on the Infineon Group's financial results.

In addition, the Infineon Group's business requires reliable electrical power at reasonable cost and may be adversely affected by power shortages due to disruptions in supply, as well as by increases in market prices for fuel or electricity.

IV. Risks associated with the proposed acquisition of Cypress as well as other future acquisitions, divestments and/or other strategic partnerships.

Infineon is exposed to risks relating to the acquisition and integration of Cypress and to other potential acquisitions, divestments, joint ventures and/or other strategic collaborations in the future.

Infineon entered into a merger agreement with Cypress under which Infineon will, subject to certain closing conditions, acquire all of Cypress' shares (the "Acquisition").

The completion of the Acquisition is subject to regulatory approvals and other customary conditions as well as certain termination rights for each of Infineon and Cypress. The closing is expected by the end of calendar year 2019 or in early 2020. Should those or other conditions precedent for the Acquisition not be fulfilled and/or obtained and/or the merger agreement be terminated otherwise, the Acquisition will fail. For Infineon, a failure of the Acquisition may entail reputational damage due to the failure of the transaction and financial disadvantages caused, inter alia, by the time lost, costs

incurred in connection with the transaction and a breakup fee being payable to Cypress in the amount of USD 425 million.

In connection with the Acquisition, Infineon concluded a EUR 6,600 million/USD 3,330 million syndicated dual-currency term loan facilities agreement on 3 June 2019 with various international banks (the "**Facilities Agreement**") to finance the Acquisition. Infineon's indebtedness will increase considerably as a result of the financing Infineon obtains under the Facilities Agreement to fund the Acquisition. Besides, Infineon had to pay certain fees to the finance parties under the Facilities Agreement, which would be lost without compensation should the Acquisition not be successful. The Facilities Agreement contains certain undertakings, restrictions and covenants that restrict Infineon's operating flexibility and which restrict Infineon to a similar or same extent as corresponding undertakings, restrictions and covenants in existing senior facilities. Furthermore, the Facilities Agreement contains certain market-standard provisions, pursuant to which the lenders may terminate the Facilities Agreement and accelerate all borrowings or, as applicable, cancel their commitments under the Facilities Agreement.

The implementation of the Acquisition also involves the risks that the offering price for Cypress' shares may be considered too high, the Acquisition may prove to be less successful than anticipated, Cypress' financial or operational performance may not develop as expected, or sales, earnings and cash flow goals pursued by way of the Acquisition may not be met. In addition, the Acquisition, as well as other potential acquisitions in the future, is subject to a number of risks, including unexpected losses of key employees; extraordinary or unexpected legal, regulatory, contractual and other costs; difficulties in integrating the financial, technological and management standards, processes, procedures and controls of Cypress and its subsidiaries with those of the Infineon Group's existing operations; challenges in managing the increased scope, geographic diversity and complexity of the operations; mitigating contingent and/or assumed liabilities; the possible loss of customers and/or suppliers; and control issues in relation to joint ventures and other arrangements where Infineon does not exercise sole control. Hence, Infineon may not be able to integrate Cypress into the Infineon Group as planned or only at a higher cost than originally planned, and/or may not realize the anticipated cost savings, synergies, future earnings or other benefits that it intends to achieve from the Acquisition.

Furthermore, Infineon only conducted a limited due diligence with regards to Cypress and only had limited access to relevant documents when making the decision to acquire Cypress. The integration of Cypress into the Infineon Group could further require a larger amount of the time and attention of both companies' management than originally anticipated. If integration issues significantly divert management's attention from other responsibilities, the Infineon Group's and Cypress' business could be adversely affected.

Both, the Infineon Group and Cypress depend on their respective key employees for the successful integration and implementation of a common strategy for the combined group. If either of the companies were to lose key employees due to their combination or other reasons, a rapid integration and leveraging of the respective strengths of each company could be more difficult.

In addition to the Acquisition, the Infineon Group continues to examine possibilities to expand its business through acquisitions. The Infineon Group may thus grow further through additional acquisitions. No guarantee can be given that additional suitable acquisition targets can be found or that further acquisitions that are identified as strategically important can be realized. The consummation of such further acquisitions may involve risks similar to those described above with regard to the Acquisition. Divestments, on the other side, bear risks arising from the sale contract with the purchaser and that the achieved sale price is too low in the view of the market. If the Infineon Group decides to divest another business, product line, or assets, it may encounter difficulty in finding

or completing such divestiture opportunity in a timely manner. These circumstances could delay the achievement of the Infineon Group's strategic objectives or cause the Infineon Group to incur additional expenses with respect to the business, product line or assets it seeks to dispose. Even following a divestiture, the Infineon Group may be contractually obligated with respect to certain continuing obligations to customers, vendors, landlords, or other third parties.

Furthermore, the Infineon Group itself may become a target for other market participants seeking to improve their competitive position. Any actual or attempted acquisition of Infineon by a competitor could result in unpredictable consequences that could have a material adverse effect on the Infineon Group's results of operations and financial condition.

Investments made in joint ventures and acquisitions, in particular if these are of comparable or even greater size than the Acquisition, may weaken the Infineon Group's financial profile, especially in the short term, which may result, among others, in rating downgrades. For example, the Acquisition may result in a rating downgrade by the rating agency Standard & Poor's or that the Infineon Group will temporarily not be able to meet its financial profile targets. The Infineon Group may not realize the anticipated cost savings, synergies, future earnings or other benefits that it intends to achieve from acquisitions or joint ventures, or the acquired entities or established joint ventures may not develop as expected. The Infineon Group cannot guarantee that any acquisition or joint venture will yield benefits that are sufficient to justify the expenses Infineon has incurred or will incur in completing such acquisitions or joint ventures. Furthermore, any acquisition or joint venture may not be as successful as the acquisitions or joint ventures that the Infineon Group has completed in the past. The Infineon Group could also take on additional risks as a result of acquisitions or joint ventures, including the risk of potential guarantee or liability claims resulting from the disposal of former business units or joint ventures.

The realization of any of these risks could have a material adverse effect on the Infineon Group's business, financial condition and results of operations, which could in turn adversely affect Infineon's ability to fulfill its obligations under the Notes or cause the market price of the Notes to decline.

If unexpected difficulties were to arise following the completion of the Acquisition and integration of Cypress, or if Cypress' business failed to perform and/or develop as anticipated, the Infineon Group could be forced to recognize impairment losses on the tangible or intangible assets and/or goodwill of Cypress in the future.

Following the completion of the Acquisition, Infineon will have to recognize a substantial portion of the difference between the amount paid for the Acquisition and the book value of Cypress' equity as tangible and intangible assets and/or goodwill of Cypress. IFRS and the International Accounting Standard 36 (Impairment of Assets) ("IAS 36") require Infineon to test goodwill and intangible assets with indefinite lives at least annually, or more frequently if there is an indication of impairment, by using a single-step quantitative test performed at the level of a cash-generating unit ("CGU") or group of CGUs which compares the carrying amount of a CGU or group of CGUs with its recoverable amount. The excess (if any) of the carrying amount over the recoverable amount has to be recorded as an impairment loss. Tangible and intangible assets with definite lives are not tested annually, but rather when there are indicators of impairment. As a result, Infineon may be forced to recognize an impairment loss on the tangible and intangible assets and/or goodwill of Cypress in accordance with IFRS and IAS 36 if unexpected difficulties were to arise in the course of the integration of Cypress into the Infineon Group, if Cypress' business were to fail to develop as expected or if any other unexpected development were to occur affecting the performance or sustainability of Cypress' business.

Any such impairment losses could have a material adverse effect on the Infineon Group's business, financial condition and results of operations, which could in turn adversely affect Infineon's ability to fulfill its obligations under the Notes or cause the market price of the Notes to decline.

Following the completion of the Acquisition, the Infineon Group will be exposed to risks associated with the business of Cypress and in general Infineon will not have warranty claims against Cypress or its shareholders for any such risks.

Infineon derived the information about Cypress that is contained in this Prospectus, including the financial information about Cypress, from publicly available information, most notably the public disclosures of Cypress itself, and therefore could not examine whether or not such information or financial statements are accurate and complete, or whether they represent Cypress in a comprehensive manner. In preparing the acquisition offer and its terms, Infineon relied on the publicly available information about Cypress and could therefore only conduct a limited due diligence. Infineon Group might therefore be exposed to the risk that there are significant additional risks that have not been apparent from publicly available information or disclosed to Infineon during its due diligence.

Infineon believes that it may, following the completion of the Acquisition, face the following specific risks associated with the business of Cypress and that exist in addition to the risks described in this section "Risk Factors" with regard to the Infineon Group's business generally:

- *Cypress is dependent on third parties to manufacture, market and distribute its products. Problems in the performance or availability of these third parties could seriously harm Cypress' financial performance.*

Cypress relies significantly on independent contractors and subcontractors to manufacture its products, which includes wafer fabrication, assembly, packaging and testing. In 2017, Cypress sold a wafer fabrication facility which reduced its internal manufacturing capacity, thereby increasing its reliance on third-party suppliers. The purchaser operates the fabrication facility as a stand-alone business that manufactures wafers for Cypress and for other semiconductor companies. If the purchaser is unable to effectively operate the facility, faces financial difficulty, or is otherwise unable to meet Cypress' product demands, its supply of components may be adversely affected. Such events could lead to difficulties in delivering products to its customers on time and have a negative impact on Cypress' revenue and financial results.

Cypress also relies on channel partners for the marketing and sale of its products. Worldwide sales through its distributors accounted for approximately 72% of its revenue in its fiscal year 2018. Cypress faces ongoing business risks due to its reliance on its channel partners to create and maintain customer relationships where Cypress has a limited or no direct relationship. Should its relationships with its channel partners or their effectiveness decline, it faces the risk of declining demand. In addition, some of its channel partners are affiliated with companies from which Cypress sources materials or with which it has other business relationships, so any deterioration in its dealings with such a channel partner may disrupt the broader relationship. Cypress' contracts with its distributors may be terminated by either party upon notice. The termination of a significant distributor, reseller, or sales representative could (a) impact Cypress' revenue and limit its access to certain end customers, (b) result in the return of a material amount of inventory held by a terminated distributor or reseller that Cypress may not be able to resell or have to resell at a loss, and (c) jeopardize Cypress' ability to collect accounts receivable originating through a terminated distributor or reseller.

- *Cypress may not be able to consume minimum commitments under their "take or pay" agreements, which may have a material adverse impact on their earnings.*

Cypress has entered into agreements with certain vendors that include "take or pay" terms. Take or pay terms obligate Cypress to purchase a minimum required amount of services or make specified payments in lieu of such purchase. Cypress may not be able to consume minimum commitments under these take or pay terms, requiring payments to vendors, which may have a material adverse impact on our earnings.

- *Changes in U.S. and international tax legislation and tax policy could materially impact Cypress' business.*

A majority of Cypress' revenue is generated from customers located outside the U.S. and a substantial portion of its assets, including employees, are located outside the U.S. In the past, tax administrations globally have considered initiatives which could substantially eliminate utilization or reduce its ability to claim net operating losses and foreign tax credits, and eliminate various tax deductions. If any of these proposals are constituted into law, they could have a negative impact on Cypress' financial position and results of operations.

Cypress is subject to income and other taxes in the United States and various foreign jurisdictions. Its tax liabilities are affected by the amounts it charges in intercompany transactions for inventory, services, licenses, funding and other items. Cypress is subject to ongoing tax audits in various jurisdictions. Tax authorities may disagree with these intercompany transactions and may assess additional taxes or adjust taxable income on its tax returns.

- *If the tax incentive or tax holiday arrangements Cypress has negotiated in Malaysia and Thailand change or cease to be in effect or applicable, or if its assumptions and interpretations regarding tax laws and incentive or holiday arrangements prove to be incorrect, the amount of corporate income taxes Cypress has to pay could significantly increase.*

Cypress has structured its operations to maximize the benefit from various tax incentives and tax holidays extended to the Company in various jurisdictions to encourage investment or employment. Each tax incentive is separate from the others, and may be granted, withheld, extended, modified, truncated, complied with or terminated independently without any effect on the other incentives. The tax incentives are presently scheduled to expire at various dates within the next five years, subject in certain cases to potential extensions, which Cypress may or may not be able to obtain. Absent these tax incentives, the corporate income tax rate in these jurisdictions that would otherwise apply to it would be between 20% and 30%. The tax incentives that Cypress has negotiated are also subject to its compliance with various operating and other conditions. If Cypress cannot, or elects not to, comply with the operating conditions included in any particular tax incentive, it will lose the related tax benefits and it could be required to refund previously realized material tax benefits. Depending on the incentive at issue, Cypress could also be required to modify its operational structure and tax strategy, which may not be as beneficial to it as the benefits provided under the present tax concession arrangements. Cypress' interpretations and conclusions regarding the tax incentives are not binding on any taxing authority, and if its assumptions about tax and other laws are incorrect or if these tax incentives are substantially modified or rescinded it could suffer material adverse tax and other financial consequences, which could adversely affect its cash flows.

- *Cypress' financial results could be adversely impacted if companies that it has invested in fail to develop and successfully bring to market new and proprietary products.*

Cypress has made or committed investments in certain companies. There can be no guarantee that such businesses will perform as expected or at all, launch new products and solutions as expected or gain market acceptance. For example, during the second quarter of the fiscal year 2019, Cypress determined that its investment in Deca Technologies Inc. ("Deca") was other-than temporarily impaired due to significant reductions of previously estimated orders by certain customers, and consequently it recognized an impairment charge of USD 29.5 million.

The merger agreement underlying the Acquisition provides, in line with market practice for acquisitions of public companies, that warranties and representations made by Cypress shall not survive the closing of the acquisition. No warranties and representations are made by the shareholders of Cypress. Infineon is therefore not in a position to assert claims against Cypress or its shareholders based on risks, defects, losses and damages that may be identified following the completion of the merger.

If any of the business risks of Cypress proved to be more severe or if any unknown risks emerge, this could have a material adverse effect on the Infineon Group's business, financial condition and results of operations, which could in turn adversely affect Infineon's ability to fulfill Its obligations under the Notes or cause the market price of the Notes to decline.

V. Legal Risks

The Infineon Group's business and financial condition could be adversely affected by proceedings and liabilities as a result of the insolvency of Qimonda.

In April 2009, insolvency proceedings were opened with respect to Qimonda AG ("Qimonda"), a company into which Infineon had carved out and transferred all significant assets, liabilities and business activities attributable to the memory business (Memory Products) in 2006 and at which Infineon held a stake of about 77%. Insolvency proceedings were also opened for further domestic and foreign subsidiaries of Qimonda. The insolvency of Qimonda has given rise to various disputes between the insolvency administrator and the Issuer.

Although some claims originally brought by the insolvency administrator have been settled, claims relating to the proceedings in connection with the alleged economic reincorporation by way of activation of a shell company and liability for impairment of capital, which involve the Issuer, Infineon Technologies Holding B.V. or Infineon Technologies Investment B.V., as the case may be, have not been concluded yet. On the grounds of an alleged activation of a shell company without adequate disclosure of such, the insolvency administrator filed claims for payment of at least approximately EUR 3,350 million plus interest. Furthermore, the insolvency administrator continued to base a substantial part of his alleged payment claims, as already asserted out of court against Infineon in August 2011 for an unspecified amount, on liability for impairment of capital (in German "*Differenzhaftung*"). This claim is based on the allegation that, from the very beginning, the carved-out memory product business had a negative billion euro value. The insolvency administrator therefore asserts that Infineon is obliged to make good the difference between this negative value and the lowest issue price of the subscribed stock.

Should the alleged claims prove to be valid, the Infineon Group faces substantial financial obligations, which could have a material adverse effect on the Infineon Group's financial condition and cash flows.

The Infineon Group's business and financial condition could be adversely affected by current or future litigation, investigations and antitrust proceedings.

The Infineon Group is involved in various legal disputes and proceedings in connection with its existing or previous business activities. These relate, inter alia, to products, services, patents, export control and environmental issues. The ultimate resolution of these legal disputes could have a material adverse effect on the Infineon Group's results of operations.

Furthermore, in connection with its existing or previous business operations, the Infineon Group is also exposed to numerous legal risks, including risks relating to anti-corruption, competition and antitrust legislation as well as export controls and other compliance regulations. Claims could also be made against the Infineon Group on the basis of breaches of law committed by individual employees or third parties.

Since April 2008, the EU Commission has been investigating manufacturers of chips for smartcards for alleged violations of antitrust laws. In September 2014, the EU Commission imposed a fine of EUR 82.8 million on the Infineon Group which the Infineon Group appealed. In September 2018, the European Court of Justice referred the case back to the court of first instance in order to review the proportionality of the fine where the case is still pending. Two class actions for damages following these investigative proceedings and the decision of the EU Commission have been formally filed in Canada. Further, in July 2019, a direct customer filed a lawsuit against Infineon Technologies UK Limited, Renesas Electronics Corporation, Renesas Electronics Europe Limited and Renesas Electronics Europe GmbH in London (United Kingdom) relating to the aforementioned EU antitrust case. Infineon Technologies AG received service of process in this regards in August 2019.

There can be no assurance that other violations of antitrust and competition laws, past or present, will not be alleged. Specifically, that may be the case in connection with acquisitions where the compliance standards and policies of acquired businesses may have a lesser standard than those followed by Infineon.

Should further legal proceedings be commenced and should the above mentioned alleged claims and potential other claims prove to be valid, the Infineon Group might face substantial financial obligations, which could have a material adverse effect on the Infineon Group's financial condition and cash flows.

The Infineon Group might be faced with product liability or warranty claims.

Despite the Infineon Group's current efforts aimed at ensuring quality, defects may occur in the Infineon Group's products. The occurrence of defects, particularly in areas in which those defects could result in personal injuries, such as the Infineon Group's automotive division, could give rise to warranty claims or to liability for damages caused by such defects. The Infineon Group could also incur consequential damages and experience limited acceptance of the Infineon Group's products in the market. In addition, customers have from time to time notified the Infineon Group of potential contractual warranty claims in respect of products that the Infineon Group supplied, and are likely to do so in the future. These matters could have a material adverse effect on the Infineon Group's business and financial condition.

The Infineon Group could be subject to tax risks attributable to previous tax assessment periods and changes in tax legislation.

The Infineon Group could accrue unanticipated tax expenses in relation to previous tax assessment periods which have not yet been subject to a tax audit or are currently subject to a tax audit in the various countries in which the Infineon Group operates.

Many of the Infineon Group's German and foreign companies, are subject to a routine tax audit by German or foreign tax authorities. The German tax authorities finalized their last regular income tax audit of Infineon in 2018 (covering years 2010-2013). The next regular income tax audit is expected to commence in November 2019 (covered period most likely 2014-2017). In ongoing or future tax audits, the tax laws or relevant facts, especially in relation to acquisitions or group restructuring activities, could be interpreted by the tax authorities in a manner deviating from the relevant company's view. As a result, the tax authorities could revise original tax assessments and substantially increase the tax burden (including interest and penalty payments) of the relevant company.

The Infineon Group, so far, has not been made aware by any tax auditor of any significant findings which would not be reflected in the tax provisions, liabilities and contingent liabilities the respective Infineon Group company has accounted for. Nevertheless, it cannot be ruled out that past, ongoing and/or future tax audits may lead to an additional tax expense and/or payment, which may have a material adverse effect on the Infineon Group's business, financial condition and results of operations, which could in turn adversely affect the Infineon Group's ability to fulfill its obligations under the Notes or cause the market price of the Notes to decline.

In addition, any change in legislation concerning corporate income tax and other future changes in tax law in Germany or other countries in which the Infineon Group is subject to taxation could lead to higher tax expenses and also has the potential to significantly influence the development of the markets in which the Infineon Group operates generally.

The realization of any of these risks could have a material adverse effect on the Infineon Group's business, financial condition and results of operations, which could in turn adversely affect its ability to fulfill its obligations under the Notes or cause the market price of the Notes to decline.

The Infineon Group may not be able to protect its proprietary intellectual property and may be accused of infringing the intellectual property rights of others.

The Infineon Group's success depends on its ability to obtain patents, licenses and other intellectual property rights covering the Infineon Group's products, designs and manufacturing processes. The process of seeking patent protection can be long and expensive. Patents may not be granted on currently pending or future applications or may not be of sufficient scope or strength to provide the Infineon Group with meaningful protection or commercial advantage. In addition, effective copyright, trademark and trade secret protection may be unavailable or limited in some countries, and the Infineon Group's trade secrets may be vulnerable to disclosure or misappropriation by employees, contractors and other persons.

Competitors may also develop technologies that are protected by patents and other intellectual property rights. These technologies may therefore either be unavailable to the Infineon Group or be made available to the Infineon Group only on unfavorable terms.

Litigation, which could require significant financial and management resources, may be necessary to enforce the Infineon Group's intellectual property rights or to defend against claims of infringement of intellectual property rights brought against the Infineon Group. Lawsuits may have a material adverse effect on the Infineon Group's business. The Infineon Group may further be forced to stop producing substantially all or some of its products or to license the underlying technology upon economically unfavorable terms or the Infineon Group may be required to pay damages for the prior use of third-party intellectual property.

VI. Regulatory and Political Risks

Environmental laws and regulations may expose the Infineon Group to liability and increase the Infineon Group's costs.

The Infineon Group's operations are subject to many environmental laws and regulations wherever the Infineon Group operates, governing, among other things, the use and handling of hazardous substances typically used in the manufacturing of semiconductors (such as acids and solvents), wastewater discharges, waste disposal and the investigation and remediation of soil and ground water contamination. Such regulations or substance bans (e.g. Regulation (EC) No 1907/2006 concerning the registration, evaluation, authorization and restriction of chemicals ("REACH"), Directive 2011/65/EU on the restriction of the use of certain hazardous substances in electrical and electronic equipment) have been implemented in various countries of the world.

The increasing awareness of environmental protection and/or issues may result in even stricter environmental laws and regulations for the markets in which the Infineon Group operates. Such legislation may complicate the Infineon Group's research and development activities, may require the Infineon Group to change certain of its manufacturing processes and may lead to the implementation of additional compliance programs which could result in substantial additional costs. The Infineon Group is not able at this time to estimate the amount of additional costs that it may incur in connection with such future regulations.

The Infineon Group operates in various jurisdictions and is exposed to changes in legislation and policies affecting trade and investments and varying practices of the regulatory, tax, judicial and administrative bodies in those jurisdictions.

In the fiscal year 2017 and in the fiscal year 2018, 85% of the Infineon Group's revenues were generated outside Germany and 68% were generated outside Europe, Middle East and Africa ("EMEA"). The Infineon Group's business strategy envisages that it maintains R&D locations and manufacturing sites across the globe, with numerous manufacturing, assembly and testing facilities on three continents, including facilities that the Infineon Group operates jointly with a partner. The location of such facilities is determined by market entry hurdles, technology and cost factors. Substantial changes in legislation and policies affecting trade and investments as well as changing practices of the regulatory, tax, judicial and administrative bodies in the respective countries could restrict the Infineon Group's business activities in these countries and expose the Infineon Group to fines, sanctions and loss of reputation, which all could have an adverse effect on the Infineon Group's business and results of operations.

In addition, Cypress manufactures and sells many products that are subject to U.S. export control laws and related regulations. Cypress also manufactures and sells products that are sold indirectly to the U.S. government and may subject it to government procurement regulations, investigations or review. While Cypress maintains a system of controls over such products designed to maintain compliance with such laws and regulations, it cannot promise that these controls will be effective in all cases. If it fails to maintain an effective system of controls or it is otherwise found non-compliant with applicable laws and regulations, violations could lead to governmental investigations, fines, penalties and limitations on Cypress' ability to export products from the U.S., all of which could have a material effect on its financial result. Also, if these laws or regulations affecting exports change, they could adversely affect Cypress' ability to design, manufacture and sell some of its products outside the U.S., and could thereby materially adversely affect Cypress.

Reductions in government subsidies or demands for repayment of such subsidies could increase the Infineon Group's reported expenses or limit its ability to fund capital expenditures.

The Infineon Group's reported expenses have been reduced in recent years by various subsidies received from governmental entities. In particular, the Infineon Group has received, and expects to continue to receive, subsidies for investment projects as well as for R&D projects. The Infineon Group recognized governmental subsidies as a reduction of R&D expenses and cost of sales in an aggregate amount of EUR 105 million in the fiscal year 2017 and EUR 123 million in the fiscal year 2018.

The application for and implementation of such subsidies often involves compliance with extensive regulatory requirements, including, in the case of subsidies to be granted within the European Union, notification to the European Commission of the contemplated grant prior to disbursement. In particular, establishment of compliance with project-related ceilings on aggregate subsidies defined under European Union law often involves highly complex economic evaluations. If the Infineon Group fails to meet applicable requirements, it may not be able to receive the relevant subsidies or may be obliged to repay current or future subsidies, which could have a material adverse effect on the Infineon Group's business.

The terms of certain of the subsidies the Infineon Group has received impose conditions that may limit the Infineon Group's flexibility to utilize subsidized facilities as it deems appropriate, to divert equipment to other facilities, to reduce employment at the site, or to use related intellectual property outside the European Union. This could impair the Infineon Group's ability to operate its business in the manner the Infineon Group believes to be most cost effective

Risks related to the Notes

VII. Risks associated with the characteristics of the Notes

Risks related to Subordination

The obligations of the Issuer under the Notes constitute direct, unsecured and subordinated obligations of the Issuer ranking (i) subordinated to all present and future unsubordinated and subordinated obligations of the Issuer which do not fall under (ii) or (iii); (ii) pari passu among themselves and with all other present and future unsecured obligations of the Issuer ranking subordinated to all unsubordinated and subordinated obligations of the Issuer (including any Parity Security of the Issuer as defined in the Terms and Conditions), except for any subordinated obligations required to be preferred by mandatory provisions of law; and (iii) senior only to the rights and claims of holders Junior Securities (as defined in the Terms and Conditions).

In the event of the dissolution, liquidation, insolvency or any proceeding to avoid insolvency of the Issuer, the obligations of the Issuer under the Notes will be subordinated to all unsubordinated and all subordinated obligations of the Issuer which do not fall under (ii) or (iii) above so that in any such event payments will not be made under the Notes until all claims against the Issuer which, as described above, or by operation of law, rank senior to the obligations of the Issuer under the Notes have been satisfied in full. Any such proceedings may take a considerable amount of time so that payments in the event of the dissolution, liquidation, insolvency or any proceeding to avoid insolvency of the Issuer, if a payment will be made at all, might only be made once these proceedings have been concluded.

Investors should take into consideration that unsubordinated liabilities may also arise out of events that are not reflected on the Issuer's balance sheet, including, without limitation, the issuance of guarantees or other payment undertakings. Claims of beneficiaries under such guarantees or other

payment undertakings will, in winding-up or insolvency proceedings of the Issuer, become unsubordinated liabilities and will therefore be paid in full before payments are made to Holders.

In case of insolvency plan proceedings (*Insolvenzplanverfahren*) the Holders generally would have no voting right on the adoption of an insolvency plan presented by the Issuer, the relevant insolvency administrator or custodian (sections 237 and 246 of the German Insolvency Code). In addition, their claims would be waived after the adoption of the insolvency plan, unless the insolvency plan makes an exception to this general rule (section 225 paragraph 1 German Insolvency Code).

The Notes are undated securities in which an investment constitutes a financial risk for an indefinite period.

The Notes may never be redeemed. The Issuer is under no obligation to redeem the Notes at any time. The Holders have no right to call for their redemption. Certain market expectations may exist among investors in the Notes with regard to the Issuer making use of a right to call the Notes for redemption. Should the Issuer's actions diverge from such expectations, the market value of the Notes could be adversely affected, and the liquidity of the Notes could be reduced.

There is also no guarantee that an active public market in the Notes will develop.

Prospective investors should be aware that they may be required to bear the financial risks of an investment in the Notes for an indefinite period and may not recover their investment at all.

The Notes are subject to a risk of early redemption, since the Issuer has the right to call each Series of Notes.

In addition to the call dates, the Issuer has the right to call each Series of Notes for reason of minimal outstanding amount in relation to such Series of Notes, if a Gross-up Event or a Change of Control Event, a Tax Event, an Accounting Event, a Rating Agency Event or an Acquisition Event (each as defined in the Terms and Conditions) occurred. A Holder is exposed to the risk that due to such redemption his investment will have a lower than expected yield. Also, in case of a redemption of the Notes, a Holder may only be able to reinvest on less favorable conditions as compared to the original investment.

During any period when the Issuer may, or may be perceived to be able to, elect to call and redeem a Series of Notes, the market value of the relevant Series of Notes generally will not rise substantially above the price at which they can be redeemed.

The current IFRS accounting classification of financial instruments such as the Notes as equity instruments may change, which may result in the occurrence of an Accounting Event

In June 2018, the IASB (*International Accounting Standards Board*) published the discussion paper DP/2018/1 on "Financial Instruments with Characteristics of Equity" (the "**DP/2018/1 Paper**") and a public meeting was recently held on this matter. If the proposals set out in the DP/2018/1 Paper are implemented in their current form, the current IFRS accounting classification of financial instruments such as the Notes as equity instruments may change and this may result in the occurrence of an Accounting Event. In such an event, the Issuer may have the option to redeem, in whole but not in part, the Notes pursuant to the Terms and Conditions of the Notes. The implementation of any of the proposals set out in the DP/2018/1 Paper or any other similar such proposals that may be made in the future, including the extent and timing of any such implementation, if at all, is still uncertain. Accordingly, no assurance can be given as to the future classification of the Notes from an accounting perspective or whether any such change may result in the occurrence of an Accounting Event, thereby providing the Issuer with the option to redeem the Notes pursuant to the Terms and Conditions of the Notes.

For a description of the risks related to the early redemption of the Notes, see the Risk Factor entitled "*The Notes are subject to a risk of early redemption, since the Issuer has the right to call each Series of Notes*".

Interest payments under the Notes may be deferred at the option of the Issuer.

Holders should be aware that interest may not be due and payable (*fällig*) on the scheduled Interest Payment Date, and that the payment of the resulting Deferred Interest Payments is subject to certain further conditions. Failure to pay interest as a result of an interest deferral will not constitute a default of the Issuer or a breach of any other obligations under the Notes or for any other purposes. Holders will not receive any additional interest or compensation for the deferral of payment. In particular, the resulting Deferred Interest Payments will not bear interest.

Any deferral of interest payments will likely have an adverse effect on the market price of the Notes. In addition, as a result of the interest deferral provision of the Notes, the market price of the Notes may be more volatile than the market prices of other debt securities on which interest accrues that are not subject to such deferrals and may be more sensitive generally to adverse changes in the Issuer's financial condition.

The Holders are exposed to risks relating to fixed interest rate notes.

Until the respective First Reset Date of the Notes, the Notes bear interest at a fixed rate for the initial fixed rate period. A holder of a fixed interest rate Note carries the risk that the prices of the Notes can fall as a result of changes in the interest rate on the market. While the nominal interest rate of the Notes is fixed for the entire initial fixed rate period of the Notes and thereafter will be reset every five years to the reference rate plus the relevant margin specified in the Terms and Conditions, the current interest rate on the capital market ("**market interest rate**") typically changes on a daily basis. As the market interest rate changes, the price of a Note with a fixed interest rate also changes – but in the opposite direction. If the market interest rate increases, the price of a Note with a fixed interest rate typically falls until the yield of such a Note approximately equals the market interest rate. If the market interest rate decreases, the price of a fixed interest rate Note typically increases, until the yield of such Note is approximately equal to the market interest rate. Holders should be aware that movements of the market interest rate can adversely affect the market price of the Notes and can lead to losses for Holders if they sell their Notes.

Investors are exposed to the risk that the credit spread of the Issuer widens, resulting in a decrease in the price of the Notes.

The Holders are exposed to risks relating to the reset of interest rates linked to the EUR 5-year Swap Rate.

Starting with the end of the initial fixed interest rate period, the Notes bear interest at a rate which will be determined on each respective reset date at the EUR 5-year swap rate for the relevant reset period plus a margin and a step-up respectively. Investors should be aware that the performance of the EUR 5-year swap rate and the interest income on the Notes cannot be anticipated. Due to varying interest income, investors are not able to determine a definite yield of the Notes at the time they purchase them, so that their return on investment cannot be compared with that of investments having longer fixed interest periods. Investors in the Notes should bear in mind that neither the current nor the historical level of the EUR 5-year swap rate is an indication of the future development of such 5-year swap rate.

Furthermore, during each reset period, it cannot be ruled out that the price of the Notes may fall as a result of changes in the market interest rate, as the market interest rate fluctuates. During each of these

periods, the investor is exposed to the risk as described under "*The Holders are exposed to risks relating to fixed interest rate notes*".

Risks associated with the reform of interest rate 'benchmarks'

The Notes provide for the specific feature in the relevant Terms and Conditions that following the respective First Reset Date (as defined in the Terms and Conditions), interest amounts payable under the Notes are calculated by reference to the annual swap rate for swap transactions denominated in Euro with a term of 5 years, which appears on the Reuters Screen Page ICESWAP2 / EURFIXA.

This swap-rate, the underlying Euro Interbank Offered Rate ("**EURIBOR**") and other interest rates or other types of rates and indices which are deemed "benchmarks" (each a "**Benchmark**" and together, the "**Benchmarks**") have become the subject of regulatory scrutiny and recent national and international regulatory guidance and proposals for reform. Some of these reforms are already effective whilst others are still to be implemented. These reforms may cause such Benchmarks to perform differently than in the past, or to disappear entirely, or have other consequences which cannot be predicted. Therefore, because the Notes bear the specific risk that they might be impacted by any changes or reforms to the Benchmark, any such consequence could have a material adverse effect on the Notes.

International proposals for reform of Benchmarks include the European Council's regulation (EU) 2016/1011 of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds and amending Directives 2008/48/EC and 2014/17/EU and Regulation (EU) No 596/2014 (the "**Benchmark Regulation**") which is fully applicable since 1 January 2018.

Given that the Notes provide for the specific feature that the interest amount will be calculated by reference to a Benchmark under certain circumstances, the Benchmark Regulation could have a material impact on the Notes, including in any of the following circumstances:

- a rate or index which is a Benchmark may only be used if its administrator obtains authorization or is registered and in case of an administrator which is based in a non-EU jurisdiction, if the administrator's legal benchmark system is considered equivalent (Art. 30 Benchmark Regulation), the administrator is recognized (Art. 32 Benchmark Regulation) or the relevant Benchmark is endorsed (Art. 33 Benchmark Regulation) (subject to applicable transitional provisions). If this is not the case, Notes linked to such Benchmarks could be impacted; and
- the methodology or other terms of the Benchmark could be changed in order to comply with the terms of the Benchmark Regulation, and such changes could have the effect of reducing or increasing the rate or level or affecting the volatility of the published rate or level, and could have an impact on the Notes, including determination of the rate by the Issuer, the Calculation Agent or an independent adviser, as the case may be.

In addition to the aforementioned Benchmark Regulation, there are numerous other proposals, initiatives and investigations which may impact Benchmarks.

Following the implementation of any such potential reforms, the manner of administration of Benchmarks may change, with the result that they may perform differently than in the past, or Benchmarks could be eliminated entirely, or there could be other consequences which cannot be predicted.

Any changes to a Benchmark as a result of the Benchmark Regulation or other initiatives, could have a material adverse effect on the costs of administering or otherwise participating in the setting of a Benchmark and complying with any such regulations or requirements. Investors should be aware that any changes to a relevant Benchmark may have a material adverse effect on the value of the Notes.

Under the Terms and Conditions, certain benchmark replacement provisions will apply in case a Benchmark (or any component part thereof) used as a reference for the calculation of interest amounts payable under the Notes were to be discontinued or otherwise unavailable:

If a Benchmark (or any component part thereof) used to calculate interest amounts payable under the Notes for any interest period has ceased to be calculated or administered, the Issuer shall endeavor to appoint an independent adviser, which must be an independent financial institution of international repute or other independent financial adviser experienced in the international capital markets. Such independent adviser will be tasked with determining whether an officially recognized successor rate to the discontinued Benchmark exists. If that is not the case, the independent adviser will attempt to find an alternative rate which, possibly after application of adjustments or spreads, can replace the discontinued Benchmark. If the independent adviser determines a successor rate or alternative rate (the "**New Benchmark Rate**"), such rate will replace the previous Benchmark for purposes of determining the relevant rate of interest. Such determination will be binding for the Issuer, the Calculation Agent, the Paying Agents and the Holders. Any amendments pursuant to these fallback provisions will apply with effect from the respective effective date specified in the terms and conditions of the Notes. In case of a benchmark replacement, no adjustments will be made if this would result in a Rating Agency Event (as defined in the Terms and Conditions).

If the Issuer fails to appoint an independent adviser or if the adviser fails to determine a New Benchmark Rate following a discontinuation of a relevant Benchmark, the reference rate applicable to the immediately following interest period shall be the original benchmark rate determined on the last preceding interest determination date. This may result in the Notes effectively becoming fixed interest rate instruments even after the initial fixed interest rate period.

The replacement of a Benchmark could have adverse effects on the economic return of the Holder compared to the applicable benchmark rate.

VIII. Risks associated with the Solvency of the Issuer

Holders are subject to the risk of a partial or total failure of the Issuer to make interest and/or redemption payments.

Any person who purchases the Notes is relying on the creditworthiness of the Issuer and has no rights against any other person. Holders are subject to the risk of a partial or total failure of the Issuer to make interest and/or redemption payments that the Issuer is obliged to make under the Notes. The worse the creditworthiness of the Issuer, the higher the risk of loss. A materialisation of the credit risk may result in partial or total failure of the Issuer to make interest and/or redemption payments under the Notes.

Risk of a potential decrease in the market value of the Notes

In addition, even if the likelihood that the Issuer will be in a position to fully perform all obligations under the Notes when they fall due, actually has not decreased, market participants could nevertheless be of that opinion. Market participants may in particular be of such opinion if market participants' assessment of the creditworthiness of corporate debtors in general or debtors operating in the industries sector adversely change. If any of these risks occur, third parties would only be willing to purchase the Notes for a lower price than before the materialisation of said risk. The market value of the Notes may therefore decrease.

IX. Other Risks associated with the Notes

Certain rights of the Holders under the Terms and Conditions may be amended or reduced or even cancelled by holders' resolutions and any such resolutions will be binding for all holders of the respective Series of Notes. Any such resolution may effectively be passed with the consent of less than a majority of the aggregate principal amount of the respective Series of Notes outstanding.

Since the Terms and Conditions of each Series of Notes provide for meetings of Holders of the respective Series of Notes or the taking of votes without a meeting, the Terms and Conditions of such Series of Notes may be amended by majority resolution of the Holders of such Series of Notes and a Holder is subject to the risk of being outvoted by a majority resolution of the Holders of the respective Series of Notes. Pursuant to the German Act on Debt Securities of 2009 (*Schuldverschreibungsgesetz – "SchVG"*), the relevant majority for Holders' resolutions is generally based on votes cast, rather than on the aggregate principal amount of the relevant Notes outstanding, therefore, any such resolution may effectively be passed with the consent of less than a majority of the aggregate principal amount of the respective Series of Notes outstanding. As such majority resolution is binding on all Holders of the respective Series of Notes, certain rights of such Holder against the Issuer under the Terms and Conditions of such Series of Notes may be amended or reduced or even cancelled.

Since the Terms and Conditions of each Series of Notes provide that the Holders of the respective Series of Notes are entitled to appoint a Holders' Representative by a majority resolution of such Holders, it is possible that a Holder may be deprived of its individual right to pursue and enforce its rights under the Terms and Conditions of such Series of Notes against the Issuer, such right passing to the Holders' Representative who is then exclusively responsible to claim and enforce the rights of all the Holders of the relevant Series of Notes. Any such majority resolution will be binding on Holders, who have due and payable claims arising from the Notes, but who have not received payment from the Issuer prior to the amendment taking effect.

USE OF PROCEEDS

In connection with the offering of the Notes, the Issuer will receive net proceeds of EUR 1.185 billion, consisting of (i) EUR 593 million net proceeds with respect to the NC5.5 Notes (representing the aggregate issue price of the NC5.5 Notes less the fees and expenses incurred in connection with the issue of the NC5.5 Notes) and of (ii) EUR 592 million net proceeds with respect to the NC8.5 Notes (representing the aggregate issue price of the NC8.5 Notes less the fees and expenses incurred in connection with the issue of the NC8.5 Notes).

The Issuer intends to use these proceeds to cancel or prepay loans entered into for financing the proposed acquisition of Cypress Semiconductor Corporation ("Cypress") and for general corporate purposes (see "*Proposed Acquisition of Cypress*" below). If the proposed acquisition of Cypress has not been completed by 5 October 2020, the Issuer may exercise its right to redeem the Notes at 101% of their principal amount plus accrued interest and will in such case use the proceeds of the offering for that purpose.

INFORMATION ABOUT INFINEON

General

Infineon is a stock corporation (*Aktiengesellschaft*) organized under German law. Following the incorporation on 30 March 1999, the then parent company Siemens AG carved out and transferred its semiconductor operations to Infineon in the form of a non-cash contribution with economic effect as of 1 April 1999. Infineon was incorporated for an indefinite period.

Already as part of the group of Siemens AG and its subsidiaries ("Siemens Group"), Infineon has been at the forefront of the development, manufacturing and marketing of semiconductors starting in 1952. In 1999, the Siemens semiconductors group was spun off of the Siemens Group to form the Infineon Group and in March 2000 Infineon Technologies AG was listed on the Frankfurt Stock Exchange. Starting in 2001, Siemens AG gradually reduced its remaining stake in Infineon and completed its divestment in March 2006.

Infineon's registered office is in Neubiberg, Germany. It is registered with the commercial register of the District Court (*Amtsgericht*) of Munich under registration number HRB 126492. "Infineon Technologies AG" is the legal name and "Infineon" is the commercial name of the Issuer. The Issuer's Legal Entity Identifier (LEI) is: TSI2PJM6EPETEQ4X1U25.

Infineon's principal office is located at Am Campeon 1-15, 85579 Neubiberg, Germany; its telephone number is: +49 89 234-0.

The company has 17 manufacturing sites globally. As of 30 June 2019, the Infineon Group has about 41,808 employees worldwide.

As of 30 June 2019 S&P Global Ratings Europe Limited^{1,2} ("S&P"), has assigned a solicited long-term credit rating of BBB to Infineon Technologies AG³. In addition, EUR 500 million bonds issued with a maturity in 2022 were rated BBB⁴ as well. On 3 June 2019, S&P placed Infineon's BBB long-term issuer credit and issue ratings on credit watch with negative implications.

Information on the Issuer's website www.infineon.com and information accessible via this website does not form part of this prospectus unless it is incorporated by reference.

¹ S&P Global Ratings Europe Limited is established in the European Community and is registered under Regulation (EC) No 1060/2009 of the European Parliament and of the Council of 16 September 2009 on credit rating agencies, as amended (the "CRA Regulation").

² The European Securities and Markets Authority publishes on its website (<http://www.esma.europa.eu/page>List-registered-and-certified-CRAs>) a list of credit rating agencies registered in accordance with the CRA Regulation. That list is updated within five working days following the adoption of a decision under Article 16, 17 or 20 CRA Regulation. The European Commission shall publish that updated list in the Official Journal of the European Union within 30 days following such update.

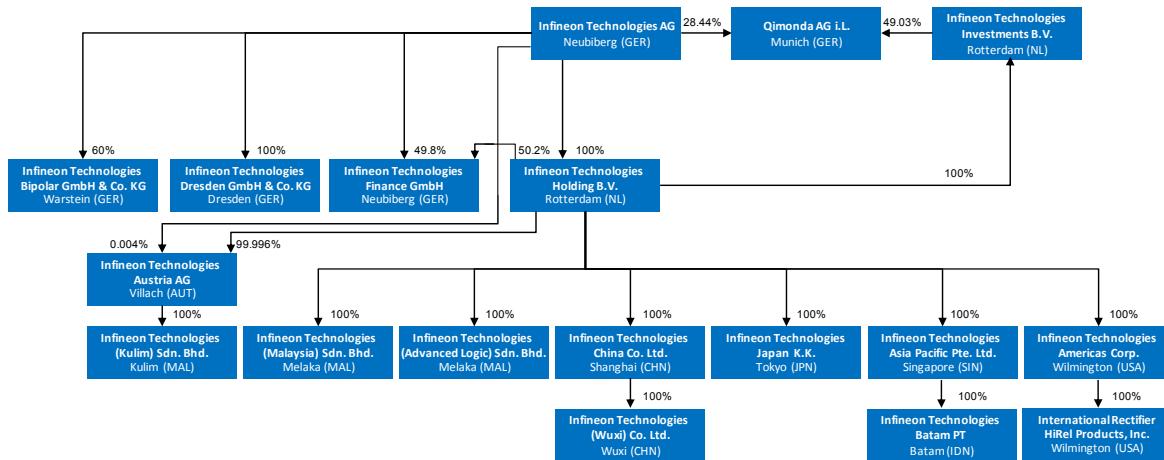

³ A credit rating assesses the creditworthiness of an entity and informs an investor therefore about the probability of the entity being able to redeem invested capital. It is not a recommendation to buy, sell or hold securities and may be revised or withdrawn by the rating agency at any time.

⁴ According to the definition published by S&P Global Ratings Europe Limited on its homepage a rating of BBB means "An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation. The ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories."

Organizational Structure

Infineon is the parent company of the Infineon Group, with 102 subsidiaries and affiliated companies (including minority holdings but excluding Qimonda AG i.L. and its affiliates) incorporated in jurisdictions throughout Europe and Asia, as well as in the Americas and Australia (as of 30 June 2019).

The following diagram depicts, in simplified form, the Infineon Group's corporate structure, as of 30 June 2019.

Business Overview

Principal Activities of the Infineon Group

General Overview

The Infineon Group designs, develops, manufactures and markets a broad range of semiconductors and systems solutions. The product range comprises standard components, customer-specific solutions for devices and systems, as well as specific components for digital, analogue, and mixed-signal applications. Its strategic focus lies on markets with long-term growth potential. It addresses

four megatrends affecting modern society: Energy Efficiency, Mobility, Security and Internet of Things & Big Data. Infineon Group's operations and customers are located mainly in Europe, Asia and North America.

The Infineon Group organizes its business operations in four main operating segments: Automotive, Industrial Power Control, Power Management & Multimarket and Digital Security Solutions (until 30 September 2018: Chip Card & Security). The Automotive segment designs, develops, manufactures and markets semiconductors for use in automotive applications and focuses on drivetrain, engine management, safety and comfort applications. In the fiscal year 2018, 43% of the Infineon Group's revenue was generated by its Automotive segment and as in previous years, the major growth drivers were the megatrends electro-mobility and advanced driver assistance systems. The Industrial Power Control segment designs, develops, manufactures and markets semiconductors and system solutions primarily for the use in industrial electronics applications. It specializes in the efficient conversion of electrical energy along the entire supply chain (generation, transmission, storage and consumption). The applications range from industrial drives, renewable energy like solar and wind power, to trains as well as major home appliances. The Power Management & Multimarket segment designs, develops, manufactures and markets power semiconductors for the use in power supplies going into servers, battery powered applications and a broad range of other applications, components for mobile devices and cellular network infrastructure as well as high-reliability components for application in harsh environments. The Digital Security Solutions segment designs, develops, manufactures and markets semiconductors and system solutions primarily for use in security applications. These range from traditional smartcards such as payment cards and government IDs to embedded security which includes security solutions for computing, automotive security, Industry 4.0, and the smart home. In addition, the Digital Security Solutions segment is supporting the three other segments with the integration of security as a function in their respective systems solutions.

In the nine-month period ended 30 June 2019, Infineon Group reported revenues of EUR 5,967 million (nine-month period ended 30 June 2018: EUR 5,552 million) with 41,808 employees worldwide as of 30 June 2019 (39,227 employees worldwide as of 30 June 2018). The Infineon Group operates 17 manufacturing sites in 10 countries.

Megatrends and Growth drivers

In offering semiconductor components and system solutions the Infineon Group is addressing four central challenges to modern society: Energy Efficiency, Mobility, Security and the Internet of Things together with Big Data, which in Infineon's view are the sources for future structural growth and the continued increase in demand for the Infineon Group's products.

Strategically, Infineon Group aims to focus on the fastest growing segments of the semiconductor market while tackling the global megatrends. As a technological leader it aims to leverage its core competencies in different end markets to maximize the return on investments. Also, Infineon Group targets to create value for its customers through its understanding of the relevant systems.

In Infineon's view, in the short- to long-term, electro mobility, automated driving, battery-powered applications and data center – power supply / power management will have the greatest growth rates while renewable energy, energy storage, distribution, collaborative robots, contactless payment and government IDs are expected to have medium to low growth rates. In the short- to medium-term, Infineon expects home appliances as well as powering 5G to have medium to low growth rates and in the medium- to long-term, embedded security applications are expected to have a medium growth rate. The other applications in the Infineon Group's target markets are expected to show standard growth patterns.

Megatrend Energy Efficiency

Due to a growing world population as well as better standards of living, consumption of electric power is constantly increasing and at the same time regulatory measures are taken to reduce CO₂ emissions. This drives the trend towards renewable energies (wind, solar power), energy storage, efficient power supplies (AC-DC conversion, DC-DC conversion) as well as (smart) motor control and drives (for automation, major home appliances and battery-powered devices).

Renewable Energies & Energy Storage

The Infineon Group benefits from the fact that wind power turbines and solar power plants require a multiple of power semiconductors per gigawatt of power generated as compared to conventional power plants. In contrast to coal, natural gas or nuclear power plants there is no synchronized turbine generating constant 50 hertz alternating current. This means that the generated electricity cannot be fed directly into the grid and power-electronic conversion systems are required. In addition, the shift to the use of renewable energies also changes the requirements of the entire energy supply chain. Generating electricity by wind and sun does not take place centrally in a small number of sites, but rather de-centrally at many different locations. Furthermore, fluctuation in power generation is typically not aligned with power demand patterns, making temporary storage necessary.

Power Supplies

The ongoing digitalization also impacts power supplies, increasing the need for efficient AC-DC as well as DC-DC conversion. Regarding AC-DC conversion, growth in this area of power supplies comes from improved performance as well as unit growth of devices. Infineon sees significant growth potential in the case of servers, where performance levels are crucial and correspondingly a high number of power semiconductors is required for power supplies. Demand for computing power and storage capacity is driven by cloud computing, e-commerce, social networks and increasingly by machine learning. The Infineon Group also sees growth opportunities in business with compact chargers and solutions for wireless charging of smartphones, tablets and lightweight notebooks. Furthermore, 5G telecommunications networks require a multitude of power conversion components as compared to prior generations. In DC-DC conversion, intelligent Point-of-Load power management is becoming increasingly important. Servers, PCs and communication devices are supplied with higher voltages which need to be precisely stepped down to the required low voltages directly at the processor.

(Smart) Motor Control and Drives

Electric drives are at the heart of a large number of industrial systems, for example cranes, conveyor belts and robots. Electric motors account for approximately 28% of worldwide electric power consumption and therefore the savings potential is correspondingly large when efficiency is increased. One possibility for reducing the power consumption of an electric motor is the use of an electronic control unit for variable speed control which requires a large number of power semiconductor components. Infineon expects an increasing market penetration of electronic speed control units in the future. For example, the manufacturers of home appliances are increasingly relying on variable speed drive motors, a trend called inverterisation. These motors are significantly more energy-efficient, emit less noise and have a longer service life than motors which only operate in either an on or an off-mode.

One important type of electronic motor is referred to as brushless direct current (BLDC) motor. In BLDC motors the commutation is electronic, depending on rotor position, rotor rotation speed and torque. This calls for the appropriate power semiconductors and, depending on the configuration, also for components for diagnostic and security functions. Because of their high level of energy efficiency and their low power-to-weight ratio, BLDC motors are particularly well-suited for use in battery-

powered systems. Examples here are cordless home appliances such as robot vacuum cleaners, cordless drills and electric lawn mowers.

Megatrend Mobility

Global population growth and increasing urbanization and industrialization are driving the demand for all types of transportation. From forms of mass transportation such as aircraft and trains to privately used vehicles like cars and e-bikes. The Infineon Group benefits from the increased number of vehicles and especially from the growth in the number of electronic systems per vehicle.

Electro-Mobility & Charging Infrastructure

Driven by regulatory requirements, the automotive industry is continuously working to reduce emissions. A European Commission regulation requires the reduction of average fleet emissions to 95 grams of CO₂ per kilometer by 2021. Comparable regulations aimed at bringing down emissions exist in other major regions of the world. In order to reduce the fleet average to the mandated CO₂ value, car manufacturers add hybrid or electric vehicles to their portfolio. These have a significantly higher semiconductor content than conventional cars. The Infineon Group offers a wide range of semiconductor components for these applications.

The steadily increasing number of electric vehicles also requires building up a corresponding charging infrastructure. Depending on the system topology, the charging stations use different types of power semiconductors, as offered by the Industrial Power Control and Power Management & Multimarket segments.

In addition, sustainable and fast mobility within metropolitan areas as well as between big cities is one of the key topics of the 21st century. Infineon Group's components are used both in local public transportation trains, subway trains and trams as well as in high-speed trains.

Automated Driving & Traction Systems

Today, the majority of innovations in vehicles is based on electronics. The Infineon Group provides a comprehensive product portfolio for advanced driver assistance systems and automated driving. Systems for partially and fully automated driving essentially consist of sensors (for example radar, cameras in the vehicle's interior or exterior), a central high-performance computer for the evaluation of sensor data as well as calculation of the driving strategy (the system's intelligence) and actuators (steering, brakes, engine control and transmission). The higher the automation level of a car, the more semiconductors are required to implement the desired functionality. For safety reasons, redundancy of sub-systems is required, again driving the semiconductor content per car.

Megatrend Security

In a world that is becoming continuously more connected and digital, the need to protect the integrity of data and of securing devices against unauthorized access steadily increases. This is driving growing demand for hardware-based security solutions.

Relevant applications include government ID's, security for mobile devices, secure authentication for the Internet of Things, security for industrial applications (smart factories) and security for connected vehicles. For example, the market penetration of chip-based government ID's is constantly increasing, as more and more countries are making the transition to chip-based documents or are increasing the range of such documents in use.

Today payment services can be integrated into mobile devices thanks to the development of smartphones and wearables, the mobile internet and Near Field Communication (NFC) technologies. The Infineon Group offers the necessary security solutions involving the storage and processing of sensitive information and supplies the security chip, known as the Secure Element (SE).

Furthermore the demand for data and IT security in connected vehicles is rising. The Infineon Group addresses this opportunity with its security controllers – either as a separate component or integrated in their automotive microcontrollers.

Megatrend Internet of Things & Big Data

The Internet of Things refers to devices and machines connected to the internet, thus enabling data exchange and device control. Growth in the number of such devices drives the demand for power semiconductors and sensors, and especially security solutions. Infineon Group supplies various security chips and security solutions for the authentication of electronic systems. From complex IT infrastructure with numerous servers and routers all the way down to computers and tablets.

Industry 4.0 is another driver for an increasing demand for security solutions. A combination of software and hardware-based security solutions can protect networked machines and communication nodes. Examples are the TPM (trusted platform module) chips from the Infineon Group, which can be integrated in routers, industrial PC's and complex control units and which serve to identify devices to communication partners in the network.

Furthermore, the megatrend and growth driver Internet of Things & Big Data includes collaborative robots, human machine interaction, virtual reality/augmented reality, smart home and mobile communications.

The Infineon Group offers not only the necessary sensors, microcontrollers and power semiconductors, but also provides numerous start-ups as well as research institutions with know-how in the area of motor control, sensor systems, communications connections and security. The Infineon Group's sensors such as silicon microphones and radar sensors are used in various human machine interaction applications such as voice assistants or gesture controls.

The Infineon Group's Segments

The Infineon Group organizes its business operations into four main segments. The operations of Cypress (see "*Information about Cypress*" and "*The Proposed Acquisition of Cypress*") are expected to complement and strengthen Infineon Group's business and thus enable the offering of system solutions targeting mainly automotive, industrial and Internet of Things (IoT) end markets.

The Automotive segment

Business description

Infineon Group offers a very broad product portfolio of microcontrollers, sensors, as well as discrete power semiconductors and power ICs, serving the major automotive application segments: powertrain and engine management assistance and safety systems as well as comfort electronics and security applications. Fields of applications comprise:

- Powertrain: alternator control, battery charging control, battery management, combustion engine control, electric motor control, generator control, start-stop system and transmission control;
- Assistance and safety systems: airbag, ABS (Anti-Blocking System), automatic parking, autonomous emergency braking system, blind spot detection, cruise control, distance warning systems, electronic chassis control, electronic power steering, electronic stability control, lane departure warning system, tire pressure monitoring system;
- Comfort electronics: air conditioning, door electronics, electronic control units, electronic seat adjustment, hatch door, lighting, power windows, steering, sunroof, suspension, and windshield wipers;

- Security: digital tachograph, communication (car-to-car, car-to-infrastructure), manipulation protection (e.g. odometer), protection against software manipulation and original spare parts authentication.

Major growth drivers of the Automotive segment are electro-mobility and automated driving. The Infineon Group supplies powertrain solutions for all types of electric vehicles, be it pure electric vehicles, full hybrid and plug-in hybrid vehicles or so-called mild hybrid vehicles based on 48 volt technology. It also provides sensors and microcontrollers for use in advanced driver assistance systems. Both trends are increasing the semiconductor content per vehicle and the Issuer expects that they will account for a significant part of the Group's revenue growth in the Automotive segment over the next five years. In addition, the Group also expect to continue to benefit from new functions in the areas of comfort and safety as well as from the further electrification of conventional car functions.

The Infineon Group's portfolio of power semiconductors, sensors and microcontrollers puts it in the position to address the systems of today and to actively shape the transformation of the automotive industry. The Group's expertise in silicon-based IGBTs and IGBT modules supports it in the development of silicon carbide-based power semiconductors going forward. In the area of sensors, it benefits from the continuously increasing number of sensors per vehicle. Radar systems are expected to be enhanced by additional sensor technologies, a development the Group is anticipating for example with the development of a Lidar (light detection and ranging) solution. Also, with the 32-bit microcontrollers of its AURIX™ family the Infineon Group benefits from the trend towards higher levels of automation as these devices control electronic systems (for example steering and braking systems) and work as a host controller that ensures the functional safety of central computing platforms.

In the automotive field, Infineon Group's and Cypress' portfolios are expected to complement each other and therefore address an even broader range of applications. The automotive microcontroller portfolio of Cypress mainly covers body and infotainment applications, as compared to Infineon Group's position in chassis, powertrain and advanced driver assistance systems. This complementary portfolio is expected to result in broader customer access and cross selling opportunities. With the addition of Cypress, the portfolio is furthermore expected to expand through connectivity (WiFi, Bluetooth, USB-C) and external NOR flash memory components for processors. NOR flash supports the growing use of high compute-power processors in cluster/infotainment and automated driving. Connectivity and security components are expected to become more and more relevant for higher level of vehicle automation, including for example over-the air software updates. See also "*Information about Cypress*".

Key customers in the Automotive segment include: Aptiv, Bosch, BYD, Continental, Delphi, Denso, Hella, Hitachi, Hyundai, Keihin, Lear, Mando, Mitsubishi Electric, Omron, Preh, Valeo, Veoneer and ZF.

The Infineon Group recorded revenue of EUR 2,609 million for the Automotive segment in the nine-month period ended 30 June 2019, an increase of 8% on the nine-month period ended 30 June 2018 figure of EUR 2,417 million. The Automotive segment generated 44% of the Infineon Group's revenue in the nine-month period ended 30 June 2019. The Industrial Power Control segment specializes in the efficient conversion of electric energy along the entire supply chain (generation, transmission, storage and consumption).

The segment's product portfolio comprises discrete IGBTs, IGBT bare dies, IGBT modules and IGBT stacks, as well as driver ICs and driver boards for controlling IGBT modules and covers practically the entire power range from a few hundred watts to several megawatts. In addition, it includes Intelligent Power Modules (IPM), i.e. the combination of a controller, a driver IC and a switch in one package.

Applications of the semiconductor products of the Industrial Power Control segment include:

- Renewable energy generation: photovoltaic systems, wind power turbines;
- Energy transmission: FACTS (Flexible AC Transmission Systems) and offshore wind farm HVDC (High-Voltage Direct Current) lines;

Strategically speaking, discrete IGBTs, IGBT bare dies, IGBT modules and the associated drivers form the core business of the Industrial Power Control segment. The Infineon Group wants to further grow and take advantage of economies of scale in this segment in both research and development and in manufacturing. The Group is strengthening this core by pursuing its technology leadership also in silicon carbide components, therewith creating an attractive product portfolio for its customers.

The Industrial Power Control segment also uses know-how relating to the application of IGBT to realize additional growth potentials in adjacent product areas. This applies on the one hand to products for digital power control, including the development of driver algorithms, and on the other hand to functional integration, as evidenced by so-called intelligent power modules (IPM).

Based on this portfolio, Industrial Power Control addresses especially high-growth application fields such as industrial automation, renewable energies and home appliances. At the same time, the portfolio serves emerging applications for power semiconductors such as the charging infrastructure for electric vehicles and electrified commercial and agricultural vehicles.

Infineon Group's and Cypress' product portfolios are expected to complement each other in the Industrial Power Control segment. For example, in a variable-speed electric drive application going into air-conditioning, Infineon Group is expected to contribute power semiconductors and sensors and Cypress is expected to contribute the microcontrollers and connectivity. This portfolio combination is expected to not only enable cross-selling opportunities but also an enhanced system solution offering. In fact, both companies have started a commercial cooperation in this application field in the first half of 2018. See also "*Information about Cypress*".

⁶ Segment Result Margin is calculated as the percentage of Segment Result in relation to revenue.

Key customers in the Industrial Power Control segment include: ABB, Alstom, Bombardier, CRRC, Danfoss, Eaton, Emerson, Goldwind, Innovance, Midea, Nidec, Rockwell, Schneider Electric, Siemens, Sungrow, Toshiba, Vestas and Yaskawa.

The Digital Security Solutions segment

Business description

The Digital Security Solutions segment offers applications aimed at increasing security in a more and more connected, digital and smart world. It designs, develops, manufactures and markets semiconductors and system solutions primarily for use in security applications. These applications range from traditional smartcards such as payment cards and government IDs to new areas such as embedded security which includes security solutions for computing, automotive security, Industry 4.0, and the smart home. The segment's core competencies lie in the fields of contactless interface technology and embedded microcontroller solutions (embedded control). In addition to its role as an independent business unit, the Digital Security Solutions segment also supports the three other segments with the integration of security as a function in their system solutions and in doing so is creating additional potential for differentiation.

The Digital Security Solutions segment's fields of applications include:

- Authentication: accessories, brand protection, game consoles, industrial control systems;
- Automotive: Connected vehicles (e.g. eCall, car-to-car communications, car-to-infrastructure communications), electronic toll collection, protection against manipulation (e.g. odometer, digital tachograph);
- Governmental identification documents: Driver's licenses, healthcare cards, national identity cards, passports;
- Internet of Things: Connected driving, Industry 4.0, smart city, smart home;
- Mobile communications: Conventional SIM cards, high-end SIM cards, embedded SIM (machine-to-machine communication);
- Payment systems: Credit/debit cards, mobile payment, contactless payment;
- Ticketing, access control;
- Trusted computing.

The Digital Security Solutions segment expands its product portfolio into software and system solution offering in order to address customer needs in these growing areas. The segment realizes in the meantime approximately one quarter of its revenue with software-related projects. Its software and

system competence puts Infineon Group in a position to provide reference designs and security modules which are ready-to-use.

Infineon aims to combine its security expertise and components in Digital Security Solution segment with Cypress' microcontrollers and connectivity. Through this Infineon Group will be in a better position to address the security requirements of the growing Internet of Things market. One such example would be a combination of Cypress' connectivity and microcontroller with Infineon Group's security component to a security-hardened microcontroller. Such a microcontroller would be able to connect to the cloud and provide state-of-the-art data security, for example for smart IP cameras.

Key customers in the Digital Security Solutions segment include: Gemalto, Giesecke & Devrient, Google, HP, Idemia, Lenovo, Microsoft, Samsung, US Government Publishing Office and Watchdata.

The Digital Security Solutions segment generated revenue totaling EUR 480 million in the nine-month period ended 30 June 2019, 4% less than the EUR 501 million in the nine-month period ended 30 June 2018. The Digital Security Solutions segment accounted for 8% of the Infineon Group revenue in the nine-month period ended 30 June 2019. The Segment Result amounted to EUR 55 million in the nine-month period ended 30 June 2019, a decrease of 32% compared to EUR 81 million in the nine-month period ended 30 June 2018. The Segment Result Margin amounted to 11.5% in the nine-month period ended 30 June 2019.

Other Operating Segments

Other Operating Segments comprise the remaining activities of businesses that have been disposed of, and other business activities. Since the sale of the Wireless mobile phone business in 2011, supplies to Intel Mobile Communications are included in this segment. Also included are, since the sale of the major part of Infineon's Radio Frequency Power Components business, supplies of LDMOS wafers and related components, as well as packaging and test services for Cree, Inc.

Corporate and Eliminations

Corporate and Eliminations reflects the elimination of intragroup revenue and profits/losses to the extent that these arise between the individual segments.

Similarly, certain items are included in Corporate and Eliminations, which are not allocated to the four main operating segments described above. These include certain corporate headquarters cost and selected topics, which are not allocated to the segments since they arise from corporate decisions and are not within the direct control of segment management.

Furthermore, raw materials, supplies and work in progress of the common frontend production, and raw materials and supplies of the common backend production, are not under the control or responsibility of the operating segment management and are therefore allocated to operations. Only work in progress of backend production and finished goods are allocated to the operating segments.

Manufacturing

The Infineon Group operates 17 manufacturing sites in 10 countries: Villach (Austria); Beijing and Wuxi (both China); Dresden, Regensburg and Warstein (all Germany); Cegléd (Hungary); Batam (Indonesia); Cheonan (Korea); Melaka and Kulim (both Malaysia); Tijuana (Mexico); Singapore; and Leominster, Mesa, San José and Temecula (all USA).

By far the largest share of the amount invested in property, plant and equipment was accounted for by investments in manufacturing facilities in the fiscal year 2018. Approximately two thirds of this amount were spent with respect to frontend, the rest essentially spent with respect to backend manufacturing facilities.

In recent years, the Infineon Group has seen a rapid increase in the demand for power semiconductors due a number of structural growth drivers in its target markets. In Infineon's view, in the field of power semiconductors competitive differentiation is to a substantial degree achieved by the process technologies applied in manufacturing. Infineon was the first company to deploy 300-millimeter thin wafer technology for power semiconductors at its frontend manufacturing site in Dresden and expanded capacities in differentiating manufacturing technologies for power semiconductors such as the high-voltage MOSFETs of the CoolMOS™ family and IGBT power switches. Given Infineon's expectation of on-going demand growth in its end markets, Infineon decided in May 2018 to build a second 300-millimeter fab. The construction of a fully automated facility for the manufacture of 300-millimeter thin wafers at the Villach (Austria) site started in November 2018. Volume manufacturing is planned to begin in early 2021.

In addition, the Infineon Group is expanding its 200-millimeter frontend manufacturing capacities in Kulim in differentiating manufacturing technologies for sensors as well as discrete and integrated power semiconductors.

Furthermore, it is continuing to ramp volume production capacities for its silicon carbide MOSFETs and silicon carbide diodes on 150-millimeter wafers. The Infineon Group is now one of the first companies worldwide to manufacture its entire silicon carbide portfolio on wafers with a 150 millimeter diameter. The expansion of silicon manufacturing capacities at the aforementioned Villach site will also ultimately facilitate the expansion of manufacturing capacities for silicon carbide and gallium nitride. Existing buildings and manufacturing lines can be reused for these compound semiconductors. This results in capex-efficient expansion of capacities.

On 9 November 2018, Infineon acquired all of the shares in Sillectra GmbH, Germany. Sillectra GmbH is developing a wafer splitting technology, called Cold Split, which allows to precisely separate crystal material resulting in almost no loss of material in comparison to the conventional sawing approach. This technology can be used in two ways: One is cutting a boule into wafers yielding significantly more wafers than the conventional sawing approach. The other use case is to split a processed wafer to allow the re-use of its backside. Infineon is planning to further develop the technology into volume production within the next years.

The purchase price for Sillectra GmbH amounted to EUR 124 million.

Corresponding to the expansion of frontend manufacturing facilities, the Infineon Group is expanding its backend manufacturing capacities for IGBT modules for industrial and automotive applications.

Due to the cyclical nature of the semiconductor business and the need to maintain high operational flexibility, the Infineon Group uses cycle management with the aim to provide the Group with flexibility in periods of volatile revenue developments.

The powers of these bodies are set forth in the German Stock Corporation Act (*Aktiengesetz*), Infineon's articles of association and the rules of procedure (*Geschäftsordnungen*) of the Management Board and the Supervisory Board, respectively, and its committees. The Management Board and the Supervisory Board work independently of each other. No person may serve on both boards at the same time.

The Management Board is responsible for managing the Infineon Group's day-to-day business and for representing Infineon in dealings with third parties. The Supervisory Board appoints and may dismiss members of the Management Board. The Supervisory Board supervises and advises the Management Board in its management of the Infineon Group and represents Infineon in all (legal) matters between a member of the Management Board and Infineon. In general, the Supervisory Board is not directly involved in the day-to-day management of the Infineon Group. However, pursuant to Infineon's articles of association, certain transactions require the prior consent of the Supervisory Board.

In performing their duties, members of both the Management Board and the Supervisory Board must exercise the duty of care expected of a reasonable business person and a duty of loyalty. Members of the Management Board and the Supervisory Board must consider a broad range of interests, including those of Infineon and its shareholders and employees.

The members of the Management Board and the Supervisory Board may be held personally liable to Infineon for breaches of their duties of loyalty and care. Infineon must bring an action for breach of duty against the Management Board or Supervisory Board upon a resolution of the stockholders passed at a Shareholders' Meeting by a simple majority of votes cast.

Management Board

The Supervisory Board generally appoints the members of the Management Board for a term of up to five years. Extensions of the term of office by re-appointment are permitted. Pursuant to the articles of association of Infineon, the Management Board must have at least two members. The Supervisory Board determines the number of members of the Management Board. Currently, the Management Board has four members.

Any two members of the Management Board or any individual Management Board member together with an authorized signatory with statutory power of attorney (*Prokurist*) may legally represent Infineon.

The Management Board must report regularly to the Supervisory Board, particularly on business policy and strategy, on profitability and on the current business of the Infineon Group, as well as on any exceptional matters that may arise. If not otherwise required by law, the Management Board decides with a simple majority of the votes cast. Under certain circumstances, such as a serious breach of duty or a vote of no confidence by the stockholders in an annual general meeting, a member of the Management Board may be removed by the Supervisory Board prior to the expiration of his/her term. A member of the Management Board may not deal with, or vote on, matters relating to proposals, arrangements or contracts between him/herself and Infineon.

Supervisory Board

The Supervisory Board consists of 16 members, including eight members elected by the shareholders at the annual general meeting in accordance with the provisions of the German Stock Corporation Act (*Aktiengesetz*) and eight members elected by the Infineon employees in accordance with the provisions of the German Co-Determination Act (*Mitbestimmungsgesetz*).

The Supervisory Board members are elected for a fixed term. Each term usually expires at the end of the annual general meeting in the fourth fiscal year after the year in which such Supervisory Board member was elected, i.e. after five years. Supervisory Board members may be re-elected.

Unless otherwise provided by law, resolutions of the Supervisory Board are passed by a simple majority of the votes cast. In case of any deadlock, the relevant resolution must be voted on again, with the Chairman of the Supervisory Board being entitled to cast a second vote if the second ballot is tied again.

The Chairman is usually a shareholder representative elected by a two-third majority of all members of the Supervisory Board.

The Supervisory Board's main functions are supervising and advising the Management Board in its management of Infineon, appointing members of the Management Board, approving the financial statements, and consenting to matters that are subject to the Supervisory Board's consent under German law or Infineon's articles of association and to matters which the Supervisory Board has made subject to its prior approval.

The Supervisory Board may form committees and establish their duties and powers. To the extent permitted by law, the Supervisory Board may also delegate to such committees decision-making powers of the Supervisory Board.

Committees of the Supervisory Board

As of the date of this Prospectus, the Supervisory Board has established five committees: the mediation committee ("**Mediation Committee**") pursuant to section 27 paragraph 3 of the German Co-Determination Act (*Mitbestimmungsgesetz*), the nomination committee ("**Nomination Committee**"), the executive committee ("**Executive Committee**"), the investment, finance and audit committee ("**Audit Committee**") and the strategy and technology committee ("**Strategy and Technology Committee**").

The sole duty of the Mediation Committee, which consists of the chairman of the Supervisory Board, the deputy chairman and one further representative of the shareholders and employees respectively, is to submit recommendations for the appointment of Management Board members to the Supervisory Board if the plenum of the Supervisory Board is unable to pass a resolution on such matters with the requisite two-third majority.

The Nomination Committee which consists exclusively of three shareholders' representatives of the Supervisory Board discusses candidates as future shareholder representatives to the Supervisory Board and recommends their election at the annual general meetings.

The Executive Committee consists of the chairman of the Supervisory Board, the deputy chairman and one further representative of the shareholders and employees respectively. It prepares decisions to be taken by the full Supervisory Board regarding the appointment or dismissal of members of the Management Board, the terms of the service contracts and other contractual arrangements between Infineon and the members of the Management Board and Management Board compensation issues.

The Audit Committee, consisting of two representatives of the shareholders and employee representatives respectively, monitors the financial reporting process and discusses and examines the financial statements and the consolidated financial statements prepared by the Management Board, the combined management report (*Lagebericht*) and the interim financial reports. The Audit Committee gives recommendations with respect to the approval of the separate financial statements and consolidated financial statements by the Supervisory Board based on the independent auditors' report, engages the independent auditors selected by the annual general meeting to audit the separate financial statements and consolidated Financial Statements and review the interim financial reports,

specifies the key areas to be examined in audit activities jointly with independent auditors and is responsible for setting the independent auditors' compensation.

The Strategy and Technology Committee which consists of three shareholder representatives and three employee representatives, deals with topics concerning the business strategy of Infineon. It reviews segment reports and examines technological and manufacturing strategies.

Corporate Governance

The German Corporate Governance Code (*Deutscher Corporate Governance Kodex*) dated 7 February 2017 (the "**Corporate Governance Code**") contains certain recommendations (*Empfehlungen*) and suggestions (*Anregungen*) for the management and supervision of German listed companies with regard to shareholders, their corporate bodies, transparency, accounting, and the audit of financial statements. Such companies are under no legal obligation to comply with the recommendations or suggestions in the Corporate Governance Code unless, and to the extent, they have publicly declared that they will do so. Section 161 of the German Stock Corporation Act (*Aktiengesetz*) merely requires the management and supervisory board of a listed company to declare annually to what extent they comply with the recommendations of the Corporate Governance Code or to explain why certain recommendations were or are not followed.

In the declaration of compliance issued in November 2018, the Management Board and Supervisory Board had declared a deviation from section 5.3.2 paragraph 3 sentence 3 of the Corporate Governance Code, according to which the chairman of the supervisory board should not chair the audit committee. The reason for this deviation was that the chairman of the Audit Committee, Dr. Eckart Sünner, was also elected chairman of the Supervisory Board at the meeting of the Supervisory Board on 22 February 2018. At the meeting of the Supervisory Board held on 6 August 2019, Dr. Wolfgang Eder was elected as the new chairman of the Supervisory Board. Dr. Sünner has resigned from his position as chairman of the Supervisory Board. Therefore, the deviation is obsolete.

In August 2019, the Management Board and Supervisory Board therefore updated the 2018 declaration of compliance. Infineon has complied with all recommendations of the Corporate Governance Code in the version dated 7 February 2017 and will continue to do so. In relation to section 5.3.2 paragraph 3 sentence 3 of the Corporate Governance Code this has been the case since the meeting of the Supervisory Board on 6 August 2019, in which Dr. Eder was elected chairman of the Supervisory Board.

The declarations of compliance are available on Infineon's website (www.infineon.com).

Major Shareholders

Under Infineon's articles of association, each of Infineon's shares represents one vote. Major shareholders do not have different voting rights. Under the free float definition applied by Deutsche Börse AG, the free float amounts to approximately 99.52% as of 30 June 2019.

Based on such notifications received from shareholders until 30 June 2019, the following shareholders hold, in the aggregate, the following voting rights (such direct or indirect holdings in voting rights corresponding to shares) of more than 3% in Infineon:

Name	Percentage of voting rights ³⁴	Date of latest notice / date on which threshold was crossed/reached
BlackRock, Inc.	5.36%	28 June 2019 / 24 June 2019
Allianz Global Investors Europe GmbH	4.82%	21 June 2019 / 18 June 2019
Kingdom of Norway	3.14%	31 May 2019 / 29 May 2019

Investments

In the fiscal year 2018, the Infineon Group's investments in property, plant and equipment and in intangible assets amounted to EUR 1,254 million in total, representing an increase of EUR 232 million or 23% compared to the EUR 1,022 million invested in the previous year. Relative to revenues, these investments in the fiscal year 2018 increased to 16.5% compared to the previous year's 14.5%. EUR 1,090 million of the overall investment volume was dedicated to property, plant and equipment (previous year: EUR 874 million) and EUR 164 million to intangible assets including capitalized research and development costs (previous year: EUR 148 million).

By far the largest share of the amount invested in property, plant and equipment is accounted for by investments in manufacturing facilities. In the fiscal year 2018, approximately two thirds of this amount went to frontend manufacturing facilities, with the rest mainly going to backend manufacturing facilities.

Investments in the fiscal year 2018 focused on the following areas:

- Expansion of 300-millimeter frontend manufacturing capacities in Dresden in differentiating manufacturing technologies for power semiconductors such as the high-voltage MOSFETs of the Infineon Group's CoolMOS™ family and IGBT power switches.
- Expansion of 200-millimeter frontend manufacturing capacities in Kulim in differentiating manufacturing technologies for sensors as well as discrete and integrated power semiconductors.
- Continued ramp of volume production capacity of the Infineon Group's silicon carbide MOSFETs and silicon carbide diodes on 150-millimeter wafers.
- Expansion of backend manufacturing capacities for IGBT modules for industrial and automotive applications. Backend manufacturing capacities were expanded to accommodate the strong demand for IGBT modules of the HybridPACK™ family as well as in Wuxi at the new joint venture with the Chinese automobile manufacturer SAIC Motor Corporation Ltd. The joint venture, named SIAPM (SAIC Infineon Automotive Power Modules (Shanghai) Co., Ltd.), was formed on 7 February 2018 and has been manufacturing since August 2018.

Furthermore, during the fiscal year 2017, investments were made in frontend and backend sites primarily regarding a further increased level of automation as well as with regards to adaptation and retooling of manufacturing lines to accommodate the modified product portfolio, in particular due to

³⁴ Based on Infineon's share capital as of 30 June 2019.

the beginning of volume production for new technologies and products, as well as in regard to equipment for innovative technologies, capacity extension and further improvements in quality.

In the nine-month period ended 30 June 2019 investments in property, plant and equipment amounted to EUR 989 million and in intangible and other assets to EUR 112 million. These amounts are included in net cash used in investing activities from continuing operations of EUR 2,110 million for the same period. This figure included also a net cash out of EUR 123 million to acquire 100% of the shares in Sillectra GmbH, as well as EUR 895 million used for purchases of financial investments.

As already described above, the Infineon Group has for some time seen a rapid increase in the demand for power semiconductors and therefore decided to build a second 300-millimeter fab, following its first one in Dresden (Germany). The Infineon Group will build a fully automated facility for the manufacture of 300-millimeter thin wafers at the Villach (Austria) site, which has been the Group's competence center for power semiconductors. Constructions started in November 2018. Volume manufacturing is planned to begin in early 2021, with maximum manufacturing capacity achieved as early as 2026. Total investments will reach approximately EUR 1.6 billion. When operating at full capacity, the estimated additional revenue resulting from the fab will be approximately EUR 1.8 billion annually.

Further, in early-June 2019, Infineon announced the proposed acquisition of Cypress as described under "*Proposed Acquisition of Cypress*".

Material Debt Financings

In connection with the acquisition of Cypress, Infineon concluded a EUR 6,600 million/USD 3,330 million syndicated dual-currency term loan facilities agreement on 3 June 2019 with various international banks as mandated lead arrangers and bookrunners (the "**Mandated Lead Arrangers and Bookrunners**") and one international bank as agent (the "**Agent**") (the "**Facilities Agreement**"). In addition, the Facilities Agreement has also been underwritten by various other international banks acting as underwriters (the "**Underwriters**") and has been syndicated to banks, consisting of the Mandated Lead Arrangers and Bookrunners (or their respective affiliates) and/or the Underwriters and further national and international banks. The Facilities Agreement consisted of five unsecured tranches: first, a EUR 1,500 million bridge term loan with an initial term of one year (which was already cancelled following the capital increase of Infineon), second, a EUR 5,100 million bridge term loan with an initial term of one year (of which EUR 24 million were already cancelled following the capital increase of Infineon) and two extension options for Infineon of six months each, third, a USD 1,110 million term loan with a term of three years, fourth, a USD 1,110 million term loan with a term of four years and fifth, a USD 1,110 million term loan with a term of five years. The Facilities Agreement contains a change of control clause which entitles any lender in the event of a defined change of control to request the Agent and Infineon to enter into negotiations with a view to agreeing alternative terms for continuing the facilities or, in specific cases, to give notice of termination and call for repayment of the relevant credit amount. The syndicated dual-currency term loan has not been drawn to date and will only be drawn if the acquisition process regarding Cypress is completed.

In addition, the Infineon Group has the following debt instruments outstanding:

- EUR 500 million unsubordinated, unsecured bond issued by Infineon in March 2015 with a maturity in March 2022;
- USD 935 million senior unsecured notes issued in three series by Infineon in a US private placement and funded in April 2016. Series A USD 350 million with a maturity in April 2024, Series B USD 350 million with a maturity in April 2026 and Series C USD 235 million with a maturity in April 2028.

Material Contracts

Other than the financing contract described above (see "*Material Debt Financings*") and the merger agreement described below (see "*Proposed Acquisition of Cypress*"), Infineon has not entered into material contracts outside the ordinary course of its business, which could result in any group member being under an obligation or entitlement that is material to Infineon's ability to meet its payment obligations to the Holders in respect of the Notes being issued.

Intellectual Property

The Infineon Group's intellectual property rights include patents, copyrights, trade secrets, trademarks, utility models and design rights and primarily relate to IC designs and manufacturing and test process technologies. In the course of the fiscal year 2018, the Infineon Group has applied for approximately 1,550 patents worldwide and for approximately 1,800 patents in the fiscal year 2017. As of 30 June 2019, the Infineon Group's worldwide patent portfolio comprised approximately 26,800 patents and patent applications. As a result of the acquisition of Cypress, the Infineon Group's patent portfolio will increase by a further approximately 3,900 patents and patent applications.

It is common industry practice for semiconductor companies to enter into cross licensing agreements. These agreements enable each company to utilize the patents of the other on specified conditions. Infineon is party to a number of cross licensing agreements, including agreements with other major semiconductor companies.

Legal and Arbitration Proceedings

The principal litigation matters the Infineon Group had to deal with during the previous twelve months were EU antitrust proceedings and insolvency disputes regarding Qimonda and its affiliates.

Antitrust proceedings

The EU Commission has been investigating manufacturers of chips for smartcards since April 2008 for alleged violations of antitrust laws. Concluding these proceedings, the EU Commission finally imposed a fine of EUR 82.8 million on Infineon in September 2014. Infineon therefore brought an appeal against this decision before the General Court of the European Union (the "*Court*") in November 2014. This appeal was dismissed by the Court and Infineon filed an appeal to the European Court of Justice against this decision in February 2017. In September 2018, the European Court of Justice referred the case back to the court of first instance in order to re-review the proportionality of the fine.

Two class actions for damages in connection with these antitrust violations have been formally filed in Canada. However, no dates have yet been scheduled for court proceedings. Further, in July 2019, a direct customer filed a lawsuit against Infineon Technologies UK Limited, Renesas Electronics Corporation, Renesas Electronics Europe Limited and Renesas Electronics Europe GmbH in London (United Kingdom) relating to the aforementioned EU antitrust case. Infineon Technologies AG received service of process in this regards in August 2019.

Qimonda insolvency disputes

In 2006, all significant assets, liabilities and business activities attributable to Infineon's memory business (Memory Products) were carved out and transferred to Qimonda, a fully-owned subsidiary of Infineon at that time, in the form of a non-cash contribution. In connection with the carve-out various service agreements were concluded with Qimonda. In January 2009, Qimonda filed for insolvency at the Munich Local Court. Insolvency proceedings were then opened in April 2009. The insolvency of Qimonda has given rise to various disputes between the insolvency administrator and Infineon.

In September 2014, Infineon and the insolvency administrator reached a partial settlement in the amount of EUR 260 million to settle all litigation pending regarding Qimonda between the administrator and the Infineon Group (with the exception of claims relating to an alleged economic reincorporation (*wirtschaftliche Neugründung*) and the liability for impairment of capital (*Differenzhaftung*)) in conjunction with the acquisition of Qimonda's entire patent portfolio. The actions with respect to the continuing use of Qimonda patents and Infineon's ownership of the license as well as the insolvency law proceedings contesting intercompany payments were thus settled. Additionally, further out-of-court claims of right to contest under insolvency law, as well as any other claims made by the administrator were settled.

Claims relating to the proceedings in connection with the alleged economic reincorporation, which involve Infineon, Infineon Technologies Holding B.V. and Infineon Technologies Investment B.V., and liability for impairment of capital have not been concluded yet. In November 2010, the administrator contended that the commencement of operating activities by Qimonda amounted to an economic reincorporation and requested Infineon to pay the difference between Qimonda's business assets and its share capital and filed a request for declaratory judgment. Later, the administrator further alleged that the carved-out memory products business had a negative value from the very beginning and asserted that Infineon is obliged to compensate for the difference between this negative value and the lowest issue price. According to the administrator his claims are worth at least EUR 3,350 million plus interest.

The legal dispute has, in the meantime, focused on the claims asserted for alleged lack of value. In August 2013, the court appointed an independent expert to clarify the valuation issues raised by the insolvency administrator and to address technical matters. In September 2018, in consultation with the parties, the independent expert appointed by the court presented an interim report on his preliminary assessment of the value of the contribution in kind. Infineon is in principle prepared to conduct discussions about an out of court settlement of the legal distribute on the basis of this interim report.

It is not clear at this stage if the legal dispute can be resolved with an out of court settlement, and, if this is not the case, when a first-instance court decision would be reached.

Infineon also faces residual liability as a former shareholder with personal liability of Qimonda Dresden GmbH & Co. OHG until the carve-out of the memory business. These claims can only be exercised by the administrator acting in the name of the creditors concerned. So far, settlements have been reached with most of the major liability creditors.

Infineon recorded provisions relating to Qimonda of EUR 203 million in total as of 30 June 2019. This comprises mainly provisions for the pending legal dispute including legal costs. However, there can be no certainty that the provisions recorded for Qimonda will be sufficient to cover all of the liabilities that could ultimately be incurred in relation to the insolvency of Qimonda. In addition it is possible that liabilities and risks materialize that are currently considered to be unlikely to do so, and accordingly are not included in provisions.

Other

The Infineon Group is involved in various other legal disputes and proceedings in connection with its existing or previous business activities. These relate, *inter alia*, to products, services, patents, export control and environmental issues.

Apart from the above mentioned proceedings, neither Infineon nor any of the companies of the Infineon Group are or were party to any governmental, legal or arbitration proceedings (including any pending or threatened proceedings) during the previous twelve months, which may have, or have had, significant effects on Infineon's or the Infineon Group's financial position or profitability.

Furthermore, in connection with its existing or previous business operations, Infineon is also exposed to numerous legal risks which have until now not resulted in legal disputes. These include risks related to product liability, environment, capital market, anti-corruption, competition and antitrust legislation, export control as well as other compliance regulations. Claims could also be made against Infineon in connection with these matters in the event of breaches of law committed by individual employees or third parties.

Additional Information

Share Capital

As of 30 August 2019, Infineon's capital stock amounted to EUR 2,500,591,754 and was divided into 1,250,295,877 no-par value registered shares which are fully paid up. As of 30 August 2019, Infineon held six million treasury shares.

Fiscal Year

Infineon's fiscal year runs from 1 October of each year until 30 September of the following year.

Memorandum and Articles of Association

According to Article 2 of its articles of association, Infineon's object is the direct or indirect activity in the area of research, development, manufacture and marketing of electronic components, electronic systems and software, as well as the performance of services related thereto. Infineon is entitled to perform all acts and take all steps which appear likely to directly or indirectly promote the achievement of the company's aims. Infineon may establish subsidiaries and branches in Germany and abroad, and can participate in other enterprises. Infineon can buy or sell enterprises, combine them under single management and conclude enterprise agreements with them or restrict itself to managing the participation. Infineon is entitled to spin off its operations - as a whole or in part - into affiliated enterprises.

Recent Events and Outlook

Recent Events

The acquisition of Cypress is envisaged to be completed by the end of calendar year 2019 or in early 2020 (see "*Proposed Acquisition of Cypress*"). As part of the refinancing of the Cypress acquisition, a capital increase, excluding subscription rights, by way of an accelerated bookbuilding was executed on 18 June 2019 and resulted in new share capital in the amount of EUR 225,547,846.00. Around 113 million new shares were issued and net proceeds of just over EUR 1.5 billion (before deduction of commissions and expenses) were received.

Outlook

The global semiconductor market relevant for the Infineon Group (i.e. excluding memory ICs and microprocessors) grew by 6.3% in the calendar year 2018 on a US dollar basis, and is expected to decline 3.7% in the calendar year 2019. The global semiconductor market including memory ICs and microprocessors grew 12.4% in 2018 but is predicted to decline 12.5% in the calendar year 2019. These predictions mainly reflect how the market for memory ICs is expected to develop. All those growth figures are based on market sizes measured in USD.³⁵

³⁵ Based on content supplied by IHS Markit, Technology Group, "Worldwide Semiconductor Shipment Forecast with Regional Splits – Application Market Forecast Tool", June 2019.

As already announced on 27 March 2019, in view of the continued global economic uncertainties and weaker end-market demand the Group is facing, Infineon expects that not only revenues but also earnings will be negatively impacted for the fiscal year 2019, and Infineon updated its outlook accordingly.

Assuming a EUR/USD exchange rate of 1.15, for the fourth quarter of the fiscal year 2019, Infineon expects sequential revenue growth of 1%, plus or minus 2 percentage points. The Power Management & Multimarket segment is expected to grow above Group average. Revenue for the Automotive segment is expected to grow in line with Group average. For the segments Industrial Power Control and Digital Security Solutions Infineon expects revenue to be down by a low-single digit percentage.

Based on the last three quarters and on the assumptions for the fourth quarter described above, Infineon expects revenues of approximately EUR 8 billion for the fiscal year 2019 compared to EUR 7.6 billion in the fiscal year 2018. Revenue growth is therefore expected to be slightly above 5%.

For the fiscal year 2019, investments in the amount of approximately EUR 1.5 billion are planned. This amount includes the costs associated with the construction of the 300-millimeter thin wafer production facility at the Villach (Austria) site which started in November 2018. Depreciation and amortization are expected to be in the region of EUR 1 billion, of which around EUR 90 million are related to depreciation in regards to purchase price allocations mainly in connection with the acquisition of International Rectifier Corporation in 2015.

The Infineon Group's gross cash position as of 30 June 2019 amounted to EUR 1 billion plus 30% of its revenues from the last twelve months. Post-acquisition of Cypress (see "*Proposed Acquisition of Cypress*") Infineon remains committed to its conservative financial policy and retention of its investment grade rating. Hence, its target for the gross cash position of Infineon Group at EUR 1 billion plus 10%-20% of its revenues from the respective last twelve months and the target for gross debt at a maximum of 2x EBITDA remain in place. Infineon aims that the lower end of the liquidity target should be maintained at all times. While the acquisition of Cypress is expected to result in Infineon's gross debt to initially exceed that target, the Infineon Group aims to return in the mid-term to its target level.

The following are key elements of Infineon's financial policy

- A comfortable liquidity level for financing operating activities and potential investments throughout the cycle, Infineon's high focus on centralizing cash (including excess cash repatriation from its subsidiaries) and its EUR 1 billion liquidity cushion built up for net pension liabilities and contingent liabilities.
- A debt position with a balanced and long-term maturity profile, aimed at securing repayment of debt even if capital market financing should not be available, and a confirmation by S&P that Infineon Group's BBB investment grade rating would be confirmed or rated down by one notch at a maximum following the acquisition of Cypress.
- A track record of consistent dividend distribution since 2011. Infineon's dividend policy aims for a participation of shareholders in the success of the business and keeping the dividend at least at a constant level in times of flat or declining earnings. For the fiscal year 2018, the total dividend distribution amounted to EUR 305 million (EUR 283 million for the fiscal year 2017).

INFORMATION ABOUT CYPRESS

Business overview³⁶

Cypress manufactures and sells advanced embedded system solutions for automotive, industrial, home automation and appliances, consumer electronics and medical products. Cypress' programmable systems-on-chip, general-purpose microcontrollers, analog ICs, wireless and USB-based connectivity solutions and reliable, high-performance memories help engineers design differentiated products and bring them to market fast. Cypress provides two critical elements of Internet of Things capability: microcontrollers (MCUs) and wireless connectivity.

The company was founded in 1982 and is headquartered in San José, California with sites in the US, Europe and Asia including a frontend manufacturing facility in Austin, Texas (USA), as well as two backend manufacturing facilities in Thailand and the Philippines. Cypress had approximately 5,850 employees as of 30 December 2018.³⁷

Cypress combines wafer capacity from outsourced external foundry partners with output from its own manufacturing facility, which allows it to meet swings in demand while lowering capital expense requirements and lowering fixed costs. The company outsourced approximately 63% of its wafer requirement in 2018.

Cypress operates two business segments as described below.

The Microcontroller and Connectivity Division

The Microcontroller and Connectivity Division ("MCD") focuses on connect and compute solutions for the Internet of Things and automotive solutions that enhance the in-cabin user experience. MCD offerings include robust wireless and wired connectivity solutions that combine with flexible, high-performance microcontroller (MCU) and analog solutions, backed with a focus on design software. The portfolio includes Wi-Fi, Bluetooth and Bluetooth Low Energy solutions and wireless combo solutions; Traveo automotive MCUs, PSoC programmable MCUs and general-purpose MCUs; CapSense capacitive-sensing controllers and automotive TrueTouch touchscreen solutions; a broad line of USB controllers, including solutions for the USB-C and USB Power Delivery standards; and analog PMIC Power Management ICs. This division also includes the intellectual property business.

In the fiscal year 2018, Cypress reported revenues of USD 1.5 billion for the MCD Division, accounting for 59% of the revenues of Cypress. In the six-month period ended 30 June 2019, Cypress reported revenues of USD 665 million for the MCD Division, accounting for 62% of the revenues (six-month period ended 1 July 2018: USD 705 million). Revenues of the MCD Division decreased by USD 40.6 million, or 5.8%, in the six-month period ended 30 June 2019 compared to the same prior year period.

The Memory Products Division

The Memory Products Division ("MPD") focuses on fail-safe storage and data logging solutions for mission critical applications. The portfolio includes specialized, high-performance parallel and serial NOR flash memories, static random access memories (SRAM), F-RAM ferroelectric memory devices, nonvolatile SRAMs (nvSRAM), and other specialty memories. This division also includes Cypress' nonvolatile DIMM subsidiary AgigA Tech Inc.

In the fiscal year 2018, Cypress reported revenues of USD 1.0 billion for the MPD Division, accounting for 41% of the revenues of Cypress. In the six-month period ended 30 June 2019 Cypress

³⁶ Financial data provided in this section is derived from Cypress' publicly available consolidated financial statements (10-K for fiscal year 2018 and 10-Q for Q2 2019) prepared in accordance with US-GAAP and used as defined therein.

³⁷ Company information.

reported revenue of USD 407 million for the MPD Division, accounting for 38% of the revenues (six-month period ended 1 July 2018: USD 501 million). Revenues of the MPD Division decreased by USD 94.5 million, or 18.9%, in the six-month period ended 30 June 2019 compared to the same prior year period. The decrease was primarily due to the divestiture of NAND business, which was completed on 1 April 2019.

Revenues disaggregated by end market

In the six-month period ended 30 June 2019 Cypress reported revenue of USD 353 million for the Internet of Things market, for the automotive market of USD 400 million and for the legacy market of USD 318 million.

Key financial data of Cypress

The following table sets out selected financial information relating to Cypress. The information has been extracted from the consolidated financial statements of Cypress prepared by Cypress in accordance with generally accepted accounting principles in the United States ("US GAAP") for the fiscal year ended 31 December 2017 and for the fiscal year ended 30 December 2018, respectively, as well as from the consolidated interim financial statements prepared in accordance with US GAAP for the six-month period ended 30 June 2019 and for the six-month period ended 1 July 2018, respectively.

Proposed Acquisition of Cypress

On 3 June 2019, Infineon entered into a merger agreement with Cypress. Under the terms of the agreement, Infineon is to acquire Cypress by means of a merger of a wholly owned subsidiary of Infineon with and into Cypress, with Cypress surviving the merger as a wholly owned subsidiary of Infineon (reverse triangular merger). Infineon is offering Cypress' shareholders USD 23.85 in cash for each Cypress' share (the "**Acquisition**"). This represents a premium of 46% to Cypress' unaffected 30-day-volume-weighted average price during the period from 15 April 2019 to 28 May 2019, the last trading day prior to media reports regarding a potential acquisition of Cypress. The offering price corresponds to a fully diluted enterprise value for Cypress of EUR 9.0 billion. The Acquisition will be funded using the proceeds of the capital increase against cash contributions completed on 18 June 2019 (and described below), the proceeds from the issuance of the Notes as well as the loan facilities under the Facilities Agreement as well as cash on hand. The Facilities Agreement for the remaining part of the funding is fully underwritten by a consortium of banks. In connection with the Acquisition, Infineon is committed to retain an investment grade rating and intends to ultimately finance approximately 30% of the total transaction value with equity and the remainder with debt (including through capital markets transactions) as well as cash on hand. In view of the equity portion, a capital increase against cash under exclusion of subscription rights was executed on 18 June 2019. Infineon issued approximately 113 million new shares and generated net proceeds of just over EUR 1.5 billion. The proposed Acquisition remains subject to regulatory approvals as well as other customary conditions. The closing is expected by the end of calendar year 2019 or in early 2020.

Please see a description for the financing of the proposed Cypress acquisition under "*Material Debt Financings*".

Unaudited Aggregated Financial Information

The Acquisition is expected to have a material impact on the cash flows, financial position and results of operations of the Infineon Group. In order to give an indication of the impact of the Acquisition on certain selected performance measures of the Infineon Group, Infineon has prepared the following unaudited aggregated financial information ("**Unaudited Aggregated Financial Information**") for illustrative purposes. The Unaudited Aggregated Financial Information was neither prepared on the basis of the IDW Accounting Practice Statement: Preparation of Pro Forma Financial Information (IDW AcPS AAB 1.004) (*IDW Rechnungslegungshinweis: Erstellung von Pro-Forma-Finanzinformationen (IDW RH HFA 1.004)*), as promulgated by the Institute of Public Auditors in Germany (*IDW, Institut der Wirtschaftsprüfer in Deutschland e.V.*) nor does it constitute or is comparable to pro forma financial information within the meaning of Annex 20 of the Prospectus Regulation. Due to its nature, the Unaudited Aggregated Financial Information describes a hypothetical situation and does not reflect the actual cash flows, financial position and results of operations of the Infineon Group following the completion of the Acquisition nor does it indicate the future development of the cash flows, financial position and results of operations of the combined group following the completion of the Acquisition.

For the purposes of showing performance measures in the Unaudited Aggregated Financial Information relating to profit and loss statement items as well as relating cash flow statement items, it has been assumed that the closing of the Acquisition occurred as of 1 July 2018, and for the purposes of presenting balance sheet information in the Unaudited Aggregated Financial Information, it has been assumed that the closing of the Acquisition occurred as of 30 June 2019, in each case subject to the limitations, estimates and further assumptions described herein.

The Unaudited Aggregated Financial Information has been prepared based on the following historical financial information:

- Historical balance sheet information of Infineon has been derived from the unaudited interim consolidated financial information prepared by Infineon in accordance with IAS 34 as of and for the nine-month period ended 30 June 2019.
- Historical balance sheet information of Cypress has been derived from the unaudited condensed consolidated interim financial statements prepared by Cypress in accordance with US GAAP as of and for the six-month period ended 30 June 2019.
- For the purposes of showing performance measures in the Unaudited Aggregated Financial Information relating to profit and loss statement items as well as relating to cash flow statement items, the historical financial information of Infineon has been (i) calculated based on the financial information included in the audited consolidated financial statements of the Infineon Group prepared in accordance with IFRS as of and for the fiscal year ended 30 September 2018 as well as from the unaudited interim consolidated financial information prepared in accordance with IAS 34 as of and for the nine-month period ended 30 June 2019 and (ii) derived as total of the figure for the twelve-month period ended 30 September 2018 contained in the audited consolidated financial statements of the Infineon Group prepared in accordance with IFRS as of and for the fiscal year ended 30 September 2018 and the figure for the nine-month period ended 30 June 2019 less the figure for the nine-months period ended 30 June 2018 both as contained in the unaudited interim consolidated financial information prepared in accordance with IAS 34 as of and for the nine-month period ended 30 June 2019, if not indicated otherwise below.
- For the purposes of showing performance measures in the Unaudited Aggregated Financial Information relating to profit and loss statement items as well as relating to cash flow statement items, the historical financial information of Cypress has been (i) calculated based on the financial information included in the audited consolidated financial statements of Cypress prepared in accordance with US GAAP for the fiscal year ended 30 December 2018 as well as from the unaudited condensed consolidated interim financial statements prepared in accordance with US GAAP as of and for the six-month period ended 30 June 2019 and 1 July 2018, respectively, and (ii) derived as total of the figure for the twelve-month period ended 30 December 2018 contained in the consolidated financial statements of Cypress prepared in accordance with US GAAP for the fiscal year ended 30 December 2018 and the figure for the six-month period ended 30 June 2019 less the figure for the six-month period ended 1 July 2018 as contained in the unaudited condensed consolidated interim financial statements prepared in accordance with US GAAP for the six-month period ended 30 June 2019 and 1 July 2018, respectively, if not indicated otherwise below.

To conform to the Infineon reporting currency, the historical Cypress US GAAP consolidated financial information has been converted from US dollar to euro at the following rate: for currency conversion from US dollar to euro an exchange rate of 1.1380 was used for financial data as of 30 June 2019 and an exchange rate of 1.1412 was used for financial information for the twelve-month period ended 30 June 2019.

When preparing the Unaudited Aggregated Financial Information, principally only publicly available information regarding Cypress was available to Infineon. This results in significant limitations in respect of the Unaudited Aggregated Financial Information, which must be taken into account when reading this document. For example:

- Cypress' (condensed) consolidated financial statements have been prepared in accordance with US GAAP, which differs in certain material respects from IFRS. Infineon did not have access to the information required to align the recognition, measurement and presentation principles of Cypress with the recognition, measurements and presentation principles used by

Infineon for the purpose of identifying material differences in significant accounting policies between Infineon and Cypress and therefore did not adjust the financial statements of Cypress to conform to IFRS and the recognition, measurement and presentation principles of Infineon. The Unaudited Aggregated Financial Information might therefore deviate from financial information that would have been prepared aligning Cypress' financial information to IFRS and the recognition, measurement and presentation principles of Infineon.

- The Acquisition will be accounted for as a business combination in accordance with IFRS 3 (Business Combinations). The identifiable assets acquired and the liabilities assumed of Cypress are required to be measured in accordance with IFRS 3. Based on the information that was available to Infineon when preparing the Unaudited Aggregated Financial Information, Infineon was neither able to conclusively determine the consideration transferrable by it for the Acquisition nor to perform a final or a preliminary purchase price allocation. As a result, the presentation of illustrative aggregated total assets in the table below is a mere aggregation of consolidated total assets of both Infineon and Cypress as at 30 June 2019 and does not include any adjustments resulting from a purchase price allocation in accordance with IFRS 3 "Business Combinations" e.g. goodwill or identifiable intangible assets. Furthermore, no impact from the subsequent measurement of any acquired assets and assumed liabilities is presented as an adjustment to any performance measures in the Unaudited Aggregated Financial Information relating to profit and loss statement items. Such items also do not reflect interest expense or other effects of the future combination of Infineon or Cypress such as cost synergies.

The presentation of gross debt, gross debt to EBITDA and net cash (debt) to EBITDA in the Unaudited Aggregated Financial Information includes additional indebtedness that the Infineon Group has not yet incurred, but expects to incur until immediately after the closing of the Acquisition in connection therewith or related thereto. The determination of the amount of such additional indebtedness involves significant estimates by Infineon, including estimates relating, but not limited to, the exchange rate at closing, the number of Cypress shares outstanding and purchasable by Infineon at closing, the amount of Cypress debt repayable and the amount of payments due to Cypress personnel as a consequence of the Acquisition, the amount of transaction costs associated with the Acquisition, the effects of foreign currency hedging relating to the Acquisition and the net proceeds from the offering of the Notes. These estimates are subject to uncertainties and some or all of these estimates may turn out to be inaccurate, resulting in the actual amount of additional indebtedness that the Infineon Group will incur until immediately after the closing of the Acquisition to be higher or lower than currently estimated.

The Unaudited Aggregated Financial Information has to be read in conjunction with the historical audited consolidated financial statements of the Infineon Group prepared in accordance with IFRS as of and for the fiscal year ended 30 September 2018 as well as in conjunction with the unaudited interim consolidated financial information prepared in accordance with IAS 34 as of and for the nine-month period ended 30 June 2019, and the historical audited consolidated financial statements of Cypress prepared in accordance with US GAAP for the fiscal year ended 30 December 2018 as well as in conjunction with the unaudited condensed consolidated interim financial statements prepared in accordance with US GAAP for the six-month period ended 30 June 2019 and 1 July 2018, respectively.

Integration of Cypress

With the integration of Cypress, the Infineon Group aims to become a leader in power system solutions for the automotive and industrial markets as well as the Internet of Things (IoT) (consumer and industrial IoT). Infineon believes that the strengths of Infineon Group and Cypress are highly complementary to each other and expanding the Infineon Group's scope is the main strategic rationale for the acquisition. Whereas Infineon Group's core product offering is built around power discretes and modules, sensors, automotive microcontrollers and security components, Cypress adds microcontrollers for industrial applications, connectivity and software/ecosystem solutions as well as differentiated memories. This combined portfolio will enable comprehensive system solutions, adding value for customers, including a broader offering than Infineon Group's competitors and connect real world applications to the digital world. The benefits are expected to lie in a higher bill-of-material share in core target applications, more design-wins due to microcontroller socket opportunities, cross-selling opportunities and a better value proposition for small and medium customers, i.e. one-stop shop, system solutions and reference designs. Additionally, the combination of the Infineon Group's and Cypress' expertise allows for a deeper system understanding, faster design cycles as well as software, ecosystem and solution enablement services to address adjacent and new markets.

⁵⁹ Gross debt (long-term and short-term) of Infineon is defined as short-term debt and current maturities of long-term debt plus long-term debt, each as presented in the relevant unaudited interim consolidated financial statements of Infineon as of 30 June 2019.

⁶⁰ Gross debt (long-term and short-term) of Cypress is defined as current portion of long-term debt plus revolving credit facility and long-term portion of debt, each as presented in the relevant unaudited condensed consolidated financial statements of Cypress as of 30 June 2019.

⁶¹ Adjustments solely reflect the estimated additional financial debt which Infineon expects to incur due to the acquisition of Cypress and repayment of Cypress debt less book value as of 30 June 2019 of Cypress debt assumed to be repaid. This assumes the issuance of the Notes and other instruments to be accounted for as equity under IAS 32. The adjustment does not reflect any estimate of a decrease / increase of debt of Infineon or Cypress between 30 June 2019 and 31 December 2019 for any other reason. Adjustments are based on an assumed potential closing date of the transaction being 31 December 2019. Accordingly, the estimated amount includes payments expected in connection with the transaction. The adjustments include the estimated increase in financial debt due to the payment for the outstanding shares of Cypress, the repayment of Cypress' existing financial debt and related financial liabilities, certain transaction costs (e.g. M&A fees, advisory fees, hedging fees and financing fees) as well as the payment of certain Cypress employee-related obligations in connection with the closing of the transaction (e.g. share-based payments) assumed by Infineon.

⁶² Gross debt-to-EBITDA is defined as gross debt as defined in footnote 59 divided by EBITDA as defined in footnote 57.

⁶³ Gross cash position of Infineon is defined as cash and cash equivalents plus financial investments, each as presented in the relevant unaudited interim consolidated financial statements of Infineon as of 30 June 2019.

⁶⁴ Gross cash position of Cypress refers to cash and cash equivalents as contained in the unaudited condensed consolidated interim financial statements prepared in accordance with US GAAP as of and for the six-month period ended 30 June 2019.

⁶⁵ Adjustment to gross cash position reflects the usage of the net proceeds from the mid-June 2019 capital increase of Infineon in connection with the acquisition of Cypress.

⁶⁶ Net cash position of Infineon is defined as gross cash position as defined in footnote 63 less gross debt (short-term and long-term debt) as defined in footnote 59.

⁶⁷ Net cash position of Cypress is defined as gross cash position as defined in footnote 64 less gross debt (short-term and long-term debt) as defined in footnote 60.

⁶⁸ Adjustment to net cash (debt) position is the total of the adjustments to gross debt position as described in footnote 61 and gross cash position as described in footnote 65.

⁶⁹ Net cash (debt)-to-EBITDA is defined as net cash position as defined in footnote 66 divided by EBITDA as defined in footnote 57.

Moreover, the Infineon Group and Cypress are expected to complement one another also in terms of sales regions and channels. With the Acquisition, the Infineon Group is expected to have a more diversified geographic exposure and for example enhance its footprint in Japan. In addition, the Acquisition is expected to lead to a reinforced presence in high value-add distribution business and an increase in customer numbers. The Infineon Group is expected to leverage Cypress' advanced digital marketing capabilities to win more customers and for cross-selling.

While the main driving force for the acquisition is scope expansion, the Infineon Group will also considerably increase its scale. Based on Infineon's estimate, the combined company will be among the ten largest semiconductor companies worldwide with a total semiconductor market of EUR 408 billion, become the number one provider of automotive semiconductors with a total market of EUR 32 billion and ascend to number four in 32-bit microcontrollers with a total market of EUR 8 billion, each estimate based on combined revenues in the calendar year 2018.⁷⁰

Based on Company information and estimates, together with Cypress, the Infineon Group is expected to have more than 30,000 patents and more than 47,000 employees (which includes more than 8,600 R&D employees).

Based on an increased addressable market with more structural growth drivers, a broader geographical mix, an enlarged customer base and a higher share of distribution, Infineon believes that the combined group has the potential to grow revenues by over 9% through the cycle (mid- to long-term) going forward (current Infineon average-cycle target: 9%). The Infineon Group expects cost synergies of approximately EUR 180 million per year by 2022, resulting from combined procurement for materials and manufacturing services, aligned R&D roadmap, joint go-to-market approaches and streamlined administrative functions. The overall revenue synergy potential is expected to be around EUR 1.5 billion per year when the planned cross-selling and system solutions synergies are fully ramped, assumed to be around 2028. The Infineon Group targets the segment result margin of the combined group to increase to 19% in the medium term (current Infineon average-cycle target: 17%). In addition, an expected reduced capital intensity is anticipated to lead to a lower investment-to-sales ratio of 13% in the medium-term (current Infineon average-cycle target: 15%).

anwendbare Zinssatz ab dem Kontrollwechsel-Stichtag um zusätzliche 500 Basispunkte per annum. Für den Fall, dass in dem Zeitraum zwischen dem Eintritt des ersten Kontrollwechsel-Ereignisses und dem Tag, an dem die Kontrollwechsel-Mitteilung (wie in § 5(5) definiert) in Bezug auf diesen ersten Kontrollwechsel veröffentlicht wird, mehr als ein Kontrollwechsel-Ereignis eintritt, erhöht sich der für die Berechnung der Zinsen ansonsten anzuwendende Zinssatz jedoch nur einmal.

- (g) Die Zinsen für einen beliebigen Zeitraum werden auf der Grundlage des Zinstagequotienten berechnet.

"Zinstagequotient" bezeichnet bei der Berechnung des Zinsbetrages für eine Schuldverschreibung für einen beliebigen Zeitraum (ab dem ersten Tag dieses Zeitraums (einschließlich) bis zum letzten Tag dieses Zeitraums (ausschließlich)) (der **"Zinsberechnungszeitraum"**):

- (i) wenn der Zinsberechnungszeitraum der Feststellungsperiode entspricht, in die er fällt, oder kürzer als diese ist, die Anzahl von Tagen in dem Zinsberechnungszeitraum dividiert durch die Anzahl von Tagen in der betreffenden Feststellungsperiode; und
- (ii) wenn der Zinsberechnungszeitraum länger als eine Feststellungsperiode ist, die Summe aus
 - (A) der Anzahl der Tage in dem betreffenden Zinsberechnungszeitraum, die in die Feststellungsperiode fallen, in der der Zinsberechnungszeitraum beginnt, dividiert durch die Anzahl der Tage in der betreffenden Feststellungsperiode; und

- (g) Interest for any period of time will be calculated on the basis of the Day Count Fraction.

"Day Count Fraction" means, in respect of the calculation of an amount of interest on any Note for any period of time (from and including the first day of such period to but excluding the last day of such period) (the **"Calculation Period"**):

- (i) if the Calculation Period is equal to or shorter than the Determination Period in which it falls, the number of days in the Calculation Period divided by the number of days in such Determination Period; and
- (ii) if the Calculation Period is longer than one Determination Period, the sum of:
 - (A) the number of days in such Calculation Period falling in the Determination Period in which the Calculation Period begins divided by the number of days in such Determination Period; and
 - (B) the number of days in such

betreffenden Zinsberechnungszeitraum, die in die nachfolgende Feststellungsperiode fallen, dividiert durch die Anzahl der Tage in der betreffenden Feststellungsperiode.

Dabei gilt Folgendes:

"Feststellungsperiode" bezeichnet jede Periode ab einem Feststellungstermin (einschließlich), der in ein beliebiges Jahr fällt, bis zum nächsten Feststellungstermin (ausschließlich).

"Feststellungstermin" bezeichnet jeden 1. April.

(3) Zinslaufende.

Sollte die Emittentin eine Zahlung von Kapital auf die Schuldverschreibungen bei Fälligkeit nicht leisten, endet die Verzinsung der Schuldverschreibungen mit Beginn des Tages der tatsächlichen Zahlung. Der in einem solchen Fall jeweils anzuwendende Zinssatz wird gemäß diesem § 3 bestimmt.

(4) Feststellung des Referenzsatzes.

Die Berechnungsstelle bestimmt an jedem Zinsfeststellungstag den betreffenden Referenzsatz nach Maßgabe dieses § 3(4).

Der **"Referenzsatz"** für einen Reset-Zeitraum wird von der Berechnungsstelle an dem betreffenden Zinsfeststellungstag (wie nachstehend definiert) vor dem Reset-Termin, an dem der betreffende Reset-Zeitraum beginnt (der **"Referenz-Reset-Termin"**), festgelegt und ist,

(a) solange kein Benchmark-Ereignis eingetreten ist,

(i) der Ursprüngliche

Calculation Period falling in the next Determination Period divided by the number of days in such Determination Period.

Where:

"Determination Period" means each period from and including a Determination Date in any year to but excluding the next Determination Date.

"Determination Date" means each 1 April.

(3) Cessation of interest accrual.

The Notes will cease to bear interest from the beginning of the day their principal amount is due for repayment. If the Issuer fails to make any payment of principal under the Notes when due, the Notes will cease to bear interest from the beginning of the day on which such payment is made. In such case the applicable rate of interest will be determined pursuant to this § 3.

(4) Determination of the Reference Rate.

The Calculation Agent will determine the relevant Reference Rate in accordance with this § 3(4) on each Interest Determination Date.

The **"Reference Rate"** for a Reset Period will be determined by the Calculation Agent on the relevant Interest Determination Date (as defined below) prior to the Reset Date on which the relevant Reset Period commences (the **"Reference Reset Date"**) and will be,

(a) as long as no Benchmark Event has occurred,

(i) the Original Benchmark Rate;

Benchmarksatz; oder

- (ii) falls eine für die Festlegung des Ursprünglichen Benchmarksatzes benötigte Information am betreffenden Zinsfeststellungstag nicht auf der Bildschirmseite erscheint, der Referenzbankensatz an diesem Zinsfeststellungstag.
- Kann der Referenzbankensatz nicht gemäß der Definition dieses Begriffs bestimmt werden, aber ist kein Benchmark-Ereignis eingetreten, entspricht der jeweilige "Referenzsatz" dem durch die Berechnungsstelle festgelegten Ursprünglichen Benchmarksatz, welcher zuletzt auf der Bildschirmseite verfügbar war; und
- (b) wenn ein Benchmark-Ereignis eingetreten ist, wird der "Referenzsatz" für jeden Reset-Zeitraum, der an oder nach dem Stichtag (wie in § 3(5)(i) definiert) beginnt, gemäß § 3(5) bestimmt.

"Ursprünglicher Benchmarksatz" bezeichnet den um 11:00 Uhr (Frankfurter Zeit) gefixten, als Prozentsatz ausgedrückten Swapsatz per annum für in Euro denominierter Swap-Transaktionen mit einer Laufzeit von 5 Jahren, der auf der Bildschirmseite am betreffenden Zinsfeststellungstag gegen 11:00 Uhr (Frankfurter Zeit) angezeigt wird.

Der "**Referenzbankensatz**" ist der Prozentsatz, der auf Basis der 5-Jahres-Mid-Swapsatz-Quotierungen, die der Berechnungsstelle auf Bitten der Emittentin ungefähr um 11:00 Uhr (Frankfurter Zeit) von bis zu fünf führenden von der Emittentin ausgewählten Swap-Händlern im Interbankenhandel (die "**Reset-Referenzbanken**") gestellt werden, am Zinsfeststel-

or

- (ii) in the event that any of the information required for the purposes of the determination of the Original Benchmark Rate does not appear on the Screen Page on the relevant Interest Determination Date, the Reference Bank Rate on that Interest Determination Date.

If the Reference Bank Rate cannot be determined pursuant to the definition of this term, but no Benchmark Event has occurred, the relevant "Reference Rate" shall be equal to the last Original Benchmark Rate available on the Screen Page as determined by the Calculation Agent; and

- (b) if a Benchmark Event has occurred, the "Reference Rate" for each Reset Period commencing on or after the Effective Date (as defined in § 3(5)(i)) will be determined in accordance with § 3(5).

"Original Benchmark Rate" means the annual swap rate which is fixed at 11:00 a.m. (Frankfurt time) and is expressed as a percentage per annum for Euro denominated swap transactions with a maturity of 5 years which appears on the Screen Page on the relevant Interest Determination Date at or around 11:00 a.m. (Frankfurt time).

"Reference Bank Rate" means the percentage rate determined by the Calculation Agent on the basis of the 5-year Mid Swap Rate Quotations provided by up to five leading swap dealers in the interbank market selected by the Issuer (the "**Reset Reference Banks**") to the Calculation Agent at the request of the Issuer at approximately 11:00 a.m. (Frankfurt time) on the Interest

lungstag von der Berechnungsstelle festgelegt wird. Wenn mindestens drei 5-Jahres-Mid-Swapsatz-Quotierungen genannt werden, wird der Referenzbankensatz das arithmetische Mittel der 5-Jahres-Mid-Swapsatz-Quotierungen unter Ausschluss der höchsten Quotierung (bzw., für den Fall von gleich hohen Quotierungen, einer der höchsten Quotierungen) und der niedrigsten Quotierung (bzw., für den Fall von gleich hohen Quotierungen, einer der niedrigsten Quotierungen) sein. Falls nur zwei 5-Jahres-Mid-Swapsatz-Quotierungen zur Verfügung gestellt werden, ist der Referenzbankensatz das rechnerische Mittel der zur Verfügung gestellten Quotierungen. Falls nur eine 5-Jahres-Mid-Swapsatz-Quotierung zur Verfügung gestellt wird, ist der Referenzbankensatz gleich der zur Verfügung gestellten Quotierung. Dabei bezeichnet "**5-Jahres-Mid-Swapsatz-Quotierung**" das arithmetische Mittel der nachgefragten (*bid*) und angebotenen (*offered*) Prozentsätze für den jährlichen Festzinszahlungsstrom (berechnet auf einer 30/360 Tage-Berechnungsbasis) einer fixed-for-floating Euro Zinsswap-Transaktion, (x) die eine 5-jährige Laufzeit hat und am betreffenden Reset-Termin beginnt, (y) die auf einen Betrag lautet, der dem einer repräsentativen einzelnen Transaktion in dem relevanten Markt zur relevanten Zeit eines anerkannten Händlers mit guter Bonität im Swap-Markt entspricht, und (z) deren variabler Zahlungsstrom auf dem 6-Monats EURIBOR Satz beruht (berechnet auf einer Actual/360 Tage-Berechnungsbasis).

Dabei gilt Folgendes:

"Bildschirmseite" bezeichnet die Reuters Bildschirmseite "ICESWAP2 / EURFIXA" unter der Überschrift "EURIBOR BASIS" und dem Untertitel "11:00 AM Frankfurt time" (auf dem solche Überschriften und Untertitel von Zeit zu Zeit erscheinen). Hat die

If at least three 5-year Mid Swap Rate Quotations are provided, the Reference Bank Rate will be the arithmetic mean of the quotations, eliminating the highest quotation (or, in the event of equality one of the highest) and the lowest quotation (or, in the event of equality, one of the lowest). If only two 5-year Mid Swap Rate Quotations are provided, the Reference Bank Rate will be the arithmetic mean of the quotations provided. If only one 5-year Mid Swap Rate Quotation is provided, the Reference Bank Rate will be the quotation provided. For this purpose, "**5-year Mid Swap Rate Quotation**" means the arithmetic mean of the bid and offered rates for the annual fixed rate leg (calculated on a 30/360 day count basis) of a fixed-for-floating Euro interest rate swap transaction which transaction (x) has a term of 5 years and commencing on the relevant Reset Date, (y) is in an amount that is representative of a single transaction in the relevant market at the relevant time with an acknowledged dealer of good credit in the swap market, and (z) has a floating leg based on the 6-months EURIBOR rate (calculated on an Actual/360 day count basis).

Where:

"Screen Page" means Reuters Screen Page "ICESWAP2 / EURFIXA" under the heading "EURIBOR BASIS" and the caption "11:00 AM Frankfurt time" (as such headings and captions may appear from time to time). If the Screen Page permanently ceases to quote the Original

Bildschirmseite dauerhaft aufgehört, den Ursprünglichen Benchmarksatz anzugeben, ist diese Quotierung jedoch auf einer anderen, von der Berechnungsstelle nach billigem Ermessen ausgewählten Bildschirmseite verfügbar (die "**Ersatzbildschirmseite**"), wird die Ersatzbildschirmseite zum Zweck der Festlegung des Ursprünglichen Benchmarksatzes eingesetzt.

"Reset-Termin" bezeichnet den Ersten Reset-Termin und danach jeden fünften Jahrestag des vorausgegangenen Reset-Termins.

"Reset-Zeitraum" bezeichnet jeden Zeitraum ab dem Ersten Reset-Termin (einschließlich) bis zum nächstfolgenden Reset-Termin (ausschließlich) und nachfolgend ab jedem Reset-Termin (einschließlich) bis zu dem jeweils nächstfolgenden Reset-Termin (ausschließlich).

"TARGET-Geschäftstag" bezeichnet einen Tag, an dem das Trans-European Automated Real-time Gross settlement Express Transfer system 2 (TARGET2) betriebsbereit ist.

"Zinsfeststellungstag" bezeichnet den zweiten TARGET-Geschäftstag vor dem betreffenden Referenz-Reset-Termin.

(5) Benchmark-Ereignis.

Wenn ein Benchmark-Ereignis in Bezug auf den Ursprünglichen Benchmarksatz (oder eine Teilkomponente davon) eintritt, gilt für die Bestimmung des betreffenden Referenzsatzes und den Reset des Zinssatzes gemäß diesem § 3(5) Folgendes:

- (a) Die Emittentin wird sich bemühen, sobald dies (nach billigem Ermessen der Emittentin) praktikabel ist, einen Unabhängigen Berater zu benennen, der einen Neuen Benchmarksatz, die Anpassungsmarge (gemäß § 3(5)(d)) und etwaige Benchmark-

"Interest Determination Date" means the second TARGET Business Day prior to the relevant Reference Reset Date.

- (a) The Issuer shall endeavour to appoint an Independent Adviser as soon as it is (in the Issuer's reasonable discretion) practicable, who will determine a New Benchmark Rate, the Adjustment Spread (in accordance with

- Änderungen (gemäß § 3(5)(e)) festlegt.
- § 3(5)(d)) and any Benchmark Amendments (in accordance with § 3(5)(e)).
- (b) Wenn vor dem betreffenden Zinsfeststellungstag
- (i) es der Emittentin nicht gelingt, einen Unabhängigen Berater zu ernennen; oder
 - (ii) der ernannte Unabhängige Berater keinen Neuen Benchmarksatz gemäß diesem § 3(5) festlegt,
- dann entspricht der "Referenzsatz" für den unmittelbar nachfolgenden Reset-Zeitraum dem an dem letzten zurückliegenden Zinsfeststellungstag festgestellten Ursprünglichen Benchmarksatz.
- Falls dieser § 3(5)(b) bereits im Hinblick auf den Ersten Reset-Termin angewendet werden muss, entspricht der "Referenzsatz" für den ersten Reset-Zeitraum dem Ursprünglichen Benchmarksatz auf der Bildschirmseite an dem letzten Tag vor dem Zinsfeststellungstag, an dem dieser Ursprüngliche Benchmarksatz angezeigt wurde.
- Falls der gemäß diesem § 3(5)(b) bestimmte Ausweichsatz zur Anwendung kommt, wird § 3(5) erneut angewendet, um den Referenzsatz für den nächsten nachfolgenden Reset-Zeitraum zu bestimmen.
- (c) *Nachfolge-Benchmarksatz oder Alternativ-Benchmarksatz.* Falls der Unabhängige Berater nach billigem Ermessen feststellt,

- If this § 3(5)(b) is to be applied in respect of the First Reset Date, the "Reference Rate" applicable to the first Reset Period shall be the Original Benchmark Rate on the Screen Page on the last day preceding the Interest Determination Date on which such Original Benchmark Rate was displayed.
- If the fallback rate determined in accordance with this § 3(5)(b) is to be applied, § 3(5) will be operated again to determine the Reference Rate applicable to the next subsequent Reset Period.
- (c) *Successor Benchmark Rate or Alternative Benchmark Rate.* If the Independent Adviser determines in its reasonable discretion that:
- (i) there is a Successor Benchmark Rate, then such Successor Benchmark Rate

- (ii) dass es keinen Nachfolge-Benchmarksatz aber einen Alternativ-Benchmarksatz gibt, dann ist dieser Alternativ-Benchmarksatz an Stelle des Ursprünglichen Benchmarksatzes maßgeblich,
- und dann entspricht der "Referenzsatz" für den unmittelbar nachfolgenden Reset-Zeitraum und alle folgenden Reset-Zeiträume vorbehaltlich § 3(5)(h) dem betreffenden Neuen Benchmarksatz an dem betreffenden Zinsfeststellungstag zuzüglich der Anpassungsmarge gemäß § 3(5)(d).
- (d) *Anpassungsmarge.* Die Anpassungsmarge (oder die Formel oder die Methode zur Bestimmung der Anpassungsmarge) wird auf den Neuen Benchmarksatz angewendet, um den betreffenden Referenzsatz zu bestimmen.
- (e) *Benchmark-Änderungen.* Wenn ein Neuer Benchmarksatz und die entsprechende Anpassungsmarge gemäß diesem § 3(5) festgelegt werden, und wenn der Unabhängige Berater feststellt, dass Folgeänderungen, resultierend aus den vorgenannten Festlegungen, hinsichtlich der Feststellungen bezüglich des Zinssatzes notwendig sind, um die ordnungsgemäße Anwendung des Neuen Benchmarksatzes und der entsprechenden Anpassungsmarge zu gewährleisten (diese Änderungen, die "**Benchmark-Änderungen**"), dann wird der Unabhängige Berater die shall subsequently be used in place of the Original Benchmark Rate; or

If the Issuer elects not to pay accrued interest on an Interest Payment Date (in whole or in part), then it will not have any obligation to pay such interest on such Interest Payment Date. Any such failure to pay interest will not constitute a default of the Issuer or any other breach of its obligations under the Notes or for any other purpose.

Ein "**Rechnungslegungssereignis**" liegt vor, wenn eine anerkannte Wirtschaftsprüfungsgesellschaft, die im Auftrag der Emittentin handelt, der Emittentin ein Gutachten übermittelt, wonach die durch die Ausgabe der Schuldverschreibungen beschafften Gelder nicht oder ab dem Tag der Implementierung der betreffenden neuen International Financial Reporting Standards ("IFRS") bzw. anderen Rechnungslegungsstandards, die die IFRS für Zwecke der Erstellung der konsolidierten Jahresabschlüsse der Emittentin ersetzen, nicht mehr als "Eigenkapital" gemäß IFRS bzw. der anwendbaren anderen Rechnungslegungsstandards ausgewiesen werden dürfen.

Der Zeitraum, in dem die Emittentin die Rückzahlung der Schuldverschreibungen infolge des Eintretens eines Rechnungslegungssereignisses mitteilen kann, beginnt an dem Tag, an dem die Änderung der relevanten neuen IFRS (die "**Änderung**") offiziell verabschiedet wird. Zur Klarstellung, diese Frist umfasst

An "**Acquisition Event**" will occur if the Issuer or any Subsidiary (x) has not completed and closed the acquisition of Cypress Semiconductor Corporation, and (y) has publicly stated that it no longer

erklärt hat, dass sie nicht länger beabsichtigt, den Erwerb zu verfolgen und die Emittentin gemäß § 11 den Anleihegläubigern dieses Akquisitionseignis am oder vor dem 5. Oktober 2020 bekanntgemacht hat, bevor sie die Erklärung nach § 5(6) abgegeben hat. Die Emittentin kann auf ihr Recht zur Rückzahlung wegen eines Akquisitionseignisses verzichten, indem sie den Verzicht nach § 11 bekannt macht.

(5) *Kündigungsrecht der Emittentin nach Eintritt eines Kontrollwechselereignisses.*

(a) Wenn ein Kontrollwechsel-Ereignis (wie in § 5(5)(c) definiert) eintritt, hat die Emittentin sobald wie möglich, nachdem sie Kenntnis davon erhalten hat, den Kontrollwechsel-Stichtag (wie in § 5(5)(c) definiert) zu bestimmen und das Kontrollwechsel-Ereignis und den Kontrollwechsel-Stichtag gemäß § 11 anzuzeigen (die "Kontrollwechsel-Mitteilung").

(b) Wenn ein Kontrollwechsel-Ereignis eintritt, ist die Emittentin berechtigt, die Schuldverschreibungen (insgesamt, jedoch nicht teilweise) durch Erklärung gemäß dem nachstehenden Absatz mit Wirkung zu dem Kontrollwechsel-Stichtag zu kündigen.

Die Emittentin kann ihr Recht zur Rückzahlung gemäß diesem § 5(5) durch eine Bekanntmachung an die Anleihegläubiger gemäß § 11 innerhalb einer Frist von nicht mehr als 5 Geschäftstagen nach Bekanntmachung der Kontrollwechsel-Mitteilung ausüben. Diese Bekanntmachung kann auch zeitgleich mit der Kontrollwechsel-Mitteilung erfolgen.

The Issuer may waive its right to call the Notes for redemption based on an Acquisition Event by giving notice of the waiver pursuant to § 11.

(5) *Issuer Call Right following a Change of Control Event.*

(a) If a Change of Control Event (as defined in § 5(5)(c)) occurs, the Issuer will, as soon as practicable, after becoming aware thereof fix the Change of Control Effective Date (as defined in § 5(5)(c)) and give notice in accordance with § 11 of the Change of Control Event and the Change of Control Effective Date (the "**Change of Control Notice**").

(b) If a Change of Control Event occurs, the Issuer may call the Notes for redemption (in whole but not in part) with effect as of the Change of Control Effective Date upon giving notice in accordance with the following paragraph.

The Issuer may give notice to the Noteholders within not more than 5 Business Days after publication of the Change of Control Notice in accordance with § 11 of a redemption pursuant to this § 5(5). Such notice may be given simultaneously with the Change of Control Notice.

Im Falle einer solchen Erklärung ist die Emittentin verpflichtet, die Schuldverschreibungen am Kontrollwechsel-Stichtag zum Nennbetrag zuzüglich der bis zum Kontrollwechsel-Stichtag in Bezug auf die Schuldverschreibungen aufgelaufenen, aber noch nicht bezahlten Zinsen sowie, zur Klarstellung, sämtlicher gemäß § 4(3) fälligen Aufgeschobenen Zinszahlungen zurückzuzahlen.

(c) In diesem § 5(5) gilt Folgendes:

Ein "**Kontrollwechsel-Ereignis**" gilt jedes Mal als eingetreten, wenn nach dem Begebungstag der Schuldverschreibungen ein Kontrollwechsel eintritt und es innerhalb des Kontrollwechselzeitraums zu einer Absenkung des Ratings auf Grund des eingetretenen Kontrollwechsels kommt.

Dabei gilt Folgendes:

Eine "**Absenkung des Ratings**" gilt in Bezug auf einen Kontrollwechsel als eingetreten, wenn (a) innerhalb des Kontrollwechselzeitraums ein zuvor von einer Rating Agentur vergebenes beauftragtes Rating für die langfristigen Verbindlichkeiten der Emittentin (i) zurückgezogen und nicht durch ein gleichwertiges, beauftragtes Rating einer anderen Rating Agentur ersetzt wurde oder (ii) von einem Investment Grade Rating (BBB- von S&P oder jeweils gleichwertig, oder besser) in ein non-Investment Grade Rating (BB+ von S&P oder jeweils gleichwertig, oder schlechter) geändert oder (iii) (falls das von einer Rating Agentur für die langfristigen Verbindlichkeiten der Emittentin vergebene Rating unterhalb des Investment Grade Ratings liegt) um

(c) In this § 5(5):

A "**Change of Control Event**" shall be deemed to have occurred at each time if a Change of Control occurs after the issue date of the Notes and within the Change of Control Period a Rating Downgrade in respect of that Change of Control occurs.

Where:

A "**Rating Downgrade**" shall be deemed to have occurred in respect of a Change of Control (a) if within the Change of Control Period any solicited long-term credit rating previously assigned to the Issuer by any Rating Agency is (i) withdrawn and not subsequently replaced by an equivalent solicited rating by another Rating Agency or (ii) changed from an investment grade rating (BBB- by S&P, or its equivalent for the time being, or better) to a non-investment grade rating (BB+ by S&P, or its equivalent for the time being, or worse) or (iii) (if the long-term credit rating of the Issuer assigned by any Rating Agency shall be below an investment grade rating) lowered one full rating notch (from BB+ to BB by S&P or such similar

Wenn zum Zeitpunkt des Eintritts des Kontrollwechsels von mehr als einer Ratingagentur ein Rating für die langfristigen Verbindlichkeiten der Emittentin vergeben worden ist, dann ist das niedrigere, von einer der Ratingagenturen vergebene Rating für die langfristigen Verbindlichkeiten der Emittentin maßgeblich für die Feststellung, ob eine Absenkung des Ratings eingetreten ist.

If at the time of the occurrence of the Change of Control the long-term credit rating of the Issuer is assigned by more than one Rating Agency, the lower long-term credit rating assigned by any such Rating Agency shall be taken into account to determine whether a Rating Downgrade has occurred.

Intention regarding the Redemption and Repurchase of the Notes

The following paragraphs in italics do not form part of the Terms and Conditions.

Intention regarding Redemption and Repurchase of the Notes

The Issuer intends (without thereby assuming a legal or contractual obligation) that it will redeem or repurchase the Notes (or any part thereof) only to the extent that such part of the aggregate principal amount of the Notes (or any part thereof) to be redeemed or repurchased which was assigned "equity credit" (or such similar nomenclature used by S&P from time to time) on the date on which the Initial Category of Equity Credit was attributed to the Notes does not exceed such part of the net proceeds received by the Issuer or any Subsidiary of the Issuer from the sale or issuance by the Issuer or any Subsidiary of the Issuer to third party purchasers of securities which are assigned by S&P, as the case may be, an aggregate "equity credit" (or such similar nomenclature used by S&P from time to time) that is equal to or greater than the "equity credit" assigned to the relevant Notes (or any part thereof) to be redeemed or repurchased on the date on which the Initial Category of Equity Credit was attributed to the Notes (but taking into account any changes in hybrid capital methodology or another relevant methodology or the interpretation thereof since the issue date of the Notes).

The following exceptions apply as to the Issuer's replacement intention. The Notes are not intended to be replaced:

- (a) *if the rating (or such similar nomenclature then used by S&P) assigned by S&P to the Issuer is at least equal to the rating assigned to the Issuer after S&P has resolved its credit watch following the closing of the acquisition of Cypress Semiconductor Corp. or, if later, on the date of the last additional hybrid issuance (excluding refinancing) of the hybrid securities which were assigned a similar "equity credit" by S&P and the Issuer is of the view that such rating would not fall below this level as a result of such redemption or repurchase; or*
- (b) *in the case of repurchase of less than (x) 10 per cent. of the aggregate principal amount of hybrid capital outstanding, in any period of 12 consecutive months or (y) 25 per cent. of the aggregate principal amount of hybrid capital outstanding, in any period of 10 consecutive years; or*

- (g) Interest for any period of time will be calculated on the basis of the Day Count Fraction.

"Day Count Fraction" means, in respect of the calculation of an amount of interest on any Note for any period of time (from and including the first day of such period to but excluding the last day of such period) (the **"Calculation Period"**):

- (i) if the Calculation Period is equal to or shorter than the Determination Period in which it falls, the number of days in the Calculation Period divided by the number of days in such Determination Period; and
- (ii) if the Calculation Period is longer than one Determination Period, the sum of:
 - (A) the number of days in such Calculation Period falling in the Determination Period in which the Calculation Period begins divided by the number of days in such Determination Period; and
 - (B) the number of days in such

betreffenden Zinsberechnungszeitraum, die in die nachfolgende Feststellungsperiode fallen, dividiert durch die Anzahl der Tage in der betreffenden Feststellungsperiode.

Dabei gilt Folgendes:

"Feststellungsperiode" bezeichnet jede Periode ab einem Feststellungstermin (einschließlich), der in ein beliebiges Jahr fällt, bis zum nächsten Feststellungstermin (ausschließlich).

"Feststellungstermin" bezeichnet jeden 1. April.

(3) Zinslaufende.

Der in einem solchen Fall jeweils anzuwendende Zinssatz wird gemäß diesem § 3 bestimmt.

(4) Feststellung des Referenzsatzes.

Die Berechnungsstelle bestimmt an jedem Zinsfeststellungstag den betreffenden Referenzsatz nach Maßgabe dieses § 3(4).

Der **"Referenzsatz"** für einen Reset-Zeitraum wird von der Berechnungsstelle an dem betreffenden Zinsfeststellungstag (wie nachstehend definiert) vor dem Reset-Termin, an dem der betreffende Reset-Zeitraum beginnt (der **"Referenz-Reset-Termin"**), festgelegt und ist,

(a) solange kein Benchmark-Ereignis eingetreten ist,

(i) der Ursprüngliche

Calculation Period falling in the next Determination Period divided by the number of days in such Determination Period.

Where:

"Determination Period" means each period from and including a Determination Date in any year to but excluding the next Determination Date.

"Determination Date" means each 1 April.

(3) Cessation of interest accrual.

The Notes will cease to bear interest from the beginning of the day their principal amount is due for repayment. If the Issuer fails to make any payment of principal under the Notes when due, the Notes will cease to bear interest from the beginning of the day on which such payment is made. In such case the applicable rate of interest will be determined pursuant to this § 3.

(4) Determination of the Reference Rate.

The Calculation Agent will determine the relevant Reference Rate in accordance with this § 3(4) on each Interest Determination Date.

The **"Reference Rate"** for a Reset Period will be determined by the Calculation Agent on the relevant Interest Determination Date (as defined below) prior to the Reset Date on which the relevant Reset Period commences (the **"Reference Reset Date"**) and will be,

(a) as long as no Benchmark Event has occurred,

(i) the Original Benchmark Rate;

Benchmarksatz; oder

- (ii) falls eine für die Festlegung des Ursprünglichen Benchmarksatzes benötigte Information am betreffenden Zinsfeststellungstag nicht auf der Bildschirmseite erscheint, der Referenzbankensatz an diesem Zinsfeststellungstag.
- Kann der Referenzbankensatz nicht gemäß der Definition dieses Begriffs bestimmt werden, aber ist kein Benchmark-Ereignis eingetreten, entspricht der jeweilige "Referenzsatz" dem durch die Berechnungsstelle festgelegten Ursprünglichen Benchmarksatz, welcher zuletzt auf der Bildschirmseite verfügbar war; und
- (b) wenn ein Benchmark-Ereignis eingetreten ist, wird der "Referenzsatz" für jeden Reset-Zeitraum, der an oder nach dem Stichtag (wie in § 3(5)(i) definiert) beginnt, gemäß § 3(5) bestimmt.

"Ursprünglicher Benchmarksatz" bezeichnet den um 11:00 Uhr (Frankfurter Zeit) gefixten, als Prozentsatz ausgedrückten Swapsatz per annum für in Euro denominierter Swap-Transaktionen mit einer Laufzeit von 5 Jahren, der auf der Bildschirmseite am betreffenden Zinsfeststellungstag gegen 11:00 Uhr (Frankfurter Zeit) angezeigt wird.

Der "**Referenzbankensatz**" ist der Prozentsatz, der auf Basis der 5-Jahres-Mid-Swapsatz-Quotierungen, die der Berechnungsstelle auf Bitten der Emittentin ungefähr um 11:00 Uhr (Frankfurter Zeit) von bis zu fünf führenden von der Emittentin ausgewählten Swap-Händlern im Interbankenhandel (die "**Reset-Referenzbanken**") gestellt werden, am Zinsfeststel-

or

- (ii) in the event that any of the information required for the purposes of the determination of the Original Benchmark Rate does not appear on the Screen Page on the relevant Interest Determination Date, the Reference Bank Rate on that Interest Determination Date.

If the Reference Bank Rate cannot be determined pursuant to the definition of this term, but no Benchmark Event has occurred, the relevant "Reference Rate" shall be equal to the last Original Benchmark Rate available on the Screen Page as determined by the Calculation Agent; and

- (b) if a Benchmark Event has occurred, the "Reference Rate" for each Reset Period commencing on or after the Effective Date (as defined in § 3(5)(i)) will be determined in accordance with § 3(5).

"Original Benchmark Rate" means the annual swap rate which is fixed at 11:00 a.m. (Frankfurt time) and is expressed as a percentage per annum for Euro denominated swap transactions with a maturity of 5 years which appears on the Screen Page on the relevant Interest Determination Date at or around 11:00 a.m. (Frankfurt time).

"Reference Bank Rate" means the percentage rate determined by the Calculation Agent on the basis of the 5-year Mid Swap Rate Quotations provided by up to five leading swap dealers in the interbank market selected by the Issuer (the "**Reset Reference Banks**") to the Calculation Agent at the request of the Issuer at approximately 11:00 a.m. (Frankfurt time) on the Interest

lungstag von der Berechnungsstelle festgelegt wird. Wenn mindestens drei 5-Jahres-Mid-Swapsatz-Quotierungen genannt werden, wird der Referenzbankensatz das arithmetische Mittel der 5-Jahres-Mid-Swapsatz-Quotierungen unter Ausschluss der höchsten Quotierung (bzw., für den Fall von gleich hohen Quotierungen, einer der höchsten Quotierungen) und der niedrigsten Quotierung (bzw., für den Fall von gleich hohen Quotierungen, einer der niedrigsten Quotierungen) sein. Falls nur zwei 5-Jahres-Mid-Swapsatz-Quotierungen zur Verfügung gestellt werden, ist der Referenzbankensatz das rechnerische Mittel der zur Verfügung gestellten Quotierungen. Falls nur eine 5-Jahres-Mid-Swapsatz-Quotierung zur Verfügung gestellt wird, ist der Referenzbankensatz gleich der zur Verfügung gestellten Quotierung. Dabei bezeichnet "**5-Jahres-Mid-Swapsatz-Quotierung**" das arithmetische Mittel der nachgefragten (*bid*) und angebotenen (*offered*) Prozentsätze für den jährlichen Festzinszahlungsstrom (berechnet auf einer 30/360 Tage-Berechnungsbasis) einer fixed-for-floating Euro Zinsswap-Transaktion, (x) die eine 5-jährige Laufzeit hat und am betreffenden Reset-Termin beginnt, (y) die auf einen Betrag lautet, der dem einer repräsentativen einzelnen Transaktion in dem relevanten Markt zur relevanten Zeit eines anerkannten Händlers mit guter Bonität im Swap-Markt entspricht, und (z) deren variabler Zahlungsstrom auf dem 6-Monats EURIBOR Satz beruht (berechnet auf einer Actual/360 Tage-Berechnungsbasis).

Dabei gilt Folgendes:

"Bildschirmseite" bezeichnet die Reuters Bildschirmseite "ICESWAP2 / EURFIXA" unter der Überschrift "EURIBOR BASIS" und dem Untertitel "11:00 AM Frankfurt time" (auf dem solche Überschriften und Untertitel von Zeit zu Zeit erscheinen). Hat die

Determination Date. If at least three 5-year Mid Swap Rate Quotations are provided, the Reference Bank Rate will be the arithmetic mean of the quotations, eliminating the highest quotation (or, in the event of equality one of the highest) and the lowest quotation (or, in the event of equality, one of the lowest). If only two 5-year Mid Swap Rate Quotations are provided, the Reference Bank Rate will be the arithmetic mean of the quotations provided. If only one 5-year Mid Swap Rate Quotation is provided, the Reference Bank Rate will be the quotation provided. For this purpose, "**5-year Mid Swap Rate Quotation**" means the arithmetic mean of the bid and offered rates for the annual fixed rate leg (calculated on a 30/360 day count basis) of a fixed-for-floating Euro interest rate swap transaction which transaction (x) has a term of 5 years and commencing on the relevant Reset Date, (y) is in an amount that is representative of a single transaction in the relevant market at the relevant time with an acknowledged dealer of good credit in the swap market, and (z) has a floating leg based on the 6-months EURIBOR rate (calculated on an Actual/360 day count basis).

Where:

"Screen Page" means Reuters Screen Page "ICESWAP2 / EURFIXA" under the heading "EURIBOR BASIS" and the caption "11:00 AM Frankfurt time" (as such headings and captions may appear from time to time). If the Screen Page permanently ceases to quote the Original

Bildschirmseite dauerhaft aufgehört, den Ursprünglichen Benchmarksatz anzugeben, ist diese Quotierung jedoch auf einer anderen, von der Berechnungsstelle nach billigem Ermessen ausgewählten Bildschirmseite verfügbar (die "Ersatzbildschirmseite"), wird die Ersatzbildschirmseite zum Zweck der Festlegung des Ursprünglichen Benchmarksatzes eingesetzt.

"Reset-Termin" bezeichnet den Ersten Reset-Termin und danach jeden fünften Jahrestag des vorausgegangenen Reset-Termins.

"Reset-Zeitraum" bezeichnet jeden Zeitraum ab dem Ersten Reset-Termin (einschließlich) bis zum nächstfolgenden Reset-Termin (ausschließlich) und nachfolgend ab jedem Reset-Termin (einschließlich) bis zu dem jeweils nächstfolgenden Reset-Termin (ausschließlich).

"TARGET-Geschäftstag" bezeichnet einen Tag, an dem das Trans-European Automated Real-time Gross settlement Express Transfer system 2 (TARGET2) betriebsbereit ist.

"Zinsfeststellungstag" bezeichnet den zweiten TARGET-Geschäftstag vor dem betreffenden Referenz-Reset-Termin.

(5) Benchmark-Ereignis.

Wenn ein Benchmark-Ereignis in Bezug auf den Ursprünglichen Benchmarksatz (oder eine Teilkomponente davon) eintritt, gilt für die Bestimmung des betreffenden Referenzsatzes und den Reset des Zinssatzes gemäß diesem § 3(5) Folgendes:

- (a) Die Emittentin wird sich bemühen, sobald dies (nach billigem Ermessen der Emittentin) praktikabel ist, einen Unabhängigen Berater zu benennen, der einen Neuen Benchmarksatz, die Anpassungsmarge (gemäß § 3(5)(d)) und etwaige Benchmark-

- (a) The Issuer shall endeavour to appoint an Independent Adviser as soon as it is (in the Issuer's reasonable discretion) practicable, who will determine a New Benchmark Rate, the Adjustment Spread (in accordance with

- Änderungen (gemäß § 3(5)(e)) festlegt.
- § 3(5)(d)) and any Benchmark Amendments (in accordance with § 3(5)(e)).
- (b) Wenn vor dem betreffenden Zinsfeststellungstag
- (i) es der Emittentin nicht gelingt, einen Unabhängigen Berater zu ernennen; oder

If the Issuer elects not to pay accrued interest on an Interest Payment Date (in whole or in part), then it will not have any obligation to pay such interest on such Interest Payment Date. An "**Acquisition Event**" will occur if the Issuer or any Subsidiary (x) has not completed and closed the acquisition of Cypress Semiconductor Corporation, and (y) has publicly stated that it no longer

Die Emittentin kann ihr Recht zur Rückzahlung gemäß diesem § 5(5) durch eine Bekanntmachung an die Anleihegläubiger gemäß § 11 innerhalb einer Frist von nicht mehr als 5 Geschäftstagen nach Bekanntmachung der Kontrollwechsel-Mitteilung ausüben. Dabei gilt Folgendes:

Eine "**Absenkung des Ratings**" gilt in Bezug auf einen Kontrollwechsel als eingetreten, wenn (a) innerhalb des Kontrollwechselzeitraums ein zuvor von einer Rating Agentur vergebenes beauftragtes Rating für die langfristigen Verbindlichkeiten der Emittentin (i) zurückgezogen und nicht durch ein gleichwertiges, beauftragtes Rating einer anderen Rating Agentur ersetzt wurde oder (ii) von einem Investment Grade Rating (BBB- von S&P oder jeweils gleichwertig, oder besser) in ein non-Investment Grade Rating (BB+ von S&P oder jeweils gleichwertig, oder schlechter) geändert oder (iii) (falls das von einer Rating Agentur für die langfristigen Verbindlichkeiten der Emittentin vergebene Rating unterhalb des Investment Grade Ratings liegt) um

Wenn zum Zeitpunkt des Eintritts des Kontrollwechsels von mehr als einer Ratingagentur ein Rating für die langfristigen Verbindlichkeiten der Emittentin vergeben worden ist, dann ist das niedrigere, von einer der Ratingagenturen vergebene Rating für die langfristigen Verbindlichkeiten der Emittentin maßgeblich für die Feststellung, ob eine Absenkung des Ratings eingetreten ist.

If at the time of the occurrence of the Change of Control the long-term credit rating of the Issuer is assigned by more than one Rating Agency, the lower long-term credit rating assigned by any such Rating Agency shall be taken into account to determine whether a Rating Downgrade has occurred.

in respect of any Notes and having an account maintained with the Clearing System, including the Clearing System.

§ 15 (Language)

These Terms and Conditions are written in the German language and provided with an English language translation. The German text will be the only legally binding version. The English language translation is provided for convenience only.

Intention regarding the Redemption and Repurchase of the Notes

The following paragraphs in italics do not form part of the Terms and Conditions.

Intention regarding Redemption and Repurchase of the Notes

The Issuer intends (without thereby assuming a legal or contractual obligation) that it will redeem or repurchase the Notes (or any part thereof) only to the extent that such part of the aggregate principal amount of the Notes (or any part thereof) to be redeemed or repurchased which was assigned "equity credit" (or such similar nomenclature used by S&P from time to time) on the date on which the Initial Category of Equity Credit was attributed to the Notes does not exceed such part of the net proceeds received by the Issuer or any Subsidiary of the Issuer from the sale or issuance by the Issuer or any Subsidiary of the Issuer to third party purchasers of securities which are assigned by S&P, as the case may be, an aggregate "equity credit" (or such similar nomenclature used by S&P from time to time) that is equal to or greater than the "equity credit" assigned to the relevant Notes (or any part thereof) to be redeemed or repurchased on the date on which the Initial Category of Equity Credit was attributed to the Notes (but taking into account any changes in hybrid capital methodology or another relevant methodology or the interpretation thereof since the issue date of the Notes).

The following exceptions apply as to the Issuer's replacement intention. The Notes are not intended to be replaced:

- (a) *if the rating (or such similar nomenclature then used by S&P) assigned by S&P to the Issuer is at least equal to the rating assigned to the Issuer after S&P has resolved its credit watch following the closing of the acquisition of Cypress Semiconductor Corp. or, if later, on the date of the last additional hybrid issuance (excluding refinancing) of the hybrid securities which were assigned a similar "equity credit" by S&P and the Issuer is of the view that such rating would not fall below this level as a result of such redemption or repurchase; or*
- (b) *in the case of repurchase of less than (x) 10 per cent. of the aggregate principal amount of hybrid capital outstanding, in any period of 12 consecutive months or (y) 25 per cent. of the aggregate principal amount of hybrid capital outstanding, in any period of 10 consecutive years; or*
- (c) *if the Notes are redeemed by the Issuer in accordance with § 5(4) (Gross-up Event, Tax Event, Accounting Event, Rating Agency Event, Acquisition Event or in case of minimal outstanding aggregate principal amount) or § 5(5) (Change of Control Event); or*
- (d) *if the Notes are not assigned any category of "equity credit" (or such similar nomenclature then used by S&P at the time of such redemption or repurchase); or*
- (e) *in the case of any repurchase, up to the maximum amount of Notes repurchased that would allow the Issuer's aggregate principal amount of hybrid capital remaining outstanding after such repurchase to be equal to or greater than the maximum aggregate principal amount of hybrid capital to which S&P would assign any category of "equity credit" (or such similar nomenclature then used by S&P at the time of such repurchase); or*
- (f) *if such redemption or repurchase occurs on or after Second Step-up Date.*

Terms used but not defined in the preceding sentence shall have the meaning set out in the Terms and Conditions.

WARNING ON TAX CONSEQUENCES

Income received from the Notes is subject to taxation. In particular, the tax laws of any jurisdiction with authority to impose taxes on the investor and the tax laws of the Issuer's state of incorporation, statutory seat and place of effective management, i.e. Germany, might have an impact on the income received from the Notes.

Persons interested in purchasing any of the Notes should seek advice from their own tax counsel regarding the tax implications of purchasing, holding, disposing, donating and bequeathing Notes, and the regulations on reclaiming previously withheld withholding tax. Due consideration to a shareholder's specific tax-related circumstances can only be given within the scope of an individual tax consultation.

The following sections describe a number of key German taxation principles for German tax residents (either an individual with a domicile or habitual abode in Germany or a legal entity with its corporate seat or place of management in Germany) that may be relevant to purchasing, holding or transferring the Notes. The information provided does not constitute a comprehensive or exhaustive explanation of all possible aspects of taxation in this area. This overview is based on applicable German tax law as of the date hereof, including the double taxation treaties that are currently in force between Germany and other countries. It should be noted that the legal situation may change, including, in certain cases, with retroactive effect.

Taxation in the Federal Republic of Germany

The following is a general discussion of certain German tax consequences of the acquisition, holding and disposal of the Notes. It does not purport to be a comprehensive description of all German tax considerations that may be relevant to a decision to purchase Notes, and, in particular, does not consider any specific facts or circumstances that may apply to a particular purchaser. This discussion of the tax consequences of an investment in the Notes is based on the tax laws of Germany currently in force and as applied on the date of this Prospectus, which are subject to change, possibly with retroactive or retrospective effect.

Tax resident Holders of the Notes

The section "*Tax resident Holders of the Notes*" refers to persons who are tax residents of Germany (i.e. persons whose residence, habitual abode, statutory seat, or place of effective management is located in Germany).

Withholding tax on interest payments and capital gains

Interest payments received by an individual Holder of the Notes will be subject to German withholding tax if the Notes are kept or administrated in a custodial account with a German branch of a German or non-German credit institution (*Kreditinstitut*) or financial services institution (*Finanzdienstleistungsinstitut*), a German securities trading company (*Wertpapierhandelsunternehmen*) or a German securities trading bank (*Wertpapierhandelsbank*) (each a "**Disbursing Agent**", *auszahlende Stelle*). The flat income tax rate is 25% (plus 5.5% solidarity surcharge thereon, the total withholding being 26.375%). An electronic information system for withholding of church tax will apply to individuals subject to church tax in relation to investment income, with the effect that church tax will be collected by the Disbursing Agent by way of withholding unless the investor has filed a blocking notice (*Sperrvermerk*) with the German Federal Central Tax Office (*Bundeszentralamt für Steuern*) in which case the investor will be assessed to church tax.

The same treatment applies to capital gains (i.e. the difference between the proceeds from the disposal, redemption, repayment or assignment after deduction of expenses directly related to the disposal, redemption, repayment or assignment and the cost of acquisition) derived by an individual

Holder provided the Notes have been held in a custodial account with a Disbursing Agent since the time of their acquisition. If Notes held or administrated in the same custodial account have been acquired at different points in time, the Notes first acquired will be deemed to have been sold first for the purposes of determining the capital gains. Where Notes are acquired and/or sold or redeemed in a currency other than Euro, the sales/redemption price and the acquisition costs have to be converted into Euro on the basis of the foreign exchange rates prevailing on the sale or redemption date and the acquisition date respectively. If interest coupons or interest claims are disposed of separately (i.e. without the Notes), the proceeds from the disposition are subject to withholding tax. The same applies to proceeds from the payment of interest coupons or interest claims if the Notes have been disposed of separately.

To the extent the Notes have not been kept in a custodial account with a Disbursing Agent since the time of their acquisition, upon the disposal, redemption, repayment or assignment withholding tax applies at a rate of 26.375% (including solidarity surcharge, plus church tax, if applicable) on 30% of the disposal or redemption proceeds (plus interest accrued on the Notes ("**Accrued Interest**", *Stückzinsen*), if any), unless the investor or the previous depository bank was able and allowed to prove evidence for the investor's actual acquisition costs to the Disbursing Agent.

In computing any German tax to be withheld, the Disbursing Agent may generally deduct from the basis of the withholding tax negative investment income realized by the individual Holder of the Notes via the Disbursing Agent (e.g. losses from the sale of other securities with the exception of shares). The Disbursing Agent may also deduct Accrued Interest on the Notes or other securities paid separately upon the acquisition of the respective security via the Disbursing Agent. In addition, subject to certain requirements and restrictions the Disbursing Agent may credit foreign withholding taxes levied on investment income in a given year regarding securities held by the individual Holder in the custodial account with the Disbursing Agent.

Individual Holders may be entitled to an annual allowance (*Sparer-Pauschbetrag*) of EUR 801 (EUR 1,602 for jointly assessed individual Holders) for all investment income received in a given year. Upon the individual Holder filing an exemption certificate (*Freistellungsauftrag*) with the Disbursing Agent, the Disbursing Agent will take the allowance into account when computing the amount of tax to be withheld. No withholding tax will be deducted if the Holder of the Notes has submitted to the Disbursing Agent a certificate of non-assessment (*Nichtveranlagungsbescheinigung*) issued by the competent local tax office.

If Notes are kept or administrated in a custodial account with a Disbursing Agent, German withholding tax will not apply to gains from the disposal, redemption, repayment or assignment of Notes held by a corporation as Holder while ongoing payments, such as interest payments, are subject to withholding tax (irrespective of any deductions of foreign tax and capital losses incurred). With regard to gains from the disposal, repayment or assignment of Notes held by an individual Holder, a business partnership or through the permanent establishment of a non-resident taxpayer, the same may apply upon application where the Notes form part of a trade or business, subject to further requirements being met.

The Issuer is not obliged under German law to withhold any withholding tax (*Kapitalertragsteuer*) on interest payments and upon the sale or redemption of the Notes.

Taxation of current income and capital gains

The personal income tax liability of an individual Holder deriving income from capital investments under the Notes is, in principle, settled by the tax withheld. To the extent withholding tax has not been levied, such as in the case of Notes kept in custody abroad or if no Disbursing Agent is involved in the payment process, the individual Holder must report his or her income and capital gains derived from

the Notes on his or her tax return and then will also be taxed at a rate of 25% (plus solidarity surcharge and church tax thereon, if applicable). If the withholding tax on a disposal, redemption, repayment or assignment has been calculated from 30% of the disposal proceeds (rather than from the actual gain), an individual Holder may and in case the actual gain is higher than 30% of the disposal proceeds must also apply for an assessment on the basis of his or her actual acquisition costs. Further, an individual Holder may request that all investment income of a given year is taxed at his or her lower individual tax rate based upon an assessment to tax with any amounts over withheld being refunded. In each case, the deduction of expenses (other than transaction costs) on an itemized basis is not permitted.

Capital losses from the disposal, redemption, repayment or assignment of the Notes held as private assets should generally be tax-recognized irrespective of the holding period of the Notes. The losses may, however, not be used to offset other income like employment or business income but may only be offset against investment income subject to certain limitations. Losses not utilised in one year may be carried forward into subsequent years but may not be carried back into preceding years.

According to the view of German tax authorities, losses suffered upon a bad debt loss (*Forderungsausfall*) and a waiver of a receivable (*Forderungsverzicht*) (to the extent the waiver does not qualify as a hidden contribution) shall, in general, not be deductible for tax purposes. With respect to a bad debt loss the German Federal Tax Court has recently rejected the view of German tax authorities; the question of whether this also applies to a waiver of a receivable has been left open by the court. However, the federal ministry of finance has not yet changed their view in this respect.

The tax authorities have confirmed in 2019 that deviating from their former view, losses from a sale or a redemption qualify, subject to the aforementioned loss ring-fencing rules, as tax deductible even where transaction costs exceed the sales or redemption proceeds. However, Disbursing Agents may apply the former view of the tax authorities until the end of 2019 with respect to German withholding tax.

According to the recently published draft bill of the German Federal Government for an annual Tax Act 2019 (*Jahressteuergesetz 2019*) dated 31 July 2019 the view of the federal ministry of finance on the non-deductibility of capital losses for tax purposes in the scenarios described above shall largely be codified in the German Income Tax Act.

The coalition agreement between the German Christian Democratic Party, the German Christian Social Union and the German Social Democratic Party for the formation of the current German federal government provides that the flat tax regime shall be partially abolished for certain capital investment income, including interest income. That means that income received by Holders holding the Notes as private assets may be taxed at individual progressive income tax rates of up to 45% in the future (plus a 5.5% solidarity surcharge thereon, unless abolished or reduced in the future, and church tax, if applicable to the individual Holder). According to a recently published draft bill of the German federal ministry of finance for the amendment of the solidarity surcharge act dated 6 August 2019, the solidarity surcharge shall only be levied for wage tax and income tax purposes from the assessment period 2021 onwards if the individual income tax of the holder exceeds the threshold of EUR 16,956 (EUR 33,912 for jointly assessed investors). Pursuant to the draft bill, the solidarity surcharge shall remain in place for purposes of the withholding tax, the flat tax regime and the corporate income tax.

Where Notes form part of a trade or business the withholding tax, if any, will not settle the personal or corporate income tax liability. Where Notes form part of a trade or business, interest (accrued) must be taken into account as income. The respective Holder will have to report income and related (business) expenses on the tax return and the balance will be taxed at the Holder's applicable tax rate. Withholding tax levied, if any, will be credited against the personal or corporate income tax of the Holder. Where Notes form part of a German trade or business the current income and gains from the disposal, redemption, repayment or assignment of the Notes may also be subject to German trade tax.

Non-resident Holders of the Notes

Interest, including Accrued Interest, and capital gains are not subject to German taxation, unless (i) the Notes form part of the business property of a permanent establishment, including a permanent representative, or a fixed base maintained in Germany by the Holder or (ii) the income otherwise constitutes German-source income. In cases (i) and (ii) a tax regime similar to that explained above under "Tax resident Holders of the Notes" applies.

Non-residents of Germany are, in general, exempt from German withholding tax on interest and the solidarity surcharge thereon. However, where the interest is subject to German taxation as set forth in the preceding paragraph and the Notes are held in a custodial account with a Disbursing Agent, withholding tax may be levied under certain circumstances. The withholding tax may be refunded based on an assessment to tax or under an applicable tax treaty.

Substitution of the Issuer

If the Issuer exercises the right to substitute the debtor of the Notes, the substitution might, for German tax purposes, be treated as an exchange of the Notes for new notes issued by the Substitute Debtor and subject to similar taxation rules like the Notes. In particular, such a substitution could result in the recognition of a taxable gain or loss for any Holder of a Note.

Inheritance and gift tax

The transfer of the Notes to another person by way of gift or inheritance may be subject to German gift or inheritance tax, respectively, if inter alia

- (i) the testator, the donor, the heir, the donee or any other acquirer had his residence, habitual abode or, in case of a corporation, association (*Personenvereinigung*) or estate (*Vermögensmasse*), has its seat or place of management in Germany at the time of the transfer of property,
- (ii) except as provided under (i), the testator's or donor's Notes belong to business assets attributable to a permanent establishment or a permanent representative in Germany.

Special regulations may apply to certain German expatriates.

Other taxes

No stamp, issue, value added, capital transfer or registration taxes or such duties will be payable in Germany in connection with the issuance, delivery or execution as well as the purchase, sale or other disposal of the Notes. However, under certain circumstances entrepreneurs may choose liability to German value added tax with regard to the sale of the Notes to other entrepreneurs which would otherwise be tax exempt. Currently, net assets tax is not levied in Germany.

Taxation in the Grand Duchy of Luxembourg

The following information is of a general nature only and is based on the laws presently in force in Luxembourg, though it is not intended to be, nor should it be construed to be, legal or tax advice. This summary does not allow any conclusion to be drawn with respect to issues not specifically addressed. The information contained within this section is limited to Luxembourg to certain withholding tax issues and prospective investors in the Notes should therefore consult their own professional advisers as to the effects of state, local or foreign laws, including Luxembourg tax law, to which they may be subject.

Please be aware that the residence concept used under the respective headings below applies for Luxembourg income tax assessment purposes only. Any reference in the present section to a withholding tax or a tax of a similar nature, or to any other concepts, refers to Luxembourg tax law and/or concepts only. Also, please note that a reference to Luxembourg income tax generally encompasses corporate income tax (*impôt sur le revenu des collectivités*), municipal business tax (*impôt commercial communal*), a solidarity surcharge (*contribution au fonds pour l'emploi*) as well as personal income tax (*impôt sur le revenu des personnes physiques*). Corporate taxpayers may further be subject to net wealth tax (*impôt sur la fortune*), as well as other duties, levies and taxes. Corporate income tax, municipal business tax and the solidarity surcharge invariably apply to most corporate taxpayers resident in Luxembourg for tax purposes. Individual taxpayers are generally subject to personal income tax and a solidarity surcharge. Under certain circumstances, where individual taxpayers act in the course of the management of a professional or business undertaking, municipal business tax may apply as well.

Withholding Tax

Under Luxembourg tax law currently in effect and subject to the exception below, there is no Luxembourg withholding tax on payments of interest (including accrued but unpaid interest) or repayments of principal. There is also subject to the exception below no Luxembourg withholding tax upon repayment of the principal, sale, refund or redemption of the Notes.

In accordance with the law of 23 December 2005, as amended, interest payments made by Luxembourg paying agents to individual beneficial owners, which are residents of Luxembourg, are subject to a 20 per cent. withholding tax. This withholding tax applies also on accrued interest received upon disposal, redemption or repurchase of the Notes. Responsibility for withholding such tax will be assumed by the Luxembourg paying agent. Such withholding tax will be in full discharge of income tax if the beneficial owner is an individual acting in the course of the management of his/her private wealth.

Further, Luxembourg resident individuals acting in the course of the management of their private wealth, who are the beneficial owners of interest payments and other similar income made by a paying agent established outside Luxembourg in a Member State of the European Union may opt for a final 20% levy. In such case, the 20% levy is calculated on interest payments, as well as accrued interest received upon disposal, redemption or repurchase of the Notes. The option of the 20% final levy must cover all interest payments made by paying agents to the beneficial owner over the full civil year.

Income Taxation

Non-resident Holder

A non-resident Holder, not having a permanent establishment or permanent representative in Luxembourg to which or to whom such Notes are attributable, is not subject to Luxembourg income tax on interest accrued or received, redemption premiums or issue discounts, or any other income under the Notes. A gain realised by such non-resident Holder on the sale or disposal, in any form whatsoever, of the Notes is further not subject to Luxembourg income tax.

A non-resident Holder acting in the course of the management of professional or business undertaking, who has a permanent establishment or permanent representative in Luxembourg to which or to whom such Notes are attributable, is subject to Luxembourg income tax on interest accrued or received, redemption premiums or issue discounts, or other income under the Notes, and on any gains realised upon the sale or disposal, in any form whatsoever of the Notes.

Resident Holder

Holder who/which are resident of Luxembourg will not be liable for any Luxembourg income tax on repayment of principal.

Luxembourg resident corporate Holder

A corporate Holder must include any interest accrued or received, any redemption premium or issue discount, as well as any gain realized on the sale or disposal, in any form whatsoever, of the Notes, in its taxable income for Luxembourg income tax assessment purposes.

Corporate Holder that are governed by the law of 11 May 2007 on family estate management companies, as amended, or by the law of 17 December 2010 on undertakings for collective investment, as amended, or by the law of 13 February 2007 on specialized investment funds as amended, or by the law of 23 July 2016 on reserved alternative investment funds (provided it is not foreseen in the incorporation documents that (i) the exclusive object is the investment in risk capital and that (ii) Article 48 of the aforementioned law of 23 July 2016 apply), as amended, are tax exempt entities in Luxembourg, and are thus not subject to any Luxembourg tax (i.e., corporate income tax, municipal business tax and net wealth tax) other than the annual subscription tax calculated on their (paid up) share capital (and share premium) or net asset value.

Luxembourg resident individual Holder

An individual Holder, who acts in the course of the management of his private wealth and who is a resident of Luxembourg for tax purposes, has further to include the portion of the gain corresponding to accrued but unpaid interest in respect of the Holder in his taxable income, except if (i) withholding tax has been levied on such payments in accordance with the law of 23 December 2005, or (ii) the individual Holder has opted for the application of a 20% withholding tax in full discharge of income tax in accordance with the law of 23 December 2005, which applies if a payment of interest has been made or ascribed by a paying agent established outside Luxembourg in an EU Member State, or in a State of the European Economic Area other than an EU Member state.

The above 20% withholding tax represents the final tax liability on interest received for the Luxembourg resident individuals receiving the interest payments in the course of their private wealth and can be refunded in consideration of foreign withholding tax, based on double tax treaties concluded by Luxembourg.

Under Luxembourg domestic tax law, gains realised by an individual Holder, who acts in the course of the management of his private wealth and who is a resident of Luxembourg for tax purposes, on the sale or disposal, in any form whatsoever, of Notes are not subject to Luxembourg income tax, provided this sale or disposal took place six months after the acquisition of the Notes, or that the sale or disposal does not precede the acquisition of the Notes.

An individual Holder acting in the course of the management of professional or business undertaking must include any income under the Notes in its taxable basis. In that event, such 20% withholding tax levied will be credited against its final income tax liability.

Net Wealth Taxation

A corporate Holder, whether it is a resident of Luxembourg for tax purposes or, if not, it maintains a permanent establishment or a permanent representative in Luxembourg to which such Notes are attributable, is subject to Luxembourg net wealth tax on such Notes, except if the Holder is governed by the law of 11 May 2007 on family estate management companies, as amended, or by the law of 17 December 2010 on undertakings for collective investment, as amended, or by the law of 13 February 2007 on specialized investment funds, or is a securitization company governed by the law of 22 March 2004 on securitization, as amended, or is a capital company governed by the law of 15 June

2004 on venture capital vehicles, as amended or is a reserved alternative investment fund governed by the law of 23 July 2016, as amended. However, a securitization company subject to the amended law of 22 March 2004 and a company subject to the amended law of 15 June 2004 on venture capital vehicles are, as from 1 January 2016, subject to a minimum net wealth tax, as well as reserved alternative investment funds subject to the law of 23 July 2016, as amended, provided it is foreseen in the incorporation documents that (i) the exclusive object is the investment in risk capital and that (ii) Article 48 of the aforementioned law of 23 July 2016, as amended, applies.

An individual Holder, whether he/she is resident of Luxembourg or not, is not subject to Luxembourg net wealth tax on the Notes.

Inheritance and Gift Tax

Where a Holder is a resident of Luxembourg for tax purposes at the time of his/her death, the Notes are included in his/her taxable estate for inheritance tax assessment purposes.

Gift tax may be due on a gift or donation of Notes if embodied in a Luxembourg deed passed in front of a Luxembourg notary or recorded in Luxembourg.

Other Taxes

In principle, neither the issuance nor the transfer, repurchase or redemption of Notes will give rise to any Luxembourg registration tax or similar taxes.

However, a fixed or ad valorem registration duty may be due in case the Notes must be produced before an official Luxembourg authority, or in the case of a registration of the Notes on a voluntary basis, or if the Notes are appended to a document that requires mandatory registration.

The proposed financial transaction tax (FTT)

On 14 February 2013, the European Commission published a proposal (the "**Commission's Proposal**") for a Directive for a common FTT in Belgium, Germany, Estonia, Greece, Spain, France, Italy, Austria, Portugal, Slovenia and Slovakia (the "**Participating Member States**"). However, Estonia has since stated that it will not participate.

The Commission's Proposal has a very broad scope and could, if introduced, apply to certain dealings in securities (including secondary market transactions) in certain circumstances. The Commission Proposal focused on levying a FTT on financial transactions (as defined in the Commission Proposal), including the purchase, sale and exchange of financial instruments. Under the Commission Proposal, the rate of the FTT would not be lower than 0.1% (0.01% for derivatives), generally based on the amount of the paid or owed consideration or in case of derivatives, the notional amount referred to in the derivatives contract at the time of the financial transaction. The issuance and subscription of financial instruments should, however, be exempt.

Since the date of the publication of the Commission Proposal, discussions have taken place between the Participating Member States. According to a note dated 7 June 2019 by the German delegation for a meeting of the Economic and Financial Affairs Council (ECOFIN) of the European Union on 14 June 2019, the finance ministers of the Participating Member States (excluding Estonia) agreed on 11 March 2019 to continue the negotiations based on a new approach. Such new approach is based on a proposal by France and Germany which is based on the financial transaction tax currently imposed in France. According to such note, the FTT would be limited to shares of listed companies whose head office is located in a Member State of the European Union and whose market capitalization exceeds EUR 1 billion on 1 December of the preceding year. The FTT would be levied on the transfer of ownership when shares of listed public limited companies are acquired. According to such note,

initial public offerings, market making and intraday trading should not be taxable. The tax rate should be no less than 0.2%.

Since the scope of the FTT is not final and subject to the further negotiations between the Participating Member States (excluding Estonia), the scope and timing of the FTT is uncertain. Additional European Union member states may decide to participate and/or certain of the Participating Member States may decide to withdraw. The FTT may therefore also apply to certain dealings in the shares (including secondary market transactions) in certain circumstances.

Prospective investors are urged to consult their own tax advisors regarding the possible implications of the FTT on an investment in the Notes.

SUBSCRIPTION, SALE AND OFFER OF THE NOTES

General

Pursuant to a subscription agreement to be signed on or about 27 September 2019 (the "**Subscription Agreement**") among the Issuer and the Joint Bookrunners, the Issuer has agreed to sell to the Joint Bookrunners, and the Joint Bookrunners have agreed, subject to certain customary closing conditions, to purchase, the Notes on 1 October 2019. The Issuer has furthermore agreed to pay certain fees to the Joint Bookrunners and to reimburse the Joint Bookrunners for certain expenses incurred in connection with the issue of the Notes.

The Subscription Agreement provides that the Joint Bookrunners under certain circumstances will be entitled to terminate the Subscription Agreement. In such event, no Notes will be delivered to investors. Furthermore, the Issuer has agreed to indemnify the Joint Bookrunners against certain liabilities in connection with the offer and sale of the Notes.

The Joint Bookrunners or their respective affiliates have provided from time to time, and expect to provide in the future, investment services to the Issuer and its affiliates, for which the Joint Bookrunners or their respective affiliates have received or will receive customary fees and commissions. In addition, certain Joint Bookrunners or their respective affiliates are involved in financing initiatives relating to the Issuer including in connection with the proposed Acquisition and the yet undrawn Facilities Agreement. Furthermore, in the ordinary course of their business activities, the Joint Bookrunners and their respective affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers. Such investments and securities activities may involve securities and/or instruments of the Issuer or its affiliates. Certain of the Joint Bookrunners or their respective affiliates that have a lending relationship with the Issuer routinely hedge their credit exposure to the Issuer consistent with their customary risk management policies. Typically, such Joint Bookrunners and their respective affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in the Issuer's securities, including potentially the Notes offered hereby. Any such short positions could adversely affect future trading prices of the Notes offered hereby. The Joint Bookrunners and their respective affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

Selling Restrictions

General

Each Joint Bookrunner has agreed to observe all applicable laws and regulations in each jurisdiction in or from which it may acquire, offer, sell or deliver Notes or have in its possession or distribute this Prospectus or any other offering material relating to the Notes. No action has been, or will be, taken in any country or jurisdiction that would permit a public offering of the Notes, or the possession or distribution of this Prospectus or any other offering material relating to the Notes, in any country or jurisdiction where action for that purpose is required. Accordingly, the Notes may not be offered or sold, directly or indirectly, and neither this Prospectus nor any circular, prospectus, form of application, advertisement or other offering material relating to the Notes may be distributed in or from, or published in, any country or jurisdiction except under circumstances that will result in compliance with any applicable laws and regulations and all offers and sales of Notes by it will be made on the same terms.

European Economic Area

In relation to each Member State of the European Economic Area (each, a "**Relevant Member State**"), each Joint Bookrunner has represented and agreed that it has not offered, sold or otherwise made available and will not offer, sell or otherwise make available any Notes to any retail investor in the European Economic Area. For the purposes of this provision the expression retail investor means a person who is one (or more) of the following:

- (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, "**MiFID II**"); or
- (ii) a customer within the meaning of Directive 2016/97/EU (as amended, the "**Insurance Distribution Directive**"), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II.

United States

⁷¹ Rating information is merely an aid for investors for the purposes of decision-making and cannot replace an individual judgment to be made by the investor and may not be taken as a recommendation to purchase or sell certain Notes. Ratings are merely intended as a support when making an investment decision and are only one of the factors relevant to an evaluation, which factor must be seen and weighted in the context of other factors. As ratings often are amended only after the creditworthiness of an issuer (or guarantor) has changed, investors have to make their own judgments although a rating may exist.
