The Issuer does not fall under the scope of application of the MiFID II package. Consequently, the Issuer does not qualify as an “investment firm”, “manufacturer” or “distributor” for the purposes of MiFID II.

Solely for the purposes of each manufacturer’s product approval process, the target market assessment in respect of the Bonds has led to the conclusion that: (i) the target market for the Bonds is eligible counterparties, professional clients and retail clients, each as defined in MiFID II; and (ii) all channels for distribution of the Bonds are appropriate, subject to the distributor’s suitability and appropriateness obligations under MiFID II, as applicable. Any person subsequently offering or selling or recommending the Bonds (a “**distributor**”) should take into consideration the manufacturers’ target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Bonds (by either adopting or refining the manufacturers’ target market assessment) and determining appropriate distribution channels, subject to the distributor’s suitability and appropriateness obligations under MiFID II, as applicable.

For the purposes of the above, the expression “**manufacturer**” means each of Deutsche Bank AG, Sydney Branch and Nomura International plc and the expression “**MiFID II**” means Directive 2014/65/EU, as amended.

SCHEDULE B

In preparation for a withdrawal of the United Kingdom from the European Union, which will result in the termination of its membership of the European Investment Bank (“**EIB**”), the EIB’s Board of Governors has approved a number of measures relating to the EIB’s capital and governance. Some of these measures will require an amendment to the EIB Statute.

With respect to the EIB’s subscribed capital, the Board of Governors has approved the replacement of the United Kingdom capital share by a pro-rata capital increase of the remaining EU Member States. The paid-in part of that capital increase will be financed out of the EIB’s reserves. This capital increase will be effective as of the withdrawal of the United Kingdom from the EU, which is currently expected to take place no later than 31 October 2019. Related amendments to the EIB Statute have also been approved by the Council of the European Union, after consultation with the European Commission and the European Parliament.

In addition, the Board of Governors has approved a further increase of the capital subscribed by Poland and Romania by EUR 5,386,000,000 and EUR 125,452,381, respectively, including related changes to the EIB Statute. This proposed capital increase as well as the related amendments to the EIB Statute are currently following the prescribed procedure for approval by the Council of the European Union, after consultation with the European Commission and the European Parliament, which may take place in the upcoming months.

SCHEDULE C

The section of the Information Memorandum entitled “Information relating to the European Investment Bank” is amended by deleting the information under the heading “Use of proceeds” and substituting with the following:

“The European Union and its long-term financing institution, the European Investment Bank (EIB), have made climate change mitigation and adaptation a policy priority. The EIB supports the EU’s goal of low-carbon and climate-resilient growth within and outside the Union.

Within its climate action financing framework the EIB strongly supports energy efficiency and renewable energy investments. The Bank thus contributes to the EU’s climate change and energy sustainability objectives set out by the European Union.

Lending projects in the fields of renewable energy and energy efficiency include, but are not limited to:

- renewable energy projects such as wind, hydro, solar and geothermal production; and
- energy efficiency projects such as district heating, co-generation, building insulation, energy loss reduction in transmission and distribution and equipment replacement.

The net proceeds of the issue of the Bonds (which proceeds may be converted into euro) will be allocated within EIB’s treasury to a sub-portfolio of the operational money market portfolio. So long as the Bonds are outstanding, the balance of the sub-portfolio will be reduced, at the end of each quarter, by amounts matching disbursements made during the quarter to lending projects within the fields of renewable energy and energy efficiency. Pending such disbursement, the sub-portfolio will be invested in money market instruments.”
