Other long term employee benefit obligations

The Company provides long term service awards to its employees. The expected costs of these benefits are accrued over the period of employment using an accounting methodology similar to that for defined benefit plans. Actuarial gains and losses arising from experience adjustments, and changes in actuarial assumptions, are recognized immediately in profit or loss.

Share-based payments

The Company issues equity-settled share-based payments to certain employees which are measured at fair value at the date of grant. The grant date fair value of options granted to employees is calculated using a Black-Scholes pricing model and recognized as share-based payments expense, with a corresponding increase in equity, over the period that the employees become unconditionally entitled to the options. The model has been adjusted, based on management's best estimate, for the effects of non-transferability, exercise restrictions, and behavioral considerations. Measurement inputs for the Black-Scholes model include share price on measurement date, exercise price of the instrument, expected volatility, weighted average expected life of the instruments, expected dividends and the risk-free interest rate.

At each balance sheet date, the Company revises its estimates of the number of options that are expected to become exercisable. It recognizes the cumulative impact of the revision of original estimates, if any, in the statement of profit or loss and other comprehensive income, and a corresponding adjustment to equity. The proceeds received net of any directly attributable transaction costs are credited to share capital (nominal value) and share premium when the options are exercised.

Short-term benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided.

A liability is recognized for the amount expected to be paid under short-term cash bonus plans if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

5.2.15 Inventories

Inventories are measured at the lower of cost and net realizable value. The cost of inventories is based on the first-in first-out principle, and includes expenditures incurred in acquiring the inventories and other costs incurred in bringing them to their existing location and condition. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated selling expenses.

5.2.16 Earnings per share

The Company presents basic and diluted earnings per share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the period. Diluted EPS is determined by

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2015

adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of all dilutive potential ordinary shares, which comprise warrants and options granted to employees and the CEO.

5.2.17 Finance income and expenses

Finance income mainly comprises interest income on funds invested, changes in the fair value of financial instruments and net gains on financial instruments. Interest income is recognized as it accrues in the statement of profit or loss and other comprehensive income, using the effective interest method.

Finance expense mainly comprises interest expense on loans and borrowings, changes in the fair value of financial instruments and net losses on financial instruments.

Foreign currency gains and losses are reported on a net basis.

5.2.18 Customer acquisition costs

Customer acquisition costs are the directly attributable costs incurred in signing up a new customer. These include, but are not limited to, incentives paid to retailers, commissions paid to external dealers or agents, and sales commissions to the Company's staff.

Customer acquisition costs paid to a party other than the customer are capitalized as intangible assets if and only if the definition and recognition criteria are met, the costs are incremental to the subscriber contracts, and can be measured reliably. As these criteria are generally not met, customer acquisition costs are generally expensed as incurred.

Cash incentives given to customers are not viewed as customer acquisition costs, but are recognized as a deduction from revenue.

Benefits in kind given to customers, to the extent they do not represent a separate component of the arrangement, are recognized as an expense in the appropriate periods.

5.2.19 Changes in accounting policies

The following changes in accounting policies are also expected to be reflected in the Company's consolidated financial statements as of and for the year ending December 31, 2015.

- IFRIC 21 *Levies* provides guidance on accounting for levies in accordance with the requirements of IAS 37 *Provisions, Contingent Liabilities and Contingent Assets*;
- Annual Improvements: *IFRS 2010-2012 cycle and IFRS 2011-2013 cycle* is a collection of minor improvements to a number of standards;
- Amendments to *IAS 19 Employee Benefits—Defined Benefit Plans*: Employee Contributions introduces a relief that reduces the complexity and burden of accounting for certain contributions from employees or third parties.

The adoption of this amendment did not have a material impact on the Company's financial position, statement of profit or loss and other comprehensive income or cash flows.

5.2.20 Forthcoming requirements

Standards, annual improvements, amendments and interpretations to existing standards that are not yet effective for the year ended December 31, 2015 and have not been early adopted by the Company

The following standards, amendments and interpretations to existing standards have been published and are mandatory for the Company's accounting periods beginning on or after January 1, 2016, or later periods, but the Company has not early adopted them. The adoption of these standards, amendments and

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2015

interpretations, except for IFRS 15, is not expected to have a material impact on the Company's financial result or financial position:

IFRS 9 Financial Instruments (effective for annual periods beginning on or after January 1, 2018). This standard is not yet endorsed by the EU.

IFRS 15 Revenue from Contracts with Customers, requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers Operations (effective for annual periods beginning on or after January 1, 2018). This standard is not yet endorsed by the EU. The Company has not yet selected a transition method nor has it determined the effect of the standard on its ongoing financial reporting.

Amendments to IFRS 11—Accounting for Acquisitions of Interests in Joint Operations (effective for annual periods beginning on or after January 1, 2016).

Amendments to IAS 16 and IAS 38—Clarification of Acceptable Methods of Depreciation and Amortisation (effective for annual periods beginning on or after January 1, 2016).

Annual Improvements to IFRS 2012-2014 cycle is a collection of minor improvements to 4 existing standards.

The disclosure initiative (Amendments to IAS 1) are designed to further encourage companies to apply professional judgement in determining what information to disclose in their financial statements. The narrow-focus amendments to IAS 1 Presentation of Financial Statements clarify, rather than significantly change, existing IAS 1 requirements. The amendments relate to the following: materiality; order of the notes; subtotals; accounting policies; and disaggregation. The amendments are effective for annual periods beginning on or after 1 January 2016, with earlier adoption permitted.

5.3 Risk management

5.3.1 General

The Company is exposed to various risks within the context of its normal business activities, which could have a material adverse impact on its business, prospects, results of operations and financial condition. Therefore, controlling these risks is very important for the management of the Company. To support its growth and help the management and the Audit Committee to deal with the challenges the Company faces, the Company has set up a risk management and internal control system. The purpose of the internal control and risk management framework is to enable the Company to meet its objectives. The most important components of this system are described in our Corporate Governance Statement under 7.4 Internal control and risk management systems.

The Company conducts its business in a rapidly changing environment that gives rise to numerous risks and uncertainties that it cannot control. Please refer to 3 Risk factors for more detailed information.

Telenet is involved in a number of legal procedures risen in the normal course of operations, as Telenet operates within a highly competitive environment. Legal proceedings may arise in connection with such as intellectual property, advertising campaigns, product offerings and acquisition opportunities. Telenet discusses in note 5.26.1 certain procedures, which are still pending and to which the Company is involved. Outside the procedures described in note 5.26.1, Telenet does not expect the legal proceedings in which it is a party or by which it is threatened to have a material adverse effect on the activities or consolidated financial position. However, the Company notes that the outcome of legal proceedings can be extremely difficult to predict, and Telenet offers therefore no guarantees.

The Company applies a decentralized risk management approach. The SLT is responsible for identifying and managing risks related to its significant business activities. The Company has introduced a risk governance layer to strengthen its risk oversight by identifying the key supporting risk management functions (2nd line of defense), creating an oversight on the maturity thereof and by implementing a common risk management framework to align processes for risk identification, risk analysis, risk treatment, monitoring and reporting across the key risk areas.

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2015

An overview of the different risk domains is maintained in the risk assurance map, which is organized around four risk groups:

- Governance, Risk & Compliance
- Strategy & Planning
- Operations
- Reporting

Governance, Risk & Compliance captures various topics such as the board structure, ethics, CRS, Telenet's 2nd line of defense and compliance with regulations.

Strategy & Planning focuses on external factors (competition, credit rating, capital, economic conditions, ..), strategy (M&A, innovation, technology, ...) and business planning.

All operational processes (marketing to sales, order to bill, bill to cash, customer service, infrastructure operations) and all supporting processes (build, content, finance & administration, HR, Legal, ...) fall into the risk group Operations.

And finally, the risk group Reporting covers all risks related to internal and external, financial and non-financial reporting.

The assurance map is used to prioritize the internal audits performed by the internal audit function (3rd line of defense) and the reviews performed by Telenet's risk managers and to visualize the results. All issues and action plans resulting from these reviews are maintained and followed up in a central repository. The resolution of the open issues is monitored through management self-assessment and a quarterly follow-up with the issue owners of the high and medium issues. The SLT and the Audit Committee receive a quarterly status update on all open issues.

5.3.2 Credit risk

Qualitative disclosures

Credit risk encompasses all forms of counterparty exposure, i.e. where counterparties may default on their obligations to the Company in relation to lending, hedging, settlement and other financial activities. The Company is exposed to credit risk from its operating activities and treasury activities.

The largest share of the gross assets subject to credit risk from operating activities are trade receivables from residential and small business customers located throughout Belgium and parts of Luxembourg. Accordingly, the Company has no significant concentration of credit risk. The risk of material loss from non-performance from these customers is not considered likely. The Company establishes reserves for doubtful accounts receivable to cover the potential loss from non-payment by these customers.

As for credit risk on financial instruments, the Company maintains credit risk policies with regard to its counterparties to minimize overall credit risk. These policies include an assessment of a potential counterparty's financial condition, credit rating and other credit criteria and risk mitigation tools as deemed appropriate. The Company maintains a policy of entering into such transactions only with highly rated European and US financial institutions. To minimize the concentration of counterparty credit risk, the Company enters into derivative transactions with a portfolio of financial institutions. Likewise, cash and cash equivalents are placed with highly rated financial institutions and only highly rated money market funds are used.

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2015

Quantitative disclosures

The Company considers its maximum exposure to credit risk to be as follows:

More detailed financial information has been disclosed under the respective notes to the consolidated financial statements of the Company.

5.3.3 Liquidity risk

Qualitative disclosures

The principal risks to the Company's sources of liquidity are operational risks, including risks associated with decreased pricing, reduced subscriber growth, increased marketing costs and other consequences of increasing competition and potentially adverse outcomes with respect to the Company's litigations as described in note 5.26.1. Telenet's ability to service its debt and to fund its ongoing operations will depend on its ability to generate cash. Although the Company anticipates generating positive cash flow after deducting interest and taxes, the Company cannot assure that this will be the case. The Company may not generate sufficient cash flow to fund its capital expenditures, ongoing operations and debt obligations.

Telenet Group Holding NV is a holding company with no source of operating income. It is therefore dependent on capital raising abilities and dividend payments from subsidiaries to generate funds. The terms of the 2015 Amended Senior Credit Facility contain a number of significant covenants that restrict the Company's ability, and the ability of its subsidiaries to, among other things, pay dividends or make other distributions, make capital expenditures, incur additional debt and grant guarantees. The agreements and instruments governing its debt contain restrictions and limitations that could adversely affect the Company's ability to operate its business.

The Company believes that its cash flow from operations and its existing cash resources, together with available borrowings under the 2015 Amended Senior Credit Facility, will be sufficient to fund its currently anticipated working capital needs, capital expenditures and debt service requirements.

The 2015 Amended Senior Credit Facility is discussed in greater detail in note 5.13.1 of the consolidated financial statements of the Company.

The Company has implemented a policy on financial risk management. With respect to liquidity and funding risks, the key objectives can be summarized as:

- ensure that at all times the Company has access to sufficient cash resources to meet its financial obligations as they fall due and to provide funds for capital expenditure and investment opportunities as they arise;
- ensure that the Company has sufficient excess liquidity to ensure that the Company can meet its non-discretionary financial obligations in the event of unexpected business disruption;
- ensure compliance with borrowing facilities covenants and undertakings.

A minimum level of cash and cash equivalents is maintained in order to meet unforeseen cash expenses. The Company's funding requirements and funding strategy are reviewed annually.

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2015

A limit has been set regarding the maximum amount that can be invested per derivative product type. On top of this limit, the authorized financial counterparties have been determined and limits have been set for each counterparty by reference to their long-term credit rating.

4 Excluding compensation and employee benefits, VAT and withholding taxes.

5.3.4 Market risk

The Company is exposed to market risks relating to fluctuations in interest rates and foreign exchange rates, primarily between the US dollar and euro. The Company uses financial instruments to manage its exposure to interest rate and foreign exchange rate fluctuations. Each of these risks is discussed below.

Qualitative disclosures on foreign exchange risk

The Company undertakes certain transactions in foreign currencies. Hence, exposures to exchange rate fluctuations arise. Exchange rate exposures are managed within approved policy parameters utilizing forward foreign exchange contracts.

The Company's functional currency is the euro. However, the Company conducts, and will continue to conduct, transactions in currencies other than the euro, particularly the US dollar. About 3.9% (2014: 2.8%)

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2015

of the Company's costs of operations (primarily the costs of network hardware equipment, software and premium cable television rights) were denominated in US dollars, while all of its revenue was generated in euros. The Company has significant US dollar obligations with respect to the contracts it is party to for the supply of premium content. Decreases in the value of the euro relative to the US dollar would increase the cost in euro of the Company's US dollar denominated costs and expenses, while increases in the value of the euro relative to the US dollar would have the reverse effect.

The Company has historically covered a portion of its US dollar cash outflows arising on anticipated and committed purchases through the use of foreign exchange derivative instruments. The Company uses forward foreign exchange contracts to manage the exchange rate risk arising from:

- purchases of goods and services in foreign currency;
- capital equipment priced in foreign currency or subject to price changes due to movements in exchange rates;
- payments of royalties, franchise or license fees denominated in a foreign currency.

Although the Company takes steps to protect itself against the volatility of currency exchange rates, there is a residual risk that currency risks due to volatility in exchange rates could have a material adverse effect on the Company's financial condition and results of operations.

The outstanding forward foreign exchange derivatives as of December 31, 2015 and 2014, are disclosed in more detail in note 5.14 to the consolidated financial statements of the Company.

Qualitative disclosures on interest rate risk

The Company is mainly exposed to interest rate risk arising from borrowings at floating interest rates, interest bearing investments and finance leases. The Company limits its exposure to floating interest rates through the use of derivative instruments. The risk is managed by maintaining an appropriate mix of interest rate swap contracts, interest rate cap contracts, interest rate collar contracts.

The Company implemented a policy on financial risk management. With respect to interest rate risk, the key objectives can be summarized as:

- only long term interest exposures (+ 1 year) are managed;
- all derivative instruments used are designated to actual interest exposures and are authorized under the policy.

As referred to above, the outstanding interest rate derivatives as of December 31, 2015 and 2014, are disclosed in more detail in note 5.14 to the consolidated financial statements of the Company.

Under the 2015 Amended Senior Credit Facility, there is a 0% floor. As a result if EURIBOR is below zero, then EURIBOR is deemed to be zero.

Quantitative disclosures

Interest rate sensitivity testing

For interest rate derivatives and floating rate debt, the Company has used a sensitivity analysis technique that measures the change in the fair value or interest expense of these financial instruments for hypothetical changes in the relevant base rate applicable at year-end, holding all other factors constant.

Telenet Group Holding NV

The amounts generated from this sensitivity analysis are forward-looking estimates of market risk assuming certain market conditions. Actual results in the future may differ materially from those projected results due to the inherent uncertainty of global financial markets.

For fixed rate debt, changes in interest rates generally affect the fair value of the debt instrument, but not the Company's earnings or cash flows. The Company does not currently have any obligation to redeem fixed rate debt prior to maturity and, accordingly, interest rate risk and changes in fair market value should not have a significant effect on the fixed rate debt until the Company would be required to refinance such debt.

Foreign currency sensitivity testing

The following table details the Company's sensitivity to a 10% increase and decrease of the relevant foreign exchange rate. The Company utilizes 10% as the sensitivity rate when reporting foreign currency risk internally as it represents management's assessment of a reasonably possible change in foreign exchange rates. The sensitivity analysis primarily includes the effect on Telenet's US dollar denominated payables (primarily payables associated with network hardware equipment, software and premium cable television rights).

December 31, 2015	Foreign currency	Amount in foreign currency	10% increase	10% decrease
Trade payables	USD	7,724	(564) <i>On profit or loss</i>	689 <i>On profit or loss</i>
December 31, 2014	Foreign currency	Amount in foreign currency	10% increase	10% decrease
Trade payables	USD	4,540	(417) <i>On profit or loss</i>	341 <i>On profit or loss</i>

5.3.5 Capital Risk

The Company manages its capital to ensure that the Company and its subsidiaries will be able to continue as a going concern in order to provide sustainable and attractive returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

The Company monitors capital risk on the basis of the net leverage ratio. The net leverage ratio is calculated as per the 2015 Amended Senior Credit Facility definition, using net total debt, excluding (a) subordinated shareholder loans, (b) capitalized elements of indebtedness under the Clientele and Annuity Fees, (c) any finance leases entered into on or prior to August 1, 2007, and (d) any indebtedness incurred under the network lease entered into with the pure intermunicipalities up to a maximum aggregate amount of €195.0 million, divided by last two quarters' annualized EBITDA.

As of December 31, 2015, the outstanding balance of the 2015 Amended Senior Credit Facility and outstanding cash balance resulted in a Net Total Debt to Consolidated Annualized EBITDA ratio of 3.4x. Compared to December 31, 2014, the Company's net leverage ratio decreased by 0.3x driven by solid EBITDA growth and the absence of meaningful shareholder distributions apart from the Share Repurchase Program 2015. As a reminder, the Company's net leverage ratio at December 31, 2015 did not yet reflect the acquisition of BASE Company, which was pending formal closing at December 31, 2015. The Company's net leverage ratio at December 31, 2015 was significantly below the covenant of 6.0x and the availability test of 5.0x.

Valuation techniques and significant unobservable inputs

The following tables show the valuation techniques used in measuring level 2 fair values, as well as the significant unobservable inputs used.

Financial instruments measured at fair value

<u>Type</u>	<u>Valuation technique</u>	<u>Unobservable inputs</u>	<u>Inter-relationship between unobservable inputs and fair value measurements</u>
Interest rate derivatives	Discounted cash flows: the fair value of the interest rate derivatives is calculated by the Company based on swap curves flat, taking into account the credit risk of both the Company and the respective counterparties to the instruments. The Company also compares the fair values thus calculated to the respective instruments' fair value as provided by the counterparty.	The credit risk of both the Company and the respective counterparties to the instruments.	The estimated fair value would increase (decrease) if: —the credit risk of the company were lower (higher) —the credit risk of the countercompany were higher (lower).
Foreign exchange forwards and embedded derivatives	Discounted cash flows: the fair value of forward exchange contracts is calculated by discounting the difference between the contractual forward price and the current forward price for the residual maturity of the contract using a risk-free interest rate. This calculation is compared to the listed market price, if available.	Not applicable.	Not applicable.

5.5 Goodwill

The total amount of goodwill remained unchanged during the year ended December 31, 2015 and stood at €1,241.8 million.

The Company performed its annual review for impairment during the third quarter of 2015 and 2014, respectively. Goodwill was allocated to one cash generating unit. The recoverable amount of the cash

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2015

generating unit was based on its value in use and was determined by discounting the future cash flows to be generated from its continuing use (Discounted Cash Flow method). The value in use of the cash generating unit for the year ended December 31, 2015 was determined in a similar manner to the year ended December 31, 2014.

The key assumptions for the value in use calculations used to determine the recoverable amount are those regarding the discount rates and expected changes to selling prices, product offerings, direct costs, EBITDA margins and terminal growth rates. The discount rate used is a pre-tax measure estimated based on past experience, and industry average weighted cost of capital. Changes in selling practices and direct costs are based on past practices and expectations of future changes in the market. The calculation uses cash flow projections based on financial budgets approved by management, the Company's Long-Range Plan through 2020, and a pre-tax discount rate of 8.8% (8.7% for the year ended December 31, 2014) based on current market assessments of the time value of money and the risks specific to the Company. The development of the Long-Range Plan relies on a number of assumptions, including:

- market growth, the evolution of the Company's market share and the resulting trends in the number of subscribers;
- the product mix per subscriber;
- the average revenue per subscriber;
- the expected evolution of various direct and indirect expenses;
- the expected evolution in other variable and fixed costs;
- the estimated future capital expenditure (excluding capital expenditure that improves or enhances the Company's assets' performance).

The assumptions were derived mainly from:

- available historic data;
- external market research and observations with respect to e.g. inflation, changes in the remuneration index, evolutions of the number of households, connection points, etc.;
- internal market expectations based on trend reports, the current state of important negotiations, etc.

For the year ended December 31, 2015, as well as for the year ended December 31, 2014, cash flows beyond the five-year period have been extrapolated using no growth rate, based on historical data and macro-economic conditions. This growth rate does not exceed the long-term average growth rate for the industry as published periodically in the Bulletins of the European Central Bank (ECB).

The Discounted Cash Flow calculation for determining the value in use and net recoverable amount mentioned above was reviewed for reasonableness by comparing the result of the calculation to the market capitalization of the Company.

The key assumptions used are reviewed and updated on a yearly basis by the Company's management. Taking into account the considerable excess of the cash generating unit's recoverable amount over its carrying amount, and based on sensitivity testing performed, management is of the opinion that any reasonably possible changes in key assumptions on which the recoverable amount is based would not cause the carrying amount to exceed the recoverable amount at December 31, 2015.

The Company's intangible assets other than goodwill each have finite lives and are comprised primarily of trade name, software development and acquisition costs, customer relationships, broadcasting rights, out of market component of future leases and contracts with suppliers.

The Company assesses the estimated useful lives of its finite-lived intangible assets each reporting period to determine whether events or circumstances warrant a revision of these estimated useful lives. The assessments performed in 2014 and 2015 did not result in any revision to the estimated useful lives of intangible assets.

For the year ended December 31, 2015, the Company removed €50.2 million of gross cost and accumulated amortization related to fully amortized assets which are no longer used by the Company (€107.0 million for the year ended December 31, 2014).

Following a tendering procedure in June 2014, the Company acquired the non-exclusive broadcasting rights of the Belgian football championship for three seasons starting July 2014. The rights related to the second season (2015-2016) met the recognition criteria for intangible assets in 2015, which resulted in additional broadcasting rights of €28.6 million. The agreement entitles the Pro League to grant the broadcasting rights via a different arrangement for the subsequent season (2016-2017).

The write-off of fully amortized assets consists mainly of the broadcasting rights related to the 2014-2015 season, which were written-off upon the end of the season end-May 2015 (€ 28.0 million).

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2015

Following an auction launched in March 2011 by the BIPT, Telenet Tecteo BidCo NV, a subsidiary of the Company in which the Walloon cable operator Tecteo SCRL owns a 25% stake, acquired the fourth 3G mobile spectrum license in Belgium. The Company recognized the acquired spectrum as an intangible asset for an amount of €71.5 million, equal to the net present value at the acquisition date of the yearly installments. In December 2013, the Company's management determined that it would not be able to utilize the spectrum rights and that the recoverable amount was to be considered zero. Consequently, the 3G mobile spectrum license was fully impaired at year-end 2013. Upon return of the 3G mobile spectrum license to the BIPT, the Company removed the fully impaired asset from its books (€71.5 million) in 2015.

At the time of the acquisition of the 3G mobile spectrum license, the Company opted to pay the corresponding purchase price in annual installments. As the Company agreed upon to continue its contractual obligations, the Company consequently maintained the corresponding liability (€31.1 million) as of December 31, 2015 (note 5.13).

Concurrently with the acquisition of the 3G mobile spectrum license, the Company also exercised its call option to acquire a certain number of 2G mobile spectrum frequencies for a total consideration of €31.5 million, which became available in November 2015. On December 15, 2014, the BIPT published the outcome of its request for offers on the 2G frequencies previously earmarked for Telenet. In December 2015, the Company and the BIPT, acting on behalf of the Belgian State, agreed upon a settlement with respect to the unallocated 2G frequencies for a total amount of €3.9 million which was paid on December 30, 2015. The corresponding expense was recognized as a restructuring cost (see note 5.20).

For information regarding finance leases of intangible assets, see note 5.13.5 to the consolidated financial statements of the Company.

Less: allowance for bad debt	(7,116)	(1,961)
Trade receivables, net	145,907	111,665

At December 31, 2015 and 2014, respectively, the aging of the Company's current trade receivables can be detailed as follows:

(in thousands of euro)	Not due	Past due					Total
		1-30 days	31-60 days	61-90 days	91-120 days	>120 days	
December 31, 2015	95,264	29,727	8,596	1,972	1,468	15,996	153,023
December 31, 2014	60,394	37,110	3,865	2,141	1,612	8,504	113,626

All invoices related to residential customers are due within 20 days. For other clients, the payment due date is set at 30 or 60 days. In accordance with the Company's accounting policies and based on historical experience, trade receivables that are less than 120 days past due are not considered impaired. At December 31, 2015, a total amount of €41.8 million (2014: 44.7 million) was past due but not considered impaired for these reasons. With respect to these trade receivables, there are no indications that the debtors will not meet their payment obligations.

Outstanding trade receivables past due for more than 120 days are considered as potentially impaired and are subject to detailed analysis at the customer level, and a provision for impairment of trade receivables is established based upon objective evidence that the Company will not be able to collect the amounts. Significant financial difficulties of the debtor, defaults in payments, and other adverse debtor circumstances are considered indicators that the trade receivable is impaired. Based on the necessary and appropriate underlying documentation, receivables more than 120 days past due for which it is likely that the amount due will be recovered, are excluded from the calculation of the allowance for bad debts. For the remaining receivables more than 120 days past due, a bad debt allowance is provided for at 100%.

At December 31, 2015 current and non-current receivables related to handset sales with a customer credit agreement amount to €5.7 million and €4.7 million respectively.

The concentration of credit risk is limited due to the customer base being large and unrelated. Accordingly, the Company believes that there is no further credit provision required in excess of the allowance for doubtful debts.

Performance shares

In October 2012, Telenet granted its Senior Leadership Team members (other than its chief executive officer) and one other manager a total of 33,896 performance shares ("the 2012 Telenet Performance Shares"). The performance target applicable to the 2012 Telenet Performance Shares is the achievement of a compound annual growth rate (CAGR) for operating free cash flow (OFCF), when comparing 2014 OFCF to 2011 OFCF. A performance range of 75% to 150% of the target OFCF CAGR would generally result in award recipients earning between 50% to 150% of their 2012 Telenet Performance Shares, subject to

reduction or forfeiture based on individual performance and service requirements. On February 10, 2015, the Remuneration & Nomination Committee and the Board of Directors decided that the performance criteria for the 2012 Telenet Performance Shares have been achieved, and as a consequence, the earned 2012 Telenet Performance Shares will vest on October 24, 2015. On October 27, 2015 the Remuneration and Nomination Committee decided to settle the vested performance shares in cash instead of in shares of the Company. This particular performance share plan was paid out in cash for an amount of €1.7 million following the specific decision of the Remuneration Committee. It was decided upon that the cash settlement of this particular equity award did not trigger a modification of the equity classification of all performance shares outstanding, because the decision to settle in cash was a one-off decision due to certain circumstances. As the performance shares have been fair-valued, the cash paid to settle the 2012 performance share plan did not exceed the fair value of the award on the settlement date, the amount of cash paid to repurchase the equity award was charged to equity and consequently has been presented as a cash outflow from financing activities in the consolidated statement of cash flows.

In October 2013, Telenet granted its Senior Leadership Team members (other than its chief executive officer) and one other manager a total of 28,949 performance shares (“the 2013 Telenet Performance Shares”). The performance target applicable to the 2013 Telenet Performance Shares is the achievement of a compound annual growth rate (CAGR) for Adjusted EBITDA, when comparing the Adjusted EBITDA during the period started as of January 1, 2013 and ending on December 31, 2015 to the Adjusted EBITDA for the period started on January 1, 2012 and ended on December 31, 2012. A performance range of 75% to 150% of the target Adjusted EBITDA CAGR would generally result in award recipients earning between 50% to 150% of their 2013 Telenet Performance Shares, subject to reduction or forfeiture based on individual performance and service requirements. On February 9, 2016, The Remuneration & Nomination Committee and the Board of Directors decided that the performance criteria for the 2013 Telenet Performance Shares have been achieved, and as a consequence, the earned 2013 Telenet Performance Shares will vest at 110.95% on October 25, 2016. Any compensation costs attributable to the 2013 Telenet Performance Shares are recognized over the requisite service period of the awards and will be included in compensation expense in Telenet’s consolidated statement of profit or loss and other comprehensive income.

In May 2014, Telenet granted its Senior Leadership Team members (other than its chief executive officer) and one other manager a total of 27,694 performance shares (“the 2014 Telenet Performance Shares”). The performance target applicable to the 2014 Telenet Performance Shares is the achievement of a compound annual growth rate (CAGR) for Adjusted EBITDA, when comparing the Adjusted EBITDA during the period started as of January 1, 2014 and ending on December 31, 2016 to the Adjusted EBITDA for the period started on January 1, 2013 and ended on December 31, 2013. A performance range of 75% to 150% of the target Adjusted EBITDA CAGR would generally result in award recipients earning 50% to 150% of their 2014 Telenet Performance Shares, subject to reduction or forfeiture based on individual performance and service requirements. The earned 2014 Telenet Performance Shares will vest on May 22, 2017. Any compensation costs attributable to the 2014 Telenet Performance Shares are recognized over the requisite service period of the awards and will be included in compensation expense in Telenet’s consolidated statement of profit or loss and other comprehensive income.

In June 2015, Telenet granted its Senior Leadership Team members (other than its chief executive officer) and one other manager a total of 26,104 performance shares (“the 2015 Telenet Performance Shares”). The performance target applicable to the 2015 Telenet Performance Shares is the achievement of a compound annual growth rate (CAGR) for Operating Cash Flow (under USGAAP), when comparing the Operating Cash Flow during the period started as of January 1, 2015 and ending on December 31, 2017 to the Operating Cash Flow for the period started on January 1, 2014 and ended on December 31, 2014. A performance range of 75% to 150% of the target Operating Cash Flow CAGR would generally result in award recipients earning 50% to 150% of their 2015 Telenet Performance Shares, subject to reduction or forfeiture based on individual performance and service requirements. The earned 2015 Telenet Performance Shares will vest on June 18, 2018. Any compensation costs attributable to the 2015 Telenet Performance Shares are recognized over the requisite service period of the awards and will be included in compensation expense in Telenet’s consolidated statement of profit or loss and other comprehensive income.

5.13.1 2015 Amended Senior Credit Facility

Throughout the year ended December 31, 2015 the Company modified the 2010 Senior Credit Facility including, amongst others, changes to certain guarantees and covenants.

In March 2014, the Company launched an extension offer for Term Loans Q, R and T under its 2015 Amended Senior Credit Facility and the redemption of its Senior Secured Notes due 2016 ("Facility N").

As a result of the aforementioned refinancing, which was completed in April 2014, the Company issued a new €474.1 million floating rate Term Loan under the 2015 Amended Senior Credit Facility ("Term Loan W") due June 30, 2022 carrying a margin of 3.25% over EURIBOR. In addition, the Company issued a new €882.9 million floating rate Term Loan under the 2015 Amended Senior Credit Facility ("Term Loan Y") due June 30, 2023 carrying a margin of 3.50% over EURIBOR. The net proceeds of these new issuances, together with available cash and cash equivalents, were used to fully redeem the outstanding amounts under Term Loans Q, R and T and the €100.0 million Senior Secured Notes due 2016.

In addition, as part of the 2015 Senior Credit Facility amendments, lenders under Revolving Credit Facility S ("Facility S") were asked to renew and extend their commitments into a new Revolving Credit Facility ("Facility X"), resulting in a reduction of the existing Facility S (with availability up to December 31, 2016) to €36.9 million and a new Facility X (with availability up to September 30, 2020) of €286.0 million.

The unamortized deferred financing fees related to Term Loan Q, R and T (€3.9 million) and related to the €100.0 million Senior Secured Notes due 2016 (€3.5 million) were accounted for in 2014 as a loss on extinguishment of debt upon early redemption.

In April 2015, Telenet issued two new debt facilities under the 2015 Amended Senior Credit Facility for an aggregate amount of €1,000 million linked to the acquisition of BASE Company. Through Telenet International Finance S.à r.l., which acts as the group's financing center, Telenet issued a floating rate €800.0 million Term Loan ("Term Loan AA") with a maturity of June 30, 2023 and a 3.50% margin over EURIBOR. In addition, Telenet secured an additional €200.0 million Revolving Credit Facility ("Facility Z") with a maturity of June 30, 2018 and a margin of 2.25% over EURIBOR. Term loan AA and Facility Z were undrawn at December 31, 2015.

In July 2015, the Company upsized the available commitments under its Facility X by €95.0 million to an aggregate of €381.0 million by transferring €10.0 million of its commitment under Facility S and generating €85.0 extra commitments. The remaining €26.9 million commitment available under Facility S was canceled in September 2015.

Term Loan AA (€800.0 million), Facility Z (€200.0 million) and a part of Facility X (€217.0 million) were drawn for an aggregate of €1,217 million on February 11, 2016 to fund the acquisition of BASE Company after the approval of the European Commission on February 4, 2016.

The proceeds from the issuance of the Senior Secured Fixed Rate Notes due 2022 (being €450.0 million) and the Senior Secured Fixed Rate Notes due 2024 (being €250.0 million) were used by TFL V to fund two additional facilities under the 2015 Amended Senior Credit Facility, (the “Finco Loan” or “Facilities U and V”), denominated in euro, borrowed by Telenet International Finance S.à r.l. (“TIF”).

The Senior Secured Fixed Rate Notes due 2022 and 2024 were issued on August 13, 2012 and the cash was received on August 16, 2012. These Senior Secured Fixed Rate Notes due 2022 and 2024 have a principal value of €450.0 million and €250.0 million, respectively, and were issued at par.

The interest rate on the Senior Secured Fixed Rate Notes due 2022 is 6.25% annually and accrued interest is paid semi-annually on August 15 and February 15 commencing February 15, 2013. The final maturity of these Senior Secured Notes is August 15, 2022. The interest rate on the Senior Secured Fixed Rate Notes due 2024 is 6.75% annually and accrued interest is paid semi-annually on August 15 and February 15 commencing February 15, 2013. The final maturity of these Senior Secured Notes is August 15, 2024.

The net proceeds of this offering were envisioned to be used entirely to fund the proposed share repurchases under a Self Tender Offer. Due to the cancellation of the Self Tender Offer on September 20, 2012, the proceeds from this offering were still available as cash and cash equivalents as at December 31, 2012.

The interest rate on the Senior Secured Fixed Rate Notes due 2027 is 4.875% annually and accrued interest is paid semi-annually on January 15 and July 15. The final maturity of these Senior Secured Notes is July 15, 2027.

Canon, Clientele and Annuity agreements

In 1996, the Company acquired the exclusive rights to offer point-to-point services including broadband internet and telephony services, as well as the rights to partly use the capacity of the broadband network owned and controlled by the Pure Intercommunales (“PICs”). In return for this access to a part of the PICs’ network, the company paid the so-called Clientele and Annuity Fees. The present value of the Clientele and Annuity Fee payments over the first 20 years (being the life of the longest lived assets that were part of the HFC Upgrade) was initially accounted for as network user rights under intangible assets, and was amortized over 10 or 20 years depending on the useful life of the underlying assets that make up the HFC Upgrade.

Upon completion of the Interkabel acquisition in 2008, the company obtained the ownership and control over the entire network, including the obligation beyond 20 years under the original 50 year Clientele fee agreement and now has the right to use the full capacity of the PICs’ network. The term of the Canon Lease Agreement is 38 years (of which still 31 years remained at the end of 2015). Under this agreement, the Company pays recurring Canon Fees which together with the Clientele and Annuity Fees grant full access to the PICs’ network. The assets capitalized under the Canon Agreement are depreciated over a period of 15 years. The full access rights acquired under the Canon, Clientele and Annuity agreements are recorded as property and equipment (network) as from October 2008 onwards (see Note 5.4).

On the additional rights of use on the Telenet PICs Network, acquired under the Canon agreement, a contractual interest rate was agreed upon which was favorable in comparison with the market interest rate at that moment. Therefore, this favorable component on the initial Canon lease was separated in the purchase price allocation and recognized as a debit to the liability of the underlying existing Canon Lease. The favorable Out of Market component on the future Canon leases acquired as part of the business combination was recognized as network user rights under other intangible assets (see Note 5.6).

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2015

For the year ended December 31, 2015, the average effective borrowing rate for the three above mentioned fees was 6.32% (2014: 6.51%).

The Clientele fees payable beyond 20 years are recognized as a non-lease related debt.

As per December 31, 2015 and 2014, the outstanding liabilities related to the Interkabel agreements, as well as the net book value of the intangible asset can be summarized as follows:

	<u>December 31, 2015</u>	<u>December 31, 2014</u>

Norkring

On May 4, 2010, the Company signed an agreement with Norkring België NV concerning the use of capacity on the latter's broadcasting infrastructure network enabling Telenet to offer digital TV and radio services through Norkring's digital frequency channels in Flanders and Brussels, also referred to as "DTT". Generally, the Company's services are available through the cable network, however through this agreement, the Company would also be able to offer digital TV and radio services—beyond the traditional home—to secluded homes, caravans, holiday homes and cars.

The initial Norkring agreement provided a right to use Norkring's frequency channels contained in three of their multiplexers (MUX) on an exclusive and non-exclusive basis. This agreement contained a lease with respect to certain capacity for which the Company obtained the exclusive rights, the so-called "MUX 1 capacity". Regarding this MUX 1 capacity, an intangible lease asset was originally recognized under "network user rights" for a net book value of €30.1 million at December 31, 2010. In 2011, the Company recognized an impairment loss of €28.5 million related to this asset, reducing its carrying value to zero as of December 31, 2011. The average effective borrowing rate for the Norkring fee was 6.23% (2014: 6.23%). Payments under the Norkring agreement not related to the "MUX 1 capacity" are accounted for as operating expenses as incurred.

With respect to the Company's decision in the fourth quarter of 2013 to discontinue the provision of DTT services and the related restructuring provision recognized as of December 31, 2013 and 2014, we refer to note 5.16.

As a result of the amendment to the DTT capacity agreement in December 2015 whereby the Company waived its exclusive rights on the "MUX 1 capacity", the previously recognized lease liability related to this capacity did not longer qualify as a lease liability and was consequently represented as and added to the existing restructuring liability.

Other leases

The Company leases certain assets under finance leases including buildings and certain vehicles with average lease terms of 20 and 5 years, respectively.

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2015

For the year ended December 31, 2015, the average effective borrowing rate was 4.30% (2014: 4.36%). All leases are on a fixed repayment schedule and no arrangements include contingent rental payments. The Company's obligations under finance leases are secured by the lessors' title to the leased assets.

5.13.6 3G and 2G mobile spectrum

Following an auction launched in March 2011 by the BIPT, Telenet Tecteo BidCo NV, a subsidiary of the Company in which the Walloon cable operator Tecteo SCRL holds a 25% stake, acquired the fourth 3G mobile spectrum license in Belgium (see note 5.6). For the years ended December 31, 2015 and 2014, the average effective borrowing rate for the 3G mobile spectrum was 2.75%.

With respect to the impairment loss on the intangible asset related to this 3G mobile spectrum license recognized during the fourth quarter of 2013, and for details on the 2G settlement, we refer to note 5.6.

5.13.7 Global Handset Finco Loan

On December 4, 2015 Telenet Finance BVBA borrowed €12.7 million from Global Handset Finco Limited to fund its handset financing activity through the "Global Handset Finco Loan".

As of December 31, 2015, Telenet Group Holding NV and its subsidiaries had available combined cumulative tax loss carry forwards of €819.9 million (2014: €581.8 million). Under current Belgian and Luxembourg tax laws, these loss carry forwards have an indefinite life and may be used to offset the future taxable income of Telenet Group Holding NV and its subsidiaries.

Deferred tax assets are recognized for tax loss carry forwards to the extent that the realization of the related tax benefit through the future taxable profits is probable.

Telenet did not recognize deferred tax assets of €171.7 million (2014: €129.6 million) in respect of losses amounting to €505.2 million (2014: €381.3 million) that can be carried forward against future taxable income because it is not considered more likely than not that these net deferred tax assets will be utilized in future years.

Other		1,412	3,963
Total Other non-current liabilities		59,062	82,533

During the three months ended December 31, 2013, the Company decided to discontinue the provision of DTT services which occurred in the six months ended June 30, 2014. Following this decision, the Company determined that its obligations under the DTT capacity agreement with Norkring België NV constituted an onerous contract as at December 31, 2013. The Company measured the required provision as the net present value of the remaining payments due under this DTT capacity agreement related to the so called “MUX 2 and MUX 3 capacity” and recognized the initial €33.9 million provision as a restructuring expense at December 31, 2013. The remaining non-current and current liabilities related to this restructuring liability amounted to respectively €29.4 million and €4.5 million at December 31, 2014 (note 5.18).

As a result of the amendment to the DTT capacity agreement signed in 2016 whereby the Company waived its exclusive rights on the “MUX 1 capacity”, the previously recognized lease liability related to this capacity did not longer qualify as a lease liability and was consequently represented as and added to the existing restructuring liability. The restructuring liability was re-measured at end of December 2015 reflecting the net present value of the remaining re-negotiated payments due under the contract. The remaining non-current and current liabilities related to the capacity of the 3 non-exclusive MUXes thus amounted to respectively €12.4 million and €25.8 million at December 31, 2015 (note 5.18). The decrease in the total liability resulting from the adjusted future installments was recognized as a credit in restructuring costs, amounting to €13.2 million (note 5.20).

Total non-current and current liabilities regarding sports broadcasting rights amounted to €4.2 million, respectively €17.4 million (see note 5.18) at December 31, 2015 (2014: €8.3 million, respectively €18.8 million) and of which €1.3 million and €12.4 million was related to the 2015-2016 Belgian football broadcasting rights and €0.3 million and €1.0 million was related to the 2014-2015 Belgian football broadcasting rights, respectively.

The operational expenses charged to Telenet by Interkabel for the maintenance of its network are higher than the Company’s benchmark expenses for similar operations and therefore reflects an unfavorable out of market element. In the Interkabel acquisition, this out of market element was recorded at fair value. The underlying liability at December 31, 2015 amounted to €14.6 million (2014: €14.1 million).

The Telenet Pension Plan

The majority of Telenet's employees participate in the Telenet Pension Plan, which requires initial contributions funded into a pension fund. The contributions paid to the pension fund are based on the respective employee's salary.

By law, employers are required to provide an average minimum guaranteed rate of return over the employee's career with the Company. As from 1 January 2016 onwards, the minimum rate will equal 65% of the average yield of 10-year government bonds with a minimum of 1.75% and a maximum of 3.75% (previously 3.25% on employer contributions and 3.75% on employee contributions). The 65% may be increased to 75% in 2018 and 85% in 2020 subject to a positive advice of the Belgian Central Bank. Hence, there is a risk that the Company may have to pay additional contributions related to past service. Any such additional contributions will depend on the actual investment returns as well as the future evolution of the minimum guaranteed rates of return.

Since the minimum guaranteed reserves were entirely covered by plan assets and there were no recoverable contributions, no amounts were recognized in the consolidated statement of financial position at December 31, 2015 and 2014.

The fair value of the plan assets and the amounts recognized in the consolidated statement of financial position reconcile as follows for this plan:

Notes to the Consolidated Financial Statements December 31, 2015

The Company's pension fund is actively managed by two independent asset management firms. The investment strategy is based a balanced neutral risk profile with a long-term investment horizon. The Company's pension fund primarily contains investments in investment funds, either active or passive, with a balanced strategic allocation comprising a mix of 49% equities, 43% bonds, 2% real estate and 5% short term investments. The pension fund's performance is monitored and analyzed on a monthly basis by the pension fund's in-house investment specialist and discussed and reviewed on a quarterly basis by the pension fund's board of directors.

The expected employer contributions (including taxes) for the year ending December 31, 2016 amount to €3.9 million.

The average age of plan participants, weighted based on their accumulated contributions, equaled 45.3 at December 31, 2015.

Long service awards

The Company has also recognized a liability of €8.1 million at December 31, 2015 (2014: €7.7 million) for long service awards, which have the form of jubilee benefits.

Defined benefit pension plans and other post-retirement benefit plans

Former Electrabel (ICS) employees, as well as some other employees, are covered by defined benefit pension plans, which provide benefits based on the employees' final salaries and their years of service. In accordance with local practice, the benefits are normally paid out in the form of a lump sum.

The defined benefit pension plans are financed through insurance contracts, which provide a guaranteed rate of return. The pension plans are subject to a minimum funding requirement, which is based on the vested reserves to which the plan participants are entitled in case of leaving. The plan assets, which correspond to the insurance reserves, do not include any shares issued by Telenet or property occupied by Telenet.

Telenet also provides post-retirement health care benefits to former Electrabel (ICS) employees. These obligations are financed directly by the Company. Those plans expose the Company to various risks such as interest rate risk (a decrease of bond yields will increase the benefit obligations), investment risk (a lower return on plan assets will decrease the funded status), longevity risk (an increase in life expectancy will increase the benefit obligations for the post-retirement health care plan) and inflation risk (higher than expected salary increases or medical cost increases will increase the benefit obligations).

The defined benefit obligation, the fair value of the plan assets and the net defined benefit liability/(asset) reconcile as follows (excluding the Telenet Pension Plan):

The sensitivity analysis reflects the impact of a change in one assumption while keeping all other assumptions constant. In practice, this is unlikely to be the case as some assumptions may be correlated.

The weighted average duration of the benefit obligations equals 15 years.

The contributions towards defined benefit plans for the year ended December 31, 2015 are estimated at €1.6 million.

Other current liabilities	1,246	136
Total Accrued expenses and other current liabilities	<u>350,313</u>	<u>325,190</u>

Total accrued expenses and other current liabilities increased by €25.1 million to €350.3 million as of December 31, 2015.

This was mainly due to (i) a €21.3 million increase in restructuring provisions related to the Norkring DTT spectrum license, (ii) accrued deferred financing costs for €7.8 million and (iii) a €4.0 million increase in accrued compensation and employee benefits.

The €21.3 million increase of the current restructuring provision related to the DTT capacity agreement with Norkring was the result of the 2015 amendment to the contract as agreed upon in December 2015 and which resulted in a higher one-off payment due in the year ending December 31, 2016 and lower remaining payments due for the remaining years (note 5.16)

The accrued deferred financing costs (€7.8 million) mainly related to the Original Issue Discount (“OID”) incentive fee and the arrangement fee due on the undrawn €800.0 million Term Loan AA under the 2015 Amended Senior Credit Facility as these are not contingent to the closing of the BASE Company acquisition.

The €33.1 million increase as described above was partially offset by a €9.3 million decrease in liability related to the stock lending agreement with Binan Investments B.V. as the Company redeemed its outstanding liability under the stock lending agreement by returning the 200,000 shares it borrowed on December 17, 2014 from its main shareholder Binan Investments B.V. to cover its obligations under the existing stock option plans on June 15, 2015.

All of the revenue growth for the year ended December 31, 2015 was organic and directly driven by (i) solid multiple-play growth with the number of triple-play subscribers at December 31, 2015 up 6% compared to December 31, 2014, (ii) the benefit from the selective price adjustment on certain fixed services in January 2015, (iii) a €22.4 million higher contribution from the mobile activities, driven by robust mobile postpaid subscriber growth, and (iv) a 8% increase in the business services revenue.

The Company also had deferred revenue as follows:

For the year ended December 31, 2015, Telenet incurred total operating expenses of €1,265.3 million, representing an increase of 8% compared to the year ended December 31, 2014 when total operating expenses amounted to €1,174.9 million.

Operating expenses for the year ended December 31, 2015 included a €13.8 million favorable impact from the reversal of restructuring charges as a result of a settlement with Norkring België related to the DTT spectrum license and a €7.6 million favorable impact from the resolution of a contingency associated with universal service obligations, partially offset by a €3.9 million settlement with the Belgian telecoms regulator BIPT with regards to the 2G mobile spectrum license. Operating expenses for the year ended December 31, 2014 reflected a €12.5 million favorable impact from the settlement of certain operational contingencies. Excluding these nonrecurring benefits for the year ended December 31, 2015 and 2014, the underlying increase of total operating expenses would have been slightly higher and was primarily driven by (i) higher network operating and service costs including higher programming costs as a result of Telenet's connected entertainment strategy, (ii) a 10% increase in depreciation and amortization charges, (iii) €7.1 million higher advertising, sales and marketing costs, and (iv) higher direct acquisition costs and other costs primarily linked to the acquisition and pre-integration of BASE Company NV.

The number of full-time equivalents employed by the Company at December 31, 2015 was 2,318 (2014: 2,262).

Net finance expenses		(263,696)	(331,658)

For the year ended December 31, 2015, net finance expenses totaled €263.7 million compared to €331.6 million of net finance expenses incurred for the year ended December 31, 2014. Despite a €30.8 million loss on the extinguishment of debt following the prepayment of the €500.0 million Senior Secured Notes due 2020 in August 2015, net finance expenses for the year ended December 31, 2015 decreased 20% compared to the year ended December 31, 2014 as the Company realized a non-cash gain on its derivatives of €13.8 million in the year ended December 31, 2015 whereas the year ended December 31, 2014 showed a loss of €67.4 million in this respect. In addition, Telenet incurred €9.8 million lower net interest expenses for the year ended December 31, 2015 following the early redemption of the remaining outstanding amounts under certain Term Loans following the April 2014 refinancing and the favorable effects of the partial unwinding of its derivatives portfolio in December 2014. These favorable impacts were partly offset by slightly higher accrued interest expenses as a result of commitment fees incurred on the undrawn financing facilities related to the BASE Company acquisition, which began to accrue in the third quarter of 2015.

5.22 Income tax expense

	<u>For the years ended December 31,</u>	
	<u>2015</u>	<u>2014</u>
(in thousands of euro)		
Current tax expense	115,096	88,358
Deferred tax expense (Note 5.15)	(15,444)	3,400
Income tax expense	<u>99,652</u>	<u>91,758</u>
Effective Tax Rate	<u>36.20%</u>	<u>45.65%</u>

The effective tax rate was 36.20% for the year ended December 31, 2015, which was below the effective tax rate of 45.65% for the year ended December 31, 2014. The tax expenses as shown above have been calculated in conformity with Belgian and international tax laws.

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2015

The tax on the Company's profit (loss) before tax differs from the theoretical amount that would arise using the Belgian statutory tax rate applicable to profits (losses) of the consolidated companies as follows:

	For the years ended December 31,	
	2015	2014
	(in thousands of euro)	
Profit before tax	275,314	201,023
Income tax expense at the Belgian statutory rate of 33.99%	93,579	68,328
Income not taxable	(41,251)	(47,892)
Expenses not deductible for tax purposes (incl. prior year adjustments)	9,861	26,379
Benefit of the investment deduction	(6,464)	(5,557)
Recognition of previously unrecognized tax assets	—	(4,020)
Utilization of previously unrecognized tax losses	—	(1)
Tax losses and temporary differences for which no deferred tax asset was recognized	42,080	54,620
Expiration of tax losses	908	920
Adjustments recognized in the current year in relation to the filings for prior years	3,648	1,360
Impact of different tax rates	(3,993)	(3,833)
Tax on capital gain on shares	—	—
Penalty for insufficient prepayments	1,284	1,453
Tax expense for the year	99,652	91,758

The tax losses and temporary differences for which no deferred tax asset is recognized amounted to €42.1 million for the year ended December 31, 2015 (€54.6 million for the year ended December 31, 2014) and consisted of positions resulting in a deferred tax asset which is nevertheless not recognized as it is not deemed probable that taxable profit will be available against which the unused tax losses can be utilized in future years.

There's no recognition of previously unrecognized tax assets for the year ended December 31, 2015 (€4.0 million for the year ended December 31, 2014) related to positions for which in the past no deferred tax asset was recognized.

Recognition of previously unrecognized tax assets amounting to €4.0 million for the year ended December 31, 2014 related to positions for which in the past no deferred tax asset was recognized as it was not deemed probable that taxable profit would be available in future years against which the tax losses could be utilized. In the current year, based on the most recent results, it became sufficiently probable that they can be utilized and therefore the previously unrecognized tax assets were recognized.

5.23 Earnings per share

5.23.2 Diluted

Diluted earnings per share are calculated by using the treasury stock method by adjusting the weighted average number of shares used in the calculation of basic earnings per share to assume full conversion of all dilutive potential ordinary shares.

For the year ended December 31, 2015, the Company had four categories of dilutive potential ordinary shares:

- Warrant Plan 2007 septies
- Warrant Plan 2010 primo
- Warrant Plan 2010 bis
- Warrant Plan 2010 ter

For the year ended December 31, 2014, the Company had six categories of dilutive potential ordinary shares:

- Warrant Plan 2007 quater
- Warrant Plan 2007 sexies
- Warrant Plan 2007 septies
- Warrant Plan 2010 primo
- Warrant Plan 2010 bis
- Warrant Plan 2010 ter

The earnings used in the calculation of diluted earnings per share measures are the same as those for the basic earnings per share measures, as outlined above.

5.24 Acquisition of subsidiary

On April 18, 2015, Telenet entered into a definitive agreement (the “BASE Agreement”) to acquire BASE Company NV for a purchase price of €1,324.4 million in order to secure its future as a leading provider of integrated telecommunications services. BASE is the third-largest mobile network operator in Belgium. Through this acquisition, Telenet will become the owner of a mobile network. This will enable Telenet to effectively compete for the growth opportunities in the mobile telecommunications market. In this way, Telenet hopes to meet the growing demand from both private and business customers for the full range of

Telenet Group Holding NV

fixed and mobile telecom services. On February 4, 2016, the European Commission announced that it had approved the proposed acquisition of BASE Company NV by Telenet. Following the approval from the European Commission, the acquisition of BASE Company was closed on February 11, 2016.

On November 19, 2015, Telenet confirmed that it had entered into conditional agreements with MEDIALAAN for, among other things, the sale by BASE Company to MEDIALAAN of all JIM Mobile customers and of its 50% stake in VikingCo NV, the entity that operates the Mobile Vikings brand in Belgium. These agreements were concluded in the context of the investigation by the European Commission into the proposed acquisition of BASE Company. As a result of the approval from the European Commission, and the Belgian Competition Authority's recent approval of the transaction with MEDIALAAN, BASE Company's sale of its 50% stake in VikingCo NV to MEDIALAAN was completed on February 11, 2016, subsequent to Telenet's acquisition of BASE Company. In time, BASE will also transfer the JIM Mobile clients to MEDIALAAN, and MEDIALAAN will become a 'full MVNO player' on the BASE network, for both the JIM Mobile and the Mobile Vikings customers. The transaction creates a platform for MEDIALAAN to become a new, high-performing MVNO player.

Consideration transferred

The total purchase price of €1,324.4 million was settled on February 11, 2016 by means of a cash consideration paid.

Acquisition-related costs

The Company incurred acquisition-related costs of €9.2 million on legal fees and due diligence costs. These have been included in 'Selling, general and administrative expenses'.

5.26.1 Pending litigations

Interkabel Acquisition

On November 26, 2007, Telenet and the PICs announced a non-binding agreement-in-principle to transfer the analog and digital television activities of the PICs, including all existing subscribers to Telenet. Subsequently, Telenet and the PICs entered into a binding agreement (the 2008 PICs Agreement), which closed effective October 1, 2008. Beginning in December 2007, Proximus NV/SA (Proximus), the

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2015

incumbent telecommunications operator in Belgium, instituted several proceedings seeking to block implementation of these agreements. Proximus lodged summary proceedings with the President of the Court of First Instance of Antwerp to obtain a provisional injunction preventing the PICs from effecting the agreement-in-principle and initiated a civil procedure on the merits claiming the annulment of the agreement-in-principle. In March 2008, the President of the Court of First Instance of Antwerp ruled in favor of Proximus in the summary proceedings, which ruling was overturned by the Court of Appeal of Antwerp in June 2008. Proximus brought this appeal judgment before the Cour de Cassation (the Belgian Supreme Court), which confirmed the appeal judgment in September 2010. On April 6, 2009, the Court of First Instance of Antwerp ruled in favor of the PICs and Telenet in the civil procedure on the merits, dismissing Proximus's request for the rescission of the agreement-in-principle and the 2008 PICs Agreement. On June 12, 2009, Proximus appealed this judgment with the Court of Appeal of Antwerp. In this appeal, Proximus is now also seeking compensation for damages should the 2008 PICs Agreement not be rescinded. While these proceedings were suspended indefinitely, other proceedings were initiated, which resulted in a ruling by the Belgian Council of State in May 2014 annulling (i) the decision of the PICs not to organize a public market consultation and (ii) the decision from the PICs' board of directors to approve the 2008 PICs Agreement. In December 2015, Proximus resumed the civil proceedings pending with the Court of Appeal of Antwerp seeking to have the 2008 PICs Agreement annulled and claiming damages of €1.4 billion (\$1.5 billion).

Telenet is in the process of evaluating the resumed proceedings and claim for damages and intends to defend itself vigorously. No assurance can be given as to the outcome of these or other proceedings. However, an unfavorable outcome of existing or future proceedings could potentially lead to the annulment of the 2008 PICs Agreement and/or to an obligation of Telenet to pay compensation for damages, subject to the relevant provisions of the 2008 PICs Agreement, which stipulate that Telenet is only responsible for damages in excess of €20.0 million (\$21.7 million). We do not expect the ultimate resolution of this matter to have a material impact on our results of operations, cash flows or financial position. No amounts have been accrued by us with respect to this matter as the likelihood of loss is not considered to be probable.

Litigation regarding cable access

In December 2010, the members of the CRC (BIPT, VRM, CSA and Medienrat) published their respective draft decisions reflecting the results of their analysis of the broadcasting market in Belgium. At the same time, the BIPT published its draft decision regarding the analysis of the broadband market in Belgium. After a public consultation, the draft decisions were submitted by the CRC to the European Commission. The European Commission issued a notice on the draft decisions which criticized the analysis of the broadcasting markets on several grounds, including the fact that the CRC failed to analyze upstream wholesale markets. It also expressed doubts as to the necessity and proportionality of the various remedies.

The CRC nevertheless adopted a final decision on July 1, 2011 (the "July 2011 Decision") with some minor revisions. The regulatory obligations imposed by the July 2011 Decision include (i) an obligation to make a resale offer at "retail minus" of the cable analog package available to third party operators (including Proximus), (ii) an obligation to grant third-party operators (except Proximus) access to digital television platforms (including the basic digital video package) at "retail minus," and (iii) an obligation to make a resale offer at "retail minus" of broadband internet access available to beneficiaries of the digital television access obligation that wish to offer bundles of digital video and broadband internet services to their customers (except Proximus). A "retail-minus" method of pricing involves a wholesale tariff calculated as the retail price for the offered service by Telenet, excluding value-added taxes and copyrights, and further deducting the retail costs avoided by offering the wholesale service (such as, for example, costs for billing, franchise, consumer service, marketing, and sales).

After Telenet submitted draft reference offers in February 2012 to meet the three obligations described above in each of Flanders and Brussels, the CRC made its observations and launched a national consultation process and consulted with the European Commission. Although the European Commission expressed doubts regarding the proportionality of the analog resale obligation on August 8, 2013, the European Commission did not object to the CRC draft decision on the reference offers. On September 9, 2013, the CRC then published the final decisions that it had issued on September 3, 2013. According to the CRC

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2015

decision, the regulated wholesale services must be available within six months after a third-party operator files a letter of intent and pays an advance payment to each cable operator.

On April 2, 2013, the CRC issued a draft decision regarding the “retail minus” tariffs of minus 35% for basic TV (basic analog and digital video package) and minus 30% for the bundle of basic TV and broadband internet services. On October 8, 2013, the European Commission received a draft quantitative decision from the CRC in which they changed the “retail minus” tariffs to minus 30% for basic TV (basic analog and digital video package) and to minus 23% for the bundle of basic TV and broadband internet services. Even though the European Commission made a number of comments regarding the appropriateness of certain assumptions in the proposed costing methodology, the CRC adopted such retail minus tariffs on December 11, 2013.

On December 27, 2013, wireless operator Mobistar submitted a letter of intent to Telenet to obtain access to three regulated products of Telenet: (i) resale of the analog television offering; (ii) access to the digital television platform; and (iii) resale of the broadband access offering. Mobistar paid the advance payment on January 10, 2014. Telenet implemented the access obligations as described in its reference offers, and complied with its implementation obligation towards Mobistar in due time, i.e. within the period of six months as set forth by the regulator. Since June 23, 2014, access to the Telenet network has become operational and can be applied by Mobistar to offer analog television, digital television and the bundle television plus broadband internet to its clients (but it has not yet done so). On November 14, 2014, Proximus also submitted a request to start access negotiations. The VRM and BIPT are currently considering the reasonableness of this request.

On December 14, 2015, the Belgium Regulatory Authorities published a draft decision, which amended previously-issued decisions, that sets forth the “retail-minus” tariffs of minus 26% for basic television (basic analog and digital video package) and minus 18% for the bundle of basic television and broadband internet services during an initial two-year period. Following this two-year period, the tariffs would change to minus 15% and 7%, respectively. The draft decision was notified to the European Commission and a final decision was adopted on February 19, 2016.

Telenet filed an appeal against the July 2011 Decision with the Brussels Court of Appeal. On November 12, 2014, the Brussels Court of Appeal rejected Telenet’s appeal and accepted Proximus’ claim that Proximus should be allowed access to Telenet’s (among other operators) broadband internet and digital television platforms. Telenet has filed an appeal against this decision with the Supreme Court on November 30, 2015. On February 20, 2014, Telenet also filed an appeal with the Brussels Court of Appeal against the decisions regarding the qualitative and the quantitative aspects (*i.e.* tariffs) of the reference offer. Telenet and the CRC have in the meantime agreed to end the proceedings with respect to the qualitative aspects (the case was revoked on May 24, 2015). A decision regarding the quantitative aspects is not expected before the second quarter of 2016.

The July 2011 Decision aims to, and in its application may, strengthen Telenet’s competitors by granting them resale access to Telenet’s network to offer competing products and services notwithstanding Telenet’s substantial historical financial outlays in developing the infrastructure. In addition, any resale access granted to competitors could (i) limit the bandwidth available to Telenet to provide new or expanded products and services to the customers served by its network and (ii) adversely impact Telenet’s ability to maintain or increase its revenue and cash flows. The extent of any such adverse impacts ultimately will be dependent on the extent that competitors take advantage of the resale access ultimately afforded to Telenet’s network and other competitive factors or market developments.

Cable ownership related legal proceedings

The municipality of Sint-Lambrechts-Woluwe granted the right to operate the cable network on its territory to WoluTV ASBL (“WoluTV”) in 1971. Telenet provided a number of technical services to WoluTV in accordance with agreements dated February 11, 1998 (analog television) and September 3, 2007 (digital television). Telenet and WoluTV also concluded two agreements on May 7 and September 3, 2007 respectively, pursuant to which Telenet provided, in its own name and for its own account, internet and

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2015

telephony services on the municipality's cable network. On December 16, 2014, WoluTV terminated the agreements with Telenet with effect on December 31, 2015.

The agreements terminated by WoluTV provide that WoluTV must compensate Telenet for all costs, damages and losses as a consequence of termination of the agreements. WoluTV has disputed that this clause is valid under Belgian law and has therefore refused to designate an expert to determine the amount of the compensation owed to Telenet. Telenet brought a claim against WoluTV before the Commercial Court of Brussels on November 10, 2015, whereby Telenet requested provisional compensation of €1 million (increased with interest), and that the Court appoint an expert to determine the compensation owed by WoluTV. The case is currently pending before the Commercial Court of Brussels.

Separately, on April 28, 2015, the municipality of Sint-Lambrechts-Woluwe decided to sell its cable network. On June 29, 2015, the municipality awarded the purchase contract to Coditel Brabant for €18 million. Telenet, who had also submitted an offer to purchase the cable network, brought an action for annulment of the municipality's decision before the Council of State. The case is currently pending.

Copyright related legal proceedings

The issue of copyrights and neighboring rights to be paid for the distribution of television has during the last two decades given rise to a number of litigations. Already in 1994, the Belgian Radio and Television Distributors Association (Beroepsvereniging voor Radio- en Televisiedistributie / Union professionnelle de radio et de télédistribution) (the "RTD", renamed afterwards to "Cable Belgium") was involved in discussions with various copyrights collecting agencies regarding the fees to be paid to the latter for the analogue broadcasting of various television programs. In November 2002, the RTD, together with certain Belgian cable operators (among which Telenet), began reaching settlements with the copyright collecting agencies and broadcasters. Pursuant to those settlement agreements, to which Telenet acceded, Telenet agreed to make certain upfront payments as well as to make increased payments over time. Consequently, in August 2003, Telenet increased the copyright fee it charges its subscribers. In July 2004, the Association for the Collection, Distribution and Protection of the Rights of the Artists, Interpreters and Performers (CVBA Vereniging voor de inning, repartitie en de verdediging van de vertolkende en uitvoerende kunstenaars) ("Uradex", later renamed to "Playright") filed a claim against the RTD for €55 million plus interest concerning neighboring rights owed by the members of the RTD to artists and performers represented by Uradex during the period from August 1994 through the end of July 2004.

After the roll-out of digital television, Telenet in 2006 started a judicial procedure against a number of collecting agencies. This procedure is related to a discussion between Telenet and these collecting agencies about the legal qualification of (i) simulcast (i.e. channels distributed both in analogue and in digital quality), (ii) direct injection (i.e. channels delivered to the distributor over a non-publicly accessible transmission channel) and (iii) all rights included contracts (i.e. contracts in which broadcasters engage to deliver their signals and programs after having cleared all rights necessary for the communication to the public over the distributor's networks).

On April 12, 2011, the Court of First Instance of Mechelen rendered a positive judgment in the procedure against Sabam, Agicoa, Uradex and other collecting agencies, and as part of which procedure several collecting agencies (Sabam not included) filed counterclaims against Telenet for the payment of the invoices that Telenet disputed. The Court validated Telenet's arguments in each of the claims and counterclaims that were the subject of the procedure and, as a result: (i) no retransmission fees have to be paid by Telenet in case of direct injection of a broadcaster's signal into Telenet's network, (ii) no retransmission fees have to be paid in case of simulcast of an analog and digital signal (and consequently, Telenet does not have to pay extra for the distribution of linear digital television signals) and (iii) all-rights-included contracts are deemed legally valid, which means that if Telenet agrees with a broadcaster that the latter is responsible for clearing all copyrights, Telenet is not liable towards the collecting agencies. The collecting agencies lodged an appeal (see below).

Since Sabam had not filed any counterclaim for the payment of invoices as part of the aforesaid judgment, on April 6, 2011, Sabam (not the other collecting agencies) initiated judicial proceedings before the Commercial Court of Antwerp, claiming payment by Telenet of invoices relating to (a) fees for a period

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2015

from January 1, 2005 until December 31, 2010 for Telenet's basic digital television package, and (b) fee advances for the first semester of 2011 for Telenet's basic and optional digital television packages. The claims mainly related to (i) direct injection and (ii) all-rights-included contracts. Sabam's claim was based on arguments substantially similar to those rejected by the Court of First Instance in Mechelen on April 12, 2011. Simultaneously, Sabam initiated a summary procedure before the President of the Commercial Court of Antwerp, to receive provisional payment of the contested fees and fee advances. On June 30, 2011, the President of the Commercial Court of Antwerp rendered a positive judgment for Telenet in this procedure. Sabam lodged an appeal. On June 27, 2012, the Court of Appeal of Antwerp confirmed this judgment and dismissed the claim in summary proceedings of Sabam.

In the case of the appeal against the judgment of April 12, 2011 of the Court of First Instance of Mechelen, the Court of Appeal of Antwerp rendered an intermediate ruling on February 4, 2013. The Court of Appeal rejected the claims of the collecting societies with regard to simulcasting and confirmed that direct injection is a single copyright relevant operation (royalties should therefore be paid only once). The case was reopened to allow the collecting societies to provide further proof of their actual claims. On January 20, 2014 and on May 5, 2014, respectively, Numéricable (previously Coditel) and Telenet appealed this intermediate ruling before the Supreme Court mainly because of the incorrect qualification of the fees to be paid for the communication to the public as if it would be "retransmission" rights. The Supreme Court has not yet issued its judgment in this matter. In the meantime Numéricable has reached a settlement with the collecting societies, and withdrew its appeal.

Telenet does not expect the ultimate resolution of this matter to have a material impact on its results of operations or financial condition.

Legal proceedings regarding the MVNO Arrangement

Telenet and Mobistar are currently in dispute over amounts payable to Mobistar with respect to certain provisions of the MVNO Arrangement. As part of this dispute, Mobistar initiated legal proceedings against Telenet claiming, among other things, that the migration period after termination or expiration of the MVNO Arrangement should be shortened from 24 months to 6 months. Telenet believes it has strong arguments against Mobistar's claims and intends to defend itself vigorously. We cannot currently predict the outcome of these proceedings; however, in the unlikely event that the migration period is shortened, Telenet's mobile business could be adversely impacted. The oral hearing in this matter is currently scheduled for September 23, 2016.

5.26.2 Other contingent liabilities

Regulation regarding signal integrity

In July 2013, the Flemish Parliament adopted legislation imposing strict integrity of broadcasting signals on distributors and the requirement that distributors must request authorization from broadcasters when they contemplate offering, among other things, program recordings through an electronic program guide. The impetus for this legislation were the broadcasters' arguments that the high penetration of PVRs in the Flemish market have resulted in viewers fast-forwarding large volumes of advertisements, which resulted in a decrease in the revenues of broadcasters. The legislation requires broadcasters and distributors to find a commercial solution. If this fails, the legislation provides for a mediation procedure, which, if unsuccessful, can be followed by civil litigation.

There is a risk that this legislation will negatively impact Telenet's ability to launch new innovative applications and increase Telenet's financial contribution to broadcasters. The current distribution agreements with SBS, VRT and Medialaan entered into in 2014 allow Telenet to distribute the broadcasters' signal in an unaltered manner. The relevant broadcasters have given Telenet the right to offer their customers a "slightly delayed viewing" and a personal video recorder (PVR) functionality. Telenet is required to pay a higher fee for each customer using these functionalities.

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2015

Other

In addition to the foregoing items, Telenet has contingent liabilities related to matters arising in the ordinary course of business including (i) legal proceedings, (ii) issues involving VAT and wage, property and other tax issues, (iii) disputes over certain contracts and (iv) disputes over programming, copyright fees and alleged patent infringements. While we generally expect that the amounts required to satisfy these contingencies will not materially differ from any estimated amounts Telenet has accrued, no assurance can be given that the resolution of one or more of these contingencies will not result in a material impact on Telenet's results of operations or cash flows in any given period. Due, in general, to the complexity of the issues involved and, in certain cases, the lack of a clear basis for predicting outcomes, we cannot provide a meaningful range of potential losses or cash outflows that might result from any unfavorable outcomes.

5.26.3 Operating leases

The Company leases facilities, vehicles and equipment under cancelable and non-cancelable operating leases. The following schedule details, at December 31, 2015 and 2014, the future minimum lease payments under cancelable and non-cancelable operating leases:

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2014

5 Notes to the consolidated financial statements for the year ended December 31, 2014

5.1 REPORTING ENTITY AND BASIS OF PREPARATION

5.1.1 Reporting entity

The accompanying consolidated financial statements present the operations of Telenet Group Holding NV, its subsidiaries and other consolidated companies (hereafter collectively referred to as the “Company” or “Telenet”). Through its broadband network, the Company offers cable television, including premium television services, broadband internet and telephony services to residential subscribers in Flanders and certain communes in Brussels as well as broadband internet, data and voice services in the business market throughout Belgium and parts of Luxembourg. The Company also offers mobile telephony services through an MVNO partnership with Mobistar. Telenet Group Holding NV and its principal operating subsidiaries are limited liability companies organized under Belgian law. Subsidiaries and special purpose entities have been incorporated in Luxembourg in order to structure the Company’s financing operations.

5.1.2 Basis of preparation

In accordance with the EU Regulation 1606/2002 of July 19, 2002, the consolidated financial statements have been prepared in accordance with International Financial Reporting Standards as adopted by the EU (“EU IFRS”). The financial statements have been prepared on the historical cost basis, except for certain financial instruments, which are measured at fair value. The methods used to measure fair values are discussed further in note 5.2.8. The principal accounting policies are set out in section 5.2 below.

5.1.3 Functional and presentation currency

These consolidated financial statements are presented in euro (“€”), which is the Company’s functional currency, rounded to the nearest thousand except when indicated otherwise.

5.1.4 Use of estimates and judgments

The preparation of financial statements in accordance with EU IFRS requires the use of certain critical accounting estimates and management judgment in the process of applying the Company’s accounting policies that affects the reported amounts of assets and liabilities and disclosure of the contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in the following notes:

• note 5.3.6:	Financial instruments: fair values
• note 5.4:	Property and equipment
• note 5.5:	Goodwill
• note 5.6:	Other intangible assets
• note 5.13:	Derivative financial instruments
• note 5.14:	Deferred taxes

A number of the Company’s accounting policies and disclosures require the measurement of fair value, for both financial and non-financial assets and liabilities. When measuring the fair value of an asset or liability, the Company uses market observable data to the extent available.

Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the fair value techniques, as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company can access at the measurement date;
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly;
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2014

For further information about the assumptions made in measuring fair values we refer to note 5.3.6 Financial Instruments and note 5.11.2 Employee share based compensation.

5.1.5 Going Concern

The consolidated financial statements as of December 31, 2014 showed a negative consolidated equity amounting to €1,362.3 million, mainly as a result of the Company's historical shareholder disbursements policy, including various capital reductions.

The Company considers its most optimal equity structure on a consolidated level, based on a certain net leverage range as described in note 5.3.5, even in case of a negative equity on a consolidated level.

The statutory annual accounts of Telenet Group Holding NV as of and for the year ended December 31, 2014 presented a positive equity of €4,357.6 million compared to €4,502.9 million at December 31, 2013. This positive equity is a result of the 2013 contribution in kind by Telenet Group Holding NV of its shares of Telenet NV in its wholly owned subsidiary Telenet Service Center BVBA. In contrast to its statutory annual accounts, the Company's consolidated statement of financial position does not reflect that particular transaction, which was carried out at fair value. This is one of the main reasons why the Company's consolidated equity remained negative at December 31, 2014.

The board of directors has considered the Company's net equity position and has prepared the consolidated financial statements applying the accounting policies consistently on a going concern basis taking into account amongst others:

- the forecasted earnings for the next years;
- a projected steadily strong positive cash flow;
- maturities of financial obligations as disclosed in note 5.3.3.

5.1.6 Approval by board of directors

These consolidated financial statements were authorized for issue by the board of directors on March 25, 2015.

5.2 SIGNIFICANT ACCOUNTING POLICIES

The accounting policies set out below have been applied consistently to all periods presented in these consolidated financial statements.

No changes to the significant accounting policies have been made, except as explained in note 5.2.19, which addresses new standards, interpretations, amendments and improvements.

5.2.1 Basis of consolidation

Subsidiaries

Subsidiaries are entities controlled by the Company. The Company controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases. The accounting policies of subsidiaries have been changed when necessary to align them with the policies adopted by the Company. The consolidated financial statements include the accounts of Telenet Group Holding NV and all of the entities that it directly or indirectly controls. Intercompany balances and transactions, and any income and expenses arising from intercompany transactions, are eliminated in preparing the consolidated financial statements.

Changes in the Company's ownership interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions. Profit or loss and each component of other comprehensive income are attributed to the owners of the Company and to the non-controlling interests, even if this results in the non-controlling interests having a negative balance.

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2014

Special Purpose Entities (SPEs)

The Company has established special purpose entities (SPEs) for financing purposes. The Company does not have any direct or indirect shareholdings in these entities. An SPE is consolidated if, based on an evaluation of the substance of its relationship with the Company, the Company concludes that it controls the SPE. SPEs controlled by the Company were established under terms that impose strict limitations on the decision-making powers of the SPEs' management and that result in the Company being exposed to, or having rights to, variable returns from its involvement with the entity and having the ability to affect those returns through its power over the entity.

Associates and joint ventures

The Company's interest in equity-accounted investees comprises interests in associates and joint ventures.

Associates are those entities in which the Company has significant influence, but not control or joint control, over the financial and operating policies. A joint venture is an arrangement in which the Company has joint control, whereby the Company has rights to the net assets of the arrangement, rather than rights to its assets and obligations for its liabilities.

Interests in associates and the joint ventures are accounted for using the equity method and are initially recognized at cost, which includes transaction costs. Subsequent to initial recognition, the consolidated financial statements include the Company's share of the profit or loss and other comprehensive income of the equity-accounted investees, until the date on which significant influence or joint control ceases.

5.2.2 Segment Reporting

Operating segments are the individual operations of a company that the chief operating decision maker ("CODM") reviews regularly in allocating resources to these segments and in assessing segment performance. Telenet's segment reporting is presented based on how Telenet's internal financial information is organized and reported to the CEO, who is Telenet's CODM, the Senior Leadership Team and the board of directors.

The CEO, the Senior Leadership Team and the board of directors of Telenet manage the Company as a single operation, and assess its performance and make resource allocation decisions based on an overall Profit and Loss Statement. The Profit and Loss Statement is analyzed at least on a monthly basis with only revenue and direct costs allocated to separate product and service lines. The primary measure of profit within the Profit and Loss Statement used by the CODM to assess performance is Adjusted EBITDA, and the Profit and Loss Statement does not present Adjusted EBITDA for separate product and service lines. Notwithstanding that revenue and direct costs are allocated to the separate product and service lines, as a differentiated Profit and Loss Statement is not used by the CODM to manage Telenet's operations, assess performance or make resource allocation decisions, Telenet has determined that its operations constitute one single segment.

5.2.3 Property and equipment

Property and equipment are stated at cost less accumulated depreciation and any accumulated impairment losses. When components of an item of property and equipment have different useful lives, they are accounted for as separate components of property and equipment. Cost includes expenditures that are directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labor, any other costs directly attributable to bringing the assets to a working condition for their intended use, and the costs of dismantling and removing the items and restoring the site on which they are located.

Depreciation is recognized in the statement of profit or loss and other comprehensive income on a straight-line basis over the estimated useful lives of each component of property and equipment.

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2014

The following useful lives are used for the depreciation of property and equipment:

- Buildings and improvements 10-33 years
- Network 3-30 years
- Furniture, equipment and vehicles 2-10 years

Depreciation methods, useful lives and residual values are reviewed at each reporting date.

Based on the results of the Company's periodic review of the useful lives of its assets, the Company changed the useful life for fiber network assets and associated capitalized construction costs from 20 to 30 years, prospectively as from January 1, 2013.

Government grants related to assets are recorded as a deduction from the cost in arriving at the carrying amount of the asset. The grant is recognized in the income statement over the life of a depreciable asset as a reduction of depreciation expense.

The Company includes borrowing costs directly attributable to the acquisition, construction or production of a qualifying asset as part of the cost of that asset.

The cost of replacing a component of an item of property and equipment is recognized in the carrying amount of the item if it is probable that the future economic benefits embodied within the component will flow to the Company and its cost can be measured reliably. The carrying amount of the replaced component is derecognized. The costs of repairs and maintenance of property and equipment are recognized in the consolidated statement of profit or loss and other comprehensive income as incurred.

The fair value of property and equipment recognized as a result of a business combination is based on market values. The market value of property is the estimated amount for which a property could be exchanged on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction. The market price of items of equipment is based on the quoted market prices for similar items.

It is the Company's policy to remove an asset's gross cost and accumulated depreciation at the end of an asset's useful life if the asset is no longer used by the Company, except when the asset is classified as held for sale.

5.2.4 Intangible assets

Intangible assets with finite useful lives are measured at cost and are amortized on a straight-line basis over their estimated useful lives as follows:

- Network user rights Life of the contractual right
- Trade name 15 years
- Customer relationships and supply contracts 5 to 15 years
- Broadcasting rights Life of the contractual right
- Software development costs 3 years
- Out of market component on future lease obligations acquired as part
of a business combination Term of the lease agreement

Amortization methods, useful lives and residual values are reviewed at each reporting date and are adjusted if appropriate.

Costs associated with maintaining computer software are recognized as an expense as incurred. Costs that are directly associated with the production of identifiable and unique software products controlled by the Company, and that will probably generate economic benefits exceeding costs beyond one year, are recognized as intangible assets.

Capitalized internal-use software costs include only external direct costs of materials and services consumed in developing or obtaining the software and payroll and payroll-related costs for employees who are directly associated with and who devote time to the project. Capitalization of these costs ceases no later than the point at which the project is substantially complete and ready for its intended purpose.

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2014

Internally-generated intangible assets are amortized on a straight-line basis over their useful lives. Where no internally-generated intangible asset can be recognized, development expenditure is recognized as an expense in the period in which it is incurred.

Broadcasting rights are capitalized as an intangible asset when the value of the contract is measurable upon signing. For such broadcasting rights with respect to movies the amortizations during the first three months of the license period are based on the actual number of runs to reflect the pattern of consumption of the economic benefits embodied in the content rights. As for the remaining months of the license period the pattern of consumption of the future economic benefits can no longer be determined reliably, the straight-line method is used until the end of the license period. Broadcasting rights with respect to sports contracts are amortized on a straight-line basis over the sports season.

Subsequent expenditure on intangible assets is capitalized only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure, including expenditure on internally generated brands, is recognized in the statement of profit or loss and other comprehensive income as incurred.

The fair value of customer relationships acquired in a business combination is determined using the multi-period excess earnings method, whereby the subject asset is valued after deducting a fair return on all other assets that are part of creating the related cash flows.

The fair value of trade names acquired in a business combination is based on the discounted estimated royalty payments that have been avoided as a result of the trade name being owned.

The fair value of other intangible assets is based on the discounted cash flows expected to be derived from the use and eventual sale of the assets.

It is the Company's policy to remove an asset's gross cost and accumulated amortization at the end of an asset's useful life if the asset is no longer used by the Company, except when the asset is classified as held for sale.

5.2.5 Impairment of financial and non-financial assets

Financial assets

A financial asset is assessed at each reporting date to determine whether there is any objective evidence that it is impaired. A financial asset is considered to be impaired if objective evidence indicates that one or more events have had a negative effect on the estimated future cash flows of that asset.

An impairment loss in respect of a financial asset measured at amortized cost is calculated as the difference between its carrying amount, and the present value of the estimated future cash flows discounted at the original effective interest rate. An impairment loss in respect of an available-for-sale financial asset is calculated by reference to its fair value.

Individually significant financial assets are tested for impairment on an individual basis. The remaining financial assets are assessed collectively in groups that share similar credit risk characteristics. All impairment losses are recognized in the statement of profit or loss and other comprehensive income. Any cumulative loss in respect of an available-for-sale financial asset recognized previously in equity is transferred to profit or loss.

An impairment loss is reversed if the reversal can be related objectively to an event occurring after the impairment loss was recognized.

Non-financial assets

The carrying amounts of the Company's non-financial assets, other than inventories and deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. For intangible assets that have indefinite lives or that are not yet available for use, the recoverable amount is estimated each year at the same time.

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2014

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets (the “cash-generating unit”). An impairment loss is recognized if the carrying amount of an asset or its cash-generating unit exceeds its estimated recoverable amount. Impairment losses are recognized in the statement of profit or loss and other comprehensive income. Impairment losses recognized in respect of cash-generating units are allocated first to reduce the carrying amount of any goodwill allocated to the units and then to reduce the carrying amounts of the other assets in the unit or group of units on a pro rata basis.

In respect of assets other than goodwill, impairment losses recognized in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset’s carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

5.2.6 Acquisition accounting and goodwill

Business combinations are accounted for using the acquisition method as of the acquisition date, which is the date on which control is transferred to the Company. Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. In assessing control, the Company takes into consideration potential voting rights that currently are exercisable.

The Company measures goodwill at the acquisition date as:

- the fair value of the consideration transferred; plus
- the recognized amount of any non-controlling interests in the acquiree; plus
- if the business combination is achieved in stages, the fair value of the existing equity interest in the acquiree; less
- the net recognized amount (generally fair value) of the identifiable assets acquired and liabilities assumed.

When the excess is negative, a bargain purchase gain is recognized immediately in the statement of profit or loss and other comprehensive income.

The consideration transferred does not include amounts related to the settlement of preexisting relationships. Such amounts are generally recognized in the statement of profit or loss and other comprehensive income. Costs related to the acquisition, other than those associated with the issue of debt or equity securities, that the Company incurs in connection with a business combination are expensed as incurred. Any contingent consideration payable is recognized at fair value at the acquisition date. If the contingent consideration is classified as equity, it is not remeasured and settlement is accounted for within equity. Otherwise, subsequent changes to the fair value of the contingent consideration are recognized in the statement of profit or loss and other comprehensive income.

In respect of equity accounted investees, the carrying amount of goodwill is included in the carrying amount of the investment. The cost of an investment in an equity-accounted investee comprises the purchase price and other costs directly attributable to the acquisition of the investment.

Goodwill is initially recognized as an asset at cost and is subsequently measured at cost less any accumulated impairment losses.

Goodwill is tested for impairment annually, or more frequently when there is an indication that it may be impaired. The Company has identified one cash-generating unit to which all goodwill was allocated. If the

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2014

recoverable amount of the cash-generating unit is less than the carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill and then to the other assets pro-rata on the basis of the carrying amount of each asset. An impairment loss recognized for goodwill is not reversed in a subsequent period.

5.2.7 Foreign currency transactions

The Company's functional and presentation currency is the euro, which is also the functional currency of each of the Company's subsidiaries. Transactions in currencies other than the euro are translated at the rates of exchange prevailing on the dates of the transactions. At each balance sheet date, monetary assets and liabilities that are denominated in foreign currencies are translated at the rates prevailing on the balance sheet date. Gains and losses arising on translation are included in profit or loss for the period. In order to manage its exposure to certain foreign exchange risks, the Company enters into forward contracts (see below for details of the Company's accounting policies with respect to such derivative financial instruments).

5.2.8 Financial instruments

Non-derivative financial instruments

Non-derivative financial instruments comprise cash and cash equivalents, trade and other receivables, loans and borrowings, and trade and other payables.

Cash and cash equivalents

Cash equivalents consist principally of money market funds, commercial paper and certificates of deposit with remaining maturities at acquisition of 3 months or less. Except for money market funds, which are recognized at fair value with changes through the statement of profit or loss and other comprehensive income, cash and cash equivalents are carried at amortized cost using the effective interest rate method, less any impairment losses.

The carrying amounts of cash and cash equivalents approximate fair value because of the short maturity of those instruments.

Trade receivables

Trade receivables do not carry any interest and are stated at their amortized cost less any allowance for doubtful amounts.

The fair value of trade and other receivables is estimated as the present value of future cash flows, discounted at the market rate of interest at the reporting date. The carrying amounts of trade receivables approximate fair value because of the short maturity of those instruments.

Loans and borrowings

Interest-bearing bank loans are recorded at the proceeds received, net of direct issuance costs. Finance charges, including premiums payable on settlement or redemption and direct issuance costs, are accounted for on an accrual basis using the effective interest method and are recorded as a component of the related debt to the extent that they are not settled in the period in which they arise.

The Company initially recognizes debt securities issued on the date that they are originated. Such liabilities are recognized initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, these liabilities are measured at amortized cost using the effective interest rate method.

Trade payables

Trade payables are not interest bearing and are stated at amortized cost. The carrying amounts of trade payables approximate fair value because of the short maturity of those instruments.

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2014

Derivative financial instruments

The Company's activities are exposed to changes in foreign currency exchange rates and interest rates.

The Company seeks to reduce its exposure through the use of certain derivative financial instruments in order to manage its exposure to exchange rate and interest rate fluctuations arising from its operations and funding.

The use of derivatives is governed by the Company's policies approved by the board of directors, which provides written principles on the use of derivatives consistent with the Company's risk management strategy.

The Company has entered into various derivative instruments to manage interest rate and foreign currency exchange rates exposure.

Derivatives are measured at fair value. The Company does not apply hedge accounting to its derivative instruments. Accordingly, changes in the fair values of derivative instruments are recognized immediately in the statement of profit or loss and other comprehensive income.

Derivatives embedded in other financial instruments or other host contracts are treated as separate derivatives when their risks and characteristics are not closely related to those of host contracts and the host contracts are not carried at fair value through the statement of profit or loss and other comprehensive income.

For interest rate derivative contracts that are terminated prior to maturity, the cash paid or received upon termination that relates to future periods is classified as a financing activity in the consolidated statement of cash flows.

Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issuance of ordinary shares and share options are recognized as a deduction from equity, net of any tax effects.

When share capital recognized as equity is repurchased, the amount of the consideration paid, which includes directly attributable costs, net of any tax effects, is recognized as a deduction from equity. Repurchased shares are presented in the reserve for own shares. When own shares are sold or reissued subsequently, the amount received is recognized as an increase in equity, and the resulting surplus or deficit on the transaction is presented in share premium.

5.2.9 Revenue recognition

Subscription fees for telephony, internet and premium cable television are prepaid by subscribers on a monthly basis and recognized in revenue as the related services are provided, i.e. in the subsequent month. Subscription fees for analog cable television are prepaid by subscribers predominantly on an annual basis and recognized in revenue on a straight-line basis over the following twelve months. Revenue from usage based premium television, mobile and fixed telephone and internet activity is recognized on actual usage.

Installation fees charged to residential customers are recognized as revenue by reference to the stage of completion of the installation. As installation ordinarily does not take long, installation fees are recognized generally as revenue on completion of the installation. Due to the specific characteristics of a business transaction, upfront installation fees charged to business customers are considered part of an integrated solution. The installation is not considered to have stand-alone value and revenue from installation fees charged to business customers is recognized on a straight-line basis as the ongoing services are provided, i.e. deferred and recognized over the average customer relationship.

Together with subscription fees, basic cable television subscribers are charged a copyright fee for the content received from public broadcasters that is broadcasted over the Company's network. These fees contribute to the cost the Company bears in respect of copyright fees paid to copyright collecting agencies for certain content provided by the public broadcasters and other copyright holders. The Company reports copyright fees collected from cable subscribers on a gross basis as a component of revenue due to the fact that the Company is acting as a principal in the arrangement between the public broadcaster and other copyright holders which does not represent a pass-through arrangement. Indeed, the Company bears substantial risk in setting the level of copyright fees charged to subscribers as well as in collecting such fees.

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2014

For multiple element arrangements, the recognition criteria of revenue are applied to the separately identifiable components of the transaction. A component within an arrangement is separated if it has stand-alone value to the customer and if its fair value can be measured reliably. The fair value of the consideration received or receivable is allocated to the separate components of the arrangement using the residual fair value method. The allocation of arrangement consideration to delivered items is limited to amounts of revenue that are not contingent on the Company's future performance.

Revenue from termination fees is recognized at the time of the contract cancellation, if and only if collectability of the fee is reasonably assured. If collectability of the termination fee is not reasonably assured at the time of billing, revenue is deferred until cash is received.

Customers may be charged a downgrade fee when they switch to a lower tier service. Generally, the downgrade is not considered to have stand-alone value to the customer and downgrade fees are therefore deemed to be part of the overall consideration for the ongoing service. Revenue from downgrade fees is recognized on a straight-line basis over the longer period of (i) the related subscription contract or (ii) the expected remaining length of the customer relationship.

Digital television customers may rent a set-top box from Telenet. When customers elect to change the type of set-top box that they rent from Telenet, they may be charged a swap fee. The swap to a different type of set-top box is not considered to have stand-alone value to the customer and revenue from swap fees is recognized on a straight-line basis over the shorter period of (i) the expected remaining length of the customer relationship or (ii) the useful life of the set-top box.

Amounts billed for certain premium voice and SMS content are not presented as revenues but are netted against the corresponding expenses, because Telenet carries no legal responsibilities for the collection of these services and acts solely on behalf of the third-party content providers.

5.2.10 Operating expenses

Operating expenses consist of interconnection costs, network operations, maintenance and repair costs and cable programming costs, including employee costs and related depreciation and amortization charges. The Company capitalizes most of its installation costs, including direct labor costs. Copyright and license fees paid to the holders of those rights and their agents are the primary component of the Company's cable programming costs. Other direct costs include costs that the Company incurs in connection with providing its residential and business services, such as interconnection charges as well as bad debt expense. Network costs consist of costs associated with operating, maintaining and repairing the Company's broadband network and customer care costs necessary to maintain its customer base.

5.2.11 Provisions

Provisions are recognized when the Company has a present legal or constructive obligation as a result of a past event, it is probable that the Company will be required to settle that obligation and the amount can be reliably measured. Provisions are measured at the Company's best estimate of the expenditure required to settle its liability and are discounted to present value where the effect is material.

A provision for restructuring is recognized when the Company has approved a detailed and formal restructuring plan, and the restructuring either has commenced or has been announced to those affected. Future operating losses are not provided for.

A provision for onerous contracts is recognized when the expected benefits to be derived by the Company from a contract are lower than the unavoidable costs of meeting its obligations under the contract. The provision is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract. Before a provision is established, the Company recognizes any impairment loss on the assets associated with that contract.

5.2.12 Leases

At inception of an arrangement, including arrangements that convey to the Company the right to use equipment, fibers or capacity for an agreed period of time in return for a series of payments, the Company determines whether such an arrangement is or contains a lease. A specific asset is the subject of a lease if

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2014

fulfillment of the arrangement is dependent on the use of that specified asset. An arrangement conveys the right to use the asset if the arrangement conveys to the Company the right to control the use of the underlying asset.

At inception or upon reassessment of the arrangement, the Company separates payments and other consideration required by such an arrangement into those for the lease and those for other elements on the basis of their relative fair values.

Subsequently, the lease liability is reduced as payments are made and an imputed finance charge on the liability is recognized using the Company's incremental borrowing rate.

Leases are classified as finance leases whenever the terms of the lease transfer substantially all of the risks and rewards of ownership to the Company. Property and equipment acquired by way of a finance lease are stated at an amount equal to the lower of their fair value and the present value of the minimum lease payments at inception of the lease, less accumulated depreciation and any impairment losses. Each lease payment is allocated between the liability and finance charges so as to achieve a constant rate on the finance balance outstanding. The corresponding lease obligations, net of finance charges, are included in long-term debt with the interest element of the finance cost charged to the statement of profit or loss and other comprehensive income over the lease period. All other leases are classified as operating lease payments and recognized in the statement of profit or loss and other comprehensive income on a straight-line basis over the term of the lease.

Leased assets are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the Company will obtain ownership by the end of the lease term in which case they are depreciated over their useful lives.

5.2.13 Income taxes

Income tax expense comprises current and deferred tax.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustments to tax payable in respect of previous years.

Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the calculation of taxable profit, and is accounted for using the balance sheet method. Deferred tax liabilities are generally recognized for all taxable temporary differences and deferred tax assets are recognized to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilized. Such assets and liabilities are not recognized if the temporary difference arises from the initial recognition of goodwill or from the initial recognition of other assets and liabilities in a transaction that is not a business combination and that affects neither the tax profit nor the accounting profit.

Deferred tax liabilities are recognized for taxable temporary differences arising on investments in subsidiaries except where the Company is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

A deferred tax asset is recognized for the carry forward of unused tax losses to the extent that it is probable that future taxable profit will be available against which the unused tax losses can be utilized. The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realized. Current and deferred tax is charged or credited to the statement of profit or loss and other comprehensive income, except when it relates to items charged or credited directly to equity, in which case the current or deferred tax is also dealt with in equity.

In determining the amount of current and deferred tax, the Company takes into account the impact of uncertain tax positions and whether additional taxes and interest may be due. The Company believes that its accruals for tax liabilities are adequate for all open tax years based on its assessment of many factors,

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2014

including interpretations of tax law and prior experience. This assessment relies on estimates and assumptions and may involve a series of judgments about future events. New information may become available that causes the Company to change its judgment regarding the adequacy of existing tax liabilities. Such changes to tax liabilities will impact tax expense in the period that such a determination is made.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity.

5.2.14 Employee benefits

Pension and other post-employment benefit obligations

The Company provides both defined benefit and defined contribution plans to its employees, directors and certain members of management.

For defined contribution plans, the Company pays fixed contributions into a separate entity. The Company has no obligation, beyond the average minimum guaranteed rate of return as defined by law, to pay further amounts in case the pension fund has insufficient assets to pay all employee benefits relating to current and prior service. Obligations for contributions to defined contribution plans are recognized as an employee benefit expense in profit or loss in the periods during which related services are rendered by employees.

As a result of the guaranteed rates of return, those plans qualify as defined benefit plans. Considering the uncertainty with respect to the future evolution of the minimum guaranteed rates of return in Belgium and the Company's assessment that a pure application of the projected unit credit method would not lead to a true and fair view of the obligations of the company with respect to these kind of plans, the Company opted not to apply the projected unit credit method to determine the benefit obligations of these plans.

Instead the Company applied an approach whereby, for plans for which the minimum guaranteed rate of return as defined by law is not fully insured, the net liability (if any) recognized in the balance sheet is based on the potential shortfall, determined by individual plan participant, between the Company's pension obligation (based on the applicable legal minimum guaranteed return) and the accumulated contributions based on the actual credited rates of return at the balance sheet date (i.e. the net liability is based on the deficit measured at intrinsic value).

A defined benefit plan is a post-employment benefit plan that is not a defined contribution plan.

The defined benefit pension plans typically pay benefits to employees at retirement using formulas based upon years of service and compensation rates near retirement. Those schemes are generally funded by payments from the participants and the Company to insurance companies as determined by periodic actuarial calculations.

For defined benefit pension plans, the cost of providing benefits is determined using the Projected Unit Credit Method, with actuarial valuations being carried out at each balance sheet date. The discount rate is based on the yield at the reporting date on high quality corporate bonds (average yield on AA corporate bonds in euro, benchmarked against the iBoxx € AA Corporates index) taking into account the duration of the Company's obligations.

The net defined benefit liability/(asset) recognized in the balance sheet corresponds to the difference between the defined benefit obligation and the plan assets. In case of a surplus, the net defined benefit (asset) is limited to the present value of future economic benefits available in the form of a reduction in contributions or a cash refund.

Remeasurements of the net defined benefit liability/(asset), which comprise actuarial gains and losses on the defined benefit obligation, the return on plan assets (excluding interest income) and changes in the effect of the asset ceiling (if any, excluding interest), are recognized immediately in other comprehensive income (OCI).

The Company determines the net interest expense (income) on the net defined benefit liability (asset) for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the then-net defined benefit liability (asset), taking into account any changes in the net defined benefit liability (asset) during the period as a result of contributions and benefit payments. Net interest expense is recognized in profit or loss.

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2014

Past service cost resulting from plan amendments or curtailments is recognized immediately in profit or loss.

The Company also provides post-retirement health care benefits to certain employees. The expected costs of these benefits are accrued over the period of employment using an accounting methodology similar to that for defined benefit pension plans.

Other long term employee benefit obligations

The Company provides long term service awards to its employees. The expected costs of these benefits are accrued over the period of employment using an accounting methodology similar to that for defined benefit plans. Actuarial gains and losses arising from experience adjustments, and changes in actuarial assumptions, are recognized immediately in profit or loss.

Share-based payments

The Company issues equity-settled share-based payments to certain employees which are measured at fair value at the date of grant. The grant date fair value of options granted to employees is calculated using a Black-Scholes pricing model and recognized as share-based payments expense, with a corresponding increase in equity, over the period that the employees become unconditionally entitled to the options. The model has been adjusted, based on management's best estimate, for the effects of non-transferability, exercise restrictions, and behavioral considerations. Measurement inputs for the Black-Scholes model include share price on measurement date, exercise price of the instrument, expected volatility, weighted average expected life of the instruments, expected dividends and the risk-free interest rate.

At each balance sheet date, the Company revises its estimates of the number of options that are expected to become exercisable. It recognizes the cumulative impact of the revision of original estimates, if any, in the statement of profit or loss and other comprehensive income, and a corresponding adjustment to equity. The proceeds received net of any directly attributable transaction costs are credited to share capital (nominal value) and share premium when the options are exercised.

Short-term benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided.

A liability is recognized for the amount expected to be paid under short-term cash bonus plans if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

5.2.15 Inventories

Inventories are measured at the lower of cost and net realizable value. The cost of inventories is based on the first-in first-out principle, and includes expenditures incurred in acquiring the inventories and other costs incurred in bringing them to their existing location and condition. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated selling expenses.

The fair value of inventories acquired in a business combination is determined based on the estimated selling price in the ordinary course of business, less the estimated costs of sale, and a reasonable profit margin based on the effort required to sell the inventories.

5.2.16 Earnings per share

The Company presents basic and diluted earnings per share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the period. Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of all dilutive potential ordinary shares, which comprise warrants and options granted to employees and the CEO.

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2014

5.2.17 Finance income and expenses

Finance income mainly comprises interest income on funds invested, changes in the fair value of financial instruments and net gains on financial instruments. Interest income is recognized as it accrues in the statement of profit or loss and other comprehensive income, using the effective interest method.

Finance expense mainly comprises interest expense on loans and borrowings, changes in the fair value of financial instruments and net losses on financial instruments.

Foreign currency gains and losses are reported on a net basis.

5.2.18 Customer acquisition costs

Customer acquisition costs are the directly attributable costs incurred in signing up a new customer. These include, but are not limited to, incentives paid to retailers, commissions paid to external dealers or agents, and sales commissions to the Company's staff.

Customer acquisition costs paid to a party other than the customer are capitalized as intangible assets if and only if the definition and recognition criteria are met, the costs are incremental to the subscriber contracts, and can be measured reliably. As these criteria are generally not met, customer acquisition costs are generally expensed as incurred.

Cash incentives given to customers are not viewed as customer acquisition costs, but are recognized as a deduction from revenue.

Benefits in kind given to customers, to the extent they do not represent a separate component of the arrangement, are recognized as an expense in the appropriate periods.

5.2.19 Changes in accounting policies

The Company has adopted the following new standards and amendments to standards, including any consequential amendments to other standards, with a date of initial application of January 1, 2014.

- *IFRS 10 Consolidated Financial Statements*
- *IFRS 11 Joint Arrangements*
- *IFRS 12 Disclosure of Interests in Other Entities*
- *Investment Entities (Amendments to IFRS 10, IFRS 12 and IAS 27)*
- *IAS 28 Investments in Associates and Joint Ventures (2011)*
- *Amendments to IAS 36 Impairment of assets—Recoverable Amount Disclosures for Non-Financial Assets*
- *Amendments to IFRS 2 Definition of Vesting Condition*
- *Amendments to IFRS 3 Accounting for Contingent Consideration in a Business Combination*

The adoption of these standards and amendments did not have a material impact on the Company's financial position, statement of profit or loss and other comprehensive income or cash flows.

Subsidiaries

Subsidiaries are entities controlled by the Company.

As a result of IFRS 10, the Company has changed its accounting policy for determining whether it has control over and consequently whether it consolidates its investees. IFRS 10 introduces a new control model that focuses on whether the Company has power over an investee, exposure or rights to variable returns from its involvement with the investee and ability to use its power to affect those returns.

Joint arrangements

As a result of IFRS 11, the Company has changed its accounting policy for its interests in joint arrangements. Under IFRS 11, the Company has classified its interests in joint arrangements as either joint

**Notes to the Consolidated Financial Statements
December 31, 2014**

operations (if the Company has rights to the assets, and obligations for the liabilities, relating to an arrangement) or joint ventures (if the Company has rights only to the net assets of an arrangement). When making this assessment, the Company considers the structure of the arrangements, the legal form of any separate vehicles, the contractual terms of the arrangements and other facts and circumstances. Previously, the structure of the arrangement was the sole focus of classification.

Interests in equity-accounted investees

As the Company already applied equity method accounting for its interests in associates and joint ventures under IAS 31, the adoption of IFRS 11 had no material impact on the Financial Statements.

5.2.20 Forthcoming requirements

Standards, annual improvements, amendments and interpretations to existing standards that are not yet effective for the year ended December 31, 2014 and have not been early adopted by the Company

The following standards, amendments and interpretations to existing standards have been published and are mandatory for the Company's accounting periods beginning on or after January 1, 2015, or later periods, but the Company has not early adopted them. The adoption of these standards, amendments and interpretations, except for IFRS 15, is not expected to have a material impact on the Company's financial result or financial position:

IFRS 9 Financial Instruments (effective for annual periods beginning on or after January 1, 2018).

IFRS 15 Revenue from Contracts with Customers, issued by the IASB in May 2014, requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. This standard would be effective for annual periods beginning on or after January 1, 2017, but has not yet been endorsed by the EU. The Company is currently evaluating the effect that IFRS 15 will have on its consolidated financial statements and related disclosures. The Company has not yet selected a transition method nor has it determined the effect of the standard on its ongoing financial reporting.

Amendments to IFRS 10 and IAS 28—Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (effective for annual periods beginning on or after January 1, 2016).

Amendments to IFRS 11—Accounting for Acquisitions of Interests in Joint Operations (effective for annual periods beginning on or after January 1, 2016).

Amendments to IAS 16 and IAS 38—Clarification of Acceptable Methods of Depreciation and Amortisation. These amendments would be effective for annual periods beginning on or after January 1, 2016, but have not yet been endorsed by the EU.

Amendments to IAS 19 Employee benefits—Defined Benefit Plans: Employee Contributions (effective for annual periods beginning on or after January 1, 2015) introduce a relief that will reduce the complexity and burden of accounting for certain contributions from employees or third parties.

5.3 RISK MANAGEMENT

5.3.1 General

The Company is exposed to various risks within the context of its normal business activities, which could have a material adverse impact on its business, prospects, results of operations and financial condition. Therefore, controlling these risks is very important for the management of the Company. To support its growth and help the management and the Audit Committee to deal with the challenges the Company faces, the Company has set up a risk management and internal control system. The purpose of the internal control and risk management framework is to enable the Company to meet its objectives. The most important components of this system are described in our Corporate Governance Statement under 7.4 Internal control and risk management systems.

The Company conducts its business in a rapidly changing environment that gives rise to numerous risks and uncertainties that it cannot control. Please refer to 3 Risk factors for more detailed information.

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2014

Telenet is involved in a number of legal procedures risen in the normal course of operations, as Telenet operates within a highly competitive environment. Legal proceedings may arise in connection with such as intellectual property, advertising campaigns, product offerings and acquisition opportunities. Telenet discusses in note 5.24.1 certain procedures, which are still pending and to which the Company is involved. Outside the procedures described in note 5.24.1, Telenet does not expect the legal proceedings in which it is a party or by which it is threatened to have a material adverse effect on the activities or consolidated financial position. However, the Company notes that the outcome of legal proceedings can be extremely difficult to predict, and Telenet offers therefore no guarantees.

Identification of risks

In the risk identification process, Telenet takes a broad range of risks into account that could have a current and/or future impact on the Company. The Senior Leadership Team monitors the most important identified risks on a quarterly basis. The risks are first listed according to importance, and are then mapped on the basis of the category (A), the owner (B) and the control measures (C).

A. Telenet distinguishes the following categories:

- Corporate governance
- Customer satisfaction
- Customer support
- External Factors
- Finance
- HR
- Innovation
- IT and network operations
- Legislation and regulations
- Marketing/Communication
- Network technology
- Outsourcing
- Production life cycle management
- Reporting
- Sales

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2014

- Security
- Strategy
- Suppliers
- Other

B. The risk owner has the following responsibilities:

- Defining how the risk should be monitored, in other words making a decision regarding the risk management measures;
- Identifying gaps in the supervision (lack of control, set-up/implementation of control);
- Supporting and monitoring the implementation of action plans;
- Re-evaluating the risk coverage on a regular basis.

C. Risks can be accepted, mitigated, avoided or transferred:

- Risk management measures are documented and, in the case of risk mitigation, it may be necessary to define action plans in order to enhance the control;
- Action plans are documented in the risk management measures that clearly indicate who/what/when;
- The risk management measures include a target date for all action plans.

The following items are reviewed in terms of the follow-up on the action plans:

- Progress status
 - Not yet started
 - Under development
 - Completed
 - Removed (the reason for removing an action plan must be provided)
- Follow-up
 - Per quarter for each of the main risks for Telenet
 - Annually for other risks that have been assessed as relevant
- Progress assessment

The use of a centralized risk register incorporating all information relating to any relevant risk simplifies the analysis of the correlation between the registered risks, the determination of the priority of the risk management measures and the identification of the synergy between the risk management actions.

5.3.2 Credit risk

Qualitative disclosures

Credit risk encompasses all forms of counterparty exposure, i.e. where counterparties may default on their obligations to the Company in relation to lending, hedging, settlement and other financial activities. The Company is exposed to credit risk from its operating activities and treasury activities.

The largest share of the gross assets subject to credit risk from operating activities are trade receivables from residential and small business customers located throughout Belgium and parts of Luxembourg. Accordingly, the Company has no significant concentration of credit risk. The risk of material loss from non-performance from these customers is not considered likely. The Company establishes reserves for doubtful accounts receivable to cover the potential loss from non-payment by these customers.

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2014

As for credit risk on financial instruments, the Company maintains credit risk policies with regard to its counterparties to minimize overall credit risk. These policies include an assessment of a potential counterparty's financial condition, credit rating and other credit criteria and risk mitigation tools as deemed appropriate. The Company maintains a policy of entering into such transactions only with highly rated European and US financial institutions. To minimize the concentration of counterparty credit risk, the Company enters into derivative transactions with a portfolio of financial institutions. Likewise, cash and cash equivalents are placed with highly rated financial institutions and only highly rated money market funds are used.

Quantitative disclosures

The Company considers its maximum exposure to credit risk to be as follows:

	December 31, 2014	December 31, 2013
	(in thousands of euro)	
Cash and cash equivalents (including money market funds, certificates of deposits)	189,076	214,103
Trade receivables	113,626	122,028
Derivative financial instruments	9	66
Receivables from sale of sports broadcasting rights	3,465	15,805
Outstanding guarantees to third parties for own liabilities (cash paid)	888	2,165
Total	307,064	354,167

More detailed financial information has been disclosed under the respective notes to the consolidated financial statements of the Company.

5.3.3 Liquidity risk

Qualitative disclosures

The principal risks to the Company's sources of liquidity are operational risks, including risks associated with decreased pricing, reduced subscriber growth, increased marketing costs and other consequences of increasing competition and potentially adverse outcomes with respect to the Company's litigations as described in note 5.24.1. Telenet's ability to service its debt and to fund its ongoing operations will depend on its ability to generate cash. Although the Company anticipates generating positive cash flow after deducting interest and taxes, the Company cannot assure that this will be the case. The Company may not generate sufficient cash flow to fund its capital expenditures, ongoing operations and debt obligations.

Telenet Group Holding NV is a holding company with no source of operating income. It is therefore dependent on capital raising abilities and dividend payments from subsidiaries to generate funds. The terms of the 2010 Amended Senior Credit Facility contain a number of significant covenants that restrict the Company's ability, and the ability of its subsidiaries to, among other things, pay dividends or make other distributions, make capital expenditures, incur additional debt and grant guarantees. The agreements and instruments governing its debt contain restrictions and limitations that could adversely affect the Company's ability to operate its business.

Telenet believes that its cash flow from operations and its existing cash resources, together with available borrowings under the 2010 Amended Senior Credit Facility, will be sufficient to fund its currently anticipated working capital needs, capital expenditures and debt service requirements.

For the year ended December 31, 2013, no additional financing or refinancing activities occurred.

In March 2014, the Company announced an extension offer for Term Loans Q, R and T under its existing 2010 Amended Senior Credit Facility and the redemption of the Senior Secured Notes due 2016. As a result of the aforementioned refinancing, which was completed in April 2014, the Company issued a new €474.1 million floating rate Term Loan under the 2010 Amended Senior Credit Facility ("Term Loan W") due June 30, 2022 carrying a margin of 3.25% over EURIBOR. In addition, the Company issued a new

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2014

€882.9 million floating rate Term Loan under the 2010 Amended Senior Credit Facility (“Term Loan Y”) due June 30, 2023 carrying a margin of 3.50% over EURIBOR. The net proceeds of these new issuances, together with available cash and cash equivalents, were used to fully redeem the outstanding amounts under Term Loans Q, R and T and the €100.0 million Senior Secured Notes due 2016. As a result, the Company does not have any maturities of its outstanding debt prior to November 2020.

In addition, as part of the aforementioned refinancing, the Company also launched an extension process for its existing Revolving Facility (“Facility S”) with maturity December 31, 2016 carrying a margin of 2.75% over EURIBOR. Lenders under the Revolving Facility were asked to renew and extend their commitments into a new Revolving facility (“Facility X”) with maturity September 30, 2020 carrying a margin of 2.75% over EURIBOR. As a result, the Company now has full access to a committed Revolving Facility of €322.9 million, being €36.9 million under “Facility S” (with availability up to December 31, 2016) and €286.0 million under “Facility X” (with availability up to September 30, 2020).

The 2010 Amended Senior Credit Facility is discussed in greater detail in note 5.12.1 and 5.12.2 of the consolidated financial statements of the Company.

In order to manage its exposure to floating rate debt, the Company entered into interest rate cap, collar and swap contracts for a total nominal amount of €2.7 billion at December 31, 2014 (2013: €3.3 billion).

The Company has implemented a policy on financial risk management. With respect to liquidity and funding risks, the key objectives can be summarized as:

- ensure that at all times the Company has access to sufficient cash resources to meet its financial obligations as they fall due and to provide funds for capital expenditure and investment opportunities as they arise;
- ensure that the Company has sufficient excess liquidity to ensure that the Company can meet its non-discretionary financial obligations in the event of unexpected business disruption;
- ensure compliance with borrowing facilities covenants and undertakings.

A minimum level of cash and cash equivalents is maintained in order to meet unforeseen cash expenses. The Company’s funding requirements and funding strategy are reviewed annually.

A limit has been set regarding the maximum amount that can be invested per derivative product type. On top of this limit, the authorized financial counterparties have been determined and limits have been set for each counterparty by reference to their long-term credit rating.

Quantitative disclosures

The Company’s aggregate contractual obligations as at December 31, 2014 and 2013 were as follows:

Situation as per December 31, 2014	Payments due by period (in thousands of euro)						
	Total	Less than 1 year	2 years	3 years	4 years	5 years	After 5 years

5.3.4 Market risk

The Company is exposed to market risks relating to fluctuations in interest rates and foreign exchange rates, primarily between the US dollar and euro. The Company uses financial instruments to manage its exposure to interest rate and foreign exchange rate fluctuations. Each of these risks is discussed below.

Qualitative disclosures on foreign exchange risk

The Company undertakes certain transactions in foreign currencies. Hence, exposures to exchange rate fluctuations arise. Exchange rate exposures are managed within approved policy parameters utilizing forward foreign exchange contracts.

The Company's functional currency is the euro. However, the Company conducts, and will continue to conduct, transactions in currencies other than the euro, particularly the US dollar. About 2.8% (2013: 4.4%) of the Company's costs of operations (primarily the costs of network hardware equipment, software and premium cable television rights) were denominated in US dollars, while all of its revenue was generated in euros. The Company has significant US dollar obligations with respect to the contracts it is party to for the supply of premium content. Decreases in the value of the euro relative to the US dollar would increase the cost in euro of the Company's US dollar denominated costs and expenses, while increases in the value of the euro relative to the US dollar would have the reverse effect.

The Company has historically covered a portion of its US dollar cash outflows arising on anticipated and committed purchases through the use of foreign exchange derivative instruments. The Company uses forward foreign exchange contracts to manage the exchange rate risk arising from:

- purchases of goods and services in foreign currency;
- capital equipment priced in foreign currency or subject to price changes due to movements in exchange rates;
- payments of royalties, franchise or license fees denominated in a foreign currency.

Although the Company takes steps to protect itself against the volatility of currency exchange rates, there is a residual risk that currency risks due to volatility in exchange rates could have a material adverse effect on the Company's financial condition and results of operations.

The outstanding forward foreign exchange derivatives as of December 31, 2014 and 2013, are disclosed in more detail in note 5.13 to the consolidated financial statements of the Company.

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2014

Qualitative disclosures on interest rate risk

The Company is mainly exposed to interest rate risk arising from borrowings at floating interest rates, interest bearing investments and finance leases. The Company limits its exposure to floating interest rates through the use of derivative instruments. The risk is managed by maintaining an appropriate mix of interest rate swap contracts, interest rate cap contracts, interest rate collar contracts and basis swap contracts.

The Company implemented a policy on financial risk management. With respect to interest rate risk, the key objectives can be summarized as:

- only long term interest exposures (+ 1 year) are managed;
- cash debt servicing costs, from movements in interest rates, are minimized;
- all derivative instruments used are designated to actual interest exposures and are authorized under the policy;
- interest cover ratios included in borrowing covenants are complied with.

As of December 31, 2014, the Company carried a total debt balance (including accrued interest) of €3,733.5 million, of which €1,357.0 million principal amount is owed under the 2010 Amended Senior Credit Facility, €1,200.0 million principal amount is related to the three Notes issued in 2010 and 2011, and €700.0 million principal amount relates to the Senior Secured Fixed Rate Notes due 2022 and 2024 issued in August 2012. The Company's total debt balance at December 31, 2014 also included €38.5 million for the outstanding portion of the 3G mobile spectrum. The remainder primarily represents the capital lease obligations associated with the Interkabel Acquisition. On December 31, 2014, fixed interest rates applied to 51.9% of the Company's total debt (2013: 52.4%).

As referred to above, the outstanding interest rate derivatives as of December 31, 2014 and 2013, are disclosed in more detail in note 5.13 to the consolidated financial statements of the Company.

Quantitative disclosures

Interest rate sensitivity testing

For interest rate derivatives and floating rate debt, the Company has used a sensitivity analysis technique that measures the change in the fair value or interest expense of these financial instruments for hypothetical changes in the relevant base rate applicable at year-end, holding all other factors constant.

The sensitivity analysis is for illustrative purposes only—in practice, market rates rarely change in isolation and are likely to be interdependent. A change of 25 basis points in interest rates at the reporting date would have increased (decreased) the profit for the period and would have changed the fair values of the Company's interest rate derivatives as set out in the table below:

The amounts generated from this sensitivity analysis are forward-looking estimates of market risk assuming certain market conditions. Actual results in the future may differ materially from those projected results due to the inherent uncertainty of global financial markets.

Notes to the Consolidated Financial Statements December 31, 2014

For fixed rate debt, changes in interest rates generally affect the fair value of the debt instrument, but not the Company's earnings or cash flows. The Company does not currently have any obligation to redeem fixed rate debt prior to maturity and, accordingly, interest rate risk and changes in fair market value should not have a significant effect on the fixed rate debt until the Company would be required to refinance such debt.

Foreign currency sensitivity testing

The Company is mainly exposed to market risks relating to fluctuations in foreign exchange rates between the US dollar and euro.

The following table details the Company's sensitivity to a 10% increase and decrease of the relevant foreign exchange rate. We utilize 10% as the sensitivity rate when reporting foreign currency risk internally as it represents management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis primarily includes the effect on Telenet's US dollar denominated payables (primarily payables associated with network hardware equipment, software and premium cable television rights).

5.3.5 Capital Risk

The Company manages its capital to ensure that the Company and its subsidiaries will be able to continue as a going concern in order to provide sustainable and attractive returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

The Company monitors capital risk on the basis of the net leverage ratio. The net leverage ratio is calculated as per the 2010 Amended Senior Credit Facility definition, using net total debt, excluding (a) subordinated shareholder loans, (b) capitalized elements of indebtedness under the Clientele and Annuity Fees, (c) any finance leases entered into on or prior to August 1, 2007, and (d) any indebtedness incurred under the network lease entered into with the pure intermunicipalities up to a maximum aggregate amount of €195.0 million, divided by last two quarters' annualized EBITDA.

As of December 31, 2014, the outstanding balance of the Company's 2010 Amended Senior Credit Facility and outstanding cash balance resulted in a Net Total Debt to Consolidated Annualized EBITDA ratio of 3.7x compared to 4.0x at the end of December 2013. The decrease in the Company's net leverage ratio compared to year-end 2013 reflected the absence of major shareholder disbursements apart from the €48.2 million Share Repurchase Program 2014 as mentioned in Note 5.11.1. The Company's current net leverage ratio is significantly below the covenant of 6.0x and the availability test of 5.0x.

Under the 2010 Amended Senior Credit Facility the Company has access to the additional committed Revolving Facility S of €36.9 million and Facility X of €286.0 million, subject to compliance with the covenants mentioned above, with availability up to and including December 31, 2016 and September 30, 2020.

5.3.6 Financial instruments: fair values

Carrying amount versus fair value

The fair values of financial assets and financial liabilities, together with the carrying amounts in the consolidated statement of financial position and their levels in the fair value hierarchy are summarized in the table below. The fair value measurements are categorized into different levels in the fair value hierarchy based on the inputs used in the valuation techniques.

The following tables show the carrying amounts and fair values of financial assets and liabilities, including their levels of fair value hierarchy.

The table below does not include fair value information for financial assets and liabilities not measured at fair value if the carrying amount is a reasonable approximation of fair value.

Valuation techniques and significant unobservable inputs

The following tables show the valuation techniques used in measuring level 2 fair values, as well as the significant unobservable inputs used.

Financial instruments measured at fair value

Type	Valuation technique	Unobservable inputs	Inter-relationship between unobservable inputs and fair value measurements
Interest rate derivatives	Discounted cash flows: the fair value of the interest rate derivatives is calculated by the Company based on swap curves flat, taking into account the credit risk of both the Company and the respective counterparties to the instruments. The Company also compares the fair values thus calculated to the respective instruments' fair value as provided by the counterparty.	The credit risk of both the Company and the respective counterparties to the instruments.	The estimated fair value would increase (decrease) if: —the credit risk of the company were lower (higher) —the credit risk of the countercompany were higher (lower).
Foreign exchange forwards and embedded derivatives	Discounted cash flows: the fair value of forward exchange contracts is calculated by discounting the difference between the contractual forward price and the current forward price for the residual maturity of the contract using a risk-free interest rate. This calculation is compared to the listed market price, if available.	Not applicable.	Not applicable.

Notes to the Consolidated Financial Statements December 31, 2014

The Company's accrued capital expenditures mainly consist of network growth and upgrades, as well as refurbishments and replacements of network equipment.

The Company assesses the estimated useful lives of its property and equipment each reporting period to determine whether events or circumstances warrant a revision of these estimated useful lives. Based on the results of the Company's periodic review of the useful lives of its assets, the Company changed the useful life for fiber network assets and associated capitalized construction costs from 20 to 30 years, prospectively as from January 1, 2013. No changes were necessary based on the 2014 re-assessment.

For further information regarding finance lease obligations, we refer to note 5.12.6 to the consolidated financial statements of the Company.

For further information regarding assets pledged as security, we refer to note 5.12.5.

For the year ended December 31, 2014, the Company removed €202.6 million of gross cost and accumulated depreciation related to fully depreciated assets which are no longer used by the Company (€308.4 million for the year ended December 31, 2013).

Disposals of property and equipment for the year ended December 31, 2014 mainly consisted of:

- Disposal of leasehold improvements with a loss on disposal equal to the remaining net book value amounting to €0.7 million;
- Sale of hard disks from recycled HD Digicorders with a zero net book value, resulting in a gain on disposal of €0.4 million;
- Sale of set-top boxes with a zero net book value, resulting in a gain on disposal of €0.6 million; and
- Sale of scrap material with a zero net book value, resulting in a gain on disposal of €1.7 million.

Disposals of property and equipment for the year ended December 31, 2013 mainly consisted of:

- Sale of hard disks from recycled HD Digicorders with a zero net book value, resulting in a gain on disposal of €1.4 million;
- Sale of set-top boxes with a net book value of €1.7 million, with no gain or loss on disposal; and
- Sale of scrap material with a zero net book value, resulting in a gain on disposal of €1.1 million.

The Company determined that its property and equipment constitute a single cash generating unit for the purpose of impairment testing.

5.5 GOODWILL

The total amount of goodwill remained unchanged during 2014 and stood at €1,241.8 million.

The changes in the Company's goodwill for the years ended December 31, 2014 and 2013 are as follows:

(in thousands of euro)

January 1, 2013	1,241,798
2013 Acquisition of subsidiaries	
—Ulana Business Management Ltd	2
—Magrina Sàrl	13
December 31, 2013	1,241,813
2014 Acquisition of subsidiaries	—
December 31, 2014	1,241,813

The Company performed its annual review for impairment during the third quarter of 2014 and 2013, respectively. Goodwill was allocated to one cash generating unit. The recoverable amount of the cash generating unit was based on its value in use and was determined by discounting the future cash flows to be generated from its continuing use (Discounted Cash Flow method). The value in use of the cash generating unit for the year ended December 31, 2014 was determined in a similar manner to the year ended December 31, 2013.

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2014

The key assumptions for the value in use calculations used to determine the recoverable amount are those regarding the discount rates and expected changes to selling prices, product offerings, direct costs, EBITDA margins and terminal growth rates. The discount rate used is a pre-tax measure estimated based on past experience, and industry average weighted cost of capital. Changes in selling practices and direct costs are based on past practices and expectations of future changes in the market. The calculation uses cash flow projections based on financial budgets approved by management, the Company's Long-Range Plan through 2019, and a pre-tax discount rate of 8.7% (10.2% for the year ended December 31, 2013) based on current market assessments of the time value of money and the risks specific to the Company. The development of the Long-Range Plan relies on a number of assumptions, including:

- market growth, the evolution of the Company's market share and the resulting trends in the number of subscribers;
- the product mix per subscriber;
- the average revenue per subscriber;
- the expected evolution of various direct and indirect expenses;
- the expected evolution in other variable and fixed costs;
- the estimated future capital expenditure (excluding capital expenditure that improves or enhances the Company's assets' performance).

The assumptions were derived mainly from:

- available historic data;
- external market research and observations with respect to e.g. inflation, changes in the remuneration index, evolutions of the number of households, connection points, etc.;
- internal market expectations based on trend reports, the current state of important negotiations, etc.

For the year ended December 31, 2014, as well as for the year ended December 31, 2013, cash flows beyond the five-year period have been extrapolated using no growth rate, based on historical data and macro-economic conditions. This growth rate does not exceed the long-term average growth rate for the industry as published periodically in the Bulletins of the European Central Bank (ECB).

The Discounted Cash Flow calculation for determining the value in use and net recoverable amount mentioned above was reviewed for reasonableness by comparing the result of the calculation to the market capitalization of the Company.

The key assumptions used are reviewed and updated on a yearly basis by the Company's management. Taking into account the considerable excess of the cash generating unit's recoverable amount over its carrying amount, and based on sensitivity testing performed, management is of the opinion that any reasonably possible changes in key assumptions on which the recoverable amount is based would not cause the carrying amount to exceed the recoverable amount at December 31, 2014.

The Company's intangible assets other than goodwill each have finite lives and are comprised primarily of trade name, software development and acquisition costs, customer relationships, broadcasting rights, out of market component of future leases and contracts with suppliers.

The Company assesses the estimated useful lives of its finite-lived intangible assets each reporting period to determine whether events or circumstances warrant a revision of these estimated useful lives. The Company changed the useful life of its software, prospectively on January 1, 2014, from 3 to 4 years based upon the outcome of the 2013 re-assessment. The assessment performed in 2014 did not result in any revision to the estimated useful lives of intangible assets.

For the year ended December 31, 2014, the Company removed €107.0 million of gross cost and accumulated amortization related to fully amortized assets which are no longer used by the Company (€18.5 million for the year ended December 31, 2013). During 2011, the Company acquired the exclusive broadcasting rights associated with the Belgian football championship for three seasons from July 2011 to

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2014

May 2014, as well as non-exclusive rights to certain matches for the two seasons from July 2012 to May 2014 for €89.4 million. These intangible assets became fully amortized upon their expiration in May 2014 and are presented as a write-off of fully amortized assets in the table above.

In June 2014, the Company acquired the non-exclusive broadcasting rights of the Belgian football championship for the three seasons beginning with the 2014—2015 season. For the 2014-2015 season, Telenet acquired a non-exclusive license to broadcast the signal of the live matches in return for a fixed license fee. The agreement entitles the Pro League to grant the broadcasting rights via a different arrangement for the subsequent seasons. At acquisition date, the non-exclusive broadcasting rights related to the 2014-2015 season met the recognition criteria for intangible assets and were capitalized as broadcasting rights for an amount of €31.1 million.

Following an auction launched in March 2011 by the BIPT, Telenet Tecteo BidCo NV, a subsidiary of the Company in which the Walloon cable operator Tecteo SCRL owns a 25% stake, acquired the fourth 3G mobile spectrum license in Belgium. The Company recognized the acquired spectrum as an intangible asset for an amount of €71.5 million, equal to the net present value at the acquisition date of the yearly installments. Up until December 31, 2013, this intangible asset was being amortized on a straight-line basis through the expiry date of the underlying license of March 15, 2021.

In December 2013, the Company's management determined that it would not be able to utilize the spectrum rights following the conclusion in the fourth quarter of 2013 of negotiations with network operators in Belgium and the absence of regulatory alternatives. This triggered an impairment test of the intangible asset related to the Company's 3G mobile spectrum license. The Company determined that the asset's value in use was zero at December 31, 2013. Further, it was the Company's assessment that there is no basis for making a reliable estimate of the asset's fair value less costs to sell. Consequently, the Company's analysis concluded that the recoverable amount of the intangible asset related to the 3G mobile spectrum was zero at December 31, 2013, and Telenet recorded an impairment charge of €53.3 million during the fourth quarter of 2013 to reduce the carrying amount of this intangible asset to zero. On February 13, 2014, the Company notified the BIPT that it would return the acquired spectrum rights, and the Company returned these rights in June 2014.

At the time of the acquisition of the 3G mobile spectrum license, the Company opted to pay the corresponding purchase price in annual installments. At December 31, 2014, the Company had not been discharged from any part of these contractual obligations and consequently, the Company maintained the corresponding liability (€38.5 million) as of December 31, 2014.

Concurrently with the acquisition of the 3G mobile spectrum license, the Company also exercised its call option to acquire a certain number of 2G mobile spectrum frequencies for a total consideration of €31.5 million, which would become available in November 2015. On December 12, 2013, the Company notified the BIPT that it will not utilize its right to use the 2G mobile spectrum frequencies. On December 15, 2014, the BIPT published the outcome of its request for offers on the 2G frequencies previously earmarked for Telenet. It is the Company's assessment that, as a result of this early notification and started re-allocation of the 2G spectrum, the Company will not be required to honor its commitment to acquire this 2G spectrum in November 2015.

For information regarding finance leases of intangible assets, see note 5.12.6 to the consolidated financial statements of the Company.

5.7 TRADE RECEIVABLES

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2014

At December 31, 2014 and 2013, respectively, the aging of the Company's current trade receivables can be detailed as follows:

(in thousands of euro)	Not due	<u>Past due</u>					<u>Total</u>
		1-30 days	31-60 days	61-90 days	91-120 days	>120 days	
December 31, 2014	60,394	37,110	3,865	2,141	1,612	8,504	113,626
December 31, 2013	59,309	41,222	5,029	1,743	4,526	10,199	122,028

All invoices related to residential customers are due within 20 days. For other clients, the payment due date is set at 30 or 60 days. In accordance with the Company's accounting policies and based on historical experience, trade receivables that are less than 120 days past due are not considered impaired. At December 31, 2014, a total amount of €44.7 million (2013: €52.5 million) was past due but not considered impaired for these reasons. With respect to these trade receivables, there are no indications that the debtors will not meet their payment obligations. The credit quality of trade and other receivables is assessed, and the Company monitors customer credit risk, based on a credit policy established by the Company's management.

Outstanding trade receivables past due for more than 120 days are considered as potentially impaired and are subject to detailed analysis at the customer level, and a provision for impairment of trade receivables is established based upon objective evidence that the Company will not be able to collect the amounts. Significant financial difficulties of the debtor, defaults in payments, and other adverse debtor circumstances are considered indicators that the trade receivable is impaired. Based on the necessary and appropriate underlying documentation, receivables more than 120 days past due for which it is likely that the amount due will be recovered, are excluded from the calculation of the allowance for bad debts. For the remaining receivables more than 120 days past due, a bad debt allowance is provided for at 100%.

The concentration of credit risk is limited due to the customer base being large and unrelated. Accordingly, the Company believes that there is no further credit provision required in excess of the allowance for doubtful debts.

The following table shows the development of the provision for impairment of trade receivables:

	<u>December 31, 2014</u>	<u>December 31, 2013</u>
	(in thousands of euro)	
Provision for impairment of trade receivables at the beginning of the year	(3,358)	(4,907)
Additions	(2,718)	(4,310)
Reductions and write-offs	4,115	5,859
Provision for impairment of trade receivables at the end of the year	<u>(1,961)</u>	<u>(3,358)</u>

When a trade receivable is uncollectible, it is written off against the provision for impairment of trade receivables. Trade receivables impairment losses have been included in cost of services provided in the consolidated statement of profit or loss and other comprehensive income. The Company does not hold any receivables in foreign currency.

Receivables from sale of sports broadcasting rights	2,061	11,227

Other current assets	77,869	83,829

Unbilled revenue generally represents revenue for which the Company has already provided a service or product in accordance with the customer agreement but for which the customer has not yet been invoiced.

The current receivables from the sale of broadcasting rights at December 31, 2013 includes €7.5 million that relates to the Belgian football broadcasting rights. Concurrent with the acquisition of the exclusive broadcasting rights for the main fixtures of the Belgian football championship for the three seasons starting July 2011, the Company entered into agreements with various third parties for the partial or full resale of certain of these rights. Taking into account the three-year term of the contract and the deferred payment terms, the cost or cash price equivalent of the sold part of the rights was determined by means of a net present value calculation using the effective interest method by applying an incremental borrowing rate of 3.89%. This resulted in an initial aggregate receivable balance €67.5 million. As per December 31, 2014, and 2013 no non-current receivables regarding Belgian football were outstanding.

5.9 INVENTORIES

As of December 31, 2014, inventories amounted to €17.1 million (2013: €15.4 million) and consisted mainly of mobile handsets as well as tablets, HD Digiboxes, other DTV materials, wireless modems and powerline adaptors. The increase compared to the end of 2013 of €1.7 million was mainly due to an increase in the mobile handsets inventory of €3.1 million, an increase in the wireless modems inventory of €0.9 million, partially compensated by a decrease in the HD Digiboxes inventory of €3.1 million.

In 2014, inventories of €79.3 million (2013: €54.0 million) were recognized as an expense during the period and included in “cost of sales”.

The net book value of inventories also includes inventory impairments to reduce the carrying values to the net realizable value. These inventory impairments amounted to €0.7 million and €1.5 million for the years ended December 31, 2014 and 2013, respectively.

On December 31, 2014, the certificates of deposit had a weighted average interest rate of 0.45% (2013: 0.35%) and an average maturity of 60 days (2013: 49 days). Cash and cash equivalents are placed with highly rated financial institutions in order to minimize the overall credit risk. Specific Stock Option Plan 2010-2014

On March 24, 2010, the board of directors approved a specific stock option plan for the former CEO for a total number of 850,000 stock options on existing shares (the Specific Stock Option Plan 2010-2014 or SSOP 2010-2014). Each of these stock options entitled the holder thereof to purchase from the Company one existing share of the Company. On April 28, 2010, the extraordinary shareholders' meeting of the Company approved certain terms and conditions of the SSOP 2010-2014.

The grant of 850,000 stock options under the SSOP 2010-2014 was effectively made to the former CEO on September 4, 2010, who accepted this offer on October 3, 2010. After giving effect to the impact of the 2011 and 2012 capital reduction and the 2013 extraordinary dividend payment, the beneficiary held 1,342,624 stock options under the SSOP 2010-2014.

The vesting of these stock options was contingent upon the achievement of certain performance criteria. The Remuneration & Nomination Committee, in consultation with the CEO, determined for each installment the performance criteria and each year the Remuneration & Nomination Committee decided whether these criteria were met.

All stock options under the Telenet Specific Stock Option Plan 2010-2014 vested and became exercisable during defined exercise periods following January 1, 2014. All options under the SSOP 2010-2014 had an expiration date of September 4, 2017. On April 16, 2014 and December 19, 2014, the beneficiary of the SSOP 2010-2014 exercised 900,000 and 442,624 respectively of his outstanding stock options under this plan, resulting in the delivery of in total 1,342,624 shares by the Company. All options under this plan were exercised prior to December 31, 2014.

For this plan the grant date is not deemed to be achieved and therefore the fair value of the options is re-measured

Notes to the Consolidated Financial Statements December 31, 2014

Effect of extraordinary dividend payment on the outstanding options and warrants

Upon the payment of the extraordinary dividend on May 8, 2013, the Company adjusted all options and warrants to ensure that benefits granted to the option and warrant holders were not reduced. The number of options and warrants was increased and the exercise price was decreased by a factor, which is the ratio of the quoted closing market price of the Telenet Group Holding NV shares on the cum date less the amount of the extraordinary dividend per share versus the quoted market price on the cum date. The cum date is the last day that the share is traded with the relevant coupon attached, i.e. the date that falls 4 business days before the date on which the extraordinary dividend is paid (payment date).

	Extraordinary dividend			Amount payment per share (in euro)	Adjustment factor
	Coupon n°	Cum date	Payment date		
Extraordinary dividend 2013	7	May 2, 2013	May 8, 2013	7.90	.811905

As a result of the 2013 adjustment, fair values of the options and warrants before and after the extraordinary dividend payment remained the same for all option and warrant holders resulting in no additional compensation expense. The aforementioned modification to the different warrant plans can be summarized as follows:

Extraordinary dividend 2013	Outstanding number of warrants		Exercise price of the warrants (in euro)	
	before payment	after payment	before payment	after payment
Warrant Plan 2007 bis warrants	2,503	3,083	9.94	8.07

Warrant Plan 2010 ter warrants	113,236	139,469	23.86	19.37

The options under the SSOP 2010-2014 were also amended following the payment of the extraordinary dividend payment in 2013, whereby the number of options was increased and the exercise price was decreased by the same factor 0.811905.

The aforementioned modification of 2013 to the SSOP 2010-2014 option plan can be summarized as follows:

Extraordinary dividend 2013	Number of outstanding stockoptions		Exercise price stock options (in euro)

Canon, Clientele and Annuity agreements

In 1996, the Company acquired the exclusive rights to offer point-to-point services including broadband internet and telephony services, as well as the rights to partly use the capacity of the broadband network owned and controlled by the Pure Intercommunales ("PICs"). In return for this access to a part of the PICs' network, the company paid the so-called Clientele and Annuity Fees. The present value of the Clientele and Annuity Fee payments over the first 20 years (being the life of the longest lived assets that were part of the HFC Upgrade) was initially accounted for as network user rights under intangible assets, and was amortized over 10 or 20 years depending on the useful life of the underlying assets that make up the HFC Upgrade.

Upon completion of the Interkabel acquisition in 2008, the company obtained the ownership and control over the entire network, including the obligation beyond 20 years under the original 50 year Clientele fee agreement and now has the right to use the full capacity of the PICs' network. The term of the Canon Lease Agreement is 38 years (of which still 32 years remained at the end of 2014). Under this agreement, the Company pays recurring Canon Fees which together with the Clientele and Annuity Fees grant full access to the PICs' network. The assets capitalized under the Canon Agreement are depreciated over a period of 15 years. The full access rights acquired under the Canon, Clientele and Annuity agreements are recorded as property and equipment (network) as from October 2008 onwards (see Note 5.4).

On the additional rights of use on the Telenet PICs Network, acquired under the Canon agreement, a contractual interest rate was agreed upon which was favorable in comparison with the market interest rate at that moment. Therefore, this favorable component on the initial Canon lease was separated in the purchase price allocation and recognized as a debit to the liability of the underlying existing Canon Lease. The favorable Out of Market component on the future Canon leases acquired as part of the business combination was recognized as network user rights under intangible assets (see Note 5.6).

For the year ended December 31, 2014, the average effective borrowing rate for the three above mentioned fees was 6.51% (2013: 6.56%).

The Clientele fees payable beyond 20 years are recognized as a non-lease related debt.

Telenet Group Holding NV

Norkring

On May 4, 2010, the Company signed an agreement with Norkring België NV concerning the use of capacity on the latter's broadcasting infrastructure network enabling Telenet to offer digital TV and radio services through Norkring's digital frequency channels in Flanders and Brussels, also referred to as "DTT". Generally, the Company's services are available through the cable network, however through this agreement, the Company would also be able to offer digital TV and radio services—beyond the traditional home—to secluded homes, caravans, holiday homes and cars.

The Norkring agreement provided a right to use Norkring's frequency channels contained in three of their multiplexers (MUX) on an exclusive and non-exclusive basis. This agreement contained a lease with respect to certain capacity for which the Company obtained the exclusive rights, the so-called "MUX 1 capacity". Regarding this MUX 1 capacity, an intangible lease asset was originally recognized under "network user rights" for a net book value of €30.1 million at December 31, 2010. In 2011, the Company recognized an impairment loss of €28.5 million related to this asset, reducing its carrying value to zero as of December 31, 2011. The average effective borrowing rate for the Norkring fee was 6.23% (2013: 6.23%). Payments under the Norkring agreement not related to the "MUX 1 capacity" are accounted for as operating expenses as incurred.

With respect to the Company's decision in the fourth quarter of 2013 to discontinue the provision of DTT services and the related restructuring provision recognized as of December 31, 2013 and 2014, we refer to note 5.15.

Other leases

The Company leases certain assets under finance leases including buildings and certain vehicles with average lease terms of 20 and 5 years, respectively.

For the year ended December 31, 2014, the average effective borrowing rate was 4.36% (2013: 3.91%). All leases are on a fixed repayment schedule and no arrangements include contingent rental payments. The Company's obligations under finance leases are secured by the lessors' title to the leased assets.

5.12.7 3G and 2G mobile spectrum

Following an auction launched in March 2011 by the BIPT, Telenet Tecteo BidCo NV, a subsidiary of the Company in which the Walloon cable operator Tecteo SCRL holds a 25% stake, acquired the fourth 3G mobile spectrum license in Belgium (see note 5.6). For the years ended December 31, 2014 and 2013, the average effective borrowing rate for the 3G mobile spectrum was 2.75%.

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2014

With respect to the impairment loss on the intangible asset related to this 3G mobile spectrum license recognized during the fourth quarter of 2013, and for details on the call option to acquire a number of 2G mobile spectrum frequencies, we refer to note 5.6.

5.14 DEFERRED TAXES

Telenet Group Holding NV and its consolidated subsidiaries each file separate tax returns, except for Telenet International Finance S.à r.l., Finance Center Telenet S.à r.l., Telenet Luxembourg finance Center S.à r.l. and Magrina S.à r.l. which form a Luxembourg fiscal unity, in accordance with applicable local tax laws. For financial reporting purposes, Telenet Group Holding NV and its subsidiaries calculate their respective tax assets and liabilities on a separate-return basis, except for the aforementioned Luxembourg fiscal unity. These assets and liabilities are combined in the accompanying consolidated financial statements.

As of December 31, 2014, Telenet Group Holding NV and its subsidiaries had available combined cumulative tax loss carry forwards of €581.8 million (2013: €358.1 million). Under current Belgian and Luxembourg tax laws, these loss carry forwards have an indefinite life and may be used to offset the future taxable income of Telenet Group Holding NV and its subsidiaries.

Deferred tax assets are recognized for tax loss carry forwards to the extent that the realization of the related tax benefit through the future taxable profits is probable.

Telenet did not recognize deferred tax assets of €129.6 million (2013: €75.3 million) in respect of losses amounting to €406.7 million (2013: €246.0 million) that can be carried forward against future taxable income because it is not considered more likely than not that these net deferred tax assets will be utilized in the foreseeable future.

During the fourth quarter of 2013, the Company decided to discontinue the provision of DTT services which occurred in the first half of 2014. Following this decision, the Company determined that its obligations under the DTT capacity agreement with Norkring België NV constituted an onerous contract as at December 31, 2013. The Company measured the required provision as the net present value of the remaining payments due under this DTT capacity agreement. Telenet recognized the €33.9 million provision as a restructuring expense at December 31, 2013. The remaining non-current and current liabilities related to this restructuring provision amount to respectively €29.4 million and €4.5 million at December 31, 2014.

The acquisition by Telenet in 2011 of the Belgian football broadcasting rights resulted in the recognition of liabilities totaling €155.1 million at the inception of the agreement. No liabilities related to the 2011

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2014

Belgian football contract were outstanding at December 31, 2014, and €17.2 million remained within current liabilities at December 31, 2013 with respect to these specific broadcasting rights (see note 5.17).

Following a tendering procedure in June 2014, the Company acquired the non-exclusive broadcasting rights of the Belgian football championship for the next three seasons starting July 2014. On the acquisition date, the rights related to the first season (2014-2015) met the recognition criteria for intangible assets, which resulted in an addition of broadcasting rights of €31.1 million for which a liability was recognized accordingly. Total non-current and current liabilities regarding sports broadcasting rights amounted to €8.3 million, respectively €18.8 million (see note 5.17) at December 31, 2014, of which €1.3 million and €12.4 million are related to the 2014-2015 Belgian football broadcasting rights, respectively.

The operational expenses charged to Telenet by Interkabel for the maintenance of its network are higher than the Company's benchmark expenses for similar operations and therefore reflects an unfavorable out of market element. In the Interkabel acquisition, this out of market element was recorded at fair value. The underlying liability at December 31, 2014 amounted to €14.1 million (2013: €13.6 million).

The Telenet Pension Plan

The majority of Telenet's employees participate in the Telenet Pension Plan, which requires initial contributions funded into a pension fund. The contributions paid to the pension fund are based on the respective employee's salary.

By law, employers are required to provide an average minimum guaranteed rate of return over the employee's tenure with the Company, currently equal to 3.75% on employee contributions and 3.25% on employer contributions paid as from January 1, 2004 onwards. Those rates may be modified in the future by Royal Decree in which case legislation currently foresees that the new rates also apply to the accumulated past contributions as from the date of modification onwards. Hence, there is a risk that the Company may have to pay additional contributions related to past service. Any such additional contributions will depend on the actual investment returns as well as the future evolution of the minimum guaranteed rates of return.

Since the minimum guaranteed reserves were entirely covered by plan assets and there were no recoverable contributions, no amounts were recognized in the consolidated statement of financial position at December 31, 2014 and 2013.

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2014

The fair value of the plan assets and the amounts recognized in the consolidated statement of financial position reconcile as follows for this plan:

The Company's pension fund is actively managed by two independent asset management firms. The investment strategy is based a balanced neutral risk profile with a long-term investment horizon. The Company's pension fund primarily contains investments in investment funds, either active or passive, with a balanced strategic allocation comprising a mix of 51% equities, 45% bonds, 2% real estate and 2% short term investments. The pension fund's performance is monitored and analyzed on a monthly basis by the pension fund's in-house investment specialist and discussed and reviewed on a quarterly basis by the pension fund's board of directors.

The expected 2015 employer contributions (including taxes) amount to €3.7 million.

The average age of plan participants, weighted based on their accumulated contributions, equals 44.7 at December 31, 2014.

Long service awards

The Company has also recognized a liability of €7.7 million at December 31, 2014 (2013: €7.0 million) for long service awards, which have the form of jubilee benefits.

Defined benefit pension plans and other post-retirement benefit plans

Former Electrabel (ICS) employees, as well as some other employees, are covered by defined benefit pension plans, which provide benefits based on the employees' final salaries and their years of service. In accordance with local practice, the benefits are normally paid out in the form of a lump sum.

The defined benefit pension plans are financed through insurance contracts, which provide a guaranteed rate of return. The pension plans are subject to a minimum funding requirement, which is based on the vested reserves to which the plan participants are entitled in case of leaving. The plan assets, which correspond to the insurance reserves, do not include any shares issued by Telenet or property occupied by Telenet.

Telenet also provides post-retirement health care benefits to former Electrabel (ICS) employees. These obligations are financed directly by the Company. Those plans expose the Company to various risks such as interest rate risk (a decrease of bond yields will increase the benefit obligations), investment risk (a lower return on plan assets will decrease the funded status), longevity risk (an increase in life expectancy will increase the benefit obligations for the post-retirement health care plan) and inflation risk (higher than expected salary increases or medical cost increases will increase the benefit obligations).

The sensitivity analysis reflects the impact of a change in one assumption while keeping all other assumptions constant. In practice, this is unlikely to be the case as some assumptions may be correlated.

The weighted average duration of the benefit obligations equals 15 years.

The contributions towards defined benefit plans for 2015 are estimated at €1.6 million.

Other current liabilities	136	1,019
Total Accrued expenses and other current liabilities	325,190	340,558

Compared to December 31, 2013, total accrued expenses and other current liabilities decreased by €15.4 million to €325.2 million as of December 31, 2014. This is mainly due to a €21.7 million reduction in accrued programming fees (-32.7%) and a €12.9 million reduction in accrued compensation and employee benefits, representing a decrease of -20.2%. The liabilities for sports broadcasting rights declined €9.7 million as the Belgian football broadcasting rights, which were acquired in June 2011, expired in May 2014. The outstanding liability regarding sports broadcasting rights as of December 31, 2014 amounts to €18.8 million of which €12.4 million is related to the 2014-2015 Belgian football season. These decreases were partially offset by an €11.2 million increase in accrued capital expenditures and the recognition in 2014 of a €9.3 million liability related to the Stock Lending Agreement with Binan Investments B.V. (note 5.25.1).

5.18 REVENUE

The Company's revenue is comprised of the following:

	For the years ended December 31,	
	2014	2013
	(in thousands of euro)	
Cable television:		
Basic Subscribers ⁽¹⁾	321,182	314,678
Premium Subscribers ⁽¹⁾	232,402	235,716
Residential:		
Internet	522,222	469,334
Telephony ⁽²⁾	482,446	469,503
Distributors/Other	52,329	61,280
Business	96,516	90,779
Total Revenue	1,707,097	1,641,290

For the full year 2014, we generated revenue of €1,707.1 million, representing a 4% increase compared to the prior year when we produced revenue of €1,641.3 million. All of our revenue growth in the period was organic and directly driven by (i) solid multiple-play growth with the number of triple-play subscribers up 10% compared to December 31, 2013, (ii) the benefit from the selective price increase on certain fixed services in February 2014, (iii) a 8% higher contribution from our mobile activities, and (iv) a 6% increase in our business services revenue. These favorable impacts were partly offset by (i) substantially lower revenue from the sale of standalone handsets of €8.7 million on which we generally earn a small margin, (ii) €5.7 million lower analog carriage fees, and (iii) lower usage-related revenue. Excluding the negative impact from the lower standalone handset sales and lower analog carriage fees, our revenue growth rate would have been higher.

The Company also has deferred revenue as follows:

(in thousands of euro)	December 31, 2014	December 31, 2013
Cable television:		
Basic Subscribers ⁽¹⁾	28,892	33,311
Premium Subscribers ⁽¹⁾	6,382	5,979
Residential:		
Internet	12,213	12,041
Telephony ⁽²⁾	7,540	6,861
Distributors/Other	11,029	13,381
Business	8,701	10,094
Total Deferred Revenue	74,757	81,667
Current portion	73,048	78,985
Non-current portion	1,709	2,682

Deferred revenue is generally fees prepaid by the customers and, as discussed in note 5.2.9 to the consolidated financial statements of the Company, is recognized in the statement of profit or loss and other comprehensive income on a straight-line basis over the related service period.

1 Basic and premium cable television substantially comprises residential customers, but also includes a small portion of business customers.

2 Residential telephony revenue includes the recurring subscription-based revenue from both fixed and mobile telephony subscribers, as well as the interconnection revenue generated by these customers.

Total costs and expenses		1,174,860	1,252,130

For the full year 2014, our total operating expenses were €1,174.9 million, down 6% compared to the prior year when we incurred total operating expenses of €1,252.1 million. An 18% year-on-year increase in other costs, which primarily reflects business-supporting and advisory costs, and slightly higher network operating and service costs for the full year 2014 were more than offset by an 8% decrease in our advertising, sales and marketing expenses. Amortization expense declined in total €22.4 million, mainly resulting from a €13.3 million decrease of software amortization expense and the 3G mobile spectrum license amortization (-€7.4 million). Whereas for the latter an amortization expense of €7.4 million was incurred in 2013, no such costs were incurred in 2014 as the asset in question was fully impaired at year end 2013, representing at that time a cost of €53.3 million (see Note 5.6).

Our operating expenses for the full year 2014 reflected a €12.5 million favorable impact from the settlement of certain operational contingencies, and the comparison to 2013 operating expenses was favorably impacted by the net effect of three nonrecurring items: (i) an impairment charge of €53.3 million recognized in the last quarter of 2013 to reduce the carrying amount of our 3G mobile spectrum license to zero following Telenet's assessment that it will not be able to utilize the spectrum rights, (ii) a restructuring charge of €34.8 million recognized in the fourth quarter of 2013, reflecting Telenet's decision at that time to discontinue the provision of DTT (digital terrestrial television) services, and (iii) the benefit from a €15.7 million reversal of depreciation charges in the second quarter of 2013 following a settlement on set-top box related import duties.

The number of full-time equivalents employed by the Company at December 31, 2014 was 2,262 (2013: 2,202).

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2014

The tax on the Company's profit (loss) before tax differs from the theoretical amount that would arise using the Belgian statutory tax rate applicable to profits (losses) of the consolidated companies as follows:

	For the years ended December 31,	
	2014	2013

Penalty for insufficient prepayments	1,453	1,289
Tax expense for the year	91,758	66,328

The tax losses and temporary differences for which no deferred tax asset is recognized amounted to €54.6 million for the year ended December 31, 2014 (€6.6 million for the year ended December 31, 2013) and consisted of positions resulting in a deferred tax asset which is nevertheless not recognized as it is not deemed probable that taxable profit will be available against which the unused tax losses can be utilized in future years.

Recognition of previously unrecognized tax assets amounting to €4.0 million for the year ended December 31, 2014 related to positions for which in the past no deferred tax asset was recognized as it was not deemed probable that taxable profit would be available in future years against which the tax losses could be utilized. In the current year, based on the most recent results, it became sufficiently probable that they can be utilized and therefore the previously unrecognized tax assets were recognized.

5.24 COMMITMENTS AND CONTINGENCIES

5.24.1 Pending litigations

Litigation concerning the agreement-in-principle concluded between Telenet and the PICs, Interkabel and INDI

On November 26, 2007, Telenet and the PICs announced a non-binding agreement-in-principle to transfer the analog and digital television activities of the PICs, including all existing subscribers to Telenet. Subsequently, Telenet and the PICs entered into a binding agreement (the PICs Agreement), which closed effective October 1, 2008. Telenet has been involved in various litigations concerning the PICs Agreement and the non-binding agreement-in-principle preceding the PICs Agreement. Beginning in December 2007, Belgacom NV/SA (Belgacom), the incumbent telecommunications operator in Belgium, instituted several proceedings seeking to block implementation of these agreements.

Belgacom lodged summary proceedings with the President of the Court of First Instance of Antwerp to obtain a provisional injunction preventing the PICs from effecting the agreement-in-principle on the basis that the PICs should have organized a tendering procedure or public market consultation before entering into the agreement-in-principle, and that the failure to organize such a consultation violates the equality, non-discrimination and transparency principles. In March 2008, the President of the Court of First Instance of Antwerp ruled in favor of Belgacom in the summary proceedings, which ruling was overturned by the Court of Appeal of Antwerp in June 2008. Belgacom brought this appeal judgment before the Cour de Cassation (the Belgian Supreme Court), which confirmed the appeal judgment in September 2010. On April 6, 2009, the Court of First Instance of Antwerp ruled in favor of the PICs and Telenet, dismissing Belgacom's request for the rescission of the agreement-in-principle and the PICs Agreement. On June 12, 2009, Belgacom appealed this judgment with the Court of Appeal of Antwerp. In this appeal, Belgacom is also seeking compensation for damages should the PICs Agreement not be rescinded. However, the claim for compensation has not yet been quantified. At the introductory hearing, which was held on September 8, 2009, the proceedings on appeal were postponed indefinitely at the request of Belgacom.

In parallel with the above proceedings, Belgacom filed a complaint with the Government Commissioner seeking suspension of the approval by the PICs' board of directors of the agreement-in-principle and initiated suspension and annulment procedures before the Belgian Council of State against these approvals and subsequently against the board resolutions of the PICs approving the PICs Agreement. In this complaint, Belgacom's primary argument was that the PICs should have organized a public market consultation before entering into the agreement-in-principle and the PICs Agreement. Belgacom's efforts to suspend approval of these agreements were unsuccessful. In the annulment cases, the Council of State decided on May 2, 2012 to refer a number of questions of interpretation under EU law for preliminary ruling to the European Court of Justice (ECJ). On November 14, 2013, the European Court of Justice ruled that the reasons invoked by the PICs not to organize a market consultation were not overriding reasons of public interest to justify abolishing the PIC's duty to organize such consultation. The annulment cases were subsequently resumed with the Belgian Council of State. On January 16, 2014, the Advocate General with the Council of State recommended that the decisions of the board of the PICs not to organize a public market consultation be annulled, and on May 27, 2014, the Belgian Council of State ruled in favor of Belgacom and annulled (i) the decision of the PICs not to organize a public market consultation and (ii) the decision from the PICs' board of directors to approve the 2008 PICs Agreement. The Belgian Council of State ruling did not annul the 2008 PICs Agreement itself. Belgacom may now resume the civil proceedings which are still pending with the Court of Appeal of Antwerp in order to have the 2008 PICs Agreement annulled and claim damages.

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2014

It is possible that Belgacom or another third party or public authority will initiate further legal proceedings, based on similar or different grounds, in an attempt to block the integration of the PICs' analog and digital television activities or obtain the rescission of the PICs Agreement. No assurance can be given as to the outcome of these or other proceedings. However, an unfavorable outcome of existing or future proceedings could potentially lead to the rescission of the PICs Agreement and/or to an obligation for Telenet to pay compensation for damages, subject to the relevant provisions of the PICs Agreement, which stipulate that Telenet is only responsible for damages in excess of €20.0 million. In light of the fact that Belgacom has not quantified the amount of damages that it is seeking and Telenet has no basis for assessing the amount of losses Telenet would incur in the unlikely event that the PICs Agreement were to be rescinded, Telenet cannot provide a reasonable estimate of the range of loss that would be incurred in the event the ultimate resolution of this matter were to be unfavorable to Telenet. However, Telenet does not expect the ultimate resolution of this matter to have a material impact on its consolidated results of operations, cash flows or financial position.

Litigation regarding cable access

In December 2010, the Belgium Regulatory Authorities published their respective draft decisions reflecting the results of their joint analysis of the broadcasting market in Belgium. After a public consultation, the draft decisions were submitted to the European Commission. The European Commission issued a notice on the draft decision that criticized the analysis of the broadcasting markets on several grounds, including the fact that the Belgium Regulatory Authorities failed to analyze upstream wholesale markets. It also expressed doubts as to the necessity and proportionality of the various remedies. The Belgium Regulatory Authorities adopted a final decision on July 1, 2011 (the July 2011 Decision) with some minor revisions. The regulatory obligations imposed by the July 2011 Decision include (i) an obligation to make a resale offer at "retail minus" of the cable analog package available to third party operators (including Belgacom), (ii) an obligation to grant third-party operators (except Belgacom) access to digital television platforms (including the basic digital video package) at "retail minus," and (iii) an obligation to make a resale offer at "retail minus" of broadband internet access available to beneficiaries of the digital television access obligation that wish to offer bundles of digital video and broadband internet services to their customers (except Belgacom).

After Telenet submitted draft reference offers regarding the obligations described above in February 2012, to which the Belgium Regulatory Authorities subsequently made their observations, launched a national consultation process and consulted with the European Commission. Although the European Commission expressed doubts regarding the analog resale offers on August 8, 2013, the European Commission did not object to the decision on the reference offers. The Belgium Regulatory Authorities published the final decision on September 9, 2013. The regulated wholesale services must be available approximately six months after a third-party operator files a letter of intent and pays an advance payment to each cable operator. On December 27, 2013, wireless operator Mobistar submitted a letter of intent and paid the advance payment on January 10, 2013. Accordingly, the reference offers could be operational as soon as the third quarter of 2014. On April 2, 2013, the Belgium Regulatory Authorities issued a draft decision regarding the "retail-minus" tariffs of minus 35% for basic TV (basic analog and digital video package) and minus 30% for the bundle of basic TV and broadband internet services. A "retail-minus" method of pricing involves a wholesale tariff calculated as the retail price for the offered service by Telenet, excluding value-added taxes and copyrights, and further deducting the retail costs avoided by offering the wholesale service (such as costs for billing, franchise, consumer service, marketing, and sales). On October 4, 2013, the Belgium Regulatory Authorities notified a draft quantitative decision to the European Commission in which they changed the "retail-minus" tariffs to minus 30% for basic TV (basic analog and digital video package) and to minus 23% for the bundle of basic TV and broadband internet services. Even though the European Commission made a number of comments regarding the appropriateness of certain assumptions in the proposed costing methodology, the Belgian Regulatory Authorities adopted such retail-minus tariffs on December 11, 2013.

Telenet filed an appeal against the July 2011 Decision with the Brussels Court of Appeal. On November 12, 2014, the Brussels Court of Appeal rejected Telenet's appeal and accepted Belgacom's claim that Belgacom should be allowed access to Telenet's, among other operators, broadband internet and digital television

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2014

platforms. Telenet is currently considering the possibility to file an appeal against this decision with the Belgian Supreme Court. Telenet also filed an appeal with the Brussels Court of Appeal against the decisions regarding the qualitative and the quantitative aspects of the reference offer. A decision in this appeal is not expected before the end of 2015. There can be no certainty that Telenet's appeals will be successful.

The regulated wholesale services had to be available approximately six months after a third-party operator files a letter of intent and paid an advance payment to Telenet. As stated above, on December 27, 2013, wireless operator Mobistar submitted a letter of intent and paid the advance payment on January 10, 2014. Telenet has implemented the access obligations as described in its reference offers and, as of June 23, 2014, access to the Telenet network had become operational and can be applied by Mobistar. On November 14, 2014, Belgacom also submitted a request to start access negotiations. Telenet is currently considering the merits of this request.

The July 2011 Decision aims to, and in its application may, strengthen Telenet's competitors by granting them resale access to Telenet's network to offer competing products and services notwithstanding Telenet's substantial historical financial outlays in developing the infrastructure. In addition, any resale access granted to competitors could (i) limit the bandwidth available to Telenet to provide new or expanded products and services to the customers served by its network and (ii) adversely impact Telenet's ability to maintain or increase its revenue and cash flows. The extent of any such adverse impacts ultimately will be dependent on the extent that competitors take advantage of the resale access ultimately afforded to Telenet's network and other competitive factors or market developments.

Interconnection Litigation

Telenet has been involved in regulatory and court proceedings with Belgacom in relation to the increased interconnection fees that it began charging telephone operators to terminate calls made to receivers on the Combined Network in August 2002. Several procedures have been ongoing between Telenet and Belgacom over the past years. In the course of 2013 an overall settlement was reached between the parties regarding this interconnection dispute, in which parties mutually agreed to drop all claims without any payments. All proceedings have now been formally closed.

Copyright Litigations

The issue of copyrights and neighboring rights to be paid for the distribution of television has, during the last two decades, given rise to a number of litigations. Already in 1994, the Belgian Radio and Television Distributors Association (Beroepsvereniging voor Radio- en Televisiedistributie / Union professionnelle de radio et de télédistribution) (the "RTD", renamed afterwards to "Cable Belgium") was involved in discussions with various copyrights collecting agencies regarding the fees to be paid to the latter for the analogue broadcasting of various television programs. In November 2002, the RTD, together with certain Belgian cable operators (among which Telenet), began reaching settlements with the copyright collecting agencies and broadcasters. Pursuant to those settlement agreements, to which Telenet acceded, Telenet agreed to make certain upfront payments as well as to make increased payments over time. Consequently, in August 2003, Telenet increased the copyright fee it charges its subscribers. In July 2004, the Association for the Collection, Distribution and Protection of the Rights of the Artists, Interpreters and Performers (CVBA Vereniging voor de inning, repartitie en de verdediging van de vertolkende en uitvoerende kunstenaars) ("Uradex", later renamed to "Playright") filed a claim against the RTD for €55 million plus interest concerning neighboring rights owed by the members of the RTD to artists and performers represented by Uradex during the period from August 1994 through the end of July 2004.

After the roll-out of digital television, Telenet started in 2006, a judicial procedure against a number of collection agencies. This procedure is related to a discussion between Telenet and these collection agencies about the legal qualification of (i) simulcast (i.e. channels distributed both in analogue and in digital quality), (ii) direct injection (i.e. channels delivered to the distributor over a non-publicly accessible transmission channel) and (iii) all rights included contracts (i.e. contracts in which broadcasters engage to deliver their signals and programs after having cleared all rights necessary for the communication to the public over the distributor's networks).

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2014

On April 12, 2011, the Court of First Instance of Mechelen rendered a positive judgment in the procedure against Sabam, Agicoa, Uradex and other collection agencies, and as part of this procedure, several collection agencies (Sabam not included) filed counterclaims against Telenet for the payment of the invoices that Telenet disputed. The Court validated Telenet's arguments in each of the claims and counterclaims that were the subject of the procedure and, as a result: (i) no retransmission fees have to be paid by Telenet in case of direct injection of a broadcaster's signal into Telenet's network, (ii) no retransmission fees have to be paid in case of simulcast of an analog and digital signal (and consequently, Telenet does not have to pay extra for the distribution of linear digital television signals) and (iii) all-rights-included contracts are deemed legally valid, which means that if Telenet agrees with a broadcaster that the latter is responsible for clearing all copyrights, Telenet is not liable towards the collection agencies.

The collection agencies however lodged an appeal (cf. *infra*). Since Sabam had not filed any counterclaim for the payment of invoices as part of the aforesaid judgment, on April 6, 2011, Sabam separately initiated judicial proceedings before the Commercial Court of Antwerp, claiming payment by Telenet of invoices relating to (i) fees for a period from January 1, 2005 until December 31, 2010 for Telenet's basic digital television package, and (ii) fee advances for the first semester of 2011 for Telenet's basic and optional digital television packages. The claims mainly relate to (i) direct injection and (ii) all-rights-included contracts. Sabam's claim is based on arguments substantially similar to those rejected by the Court of First Instance of Mechelen on April 12, 2011. Simultaneously, Sabam initiated a summary procedure before the President of the Commercial Court of Antwerp, to receive provisional payment of the contested fees and fee advances. On June 30, 2011, the President of the Commercial Court of Antwerp rendered a positive judgment for Telenet in this procedure. Sabam lodged appeal. On June 27, 2012 the Court of Appeal of Antwerp confirmed this judgment and dismissed the claim in summary proceedings of Sabam.

In the case of the appeal against the judgment of April 12, 2011 of the Court of First Instance of Mechelen, the Court of Appeal of Antwerp has rendered an intermediate ruling on February 4, 2013. This judgment to a large extent confirms the reasoning of the Court of First Instance of Mechelen on the disputed issues (qualification of simulcast and all rights included agreements), but re-opens the procedure in order to allow the parties to provide further proof of their actual claims. On January 20, 2014, Coditel has appealed this intermediate ruling before the Supreme Court ("Hof van Cassatie") mainly because of the incorrect qualification of the fees to be paid for the communication to the public as if it would be "retransmission" rights. On 6 May 2014, Telenet also filed a request with the Supreme Court, arguing that the Antwerp Court of Appeal erroneously qualified direct injection as cable retransmission. Because of these proceedings before the Supreme Court, the proceedings before the Antwerp Court of Appeal were suspended.

Telenet does not expect the ultimate resolution of this matter to have a material impact on its consolidated results of operations or financial condition.

5.24.2 Acquisition of a 50% stake in De Vijver Media

On June 16, 2014, Telenet signed an agreement for the acquisition of 50% of the capital of De Vijver Media NV, a Belgian media company active in free-to-air broadcasting (through its TV channels "VIER" and "VIJF") and content production (through its production company "Woestijnvis"). The 50% stake will be acquired through a combination of share purchases (€26.0 million) and share subscription (€32.0 million). Following completion of the transaction, the existing shareholders Corelio Publishing NV and Waterman & Waterman NV (the company of Wouter Vandenhaute, CEO of De Vijver Media, and his business partner Erik Watté) will each hold 25% in De Vijver Media. Telenet will, together with the existing shareholders, jointly control De Vijver Media. The transaction was approved by the European Commission on February 24, 2015. For additional information, we refer to 5.27 Subsequent events.

5.24.3 Other contingent liabilities

Regulation regarding signal integrity

The Flemish Parliament adopted legislation imposing on distributors strict integrity of broadcasting signals and the requirement to request authorization from broadcasters when contemplating offering *inter alia* recording through an electronic program guide. Broadcasters have argued that the high penetration of

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2014

PVR's in the Flemish market, combined with high ad-skipping as a result, undermines the revenue of broadcasters. The Flemish decree provides that broadcasters and distributors must in first instance try to find a commercial solution. In case the parties concerned cannot find a commercial solution, the Flemish decree provides for a mediation procedure, which, if unsuccessful, can eventually lead to civil litigation. This legislation presents risks that could have a negative impact on the Company's ability to launch new innovative applications and to increase the Company's financial obligations to broadcasters.

Other

In addition to the foregoing items, the Company has contingent liabilities related to matters arising in the ordinary course of business including (i) legal proceedings, (ii) issues involving VAT and wage, property and other tax issues, (iii) disputes over certain contracts and (iv) disputes over programming and copyright fees. While the Company generally expects that the amounts required to satisfy these contingencies will not materially differ from any estimated amounts the Company has accrued, no assurance can be given that the resolution of one or more of these contingencies will not result in a material impact on the Company's results of operations or cash flows in any given period. Due, in general, to the complexity of the issues involved and, in certain cases, the lack of a clear basis for predicting outcomes, the Company cannot provide a meaningful range of potential losses or cash outflows that might result from any unfavorable outcomes.

5.24.4 Operating leases

The Company leases facilities, vehicles and equipment under cancellable and non-cancellable operating leases. The following schedule details, at December 31, 2014 and 2013, the future minimum lease payments under cancellable and non-cancellable operating leases:

Share Repurchase Program 2015

On February 12, 2015, Telenet announced the launch of a share repurchase program (the "Share Repurchase Program 2015"). Under this program, Telenet may acquire from time to time its common stock, to a maximum of 1,100,000 shares, for a maximum consideration of €50.0 million, within a six month period. The share repurchases will be conducted under the terms and conditions approved by the extraordinary general shareholders' meeting of the Company of April 30, 2014. Telenet has mandated an intermediary to

Telenet Group Holding NV

Notes to the Consolidated Financial Statements December 31, 2014

purchase Telenet shares on its behalf. The timing of the repurchase of shares pursuant to the program will be decided by such intermediary independently of Telenet and depend on a variety of factors, including market conditions. All repurchased shares will be held by the Company to cover the Company's obligations under existing stock option plans. European Commission gives Telenet the approval for participation in De Vijver Media

On February 24, 2015, the European Commission gave Telenet its approval for the planned 50% investment in De Vijver Media. In June 2014, Telenet announced its intention to take a participation of 50% in De Vijver Media through an acquisition of Sanoma's share for €26.0 million and an additional €32.0 million capital increase. After the transaction, through their company W&W, Wouter Vandenhaute, CEO of De Vijver Media, and his business partner Erik Watté will keep 25% of the shares of De Vijver Media. Corelio will also keep 25% of the shares in De Vijver Media with Telenet holding the remaining 50%. In order to remove any competition concerns by the European Commission, Telenet, W&W and Corelio have given undertakings to guarantee that the channels of De Vijver Media will remain available to other television providers. Upon the completion of the transaction which occurred on February 27, 2015, Telenet will not consolidate the activities of De Vijver Media but will account for its investment applying the equity method.

Incorporation of Idealabs Telenet Fund

On March 10, 2015, Telenet announced the incorporation of Idealabs Telenet Fund, whereby NIKEVENTURES BVBA and Telenet Service Center BVBA each own 50% of the shares. Idealabs Telenet Fund has been incorporated with the purpose of organizing a start-up incubator and accelerator program. Based on a selection procedure organized by Idealabs Telenet Fund, it is intended that each year up to ten business plans for start-ups will be selected. Idealabs Telenet Fund will pay an amount of €25,000 to the selected founders of these start-ups to incorporate the start-up. Following an additional selection process, Idealabs Telenet Fund will select, for each annual group of start-ups, up to five start-ups which will receive additional funding by Idealabs Telenet Fund in the amount of €50,000 each in the form of a convertible loan. Within a period of four months, the selected start-ups will be offered the opportunity to participate in one or more demo-days and attract third-party investors to invest in the start-ups share capital. In the event such third-party investor is found, Idealabs Telenet Fund will be entitled to convert the €50,000 loan into share capital of the start-up against the issuance of shares.

This report includes our report on the consolidated financial statements as of and for the year ended 31 December 2014, as defined below, as well as our report on other legal and regulatory requirements.

Report on the consolidated financial statements—unqualified opinion

We have audited the consolidated financial statements of Telenet Group Holding NV (“the Company”) and its subsidiaries (jointly “the Group”), prepared in accordance with International Financial Reporting Standards as adopted by the European Union, and with the legal and regulatory requirements applicable in Belgium. These consolidated financial statements comprise the consolidated statement of financial position as at 31 December 2014 and the consolidated statements of profit or loss and other comprehensive income, changes in shareholders' equity and cash flows for the year then ended, and notes, comprising a summary of significant accounting policies and other explanatory information. Statutory auditor's responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing (ISAs). Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the statutory auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the statutory auditor considers internal control relevant to the Group's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the board of directors, as well as evaluating the overall presentation of the consolidated financial statements.

We have obtained from the Company's officials and the board of directors the explanations and information necessary for performing our audit.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our unqualified opinion.

Unqualified opinion

In our opinion, the consolidated financial statements give a true and fair view of the Group's equity and consolidated financial position as at 31 December 2014 and of its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union, and with the legal and regulatory requirements applicable in Belgium.

Report on other legal and regulatory requirements

The board of directors is responsible for the preparation and the content of the annual report on the consolidated financial statements.

In the context of our mandate and in accordance with the Belgian standard which is complementary to the International Standards on Auditing as applicable in Belgium, our responsibility is to verify, in all material respects, compliance with certain legal and regulatory requirements. On this basis, we provide the following additional statement which does not modify the scope of our opinion on the consolidated financial statements:

The annual report on the consolidated financial statements includes the information required by law, is consistent, in all material respects, with the consolidated financial statements and does not present any material inconsistencies with the information that we became aware of during the performance of our mandate.

Such adjustment payments shall be payable by the relevant Lenders and shall be made to the Facility Agent within 5 Business Days following receipt of such notification from the Facility Agent. The Facility Agent shall distribute the adjustment payments received, among the Ancillary Facility Lenders and the Lenders participating in that Revolving Facility in order to satisfy the requirements of paragraph (b) above.
- (f) If at any time following the Acceleration Date, the amounts outstanding under a Revolving Facility of any Lender or related Ancillary Facility Outstandings of any Ancillary Facility Lender used in the Facility Agent's calculation of the adjustments required under paragraph (d) above should vary for any reason (other than as a result of currency exchange fluctuation or other reason which affects all relevant Lenders equally), further adjustment payments shall be made on the same basis (*mutatis mutandis*) provided for in this Clause 7.3 (*Ancillary Facility Default*).
- (g) In respect of any amount paid by any Lender (a "**Paying Lender**") pursuant to either of paragraph (e) or (f) above, as between a relevant Borrower and the Paying Lender, the amount so paid shall be immediately due and payable by such relevant Borrower to the Paying Lender and the payment obligations of such relevant Borrower to the Lender(s) which received such payment shall be treated as correspondingly reduced by the amount of such payment.
- (h) Each Lender shall promptly supply to the Facility Agent such information as the Facility Agent may from time to time request for the purpose of giving effect to this Clause 7.3 (*Ancillary Facility Default*).
- (i) If an Ancillary Facility Lender has the benefit of any Security Interest securing any of its Ancillary Facilities, the realisations from such security when enforced will be treated as an

amount recovered by such Ancillary Facility Lender in its capacity as a Lender which is subject to the sharing arrangements in Clause 33 (*Pro Rata Sharing*) to the intent that such realisation should benefit all Lenders *pro rata*.

- (j) Prior to the application of the provisions of paragraph (b) above, an Ancillary Facility Lender that has provided a Multi-account Overdraft shall set-off any Available Credit Balance on any account comprised in that Multi-account Overdraft.
- (k) All calculations to be made pursuant to this Clause 7.3 (*Ancillary Facility Default*) shall be made by the Facility Agent based upon information provided to it by the Lenders and Ancillary Facility Lenders and using the Euro Amount equivalent where applicable.
- (l) This Clause 7.3 (*Ancillary Facility Default*) shall not oblige any Lender to accept the transfer of a claim relating to an amount outstanding under an Ancillary Facility which is not denominated (pursuant to the relevant Finance Document) in Euro or where the Borrower is not an existing Borrower under the applicable Revolving Facility (excluding that Ancillary Facility).

7.4 Repayment of Ancillary Facilities

- (a) No Ancillary Facility Lender may demand repayment or prepayment of any amounts under its Ancillary Facility unless:
 - (i) the Telenet Additional Facility Commitment in relation to the relevant Revolving Facility has been cancelled in full, or the Facility Agent has declared all amounts outstanding under the relevant Revolving Facility immediately due and payable; or
 - (ii) the Ancillary Facility Outstandings under that Ancillary Facility can be repaid by an Advance under the relevant Revolving Facility (and not less than 7 Business Days' notice (or such shorter period as agreed to by the Company) is given to the relevant Borrower before payment becomes due).
- (b) For the purposes of repaying Ancillary Facility Outstandings (so long as paragraph (a)(i) above does not apply) an Advance under the relevant Revolving Facility may be borrowed irrespective of whether a Default is outstanding or any other applicable condition precedent not being satisfied.
- (c) The share of the Ancillary Facility Lender in an Advance under the relevant Revolving Facility being used to refinance that Ancillary Facility Lender's Ancillary Facility will be that amount which will result (so far as possible) in:
 - (i) the proportion which its share of all amounts outstanding under that Revolving Facility bears to the aggregate amount of the amounts outstanding under that Revolving Facility,
being equal to:
 - (ii) the proportion which its Available Telenet Additional Facility Commitment with respect to that Revolving Facility bears to the aggregate of the Available Telenet Additional Facility Commitments with respect to that Revolving Facility,in each case, assuming the repayment of the relevant Ancillary Facility has taken place. The share of the other Lenders in any such Advance under that Revolving Facility will be adjusted accordingly.

7.5 Continuation of Ancillary Facilities

- (a) An Ancillary Facility Lender may agree with a Borrower, as between themselves only, to continue to provide the same banking facilities following the Final Maturity Date applicable to a Revolving Facility or, as the case may be, the Telenet Additional Facility Commitments in relation to a Revolving Facility are cancelled under this Agreement.
- (b) If any arrangement contemplated in paragraph (a) above is to occur, the relevant Borrower and the Ancillary Facility Lender shall each confirm that to be the case in writing to the Facility Agent. Upon such Final Maturity Date or, as the case may be, date of cancellation, any such facility shall continue as between the said entities on a bilateral basis and not as part

of, or under, the Finance Documents. Save for any rights and obligations against any Finance Party under the Finance Documents prior to such Final Maturity Date or, as the case may be, date of cancellation, no such rights or obligations in respect of such Ancillary Facility shall, as between the Finance Parties, continue and the Security shall not support any such facility in respect of any matters that arise after such Final Maturity Date or, as the case may be, date of cancellation.

7.6 Affiliates of Lenders as Ancillary Facility Lenders

- (a) Subject to the terms of this Agreement, an Affiliate of a Lender may become an Ancillary Facility Lender. In such case, the Lender and its Affiliate shall be treated as a single Lender whose Telenet Additional Facility Commitment in relation to a relevant Revolving Facility is the amount set out opposite the relevant Lender's name in the relevant Telenet Additional Facility Accession Agreement and/or the amount of any relevant Telenet Additional Facility Commitment transferred to or assumed by that Lender under this Agreement, to the extent (in each case) not cancelled, reduced or transferred by it under this Agreement (as applicable). For the purposes of calculating the Lender's Available Telenet Additional Facility Commitment with respect to the relevant Revolving Facility, the Lender's Commitment shall be reduced to the extent of the aggregate of the Ancillary Facility Commitments of its Affiliates.
- (b) The Company shall specify any relevant Affiliate of a Lender in any Conversion Notice delivered by the Company to the Facility Agent pursuant to Clause 7.1 (*Utilisation of Ancillary Facilities*).
- (c) An Affiliate of a Lender which becomes an Ancillary Facility Lender shall accede to this Agreement as an Ancillary Facility Lender, and the Intercreditor Agreement as a Senior Lender (as defined in the Intercreditor Agreement).
- (d) If a Lender assigns all of its rights and benefits or transfers all of its rights and obligations to a New Lender (in accordance with Clause 28.7 (*Changes to the Parties*)), its Affiliate shall cease to have any obligations under this Agreement or any Ancillary Facility Document.
- (e) Where this Agreement or any other Finance Document imposes an obligation on an Ancillary Facility Lender and the relevant Ancillary Facility Lender is an Affiliate of a Lender which is not a party to that document, the relevant Lender shall ensure that the obligation is performed by its Affiliate.

7.7 Affiliates of Borrowers

- (a) Subject to the terms of this Agreement, an Affiliate of a Borrower that is a member of the Group may with the approval of the relevant Ancillary Facility Lender become a Borrower with respect to an Ancillary Facility.
- (b) The Company shall specify any relevant Affiliate of the Borrower in any Conversion Notice delivered by the Company to the Facility Agent pursuant to Clause 7.1 (*Utilisation of Ancillary Facilities*).
- (c) If any Borrower ceases to be a Borrower under this Agreement in accordance with Clause 28.7 (*Changes to the Parties*), its Affiliate shall cease to have any rights under this Agreement or any Ancillary Facility Document.
- (d) Where this Agreement or any other Finance Document imposes an obligation on a Borrower under an Ancillary Facility and the relevant Borrower is an Affiliate of a Borrower which is not a party to that document, the relevant Borrower shall ensure that the obligation is performed by its Affiliate.
- (e) Any reference in this Agreement or any other Finance Document to a Borrower being under no obligations (whether actual or contingent) as a Borrower under such Finance Document shall be construed to include a reference to any Affiliate of a Borrower being under no obligations under any Finance Document or Ancillary Facility Document.

8. OPTIONAL CURRENCIES

8.1 Selection of Currency

Each Borrower under a Telenet Additional Facility that is a Revolving Facility shall select the currency of the Advance made to it (which shall be Euro, U.S. Dollars or an Optional Currency) in the Request relating to the relevant Advance.

8.2 Unavailability of Optional Currency

(a) If before the Specified Time on the Quotation Date for the relevant Advance:

- (i) a Lender notifies the Facility Agent that the relevant Optional Currency is not readily available to it in the amount required; or
- (ii) a Lender notifies the Facility Agent that compliance with its obligation to participate in the Advance in the proposed Optional Currency would contravene a Law or regulation applicable to it,

the Facility Agent will give notice to the relevant Borrower to that effect by the Specified Time. In this event, any Lender that gives notice pursuant to this Clause 8.2 (*Unavailability of Optional Currency*) will be required to participate in the relevant Advance in Euros (in an amount equal to that Lender's Pro Rata Share of the Euro Amount of the relevant Advance (as applicable) or, in respect of a Rollover Advance, an amount equal to that Lender's Pro Rata Share of the Euro Amount of any amount that the Lenders are actually required to advance in accordance with Clause 9.2 (*Rollover Advances*)), and its participation will be treated as a separate Advance denominated in Euros during that Term.

8.3 Any part of an Advance treated as a separate Advance under this Clause 8 (*Optional Currencies*) will not be taken into account for the purposes of any limit on the number of Advances or currencies outstanding at any one time.

9. REPAYMENT

9.1 Repayment of Advances

Each Advance will be repaid on such dates as the Company and the Telenet Additional Facility Lenders may agree in the Telenet Additional Facility Accession Agreement relating to that Advance.

9.2 Rollover Advances

Without prejudice to each Borrower's obligation to repay the full amount of each Advance in relation to a Revolving Facility made to it on the last day of the Term for that Advance, where, on the same day on which such Borrower is due to repay an Advance in relation to a Revolving Facility (a "**Maturing Advance**") such Borrower has also requested that one or more Advances in relation to that Revolving Facility in the same currency as and in an amount which is equal to or less than the Maturing Advance be made to it (a "**Rollover Advance**"), subject to the Lenders being obliged to make such Rollover Advance under Clause 4.2 (*Further Conditions Precedent*), the aggregate amount of the Rollover Advance shall be treated as if applied in or towards repayment of the Maturing Advance so that:

- (a) if the amount of the Maturing Advance exceeds the aggregate amount of the Rollover Advance:
 - (i) the relevant Borrower will only be required to pay an amount in cash in the relevant currency equal to that excess; and
 - (ii) each Lender's participation (if any) in the Rollover Advance shall be treated as having been made available and applied by the Borrower in or towards repayment of that Lender's participation (if any) in the Maturing Advance and that Lender will not be required to make its participation in the Rollover Advance available in cash; and
- (b) if the amount of the Maturing Advance is equal to or less than the aggregate amount of the Rollover Advance:
 - (i) the relevant Borrower will not be required to make any payment in cash; and

- (ii) each Lender will be required to make its participation in the Rollover Advance available in cash only to the extent that its participation (if any) in the Rollover Advance exceeds that Lender's participation (if any) in the Maturing Advance and the remainder of that Lender's participation in the Rollover Advance shall be treated as having been made available and applied by the Borrower in or towards repayment of that Lender's participation in the Maturing Advance.

9.3 Cash Collateralisation of Documentary Credits

- (a) If not previously repaid in accordance with paragraph (b) below, each Borrower must repay each Documentary Credit issued on its behalf in full on the date stated in that Documentary Credit to be its Expiry Date.
- (b) A Borrower may give the Facility Agent not less than five Business Days prior written notice of its intention to repay all or any portion of a Documentary Credit requested by it prior to its stated Expiry Date and, having given such notice, shall procure that the relevant Outstanding L/C Amount in respect of such Documentary Credit is reduced in accordance with such notice by providing cash cover therefor in accordance with Clause 1.2(a)(xvii) (*Construction*) (in each case) or by reducing the Outstanding L/C Amount of such Documentary Credit or by cancelling such Documentary Credit and returning the original to the relevant L/C Bank or the Facility Agent on behalf of the Lenders.

10.1 Mandatory Prepayment—Illegality

 - (iii) third in repayment of the Ancillary Facility Outstandings in such proportion as may be specified to the Facility Agent by the Company not less than two Business Days before the date on which the prepayment is due to be made and against all the outstanding Ancillary Facility Outstandings made under the relevant Ancillary Facility *pro rata*,

in each case with a corresponding permanent cancellation of the relevant Commitments (*pro rata* between the Commitments of the Lenders under the relevant Facility).

- (b) Unless the relevant Borrower makes an election under paragraph (d) below or notifies the Facility Agent that it intends to reinvest the Net Proceeds in assets in the Business of the Group in accordance with Clause 10.3 (*Mandatory Prepayment from Disposal Proceeds*), it shall prepay Advances promptly upon receipt of the Net Proceeds of the disposal.
- (c) If the Company does not give a notice to the Facility Agent specifying how amounts are to be applied in prepayment under Clause 10.3 (*Mandatory Prepayment from Disposal Proceeds*) within the time period specified in paragraph (a) above, the amount of the relevant prepayment shall be applied against all outstanding Term Facility Advances *pro rata* in accordance with paragraph (a) above.
- (d) Subject to paragraph (e) below, a Borrower may elect that any prepayment under Clause 10.3 (*Mandatory Prepayment from Disposal Proceeds*) be applied in prepayment of an Advance on the last day of the Term relating to that Advance.  - (i) disregard any undrawn Commitment of any Lender which is due to be cancelled pursuant to any Active Cancellation Notice in existence at that time; and
 - (ii) disregard the outstanding Advances of any Lender which are due to be prepaid in accordance with any Active Cancellation Notice in existence at that time,

provided that, notwithstanding the irrevocable nature of an Active Cancellation Notice, to the extent that any such prepayment is not made on the date specified in the corresponding Active Cancellation Notice then the amount of the relevant outstanding Advances shall not be disregarded and the rights of the applicable Lender(s) to participate in the relevant voting process shall be fully reinstated with retroactive effect from the date of the corresponding Active Cancellation Notice.

10.8 Right of Repayment and Cancellation of a Single Lender

 - (2) give the Facility Agent notice of cancellation of that Lender's Commitment and the Company's intention to procure the repayment of that Lender's participation in the Utilisation, whereupon the Commitment of that Lender shall immediately be reduced to zero;
 - (B) if the circumstance relates to an Ancillary Facility Lender, the Company may give the Facility Agent notice of cancellation of that Ancillary Facility Lender's Ancillary Facility Commitment and the Company's intention to procure the repayment of the utilisations of any Ancillary Facility granted by that Ancillary Facility Lender, whereupon the Ancillary Facility Commitment of that Ancillary Facility Lender shall immediately be reduced to zero; and
 - (C) if the circumstance relates to an L/C Bank, the Company may give the Facility Agent notice of repayment of any outstanding Documentary Credit issued by such L/C Bank and cancellation of the appointment of such L/C Bank as an L/C Bank under this Agreement in relation to any Documentary Credit to be issued in the future or the provision of full cash cover in respect of such L/C Bank's maximum contingent liability under each outstanding Documentary Credit.
- (b) On the last day of each Term which ends after the Company has given notice under paragraph (a)(iii)(A)(2), (a)(iii)(B) or (a)(iii)(C) above (or, if earlier, the date specified by the Company in that notice), each Borrower to which a Utilisation or utilisation of an Ancillary Facility is outstanding shall repay that Lender's participation in that Utilisation or the utilisation of the Ancillary Facility granted by that Ancillary Facility Lender (together with all interest and other amounts accrued under the Finance Documents) or, as the case may be, provide full cash cover in respect of any Documentary Credit issued by that L/C Bank or any contingent liability under an Ancillary Facility.
- (c) The Company may only exercise its rights under paragraph (a) above if:
- (i) in the case of paragraphs (a)(i) and (a)(ii) above, the circumstance giving rise to the requirement or indemnification continues or, in the case of (a)(iii) no more than 90 days have elapsed since the relevant invoking of Clause 13.3 (*Market Disruption*) or Clause 10.1 (*Mandatory Prepayment—Illegality*); and
 - (ii) it gives the Facility Agent and the relevant Lender not less than five Business Days prior notice.
- (d) The replacement of a Lender pursuant to paragraph (a)(iii)(A)(1) above shall be subject to the following conditions:
- (i) no Finance Party shall have any obligation to find a replacement Lender;
 - (ii) any replaced Lender shall not be required to refund, or to pay or surrender to any other Lender, any of the fees or other amounts received by that replaced Lender under any Finance Document; and
 - (iii) any replacement of a Lender which is the Facility Agent shall not affect its role as the Facility Agent.

10.9 Right of Cancellation in Relation to a Defaulting Lender

Without prejudice to the Company's rights under Clause 2.1 (*Increase*):

- (a) If any Lender becomes a Defaulting Lender, the Company may, at any time whilst the Lender continues to be a Defaulting Lender, give the Facility Agent three Business Days' notice of cancellation of each Available Commitment of that Lender.

- (b) On the notice referred to in paragraph (a) above becoming effective, each Available Commitment of the Defaulting Lender shall immediately be reduced to zero.
- (c) The Facility Agent shall as soon as practicable after receipt of a notice referred to in paragraph (a) above, notify all the Lenders.

10.10 Miscellaneous Provisions

- (a) Any notice of prepayment given by a Borrower pursuant to Clause 10.5 (*Voluntary Prepayment*) or Clause 10.8 (*Right of Repayment and Cancellation of a Single Lender*) and a notice of cancellation pursuant to Clause 10.7 (*Voluntary Cancellation*) shall be irrevocable, shall specify the date upon which such prepayment is to be made and the amount of such prepayment and shall oblige that Borrower to make such prepayment on such date, provided that a notice of prepayment or cancellation may be conditional and not irrevocable provided that the Company or a Borrower shall within 10 Business Days' notice from the Facility Agent indemnify any Lender in respect, and in the amount, of such Lender's Break Costs as specified in such notice should cancellation or prepayment not occur on the date specified in the notice of cancellation or prepayment.
- (b) All prepayments under this Agreement must be made with accrued interest on the amount prepaid. No premium or penalty is payable in respect of any prepayment except for Break Costs.
- (c) No prepayment or cancellation is allowed except in accordance with the express terms of this Agreement.
- (d) A Lender for whose account a repayment is to be made under Clause 10.8 (*Right of Repayment and Cancellation of a Single Lender*) shall not be obliged to participate in the making of Advances (including Advances under any Revolving Facility) or in the issue or counter-guarantee in respect of Documentary Credits or in the provision of Ancillary Facilities on or after the date upon which the Facility Agent receives the relevant notice of intention to repay such Lender's share of the Telenet Additional Facility Outstandings, on which date all of such Lender's Available Commitments shall be cancelled and all of its Commitments shall be reduced to zero.
- (e) No amount of an Advance prepaid under this Agreement may subsequently be re-borrowed other than an Advance or any Documentary Credit in relation to a Revolving Facility repaid in accordance with this Agreement. For the avoidance of doubt, unless expressly agreed to the contrary in the relevant Ancillary Facility Documents, this paragraph (e) shall not apply to any Ancillary Facility.
- (f) No amount of the Total Telenet Additional Facility Commitments cancelled under this Agreement may subsequently be reinstated.
- (g) Any partial prepayment of an Advance will be applied against the participations of the Lenders in that Advance *pro rata*.

11. INTEREST

11.1 Calculation of Interest

The rate of interest on each Advance for each Term is the percentage rate per annum equal to the aggregate of the applicable:

- (a) Margin; and
- (b) EURIBOR or LIBOR (as applicable).

11.2 Payment of Interest

Except where it is provided to the contrary in this Agreement, each Borrower must pay accrued interest on each Advance made to it on the last day of each Term and also, if the Term is longer than six months, on the dates falling at six-monthly intervals after the first day of that Term.

11.3 Interest on Overdue Amounts

- (a) If an Obligor fails to pay any amount payable by it under the Finance Documents, it must immediately on demand by the Facility Agent pay interest on the overdue amount from its due date up to the date of actual payment, both before, on and after judgment.
- (b) Interest on an overdue amount is payable at a rate determined by the Facility Agent to be one per cent. per annum above the rate which would have been payable if the overdue amount had, during the period of non-payment, constituted an Advance in the currency of the overdue amount. For this purpose, the Facility Agent may (acting reasonably):
 - (i) select successive Terms of any duration of up to three months; and
 - (ii) determine the appropriate Quotation Date for that Term.
- (c) Notwithstanding paragraph (b) above, if the overdue amount is a principal amount of an Advance and becomes due and payable before the last day of its current Term, then:
 - (i) the first Term for that overdue amount will be the unexpired portion of that Term; and
 - (ii) the rate of interest on the overdue amount for that first Term will be one per cent. per annum above the rate then payable on that Advance.

After the expiry of the first Term for that overdue amount, the rate on the overdue amount will be calculated in accordance with paragraph (b) above.
- (d) Interest (if unpaid) on an overdue amount will be compounded with that overdue amount at the end of each of its Terms but will remain immediately due and payable.

11.4 Notification of Rates of Interest

The Facility Agent must promptly notify each relevant Party of the determination of a rate of interest under this Agreement.

11.5 Selection—Term Facility

- (a) Each Term Facility Advance has successive Terms.
- (b) A Borrower must select the first Term for a Term Facility Advance in the relevant Request and each subsequent Term in an irrevocable notice received by the Facility Agent not later than 10.00 am three Business Days before the first day of that subsequent Term. Each Term for a Term Facility Advance will start on its Utilisation Date or on the expiry of its preceding Term.
- (c) If a Borrower fails to select a Term for an outstanding Term Facility Advance under paragraph (b) above, that Term will, subject to the other provisions of this Clause 11.5 (*Selection—Term Facility*), be three months.
- (d) Each Term for a Term Facility Advance will be one, two, three or six months or:
 - (i) any shorter period agreed by the Company and the Facility Agent and, in relation to the first Term for a Term Facility Advance only, any other period of six months or less agreed by the Company and the Facility Agent; or
 - (ii) any longer period of up to 12 months agreed by the Company and the Lenders whose commitments under the relevant Facility then aggregate two thirds or more of the aggregate Commitments under that Facility.

11.6 Selection—Revolving Facility

- (a) Each Advance under a Revolving Facility has one Term only.
- (b) A Borrower must select the Term for an Advance under a Revolving Facility in the relevant Request.
- (c) Each Term for an Advance under a Revolving Facility will be for a period of any number of days from and including 1 day to and including 30 days or 1, 2, 3 or 6 months or such other period of up to 12 months as Lenders whose Commitments under that Revolving Facility then

aggregate two thirds or more of the aggregate Commitments under that Revolving Facility may agree with the Company prior to submission of the relevant Request provided that such period shall end on or before the Final Maturity Date in respect of that Revolving Facility.

- (d) Each Term for an Advance under a Revolving Facility will commence on its Utilisation Date.

11.7 Consolidation—Term Facility Advances

Unless a Borrower otherwise requests, a Term for a Term Facility Advance will end on the same day as the current Term for any other Term Facility Advance denominated in the same currency as that Term Facility Advance and borrowed by that Borrower under the same Facility. On the last day of those Terms, those Term Facility Advances will be consolidated and treated as one Term Facility Advance under the relevant Facility.

11.8 No Overrunning the Final Maturity Date

If a Term in respect of an Advance under a Facility would otherwise overrun the Final Maturity Date for that Facility, it will be shortened so that it ends on the Final Maturity Date for that Facility.

11.9 Other Adjustments

The Facility Agent and the Company may enter into such other arrangements as they may agree for the adjustment of Terms and the consolidation and/or splitting of Advances under a Facility.

11.10 Notification

The Facility Agent must notify each relevant Party of the duration of each Term promptly after ascertaining its duration.

12. TAXES

12.1 General

- (a) In this Clause 12 (*Taxes*) “**Tax Credit**” means a credit against any Tax or any relief or remission for Tax (or its repayment).
- (b) In this Clause 12 (*Taxes*) a reference to “**determines**” or “**determined**” means a determination made in the absolute discretion of the person making the determination acting reasonably and in good faith.

12.2 Tax Gross-up

- (a) Each Obligor must make all payments to be made by it under the Finance Documents without any Tax Deduction, unless a Tax Deduction is required by law.
- (b) If:
 - (i) a Lender is not, or ceases to be, a Qualifying Lender; or
 - (ii) an Obligor or a Lender is aware that an Obligor must make a Tax Deduction (or that there is a change in the rate or the basis of a Tax Deduction),it must promptly notify the Facility Agent. The Facility Agent must then promptly notify the affected Parties.
- (c) Except as provided below, if a Tax Deduction is required by law to be made by an Obligor or the Facility Agent, the amount of the payment due from the Obligor will be increased to an amount which (after making the Tax Deduction) leaves an amount equal to the payment which would have been due if no Tax Deduction had been required.
- (d) Except as provided below, an Obligor is not required to make an increased payment under paragraph (c) above to a Lender that is not, or has ceased to be, a Qualifying Lender in respect of that Obligor in excess of the amount that the Obligor would have had to pay had the Lender been, or not ceased to be, a Qualifying Lender in respect of that Obligor.
- (e) Paragraph (d) above will not apply if the Lender has ceased to be a Qualifying Lender by reason of any change after the date it became a Lender under this Agreement in (or in the interpretation, administration, or application of) any law or double taxation agreement or Double Tax Treaty or any published practice or concession of any relevant taxing authority.

- (f) If an Obligor is required to make a Tax Deduction, that Obligor must make the minimum Tax Deduction allowed by law and must make any payment required in connection with that Tax Deduction within the time allowed by law.
- (g) Within 30 days of making either a Tax Deduction or a payment required in connection with a Tax Deduction, the Obligor making that Tax Deduction must deliver to the Facility Agent for the relevant Finance Party evidence satisfactory to that Finance Party (acting reasonably) that the Tax Deduction has been made or (as applicable) the appropriate payment has been paid to the relevant taxing authority.
- (h) Each party may make any FATCA Deduction it is required to make by FATCA, and any payment required in connection with that FATCA Deduction. No party shall be required to increase any payment in respect of which it makes such a FATCA Deduction or otherwise compensate the recipient of the payment for that FATCA Deduction.

12.3 Lender Tax Status

- (a) The Finance Parties and the Borrowers shall co-operate in good faith in completing any procedural steps (including, but not limited to, giving any required confirmation or providing any relevant information) necessary for the Borrowers to make payments to the Finance Party without any withholding or deduction for any Taxes. In particular, the Borrowers agree to provide such information in respect of itself as may be reasonably requested by the Finance Parties in writing in order for the Finance Parties to comply with any administrative formalities required for the Finance Parties to be exempt from withholding or deduction for any Taxes under any applicable international treaty.
- (b) Similarly, each Finance Party undertakes to provide any tax certificate or other document as may be reasonably requested by the Borrower in writing in order for the Borrower to be exempt from withholding or deduction for any Taxes under any applicable international treaty.
- (c) Each Finance Party shall confirm whether it is entitled to receive payments under the Finance Documents free from withholding under FATCA and shall provide any documentation, forms and other information relating to its status under FATCA reasonably requested by the Facility Agent or the Borrower sufficient for the Facility Agent and a Borrower to comply with their obligations under FATCA and to determine whether such Finance Party has complied with such applicable reporting requirements.
- (d) Each Lender shall represent and warrant to the Facility Agent and to the Borrower that, as at the relevant Transfer Date or the date of the relevant Telenet Additional Facility Accession Agreement, it is a Qualifying Lender as the same shall be expressly indicated in the relevant Transfer Certificate or Telenet Additional Facility Accession Agreement.
- (e) Notwithstanding Clause 29.3 (*Transfers by Lenders*), no Lender shall be permitted to enter into a Telenet Additional Facility Accession Agreement with any Borrower which is incorporated in Belgium if, as a result of the entry into such Telenet Additional Facility Accession Agreement, any Obligor would be required to make a Tax Deduction unless such Lender has obtained the prior written consent of the Company.

12.4 Tax Indemnity

- (a) Except as provided below, the Company must indemnify (within ten Business Days of written demand by the Facility Agent) a Finance Party against any loss or liability which that Finance Party (in its absolute discretion) determines will be or has been suffered (directly or indirectly) by that Finance Party for or on account of Tax in relation to a payment received or receivable (or any payment deemed to be received or receivable) under a Finance Document. Such Finance Party shall within five Business Days of any request by the Company provide to the Company reasonable written details explaining the loss, liability or cost and the calculation of the amount claimed by the Finance Party.

- (b) Paragraph (a) above does not apply:
 - (i) with respect to any Tax assessed on a Finance Party:
 - (A) under the laws of the jurisdiction in which that Finance Party is incorporated or, if different, the jurisdiction (or jurisdictions) in which that Finance Party has a Facility Office and is treated as resident for tax purposes; or
 - (B) under the laws of the jurisdiction in which that Finance Party's Facility Office is located in respect of amounts received or receivable in that jurisdiction, if that Tax is imposed on or calculated by reference to the net income received or receivable by that Finance Party. However, any payment deemed to be received or receivable, including any amount treated as income but not actually received by the Finance Party, such as a Tax Deduction, will not be treated as net income received or receivable for this purpose; and
 - (ii) to the extent a loss, liability or cost:
 - (A) is compensated for by an increased payment under Clause 12.2 (*Tax Gross-up*);
 - (B) would have been compensated for by an increased payment under Clause 12.2 (*Tax Gross-up*) but was not so compensated solely because one of the exclusions in paragraph (d) of Clause 12.2 (*Tax Gross-up*) applied;
 - (C) relates to a FATCA Deduction required to be made by a Party; or
 - (D) is suffered or incurred by a Finance Party in respect of a Bank Levy.
 - (c) A Finance Party making, or intending to make, a claim under paragraph (a) above must promptly notify the Facility Agent of the event which will give, or has given, rise to the claim, following which the Facility Agent shall promptly provide such information to the Company.
 - (d) A Finance Party shall, on receiving a payment from an Obligor under this Clause 12.4 (*Tax Indemnity*), notify the Facility Agent.

12.5 Tax Credit

If an Obligor makes a Tax Payment and the relevant Finance Party (in its absolute discretion) determines that:

- (a) a Tax Credit is attributable to that Tax Payment; and
- (b) it has used and retained that Tax Credit,

the Finance Party must pay an amount to the Obligor which that Finance Party determines (in its absolute discretion) will leave it (after that payment) in the same after-tax position as it would have been if the Tax Payment had not been required to be made by the Obligor.

12.6 U.S. Taxes

A U.S. Borrower shall not be required to pay any additional amount pursuant to Clause 12.2 (*Tax Gross-up*) in respect of Taxes of the United States or any political subdivision thereof which arise or are imposed as a result of the failure of a Lender to provide the forms described in paragraph (a) or (b) below, or a connection of a Lender as described in paragraph (c) below, with respect to a sum payable by it pursuant to this Agreement to a Lender if on the date such Lender becomes a Party to this Agreement or has designated a new Facility Office either:

- (a) in the case of a Lender which is not a U.S. person,
 - (i) such Lender has not provided the Borrower with two accurate and complete original signed copies including all necessary attachments of (i) U.S. Internal Revenue Service Form W-8BEN (or successor form), (ii) U.S. Internal Revenue Service Form W 8ECI (or successor form), or (iii) (if appropriate) Internal Revenue Service Form W-8IMY, certifying, in each case, to such Lender's entitlement as of such date to a complete exemption from United States withholding with respect to all amounts payable pursuant to the Finance Documents; or

- (ii) after the date such Lender becomes a Party to this Agreement, when a lapse in time or change in circumstances renders the previous certification of such Lender made pursuant to paragraph (a)(i) above obsolete or inaccurate, such Lender has not delivered to the Company two new accurate and complete original signed copies of U.S. Internal Revenue Service Form W-8ECI or Form W-8BEN, as the case may be, and such other forms as may be required in order to confirm or establish the entitlement of such Lender to a continued exemption from United States withholding tax with respect to amounts payable pursuant to the Finance Documents;
- (b) in the case of a Lender which is a U.S. Person:
 - (i) such Lender has not provided the Borrower with two accurate and complete original signed copies, including all necessary attachments, of U.S. Internal Revenue Service Form W-9 (or successor form); or
 - (ii) after the date such Lender becomes a Party to this Agreement, when a lapse in time or change in circumstances renders the previous certification of such Lender made pursuant to paragraph (b)(i) above obsolete or inaccurate, such Lender has not delivered to the Company two new accurate and complete original signed copies of U.S. Internal Revenue Service Form W-9, as the case may be, and such other forms as may be required in order to confirm or establish the entitlement of such Lender to a continued exemption from United States withholding tax with respect to amounts payable pursuant to the Finance Documents; or
- (c) such Lender is subject to such Tax by reason of any connection between the jurisdiction imposing such Tax and the Lender or its Facility Office other than a connection arising solely from this Agreement or any transaction contemplated hereby.

12.7 Stamp Taxes

The Company shall pay and, within 10 Business Days of demand, indemnify each Finance Party against any cost, loss or liability which that Finance Party incurs in relation to all stamp duty, registration and other similar Tax liabilities payable in respect of any Finance Document (other than those imposed by reason of any assignment or novation by any Finance Party).

12.8 Value Added Taxes

- (a) All consideration expressed to be payable under a Finance Document by any Party to a Finance Party shall be deemed to be exclusive of any VAT and no Party shall exercise any potential option for waiving a VAT exemption. Subject to paragraph (b) below, if VAT is chargeable on any supply made by any Finance Party to any Party in connection with a Finance Document, that Party shall pay to the Finance Party (in addition to and at the same time as paying the consideration) an amount equal to the amount of the VAT, unless the VAT charge is caused by the Finance Party's option to waive a VAT exemption, and in either case concurrently against the issue of an appropriate invoice.
- (b) If VAT is or becomes chargeable on any supply made by any Finance Party (the "**Supplier**") to any other Finance Party (the "**Recipient**") in connection with a Finance Document, and any Party other than the Recipient (the "**Subject Party**") is required by the terms of any Finance Document to pay an amount equal to the consideration for such supply to the Supplier (rather than being required to reimburse or indemnify the Recipient in respect of that consideration),
 - (i) if the Supplier is required to account to the relevant tax authority for the VAT, the Subject Party must also pay to the Supplier and, (ii) if the Recipient is required to account to the relevant tax authority for the VAT the Subject Party must pay to the Recipient, (in addition to and at the same time as paying such amount) an amount equal to the amount of such VAT. Where paragraph (i) applies, the Recipient must promptly pay to the Subject Party an amount equal to any credit or repayment obtained by the Recipient from the relevant tax authority which the Recipient reasonably determines is in respect of the VAT chargeable on that supply. Where paragraph (ii) applies, the Subject Party must only pay to the Recipient an amount equal to the amount of such VAT to the extent that the Recipient reasonably determines that it is not entitled to a credit or repayment from the relevant tax authority in respect of that VAT.

- (c) Where a Finance Document requires any Party to reimburse a Finance Party for any costs or expenses, that Party shall also at the same time pay and indemnify the Finance Party for the full amount of such costs and expenses including such costs that represent VAT incurred by the Finance Party in respect of the costs or expenses to the extent that the Finance Party reasonably determines that it is not entitled to credit or repayment from the relevant tax authority in respect of the VAT.
- (d) Any reference in this Clause 12.8 (*Value Added Taxes*) to any Party shall, at any time when such Party is treated as a member of a group including but not limited to any fiscal unities for VAT purposes, include (where appropriate and unless the context otherwise requires) a reference to the representative member of such group at such time (the term “**representative member**” to have the same meaning as in the relevant legislation of any jurisdiction having implemented Council Directive 2006/112/EC on the common system of value added tax).
- (e) If VAT is chargeable on any supply made by a Finance Party to any Party under a Finance Document and if reasonably requested by such Finance Party, that Party must give the Finance Party details of its VAT registration number and any other information as is reasonably requested in connection with the Finance Party’s reporting requirements for the supply and at such time that the Finance Party may reasonably request it.
- (f) Where a Borrower is required to make a payment under paragraph (b) above, such amount shall not become due until the relevant Borrower has received a formal invoice detailing the amount to be paid.

12.9 Confirmation by Lenders

Each Lender as at the date of this Agreement hereby confirms that, as at the date of this Agreement, it is a Qualifying Lender.

13. MARKET DISRUPTION AND ALTERNATIVE INTEREST RATES

13.1 Unavailability of Screen Rate

- (a) *Interpolated Screen Rate*: If no Screen Rate is available for LIBOR or, if applicable, EURIBOR for the Term of an Advance, the applicable LIBOR or EURIBOR shall be the Interpolated Screen Rate for a period equal in length to the Term of that Advance.
- (b) *Shortened Term*: If no Screen Rate is available for LIBOR or, if applicable, EURIBOR for:
 - (i) the currency of an Advance; or
 - (ii) the Term of an Advance and it is not possible to calculate the Interpolated Screen Rate,
 the Term of that Advance shall (if it is longer than the applicable Fallback Term) be shortened to the applicable Fallback Term and the applicable LIBOR or EURIBOR for that shortened Term shall be determined pursuant to the definition of “**LIBOR**” or “**EURIBOR**” as applicable.
- (c) *Shortened Term and Historic Screen Rate*: If the Term of an Advance is, after giving effect to paragraph (b) above, either the applicable Fallback Term or shorter than the applicable Fallback Term and, in either case, no Screen Rate is available for LIBOR or, if applicable EURIBOR for:
 - (i) the currency of that Advance; or
 - (ii) the Term of that Advance and it is not possible to calculate the Interpolated Screen Rate,
 the applicable LIBOR or EURIBOR shall be the Historic Screen Rate for that Advance.
- (d) *Shortened Term and Interpolated Historic Screen Rate*: If paragraph (c) above applies but no Historic Screen Rate is available for the Term of that Advance, the applicable LIBOR or EURIBOR shall be the Interpolated Historic Screen Rate for a period equal in length to the Term of that Advance.
- (e) *Reference Bank Rate*: If paragraph (d) above applies but it is not possible to calculate the Interpolated Historic Screen Rate, the Term of that Advance shall, if it has been shortened

pursuant to paragraph (b) above, revert to its previous length and the applicable LIBOR or EURIBOR shall be the Reference Bank Rate as of the Specified Time for the currency of that Advance and for a period equal in length to the Term of that Advance.

- (f) *Alternative Reference Bank Rate*: If paragraph (e) above applies but no Reference Bank Rate is available for the relevant currency or Term the applicable LIBOR or EURIBOR shall be the Alternative Reference Bank Rate as of the Specified Time for the currency of that Advance and for a period equal in length to the Term of that Advance.
- (g) *Cost of funds*: If paragraph (f) above applies but no Alternative Reference Bank Rate is available for the relevant currency or Term there shall be no LIBOR or EURIBOR for that Advance and Clause 13.4 (*Cost of funds*) shall apply to that Advance for that Term.

13.2 Calculation of Reference Bank Rate and Alternative Reference Bank Rate

- (a) Subject to paragraph (b) below, if LIBOR or EURIBOR is to be determined on the basis of a Reference Bank Rate but a Reference Bank does not supply a quotation by the Specified Time the Reference Bank Rate shall be calculated on the basis of the quotations of the remaining Reference Banks.
- (b) If at or about noon on the Quotation Date none or only one of the Reference Banks supplies a quotation, there shall be no Reference Bank Rate for the relevant Term.
- (c) Subject to paragraph (d) below, if LIBOR or EURIBOR is to be determined on the basis of an Alternative Reference Bank Rate but an Alternative Reference Bank does not supply a quotation by the Specified Time, the Alternative Reference Bank Rate shall be calculated on the basis of the quotations of the remaining Alternative Reference Banks.
- (d) If before close of business in London on the date falling one Business Day after the Quotation Date none or only one of the Alternative Reference Banks supplies a quotation, there shall be no Alternative Reference Bank Rate for the relevant Term.

13.3 Market disruption

- (a) If LIBOR or, if applicable, EURIBOR is determined otherwise than on the basis of an Alternative Reference Bank Rate and before close of business in London on the Quotation Date for the relevant Term, the Facility Agent receives notifications from a Lender or Lenders (whose participations in an Advance exceed 40 per cent. of that Advance) that the cost to it of funding its participation in that Advance from whatever source it may reasonably select would be in excess of LIBOR or, if applicable, EURIBOR then the applicable LIBOR or EURIBOR shall be the Alternative Reference Bank Rate as of the Specified Time for the currency of the Advance and for a period equal in length to the Term of that Advance and if no Alternative Reference Bank Rate is available for the relevant currency or Term there shall be no LIBOR or EURIBOR for that Advance and Clause 13.4 (*Cost of funds*) shall apply to that Advance for the relevant Term.
- (b) If LIBOR or, if applicable, EURIBOR is determined on the basis of an Alternative Reference Bank Rate and before close of business in London on the date falling one Business Day after the Quotation Date for the relevant Term of the Advance the Facility Agent receives notifications from a Lender or Lenders (whose participations in an Advance exceed 40 per cent. of that Advance) that the cost to it of funding its participation in that Advance from whatever source it may reasonably select would be in excess of LIBOR or, if applicable, EURIBOR then Clause 13.4 (*Cost of funds*) shall apply to that Advance for the relevant Term.

13.4 Cost of funds

- (a) If this Clause 13.4 (*Cost of funds*) applies, the rate of interest on each Lender's share of the relevant Advance for the relevant Term shall be the percentage rate per annum which is the sum of:
 - (i) the Margin; and
 - (ii) the rate notified to the Agent by that Lender as soon as practicable and in any event within one Business Day of the first day of that Term (or, if earlier, on the date falling

five Business Days before the date on which interest is due to be paid in respect of that Term), to be that which expresses as a percentage rate per annum the cost to the relevant Lender of funding its participation in that Advance from whatever source it may reasonably select.

- (b) If this Clause 13.4 (*Cost of funds*) applies and the Facility Agent or the Company so requires, the Facility Agent and the Company shall enter into negotiations (for a period of not more than thirty days) with a view to agreeing a substitute basis for determining the rate of interest.
- (c) Any alternative basis agreed pursuant to paragraph (b) above shall, with the prior consent of the affected Lenders and the Company, be binding on all Parties.
- (d) If this Clause 13.4 (*Cost of funds*) applies pursuant to Clause 13.3 (*Market disruption*): and
 - (i) a Lender's Funding Rate is less than LIBOR or, in relation to any Advance in Euro, EURIBOR; or
 - (ii) a Lender does not supply a quotation by the time specified in paragraph (a)(ii) above, the cost to that Lender of funding its participation in that Advance for that Term shall be deemed, for the purposes of paragraph (a) above, to be LIBOR or, in relation to an Advance in Euro, EURIBOR.
- (e) If this Clause 13.4 (*Cost of funds*) applies pursuant to Clause 13.1 (*Unavailability of Screen Rate*) but any Lender does not supply a quotation by the time specified in paragraph (a)(ii) above the rate of interest shall be calculated on the basis of the quotations of the remaining Lenders.

13.5 Notification to the Company

If Clause 13.4 (*Cost of funds*) applies or if LIBOR or, if applicable, EURIBOR is to be determined on the basis of an Alternative Reference Bank Rate the Facility Agent shall, as soon as is practicable, notify the Company.

13.6 Revocation of currency

If before 9.30 a.m. on any Quotation Date, the Facility Agent receives notice from a Lender that:

- (a) it is impracticable for the Lender to fund its participation in an Advance in U.S. Dollars during that Term in the ordinary course of business in the London interbank market; and/or
- (b) the use of U.S. Dollars might contravene any law or regulation,

the Facility Agent shall give notice to the Company and to the Lenders to that effect before 11.00 a.m. on that day. In this event:

- (i) the Company and the Lenders may agree that the drawdown will not be made; or
- (ii) in the absence of agreement that Lender's participation in the Advance (or, if more than one Lender is similarly affected, those Lender's participations in the Advance) shall be treated as a separate Advance denominated in Euros during the relevant Term.

14. INCREASED COSTS

14.1 Increased Costs

Except as provided below in this Clause 14 (*Increased Costs*), the Company must pay to a Finance Party the amount of any Increased Cost incurred by that Finance Party or any of its Affiliates as a result of:

- (a) the introduction of, or any change in, or any change in the interpretation, administration or application of, any law or regulation; or
- (b) compliance with any law or regulation made after the date of this Agreement.

14.2 Exceptions

The Company need not make any payment for an Increased Cost to the extent that the Increased Cost is:

- (a) compensated for under another Clause or would have been but for an exception to that Clause;

- (b) attributable to a Finance Party or its Affiliate wilfully failing to comply with any law or regulation;

 - (i) if it had been deducted from Net Total Debt for the Measurement Period in respect of which the breach arose, would have avoided the breach; or
 - (ii) if it had been added to the Consolidated Annualised EBITDA for the Measurement Period in respect of which the breach arose, would have avoided the breach.
- (b) A cure under this Clause 20.4 (*Cure Provisions*) will not be effective unless the required amount of additional equity or the proceeds of any Subordinated Shareholder Loans are received by one or more members of the Group within 15 Business Days of delivery of the financial statements delivered under Clause 19.1 (*Financial Statements*) which show that Clause 20.2 (*Net Total Debt to Consolidated Annualised EBITDA*) has been breached.

- (e) For the purpose of ascertaining compliance with Clause 20.2 (*Net Total Debt to Consolidated Annualised EBITDA*), the ratio set out in Clause 20.2 (*Net Total Debt to Consolidated Annualised EBITDA*) will be tested or retested, as applicable, giving effect to the adjustment referred to in paragraph (d) above. If, after giving effect to the adjustment, the requirements of Clause 20.2 (*Net Total Debt to Consolidated Annualised EBITDA*) are met, then the requirements of Clause 20.2 (*Net Total Debt to Consolidated Annualised EBITDA*) shall be deemed to have been satisfied as at the relevant original date of determination.

confidentiality agreement substantially in the form of the LMA Master Confidentiality Undertaking for Use With Administration/Settlement Service Providers or such other form of confidentiality undertaking agreed between the Facility Agent and the relevant Lender or Reference Bank or Alternative Reference Bank, as the case may be.

- (c) The Facility Agent may disclose any Funding Rate or any Reference Bank Quotation, each Borrower and each Obligor may disclose any Funding Rate, to:
 - (i) any of its Affiliates and any of its or their officers, directors, employees, professional advisers, auditors, partners and representatives if any person to whom that Funding Rate or Reference Bank Quotation is to be given pursuant to this paragraph (c) is informed in writing of its confidential nature and that it may be price-sensitive information except that there shall be no such requirement to so inform if the recipient is subject to professional obligations to maintain the confidentiality of that Funding Rate or Reference Bank Quotation or is otherwise bound by requirements of confidentiality in relation to it;
 - (ii) any person to whom information is required to be disclosed in connection with, and for the purposes of, any litigation, arbitration, administrative or other investigations, proceedings or disputes if the person to whom that Funding Rate or Reference Bank Quotation is to be given is informed in writing of its confidential nature and that it may be price-sensitive information except that there shall be no requirement to so inform if, in the opinion of the Facility Agent or the relevant Borrower or Obligor, as the case may be, it is not practicable to do so in the circumstances; and
 - (iii) any person with the consent of the relevant Lender or Reference Bank or Alternative Reference Bank, as the case may be.
- (d) The Facility Agent's obligations in this Clause 31 (*Confidentiality of Funding Rates and Reference Bank Quotations*) relating to Reference Bank Quotations are without prejudice to its obligations to make notifications under Clause 11.10 (*Notification*) provided that (other than pursuant to paragraph (b)(i) above) the Facility Agent shall not include the details of any individual Reference Bank Quotation as part of any such notification.

31.2 Related obligations

- (a) The Facility Agent, each Borrower and each Obligor acknowledge that each Funding Rate (and, in the case of the Facility Agent, each Reference Bank Quotation) is or may be price-sensitive information and that its use may be regulated or prohibited by applicable legislation including securities law relating to insider dealing and market abuse and the Facility Agent, each Borrower and each Obligor undertake not to use any Funding Rate or, in the case of the Facility Agent, any Reference Bank Quotation for any unlawful purpose.
- (b) The Facility Agent, each Borrower and each Obligor agree (to the extent permitted by law and regulation) to inform the relevant Lender or Reference Bank or Alternative Reference Bank, as the case may be:
 - (i) of the circumstances of any disclosure made pursuant to paragraph (c)(ii) of Clause 31.1 (*Confidentiality and disclosure*) except where such disclosure is made to any of the persons referred to in that paragraph during the ordinary course of its supervisory or regulatory function; and
 - (ii) upon becoming aware that any information has been disclosed in breach of this Clause 31 (*Confidentiality of Funding Rates and Reference Bank Quotations*).

31.3 No Event of Default

No Event of Default will occur by reason only of an Obligor's failure to comply with this Clause 31 (*Confidentiality of Funding Rates and Reference Bank Quotations*).

32. SET-OFF

- (a) A Finance Party may, at any time when an Event of Default is outstanding, set off any matured obligation owed to it by an Obligor under the Finance Documents (to the extent

beneficially owned by that Finance Party) against any obligation (whether or not matured) owed by that Finance Party to that Obligor, regardless of the place of payment, booking branch or currency of either obligation. If the obligations are in different currencies, the Finance Party may convert either obligation at a market rate of exchange in its usual course of business for the purpose of the set-off.

- (b) Any credit balances taken into account by an Ancillary Facility Lender when operating a net limit in respect of any overdraft under an Ancillary Facility shall on enforcement of the Finance Documents be applied first in the reduction of the overdraft provided under that Ancillary Facility in accordance with its terms.
- (c) This Clause 32 (*Set-Off*) is a netting arrangement for the purposes of the Belgian Financial Collateral Law.

33. PRO RATA SHARING

33.1 Redistribution

If any amount owing by an Obligor under this Agreement to a Finance Party (the recovering Finance Party) is discharged by payment, set-off or any other manner other than in accordance with this Agreement (a recovery), then:

- (a) the recovering Finance Party must, within three Business Days, supply details of the recovery to the Facility Agent;
- (b) the Facility Agent must calculate whether the recovery is in excess of the amount which the recovering Finance Party would have received if the recovery had been received and distributed by the Facility Agent under this Agreement; and
- (c) the recovering Finance Party must pay to the Facility Agent an amount equal to the excess (the “**redistribution**”).

33.2 Effect of Redistribution

- (a) The Facility Agent must treat a redistribution as if it were a payment by the relevant Obligor under this Agreement and distribute it among the Finance Parties, other than the recovering Finance Party, accordingly.
- (b) When the Facility Agent makes a distribution under paragraph (a) above, the recovering Finance Party will be subrogated to the rights of the Finance Parties which have shared in that redistribution.
- (c) If and to the extent that the recovering Finance Party is not able to rely on any rights of subrogation under paragraph (b) above, the relevant Obligor will owe the recovering Finance Party a debt which is equal to the redistribution, immediately payable and of the type originally discharged.
- (d) If:
 - (i) a recovering Finance Party must subsequently return a recovery, or an amount measured by reference to a recovery, to an Obligor; and
 - (ii) the recovering Finance Party has paid a redistribution in relation to that recovery,each Finance Party must reimburse the recovering Finance Party all or the appropriate portion of the redistribution paid to that Finance Party, together with interest for the period while it held the redistribution. In this event, the subrogation in paragraph (b) above will operate in reverse to the extent of the reimbursement.

33.3 Exceptions

Notwithstanding any other term of this Clause 33 (*Pro Rata Sharing*), a recovering Finance Party need not pay a redistribution to the extent that:

- (a) it would not, after the payment, have a valid claim against the relevant Obligor in the amount of the redistribution; or

- (b) it would be sharing with another Finance Party any amount which the recovering Finance Party has received or recovered as a result of legal or arbitration proceedings, where:
 - (i) the recovering Finance Party notified the Facility Agent of those proceedings; and
 - (ii) the other Finance Party had an opportunity to participate in those proceedings but did not do so or did not take separate legal or arbitration proceedings as soon as reasonably practicable after receiving notice of them.

33.4 Litigation

- (a) No Lender shall commence any action or proceeding in any court to enforce its rights under any Finance Document without prior consultation with the other Lenders and without the consent of Majority Lenders;
- (b) If in accordance with paragraph (a) above any Lender does take action to enforce its rights under any Finance Document and, as a result thereof or in connection therewith, shall receive a recovery then such Lender shall not be required to share any portion of such recovery with any Lender which has the legal right to, but does not, join in such action or proceeding or commence and diligently prosecute a separate action or proceeding to enforce its rights in another court.

33.5 Ancillary Facility Lenders

- (a) This Clause 33 (*Pro Rata Sharing*) shall not apply to any receipt or recovery by a Lender in its capacity as an Ancillary Facility Lender at any time prior to service of notice under Clause 22.16 (*Acceleration Following Financial Ratio Breach*).
- (b) Following service of notice under Clause 22.16 (*Acceleration Following Financial Ratio Breach*), this Clause 33 (*Pro Rata Sharing*) shall apply to all receipts or recoveries by Ancillary Facility Lenders except to the extent that the receipt or recovery represents a reduction from the Designated Gross Amount for an Ancillary Facility to its Designated Net Amount.

34. SEVERABILITY

If a term of a Finance Document is or becomes illegal, invalid or unenforceable in any respect under any jurisdiction, that will not affect:

- (a) the legality, validity or enforceability in that jurisdiction of any other term of the Finance Documents; or
- (b) the legality, validity or enforceability in other jurisdictions of that or any other term of the Finance Documents.

35. COUNTERPARTS

Each Finance Document may be executed in any number of counterparts. This has the same effect as if the signatures on the counterparts were on a single copy of the Finance Document.

- (d) Any communication given to the Company in connection with a Finance Document will be deemed to have been given also to the other Obligors.

- (e) Each Finance Party may assume that any communication made by the Company is made with the consent of each other Obligor.
- (f) If (notwithstanding the fact that the guarantees granted under this Agreement are and the Security is, intended to guarantee and secure, respectively, all obligations arising under the Finance Documents), any guarantee or Security does not automatically extend from time to time to any (however fundamental and of whatsoever nature and whether or not more onerous) amendment, variation, increase, extension or addition of or to any of the Finance Documents and/or any Facility or amount made available under any of the Finance Documents, each Obligor (other than the Company) expressly confirms that the Obligors' Agent is authorised to confirm such guarantee and/or Security on behalf of such Obligor.

36.5 Communication when Facility Agent is Impaired Agent

If the Facility Agent is an Impaired Agent the Finance Parties may, instead of communicating with each other through the Facility Agent, communicate with each other directly and (while the Facility Agent is an Impaired Agent) all the provisions of the Finance Documents which require communications to be made or notices to be given to or by the Facility Agent shall be varied so that communications may be made and notices given to or by the Finance Parties to this Agreement directly. This provision shall not operate after a replacement Facility Agent has been appointed.

36.6 Copy of Transfer Certificate or Increase Confirmation to the Company

The Facility Agent shall, as soon as reasonably practicable after it has executed a Transfer Certificate or Increase Confirmation, send to the Company a copy of that Transfer Certificate or Increase Confirmation.

37. LANGUAGE

38. GOVERNING LAW

This Agreement is governed by English law.

39. ENFORCEMENT

39.1 Jurisdiction

- (a) Unless a Finance Document specifically provides otherwise, the English courts have non exclusive jurisdiction to settle any dispute in connection with any Finance Document.
- (b) The English courts are the most appropriate and convenient courts to settle any such dispute. Each Obligor agrees not to argue to the contrary and waives objection to those courts on the grounds of inconvenient forum or otherwise in relation to proceedings in connection with any Finance Document.
- (c) This Clause 39.1 (*Jurisdiction*) is for the benefit of the Finance Parties only. To the extent allowed by law, a Finance Party may take:

- (b) If any person appointed as process agent is unable under this Clause 39.2 (*Service of Process*) for any reason to so act, the Company (on behalf of all the Obligors) must immediately appoint another agent on terms acceptable to the Facility Agent. Failing this, the Facility Agent may appoint another process agent for this purpose.

- (d) This Clause 39.2 (*Service of Process*) does not affect any other method of service allowed by law.

39.3 Waiver of Immunity

Each Obligor irrevocably and unconditionally:

- (a) agrees not to claim any immunity from proceedings brought by a Finance Party against it in relation to a Finance Document and to ensure that no such claim is made on its behalf;

- (c) waives all rights of immunity in respect of it or its assets.

10. The Final Maturity Date in respect of the Term Loan AJ Facility is March 1, 2028. Any outstanding Advance under the Term Loan AJ Facility shall be repaid in full on the Final Maturity Date.
11. The interest rate in relation to the Term Loan AJ Facility will be a fixed rate of 5.500 per cent. per annum. Such interest rate will be calculated in accordance with Clause 11.1 (*Calculation of Interest*) of the Credit Agreement as being the sum of LIBOR and the applicable Margin, where in order to achieve the fixed rate referred to above, the applicable Margin will be:

(a) 5.500 per cent. per annum, calculated on the basis of a 360 day year comprised of twelve 30 day months;

minus

(b) LIBOR.

For the avoidance of doubt, for the purpose of this calculation, the applicable Margin may be a negative number. Further, the interest rate for this Term Loan AJ Facility will never exceed 5.500 per cent. per annum (save to the extent that Clause 11.3 (*Interest on Overdue Amounts*) of the Credit Agreement may apply).

12. The first Term to apply to the Term Loan AJ Facility Loan will be a period equal to the period running from the Effective Date up to and including January 15, 2018. The Borrower agrees that each subsequent Term under the Term Loan AJ Facility will be 6 months.
13. Upon the occurrence of a mandatory prepayment of the Term Loan AJ Facility following a Change of Control, as defined under Clause 10.2 (*Mandatory Prepayment—Change of Control*) of the Credit Agreement, the Borrower under the Term Loan AJ Facility agrees to pay to the Facility Agent (for the account of the Telenet Additional Facility AJ Lender) an amount equal to 1 per cent. of the principal amount of the Term Loan AJ Facility, plus accrued and unpaid interest to the due date of mandatory prepayment. Such payment shall be due and payable by the Borrower to the Facility Agent (for the account of the Telenet Additional Facility AJ Lender) under the Term Loan AJ Facility on the actual date of such mandatory prepayment.
14. At any time prior to December 1, 2022, upon the occurrence of any voluntary prepayment of any of the Term Loan AJ Facility by the Borrower under Clause 10.5 (*Voluntary Prepayment*) of the Credit Agreement (other than a voluntary prepayment complying with Clauses 17, 18 or 20 below) in an amount not to exceed 10% of the original principal amount of the Term Loan AJ Facility during each twelve-month period commencing on the date of this Agreement, the Borrower under the Term Loan AJ Facility agrees to pay to the Facility Agent (for the account of the Telenet Additional Facility AJ Lender) an amount equal to 3.0% of the principal amount of the Term Loan AJ Facility being prepaid, plus accrued and unpaid interest then due on the amount of the Term Loan AJ Facility Loan prepaid to the due date of prepayment. Such payment shall be due and payable by the Borrower under the Term Loan AJ Facility to the Facility Agent (for the account of the Telenet Additional Facility AJ Lender) on the actual date of such prepayment. Prior to December 1, 2022, to the extent that during any twelve-month period commencing on the date of this Agreement, the principal amount of the Term Loan AJ Facility prepaid in any one or more voluntary prepayments is greater than an amount equal to 10% of the original principal amount of the Term Loan AJ Facility (any such amount, the “**Excess Early Redemption Proceeds**”), the Borrower will apply the Excess Early Redemption Proceeds to a voluntary prepayment of the Term Loan AJ Facility as described in Clause 15 below.
15. At any time prior to December 1, 2022, upon the occurrence of any voluntary prepayment of any or all of the Term Loan AJ Facility by the Borrower under the Term Loan AJ Facility under Clause 10.5 (*Voluntary Prepayment*) of the Credit Agreement with any Excess Early Redemption Proceeds (other than a voluntary prepayment complying with Clauses 17, 18 or 20 below), the Borrower under the Term Loan AJ Facility agrees to pay to the Facility Agent (for the account of the Telenet Additional Facility AJ Lender) an amount equal to the Additional Amount (as defined below) (calculated as of a date no more than three Business Days prior to the date of the relevant prepayment notice), plus accrued and unpaid interest on the amount of the Term Loan AJ Facility Loan prepaid to the due date of prepayment. Such payment shall be due and payable by the Borrower under the Term Loan AJ Facility to the Facility Agent (for the account of the Telenet Additional Facility AJ Lender) on the actual date of such prepayment.

For the purposes of this Clause 15:

Additional Amount means, with respect to the Term Loan AJ Facility on any prepayment date applicable to the voluntary prepayment of any or all of the Term Loan AJ Facility, the excess of:

- (i) the present value at such prepayment date of (i) the amount that would be payable in accordance with Clause 16 below in respect of the principal amount of the Term Loan AJ Facility being prepaid if such amount were prepaid on December 1, 2022 pursuant to Clause 10.5 (*Voluntary Prepayment*) of the Credit Agreement, plus (ii) the principal amount of the Term Loan AJ Facility being prepaid plus (iii) all required interest payments due on the principal amount of the Term Loan AJ Facility being prepaid through December 1, 2022 (excluding accrued but unpaid interest to the prepayment date and assuming such interest payments are calculated at the rate of interest on the Term Loan AJ Facility in effect on such prepayment date), computed using a discount rate equal to the Treasury Rate plus 50 basis points; over
- (ii) the principal amount of the Term Loan AJ Facility being prepaid.

Treasury Rate means, as of any prepayment date, the yield to maturity at the time of computation of U.S. Treasury securities with a constant maturity (as compiled and published in the most recent Federal Reserve Statistical Release H.15 (519) which has become publicly available at least two Business Days prior to the date of the relevant cancellation notice (or, if such statistical release is not so published or available, any publicly available source of similar market data selected by the Issuer in good faith)) most nearly equal to the period from the prepayment date to December 1, 2022; provided, however, that if the period from the prepayment date to December 1, 2022 is not equal to the constant maturity of a U.S. Treasury security for which a weekly average yield is given, the Treasury Rate shall be obtained by a linear interpolation (calculated to the nearest one-twelfth of a year) from the weekly average yields of U.S. Treasury securities for which such yields are given, except that if the period from the prepayment date to December 1, 2022 is less than one year, the weekly average yield on actually traded U.S. Treasury securities adjusted to a constant maturity of one year shall be used.

16. On or after December 1, 2022 upon the occurrence of a voluntary prepayment of any or all of the Term Loan AJ Facility by the Borrower under the Term Loan AJ Facility under Clause 10.5 (*Voluntary prepayment*) of the Credit Agreement (other than a voluntary prepayment complying with Clause 17, 18, 19 and 21 below), the Borrower under the Term Loan AJ Facility agrees to pay to the Facility Agent (for the account of the Telenet Additional Facility AJ Lender) an amount equal to the relevant percentages of the principal amount of the Term Loan AJ Facility being prepaid as set forth in the table below on, plus accrued and unpaid interest then due on the amount of the Term Loan AJ Facility prepaid to, the due date of prepayment, if prepaid during the twelve-month period beginning on December 1 of the years indicated below:

<u>Year</u>	<u>Prepayment Price expressed as a percentage of the principal amount of the Term Loan AJ Facility</u>
2022	2.750%
2023	1.375%
2024	0.688%
2025 and thereafter	0.000%

Such payment shall be due and payable by the Borrower under the Term Loan AJ Facility to the Facility Agent (for the account of the Telenet Additional Facility AJ Lender) on the actual date of such prepayment.

17. Notwithstanding Clauses 14, 15 and 16:

- (a) if the Telenet Additional Facility AJ Lender purchases any Notes in connection with any tender offer or other offer to purchase for the Notes (a “**Tender Offer**”), the Borrower will prepay an aggregate principal amount of the Term Loan AJ Facility, pro rata based on the aggregate principal amount of Notes tendered in such Tender Offer and at a prepayment price of par plus any premium paid or less any discount received by the Telenet Additional Facility AJ Lender in connection with the purchase of the Notes in such Tender Offer, plus any accrued and unpaid interest to the due date of such prepayment; and

- (b) if following any Tender Offer, the Telenet Additional Facility AJ Lender is entitled to, and elects to, redeem any remaining Notes at a price equal to the price paid to each other holder in such Tender Offer, then the Borrower will prepay the remaining principal amount of the Term Loan AJ Facility at a prepayment price of par plus any premium paid or less any discount received by the Telenet Additional Facility AJ Lender in connection with the purchase of the Notes in such Tender Offer, plus any accrued and unpaid interest to the date that any interest accrues under the Notes in connection with such redemption.
18. At any time prior to December 1, 2022, upon the occurrence of any voluntary prepayment of the Term Loan AJ Facility by the Borrower pursuant to Clause 10.5 (*Voluntary Prepayment*) of the Credit Agreement with the Net Cash Proceeds of one of more Equity Offerings (the **“Equity Offering Early Redemption Proceeds”**) in an amount of up to 40% of the Term Loan AJ Facility Loan, the Borrower shall upon not less than 10 days nor more than 60 days’ notice make a payment to the Facility Agent (for the Account of the Telenet Additional Facility AJ Lender in an amount (the **“Equity Claw Prepayment Premium”**) equal to 5.500 per cent. of the principal amount of the Term Loan AJ Facility prepaid, together with any amounts due to the Telenet Additional Facility AJ Lender in respect of a Tax Deduction plus accrued interest then due on the amount of the Term Loan AJ Facility prepaid to the due date of prepayment. Such payment shall be due and payable by the Borrower to the Facility Agent (for the account of the Telenet Additional Facility AJ Lender) under the Term Loan AJ Facility on the actual date of such prepayment provided that:
- (a) at least 50% of the principal amount of the Term Loan AJ Facility remains outstanding immediately after any such prepayment; and
 - (b) such prepayment is made not more than 180 days after the consummation of any Equity Offering.

For the purpose of this Clause 18:

“Capital Stock” of any person means any and all shares, interests, rights to purchase, warrants, options, participation or other equivalents of interests in (however designated) equity of such person, including any preferred stock, but excluding any debt securities convertible into such equity.

“Disqualified Stock” means, with respect to any person, any Capital Stock of such person which by its terms (or by the terms of any security into which it is convertible or for which it is exchangeable) or upon the happening of any event:

- (a) matures or is mandatorily redeemable pursuant to a sinking fund obligation or otherwise;
- (b) is convertible or exchangeable for Financial Indebtedness or Disqualified Stock (excluding Capital Stock which is convertible or exchangeable solely at the option of Telenet Group BVBA, the Borrower or a Subsidiary of Telenet Group BVBA); or
- (c) is redeemable at the option of the holder of the Capital Stock in whole or in part, in each case on or prior to the earlier of the date (a) of the stated maturity of the Term Loan AK Facility or (b) on which there are no amounts under the Term Loan AK Facility outstanding, *provided* that only the portion of Capital Stock which so matures or is mandatorily redeemable, is so convertible or exchangeable or is so redeemable at the option of the holder thereof prior to such date will be deemed to be Disqualified Stock; *provided, further* that any Capital Stock that would constitute Disqualified Stock solely because the holders thereof have the right to require Telenet Group BVBA to repurchase such Capital Stock upon the occurrence of a change of control or asset sale (each defined in a substantially identical manner to the corresponding definitions in the Credit Agreement) shall not constitute Disqualified Stock if the terms of such Capital Stock (and all such securities into which it is convertible or for which it is ratable or exchangeable) provide that Telenet Group BVBA may not repurchase or redeem any such Capital Stock (and all such securities into which it is convertible or for which it is ratable or exchangeable) pursuant to such provision prior to compliance by Telenet Group BVBA with any provisions of the Credit Agreement.

“Equity Offering” means (1) the distribution of Capital Stock of the Spin Holdco in connection with any Spin-Off or (2) a sale of (a) Capital Stock of Telenet Group BVBA or the Borrower (other than Disqualified Stock), (b) Capital Stock the proceeds of which are contributed as equity share capital to Telenet Group BVBA or the Borrower or as Subordinated Shareholder Loans or (3) Subordinated Shareholder Loans.

“**Net Cash Proceeds**” means, with respect to any issuance or sale of Capital Stock, Subordinated Shareholder Loans and other capital contributions, the cash proceeds of such issuance or sale net of attorneys’ fees, accountants’ fees, underwriters’ or placement agents’ fees, listing fees, discounts or commissions and brokerage, consultant and other fees and charges actually incurred in connection with such issuance or sale and net of taxes paid or payable as a result of such issuance or sale (after taking into account any available tax credit or deductions and any tax sharing arrangements).

19. In consideration for the Telenet Additional Facility AJ-B Lender assuming the Telenet Additional Facility AJ Lender’s obligations under the Indenture and provided that any corresponding conditions to such assumption set out in the Indenture have been satisfied substantially concurrently, the Telenet Additional Facility AJ Lender agrees that upon receipt of not less than 8 Business Days’ written notice from the Borrower in relation to the Term Loan AJ Facility and subject to satisfaction, substantially concurrently, of the other requirements of the Finance Documents it shall promptly on the transfer date (as agreed by the Facility Agent, the Telenet Additional Facility AJ-B Lender and the Borrower) transfer its rights, title and obligations under the Term Loan AJ Facility by executing a Transfer Certificate substantially in the form of Schedule 3 of this Telenet Additional Facility AJ Accession Agreement in accordance with Clause 29.4 (*Procedure for transfer by way of novations*) of the Credit Agreement (and the Company shall procure the execution by the Telenet Additional Facility AJ-B Lender of such Transfer Certificate) and deliver such Transfer Certificate to the Facility Agent (the “**Facility AJ Loan Transfer**”). The Borrower shall have the right, but not the obligation, to deliver any such notice and to effect the Facility AJ Loan Transfer. A copy of the written notice from the Borrower to the Telenet Additional Facility AJ Lender shall also be provided to the Facility Agent on or around the date on which it is delivered to the Telenet Additional Facility AJ Lender in accordance with this Clause 19. For the purpose of Clause 29.3(f) (*Transfers by Lenders*) of the Credit Agreement, the Facility Agent agrees to waive its right to receive a fee in connection with the Facility AJ Loan Transfer.

Following the completion of the Facility AJ Loan Transfer, the Company agrees that if requested by written notice from the Borrower, within 60 Business Days of the Transfer Date (as defined in the Transfer Certificate delivered pursuant to this Clause 19), it shall execute and deliver (or shall procure that such other Telenet Additional Facility AJ-B Borrower shall execute and deliver), and, provided that any corresponding conditions to such transaction set out in the Finance Documents and the Indenture have been satisfied substantially concurrently, shall procure that the Telenet Additional Facility AJ-B Lender shall execute and deliver the Telenet Additional Facility AJ-B Accession Agreement, to the Facility Agent and the Security Agent. The Borrower shall have the right, but not the obligation, to deliver such request and to effect the Belgian Issuer Rollover (as defined below). A copy of the written notice from the Borrower to the Company in respect of such request shall also be provided to the Facility Agent on or around the date on which it is delivered to the Company in accordance with this Clause 19.

20. In accordance with the Telenet Additional Facility AJ-B Accession Agreement, on the Effective Date (as defined therein) the Telenet Additional Facility AJ-B Lender will make or be deemed to have made, as applicable to the Telenet Additional Facility AJ-B Borrower a Term Loan AJ Facility Loan in an amount equal to its commitment under the Term Loan AJ-B Facility (which shall be an amount equal to the then outstanding principal amount of the Term Loan AJ-B Facility Loan) by, at the election of the Company, one or more of the following (the “**Belgian Issuer Rollover**”):
- (a) transferring all of its rights, title and obligations under the Term Loan AJ-B Facility to the Telenet Additional Facility AJ-B Borrower pursuant to a transfer certificate to be executed by each of the Telenet Additional Facility AJ-B Lender, the Telenet Additional Facility AJ-B Borrower and the Facility Agent in accordance with Clause 29.4 (*Procedure for transfer by way of novations*) of the Credit Agreement;

The notice provisions of Clause 10.5(a) (*Voluntary Prepayment*) and Clause 10.7(a) (*Voluntary Cancellation*) of the Credit Agreement shall not apply to any cancellation or prepayment effected

pursuant to paragraphs (b) or (c) of this Clause 20, and the Company hereby irrevocably consents to any transfer pursuant to paragraph (a) of this Clause 20 and for the purpose of Clause 29.3(c) (*Transfers by Lenders*) of the Credit Agreement.

21. On the Effective Date (as defined in the Telenet Additional Facility AJ-B Accession Agreement), accrued and unpaid interest in respect of the Term Loan AJ Facility Loan shall be rolled over and deemed to be interest accrued in respect of the Term Loan AJ-B Facility Loan. Such interest shall be due and payable, together with any additional accrued and unpaid interest on the Term Loan AJ-B Facility Loan, on the first interest period payment date under the Term Loan AJ-B Facility which shall correspond with the end of the Term selected in the relevant Request for the Term Loan AJ Facility Loan under the Credit Agreement.
22. The Borrower agrees that it will not request or require the transfer of all of the rights and obligations of the Telenet Additional Facility AJ Lender (or cancel or reduce any of such Lender's Commitments or repay or prepay the Term Loan Facility AJ Loan) pursuant to Clause 10.8 (*Right of Repayment and Cancellation of a Single Lender*), Clause 10.9 (*Right of Cancellation in relation to a Defaulting Lender*) or Clause 28.3 (*Non-Consenting Lenders*) of the Credit Agreement.
23. On the first Utilisation Date in respect of the Term Loan AJ Facility, the Borrower confirms, on behalf of itself and the Company confirms on behalf of itself and each other Obligor, that the representations and warranties set out in Clause 18 (*Representations and Warranties*) of the Credit Agreement (except for Clauses 18.5 (*Non—conflict*), 18.6 (*No Event of Default*), 18.7 (*Authorisations*), 18.9 (*No Material Adverse Change*), 18.10 (*Litigation and Insolvency Proceedings*), 18.11 (*Tax Liabilities*), 18.12 (*Security Interests*), 18.13 (*Intellectual Property Rights*), 18.14 (*Environmental Laws*), 18.15 (*Ownership of Assets*), 18.16 (*ERISA*), 18.17 (*United States Regulations*) and 18.18 (*Anti-Terrorism Laws*)) are true and correct in all material respects as if made at the first Utilisation Date in respect of the Term Loan AJ Facility with reference to the facts and circumstances then existing, and as if each reference to the Finance Documents includes a reference to this Agreement.
24. Each of the Guarantors confirms that its obligations under Clause 17 (*Guarantee and Indemnity*) of the Credit Agreement, and each of the Existing Security Providers confirms that the Security Interests created pursuant to the Security Documents and its obligations under the Finance Documents, shall continue unaffected and that such obligations extend to the Total Commitments as increased by the addition of the Term Loan AJ Facility and that such obligations shall be owed to each Finance Party including the Telenet Additional Facility AJ Lender.
25. The Telenet Additional Facility AJ Lender confirms to each Finance Party (unless such Finance Party is also an Obligor) that:
 - (a) it has made its own independent investigation and assessment of the financial condition and affairs of each Obligor and its related entities in connection with its participation in the Credit Agreement and has not relied on any information provided to it by a Finance Party in connection with any Finance Document; and
 - (b) it will continue to make its own independent appraisal of the creditworthiness of each Obligor and its related entities while any amount is or may be outstanding under the Credit Agreement or any Telenet Additional Facility Commitment is in force.

Subject to Clause 28 below and the provisions of the Indenture, for the purposes of any amendment or waiver, consent or other modification (including, with respect to any existing Default or Event of Default) that may be sought by the Company under the Credit Agreement or any other Finance Document on or after the date of this Agreement, the Telenet Additional Facility AJ Lender hereby consents to:
 - (a) any and all of the items set out in Schedule 4 (*Amendments, Waivers, Consents and Other Modifications*) to Schedule 10 (*Seventh Amendments, Waivers, Consents and Other Modifications*) of this Agreement; and

- (b) any consequential amendment, waiver, consent or other modification, whether effected by one instrument or through a series of amendments, to the Credit Agreement or any other Finance Document to be made either to implement the changes envisaged in Schedule 4 (*Amendments, Waivers, Consents and Other Modifications*) to Schedule 10 (*Seventh Amendments, Waivers, Consents and Other Modifications*) of this Agreement or to conform any Finance Document to Schedule 4 (*Amendments, Waivers, Consents and Other Modifications*) to Schedule 10 (*Seventh Amendments, Waivers, Consents and Other Modifications*) of this Agreement; and/or
- (c) any other amendment, waiver, consent or modification, whether effected by one instrument or through a series of amendments, to the Credit Agreement or any other Finance Document to be made to conform any Finance Document to any Liberty Global Reference Agreement (provided that any amendment, waiver, consent or modification to conform the Credit Agreement or any other Finance Document to any Liberty Global Reference Agreement referred to at paragraphs (vi) to (xi), (xiii) and (xiv) and in respect of the schedules in relation to covenants, events of default or definitions in the Liberty Global Reference Agreements referred to at paragraphs (ii), (iii) and (v) of that definition, shall be limited to those that are mechanical in nature unless specifically referenced in Schedule 4 (*Amendments, Waivers, Consents and Other Modifications*) to Schedule 10 (*Seventh Amendments, Waivers, Consents and Other Modifications*) of this Agreement and, in each case, any consequential amendments, waivers, consents or modifications),

and this Agreement shall constitute the Telenet Additional Facility AJ Lender's irrevocable and unconditional written consent in respect of such amendments, waivers, consents or other modifications to the Finance Documents for the purposes of Clause 28 (*Amendments and Waivers*) of the Credit Agreement and Clause 28 (*Consents, Amendments and Override*) of the Intercreditor Agreement (as applicable), and any clause in any other Finance Document relating to amendments of that Finance Document, without any further action required on the part of any party thereto.

- 28. Following receipt of an amendment request from the Company and/or the Facility Agent in connection with all or any of the proposed amendments set out under Clause 27 above (the "**Requested Amendments**") the Telenet Additional Facility AJ Lender shall confirm whether, having regard to the relevant provisions of the Indenture, it is required to consent to the Requested Amendments. If the Telenet Additional Facility AJ Lender is required to give such consent, it hereby acknowledges and agrees that the Facility Agent and/or the Security Agent may, but shall not be required to, send to the Telenet Additional Facility AJ Lender any further formal amendment request in connection with all, or any of the Requested Amendments and the Facility Agent and/or the Security Agent shall be authorised to consent on behalf of the Telenet Additional Facility AJ Lender, as a Lender under one or more Telenet Additional Facilities, to any such Requested Amendments (and the Facility Agent and/or the Security Agent shall be authorised to enter into any necessary documentation in connection with the same) and such consent shall be taken into account in calculating whether the Majority Lenders, or the relevant requisite Lenders, have consented to the relevant amendment, waiver or other modification to the Finance Documents in accordance with Clause 28 (*Amendments and Waivers*) of the Credit Agreement and Clause 28 (*Consents, Amendments and Override*) of the Intercreditor Agreement (as applicable), and any clause relating to amendments in any other Finance Document.
- 29. The Telenet Additional Facility AJ Lender hereby waives receipt of any fee in connection with the consent in Clause 28 above, notwithstanding that other consenting Lenders under the Credit Agreement may be paid a fee in consideration of such Lenders' consent to any or all of the foregoing amendments, waivers or other modifications.

- 31. The Borrower and the Company agree that, notwithstanding the provisions of Clause 12 (*Taxes*) of the Credit Agreement, in connection with any payment required to be made by an Obligor to the Telenet Additional Facility AJ Lender:
 - (a) Clause 12.2 (*Tax gross-up*) of the Credit Agreement shall continue to apply as if a Tax Deduction includes a FATCA Deduction; and

- (b) Clause 12.4(a) (*Tax Indemnity*) of the Credit Agreement shall continue to apply to any Tax that relates to a FATCA Deduction required to be made by a Party,

in each case, other than to the extent that such FATCA Deduction arises from any non-compliance with any law or regulation by a holder of the Notes.

In this paragraph 32:

- (a) the legality, validity or enforceability in that jurisdiction of any other term of this Agreement; or

38. This Agreement and any non-contractual obligations arising out of or in connection with it are governed by English law.

SCHEDULE 4

AMENDMENTS, WAIVERS, CONSENTS AND OTHER MODIFICATIONS

All references to Clauses, Paragraphs, Schedules and definitions contained in this Schedule 4 are to Clauses, Paragraphs, Schedules and definitions of the Credit Agreement and the Intercreditor Agreement (as applicable). All capitalised terms used in this Schedule but not defined shall have the meanings given to such terms in the Credit Agreement and the Intercreditor Agreement (as applicable).

In this Schedule, references to “recent Liberty precedent” shall be construed to mean any Liberty Global Reference Agreement.

1. **Majority Lenders:** amend Clause 1.1 (*Definitions*) of the Credit Agreement to reduce the fractions specified in the definitions of Majority Lenders, from two thirds or more (for any or all purposes under the Credit Agreement or any other Finance Document (including for the purposes of any Telenet Additional Facility)) to more than 50.00% and to exclude the available commitments of defaulting lenders for the purposes of amendments or waivers.
2. **Super Majority Lenders:** amend Credit Agreement to provide for a definition of Super Majority Lenders so that amendments and waivers in respect of the release of any guarantee or security only requires the consent of Lenders representing 90.00% of Commitments.
3. **Tax:** amend Clause 12 (*Taxes*) to include any provisions (which are not materially adverse to the interests of the Lenders) required to accommodate an acceding Additional Borrower incorporated in a jurisdiction other than Belgium, the Netherlands, Luxembourg and the United States.
4. **Market Disruption:** amend the Credit Agreement to include market disruption provisions and the provision of alternative interest rates in accordance with recent Liberty precedents and/or, to the extent not inconsistent with recent Liberty precedent, the European leverage loan market.
5. **Geographic restrictions:** amend Clause 29.9 (*Additional Borrowers*) to provide that, in addition to the existing ability for an Additional Borrower incorporated in Benelux and the US to accede (without requiring any Lender consent), to provide an ability to accede Additional Borrowers incorporated in any other jurisdictions with the consent of the Majority Lenders.
6. **Holding Companies:** amend Clause 21.9(b)(iii) to expressly permit a merger of Telenet Group Holding NV, Telenet BVBA or Telenet Vlaanderen NV or any of their intermediate holding companies subject to compliance with the merger regime in recent Liberty precedents.
7. **Changes to Thresholds:** in the definition of Permitted Security Interest, permit the Company to secure Financial Indebtedness on a *pari passu* or junior ranking basis provided that (other than in the case of a refinancing of other secured Financial Indebtedness in the same or a lesser principal amount) the Net Total Debt to Consolidated Annualised EBITDA ratio on a pro forma basis would not be greater than 5.50:1.00 and provided that such Financial Indebtedness is subject to an intercreditor agreement on terms which are satisfactory to the Security Agent (acting on the instructions of the Majority Lenders) and where (in the case of such Financial Indebtedness being secured on a junior ranking basis) the rights of the holders of such Financial Indebtedness in respect of any payment will be contractually subordinated to the rights of the Lenders on terms comparable to the Loan Market Association’s form of intercreditor agreement at such time for mezzanine debt, as referred to in recent Liberty precedent.
8. **Security and Guarantee Release:** amend the relevant provisions of the Credit Agreement (in particular Clauses 21.17 (*Share Security*) and 29.11 (*Resignation of an Obligor (other than the Company)*)) to provide that, subject to certain thresholds being met no Obligor nor any other member of the Group is required to provide any Security or guarantee other than Security over the shares that it holds in any Obligor, Security required under the terms of the Credit Agreement in respect of Subordinated Shareholder Loans and a guarantee from the Obligors under the terms of the Credit Agreement and include a provision to authorise the Security Agent to release any other Security or guarantees other than the aforementioned and to release Security in respect of Permitted Disposals and to permit relevant Security to be released if a Guarantor resigns in accordance with Clause 29.11 (*Resignation of an Obligor (other than the Company)*) provided that the guarantor coverage test would still be met notwithstanding such release.
9. **Defaulting Lender:** include standard defaulting lender provisions used in recent Liberty precedents and/or, to the extent not inconsistent with recent Liberty precedent, the European leverage loan

market so as the commitments of a defaulting lender may be cancelled and it will have no rights to vote in respect of such cancelled commitments. Clarify that no commitment fee will be payable to a defaulting lender.

10. **Assignments/Transfers of Lenders:** clarify that the Company should have the right to withhold consent in respect of an assignment/transfer of the Revolving Facility to an entity which is not a lender under a revolving facility to the wider Liberty group (subject to no consent being required in the case of transfers to other Lenders or affiliates of Lenders or following an event of default which is continuing). There should be no unreasonableness qualifier on this right (in respect of the Revolving Facility only). Remove requirement of deemed consent within 10 Business Days in respect of each Revolving Facility.
11. **Assignments/Transfers of Obligors:** amend Clause 29.2 (*Assignment or Transfer by Obligors*) so that any Benelux Borrower may assign or transfer any of its rights and obligations under the Revolving Facility or the Term Loans to another Benelux Borrower and so that any US Borrower may do the same to another US Borrower, in each case, without the prior consent of the Lenders provided that a solvency opinion and legal opinion are provided, if requested, in accordance with recent Liberty precedents in respect of an equivalent provision.
12. **Amendments:**
 - (a) amend Clause 28 (*Amendments and waivers*) to introduce a class exception, whereby any amendment or waiver that relates only to the rights or obligations of a particular Utilisation or Facility and does not materially and adversely affect the rights or interests of Lenders in respect of other Utilisations or Facilities only requires the consent of the relevant proportion of Lenders participating in such Utilisation or Facility;
 - (b) amend Clause 28.2 (*Exceptions*) to require the consent of affected Lenders only and not all Lenders (and make any consequential changes by amending for example, all references to matters requiring all Lender consent to only requiring affected Lender consent); and
 - (c) include a new paragraph (d) to Clause 28.2 (*Exceptions*), to permit the Facility Agent to make technical, minor, operational and OID amendments without consent from any Lenders, on terms consistent with recent Liberty precedent as at the date of implementation of the amendments.
13. **Joint Ventures and solvent reorganisations:** amend the Credit Agreement to permit Telenet BVBA to contribute freely pledged loan and guarantee receivables to the Permitted Joint Venture's share capital without requiring a release from the Security Agent (subject to confirmation or re-taking of security over such pledged loan and guarantee receivables).
14. **Accession Agreements:** amend each Accession Agreement to remove the restriction which prevents:
 - (a) Telenet BVBA from arranging an Additional Facility if after giving effect to a utilisation thereunder, the ratio of Net Total Senior Debt to Consolidated Annualised EBITDA would be greater than 4.50:1; and
 - (b) the Company from requesting the transfer of an Additional Facility pursuant to Clause 28.3 (*Non-Consenting Lenders*).
15. **Non-Consenting Lenders:** remove the timing window of 90 days during which the Company may effect the provisions set out in Clause 28.3 (*Non-Consenting Lenders*).

3. **Amendments:**
 - (a) include a new clause such that where a request for a waiver of, or an amendment to, any provision of any Finance Document has been sent by the Facility Agent to the Lenders at the request of an Obligor, each Lender that does not respond to such request for waiver or amendment within 10 Business Days after receipt by it of such request (or within such other period as the Facility Agent and the Company shall specify), shall be excluded from the calculation in determining whether the requisite level of consent to such waiver or amendment was granted, and delete the proviso to the definition of Majority Lenders; and

SCHEDULE 4

AMENDMENTS, WAIVERS, CONSENTS AND OTHER MODIFICATIONS

All references to Clauses, Paragraphs, Schedules and definitions contained in this Schedule 4 are to Clauses, Paragraphs, Schedules and definitions of the Credit Agreement and the Intercreditor Agreement (as applicable). All capitalised terms used in this Schedule but not defined shall have the meanings given to such terms in the Credit Agreement and the Intercreditor Agreement (as applicable).

In this Schedule, references to “recent Liberty precedent” shall be construed to mean any Liberty Global Reference Agreement.

1. **Majority Lenders:** amend Clause 1.1 (*Definitions*) of the Credit Agreement to reduce the fractions specified in the definitions of Majority Lenders, from two thirds or more (for any or all purposes under the Credit Agreement or any other Finance Document (including for the purposes of any Telenet Additional Facility)) to more than 50.00% and to exclude the available commitments of defaulting lenders for the purposes of amendments or waivers.
2. **Super Majority Lenders:** amend Credit Agreement to provide for a definition of Super Majority Lenders so that amendments and waivers in respect of the release of any guarantee or security only requires the consent of Lenders representing 90.00% of Commitments.
3. **Tax:** amend Clause 12 (*Taxes*) to include any provisions (which are not materially adverse to the interests of the Lenders) required to accommodate an acceding Additional Borrower incorporated in a jurisdiction other than Belgium, the Netherlands, Luxembourg and the United States.
4. **Market Disruption:** amend the Credit Agreement to include market disruption provisions and the provision of alternative interest rates in accordance with recent Liberty precedents and/or, to the extent not inconsistent with recent Liberty precedent, the European leverage loan market.
5. **Geographic restrictions:** amend Clause 29.9 (*Additional Borrowers*) to provide that, in addition to the existing ability for an Additional Borrower incorporated in Benelux and the US to accede (without requiring any Lender consent), to provide an ability to accede Additional Borrowers incorporated in any other jurisdictions with the consent of the Majority Lenders.
6. **Holding Companies:** amend Clause 21.9(b)(iii) to expressly permit a merger of Telenet Group Holding NV, Telenet BVBA or Telenet Vlaanderen NV or any of their intermediate holding companies subject to compliance with the merger regime in recent Liberty precedents.
7. **Changes to Thresholds:** in the definition of Permitted Security Interest, permit the Company to secure Financial Indebtedness on a *pari passu* or junior ranking basis provided that (other than in the case of a refinancing of other secured Financial Indebtedness in the same or a lesser principal amount) the Net Total Debt to Consolidated Annualised EBITDA ratio on a pro forma basis would not be greater than 5.50:1.00 and provided that such Financial Indebtedness is subject to an intercreditor agreement on terms which are satisfactory to the Security Agent (acting on the instructions of the Majority Lenders) and where (in the case of such Financial Indebtedness being secured on a junior ranking basis) the rights of the holders of such Financial Indebtedness in respect of any payment will be contractually subordinated to the rights of the Lenders on terms comparable to the Loan Market Association’s form of intercreditor agreement at such time for mezzanine debt, as referred to in recent Liberty precedent.
8. **Security and Guarantee Release:** amend the relevant provisions of the Credit Agreement (in particular Clauses 21.17 (*Share Security*) and 29.11 (*Resignation of an Obligor (other than the Company)*)) to provide that, subject to certain thresholds being met no Obligor nor any other member of the Group is required to provide any Security or guarantee other than Security over the shares that it holds in any Obligor, Security required under the terms of the Credit Agreement in respect of Subordinated Shareholder Loans and a guarantee from the Obligors under the terms of the Credit Agreement and include a provision to authorise the Security Agent to release any other Security or guarantees other than the aforementioned and to release Security in respect of Permitted Disposals and to permit relevant Security to be released if a Guarantor resigns in accordance with Clause 29.11 (*Resignation of an Obligor (other than the Company)*) provided that the guarantor coverage test would still be met notwithstanding such release.
9. **Defaulting Lender:** include standard defaulting lender provisions used in recent Liberty precedents and/or, to the extent not inconsistent with recent Liberty precedent, the European leverage loan

market so as the commitments of a defaulting lender may be cancelled and it will have no rights to vote in respect of such cancelled commitments. Clarify that no commitment fee will be payable to a defaulting lender.

10. **Assignments/Transfers of Lenders:** clarify that the Company should have the right to withhold consent in respect of an assignment/transfer of the Revolving Facility to an entity which is not a lender under a revolving facility to the wider Liberty group (subject to no consent being required in the case of transfers to other Lenders or affiliates of Lenders or following an event of default which is continuing). There should be no unreasonableness qualifier on this right (in respect of the Revolving Facility only). Remove requirement of deemed consent within 10 Business Days in respect of each Revolving Facility.
11. **Assignments/Transfers of Obligors:** amend Clause 29.2 (*Assignment or Transfer by Obligors*) so that any Benelux Borrower may assign or transfer any of its rights and obligations under the Revolving Facility or the Term Loans to another Benelux Borrower and so that any US Borrower may do the same to another US Borrower, in each case, without the prior consent of the Lenders provided that a solvency opinion and legal opinion are provided, if requested, in accordance with recent Liberty precedents in respect of an equivalent provision.
12. **Amendments:**
 - (a) amend Clause 28 (*Amendments and waivers*) to introduce a class exception, whereby any amendment or waiver that relates only to the rights or obligations of a particular Utilisation or Facility and does not materially and adversely affect the rights or interests of Lenders in respect of other Utilisations or Facilities only requires the consent of the relevant proportion of Lenders participating in such Utilisation or Facility;
 - (b) amend Clause 28.2 (*Exceptions*) to require the consent of affected Lenders only and not all Lenders (and make any consequential changes by amending for example, all references to matters requiring all Lender consent to only requiring affected Lender consent); and
 - (c) include a new paragraph (d) to Clause 28.2 (*Exceptions*), to permit the Facility Agent to make technical, minor, operational and OID amendments without consent from any Lenders, on terms consistent with recent Liberty precedent as at the date of implementation of the amendments.
13. **Joint Ventures and solvent reorganisations:** amend the Credit Agreement to permit Telenet BVBA to contribute freely pledged loan and guarantee receivables to the Permitted Joint Venture's share capital without requiring a release from the Security Agent (subject to confirmation or re-taking of security over such pledged loan and guarantee receivables).
14. **Accession Agreements:** amend each Accession Agreement to remove the restriction which prevents:
 - (d) Telenet BVBA from arranging an Additional Facility if after giving effect to a utilisation thereunder, the ratio of Net Total Senior Debt to Consolidated Annualised EBITDA would be greater than 4.50:1; and
 - (e) the Company from requesting the transfer of an Additional Facility pursuant to Clause 28.3 (*Non-Consenting Lenders*).
15. **Non-Consenting Lenders:** remove the timing window of 90 days during which the Company may effect the provisions set out in Clause 28.3 (*Non-Consenting Lenders*).

3. **Amendments:**
 - (a) include a new clause such that where a request for a waiver of, or an amendment to, any provision of any Finance Document has been sent by the Facility Agent to the Lenders at the request of an Obligor, each Lender that does not respond to such request for waiver or amendment within 10 Business Days after receipt by it of such request (or within such other period as the Facility Agent and the Company shall specify), shall be excluded from the calculation in determining whether the requisite level of consent to such waiver or amendment was granted, and delete the proviso to the definition of Majority Lenders; and

Prior to December 1, 2022, to the extent that during any twelve-month period commencing on the date of this Agreement, the principal amount of the Term Loan AK Facility prepaid in any one or more voluntary prepayments is greater than an amount equal to 10% of the original principal amount of the Term Loan AK Facility (any such amount, the “**Excess Early Redemption Proceeds**”), the Borrower will apply the Excess Early Redemption Proceeds to a voluntary prepayment of the Term Loan AK Facility as described in Clause 15 below.
15. At any time prior to December 1, 2022, upon the occurrence of any voluntary prepayment of any or all of the Term Loan AK Facility by the Borrower under the Term Loan AK Facility under Clause 10.5 (*Voluntary Prepayment*) of the Credit Agreement with any Excess Early Redemption Proceeds (other than a voluntary prepayment complying with Clauses 17, 18 or 20 below), the Borrower under the Term Loan AK Facility agrees to pay to the Facility Agent (for the account of the Telenet Additional Facility AK Lender) an amount equal to the Additional Amount (as defined below) (calculated as of a date no more than three Business Days prior to the date of the relevant prepayment notice), plus accrued and unpaid interest on the amount of the Term Loan AK Facility Loan prepaid to the due date of prepayment. Such payment shall be due and payable by the Borrower under the Term Loan AK Facility to the Facility Agent (for the account of the Telenet Additional Facility AK Lender) on the actual date of such prepayment.

For the purposes of this Clause 15:

Additional Amount means, with respect to the Term Loan AK Facility on any prepayment date applicable to the voluntary prepayment of any or all of the Term Loan AK Facility, the excess of:

- (i) the present value at such prepayment date of (i) the amount that would be payable in accordance with Clause 16 below in respect of the principal amount of the Term Loan AK Facility being prepaid if such amount were prepaid on December 1, 2022 pursuant to Clause 10.5 (*Voluntary Prepayment*) of the Credit Agreement, plus (ii) the principal amount of the Term Loan AK Facility being prepaid plus (iii) all required interest payments due on the principal amount of the Term Loan AK Facility being prepaid through December 1, 2022 (excluding accrued but unpaid interest to the prepayment date and assuming such interest payments are calculated at the rate of interest on the Term Loan AK Facility in effect on such prepayment date), computed using a discount rate equal to the Bund Rate plus 50 basis points; over
- (ii) the principal amount of the Term Loan AK Facility being prepaid.

Bund Rate means, with respect to any relevant date, the rate per annum equal to the equivalent yield to maturity as of such date of the Comparable German Bund Issue, assuming a price for the Comparable German Bund Issue (expressed as a percentage of its principal amount) equal to the Comparable German Bund Price for such relevant date, where:

- (i) **“Comparable German Bund Issue”** means the German Bundesanleihe security selected by any Reference German Bund Dealer as having a fixed maturity most nearly equal to the period from such prepayment date to December 1, 2022, and that would be utilized at the time of selection and in accordance with customary financial practice, in pricing new issues of euro denominated corporate debt securities in a principal amount approximately equal to the then outstanding principal amount of the Notes and of a maturity most nearly equal to December 1, 2022; provided, however, that, if the period from such prepayment date to December 1, 2022 is not equal to the fixed maturity of the German Bundesanleihe security selected by such Reference German Bund Dealer, the Bund Rate shall be determined by linear interpolation (calculated to the nearest one-twelfth of a year) from the yields of German Bundesanleihe securities for which such yields are given, except that if the period from such prepayment date to December 1, 2022 is less than one year, a fixed maturity of one year shall be used;
- (ii) **“Comparable German Bund Price”** means, with respect to any relevant date, the average of all Reference German Bund Dealer Quotations for such date (which, in any event, must include at least two such quotations), after excluding the highest and lowest such Reference German Bund Dealer Quotations, or if the Telenet Additional Facility AK Lender obtains fewer than four such Reference German Bund Dealer Quotations, the average of all such quotations;
- (iii) **“Reference German Bund Dealer”** means any dealer of German Bundesanleihe securities appointed by the Telenet Additional Facility AK Lender in good faith; and
- (iv) **“Reference German Bund Dealer Quotations”** means, with respect to each Reference German Bund Dealer and any relevant date, the average as determined by the Telenet Additional Facility AK Lender in good faith of the bid and offered prices for the Comparable German Bund Issue (expressed in each case as a percentage of its principal amount) quoted in writing to the Telenet Additional Facility AK Lender by such Reference German Bund Dealer at 3:30 p.m. Frankfurt am Main, Germany, time on a day no earlier than the third business day in Frankfurt preceding the relevant date.

16. On or after December 1, 2022 upon the occurrence of a voluntary prepayment of any or all of the Term Loan AK Facility by the Borrower under the Term Loan AK Facility under Clause 10.5 (*Voluntary prepayment*) of the Credit Agreement (other than a voluntary prepayment complying with Clause 17, 18, 19 and 21 below), the Borrower under the Term Loan AK Facility agrees to pay to the Facility Agent (for the account of the Telenet Additional Facility AK Lender) an amount equal to the relevant percentages of the principal amount of the Term Loan AK Facility being prepaid as set forth in the table below on, plus accrued and unpaid interest then due on the amount of the Term Loan AK Facility prepaid to, the due date of prepayment, if prepaid during the twelve-month period beginning on December 1 of the years indicated below:

<u>Year</u>	<u>Prepayment Price expressed as a percentage of the principal amount of the Term Loan AK Facility</u>
2022	1.750%
2023	0.875%
2024	0.438%
2025 and thereafter	0.000%

Such payment shall be due and payable by the Borrower under the Term Loan AK Facility to the Facility Agent (for the account of the Telenet Additional Facility AK Lender) on the actual date of such prepayment.

17. Notwithstanding Clauses 14, 15 and 16:
- (a) if the Telenet Additional Facility AK Lender purchases any Notes in connection with any tender offer or other offer to purchase for the Notes (a “**Tender Offer**”), the Borrower will prepay an aggregate principal amount of the Term Loan AK Facility, pro rata based on the aggregate principal amount of Notes tendered in such Tender Offer and at a prepayment price of par plus any premium paid or less any discount received by the Telenet Additional Facility AK Lender in connection with the purchase of the Notes in such Tender Offer, plus any accrued and unpaid interest to the due date of such prepayment; and
 - (b) if following any Tender Offer, the Telenet Additional Facility AK Lender is entitled to, and elects to, redeem any remaining Notes at a price equal to the price paid to each other holder in such Tender Offer, then the Borrower will prepay the remaining principal amount of the Term Loan AK Facility at a prepayment price of par plus any premium paid or less any discount received by the Telenet Additional Facility AK Lender in connection with the purchase of the Notes in such Tender Offer, plus any accrued and unpaid interest to the date that any interest accrues under the Notes in connection with such redemption.
18. At any time prior to December 1, 2022, upon the occurrence of any voluntary prepayment of the Term Loan AK Facility by the Borrower pursuant to Clause 10.5 (*Voluntary Prepayment*) of the Credit Agreement with the Net Cash Proceeds of one of more Equity Offerings (the “**Equity Offering Early Redemption Proceeds**”) in an amount of up to 40% of the Term Loan AK Facility Loan, the Borrower shall upon not less than 10 days nor more than 60 days’ notice make a payment to the Facility Agent (for the Account of the Telenet Additional Facility AK Lender in an amount (the “**Equity Claw Prepayment Premium**”) equal to 3.500 per cent. of the principal amount of the Term Loan AK Facility prepaid, together with any amounts due to the Telenet Additional Facility AK Lender in respect of a Tax Deduction plus accrued interest then due on the amount of the Term Loan AK Facility prepaid to the due date of prepayment. Such payment shall be due and payable by the Borrower to the Facility Agent (for the account of the Telenet Additional Facility AK Lender) under the Term Loan AK Facility on the actual date of such prepayment provided that:
- (a) at least 50% of the principal amount of the Term Loan AK Facility remains outstanding immediately after any such prepayment; and
 - (b) such prepayment is made not more than 180 days after the consummation of any Equity Offering.

For the purpose of this Clause 18:

“**Capital Stock**” of any person means any and all shares, interests, rights to purchase, warrants, options, participation or other equivalents of interests in (however designated) equity of such person, including any preferred stock, but excluding any debt securities convertible into such equity.

“Disqualified Stock” means, with respect to any person, any Capital Stock of such person which by its terms (or by the terms of any security into which it is convertible or for which it is exchangeable) or upon the happening of any event:

“Equity Offering” means (1) the distribution of Capital Stock of the Spin Holdco in connection with any Spin-Off or (2) a sale of (a) Capital Stock of Telenet Group BVBA or the Borrower (other than Disqualified Stock), (b) Capital Stock the proceeds of which are contributed as equity share capital to Telenet Group BVBA or the Borrower or as Subordinated Shareholder Loans or (3) Subordinated Shareholder Loans.

“Net Cash Proceeds” means, with respect to any issuance or sale of Capital Stock, Subordinated Shareholder Loans and other capital contributions, the cash proceeds of such issuance or sale net of attorneys’ fees, accountants’ fees, underwriters’ or placement agents’ fees, listing fees, discounts or commissions and brokerage, consultant and other fees and charges actually incurred in connection with such issuance or sale and net of taxes paid or payable as a result of such issuance or sale (after taking into account any available tax credit or deductions and any tax sharing arrangements).

19. In consideration for the Telenet Additional Facility AK-B Lender assuming the Telenet Additional Facility AK Lender’s obligations under the Indenture and provided that any corresponding conditions to such assumption set out in the Indenture have been satisfied substantially concurrently, the Telenet Additional Facility AK Lender agrees that upon receipt of not less than 8 Business Days’ written notice from the Borrower in relation to the Term Loan AK Facility and subject to satisfaction, substantially concurrently, of the other requirements of the Finance Documents it shall promptly on the transfer date (as agreed by the Facility Agent, the Telenet Additional Facility AK-B Lender and the Borrower) transfer its rights, title and obligations under the Term Loan AK Facility by executing a Transfer Certificate substantially in the form of Schedule 3 of this Telenet Additional Facility AK Accession Agreement in accordance with Clause 29.4 (*Procedure for transfer by way of novations*) of the Credit Agreement (and the Company shall procure the execution by the Telenet Additional Facility AK-B Lender of such Transfer Certificate) and deliver such Transfer Certificate to the Facility Agent (the **“Facility AK Loan Transfer”**). The Borrower shall have the right, but not the obligation, to deliver any such notice and to effect the Facility AK Loan Transfer. A copy of the written notice from the Borrower to the Telenet Additional Facility AK Lender shall also be provided to the Facility Agent on or around the date on which it is delivered to the Telenet Additional Facility AK Lender in accordance with this Clause 19. For the purpose of Clause 29.3(f) (*Transfers by Lenders*) of the Credit Agreement, the Facility Agent agrees to waive its right to receive a fee in connection with the Facility AK Loan Transfer.

Following the completion of the Facility AK Loan Transfer, the Company agrees that if requested by written notice from the Borrower, within 60 Business Days of the Transfer Date (as defined in the Transfer Certificate delivered pursuant to this Clause 19), it shall execute and deliver (or shall

procure that such other Telenet Additional Facility AK-B Borrower shall execute and deliver), and, provided that any corresponding conditions to such transaction set out in the Finance Documents and the Indenture have been satisfied substantially concurrently, shall procure that the Telenet Additional Facility AK-B Lender shall execute and deliver the Telenet Additional Facility AK-B Accession Agreement, to the Facility Agent and the Security Agent. The Borrower shall have the right, but not the obligation, to deliver such request and to effect the Belgian Issuer Rollover (as defined below). A copy of the written notice from the Borrower to the Company in respect of such request shall also be provided to the Facility Agent on or around the date on which it is delivered to the Company in accordance with this Clause 19.

20. In accordance with the Telenet Additional Facility AK-B Accession Agreement, on the Effective Date (as defined therein) the Telenet Additional Facility AK-B Lender will make or be deemed to have made, as applicable to the Telenet Additional Facility AK-B Borrower a Term Loan AK-B Facility Loan in an amount equal to its commitment under the Term Loan AK-B Facility (which shall be an amount equal to the then outstanding principal amount of the Term Loan AK Facility Loan) by, at the election of the Company, one or more of the following (the “**Belgian Issuer Rollover**”):

21. On the Effective Date (as defined in the Telenet Additional Facility AK-B Accession Agreement), accrued and unpaid interest in respect of the Term Loan AK Facility Loan shall be rolled over and deemed to be interest accrued in respect of the Term Loan AK-B Facility Loan. Such interest shall be due and payable, together with any additional accrued and unpaid interest on the Term Loan AK-B Facility Loan, on the first interest period payment date under the Term Loan AK-B Facility which shall correspond with the end of the Term selected in the relevant Request for the Term Loan AK Facility Loan under the Credit Agreement.
22. 24. Each of the Guarantors confirms that its obligations under Clause 17 (*Guarantee and Indemnity*) of the Credit Agreement, and each of the Existing Security Providers confirms that the Security Interests created pursuant to the Security Documents and its obligations under the Finance Documents, shall continue unaffected and that such obligations extend to the Total Commitments as increased by the addition of the Term Loan AK Facility and that such obligations shall be owed to each Finance Party including the Telenet Additional Facility AK Lender.
25. The Telenet Additional Facility AK Lender confirms to each Finance Party (unless such Finance Party is also an Obligor) that:

 - (b) it will continue to make its own independent appraisal of the creditworthiness of each Obligor and its related entities while any amount is or may be outstanding under the Credit Agreement or any Telenet Additional Facility Commitment is in force.

 - (c) any other amendment, waiver, consent or modification, whether effected by one instrument or through a series of amendments, to the Credit Agreement or any other Finance Document to be made to conform any Finance Document to any Liberty Global Reference Agreement (provided that any amendment, waiver, consent or modification to conform the Credit Agreement or any other Finance Document to any Liberty Global Reference Agreement referred to at paragraphs (vi) to (xi), (xiii) and (xiv) and in respect of the schedules in relation to covenants, events of default or definitions in the Liberty Global Reference Agreements referred to at paragraphs (ii), (iii) and (v) of that definition, shall be limited to those that are mechanical in nature unless specifically referenced in Schedule 4 (*Amendments, Waivers, Consents and Other Modifications*) to Schedule 10 (*Seventh Amendments, Waivers, Consents and Other Modifications*) of this Agreement and, in each case, any consequential amendments, waivers, consents or modifications),

28. Following receipt of an amendment request from the Company and/or the Facility Agent in connection with all or any of the proposed amendments set out under Clause 27 above (the “**Requested Amendments**”) the Telenet Additional Facility AK Lender shall confirm whether, having regard to the relevant provisions of the Indenture, it is required to consent to the Requested Amendments. If the Telenet Additional Facility AK Lender is required to give such consent, it hereby acknowledges and agrees that the Facility Agent and/or the Security Agent may, but shall not be required to, send to the Telenet Additional Facility AK Lender any further formal amendment request in connection with all, or any of the Requested Amendments and the Facility Agent and/or the Security Agent shall be authorised to consent on behalf of the Telenet Additional Facility AK Lender, as a Lender under one or more Telenet Additional Facilities, to any such Requested Amendments (and the Facility Agent and/or the Security Agent shall be authorised to enter into any necessary documentation in connection with the same) and such consent shall be taken into account in calculating whether the Majority Lenders, or the relevant requisite Lenders, have consented to the relevant amendment, waiver or other modification to the Finance Documents in accordance with Clause 28 (*Amendments and Waivers*) of the Credit Agreement and Clause 28 (*Consents, Amendments and Override*) of the Intercreditor Agreement (as applicable), and any clause relating to amendments in any other Finance Document.

SCHEDULE 4

AMENDMENTS, WAIVERS, CONSENTS AND OTHER MODIFICATIONS

All references to Clauses, Paragraphs, Schedules and definitions contained in this Schedule 4 are to Clauses, Paragraphs, Schedules and definitions of the Credit Agreement and the Intercreditor Agreement (as applicable). All capitalised terms used in this Schedule but not defined shall have the meanings given to such terms in the Credit Agreement and the Intercreditor Agreement (as applicable).

In this Schedule, references to “recent Liberty precedent” shall be construed to mean any Liberty Global Reference Agreement.

1. **Majority Lenders:** amend Clause 1.1 (*Definitions*) of the Credit Agreement to reduce the fractions specified in the definitions of Majority Lenders, from two thirds or more (for any or all purposes under the Credit Agreement or any other Finance Document (including for the purposes of any Telenet Additional Facility)) to more than 50.00% and to exclude the available commitments of defaulting lenders for the purposes of amendments or waivers.
2. **Super Majority Lenders:** amend Credit Agreement to provide for a definition of Super Majority Lenders so that amendments and waivers in respect of the release of any guarantee or security only requires the consent of Lenders representing 90.00% of Commitments.
3. **Tax:** amend Clause 12 (*Taxes*) to include any provisions (which are not materially adverse to the interests of the Lenders) required to accommodate an acceding Additional Borrower incorporated in a jurisdiction other than Belgium, the Netherlands, Luxembourg and the United States.
4. **Market Disruption:** amend the Credit Agreement to include market disruption provisions and the provision of alternative interest rates in accordance with recent Liberty precedents and/or, to the extent not inconsistent with recent Liberty precedent, the European leverage loan market.
5. **Geographic restrictions:** amend Clause 29.9 (*Additional Borrowers*) to provide that, in addition to the existing ability for an Additional Borrower incorporated in Benelux and the US to accede (without requiring any Lender consent), to provide an ability to accede Additional Borrowers incorporated in any other jurisdictions with the consent of the Majority Lenders.
6. **Holding Companies:** amend Clause 21.9(b)(iii) to expressly permit a merger of Telenet Group Holding NV, Telenet BVBA or Telenet Vlaanderen NV or any of their intermediate holding companies subject to compliance with the merger regime in recent Liberty precedents.
7. **Changes to Thresholds:** in the definition of Permitted Security Interest, permit the Company to secure Financial Indebtedness on a *pari passu* or junior ranking basis provided that (other than in the case of a refinancing of other secured Financial Indebtedness in the same or a lesser principal amount) the Net Total Debt to Consolidated Annualised EBITDA ratio on a pro forma basis would not be greater than 5.50:1.00 and provided that such Financial Indebtedness is subject to an intercreditor agreement on terms which are satisfactory to the Security Agent (acting on the instructions of the Majority Lenders) and where (in the case of such Financial Indebtedness being secured on a junior ranking basis) the rights of the holders of such Financial Indebtedness in respect of any payment will be contractually subordinated to the rights of the Lenders on terms comparable to the Loan Market Association’s form of intercreditor agreement at such time for mezzanine debt, as referred to in recent Liberty precedent.
8. **Security and Guarantee Release:** amend the relevant provisions of the Credit Agreement (in particular Clauses 21.17 (*Share Security*) and 29.11 (*Resignation of an Obligor (other than the Company)*)) to provide that, subject to certain thresholds being met no Obligor nor any other member of the Group is required to provide any Security or guarantee other than Security over the shares that it holds in any Obligor, Security required under the terms of the Credit Agreement in respect of Subordinated Shareholder Loans and a guarantee from the Obligors under the terms of the Credit Agreement and include a provision to authorise the Security Agent to release any other Security or guarantees other than the aforementioned and to release Security in respect of Permitted Disposals and to permit relevant Security to be released if a Guarantor resigns in accordance with Clause 29.11 (*Resignation of an Obligor (other than the Company)*) provided that the guarantor coverage test would still be met notwithstanding such release.
9. **Defaulting Lender:** include standard defaulting lender provisions used in recent Liberty precedents and/or, to the extent not inconsistent with recent Liberty precedent, the European leverage loan

market so as the commitments of a defaulting lender may be cancelled and it will have no rights to vote in respect of such cancelled commitments. Clarify that no commitment fee will be payable to a defaulting lender.

10. **Assignments/Transfers of Lenders:** clarify that the Company should have the right to withhold consent in respect of an assignment/transfer of the Revolving Facility to an entity which is not a lender under a revolving facility to the wider Liberty group (subject to no consent being required in the case of transfers to other Lenders or affiliates of Lenders or following an event of default which is continuing). There should be no unreasonableness qualifier on this right (in respect of the Revolving Facility only). Remove requirement of deemed consent within 10 Business Days in respect of each Revolving Facility.
11. **Assignments/Transfers of Obligors:** amend Clause 29.2 (*Assignment or Transfer by Obligors*) so that any Benelux Borrower may assign or transfer any of its rights and obligations under the Revolving Facility or the Term Loans to another Benelux Borrower and so that any US Borrower may do the same to another US Borrower, in each case, without the prior consent of the Lenders provided that a solvency opinion and legal opinion are provided, if requested, in accordance with recent Liberty precedents in respect of an equivalent provision.
12. **Amendments:**
 - (a) amend Clause 28 (*Amendments and waivers*) to introduce a class exception, whereby any amendment or waiver that relates only to the rights or obligations of a particular Utilisation or Facility and does not materially and adversely affect the rights or interests of Lenders in respect of other Utilisations or Facilities only requires the consent of the relevant proportion of Lenders participating in such Utilisation or Facility;
 - (b) amend Clause 28.2 (*Exceptions*) to require the consent of affected Lenders only and not all Lenders (and make any consequential changes by amending for example, all references to matters requiring all Lender consent to only requiring affected Lender consent); and
 - (c) include a new paragraph (d) to Clause 28.2 (*Exceptions*), to permit the Facility Agent to make technical, minor, operational and OID amendments without consent from any Lenders, on terms consistent with recent Liberty precedent as at the date of implementation of the amendments.
13. **Joint Ventures and solvent reorganisations:** amend the Credit Agreement to permit Telenet BVBA to contribute freely pledged loan and guarantee receivables to the Permitted Joint Venture's share capital without requiring a release from the Security Agent (subject to confirmation or re-taking of security over such pledged loan and guarantee receivables).
14. **Accession Agreements:** amend each Accession Agreement to remove the restriction which prevents:
 - (a) Telenet BVBA from arranging an Additional Facility if after giving effect to a utilisation thereunder, the ratio of Net Total Senior Debt to Consolidated Annualised EBITDA would be greater than 4.50:1; and
 - (b) the Company from requesting the transfer of an Additional Facility pursuant to Clause 28.3 (*Non-Consenting Lenders*).
15. **Non-Consenting Lenders:** remove the timing window of 90 days during which the Company may effect the provisions set out in Clause 28.3 (*Non-Consenting Lenders*).

3. **Amendments:**
 - (a) include a new clause such that where a request for a waiver of, or an amendment to, any provision of any Finance Document has been sent by the Facility Agent to the Lenders at the request of an Obligor, each Lender that does not respond to such request for waiver or amendment within 10 Business Days after receipt by it of such request (or within such other period as the Facility Agent and the Company shall specify), shall be excluded from the calculation in determining whether the requisite level of consent to such waiver or amendment was granted, and delete the proviso to the definition of Majority Lenders; and

SCHEDULE 4

AMENDMENTS, WAIVERS, CONSENTS AND OTHER MODIFICATIONS

All references to Clauses, Paragraphs, Schedules and definitions contained in this Schedule 4 are to Clauses, Paragraphs, Schedules and definitions of the Credit Agreement and the Intercreditor Agreement (as applicable). All capitalised terms used in this Schedule but not defined shall have the meanings given to such terms in the Credit Agreement and the Intercreditor Agreement (as applicable).

In this Schedule, references to “recent Liberty precedent” shall be construed to mean any Liberty Global Reference Agreement.

1. **Majority Lenders:** amend Clause 1.1 (*Definitions*) of the Credit Agreement to reduce the fractions specified in the definitions of Majority Lenders, from two thirds or more (for any or all purposes under the Credit Agreement or any other Finance Document (including for the purposes of any Telenet Additional Facility)) to more than 50.00% and to exclude the available commitments of defaulting lenders for the purposes of amendments or waivers.
2. **Super Majority Lenders:** amend Credit Agreement to provide for a definition of Super Majority Lenders so that amendments and waivers in respect of the release of any guarantee or security only requires the consent of Lenders representing 90.00% of Commitments.
3. **Tax:** amend Clause 12 (*Taxes*) to include any provisions (which are not materially adverse to the interests of the Lenders) required to accommodate an acceding Additional Borrower incorporated in a jurisdiction other than Belgium, the Netherlands, Luxembourg and the United States.
4. **Market Disruption:** amend the Credit Agreement to include market disruption provisions and the provision of alternative interest rates in accordance with recent Liberty precedents and/or, to the extent not inconsistent with recent Liberty precedent, the European leverage loan market.
5. **Geographic restrictions:** amend Clause 29.9 (*Additional Borrowers*) to provide that, in addition to the existing ability for an Additional Borrower incorporated in Benelux and the US to accede (without requiring any Lender consent), to provide an ability to accede Additional Borrowers incorporated in any other jurisdictions with the consent of the Majority Lenders.
6. **Holding Companies:** amend Clause 21.9(b)(iii) to expressly permit a merger of Telenet Group Holding NV, Telenet BVBA or Telenet Vlaanderen NV or any of their intermediate holding companies subject to compliance with the merger regime in recent Liberty precedents.
7. **Changes to Thresholds:** in the definition of Permitted Security Interest, permit the Company to secure Financial Indebtedness on a *pari passu* or junior ranking basis provided that (other than in the case of a refinancing of other secured Financial Indebtedness in the same or a lesser principal amount) the Net Total Debt to Consolidated Annualised EBITDA ratio on a pro forma basis would not be greater than 5.50:1.00 and provided that such Financial Indebtedness is subject to an intercreditor agreement on terms which are satisfactory to the Security Agent (acting on the instructions of the Majority Lenders) and where (in the case of such Financial Indebtedness being secured on a junior ranking basis) the rights of the holders of such Financial Indebtedness in respect of any payment will be contractually subordinated to the rights of the Lenders on terms comparable to the Loan Market Association’s form of intercreditor agreement at such time for mezzanine debt, as referred to in recent Liberty precedent.
8. **Security and Guarantee Release:** amend the relevant provisions of the Credit Agreement (in particular Clauses 21.17 (*Share Security*) and 29.11 (*Resignation of an Obligor (other than the Company)*)) to provide that, subject to certain thresholds being met no Obligor nor any other member of the Group is required to provide any Security or guarantee other than Security over the shares that it holds in any Obligor, Security required under the terms of the Credit Agreement in respect of Subordinated Shareholder Loans and a guarantee from the Obligors under the terms of the Credit Agreement and include a provision to authorise the Security Agent to release any other Security or guarantees other than the aforementioned and to release Security in respect of Permitted Disposals and to permit relevant Security to be released if a Guarantor resigns in accordance with Clause 29.11 (*Resignation of an Obligor (other than the Company)*) provided that the guarantor coverage test would still be met notwithstanding such release.
9. **Defaulting Lender:** include standard defaulting lender provisions used in recent Liberty precedents and/or, to the extent not inconsistent with recent Liberty precedent, the European leverage loan

market so as the commitments of a defaulting lender may be cancelled and it will have no rights to vote in respect of such cancelled commitments. Clarify that no commitment fee will be payable to a defaulting lender.

10. **Assignments/Transfers of Lenders:** clarify that the Company should have the right to withhold consent in respect of an assignment/transfer of the Revolving Facility to an entity which is not a lender under a revolving facility to the wider Liberty group (subject to no consent being required in the case of transfers to other Lenders or affiliates of Lenders or following an event of default which is continuing). There should be no unreasonableness qualifier on this right (in respect of the Revolving Facility only). Remove requirement of deemed consent within 10 Business Days in respect of each Revolving Facility.
11. **Assignments/Transfers of Obligors:** amend Clause 29.2 (*Assignment or Transfer by Obligors*) so that any Benelux Borrower may assign or transfer any of its rights and obligations under the Revolving Facility or the Term Loans to another Benelux Borrower and so that any US Borrower may do the same to another US Borrower, in each case, without the prior consent of the Lenders provided that a solvency opinion and legal opinion are provided, if requested, in accordance with recent Liberty precedents in respect of an equivalent provision.
12. **Amendments:**
 - (a) amend Clause 28 (*Amendments and waivers*) to introduce a class exception, whereby any amendment or waiver that relates only to the rights or obligations of a particular Utilisation or Facility and does not materially and adversely affect the rights or interests of Lenders in respect of other Utilisations or Facilities only requires the consent of the relevant proportion of Lenders participating in such Utilisation or Facility;
 - (b) amend Clause 28.2 (*Exceptions*) to require the consent of affected Lenders only and not all Lenders (and make any consequential changes by amending for example, all references to matters requiring all Lender consent to only requiring affected Lender consent); and
 - (c) include a new paragraph (d) to Clause 28.2 (*Exceptions*), to permit the Facility Agent to make technical, minor, operational and OID amendments without consent from any Lenders, on terms consistent with recent Liberty precedent as at the date of implementation of the amendments.
13. **Joint Ventures and solvent reorganisations:** amend the Credit Agreement to permit Telenet BVBA to contribute freely pledged loan and guarantee receivables to the Permitted Joint Venture's share capital without requiring a release from the Security Agent (subject to confirmation or re-taking of security over such pledged loan and guarantee receivables).
14. **Accession Agreements:** amend each Accession Agreement to remove the restriction which prevents:
 - (d) Telenet BVBA from arranging an Additional Facility if after giving effect to a utilisation thereunder, the ratio of Net Total Senior Debt to Consolidated Annualised EBITDA would be greater than 4.50:1; and
 - (e) the Company from requesting the transfer of an Additional Facility pursuant to Clause 28.3 (*Non-Consenting Lenders*).
15. **Non-Consenting Lenders:** remove the timing window of 90 days during which the Company may effect the provisions set out in Clause 28.3 (*Non-Consenting Lenders*).

3. **Amendments:**
 - (a) include a new clause such that where a request for a waiver of, or an amendment to, any provision of any Finance Document has been sent by the Facility Agent to the Lenders at the request of an Obligor, each Lender that does not respond to such request for waiver or amendment within 10 Business Days after receipt by it of such request (or within such other period as the Facility Agent and the Company shall specify), shall be excluded from the calculation in determining whether the requisite level of consent to such waiver or amendment was granted, and delete the proviso to the definition of Majority Lenders; and

 - (ii) a Senior Secured Event of Default (other than a Senior Secured Payment Default) and/or a Second Lien Event of Default (other than a Second Lien Payment Default) is continuing, from the date which is one Business Day after the date on which the Senior Agent, the Senior Secured Notes Representative(s), the Second Lien Agent, the Second Lien Notes Trustee or the Pari Passu Debt Representative(s) (as the case may be) delivers a notice (a **High Yield Payment Stop Notice**) specifying the event or circumstance in relation to that Senior Secured Event of Default or Second Lien Event of Default (as applicable) to the HY Issuer, the Security Agent and the High Yield Representative(s) until the earliest of:
 - (A) the date falling 179 days after delivery of that High Yield Payment Stop Notice;
 - (B) in relation to payments of High Yield Notes Liabilities, if a High Yield Standstill Period is in effect at any time after delivery of that High Yield Payment Stop Notice, the date on which that High Yield Standstill Period expires;
 - (C) the date on which the relevant Senior Secured Event of Default and/or Second Lien Event of Default has been remedied or waived in accordance with the Senior Facilities Agreement, the Secured Debt Documents or the Second Lien Finance Documents (as applicable);

- (E) the Senior Secured Discharge Date (in the case of a Senior Secured Event of Default) or the Second Lien Discharge Date (in the case of a Second Lien Event of Default).
- (b) Unless the High Yield Representative(s) waive this requirement:
 - (i) a new High Yield Payment Stop Notice may not be delivered unless and until 360 days have elapsed since the delivery of the immediately prior High Yield Payment Stop Notice;
 - (ii) no High Yield Payment Stop Notice may be delivered in reliance on a Senior Secured Event of Default more than 45 days after the date the Senior Agent, each Senior Secured Notes Representative and each Pari Passu Debt Representative (as applicable) received notice of that Senior Secured Event of Default; and

- (b) the relevant Debtor then promptly pays to the High Yield Creditors an amount equal to any Payments which had accrued under the High Yield Notes Finance Documents and which would have been Permitted High Yield Payments but for that High Yield Payment Stop Notice or Senior Secured Payment Default and/or a Second Lien Payment Default,

then any Event of Default (including any cross default or similar provision under any other Debt Document) which may have occurred as a result of that suspension of Payments shall be waived and any High Yield Enforcement Notice which may have been issued as a result of that Event of Default shall be waived, in each case without any further action being required on the part of the High Yield Creditors or any other Creditor.

the recipient or beneficiary of that payment, distribution, set-off or combination will promptly pay all amounts and distributions received to the Security Agent for application under Clause 17.1 (Order of application of Group Recoveries) (as applicable) after deducting the costs, liabilities and expenses (if any) reasonably incurred in recovering or receiving that payment or distribution and, pending that payment, will hold, to the extent permitted by applicable law, those amounts and distributions on trust for the Security Agent.

It is hereby agreed that, in relation to any jurisdiction the courts of which would not recognise or give effect to the trust expressed to be created by this Clause, such amounts and distributions shall be held by such Subordinated Creditor in a separate account and the relationship between the

Security Agent and that Subordinated Creditor in respect of such amounts and distributions shall be construed as one of principal and agent.

10.5 No Reduction or Discharge

As between the Debtors and the Subordinated Creditors, the Subordinated Liabilities will be deemed not to have been reduced or discharged to the extent of any payment or distribution to the Security Agent under Clause 10.4 (Turnover of Subordinated Liabilities) and no Debtor shall be released from the liability to make any payment or distribution of any kind whatsoever (including of default interest, which shall continue to accrue) with respect to or on account of any Subordinated Liabilities by the operation of Clause 10.1 (Restriction on Payment: Subordinated Liabilities) even if its obligation to make that payment or distribution is restricted at any time by the terms of Clause 10.1 (Restriction on Payment: Subordinated Liabilities).

10.6 Indemnity

Immediately after the Final Discharge Date, the Debtors will (to the extent permitted by law) fully indemnify each Subordinated Creditor upon demand for the amount of any payment or distribution to the Security Agent under Clause 10.4 (Turnover of Subordinated Liabilities).

10.7 No Subrogation of Subordinated Creditors

Without the prior Consent of:

- (a) the Majority Senior Creditors (until after the Senior Discharge Date);
- (b) the relevant Senior Secured Notes Representative(s) (if on or before the Senior Secured Notes Discharge Date);

until after the Final Discharge Date, the Subordinated Creditors may not in any circumstances exercise any subrogation rights relating to the rights of the Senior Lenders in respect of the Senior Lender Liabilities, the Pari Passu Creditors in respect of the Pari Passu Debt Liabilities, the Senior Secured Notes Creditors in respect of the Senior Secured Notes Liabilities, the Second Lien Notes Creditors in respect of the Second Lien Notes Liabilities, the Second Lien Lenders in respect of the Second Lien Loan Liabilities or any Security or guarantee arising under the Senior Finance Documents, the Pari Passu Debt Documents, the Senior Secured Notes Finance Document and/or the Second Lien Finance Documents (as applicable).

10.8 Amendments to Subordinated Creditor Documents

Until after the Final Discharge Date, no Debtor nor any Subordinated Creditor will amend any term of any Subordinated Creditor Document in a manner or to an extent which would result in:

- (a) any Debtor being subject to obligations which would conflict with any provisions of this Deed; or
- (b) the ranking and/or subordination provided for in this Deed, being affected in any way that is materially adverse to the interests of the Senior Finance Parties, the Pari Passu Creditors, the Senior Secured Notes Finance Parties, the Hedge Counterparties, the Second Lien Finance Parties and/or the High Yield Notes Finance Parties,

in each case without the prior Consent of:

- (i) the Majority Senior Creditors (if on or before the Senior Discharge Date),
- (ii) (to the extent otherwise prohibited under the Senior Secured Notes Indenture(s) pursuant to which any Senior Secured Notes remain outstanding) the relevant Senior Secured Notes Representative(s) (if on or before the Senior Secured Notes Discharge Date),

- (iii) the relevant Pari Passu Debt Representative(s) (if on or before the Pari Passu Debt Discharge Date),
- (iv) the relevant Second Lien Representative(s) (if on or before the Second Lien Notes Discharge Date);
- (v) the Majority Second Lien Lenders (if on or before the Second Lien Loan Discharge Date); and
- (vi) the High Yield Notes Trustee (if on or before the High Yield Discharge Date).

 - (i) in any material respect, any law or regulation or official judgment or decree applicable to it;
 - (ii) in any material respect, its constitutional documents; or
 - (iii) any material agreement or instrument to which it is a party or binding on any of its assets, where such violation would or is reasonably likely to have a material adverse effect on the ability of that Subordinated Creditor to perform its payment obligations thereunder.

10.10 Obligation to accede as a Subordinated Creditor

No Debtor or member of the Group may incur any Subordinated Liabilities unless the relevant creditor is an Effective Date Subordinated Creditor or has executed and delivered to the Security Agent a Creditor Accession Undertaking as a Subordinated Creditor, agreeing to be bound by all the terms of this Deed as if it had originally been party to this Deed as a Subordinated Creditor.

11. INTRA-GROUP LENDERS AND INTRA-GROUP LIABILITIES

11.1 Restriction on Payment: Intra-Group Liabilities

Prior to the later of the Final Discharge Date and the Subordinated Discharge Date, the Debtors shall not, and shall procure that no member of the Group will, make any Payments of the Intra-Group Liabilities at any time unless that Payment is permitted under Clause 11.2 (Permitted Payments: Intra-Group Liabilities); or the taking or receipt of that Payment is permitted under paragraph (c) of Clause 11.7 (Permitted Enforcement: Intra-Group Lenders).

11.2 Permitted Payments: Intra-Group Liabilities

- (a) Subject to paragraph (b) below, the Debtors may make Payments in respect of the Intra-Group Liabilities (whether of principal, interest or otherwise) from time to time.

11.3 Payment obligations continue

No Debtor shall be released from the liability to make any Payment (including of default interest, which shall continue to accrue) under any Debt Document by the operation of Clauses 11.1 (Restriction on Payment: Intra-Group Liabilities) and 11.2 (Permitted Payments: Intra-Group Liabilities) even if its obligation to make that Payment is restricted at any time by the terms of any of those Clauses.

11.4 Acquisition of Intra-Group Liabilities

- (a) Subject to paragraph (b) below, each Debtor may, and may permit any member of the Group to:
 - (i) enter into any Liabilities Acquisition; or
 - (ii) beneficially own all or any part of the share capital of a company that is party to a Liabilities Acquisition,
 in respect of any Intra-Group Liabilities at any time.
- (b) Subject to paragraph (c) below, no action described in paragraph (a) above may take place in respect of any Intra-Group Liabilities if:
 - (i) that action would result in a breach of (A) (prior to the Senior Discharge Date) the Senior Facilities Agreement, (B) (prior to the Senior Secured Notes Discharge Date) the Senior Secured Notes Indenture(s) pursuant to which any Senior Secured Notes remain outstanding, (C) (prior to the Pari Passu Debt Discharge Date) the Pari Passu Debt Document(s), (D) (prior to the Second Lien Loan Discharge Date) the Second Lien Loan Finance Documents or (E) (prior to the Second Lien Notes Discharge Date) the Second Lien Notes Finance Documents; or
 - (ii) at the time of that action, an Acceleration Event has occurred.
- (c) The restrictions in paragraph (b) above shall not apply if:
 - (i) prior to the later of the Senior Secured Discharge Date and the Second Lien Discharge Date, the applicable Instructing Group Consents to that action; or

11.5 Security: Intra-Group Lenders

Prior to the later of the Final Discharge Date and the Subordinated Discharge Date, the Intra-Group Lenders may not take, accept or receive the benefit of any Security, guarantee, indemnity or other assurance against loss in respect of the Intra-Group Liabilities unless:

- (a) that Security, guarantee, indemnity or other assurance against loss is not prohibited under the terms of the Secured Debt Documents; or
- (b) prior to:
 - (i) the Senior Secured Discharge Date, the prior Consent of the Majority Senior Creditors, (to the extent otherwise prohibited under a Senior Secured Notes Indenture) the Senior

11.6 Restriction on enforcement: Intra-Group Lenders

Subject to Clause 11.7 (Permitted Enforcement: Intra-Group Lenders), none of the Intra-Group Lenders shall be entitled to take any Enforcement Action in respect of any of the Intra-Group Liabilities at any time prior to the Final Discharge Date.

11.7 Permitted Enforcement: Intra-Group Lenders

After the occurrence of an Insolvency Event in relation to any Debtor or any member of the Group, each Intra-Group Lender may (unless otherwise directed by the Security Agent or unless the Security Agent has taken, or has given notice that it intends to take, action on behalf of that Intra-Group Lender in accordance with Clause 12.5 (Filing of claims) or under the Transaction Security Documents creating Security over the relevant Intra-Group Liabilities), exercise any right it may otherwise have against that member of the Group to:

- (a) accelerate any of that member of the Group's Intra-Group Liabilities or declare them prematurely due and payable or payable on demand;
- (b) make a demand under any guarantee, indemnity or other assurance against loss given by that member of the Group in respect of any Intra-Group Liabilities;
- (c) exercise any right of set-off or take or receive any Payment in respect of any Intra-Group Liabilities of that member of the Group; or
- (d) claim and prove in the liquidation of that member of the Group for the Intra-Group Liabilities owing to it.

11.8 Representations: Intra-Group Lenders

Each Intra-Group Lender which is not a Debtor represents and warrants to the Senior Secured Creditors, the Second Lien Finance Parties, the Security Agent and the Agents that:

- (a) it is a company duly organised or a partnership duly formed, in either case, validly existing under the laws of its jurisdiction of incorporation or establishment;
- (b) subject to the Legal Reservations, the obligations expressed to be assumed by it in this Deed are legal, valid, binding and enforceable obligations; and
- (c) the entry into and performance by it of, and the transactions contemplated by, this Deed do not and will not violate:
 - (i) in any material respect, any law or regulation or official judgment or decree applicable to it;
 - (ii) in any material respect, its constitutional documents; or
 - (iii) any material agreement or instrument to which it is a party or binding on any of its assets, where such violation would or is reasonably likely to have a material adverse effect on the ability of that Intra-Group Lender to perform its payment obligations thereunder.

12. EFFECT OF INSOLVENCY EVENT

12.1 SFA Cash Cover

This Clause 12 is subject to Clause 17.3 (Treatment of SFA Cash Cover and Senior Lender Cash Collateral) and, in the case of Notes Trustee Amounts, to Clause 29.1(a) and (c).

12.2 Payment of distributions

- (a) After the occurrence of an Insolvency Event in relation to any Debtor or any member of the Group, any Party entitled to receive a distribution out of the assets of that Debtor or member of the Group in respect of Liabilities owed to that Party shall, to the extent it is able to do so, direct the person responsible for the distribution of the assets of that Debtor or member of the Group to pay that distribution to the Security Agent until the Liabilities owing to the Secured Parties have been paid in full;
- (b) The Security Agent shall apply distributions paid to it under paragraph (a) above in accordance with Clause 17 (Application of Proceeds) and pending such application the Security Agent will hold such distribution for its own account, as joint and several creditor in respect of all obligations owed by all Debtors to the Finance Parties under the Finance Documents.

12.3 Set-Off

- (a) Subject to paragraph (b) below, to the extent that any Debtor's or member of the Group's Liabilities are discharged by way of set-off (mandatory or otherwise) after the occurrence of an Insolvency Event in relation to that Debtor or member of the Group, any Creditor which benefited from that set-off shall pay an amount equal to the amount of the Liabilities owed to it which are discharged by that set-off to the Security Agent for application in accordance with Clause 17 (Application of Proceeds).
- (b) Paragraph (a) above shall not apply to:
 - (i) any such discharge of the Multi-account Overdraft Liabilities to the extent that the relevant discharge represents a reduction from a Permitted Gross Amount of a Multi-account Overdraft Facility to or towards its Designated Net Amount; and
 - (ii) any netting by a Hedge Counterparty or a Hedging Ancillary Lender:
 - (A) that constitutes Close-Out Netting, Payment Netting, Inter-Hedging Agreement Netting or Inter-Hedging Ancillary Document Netting; or
 - (B) to the extent that the related Hedging Liabilities are permitted to be paid under Clause 4.6 (Permitted Enforcement: Hedge Counterparties).

12.4 Non-cash distributions

If the Security Agent or any other Secured Party receives a distribution in a form other than in cash in respect of any of the Liabilities (other than as contemplated in Clause 16.2(e)(ii)(A)), the Liabilities will not be reduced by that distribution until and except to the extent that the realisation proceeds are actually applied towards the Liabilities.

12.5 Filing of claims

Without prejudice to any Ancillary Facility Lender's right of netting or set-off relating to a Multi-account Overdraft Facility (to the extent that the netting or set-off represents a reduction from a Permitted Gross Amount of that Multi-account Overdraft Facility to or towards its Designated Net Amount), after the occurrence of an Insolvency Event in relation to any Debtor or member of the Group, each Creditor irrevocably authorises the Security Agent (acting in accordance with Clause 12.7 (Security Agent instructions)), on its behalf, to:

- (a) take any Enforcement Action (in accordance with the terms of this Deed) against that Debtor or member of the Group;
- (b) demand, sue, prove and give receipt for any or all of that Debtor's or member of the Group's Liabilities;
- (c) collect and receive all distributions on, or on account of, any or all of that Debtor's or member of the Group's Liabilities; and
- (d) file claims, take proceedings and do all other things the Security Agent considers reasonably necessary to recover that Debtor's or member of the Group's Liabilities.

12.6 Creditors' actions

Each Creditor will:

- (a) do all things that the Security Agent (acting in accordance with Clause 12.7 (Security Agent instructions)) reasonably requests in order to give effect to this Clause 12; and
- (b) if the Security Agent is not entitled to take any of the actions contemplated by this Clause 12 or if the Security Agent (acting in accordance with Clause 12.7 (Security Agent instructions)) requests that a Creditor take that action, undertake that action itself in accordance with the instructions of the Security Agent (acting in accordance with Clause 12.7 (Security Agent instructions)) or grant a power of attorney to the Security Agent (on such terms as the Security Agent (acting in accordance with Clause 12.7 (Security Agent instructions)) may reasonably require, although no Notes Trustee shall be under any obligation to grant such powers of attorney) to enable the Security Agent to take such action.

12.7 Security Agent instructions

For the purposes of Clause 12.5 (Filing of claims) and Clause 12.6 (Creditors' actions) the Security Agent shall act:

- (a) (except in relation to the Liabilities of a HY Issuer) on the instructions of the group of Primary Creditors entitled, at that time, to give instructions under Clause 15.2 (Enforcement instructions) or Clause 15.3 (Manner of enforcement); or
- (b) in the absence of any such instructions, as the Security Agent sees fit.

12.8 Limitation by Applicable Laws

- (a) Each of the provisions of this Clause 12 shall apply only to the extent permitted by applicable laws.
- (b) Nothing in this Clause 12:
 - (i) entitles any Party to exercise or require any other Party to exercise such power or voting or representation to waive, reduce, discharge, extend the due date for payment or reschedule any of the Senior Secured Creditor Liabilities, the Hedging Liabilities, Second Lien Liabilities or High Yield Notes Liabilities; or
 - (ii) shall be deemed to require any Senior Secured Parties to hold a meeting of the relevant Creditors or pass any resolution at such meeting or give any consent pursuant to the terms of the relevant Secured Debt Documents or High Yield Notes Finance Documents.

13. TURNOVER OF RECEIPTS

13.1 SFA Cash Cover

This Clause 13 is subject to Clause 17.3 (Treatment of SFA Cash Cover and Senior Lender Cash Collateral) and, in the case of Notes Trustee Amounts, to Clauses 29.1(a) and (c).

13.2 Turnover by the Creditors

Subject to Clause 13.3 (Exclusions), Clause 13.4 (Permitted assurance and receipts) and Clause 19.1 (Senior Secured Creditor Liabilities Refinancing) and, in the case of Notes Trustee Amounts, to Clauses 29.1(a) and (c), if at any time prior to the Final Discharge Date, any Creditor receives or recovers from any Debtor or any member of the Group:

- (a) any Payment or distribution of, or on account of or in relation to, any of the Liabilities which is not either:
 - (i) a Permitted Payment; or
 - (ii) made in accordance with Clause 17 (Application of Proceeds);
- (b) other than where Clause 12.3 (Set-Off) applies, any amount by way of set-off in respect of any of the Liabilities owed to it which does not give effect to a Permitted Payment;

- (c) notwithstanding paragraphs (a) and (b) above, and other than where Clause 12.3 (Set-Off) applies, any amount:
 - (i) on account of, or in relation to, any of the Liabilities:
 - (A) after the occurrence of a Distress Event; or
 - (B) as a result of any other litigation or proceedings against a Debtor or a member of the Group (other than after the occurrence of an Insolvency Event in respect of that Debtor or member of the Group); or
 - (ii) by way of set-off in respect of any of the Liabilities owed to it after the occurrence of a Distress Event,

other than, in each case, any amount received or recovered in accordance with Clause 17 (Application of Proceeds);
- (d) the proceeds of any enforcement of any Transaction Security except in accordance with Clause 17 (Application of Proceeds); or
- (e) other than where Clause 12.3 (Set-Off) or Clause 19.1 (Senior Secured Creditor Liabilities Refinancing) applies, any distribution in cash or in kind or Payment of, or on account of or in relation to, any of the Liabilities owed by any Debtor or member of the Group which is not in accordance with Clause 17 (Application of Proceeds) and which is made as a result of, or after, the occurrence of an Insolvency Event in respect of that Debtor or member of the Group,

that Creditor will:

- (i) in relation to receipts and recoveries not received or recovered by way of set-off:
 - (A) hold an amount of that receipt or recovery equal to the Relevant Liabilities (or if less, the amount received or recovered) on trust for the Security Agent and promptly pay that amount to the Security Agent for application in accordance with the terms of this Deed; and
 - (B) promptly pay an amount equal to the amount (if any) by which the receipt or recovery exceeds the Relevant Liabilities to the Security Agent for application in accordance with the terms of this Deed;
- (ii) in relation to receipts and recoveries received or recovered by way of set-off, promptly pay an amount equal to that recovery to the Security Agent for application in accordance with the terms of this Deed; and
- (iii) at the option of the relevant Creditor, (i) the Liability of the Debtors to such Creditor shall be increased (or treated as not having been reduced) by the amount turned over to the Security Agent pursuant to this Clause 13.2 (Turnover by the Creditors), or (ii) the Debtors shall fully indemnify such Creditor for such amount.

It is hereby agreed that, in relation to any jurisdiction the courts of which would not recognise or give effect to the trust expressed to be created by this Clause, such receipts and recoveries shall be held by such Creditor in a separate account and the relationship between the Security Agent and that Creditor in respect of such receipt and recoveries shall be construed as one of principal and agent.

13.3 Exclusions

Clause 13.2 (Turnover by the Creditors) shall not apply to any receipt or recovery:

- (a) by way of netting by a Hedge Counterparty or a Hedging Ancillary Lender that constitutes Close-Out Netting, Payment Netting, Inter-Hedging Agreement Netting or Inter-Hedging Ancillary Document Netting by a Hedge Counterparty or a Hedging Ancillary Lender;
- (b) by an Ancillary Facility Lender by way of that Ancillary Facility Lender's right of netting or set-off relating to a Multi-account Overdraft Facility (to the extent that that netting or set-off represents a reduction from a Permitted Gross Amount of that Multi-account Overdraft Facility to or towards its Designated Net Amount);
- (c) any refinancing subject to Clause 19 (Refinancing of Primary Creditor Liabilities); or

- (d) made in accordance with Clause 18 (Equalisation).

13.4 Permitted assurance and receipts

Nothing in this Deed shall restrict the ability of any Primary Creditor to:

- (a) arrange with any person which is not a Debtor or a member of the Group or a Holding Company of any Debtor or member of the Group any assurance against loss in respect of, or reduction of its credit exposure to, a Debtor (including assurance by way of credit based derivative or sub-participation); or
- (b) make any assignment or transfer permitted by Clause 22 (Changes to the Parties),
- which:

- (i) is permitted by the Senior Facilities Agreement and any Second Lien Facilities Agreement; and
- (ii) is not in breach of any provision of (if prior to the Senior Secured Discharge Date in respect of the Senior Secured Notes) the Senior Secured Notes Indenture(s) pursuant to which any Senior Secured Notes remain outstanding, (if prior to the Pari Passu Debt Discharge Date in respect of any Pari Passu Debt) the Pari Passu Debt Document(s) pursuant to which such Pari Passu Debt remains outstanding, (if prior to the Second Lien Notes Discharge Date in respect of the Second Lien Notes) the Second Lien Notes Indenture(s) pursuant to which any Second Lien Notes remain outstanding and (if prior to the High Yield Discharge Date in respect of the High Yield Notes) the High Yield Notes Indenture(s) pursuant to which any High Yield Notes remain outstanding,

and that Primary Creditor shall not be obliged to account to any other Party for any sum received by it as a result of that action.

13.5 Sums received by Debtors or Security Grantors

If any of the Debtors or Security Grantors receives or recovers any sum which, under the terms of any of the Debt Documents, should have been paid to the Security Agent, that Debtor or Security Grantors will:

- (a) hold an amount of that receipt or recovery equal to the Relevant Liabilities (or if less, the amount received or recovered) on trust for the Security Agent and promptly pay that amount to the Security Agent for application in accordance with the terms of this Deed; and
- (b) promptly pay an amount equal to the amount (if any) by which the receipt or recovery exceeds the Relevant Liabilities to the Security Agent for application in accordance with the terms of this Deed.

It is hereby agreed that, in relation to any jurisdiction the courts of which would not recognise or give effect to the trust expressed to be created by this Clause, such receipts and recoveries shall be held by such Creditor in a separate account and the relationship between the Security Agent and that Debtors and Security Grantors in respect of such receipt and recoveries shall be construed as one of principal and agent.

13.6 Saving provision

If, for any reason, any of the trusts expressed to be created in this Clause 13 should fail or be unenforceable, the affected Creditor, Debtor or Security Grantors will promptly pay an amount equal to that receipt or recovery to the Security Agent to the extent permitted by applicable law to be held on trust by the Security Agent for application in accordance with the terms of this Deed.

14. REDISTRIBUTION

14.1 Recovering Creditor's rights

- (a) Any amount paid by a Creditor (a **Recovering Creditor**) to the Security Agent under Clause 12 (Effect of Insolvency Event) or Clause 13 (Turnover of Receipts) shall be treated as having been paid by the relevant Debtor or Security Grantor and distributed to the Security Agent, Agents, Arrangers and Primary Creditors (each a **Sharing Creditor**) in accordance with the terms of this Deed.

- (b) On a distribution by the Security Agent under paragraph (a) above of a Payment received by a Recovering Creditor from a Debtor or Security Grantor, as between the relevant Debtor or Security Grantor and the Recovering Creditor an amount equal to the amount received or recovered by the Recovering Creditor and paid to the Security Agent (as the case may be) (the **Shared Amount**) will be treated as not having been paid by that Debtor or Security Grantor.

14.2 Reversal of redistribution

- (a) If any part of the Shared Amount received or recovered by a Recovering Creditor becomes repayable to a Debtor or Security Grantor and is repaid by that Recovering Creditor to that Debtor or Security Grantor, then:
 - (i) each Sharing Creditor shall (subject, in the case of Notes Trustee Amounts, to Clauses 29.1(a) and (c)), upon request of the Security Agent, pay to the Security Agent for the account of that Recovering Creditor an amount equal to the appropriate part of its share of the Shared Amount (together with an amount as is necessary to reimburse that Recovering Creditor for its proportion of any interest on the Shared Amount which that Recovering Creditor is required to pay) (the **Redistributed Amount**); and
 - (ii) as between the relevant Debtor or Security Grantor and each relevant Sharing Creditor, an amount equal to the relevant Redistributed Amount will be treated as not having been paid by that Debtor or Security Grantor.
- (b) The Security Agent shall not be obliged to pay any Redistributed Amount to a Recovering Creditor under sub-paragraph (a)(i) above until it has been able to establish to its satisfaction that it has actually received that Redistributed Amount from the relevant Sharing Creditor.

14.3 Deferral of Subrogation

No Creditor, Debtor or Security Grantor will exercise any rights which it may have by reason of the performance by it of its obligations under the Debt Documents to take the benefit (in whole or in part and whether by way of subrogation or otherwise) of any rights under the Debt Documents of any Creditor which ranks ahead of it in accordance with the priorities set out in Clause 2 (Ranking and Priority) until such time as all of the Liabilities owing to each prior ranking Creditor (or, in the case of any Debtor or Security Grantor, owing to each Creditor) have been irrevocably paid in full.

15. ENFORCEMENT OF TRANSACTION SECURITY

15.1 SFA Cash Cover

This Clause 15 is subject to Clause 17.3 (Treatment of SFA Cash Cover and Senior Lender Cash Collateral).

15.2 Enforcement instructions

- (a) The Security Agent may refrain from enforcing the Transaction Security unless instructed otherwise by:
 - (i) the Instructing Group; or
 - (ii) if required under paragraph (c) below, the Majority Second Lien Creditors.
- (b) Subject to the Transaction Security having become enforceable in accordance with its terms:
 - (i) the Instructing Group; or
 - (ii) to the extent permitted to enforce or to require the enforcement of the Transaction Security prior to the Senior Discharge Date under Clause 8.12 (Permitted enforcement: Second Lien Creditors), the Majority Second Lien Creditors,

may give or refrain from giving instructions to the Security Agent to enforce or refrain from enforcing the Transaction Security as they see fit.
- (c) Prior to the Senior Discharge Date:
 - (i) if the Instructing Group has instructed the Security Agent not to enforce or to cease enforcing the Transaction Security; or
 - (ii) in the absence of instructions from the Instructing Group,

and, in each case, the Instructing Group has not required any Debtor to make a Distressed Disposal, the Security Agent shall give effect to any instructions to enforce the Transaction Security which the Majority Second Lien Creditors are then entitled to give to the Security Agent under Clause 8.12 (Permitted enforcement: Second Lien Creditors).

- (d) Notwithstanding the preceding paragraph (c) if at any time the Majority Second Lien Creditors are then entitled to give the Security Agent instructions to enforce the Transaction Security pursuant to the preceding paragraph (c) and the Majority Second Lien Creditors either give such instructions or indicate any intention to give such instructions, then either the Senior Agent or the Senior Secured Notes Representative(s) may give instructions to the Security Agent to enforce the Transaction Security as such Senior Agent or the Senior Secured Notes Representative(s) sees fit in lieu of any instructions to enforce given by the Majority Second Lien Creditors under Clause 8.12 (Permitted enforcement: Second Lien Creditors) and the Security Agent shall act on the first such instructions received from the Senior Agent or the Senior Secured Notes Representative(s).
- (e) The Security Agent is entitled to rely on and comply with instructions given, or deemed to be given, in accordance with this Clause 15.2.
- (f) No Secured Party shall have any independent power to enforce, or to have recourse to, any Transaction Security or to exercise any rights or powers arising under the Transaction Security Documents except through the Security Agent.

15.3 Manner of enforcement

If the Transaction Security is being enforced pursuant to Clause 15.2 (Enforcement instructions), the Security Agent shall enforce the Transaction Security in such manner (including, without limitation, the selection of any administrator of any Debtor or Security Grantor to be appointed by the Security Agent) as:

- (a) the relevant Instructing Group; or
- (b) prior to the Senior Secured Discharge Date, if:
 - (i) the Security Agent has, pursuant to paragraphs (a) and (c) of Clause 15.2 (Enforcement instructions), received instructions given by the Majority Second Lien Creditors to enforce the Transaction Security; and
 - (ii) the Instructing Group has not given instructions as to the manner of enforcement of the Transaction Security,

the Majority Second Lien Creditors shall instruct or, in the absence of any such instructions, as the Security Agent sees fit.

15.4 Exercise of voting rights

- (a) Each Creditor agrees (to the fullest extent permitted by law at the relevant time) with the Security Agent that it will cast its vote in any proposal put to the vote by or under the supervision of any judicial or supervisory authority in respect of any insolvency, pre-insolvency or rehabilitation or similar proceedings relating to any Debtor or member of the Group as instructed by the Security Agent.
- (b) The Security Agent shall give instructions for the purposes of paragraph (a) above as directed by an Instructing Group.
- (c) Nothing in this Clause 15.4 entitles any Party to exercise or require any other Senior Secured Creditor to exercise such power of voting or representation to (i) waive, reduce, discharge, extend the due date for payment of or reschedule any of the Liabilities owed to that Senior Secured Creditor, or (ii) in the case of any Senior Secured Creditor, modify the terms of any Secured Debt Document to which that Senior Secured Creditor is a party in any other way that will treat that Senior Secured Creditor in a materially less beneficial manner than any other Senior Secured Creditor.

15.5 Waiver of rights

 - (ii) if that Hedge Counterparty has not terminated or closed out any hedging transaction under any Hedging Agreement on or prior to the Enforcement Date:
 - (A) if the relevant Hedging Agreement is based on an ISDA Master Agreement, the amount, if any, which would be payable to it under that Hedging Agreement in

18.2 Implementation of equalisation

The provisions of this Clause 18 shall be applied at such time or times after the Enforcement Date as the Security Agent shall consider appropriate. Without prejudice to the generality of the preceding sentence, if the provisions of this Clause 18 have been applied before all the Liabilities have matured and/or been finally quantified, the Security Agent may elect to re-apply those provisions on the basis of revised Exposures and the Senior Secured Creditors shall make appropriate adjustment payments amongst themselves.

18.3 Equalisation

If, for any reason, any Senior Secured Liabilities remain unpaid after the Enforcement Date and the resulting losses are not borne by the Senior Secured Creditors in the proportions which their respective Exposures at the Enforcement Date bore to the aggregate Exposures of all the Senior Secured Creditors at the Enforcement Date, the Senior Secured Creditors (subject in the case of Notes Trustee Amounts, to Clauses 29.1(a) and (c)) will make such payments amongst themselves as the Security Agent shall require to put the Senior Secured Creditors in such a position that (after taking into account such payments) those losses are borne in those proportions.

18.4 Turnover of enforcement proceeds

If:

- (a) the Security Agent, the Senior Agent, any Pari Passu Debt Representative or any Senior Secured Notes Representative or Second Lien Representative is not entitled, for reasons of applicable law, to pay amounts received pursuant to the making of a demand under any guarantee, indemnity or other assurance against loss or the enforcement of the Transaction Security to the Senior Secured Creditors and/or the Second Lien Creditors but is entitled to distribute those amounts to Creditors (such Creditors, the **Receiving Creditors**) who, in accordance with the terms of this Deed, are subordinated in right and priority of payment to the Senior Secured Creditors; and
- (b) the later of the Senior Secured Discharge Date and the Second Lien Discharge Date has not yet occurred (nor would occur after taking into account such payments),

then the Receiving Creditors shall make such payments to the Senior Secured Creditors and/or the Second Lien Creditors as the Security Agent shall require to place the Senior Secured Creditors in the position they would have been in had such amounts been available for application against the Senior Secured Liabilities.

18.5 Notification of Exposure

Before each occasion on which it intends to implement the provisions of this Clause 18, the Security Agent shall send notice to each Hedge Counterparty, the Senior Agent (on behalf of the Senior Lenders) and each Senior Secured Notes Representative (on behalf of the Senior Secured Notes Creditors) and each Pari Passu Debt Representative (on behalf of the Pari Passu Creditors) requesting that it notify the Security Agent of, respectively, its Exposure, the Exposure of each Senior Secured Notes Creditor and Pari Passu Creditor and the Exposure of each Senior Lender (if any).

18.6 Default in payment

If a Creditor fails to make a payment due from it under this Clause 18, the Security Agent shall be entitled (but not obliged) to take action on behalf of the Senior Secured Creditor(s) to whom such payment was to be redistributed (subject to being indemnified to its satisfaction by such Senior Secured Creditor(s) in respect of costs) but shall have no liability or obligation towards such Senior Secured Creditor(s), any other Senior Secured Creditor or Creditor as regards such default in payment and any loss suffered as a result of such default shall lie where it falls.

- (l) Without limiting or affecting the Security Agent's rights against any Debtor (whether under this Clause 20.3(or under any other provision of the Secured Debt Documents, the Second Lien Finance Documents or High Yield Notes Finance Documents), the Security Agent agrees with each other Secured Party (on a several and divided basis) that it will not exercise its rights in respect of the Security Agent Claims except with the consent of the Instructing Group. However, for the avoidance of doubt, nothing in the previous sentence shall in any way limit the Security Agent's right to act in the protection or preservation of rights under any Transaction Security Document or to enforce any Transaction Security as contemplated by this Deed, the relevant Transaction Security Document or any other Secured Debt Documents, Second Lien Finance Documents or High Yield Notes Finance Documents (or to do any act reasonably incidental to the foregoing).

- (a) Subject to paragraphs (e) and (f) below, the Security Agent shall act in accordance with any instructions given to it by an Instructing Group or, if so instructed by an Instructing Group,

refrain from exercising any right, power, authority or discretion vested in it as Security Agent and shall be entitled to assume that (i) any instructions received by it from an Agent, the Creditors or a group of Creditors are duly given in accordance with the terms of the Debt Documents and (ii) unless it has received actual notice of revocation, that those instructions or directions have not been revoked.

- (b) The Security Agent shall be entitled to request instructions, or clarification of any direction, from an Instructing Group (or from the Majority Second Lien Creditors (to the extent it is entitled to give instructions to the Security Agent pursuant to Clause 15 (Enforcement of Transaction Security))) as to whether, and in what manner, it should exercise or refrain from exercising any rights, powers, authorities and discretions and the Security Agent may refrain from acting unless and until those instructions or clarification are received by it.
- (c) Save as provided in Clause 15 (Enforcement of Transaction Security), any instructions given to the Security Agent by an Instructing Group shall override any conflicting instructions given by any other Parties.

 - (iv) in respect of the exercise of the Security Agent's discretion to exercise a right, power or authority under any of:
 - (A) Clause 16.1 (Non-Distressed Disposals);
 - (B) Clause 17.1 (Order of application of Group Recoveries);
 - (C) Clause 17.2 (Prospective liabilities);
 - (D) Clause 17.3 (Treatment of SFA Cash Cover and Senior Lender Cash Collateral); and
 - (E) Clause 17.6 (Permitted Deductions).
- (f) If giving effect to instructions given by an Instructing Group would (in the Security Agent's good faith opinion) have an effect equivalent to an Intercreditor Amendment, the Security Agent shall not act in accordance with those instructions unless Consent to it so acting is obtained from each Party (other than the Security Agent) whose Consent would have been required in respect of that Intercreditor Amendment.
- (g) In exercising any discretion to exercise a right, power or authority under this Deed where either:
 - (i) it has not received any instructions from an Instructing Group as to the exercise of that discretion; or
 - (ii) the exercise of that discretion is subject to sub-paragraph (e)(iv) above,

20.8 Security Agent's discretions

The Security Agent may:

Notwithstanding anything to the contrary expressed or implied in the Debt Documents, the Security Agent shall not:

20.11 Exclusion of liability

None of the Security Agent, any Receiver nor any Delegate shall accept responsibility or be liable for:

- (a) The Security Agent shall be under no obligation to insure any of the Charged Property, to require any other person to maintain any insurance or to verify any obligation to arrange or maintain insurance contained in the Debt Documents. The Security Agent shall not be responsible for any loss which may be suffered by any person as a result of the lack of or inadequacy of any such insurance.
- (b) Where the Security Agent is named on any insurance policy as an insured party and/or loss payee, the Security Agent shall not be responsible for any loss which may be suffered by reason of, directly or indirectly, its failure to notify the insurers of any material fact relating to the risk assumed by such insurers or any other information of any kind, unless an Agent shall have requested it to do so in writing and the Security Agent shall have failed to do so within 14 Business Days after receipt of that request.

20.16 Custodians and nominees

The Security Agent may (to the extent legally permitted) appoint and pay any person to act as a custodian or nominee on any terms in relation to any assets of the trust as the Security Agent may determine, including for the purpose of depositing with a custodian this Deed or any document relating to the trust created under this Deed and the Security Agent shall not be responsible for any loss, liability, expense, demand, cost, claim or proceedings incurred by reason of the misconduct, omission or default on the part of any person appointed by it under this Deed or be bound to supervise the proceedings or acts of any person.

20.24 Intra-Group Lenders, Subordinated Creditors and Debtors: Power of Attorney

Each Intra-Group Lender, Subordinated Creditor, Debtor and Security Grantor by way of security for its obligations under this Deed irrevocably appoints the Security Agent to be its attorney to do anything which that Intra-Group Lender, Subordinated Creditor, Debtor or Security Grantor has authorised the Security Agent or any other Party to do under this Deed or is itself required to do under this Deed but has failed to do (and the Security Agent may delegate that power on such terms as it sees fit).

- (f) The Security Agent's resignation notice shall only take effect upon (i) the appointment of a successor and (ii) the transfer of all of the Security Property to that successor.
- (g) Upon the appointment of a successor, the Retiring Security Agent shall be discharged from any further obligation in respect of the Debt Documents (other than its obligations under paragraph (b) of Clause 20.20 (Winding up of trust) and under paragraph (d) above) but shall, in respect of any act or omission by it whilst it was the Security Agent, remain entitled to the benefit of Clauses 20 (The Security Agent), 24.1 (Debtors' indemnity) and 24.3 (Primary Creditors' indemnity). 29. NOTES TRUSTEE

In this Clause 29, a reference to a Senior Secured Notes Trustee includes a Pari Passu Debt Representative in respect of Pari Passu Debt in the form of debt securities and references to Noteholders and Notes Finance Documents shall be construed as references to the relevant Pari Passu Creditors and Pari Passu Debt Documents in respect of such Pari Passu Debt.

29.1 Liability

- (a) It is expressly understood and agreed by the Parties that this Deed is executed and delivered by each Notes Trustee not individually or personally but solely in its capacity as trustee in the exercise of the powers and authority conferred and vested in it under the relevant Notes Finance Documents for and on behalf of the Noteholders only for which the Notes Trustee acts as trustee and it shall have no liability for acting for itself or in any capacity other than as trustee and nothing in this Deed shall impose on it any obligation to pay any amount out of its personal assets. Notwithstanding any other provision of this Deed, its obligations hereunder (if any) to make any payment of any amount or to hold any amount on trust shall be only to make payment of such amount to or hold any such amount on trust to the extent that (i) it has actual knowledge that such obligation has arisen and (ii) it has received and, on the date on which it acquires such actual knowledge, has not distributed to the Noteholders for which it acts as trustee in accordance with the relevant Notes Indenture (in relation to which it is trustee) any such amount.
- (b) It is further understood and agreed by the Parties that in no case shall any Notes Trustee be (i) personally responsible or accountable in damages or otherwise to any other party for any loss, damage or claim incurred by reason of any act or omission performed or omitted by that Notes Trustee in good faith in accordance with this Deed or any of the Notes Finance Documents in a manner that such Notes Trustee believed to be within the scope of the authority conferred on it by this Deed or any of the Notes Finance Documents or by law, or (ii) personally liable for or on account of any of the statements, representations, warranties, covenants or obligations stated to be those of any other Party, all such liability, if any, being expressly waived by the Parties and any person claiming by, through or under such Party; provided however, that each Notes Trustee shall be personally liable under this Deed for its own gross negligence or wilful misconduct. It is also acknowledged and agreed that no Notes Trustee shall have any responsibility for the actions of any individual Creditor or Noteholder (save in respect of its own actions).
- (c) The Parties acknowledge and agree that the Notes Trustee shall not be charged with knowledge or existence of facts that would impose an obligation on it hereunder to make any

payment or prohibit it from making any payment unless, not less than two Business Days prior to the date of such payment, a Responsible Officer of the Notes Trustee receives written notice satisfactory to it that such payments are required or prohibited by this Deed.

- (d) Notwithstanding anything contained herein, no provision of this Deed shall alter or otherwise affect the rights and obligations of the Notes Issuer or any Debtor to make payments in respect of Notes Trustee Amounts as and when the same are due and payable pursuant to the applicable Notes Finance Documents or the receipt and retention by the Notes Trustee of the same or the taking of any step or action by the Notes Trustee in respect of its rights under the Notes Finance Documents to the same.
- (e) The Notes Trustee is not responsible for the appointment or for monitoring the performance of the Security Agent.
- (f) The Security Agent agrees and acknowledges that it shall have no claim against the Notes Trustee in respect of any fees, costs, expenses and liabilities due and payable to, or incurred by, the Security Agent.
- (g) The Notes Trustee shall be under no obligation to instruct or direct the Security Agent to take any Security Enforcement Action unless it shall have been instructed to do so by the Noteholders and if it shall have been indemnified and/or secured to its satisfaction.
- (h) The provisions of this Clause 29 shall survive the termination of this Deed.

29.2 No action

- (a) Notwithstanding any other provision of this Deed, no Notes Trustee shall have any obligation to take any action under this Deed unless it is indemnified and/or secured to its satisfaction in respect of all costs, expenses and liabilities which it would in its opinion thereby incur (together with any associated VAT). No Notes Trustee shall have an obligation to indemnify (out of its personal assets) any other person, whether or not a Party, in respect of any of the transactions contemplated by this Deed. In no event shall the permissive rights of a Notes Trustee to take action under this Deed be construed as an obligation to do so.
- (b) Prior to taking any action under this Deed any Notes Trustee may request and rely upon an opinion of counsel or opinion of another qualified expert, at the expense of the Company or another Debtor.
- (c) Notwithstanding any other provisions of this Deed or any other Notes Finance Document to which a Notes Trustee is a party to, in no event shall a Notes Trustee be liable for special, indirect, punitive or consequential loss or damages of any kind whatsoever (including but not limited to loss of business, goodwill, opportunity or profits) whether or not foreseeable even if such Notes Trustee has been advised of the likelihood of such loss or damage and regardless of whether the claim for loss or damage is made in negligence, for breach of contract or otherwise.

29.3 Reliance on certificates

The Notes Trustee shall at all times be entitled to and may rely on any notice, Consent or certificate given or granted by any Party without being under any obligation to enquire or otherwise determine whether any such notice, Consent or certificate has been given or granted by such Party properly acting in accordance with the provisions of this Deed.

29.4 No fiduciary duty

No Notes Trustee shall be deemed to owe any fiduciary duty to any Creditor (save in respect of such persons for whom it acts as trustee) and shall not be personally liable to any Creditor if it shall in good faith mistakenly pay over or distribute to any Creditor or to any other person cash, property or securities to which any other Creditor shall be entitled by virtue of this Deed or otherwise. With respect to the Creditors, each Notes Trustee undertakes to perform or to observe only such of its covenants or obligations as are specifically set forth in the Notes Finance Documents pursuant to which it acts as trustee and this Deed and no implied agreement, covenants or obligations with respect to the other Creditors shall be read into this Deed against the Notes Trustee.
