If the interest becomes negative in a payment period, bullet loans may have a repayment equivalent to the loan's negative interest.

The amortisation of the Bonds may vary due to recalculation of the repayments at each determination of interest and based on exceptional repayments and termination of loans.

Please note that item 4.8 of the securities note in the base prospectus applies.

The Bonds will be finally redeemed no later than on the maturity date and are redeemed upon the Bonds' maturity date unless the Bonds are extended in accordance with section 6 of the Danish Act on Mortgage Credit Loans and Mortgage Credit Bonds etc.
