

REPORT PREPARED BY THE EXECUTIVE COMMITTEE OF BANCO SANTANDER, S.A. ON THE ISSUE OF ONE OR MORE SERIES OF PREFERRED SECURITIES CONTINGENTLY CONVERTIBLE INTO SHARES FOR AN AMOUNT UP TO TWO THOUSAND MILLION U.S. DOLLARS (USD 2,000,000,000) TO BE APPROVED PURSUANT TO THE AUTHORISATION GRANTED BY THE SHAREHOLDERS AT THE GENERAL SHAREHOLDERS' MEETING HELD ON 31 MARCH 2023 UNDER ITEM FIVE (D) OF THE AGENDA

This report is prepared in connection with the resolution to issue one or more series of preferred securities contingently convertible into common shares of Banco Santander, S.A. ("**Banco Santander**", the "**Bank**", or the "**Company**") for up to two thousand million U.S. dollars (USD 2,000,000,000) (the "**CCPS**") that will be submitted to and, if appropriate, approved by the Bank's Executive Committee on the date of this report pursuant to the authorisation provided by the general shareholders' meeting held on 31 March 2023, under item Five (D) of the agenda and the subsequent delegation of powers on the Executive Committee approved by the Board of Directors on the same date. This report is issued by the Executive Committee in compliance with articles 249 bis.f) of the Companies Act (*Ley de Sociedades de Capital*), approved by Royal Legislative Decree 1/2010 of 2 July (the "**Companies Act**"), and 16.4 in relation with 3.2.t) of the Regulations of the Board of Banco Santander.

This report is issued in compliance with the requirements established in articles 286 and 414.2 (in connection with the basis and methods for the conversion of debentures and the capital increase required for that purpose), 417.2 and 511 (as regards the exclusion of pre-emptive rights) and 510 (in connection with the reasonableness of the financial terms of the issue and the suitability of both the conversion ratio and the formulas for its adjustment) of the Companies Act and the referred resolution Five (D) adopted by the general shareholders' meeting of 31 March 2023.

The following are the reports issued jointly pursuant to the requirements of the referred articles of the Companies Act.

Pursuant to the provisions of article 511 of the Companies Act and resolution Five (D) adopted by the general shareholders' meeting of 31 March 2023, this report will be made available to the shareholders, and reported to the first general shareholders' meeting to be held following the resolution approving the issue of the CCPS. Likewise, in compliance with Recommendation 5 of the Code of Good Governance of Listed Companies approved by the Council of the Spanish Stock Market Commission (*Consejo de la Comisión Nacional del Mercado de Valores*, "**CNMV**") in February 2015 and revised in June 2020, the Bank will publish this report, on its corporate website once the conditions of the issue of the CCPS have been established.

1. RATIONALE FOR THE ISSUE OF CONTINGENTLY CONVERTIBLE PREFERRED SECURITIES

In accordance with the framework of solvency and own funds defined by Regulation (EU) 575/2013 of 26 June ("**CRD**") and Directive 2013/36/EU of 26 June (as transposed into Spanish national law¹, "**CRD**"), which implement the regulatory framework known as "Basel III" in Europe, Banco Santander, as a Spanish credit institution and parent company of a consolidable group of credit institutions, is subject to —on an individual and consolidated basis— a minimum capital requirement (known as "Pillar 1"²), a specific capital requirement (known as "Pillar 2R") and an additional requirement denominated

¹ Transposed into Spanish law through Law 10/2014, of 26 June, on regulation, supervision and solvency of credit entities ("**LOSS**"), Royal Decree 84/2015, of 13 February, which implements the Law 10/2014 (the "**Royal Decree 84/2015**"), and Bank of Spain's Circulars 2/2014 and 2/2016.

² The Pillar 1 capital requirements are the following: 8% of total own funds (which is the aggregate of tier 1 and tier 2), 6% of tier 1 (which is the aggregate of CET1 and AT1) and 4.5% of common equity tier 1 ratio (CET1); all those percentages measured over the risk-weighted assets ("RWA").

“combined buffers requirement” (which must be met with Common Equity Tier 1 (“**CET1**”), in addition to the CET1 intended to comply with Pillar 1 and Pillar 2³). The Pillar 2 requirement (both Pillar 2R and Pillar 2G) is set by the European Central Bank ad hoc for each institution on an annual basis taking into account the outcome of the supervisory-review and evaluation process (“**SREP**”). In the case of Banco Santander, as a result of the SREP, the European Central Bank has required the Bank to maintain from 1 January 2024: (i) a CET1 ratio of at least 9.60%⁴ on a consolidated basis, and (ii) a total capital ratio of at least 13.86%⁵ on a consolidated basis.

On 31 March 2024, the Bank's total capital ratio was 16.6% on a consolidated basis, with the Bank's CET1 capital ratio at 12.3% on a consolidated basis⁶. These ratios comfortably exceed the regulatory capital requirements currently applicable to Banco Santander.

Notwithstanding the fact that —as indicated— the Bank currently complies comfortably with all capital requirements and has sufficient issuances of specific instruments to meet its capital requirements efficiently, it is proposed to issue new securities that qualify as AT1 for strengthening its capital ratios and maintaining adequate management margins above the capital requirements applicable to the Bank and to enable Banco Santander to strengthen and preserve a sound capital position of the Bank and its group in the most efficient way, seeking the appropriate balance between the cost that one or other type of instruments may imply for the institution and the computability of those instruments for the purposes of various regulatory requirements and the expectations of investors and the market.

The issue will also enable the proactive and orderly management of market expectations as well as the maturities and early-redemption options of the outstanding issuances of the Bank's eligible liabilities, guaranteeing at all times efficient compliance with the solvency requirements and taking advantage, eventually, of the favorable market circumstances existing from time to time (notwithstanding the fact that the relevant junctures for the purposes of determining the suitability of the early redemption of each issue are those existing on the date of its redemption or early maturity), which is in Banco Santander's best interest.

Likewise, the following should be noted:

- (i) Similar to other issues of AT1 instruments in recent years, the issuance of new AT1 instruments will make it possible to anticipate, when market conditions so advise, the potential early redemption exercise of outstanding AT1 issues.
- (ii) This type of issues are also useful for strengthening the leverage ratio. In accordance with the provisions of article 429 of CRR, the leverage ratio is calculated as the tier 1 capital divided by the total exposure of the entity, for which the AT1 instruments issues strengthen the leverage ratio by increasing its numerator.

³ The so called Pillar 2 of capital is formed by a requirement (or Pillar 2R, the “r” of requirement) that can currently be partially satisfied with AT1 (0.28% of the requirement) and tier 2 instruments (0.38% of the requirement) and in the stacking order it is placed above the requirement of Pillar 1 but before the combined buffers requirement; and a guidance or non-binding recommendation (or Pillar 2G, the “g” of guidance).

The Pillar 2G must be satisfied entirely with CET1 and is placed in *stacking order* above the combined buffers requirement. Its main characteristic is that it is a *guidance* and not a requirement, and therefore its eventual breaches do not trigger the obligation to calculate the “maximum distributable amount” and the limitations and restrictions arising from it.

⁴ This requirement includes, on the date of the requirement: the minimum Pillar 1 requirement (4.5%), the Pillar 2R requirement (0.98%), the capital conservation buffer (2.5%), the requirement derived from its consideration as an Other Systemically Important Institution (1.25%) and the requirement regarding the counter-cyclical capital buffer (0.3693% of CET1, the latter calculated as of 30 September 2023).

⁵ In addition to the CET1 requirements, the minimum required total capital ratios on a consolidated basis include: (i) requirements of Pillar 1 of Additional Tier 1 (1.5%) and Tier 2 (2%), and (ii) the part of Pillar 2R that cannot be covered with Additional Tier 1 and Tier 2 capital (0.33% and 0.44%, respectively, on a consolidated basis).

⁶ Data calculated by applying the transitional provisions of the applicable regulations, of which the most significant are those related to IFRS 9. Without the application of these provisions, the fully loaded CET1 ratio and the consolidated total capital, at 31 March 2024, would be 12.3% and 16.5%, respectively.

In addition, since 1 January 2023 the additional buffer in the leverage ratio for G-SIIs (among which is Banco Santander) is included, in accordance with Article 92, paragraph 1a, of the CRR. Therefore, this type of issues contribute to the fulfilment of this requirement.

- (iii) Moreover, since the capital instruments that qualify under CRR are eligible for the purposes of the MREL requirements—*Minimum Required Eligible Liabilities*—, the present issue facilitates the Bank's compliance with its MREL requirements (both full and subordinated).
- (iv) Finally, since the entry into force of CRD V, the possibility that part of the Pillar 2 requirement could be satisfied with AT1 instruments was introduced (in particular, 18.75%⁷ of the requirement, although the competent authority reserves the right to adjust it downward or upward). Therefore, the issue of this type of securities could also be used to comply with this requirement.

The Executive Committee further believes that, as in the case of the contingently convertible preferred securities issues carried out by the Bank in the past, the best way to take advantage of the existing “market window”, is through an accelerated bookbuilding process, which allows for: (a) raising funds within a very short period of time; (b) raising such funds efficiently on the financial terms and conditions prevailing in the market, reducing the costs and risks inherent in the transaction by reducing the periods during which the placement of the securities is exposed to market volatility and finally (c) to place the offered CCPS on market terms that are more advantageous for the Company than the terms that might be expected to be obtained if the issue were to be carried out recognising shareholders' pre-emptive rights, and with less uncertainty concerning the outcome and risk of the transaction.

In order to be able to carry out a bookbuilding process in connection with an issue of preferred securities contingently convertible into newly-issued shares such as the one proposed by the Bank, it is essential to exclude shareholders' pre-emptive rights in order to seek expressions of interest in subscribing for the securities from professional investors specialising in this type of instrument, who are those who are in a position to offer the Bank the most efficient financial terms and conditions for this product; accordingly, this exclusion is inherent in the type of placement selected. Section 4 below provides a detailed rationale, including these and other reasons for requiring the exclusion of such rights from the standpoint of the corporate interest.

The exclusion of the pre-emptive rights makes necessary the drafting of this report pursuant to articles 417.2 and 511 of the Companies Act.

2. LEGAL FRAMEWORK GOVERNING THE CCPS

CCPS that are intended to be issued are considered hybrid own-funds instruments of a perpetual nature and are eligible as additional tier 1 capital pursuant to articles 51 through 55 of CRR. In addition, CCPS are governed, for tax purposes, by the first additional provision of the LOSS.

The legal framework governing these instruments requires that a mechanism is made available for the participation of the holders thereof for absorbing the institution's current or future losses, which includes conversion of preferred securities into instruments eligible as common tier 1 capital (i.e., common shares). Such mechanism is, in fact, the mechanism proposed for the issue of the CCPS. Their convertible nature, while contingent, does not detract from the perpetual nature of the issue of the CCPS, which will only be converted into shares upon the occurrence of any of the “trigger events” required by law—relating to situations in which the Bank's solvency is at risk—and which could be early redeemed if the applicable legal requirements are met.

⁷ See article 94.6 of Royal Decree 84/2015. 3/4 of the requirement must be met with Tier 1 elements and, out of those Tier 1 elements, 3/4 must be CET1 ($0.75 * 0.25 = 0.1875$).

3. DESCRIPTION OF THE PLACEMENT METHOD

The Bank will carry out an accelerated bookbuilding process in order to obtain indications of investors' interest in the issue.

To this end, the Company will engage the services of reputable institutions (known as "joint lead managers") to carry out the bookbuilding process among professional clients interested in subscribing the issue. The bookbuilding process is expected to take no more than 48 hours.

Once this process ends, the final terms and conditions of the issue will be set in accordance with the resolution approving the issue, if any, that is foreseen to be approved by the Executive Committee on the date of this report, pursuant to the authorisation granted by the general shareholders' meeting held on 31 March 2023, under item Five (D) of the agenda and the subsequent delegation of powers approved by the Board of Directors on the same date.

Specifically, after the passing of the resolution on the issue by the Executive Committee, the person or persons to whom it delegates such power will, on the basis of the bookbuilding process, set the total amount of the issue, the number of series comprising the issue, the type or types of remuneration, the period from which the early-redemption of each series may be exercised by the Bank, if appropriate, as well as the date for subscription and payment of the CCPS.

4. THE EXECUTIVE COMMITTEE'S REPORT FOR THE PURPOSES OF ARTICLES 417, 510 AND 511 OF THE COMPANIES ACT

The issue of the CCPS that will be submitted to the Executive Committee and, if appropriate, approved on the date of this report, acting pursuant to the delegation of powers that were previously delegated to the Board of Directors at the general shareholders' meeting and subsequently delegated by it in favour of the Executive Committee, requires that the pre-emptive rights that shareholders would otherwise have in connection with the issue of convertible obligations be excluded in full.

Accordingly, and pursuant to articles 417, 510 and 511 of the Companies Act, a report must be prepared to explain and justify the reasonableness of the financial conditions of the issue, the proposed exclusion of pre-emptive rights and the suitability of both the conversion ratio and the formulas for its adjustment, which must be made available to the shareholders. Notice of the report must be given to the shareholders at the first general shareholders' meeting to be held following that in which the resolution approving the issue was passed. Likewise, as indicated, in compliance with Recommendation 5 of the Code of Good Governance of Listed Companies approved by the Council of CNMV in February 2015 and revised in June 2020, the Bank will publish the report on its corporate website once the conditions of the issue of CCPS have been established.

The Executive Committee believes that the exclusion of pre-emptive rights is fully justified from the standpoint of the corporate interest and that it is necessary to undertake the proposed transaction. And, in order to evidence that conclusion in detail, the following is noted:

First.- Accelerated bookbuilding. Capitalising on "market windows", lesser exposure to market volatility and cost savings.

The purpose of the proposed issue is to raise own funds taking advantage of the favourable financing conditions in the market and the interest of certain types of investors in instruments such as the one the Bank intends to issue. The exclusion of pre-emptive rights makes it possible to carry out the issue through the bookbuilding process, which is the one best suited to the requirements of international capital markets, reducing the execution time of the transaction to the minimum possible, allowing to take advantage of possible "market windows" or suitable opportunities for financial transactions, reduces the cost of raising funds, makes it possible to obtain the financial conditions prevailing in the market which are more favourable for the issue than those that would be obtained if it were made with pre-emptive rights and, in general, increases the likelihood that the transaction will be successful.

Without the approval of the exclusion of pre-emptive rights, it would be impossible to structure the issue as designed, which would prevent the implementation of the bookbuilding process at the time identified as especially appropriate for such purpose.

Accordingly, the exclusion of pre-emptive rights will allow to target the issue towards investors classified as professional clients, from whom it is proposed to seek statements of interest in subscribing for the CCPS through the bookbuilding process to be conducted in connection with the issue.

Such process will allow the Company to:

- take advantage of the “market window” at the precise moment in which it becomes available, removing the uncertainty as to whether such window would remain open for a hypothetical pre-emptive subscription period of at least 15 days;
- facilitate the placement work of the joint lead managers as to the nature of professional clients, the typology and geographical location of the potential investors whom they might contact;
- take advantage of the opportunity to carry out a transaction that will allow it to improve the structure and quality of its financial liabilities and set the amount of the issue, the conversion price, and the remuneration to be paid at the end of the respective bookbuilding process or in the immediately previous days, instead of having to do so prior to the commencement of the pre-emptive subscription period, as would be necessary if pre-emptive rights were not excluded. This should allow the Bank to optimise the conversion price and the cost of the remuneration as compared to the one that would result if it had to set it in advance (as would be required in a transaction with pre-emptive rights), by setting it on the basis of market response and the listing price of the shares at the time of the accelerated bookbuilding; and
- reduce the impact of the issue on the listing price of the shares of the Company by enabling it to obtain firm subscription commitments from “professional clients” within a very short period of time, compared to the longer period of time that would be required for the issue from the notice to the market of the Bank’s intention to issue if pre-emptive rights would have been maintained.

Second.- Complexity of the product and commercial restrictions under the public offer framework.

The complex nature of this type of instrument, required under CRR for its qualification as additional tier 1 capital, makes it desirable to allocate the entire issue for its disbursement among professional clients and eligible counterparties⁸ given their higher degree of expertise and financial knowledge. In this sense, both the Article 209 of the Law on the Securities Market and the first additional provision of the LOSS (in this second case, for the purposes of benefiting from the special tax regime) require, in the event of the commercialisation of this type of securities, a tranche exclusively targeted to professionals clients of at least half the issue. This is consistent with the Joint Statement of the EBA and ESMA on the treatment of retail holdings of debt financial instruments subject to the Bank Recovery and Resolution Directive of 30 May 2018 on the subject of debt instruments subject to bank resolution regulations in the hands of retail investors, which recommend that financial institutions avoid the commercialisation of these products to retail clients, —category which, in the case of the Bank, many of its shareholders fall under— and which reflect the restrictions deriving

⁸ As defined in point (10) of Article 4 (1) and in Article 30, respectively, of Directive 2014/65/EU of the European Parliament and of the Council of 15 May 2014 on markets in financial instruments and amending Directive 2002/92/EC and Directive 2011/61/EU (“MiFID II”), which have in turn been transposed into Spanish law by articles 194 and 196, respectively, of the consolidated text of the Spanish Law 6/2023, 17 March, on the Securities Market and Investment Services (the “**Law on the Securities Market**”).

from BRRD Directive⁹. In the same sense, the Circular of the CNMV 1/2018, of 12 March, on warnings relating to financial instruments, establishes that the instruments qualifying as additional tier 1 capital (as it is the case of CCPS) are products that, due to their particular complexity, are not suitable for retail clients. These requirements are irreconcilable with the proposed issuance of CCPS with pre-emptive rights in favour of the Bank's shareholders.

Furthermore, the full placement of the CCPS among investors classified as "professional clients" and "eligible counterparties" allows access to international markets, on which the large volume of funds traded, together with Banco Santander's quality and prestige, makes it possible to —as it has been evidenced in the last issues of this type of instruments— secure a higher volume of funds on more favourable terms. Given the foregoing, it is necessary to exclude the pre-emptive rights of the current shareholders of the Bank in respect of the CCPS.

Third.- Strengthening of capital and efficiency in its management.

The proposed issue would allow the Bank to raise additional resources that qualify as tier 1 capital at a particularly favourable time in the market, increasing Banco Santander's capital ratios in accordance with current and future applicable regulations, strengthening its leverage ratio and compliance with the MREL requirements, as well as enabling it to manage the maturity of its liabilities and redemption options with a certain margin. See section 1 for further details on the prudential requirements applicable to the group and the need for efficient management of these requirements.

Assuming that the CCPS issue is subscribed in full, the effect on the Bank's main solvency indicators would be as follows:

Data in percentages (rounded by approaching)	31.03.24	Pro forma after this issue
<i>Common Equity Tier 1</i>	12.28%	12.28%
<i>Additional Tier 1</i>	1.42%	1.71%
<i>Tier 1</i>	13.70%	13.99%
<i>Tier 2</i>	2.89%	2.89%
<i>Own funds</i>	16.59%	16.88%

Fourth.- Suitability of the issue for the intended purpose.

An issue of contingently convertible preferred securities is the suitable instrument for simultaneously meeting all the goals identified above. As indicated, the CCPS would qualify as additional tier 1 capital and, consequently, they would be also eligible for TLAC /MREL.

Compared to an issue of shares, the issue of CCPS is more appropriate for the following reasons:

- (i) On the one hand, the issue of AT1 instruments optimises the Santander Group's cost of capital for raising tier 1 capital by issuing an instrument (CCPS) with an implicit cost lower than that associated with the common equity tier 1 ratio (shares).
- (ii) On the other hand, CCPS are flexible instruments that do not entail, in the most common scenario, any dilution for the shareholders since they will only be converted into shares under exceptional circumstances linked to a solvency impairment affecting the Bank. In particular,

⁹ The new article 44a of BRRD (transposed in Spain in the Article 209 of the Law on the Securities Market) has also introduced, for issuances executed from 28 December 2020 onwards, trading restrictions among retail investors of MREL eligible liabilities.

the “trigger event” of the conversion will only occur should the Bank or the Bank’s consolidable group have a common equity tier 1 ratio lower than 5.125%, as calculated in accordance with the CRR and the own-funds regulation applicable to the Bank from time to time.

Additionally, even in the event that the CCPS were to be converted into shares at any given time, that circumstance nevertheless maximises the issue price of such shares, since, according to the terms of the CCPS, the conversion must occur at a price not lower than the market price, therefore avoiding the economic dilution of Santander’s shareholders even in a crisis situation (which, as mentioned, would represent the only scenario in which the CCPS would be converted into shares).

Fifth.- Proportionality of the exclusion given that the dilutive effects are very limited or non-existent.

Finally, the Executive Committee believes that the exclusion of pre-emptive rights complies with the necessary due proportionality between the advantages for the Bank and the potential disadvantages that the shareholders could potentially suffer for reasons of political or economic dilution:

- Firstly, the CCPS are “contingently” convertible securities, rather than “necessarily” convertible securities and, therefore, in the most common scenario, they will not result in either an economic or political dilution of the Bank’s shareholders since conversion into shares will not take place. In this regard, conversion is not the natural aim of the CCPS¹⁰ they would only be converted in specific circumstances in which the Santander Group’s solvency is significantly impaired (the CET1 ratio calculated in accordance with CRR and other applicable regulations is below 5.125%).
- Secondly, a variable conversion ratio is established in the event of automatic conversion into shares based on the Bank’s share price at that time¹¹, as a result of which, as mentioned, the shareholders will not experience any economic dilution, considering that the shares would be issued at their market value at the time of conversion (or, if the minimum conversion rate applies, at a price higher than their market value at that time so that the economic dilution of the shareholders in that scenario would even be negative), and therefore the proposed conversion ratio guarantees that the conversion price will in no case be lower than the fair value of the Company. All of the above, coupled with the fact that the interest rate applicable to the remuneration of the CCPS will be calculated in accordance with market conditions, determines that the notional value of the pre-emptive rights for which exclusion is proposed should be zero or negative.
- Thirdly, the established conversion ratio contains a minimum conversion price, making it possible to limit the maximum political dilution that the Bank’s shareholders might suffer in the event of a conversion event. That minimum conversion price will be adjusted, if necessary, by applying the anti-dilution clauses that are customary in the issue of convertible securities of Banco Santander and traditionally accepted by the market, and will in no event be lower than the nominal value of the shares.

Considering the foregoing, the Executive Committee believes that the exclusion of the pre-emptive rights of the shareholders in the issue of the contingently convertible preferred securities to which

¹⁰ In addition, it can be assumed that the investment purpose of a CCPS subscriber is not to become a shareholder of the issuer of these securities. The purpose of the investment is similar to that of a fixed-yield investor who expects to receive interest, accepting an additional specific level of subordination (and, therefore, of risk) in exchange for the expectation of higher remuneration (and, in any case, although discretionary, it is both predetermined and limited, as opposed to an investment in equity, for which dividends are not limited to a percentage of the initial investment).

¹¹ The basis for the market conversion are established based on the market price of the Bank’s shares at the time of conversion. Thus, it is established that the market value of the Bank’s shares for the purposes of the conversion shall be set by the Executive Committee in accordance with the market price of one day or the average of several days’ trading of Banco Santander’s shares.

this report refers is amply justified by reasons of corporate interest and the conversion ratio and its adjustment formulas are suitable for the proposed purpose.

5. THE EXECUTIVE COMMITTEE'S REPORT FOR THE PURPOSES OF ARTICLES 414, 510 AND 511 OF THE COMPANIES ACT

If approved by the Executive Committee on the date of this report, pursuant to the authorisation granted by the ordinary general shareholders' meeting held on 31 March 2023 under item Five (D) of the agenda and the subsequent delegation of powers approved by the Board of Directors on the same date, the Bank will issue securities contingently convertible into newly-issued shares of Banco Santander.

In accordance therewith, and in view of the provisions of articles 414.2, 510 and 511.3 of the Companies Act, the Executive Committee must prepare a report to explain and justify the reasonableness of the financial conditions of the issue, the basis and methods for the conversion of the CCPS and its adjustment formulas; the report must be made available to the shareholders and reported at the first general shareholders meeting to be held following the resolution approving the issue. Additionally, as previously indicated, the Bank must publish the report on its corporate website once the terms of the issue of CCPS have been established.

The following is an explanation and analysis of the indicated basis and method for the conversion, along with the most important data on the issue, which will be indicated in the resolution approving the issue or, if appropriate, by the person or persons to whom the Executive Committee delegates the respective powers. References to resolutions or decisions of the Executive Committee therefore include the actions and decisions of its representatives, if any.

First. Data of the issuer

The issuer is Banco Santander, S.A., with registered office in Santander, Spain, at Paseo de Pereda, 9 to 12, and holder of Tax Identification Number A-39000013. Its current share capital totals EUR 7,747,136,786 represented by 15,494,273,572 common shares, each with a nominal value of EUR 0.50, all fully paid in and carrying the same rights.

The Banks corporate purpose is stated in Article 2 of its by-laws:

"1. The Company's corporate purpose is the following:

a) The performance of activities and transactions, and the provision of services of any kind, that are typical of the banking business in general that are permitted under current law.

b) The acquisition, possession, enjoyment and disposal of all types of securities.

2 The activities making up the corporate purpose may be performed totally or partially in an indirect manner, in any of the manners permitted by law and, in particular, through the ownership of shares or the holding of stakes in companies which purpose is identical or similar, incidental or supplemental to such activities".

Second. Amount of the issue

The maximum amount of the issue will be TWO THOUSAND MILLION U.S. DOLLARS (USD 2,000,000,000) with a provision for incomplete subscription.

The amount of the maximum amount authorised used pursuant to resolution Five (D) adopted at the Bank's ordinary general shareholders' meeting held on 31 March 2023 will depend on the final amount issued and subscribed in this issue. For illustration purposes only, if the maximum amount were issued and if it were subscribed in full, (i) the amount of the maximum amount authorised used pursuant to resolution Five (D) adopted at the Bank's ordinary general shareholders meeting held on 31 March 2023 would be five thousand six hundred seventy-seven million two hundred seven thousand ninety-five euros and twenty-seven euro cents (EUR 5,677,207,095.27) and (ii) four thousand three hundred twenty-two million seven hundred ninety-two thousand nine hundred four euros and seventy-three euro cents (EUR

4,322,792,904.73) would remain available for drawdown. For this purpose, the reference exchange rate was taken to be the EUR/USD exchange rate on 12 July 2024, as published on the relevant Bloomberg page, which amounted to U.S. dollar 1.0904 per EUR.

Third. Nature

The CCPS are securities that are perpetual in nature (absent conversion or early-redemption, in the latter case, upon previously obtaining the necessary authorisations pursuant to articles 77 and 78 of CRR and complementary regulations) and contingently convertible, that are eligible as additional tier 1 capital.

Preferred securities are governed (i) by articles 51 through 55 of CRR, and (ii), as to its tax regime, by the first additional provision of LOSS.

Fourth. Nominal value, issue price and form of representation

The issue price of the CCPS will be at par, i.e., at 100% of their nominal value. The nominal value of each CCPS will be two hundred thousand U.S. dollars (USD 200,000), which is an amount higher than the nominal value of the shares of the Company (EUR 0.50).

Accordingly the maximum number of CCPS issued will be ten thousand (10,000), with an express provision established for any event involving a less than full subscription. The CCPS may belong to one or more series, having all the CCPS that belong to the same series the same terms and conditions, thereby conferring the same rights upon their holders.

The CCPS will be represented by one or more nominative global notes to be deposited on the Closing Date (as defined below) with a custodian of The Depositary Trust Company, New York (DTC) depositary and will be registered in the name of Cede & Co. as nominee for DTC.

Fifth. Remuneration rate and events of cancellation of the payment of remuneration

The CCPS (or, as the case may be, the CCPS of each series as applicable) will have an annual, non-cumulative remuneration (the “**Remuneration**”):

- (a.i) From the Closing Date (included) and until the first date on which the remuneration is reset (the “**First Reset Date**”) (excluded) which shall consist of a percentage applied to the nominal value of the CCPS that may not exceed (a) 8.5% if any of the attorneys authorized by the resolution of the Executive Committee finally sets the First Reset Date five years from the Closing Date, (b) 8.5% if any of the attorneys authorized by the resolution of the Executive Committee finally sets the First Reset Date five years and six months from the Closing Date, (c) 8.5% if any of the attorneys authorized by the resolution of the Executive Committee finally sets the First Reset Date six years from the Closing Date, (d) 8.75% if any of the attorneys authorized by the resolution of the Executive Committee finally sets the First Reset Date seven years from the Closing Date, (e) 8.75% if any of the attorneys authorized by the resolution of the Executive Committee finally sets the First Reset Date eight years from the Closing Date, or (f) 8.75 % if any of the attorneys authorized by the resolution of the Executive Committee finally sets the First Reset Date ten years from the Closing Date; and
- (b.i) from the First Reset Date, at the rate resulting from the five-year UST rate applicable (calculated in the manner and on the dates established by the person or persons to whom the Executive Committee delegates the respective powers) plus a margin that may not exceed (a) 436 basis points if the First Reset Date was fixed five years from the Closing Date, (b) 436 basis points if the First Reset Date was fixed five years and six months from the Closing Date, (c) 436 basis points if the First Reset Date was fixed six years from the Closing Date, (d) 461 basis points if the First Reset Date was fixed seven years from the Closing Date, (e) 460 basis points if the First Reset Date was fixed eight years from the Closing Date, or (f) 457 basis points if the First Reset Date was fixed ten years from the Closing Date.

The Remuneration will accrue from the disbursement date (the “**Closing Date**”) and will be payable with the frequency that the Executive Commission or the person or persons in which it delegates determine, provided the conditions for payment are present and the Bank has not decided to cancel its payment. In the resolution approving the issue, the events for which Remuneration must necessarily and in accordance with the current legal framework be cancelled will be established.

These ranges for setting the Remuneration have been determined on the basis of market research carried out by the Bank's Finance Department with the support of investment banks commissioned for this purpose, and will be finalised (resulting in the final initial remuneration rate/s to be applied as well as the margin/s) once the accelerated bookbuilding process has finalised in the light of the indications of interest received from investors, for which reason this Executive Committee considers the economic reasonableness of these terms to be duly justified.

Sixth. Subscription and disbursement of the CCPS

The subscription of the CCPS will occur on the date or during the period determined by the Executive Committee or by the person or persons to whom it delegates the respective powers.

The CCPS will be subscribed by a limited number of professional clients and eligible counterparties¹² or, failing this, by the joint lead managers, and will be paid for on the Closing Date, which will be determined by the Executive Committee or by the person or persons to whom the Executive Committee delegates the respective powers.

Seventh. Maturity date and early redemption

The CCPS are perpetual securities with no maturity date.

Notwithstanding the foregoing, from at least the fifth anniversary of the Closing Date, or on any other date or period established for each series by the Executive Committee or by the person or persons to whom it delegates the respective powers and, from that time on, on each date of payment of the Remuneration (or any other dates or periods that may be determined), and subject to the prior authorisation of the appropriate authorities, all (but not part) of the CCPS belonging, if applicable, in each of the series of the issue may be redeemed early at the option of the Bank pursuant to the terms and conditions that may ultimately be approved by the Executive Committee or by the person or persons to whom it delegates. Furthermore, at any time during the life of the issue, under certain circumstances (mainly relating to a change in tax-related or regulatory circumstances, or eventually clean-up calls), the Bank may also redeem the CCPS pursuant to the terms established by the Executive Committee or by the person or persons to whom it delegates.

Eighth. Basis and methods for conversion

The basis and methods for conversion, which comply with the corresponding provisions of the resolution on the delegation of authority adopted by the general shareholders' meeting on 31 March 2023, are the following:

Events of contingent conversion

The CCPS must mandatorily be converted, in their entirety, into newly-issued common shares of the Bank in the event that the Bank or the Bank's consolidable group has a common equity tier 1 ratio, calculated in accordance with the CRR, of less than 5.125%.

Conversion ratio

¹² As defined in point (10) of Article 4 (1) and in Article 30, respectively, MiFID II, which have in turn been transposed into Spanish law by articles 194 and 196, respectively, of the Law on the Securities Market.

The conversion ratio of the CCPS will be variable.

The number of shares to which each holder of CCPS will be entitled to receive if the conversion occurs will be the result of dividing the value of the CCPS of each series, if applicable, held by the holder by the value attributed to the Bank's common shares at the time of conversion (the "**Conversion Price**"). If this results in fractional shares, the fractions will in all cases be rounded down, and the Bank will not be obliged to pay remuneration for the remaining fractional shares.

For purposes of the conversion ratio:

- The value of the CCPS will be their nominal value; and
- The Conversion Price of the Bank's common shares will be, if the shares are then admitted to trading, the highest from among:
 - (a) The Market Value of a single common share of the Bank, converted to U.S. dollars at the Applicable Exchange Rate;
 - (b) the Minimum Conversion Price; and
 - (c) the nominal value of the Bank's shares at the time of conversion, converted to U.S. dollars at the Applicable Exchange Rate, such that the provisions of Article 415 of the Companies Law are in all cases satisfied.

Where:

- "**Minimum Conversion Price**" will be an amount in euros equivalent to approximately 66% of the closing price of Banco Santander's share on the trading business day prior to the date on which the final terms and conditions of the issue are determined, converted as the case may be into U.S. dollars at the Applicable Exchange Rate.

The Minimum Conversion Price will be modified, if appropriate, by applying the anti-dilution adjustments established by the Executive Committee, in accordance with the Bank's usual practice for this type of issues.

- "**Market Value**" means, for any given date, the listing price on a single day or the mean of several days' listing prices of the shares of Banco Santander as determined by the Executive Committee.
- "**Applicable Exchange Rate**" means, for a given date, the Euro/U.S. dollar exchange rate at 12.00 hours (London time) displayed on the relevant page of Bloomberg, Reuters or other provider, at the choice of the Issuer, on such given date; and, if such day cannot be determined, it will be the exchange rate displayed at 12:00 hours (London time) on the immediately preceding day on which it can be determined; or, if the exchange rate cannot be so determined, it will be the one determined by an independent expert in good faith.
- In the event that the shares were not, at that date, admitted to trading, the Conversion Price will be the higher of the Minimum Conversion Price and the nominal value of the shares at that date (converted to U.S. dollars at the Applicable Exchange Rate).

The basis and methods for conversion of the CCPS are determined on the basis of what it is and has been the usual practice for this type of issues in the market in recent years, establishing a variable conversion ratio linked to the market value of the Bank at the time of conversion and a minimum conversion price of 66% of the closing price of Banco Santander's share on the trading business day prior to the date on which the final terms and conditions of the issue are determined, in line with Banco Santander's usual practice in issues made in recent years and accepted in the market. Therefore, this Executive Committee considers that both the established conversion ratio and the minimum conversion price are reasonable.

Ninth. Guarantees

The CCPS shall in all cases be secured by the unlimited personal liability of the Bank in accordance with the rank and priority indicated in the following section. They will not benefit from any additional guarantees.

Tenth. Order of priority

The payment obligations of the Bank under the CCPS, while they qualify as Additional Tier 1 Instruments (as such term is defined below) will rank, by order of priority, junior to the payment obligations in respect of Tier 2 Instruments (as such term is defined below) and shall constitute direct, unconditional, unsecured and subordinated obligations of the Bank pursuant to Article 281.1.2º of the consolidated text of the Insolvency Law, approved by Royal Legislative Decree 1/2020 of 5 May 2020 (the “**Insolvency Law**”) and in accordance with the Additional Provision 14.3 of Law 11/2015, but subject to any other ranking that may apply as a result of any mandatory provision of law (or otherwise).

“**Additional Tier 1 Instruments**” means any subordinated obligation (*créditos subordinados*) of the Bank eligible in whole or in part as additional tier 1 capital in accordance with Chapter 3 (Additional Tier 1 Capital) of Title I (Elements of Own Funds) of Part II (Own Funds and Eligible Liabilities) of the CRR and/or any other applicable banking regulations.

“**Tier 2 Instruments**” means any subordinated obligation (*créditos subordinados*) of the Bank eligible in whole or in part as tier 2 capital in accordance with Chapter 4 (Tier 2 Capital) of Title I (Elements of Own Funds) of Part II (Own Funds and Eligible Liabilities) of the CRR and/or any other applicable banking regulations.

Eleventh. Capital increase

The Executive Committee, acting pursuant to the powers delegated to it by the Board of Directors in connection with the issue of convertible securities approved by the ordinary general shareholders’ meeting of 31 March 2023 under item Five (D) of the agenda, and as approved by the ordinary general shareholders’ meeting of Banco Santander of 22 March 2024, under item Five (A) of the agenda in connection with the delegation to increase the share capital, will therefore approve the capital increase necessary to accommodate for the potential conversion of the CCPS.

Twelfth. Admission to listing

Banco Santander will submit an application for the listing of the CCPS on an organised secondary market. Notwithstanding the foregoing, Banco Santander may submit an application for the listing of the CCPS on any market, whether official or unofficial, regulated or unregulated, organised or unorganised, domestic or foreign, during the life of the CCPS.

Thirteenth. Other terms

The terms for the issue of the CCPS shall be governed by the provisions of the Companies Act, the bylaws of Banco Santander and the resolution adopted by the general shareholders’ meeting held on 31 March 2023, under item Five (D) of the agenda and, within the limits established therein, by the terms and conditions that may be established by the Executive Committee in the resolution approving the issue.

Fourteenth. Subsequent events

There are no events that are significant for Banco Santander subsequent to 31 December 2023 other than those for which the Bank has given notice after such date to the CNMV as privileged information or other relevant information in compliance with the provisions of article 17 of Regulation (EC) 596/2014 and articles 226 and 227 of the Law on the Securities Market, or which are included in the periodic public information communicated to that Committee.
