Opportunities in U.S. Equities

Contingent Income Auto-Callable Securities due July 1, 2022

Based on the Performance of the Capital Stock of Campbell Soup Company

Principal at Risk Securities

Unlike conventional debt securities, the securities do not guarantee the payment of interest or any return of principal at maturity. Instead, the securities offer the opportunity for investors to receive a contingent quarterly payment equal to 2.75% of the stated principal amount with respect to each quarterly determination date on which the closing price of the underlier is greater than or equal to 75% of the initial underlier value, which we refer to as the downside threshold level. If the closing price of the underlier is greater than or equal to the initial underlier value on any determination date (other than the final determination date), the securities will be automatically redeemed for an amount per security equal to the stated principal amount *plus* the contingent quarterly payment otherwise due. However, if on any determination date the closing price of the underlier is less than the initial underlier value, the securities will not be redeemed and if that closing price is less than the downside threshold level, investors will not receive any contingent quarterly payment for the related quarterly period. If the securities are not redeemed prior to maturity and the final underlier value is greater than or equal to the downside threshold level, the payment at maturity due on the securities will be equal to the stated principal amount *plus* the contingent quarterly payment otherwise due. However, if the securities are not redeemed prior to maturity and the final underlier value is less than the downside threshold level, at maturity investors will lose 1% of the stated principal amount for every 1% that the final underlier value is less than the initial underlier value. Under these circumstances, the amount investors receive will be less than 75% of the stated principal amount and could be zero. The securities are for investors who are willing and able to risk their principal and forgo guaranteed interest payments, in exchange for the opportunity to receive contingent quarterly payments at a potentially above-market rate, subject to automatic early redemption. Investors will not participate in any appreciation of the underlier even though investors will be exposed to the depreciation in the value of the underlier if the securities have not been redeemed prior to maturity and the final underlier value is less than the downside threshold level. **Investors may lose their entire initial investment in the securities. The securities are unsecured and unsubordinated debt obligations of Barclays Bank PLC. Any payment on the securities, including any repayment of principal, is subject to the creditworthiness of Barclays Bank PLC and is not guaranteed by any third party. If Barclays Bank PLC were to default on its payment obligations or become subject to the exercise of any U.K. Bail-in Power (as described on page 5 of this document) by the relevant U.K. resolution authority, you might not receive any amounts owed to you under the securities. See "Risk Factors" and "Consent to U.K. Bail-in Power" in this document and "Risk Factors" in the accompanying prospectus supplement.**

FINAL TERMS

Issuer:	Barclays Bank PLC
Reference asset*:	Campbell Soup Company capital stock (Bloomberg ticker symbol "CPB UN<Equity>") (the "underlier")
Aggregate principal amount:	\$5,211,800
Stated principal amount:	\$10 per security
Initial issue price:	\$10 per security (see "Commissions and initial issue price" below)
Pricing date[†]:	June 28, 2019
Original issue date[†]:	July 3, 2019
Maturity date[†]:	July 1, 2022
Automatic early redemption:	If, on any determination date other than the final determination date, the closing price of the underlier is greater than or equal to the initial underlier value, the securities will be automatically redeemed for an early redemption payment on the contingent payment date immediately following that determination date. The securities will not be redeemed early if the closing price of the underlier is less than the initial underlier value on the related determination date. No further payments will be made on the securities after they have been redeemed.
Early redemption payment:	The early redemption payment will be an amount per security equal to (i) the stated principal amount <i>plus</i> (ii) the contingent quarterly payment otherwise due.
Contingent quarterly payment:	<ul style="list-style-type: none"> If, on any determination date, the closing price of the underlier is greater than or equal to the downside threshold level, we will pay a contingent quarterly payment of \$0.275 (2.75% of the stated principal amount) per security on the related contingent payment date. If, on any determination date, the closing price of the underlier is less than the downside threshold level, no contingent quarterly payment will be made with respect to that determination date.

<http://www.oblible.com>

If the securities are not redeemed prior to maturity, you will receive on the maturity date a cash payment per security determined as follows:

- If the final underlier value is **greater than or equal to** the downside threshold level:
 - (i) stated principal amount *plus* (ii) the contingent quarterly payment otherwise due
- If the final underlier value is **less than** the downside threshold level:
 - stated principal amount × underlier performance factor

Under these circumstances, the payment at maturity will be less than the stated principal amount of \$10 and will represent a loss of more than 25%, and possibly all, of an investor's initial investment. Investors may lose their entire initial investment in the securities. Any payment on the securities, including any repayment of principal, is not guaranteed by any third party and is subject to (a) the creditworthiness of Barclays Bank PLC and (b) the risk of exercise of any U.K. Bail-in Power by the relevant U.K. resolution authority.

U.K. Bail-in Power acknowledgment:

Notwithstanding any other agreements, arrangements or understandings between Barclays Bank PLC and any holder of the securities, by acquiring the securities, each holder of the securities acknowledges, accepts, agrees to be bound by and consents to the exercise of, any U.K. Bail-in Power by the relevant U.K. resolution authority. See "Consent to U.K. Bail-in Power" on page 5 of this document.

Downside threshold level*:

\$30.053, which is equal to 75% of the initial underlier value (rounded to three decimal places)

Initial underlier value*:

\$40.07, which is the closing price of the underlier on the pricing date

Final underlier value*:

The closing price of the underlier on the final determination date

Commissions and initial issue price:	Initial issue price ⁽¹⁾	Price to public ⁽¹⁾	<i>(terms continued on the next page)</i>	
			Agent's commissions	Proceeds to issuer
Per security	\$10	\$10	\$0.20 ⁽²⁾ \$0.05 ⁽³⁾	\$9.75
Total	\$5,211,800	\$5,211,800	\$130,295	\$5,081,505

(1) Our estimated value of the securities on the pricing date, based on our internal pricing models, is \$9.652 per security. The estimated value is less than the initial issue price of the securities. See "Additional Information Regarding Our Estimated Value of the Securities" on page 4 of this document.

(2) Morgan Stanley Wealth Management and its financial advisors will collectively receive from the agent, Barclays Capital Inc., a fixed sales commission of \$0.20 for each security they sell. See "Supplemental Plan of Distribution" in this document.

(3) Reflects a structuring fee payable to Morgan Stanley Wealth Management by the agent or its affiliates of \$0.05 for each security.

One or more of our affiliates may purchase up to 15% of the aggregate principal amount of the securities and hold such securities for investment for a period of at least 30 days. Accordingly, the total principal amount of the securities may include a portion that was not purchased by investors on the original issue date. Any unsold portion held by our affiliate(s) may affect the supply of securities available for secondary trading and, therefore, could adversely affect the price of the securities in the secondary market. Circumstances may occur in which our interests or those of our affiliates could be in conflict with your interests.

Investing in the securities involves risks not associated with an investment in conventional debt securities. See "Risk Factors" beginning on page 12 of this document and on page S-7 of the prospectus supplement. You should read this document together with the related prospectus and prospectus supplement, each of which can be accessed via the hyperlinks below, before you make an investment decision.

The securities will not be listed on any U.S. securities exchange or quotation system. Neither the U.S. Securities and Exchange Commission (the "SEC") nor any state securities commission has approved or disapproved of the securities or determined that this document is truthful or complete. Any representation to the contrary is a criminal offense.

We may use this document in the initial sale of the securities. In addition, Barclays Capital Inc. or another of our affiliates may use this document in market resale transactions in any of the securities after their initial sale. Unless we or our agent informs you otherwise in the confirmation of sale, this document is being used in a market resale transaction.

The securities constitute our unsecured and unsubordinated obligations. The securities are not deposit liabilities of Barclays Bank PLC and are not covered by the U.K. Financial Services Compensation Scheme or insured by the U.S. Federal Deposit Insurance Corporation or any other governmental agency or deposit insurance agency of the United States, the United Kingdom or any other jurisdiction.

* In the case of certain corporate events related to the underlier, the calculation agent may adjust any variable, including but not limited to, the underlier, initial underlier value, final underlier value, downside threshold level and closing price of the underlier if the calculation agent determines that the event has a diluting or concentrative effect on the theoretical value of the shares of the underlier. The calculation agent may accelerate the maturity date upon the occurrence of certain reorganization events and additional adjustment events. For more information, see “Reference Assets—Equity Securities—Share Adjustments Relating to Securities with an Equity Security as a Reference Asset” in the accompanying prospectus supplement.

† Each determination date may be postponed if that determination date is not a scheduled trading day or if a market disruption event occurs on that determination date as described under “Reference Assets—Equity Securities—Market Disruption Events for Securities with an Equity Security as a Reference Asset” in the accompanying prospectus supplement. In addition, a contingent payment date and/or the maturity date will be postponed if that day is not a business day or if the relevant determination date is postponed as described under “Terms of the Notes—Payment Dates” in the accompanying prospectus supplement.

Additional Terms of the Securities

You should read this document together with the prospectus dated March 30, 2018, as supplemented by the prospectus supplement dated July 18, 2016 relating to our Global Medium-Term Notes, Series A, of which the securities are a part. This document, together with the documents listed below, contains the terms of the securities and supersedes all prior or contemporaneous oral statements as well as any other written materials including preliminary or indicative pricing terms, correspondence, trade ideas, structures for implementation, sample structures, brochures or other educational materials of ours. You should carefully consider, among other things, the matters set forth in "Risk Factors" in the prospectus supplement, as the securities involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisors before you invest in the securities.

When you read the prospectus supplement, note that all references to the prospectus dated July 18, 2016, or to any sections therein, should refer instead to the accompanying prospectus dated March 30, 2018, or to the corresponding sections of that prospectus.

You may access these documents on the SEC website at www.sec.gov as follows (or if such address has changed, by reviewing our filings for the relevant date on the SEC website):

Prospectus dated March 30, 2018:

Additional Information Regarding Our Estimated Value of the Securities

Our internal pricing models take into account a number of variables and are based on a number of subjective assumptions, which may or may not materialize, typically including volatility, interest rates and our internal funding rates. Our internal funding rates (which are our internally published borrowing rates based on variables, such as market benchmarks, our appetite for borrowing and our existing obligations coming to maturity) may vary from the levels at which our benchmark debt securities trade in the secondary market. Our estimated value on the pricing date is based on our internal funding rates. Our estimated value of the securities might be lower if such valuation were based on the levels at which our benchmark debt securities trade in the secondary market.

Our estimated value of the securities on the pricing date is less than the initial issue price of the securities. The difference between the initial issue price of the securities and our estimated value of the securities results from several factors, including any sales commissions to be paid to Barclays Capital Inc. or another affiliate of ours, any selling concessions, discounts, commissions or fees to be allowed or paid to non-affiliated intermediaries, the estimated profit that we or any of our affiliates expect to earn in connection with structuring the securities, the estimated cost that we may incur in hedging our obligations under the securities, and estimated development and other costs that we may incur in connection with the securities.

Our estimated value on the pricing date is not a prediction of the price at which the securities may trade in the secondary market, nor will it be the price at which Barclays Capital Inc. may buy or sell the securities in the secondary market. Subject to normal market and funding conditions, Barclays Capital Inc. or another affiliate of ours intends to offer to purchase the securities in the secondary market but it is not obligated to do so.

Assuming that all relevant factors remain constant after the pricing date, the price at which Barclays Capital Inc. may initially buy or sell the securities in the secondary market, if any, and the value that we may initially use for customer account statements, if we provide any customer account statements at all, may exceed our estimated value on the pricing date for a temporary period expected to be approximately 40 days after the initial issue date of the securities because, in our discretion, we may elect to effectively reimburse to investors a portion of the estimated cost of hedging our obligations under the securities and other costs in connection with the securities that we will no longer expect to incur over the term of the securities. We made such discretionary election and determined this temporary reimbursement period on the basis of a number of factors, which may include the tenor of the securities and/or any agreement we may have with the distributors of the securities. The amount of our estimated costs that we effectively reimburse to investors in this way may not be allocated ratably throughout the reimbursement period, and we may discontinue such reimbursement at any time or revise the duration of the reimbursement period after the initial issue date of the securities based on changes in market conditions and other factors that cannot be predicted.

We urge you to read “Risk Factors” beginning on page 12 of this document.

Contingent Income Auto-Callable Securities due July 1, 2022

Principal at Risk Securities

Consent to U.K. Bail-in Power

Notwithstanding any other agreements, arrangements or understandings between us and any holder of the securities, by acquiring the securities, each holder of the securities acknowledges, accepts, agrees to be bound by and consents to the exercise of, any U.K. Bail-in Power by the relevant U.K. resolution authority.

Under the U.K. Banking Act 2009, as amended, the relevant U.K. resolution authority may exercise a U.K. Bail-in Power in circumstances in which the relevant U.K. resolution authority is satisfied that the resolution conditions are met. These conditions include that a U.K. bank or investment firm is failing or is likely to fail to satisfy the Financial Services and Markets Act 2000 (the "FSMA") threshold conditions for authorization to carry on certain regulated activities (within the meaning of section 55B FSMA) or, in the case of a U.K. banking group company that is a European Economic Area ("EEA") or third country institution or investment firm, that the relevant EEA or third country relevant authority is satisfied that the resolution conditions are met in respect of that entity.

The U.K. Bail-in Power includes any write-down, conversion, transfer, modification and/or suspension power, which allows for (i) the reduction or cancellation of all, or a portion, of the principal amount of, interest on, or any other amounts payable on, the securities; (ii) the conversion of all, or a portion, of the principal amount of, interest on, or any other amounts payable on, the securities into shares or other securities or other obligations of Barclays Bank PLC or another person (and the issue to, or conferral on, the holder of the securities such shares, securities or obligations); and/or (iii) the amendment or alteration of the maturity of the securities, or amendment of the amount of interest or any other amounts due on the securities, or the dates on which interest or any other amounts become payable, including by suspending payment for a temporary period; which U.K. Bail-in Power may be exercised by means of a variation of the terms of the securities solely to give effect to the exercise by the relevant U.K. resolution authority of such U.K. Bail-in Power. Each holder of the securities further acknowledges and agrees that the rights of the holders of the securities are subject to, and will be varied, if necessary, solely to give effect to, the exercise of any U.K. Bail-in Power by the relevant U.K. resolution authority. For the avoidance of doubt, this consent and acknowledgment is not a waiver of any rights holders of the securities may have at law if and to the extent that any U.K. Bail-in Power is exercised by the relevant U.K. resolution authority in breach of laws applicable in England.

For more information, please see "Risk Factors—You may lose some or all of your investment if any U.K. bail-in power is exercised by the relevant U.K. resolution authority" in this document as well as "U.K. Bail-in Power," "Risk Factors—Risks Relating to the Securities Generally—Regulatory action in the event a bank or investment firm in the Group is failing or likely to fail could materially adversely affect the value of the securities" and "Risk Factors—Risks Relating to the Securities Generally—Under the terms of the securities, you have agreed to be bound by the exercise of any U.K. Bail-in Power by the relevant U.K. resolution authority" in the accompanying prospectus supplement.

Contingent Income Auto-Callable Securities due July 1, 2022

Based on the Performance of the Capital Stock of Campbell Soup Company

Principal at Risk Securities

Investment Summary

Contingent Income Auto-Callable Securities

Principal at Risk Securities

The Contingent Income Auto-Callable Securities due July 1, 2022 Based on the Performance of the Capital Stock of Campbell Soup Company, which we refer to as the securities, provide an opportunity for investors to receive a contingent quarterly payment, which is an amount equal to \$0.275 (2.75% of the stated principal amount), with respect to each quarterly determination date on which the closing price of the underlier is greater than or equal to 75% of the initial underlier value, which we refer to as the downside threshold level. However, if the closing price of the underlier is less than the downside threshold level on a determination date, investors will not receive any contingent quarterly payment for that determination date. The closing price of the underlier could be below the downside threshold level on most or all of the determination dates so that you receive few or no contingent quarterly payments over the term of the securities.

If the closing price of the underlier is greater than or equal to the initial underlier value on any determination date other than the final determination date, the securities will be automatically redeemed for an early redemption payment equal to the stated principal amount *plus* the contingent quarterly payment otherwise due. If the securities are automatically redeemed prior to maturity, investors will receive no further contingent quarterly payments. If the securities have not previously been redeemed and the final underlier value is greater than or equal to the downside threshold level, the payment at maturity will also be the stated principal amount *plus* the contingent quarterly payment otherwise due. However, if the securities have not previously been redeemed and the final underlier value is less than the downside threshold level, investors will lose 1% of the stated principal amount for every 1% that the final underlier value is less than the initial underlier value. Under these circumstances, the amount investors receive will be less than 75% of the stated principal amount and could be zero. Investors in the securities must be willing and able to accept the risk of losing their entire initial investment and also the risk of not receiving any contingent quarterly payment throughout the entire term of the securities. In addition, investors will not participate in any appreciation of the underlier.

Key Investment Rationale

The securities are for investors who are willing and able to risk their principal and forgo guaranteed interest payments, in exchange for the opportunity to receive contingent quarterly payments at a potentially above-market rate, subject to automatic early redemption. The securities offer investors an opportunity to receive a contingent quarterly payment of \$0.275 (2.75% of the stated principal amount) with respect to each determination date on which the closing price of the underlier is greater than or equal to the downside threshold level. In addition, the following scenarios reflect the potential payment on the securities, if any, upon an automatic early redemption or at maturity:

- | | |
|-------------------|--|
| Scenario 1 | On any determination date other than the final determination date, the closing price of the underlier is <i>greater than or equal to</i> the initial underlier value. |
| | <ul style="list-style-type: none">▪ The securities will be automatically redeemed for (i) the stated principal amount <i>plus</i> (ii) the contingent quarterly payment otherwise due.▪ Investors will not participate in any appreciation of the underlier from the initial underlier value and will receive no further contingent quarterly payments. |
| Scenario 2 | The securities are not automatically redeemed prior to maturity and the final underlier value is <i>greater than or equal to</i> the downside threshold level. |
| | <ul style="list-style-type: none">▪ The payment due at maturity will be (i) the stated principal amount <i>plus</i> (ii) the contingent quarterly payment otherwise due.▪ Investors will not participate in any appreciation of the underlier from the initial underlier value. |

Scenario 3

The securities are not automatically redeemed prior to maturity and the final underlier value is *less than* the downside threshold level.

- The payment due at maturity will be equal to the stated principal amount times the underlier performance factor. In this case, at maturity, the securities pay less than 75% of the stated principal amount and the percentage loss of the stated principal amount will be equal to the percentage decrease in the final underlier value from the initial underlier value. For example, if the final underlier value is 55% less than the initial underlier value, the securities will pay \$4.50 per security, or 45% of the stated principal amount, for a loss of 55% of the stated principal amount. **Investors will lose a significant portion and may lose all of their principal in this scenario.**

Principal at Risk Securities

Selected Purchase Considerations

The securities are not suitable for all investors. The securities *may* be a suitable investment for you if all of the following statements are true:

- You do not seek an investment that produces fixed periodic interest or coupon payments or other non-contingent sources of current income.
- You do not anticipate that the final underlier value will be less than the downside threshold level on the final determination date, and you are willing and able to accept the risk that, if it is, you will lose a significant portion or all of the stated principal amount.
- You do not anticipate that the closing price of the underlier will be less than the downside threshold level on any determination date, and you are willing and able to accept the risk that, if it is, you may receive few or no contingent quarterly payments over the term of the securities.
- You are willing and able to forgo participation in any appreciation of the underlier, and you understand that any return on your investment will be limited to the contingent quarterly payments that may be payable on the securities.
- You are willing and able to accept the risks associated with an investment linked to the performance of the underlier, as explained in more detail in the "Risk Factors" section of this document.
- You understand and accept that you will not be entitled to receive dividends or distributions that may be paid to holders of the underlier, nor will you have any voting rights with respect to the issuer of the underlier.
- You are willing and able to accept the risk that the securities may be automatically redeemed prior to scheduled maturity and that you may not be able to reinvest your money in an alternative investment with comparable risk and yield.
- You do not seek an investment for which there will be an active secondary market and you are willing and able to hold the securities to maturity if the securities are not automatically redeemed.
- You are willing and able to assume our credit risk for all payments on the securities.
- You are willing and able to consent to the exercise of any U.K. Bail-in Power by any relevant U.K. resolution authority.

The securities *may not* be a suitable investment for you if *any* of the following statements are true:

- You seek an investment that produces fixed periodic interest or coupon payments or other non-contingent sources of current income.
- You seek an investment that provides for the full repayment of principal at maturity.
- You anticipate that the final underlier value will be less than the downside threshold level on the final determination date, or you are unwilling or unable to accept the risk that, if it is, you will lose a significant portion or all of the stated principal amount.
- You anticipate that the closing price of the underlier will be less than the downside threshold level on one or more determination dates, or you are unwilling or unable to accept the risk that, if it is, you may receive few or no contingent quarterly payments over the term of the securities.

You seek exposure to any upside performance of the underlier or you seek an investment with a return that is not

- limited to the contingent quarterly payments that may be payable on the securities.
- You are unwilling or unable to accept the risks associated with an investment linked to the performance of the underlier, as explained in more detail in the “Risk Factors” section of this document.
- You seek an investment that entitles you to dividends or distributions on, or voting rights related to, the underlier.
- You are unwilling or unable to accept the risk that the securities may be automatically redeemed prior to scheduled maturity.
- You seek an investment for which there will be an active secondary market and/or you are unwilling or unable to hold the securities to maturity if they are not automatically redeemed.
- You are unwilling or unable to assume our credit risk for all payments on the securities.
- You are unwilling or unable to consent to the exercise of any U.K. Bail-in Power by any relevant U.K. resolution authority.

You must rely on your own evaluation of the merits of an investment in the securities. You should reach a decision whether to invest in the securities after carefully considering, with your advisors, the suitability of the securities in light of your investment objectives and the specific information set forth in this document, the prospectus and the prospectus supplement. Neither the issuer nor Barclays Capital Inc. makes any recommendation as to the suitability of the securities for investment.

Based on the Performance of the Capital Stock of Campbell Soup Company

Principal at Risk Securities

How the Securities Work

The following diagrams illustrate the potential outcomes for the securities depending on the closing price of the underlier on the determination dates.

Diagram #1: Determination Dates Prior to the Final Determination Date

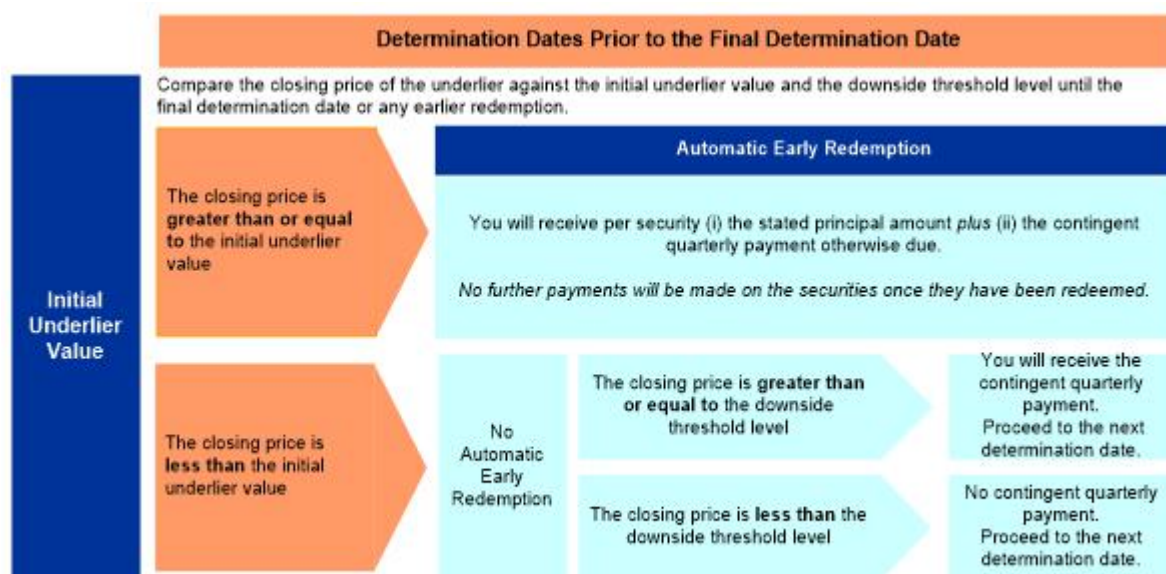

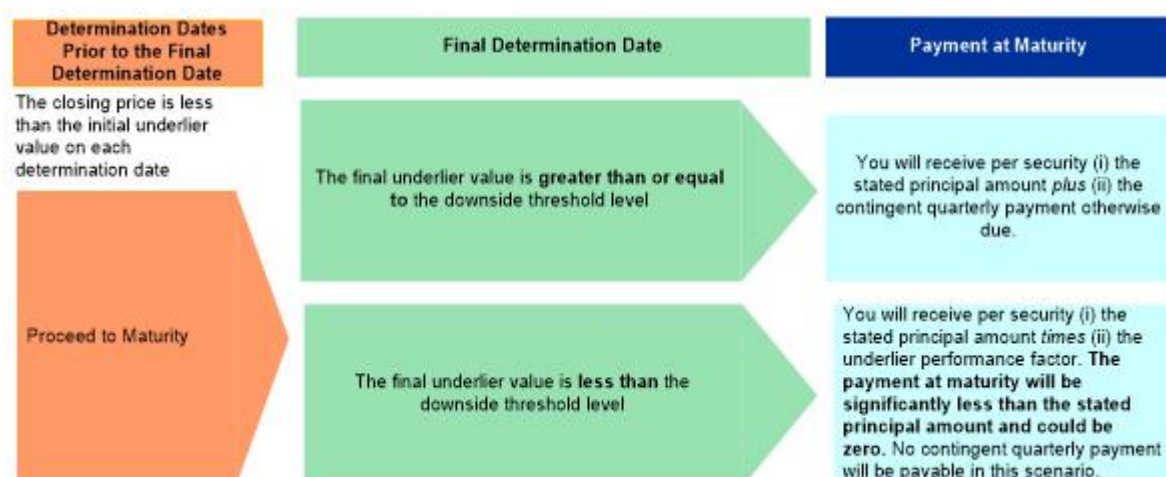

Diagram #2: Payment at Maturity If No Automatic Early Redemption Occurs

For more information about the payment upon an automatic early redemption or at maturity in different hypothetical scenarios, see "Hypothetical Examples" below.

Contingent Income Auto-Callable Securities due July 1, 2022

Based on the Performance of the Capital Stock of Campbell Soup Company
Principal at Risk Securities

Hypothetical Examples

The numbers appearing in the following examples may have been rounded for ease of analysis. The examples below assume that the securities will be held until maturity or earlier redemption and do not take into account the tax consequences of an investment in the securities. The examples below are based on the following terms:*

Hypothetical Initial Underlier Value: \$100.00

Hypothetical Downside Threshold Level: \$75.000, which is 75% of the hypothetical initial underlier value

Contingent Quarterly Payment: \$0.275 (2.75% of the stated principal amount)

Stated Principal Amount: \$10 per security

* Terms used for purposes of these hypothetical examples do not represent the actual initial underlier value or downside threshold level applicable to the securities. In particular, the hypothetical initial underlier value of \$100.00 used in these examples has been chosen for illustrative purposes only and does not represent the actual initial underlier value. Please see "Campbell Soup Company Overview" below for recent actual values of the underlier. The actual initial underlier value and downside threshold level applicable to the securities are set forth on the cover page of this document.

In Examples 1 and 2, the closing price of the underlier is greater than or equal to the hypothetical initial underlier value of \$100.00 on one of the determination dates prior to the final determination date. Because the closing price of the underlier is greater than or equal to the initial underlier value on one of the determination dates prior to the final determination date, the securities are automatically redeemed following the relevant determination date. In Examples 3 and 4, the closing price of the underlier on the determination dates prior to the final determination date is less than the initial underlier value, and, consequently, the securities are not automatically redeemed prior to, and remain outstanding until, maturity.

Determination Dates	Example 1			Example 2		
	Hypothetical Closing Price	Contingent Quarterly Payment (per security)	Early Redemption Payment (per security)	Hypothetical Closing Price	Contingent Quarterly Payment (per security)	Early Redemption Payment (per security)
#1	\$65.00	\$0	N/A	\$95.00	\$0.275	N/A
#2	\$100.00	—*	\$10.275	\$50.00	\$0	N/A

#9	N/A	N/A	N/A	\$80.00	\$0.275	N/A
#10	N/A	N/A	N/A	\$125.00	—*	\$10.275
#11	N/A	N/A	N/A	N/A	N/A	N/A
Final Determination Date	N/A	N/A	N/A	N/A	N/A	N/A
Payment at Maturity	N/A			N/A		

* The early redemption payment includes the unpaid contingent quarterly payment with respect to the determination date on which the closing price of the underlier is greater than or equal to the initial underlier value and the securities are redeemed as a result.

In Example 1, the securities are automatically redeemed following the second determination date, as the closing price of the underlier on the second determination date is equal to the initial underlier value. Following the second determination date, you receive the early redemption payment, calculated as follows:

$$\text{stated principal amount} + \text{contingent quarterly payment} = \$10 + \$0.275 = \$10.275$$

In this example, the automatic early redemption feature limits the term of your investment to approximately 6 months and you may not be able to reinvest at comparable terms or returns. If the securities are redeemed early, you will stop receiving contingent quarterly payments.

Contingent Income Auto-Callable Securities due July 1, 2022

Based on the Performance of the Capital Stock of Campbell Soup Company

Principal at Risk Securities

In Example 2, the securities are automatically redeemed following the tenth determination date, as the closing price of the underlier on the tenth determination date is greater than the initial underlier value. As the closing prices of the underlier on the first, fifth, sixth, eighth and ninth determination dates are greater than or equal to the downside threshold level, you receive the contingent quarterly payment of \$0.275 with respect to those determination dates. Following the tenth determination date, you receive an early redemption payment of \$10.275, which includes the contingent quarterly payment with respect to that determination date.

In this example, the automatic early redemption feature limits the term of your investment to approximately 30 months and you may not be able to reinvest at comparable terms or returns. If the securities are redeemed early, you will stop receiving contingent quarterly payments. Further, although the underlier has appreciated by 25% from the initial underlier value on the tenth determination date, upon automatic early redemption, you receive only \$10.275 per security and do not benefit from such appreciation.

Determination Dates	Example 3			Example 4		
	Hypothetical Closing Price	Contingent Quarterly Payment (per security)	Early Redemption Payment (per security)	Hypothetical Closing Price	Contingent Quarterly Payment (per security)	Early Redemption Payment (per security)
#1	\$65.00	\$0	N/A	\$45.00	\$0	N/A
#2	\$70.00	\$0	N/A	\$60.00	\$0	N/A
#3	\$60.00	\$0	N/A	\$57.50	\$0	N/A
#4	\$55.00	\$0	N/A	\$65.00	\$0	N/A
#5	\$45.00	\$0	N/A	\$70.00	\$0	N/A
#6	\$40.00	\$0	N/A	\$60.00	\$0	N/A
#7	\$45.00	\$0	N/A	\$65.00	\$0	N/A
#8	\$55.00	\$0	N/A	\$55.00	\$0	N/A
#9	\$62.50	\$0	N/A	\$45.00	\$0	N/A
#10	\$50.00	\$0	N/A	\$67.50	\$0	N/A
#11	\$65.00	\$0	N/A	\$65.00	\$0	N/A
Final Determination Date	\$50.00	\$0	N/A	\$85.00	—*	N/A
Payment at Maturity	\$5.00			\$10.275		

* The final contingent quarterly payment, if any, will be paid at maturity.

Examples 3 and 4 illustrate the payment at maturity per security based on the final underlier value.

In Example 3, the closing price of the underlier is below the downside threshold level on each determination date throughout the term of the securities. As a result, you do not receive any contingent quarterly payments during the term of the securities and, at maturity, you are fully exposed to the decline in the closing price of the underlier. Because the final underlier value is less than the downside threshold level, at maturity, investors will receive a cash payment at maturity that is significantly less than the stated principal amount per security, calculated as follows:

$$\begin{aligned}
 & (\$10 \times \text{underlier performance factor}) \\
 &= \$10 \times (\text{final underlier value} / \text{initial underlier value}) \\
 &= \$10 \times (\$50.00 / \$100.00) \\
 &= \$5.00
 \end{aligned}$$

In this example, the cash payment you receive at maturity is significantly less than the stated principal amount.

Contingent Income Auto-Callable Securities due July 1, 2022
Based on the Performance of the Capital Stock of Campbell Soup Company
Principal at Risk Securities

In Example 4, the closing price of the underlier is below the downside threshold level on each of the determination dates prior to the final determination date. As a result, you do not receive any contingent quarterly payments following those determination dates. In addition, the closing price of the underlier decreases to a final underlier value of \$85.00. Although the final underlier value is less than the initial underlier value, because the final underlier value is still not less than the downside threshold level, you receive the stated principal amount *plus* the contingent quarterly payment otherwise due. Your payment at maturity is calculated as follows:

$$\$10 + \$0.275 = \$10.275$$

In this example, although the final underlier value represents a 15% decline from the initial underlier value, you receive the stated principal amount per security plus the contingent quarterly payment otherwise due, equal to a total payment of \$10.275 per security at maturity.

Contingent Income Auto-Callable Securities due July 1, 2022

Based on the Performance of the Capital Stock of Campbell Soup Company
Principal at Risk Securities

Risk Factors

An investment in the securities involves significant risks. We urge you to consult your investment, legal, tax, accounting and other advisors before you invest in the securities. Investing in the securities is not equivalent to investing directly in the underlier. The following is a non-exhaustive list of certain key risk factors for investors in the securities. For further discussion of these and other risks, you should read the section entitled "Risk Factors" in the prospectus supplement, including the risk factors discussed under the following headings:

- o *"Risk Factors—Risks Relating to the Securities Generally";*
 - o *"Risk Factors—Additional Risks Relating to Securities with Reference Assets That Are Equity Securities, Indices of Equity Securities or Exchange-Traded Funds that Hold Equity Securities"; and*
 - o *"Risk Factors—Additional Risks Relating to Securities That We May Call or Redeem (Automatically or Otherwise)."*
- **The securities do not guarantee the return of any principal.** The terms of the securities differ from those of ordinary debt securities in that the securities do not guarantee the return of any of the stated principal amount at maturity. Instead, if the securities have not been automatically redeemed prior to maturity and if the final underlier value is less than the downside threshold level, you will be exposed to the decline in the closing price of the underlier, as compared to the initial underlier value, on a 1-to-1 basis and you will receive for each security that you hold at maturity an amount in cash equal to the stated principal amount times the underlier performance factor. Under these circumstances, your payment at maturity will be less than 75% of the stated principal amount and could be zero.
 - **You will not receive any contingent quarterly payment for any quarterly period where the closing price of the underlier on the applicable determination date is less than the downside threshold level.** The terms of the securities differ from those of ordinary debt securities in that they do not provide for regular interest payments. Instead, a contingent quarterly payment will be made with respect to a quarterly period only if the closing price of the underlier is greater than or equal to the downside threshold level on the related determination date. If the closing price of the underlier is below the downside threshold level on any determination date, you will not receive a contingent quarterly payment for the related quarterly period. The closing price of the underlier could be below the downside threshold level on most or all of the determination dates so that you receive few or no contingent quarterly payments over the term of the securities. If you do not receive sufficient contingent quarterly payments over the term of the securities, the overall return on the securities may be less than the amount that would be paid on a conventional debt security of the issuer of comparable maturity.
 - **Credit of issuer.** The securities are unsecured and unsubordinated debt obligations of the issuer, Barclays Bank PLC, and are not, either directly or indirectly, an obligation of any third party. Any payment to be made on the securities, including any repayment of principal, is subject to the ability of Barclays Bank PLC to satisfy its obligations as they come due and is not guaranteed by any third party. As a result, the actual and perceived creditworthiness of Barclays Bank PLC may affect the market value of the securities and, in the event Barclays Bank PLC were to default on its obligations, you might not receive any amount owed to you under the terms of the securities.
 - **You may lose some or all of your investment if any U.K. Bail-in Power is exercised by the relevant U.K. resolution authority.** Notwithstanding any other agreements, arrangements or understandings between Barclays Bank PLC and any holder of the securities, by acquiring the securities, each holder of the securities acknowledges, accepts, agrees to be bound by, and consents to the exercise of, any U.K. Bail-in Power by the relevant U.K. resolution authority as set forth under "Consent to U.K. Bail-in Power" in this document. Accordingly, any U.K. Bail-in Power may be exercised in such a manner as to result in you and other holders of the securities losing all or a part of the value of your investment in the securities or receiving a different security from the securities, which may be worth significantly less than the securities and which may have significantly fewer protections than those typically afforded to debt securities. Moreover, the relevant U.K. resolution authority may exercise the U.K. Bail-in Power without providing any advance notice to, or requiring the consent of, the holders of the securities. The exercise of any U.K. Bail-in Power by the relevant U.K. resolution authority with respect to the

securities will not be a default or an Event of Default (as each term is defined in the indenture) and the trustee will not be liable for any action that the trustee takes, or abstains from taking, in either case, in accordance with the exercise of the U.K. Bail-in Power by the relevant U.K. resolution authority with respect to the securities. See “Consent to U.K. Bail-in Power” in this document as well as “U.K. Bail-in Power,” “Risk Factors—Risks Relating to the Securities Generally—Regulatory action in the event a bank or investment firm in the Group is failing or likely to fail could materially adversely affect the value of the securities” and “Risk Factors—Risks Relating to the Securities Generally—Under the terms of the securities, you have agreed to be bound by the exercise of any U.K. Bail-in Power by the relevant U.K. resolution authority” in the accompanying prospectus supplement.

- **Early redemption risk.** The term of your investment in the securities may be limited to as short as approximately three months by the automatic early redemption feature of the securities. If the securities are redeemed prior to maturity, no further contingent quarterly payments will be made on the securities, and you may be forced to reinvest in a lower interest rate environment. There is no guarantee that you would be able to reinvest the proceeds from an investment in the securities in a comparable investment with a similar level of risk in the event the securities are redeemed prior to the maturity date.

Contingent Income Auto-Callable Securities due July 1, 2022

Based on the Performance of the Capital Stock of Campbell Soup Company Principal at Risk Securities

- **Contingent repayment of principal applies only at maturity.** You should be willing and able to hold the securities to maturity. If you sell the securities prior to maturity in the secondary market, if any, you may have to sell the securities at a loss relative to your initial investment even if the price of the underlier is above the downside threshold level.
- **You will not participate in any appreciation in the value of the underlier.** You will not participate in any appreciation in the value of the underlier from the initial underlier value even though you will be exposed to the depreciation in the value of the underlier if the securities have not been redeemed prior to maturity and the final underlier value is less than the downside threshold level. The return on the securities will be limited to the contingent quarterly payment that is paid with respect to each determination date on which the closing price of the underlier is greater than or equal to the downside threshold level.
- **The securities will not be listed on any securities exchange, and secondary trading may be limited.** Barclays Capital Inc. and other affiliates of Barclays Bank PLC intend to offer to purchase the securities in the secondary market but are not required to do so and may cease any such market making activities at any time, without notice. Even if a secondary market develops, it may not provide enough liquidity to allow you to trade or sell the securities easily. Because other dealers are not likely to make a secondary market for the securities, the price, if any, at which you may be able to trade your securities is likely to depend on the price, if any, at which Barclays Capital Inc. and other affiliates of Barclays Bank PLC are willing to buy the securities. In addition, Barclays Capital Inc. or one or more of our other affiliates may at any time hold an unsold portion of the securities (as described on the cover page of this document), which may inhibit the development of a secondary market for the securities. The securities are not designed to be short-term trading instruments. Accordingly, you should be willing and able to hold your securities to maturity.
- **The contingent quarterly payment is based solely on the closing price of the underlier on the determination dates.** Whether the contingent quarterly payment will be made with respect to a determination date will be based on the closing price of the underlier on that determination date. As a result, you will not know whether you will receive the contingent quarterly payment with respect to a quarterly period until the related determination date. Moreover, because each contingent quarterly payment is based solely on the closing price of the underlier on a specific determination date, if the closing price on that determination date is less than the downside threshold level, you will not receive any contingent quarterly payment with respect to the related quarterly period, even if the closing price of the underlier was higher on other days during the term of the securities.
- **The securities are subject to volatility risk.** Volatility is a measure of the degree of variation in the price of the underlier over a period of time. The contingent quarterly payment will be determined on the pricing date based on a number of factors, including the expected volatility of the underlier. The contingent quarterly payment will be higher than the fixed rate that we would pay on a conventional debt security of the same tenor and will be higher than it otherwise would have been had the expected volatility of the underlier, calculated as of the pricing date, been lower. As volatility of an underlier increases, there will typically be a greater likelihood that (a) the closing price of that underlier will be less than its downside threshold level on one or more determination dates and (b) the final underlier value of that underlier will be less than its downside threshold level.

Accordingly, you should understand that a higher contingent quarterly payment will reflect, among other things, an indication of a greater likelihood that you will (a) not receive contingent quarterly payments with respect to one or more determination dates and/or (b) incur a loss of principal at maturity than would have been the case had the contingent quarterly payment been lower. In addition, actual volatility over the term of the securities may be significantly higher than the expected volatility at the time the terms of the securities were determined. If actual volatility is higher than expected, you will face an even greater risk that you will not receive contingent quarterly payments and/or that you will lose a significant portion or all of your principal at maturity for the reasons described above.

- **Investing in the securities is not equivalent to investing in the underlier.** Investors in the securities will not own the underlier or have voting rights or rights to receive dividends or other distributions or any other rights with respect to the underlier.

- **No affiliation with the issuer of the underlier.** The issuer of the underlier is not an affiliate of ours, is not involved with this offering in any way, and has no obligation to consider your interests in taking any corporate actions that might affect the value of the securities. We have not made any due diligence inquiry with respect to the issuer of the underlier in connection with this offering.
- **Single equity risk.** The price of the underlier can rise or fall sharply due to factors specific to the underlier and its issuer, such as stock price volatility, earnings, financial conditions, corporate, industry and regulatory developments, management changes and decisions and other events, as well as general market factors, such as general stock market volatility and levels, interest rates and economic and political conditions. We urge you to review financial and other information filed periodically with the SEC by the issuer of the underlier.
- **We may engage in business with or involving the issuer of the underlier without regard to your interests.** We or our affiliates may presently or from time to time engage in business with the issuer of the underlier without regard to your interests and thus may acquire non-public information about the issuer of the underlier. Neither we nor any of our affiliates undertakes to disclose any such information to you. In addition, we or our affiliates from time to time have published and in the future may publish research reports with respect to the issuer of the underlier, which may or may not recommend that investors buy or hold the underlier.

Contingent Income Auto-Callable Securities due July 1, 2022

Based on the Performance of the Capital Stock of Campbell Soup Company Principal at Risk Securities

- **The antidilution adjustments the calculation agent is required to make do not cover every corporate event that could affect the underlier.** Barclays Bank PLC, as calculation agent, will adjust the amount payable at maturity for certain corporate events affecting the underlier, such as stock splits and stock dividends, and certain other corporate actions involving the issuer of the underlier, such as mergers. However, the calculation agent will not make an adjustment for every corporate event that can affect the underlier. For example, the calculation agent is not required to make any adjustments if the issuer of the underlier or anyone else makes a partial tender or partial exchange offer for the underlier, nor will adjustments be made following the final determination date. If an event occurs that does not require the calculation agent to adjust the amount payable at maturity, the market price of the securities may be materially and adversely affected.
- **In some circumstances, the payment you receive on the securities may be based on the stock of another company and not the underlier.** Following certain corporate events relating to the issuer of the underlier where the issuer of the underlier is not the surviving entity, your return on the securities paid by Barclays Bank PLC may be based on the shares of a successor to the issuer of the underlier or any cash or any other assets distributed to holders of the underlier in such corporate event. The occurrence of these corporate events and the consequent adjustments may materially and adversely affect the value of the securities. For more information, see "Reference Assets—Equity Securities—Share Adjustments Relating to Securities with an Equity Security as a Reference Asset" in the prospectus supplement.
- **Hedging and trading activity by the issuer and its affiliates could potentially adversely affect the value of the securities.** Hedging or trading activities of the issuer's affiliates and of any other hedging counterparty with respect to the securities could adversely affect the value of the underlier and, as a result, could decrease the amount an investor may receive on the securities at maturity, if any. Any of these hedging or trading activities on or prior to the pricing date could have increased the initial underlier value and, as a result, the downside threshold level, which is the price at or above which the underlier must close on each determination date in order for you to receive a contingent quarterly payment or, if the securities are not redeemed prior to maturity, in order for you to avoid being exposed to the negative price performance of the underlier at maturity. Additionally, such hedging or trading activities during the term of the securities could potentially affect the price of the underlier on the determination dates and, accordingly, whether investors will receive one or more contingent quarterly payments, whether the securities are automatically redeemed prior to maturity and, if the securities are not redeemed prior to maturity, the payment at maturity, if any.
- **The market price of the securities will be influenced by many unpredictable factors.** Several factors will influence the value of the securities in the secondary market and the price at which Barclays Capital Inc. and other affiliates of Barclays Bank PLC may be willing to purchase or sell the securities in the secondary market. Although we expect that generally the value of the underlier on any day will affect the value of the securities more than any other single factor, other factors that may influence the value of the securities include:
 - the volatility (frequency and magnitude of changes in value) of the underlier;
 - whether the closing price has been, or is expected to be, below the downside threshold level on any determination date;
 - dividend rates on the underlier;
 - interest and yield rates in the market;
 - time remaining until the securities mature;
 - supply and demand for the securities;
 - geopolitical conditions and economic, financial, political, regulatory and judicial events that affect the underlier and that may affect the final underlier value;
 - the occurrence of certain events affecting the underlier that may or may not require an adjustment of the initial underlier value or other variables; and

- o any actual or anticipated changes in our credit ratings or credit spreads.

The value of the underlier may be, and has recently been, volatile, and we can give you no assurance that the volatility will lessen. See “Campbell Soup Company Overview” below. You may receive less, and possibly significantly less, than the stated principal amount per security if you try to sell your securities prior to maturity.

- **The estimated value of your securities is lower than the initial issue price of your securities.** The estimated value of your securities on the pricing date is lower than the initial issue price of your securities. The difference between the initial issue price of your securities and the estimated value of the securities is a result of certain factors, such as any sales commissions to be paid to Barclays Capital Inc. or another affiliate of ours, any selling concessions, discounts, commissions or fees to be allowed or paid to non-affiliated intermediaries, the estimated profit that we or any of our affiliates expect to earn in connection with structuring the securities, the estimated cost that we may incur in hedging our obligations under the securities, and estimated development and other costs that we may incur in connection with the securities.
- **The estimated value of your securities might be lower if such estimated value were based on the levels at which our debt securities trade in the secondary market.** The estimated value of your securities on the pricing date is based on a

Contingent Income Auto-Callable Securities due July 1, 2022

Based on the Performance of the Capital Stock of Campbell Soup Company Principal at Risk Securities

number of variables, including our internal funding rates. Our internal funding rates may vary from the levels at which our benchmark debt securities trade in the secondary market. As a result of this difference, the estimated value referenced above might be lower if such estimated value were based on the levels at which our benchmark debt securities trade in the secondary market.

- **The estimated value of the securities is based on our internal pricing models, which may prove to be inaccurate and may be different from the pricing models of other financial institutions.** The estimated value of your securities on the pricing date is based on our internal pricing models, which take into account a number of variables and are based on a number of subjective assumptions, which may or may not materialize. These variables and assumptions are not evaluated or verified on an independent basis. Further, our pricing models may be different from other financial institutions' pricing models and the methodologies used by us to estimate the value of the securities may not be consistent with those of other financial institutions that may be purchasers or sellers of securities in the secondary market. As a result, the secondary market price of your securities may be materially different from the estimated value of the securities determined by reference to our internal pricing models.
- **The estimated value of your securities is not a prediction of the prices at which you may sell your securities in the secondary market, if any, and such secondary market prices, if any, will likely be lower than the initial issue price of your securities and may be lower than the estimated value of your securities.** The estimated value of the securities will not be a prediction of the prices at which Barclays Capital Inc., other affiliates of ours or third parties may be willing to purchase the securities from you in secondary market transactions (if they are willing to purchase, which they are not obligated to do). The price at which you may be able to sell your securities in the secondary market at any time will be influenced by many factors that cannot be predicted, such as market conditions, and any bid and ask spread for similar sized trades, and may be substantially less than our estimated value of the securities. Further, as secondary market prices of your securities take into account the levels at which our debt securities trade in the secondary market, and do not take into account our various costs related to the securities such as fees, commissions, discounts, and the costs of hedging our obligations under the securities, secondary market prices of your securities will likely be lower than the initial issue price of your securities. As a result, the price at which Barclays Capital Inc., other affiliates of ours or third parties may be willing to purchase the securities from you in secondary market transactions, if any, will likely be lower than the price you paid for your securities, and any sale prior to the maturity date could result in a substantial loss to you.
- **The temporary price at which we may initially buy the securities in the secondary market and the value we may initially use for customer account statements, if we provide any customer account statements at all, may not be indicative of future prices of your securities.** Assuming that all relevant factors remain constant after the pricing date, the price at which Barclays Capital Inc. may initially buy or sell the securities in the secondary market (if Barclays Capital Inc. makes a market in the securities, which it is not obligated to do) and the value that we may initially use for customer account statements, if we provide any customer account statements at all, may exceed our estimated value of the securities on the pricing date, as well as the secondary market value of the securities, for a temporary period after the initial issue date of the securities. The price at which Barclays Capital Inc. may initially buy or sell the securities in the secondary market and the value that we may initially use for customer account statements may not be indicative of future prices of your securities.
- **We and our affiliates, and any dealer participating in the distribution of the securities, may engage in various activities or make determinations that could materially affect your securities in various ways and create conflicts of interest.** We and our affiliates play a variety of roles in connection with the issuance of the securities, as described below. In performing these roles, our and our affiliates' economic interests are potentially adverse to your interests as an investor in the securities.

In connection with our normal business activities and in connection with hedging our obligations under the securities, we and our affiliates make markets in and trade various financial instruments or products for our accounts and for the account of our clients and otherwise provide investment banking and other financial services with respect to these financial instruments and products. These financial instruments and products may include securities, derivative instruments or assets that may relate to the underlier. In any such market making, trading and hedging activity, investment banking and other financial services, we or our affiliates may take positions or take actions that are inconsistent with, or adverse to, the investment objectives of the holders of the securities. We and

our affiliates have no obligation to take the needs of any buyer, seller or holder of the securities into account in conducting these activities. Such market making, trading and hedging activity, investment banking and other financial services may negatively impact the value of the securities.

In addition, the role played by Barclays Capital Inc., as the agent for the securities, could present significant conflicts of interest with the role of Barclays Bank PLC, as issuer of the securities. For example, Barclays Capital Inc. or its representatives may derive compensation or financial benefit from the distribution of the securities and such compensation or financial benefit may serve as an incentive to sell the securities instead of other investments. Furthermore, we and our affiliates establish the offering price of the securities for initial sale to the public, and the offering price is not based upon any independent verification or valuation.

Furthermore, if any dealer participating in the distribution of the securities or any of its affiliates conducts hedging activities for us in connection with the securities, that participating dealer or its affiliates will expect to realize a projected profit from such hedging activities, and this projected profit will be in addition to any selling concession that the participating dealer realizes for

Contingent Income Auto-Callable Securities due July 1, 2022
Based on the Performance of the Capital Stock of Campbell Soup Company
Principal at Risk Securities

the sale of the securities to you. This additional projected profit may create a further incentive for the participating dealer to sell the securities to you.

In addition to the activities described above, we will also act as the calculation agent for the securities. As calculation agent, we will determine any values of the underlier and make any other determinations necessary to calculate any payments on the securities. In making these determinations, we may be required to make discretionary judgments, including determining whether a market disruption event has occurred on any date that the value of the underlier is to be determined; determining whether to adjust any variable described herein in the case of certain corporate events related to the underlier that the calculation agent determines have a diluting or concentrative effect on the theoretical value of the shares of the underlier; and determining whether to accelerate the maturity date upon the occurrence of certain reorganization events and additional adjustment events. In making these discretionary judgments, our economic interests are potentially adverse to your interests as an investor in the securities, and any of these determinations may adversely affect any payments on the securities.

- **Tax treatment.** Significant aspects of the tax treatment of the securities are uncertain. You should consult your tax advisor about your tax situation. See "Additional provisions—Tax considerations" below.

Campbell Soup Company Overview

According to publicly available information, Campbell Soup Company (the "Company") is a manufacturer and marketer of branded food and beverage products.

Information filed by the Company with the SEC under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), can be located by reference to its SEC file number: 001-03822. The Company's capital stock is listed on the New York Stock Exchange under the ticker symbol "CPB."

We urge you to read the following section in the accompanying prospectus supplement: "Reference Assets—Equity Securities—Reference Asset Issuer and Reference Asset Information." Companies with securities registered under the Exchange Act are required to file financial and other information specified by the SEC periodically. Information provided to or filed with the SEC by the Company can be located on a website maintained by the SEC at <http://www.sec.gov> by reference to the Company's SEC file number provided above.

The summary information above regarding the Company comes from the Company's SEC filings. You are urged to refer to the SEC filings made by the Company and to other publicly available information (such as the Company's annual report) to obtain an understanding of the Company's business and financial prospects. The summary information contained above is not designed to be, and should not be interpreted as, an effort to present information regarding the financial prospects of any issuer or any trends, events or other factors that may have a positive or negative influence on those prospects or as an endorsement of any particular issuer.

Information from outside sources is not incorporated by reference in, and should not be considered part of, this document or the accompanying prospectus or prospectus supplement. We have not independently verified the accuracy or completeness of the information obtained from outside sources.

Information about the underlier as of market close on June 28, 2019:

Bloomberg Ticker Symbol:	CPB UN	52 Week High:	\$43.08
Current Closing Price:	\$40.07	52 Week Low:	\$32.26
52 Weeks Ago (6/29/2018):	\$40.54		

The following table sets forth the published high, low and period-end closing prices of the underlier for each quarter for the period of January 2, 2014 through June 28, 2019. The associated graph shows the closing prices of the underlier for each day in the same period. The closing price of the underlier on June 28, 2019 was \$40.07. We obtained the closing prices of the underlier from Bloomberg Professional[®] service, without independent verification. Historical performance of the underlier should not be taken as an indication of future performance. Future performance of the underlier may differ significantly from historical performance, and no assurance can be given as to the closing price of the underlier during the term of the securities, including on any of the determination dates. We cannot give you assurance that the performance of the underlier will not result in a loss on your initial investment. *The closing prices below may have been adjusted to reflect certain corporate actions, such as stock splits, public offerings, mergers and acquisitions, spin-offs, extraordinary dividends, delistings and bankruptcy.*

Additional Information about the Securities

Please read this information in conjunction with the terms on the cover page of this document.

Additional provisions:

Minimum ticketing size: \$1,000 / 100 securities

Tax considerations: You should review carefully the sections entitled “Material U.S. Federal Income Tax Consequences—Tax Consequences to U.S. Holders—Notes Treated as Prepaid Forward or Derivative Contracts with Associated (Contingent) Coupons” and, if you are a non-U.S. holder, “—Tax Consequences to Non-U.S. Holders,” in the accompanying prospectus supplement. The following discussion supersedes the discussion in the accompanying prospectus supplement to the extent it is inconsistent therewith.

In determining our reporting responsibilities, if any, we intend to treat (i) the securities for U.S. federal income tax purposes as prepaid forward contracts with associated contingent coupons and (ii) any contingent quarterly payments as ordinary income, as described in the section entitled “Material U.S. Federal Income Tax Consequences—Tax Consequences to U.S. Holders—Notes Treated as Prepaid Forward or Derivative Contracts with Associated (Contingent) Coupons” in the accompanying prospectus supplement. Our special tax counsel, Davis Polk & Wardwell LLP, has advised that it believes this treatment to be reasonable, but that there are other reasonable treatments that the Internal Revenue Service (the “IRS”) or a court may adopt.

Sale, exchange or redemption of a security. Assuming the treatment described above is respected, upon a sale or exchange of the securities (including redemption upon an automatic call or at maturity), you should recognize capital gain or loss equal to the difference between the amount realized on the sale or exchange and your tax basis in the securities, which should equal the amount you paid to acquire the securities (assuming contingent quarterly payments are properly treated as ordinary income, consistent with the position referred to above). This gain or loss should be short-term capital gain or loss unless you hold the securities for more than one year, in which case the gain or loss should be long-term capital gain or loss, whether or not you are an initial purchaser of the securities at the issue price. The deductibility of capital losses is subject to limitations. If you sell your securities between the time your right to a contingent quarterly payment is fixed and the time it is paid, it is likely that you will be treated as receiving ordinary income equal to the contingent quarterly payment. Although uncertain, it is possible that proceeds received from the sale or exchange of your securities prior to a determination date but that can be attributed to an expected contingent quarterly payment could be treated as ordinary income. You should consult your tax advisor regarding this issue.

As noted above, there are other reasonable treatments that the IRS or a court may adopt, in which case the timing and character of any income or loss on the securities could be materially affected. In addition, in 2007 the U.S. Treasury Department and the IRS released a notice requesting comments on the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. The notice focuses in particular on whether to require investors in these instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments and the relevance of factors such as the nature of the underlying property to which the instruments are linked. While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially affect the tax consequences of an investment in the securities, possibly with retroactive effect. You should consult your tax advisor regarding the U.S. federal

income tax consequences of an investment in the securities, including possible alternative treatments and the issues presented by this notice.

Non-U.S. holders. Insofar as we have responsibility as a withholding agent, we do not currently intend to treat contingent quarterly payments to non-U.S. holders (as defined in the accompanying prospectus supplement) as subject to U.S. withholding tax. However, non-U.S. holders should in any event expect to be required to provide appropriate Forms W-8 or other documentation in order to establish an exemption from backup withholding, as described under the heading “—Information Reporting and Backup Withholding” in the accompanying prospectus supplement. If any withholding is required, we will not be required to pay any additional amounts with respect to amounts withheld.

Treasury regulations under Section 871(m) generally impose a withholding tax on certain “dividend equivalents” under certain “equity linked instruments.” A recent IRS notice excludes from the scope of Section 871(m) instruments issued prior to January 1, 2021 that do not have a “delta of one” with respect to underlying securities that could pay U.S.-source dividends for U.S. federal income tax purposes (each an “Underlying Security”). Based on our determination that the securities do not have a “delta of one” within the meaning of the regulations, our special tax counsel is of the opinion that these regulations should not apply to the securities with regard to non-U.S. holders. Our determination

Contingent Income Auto-Callable Securities due July 1, 2022

Based on the Performance of the Capital Stock of Campbell Soup Company

Principal at Risk Securities

is not binding on the IRS, and the IRS may disagree with this determination. Section 871(m) is complex and its application may depend on your particular circumstances, including whether you enter into other transactions with respect to an Underlying Security. You should consult your tax advisor regarding the potential application of Section 871(m) to the securities.

You should review the section entitled “Material U.S. Federal Income Tax Consequences —Tax Consequences to Non-U.S. Holders—Foreign Account Tax Compliance Withholding” in the accompanying prospectus supplement. The discussion in that section is modified to reflect regulations proposed by the U.S. Treasury Department indicating an intent to eliminate the requirement under FATCA of withholding on gross proceeds (other than amounts treated as interest or other “fixed or determinable, annual or periodical” income) of the disposition of financial instruments. The U.S. Treasury Department has indicated that taxpayers may rely on these proposed regulations pending their finalization.

Trustee: The Bank of New York Mellon

Calculation agent: Barclays Bank PLC

Use of proceeds and hedging: The net proceeds we receive from the sale of the securities will be used for various corporate purposes as set forth in the prospectus and prospectus supplement and, in part, in connection with hedging our obligations under the securities through one or more of our subsidiaries.

We, through our subsidiaries or others, hedge our anticipated exposure in connection with the securities by taking positions in futures and options contracts on the underlier and any other securities or instruments we may wish to use in connection with such hedging. Trading and other transactions by us or our affiliates could affect the value of the underlier, the market value of the securities or any amounts payable on the securities. For further information on our use of proceeds and hedging, see “Use of Proceeds and Hedging” in the prospectus supplement.

ERISA: See “Benefit Plan Investor Considerations” in the accompanying prospectus supplement.

Validity of the securities: In the opinion of Davis Polk & Wardwell LLP, as special United States products counsel to Barclays Bank PLC, when the securities offered by this pricing supplement have been executed and issued by Barclays Bank PLC and authenticated by the trustee pursuant to the indenture, and delivered against payment as contemplated herein, such securities will be valid and binding obligations of Barclays Bank PLC, enforceable in accordance with their terms, subject to applicable bankruptcy, insolvency and similar laws affecting creditors’ rights generally, concepts of reasonableness and equitable principles of general applicability (including, without limitation, concepts of good faith, fair dealing and the lack of bad faith) and possible judicial or regulatory actions giving effect to governmental actions or foreign laws affecting creditors’ rights, *provided* that such counsel expresses no opinion as to the effect of fraudulent conveyance, fraudulent transfer or similar provision of applicable law on the conclusions expressed above. This opinion is given as of the date hereof and is limited to the laws of the State of New York. Insofar as this opinion involves matters governed by English law, Davis Polk & Wardwell LLP has relied, with Barclays Bank PLC’s permission, on the opinion of Davis Polk & Wardwell London LLP, dated as of August 20, 2018, filed as an exhibit to a report on Form 6-K by Barclays Bank PLC on August 20, 2018, and this opinion is subject to the same assumptions, qualifications and limitations as set forth in such opinion of Davis Polk & Wardwell London LLP. In addition, this opinion is subject to customary assumptions about the trustee’s authorization, execution and delivery of the indenture and its authentication of the securities and the validity, binding nature and enforceability of the indenture with respect to the trustee, all as

stated in the letter of Davis Polk & Wardwell LLP, dated August 20, 2018, which has been filed as an exhibit to the report on Form 6-K referred to above.

This document represents a summary of the terms and conditions of the securities. We encourage you to read the accompanying prospectus and prospectus supplement for this offering, which can be accessed via the hyperlinks on the cover page of this document.

Supplemental Plan of Distribution

Morgan Stanley Smith Barney LLC ("Morgan Stanley Wealth Management") and its financial advisors will collectively receive from the agent, Barclays Capital Inc., a fixed sales commission for each security they sell, and Morgan Stanley Wealth Management will receive a structuring fee for each security, in each case as specified on the cover page of this document.

We expect that delivery of the securities will be made against payment for the securities on the original issue date indicated on the cover of this document, which is expected to be more than two business days following the pricing date. Under Rule 15c6-1 of the Securities Exchange Act of 1934, as amended, trades in the secondary market generally are required to settle in two business days, unless the parties to any such trade expressly agree otherwise. Accordingly, purchasers who wish to trade the securities on any date prior to two business days before delivery will be required, by virtue of the fact that the securities will initially settle in more than two business days, to specify alternative settlement arrangements to prevent a failed settlement. See "Plan of Distribution (Conflicts of Interest)" in the prospectus supplement.

The securities are not intended to be offered, sold or otherwise made available to and may not be offered, sold or otherwise made available to any retail investor in the European Economic Area ("EEA Retail Investor"). For these purposes, an EEA Retail Investor

Contingent Income Auto-Callable Securities due July 1, 2022

Based on the Performance of the Capital Stock of Campbell Soup Company Principal at Risk Securities

means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended from time to time, "MiFID"); (ii) a customer within the meaning of Directive 2002/92/EC (as amended from time to time), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID; or (iii) not a qualified investor as defined in Directive 2003/71/EC (as amended from time to time, including by Directive 2010/73/EU). Consequently no key information document required by Regulation (EU) No 1286/2014 (as amended from time to time, the "PRIIPs Regulation") for offering or selling the securities or otherwise making them available to EEA Retail Investors has been prepared and therefore offering or selling such securities or otherwise making them available to any EEA Retail Investor may be unlawful under the PRIIPs Regulation.
