Interest Rate:	See "Description of the Medium-Term Notes" herein
Principal Payment:	At maturity, or upon redemption
CUSIP Number:	3128X8L75

You should read this Pricing Supplement together with Freddie Mac's Global Debt Facility Offering Circular, dated April 3, 2009 (the "Offering Circular"), and all documents that are incorporated by reference in the Offering Circular, which contain important detailed information about the Medium-Term Notes and Freddie Mac. See "Additional Information" in the Offering Circular. Capitalized terms used in this Pricing Supplement have the meanings we gave them in the Offering Circular, unless we specify otherwise.

The Medium-Term Notes offered pursuant to this Pricing Supplement are complex and highly structured debt securities that may not pay a significant amount of interest for extended periods of time. The Medium-Term Notes are not a suitable investment for individuals seeking a steady stream of income

The Medium-Term Notes may not be suitable investments for you. You should not purchase the Medium-Term Notes unless you understand and are able to bear the redemption, yield, market, liquidity and other possible risks associated with the Medium-Term Notes. You should read and evaluate the discussion of risk factors (especially those risk factors that may be particularly relevant to this security) that appears in the Offering Circular under "Risk Factors" before purchasing any of the Medium-Term Notes.

The Medium-Term Notes, including any interest or return of discount on the Medium-Term Notes, are not guaranteed by and are not debts or obligations of the United States or any federal agency or instrumentality other than Freddie Mac.

Any discussion of tax issues set forth in this Pricing Supplement and the related Offering Circular was written to support the promotion and marketing of the transactions described in this Pricing Supplement. Such discussion was not intended or written to be used, and it cannot be used, by any person for the purpose of avoiding any tax penalties that may be imposed on such person. Each investor should seek advice based on its particular circumstances from an independent tax advisor.

	Price to Public ⁽¹⁾⁽²⁾	Underwriting Discount ⁽²⁾	Proceeds to Freddie Mac ⁽¹⁾⁽³⁾
Per Medium-Term Note	100%	0.00%	100.00%
Total	\$50,000,000	\$0.00	\$50,000,000

- (1) Plus accrued interest, if any, from May 28, 2009.
(2) See "Distribution Arrangements" in the Offering Circular.
(3) Before deducting expenses payable by Freddie Mac estimated at \$1,000.

Barclays Capital

DESCRIPTION OF THE MEDIUM-TERM NOTES

Applicable Interest Rate Index:	LIBOR
Index Currency:	U.S. Dollars
Index Maturity:	3-Month
Designated Reuters Page:	LIBOR01
LIBOR Reference Rate:	The rate of LIBOR for the Index Currency at the Index Maturity for the relevant LIBOR Determination Date
Reset Date:	Quarterly, on the 28 th day of February, May, August and November, commencing August 28, 2009
LIBOR Determination Date:	The second London Banking Day preceding the applicable Reset Date
Spread:	<i>Plus</i> 158 basis points (+ 1.58 percentage points) subject to “Interest Rate” provisions, as described below
Interest Rate:	158 basis points above the LIBOR Reference Rate (subject to a minimum interest rate of 0.00%) and provided that if the Interest Rate (as defined herein) is greater than 6.50% per annum, interest will accrue on the Medium-Term Notes at 6.50% per annum. The Interest Rate will be adjusted on each Reset Date to reflect the LIBOR Reference Rate.
Initial Interest Rate:	The initial interest rate for the Medium-Term Notes applicable from, and including, the Issue Date to, but excluding, the first Reset Date, will be equal to LIBOR for the Index Currency at the Index Maturity two London Banking Days prior to the Issue Date, <i>plus</i> 158 basis points, subject to the “Interest Rate” provisions above.
Cap:	6.50%
Floor:	0.00%
Denomination:	\$100,000 minimum, \$1,000 multiples thereafter
Day Count Convention:	30/360, with no adjustment to period end dates.
Payment of Interest:	Quarterly, on the 28 th day of February, May, August, and November, (each such date, an “Interest Payment Date”), commencing August 28, 2009.

RISK FACTORS:

An investment in the Medium-Term Notes entails certain risks not associated with an investment in conventional fixed rate debt securities. See “Risk Factors” generally and “Various Factors Could Adversely Affect the Trading Value and Yield of Your Debt Securities” in the Offering Circular. The interest rate of the Medium-Term Notes will be equal to the LIBOR Reference Rate *plus* a Spread of 158 basis points (+1.58 percentage points), subject to the “Interest Rate” provisions above. Investors should consider the risk that, if the Interest Rate (as defined above) is greater than 6.50% per annum, interest will accrue at 6.50% per annum and the risk that the variable interest rate on the Medium-Term Notes may be less than that payable on a conventional fixed rate debt security issued by Freddie Mac at the same time. Because the Medium-Term Notes may not pay a significant amount of interest for extended periods of time, the Medium-Term Notes are not a suitable investment for individuals seeking a steady stream of income.

The secondary market for, and the market value of, the Medium-Term Notes will be affected by a number of factors independent of the creditworthiness of Freddie Mac, including the level and direction of interest rates, the variable rate of interest payable on the Medium-Term Notes, the anticipated level and potential volatility of the LIBOR Reference Rate, the method of calculating LIBOR for the Index Currency at the Index Maturity, the time remaining to the maturity of the Medium-Term Notes, the aggregate principal amount of the Medium-Term Notes and the availability of comparable instruments. The level of the LIBOR Reference Rate depends on a number of interrelated factors, including economic, financial and political events, over which Freddie Mac has no control. The following graph sets forth the historical level of LIBOR Reference Rate for the Index Currency at the Index Maturity for the period from January 1, 2000 to May 1, 2009.

The historical level of LIBOR for the Index Currency at the Index Maturity should not be taken as an indication of the future performance of the LIBOR Reference Rate during the term of the Medium-Term Notes. Fluctuations in the level of the LIBOR Reference Rate make the Medium-Term Notes interest rates difficult to predict and can result in actual interest rates to investors that are lower than anticipated. In addition, historical interest rates are not necessarily indicative of future interest rates. Fluctuations in interest rates and interest rate trends that have occurred in the past are not necessarily indicative of fluctuations that may occur in the future, which may be wider or narrower than those that have occurred historically. No assurance can be given that the LIBOR Reference Rate will be within the LIBOR Range on any day of any Interest Payment Period during the term of the Medium-Term Notes. We obtained the information in the graph above from Bloomberg Financial Markets, without independent verification.

OTHER SPECIAL TERMS:

☒ Yes; as follows:

In connection with the issuance of the Medium-Term Notes, Freddie Mac may enter into a swap or other hedging agreement with the Underwriter, one of its affiliates or a third party. Any such agreement may provide for the payment of fees or other compensation or provide other economic benefits (including trading gains or temporary funding) to, and will impose obligations on, the parties, but will not affect the rights of Holders of, or the obligations of Freddie Mac as to, the Medium-Term Notes. The existence of such an agreement may influence our decision to exercise our right of optional redemption as to the Medium-Term Notes.
