PRICING SUPPLEMENT
(Amendment No. 1)
(to Prospectus dated February 4, 2016)

\$15,000,000

Jefferies

Jefferies Group LLC

Senior Fixed to Floating Rate Notes due September 30, 2037

Based on the Leveraged Difference Between USD 10CMS and 2CMS Rates

As further described below, interest will accrue and be payable monthly, in arrears, (i) from the Original Issue Date to, but excluding, September 30, 2020 at a rate of 8.00% per annum and (ii) from and including September 30, 2020 to, but excluding, the stated maturity date (September 30, 2037), at a variable rate per annum equal to the Leverage Factor *times* the difference, if any, between the 10-Year U.S. Dollar Constant Maturity Swap Rate ("10CMS") and the 2-Year U.S. Dollar Constant Maturity Swap Rate ("2CMS"), subject to the Minimum Interest Rate of 0.00% per annum and the Maximum Interest Rate of 8.00% per annum.

SUMMARY OF TERMS

Issuers:	Jefferies Group LLC and Jefferies Group Capital Finance Inc., its wholly owned subsidiary.
Title of the Notes:	Senior Fixed to Floating Rate Notes due September 30, 2037 based on the Leveraged Difference Between USD 10CMS and 2CMS Rates
Aggregate Principal Amount:	\$15,000,000. We may increase the Aggregate Principal Amount prior to the Original Issue Date but are not required to do so.
Issue Price:	At variable prices. The Notes were offered at a price equal to 100% of the Stated Principal Amount per Note until the initial pricing date, which is September 11, 2017. Thereafter, the Notes will be offered from time to time in one or more negotiated transactions at varying prices to be determined at the time of each sale, which may be at market prices prevailing, at prices related to such prevailing prices or at negotiated prices, subject to a maximum price of 100% of the Stated Principal Amount per Note.
Stated Principal Amount	\$1,000 per note
Pricing Date:	September 11, 2017
Original Issue Date:	September 29, 2017 (14 Business Days after the Pricing Date)
Maturity Date:	September 30, 2037
Interest Accrual Date:	September 29, 2017
Payment at Maturity	The Payment at Maturity per Note will be the Stated Principal Amount plus accrued and unpaid interest, if any.
CMS Reference Index	10CMS minus 2CMS, expressed as a percentage. Please see "The Notes" below.
Interest Rate	From and including the Original Issue Date to, but excluding, September 30, 2020: 8.00% per annum. From and including September 30, 2020 to, but excluding, September 30, 2037 (the "Floating Interest Rate Period"): a variable rate per annum equal to the Leverage Factor <i>times</i> the CMS Reference Index, subject to the Minimum Interest Rate and the Maximum Interest Rate. For the purposes of determining the level of the CMS Reference Index applicable to an Interest Payment Period, the level of the CMS Reference Index will be determined two (2) U.S. Government Securities Business Days prior to the related Interest Reset Date at the start of such Interest Payment Period (each, a "CMS Reference Determination Date"). <i>Interest for each Interest Payment Period during the Floating Interest Rate Period is subject to the Minimum Interest Rate of 0.00% per annum and the Maximum Interest Rate of 8.00% per annum. Beginning September 30, 2020, it is possible that you could receive little or no interest on the Notes.</i>
Leverage Factor	8
CMS Reference Determination Date	Two (2) U.S. Government Securities Business Days prior to the related Interest Reset Date at the start of the applicable Interest Payment Period
Floating Interest Rate Period	From and including September 30, 2020 to, but excluding, the Maturity Date.

<http://www.oblible.com>

Interest Payment Dates	Monthly
Interest Payment Period End Dates	The last day of each calendar month, beginning October 31, 2017; <i>provided</i> that if any such day is not a Business Day, that interest payment will be made on the next succeeding Business Day and no adjustment will be made to any interest payment made on that succeeding Business Day.
Interest Reset Dates	Unadjusted
Minimum Interest Rate	0.00% per annum during the Floating Interest Rate Period.
Maximum Interest Rate	8.00% per annum during the Floating Interest Rate Period.
Day-count Convention:	30/360
Redemption:	Not applicable
Specified Currency:	U.S. dollars
CUSIP/ISIN:	47233JAY4 / US47233JAY47
Book-entry or Certificated Note:	Book-entry
Business Day:	New York
Agent:	Jefferies LLC, a wholly-owned subsidiary of Jefferies Group LLC and an affiliate of Jefferies Group Capital Finance Inc. See "Supplemental Plan of Distribution."
Calculation Agent:	Jefferies Financial Services Inc., a wholly owned subsidiary of Jefferies Group LLC and an affiliate of Jefferies Group Capital Finance Inc.
Trustee:	The Bank of New York Mellon
Estimated value on the Pricing Date	\$869.25 per Note.
Use of Proceeds:	General corporate purposes
Listing:	None
Conflict of Interest:	Jefferies LLC, the broker-dealer subsidiary of Jefferies Group LLC, is a member of FINRA and will participate in the distribution of the notes being offered hereby. Accordingly, the offering is subject to the provisions of FINRA Rule 5121 relating to conflicts of interest and will be conducted in accordance with the requirements of Rule 5121. See "Conflict of Interest."

The Notes will be our senior unsecured obligations and will rank equally with our other senior unsecured indebtedness.

Investing in the Notes involves risks that are described in the "[Risk Factors](#)" section beginning on page PS-7 of this pricing supplement.

	PER NOTE	TOTAL
	At variable prices	At variable prices
Public Offering Price		
Underwriting Discounts and Commissions	\$ 35	\$ 525,000
Proceeds to Jefferies Group LLC (Before Expenses)	\$ 965	\$ 14,475,000

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this pricing supplement or the accompanying prospectus or either prospectus supplement is truthful or complete. Any representation to the contrary is a criminal offense.

We will deliver the Notes in book-entry form only through The Depository Trust Company on or about September 29, 2017 against payment in immediately available funds.

Jefferies

Pricing supplement dated September 27, 2017.

SPECIAL NOTE ON FORWARD-LOOKING STATEMENTS

This pricing supplement and the accompanying prospectus and prospectus supplement contain or incorporate by reference “forward-looking statements” within the meaning of the safe harbor provisions of Section 27A of the Securities Act of 1933 (the “Securities Act”) and Section 21E of the Securities Exchange Act of 1934. These forward-looking statements are not statements of historical fact and represent only our belief as of the date such statements are made. There are a variety of factors, many of which are beyond our control, which affect our operations, performance, business strategy and results and could cause actual reported results and performance to differ materially from the performance and expectations expressed in these forward-looking statements. These factors include, but are not limited to, financial market volatility, actions and initiatives by current and future competitors, general economic conditions, controls and procedures relating to the close of the quarter, the effects of current, pending and future legislation or rulemaking by regulatory or self-regulatory bodies, regulatory actions, and the other risks and uncertainties that are outlined in our Annual Report on Form 10-K for the fiscal year ended November 30, 2016 filed with the U.S. Securities and Exchange Commission, or the SEC, on January 27, 2017, as amended by our Form 10-K/A, filed with the SEC on February 28, 2017, and in our Quarterly Reports on Form 10-Q for the quarterly periods ended February 28, 2017 and May 31, 2017 filed with the SEC on April 7, 2017 and July 6, 2017, respectively. You are cautioned not to place undue reliance on forward-looking statements, which speak only as of the date they are made. We do not undertake to update forward-looking statements to reflect the impact of circumstances or events that arise after the date of the forward-looking statements.

PS-ii

[Table of Contents](#)

RECENT DEVELOPMENTS

On September 19, 2017, Jefferies Group LLC announced its financial results for its fiscal third quarter of 2017:
Highlights for the three months ended August 31, 2017:

- ? Total Net Revenues of \$801 million
- ? Investment Banking Net Record Revenues of \$476 million

- ? Total Equities and Fixed Income Net Revenues of \$320 million
- ? Earnings Before Income Taxes of \$122 million
- ? Net Earnings of \$84 million (effective tax rate 31.4%)

Highlights for the nine months ended August 31, 2017:

- ? Total Net Revenues of \$2,375 million
- ? Investment Banking Net Revenues of \$1,236 million
- ? Total Equities and Fixed Income Net Revenues of \$1,128 million
- ? Earnings Before Income Taxes of \$363 million
- ? Net Earnings of \$268 million (effective tax rate 26.2%)

Amounts herein pertaining to August 31, 2017 represent a preliminary estimate as of the date of the earnings release and may be revised in our Quarterly Report on Form 10-Q for the quarter ended August 31, 2017.

The above preliminary financial data included in this pricing supplement has been prepared by and is the responsibility of Jefferies' management. Deloitte & Touche LLP, Jefferies' independent public accountant, has not audited, reviewed, compiled or performed any procedures with respect to the accompanying preliminary financial data. Accordingly, Deloitte & Touche LLP does not express an opinion or any other form of assurance with respect thereto.

[Table of Contents](#)

THE NOTES

The Notes are joint and several obligations of Jefferies Group LLC and Jefferies Group Capital Finance Inc., its wholly-owned subsidiary. The Aggregate Principal Amount of the Notes is \$15,000,000. The Notes will mature on September 30, 2037. From and including the Original Issue Date to, but excluding, September 30, 2020, the Notes will bear interest at the fixed rate of 8.00% per annum. From and including September 30, 2020 to, but excluding, the Maturity Date (the "Floating Interest Rate Period"), the Notes will bear interest at a per annum floating rate equal to the Leverage Factor *times* the CMS Reference Index, subject to the Minimum Interest Rate of 0.00% per annum and the Maximum Interest Rate of 8.00% per annum. During the Floating Interest Rate Period, the interest rate will be reset monthly on the Interest Reset Dates set forth in the "Summary of Terms" on the cover page of this pricing supplement. Interest on the Notes will be payable on a monthly basis on the Interest Payment Dates set forth in the "Summary of Terms" on the cover page of this pricing supplement. We describe the basic features of these Notes in the sections of the accompanying prospectus called "Description of Securities We May Offer—Debt Securities" and the prospectus supplement called "Description of Notes", subject to and as modified by any provisions described below and in the "Summary of Terms" on the cover page of this pricing supplement. All payments on the Notes are subject to our credit risk.

"10CMS" means the 10-year U.S. Dollar Constant Maturity Swap Rate, expressed as a percentage, as quoted on the Reuters Screen ICESWAP1 Page (or any successor thereto), at approximately 11:00 a.m., New York City time, on the applicable CMS Reference Determination Date.

"2CMS" means the 2-year U.S. Dollar Constant Maturity Swap Rate, expressed as a percentage, as quoted on the Reuters Screen ICESWAP1 Page (or any successor thereto), at approximately 11:00 a.m. New York City time, on the applicable CMS Reference Determination Date.

The "CMS Reference Determination Date" for each monthly Interest Reset Date during the Floating Interest Rate Period will be the second U.S. Government Securities Business Day prior to the beginning of the applicable monthly Interest Reset Date. A "U.S. Government Securities Business Day" means any day, other than a Saturday, Sunday or a day on which the Securities Industry and Financial Markets Association (or any successor thereto) recommends that the fixed income departments of its members be closed for the entire day for purposes of trading in U.S. government securities.

If, on any CMS Reference Determination Date, 10CMS or 2CMS is not quoted on the Reuters Screen ICESWAP1 Page, or any page substituted for that page, then 10CMS or 2CMS will be a percentage determined on the basis of the mid-market semi-annual

swap rate quotations provided to the Calculation Agent by five leading swap dealers in the New York City interbank market (the “Reference Banks”) chosen by the Calculation Agent at approximately 11:00 a.m., New York City time, on that date. For this purpose, the semi-annual swap rate means the mean of the bid and offered rates for the semi-annual fixed leg, calculated on the basis of a 360-day year consisting of twelve 30-day months, of a fixed-for-floating U.S. dollar interest rate swap transaction with a term equal to 10 years or 2 years, commencing on the applicable date and in a representative amount with an acknowledged dealer of good credit in the swap market, where the floating leg, calculated on the actual number of days in a 360-day year, is equivalent to USD-LIBOR-BBA, as quoted on the Reuters Screen LIBOR01 Page at 11:00 a.m., New York City time, with a designated maturity of three months. The Calculation Agent will request the principal New York City office of each of the Reference Banks chosen by it to provide a quotation of its rate. If at least three quotations are provided, the rate for the relevant CMS Reference Determination Date will be the arithmetic mean of the quotations, eliminating the highest quotation (or, in the event of equality, one of the highest) and the lowest quotation (or, in the event of equality, one of the lowest). If fewer than three quotations are provided as requested, the CMS Reference Index will be determined by the Calculation Agent in good faith and in a commercially reasonable manner.

The Stated Principal Amount of each Note is \$1,000. The Issue Price will equal 100% of the Stated Principal Amount per Note until the initial pricing date and, thereafter, will be variable, subject to a maximum price of 100% of the Stated Principal Amount per Note. This price includes costs associated with issuing, selling, structuring and hedging the Notes, which are borne by you, and, consequently, the estimated value of the Notes on the Pricing Date will be less than the Issue Price. We estimate that the value of each Note on the Pricing Date is \$869.25 per Note.

PS-2

[Table of Contents](#)

Valuation of the Notes

Jefferies LLC calculated the estimated value of the Notes set forth on the cover page of this pricing supplement based on its proprietary pricing models at that time. Jefferies LLC’s proprietary pricing models generated an estimated value for the Notes by estimating the value of a hypothetical package of financial instruments that would replicate the payout on the Notes, which consists of a fixed-income bond (the “bond component”) and one or more derivative instruments underlying the economic terms of the Notes (the “derivative component”). Jefferies LLC calculated the estimated value of the bond component using a discount rate based on our internal funding rate. Jefferies LLC calculated the estimated value of the derivative component based on a proprietary derivative-pricing model, which generated a theoretical price for the instruments that constitute the derivative component based on various inputs, including the factors described under “Risk Factors—The price at which the Notes may be resold prior to maturity will depend on a number of factors and may be substantially less than the amount for which they were originally purchased.” below, but not including our creditworthiness. These inputs may be market-observable or may be based on assumptions made by Jefferies LLC in its discretionary judgment.

The estimated value of the Notes is a function of the terms of the Notes and the inputs to Jefferies LLC’s proprietary pricing models.

Since the estimated value of the Notes is a function of the underlying assumptions and construction of Jefferies LLC’s proprietary derivative-pricing model, modification to this model will impact the estimated value calculation. Jefferies LLC’s proprietary models are subject to ongoing review and modification, and Jefferies LLC may change them at any time and for a variety of reasons. In the event of a model change, prior descriptions of the model and computations based on the older model will be superseded, and calculations of estimated value under the new model may differ significantly from those under the older model. Further, model changes may cause a larger impact on the estimated value of a note with a particular return formula than on a similar note with a different return formula. For example, to the extent a return formula contains leverage, model changes may cause a larger impact on the estimated value of that note than on a similar note without such leverage.

The relationship between the estimated value on the Pricing Date and the secondary market price of the Notes

The price at which Jefferies LLC purchases the Notes in the secondary market, absent changes in market conditions, including those related to interest rates and the CMS Reference Index, may vary from, and be lower than, the estimated value on the Pricing Date, because the secondary market price takes into account our secondary market credit spread as well as the bid-offer spread that Jefferies LLC would charge in a secondary market transaction of this type, the costs of unwinding the related hedging transactions and other factors.

Jefferies LLC may, but is not obligated to, make a market in the Notes and, if it once chooses to make a market, may cease doing so at any time.

[Table of Contents](#)

HOW THE NOTES WORK

How to calculate the interest payments during the Floating Interest Rate Period.

The table below presents examples of hypothetical interest that would accrue on the Notes during any month in the Floating Interest Rate Period. The examples below are for purposes of illustration only. The examples of the hypothetical floating interest rate that would accrue on the Notes are based on both the level of the CMS Reference Index on the applicable CMS Reference Determination Date.

The actual interest payment amounts during the Floating Interest Rate Period will depend on the actual level of the CMS Reference Index on each CMS Reference Determination Date. The applicable Interest Rate for each monthly Interest Payment Period will be determined on a per-annum basis but will apply only to that Interest Payment Period. The table assumes that the Interest Payment Period contains 30 calendar days. The examples below are for purposes of illustration only and would provide different results if different assumptions were made.

CMS REFERENCE INDEX	8 TIMES CMS REFERENCE INDEX*	HYPOTHETICAL MONTHLY INTEREST PAYMENT
-1.00%	0.00%	\$0.00
-0.90%	0.00%	\$0.00
-0.80%	0.00%	\$0.00
-0.70%	0.00%	\$0.00
-0.60%	0.00%	\$0.00
-0.50%	0.00%	\$0.00
-0.40%	0.00%	\$0.00
-0.30%	0.00%	\$0.00
-0.20%	0.00%	\$0.00
-0.10%	0.00%	\$0.00
0.00%	0.00%	\$0.00
0.10%	0.80%	\$0.67
0.20%	1.60%	\$1.33
0.30%	2.40%	\$2.00
0.40%	3.20%	\$2.67
0.50%	4.00%	\$3.33
0.60%	4.80%	\$4.00
0.70%	5.60%	\$4.67
0.80%	6.40%	\$5.33
0.90%	7.20%	\$6.00
1.00%	8.00%	\$6.67
1.10%	8.00%	\$6.67
1.20%	8.00%	\$6.67
1.30%	8.00%	\$6.67
1.40%	8.00%	\$6.67
1.50%	8.00%	\$6.67

*Subject to the minimum interest rate of 0% and maximum interest rate of 8%.

[Table of Contents](#)

HISTORICAL 10CMS AND 2CMS RATES

10CMS and 2CMS are “constant maturity swap rates” that measure the fixed rate of interest payable on a hypothetical fixed-for-floating U.S. dollar interest rate swap transaction with a maturity of 10 years or 2 years. In such a hypothetical swap transaction, the fixed rate of interest, payable semi-annually on the basis of a 360-day year consisting of twelve 30-day months, is exchangeable for a floating 3-month LIBOR-based payment stream that is payable quarterly on the basis of the actual number of days elapsed during a quarterly period in a 360-day year. “LIBOR” is the London Interbank Offered Rate and is a common rate of interest used in the swaps industry.

In this pricing supplement, when we refer to 10CMS or 2CMS, we mean the rate as it appears on Reuters page ICESWAP1 (or any successor page) under the heading 10-year index maturity or 2-year index maturity for rates at approximately 11:00 a.m. New York time, on each CMS Reference Determination Date. The rate reported on Reuters page “ICESWAP1” (or any successor page thereto) is calculated by ICE Benchmark Administration Limited based on tradeable quotes for the related interest rate swap of the relevant tenor that is sourced from electronic trading venues. This rate is one of the market-accepted indicators of medium to longer-term interest rates. On the CMS Reference Determination Date, if 10CMS or 2CMS cannot be determined by reference to Reuters Screen ICESWAP1 Page (or any successor page), then the Calculation Agent will determine 10CMS or 2CMS in accordance with the procedures set forth above.

The levels of 10CMS and 2CMS have fluctuated in the past and may, in the future, experience significant fluctuations. Any historical upward or downward trend in the level of 10CMS or 2CMS during any period shown below is not an indication that 10CMS or 2CMS is more or less likely to increase or decrease at any time during the life of your Notes.

You should not take the historical levels of the 10CMS or 2CMS as an indication of future levels of 10CMS or 2CMS. We cannot give you any assurance that the future levels of 10CMS or 2CMS will result in your receiving a return on your Notes that is greater than the return you would have realized if you invested in a debt security of comparable maturity that bears interest at a prevailing market rate.

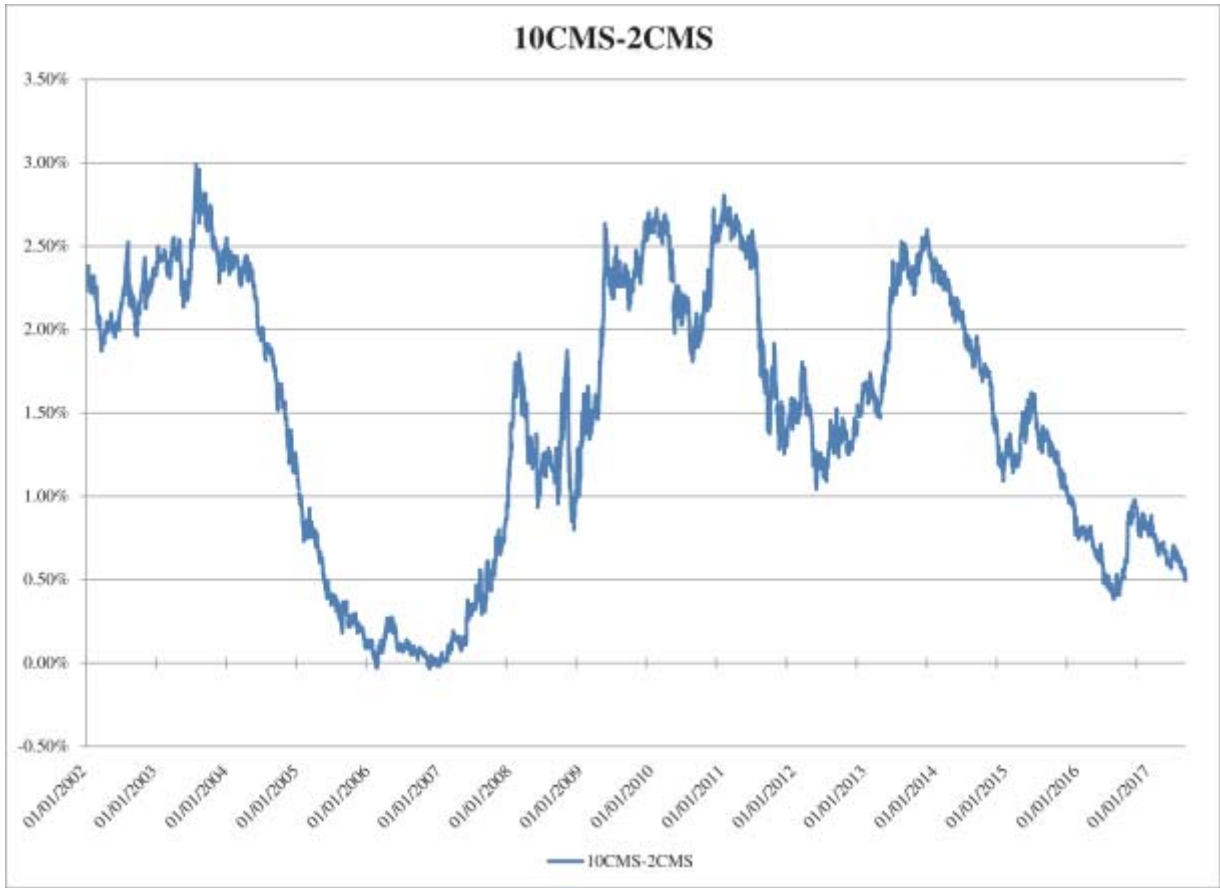

In light of current market conditions, the trends reflected in the historical levels of 10CMS or 2CMS may be less likely to be indicative of the levels of 10CMS or 2CMS during the Floating Interest Rate Period.

Neither we nor any of our affiliates make any representation to you as to the performance of 10CMS or 2CMS during the Floating Interest Rate Period. The actual levels of 10CMS or 2CMS during the Floating Interest Rate Period may bear little relation to the historical levels of 10CMS or 2CMS shown below.

PS-5

[Table of Contents](#)

The graph below shows the historical difference between 10CMS and 2CMS from January 1, 2002 through September 7, 2017. We obtained the information in the graph below from Bloomberg, without independent verification. The rates displayed in the graph below are for illustrative purposes only.

PS-6

[Table of Contents](#)

RISK FACTORS

In addition to the other information contained and incorporated by reference in this pricing supplement and the accompanying prospectus and prospectus supplement including the section entitled “Risk Factors” in our Annual Report on Form 10-K filed with the SEC on January 27, 2017, as amended by our Form 10-K/A filed with the SEC on February 28, 2017, you should consider carefully the following factors before deciding to purchase the Notes.

Risks Associated with the Offering

The historical levels of 10CMS and 2CMS are not an indication of the future levels of 10CMS and 2CMS.

In the past, the level of 10CMS and 2CMS have experienced significant fluctuations. You should note that historical levels, fluctuations and trends of 10CMS and 2CMS are not necessarily indicative of future levels. Changes in the levels of 10CMS and 2CMS will affect the trading price of the Notes, but it is impossible to predict whether such levels will rise or fall. There can be no assurance that the CMS Reference Index level will be positive on any CMS Reference Determination Date during the Floating Interest Rate Period. Furthermore, the historical performance of the CMS Reference Index does not reflect the return the Notes would have had because they do not take into account each other’s performance, the Leverage Factor or the Maximum Interest Rate.

The amount of interest payable on the Notes is uncertain and could be zero.

During the Floating Interest Rate Period, the amount of interest payable on the Notes in any Interest Payment Period will be dependent on whether and the extent to which 10CMS is greater than 2CMS on the related CMS Reference Determination Date. If 2CMS is greater than or equal to 10CMS on any CMS Reference Determination Date, the rate of interest payable for the related Interest Payment Period will be 0.00%. As a result, the effective yield on the Notes may be less than what would be payable on conventional, fixed-rate redeemable notes of the issuer of comparable maturity. The interest payments on the Notes and return of only the principal amount at maturity may not compensate you for the effects of inflation and other factors relating to the value of money over time.

The estimated value of the Notes on the Pricing Date, based on Jefferies LLC proprietary pricing models at that time and our internal funding rate, will be less than the Issue Price.

The difference is attributable to certain costs associated with selling, structuring and hedging the Notes that are included in the Issue Price. These costs include (i) the selling concessions paid in connection with the offering of the Notes, (ii) hedging and other costs incurred by us and our affiliates in connection with the offering of the Notes and (iii) the expected profit (which may be more or less than actual profit) to Jefferies LLC or other of our affiliates in connection with hedging our obligations under the Notes. These costs adversely affect the economic terms of the Notes because, if they were lower, the economic terms of the Notes would be more favorable to you. The economic terms of the Notes are also likely to be adversely affected by the use of our internal funding rate, rather than our secondary market rate, to price the Notes. See “The estimated value of the Notes would be lower if it were calculated based on our secondary market rate” below.

The estimated value of the Notes was determined for us by our affiliate using proprietary pricing models.

Jefferies LLC derived the estimated value disclosed on the cover page of this pricing supplement from its proprietary pricing models at that time. In doing so, it may have made discretionary judgments about the inputs to its models, such as the volatility of the CMS Reference Index and interest rates. Jefferies LLC’s views on these inputs and assumptions may differ from your or others’ views, and as an agent in this offering, Jefferies LLC’s interests may conflict with yours. Both the models and the inputs to the models may prove to be wrong and therefore not an accurate reflection of the value of the Notes. Moreover, the estimated value of the Notes set forth on the cover page of this pricing supplement may differ from the value that we or our affiliates may determine for the Notes for other purposes, including for accounting purposes. You should not invest in the Notes because of the estimated value of the Notes. Instead, you should be willing to hold the Notes to maturity irrespective of the initial estimated value.

Since the estimated value of the Notes is a function of the underlying assumptions and construction of Jefferies LLC’s proprietary derivative-pricing model, modifications to this model will impact the estimated value calculation. Jefferies LLC’s proprietary models are subject to ongoing review and modification, and Jefferies LLC may change them at any time and for a variety of reasons. In the event of a model change, prior descriptions of the model and computations based on the older model will be superseded, and calculations of estimated value under the new

PS-7

[Table of Contents](#)

model may differ significantly from those under the older model. Further, model changes may cause a larger impact on the estimated value of a note with a particular return formula than on a similar note with a different return formula. For example, to the extent a return formula contains leverage, model changes may cause a larger impact on the estimated value of that note than on a similar note without such leverage.

The estimated value of the Notes would be lower if it were calculated based on our secondary market rate.

The estimated value of the Notes included in this pricing supplement is calculated based on our internal funding rate, which is the rate at which we are willing to borrow funds through the issuance of the Notes. Our internal funding rate is generally lower than our secondary market rate, which is the rate that Jefferies LLC will use in determining the value of the Notes for purposes of any purchases of the Notes from you in the secondary market. If the estimated value included in this pricing supplement were based on our secondary market rate, rather than our internal funding rate, it would likely be lower. We determine our internal funding rate based on factors such as the costs associated with the Notes, which are generally higher than the costs associated with conventional debt securities, and our liquidity needs and preferences. Our internal funding rate is not the same as the interest that is payable on the Notes.

Because there is not an active market for traded instruments referencing our outstanding debt obligations, Jefferies LLC determines our secondary market rate based on the market price of traded instruments referencing our debt obligations, but subject to adjustments that Jefferies LLC makes in its sole discretion. As a result, our secondary market rate is not a market-determined measure of our creditworthiness, but rather reflects the market’s perception of our creditworthiness as adjusted for discretionary factors such as Jefferies LLC’s preferences with respect to purchasing the Notes prior to maturity.

The estimated value of the Notes is not an indication of the price, if any, at which Jefferies LLC or any other person may be willing to buy the Notes from you in the secondary market.

Any such secondary market price will fluctuate over the term of the Notes based on the market and other factors described in the next risk factor. Moreover, unlike the estimated value included in this pricing supplement, any value of the Notes determined for purposes of a secondary market transaction will be based on our secondary market rate, which will likely result in a lower value for the Notes than if our internal funding rate were used. In addition, any secondary market price for the Notes will be reduced by a bid-ask spread, which may vary depending on the aggregate stated principal amount of the Notes to be purchased in the secondary market transaction, and the expected cost of unwinding related hedging transactions. As a result, it is likely that any secondary market price for the Notes will be less than the Issue Price.

The price at which the Notes may be resold prior to maturity will depend on a number of factors and may be substantially less than the amount for which they were originally purchased.

Some of these factors include, but are not limited to: (i) changes in the level of 10CMS and 2CMS, (ii) volatility of 10CMS and 2CMS, (iii) changes in interest and yield rates, (iv) any actual or anticipated changes in our credit ratings or credit spreads and (v) time remaining to maturity. Generally, the longer the time remaining to maturity and the more tailored the exposure, the more the market price of the Notes will be affected by the other factors described in the preceding sentence. In addition, as indicated above, the proprietary derivative-pricing model we employ to value the Notes may change, which could have a significant impact on valuation of the Notes. Each of these factors can lead to significant adverse changes in the market price of securities like the Notes.

The amount of interest payable on the Notes in any month is capped.

The Interest Rate on the Notes for each monthly Interest Payment Period during the Floating Interest Rate Period is capped for that month at the Maximum Interest Rate of 8.00% per annum, and, due to the Leverage Factor, you will not get the benefit of any increase in the CMS Reference Index level above a level of approximately 1.00% on any CMS Reference Determination Date. Therefore, the maximum monthly interest payment you can receive during the Floating Interest Rate Period will be \$6.67 for each \$1,000 stated principal amount of notes. Accordingly, you could receive less than 8.00% per annum interest for any given full year in the Floating Interest Rate Period even when the CMS Reference Index level is much greater than 1.00% on the CMS Reference Determination Date for one monthly Interest Payment Period during that year if the CMS Reference Index level on the CMS Reference Determination Date with respect to any other month is below 1.00%.

PS-8

[Table of Contents](#)

You must rely on your own evaluation of the merits of an investment linked to 10CMS and 2CMS.

In the ordinary course of their businesses, we or our affiliates may have expressed views on expected movements in 10CMS and 2CMS and related interest rates, and may do so in the future. These views or reports may be communicated to our clients and clients of our affiliates. However, these views are subject to change from time to time. Moreover, other professionals who deal in markets relating to 10CMS and 2CMS may at any time have views that are significantly different from ours or those of our affiliates. For these reasons, you should consult information about 10CMS and 2CMS and related interest rates from multiple sources, and you should not rely on the views expressed by us or our affiliates.

Neither the offering of the Notes nor any views which we or our affiliates from time to time may express in the ordinary course of their businesses constitutes a recommendation as to the merits of an investment in the Notes.

Regulatory investigations regarding possible manipulation of ISDAFIX may adversely affect your Notes.

Certain U.S. and non-U.S. regulators are investigating possible manipulation of ISDAFIX. If such manipulation occurred, it may have resulted in 10CMS or 2CMS being artificially lower (or higher) than it would otherwise have been. Any changes or reforms affecting the determination or supervision of ISDAFIX in light of these investigations could result in a sudden or prolonged decrease in reported ISDAFIX, which may have an adverse impact on the trading market for ISDAFIX-benchmarked securities, such as your Notes, the market value of your Notes and the payments on your Notes during the Floating Interest Rate Period.

10CMS and 2CMS Rates and the manner in which they are calculated may change in the future.

There can be no assurance that the method by which 10CMS and 2CMS rates are calculated will continue in its current form. Any changes in the method of calculation could reduce 10CMS or 2CMS and thus have a negative impact on the payments on the Notes and on the value of the Notes in the secondary market.

We may sell an additional aggregate face amount of the Notes at a different issue price.

At our sole option, we may decide to sell additional aggregate face amounts of the Notes subsequently to the date of this pricing supplement. The issue price of the Notes in the subsequent sale may differ substantially (higher or lower) from the Issue Price you paid. There is no stated limit on of the additional face amounts of the Notes we may sell.

The Notes will be treated as debt instruments subject to special rules governing contingent payment debt instruments for U.S. federal income tax purposes.

The Notes will be treated as debt instruments subject to special rules governing contingent payment debt instruments for U.S. federal income tax purposes. Under this treatment, if you are a U.S. individual or taxable entity, you generally should be required to pay taxes on ordinary income from the Notes over their term based on the comparable yield for the Notes, subject to any positive and negative adjustments based on the actual interest payments on the Notes. This comparable yield is determined solely to calculate the amount on which you will be taxed prior to maturity and is neither a prediction nor a guarantee of what the actual yield will be. In addition, any gain you may recognize on the sale, exchange or maturity of the Notes will be taxed as ordinary interest income. If you are a secondary purchaser of the Notes, the tax consequences to you may be different.

Please see “Material United States Federal Income Tax Consequences” below for a more detailed discussion. Please also consult your tax advisor concerning the U.S. federal income tax and any other applicable tax consequences to you of owning your Notes in your particular circumstances.

Our trading and hedging activities may create conflicts of interest with you.

We or one or more of our affiliates, including Jefferies LLC, may engage in trading activities related to the Notes that are not for your account or on your behalf. We expect to enter into arrangements to hedge the market risks associated with our obligation to pay the amounts due under the Notes. We may seek competitive terms in entering into the hedging arrangements for the Notes, but are not required to do so, and we may enter into such hedging arrangements with one of our subsidiaries or affiliates. This hedging activity is expected to result in a profit to those engaging in the hedging activity, which could be more or less than initially expected, but which could also result in a loss for the hedging counterparty. These trading and hedging activities may present a conflict of interest between your interest as a holder of the Notes and the interests we and our affiliates may have in our proprietary accounts, in facilitating transactions for our customers, and in accounts under our management.

PS-9

[Table of Contents](#)

HEDGING

In order to meet our payment obligations on the Notes, at the time we issue the Notes, we may choose to enter into certain hedging arrangements (which may include call options, put options or other derivatives) with one or more of our affiliates. The terms of these hedging arrangements are determined based upon terms provided by our affiliates, and take into account a number of factors, including our creditworthiness, interest rate movements, the volatility of 10CMS and 2CMS, the tenor of the Notes and the hedging arrangements. The economic terms of the Notes depend in part on the terms of these hedging arrangements.

The hedging arrangements may include hedging related charges, reflecting the costs associated with, and our affiliates’ profit earned from, these hedging arrangements. Since hedging entails risk and may be influenced by unpredictable market forces, actual profits or losses from these hedging transactions may be more or less than this amount.

For further information, see “Risk Factors” beginning on page PS-6 of this pricing supplement.

PS-10

[Table of Contents](#)

MATERIAL UNITED STATES FEDERAL INCOME TAX CONSEQUENCES

The following is a general discussion of the material United States federal income tax consequences of purchasing, owning and disposing of the Notes and is based upon the advice of Sidley Austin LLP, our tax counsel. The following discussion supplements, and to the extent inconsistent supersedes, the discussions under “Material United States Federal Income Tax Consequences” in the accompanying prospectus and under “United States Federal Taxation” in the accompanying prospectus supplement, and is not exhaustive of all possible tax considerations that may be relevant to a holder of Notes. This summary is based upon the Internal Revenue Code of 1986, as amended (the “Code”), regulations promulgated under the Code by the U.S. Treasury Department (“Treasury”) (including proposed and temporary regulations), rulings, current administrative interpretations and official pronouncements of the Internal Revenue Service (“IRS”), and judicial decisions, all as currently in effect and all of which are subject to differing interpretations or to change, possibly with retroactive effect. No assurance can be given that the IRS would not assert, or that a court would not sustain, a position contrary to any of the tax consequences described below. We have not sought a ruling from the IRS regarding any of the tax consequences described below. This summary does not include any description of federal non-income tax laws, the tax laws of any state or local governments, or of any foreign government, that may be applicable to a particular holder of Notes.

This summary is directed solely to U.S. Holders (as defined in the accompanying prospectus supplement) that, except as otherwise specifically noted, will acquire the Notes upon original issuance and will hold the Notes as capital assets, within the meaning of Section 1221 of the Code, which generally means property held for investment, and that are not excluded from the discussion under “United States Federal Taxation” in the accompanying prospectus supplement. This summary assumes that the issue price of the Notes, as determined for U.S. federal income tax purposes, equals the principal amount thereof.

In the opinion of our tax counsel, Sidley Austin LLP, your Notes will be treated as debt instruments subject to special rules governing contingent payment debt instruments for U.S. federal income tax purposes. Under those rules, the amount of interest you are required to take into account for each accrual period will be determined by constructing a projected payment schedule for your Notes and applying rules similar to those for accruing original issue discount on a hypothetical non-contingent debt instrument with that projected payment schedule. This method is applied by first determining the yield at which we would issue a non-contingent fixed rate debt instrument with terms and conditions similar to your Notes (the “comparable yield”) and then determining as of the issue date a payment schedule that would produce the comparable yield. Under these rules, you will only accrue interest based on the comparable yield. You will not have to separately include the amount of interest that you receive, except to the extent of any positive or negative adjustments discussed below.

We have determined that the comparable yield for the Notes is equal to 5.0477% per annum, compounded monthly. Based on this comparable yield, if you are an initial holder that holds a Note until maturity and you pay your taxes on a calendar year basis, we have determined that you would be required to report the following amounts as ordinary

PS-11

Table of Contents

income, not taking into account any positive or negative adjustments you may be required to take into account based on the actual payments on the Notes, from the Note each year:

ACCRUAL PERIOD	INTEREST DEEMED TO ACCRUE DURING ACCRUAL PERIOD (PER \$1000 NOTE)	TOTAL INTEREST DEEMED TO HAVE ACCRUED FROM ORIGINAL ISSUE DATE (PER \$1000 NOTE) AS OF END OF ACCRUAL PERIOD)
September 29, 2017 through December 31, 2017	\$12.87	\$12.87
January 1, 2018 through December 31, 2018	\$49.40	\$62.27
January 1, 2019 through December 31, 2019	\$47.83	\$110.10
January 1, 2020 through December 31, 2020	\$46.20	\$156.30
January 1, 2021 through December 31, 2021	\$45.39	\$201.69
January 1, 2022 through December 31, 2022	\$45.14	\$246.83
January 1, 2023 through December 31, 2023	\$45.00	\$291.83
January 1, 2024 through December 31, 2024	\$44.99	\$336.82
January 1, 2025 through December 31, 2025	\$45.15	\$381.97
January 1, 2026 through December 31, 2026	\$45.34	\$427.31
January 1, 2027 through December 31, 2027	\$45.60	\$472.91
January 1, 2028 through December 31, 2028	\$45.93	\$518.84
January 1, 2029 through December 31, 2029	\$46.34	\$565.18
January 1, 2030 through December 31, 2030	\$46.72	\$611.90
January 1, 2031 through December 31, 2031	\$47.18	\$659.08
January 1, 2032 through December 31, 2032	\$47.66	\$706.74
January 1, 2033 through December 31, 2033	\$48.14	\$754.88
January 1, 2034 through December 31, 2034	\$48.67	\$803.55
January 1, 2035 through December 31, 2035	\$49.22	\$852.77
January 1, 2036 through December 31, 2036	\$49.80	\$902.57
January 1, 2037 through September 30, 2037	\$37.71	\$940.28

In addition, we have determined the projected payments for your Notes are as follows:

TAXABLE YEAR	JANUARY	FEBRUARY	MARCH	APRIL	MAY	JUNE	JULY	AUGUST	SEPTEMBER	OCTOBER	NOVEMBER	DECEMBER
2017	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	\$6.67	\$6.67	\$6.67

The comparable yield and projected payment schedule are not provided to you for any purpose other than the determination of your interest accruals in respect of your Notes, and we make no representation regarding the amount of contingent payments with respect to your Notes.

PS-12

[Table of Contents](#)

If, during any taxable year, the actual payments with respect to the Notes exceed the projected payments for that taxable year, you will incur a “net positive adjustment” under the contingent debt regulations equal to the amount of such excess. You will treat a net positive adjustment as additional interest income in that taxable year.

If, during any taxable year, the actual payments with respect to the Notes are less than the amount of projected payments for that taxable year, you will incur a “net negative adjustment” under the contingent debt regulations equal to the amount of such deficit. This net negative adjustment will (a) reduce your interest income on the Notes for that taxable year, and (b) to the extent of any excess after the application of (a), give rise to an ordinary loss to the extent of your interest income on the Notes during prior taxable years, reduced to the extent such interest was offset by prior net negative adjustments. Any net negative adjustment in excess of the amounts described in (a) and (b) will be carried forward as a negative adjustment to offset future interest income with respect to the Notes or to reduce the amount realized on a sale, exchange or the maturity of the Notes. A net negative adjustment is not subject to the two percent floor limitation on miscellaneous itemized deductions.

You are required to use the comparable yield and projected payment schedule that we compute in determining your interest accruals in respect of your Notes, unless you timely disclose and justify on your U.S. federal income tax return the use of a different comparable yield and projected payment schedule.

Furthermore, it is possible that any Form 1099-OID you receive in respect of the Notes may not take net negative or positive adjustments into account and therefore may overstate or understate your interest inclusions. You should consult your tax advisor as to whether and how adjustments should be made to the amounts reported on any Form 1099-OID.

If you purchase your Notes at a price other than their adjusted issue price as determined for tax purposes, you must determine the extent to which the difference between the price you paid for your Notes and their adjusted issue price is attributable to a change in expectations as to the projected payment schedule, a change in interest rates, or both, and reasonably allocate the difference accordingly. If the adjusted issue price of your Notes is greater than the price you paid for your Notes, you must make positive adjustments increasing (i) the amount of interest that you would otherwise accrue and include in income each year, and (ii) the amount of ordinary income (or decreasing the amount of ordinary loss) recognized upon the sale, exchange or maturity, by the amounts allocated to each of interest and projected payment schedule; if the adjusted issue price of your Notes is less than the price you paid for your Notes, you must make negative adjustments, decreasing (i) the amount of interest that you must include in income each year, and (ii) the amount of ordinary income (or increasing the amount of ordinary loss) recognized upon the sale, exchange or maturity by the amounts allocated to each of interest and projected payment schedule. Adjustments allocated to the interest amount are not made until the date the daily portion of interest accrues.

The adjusted issue price of your Notes will equal your Notes’ original issue price plus any interest deemed to be accrued on your Notes (under the rules governing contingent payment debt instruments) as of the time you purchase your Notes, decreased by the projected amount of any contingent payments previously made with respect to the Notes. The original issue price of your Notes is equal to the first price at which a substantial amount of the Notes is sold to persons other than bond houses, brokers, or similar

persons or organizations acting in the capacity of underwriters, placement agents, or wholesalers.

Because any Form 1099-OID that you receive will not reflect the effects of positive or negative adjustments resulting from your purchase of Notes at a price other than the adjusted issue price determined for tax purposes, you are urged to consult with your tax advisor as to whether and how adjustments should be made to the amounts reported on any Form 1099-OID.

You will recognize income or loss upon the sale, exchange or maturity of your Notes in an amount equal to the difference, if any, between the amount of cash you receive at such time and your adjusted basis in your Notes. In general, your adjusted basis in your Notes will equal the amount you paid for your Notes, increased by the amount of interest you previously accrued with respect to your Notes (in accordance with the comparable yield for your Notes), decreased by the projected amount of any contingents payments previously made to you with respect to your Notes and increased or decreased by the amount of any positive or negative adjustment, respectively, that you are required to make if you purchase your Notes at a price other than the adjusted issue price determined for tax purposes.

PS-13

[Table of Contents](#)

Any income you recognize upon the sale, exchange or maturity of your Notes will be ordinary interest income. Any loss you recognize at such time will be ordinary loss to the extent of interest you included as income in the current or previous taxable years in respect of your Notes, and, thereafter, as capital loss. If you are a non-corporate holder, you would generally be able to use an ordinary loss to offset your income only in the taxable year in which you recognize the ordinary loss and would generally not be able to carry such ordinary loss forward or back to offset income in other taxable years.

PS-14

[Table of Contents](#)

SUPPLEMENTAL PLAN OF DISTRIBUTION

Jefferies LLC, the broker-dealer subsidiary of Jefferies Group LLC and an affiliate of Jefferies Group Capital Finance Inc., will act as our Agent in connection with the offering of the Notes. Subject to the terms and conditions contained in a distribution agreement between us and Jefferies LLC, the Agent has agreed to use its reasonable efforts to solicit purchases of the Notes. We have the right to accept offers to purchase Notes and may reject any proposed purchase of the Notes. The Agent may also reject any offer to purchase Notes. We or Jefferies LLC will pay various discounts and commissions to dealers of \$35.00 per Note depending on market conditions.

We may also sell Notes to the Agent who will purchase the Notes as principal for its own account. In that case, the Agent will purchase the Notes at a price equal to the issue price specified on the cover page of this pricing supplement, less a discount. The discount will equal the applicable commission on an agency sale of the Notes.

The Agent may resell any Notes it purchases as principal to other brokers or dealers at a discount, which may include all or part of the discount the Agent received from us. If all the Notes are not sold at the initial offering price, the Agent may change the offering price and the other selling terms.

The Agent will sell any unsold allotment pursuant to this pricing supplement from time to time in one or more transactions in the over-the-counter market, through negotiated transactions or otherwise at market prices prevailing at the time of time of sale, prices relating to the prevailing market prices or negotiated prices.

We may also sell Notes directly to investors. We will not pay commissions on Notes we sell directly.

The Agent, whether acting as agent or principal, may be deemed to be an “underwriter” within the meaning of the Securities Act. We have agreed to indemnify the Agent against certain liabilities, including liabilities under the Securities Act.

If the Agent sells Notes to dealers who resell to investors and the Agent pays the dealers all or part of the discount or commission it receives from us, those dealers may also be deemed to be “underwriters” within the meaning of the Securities Act.

The Agent is offering the Notes, subject to prior sale, when, as and if issued to and accepted by it, subject to approval of legal

matters by its counsel, including the validity of the Notes, and other conditions contained in the distribution agreement, such as the receipt by the Agent of officers' certificates and legal opinions. The Agent reserves the right to withdraw, cancel or modify offers to the public and to reject orders in whole or in part.

The Agent is a member of the Financial Industry Regulatory Authority, Inc. ("FINRA"). Accordingly, the offering of the notes will conform to the requirements of FINRA Rule 5121. See "Conflict of Interest" below.

The Agent is not acting as your fiduciary or advisor solely as a result of the offering of the Notes, and you should not rely upon any communication from the Agent in connection with the Notes as investment advice or a recommendation to purchase the Notes. You should make your own investment decision regarding the Notes after consulting with your legal, tax, and other advisors.

We expect to deliver the Notes against payment therefor in New York, New York on September 29, 2017, which will be the fourteenth scheduled business day following the initial pricing date. Under Rule 15c6-1 of the Securities Exchange Act of 1934, trades in the secondary market generally are required to settle in two business days, unless the parties to any such trade expressly agree otherwise. Accordingly, with respect to Notes that price on a pricing date occurring more than two business days before the Original Issue Date, purchasers who wish to trade such Notes more than two business days prior to the Original Issue Date will be required to specify alternative settlement arrangements to prevent a failed settlement.

The Notes will be offered at a price equal to 100% of the Stated Principal Amount per Note until the initial pricing date. Thereafter, the Notes will be offered from time to time in one or more negotiated transactions at varying prices to be determined at the time of each sale, which may be at market prices prevailing, at prices related to such prevailing prices or at negotiated prices, subject to a maximum price of 100% of the Stated Principal Amount per Note.

Jefferies LLC and any of our other broker-dealer affiliates may use this pricing supplement, the prospectus and the prospectus supplements for offers and sales in secondary market transactions and market-making transactions in the Notes. However, they are not obligated to engage in such secondary market transactions and/or market-making transactions. Our affiliates may act as principal or agent in these transactions, and any such sales will be made at prices related to prevailing market prices at the time of the sale.

PS-15

[Table of Contents](#)

SUPPLEMENTAL CERTAIN ERISA CONSIDERATIONS

The following discussion supplements the discussion under "Certain ERISA Considerations" in the accompanying prospectus on page 44.

Each purchaser or transferee of a Note or any interest therein that is using assets of a benefit plan investor subject to ERISA or to Section 4975 of the Code (a "benefit plan"), including any fiduciary purchasing a Note on behalf of a benefit plan ("Plan Fiduciary"), will be deemed to have represented by its acquisition of the Note that:

- (1) none of the issuer entities, the trustee, the underwriters, agents, dealers and similar parties, or any of their respective affiliated entities (the "Transaction Parties"), has provided or will provide advice with respect to the acquisition of a Note by the benefit plan, other than to the Plan Fiduciary which is independent of the Transaction Parties, and the Plan Fiduciary either: (a) is a bank as defined in Section 202 of the Investment Advisers Act of 1940 (the "Advisers Act"), or similar institution that is regulated and supervised and subject to periodic examination by a State or Federal agency; (b) is an insurance carrier which is qualified under the laws of more than one state to perform the services of managing, acquiring or disposing of assets of a benefit plan; (c) is an investment adviser registered under the Advisers Act, or, if not registered as an investment adviser under the Advisers Act by reason of paragraph (1) of Section 203A of the Advisers Act, is registered as an investment adviser under the laws of the state in which it maintains its principal office and place of business; (d) is a broker-dealer registered under the Securities Exchange Act of 1934, as amended; or (e) has, and at all times that the benefit plan is invested in a Note will have, total assets of at least U.S. \$50,000,000 under its management or control (provided that this clause (e) shall not be satisfied if the Plan Fiduciary is either (i) the owner or a relative of the owner of an investing individual retirement account or (ii) a participant or beneficiary of the benefit plan investing in a Note in such capacity);
- (2) the Plan Fiduciary is capable of evaluating investment risks independently, both in general and with respect to particular transactions and investment strategies, including the acquisition by the benefit plan of a Note;
- (3) the Plan Fiduciary is a "fiduciary" with respect to the benefit plan within the meaning of Section 3(21) of ERISA, Section 4975 of

the Code, or both, and is responsible for exercising independent judgment in evaluating the benefit plan's acquisition of a Note;

(4) none of the Transaction Parties has exercised any authority to cause the benefit plan to invest in a Note or to negotiate the terms of the benefit plan's investment in a Note; and

(5) the Plan Fiduciary has been informed by the Transaction Parties: (a) that none of the Transaction Parties is undertaking to provide impartial investment advice or to give advice in a fiduciary capacity, and that no such entity has given investment advice or otherwise made a recommendation, in connection with the benefit plan's acquisition of a Note; and (b) of the existence and nature of the Transaction Parties financial interests in the benefit plan's acquisition of a Note.

The above representations are intended to comply with the DOL's Reg. Sections 29 C.F.R. 2510.3-21(a) and (c)(1) as promulgated on April 8, 2016 (81 Fed. Reg. 20,997). If these regulations are revoked, repealed or no longer effective, these representations shall be deemed to be no longer in effect.

None of the Transaction Parties is undertaking to provide impartial investment advice, or to give advice in a fiduciary capacity, in connection with the acquisition of any a Note by any benefit plan.

CONFLICT OF INTEREST

Jefferies LLC, the broker-dealer subsidiary of Jefferies Group LLC, is a member of FINRA and will participate in the distribution of the Notes. Accordingly, the offering is subject to the provisions of FINRA Rule 5121 relating to conflicts of interests and will be conducted in accordance with the requirements of Rule 5121. Jefferies LLC will not confirm sales of the Notes to any account over which it exercises discretionary authority without the prior written specific approval of the customer.

LEGAL MATTERS

In the opinion of Sidley Austin LLP, as counsel to the issuers, when the Notes offered by this pricing supplement have been executed and issued by the issuers and authenticated by the trustee pursuant to the indenture, and delivered against payment as contemplated herein, such Notes will be valid and binding obligations of the issuers, enforceable in accordance with their terms, subject to applicable bankruptcy, insolvency and similar laws affecting creditors' rights generally, concepts of reasonableness and equitable principles of general applicability (including, without limitation, concepts of good faith, fair dealing and the lack of bad faith), provided that such counsel expresses no opinion as to the effect of fraudulent conveyance, fraudulent transfer or similar provision of applicable law on the conclusions expressed above. This opinion is given as of the date hereof and is limited to the Federal laws of the United States, the laws of the State of New York, the General Corporation Law of the State of Delaware and the Delaware Limited Liability Company Act as in effect on the date hereof. In addition, this opinion is subject to customary assumptions about the trustee's authorization, execution and delivery of the indenture and the genuineness of signatures and certain factual matters, all as stated in the letter of such counsel dated October 5, 2016, which has been filed as Exhibit 5.1 to the Company's quarterly report on Form 10-Q filed with the Securities and Exchange Commission on October 5, 2016.
