JPMORGAN CHASE & CO.

**Structured
Investments**

JPMorgan Chase & Co.

\$13,000,000

Callable Step-Up Fixed Rate Notes due October 31, 2032

General

- Unsecured and unsubordinated obligations of JPMorgan Chase & Co. maturing October 31, 2032, subject to postponement.
- Interest on the notes will be payable semiannually on each Interest Payment Date in arrears at a rate per annum equal to (a) for the first year, an interest rate equal to 3.00% per annum, (b) for the eleventh year to the twelfth year, an interest rate equal to 4.00% per annum, (c) for the twelfth year to the thirteenth year, an interest rate equal to 4.50% per annum, (d) for the thirteenth year to the fourteenth year, an interest rate equal to 4.50% per annum, (e) for the fourteenth year to the fifteenth year, an interest rate equal to 4.50% per annum, (f) for the fifteenth year to the sixteenth year, an interest rate equal to 4.50% per annum, (g) for the sixteenth year to the seventeenth year, an interest rate equal to 4.50% per annum, (h) for the seventeenth year to the eighteenth year, an interest rate equal to 6.50% per annum, and (i) for the eighteenth year to the nineteenth year, an interest rate equal to 7.750% per annum. **Any payment on the notes is subject to the credit risk of JPMorgan Chase & Co.**
- Unless general interest rates rise significantly, you should not expect to earn the highest scheduled Interest Rate below before the notes are called prior to maturity if interest rates remain the same or fall during the term of notes. Additionally, the interest rate on the notes will remain at the rate set above until later of the term of the notes. See "Selected Risk Considerations" in this pricing supplement.
- These notes, which have a relatively long term, may be more risky than notes with a shorter term. See "Selected Risk Considerations" in this pricing supplement.
- Minimum denominations of \$1,000 and integral multiples thereof.
- At our option, we may redeem the notes, in whole but not in part, on any of the Redemption Dates specified below.
- The notes priced on October 24, 2012 and are expected to settle on or about October 31, 2012.

Key Terms

Pricing Date:

October 24, 2012

Issue Date:

October 31, 2012, *provided, however,* that if such day is not a business day, the business day immediately preceding the Issue Date.

Maturity Date:

October 31, 2032, *provided, however,* that if such day is not a business day, the business day immediately preceding the Maturity Date.

Payment at Maturity:

If we have not elected to redeem the notes prior to maturity, at maturity you will receive a \$1,000 principal amount note of \$1,000 *plus* any accrued and unpaid interest.

Payment upon Redemption:

At our option, we may redeem the notes, in whole but not in part, on the last calendar year (each such date, a "Redemption Date"), commencing October 31, 2022. If the notes are redeemed, we will pay to the holder of record of such notes on the Redemption Date a cash payment equal to \$1,000 for each note plus any accrued and unpaid interest. Such amounts will be paid to the person who is the holder of record of such notes at the close of business on the business day immediately preceding (a) the Redemption Date in which payment is to be made (as described below). We will provide notice of the Redemption Date at least 15 days prior to the applicable Redemption Date. If a Redemption Date is not a business day, the payment will be made on the business day immediately preceding the Redemption Date.

Interest:

With respect to each Interest Period, for each \$1,000 principal amount note, the interest will be:

$$\$1,000 \times \text{Interest Rate} \times (180 / 360)$$

Notwithstanding anything to the contrary in the product supplement, any accrued and unpaid interest will be paid to the holder of record of such notes at the close of business on the business day immediately preceding the applicable Interest Payment Date.

Interest Rate:

	<u>From (and including)</u>	<u>To (but excluding)</u>	<u>Interest Rate</u>
	October 31, 2012	October 31, 2022	3.00%
	October 31, 2022	October 31, 2024	4.00%
	October 31, 2024	October 31, 2026	4.50%
	October 31, 2026	October 31, 2028	5.50%
	October 31, 2028	October 31, 2030	6.50%
	October 31, 2030	October 31, 2032	7.75%

The dates above refer to originally scheduled Interest Payment Dates and dates on which interest will be paid. The dates may be adjusted as described below.

Interest Period:

The period beginning on and including the issue date and ending on but excluding the date of the next Interest Payment Date, or, if the notes have been redeemed prior to such date, ending on but excluding the applicable Redemption Date. The period for each successive period beginning on and including an Interest Payment Date and ending on but excluding the date of the next succeeding Interest Payment Date or, if the notes have been redeemed prior to such date, ending on but excluding the applicable Redemption Date.

Interest Payment Date:

Interest on the notes will be payable semiannually in arrears on the last calendar day of each even-numbered month (each such date, an "Interest Payment Date"), commencing April 30, 2013, to and including the Maturity Date, corresponding to the Maturity Date, or, if the notes have been redeemed, the applicable Redemption Date. If an Interest Payment Date is not a business day, payment will be made on the business day immediately preceding the applicable Interest Payment Date. See "Selected Purchase Considerations — Semiannual Interest Payments" in the product supplement for more information.

Investing in the notes involves a number of risks. See "Risk Factors" beginning on page PS-13 of the accompanying prospectus and "Selected Risk Considerations" beginning on page PS-1 of this pricing supplement.

Neither the U.S. Securities and Exchange Commission nor any state securities commission has approved or disapproved of the accuracy or the adequacy of this pricing supplement, the accompanying product supplement no. 1-I or the accompanying prospectus.

Any representation to the contrary is a criminal offense.

	Price to Public (1)	Fees and Commissions (2)	Price
Per note	\$1,000	\$ 41.69	\$ 9
Total	\$13,000,000	\$ 541,970	\$ 1

(1) The price to the public includes the estimated cost of hedging our obligations under the notes through one or more of our affiliated dealers.

(2) J.P. Morgan Securities LLC, which we refer to as JPMS, acting as agent for JPMorgan Chase & Co., will receive a commission on each note and will use a portion of that commission to allow selling concessions to other affiliated or unaffiliated dealers of \$24.46 per note. This commission will include the projected profits that our affiliates expect to realize, some of which will be allowed to other dealers assuming risks inherent in hedging our obligations under the notes. The concessions of \$24.46 include concessions to be allowed to other dealers assuming risks inherent in hedging our obligations under the notes. The concessions of \$24.46 include concessions to be allowed to any arranging dealer. See "Plan of Distribution (Conflicts of Interest)" beginning on page PS-42 of the prospectus supplement no. 1-I.

The notes are not bank deposits and are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other agency of the United States. The notes are not obligations of, or guaranteed by, a bank.

J.P.Morgan

October 24, 2012

Additional Terms Specific to the Notes

You should read this pricing supplement together with the prospectus dated November 14, 2011, as supplemented by the prospectus supplement no. 1-I dated November 14, 2011 relating to our Series E medium-term notes of which these notes are a part, and the more detailed information in the accompanying product supplement no. 1-I dated November 14, 2011. **This pricing supplement, together with the documents listed below, contains and supplements the term sheet related hereto dated October 16, 2012 and supersedes all other prior or contemporaneous or any other written materials including preliminary or indicative pricing terms, correspondence, trade ideas, structures, fact sheets, brochures or other educational materials of ours.** You should carefully consider, among other things, the "Risk Factors" in the accompanying product supplement no. 1-I, as the notes involve risks not associated with conventional debt securities. You should consult your investment, legal, tax, accounting and other advisers before you invest in the notes.

You may access these documents on the SEC website at www.sec.gov as follows (or if such address has changed, by reviewing the SEC website):

- Product supplement no. 1-I dated November 14, 2011:

Our Central Index Key, or CIK, on the SEC website is 19617. As used in this pricing supplement, the "Company," "we," "us," or "Co."

Selected Purchase Considerations

- **PRESERVATION OF CAPITAL** — You will receive at least 100% of the principal amount of your notes if you hold the notes to the Maturity Date, if any, on which we elect to call the notes. Because the notes are our unsecured and unsubordinated obligations, payment upon early redemption is subject to our ability to pay our obligations as they become due.
- **SEMIANNUAL INTEREST PAYMENTS** — The notes offer semiannual interest payments which will accrue at a rate equal to 4.500%. Interest will be payable semiannual in arrears on the last calendar day of April and October of each year, commencing April 30, 2012. Payment Date corresponding to the Maturity Date, or, if the notes have been redeemed, the applicable Redemption Date, is the close of business on the business day immediately preceding (a) the applicable Interest Payment Date or (b) if earlier, the date on which payment is to be made (as described below). If an Interest Payment Date is not a business day, payment will be made on the next preceding such day.
- **POTENTIAL SEMIANNUAL REDEMPTION BY US AT OUR OPTION** — At our option, we may redeem the notes, in whole or in part, on the last calendar day of April and October of each year (each such date, a "Redemption Date"), commencing on October 31, 2022. We will pay \$1,000 for each \$1,000 principal amount note plus any accrued and unpaid interest on notes. Such amount will be paid to the record of such notes at the close of business on the business day immediately preceding (a) the applicable Redemption Date or (b) if earlier, the date on which payment is to be made (as described below). If a Redemption Date is not a business day, payment will be made on the next preceding such day.
- **TAX TREATMENT** — You should review carefully the section entitled "Material U.S. Federal Income Tax Consequences" in the accompanying product supplement no. 1-I. Interest paid on the notes will generally be taxable to you as ordinary interest income at the time it accrues.

<http://www.sec.gov/Archives/edgar/data/>

with your method of accounting for U.S. federal income tax purposes. In general, gain or loss realized on the sale, exchange or disposition of the notes will be capital gain or loss. Prospective purchasers are urged to consult their own tax advisers regarding the U.S. federal investment in the notes. Purchasers who are not initial purchasers of notes at their issue price on the issue date should consult with their tax advisers concerning the tax consequences of an investment in the notes, and the potential application of special rules.

Subject to certain assumptions and representations received from us, the discussion in this section entitled "Tax Treatment" in the section entitled "Material U.S. Federal Income Tax Consequences" in the accompanying product supplement, constitutes an opinion of our LLP regarding the material U.S. federal income tax treatment of owning and disposing of the notes.

Selected Risk Considerations

An investment in the notes involves significant risks. These risks are explained in more detail in the "Risk Factors" section of the supplement no. 1-I dated November 14, 2011.

THE NOTES ARE SUBJECT TO EARLY REDEMPTION PRIOR TO MATURITY – The notes are subject to redemption and on the specified Redemption Dates indicated above. If the notes are redeemed prior to maturity, you will receive the principal accrued and unpaid interest to, but excluding the applicable Redemption Date. This amount will be less than you would have called early and continued to pay interest over the full term of the notes. We may choose to redeem the notes early or choose on any Redemption Date, in our sole discretion. If we elect to redeem the notes early, your return may be less than the return investment had the notes been held to maturity, and you may not be able to reinvest your funds at the same rate as the notes. The notes early, for example, if U.S. interest rates decrease significantly or if the volatility of U.S. interest rates decreases.

THE NOTES ARE NOT ORDINARY DEBT SECURITIES; THE STEP-UP FEATURE PRESENTS DIFFERENT INVESTMENT RISKS

FIXED RATE NOTES — The rate of interest paid by us on the notes will increase upward from the initial stated rate of interest, if any, at the times and in the amounts specified in the notes. The notes are not callable by us, in whole but not in part, prior to maturity and, therefore, contain the call risk described above. If we do not call the notes, you will receive interest at the highest rate of interest, if any, for the term of the notes. The notes contain a step-up as described on the cover of this pricing supplement. Unless general interest rates rise significantly, you should not expect to receive interest at the highest rate of interest for the term of the notes. The notes contain a step-up at the scheduled Interest Rate set forth on the front cover because the notes are likely to be called prior to maturity if interest rates rise significantly during the term of your notes. When determining whether to invest in a stepped-up rate note, you should not focus on the highest rate of interest paid during the term of the notes. Instead, you should focus on the final rate of interest paid, which is the final stepped-up rate of interest. You should instead focus on, among other things, the overall annual percentage rate of interest paid on the notes compared to other equivalent investment alternatives.

JPMorgan Structured Investments — **Callable Step-Up Fixed Rate Notes**

THE INTEREST RATE OF THE CDS DOES NOT STEP UP SIGNIFICANTLY UNTIL LATER IN THE TERM OF THE NOTES

rates rise significantly, you should not expect to earn the highest scheduled Interest Rate set forth on the front cover because prior to maturity if interest rates remain the same or fall during the term of your notes. Additionally, the interest rate on the notes will not step up significantly until later in the term of the notes. If interest rates rise faster than the incremental increases in the interest rate, you will receive an interest rate that is significantly lower than the interest rates at that time and the secondary market value of the CDs may be lower than the price you paid for them. In other words, you should only purchase the notes if you are comfortable with the interest rates set forth on the front cover of this pricing supplement for the entire term of the notes.

CREDIT RISK OF JPMORGAN CHASE & CO. — The notes are subject to the credit risk of JPMorgan Chase & Co., and the credit spreads may adversely affect the market value of the notes. Investors are dependent on JPMorgan Chase & Co.'s ability to meet its payment obligations under the notes, and therefore investors are subject to our credit risk and to changes in the market's view of our creditworthiness. An increase in the credit spreads charged by the market for taking our credit risk is likely to adversely affect the value of the notes. If we are unable to meet our payment obligations, you may not receive any amounts owed to you under the notes and you could lose your entire investment. Any increase in the credit spreads charged by the market for taking our credit risk, which may be caused by events that have led to heightened regulatory scrutiny, may lead to additional regulatory or legal proceedings against us and may adversely affect the market value of the notes. See "Executive Overview — Recent Developments," "Liquidation Ratings," "Item 4. Controls and Procedures" and "Part II. Other Information — Item 1A. Risk Factors" in our Quarterly Report on Form 10-Q for the quarter ended June 30, 2012.

POTENTIAL CONFLICTS — We and our affiliates play a variety of roles in connection with the issuance of the notes, including hedging our obligations under the notes. In performing these duties, our economic interests and the economic interests of our affiliates are potentially adverse to your interests as an investor in the notes. In addition, our business activities, including activities for our own accounts or on behalf of customers, could cause our economic interests to be adverse to yours and could affect the price of the notes and the value of the notes. It is possible that hedging or trading activities of ours or our affiliates could affect the price of the notes and the value of the notes. Please refer to "Risk Factors — Risks Relating to the Notes" in this pricing supplement for additional information about these risks.

THESE NOTES MAY BE MORE RISKY THAN NOTES WITH A SHORTER TERM — By purchasing a note with a longer term, you will be exposed to more interest rate fluctuations in interest rates than if you purchased a note with a shorter term. Specifically, you may be negatively affected if interest rates decline over the term of the notes. For example, if interest rates begin to rise, the market value of your notes will decline because the likelihood of us calling the notes before maturity is greater than for notes with a shorter term. The Interest Rate applicable to that specific Interest Period may be less than a note issued at such time. For example, if the Interest Rate applicable to that specific Interest Period was 3.00% per annum, but a debt security issued in the then current market could yield an interest rate of 4.00% per annum, your notes would be less valuable if you tried to sell it in the secondary market.

CERTAIN BUILT-IN COSTS ARE LIKELY TO ADVERSELY AFFECT THE VALUE OF THE NOTES PRIOR TO MATURITY

At maturity or upon early redemption, as applicable, described in this pricing supplement is based on the full principal amount of the notes. The price of the notes includes the estimated cost of hedging our obligations under the notes. As a result, the price, if any, at which JPMS intends to offer to purchase the notes from you in secondary market transactions, if at all, will likely be lower than the original issue price, and an early redemption could result in a substantial loss to you. The notes are not designed to be short-term trading instruments. Accordingly, you should not expect to earn the highest scheduled Interest Rate set forth on the front cover because prior to maturity if interest rates remain the same or fall during the term of your notes. Additionally, the interest rate on the notes will not step up significantly until later in the term of the notes. If interest rates rise faster than the incremental increases in the interest rate, you will receive an interest rate that is significantly lower than the interest rates at that time and the secondary market value of the CDs may be lower than the price you paid for them. In other words, you should only purchase the notes if you are comfortable with the interest rates set forth on the front cover of this pricing supplement for the entire term of the notes.

LACK OF LIQUIDITY — The notes will not be listed on any securities exchange. JPMS intends to offer to purchase the notes at any time, but is not required to do so. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the notes. If dealers are not likely to make a secondary market for the notes, the price at which you may be able to trade your notes is likely to be lower than the price you paid for them. In addition, the notes are not designed to be short-term trading instruments. Accordingly, you should not expect to earn the highest scheduled Interest Rate set forth on the front cover because prior to maturity if interest rates remain the same or fall during the term of your notes. Additionally, the interest rate on the notes will not step up significantly until later in the term of the notes. If interest rates rise faster than the incremental increases in the interest rate, you will receive an interest rate that is significantly lower than the interest rates at that time and the secondary market value of the CDs may be lower than the price you paid for them. In other words, you should only purchase the notes if you are comfortable with the interest rates set forth on the front cover of this pricing supplement for the entire term of the notes.

MANY ECONOMIC AND MARKET FACTORS WILL IMPACT THE VALUE OF THE NOTES — The notes will be affected by many economic and market factors, including interest rates, inflation, economic growth, and the value of the U.S. dollar. These factors may affect the value of the notes and the secondary market value of the CDs. In addition, the notes are not designed to be short-term trading instruments. Accordingly, you should not expect to earn the highest scheduled Interest Rate set forth on the front cover because prior to maturity if interest rates remain the same or fall during the term of your notes. Additionally, the interest rate on the notes will not step up significantly until later in the term of the notes. If interest rates rise faster than the incremental increases in the interest rate, you will receive an interest rate that is significantly lower than the interest rates at that time and the secondary market value of the CDs may be lower than the price you paid for them. In other words, you should only purchase the notes if you are comfortable with the interest rates set forth on the front cover of this pricing supplement for the entire term of the notes.

<http://www.sec.gov/Archives/edgar/data>

market factors that may either offset or magnify each other, including but not limited to:

- the time to maturity of the notes;
- interest and yield rates in the market generally, as well as the volatility of those rates;
- the likelihood, or expectation, that the notes will be redeemed by us, based on prevailing market interest rates or other
- our creditworthiness, including actual or anticipated downgrades in our credit ratings.

JPMorgan Structured Investments —
Callable Step-Up Fixed Rate Notes

Supplemental Plan of Distribution

We expect that delivery of the notes will be made against payment for the notes on or about the settlement date set forth on the supplement, which will be the fifth business day following the expected pricing date of the notes (this settlement cycle being referred to as "T+5"). Settlement cycles other than T+5 are not permitted under Rule 15c6-1 under the Securities Exchange Act of 1934, as amended, unless the parties to that trade expressly agree otherwise. Accordingly, purchasers who wish to trade notes on the pricing date or the settlement date set forth on the supplement are required to specify an alternate settlement cycle at the time of any such trade to prevent a failed settlement and should consult their counsel for further information.

Validity of the Notes

In the opinion of Sidley Austin LLP, as counsel to the Company, when the notes offered by this pricing supplement have been executed and delivered by the Company and authenticated by the trustee pursuant to the indenture, and delivered against payment as contemplated herein, such notes will be obligations of the Company, enforceable in accordance with their terms, subject to applicable bankruptcy, insolvency and similar laws, generally, concepts of reasonableness and equitable principles of general applicability (including, without limitation, concepts of lack of bad faith), provided that such counsel expresses no opinion as to the effect of fraudulent conveyance, fraudulent transfer, or other law on the conclusions expressed above. This opinion is given as of the date hereof and is limited to the Federal laws of the United States of America and the General Corporation Law of the State of Delaware as in effect on the date hereof. In addition, this opinion does not address the validity of the notes under state law, including, without limitation, the validity of the assumptions about the trustee's authorization, execution and delivery of the indenture and the genuineness of signatures and certificates contained in the letter of such counsel dated November 14, 2011, which has been filed as Exhibit 5.3 to the Company's registration statement on the Securities and Exchange Commission on November 14, 2011.
