Dated J**

JPMORGAN CHASE & CO.

Structured Investments

**JPMorgan Chase & Co.
\$10,000,000**

Callable Step-Up Fixed Rate Notes due January 31, 2033

General

- Unsecured and unsubordinated obligations of JPMorgan Chase & Co. maturing January 31, 2033, subject to postponement.
- Interest on the notes will be payable semiannually on each Interest Payment Date in arrears at a rate per annum equal to (a) for the first year to the tenth year, an interest rate equal to 3.25% per annum, (b) for the eleventh year to the twelfth year, an interest rate equal to 3.75% per annum, (c) for the thirteenth year to the fourteenth year, an interest rate equal to 4.25% per annum, (d) for the fifteenth year to the sixteenth year, an interest rate equal to 4.75% per annum, (e) for the seventeenth year to the eighteenth year, an interest rate equal to 5.25% per annum and (f) for the nineteenth year to the twentieth year, an interest rate equal to 8.50% per annum. **Any payment on the notes is subject to the credit risk of JPMorgan Chase & Co.**
- Unless general interest rates rise significantly, you should not expect to earn the highest scheduled Interest Rate below. The notes may be called prior to maturity if interest rates remain the same or fall during the term of notes. Additionally, the interest rate may rise significantly until later during the term of the notes. See "Selected Risk Considerations" in this pricing supplement.
- These notes, which have a relatively long term, may be more risky than notes with a shorter term. See "Selected Risk Considerations" in this pricing supplement.
- Minimum denominations of \$1,000 and integral multiples thereof.
- At our option, we may redeem the notes, in whole but not in part, on any of the Redemption Dates specified below.
- The notes priced on January 28, 2013 and are expected to settle on or about January 31, 2013.

Key Terms

Pricing Date:	January 28, 2013
Issue Date:	January 31, 2013, <i>provided, however</i> , if such day is not a business day, the business day immediately preceding the Issue Date.
Maturity Date:	January 31, 2033, <i>provided, however</i> , if such day is not a business day, the business day immediately preceding the Maturity Date.
Payment at Maturity:	If we have not elected to redeem the notes prior to maturity, at maturity you will receive the \$1,000 principal amount note of \$1,000 <i>plus</i> any accrued and unpaid interest.
Payment upon Redemption:	At our option, we may redeem the notes, in whole but not in part, on the 31st calendar day of each month (each such date, a "Redemption Date"), commencing January 31, 2023. If the notes are redeemed on a date other than a "Redemption Date," you will receive the principal amount of the notes plus any accrued and unpaid interest as of the date of redemption.

receive on the applicable Redemption Date a cash payment equal to \$1,000 for each *plus* any accrued and unpaid interest. Such amounts will be paid to the person who is the holder of record of such notes at the close of business on the business day immediately preceding (a) the Redemption Date in which payment is to be made (as described below). We will provide notice of such payment at least 30 days prior to the applicable Redemption Date. If a Redemption Date is not a business day, payment will be made on the business day immediately following the Redemption Date. No additional interest will be paid with respect to the postponement of the Redemption Date.

Interest:

With respect to each Interest Period, for each \$1,000 principal amount note, the interest payable is as follows:

$$\$1,000 \times \text{Interest Rate} \times (180 / 360)$$

Notwithstanding anything to the contrary in the product supplement, any accrued and unpaid interest will be paid to the person who is the holder of record of such notes at the close of business on the business day immediately preceding the applicable Interest Payment Date.

Interest Rate:

<u>From (and including)</u>	<u>To (but excluding)</u>	<u>Interest Rate</u>
January 31, 2013	January 31, 2023	3.25%
January 31, 2023	January 31, 2025	3.75%
January 31, 2025	January 31, 2027	4.25%
January 31, 2027	January 31, 2029	4.75%
January 31, 2029	January 31, 2031	5.25%
January 31, 2031	January 31, 2033	8.50%

The dates above refer to originally scheduled Interest Payment Dates and dates on which interest is payable, adjusted as described below.

Interest Period:

The period beginning on and including the issue date and ending on but excluding the date of the first Interest Payment Date, and each successive period beginning on and including an Interest Payment Date and ending on but excluding the date of the succeeding Interest Payment Date or, if the notes have been redeemed prior to such date, the date of redemption. The last Interest Payment Date, ending on but excluding the applicable Redemption Date.

Interest Payment Date:

Interest on the notes will be payable semiannually in arrears on the 31st calendar day of each such month (each such date, an "Interest Payment Date"), commencing July 31, 2013, to and including the date of the last Interest Payment Date corresponding to the Maturity Date, or, if the notes have been redeemed, the applicable date of redemption. If an Interest Payment Date is not a business day, payment will be made on the business day immediately following the Interest Payment Date. No additional interest will be paid with respect to a postponement of the Interest Payment Date. See "Selected Purchase Considerations — Semiannual Interest Payments" in the accompanying product supplement for more information.

Investing in the notes involves a number of risks. See "Risk Factors" beginning on page PS-13 of the accompanying prospectus supplement and "Selected Risk Considerations" beginning on page PS-1 of this pricing supplement.

Neither the U.S. Securities and Exchange Commission nor any state securities commission has approved or disapproved of the accuracy or the adequacy of this pricing supplement, the accompanying product supplement no. 1-I or the accompanying prospectus supplement. Any representation to the contrary is a criminal offense.

	Price to Public (1)(2)(3)	Fees and Commissions (1)(2)	P
Per note	At variable prices	\$47.50	\$
Total	At variable prices	\$475,000	\$

(1) The price to the public includes the estimated cost of hedging our obligations under the notes through one or more of our affiliates.

(2) J.P. Morgan Securities LLC, which we refer to as JPMS, acting as agent for JPMorgan Chase & Co., will receive a commission of \$47.50 per \$1,000 principal amount note and will use a portion of that commission to allow selling concessions to other affiliated or unaffiliated dealers, for assuming risks inherent in hedging our obligations under the notes. This commission will include the projected profits that our affiliates expect to realize, some of which will be used to pay for the projected costs of hedging our obligations under the notes. The concessions of \$29.00 include concessions to be allowed to any arranging dealer. See "Plan of Distribution (Conflicts of Interest)" beginning on page PS-42 of the prospectus supplement no. 1-I.

(3) JPMS sold the notes in one or more negotiated transactions, at varying prices determined at the time of each sale, which were at prevailing prices or at negotiated prices, provided that such prices were not less than \$970.00 per \$1,000 principal amount note. See "Plan of Distribution (Conflicts of Interest)" beginning on page PS-42 of the prospectus supplement no. 1-I.

The notes are not bank deposits and are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other entity. The obligations of, or guaranteed by, a bank.

J.P.Morgan

January 28, 2013

Additional Terms Specific to the Notes

You should read this pricing supplement together with the prospectus dated November 14, 2011, as supplemented by the prospectus supplement dated November 14, 2011 relating to our Series E medium-term notes of which these notes are a part, and the more detailed information supplement no. 1-I dated November 14, 2011. **This pricing supplement, together with the documents listed below, contains supplements the term sheet related hereto dated January 17, 2013 and supersedes all other prior or contemporaneous any other written materials including preliminary or indicative pricing terms, correspondence, trade ideas, structures, structures, fact sheets, brochures or other educational materials of ours.** You should carefully consider, among other things, the “Risk Factors” in the accompanying product supplement no. 1-I, as the notes involve risks not associated with conventional debt securities. Consult your investment, legal, tax, accounting and other advisers before you invest in the notes.

You may access these documents on the SEC website at www.sec.gov as follows (or if such address has changed, by reviewing the SEC website):

- Product supplement no. 1-I dated November 14, 2011:

- http://www.sec.gov/Archives/edgar/data/19617/000089109211007588/e46195_424b2.pdf

- Prospectus supplement dated November 14, 2011:

- http://www.sec.gov/Archives/edgar/data/19617/000089109211007578/e46180_424b2.pdf

- Prospectus dated November 14, 2011:

- http://www.sec.gov/Archives/edgar/data/19617/000089109211007568/e46179_424b2.pdf

Our Central Index Key, or CIK, on the SEC website is 19617. As used in this pricing supplement, the “Company,” “we,” “us,” or “our” refers to the Company and its subsidiaries.

Selected Purchase Considerations

- PRESERVATION OF CAPITAL** — You will receive at least 100% of the principal amount of your notes if you hold the notes to maturity. If we elect to call the notes, because the notes are our unsecured and unsubordinated obligations, payment upon early redemption is subject to our ability to pay our obligations as they become due.

- SEMIANNUAL INTEREST PAYMENTS** — The notes offer semiannual interest payments which will accrue at a rate equal to the applicable interest rate. Interest will be payable semiannually in arrears on the 31st calendar day of January and July of each year, commencing July 31, 2012. Payment Date corresponding to the Maturity Date, or, if the notes have been redeemed, the applicable Redemption Date, close of business on the business day immediately preceding (a) the applicable Interest Payment Date or (b) if earlier, the date of the next Interest Payment Date. If an Interest Payment Date is not a business day, payment will be made on the next business day following such day. No additional interest will be paid with respect to a postponement of the Interest Payment Date.

- POTENTIAL SEMIANNUAL REDEMPTION BY US AT OUR OPTION** — At our option, we may redeem the notes, in whole or in part, on the 31st calendar day of January and July of each year (each such date, a “Redemption Date”), commencing on January 31, 2023. We will pay \$1,000 for each \$1,000 principal amount note plus any accrued and unpaid interest on notes. Such amount will be paid to the record owner of such notes at the close of business on the business day immediately preceding (a) the applicable Redemption Date or (b) if earlier, the date of the next Redemption Date, which payment is to be made (as described below). If a Redemption Date is not a business day, payment will be made on the next business day following such day. No additional interest will be paid with respect to a postponement of the Redemption Date.

- TAX TREATMENT** — You should review carefully the section entitled “Material U.S. Federal Income Tax Consequences” in the prospectus supplement.

supplement no. 1-I. Except to the extent of original issue discount, if any, during the term of the notes, interest paid on the notes will be treated by you as ordinary interest income at the time it accrues or is received in accordance with your method of accounting for U.S. federal income tax. In addition, a U.S. Holder (as defined in the accompanying product supplement) must include original issue discount, if any, in its gross income and accrues, generally in advance of receipt of cash attributable to such income. In general, gain or loss realized on the sale, exchange or redemption of the notes will be capital gain or loss. Prospective purchasers are urged to consult their own tax advisers regarding the U.S. federal income tax consequences of an investment in the notes. Purchasers who are not initial purchasers of notes at their issue price on the issue date should consult their tax advisers with respect to the tax consequences of an investment in the notes, and the potential application of special rules.

Subject to certain assumptions and representations received from us, the discussion in this section entitled “Tax Treatment of the Notes” and the section entitled “Material U.S. Federal Income Tax Consequences” in the accompanying product supplement, constitute our best estimate of the U.S. federal income tax treatment of the notes. JPMorgan Structured Investments, L.P. (“JPMorgan Structured Investments”) is a limited liability partnership (“LLP”) regarding the material U.S. federal income tax treatment of owning and disposing of the notes.

Selected Risk Considerations

An investment in the notes involves significant risks. These risks are explained in more detail in the “Risk Factors” section of the accompanying product supplement no. 1-I dated November 14, 2011.

THE NOTES ARE SUBJECT TO EARLY REDEMPTION PRIOR TO MATURITY – The notes are subject to redemption prior to maturity on the specified Redemption Dates indicated above. If the notes are redeemed prior to maturity, you will receive the principal amount of the notes, plus accrued and unpaid interest to, but excluding the applicable Redemption Date. This amount will be less than you would have received had the notes been held to maturity, called early and continued to pay interest over the full term of the notes. We may choose to redeem the notes early or continue to hold the notes on any Redemption Date, in our sole discretion. If we elect to redeem the notes early, your return may be less than the return you would have received had your investment had the notes been held to maturity, and you may not be able to reinvest your funds at the

same rate as the notes. We may choose to redeem the notes early, for example, if U.S. interest rates decrease significantly or if interest rates decrease significantly.

THE NOTES ARE NOT ORDINARY DEBT SECURITIES; THE STEP-UP FEATURE PRESENTS DIFFERENT INVESTMENT RISK THAN OTHER DEBT SECURITIES.

FIXED RATE NOTES — The rate of interest paid by us on the notes will increase upward from the initial stated rate of interest to a rate that is callable by us, in whole but not in part, prior to maturity and, therefore, contain the call risk described above. If we do not step-up as described on the cover of this pricing supplement. Unless general interest rates rise significantly, you should not expect to earn the scheduled Interest Rate set forth on the front cover because the notes are likely to be called prior to maturity if interest rates rise significantly during the term of your notes. When determining whether to invest in a stepped-up rate note, you should not focus on the highest rate that is the final stepped-up rate of interest. You should instead focus on, among other things, the overall annual percentage rate of return compared to other equivalent investment alternatives.

THE INTEREST RATE OF THE NOTES DOES NOT STEP UP SIGNIFICANTLY UNTIL LATER IN THE TERM OF THE NOTES.

If interest rates rise significantly, you should not expect to earn the highest scheduled Interest Rate set forth on the front cover because the notes are likely to be called prior to maturity if interest rates remain the same or fall during the term of your notes. Additionally, the interest rate on the notes will not step-up significantly until later in the term of the notes. If interest rates rise faster than the incremental increases in the interest rates on other instruments, you may have an interest rate that is significantly lower than the interest rates at that time and the secondary market value of the notes may be lower than other instruments with a similar term but higher interest rates. In other words, you should only purchase the notes if you are comfortable with the interest rates set forth on the front cover of this pricing supplement for the entire term of the notes.

CREDIT RISK OF JPMORGAN CHASE & CO. — The notes are subject to the credit risk of JPMorgan Chase & Co., and changes in credit spreads may adversely affect the market value of the notes. Investors are dependent on JPMorgan Chase & Co.'s ability to service its debt obligations, and therefore investors are subject to our credit risk and to changes in the market's view of our creditworthiness. An increase in the credit spreads charged by the market for taking our credit risk is likely to adversely affect the value of the notes. If we are unable to make payment obligations, you may not receive any amounts owed to you under the notes and you could lose your entire investment.

Recent events affecting us have led to heightened regulatory scrutiny, may lead to additional regulatory or legal proceedings, and may affect our credit ratings and credit spreads and, as a result, the market value of the notes. See "Executive Overview — Credit Risk," "Liquidity Risk Management — Credit Ratings," and "Item 4. Controls and Procedures" in our Quarterly Report on Form 10-Q for the quarter ended September 30, 2012 and "Part II. Other Information — Item 1A. Risk Factors" in our Quarterly Report on Form 10-Q for the quarter ended September 30, 2012.

POTENTIAL CONFLICTS — We and our affiliates play a variety of roles in connection with the issuance of the notes, including managing and hedging our obligations under the notes. In performing these duties, our economic interests and the economic interests of our affiliates are potentially adverse to your interests as an investor in the notes. In addition, our business activities, including our activities for our own accounts or on behalf of customers, could cause our economic interests to be adverse to yours and could result in payments on the notes and the value of the notes. It is possible that hedging or trading activities of ours or our affiliates could result in a loss to us or our affiliates while the value of the notes declines. Please refer to "Risk Factors — Risks Relating to the Notes Generated by the Notes" in the pricing supplement for additional information about these risks.

THESE NOTES MAY BE MORE RISKY THAN NOTES WITH A SHORTER TERM — By purchasing a note with a longer term, you may be exposed to more fluctuations in interest rates than if you purchased a note with a shorter term. Specifically, you may be negatively affected if interest rates rise. For example, if interest rates begin to rise, the market value of your notes will decline because the likelihood of us calling the notes at such time may be less than a note issued at such time. For example, if the Interest Rate applicable to that specific Interest Period may be less than a note issued at such time. For example, if the Interest Rate on the notes at such time was 3.00% per annum, but a debt security issued in the then current market could yield an interest rate of 4.00% per annum, the notes would be less valuable if you tried to sell it in the secondary market.

CERTAIN BUILT-IN COSTS ARE LIKELY TO ADVERSELY AFFECT THE VALUE OF THE NOTES PRIOR TO MATURITY

maturity or upon early redemption, as applicable, described in this pricing supplement is based on the full principal amount of the notes. The price of the notes includes the estimated cost of hedging our obligations under the notes. As a result, the price, if any, at which you purchase notes from you in secondary market transactions, if at all, will likely be lower than the original issue price, and any sale could result in a substantial loss to you. The notes are not designed to be short-term trading instruments. Accordingly, you should hold your notes to maturity.

LACK OF LIQUIDITY — The notes will not be listed on any securities exchange. JPMS intends to offer to purchase the notes but is not required to do so. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the notes. If dealers are not likely to make a secondary market for the notes, the price at which you may be able to trade your notes is uncertain, and any price, at which JPMS is willing to buy the notes.

VARIABLE PRICE REOFFERING RISKS — JPMS proposes to offer the notes from time to time for sale at market prices or at prices related to then-prevailing prices or at negotiated prices, provided that such prices will not be less than \$970.00 per \$1,000 principal amount note. Accordingly, there is a risk that the price you pay for the notes will be lower than the price paid by other investors based on the date and time you make your purchase, from whom you purchase the notes (e.g., directly from JPMS or a dealer), any related transaction cost (e.g., any brokerage commission), whether you hold your notes in a brokerage account, a bank account or another type of account and other market factors beyond our control.

MANY ECONOMIC AND MARKET FACTORS WILL IMPACT THE VALUE OF THE NOTES — The notes will be affected by various market factors that may either offset or magnify each other, including but not limited to:

- the time to maturity of the notes;
- interest and yield rates in the market generally, as well as the volatility of those rates;

<http://www.sec.gov/Archives/edgar/data/>

- the likelihood, or expectation, that the notes will be redeemed by us, based on prevailing market interest rates or other factors;
- our creditworthiness, including actual or anticipated downgrades in our credit ratings.

Validity of the Notes

In the opinion of Sidley Austin LLP, as counsel to the Company, when the notes offered by this pricing supplement have been exchanged for cash or other property, the notes will be delivered to the Company and authenticated by the trustee pursuant to the indenture, and delivered against payment as contemplated herein, subject to the obligations of the Company, enforceable in accordance with their terms, subject to applicable bankruptcy, insolvency and similar laws that may limit the recovery of claims against creditors and equity holders of a company in liquidation or reorganization, and, in general, concepts of reasonableness and equitable principles of general applicability (including, without limitation, concepts of good faith and lack of bad faith), provided that such counsel expresses no opinion as to the effect of fraudulent conveyance, fraudulent transfer or similar laws on the conclusions expressed above. This opinion is given as of the date hereof and is limited to the Federal laws of the United States, the laws of New York and the General Corporation Law of the State of Delaware as in effect on the date hereof. In addition, this opinion is based on the assumptions about the trustee's authorization, execution and delivery of the indenture and the genuineness of signatures and certificates set forth in the letter of such counsel dated November 14, 2011, which has been filed as Exhibit 5.3 to the Company's registration statement with the Securities and Exchange Commission on November 14, 2011.
