## SUMMARY

Summaries are made up of disclosure requirements known as 'Elements'. These Elements are numbered in Sections A – E (A.1 – E.7).

This summary contains all the Elements required to be included in a summary for securities of the type of the Securities and an issuer of the type of the Issuer. Because some Elements are not required to be addressed, there may be gaps in the numbering sequence of Elements.

Even though an Element may be required to be inserted in the summary because of the type of Securities and Issuer, it is possible that no relevant information can be given regarding the Element. In this case a short description of the Element is included in the summary with the mention of 'not applicable'.

### Section A — Introduction and warnings

**Section D – Risks**

<b>Element</b>	<b>Disclosure Requirement</b>
<b>D.2</b>	<p>Key information on the key risks that are specific to the issuer</p> <p>Investors will be exposed to the risk of the Issuer becoming insolvent and thus overindebted or unable to pay debts, i.e. a temporary or permanent inability to meet interest and/or principal payments on time. The Issuer's credit rating reflects the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> <li>As a global investment bank with a large private client franchise, Deutsche Bank's businesses are materially affected by global macroeconomic and financial market conditions. Over the last several years, banks, including Deutsche Bank, have experienced nearly continuous stress on their business models and prospects. A widespread loss of investor confidence, both in the banking industry and in the broader markets, has put significant pressure on the financial sector and Deutsche Bank's businesses.</li> <li>Deutsche Bank has been and may continue to be directly affected by the ongoing European sovereign debt crisis, and it may be required to take impairments on its exposures to the sovereign debt of European or other countries. The credit default swaps Deutsche Bank has entered into to manage sovereign credit risk may not be available to offset these losses.</li> <li>Regulatory and political actions by European governments in response to the sovereign debt crisis may not be sufficient to prevent the crisis from spreading or to prevent departure of one or more member countries from the common currency. The default or departure of any one or more countries from the euro could have unpredictable consequences on the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks is limited.</li> <li>Deutsche Bank has a continuous demand for liquidity to fund its business activities, and may be limited in its ability to access the capital markets for liquidity and to fund assets in the current market environment. In addition, the Bank may suffer during periods of market-wide or firm specific liquidity constraints, and liquidity may not be available to it even if the Bank's underlying business remains strong.</li> <li>Regulatory reforms enacted and proposed in response to the persistent weaknesses in the financial sector, together with increased regulatory scrutiny more generally, will require Deutsche Bank to maintain increased capital and may significantly affect Deutsche Bank's business model and the competitive environment. Any perceptions in the market that Deutsche Bank may be unable to meet its capital requirements with an adequate buffer, or that Deutsche Bank should maintain capital in excess of the requirements, could intensify the effect of these factors on the Bank's business and results.</li> <li>Adverse market conditions, historically low prices and volatility have affected and may in the future materially and adversely affect Deutsche Bank's revenues and profits, particularly in its investment banking, brokerage and other commission and fee-based businesses. As a result, Deutsche Bank has incurred and may in the future continue to incur significant losses from its trading and investment activities.</li> </ul>

	<ul style="list-style-type: none"> <li>• In order to address concerns about recent market and regulatory developments in addition to greatly increased costs of risk, Deutsche Bank has recently announced its Strategy 2015+. D.3	Key information on the key risks that are specific to the securities	<p>The Securities may not be a suitable investment for all investors. Each potential investor in the Securities must determine the suitability of that investment in light of its own circumstances.</p> <p><b>Interest Rate Risk:</b></p> <p>The Securities will pay a fixed amount of interest on specified interest payment dates. Investors who purchase Securities with a fixed rate of interest are exposed to the risk that market interest rates rise and the fixed amount of interest they receive is less than the amount they would have received had they invested in a Security with a floating rate of interest. The market value of Securities with a fixed rate of interest will decrease if potential investors perceive that they can achieve a greater return on an investment by investing in alternative products.</p>
		<p><b>Resolutions of Holders:</b> The Terms and Conditions of the Notes provide that the Holders may agree to amendments to the Terms and Conditions by majority vote. A Holder is therefore subject to the risk to be outvoted and to lose rights towards the Issuer against its will. In addition, the Terms and Conditions provide the possibility to appoint a joint representative for all Holders. If such representative is appointed a Holder may lose, in whole or in part, the possibility to enforce and claim rights against the Issuer irrespective of the other Holders.</p> <p><b>Taxation:</b> Potential purchasers and sellers of Securities should be aware that they may be required to pay stamp taxes or other documentary charges in accordance with the laws and practices of the country where the Securities are transferred and/or any asset(s) are delivered.</p> <p><b>No Tax Gross-Up:</b> The Issuer is not obliged to gross up any payments in respect of the Securities and will not be liable for or otherwise obliged to pay any tax, duty, withholding or other payment which may arise as a result of the ownership, transfer, presentation and surrender for payment, or enforcement of any Security and all payments made by the Issuer will be made subject to any such tax, duty, withholding or other payment which may be required to be made, paid, withheld or deducted.</p> <p><b>Currency and Exchange Control Risks:</b> A Holder of Securities denominated in a foreign currency is exposed to the risk of changes in currency exchange rates which may affect the yield of such Securities. Government and monetary authorities may impose (as some have done in the past) exchange controls that could adversely affect an applicable exchange rate.</p> <p><b>Potential U.S. Withholding Tax after 31 December 2016:</b> The Issuer may be required to withhold U.S. pursuant to the foreign account provisions of the U.S. Foreign Account Tax Compliance Act of 2010 (FATCA).</p> <p><b>Liquidity risk:</b> There can be no assurance that a liquid secondary market for the Securities will develop or, if it does develop, that it will continue. In an illiquid market, an investor might not be able to sell its Securities at any time at fair market prices. The possibility to sell the Securities might additionally be restricted by country specific reasons.</p> <p><b>Market Price Risk:</b> The Holders are exposed to the risk of an unfavourable development of market prices of their Securities which materialises if the Holders sell the Securities prior to the final maturity of such Securities.</p>

		<p><b>Credit ratings may not reflect all risks:</b> One or more independent credit rating agencies may assign credit ratings to the Securities. Where a Series of Securities is rated, such rating will not necessarily be the same as the rating assigned to the Securities to be issued under the Programme. The ratings may not reflect the potential impact of all risks related to structure, market, additional factors discussed above, and other factors that may affect the value of the Securities.</p> <p><b>Legal investment considerations may restrict certain investments:</b> The investment activities of certain investors are subject to legal investment laws and regulations, or review or regulation by certain authorities. Each potential investor should consult its legal advisers to determine whether and to what extent (a) Securities are legal investments for it, (b) Securities can be used as collateral for various types of borrowing and (c) other restrictions apply to its purchase or pledge of any Securities. Financial institutions should consult their legal advisers or the appropriate regulators to determine the appropriate treatment of Securities under any applicable risk-based capital or similar rules.</p>
