		Section D – Risks
D.2	Key Risks Specific to the Issuer:	There are certain factors that may affect the Issuer's ability to fulfil its obligations under Notes issued under the Programme. These include financial risk (liquidity, interest rate, foreign exchange and counterparty risks) and credit risk. The operating results and financial condition of RCI Banque are heavily

	<p>dependent on Renault's corporate strategy and the sales of Renault-Nissan Alliance branded vehicles. Conditions in the global economy and financial markets, and in particular in the European economy and financial markets, have had, and may continue to have, an impact on the financial condition and operating results of RCI Banque. Market access may be affected by the credit ratings of the RCI Banque group and, to a certain extent, the Renault Group. A disruption in RCI Banque's funding sources and access to the capital markets would have an adverse effect on the liquidity position of RCI Banque. If the risk management techniques are insufficient to protect RCI Banque from payment failure by customers and dealers, RCI Banque is exposed to credit risk of such counterparties. Market interest rates may adversely affect the operating results of RCI Banque. A decrease in the residual values of RCI Banque's leased vehicles could negatively affect the operating results and financial condition of RCI Banque. Legislative action and regulatory measures may negatively affect RCI Banque and the economic environment in which RCI Banque operates. It may prove difficult to execute and integrate the international growth strategy of RCI Banque. RCI Banque may be vulnerable to political, macroeconomic, regulatory and financial environments or circumstances specific to the countries where RCI Banque does business. An interruption in the information and operational systems of RCI Banque may result in losses. In the event that RCI Banque is unable to compete successfully or if competition increases in the businesses in which RCI Banque operates, operating results could be negatively affected. RCI Banque is subject to extensive supervisory and regulatory regimes in France and in the many countries around the world in which the RCI Banque group operates. Regulatory actions and changes in these regulatory regimes could adversely affect the business and results of RCI Banque. Losses may be incurred as a result of unforeseen or catastrophic events, including natural disasters, terrorist attacks or the emergence of a pandemic. The profitability and business prospects could be adversely affected by reputational and legal risks.</p>
D.3 Key Risks Specific to the Notes:	<p>There are certain factors which are material for the purpose of assessing the market risks associated with Notes issued under the Programme. These include financial risk (liquidity, interest rate, foreign exchange and counterparty risks) and credit risk.</p>
	<p>In addition, there are certain risks associated with the structure of a particular issue of Notes. Investment in Floating Rate Notes involves the risk that subsequent changes in market interest rates may adversely affect the value of the Notes.</p>
	<p>There are certain factors which are material for the purpose of assessing general risks associated with Notes issued under the</p>

		Programme, for example risks related to redemption, taxation, U.S. Foreign Account Tax Compliance Withholding or EU Savings Directive on the taxation of saving income.
D.6	Risk Warning:	<p>See item D.3 for the key information that are specific to the Notes.</p> <p><i>WARNING: INVESTORS IN NOTES CONSTITUTING DERIVATIVE SECURITIES UNDER REGULATION EC/809/2004, AS AMENDED, MAY LOSE THE VALUE OF THEIR ENTIRE INVESTMENT OR PART OF IT.</i></p>
