

ABENGOA

Abengoa Greenfield, S.A.

€265,000,000 5.50% Senior Notes due 2019

\$300,000,000 6.50% Senior Notes due 2019

Guaranteed on a senior basis by Abengoa, S.A. and certain of its subsidiaries

Abengoa Greenfield, S.A., incorporated as a limited company (*sociedad anónima unipersonal*) under the laws of Spain (the "Issuer"), offered (the "Offering") €265 million aggregate principal amount of its fully and unconditionally guaranteed 5.50% Senior Notes due 2019 (the "Euro Notes") and \$300 million aggregate principal amount of its fully and unconditionally guaranteed 6.50% Senior Notes due 2019 (the "U.S. Dollar Notes", and together with the Euro Notes, the "Notes"). The Euro Notes were issued under an indenture dated September 30, 2014 (the "Euro Indenture") among the Issuer, Abengoa, S.A., incorporated as a public limited company (*sociedad anónima*) under the laws of Spain ("Abengoa" or the "Parent Guarantor"), the Subsidiary Guarantors (as defined below), Deutsche Trustee Company Limited, as trustee (the "Trustee"), Deutsche Bank AG, London Branch as paying agent (the "Euro Notes Paying Agent") and the other parties party thereto. The U.S. Dollar Notes were issued under an Indenture dated September 30, 2014 (the "U.S. Dollar Notes Indenture", and together with the Euro Indenture, the "Indentures", and each an "Indenture") among the Issuer, the Parent Guarantor, the Subsidiary Guarantors (as defined below), the Trustee, Deutsche Bank Trust Company Americas as registrar and paying agent (the "U.S. Dollar Notes Paying Agent" and together with the Euro Notes Paying Agent, the "Paying Agents" and each a "Paying Agent") and the other parties thereto. The Issuer will pay interest on the Euro Notes and the U.S. Dollar Notes semi-annually on each October 1 and April 1, starting on April 1, 2015.

The Issuer may redeem all or part of the Notes at any time at a redemption price equal to 100% of the principal amount of the Notes plus the applicable "make-whole" premium described in this Listing Memorandum. In the event of certain developments affecting taxation, the Issuer may redeem all, but not less than all, of the Notes at a price equal to 100% of the principal amount of the Notes. If we undergo a change of control or sell certain of our assets, we may be required to make an offer to purchase the Notes.

The Notes are senior debt of the Issuer and rank *pari passu* in right of payment to all of the Issuer's existing and future senior indebtedness. The Notes initially are guaranteed on a senior basis (the "Note Guarantees") by the Parent Guarantor and certain of its subsidiaries (the "Subsidiary Guarantors" and, together with the Parent Guarantor, the "Guarantors"). If the Issuer fails to make payments on the Notes as required under the Indenture, the Guarantors are obligated under the Indenture to make such payments.

The Note Guarantees rank *pari passu* in right of payment with all of the Guarantors' existing and future senior indebtedness and senior to all of the Guarantors' existing and future subordinated indebtedness. The Notes and the Note Guarantees are effectively subordinated to all of the Issuer's and the Guarantors' secured indebtedness, to the extent of the value of the assets securing such indebtedness, and to any preferential obligations under applicable law. The Notes are structurally subordinated to all existing and future liabilities (including trade payables) of the Parent Guarantor's subsidiaries that do not guarantee the Notes.

Application has been made to admit the Notes to the official list of the Luxembourg Stock Exchange (the "Official List of the Luxembourg Stock Exchange") and admitted to trading on the Luxembourg Stock Exchange's Euro MTF Market (the "Euro MTF Market"). The Euro MTF Market is not a regulated market for the purposes of Directive 2004/39/EC of the European Parliament and of the Council on markets in financial instruments. References in this Listing Memorandum to the Notes being "listed" and all related references shall mean that the Notes have been admitted to the Official List of the Luxembourg Stock Exchange and admitted to trading on the Euro MTF Market.

Investing in the Notes involves a high degree of risk. See "Risk Factors" beginning on page 36.

Prospective investors should note that the Issuer is incorporated and tax-resident in Spain. Any income derived by owners of a beneficial interest in the Notes (each, a "Noteholder") that are not resident in Spain for tax purposes from interest on, or income from the redemption or repayment of, the Notes are not be subject to Spain Non-Resident Income Tax, which may be imposed by way of withholding, provided that the Issuer receives certain information in a timely manner from the Paying Agents, as required in order to comply with Spanish tax laws and regulations (in particular, with the provisions of Royal Decree 1065/2007, as amended, and provided that the Notes are admitted to the Official List of the Luxembourg Stock Exchange and trading on the Euro MTF Market (or on any other organized market in an OECD country) on the relevant payment date. In the event a payment in respect of the Notes is subject to Spanish withholding tax, the Issuer (or the Guarantors, as the case may be) will pay additional amounts as necessary so that the net amount received by the holders of the Notes after such deduction or withholding is not less than the amount that they would have received in the absence of such deduction or withholding, subject to certain exceptions described in "Description of the Notes—Additional Amounts." See "Taxation—Spanish Tax Considerations" and, for a description of the risks associated with the taxation of the Notes, see "Risk Factors—Risks Related to Certain Taxation Matters—Risks related to the Spanish withholding tax regime."

Price of the Euro Notes: 100% plus accrued interest, if any, from the Issue Date.
Price of the U.S. Dollar Notes: 100% plus accrued interest, if any, from the Issue Date.

Delivery of (i) the U.S. Dollar Notes in book-entry form through Depository Trust Company ("DTC") was made on September 30, 2014 and (ii) the Euro Notes in book-entry form through Euroclear Bank SA/NV ("Euroclear") and Clearstream Banking, société anonyme, Luxembourg ("Clearstream") was made on September 30, 2014.

The Notes and the Note Guarantees have not been, and will not be, registered under the U.S. Securities Act of 1933, as amended (the "U.S. Securities Act"). The Notes and the Note Guarantees may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons, except to qualified institutional buyers in reliance on the exemption from registration provided by Rule 144A under the U.S. Securities Act ("Rule 144A") and to certain non-U.S. persons outside the United States in offshore transactions in reliance on Regulation S under the U.S. Securities Act ("Regulation S"). You are hereby notified that sellers of the Notes and the Note Guarantees may be relying on the exemption from the provisions of Section 5 of the U.S. Securities Act provided by Rule 144A. See "Notice to Certain Investors" for additional information about eligible offerees and transfer restrictions.

IMPORTANT INFORMATION ABOUT THIS LISTING MEMORANDUM

This Listing Memorandum constitutes a prospectus for the purposes of the Luxembourg Act dated July 10, 2005 relating to prospectuses for securities (as amended). This document does not constitute a prospectus for the purposes of Article 3 of Directive 2003/71/EC, as amended, and may only be used for the purposes for which it has been published.

We have made all reasonable inquiries and we confirm that this Listing Memorandum contains all information with respect to us and our Group, the Notes and the Note Guarantees that is material in the context of the issue and offering of the Notes, that the information contained herein is true and accurate in all material respects and is not misleading in any material respect, that the opinions and intentions expressed herein are honestly held and have been reached after considering all relevant circumstances and are based on reasonable assumptions, that there are no other facts, the omission of which would, in the context of the issue and offering of the Notes, make this Listing Memorandum as a whole or any such information or the expression of any such opinions or intentions misleading in any material respect, and that all reasonable inquiries have been made by us to verify the accuracy of such information. We accept responsibility for the information contained in this Listing Memorandum accordingly.

This Listing Memorandum does not constitute an offer of, or an invitation by or on behalf of, the Issuer or the Guarantors or HSBC Bank plc, Merrill Lynch International, Crédit Agricole Corporate and Investment Bank, Natixis, Banco Santander, S.A. or Société Générale, respectively, for the Euro Notes, or Merrill Lynch, Pierce, Fenner & Smith Incorporated, HSBC Securities (USA) Inc., Crédit Agricole Corporate and Investment Bank, Natixis Securities Americas LLC, Santander Investment Securities Inc. or Société Générale, respectively, for the U.S. Dollar Notes (the "**Initial Purchasers**") to subscribe for or purchase any of the Notes. The distribution of this Listing Memorandum and/or the Offering in certain jurisdictions may be restricted by law. Persons into whose possession this Listing Memorandum comes are required by the Issuer, the Guarantors and the Initial Purchasers to inform themselves about and to observe any such restrictions. For a description of certain further restrictions on offers and sales of the Notes and distribution of this Listing Memorandum, see "*Subscription and Sale*" and "*Notice to Certain Investors*" herein.

We have prepared this Listing Memorandum based on information obtained from sources we believe to be reliable. None of the Initial Purchasers, the Trustee, the Listing Agent, Paying Agent, Transfer Agent or Registrar represents that the information herein is complete. The information in this Listing Memorandum is current only as of the date on the cover, and our business or financial condition and other information in this Listing Memorandum may change after that date. You should consult your own legal, tax and business advisors regarding an investment in the Notes. Information in this Listing Memorandum is not legal, tax or business advice.

You should base your decision to invest in the Notes solely on information contained in this Listing Memorandum. Neither we nor the Initial Purchasers have authorized anyone to provide you with any other information than that contained in this Listing Memorandum and the documents which are made available for inspection to the public.

The language of this Listing Memorandum is English. Certain legislative references and technical terms have been cited in their original languages in order that the correct technical meaning may be ascribed to them under applicable law.

We offered the Notes, and the Guarantors issued the Note Guarantees, in reliance on an exemption from registration under the U.S. Securities Act for an offer and sale of securities that does not involve a public offering. If you purchase the Notes, you will be deemed to have made certain acknowledgments, representations and warranties as detailed under "*Notice to Certain Investors*." You may be required to bear the financial risk of an investment in the Notes for an indefinite period. Neither we nor the Initial Purchasers made an offer to sell the Notes in any jurisdiction where the offer and sale of the Notes is prohibited. We do

not make any representation to you that the Notes are a legal investment for you. No action has been, or will be, taken to permit a public offering in any jurisdiction where action would be required for that purpose.

The Notes and the Note Guarantees have not been registered under the U.S. Securities Act or any state securities laws and, unless so registered, may not be offered or sold within the United States or to, or for the account or benefit of, a U.S. person except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws.

Each prospective purchaser of the Notes must comply with all applicable laws and rules and regulations in force in any jurisdiction in which it purchases, offers or sells the Notes and must obtain any consent, approval or permission required by it for the purchase, offer or sale by it of the Notes under the laws and regulations in force in any jurisdiction to which it is subject or in which it makes such purchases, offers or sales, and neither we nor the Initial Purchasers shall have any responsibility therefor.

Neither the U.S. Securities and Exchange Commission (the "**SEC**"), nor any U.S. state securities commission nor any non-U.S. securities authority nor other authority has approved or disapproved of the Notes or determined if this Listing Memorandum is truthful or complete. Any representation to the contrary is a criminal offense.

We have prepared this Listing Memorandum solely for use in connection with the listing of the Notes on the Luxembourg Stock Exchange Euro MTF Market. This Listing Memorandum may only be used for the purpose for which it has been published.

The information contained under the caption "*Exchange Rate Information*" includes extracts from information and data publicly released by official and other sources. This information has been accurately reproduced and, as far as we are aware and are able to ascertain from the information published by such third parties, no facts have been omitted which would render the reproduced information inaccurate or misleading. The information set out in those sections of the Listing Memorandum describing clearing and settlement is subject to any change or reinterpretation of the rules, regulations and procedures of Euroclear, Clearstream and DTC as currently in effect. Investors wishing to use the clearing systems are advised to confirm the continued applicability of their rules, regulations and procedures. We will not have any responsibility or liability for any aspect of the records relating to, or payments made on account of, book-entry interests held through the facilities of any clearing system or for maintaining, supervising or reviewing any records relating to such book-entry interests. Although this Listing Memorandum contains references to our website, the information on our website is not incorporated in whole or in part in the Listing Memorandum and should not be considered a part of the Listing Memorandum.

The Euro Notes were initially issued in the form of global notes and deposited with a common depository and registered in the name of the nominee of the common depository for the accounts of Euroclear and Clearstream and registered in the name of the nominee for the common depository. Beneficial interests in the global notes will be shown on, and transfers of beneficial interests in the global notes will be effected only through, records maintained by Euroclear and Clearstream or their respective participants. The U.S. Dollar Notes will initially be issued in the form of global notes and will be deposited with, or on behalf of, a custodian for DTC. Beneficial interests in the global notes will be shown on, and transfers of beneficial interests in the global notes will be effected only through, records maintained by DTC and its participants. See "*Book-Entry, Delivery and Form.*"

We will not, nor will any of our agents, have responsibility for the performance of the obligations of Euroclear, Clearstream and DTC or their respective participants under the rules and procedures governing their operations, nor will we or our agents have any responsibility or liability for any aspect of the records relating to, or payments made on account of, book-entry interests held through the facilities of any clearing system or for maintaining, supervising or reviewing any records relating to these book-entry interests. Investors wishing to use these clearing systems are advised to confirm the continued applicability of their rules, regulations and procedures. The Notes are subject to restrictions on transferability and resale and may

not be transferred or resold except as permitted under the U.S. Securities Act and applicable securities laws of any other jurisdiction pursuant to registration or exemption therefrom. Prospective purchasers should be aware that they may be required to bear the financial risks of this investment for an indefinite period of time. See *"Notice to Certain Investors."*

WE HAVE PREPARED THIS LISTING MEMORANDUM SOLELY FOR USE IN CONNECTION WITH THE LISTING OF THE NOTES AND TAKE RESPONSIBILITY FOR ITS CONTENTS. NO OTHER PERSON, INCLUDING ANY OF THE INITIAL PURCHASERS OF THE NOTES, IS RESPONSIBLE FOR ITS CONTENTS, THE NOTES WERE ORIGINALLY SOLD THROUGH AN OFFERING MEMORANDUM DATED SEPTEMBER 24, 2014.

NOTICE TO NEW HAMPSHIRE RESIDENTS

NEITHER THE FACT THAT A REGISTRATION STATEMENT OR AN APPLICATION FOR A LICENSE HAS BEEN FILED UNDER CHAPTER 421-B OF THE NEW HAMPSHIRE REVISED STATUTES ("RSA 421-B") WITH THE STATE OF NEW HAMPSHIRE NOR THE FACT THAT A SECURITY IS EFFECTIVELY REGISTERED OR A PERSON IS LICENSED IN THE STATE OF NEW HAMPSHIRE CONSTITUTES A FINDING BY THE SECRETARY OF STATE OF THE STATE OF NEW HAMPSHIRE THAT ANY DOCUMENT FILED UNDER RSA 421-B IS TRUE, COMPLETE AND NOT MISLEADING. NEITHER ANY SUCH FACT NOR THE FACT THAT AN EXEMPTION OR EXCEPTION IS AVAILABLE FOR A SECURITY OR A TRANSACTION MEANS THAT THE SECRETARY OF STATE OF THE STATE OF NEW HAMPSHIRE HAS PASSED IN ANY WAY UPON THE MERITS OR QUALIFICATIONS OF, OR RECOMMENDED OR GIVEN APPROVAL TO, ANY PERSON, SECURITY OR TRANSACTION. IT IS UNLAWFUL TO MAKE, OR CAUSE TO BE MADE, TO ANY PROSPECTIVE PURCHASER, CUSTOMER OR CLIENT ANY REPRESENTATION INCONSISTENT WITH THE PROVISIONS OF THIS PARAGRAPH.

NOTICE TO INVESTORS

European Economic Area. This Listing Memorandum has been prepared on the basis that any offer of the Notes in any Member State of the European Economic Area (“**EEA**”) which has implemented the Prospectus Directive (each, a “**Relevant Member State**”) will be made pursuant to an exemption under the Prospectus Directive from the requirement to publish a prospectus for offers of the Notes. Accordingly, any person making or intending to make any offer in that Relevant Member State of the Notes which are subject of the offering contemplated in this Listing Memorandum, may only do so in circumstances in which no obligation arises for us or the Initial Purchasers to publish a prospectus pursuant to Article 3 of the Prospectus Directive or supplement a prospectus pursuant to Article 16 of the Prospectus Directive, in each case in relation to such offer. Neither we nor the Initial Purchasers have authorized, nor do they authorize, the making of any offer of Notes in circumstances in which an obligation arises for us or the Initial Purchasers to publish or supplement a prospectus for such offer. Neither we nor the Initial Purchasers have authorized, nor do we authorize, the making of any offer of Notes through any financial intermediary, other than offers made by the Initial Purchasers, which constitute the final placement of the Notes contemplated in this Listing Memorandum. The expression “Prospectus Directive” means Directive 2003/71/EC (and amendments thereto, including the 2010 PD Amending Directive, to the extent implemented in the Relevant Member State), and includes any relevant implementing measure in the Relevant Member State and the expression “2010 Amending Directive” means Directive 2010/73/EU.

Spain. The Offering has not been and will not be registered with the CNMV and therefore the Notes may not be offered or sold or distributed in Spain except in circumstances which do not qualify as a public offer of the Notes in Spain in accordance with article 30 bis of the Spanish Securities Market Act as amended and restated, or pursuant to an exemption from registration in accordance with article 41 of the Royal Decree 1310/2005 (*Real Decreto 1310/2005, de 4 de noviembre, por el que se desarrolla parcialmente la Ley 24/1988, de 28 de julio, del Mercado de Valores, en materia de admisión a negociación de valores en mercados secundarios oficiales, de ofertas públicas de venta o suscripción y del folleto exigible a tales efectos*).

Switzerland. This Listing Memorandum is not intended to constitute an offer or solicitation to purchase or invest in the Notes described herein. The Notes may not be publicly offered, sold or advertised, directly or indirectly, in, into or from Switzerland and will not be listed on the SIX Swiss Exchange or on any other exchange or regulated trading facility in Switzerland. Neither this Listing Memorandum nor any other offering or marketing material relating to the Notes constitutes a prospectus as such term is understood pursuant to article 652a or article 1156 of the Swiss Code of Obligations or a listing prospectus within the meaning of the listing rules of the SIX Swiss Exchange or any other regulated trading facility in Switzerland, and neither this Listing Memorandum nor any other offering or marketing material relating to the Notes may be publicly distributed or otherwise made publicly available in Switzerland.

United Kingdom. This Listing Memorandum is for distribution only to persons who: (i) have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005, (as amended, the “**Financial Promotion Order**”); (ii) are persons falling within Article 49(2)(a) to (d) (“high net worth companies, unincorporated associations, etc.”) of the Financial Promotion Order; (iii) are outside the United Kingdom; or (iv) are persons to whom an invitation or inducement to engage in investment activity (within the meaning of section 21 of the Financial Services and Markets Act 2000) in connection with the issue or sale of any Notes may otherwise lawfully be communicated or caused to be communicated (all such persons together being referred to as “relevant persons”). This Listing Memorandum is directed only at relevant persons and must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this Listing Memorandum relates is available only to relevant persons and will be engaged in only with relevant persons.

Hong Kong. This document has not been and will not be registered with the Registrar of Companies in Hong Kong. The Notes and Note Guarantees may not be offered or sold in Hong Kong by means of any

document other than: (i) in circumstances which do not constitute an offer to the public within the meaning of the Companies (Winding up and Miscellaneous Provisions) Ordinance (Chapter 32 of the Laws of Hong Kong) , and in which the issue or possession of this document does not constitute an offence under section 103(1) of the Securities of Futures Ordinance (Chapter 571 of the Laws of Hong Kong); or (ii) to “professional investors” within the meaning of the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong) and any rules made thereunder; or (iii) in other circumstances which do not result in the document being a “prospectus” within the meaning of the Companies (Winding up and Miscellaneous Provisions) Ordinance (Chapter 32 of the Laws of Hong Kong), and no advertisement, invitation or document relating to the Notes may be issued or may be in the possession of any person for the purpose of issue (in each case whether in Hong Kong or elsewhere), which is directed at, or the contents of which are likely to be accessed or read by, the public in Hong Kong (except if permitted to do so under the laws of Hong Kong) other than with respect to notes or other securities which are or are intended to be disposed of (i) only to persons outside Hong Kong; or (ii) only to “professional investors” within the meaning of the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong) and any rules made thereunder.

Japan. The Notes and Note Guarantees have not been and will not be registered under the Financial Instruments and Exchange Law of Japan (the “**Financial Instruments and Exchange Law**”) and the Initial Purchasers have agreed that they will not offer or sell any securities, directly or indirectly, in Japan or to, or for the benefit of, any resident of Japan (which term as used herein means any person resident in Japan, including any corporation or other entity organized under the laws of Japan), or to others for re-offering or resale, directly or indirectly, in Japan or to a resident of Japan, except pursuant to an exemption from the registration requirements of, and otherwise in compliance with, the Financial Instruments and Exchange Law and any other applicable laws, regulations and ministerial guidelines of Japan.

Singapore. This Listing Memorandum has not been and will not be registered as a prospectus with the Monetary Authority of Singapore. Accordingly, this Listing Memorandum and any other document or material in connection with the offer or sale, or invitation for subscription or purchase, of the Notes may not be circulated or distributed, nor may the Notes be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore other than: (i) to an institutional investor under Section 274 of the Securities and Futures Act, Chapter 289 of Singapore (the “**SFA**”); (ii) to a relevant person pursuant to Section 275(1) of the SFA, or any person pursuant to Section 275(1A) of the SFA, and in accordance with the conditions specified in Section 275 of the SFA; or (iii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA.

Where the Notes are subscribed or purchased under Section 275 by a relevant person which is: (a) a corporation (which is not an accredited investor (as defined in Section 4A of the SFA)) the sole business of which is to hold investments and the entire share capital of which is owned by one or more individuals, each of whom is an accredited investor; or (b) a trust (where the trustee is not an accredited investor) whose sole purpose is to hold investments and each beneficiary of the trust is an individual who is an accredited investor, securities (as defined in Section 239(1) of the SFA) of that corporation or the beneficiaries’ rights and interest (howsoever described) in that trust shall not be transferred within six months after that corporation or that trust has acquired the Notes under Section 275 except: (1) to an institutional investor under Section 274 of the SFA or to a relevant person (as defined in Section 275(2) of the SFA), or to any person arising from an offer referred to in Section 275(1A) or Section 276(4)(i)(B) of the SFA; (2) where no consideration is or will be given for the transfer; (3) where the transfer is by operation of law; (4) as specified in Section 276(7) of the SFA; or (5) as specified in Regulation 32 of the Securities and Futures (Other Investments) (Shares and Debentures) Regulations 2005 of Singapore.

In connection with the Offering, the Initial Purchasers are not acting for anyone other than the Issuer and will not be responsible to anyone other than the Issuer for providing the protections afforded to their clients nor for providing advice in relation to the Offering.

The Netherlands. The Notes are not and may not be offered in the Netherlands other than to persons or entities who or which are qualified investors as defined in Section 1:1 of the Dutch Financial Supervision Act (*Wet op het financieel toezicht*) (which incorporates the term “qualified investors” as used in the Prospectus Directive, as amended).”

THIS LISTING MEMORANDUM, INCLUDING ANY DOCUMENTS CONTAINS IMPORTANT INFORMATION WHICH YOU SHOULD READ BEFORE YOU MAKE ANY DECISION WITH RESPECT TO AN INVESTMENT IN THE NOTES.

FORWARD-LOOKING STATEMENTS

This Listing Memorandum includes forward-looking statements within the meaning of securities laws of certain applicable jurisdictions. These forward-looking statements include, but are not limited to, all statements other than statements of historical facts contained in this Listing Memorandum, including, without limitation, those regarding our future financial position and results of operations, our strategy, plans, objectives, goals and targets, future developments in the markets in which we operate or are seeking to operate or anticipated regulatory changes in the markets in which we operate or intend to operate. In some cases, you can identify forward-looking statements by terminology such as “aim,” “anticipate,” “believe,” “continue,” “could,” “estimate,” “expect,” “forecast,” “guidance,” “intend,” “may,” “plan,” “potential,” “predict,” “projected,” “should” or “will” or the negative of such terms or other comparable terminology.

By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that may or may not occur in the future. Forward-looking statements are not guarantees of future performance and are based on numerous assumptions. In addition, expectations or statements with respect to pending transactions which have not yet closed are inherently uncertain. The Parent Guarantor’s, the Subsidiary Guarantors’ and the Group’s actual results of operations, including the Parent Guarantor’s, the Subsidiary Guarantors’ and the Group’s financial condition and liquidity and the development of the markets in which the Parent Guarantor, each Subsidiary Guarantor and each other member of the Group operates, may differ materially from (and be more negative than) the forward-looking statements made in, or suggested by, this Listing Memorandum. Moreover, even if the Parent Guarantor’s, the Subsidiary Guarantors’ and the Group’s results of operations, including the Parent Guarantor’s, the Subsidiary Guarantors’ or the Group’s financial condition and liquidity and the development of the industries in which the Parent Guarantor, each Subsidiary Guarantor and each other member of the Group operates, are consistent with the forward-looking statements contained in this Listing Memorandum, those results or developments may not be indicative of results or developments in subsequent periods. Investors should read the section of this Listing Memorandum entitled “*Risk Factors*” and the description of the business of the Parent Guarantor, the Subsidiary Guarantors and each member of the Group set forth under “*Business*” for a more complete discussion of the factors that could affect the Issuer, the Parent Guarantor, the Subsidiary Guarantors and each member of the Group’s future performance and the markets in which the Parent Guarantor, each Subsidiary Guarantor and each other member of the Group operates. Important risks, uncertainties and other factors that could cause these differences include, but are not limited to:

- Changes in general economic, political, governmental and business conditions globally and in the countries in which Abengoa does business;
- Difficult conditions in the global economy and in the global markets; changes in interest rates;
- Changes in inflation rates; changes in prices, including increases in the cost of energy and oil and other operating costs;
- Decreases in government expenditure budgets and reductions in government subsidies;
- Changes to national and international laws and policies that support renewable energy sources;
- Inability to improve competitiveness of our renewable energy services and products;
- Decline in public acceptance of renewable energy sources;
- Legal challenges to regulations, subsidies and incentives that support renewable energy sources;
- Extensive governmental regulation in a number of different jurisdictions, including stringent environmental regulation;
- Our substantial capital expenditure and research and development requirements;
- Management of exposure to credit, interest rate, exchange rate, supply and commodity price risks;

- The termination or revocation of our operations conducted pursuant to concessions;
- Reliance on third-party contractors and suppliers;
- Acquisitions or investments in joint ventures with third parties;
- Unexpected adjustments and cancellations of our backlog of unfilled orders;
- Inability to obtain new sites and expand existing ones;
- Failure to maintain safe work environments; effects of catastrophes, natural disasters, adverse weather conditions, unexpected geological or other physical conditions, or criminal or terrorist acts at one or more of our plants;
- Insufficient insurance coverage and increases in insurance cost;
- Loss of senior management and key personnel; unauthorized use of our intellectual property and claims of infringement by us of others intellectual property;
- Our substantial indebtedness;
- Our ability to generate cash to service our indebtedness changes in business strategy;
- The subordination of the Notes to the indebtedness and other obligations of our non-guarantor subsidiaries, including our Unrestricted Subsidiaries (as defined in the "*Description of the Notes*");
- Adverse reactions in financial markets related to decisions on spending by the U.S. government; and
- Various other factors, including those factors discussed under "*Risk Factors*" herein.

The Issuer undertakes no obligation to update or revise publicly any forward-looking statements, whether as a result of new information, future events or otherwise, after the date on which the statements are made or to reflect the occurrence of unanticipated events. You should read this Listing Memorandum completely and with the understanding that our actual future results or performance may be materially different from what we expect.

Abengoa has been listed on the Madrid and Barcelona stock exchanges since 1996 and is part of the Ibex-35 Index.

PRESENTATION OF FINANCIAL INFORMATION

The Issuer was incorporated on August 14, 2014 as a direct wholly owned subsidiary of the Parent Guarantor for the purpose of the Offering and to facilitate certain financing activities of the Group. Consequently, no historical financial information relating to the Issuer is available.

We have included and discussed in this Listing Memorandum financial information of the Parent Guarantor and its subsidiaries as of and for the six-month periods ended June 30, 2014 and June 30, 2013 and as of and for the years ended December 31, 2013, 2012 and 2011. Accordingly, all references to “we,” “us,” “our,” “the Group” or “our Group” in respect of historical financial information in this Listing Memorandum are to the Parent Guarantor and its subsidiaries on a consolidated basis.

The selected financial information as of June 30, 2014 and 2013 and for the six-month periods ended June 30, 2014 and June 30, 2013 and as of December 31, 2013 and 2012 and for the years ended December 31, 2013, 2012 and 2011 is derived from, and qualified in its entirety by reference to our Interim Consolidated Financial Statements and our Consolidated Financial Statements, which are prepared in accordance with IFRS as issued by the IASB included elsewhere in this Listing Memorandum. The selected financial information as of December 31, 2011 is derived from, and qualified in its entirety by reference to our consolidated financial statements and related notes for the years ended December 31, 2012, 2011 and 2010 included in the final prospectus for our initial public offering in the United States as filed with the SEC on October 17, 2013.

Certain numerical figures set out in this Listing Memorandum, including financial data presented in millions or thousands and percentages describing market shares, have been subject to rounding adjustments, and, as a result, the totals of the data in this Listing Memorandum may vary slightly from the actual arithmetic totals of such information. Percentages and amounts reflecting changes over time periods relating to financial and other data set forth in the section “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” are calculated using the numerical data in our Consolidated Financial Statements or the tabular presentation of other data (subject to rounding) contained in this Listing Memorandum and not using the numerical data in the narrative description thereof.

Redefinition of Activities and Segments; Creation of Abengoa Yield Segment; New Geographic Reporting

Following the Abengoa Yield Asset Transfer and the Abengoa Yield IPO (each as defined below in “*Summary—Overview*”) changes occurred in the organization of the Group that entailed, among other things, the redefinition of the activities and segments considered by the Group and the redefinition of its decision-making processes. As a result of these changes, and in order to focus our attention on our key markets, we reorganized our three activities to include Abengoa Yield as a new segment within the Concession-Type Infrastructure activity. As a result, we continue to organize our business into the following three activities: Engineering and Construction, Concession-Type Infrastructure and Industrial Production. Each activity is further broken into the following operating reporting segments: Engineering and Construction (which is both an activity and a segment); Transmission, Solar, Water, Co-generation and other, and Abengoa Yield segments within the Concession-Type Infrastructure activity; and Biofuels, within the Industrial Production activity. For the six-month periods ended June 30, 2014 and 2013, we reported our results for Mexico as a part of North America and excluded these results from Latin America to better reflect the geographical segmentation of our business.

Our Abengoa Yield segment consists of assets that were included before in our Solar segment (two Concentrating Solar Power plants in the United States, Solana and Mojave, each with a gross capacity of 280 MW; two Concentrating Solar Power plants in Spain, Solaben 2 and Solaben 3, each with a gross capacity of 50 MW), in our Transmission segment (two lines in Peru, ATN and ATS, spanning a total of 931 miles; three lines in Chile, Quadra 1, Quadra 2 and Palmucho, spanning a total of 87 miles; and an exchangeable preferred equity investment created at the time of the Abengoa Yield IPO in Abengoa

Concessoos Brasil Holding, or ACBH, a subsidiary holding company of Abengoa that is engaged in the development, construction, investment and management of contracted concessions in Brazil, comprised mostly of electric transmission lines) and in our Co-generation and other segment (Abengoa Cogeneracion Tabasco, or ACT, a 300 MW cogeneration plant in Mexico; one on-shore wind farm in Uruguay, Palmatir, with a gross capacity of 50 MW).

Since the beginning of 2014, Engineering and Construction comprises one operating segment, Engineering and Construction (previously, the operating segment of Technology and Other was also included). Since 2014, it is included in the operating segment of Engineering and Construction, in accordance with IFRS 8 (“Operating Segments”).

Application of IFRS 10 and 11

IFRS 10 and 11 came into effect on January 1, 2013 under IFRS as issued by the IASB and were initially applied in the interim consolidated financial statements as of June 30, 2013 included in the final prospectus for our initial public offering in the United States as filed with the SEC on October 17, 2013. The main impacts of the application of the new standards relate to the de-consolidation of companies that do not fulfil the conditions of effective control during the construction phase, now recorded under the equity method, and to the elimination of the proportional consolidation of joint ventures, with the equity method being obligatory for recording our interest in the relevant entities. According to the terms and requirements established in IAS 8 ‘Accounting policies, changes in accounting estimates and errors’, the above standards and amendments were retrospectively applied, recasting the comparison information presented for the year 2012. The above standards and amendments have already been applied in the Consolidated Financial statements as of December 31, 2012, presented in the final prospectus for our initial public offering in the United States and the recasted financial information is included herein. Financial information as of and for the year ended December 31, 2011 has not been recasted according to the transition guidance of IFRS 10. Consequently, the comparative information presented for the year 2011 is not comparable with the more recent periods presented.

Befesa Sale

On June 13, 2013, we entered into a share purchase agreement for the sale of 100% of our shares in our subsidiary Befesa (the “**Befesa Sale**”) to funds advised by Triton Partners (the “**Triton Funds**”). After customary net debt adjustments and subject to certain adjustments, total consideration to us amounted to €620 million which is comprised of €348 million total cash, of which a payment of €331 million was received at closing and deferred compensation of €17 million (including €15 million in escrow pending resolution of ongoing litigation and a €2 million long-term receivable from a Befesa customer), a €48 million subordinated vendor note with a five-year maturity and a €225 million (par value) subordinated convertible instrument with a 15-year maturity (subject to two five-year extensions) accruing interest of 6 month Euribor in effect at closing date plus a 6% spread and which, upon the occurrence of certain triggering events including, but not limited to, Befesa’s failure to meet certain financial targets or the exit of the Triton Funds from Befesa, may be converted into approximately 14% of the shares of Befesa (subject to certain adjustments). The share purchase agreement contains a two-year non-compete provision concerning Befesa’s activities.

On July 15, 2013, we received €331 million of cash proceeds corresponding to the price agreed for the shares and the sale of the transaction was closed. The gain generated by the sale amounted to €0.4 million.

Taking into account the significance of the activities carried out by Befesa to Abengoa, the sale of this shareholding is considered as a discontinued operation in accordance with IFRS 5, Non-Current Assets Held for Sale and Discontinued Operations. In accordance with this standard, the results of Befesa until the closing of the sale and the result of this sale are included under a single heading (profit for the year from discontinued operations, net of tax) in our interim consolidated financial statements for the six months ended June 30, 2013. Likewise, the consolidated income statements for the years ended December 31, 2013, 2012 and

2011 also include the results of Befesa under a single heading. The Befesa Sale also resulted in the removal of the Industrial Recycling segment from our Industrial Production activity.

Non-GAAP Financial Measures

This Listing Memorandum contains non-GAAP financial measures and ratios, including Consolidated EBITDA, Consolidated Adjusted EBITDA, Corporate EBITDA, Corporate Adjusted EBITDA, Gross Corporate Debt, Net Corporate Debt, Ratio of Net Corporate Debt to Corporate EBITDA and constant currency presentation that are not required by, or presented in accordance with, IFRS as issued by the IASB.

- Consolidated EBITDA is calculated as profit for the year from continuing operations, after adding back income tax expense/(benefit), share of (loss)/profit of associates, finance expense net and depreciation, amortization and impairment charges of the Parent Guarantor and its subsidiaries.
- Consolidated Adjusted EBITDA is calculated as Consolidated EBITDA, after adding back research and development costs of the Parent Guarantor and its subsidiaries.
- Corporate EBITDA is calculated as profit for the year from continuing operations, after adding back income tax expense/(benefit), share of (loss)/profit of associates, finance expenses net, depreciation, amortization and impairment charges of the Parent Guarantor and its subsidiaries, less EBITDA from non-recourse activities net of eliminations.
- Corporate Adjusted EBITDA is calculated as Consolidated EBITDA after adding back research and development costs of the Parent Guarantor and its subsidiaries and the effect of changes in accounting policies resulting from IFRS 10 and 11 and change in the application of IFRIC 12, less EBITDA from non-recourse activities net of eliminations.
- Gross Corporate Debt consists of our (i) long-term debt (debt with a maturity of greater than one year) incurred with credit institutions, plus (ii) short-term debt (debt with a maturity of one year or less) incurred with credit institutions, plus (iii) notes, obligations, promissory notes, financial leases and any other such obligations or liabilities, the purpose of which is to provide finance and generate a financial cost for us, plus (iv) obligations relating to guarantees of third-party obligations (other than intra-Group guarantees), but excluding any Non-Recourse Debt.
- Net Corporate Debt consists of Gross Corporate Debt, excluding obligations relating to guarantees of third parties (other than intragroup guarantees), less total cash and cash equivalents (excluding non-recourse cash and cash equivalents), and short-term financial investments at the end of each period (excluding non-recourse short-term financial investments).
- Ratio of Net Corporate Debt to Corporate EBITDA is Net Corporate Debt over Corporate EBITDA.

We present non-GAAP financial measures because we believe that they and other similar measures are widely used by certain investors, securities analysts and other interested parties as supplemental measures of performance and liquidity. The non-GAAP financial measures may not be comparable to other similarly titled measures of other companies and have limitations as analytical tools and should not be considered in isolation or as a substitute for analysis of our operating results as reported under IFRS as issued by the IASB. Non-GAAP financial measures and ratios are not measurements of our performance or liquidity under IFRS as issued by the IASB and should not be considered as alternatives to operating profit or profit for the year or any other performance measures derived in accordance with IFRS as issued by the IASB or any other generally accepted accounting principles or as alternatives to cash flow from operating, investing or financing activities.

Some of the limitations of these non-GAAP measures and ratios are:

- they do not reflect our cash expenditures or future requirements for capital expenditures or contractual commitments;
- they do not reflect changes in, or cash requirements for, our working capital needs;

- they do not reflect the significant interest expense, or the cash requirements necessary, to service interest or principal payments, on our debts;
- although depreciation and amortization are non-cash charges, the assets being depreciated and amortized will often need to be replaced in the future and Consolidated EBITDA does not reflect any cash requirements that would be required for such replacements;
- some of the exceptional items that we eliminate in calculating Consolidated EBITDA and Corporate Adjusted EBITDA reflect cash payments that were made, or will be made in the future; and
- the fact that other companies in our industry may calculate Consolidated EBITDA, Consolidated Adjusted EBITDA, Corporate EBITDA, Corporate Adjusted EBITDA, Gross Corporate Debt and Net Corporate Debt differently than we do, which limits their usefulness as comparative measures.

In our discussion of operating results, we have included foreign exchange impacts in our revenue by providing constant currency revenue growth. The constant currency presentation is a non-GAAP financial measure, which excludes the impact of fluctuations in foreign currency exchange rates. We believe providing constant currency information provides valuable supplemental information regarding our results of operations. We calculate constant currency amounts by converting our current period local currency revenue using the prior period foreign currency average exchange rates and comparing these adjusted amounts to our prior period reported results. This calculation may differ from similarly titled measures used by others and, accordingly, the constant currency presentation is not meant to substitute for recorded amounts presented in conformity with IFRS nor should such amounts be considered in isolation.

Sale of Brazilian Transmission Line Assets

We sold, in two portions pursuant to three share purchase agreements, 100% of certain Brazilian transmission line assets to Transmissão Aliança de Energia Elétrica S.A. ("**TAESA**"), an affiliate of Cemig.

On June 2, 2011, Abengoa Concessões Brasil Holding S.A. ("**Abengoa Concessões**") entered into an agreement with TAESA to sell 50% of its shareholding in a newly formed entity, named União de Transmissoras de Energia Elétrica Holding S.A. ("**UNISA**"), to which Abengoa Concessões contributed 100% of its interests in four project companies that it controls and that hold power transmission line concessions in Brazil. These four project companies are STE—Sul Transmissora de Energia S.A. ("**STE**"), ATE Transmissora de Energia S.A. ("**ATE**"), ATE II Transmissora de Energia S.A. ("**ATE II**") and ATE III Transmissora de Energia S.A. ("**ATE III**"). In addition, on June 2, 2011, Abengoa Concessões and Abengoa Construção Brasil Ltda. entered into an agreement with TAESA to sell 100% of the share capital of NTE Nordeste Transmissora de Energia S.A. ("**NTE**"), another project company that holds a power transmission line concession in Brazil. The sales corresponding to the sale of 100% of the shareholding of NTE and 50% of the shareholding of UNISA are referred to herein as the "**First Cemig Sale**." The First Cemig Sale closed on November 30, 2011 and, accordingly, is fully reflected in our historical audited financial statements as of and for the year ended December 31, 2011.

As consideration for the First Cemig Sale, upon closing we received the equivalent of approximately €479 million in net cash proceeds in Brazilian reais and reduced our net consolidated debt by approximately €642 million on our statement of financial position as of December 31, 2011. For the year ended December 31, 2011, we recorded a net gain from the sale of €45 million reflected in the "Other operating income" line item in our consolidated income statement (€43 million after taxes) resulting from the First Cemig Sale. The share purchase agreements for each of UNISA and NTE in respect of the First Cemig Sale provided for a post-closing price adjustment to be paid following the preparation of the audited financial statements of the relevant project companies taking into account, among other variables, changes in the share capital thereof and any dividends or distributions made between signing and closing. No such adjustments were required to be paid under the terms of the share purchase agreements with respect to the First Cemig Sale.

In addition to the First Cemig Sale, we signed an agreement with TAESA on March 16, 2012 to sell our remaining 50% interest in UNISA, thereby completing the divestment of certain Brazilian transmission line concession assets (STE, ATE, ATE II and ATE III) (the “**Second Cemig Sale,**” and collectively with the First Cemig Sale, the “**Cemig Sales**”). On June 30, 2012, all the conditions necessary to close the transaction were fulfilled, and on July 2, we received €354 million of cash proceeds corresponding to the total price agreed for the shares. The gain from the Second Cemig Sale of €4.5 million is reflected in the “Other operating income” line item in our consolidated income statement for the year ended December 31, 2012. The Second Cemig Sale includes a post-closing adjustment mechanism similar to that described above relating to the First Cemig Sale, and no significant post-closing adjustment was required to be paid.

In the consolidated income statement for the years ended December 31, 2013, 2012 and 2011 included in the Consolidated Financial Statements, the profits and losses of NTE and the four project companies we contributed to UNISA (STE, ATE, ATE II and ATE III) are fully consolidated until November 30, 2011. Following such date through December 31, 2011, we included our 50% share in the profits and losses of UNISA following the proportional consolidation method. In our consolidated income statement for the year ended December 31, 2012, the profits and losses of the four project companies are recorded under the equity method as a result of the retrospective application of IFRS 11 from January 1, 2012 until June 30, 2012, when the Second Cemig Sale closed.

Divestment of Telvent GIT, S.A.

As of December 31, 2010 and during part of the year 2011 we held a 40% shareholding in Telvent GIT, S.A. and its subsidiaries (“**Telvent**”). Despite partially reducing our share ownership in Telvent during 2009 through the sale of 7,768,844 ordinary shares for a total amount of € 119 million, we remained the largest shareholder and our 40% shareholding, along with our control of certain treasury shares held by Telvent, permitted us to exercise *de facto* control over Telvent and therefore Telvent’s financial information was fully consolidated with our consolidated financial statements for the year ended December 31, 2010 and during the period of 2011 in which we had control over Telvent. On June 1, 2011, we announced the sale of our investment in Telvent (the “**Telvent Disposal**”), in which we sold our 40% shareholding in Telvent to Schneider Electric S.A. (“**SE**”). Following the agreement to sell, SE launched a tender offer to acquire all of the remaining Telvent shares at a price of \$40 per share in cash, which valued the business at €1,360 million, or a premium of 36%, to Telvent’s average share price over the previous 90 days prior to the announcement of the offer. On September 5, 2011, following completion of the customary closing conditions and the receipt of regulatory approvals, the transaction was completed. Our cash proceeds from the Telvent Disposal were €391 million and consolidated net debt reduction was €725 million. In addition, we recorded a gain which is included in the €91 million profit from discontinued operations as reflected on our income statement for the year ended December 31, 2011. As a result, taking into account the significance of Telvent to us, Telvent was treated as discontinued operations in accordance with IFRS 5, *Non-Current Assets Held for Sale and Discontinued Operations*, and the results obtained from this sale are included under a single heading, “Profit after tax from discontinued operations,” in the consolidated income statement for the year 2011, together with the results generated by Telvent until the moment of its sale, and the consolidated income statement for 2010 has been recasted to present Telvent as discontinued operations. The Telvent Disposal also resulted in the removal of our Information Technologies segment. See Note 7 to our Consolidated Financial Statements.

Commencement of Operations of Projects

The comparability of our results of operations is significantly influenced by the volume of projects that become operational during a particular year. The number of projects becoming operational and the length of projects under construction significantly impact our revenue and operating profit, as well as our consolidated profit after tax during a particular period, which makes the comparison of periods difficult.

The following table sets forth the principal projects that commenced operations during each of the years ended December 31, 2013, 2012 and 2011, and the first six months of 2014, including the quarter in which operations began.

	<u>Project</u>	<u>2011</u>	<u>2012</u>	<u>2013</u>	<u>2014</u>
Segment					
Transmission . . .	ATN	1st quarter			
	Manaus (Brazil)			1st quarter	
Biofuels	Salamanca (Spain)—Waste to Biofuels plant			2nd quarter	
Water	Tlemcem-Honaine Plant (Algeria)	4th quarter			
	Qingdao (China)			1st quarter	
Solar	Solar Power Plant One (Algeria)	3rd quarter			
	Helioenergy 1 (Spain)	3rd quarter			
	Helioenergy 2 (Spain)		1st quarter		
	Solacor 1 (Spain)		1st quarter		
	Solacor 2 (Spain)		1st quarter		
	Helios 1 (Spain)		2nd quarter		
	Helios 2 (Spain)		3rd quarter		
	Shams (UAE)			1st quarter	
	Solaben 1-6 (Spain)			4th quarter	
Abengoa Yield . . .	Solaben 3 (Spain)		2nd quarter		
	Solaben 2 (Spain)		4th quarter		
	Solana (USA)			4th quarter

CURRENCY PRESENTATION AND DEFINITIONS

In this Listing Memorandum, all references to “euro” or “€” are to the single currency of the participating member states of the European and Monetary Union of the Treaty Establishing the European Community, as amended from time to time, and all references to “U.S. Dollar”, “U.S. \$” and “\$” are to the lawful currency of the United States.

DEFINITIONS

Unless otherwise specified or the context requires otherwise in this Listing Memorandum:

- references to “Abengoa”, “Group”, “we”, “us”, “the Company” and “our” refer to Abengoa, S.A., together with its subsidiaries (including the Subsidiary Guarantors) unless the context otherwise requires;
- references to “Consolidated Financial Statements” refer to the audited consolidated financial statements of Abengoa and its subsidiaries as of December 31, 2013 and 2012 and for each of the years ended December 31, 2013, 2012 and 2011, including the related notes thereto, prepared in accordance with IFRS as issued by the IASB (as such terms are defined herein) and included herein;
- references to “backlog” refer principally to projects, operations and services for which we have signed contracts and in respect of which we have received non-binding commitments from customers or other operations within our Group, where the related revenues are not eliminated in consolidation. Commitments may be in the form of written contracts for specific projects, purchase orders, subscriptions or indications of the amount of time and materials we need to make available for customers’ projects. Our backlog includes expected revenue based on engineering and design specifications that may not be final and could be revised over time, and also includes expected revenue for government and maintenance contracts that may not specify actual monetary amounts for the work to be performed. For these contracts, our backlog is based on an estimate of work to be performed, which is based on our knowledge of our customers’ stated intentions or our historic experience. We do not include in backlog expected future sales from our concession activities, such as energy sales, transmission and water sales or commodity sales. Our definition of backlog may not necessarily be the same as that used by other companies engaged in activities similar to ours. As a result, the amount of our backlog may not be comparable to the backlog reported by such other companies;
- references to the “Befesa Sale” refer to Abengoa’s sale of 100% of Abengoa’s shares in its subsidiary, Befesa Medio Ambiente, S.L.U. (“**Befesa**”), to funds advised by Triton Partners;
- references to the “Cemig Sales” refer to (i) the sale by Abengoa of 100% of the shareholding of NTE Nordeste Transmissora de Energia S.A. (“**NTE**”) and 50% of the shareholding of União de Transmissoras de Energia Elétrica Holding S.A. (“**UNISA**”) to Transmissão Aliança de Energia Elétrica S.A. (“**TAESA**”), an affiliate of Companhia Energetica de Minas Gerais, S.A. (“**Cemig**”), which occurred on November 30, 2011 (the “**First Cemig Sale**”) and (ii) the sale of our remaining 50% interest in UNISA, which occurred on June 30, 2012 (the “**Second Cemig Sale**”), which are described in more detail in Note 6 to our Consolidated Financial Statements;
- references to “Concession-Type Infrastructure” or “Concession-Type Infrastructures activity” refer to the operation by us of assets under long-term arrangements, such as “take or pay” contracts, feed-in and ad hoc tariffs or power or water purchase agreements;
- references to “Corporate Debt” refer to certain indebtedness defined in the “*Corporate Structure and Certain Financing Arrangements*” and includes the Notes, the Credit Facilities, the Existing High Yield Notes and the Existing Convertible Notes;
- references to our “Credit Facilities” refer to loans with financial entities that are corporate indebtedness of the Parent Guarantor and/or certain Restricted Subsidiaries, as described in footnote 2 under “*Corporate Structure and Certain Financing Arrangements*”;
- references to “Engineering and Construction” or our “Engineering and Construction activity” refer to our traditional engineering activities in the energy and water sectors, with more than 70 years of experience in the market and development of thermo-solar technology. Abengoa is specialized in carrying out complex turn-key projects for thermo-solar plants, solar-gas hybrid plants, conventional

generation plants, biofuels plants and water infrastructures, as well as large-scale desalination plants and transmission lines, among others;

- references to “EPC” are to engineering, procurement and construction work;
- references to our “Existing Convertible Notes” refer to certain convertible notes defined in footnote 4 under “*Corporate Structure and Certain Financing Arrangements*”;
- references to the “2010 Forward Start Facility” are to the forward start facility dated April 22, 2010 borrowed by Abengoa and jointly and severally guaranteed on a senior basis by certain companies of the Group and a group of lenders which was fully repaid in July 2013;
- references to our “Existing High Yield Notes” refer to certain high yield notes defined in footnote 3 under “*Corporate Structure and Certain Financing Arrangements*”;
- references to the “Funding Loan” refer to the one or more funding loans the Issuer, as lender, and the Parent Guarantor, as borrower, will enter into upon the issuance of the Notes under one or more funding loan agreements pursuant to which the Issuer will loan to the Parent Guarantor the proceeds from the issuance of the Notes;
- references to the “Guarantors” refer to the Parent Guarantor together with the Subsidiary Guarantors;
- references to “IFRIC 12” refer to International Financial Reporting Interpretations Committee’s Interpretation 12—Service Concessions Arrangements;
- references to “IFRS as issued by the IASB” refer to International Financial Reporting Standards as issued by the International Accounting Standards Board;
- references to “Industrial Production” or our “Industrial Production activity” refer to our traditional activity in the development and production of biofuels and, only until the Befesa Sale, providing a variety of recycling services to industrial customers. The Company holds an important leadership position in these activities in the geographical markets in which it operates;
- references to “Interim Consolidated Financial Statements” refer to the interim unaudited consolidated condensed financial statements of Abengoa and its subsidiaries as of June 30, 2014 and for the six month periods ended June 30, 2014 and June 30, 2013 prepared in accordance with IFRS as issued by the IASB (as such terms are defined herein);
- references to the “Issue Date” refer to September 30, 2014;
- references to the “Issuer” refer to Abengoa Greenfield, S.A.;
- references to the “Listing” or the “listing” refer to the listing of the Notes pursuant to this Listing Memorandum;
- references to the “Listing Memorandum” refer to this Listing Memorandum related to the Notes;
- references to “Non-Recourse Debt” refer to certain of our projects and significant investments, including capital expenditures typically relating to concessions or fixed tariff take-or-pay agreements, primarily under loan agreements and related documents which require the loans to be repaid solely from the revenue of the project being financed thereby and provide that the repayment of the loans (and interest thereon) is secured solely by the shares, physical assets, contracts and cash flow of that project company. Non-Recourse Debt also includes certain obligations guaranteed by the Parent Guarantor or Restricted Subsidiaries in favor of our Unrestricted Subsidiaries and categorized as “non-recourse finance in process”, whereby the Parent Guarantor and/or Restricted Subsidiaries guarantee obligations in order to act as sponsors for the period prior to such project companies securing long-term project financing (typically periods of less than 2-3 years). Non-recourse finance in process will typically relate to bank financing arrangements, but may also include capital markets debt

(such as the Notes and Guarantees, which the Parent Guarantor does not intend to classify as Non-Recourse Debt on issuance but which the Parent Guarantor may reclassify in the future) if such indebtedness is, or is expected to be, recorded as “non-recourse financing” in the Parent Guarantor’s consolidated annual accounts. Although our classification of non-recourse finance in process as Non-Recourse Debt is in compliance with IFRS guidelines, we have discretion, within applicable IFRS guidelines, to reclassify this type of indebtedness. See Note 19.6 of our Consolidated Financial Statements for further details. See “*Management’s Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Non Recourse Debt*” for a full description;

- references to “non-recourse subsidiaries” refer to our subsidiaries through which we engage in projects involving the design, construction, financing, operation and maintenance of large scale, complex operational assets or infrastructures, which are either owned by such subsidiaries or held under concession for a period of time. The projects undertaken by these non-recourse subsidiaries are initially financed through medium-term bridge loans and later by non-recourse project finance. The assets and liabilities, results of operations, and cash flows of our non-recourse subsidiaries are consolidated in our Consolidated Financial Statements and our Interim Consolidated Financial Statements;
- references to the “Note Guarantees” refer to the guarantees related to the Notes unless the context otherwise requires;
- references to “Notes” are to (i) the \$300 million aggregate principal amount of 6.50% Senior U.S. Dollar Notes due 2019 and (ii) the €265 million aggregate principal amount of 5.50% Senior Euro Notes due 2019;
- references to the “2018 Notes” are to the €550 million aggregate principal amount of the Abengoa Finance S.A.U.’s 8.875% Senior Notes due 2018 issued under an indenture dated as of February 5, 2013 (of which €250 million principal amount was issued on February 5, 2013, €250 million principal amount was issued on October 3, 2013 and €50 million principal amount was issued on November 5, 2013);
- references to the “2020 Notes” are to the \$450 million aggregate principal amount of the Abengoa Finance S.A.U.’s 7.75% Senior Notes due 2020 issued under an indenture dated as of December 13, 2013;
- references to the “2021 Notes” are to the €500 million aggregate principal amount of Abengoa Finance S.A.U.’s 6.00% Senior Notes due 2021 issued under an indenture dated as of March 27, 2014;
- references to “OECD” refer to the Organization of Economic Co-operation and Development, an international organization of 34 member countries consisting of advanced economies;
- references to the “Offering” or the “offering” refer to the offering of the Notes pursuant to this Listing Memorandum;
- references to the “Offering” or the “offering” refer to the offering of the Notes pursuant to the offering memorandum dated September 30, 2014;
- references to the “Parent Guarantor” refer to Abengoa, S.A.;
- references to “Plan Two” refer to the variable pay scheme for the senior management approved by the Board of Directors of Abengoa on July 24, 2006 and December 11, 2006;
- references to “Plan Three” refer to the variable pay scheme for directors approved by the Board of Directors of Abengoa on January 24, 2011;

- references to “Plan Four” refer to the variable pay scheme for directors approved by the Board of Directors of Abengoa in December 2013 which replaced Plan Three in December 2013;
- references to “Plan Four+” refer to the variable pay scheme for directors approved by the Board of Directors of Abengoa on July 21, 2014;
- references to “R&D&i” refer to our research and development and innovation;
- references to “Restricted Subsidiaries” refer to certain subsidiaries defined in “*Description of the Notes*”;
- references to our “Subsidiary Guarantors” refer to Abeima Teyma Zapotillo S. de R.L. de C.V., Abeinsa, Ingeniería y Construcción Industrial, S.A., Abencor Suministros, S.A., Abener Energía, S.A., Abengoa Bioenergía, S.A., Abengoa Concessions Investments Limited, Abengoa Construção Brasil Ltda., Abengoa Solar, S.A., Abengoa Bioenergy Company, LLC, Abengoa Bioenergy New Technologies, LLC, Abengoa Bioenergy of Nebraska, LLC, Abengoa Bioenergy Trading Europe B.V., Abengoa México, S.A. de C.V., Abengoa Solar España, S.A., Abengoa Solar New Technologies, S.A., Abener Teyma Hugoton General Partnership, Abener Teyma Mojave General Partnership, Abentel Telecomunicaciones, S.A., Abentey Gerenciamento de Projetos de Engenharia e Construções Ltda., ASA Desulfuración, S.A., ASA Investment Brasil Ltda., Abeinsa Infraestructuras Medio Ambiente, S.A., Bioetanol Galicia, S.A., Centro Morelos 264, S.A. de C.V., Construcciones Metálicas Mexicanas Comemsa, S.A. de C.V., Ecoagrícola, S.A., Europea de Construcciones Metálicas, S.A., Instalaciones Inabensa, S.A., Negocios Industriales y Comerciales, S.A., Nicsamex, S.A. de C.V., Teyma Gestión de Contratos de Construcción e Ingeniería, S.A., Inabensa Rio Ltda., Teyma Internacional, S.A., Teyma USA & Abener Engineering and Construction Services General Partnership and Teyma Uruguay ZF S.A.;

- references to “total net fixed assets” refer to the sum of intangible assets and property, plant and equipment, and fixed assets and projects, net of depreciation, amortization and provisions for impairment charges.

PRESENTATION OF INDUSTRY AND MARKET DATA

In this Listing Memorandum, we rely on, and refer to, information regarding our business and the markets in which we operate and compete. The market data and certain economic and industry data and forecasts used in this Listing Memorandum were obtained from internal surveys, market research, governmental and other publicly available information, independent industry publications and reports prepared by industry consultants. Industry publications, surveys and forecasts generally state that the information contained therein has been obtained from sources believed to be reliable, but that the accuracy and completeness of such information is not guaranteed. We believe that these industry publications, surveys and forecasts are reliable but we have not independently verified them and cannot guarantee their accuracy and completeness.

Certain market share information and other statements presented herein regarding our position relative to our competitors are not based on published statistical data or information obtained from independent third parties, but reflect our best estimates. We have based these estimates upon information obtained from our customers, trade and business organizations and associations and other contacts in the industries in which we operate. The Initial Purchasers do not make any representation or warranty as to the accuracy or completeness of these statements.

Elsewhere in this Listing Memorandum, statements regarding our Engineering and Construction, Concession-Type Infrastructure and Industrial Production activities, our position in the industries and geographies in which we operate, our market share and the market shares of various industry participants are based solely on our experience, our internal studies and estimates, and our own investigation of market conditions.

All of the information set forth in this Listing Memorandum, relating to the operations, financial results or market share of our competitors has been obtained from information made available to the public in such companies' publicly available reports and independent research, as well as from our experience, internal studies, estimates and investigation of market conditions. We have not funded, nor are we affiliated with, any of the sources cited in this Listing Memorandum. Neither we nor the Initial Purchasers have independently verified the information and cannot guarantee its accuracy.

All third-party information, as outlined above, has to our knowledge been accurately reproduced and, as far as we are aware and are able to ascertain, no facts have been omitted which would render the reproduced information inaccurate or misleading.

EXCHANGE RATE INFORMATION

The following table sets forth, for the periods indicated, the Noon Buying Rate certified by the Federal Reserve Bank of New York expressed in U.S. dollar per €1.00. The Noon Buying Rate refers to the exchange for euro, expressed in U.S. dollars per euro, in the City of New York for cable transfers payable in foreign currencies as certified by the Federal Reserve Bank of New York for customs purposes. The rates may differ from the actual rates used in the preparation of the Consolidated Financial Statements and other financial information appearing in this Listing Memorandum. We do not represent that the U.S. dollar amounts referred to below could be or could have been converted into euro at any particular rate indicated or any other rate.

The average rate of the Noon Buying Rate means the average rates for the euro on the last day reported of each month during the relevant period.

The Federal Reserve Bank of New York Noon Buying Rate of the euro on September 12, 2014 was \$1.2955 per €1.00.

	U.S. Dollar per €1.00			
	High	Low	Average	Period End
Year				
2009	1.5100	1.2547	1.3955	1.4332

LISTING MEMORANDUM SUMMARY

This summary highlights selected information contained elsewhere in this Listing Memorandum. This summary does not contain all of the information you should consider before investing in our Notes. Before investing in the Notes, you should read this entire Listing Memorandum carefully for a more complete understanding of our business and the Offering, including the sections entitled "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" and our Consolidated Financial Statements and our Interim Consolidated Financial Statements included elsewhere in this Listing Memorandum.

Overview

We are a leading engineering and clean technology company with operations in more than 50 countries worldwide that provides innovative solutions for a diverse range of customers in the energy and environmental sectors. Over the course of our more than 70-year history, we have developed a unique and integrated business model that applies our accumulated engineering expertise to promoting sustainable development solutions, including delivering new methods for generating power from the sun, developing biofuels, producing drinking water from seawater and efficiently transporting electricity. A cornerstone of our business model has been investment in proprietary technologies, particularly in areas with relatively high barriers to entry. We organise our business into the following three activities: Engineering and Construction, Concession-Type Infrastructure and Industrial Production. Our Engineering and Construction activity provides sophisticated turnkey engineering, procurement and construction ("**EPC**") services from design to implementation for infrastructure projects within the energy and environmental sectors and engages in other related activities with a high technology component. Our Concession-Type Infrastructure activity operates, manages and maintains infrastructure assets, usually pursuant to long-term concession agreements under Build, Own, Operate and Transfer ("**BOOT**") schemes, within five operating segments (Transmission, Solar, Water, Co-generation and other, and Abengoa Yield). Finally, our Industrial Production activity produces a variety of biofuels (ethanol and biodiesel). For the first half of the year 2014, our average number of employees was 28,658 people worldwide across our three business activities. According to industry publications, we are among the market leaders in the majority of our areas of operation.

We apply innovative technology solutions for sustainability through a business model that is respectful of social and environmental surroundings. We are committed to our stakeholders and their expectations, ensuring that our performance contributes to the economic development and social progress of the communities in which we enjoy a presence, while at the same time mitigating impact on the environment.

With this aim in mind, we have strategic and management tools in place to enable the company to set continuous improvement targets as part of a strategy grounded in corporate social responsibility.

We cooperate with external organizations as the UN Global Compact to strengthen our CSR performance and are also annually validated by external certification bodies and auditors that have been recognized in several environmental, social and governance ("**ESG**") indexes, such as FTSE4Good, CDP, Nasdaq Green Economy or ESI Excellence Europe index.

Our three activities are focused in the energy and environmental industries, and integrate operations throughout the value chain, including Research and Development and Innovation ("**R&D&i**"), project development, engineering and construction, and the operation and maintenance of our own assets and those of third parties. Our activities are organized to capitalize on our global presence and scale, as well as to leverage our engineering and technological expertise in order to strengthen our leadership positions.

On June 18, 2014, we completed an initial public offering (the "**Abengoa Yield IPO**") of 28,577,500 ordinary shares of Abengoa Yield plc ("**Abengoa Yield**") at \$29.00 per share. Abengoa Yield is a dividend growth-oriented company formed by Abengoa, S.A. to serve as the primary vehicle through which Abengoa will own, manage and acquire renewable energy, conventional power and electric transmission lines and

other contracted revenue-generating assets, initially focused on North America (the United States and Mexico) and South America (Peru, Chile, Uruguay and Brazil), as well as Europe (Spain). In the future, Abengoa Yield intends to expand this presence to selected countries in Africa and the Middle East. Following the Abengoa Yield IPO, we hold 64% of the ordinary share capital of Abengoa Yield. For the six months ended June 30, 2014, Abengoa Yield has been added as an operating segment under the Concession-Type Infrastructure activity.

In order to facilitate the Abengoa Yield IPO, we contributed or caused a subsidiary to contribute to Abengoa Yield certain assets through a series of concessional asset transfers mostly in the solar, transmission, and cogeneration space ("**Abengoa Yield Asset Transfer**") as described more fully under "*—Recent Developments.*"

We have successfully grown our business, with a compound annual growth rate of our Consolidated EBITDA of 21% from the year ended December 31, 2002 to the year ended December 31, 2013. We have also maintained double digit growth in our consolidated revenue and Consolidated EBITDA on a compound annual growth basis since our 1996 initial public offering on the Madrid and Barcelona stock exchanges. As of September 12, 2014, we had a market capitalization of approximately €3.6 billion. As of June 30, 2014, our backlog was €7,671 million.

Our revenue, Consolidated EBITDA and net fixed assets of the Group and by segment as of and for the six month period ended June 30, 2014 and as of and for the year ended December 31, 2013 are set forth in the following tables. A detailed discussion of the revenue, Consolidated EBITDA and net fixed assets of the Group and by pre-2014 segments may be found under "*Management's Discussion and Analysis of Financial Condition and Results of Operations.*"

	Six months ended June 30, 2014	Year ended December 31, 2013 ⁽¹⁾
	(unaudited)	
	(€ in millions)	
Revenue (total)	3,405.5	7,356.5
Engineering and Construction	2,068.3	4,808.5
Engineering and Construction	2,068.3	4,808.4
Concession-Type Infrastructure	345.9	518.9
Solar	157.6	258.7
Transmission	31.0	47.5
Water	20.6	40.2
Co-generation and other	12.8	37.9
Abengoa Yield	123.9	134.6
Industrial Production	991.3	2,029.1

Abengoa Yield	3,211.3	3,213.7
Industrial Production	2,502.7	2,454.3
Biofuels	2,502.7	2,454.3

(1) The figures presented in this table for the year ended December 31, 2013 have been adjusted on an unaudited basis to conform to our 2014 redefinition of activities and segments, including the creation of the Abengoa Yield segment within our Concession-Type activity and the elimination of the Technology and Other segment from our Engineering and Construction activity.

Our three activities are as follows:

- *Engineering and Construction*

Our Engineering and Construction activity includes one operating segment: Engineering and Construction. We have over 70 years of experience in the Engineering and Construction activity in the energy and environmental sectors. We are responsible for all phases of the engineering and construction cycle, including project identification and development, basic and detailed engineering, construction and operation and maintenance.

In the energy sector, we are dedicated primarily to renewable energy (solar, biofuel and biomass), as well as conventional (co-generation and combined-cycle) power plants and power transmission lines. In 2013, we were recognized by ENR Magazine as the leading international contractor in power transmission and distribution (“**T&D**”) of electricity in terms of revenues, the leading international contractor in power in terms of revenues and the leading international contractor in co-generation and solar in terms of revenues (source: ENR).

Within the environmental sector, we build water infrastructure, desalination and water treatment plants in Europe, the Americas, Africa and Asia. We are among the market leaders in the construction of water desalination plants through our projects in Algeria, China, India, Ghana and Spain.

- *Concession-Type Infrastructure*

By leveraging the expertise we have gained over the years in our Engineering and Construction activity and by selectively developing proprietary technologies, we have developed a portfolio of investments in concession-type infrastructure in the energy and environmental sectors where we seek to achieve attractive returns. Many such concessions are held pursuant to long-term agreements in which we operate and maintain assets that we initially constructed under BOOT or Build, Own and Operate (“**BOO**”) schemes. There is limited or no demand risk as a result of arrangements such as feed-in and ad hoc tariff regimes, take-or-pay contracts and power or water purchase agreements, which are long-term contracts with utilities or other offtakers for the purchase and sale of the output of our concession assets. We believe our level of revenue visibility in this business to be very high given the nature of our assets, the long-term arrangements under which they are operated, and the number of projects under construction where off-take remuneration is already in place.

Our Concession-Type Infrastructure activity includes five operating segments: Transmission, Solar, Water, Co-generation and other and Abengoa Yield, which operate, respectively, our assets in power transmission, solar power generation (mostly in concentrated solar power technology (“**CSP**”)), water desalination, co-generation and Abengoa Yield operations. In each instance, we typically partner with leading international or local businesses or parastatals, such as E.ON AG (“**E.ON**”), Total S.A., Abu Dhabi Future Energy Company (“**Masdar**”), Centrais Eléctricas Brasileiras S.A. (“**Eletrobrás**”), General Electric Company (“**General Electric**”), Cemig, JGC Corporation, Itochu Corporation and Algérienne des Eaux (Algerian Water Authority). In a typical partnership, we make an equity contribution with our partners and then typically finance the infrastructure through non-recourse project financing.

As of June 30, 2014, the average remaining duration of operation of our concession contract portfolio was 25 years. The capacity of our solar, co-generation and water desalination plants and the scale of our power transmission line networks will increase as projects currently under construction are expected to be completed between 2014 and 2017.

We manage concession assets on five continents as diverse as power transmission lines in Brazil, Chile and Peru, thermo-solar plants in the United States, Spain, South Africa and the United Arab Emirates, desalination plants in India, China, the Middle East and Africa and co-generation plants in Spain and Mexico. We pursue a flexible asset rotation strategy through which we may divest certain assets from time to time on an opportunistic basis, including to Abengoa Yield, to maximize our overall investment returns.

- *Industrial Production*

Our Industrial Production activity includes one operating segment: Biofuels, in which we develop and produce biofuels. These operations are conducted using our own assets and are focused on high growth markets. According to industry publications and our own estimates, we enjoy a leadership position in many of the markets in which we operate.

In terms of capacity, according to Ethanol Producer Magazine and the European Renewable Ethanol Association, our Biofuels segment is currently the European market leader in ethanol production and is one of the top ten producers in the United States (source: Ethanol Producer Magazine, ePure and FO Lichts). We are the only operator with a significant presence in all of the three key biofuel markets: the United States, Europe and Brazil. We are also diversified in terms of revenue sources.

We believe we have identified a significant market opportunity in second-generation biofuels, which utilize biomass rather than cereal and other food crops as the primary raw material. We have invested continually in R&D&i over the past decade in this business and have developed our own proprietary processes and enzymes. Our pilot plant has been in operation in York (Nebraska, United States) since 2007 and a demonstration plant in Salamanca (Spain) since 2009. We commenced construction of our first second-generation commercial plant in Hugoton (Kansas, United States) in 2011, for which we have been awarded a total of \$132 million in loan guarantee financing and \$97 million in grants from the U.S. Department of Energy since 2007. This plant is expected to start operations in the third quarter of 2014 and increase the number of opportunities for us to license our biomass technology to third parties. In addition, we believe that the plant will position our business for potential entry into the biomaterials and bioproducts industry. N-Butanol production on a commercial scale would allow us to diversify our bioenergy business product range, reducing market volatility. A pilot plant for development and implementation of a catalytic technology for N-Butanol production is running since the end of 2013.

Industry and Market Opportunity

Over the last decade, global investment in the renewable energy and environmental sectors has witnessed significant growth. Moreover, energy scarcity, the focus on reduction of carbon emissions, and the

potential increased costs of building and operating nuclear plants are expected to continue to drive renewable technology. We expect this to continue both in the short and long term and expect that this will support demand for our products and services. According to the World Energy Outlook 2013, global energy demand is expected to grow 33% by 2035, compared to 2011 levels reaching 17.400 Mtoe. As expected, emerging economies account for more than 90% of net demand growth, and continue to be led by China, India and the Middle East, with demand growth of natural gas at 48%, nuclear at 66% and renewables at 77%. Oil continues to be the largest component of primary energy mix, however demand growth is expected to slow down over the period: 1.1% p.a. until 2020 and 0.4% thereafter.

The share of renewables in primary energy use is expected to rise to 18% in 2035, from 13% in 2011, resulting from rapidly increasing demand for modern renewables to generate power, produce heat and make transport fuels. Power generation from renewables is expected to increase by over 7,000TWh from 2011 to 2035, making up almost half of the increase in total generation. Renewables is predicted to become the second-largest source of electricity before 2015 and approach coal as the primary source by 2035. Cumulative investment of \$6.5 trillion will be required in renewable energy technologies from 2013 to 2035, representing 62% of investment in new power plants through to 2035. (Source: World Energy Outlook 2013).

Consumption of biofuels is expected to increase from 1.3 Mboe/d in 2011 to 4.1 Mboe/d in 2035, to meet 8% of road-transport fuel demand in 2035. The United States, Brazil, European Union and China are expected to make up more than 80% of all biofuels demand. Advanced biofuels, helping to address sustainability concerns about conventional biofuels, will gain market share after 2020, reaching 20% of biofuels supply in 2035. (Source: World Energy Outlook 2013).

Significant opportunities are expected in one of Abengoa's core areas of expertise, the transmission and distribution sectors, where a total investment of \$7,000 billion is estimated by 2035. Approximately 25 million kilometers of transmission and distribution lines are expected to be built during the outlook period driven by i) increasing demand (India, China) ii) upgrade of aged infrastructure (Europe, U.S. and Russia) and iii) integration of renewables. (Source: World Energy Outlook 2013).

Other macroeconomic trends such as continuous global population growth and increasing water scarcity are expected to result in trends that favor the expertise and focus of our business. According to Global Water Intelligence estimates, the 2013 global water market is worth \$556.8 billion and is expected to grow at a rate of around 3.9% per year through 2018. In particular, worldwide installed desalination capacity (industrial and municipal) in 2012 was 75 million m³/d, which corresponds to a water desalination market value of \$3.9 billion, and is expected to grow to \$15.2 billion by 2018. The growth rate for capital expenditure on seawater desalination is expected to be 19.2% during that time. (Source: Global Water Market 2014).

In addition, increasing environmental consciousness, reducing carbon and greenhouse gas emissions, increasing focus on security of energy supply in many developed countries, and the related tightening of environmental regulation are important factors that we expect to bolster global demand and provide an impetus to our sustainable development focus.

Our Strengths

Integrated business model

We operate an integrated business model in which we provide complete services from initial design, construction and engineering to operation and maintenance of infrastructure assets. The combination of our engineering and construction expertise with our track record of operating large and complex infrastructure facilities allows us to benefit from and leverage multiple operating efficiencies within our Group. We believe that our integrated business model allows us to prepare competitive bids for government concession tenders and complete and operate the project on a profitable and timely basis while achieving high equity returns.

Furthermore, our business mix enables us to share knowledge gained from across our Group and implement best practices across our businesses and geographies, thereby increasing our competitiveness while allowing us to be less dependent on any single business or geography. Our Engineering and Construction activity provides a resilient earnings base and our Concession-Type Infrastructure activity provides long term recurrent cash flows. Together with our Industrial Production activity, our Concession-Type Infrastructure activity also operates in high-growth sectors that offer a wide range of business opportunities. In addition, our business mix allows us to apply our engineering capabilities to create new technologies that are integral to our asset-owned operations and concession projects. The growth of our technological development capabilities enhances our engineering capabilities and increases the development of our asset-based operations.

High revenue visibility driven by strong order backlog and contracted revenue stream

We have a developed portfolio of businesses focused on EPC and concession project opportunities, many of which are based on customer contracts or long-term concession projects. As of June 30, 2014, our backlog of projects and other operations pending execution stood at €7,671 million, which equalled approximately 14 months of revenue that our Engineering and Construction activity achieved in the previous 12 months. As of June 30, 2014, our concessions had an average remaining life of 25 years. The volume and timing of executing the work in our backlog is important to us in anticipating our operational and financing needs, and we believe our backlog figures reflect our ability to generate revenue in the near term.

We have an established portfolio of long-term concession projects undertaken in conjunction with partners or on an exclusive basis, which we operate in the power transmission, energy, generation and water infrastructure and energy sectors, typically with terms of 20 to 30 years. Our revenue from concession projects is typically obtained during the term through a period tariff or price per unit payable in exchange for the operation and maintenance of the project. This revenue, which is normally adjusted for inflation, represents a stable and contracted source of cash flow generation for us. In addition, partnerships and non-recourse project finance limits our credit exposure and increases our ability to commit to multiple projects simultaneously. For large projects, we often share the equity contribution by teaming up with various international and local partners. Project finance borrowing allows us to finance the rest of the project through non-recourse debt and thereby insulate the rest of our Group from such credit exposure.

In addition, we have a capital expenditure program focused on the construction of power transmission lines, solar power plants, cogeneration power plants and water infrastructure among other activities. As of June 30, 2014, our expected equity contribution related to our capital expenditure plan was €740 million, with the significant majority of projects backed by off-take contracts, for most of which long-term financing has been obtained. As a result, we believe that our capital expenditure program provides us with enhanced visibility on short and medium-term growth in revenue and cash flow.

Strong asset portfolio geographically diversified

Our activities possess a combination of engineering, procurement and construction (“EPC”) as well as concession revenue streams originating from a variety of both renewable and conventional technologies and markets with their own demand and supply dynamics. As a result, we are not overly reliant on any particular technology, market or customer. Furthermore, as we have operations on five continents, with 86% and 84% of our consolidated revenue generated outside of Spain for the six month period ended June 30, 2014 and for the year ended December 31, 2013, respectively, our geographic diversification reduces our exposure to economic conditions in any single country or region. Due to our business and geographic diversification, we have a broad customer base consisting of both private and public sector customers, including leading global utilities, blue chip industrial companies and national, regional and local governmental authorities. In 2013, no single customer accounted for over approximately 5% of our consolidated revenue, excluding work performed for our own assets.

Our broad geographic diversification with significant activities in the United States, Latin America (including Brazil) and Europe, in particular, gives us deep regional insight and long-standing experience working with local governments, regulators, financial institutions and other partners that we believe assists us to obtain requisite equity and debt financing and conclude successful partnerships with leading international and local firms.

Market leader in high growth energy and environmental markets

We have a developed portfolio of businesses focused on EPC and concession project opportunities in the attractive and growing energy and environmental markets, which despite short-term challenges are expected to continue growing.

We have developed a leadership position in the energy sector in recent years, as highlighted by the following:

- we are the leading international contractor in power transmission and distribution of electricity in terms of revenues, the leading international contractor in power and in solar in terms of revenues, the fourth largest international contractor in co-generation in terms of revenues and the eighth largest international contractor in water in terms of revenues (source: ENR 2013);
- we are a global leader in solar CSP technology (1223 MW in operation), having developed and built the first two commercial tower technology plants (PS10 and PS20) in Seville (Spain), the first integrated solar combined cycle ("ISCC") plant in the world in Ain-Beni-Mathar (Morocco), the world's largest CSP plants of its kind in Arizona (the Solana Project) and the second ISCC plant in Hassi-R'Mel (Algeria) and we are continuing to work on one of the world's largest CSP plants under construction in California (the Mojave project). We are also building the first superheated Solar tower in Africa (Khi solar one); and
- we are a global leader in the biofuels industry, with plants in Europe, the United States and Brazil. We ranked first in Europe and in the top ten in the United States in first-generation bioethanol in terms of installed capacity (source: Ethanol Producer Magazine, ePURE and FO Lichts) and enjoy a global leadership position in the development of technology for the production of second-generation bioethanol on a commercial scale.

We are also dedicating significant efforts to developing our market position in the environmental sector, specifically within the water desalination industry, where we have a total desalination capacity of 1.4 million m³/d, of which 865,000 m³/d in build, operate and transfer ("**BOT**") model. We are ranked within the 10 largest companies in the world in terms of reverse osmosis desalination capacity. Furthermore, we were awarded the distinction of "2013 Desalination Company of the Year" for our outstanding contribution in the desalination sector and recognized as one of the top four water companies of the year (Source: Global Water Intelligence ("**GWI**")).

Competitive advantage driven by our cutting edge technology and our extensive Engineering and Construction experience

Our cutting edge technology is one of our central competitive advantages. Building on our extensive experience in our Engineering and Construction activity of providing turnkey engineering solutions as well as on our resilient earnings base and sustained record of profitability, over the last decade we have focused on using our engineering expertise and know-how to develop cutting edge technologies relating to sustainable development, particularly in technologies for markets with relatively high barriers to entry. Following this approach, we have made significant investments in new technologies at the vanguard of renewable energies such as ISCC plants and second-generation biofuels, which we believe may provide us with an early advantage as their commercial application becomes more widespread.

Strong financial discipline and liquidity profile supported by access to a diverse range of funding sources

We have successfully grown our business while seeking to enforce strict financial discipline to maintain our strong liquidity position. As of June 30, 2014, we had cash and cash equivalents and short-term financial investments of €4,255 million, which we believe are sufficient to satisfy our short-term liquidity needs. This strong cash position also assists in bidding for large projects. The financing of our projects is executed at two levels: (i) non-recourse debt, which is used at the project company level to fund, as the case may be, the engineering and construction works, operation of the concession-type infrastructure and industrial production projects, and which typically insulates the rest of the Group from any credit risk; and (ii) corporate debt, which is used to fund the rest of our operations.

In addition, we have developed a strong network of relationships with international financial institutions and local banks, which have provided us with corporate and non-recourse financing. We have also obtained financial support from international and local development banks and government regulators such as the European Investment Bank, the Inter-American Development Bank, the U.S. Department of Energy, Banco Nacional de Desenvolvimento Econômico e Social (“**BNDES**”) in Brazil and Banco Nacional de Obras y Servicios Públicos (“**Banobras**”) in Mexico. In addition, we have accessed the debt capital markets in different geographies and successfully raised funding through the issuance of bonds and convertible notes.

Entrepreneurial and experienced management team with proven track record and a clearly defined strategy

Our senior management team holds a significant stake in our equity, has an average of 18 years of experience at our company and has led Abengoa through our significant growth and development, including periods of international expansion across all of our activities and the creation and development of our Solar, Water and Industrial Production businesses over the last decade. This proven growth track record has been possible thanks to our management team’s focus on shareholder value and financial discipline across the Group.

Going forward, our senior management team has a defined and clear strategy and a strong commitment to continue delivering on its proven execution track record in the Engineering and Construction business; building a diversified asset portfolio both in terms of geography and sector in our Concession-Type Infrastructure, which will become a sizeable source of cash while committing to invest a maximum equivalent to the E&C margin in a concession; and diversifying into new geographies and outputs our Industrial Production activity.

Our Growth Strategy

Our objective is to create long-term value for our shareholders by becoming the leading global engineering and clean technology company providing innovative solutions for sustainability in the energy and environmental sectors. Key elements of our strategy for achieving this objective are as follows:

Maintain focus on operational excellence and technological development

Given the importance of our technological leadership to our competitive advantage, we maintain this strength through significant investment in R&D&i which is undertaken by approximately 800 employees. We intend to maintain this effort to retain or enhance our market positions and cost competitiveness.

Maintain the mix of our business operations to operate a diversified business model

We have been careful to expand our business in a balanced manner, seeking to ensure that we are not over-reliant on any particular product or service, geography or technology.

Take advantage of opportunities for organic cash flow generation in our growth markets

We look to establish ourselves early in growth markets so that we can garner leadership positions in our businesses. We have significant experience in expanding into new and diverse markets with different regulatory regimes that allows us to adapt and to become familiar with new markets and technologies more quickly and helps us capitalize on future expansion opportunities in new markets.

Our business is positioned for growth through the development of both existing operations and new investments. We have strict "return on investment" criteria that attempt to ensure that our growth plans generate long-term, sustainable cash flows for our business. In addition, we maintain strict discipline towards the deployment of new non-committed capital expenditures, committing to such investments only when long-term funding has been secured.

Maintain our competitive position

We believe that we enjoy competitive advantages in many of our businesses due to factors such as our technological leadership position, know-how and scale, as well as the relatively high barriers to entry in certain key areas. We believe these are important factors in protecting our cash flows and profitability. We intend to continue to focus on efficiency measures and technology investments to seek to maintain our competitive advantages.

Asset Rotation

It is part of our strategy to unlock value through asset rotations, when we think that conditions are appropriate, in order to increase equity returns. We have a successful track record of monetizing certain of our investments, for example:

- in the third quarter of 2011, we completed the Telvent Disposal, which generated cash proceeds of €391 million;
- in the fourth quarter of 2011, we executed the First Cemig Sale which resulted in the equivalent of €479 million of net cash proceeds in Brazilian reais;
- in the second quarter of 2012, we closed the Second Cemig Sale which resulted in the equivalent of €354 million of net cash proceeds in Brazilian reais;
- in the second quarter of 2013, we closed the sale of our Brazilian subsidiary, Bargoa S.A. ("**Bargoa**"), for a total sales price of \$80 million, which resulted in approximately \$50 million of cash proceeds;
- in the second quarter of 2013, we entered into a share purchase agreement for the sale of 100% of our shares in our subsidiary, Befesa, which specializes in the integral management of industrial waste, to funds advised by Triton Partners. On July 15, 2013, we received €331 million in cash proceeds corresponding to the agreed price for the shares (and deferred compensation and other compensation totaling €289 million) and the sale transaction was closed;
- in the fourth quarter of 2013, Liberty Interactive Corporation invested \$300 million in our Solana CSP plant in the United States. The investment was made in Class A shares of Arizona Solar Holding, the holding company of the Solana CSP plant. Such investment was made through a tax equity partnership which permits the partners to have certain tax benefits such as accelerated depreciation and investment tax credits;
- in the first quarter of 2014, we announced our agreement to sell our desalination plant in Qingdao, China for total cash proceeds of approximately €53 million;
- in the first quarter of 2014, we announced our agreement to sell our 51% stake in Linha Verde Transmissora de Energia S.A., a company with a concession of an electric transmission line in Brazil for total cash of approximately €13 million (BRL 40 million); and

- in the second quarter of 2014, Abengoa Yield closed its initial public offering of 28,577,500 ordinary shares, including the exercise in full of the option to purchase additional shares to cover over-allotment by the underwriters of the initial public offering. These shares were offered at a price of \$29.00 per share for total gross proceeds of \$828.7 million (€611.0 million) before fees and expenses. As a result of the Abengoa Yield IPO, its shares began trading on the NASDAQ Global Select Market under the symbol “**ABY**”.

We intend to continue to actively follow an asset rotation strategy whereby we periodically sell assets or businesses in order to seek to optimize investment returns and free up capital for new investments or debt reduction. We intend to follow an opportunistic approach, whereby we consider to sell assets or businesses when we deem market conditions are attractive to us. Sales of assets or businesses may be material and may happen at any time. We expect to continue with our asset rotation strategy through the rest of 2014.

Going forward, Abengoa Yield constitutes a vehicle through which we plan to execute most of our asset rotations, representing a long-term recurrent equity recycling vehicle to crystallize value in concessions, facilitating the divestment process in concessional assets because Abengoa Yield is a natural buyer of the assets we are building and benefits from a significantly lower cost of capital than us. These opportunities relate to our power transmission business in Latin America, our renewable and conventional power assets and other assets. **Our asset rotation plans constitute forward-looking information and are subject to risks and uncertainties that could cause actual results to differ materially from the results forecasted, including, but not limited to, our performance, industry performance, the availability of buyers for our assets at the prices we seek, general business and economic conditions, competition, adverse changes in applicable laws, regulations or rules, and the various risks set forth in this Listing Memorandum. See “Forward-looking Statements.”**

Strengthen and diversify our capital structure and gain financial flexibility

We are committed to maintaining a sound capital structure and a strong liquidity position. As such, we intend to extend the debt maturities of our existing corporate debt, prefund our cash needs and avoid committing to new projects unless we have first secured long-term financing. We aim to continue to access the global capital markets from time to time, as appropriate and subject to market conditions, in order to further diversify our funding sources.

Our Corporate Information

Our principal executive offices are located at Campus Palmas Altas, C/ Energía Solar 1, 41014, Seville, Spain, and our telephone number is + 34 954 93 71 11. Our website is located at www.abengoa.com. Information contained in our website is not part of this Listing Memorandum.

Recent Developments

Ratings Update

On March 19, 2014, Standard & Poor’s Ratings Services (“**S&P**”) affirmed our “B/B” long- and short-term corporate credit ratings and revised its outlook to positive from negative and Moody’s affirmed the credit rating “B2” with a stable outlook on April 8, 2014.

Abengoa Yield plc Initial Public Offering

On June 18, 2014, we completed the Abengoa Yield IPO of the ordinary shares of Abengoa Yield. Abengoa Yield was formed by Abengoa following a series of concessional asset transfers mostly in the solar, transmission, and cogeneration space. As a result, we issued 28,577,500 shares to the purchasers in the Abengoa Yield IPO in exchange for gross proceeds of approximately \$828.7 million, based on an initial public

offering price of \$29.00 per share. Consequently, Abengoa owns shares representing approximately 64.3% of the economic and voting power of Abengoa Yield's shares.

Abengoa Yield was incorporated under the laws of England and Wales on December 17, 2013 by Abengoa, to own and operate a portfolio of renewable energy, conventional power and electric transmission assets previously owned and operated by Abengoa and its subsidiaries.

Abengoa Yield is a dividend growth-oriented company formed to serve as the primary vehicle through which Abengoa will own, manage and acquire renewable energy, conventional power and electric transmission lines and other contracted revenue-generating assets, initially focused on North America (the United States and Mexico) and South America (Peru, Chile, Uruguay and Brazil), as well as Europe (Spain). In the future, Abengoa Yield intends to expand this presence to selected countries in Africa and the Middle East.

With the consummation of the Abengoa Yield IPO, Abengoa Yield owns eleven assets, comprising 710 MW of renewable energy generation, 300 MW of conventional power generation and 1,018 miles of electric transmission lines and an exchangeable preferred equity investment in Abengoa Concessoes Brasil Holding. Each of the assets Abengoa Yield plc owns has a project-finance agreement in place.

Abengoa Yield plc has signed an exclusive agreement with Abengoa (the "**Abengoa Yield ROFO Agreement**"), which provides Abengoa Yield with a right of first offer on any proposed sale, transfer or other disposition of any of Abengoa's contracted renewable energy, conventional power, electric transmission or water assets in operation and located in the United States, Canada, Mexico, Chile, Peru, Uruguay, Brazil, Colombia and the European Union, as well as four assets in selected countries in Africa and the Middle East.

Expected Sale of Certain Assets to Abengoa Yield

Abengoa Yield announced on September 22, 2014 that it expects to enter into an asset transfer agreement with Abengoa to acquire, subject to financing, negotiation of documentation and certain waivers from financial institutions, three renewable facilities for a total amount of \$323 million. The transaction has been approved by the respective boards of directors of both Abengoa Yield and Abengoa.

The renewable assets intended to be sold by Abengoa to Abengoa Yield consist of:

- Concentrating Solar Power assets with a combined capacity of 131MW located in Spain and referred to elsewhere in this Listing Memorandum as "Solacor 1 and 2", and "PS10 and PS20", and
- a 50 MW wind farm located in Uruguay and referred to elsewhere in this Listing Memorandum as "Cadonal wind".

Abengoa Yield intends to finance the acquisition with debt to be raised before the end of the year, along with available cash. This is the first implementation of the Abengoa Yield ROFO Agreement.

Refinancing

We have recently approached our syndicate of banks in order to refinance our 2012 Forward Start Facility. If successful, the refinancing would provide a medium term extension to the maturity profile of the 2012 Forward Start Facility, with commercial terms that are generally more beneficial to us than those under the 2012 Forward Start Facility. We cannot assure you when we will complete discussions with our banking syndicate, or if at all.

Entry into Senior Unsecured Note Programme

Abengoa expects to enter, on or around September 23, 2014, into a new five-year senior unsecured note programme for an initial maximum amount available of €125 million, which may be increased up to €425 million.

CORPORATE STRUCTURE AND CERTAIN FINANCING ARRANGEMENTS

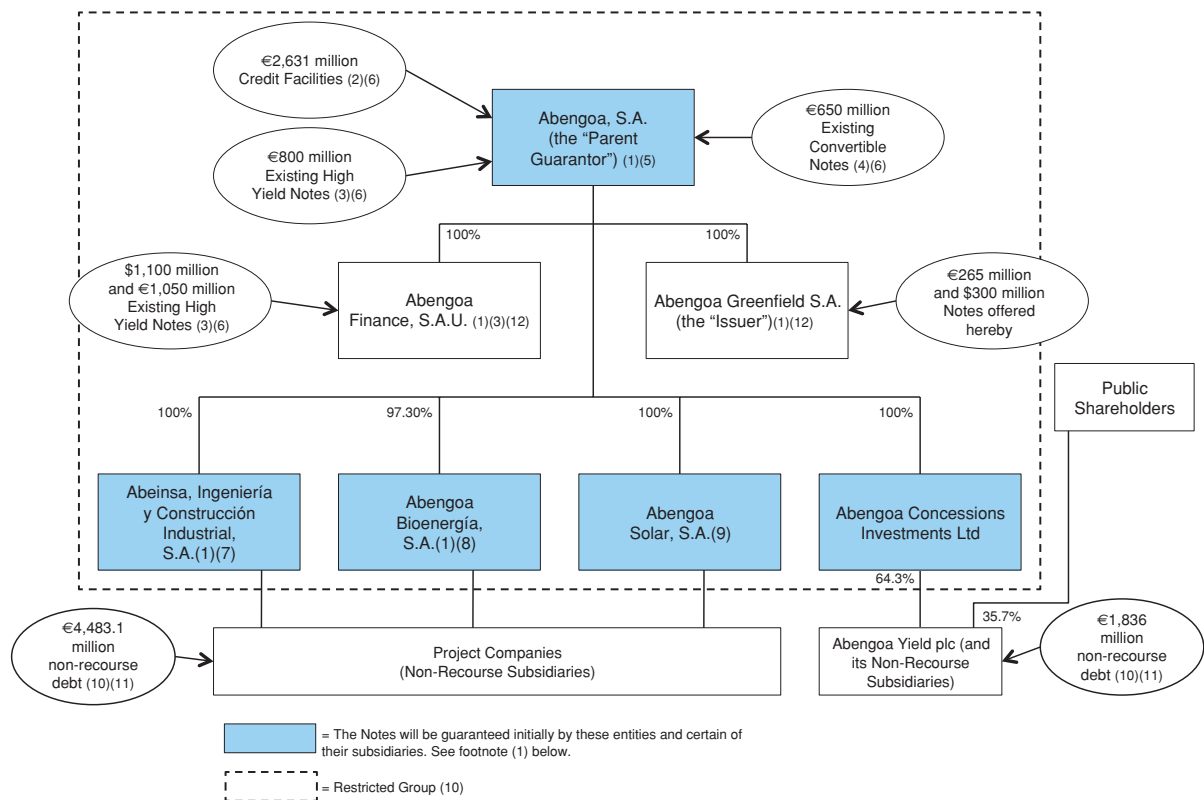

We utilize two general sources of financing to meet our financial commitments, which we refer to as Corporate Debt and Non-Recourse Debt. We use our Corporate Debt to finance certain investments and for general corporate purposes. Our Corporate Debt is used by all of our activities and is primarily incurred by the Parent Guarantor or dedicated financing subsidiaries, with upstream guarantees from our main operating subsidiaries, including the Subsidiary Guarantors, or downstream guarantees from the Parent Guarantor, as applicable. We also finance certain of our operations by means of Non-Recourse Debt at the project company level. Non-Recourse Debt is the principal means of financing for project construction in our Concession-Type Infrastructure activity and a partial means of financing for project construction in our Industrial Production activity. As of June 30, 2014 we had indebtedness of €6,605.4 million with recourse at the corporate level (of which €2,094.3 million was indebtedness of Restricted Subsidiaries which do not issue or guarantee the Notes), €2,993.6 million of cash and cash equivalents, €1,261.4 million of short-term financial investments and €6,319.1 million of Non-Recourse Debt of which approximately €766.3 million was non-recourse finance in process. Out of the €766.3 million, €485.4 million was guaranteed by the Parent Guarantor and/or Subsidiary Guarantors; €190.9 million was guaranteed by the Parent Guarantor and one or more Restricted Subsidiaries that are not Subsidiary Guarantors; and €90.0 million was guaranteed by Restricted Subsidiaries that are not Subsidiary Guarantors. As of June 30, 2014, as adjusted on a pro forma basis to reflect the issuance of the Notes and the use of proceeds therefrom, we had indebtedness of €7,105.1 million with recourse at the corporate level (€2,094.3 million was indebtedness of Restricted Subsidiaries which do not issue or guarantee the Notes), €3,486.3 million of cash and cash equivalents, €1,261.4 million of short-term financial investments and €6,319.1 million of Non-Recourse Debt.

As of and for the twelve months ended June 30, 2014, the Parent Guarantor and its Restricted Subsidiaries accounted for approximately 63% of the Group's Consolidated EBITDA, and approximately 38% of the Group's consolidated total assets. Accordingly, as of and for the twelve months ended June 30, 2014, our Unrestricted Subsidiaries accounted for approximately 37%, of the Group's Consolidated EBITDA and approximately 62% of its consolidated total assets. Consolidated EBITDA for the twelve months ended June 30, 2014 has been derived from the consolidated income statements of the Parent Guarantor and its subsidiaries for the twelve months ended June 30, 2014 which has been prepared by subtracting the consolidated income statement of the Parent Guarantor and its subsidiaries for the six months ended June 30, 2013 from the consolidated income statements of the Parent Guarantor and its subsidiaries for the year ended December 31, 2013 and then adding the total to the consolidated income statement of the Parent Guarantor and its subsidiaries for the six months ended June 30, 2014. In addition, as of and for the twelve months ended June 30, 2014, the Guarantors represented approximately 59% of the Group's Consolidated EBITDA, and approximately 20% of its total assets. Our consolidated financial statements included in this Listing Memorandum reflect the financial condition and results of operations of the Parent Guarantor and all of its subsidiaries, both Guarantors and non-Guarantors. For financial information given separately for the Issuer, the Guarantors and the non-Guarantor subsidiaries, together with the adjustments made to reach the consolidated total, see "*Guarantors—Certain Financial Information Relating to the Issuer, the Guarantors and the Non-Guarantor Subsidiaries.*"

The Notes and Note Guarantees will effectively rank at least *pari passu* with indebtedness under the Credit Facilities (which are unsecured) and the other indebtedness of the Issuer and the Guarantors (including the Existing High Yield Notes (as defined below)), other than the guarantee of certain Credit Facilities by Abeinsa Inversiones Latam, S.L., Abengoa Water, S.L., Siema Technologies, S.L., Abeinsa Asset Management S.L. and Abengoa Concessions S.L. (these subsidiaries cannot guarantee capital markets indebtedness (including the Notes) due to applicable Spanish corporate law limitations).

The following diagram shows a simplified summary of our corporate structure and corporate financing arrangements as of June 30, 2014, as adjusted on a pro forma basis to reflect the issuance of the Notes and the repayment of the 2014 Convertible Notes in July 2014. The chart does not include all of our subsidiaries, or all of our debt obligations. For a summary of the debt obligations identified in this diagram, please refer to

the sections entitled "Description of the Notes," "Capitalization" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" in this Listing Memorandum.

(1) The Notes are senior obligations of the Issuer. As of the Issue Date, the Notes are jointly and severally guaranteed on a senior basis by the Parent Guarantor and the following entities within our Engineering and Construction and Industrial Production activities:

- (i) *Engineering and Construction:* ASA Investment Brasil Ltda., Abeinsa, Ingeniería y Construcción Industrial, S.A., Abengoa Solar, S.A., Abencor Suministros, S.A., Abener Energía, S.A., Abengoa México, S.A. de C.V., Abentel Telecomunicaciones, S.A., Abentey Gerenciamento de Projetos de Engenharia e Construções Ltda., Abeinsa Infraestructuras Medio Ambiente, S.A., Inabensa Rio Ltda., Instalaciones Inabensa, S.A., Negocios Industriales y Comerciales, S.A., Nicsamex, S.A. de C.V., Teyma Gestión de Contratos de Construcción e Ingeniería, S.A., Teyma Internacional, S.A., Abener Teyma Hugoton General Partnership, Abener Teyma Mojave General Partnership, Abengoa Solar New Technologies, S.A., Centro Morelos 264, S.A. de C.V., Teyma Uruguay ZF S.A. and Teyma USA & Abener Engineering and Construction Services General Partnership; Abengoa Solar España, S.A., Abengoa Concessions Investments Limited, Abengoa Construção Brasil Ltda., Abeima Teyma Zapotillo S. de R.L. de C.V., Europea de Construcciones Metálicas, S.A., Construcciones Metálicas Mexicanas Comemsa, S.A. and ASA Desulfuración, S.A.
- (ii) *Industrial Production:* Abengoa Bioenergía, S.A., Abengoa Bioenergy Company, LLC, Abengoa Bioenergy New Technologies, LLC, Abengoa Bioenergy of Nebraska, LLC, Abengoa Bioenergy Trading Europe B.V., Bioetanol Galicia, S.A., and Ecoagrícola, S.A.

(2) The Credit Facilities are loans with financial entities and represent corporate indebtedness of the Parent Guarantor and certain Restricted Subsidiaries. Our principal Credit Facilities are:

- (i) A forward start facility maturing in 2016 dated April 27, 2012 borrowed by Abengoa and jointly and severally guaranteed on a senior basis by certain companies of the Group (the "2012 Forward Start Facility"). The original aggregate principal amount under the 2012 Forward Start Facility was €1,566 million; however, following two increases of the aggregate principal amount on May 22, 2012 and July 11, 2012 of €47 million and €50 million, respectively, the 2012 Forward Start Facility provides for borrowings of up to €1,663 million divided into Tranche A and Tranche B amounting to €1,350.7 million and €312.5 million, respectively. Certain sub-tranches within Tranche A and Tranche B were drawn for the purpose of repaying and extinguishing certain syndicated credit facilities agreements borrowed in 2005 and 2006 as well as making a

partial repayment under the 2010 Forward Start Facility, in each case on July 20, 2012. In addition, certain amounts under the 2012 Forward Start Facility were utilized, along with other funds, to repay and extinguish the 2010 Forward Start Facility in July 2013.

The 2012 Forward Start Facility is subject to compliance with a financial covenant. At all times, the ratio of Net Finance Debt to Consolidated EBITDA (as such terms are defined therein) should be lower than 3.00 until December 30, 2014, following which the ratio should be lower than 2.50. As of June 30, 2014, borrowings under the 2012 Forward Start Facility amounted to €1,417 million.

- (ii) A €150 million bilateral facilities loan maturing in 2016 dated July 18, 2007 borrowed by Abengoa from the Instituto de Crédito Oficial ("**ICO**") and jointly and severally guaranteed on a senior basis by certain companies of the Group (the "**ICO Loan**"), as amended and restated on July 11, 2012, with ICO. At all times, the Ratio of Net Debt to EBITDA (as defined in the ICO Loan) must be less than 3.0 until December 31, 2014 and less than 2.50 from that date. As of June 30, 2014, €150 million was outstanding under the ICO Loan.
- (iii) A €49 million bilateral facilities loan maturing in 2014 dated July 20, 2007 borrowed by Abengoa from the European Investment Bank (the "**EIB R&D&i 2007 Credit Facility**"). At all times, the Leverage Ratio (as defined therein) should be equal to or less than 3.00 from 2009. As of June 30, 2014, €49 million was outstanding under the EIB R&D&i 2007 Credit Facility.
- (iv) A €60 million bilateral facilities loan maturing in 2014 dated July 20, 2007 borrowed by Abengoa from the European Investment Bank (the "**EIB 2007 Credit Facility Agreement**"). At all times, the Ratio of Net Debt to EBITDA must be equal to or less than 3.50. As of June 30, 2014, €60 million was outstanding under the EIB 2007 Credit Facility Agreement.
- (v) A €247.7 million Swedish law credit facility maturing in 2020 dated March 2, 2010 borrowed by Instalaciones Inabensa S.A. (the "**Swedish Credit Agreement**"). On December 10, 2010, this loan was increased by €128.8 million. As of June 30, 2014, €269 million was outstanding under the Swedish Credit Agreement.
- (vi) A €299.3 million framework facility agreement dated August 11, 2010 as amended on October 19, 2010 and January 25, 2012 borrowed by Abener Energia, S.A. and jointly and severally guaranteed by Abengoa (the "**Framework Facility Agreement**"). Sixteen individual loan agreements have been borrowed under the Framework Facility Agreement amounting to €269.4 maturing between 2018 and 2022. As of June 30, 2014, €177 million was outstanding under the Framework Facility Agreement.

See "*Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Financing Arrangements.*" The expected net proceeds from the Offering of approximately €260.7 million and \$296.5 million after fees and expenses payable by us in connection with the Offering, were on-lent by the Issuer to the Parent Guarantor on a permanent basis. In turn, the Parent Guarantor currently expects to use the net proceeds as described in "*Use of Proceeds.*"

- (3) The Existing High Yield Notes (as defined below) represent the Abengoa Finance, S.A.U.'s or the Parent Guarantor's existing high yield capital markets indebtedness which are guaranteed by the Subsidiary Guarantors and (if issued by Abengoa Finance, S.A.U) the Parent Guarantor and will rank *pari passu* with the Notes and constitute the Parent Guarantor's €300 million 9.625% Notes due 2015 (the "**2015 Notes**"), the Parent Guarantor's €500 million 8.50% Senior Unsecured Notes due 2016 (the "**2016 Notes**"), Abengoa Finance S.A.U.'s \$650 million 8.875% Senior Notes due 2017 (the "**2017 Notes**"), Abengoa Finance, S.A.U.'s €550 million 8.875% Senior Notes due 2018 (the "**2018 Notes**"), the Abengoa Finance, S.A.U \$450 million 7.75% Senior Notes due 2020 (the "**2020 Notes**") and Abengoa Finance, S.A.U.'s €500 million 6.00% Senior Notes due 2021 (the "**2021 Notes**" and together with the 2015 Notes, the 2016 Notes, the 2017 Notes, the 2018 Notes, and the 2020 Notes the "**Existing High Yield Notes**").
- (4) The Existing Convertible Notes (as defined below) represent the Parent Guarantor's existing convertible notes at June 30, 2014, which will rank *pari passu* with the Parent Guarantee and constitute the Parent Guarantor's €200 million 6.875% Senior Unsecured Convertible Notes due 2014 (the "**2014 Convertible Notes**"), the Parent Guarantor's €250 million aggregate principal amount of 4.5% Senior Unsecured Notes due 2017 (the "**2017 Convertible Notes**") and the Parent Guarantor's €400 million 6.25% Senior Unsecured Convertible Notes due 2019 (the "**2019 Convertible Notes**" and together with the 2014 Convertible Notes and the 2017 Convertible Notes, the "**Existing Convertible Notes**"). On January 17, 2013, we used a portion of the proceeds from the issuance of the 2019 Convertible Notes to repurchase €99.9 million principal amount of our outstanding 2014 Convertible Notes. On July 24, 2014 the 2014 Convertible Notes matured and were redeemed for cash, according to their terms and conditions. The remaining proceeds of the 2019 Convertible Notes were used to repay syndicated bank debt maturing in 2013 and other short-term corporate debt. The 2017 Convertible Notes are convertible into new and/or existing Class A and Class B shares of the Parent Guarantor and the 2019 Convertible Notes are convertible into new and/or existing Class B shares of the Parent Guarantor, in each case during a defined conversion period. The Existing Convertible Notes were unguaranteed. See "*Management Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Financing Arrangements.*"

- (5) The principal shareholders of the Parent Guarantor are Inversión Corporativa IC, S.A. ("**Inversión Corporativa**"), Finarpisa, S.A. ("**Finarpisa**") and First Reserve Corporation ("**First Reserve**"). Currently, Inversión Corporativa holds 52.21% of the Class A shares and Finarpisa holds 6.47% of the Class A shares. Finarpisa is a wholly owned subsidiary of Inversión Corporativa. Therefore, Inversión Corporativa owns, directly and indirectly, 58.68% of the Parent Guarantor's Class A share capital and 32.08% of the total shares of the Parent Guarantor. Inversión Corporativa holds 56.25% of the voting rights of our share capital. In addition, through its Class B shares, currently First Reserve holds 0.57% of the voting rights of our share capital and 6.27% of the total shares.
- (6) The Credit Facilities, the Existing High Yield Notes and the Existing Convertible Notes constitute the Group's corporate debt as of June 30, 2014.
- (7) Abeinsa, Ingeniería y Construcción Industrial, S.A. ("**Abeinsa**") is an intermediate holding company within our Group and holds various operating subsidiaries in our Engineering and Construction and Concession-Type Infrastructure activities, among others.
- (8) Abengoa Bioenergía, S.A. ("**Abengoa Bioenergía**") is an intermediate holding company within our Group and holds various operating subsidiaries in our Industrial Production activity, among others.
- (9) Abengoa Solar, S.A. ("**Abengoa Solar**") is an intermediate holding company within our Group and holds various operating subsidiaries in our Concession-Type Infrastructure and Industrial Production activities.
- (10) Certain of our subsidiaries in each of our Engineering and Construction, Concession-Type Infrastructure and Industrial Production activities, including in some cases subsidiaries of certain Subsidiary Guarantors, have outstanding Non-Recourse Debt, which generally constitutes project financing that is used to finance specific projects but that it also includes non-recourse finance in process. Our existing subsidiaries that have issued Non-Recourse Debt constitute, as of the Issue Date, Unrestricted Subsidiaries for the purposes of the Notes. See "*Description of the Notes.*" Additional subsidiaries that issue Non-Recourse Debt will also constitute Unrestricted Subsidiaries. Such subsidiaries will therefore not be subject to the restrictive covenants set forth in the Notes. The leverage ratio in the covenants governing the Notes excludes Non-Recourse Debt. As of June 30, 2014, the Group had outstanding €6,319.1 million of Non-Recourse Debt, of which €699.3 million is the current portion of such indebtedness, and of which €766.3 million consists of non-recourse finance in process. As of and for the twelve months ended June 30, 2014, the group of companies constituting Unrestricted Subsidiaries under the covenants governing the Notes accounted for 37% of Group Consolidated EBITDA, and 62% of the Group's consolidated total assets, on a historical basis. See "*Risk Factors—Risks Related to the Notes—A number of our present and future subsidiaries will constitute Unrestricted Subsidiaries under the Indenture, and will, therefore, not be subject to the restrictive covenants thereunder.*"
- (11) See "*Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Non-Recourse Debt*" for a description of our Non-Recourse Debt, which includes non-recourse finance in process, whereby the Parent Guarantor and/or Restricted Subsidiaries guarantee obligations in order to act as sponsors for the period prior to project companies securing long-term project financing (typically periods of less than 2-3 years).
- (12) The expected net proceeds from the Offering amounting to approximately €260.7 million and \$296.5 million after fees and expenses payable by us in connection with the Offering, were on-lent by the Issuer to the Parent Guarantor on a permanent basis. In turn, the Parent Guarantor currently expects to use the net proceeds as described in "*Use of Proceeds.*"

THE OFFERING

The following is a brief summary of certain terms of the Offering. It may not contain all the information that is important to you. For additional information regarding the Notes and the Note Guarantees, see "Description of the Notes."

Issuer	Abengoa Greenfield, S.A., incorporated as a limited company (<i>sociedad anónima unipersonal</i>) under the laws of Spain (the "Issuer").
Notes Offered	\$300,000,000 aggregate principal amount of fully and unconditionally guaranteed 6.50% U.S. dollar Notes and €265,000,000 aggregate principal amount of fully and unconditionally guaranteed 5.50% Euro Notes.
Issue Date	September 30, 2014.
Issue Price	100% (plus accrued and unpaid interest, if any, from the Issue Date).
Maturity Date	The U.S. Dollar Notes will mature on October 1, 2019. The Euro Notes will mature on October 1, 2019.
Notes Interest Payment Dates and Interest	We will pay interest on the Notes on October 1 and April 1, beginning on April 1, 2015. Interest will accrue from the Issue Date on the U.S. Dollar Notes at a rate of 6.50% per annum and on the Euro Notes at a rate of 5.50% per annum.
Denomination	<p>The U.S. Dollar Notes will have a minimum denomination of \$200,000 and any integral multiple of \$1,000 in excess of \$200,000. U.S. Dollar Notes in denominations of less than \$200,000 will not be available.</p> <p>The Euro Notes will have a minimum denomination of €100,000 and any integral multiple of €1,000 in excess of €100,000. Euro Notes in denominations of less than €100,000 will not be available.</p>
Ranking of the Notes	<p>The Notes are senior obligations of the Issuer and will:</p> <ul style="list-style-type: none">• rank <i>pari passu</i> (subject to any statutory exemptions) in right of payment with all existing and future unsubordinated, unsecured indebtedness of the Issuer, including in respect of the Existing High Yield Notes issued by Abengoa Finance, S.A.U, or the Parent Guarantor;• rank senior in right of payment to any future subordinated obligations of the Issuer; and• be effectively subordinated to any existing and future secured indebtedness of the Issuer to the extent of the value of the assets securing such indebtedness and to any preferential obligation under Spanish Law.
Guarantors	The Notes are jointly, severally and irrevocably guaranteed on a senior unsecured basis (the "Note Guarantees"), subject to certain limits imposed by local law and as set forth in the Indenture, on a senior basis by:

- Abengoa, S.A. (incorporated in Spain) (the “**Parent Guarantor**”);
- Abengoa Concessions Investments Limited (incorporated under the laws of England and Wales);

The obligations of the Guarantors are contractually limited under the applicable Note Guarantees to reflect limitations under applicable law, including, but not limited to, with respect to maintenance of share capital, corporate benefit, fraudulent conveyance and other legal restrictions applicable to the Guarantors and their respective shareholders and directors. For a description of certain of such contractual limitations. See *“Risk Factors—Risks Related to the Notes—The Note Guarantees may be limited by applicable laws or subject to certain limitations or defenses.”* In addition, the Subsidiary Guarantors listed above will be released from their respective obligations under their respective Note Guarantee before the Notes mature if at least two of the specified rating agencies assign the Notes an Investment Grade Rating in the future and no events of default under the Indenture exist and are continuing. Subsidiary Guarantors released from their respective obligations under the Note Guarantee as a result of an Investment Grade Rating will not be obligated to guarantee the Notes, even if the credit ratings assigned to the Notes later fall below investment grade. See *“Description of the Notes” and “Risk Factors—Risks Related to the Notes—The identity of the Subsidiary Guarantors may change, and there may be no, or only few, Subsidiary Guarantors in certain circumstances, including, upon the occurrence of a Rating Release Event or, in certain other circumstances, including in the event that a Subsidiary Guarantor ceases to guarantee certain indebtedness of the Parent Guarantor”* for further information.

Ranking of the Note Guarantees . . .

Each Note Guarantee is a senior obligation of each of the respective Guarantors and:

- rank *pari passu* in right of payment with all existing and future unsubordinated, unsecured indebtedness of such Guarantor, including indebtedness under the Credit Facilities and the Existing High Yield Notes;
- rank senior in right of payment to any future subordinated obligations of that Guarantor; and

- are effectively subordinated to any existing and future secured indebtedness of such Guarantor to the extent of the value of the assets securing such indebtedness, to any preferential obligations under applicable law and to all obligations of the subsidiaries of such Guarantor that are not Guarantors.

Each Note Guarantee is subject to certain limitations under the laws of the relevant Guarantor's jurisdiction of organization and, in the case of the Subsidiary Guarantors, may be released in certain circumstances. See *"Risk Factors—Risks Related to the Notes—Relevant local insolvency laws may not be as favorable to you as bankruptcy laws in the jurisdictions with which you are familiar and may preclude holders of the Notes from recovering payments due on the Notes or the Note Guarantees"* and *"—The identity of the Guarantors may change and there may be no, or only few, Guarantors in certain circumstances, including in the event that a Subsidiary Guarantor ceases to guarantee certain indebtedness of the Parent Guarantor."*

As of June 30, 2014, after giving pro forma effect to the issuance of the Notes and the use of proceeds therefrom:

- the Issuer and the Guarantors had €5,010.8 million of indebtedness, including €499.7 million represented by the Notes;
- the Issuer and the Guarantors had no secured financial indebtedness; and
- the subsidiaries of the Parent Guarantor that are not Guarantors had €8,413.4 million of financial indebtedness, including €6,319.1 million of Non-Recourse Debt of which approximately €766.3 million was non-recourse finance in process. Out of the €766.3 million, €485.4 million was guaranteed by the Parent Guarantor and/or Subsidiary Guarantors; €190.9 million was guaranteed by the Parent Guarantor and one or more Restricted Subsidiaries that are not Subsidiary Guarantors; and €90.0 million was guaranteed by Restricted Subsidiaries that are not Subsidiary Guarantors.

On a historical basis as of and for the twelve months ended June 30, 2014, the Parent Guarantor and its Restricted Subsidiaries accounted for approximately 63% of the Group's Consolidated EBITDA, and approximately 38% of its consolidated total assets. Accordingly, as of and for the twelve months ended June 30, 2014, the Unrestricted Subsidiaries accounted for approximately 37% of the Parent Guarantor's consolidated EBITDA, and approximately 62% of its consolidated total assets. In addition, as of and for the twelve months ended June 30, 2014, the Guarantors represented approximately 59% of the Parent Guarantor's consolidated EBITDA, and approximately 20% of its total assets.

Although the Indentures and the Notes will contain limitations on the amount of additional indebtedness the Parent Guarantor and its Restricted Subsidiaries are allowed to incur, the amount of such additional indebtedness could be substantial, and there is no limitation on the amount of non-recourse financing that the Unrestricted Subsidiaries may incur. See *“Risk Factors—Risks Related to Our Indebtedness.”*

Use of Proceeds The net proceeds of the offering which amount to approximately €260.7 million and \$296.5 million, after estimated fees and expenses payable by us in connection with the Offering, were on-lent by the Issuer to the Parent Guarantor on a permanent basis. In turn, the Parent Guarantor currently expects to use the net proceeds as described in *“Use of Proceeds.”*

Taxation and Additional Amounts . Payments in respect of the Notes are made without withholding or deduction for, or on account of, any present or future taxes, duties, assessments or governmental charges of whatever nature imposed or levied by, or on behalf of, any Relevant Taxing Jurisdiction (as defined in *“Description of the Notes—Additional Amounts”*), unless the withholding or deduction of such taxes, duties, assessments or governmental charges is required by law. In that event, the Issuer (or the Guarantors, as the case may be) will pay additional amounts as necessary so that the net amount received by the holders of the Notes after such deduction or withholding is not less than the amount that they would have received in the absence of such deduction or withholding, subject to certain exceptions described in *“Description of the Notes—Additional Amounts.”*

The Issuer expects that, in accordance with Spanish tax laws and regulations, and, in particular, subsequent to the Royal Decree 1145/2011 (see *“Taxation—Spanish Tax Considerations—Introduction”*), it will not be required to withhold Spanish taxes in connection with payments made with respect of the Notes to any Noteholder (resident in Spain or not), provided that the Notes are admitted to listing on the Official List of the Luxembourg Stock Exchange and admitted to trading on the Euro MTF Market on the relevant Interest Payment Date of the Notes, and provided that each of the Paying Agent for the applicable series of Notes complies with the tax information procedures described below in *“Taxation—Spanish Tax Considerations.”* If the Paying Agent for the applicable series of Notes fails to comply with the information procedures, then the related payment is subject to Spanish withholding tax, currently at the rate of 21%. In such an event, the Issuer (or the Guarantors, as the case may be) will pay additional amounts as necessary so that the net amount received by the holders of the Notes after such deduction or withholding is not less than the amount that they would have received in the absence of such deduction or withholding, subject to certain exceptions described in *“Description of the Notes—Additional Amounts.”*

In the event that the current applicable procedures are, in the future modified, amended or supplemented by any Spanish law or regulation, or any ruling of the Spanish Tax Authorities, the Issuer will inform the Noteholders of the applicable series of Notes of such information procedures and of their implications, as the Issuer may be required to apply withholding tax on interest payments under the Notes if the Noteholders do not comply with such information procedures.

For further information regarding the interpretation of Royal Decree 1145/2011, please refer to *"Risk Factors—Risks Related to Certain Taxation Matters—Risks related to the Spanish withholding tax regime."*

Optional Make-Whole Redemption

The Issuer may redeem all or part of the Euro Notes at any time at a redemption price equal to 100% of the principal amount of the Euro Notes redeemed, plus the Applicable Redemption Premium (as defined herein), plus accrued and unpaid interest, if any, and additional amounts, if any. See *"Description of the Notes—Optional Make-Whole Redemption."*

The Issuer may redeem all or part of the U.S. Dollar Notes at any time at a redemption price equal to 100% of the principal amount of the U.S. Dollar Notes redeemed, plus the Applicable Redemption Premium (as defined herein), plus accrued and unpaid interest, if any, and additional amounts, if any. See *"Description of the Notes—Optional Make-Whole Redemption."*

Redemption Upon Changes in Withholding Taxes

Following certain changes in the tax laws or treaties (or any regulations or rulings promulgated thereunder) of a Relevant Taxing Jurisdiction, the Issuer may, at its option, redeem the Euro Notes or the U.S. Dollar Notes, in whole but not in part, at any time upon giving not less than 30 nor more than 60 days' notice to the holders of the Euro Notes or the U.S. Dollar Notes, at a redemption price equal to 100% of the principal amount thereof, together with accrued and unpaid interest thereon, if any, to the redemption date and all additional amounts, if any, then due and which will become due on the date of redemption as a result of the redemption or otherwise. See *"Description of the Notes—Redemption Upon Changes in Withholding Taxes."*

Offer to Repurchase upon Certain Asset Sales

Provided Excess Proceeds (as defined herein) exceed €20.0 million, the Issuer or the Parent Guarantor was required to make an offer to purchase, prepay or redeem the Notes with Excess Proceeds following certain asset sales at a purchase price equal to 100% of the principal amount, plus accrued and unpaid interest, if any, and additional amounts, if any, to the date of purchase. See *"Description of the Notes—Certain Covenants—Limitation on Sales of Assets."*

Offer to Repurchase upon Change of Control

Upon the occurrence of certain change of control events affecting the Parent Guarantor, each holder to the Notes will have the right to require the Issuer or the Parent Guarantor to repurchase all or part of that holder's Notes at a purchase price equal to 101% of their aggregate principal amount, plus accrued and unpaid interest and Additional Amounts, if any, to the date of the purchase. See "*Description of the Notes—Certain Covenants—Change of Control.*"

Certain Covenants

The Indentures limit, among other things, our ability to:

- incur additional indebtedness;
- pay dividends on, redeem or repurchase our capital stock;
- impose restrictions on the ability of subsidiaries to pay dividends or other payments to the Parent Guarantor;
- create certain liens;
- transfer or sell assets;
- merge or consolidate with other entities;
- enter into transactions with affiliates; and
- engage in unrelated businesses.

Each of the covenants is subject to a number of important exceptions and qualifications. See "*Description of the Notes—Certain Covenants.*" In addition, certain of the covenants listed above will terminate before the Notes mature if at least two of the specified rating agencies assign the Notes an Investment Grade Rating in the future and no events of default under the Indentures exist and are continuing. Any covenants that cease to apply to us as a result of achieving Investment Grade Ratings will not be restored, even if the credit ratings assigned to the Notes later fall below investment grade. See "*Description of the Notes*" and "*Risk Factors—Risks Related to the Notes*" for further information.

Transfer Restrictions

The Notes and the Note Guarantees have not been registered under the U.S. Securities Act or the securities laws of any other jurisdiction, and will not be so registered. The Notes are subject to restrictions on transferability and resale. See "*Notice to Certain Investors.*" Holders of the Notes will not have the benefit of any exchange or registration rights.

Form and Title

The U.S. Dollar Notes will initially be issued in the form of one or more registered global notes and are deposited with, and registered in the name of the nominee for, the depository for the accounts of DTC. Ownership of interests in the U.S. Dollar global notes ("**U.S. Dollar Note Book-Entry Interests**") is available only to participants in DTC or persons that hold interests through those participants. U.S. Dollar Note Book-Entry Interests in the U.S. Dollar Notes are shown on, and transfers thereof are effected only through, records maintained in book entry form by DTC and their participants and the Euro Notes will initially be issued in the

form of one or more registered global notes and will be deposited with, and registered in the name of the nominee for, the common depository for the accounts of Euroclear and Clearstream. Ownership of interests in the Euro global notes ("**Euro Note Book-Entry Interests**", and together with the U.S. Dollar Note Book-Entry Interests, the "**Book-Entry Interests**") is available only to participants in Euroclear or Clearstream or persons that hold interests through those participants. Euro Note Book-Entry Interests in the Euro Notes are shown on, and transfers thereof are effected only through, records maintained in book entry form by Euroclear and Clearstream and their participants. See "*Book-Entry, Delivery and Form.*"

Listing and Trading	Application were made to admit the Notes to the Official List of the Luxembourg Stock Exchange and to trading on the Euro MTF Market.
Governing Law for the Notes, Note Guarantees and the Indentures	New York law.
Trustee	Deutsche Trustee Company Limited.
Paying Agent for the Euro Notes	Deutsche Bank AG, London Branch.
Transfer Agent and Registrar for the Euro Notes	Deutsche Bank Luxembourg S.A.
Paying Agent, Transfer Agent and Registrar for the U.S. Dollar Notes	Deutsche Bank Trust Company Americas.
Listing Agent	Deutsche Bank Luxembourg S.A.

Risk Factors

Investing in the Notes involves substantial risks. See the "*Risk Factors*" section of this Listing Memorandum for a description of certain of the risks you should carefully consider before investing in the Notes.

SUMMARY CONSOLIDATED FINANCIAL INFORMATION

The following tables present summary consolidated financial and business level information for Abengoa and its subsidiaries for each of the six-month or twelve-month periods (as indicated) ended June 30, 2014 and 2013 and for each of the years ended December 31, 2013, 2012 and 2011.

The summary financial information as of and for the six-month period ended June 30, 2014 and for the six-month period ended June 30, 2013 is derived from and qualified in its entirety by reference to our Interim Consolidated Financial Statements and related notes, prepared in accordance with IFRS as issued by the IASB, which are included elsewhere in this Listing Memorandum.

The summary financial information as of December 31, 2013 and 2012 and for the years ended December 31, 2013, 2012 and 2011 is derived from, and qualified in its entirety by reference to our Consolidated Financial Statements which are prepared in accordance with IFRS as issued by the IASB and which are included elsewhere in this Listing Memorandum. The summary financial information as of December 31, 2011 is derived from, and qualified in its entirety by reference to our consolidated financial statements and related notes for the years ended December 31, 2012, 2011 and 2010 included in the final prospectus for our initial public offering in the United States filed with the SEC pursuant to Rule 424(b) under the Securities Act of 1933 on October 17, 2013.

The summary consolidated financial information as of and for each of the indicated periods ended June 30, 2014 and 2013 and as of and for the years ended December 31, 2013, 2012 and 2011, is also not intended to be an indicator of our financial condition or results of operations in the future. You should review such consolidated financial information together with our Interim Consolidated Financial Statements and our Consolidated Financial Statements and notes thereto, included elsewhere in this Listing Memorandum.

The following tables should be read in conjunction with "*Capitalization*" and "*Management's Discussion and Analysis of Financial Condition and Results of Operations*" in this Listing Memorandum and our Consolidated Financial Statements and related notes included elsewhere in this Listing Memorandum.

Change in Segment Reporting

Beginning with our unaudited consolidated financial statements as of and for the six months ended June 30, 2014, we have presented segment information to reflect the Abengoa Yield Asset Transfer. As a result, we continue to organize our business into the following three activities: Engineering and Construction, Concession-Type Infrastructure, and Industrial Production, but we have added Abengoa Yield as a reporting segment under the Concession-Type Infrastructure activity. Each activity is now broken into the following reporting segments: Engineering and Construction (which is both an activity and a segment); Transmission, Solar, Water, Co-generation and other and Abengoa Yield segments within the Concession-Type Infrastructure activity; and Biofuels within the Industrial Production activity.

Accordingly, the discussion of our results of operations for the six months ended June 30, 2014 and 2013 is presented in this Listing Memorandum under the new activity and segment reporting structure. However, the discussion of our results of operations for the years ended December 31, 2011, 2012 and 2013 is presented under the previous activity reporting structure unless otherwise indicated. As a result, the results of operations of our activities and segments may not be easily comparable.

Abengoa Yield was formed by Abengoa to serve as the primary vehicle through which Abengoa will own, manage and acquire renewable energy, conventional power and electric transmission lines and other contracted revenue-generating assets, initially focused on North America (the United States and Mexico) and South America (Peru, Chile, Uruguay and Brazil), as well as Europe (Spain).

Our Abengoa Yield segment consists of assets that were included before in our Solar segment (two Concentrating Solar Power plants in the United States, Solana and Mojave, each with a gross capacity of 280 MW; two Concentrating Solar Power plants in Spain, Solaben 2 and Solaben 3, each with a gross

capacity of 50 MW), in our Transmission segment (two lines in Peru, ATN and ATS, spanning a total of 931 miles; three lines in Chile, Quadra 1, Quadra 2 and Palmucho, spanning a total of 87 miles; and an exchangeable preferred equity investment created at the time of the Abengoa Yield IPO in Abengoa Concessoes Brasil Holding, or ACBH, a subsidiary holding company of Abengoa that is engaged in the development, construction, investment and management of contracted concessions in Brazil, comprised mostly of electric transmission lines) and in our Co-generation and other segment (Abengoa Cogeneracion Tabasco, or ACT, a 300 MW cogeneration plant in Mexico; one on-shore wind farm in Uruguay, Palmatir, with a gross capacity of 50 MW).

Beginning with our interim unaudited consolidated financial statements as of and for the six-month period ended June 30, 2014, we have presented our Mexico operations as part of the North American segment, and excluded these results from Latin America, to better reflect the geographical segmentation of our business.

Since the beginning of 2014, Engineering and Construction comprises one operating segment, Engineering and Construction (previously, the operating segment of Technology and Other was also included). Since 2014, it is included in the operating segment of Engineering and Construction, in accordance with IFRS 8 (“Operating Segments”).

(1) In the interim consolidated financial statements of Abengoa and its subsidiaries as of June 30, 2013, prepared in accordance with IFRS as issued by the IASB and included in our final prospectus for our initial public offering in the United States filed with the SEC pursuant to Rule 424(b) of the Securities Act of 1933 on October 17, 2013, the Group applied IFRS 10 and 11 that came into effect on January 1, 2013 under IFRS-IASB. According to the terms and requirements established in IAS 8 "Accounting Policies, Changes in Accounting Estimates and Errors" and to the specific transition guidance of the new standards, we recasted the financial information as of and for the year ended December 31, 2012 in the final prospectus and the recasted financial information is included herein. Financial information for prior periods was not recasted therein or herein for IFRS 10 and 11 according to the transition guidance and consequently is not comparable with other periods presented. See "Presentation of Financial Information" and Note 2.1.1 to our Consolidated Financial Statements.

(2) On July 15, 2013, we closed the sale of 100% of our shares in our subsidiary Befesa. On that date, we received €331 million of cash proceeds. Taking into account the significance of the activities carried out by Befesa to Abengoa, the sale of this shareholding is considered as a discontinued operation to in accordance with IFRS 5 "Non-Current Assets Held for Sale and Discontinued Operations." In accordance with this standard, the results of Befesa until the closing of the sale and the result of this sale are included under a single heading (profit for the year from discontinued operations, net of tax) in our Consolidated Financial Statements and under separate line items in the consolidated cash-flow statement for the year ended December 31, 2013. Likewise, the consolidated income statement for the years ended December 31, 2012 and 2011 also includes the results of Befesa under a single heading (see "Presentation of Financial Information" and Note 7 to our Consolidated Financial Statements). The Befesa Sale also resulted in the removal of the Industrial Recycling of segment from our Industrial Production activity.

(3) Number of shares considered in all periods is after the increase in Class B shares distributed for no consideration approved by the Extraordinary General Shareholders' Meeting on September 30, 2012 and considered effective on October 2, 2012, equivalent to a split of shares, as described in Note 18 to our Consolidated Financial Statements.

(4) Dividends paid per share have been calculated considering the post-split number of shares, restating prior periods in order to be consistent with the earnings per share calculation. Dividends paid in 2013, 2012 (in two payments in July and April, respectively) and 2011 were €0.072 per share in the aggregate (U.S. \$0.094), €0.070 per share (U.S. \$0.088), and €0.040 per share (U.S. \$0.054), respectively.

(5) Consolidated EBITDA is calculated as profit for the year from continuing operations, after adding back income tax expense/(benefit), share of (loss)/profit of associates, finance expense net and depreciation, amortization and impairment charges of Abengoa, S.A. and its subsidiaries. Consolidated EBITDA is not a measurement of performance under IFRS as issued by the IASB and you should not consider Consolidated EBITDA as an alternative to operating income or consolidated profits as a measure of our operating performance, cash flows from operating, investing and financing activities as a measure of our ability to meet our cash needs or any other measures of performance under generally accepted accounting principles. We believe that Consolidated EBITDA is a useful indicator of our ability to incur and service our indebtedness and can assist securities analysts, investors and other parties to evaluate the Group. Consolidated EBITDA and similar measures are used by different companies for different purposes

and are often calculated in ways that reflect the circumstances of those companies. Consolidated EBITDA may not be indicative of our historical operating results, nor are meant to be predictive of potential future results. See "Presentation of Financial Information—Non-GAAP Financial Measures." The following table sets forth a reconciliation of Consolidated EBITDA to our consolidated profit for the indicated periods from continuing operations:

Reconciliation of Consolidated EBITDA to Corporate EBITDA:					
Consolidated EBITDA	1,529.1	1,082.3	1,365.1	948.6	1,163.0
Non-recourse EBITDA	(562.4)	(329.1)	(386.3)	(285.6)	(347.7)
Corporate EBITDA	966.7	753.2	978.8	663.0	815.3

- (7) Consolidated Adjusted EBITDA is calculated as Consolidated EBITDA, after adding back research and development costs of Abengoa, S.A. and its subsidiaries. Research and development costs are added back because we consider these expenses as investments in our business that generate returns over the long-term. Corporate Adjusted EBITDA is calculated as Consolidated EBITDA after adding back research and development costs of Abengoa, S.A. and its subsidiaries less EBITDA from non-recourse activities net of eliminations. According to the terms and conditions of the 2012 Forward Start Facility, Adjusted EBITDA does not include the effect of changes in accounting policies resulting from IFRS 10 and 11 and change in the application of IFRIC 12. Consolidated Adjusted EBITDA and Corporate Adjusted EBITDA are not measurements of performance under IFRS as issued by the IASB, and you should not consider Consolidated Adjusted EBITDA or Corporate Adjusted EBITDA as an alternative to operating income or consolidated profits as a measure of our operating performance, cash flows from operating, investing and financing activities as a measure of our ability to meet our cash needs or any other measures of performance under IFRS as issued by the IASB. We believe that Consolidated Adjusted EBITDA and Corporate Adjusted EBITDA are useful indicators of our ability to incur and service our corporate indebtedness, since the leverage ratio in the instruments governing our corporate indebtedness is generally calculated as a ratio of Net Corporate Debt to Corporate Adjusted EBITDA, and can assist investors and other parties to evaluate the Group. Consolidated Adjusted EBITDA and Corporate Adjusted EBITDA, and similar measures, are used by different companies for different purposes and are often calculated in ways that reflect the circumstances of those companies. Consolidated Adjusted EBITDA and Corporate Adjusted EBITDA may not be indicative of our historical operating results nor are they meant to be predictive of potential future results. See "Presentation of Financial Information—Non-GAAP Financial Measures."

The following table sets forth a reconciliation of Consolidated Adjusted EBITDA and Corporate Adjusted EBITDA to our consolidated profit for the indicated periods from continuing operations:

- (8) Gross Corporate Debt consists of the Group's: (a) long-term debt (debt with a maturity of greater than one year) incurred with credit institutions; plus (b) short-term debt (debt with a maturity of less than one year) incurred with credit institutions; plus (c) notes, obligations, promissory notes, financial leases and any other such obligations or liabilities, the purpose of which is to provide finance and generate a financial cost for the Group; plus (d) obligations relating to guarantees of third-party obligations (other than intra-group guarantees), but excluding any Non-Recourse Debt.
- (9) Gross Non-Recourse Debt consists of long- and short-term Non-Recourse Debt. Our characterization of Non-Recourse Debt may differ from that of other companies, as we include therein non-recourse finance in process, whereby the Parent Guarantor and/or Restricted Subsidiaries guarantee obligations in order to act as sponsors for the period prior to project companies securing long-term project financing (typically periods of less than 2-3 years). Although our classification of non-recourse finance in process as Non-Recourse Debt is in compliance with IFRS guidelines, we have discretion, within applicable IFRS guidelines, to reclassify this type of indebtedness. See "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Non Recourse Debt" for a full description.
- (10) Net Corporate Debt consists of Gross Corporate Debt excluding obligations relating to guarantees of third-parties (other than intra-Group guarantees), less total cash and cash equivalents (excluding non-recourse cash and cash equivalents) and short-term financial investments (excluding non-recourse short-term financial investments).
- (11) Covenant Net Corporate Debt consists of Gross Corporate Debt, less recourse and non-recourse cash and cash equivalents, and recourse and non-recourse short-term financial investments, without considering the changes in our accounting due to the application of IFRS 10 and 11 and the change in the application of IFRIC 12 "Service Concession Arrangements."
- (12) For the six-month periods ended June 30, 2014 and 2013, we reported our results for Mexico as a part of North America and excluded these results from Latin America.
- (13) The figures presented in this table for the six months ended June 30, 2013 have been adjusted on an unaudited basis to conform to our 2014 redefinition of activities and segments, including the creation of the Abengoa Yield segment and the elimination of the Technology and Other segment.

RISK FACTORS

Prospective investors should consider carefully the risks set out below as well as the other information contained in this Listing Memorandum prior to making any investment decision with respect to the Notes. Each of the risks highlighted below could have a material adverse effect on the business, results of operations, financial condition or prospects of Abengoa, which, in turn, could have a material adverse effect on the nominal amount and interest which investors will receive in respect of the Notes. In addition, each of the risks highlighted below could adversely affect the trading or the trading price of the Notes or the rights of investors under the Notes and, as a result, investors could lose some or all of their investment.

Prospective investors should note that the risks described below may not be the only risks that we face. We have described only those risks that we currently consider to be material and there may be additional risks that we do not currently consider to be material or of which we are not currently aware. Prospective investors should read the entire Listing Memorandum. Words and expressions defined in "Description of the Notes" or elsewhere in this Listing Memorandum have the same meanings in this section.

Risks Related to Our Business and the Markets in Which We Operate

Difficult conditions in the global economy and in the global capital markets have caused, and may continue to cause, a sharp reduction in worldwide demand for our products and services, and negatively impact our access to the levels of financing necessary for the successful development of our existing and future projects and the successful refinancing of our corporate indebtedness

Our results of operations have been, and continue to be, materially affected by conditions in the global economy and in the global capital markets. Concerns over inflation, energy costs, geopolitical issues, the availability and cost of credit, sovereign debt and the instability of the euro have contributed to increased volatility and diminished expectations for the economy and global capital markets going forward. These factors, combined with volatile oil prices, declining global business and consumer confidence and rising unemployment, have precipitated an economic slowdown and have led to a recession and weak economic growth. The economic instability and uncertainty may affect the willingness of companies to make capital expenditures and investment in the markets in which we operate. These events and continuing disruptions in the global economy and in the global capital markets may, therefore, have a material adverse effect on our business, financial condition and results of operations. Moreover, even in the absence of a market downturn, we are exposed to substantial risk of loss due to market volatility with certain factors, including consumer spending, business investment, government spending, the volatility and strength of capital markets, inflation affecting the business and economic environment and, ultimately, the amount and profitability of our business.

Generalized or localized downturns or inflationary pressures in our key geographical areas could also have a material adverse effect on the performance of our business. A significant portion of our business activity is concentrated in Spain, Brazil and the United States, and we are significantly affected by the general economic conditions in these countries. Spain has recently experienced negative economic conditions, including high unemployment and significant government debt which we believe could adversely affect our operations in the near future. We are a Spanish company and our share capital is denominated in euro. The effects on the European and global economy of any exit of one or more member states (each a "**Member State**") from the Eurozone, the dissolution of the euro and the possible redenomination of our share capital, financial instruments or other contractual obligations from euro into a different currency, or the perception that any of these events are imminent, are inherently difficult to predict and could give rise to operational disruptions or other risks of contagion to our business and have a material, adverse effect on our business, financial condition and results of operation. In addition, to the extent uncertainty regarding the European economic recovery continues to negatively impact government or regional budgets or demand for our environmental services, our business and results of operations could be materially adversely affected. Moreover, many of our customers are continually seeking to implement measures aimed at greater cost

savings, including efforts to improve cost efficiencies. These and other factors could therefore result in our customers reducing their budgets for spending on our products and services.

The global capital and credit markets have experienced periods of extreme volatility and disruption since the last half of 2008. Continued disruptions, uncertainty or volatility in the global capital and credit markets may limit our access to additional capital required to operate or grow our business, including our access to non-recourse project finance which we use to fund many of our projects, even in cases where such capital has already been committed. Such market conditions may limit our ability to replace, in a timely manner, maturing liabilities and access the capital necessary to grow our business, or replace financing previously committed for a project that ceases to be available to it. As a result, we may be forced to delay raising capital, issue shorter-term securities than we prefer, or bear a higher cost of capital which could decrease our profitability and significantly reduce our financial flexibility. In the event that we are required to replace previously committed financing to certain projects that subsequently becomes unavailable, we may have to postpone or cancel planned capital expenditures or construction projects.

Decreases in government budgets, reductions in government subsidies and adverse changes in law may adversely affect our business and the development of existing and new projects

Economic instability and difficult economic conditions in Spain have resulted in a decline in tax revenue obtained by our public administration customers at a time of rising public sector deficits. For example, reductions in government infrastructure budgets have had a significant impact on our results of operations as a substantial percentage of our revenue is derived from services we provide as a contractor or subcontractor on various projects with governmental entities, including state-owned companies.

Poor economic conditions have affected, and continue to affect, government budgets and threaten the continuation of government subsidies such as regulated revenues, cash grants, U.S. federal income tax benefits and other similar subsidies that benefit our business, particularly with respect to renewable energy. Such conditions may also lead to adverse changes in laws. For example, in the United States, due to the failure of the U.S. Congress to enact a plan by February 28, 2013 to reduce the federal budget deficit by \$1.2 trillion, \$85 billion of automatic budget cuts (known as “sequestration”) went into effect on March 1, 2013 reducing discretionary spending by all agencies of the federal government for the remainder of the federal fiscal year ending September 30, 2013. These cuts affected, among others, the U.S. Department of the Treasury’s, or the U.S. Treasury, program providing for cash grants in lieu of investment tax credits (“ITCs”). The Bipartisan Budget Act of 2013 was approved in December 2013. This budget agreement replaces \$63 billion in sequester cuts over two years split evenly between defense and non-defense programs. Both defense and non-defense programs will receive approximately \$22.4 billion more in the government fiscal year ending September 30, 2014 than would otherwise have been allocated under the sequestration scenario. The discretionary spending levels for government fiscal years 2014 and 2015 have not been set. While this budget agreement provides some near-term relief, sequestration, reduction in government spending in lieu of sequestration and fiscal issues raised by negotiations over the federal debt ceiling remain a long-term concern. See “*Regulation—United States Regulations—Solar Regulation—Renewable Energy Tax Incentives in the United States—Section 1603 Treasury Grant Program.*” In addition, a number of states and municipal authorities are experiencing severe fiscal pressures as they seek to address mounting budget deficits. The reduction or elimination of such subsidies or adverse changes in law could have a material adverse effect on the profitability of our existing projects and the lack of availability of new projects undertaken in reliance on the continuation of such subsidies could adversely affect our growth plan.

The revenue from the solar and biofuel projects that we undertake in our Concession-Type Infrastructure and Industrial Production activities, respectively, may be adversely affected if there is a decline in public acceptance and support of renewable energy

Certain persons, associations and groups of people could oppose renewable energy projects, citing, for example, misuse of water resources, landscape degradation, land use, food scarcity or price increase and

harm to the environment. Moreover, regulation may restrict the development of renewable energy plants in certain areas. In order to develop a renewable energy project, a solar power plant, or other infrastructure project, we are typically required to obtain, among other things, environmental impact permits or other authorizations and building permits, which in turn require environmental impact studies to be undertaken and public hearings and comment periods to be held during which any person, association or group may oppose a project. Any such opposition may be taken into account by government officials responsible for granting the relevant permits, which could result in the permits being delayed or not being granted or being granted solely on the condition that we carry out certain corrective measures to the proposed project.

As a result, we cannot guarantee that all of the renewable energy plants or infrastructure that we currently plan to develop or, to the extent applicable, are developing will ultimately be authorized or accepted by the local authorities or the local population. For example, the local population could oppose the construction of a renewable energy plant or infrastructure at the local government level, which could in turn lead to the imposition of more restrictive requirements.

In certain jurisdictions, if a significant portion of the local population were to mobilize against the construction of a renewable energy plant or infrastructure, it may become difficult, or impossible, for us to obtain or retain the required building permits and authorizations. Moreover, such challenges could result in the cancellation of existing building permits or even, in extreme cases, the dismantling of, or the retroactive imposition of changes in the design of, existing renewable energy plants or infrastructure.

A decrease in acceptance of renewable energy plants or infrastructure by local populations, an increase in the number of legal challenges, or an unfavorable outcome of such legal challenges could have a material adverse effect on our business, financial condition and results of operations.

We rely on certain regulations, subsidies and tax incentives that may be changed or legally challenged

We rely in a significant part on environmental and other regulation of industrial and local government activities, including regulations mandating, among other things, reductions in carbon or other greenhouse gas emissions and minimum biofuel content in fuel or use of energy from renewable sources. If the businesses to which such regulations relate were deregulated or if such regulations were materially changed or weakened, the profitability of our current and future projects could suffer, which could in turn have a material adverse effect on our business, financial condition and results of operations. In addition, uncertainty regarding possible changes to any such regulations has adversely affected in the past, and may adversely affect in the future, our ability to finance or refinance a project or to satisfy other financing needs.

Subsidy regimes for renewable energy generation have been challenged in the past on constitutional and other grounds (including that such regimes constitute impermissible European Union state aid) in certain jurisdictions. In addition, certain loan guarantee programs in the United States, including those which have enabled the U.S. Department of Energy (the “DOE”) to provide loan guarantees to support our Solana, Mojave and Hugoton projects, have been challenged on grounds of failure by the appropriate authorities to comply with applicable U.S. federal administrative and energy law. If all or part of the subsidy and incentive regimes for renewable energy generation in any jurisdiction in which we operate were found to be unlawful and, therefore, reduced or discontinued, we may be unable to compete effectively with conventional and other renewable forms of energy or we may be unable to complete certain ongoing projects. For more information regarding recent adverse regulatory developments in Spain, see “*Regulation—Spain—Solar Regulation—Solar Regulatory Framework—Royal Decree Law 9/2013.*”

The production from our renewable energy facilities is the subject of various tax relief measures or tax incentives in the jurisdictions in which they operate. These tax relief and tax incentive measures play an important role in the profitability of our projects. In the future, it is possible that some or all of these tax incentives will be suspended, curtailed, not renewed or revoked. For example, our Mojave project is reliant on the ITC cash grant program to repay a significant portion of its respective external debt financing and the

failure to receive anticipated funds, or any funds at all, pursuant to the ITC cash grant would have an adverse effect on our ability to receive distributions from our Mojave project. The occurrence of any of the above could adversely affect the profitability of our current plants and our ability to refinance projects, which could in turn have a material adverse effect on our business, financial condition, results of operations and cash flows.

We are subject to extensive governmental regulation in a number of different jurisdictions, and our inability to comply with existing regulations or requirements or changes in applicable regulations or requirements may have a negative impact on our business, results of operations or financial condition

We are subject to extensive regulation of our business in the United States, Mexico, Spain, Peru, Brazil and in each of the other countries in which we operate. Such laws and regulations require licenses, permits and other approvals to be obtained in connection with the operations of our activities. This regulatory framework imposes significant actual, day-to-day compliance burdens, costs and risks on us. In particular, the power plants and transmission lines that we operate in our Concession-Type Infrastructure and Industrial Production activities are subject to strict international, national, state and local regulations relating to their development, construction and operation (including, among other things, land acquisition, leasing and use of land, and the corresponding building permits, landscape conservation, noise regulation, environmental protection and environmental permits and energy power transmission and distribution network congestion regulations). Non-compliance with such regulations could result in the revocation of permits, sanctions, fines or even criminal penalties. Compliance with regulatory requirements, which may in the future include increased exposure to capital markets regulations, may result in substantial costs to our operations that may not be recovered. In addition, we cannot predict the timing or form of any future regulatory or law enforcement initiatives. Changes in existing energy, environmental and administrative laws and regulations may materially and adversely affect our business, margins and investments. Our business may also be affected by additional taxes imposed on our activities, reduction of regulated tariffs and other cuts or measures. For example, in late 2012 and throughout 2013, the Spanish government established new taxes on electricity production, eliminated certain premiums previously payable on renewable power generation, reduced adjustments for changes in the consumer price index and took other measures which materially adversely affected our thermo-solar electricity generation activity in Spain. See "*Regulation—Spain—Solar Regulation—Solar Regulatory Framework*" for further information. Further, similar changes in laws and regulations could increase the size and number of claims and damages asserted against us or subject us to enforcement actions, fines and even criminal penalties. In addition, changes in laws and regulations may, in certain cases, have retroactive effect and may cause the result of operations to be lower than expected. In particular, our activities in the energy sector are subject to regulations applicable to the economic regime of generation of electricity from renewable sources and to subsidies or public support in the benefit of the production of biofuels from renewable energy sources, which vary by jurisdiction, and are subject to modifications that may be more restrictive or unfavorable to us.

Our business is subject to stringent environmental regulation

We are subject to significant environmental regulation, which, among other things, requires us to perform environmental impact studies on future projects or changes to projects, obtain regulatory licenses, permits and other approvals and comply with the requirements of such licenses, permits and other approvals. There can be no assurance that:

- governmental authorities will approve these environmental impact studies;
- public opposition will not result in delays, modifications to or cancellation of any proposed project or license; or

- laws or regulations will not change or be interpreted in a manner that increases our costs of compliance or materially or adversely affects our operations or plants or our plans for the companies in which we have an investment or to which we provide our services.

We believe that we are currently in material compliance with all applicable regulations, including those governing the environment. While we employ robust policies with regard to environmental regulation compliance, there are occasions where regulations are breached. On occasion, we have been found not to be in compliance with certain environmental regulations, and have incurred fines and penalties associated with such violations which to date have not been material in amount. We can give no assurance, however, that we will continue to be in compliance or avoid material fines, penalties, sanctions and expenses associated with compliance issues in the future. Violation of such regulations may give rise to significant liability, including fines, damages, fees and expenses, and site closures. Generally, relevant governmental authorities are empowered to clean up and remediate releases of environmental damage and to charge the costs of such remediation and cleanup to the owners or occupiers of the property, the persons responsible for the release and environmental damage, the producer of the contaminant and other parties, or to direct the responsible parties to take such action. These governmental authorities may also impose a tax or other liens on the responsible parties to secure the parties' reimbursement obligations.

In Brazil, environmental liability applies to any individual or legal entity (whether public or private) that directly or indirectly causes, by action or omission, any damage to the environment. A sole fact may result in liability of three types (civil, administrative and criminal) independently or cumulatively. Brazilian courts may even lift the corporate veil in circumstances where a company is found to evade an environmental obligation to indemnify damage. When the veil of the corporation is lifted, the shareholders, rather than Abengoa itself, may be personally liable to redress the damage.

Environmental regulation has changed rapidly in recent years, and it is possible that we will be subject to even more stringent environmental standards in the future. For example, our activities are likely to be covered by increasingly strict national and international standards relating to climate change and related costs, and may be subject to potential risks associated with climate change, which may have a material adverse effect on our business, financial condition or results of operations. We cannot predict the amounts of any increased capital expenditures or any increases in operating costs or other expenses that we may incur to comply with applicable environmental, or other regulatory, requirements, or whether these costs can be passed on to customers through product price increases.

New regulations related to "conflict minerals" may force us to incur additional expenses, may make our supply chain more complex and may result in damage to our reputation with customers

On August 22, 2012, under the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010, or the Dodd-Frank Act, the SEC adopted new requirements for listed companies that use certain minerals and metals, known as conflict minerals, in their products, whether or not these products are manufactured by third parties. The term "conflict minerals" encompasses tantalum, tin, tungsten (and their ores) and gold. These requirements, which became applicable since May 2014, require companies to conduct due diligence and disclose whether or not such minerals originate from the Democratic Republic of Congo and adjoining countries. We have assessed whether conflict minerals are necessary to the functionality or production of any of our products or services. We could incur additional costs to comply with the disclosure requirements compared to previous periods, including costs related to determining the source of any of the relevant minerals and metals used in our products or services. So far, we have not detected conflict minerals and metals whose origin is Democratic Republic of Congo or adjoining countries in the production of any of our products or services. Since our supply chain is complex, we may not be able to sufficiently verify the origins for these minerals and metals used in our products or services through the due diligence procedures that we have implemented, which may harm our reputation. In such event, we may also face difficulties in satisfying customers who could require that all of the components of our products are conflict mineral-free.

We face pressure to improve the competitiveness of our renewable energy services and products

To ensure our long-term future, we must be able to compete on a non-subsidized basis with conventional and other renewable energy sources. The current levels of government support for renewable energy are generally intended to grant the industry a “grace period” to reduce the cost per kilowatt-hour of electricity or per gasoline gallon equivalent generated through technological advances, cost reductions and process improvements. Consequently, and as generation or production costs decrease, this level of government support is likely to be gradually phased out for many critical projects in the future, although existing and commissioned projects are expected to continue to benefit from feed-in tariffs or similar government incentives as already set. In the medium- to long-term, a gradual but significant reduction of the tariffs, premiums and incentives for renewable energy is likely. If these reductions continue and/or increase, market participants, including ourselves, may need to reduce prices to remain competitive against other alternatives. If cost reductions and product innovations do not occur, or occur at a slower pace than is required to achieve the necessary price reductions, this could have a material adverse effect on our business, financial condition and results of operations.

We also face significant competition from other renewable energy providers. With regard to the solar industry, we believe it may see significantly increased competition, as a result of new market entrants and/or substitute renewable energy sources due to increased demand for renewable energy sources. Other contributing factors to this increased competition are lower barriers to entry in these markets due to the increased standardization of technologies, improved funding opportunities and increased governmental support. Although we endeavor to maintain our competitiveness, no assurance can be given that we will succeed. Our failure to compete successfully would negatively impact our ability to grow our business and generate revenue, which could have a material adverse effect on our business, financial condition and results of operations.

Increases in the cost of energy and gas could significantly increase our operating costs

Some of our activities require significant consumption of energy and gas, and we are vulnerable to material fluctuations in their prices. Although our energy and gas purchase contracts generally include indexing mechanisms, we cannot guarantee that these mechanisms will cover all of the additional costs generated by an increase in energy and gas prices, particularly for long-term contracts, and some of the contracts entered into by us do not include any indexing provisions. Significant increases in the cost of energy or gas, or shortages of the supply of energy and/or gas, could have a material adverse effect on our business, financial condition and results of operations.

Our business has substantial capital expenditure requirements which requires us to have access to the global capital markets for financing

We have significant capital expenditure requirements which necessitates continued access to the global capital markets, as well as R&D&i costs and extensive construction costs for power transmission lines, solar power plants and installations, co-generation power plants, infrastructure for the production of ethanol and desalination plants. Our capital expenditure and R&D&i requirements depend on the number and type of projects we undertake in the future. Under concessions and other agreements, we have committed to certain future capital expenditures (see “*Management’s Discussion and Analysis of Financial Condition and Results of Operations—Factors Affecting Our Results of Operations—Capital Expenditures*”). Any recovery of our capital expenditures and R&D&i requirements, especially those made in respect of our concessions, will occur over a substantial period of time. Moreover, we may be unable to recoup our investments in these projects due to delays, cost overruns and general timing issues as to when revenue can be derived from these projects.

We must also continue to make significant expenditures on R&D&i in order to maintain and improve our competitive position. Furthermore, certain of our competitors may have substantially greater financial resources than we do. Any failure by us to react quickly and effectively to technological changes, or to obtain

necessary financing to conduct appropriate R&D&i activities, could have a material adverse effect on our business, financial condition and results of operations.

Transactions with counterparties exposes us to credit risk which we must effectively manage to mitigate the effect of counterparty defaults

We are exposed to the credit risk implied by default on the part of a counterparty (a customer, provider, partner or financial entity), which could impact our business, financial condition and results of operations. Although we actively manage this credit risk through the use of non-recourse factoring contracts, which involves banks and third parties assuming a counterparty's credit risk, and credit insurance, our risk management strategy may not be successful in limiting our exposure to credit risk, which could adversely affect our business, financial condition and results of operations.

We may be subject to increased finance expenses if we do not effectively manage our exposure to interest rate and foreign currency exchange rate risks

We are exposed to various types of market risk in the normal course of business, including the impact of interest rate changes and foreign currency exchange rate fluctuations. Some of our indebtedness bears interest at variable rates, generally linked to market benchmarks such as EURIBOR and LIBOR. Any increase in interest rates would increase our finance expenses relating to our variable rate indebtedness and increase the costs of refinancing our existing indebtedness and issuing new debt (see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Factors Affecting Our Results of Operations—Interest Rates"). In addition, we conduct our business and incur costs in the local currency of the countries in which we operate. As we continue expanding our business into existing markets such as North America and Latin America, and into new markets such as the Middle East, Africa, India, China and Australia, we expect that a large and increasing percentage of our revenue and cost of sales will be denominated in currencies other than our reporting currency, the euro. As a result, we will become subject to increasing currency translation risk, whereby changes in exchange rates between the euro and the other currencies in which we do business could result in foreign exchange losses.

We seek to actively manage these risks by entering into interest rate options and swaps to hedge against interest rate risk and future currency sale and purchase contracts and foreign exchange rate swaps to hedge against foreign exchange rate risk. If our risk management strategies are not successful in limiting our exposure to changes in interest rates and foreign currency exchange rates, our business, financial condition and results of operations could be materially and adversely affected.

Our competitive position could be adversely affected by changes in technology, prices, industry standards and other factors

The markets in which our activities operate change rapidly because of technological innovations and changes in prices, industry standards, product instructions, customer requirements and the economic environment. New technology or changes in industry and customer requirements may render existing products or services obsolete, excessively costly or otherwise unmarketable. As a result, we must continuously enhance the efficiency and reliability of our existing technologies and seek to develop new technologies in order to remain at the forefront of industry standards and customer requirements. If we are unable to introduce and integrate new technologies into our products and services in a timely and cost-effective manner, our competitive position will suffer and our prospects for growth will be impaired.

The delivery of our products and services to our customers and our performance under our contracts with our customers may be adversely affected by problems related to our reliance on third-party contractors and suppliers

The supply of some of our contracts includes services, equipment or software which we subcontract to subcontractors, and some of our key products and services use items from third-party suppliers. The delivery

of products or services which are not in compliance with the requirements of the subcontract, or the late supply of products and services, can cause us to be in default under our contracts with our customers. To the extent we are not able to transfer all of the risk or be fully indemnified by third-party contractors and suppliers, we may be subject to a claim by our customers as a result of a problem caused by a third-party that could have a material adverse effect on our reputation, business, results of operations and financial condition.

We may be adversely affected by risks associated with acquisitions or investments in joint ventures with third parties

If we decide to make certain acquisitions or financial investments in order to expand or diversify our business, we may take on additional debt to pay for such acquisitions. Moreover, we cannot guarantee that we will be able to complete all, or any, such external expansion or diversification transactions that we might contemplate in the future. To the extent we do, such transactions expose us to risks inherent in integrating acquired businesses and personnel, such as the inability to achieve projected synergies; difficulties in maintaining uniform standards, controls, policies and procedures; recognition of unexpected liabilities or costs; and regulatory complications arising from such transactions. Furthermore, the terms and conditions of financing for such acquisitions or financial investments could restrict the manner in which we conduct our business, particularly if we were to use debt financing. These risks could have a material adverse effect on our business, financial condition and results of operations.

In addition, we have made significant investments in certain strategic development projects with third parties, including governmental entities and private entities. In certain cases, these projects are developed pursuant to joint venture agreements over which we only have partial or joint control. Investments in projects over which we have partial or joint control are subject to the risk that the other shareholders of the joint venture, who may have different business or investment strategies than us or with whom we may have a disagreement or dispute, may have the ability to block business, financial or management decisions, such as the decision to distribute dividends or appoint members of management, which may be crucial to the success of the project or our investment in the project, or otherwise implement initiatives which may be contrary to our interests. Our partners may be unable, or unwilling, to fulfill their obligations under the relevant joint venture agreements and shareholder agreements or may experience financial or other difficulties that may adversely impact our investment in a particular joint venture. In certain of our joint ventures, we may also be reliant on the particular expertise of our partners and, as a result, any failure to perform our obligations in a diligent manner could also adversely impact the joint venture. If any of the foregoing were to occur, our business, financial condition and results of operations could be materially and adversely affected.

Our backlog of unfilled orders is subject to unexpected adjustments and cancellations and is, therefore, not a fully accurate indicator of our future revenue or earnings

At June 30, 2014, our backlog was €7,671 million. Our backlog represents management's estimate of the amount of contract awards that we expect to result in future revenue. A project for which the related contract has been signed is included in the calculation of the project portfolio value. A signed contract represents a legally binding agreement, meaning a secure revenue source in the future. The sole exception is concentrated solar power ("CSP") plants for engineering, construction and construction ("EPC") projects, which are considered in the amount of our backlog despite not having a contract signed, as they have been granted a feed-in tariff. Furthermore, we do not include in backlog predicted sales from our concession activities, such as energy sales, power transmission and water sales or commodity sales, or our industrial production activities, such as biofuel sales. Our backlog does include expected revenue based on engineering and design specifications that may not be final and could be revised over time, and also includes expected revenue for government and maintenance contracts that may not specify actual monetary amounts for the work to be performed. For these contracts, our backlog is based on an estimate of work to be performed, which is based on our knowledge of our customers' stated intentions. See "Management's Discussion and Analysis of Financial Condition and Results of Operations—Factors Affecting Our Results of Operations—Backlog and Concessions" and "Business" for more information. Furthermore, our ability to execute our

backlog is dependent on our ability to meet our operational and financing needs, and if we are unable to meet such needs, our ability to execute our backlog could be adversely affected, which could materially affect our business, financial condition and results of operations.

There can be no assurance that the revenue projected in our backlog will be realized or, if realized, will result in profit. Because of project terminations or suspensions and changes in project scope and schedule, we cannot predict with certainty when, or if, our backlog will be actualized. We can provide no assurance that we will not receive additional cancellations, and, even where a project proceeds as scheduled, it is possible that the customer may default and fail to pay amounts owed to us. Material delays, cancellations or payment defaults could materially affect our business, financial condition and results of operations.

Our definition of backlog may not necessarily be the same as that used by other companies engaged in activities similar to ours. As a result, the amount of our backlog may not be comparable to the backlog reported by such other companies.

We have international operations, including in emerging markets, that could be subject to economic, social and political uncertainties

We operate our activities in a range of international locations, including Australia, Latin America (including Brazil), China, India, North America, the Middle East and Africa, and expect to expand our operations into new locations in the future. Accordingly, we face a number of risks associated with operating in different countries that may have a material adverse impact on our business, financial condition and results of operations. These risks include, but are not limited to, adapting to the regulatory requirements of such countries, compliance with changes in laws and regulations applicable to foreign corporations, the uncertainty of judicial processes, and the absence, loss or non-renewal of favorable treaties, or similar agreements, with local authorities or political, social and economic instability, all of which can place disproportionate demands on our management, as well as significant demands on our operational and financial personnel and business. As a result, we can provide no assurance that our future international operations will remain successful.

In addition, we conduct business in various emerging countries worldwide. Our activities in these countries involve a number of risks that are more prevalent than in developed markets, such as economic and governmental instability, the possibility of significant amendments to, or changes in, the application of governmental regulations, the nationalization and expropriation of private property, payment collection difficulties, social problems, substantial fluctuations in interest and exchange rates, changes in the tax framework or the unpredictability of enforcement of contractual provisions, currency control measures limits on the repatriation of funds and other unfavorable interventions or restrictions imposed by public authorities. For example, certain of our contracts in countries such as Peru or Mexico, are payable in local currency at the exchange rate of the payment date. In the event of a rapid devaluation or implementation of exchange or currency controls, we may not be able to exchange the local currency for the agreed dollar amount, which could affect our liquidity position. Governments in Latin American frequently intervene in the economies of their respective countries and occasionally make significant changes in policy and regulations. Governmental actions in certain Latin American countries to control inflation and other policies and regulations have often involved, among other measures, price controls, currency devaluations, capital controls and limits on imports. In addition, in recent months, political upheaval, civil unrest and, in some cases, regime change and armed conflict, have occurred in certain countries in the Middle East and Africa, including Egypt, Iraq, Syria, Libya and Tunisia. Such events have increased political instability and economic uncertainty in certain countries in the Middle East and Africa where we currently operate or may seek to operate. Although our activities in emerging markets are not concentrated in any specific country (other than Brazil), the occurrence of one or more of these risks in a country or region in which we operate could have a material adverse effect on our business, financial condition and results of operations.

We could be adversely affected by violations of the U.S. Foreign Corrupt Practices Act and similar worldwide anti-bribery laws

The U.S. Foreign Corrupt Practices Act, the U.K. Bribery Act of 2010 and similar anti-bribery laws in other jurisdictions generally prohibit companies and their intermediaries from making improper payments to officials or others for the purpose of obtaining or retaining business. Our policies mandate compliance with these anti-bribery laws. We operate in many parts of the world that have experienced governmental corruption to some degree and, in certain circumstances, strict compliance with anti-bribery laws may conflict with local customs and practices. We train our personnel concerning anti-bribery laws and issues, and we also inform our partners, subcontractors, suppliers, agents and others who work for us or on our behalf that they must comply with anti-bribery law requirements. We also have procedures and controls in place to monitor compliance. We cannot assure that our internal controls and procedures always will protect us from the possible reckless or criminal acts committed by our employees or agents. If we are found to be liable for anti-bribery law violations (either due to our own acts or our inadvertence, or due to the acts or inadvertence of others including our partners, agents, subcontractors or suppliers), we could suffer from criminal or civil penalties or other sanctions, including contract cancellations or debarment, and loss of reputation, any of which could have a material adverse effect on our business. Litigation or investigations relating to alleged or suspected violations of anti-bribery laws, even if ultimately such litigation or investigations demonstrate that we did not violate anti-bribery laws, could be costly and could divert management's attention away from other aspects of our business.

Our growth may be limited by our inability to obtain new sites and expand existing ones

Our ability to maintain our competitive position and meet our growth objectives for our operations and, in particular, our Industrial Production activity and the Co-generation and other segment of our Concession-Type Infrastructure activity depend on our ability to upgrade existing sites or acquire or lease additional sites in strategically located areas. Our ability to obtain new sites and expand existing sites is limited by regulation and geographic considerations. Government restrictions, including environmental, public health and technical restrictions, limit where our facilities and plants can be located. The process of obtaining planning permission and licenses or permits to build, operate or expand our facilities and plants involve extended hearings and compliance with planning, environmental and other regulatory requirements. We may not be successful in obtaining the planning permissions, licenses or permits we require or such planning permissions, license or permits may contain onerous terms and conditions, which could have a material adverse effect on our business, financial condition and results of operations. Furthermore, objections from the public are capable of delaying, and even preventing, the proposed construction of a new or expanded facility or plant and the operation of a facility or plant. As a result, we may not be able to obtain extra site capacity where it is required. In some instances, it is also necessary for us to negotiate separate agreements with local authorities and third parties, such as landowners, who can make demands for additional obligations.

Our solar power plants can only be constructed in locations with suitable weather conditions, sufficient levels of solar radiation, access to water and suitable topographic features. Accordingly, the number of feasible sites available for solar power plants is limited in many countries, including Spain and the United States, particularly as growth in the number of installed solar plants can restrict the number of sites available for additional plants. Recent growth in the number of solar energy operators has increased competition for available sites. Moreover, although we undertake extensive studies before investing in the development of any particular site, the sites we choose to develop might not perform to our expectations. If these constraints on the establishment of solar power plants were to intensify, or if the sites we ultimately choose to develop do not perform as expected, this could have a material adverse effect on our business, financial condition and results of operations.

The construction projects in our Engineering and Construction activity and the facilities we operate in our Concession-Type Infrastructure and Industrial Production activities are inherently dangerous workplaces at which hazardous materials are handled. If we fail to maintain safe work environments, we can be exposed to significant financial losses, as well as civil and criminal liabilities

The construction projects we undertake in our Engineering and Construction activity and the facilities we operate in our Concession-Type Infrastructure and Industrial Production activity often put our employees and others in close proximity with large pieces of mechanized equipment, moving vehicles, manufacturing or industrial processes, heat or liquids stored under pressure and highly regulated materials. On most projects and at most facilities, we are responsible for safety and, accordingly, must implement safe practices and safety procedures. If we fail to design and implement such practices and procedures or if the practices and procedures we implement are ineffective, our employees and others may become injured and our and others property may become damaged. Unsafe work sites also have the potential to increase employee turnover, increase the cost of a project to our customers or the operation of a facility, and raise our operating costs. Any of the foregoing could result in financial losses, which could have a material adverse impact on our business, financial condition and results of operations.

In addition, our projects and the operation of our facilities can involve the handling of hazardous and other highly regulated materials, which, if improperly handled or disposed of, could subject us to civil and criminal liabilities. We are also subject to regulations dealing with occupational health and safety. Although we maintain functional groups whose primary purpose is to ensure we implement effective health, safety, and environmental work procedures throughout our organization, including construction sites and maintenance sites, the failure to comply with such regulations could subject us to liability. In addition, we may incur liability based on allegations of illness or disease resulting from exposure of employees or other persons to hazardous materials that we handle or are present in our workplaces.

Our safety record is critical to our reputation. Many of our customers require that we meet certain safety criteria to be eligible to bid for contracts, and many contracts provide for automatic termination or forfeiture of some, or all, of its contract fees or profit in the event we fail to meet certain measures. As a result, our failure to maintain adequate safety standards could result in reduced profitability or the loss of projects or clients, and could have a material adverse impact on our business, financial condition and results of operations.

Our business may be adversely affected by catastrophes, natural disasters, adverse weather conditions, unexpected geological or other physical conditions, or criminal or terrorist acts at one or more of our plants, facilities and construction sites

If one or more of our plants, facilities or construction sites were to be subject in the future to fire, flood or a natural disaster, adverse weather conditions, terrorism, power loss or other catastrophe, or if unexpected geological or other adverse physical conditions were to develop at any of our plants, facilities or construction sites, we may not be able to carry out our business activities at that location or such operations could be significantly reduced. This could result in lost revenue at these sites during the period of disruption and costly remediation, which could have a material adverse effect on our business, financial condition and results of operations. In addition, despite security measures taken by us, it is possible that our sites relating to our Concession-Type Infrastructure and Industrial Production activities or other sites, could be affected by criminal or terrorist acts. Any such acts could have a material adverse effect on our business, financial condition and results of operations.

Our insurance may be insufficient to cover relevant risks and the cost of our insurance may increase

Our business is exposed to the inherent risks in the markets in which we operate. Although we seek to obtain appropriate insurance coverage in relation to the principal risks associated with our business, we cannot guarantee that such insurance coverage is, or will be, sufficient to cover all of the possible losses we may face in the future. If we were to incur a serious uninsured loss or a loss that significantly exceeded the coverage limits established in our insurance policies, the resulting costs could have a material adverse effect on our business, financial condition and results of operations.

In addition, our insurance policies are subject to review by our insurers. If the level of premiums were to increase in the future, or certain types of insurance coverage were to become unavailable, we might not be able to maintain insurance coverage comparable to those that are currently in effect at comparable cost, or at all. If we were unable to pass any increase in insurance premiums on to our customers, such additional costs could have a material adverse effect on our business, financial condition and results of operations.

We are subject to litigation and other legal proceedings

We are subject to the risk of legal claims and proceedings and regulatory enforcement actions in the ordinary course of our business and otherwise. The results of legal and regulatory proceedings cannot be predicted with certainty. We cannot guarantee that the results of current or future legal or regulatory proceedings or actions will not materially harm our business, financial condition and results of operations nor can we guarantee that we will not incur losses in connection with current or future legal or regulatory proceedings or actions that exceed any provisions we may have set aside in respect of such proceedings or actions or that exceed any available insurance coverage, which may have a material adverse effect on our business, financial condition or results of operations. We are currently subject to various claims, proceedings, actions and investigations, including relating to possible anti-competitive practices, which could have a material adverse effect on our business, financial condition and results of operations. See "*Business—Legal Proceedings.*"

Unauthorized use of our proprietary technology by third parties may reduce the value of our products, services and brand, and impair our ability to compete effectively

We rely across our business on a combination of trade secret and intellectual property laws, non-disclosure and other contractual agreements and technical measures to protect our proprietary rights. These measures may not be sufficient to protect our technology from third-party infringement and, notwithstanding any remedies available, could subject us to increased competition or cause us to lose market share. In addition, these measures may not protect us from the claims of employees and other third parties. We also face risks with respect to the protection of our proprietary technology because the markets where our products are sold include jurisdictions that provide less protection for intellectual property than is provided under the laws of the United States or the European Union. Unauthorized use of our intellectual property could weaken our competitive position, reduce the value of our products, services and brand, and harm our business, financial condition and results of operations.

Our business may suffer if we are sued for infringing upon the intellectual property rights of third parties

We are subject to the risk of adverse claims and litigation alleging our infringement of the intellectual property rights of others. In the future, third parties may assert infringement claims, alleging infringement by our current, or future, services or solutions. These claims may result in protracted and costly litigation, may subject us to liability if we are found to have infringed upon third parties' intellectual property rights, and, regardless of the merits or ultimate outcome, may divert management's attention from the operation of our business.

Our business will suffer if we do not retain our senior management and key employees or if we do not attract and retain other highly skilled employees

Our future success depends significantly on the full involvement of our senior management and key employees, who have valuable expertise in all areas of our business. Our ability to retain and motivate our senior management and key employees and attract highly skilled employees will significantly affect our ability to run our business successfully and to expand our operations in the future. If we were to lose one or more of our senior management or, for example, valuable local managers with significant experience in the markets in which we operate, we might encounter difficulty in appointing replacements. This could have an adverse impact on our business, financial condition and results of operations.

The analysis of whether IFRIC 12 applies to certain contracts and activities, and the determination of the proper accounting treatment at each period end if it is determined that IFRIC 12 is to be applied, involves various complex factors and is significantly affected by legal and accounting interpretations

We account for certain of our Concession-Type Infrastructure assets as service concession agreements in accordance with the provisions of IFRIC 12. The infrastructures accounted for by us as service concessions under IFRIC 12 are mainly related to the activities concerning power transmission lines, desalination plants and thermo-solar electricity generation plants outside of Spain and (with prospective application from January 1, 2011) in Spain.

The analysis of whether IFRIC 12 applies to certain contracts and activities involves various complex factors and it is significantly affected by legal interpretation of certain contractual agreements or other terms and conditions with public sector entities. In particular, the application of IFRIC 12 requires a determination that the grantor of the concession governs what services the operator must provide using the infrastructure, to whom and at what price and also controls any significant residual interest in the infrastructure at the end of the term of the arrangement. When the operator of the infrastructure is also responsible for the engineering, procurement and construction of such asset, IFRIC 12 requires the separate accounting for the revenue and margins associated with the construction activities, which is not eliminated in consolidation even between companies within the same consolidated group, and for the subsequent operation and maintenance of the infrastructure. In such cases, the investment in the infrastructure used in the concession arrangement cannot be classified as property, plant and equipment of the operator, but rather must be classified as a financial asset or an intangible asset, depending on the nature of the payment rights established under the contract.

Therefore, the application of IFRIC 12 requires extensive judgment in relation to, among other factors, (i) the identification of certain infrastructures and contractual agreements in the scope of IFRIC 12, (ii) the understanding of the nature of the payments in order to determine the classification of the infrastructure as a financial asset or as an intangible asset and (iii) the timing and recognition of the revenue from construction and concessionary activity.

Changes in one or more of the factors described above may significantly affect our conclusions as to the appropriateness of the application of IFRIC 12 and, therefore, our results of operations or our financial position. As a result, if we determined that those assets were no longer within the scope of IFRIC 12, the revenue and associated margins realized by us during the construction phase of the affected assets would no longer be recognized in accordance with IFRIC 12 but rather would be eliminated in consolidation, resulting in a decrease in revenue and profits in our consolidated income statement for the period reported, and a reclassification from intangible assets to property, plant and equipment on the consolidated balance sheet. As such, a determination that those assets ceased to be within the scope of IFRIC 12 would affect the comparability of our results of operations and our financial condition for the periods, and as of the dates, before and after the date on which we made that determination.

For more information about the application of IFRIC 12, see “*Management’s Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policies and Estimates—Revenue from construction contracts*” and Note 2.5 to our Consolidated Financial Statements.

Market perceptions concerning the instability of the euro, the potential re-introduction of individual currencies within the Eurozone, or the potential dissolution of the euro entirely, could adversely affect our business or financial position

As a result of the credit crisis in Europe, in particular in Greece, Italy, Ireland, Portugal and Spain, the European Commission created the European Financial Stability Facility (the “**EFSF**”) and the European Financial Stability Mechanism (the “**EFSM**”) to provide funding to Eurozone countries in financial difficulties that seek such support. Throughout 2011, the EFSF and EFSM undertook a series of interventions to provide direct financing or other credit support to European governments. In March 2011, the European Council agreed on the need for Eurozone countries to establish a permanent stability mechanism, the European Stability Mechanism, which will be activated by mutual agreement, to assume the role of the EFSF and the EFSM in providing external financial assistance to Eurozone countries after June 2013. In July 2011, the European Council agreed to enlarge the EFSF capital guarantee from €440 billion to €780 billion, a decision which was ratified by all relevant national legislatures in October 2011. In October 2011, the European Council agreed to increase the ability of the EFSF to intervene in sovereign debt markets by granting it the ability to offer insurance to third parties purchasing Eurozone sovereign debt. Throughout 2012, certain Eurozone states announced austerity programs and other cost-cutting initiatives, and the EFSF was permitted to further expand its powers to provide direct loans to certain Eurozone financial institutions, including certain such institutions in Spain. Further, the ECB indicated its willingness to take further actions to support the euro if necessary. These measures and indications helped stabilize the euro through the end of 2012, 2013 and 2014. There can be no assurance that the recent market disruptions in Europe related to sovereign debt will not reoccur, nor can there be any assurance that future assistance packages will be available or, even if provided, will be sufficient to stabilize any affected countries and markets in Europe or elsewhere.

Uncertainty persists regarding the debt burden of certain Eurozone countries and regional governments and the solvency of certain European financial institutions and their respective ability to meet future financial obligations. The protracted adverse market conditions have created doubts as to the overall stability of the euro and the suitability of the euro as a single currency given the diverse economic and political circumstances in individual Member States. These and other concerns could lead to the re-introduction of individual currencies in one or more Member States, or, in more extreme circumstances, the possible dissolution of the euro entirely. Should the euro dissolve entirely, the legal and contractual consequences for holders of euro-denominated obligations would be determined by laws in effect at such time. These potential developments, or market perceptions concerning these and related issues, could adversely affect our business or our financial position, as a significant principal amount of our outstanding debt securities is denominated in euro.

The recoverability of our deferred tax assets depends on our future taxable income, which depends on management estimates that are uncertain

Our management assesses the recoverability of deferred tax assets on the basis of estimates of future taxable profit. These estimates are derived from the projections included in our five- and ten-year strategic plans, which are prepared on a yearly basis and reviewed twice a year for the accuracy of the assumptions used. As of December 31, 2013, a significant portion of our deferred tax assets are tax credits, which include mostly tax loss carryforwards in Brazil, the United States, the Netherlands and Spain and tax credits relating to tax incentives principally generated in Spain from our investments in R&D&i and export activities, whose recoverability depends mostly on our capacity to generate future taxable income in such countries. Based on our current estimates we expect to generate sufficient future taxable income to achieve the realization of our current tax credits and tax loss carryforwards, supported by our historical trend of business performance.

However, our current and deferred income taxes may be impacted by events and transactions arising in the normal course of business as well as by special non-recurring items. Changes in the assumptions and estimates made by management may result in the de-recognition of these deferred tax assets on our balance sheet if we consider that it is not probable that taxable profit will be available against which the deductible temporary difference can be utilized, with a corresponding charge to income tax expense in the consolidated income statement, although there would be no impact on cash flows.

Risks Related to the Engineering and Construction Activity

Our current and future fixed-price contracts may result in significant losses if costs are greater than anticipated

Many of our EPC contracts are fixed-price contracts which contain inherent risks because we agree to the selling price of the project at the time we enter into the contract. The selling price is based on estimates of the ultimate cost of the contract and we assume substantially all of the risks associated with completing the project, as well as the post-completion warranty obligations. Most EPC contracts are fixed-price turnkey projects where we are responsible for all aspects of the work, from engineering through construction, as well as commissioning, all for a fixed selling price.

In addition, we assume a project's technical risk and associated warranty obligations on all of our projects, meaning that we must tailor products and systems to satisfy the technical requirements of a project even though, at the time the project is awarded, we may not have previously produced such a product or system. Warranty obligations can range from re-performance of engineering services to modification or replacement of equipment. We also assume the risks related to revenue, cost and gross profit realized on such contracts that can vary, sometimes substantially, from the original projections due to changes in a variety of other factors, including but not limited to:

- engineering design changes;
- unanticipated technical problems with the equipment being supplied or developed by us, which may require that we spend our own money to remedy the problem;
- changes in the cost of components, materials or labor;
- difficulties in obtaining required governmental permits or approvals;
- changes in local laws and regulations;
- changes in local labor conditions;
- project modifications creating unanticipated costs;
- delays caused by adverse weather conditions; and
- project owners', suppliers' or subcontractors' failure to perform.

These risks may be exacerbated by the length of time between signing a contract and completing the project because most of the projects that we execute are long-term. In addition, we sometimes bear the risk of delays caused by unexpected conditions or events. We may be subject to penalties if portions of the long-term, fixed-priced projects are not completed in accordance with agreed-upon time limits.

Failure by us to successfully defend against claims made against us by customers, suppliers or subcontractors, or failure by us to recover adequately on claims made against customers, suppliers or subcontractors, could materially adversely affect our business, financial condition and results of operations

Our projects generally involve complex engineering, procurement of supplies and construction management. We may encounter difficulties in the engineering, equipment delivery, schedule changes and

other factors, some of which are beyond our control, that affect our ability to complete the project in accordance with the original delivery schedule or to meet the contractual performance obligations. In addition, we rely on third-party partners, equipment manufacturers and subcontractors to assist us with the completion of our contracts. As such, claims involving customers, suppliers and subcontractors may be brought against us, and by us, in connection with our project contracts. Claims brought against us include back charges for alleged defective or incomplete work, breaches of warranty and/or late completion of the project and claims for cancelled projects. The claims and back charges can involve actual damages, as well as contractually agreed upon liquidated sums. Claims brought by us against customers include claims for additional costs incurred in excess of current contract provisions arising out of project delays and changes in the previously agreed scope of work. Claims between us and our suppliers, subcontractors and vendors include claims like any of those described above. These project claims, if not resolved through negotiation, are often subject to lengthy and expensive litigation or arbitration proceedings. Charges associated with claims could materially adversely affect our business, financial condition and results of operations.

The performance of our Engineering and Construction activity is substantially dependent on the growth of our Concession-Type Infrastructure activity

Our Engineering and Construction activity is our largest activity by revenue. A significant component of the revenue of our Engineering and Construction activity relates to works on owned assets and the construction of new infrastructure assets used in the Concession-Type Infrastructure activity, primarily power plants, power transmission lines and water infrastructure. As a result, revenue and profits from our Engineering and Construction activity are substantially dependent on global demand for new power plants, power transmission lines and water infrastructure, and the ability of our Concession-Type Infrastructure activity to win concession-type arrangements associated with such infrastructure. If we are unsuccessful in growing our Concession-Type Infrastructure activity and obtaining new concession-type arrangements, whether due to the reductions in capital expenditures we plan to make on owned assets over the next several years following significant expenditures in recent years, declines in global demand for new power plants, power transmission lines and water infrastructure or otherwise, revenue and profits from our Engineering and Construction activity will decline, which could materially adversely affect our business, results of operations and financial condition.

The nature of our Engineering and Construction activity exposes us to potential liability claims and contract disputes which may reduce our profits

Our Engineering and Construction activity engages in operations where failures in design, construction or systems can result in substantial injury or damage to third parties. In addition, the nature of our Engineering and Construction activity results in customers, subcontractors and vendors occasionally presenting claims against us for recovery of cost they incurred in excess of what they expected to incur, or for which they believe they are not contractually liable. We have been, and may in the future, be named as a defendant in legal proceedings where parties may make a claim for damages or other remedies with respect to our projects or other matters. These claims generally arise in the normal course of our business. When it is determined that we have liability, we may not be covered by insurance or, if covered, the financial amount of these liabilities may exceed our policy limits.

Risks Related to the Concession-Type Infrastructure Activity

Development, construction and operation of new projects may be adversely affected by factors commonly associated with such projects

The development, construction and operation of conventional power plants, renewable energy facilities, water infrastructure plants, power transmission lines and a number of our other projects can be time-consuming and highly complex. In connection with their development and financing, we must generally obtain government permits and approvals and sufficient financing, as well as enter into land purchase or

leasing agreements, equipment procurement and construction contracts, operation and maintenance agreements, fuel supply and transportation agreements and any off-take arrangements. Factors that may affect our ability to construct new projects include, among others:

- delays in obtaining regulatory approvals, including environmental permits;
- shortages or changes in the price of equipment, materials or labor and related budget overruns;
- adverse changes in the political and/or regulatory environment in the jurisdictions in which we operate;
- adverse weather conditions or natural disasters, accidents or other unforeseen events; and
- the inability to obtain financing on satisfactory terms or at all.

Any of these factors may cause delays in commencement or completion of our projects and may increase the cost of projects. If we are unable to complete contemplated projects, the costs incurred in connection with such projects may not be recoverable, which may have an adverse effect on our business, financial condition and results of operations.

The concession agreements under which we conduct some of our operations are subject to revocation or termination

Certain of our operations are conducted pursuant to concessions granted by various governmental bodies. Generally, these concessions give us rights to provide services for a limited period of time, subject to various governmental regulations. The governmental bodies responsible for regulating these services often have broad powers to monitor our compliance with the applicable concession contracts and can require us to supply them with technical, administrative and financial information. Among other obligations, we may be required to comply with investment commitments and efficiency and safety standards established in the concession. Such commitments and standards may be amended in certain cases by the governmental bodies. Our failure to comply with the concession agreements or other regulatory requirements may result in concessions not being granted, upheld or renewed in our favor, or, if granted, upheld or renewed, may not be done on as favorable terms as currently applicable. This could have a material adverse effect on our business, financial condition and results of operations. For more information, see "*Management's Discussion and Analysis of Financial Condition and Results of Operations—Factors Affecting our Results of Operations—Backlog and Concessions.*"

Revenue from our Concession-Type Infrastructure activity is significantly dependent on regulated tariffs or other long-term fixed rate arrangements that restrict our ability to increase revenue from these operations

The revenue that we generate from our Concession-Type Infrastructure activity is significantly dependent on regulated tariffs or other long-term fixed rate arrangements. Under most of our concession agreements, a tariff structure is established in such agreements, and we have limited, or no possibility to independently raise tariffs beyond the established rates. Similarly, under a long-term power purchase agreement, we are required to deliver power at a fixed rate for the contract period, with limited escalation rights. In addition, we may be unable to adjust our tariffs or rates as a result of fluctuations in prices of raw materials, exchange rates, labor and subcontractor costs during the construction phase and the operating phase of these projects, or any other variations in the conditions of specific jurisdictions in which our concession-type infrastructure projects are located, which may reduce our revenue. Moreover, in some cases, if we fail to comply with certain pre-established conditions, the government or customer (as applicable) may reduce the tariffs or rates payable to us. In addition, during the life of a concession, the relevant government authority may unilaterally impose additional restrictions on our tariff rates, subject to the regulatory frameworks applicable in each jurisdiction. Governments may also postpone annual tariff increases until a new tariff structure is approved without compensating us for lost revenue. Furthermore, changes in laws and regulations may, in certain

cases, have retroactive effect and expose us to additional compliance costs or interfere with our existing financial and business planning. In the case that any one or more of these events occur, this could have a material adverse effect on our business, financial condition and results of operations.

Our Water segment depends significantly on public spending on infrastructure-related water projects and services, and reduced government spending could adversely affect our business, financial condition and results of operations

During 2012 and 2013, and for the six-month period ended June 30, 2014, the majority of the revenue from the Water segment of our Concession-Type Infrastructure activity was generated from contracts with governmental entities. Many of these public entities with which we do business are municipalities with limited budgets that are susceptible to annual fluctuations from year to year. The budgets of such municipalities are often dependent on the collection of local taxes or national government grants. As a result, resources that may be available to municipalities for infrastructure-related projects and services may become limited, with little or no notice. In addition, measures aimed at correcting the current economic environment have increased budget deficits of many of the national, regional and local governments and public administrations with which we do business, and no assurance can be given that funding for infrastructure-related projects and services will remain available at previous levels. Furthermore, the competition from competitors for publicly funded works has become increasingly intense, which may affect our margins in the future. Our dependence on public spending, coupled with increasing competition, may lead to reductions in our water concession revenue, which could have an adverse effect on our business, financial condition and results of operations.

Revenue from our power generation facilities is partially exposed to market electricity prices

In addition to regulated incentives, revenue from certain of our projects partially depends on market prices for sales of electricity. Market prices may be volatile and are affected by various factors, including the cost of raw materials, user demand, and if applicable, the price of greenhouse gas emission rights.

In several of the jurisdictions in which we operate, we are exposed to remuneration schemes which contain both regulated incentive and market price components. In such jurisdictions, the regulated incentive component may not compensate for fluctuations in the market price component, and, consequently, total remuneration may be volatile.

There can be no assurance that market prices will remain at levels which enable us to maintain profit margins and desired rates of return on investment. A decline in market prices below anticipated levels could have a material adverse effect on our business, financial condition and results of operations.

Our solar projects will be negatively affected if there are adverse changes to national and international laws and policies that support renewable energy sources

Recently, certain countries, such as the United States, a market that has become our principal market, have enacted policies of active support for renewable energy. These policies have included feed-in tariffs and renewable energy purchase obligations, mandatory quotas and/or portfolio standards imposed on utilities and certain tax incentives (such as the Investment Tax Credit in the United States). See "Regulation."

Although support for renewable energy sources by governments and regulatory authorities in the jurisdictions in which we operate has historically been strong, and European authorities, along with the United States government, have reaffirmed their intention to continue such support, certain policies currently in place may expire, be suspended or be phased out over time, cease upon exhaustion of the allocated funding or be subject to cancellation or non-renewal. Accordingly, we cannot guarantee that such government support will be maintained in full, in part or at all. In Spain, after years of strong support, the Spanish government has adopted a series of measures (including measures with retroactive effect) that have

significantly and adversely affected the prospects of renewable energy in Spain. See *“Regulation—Spain Solar Regulation—Solar Regulatory Framework.”*

The United States Congress reduced funding for a loan guarantee program that benefits, among other energy-related projects, solar power generation. In addition, \$85 billion of automatic budget cuts went into effect reducing discretionary spending by all agencies of the Federal government for the remainder of the Federal fiscal year ending September 30, 2013. These cuts affected, among other things, the U.S. Treasury's program providing for cash grants in lieu of investment tax credits. The Bipartisan Budget Act of 2013, approved in December 2013, replaced \$63 billion in sequester cuts over the 2014 and 2015 Federal fiscal years, split evenly between defense and non-defense programs. See *“Risk Factors—Risks Related to Our Business and the Markets in Which We Operate—Decreases in government budgets, reductions in government subsidies and adverse changes in law may adversely affect our business and the development of existing and new projects.”*

If the governments and regulatory authorities in the jurisdictions in which we operate were to further decrease or abandon their support for development of solar energy due to, for example, competing funding priorities, political considerations or a desire to favor other energy sources, renewable or otherwise, the power plants we plan to develop in the future could become less profitable or cease to be economically viable. Such an outcome could have a material adverse effect on our business, financial condition and results of operations.

Lack of power transmission capacity availability, potential upgrade costs to the power transmission grid, and other systems constraints could significantly impact our ability to build photovoltaic (“PV”) and CSP plants and generate solar electricity power sales

In order to deliver electricity from our PV and CSP plants to our customers, our projects need to connect to the power transmission grid. The lack of available capacity on the power transmission grid could substantially impact our projects and cause reductions in project size, delays in project implementation, increases in costs from power transmission upgrades, and potential forfeitures of any deposit we have made with respect to a given project. These power transmission issues, as well as issues relating to the availability of large systems such as transformers and switch gear, could significantly impact our ability to build PV and CSP plants and generate solar electricity sales.

Risks Related to Our Industrial Production Activity

The ability of our Industrial Production activity to operate at a profit is largely dependent on managing the spread among the prices of inputs (grain, sugarcane, natural gas and others) and outputs (ethanol, sugar, DGS and others), the prices of which are subject to significant volatility and uncertainty

The results of the Biofuels segment of our Industrial Production activity are highly impacted by commodity prices, including the spread between the cost of inputs that we must purchase and the price of outputs that we sell. Prices and supplies are subject to, and determined by, market forces over which we have no control, such as weather, domestic and global demand, shortages, export prices, and various governmental policies in the United States, Europe, Brazil and around the world. As a result of price volatility for these commodities, the operating results of the Biofuels segment of our Industrial Production activity may fluctuate substantially. Increases in input or decreases in output prices may make it unprofitable to operate our plants. In the last quarter of 2011 and in 2012 and 2013, our Biofuels segment was adversely affected by rising raw materials costs of grains and sugar resulting from drought conditions in the United States and heavy rainfall in Brazil, respectively, as well as low gasoline demand that depressed ethanol prices. Currently, ethanol prices are under pressure in Europe due to low gasoline demand. No assurance can be given that we will be able to purchase corn and natural gas at, or near, favorable prices and that we will be able to sell ethanol, sugar or distillers grains at, or near, favorable prices. Consequently, our results of operations and

financial position may be adversely affected by increases in the price of inputs or decreases in the price of outputs.

Our revenue may decrease, and operating costs may increase, if we do not effectively manage our exposure to commodity prices and supply risks through our hedging arrangements and other strategies

We are exposed to fluctuations in the price and supply of commodities in the Biofuels segment of our Industrial Production activity. The Biofuels segment of our Industrial Production activity competes with the food market for the supply of grain, such as wheat, barley, corn, sorghum, and sugar. Consequently, any increases in the cost of grains increase our costs of ethanol production. We use hedging arrangements, including future sale and purchase contracts and options listed on organized markets, as well as over-the-counter contracts, to mitigate these risks. Such arrangements, however, do not fully eliminate our exposure to commodity prices and supply risk, which could materially and adversely affect our business, financial condition and results of operations.

The price of ethanol from sugarcane is directly correlated to the price of sugar and is becoming closely positively correlated to the price of oil, so that a decline in the price of sugar will adversely affect our revenue from the sale of ethanol and a decline in the price of oil may adversely affect our revenue from the sale of ethanol

The price of ethanol, generally, is closely associated with the price of sugar, and, to some degree, is increasingly correlated to the price of oil. A significant portion of our ethanol production in Brazil is produced at sugarcane mills that produce both ethanol and sugar. Because sugarcane millers are able to alter their product mix in response to the relative prices of ethanol and sugar, this results in the prices of both products being directly correlated, and the correlation between ethanol and sugar may increase over time. In addition, sugar prices in Brazil are determined by prices in the global market, so that there is a strong correlation between Brazilian ethanol prices and global sugar prices.

Because flex-fuel vehicles allow consumers to choose between gasoline and ethanol at the fuel pump, ethanol prices are now becoming increasingly positively correlated to gasoline prices and, consequently, oil prices. We believe that the positive correlation between these products will increase over time. Accordingly, a decline in sugar prices will have an adverse effect on the financial performance of our ethanol and sugar businesses, and a decline in oil prices may have a material adverse effect on our business, financial condition and results of operations. However, biofuels are not the only alternative fuel for the transportation sector currently under development in the market. Future demand for fuel will depend on the relative attractiveness of other technologies, such as electric vehicles, synthetic fuels and other fossil fuels such as methane or liquid petroleum gas. Certain of these technological initiatives receive public support from governments. If biofuels do not remain an attractive alternative fuel competitive with gasoline and other emerging technologies, such occurrence may have an adverse effect on our business, financial condition and results of operations.

We rely on third-party distribution agreements for our products which we may not be able to maintain

We currently have several long-term contracts for the distribution of ethanol and biodiesel for a number of our plants. If these long-term contracts were not renewed, or were renewed on terms less favorable to us, it may have an adverse effect on our business, financial condition and results of operations.

The Biofuels segment of our Industrial Production activity may be adversely affected due to a change in the public opinion regarding the use of grain and sugar for the production of ethanol

We may face adverse public opinion to the use of grain and sugar for the production of ethanol. Governments responding to public pressure may put in place measures to divert the supply of grain and sugar away from ethanol production and towards the food market, thereby inhibiting our current ethanol production activities or our plans for future expansion, which could have a material adverse effect on our business, financial condition and results of operations.

Our revenue from the Biofuels segment of our Industrial Production activity may be affected by adverse weather conditions, disease, government programs, competition, government regulation and various factors beyond our control

Adverse weather conditions, disease, plantings, government programs and policies, competition and changes in global demand are factors that have historically caused damage to, and affected related prices in, grain and sugar cane crops, reducing our pool of supply for ethanol production, which may have a material adverse effect on our business, financial condition and results of operations. In addition, government regulation of biofuels, including the elimination of existing subsidies for biofuels in some of the markets in which we operate, may have the result of changing consumer preferences or the prices by which we produce and market such biofuels.

Our Industrial Production activity is subject to an increasingly demanding level of governmental regulations and environmental legislation

Our Industrial Production activity is subject to an increasingly demanding level of governmental regulations. Among other things, these laws and regulations impose comprehensive local, state, municipal, foreign and supranational statutory and regulatory requirements concerning, among other matters, the treatment, acceptance, identification, storage, handling, transportation and disposal of industrial by-products, hazardous and solid waste materials, air emissions and soil contamination. In addition, environmental liability in Brazil is strict and joint. As a result, we may be held liable for damages caused to the environment by third parties hired by us for waste disposal and other services. There can be no assurance that potential liabilities, expenditures, fines and penalties associated with environmental laws and regulations will not be imposed on us in the future or that such liabilities, expenditures, fines or penalties will not have a material adverse effect on our business, financial condition and results of operations.

Risks Related to Our Indebtedness

We operate with a high amount of indebtedness and we may incur significant additional debt

Our operations are capital intensive and we operate with a significant amount of indebtedness, which, as of June 30, 2014, totaled €12,924.5 million, of which €6,605.4 million was gross corporate debt and €6,319.1 million was Non-Recourse Debt. Additionally, we have additional corporate borrowing capacity of €581.0 million which we may incur without triggering a breach of our financial covenants. Moreover, as a result of our implementation of the new accounting standards set forth in IFRS 10, which came into effect on January 1, 2012, for purposes of the Consolidated Financial Statements, we have de-consolidated companies that do not fulfill the conditions of effective control of the interest during the construction phase in terms of decision making for their integration in our financial statements according to the equity method. However, it is expected that these projects will be fully consolidated again once they enter into operation and we gain control over them, with corresponding significant increases in our long-term non-recourse project financing, among others. Our indebtedness may increase, from time to time, in the future for various reasons, including fluctuations in operating results, capital expenditures and potential acquisitions or joint ventures.

Our substantial indebtedness could have important consequences to you. For example, it could:

- make it more difficult for us to successfully refinance upcoming maturities;
- make it more difficult for us to satisfy our obligations with respect to our outstanding debt obligations;
- increase our vulnerability to general adverse economic and industry conditions;
- require us to dedicate a substantial portion of our cash flow from operations to payments on our indebtedness, thereby reducing the availability of our cash flow to fund working capital, capital expenditures, R&D&i and other general corporate purposes;
- restrict our ability to make certain distributions with respect to our shares and the ability of our subsidiaries to make certain distributions to us, in light of restricted payment and other financial covenants in our financing agreements;
- limit our flexibility in planning for, or reacting to, changes in our business and the market in which we operate;
- place us at a competitive disadvantage compared to our competitors that have less debt; and
- limit our ability to borrow additional funds.

If operating cash flows and other resources (for example, any available debt or equity funding or the proceeds of asset sales or short-term financing lines) are not sufficient to repay obligations as they mature or fund liquidity needs, we may be forced to do one or more of the following:

- delay or reduce capital expenditures;
- forego business opportunities, including acquisitions; or
- restructure or refinance all, or a portion, of our debt on or before maturity, any or all of which could have a material adverse effect on our business, financial condition and results of operations and, therefore, on the ability of the obligors under that debt to perform their respective obligations in respect of our debt.

If we were to fail to satisfy any of our debt service obligations or to breach any related financial or operating covenants, the holders of that debt could declare the full amount of the indebtedness to be immediately due and payable and could foreclose on any assets pledged as collateral. Further, certain of our financing arrangements contain cross-default provisions such that a default under one particular financing arrangement could automatically trigger defaults under other financing arrangements. Such cross-default provisions could, therefore, magnify the effect of an individual default. As a result, any default under any indebtedness to which we are a party could result in a substantial loss to us or could otherwise have a material adverse effect on our and our subsidiaries' ability to perform our and their respective obligations in respect of any of our debt obligations.

Despite our significant current leverage, the terms of the indentures and other agreements governing our outstanding indebtedness will permit us and our subsidiaries, joint ventures and associates to incur substantial additional debt, including secured debt, in the future. The Indenture permits the Parent Guarantor and any Restricted Subsidiary to incur an unlimited principal amount of Non-Recourse Financing (as defined in the Indenture) whether as principal obligor or guarantor. In addition, such Non-Recourse Financing may be secured on assets of the Parent Guarantor and any Restricted Subsidiary.

Non-Recourse Financing as defined in the Indenture means "any indebtedness which is, or is expected to be recorded as 'non-recourse financing' in the Parent Guarantor's consolidated annual accounts". While the Parent Guarantor intends to classify the Notes and the Guarantees thereof as Financial Indebtedness upon issuance, the Parent Guarantor may reclassify the Notes and the Guarantees thereof and to classify any Additional Notes and Guarantees thereof and any other indebtedness incurred by the Parent Guarantor or

any of its Subsidiaries, as “Non-Recourse Financing,” when the necessary requirements have been met, notwithstanding in each case that the creditors under such indebtedness may have a direct claim on the assets of the borrowers and guarantors of such indebtedness if such indebtedness is, or is expected to be recorded as “non-recourse financing” in the Parent Guarantor’s consolidated annual accounts.

Furthermore, we rely to a significant extent on short-term financing lines to finance our working capital requirements. If these lines are withdrawn, reduced or otherwise not available to us, we could be required to seek other sources of financing which could involve incurring substantial additional debt, including secured debt, in the future, if available. We also are increasingly reliant on commercial paper to manage our working capital requirements. If short-term financing lines or the commercial paper market are not available to us, and we are not able to replace such sources of financing with other sources of financing on a timely basis, or at all, this would have a material adverse effect on our liquidity position.

Our operating and financial flexibility may be reduced by restrictive covenants in the agreements governing our indebtedness and other financial obligations

The agreements governing our indebtedness and other financial obligations applicable to us and certain of our subsidiaries contain various negative and affirmative covenants, including the requirement to maintain certain specified financial ratios. Depending on the agreement, these covenants reduce our operating flexibility as they limit our and certain of our subsidiaries’ ability to, among other things: incur additional indebtedness; make distributions, loans, and other types of restricted payments; liquidate or dissolve the applicable companies; enter into any spin-off, transformation, merger, or acquisition, subject to certain exceptions set forth in the applicable agreement; and change the nature or scope of the lines of business. The extent of the restrictions on our subsidiaries’ ability to transfer assets to us through loans, advances or cash dividends without the consent of third parties is significant, requiring us to include condensed financial information regarding Abengoa, S.A. as part of our Consolidated Financial Statements. Furthermore, some of our subsidiaries have restrictions on their ability to pay dividends or make other distributions to us, including restrictions under the terms of the agreements governing project-level financing, or restrictions applicable in the various jurisdictions in which we operate, such as exchange controls or similar matters. Our project-level financing agreements generally prohibit distributions to us unless certain specific conditions are met, including the satisfaction of financial ratios. If we or any of our applicable subsidiaries violate any of these covenants, a default may result, which, if not cured or waived, could result in the acceleration of our debt and could limit the ability of our subsidiaries to make distributions to us.

To service our indebtedness, we will require a significant amount of cash. We have generated significant negative cash outflows as for the six-month period ended June 30, 2014 and in the last three fiscal years and our liabilities at the end of each of those years have exceeded our tangible assets. Our ability to generate cash depends on many factors beyond our control.

As a result of the investments we have made in our activities in the six-month period ended June 30, 2014 and the years ended December 31, 2013, 2012 and 2011, which totaled €943.5 million, €1,884.4 million, €2,214.5 million and €2,912.9 million, respectively, in capital expenditures, we have generated a significant amount of negative cash outflows during each of those periods, and our liabilities at each respective period end have exceeded our tangible assets.

Our ability to make payments on, and to refinance, our indebtedness and fund planned capital expenditures and R&D&i initiatives will depend on our ability to generate cash in the future. In addition, a substantial part of the non-recourse financing of our project companies is fully amortized over the term of such debt, and we rely on cash flows from such operating companies to meet our payment obligations thereunder. Our cash flow, to a certain extent, is subject to general economic, financial, competitive, legislative, regulatory and other factors that are beyond our control. Based on our current level of operations, we believe our cash flow from operations, available cash and available borrowings under our credit facilities will be adequate to meet our future liquidity needs for at least twelve months. We cannot assure you,

however, that our business will generate sufficient cash flow from operations; that ongoing cost savings and operating improvements will be realized on schedule; that we will be able to maintain the same terms for our payments and collections and therefore maintain our negative working capital balance; or that future borrowings will be available to us under our credit facilities in an amount sufficient to enable us to pay our indebtedness or to fund our other liquidity needs or to enable us to pursue our uncommitted capital expenditure plan (see "*Liquidity and Capital Resources*"). We may need to refinance all, or a portion, of our indebtedness on or before maturity. We cannot assure you that we will be able to refinance any of our indebtedness on commercially reasonable terms, or at all.

We may not be able to raise the funds necessary to finance a mandatory prepayment of amounts outstanding under certain of our credit facilities in the event of a change of control if so required by a majority of the lenders or a change of control offer required by the indentures governing our outstanding debt securities

Under the terms of certain of our credit facilities, the majority of the lenders (as defined in each such facility) under each such facility have the right to require early repayment of all outstanding borrowings under such facility, together with accrued interest and all accrued commissions and expenses, upon a person or entity other than our current controlling shareholder gaining control of us. Under the terms of our outstanding debt securities, we are required to offer to repurchase such debt securities if we experience a change of control as defined in the indentures governing such debt securities. We may be unable to raise sufficient funds at the time of a change of control to make such mandatory repayment of all outstanding borrowings under those credit facilities or repurchase such debt securities.

Existing and potential future defaults by subsidiaries, joint ventures or associates pursuant to non-recourse indebtedness could adversely affect us

We attempt to finance certain of our projects and significant investments, including capital expenditures typically relating to concessions or fixed tariff take-or-pay agreements, primarily under loan agreements and related documents which, except as noted below, require the loans to be repaid solely from the revenue of the project being financed thereby, and provide that the repayment of the loans (and interest thereon) is secured solely by the shares, physical assets, contracts and cash flow of that project company. This type of financing is usually referred to herein as "Non-Recourse Debt," "non-recourse financing" or "project financing." As of June 30, 2014, we had €12,924.5 million outstanding indebtedness on a consolidated basis, of which €6,319.1 million was Non-Recourse Debt of which approximately €766.3 million was non-recourse finance in process. Out of the €766.3 million, €485.4 million was guaranteed by the Parent Guarantor and/or Subsidiary Guarantors; €190.9 million was guaranteed by the Parent Guarantor and one or more Restricted Subsidiaries that are not Subsidiary Guarantors; and €90.0 million was guaranteed by Restricted Subsidiaries that are not Subsidiary Guarantors, in each case as non-recourse finance in process, whereby the Parent Guarantor and/or Restricted Subsidiaries guarantee obligations in order to act as sponsors for the period prior to project companies securing long-term project financing (typically periods of less than 2-3 years). In the event of default under these obligations, creditors would have recourse to the Parent Guarantor and any Restricted Subsidiary that had guaranteed such obligations. If there is a risk of non-compliance with the debt repayment schedule of non-recourse finance in process, such financing would be reclassified on the consolidated statement of financial position as a type of recourse financing, depending upon the nature of the arrangement. See Note 19.6 to our Consolidated Financial Statements for further details.

While the lenders under the remainder of our non-recourse project financings other than non-recourse finance in process do not have direct recourse to us or our subsidiaries (other than the project borrowers

under those financings), defaults by the project borrowers under such financings can still have important consequences for us and our subsidiaries, including, without limitation:

- reducing our receipt of dividends, fees, interest payments, loans and other sources of cash, since the project company will typically be prohibited from distributing cash to us and our subsidiaries during the pendency of any default;
- causing us to record a loss in the event the lender forecloses on the assets of the project company; and
- the loss or impairment of investors' and project finance lenders' confidence in us.

Any of these events could have a material adverse impact on our financial condition and results of operations.

Any future credit rating downgrade may impair our ability to obtain financing and may significantly increase our cost of indebtedness

Credit ratings affect the cost and other terms upon which we are able to obtain financing (or refinancing). Rating agencies regularly evaluate us and their ratings of our default rate and existing capital markets debt are based on a number of factors, including the credit rating of the Kingdom of Spain, where we are incorporated. On April 26, 2012, Standard & Poor's Rating Services ("**S&P**") downgraded the debt of Spain from "A" to "BBB+," citing concerns related to the negative economic growth and the capital adequacy of certain Spanish financial institutions. This was followed by rating downgrades by Fitch Ratings, Inc. ("**Fitch**") on November 1, 2013, which lowered Spain's rating from "A" to "BBB" with a stable outlook, and Moody's Investors Service, Inc. ("**Moody's**") on June 13, 2012, which likewise lowered Spain's rating from "A3" to "Baa3." Moody's upgraded its rating to "Baa2" on February 24, 2014, with a positive outlook. Fitch subsequently raised its rating to "BBB+." S&P announced on October 10, 2012 that it had further lowered its long-term sovereign credit rating of the Kingdom of Spain to "BBB-" from "BBB+" and the short-term sovereign credit rating to A-3 from A-2, with a negative outlook on the long-term rating; the outlook was changed to stable on November 29, 2013.

Partially as a result of the downgrade of Spain, where we are incorporated, on July 17, 2012, Moody's downgraded our corporate family and probability of default ratings from "Ba3" to "B1" with a stable outlook. Concurrently, Moody's downgraded the rating on certain of our existing high-yield notes from "Ba3" to "B1." On November 30, 2012 Moody's changed to negative from stable the outlook on the B1 rating of our corporate family and such high-yield notes and downgraded them on March 20, 2013 from B1 to B2 with a stable outlook. On December 27, 2012, S&P changed the perspective of the B+ rating from stable to watch negative of our corporate family and such high yield notes and S&P downgraded them on April 3, 2013 to "B" with negative outlook. On March 19, 2014, S&P affirmed our "B/B" long- and short-term corporate credit ratings and revised its outlook to positive from negative and Moody's affirmed the credit rating "B2" with a stable outlook on April 8, 2014. In addition, on October 24, 2013, Fitch affirmed the credit rating "B+" with a stable outlook.

Any future downgrade of the Kingdom of Spain, our corporate family or of our outstanding nonconvertible debt securities may impede our ability to obtain financing on commercially acceptable terms, or on any terms at all, or it may interfere with our ability to implement our corporate strategy. There can be no assurance that further credit ratings downgrades, either of Spain or our Group, will not occur. The occurrence of any of these events could have a material adverse effect on our business, financial condition and results of operations.

Risks Related to the Notes

The Notes may not be a suitable investment for all investors

Each prospective investor in the Notes must determine the suitability of that investment in light of its own circumstances. In particular, each potential investor should:

- have sufficient knowledge and experience to make a meaningful evaluation of the Notes, the merits and risks of investing in the Notes and the information contained in this Listing Memorandum or any applicable supplement;
- have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation, an investment in the Notes and the impact such investment will have on its overall investment portfolio;
- understand thoroughly the terms of the Notes and be familiar with the behavior of financial markets in which they participate; and
- be able to evaluate (either alone or with the help of a financial advisor) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

The Notes were structurally subordinated to the indebtedness and other obligations of the non-guarantor subsidiaries of the Parent Guarantor, including its Unrestricted Subsidiaries, and may be effectively subordinated in the future to secured indebtedness of the Issuer and the Guarantors

The Notes were structurally subordinated to any indebtedness of the subsidiaries of the Parent Guarantor that do not guarantee the Notes. As of June 30, 2014, after giving pro forma effect to the issuance of the Notes and the use of proceeds therefrom, the subsidiaries of the Parent Guarantor that will not guarantee the Notes (including its Unrestricted Subsidiaries) had €8,413.4 million of indebtedness outstanding and represented 62.7% and 36.0% of total indebtedness and total assets, respectively. As of and for the six months ended June 30, 2014, after giving pro forma effect to the issuance of the Notes and the use of proceeds therefrom, the subsidiaries of the Parent Guarantor that will not guarantee the Notes (including the Unrestricted Subsidiaries) represented approximately 40.8% of Consolidated EBITDA. In the event of a liquidation, winding-up, dissolution or a bankruptcy, administration, reorganization, insolvency, receivership, or similar proceeding, of any of these non-guarantor subsidiaries, the non-guarantor subsidiaries will pay the holders of their own debt, their trade creditors and any preferred shareholders before they would be able to distribute any of their assets to the Issuer or any of the Guarantors.

In addition, the Notes and the Note Guarantees are unsecured obligations of the Issuer and the Guarantors, respectively. Although the Issuer and the Guarantors do not, as of the Issue Date, have any secured indebtedness outstanding, the Indentures permit the Parent Guarantor and its subsidiaries to guarantee certain indebtedness and other obligations without ratably securing the Notes or the Note Guarantees. Accordingly, to the extent that the Guarantors were to secure any of their indebtedness, including indebtedness under the Credit Facilities, to the extent not required to secure the Notes or the Note Guarantees in accordance with the terms of the Indentures, the obligation of the Guarantors, in respect of their Guarantees, would be effectively subordinated to such secured indebtedness to the extent of the value of the security securing such indebtedness.

A number of our present and future subsidiaries will constitute Unrestricted Subsidiaries under the Indentures, and will, therefore, not be subject to the restrictive covenants thereunder

Every subsidiary of the Group which, as of the Issue Date, has outstanding Non-Recourse Debt, will constitute Unrestricted Subsidiaries under the Indentures. In addition, all existing and newly formed

subsidiaries which incur Non-Recourse Debt will also constitute Unrestricted Subsidiaries. When such Unrestricted Subsidiary's Non-Recourse Debt is extinguished, such subsidiary may become a Restricted Subsidiary under the Indentures. This means that, for so long as, and to the extent that, such subsidiaries remain Unrestricted Subsidiaries, the restrictive covenants contained in the Indentures governing the applicable series of Notes will not apply to such subsidiaries. Accordingly, Unrestricted Subsidiaries, among other things, may incur unlimited Non-Recourse Debt, will not be limited in their ability to pay dividends or make other distributions to third parties and may sell their assets without any restriction of the use of proceeds therefrom. As of and for the twelve months ended June 30, 2014, our Unrestricted Subsidiaries generated €562.4 million in EBITDA, and had outstanding Non-Recourse Debt of €6,319.1 million on a historical basis, which includes non-recourse finance in process, whereby the Parent Guarantor and/or Restricted Subsidiaries guarantee obligations in order to act as sponsors for the period prior to project companies securing long-term project financing (typically periods of less than 2-3 years). We have not included in this Listing Memorandum, and are not obligated under the terms of the Indentures to provide, separate historical financial information for the Parent Guarantor and the group of Restricted Subsidiaries and Unrestricted Subsidiaries, respectively. See "*Presentation of Financial Information—General.*"

The claims of holders of the Notes are structurally subordinated, particularly to creditors of Non-Recourse Financing

Our operations are principally conducted through subsidiaries. Accordingly, the Parent Guarantor is and will be dependent on its subsidiaries' operations to service its payment obligations in respect of the Notes. The Notes are structurally subordinated to the claims of all holders of debt securities and other creditors, including trade creditors, of the Parent Guarantor's subsidiaries that are not Subsidiary Guarantors, and structurally and/or effectively subordinated to the extent of the value of collateral to all secured creditors of the Parent Guarantor and its subsidiaries. In the event of an insolvency, bankruptcy, liquidation, reorganization, dissolution or winding up of the business of any subsidiary of the Parent Guarantor that is not a Subsidiary Guarantor, creditors of such subsidiaries, secured creditors and obligations that may be preferred by provisions of law that are mandatory and of general application generally will have the right to be paid in full before any distribution is made to the Parent Guarantor.

In addition, the claims of holders of the Notes are structurally subordinated to claims made by creditors of Non-Recourse Debt. As of June 30, 2014, our Unrestricted Subsidiaries had outstanding Non-Recourse Debt of €6,319.1 million, which includes non-recourse finance in process, whereby the Parent Guarantor and/or Restricted Subsidiaries guarantee obligations in order to act as sponsors for the period prior to project companies securing long-term project financing (typically periods of less than 2-3 years). The Parent Guarantor's consolidated annual accounts include, as assets, its equity interests in entities which have raised Non-Recourse Financing and the Group usually grants security over these equity interests in favor of the relevant creditors. If these creditors were to enforce this security, our assets would be depleted by the value attributable to such equity interests and we would no longer be entitled to the revenue generated by such assets.

Restrictions imposed by the Indentures and our other outstanding debt may limit our ability to take certain actions

The Indentures and certain other agreements governing our other outstanding debt, currently or in the future, may limit our flexibility in operating our business. For example, these agreements generally restrict our ability to, among other things:

- borrow money;
- pay dividends or make other distributions;
- create certain liens;

- make certain asset dispositions;
- issue or sell share capital of the Parent Guarantor's subsidiaries;
- guarantee indebtedness;
- enter into transactions with affiliates; or
- merge, consolidate or sell, lease or transfer all or substantially all of our assets.

The operating and financial restrictions and covenants in the Indentures and agreements governing our other outstanding debt may adversely affect our ability to finance our future operations or capital needs, to engage in other business activities that may be in our interest and to execute our business strategy as we intend to do so. If we or any of our applicable subsidiaries violate any of these covenants, a default may result, which, if not cured or waived, could result in the acceleration of our debt and could limit the ability of our subsidiaries to make distributions to us.

The Issuer is a finance subsidiary that has no revenue-generating operations of its own and depends on cash received from the Funding Loan to be able to make payments on the Notes

The Issuer is a finance subsidiary, conducts no business operations of its own, and has not engaged in, and will not be permitted to engage in, any activities other than the issuance of notes, the on-lending of the proceeds from any such issuance to the Parent Guarantor and the servicing of its obligations under the Notes, and associated activities related thereto and other activities related to future permitted debt issuances. The Issuer has no subsidiaries and its only material assets and only sources of revenue are its rights to receive payments from the Parent Guarantor pursuant to the Funding Loan and any other funding loans made in connection with the financing transactions. The ability of the Issuer to make payments on the Notes is, therefore, dependent on the payments received from the Parent Guarantor, including pursuant to the Funding Loan. If the payments from the Parent Guarantor are not made, for whatever reason, the Issuer may not have any other sources of funds available to it that would permit it to make payments on the Notes. In such event, holders of the Notes would have to rely upon claims for payment under the Note Guarantees, which are subject to the risks and limitations described herein.

The Parent Guarantor's ability to pay amounts due on the Funding Loan or its Note Guarantee will depend on dividends and other payments received from its subsidiaries

The Parent Guarantor is a holding company and conducts its operations through, and derives its revenue principally from, its subsidiaries, joint ventures and associates. The ability of the Parent Guarantor to make payments on its indebtedness, including the Funding Loan, and its other obligations is dependent not only on the ability of its subsidiaries, joint ventures and associates to generate cash, but also on the ability of its subsidiaries, joint ventures and associates to distribute cash to it in the form of dividends, fees, interest, loans or otherwise, which may be subject to contractual or legal restrictions.

The subsidiaries, joint ventures and associates of the Parent Guarantor face various restrictions in their ability to distribute cash to the Parent Guarantor

Many of the subsidiaries, joint ventures and associates are obliged, pursuant to financing agreements, to satisfy certain restricted payment covenants or other conditions before they may make distributions to the Parent Guarantor or its Restricted Subsidiaries. In addition, the payment of dividends or the making of loans, advances or other payments to the Parent Guarantor or its Restricted Subsidiaries may be subject to other contractual, legal or regulatory restrictions. Business performance and local accounting and tax rules may limit the amount of retained earnings that may be distributed to the Parent Guarantor or its Restricted Subsidiaries as a dividend. Subsidiaries in certain jurisdictions may also be prevented from distributing funds to the Parent Guarantor or its Restricted Subsidiaries as a result of relevant regulation restricting the repatriation of funds or the conversion of currencies. Any right that the Parent Guarantor has to receive any

assets of any of its subsidiaries, joint ventures and associates upon any liquidation, dissolution, winding-up, receivership, reorganization, bankruptcy, insolvency or similar proceedings will be effectively subordinated to the claims of any such subsidiary's, joint venture's or associates' creditors (including trade creditors and holders of debt issued by such subsidiary, joint venture or associate).

The identity of the Subsidiary Guarantors may change, and there may be no, or only few, Subsidiary Guarantors in certain circumstances, including, upon the occurrence of a Rating Release Event or, in certain other circumstances, including in the event that a Subsidiary Guarantor ceases to guarantee certain indebtedness of the Parent Guarantor

As of the date hereof, each of the Parent Guarantor's Subsidiaries which is a guarantor of Parent Indebtedness is either a Subsidiary Guarantor or a person which is, under the laws generally applicable to a person of the same legal form, prohibited from being a Subsidiary Guarantor. As of the date hereof, the only Parent Indebtedness constitutes amounts incurred under the Credit Facilities, the Existing Convertible Notes and the Existing High Yield Notes. Furthermore, each Indenture governing the applicable series of Notes provides that, if any Subsidiary of the Parent Guarantor becomes a guarantor of Parent Indebtedness, the Parent Guarantor will ensure that, unless it is prohibited as aforesaid, that Subsidiary will become a Subsidiary Guarantor. Furthermore, if a Release Event (as defined in "Description of the Notes—Certain Definitions") or a Rating Release Event (as defined in "Description of the Notes—Certain Definitions") occurs or the capital stock of a Subsidiary guarantor is sold in compliance with the asset sale covenant and certain other requirements are met, the relevant Subsidiary Guarantor may be released from its obligations under the Notes. For example, our syndicated credit facilities provide that Abengoa Bioenergía and Abengoa Solar (if at such time it guarantees such facilities) and each of their respective subsidiaries will be released from their respective guarantees of the syndicated facilities in the event of certain offerings of the equity of such subsidiaries provided that, after the release of the guarantee of such syndicated facilities of either Abengoa Bioenergía or Abengoa Solar equity offering is subject to the unanimous consent of the lenders thereunder (which shall not be unreasonably withheld). Accordingly, the guarantees of the Notes given by any of the foregoing companies could be released upon consummation of an offering of such subsidiary's equity. As a result of the Befesa Sale, Befesa and its subsidiaries ceased to guarantee our syndicated facilities and our outstanding debt securities. As a result of the operation of these provisions, the identity of the Subsidiary Guarantors may change and there may be no, or only few, Subsidiary Guarantors at any time. See "Management's Discussion and Analysis of Financial Condition and Results of Operations" and "Description of the Notes" in this Listing Memorandum.

The Note Guarantees may be limited by applicable laws or subject to certain limitations or defenses

The Guarantors guaranteed the payment of the Notes on a senior unsecured basis. The Note Guarantees provide the Noteholders with a direct claim against the assets of the Guarantors. Notwithstanding, these Note Guarantees will be limited to the maximum amount that can be guaranteed by the particular Guarantor without rendering the Note Guarantee, as it relates to that Guarantor, voidable or otherwise ineffective under applicable laws, and enforcement of any of these Note Guarantees against any Guarantor would be subject to certain defenses available to debtors generally under local insolvency laws as well as relevant to guarantors or, in some cases, to limitations designed to ensure full compliance with statutory requirements applicable to the relevant Guarantors. These laws and defenses include those that relate to fraudulent conveyance or transfer, voidable preference, unfair consideration, financial assistance, corporate purpose, capital maintenance or similar laws and regulations or defenses affecting the rights of creditors generally. As a result, a Guarantor's liability under its Note Guarantee could be materially reduced or eliminated, depending upon the amounts of its other obligations and upon applicable laws. In particular, in certain jurisdictions, a guarantee issued by a company that is not in the company's corporate interests, or the burden of which exceeds the benefit to the guarantor, may not be valid and enforceable. It is possible that a Guarantor, a creditor of a Guarantor or the bankruptcy trustee, in the case of a bankruptcy of a Guarantor, may contest the

validity and enforceability of the Note Guarantee, and that the applicable court may determine that the Note Guarantee should be limited or voided. In the event that any Note Guarantees are invalid or unenforceable, in whole or in part, or to the extent that agreed limitations on the Note Guarantee obligations apply, the Notes would be effectively subordinated to all liabilities of the applicable Guarantor, including trade payables of such Guarantee.

Enforcement of the Notes and the Note Guarantees across multiple jurisdictions may be difficult

The Notes were issued by the Issuer, a company which is incorporated under the laws of Spain. Each of the original Guarantors is incorporated under the laws of one of Spain, Brazil, England and Wales, Mexico, the Netherlands, certain states in the United States and Uruguay. In addition, future Guarantors may be incorporated or organized under the laws of other jurisdictions.

In the event of bankruptcy, insolvency or a similar event, proceedings could be initiated in any of these jurisdictions. The rights of Noteholders under the Note Guarantees will thus be subject to the laws of a number of jurisdictions, and it may be difficult to effectively enforce such rights in multiple bankruptcy, insolvency and other similar proceedings. Moreover, such multijurisdictional proceedings are typically complex and costly for creditors and often result in substantial uncertainty and delay in the enforcement of creditors' rights. In addition, the bankruptcy, insolvency, administration and other laws of the Issuer's jurisdiction of organization and the jurisdiction of organization of the Guarantors may be materially different from, or in conflict with, one another, including creditors' rights, priority of creditors, the ability to obtain post-petition interest and the duration of the insolvency proceeding. The application of these various laws in multiple jurisdictions could trigger disputes over which jurisdictions' law should apply and could adversely affect the ability to realize any recovery under the Notes and the Note Guarantees.

Relevant local insolvency laws may not be as favorable to you as bankruptcy laws in the jurisdictions with which you are familiar and may preclude holders of the Notes from recovering payments due on the Notes or the Note Guarantees

The Issuer is established under the laws of Spain, and the Guarantors are established under the laws of Spain, Brazil, Mexico, the Netherlands, England and Wales, certain states in the United States and Uruguay. Any insolvency proceedings with regard to the Issuer or any Guarantor would most likely be based on, and governed by, the insolvency laws of the jurisdiction under which the relevant entity is established. The insolvency laws of Spain, Brazil, Mexico, the Netherlands, England and Wales, such certain states in the United States and Uruguay may not be as favorable to your interests as creditors as the laws of jurisdictions with which you are familiar.

Spanish law. We are established under the laws of Spain. Any insolvency proceedings would most likely be based on, and governed by, Spanish insolvency laws. The insolvency laws of Spain may not be as favorable to the interests of Noteholders as creditors as the laws of certain other jurisdictions and certain provisions of Spanish insolvency law could affect the ranking of the Notes or claims relating to the Notes on the insolvency of Abengoa.

The Spanish Insolvency Law (*Ley 22/2003, de 9 de julio, Concursal*), as in effect on the date of this Listing Memorandum, regulates court insolvency proceedings, as opposed to out-of-court liquidation (which is only available when the debtor has sufficient assets to meet its liabilities). The insolvency proceedings, which are called "*concurso de acreedores*", are applicable to all persons or entities. These proceedings may lead either to the restructuring of the business or to the liquidation of the debtor's assets.

A debtor (and, in the case of a company, its directors) is required to apply for insolvency proceedings when it is generally not able to meet its current debt obligations on a general basis, and is entitled to apply when it expects that it will be unable to meet its current obligations in the near future. Insolvency proceedings are available as a type of legal protection that the debtor may request in order to avoid the attachment of its assets by its creditors.

A judge's insolvency order contains an express request for creditors to declare debts owed to them within one month of the commencement of the insolvency proceedings. Based on the documentation provided by the creditors and documentation held by the debtor, the court receivers draw up a list of acknowledged claims and classify them according to the categories established under law, which are as follows: (i) claims benefiting from special privileges, (ii) claims benefiting from general privileges, (iii) ordinary claims and (iv) subordinated claims.

- Claims benefiting from special privileges, representing security on certain assets (essentially *in rem* security): These claims may entail separate proceedings, and are subject to certain restrictions related to a mandatory waiting period that may last up to one year. As a general rule, creditors are not subject to arrangements (*convenios*), unless they give their express support by voting in favor of an arrangement (*convenio*). In the event of liquidation, they are the first to collect payment against the secured assets. Nevertheless, pursuant to recent Royal Decree 11/2014, if some qualified majorities are obtained, the privileged creditors will be also subject to the arrangements (*convenios*). Regarding the valuation of the secured assets, the rule is to carve out the subsequent *in rem* rights, maintaining their preferential allocation in case of surplus after a potential enforcement by the holder of the "first lien" secured creditor. To obtain the true value of security it is necessary to deduct from the fair value of the secured asset the amount of the outstanding secured preferential claims over the same secured asset. The fair value is reduced by 10% in consideration of the costs of enforcement of the security.
- Claims benefiting from general privileges, including, among others, labor debts and those with public administrations: Debts with public administrations corresponding to tax debts and social security obligations are recognized as privileged for half of their amount, and debts held by the creditor applying for the corresponding insolvency proceedings, to the extent such application has been approved, up to a maximum of 50% of the amount of such debt. As a general rule, the holders of general privileges are not to be affected by a debt restructuring if they do not agree to the arrangement (*convenio*) and, in the event of liquidation, they are the first to collect payment (in the order established by law). Nevertheless, pursuant to recent Royal Decree 11/2014 if some qualified majorities are obtained, the privileged creditors will also be subject to the arrangements (*convenios*).
- Ordinary claims (non-subordinated and non-privileged claims): They will be paid on a pro-rata basis.
- Subordinated claims (which are thus classified by virtue of an agreement or pursuant to law): Subordinated claims include, among others, those held by parties in special relationships with the debtor. In the case of individuals, this includes relatives. In the case of a legal entity, this includes administrators, de facto or shadow directors, liquidators, attorneys, group companies and any shareholders holding over 5% (for companies that have issued securities listed on an official secondary market) or 10% (for companies which have not issued securities listed on an official secondary market) of the entity's share capital. Claims related to accrued and unpaid interest are subordinated. Subordinated creditors are second-level creditors; they may not vote on an arrangement (*convenio*) and have very limited chances of collection.

Notwithstanding the above, claims against the debtor's estate (i.e. certain debts incurred by the debtor following the declaration opening the insolvency proceedings) will be payable when due according to their own terms.

As a general rule, insolvency proceedings are not compatible with other enforcement proceedings. When compatible, in order to protect the interests of the debtors and creditors, the law extends the jurisdiction of the court dealing with insolvency proceedings, which is, then, legally authorized to handle any enforcement proceedings or inferring measures affecting the debtor's assets (whether based upon civil, labor or administrative law).

Creditors holding security *in rem*, which have traditionally been allowed to enforce their claims against secured assets notwithstanding the initiation of insolvency proceedings, are also subject to certain restrictions

in order to initiate separate enforcement proceedings (or to continue with such proceedings, if they were being carried out), when the secured asset is necessary for the debtor's activities. Enforcement by the creditor is subject to a delay of a maximum of one year.

Pursuant to the Spanish Insolvency Law, early termination provisions due to the insolvency of one of the parties to a contract, where both parties still have reciprocal obligations to fulfill, will be treated as not included. In addition, the declaration of insolvency determines that interest accrual is suspended, except credit rights secured with an *in rem* right, in which case interest accrues up to the value of the security.

Transactions that are considered detrimental to the insolvency estate may be set aside if entered into by the insolvent company within two years before the date of the declaration of insolvency. Transactions taking place earlier than two years before insolvency has been declared are subject to the general regime of rescission. Pursuant to the Spanish Insolvency Law, "detrimental" does not refer to the intention of the parties, but to the consequences of the transaction on the debtor's interests. In any case, the following transactions are considered detrimental by virtue of the Spanish Insolvency Law: (a) disposals made other than for valuable consideration and (b) cancellation of obligations falling due after the declaration of insolvency (unless they are secured by an *in rem* security interest). The following transactions are also presumed (unless proven to the contrary) to be detrimental pursuant to the Spanish Insolvency Law: (a) disposals made for valuable consideration to a "specially-related" party, (b) creation of security interests to secure existing obligations or new obligations assumed in replacement thereof and (c) the cancellation of obligations secured by an *in rem* security interest falling due after the declaration of insolvency. Transactions that do not fall into any of the categories described above can be set aside as long as the party seeking rescission provides sufficient evidence of actual detriment caused to the insolvency estate.

If an insolvency action is successful, restoration of the assets that are the subject of the transaction, together with the proceeds and interest, will be ordered by the courts. If the assets cannot be restored to the debtor, the counterparty to the insolvent debtor must pay an amount in cash equal to the value of the assets at the time of their disposal, plus interest. If the presiding judge rules that the transaction has been conducted in bad faith, the liable party will be obliged to indemnify the debtor for loss and damages suffered as its claim will be classified as subordinated. If the judge does not conclude that the transaction was conducted in bad faith, the person who entered into the agreement with the debtor will settle its credit simultaneously with the restoration of the assets and rights to the insolvency estate.

Royal Decree 4/2014 and, most recently, Royal Decree 11/2014 introduced a substantial reform of the Spanish Insolvency Law, focusing on pre insolvency instruments, refinancing agreements and arrangements (*convenios*).

The key issues addressed by the aforementioned Royal Decree 4/2014 are as follows:

- No enforcement of security in pre insolvency scenarios: Spanish Insolvency Law already included a notification system for distressed companies, when negotiations with creditors had been started for the purposes of agreeing a restructuring agreement, which suspended the obligation of the insolvent company to file for insolvency in a period of three months. Royal Decree 4/2014 has introduced a limitation for secured creditors to enforce their security given that the abovementioned notification has been made, and the secured assets are needed for the continuity of the business activity of the debtor.
- Protected restructuring agreements: The protected restructuring agreements were introduced in the Spanish Insolvency Law in 2011 in order to establish a "safe harbour" for restructuring processes, so the claw-back period did not affect them and the transactions carried out under these restructuring agreements were not subject to scrutiny and potential annulment when the company became insolvent. However their success has been limited given certain constraints included in the reform. The

reform carried out by Royal Decree 4/2014 is aimed to further encourage the use of these pre insolvency agreements by introducing a new regime, which can be summarized as follows:

- The requirement of an independent expert report which sanctioned the restructuring agreement has been substituted by a certificate issued by the company's auditor stating that creditor parties to the agreement represent, at least 60% of the debt (financial and non-financial) of the relevant company.
- Fresh money injected into a company under the restructuring agreement is granted a privileged status, superior to that of ordinary credits. This privilege is also extended to funds injected by the shareholders, as long as it's not achieved through a capital increase. However, this special regime will be applicable only to those restructuring agreements executed within the next 2 years from the entry into force of Royal Decree 4/2014.
- Creditors who, pursuant to a restructuring agreement, capitalize their debt and become shareholders will not be subordinated to ordinary creditors upon insolvency of the company. The directors of the company who unreasonably reject such capitalization might be declared personally liable, as long as the capitalization is needed for other creditors to enter into a restructuring agreement and the current shareholders are granted a preferential acquisition right over the shares awarded to the creditors, once the relevant creditors decide to sell them.
- Spanish "schemes of arrangement": the restructuring agreements described above are designed to protect the actions carried out pursuant to them from the claw-back period upon insolvency of the company, but are only applicable to those creditors who are party to them. Creditors who are not party to such restructuring agreements are not affected by them, save for certain exceptions. The main features of such new regime are the following:
 - The relevant court should sanction the restructuring agreements which (i) extend or modify the existing debt, (ii) are supported by a viability plan of a company for the short and medium term, and (iii) are approved by creditors representing, at least, 51% of the financial debt of the relevant company (regardless of the creditors being or not financial institutions). In case of syndicated facilities, it will be understood that the relevant lenders have approved the restructuring agreement when it is voted by lenders representing at least 75% of the syndicated debt (unless the facility agreement itself contemplates a lower threshold for such purposes).
 - The restructuring agreement, once sanctioned by the relevant court, will be binding on the creditors who are party to it but also to other financial creditors, on the following terms:
 - If the agreement has been approved by creditors who represent, at least, 60% of the financial debt, it will be binding on the remaining financial creditors in relation to principal or interest stay periods (up to 5 years) and the conversion of financial debt into profit participation loans (préstamos participativos) (up to 5 years tenor). The creditors affected will be those which are considered unsecured creditors or secured creditors whose credits exceed the value of the relevant security (although the latter only in relation to such excess).
 - If the agreement has been approved by creditors who represent, at least, 75% of the financial debt, it will be binding on the remaining financial unsecured creditors or secured creditors whose credits exceed the value of the relevant security (although the latter only as regards such excess credits), in relation to:
 - principal or interest stay periods (up to 10 years);
 - cancellation of financial debt;
 - capitalization of financial debt;

- conversion of financial debt into profit participation loans, subordinated debt or any equivalent instrument (up to 10 years tenor); and
- debt for assets swap.
- As regards secured creditors, in relation to the part of their debt which does not exceed the value of the security instrument, they will be bound by the restructuring agreement:
 - if such agreement is approved by secured creditors representing more than 65% of the value of the total security, only in relation to principal or interest stay periods (up to 5 years) and the conversion of financial debt into profit participation loans (up to 5 years tenor); and
 - if such agreement is approved by secured creditors representing more than 80% of the value of the total security, in relation to:
 - principal or interest stay periods (up to 10 years);
 - cancellation of financial debt;
 - capitalization of financial debt;
 - conversion of financial debt into profit participation loans, subordinated debt or any equivalent instrument (up to 10 years tenor); and
 - debt for assets swap.

Brazilian law. The Brazilian Bankruptcy Law (Law No 11,101, dated February 9, 2005), as amended by Law No 11,127 and Law No 11,196, both of 2005, regulates the court (judicial) and out-of-court (extrajudicial) reorganization and bankruptcy procedures of the individual businessmen and of the business corporation. Due to the enactment of this Law, Brazil was able to overcome numerous deficiencies of its previous insolvency system by prioritizing the recovery of companies rather than the bankruptcy, in accordance with the preservation of the business principle.

The Brazilian Bankruptcy Law establishes the general rules governing both judicial reorganization and bankruptcy. Section 6 of the Brazilian Bankruptcy Law sets forth that after the granting of the bankruptcy or of the judicial reorganization petition by the judge, the statute of limitations is tolled, as well as the collection suits against the debtor, and this suspension will last during the entire procedure.

The following list sets forth the classification of the claims in the event of bankruptcy:

- claims relating to (i) labor statutes, limited to 150 (one hundred fifty) minimum wages per employee above this limit the credit is classified as unsecured, and (ii) labor accidents;
- creditors with in rem guarantee (up to the value of the asset given as guarantee);
- tax claims of any kind (Federal, State or Municipal), except for fines;
- special privileged claims as listed in article 964 of the Brazilian Civil Code, on which the law confers to the creditor the right of retention on the pledged item, among other civil and commercial laws;
- general privileged claims as listed in article 965 of the Brazilian Civil Code and in the sole paragraph of article 67 of the Brazilian Bankruptcy Law, among other civil and commercial laws;
- unsecured claims;
- contractual fines and pecuniary penalty for the breach of criminal or administrative laws, including tax penalties; and
- subordinated claims, as classified by law or contract. It also includes the payment of former administrators and shareholders of the company.

Some claims will be preferred in right of payment over the above-mentioned ones, including the following:

- judicial costs and obligations resulting from acts practiced during the judicial reorganization or bankruptcy procedure;
- payment related to the administration of the bankruptcy, including payments to the judicial administrator and its assistants; and
- tax claims, if the taxable event occurred after the bankruptcy declaration.

The presentation of claims by foreign creditors is allowed under the Brazilian Bankruptcy Law, but creditors must pay special attention to the fact that the instrument presented to the Brazilian Court complies with the requirements of the Brazilian Civil Procedure Code and the Brazilian Bankruptcy Law. One requirement is that the credit instrument determines Brazil as the place of performance of the obligation. Additionally, the constitution of such foreign instrument must also comply with the laws of the jurisdiction in which it was signed. Only these instruments are considered enforceable and eligible to be presented in reorganization and bankruptcy procedures in Brazil. Another requirement is the granting by the foreign creditor of a guarantee to cover judicial costs and indemnity eventually due in the course of the reorganization or bankruptcy procedure.

Pursuant to Section 77 of the Brazilian Bankruptcy Law, the declaration of bankruptcy leads to the acceleration of all obligations of the debtor. In addition, the credits derived from obligations settled in foreign currency, including the liabilities under the Notes, shall immediately (at the same day of the bankruptcy declaration) be converted into national currency (Real).

Finally, the Note Guarantees issued up to 90 days prior to the date of the filing of the petition requesting the bankruptcy or reorganization may be deemed fraudulent. This period is considered as “suspicious” by the Brazilian law and its duration shall be established by the judge on a case-by-case basis. All acts performed during that period will be subject to investigation.

Mexican law. Under Mexico’s *Ley de Concursos Mercantiles* (Law on Mercantile Reorganization), your ability to receive payment under the Note Guarantee of our Guarantor incorporated in Mexico may be limited, or significantly impaired. A proceeding under Mexico’s *Ley de Concursos Mercantiles* includes a mediation stage and a bankruptcy stage. During the mediation stage, a mediator (*conciliador*) has certain powers to protect the enterprise as a going concern and initiate bankruptcy proceedings. During the bankruptcy stage, a receiver (*síndico*) is appointed to proceed with the sale of assets. The receiver has additional powers to protect the enterprise. Neither the mediator nor the receiver, however, is specifically required to protect the rights of secured creditors. The liabilities of the Guarantor incorporated in Mexico in respect of the Note Guarantee will be paid in the event of bankruptcy and winding-up of such Guarantor only after payment of all of its secured and privileged obligations (if any). Ordinarily, costs related to the maintenance, administration and liquidation of the debtor’s assets receive preference to any other payment. After such obligations have been paid, the special privileged creditors will be paid and, thereafter, the preferred creditors will be paid. The following list sets forth the relative seniority of certain credits and claims in the event of a bankruptcy:

- past due payroll obligations, employee compensation and benefits related to the one-year period immediately prior to the date of *concurso mercantil* and severance payments;
- costs related to the improvement or maintenance of an asset and costs incurred as a result of any litigation, trial or procedure to recover any asset, as well as management fees and expenses incurred in connection with a bankruptcy or insolvency;
- credits secured by a pledge or mortgage over assets, to the extent such pledge or mortgage has been perfected and recorded prior to notification of any tax claim;

- certain other labor credits, taxes, and duties owed, but not secured by a pledge or mortgage over assets;
- certain credits in favor of special privileged creditors;
- all other credits in favor of other creditors (including the Note Guarantee granted by the Guarantor incorporated in Mexico in favor of the holders of the Notes); and
- all other unsecured creditors shall be paid on a *pari passu* basis.

If any Guarantor incorporated in Mexico is declared bankrupted or subject to *concurso mercantil* (or is forced into bankruptcy or *concurso mercantil* by any of its creditors), the accrual of interest on all unsecured debt of such Guarantor (including its Note Guarantee) would be suspended on the date the *concurso mercantil* or bankruptcy is declared by the competent court. Foreign currency denominated liabilities, including the liabilities under the Note Guarantee, would be converted into Mexican pesos at the rate of exchange applicable on the date on which the declaration of bankruptcy or *concurso mercantil* is effective, and the resulting amount, in turn, will be converted to inflation indexed units. Foreign currency denominated liabilities, including liabilities under the Note Guarantee corresponding to the Guarantor incorporated in Mexico, will not be adjusted to take into account any depreciation of the Mexican peso as compared to the U.S. dollar occurring after the declaration of *concurso mercantil* or bankruptcy. In addition, all obligations under the Note Guarantee corresponding to the Guarantor incorporated in Mexico will cease to accrue interest from the date of the *concurso mercantil* or bankruptcy declaration, will be satisfied only at the time the obligations of the creditors of the Guarantors incorporated in Mexico are satisfied and will be subject to the outcome of, and amounts recognized as due in respect of, the relevant bankruptcy or reorganization proceeding. Likewise, pursuant to Mexican laws regulating bankruptcy and similar procedures, certain liabilities, such as employee payroll obligations, taxes and duties and credits secured by a pledge or mortgage over assets, shall have priority over other creditors, and we cannot guarantee that the Guarantor incorporated in Mexico will have sufficient resources to satisfy all of its creditors.

In addition, the Note Guarantees granted by the Guarantor incorporated in Mexico may not be enforceable in the event of a *concurso mercantil* or bankruptcy of any such Guarantor. While Mexican law does not prevent the Note Guarantee granted by the Guarantor incorporated in Mexico from being valid, binding and enforceable against them, in the event a Guarantor incorporated in Mexico is declared bankrupt or becomes subject to *concurso mercantil*, the Note Guarantee granted by such Guarantor may be deemed to have been a fraudulent conveyance and declared void, if it is determined that such Guarantor granted such Note Guarantee within the 270-day period prior to the declaration of bankruptcy or *concurso mercantil*, unless such Guarantor proves that it acted in good faith and received adequate consideration in exchange for such Note Guarantee. If the Note Guarantee granted by any Guarantor incorporated in Mexico becomes unenforceable, you would not be entitled to collect from such Guarantors.

Dutch law. There are two primary insolvency regimes under Dutch law. The first, moratorium of payments (*surseance van betaling*), is intended to facilitate the reorganization of a debtor's indebtedness and enable the debtor to continue as a going concern. The second, bankruptcy (*faillissement*), is primarily designed to liquidate assets and distribute the proceeds of the assets of a debtor to its creditors. Both insolvency regimes are set forth in the Dutch Bankruptcy Act. In practice, a suspension of payments often results in bankruptcy. A general description of the principles of both insolvency regimes is set out below.

An application for a moratorium of payments can only be made by the debtor itself. Once the request for a moratorium of payments is filed, a court will immediately (*dadelijk*) grant a provisional moratorium and appoint an administrator (*bewindvoerder*). A meeting of creditors is required to decide on the definitive moratorium. If a draft composition (*ontwerp akkoord*) is filed simultaneously with the application for moratorium of payments, the court can order that the composition will be processed before a decision about a definitive moratorium. If the composition is accepted and subsequently ratified by the court (*gehomologeerd*), the provisional moratorium ends. The definitive moratorium will generally be granted

unless a qualified minority (more than one-quarter in amount of claims held by creditors represented at the creditors' meeting or more than one-third in number of creditors represented at such creditors' meeting) of the unsecured non-preferential creditors withholds its consent. The moratorium of payments is only effective with regard to unsecured non-preferential creditors.

Unlike Chapter 11 proceedings under U.S. bankruptcy law, during which both secured and unsecured creditors are generally barred from seeking to recover on their claims during a moratorium of payments, under Dutch law, secured and preferential creditors (including tax and social security authorities) may enforce their rights against assets of the company in moratorium of payments to satisfy their claims as if there were no moratorium of payments. A recovery under Dutch law could, therefore, involve a sale of assets that does not reflect the going concern value of the debtor. However, the court may order a "cooling down period" (*afkoelingsperiode*) for a maximum period of four months during which enforcement actions by secured or preferential creditors are barred. Also in a definitive moratorium of payments, a composition (*akkoord*) may be offered to creditors. A composition will be binding on all unsecured and non-preferential creditors if it is approved by (i) a majority in number of the creditors represented at the creditors' meeting, representing at least 50% in amount of the claims that are admitted for voting purposes and (ii) subsequently ratified (*gehomologeerd*) by the court. Consequently, Dutch insolvency laws could preclude or inhibit the ability of the Noteholders to effect a restructuring and could reduce the recovery of a holder of Notes in Dutch moratorium of payments proceedings. Interest payments that fall due after the date on which a moratorium of payments is granted cannot be claimed in a composition.

Under Dutch law, a debtor can be declared bankrupt when it is no longer able to pay its debts when due. The bankruptcy can be requested by a creditor of a claim that is due and payable but left unpaid when there is at least one other creditor. The debtor can also request the application of bankruptcy proceedings itself.

Under Dutch bankruptcy proceedings, the assets of a debtor are generally liquidated and the proceeds distributed to the debtor's creditors in accordance with the respective rank and priority of their claims. The general principle of Dutch bankruptcy law is the so-called *paritas creditorum* (principle of equal treatment) which means that all creditors have an equal right to payment and that the proceeds of bankruptcy proceedings shall be distributed in proportion to the size of their claims. However, certain creditors (such as secured creditors and tax and social security authorities) will have special rights that take priority over the rights of other creditors. Consequently, Dutch insolvency laws could reduce your potential recovery in Dutch bankruptcy proceedings.

The claim of a creditor may be limited depending on the date the claim becomes due and payable in accordance with its terms. Generally, claims of the Noteholders that were not due and payable by their terms on the date of a bankruptcy of the Dutch Guarantor (Abengoa Bioenergy Trading Europe B.V.) will be accelerated and become due and payable as of that date. Each of these claims will have to be submitted to the bankruptcy receiver to be verified. "Verification" under Dutch law means that the receiver determines the value of the claim and whether and to what extent it will be admitted in the bankruptcy proceedings to the purpose of the distribution of the proceeds. The valuation of claims that otherwise would not have been payable at the time of the bankruptcy proceedings may be based on a net present value analysis. In principle, interest payments that fall due after the date of the bankruptcy cannot be verified. The existence, value and ranking of any claims submitted by the Noteholders may be challenged in the Dutch bankruptcy proceedings. Generally, in a creditors' meeting (*verificatievergadering*), the bankruptcy receiver, the insolvent debtor and all verified creditors may dispute the verification of claims of other creditors. Creditors whose claims or value thereof are disputed in the creditors' meeting may be referred to separate court proceedings (*renvooiprocedure*). These procedures could cause Noteholders to recover less than the principal amount of their Notes or less than they could recover in a U.S. liquidation. Such proceedings could also cause payments to the Noteholders to be delayed compared with holders of undisputed claims. As in moratorium of payments proceedings, in a bankruptcy a composition may be offered to creditors, which shall be binding on unsecured non-preferential creditors if it is approved by (i) a majority in number of the creditors represented at the creditors' meeting, representing at least 50% in amount of the claims that are admitted for voting purposes

and (ii) subsequently confirmed by the court. The Dutch Bankruptcy Act does not in itself recognize the concept of classes of creditors. Remaining amounts, if any, after satisfaction of the secured and the preferential creditors are distributed among the unsecured non-preferential creditors, who will be satisfied on a pro rata basis. Contractual subordination may to a certain extent be given effect in Dutch insolvency proceedings. The actual effect depends largely on the way such subordination is construed.

As indicated above, secured creditors may enforce their rights against assets of the debtor to satisfy their claims under a Dutch bankruptcy as if there is no bankruptcy. As in moratorium of payments proceedings, the court may order a “cooling down period” for a maximum of four months during which enforcement actions by secured or preferential creditors are barred unless such creditors have obtained leave for enforcement from the supervisory judge (*rechter-commissaris*). Further, a receiver in bankruptcy can force a secured creditor to enforce its security interest within a reasonable period of time, failing which the receiver will be entitled to sell the secured assets, if any, and the secured creditor will have to share in the bankruptcy costs, which may be significant. Excess proceeds of enforcement must be returned to the bankrupt estate; they may not be set-off against an unsecured claim of the secured creditor in the bankruptcy. Such set-off is allowed prior to the bankruptcy, although a set-off prior to bankruptcy may be subject to clawback in the case of fraudulent conveyance or bad faith in obtaining the claim used for set-off.

Moreover, to the extent that Dutch law applies, a legal act performed by a debtor (including, without limitation, an agreement pursuant to which it guarantees the performance of the obligations of a third party or agrees to provide or provides security for any of its or a third party's obligations, enters into additional agreements benefiting from existing security and any other legal act having a similar effect), including Abengoa Bioenergy Trading Europe B.V.'s guarantee of the Notes, can be challenged in an insolvency proceeding or otherwise and may be nullified by its trustee in bankruptcy, if (i) the debtor performed such acts without an obligation to do so (*onverplicht*), (ii) generally the creditor concerned or, in the case of the debtor's bankruptcy, any creditor was prejudiced as a consequence of the act, and (iii) at the time the act was performed both the debtor and (unless the act was for no consideration (*om niet*)) the party with or towards which it acted, knew or should have known that one or more of the debtor's creditors (existing or future) would be prejudiced. In addition, in the case of such a bankruptcy, the trustee may nullify the debtor's performance of any due and payable obligation (including (without limitation) an obligation to provide security for any of its or a third party's obligations) if (i) the payee (*hij die betaling ontving*) knew that a request for bankruptcy had been filed at the moment of payment, or (ii) the performance of the obligation was the result of a consultation between the debtor and the payee with a view to give preference to the latter over the debtor's other creditors.

Furthermore, whether or not the Dutch Guarantor is insolvent in the Netherlands, pursuant to Dutch law, payment under a guarantee or a security document may be withheld under the doctrines of reasonableness and fairness (*redelijkheid en billijkheid*), force majeure and unforeseen circumstances (*onvoorziene omstandigheden*).

Any pending executions of judgments against a Dutch debtor will be suspended by operation of law when suspension of payments is granted and terminate by operation of law when bankruptcy is declared. In addition, all attachments on the debtor's assets will cease to have effect upon the suspension of payments having become definitive, a composition having been ratified by the court or the declaration of bankruptcy (as the case may be) subject to the ability of the court to set an earlier date for such termination. Litigation pending on the date of the bankruptcy order will be automatically stayed.

English law. Abengoa Concessions Investments Limited, a company incorporated under the laws of England and Wales, will become a Guarantor of the Notes as of the date of the Indenture relating to the applicable series of the Notes (the “**English Guarantor**”). Therefore, any insolvency proceedings by or against it would likely be based on English insolvency laws. However, pursuant to the Council Regulation (EC) no. 1346/2000 on insolvency proceedings (the “**EU Insolvency Regulation**”), where a company incorporated under English law has its “centre of main interests” in an EU Member State other than England

and Wales, then the main insolvency proceedings for that company may be opened in the Member State in which its centre of main interest is located and be subject to the laws of that Member State. Similarly, The Cross-Border Insolvency Regulations 2006, which implement the UNCITRAL Model Law on Cross-Border Insolvency in the United Kingdom, provide that the English courts will recognize the jurisdiction of a foreign court where any English company has its centre of main interests in such foreign jurisdiction, or where it has an “establishment” (being a place of operations in such foreign jurisdiction, where it carries out non-transitory economic activities with human means and assets or services).

There are circumstances under English insolvency law in which the granting by an English company of guarantees can be challenged. In most cases, this will only arise if an administrator or liquidator is appointed to the company within a specified period (as set out in more detail below) of the granting of the guarantee and, in addition, the company was “unable to pay its debts” when the guarantee was granted or becomes “unable to pay its debts” as a result.

A company will be “unable to pay its debts” if it is proved, to the court’s satisfaction, that (i) the company is unable to pay its debts as they fall due (a company will be presumed to be unable to pay its debts as they fall due if a statutory demand for over £750 is served on the company and remains unsatisfied for three weeks or an execution on or other process issued on a judgment, decree or order of a court in favor of a creditor is returned unsatisfied, in whole or in part, or (ii) the value of the company’s assets is less than the amount of its liabilities (taking into account contingent and prospective liabilities).

The following potential grounds for challenge may apply to guarantees granted by an English company:

Transaction at an undervalue. Under English insolvency law, a liquidator or administrator of a company could apply to the court for an order to set aside a guarantee granted by the company (or give other relief) on the grounds that the creation of such guarantee constituted a “transaction at an undervalue.” The grant of a guarantee will only be a “transaction at an undervalue” if the company receives no consideration or if the company receives consideration of significantly less value, in money or money’s worth, than the consideration given by such company. For a challenge to be made, the guarantee must be granted within a period of two years ending with the “onset of insolvency” (as defined in section 240 of the Insolvency Act 1986, as amended (the “**U.K. Insolvency Act**”). The “onset of insolvency” is the date of the appointment of an administrator or presentation of an administration application, filing of notice of intention to appoint an administrator or presentation of a winding up petition or passing of a resolution for winding up in a creditors’ voluntary liquidation. In addition the company must be “unable to pay its debts” when it grants the guarantee or became “unable to pay its debts” as a result. A court will not make an order in respect of a transaction at an undervalue if it is satisfied that the company entered into the transaction in good faith and for the purpose of carrying on its business and that, at the time it did so, there were reasonable grounds for believing the transaction would benefit the company. Subject to the foregoing, if the court determines that the transaction was a transaction at an undervalue, then the court can make such order as it thinks fit to restore the position to what it would have been if the transaction had not been entered into (which could include reducing payments under the guarantees or setting aside the guarantees), however, there is protection for a third party which benefits from the transaction and has acted in good faith for value. In any challenge proceedings, it is for the administrator or liquidator to demonstrate that the English company was unable to pay its debts unless a beneficiary of the transaction was a “connected person” (as defined in the U.K. Insolvency Act), in which case, there is a presumption the company was unable to pay its debts and the connected person must demonstrate the company was not unable to pay its debts in such proceedings.

Preference. Under English insolvency law, a liquidator or administrator of a company could apply to the court for an order to set aside a guarantee granted by such company (or give other relief) on the grounds such guarantee constituted a “preference.” The grant of a guarantee is a “preference” if it has the effect of placing a creditor (or a surety or guarantor of the company) in a better position in the event of the company’s insolvent liquidation than if the guarantee had not been granted. For a challenge to be made, the decision to prefer must be made within the period of six months ending with the onset of insolvency (as defined in

section 240 of the U.K. Insolvency Act) if the beneficiary of the guarantee is not a connected person or two years (if the beneficiary is a connected person). A court will not make an order in respect of a preference of a person unless it is satisfied the company was influenced in deciding to give it by a desire to produce the “better position” for that person. Case law suggests there must be a desire to prefer one creditor over another and not just other commercial motives even if they had the inevitable result of producing the better position. Subject to the foregoing, if a court determines that the transaction was a preference, then the court can make such order as it thinks fit to restore the position to what it would have been if that preference had not been given (which could include reducing payments under the guarantees or setting aside the guarantees), however, there is protection for a third party which benefits from the transaction and acted in good faith for value). In any challenge proceedings, it is for the administrator or liquidator to demonstrate that the English company was unable to pay its debts. The administration or liquidator must also demonstrate that the company was influenced by a desire to produce the preferential effect, unless the beneficiary of the transaction was a connected person, in which case, there is a presumption that the company was influenced by a desire to produce the preferential effect and the connected person must demonstrate in such proceedings that there was no such influence.

Transaction defrauding creditors. Under English insolvency law, a liquidator or an administrator of a company, or a person who is a victim of the relevant transaction could apply to the court for an order to set aside a guarantee on the grounds the guarantee was a “transaction defrauding creditors.”

A transaction will constitute a “transaction defrauding creditors” if it is a transaction at an undervalue and the court is satisfied the substantial purpose of a party to the transaction was to put assets beyond the reach of actual or potential claimants against it or to prejudice the interest of such persons.

If the court determines that the transaction was a transaction defrauding creditors, it may make such order as it may think fit to restore the position to what it was prior to the transaction or protect the victims of the transaction (including reducing payments under the guarantee or setting aside the guarantees), however, there is protection for a third party which acted in good faith and for value without notice of the relevant circumstances. Any “victim” of the transaction (with the leave of the court if the company is in liquidation or administration) may apply to court on the basis that the transaction was a transaction defrauding creditors and not just liquidators or administrators. There is no time limit in the U.K. Insolvency Act within which the company must enter insolvency proceedings and the relevant company does not need to be unable to pay its debts at the time of the transaction.

Uruguayan law. The Uruguayan insolvency law (No. 18.387) regulates insolvency proceedings. The insolvency proceedings, which are called *concurso de acreedores*, are applicable to all persons who perform business activities and legal entities (civil and commercial). These proceedings may lead either to the restructuring of the business or to the liquidation of the assets of the debtor.

A debtor is entitled to apply for insolvency proceedings when it is in state of insolvency, meaning that it is not able to meet its current obligations or when it expects that it will shortly be unable to do so. In this sense, insolvency proceedings are available as a type of legal protection that the debtor may request in order to avoid the attachment of its assets by its creditors. A debtor is legally obliged to file for insolvency proceedings within 30 days of having knowledge or ought to have become aware of becoming insolvent. Creditors are also entitled to request the insolvency of the debtor.

When insolvency proceedings are requested, the competent court appoints a receiver who will look into the debtors accounting books and also calls on all creditors to verify their credits with the receiver, within a 60-day period, providing the receiver with the original documentation to justify such credits. Based on the documentation provided by creditors and documentation held by the debtor, the Court receiver prepares a list of acknowledged credits and classifies them according to the categories established under the law:

- debts with special privileges are those guaranteed with pledge or mortgage. Debts with general privilege are labor and tax debts (excluding fines) and 50% of unsecured debts held by the creditor

taking the first initiative to apply for the corresponding insolvency proceedings, up to 10% of the total debt of the debtor. Credits with special privileges will be paid with the proceeds from the sale of the encumbered assets;

- ordinary debts (non-subordinated and non-privileged creditors). They will be paid on a pro rata basis;
- subordinated debts, which include fines and other penalties, of any nature, and other credits held by parties in special relationships with the debtor;
- the receiver shall pay from the proceeds of the realization of the assets of the debtor (not secured), by its order, to creditors with general privileges, unsecured creditors and subordinated creditors. Creditors with secured credits must enforce their credits against the secured assets; and
- The receiver must pay from the assets of the debtor (not secured) all credits arising from the insolvency proceedings (such as fees of the receiver and other expenses incurred by it). These payments are first to be accomplished, before payment to any unsecured creditor and any general privileged creditor.

There are no prior transactions or contracts that automatically become void as a result of initiation of the insolvency proceedings, except for compensation, set off clauses and early termination clauses which are deemed void.

Certain transactions performed by the debtor prior to the declaration of insolvency and that fall in the suspect period as provided by law in the terms here outlined may be challenged by the receiver, including: a) acts for no valuable consideration carried out by the debtor within two years prior to the declaration of insolvency or those where the price of the transaction was under the market price; b) real rights granted or extended within six months prior to the declaration of insolvency in guarantee of preexistent obligations which have not matured or in guarantee of new obligations with the same creditor which are assumed upon the termination of prior obligations with said creditor; c) payments done by the debtor within six months prior to the declaration of insolvency, in regards to credits not matured; and d) any kind of termination agreement accepted by the debtor within six months prior to the declaration of insolvency.

The court receiver is also entitled to challenge those transactions performed by the debtor up to two years prior to the declaration of insolvency but evidence of fraud committed by the debtor and knowledge of the insolvency by the counterparty must be produced.

Transactions that are classified as “ordinary” in the daily course of business of the debtor are not subject to challenge.

However, the receiver is entitled to terminate agreements entered by the debtor prior to the declaration of insolvency provided that: (a) such agreements in the opinion of the receiver harm the recovery of credits by all affected creditors; (b) the agreements are in full validity and force as of the date of declaration of insolvency and (c) the debtor’s obligations under such agreements qualify as major obligations.

Because the identity of the Guarantors may change, the Relevant Taxing Jurisdictions for determining entitlement to additional amounts may vary

The Indentures governing the Notes of the applicable series provide that if a withholding or deduction is required in respect of payments under or with respect to the Notes or the Note Guarantees, the Issuer or relevant Guarantor generally must pay additional amounts to the holders of the Notes. See “*Description of the Notes—Additional Amounts.*” However, no such additional amounts are payable in certain circumstances, including where a holder or beneficial owner has any present or future connection with a Relevant Taxing Jurisdiction. The concept of Relevant Taxing Jurisdiction is determined by reference to certain matters including the jurisdiction in which the relevant Issuer or Guarantor is organized, engaged in business or resident for tax purposes. On the closing date, the Issuer was tax resident in Spain and the original Guarantors are tax resident in Spain, Brazil, England and Wales, Mexico, the Netherlands, the United States and Uruguay. However, new Guarantors may accede as guarantors of the Issuer’s obligations under the Notes

and entities may be released from their Note Guarantees, in each case in the manner described in “Description of the Notes—Guarantees.” Accordingly, the Relevant Taxing Jurisdictions which are relevant for determining whether or not a holder is entitled to receive additional amounts may vary, and so preclude the holder from claiming such additional amounts.

There may not be an active trading market for the Notes, in which case your ability to sell the Notes will be limited.

We cannot assure you as to the liquidity of any market in the Notes, your ability to sell your Notes or the prices at which you would be able to sell your Notes. Application will be made to admit the Notes to listing on the Official List and to trading on the Euro MTF Market. However, we cannot assure you that such application will be approved, and any such listing would occur only following the Issue Date. The Initial Purchasers have informed us that they intend to make a market in the Notes after the Offering is completed; however, they are not obliged to do so. Any market making that is commenced may be halted at any time. If a market develops, the Notes could trade at prices that are lower than the initial price for the Notes. In addition, changes in the overall market for high-yield debt securities and changes in our financial performance or in the markets in which we operate may adversely affect the liquidity of any trading market in the Notes that does develop and any market price quoted for the Notes. As a result, there can be no assurance that an active trading market will actually develop for the Notes. Historically, the markets for high-yield debt securities, such as the Notes, have been subject to disruptions that have caused substantial volatility in their prices. Any market for the Notes may be subject to similar disruptions. Any disruptions may have an adverse effect on the holders of our Notes.

The Issuer may redeem the Notes prior to maturity

The Indentures provide that the Issuer may, at its option and in certain circumstances, redeem the Notes of the applicable series prior to maturity. Such redemption may take place at times when prevailing interest rates may be relatively low. In such circumstances an investor may not be able to reinvest the redemption proceeds in a comparable security at an effective interest rate as high as that of the Notes and/or may forego a capital gain in respect of the Notes that would have otherwise arisen but for such redemption.

The interests of Inversión Corporativa in Abengoa may conflict with your interests as a Noteholder

Inversión Corporativa IC, S.A. beneficially owns, either directly or indirectly through Finarpisa, S.A., 49,548,068 of our Class A shares and 219,841,737 of our Class B shares and 56.25% of the total combined voting power of our Class A shares and Class B shares outstanding as of the date of this Listing Memorandum. Inversión Corporativa undertakes that in future meetings of the Shareholders’ Meeting of Abengoa it shall not exercise its voting rights beyond a maximum of 55.93% of Abengoa’s total voting rights. In the event that Inversión Corporativa increases its share of economic rights in Abengoa above 55.93%, the limitation on the exercise of the voting rights assumed by Inversión Corporativa shall be fixed, at most, as the percentage stake which it actually has of said economic rights. For these purposes, Inversión Corporativa may appear in the Shareholders’ General Meetings which are called with all of the shares which it owns, which shall be taken into account with respect to the quorum required to hold the meetings, and shall freely decide how to cast the votes in the shares, which represent a maximum of 55.93% of Abengoa’s total voting rights. With regard to the remaining shares which exceed the maximum limit, Inversión Corporativa shall be deemed to have abstained from voting. As a consequence, Inversión Corporativa has, and will continue to have, directly or indirectly, the power to affect our legal and capital structure, as well as the ability to elect and change our management, and to approve other changes to our operations and control the outcome of matters requiring action by our shareholders. Its interests as a shareholder of Abengoa, in certain circumstances, may conflict with your interests as Noteholders, particularly if we encounter financial difficulties or are unable to pay our debts when due (including payments on the Notes). Inversión Corporativa could also have an interest in pursuing acquisitions, divestitures, financings or other transactions that, in their

judgment, could enhance its equity investment, even though such transactions might involve risks to you as a Noteholder. See *"Principal Shareholders"* and *"Related Party Transactions."*

There exist certain risks relating to certain provisions of the Indentures and Spanish Law

In Spain, issuers of debt securities, such as the Notes, are generally required to have a standing committee of securities holders (*sindicato de obligacionistas*) that is represented by a commissioner (*comisario*). The Indentures contain provisions related to the appointment of a trustee and to the required consent of the Noteholders representing certain percentages of the aggregate principal amount of the then outstanding Notes of the applicable series. All of the foregoing provisions of the Indentures, among others, are difficult to reconcile with such standing committee and commissioner requirements. Neither Spanish law nor Spanish case law specifically addresses a transaction, such as the Offering of Notes, where a Spanish limited company (*sociedad anónima unipersonal*), such as the Issuer, carries out an issuance of debt instruments pursuant to Indentures governed by New York law. However, based on the opinion of scholars that have addressed such issue, we have been advised by Spanish legal counsel that no such committee and commissioner are required under the circumstances of the Offering. Accordingly, no such Spanish committee and commissioner exist with respect to the Notes. We cannot assure you that a Spanish court would not find that the validity or other characteristics of the Notes are affected by the absence of such committee or commissioner. The lack of such committee and commissioner does not, however, affect the validity of the Note Guarantees granted by the Guarantors in respect of the Notes.

Transfers of the Notes are subject to certain restrictions

The Notes have not been, and will not be, registered under the U.S. Securities Act or any U.S. state securities laws. Accordingly, you may not offer or sell the Notes, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. You should read the discussion under the heading *"Notice to Certain Investors"* for further information about these transfer restrictions. It is your obligation to ensure that your offers and sales of the Notes within the United States and other jurisdictions comply with any applicable securities laws.

You may not be able to recover in civil proceedings for U.S. securities laws violations

The Notes were issued by the Issuer, which is incorporated under the laws of Spain and the Note Guarantees were granted by the Guarantors, which are incorporated under the laws of Spain, Brazil, Mexico, the Netherlands, England and Wales, certain states of the United States and Uruguay. Most of our senior management, directors and executives currently reside outside the United States, and the majority of our assets are currently located outside the United States. As a result, you may be unable to effect service of process within the United States, or recover on judgments of United States courts in any civil proceedings under the U.S. federal securities laws. In addition, original actions, or actions for the enforcement of judgments of United States courts with respect to civil liabilities solely under the federal securities laws of the United States, are not enforceable in Spain. See *"Service of Process and Enforcement of Civil Liabilities."*

The Notes will initially be held in book-entry form, and therefore you must rely on the procedures of the relevant clearing systems to exercise any rights and remedies

Interests in the global notes will trade in book-entry form only. Unless and until notes in definitive registered form, or definitive registered notes, are issued in exchange for Book-Entry Interests (ownership interests in the Global Notes), owners of Book-Entry Interests will not be considered owners or holders of the Notes. The depository for DTC, in the case of the U.S. Dollar Notes and the common depository for Euroclear and Clearstream in the case of the Euro Notes, or, in each case, their respective nominees, are the registered holder of the Regulation S Global Notes and the Rule 144A Global Notes. After payment to the depository, we will have no responsibility or liability for the payment of interest, principal or other amounts to the owners of Book-Entry Interests. Accordingly, if you own a Book-Entry Interest, you must rely on the procedures of DTC,

in the case of the U.S. Dollar Notes, and Euroclear or Clearstream, in the case of the Euro Notes, and if you are not a participant in DTC, in the case of the U.S. Dollar Notes, and Euroclear or Clearstream, in the case of the Euro Notes, on the procedures of the participant through which you own your interest, to exercise any rights and obligations of a holder under the Indenture relating to the applicable series of Notes. See *"Book-Entry, Delivery and Form."*

Unlike the holders of the Notes themselves, owners of Book-Entry Interests will not have the direct right to act upon our solicitations for consents, requests for waivers or other actions from holders of the Notes. Instead, if you own a Book-Entry Interest, you are permitted to act only to the extent you have received appropriate proxies to do so from DTC, in the case of the U.S. Dollar Notes and Euroclear or Clearstream in the case of the Euro Notes or, if applicable, from a participant. There can be no assurance that procedures implemented for the granting of such proxies are sufficient to enable you to vote on any request actions on a timely basis.

Similarly, upon the occurrence of an event of default under the indenture, unless and until definitive registered notes are issued in respect of all Book-Entry Interests, if you own a Book-Entry Interest, you are restricted to acting through DTC, in the case of the U.S. Dollar Notes and Euroclear or Clearstream in the case of the Euro Notes. We cannot assure you that the procedures to be implemented through Euroclear or Clearstream are adequate to ensure the timely exercise of rights under the Notes. See *"Book-Entry, Delivery and Form."*

Exchange rate risks and exchange controls may cause you to receive less interest or principal than expected, or no interest or principal

The Issuer will pay principal and interest on (i) the Euro Notes in euros and (ii) the U.S. Dollar Notes in U.S. dollars. This presents certain risks relating to currency conversions if an investor's financial activities are denominated principally in a currency or currency unit (the **"Investor's Currency"**) other than euros or U.S. dollars (as the case may be). These include the risk that exchange rates may significantly change (including changes due to devaluation of the euro or revaluation of the Investor's Currency) and the risk that authorities with jurisdiction over the Investor's Currency may impose or modify exchange controls. An appreciation in the value of the Investor's Currency relative to the euro or U.S. dollars (as the case may be) would decrease: (1) the Investor's Currency-equivalent yield on the Notes; (2) the Investor's Currency equivalent value of the principal payable on the Notes; and (3) the Investor's Currency equivalent market value of the Notes.

Government and monetary authorities may impose (as some have done in the past) exchange controls that could adversely affect an applicable exchange rate. As a result, investors may receive less interest or principal than expected, or no interest or principal.

In addition, see *"Risks Related to Our Indebtedness—We may not be able to raise the funds necessary to finance a mandatory prepayment of amounts outstanding under certain of our credit facilities in the event of a change of control if so required by a majority of the lenders or a change of control offer required by the Indenture or the other indentures governing our outstanding debt securities."*

Risks Related to Certain Taxation Matters

Risks related to the Spanish withholding tax regime.

The Issuer considers that, pursuant to the provisions of the Royal Decree 1065/2007, as amended, it is not obliged to withhold taxes in Spain on any interest paid on the Notes to any Noteholder, irrespective of whether such Noteholder is tax resident in Spain. The foregoing is subject to the Paying Agent complying with certain information procedures described in *"Taxation—Spanish Tax Considerations—Disclosure of Information in Connection to the Notes"* below. The Issuer and the Paying Agent will, to the extent applicable, comply with the relevant procedures to facilitate the collection of information concerning the Notes. The procedures may be modified, amended or supplemented to, among other reasons, reflect a

change in applicable Spanish law, regulation, ruling or interpretation thereof. Under Royal Decree 1065/2007, as amended, it is no longer necessary to provide an issuer with information regarding the identity and the tax residence of an investor or the amount of interest paid to it in order for the Issuer to make payments free from Spanish withholding tax, provided that the securities: (i) are regarded as listed debt securities issued under Law 10/2014; and (ii) are initially registered at a foreign clearing and settlement entity that is recognized under Spanish regulations or under those of another OECD member state. The Issuer expects that the Notes will meet the requirements referred to in (i) and (ii) above and that, consequently, payments made by the Issuer to Noteholders should be paid free of Spanish withholding tax, provided the Paying Agent complies with the procedural requirements referred to above. In the event a payment in respect of the Notes is subject to Spanish withholding tax, the Issuer (or the Guarantors, as the case may be) will pay the relevant Noteholder such additional amounts as may be necessary in order that the net amount received by such Noteholder after such withholding equals the sum of the respective amounts of principal, premium, if any, and interest, if any, which would otherwise have been receivable in respect of the Notes in the absence of such withholding, except as provided in "*Description of the Notes—Additional Amounts.*"

If the Spanish Tax Authorities maintain a different opinion as to the application by the Issuer of withholding to payments made to Spanish tax residents (individuals and entities subject to Corporate Income Tax (*Impuesto sobre Sociedades*)), the Issuer is bound by the opinion and, with immediate effect, will make the appropriate withholding. If this is the case, identification of Noteholders may be required and the procedures, if any, for the collection of relevant information is applied by the Issuer (to the extent required) so that it can comply with its obligations under the applicable legislation as interpreted by the Spanish Tax Authorities. If procedures for the collection of the Noteholders information are to apply, the Noteholders will be informed of such new procedures and their implications.

Notwithstanding the above, in the case of Notes held by Spanish tax resident individuals (and, under certain circumstances, by Spanish entities subject to Corporate Income Tax) and deposited with a Spanish resident entity acting as depositary or custodian, payments in respect of such Notes may be subject to withholding by such depositary or custodian (currently 21%).

The Notes may be subject to withholding tax in EU Member States

Under European Council Directive 2003/48/EC (the "**EU Savings Directive**") on the taxation of savings income, EU Member States are required to provide to the tax authorities of another EU Member State details of payments of interest (or similar income) made by a person within its jurisdiction to, or collected by such a person for, an individual (or certain other types of persons) resident in that other EU Member State. However, for a transitional period, Luxembourg and Austria are instead required (unless during that period they elect otherwise) to operate a withholding system in relation to such payments, requiring payors located in Luxembourg and Austria to deduct tax at a 35% rate (the ending of such transitional period being dependent upon the conclusion of certain other agreements relating to information exchange with certain other countries). The Luxembourg government has announced that it will elect out of the withholding system in favor of automatic exchange of information with effect from January 1, 2015. A number of non-European Union countries and territories have agreed to adopt similar measures (either provision of information or transitional withholding). On March 24, 2014, the Council of the European Union adopted a Directive (Council Directive 2014/48/EU) amending the EU Savings Directive which, when implemented, will amend and potentially broaden the scope of the requirements described above. EU Member States will have until 1 January 2016 to adopt the national legislation necessary to comply with this amending Directive.

If a payment were to be made or collected through an EU Member State which has opted for a withholding system pursuant to the EU Savings Directive or European Council Directive 2014/48/EU and an amount of, or in respect of, tax were to be withheld from that payment, none of the Issuer, the Paying Agent or any other person (including any relevant Guarantor, as the case may be) would be obliged to pay Additional Amounts with respect to any Note as a result of the imposition of such withholding tax. The Issuer is required to maintain and make payments through a paying agent outside of Luxembourg and in an EU

Member State that is not obliged to withhold or deduct tax pursuant to the EU Savings Directive, European Council Directive 2014/48/EU, or any other Directive implementing the conclusions of the ECOFIN Council Meeting of 26-27 November 2000, or any law implementing or complying with, or introduced in order to conform to, any such Directives. See *"Description of the Notes—Payments on the Notes; Paying Agent."*

Secondary market transactions in the Notes may be subject to the Proposed EU Financial Transactions Tax, if implemented, when at least one party is established in a participating Member State

There is a proposal for an EU Directive to establish a common financial transactions tax (the "FTT") in Belgium, Germany, Estonia, Greece, Spain, France, Italy, Austria, Portugal, Slovenia and Slovakia (the "**Participating Member States**"). The proposed FTT has a very broad scope and could, if introduced in its current proposed form, apply to certain transactions relating to the Notes (including secondary market transactions). Under current proposals, the FTT could apply in certain circumstances to persons both within and outside of the Participating Member States. Generally, it would apply to certain transactions relating to the Notes when at least one party is a financial institution (as defined for FTT purposes), and at least one party is established in a Participating Member State. As a result, the FTT could impose an additional cost on secondary market transactions in the Notes. Investors are therefore advised to seek professional advice in relation to the FTT.

Certain jurisdictions may impose withholding taxes on payments under the Note Guarantees

Payments of interest made by Construcciones Metálicas Mexicanas Comemsa, S.A. de C.V., Abengoa México, S.A. de C.V., Nicsamex, S.A. de C.V. and Abeima Teyma Zapotillo S. de R.L. de C.V. and payments of interest and principal made by Teyma Internacional, S.A., ASA Investment Brasil Ltda., Inabensa Rio Ltda., Abentey Gerenciamento de Projetos de Engenharia e Construções Ltda. and Abengoa Construção Brasil LTDA under their respective guarantees may (in each case) be subject to withholding tax, the amount of which will vary depending on the tax laws and regulations of the applicable jurisdiction in force on the date such payments are made and certain characteristics of the relevant Noteholder, including but not limited to the residency of the recipient and the availability of double-tax treaty relief.

USE OF PROCEEDS

The net proceeds of the offering which amount to approximately €260.7 million and \$296.5 million, after estimated fees and expenses payable by us in connection with the Offering, were on-lent by the Issuer to the Parent Guarantor on a permanent basis. In turn, the Parent Guarantor will use the net proceeds to finance, in whole or in part, Eligible Green Projects (as defined below) until the long-term funds associated to those projects are obtained.

“Eligible Green Projects” include eligible green projects categories which promote sustainability, such as contributing to fight against climate change, ecological transition, the creation of local employment and improving access to clean energy and drinking water. Eligible Green Projects, which may include existing or future Abengoa projects, must meet a set of environmental, social and governance (ESG) criteria approved both by Abengoa and Vigeo, and available on Abengoa’s website on the Corporate Social Responsibility section.

Green projects categories include:

- Renewable energy;
- Energy transmission & distribution;
- Energy efficiency;
- Water transmission & distribution;
- Water management;
- Bioenergy; and
- Waste to energy.

The net proceeds of the issuance were managed by the Parent Guarantor in cash or other liquidity instruments, before the funds are used to finance to Eligible Green Projects.

In case of project divestment and, in any case, once the long-term funds associated to the projects in question are obtained, the Issuer will use the net proceeds to finance other Eligible Green Project compliant with the current Use of Proceeds.

The compliance of the net proceeds’ use with the above described process and the sustainability reporting on projects financed will be included in a dedicated section of our Corporate Social Responsibility Annual Report and will be subject to the assurance procedures that an external accountant will perform on such Corporate Social Responsibility Annual Report.

CAPITALIZATION

The following table sets forth our cash and cash equivalents, short-term financial investments and total capitalization as of June 30, 2014:

- on a historical basis;
- as adjusted to give effect to the repayment of the 2014 Convertible Notes and the maturity and repayment of the maturing tranche of the 2012 Forward Start Facility in July 2014; and
- as further adjusted to give effect to the net proceeds from the Offering of approximately €260.7 million and \$296.5 million, as described under “Use of Proceeds.”

This table should be read in conjunction with “*Summary—Recent Developments*,” “*Use of Proceeds*,” “*Selected Consolidated Financial Information*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” in this Listing Memorandum and our Interim Consolidated Financial Statements and Consolidated Financial Statements, and the accompanying notes thereto, appearing elsewhere in this Listing Memorandum. Except as set forth below, there have been no material changes to our capitalization since June 30, 2014.

	<u>Historical as of June 30, 2014</u>	<u>As adjusted⁽¹⁾ (unaudited) (€ in millions)</u>	<u>As further adjusted⁽¹⁾</u>
Cash and cash equivalents ⁽²⁾	2,993.6	2,684.6	3,177.3
Short-term financial investments ⁽³⁾	1,261.4	1,261.4	1,261.4
Total cash and cash equivalents and short-term financial investments	<u>4,255.0</u>	<u>3,946.0</u>	<u>4,438.7</u>
Corporate financing (short- and long-term):			
Bank loans	2,630.7	2,422.0	2,422.0

Total debt	<u>12,924.5</u>	<u>12,615.5</u>	<u>13,115.2</u>
Total equity⁽⁶⁾	<u>2,663.6</u>	<u>2,663.6</u>	<u>2,663.6</u>
Total capitalization	<u>15,588.1</u>	<u>15,279.1</u>	<u>15,778.8</u>

Notes:

- (1) We have prepared the information presented in the “as adjusted” and “as further adjusted” columns for illustrative purposes only. Information presented in “as adjusted” column gives effect to the repayment of the 2014 Convertible Notes and the maturity and repayment of the maturing tranche of the 2012 Forward Start Facility in July 2014, respectively. Information presented in the “as further adjusted” column gives effect to the “as adjusted” adjustments and gives further effect to the Offering. As such, the information presented in the “as further adjusted” column addresses a pro forma situation and, therefore, does not represent our actual financial position or results. Consequently, such information may not be indicative of our total capitalization as of the date of this Listing Memorandum. Investors are cautioned not to place undue reliance on this pro forma information.
- (2) Cash and cash equivalents include cash on hand, bank deposits and other short-term investments which are highly liquid in nature with an original term of three months or less.
- (3) Short-term financial investments primarily constitute short- term fixed income securities as well as any shares of companies listed on any stock exchange. In most of our corporate indebtedness, our leverage ratio is based on net indebtedness which offsets short-term financial investments as well as cash and cash equivalents against gross corporate indebtedness.

- (4) Includes €265 million principal amount of Euro Notes, plus \$300 million principal amount of U.S. Dollar Notes translated at an exchange rate of \$1.278 = €1.00.
- (5) As of June 30, 2014 approximately €766.3 million was non-recourse finance in process. Out of the €766.3 million, €485.4 million was guaranteed by the Parent Guarantor and/or Subsidiary Guarantors; €190.9 million was guaranteed by the Parent Guarantor and one or more Restricted Subsidiaries that are not Subsidiary Guarantors; and €90.0 million was guaranteed by Restricted Subsidiaries that are not Subsidiary Guarantors. See *"Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Non Recourse Debt"* and Note 19.6 of our Consolidated Financial Statements for a full description.
- (6) For simplification purposes, the effect of the fees and expenses of the Offering has not been included in the calculation of equity.

SELECTED CONSOLIDATED FINANCIAL INFORMATION

The Issuer was incorporated on August 14, 2014 as a direct wholly owned subsidiary of the Parent Guarantor for the purpose of facilitating certain financing activities of the Group. Consequently, no historical financial information relating to the Issuer is available.

We have included and discussed in this Listing Memorandum financial information of the Parent Guarantor and its subsidiaries.

The following tables present selected consolidated financial and business level information for Abengoa, S.A. as of and for the six-month periods ended June 30, 2014 and June 30, 2013 and each of the years ended December 31, 2013, 2012 and 2011.

The selected consolidated financial information as of and for the six-month periods ended June 30, 2014 and June 30, 2013 and as of and for the years ended December 31, 2013, 2012 and 2011 is not intended to be an indicator of our financial condition or results of operations in the future. You should review such selected consolidated financial information together with our Interim Consolidated Financial Statements and our Consolidated Financial Statements and notes thereto, included elsewhere in this Listing Memorandum.

The following tables should be read in conjunction with "*Capitalization*," "*Management's Discussion and Analysis of Financial Condition and Results of Operations*," and our Interim Consolidated Financial Statements and related notes and our Consolidated Financial Statements and related notes included elsewhere in this Listing Memorandum.

Change in Segment Reporting

Beginning with our Interim Consolidated Financial Statements, we have presented segment information to reflect the Abengoa Yield Asset Transfer. As a result, we continue to organize our business into the following three activities: Engineering and Construction, Concession-Type Infrastructure, and Industrial Production. However, Abengoa Yield has been added as a reporting segment under the Concession-Type Infrastructure activity. The Technology and Other segment was eliminated from our Engineering and Construction activity. Each activity is now broken into the following reporting segments: Engineering and Construction (which is both an activity and a segment); Transmission, Solar, Water, Cogeneration and other and Abengoa Yield segments within the Concession-Type Infrastructure activity; and Biofuels within the Industrial Production activity.

Accordingly, the discussion of our results of operations for the six months ended June 30, 2014 and 2013 is presented in this Listing Memorandum under the new activity and segment reporting structure. However, the discussion of our results of operations for the years ended December 31, 2013, 2012 and 2011 is presented under the previous activity and segment reporting structure. As a result, the results of operations of our activities and segments may not be easily comparable.

Abengoa Yield was formed by Abengoa to serve as the primary vehicle through which Abengoa owns, manages and acquires renewable energy, conventional power and electric transmission lines and other contracted revenue-generating assets, initially focused on North America (the United States and Mexico) and South America (Peru, Chile, Uruguay and Brazil), as well as Europe (Spain).

Our Abengoa Yield segment consists of assets that were included before in our Solar segment (two Concentrating Solar Power plants in the United States, Solana and Mojave, each with a gross capacity of 280 MW; two Concentrating Solar Power plants in Spain, Solaben 2 and Solaben 3, each with a gross capacity of 50 MW), in our Transmission segment (two lines in Peru, ATN and ATS, spanning a total of 931 miles; three lines in Chile, Quadra 1, Quadra 2 and Palmucho, spanning a total of 87 miles; and an exchangeable preferred equity investment created at the time of the Abengoa Yield IPO in Abengoa Concessoes Brasil Holding, or ACBH, a subsidiary holding company of Abengoa that is engaged in the development, construction, investment and management of contracted concessions in Brazil, comprised

mostly of electric transmission lines) and in our Co-generation and other segment (Abengoa Cogeneracion Tabasco, or ACT, a 300 MW cogeneration plant in Mexico; one on-shore wind farm in Uruguay, Palmatir, with a gross capacity of 50 MW).

Beginning with our Interim Consolidated Financial Statements as of and for the six months ended June 30, 2014 we have presented our Mexico operations as part of the North America segment and excluded these results from Latin America to better reflect the geographical segmentation of our business.

Since the beginning of 2014, Engineering and Construction comprises one operating segment, Engineering and Construction (previously, the operating segment of Technology and Others was also included. Since 2014, it is included in the operating segment of Engineering and Construction, in accordance with IFRS 8 "Operating Segment").

	Six months ended June 30		Year ended December 31 ⁽²⁾

- (1) In the interim consolidated financial statements of Abengoa and its subsidiaries as of June 30, 2013, prepared in accordance with IFRS as issued by the IASB and included in our final prospectus for our initial public offering in the United States filed with the SEC pursuant to Rule 424(b) of the Securities Act of 1933 on October 17, 2013, the Group applied IFRS 10 and 11 that came into effect on January 1, 2013 under IFRS-IASB. According to the terms and requirements established in IAS 8 "Accounting Policies, Changes in Accounting Estimates and Errors" and to the specific transition guidance of the new standards, we recasted the financial information as of and for the year ended December 31, 2012 in the final prospectus and the recasted financial information is included herein. Financial information for prior periods was not recasted therein or herein for IFRS 10 and 11 according to the transition guidance and consequently is not comparable with other periods presented. See "Presentation of Financial Information" and Note 2.1.1 to our Consolidated Financial Statements.
- (2) On July 15, 2013, we closed the sale of 100% of our shares in our subsidiary Befesa. On that date, we received €331 million of cash proceeds. Taking into account the significance of the activities carried out by Befesa to Abengoa, the sale of this shareholding is considered as a discontinued operation to in accordance with IFRS 5 "Non-Current Assets Held for Sale and Discontinued Operations." In accordance with this standard, the results of Befesa until the closing of the sale and the result of this sale are included under a single heading (profit for the year from discontinued operations, net of tax) in our Consolidated Financial Statements and under separate line items in the consolidated cash-flow statement for the year ended December 31, 2013. Likewise, the consolidated income statement for the years ended December 31, 2012 and 2011 also includes the results of Befesa under a single heading (see "Presentation of Financial Information" and Note 7 to our Consolidated Financial Statements). The Befesa Sale also resulted in the removal of the Industrial Recycling of segment from our Industrial Production activity.
- (3) Number of shares considered in all periods is after the increase in Class B shares distributed for no consideration approved by the Extraordinary General Shareholders' Meeting on September 30, 2012 and considered effective on October 2, 2012, equivalent to a split of shares, as described in Note 18 to our Consolidated Financial Statements.
- (4) Dividends paid per share have been calculated considering the post-split number of shares, restating prior periods in order to be consistent with the earnings per share calculation. Dividends paid in 2013, 2012 (in two payments in July and April, respectively) and 2011 were €0.072 per share in the aggregate (U.S. \$0.094), €0.070 per share (U.S. \$0.088), and €0.040 per share (U.S. \$0.054), respectively.
- (5) Consolidated EBITDA is calculated as profit for the year from continuing operations, after adding back income tax expense/ (benefit), share of (loss)/profit of associates, finance expense net and depreciation, amortization and impairment charges of Abengoa, S.A. and its subsidiaries. Consolidated EBITDA is not a measurement of performance under IFRS as issued by the IASB and you should not consider Consolidated EBITDA as an alternative to operating income or consolidated profits as a measure of our operating performance, cash flows from operating, investing and financing activities as a measure of our ability to meet our cash needs or any other measures of performance under generally accepted accounting principles. We believe that Consolidated EBITDA is a useful indicator of our ability to incur and service our indebtedness and can assist securities analysts, investors and other parties to evaluate the Group. Consolidated EBITDA and similar measures are used by different companies for different purposes

and are often calculated in ways that reflect the circumstances of those companies. Consolidated EBITDA may not be indicative of our historical operating results, nor are meant to be predictive of potential future results. See "Presentation of Financial Information—Non-GAAP Financial Measures." The following table sets forth a reconciliation of Consolidated EBITDA to our consolidated profit for the indicated periods from continuing operations:

	Last twelve months ended June 30		Year ended December 31		
	2014	2013	2013	2012	2011
			(unaudited)		
			(€ in millions)		
Reconciliation of Consolidated EBITDA to Corporate EBITDA:					
Consolidated EBITDA	1,529.1	1,082.3	1,365.1	948.6	1,163.0
Non-recourse EBITDA	(562.4)	(329.1)	(386.3)	(285.6)	(347.7)
Corporate EBITDA	966.7	753.2	978.8	663.0	815.3

- (7) Consolidated Adjusted EBITDA is calculated as Consolidated EBITDA, after adding back research and development costs of Abengoa, S.A. and its subsidiaries. Research and development costs are added back because we consider these expenses as investments in our business that generate returns over the long-term. Corporate Adjusted EBITDA is calculated as Consolidated EBITDA after adding back research and development costs of Abengoa, S.A. and its subsidiaries less EBITDA from non-recourse activities net of eliminations. According to the terms and conditions of the 2012 Forward Start Facility, Adjusted EBITDA does not include the effect of changes in accounting policies resulting from IFRS 10 and 11 and change in the application of IFRIC 12. Consolidated Adjusted EBITDA and Corporate Adjusted EBITDA are not measurements of performance under IFRS as issued by the IASB, and you should not consider Consolidated Adjusted EBITDA or Corporate Adjusted EBITDA as an alternative to operating income or consolidated profits as a measure of our operating performance, cash flows from operating, investing and financing activities as a measure of our ability to meet our cash needs or any other measures of performance under IFRS as issued by the IASB. We believe that Consolidated Adjusted EBITDA and Corporate Adjusted EBITDA are useful indicators of our ability to incur and service our corporate indebtedness, since the leverage ratio in the instruments governing our corporate indebtedness is generally calculated as a ratio of Net Corporate Debt to Corporate Adjusted EBITDA, and can assist investors and other parties to evaluate the Group. Consolidated Adjusted EBITDA and Corporate Adjusted EBITDA, and similar measures, are used by different companies for different purposes and are often calculated in ways that reflect the circumstances of those companies. Consolidated Adjusted EBITDA and Corporate Adjusted EBITDA may not be indicative of our historical operating results nor are they meant to be predictive of potential future results. See "Presentation of Financial Information—Non-GAAP Financial Measures."

The following table sets forth a reconciliation of Consolidated Adjusted EBITDA and Corporate Adjusted EBITDA to our consolidated profit for the indicated periods from continuing operations:

	Six months ended June 30		Year ended December 31		
	2014	2013	2013	2012	2011
			(unaudited)		
			(€ in million)		
Reconciliation of profit for the year from continuing operations to Consolidated Adjusted EBITDA					
Profit for the year from continuing operations	52.5	83.9	110.9	61.5	266.4
Income tax expenses/(benefits)	(43.3)	(35.2)	(43.9)	(171.9)	3.2
Share of loss/(profit) of associated companies	(2.6)	6.5	5.2	(17.6)	(4.0)
Net finance expenses	454.4	237.3	721.8	654.6	666.9
Operating profit	461.0	292.5	794.0	526.6	932.5

Consolidated Adjusted EBITDA	698.7	533.9	1,371.6	955.0	1,188.6

	Twelve months June 30		Year ended December 31		
	2014	2013	2013	2012	2011
			(unaudited)		
			(€ in millions)		
Reconciliation of Consolidated Adjusted EBITDA to Corporate Adjusted EBITDA:					
Consolidated Adjusted EBITDA	1,536.3	1,086.7	1,371.6	955.0	1,188.6
Non-recourse EBITDA	(562.4)	(329.1)	(386.3)	(285.6)	(347.7)
Incorporation IFRS 10-11 and IFRIC 12	24.7	100.3	61.7	118.0	(174.0)
Corporate Adjusted EBITDA	998.6	857.9	1,047.0	787.5	666.9

- (8) Gross Corporate Debt consists of the Group's: (a) long-term debt (debt with a maturity of greater than one year) incurred with credit institutions; plus (b) short-term debt (debt with a maturity of less than one year) incurred with credit institutions; plus (c) notes, obligations, promissory notes, financial leases and any other such obligations or liabilities, the purpose of which is to provide finance and generate a financial cost for the Group; plus (d) obligations relating to guarantees of third-party obligations (other than intra-group guarantees), but excluding any Non-Recourse Debt.
- (9) Gross Non-Recourse Debt consists of long- and short-term Non-Recourse Debt. Our characterization of Non-Recourse Debt may differ from that of other companies, as we include therein non-recourse finance in process, whereby the Parent Guarantor and/or Restricted Subsidiaries guarantee obligations in order to act as sponsors for the period prior to project companies securing long-term project financing (typically periods of less than 2-3 years). Although our classification of non-recourse finance in process as Non-Recourse Debt is in compliance with IFRS guidelines, we have discretion, within applicable IFRS guidelines, to reclassify this type of indebtedness. See "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Non Recourse Debt" for a full description.
- (10) Net Corporate Debt consists of Gross Corporate Debt excluding obligations relating to guarantees of third-parties (other than intra-Group guarantees), less total cash and cash equivalents (excluding non-recourse cash and cash equivalents) and short-term financial investments (excluding non-recourse short-term financial investments).
- (11) Covenant Net Corporate Debt consists of Gross Corporate Debt, less recourse and non-recourse cash and cash equivalents, and recourse and non-recourse short-term financial investments, without considering the changes in our accounting due to the application of IFRS 10 and 11 and the change in the application of IFRIC 12 "Service Concession Arrangements."
- (12) For the six month periods ended June 30, 2014 and 2013, we reported our results for Mexico as a part of North America and excluded these results from Latin America.
- (13) The figures presented in this table for the six months ended June 30, 2013 have been adjusted on an unaudited basis to conform to our 2014 redefinition of activities and segments, including the creation of the Abengoa Yield segment and the elimination of the Technology and Other segment.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read together with, and is qualified in its entirety by reference to our Consolidated Financial Statements and our Interim Consolidated Financial Statements, that are included elsewhere in this Listing Memorandum, which have been prepared in accordance with IFRS as issued by the IASB. This discussion contains forward-looking statements that involve risks and uncertainties. Our actual results and the timing of selected events could differ materially from those anticipated in these forward-looking statements as a result of various factors, including those set forth under "*Risk Factors*" and elsewhere in this Listing Memorandum.

Overview

We are a leading engineering and clean technology company with operations in more than 50 countries worldwide that provides innovative solutions for a diverse range of customers in the energy and environmental sectors. Over the course of our more than 70-year history, we have developed a unique and integrated business model that applies our accumulated engineering expertise to promoting sustainable development solutions, including delivering new methods for generating power from the sun, developing biofuels, producing drinking water from seawater and efficiently transporting electricity. A cornerstone of our business model has been investment in proprietary technologies, particularly in areas with relatively high barriers to entry. Our Engineering and Construction activity provides sophisticated turnkey engineering, procurement and construction ("**EPC**") services from design to implementation for infrastructure projects within the energy and environmental sectors and engages in other related activities with a high technology component. Our Concession-Type Infrastructure activity operates, manages and maintains infrastructure assets, usually pursuant to long-term concession agreements under Build, Own, Operate and Transfer ("**BOOT**") schemes, within five operating segments (Transmission, Solar, Water, Co-generation and other, and Abengoa Yield). Finally, our Industrial Production activity produces a variety of biofuels (ethanol and biodiesel). For the six month period ended on June 30, 2014, our average number of employees was 28,658 people worldwide across our three business activities. According to industry publication; we are among the market leaders in the majority of our areas of operation.

On June 18, 2014, we completed an initial public offering (the "**Abengoa Yield IPO**") of the ordinary shares of Abengoa Yield, which was formed by Abengoa, S.A. Abengoa Yield is a dividend growth-oriented company formed to serve as the primary vehicle through which Abengoa owns, manages and acquires renewable energy, conventional power and electric transmission lines and other contracted revenue-generating assets, initially focused on North America (the United States and Mexico) and South America (Peru, Chile, Uruguay and Brazil), as well as Europe (Spain). In the future, Abengoa Yield intends to expand this presence to selected countries in Africa and the Middle East.

In order to facilitate the Abengoa Yield IPO, Abengoa has contributed or caused a subsidiary to contribute to Abengoa Yield certain assets through a series of concessional asset transfers mostly in the solar, transmission, and cogeneration space, which is referred to collectively as the "**Abengoa Yield Asset Transfer**," as described more fully under "*Summary—Recent Developments*."

We have successfully grown our business, with a compound annual growth rate of our Consolidated EBITDA of 21% during the last ten years ended December 31, 2013. We have also maintained double digit growth in our consolidated revenue and Consolidated EBITDA on a compound annual growth basis since our 1996 initial public offering on the Madrid and Barcelona stock exchanges. As of September 12, 2014, we had a market capitalization of approximately €3.6 billion. As of June 30, 2014, our backlog was €7,671 million.

Our revenue, Consolidated EBITDA and net fixed assets of the Group and by segment as of and for the six months ended June 30, 2014 and June 30, 2013 are set forth in the following tables.

	Six months ended June 30					
	2014	% of revenue		2013	% of revenue

Industrial Production	2,502.7	2,454.3
Biofuels	2,502.7	2,454.3

(1) The figures presented in this table for the year ended December 31, 2013 have been adjusted on an unaudited basis to conform to our 2014 redefinition of activities and segments, including the creation of the Abengoa Yield segment and the elimination of the Technology and Other segment.

Factors Affecting the Comparability of Our Results of Operations

Change in Segment Reporting

Beginning with our Interim Consolidated Financial Statements, we have presented segment information to reflect the Abengoa Yield Asset Transfer. As a result, we continue to organize our business into the following three activities: Engineering and Construction, Concession-Type Infrastructure, and Industrial Production. However, Abengoa Yield has been added as a reporting segment under the Concession-Type Infrastructure activity. The Technology and Other segment was eliminated from our Engineering and Construction activity. Each activity is now broken into the following reporting segments: Engineering and Construction (which is both an activity and a segment); Transmission, Solar, Water, Co-generation and other and Abengoa Yield segments within the Concession-Type Infrastructure activity; and Biofuels within the Industrial Production activity.

Accordingly, the discussion of our results of operations for the six months ended June 30, 2014 and 2013 is presented in this Listing Memorandum under the new activity and segment reporting structure. However, the discussion of our results of operations for the years ended December 31, 2013, 2012 and 2011 is presented under the previous activity reporting structure. As a result, the results of operations of our activities and segments may not be easily comparable.

Abengoa Yield was formed by Abengoa to serve as the primary vehicle through which Abengoa owns, manages and acquires renewable energy, conventional power and electric transmission lines and other contracted revenue-generating assets, initially focused on North America (the United States and Mexico) and South America (Peru, Chile, Uruguay and Brazil), as well as Europe (Spain).

Our Abengoa Yield segment consists of assets that were included before in our Solar segment (two Concentrating Solar Power plants in the United States, Solana and Mojave, each with a gross capacity of 280 MW; two Concentrating Solar Power plants in Spain, Solaben 2 and Solaben 3, each with a gross capacity of 50 MW), in our Transmission segment (two lines in Peru, ATN and ATS, spanning a total of 931 miles; three lines in Chile, Quadra 1, Quadra 2 and Palmucho, spanning a total of 87 miles; and an exchangeable preferred equity investment in Abengoa Concessoes Brasil Holding, or ACBH, a subsidiary holding company of Abengoa that is engaged in the development, construction, investment and management of contracted concessions in Brazil, comprised mostly of electric transmission lines) and in our

Co-generation and other segment (Abengoa Cogeneracion Tabasco, or ACT, a 300 MW cogeneration plant in Mexico; one on-shore wind farm in Uruguay, Palmatir, with a gross capacity of 50 MW).

Beginning with our interim unaudited consolidated financial statements as of and for the six months ended June 30, 2014, we have presented our Mexico operations as part of the North American segment and excluded these results from Latin America to better reflect the geographical segmentation of our business. The Technology and Other segment was eliminated from our Engineering and Construction activity.

IFRS 10 and 11

In preparing the Interim Consolidated Financial Statements and the Consolidated Financial Statements, the Group applied IFRS 10 and 11 that came into effect on January 1, 2013 under IFRS IASB.

The main impacts of the application of the new standards IFRS 10 and 11, as well as the amendments to IAS 27 and 28, in relation to what was systematically applied previously, relate to:

- The de-consolidation of companies that do not fulfill the conditions of effective control of the interest during the construction phase in terms of decision making for their integration in the Consolidated Financial Statements according to the equity method. It is expected that these projects will be fully consolidated again once they enter into operation and we gain control over them, with corresponding significant increases in fixed assets in projects (project finance) and long-term non-recourse project financing, among others.
- The elimination of the proportional consolidation of the joint ventures, with the equity method being obligatory for recording its interest in the company.

According to the terms and requirements established in IAS 8 "Accounting policies, changes in accounting estimates and errors," the above standards and amendments were retrospectively applied, recasting the comparison information presented for the year 2012. The above standards and amendments have already been applied in the consolidated financial statements as of December 31, 2012, presented in the final prospectus for our initial public offering in the United States filed with the SEC pursuant to Rule 424(b) of the Securities Act of 1933 on October 17, 2013, and the recasted information is included herein. Consolidated financial statements as of December 31, 2011 have not been recasted according to the transition guidance of IFRS 10 and consequently is not comparable with other periods presented.

The effect of the de-consolidation of the affected companies and their integration according to the equity method on the consolidated statements of financial position as of December 31, 2012 is shown below:

<u>Concept</u>	<u>Balance as of December 31, 2012</u> (€ in thousands)
Assets	
Intangible assets and Property, Plant & Equipment	(25,212)
Fixed assets in projects (project finance)	(2,341,152)
Investments in associates carried under the equity method	855,627
Financial investments	31,775
Deferred tax assets	(18,976)
Current assets	237,834
Total assets	<u>(1,260,104)</u>
Equity and liabilities	
Equity	(19,959)
Long-term non-recourse project financing	(1,707,460)
Long-term corporate financing	(40)
Other non-current liabilities	(189,989)
Current liabilities	657,344
Total equity and liabilities	<u>(1,260,104)</u>

In addition, the effect of this de-consolidation on the consolidated income statement for the year ended 2012 is shown below:

<u>Concept</u>	<u>Year ended December 31, 2012</u> (€ in thousands)
Revenue	(57,235)
Other operating income	(64,756)
Operating expenses	62,745
Operating profit	(59,246)
Financial expense, net	27,487
Share of profit/(loss) of associates carried under the equity method	19,477
Profit before income tax	(12,282)
Income tax benefit	7,823
Profit for the period from continuing operations	(4,459)
Profit/(loss) attributable to non-controlling interests	4,459
Profit for the period attributable to the parent company	—

Acquisitions and Divestments

As discussed in Note 6.2 to our Consolidated Financial Statements, certain divestments and business combinations impacted our scope of consolidation and, therefore, our results of operations, including principally the following transactions.

Sale of Befesa

On June 13, 2013, we entered into a share purchase agreement for the sale of 100% of our shares in our subsidiary Befesa (the "**Befesa Sale**") to funds advised by Triton Partners (the "**Triton Funds**"). After customary net debt adjustments and subject to certain adjustments, total consideration to us amounts to €620 million which is comprised of €348 million total cash, of which a payment of €331 million was received

at closing and deferred compensation of €17 million (including €15 million in escrow pending resolution of ongoing litigation and a €2 million long-term receivable from a Befesa customer), a €48 million subordinated vendor note with a five-year maturity and a €225 million (par value) subordinated convertible instrument with a 15-year maturity (subject to two five-year extensions) accruing interest of 6 month Euribor in effect at closing date plus a 6% spread and which, upon the occurrence of certain triggering events including, but not limited to, Befesa's failure to meet certain financial targets or the exit of the Triton Funds from Befesa, may be converted into approximately 14% of the shares of Befesa (subject to certain adjustments). The share purchase agreement contains a two-year non-compete provision concerning Befesa's activities.

On July 15, 2013, we received €331 million of cash proceeds corresponding to the price agreed for the shares and the sale of the transaction was closed. The gain generated by the sale amounted to €0.4 million.

Taking into account the significance of the activities carried out by Befesa to Abengoa, the sale of this shareholding is considered as a discontinued operation in accordance with IFRS 5, Non-Current Assets Held for Sale and Discontinued Operations. In accordance with this standard, the results of Befesa until the closing of the sale and the result of this sale are included under a single heading (profit for the year from discontinued operations, net of tax) in our interim unaudited consolidated financial statements for the six months ended June 30, 2013. Likewise, the consolidated income statements for the years ended December 31, 2013, 2012 and 2011 also include the results of Befesa under a single heading (see "*Presentation of Financial Information*" and Note 7 to our Consolidated Financial Statements).

The Befesa Sale also resulted in the removal of the Industrial Recycling segment from our Industrial Production activity.

Sale of Brazilian Transmission Line Assets

We sold, in two portions pursuant to three share purchase agreements, 100% of certain Brazilian transmission line assets to TAESA, an affiliate of Cemig.

On June 2, 2011, Abengoa Concess Oes entered into an agreement with TAESA to sell 50% of its shareholding in a newly formed entity, named UNISA, to which Abengoa Concess Oes contributed 100% of its interests in four project companies that it controls and that hold power transmission line concessions in Brazil. These four project companies are STE, ATE, ATE II and ATE III. In addition, on June 2, 2011, Abengoa Concess Oes and Abengoa Construção Brasil Ltda. entered into an agreement with TAESA to sell 100% of the share capital of NTE, another project company that holds a power transmission line concession in Brazil. The sales corresponding to the sale of 100% of the shareholding of NTE and 50% of the shareholding of UNISA are referred to herein as the "**First Cemig Sale.**" The First Cemig Sale was closed on November 30, 2011 and, accordingly, is fully reflected in our historical audited financial statements as of and for the year ended December 31, 2011.

As consideration for the First Cemig Sale, upon closing we received the equivalent of approximately €479 million in net cash proceeds in Brazilian reais and reduced our net consolidated debt by approximately €642 million on our statement of financial position as of December 31, 2011. For the year ended December 31, 2011, we recorded a net gain from the sale of €45 million reflected in the "Other operating income" line item in our consolidated income statement (€43 million after taxes) resulting from the First Cemig Sale. The share purchase agreements for each of UNISA and NTE in respect of the First Cemig Sale provided for a post-closing price adjustment to be paid following the preparation of the audited financial statements of the relevant project companies taking into account, among other variables, changes in the share capital thereof and any dividends or distributions made between signing and closing. No such adjustments were required to be paid under the terms of the share purchase agreements with respect to the First Cemig Sale.

In addition to the First Cemig Sale, we signed an agreement with TAESA on March 16, 2012 to sell our remaining 50% interest in UNISA, thereby completing the divestment of certain Brazilian transmission line

concession assets (STE, ATE, ATE II and ATE III) (the “**Second Cemig Sale,**” and collectively with the First Cemig Sale, the “**Cemig Sales**”). On June 30, 2012, all the conditions necessary to close the transaction were fulfilled, and on July 2, we received €354 million of cash proceeds corresponding to the total price agreed for the shares. The gain from the Second Cemig Sale of €4.5 million is reflected in the “Other operating income” line item in our consolidated income statement for the year ended December 31, 2012. The Second Cemig Sale includes a post-closing adjustment mechanism similar to that described above relating to the First Cemig Sale, and no significant post-closing adjustment was required to be paid.

In the consolidated income statement for the year ended December 31, 2011 included in our Consolidated Financial Statements, the profits and losses of NTE and the four project companies we contributed to UNISA (STE, ATE, ATE II and ATE III) are fully consolidated until November 30, 2011. Following such date until December 31, 2011, we included our 50% share in the profits and losses of UNISA following the proportional consolidation method. In the consolidated income statement for the year ended December 31, 2012 the profits and losses of the four project companies are recorded under the equity method as a result of the retrospective application of IFRS 11 from January 1, 2012 until June 30, 2012, when the Second Cemig Sale closed.

Business combination of the Rioglass Group

Rioglass Group (“**Rioglass**”) was incorporated in 2006 as a joint venture between us and its former shareholders. Rioglass manufactures and sells parabolic trough mirrors for solar thermal plants, using an exclusive technology developed internally.

Since the incorporation of Rioglass, solar-thermal energy has experienced a strong development worldwide. Global installed capacity has reached 1,560 MW in operation, mainly in Spain and the United States. Recently, we experienced a significant international expansion in other geographies, with plants in construction in the Middle East, Africa and India and with ambitious plans to develop new solar thermal plants in several countries such as South Africa, Australia, China, India, Saudi Arabia and Chile.

On January 16, 2012 Abengoa Solar, S.A. signed an agreement with Rioglass Laminar, S.L. to acquire an additional share of Rioglass Holding, S.A. With this acquisition, and once the agreement’s closing conditions were fulfilled, we became the majority shareholder of Rioglass and obtained control of the management of the group, a business which is key to our strategy of international expansion. As a result, Rioglass, which was integrated proportionally, has started to be fully consolidated as of January 1, 2012.

Since the business combination was achieved in stages according to IFRS 3, we have re-measured our previously held equity interest in the acquiree at our acquisition-date fair value, which consists primarily in the value of committed sales from Rioglass for the use of technology and mirrors, linked to relations and contracts existing with clients in the construction of solar thermal plants in Spain, the United States, South Africa, Mexico and India. This valuation has represented a gain of €85.2 million. The difference between the fair value of the stake acquired in Rioglass group and the fair value of the identifiable assets and liabilities acquired, amounting to €38.9 million, has been recorded as goodwill.

Additionally, according to IFRS 3, we have finalized the evaluation of the identifiable assets and liabilities acquired in order to perform the purchase price allocation, considering all identifiable fixed and intangible assets, liabilities and contingent liabilities to the extent they are subject to recognition according to IFRS. Among the assets identified, higher values have been assigned to technology and customer relationships. See Note 6.3 to our Consolidated Financial Statements included elsewhere in this Listing Memorandum.

Divestment of Telvent GIT, S.A.

As of December 31, 2010 and during part of the year 2011 we held a 40% shareholding in Telvent. Despite partially reducing our share ownership in Telvent during 2009 through the sale of 7,768,844 ordinary shares, we remained the largest shareholder and our 40% shareholding, along with our control of certain

treasury shares held by Telvent, permitted us to exercise de facto control over Telvent and therefore Telvent's financial information was fully consolidated with our consolidated financial statements for the year ended December 31, 2010 and during the period of 2011 in which we held control over Telvent. On June 1, 2011, we announced the sale of our investment in Telvent (the "**Telvent Disposal**"), in which we sold our 40% shareholding in Telvent to Schneider Electric S.A. ("**SE**"). Following the agreement to sell, SE launched a tender offer to acquire all of the remaining Telvent shares. SE launched the tender offer to acquire all Telvent shares at a price of \$40 per share in cash, which valued the business at €1,360 million, or a premium of 36%, to Telvent's average share price over the previous 90 days prior to the announcement of the offer. On September 5, 2011, following completion of the customary closing conditions and the receipt of regulatory approvals, the transaction was completed. Our cash proceeds from the Telvent Disposal were €391 million and consolidated net debt reduction was €725 million. In addition, we recorded a gain which is included in the €91 million profit from discontinued operations as reflected on our income statement for the year ended December 31, 2011. As a result, taking into account the significance of Telvent to us, Telvent was treated as discontinued operations in accordance with IFRS 5, Non-Current Assets Held for Sale and Discontinued Operations, and the results obtained from this sale are included under a single heading, "Profit after tax from discontinued operations," in the consolidated income statement for the year 2011, together with the results generated by Telvent until the moment of its sale, and the consolidated income statement for 2010 has been recasted to present Telvent as discontinued operations. The Telvent Disposal also resulted in the removal of our Information Technologies segment. See Note 7 to our Consolidated Financial Statements.

Commencement of Operations of Projects

The comparability of our results of operations is significantly influenced by the volume of projects that become operational during a particular year. The number of projects becoming operational and the length of projects under construction significantly impact our revenue and operating profit, as well as our consolidated profit after tax during a particular period, which makes the comparison of periods difficult.

The following table sets forth the principal projects that commenced operations during the first six months of 2014 and each of the years ended December 31, 2013, 2012 and 2011, including the quarter in which operations began.

	Project	2011	2012	2013	2014
Segment					
Transmission	ATN	1st quarter			
	Manaus (Brazil)			1st quarter	
Biofuels	Salamanca (Spain)—Waste to Biofuels plant			2nd quarter	
Water	Tlemcem-Honaine Plant (Algeria)	4th quarter			
	Qingdao (China)			1st quarter

	Quadra 2 (Chile)				1st quarter
	Quadra 1 (Chile)				2nd quarter
	Palmatir (Uruguay)				2nd quarter

Factors Affecting Our Results of Operations

Commodity Prices

Our Industrial Production activity is particularly sensitive to commodity price changes. The Biofuels segment of our Industrial Production activity is affected by the availability of supply of grains such as wheat, barley, corn and sorghum as well as sugar. We acquire grain and sugar as raw materials to produce ethanol and distillers, grains and solubles (“**DGS**”). Consequently, any increase in the cost of such grains increases our cost of ethanol production. Our Biofuels segment is exposed to, among other factors, fluctuations in the cost of grain caused by meteorological conditions, such as droughts or excessive rainfall. Furthermore, the output price of ethanol is exposed to regional changes in price. Ethanol prices fluctuate in response to domestic and international prices, competition, governmental policies and regulations, meteorological conditions, market demand for gasoline and market demand for ethanol as an alternative or additive to gasoline. To mitigate these effects, when acquiring raw materials for the production of ethanol, we engage in commodity hedging transactions so as to ensure that there is a sufficient margin between the costs of our raw materials and the price of ethanol sold, which is known in the industry as a “crush margin.” Furthermore, in Brazil, we also grow our own sugarcane, which partially insulates us against any extreme price fluctuations in Brazil and allows our ethanol production plants to remain properly supplied.

In addition, our Engineering and Construction and Industrial Production activities and the Solar segment of our Concession-Type Infrastructure activity require significant consumption of energy, predominantly electricity and natural gas, and we are, therefore, exposed to fluctuations in their price. Although our energy

consumption costs account for a relatively small portion of our total operating expenses, the price of energy is volatile and shortages can occur leading to unexpected price increases. To mitigate this risk, some of our energy and gas contracts include mechanisms to limit price increases such as caps, indexing any cost increase to an increase in output price or permitting a pass-through of the cost increase to the customer. Significant increases in energy or oil costs or shortages in supply can have an adverse effect on our business. However, we also benefit from increases in energy prices through our Biofuels segment and our Engineering and Construction activity when plants are not subject to the fixed tariff regime. As the Solar segment of our Concession-Type Infrastructure activity generates revenue from the sale of electricity produced, increases in energy prices may increase our revenue generated by our solar power plants and, in the Biofuels segment of our Industrial Production activity, our biofuel process plants in Europe and Brazil contain co-generation units that produce excess electricity, which is sold to public utilities such as Eletrobrás in Brazil.

To mitigate certain risks of variation in market prices of commodities, we seek to hedge our exposure through the use of forward sale and purchase contracts and options listed on organized markets, as well as over-the-counter contracts with financial entities. Nevertheless, our actions may not be successful and such arrangements expose us to the credit risk of our counterparties.

Regulation

We operate in a significant number of regulated markets and our Engineering and Construction and Industrial Production activities and the Solar segment of our Concession-Type Infrastructure activity are, in particular, subject to extensive regulation by governmental agencies in a number of the countries in which they operate. The degree of regulation that each one of our operating segments is subject to varies according to country. In a number of the countries in which we operate, regulation is carried out by national regulatory authorities. In some countries, such as the United States, Brazil and, to a certain degree, Spain, there are various additional layers of regulation at the state, regional and/or local level. In countries such as these, the degree of state, regional and/or local regulation may also be materially different for operating segments within the particular country, if the operating segments are located in different states and/or localities.

Renewable Energies

Demand for a number of our products and services from our operations including our Engineering and Construction and Industrial Production activities and the Solar segment of our Concession-Type Infrastructure activity, depends significantly on government legislation, regulation, incentives and subsidies aimed at promoting greater use of renewable energies and sustainable products and services. This governmental action has been driven by political change largely precipitated from public perception of climate change and desired action from government, particularly in the United States and Europe.

In our Solar segment, various key jurisdictions, including the United States and Europe, have introduced or bolstered regulation concerning the use of solar and other renewable energies. The United States unveiled legislative changes, and the European Union passed the new Renewable Energies Directive ("**RED**") and the Fuel Quality Directive ("**FQD**") in April 2009, both of which, among other things, impose renewable energy targets for 2020. The RED covers energy consumption as a whole, including for heating and cooling, and lays down legally binding rather than indicative national targets such that the EU, as a whole, achieves a 20% share of renewable energy by 2020. The FQD establishes a 10% renewable energy in transport target by 2020. In our Biofuels segment, we have benefited from regulation, which has facilitated the development of new technologies and enabled biofuel producers to operate profitably.

Spain, after many years of strong support for solar and other renewable energies, has recently enacted several new laws introducing regulatory changes which adversely affect the solar industry, including our solar activities in Spain. These regulatory changes include a new law adopted on December 27, 2012 which imposes a 7% levy on revenue received from power generation, including the revenue we generate from thermo-solar plants, and excludes from the feed-in tariff the power produced by thermo-solar installations

using gas (going forward, payment for this energy will be at market price). A new law adopted on February 1, 2013 limiting remuneration schemes for renewable energy produced by eliminating pool plus premium pricing and changing the applicable adjustment for changes in the consumer price index. In July 2013, the Spanish government passed a new law related to the electric sector in Spain, the goal of which is to achieve financial stability in the sector by approving a new legal and remuneration special regime for facilities producing electricity from renewable energy sources, among other things. Royal Decree Law 9/2013, of July 12, on the adoption of urgent measures to guarantee the financial stability of the electric system entered into force on July 15, 2013 (as amended as the case may be pursuant to Act 24/2013, of December 26, of the Electricity Sector, "RDL 9/2013"). According to the provisions of RDL 9/2013, the new remunerative regime enables renewable energy facilities to obtain reasonable profitability in relation to a standard facility applicable in each case. Reasonable profitability shall be calculated, before taxes, on the average yield of Spanish government 10 year bonds on the secondary market, applying the appropriate differential. Nevertheless, for those special regime facilities that, on the date of entry into force of RDL 9/2013, were entitled to premium based remuneration, reasonable profitability will be set, before tax, on the average yield of Spanish government 10 year bonds on the secondary market in the preceding 10 years plus 300 basis points, which in any event will be reviewed every six years. See "*Regulation—Spain—Solar Regulation—Solar Regulatory Framework—Law 15/2012 on Tax Measures for Energy Sustainability.*"

Taken by themselves, these regulatory changes adversely affect our thermo-solar electricity generation activity in Spain, and therefore the results of our Solar segment. However, based on the bilateral legal relationship established between us and the Spanish government in the individual rulings that we obtained in early 2011 from the Ministry of Industry, we believe that we have legal recourse to bring claims for the impact on the profitability of our plants caused by the Spanish government's nonperformance, although those rulings do not guarantee that we would be successful in any claim brought by us against the Spanish government. In this regard, in June 2013, we commenced a private-law action against the Spanish government in the civil court of first instance (*juzgado de primera instancia*) in Seville for breach of contract based on the administrative ruling issued in respect of our Helios I thermo-solar plant. In that action, we are seeking performance by the Spanish government in accordance with the terms of that administrative ruling or, in the alternative, money damages in an amount equivalent to the difference between the profit we would have obtained under the administering ruling and the profit that we will obtain under the Spanish government's special-regime tariff. The civil court has dismissed our complaint on the procedural ground that we must first exhaust our administrative remedies before the Ministry of Industry. We believe the dismissal was improper under applicable case-law and have appealed the lower court's decision to the appellate court (*audiencia provincial*) in Seville. Also in June 2013, we submitted a demand for arbitration on behalf of our subsidiary CSP Equity Investment S.a.r.l. against the Spanish government as a signatory to the Energy Charter Treaty. CSP Equity Investment holds our equity interests in the Helioenergy 1 and 2, Solaben 2 and 3, and Solacor 1 and 2 thermo-solar plants. Our demand for arbitration alleges that the Spanish government's regulatory reforms of the electricity sector have breached CSP Equity Investment's legitimate expectations under the administrative rulings issued in respect of those facilities and constitute expropriation. Further, we are seeking compensation through money damages, in an amount yet to be determined. The arbitral proceeding will be conducted in The Hague in accordance with the rules of the Arbitration Institute of the Stockholm Chamber of Commerce before a panel of three arbitrators. Two of the three arbitrators have been appointed; the chair of the arbitral tribunal is in the process of being appointed. In July 2014 our demand for arbitration was actualized on the remuneration parameters for standard facilities, applicable to facilities under Ministerial Order IET/1045/2014, of June 16, 2014. In September, 2014, our fifteen Solar Power Plants in Spain, commenced a public-law action in the Supreme Court (Tribunal Supremo) against the parameters for standard facilities, applicable to our Solar Power Plants in Spain under Ministerial Order IET/1045/2014, of June 16, 2014, in order to obtain the annulment or vacation of those parameters. Such actions are not intended to claim for damages.

Also, in September 2014, the bioenergy companies, Ecocarburantes Españoles, S.A., Bioetanol Galicia, S.A., and Biocarburantes Castilla y León S. A., have brought a public law action against

R.D. 413/2014 and OM IET/1045/2014, enacted by Spanish authorities, in the Supreme Court (Tribunal Supremo), to declare their annulment.

Certain government policies may expire or be phased out over time, cease due to lack of funding or upon exhaustion of the allocated funding or be subject to cancellation or non-renewal by the applicable authority, including in Spain as a result of austerity measures introduced in recent years. See "*Regulation—Spain—Solar Regulation—Solar Regulatory Framework—Law 15/2012 on Tax Measures for Energy Sustainability.*" As we cannot guarantee that such government support will be maintained in full, in part or at all, the market for our products and services and our corresponding results of operations could be materially adversely affected.

Research, Development and Innovation

Under Spanish law, our expenditures associated technological innovation activities are entitled, among other things, to a deduction in corporate tax between 8% and 42% (between 12% and 42% for fiscal periods commencing after the entry into force of Law 2/2011, March 4, 2011 on Sustainable Economy), according to the technological level of the project, for the fiscal year in which they were incurred, provided that such expenditures were incurred in accordance with cost accounting and were specifically undertaken in connection with identified projects. These deductions may be applied in assessments of tax periods that end in the 18 years subsequent to the tax period in which they were generated, provided that the other requirements of the corporate income tax regulations are complied with. The amount of deferred tax assets corresponding to R&D tax deductions amounted to €72.5 million as of December 31, 2013. (Pursuant to Law 14/2013 of September 27 to support entrepreneurs and their internationalization, for fiscal years initiated as from January 1, 2013 and at the discretion of the tax payer, under certain circumstances, upon a 20% reduction of the R&D&i tax deduction, this deduction will not be subject to the ordinary limitations in the application of tax deductions and in case of lack of tax quota of the period in which to apply this tax deduction, it will be refundable in cash. The maximum R&D tax deduction either applicable or refundable is €3 million per year and €1 million for technological innovation. In addition to these deductions, which can be generated during the period of creation of an intangible asset, Spanish law allows the application of another tax incentive during the period of utilization of certain intangible assets. Pursuant to Article 23 of the Revised Text of the Spanish Income Tax Act, we may apply for tax incentives for the transfer of use of intangible assets. Such incentives consist of a 50% exemption of the revenue generated by the transfer of use of such intangible assets which is applied directly to the taxable income (i.e., licensing revenue or royalties). Pursuant to Law 14/2013 of September 27 to support entrepreneurs and their internationalization, this tax incentive has been modified with effects as from September 28, 2013. For the transfer of use of intangible assets carried out as from such date, this tax incentive will consist of a 60% reduction of the profit generated by the transfer of use of such intangible assets. This incentive is expected to be recurring over the coming years. As it is not a deduction to be applied to the income tax payable, it is not carried forward and does not generate a deferred tax asset as is the case with R&D tax deductions.

In the United States, we participate in loan guarantee programs with the DOE that are aimed at promoting the rapid deployment of renewable energy and electric power transmission projects. The programs provide loan guarantees to renewable energy projects, related manufacturing facilities and electric power transmission projects. As part of these programs, in June 2011, the DOE offered us a conditional commitment for a \$1,202 million loan guarantee to support the construction and start-up of our Mojave solar project, a 280 MW CSP solar plant in the Mojave Desert, California. In addition, on December 21, 2010, the DOE announced a final commitment for a \$1,450 million loan guarantee to support the construction and start-up of one of the largest CSP power plants in the world (Solana). Furthermore, our Solar and Biofuels segments have also received DOE research grants of \$145.8 million and in 2010, our Biofuels segment signed a four-year \$35.5 million contract to develop technology for advanced biorefining of distillers, grain and corn blends.

Environmental

Our business is subject to significant environmental regulation, which, among other things, requires us to perform environmental impact studies on future projects, obtain regulatory licenses, permits and other approvals and to comply with the requirements of such licenses, permits and approvals. Over recent years, environmental regulation has increased and changed rapidly and has caused a corresponding increase in our cost of compliance and has impacted our financial condition. Furthermore, if we fail to be in compliance, we may become subject to significant liability, including fines, penalties, damages, fees and expenses and closures.

Spanish Export Tax Credit

Through our increasing international presence and a corresponding increase in our overseas investments and exports, we have claimed tax benefits provided under Article 37, Export Tax Credit (*Deducción por actividades de exportación 'DAEX'*) of the Spanish Corporate Income Tax law, in connection with our overseas investments and exports of goods and services from Spain. Export tax credits provided in connection with overseas investments are calculated as a percentage of investments through the acquisition of interest in foreign companies or the incorporation of subsidiaries established abroad. This percentage, which was initially set at 25%, has been progressively reduced since 2007 to reach 3% in 2010 and 0% in 2011 (the Export Tax Credit was repealed with effect from January 1, 2011). As of December 31, 2011, we have recognized the full amount of Export Tax Credits generated through 2010. The amount of deferred tax assets recognized for this credit totalled €242.9 million as of June 30, 2014. The amount recognized in 2011 corresponds to tax credits generated in prior periods. The recognition of this tax credit was made after updating the forecasts used for the valuation of the deferred tax assets due to a regulatory change that increased the limit for applying these credits from 50% to 60% of the income tax payable. We also took into account the fact that an income tax audit by the Spanish tax authorities of the Spanish tax group for the periods 2005 to 2008, which was finalized on January 26, 2012, provided favourable results for the Company with respect to the application of this tax credit.

Spanish Export Tax Incentive

International projects involving the export of goods and services from Spain receive special treatment in Spain, generating a tax incentive applicable to the taxable income base for the year, which exempts any profits from abroad. These are not deductions to be applied to the income tax payable amount, but rather incentives that are applied directly to reduce the taxable income of the current year. Therefore, they are recognized directly in the income statement as a lower tax expense, and they do not result in the capitalization of any deferred tax asset.

Backlog and Concessions

We believe that our backlog is a significant indicator of the growth of our Engineering and Construction (“E&C”) business and provides useful trend information and revenue visibility based on our activities over the previous two years. Backlog serves to measure the total euro value of work to be performed on contracts awarded, in progress and customer subscriptions, but does not include estimated revenue streams from the operating phase of any of our concession based projects, which are reported in a different operating segment. Backlog consists principally of projects, operations and services for which we have signed contracts and in respect of which we have received non-binding commitments from customers or other operations within our Group, where the related revenues are not eliminated upon consolidation. Commitments may be in the form of written contracts for specific projects, purchase orders, or indications of the amount of time and materials we need to make available for customers’ anticipated projects. The volume and timing of executing the work in our backlog is important to us in anticipating our operational and financing needs and our ability to execute our backlog is dependent on our ability to meet such operational and financing needs. Our work to be performed in our backlog is typically completed within 12 to 24 months. Backlog is provided

on a net basis after accounting for intra group eliminations. As of June 30, 2014, December 31, 2013, 2012 and 2011, our backlog (excluding intra group sales) was approximately €7,671 million, €6,679 million and €7,535 million, respectively.

We expect that our backlog will drive our results of operations in the near term as we undertake projects and operations. While our backlog has been broadly stable in recent years, it has fluctuated on a quarter-to-quarter basis due to the signing of new contracts, more of which have historically tended to be executed as the year progresses as customers make purchases under their capital budgets, as well as the pace of execution of existing contracts. As a result of the changes in our backlog, whether due to the signing of new contracts or commitments, the pace of execution of our contracts or otherwise, our results of operations for certain of the financial periods discussed in this Listing Memorandum may not be directly comparable with our results of operations for other financial periods discussed herein or future financial periods. See *"Risk Factors—Risks Related to Our Business and the Markets in Which We Operate—Our backlog of unfilled orders is subject to unexpected adjustments and cancellations and is, therefore, not a fully accurate indicator of our future revenue or earnings."*

As of June 30, 2014, the average remaining life of our concessions and concession-type agreements was approximately 25 years. We believe that the average life of our concessions and concession-type agreements is a significant indicator of our forecasted revenue streams and the growth of our business. Concessions consist of long-term projects awarded to, and undertaken by us (in conjunction with other companies or on an exclusive basis) typically over a term of 20 to 30 years. Such projects typically include the construction phase, as well as future provisions associated with the operation and maintenance services provided during the concession period. In order to maintain or grow our business, we must obtain extensions to our current concessions and concession-type agreements or secure new concessions to replace our concessions as they expire. Furthermore, the revenue that we generate from our concession projects is significantly dependent on regulated tariffs. Under most of our concession agreements, there is an established tariff structure that provides us with limited or no possibility to adjust our tariffs as a result of fluctuations in prices of raw materials, exchange rates, labor and subcontractor costs or any other variations in the conditions of specific jurisdictions in which our concessions are located.

Capital Expenditures

Our business has significant capital expenditure requirements, including construction as well as R&D&i costs. Our capital expenditure requirements include asset and concession construction costs of power transmission lines, solar power plants and co-generation power plants, as well as infrastructure for the production of ethanol and desalination plants. We finance these capital projects primarily through Non-Recourse Debt issued by a project finance company, along with debt incurred at the corporate level. Consequently, a significant part of our business is capital-intensive and our new assets under construction are highly leveraged. Over the last few years, the costs associated with our requirements have increased significantly, largely due to our increased business activity. See (*"—Liquidity and Capital Resources—Capital Expenditures"*). As a result, these increases have resulted in an increase of our Non-Recourse Debt and related increased service costs, resulting in significantly reduced available cash flow from our project finance companies. Nevertheless, as projects become operational, cash-flow from project companies is expected to increase.

Interest Rates

We incur significant indebtedness during the course of our operations. The interest rate risk arises mainly from indebtedness with variable interest rates. To mitigate the interest rate risk, we primarily use interest rate swaps and interest rate options which, in exchange for a fee, offer protection against a rise in interest rates. Our results of operations can be affected by changes in interest rates with respect to the unhedged portion of our indebtedness that bears interest at floating rates, which typically bears a spread over EURIBOR, LIBOR and Taxa de Juros de Longo Prazo ("**TJLP**"), for our Brazilian operations.

In the event that EURIBOR had risen by 25 basis points as of December 31, 2013, with the rest of the variables remaining constant, the effect in the consolidated income statement for the year ended December 31, 2013 would have been a profit of €13,669 thousand (a profit of €4,004 thousand in 2012) mainly due to the increase in time value of hedge interest rate options (caps and collars) and an increase of €48,050 thousand in other reserves (an increase of €52,163 thousand in 2012) mainly due to the increase in value of hedging interest derivatives (swaps, caps and collars).

A significant increase in interest rates could also reduce the profitability of our projects in the development stage for which we have not yet secured financing and make it more costly for us to submit bids for concessions or third-party construction contracts. In addition, while the financing costs of our subsidiaries tend to be high during the early years of a relevant concession or construction contract, during which the cash flows from the assets support a significant amount of debt in relation to relatively low revenue, we may have opportunities to refinance such debt as such concessions or construction contracts become more mature and their revenue, cash flow and debt coverage ratios improve.

Exchange Rates

Our functional currency is the euro, but our revenue and expenses are denominated in the local currency of the jurisdictions in which we operate. As we have globally expanded our business, a large and increasing percentage of our revenue is now derived from countries outside of the Eurozone.

As a result, fluctuations in the value of foreign currencies relative to the euro impact our operating results. Impacts associated with fluctuations in foreign currency are discussed in more detail under ("*Quantitative and Qualitative Disclosure About Market Risk—Foreign Exchange Rate Risk.*") In countries with currencies other than the euro, assets and liabilities are translated into euro using end-of-period exchange rates; revenue, expenses and cash flows are translated using average rates of exchange. The following tables illustrate the average rates of exchange used.

<u>Period</u>	<u>euro average per U.S. dollar</u>
Six months ended June 30, 2014	0.7356
Year ended December 31, 2013	0.7532
Year ended December 31, 2012	0.7778
Year ended December 31, 2011	0.7189

We are exposed to foreign exchange rate fluctuations principally between the euro and our U.S. Dollar denominated debt. In order to mitigate these exchange risks, we enter into forward exchange contracts and currency options which hedge the fair value of our future cash flows.

In the event that the exchange rate of the U.S. Dollar had risen by 10% against the euro as of December 31, 2013, with the rest of the variables remaining constant, the effect in the consolidated income statement for the year ended December 31, 2013 would have been a loss of €8,496 thousand (a loss of €10,602 thousand in 2012) mainly due to the U.S. Dollar net liability position of the Group in companies with euro functional currency and an increase of €1,192 thousand (a decrease of €2,440 in 2012) in other reserves as a result of the cash flow hedging effects on highly probable future transactions.

In addition, we are generally exposed to foreign currency exchange translation risk with respect to our subsidiaries whose reporting currency is other than the euro. The contribution of these subsidiaries to our Consolidated Financial Statements is significantly affected by the fluctuations in exchange rate between their reporting currency and the euro. Our primary foreign exchange translation risk results from our Brazilian and U.S. subsidiaries.

In our discussion of operating results, we have included foreign exchange impacts in our revenue by providing constant currency revenue growth. The constant currency presentation is a non-GAAP financial measure, which excludes the impact of fluctuations in foreign currency exchange rates. We believe providing constant currency information provides valuable supplemental information regarding our results of operations. We calculate constant currency amounts by converting our current period local currency revenue using the prior period foreign currency average exchange rates and comparing these adjusted amounts to our prior period reported results. This calculation may differ from similarly titled measures used by others and, accordingly, the constant currency presentation is not meant to substitute for recorded amounts presented in conformity with GAAP nor should such amounts be considered in isolation.

Key Performance Indicators

In addition to the factors described above, we closely monitor the following key drivers of our businesses' operating performance to plan for our current needs, and to adjust our expectations, financial budgets and forecasts appropriately.

	As of June 30, 2014
	(unaudited)

The Global Economy

Our results of operations have been and continue to be affected by conditions in the global economy. Concerns over inflation, energy costs, geopolitical issues, sovereign debt and government austerity programs and the availability and cost of credit have contributed to increased volatility and diminished expectations for economic growth going forward. These factors, combined with volatile oil prices, declining global business and consumer confidence and increased unemployment, have precipitated an economic slowdown which has been followed by inconsistent signs of growth. For example, in our Engineering and Construction activity, the global downturn resulted in a significant decline in investment and current projects under negotiation or in progress slowed down significantly. These declines were largely driven by reduced spending by governments, public administrations and utility companies and a resultant increase in competition for remaining projects.

Notwithstanding conditions in the global economy generally, some operations within our segments have experienced positive effects due to increased government spending in certain sectors as part of stimulus measures to combat weak economic conditions. For example, there has been recent increased public spending in infrastructure, renewable energies and the water desalination sectors which are all currently experiencing significantly increased growth in certain countries. In addition, a significant part of our business is regulated or benefits from long-term offtake contracts, which provide some protection from the global economic downturn.

Engineering and Construction

The revenue and profitability of our Engineering and Construction activity is determined by the demand for our services with respect to new infrastructure, mainly in the energy sector. We primarily monitor the amount of our backlog as a significant indicator of our forecasted revenue streams and the growth of that activity. The margins we are able to achieve with respect to the services we provide in our Engineering and Construction activity drive that activity's revenue and profitability.

Concession-Type Infrastructure

The revenue of our Concession-Type Infrastructure activity is determined by the amount of MW capacity under operation in our thermo solar and co-generation plants, the number of kilometers available and operating in our power transmission lines and the volume (in cubic meters) of water treated in our desalination plants. We are currently making significant investments in the development of such assets (as of June 30, 2014 we had €9,727.4 million of net fixed assets and are continuously looking for new opportunities in the area of public private concession agreements (examples include the Mojave project in the United States, the new power transmission lines in Peru and Chile and the co-generation plant in Tabasco (Mexico), which are all in the pre-construction or construction phases) that will contribute to our Concession-Type Infrastructure activity's revenue in the future.

Industrial Production

The profitability of our Industrial Production activity is mainly affected by the volume (in ML) of bioethanol produced, crush margin, which is determined by the commodity input price (mainly for corn, sugarcane and natural gas) and output prices (mainly prices for ethanol and sugar), and prices for the byproducts sold, such as electricity or DGS.

Critical Accounting Policies and Estimates

The preparation of our consolidated financial statements in conformity with IFRS requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses. We base our estimates on historical experience and on various other assumptions we believe to be reasonable under the specific circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

An understanding of the accounting policies for these items is important to understand the consolidated financial statements. The following discussion provides more information regarding the estimates and assumptions used for these items in accordance with IFRS and should be considered in conjunction with the our consolidated financial statements.

The most critical accounting policies, which reflect significant management estimates and judgment to determine amounts in the our consolidated financial statements, are as follows:

- Impairment of intangible assets and goodwill.
- Revenue from construction contracts.
- Income taxes and recoverable amount of deferred tax assets.
- Derivative financial instruments.
- Concession agreements.

Some of these accounting policies require the application of significant judgment by management to select the appropriate assumptions to determine these estimates. These assumptions and estimates are based on our historical experience, advice from experienced consultants, forecasts and other circumstances and expectations as of the close of the financial period. The assessment is considered in relation to the global economic situation of the industries and regions where the Group operates, taking into account future development of our businesses. By their nature, these judgments are subject to an inherent degree of uncertainty; therefore, actual results could materially differ from the estimates and assumptions used. In such cases, the carrying values of assets and liabilities are adjusted.

As of the date of preparation of our Interim Consolidated Financial Statements, no relevant changes in the estimates made are anticipated and, therefore, no significant changes in the value of the assets and liabilities recognized at June 30, 2014 was made.

Although these estimates and assumptions are being made using all available facts and circumstances, it is possible that future events may require management to amend such estimates and assumptions in future periods. Changes in accounting estimates are recognized prospectively, in accordance with IAS 8, in the consolidated income statement of the year in which the change occurs. The Group significant accounting policies are more fully described in Note 2 to the Consolidated Financial Statements for the year ended December 31, 2013, presented elsewhere in this Listing Memorandum.

Impairment of intangible assets and goodwill

Goodwill and intangible assets which have not yet come into operation or that have an indefinite useful life are not amortized and are tested for impairment on an annual basis or whenever there is an impairment indicator. Goodwill is tested for impairment within the cash-generating unit to which it belongs. Other intangible assets are tested individually, unless they do not generate cash flows independently from other assets, in which case they are tested within the cash-generating unit to which they belong.

For those cash generating units with high potential growth, the Group uses cash flow projections for a period of 10 years based on the cash flows identified in the Group's strategic plans, which are reviewed and approved every six months by the management of the Group. The residual value is calculated based on the cash flows of the latest year projected using a steady or nil growth rate. The use of a 10 year period is based on the consideration that this is the minimum period that needs to be used in order to appropriately reflect all the potential growth of these cash generating units. In addition, 10 years projections are prepared based on the historical experience within the Group in preparing long-term strategic plans, which are considered reliable and are prepared on the basis of the Group's internal control system. These cash flows are considered reliable since they can easily adapt to the changes of the market and of the business segment to which cash generating units belong, based on the Group's past experience on cash flows and margins and on future expectations.

For other cash generating units the Group uses cash flows projections based on a period of 5 years, calculating the residual value based on the cash flows of the latest year projected, using a zero growth rate.

Projected cash flows are discounted using the weighted average cost of capital ("**WACC**") (see Note 2.8 to our Consolidated Financial Statements), adjusted for the specific risks associated to the business unit to which the cash generating unit belongs.

Based on values in use calculated in accordance with the assumptions and hypotheses described above and in Note 8 to our Consolidated Financial Statements, the recoverable amount of the cash generating units to which goodwill was assigned is higher than their carrying amount. Detailed sensitivity analysis has been carried out and we believe that the carrying amount of the cash generating units will be recovered in full. Main variables considered in sensitivity analysis are growth rates, discount rates based in WACC and the main variables of each business.

During the years ended 2013 and 2012 and for the six months ended June 30, 2014, there were no intangible assets with indefinite useful life and there were no significant intangible assets not yet in use that were impaired.

Revenue from construction contracts

Revenue from construction contracts is recognized using the percentage-of-completion method for contracts whose outcome can be reliably estimated and whose profitability is probable. When the outcome of a construction contract cannot be reliably estimated, revenue is recognized only to the extent it is probable that contract costs incurred will be recoverable.

As described in Note 2.24.b to our Consolidated Financial Statements, the percentage of completion is determined at the date of every Consolidated Statement of Financial Position based on the actual costs incurred as a percentage of total estimated costs for the entire contract.

Revenue recognition using the percentage-of-completion method involves the use of estimates of certain key elements of the construction contracts, such as total estimated contract costs, allowances or provisions related to the contract, period of execution of the contract and recoverability of the claims. We have established, over the years, a robust project management and control system, with periodic monitoring of each project. This system is based on the long-track experience of the Group in constructing complex infrastructures and installations. As far as practicable, the Group applies past experience in estimating the main elements of construction contracts and relies on objective data, such as physical inspections or third parties confirmations. Nevertheless, given the highly tailored characteristics of the construction contracts, most of the estimates are unique to the specific facts and circumstances of each contract.

Although estimates on construction contracts are periodically reviewed on an individual basis, we exercise significant judgments and not all possible risks can be specifically quantified.

It is important to point out that, as stated in Note 2.4 to our Consolidated Financial Statements on the measurement of property, plant and equipment, in the internal asset construction projects outside the scope of IFRIC 12 on Service Concession Arrangements (see Note 2.5 to our Consolidated Financial Statements), the totality of the revenues and profits between group companies is eliminated, meaning those assets are shown at their acquisition cost.

Income taxes and recoverable amount of deferred tax assets

The current income tax provision is calculated on the basis of relevant tax laws in force at the date of our Consolidated Financial Statements in the countries in which the subsidiaries and associates operate and generate taxable income. Subsidiaries which are not included in the consolidated income tax returns filed in Spain file income tax returns in numerous tax jurisdictions around the world.

Determining income tax payable requires judgment in assessing the timing and the amount of deductible and taxable items, as well as the interpretation and application of tax laws in different jurisdictions. Due to this fact, contingencies or additional tax expenses could arise as a result of tax inspections or different interpretations of certain tax laws by the corresponding tax authorities.

We recognize deferred tax assets for all deductible temporary differences and all unused tax losses and tax credits to the extent that it is probable that future taxable profit will be available against which they can be utilized.

We consider it probable that we will have sufficient taxable profit available in the future to enable a deferred tax asset to be recovered when:

- there are sufficient taxable temporary differences relating to the same tax authority, and the same taxable entity is expected to reverse either in the same period as the expected reversal of the deductible temporary difference or in periods into which a tax loss arising from the deferred tax asset can be carried back or forward;
- it is probable that the taxable entity will have sufficient taxable profit, relating to the same tax authority and the same taxable entity, in the same period as the reversal of the deductible temporary difference (or in the periods into which a tax loss arising from the deferred tax asset can be carried back or forward); or
- tax planning opportunities are available to the entity that will create taxable profit in appropriate periods.

As of December 31, 2013, our deferred tax assets corresponded mainly to tax loss carryforwards in Brazil, Spain, the Netherlands and the United States, and to tax credits for export activities and other tax deductions generated in Spain, as shown in the following table:

	<u>As of December 31, 2013</u> (€ in millions)
Tax credits for Tax Loss Carryforwards:	
Spain	66
Brazil	169
United States	55
Netherlands	57
Other	31
	<u>378</u>
Tax credits for deductions to be applied in future periods:	
Spanish Export Tax Credit (DAEX)	243
R&D&i Tax Credits in Spain	73
Tax Credits for deduction on reinvestment of certain benefits in Spain	50
Tax Credits for environmental investments in Spain	12
Tax Credits for double taxation in Spain	85
Tax Credits for donations and other (mainly in Spain)	21
	<u>484</u>

The jurisdictions where we have tax credits and where we have also recorded tax losses are Brazil, the United States, the Netherlands (mainly coming from the bioenergy business in the three nations), and Spain. The subsidiaries in these jurisdictions, which include companies in our biofuels, engineering and construction, solar and water segments, are expected to generate taxable profit in the upcoming years, as described in more detail below.

We have credits for tax loss carryforwards in Brazil of €169 million as of December 31, 2013. Tax credits for tax loss carryforwards in Brazil were mainly generated in recent years with very poor weather conditions which affected our sugar cane production. In 2011, 2012 and 2013 we made investments to improve the quality of the plantations and to increase the milling capacity of the facilities, as well as in the cogeneration plant in order to increase the profitability of the assets. The tax loss carryforwards are expected to offset future taxable income in Brazil, as there is no time limit under Brazilian tax legislation for their application. In addition, at the end of 2012 an internal restructuring was carried out in Brazil in order to obtain additional benefits from certain intangible assets related to our bioenergy business. We expect to generate taxable income that will help to use the tax credits we have in this jurisdiction. We also operate in Brazil through our Engineering and Construction activity. In the last three tax returns submitted in this jurisdiction, we generated taxable losses amounting to €38 million in 2012 and €28 million in 2011.

Tax credits for tax loss carryforwards in the United States amount to approximately €55 million and expire in 20 years. In order to utilize these tax loss carryforwards, we would need to generate future taxable income of approximately €153 million. During the last years the taxable losses generated by the Company in the United States have been driven mainly by specific tax advantages like bonus depreciations and the application of specific Modified Accelerated Cost Recovery System (“**MACRS**”) in our Biofuels segment. Those taxable losses were related to new ethanol plants that we brought into operation within the last years. Without the application of such tax advantages, the U.S. Bioenergy business would have achieved taxable income in those years.

During the year 2013, we undertook a restructuring of our subsidiaries in the United States, for business purposes. After the restructuring, most of our U.S. subsidiaries in our Biofuels, Engineering and Construction, Water and Solar segments are affiliates of Abengoa US, LLC, which is in turn a subsidiary of newly

incorporated entities corresponding to each of the four operating segments mentioned above. This structure permit us to calculate our income tax in the United States on an aggregated basis for these companies.

In Engineering and Construction, we forecast growth in the three markets in which we operate in the U.S. (engineering, procurement and construction of large projects in the water and energy sectors, electric transmission projects and other services like ancillary manufacturing, logistics and supplies, and project management). We expect to generate taxable income in all our Engineering and Construction subsidiaries in the upcoming years.

In Biofuels, 2012 represented an exceptionally negative year in terms of margins and results, mainly due to the deep drought that affected most of the producer countries and which caused in the lowest crop yield during the last 30 years and the tightest global corn stocks supply in 39 years (USDA report data). This unusual situation resulted in a significant increase in the price of the corn grain up to historical levels, which significantly reduced our margins. In addition, a drop in gasoline consumption, and therefore ethanol demand, had an impact on the price of ethanol during the year. During 2013, prices and margins have recovered mainly due to better harvests and to an increase in the price of ethanol because of the reduction of inventory levels in the industry. This has adjusted the demand for ethanol and prices have risen to return to historically normal margin levels.

Considering this overall situation, our Bioenergy companies have generated operational taxable losses during the year 2013. We expect this situation to change in future years, when we expect to generate taxable income thanks to the recovery in margins we foresee and to the entry into operation of our second generation plant in Hugoton. However, our ability to generate future taxable income in our Biofuels segment in the United States depends on managing the spread among the prices of inputs (grain, natural gas and others) and outputs (ethanol, DGS and others), which are subject to significant volatility and uncertainty, as we disclose in *"Risk Factors—Risks Related to Our Industrial Production Activity."*

In our last U.S. tax returns submitted, considering all our segments, we generated taxable losses amounting to €30 million in 2012 and €24 million in 2011.

Tax credits for tax loss carryforwards in the Netherlands amounting to approximately €57 million expire in nine years. In order to utilize these tax loss carryforwards, we would need to generate future taxable income of approximately €217 million. At the end of 2012 and beginning of 2013, our plant in the Netherlands was shut down for a period of three months as a result of safety measurements that the company voluntarily wanted to undertake, which resulted in non-recurring losses for the years ended December 31, 2012 and 2013. In addition, recent regulatory decisions have been taken in the European Union aimed at reducing imports of bioethanol. We expect these measures will increase the demand in our plant in the Netherlands and we expect our subsidiary to generate enough taxable income in the foreseeable future to offset the tax loss carryforwards.

Tax loss carryforwards in Spain were mainly generated from applying certain tax incentives, such as Spanish Export Tax Incentive. In Spain, we have over €548 million in tax credits on deductions and on tax loss carryforwards, of which €66 million are credits for tax loss carryforwards. These tax credits and tax loss carryforwards expire over a period ranging from 15 to 18 years, and their recoverability is based on our ability to generate taxable income of €2.3 billion from our Spanish subsidiaries over this time period. We expect to generate this taxable income from our Engineering and Construction business, which has been growing consistently year-after-year, from our Spanish solar business, where we have brought new assets into operation at profitable margins, and from the contribution of our recurring Spanish biofuels businesses. Our ability to generate sufficient taxable income in Spain is dependent on the achievement of the above. Spain has recently experienced negative economic conditions, including high unemployment and significant government debt, which may adversely affect investment by customers in new projects. See *"Risk Factors—Risks Related to Our Business and the Markets in Which We Operate—Decreases in government budgets, reductions in government subsidies and adverse changes in law may adversely affect our business and the development of existing and new projects."* In addition, our ability to generate taxable income in Spain may

be affected by the performance of our thermo solar segment, which is subject to changes in regulation (see *"Risk Factors—Risks Related to the Concession-Type Infrastructure Activity—Our solar projects will be negatively affected if there are adverse changes to national and international laws and policies that support renewable energy sources"*), as our Engineering and Construction business relies on the construction of new infrastructures. In the last tax returns submitted, in this jurisdiction, we generated taxable income amounting to €194 million in 2012 and €224 million in 2011.

Our management assesses the recoverability of deferred tax assets on the basis of estimates of future taxable profit. These estimates are derived from the projections included in our five- and ten-year strategic plans, which are prepared on a yearly basis and reviewed twice a year for the accuracy of the assumptions used. Based on our current estimates we expect to generate sufficient future taxable income to achieve the realization of our current tax credits and tax loss carryforwards, supported by our historical trend of business performance.

Our current and deferred income taxes may be impacted by events and transactions arising in the normal course of business as well as by special non-recurring items. Assessment of the appropriate amount and classification of income taxes is dependent on several factors, including estimates of the timing and realization of deferred tax assets and the timing of income tax payments.

Actual collections and payments may materially differ from these estimates as a result of changes in tax laws as well as unforeseen future transactions impacting the income tax balances.

Derivatives and hedging

Derivatives are recorded at fair value. The Company applies hedge accounting to all hedging derivatives that qualify to be accounted for as hedges under IFRS.

When hedge accounting is applied, hedging strategy and risk management objectives are documented at inception, as well as the relationship between hedging instruments and hedged items. Effectiveness of the hedging relationship needs to be assessed on an ongoing basis. Effectiveness tests are performed prospectively and retrospectively at inception and at each reporting date, following the dollar offset method or the regression method, depending on the type of derivatives.

We have three types of hedges:

- Fair value hedge for recognized assets and liabilities
- Changes in fair value of the derivatives are recorded in the consolidated income statement, together with any changes in the fair value of the asset or liability that is being hedged.
- Cash flow hedge for forecasted transactions

The effective portion of changes in fair value of derivatives designated as cash flow hedges are recorded temporarily in equity and are subsequently reclassified from equity to profit or loss in the same period or periods during which the hedged item affects profit or loss. Any ineffective portion of the hedged transaction is recorded in the consolidated income statement as it occurs.

When options are designated as hedging instruments (such as interest rate options described in Note 14 to our Consolidated Financial Statements), the intrinsic value and time value of the financial hedge instrument are separated. Changes in intrinsic value which are highly effective are recorded in equity and subsequently reclassified from equity to profit or loss in the same period or periods during which the hedged item affects profit or loss. Changes in time value are recorded in the consolidated income statement, together with any ineffectiveness.

When the hedged forecasted transaction results in the recognition of a non-financial asset or liability, gains and losses previously recorded in equity are included in the initial cost of the asset or liability.

When the hedging instrument matures or is sold, or when it no longer meets the requirements to apply hedge accounting, accumulated gains and losses recorded in equity remain as such until the forecast transaction is ultimately recognized in the consolidated income statement. However, if it becomes unlikely that the forecast transaction will actually take place, the accumulated gains and losses in equity are recognized immediately in the consolidated income statement.

- Net investment hedges in foreign operation

Hedges of a net investment in a foreign operation, including the hedging of a monetary item considered part of a net investment, are recognized in a similar way to cash flow hedges. The foreign currency transaction gain or loss on the non-derivative hedging instrument that is designated as, and is effective as, an economic hedge of the net investment in a foreign operation is reported in the same manner as a translation adjustment. That is, reported in the cumulative translation adjustment section of equity to the extent it is effective as a hedge, as long as the following conditions are met: the notional amount of the non-derivative instrument matches the portion of the net investment designated as being hedged and the non-derivative instrument is denominated in the functional currency of the hedged net investment. In that circumstance, no hedge ineffectiveness would be recognized in earnings.

Amounts recorded in equity are reclassified to the consolidated income statement when the foreign operation is sold or otherwise disposed of.

Contracts held for the purposes of receiving or making payment of non-financial elements in accordance with expected purchases, sales or use of goods ("own-use contracts") of the Group are not recognized as derivative instruments, but as executory contracts. In the event that such contracts include embedded derivatives, they are recognized separately from the host contract, if the economic characteristics of the embedded derivative are not closely related to the economic characteristics of the host contract. The options contracted for the purchase or sale of non-financial elements which may be cancelled through cash outflows are not considered to be own-use contracts.

Changes in fair value of derivative instruments which do not qualify for hedge accounting are recognized immediately in the consolidated income statement. Trading derivatives are classified as current assets or liabilities.

In addition, during 2013, 2010 and 2009 the Group issued convertible bonds to qualified investors and institutions with an outstanding amount of €750.1 million, maturing between one (1) and six (6) years. In accordance with the terms and conditions of the issuances, the bonds qualify as hybrid instruments which are bifurcated into a debt component and an embedded derivative. Embedded derivatives are recognized initially at fair value and at each closing date they are re-measured at fair value, with the change in fair value being recorded in the consolidated income statement (see Note 20.3 to our Consolidated Financial Statements).

The inputs used to calculate fair value of our derivatives are based on prices observable on not quoted markets, through the application of valuation models (Level 2). The valuation techniques used to calculate fair value of our derivatives include discounting estimated future cash flows, using assumptions based on market conditions at the date of valuation or using market prices of similar comparable instruments, amongst others. The valuation of derivatives and the identification and valuation of embedded derivatives and own-use contracts requires the use of considerable professional judgment. These determinations were based on available market information and appropriate valuation methodologies. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.

Concession agreements

Service concession agreements are recorded in accordance with the provisions of IFRIC 12. IFRIC 12 is applicable to public-to-private service concession arrangements where the grantor of the concession governs

what services the operator must provide using the infrastructure, to whom and at what price and also controls any significant residual interest in the infrastructure at the end of the term of the arrangement. When the operator of the infrastructure is also responsible for the engineering, procurement and construction of such asset, IFRIC 12 requires the separate accounting for the revenue and margins associated with the construction activities, which is not eliminated in consolidation even between companies within the same consolidated group, and for the subsequent operation and maintenance of the infrastructure. In such cases, the investment in the infrastructure used in the concession arrangement cannot be classified as property, plant and equipment of the operator, but rather must be classified as a financial asset or an intangible asset, depending on the nature of the payment rights established under the contract. The infrastructures accounted for by us as service concessions under IFRIC 12 are mainly related to the activities concerning power transmission lines, desalination plants and thermo-solar electricity generation plants outside of Spain and, with effect from January 1, 2011, in Spain.

Any analysis regarding whether the IFRIC 12 applies to certain contracts and activities involves various complex factors. It is significantly affected by legal interpretation of certain contractual agreements or other terms and conditions with public sector entities.

Therefore, the application of IFRIC 12 requires extensive judgment in relation with, amongst other factors:

- the identification of certain infrastructures (and not contractual agreements) in the scope of IFRIC 12; (ii) the understanding of the nature of the payments in order to determine the classification of the infrastructure as a financial asset or as an intangible asset; and (iii) the recognition of the revenue from construction and concessionary activity.

Changes in one or more of the factors described above may significantly affect the conclusions as to the appropriateness of the application of IFRIC 12 and, therefore, the results of operations or our financial position (see Note 10.1 to our Consolidated Financial Statements).

Explanation of Income Statement Items

Revenue

Revenue consists of the fair value of consideration received for the sale of goods or services excluding any related charges resulting from operations, before any discounts or returns and excluding intra-group transactions. Revenue from the sale of goods is recognized when we deliver the goods to the client, the client accepts them and it is reasonably certain that the related receivables will be collectible. Revenue from the sale of services is recognized in the period in which the service is provided, using the percentage of completion method based on the specific contractual terms and conditions of each service agreement, when the revenue of the service contract and the associated costs, as well as the percentage of completion, can be estimated reliably and when it is reasonably certain that the related receivables will be collectible. When one or more of such elements of the service contract cannot be estimated reliably, ordinary income from the sale of service is recognized only to the extent of the expenses recognized that are recoverable. In addition, revenue is generated by the construction and operation of our concession projects is recognized in accordance with IFRIC 12 as described under “—Critical Accounting Policies and Estimates—Concession Agreements.” Revenue in each of our operating segments is generated as follows:

Engineering and Construction. Revenue is generated primarily from infrastructure construction contracts, engineering services and maintenance services of electrical, mechanical and industrial infrastructures.

Concession-Type Infrastructure. Revenue is generated primarily from the management and operation of our infrastructure related to power transmission lines, thermo-solar plants, water treatment plants, and co-generation plants which are all regulated through long-term sale agreements.

Industrial Production. Revenue is generated primarily from the production and sale of biofuel products including ethanol, sugar, biodiesel, distillers, grains and solubles, and electricity from co-generation plants.

Changes in inventories of finished goods and work in progress

Changes in inventories include the result of changes in inventories of finished products and work in progress during the year.

Other operating income

Other operating income includes income from government grants, income from work performed on our own assets, and capitalized and all other income not captured within any other income line item, including income for various services, as well as profit from the sale of subsidiaries. In addition, from time to time, other operating income may include income from litigation and arbitration awards.

Raw materials and consumables used

Raw materials consumed include the purchase and consumption of raw materials and changes in inventories of raw materials and other inventories. Primary raw materials include energy in all businesses, wheat, barley, corn, sorghum and sugarcane in our Biofuels segment and steel and iron in our Engineering and Construction activity.

Employee benefit expenses

Employee benefit expenses include wages and salaries, social security costs and costs associated with our employee stock option plans, along with other employee retributions.

Depreciation, amortization and impairment charges

This line item includes the depreciation of tangible assets, amortization of intangible assets with a finite useful life, charges for the impairment of assets related to the value of goodwill, tangible and intangible assets and accounts receivable, which have been reduced at period end in the event that their book value is lower than their recoverable amount.

Other operating expenses

Other operating expenses include external services, including expenses for leases, repairs and maintenance, research and development costs, expenses for independent professional services, such as accounting, banking, consultancy, legal and other advisory fees and commissions, expenses for transportation and supplies, taxes for external services and other management and general expenses.

Operating profit

Operating profit consists of revenue, changes in inventories, other operating income, raw materials consumed, employee benefit expenses, depreciation, amortization and impairment charges, research and development costs and other operating expenses.

Finance income

Finance income includes income earned from cash deposited with financial institutions and changes in the fair value of some interest rate derivative financial instruments.

Finance expenses

Finance expenses includes expenses due to interest and similar expenses, including interest on our outstanding corporate and non-recourse indebtedness and changes in the fair value of some interest rate derivative financial instruments.

Net exchange differences

Net exchange differences include gains and losses originating from exchange differences related to assets and liabilities denominated in foreign currencies and changes in the fair value of exchange rate derivatives.

Other net finance income/expenses

Other net finance income/expenses includes changes in the fair value of the embedded derivative component of our existing convertible bonds, dividend income from equity instruments, impairment of financial investments, disposals and changes in the fair value of financial investments and changes in the fair value of some commodity derivatives.

Finance expense net

Finance expense net represents the total of financial income, financial expenses, net exchange differences and other financial income/expenses.

Share of (loss)/profit of associates

Share of (loss)/profit of associates includes the results of companies accounted for using the equity method over which we exercise a significant influence but which are neither subsidiaries nor jointly controlled entities.

Profit before income tax

Profit before income tax represents our profit before the payment of corporate income tax.

Income tax benefit/expense

Income tax benefit/expense includes all current and deferred taxes, as calculated in accordance with the relevant tax laws in force in the jurisdictions in which we operate.

Profit for the year from continuing operations

Profit for the year from continuing operations represents the profit before income taxes after the deduction of corporate income tax, generated by the continuing operations of the Group.

Profit/(loss) from discontinued operations, net of tax

Profit/(loss) from discontinued operations, net of tax represents the profit before income taxes after the deduction of corporate income tax generated by the discontinued operations of the Group plus any gain or loss, net of tax, from the disposal of discontinued operations of the Group.

Profit for the year

Profit for the year represents the total of profit for the year from continuing operations plus profit/(loss) from discontinued operations, net of tax.

Profit attributable to non-controlling interest

Profit attributable to non-controlling interest represents profit for the year from continuing operations that is allocated to non-controlling interests in accordance with their percentage of the ownership of the affected subsidiaries.

Profit for the year attributable to the Parent Company

Profit for the year attributable to the Parent Company represents profit for the year after the deduction of corporate income tax and profit attributable to non-controlling interests.

Results of Operations

The tables below illustrate our results of operations for the six-month periods ended June 30, 2014 and 2013 and the years ended December 31, 2013, 2012 and 2011.

	(Unaudited)		Year ended December 31		
	Six months ended June 30		2013		
	2014	2013	2013	2012 ⁽¹⁾⁽²⁾	2011
	(€ in millions)				
Consolidated Income Statement Data					
Revenue	3,405.5	3,402.3	7,356.5	6,312.0	6,689.2
Changes in inventories of finished goods and work in progress	53.4	35.8	7.7	19.7	64.1
Other operating income	97.8	141.1	447	485.2	598.5
Raw materials and consumables used	(1,960.6)	(2,120.0)	(4,458.1)	(4,241.2)	(4,656.1)
Employee benefit expense	(428.5)	(391.2)	(758.4)	(709.6)	(610.4)
Depreciation, amortization and impairment charges	(233.7)	(238.1)	(571.2)	(422.0)	(230.6)
Other operating expenses	(472.9)	(537.4)	(1,229.5)	(917.5)	(922.2)
Operating profit	461.0	292.5	794	526.6	932.5
Finance income	15.9	43.9	64.6	84.1	105.4

Profit for the year	52.5	83.3	110.3	94	395.5
Profit/(loss) attributable to non-controlling interest from continued operations	16.3	(15.9)	(8.9)	(37.3)	(18.6)
Profit/(loss) attributable to non-controlling interest from discontinued operations	—	—	—	(1.3)	(2.8)
Profit for the year attributable to the parent company	68.8	67.4	101.4	55.4	374.1

(1) In the interim consolidated financial statements of Abengoa and its subsidiaries as of June 30, 2013, prepared in accordance with IFRS as issued by the IASB and included in our final prospectus for our initial public offering in the United States filed with the SEC pursuant to Rule 424(b) of the Securities Act of 1933 on October 17, 2013, the Group applied IFRS 10 and 11 that came into effect

on January 1, 2013 under IFRS-IASB. According to the terms and requirements established in IAS 8 "Accounting Policies, Changes in Accounting Estimates and Errors" and to the specific transition guidance of the new standards, we recasted the financial information as of and for the year ended December 31, 2012 in the final prospectus and the recasted financial information is included herein. Financial information for prior periods was not recasted therein or herein for IFRS 10 and 11 and consequently is not comparable with other periods presented. See "Presentation of Financial Information" and Note 2.1.1 to our Consolidated Financial Statements.

- (2) On July 15, 2013, we closed the sale of 100% of our shares in our subsidiary Befesa. On that date, we received €331 million of cash proceeds. Taking into account the significance of the activities carried out by Befesa to Abengoa, the sale of this shareholding is considered as a discontinued operation to in accordance with IFRS 5 "Non-Current Assets Held for Sale and Discontinued Operations." In accordance with this standard, the results of Befesa until the closing of the sale and the result of this sale are included under a single heading (profit for the year from discontinued operations, net of tax) in our Consolidated Financial Statements and under separate line items in the consolidated cash-flow statement for the year 2013. Likewise, the consolidated income statement for the years ended December 31, 2012 and 2011, also includes the results of Befesa under a single heading (see "Presentation of Financial Information" and Note 7 to our Consolidated Financial Statements). The Befesa Sale also resulted in the removal of the Industrial Recycling segment from our Industrial Production activity.

Geographic Reporting

For the years ended December 31, 2013, 2012 and 2011, we reported our results in accordance with the following six geographic regions:

- Spain;
- United States;
- Europe (excluding Spain);
- Latin America (excluding Brazil);
- Brazil; and
- Other (remaining overseas markets).

For the six month periods ended June 30, 2014 and 2013, we reported our results for Mexico as a part of North America and excluded these results from Latin America to better reflect the geographical segmentation of our business.

Comparison of Six Months Ended June 30, 2014 and June 30, 2013

Revenue

Revenue remained generally flat period over period, amounting to a total of €3,405.5 million for the six-month period ended June 30, 2014, an increase of 0.1% versus the same period in 2013. On a constant currency basis, revenue for the six-month period ended June 30, 2014 would have been €3,563.2 million, representing an increase of €160.9 million, or 4.7%, compared to the same period of the previous year. The slight increase in consolidated revenues was due to the increased revenue contribution from our Concessions-Type Infrastructure activity in the six-month period ended June 30, 2014 versus the same period in 2013.

Within our Engineering and Construction activity, revenues decreased by €113.2 million due to the completion of construction of the thermo-solar plant in the United States (the 280 MW Solana plant in Arizona), thermo-solar plants in Spain (Solaben 1 and 6) and the wind farm in Uruguay (Palmatir) and due to several projects nearing completion, such as Mojave thermo-solar plant in the United States (the 280 MW solar plant in California) and the Norte transmission line in Brazil. This effect was partially offset by higher revenues related to the construction of cogeneration plants in Mexico and in the United States, new transmission lines in Brazil and a thermo-solar plant in Chile.

Our Concession-Type Infrastructure activity delivered a 46.3% increase in the six-month period ended June 30, 2014 compared to the same period of the prior year, which was due to a solid performance of our

Solar, Transmission lines and Abengoa Yield segments and due to the contribution of several concession assets that were brought into operation in recent months. Revenues from our Solar segment increased 41.2% in the period due to the solar plants that entered into operation in Spain in the second half of 2013 (Solaben 1 and 6), as well as better weather conditions registered during the first half of 2014 compared to the same period of the previous year. Revenues in our Transmission segment also increased by 26.4% up to €31.0 million during the first six months of 2014 from €24.5 million in the same period last year. This increase is mainly attributable to the entry in operation of the power transmission line in Manaus which covers 586 km. Revenues in our Water segment activity have remained constant, contributing €20.6 million during the first six months of 2014. Revenues in our Co-generation and other segment decreased by 54.4% to €12.8 million in the first half of 2014, compared to the same period in 2013. This decrease was mainly due to the Spanish government's regulatory reforms of the electricity sector, given that after the reform a greater portion of the income is a fixed remuneration representing a lower amount compared to the previous year. Finally, revenues in the Abengoa Yield segment increased by 140.7%, achieving growth of €72.4 million period-over-period, mostly due to the entry into operation of the Solana thermo-solar plant in the United States in the fourth quarter of 2013, the Abengoa Transmisión Sur transmission line in Peru in the first quarter of 2014 and the 300 MW cogeneration plant Abengoa Cogeneracion Tabasco in Mexico in the second quarter of 2013.

Revenue from our Industrial Production activity increased by 0.7% during the six-month period ended June 30, 2014 compared to the same period of the previous year due to the increase in volume sold in the United States and Europe.

Revenue by geographic regions

The table below sets forth our revenue for the six months ended June 30, 2014 and 2013 by geographic region.

	Six months ended June 30			
	2014		2013	
	% of revenues		% of revenues	
	(unaudited)			
	(€ in millions except percentages)			
Consolidated Revenue by Geography				
Spain	470.7	13.8%	604.1	17.8%
North America	1,329.3	39.0%	1,229.2	36.1%
Europe (excluding Spain)	441.8	13.0%	418.9	12.3%
Brazil	357.7	10.5%	371.0	10.9%
Latin America (excluding Brazil and Mexico)	487.9	14.3%	332.4	9.8%
Other countries	318.1	9.4%	446.7	13.1%
Total	3,405.5	100%	3,402.3	100%

Revenue from our international operations (all activities outside of Spain) increased by 7.2% to €2,934.8 million for the first half of 2014, compared to the same period of the previous year. Our international operations accounted for 86.2% of our total revenue, with the Americas (Latin America, Brazil and North America) representing 63.8% of our total revenue and North America representing the largest geographic region with 39.0% of our total revenue.

Spain. Revenue decreased by 22.1% to €470.7 million for the six-month period ended June 30, 2014, from €604.1 million in the same period of 2013. This decrease was primarily attributable to the decrease in revenues from the construction of solar plants in Spain (Solaben 1 and 6). This effect was partially offset by the entry of solar plants into operation during the second half of 2013 as well as better weather conditions

registered during the first half of 2014 compared to the same period of the previous year. Revenues in Biofuels remained stable in this region period-over-period.

North America. Revenue increased by 8.1% to €1,329.3 million for the first half of 2014, from €1,229.2 million in the same period of 2013. The increase in revenue was primarily attributable to the construction of cogeneration plants in Mexico and the entry into operation of Solana, a thermo-solar plant in the United States, in the fourth quarter of 2013 and of Abengoa Cogeneration Tabasco in Mexico in the second quarter of 2013. Revenues also increased in our Biofuels segment in North America period-over-period due to the increase in volumes sold of biofuels. This effect was partially offset by the lower construction activity in North America due to the completion of the Solana plant and due to several projects nearing completion, such as Mojave in California and a second-generation biofuels commercial plant in Hugoton (Kansas, United States).

Europe (excluding Spain). Revenue increased by 5.5% to €441.8 million for the first six months of 2014, from €418.9 million for the first six months of 2013. The increase in revenue was primarily attributable to higher volumes of biofuels sold in the six-month period ended June 30, 2014 compared to the same period of previous year, since our ethanol plant in Rotterdam was closed during the first quarter of 2013.

Brazil. Revenue decreased by 3.6% to €357.7 million during the first half of 2014, from €371.0 million for the same period of 2013. This decrease was mainly due to reduced activity in the construction of transmission lines in Brazil, given that our execution of similar projects in Brazil was significantly high during first half of 2013, with large projects such as Norte Brazil nearing completion and Manaus finalized in 2013. This decrease has been partially offset by an increase in revenues from the entry into operation of the Manaus transmission line during the first quarter of 2013. In addition, during the first half of 2014 we signed agreements to construct several new transmission line projects in the region that are expected to contribute to future years' revenues.

Latin America (excluding Brazil and Mexico). Revenue increased by 46.8% to €487.9 million during the first half of 2014, from €332.4 million in the same period of 2013. The increase in revenue was primarily attributable to the construction of a thermo-solar plant in Chile.

Other (remaining overseas markets). Revenue decreased by 28.8% to €318.1 million in the first half of 2014, from €446.7 million in the same period of 2013. The decrease in revenue was primarily attributable to lower construction activity due to nearing completion of our two thermo solar plants in South Africa, a 100 MW CSP plant and a 50MW Solar tower technology CSP plant.

Other operating income

	(Unaudited)	
	Six months ended June 30	
	2014	2013
	(€ in millions)	
Other operating income		
Work performed by the entity and capitalized, and other	17.9	44.3
Grants	16.2	6.7
Income from various services	63.7	90.1
Total	<u>97.8</u>	<u>141.1</u>

Other operating income decreased by 30.7% to €97.8 million during the first half of 2014, from €141.1 million in the first half of 2013. This decrease is mainly due to the gain obtained in 2013 from the sale of our Brazilian subsidiary Bargoa, S.A., which amounted to €34.2 million before taxes and was recorded as income from various services and the effect of lower work performed by the entity and capitalized, and other,

due to the completion of various projects. Additionally, the decrease in other operating income was due to a lower amount capitalized in the construction of our own assets. This effect was partially offset by the increase in grants related to the financial support provided by the U.S. Administration to Solana. An ITC cash grant was received in March 2014 and is being recorded in "Other operating income" progressively over the useful life of the asset.

Raw materials consumed

Raw materials consumed decreased by 7.5% to €1,960.6 million for the first half of 2014, from €2,120.0 million in the same period of 2013, due to the decrease in revenue in our Engineering and Construction activity. Raw materials consumed decreased as a percentage of revenue from 62.3% in the first half of 2013 to 57.6% in the same period this year. This decrease was mainly due to a lower contribution to the revenue mix from construction, an activity which is intensive in raw materials, and to a higher contribution to the revenue mix from our Concession-Type Infrastructure activity.

Employee benefits expenses

Employee benefits expenses increased by 9.5% to €428.5 million during the first half of 2014, from €391.2 million in the same period of 2013. This increase was attributable to growth in employee headcount in the period, mainly in our Engineering and Construction operations. Due to the fact that we carried out less work through subcontractors, our independent professional services expenses, which is accounted for under other operating expenses, decreased as a percentage of revenues.

Depreciation, amortization and impairment charges

Depreciation, amortization and impairment charges decreased by 1.8% to €233.7 million in the first half of 2014, from €238.1 million in the same period of 2013. The decrease is mainly due to the depreciation of the average exchange rate of Brazilian real and U.S. Dollar against the euro. The decrease was mainly due to a lower amount capitalized in the construction of our assets. The decrease was partially offset by the entry into operation of new assets in our Solar segment (Solana in the second half of 2013, Solaben 1 and Solaben 6 in the first half of 2014), and our Transmission segment (Manaus transmission line in the first quarter of 2013, and Abengoa Transmisión Sur ("**ATS**") in the first quarter 2014).

Other operating expenses

The table below sets forth our other operating expenses for the six-month periods ended June 30, 2014 and 2013.

	(Unaudited)			
	Six months ended June 30			
	2014	%	2013	%
	of		of	
	revenue		revenue	
(€ in millions except percentages)				
Other operating expenses				
Research and development costs	4.0	0.1%	3.3	0.1%
Leases and fees	52.8	1.6%	53.4	1.6%
Repairs and maintenance	35.7	1.0%	32.9	1.0%
Independent professional services	139.5	4.1%	216.8	6.4%
Transportation	34.0	1.0%	34.4	1.0%
Supplies	55.5	1.6%	50.0	1.5%
Other external services	66.6	2.0%	85.4	2.5%
Taxes	40.7	1.2%	39.1	1.1%
Other management expenses	44.1	1.3%	22.1	0.6%
Total	472.9	13.9%	537.4	15.8%

Other operating expenses decreased by 12.0% to €472.9 million for the six-month period ended June 30, 2014, from €537.4 million for the same period of 2013. This decrease is mainly due to a decrease in independent professional services caused mainly by the fact we carried out less work through subcontractors in our Engineering and Construction activity in the United States and Peru. Other management expenses increased due to the reclassification of expenses previously classified as other external services.

Operating profit

Operating profit increased by 57.6% to €461.0 million during the first half of 2014, from €292.5 million for the same period of 2013. Operating profit also increased as a percentage of revenues, from 8.6% during the first half of 2013 to 13.5% during the first half of 2014, mainly due to the reduction in the raw materials and consumables used and the decline in other operating expenses.

Finance income

The table below sets forth our finance income for the six months ended June 30, 2014 and June 30, 2013.

	(Unaudited)	
	Six months ended June 30	
	2014	2013
(€ in millions)		
Finance income		
Income from loans and debts	10.6	18.5
Gains from interest-rate derivatives: cash flow hedges	5.0	20.1
Gains from interest-rate derivatives: non-hedging	0.3	5.3
Total	15.9	43.9

Finance income decreased by 63.8% to €15.9 million during the first half of 2014, from €43.9 million for the same period in 2013. The decrease is primarily due to lower income from loans and debts from our short-term deposits and lower gains on cash-flow hedge interest-rate derivatives, mainly due to the decrease in the time value of our interest rate options resulting from a decrease in the expected future interest rates.

Finance expenses

The table below sets forth our finance expenses for the six months ended June 30, 2014 and six months ended June 30, 2013.

	(Unaudited)	
	Six months ended June 30	
	2014	2013
	(€ in millions)	
Finance expenses		
Expenses due to interest:		
—Loans from credit entities	(149.5)	(85.1)
—Other debts	(184.9)	(140.8)
Losses from interest-rate derivatives: cash flow hedges	(52.5)	(56.3)
Losses from interest-rate derivatives: non-hedging	(11.9)	(3.7)
Total	(398.8)	(285.9)

Finance expenses increased by 39.5% to €398.8 million for first half of 2014, from €285.9 million for the same period of 2013. The increase was mainly due to increased interest expense from loans and borrowings as a result of the completion of various projects under construction (interest expense is capitalized when a project is under construction). The interest expenses from other debts increased mainly due to our new bonds issued in the last quarter of 2013 and the second quarter of 2014, and the negative impact of interest rate derivatives classified as non-hedging.

Net exchange differences

The table below sets forth our exchange differences for the six months ended June 30, 2014 and six months ended June 30, 2013.

	(Unaudited)	
	Six months ended June 30	
	2014	2013
	(€ in millions)	
Net exchange differences		
Gains and losses from foreign exchange transactions	(10.6)	(5.8)
Gains and losses from foreign exchange contracts: cash flow hedges	9.2	—
Gains and losses from foreign exchange contracts: non-hedging	0.1	—
Total	(1.3)	(5.8)

Net exchange differences remained stable period-over-period at low levels, representing 0.04% of revenues in the six-month period ended June 30, 2014 and 0.2% of revenues in the six-month period ended June 30, 2013. In general, we use exchange rate derivatives to hedge our foreign exchange operations. As a result, and due to the application of hedge accounting, most of our exchange rate differences are offset by the effect of our cash-flow hedge derivatives.

Other net finance income/expenses

	(Unaudited)	
	Six months ended June 30	
	2014	2013
	(€ in millions)	
Other finance income		
Income on financial assets	0.9	0.3
Other finance income	6.7	9.3
Changes in the fair value of the derivatives embedded in the convertible bonds and options over shares	—	94.5
Total	7.6	104.1
Other finance expenses		
Losses from partial repayment of the convertible notes due in 2014	—	(12.0)
Outsourcing of payables	(37.9)	(31.5)
Other financial losses	(25.6)	(39.8)
Changes in the fair value of the derivatives embedded in the convertible bonds and options over shares	(11.0)	—
Commodity derivatives losses: cash flow hedge	(1.8)	—
Commodity derivatives losses: non hedge	(1.6)	(10.3)
Total	(77.9)	(93.6)
Other net finance income/expenses	(70.3)	10.5

In the first half of 2014, total other finance income decreased by 92.7% to €7.6 million, from €104.1 million in the same period of the previous year. This decrease is mainly due to the change in fair value of embedded derivatives of convertible bonds, net of change in the fair value of the call options over our own shares, which hedge the embedded derivatives, which in the first half of 2013 resulted in a profit of €94.5 million, amounting to a €11.0 million loss recorded under the heading "Other finance expenses" in the first half of 2013.

Total other finance expenses decreased by 16.8% to €77.9 million during the first half of 2014 compared to €93.6 million for the same period of 2013. The decrease is mainly due to losses incurred in 2013 by the partial repurchase of convertible bonds due 2014 and losses from non effective commodity derivatives, as well as by the decrease in losses, the collection of fees for guarantees and letters of credit, transfer fees and other services bank losses on financial assets available for sale, and other lower interest expense. The decrease was partially offset by losses from changes in fair value of embedded derivatives of convertible bonds due 2014 and 2017, and call options as discussed above and higher costs of outsourcing supplier payments.

Net finance expense

Net finance expense increased by 91.5% to €454.4 million for the six-month period ended June 30, 2014, from €237.3 million for the same period of 2013. The increase in net finance expense was attributable to the aforementioned changes in finance income, finance expenses, net exchange differences and Other net finance income/expenses.

Profit before income tax

Profit before income tax decreased to €9.2 million for the six-month period ended June 30, 2014, from €48.7 million for the same period of 2013. This decrease was attributable to the aforementioned results of the period.

Income tax benefit/expense

We had an income tax benefit of €43.3 million for the first six months of 2014, compared to an income tax benefit of €35.2 million in the same period of 2013.

For the first six months of 2014, Income tax benefit corresponded primarily to the recognition of certain Spanish export tax incentives generated in the period related to the export of goods and services from Spain and tax benefits that the Company generated in the period from the application of a tax incentive for the transfer of the use of intangible assets, as specified in Article 23 of the Revised Text of the Spanish Corporate Income Tax Act. This benefit results in a direct deduction from taxable income of 50% of the revenue generated from granting the use of the related intangible assets (i.e. licensing revenue, etc.). In addition, there were differences in foreign tax rates related to companies based in jurisdictions with statutory tax rates different from the Spanish statutory tax rate.

Profit/(loss) from discontinued operations net of tax

In the first six months of 2013, and according to IFRS 5, Non-Current Assets Held for Sale and Discontinued Operations, we presented the results from the Befesa Sale, amounting to € (0.6) million loss net of tax as discontinued operations. In the same period of year 2014, we do not have any discontinued operations to be presented.

Profit attributable to non-controlling interests

Profit attributable to non-controlling interests decreased to a €16.3 million loss for the six-month period ended June 30, 2014, from a €15.9 million profit for the six-month period ended June 30, 2013. The decrease is mainly due to lower results from Rioglass Group, Procesos Ecológicos Vilches, S.A. and our construction activities in Brazil and South Africa.

Profit attributable to the parent company

Profit attributable to the parent company increased by 2.2% to €68.8 million for the first half of 2014, compared to €67.4 million for the same period of 2013. This increase was attributable to the results explained above.

Total comprehensive income

Total comprehensive income increased to €163.3 million for the six-month period ended June 30, 2014, from €29.6 million for the same period 2013, due to the increase in Other comprehensive income.

Other comprehensive income increased to €110.8 million for the first half of 2014, compared to a €53.7 million decrease for the same period of 2013.

In the six-month period ended June 30, 2014, we recorded €174.1 million of translation differences in equity, which corresponds mainly to our subsidiaries with the Brazilian real as their functional currency, which experienced an appreciation against the euro during the period. This effect has been partially offset by the decrease in fair value of cash flow hedges recorded directly in equity of €115.9 million, which corresponds mainly to interest rate derivatives. These losses are principally related to long-term swaps maturing in 2020 and subsequent years, which are very sensitive to changes in interest rates and which have fixed rates payable that are higher than the expected variable interest rate receivable. Additionally, €35.2 million corresponds to the amounts transferred to income statements during the period once the hedged items impact the income statement (see Note 11 to our Interim Consolidated Financial Statements).

In the first half of 2013, we recorded €95.8 million directly in equity corresponding to the change in fair value of cash flow hedges, mostly corresponding to interest rate derivatives. The impact was mainly due to long-term swaps maturing in 2020 and subsequent years. This effect was offset by negative translation

differences recorded in equity for an amount of €144.8 million which corresponds mainly to our subsidiaries with the Brazilian real as their functional currency, which experienced a depreciation of 7% against the euro during the period.

Comparison of Years Ended December 31, 2013 and December 31, 2012

The table below sets forth our revenue for the years ended December 31, 2013 and 2012 by our then-existing three activities and seven segments.

	Years ended December 31			
	2013	% of revenue	2012	% of revenue
(€ in millions, except percentages)				
Revenue				
Engineering and Construction	4,808.5	65.4%	3,780.6	59.9%
Engineering and Construction	4,472.8	60.8%	3,477.8	55.1%
Technology and Other	335.7	4.6%	302.8	4.8%
Concession-Type Infrastructure	518.9	7.1%	393.1	6.2%
Solar	321.0	4.4%	281.6	4.5%
Transmission	66.6	0.9%	37.6	0.6%
Water	40.2	0.5%	20.7	0.3%
Co-generation and other	91.1	1.2%	53.2	0.8%
Industrial Production	2,029.1	27.6%	2,138.3	33.9%
Biofuels	2,029.1	27.6%	2,138.3	33.9%
Total	7,356.5	100.0%	6,312.0	100.0%

Revenue

Revenue increased by 16.5%, to €7,356.5 million for the year ended December 31, 2013, from €6,312.0 million for the year ended December 31, 2012. On a constant currency basis, revenue for the year ended December 31, 2013 would have been €7,636.0 million, representing an increase of €1,324.0 million, or 21.0%, compared to the previous year. The increase in consolidated revenues was due to the increased revenue contribution from most of our operating segments for the year 2013 compared to the previous year, and was mostly attributable to the Engineering and Construction activity.

Within Engineering and Construction, revenues increased by €1,027.8 million due to the ongoing construction of the two thermo solar plants in South Africa (a 100 MW CSP plant and a 50 MW Solar tower technology CSP plant, causing a €434.5 million increase year-over-year), of the 200 MW PV plant in Imperial Valley, California (€236 million increase year-over-year), of the Mojave thermosolar plant in the United States (the 280 MW solar plant in California, causing a €126.7 million increase year-over-year), of the cogeneration plants in Mexico (€106.6 million increase year-over-year), of the 450 MW combined cycle plant in Poland (€100.0 million increase year-over-year) and of the wind farms in Uruguay (€78.2 million increase year-over-year). These effects were partially offset by a lower contribution of the Solana 280 MW solar plant in Arizona (€415 million decrease year-over-year) and a lower activity of construction of transmission lines in Brazil, given that 2012 was a year of very high execution, with large projects such as Norte Brazil and Manaus (€79.7 million decrease year-over-year). The Technology and Other segment included in our Engineering and Construction activity also performed well with revenues increasing by €32.9 million year-over-year in 2013. This increase was due primarily to the increase in sales of solar components such as technology and mirrors used in the construction of solar plants in the United States, Spain and South Africa (mainly on plants

constructed by us), and the water technology components used in the construction of the desalination plants in Tenes (Algeria) and Ghana.

Our Concession-Type Infrastructure activity revenues increased by 32.0% in the year 2013 with respect to the prior year, which was due to a solid performance in our four segments. In 2013, we brought into operation six assets which have contributed to the expansion of this segment. Revenues from our Solar segment increased 14.0% due to the solar plants that entered into operation in 2013 (Solaben 1 and Solaben 6 in Spain, and Solana in the United States) and to the larger contribution of solar plants that entered into operation in 2012 (Helios 1, Helios 2, Solaben 2 and Solaben 3). This increase was partially offset by adverse government energy reforms in Spain, as well as poor weather conditions registered during the first quarter of 2013. Revenues in our Transmission segment also increased by 77.1% up to €66.6 million for the year 2013 from €37.6 million for the previous year. This increase is mainly attributable to the entry into operation of the power transmission line in Manaus which covers 586 km. Our water segment activity also increased by 94.2%, achieving growth of €19.5 million year-over-year, mostly due to the entry into operation in the first quarter of 2013 of the desalination plant in Qingdao (China). Finally, revenues in our Co-generation and other segment increased by €37.9 million, up to €91.1 million in the year 2013, compared to the previous year. This increase was mainly due to the entry in operation in the first quarter of 2013 of the co-generation plant in Tabasco (Mexico).

Revenues from our Industrial Production activity decreased during the year 2013 by 5.1% compared to the previous year. Revenues decreased mainly due to the decrease in volumes sold in Europe and the decrease in ethanol prices in Europe, partially offset by the increase in ethanol prices in the United States. In Brazil, revenues have remained stable year-over-year.

Revenue by geographic regions

The table below sets forth our revenue for the years ended December 31, 2013 and 2012 by geographic region.

	Years ended December 31			
	2013		2012	
	% of revenues		% of revenues	
	(€ in millions except percentages)			
Consolidated Revenue by Geography				
Spain	1,163.2	15.8%	938.3	14.9%
United States	2,045.3	27.8%	2,078.5	32.9%
Europe (excluding Spain)	863.3	11.7%	877.8	13.9%
Brazil	726.0	9.9%	986.6	15.6%
Latin America (excluding Brazil)	1,392.2	18.9%	1,026.2	16.3%
Other countries	1,166.5	15.9%	404.6	6.4%
Total	7,356.5	100%	6,312.0	100%

Revenue from our international operations (all activities outside of Spain) increased by 15.3% to €6,193.3 million for the year ended December 31, 2013 compared to the previous year. Our international operations accounted for 84.2% of revenue with the Americas (Latin America and the United States) representing 56.6% of total revenue and the United States representing the largest geographic region with 27.8% of revenue.

Spain. Revenue increased by 24.0% to €1,163.2 million for the year ended December 31, 2013, from €938.3 million for the year ended December 31, 2012. The increase in revenues was primarily attributable to the solar plants that entered into operation in 2013 (Solaben 1 and Solaben 6), to the larger contribution of solar plants that entered into operation in 2012 (Helios 1, Helios 2, Solaben 2 and Solaben 3) and to the

increase in ethanol volumes sold in the Biofuels segment. This increase was partially offset by adverse government energy reforms in Spain, as well as poor weather conditions registered during the first quarter of 2013.

United States. Revenue decreased by 1.6% to €2,045.3 million for the year ended December 31, 2013 from €2,078.5 for the year ended December 31, 2012. The decrease in revenue was primarily attributable to the lower contribution of the construction of the Solana solar plant in Arizona which entered into operation in the last quarter of 2013. This effect was partially offset by the construction of the 200MW PV plant in the Imperial Valley of California, which resulted in an increase of €236 million year-over-year, the construction of the Mojave solar power plant, which resulted in a €126.7 million increase year-over-year and the increase in sales of solar components, such as technology and mirrors used in the construction of the mentioned U.S. solar plants. Revenues also increased in our biofuels segment in the United States year-over-year.

Europe (excluding Spain). Revenue decreased by 1.7% to €863.3 million for the year ended December 31, 2013, from €877.8 million for the year ended December 31, 2012. The decrease was primarily attributable to the decrease in revenues in our Biofuels segment due to lower volumes sold and to the decrease in ethanol prices. This effect was partially offset by the construction of the 450 MW combined cycle plant in Poland.

Brazil. Revenue decreased by 26.4% to €726.0 million for the year ended December 31, 2013, from €986.6 million for the year ended December 31, 2012. The decrease in revenue was due to a lower activity of construction of transmission lines in Brazil, given that 2012 was a year of very high execution, with large projects such as Norte Brazil and Manaus finalized in 2013. This decrease has been partially offset by the increase in revenues caused by the entry in operation of the Manaus transmission line. In addition, we have signed several new transmission line projects in the region that are expected to contribute to future years' revenues.

Latin America (excluding Brazil). Revenue increased by 35.7% to €1,392.2 million for the year ended December 31, 2013, from €1,026.2 million for the year ended December 31, 2012. The increase in revenue was primarily attributable to revenue from the construction of the cogeneration plants in Mexico, of the wind farms in Uruguay and of the transmission lines in Chile and to the entry into operation in the first quarter of 2013 of a co-generation plant in Tabasco (Mexico) of 300 MW.

Other (remaining overseas markets). Revenue increased by 188.3% to €1,166.5 million for the year ended December 31, 2013, from €404.6 million for the year ended December 31, 2012. The increase in revenue was primarily attributable to the construction of the two thermosolar plants in South Africa, a 100 MW CSP plant and a 50 MW Solar tower technology CSP plant, causing a €434.5 million increase year-over-year, and to the entry into operation in the first quarter of 2013 of the desalination plant in Qingdao (China) of 100,000 m3/day.

Other operating income

	Years ended December 31	
	2013	2012
	(€ in millions)	
Other operating income		
Work performed by the entity and capitalized and other	322.3	282.6
Business combination of Rioglass Group	—	85.2
Grants	25.4	13.8
Income from various services	99.3	103.6
Total	<u>447.0</u>	<u>485.2</u>

Other operating income decreased by 7.9% to €447.0 million for the year ended December 31, 2013, from €485.2 million for the year ended December 31, 2012. The heading 'Work performed by the entity and capitalized and other' in 2013 includes income of €141.8 million corresponding to a favorable award in arbitrations against Adriano Gianetti Dedini Ometto and Adriano Ometto Agrícola, Ltda. See "*Business—Legal Proceedings.*" In the year 2012, this heading also included income of €26 million recorded by Abengoa Bioenergy U.S. Holding in the last quarter of 2012, corresponding to a collection from Chicago Title Insurance Company after a favorable jury verdict in litigation against that company. The decrease in 2013 in Other operating income when compared to 2012 was mainly due to a lower amount capitalized in the construction of our own assets and to the fact that in 2012 we recorded a €85.2 million gain arising from the business combination of Rioglass Group. Additionally, Income from various services for the year 2013 primarily includes the gain obtained in the sale of our Brazilian subsidiary Bargoa, S.A. amounting to €33.2 million.

Raw materials consumed

Raw materials consumed increased by 5.1% to €4,458.1 million for the year ended December 31, 2013, from €4,241.2 million for the year ended December 31, 2012, due to the increase in revenue in our activities. Raw materials consumed decreased as a percentage of revenue from 67.2% for the year ended December 31, 2012 to 60.6% for the year ended December 31, 2013. This decrease was mainly due to a lower contribution to the revenue mix from the construction, an activity which is intensive in raw materials, and to a higher contribution to the revenue mix from our Concession-Type Infrastructure activity.

Employee benefits expenses

Employee benefit expenses increased by 6.9% to €758.4 million for the year ended December 31, 2013, from €709.6 million for the year ended December 31, 2012. This was due to an increase in employee headcount in the period (excluding the effect of the sale of Befesa), mainly due to a net increase in our construction operations. In addition, the commencement of operations of the new solar plants in Spain that came into operation during 2013 have also increased our employee benefits expenses in our Solar segment.

Employee benefit expenses have decreased as a percentage of revenue, standing at 10.3% for the year ended December 31, 2013, compared to 11.2% in 2012.

Depreciation, amortization and impairment charges

Depreciation, amortization and impairment charges increased by 35.4% to €571.2 million for the year ended December 31, 2013, from €422.0 million for the year ended December 31, 2012. Depreciation and amortization charges also increased as a percentage of revenue from 6.7% in 2012 to 7.8% in 2013. The increase is mainly due to an increase in the depreciation and amortization in our Solar segment, as a result of the beginning of the amortization of the solar plants that entered into operation in the second half of 2013 (Solaben 1, Solaben 6 and Solana) and to the larger contribution of solar plants that entered into operation in the first half of 2012 (Helios 1 and Solaben 3) and in the second half of 2012 (Solaben 2 and Helios 2). Depreciation and amortization also increased in Transmission lines mainly due to the Manaus transmission line in Brazil, which entered into operations in the first quarter of 2013. Additionally, in 2013, we recorded receivables impairments of €31.9 million that mostly correspond to public clients in Spain and abroad, against whom the corresponding claims have been made for the amounts owing from various construction projects, supported by the Company's formal procedures where possible. Given the uncertainty in relation to the future recoverability of these receivables, due to various factors but most of which are beyond the Company's control, we have decided to make the corresponding provision.

Other operating expenses

The table below sets forth our other operating expenses for the years ended December 31, 2013 and 2012.

	Years ended December 31			
	2013		2012	
	% of revenue		% of revenue	
	(€ in millions except percentages)			
Other operating expenses				
Research and development costs	6.5	0.1%	6.4	0.1%
Leases and fees	112.2	1.5%	100.1	1.6%
Repairs and maintenance	69.7	0.9%	66.7	1.1%
Independent professional services	488.7	6.6%	284.3	4.5%
Transportation	75.7	1.0%	77.6	1.2%
Supplies	126.2	1.7%	102.1	1.6%
Other external services	162.1	2.2%	140.1	2.2%
Taxes	76.0	1.0%	53.8	0.9%
Other management expenses	112.4	1.5%	86.4	1.4%
Total	1,229.5	16.7%	917.5	14.5%

Other operating expenses increased by 34.0% to €1,229.5 million for the year ended December 31, 2013, from €917.5 million for the year ended December 31, 2012, which is primarily due to an increase in independent professional services driven by increases in operations across all of our activities, especially in the construction activity in the United States.

Operating profit

Operating profit increased by 50.8% to €794.0 million for the year ended December 31, 2013, from €526.6 million for the year ended December 31, 2012. Operating profit has increased as a percentage of revenues, from 8.3% during fiscal year 2012 to 10.8% during fiscal year 2013. The increase in operating profit for the year 2013, compared to 2012, was mainly due to a 17% increase in revenue and to a smaller increase in our operating expenses.

Finance income

The table below sets forth our finance income for the years ended December 31, 2013 and 2012.

	Years ended December 31	
	2013	2012
	(€ in millions)	
Finance income		
Income from loans and debts	35.3	73.9
Gains from interest-rate derivatives: cash flow hedges	28.8	10.2
Gains from interest-rate derivatives: non-hedging	0.5	0.0
Total	64.6	84.1

Finance income decreased by 23.2% for the year ended December 31, 2013, from €84.1 million for the year ended December 31, 2012 to €64.6 million for the year ended December 31, 2013. The decrease was primarily due to lower income from loans and debts from our short-term deposits in Brazil, and was partially

offset by higher gains on cash-flow hedge interest-rate derivatives, mainly due to the increase in the time value of our interest rate options resulting from an increase in the expected future interest rates.

Finance expenses

The table below sets forth our finance expenses for the years ended December 31, 2013 and 2012.

	Years ended December 31	
	2013	2012
	(€ in millions)	
Finance expenses		
Expenses due to interest:		
—Loans from credit entities	277.2	217.3
—Other debts	279.5	219.4
Losses from interest-rate derivatives: cash flow hedges	105.0	103.9
Losses from interest-rate derivatives: non-hedging	0.0	4.3
Total	<u>661.7</u>	<u>544.9</u>

Finance expenses increased by 21.4% to €661.7 million for the year ended December 31, 2013, from €544.9 million for the year ended December 31, 2012.

Finance expenses increased in the year 2013 when compared to the year 2012 as the result of an increase in interest expenses from loans with credit entities, mainly due to the lower capitalization of interest expenses, as several projects came into operation during 2013 (interest expense is capitalized when a project is under construction). Additionally, interest from other debts increased due to the convertible bonds and ordinary bonds issued during the year 2013.

Losses from cash flow hedge interest-rate derivatives for the year ended December 31, 2013 and 2012 are mainly due to interest rate swaps where the fixed rate payable is currently higher than the variable interest rate receivable referenced to Euribor. These swaps have an impact in our income statement when interest accrued in the hedged loan is recorded in the consolidated income statement.

Net exchange differences

The table below sets forth our exchange differences for the years ended December 31, 2013 and 2012.

	Years ended December 31	
	2013	2012
	(€ in millions)	
Net exchange differences		
Gains and losses from foreign exchange transactions	(0.3)	7.1
Gains and losses from foreign exchange contracts: cash flow hedges	(4.2)	(22.9)
Gains and losses from foreign exchange contracts: non-hedging	0.3	(20.0)
Total	<u>(4.2)</u>	<u>(35.8)</u>

Negative net exchange differences decreased to a net foreign exchange loss of €4.2 million for the year ended December 31, 2013, from a net foreign exchange loss of €35.8 million for the year ended December 31, 2012. In general, we use exchange rate derivatives to hedge our foreign exchange operations. As a result, most of our exchange rate differences are offset by the effect of our cash-flow hedge derivatives.

Net exchange differences that subsist for the year ended December 31, 2012 are primarily due to a loss from exchange rate derivatives recorded as a result of discontinuing a hedge relationship when the hedged

transaction is no longer expected to occur and to inefficiencies in different hedges generating exchange rate differences that have not been perfectly offset with the differences generated by the hedged item.

Other net finance income/expenses

	Years ended December 31	
	2013	2012
	(€ in millions)	
Other finance income		
Profits from the sale of financial assets	0.0	1.0
Income on financial assets	0.6	0.3
Other finance income	18.9	16.9
Changes in the fair value of the derivatives embedded in the convertible bonds and options over shares	75.6	9.2
Commodity derivatives gains: Cash flow hedge	0.2	—
Total	95.4	27.4
Other finance expenses		
Losses from sale of financial assets	(0.3)	—
Other finance losses	(112.4)	(76.5)
Losses from partial repayment of the convertible notes due 2014	(12.0)	—
Outsourcing of payables	(81.4)	(88.5)
Loss from commodities forward contracts: non hedging	(9.8)	(20.4)
Total	(215.9)	(185.4)
Other net finance income/expenses	(120.5)	(158.0)

Other net finance expense decreased to €120.5 million for the year ended December 31, 2013, from €158.0 million for the year ended December 31, 2012.

In the year ended December 31, 2013, total other finance income increased to €95.4 million from €27.4 million mainly due to the change in fair value of embedded derivatives of our convertible bonds, net of change in fair value of the call options over our own shares, which hedge the embedded derivatives partially, amounting to a net gain of €75.6 million versus a net gain of €9.2 million in 2012.

Other finance expense increased to €215.9 million for the year ended December 31, 2013 from €185.4 million for the year ended December 31, 2012. This increase was mainly due to the increase in other financial losses due to a higher volume of uncollectible financial accounts with partners in projects in Latin America, according to the current situation of negotiations, and the impairment of financial investments associated with thermosolar projects in the United States due to permitting delays. In addition, other financial expenses also increased due to losses from partial repayment of the convertible notes due in 2014. These expenses were partially offset by lower costs of outsourcing supplier payments and lower commodity derivatives losses corresponding to the interruption of the hedging relationship, when the transaction hedged is no longer expected to occur. Additionally, Other finance losses include finance expenses mainly related to financial guarantees and letters of credit, wire transfers and other bank fees, losses on available for sale financial assets, and other minor finance expenses.

Finance expense net

Finance expense net decreased by 10.3% to a loss of €721.8 million for the year ended December 31, 2013, from a loss of €654.6 million for the year ended December 31, 2012. The decrease in finance expense net was attributable to the aforementioned change in Finance income, Finance expense, Net exchange differences and Other net finance income/expenses.

Profit before income tax

Profit before income tax increased to a gain of €67.0 million for the year ended December 31, 2013, compared to a loss of €110.4 million for the year ended December 31, 2012. This decrease was attributable to the aforementioned results of the period.

Income tax benefit/expense

We had an income tax benefit of €43.9 million for the year ended December 31, 2013, compared to an income tax benefit of €171.9 million for the year ended December 31, 2012, although we actually paid income tax for an amount of €12.1 million in 2013 and €35.7 million in 2012. The subsidiaries within the consolidated group that generate profits usually generate income tax expenses and pay taxes whereas companies with negative taxable income recognize income tax benefit but they do not obtain a tax refund; instead, they generate tax loss carryforwards that can be offset in future periods. Different types of tax credits generate an income in the income tax expense calculation but they do not reduce the amount of income tax paid in the current period. Rather, they reduce the amount payable in the future.

For the year ended December 31, 2013, Income tax benefit corresponded primarily to the recognition of certain Spanish export tax incentives generated in the period related to the export of goods and services from Spain (€80.3 million) and tax benefits that the Company generated in the period from the application of a tax incentive for the transfer of the use of intangible assets, as specified in Article 23 of the Revised Text of the Spanish Corporate Income Tax Act (€16.0 million). This benefit results in a direct deduction from taxable income of 50% of the revenue generated from granting the use of the related intangible assets (i.e. licensing revenue, etc.). In addition, there were differences in foreign tax rates related to companies based in jurisdictions with statutory tax rates different from Spanish statutory tax rate (€9.0 million of positive impact). Finally, we have recorded other non taxable income and expense which include, among other things, tax credits which it has not capitalized and permanent differences arising in other jurisdictions (€23.0 million of negative impact).

Profit from discontinued operations net of tax

For the year ended December 31, 2013 and according to IFRS 5, Non-Current Assets Held for Sale and Discontinued Operations, we include the results from Befesa, amounting to a €0.6 million loss net of tax as discontinued operations. In the same period of the previous year, and according to IFRS 5, Non-Current Assets Held for Sale and Discontinued Operations, we include the results from Befesa, amounting to a €32.5 million profit net of tax as discontinued operations.

Profit attributable to non-controlling interests

Profit attributable to non-controlling interests decreased to €8.9 million for the year ended December 31, 2013, from €38.7 million for the year ended December 31, 2012. The decrease is mainly due to the lower results from Rioglass Group and our construction activities in Brazil.

Profit attributable to the parent company

Profit attributable to the parent company increased by 83.2% to €101.4 million for the year ended December 31, 2013, compared to €55.4 million for the year ended December 31, 2012. This increase was attributable to the results explained above.

Total comprehensive income

Total comprehensive income increased to €(253.3) million for the year ended December 31, 2013, compared to €(263.3) million for the year ended December 31, 2012 due to the increase of profit attributable to the parent company explained above, partially offset by the decrease in Other comprehensive income.

Other comprehensive income decreased by 1.8% to €(363.7) million for the year ended December 31, 2013, compared to €(357.3) million for the year ended December 31, 2012. These amounts are significantly lower than profit attributable to the parent company for each period, mainly due to the impact of change in fair value of cash flow hedges and currency translation differences recognized directly in equity in both periods, as disclosed in our Consolidated Financial Statements.

In the year ended December 31, 2013, we recorded €(483.8) million of translation differences in equity, which corresponds mainly to our subsidiaries with Brazilian real as their functional currency, which experienced a depreciation of 17% against the euro during the year. This effect has been partially offset by the change in fair value of cash flow hedges recorded directly in equity for an amount of €89.9 million. Of this amount, €78.3 million corresponds to interest rate derivatives, mainly interest rate swaps. These profits are principally related to long-term swaps maturing in 2020 and subsequent years, which are very sensitive to changes in interest rates and which have fixed rates payable that are lower than expected variable interest rate receivable. Additionally, €88.9 million corresponds to the amounts transferred to income statements during the period once the hedged items impact the income statement (see Note 14 to our Consolidated Financial Statements and *"Quantitative and Qualitative Disclosure About Market Risk"* for further information on hedging and derivatives).

In the year ended December 31, 2012 we recorded €(237.8) million directly in equity corresponding to change in fair value of cash flow hedges. Of this amount, €(183.1) million corresponds to interest rate derivatives, mainly interest rate swaps. These losses are principally related to long-term swaps maturing in 2020 and subsequent years, which are very sensitive to changes in interest rates and which have fixed rates payable that are higher than current variable interest rate receivable. The rest of the impact of cash flow hedges recorded in equity corresponds mainly to derivatives on commodities for an amount of €(46.2) million during the period, mostly related to derivatives on grain in our Biofuels segment. For both types of derivatives, these effects have been partially offset by the amounts transferred to income statements during the period once the hedged items impact the income statement for a total amount of €96.2 million (see Note 14 to our Consolidated Financial Statements and *"Quantitative and Qualitative Disclosure About Market Risk"* for further information on hedging and derivatives). In addition, during the year 2012 we have also recorded €(256.3) million of translation differences in equity, corresponding mainly to our subsidiaries with Brazilian real as their functional currency, which experienced a depreciation of 11% against the euro during the year.

Comparison of Years Ended December 31, 2012 and December 31, 2011

Revenue

Revenue decreased by 5.6%, to €6,312.0 million for the year ended December 31, 2012, from €6,689.2 million for the year ended December 31, 2011. On a constant currency basis, revenue for the year ended December 31, 2012 would have been €6,295.8 million, representing a decrease of €393.4 million, or 5.9%, compared to the previous year. The decrease in consolidated revenues for the year ended December 31, 2012 was primarily attributable to the decrease in revenue in our Engineering and Construction activity related to a significantly lower contribution from Engineering and Construction work in Spain of approximately €1,104.3 million, as a result of the general slow-down in the Spanish economy and also due to a decrease in revenue from the construction of thermo-solar plants in Spain, which represented revenue of approximately €638.0 million in 2012 compared to €843.3 million in 2011 (including the two segments of this activity, Engineering and Construction and Technology and Other). Revenue also decreased due to a lower revenue contribution in 2012 compared to 2011 from our Engineering and Construction activities related to our CSP project in Abu Dhabi and to our cogeneration plant project in Tabasco (Mexico), which totaled approximately a decrease of €220.2 million in 2012. On the other hand, within Engineering and Construction, revenues increased by €553.5 million due to the ongoing construction of thermo-solar plants in the United States (the 280 MW Solana solar plant in Arizona and the 280 MW Mojave solar plant in California), by €207.3 million due to the combined-cycle electricity power plant in Morelos, Mexico, and by €119.9 million due to the construction of power transmission lines in Latin America.

The rest of our Engineering and Construction activity included in the Technology and Other line decreased due primarily to the lower construction of thermo-solar plants in Spain mentioned above, which was partially offset by the sale of solar components, such as technology and mirrors used in the construction of the U.S. solar plants, and to the full consolidation of the Rioglass plants after we assumed full control of the group, which represented an increase of €59.4 million.

Revenue from our Concession-Type Infrastructure activity decreased by 10.7% mainly due to the deconsolidation of transmission line concessions in Brazil resulting from the application of IFRS 10 and 11. This effect was partially offset by an increase in our Solar segment, with a 114% increase due to additional MW of capacity entering into operation, due to the increase in revenue from new solar plants in Spain which entered into operations in 2012 (Solacor 1 and 2, Helios 1 and 2 and Solaben 2 and 3), as well as a larger contribution from the combined cycle Solar Power Plant One (“SPP1”) in Hassi R'Mel (Algeria), which entered into operation in the third quarter of 2011.

Revenue from our Industrial Production activity decreased during the year ended December 31, 2012 when compared to the previous year by 3.9% because of decreasing volumes sold during 2012 and a weakening of ethanol prices. Margins have decreased significantly in our biofuels segment due to an increase in corn prices and low ethanol prices. In order to preserve cash flows, we temporarily stopped production at two plants in the United States (Colwich and Portales). Other plants in the United States and in Spain have been temporarily stopped for the same reason, and for security improvements but are all currently operating. The net carrying amount of the two ethanol production facilities, Colwich and Portales, are \$22.4 million and \$24.9 million, respectively. Based on the tests performed, no impairment charges have been deemed necessary for any of these plants.

Revenue by geographic regions

The following table sets forth our revenue for the years ended December 31, 2012 and 2011 by geographic region.

	Years ended December 31			
	2012		2011	
	% of revenues		% of revenues	
	(€ in millions except percentages)			
Consolidated Revenue by Geography				
Spain	938.3	14.9%	1,945.8	29.1%
United States	2,078.5	32.9%	1,346.0	20.1%
Europe (excluding Spain)	877.8	13.9%	727.7	10.9%
Brazil	986.6	15.6%	1,471.7	22.0%
Latin America (excluding Brazil)	1,026.2	16.3%	756.9	11.3%
Other countries	404.6	6.4%	441.1	6.6%
Total	6,312.0	100%	6,689.2	100%

Revenue from our international operations (all activities outside of Spain) increased by 13.3% to €5,373.7 million for the year ended December 31, 2012, compared to the previous year. Our international operations accounted for 85.1% of revenue, with the Americas (Latin America and the United States) representing 64.8% of total revenue and the United States representing the largest geographic region with 32.9% of revenue.

Spain. Revenue decreased by 51.8% to €938.3 million for the year ended December 31, 2012, from €1,945.8 million for the year ended December 31, 2011. The decrease in revenue was primarily attributable to the significantly lower contribution from other Engineering and Construction work in Spain of €1,104.3 million, due to the general slowdown in the Spanish economy and to a lower activity of

construction of thermo-solar plants in Spain, which had a significant impact in our business activity in the region. Revenue due to the construction of thermo-solar assets in Spain amounted to approximately €638.0 million in 2012 compared to €843.3 million in 2011. On the other hand, revenues from concession assets increased by €159.3 million, mostly from new solar plants in Spain which came into operation throughout 2012 (Solacor 1 and 2, Helios 1 and 2, and Solaben 2 and 3).

United States. Revenue increased by 54.4% to €2,078.5 million for the year ended December 31, 2012, from €1,346.0 million for the year ended December 31, 2011. The increase in revenue was primarily attributable to the construction of the Solana and Mojave solar power plants, which began in the first and third quarters of 2011, respectively, and resulted in a €553.5 million increase year-over-year. Additionally, the increase was partially attributable to the increase in sales of solar components, such as technology and mirrors used in the construction of the U.S. solar plants, which resulted in an increase of €45.0 million, and also due to the revenue contribution from the construction of the 200MW PV plant that we are building in the Imperial Valley of California, which resulted in a year-over-year increase of €30.0 million.

Europe (excluding Spain). Revenue increased by 20.6% to €877.8 million for the year ended December 31, 2012, from €727.7 million for the year ended December 31, 2011. The increase in revenue was primarily attributable to an increase in ethanol sales throughout Europe of €50.4 million, as a result of expanded ethanol production capacity at the Rotterdam plant and the construction of a 450 MW combined cycle plant in Poland which accounted for an increase of €10.0 million.

Brazil. Revenue decreased by 33.0% to €986.6 million for the year ended December 31, 2012, from €1,471.7 million for the year ended December 31, 2011. The decrease in revenue was primarily attributable to the de-consolidation of several transmission lines in Brazil upon application of IFRS 10 and 11 (mainly the companies sold under the Cemig Sales) and to a lower level of construction of power transmission lines in Brazil when compared to the previous year.

Latin America (excluding Brazil). Revenue increased by 35.6% to €1,026.2 million for the year ended December 31, 2012, from €756.9 million for the year ended December 31, 2011. The increase in revenue was primarily attributable to revenue from the construction of the combined-cycled electricity power plant in Morelos (Mexico).

Other (remaining overseas markets). Revenue decreased by 8.3% to €404.6 million for the year ended December 31, 2012, from €441.1 million for the year ended December 31, 2011. The decrease in revenues was due the de-consolidation in 2012 of the desalination plant in Honaine (Algeria), as a result of the adoption of IFRS 10 and 11 as of January 1, 2012, which contributed to revenues in the last quarter of 2011.

Other operating income

	Years ended December 31	
	2012	2011
	(€ in millions)	
Other operating income		
Work performed by the entity and capitalized, and other	282.6	265.4
Prospective application of IFRIC 12	—	164.5
Business combination of Rioglass Group	85.2	—
Grants	13.8	74.8
Income from various services	103.6	93.8
Total	<u>485.2</u>	<u>598.5</u>

Other operating income decreased by 18.9% to €485.2 million for the year ended December 31, 2012, from €598.5 million for the year ended December 31, 2011. This decrease was mainly due to the prospective application of IFRIC 12 since January 2011. Upon the prospective application of IFRIC 12, we derecognized, in accordance with IFRIC 12.8 and IAS 16, the thermo-solar plant assets previously recognized at cost as "Property, Plant and Equipment in Projects" and recognized those thermo-solar plant assets at fair value as "Intangible Assets in Projects." The difference of €164.5 million was recorded as a sale of property, plant and equipment in "Other Operating Income" on the consolidated income statement for the year ended December 31, 2011. This effect was partially offset by an €85.2 million gain included in "Business combination of Rioglass Group" during the year ended December 31, 2012, where we have achieved control by increasing our ownership in stages. In addition, construction works performed for our own assets were higher in 2012 than in 2011. Finally, our subsidiary, Abengoa Bioenergy U.S. Holding, recorded an income of €26 million during the last quarter of 2012 corresponding to a collection from Chicago Title Insurance Company after a favorable and final jury verdict in a litigation process against that company. Grants decreased mainly due to a €50 million amount corresponding to DAEX tax deduction recorded in 2011 with no corresponding amount in 2012 (see Note 24.2 to our Consolidated Financial Statements for further detail). Income from various services in 2012 primarily includes profits generated by the sale of the second 50% of the shareholding of STE, ATE, ATE II and ATE III amounting €4.5 million and other minor income. In 2011 it primarily includes profits generated by the sale of 50% of the Brazilian transmission line amounting to €45 million.

Raw materials consumed

Raw materials consumed decreased by 8.9% to €4,241.2 million for the year ended December 31, 2012, from €4,656.1 million for the year ended December 31, 2011 due to the decrease in revenue in our three activities. Raw materials consumed decreased as a percentage of revenue from 69.6% for the year ended December 31, 2011 to 67.2% for the year ended December 31, 2012. This decrease was due to lower levels of operations in our Biofuels segment, which activity declined as a result of the increase in raw materials costs.

Employee benefits expenses

Employee benefit expenses increased by 16.2% to €709.6 million for the year ended December 31, 2012, from €610.4 million for the year ended December 31, 2011. This was due to an increase in employee headcount (excluding the effect of the sale of Telvent) with significant growth largely attributable to our construction operations. In addition, the commencement of operations of the new solar plants in Spain which came into operation during 2012 (Solacor 1 and 2, Helios 1 and 2, Solaben 2 and 3), and the combined cycle SPP1 plant in Algeria which entered into operation in the third quarter of 2011 have also increased our employee benefits expenses in our Solar segment.

Employee benefit expenses have increased as a percentage of revenue, standing at 11.2% for the year ended December 31, 2012, compared to 9.1% in the same period of 2011.

Depreciation, amortization and impairment charges

Depreciation, amortization and impairment charges increased by 83.0% to €422.0 million for the year ended December 31, 2012, from €230.6 million for the year ended December 31, 2011. Depreciation and amortization charges also increased as a percentage of revenue from 3.4% in 2011 to 6.7% in 2012. The increase is mainly due to a large amount of amortization and depreciation in our Solar segment amounting to €68.0 million, mainly as a result of the beginning of the amortization of the solar plants in Spain that entered into operation in 2012 (Solacor 1 and 2, Helios 1 and 2 and Solaben 2 and 3). In addition, our depreciation expenses also increased by €28.3 million in our biofuels business in Brazil due to an increase in our property plant and equipment resulting from an investment in new machinery. The increase was also due to the full consolidation of the Rioglass Group plants after we assumed full control and to the amortization of intangibles assets identified in this business combination which represented an increase of €18.9 million. In

addition, in 2011 we recorded a reversal of an impairment for €42 million recognized in prior years on the lands acquired in the United States in connection with the Mojave Solar project once we obtained a Conditional Commitment to issue a Federal Guarantee from the Department of Energy with no similar movement in 2012. Additionally, the year-over-year increase was partially attributable to the increase in capitalized development costs amortization of €20.7 million.

Other operating expenses

The table below sets forth our other operating expenses for the years ended December 31, 2012 and 2011.

	Years ended December 31			
	2012		2011	
	% of revenue		% of revenue	
	(€ in millions except percentages)			
Other operating expenses				
Research and development costs	6.4	0.1%	25.6	0.4%
Leases and fees	100.1	1.6%	73.1	1.1%
Repairs and maintenance	66.7	1.1%	59.0	0.9%
Independent professional services	284.3	4.5%	325.6	4.9%
Transportation	77.6	1.2%	67.5	1.0%
Supplies	102.1	1.6%	120.1	1.8%
Other external services	140.1	2.2%	122.5	1.8%
Taxes	53.8	0.9%	64.0	1.0%
Other management expenses	86.4	1.4%	64.7	1.0%
Total	917.5	14.5%	922.1	13.8%

Other operating expenses decreased by 0.5% to €917.5 million for the year ended December 31, 2012, from €922.1 million for the year ended December 31, 2011. This decrease is primarily due to a decrease in independent professional services and in research and development expenses. Part of our efforts in research and development are capitalized and then amortized over the useful life of the identified projects. Our total investment in R&D including both capitalized and expensed costs amounted to €91.2 million in the year ended December 31, 2012, which represents an increase of 0.8% with respect to the €90.6 million capitalized and expensed in the year ended December 31, 2011. In addition, supplies also contributed to the decrease due to the decrease in operations across our activities in 2012. On the other hand, these decreases were partially offset by higher expenses in leases and fees, transportation and other external services. As a percentage of revenue, other operating expenses increased from 13.8% for the year ended December 31, 2011 to 14.5% for the year ended December 31, 2012.

Operating profit

Operating profit decreased by 43.5% to €526.6 million for the year ended December 31, 2012, from €932.5 million for the year ended December 31, 2011. Operating profit has decreased as a percentage of revenues, from 13.9% during fiscal year 2011 to 8.3% during fiscal year 2012. The decrease in operating profit for the fiscal year 2012, compared to 2011, was mostly due to the decline in other the operating income discussed above and a decrease in operating margins in our Biofuels segment due to extremely adverse market conditions as well as due to the prospective application of IFRIC 12 since January 1, 2011, explained above.

Finance income

The table below sets forth our finance income for the years ended December 31, 2012 and 2011.

	Years ended December 31	
	2012	2011
	(€ in millions)	
Finance income		
Income from loans and debts	73.9	85.1
Gains from interest-rate derivatives: cash flow hedges	10.2	17.2
Gains from interest-rate derivatives: non-hedging	0.0	3.1
Total	84.1	105.4

Finance income decreased by 20.2% for the year ended December 31, 2012, from €105.4 million for the year ended December 31, 2011 to €84.1 million for the year ended December 31, 2012. The decrease was primarily due to lower income from loans and debts from our short-term deposits in Brazil and at a lesser extent to lower gains on cash-flow hedge interest-rate derivatives.

Finance expenses

The table below sets forth our finance expenses for the years ended December 31, 2012 and 2011.

	Years ended December 31	
	2012	2011
	(€ in millions)	
Finance expenses		
Expenses due to interest:		
—Loans from credit entities	217.3	237.2
—Other debts	219.4	204.0
Losses from interest-rate derivatives: cash flow hedges	103.9	131.7
Losses from interest-rate derivatives: non-hedging	4.3	1.0
Total	544.9	573.9

Finance expenses decreased by 5.0% to €544.9 million for the year ended December 31, 2012, from €573.9 million for the year ended December 31, 2011.

Finance expenses decreased in the year ended December 31, 2012 when compared to the year ended December 31, 2011, as an increase in interest from other debts was offset by a decrease in losses from interest rate derivatives and a decrease in interest from loans with credit entities. Interest from other debts increased mainly due to a larger volume in our non-recourse factoring arrangements. Amounts outstanding from non-recourse financing have been higher during the year ended December 31, 2012 compared to the year ended December 31, 2011, but capitalized interest has also been higher, as non-recourse financing increased primarily to finance projects under construction and interest expenses are capitalized during the construction period. Finally, losses from interest rate derivatives were higher in the year 2011 than in 2012.

Losses from cash flow hedge interest-rate derivatives for the year ended December 31, 2012 and 2011 are due to transfers from equity to financial expense when the hedged item is impacting the consolidated income statement (€75.7 million and €49.8 million, respectively) and to a decrease in time value of the interest rate options (€24.2 million and €64.3 million, respectively). In order to hedge our long-term debt, some of the interest rate options contracted have long-term maturities, which cause their time value to be considerably sensitive to changes in interest rates. Transfers from equity to finance expense have resulted in a

loss during the period because most of the interest rate options have a strike price higher than current variable interest rates. Similarly, most of our swaps have a fixed rate higher than current variable interest rates.

Net exchange differences

The table below sets forth our exchange differences for the years ended December 31, 2012 and 2011.

	Years ended December 31	
	2012	2011
	(€ in millions)	
Net exchange differences		
Gains and losses from foreign exchange transactions	7.1	(30.3)
Gains and losses from foreign exchange contracts: cash flow hedges	(22.9)	(5.4)
Gains and losses from foreign exchange contracts: fair value hedges	—	7.6
Gains and losses from foreign exchange contracts: non-hedging	(20.0)	—
Total	<u>(35.8)</u>	<u>(28.2)</u>

Net exchange differences increased to a net foreign exchange loss of €35.8 million for the year ended December 31, 2012, from a net foreign exchange loss of €28.2 million for the year ended December 31, 2011. In general, we use exchange rate derivatives to hedge our foreign exchange operations. As a result, most of our exchange rate differences are offset by the effect of our cash-flow hedge derivatives. The net loss for the year ended December 31, 2012 was mainly due to a loss from exchange rate derivatives recorded as a result of discontinuing a hedge relationship when the hedged transaction is no longer expected to occur, and to inefficiencies in different hedges generating exchange rate differences that have not been perfectly offset with the differences generated by the hedged item.

Net exchange differences that subsist for the year ended December 31, 2011 are primarily due to the negative impact of foreign exchange transactions, for an amount of €32.3 million, due to the unfavorable evolution of the Brazilian real-U.S. Dollar exchange rate related to the U.S. Dollar-denominated debt financings of our Brazilian subsidiaries. The U.S. Dollar-denominated debt of our Brazilian subsidiaries outstanding as of December 31, 2011 amounts to €229.9 million. The Company hedged €68.1 million with derivative instruments as of December 31, 2011.

Other net finance income/expenses

	Years ended December 31	
	2012	2011
	(€ in millions)	
Other finance income		
Profits from the sale of financial assets	1.0	1.2
Income on financial assets	0.3	3.8
Other finance income	16.9	23.9
Changes in the fair value of the derivatives embedded in the convertible bonds and options over shares	9.2	—
Total	27.4	28.9
Other finance expenses		
Losses from sale of financial assets	—	(0.1)
Other finance expenses	(76.5)	(84.6)
Changes in the fair value of the derivatives embedded in the convertible bonds and options over shares	—	(29.7)
Outsourcing of payables	(88.5)	(65.7)
Loss from commodities forward contracts: non hedging	(20.4)	(19.1)
Total	(185.4)	(199.2)
Other net finance income/expenses	(158.0)	(170.3)

Other net finance expense decreased to €158.0 million for the year ended December 31, 2012, from €170.3 million for the year ended December 31, 2011.

In the year ended December 31, 2012, "Total other finance income" decreased to €27.4 million from €28.9 million mainly due to a decrease in 2012 in other finance income, which corresponds mainly to interest from deposits and cash and cash equivalents in both periods, due to a lower volume of deposits. This decrease was partially offset by a gain of €9.2 million corresponding to the change in fair value of derivatives embedded in the convertible bonds issued, net of the change in fair value of call options on the Company's own shares. The change in fair value of both instruments is primarily due to the decrease in the Company's share price, which is a principal variable in the valuation of the embedded derivatives and the options. For the year ended December 31, 2011, the net effect of the change in fair value of derivatives embedded in the convertible bonds issued and the change in fair value of call options on the Company's own shares resulted in a net loss of €29.7 million classified in Other finance expense.

"Other finance expense" decreased to €185.4 million for the year ended December 31, 2012 from €199.2 million for the year ended December 31, 2011, mainly due to a decrease in other finance expenses, which correspond to bank fees and commissions, financial guarantees, letters of credit and costs related to wire transfers and a decrease of the net effect of changes in fair value of the derivatives embedded in the convertible notes and options over our own shares explained above. Expenses related to outsourcing of payables have increased in the year ended December 31, 2012 in comparison to the previous year due to a larger volume of payables outsourced during the period. We outsource the payment to suppliers through different financial institutions, which handle the administration of invoices payable and agree to settle them at predefined dates with our suppliers. We in turn settle the invoices directly with the financial institutions, generally 180 days after the invoice date, reporting the balance in accounts payable until paid. Suppliers have the option to anticipate the collection of their invoices to an earlier date from the financial institutions, which also charges the suppliers a discount fee. Finally, commodity derivatives losses correspond to the interruption of the hedging relationship, when the transaction hedged is no longer expected to occur, for both periods.

Finance expense net

Finance expense net decreased by 1.8% to €654.6 million for the year ended December 31, 2012, from €666.9 million for the year ended December 31, 2011. The decrease in finance expense net was attributable to the aforementioned change in Finance income, Finance expense, Net exchange differences and Other net finance income/expenses.

Profit before income tax

Profit before income tax decreased by 141.0% period-over-period to a loss of €110.4 million for the year ended December 31, 2012, compared to €269.6 million for the year ended December 31, 2011. This decrease was attributable to the aforementioned results of the period.

Income tax benefit/expense

We had an income tax benefit of €171.9 million for the year ended December 31, 2012, compared to an income tax expense of €3.2 million for the year ended December 31, 2011, although we actually paid income tax for an amount of €35.7 million in 2012 and €67.6 million in 2011. The subsidiaries within the consolidated group that generate profits usually generate income tax expenses and pay taxes whereas companies with negative taxable income recognize income tax benefit but they do not obtain a tax refund; instead, they generate tax loss carryforwards that can be offset in future periods. Different types of tax credits generate an income in the income tax expense calculation but they do not reduce the amount of income tax paid in the current period. Rather, they reduce the amount payable in the future.

For the year ended December 31, 2012, Income tax benefit corresponded primarily to the recognition of certain Spanish export tax incentives generated in the period related to the export of goods and services from Spain (€20.2 million) and tax benefits that the Company generated in the period from the application of a tax incentive for the transfer of the use of intangible assets, as specified in Article 23 of the Revised Text of the Spanish Corporate Income Tax Act (€13.1 million). This benefit results in a direct deduction from taxable income of 50% of the revenue generated from granting the use of the related intangible assets (i.e. licensing revenue, etc.). We have also recorded deferred tax assets for tax loss carryforwards generated in prior years in other tax jurisdictions for €21.6 million and for deductions in the amount of €8.4 million. In addition, there was a significant positive impact on income tax benefit for the year ended December 31, 2012 caused by non-taxable income from the capital gain recognized after taking control of the Rioglass group (€25.6 million) and there were also differences in foreign tax rates related to companies based in jurisdictions with statutory tax rates different from Spanish statutory tax rate (€11.1 million of positive impact). Finally, we have recorded other non-taxable income and expense which include, among other things, income tax expenses corresponding to the previous period and permanent differences arising in other jurisdictions as a result of the re-evaluation of assets and liabilities.

Profit from discontinued operations, net of tax

The decrease in Profit from discontinued operations, net of tax from €129.1 million for the year ended December 31, 2011 to €32.5 million for the year ended December 31, 2012 is due to the fact that in 2011, this line includes the results of Telvent until the sale of this company and the gain obtained in the sale (for a total amount of €91.5 million) and the results of Befesa (amounting to €37.6 million) while in 2012 this line includes only the results of Befesa until its sale, amounting to €32.5 million.

Profit attributable to non-controlling interests

Profit attributable to non-controlling interests increased to €38.7 million for the year ended December 31, 2012, from €21.3 million for the year ended December 31, 2011. The increase is mainly due to the positive net income of the Rioglass Group that we have started to fully consolidate after taking control of

Rioglass and to the net income of several engineering and construction companies in Brazil in which we hold a 51% interest.

Profit attributable to the parent company

Profit attributable to the parent company decreased by 85.2% to €55.4 million for the year ended December 31, 2012, compared to €374.1 million for the year ended December 31, 2011. This decrease was attributable to the results explained above.

Total comprehensive income

Total comprehensive income decreased to €263.3 million for the year ended December 31, 2012, compared to €74.8 million for the year ended December 31, 2011 due to the decrease of Profit attributable to the parent company explained above and to the decrease in Other comprehensive income.

Other comprehensive income decreased by 11.4% to €357.3 million for the year ended December 31, 2012, compared to €(320.7) million for the year ended December 31, 2011. These amounts are significantly lower than Profit attributable to the parent company for each period mainly due to the impact of change in fair value of cash flow hedges and Currency translation differences recognized directly in Equity in both periods, as disclosed in our Consolidated Financial Statements.

In the year ended December 31, 2012, we recorded €237.8 million directly in equity corresponding to change in fair value of cash flow hedges. Of this amount, €183.1 million corresponds to interest rate derivatives, mainly interest rate swaps. These losses are principally related to long-term swaps maturing in 2020 and subsequent years, which are very sensitive to changes in interest rates and which have fixed rates payable that are higher than current variable interest rate receivable. The rest of the impact of cash flow hedges recorded in equity corresponds mainly to derivatives on commodities, for an amount of €46.2 million during the period, mostly related to derivatives on grain in our Biofuels segment. For both types of derivatives, these effects have been partially offset by the amounts transferred to income statements during the period once the hedged items impact the income statement, for a total amount of €96.2 million (see Note 14 to our Consolidated Financial Statements and "*Quantitative and Qualitative Disclosure About Market Risk*" for further information on hedging and derivatives). In addition, during the year 2012 we have also recorded €256.3 million of translation differences in equity, which corresponds mainly to our subsidiaries with Brazilian real as their functional currency, which has experienced a depreciation of 11% against the euro during the year.

In the year ended December 31, 2011, we recorded €123.8 million directly in equity corresponding to change in fair value of cash flow hedges. Of this amount, €(217.5) million correspond to interest rate derivatives, mainly interest rate swaps. Similarly to the year 2012, these losses were principally related to long-term swaps maturing in 2020 and subsequent years, which are very sensitive to changes in interest rates and which have fixed rates payable higher than their current variable interest rate receivable. This effect was partially offset by a positive amount of €101.2 million recorded directly in equity corresponding to the change in fair value of derivatives on commodities, related to derivatives over grain in our Biofuels segment and other commodities. We also had a minor impact corresponding to foreign exchange forwards. In addition, during the year 2011 we recorded €239.9 million of translation differences in equity, which correspond mainly to our subsidiaries with Brazilian real as their functional currency, which experienced a depreciation of 8% against the euro during the year.

Segment Reporting

Beginning with our Interim Consolidated Financial Statements, we have presented segment information to reflect the Abengoa Yield Asset Transfer. As a result, we continue to organize our business into the following three activities: Engineering and Construction, Concession-Type Infrastructure, and Industrial Production, but we have added Abengoa Yield as a reporting segment under the Concession-Type

Infrastructure activity. The Technology and Other segment was eliminated from our Engineering and Construction activity. Each activity is now broken into the following operating segments: Engineering and Construction (which is both an activity and a segment); Transmission, Solar, Water, Co-generation and other and Abengoa Yield segments within the Concession-Type Infrastructure activity; and Biofuels within the Industrial Production activity.

- *Engineering and Construction*: is both an activity and a segment, and relates to our traditional engineering activities in the energy and water sectors, with more than 70 years of experience in the market as well as the development of solar technology. Abengoa is specialized in carrying out complex turn-key projects for thermosolar plants, solar-gas hybrid plants, conventional generation plants, biofuels plants and water infrastructures, as well as large-scale desalination plants and transmission lines, among others. Since the beginning of 2014, Engineering and Construction comprises one operating segment, Engineering and Construction (previously, the operating segment of Technology and Other was also included). Since 2014, it is included in the operating segment of Engineering and Construction, in accordance with IFRS 8 (“Operating Segments”).
- *Concession-Type Infrastructure*: groups together the Company’s proprietary concession assets that generate revenues governed by long term sales agreements, such as take-or-pay contracts, tariff contracts or power purchase agreements. This activity includes the operation of electric (solar, generation or wind) energy generation plants and transmission lines. These assets generate low demand risk and we focus on operating them as efficiently as possible.

This activity is composed of five operating segments:

- Solar—Operation and maintenance of solar energy plants, mainly using solar-thermal technology;
 - Transmission—Operation and maintenance of high-voltage transmission power line infrastructures;
 - Water—Operation and maintenance of facilities aimed at generating, transporting, treating and managing potable water, including desalination and water treatment and purification plants;
 - Co-generation and other—Operation and maintenance of conventional electricity plants; and
 - Abengoa Yield—Ownership, management and acquisition of renewable energy, conventional power and electric transmission lines and other contracted revenue-generating assets, initially focused on North America (the United States and Mexico) and South America (Peru, Chile, Uruguay and Brazil), as well as Europe (Spain).
- *Industrial Production*: covers Abengoa’s businesses with a high commodity component, our biofuels business. The company holds an important leadership position in this activity in the geographical markets in which it operates. In biofuels, we are engaged in the production and development of biofuels, mainly bioethanol for transport, which uses cereals, sugar cane and oil seeds (soya, rape and palm) as raw materials.

Prior to the six months ended June 30, 2014, we organized our business into three activities—Engineering and Construction, Concession-Type Infrastructure and Industrial Production, which in turn comprised seven operating segments.

Comparison of Six Months Ended June 30, 2014 and June 30, 2013

Revenue by activity

The following table sets forth our revenue for the six months ended June 30, 2014 and 2013 by our three activities and seven segments.

	Six months ended June 30			
	2014	% of revenue	2013	% of revenue
	(unaudited)			
	(€ in millions, except percentages)			
Revenue				
Engineering and Construction	2,068.3	60.7%	2,181.5	64.1%
Engineering and Construction	2,068.3	60.7%	2,181.5	64.1%
Concession-Type Infrastructure	345.9	10.2%	236.4	7.0%
Solar	157.6	4.7%	111.7	3.4%
Transmission	31.0	0.9%	24.5	0.7%
Water	20.6	0.6%	20.6	0.6%
Co-generation and other	12.8	0.4%	28.1	0.8%
Abengoa Yield	123.9	3.6%	51.5	1.5%
Industrial Production	991.3	29.1%	984.4	28.9%
Biofuels	991.3	29.1%	984.4	28.9%
Total	3,405.5	100.0%	3,402.3	100.0%

Engineering and Construction. Revenue decreased by 5.2% to €2,068.3 million for the first six months of 2014, from €2,181.5 million for the first six months of 2013.

- **Engineering and Construction:** Revenue decreased by 5.2% to €2,068.3 million for the first six months of 2014, from €2,181.5 million for the first six months of 2013. On a constant currency basis, revenue for the six months ended June 30, 2014 would have been €2,182.5 million, representing an increase of €1 million compared to the previous period. The decrease in revenues was primarily attributable to the lower activity of construction due to the completion of construction of a thermo-solar plant in the United States (the 280 MW Solana solar plant in Arizona), thermo-solar plants in Spain (Solaben 1 and 6) and a wind farm in Uruguay (Palmatir) and due to several projects nearing completion, such as a thermo-solar plant in the United States (the 280 MW Mojave plant in California) and the Norte transmission line in Brazil. This effect was partially offset by higher revenues related to the construction of cogeneration plants in Mexico and in the United States, new transmission lines in Brazil and a thermo-solar plant in Chile.

Concession-Type Infrastructure. Revenue increased by 46.3% to €345.9 million for the six months ended June 30, 2014, from €236.4 million for the six months ended June 30, 2013. Our concession business has continued its growth due to the entry into operation of new assets and the strong performance of assets already in operation.

- **Solar:** Revenue increased by 41.1% to €157.6 million for the six months ended June 30, 2014, from €111.7 million for the six months ended June 30, 2013. On a constant currency basis, revenue for the six months ended June 30, 2014 would have been €158.5 million, representing an increase of €46.8 million, or 41.9%, compared to the previous period. The increase was mainly attributable to solar plants that entered into operation in Spain in the second half of 2013 (Solaben 1 and 6), as well as better weather conditions registered during the first half of 2014 compared to the same period of the previous year. As a result, the average capacity in terms of installed MW available throughout the

period increased by 100 MW and we achieved a higher net electricity production for the six months ended June 30, 2014 compared the same period of the previous year.

- **Transmission:** Revenue increased by 26.5% to €31.0 million for the six months ended June 30, 2014, from €24.5 million for the six months ended June 30, 2013. On a constant currency basis, revenue for the first half of 2014 would have been €36.2 million, representing an increase of €11.7 million, or 47.8%, compared to the previous period. The increase was primarily attributable to the entry into operation of the power transmission line in Manaus which covers 586 km.
- **Water:** Revenue remained constant at €20.6 million for the first six months ended June 30, 2014 and for the six months ended June 30, 2013. On a constant currency basis, revenue for the first half of 2014 would have been €21.0 million, representing an increase of €0.4 million, or 1.8%, compared to the previous period. This increase was mainly due to the entry into operation at the end of the first quarter 2013 of a desalination plant in Qingdao (China) of 100,000 m³/day.
- **Co-generation and other:** Revenue decreased by 54.4% to €12.8 million for the first six months ended June 30, 2014, from €28.1 million for the six months ended June 30, 2013. This decrease was mainly due to the Spanish government's regulatory reforms of the electricity sector, which resulted in lower remuneration of our plants.
- **Abengoa Yield:** Revenue increased by 140.6% to €123.9 million for the six months ended June 30, 2014, from €51.5 million for the six months ended June 30, 2013. On a constant currency basis, revenue for the first half of 2014 would have been €128.2 million, representing an increase of €76.7 million, or 148.9%, compared to the previous period. This increase was mostly due to the entry into operation of the Solana thermo-solar plant in the United States in the second half of 2013, the Abengoa Transmisión Sur transmission line in Peru and the Abengoa Cogeneracion Tabasco in Mexico in the second quarter of 2013.
- **Industrial Production:** Revenue increased by 0.7% to €991.3 million for the six months ended June 30, 2014, from €984.4 million for the six months ended June 30, 2013.
- **Biofuels:** Revenue increased by 0.7% to €991.3 million for the six months ended June 30, 2014, from €984.4 million for the six months ended June 30, 2013. On a constant currency basis, revenue for the first half of 2014 would have been €1,024.0 million, representing an increase of €39.6 million, or 4%, compared to the previous period. This increase was due to the increase in volumes sold of biofuels in the United States (to 593.9 ML for the six months ended June 2014, from 561.7 ML for the same period of 2013) and Europe (to 555.5 ML for the six months ended June 2014, from 337.4 ML for the same period of 2013), partially offset by the decrease in prices in Europe.

Consolidated EBITDA by activity

The following table sets forth our Consolidated EBITDA for the first six months ended June 30, 2014 and 2013 by our three activities and seven segments.

	Six months ended June 30	
	2014	2013
	(Unaudited)	
	(€ in millions)	
Consolidated EBITDA		
Engineering and Construction	366.1	349.9
Engineering and Construction	366.1	349.9
Concession-Type Infrastructure	244.4	140.0
Solar	107.3	68.6
Transmission	20.5	15.4
Water	14.0	16.2
Co-generation and other	2.5	5.5
Abengoa Yield	100.1	34.3
Industrial Production	84.2	40.7
Biofuels	84.2	40.7
Total	694.7	530.6

Engineering and Construction. Consolidated EBITDA increased by 4.6% to €366.1 million for the six months ended June 30, 2014, from €349.9 million for the six months ended June 30, 2013. Consolidated EBITDA margin increased to 17.8% for the first half of 2014, compared to 16.0% in the same period of 2013.

- **Engineering and Construction:** Consolidated EBITDA increased by 4.6% to €366.1 million for the six months ended June 30, 2014, from €349.9 million for the six months ended June 30, 2013. Consolidated EBITDA margin increased to 17.8% for the first half 2014, compared to 16.0% in the same period 2013. The increase in margins in the first half is related to projects with a higher contribution of technology and where Abengoa manufactures many of the components needed for the construction of the asset (i.e. transmission power lines, solar plants, etc.).

Concession-Type Infrastructure. Consolidated EBITDA increased by 74.6% to €244.4 million for the six months ended June 30, 2014, from €140.0 million for the six months ended June 30, 2013. Consolidated EBITDA margin in these activities increased to 70.3% for the first half of 2014, compared to 59.1% in the same period of 2013.

- **Solar:** Consolidated EBITDA increased by 56.4% to €107.3 million for the six months ended June 30, 2014, from €68.6 million for the same period of 2013. The increase in the Consolidated EBITDA was primarily attributable to the solar plants in Spain that entered into operation in the second half of 2013 (Solaben 1 and 6), as a result, the average capacity in terms of installed MW available throughout the period increased by 100 MW. This increase in average capacity, together with better weather conditions registered during the first half of 2014 compared to the same period of the previous year and the solid performance of the plants, resulted in a higher net electricity production for the six months ended June 30, 2014 compared with the same period of the previous year.
- **Transmission:** Consolidated EBITDA increased by 33.1% to €20.5 million for the six months ended June 30, 2014, from €15.4 million for the same period of 2013. The increase was primarily attributable to the entry into operation of the power transmission lines in Manaus, which cover 586 km.

- **Water:** Consolidated EBITDA decreased by 13.6% to €14.0 million for the six months ended June 30, 2014, from €16.2 million for the same period of 2013. The decrease was primarily attributable to lower activity of the desalination plant Aguas de Skikda.
- **Co-generation and other:** Consolidated EBITDA decreased by 54.5% to €2.5 million for the six months ended June 30, 2014, from €5.5 million for the same period of 2013. This decrease was mainly due to the Spanish government's regulatory reforms of the electricity sector as described above.
- **Abengoa Yield:** Consolidated EBITDA increased by 191.8% to €100.1 million for the six months ended June 30, 2014, from €34.3 million for the same period of 2013. The increase in the Consolidated EBITDA was primarily attributable to the entry into operation of the Solana thermo-solar plant in the United States in the second half of 2013, the 300 MW cogeneration plant Abengoa Cogeneracion Tabasco in Mexico in the second quarter of 2013, and the Abengoa Transmisión Sur line in Peru.

Industrial Production. Consolidated EBITDA increased by 106.9% to €84.2 million for the six months ended June 30, 2014, from €40.7 million for the same period in 2013. Consolidated EBITDA margin in this segment increased to 8.5% for the six months ended June 30, 2014 from 4.1% in 2013.

- **Biofuels:** Consolidated EBITDA increased by 106.9% to €84.2 million for the six months ended June 30, 2014, from €40.7 million for the same period in 2013, mainly driven by higher margins in the USA during the first six months of the year caused by an improvement in the crush spread. Mainly due to the decrease in grain prices, the average crush spread for the business in the United States saw a positive evolution for the six months ended June 30, 2014 compared to the same period in 2013.

Comparison of Years Ended December 31, 2013 and December 31, 2012

Revenue by activity

The table below sets forth our revenue for the years ended December 31, 2013 and 2012 by our then-existing three activities and seven segments.

	Years ended December 31			
	2013		2012	
		% of revenue		% of revenue
(€ in millions, except percentages)				
Revenue				
Engineering and Construction	4,808.5	65.4%	3,780.6	59.9%
Engineering and Construction	4,472.8	60.8%	3,477.8	55.1%
Technology and Other	335.7	4.6%	302.8	4.8%
Concession-Type Infrastructure	518.9	7.1%	393.1	6.2%
Solar	321.0	4.4%	281.6	4.5%
Transmission	66.6	0.9%	37.6	0.6%
Water	40.2	0.5%	20.7	0.3%
Co-generation and other	91.1	1.2%	53.2	0.8%
Industrial Production	2,029.1	27.6%	2,138.3	33.9%
Biofuels	2,029.1	27.6%	2,138.3	33.9%
Total	7,356.5	100.0%	6,312.0	100.0%

Engineering and Construction. Revenues increased by 27.2% to €4,808.5 million for the year ended December 31, 2013, from €3,780.6 million for the year ended December 31, 2012. The increase in

revenue was primarily attributable to the revenue growth of the Engineering and Construction segment of this activity.

- **Engineering and Construction:** Revenues increased by 28.6% to €4,472.8 million for the year ended December 31, 2013, from €3,477.8 million for the year ended December 31, 2012. On a constant currency basis, revenue for the year ended December 31, 2013 would have been €4,681.5 million, representing an increase of €1,203.7 million, or 34.6%, compared to the same period of the previous year. The increase in revenues was primarily attributable to the ongoing construction of the two thermo solar plants in South Africa, of the 200 MW PV plant in Imperial Valley, California, of the Mojave thermosolar plant in the United States, of the cogeneration plants in Mexico, of the 450 MW combined cycle plant in Poland and of the wind farms in Uruguay. These effects were partially offset by a lower contribution of the Solana 280 MW solar plant in Arizona and a lower activity of construction of transmission lines in Brazil, given that 2012 was a year of very high execution, with large projects such as Norte Brazil and Manaus.
- **Technology and Other:** Revenue increased by 10.9% to €335.7 million for the year ended December 31, 2013, from €302.8 million for the year ended December 31, 2012. On a constant currency basis, revenue for the year ended December 31, 2013 would have been €337.5 million, representing an increase of €34.7 million, or 11.5%, compared to the same period of the previous year. The increase in revenues was mainly due to the sale of solar components, such as technology and mirrors used in the construction of solar plants in the United States and South Africa (mainly our plants constructed by us), and to the sale of water technology components used in the construction of the desalinations plants in Tenes (Algeria) and in Nungua (Ghana).

Concession-Type Infrastructure. Revenue increased by 32.0% to €518.9 million for the year ended December 31, 2013, from €393.1 million for the year ended December 31, 2012. Our concession business has continued its growth due to new assets entering into operation and a strong performance of assets already in operation.

- **Solar:** Revenue increased by 14.0% to €321.0 million for the year ended December 31, 2013, from €281.6 million for the year ended December 31, 2012. On a constant currency basis, revenue for the year ended December 31, 2013 would have been €323.8 million, representing an increase of €42.2 million, or 15.0%, compared to the previous year. The increase was mainly attributable to the solar plants that entered into operation in 2013 (Solaben 1 and Solaben 6 in Spain, and Solana in the United States) and to the larger contribution of solar plants that entered into operation in 2012 (Helios 1, Helios 2, Solaben 2 and Solaben 3). As a result, the average capacity in terms of installed MW available throughout the period increased by 480 MW. This resulted in a net electricity production of 1,224.8 GWh for the year 2013 compared to 963.9 GWh produced during 2012. This increase was partially offset by adverse government energy reforms in Spain, as well as poor weather conditions registered during the first quarter of 2013.
- **Transmission:** Revenue increased by 77.1% to €66.6 million for the year ended December 31, 2013, from €37.6 million for the year ended December 31, 2012. On a constant currency basis, revenue for the year ended December 31, 2013 would have been €74.5 million, representing an increase of €36.9 million, or 98.0%, compared to the same period of the previous year. The increase was primarily attributable to the entry into operation in the first quarter of 2013 of the power transmission lines in Manaus, which cover 586 km.

During both years, we were able to maintain high levels of availability (a determining factor for the Transmission segment's revenue generation) above 99% during both years, in line with availability levels for previous years.

- **Water:** Revenue increased by 94.2% to €40.2 million for the year ended December 31, 2013, from €20.7 million for the year ended December 31, 2012. On a constant currency basis, revenue for the

year ended December 31, 2013 would have been €41.5 million, representing an increase of €20.8 million, or 100.4%, compared to the same period of the previous year. This increase was mainly due the entry into operation in the first quarter of 2013 of the 100,000 m3/day desalination plant in Qingdao (China).

- **Co-generation and other:** Revenue increased by 71.2% to €91.1 million for the year ended December 31, 2013, from €53.2 million for the year ended December 31, 2012. On a constant currency basis, revenue for the year ended December 31, 2013 would have been €92.8 million, representing an increase of €39.6 million, or 74.5%, compared to the same period of the previous year. This increase was mainly due to the entry into operation in the first quarter of 2013 of a 300 MW co-generation plant in Tabasco (Mexico).

Industrial Production:

- **Biofuels:** Revenue decreased by 5.1% to €2,029.1 million for the year ended December 31, 2013, from €2,138.3 million for the year ended December 31, 2012. On a constant currency basis, revenue for the year ended December 31, 2013 would have been €2,084.5 million, representing a decrease of €53.8 million, or 2.5%, compared to the same period of the previous year. This decrease was mainly due to the reduction of volumes sold of ethanol in Europe to 902.3 MI, compared to 1,037.8 MI in the previous year, with a total negative impact on revenues of €84.9 million. In addition, the decrease in ethanol prices in Europe, partially offset by the increase in ethanol prices in the United States and Brazil, resulted in a net negative impact on revenues of €40.0 million in 2013. The business recorded during the year an average plant utilization of 80% compared to 84% during the year 2012.

Sugar sales, an important part of the Brazilian business, recorded an increase as the harvest campaign started approximately one month earlier than in the previous year, with 451.1 ktn sold during 2013 compared to 411.9 ktn sold during the previous year and with a positive impact on revenues in the amount of €11.3 million. This positive effect was partially offset by the reduction of the average sugar prices, which declined from 22 c\$/lb for the year 2012 to 18 c\$/lb for the year 2013.

Consolidated EBITDA by activity

The table below sets forth our Consolidated EBITDA for the years ended December 31, 2013 and 2012 by our three activities.

	Years ended December 31	
	2013	2012
	(€ in millions)	
Consolidated EBITDA		
Engineering and Construction	806.5	623.9
Engineering and Construction	593.3	475.5
Technology and other	213.2	148.4
Concession-Type Infrastructure	317.7	233.6
Solar	200.3	203.4
Transmission	42.6	15.7
Water	28.1	11.6
Co-generation and other	46.7	2.9
Industrial Production	240.9	91.1
Biofuels	240.9	91.1
Total	1,365.1	948.6

Engineering and Construction. Consolidated EBITDA increased by 29.3% to €806.5 million for the year ended December 31, 2013, from €623.9 million for the year ended December 31, 2012. Consolidated EBITDA margin (Consolidated EBITDA as a percentage of revenue) increased to 16.8% for the year ended December 31, 2013, compared to 16.5% in 2012.

- **Engineering and Construction:** Consolidated EBITDA increased by 24.8% to €593.3 million for the year ended December 31, 2013, from €475.5 million for the year ended December 31, 2012. The Consolidated EBITDA margin decreased slightly to 13.3% for the year ended December 31, 2013, compared to 13.7% in the same period of 2012. This decrease was mainly due to the mix of projects in execution during 2013, which contributed with lower margins, compared with the same period of the previous year.
- **Technology and Other:** Consolidated EBITDA increased by 43.7% to €213.2 million for the year ended December 31, 2013, from €148.4 million for the year ended December 31, 2012. The Consolidated EBITDA margin increased to 63.5% for the year ended December 31, 2013, compared to 49.0% in the same period of 2012. This increase was attributable to the higher margins on solar components, such as technology and mirrors used in the construction of solar plants in the United States and South Africa (mainly our plants constructed by us), together with water technology components used in the construction of the desalinations plants in Tenes (Algeria) and in Nungua (Ghana).

Concession-Type Infrastructure. Consolidated EBITDA increased by 36.0% to €317.7 million for the year ended December 31, 2013, from €233.6 million for the year ended December 31, 2012. Consolidated EBITDA margin in these activities increased to 61.2% for the year ended December 31, 2013, compared to 59.4% in the same period of 2012.

- **Solar:** Consolidated EBITDA decreased by 1.5% to €200.3 million for the year ended December 31, 2013, from €203.4 million for the year ended December 31, 2012. This decrease in the consolidated EBITDA was primarily attributable to the adverse measures adopted by the Spanish government related to the electric system, such as the elimination of the remuneration option of receiving the production market price (pool price) plus a premium or the new tax on electricity production, which imposed a 7% levy on revenue received from power generation, together with worse weather conditions especially during the first quarter of 2013, all of which resulted in lower margins for the Spanish solar plants. These negative effects have been partially offset by the solar plants that entered into operation in 2013 (Solaben 1 and Solaben 6 in Spain, Solana in the United States, and Shams in Abu Dhabi) and to the larger contribution of solar plants that entered into operation in 2012 (Helios 1, Helios 2, Solaben 2 and Solaben 3).
- **Transmission:** Consolidated EBITDA increased by 171.3% to €42.6 million for the year ended December 31, 2013, from €15.7 million for the year ended December 31, 2012, mainly due to the entry into operation in the first quarter of 2013 of the Brazilian transmission lines in Manaus which have higher operating margins than the average for the segment. Inflation did not have a relevant impact on operating margins, as contracts are indexed to inflation.
- **Water:** Consolidated EBITDA increased by 142.2% to €28.1 million for the year ended December 31, 2013, from €11.6 million for the year ended December 31, 2012. The increase was primarily attributable to the entry into operation in the first quarter of 2013 of a 100,000 m³/day desalination plant in Qingdao (China). The cost of electricity, the main component of the cost structure of the segment, did not have a meaningful impact, as it is passed through to the final client through the tariff.
- **Co-generation and other:** Consolidated EBITDA increased by 1,510.3% to €46.7 million for the year ended December 31, 2013, from €2.9 million for the year ended December 31, 2012, mainly due

to the entry into operation in the first quarter of 2013 of a 300 MW co-generation plant in Tabasco (Mexico) which has significantly higher operating margins than the average for the segment.

Industrial Production.

- **Biofuels:** Consolidated EBITDA increased by 164.4% to €240.9 million for the year ended December 31, 2013, from €91.1 million for the year ended December 31, 2012. Biofuels EBITDA in 2013 includes the impact for €141.8 million of a positive arbitration resolution in relation to a breach of contract in our Brazilian business. In 2012, Consolidated EBITDA also included the impact of a positive arbitration amounting to €26 million. Excluding these impacts, Consolidated EBITDA grew by 53%. Although the first half of 2013 was affected by weak margins, Consolidated EBITDA in 2013 showed recovery across the whole segment. The increase in Consolidated EBITDA was primarily attributable to a favorable evolution of the average crush spread in the United States. As ethanol prices increased and grain prices decreased (the main cost component of the crush formula), the average crush spread for the business in the United States saw a positive evolution for the year 2013 compared with the previous year. The average market crush spread in the United States increased to \$0.63/gal during the year 2013, compared to an average of \$0.42/gal for the year 2012. Market crush spread in Europe remained stable in 2013 in compared to the year 2012.

Comparison of Years Ended December 31, 2012 and December 31, 2011

Revenue by activity

The table below sets forth our revenue for the years ended December 31, 2012 and 2011 by our three activities and seven segments.

	Years ended December 31			
	2012		2011	
		% of revenue		% of revenue
	(€ in millions, except percentages)			
Revenue				
Engineering and Construction	3,780.6	59.9%	4,023.9	60.2%
Engineering and Construction	3,477.8	55.1%	3,710.6	55.5%
Technology and Other	302.8	4.8%	313.3	4.7%
Concession-Type Infrastructure	393.1	6.2%	440.3	6.6%
Solar	281.6	4.5%	131.6	2.0%
Transmission	37.6	0.6%	237.6	3.6%
Water	20.7	0.3%	21.0	0.3%
Co-generation and other	53.2	0.8%	50.1	0.7%
Industrial Production	2,138.3	33.9%	2,225.0	33.3%
Biofuels	2,138.2	33.9%	2,225.0	33.3%
Total	6,312.0	100.0%	6,689.2	100.0%

Engineering and Construction. Revenues decreased by 6.0% to €3,780.6 million for the year ended December 31, 2012, from €4,023.9 million for the year ended December 31, 2011. The decrease in revenues was primarily attributable to the prospective application of IFRIC 12 since January 1, 2011 and as a result of lower contribution from our Engineering and Construction work in the Spanish economy.

- **Engineering and Construction:** Revenues decreased by 6.3% to €3,477.8 million for the year ended December 31, 2012, from €3,710.6 million for the year ended December 31, 2011. On a constant currency basis, revenue for the year ended December 31, 2012 would have been

€3,499.8 million, representing a decrease of €210.7 million, or 5.7%, compared to the same period of the previous year. The decrease in revenues was mostly attributable to the decrease in revenue related to the construction of thermo-solar plants in Spain, which represented approximately €553.6 million in 2012 compared to approximately €650.7 million in 2011. Revenues also decreased as a result of lower contribution from our Engineering and Construction work in Spain due to the general slowdown in the Spanish economy. However, our revenues decrease in this activity was partially offset by the ongoing construction of thermo solar plants in the United States (the 280 MW Solana solar plant in Arizona and the 280 MW Mojave solar plant in California), a combined cycle electricity power plant in Morelos, Mexico, and power transmission lines in Latin America also contributed to an increase in revenue.

- **Technology and Other:** Revenue decreased by 3.4% to €302.8 million for the year ended December 31, 2012, from €313.3 million for the year ended December 31, 2011 mainly due to the decrease in the construction of thermo-solar assets in Spain. The impact on revenues in Technology and Other of the construction of thermo-solar plants in Spain prospectively from January 1, 2011 was €192.6 million for the fiscal year 2011 compared to €84.3 million for the fiscal year 2012. This decrease was partially offset by the sale of solar components, such as technology and mirrors used in the construction of our U.S. thermo-solar plants, and to the full consolidation of the Rioglass plants after we assumed full control of the group, which represented an increase of €59.4 million. On a constant currency basis, revenue for the year ended December 31, 2012 would have been the same since all business activity for this segment in 2012 related to Spain.
- **Concession-Type Infrastructure:** Revenue decreased by 10.7% to €393.1 million for the year ended December 31, 2012, from €440.3 million for the year ended December 31, 2011. The 10.7% year-over-year decrease in revenues was primarily due to the sale of transmission line concessions in Brazil (Cemig Sales) in the fourth quarter of 2011 and second quarter of 2012 and to a lesser extent due to the de-consolidation of certain companies within our concession-type infrastructure activity as a result of the adoption of IFRS 10 and 11 as of January 1, 2012 (please see Note 2.1.3 of our Consolidated Financial Statements as of December 31, 2012).
- **Solar:** Revenue increased by 114.1% to €281.6 million for the year ended December 31, 2012, from €131.5 million for the year ended December 31, 2011. On a constant currency basis, revenue for the year ended December 31, 2012 would have been €281.0 million, representing an increase of €149.4 million, or 113.6%, compared to the previous year. The increase was mainly attributable to solar plants in Spain which entered into operation in 2012 (Solacor 1 and 2, Helios 1 and 2, Solaben 2 and 3), as well as a larger contribution from the combined cycle SPP1 plant in Hassi R'Mel (Algeria), which entered into operation in the second quarter of 2011. As a result, the average capacity in terms of installed MW available throughout the period increased, compared to the previous year. 300 MW of additional capacity (represented by six 50MW CSP plants in Spain since September 2011) entered into operation along with full contribution from assets that came online throughout the course of the previous period and therefore only partially contributed to the previous period's results. This resulted in a net electricity production of 963.9 GWh for the year 2012 compared to 390.9 GWh produced during the year ended December 31, 2011.

Pricing policies have very limited impact on the Solar segment's results, as we operate in heavily regulated markets and all the assets are generally awarded a fixed tariff scheme, operate under a power purchase agreement, or other forms of regulated tariff.

- **Transmission:** Revenue decreased by 84.2% to €37.6 million for the year ended December 31, 2012, from €237.6 million for the year ended December 31, 2011. On a constant currency basis, revenue for the year ended December 31, 2012 would have been €41.7 million, representing a decrease of €195.9 million, or 82.4%, compared to the same period of the previous year. The decrease was primarily attributable to the sale of transmission line concessions in Brazil (Cemig Sales) in the

fourth quarter of 2011 and second quarter of 2012. As a result, segment capacity declined to 1,476 km in operation at the end of December 2012 from 3,903 km at the end of December 2011. The decrease in km has also been affected by the sale of certain transmission lines in Chile, which were consolidated through equity method and did not therefore contribute to revenue. Also, the de-consolidation of a company within our transmission segment as a result of the adoption of IFRS 10 and 11 as of January 1, 2012 had a negative impact in our revenues for the fiscal year 2012 compared to 2011.

During both periods, we were able to maintain high levels of availability (a determining factor for the Transmission segment's revenue generation), above 99% during both periods, in line with availability levels for previous years.

- **Co-generation and other:** Revenue increased by 6.3% to €53.2 million for the year ended **December** 31, 2012, from €50.1 million for the year ended December 31, 2011. Foreign currency exchange rates had no significant impact on revenues for the year ended December 31, 2012.
- **Water:** Revenue decreased by 1.7% to €20.7 million for the year ended December 31, 2012, from €21.0 million for the year ended December 31, 2011. On a constant currency basis, revenue for the year ended December 31, 2012 would have been €21.3 million, representing an increase of €0.3 million, or 1.4%, compared to the same period of the previous year. The slight decrease in revenues was due the de-consolidation in 2012 of the desalination plant in Honaine (Algeria), as a result of the adoption of IFRS 10 and 11 as of January 1, 2012, which contributed to revenues in the last quarter of 2011. In terms of volumes of water desalinated, during the year 2012 the company registered an increase to 98.7 million m³, from 86.0 million m³ during 2011.

Industrial Production:

- **Biofuels:** Revenue decreased by 3.9% to €2,138.2 million for the year ended December 31, 2012, from €2,225.0 million for the year ended December 31, 2011. On a constant currency basis, revenue for the year ended December 31, 2012 would have been €2,100.5 million, representing a decrease of €124.5 million, or 5.6%, compared to the same period of the previous year. Our Biofuels segment experienced high pressure on costs and margins, which is leading to an erosion of profitability both in the United States and, to a lesser extent, in Europe and Brazil. Given the difficult market conditions, and in order to preserve cash flows, five plants have been temporarily idled in the United States during the period, which contributed to the decrease in revenue during 2012 compared to 2011. Consequently, volumes sold in the year ended December 31, 2012 decreased compared to the same period of the previous year, with 2,439 ML, with a total negative impact on revenues of €118.1 million. The business recorded during the period an average plant utilization of 85%, compared to 92% during 2011.

Sugar sales, an important part of the Brazilian business, recorded an increase due to an exceptional harvest in the last quarter of the year, growing to 412 ktn sold during the year ended December 31, 2012 from 360 ktn sold during the same period of the prior year with an impact on revenues in the amount of €19.9 million.

Additionally, a general decrease in ethanol and sugar prices during the period, resulted in a total negative impact on revenues of €70.6 million and €2.5 million for the years 2012 and 2011, respectively. Average ethanol prices in the United States experienced a decrease, while remaining flat in the European Union. Average sugar prices declined too (the NY11 sugar average quote, as a reference, declined from an average of 27.0 c\$/lb. for 2011 to an average 21.6 c\$/lb. for the year 2012).

Consolidated EBITDA by activity

The following table sets forth our Consolidated EBITDA for the years ended December 31, 2012 and 2011 by our three activities.

	Years ended December 31	
	2012	2011
	(€ in millions)	
Consolidated EBITDA		
Engineering and Construction	623.9	707.2
Engineering and Construction	475.5	511.2
Technology and other	148.4	196.0
Concession-Type Infrastructure	233.6	303.7
Solar	203.4	92.9
Transmission	15.7	193.2
Water	11.6	10.3
Co-generation and other	2.9	7.2
Industrial Production	91.1	152.1
Biofuels	91.1	152.1
Total	948.6	1,163.0

Engineering and Construction. Consolidated EBITDA decreased by 11.8% to €623.9 million for the year ended December 31, 2012, from €707.2 million for the year ended December 31, 2011. Consolidated EBITDA margin (Consolidated EBITDA as a percentage of revenue) decreased to 16.5% for the year ended December 31, 2012, compared to 17.6% in the same period of 2011, due to the prospective application of IFRIC 12 since January 1, 2011.

- **Engineering and Construction:** Consolidated EBITDA decreased by 7.0% to €475.5 million for the year ended December 31, 2012, from €511.2 million for the year ended December 31, 2011. Consolidated EBITDA margin remained at similar level, 13.7% for the year ended December 31, 2012, compared to 13.8% in 2011. This decrease was mainly due to the decrease in EBITDA related to the construction of thermo-solar plants in Spain, which represented €68.9 million in the Engineering and Construction segment in 2012 compared to €106.5 million in 2011. In 2011 EBITDA in Engineering and Construction included a one-time income of €56 million recorded in “Other Operating Income” resulting from the prospective application of IFRIC 12 on January 1, 2011 (see Note 2.1.1 to our Consolidated Financial Statements).
- **Technology and Other:** Consolidated EBITDA decreased by 24.3% to €148.4 million for the year ended December 31, 2012, from €196.0 million for the year ended December 31, 2011. The decrease was primarily attributable to the decrease in EBITDA related to the construction of thermo-solar plants in Spain, which represented €44.0 million in the Technology and Other segment in 2012 compared to €128.3 million in 2011. In 2011 EBITDA in Technology and Other included a one-time income of €109 million recorded in “Other Operating Income” resulting from the prospective application of IFRIC 12 on January 1, 2011 (see Note 2.1.1 to our Consolidated Financial Statements). This decrease was partially offset by the impact of the acquisition of the Rioglass Group, in which we already had a 50% equity interest. The transaction is a business combination achieved in stages and according to IFRS 3, we remeasured our previously held equity interest in the acquiree at its acquisition-date fair value and we recorded a profit amounting to €85.0 million in Technology and Other operating income. The decrease in terms of the EBITDA margin from 62.8% for 2011 compared to 49.0% in 2012 for the Technology and Other reportable segment was attributable to the decrease in the construction of thermo-solar plants in 2012 and due to higher margin technology licensing fees in

2011 associated with the construction of our two 280 MW thermo-solar projects in the United States (Solana and Mojave), where new technology was being deployed.

- **Concession-Type Infrastructure.** Consolidated EBITDA decreased by 23.1% to €233.6 million for the year ended December 31, 2012, from €303.7 million for the year ended December 31, 2011. Consolidated EBITDA margin in these activities decreased to 59.4% for the year ended December 31, 2012, compared to 69.0% in the same period of 2011. The 23.1% year-over-year decrease in EBITDA was primarily due to the sale of transmission line concessions in Brazil (Cemig Sales) in the fourth quarter of 2011 and second quarter of 2012 and to a lesser extent due to the de-consolidation of certain companies within our concession-type infrastructure activity as a result of the adoption of IFRS 10 and 11 as of January 1, 2012 (please see Note 2.1.3 of our Consolidated Financial Statements as of December 31, 2012). The decrease in margin was primarily attributable to the Cemig Sales, and the transmission lines that had a higher level of EBITDA margin as a percentage of revenues than other assets.
- **Solar:** Consolidated EBITDA increased by 118.9% to €203.4 million for the year ended December 31, 2012, from €92.9 million for the year ended December 31, 2011. The increase was primarily attributable to plants that entered into operation in 2012 (Solacor 1 and 2, Helios 1 and 2, Solaben 2 and 3). The Consolidated EBITDA margin rose to 72.2% for the year ended December 31, 2012 from 70.6% for the year ended December 31, 2011. This increase is due to the increased efficiency of newer plants that generated proportionally more energy compared to the previous ones, as well as increased contribution from those plants that have been remunerated through a higher pool+premium rather than tariff payments. This scheme, however, has been modified after the latest sector reform, as it is described in "*Regulation*" section, whereby the premium payment is eliminated from 2013 onwards, resulting in the obligation to choose between the stabilized tariff or the pool price. This scheme awards a lower remuneration compared to the pool+premium scheme awarded from the second year of operation, considering the market prices for the period (source: OMIE) and the resolutions set forth in the Royal Decree 661/2007. Considering that operating costs are related to the output produced, this results in an increase in the plant EBITDA margin from the second year of operation. These positive effects have been offset by the fact that thermo-solar plants that have recently entered into operation and have started to generate EBITDA, during the initial stage of operation, typically tend to have lower EBITDA margin until the plant reaches full efficiency after the start-up phase.
- **Transmission:** Consolidated EBITDA decreased by 91.9% to €15.7 million for the year ended December 31, 2012, from €193.2 million for the year ended December 31, 2011, mainly due to the sale of the power transmission lines sold in Brazil which had higher operating margins than the average for the segment. Also, the de-consolidation of a company within our transmission segment in Brazil as a result of the adoption of IFRS 10 and 11 as of January 1, 2012 had a negative impact in our EBITDA for the fiscal year 2012 compared to 2011.

Inflation did not have a relevant impact on operating margins, as contracts are indexed to inflation.

- **Co-generation and other:** Consolidated EBITDA decreased by 59.8% to €2.9 million for the year ended December 31, 2012, from €7.2 million for the year ended December 31, 2011, mainly due to higher costs of operation and maintenance during 2012 when compared to the year ended December 31, 2011.
- **Water:** Consolidated EBITDA increased by 12.6% to €11.6 million for the year ended December 31, 2012, from €10.3 million for the year ended December 31, 2011. The increase both in consolidated EBITDA and in EBITDA margin was primarily attributable to our desalination plant in Skikda (Algeria) which contributed at a higher margin in 2012 compared to 2011, thus improving our overall EBITDA margin. The cost of electricity, the main item of the cost structure of the segment, did not have a meaningful impact, as it is passed through to the final client through the tariff.

Industrial Production.

- **Biofuels:** Consolidated EBITDA decreased by 40.1% to €91.1 million for the year ended December 31, 2012, from €152.1 million for the year ended December 31, 2011. The decrease was primarily attributable to extremely adverse market conditions, especially in the United States resulting in heavy margin erosions and to the lack of improved performances of the European and Brazilian markets, offset in part by income of €26 million during the last quarter of 2012 corresponding to a collection from Chicago Title Insurance Company after a favorable and final jury verdict in a legal proceeding against that company. The reasons for this low margin situation are the severe drought in the Midwest in the United States, causing an increase in corn prices above \$7.0 per bushel and the decline in gasoline consumption which in turn has led to low ethanol prices. European crush margins for the third quarter stood at an average of approximately €180 per cubic meter compared to less than €130 per cubic meter for the first half and the fourth quarter of the year, leading to a slight recovery of performance in the region quantified as €2.2 million. In general, an unfavorable evolution of raw material costs, in particular grain prices in the United States, led to margin erosion for the segment during 2012 in comparison to 2011.

As a result of declining ethanol prices and increasing grain prices (the main cost component of the crush formula), the average crush spread for the business saw a negative evolution for 2012 compared to 2011, especially in the United States, despite the hedging activity the business conducts in order to protect sales margins. Taking into account our hedging strategies policy, see "Quantitative and Qualitative Disclosure About Market Risk," the total combined negative impact of €152.8 million in terms of consolidated EBITDA for 2012 was a consequence of declining ethanol prices and increased corn prices in the United States was €152.8 million. In detail, the average market crush spread in the United States decreased to an average \$0.42/gal during 2012 from an average of \$0.69/gal during 2011.

Additionally, our subsidiary, Abengoa Bioenergy U.S. Holding, recorded an income of €26 million during the last quarter of 2012 corresponding to a collection from Chicago Title Insurance Company after a favorable and final jury verdict in a litigation process against that company.

Liquidity and Capital Resources

The liquidity and capital resources discussion which follows contains certain estimates as of the date of this Listing Memorandum of our estimated future sources and uses of liquidity (including estimated future capital resources and capital expenditures) and future financial and operating results. Our management has prepared the prospective financial information set forth below to present the future capital resources, future capital expenditures and future financial and operating results, for the years 2014 through 2016, in the context of our Liquidity and Capital Resources discussion. The accompanying prospective financial information was not primarily prepared with a view toward public disclosure or with a view toward complying with the guidelines established by the American Institute of Certified Public Accountants with respect to prospective financial information, but, in the view of our management, was prepared on a reasonable basis, reflects the best currently available estimates and judgments, and presents, to the best of management's knowledge and belief, the expected course of action and the expected future financial performance of the Company. However, this information is not fact and should not be relied upon as being necessarily indicative of future results, and readers of this Listing Memorandum are cautioned not to place undue reliance on the prospective financial information.

Neither our independent auditors, nor any other independent accountants, have compiled, examined, or performed any procedures with respect to the prospective financial information contained herein, nor have they expressed any opinion or any other form of assurance on such information or its achievability, and assume no responsibility for, and disclaim any association with, the prospective financial information.

The assumptions and estimates underlying the prospective financial information are inherently uncertain and, though considered reasonable by our management as of the date of their preparation, are subject to a wide variety of significant business, economic, and competitive risks and uncertainties that could cause actual results to differ materially from those contained in the prospective financial information, including, among others, risks and uncertainties. See *“Forward-Looking Statements”* and *“Risk Factors.”* Accordingly, there can be no assurance that the prospective results are indicative of our future performance or that actual results will not differ materially from those presented in the prospective financial information. Inclusion of the prospective financial information in this Listing Memorandum should not be regarded as a representation by any person that the results contained in the prospective financial information will be achieved.

We do not generally publish our business plans and strategies or make external disclosures of our anticipated financial position or results of operations. Accordingly, we do not intend to update or otherwise revise the prospective financial information to reflect circumstances existing since its preparation or to reflect the occurrence of unanticipated events, even in the event that any or all of the underlying assumptions are shown to be in error. Furthermore, we do not intend to update or revise the prospective financial information to reflect changes in general economic or industry conditions. See *“Risk Factors”* for a discussion of various factors that could materially affect our financial condition, results of operations, business, prospects and securities.

We believe that our existing liquidity and cash flow will be sufficient to meet our requirements and commitments for the foreseeable future.

We utilize a combination of corporate debt and non-recourse debt to finance our cash needs and the growth of our business. Our primary source of liquidity has historically been cash generated from our operations and financing activities.

Cash generated by operations includes mostly the EBITDA generated in the period as well as cash flow generated from working capital. We use different tools that have allowed the company to generate cash flows from working capital in the past: (i) we outsource payment to suppliers through financial institutions that process payments 180 days after approval of invoices, (ii) we use non-recourse factoring for many of our receivables (see *“Quantitative and Qualitative Disclosure About Market Risk—Credit Risk”*) and (iii) we attempt to negotiate advances from customers related to construction works we perform in our Engineering and Construction segment. The use of these tools allows many of our projects to be cash flow positive throughout their life. Non-recourse factoring allows us to collect on invoices as soon as they are certified by our customers (based on percentage of completion milestones agreed to in our contracts). Our outsourcing of payables implies suppliers are paid through a financial institution 180 days after the invoices are internally approved (which requires us in certain cases to maintain cash deposits within the relevant financial institutions or otherwise on a restrictive basis), with such suppliers having the option to collect in advance with a discount. Therefore, in quarters of high execution and invoicing, we can generate significant cash flows from collections, whereas payments on work performed are generally made in the subsequent two quarters. This causes certain seasonality in our cash flows, with cash typically generated towards the end of the year, and payments made in the first half of the year.

As of June 30, 2014 we had €6,605.4 million of Gross Corporate Debt and €4,042.1 million of cash and cash equivalents and short-term financial investments, excluding non-recourse entities, compared to €5,654.4 million and €3,406.6 million as of December 31, 2013, respectively. As of June 30, 2014, we had €1,648.8 million of short-term gross corporate debt (up from €919 million as of December 31, 2013), representing 25% of our total gross corporate debt. Such debt includes €209 million under the 2012 Forward Start Facility (defined below) which was due, and repaid, in July 2014, €109 million under the EIB loan, €51 million under the ICO loan, €168 million under the Export Credit Agreements, €118 million of other corporate bank debt, €300 million under the 2015 Notes, €100 million under the 2014 Convertible Notes and €536 million of euro Commercial Paper. The increase in short term gross corporate debt from December 31, 2013 is mainly due to the reclassification from long to short-term of the €300 million 2015 Notes and to a

significant increase in the outstanding amount of the euro Commercial Paper (up from €105 million as of December 31, 2013), as we have increasingly relied on this source of financing to manage our working capital requirements.

We have historically refinanced or renewed our bilateral credit agreements and other indebtedness coming due at or prior to maturity, and in 2012 we refinanced the remaining amounts due under our 2010 Forward Start Facility and certain of our other syndicated facilities with the signing on April 27, 2012 of a new forward start facility agreement with a group of lenders (the “**2012 Forward Start Facility**”), with final maturity on July 20, 2016. The original aggregate principal amount under the 2012 Forward Start Facility was €1,566 million, however, following two increases of the aggregate principal amount on May 22, 2012 and July 11, 2012 of €47 million and €50 million, respectively, the 2012 Forward Start Facility provides for borrowings up to €1,663 million divided into Tranche A and Tranche B amounting to €1,350.7 million and €312.5 million, respectively. Drawdowns under Tranche A are designated as July 20, 2012 under Sub-Tranches A1, A2 and A3, and July 20, 2013 under Sub-Tranche A4 which correspond to payment or maturity dates of our other syndicated finance facilities. Drawdowns under Tranche B are designated as July 20, 2012 under Sub-Tranches B3 and B4 and July 20, 2013 under Sub-Tranche B2 which correspond to payment or maturity dates of existing indebtedness. The drawdown date for Sub-Tranche B1 is available after July 2, 2012. The terms and conditions of the 2012 Forward Start Facility are broadly in line with those of our existing 2010 Forward Start Facility. As of June 30, 2014, borrowings under the 2012 Forward Start Facility have been fully drawn and the outstanding nominal amount is €1,417 million. In July 2014, we repaid €208 million maturing under the 2012 Forward Start Facility.

Credit ratings affect the cost and other terms upon which we are able to obtain liquidity through financing (or refinancing). Currently, our corporate family and probability of default ratings are “B2” with a stable outlook from Moody’s, “B” with a positive outlook from S&P and “B+” with a stable outlook from Fitch.

Any future downgrade of, or negative outlook with respect to, our corporate family or of our outstanding securities may adversely affect our ability to obtain financing on commercially acceptable terms, or at all, and therefore materially adversely affect our liquidity position (including our ability to repay our outstanding indebtedness) and our ability to implement our corporate strategy.

Our principal liquidity and capital requirements consist of the following:

- capital expenditures for existing and new plants and operations;
- debt service requirements on our existing and future debt;
- costs and expenses relating to the operation of our businesses; and
- acquisitions of new companies to expand our existing product and service lines and geographic presence.

We proactively manage our cash needs by preparing an annual financial plan, which is approved by the Board of Directors, and continually monitoring the provisions of our liquidity reserve (which includes credit facilities and cash and cash equivalents), based on expected cash flows. We fund in advance disbursements for major cash requirements, such as capital expenditures and debt repayments. In addition, as a general rule, we do not commit our own equity in projects until the associated long-term financing is obtained.

As of June 30, 2014, our known most relevant future commitments in the short-term and long-term were corporate financing maturities in the amount of €6,605.4 million and non-recourse maturities in the amount of €6,319.1 million (which includes €766.3 million of non-recourse finance in process), respectively. For further discussion of our contractual obligations, see “—Non-Recourse Debt” and “—Corporate Debt.”

In addition, as of June 30, 2014, our estimated committed capital expenditures for 2014 through 2015 and 2016 broken down between our Concession-Type Infrastructure and Industrial Production activities (we do not have any capital expenditures in our Engineering and Construction activity) are as follows:

Activity	Total	Remainder 2014	2015	2016
	(unaudited and estimated) (€ in millions)			
Concession-Type Infrastructure	6,756	1,352	2,886	2,518
Industrial Production	67	67	0	0
Total	6,823	1,419	2,886	2,518

We plan to finance our committed capital expenditures plan through the utilization of non-recourse debt of approximately €5,021 and partners for approximately €1,062 million, with the remaining €740 million to be contributed by us as equity. We intend to finance our equity contribution to these projects through cash on hand, cash flows generated from operating activities, cash from the corporate financing arrangements we have in place as well as new issues of debt instruments in the capital markets, including the Notes. The table that follows breaks down the amounts estimated to be raised from these sources of capital by year for the years 2014 through 2016:

Source of Capital	Total	2014	2015	2016 and beyond
	(unaudited and estimated) (€ in millions)			
Equity from Abengoa	740	177	344	219
Partners	1,062	294	381	387
Non-Recourse Debt	5,021	948	2,161	1,912
Total	6,823	1,419	2,886	2,518

As a result, the total equity contribution from Abengoa for our capital expenditure program stands at approximately €740 million, which is expected to be deployed in 2014 (€177 million), 2015 (€344 million) and 2016 and beyond (€219 million).

In the last three years, due to the increase in capital expenditures incurred to develop our portfolio of segments in power transmission, solar plants, biofuels and water desalination plants, we have invested €1,884 million, €2,215 million and €2,913 million in 2013, 2012 and 2011, respectively, which has resulted in negative cash flow. These projects are developed over long periods of time, many of which are over 12-month periods. As a result, a high amount of our fixed or intangible assets are still under construction (€2,445 million as of June 30, 2014, or 34% of our total tangible and intangible assets excluding goodwill) and therefore are not yet generating cash flow from operations. However, as these projects become operational, during 2014, 2015 and 2016, they will start contributing to the operating result under our Concession Type Infrastructure activity and therefore will generate cash flow from operations.

The amount of total assets under the scope of IFRS 10 which were under construction as of June 30, 2014 was approximately €2,149 million. See “—Factors Affecting the Comparability of Our Results of Operations—IFRS 10 and 11.”

The expected start-up date of the most significant assets under construction as of June 30, 2014 are as follows:

<u>Description of assets</u>	<u>Location</u>	<u>Capacity</u>	<u>Abengoa (Equity Ownership %)</u>	<u>Expected start up</u>
Solar				
Mojave*	USA	280 MW	100%	Q3/Q4 2014

* Project falling under the scope of IFRS 10 and is therefore consolidated through the equity method until entry into operation. See "Management's Discussion and Analysis of Financial Condition and Results of Operations—Factors Affecting the Comparability of Our Results of Operations—IFRS 10 and 11."

As of June 30, 2014, our cash and cash equivalents were €2,993.6 million and short-term financial investments were €1,261.4 million. We also had other current assets (clients and other receivables and inventories) amounting to €2,057.5 million. Our undrawn corporate credit lines amounted to approximately €55 million.

We aim to maintain our strong liquidity position, extend the debt maturities of our existing corporate loans and bonds, continue to access the capital markets from time to time, as appropriate, and further diversify our funding sources.

Our debt maturities as of June 30, 2014 for the following twelve months amount to €2,348.1 million, out of which €699.3 million relate to non-recourse financing to be repaid with cash flows to be generated from the projects in respect of which that financing was incurred and €1,648.8 million relate to corporate debt maturities. Additionally, we estimate capital expenditures commitments for the next twelve months of approximately €1,419 million, out of which €948 million are expected to be financed with non-recourse debt already committed but not yet drawn upon, €294 million with committed contributions from partners and €177 million with corporate funds from Abengoa. We also have as of June 30, 2014 other current liabilities (trade payables, tax liabilities, derivative financial liabilities and provisions) for a total amount of €5,300.3 million. Some of these payables benefit from required cash deposits, recorded under short term

financial investments and Cash and cash equivalents that may only be used specifically to pay confirmed suppliers through financial institutions. As of June 30, 2014 this amount stands at approximately €1,000 million.

We intend to follow an opportunistic approach, whereby we consider to sell assets or businesses when we deem market conditions are attractive to us. Sales of assets or businesses may be material and may happen at any time. We expect to continue with our asset rotation strategy through the rest of 2014.

On June 18, 2014, we completed the Abengoa Yield IPO of the ordinary shares of Abengoa Yield. Abengoa Yield was formed by Abengoa following a series of concessional asset transfers mostly in the solar, transmission, and cogeneration space. As a result, we issued 28,577,500 shares to the purchasers in the Abengoa Yield IPO in exchange for gross proceeds of approximately \$828.7 million, based on an initial public offering price of \$29.00 per share. Consequently, we own shares representing approximately 64.3% of the economic and voting power of Abengoa Yield's shares. Abengoa Yield was incorporated under the laws of England and Wales on December 17, 2013 by Abengoa, to own and operate a portfolio of renewable energy, conventional power and electric transmission assets previously owned and operated by Abengoa and its subsidiaries. See "*Summary—Recent Developments—Abengoa Yield plc Initial Public Offering.*" Abengoa Yield constitutes a vehicle through which we plan to execute most of our asset rotations, representing a long-term recurrent equity recycling vehicle to crystallize value in concessions, facilitating the divestment process in concessional assets, as Abengoa Yield is a natural buyer of the assets we are building which benefits from a significantly lower cost of capital than us.

Additionally, we have executed sales of some of our assets or businesses prior to the constitution of Abengoa Yield. For example, in May 2013, we closed the sale of Bargoa, which manufactures telecommunication components, to the U.S. company Corning Incorporated for a total amount of \$80 million, which resulted in \$50 million of cash proceeds. In July 2013, we received €331 million of cash proceeds corresponding to the price agreed for the sale of our subsidiary Befesa, together with a deferred compensation of €17 million (including €15 million in escrow pending resolution of ongoing litigation and a €2 million long-term receivable from a Befesa customer), a €48 million subordinated vendor note with a five year maturity and a €225 million (par value) subordinated convertible instrument with a 15 year maturity. In the first quarter of 2014, we announced our agreement to sell our desalination plant in Qingdao, China for total cash proceeds of approximately €53 million.

Our liquidity plans are subject to a number of risks and uncertainties, some of which are outside of our control. Macro-economic conditions could limit our ability to successfully execute our business and liquidity plans. See "*Forward-Looking Statements.*"

Cash Flow

The table below sets forth consolidated cash flow data for each of the six months ended June 30, 2014 and 2013, and for each of the three years ended December 31, 2013, 2012 and 2011.

	Six months ended June 30		Year ended December 31		
	2014 (unaudited)	2013 (€ in millions)	2013	2012 ⁽¹⁾⁽²⁾	2011 ⁽²⁾
Consolidated Cash Flow Statement Data					
Gross cash flows from operating activities					
Profit for the period from continuing operations . . .	52.5	83.8	110.9	61.5	266.4
Adjustments to reconcile consolidated after-tax profit to net cash generated by operating activities	511.0	339.8	888.0	709.6	548.6
Net financial income/(expense)	(356.5)	(193.9)	(486.5)	(346.9)	(360.9)

Cash and cash equivalents at the end of the year	2,993.6	2,047.5	2,951.7	2,413.2	3,738.1

(1) In the interim consolidated financial statements of Abengoa and its subsidiaries as of June 30, 2013, prepared in accordance with IFRS as issued by the IASB and included in our final prospectus for our initial public offering in the United States filed with the SEC pursuant to Rule 424(b) of the Securities Act of 1933 on October 17, 2013, the Group applied IFRS 10 and 11 that came into effect on January 1, 2013 under IFRS-IASB. According to the terms and requirements established in IAS 8 "Accounting Policies, Changes in Accounting Estimates and Errors" and to the specific transition guidance of the new standards, we recasted the financial information as of and for the year ended December 31, 2012 in the final prospectus and the recasted financial information is included herein. Financial information for prior periods was not recasted therein or herein for IFRS 10 and 11 according to the transition guidance and consequently is not comparable with other periods presented. See "Presentation of Financial Information" and Note 2.1.1 to our Consolidated Financial Statements.

(2) On July 15, 2013, we closed the sale of 100% of our shares in our subsidiary Befesa. On that date, we received €331 million of cash proceeds. Taking into account the significance of the activities carried out by Befesa to Abengoa, the sale of this shareholding is considered as a discontinued operation to in accordance with IFRS 5 "Non-Current Assets Held for Sale and Discontinued Operations." In accordance with this standard, the results of Befesa until the closing of the sale and the result of this sale are included under a single heading (profit for the year from discontinued operations, net of tax) in our Consolidated Financial Statements and under separate line items in the consolidated cash-flow statement for the year ended December 31, 2013. Likewise, the consolidated income statement for the years ended December 31, 2012 and 2011 also includes the results of Befesa under a single heading (see "Presentation of Financial Information" and Note 7 to our Consolidated Financial Statements). The Befesa Sale also resulted in the removal of the Industrial Recycling of segment from our Industrial Production activity.

Net Cash Flows from Operating Activities

For the six-month period ended June 30, 2014, we used €530.6 million of net cash flows from operating activities compared to the generation of €160.9 million during the same period last year, mostly due to higher profit for the period from continuing operations adjusted by non-monetary items (€563.4 million in the first six months of 2014 compared to €423.7 million in the first six months of 2013), which was offset by a larger deterioration of working capital (€737.7 million compared to €68.8 million in the first six months of 2014 and 2013, respectively). The net cash used in working capital in the first six months of 2014 was mainly due to lower execution of several projects compared to last year as some of the current projects under execution are still in a ramp-up phase and to larger amounts paid to our suppliers, especially in our Engineering and Construction activity. As a result of our working capital financing policies, whereby we pay suppliers 180 days from the date of invoice, much of the strong execution performed on some of our projects in the last quarter of 2013 to bring several solar and bioenergy assets into operation was paid out to suppliers during 2014. This resulted in large cash outflows during this period, which was paid, in part, with existing cash on the balance sheet, with cash generated from operations during the period before the payment of interest and taxes, and by temporarily using funds from corporate financing. Finally, net interest and taxes paid, net of discontinued operations were higher in the first six months of 2014 than in the same period of 2013 (€356.5 million compared to €193.9 million, respectively) mainly due to new bonds issued in the last quarter of 2013 and in the first quarter of 2014.

For the year ended December 31, 2013, we generated €740.6 million of net cash flows from operating activities compared to €601.7 million during the previous year mostly due to higher profit for the period from continuing operations adjusted by non monetary items (€998.9 million in the year 2013 compared to €771.1 million in the year 2012), and increased generation of working capital (€228.2 million in the year 2013 compared to €177.6 million in the previous year, mainly derived from the variation in tax liabilities and short term financial investments), which was partially offset by larger net interest and taxes paid, net of discontinued operations (€486.5 million in the year 2013 compared to €347.0 million in the previous year).

For the year ended December 31, 2012, we generated net cash from our operating activities of €601.7 million, compared to net cash generated from operating activities of €1,238.5 million for the year ended December 31, 2011. The decrease in net cash flow from operating activities was mainly due to a positive contribution to operating cash from working capital of €784.4 million during the year ended December 31, 2011 versus €177.6 million during the same period of 2012. The reduced generation of cash from working capital in 2012 was mainly due to larger amounts paid to our suppliers, especially in our Engineering and Construction activity, as well as to the low margins in our Biofuels segment during 2012. As a result of our working capital financing policies, whereby we pay suppliers 180 days from date of invoice, a lot of the strong execution performed in the last quarter of 2011 to bring several solar assets into operation was paid out to suppliers during 2012. This resulted in large cash outflows during this period, which was paid, in part, with existing cash on the balance sheet, with cash generated from operations during the period before the payment of interest and taxes, and by temporarily using funds from corporate financing. Finally, interest paid was lower for the year ended December 31, 2012 compared with the prior year (€464.3 million vs €471.4 million), while interest received was also lower (€67.3 million (2012) vs. €91.2 million (2011)), all resulting in a significantly lower cash generated by operations period over period.

Net Cash Used in Investing Activities

For the six-month period ended June 30, 2014, net cash used in investing activities was €1,193.4 million compared to €1,011.8 million in the same period of 2013. Our main expenditures during the first six months of 2014 have been the construction of cogeneration projects in Mexico, various transmission lines in Brazil and Peru and the thermo-solar plant in Chile.

For the year ended December 31, 2013, net cash used in investing activities was €1,887.5 million compared to €2,638.6 million for the year ended December 31, 2012. The decrease in net cash used in

investing corresponds to the execution of our capital expenditure plan, which was less intensive during 2013 compared to 2012. Our main expenditures during 2013 have been the construction of power transmission lines in Brazil and Peru, the construction of 13 solar plants in Spain, the construction of a second-generation biofuels commercial plant in Hugoton (United States), the construction of solar plant of Mojave in California (United States), the construction of projects in Mexico, the construction of wind farms in Uruguay and the construction of desalination plants in Ghana and Algeria. The corporate contributions into these investments amounted to approximately €729 million (mostly related to Abengoa's equity funding of the solar plant of Mojave in California, the second generation biofuels commercial plant in Hugoton, Kansas, and transmission lines in Brazil), which were primarily funded with cash and cash equivalents on balance sheet, as corporate financing remained broadly stable during the year.

For the year ended December 31, 2012, net cash used in investing activities was €2,639.0 million, compared to €2,051.9 million for the year ended December 31, 2011. The increase in net cash used in investing activities corresponds to the execution of our capital expenditure plan, which was more intense during 2012 compared to 2011. Our main expenditures during 2012 have been the construction of 13 solar plants in Spain, the construction of solar plants of Mojave in California and Solana in Arizona (both in the United States), the construction of power transmission lines in Brazil and Peru, the construction of a second-generation biofuels commercial plant in Hugoton, Kansas (United States), the construction of a co-generation plant in Tabasco (Mexico) and the construction of a desalination plant in Ghana. The corporate contributions into these investments amounted to approximately €1,189 million (mostly related to Abengoa's equity funding of solar plants in Spain and United States, transmission lines in Brazil and a cogeneration plant in Mexico), which were primarily funded with cash and cash equivalents on balance sheet, as corporate financing remained broadly stable during the year.

Net Cash Generated from Financing Activities

For the six-month period ended June 30, 2014, net cash flow from financing activities was €1,743.1 million compared to €571.4 million in the first six months of 2013. The net cash generated from financing activities during the first six months of 2014 related to the proceeds from loans and borrowings of €2,112.2 million and the €611.0 million obtained in the initial public offering of Abengoa Yield which was offset by a repayment of loans and borrowings of €941.0 million and dividends paid to shareholders totaling €39.1 million. The proceeds from loans and borrowings are mainly due to the issuance during the first months of 2014 of the 2021 Ordinary Notes, the use of our Euro Commercial Paper program and the increase in non-recourse financing related to projects under construction.

For the year ended December 31, 2013, net cash flow from financing activities was €1,886.5 million compared to €845.1 million in the previous year. The net cash generated from financing activities in 2013 related to proceeds from loans and borrowings of €3,281.5 million, which was partially offset by a repayment of loans and borrowings of €1,802.0 million, the acquisition of treasury shares totaling €89.6 million, dividends paid to shareholders totaling €38.8 million and the effect of discontinued operations of €32.0 million. The proceeds from loans and borrowings are mainly due to increase in non-recourse financing related to projects under construction. We also had proceeds from corporate debt, consisting mainly of the issuance of the 2019 Convertible Notes, the Senior Unsecured Notes due 2018 and the Senior Unsecured Notes due 2020 for an amount of €400 million, €550 million and \$450 million, respectively. Additionally, in October 2013, a capital increase was carried out and we received proceeds for an amount of €517.5 million.

For the year ended December 31, 2012, net cash flow from financing activities was €845.1 million, compared to €1,676.0 million for the year ended December 31, 2011. The net cash generated from financing activities during 2012 corresponds to proceeds from loans and borrowings of €757.0 million, repayments of loans and borrowings of €229.6 million, dividends paid to shareholders of €36.6 million, other finance activities of €6 million and the effect of discontinued operations of €360.4 million. The proceeds from loans and borrowings relates mostly to new non-recourse financings of €242 million obtained for our solar plants under construction (the thermal solar plants Solaben, Solacor and Helios in Spain) and to an extent to

transmission lines in Brazil, for €432 million (Manaus, Linha Verde), the cogeneration plant for Pemex in Mexico and the construction of a wind farm in Uruguay for €84 million.

Clients and other receivable accounts

	As of June 30	As of December 31	
	2014	2013	2012
	(€ in millions)		
Clients and other receivable accounts:			
Trade receivables	709.6	566.9	1,064.8
Unbilled revenues	503.0	488.9	393.2
Bad debt provisions	(77.0)	(64.0)	(46.1)
Tax receivables	690.3	640.6	621.0
Other debtors	231.6	237.6	238.3
Total	<u>2,057.5</u>	<u>1,870.0</u>	<u>2,271.3</u>

As of June 30, 2014, clients and other receivable accounts increased by €187.5 million, or 10.0%, compared to December 31, 2013. This increase was primarily due to the increase in accounts receivable in our solar plants in Spain, mainly due to seasonal effects, as well as an increase in accounts receivable in our Engineering and Construction companies related to the second-generation biofuels commercial plant in Hugoton and new projects under construction. The increase in Tax receivables was primarily due to an increase in income and other taxes receivables, VAT charged and withholdings tax and income tax advance.

As of December 31, 2013, clients and other receivable accounts decreased by €401.3 million, or 17.7%, compared to December 31, 2012. This decrease was primarily due to the decrease in accounts receivable in our Engineering and Construction companies, mainly due to collections during the period for a total amount of €299.8 million related to the Mojave solar plant in California, the solar plants in South Africa and the Hugoton second generation biofuels plant in the United States, as well as to the exclusion of Befesa Medio Ambiente, S.L.U. from the consolidation scope following the sale of its shareholdings and to a lower extent, due to impairment of accounts receivable. These effects were partially offset by the increase in unbilled revenues in most of our Engineering and Construction companies during the year 2013. Unbilled revenues are related to projects in our Engineering and Construction activity (especially large projects under construction). As a general rule, we aim to bill amounts under unbilled revenues within the three months following completion of the work being performed on the project. Nevertheless, given the highly tailored characteristics of some construction contracts, some projects may take longer to be billed due to specific billing milestones in the contracts. These balances do not include any receivables relating to customer claims being supported by contracts signed with such customers.

As of December 31, 2012, clients and other receivable accounts increased by €465.0 million, or 25.7%, compared to December 31, 2011. This increase was primarily due to the application of IFRS 10 and 11 as of December 31, 2012 as the de-consolidation of certain entities previously consolidated globally or proportionally resulted in the recognition of accounts receivable of the Group with those companies. This effect was partially offset with the decrease in unbilled revenues due to our ongoing effort to bill within three months following the completion of the work being performed on the project. Unbilled revenues were related to projects in our Engineering and Construction activity (especially large projects under construction, such as Solana and Mojave (two solar thermal plants in the United States), several transmission lines in Latin America, the solar thermal plant Shams-1 facility in Abu Dhabi (United Arab Emirates) and the combined cycled electricity power plant in Morelos (Mexico)). Of the total amount of unbilled revenues outstanding as of December 31, 2012, 11% has been carried forward to December 31, 2013. The unbilled balance that has not been billed yet will be billed in the upcoming months according to the milestones of each specific project, which means approximately 10% per month, except for those projects that will be billed at the end of the construction, so that the total amount is realizable. These balances do not include any receivables relating to customer claims being supported by contracts signed with such customers.

Concessions

As of June 30, 2014, the average remaining life of our concessions was approximately 25 years. Concessions consist of long-term projects awarded to, and undertaken by, Group entities (in conjunction with other companies or on an exclusive basis), typically over a term of 20 to 30 years. For further information on our backlog and concessions, see "*(Managements Discussion and Analysis of Financial Condition and Results of Operations—Factors Affecting our Results of Operations—Backlog and Concessions)*."

Financing Arrangements

We utilize two main sources of financing to meet our financial commitments: corporate debt and Non-Recourse Debt. We use our corporate debt to finance our investments (including in joint ventures and financing at the project company level) and for general corporate purposes. Our corporate debt is used by all of our activities and is primarily incurred by the Company with upstream guarantees from our main operating subsidiaries. We define non-recourse as debt that is generally used for constructing or acquiring an asset, which is guaranteed by the assets and cash flows of the company or group of companies carrying out the financed activities. Non-Recourse Debt also includes non-recourse finance in process, which relates to certain operations which are financed in a similar manner to non-recourse projects, generally by financial entities, and which are earmarked to be future development projects which typically will be eventually financed through non-recourse project finance schemes. Such funding typically relates to transitional financing phases of a project (typically periods of less than 2-3 years) during the launch and construction phase of goods/projects, which once completed and ready for operation, become financed under the non-recourse project finance model. In these situations the Parent Guarantor and/or Restricted Subsidiaries provide, from time to time, guarantees of obligations whereby the Parent Guarantor and/or Restricted Subsidiaries act as sponsors for the period prior to such project companies securing long-term project financing for their projects. However, if during such transitory period there is a risk of non-compliance with the debt repayment schedule necessary in order to obtain project finance (or of construction, which will ultimately require financing), such financing would be reclassified on the consolidated statement of financial position as a type of recourse financing, depending upon the nature of the arrangements, typically being loans with financial entities. As of June 30, 2014 we had approximately €766.3 million of borrowings classified as non-recourse finance in process. Out of the €766.3 million, €485.4 million was guaranteed by the Parent Guarantor and/or Subsidiary Guarantors; €190.9 million was guaranteed by the Parent Guarantor and one or more Restricted Subsidiaries that are not Subsidiary Guarantors; and €90.0 million was guaranteed by Restricted Subsidiaries that are not Subsidiary Guarantors. The classification of this debt as Non-Recourse Debt may differ from the classification made by other companies and we have discretion, within applicable IFRS guidelines, to reclassify this type of indebtedness. We generally finance the construction of our own operations by means of Non-Recourse Debt at the project company level. Non-Recourse Debt is the principal means of financing for project construction in our Engineering and Construction activity, our Concession-Type Infrastructure activity and our Industrial Production activity.

The Company is subject to one single financial covenant under the majority of the corporate facilities consisting of the maintenance of a Corporate Net Finance Debt to Consolidated EBITDA (as such terms are defined therein) lower than 3.00x until December 30, 2014 and lower than 2.50x thereafter. As of June 30, 2014 this ratio stood at 2.44x (up from 1.69x at December 31, 2013) which means that the Company had as of such date an additional €538.2 million corporate borrow capacity without incurring a breach of covenants, considering the last twelve month consolidated EBITDA (as defined therein) of €998.5 million. This ratio has typically been lower at year end than in the interim periods at June 30, as we face seasonality in our working capital flows, which tend to be more positive in the second half of the year.

As of June 30, 2014, we had a total net debt (including other loans and borrowings) as calculated below of €8,548.1 million outstanding, the majority of which is long-term financing. Our borrowings consist principally of corporate debt and Non-Recourse Debt and loans received from public organizations in connection with certain of our projects. As of June 30, 2014, we had €6,605.4 million of indebtedness with

recourse at the corporate level, €6,319.1 million of Non-Recourse Debt (of which approximately €766.3 million was non-recourse finance in process) and €4,254.8 million of cash and cash equivalents and short-term financial investments, resulting in total net debt (including other loans and borrowings) of €8,548.1 million.

The table below sets forth our total net debt (excluding other loans and borrowings) as of June 30, 2014 and as of December 31, 2013 and 2012.

	<u>As of June 30</u>	<u>As of December 31</u>	
	<u>2014</u>	<u>2013</u>	<u>2012</u>
	<u>(unaudited)</u>	<u>(€ in millions)</u>	
Corporate debt:			
Long-term and short-term bank loans	(2,630.7)	(2,596.1)	(3,042.1)

Less: Long-term and short-term other loans and borrowings	121.4	123.8	190.0
Total net debt	<u>(8,548.1)</u>	<u>(7,974.1)</u>	<u>(6,700.4)</u>

Corporate Debt

As of June 30, 2014, we had €6,605.4 million of corporate debt outstanding. As of June 30, 2014 our average corporate debt outstanding during the period had an average effective annual interest rate of approximately 7.6%, including cost of interest rate hedges.

Our bank loan financings and bond financings (other than non-recourse debt) as of June 30, 2014 primarily consist of the following:

2012 Forward Start Facility Agreement

Overview

On April 27, 2012, we entered into a forward start facility agreement (the “**2012 Forward Start Facility Agreement**”) with a group of lenders which was amended and restated as of May 22, 2012 and July 11, 2012 as additional finance institutions acceded to the agreement as lenders, raising the total aggregate amount to €1,663 million. The 2012 Forward Start Facility Agreement provides, among other things, for borrowings of up to €1,663,209,640.77, comprising up to €1,350,723,529.62 by way of a facility (“**Tranche A**”) and up to €312,486,111.15 by way of a further facility (“**Tranche B**”). Tranche A comprises four sub-tranches in the amounts of €97,053,557.32 (“**Sub-Tranche A1**”), € 50,018,511.99 (“**Sub-Tranche A2**”), €199,034,587.89 (“**Sub-Tranche A3**”) and €1,004,616,872.42 (“**Sub-Tranche A4**”). Tranche B comprises four sub-tranches in the amounts of €234,152,777.81 (“**Sub-Tranche B1**”), €50,000,000 (“**Sub-Tranche B2**”), €18,333,333.33 (“**Sub-Tranche B3**”) and €10,000,000.01

(“**Sub-Tranche B4**”). The commitments under the 2012 Forward Start Facility Agreement mature on July 20, 2016. The 2012 Forward Start Facility Agreement is governed by Spanish law. As of December 31, 2013, borrowings under the 2012 Forward Start Facility were fully drawn.

On December 23, the Company prepaid €246.5 million principal amount of the 2012 Forward Start Facility. As of June 30, 2014, the aggregate principal nominal amount outstanding was €1,417 million. In July 2014, we repaid €208 million maturing under the 2012 forward start facility.

Purpose

All funds drawn under Sub-Tranche A1 were used for the partial refinancing of the repayment installments under the 2005 Credit Facility, which was paid on July 20, 2012. All funds drawn down under Sub-Tranche A2 were used for the partial refinancing of the repayment installments under the 2006 Credit Facility, which was paid on July 20, 2012. All funds drawn down under Sub-Tranche A3 were used for the refinancing of the repayment installments under the 2010 Forward Start Facility, which was paid on July 20, 2012. All funds drawn down under Sub-Tranche A4 were used for the partial refinancing of the repayment installments under the 2010 Forward Start Facility on July 20, 2013.

All funds drawn down under Sub-Tranche B1 are to be used by us for general corporate purposes and to finance the working capital and/or investment needs of the Group. All funds drawn down under Sub-Tranche B2 are to be used for the partial refinancing of the repayment installments under the 2010 Forward Start Facility, will be payable July 20, 2013 (to the extent not covered with the drawdown under Sub-Tranche A4). All funds drawn down under Sub-Tranche B3 are to be used for the refinancing of the partial repayment installment under the 2005 Credit Facility, which was paid on July 20, 2012 and the repayment installment under the 2010 Forward Start Facility, which was paid on July 20, 2012 and July 20, 2013. All funds drawn down under Sub-Tranche B4 are to be used for the partial repayment installment under the 2006 Credit Facility, which was paid on July 20, 2012 and the partial repayment installment under the 2010 Forward Start Facility, which was paid on July 20, 2012 and July 20, 2013.

Borrower

Abengoa is the original borrower under the 2012 Forward Start Facility Agreement.

Guarantees

The 2012 Forward Start Facility Agreement is guaranteed on a senior basis by the following guarantors: Abeinsa Ingeniería y Construcción Industrial, S.A., Abeinsa Inversiones Latam, S.L., Abencor Suministros, S.A., Abener Energía, S.A., Abengoa Bioenergía, S.A., Abengoa Bioenergy Company, LLC, Abengoa México, S.A., Abengoa Solar España, S.A., Abentel Telecomunicaciones S.A., ASA Investment Brasil Ltda., ASA Desulfuración S.A., Ecoagrícola, S.A., Instalaciones Inabensa S.A., Negocios Industriales y Comerciales, S.A., Abeinsa Infraestructuras Medio Ambiente, S.A., Bioetanol Galicia, S.A., Abengoa Bioenergy New Technologies, LLC, Abengoa Bioenergy of Nebraska, LLC, Teyma Gestión de Contratos de Construcción e Ingeniería, S.A., Inabensa Río Ltda, Teyma Internacional, S.A., Nicsamex S.A., Abentey Gerenciamiento de Proyectos de Engenharia e Construções Ltda, Abengoa Bioenergy Trading Europe B.V., , Teyma USA & Abener Engineering and Construction Services General Partnership, Europea de Construcciones Metálicas, S.A., Construcciones Metálicas Mexicanas Comemsa, S.A., Abengoa Solar, S.A., Abengoa Water, S.L., Siema Technologies, S.L, Abener Teyma Hugoton General Partnership, Abener Teyma Mojave General Partnership, Abengoa Solar New Technologies, S.A., Centro Morelos 264 S.A. de C.V., Teyma Uruguay ZF S.A., Abengoa Construção Brasil LTDA, Abeima Teyma Zapotillo S. de R.L. de C.V., Abengoa Concessions Investments Limited, Abeinsa Asset Management, S.L. and Abengoa Concessions, S.L. (the “**2012 Facility Guarantors**”).

The respective guarantees of the 2012 Forward Start Facility Agreement provided by Abengoa Bioenergía and Befesa Medio Ambiente, S.L.U. (“**Befesa**”) and Abengoa Solar, S.A. (“**Abengoa Solar**”) (if at

such time Abengoa Solar had provided a guarantee) may be extinguished in respect of any such company (along with the guarantees provided by any of their respective subsidiaries) if any of these companies sell, whether by public offerings or otherwise, 10% or more of their share capital, provided that, after the release of the guarantee (which shall be automatic subject to Abengoa maintaining at least 50% of their share capital) of either Befesa, Abengoa Bioenergía or Abengoa Solar in such circumstances, the release of the guarantee of the remaining two subsidiaries subsequent to such public offerings is subject to the unanimous consent of the lenders under the 2012 Forward Start Facility Agreement (which shall not be unreasonably withheld). Consequently, the Befesa Sale required the consent of the lenders and such consent was obtained

With respect to the guarantees of the remaining 2012 Facility Guarantors, in the event of certain sales of 10% or more of their share capital, the guarantees provided by each guarantor will be automatically extinguished, subject to certain exceptions.

Guarantor Coverage Test

The 2012 Forward Start Facility Agreement requires that the total consolidated assets and the aggregate EBITDA of the 2012 Facility Guarantors jointly with Abengoa represent at least 75% of total consolidated assets and 75% of Consolidated EBITDA, respectively. In calculating consolidated assets and Consolidated EBITDA, the following items are excluded: (i) Group companies created for the sole purpose of undertaking projects under a system of long-term financing without recourse against another Group member; (ii) acquisitions made without recourse financing; (iii) the assets and EBITDA of Befesa and/or Abengoa Bioenergía and/or Abengoa Solar in the event of disposal of their shares as provided therein; and (iv) Group companies in respect of which legal restrictions exist on their guaranteed amounts payable by us pursuant to the 2012 Forward Start Facility Agreement (but only insofar as such restrictions affect the whole of the guaranteed amounts). If this specified minimum is not satisfied, then we must ensure that additional guarantors accede to the 2012 Forward Start Facility Agreement in order to maintain compliance with the guarantor coverage test.

In the event that a guarantee provided by Befesa, Abengoa Bioenergía or Abengoa Solar is subsequently released pursuant to the abovementioned provisions described under the section "Guarantees," the 2012 Forward Start Facility Agreement requires that the aggregate EBITDA of the remaining 2012 Facility Guarantors jointly with Abengoa represents at least 85% of total consolidated assets and 85% of Consolidated EBITDA.

Security

The obligations under the 2012 Forward Start Facility Agreement are not secured.

Amount and Repayment of Borrowings

The principal drawn down under any tranche of the 2012 Forward Start Facility Agreement is repayable in successive installments on July 20, 2014 and July 20, 2015 and July 20, 2016 in the following amounts:

Repayment Date	Principal to be repaid under Sub-Tranche A1	Principal to be repaid under Sub-Tranche A2	Principal to be repaid under Sub-Tranche A3	Principal to be repaid under Sub-Tranche A4
			(€)	
July 20, 2014	12,790,939.29	6,592,069.04	26,231,280.02	132,401,055.44
July 20, 2015	30,086,602.77	15,505,738.72	61,700,722.25	311,431,230.45
July 20, 2016	39,391,958.50	20,507,589.92	81,604,181.04	411,892,917.69

<u>Repayment Date</u>	<u>Principal to be repaid under Sub-Tranche B1</u>	<u>Principal to be repaid under Sub-Tranche B2</u>	<u>Principal to be repaid under Sub-Tranche B3</u>	<u>Principal to be repaid under Sub-Tranche B4</u>
		(€)		
July 20, 2014	30,859,600.08	6,589,629.29	2,416,197.40	1,317,925.86
July 20, 2015	72,587,361.12	15,500,000.00	5,683,333.33	3,100,000.00
July 20, 2016	96,002,638.90	20,500,000.00	7,516,666.67	4,100,000.00

The interest payable under the 2012 Forward Start Facility Agreement shall be paid each successive interest period, which shall be one, three or six months, as selected by us at the time of drawdown through certain procedures, as defined therein.

As of June 30, 2014, €1,417 million is outstanding under the 2012 Forward Start Facility Agreement.

Mandatory Prepayment

We are obligated to repay Tranche A and Tranche B on a pro rata basis with the proceeds from a sale by public offering of the shares of Befesa and/or Abengoa Bioenergía and/or Abengoa Solar of which we are the direct or indirect owner, to the extent necessary in order that the Debt Ratio (as defined and calculated therein) is equal to or less than 2.0 at the end of the relevant period (as defined therein).

In the event of sale of assets corresponding to Discontinued Activities (as defined therein), 30% of the net cash proceeds must be put towards mandatory prepayment to each of the Tranches and Sub-Tranches under the 2012 Forward Start Facility. In the event of sale of a participation in the share capital of certain Group companies, 30% of the net cash proceeds that exceeds the nominal amount of such share capital and the proportional debt of the relevant sold company will be put towards mandatory prepayment. In the event of sale of other assets exceeding €10 million, 30% of net cash proceeds that exceeds the book value of such assets, once discounted for their replacement value, as applicable, must be put towards mandatory prepayment. In each case, provided however, the amounts put towards mandatory prepayment shall not exceed €90 million per fiscal year and/or transaction related to the same business of the Group within 12 months, or €400 million for the life of the 2012 Forward Start Facility.

This obligatory early repayment shall not exceed €100 million with respect to the proceeds of such sale of shares in Befesa, €50 million with respect to the proceeds of such sale of shares in Abengoa Bioenergía and €100 million with respect to the proceeds of such sale of shares in Abengoa Solar. Such obligatory early repayment is limited to the principal amount pending repayment under Tranche A and Tranche B at the date of the repayment.

Interest Rates and Fees

The annual interest rate on borrowings is calculated based on EURIBOR, plus a margin. From the date of the first drawdown of funds made by us under Tranche A or Tranche B to January 27, 2013, the margin will be set at 3.75%; after January 27, 2013 until January 27, 2015, the margin will be set at 4.00%; and after January 27, 2015 until July 20, 2016, the final maturity date, the margin will be set at 4.25%.

We are also obligated to pay a commitment fee on undrawn amounts under Tranche A and B. Other fees are also payable, including an agency commission, structuring commission, loyalty commission and certain mandatory costs.

Covenants

Availability of amounts under the 2012 Forward Start Facility Agreement is subject to compliance with a financial maintenance covenant. At the end of each annual and semi-annual consolidated financial statement period, the ratio of Net Finance Debt to Consolidated EBITDA (as such terms are defined therein)

should be lower than 3.00 to 1.00 until December 30, 2014, following which the ratio should be lower than 2.50 to 1.00.

Subject in each case to certain exceptions, the 2012 Forward Start Facility Agreement also contains negative covenants and restrictions, including, among other things, restrictions on the granting of security, restrictions on the provision of loans and guarantees, restrictions on the disposal of assets and restrictions on a change of business. Furthermore, we must retain certain ownership levels of the guarantors (at least 50% of the share capital) as well as of Abengoa Solar, Befesa and Abengoa Bioenergía, limit the net debt of our non-guarantor subsidiaries (excluding non-recourse debt) and apply the proceeds from certain sales of the shares of Abengoa Solar, Befesa and Abengoa Bioenergía in specified ways as described above. Consequently, the Befesa Sale required the consent of the lenders and such consent was obtained. See *"Management's Discussion and Analysis of Financial Condition and Results of Operations—Acquisitions and Divestments—Sale of Befesa."* The 2012 Forward Start Facility Agreement also contains affirmative covenants such as for the mandatory periodic reporting of financial and other information and for notification upon the occurrence of any default and certain other events.

Under the 2012 Forward Start Facility Agreement, we are obligated to not permit the Net Financial Debt (as defined therein) of the subsidiaries who are not 2012 Facility Guarantors (excluding the indebtedness of project companies and certain acquisitions without recourse) at any time to exceed €100 million. Nevertheless, in the event that either Befesa or Abengoa Bioenergía or Abengoa Solar are no longer 2010 Facility Guarantors in accordance with certain provisions of the 2012 Forward Start Facilities Agreement, the maximum limit increases to €150 million.

Change of Control

The Majority of the Lenders (as defined in the 2012 Forward Start Facility Agreement) have the ability to require early repayment of all outstanding borrowings under the 2012 Forward Start Facility Agreement, together with accrued interest and all accrued commissions and expenses, upon a person or entity gaining control of us. Control of the borrower is described as either: (i) the ownership of more than 50% of our capital; or (ii) the ability and power to: (a) control 50% or more of our voting shares; (b) appoint or remove 50% or more of the members of our management; or (c) create directives regarding our operating and financial policies.

Events of Default

The 2012 Forward Start Facility Agreement contains provisions governing certain events of default, including the failure to make payment of the amounts due, defaults under other agreements evidencing indebtedness over a certain threshold, failure to comply with covenants or other obligations, material misrepresentations, events which have a material adverse effect on us, certain bankruptcy events, a cessation of business and the loss of control over any guarantor or Abengoa Solar except in compliance with the 2012 Forward Start Facility Agreement. The occurrence of an event of default could result in the acceleration of payment obligations under the 2012 Forward Start Facility Agreement.

Bilateral Facilities Loan with Official Credit Institute 2007 due July 2016

Overview

On July 18, 2007, we entered into a €150.0 million facility agreement (the **"Official Credit Institute Loan"**) with the Instituto de Crédito Oficial (a Spanish government-owned entity) which was amended and restated on July 11, 2012. Repayment of principal under the loan shall be made on July 18, 2016. The Official Credit Institute Loan is governed by Spanish law. As of June 30, 2014, €150 million were outstanding under the Official Credit Institute Loan.

Purpose

All funds drawn down under the Official Credit Institute Loan must be used for financing our plan of international expansion.

Borrowers

Abengoa is the original borrower under the Official Credit Institute Loan.

Guarantees

The guarantors are the same as those in the 2012 Forward Start Facility Agreement.

Guarantor Coverage Test

The guarantor coverage test is substantially similar to the provision contained in the 2012 Forward Start Facility Agreement.

Security

The obligations under the Official Credit Institute Loan are not secured.

Amount and Repayment of Borrowings

The principal drawn down under the Official Credit Institute Loan is repayable in successive installments on the dates and in the amounts below:

- July 18, 2014: €50 million, which amount was duly repaid as of that date;
- July 18, 2015: €50 million; and
- July 18, 2016: €50 million.

We are obligated to prepay the facility with the proceeds obtained from any initial public offering of the shares of Befesa Medio Ambiente, S.L., Abengoa Bioenergía, S.A. and/or Abengoa Solar, S.A. held by us directly or indirectly so that the Leverage Ratio (as defined in the Official Credit Institute Loan) calculated pro forma on the basis of the last audited consolidated financial statements available is equal to or below 2.0 at the end of the period referred to by such audited consolidated financial statements. In the event of sale of assets corresponding to Discontinued Activities (as defined therein), 30% of the net cash proceeds must be put towards mandatory prepayment of the Official Credit Institute Loan. In the event of sale of a participation in the share capital of certain Group companies (excluding any public offering of the shares of Befesa Medio Ambiente, S.L., Abengoa Bioenergía, S.A. and/or Abengoa Solar, S.A.), 30% of the net cash proceeds that exceeds the nominal amount of such share capital and the proportional debt of the relevant sold company will be put towards mandatory prepayment. In the event of sale of other assets exceeding € 10 million, 30% of net cash proceeds that exceeds the book value of such assets, once discounted for their replacement value, as applicable, must be put towards mandatory prepayment. In each case, provided however, the amounts put towards mandatory prepayment shall not exceed €33,75 million per fiscal year and/or transaction related to the same business of the Group within 12 months, or €150 million for the life of the Official Credit Institute Loan.

This obligatory early repayment shall not exceed €100 million with respect to the proceeds of such sale of shares in Befesa, €50 million with respect to the proceeds of such sale of shares in Abengoa Bioenergía and €100 million with respect to the proceeds of such sale of shares in Abengoa Solar. Such obligatory early repayment is limited to the principal amount pending repayment at the date of the repayment.

The interest under the Official Credit Institute Loan must be paid at the end of each successive Interest Period (as defined in the Official Credit Institute Loan), which must be of one, three or six months, as selected by us at the time of drawdown.

All amounts outstanding under the Official Credit Institute Loan must be repaid in full on July 18, 2016.

Interest Rates and Fees

The annual interest rate on borrowings is calculated based on EURIBOR, plus a margin. The margin is currently 4.75%.

Any unpaid due amounts drawn down under the Official Credit Institute Loan will accrue default interest equal to the application of the applicable interest rate indicated above, calculated based on EURIBOR for one-month deposits (as calculated in the Official Credit Institute Loan) and increased by 2%. Due and unpaid interest will be capitalized, the foregoing default interest rate being therefore applicable to such amount once capitalized.

Covenants

We are subject to compliance with a financial covenant. Our Net Debt to Consolidated EBITDA Ratio (as defined in the Official Credit Institute Loan) should be lower than 3.00 to 1.00 until December 30, 2014, following which the ratio should be lower than 2.50 to 1.00.

Subject in each case to certain exceptions, the Official Credit Institute Loan contains negative covenants and restrictions, including among others: restrictions on the granting of security, on the provision of loans and guarantees on the disposal of assets, on a change of business and on the incurrence of certain type of debt by certain subsidiaries. Furthermore, subject to certain exceptions, we must not sell or dispose of significant stakes of the share capital of our subsidiaries and must retain directly or indirectly at least 50% of the share capital of Befesa Medio Ambiente, S.L, Abengoa Bioenergía, S.A., and Abengoa Solar. Consequently, the Befesa Sale required the consent of the lenders and such consent was obtained. Non-recourse subsidiaries are not subject to certain of the negative covenants. The Credit Facility Agreement also contains other affirmative covenants such as for the mandatory periodic reporting of financial and other information and for notification upon the occurrence of any event of default.

Change of Control

The change of control provision is substantially similar to the provision contained in the 2010 Forward Start Facility Agreement.

Events of Default

The events of default are substantially similar to the provision contained in the 2010 Forward Start Facility Agreement.

Bilateral Facilities Loan with the European Investment Bank (R&D&i) 2007 due August 2014

Overview

On July 20, 2007, we entered into a credit facility agreement (the “**EIB R&D&i 2007 Credit Facility**”) with the European Investment Bank for an amount of €49 million which was deposited in Abengoa’s bank account on August 3, 2007. The commitments under the EIB R&D&i 2007 Credit Facility mature on August 3, 2014. The EIB R&D&i 2007 Credit Facility is governed by Spanish law. As of June 30, 2014, €49 million were outstanding under the EIB R&D&i 2007 Credit Facility.

Purpose

All funds drawn down under the EIB R&D&i 2007 Credit Facility are required to be used exclusively for financing an investment program in the R&D&i field of our main business areas.

Borrowers

The original borrower under the EIB R&D&i 2007 Credit Facility is the Company.

Guarantees

The guarantors are Abeinsa Ingeniería y Construcción Industrial S.A., Abencor Suministros S.A., Abener Energía S.A., Abengoa Bioenergía S.A., Abengoa Bioenergy Company, LLC, Abengoa México S.A., Abentel Telecomunicaciones S.A., ASA Investment Brasil Ltda., ASA Desulfuración S.A., Ecoagrícola S.A., Instalaciones Inabensa S.A., Negocios Industriales y Comerciales S.A., Abeinsa Infraestructuras Medio Ambiente S.A., Bioetanol Galicia S.A., Abengoa Bioenergy New Technologies, LLC, Abengoa Bioenergy of Nebraska LLC, Teyma Gestión de Contratos de Construcción e Ingeniería S.A., Inabensa Río Ltda, Teyma Internacional S.A., Nicsamex S.A., Abentey Gerenciamiento de Proyectos de Engenharia e Construções Ltda, Abengoa Bioenergy Trading Europe B.V., Abengoa Concessões Brasil Holding, Teyma USA & Abener Engineering and Construction Services General Partnership, Europea de Construcciones Metálicas S.A., Construcciones Metálicas Mexicanas Comemsa S.A., Abengoa Solar España S.A., Abengoa Water S.L., Siema Technologies S.L, Abener Teyma Hugoton General Partnership, Abener Teyma Mojave General Partnership, Abengoa Solar New Technologies, S.A., Centro Morelos 264, S.A. de C.V., Teyma Uruguay ZF S.A., Abengoa Construção Brasil LTDA, Abeima Teyma Zapotillo S. de R.L. de C.V., Abengoa Concessions Investments Limited, Abeinsa Asset Management S.L. and Abengoa Concessions S.L.

Guarantor Coverage Test

The guarantor coverage test is substantially similar to the provision contained in the 2010 Forward Start Facility Agreement.

Security

The obligations under the EIB R&D&i 2007 Credit Facility are not secured.

Amount and Repayment of Borrowings

Subject to a required prepayment, the principal drawn down under the EIB R&D&i 2007 Credit Facility is repayable in a single installment on August 3, 2014, and was timely repaid.

We are obligated to prepay the facility with the proceeds obtained from any initial public offering of the shares of Befesa Medio Ambiente, S.L. and/or Abengoa Bioenergía, S.A. held by Abengoa directly or indirectly so that the Leverage Ratio (as defined in the EIB R&D&i 2007 Credit Facility) calculated pro forma on the basis of the last audited consolidated financial statements available is equal to or below 2.0 at the end of the period referred to by such audited consolidated financial statements. Other instances in which the European Investment Bank may trigger mandatory early repayments are (i) when the cost of the Project is reduced to an amount which causes the Financing (as defined in the EIB R&D&i 2007 Credit Facility) of the European Investment Bank to account for more than 75% of the total cost of the Project (as defined in the EIB R&D&i 2007 Credit Facility); (ii) upon a change of control (see *infra* Change of Control section) of Abengoa; or (iii) upon a partial or total early repayment by us of a Syndicated Loan (as defined in the EIB R&D&i 2007 Credit Facility) or any other debt incurred by us having a maturity date longer than one year under the terms and conditions and subject to the exceptions set out in the EIB R&D&i 2007 Credit Facility.

The interest payable under the EIB R&D&i 2007 Credit Facility shall be paid each successive Interest Period (as defined in the EIB R&D&i 2007 Credit Facility), namely on February 3, May 3, August 3 and November 3 of each year.

Interest Rates and Fees

The annual interest rate on borrowings is calculated based on EURIBOR for three month deposits (as calculated in the EIB R&D&i 2007 Credit Facility), plus a margin. The margin for the first drawdown of funds made by us was set at 0.60%. The margin may be increased up to 0.85% on the basis of our Leverage Ratio (as defined in the EIB R&D&i 2007 Credit Facility).

Any unpaid due amounts drawn down under the EIB R&D&i 2007 Credit Facility will accrue default interest equal to the highest of the following: (i) EURIBOR for one-month deposits (as calculated in the EIB R&D&i 2007 Credit Facility) plus 2%; or (ii) the interest rate resulting from the foregoing paragraph plus 0.25%. Due and unpaid interest will be capitalized, the foregoing default interest rate being therefore applicable to such amount once capitalized.

Covenants

Abengoa is subject to compliance with a financial covenant. As of the end of each annual and semi-annual Consolidated Financial Statement period, the Debt Ratio (as defined in the EIB R&D&i 2007 Credit Facility) of Abengoa should be equal to or less than 3.00.

Subject in each case to certain exceptions, the EIB R&D&i 2007 Credit Facility contains negative covenants and restrictions, including among others: restrictions on the granting of security on the provision of loans and guarantees, on the disposal of assets, on a change of business and on the incurrence of certain types of debt by certain subsidiaries. Furthermore, we must retain directly or indirectly at least 50% of the share capital of Befesa Medio Ambiente, S.L, Abengoa Bioenergía, S.A. and the other guarantors. Consequently, the Befesa Sale required the consent from the European Investment Bank and such consent was obtained. Non-recourse subsidiaries are not subject to certain of the negative covenants. The EIB R&D&i 2007 Credit Facility also contains other affirmative covenants such as the execution of the Project as described in the EIB R&D&i 2007 Credit Facility, the maintenance of the installations and materials of the Project, the exploitation of the Project, mandatory periodic reporting of financial and other information or the notification upon the occurrence of any event of default.

Change of Control

The change of control provision is substantially similar to the provision contained in the 2010 Forward Start Facility Agreement.

Events of Default

The events of default are substantially similar to the provision contained in the 2010 Forward Start Facility Agreement.

Loan with the European Investment Bank, October 1, 2007

Overview

On October 1, 2007, we entered into a credit facility agreement (the “**EIB 2007 Credit Facility Agreement**”) with the European Investment Bank for an amount of €60 million of borrowing availability which we received on October 8, 2007. The commitments under the EIB 2007 Credit Facility Agreement mature on August 3, 2014. The EIB 2007 Credit Facility Agreement is governed by Spanish law. As of June 30, 2014, €60 million were outstanding under the EIB 2007 Credit Facility Agreement and a total of €109 million was outstanding between the EIB R&D&i 2007 Credit Facility and the EIB 2007 Credit Facility Agreement.

Purpose

All funds drawn down under the EIB 2007 Credit Facility Agreement are required to be used exclusively for financing an investment program in the R&D&i field of our main business areas.

Borrowers

Abengoa is the original borrower under the EIB 2007 Credit Facility Agreement.

Guarantees

On October 1, 2007, pursuant to the EIB 2007 Credit Facility Agreement, the Instituto de Crédito Oficial, Caja de Ahorros y Pensiones de Barcelona, and Caja de Ahorros del Mediterráneo (the "Guarantors") and the European Investment Bank, entered into a personal guarantee agreement (the "Bank Guarantee Agreement") whereby the Instituto de Crédito Oficial and Caja de Ahorros y Pensiones de Barcelona committed each to guarantee 33.3333333333% of our monetary obligations vis-à-vis the European Investment Bank under the Credit Facility Agreement, while Caja de Ahorro del Mediterráneo committed to guarantee 33.333333334%. The Bank Guarantee Agreement is governed by Spanish law.

On October 1, 2007, we (as "**Counter Guarantor**") and the same guarantors as those in the 2012 Forward Start Facility Agreement guaranteed the Guarantors.

Covenants and events of Guarantors release under the Counter-guarantee Agreement are substantially similar to the provisions contained under 2010 Forward Start Facility Agreement.

Guarantor Coverage Test

The guarantor coverage test is substantially similar to the provision contained in the 2010 Forward Start Facility Agreement.

Security

In the event that we or the Joint and Several Guarantors breach the Counter Guarantee Agreement or diminish the solvency on the basis of which the Guarantors entered into such Agreement, the Counter Guarantee Agreement provides for the constitution of pledges over (i) listed securities, securing the maximum amount of principal guaranteed by the Guarantors under the Bank Guarantee Agreement; or (ii) credit rights of the Counter Guarantor (i.e., Abengoa) over a cash deposit in a bank to be determined by the Guarantors in an amount equal to the one determined in the Bank Guarantee Agreement. The following, inter alia, are considered breaches of the Counter Guarantee Agreement or as an event of diminution of our solvency and/or the Joint and Several Guarantors: failure to make any payment under the Counter Guarantee Agreement; breach of the Net Debt to Consolidated EBITDA ratio (as defined in the Counter Guarantee Agreement); and certain bankruptcy events or cross defaults resulting in early repayments equal to or over €3 million in total.

Amount and Repayment of Borrowings

Subject to a required prepayment, the principal drawn down under the EIB 2007 Credit Facility Agreement is repayable in a single installment on August 3, 2014, and was timely repaid.

We are obligated to make an early repayment, inter alia, if the cost of the R&D&i program (the "**Project**") is reduced to an amount which causes the Financing (each as defined in the EIB 2007 Credit Facility Agreement) of the European Investment Bank to account for more than 75% of the total cost of the Project, upon a change of control of Abengoa (see infra Change of Control section), or if certain conditions or circumstances affect the Guarantors (for example, if the Guarantors cease being an accepted guarantor

under the EIB 2007 Credit Facility Agreement or if they breach their obligations with the European Investment Bank under the Bank Guarantee Agreement).

The interest payable under the EIB 2007 Credit Facility Agreement shall be paid during each successive Interest Period (as defined in the EIB 2007 Credit Facility Agreement), namely on February 3, May 3, August 3 and November 3 of each year.

Interest Rates and Fees

The annual interest rate on borrowings is calculated based on EURIBOR for three month deposits (as calculated in the EIB 2007 Credit Facility Agreement), plus a 0.043% margin.

Covenants

Under the Counter Guarantee Agreement, as of the end of each annual and semi-annual Consolidated Financial Statement period, our Net Debt to Consolidated EBITDA ratio (as defined in the Counter Guarantee Agreement) must be equal to or below 3.50.

Subject in each case to certain exceptions, the EIB 2007 Credit Facility Agreement contains negative covenants and restrictions, including among others: restrictions on the granting of security, on the provision of loans and guarantees, on the disposal of assets, on a change of business and on the incurrence of certain type of debt by certain subsidiaries. Furthermore, we must retain directly or indirectly at least 50% of the share capital of Befesa Medio Ambiente, S.L. and Abengoa Bioenergía, S.A. Consequently, the Befesa Sale required the consent of the European Investment Bank and such consent was obtained. Non-recourse subsidiaries are not subject to certain of the negative covenants. The EIB 2007 Credit Facility Agreement also contains affirmative covenants, such as the execution of the Project as described in the EIB 2007 Credit Facility Agreement, the maintenance of the installations and materials of the Project, the exploitation of the Project, mandatory periodic reporting of financial and other information and the notification upon the occurrence of any event of default.

Change of Control

The change of control provision is substantially similar to the provision contained in the 2010 Forward Start Facility Agreement.

Events of Default

The events of default are substantially similar to the provision contained in the 2010 Forward Start Facility Agreement.

Swedish Export Buyer Credit Agreement

Overview

On March 2, 2010, Instalaciones Inabensa, S.A. entered into a Swedish export buyer credit agreement (the "**Swedish Credit Agreement**") with a group of lenders. The Swedish Credit Agreement provides, among other things, for borrowings of up to €247,730,631. The commitments under the Swedish Credit Agreement mature on October 31, 2020. On December 10, 2010, the Swedish Credit Agreement was increased in the amount of €128,759,382. The Swedish Credit Agreement is governed by Swedish law. As of June 30, 2014, €269.2 million was outstanding under the Swedish Credit Agreement.

Purpose

All amounts borrowed by Instalaciones Inabensa, S.A. under the Swedish Credit Facility Agreement shall be applied to finance 100% of the EKN Premium (as defined in the Swedish Credit Facility Agreement) up to a

maximum of €13,030,631, 100% of the costs of Eligible Goods and Services, as defined in the Swedish Credit Agreement, consisting primarily of rectifier and inverter stations up to a maximum aggregate amount of €222.7 million and 100% of the interest incurred under the Swedish Credit Agreement up to a maximum of €12 million.

Borrower

The original borrower under the Swedish Credit Agreement is Instalaciones Inabensa, S.A.

Guarantee

The Swedish Credit Agreement is guaranteed on a senior basis by Abengoa.

Security

The obligations under the Swedish Credit Agreement are not secured.

Amount and Repayment of Borrowings

The borrower shall repay the loans made to it under the Swedish Credit Agreement in seventeen equal semi-annual installments. Any amount outstanding on October 31, 2020 shall be repaid in full on that date.

Interest Rates and Fees

The annual interest rate on borrowings is EURIBOR plus a margin. The annual interest rate on borrowings is calculated based on EURIBOR, plus a margin. The all-in cost is EURIBOR plus 2.85%. Interest payments on each loan made under the Swedish Credit Agreement shall be made on the last day of the six-month period following the utilization date for that loan and every other successive interest period for that loan shall have a six month duration.

Covenants

Availability of amounts under the Swedish Credit Agreement is subject to compliance with a financial covenant. As of the end of each financial year, the Debt Ratio (as such term is defined in the Swedish Credit Agreement) should not exceed 3.00. Net Financial Debt and EBITDA (which are components of the Debt Ratio) shall be calculated and interpreted on a consolidated basis in accordance with the GAAP applicable to our audited consolidated financial statements which shall be expressed in euros.

Subject in each case to certain exceptions, the Swedish Credit Agreement also contains negative covenants and restrictions, including, among other things, restrictions on the granting of security, restrictions on the provision of loans and guarantees, restrictions on the disposal of assets and restrictions on a change of business. The Swedish Credit Agreement also contains affirmative covenants such as for the mandatory periodic reporting of financial and other information and for notification upon the occurrence of any default and certain other events.

Change of Control

The Guarantor may not sell, lease, transfer or otherwise dispose of any shares or capital shares representing the capital or the Borrower unless such disposition does not result in a Change of Control (as defined in the Swedish Credit Agreement). Any disposal by means of granting security, granting an option or similar arrangements which may if realized and/or exercised result in a Change of Control shall not be permitted.

Events of Default

The Swedish Credit Agreement contains provisions governing certain events of default, including a failure to make payment of the amounts due, defaults under other agreements evidencing indebtedness over a certain threshold, failure to comply with covenants or other obligations, material misrepresentations, events which have a material adverse effect on us, certain bankruptcy events, a cessation of business and the loss of control over any Guarantor except in compliance with the Swedish Credit Agreement. The occurrence of an event of default could result in the acceleration of payment obligations under the Swedish Credit Agreement.

Second Swedish Credit Agreement

Overview

On August 11, 2010, our subsidiary Abener Energía S.A. entered into a Second Swedish Credit Agreement (the "**Second Swedish Credit Agreement**") which was amended on October 19, 2010, May 4, 2011 and January 25, 2012. The Facility Framework Agreement provides, among other things, for borrowings of up to €299,253,894. Sixteen individual loan agreements have been borrowed under the Second Swedish Credit Agreement amounting to €269,365,984 maturing between 2018 and 2022. The Second Swedish Credit Agreement is governed by English law. As of June 30, 2014 €177.3 million was outstanding under the Second Swedish Credit Agreement.

Purpose

All amounts borrowed by Abener Energía S.A. under the Second Swedish Credit Agreement shall be applied to 100% of the EKN Premium (as defined in the Second Swedish Credit Agreement), 100% of the costs of Eligible Goods and Services (as defined in the Second Swedish Credit Agreement), 100% of the local costs and up to a maximum of 30% of imported costs.

Guarantee

We guarantee the Second Swedish Credit Agreement on a senior basis.

Amount and Repayment of Borrowings

The borrower shall repay the loans made to it under the Second Swedish Credit Agreement in seventeen equal semi-annual installments. Any amount outstanding on the Final Maturity Date (as defined in the Second Swedish Credit Agreement) shall be repaid in full on that date.

Interest Rates and Fees

The annual interest rate on borrowings is calculated based on EURIBOR, plus a margin. The all-in cost is EURIBOR plus 2.85%. Interest payments on each loan made under the Second Swedish Credit Agreement shall be made on the last day of the six month period following the utilization date for that loan and every other successive interest period for that loan shall have six month duration.

Covenants

Availability of amounts under the Second Swedish Credit Agreement is subject to compliance with a financial covenant. The Debt Ratio (as such term is defined in the Second Swedish Credit Agreement) should be equal to or less than 3.00, as of the end of each annual and semi-annual Consolidated Financial Statement period. Net Financial Debt and Consolidated EBITDA shall be calculated and interpreted on a consolidated basis in accordance with the GAAP applicable to our audited consolidated financial statements which shall be expressed in euros.

Subject in each case to certain exceptions, the Second Swedish Credit Agreement also contains negative covenants and restrictions, including, among other things, restrictions on the granting of security, restrictions on the provision of loans and guarantees, restrictions on the disposal of assets and restrictions on a change of business. The Second Swedish Credit Agreement also contains affirmative covenants such as for the mandatory periodic reporting of financial and other information and for notification upon the occurrence of any default and certain other events.

Change of Control

The Guarantor may not sell, lease, transfer or otherwise dispose of any shares or capital shares representing the capital or the Borrower unless such disposition does not result in a Change of Control (as defined in the Second Swedish Credit Agreement). Any disposal by means of granting security, granting an option or similar arrangements which may if realized and/or exercised result in a Change of Control shall not be permitted.

Events of Default

The Second Swedish Credit Agreement contains provisions governing certain events of default, including a failure to make payment of the amounts due, defaults under other agreements evidencing indebtedness over a certain threshold, failure to comply with covenants or other obligations, material misrepresentations, events which have a material adverse effect on us, certain bankruptcy events, a cessation of business and the loss of control over any Guarantor or Abengoa Solar except in compliance with the Second Swedish Credit Agreement. The occurrence of an event of default could result in the acceleration of payment obligations under the Second Swedish Credit Agreement.

Convertible Notes due 2014

Overview

On July 24, 2009, Abengoa issued €200 million aggregate principal amount of 6.875% Senior Unsecured Convertible Notes due 2014 (the "**2014 Convertible Notes**"). Deutsche Bank AG, London Branch acted as fiscal agent and paying, transfer and conversion agent, Deutsche Bank Luxembourg S.A. acted as registrar and Deutsche Bank, S.A.E. acted as commissioner. The 2014 Convertible Notes are governed by English law. The terms and conditions of the 2014 Convertible Notes were amended in December 2012. On January 17, 2013, the Company bought back €99.9 million principal amount of 2014 Convertible Notes, leaving €100.1 million aggregate principal amount outstanding as of June 30, 2014. On July 24, 2014, the remaining 2014 Convertible Notes matured and were cancelled for cash, according to their terms and conditions.

Ranking

The 2014 Convertible Notes are direct, unconditional, unsubordinated and unsecured obligations of the Company ranking *pari passu* and ratably, without any preference among themselves, and equally with all our other existing and future unsecured and unsubordinated indebtedness, but, in the event of winding-up, save for such obligations that may be preferred by provisions of law that are mandatory and of general application.

Guarantees

The obligations under the 2014 Convertible Notes are not guaranteed.

Interest Rates, Payment Dates and Maturity

The 2014 Convertible Notes bear interest at 6.875% per annum. Interest on the 2014 Convertible Notes is payable semi-annually in arrears in equal installments on January 24 and July 24 of each year. The 2014 Convertible Notes will mature on July 24, 2014.

Conversion

The 2014 Convertible Notes are convertible into fully paid Class A shares or Class B shares of Abengoa credited in the number determined by dividing the aggregate nominal amount of the Notes by the applicable conversion price and adjusted upon the occurrence of certain events, including, among others, the change in our share capital or the issuance of certain securities by us. The conversion price was initially set at €21.12 per ordinary share of Abengoa and adjusted upon the occurrence of certain events, including, among others, the change in our share capital or the issuance of certain securities by us. In July 2012, the conversion price was adjusted to €20.84 per ordinary share of the Company following a dividend payment (€0.35 per share) in excess of the dividend threshold permitted without adjustment in the conversion price (€0.21 per share). The conversion price was adjusted to €4.17 per share of Abengoa due to the distribution of Class B shares as approved by the Extraordinary General Shareholders' Meeting of Abengoa held on September 30, 2012. Moreover, the conversion price was adjusted to €3.81 per share of Abengoa as a result of capital increase. The conversion price was further adjusted to €3.74 per ordinary share of the Company after dividend payment approved by General Shareholders' Meeting of Abengoa held on April 7, 2014.

The 2014 Convertible Notes are only convertible during the conversion period beginning on and including September 3, 2009 and ending on and including July 16, 2014, subject to certain adjustments. However, should we redeem the 2014 Convertible Notes, the conversion period will end on the seventh Trading Day (as defined therein) before the date fixed for redemption.

Optional Redemption by Abengoa

We may redeem all the 2014 Convertible Notes in whole, but not in part, at the principal amount, together with accrued and unpaid interest to such date, under the following circumstances:

- if, at any time after August 8, 2012, the value of the principal amount of €50,000 of the 2014 Convertible Notes exceeds €65,000 according to a certain method of valuation described therein; or
- if holders of the 2014 Convertible Notes constituting 85% of the nominal amount of the 2014 Convertible Notes originally issued have been exercised and/or purchased and/or redeemed; or
- at any time between 60 and 150 days after the occurrence of either: (i) a tender offer made in accordance with Spanish law and regulations to all of our shareholders (other than the offeror or persons acting with the offeror) to acquire all or any of our Class A shares or Class B shares where the offeror will obtain control (as defined therein) immediately following the tender offer (the "2014 Convertible Notes Tender Offer Triggering Event"); or (ii) the acquisition of 80% of our voting shares by Inversion Corporativa IC, S.A. and/or any person or persons controlled by Inversión Corporativa IC, S.A.

Optional Redemption by the Noteholders

The holders of the 2014 Convertible Notes will have the right to require Abengoa to redeem the 2014 Convertible Notes upon the occurrence of a 2014 Convertible Notes Tender Offer Triggering Event or if Inversio' n Corporativa IC, S.A. and/or any person or persons controlled by Inversión Corporativa IC, S.A. acquires 80% of our voting shares.

Covenants

We are restricted from taking certain actions while the conversion right attached to the 2014 Convertible Notes remains exercisable, including, among others, the issuance of certain securities, the modification of certain rights attached to our shares, the reduction of our share capital and the creation of certain liens, mortgages, pledges or security interests. We are also obligated to undertake certain actions while the conversion right attached to the 2014 Convertible Notes remains exercisable, including, among others, to reasonably endeavor to have the 2014 Convertible Notes and the shares issued upon conversion of the 2014 Convertible Notes admitted to listing and to trading on the relevant stock exchanges.

Events of Default

The 2014 Convertible Notes contain provisions governing certain events of default, including, among others, failure to make payment of principal, premium or interest on the 2014 Convertible Notes, certain failures to perform or to observe any other obligation under the 2014 Convertible Notes, certain other indebtedness of ours or a Material Subsidiary (as defined therein) becoming due and payable prior to its stated maturity otherwise than at our option or that of a Material Subsidiary, the failure to pay certain indebtedness or judgments and our bankruptcy or insolvency or that of a Material Subsidiary. The occurrence of any of the events of default in the 2014 Convertible Notes would permit the acceleration of all obligations outstanding under the 2014 Convertible Notes.

Convertible Notes due 2017

Overview

On February 3, 2010, the Company issued €250 million aggregate principal amount of 4.5% notes due 2017 (the “**2017 Convertible Notes**”). Deutsche Bank AG, London Branch acted as fiscal agent and principal paying agent and Deutsche Bank, S.A.E. acted as commissioner. The 2017 Convertible Notes are governed by English law. The terms and conditions of the 2017 Convertible Notes were amended in December 2012.

Ranking

The 2017 Convertible Notes are direct, unconditional, unsubordinated and unsecured obligations of the Company ranking pari passu and ratably, without any preference among themselves, and equally with all our other existing and future unsecured and unsubordinated indebtedness, but, in the event of winding-up, save for such obligations that may be preferred by provisions of law that are mandatory and of general application.

Guarantees

The obligations under the 2017 Convertible Notes are not guaranteed.

Interest Rates, Payment Dates and Maturity

The 2017 Convertible Notes bear interest at 4.5% per annum. Interest on the 2017 Convertible Notes is payable semi-annually in arrears in equal installments on February 3 and August 3 of each year, commencing on August 3, 2010. The 2017 Convertible Notes will mature on February 3, 2017.

Conversion

The 2017 Convertible Notes are convertible into fully paid Class A shares or Class B shares of Abengoa credited in the number determined by dividing the aggregate nominal amount of the Notes by the applicable conversion price and adjusted upon the occurrence of certain events, including, among others, the change in our share capital or the issuance of certain securities by us. The conversion price was initially set at €30.27 per ordinary share of Abengoa and adjusted upon the occurrence of certain events, including, among others, the

change in our share capital or the issuance by us of certain securities. In July 2012, the conversion price was adjusted to €29.87 per ordinary share of the Company following a dividend payment (€0.35 per share) in excess of the dividend threshold permitted without adjustment in the conversion price (€0.21 per share). The conversion price was adjusted to €5.97 per share of Abengoa due to the distribution of Class B shares as approved by the Extraordinary General Shareholders' Meeting of Abengoa held on September 30, 2012. Moreover, the conversion price was adjusted to €5.45 per share of Abengoa as a result of a capital increase. The conversion price was further adjusted to €5.35 per ordinary share of the Company after dividend payment approved by General Shareholders' meeting of Abengoa held on April 7, 2014.

The 2017 Convertible Notes are only convertible during the conversion period beginning on and including March 16, 2010 and ending on and including January 23, 2017, subject to certain adjustments. However, should we redeem the 2017 Convertible Notes the conversion period will end on the ninth Trading Day (as defined therein) before the date fixed for redemption.

Optional Redemption by Abengoa

We may redeem all the 2017 Convertible Notes in whole, but not in part, at the principal amount, together with accrued and unpaid interest to such date, in the following circumstances:

- if, at any time after February 24, 2013, the value of the principal amount of €50,000 of the 2017 Convertible Notes exceeds €65,000 according to a certain method of valuation described therein; or
- if, at any time, holders of the 2017 Convertible Notes constituting 85% of the nominal amount of the 2017 Convertible Notes originally issued have been exercised and/or purchased and/or redeemed; or
- at any time between 60 and 150 days after the occurrence of either: (i) a tender offer made in accordance with Spanish law and regulations to our shareholders (other than the offeror or persons acting with the offeror) to acquire all or any of our Class A shares or Class B shares where the offeror will obtain control (as defined therein) of Abengoa immediately following the tender offer (the "**2017 Convertible Notes Tender Offer Triggering Event**"); or (ii) the acquisition of 80% of our voting shares by Inversión Corporativa IC, S.A. and/or any person or persons controlled by Inversión Corporativa IC, S.A.

Optional Redemption by the Noteholders

The holders of the 2017 Convertible Notes will have the right to require us to redeem the 2017 Convertible Notes upon the occurrence of a 2017 Convertible Notes Tender Offer Triggering Event or if Inversión Corporativa IC, S.A. acquires 80% of our voting shares.

On February 3, 2015, holders of the 2017 Convertible Notes will have the right to require Abengoa to redeem the 2017 Convertible Notes at the principal amount together with accrued and unpaid interest to such date.

Covenants

We are restricted from taking certain actions while the conversion right attached to the 2017 Convertible Notes remains exercisable, including, among others, the issuance of certain securities, the modification of certain rights attached to our shares, the reduction of our share capital and the creation of certain liens, mortgages, pledges or security interests.

We are also obligated to undertake certain actions while the conversion right attached to the 2017 Convertible Notes remains exercisable, including, among others, to reasonably endeavor to have the 2017 Convertible Notes and the shares issued upon conversion of the 2017 Convertible Notes admitted to listing and to trading on the relevant stock exchanges.

Events of Default

The 2017 Convertible Notes contain provisions governing certain events of default, including, among others, failure to make payment of principal, premium or interest on the 2017 Convertible Notes, certain failures to perform or to observe any other obligation under the 2017 Convertible Notes, certain other indebtedness of ours or a Material Subsidiary (as defined therein) becoming due and payable prior to its stated maturity otherwise than at our option or that of a Material Subsidiary, the failure to pay certain indebtedness or judgments and our bankruptcy or insolvency or that of a Material Subsidiary. The occurrence of any of the events of default in the 2017 Convertible Notes would permit the acceleration of all obligations outstanding under the 2017 Convertible Notes.

Notes due 2015

Overview

On December 1, 2009, we issued €300 million aggregate principal amount of 9.625% Notes due 2015 (the “**2015 Notes**”). Deutsche Bank AG, London Branch acted as fiscal agent and principal paying agent and Deutsche Bank, S.A.E. acted as commissioner. The 2015 Notes are governed by English law.

Ranking

The 2015 Notes are direct, unconditional, unsubordinated and unsecured obligations ranking at least equally, without any preference among themselves, with all of our other present and future unsecured and unsubordinated obligations, save for such obligations that may be preferred by provisions of law that are mandatory and of general application.

Interest Rates, Payment Dates and Maturity

The 2015 Notes bear interest at 9.625% per annum. Interest on the 2015 Notes is payable semi-annually in arrears in equal installments on June 1 and December 1 of each year. The 2015 Notes will mature on February 25, 2015.

Guarantees

The payment of all sums payable by us under the 2015 Notes are unconditionally and irrevocably guaranteed on a joint and several basis by certain subsidiaries (collectively, the “**2015 Notes Guarantors**”) which are, Abeinsa Ingeniería y Construcción Industrial, S.A., Abencor Suministros, S.A., Abener Energía, S.A., Abengoa Bioenergía, S.A., Abengoa Bioenergy Company, LLC, Abengoa Bioenergy New Technologies, Inc., Abengoa Bioenergy of Nebraska, LLC, Abengoa Bioenergy Trading Europe, B.V., Abengoa Solar, S.A., Abengoa México S.A. de C.V., Abengoa Solar España, S.A., Abentel Telecomunicaciones, S.A., Abentey Gerenciamento de Projectos de Engenharia e Construções, Ltda, ASA Investment Brasil Ltda, Abeinsa Infraestructuras de Medio Ambiente, S.A., ASA Desulfuración, S.A., Bioetanol Galicia, S.A., Construcciones Metálicas Mexicanas COMEMSA, S.A. de C.V., Ecoagrícola S.A., Europea de Construcciones Metálicas, S.A., Inabensa Rio Ltda, Instalaciones Inabensa, S.A., Negocios Industriales y Comerciales, S.A., Nicsamex, S.A. de C.V., Teyma Gestión de Contratos de Construcción e Ingeniería, S.A., Teyma Internacional, S.A., Teyma USA & Abener Engineering and Construction Services General Partnership, Abener Teyma Hugoton General Partnership, Abener Teyma Mojave General Partnership, Abengoa Solar New Technologies, S.A., Centro Morelos 264 S.A. de C.V., Teyma Uruguay ZF S.A., Abengoa Construção Brasil LTDA, Abeima Teyma Zapotillo S. de R.L. de C.V. and Abengoa Concessions Investments Limited. The obligations of each 2015 Notes Guarantor under its guarantee constitute (or will constitute) direct, unconditional, unsubordinated and unsecured obligations of such 2015 Notes Guarantor ranking at least equally with all other present and future unsecured and unsubordinated obligations of such 2015 Notes Guarantor.

If two rating agencies assign the 2015 Notes an Investment Grade Rating, as defined therein (the “**2015 Notes Rating Release Event**”), and no event of default under the 2015 Notes has occurred and is continuing, each of the 2015 Notes Guarantors will be released from its obligations under its guarantee. If certain other events constituting a release event occur with respect to a 2015 Notes Guarantor and no event of default has occurred and is continuing, the relevant 2015 Notes Guarantor will be released from its obligations under its guarantee.

Optional Redemption by the Noteholders

Upon the occurrence of certain Change of Control events (as defined therein), each holder of the 2015 Notes may require us to redeem or purchase the Notes, in whole or in part, at 101% of their principal amount, plus accrued and unpaid interest up to the date of such redemption or purchase.

Covenants

The 2015 Notes contain covenants that, among other things, limit our ability and the ability of certain of our subsidiaries to:

- incur additional indebtedness;
- make restricted payments, including dividends or other distributions;
- create certain liens; and
- sell assets.

These covenants are subject to important exceptions and qualifications. If a Rating Release Event occurs (as defined therein), we and our subsidiaries will be released from their respective obligations under certain of these covenants.

Events of Default

The 2015 Notes contain provisions governing certain events of default, including, among others, failure to make payment of principal, premium or interest on the 2015 Notes, certain failures to perform or to observe any other obligation under the 2015 Notes, certain other indebtedness of ours or a Material Subsidiary (as defined therein) becoming due and payable prior to its stated maturity otherwise than at our option or that of a Material Subsidiary, the failure to pay certain indebtedness or judgments and our bankruptcy or insolvency or that of a Material Subsidiary. The occurrence of any of the events of default in the 2015 Notes would permit the acceleration of all obligations outstanding under the 2015 Notes.

Notes due 2016

Overview

On March 31, 2010, we issued €500 million aggregate principal amount of 8.50% Notes due 2016 (the “**2016 Notes**”). Deutsche Bank AG, London Branch acted as fiscal agent and principal paying agent and Deutsche Bank, S.A.E. acted as commissioner. The 2016 Notes are governed by English law.

Ranking

The 2016 Notes are our direct, unconditional, unsubordinated and unsecured obligations ranking at least equally, without any preference among themselves, with all our other present and future unconditional unsubordinated and unsecured obligations, save for such obligations that may be preferred by provisions of law that are mandatory and of general application.

Interest Rates, Payment Dates and Maturity

The 2016 Notes bear interest at 8.50% per annum. Interest on the 2016 Notes is payable semi-annually in arrears on March 31 and September 30 of each year. The 2016 Notes will mature on March 31, 2016.

Guarantees

The 2016 Notes have the same guarantee provisions as the 2015 Notes.

Optional Redemption by Abengoa

We may redeem the 2016 Notes in whole or in part at any time, at a redemption price equal to the principal amount of such 2016 Notes plus accrued and unpaid interest up to the date for such redemption plus a premium amount equal to the greater of: (i) 1% of the principal amount of such notes; or (ii) the excess, if any, of the present value at such redemption date of the redemption price of such 2016 Notes at March 31, 2016 (excluding accrued but unpaid interest to such redemption date), discounted with the Benchmark Yield (as defined therein) plus 75 basis points, over the principal amount of such 2016 Notes on such redemption date.

In addition, in the event that we become obligated to pay additional amounts (as defined therein) to holders of the 2016 Notes as a result of changes affecting withholding taxes applicable to payments on the 2016 Notes, we may redeem the 2016 Notes in whole but not in part at any time at the principal amount of the 2016 Notes plus accrued interest to the redemption date.

Optional Redemption by the Noteholders

The 2016 Notes have the same optional redemption by the noteholder provision as the 2015 Notes.

Covenants

The 2016 Notes have the same covenants as the 2015 Notes.

Events of Default

The 2016 Notes have the same events of default provisions as the 2015 Notes.

Notes due 2017

Overview

On October 28, 2010, our direct wholly owned subsidiary Abengoa Finance S.A.U. issued \$650 million aggregate principal amount of 8.875% Senior Notes due 2017 (the "**2017 Notes**"). Deutsche Trustee Company Limited acted as trustee and Deutsche Bank Trust Company Americas acted as paying agent, transfer agent and registrar. The 2017 Notes are governed by New York law.

Ranking

The 2017 Notes are senior obligations of Abengoa Finance S.A.U. ranking at least equally, without any preference among themselves, with all the other present and future unsecured and unsubordinated obligations of Abengoa Finance S.A.U., save for such obligations that may be preferred by provisions of law that are mandatory and of general application.

Interest Rates, Payment Dates and Maturity

The 2017 Notes bear interest at 8.875% per annum. Interest on the 2017 Notes is payable semi-annually in arrears on May 1 and November 1 of each year. The 2017 Notes will mature on November 1, 2017.

Guarantees

The 2017 Notes contain the same guarantee provisions, and are guaranteed by the same guarantors, as the 2015 Notes.

Optional Redemption by Abengoa

Abengoa Finance S.A.U. may redeem the 2017 Notes in whole or in part at any time, at a redemption price equal to the principal amount of such 2017 Notes plus accrued and unpaid interest up to the date for such redemption plus a premium amount equal to the greater of: (i) 1% of the principal amount of such notes; or (ii) the excess, if any, of the present value at such redemption date of the redemption price of such 2017 Notes at November 1, 2017 (excluding accrued but unpaid interest to such redemption date), discounted with the Treasury Rate (as defined therein) plus 50 basis points, over the principal amount of such 2017 Notes on such redemption date.

In addition, in the event that Abengoa Finance S.A.U. becomes obligated to pay additional amounts (as defined therein) to holders of the 2017 Notes as a result of changes affecting withholding taxes applicable to payments on the 2017 Notes, Abengoa Finance S.A.U. may redeem the 2017 Notes in whole but not in part at any time at the principal amount of the 2017 Notes plus accrued interest to the redemption date.

Optional Redemption by the Noteholders

The 2017 Notes have the same optional redemption by the noteholder provision as the 2015 Notes.

Covenants

The 2017 Notes contain covenants which are similar to the covenants in the 2015 Notes.

Events of Default

The 2017 Notes have the same events of default provisions as the 2015 Notes.

Convertible Notes due 2019

Overview

On January 17, 2013, the Company issued €400 million aggregate principal amount of 6.25% notes due 2019 (the "**2019 Convertible Notes**"). Deutsche Bank AG, London Branch acted as fiscal agent and principal paying agent and Deutsche Bank, S.A.E. acted as commissioner. The 2019 Convertible Notes are governed by English law.

Ranking

The 2019 Convertible Notes have the same ranking as the 2017 Convertible Notes.

Guarantees

The obligations under the 2019 Convertible Notes are not guaranteed.

Interest Rates, Payment Dates and Maturity

The 2019 Convertible Notes bear interest at 6.25% per annum. Interest on the 2019 Convertible Notes is payable semi-annually in arrears in equal installments on January 17 and July 17 in each year, commencing on July 17, 2013. The 2019 Convertible Notes will mature on January 17, 2019.

Conversion

The 2019 Convertible Notes are convertible into fully paid Class B shares of the Company credited in the number determined by dividing the aggregate nominal amount of the Notes by the applicable conversion price. The conversion price was adjusted to €3.04 per share of Abengoa as a result of a capital increase. The

conversion price was further adjusted to €2.98 per ordinary share of the Company after dividend payment approved by General Shareholders' Meeting of Abengoa held on April 6, 2014.

Optional Redemption by the Issuer

Following the occurrence of a Tender Offer Triggering Event, the holder of each 2019 Convertible Note will have the right to require the Issuer to redeem that 2019 Convertible Note on the Put Date at the Put Price (each as defined in the terms and conditions of the 2019 Convertible Notes), together with accrued interest to (but excluding) the Put Date.

Following the occurrence of a Relevant Person Triggering Event, the holder of each 2019 Convertible Note will have the right to require the Issuer to redeem that 2019 Convertible Note on the Put Date at its principal amount together with accrued interest to (but excluding) the Put Date.

Covenants

The 2019 Convertible Notes have substantially the same covenants as the 2017 Convertible Notes.

Events of Default

The 2019 Convertible Notes have the same events of default provisions as the 2017 Convertible Notes.

Notes due 2018

On February 5, 2013, our direct wholly owned subsidiary Abengoa Finance S.A.U. issued €250 million aggregate principal amount of 8.875% Senior Notes due 2018 (the "**Senior Unsecured Notes due 2018**"). On October 3, 2013 and November 5, 2013, Abengoa Finance S.A.U. issued €250 million and €50 million, respectively, of additional notes (together with the Senior Unsecured Notes due 2013, the "**2018 Notes**"). Deutsche Trustee Company Limited acted as trustee, Deutsche Bank AG, London Branch, acted as paying agent and Deutsche Bank Luxembourg S.A., acted as transfer agent and registrar. The 2018 Notes are governed by New York law.

Ranking

The 2018 Notes are senior obligations of Abengoa Finance S.A.U. ranking at least equally, without any preference among themselves, with all the other present and future unsecured and unsubordinated obligations of Abengoa Finance S.A.U., save for such obligations that may be preferred by provisions of law that are mandatory and of general application.

Interest Rates, Payment Dates and Maturity

The 2018 Notes bear interest at 8.875% per annum. Interest on the 2018 Notes is payable semi-annually in arrears on February 5 and August 5 of each year. The 2018 Notes will mature on February 5, 2018.

Guarantees

The 2018 Notes contain the same guarantee provisions, and are guaranteed by the same guarantors, as the 2015 Notes.

Optional Redemption by Abengoa

Abengoa Finance S.A.U. may redeem all or part of the 2018 Notes at any time at a redemption price equal to 100% of the principal amount of the 2018 Notes redeemed, plus accrued and unpaid interest up to the date for such redemption plus a premium amount equal to the greater of: (i) 1% of the principal amount of such notes; or (ii) the excess, if any, of the present value at such redemption date of the redemption price of

such 2018 Notes at February 5, 2018 (excluding accrued but unpaid interest to such redemption date), discounted with the Bund (as defined therein) plus 50 basis points, over the principal amount of such 2018 Notes on such redemption date.

In addition, in the event that Abengoa Finance S.A.U. becomes obligated to pay additional amounts (as defined therein) to holders of the 2018 Notes as a result of changes affecting withholding taxes applicable to payments on the 2018 Notes, Abengoa Finance S.A.U. may redeem the 2018 Notes in whole but not in part at any time at the principal amount of the 2018 Notes plus accrued interest to the redemption date.

Optional Redemption by the Noteholders

The 2018 Notes have the same optional redemption by the noteholder provision as the 2015 Notes.

Covenants

The 2018 Notes contain covenants which are similar to the covenants in the 2015 Notes.

Events of Default

The 2018 Notes have the same events of default provisions as the 2015 Notes.

Notes due 2020

Overview

On December 13, 2013, our direct wholly owned subsidiary Abengoa Finance S.A.U. issued \$450 million aggregate principal amount of 7.75% Senior Notes due 2020 (the "**Senior Unsecured Notes due 2020**"). Deutsche Trustee Company Limited acted as trustee and Deutsche Bank Trust Company Americas acted as paying agent, transfer agent and registrar. The 2020 Notes are governed by New York law.

Ranking

The 2020 Notes are senior obligations of Abengoa Finance S.A.U. ranking at least equally, without any preference among themselves, with all the other present and future unsecured and unsubordinated obligations of Abengoa Finance S.A.U., save for such obligations that may be preferred by provisions of law that are mandatory and of general application.

Interest Rates, Payment Dates and Maturity

The 2020 Notes bear interest at 7.75% per annum. Interest on the 2020 Notes is payable semi-annually in arrears on August 1 and February 1 of each year. The 2020 Notes will mature on February 1, 2020.

Guarantees

The 2020 Notes contain the same guarantee provisions, and are guaranteed by the same guarantors, as the 2015 Notes.

Optional Redemption by Abengoa

Abengoa Finance S.A.U. may redeem the 2020 Notes in whole or in part at any time, at a redemption price equal to the principal amount of such 2020 Notes plus accrued and unpaid interest up to the date for such redemption plus a premium amount equal to the greater of: (i) 1% of the principal amount of such notes; or (ii) the excess, if any, of the present value at such redemption date of the redemption price of such 2020 Notes at February 1, 2020 (excluding accrued but unpaid interest to such redemption date), discounted with the Bund rate (as defined therein) plus 50 basis points, over the principal amount of such 2020 Notes on such redemption date.

In addition, in the event that Abengoa Finance S.A.U. becomes obligated to pay additional amounts (as defined therein) to holders of the 2020 Notes as a result of changes affecting withholding taxes applicable to payments on the 2020 Notes, Abengoa Finance S.A.U. may redeem the 2020 Notes in whole but not in part at any time at the principal amount of the 2020 Notes plus accrued interest to the redemption date.

Optional Redemption by the Noteholders

The 2020 Notes have the same optional redemption by the noteholder provision as the 2015 Notes.

Covenants

The 2020 Notes contain covenants which are similar to the covenants in the 2015 Notes.

Events of Default

The 2020 Notes have the same events of default provisions as the 2015 Notes.

Notes due 2021

Overview

On March 21, 2014, our direct wholly owned subsidiary Abengoa Finance S.A.U. issued €500 million aggregate principal amount of 6.00% Senior Notes due 2021. Deutsche Trustee Company Limited acted as trustee, Deutsche Bank AG, London Branch acted as paying agent and Deutsche Bank Luxembourg S.A. acted as listing agent, transfer agent and registrar. The 2021 Notes are governed by New York law. The Parent Guarantor expects to apply the net proceeds of the 2021 Notes to repay the outstanding €300 million principal amount of the 2015 Notes by their February 25, 2015 maturity date, with the balance of net proceeds of the 2021 Notes being used to prepay a portion of the 2012 Forward Start Facility by September 30, 2014.

Ranking

The 2021 Notes are senior obligations of Abengoa Finance S.A.U. ranking at least equally, without any preference among themselves, with all the other present and future unsecured and unsubordinated obligations of Abengoa Finance S.A.U., save for such obligations that may be preferred by provisions of law that are mandatory and of general application.

Interest Rates, Payment Dates and Maturity

The 2021 Notes bear interest at 6.00% per annum. Interest on the 2021 Notes is payable semi-annually in arrears on March 15 and September 15 of each year. The 2021 Notes will mature on March 31, 2021.

Guarantees

The 2021 Notes contain the same guarantee provisions, and are guaranteed by the same guarantors, as the 2015 Notes.

Optional Redemption by Abengoa

Abengoa Finance S.A.U. may redeem the 2021 Notes in whole or in part at any time, at a redemption price equal to the principal amount of such 2021 Notes plus accrued and unpaid interest up to the date for such redemption plus a premium amount equal to the greater of: (i) 1% of the principal amount of such notes; and (ii) the present value at such redemption date of: (x) 100% of the aggregate principal amount of such Note to be redeemed; plus (y) all required interest payments that would otherwise be due to be paid on such Note through March 31, 2021 (excluding accrued but unpaid interest to the redemption date),

computed using a discount rate equal to the Bund Rate at such redemption date plus 50 basis points; over (ii) the outstanding principal amount of the Note.

In addition, in the event that Abengoa Finance S.A.U. becomes obligated to pay additional amounts (as defined therein) to holders of the 2021 Notes as a result of changes affecting withholding taxes applicable to payments on the 2021 Notes, Abengoa Finance S.A.U. may redeem the 2021 Notes in whole but not in part at any time at the principal amount of the 2021 Notes plus accrued interest to the redemption date.

Optional Redemption by the Noteholders

The 2021 Notes have the same optional redemption by the noteholder provision as the 2015 Notes.

Covenants

The 2021 Notes contain covenants which are similar to the covenants in the 2015 Notes.

Events of Default

The 2021 Notes have the same events of default provisions as the 2015 Notes.

Repayment Schedule

The repayment schedule of our corporate debt with respect to the bank finance portion thereof, as of June 30, 2014, is as follows:

	One Year or Less	Between July 2015 and December 2015	2016	2017	2018	2019	Subsequent
	(€ in millions)						
2012 Forward Start Facility	208.7 ⁽¹⁾		505.1	681.0			
Loan with Official Credit Institute	51.4 ⁽²⁾	49.9	50.0				
Loan with the European Investment Bank (R&D&i)	109.1 ⁽³⁾						
Abener Energía, S.A. Financing	100.8	31.0	48.7	36.9	49.5	30.1	54.9
Instalaciones Inabensa, S.A. Financing . . .	67.5	26.1	69.8	57.7	51.6	37.2	5.7
Other loans	118.1	67.8	24.5	23.6	25.6	10.2	38.0
Total	655.6	674.8	698.1	799.2	126.7	77.5	98.6

(1) This amount has been repaid as of the date of this Listing Memorandum.

(2) The first maturity of this loan was repaid in July, 2014.

(3) This installment was repaid in August, 2014.

The repayment schedule of our corporate debt with respect to the capital markets portion thereof, as of June 30, 2014, is as follows:

	One Year or Less	Between July 2015 and December 2014	2016	2017	2018	2019	Subsequent
	(€ in millions)						
2014 Convertible Notes ⁽¹⁾	100.1						
2017 Convertible Notes				250.0			
2019 Convertible Notes						400.0	
2015 Notes ⁽²⁾	300.0						
2016 Notes			500.0				
2017 Notes				476.1			
2018 Notes					550.0		
2020 Notes							329.6
2021 Notes							500.0
Euro Program (ECP)	535.5						
Total	935.6		500.0	726.1	550.0	400.0	829.6

(1) On July 24, 2014, the 2014 Convertible Notes matured and were cancelled for cash, according to their terms and conditions.

(2) The 2015 Notes have been earmarked for repayment on maturity with proceeds already raised in the capital markets.

The debt referenced in the table above is subject to fixed and floating interest rate payments, as described in the facilities or instruments thereto.

At the corporate level we also incur purchase obligations for the purchase of goods or services that are enforceable and legally binding on us. These contractual commitments specify all significant terms, including fixed or minimum quantities to be purchased, fixed, minimum or variable price provisions and the appropriate timing of the transactions.

Non-Recourse Debt

Compared to corporate debt, non-recourse debt has certain key advantages, including a clearly defined risk profile, lower funding costs, generally longer terms and its ability to enable higher leverage on a project company basis.

We incur Non-Recourse Debt either through special-purpose project companies that are established to finance multiple projects or businesses and in certain instances, special-purpose project companies established for a single project. In each case, the project company enters into the financing agreement directly with the relevant lender for a specific project. The basis of the financing agreement between the project company and lender details the allocation of the cash flows generated by the project and the amortization schedule of payments owed under the financing agreement. Under such arrangements, any claims against the assets of the project company are subordinated to those of the lender or lenders, if multiple projects have been financed through the project company, until the financing is repaid in full, but the lender or lenders only have recourse to the project company's assets and not to the shareholder of the project company or the sponsor of the project. Consequently, the cross-default provisions of Abengoa's borrowings do not apply to defaults of project companies, thus safeguarding the non-recourse nature of the project financings. We also incur non-recourse debt as corporate debt of a subsidiary of Abengoa, S.A. under which the holders of such debt do not have recourse to Abengoa, S.A. or any of its other subsidiaries.

Our Non-Recourse Debt contains customary financial covenants, including maintaining or exceeding certain financial ratios, and limitations on capital expenditures and additional debt. Non-Recourse Debt also includes certain obligations guaranteed by the Parent Guarantor and/or Restricted Subsidiaries in favor of our

Unrestricted Subsidiaries and categorized as non-recourse finance in process, whereby the Parent Guarantor and/or Restricted Subsidiaries guarantee obligations in order to act as sponsors for the period prior to such project companies securing long-term project financing. Non-recourse finance in process will typically relate to bank financing arrangements, but may also include capital markets debt (such as the Notes and Guarantees, which the Parent Guarantor does not intend to classify as Non-Recourse Debt on issuance but which the Parent Guarantor may reclassify in the future) if such indebtedness is, or is expected to be, recorded as “non-recourse financing” in the Parent Guarantor’s consolidated annual accounts. Non-recourse finance in process is used for projects which are earmarked to be future development projects intended to be eventually financed through non-recourse project finance schemes. Such funding typically relates to transitional financing phases of a project (typically periods of less than 2-3 years) during the launch and construction phase of goods/projects, which once completed and ready for operation, become financed under the non-recourse project finance model. However, if during the transitory period there is a risk of non-compliance with the debt repayment schedule necessary for the formalization of project finance (or of construction, which will ultimately require financing) such financing would be reclassified on the consolidated statement of financial position as a type of recourse financing, depending upon the nature of the arrangements, typically being loans with financial entities. In these situations the Parent Guarantor and/or Restricted Subsidiaries do, however, provide, from time to time, guarantees of obligations whereby the Parent Guarantor and/or Restricted Subsidiaries act as sponsors for the period prior to such project companies securing long-term project financing for their projects. As of June 30, 2014 we had €766.3 million of borrowings classified as non-recourse finance in process. Out of the €766.3 million, €485.4 million was guaranteed by the Parent Guarantor and/or Subsidiary Guarantors; €190.9 million was guaranteed by the Parent Guarantor and one or more Restricted Subsidiaries that are not Subsidiary Guarantors; and €90.0 million was guaranteed by Restricted Subsidiaries that are not Subsidiary Guarantors.

Our activities, in particular our Engineering and Construction activity, regularly operate as contractors or service providers to the project company to either construct or maintain the project for third-party owner or sponsor of the project and may also undertake certain obligations for the project company. Although we are usually required to provide credit and other support to the project company in relation to its trading activities (by way of performance bonds, guarantees or other commitments), we do not provide, with certain limited exceptions, any credit support for the repayment of the project company’s debt obligations. We have, from time to time, provided guarantees of obligations of certain project companies incurred under working capital facilities of such project companies, other contingent obligations, and letters of credit or guarantees replacing amounts withdrawn by us from debt service reserve accounts held by project companies. These guarantees, letters of credit and other contingent liabilities have been incurred from time to time for reasons relating to the unique circumstances of the relevant project company or the history of its acquisition or development.

The below table shows our non-recourse debt as of June 30, 2014. Non-recourse debt of projects under construction which were deconsolidated upon the application of IFRS 10 until their entry into operation is not included below. See “*Management’s Discussion and Analysis of Financial Condition and Results of Operations—Factors Affecting the Comparability of Our Results of Operations—IFRS 10 and 11.*”

Research and Development

R&D&i involves activities which continuously improve our processes and products, but also generating new future options with breakthrough technologies. R&D&i is undertaken by our activities in furtherance of the demands of our respective markets to provide the necessary competitive capacities for us on an ongoing basis. The goal of our R&D&i program is to provide innovative solutions for sustainability, create value over the long-term and continue to provide us with a competitive edge by focusing on reducing costs in our current technologies.

We have continued to increase our efforts in R&D&i (despite the prolonging of the global financial crisis during this period), based on our strong belief that to improve current results and achieve real future benefits, such investment requires continuous input which should not be adversely affected by economic cycles.

We have strengthened our presence, and in certain cases, our technological leadership, in various institutions, public forums and private forums in which cooperation is encouraged among large technology companies, and where the short- and long-term future of R&D&i is decided.

We have undertaken R&D&i in accordance with the requirements identified for our markets. The majority of our projects are aligned with the research and development objectives of the public administrations of Spain (the Ministry of Industry and Energy), of Europe (under research and development framework programs) and of the United States (the DOE).

We collaborate with some of the most reputable research centers in the world, such as the National Renewable Energy Laboratory in the United States, *Deutsche Zentrum für Luft und Raumfahrt* in Germany and *Centro de Investigaciones Energéticas, Medioambientales y Tecnológicas* in Spain. In addition, we have received substantial economic support from government entities such as the DOE and the European Union.

During this period, we have made strategic investments in pioneering companies in the United States and Canada, developing and owning technologies which are defined as “high priority,” such as new CSP plants, second generation biofuels, biorefineries and water treatment technologies, with the objective of enabling internationalization and the generation of value through these technologies in key emerging markets.

In the years ended December 31, 2013, 2012 and 2011, our investment in R&D&i totaled €107.4 million, €91 million and €91.0 million, respectively, including investments in our recycling segment sold in June 2013. Of our investment in R&D&i, amounts expensed represented €6.5 million, €6.4 million and €26 million, respectively and amounts capitalized represented €101 million, €84 million, €62 million, respectively. Taking into account the investment in Khi Solar One, Hugoton, the waste-to-biofuels demonstration plant and the

rest of our activities expensed or capitalized, total investment in R&D during 2013 amounted to €426.4 million. As of December 31, 2013, we have approximately 800 people engaged in R&D&i activities in different centers, mainly in Seville (Spain), Madrid (Spain), St. Louis, Missouri (United States) and Denver, Colorado (United States) and Montevideo (Uruguay).

In solar-thermal technology, construction has begun on Khi Solar One, the world's first commercial plant using tower technology and superheated steam, in South Africa. The 50 MW plant is expected to come into operation at the end of 2014. In the area of biofuels, we have continued to construct the commercial bio-refinery plant in Hugoton, which will come into operation in the third quarter of 2014. The technology used in this plant has been developed and proven by us over the last ten years at our second-generation demonstration plant in Salamanca, Spain. A waste-to-biofuels demonstration plant has also been operated at the same complex, which is capable of obtaining second-generation biofuels from recovered municipal solid waste. In addition to this progress, we continue to develop various processes to obtain high value-added bio-products from biomass, such as a catalyst that has been patented that enables biobutanol to be produced from ethanol using a catalytic process. This technology offers us an additional advantage since it can be applied at our existing conventional biofuels facilities.

Abengoa Research

Abengoa Research, created in February 2011, is engaged in technological research and development activities within the fields of energy and sustainable development. This research center, a forerunner in private research in Spain, is intended as a top-rank science and technology center, valorizing our accumulated knowledge by developing existing and future real applications. By engaging in R&D, Abengoa Research seeks to expand upon existing knowledge while generating new approaches, rooted in our scientific knowledge of the state of the art and the multidisciplinary skill sets of our human team.

The company's specific objectives are akin to those of a research center but are tailored to Abengoa's strategy and geared towards the present and future business needs and interests of the company. This includes generating and exploiting patents and other intellectual and industrial property and conducting studies, preparing reports and performing scientific-technical projects.

Projects to date have focused on the areas of research in which Abengoa is currently interested: solar power, bioenergy, water, waste, hydrogen, marine power, and so on. The center has also been working on an Abengoa-specific strategic technology agenda for the coming years in relation to the areas described above.

Engineering and Construction

R&D&i is a strategic area in our Engineering and Construction activity for future planning. R&D&i activities are undertaken by a number of different Group entities through the investigation, development and application of new technologies which focus on combating climate change and contribute to sustainable development, including, *inter alia*:

- reducing carbon dioxide and other greenhouse gas emissions in the construction sector;
- developing hydrogen technology with pioneering R&D&i projects in the area of clean electricity generation through hydrogen batteries;
- improving energy efficiency through the development of new technologies;
- developing electrical storage systems to improve grids dispatchability reducing transport losses; and
- investigating and innovating in the field of new renewable energy sources.

Concession-Type Infrastructure

Our R&D&i in our Concession-Type Infrastructure activity is undertaken in partnership with numerous research institutes and universities in Spain and elsewhere.

At our two research centers in Spain and the United States, the R&D&i team of our Concession-Type Infrastructure activity's Solar segment is involved in the research of high-temperature concentration of solar power and photovoltaic research. Our Solar segment has undertaken various R&D&i projects with the backing of the DOE, while also continuing to work on different projects within the Seventh Framework Program of the European Union, including the Solugas Consortium in collaboration with the *Deutsche Zentrum für Luft und Raumfahrt* and *New Algerian Company*, among others, and on the Innpacto projects against the backdrop of the *Centro de Investigaciones Energéticas, Medioambientales y Tecnológicas* programs in Spain. Our Solar segment R&D&i team also collaborates with leading research centers worldwide, including universities and technological institutes. The independent research centers with which the Solar segment's R&D&i team has worked include the National Renewable Energy Laboratory in the United States, *Centro de Investigaciones Energéticas, Medioambientales y Tecnológicas* in Spain and the Aerospace Centre in Germany. In addition to the Solúcar Platform, considered one of the world's leading centers in solar energy research, our Solar segment has increased its R&D&i capabilities with the inauguration of the Soland R&D center, with more than 3,500 m² of labs. Our Solar segment's main R&D&i programs are focused on: increasing the efficiency of its CSP tower technology; reducing the components cost of its CSP through technology and high concentrated photovoltaic (HCPV); and increasing the dispatchability of our thermal storage technology.

Our R&D&i in the Water segment is structured into three areas: desalination, water treatment and water cycle sustainability. The desalination area focuses on improving the efficiency of the reverse osmosis process and lowering our investment, operation and maintenance costs and is also engaged in the validation and conceptual design of a new and cost-effective remineralization process for desalination plants. The water treatment area seeks to optimize membrane-based water treatment processes so as to save energy and produce less sludge, develop sludge treatment and elimination technologies as supercritical oxidation. The water cycle sustainability area seeks to optimize energy use in water infrastructure, develop hydro power and marine energy capabilities, create sustainable water management models, and develop and apply sustainability criteria in the design of the water area's solutions. In addition, our Water segment's R&D&i team also collaborates with leading universities, institutes, and public bodies including Foundation Euskoiker, the School of Industrial Engineering in Bilbao (Spain), the Spanish Ministry of Industry, Tourism and Trade, the Ministry of Innovation and Science and the Center for Industrial Technological Development.

Trend Information

Other than as disclosed elsewhere in this Listing Memorandum, we are not aware of any trends, uncertainties, demands, commitments or events for the year ended December 31, 2013 that are reasonably likely to have a material adverse effect on our revenues, income, profitability, liquidity or capital resources, or that caused the disclosed financial information to be not necessarily indicative of future operating results or financial conditions.

Off-Balance Sheet Arrangements

The total value of off-balance sheet arrangements and third-party guarantees increased by approximately €1,540.4 million, from €5,970.1 million as of December 31, 2012 to €7,510.5 million as of December 31, 2013. The total value of off-balance sheet arrangements and third-party guarantees then decreased by approximately €25 million, from €7,510.5 million as of December 31, 2013 to €7,485.5 million as of June 30, 2014. Such figure comprises (i) guarantees provided by financial institutions (bank bonds and surety insurance) for the benefit of third parties and (ii) the overall value of guarantees undertaken by the Group for the benefit of third parties.

With respect to guarantees provided by financial institutions for the benefit of third parties, this subset comprises bank bonds and surety insurance directly deposited by such Group companies and those deposited by us to any company in the Group as guarantee to third parties (clients, financial entities, public entities and other third parties). Such commitments totaled €1,308.1 million as of June 30, 2014 compared to €1,323.3 million as of December 31, 2013 and €1,541.3 million as of December 31, 2012.

With respect to guarantees provided by Group companies for the benefit of third parties, this subset comprises a range of declarations of intent and commitments undertaken by Group companies and us regarding group companies in support of their operations with third parties. Such guarantees totaled €6,177.4 million as of June 30, 2014 compared to €6,187.3 million as of December 31, 2013 and €4,428.8 million as of December 31, 2012.

Tabular Disclosure of Contractual Obligations

The following table summarizes our contractual obligations as of December 31, 2013.

	Total	Less than 1 year	Between 1 and 3 years	Between 3 and 5 years	More than 5 years
	(€ in millions)				
Project Financing	6,321.0	584.8	1,249.4	742.3	3,744.5
Borrowings	2,596.0	636.7	1,539.8	215.2	204.3
Notes and Bonds	2,894.5	256.4	795.2	1,210.9	632.0
Financial Leases	40.0	12.9	12.3	1.6	13.2
Other loans and borrowings	123.7	13.1	62.8	39.4	8.4
Lease obligations	17.1	12.8	1.6	1.3	1.4
Purchase Obligations	1,172.6	1,034.0	117.8	1.3	19.5
Derivative financial instruments	215.2	28.7	29.3	8.4	148.8
Accrued Interest Estimate during the Useful Life of Loans	3,534.5	664.6	955.7	658.3	1,255.9

We have contractual obligations to make future payments in connection with bank debt, notes and bonds and lease agreements. In addition, during the normal course of business, we enter into agreements where we commit to future purchases of goods and services from third parties.

Project Financing refers to non-recourse loans obtained by certain Group entities dedicated to long-term projects for the development of integrated products. For more detailed information on Project Financing refer to Note 19 to our Consolidated Financial Statements.

Borrowings include our long-term and short-term amounts outstanding, mainly under our syndicated loan agreement for €1,417 million. These obligations are more fully discussed in Note 20 to our Consolidated Financial Statements and in “—Liquidity and Capital Resources.”

Notes and Bonds refer to the carrying value of issuances made during 2009, 2010 and 2013, which are described in detail in “—Liquidity and Capital Resources” and in Note 20 to our Consolidated Financial Statements.

Financial Leases includes obligations owed to third parties in connection with technical installations, machinery and other tangible assets acquired under finance lease agreements. The amount shown in the table above corresponds to the minimum lease payments.

Other Loans and Borrowings represent interest-free loans and other loans obtained from governmental entities in connection with research and development projects as well as obligations for certain sale and lease back agreements included in Note 20 to our Consolidated Financial Statements.

Lease Obligations represent the amount of future minimum lease payments for both structural and renting contracts that certain Group companies have entered into, mainly in connection with buildings and equipment.

Purchase Obligations include agreements for the purchase of goods or services that are enforceable and legally binding on the Group and that specify all significant terms, including fixed or minimum quantities to be purchased, fixed, minimum or variable price provisions and the appropriate timing of the transactions.

Accrued Interest Estimate during the useful life of loans represents the estimation for the total amount of interest estimated to be paid or accumulated over the useful life of loans, notes and bonds.

Capital Expenditures

Our business has significant capital expenditure requirements, including construction of concession-type infrastructure and other industrial facilities, as well as R&D&i costs. Our capital expenditure requirements include construction costs of power transmission lines, solar power plants, co-generation power plants, infrastructure for the production of ethanol, and desalination plants. While we generally seek to maintain a balance of non-recourse debt and corporate debt to encourage financial discipline, the majority of our capital expenditures are financed by non-recourse debt and funding, when applicable, from partners in a particular project. We incur corporate debt to finance our investments, acquisitions and general purpose requirements. Our corporate debt has the benefit of upstream guarantees from our operating subsidiaries which are subject to debt/EBITDA ratios as discussed above. The funding of our corporate capital expenditure is covered by existing cash and corporate EBITDA generation. We incur non-recourse debt on a project-by-project basis, and we do not commit to any projects that we have been awarded prior to securing long-term financing.

The table below sets forth our historic capital expenditures by our three activities for the six-month period ended June 30, 2014 and the years ended December 31, 2013, 2012 and 2011.

	Six months ended June 30	Year ended December 31		
	2014	2013	2012	2011
		(unaudited) (€ in millions)		
Engineering and Construction	53.0	131.8	111.3	143.3
Concession-type Infrastructure	832.1	1,695.2	1,923.5	2,531.0
Industrial Production	58.4	57.4	179.7	238.6
Total	<u>943.5</u>	<u>1,884.4</u>	<u>2,214.5</u>	<u>2,912.9</u>

As of June 30, 2014, our expected equity contribution related to our capital expenditures plan was €740 million. Corporate entities also engage in regular maintenance capital expenditures as necessary in order to ensure the adequate performance of our existing facilities.

The following table represents management's estimate, as of June 30, 2014, of the costs to complete our committed capital expenditures. The estimates presented in the table below may differ significantly from the actual costs which are incurred in connection with these expenditures. See "Risk Factors—Risks Related to Our Business and the Markets in Which We Operate—Our business has substantial capital expenditure

requirements which requires us to have access to the global capital markets for financing" and "—Liquidity and Capital Resources." See also "Forward-Looking Statements."

<u>Activity</u>	<u>Capex Expected to be Financed from the Corporate Group</u>
	<u>(€ in millions)</u>
Concession-Type Infrastructure	738
Industrial Production	<u>2</u>
Total	<u>740</u>

Additionally, we have a pipeline of projects in the development stage for which we are either in the process of tendering or negotiating.

BUSINESS

In this Listing Memorandum, the words “we,” “us,” and “our” refer to Abengoa, S.A., together with its subsidiaries on a consolidated basis, except where otherwise specified or clear from the context. Any projections and other forward-looking statements in this section are not guarantees of future performance and actual results could materially differ from current expectations. Numerous factors could cause or contribute to such differences. See “Risk Factors” and “Forward-Looking Statements.”

Overview

We are a leading engineering and clean technology company with operations in more than 50 countries worldwide that provides innovative solutions for a diverse range of customers in the energy and environmental sectors. Over the course of our more than 70-year history, we have developed a unique and integrated business model that applies our accumulated engineering expertise to promoting sustainable development solutions, including delivering new methods for generating power from the sun, developing biofuels, producing drinking water from seawater and efficiently transporting electricity. A cornerstone of our business model has been investment in proprietary technologies, particularly in areas with relatively high barriers to entry. We organise our business into the following three activities: Engineering and Construction, Concession-Type Infrastructure and Industrial Production. Our Engineering and Construction activity provides sophisticated turnkey engineering, procurement and construction (“**EPC**”) services from design to implementation for infrastructure projects within the energy and environmental sectors and engages in other related activities with a high technology component. Our Concession-Type Infrastructure activity operates, manages and maintains infrastructure assets, usually pursuant to long-term concession agreements under Build, Own, Operate and Transfer (“**BOOT**”) schemes, within five operating segments (Transmission, Solar, Water, Co-generation and other and Abengoa Yield). Finally, our Industrial Production activity produces a variety of biofuels (ethanol and biodiesel). For the first half 2014, our average number of employees was 28,658 people worldwide across our three business activities. According to industry publications, we are among the market leaders in the majority of our areas of operation.

We apply innovative technology solutions for sustainability through a business model that is respectful of social and environmental surroundings. We are committed to our stakeholders and their expectations, ensuring that our performance contributes to the economic development and social progress of the communities in which we enjoy a presence, while at the same time mitigating impact on the environment.

With this aim in mind, we have strategic and management tools in place to enable the company to set continuous improvement targets as part of a strategy grounded in corporate social responsibility.

We cooperate with external organizations as the UN Global Compact to strengthen our CSR performance that are also annually validated by external certification body and auditors and that has been recognized in several environmental, social and governance (“**ESG**”) indexes, such as FTSE4Good, CDP, Nasdaq Green Economy or ESI Excellence Europe index.

In order to focus our attention on our key markets, we organized our business into three activities: Engineering and Construction, Concession-Type Infrastructure and Industrial Production. Each activity is further broken into the following operating segments: Engineering and Construction within the Engineering and Construction activity; Transmission, Solar, Water, Co-generation and other and Abengoa Yield segments within the Concession-Type Infrastructure activity; and Biofuels within the Industrial Production activity. Previously, we organized our business according to five reporting segments: Engineering; Bioenergy; Information Technologies; Environmental Services; and Solar.

Our three activities are focused in the energy and environmental industries, and integrate operations throughout the value chain, including R&D&i, project development, engineering and construction, and the operation and maintenance of our own assets and those of third parties. Our activities are organized to

capitalize on our global presence and scale, as well as to leverage our engineering and technological expertise in order to strengthen our leadership positions.

We have successfully grown our business, with a compound annual growth rate of our Consolidated EBITDA of 21% during the last ten years ended December 31, 2013. We have also maintained double digit growth in our consolidated revenue and Consolidated EBITDA on a compound annual growth basis since our 1996 initial public offering on the Madrid and Barcelona stock exchanges. As of September 12, 2014, we had a market capitalization of approximately €3.6 billion. As of June 30, 2014, our backlog was €7,671 million.

Our revenue, Consolidated EBITDA and net fixed assets of the Group and by segment as of and for the six months ended June 30, 2014 and as of and for the year ended December 31, 2013 are set forth in the following tables. A detailed discussion of the revenue, Consolidated EBITDA and net fixed assets of the Group and by pre-2014 segments may be found under "Management's Discussion and Analysis of Financial Condition and Results of Operations."

	Six months ended June 30, 2014	Year ended December 31, 2013 ⁽¹⁾
	(unaudited) (€ in millions)	
Revenue (total)	3,405.5	7,356.5
Engineering and Construction	2,068.3	4,808.5
Engineering and Construction	2,068.3	4,808.4
Concession-Type Infrastructure	345.9	518.9
Solar	157.6	258.7

Industrial Production	2,502.7	2,454.3
Biofuels	2,502.7	2,454.3

(1) The figures presented in this table for the year ended December 31, 2013 have been adjusted on an unaudited basis to conform to our 2014 redefinition of activities and segments, including the creation of the Abengoa Yield segment within our Concession-type activity and the elimination of the Technology and Other segment from our Engineering and Construction activity.

The offering is part of Abengoa's long-term strategic plan to strengthen its balance sheet in the near term. Pursuant to this plan Abengoa aims to continue to diversify its access to the global capital markets, such as through its U.S. listing, and continue, as appropriate and subject to prevailing market conditions and other factors, to opportunistically access the global capital markets from time to time. Our liquidity plans are subject to a number of risks and uncertainties, some of which are outside of our control. Macro economic conditions could limit our ability to successfully execute our business plans and, therefore, adversely affect our liquidity plans. See "Risk Factors."

Our three activities are as follows:

Engineering and Construction

We have over 70 years of experience in the Engineering and Construction activity in the energy and environmental sectors. We are responsible for all phases of the engineering and construction cycle, including project identification and development, basic and detailed engineering, construction and operation and maintenance.

In the energy sector, we are dedicated primarily to renewable energy (solar, biofuel and biomass), as well as conventional (co-generation and combined-cycle) power plants and power transmission lines. In 2013, we were recognized by *ENR Magazine* as the leading international contractor in power transmission and distribution ("T&D") of electricity in terms of revenues, the leading international contractor in power in terms of revenues and the leading international contractor in co-generation and solar in terms of revenues (source: ENR).

Within the environmental sector, we build water infrastructure, desalination and water treatment plants in Europe, the Americas, Africa and Asia. We are among the market leaders in the construction of water desalination plants through our projects in Algeria, China, India, Ghana and Spain.

Concession-Type Infrastructure

By leveraging the expertise we have gained over the years in our Engineering and Construction activity and by selectively developing proprietary technologies, we have developed a portfolio of investments in concession-type infrastructure in the energy and environmental sectors where we seek to achieve attractive

returns. Many such concessions are held pursuant to long-term agreements in which we operate and maintain assets that we initially constructed under BOOT schemes. There is limited or no demand risk as a result of arrangements such as feed-in and ad hoc tariff regimes, take-or-pay contracts and power or water purchase agreements, which are long-term contracts with utilities or other offtakers for the purchase and sale of the output of our concession assets. We believe our level of revenue visibility in this business to be very high given the nature of our assets, the long-term arrangements under which they are operated, and the number of projects under construction where off-take remuneration is already in place.

Our Concession Type Infrastructure activity operates, manages and maintains infrastructure assets, usually pursuant to long term concession agreements under BOOT schemes, within five operating segments (Transmission, Solar, Water, Co-generation and other and Abengoa Yield). In each instance, we typically partner with leading international or local businesses or parastatals, such as E.ON AG ("**E.ON**"), Total S.A., Abu Dhabi Future Energy Company ("**Masdar**"), Centrais Eléctricas Brasileiras S.A. ("**Eletrobrás**"), General Electric Company ("**General Electric**"), Cemig, JGC Corporation, Itochu Corporation and Algérienne des Eaux (Algerian Water Authority). In a typical partnership, we make an equity contribution with our partners and then typically finance the infrastructure through non-recourse project financing.

As of June 30, 2014, the average remaining duration of operation of our concession contract portfolio was 25 years. The capacity of our solar, co-generation and water desalination plants and the scale of our power transmission line networks are each expected to approximately double as projects currently under construction are expected to be completed between 2014 and 2017.

We manage concession assets on five continents as diverse as power transmission lines in Brazil, Chile and Peru, thermo-solar plants in the United States, Spain, South Africa and the United Arab Emirates, desalination plants in India, China, the Middle East and Africa and co-generation plants in Spain and Mexico. We pursue a flexible asset rotation strategy through which we may divest certain assets from time to time on an opportunistic basis to maximize our overall investment returns. We intend to follow an opportunistic approach, whereby we consider to sell assets or businesses when we deem market conditions are attractive to us. Sales of assets or businesses may be material and may happen at any time. We expect to continue with our asset rotation strategy through the rest of 2014.

Furthermore, Abengoa Yield constitutes a vehicle through which we plan to execute most of our asset rotations, representing a long-term recurrent equity recycling vehicle to crystallize value in concessions, facilitating the divestment process in concessional assets, as Abengoa Yield is a natural buyer of the assets we are building which benefits from a significantly lower cost of capital than us.

Industrial Production

Our Industrial Production activity includes one operating segment: Biofuels, in which we develop and produce biofuels. These operations are conducted using our own assets and are focused on high growth markets. According to industry publications and our own estimates, we enjoy a leadership position in many of the markets in which we operate.

BioFuels

In terms of capacity, according to *Ethanol Producer Magazine* and the European Renewable Ethanol Association, our Biofuels segment is currently the European market leader in ethanol production and is the seventh largest ethanol producer in North America. We are the only operator with a significant presence in all of the three key biofuel markets: the United States, Europe and Brazil. We are also diversified in terms of revenue sources and, historically, we have benefited from the positive impact of successful hedging policies.

We believe we have identified a significant market opportunity in second-generation biofuels, which utilize biomass rather than cereal and other food crops as the primary raw material. We have invested continually in R&D over the past decade in this business and have developed our own proprietary processes

and enzymes. Our pilot plant has been in operation in York (Nebraska, United States) since 2007 and a demonstration plant in Salamanca (Spain) since 2009. We commenced construction of our first second-generation commercial plant in Hugoton (Kansas, United States) in 2011, for which we have been awarded a total of \$132 million in loan guarantee financing and \$97 million in grants from the U.S. Department of Energy since 2007. This plant is expected to start operations in the third quarter of 2014 and increase the number of opportunities for us to license our biomass technology to third parties. In addition, we believe that the plant will position our business for potential entry into the biomaterials and bioproducts industry. N-Butanol production on a commercial scale would allow us to diversify our bioenergy business product range, reducing market volatility. A pilot plant for development and implementation of a catalytic technology for N-Butanol production is running since the end of 2013.

Industry and Market Opportunity

Over the last decade, global investment in the renewable energy and environmental sectors has witnessed significant growth. Moreover, energy scarcity, the focus on reduction of carbon emissions, and the potential increased costs of building and operating nuclear plants are expected to continue to drive renewable technology. We expect this to continue both in the short and long-term and expect that this will support demand for our products and services. According to the World Energy Outlook 2013, global energy demand is expected to grow 33% by 2035, compared to 2011 levels reaching 17.400 Mtoe. As expected, emerging economies account for more than 90% of net demand growth, and continue to be led by China, India and the Middle East, with demand growth of natural gas at 48%, nuclear at 66% and renewables at 77%. Oil continues to be the largest component of primary energy mix, however demand growth is expected to slow down over the period: 1.1% p.a. until 2020 and 0.4% thereafter.

The share of renewables in primary energy use is expected to rise to 18% in 2035, from 13% in 2011, resulting from rapidly increasing demand for modern renewables to generate power, produce heat and make transport fuels. Power generation from renewables is expected to increase by over 7,000TWh from 2011 to 2035, making up almost half of the increase in total generation. Renewables is predicted to become the second-largest source of electricity before 2015 and approach coal as the primary source by 2035. Cumulative investment of \$6.5 trillion will be required in renewable energy technologies from 2013 to 2035, representing 62% of investment in new power plants through to 2035. (Source: World Energy Outlook 2013).

Consumption of biofuels is expected to increase from 1.3 Mboe/d in 2011 to 4.1 Mboe/d in 2035, to meet 8% of road-transport fuel demand in 2035. The United States, Brazil, European Union and China are expected to make up more than 80% of all biofuels demand. Advanced biofuels, helping to address sustainability concerns about conventional biofuels, will gain market share after 2020, reaching 20% of biofuels supply in 2035. (Source: World Energy Outlook 2013).

Significant opportunities are expected in one of Abengoa's core areas of expertise, the transmission and distribution sectors, where a total investment of \$7,000 billion is estimated by 2035. Approximately 25 million kilometers of transmission and distribution lines are expected to be built during the outlook period driven by i) increasing demand (India, China) ii) upgrade of aged infrastructure (Europe, U.S. and Russia) and iii) integration of renewables. (Source: World Energy Outlook 2013).

Other macroeconomic trends such as continuous global population growth and increasing water scarcity are expected to result in trends that favor the expertise and focus of our business. According to Global Water Intelligence estimates, the 2013 global water market is worth \$556.8 billion and is expected to grow at a rate of around 3.9% per year through 2018. In particular, worldwide installed desalination capacity (industrial and municipal) in 2012 was 75 million m³/d, which corresponds to a water desalination market value of \$3.9 billion, and is expected to grow to \$15.2 billion by 2018. The growth rate for capital expenditure on seawater desalination is expected to be 19.2% during that time. (Source: Global Water Market 2014).

In addition, increasing environmental consciousness, reducing carbon and greenhouse gas emissions, increasing focus on security of energy supply in many developed countries, and the related tightening of environmental regulation are important factors that we expect to bolster global demand and provide an impetus to our sustainable development focus.

History and Development of the Company

Abengoa was incorporated under the laws of the Kingdom of Spain in Seville on January 4, 1941 as a limited liability company (*sociedad de responsabilidad limitada*) and was subsequently changed to a limited company (*sociedad anónima*) on March 20, 1952. We were originally founded as Sociedad Abengoa S.L. in Seville by Javier Benjumea Puigcerver and José Manuel Abaurre Fernández-Pasalgua with three friends and other family members. Our initial vision was to manufacture a mono-phase meter for measurement of electric currents. However, we changed course due to supply problems and, soon after, we began offering engineering consultancy services, carrying out technical studies and completing construction works within the energy sector. Our registered office is at C/Energía Solar, no. 2, Seville (Spain). Our headquarters are located at Campus Palmas Altas, C/Energía Solar, 1, 41014, Seville, Spain. The telephone number for our headquarters is +34 954 93 71 11.

Abengoa expanded throughout Spain in the 1950s and started its international expansion in the 1960s, first to Latin America, then to the United States and Canada, rest of Europe, Africa, Asia and other parts of the world. Today, Abengoa operates in more than 50 countries with offices and projects in more than 35 of them, with Spain accounting for 16% of total revenues during 2013. Abengoa is the parent company of the Group, which as of June 30, 2014 was made up of 627 companies, being the parent company itself, 582 subsidiaries, 20 associates and 24 joint ventures, in addition to certain companies of the Group being involved in 227 temporary joint ventures. Additionally, the Group has a number of shareholdings of less than 20% in various further entities.

We currently conduct our traditional engineering and industrial construction business through our subsidiary Abeinsa.

We entered the environmental services business in the 1980s with our participation in water infrastructure projects in Spain. With the acquisition of Befesa in 2000, a company specializing in industrial waste management, we reorganized our environmental activities under Befesa. In 2006, Befesa acquired BUS Group AB, the founder of the original Befesa and the largest European recycler of steel dust, which acquisition made Befesa a European leader in industrial waste recycling. On June 13, 2013, we entered into a share purchase agreement for the sale of Befesa to funds advised by Triton Partners. On July 15, 2013, the sale transaction was closed.

We entered the bioenergy business in the 1990s. In late 1990s, we identified the need for a renewable energy alternative for the transport sector. We had a clear vision to achieve a critical mass in first generation bioethanol (or “cereal” bioethanol) and to make second generation bioethanol (or “biomass” bioethanol) commercially available through investments in R&D&i. We built our first two plants in Spain and in 2001 we acquired High Plains Corporation in the United States, a bioethanol producer with three plants. This new business line was organized as Abengoa Bioenergía. In 2007, we acquired Dedini Agro and entered the Brazilian bioenergy market.

Until September 5, 2011, we conducted our information technology business through Telvent. We first entered this business when we acquired Sainco, a traffic automation company, in the late 1960s. As Sainco grew and broadened its spectrum of solutions and geographical reach, Abengoa decided to take the company public to finance its growth. As part of the reorganization undertaken prior to going public in 2004, the brand name of Telvent was adopted. In 2008, we acquired DTN Holding Company Inc., a leader in delivering real time business information to key decision makers in the agriculture, energy and environmental industries. As of December 31, 2009 and 2010 and during part of the year 2011, we held a 40% shareholding in Telvent. On June 1, 2011, we announced the sale of our investment in Telvent to Schneider

Electric S.A. and on September 5, 2011 the transaction was completed. See *"Management's Discussion and Analysis of Financial Condition and Results of Operations—Factors Affecting the Comparability of our Results of Operations—Acquisitions and Divestments—Divestment of Telvent GIT, S.A."* for further discussion.

Abengoa began its solar power activity in 1984 when the company was one of the participants in the construction of the Solar Platform in Almería, Spain. Since then, multiple R&D&i projects have been carried out to develop different types of receivers for tower plants and parabolic trough technology, which were partially supported by the European Union Framework Programmes. These first steps were taken in Abengoa's Engineering and Construction and Industrial Production business units. In 2007, with the inauguration of the first tower technology commercial plant, PS10 (11 MW), as well as the world's largest low-concentration photovoltaic plant, Sevilla PV, with 1.2 MW of power output capacity, Abengoa Solar was incorporated as a business unit.

Abengoa was formerly present in the wind sector through its ownership of Desarrollos Eolicos S.A., a fully owned subsidiary that was sold in 2001 to the Dutch company Nuon.

On July 27, 2010, Abengoa Concessões Brasil Holding, S.A., a subsidiary in the Concession-Type Infrastructures segment, concluded an agreement with the company State Grid International to sell its 25% shareholding in the companies ETEE (*Expansión Transmisora de Energía Eléctrica, S.A.*) and ETIM (*Expansión Transmisora Itumbiara Marimondo*), which are responsible for the concession of the 794 kilometers of transmission lines that joins the power stations of the city of Itumbiara, in Soiás, Brazil, and Marimondo, in the state of Minas Gerais, Brazil.

On June 2, 2011, Abengoa Concessões entered into an agreement with TAESA to sell 50% of its shareholding in a newly formed entity, named UNISA, to which Abengoa Concessões contributed 100% of its interests in four project companies that it controlled and that hold power transmission line concessions in Brazil. These four project companies are STE, ATE, ATE II and ATE III. In addition, on June 2, 2011, Abengoa Concessões and Abengoa Construção Brasil Ltda. entered into an agreement with TAESA to sell 100% of the share capital of NTE, another project company that holds a power transmission line concession in Brazil. We subsequently signed an agreement with TAESA on March 16, 2012 to sell our remaining 50% interest in UNISA, thereby completing the divestment of certain Brazilian transmission line concession assets (STE, ATE, ATE II and ATE III). See *"Management's Discussion and Analysis of Financial Condition and Results of Operations—Factors Affecting the Comparability of our Results of Operations—Acquisitions and Divestments—Sale of Brazilian Transmission Line Assets."*

In October 2011, we issued 17,142,858 Class B shares and warrants to purchase an additional 4,020,124 Class B shares to First Reserve as part of their €300 million investment in Abengoa. As a result of the First Reserve investment, First Reserve acquired approximately 0.2% of the voting rights of our share capital. For further information on First Reserve, see *"Principal Shareholders."*

In October 17, 2013, we carried out a capital increase of 250,000,000 Class B shares and, on October 29, 2013, we issued 37,500,000 additional Class B shares as a result of the exercise by the underwriters of that capital increase of their option to purchase additional shares to cover over-allotments. The shares were offered at a price of €1.80 per share, for total gross proceeds, including shares sold pursuant to the option, of €517.5 million. The new Class B shares are listed on the Madrid and Barcelona stock exchanges and, in the form of American Depositary Shares (with each American Depositary Share representing five Class B shares), on the NASDAQ Global Select Market. The shares were offered globally, including in the United States pursuant to a registration statement filed with the SEC.

On June 18, 2014, we completed an initial public offering (the **"Abengoa Yield IPO"**) of the ordinary shares of Abengoa Yield plc (**"Abengoa Yield"**), which was formed by Abengoa, S.A. as a dividend growth-oriented company formed to serve as the primary vehicle through which Abengoa will own, manage and acquire renewable energy, conventional power and electric transmission lines and other contracted revenue-generating assets, initially focused on North America (the United States and Mexico) and South America

(Peru, Chile, Uruguay and Brazil), as well as Europe (Spain). In the future, Abengoa Yield intends to expand this presence to selected countries in Africa and the Middle East.

In order to facilitate the Abengoa Yield IPO, Abengoa has contributed or caused a subsidiary to contribute to Abengoa Yield a series of concessional assets mostly in the solar, transmission, and cogeneration space through a series of transactions, which is referred to collectively as the “**Abengoa Yield Asset Transfer**,” as described more fully under “*Summary—Recent Developments*.”

Our Strengths

Integrated business model

We operate an integrated business model in which we provide complete services from initial design, construction and engineering to operation and maintenance of infrastructure assets. The combination of our engineering and construction expertise with our track record of operating large and complex infrastructure facilities allows us to benefit from and leverage multiple operating efficiencies within our Group. We believe that our integrated business model allows us to prepare competitive bids for government concession tenders and complete and operate the project on a profitable and timely basis while achieving high equity returns.

Furthermore, our business mix enables us to share knowledge gained from across our Group and implement best practices across our businesses and geographies, thereby increasing our competitiveness while allowing us to be less dependent on any single business or geography. Our Engineering and Construction activity provides a resilient earnings base and our Concession-Type Infrastructure activity provides long term recurrent cash flows. Together with our Industrial Production activity, our Concession-Type Infrastructure activity also operates in high-growth sectors that offer a wide range of business opportunities. In addition, our business mix allows us to apply our engineering capabilities to create new technologies that are integral to our asset-owned operations and concession projects. The growth of our technological development capabilities enhances our engineering capabilities and increases the development of our asset-based operations.

High revenue visibility driven by strong order backlog and contracted revenue stream

We have a developed portfolio of businesses focused on EPC and concession project opportunities, many of which are based on customer contracts or long-term concession projects. As of June 30, 2014, our backlog of projects and other operations pending execution stood at €7,671 million, which equalled approximately 14 months of revenue that our Engineering and Construction activity achieved in the previous 12 months. As of June 30, 2014, our concessions had an average remaining life of 25 years. The volume and timing of executing the work in our backlog is important to us in anticipating our operational and financing needs, and we believe our backlog figures reflect our ability to generate revenue in the near term.

We have an established portfolio of long-term concession projects undertaken in conjunction with partners or on an exclusive basis, which we operate in the power transmission, energy, generation and water infrastructure and energy sectors, typically with terms of 20 to 30 years. Our revenue from concession projects is typically obtained during the term through a period tariff or price per unit payable in exchange for the operation and maintenance of the project. This revenue, which is normally adjusted for inflation, represents a stable and contracted source of cash flow generation for us. In addition, partnerships and non-recourse project finance limits our credit exposure and increases our ability to commit to multiple projects simultaneously. For large projects, we often share the equity contribution by teaming up with various international and local partners. Project finance borrowing allows us to finance the rest of the project through non-recourse debt and thereby insulate the rest of our Group from such credit exposure.

In addition, we have a capital expenditure program focused on the construction of power transmission lines, solar power plants, cogeneration power plants and water infrastructure among other activities. As of June 30, 2014, our expected equity contribution related to our capital expenditure plan was approximately

€740 million, with the significant majority of projects backed by off-take contracts, for most of which long-term financing has been obtained. As a result, we believe that our capital expenditure program provides us with enhanced visibility on short and medium-term growth in revenue and cash flow.

Strong asset portfolio geographically diversified

Our activities possess a combination of engineering, procurement and construction (“EPC”) as well as concession revenue streams originating from a variety of both renewable and conventional technologies and markets with their own demand and supply dynamics. As a result, we are not overly reliant on any particular technology, market or customer. Furthermore, as we have operations on five continents, with 86% and 84% of our consolidated revenue generated outside of Spain for the six months ended June 30, 2014 and for the year ended December 31, 2013, respectively, our geographic diversification reduces our exposure to economic conditions in any single country or region. Due to our business and geographic diversification, we have a broad customer base consisting of both private and public sector customers, including leading global utilities, blue chip industrial companies and national, regional and local governmental authorities. In 2013, no single customer accounted for over approximately 5% of our consolidated revenue, excluding work performed for our own assets.

Our broad geographic diversification with significant activities in the United States, Latin America (including Brazil) and Europe, in particular, gives us deep regional insight and long-standing experience working with local governments, regulators, financial institutions and other partners that we believe assists us to obtain requisite equity and debt financing and conclude successful partnerships with leading international and local firms.

Market leader in high growth energy and environmental markets

We have a developed portfolio of businesses focused on EPC and concession project opportunities in the attractive and growing energy and environmental markets, which despite short-term challenges are expected to continue growing.

We have developed a leadership position in the energy sector in recent years, as highlighted by the following:

- we are the leading international contractor in power transmission and distribution of electricity in terms of revenues, the leading international contractor in power and in solar in terms of revenues, the fourth largest international contractor in co-generation in terms of revenues and the eighth largest international contractor in water in terms of revenues (source: ENR 2013);
- we are a global leader in solar CSP technology (1223 MW in operation), having developed and built the first two commercial tower technology plants (PS10 and PS20) in Seville (Spain), the first integrated solar combined cycle (“ISCC”) plant in the world in Ain-Beni-Mathar (Morocco), the world’s largest CSP plants of its kind in Arizona (the Solana Project) and the second ISCC plant in Hassi-R’Mel (Algeria) and we are continuing to work on one of the world’s largest CSP plants under construction in California (the Mojave project). We are also building the first superheated Solar tower in Africa (Khi solar one); and
- we are a global leader in the biofuels industry, with plants in Europe, the United States and Brazil. We ranked first in Europe and in the top ten in the United States in first-generation bioethanol in terms of installed capacity (source: Ethanol Producer Magazine, ePURE and FO Lichts) and enjoy a global leadership position in the development of technology for the production of second-generation bioethanol on a commercial scale.

We are also dedicating significant efforts to developing our market position in the environmental sector, specifically within the water desalination industry, where we have a total desalination capacity of 1.4 million m³/d, of which 865,000 m³/d is in the BOT model. We are ranked within the 10 largest companies in the

world in terms of reverse osmosis desalination capacity. Furthermore, we were awarded the distinction of “2013 Desalination Company of the Year” for our outstanding contribution in the desalination sector and recognized as one of the top four water companies of the year (Source: Global Water Intelligence (“**GW**I”)).

Competitive advantage driven by our cutting edge technology and our extensive Engineering and Construction experience

Our cutting edge technology is one of our central competitive advantages. Building on our extensive experience in our Engineering and Construction activity of providing turnkey engineering solutions as well as on our resilient earnings base and sustained record of profitability, over the last decade we have focused on using our engineering expertise and know-how to develop cutting edge technologies relating to sustainable development, particularly in technologies for markets with relatively high barriers to entry. Following this approach, we have made significant investments in new technologies at the vanguard of renewable energies such as ISCC plants and second-generation biofuels, which we believe may provide us with an early advantage as their commercial application becomes more widespread.

Strong financial discipline and liquidity profile supported by access to a diverse range of funding sources

We have successfully grown our business while seeking to enforce strict financial discipline to maintain our strong liquidity position. As of June 30, 2014, we had cash and cash equivalents and short-term financial investments of €4,255 million, which we believe are sufficient to satisfy our short-term liquidity needs. This strong cash position also assists in bidding for large projects. The financing of our projects is executed at two levels: (i) non-recourse debt, which is used at the project company level to fund, as the case may be, the engineering and construction works, operation of the concession-type infrastructure and industrial production projects, and which typically insulates the rest of the Group from any credit risk; and (ii) corporate debt, which is used to fund the rest of our operations.

In addition, we have developed a strong network of relationships with international financial institutions and local banks, which have provided us with corporate and non-recourse financing. We have also obtained financial support from international and local development banks and government regulators such as the European Investment Bank, the Inter-American Development Bank, the U.S. Department of Energy, Banco Nacional de Desenvolvimento Econômico e Social (“**BNDES**”) in Brazil and Banco Nacional de Obras y Servicios Públicos (“**Banobras**”) in Mexico. In addition, we have accessed the debt capital markets in different geographies and successfully raised funding through the issuance of bonds and convertible notes.

Entrepreneurial and experienced management team with proven track record and a clearly defined strategy

Our senior management team holds a significant stake in our equity, has an average of 18 years of experience at our company and has led Abengoa through our significant growth and development, including periods of international expansion across all of our activities and the creation and development of our Solar, Water and Industrial Production businesses over the last decade. This proven growth track record has been possible thanks to our management team’s focus on shareholder value and financial discipline across the Group.

Going forward, our senior management team has a defined and clear strategy and a strong commitment to continue delivering on its proven execution track record in the Engineering and Construction business; building a diversified asset portfolio both in terms of geography and sector in our Concession Type Infrastructures, which will become a sizeable source of cash while committing to invest a maximum equivalent to the Engineering and Construction margin in a concession; and diversifying into new geographies and outputs our Industrial Production activity.

Our Growth Strategy

Our objective is to create long-term value for our shareholders by becoming the leading global engineering and clean technology company providing innovative solutions for sustainability in the energy and environmental sectors. Key elements of our strategy for achieving this objective are as follows:

Maintain focus on operational excellence and technological development

Given the importance of our technological leadership to our competitive advantage, we maintain this strength through significant investment in R&D&i which is undertaken by over approximately 800 employees. We intend to maintain this effort to retain or enhance our market positions and cost competitiveness.

Maintain the mix of our business operations to operate a diversified business model

We have been careful to expand our business in a balanced manner, seeking to ensure that we are not over-reliant on any particular product or service, geography or technology.

Take advantage of opportunities for organic cash flow generation in our growth markets

We look to establish ourselves early in growth markets so that we can garner leadership positions in our businesses. We have significant experience in expanding into new and diverse markets with different regulatory regimes that allows us to adapt and to become familiar with new markets and technologies more quickly and helps us capitalize on future expansion opportunities in new markets.

Our business is positioned for growth through the development of both existing operations and new investments. We have strict "return on investment" criteria that attempt to ensure that our growth plans generate long-term, sustainable cash flows for our business. In addition, we maintain strict discipline towards the deployment of new non-committed capital expenditures, committing to such investments only when long-term funding has been secured.

Maintain our competitive position

We believe that we enjoy competitive advantages in many of our businesses due to factors such as our technological leadership position, know-how and scale, as well as the relatively high barriers to entry in certain key areas. We believe these are important factors in protecting our cash flows and profitability. We intend to continue to focus on efficiency measures and technology investments to seek to maintain our competitive advantages.

Asset rotation

It is part of our strategy to unlock value through asset rotations, when we think that conditions are appropriate, in order to increase equity returns. We have a successful track record of monetizing certain of our investments, for example:

- In the third quarter of 2011, we completed the Telvent Disposal, which generated cash proceeds of €391 million;
- In the fourth quarter of 2011, we executed the First Cemig Sale which resulted in the equivalent of €479 million of net cash proceeds in Brazilian reais;
- In the second quarter of 2012, we closed the Second Cemig Sale which resulted in the equivalent of €354 million of net cash proceeds in Brazilian reais;
- in the second quarter of 2013, we closed the sale of our Brazilian subsidiary, Bargoa, for a total sales price of \$80 million, which resulted in approximately \$50 million of cash proceeds;

- in the second quarter of 2013, we entered into a share purchase agreement for the sale of 100% of our shares in our subsidiary, Befesa, which specializes in the integral management of industrial waste, to funds advised by Triton Partners. On July 15, 2013, we received €331 in cash proceeds corresponding to the agreed price for the shares (and deferred compensation and other compensation totaling €289 million) and the sale transaction was closed;
- in the fourth quarter of 2013, Liberty Interactive Corporation invested \$300 million in our Solana CSP plant in the United States. The investment was made in Class A shares of Arizona Solar Holding, the holding company of the Solana CSP plant. Such investment was made through a tax equity partnership which permits the partners to have certain tax benefits such as accelerated depreciation and investment tax credits;
- in the first quarter of 2014, we announced our agreement to sell our 51% stake in Linha Verde Transmissora de Energia S.A., a company with a concession of an electric transmission line in Brazil for total cash of approximately €13 million (BRL 40 million); and
- in the second quarter of 2014, Abengoa Yield closed its initial public offering of 28,577,500 ordinary shares, including the exercise in full of the option to purchase additional shares to cover over-allotment by the underwriters of the initial public offering. These shares were offered at a price of \$29.00 per share for total gross proceeds of \$828.7 million (€611.0 million) before fees and expenses. As a result of the Abengoa Yield IPO, its shares began trading on the NASDAQ Global Select Market under the symbol "ABY".

We intend to continue to actively follow an asset rotation strategy whereby we periodically sell assets or businesses in order to seek to optimize investment returns and free up capital for new investments or debt reduction. We intend to follow an opportunistic approach, whereby we consider to sell assets or businesses when we deem market conditions are attractive to us. Sales of assets or businesses may be material and may happen at any time. We expect to continue with our asset rotation strategy through the rest of 2014.

Going forward, Abengoa Yield constitutes a vehicle through which we plan to execute most of our asset rotations, representing a long-term recurrent equity recycling vehicle to crystallize value in concessions, facilitating the divestment process in concessional assets because Abengoa Yield is a natural buyer of the assets we are building which benefits from a significantly lower cost of capital than us. These opportunities relate to our power transmission business in Latin America, our renewable and conventional power assets and other assets. **Our asset rotation plans constitute forward-looking information and are subject to risks and uncertainties that could cause actual results to differ materially from the results forecasted, including, but not limited to, our performance, industry performance, the availability of buyers for our assets at the prices we seek, general business and economic conditions, competition, adverse changes in applicable laws, regulations or rules, and the various risks set forth in this Listing Memorandum. See "Forward-Looking Statements."**

Strengthen and diversify our capital structure and gain financial flexibility

We are committed to maintaining a sound capital structure and a strong liquidity position. As such, we intend to extend the debt maturities of our existing corporate debt, prefund our cash needs and avoid committing to new projects unless we have first secured long-term financing. We aim to continue to access the global capital markets from time to time, as appropriate and subject to market conditions, in order to further diversify our funding sources.

Certain Financial Targets

Financial targets prepared by our management ("**Targets**") are derived from our strategic planning process. The Targets we present below were not primarily prepared with a view toward public disclosure or with a view toward complying with the published guidelines of the SEC regarding financial projections or IFRS

or the guidelines established by the *Instituto de Auditores—Censores Jurados de Cuentas de España* with respect to prospective financial information, but, in the view of our management, were prepared on a reasonable basis, reflected the best estimates and judgements available to our management at the time, and presented, to the best of our management's knowledge and belief, the expected course of action and the expected future financial performance of our company as of the date they were prepared. However, the Targets are not facts and should not be relied upon as being necessarily indicative of future results.

Our management and our Board will periodically review and revise our strategic plan in light of business, financial, regulatory and other conditions at the time it is reviewed and revised, which may involve changes to the Targets set forth below. We do not intend to continue to publicly disclose these Targets or any adjustments thereto resulting from such review and revision or otherwise, except as required by applicable law.

None of our independent auditors, nor any other independent accountants, compiled, examined or performed any procedures with respect to the Targets, nor have they expressed any opinion or any other form of assurance on the Target or their achievability, and such parties assume no responsibility for, and disclaim any association with, the Targets. The ultimate achievability of the Targets is also subject to numerous risks and uncertainties including, but not limited to, the risks and uncertainties described in this Listing Memorandum.

The Targets, while presented with numerical specificity, necessarily reflect numerous estimates and assumptions made by us with respect to industry performance, general business, economic, regulatory, market and financial conditions and other future events, as well as matters specific to our businesses, all of which are difficult or impossible to predict and many of which are beyond our control. The Targets reflect subjective judgement in many respects and thus are susceptible to multiple interpretations and periodic revisions based on actual experience and business, economic, regulatory, financial and other developments. As such, the Targets constitute forward-looking information and are subject to risks and uncertainties that could cause actual results to differ materially from the results forecasted, including, but not limited to, our performance, industry performance, general business and economic conditions, customer requirements, competition, adverse changes in applicable laws, regulations or rules, and the various risks set forth in this Listing Memorandum. See "Forward-Looking Statements." The Targets are in respect of certain years during the 2014-2018 period. The Targets are not in respect any interim period of any such year or any period after 2018. Actual results may vary significantly from the Targets during any interim period of any year due to seasonality in our business or otherwise. The Targets are dependent upon our ability to reduce our Corporate Capex (as defined below), while maintaining our levels of EBITDA generation. They are also dependent upon our ability to maintain our working capital levels, which in turn is dependent upon our ability to generate EBITDA and manage working capital levels through other means, including our outsourcing of payments to suppliers, use of non-recourse factoring for many of our receivables and use of advances from customers, among others. None of us, the Board, the Initial Purchasers or our or their respective affiliates, advisors, officers, directors or representatives can give any assurance that the Targets will be realized or that actual results will not vary significantly from the Targets. The Targets cover multiple years and therefore by their nature become less reliable with each successive year.

In addition, the Targets reflect assumptions of our management as of the time that they were prepared as to certain business decisions that were and are subject to change. The Targets also may be affected by our ability to achieve strategic goals, objectives and targets over the applicable periods. The Targets cannot, therefore, be considered a guarantee of future operating or financial results, and the information should not be relied on as such. The inclusion of the Targets should not be regarded as an indication that we, the Board or any our advisors or representatives or anyone who received this information then considered, or now considers, them a reliable prediction of future events, and should not be relied upon as such. None of us, the Board, the Initial Purchasers or any of our or their respective advisors or representatives or any of our or their

respective affiliates assumes any responsibility for the validity, accuracy or completeness of the prospective financial information included herein.

The Targets do not take into account any circumstances or events occurring after the date they were prepared. None of us, the Board, the Initial Purchasers, or our or their respective affiliates, advisors, officers, directors or representatives intends to, and each of them disclaims any obligation to, update, revise or correct the Targets, except as otherwise required by law, including if the Targets are or become inaccurate (even in the short term).

The inclusion in this Listing Memorandum of the Targets should not be deemed an admission or representation by us, the Board, the Initial Purchasers or our or their respective affiliates that such information is viewed by us, the Board, the Initial Purchasers or our or their respective affiliates as material information of ours. Such information should be evaluated, if at all, in conjunction with the historical financial statements and other information regarding Abengoa included elsewhere in this Listing Memorandum.

None of us, the Board, the Initial Purchasers or our or their respective affiliates, advisors, officers, directors or representatives has made or makes any representation to any prospective investor or other person regarding our ultimate performance compared to the information contained in the Targets or that forecasted results will be achieved.

In light of the foregoing factors and the uncertainties inherent in the information provided above, investors are cautioned not to place undue reliance on the Targets.

Certain of the Targets, including free cash flow, may be considered non-GAAP financial measures. We are providing the Targets to you because we believe they could be useful in evaluating whether or not to make an investment in the Notes. Non-GAAP financial measures should not be considered in isolation from, or as a substitute for, financial information presented in compliance with IFRS, and non-GAAP financial measures as used by us may not be comparable to similarly titled amounts used by other companies.

The Targets should be evaluated, if at all, in conjunction with the historical financial statements and other information regarding us included elsewhere in this Listing Memorandum.

Corporate Leverage Target

We target a ratio of Net Corporate Debt to Corporate EBITDA of approximately 2.0x in 2014 and approximately 2.0x from 2014 onwards (compared with a ratio of 2.5x as of June 30, 2014, 2.2x as of December 31, 2013 and 3.7x as of December 2012 using last twelve months Corporate EBITDA).

Corporate Capital Expenditures Target

We intend to progressively reduce our annual Corporate Capex from an approximately €729 million investment in 2013 and €1.2 billion in 2012 to approximately €450 million per annum from 2014. We define Corporate Capex as the equity contributions made by us to fund capital expenditures for existing and new plants and operations under our committed and uncommitted capital expenditure plans, as well as to finance investments in our research and development and innovation programs and to fund regular maintenance capital expenditures as necessary in order to ensure the adequate performance of our existing facilities.

Free Cash Flow Target

We intend to generate positive free cash flow at the corporate level by 2014 before asset disposals. We define free cash flow to mean Corporate EBITDA minus Corporate Capex minus interest expense on Net Corporate Debt minus income tax paid plus/minus change in Working Capital.

Our Business

Our operations are conducted through three operating segments: Engineering and Construction, Concession-Type Infrastructure and Industrial Production.

Engineering and Construction

Overview

Our Engineering and Construction activity is dedicated to the engineering and construction of electrical, mechanical and instrumental infrastructures in the energy, industrial, water transport and services sectors, as well as the development of innovative technology for our businesses. Our Engineering and Construction activity works mainly on an EPC work basis, with a strong technology and R&D&i component. Through our Engineering and Construction activity, we provide services throughout Europe, North America, Latin America, the Middle East, Africa and Asia-Pacific.

Our Engineering and Construction activity had revenue of €2,068.3 million and Consolidated EBITDA of €366.1 million for the six months ended June 30, 2014, and revenue of €4,808.5 million and Consolidated EBITDA of €806.5 million for the year ended December 31, 2013. In addition, our Engineering and Construction activity had total net fixed assets of €600.8 million as of June 30, 2014 and €608.7 million as of December 31, 2013.

Operations

Our core areas of operation are the development, design and construction on an EPC basis of renewable energy (solar, ethanol, biodiesel and biomass) plants; power transmission lines; conventional energy (co-generation and combined cycle) plants; water treatment, desalination plants, other hydraulic infrastructures and industrial installations.

Solar Energy

Within the field of solar energy, our Engineering and Construction activity has significant experience in designing and constructing some of the largest and most complex facilities. Our Engineering and Construction activity's work for the Solar segment of our Concession-Type Infrastructure activity includes the construction of 13 solar 50 MW trough power plants in Spain, three of which became operational during 2010, eight of which became operational during 2011 and 2012 and a further two which became operational at the end of the third quarter of 2013. We also brought into operation a 280 MW solar thermal project with 6 hours of molten salt storage in Solana, Arizona, the electricity from which we sell to the Arizona Public Service Company. We also have another 280 MW solar thermal project under construction in Mojave, California, which will sell electricity to the Pacific Gas and Electric Company. In South Africa, we are building two solar thermal projects, one solar thermal plant with 100 MW of capacity with parabolic trough technology, and a 50 MW tower solar thermal technology power plant, both of which will sell electricity to the local national grid for 20 years. Additionally, we have built the Shams-1 facility in Abu Dhabi (United Arab Emirates), with a power capacity of 100 MW. Our Engineering and Construction activity's work for other entities in the solar energy field includes the construction of the world's first integrated solar combined cycle ("**ISCC**") plant with 150 MW in Hassi R'Mel (Algeria), as well as the construction of a 470 MW power plant located in Ain-Beni-Mathar (Morocco), for the Office National de l'Electricité ("**ONE**"), the Moroccan power utility, both of which have recently entered into operation. Both plants, in Algeria and Morocco, will use combined cycle technology integrated with a solar field of parabolic trough collectors.

In June 2012, we were selected to construct and operate a 200 MW photovoltaic plant in Imperial Valley, California (United States). The construction of this plant started during the second half of 2012. The value of the contract is \$360 million.

In March 2013, we signed an agreement with BrightSource Energy Inc., a leading concentrating solar thermal technology company, to jointly develop, build and operate the world's two largest solar power towers in California. As joint partners, we will work together with BrightSource to obtain permits and financing for the 500 MW Palen Solar Electric Generating System. We will build the plants as the engineering, procurement and construction contractor, and will manage the operations and maintenance of the plants once they are operating. BrightSource will provide the solar field technology and plant design. Due to permitting delays, the development of this project is being delayed.

In January 2014, the Ministry of Energy of the Chilean Government and Corfo (*Corporación de Fomento de la Producción*) selected us to develop a 110 MW solar plant using tower technology with 17.5 hours of thermal energy storage using molten salts. The project will be located in the Atacama Desert, the region with the highest solar radiation concentrations in the world. It will be the first solar-thermal plant for direct electricity production in South America.

Transmission

Our Engineering and Construction activity has built more than 26,000 km of power transmission lines in the last ten years for internal and external customers, with a proven global expertise in both EPC and Operation and Maintenance. As of June 30, 2014, the Engineering and Construction activity had 2,768 km of high voltage power transmission lines in operation for proprietary use (of which 1,611 km are of Abengoa Yield) and 8,645 km of such lines under construction. As of June 30, 2014, of the total backlog of €7,671 million in the Engineering and Construction activity, approximately 27% was related to power transmission projects. In November 2013, we were chosen by the Brazilian National Electricity Agency ("**ANEEL**") to carry out a new 367 km electricity transmission project. In August 2013 we were selected by Ukrenergo, the national energy company of Ukraine, to develop an electricity transmission project that includes construction of a 187 kilometer line that will connect the Zaporizhia nuclear power plant with the substation in Kakhovska. In March 2013 we were selected by Mexico's Federal Electricity Commission (CFE) to develop a new electricity transmission project in Mexico. The contract includes the engineering, construction and start up of a 201 km transmission line and two substations. In 2013, we were also chosen by the Kenya Electricity Transmission Company of the Kenyan Ministry of Energy for an electricity transmission project that includes construction of a 132 km transmission line and extension of an existing substation in Kenya. In December 2012, we were chosen by ANEEL to carry out three new power transmission lines in Brazil, for a total of more than 2,400 km. During the previous year, our Engineering and Construction activity was awarded a contract by the state owned Power Grid Corporation of India Limited to construct a 170 km power transmission line in Karnataka (India), connecting various localities in the environs of the city of Bangalore.

Biofuels

In the biofuels sector, we have constructed several plants for our Industrial Production activity on a turnkey construction basis. These include an ethanol plant in Rotterdam (The Netherlands), with capacity to produce up to 480 million liters of ethanol from corn or wheat, and two ethanol plants in Indiana and Illinois (both in the United States), each with a capacity of 340 million liters. These three plants came into operation in 2010.

We are currently constructing one of the first and few commercial-scale second generation bioethanol production plants in Kansas, United States. This plant, with a 95 million liter capacity, will be able to convert cellulosic biomass, mainly agricultural waste products, into ethanol. This plant is expected to start operations in the third quarter of 2014.

Power Plants

We have significant expertise in the design and construction of conventional power plants. In June 2013 we were selected by the U.S. power company, Portland General Electric (PGE) to develop a 440-megawatt

(MW) combined cycle power plant to supply electrical energy to half the population of Portland, Oregon (USA). We will be responsible for the engineering, design and construction of the combined cycle power plant under the engineering, procurement and construction (EPC) "turnkey" system. The estimated time for the project is 36 months. In April 2012, we were selected by *Elektrociepłownia Stalowa Wola S.A.*, Poland's partially state-owned energy and gas distribution company, to undertake the engineering and construction of a 450 MW combined cycle plant in Poland, the largest such power plant to be in Poland. In December 2011, we were awarded a contract to construct a 640 MW combined-cycled electricity power plant for Mexico's Federal Electricity Commission, which is part of the Morelos Integral Project, an initiative to develop central Mexico's infrastructure. In December 2010, our Engineering and Construction activity announced plans to develop a 300 MW co-generation plant in Tabasco (Mexico), in partnership with General Electric Energy Financial Services. The plant, which entered into operation at the beginning of 2013, supplies the Nuevo Pemex gas processing complex with power and steam. Our Engineering and Construction segment's other power plant projects include providing repowering work on a 270 MW plant in El Sauz (Mexico), in 2003, where we converted the plant from a single cycle thermal plant to a combined cycle plant. We have also built five co-generation plants with over 250 MW in Spain and two co-generation plants, which use biomass as fuel, in Brazil with 70 MW of capacity each adjacent to our bioenergy plants.

Water Infrastructure

We have extensive experience bidding on and executing EPC projects in the water infrastructure sector globally. Our Engineering and Construction activity specializes in the design and construction of large desalination plants, particularly those using reverse osmosis technologies. Reverse osmosis is a common method of desalination consisting of the separation of the various components of a liquid solution through the forces applied to a semi-permeable membrane. In addition to reverse osmosis desalination plants, our Engineering and Construction activity designs and constructs waste water treatment stations and plants and designs, constructs and overhauls hydroelectric plants, irrigation lines and piping lines (including repairing, improving, reconstructing aqueducts, tunnels, drains, service roads and bridges, and installing monitoring and automation equipment). Since 2000, our Engineering and Construction activity has constructed seven desalination plants with capacity totaling 660,000 m³/day and it is currently constructing two additional plants with capacity totaling 260,000 m³/day. In January 2013, we were awarded a water project in Chile worth \$65 million to supply water to the mining industry in the Copiapó valley from the desalination plant in Caldera, in the Atacama region. In July 2012, we were chosen by ACWA Power International to develop a desalination plant using reverse osmosis technology in Barka, Oman. The project will have the capacity to supply more than 225,000 people with a capacity to desalinate 45,000 m³/day. We will be responsible for the design, engineering and construction of the plant as well as its subsequent operation and maintenance support. In October 2011, we were awarded a contract by Conagua, the Mexican water commission, to perform construction, equipping and maintenance works for a 139 km aqueduct project to supply potable water to 1.5 million people. In May 2014, we were chosen by the Moroccan National Electricity and Drinking Water Office (ONEE) to construct a new desalination plant in Agadir, Morocco. The plant, which uses proprietary reverse osmosis technology, will produce 100,000 m³ of drinking water per day and will supply around 800,000 people. In July 2014, we were selected to deliver 50,000 acre-feet per year of water to the city of San Antonio, Texas. We will lead a team of local sub-contractors and consultants within the Vista Ridge Consortium to design, build, finance and operate the infrastructure needed to deliver the water. We are currently bidding on multiple new EPC projects and considering new opportunities in various countries and regions, including China, India, Latin America, the Middle East, Africa and the United States.

Other Selected Expertise

Our Engineering and Construction activity also designs, supplies, manufactures, assembles and tests mechanical systems associated with hydroelectric power plants, thermal plants, combined-cycle plants, co-generation plants, gas plants, and the chemical and petrochemical industry. In addition, our Engineering and Construction activity provides thermal and acoustic insulation and supplies and installs refractory

material, fire protection systems and smoke sectoring curtains. Examples of such projects include repair and insulation works for Repsol, BP plc (“BP”) and *Compañía Española de Petróleos, S.A.*’s refineries in Spain. Our Engineering and Construction activity also provides installation and infrastructure services in chemical and gas production plants, nuclear and thermal power plants, and individual buildings.

Our Engineering and Construction activity includes EPC activities related to the engineering and installation of electrical, mechanical and instrumental infrastructure for the energy, industrial, transportation and services sectors. Our Engineering and Construction activity also provides electrical installations for thermal and combined-cycle power plants, substations and transformation centers, airport infrastructure, industrial infrastructure, individual buildings and maritime and railway transportation. Projects include providing the electrical installation for the electric substations of the *Alta Velocidad Española* (“AVE”) high speed train line running between Madrid and Valencia, Spain, commissioned in 2010.

Our Engineering and Construction activity provides engineering and integration services on an EPC basis for telecommunications networks. Its main telecommunications customer is *Telefónica de España, S.A.U.*, for which it provides construction and maintenance services. We also provide products and services for the deployment and installation of telecommunication networks.

Maintenance and Service

Our Engineering and Construction activity provides operation and maintenance services for conventional and renewable energy power plants. The operation and maintenance services for power plants include preventive, scheduled and corrective maintenance of equipment and systems and the operation thereof to ensure that the facility operates reliably and meets its technical specifications with a view to minimizing fuel consumption and greenhouse gas emissions while maximizing production. Our Engineering and Construction activity also provides various operation and maintenance services in chemical and gas production plants and nuclear and thermal power plants. Such work includes services provided for maintenance and instrumentation, operation and loading, and modifications for both the Almaraz and Trillo nuclear power plants in Spain.

Industry and Competition

The prevailing economic and financial climate is having a mixed impact on the industrial engineering and construction industry in developed markets. Investment and current projects under negotiation or in progress have slowed significantly, competition is robust, customers are facing significant difficulties in acquiring funding and their insolvency risk is high. However, there have been indications of increased public spending in infrastructure in the mid-term and growth in renewable energies. Other developments in this industry include increased international demand in both established and emerging markets for sustainable and renewable energy infrastructure. In addition, the strong growth in emerging markets in the last few years resulted in significant investment in energy infrastructure to meet increased demands resulting from the rapid industrialization of these economies. This investment is also to an extent, strategically driven, as local governments seek to stimulate their economies through infrastructure spending.

Our Engineering and Construction activity also performs significant work for our Concession-Type Infrastructure and Industrial Production activities. As a result, this activity is impacted by factors relevant to the industries in which those two activities operate.

According to the International Monetary Fund’s latest World Economy Outlook, global activity in 2014 is expected to strengthen moderately but the risks to the forecast remain to the downside. The strength is projected to come from the advanced economies, where output is expected to expand at a pace of about two percent in 2014, about three-quarters of a percentage point more than in 2013. Drivers of the projected uptick are a stronger U.S. economy, an appreciable reduction in fiscal tightening (except in Japan), and highly accommodative monetary conditions. Growth in the euro area will be held back by the very weak economies in the periphery. Emerging market and developing economies are projected to expand by about 2.8% in

2014, according to World Bank estimates, at lower rates than in the previous year, as fiscal policy is forecast to stay broadly neutral and real interest rates to remain relatively low. Unemployment will remain unacceptably high in many advanced economies as well as in various emerging market economies, notably those in the Middle East and Africa. Improving economic conditions, specially in some of our key markets such as the U.S. and some emerging markets, should continue to support Abengoa's growth in those geographies.

Our Engineering and Construction activity faces a different set of competitors depending on the type of project. Some of our key competitors in certain markets are: Técnicas Reunidas, Mitsubishi and Korean Electric Power Corporation ("KEPCO") in conventional energy; Actividades de Construcción y Servicios, S.A. ("ACS") and Acciona, S.A. ("Acciona") in solar power; Colombian grid operator ("ISA"), Eletrobrás and Cemig in power transmission in Latin America; and Elecnor, S.A., ACS, Acciona and Duro Felguera, S.A. in Spain. In the water area, our principal competitors in Spain are Obrascón Huarte Lain, S.A., Acciona, S.A. and Sacyr Vallehermoso, S.A. and internationally include Asociación de Empresas Constructoras de Ámbito Nacional ("SEOPAN"), Veolia Environnement S.A., Hyflux Ltd., Doosan Ltd., Suez Environnement S.A., GE Water and Process Technologies, Ltd., Fisia Italimpianti S.p.A and Aquatech, Ltd.

Customers and Contracts

Our Engineering and Construction activity's customer base includes public administrations and large corporations such as *Comisión Federal de Electricidad* and *Petróleos Mexicanos* ("Pemex") in Mexico, ONE in Morocco, *Agência Nacional de Energia Elétrica* ("ANEEL") (the Brazilian Electricity Regulatory Agency) in Brazil, Abu Dhabi Transmission & Despatch Company in the United Arab Emirates, *Agencia de Promoción de la Inversión Privada* ("Proinversion") in Peru and Power Grid Corporation of India Limited ("PowerGrid") in India. Our customer base also includes our own Concession-Type Infrastructure and Industrial Production activities. No individual customer represented more than approximately 10% of consolidated revenue of our Engineering and Construction activity.

In the water area of our Engineering and Construction activity, a limited number of EPC customers, many of which are government entities, currently account for a substantial portion of our revenue.

Revenue from the solar area of our Engineering and Construction activity comes from selling plants, equipment, technology and industrial heating installations. We sell solar plant equipment and technology to solar developers. In the industrial heat market, our clients are industrial players who engage us for the construction and operation of installations and for maintenance or heating services.

Our Engineering and Construction activity has different types of contracts depending on the nature of the work to be performed. Usually, for EPC projects, contracts are fixed price or cost-plus contracts, usually running for a short period of time of up to 36 months and end after completion and startup. For water projects, we perform turnkey EPC projects for the design and construction of infrastructures and plants, which we usually undertake at non-revisable fixed prices.

Suppliers

The principal products used by the Engineering and Construction activity include structural steel, metal plate, concrete, cable and various electrical and mechanical components such as turbines and boilers. These products and components are subject to raw material (aluminum, copper, nickel, iron ore, etc.) availability and commodity price fluctuations, which the Engineering and Construction activity monitors on a regular basis. Our Engineering and Construction activity has access to numerous global supply sources and we do not foresee any supply constraints that might have a material adverse effect on our business in the near term. However, the availability of these products, components and raw materials may vary significantly from year to year due to factors including customer demand, producer capacity, market conditions and specific material shortages.

Although water infrastructure plants utilize essential equipment, such as pumps or membranes, we procure such equipment in mature markets where we generally use a large number of suppliers and are not dependent on any single supplier.

We own interests in companies that produce and supply key components for the construction of CSP plants, such as Rioglass Solar, S.A. ("Rioglass Solar"), Construcciones Metalicas Mexicanas Comemsa, S.A. de C.V. ("**Comemsa**") and Europea de Construcciones Metalicas, S.A. ("**Eucomsa**"). Rioglass Solar specializes in the manufacture of parabolic-shaped mirrors, which are one of the key components for parabolic trough plants. Both Eucomsa and Comemsa focus on the manufacture of galvanized reticulated metal structures, such as steel towers for power transmission and structures for parabolic troughs and heliostats. Both Eucomsa and Comemsa undertake R&D&i activities in order to develop robust and reliable structures at lower costs. The Engineering and Construction activity also owns an interest in Sol3g, S.L., a company that designs and sells high-concentration PV modules.

The Technology and other segment includes those activities related to the development of solar-thermal technology, water management technology and innovative technology businesses such as hydrogen energy or the management of energy crops.

Concession-Type Infrastructure

Overview

Our Concession-Type Infrastructure activity oversees the construction, operation and maintenance of power transmission infrastructure, conventional (co-generation) and renewable energy (solar) plants, and water generation, transportation and management facilities (including desalination, treatment and water purification plants and water pipelines). Within this activity we have grouped five segments: Transmission, Solar, Water, Co-generation and other, and Abengoa Yield. We engage our Engineering and Construction activity for a significant portion of our Concession-Type Infrastructure activity's projects. We undertake these activities through our own asset-owned operations and through concession-based arrangements. These arrangements are governed by long-term sales arrangements such as take-or-pay contracts, feed-in tariff arrangements and power or water purchase agreements, with limited demand risk. In our Concession-Type Infrastructure activity, we participate in public tenders for the construction and operation of certain infrastructure assets.

Our work in concessions generally has four functions: building, operating, owning and transferring of infrastructure. Typically, the concessionaire agrees to construct an infrastructure project for the owner (usually a public administration in the case of public infrastructure projects), procures the necessary financing and operates it for a fixed or variable period of time and at the end of which the concession returns to the owner. During the term of the concession, the concessionaire has ownership of the infrastructure.

Our Concession-Type Infrastructure activity had revenue of €345.9 million and Consolidated EBITDA of €244.4 million for the six months ended June 30, 2014, and revenue of €518.9 million and Consolidated EBITDA of €317.7 million for the year ended December 31, 2013. In addition, our Concession-Type Infrastructure activity had total net fixed assets of €9,727.4 million and €8,967.0 million as of June 30, 2014 and as of December 31, 2013, respectively.

Transmission

The Transmission segment had revenue of €31.0 million and Consolidated EBITDA of €20.5 million for the six months ended June 30, 2014, and revenue of €47.5 million and Consolidated EBITDA of €27.7 million for the year ended December 31, 2013. In addition, our Transmission segment had total net fixed assets of €2,305.2 million and €2,091.2 million as of June 30, 2014 and as of December 31, 2013, respectively.

Within our Concession-Type Infrastructure activity, the Transmission segment operates power transmission lines for a certain period of time after construction is completed. The power transmission lines

are constructed by our Engineering and Construction activity. During the period of operation, our Concession-Type Infrastructure activity generates revenue by charging the electrical grid an annual fee for operating the power transmission lines. The prices of the service, fixed at the award of the project and regulated in the concession contract, are invoiced monthly to the companies that use the infrastructure. The amount the Engineering and Construction activity is able to charge is usually set in the concession contract. As of June 30, 2014, the Concession-Type Infrastructure activity had approximately 1,157 km of high-voltage power transmission lines in operation and a further 8,645 km of high voltage power transmission lines under construction that will come under the Concession-Type Infrastructure activity's operation upon their completion. In Brazil and Peru, the Concession-Type Infrastructure activity has 16 projects totaling 9,802 km of power transmission concessions.

<u>Country</u>	<u>Number of Projects⁽¹⁾</u>	<u>Total km of Power Transmission Concessions⁽¹⁾</u>
Brazil	14	9,315
Peru	2	487
Total	16	9,802

(1) Includes greenfield projects, projects under construction and projects in operation.

Over the course of 2011 and 2012, we entered into the Cemig Sales which comprised the following: (i) on June 2, 2011, we sold 50% of our interest in four project companies: STE—Sul Transmissora de Energia S.A. (“**STE**”), ATE Transmissora de Energia S.A. (“**ATE**”), ATE II Transmissora de Energia S.A. (“**ATE II**”) and ATE III Transmissora de Energia S.A. (“**ATE III**”); (ii) also on June 2, 2011 we sold 100% of the share capital of NTE Nordeste Transmissora de Energia S.A. and; (iii) on March 16, 2012, we signed an additional share purchase agreement to sell our remaining 50% interest in project companies STE, ATE, ATE II and ATE III (on June 30, 2012, all closing conditions were fulfilled). See “*Management’s Discussion and Analysis of Financial Condition and Results of Operations—Factors Affecting the Comparability of Our Results of Operations—Acquisitions and Divestments—Sale of Brazilian Transmission Line Assets*” for further discussion.

In June 2012, we were awarded the construction, operation and maintenance of an 80 km power transmission line by Sierra Gorda Sociedad Contractual Minera, known as the “Sierra Gorda” project, to cross the Atacama Desert from North to South, linking various mining centers in Northern Chile. The concession is for a period of 20 years and portions of the line are expected to begin operation in 2013.

In December 2012, we were awarded by ANEEL the construction, operation and maintenance of three 500 kV AC power transmission lines, which will cover a total of 2,472 km across 8 states in Brazil.

The projects began in March 2013 and are expected to come into operation in the same month in 2016. The first concession comprises four transmission lines covering 1,816 km and two electricity stations in the states of Tocantins, Piauí, Bahia and Maranhao; while the second concession involves the construction of a 286 km transmission line and two substations in the states of Ceará, Paraíba and Rio Grande do Norte. The third and final concession won by Abengoa consists of a single transmission line of 370 km between the Estreito and Itabirito 2 stations in the state of Minas Gerais.

In February 2013, we were selected by the Peruvian Ministry of Energy and Mining through the private investment promotion agency Pro Inversion, the construction, operation and maintenance of three power transmission lines covering a total distance of 354 km in Peru.

In May 2013, we were chosen by ANEEL to carry out the engineering, design, construction, maintenance and commission of three new electricity concessions in Brazil which will cover 2,920 km. The first concession comprises a transmission line covering 615 km in the states of Pernambuco, Piauí and Ceará. The second concession involves the construction of a 544 km transmission line in the states of Maranhao, Piauí and

Ceará. The third concession consists of various transmission lines with a combined length of 1,761 km, construction of a new substation and extending a further three substations, all located in the states of Pará and Tocantins. A further transmission line covering 367 km was awarded by ANEEL in November 2013.

In July 2014, we were awarded our first concessions project for two electricity transmission lines in Asia, specifically in India, representing our first Asian contract. We will be responsible for engineering, designing and constructing two transmission lines totaling 134 km. The first concession is a 400 kV line covering 113.7 km, of which 4.4 km are underground, which will connect Dahej with the city of Vadodara. The second line will have a 220 kV capacity and be 20.62 km long, running between the district of Bhestan and the city of Navsari. Both lines are located in the state of Gujarat and will provide the Vadodara and Navsari districts with a quality energy supply under this concession. The project is expected to benefit around ten million people.

A complete list of our power transmission line concessions as of June 30, 2014 is set out below:

	Project	Kilometers	Abengoa Stake	Concession-Type Contract	Concessionaire	Status (Operational Start Date)
Brazil	ATE IV (São Mateus)	85	100%	BOOT	ANEEL	Operating (Sept-10)
	ATE V (Londrina)	132	100%	BOOT	ANEEL	Operating (Oct-10)
	ATE VI (Campos Novos)	131	100%	BOOT	ANEEL	Operating (Jan-10)
	ATE VII (Foz do Iguaçu)	115	100%	BOOT	ANEEL	Operating (Aug-09)
	Manaus	586	50.5%	BOOT	ANEEL	Operating (Q1 2013)
	Norte Brasil	2,375	51%	BOOT	ANEEL	Construction (Q3 2014)
	ATE VIII	108	50%	BOOT	ANEEL	Operating (Feb-14)
	ATE XVI	1,816	100%	BOOT	ANEEL	Pre-Construction (Q3 2016)
	ATE XVII	286	100%	BOOT	ANEEL	Pre-Construction (Q2 2016)
	ATE XVIII	383	100%	BOOT	ANEEL	Pre-Construction (Q1 2016)
	ATE XIX	630	100%	BOOT	ANEEL	Pre-Construction (Q3 2016)
	ATE XX	541	100%	BOOT	ANEEL	Pre-Construction (Q3 2016)
ATE XXI	1,760	100%	BOOT	ANEEL	Pre-Construction (Q3 2016)	
ATE XXII	367	100%	BOOT	ANEEL	Pre-Construction (Q1 2017)	
Total		9,315				
Peru	ATN 2	132	100%	BOOT	MEM	Operating (Q2 2014)
	ATN 3	355	100%	BOOT	MEM	Construction (Q3 2016)
Total		487				
Total Power Transmission Lines		9,802				

"BOOT" means Build, Own, Operate and Transfer.

"MEM" means the Ministerio de Energía y Minas.

Pre-construction includes projects that have been awarded for which financing has not yet been secured.

Solar

The Solar segment had revenue of €157.6 million and Consolidated EBITDA of €107.3 million for the six months ended June 30, 2014, and revenue of €258.7 million and Consolidated EBITDA of €159.5 million for the year ended December 31, 2013. In addition, our Solar segment had total net fixed assets of €2,916.2 million and €2,763.6 million as of June 30, 2014 and as of December 31, 2013, respectively.

Within our Concession-Type Infrastructure activity, our Solar segment designs, develops, oversees the engineering and construction of and operates solar power plants and installations. Our Solar segment operates in Europe, the United States, Latin America, the Middle East, Africa, India, China and Australia. Our Solar segment has invested in solar power plants and has developed expertise in the three core solar technologies—solar towers, parabolic troughs and photovoltaics. We are also working to develop more efficient solar technologies. Our Solar segment is the leader in the Spanish solar industry in terms of MW allocated in the Pre-Allocation Registry of the Ministry of Industry, Tourism and Trade (having been awarded 13 plants totaling 650 MW). We also operate an integrated solar combined-cycle power plant in Algeria, with a capacity of 150 MW.

Our Solar segment had a portfolio of approximately 843 MW of plants in operation and 150 MW of plants under construction and 320 MW under pre-construction as of June 30, 2014. The tables below provide breakdowns of our thermosolar and photovoltaic plants, respectively, as of June 30, 2014.

<u>Location</u>	<u>Operational Name</u>	<u>Production Capacity</u>	<u>Status</u>
CSP Spain			
<i>Solúcar Platform, Seville</i>	PS10	11 MW	In operation
	PS20	20 MW	In operation
	Solnova 1	50 MW	In operation
	Solnova 3 & 4	50 MW each	In operation
<i>Écija Platform, Seville</i>	Helioenergy 1 & 2	50 MW each	In operation
<i>Extremadura Platform, Cáceres</i>	Solaben 1 & 6	50 MW each	In operation
<i>Ciudad Real Platform, Castilla-La Mancha</i> .	Helios 1	50 MW	In operation
	Helios 2	50 MW	In operation
<i>Córdoba Platform, Córdoba</i>	Solacor 1 & 2	50 MW each	In operation
Chile	Corfo, Atacama	110 MW	Pre-Construction ⁽¹⁾
Abu Dhabi	Shams 1	100 MW	In operation
Algeria	Hassi-R' Mel	150 MW	In operation
South Africa	Kaxu Solar One	100 MW	Under construction
	Khi Solar One	50 MW	Under construction
	Xina Solar One	100MW	Pre-Construction ⁽¹⁾
Israel	Ashalim	110 MW	Pre-Construction ⁽¹⁾

<u>Location</u>	<u>Operational Name</u>	<u>Production Capacity</u>	<u>Status</u>
PV Spain			
<i>Solúcar Platform, Seville</i>	Seville PV	1.2 MW	In operation
<i>Solúcar Platform, Seville</i>	Casaquemada	1.9 MW	In operation
<i>Jaén</i>	Linares	1.9 MW	In operation
<i>Seville</i>	Las Cabezas	5.7 MW	In operation
<i>Seville</i>	Copero	1.0 MW	In operation

(1) Pre-construction includes projects that have been awarded for which financing has not yet been secured.

Solar Power Plants under construction and development

Our Solar segment oversees the engineering and construction of our solar power plants. As of the date of this Listing Memorandum, we oversee the engineering and construction of 2 solar power plants with a total installed capacity of 150 MW in South Africa. We have also 110 MW in Israel, 100 MW in South Africa and 110 MW in Chile in Pre-Construction.

In the international market, during 2013, we continued construction of the following plants: Shams 1, a 100 MW CSP plant in the United Arab Emirates, brought into operation during the first quarter of 2013;

Solana, a 280 MW CSP plant, with six hours of molten salt storage, located in Gila Bend, Arizona, which entered into operation in October 2013; a 280 MW CSP plant in Mojave, California; a 100 MW CSP plant, with three hours of molten salt storage, and a 50 MW Solar Tower technology CSP plant, with two hours of molten salt storage, both located in Upington, South Africa.

The process of constructing a CSP solar power plant takes approximately 18 to 36 months, depending on the size of the plant and whether it will have capacity to store solar energy. The process of constructing a PV plant is generally much shorter, typically six months or less. The construction of a plant is performed by a contractor pursuant to a turnkey construction contract entered into based on market rates. Our Engineering and Construction activity is the principal contractor for our Concession-Type Infrastructure activity to construct its CSP and PV projects. On occasion, we enter into turnkey construction contracts with temporary business associations (*unión temporal de empresas*) in which our Engineering and Construction activity or other companies may participate. We undertake a large part of the basic and sophisticated engineering work in the plants using our own solar technologies.

We are involved in the development of solar power plants from the initial stage. These activities principally involve site selection, securing land rights, assessment of solar resources, administrative processing and obtaining relevant authorizations and connections to the required power grid and related infrastructure. These activities average between one and three years for CSP and PV plants but can vary significantly between regions and countries. Once a potential site has been located and the relevant land rights have been secured, we proceed to present the project to the appropriate authorities with respect to both the generation facilities and evacuation infrastructure. During the administrative process, we are required to submit extensive documentation to the relevant authorities for each site in order to obtain the necessary permits, licenses and authorizations. Depending on the jurisdiction, this process may involve simply an application to the competent public authority or, in addition, a submission of the project for public consultation, such as is generally the case in the United States.

In recent years, we have focused on developing solar power plants in Spain. As a result, we currently have a portfolio of 650 MW which have been filed with the power register (Registro de Potencia) of the Spanish Ministry of Industry, Tourism and Trade, and therefore have the licenses required to commence construction. Solar power plants in Spain work under regulated schemes, establishing a remuneration for all the energy produced. This scheme has been recently implemented after the latest sector reform, as described in the "Regulation" section. In Spain, we have partnered with a number of companies, including E.ON, Itochu Corporation and JGC Corporation, to construct and operate CSP plants.

In California, we started construction in 2011 on the Mojave power plant equipped with parabolic trough technology in the Mojave Desert and benefitting from a power purchase agreement ("**PPA**") signed in 2009 with the electric utility Pacific Gas and Electric Company. This project obtained a \$1,202 million loan guarantee from the DOE in order to support its construction and start-up of the Mojave Solar power plant. When it is brought on line, Mojave Solar, with a gross generation capacity of 280 MW, will be able to supply power to 90,000 households. Mojave was transferred to Abengoa Yield as part of the Abengoa Yield Asset Transfer.

In July 2011, we launched the first hybrid solar-gas plant in Hassi-R' Mel (Algeria), with 150 MW capacity that will generate electricity using both natural gas and solar energy. This combination of conventional and sustainable technologies enables energy to be produced from the sun without compromising the functionality and stability of the power grid.

In December 2011, the South African Department of Energy selected us to construct and operate a 100 MW parabolic-trough solar plant and a 50 MW superheated steam tower technology solar plant together with our joint venture partner, Industrial Development Corporation. We own a 51% interest in such joint venture. These plants obtained non-recourse financing throughout 2012 and are under construction at the date of this annual report. In August 2013, Abengoa achieved an important milestone in the department of these projects with the announcement of the completion of the construction of the Khi Solar One tower.

In June 2013 a joint company created by Abengoa and Shikun & Binui, an Israeli based global infrastructure group, was selected to build, own and operate a 110 MW solar trough plant with storage located in the Negev desert. Construction is expected to start in 2014 in the Ashalim area of the Negev Desert once the power purchase agreement and the project financing are closed.

In October 2013, the South African Department of Energy selected us to construct and operate a 100 MW parabolic trough solar plant with 5 hours of thermal energy storage. Xina Solar One will belong to a consortium, 40% of which is controlled by Abengoa. Other constituents of the consortium are the Industrial Development Corporation (IDC), the Public Investment Corporation (PIC), and the KaXu Community Trust.

In January 2014, the Ministry of Energy of the Chilean Government and Corfo (*Corporación de Fomento de la Producción*) selected us to develop a 110 MW solar plant using tower technology with 17.5 hours of thermal energy storage using molten salts. The project will be located in the Atacama Desert, the region with the highest solar radiation concentrations in the world. It will be the first solar-thermal plant for direct electricity production in South America.

Solar Power Plants in Operation

Plants in operation include the production and sale of electricity as well as the operation and maintenance of solar power plants. Once a CSP or PV solar power plant enters into operation, it generates revenue by selling the electricity generated. The production level and price are two factors that directly affect the amount of revenue generated. Electricity sales are therefore critical to maximize income from electricity generation. The mechanisms used to determine the sale price of electricity vary from jurisdiction and include regimes based on regulated tariffs to those where an ad hoc tariff is negotiated and agreed for each project. Once the plant is operational, we also provide all materials, tools and labor and cover all costs of staffing in connection with the plants preventive and scheduled maintenance.

In CSP, we have eighteen commercial plants in operation totaling 1,223 MW. The first to become operational was PS10, an 11 MW solar tower power plant that commenced operations in 2007. Two years later, PS20, a 20 MW solar tower plant, started up, also located in the Solúcar Platform. In 2008, a solar trough plant was installed at PS10, the first commercial operating solar trough plant in Spain and representing part of our continuing efforts to increase our familiarity with the latest technologies. In 2010, three 50 MW trough technology plants commenced operations, making for a total of 181 MW of CSP in operation. In 2011, 2012, and as of the date of this annual report, twelve plants commenced operations: ten 50 MW plants, all in Spain (Helienergy 1 and 2, Solacor 1 and 2, Solaben 2 and 3, Helios 1 and 2, Solaben 1 and 6), a 150 MW hybrid solar- gas plant in Hassi R' Mel (Algeria) and the first large scale concentrating solar power plant in the Middle East, Abu Dhabi (United Arab Emirates), with 100 MW of power output capacity. In October 2013 we successfully brought into operation Solana with a generation capacity of 280 MW, six hours of molten salt heat storage, and the ability to supply power to 70,000 homes. In June, 2014, we transferred to Abengoa Yield the Solaben 2, Solaben 3, Solana and Mojave plants.

In the field of PV energy, our first 1.2 MW PV plant, located in Seville (Spain), has now completed its third year of commercial production, thereby demonstrating the commercial viability of the low concentration technology it utilizes. The 1 MW Copero plant in Seville (Spain) is also in operation, as well as the 1.9 MW Casaquemada PV plant in Sanlúcar la Mayor, Seville (Spain), the 1.9 MW Linares PV plant in Linares (Spain) and the 5.7 MW Las Cabezas PV plant in Las Cabezas de San Juan, Seville (Spain), all of which have reached expected levels of production.

Water Infrastructure

The Water segment had revenue of €20.6 million and Consolidated EBITDA of €14.0 million for the six months ended June 30, 2014, and revenue of €40.2 million and Consolidated EBITDA of €28.1 million for the year ended December 31, 2013. In addition, our Water segment had total net fixed assets of €464.3 million and €452.6 million as of June 30, 2014 and as of December 31, 2013, respectively.

Within our Concession-Type Infrastructure activity, our Water segment constructs and operates water generation, transportation and management facilities, including desalination, treatment and water purification plants and water pipelines pursuant to long-term concession agreements. In recent years, the number of partnerships between the public and the private sectors to manage and execute water infrastructure projects on a concession basis has grown significantly. The form of a particular concession may vary significantly depending on the type of project, the country involved, the individual public-private negotiations and the specific purpose of the concession.

We currently have a portfolio of ten operational concession projects. We are in the process of constructing two additional concessions in Tenes (Algeria) (200,000 m³/day) and a desalination plant in Nungua (Ghana) (60,000 m³/day). These projects are scheduled to be in operation between 2014 and 2015. In addition, we have also several plants in Pre-construction:

- Abengoa has been chosen by the Moroccan National Electricity and Drinking Water Office (ONEE) to construct a new desalination plant in Agadir, Morocco and operate it for 20 years. The project will draw on Abengoa's technological capabilities, based on a desalination method using a water ultrafiltration pre-treatment that will optimize the advanced reverse osmosis process. It will be Morocco's largest capacity desalination plant (100,000 m³/day); and
- Abengoa has been selected to deliver water to the city of San Antonio, Texas (175,000 m³/day). Abengoa will lead a team of local sub-contractors and consultants within the Vista Ridge Consortium to design, build, finance and operate the infrastructure needed to deliver the water. The water will be delivered from Burleson County and contracted for a period of 30 years. Construction is expected to begin in 2015.

The table below shows certain information regarding our current operating concessions in our Water segment as of the date of this Listing Memorandum. All such concessions were built and are currently operated under BOOT schemes.

Project Name	Location	Type of Plant	Year of Commencement	Duration	Capacity	Abengoa Equity Interest
Iniciativas Hidroeléctricas de Aragón y Cataluña, S.A	Huesca and Lerida, Spain	Hydroelectric plant	1997	50 years	12 GWh/year	95%
Iniciativas Hidroeléctricas, S.A	Seville, Spain	Hydroelectric plant	2003	35 years	10 GWh/year	50%

Co-generation Power Plants

The Co-generation and other segment had revenue of €12.8 million and Consolidated EBITDA of €2.5 million for the six months ended June 30, 2014, and revenue of €37.9 million and Consolidated EBITDA of €7.3 million for the year ended December 31, 2013. In addition, our Co-generation and other segment had total net fixed assets of €830.4 million and €445.9 million as of June 30, 2014 and as of December 31, 2013, respectively.

Within our Concession-Type Infrastructure activity, our Co-generation and other segment participates in public tenders for the development and operation of combined heat and power plants under concession schemes. We also seek opportunities in the private sector.

Abengoa Yield

The Abengoa Yield segment had revenue of €123.9 million and Consolidated EBITDA of €100.1 million for the six months ended June 30, 2014, and total net fixed assets of €3,211.3 million as of June 30, 2014.

The portfolio of Abengoa Yield consists of the following assets:

- Renewable energy: renewable energy assets include (i) two concentrated solar power (CSP) plants in the United States, Solana and Mojave, each with a gross capacity of 280 MW; (ii) one on-shore wind farm in Uruguay, Palmatir, with a gross capacity of 50 MW; and (iii) two CSP plants in Spain, Solaben 2 and Solaben 3, with a gross capacity of 50 MW each.
- Conventional power: the conventional power asset consists of Abengoa Cogeneracion Tabasco, or ACT, a 300 MW cogeneration plant in Mexico.
- Electric transmission lines: the electric transmission line assets include (i) two lines in Peru, ATN and ATS, spanning a total of 931 miles; and (ii) three lines in Chile, Quadra 1, Quadra 2, and Palmucho, spanning a total of 139 miles.

In addition, Abengoa Yield owns a preferred equity investment in Abengoa Concessoes Brasil Holding (“ACBH”), a subsidiary holding company of Abengoa that is engaged in the development, construction, investment and management of contracted concessions in Brazil, consisting mostly of electric transmission lines.

This preferred equity investment grants Abengoa Yield the following rights:

- During the five-year period commencing on July 1, 2014, Abengoa Yield has the right to receive, in four quarterly installments, a preferred dividend of \$18.4 million per year. We in turn have agreed to forego our right to certain dividends from Abengoa Yield if such preferred dividend is not received by it.
- Following the initial five-year period, Abengoa Yield will have the option to (i) remain as preferred equity holder receiving the first \$18.4 million in dividends per year that ACBH is able to distribute or (ii) exchange the preferred equity for ordinary shares of specific project companies owned by ACBH.

The table below provides an overview of Abengoa Yield’s current assets (excluding the exchangeable preferred equity investment in Abengoa Concessoes Brasil Holding):

Assets	Type	Ownership	Location	Capacity (Gross)	COD/ Expected COD	Contract Years Left
Solana	Renewable (CSP)	100%	Arizona (USA)	280 MW	Q4 2013	29
Mojave	Renewable (CSP)	100%	California (USA)	280 MW	Q3/Q4 2014	25
ACT	Conventional Power	100%	Mexico	300 MW	Q2 2013	19
ATN	Transmission line	100%	Peru	362 miles	Q1 2011	27
ATS	Transmission line	100%	Peru	569 miles	Q1 2014	30
Quadra 1 & Quadra 2	Transmission line	100%	Chile	81 miles	Q2 2014 & Q1 2014	21
Palmucho	Transmission line	100%	Chile	6 miles	Q4 2007	23
Palmatir	Renewable (Wind)	100%	Uruguay	50 MW	Q2 2014	20
Solaben 2 & Solaben 3	Renewable (CSP)	70%	Spain	2x50 MW	Q2 2012 & Q4 2012	24

Industry and Competition

Over the past 24 months, the energy landscape has changed significantly in part due to: political upheaval and civil unrest in certain countries in the Middle East and Africa; the incident at the Fukushima Daiichi nuclear plant in Japan; new moratoria on shale gas drilling in the Canadian province of Quebec and France; expectations regarding economic growth in China; and uncertainty surrounding global agreements regarding greenhouse gas emissions including Canada’s withdrawal from the Kyoto Protocol.

Despite these changes and the uncertain economic environment, world energy demand is expected to increase due principally to demand growth experienced by many large non-OECD economies such as China and India (40% and 18% share of net global energy demand growth from 2011 to 2035 according to World Energy Outlook 2013) and renewable energy is expected to play a more important role in satisfying energy demands which may lead to more projects available under BOOT schemes.

According to the International Energy Agency (“IEA”), global energy consumption is expected to gradually increase to 17,400 Mtoe by 2035, a 33% increase from 2011. In the same period, demand for renewable energy (wind, solar, geothermal, marine, biomass and hydro) is expected almost double from 1,727 Mtoe in 2011 to 3,059 Mtoe in 2035, and the share of renewables in the electricity generation market is expected to increase from 21.4% in 2011 to 43.8% in 2035 (Source: World Energy Outlook 2013, IEA).

In order to meet growing energy demand, significant investment must be made in the power sector in order to increase installed production capacity and to expand and improve T&D infrastructure. The IEA estimates a total investment of \$17 trillion for the 2013-2035 period, or an average of \$740 billion per year as follows:

- total investment in new power plants estimated at \$9,860 billion, out of which \$6,113 billion or 62% corresponds to renewables, led by hydro and solar PV;
- total investment in power transmission infrastructure estimated at \$2.982 billion globally, of which two thirds takes place in non-OECD countries; and
- total investment in biofuels of \$330 billion, out of which \$240 billion is expected to be in bioethanol.

(Source: World Energy Outlook 2013)

According to Bloomberg New Energy Finance, in 2010 renewable energy for the first time surpassed fossil fuels in new power plant investments. Investment in new wind, solar, biomass and marine projects totaled \$187 billion compared with \$157 billion for fossil fuels (excluding nuclear energy). 2010 was also the first time that expenditure in developing countries, mainly China, exceeded that in the developed world and this trend is expected to continue. Investment in renewable energy may double to \$395 billion per year by 2020 led by growth in offshore wind and solar projects.

We face several different competitors in our Concession-Type Infrastructure activity. In the Transmission segment, our principal competitors are Eletrobrás, Cemig and ISA. In the Water segment, our principal competitors are Veolia Environnement S.A., Hyflux Ltd., Doosan Ltd., Suez Environnement, S.A, Fisia Italmimpianti S.p.A. and Aquatech, Ltd. The principal competitors of our Solar segment along the CSP value chain are Spanish companies ACS, SENER Ingeniería y Sistemas, S.A. (“**SENER**”) and Acciona, and the American companies Florida Power Corporation and The Light Group LLC in the promotion and operation activities, and BrightSource Energy Inc., Ausra/Areva, and SkyFuel Inc. in technology. In PV, there are multiple competitors in both promotion and technology. In the Co-generation and Other segment, we have numerous international and regional competitors, including utilities. Our principal competitors in the Spanish co-generation market are Iberdrola—Cogeneración, S.R.L.U., Endesa Cogeneración y Renovables, S.A.U., Sacyr Vallehermoso, S.A., Gas Natural SDG, S.A. (Gas Natural Fenosa), DETISA and Dragados, S.A. In the international co-generation market, our competitors include ACS, Iberdrola Ingeniería y Construcción, S.A.U., Cobra Instalaciones y Servicios, S.A., Grupo Isolux Corsán, S.A., Samsung Group and Itochu Corporation.

Customers and Contracts

Revenue from our Concession-Type Infrastructure activity comes from selling water, electricity, and power transmission line capacity. Our customers vary from governments in countries where feed-in-tariffs are in place (in the case of Spain, utilities are the electricity offtakes; but a government agency pays the tariff and premium), to electrical and water utilities, with which we would typically sign power purchase agreements.

Our Concession-Type Infrastructure activity primarily utilizes concession contracts, which include the operation and maintenance of the asset for a significant period of time, typically 20 to 30 years. There are several forms of concession contracts, but the most frequently used are BOO and BOOT.

Industrial Production

Overview

Our Industrial Production activity develops and produces biofuels for transportation which are used as components of gasoline or for direct blending with gasoline or diesel. We also produce DGS, sugar from our production plants in Brazil, electricity and carbon dioxide as by-products of the ethanol production process for sale to third parties. This activity includes the segment of Biofuels. Our Biofuels segment is located in Spain, France, The Netherlands, the United States and Brazil.

Our Biofuel segment had revenue of €991.3 million and Consolidated EBITDA of €84.2 million for the six months ended June 30, 2014, and revenue of €2,029.1 million and Consolidated EBITDA of €240.9 million for the year ended December 31, 2013. In addition, our Industrial Production activity had total net fixed assets of €2,502.7 million and €2,454.3 million as of June 30, 2014 and as of December 31, 2013, respectively.

The Biofuels segment is dedicated to the production and development of biofuels, primarily ethanol for transport that employs cereal and sugarcane as raw materials. Our ethanol production facilities in Europe, the United States and Brazil have a combined production capacity of 2,915 million liters (“**MI**”) in operation. We also have a biodiesel plant in Spain, with a capacity of 225 MI per year. We are the only company with a significant presence in Europe, the United States and Brazil, the three largest biofuel markets in the world.

Ethanol is used for Ethyl Butyl Ether (“**ETBE**”) production, as a component of all gasoline or for direct blending with gasoline. Biodiesel is used for direct blending with diesel or in a pure form as a substitute for diesel. We also produce by-products from our biofuel production, including DGS, sugar, electricity and carbon dioxide, which are sold to third parties.

We are Europe’s largest bioethanol producer with an annual production capacity of 1,275 MI. We operate three ethanol plants in Spain in Cartagena, Murcia; Teixeira, La Coruña; and Babilafuente, Salamanca. These three ethanol plants have a combined annual production capacity of 545 MI. In addition, we operate a fourth plant in Lacq (France), which has an annual production capacity of 250 MI; a new 480 MI ethanol production capacity plant in Rotterdam (The Netherlands) commenced operation in September 2010 and is Europe’s largest ethanol plant by production capacity.

We also produce biodiesel at a production plant in San Roque, Cádiz (Spain), which began supplying biodiesel in March 2009 and produces 225 MI of biodiesel annually. This plant is located on the premises of a CEPSA refinery; CEPSA is also the customer for a significant portion of the facility’s output.

We are one of the largest ethanol producers in the United States, with an annual production capacity of over 1,440 MI. Most of the ethanol produced in the United States is marketed in the form of e10 (90% gasoline and 10% ethanol), although sales of e85 (a mixture of 15% gasoline and 85% ethanol) have been increasing steadily. In September 2011, we received a \$132 million loan guarantee from the DOE to support the funding for the construction of the first commercial scale biorefinery facility to produce renewable ethanol fuel from cellulosic plant fiber in Hugoton, Kansas. Our plants of Colwich (Kansas) and Portales (New Mexico) are temporarily shut down since the first quarter of 2012 due to unfavourable market conditions.

We are a significant producer of ethanol and sugar in Brazil, operating three sugarcane ethanol plants which have a crush consumption capacity of 6.5 million tons of sugarcane for the production of approximately 200 MI of ethanol and a sugar production capacity of 645,000 tons per year. Brazil is one of the world’s largest markets for ethanol and ethanol production and is expected to continue as such, due to the success of flex-fuel vehicles that can run on either gasoline or ethanol. Flex-fuel vehicles currently account

for nearly 90% of the vehicles sold in Brazil. In 2010, we finished the construction of two energy co-generation units at our sugarcane ethanol plants, each with an installed capacity of 70 MW and one of which can be upgraded to 140 MW. The plants use sugarcane “bagasse” as the raw material to fuel their boilers, which produce the steam to generate electricity and heat for production processes. These plants became operational in August and September 2010, and their excess output is fully connected to the power grid operated by Eletrobrás, a major Brazilian power utility.

We believe there is a significant market opportunity for us in the second- generation biofuels industry, which utilize biomass rather than cereal and other food crops as the primary raw material. We have invested continually in R&D&i over the past decade and have developed our own proprietary process and enzymes. We have been operating a pilot plant in York, Nebraska (United States) since 2007 and a demonstration plant in Salamanca, Spain since 2009. We have commenced construction of our first second-generation commercial plant in Hugoton, Kansas (United States), for which we were awarded \$132 million loan guarantee financing from DOE and \$88 million in grants since 2007 from the DOE. This plant is expected to start operations in the third quarter of 2014 and will result in significant cost saving, while also providing opportunities to license its biomass technology to third parties. In addition, the plant will position us well to potentially enter the industries of biomaterials and bioproducts.

In April 2013, we began operating the first demonstration plant using waste-to-biofuels technology. The demonstration plant in Babilafuente (Salamanca, Spain) has the capacity to treat 25,000 tons of municipal solid waste from which up to 1.5 million liters of bioethanol will be produced for use as fuel.

A list of our biofuel production facilities as of June 30, 2014 is set out below:

Region	Plant	Ethanol Capacity (million liters per year)	Status
Europe	Murcia, Spain	150	Operating since 1999
	La Coruña, Spain	195	Operating since November 2003
	Salamanca, Spain	200	Operating since April 2006
	Lacq, France	250	Operating since June 2007
	Rotterdam, The Netherlands	480	Operating since September 2010
	San Roque, Spain	225 (biodiesel)	Operating since February 2009
United States	York, Nebraska	208	Acquired in November 2001
	Colwich, Kansas	95	Acquired in November 2001
	Portales, New Mexico	114	Acquired in November 2001
	Ravenna, Nebraska	341	Operating since September 2007
	Evansville, Indiana	341	Operating since Q1 2010
	Tricity, Illinois	341	Operating since Q1 2010
	Hugoton, Kansas	95	Expected operation in Q3 2014
Brazil	São Luis, São Paulo	3 million tons crushed capacity, 91 Ml of ethanol, 285 thousand tons of sugar	Acquired in September 2007
	São João, São Paulo	3.5 million tons crushed capacity, 144 Ml of ethanol, 360 thousand tons of sugar	Acquired in September 2007
	Santo Antonio de Posse, São Paulo	0.4 million tons crushed capacity; 30 thousand tons of sugar	Under leasing agreement

All of the above plants (other than those in York, Nebraska; Colwich, Kansas; Portales, New Mexico—all in the United States—and those in Brazil) were constructed by our Engineering and Construction segment.

Operations

The operations of our Industrial Production activity’s Biofuels segment represents a single integrated process that includes production; raw materials procurement; ethanol origination; and the trading of ethanol, DGS and sugar.

Production

We produce ethanol at our facilities in Europe, the United States and Brazil from cereal grains and sugarcane by means of biochemical processes and treatments. One of our European production facilities also generates biodiesel. In the process of producing ethanol and biodiesel, we generate various secondary byproducts, including DGS, sugar, electricity and carbon dioxide, which are collected and sold to third parties.

Procurement of Raw Materials

Raw materials account for approximately 60% to 70% of the production costs of biofuels. The most important typically for production are corn, wheat, barley and sorghum. The production of biodiesel relies on various oils, including soybean and palm. Since operations began, the Biofuels segment of our Industrial Production activity has built up experience in the supply and logistics of commodities. We have also established direct supply agreements with farmers and traders to secure the necessary volume of raw materials for our plants.

In Brazil, we grow sugarcane while preserving sustainable rural development, biodiversity and regional economic growth. Our production plants are supplied through agreements with landowners, performing the required tasks for use of the land, and by providing the necessary resources and advice to farmers in order to start production.

Ethanol, DGS and Sugar Trading

We trade in ethanol, DGS and sugar to manage our demands for these products. We have established offices in key markets for global ethanol trading, including Rotterdam (The Netherlands); St. Louis, Missouri (United States); and São Paulo (Brazil). Market fluctuations, political conditions in different geographical areas and other factors affecting our business, both in terms of acquisition of raw materials and in the production of marketed products, are analyzed globally to obtain a better view of international markets.

As a result, our trading activities are designed to optimize our operations, grain procurement, hedging and risk. As a risk-mitigation element, the Company sets daily limits or “stop losses” for each strategy, depending on the markets in which it operates, the financial instruments purchased and the risks defined in the transaction.

The term trading includes “buy sell transactions” that the company uses for a variety of cases and which are used in the ordinary course of our business: (1) short or long positions: the Company may enter into a buy sell transaction to cover a long or short production position (2) logistical swaps: the Company may enter into a buy sell transaction in order to increase margins based on logistics (3) market and economic opportunities: the Company’s trading department seeks for market and economic opportunities that arise. An example is a business opportunity with a third party to enter into a transaction for a buy sell trade that is a fully negotiated deal.

In the ordinary course of business, the Company uses the same financing policies applicable to the rest of the Company, such as factoring and confirming and other sources of financing.

Products

Ethanol

We produce ethanol at our facilities in Europe and the United States from cereal grains, and in Brazil from sugarcane. Ethanol is obtained to produce either ETBE or for direct blending with gasoline as e85, e25 and e10. In addition to its renewable origin and being biodegradable, distilled ethanol has many advantages over fossil fuels, it contributes to the reduction of greenhouse gas emissions, increases energy autonomy and diversification, reduces fossil fuel dependence, stimulates growth in local economies, creates jobs in rural areas, and creates cleaner fuels that produce less sulfur dioxide and fewer particles.

Biodiesel

Biodiesel is a renewable fuel formed by long-chain fatty acid methyl or ethyl esters. It is obtained through the chemical reaction of methanol (or ethanol) with vegetable oils (rape, sunflower, soy or palm). Biodiesel does not contain sulfur and, when compared with diesel derived from oil, produces lower emissions of greenhouse gas (including carbon dioxide), carbon monoxide and particles and other polluting products.

DGS

DGS, a high protein compound used as feedstock for cattle, is obtained as a secondary product from the extraction of starch from cereal grains. In Europe and the United States, DGS is subject to strict quality controls that guarantee that its nutritional properties and products derived therefrom meet relevant food safety legislation. In Europe, Bureau Veritas certifies that our DGS is in compliance with the standards set by the relevant European food quality and safety requirements. Work is also being conducted to obtain a European specification for the product. In the United States, our DGS product fulfills the specifications required by the Association of American Feed Control Officials, which is responsible for developing and implementing uniform and equitable laws, regulations, standards and enforcement policies for regulating the manufacture, distribution and sale of animal foods.

Sugar

In Brazil, we produce sugar from sugarcane grinding. Liquid is separated from bagasse during grinding and undergoes the necessary filtration and chemical processes to neutralize its pH. Currently, we have an estimated 675,000 tons of crystal sugar production, of which most is exported, taking advantage of the optimal location of our plants near ports.

Electricity

Some of our biofuel process plants contain co-generation units to produce the necessary steam and electricity to run the ethanol production process. Excess electricity generated is sold to public utilities such as Eletrobrás in Brazil. Each of our plants in Spain and our facility in Rotterdam (The Netherlands) has a gas turbine co-generation plant. Our facilities in Brazil generate steam and heat from the combustion of bagasse obtained after the sugarcane milling process for use in the biofuel production process and in generating electricity. The aggregate amount of capacity from co-generation units was 733 MW as of December 31, 2013. Out of these co-generation units, units with a capacity of 393 MW are operated under long-term contracts, such as feed-in-tariffs or PPAs. However, these are not included in our Concession-Type Infrastructure activity as these are bioethanol assets.

Carbon Dioxide

At some of our plants, the carbon dioxide emissions from the production of ethanol are captured and sold to third parties. At our facilities in York, Nebraska and Colwich, Kansas (both the United States); captured carbon dioxide is sold to third parties who process the gas and sell it for use in the beverage and flash freezing industries. For our 480 MI ethanol plant in Rotterdam (The Netherlands), we have been carrying out studies regarding the possibility of supplying the carbon dioxide emissions from the plant's production to greenhouses.

Competition

Our main competitors in the global biofuel market are The Archer Daniels Midland Company, Cosan Limited, CropEnergies AG, Green Plains Renewable Energy, Grupo São Martinho, The Andersons Inc., Verbio, Ensus, Poet Bio Refining and Valero.

Customers and Contracts

Our customer base is mainly comprised of oil companies, including Repsol, CEPSA, Total S.A and BP, and traders, including Cargill, Incorporated.

We have long-term supply contracts for the delivery of ethanol from two of our Spanish facilities and for the delivery of biodiesel from our biodiesel plant. For the remaining facilities, the production is sold under supply contracts ranging in duration from one to six months. To monitor and converse profit margins, we purchase raw materials according to the same time horizon in which we set ethanol production.

Suppliers

In our European operations, we consolidate the purchasing of raw materials (cereal grains, oleaginous seeds and vegetable oils) necessary for the operation of our European ethanol and biodiesel plants with the marketing of associated co-products through a single entity: our fully owned subsidiary Ecoagrícola, S.A. For the past ten years, Ecoagrícola, S.A. has sourced its materials by means of two well-differentiated mechanisms: purchasing on the free market and direct contracting with farmers.

We also centralize the critical functions of grain procurement, ethanol and DGS co-product marketing, and hedging and risk management for all commodities, including energy needs for our U.S. operations. The concentration of these functions into one specialized entity for our biofuel business in the United States is critical to achieve our goals of consistency, efficiency, and identification as one common brand.

With respect to our Brazilian operations, we have reached agreements with local farmers for the supply of sugarcane that satisfies the feedstock requirements for our production facilities in Brazil.

Research and Development

R&D&i involves activities which continuously improve our processes and products, but also generating new future options with breakthrough technologies. R&D&i is undertaken by our activities in furtherance of the demands of our respective markets to provide the necessary competitive capacities for us on an ongoing basis. The goal of our R&D&i program is to provide innovative solutions for sustainability, create value over the long term and continue to provide us with a competitive edge by focusing on reducing costs in our current technologies.

We have continued to increase our efforts in R&D&i (despite the prolonging of the global financial crisis during this period), based on our strong belief that to improve current results and achieve real future benefits, such investment requires continuous input which should not be adversely affected by economic cycles.

We have strengthened our presence, and in certain cases, our technological leadership, in various institutions, public forums and private forums in which cooperation is encouraged among large technology companies, and where the short and long term future of R&D&i is decided.

We have undertaken R&D&i in accordance with the requirements identified for our markets. The majority of our projects are aligned with the research and development objectives of the public administrations of Spain (the Ministry of Industry and Energy), of Europe (under research and development framework programs) and of the United States (the DOE).

We collaborate with some of the most reputable research centers in the world, such as the National Renewable Energy Laboratory in the United States, Deutsche Zentrum für Luft und Raumfahrt in Germany and Centro de Investigaciones Energéticas, Medioambientales y Tecnológicas in Spain. In addition, we have received substantial economic support from government entities such as the DOE and the European Union.

During this period, we have made strategic investments in pioneering companies in the United States and Canada, developing and owning technologies which are defined as "high priority," such as new CSP plants, second generation biofuels, biorefineries and water treatment technologies, with the objective of

enabling internationalization and the generation of value through these technologies in key emerging markets.

In the years ended December 31, 2013, 2012 and 2011, our investment in R&D&i totaled €426.4 million, €91 million and €91 million, respectively, including investments in our recycling segment sold in June 2013. Of our investment in R&D&i, amounts expensed represented €6.5 million, €6.4 million and €26 million, respectively and amounts capitalized represented €101 million, €84 million, €62 million, respectively. Taking into account the investment in Khi Solar One, Hugoton, the waste to biofuels demonstration plant and the rest of our activities expensed or capitalized, total investment in R&D during 2013 amounted to €426.4 million. As of December 31, 2013, we have approximately 800 people engaged in R&D&i activities in different centers, mainly in Seville (Spain), Madrid (Spain), St. Louis, Missouri (United States) and Denver, Colorado (United States) and Montevideo (Uruguay).

In solar thermal technology, construction has begun on Khi Solar One, the world's first commercial plant using tower technology and superheated steam, in South Africa. The 50 MW plant is expected to come into operation at the end of 2014. In the area of biofuels, we have continued to construct the commercial bio refinery plant in Hugoton, which will come into operation in the third quarter of 2014. The technology used in this plant has been developed and proven by us over the last ten years at our second generation demonstration plant in Salamanca, Spain. A waste to biofuels demonstration plant has also been operated at the same complex, which is capable of obtaining second generation biofuels from recovered municipal solid waste. In addition to this progress, we continue to develop various processes to obtain high value added bio products from biomass, such as a catalyst that has been patented that enables biobutanol to be produced from ethanol using a catalytic process. This technology offers us an additional advantage since it can be applied at our existing conventional biofuels facilities.

Abengoa Research

Abengoa Research, created in February 2011, is engaged in technological research and development activities within the fields of energy and sustainable development. This research center, a forerunner in private research in Spain, is intended as a top rank science and technology center, valorizing our accumulated knowledge by developing existing and future real applications. By engaging in R&D, Abengoa Research seeks to expand upon existing knowledge while generating new approaches, rooted in our scientific knowledge of the state of the art and the multidisciplinary skill sets of our human team.

The company's specific objectives are akin to those of a research center but are tailored to Abengoa's strategy and geared towards the present and future business needs and interests of the company. This includes generating and exploiting patents and other intellectual and industrial property and conducting studies, preparing reports and performing scientific technical projects.

Projects to date have focused on the areas of research in which Abengoa is currently interested: solar power, bioenergy, water, waste, hydrogen, marine power, and so on. The center has also been working on an Abengoa specific strategic technology agenda for the coming years in relation to the areas described above.

Engineering and Construction

R&D&i is a strategic area in our Engineering and Construction activity for future planning. R&D&i activities are undertaken by a number of different Group entities through the investigation, development and application of new technologies which focus on combating climate change and contribute to sustainable development, including, inter alia:

- reducing carbon dioxide and other greenhouse gas emissions in the construction sector;
- developing hydrogen technology with pioneering R&D&i projects in the area of clean electricity generation through hydrogen batteries;

- improving energy efficiency through the development of new technologies;
- developing electrical storage systems to improve grids dispatchability reducing transport losses; and
- investigating and innovating in the field of new renewable energy sources.

Concession-Type Infrastructure

Our R&D&i in our Concession Type Infrastructure activity is undertaken in partnership with numerous research institutes and universities in Spain and elsewhere.

At our two research centers in Spain and the United States, respectively, the R&D&i team of our Concession-Type Infrastructure activity's Solar segment is involved in the research of high temperature concentration of solar power and photovoltaic research. Our Solar segment has undertaken various R&D&i projects with the backing of the DOE, while also continuing to work on different projects within the Seventh Framework Program of the European Union, including the Solugas Consortium in collaboration with the Deutsche Zentrum für Luft und Raumfahrt and New Algerian Company, among others, and on the Innpacto projects against the backdrop of the Centro de Investigaciones Energéticas, Medioambientales y Tecnológicas programs in Spain. Our Solar segment R&D&i team also collaborates with leading research centers worldwide, including universities and technological institutes. The independent research centers with which the Solar segment's R&D&i team has worked include the National Renewable Energy Laboratory in the United States, Centro de Investigaciones Energéticas, Medioambientales y Tecnológicas in Spain and the Aerospace Centre in Germany. In addition to the Solúcar Platform, considered one of the world's leading centers in solar energy research, our Solar segment has increased its R&D&i capabilities with the inauguration of the Soland R&D center, with more than 3,500 m² of labs. Our Solar segment's main R&D&i programs are focused on: increasing the efficiency of its CSP tower technology; reducing the components cost of its CSP through technology and high concentrated photovoltaic (HCPV); and increasing the dispatchability of our thermal storage technology.

Our R&D&i in the Water segment is structured into three areas: desalination, water treatment and water cycle sustainability. The desalination area focuses on improving the efficiency of the reverse osmosis process and lowering our investment, operation and maintenance costs and is also engaged in the validation and conceptual design of a new and cost effective remineralization process for desalination plants. The water treatment area seeks to optimize membrane based water treatment processes so as to save energy and produce less sludge, develop sludge treatment and elimination technologies as supercritical oxidation. The water cycle sustainability area seeks to optimize energy use in water infrastructure, develop hydro power and marine energy capabilities, create sustainable water management models, and develop and apply sustainability criteria in the design of the water area's solutions. In addition, our Water segment's R&D&i team also collaborates with leading universities, institutes, and public bodies including Foundation Euskoiker, the School of Industrial Engineering in Bilbao (Spain), the Spanish Ministry of Industry, Tourism and Trade, the Ministry of Innovation and Science and the Center for Industrial Technological Development.

Intellectual Property

Given the progress that we have made in our technology development, in particular in CSP and bioproducts technologies, we have created the office of patents and technological surveillance as a fundamental tool for protecting our intellectual property. The office of patents and technological surveillance determines whether or not to file patents in relation to the knowledge, products and technology that we produce.

The office of patents and technological surveillance has implemented intellectual property ("IP") protection policies and procedures throughout our businesses. These IP protection policies and procedures are applied to all knowledge that has, or might have, commercial value whether or not it is capable of being

patented, including R&D&i and know-how, and any documentation (in printed or electronic format) that contains any confidential proprietary information.

The measures that we take to protect our IP include the entry into confidentiality, non-disclosure and/or non-compete agreements with employees, service providers and counterparties, as appropriate, and the dissemination throughout the Group of an internal security code and internal security protocol.

In addition, we take steps to protect the trademarks, business names and distinctive designs used in connection with our activities, products and services, although not all of these have been registered in the jurisdictions in which we operate.

Although we take measures to protect our intellectual property, we do not consider that our business is dependent on any single patent or license, new manufacturing process or other types of intellectual property.

Information Technology

We use information technology developed in-house and also provided by third parties for processing plant maintenance, construction management and operational management. Our systems integrate data and generate stock, orders and efficient sourcing and delivery routes. We are presently implementing a group-wide data warehouse and business intelligence system and a global sourcing (purchasing and procurement) system across all of our businesses. We utilize software and other information technology licensed from third parties to manage communications with our suppliers and customers.

We believe that our information technology systems infrastructure that supports our various business operations is secure and robust. Our critical system servers are housed offsite in data centers. The remaining system servers are housed in secure, temperature-controlled internal data rooms. We have back-up and disaster recovery plans in place which are reviewed on a periodic basis.

Environmental Matters

Our activities are subject to significant environmental regulation. This requires, among other things, that we commission environmental impact studies for future projects and that we obtain licenses, permits and other authorizations required to construct and operate relevant projects. In recent years, there has been a significant increase in environmental regulation in Spain, the European Union and other jurisdictions in which we operate. These include regulations in relation to carbon dioxide emissions and limitations on polluting emissions from large plants and facilities. See *"Regulation."* See also *"Risk Factors—Risks Related to Our Business and the Markets in Which We Operate—Our business is subject to stringent environmental regulation."* We have specifically established within our management regulations, applicable to all of our activities, the obligation to implement environmental management systems certified under the ISO 14001 standard of the International Organization for Standardization. As of June 30, 2014, 92.92% of Group companies, in terms of sales volume, had environmental management systems certified under the ISO 14001 standard and 98.04% held valid ISO 9001 standard certificates for their quality management systems.

Corporate Social Responsibility

The objectives of our Corporate Social Responsibility ("**CSR**") program include the reporting, control and management of non-financial information associated with three dimensions: social, environmental and economic impacts of the Group's business. This information is reported within the Group three times a year in a CSR management system that has internal controls in place at three different reporting levels (company, business group and corporate group). Furthermore, the information is verified internally in each reporting period with onsite visits and internal audits. Additionally, the information is verified twice a year by an independent third party.

All this information is published annually in our CSR report which for the year ended December 31, 2013 was externally verified and was awarded a reasonable level of assurance.

Social Dimension

The table below sets forth information related to employees, training and investments in community for the years ended December 31, 2013 and 2012.

	Year ended December 31	
	2012	2013
Employees		
Total employees	23,925	24,748
Female employees in management positions	10.9%	12.8%
Training		
Training hours (million)	1.7	1.8
Training (hours of training/number of employees)	43.0	47.9
Community		
Total investment in social action (€ in million) ⁽¹⁾	8.1	9.1

(1) For purposes of comparison, the data of 2012 has been modified in accordance with the computation criteria applied in 2013, which exclude items currently allocated to employee.

Economic Dimension

The table below sets forth information related to R&D&i, suppliers and measures against corruption for the years ended December 31, 2013 and 2012.

	Year ended December 31	
	2012 ⁽¹⁾	2013
R&D&i		
R&D&i employees	737	781
Patents accumulated and applied for	200	261
R&D&i investment effort (R&D&i investment/revenues)	1.3%	5.8%
Suppliers		
Suppliers analysis in relation to human rights	14,920	14,389
Purchases from local suppliers	83%	78%
Corruption		
Employees trained in company anti-corruption policies and HR	8,209	8,727
Analysis carried out in accordance with the FCPA ⁽²⁾	n/a	9,157

(1) For purposes of comparison, the information for 2012 has been expressed to reflect significant variations in the 2013 perimeter.

(2) FCPA: Foreign Corrupt Practices Act.

Environmental Dimension

The table below sets forth information related to GHG emissions, water consumption and energy for the years ended December 31, 2013 and 2012.

	Year ended December 31	
	2012	2013
GHG emissions		
GHG emissions/revenues (tCO ₂ eq/k€)	1.62	1.51
GHG emissions/ebitda (tCO ₂ eq/M€)	10,811.57	8,156.49
CO ₂ labels	17	32
Water consumption		
Reused water	4.7%	9%
Water consumption/revenues (m ³ /k €)	3,581	3,480
Energy		
Energy production (GJ) vs. Energy consumption (GJ)	5,943,624	7,434,878

Insurance

We maintain the types and amounts of insurance coverage that we believe are consistent with customary industry practices in the jurisdictions in which we operate, and consider our insurance coverage to be adequate for our business. Our insurance policies cover employee-related accidents and injuries, property damage, machinery breakdowns, fixed assets, facilities and liability deriving from our activities or products, including environmental liability. We maintain business interruption insurance for interruptions resulting from incidents covered by insurance policies. Our insurance policies also cover directors' and officers' liability and third-party insurance. We have not had any material claims under our insurance policies that would either invalidate our insurance policies or cause a material increase to our insurance premiums. We cannot assure you, however, that our insurance coverage will adequately protect us from all risks that may arise or in amounts sufficient to prevent any material loss. See "*Risk Factors—Risks Related to Our Business and the Markets in which We Operate—Our insurance may be insufficient to cover relevant risks and the cost of our insurance may increase.*"

Risk Management and Internal Control

Our risk management system comprises two distinct systems that collectively manage risk at all levels of our Group: our shared management systems, which aim to mitigate business risks and our internal control systems which are organized to permit compliance with Section 404 of the Sarbanes-Oxley Act of 2002 ("**SOX**") to mitigate risks related to the reliability of financial information. The system operates live and undergoes continual modification to remain up to date with our business and with employees also being issued a risk management manual. In addition, we have internal auditing to ensure the compliance with and the proper functioning of our risk management system.

The risk management system includes the identification, evaluation, response, monitoring and reporting of risks and is fully integrated into our strategic planning process, our business objectives and our daily operations.

We have implemented common management systems in order to coordinate and streamline our worldwide operations across our activities. Our systems are based on two key pillars of: (i) the definition of a set of management standards for the Group's activities; and (ii) monitoring of project and business performance in real time in order to take appropriate corrective measures, if required.

The mission of our shared management systems is based on the following specific objectives:

- Unification of actions: To establish a single criterion for the carrying out of actions in all our businesses and geographies.
- Reinforcement of corporate identity: To achieve a strong corporate identity recognizable by key stakeholders.
- Control and reduction of risks: To manage risks in a uniform manner and thus mitigate them.
- Optimization of management: To be efficient and effective in the management of the company both within businesses and geographically.
- Value creation for stakeholders: To differentiate and individualize the management of the main stakeholders in order to provide the greatest value-add to each one.
- Profitability: To contribute to financial performance through active management.

Our risk management system uses a systematic approach to identify events and to evaluate, prioritize, monitor and respond to any risks which may prevent the successful execution of our strategy, business objectives and daily operations.

The main objectives sought through the risk management system are the following:

- To understand and control the risks to which the Group is exposed.
- To establish a system which optimizes the evaluation of risk management by the entire Group, allowing us to successfully assume and manage a greater number of risks and better understand each risk in order that we can adopt more efficient control.
- To achieve a closer alignment between our strategy and our identified risks and controls by the Group.
- To increase senior management assurance with each decision-making process to better achieve the business objectives of the Group.
- To increase transparency of risk management and relations with stakeholders through more precise risk evaluation methods.
- To ensure compliance with all applicable risk management regulations and best market practices.
- To establish clear roles and responsibilities in the Group in order to focus on fundamental aspects of management.
- To reduce profit volatility and avoid unwanted outcomes for the Group.

We also have a model that is aimed at identifying the potential risks in our business. This model considers four key areas that are subdivided into 20 further categories of risks, which contemplate more than 130 potential risk scenarios for the Group. The four key areas are the following:

- Strategic risks: Corporate governance, strategic and R&D&i projects, mergers, acquisitions and divestments, planning and assignment of resources, market dynamics, communication and relations with investors.
- Operational risks: Human resources, information technologies, physical assets, sales, supply chain, threats or catastrophes.
- Financial risks: Cash flow and credit, markets, taxation, capital structure, accounting and reporting.
- Compliance risks: Regulations, laws and codes of ethics and conduct.

We were among the first European companies to have undertaken to voluntarily comply with the SOX requirements regarding auditor attestations as to the effectiveness of our internal controls over financial reporting. Since 2007, Abengoa has performed internal control-compliance audits in line with the Public

Company Accounting Oversight Board (“**PCAOB**”) standards, pursuant to the requirements set forth in Section 404 of SOX. The independent registered public accounting firm’s report dated February 20, 2014 for the year ended December 31, 2013, which expresses an unqualified opinion on our internal control over financial reporting in relation to our consolidated financial statements as of and for the year ended December 31, 2013 in accordance with IFRS-EU and not for the purpose of the financial statements included in this Listing Memorandum, is available on our website. The SOX audits are used to mitigate the risks related to the reliability of financial information, through a combined system of control procedures and activities in key areas of the Company.

We have a commitment to transparency and good governance practices; our annual report now includes six independent verification reports carried out by external auditors covering the following areas: annual accounts, our SOX internal control system according to the PCAOB standards, corporate social responsibility reporting, greenhouse gas emissions inventory, corporate governance reporting and designing risk management systems according to the principles and guidelines established in ISO 31000.

Legal Proceedings

We are involved in a number of legal, governmental, fiscal and arbitration proceedings and investigations in connection with our operations in the normal course of business. These may include actions by regulatory authorities, tax authorities, suppliers and customers, employment related claims, contractual disputes, claims for personal injury or property damage that occur in connection with our products or services performed in relation to projects or construction sites, tax assessments, environmental claims and other matters. We establish reserves for litigation and other contingent liabilities where we consider it probable that a claim will be resolved unfavorably and where we can reasonably estimate the potential loss involved. As of June 30, 2014, we have established a reserve amounting to €35.8 million allocated to cover liabilities for litigation and other claims where Group companies are defendants. While we do not expect these proceedings, either individually or in the aggregate, to have a material adverse effect on our financial position or results of operations, because of the nature of these proceedings, we are not able to predict their ultimate outcomes, some of which may be unfavorable to us and, if so, such proceedings could adversely affect our financial position or results of operations.

We have briefly summarized below the most significant of these proceedings.

- In May 2000, Abengoa Puerto Rico S.E., a subsidiary of Abengoa, S.A, brought a lawsuit against the Electricity Power Authority (Autoridad de Energía Eléctrica, “**AEE**”) of Puerto Rico and terminated the agreement that both parties had entered into in relation to an EPC project for the construction of an electricity power station in Puerto Rico, in which the AEE was the Principal Contractor. The referred lawsuit contained different claims such as, inter alia, withholding payments, defaulted invoices, loss of future profits, damages and several other costs, which tentatively amounted to \$40 million. In response to the lawsuit brought by Abengoa Puerto Rico, S.E., the AEE brought a counterclaim premised upon unlawful termination and consequential damages relating to the agreement with Abengoa Puerto Rico, S.E. and, at the same time, brought an additional lawsuit for the same amount against Abengoa and its insurer, American International Insurance Co. of Puerto Rico. The amount claimed by the AEE is approximately \$450 million.
- In December 2011, two related arbitration proceedings before the International Court of Arbitration of the International Chamber of Commerce with seat in New York, United States were concluded in which our subsidiary ASA Bioenergy Holding A.G. (“**ASA**”) filed various claims for certain breaches of contract by Mr. Adriano Gianetti Dedini Ometto and Adriano Ometto Agrícola Ltda. (the “**Adriano Defendants**”) relating to a share purchase agreement, dated August 4, 2007 with respect to the shares of Adriano Ometto Participações Ltda. In each of the proceedings, the Adriano Defendants had filed various counterclaims. Both arbitration proceedings were decided in ASA’s favor, in the approximate amount of \$118.3 million plus accrued interest. The Adriano defendants presented

motions to vacate such arbitration awards in federal court in New York, which was decided in our favor with full confirmation on the validity of the two awards in first instance. As a result, the Adriano defendants appealed in the United States Court of Appeals for the Second Circuit. The appeal hearing took place in New York in December 2013. In January, 2014 the Second Circuit decided again in favor of ASA. The Supreme Court of the United States on June 30, 2014, denied the petition for a writ of certiorari to the United States Court of Appeals for the Second. We have started the necessary actions to recognize the awards in Brazil.

- On April 29, 2013, the European Commission decided to initiate an inspection on us, along with all the companies directly or indirectly under our control, including Abengoa Bioenergy Trading Europe BV, regarding our possible participation in anticompetitive agreements or actions which were allegedly aimed at manipulating the results of Platt's Market on Close (MOC) price assessment as well as denying the access of one or more companies to participation in the MOC price assessment process. According to such European Commission's decision, the suspected anticompetitive conduct, agreements and/or mutually coordinated concrete actions have allegedly existed since 2002 and would likely involve various markets for which the Platts MOC process is used to report prices, including markets for biofuels. We understand that the investigation is still in a preliminary phase, and the European Commission has not initiated formal proceedings. We believe that we and the relevant companies within the Group (including Abengoa Bioenergy Trading Europe B.V.) have at all times complied with the applicable competition laws. We are actively cooperating with the European Commission in its investigation. Nevertheless, we cannot predict the final outcome of any judicial proceedings that could be instigated in relation to the subject matter of the investigation. Should the European Commission or any subsequent judicial proceedings find that the Group has participated in anti competitive practices, it could potentially entail (i) the imposition of fines calculated on the basis of the revenue in the affected markets, which in no case, however, may exceed 10% of the Group's total revenue in the year immediately preceding the imposition of the fine; and (ii) the filing of civil law claims for losses and damages by injured third parties. The imposition of fines, the cost of losses and damages and the resulting negative publicity could have a material adverse effect on the business, financial condition and results of operations of the Group.

REGULATION

Overview

We operate in a significant number of regulated markets. Our Engineering and Construction and Industrial Production activities and the Solar segment of our Concession-Type Infrastructure activity are, in particular, subject to extensive regulation by governmental agencies in a number of the countries in which we operate. The degree of regulation to which our activities are subject varies by country. In a number of the countries in which we operate, regulation is carried out by national regulatory authorities. In some countries, such as the United States and, to a certain degree, Spain, there are various additional layers of regulation at the state, regional and/or local levels. In countries such as these, the scope, nature and extent of regulation may differ among the various states, regions and/or localities.

While we believe the requisite authorizations, permits and approvals for our existing activities have been obtained and that our activities are operated in substantial compliance with applicable laws and regulations, we remain subject to a varied and complex body of laws and regulations that both public officials and private parties may seek to enforce. The following is a description of the primary industry-related regulations applicable to our activities and currently in force in certain of the principal markets in which we operate.

European Union

Bioenergy Regulation

Directive 2003/30/EC of the European Parliament and the Council, of May 8, 2003, on the promotion of the use of biofuels or other renewable fuels for transport ("**Directive 2003/30/EC**") set Member States national indicative targets by December 31, 2010 of 5.75% of biofuel in the content of petrol or diesel sold for transport purposes in each Member State.

This legislation was superseded by two directives that resulted from the European Council of June 2008, in which the Council furthered its aim to develop and fulfill effective sustainability criteria for biofuels and to ensure commercial availability of second-generation biofuels, and underlined the need to assess the possible impacts of biofuel production on agricultural food products and to take action, if necessary, to address shortcomings. As a consequence, in 2009, the following new legislation was adopted:

- Directive 2009/28/EC (the "**2009 Renewable Energy Directive**") on the promotion of the use of energy from renewable sources, which sets a minimum mandatory target of 20% renewable energy consumption in the European Union by 2020 and a minimum mandatory target of 10% renewable energy in the consumption of transport fuel for all Member States by 2020.
- Directive 2009/30/EC establishes a mandatory minimum 6% reduction in the greenhouse gas emissions of road transport in the European Union between 2011 and 2020. It also increases the percentage of ethanol and ETBE that can be used in mixtures with gasoline to operate motor vehicles.

The Directives also implement a certification system to ensure the compliance of biofuels sold in the European Union with the regulated criteria of sustainability, including a minimum reduction of 35% in the emission of greenhouse gases during their life cycle compared with average emissions from petrol and diesel (increased to 50% from January 2017).

The Directives are presently under review in order to address concerns regarding indirect land use change arising from the promotion of biofuels.

Following the adoption of the Directives, the European Union has adopted a series of regulations in order to correctly implement its policy on the importation of biofuels. For instance, Commission Implementing Regulation (EU) No. 211/2012 classifies a blend of 70% ethanol and 30% petrol as denatured ethanol in the Combined Nomenclature. Council Implementing Regulation (EU) No. 157/2013 of February 18, 2013

imposes a definitive antidumping duty on imports of bioethanol originated in the United States. Similar trade defence actions have been undertaken to protect the European biodiesel market.

Solar Regulation

The Kyoto Protocol, ratified by the European Union and its Member States on May 31, 2002, imposed on the European Union a target of reducing its emissions of greenhouse gases by 8%. On November 26, 1997, the European Union published a white paper (the “**White Paper**”) which outlined a strategy and a community-wide action plan aimed at doubling energy production from renewable energy sources in the European Union to 12% of total energy consumption by 2010 from 6% in 1996. The White Paper proposed a number of measures to promote the use of renewable energy sources, including measures designed to provide better access for renewable energy sources to the electricity market.

Directive 2001/77/EC of the European Parliament and Council of September 27, 2001 (the “2001 Renewable Energy Directive”) encourages the development of electricity produced from renewable energy sources (non-fossil fuel sources such as wind, solar, hydropower, biomass and relief gas) by requiring Member States to set indicative national targets for the consumption of electricity produced from renewable energy sources consistent with the European Commission’s target of generating 12% of the European Union’s energy and 22% of the European Union’s electricity from renewable energy sources by 2010. The 2001 Renewable Energy Directive was amended and repealed by the 2009 Renewable Energy Directive which set mandatory national overall targets consistent with at least a 20% share of energy from renewable energy sources in the European Union’s gross final consumption of energy in 2020.

Spain

Bioenergy Regulation

Spanish law on bioenergy either transposes European Directives (see above) or responds to national goals and requirements.

An example of the former, is Royal Decree 1088/2010, which transposes the specification of petrol in Directive 2009/30/EC to allow for higher blends of ethanol and ETBE in petrol.

Another example is, Royal Decree 1597/2011 that transposes the biofuel and bioliquid sustainability criteria, and the double counting of some biofuels in Directive 2009/28/EC.

The primary bioenergy law in Spain is its minimum obligation of biofuel consumption in diesel and petrol. This obligation is reviewed and adjusted frequently. In 2013, the last time it was adjusted (Royal Law Decree 4/2013), the overall obligation was reduced from 6.5% to 4.1%, with concomitant reductions for specific targets in diesel (from 7.0% to 4.1%) and in petrol (from 4.1% to 3.9%).

In the case of biodiesel, the obligation is filled by the Spanish Government by assigning a specific production quota to individual plants in Spain and in the rest of Europe Resolution of 24 January, 2014 of the Secretary of State for Energy). The supply of bioethanol to the market, on the other hand, is left unregulated at present.

Water Regulatory Framework

Spain is currently the only country within the European Union in which we operate our Water segment. The Spanish water regulatory framework, which primarily regulates the desalination process and the water concessions needed for the operation of our thermo-solar plants, is included in the Water Law as approved by Royal Legislative Decree 1/2001, of July 20 (the “**Water Law**”), and developed by the Royal Decree 849/1986, of April 11, which approves the regulation of public water.

The Water Law regulates the use of hydraulic public property, in addition to authorizations and public concessions necessary in accordance with Law 22/1988, of July 28, on coasts, and other applicable

regulations. The Water Law also regulates hydraulic infrastructures, which are defined as the construction of infrastructure for collection, extraction, desalination, storage, regulation, piping, control and use of water, including its drainage and purification, processing and reuse. In addition, Law 26/2007, of October 23, on environmental responsibility (slightly modified in July 2014 by Law 11/2014) establishes a preventive and reparative administrative responsibility framework, applicable to water operators whose activities impact on the environment.

The innovations and additions introduced by the Law 11/2014 are essentially:

1. Wider responsibility for the damages caused by the operators in the ecological status of the sea water.
2. A new article which allows the Spanish government to initiate the environmental responsibility procedure and to demand all the prevention measures.
3. Innovation in the mandatory financial guarantee: From now, operators are the ones who have to determinate the minimum amount that will be guaranteed according to the intensity or extension of the potential damage caused. The creation of such guarantee shall be communicated to the competent authority.
4. Elimination of the use of the Environmental Damages Compensation Fund (created by the Insurance Compensation Consortium) in the event of insurance companies' insolvency.
5. Procedural amendments: For instance, new previous proceeding in the event of an environmental responsibility procedure initiated by an interested third party.
6. Modification of other laws: (i) Law 34/2007, on Air Quality and Atmospheric Protection and (ii) Law 10/2001, on Spain's National Hydrological Plan.

Solar Regulation

Overview

The Kyoto Protocol was adopted on December 11, 1997 and introduced mandatory targets for participating countries to reduce emissions of greenhouse gases by at least 5% against 1990 levels in the five-year period between 2008 and 2012. The Kyoto Protocol came into effect on February 16, 2005. The European Commission announced in March 2007 new targets for reducing emissions of greenhouse gases among the EU Member States. These targets include a unilateral commitment to reduce overall EU greenhouse gas emission levels by 20% from 1990 levels by 2020. In addition, the European Commission made a conditional offer to increase this percentage reduction to 30% if other major emitting countries make a corresponding commitment to reduce emissions. The European Union and its Member States announced their willingness to continue negotiations to reach an international legally binding agreement to be in force starting on January 1, 2013, when the first commitment period of the Kyoto Protocol expires. In any case, the Kyoto Protocol has led to the implementation of policies and actions to promote and support the use of energy from renewable sources, which have been favorable to the renewable energy sector and, in particular, the solar energy sector.

The renewable energy industry benefits from government subsidies and incentives in Spain and the other markets in which we operate. Internationally, the most common public incentives in the renewable energy sector include, among others, the following systems:

- *Green certificates.* Producers of renewable energy receive a "green certificate" for each megawatt-hour they generate and suppliers of energy have an obligation to purchase part of the energy that they supply from renewable sources.
- *Investment grants and direct subsidies.* These apply to the costs of installation of generating plants.

- *Tax exemptions or relief.* These include ITCs, cash grants in lieu of tax credits, accelerated depreciation, among others.
- *System of direct support of prices.* These include regulated tariffs and premiums. The system previously in effect in Spain involved a regulatory guarantee to purchase the energy generated by a renewable energy plant for an allotted period of time at a fixed tariff per kilowatt-hour (“kWh”) for a maximum annual number of hours, so that the producer was ensured of a reasonable return on its investment. This system was totally replaced in 2013, as described below.

Solar Regulatory Framework

Law 15/2012 on Tax Measures for Energy Sustainability

On December 27, 2012, the Spanish Parliament approved Law 15/2012 which became effective on January 1, 2013 (“**Law 15/2012**”). The aim of Law 15/2012 is to try to combat the problem so-called “tariff deficit”, which reached roughly €30 billion in December 2013.

Law 15/2012 provides for an electricity sales tax which is levied on activities related to electricity production. The tax is triggered by the sale of the electrical power and affects both traditional electricity generation and electricity generated from renewable sources. The tax (at a single rate of 7%) is levied on the total income received from the power produced at each of the installations.

Furthermore, Law 15/2012 provides for a tax trigger in the production and storage of nuclear energy waste, taxes on gas consumption for power generation (the so-called “green cent”) and other measures. However, the European Court of Justice has ruled that the Spanish “green cent” tax on retail sales of certain hydrocarbons is contrary to European Union regulations. The “green cent” tax intended to fund health care initiatives undertaken by regional governments in Spain and remained in force from January 1, 2002 to December 31, 2012.

Royal Decree Law 9/2013

Royal Decree Law 9/2013, of July 12, on the adoption of urgent measures to guarantee the financial stability of the electric system, was published in the Spain’s Official State Gazette on July 13, 2013, and entered into force on July 15, 2013 (hereinafter, as amended as the case may be pursuant to Act 24/2013, of December 26, of the Electricity Sector, “**RDL 9/2013**”).

The purpose of Royal Decree 9/2013, which entered into force on July 14, 2013, was to adopt a series of measures to ensure the sustainability of the electric system and to combat the shortfalls between electricity system revenues and costs, referred to as the tariff deficit.

The measures adopted were focused primarily on the following areas: (i) the legal and financial regime for existing electricity production facilities using renewable energy sources, co-generation and residual waste; (ii) the remuneration regime for transport and distribution activities; (iii) Spain’s guarantee of the Securitization Fund to cover the so-called tariff deficit; and (iv) certain aspects related to capacity payments, assumption of the cost of the subsidized tariff and a review of access charges.

Royal Decree 9/2013 established an entirely new remuneration system, abolishing the prior remuneration system based on a regulated tariff applicable to electricity production facilities using renewable energy sources (including facilities in operation at the time that Royal Decree 9/2013 entered into force).

Prior to the adoption of Royal Decree 9/2013, electricity production facilities using renewable energy sources received revenues tied to their electricity produced according to their power output. This involved receiving feed-in tariffs, in €/kWh, that were split into two components: (i) the pool price of electricity and (ii) an equivalent premium, consisting of the difference between the pool price and the set feed-in tariff for each type of plant (feed in tariff = pool price + equivalent premium). This revenue was received for a

maximum annual number of hours and for a pre-determined number of years, depending on the technology used in each case. For any additional hours produced, producers received the pool price.

The repealed economic scheme was applied on a transitional basis until new provisions were approved to fully implement the new remuneration system. Settlements made after July 14, 2013 were made in accordance with the previous regime until the new implementing regulations have been adopted. However, following the implementation of these new regulations, payments made during this interim period will be recalculated in accordance with the new regulations. The difference between the amounts received under the prior regime and those calculated under the new regime will be deducted from the first six settlements that follow the approval of the new implementing regulations.

New Electricity Sector Act

Act 24/2013, of December 26, of the Electricity Sector, was approved by the Spanish Parliament and published on December 27, 2013 (the "**New Act**"). The New Act supersedes prior electricity sector laws.

As to electricity production out of renewable energy sources, the New Act basically restates RDL 9/2013 and the new economic system for renewable plants which was established therein, which will still apply with minor changes as from July 14, 2013 onwards.

Renewable electricity producers participate, under the regimen established in the New Act, in the formation of the electricity pool price in the market. In addition, as from January 1, 2014, renewable electricity producers will proportionally borne the so called "tariff deficit" that the national electrical system may incur from time to time if tolls and tariffs are not increased accordingly, provided that such deficit exceeds certain thresholds.

The New Act eliminates a previously existing distinction between ordinary electricity producers and those using renewable energy sources in their production of electricity, though it continues to recognize the following rights for producers with facilities that use renewable energy sources:

- (i) *Priority off-take.* Producers of electricity from renewable sources will have priority over conventional generators in transmitting to off-takers the energy they produce over conventional generators under equal market conditions, subject to the secure operation of the national electricity system and based on transparent and non-discriminatory criteria.
- (ii) *Priority of access and connection to transmission and distribution networks.* Producers of electricity from renewable energy sources will have priority in obtaining access and connecting to the grid, subject to the terms set forth in the regulations, on the basis of objective, transparent and non-discriminatory criteria.
- (iii) *Entitlement to a specific payment scheme.* Producers of electricity from renewable sources will receive specific reimbursement that shall not exceed the minimum amount necessary to cover their costs. This enables them to compete on a level playing field with the other, non-renewable technologies on the market while achieving a reasonable return on investment.

The significant obligations of the renewable energy electricity producers under the New Act include a requirement to:

- (i) Offer to sell the energy they produce through the market operator even when they have not entered into a contract and so are excluded from the bidding system managed by the market operator.
- (ii) Maintain the plant's planned production capacity. Power lines, which include connections with the transmission or distribution network and transformers, are considered part of the production facility.

- (iii) Contract and pay the corresponding fees, whether directly or through their representatives, to the transmission or distribution companies to which the renewable energy facilities are connected in order for their power to be fed into the grid.

Royal Decree and Ministerial Order

On June 10, 2014, it was published the Royal Decree 413/2014, of June 6, on electricity generation by means of renewable, cogeneration and waste facilities, developing technical requirements and general regulations pursuant to RDL 9/2013.

The New Act and the Royal Decree 413/2014 require electricity generation facilities to be entered on the official register of electricity production plants maintained by the Ministry of Industry, Energy and Tourism.

The regional authorities may keep their own registers of electricity generation plants they have authorized if such plants have a capacity of 50 MW or less. The registration details of these plants must be provided to the Ministry of Industry, Energy and Tourism electronically.

To receive their facility-specific reimbursement, renewable energy facilities are required under the New Act and the Royal Decree 413/2014 to be listed on a new register entitled the Specific Payment System Register (*Registro de Regimen Retributivo Especifico*). Unregistered plants will only receive the pool price.

On June 20, 2014, it was published the Ministerial Order IET/1045/2014, of June 16, 2014, approving the remuneration parameters for standard facilities, applicable to certain electricity production facilities based on renewable energy, cogeneration and waste, establishing standard plants under RDL 9/2013 (each actual plant to be associated to a standard plant under the Ministerial Order), economic parameters and payments (including "payment for investment" per installed capacity in MW and "operating payments" per production in MWh).

This new remuneration system, based on the third final provision of the New Act, is adjusted to the criteria set out in article 30.4 of the Electricity Act 1997, under Royal Decree 9/2013.

According to these criteria, producers will now receive: (i) the pool price for the power they produce and (ii) a payment based on the standard investment cost for each kind of plant (without any relation whatsoever to the amount of power they generate). This payment based on investment (in €/MW of installed capacity) will be supplemented (in cases of technologies with running costs in excess of the pool price) with an "operating payment" (in €/MWh produced).

The principle driving the new economic regime is that the incentives that an electricity producer receives should be equivalent to the costs that they are unable to recover on the electricity market where they compete with non-renewable technologies. The new economic regime seeks to allow a "well-run and efficient enterprise" to recover the costs of building and running a plant, plus a reasonable return on investment (project internal rate of return). For plants eligible for a premium when Royal Decree 9/2013 entered into force, the reasonable return will be 7.503% pre-tax, and will apply until December 31, 2019. According to Royal Decree 413/2014, the remuneration for investment in respect of plants that were already in operation during the first statutory period (from July 14, 2013 to December 31, 2019) is calculated as follows:

- (i) The "standard per-MW investment value" is added to the "standard per-MW operating cost" (both updated from July 2013 with a 7.503% rate of return); i.e., what it would have cost a well-run and efficient enterprise to build, maintain and run the facility from its start-up until the time Royal Decree 9/2013 came into force.
- (ii) From the resulting total, the "standard per-MW total revenue valued at the electricity pool price," earned by each type of plant from its start-up through entry into force of Royal Decree 9/2013, also updated applying the 7.503% rate of return is subtracted.

- (iii) The result (the standard per-MW investment value plus standard per-MW operating cost minus standard per-MW total revenue) is the “net investment value,” i.e., the costs unrecovered by the plant owner as of July 14, 2013.

Accordingly, under Royal Decree 413/2014, the returns received by the owners of plants in excess of 7.503%, from start-up until Royal Decree 9/2013 took effect, would serve to reduce the unrecovered net investment value as of July 14, 2013.

Operating payments will only be available for those facilities whose costs exceed the estimated average pool price. However, the Ministry of Industry, Energy and Tourism can cap operating payments at a maximum number of hours.

Payment Factors for Concentrating Solar Power Plants

The payment system applicable for each plant is based on various criteria considered by the Ministry of Industry, Energy and Tourism and includes the specific technology used, amount of power produced relative to operating costs, age of the facility and any other differentiating factor deemed necessary to consider in applications of the payment system.

The regulations recognize six types of solar thermal plants: (i) parabolic trough collectors without a storage system, (ii) parabolic trough collectors with a storage system, (iii) central or tower receivers without a storage system, (iv) central or tower receivers with a storage system, (v) fresnel linear collectors and (vi) solar-biomass hybrids.

To determine the payment system applicable to each plant, the following factors are considered:

- (i) Net investment value. This consists of a standard amount per MW for each type of plant, calculated by the method set out in Royal Decree 413/2014, which is the amount invested in the plant and not depreciated as of July 14, 2013.
- (ii) Useful life of the plant. For solar thermal plants this is 25 years.
- (iii) Return on investment. Considering the net asset value determined on the basis of a standard cost per MW built, an amount is set per unit of power, which enables investment costs that cannot be recovered through the pool price to be recouped over the useful life of the plant.
- (iv) Operating remuneration. An amount is set per unit of power and hour that, added to the pool price, enables the producer to recoup all the plant's operating and maintenance costs. Operating expenses include the cost of land, electricity, gas and water bills, management, security, corrective and preventive maintenance, representation costs, the Spanish tax on special immovable properties, insurance, applicable generation charges and a generation tax which is equal to 7% of total revenue.
- (v) Maximum number of operating hours. A maximum number of hours is set for which each plant type can receive the operating subsidy.
- (vi) Operating threshold. Plants must operate for more than a set number of hours per year to receive the return on investment and operating subsidy.
- (vii) Minimum operating hours. Plants that cross the operating threshold but operate for fewer hours than the annual minimum hours receive a lower subsidy.

- *Regulatory Periods*

Payment criteria are based on prevailing economic conditions in Spain, demand for electricity and reasonable profits for electricity generation activities and can be revised every six years. The first regulatory period commenced on July 14, 2013, the date on which Royal Decree 9/2013 came into force, and will end on December 31, 2019.

The definitions and values of all payment criteria can be changed at the end of each regulatory period, except for a plant's useful life and the value of a plant's initial investment that is recouped through the specific return on investment.

Each regulatory period is divided in two sub-periods. Therefore, every three years, the definitions and values of all payment criteria may be revised except Reasonable Rate of Return.

Unless reviewed, payment criteria will be considered to be extended for the subsequent regulatory period.

- Reasonable Rate of Return

Article 14 of the New Act provides that a reasonable return on investment is calculated on the basis of the average pre-tax yield of Spanish government 10-year bonds on the secondary market. For plants that are already in operation, the reasonable return over the regulatory life of the plants is based on the average pre-tax yield on Spanish government 10-year bonds on the secondary market for the preceding 10 years, plus 300 basis points. The reasonable rate of return has been set at 7.503% during the first regulatory period from July 14, 2013 through December 31, 2019.

Under no circumstances will amounts received by producers for electricity generated before July 14, 2013 be required to be returned or reimbursed under the new system.

Before the start of a new regulatory period, a revised reasonable return can be established for each plant type, calculated as the average yield on Spanish government 10-year bonds on the secondary market in the 24 months through the month of May preceding the new regulatory period, plus a spread.

This spread is based on the following criteria:

- (i) Appropriate profit for this specific type of renewable electricity generation and electricity generation as a whole, considering the financial condition of the Spanish electricity system and Spanish prevailing economic conditions; and
- (ii) Borrowing costs for electricity generation companies using renewable energy sources with regulated payment systems, which are efficient and well run, within Europe.

The next regulatory period will begin on January 1, 2020.

Funding the Tariff Deficit

The New Act also states that from January 1, 2014, tariff deficit amounts would no longer be paid for, as they had been previously, by the five major Spanish utilities. Instead, they will be paid by the companies that receive "regulated payments," including distributors, transportation companies, producers of electricity from renewable plants, companies receiving capacity payments and others. Each of these entities will contribute to paying down the tariff deficit in proportion to the costs that they represent for the electricity system, and can recover these contributions in the following five years, plus interest at a market rate.

Access Fee

Royal Decree 14/2010 was passed in order to eliminate the shortfalls between electricity system revenues and costs, referred to as the so-called tariff deficit in the electricity sector. The First Transitional Provision of Royal Decree 14/2010 provided that the owners of electricity production facilities pay a fee for access to the grid to the transmission and distribution companies (this access previously having been provided at no cost) from January 1, 2011. During the interim period, the access fee payable is:(i) calculated at €0.5 per MWh delivered to the network or (ii) any other amount that the Ministry of Industry, Energy and Tourism establishes.

Royal Decree 1544/2011 implemented the First Transitional Provision of Royal Decree 14/2010 and confirmed the interim access fee imposed on electricity producers (€0.5 per MWh), subject to the adoption of a final method for calculating the access fee.

Applicable tax regime: Special provisions

Historically, the Spanish taxation framework has been very favorable for renewable energy but the existing tax benefits are beginning to be phased out. However, there is a trend that has seen increases in the tax benefits from research, development and technological innovation, as demonstrated by the recent legislative initiatives in this area, including:

- The income tax deduction for R&D&i for companies which was made permanent under Royal Decree 3/2009 of March 27.
- The introduction of various measures conducive to investment in R&D&i and investments related to the protection of the environment in the Law 2/2011, March 4, 2011 on Sustainable Economy Law, such as increasing the percentage of the deduction applicable to innovative activities from 8% to 12% within the ambit of the deduction for R&D&i.
- The introduction of a measure conducive to improve and facilitate the application and recovery of the R&D&i tax deduction in Law 14/2013, of September 27, to support entrepreneurs and their internationalization, by virtue of which, for fiscal years initiated as from January 1, 2013 and at the discretion of the tax payer, under certain circumstances, upon a 20% reduction of the R&D&i tax deduction, this deduction will not be subject to the ordinary limitations in the application of tax deductions and in case of lack of tax quota of the period in which to apply this tax deduction, it will be refundable in cash. The maximum R&D tax deduction either applicable or refundable is €3 million per year and €1 million for technological innovation.

Tax deductions for research, development and innovation

The tax deduction for R&D&i is regulated in Article 35 of Legislative Royal Decree 4/2004, of March 5, approving the revised corporate income tax ("**TRLIS**"). For purposes of the deduction, the definitions of each of the concepts of research, development and technological innovation in Article 35 of the TRLIS are of significant importance, which differentiates between research and development and the concept of technological innovation. Article 35 of TRLIS states explicitly that certain specific activities are considered research and development for purposes of the deduction. Expenses relating to the qualifying R&D&i activities are entitled to a 25% deduction for the period in which they were incurred (or 42% for those expenses that exceed the average expenditure over the preceding two years for this purpose), provided that such expenses were incurred in accordance with cost accounting and were specifically undertaken in connection with identified projects. In addition, investments in tangible fixed assets and intangible assets made in connection with R&D&i are entitled to a deduction of 8% and an expenditure corresponding to qualified personnel exclusively engaged with the R&D&i is entitled to a deduction of 17%.

Expenditures associated with technological innovation activities are entitled to a deduction of 8% for the period in which they were incurred (12% for fiscal periods commencing after the entry into force of Law 2/2011, March 4, 2011 on Sustainable Economy), provided that such expenses were incurred in accordance with cost accounting and were specifically undertaken in connection with identified projects. These deductions may be applied in assessments of tax periods that end in the 18 years subsequent to the tax period in which they were generated, provided that the other requirements of the corporate income tax regulations are complied with.

Tax deductions for environmental investments

This deduction, which is regulated in Article 39 of the TRLIS, gives tax incentives for investments which seek to protect the environment. Such investments include investments in new assets that are intended for use in the active exploitation of renewable energy sources, including specifically the use of solar energy for conversion into heat or electricity. Such investments have historically been entitled to a deduction of 10%. However, Law 35/2006 gradually eliminates this deduction by reducing the percentage of deductions according to the schedule.

<u>Periods Commencing from the Following Dates</u>	<u>% of Environmental Investment</u>
01/01/2006	10
01/01/2007	8
01/01/2008	6
01/01/2009	4
01/01/2010	2
01/01/2011 and after	0

Therefore, for fiscal years beginning after January 1, 2011, deductions for environmental investments will no longer apply. These deductions may be applied in the assessments of tax periods that end in the 15 years subsequent to the tax period in which they were generated, provided that the other requirements of the corporate income tax regulations are complied with.

However, as from the entry into force of Law 2/2011, March 4, on Sustainable Economy, investments in tangible assets for the protection of the environment consisting of facilities to prevent air, noise or water pollution will be entitled to a deduction of 8%.

United States Regulations

Our operations within the Biofuels segment of our Industrial Production activity and the Solar segment of our Concession-Type Infrastructure activity are subject to significant regulation in the United States.

Bioenergy Regulation

Federal Renewable Fuel Standard (“RFS”)

The Energy Policy Act of 2005 (“EPACT 2005”) set the first United States renewable fuel volume mandate. The renewable fuel program established by the Environmental Protection Agency (“EPA”) under EPACT 2005 required that 4 Bgal of renewable fuels be blended into gasoline for 2006, a volume mandate that increased to 7.5 Bgal for 2012. The Energy Independence and Security Act of 2007 (“EISA”) modified and expanded the RFS in a number of respects: increased the renewable fuel volume mandate to 9 Bgal for 2008 and set increasing volume mandates through 2022, when the volume mandate will reach 36 Bgal of total renewable fuels. EISA also sets complementary annual volume mandates for “advanced biofuel” as well as two specific kinds of renewable fuels, cellulosic biofuel and biomass-based diesel. Of particular note, EISA defines advanced biofuel, cellulosic biofuel, and biomass-based diesel as having at least 50% less “lifecycle greenhouse gases (“GHG”) emissions”—“the aggregate quantity of greenhouse gas emissions (including direct emissions and significant indirect emissions such as significant emissions from land use changes)...related to the full fuel life cycle, including all stages of fuel and feedstock production and distribution...”—than the gasoline or diesel the renewable fuels are replacing. Specifically, EISA defines “advanced biofuel” as “renewable fuel, other than ethanol derived from corn starch that has life cycle greenhouse gas emissions...that are at least 50% less than baseline life cycle greenhouse gas emissions” as determined by EPA. EISA defines “cellulosic biofuel” as “renewable fuel derived from any cellulose, hemi-cellulose, or lignin that is derived from renewable biomass and that has life cycle gas emissions...that are at least 60% less than baseline life cycle greenhouse gas emissions” as determined by EPA.” The EPA

announced in May 2012 its determination that ethanol produced from grain sorghum (or milo) at facilities that use biogas digesters in combination heat and power technology meets the 50% GHG emissions reduction threshold requirement for an advanced biofuel. Further, EISA defines “biomass-based diesel” as renewable fuel defined as “biodiesel” under the Energy Policy Act of 1992 and which has life cycle GHG emissions which EPA determines to be at least 50% less than baseline lifecycle GHG emissions.

In addition, EISA requires that any renewable fuel which is to be counted towards the RFS and is produced at a facility which commences construction after December 19, 2007, achieve at least a 20% reduction in life cycle GHG emissions compared to baseline life cycle GHG emissions. (This life cycle GHG emissions reduction requirement, coupled with EPA’s inclusion in the implementing regulations of an analysis of indirect emissions from international land use changes related to biofuel production, may serve to exclude some biofuels from counting towards the RFS). In May 2012, the EPA announced that ethanol produced from grain sorghum (or milo) at facilities that use natural gas meets the minimum 20% GHG emissions reduction threshold for renewable fuels. Under the Clean Air Act (the “CAA”), as amended by EISA and EPACT 2005, EPA possesses the authority to waive or adjust downward RFS requirements if the EPA Administrator, in consultation with the Secretary of Energy and the Secretary of Agriculture, determines that an RFS requirement or requirements would severely harm the economy or the environment, or if there is an inadequate domestic supply of a renewable fuel or fuels. The EPA is specifically required to review the availability of cellulosic biofuel and, if necessary, to downwardly adjust the annual volume mandate for cellulosic ethanol. After determining that limited production of cellulosic biofuel is occurring, EPA reduced the annual volume mandate for that fuel each of 2011 and 2012. However, EPA did not reduce or modify the advanced biofuel or total renewable fuel annual volume mandates. A number of lawsuits were filed challenging EPA’s cellulosic biofuel and certain other mandates as being too high, and based upon those lawsuits, the 2011 and 2012 volumes for cellulosic biofuels were eliminated. The EPA Administrator also has authority under the CAA, in certain circumstances, to revise upwardly or downwardly the GHG reduction percentages required of renewable fuel, advanced biofuel, cellulosic biofuel, and/or biomass-based diesel.

As implemented under EPA’s March 2010 regulations, the RFS requires producers and importers of gasoline and diesel to meet the various volume mandates for total renewable fuel and the various renewable fuel types. Producers and importers of gasoline and diesel must purchase renewable fuel (or renewable fuel credits, called “renewable identification numbers”) in an amount equal to or greater than a certain percentage, set by EPA, of their gasoline or diesel production and/or importation. EPA sets the percentages so that, if producers and importers produce and import gasoline and diesel in the volumes EPA projects, and if each producer and importer meets its obligations under the RFS, then total renewable fuel, advanced biofuel, cellulosic biofuel, and biomass-based diesel will be produced in the amounts required by EISA (or downwardly adjusted by EPA pursuant to its authority under EISA). Additionally, renewable fuel producers face recordkeeping and reporting obligations. The EPA has finalized standards for 2013, reducing cellulosic volumes, but not other volumes.

Each year, EPA is obligated to designate volume requirements for the amount of renewable fuels that will have to be added to non-renewable fuels pursuant to the RFS (which designates annual volume projections for each year of the law through 2022) during the following year. In late November, EPA released their proposed volume requirements for 2014. These requirements contained the normal reductions for the category of “Cellulosic Biofuels,” based on the fact that the aggressive projections of the original 2007 law for cellulosic production were not realized. EPA has made this same reduction in this cellulosic categories in prior years, but has not previously reduced either the category of Advanced Biofuels, or the overall total renewable fuel volume requirements of the law. The effect of the proposed reduction is to provide a market for the cellulosic and Advanced Biofuels that are expected to be produced, but to reduce the requirement to blend conventional biofuels (mostly corn ethanol) from the statutory requirement of 14.4 billion gallons to 13.0 billion gallons in 2014 (compared to a 13.8 billion gallon requirement in 2013).

For 2014 EPA is proposing to reduce both the “Advanced Biofuels” category and the total renewable fuel volumes for the first time, due to the fact that the so-called blend wall (the amount of ethanol that can be

blended into gasoline at a 10% blend ratio) prevents gasoline retailers from selling higher volumes of ethanol. The ethanol industry rejects this rationale, and argues that higher blends of ethanol (E15 and E85) allow more than 10% blend levels to be achieved. Moreover, the ethanol industry argues that the primary purpose of the RFS is to force the petroleum monopoly to go beyond this fictitious “blend wall” in blending increasingly higher volumes of alternative renewable fuels, and that under the provisions of the law EPA does not have the authority to consider market or distribution issues (only supply issues) in setting annual volumes.

The current proposal by EPA is not a final rule until EPA completes its evaluation of the approximately 16,000 comments that were filed during the public comment period, and then issues its final rule on the matter. The industry has mounted a significant campaign to encourage EPA to change its proposal and increase the required volumes, and there are strong indications that EPA will modify this proposal to increase these required volumes of ethanol blending before it becomes law. If EPA does not significantly change its proposal it is likely that the ethanol industry will file a lawsuit against EPA to force such a change. It is commonly believed that EPA will increase the 2014 renewable fuel volumes above the levels originally proposed in November 2013, although they will not be as high as the RFS schedule proscribes. As of the date of this Listing Memorandum, EPA has not published its final rule on the 2014 volumes, and indications are that they may not be published until late in 2014—perhaps even after the 2014 mid-term elections scheduled in early November. It is expected that EPA will likely extend the time period to comply with its final rule until mid-2015, although there can be no assurance that such an extension will be effected.

Grants and Loan Guarantees from Department of Agriculture and Department of Energy

The Food, Conservation, and Energy Act of 2008 (“**Farm Bill**”) authorized a number of United States Department of Agriculture (“**USDA**”) programs that promote the development and expansion of bio-energy production. The USDA Biorefinery Assistance Program under Farm Bill Section 9003 provides to eligible entities both grants to construct demonstration “advanced biofuel” refineries and loan guarantees for the development, construction, and retrofitting of commercial-scale bio-refineries that produce “advanced biofuels.” As under the RFS, “advanced biofuel” is defined as fuel derived from renewable biomass other than corn kernel starch. Under Farm Bill Section 9003, loan guarantees are capped at \$250 million and grant funding is capped at a percentage of the project cost. The USDA Bioenergy Program for Advanced Biofuels under Farm Bill Section 9005 provides payments to eligible producers of advanced biofuels to support expanded production. Payments are based on: the amount of funding available; the number of producers participating in the program; the amount of advanced biofuel being produced; the duration of production by the eligible producer; and, the net nonrenewable energy content of the advanced biofuel, if sufficient data is available. The bioenergy program for advanced biofuels will provide no more than 5% of total available funds to producers with an annual refining capacity of 150,000,000 gallons or more of advanced biofuel. Mandatory funding is available under both the Biorefinery Assistance Program and the Program for Advanced Biofuels through fiscal year 2012 but mandatory funding was not included for the year 2013. The Biomass Research and Development Initiative, a collaboration of the USDA and the DOE created under Farm Bill Section 9008, provides grant funding and other financial assistance to eligible projects addressing the research, development, and demonstration of biofuels and bio-based projects and the methods, practices, and technologies for their production. The initiative is geared towards addressing three main areas: feedstock development, biofuels and bio-based products development, and biofuels development analysis. The USDA Repowering Assistance Program under Farm Bill Section 9004 provides payments to eligible bio-refineries to encourage the use of renewable biomass as a replacement fuel source for fossil fuels used to provide process heat or power in their operation.

While the 2008 Farm Bill expired in 2013, most of these programs were renewed in new Farm Bill legislation that was passed by Congress and signed into law on February 7, 2014. This law is officially titled the “Agricultural Act of 2014”, and provides a five year extension of the Energy Title programs referenced above \$881 million in mandatory funding for those programs and an extension of many of the programs to also include production of biochemicals and bioproducts (in addition to just biofuels).

The USDA published in the Federal Register in April 2010 proposed rules implementing the Bioenergy Program for Advanced Biofuels (Farm Bill Section 9005) and Repowering Assistance Program (Farm Bill Section 9004) that would have served to exclude from the program most foreign entities, as well as subsidiaries of most foreign entities. USDA similarly published in the Federal Register in April 2010 a proposed rule implementing the Biorefinery Assistance Program (Farm Bill Section 9003) that would have made most foreign entities, as well as subsidiaries of most foreign entities, ineligible for loan guarantees from the program. Interim final rules published by the USDA in February 2011 eliminated the provisions limiting foreign entity participation in the three programs.

The DOE, acting pursuant to Section 1705 of EPACT 2005 (as amended by the American Reinvestment and Recovery Act ("**ARRA**")), guaranteed loans to certain eligible projects, including "[l]eading edge biofuel projects that will use technologies performing at the pilot or demonstration scale that the Secretary determines are likely to become commercial technologies and will produce transportation fuels that substantially reduce life-cycle greenhouse gas emissions compared to other transportation fuels." In order to have qualified for a guarantee under the Section 1705 Program, physical construction must have commenced at the primary site of the project on or before September 30, 2011. National Environmental Policy Act ("**NEPA**") review must have been completed prior to the issuance of a loan guarantee. Loan guarantees under Section 1705 were limited to projects meeting the prevailing wage requirements set forth in the Davis-Bacon Act of 1931. The DOE loan guarantees were issued to bio-refineries located in Hugoton, Kansas (Abengoa) and Emmetsburg, Iowa. A number of industry associations representing bioenergy producers asked the government to make changes to the loan guarantee program, including stipulating that the existence of the RFS suffices to show that there is a reasonable prospect that advanced biofuel makers will be able to repay loans, extending the September 2011 construction commencement deadline, and carving out loan guarantee funds that would be dedicated to bio-energy projects. Additionally, The DOE announced in mid-2014 two new loan guarantee program solicitations that have substantial funding available for loans that could be relevant to the biofuels space. The largest program is the Advanced Technology Vehicles Manufacturing (ATVM) program, which is intended to provide loans for the development of vehicles (or fuels) that improve vehicle fuel economy. Additionally, DOE's Renewable Energy and Efficient Energy Projects program was granted funding to promote the development of clean energy technologies that avoid, reduce, or sequester air pollutants or anthropogenic emissions of greenhouse gases. Both of these programs could provide incentives to biofuel producers (including Abengoa) who are developing new technologies in areas such as "waste-to-biofuels," efficiency improvements, or drop-in biofuels.

The USDA's Business and Industry Loan Guarantee program and Rural Energy for America Program ("**REAP**") are other potential sources of loan guarantees or grant money for eligible bio-energy producers. Both EISA and the ARRA authorized the DOE to make grants related to biofuel. DOE in the past made a number of grants to fund biomass research and development. EPACT 2005 Section 932 authorized federal funding of eligible cellulosic bio-refinery demonstration projects. The USDA Biomass Crop Assistance Program provides eligible growers of renewable crops in certain areas with payments for growing the crops as well as payments to sellers of eligible biomass materials to qualified biomass conversion facilities. The USDA disburses value-added producer grants to incentivize eligible independent agricultural producers to engage in activities such as biofuels production.

In December 2012, EPA approved a pathway to allow grain sorghum to be used as a feedstock for both conventional biofuels and for advanced biofuels under the RFS. Per the EPA analysis, sorghum based ethanol produced at dry mill facilities that use natural gas has a smaller GHG footprint than corn based ethanol (30% reduction compared to baseline gasoline versus 20% for corn). We have two plants that historically use 100% sorghum (Colwich and Portales), though neither of these have been in operation since January 2012. We are looking at the feasibility of using sorghum in York and Ravenna. The ability to qualify as an Advanced Biofuel and help to fill that requirement (and to receive a higher value for that ethanol) is a great potential for Colwich especially.

Other Federal Programs and Requirements Impacting Bioenergy Producers

A number of other programs and requirements exist to promote bio-energy production and development. The Energy Policy Act 1992 set a number of alternative fuel use and other requirements applicable to certain vehicles in federal and state government fleets. The Federal Highway Administration Surface Transportation Research, Development, and Deployment program provides some funding of bio-based research.

EPA possesses authority under the CAA to regulate fuels and fuel additives, and EPA until October 13, 2010 limited gasoline composition to 10% ethanol for most vehicles. On October 13, 2010, EPA granted a partial waiver of its rule to allow for the sale of gasoline with up to 15% ethanol (E15) for use in light-duty motor vehicles from model year 2007 or newer. On January 21, 2011, EPA granted another partial waiver allowing the sale of E15 for use in light-duty motor vehicles from model years 2001-2006. The CAA and EPA regulations require that manufacturers of gasoline and diesel fuels and fuel additives produced and commercially distributed for use in highway motor vehicles must register their gasoline and diesel fuels and fuel additives with EPA, and all individual fuel and fuel additive manufacturers involved in manufacturing E15 must register. On March 16, 2012, EPA approved the industry's misfueling mitigation plan, and on April 2, 2012, EPA approved the first E15 registration applications. The misfueling mitigation conditions of EPA's waiver must also be met before E15 can be lawfully sold. On June 15, 2012, EPA approved the first plans for satisfying the misfueling mitigation conditions of the E15 partial waivers, and some companies have now met all of the Clean Air Act requirements related to E15 and may lawfully introduce E15 into the marketplace. Although E15 is currently sold in at least nine states, a number of states restrict the sale of some gasoline-ethanol blends. Changes in state law may be needed before E15 may be sold in certain states and local requirements and practical concerns, such as dispenser and tank compatibility, may also need to be addressed. EPA also allows vehicle fuels to be sold containing higher levels of ethanol (such as E85, which is 85% ethanol), but these fuels are intended only to be used in vehicles certified as "flexible fuel."

Ethanol imported into the United States faces an ad valorem tariff of 2.5%; a secondary tariff of \$0.54/gallon expired on December 31, 2011.

State and Local Incentives for and Programs Concerning Bioenergy Production

In addition to federal government support, many states have enacted laws or programs incentivizing or impacting bio-energy production. Programs and incentives come in the form of grants, loans, tax exemptions, job training programs, direct payments and mandates requiring the use of biofuels or low carbon fuels. For example, California implemented a low carbon fuel standard ("LCFS") that requires a 10% reduction in transportation fuel carbon intensity by 2020. California's LCFS is the subject of litigation and was enjoined from December 2011 to April 2012. The litigation continues, but California won the federal lawsuit, resulting in the lifting of the injunction preventing implementation of LCFS. The decision is currently on appeal.

In Kansas, a newly constructed biomass-to-energy facility is exempted from state property taxes for up to 10 taxable years immediately following the taxable year in which construction or installation is completed. To fall within the exemption, we would need to establish that the plant meets the definition of a biomass-to-energy facility, which requires the use of biomass to produce at least 500,000 gallons of cellulosic alcohol fuel, liquid or gaseous fuel, or other sources of energy in a quantity with energy content at least equal to that of 500,000 gallons of cellulosic alcohol fuel. The Kansas Development Finance Authority may also issue revenue bonds to cover the costs of construction or expansion of a biomass-to-energy facility.

Environmental Permitting and Compliance

Bio-energy facilities face numerous potential permitting, licensing, and land use requirements and are subject to various federal, state, and local environmental laws, including laws governing: the discharge of materials into the air, water, and ground; the use, handling, storage, generation, transportation and disposal of hazardous materials, access to and use of water resources; and, employee health and safety. These

environmental laws can require the installation of pollution control equipment or operational changes for the purpose of limiting potential or actual environmental impacts. Violations of these laws or permit conditions may result in significant fines, the revocation of permits (including the potential for facility shutdown), criminal sanctions, and/or natural resources damage claims. Prior to development, permitting authorities may require that bio-energy projects consider and address, among other things, the impact on water resources and water quality, endangered species and other biological resources, existing land uses and zoning, agricultural resources, archaeological, paleontological, recreational and cultural considerations, and the impact on the landscape. Project approvals may be conditioned upon the project being modified, including to involve mitigation measures.

Potentially applicable federal permits might be required under the CAA, the Endangered Species Act (“**ESA**”), the Clean Water Act (“**CWA**”), the National Historic Preservation Act, and the National Wilderness Preservation Act, among other federal laws. Depending upon a number of factors (including facility location and potential to emit), the CAA may require bioenergy facilities to obtain preconstruction and operating permits, model potential emission impacts, install control technology to mitigate emission impacts, and purchase offsets to cover remaining emission impacts. In many instances, EPA has delegated its CAA authority to state or local authorities, who are then primarily responsible for issuing air emission permits. Some bioenergy facilities emit various pollutants regulated under the CAA, including volatile organic compounds (“**VOCs**”), oxides of nitrogen (“**NOx**”), carbon dioxide (“**CO2**”), particulate matter (“**PM**”) and hazardous air pollutants (“**HAPs**”). A number of CAA standards, are potentially applicable to a facility if it exceeds certain emission thresholds (such as for pollutants regulated as “hazardous”) or contains certain pieces of equipment (such as boilers, heaters, or liquid storage tanks of a certain size). EPA has recently taken steps to regulate GHG emissions under the CAA. As such, bioenergy facility operation or expansion may face regulatory requirements relating to GHG emissions reporting and reduction. The ESA is intended to protect endangered species by prohibiting the take of listed animals without a permit. The ESA makes it unlawful to harm a listed animal either directly or by significantly modifying its habitat in a way that interferes with the animal’s breeding, feeding, or sheltering patterns. The CWA makes it unlawful to fill wetlands or other waters without a permit, or to make point source discharges into navigable waters or their tributaries without a permit. The Emergency Planning and Community Right-to-Know Act and Sections 112(r)(1) and 112(r)(7) of the CAA may impose certain risk management planning, inventory reporting, release reporting, and other requirements upon biofuel facilities storing substances regulated under these acts in excess of certain quantities. Permits from other federal agencies may be required if federal lands, federally regulated natural resources, military zones, or other areas of federal competence are involved or may be impacted by the construction or operation of a renewable energy facility. The Comprehensive Environmental, Response, Compensation, and Liability Act of 1980 may subject bioenergy producers who arrange for the disposal of hazardous wastes to investigation or clean-up costs related to disposal sites.

Projects involving discretionary federal action must normally comply with NEPA, which requires assessment of the project’s environmental impacts and includes public review and involvement. If a project does not fall under a categorical exclusion or exemption, then an environmental assessment (“**EA**”) or an environmental impact statement (“**EIS**”) must be prepared. An EA is the less rigorous assessment, can take approximately six months to complete, and will result in either a “finding of no significant impact” (“**FONSI**”) or a finding that significant impacts are likely. If a FONSI is issued, NEPA review is complete. If, on the other hand, the EA finds significant impacts to be likely, an EIS must be prepared (which can take a year or longer) describing the environmental impact of the project and possible alternatives.

Various states have also implemented environmental laws and regulations that impact renewable energy projects. State or local approvals might be needed: to obtain air emission permits; to address impacts upon historic resources, state endangered species act considerations, considerations under state corollaries to the CWA, traffic, GHG emissions, or urban encroachment; to remove agricultural preservation restrictions; for wastewater and storm water discharges, water rights permits, water supply assessments, lake and streambed alterations, a utility license, or various land use approvals, among other reasons. As one example, California

released in November 2011 air quality guidance addressing stationary and mobile source emissions associated with bio-refineries that could result in stricter air pollution control requirements than have previously been imposed. Certain state environmental laws require the preparation of an environmental impact report similar to the federal impact statement, while some states require a meeting to be held to solicit comments from affected local landowners and local authorities.

Litigation or third party appeals challenging or seeking to delay permits for bio-energy facilities could delay or prevent the construction or operation of these facilities.

Federal Tax Incentives

The federal tax credits available to producers of biofuel vary according to the type of biofuel produced and the feedstock used to produce that fuel. Producers of blended fuel mixtures were eligible for an excise or income tax credit of \$0.45 per gallon of ethanol (regardless of feedstock) that was blended with gasoline and sold or used as fuel in a trade or business, but these credits expired on December 31, 2011. Producers of cellulosic biofuel, such as ethanol produced from wood chips and plant wastes, were eligible for a maximum \$1.01 per gallon tax credit, which expired on December 31, 2013. Blenders of biodiesel and renewable diesel fuel were eligible for a tax credit of \$1.00 per gallon blended into motor fuels, but these credits expired on December 31, 2013.

In addition, under the same program as that applicable to solar energy property, an owner of eligible bioenergy property may be eligible to apply for a cash payment from the United States Department of the Treasury in the amount of a one-time federal income investment tax credit equal to 30% of the tax basis of the eligible property if construction began in 2009, 2010 or 2011 and the property is placed in service before January 1, 2017. See "*Solar Regulation—Section 1603 Treasury Grant Program.*"

Accelerated Depreciation

Owners of eligible biofuel property may also benefit from accelerated depreciation of the property over a five-year period under the Modified Accelerated Cost Recovery System ("MACRS") under the United States Internal Revenue Code of 1986, as amended. In addition, some property used in biofuel projects may qualify for bonus depreciation for equipment placed in service before January 1, 2014. Under the same statute a deduction of 50% of the cost of qualifying property is permitted in the first year for property placed in service in 2012 and 2013. Bonus depreciation under this statute expired on December 31, 2013.

Solar Regulation

Federal, state and local energy laws and regulations apply to the development, ownership, business organization and operation of power generation facilities in the United States. The United States federal government regulates the sale of electricity at wholesale and certain environmental matters, and state and local governments regulate the construction of power generation facilities, the sale of electricity at retail, and certain other environmental and permitting matters.

United States Federal Regulation of the Electricity Industry

The United States federal government regulates the wholesale sale of electric power and the transmission of electricity in interstate commerce through the Federal Energy Regulatory Commission ("**FERC**"), which draws its jurisdiction from the Federal Power Act ("**FPA**"), as amended, and from other federal legislation such as the Public Utility Regulatory Policies Act of 1978 ("**PURPA**"), the Energy Policy Act of 1992 ("**EPACT 1992**") and the Energy Policy Act of 2005 ("**EPACT 2005**"). EPACT 2005 repealed the Public Utility Holding Company Act of 1935 and replaced it with the Public Utility Holding Company Act of 2005 ("**PUHCA**").

Regulation of Electricity Generators

The FPA provides FERC with exclusive ratemaking jurisdiction over all “public utilities” that engage in wholesale sales of electricity and/or the transmission of electricity in interstate commerce. The owners of renewable energy facilities selling at wholesale are therefore generally subject to FERC’s ratemaking jurisdiction. FERC may authorize a public utility to make wholesale sales of electric energy and related products at negotiated or “market-based” rates if the public utility can demonstrate that it does not have, or that it has adequately mitigated, horizontal and vertical market power and that it cannot otherwise erect barriers to market entry. Entities granted market-based rate approval face ongoing filing and compliance requirements. In granting market-based rate approval to a wholesale generator, FERC also typically grants blanket authorizations under Section 204 of the FPA and FERC’s regulations for the issuance of securities and the assumption of debt liabilities.

If the criteria for market-based rate authority are not met, FERC has the authority to impose conditions on the exercise of market rate authority that are designed to mitigate market power or to withhold or rescind market-based rate authority altogether and require sales to be made based on cost-of-service rates, which could in either case result in a reduction in rates. FERC also has the authority to assess substantial civil penalties (up to \$1.0 million per day per violation) for failure to comply with tariff provisions or the requirements of the FPA.

FERC approval under the FPA may be required prior to a change in ownership or control of a 10% or greater voting interest, directly or through one or more subsidiaries, in any public utility (including one of our U.S. project companies) or any public utility assets. FERC approval may also be required for individuals to serve as common officers or directors of public utilities or of a public utility and certain other companies that provide financing or equipment to public utilities.

FERC also implements the requirements of PUHCA applicable to “holding companies” having direct or indirect voting interests of 10% or more in companies that (among other activities) own or operate facilities used for the generation of electricity for sale, which includes renewable energy facilities. PUHCA imposes certain record-keeping, reporting and accounting obligations on such holding companies and certain of their affiliates. However, holding companies that own only exempt wholesale generators (“**EWGs**”), foreign utility companies, and certain qualifying facilities under PURPA are exempt from the federal access to books and records provisions of PUHCA. EWGs are owners or operators of electric generation facilities (including producers of renewable energy, such as solar projects) that are engaged exclusively in the business of owning and/or operating generating facilities and selling electricity at wholesale. An EWG cannot make retail sales of electricity, may only own or operate the limited interconnection facilities necessary to connect its generating facility to the grid, and faces restrictions in transacting business with affiliated regulated utilities.

Regulation of Electricity Sales

Electricity transactions in the United States may be bilateral in nature, whereby two parties contract for the sale and purchase of electricity subject to various governmental approval processes or guidelines that may apply to the contract, or they may take place within a single, centralized clearing market for purchases and sales of energy, electric generating capacity and ancillary services. Given the limited interconnections between power transmission systems in the United States and differences among market rules, regional markets have formed as part of the power transmission systems operated by regional transmission organizations (known as “**RTOs**” or independent system operators (“**ISOs**”)) in places such as California, the Midwest, New York, Texas, the Mid-Atlantic region and New England.

Reliability Standards

EPACT 2005 amended the FPA to grant FERC jurisdiction over all users, owners, and operators of the bulk power system for the purpose of enforcing compliance with certain standards for the reliable operation of the bulk power system. Pursuant to its authority under the FPA, FERC certified the North American Electric

Reliability Corporation (“**NERC**”) as the entity responsible for developing reliability standards, submitting them to FERC for approval, and overseeing and enforcing compliance with them, subject in each case to FERC review. NERC, in turn, has delegated certain monitoring and enforcement powers to regional reliability organizations. Users, owners, and operators of the bulk power system meeting certain materiality thresholds are required to register with the NERC compliance registry and comply with FERC-approved reliability standards.

State Regulation of the Electricity Industry in the United States

State regulatory agencies in the United States have jurisdiction over the rates and terms of electricity service to retail customers. Regulated investor-owned utilities often must obtain state approval for the contracts through which they purchase electricity, including renewable energy, if they seek to pass along the costs of these contracts to their retail ratepayers. Different states apply different standards for determining acceptable prices for utility procurement contracts, including contracts for the purchase of renewable energy. In some states, electricity generation is deregulated and electricity supply is provided by retail or wholesale third party suppliers, as determined in that state’s regulatory scheme. Several states hold auctions for the wholesale supply of power to be sold through utilities to retail customers that do not choose a third party competitive electric supplier.

In certain states, approval of the construction of new power generation facilities, including solar power plants, is obtained from a state agency, with only limited regulatory approvals required from other state agencies and local governments. However, in many states the permitting process for power plants, including solar power plants, is also subject to land-use and similar regulations established at the county and municipal government level. In other cases, state and local authorizations may involve a more extensive approval process, possibly including an environmental impact evaluation and opposition by interested parties or utilities.

Renewable Energy Tax Incentives in the United States

The United States provides various federal, state and local tax incentives to stimulate investment in renewable energy generation capacity, including solar power. These tax incentives are subject to change and, possibly, elimination in the future. Certain U.S. federal income tax incentives are described below.

Investment Tax Credit

Owners of eligible solar energy property (which includes most kinds of solar energy generation equipment) that is placed in service before January 1, 2017 generally may claim a one-time federal income investment tax credit (“**ITC**”) equal to 30% of the tax basis of the eligible property. An owner of eligible solar energy property who claims the ITC must reduce the tax basis of the eligible property by an amount equal to one half of the credit. The ITC is subject to recapture (in declining amounts) if the owner sells or ceases use of the property during the five-year period following the placed-in-service date. Once the 30% ITC expires at the end of 2016, the permanent 10% ITC shall remain in effect.

Section 1603 Treasury Grant Program

In lieu of claiming certain U.S. federal income tax credits (in particular, the ITC), owners of eligible solar energy property may be eligible to receive a cash payment (a “**Cash Grant**”) from the United States Department of the Treasury (“**Treasury**”) equal to 30% of tax basis of the eligible property. Among other requirements, to be eligible for a Cash Grant, the eligible property must have been placed in service in 2009, 2010 or 2011 or, for property not placed in service during that period, the construction of the specified energy property must have begun after December 31, 2008 and before January 1, 2012. In addition, eligible solar energy property must be placed in service by January 1, 2017. Certain persons, “disqualified persons,” are ineligible to receive the Cash Grant and are prohibited from owning a direct or indirect interest in

otherwise Cash Grant-eligible solar energy property, unless the indirect interest is held through an entity taxable as a C corporation for U.S. federal income tax purposes. Cash Grants are subject to recapture during the five-year period beginning on the date the eligible solar energy property is placed in service. The amount of the Cash Grant subject to recapture decreases ratably over the five-year recapture period. Among other events, failure of the eligible property to be used for its intended purpose and the direct or indirect transfer to a disqualified person (as described above) will cause recapture of the Cash Grant.

Certain legislation required a mandatory sequestration of discretionary spending if U.S. Congress failed to reach an agreement on a deficit-reducing budget by March 1, 2013. Because U.S. Congress did not approve the requisite budget by that deadline, President Obama signed a sequestration order. Under the current sequestration rules, every final decision by Treasury in respect of a Cash Grant, evidenced by an award letter that is delivered to a cash grant applicant on or after October 1, 2013 through September 30, 2014, will reflect a 7.2% reduction in the Cash Grant award amount. For cash grant award letters issued on or after October 1, 2014 through September 30, 2015, the Office of Management and Budget has estimated that the sequestration reduction will be 7.3%. This reduction applies regardless of the date on which the application for a Cash Grant was received by Treasury.

Accelerated Depreciation

Owners of eligible solar energy property also benefit from accelerated depreciation of the property over a five-year period under the Modified Accelerated Cost Recovery System (“**MACRS**”) under the United States Internal Revenue Code of 1986, as amended. Most of the equipment used in CSP and PV projects qualifies for five-year depreciation under MACRS. In addition, some equipment used in CSP and PV projects may qualify for bonus depreciation for equipment placed in service.

Loan Guarantee Program

The DOE, in an effort to promote the rapid deployment of renewable energy and electric power transmission projects, is authorized to grant guarantees with respect to certain loans to renewable energy projects and related manufacturing facilities and electric power transmission projects under Sections 1703 and 1705 of EPACT 2005. The ARRA amended the EPACT 2005 to include Section 1705. In order to have qualified for the Section 1705 Program, physical construction must have commenced at the primary site of the project on or before September 30, 2011. NEPA review must have been completed prior to the issuance of a loan guarantee. In May 2011, the Section 1705 Program expired by statute, and DOE announced that it would no longer accept new applications under that program. On September 30, 2011 the Section 1705 loan guarantee program closed with no further loan guarantees to be issued.

Loan guarantees under Section 1703 continue to be available for solar. However, eligibility is limited. The applicant must be located in the United States and may include foreign ownership so long as the project is located in one of the fifty states, the District of Columbia or a U.S. territory. The project must employ a new or significantly improved technology that is not a commercial technology. A commercial technology is defined as in general use in the commercial marketplace in the United States at the time the term sheet is issued by the Department of Energy. A technology is considered to be in commercial use if it has been installed in and is being used in three or more commercial projects in the United States and has been in operation in each such commercial project for at least five years. The project must also pay prevailing wages under the Davis-Bacon Act.

DOE Research Grants, State Energy Funding, Workforce Training, and Other Initiatives under the ARRA

The DOE received funding under the ARRA, which it has disbursed or is in the process of disbursing, to increase solar power production. Some funds were allocated as grants to support research, development, demonstration, and deployment projects. Funds were awarded to states on the basis of their electric consumption to fund energy efficiency, renewable energy, and other energy programs. ARRA funds were

allocated with the purpose of providing workforce training with respect to renewable energy and energy efficiency. A number of initiatives were funded by the DOE with ARRA monies, including initiatives addressing solar market transformation, the integration of PV generation into the distribution system, and base load CSP generation.

U.S. State-Level Incentives

In addition to federal legislation, many states have enacted legislation, principally in the form of renewable portfolio standards (“**RPS**”), which generally require electric utilities to generate or purchase a certain percentage of their electricity supplied to consumers from renewable resources. In certain states, it is not only mandatory to meet these percentages from renewable resources, which in general are on the increase, but also electric utilities may be required to generate or purchase a percentage of their electricity supplied to consumers from specific renewable energy technologies, including solar technology. Depending upon the state, various certifications, permits, contracts and approvals may be required in order for a project to qualify for particular RPS programs. Some states, for example, require that only renewable energy generated in-state counts towards the RPS. According to the Database of State Incentives for Renewable Energy, as of August 2014, 49 states and U.S. territories have adopted some type of RPS standards. Although there is currently no federal RPS program, there have been proposals to create a federal RPS standard for renewable energy.

Renewable Energy Certificates (“**RECs**”) are typically used in conjunction with RPS programs as tradable certificates demonstrating that a certain number of kWh have been generated from renewable resources. Under many RPS programs, a utility may generally demonstrate, through its ownership of RECs, that it has supported an amount of renewable energy generation equal to its state-mandated RPS percentage. The sale of RECs can represent a significant additional revenue stream for renewable energy generators. In RPS states where a liquid REC market does not exist, renewable energy can be bought or sold through “bundled” power purchase agreements, where the power purchase agreement price includes the price for renewable energy attributes. Some states require that RECs and the associated electricity be purchased together in order to count towards the RPS. In states that do not have RPS requirements, certain entities buy RECs voluntarily. These RECs generally have lower prices than RECs that are used to meet RPS obligations. The price of RECs can vary significantly, depending on their availability, which in turn depends upon the amount of renewable generation that has been put in service in a state that has implemented RPS requirements. In some states, the number of successful projects has generated more RECs than required to meet the applicable RPS requirements for a given year or years, leading to steep drops in the market price for RECs. Additionally, demand for RECs can be driven by requirements (such as those imposed under the California Environmental Quality Act) that development projects mitigate potential significant GHG impacts identified in connection with environmental clearances.

Effective December 10, 2011, California enacted legislation that increases its existing RPS to 25% by 2016 and 33% by 2020, and expands the program to cover publicly-owned utilities, in addition to investor-owned utilities (“**IOUs**”). In addition, the California Solar Initiative (“**CSI**”) sets a goal of 1,940 MW of solar capacity by the end of 2016. The CSI provides monetary incentives for solar installation between 1 kW and 5 MW in size as well as grants for research, development, and demonstration. California’s feed-in tariff program obligates IOUs to purchase solar generation at a standard price until a purchase threshold is crossed. Colorado set an RPS of 30% by 2020 for IOUs, permits the trading of RECs, and requires that 3% of the RPS be met by distributed generation in 2020 for IOUs. Arizona set an RPS of 15% by 2025, with 30% of the RPS to be met from distributed generation. A Texas law signed in August 2005 requires that 5,880 MW of new renewable generation be built by 2015. The law also set a target of having 10,000 MW of renewable generation capacity by 2025. Additionally, Texas law establishes a minimum of 500 MW of non-wind renewable generation, and doubles the RPS compliance value provided by non- wind generation.

Other incentives that states and localities have adopted to encourage the development of renewable resources include property and state tax exemptions and abatements, state grants, and rebate programs. In

addition, a number of states collect electricity surcharges on residential and commercial users and through public benefit funds reinvest some of these funds in renewable energy projects. California offers a property tax incentive for certain solar energy systems installed between January 1, 1999 and December 31, 2016. The Arizona Department of Revenue provides a corporate tax credit based on production for solar, wind, or biomass systems that are 5 MW or larger and are installed on or after December 31, 2010 and before January 1, 2021.

Solar generation may also be incentivized by state GHG emission reduction measures, such as California's cap and trade scheme, which caps and reduces GHG emissions. The California cap and trade program went into effect with respect to the electricity and other sectors starting in 2013.

Environmental Permitting and Compliance

Construction and operation of solar power plants and the generation and power transmission of renewable energy is subject to environmental regulation by United States federal, state and local authorities. Typically, environmental laws and regulations require a lengthy and complex process for obtaining licenses, permits and approvals prior to construction, operation or modification of a generation project or power transmission facilities. Prior to development, permitting authorities may require that project developers consider and address, among other things, the impact on water resources and water quality, endangered species and other biological resources, existing land uses and zoning, agricultural resources, archaeological, paleontological, recreational and cultural considerations, and impact on landscape. Potentially applicable federal permits might be required under the National Environmental Policy Act ("NEPA"), the Endangered Species Act ("ESA"), the Clean Water Act ("CWA"), the National Historic Preservation Act, and the National Wilderness Preservation Act, among other federal laws. The Federal Land Policy and Management Act ("FLPMA") provides the Bureau of Land Management ("BLM") with discretion to provide rights-of-way for power plants and electric power transmission facilities on federal lands, and BLM has developed detailed regulations for the management of its lands. Additional approvals would be needed if projects or power transmission lines were to be located on Forest Service or tribal lands. Project approvals may be conditioned upon the project being modified, including to involve mitigation measures.

A project that is located on federal land (as well as other projects involving federal agency action) must comply with NEPA, which requires assessment of the project's environmental impacts and includes public review and involvement. If a project does not fall under a categorical exclusion or exemption, then an environmental assessment ("EA") or an environmental impact statement ("EIS") must be prepared. An EA is the less rigorous assessment, can take approximately six months to complete, and will result in either a finding of no significant impact ("FONSI") or a finding that significant impacts are likely. If a FONSI is issued, NEPA review is complete. If, on the other hand, the EA finds significant impacts to be likely, an EIS must be prepared (which can take a year or longer) describing the environmental impact of the project and possible alternatives. The DOE and the BLM jointly prepared a solar energy programmatic environmental impact statement ("**Solar PEIS**") in order to facilitate the permitting and sponsoring of large scale solar electric power plants on public lands in the Western United States. The DOE and BLM released a draft Solar PEIS in December 2010, a supplement to the draft Solar PEIS on October 27, 2011, the final Solar PEIS on July 24, 2012 and the Record of Decision for the Solar PEIS on October 12, 2012. The Solar PEIS is intended to serve as a roadmap for solar energy development by establishing solar energy zones, totaling about 285,000 acres of public lands, characterized by significant solar resources, good energy transmission potential, and relatively low conflict with biological, cultural and historic resources. Within these zones, the Solar PEIS has the goal of providing incentives for development, including faster and simpler permitting, improved mitigation strategies, and other economic incentives.

On October 12, 2012, the Secretary of the Interior signed the Record of Decision to establish a comprehensive Solar Energy Program to administer the development of utility-scale solar resources on BLM-administered public lands in six southwestern states. The Solar Energy Program decisions will guide the processing of all new utility-scale solar energy applications on BLM-administered lands. The BLM's Solar

Energy Program would only apply to projects capable of generating 20 MW or more. Decisions on projects that are on non BLM-administered land and on projects capable of generating less than 20 MW will be made in accordance with existing land use requirements, current applicable policy, and individual site-specific NEPA analyses.

Permits from other federal agencies may be required if federal lands, federally regulated natural resources, endangered species, military zones, or other areas of federal jurisdiction are involved or may be impacted by the construction or operation of a renewable energy facility. The ESA is intended to protect endangered species by prohibiting the take of listed animals without a permit. The ESA makes it unlawful to harm a listed animal either directly or by significantly modifying its habitat in a way that interferes with the animal's breeding, feeding, or sheltering patterns. The CWA makes it unlawful to fill wetlands or other waters without a permit, or to make point source discharges into navigable waters or their tributaries without a permit.

Various states have also implemented environmental laws and regulations that impact renewable energy projects. State or local approvals might be needed to obtain air emission permits, to address impacts upon historic resources, to remove agricultural preservation restrictions, to address state endangered species act considerations, for wastewater and storm water discharges, for water rights permits, a utility license, or various land use approvals, among other reasons. Certain state environmental laws require the preparation of an environmental impact report similar to the federal impact statement, while some states require a meeting to be held to solicit comments from affected local landowners and local authorities. Utility scale solar power plant technologies require access to water resources, potentially triggering permitting scrutiny (as well as necessitating the navigation of water rights regulations that vary from state to state).

Litigation or third party appeals challenging or seeking to delay permits for renewable energy facilities and associated power transmission infrastructure could delay or prevent the construction or operation of renewable energy facilities and result in financial penalties for failure to complete or operate the facilities.

The California Energy Commission, the California Department of Fish and Wildlife, the BLM and United States Fish and Wildlife Service are working to develop a streamlined permitting process for renewable generation facilities including a plan for the development of solar generation and the protection of environmental resources in the Mojave and Colorado deserts. These agencies are drafting the Desert Renewable Energy Conservation Plan ("**DRECP**") to address how entities with jurisdiction over renewable energy and transmission projects and related facilities in the desert of California should conserve natural communities and species pursuant to the California Natural Community Conservation Planning Act (NCCP Act), the ESA, and the Federal Land Policy and Management Act ("FLPMA") while also facilitating the permitting of renewable energy projects in accordance with California's RPS and the federal government's goal of increasing renewable energy generation on public land. The agencies are preparing a joint Environmental Impact Report ("**EIR**") EIS for the DRECP and for a possible amendment to the California Desert Conservation Area (CDCA) Plan of 1980, as amended, and released a scoping report for the EIR/EIS in December 2011.

Regulation of Solar Storage

Solar storage is a nascent industry in the United States. Energy storage solutions are being explored for solar and other renewable and distributed generation of electricity, and some support has been available from the federal government from agencies such as the Department of Energy, in the form of grants and loans. Additional support or encouragement can be found in a number of states. However, no concerted legal or regulatory effort has been made to develop a framework that would make energy storage an attractive alternative for the supply of electricity to end users of power. To date, energy storage has been considered to be generally too expensive to be viable for the supply of electricity.

Several issues have stood in the way. There is no federal energy policy that supports a national renewable portfolio standard. Further, the existing system of ISOs and RTOs that manage the bulk transmission grids and

wholesale markets for pricing electricity frequently establish low prices for electricity sold in off hours, making it difficult to recoup the cost of stored power sold into the grid at that time. At present, most states do not have regulations that specifically address issues related to stored power, including interconnection to the grid, nor does the federal government. However, as stored electricity becomes more common some such regulation is likely. In July 2013, the FERC issued Order 784, which created regulations that, inter alia, are intended to facilitate the adoption of energy storage technologies. The California Public Utilities Commission (“**CPUC**”) initiated a docket to review issues related to energy storage and develop regulations. CPUC Energy Storage Proceeding R.10-12-007. On October 17, 2013, the CPUC issued an order instituting rulemaking to consider the adoption of procurement targets for viable and cost-effective energy storage systems. Notwithstanding those developments, in general, the lack of defined regulation creates uncertainty. In addition, whether power that is stored and later injected into the grid will qualify for RPS programs and how the amount that is eligible for RECs will be computed is unknown. For example, it is uncertain whether RECs will apply to the amount of power generated by the renewable generation or to the amount taken from storage after line losses.

Brazil

Our operations within the power transmission-lines portions of our Engineering and Construction and Concession-Type Infrastructure activities and the Biofuels segment of our Industrial Production activity are subject to significant regulation in Brazil.

Industrial Engineering and Construction Regulation

The Governmental Policy and Legislative Framework for the Electricity Sector

The electricity sector has undergone two major institutional reforms in the last decades which resulted in its current form: the first in the 1990s and another in 2003, which aimed at modifying the rules applying to the National Interconnected System (“**SIN**”) and resulted in its current form. The first change in the sector occurred after the enactment of Law No. 8,987 of 1995, as amended, which established the system for the concessions and permissions for rendering public services (the “Concessions’ General Act”), and with the enactment of Law No. 9,074 of 1995 as amended, which sets forth specific rules for the concession of electricity public services. This law, *inter alia*: (i) established the granting, duration and extension of concessions and permissions; (ii) set forth the free access principle for the power transmission and distribution systems; (iii) released free consumers (as defined below) from the commercial monopoly of distribution concessionaires, allowing them to choose their supplier; and (iv) introduced the independent power producer (“**IPP**”) and the self producer agents. In addition, Decree No. 7,805 of 2012, which regulates the Provisional Measure (“*Medida Provisoria*”) No. 579 of 2012, later converted into Law No. 12,783 of 2013 sets forth the rules for further extending the concession contracts up to 30 (thirty) years, for one period only.

Law No. 9,427 of 1996, as amended, *inter alia*, created the National Electric Energy Agency (“**ANEEL**”), the regulatory agency concerned with supervising the production, power transmission, distribution and trading of electricity, and it is regulated by Decree No. 2,335 of 1997. Such law granted ANEEL the authority, *inter alia*, to run public tenders for concessions and permissions, as well as to execute and manage the agreements for delivering public services and to grant certain authorizations. Law No. 9,478 of 1997, as amended, created the National Committee on Energy Policy (“**CNPE**”), chaired by the Minister of Mining and Energy (“**MME**”), with the duty of advising the President of the Republic on the national policies in this domain.

The first phase of the reform was concluded with the enactment in May 1998 of Law No. 9,648, later amended, which regulates competition in the electricity sector. Among many other provisions, it sets forth rules for: (i) the trading, import and export of power; (ii) the division, into separate agreements, of the purchase and sale of energy, and the free access to the power transmission and distribution systems; (iii) the creation of the Electric System National Operator (“**ONS**”), a legal entity organized under the private law, in

charge of the coordination and operational control of the facilities for the generation and power transmission of interconnected electric systems in Brazil; and (iv) the free negotiation of energy, within the scope of the Wholesale Market of Electricity (“**MAE**”), to be created by a market agreement.

The second phase of the reform redefined the sector’s institutional model, mainly concerning the energy market, by setting forth as chief goals the need for the system’s expansion while keeping tariffs low and competition present in power generation.

The new institutional framework was established by Laws No. 10,848 and 10,847 of 2004 in an effort to restructure the electricity industry to better provide consumers with a secure electricity supply combined with low tariffs by expanding electricity generation and services.

Law No. 10,848 created two co-existing energy markets: a regulated market, for the protection of customers, and a free market to encourage consumers which are able to buy directly from producers on a competitive basis (“free consumers”). Law No. 10,848 has authorized the creation of the Chamber of Electric Energy Trading (“**CCEE**”), a non-profit private entity, functioning under the supervision of ANEEL to manage the agreements for the purchase and sale of energy in the regulated contracting environment (“**ACR**”) and the ascertainment and settlement of contractual differences in the free contracting environment (“**ACL**”). This law further authorized the creation of the Committee on the Monitoring of the Electricity Sector (“**CMSE**”), under the aegis of the government, to monitor the supply conditions of the electricity market and the advising of preventive actions for guaranteeing this supply.

On May 28, 2009, Provisional Measure No. 450 of 2008 became Law No. 11,943, as amended, which authorizes the Federal Government to participate in the Guarantee Fund for Electric Energy Enterprises (*Fundo de Garantia a Empreendimentos de Energia Elétrica*). Such fund aims to provide financial guarantees proportional to the participation, direct or indirect, of federal or state companies of the electric industry in special purpose companies, created for the development of electric related projects in connection with the Growth Acceleration Program (*Programa de Aceleração do Crescimento—PAC*) and other strategic programs appointed by act of the Executive Branch.

More recently, the government passed Provisional Measure No. 577 of 2012, converted into Law No. 12.767 of 2012, which establishes specific rules for the termination of concessions in the event of bankruptcy or forfeiture and for intervention by the granting authority, acting through ANEEL, in the management of concessionaires in order to ensure the adequate rendering of services and compliance with contractual, regulatory and legal provisions. The goal of this Law is to ensure the continuation of the service and its rules on administrative intervention are stricter than the ones of the Concessions’ General Act.

In addition, the government issued Provisional Measure No. 579 of 2012, later converted into Law No. 12.783 of 2013, which establishes that concession agreements expiring between 2015 and 2017 may be extended once, in 2013, thus before their expiration date, for a period of up to 30 years. This Provisional Measure came as a response of the government to problems related to the high costs of the tariffs and also to the expiration of many concession agreements between 2015 and 2017. The concessionaires had until October 15, 2012 to express their interest in renewing their concessions. The deadline was later extended to December 4, 2012. The main goal of the anticipation of the renewal process was to ensure that the concessionaires would abide with the government promises of reducing the tariffs. Hence, since its edition until its conversion into law, the Provisional Measure has been in the center of heated debates among the many stakeholders. In general lines, the main issue lays in the fact that after the renewal, concessionaires would be remunerated only for investments in the operation and maintenance of its equipment, failing to receive higher revenues, which include the compensation of non-amortized investments on assets. The government has indemnified the concessionaires for these other costs, but the companies have argued about the calculation of the compensation amount. As a partial response to the problem, the government issued Provisional Measure No. 591 on November 29, 2012, establishing that assets belonging to transmission concessionaires prior to May 31, 2005 and which have not yet been fully amortized shall also be compensated. This Provisional Measure is no longer in force. However, this rule has been incorporated in Law

No. 12,783 of 2013 and is still applicable. The effort has paid off and, unlikely to what happened with the renewal of generation concession agreement, in December 4, 2012, all 9 (nine) transmission concessionaires whose concession agreements would expire between 2015 and 2017 have agreed to enter into new concession agreements.

The Transmission Sector

The transmission of electricity over long distances is undertaken through a basic power transmission network comprised of power transmission lines and respective substations with a tension equal or superior to 230kV. The objective of the basic power transmission network is to enable the integration between remote power plants and load centers represented by terminal substations, so as to serve the distributors, or large clients directly. The power transmission lines in Brazil are generally extensive as the majority of the important hydroelectric plants are located away from the electricity consumers. Currently, the Brazilian territory is almost totally interconnected.

The basic power transmission network is a large and complex system, which allows the electrical integration between different regions of Brazil, thus enabling constant interchanges of energy with the aim of optimizing the operating costs of the generation matrix (operating with a complement of thermal energy).

In addition, the basic power transmission network permits access by the interested users, who are subject to the payment of a tariff for the use of this network, known as the TUST (*Tarifa de Uso do Sistema de Transmissão*), which is fixed at differentiated values, depending on the point of the system accessed by the interested user.

Although the vast majority of electricity transmission takes place in Brazil through the basic power transmission network, there are some locations, mainly in the Amazon region, which are not covered by such network. This area is served by an isolated system grid. The isolated system grids must comply with several specific ANEEL Resolutions. Planning and monitoring of the systems' operation in the North Region is undertaken by the North Region's Operational Technical Group, created by Ordinance MINFRA No. 895 of 1990. Law No. 12,111 of 2009, regulated by Decree No. 7,246 of 2010, aims to encourage the competitiveness of power suppliers in the isolated systems and establishes the provisions for the interconnection of part of an isolated system to the SIN and determines quality and safety standards similar to those set forth in the SIN. It also redefines the distribution criteria of the CCC—the Fossil Fuel Compensation Account, created by Law No. 5,899 of 1973—which is an account whose revenues are used to cover the costs of fossil fuels (diesel, for example) for thermoelectric generation in the isolated and interconnected systems. These account's revenues come from a fee paid by the final consumers, through the distribution concessionaires.

Brazilian Regulatory Authorities

National Energy Policy Council—CNPE

The CNPE, is a council created in August 1997 aimed at advising the Brazilian President with respect to the creation and development of a national energy policy. The Minister of Mines and Energy is the person responsible for the presidency of the CNPE. The majority of its members are ministers of the Brazilian government. The CNPE was created to optimize the use of Brazil's energy resources and to ensure the supply of energy to the country.

Ministry of Mines and Energy—MME

The MME is the primary authority of the Brazilian energy sector, having as its main role the definition of policies, guidelines and regulatory framework of the sector. Since the enactment of Law No. 10,848 of 2004, the Federal Government, through the MME, has taken over from ANEEL responsibilities such as the creation of regulations governing the granting of concessions and the definition of rules for public tender offers for concessions of public services and electric energy facilities.

National Electric Energy Agency—ANEEL

ANEEL is the agency in charge of regulating and supervising the generation, transmission, distribution and commercialization of electricity in Brazil. It is an independent federal regulatory agency. After the enactment of the Law No. 10,848 of 2004, ANEEL's primary responsibility is to regulate and monitor the electricity sector. ANEEL's current responsibilities include, among others, (i) managing concessions for electric power generation, transmission and distribution, including the approval of electricity tariffs, (ii) proposing and enacting regulations for the electricity sector, (iii) implementing and regulating the exploitation of various energy sources, including the use of hydroelectric energy, (iv) promoting public tender offers for the granting of new concessions, (v) settling administrative disputes between producers and purchasers of electricity and (vi) defining the criteria and methodology for the determination of power transmission and distribution tariffs.

National Electric System Operator—ONS

The ONS was created in 1998 as a non-profit private entity comprised of free consumers and players engaged in generation, transmission and distribution of electric power, in addition to importers and exporters of electricity. The main role of the ONS is to coordinate and control the power generation and transmission operations in the SIN, in accordance with ANEEL's regulation and supervision. The principal objectives and responsibilities of the ONS comprise, *inter alia*, (i) operational planning for the generation sector; (ii) organizing the use of the SIN and international interconnections; (iii) guaranteeing that all players of the sector have access to the power transmission network in a non-discriminatory manner; (iv) planning for the expansion of the electric energy system; (v) proposing plans to the MME for extensions of the basic grid; and (vi) proposing and submitting new rules for the operation of the power transmission system for ANEEL's approval.

Electric Energy Trading Chamber—CCEE

The CCEE was created by Law No. 10,848 of 2004 and established by Decree No. 5,177 of 2004 and took over the responsibilities previously performed by MAE (Wholesale Electricity Market) as well as its organizational and operational structures. The CCEE is responsible for, *inter alia*: (i) preparing and performing electricity auctions within the ACR by delegation of ANEEL; (ii) registering all the power purchase agreements in the ACR, *Contratos de Comercialização de Energia no Ambiente Regulado* ("CCEAR"); (iii) registering the agreements resulting from market adjustments and the volume of power contracted in the free market; and (iv) accounting for and clearing of short-term transactions.

Energy Research Company—EPE

The EPE was created by Law No. 10,847 of 2004 and established by Decree No. 5,184 of 2004. The main purpose of the EPE is to carry out studies and research in order to acquire and provide background information to Brazilian energy sector planning activities. Its primary responsibilities include, among others: (i) the performance of studies and projections with respect to the Brazilian energy matrix; (ii) the execution of research to support integrated planning of energy resources; (iii) the development of studies to support generation and power transmission expansion; (iv) the performance of feasibility studies for electricity generation, including both technical-economic and social-environmental aspects; and (v) the coordination of efforts to obtain pre-construction environmental licenses for hydro power plants and power transmission lines.

Power Sector Monitoring Committee—CMSE

The CMSE is an advisory board under direct coordination of the MME. Its primary objective is to monitor and evaluate the continuity of electricity supply and its safety throughout Brazil. Its main attributions include,

among others, (i) monitoring the generation, power transmission, distribution, commercialization, import and export of electricity; and (ii) assessment of electricity supply and service conditions.

Concessions of Electricity Utilities—Transmission

Companies or consortia that wish to build and operate electric power transmission facilities pertaining to the basic grid have to participate in a public auction since they are to render a public service.. These concessions are granted by ANEEL, acting as representative of the granting authority, and the winner is the bidder who is able to render the service with the lowest annual permitted revenue (*Receita Anual Permitida—“RAP”*). The agreements define the regulatory regime under which the rendering of public services will be carried out, as set forth by the Concessions’ General Act. The concession agreements grant rights to use certain electricity installations during a period of usually 30 (thirty) years.

The Concessions’ General Act and the concession agreements establish, *inter alia*, the requirements that a concessionaire must comply with when rendering public services, the rights of the consumers, as well as the obligations of the concessionaire and the granting authority. Furthermore, the concessionaire must comply with regulations governing the energy sector. The main provisions of both the Concessions’ General Act and the concession agreements are summarized as follows:

- *Adequate Service*: The concessionaire must render adequate services in terms of regularity, continuity, efficiency, safety and accessibility;
- *Use of Land*: The concessionaire may use public land or request the granting authority to expropriate necessary private land for the benefit of the concessionaire. In this case, the concessionaire must compensate the affected private landowners;
- *Strict Liability*: The concessionaire is strictly liable for all damages arising from the provision of its services. See “—Penalties”;
- *Changes in Controlling Interest*: The granting authority must approve any direct change in the concessionaire’s controlling interest;
- *Intervention by the Granting Authority*: The granting authority, through ANEEL, may intervene in the concession, by means of an act, to ensure the adequate performance of services, as well as the full compliance with applicable contractual, regulatory and legal provisions. Within 30 days of the act date, ANEEL is required to begin an administrative proceeding to establish the causes and to determine liability, in which the concessionaire is entitled to contest the intervention. The shareholders of the concessionaire under intervention will have 60 (sixty) days from the act date to submit to ANEEL a recovery plan and correction of errors and transgressions which gave rise to intervention. During the term of the administrative proceeding, a person appointed by the granting authority (*interventor*) becomes responsible for carrying on the concession and the terms of office for officers and members of the supervisory board (*Conselho Fiscal*) shall be suspended during the intervention. The interventor will be paid with funds from the concessionaire. The intervention term shall be up to one year, renewable at the discretion of ANEEL;
- *Early Termination of the Concession*: The termination of the concession agreement may be accelerated by means of expropriation and/or forfeiture. Expropriation results in the early termination of a concession due to the public interest, which must be expressly declared by law. Forfeiture must be declared by the granting authority after the issuance of a final administrative ruling by ANEEL or the MME attesting that the concessionaire, among others: (i) has failed to render adequate service or to comply with applicable law or regulation; (ii) no longer has the technical, financial or economic capacity to provide adequate service; or (iii) has not complied with penalties assessed by the granting authority. The concessionaire may contest any expropriation or forfeiture in the court. The concessionaire is entitled to indemnification for its investments in expropriated assets that have not

been fully amortized or depreciated, after the deduction of any amount that must be paid by the concessionaire as penalty;

- *Expiration:* When the concession expires, all assets, rights and privileges that are materially related to the rendering of the services revert to the Brazilian government. Following the expiration, the concessionaire is entitled to indemnification for its investments in assets that have not been fully amortized or depreciated on the expiration date;
- *Remuneration:* Transmission concessionaires are remunerated on the basis of compensation authorized under the concession agreement, the RAP. Rather than relating to the volume of electricity transmitted, these payments are set by the granting authority upon the granting of each concession. Under the relevant Agreement for the Rendering of Transmission Services (as defined below) and based on the annual permitted revenues, ONS is responsible for calculating the amounts owed to power transmission concessionaires on a monthly basis. Based on this calculation, and depending on the agreements executed individually with ONS, power transmission system users make direct monthly payments to the concessionaires;
- *Revisions Under Concessions' General Act and the concession agreements:* There are two types of annual revisions—related to investments in transmission facilities and substations previously agreed upon with the granting authority, and special revisions—related to changes in the tax regime, regulatory tariffs, compensation for certain investments made by the concessionaires for which prior approval by ANEEL is not legally required, or other unforeseen events that, at the discretion of the granting authority, affect the economic and financial balance of the concession agreement. Depending on the nature of the event, the granting authority may conduct a revision unilaterally or at the request of the interested concessionaire; and
- *Affordable Pricing:* Client's right to obtain the rendering of the services continuously and with maximum efficiency for the lowest possible price.

Under the Agreement for the Rendering of Transmission Services and under the concession agreements, the reduction of the revenues can occur based on the following terms:

- by a variable amount equivalent to a maximum of 12.5% of the RAP amount, in the event of an operating unavailability of the grid and substations of a power transmission concessionaire;
- if the operating unavailability occurs following a reduction at the maximum percentage of 12.5%, ONS may charge an additional penalty equivalent to a maximum of 2% of the RAP amount for the preceding 12 month period. This penalty applies to each event of unavailability, without limitation, the CPST also provides that the variable reduction and the additional penalty will not apply in the event of unavailability in the first six months of operations of new power transmission facilities;
- the variable reduction and the additional penalty shall similarly not be applied to events of operating unavailability resulting from force majeure, interruptions authorized or requested by the granting authority or events of unavailability as a result of the inefficiency of ONS or of any other concessionaire; or
- if the unavailability continues for more than 30 consecutive days, the granting authority may initiate legal proceedings to terminate the concession.

ANEEL may also reduce the RAP at any time if the concessionaire starts receiving revenues from other activities.

Regulation of Electricity Utilities—Transmission

The governmental or administrative authorizations required for the construction and operation of power transmission networks

After the auction for the concession of power transmission lines, a concession agreement is signed by and between the concessionaire and the federal government, represented by ANEEL. Next, the Basic Project for Power Transmission Facilities relating to the concession shall be submitted and duly approved. For environmental compliance, the concessionaire must prepare environmental impact studies to be approved by the competent environmental authority for the granting of the previous license (*licença prévia*), which is granted in the initial phase of the project and approves its concept and location, certifying its environmental feasibility. After the fulfillment of the conditions of the previous license, the concessionaire shall obtain the environmental installation license (*licença de instalação*), authorizing the actual implementation and construction. Some other permits and licenses may also be required during the installation, such as the Declaration of Public Interest from ANEEL, authorization for suppression of vegetation, among others. Lastly, the concessionaire must obtain the respective environmental operation license (*licença de operação*) and the release certificate issued by ONS to start operating.

The Requirements that Must be Met to Obtain Access to such Public Service

The regulation in force sets forth that the rendering of transmission services shall be preceded by the execution of a Transmission Agreement and of an Agreement for the Rendering of Supplementary Services (*Contrato de Serviços Ancilares*). There are three different types of Transmission Agreements: (i) Agreement for the Rendering of Transmission Services ("**CPST**"), (ii) Agreement for the Use of the Transmission Networks ("**CUST**"); and (iii) Connection Agreement. The CPST is executed between the ONS and the concessionaires. The CUST is executed among the ONS, the concessionaires, represented by the ONS, and the users of the transmission network. These users may be: (i) agents holding a concession or a permission for distribution of electricity; (ii) power generation agents directly connected to the basic grid or not connected to the basic grid but operating centrally, whether concessionaires or authorized companies; (iii) consumers connected to the basic grid; and (iv) importers and exporters of electricity directly connected to the basic grid.

There are three types of Connection Agreements: (i) Agreement for the Connection to the Transmission Network (*Contrato de Conexão do Sistema de Transmissão*), (ii) Agreement for Facilities' Sharing (*Contrato de Compartilhamento de Instalações*); and (iii) Agreement for the Connection to the Transmission Network—Adjustment Term (*Contrato de Conexão ao Sistema de Transmissão—Termo de Ajuste*). These agreements are executed between the transmission concessionaires and the connecting agents, while the ONS is an interested third-party to such agreements.

There is also the Financial Guarantee Agreement (*Contrato de Constituição de Garantia*), which is an agreement between the ONS, acting on its own behalf and on behalf of the transmission concessionaires, and the custodian bank which provides ONS with access to funds available in user-designated bank accounts in the event the latter fails to satisfy payments owed to the transmission concessionaires and to the ONS under the corresponding CUST.

Governmental Incentives to Encourage Expansion of the Power Transmission Grid

There are special credit lines available to entrepreneurs from the National Bank for Economic and Social Development (Banco Nacional de Desenvolvimento Econômico e Social—BNDES). Also, Law No. 11,488 of 2007, as amended, created the Special Incentive Regimen for the Development of Infrastructure (Regime Especial de Incentivos para o Desenvolvimento da Infraestrutura—REIDI), a general tax incentive to infrastructure projects, which directly applies to the expansion of the power transmission grids.

A recent innovation regarding the granting of the REIDI was established after the edition of Mines and Energy Ministerial Ordinances Nos. 274 and 310 of 2013, which stipulate all the data required in order to

apply for this incentive, including, among other requirements, the description of the project, technical and legal information, and the perspective of investment in equipment, materials and machines. All required information must be compiled in a specific petition and filed with ANEEL.

The Rates for the Provision of Power Transmission Services

Power Transmission companies are remunerated through the RAP, for the availability of their facilities to the ONS and for the rendering of transmission services to the users.

Charges and Tariffs Owed by Power Transmission Concessionaires

The Electricity Services Inspection Fee (*Taxa de Fiscalização de Serviços de Energia Elétrica—TFSEE*), was created by Law No. 9,427 of 1996, as amended, and regulated by Decree No. 2,410 of 1997. *TFSEE* is an annual fee payable directly to ANEEL in 12 monthly payments, and is calculated based on the type of service rendered by the concessionaire and on the size of the concession. It is equivalent to 0.4% of the annual economic benefit earned by the concessionaire. Electricity transmission concessionaires also must invest each year a minimum of 1% (one percent) of their net operating revenues in electricity research and development.

Penalties

The regulation issued by ANEEL governs the imposition of sanctions against the participants of the energy sector and classifies the appropriate penalties based on the nature and importance of the breach (including warnings, fines, temporary suspension from the right to participate in public auctions for new concessions, licenses or authorizations and forfeiture). For each breach, the fine may be up to 2% of the concessionaire revenues (net of value-added tax and services tax) in the 12 months period prior to the assessment notice. In addition, electricity generation, distribution and transmission concessionaires are strictly liable for any direct or consequential damages caused to third parties as a result of inappropriate provision of electricity services at their facilities. In case ONS is incapable of determining the liability of a particular concessionaire, permissionaire or authorized agent, or if the damages are caused by ONS, liability is proportionately allocated to the power transmission, distribution and generation agents in accordance with the voting rights of each category under the ONS bylaws.

Reinforcements and Improvements

The granting authority may unilaterally amend the concession agreements, including in the event of alterations to the project or previously unforeseen specifications (such as a requirement to strengthen or to improve the current power transmission facilities). A concessionaire is entitled to the economic and financial balance of the concession agreement and, therefore, receives additional revenues by way of amortization of its investments in the implementation of these reinforcements or improvements.

Until May of 2005, a concessionaire's obligation to implement strengthening actions ("Reinforcements") was subject to specific prior authorization from ANEEL, which would then set the corresponding additional revenues. Any improvements action ("Improvements") would not require prior authorization or additional revenues. The then existing regulation, however, failed to clearly define reinforcement and improvement. Thus, on May 23, 2005, ANEEL issued Resolution No. 158, distinguishing the projects and installations that would be considered as reinforcements and those deemed to be classified as improvements. In July 2011, Resolution No. 158 was replaced by Resolution No. 443.

Improvements are defined as any installation, replacement or remodeling of equipment in order to ensure regular, continued, safe and updated electricity transmission services, pursuant to the relevant concession agreement and network procedures. The costs incurred from Improvements will not be taken into account in any subsequent revision of the RAP. Nonetheless, the concessionaire can claim for the reestablishment of economic and financial balance of the concession agreement.

Reinforcements are defined as the implementation of new electricity transmission facilities, or the replacement or adjustment of existing facilities, as recommended in previously approved plans for the expansion of the power transmission network. They are subject to prior authorization by ANEEL and are intended to increase the power transmission capacity or the reliability of the SIN, or to implement a physical alteration of the configuration of the electric grid or of a given facility. Through ANEEL Resolution No. 443, certain types of Reinforcements may be implemented by transmission concessionaires directly, without prior authorization by ANEEL, provided that they are the result of a request by ONS aiming at expanding power transmission capacity or the reliability of the SIN. In this case, however, ANEEL will not have previously established the additional revenues to which the concessionaire would be entitled for the implementation of such Reinforcement. These revenues, therefore, are included in the annual revision of the RAP. In addition, Resolution No. 443 does not assure that all costs incurred by the concessionaire for the investments in Reinforcements will be taken into account for establishing the relevant RAP.

Finally, concessionaires that are not subject to periodic revision of the RAP could be compelled to make investments within the scope of expansion plans or at the request of ONS, which would not require prior approval by ANEEL and, consequently, are not included in the RAP. In such event, pursuant to Resolution No. 443, concessionaires will be entitled to apply for acknowledgement of the investments by means of a special revision of the RAP pursuant to a procedure and parameters not clearly defined by ANEEL, including time periods. The lack of a clear definition could result in mismatched investment disbursements and RAP payments. However, additional fixed revenues from revisions will be retroacted until the reinforcement operations begin.

Bioenergy Regulatory Framework

The Requirements to Produce and Trade Power from Alternative Sources

Pursuant to Law No. 9,074 of 1995 and Decree No. 2,003 of 1996, a company or a consortium that is interested in producing electric power and trading, in part or all, the production at its own risk shall be granted a concession or authorization from ANEEL to become an IPP. The implementation of thermoelectric power plants exceeding 5MW to be explored by a IPP only requires an authorization. Thermoelectric power plants produce electricity from a wide range of sources, including alternative sources such as biomass.

The interested company shall submit to ANEEL a formal request and meet the requirements set out in ANEEL Resolution No. 390 of 2009, such as the compliance with tax, social security, FGTS (employee's dismissal fund), and local, state and federal obligations.

Upon confirmation by ANEEL that the requirements were met, the agency first issues an order, which allows the interested company: (i) to request information from the distribution concessionaries and from ONS regarding the access to the installations; (ii) to obtain the environmental license and authorizations from federal, state or local public authorities; and (iii) to initiate the construction of the power plant, at its own risk.

Following the issuance of the corresponding order, the interested party shall submit the documents listed in the Appendix of the Resolution and ANEEL will examine: (i) the availability of the fuel, when applicable; (ii) installed capacity to be produced by the plant; and (iii) access to the transmission and distribution grids. ANEEL also verifies the historical record of the company and its economic group and the existence of any prior penalties. Once the prerequisites are accomplished, ANEEL grants an authorization and the corresponding IPP is then allowed to produce and trade the energy at its own risk.

The authorized company shall keep in its files and at ANEEL's disposal: (i) the environmental impact assessment and environmental impact report or related reports and studies; (ii) project documents; and (iii) commissioned studies and reports.

Access to the Transmission and Distribution Systems

An IPP has the right to access the power transmission and distribution grids, connecting its system, through payment of the power transmission and distribution tariffs, calculated on the basis of the criteria established by ANEEL (the “**TUST**” and the “**TUSD**”, respectively).

For this purpose, the corresponding IPP executes agreements for the use of the power transmission and distribution systems (the “**CUSTs**” and the “**CUSDs**”, respectively) and agreements for the connection to the power transmission and distribution systems (the “**CCT**” and “**CCD**”, respectively). According to ONS procedures, certain of our project companies have been exempted from executing the “**CUSTs**.”

The Sale of Energy from Alternative Sources

The energy from alternative sources can be traded not only in the regulated contracting environment (“**ACR**”) but also in the free contracting environment (“**ACL**”)—where the terms and conditions are freely negotiated by the parties-, by the execution of a power purchase agreements of alternative energy (“**CCEI**”).

In the ACL, an IPP with an installed capacity of up to 30 MW can sell energy from biomass sources (and other renewable sources as well) to: (i) other generation agents; and (ii) consumers able to buy directly from the generators on a competitive basis (“**Free Consumers**”) or small consumers, usually with a small business, with an installed load of between 500 kW and 3 MW (“**Special Consumers**”).

In the ACR, the trade of energy is preceded by a public auction, where the price and conditions of the power purchase agreements are previously established by ANEEL.

Governmental Incentives

The enactment of Law No. 10,438 of 2002, as amended, led to the development of a policy fostering alternative energy sources and also to co-generation, which formulated several strategies.

One of them is the reduction of the TUST or TUSD, as applicable, to plants with an installed power of up to 30 MW, on a percentage not inferior to 50%.

Another initiative in this area is the Program for Fostering Alternative Sources of Electricity (“**PROINFA**”), whereby Eletrobras undertakes to purchase energy generated from wind power, small hydroelectric power plants and biomass projects in the SIN. The cost of energy is divided among the final consumers. BNDES has opened a credit line for investments in PROINFA projects. The same law created the Energy Development Account, the funds of which may be used for the payment of the difference between the economic value corresponding to the specific technology of each source’ and the ‘value corresponding to the generation of competitive energy’ from plants that do not take part in PROINFA.

In the isolated systems, Law No. 9,648 of 1998, as amended, establishes, as incentives for the use of renewable alternative energy sources to replace the oil-based thermoelectric generation, benefits in the sharing of the amounts deposited in the Fuel Consumption Account (“**CCC**”).

Tax Incentives

Law No. 11,488 of 2007 establishes a special tax regime related to the improvement of Brazilian infrastructure (REIDI) and an IPP can benefit from such special regime during the installation of its power plant.

Ethanol

Mainly derived from sugarcane, Brazilian ethanol has been commercially produced for more than 70 years, when its addition to gasoline became compulsory. The current legal percentage of ethanol to this blend is 25% but is expected to increase up to 27.5% in the near future.

There are favorable tax treatments to ethanol transactions available under the following taxes: Contribution for the Financing of Social Security (“**COFINS**”), Social Integration Program (“**PIS**”), the Manufactured Goods Tax (“**IPI**”), the State VAT (“**ICMS**”), Contribution for Intervention in Economic Domain (“**CIDE**”) and the Import Duty.

According to Law No. 10,833 of 2003, COFINS will not be levied on export transactions. The same rule applies to PIS, in accordance with Law No. 10,637 of 2002, as amended.

Export transactions are also exempt from IPI in accordance with Decree No. 7,212 of 2010 and ICMS in the state of São Paulo, as established by Item V of Article 7 of Book 1 of São Paulo Estate Decree No. 45,490 of 2000.

In São Paulo State, the ICMS rate levied on internal transactions with mineral diesel is 12% as stated by Item VI, of Article 54, of São Paulo Estate Decree No. 45,490 of 2000.

The CIDE Contribution rate levied on import and commercial transactions is reduced to zero as determined by Decree No. 5,060 of 2004 until December 31, 2016.

The import tax rate levied on ethanol import transactions is set at 20%. However, in April 2010 the Foreign Trade Chamber (“**CAMEX**”), of the Ministry of Development, Industry and Foreign Trade enacted the CAMEX Regulation No. 21 of 2010 reducing this rate to zero.

Biodiesel

As mentioned above, in January 2005 the Brazilian government enacted Law No. 11,097, later amended, to insert biodiesel on the list of the Brazilian energy matrix. The idea behind the National Biodiesel Production and Use Program, launched in 2004, was to gradually replace the use of petroleum-based fuels with clean and renewable fuels.

To achieve this, it has been mandatory since January 2008 to add a minimum percentage of biodiesel to mineral diesel sold to end consumers nationwide. Pursuant to Law No. 11,097 of 2005, as amended, which introduced biodiesel into the Brazilian energy matrix, the minimum percentage required for the addition of biodiesel to mineral diesel sold in the country is 6%. This percentage is expected to increase in the near future.

The Decree No. 5,297 of 2004 establishes reducing coefficients to PIS and COFINS Contributions according to the nature of the raw material, producer and region of production.

As stated by Decree No. 6,006 of 2006, the IPI rate levied on transactions with biodiesel under the Standard Classification of Goods No. 3824.90.29 is reduced to zero. (It is important to note that the Brazilian government can increase this rate without enacting a specific law, due to the lawfulness principle). This Decree was later revoked and replaced by Decree No. 7,660 of 2011 and the IPI rate is now set at 10%.

Like ethanol, there are no taxes levied on export transactions.

ICMS Covenant No. 113 of 2006 (amended by ICMS Covenant No. 27 of 2011) reduces the ICMS rate levied on interstate transactions with biodiesel resulting from the industrialization of grains, suet, seeds and palm.

MANAGEMENT

Board of Directors of Abengoa, S.A.

The Board of Directors of Abengoa comprises the following 16 members:

Name	Position	Date of Appointment	Age
Felipe Benjumea Llorente	Executive Chairman	06/25/1983	57
José B. Terceiro Lomba ⁽¹⁾	Executive Vice-Chairman	04/15/2007	71
Manuel Sánchez Ortega	Chief Executive Officer	10/25/2010	51
José Joaquín Abaurre Llorente ⁽²⁾	Director	06/25/1988	63
José Luis Aya Abaurre ⁽²⁾	Director	06/25/1983	66
José Borrell Fontellés ⁽³⁾	Director	07/27/2009	67

Carlos Sundheim Losada ⁽²⁾	Director	04/15/2007	63
Alicia Velarde Valiente ⁽³⁾	Director	04/06/2008	50
Ricardo Hausmann ⁽³⁾	Director	04/06/2014	58

(1) Representative of Aplidig, S.L. (formerly Aplicaciones Digitales, S.L.)

(2) Appointed by Inversión Corporativa IC, S.A.

(3) Independent Director.

(4) Appointed by First Reserve.

The business address of the members of the Board of Directors of Abengoa is Campus Palmas Altas, calle Energía Solar 1, 41014 Seville, Spain.

Felipe Benjumea Llorente, Javier Benjumea Llorente and María Teresa Benjumea Llorente are siblings. José Joaquín Abaurre Llorente and José Luis Aya Abaurre are cousins. José Joaquín Abaurre Llorente is the cousin of Felipe Benjumea Llorente, Javier Benjumea Llorente and María Teresa Benjumea Llorente. Ignacio Solís Guardiola and Fernando Solís Martínez Campos are cousins.

There are no potential conflicts of interest between the private interests or other duties of the members of the Board of Directors listed above and their duties to Abengoa.

The following is the biographical information of members of our Board of Directors.

Felipe Benjumea Llorente

Mr. Benjumea Llorente obtained a Degree in Law at the Universidad de Deusto.

He joined Abengoa in 1983 as a member of the Board of Directors, and in 1989 he was appointed Managing Director. He has been Chairman of the Board of Directors since 1991. Since 2002, he has been the Chairman of the Focus-Abengoa Foundation.

He is also Chairman of Inversión Corporativa IC, S.A. since July 2008, the University Cooperation Society of Loyola Andalucía and the Technology and Science Advisory Board of the Spanish Ministry of Education and Science. He is also a member of the Boards of Directors of the U.S.—Spain Council, Council of the Universidad Pontificia de Salamanca, Loyola Andalucía University Foundation, the Sacred Family of Vocational Schools Foundation and the *Confederación Española de Directivos y Ejecutivos*.

He has been a member of the Boards of Directors of Sociedad General de Cablevisión (1993-1996), La Papelera Española (1987-1995), Thyssen Industrie (1989-1993), Hispano Inmobiliaria de Gestión (1989-1998), Banco Santander Central Hispano (1990-2002), Iberia Líneas Aéreas de España (2007-2010), the Operating Company of the Spanish Electricity Market (“OMEL”) (1998-2011), Garanair (2011) and Iberia, LAE, Sociedad Anonima Operadora (2011-2012).

José B. Terceiro Lomba

Mr. Terceiro is a Professor of Applied Economics at the Universidad Complutense of Madrid. Mr. Terceiro also serves as Executive Vice Chairman of Abengoa, S.A. representing Aplidig, S.L. (formerly Aplicaciones Digitales, S.L.) He has been on our Board since April 4, 2007. He is also a member of the Appointments and Remuneration Committee. He serves as a member of the Board of Directors of Bioetanol Galicia, S.A., representing Aplidig, S.L. (formerly Aplicaciones Digitales S.L.). He has served as a member of the Boards of Directors of Grupo Prisa, Iberia Líneas Aéreas de España and Corporación Caixa Galicia. He has been Subsecretary of the Spanish Cabinet Office (1981-1982).

Manuel Sánchez Ortega

Mr. Sánchez holds a degree in Industrial Electrical Engineering from the ICAI in Madrid and has a master's degree in Business Administration from the *Instituto Panamericano de Alta Dirección de Empresas* (IPADE), Mexico. Mr. Sánchez joined our Information Technologies business in 1989 as a software engineer. He later went on to perform duties as project director and sales director within our Information Technologies business. In 1995, he was named Executive Vice President in Mexico, where he lived for five years. In 2000, upon his return to Spain, he was named Executive Vice President of the Energy and Environment subsidiary of our Information Technologies business. In 2001 Mr. Sánchez was named general manager of our Information Technologies business, of which he was appointed the Chief Executive Officer in 2002 and Chairman in 2004, serving in that capacity until he was appointed as Chief Executive Officer of Abengoa. He has been a member of Bioenergy's Board of Directors since 2007. Since October 25, 2010, Mr. Sánchez has served as Abengoa's Chief Executive Officer.

José Joaquín Abaurre Llorente

Mr. Abaurre serves as a member of the Board of Directors of Abengoa. He has held this post since June 25, 1988. He is also a member of the Audit Committee. Mr. Abaurre Llorente is an expert in audiovisual activities.

José Luis Aya Abaurre

Mr. Aya serves as a member of the Board of Directors of Abengoa. He has held this post since June 25, 1983. He also is a member of the Appointments and Remuneration Committee. Moreover, he serves as a member of the Board of Directors of Inversión Corporativa IC, S.A. Mr. Aya Abaurre trained as a Technical Agricultural Engineer.

José Borrell Fontellés

Mr. Borrell is Professor of Introduction to Economic Analysis at Madrid's Universidad Complutense and Chairman of the European University Institute in Florence. He studied aeronautic engineering at the Universidad Politécnica in Madrid, and also holds a doctorate in Economic Sciences, a master's degree in Operations Research from Stanford University and a master's degree from Paris' *Institut Français du Pétrole*. He worked as an engineer at Compañía Española de Petróleos (1972-1981), and, between 1982 and 1996, he served successively as Spanish Secretary General for Budget, Secretary of State for Finance and Minister for Public Works, Telecommunications, Transport and the Environment. He was President of the European Parliament for the first half of the 2004-2009 legislative term and President of the Development Assistance

Committee for the second. Mr. Borrell was appointed chairman of the Appointments and Remuneration Committee on July 23, 2012.

María Teresa Benjumea Llorente

Ms. Benjumea serves as a member of the Board of Directors of Abengoa. She has held this position since April 14, 2007. She developed her professional experience in the sector of decoration.

Javier Benjumea Llorente

Mr. Benjumea graduated with a degree in Business Administration and also earned a master's in Senior Company Management. He joined Abengoa in 1980 as Deputy Chairman. In 1986, he was appointed Managing Director and was Co-Chairman from 1995 to 2007. He is also a director of Inversión Corporativa IC, S.A., Vice-Chairman of Sevillana-Endesa and a member of the Board of Directors of, among others, Telefónica de Argentina, S.A., the newspaper ABC, Estudios de Política Exterior, S.A., and the Association for Managerial Progress. He is also Chairman of the Board of Trustees of the Sagrada Familia Professional Schools Foundation. Additionally, he has served as a member of the Board of Trustees of the Focus-Abengoa Foundation, a member of the Governing Body and the Board of Trustees of the Comillas-ICAI University Foundation, Permanent Academician of the Andalusian Academy of Social Sciences and the Environment, a member of the Board of Trustees of the Royal Palace of Seville and of the Andalusian Association of Foundations, and a member of the Board of Trustees of the Forja XXI Foundation.

Mercedes Gracia Díez

Ms. Gracia is a Professor of Econometrics at Madrid's Universidad Complutense and at *Centro Universitario de Estudios Financieros*. She serves as an Independent Director of the Board of Directors of Abengoa. She is the chairman of the Audit Committee and a member of the Appointments and Remuneration Committee. Her academic papers have been published in the *Journal of Business and Economic Statistics*, *Review of Labor Economics and Industrial Relations*, *Applied Economics* and the *Journal of Systems and Information Technology*. She also served as Director of Balance Sheet Management at Caja Madrid (1996-1999). Additionally, she served as Head of the Economics and Law Division of the Agencia Nacional de Evaluación y Prospectiva.

Ricardo Martínez Rico

Mr. Martínez Rico studied at the Universidad de Zaragoza, obtaining a first class bachelor's degree in Business Administration. He joined Abengoa on October 24, 2011 as a director. He is the founding partner current President and Chief Executive Officer of Equipo Económico, a Madrid based consulting firm. In addition, Mr. Martínez-Rico is a member of the advisory board to the President of the U.S. Chamber of Commerce of the United States. Previously he was head of Spain's Economic and Commercial Office in Washington, D.C. (2006) and in 2003 he was appointed Deputy Finance Minister of the Spanish government (2003-2004). Mr. Martínez-Rico was also Spain's spokesman on the European Budgetary Council and European Council for Regional Policy.

Claudi Santiago Ponsa

Mr. Santiago Ponsa studied at Georgetown University and he also earned a master's degree in Computer Science from the Universitat Autònoma de Barcelona as well as completing further postgraduate studies at INSEAD in France. He previously spent 31 years with General Electric (1980 to 2011), serving as President and Chief Executive Officer of GE Oil & Gas from 1999 to 2011. He has been a member of the Board of Directors of Abengoa since February 23, 2012.

Ignacio Solís Guardiola

Mr. Solís graduated from the Universidad de Seville with a specialty in private law. He currently serves as a Regional Director of private banking for Lloyds Bank, which he joined in 1989. He has been a member of the Board of Directors of Abengoa since 2007.

Fernando Solís Martínez-Campos

Mr. Solís is a law graduate with postgraduate studies at the Instituto de Empresa, Spain, the University of Colorado and Harvard University. He is currently a member of the Boards of Directors of Concesur and Cabimar. He has been a member of the Board of Directors of Abengoa since 2007.

Carlos Sundheim Losada

Mr. Sundheim holds a degree in Industrial Engineering from the *Escuela Técnica Superior de Ingenieros* in Seville. He has been employed at different departments of Banco Urquijo-Hispano Americano LMTD, London, and as manager of production and maintenance of Minas de Herrerías, S.A., Huelva, commercial deputy director in export of Rio Tinto Minera, S.A., Madrid, manager of Algebra, S.L., Seville and general manager of Abecomsa, S.A., Seville.

Alicia Velarde Valiente

Ms. Velarde graduated magna cum laude from the *Instituto Católico de Enseñanza*, Colegio Pablo VI. She also holds a degree in Law from the Universidad San Pablo. In 1990, Ms. Velarde passed the notary examination and became a notary public. During the 1994-1995 academic year she taught civil law at the Universidad Francisco de Vitoria, where she remained until 1999. She is still affiliated with this university, where, since 1999, has taught canon law.

Ricardo Hausmann

Professor Ricardo Hausmann, a Venezuelan economist and academic, is the current director of the Centre for International Development and a Professor at Harvard University. He was formerly Chief Economist at the Inter-American Development Bank, where he created the Research Department. He has also held positions such as the Minister of Planning for Venezuela, as a member of the board of the Central Bank of Venezuela. He was a lecturer of economics at the Instituto de Estudios Superiores de Administración in Caracas, where he founded the Centre for Public Policies.

Aída Pérez Alonso	Head of Legal Services

(1) Representative of Aplidig, S.L. (formerly Aplicaciones Digitales, S.L.)

The business address of the members of the senior management of Abengoa is Campus Palmas Altas, calle Energía Solar 1, 41014 Seville, Spain.

There are no potential conflicts of interest between the private interests or other duties of the members of the senior management of Abengoa listed above and their duties to Abengoa. There is no family relationship between any of the Company's directors and members of our senior management.

Below are the biographies of those members of the senior management of Abengoa which do not also serve on our Board of Directors.

José Domínguez Abascal

Prof. Domínguez is currently the Engineering Vice President, CTO of Abengoa. He was previously the Technical General Secretary of Abengoa since 2008. Previously, he was the General Secretary of Universities, Investigation and Technology of the Junta de Andalucía (2004 to 2008). Prof. Domínguez has been Professor of engineering at the Universidad de Las Palmas de Gran Canarias and Universidad de Sevilla. He holds a doctorate in Industrial Engineering from the Universidad de Sevilla.

Barbara Sofía Zubiría Furest

Ms. Zubiría Furest has been the Executive Vice President, Capital Markets and Investor Relations of Abengoa since May 2013. From December 2010 to May 2013, she was the Director of Investor Relations and Reporting. Prior to that, she was Chief Accounting Officer (Principal Financial and Accounting Officer) and Head of Investor Relations at Telvent, where she was Chief Financial Reporting Officer from October 2006, Head of Investor Relations from March 2008 and Chief Accounting Officer from November 2008. From April 2005 to October 2006, Ms. Zubiría served as Telvent's Chief Audit Officer. Before joining Telvent in 2005, Ms. Zubiría worked as a manager in the Global Offering Services (GOS) group of Deloitte & Touche in Madrid, Spain, focusing on U.S. and international reporting and SEC compliance. She also worked as a financial auditor for 3 years, both for Arthur Andersen in Miami, Florida and then in Madrid, and for KPMG in Miami. Ms. Zubiría earned a Bachelor of Business Administration, *cum laude*, with a specialty in accounting, and a Master of Science (Accounting and Auditing) from Florida International University (FIU) in Miami, Florida. She is licensed as a Certified Public Accountant (CPA) by the State of Florida. She also completed an Executive Management Development program from IESE Business School, Spain.

Jesús Ángel García-Quílez Gómez

Mr. García-Quílez Gómez has been the Chief Financial Officer of Abengoa since May 2013. He previously served in the Control, Treasury and Financial Departments, and as Head of Corporate Finance since 2002. He holds a degree in Business Administration from Seville University and an Executive MBA from San Telmo Business School.

Javier Garoz Neira

Mr. Garoz is currently the Biofuels Executive Vice President. Since he joined Abengoa back in 2000 and prior to the sale of Telvent, he served in a number of positions within Telvent, the latest as its Chief Operating Officer and Head of Strategy. He also served as Abengoa's Strategy Development Officer. During his career, he has developed a broad managerial experience in numerous positions within several companies. He holds a degree in Business Administration with a specialization in Marketing and Business Development and a master in B.A. from the IESE Business School.

Alfonso González Domínguez

Mr. González has been Engineering and Construction (Transmission and Cogeneration) Executive Vice President since 2006. He joined Abengoa in 1990. Since then, he has held several management positions, including Managing Director of Sainsel and Divisional Manager of Water within our environmental services sector. He was also the Managing Director of Inabensa and the director of our engineering activities. Previously, he worked for five years as Project Engineer in different Spanish nuclear plants and for five years as Program CN234 Director for Construcciones Aeronáuticas S.A., a company subsequently acquired by Airbus Military Company S.A.S.

Santiago Seage Medela

Mr. Seage is currently the Concessions Executive Vice President of Abengoa and Chief Executive Officer of Abengoa Yield. He was previously the Solar Executive Vice President since 2006. Previously, he had been responsible for Abengoa's Strategy and Corporate Development. Before joining Abengoa, he was a partner with McKinsey & Company. He holds a degree in Business Management from ICADE University in Madrid.

Armando Zuluaga Zilbermann

Mr. Zuluaga is currently the Solar Executive Vice President of Abengoa. He has also been the Chief Executive Officer of Abengoa Solar since January 2014. He was the general manager of Abengoa Solar in the United States from 2012 to 2014, and was previously Assistant General Secretary of Abengoa and General

Secretary of Abengoa Solar from 2009 to 2013, and General Counsel of Abengoa from 2007 to 2009. He holds a law degree from the University of Granada, a master's degree in EU law from the Universidad Carlos III in Madrid and an Executive MBA from the San Telmo business school.

Carlos Cosín Fernández

Mr. Cosín is currently the Water Executive Vice President of Abengoa, since December 2011. He has been working for Abengoa since 2005, first as International Division Manager in Abeinsa Infraestructuras de Medio Ambiente, S.A., and since beginning of 2011, as the head of the Water business area. He has been in charge of developing water activities worldwide under EPC or BOOT models. Before that, he held several high level positions in Veolia or USfilter, among which stands out the ownership of his private company. He holds a degree in Engineering from the Universidad Politécnica de Madrid.

Álvaro Polo Guerrero

Mr. Polo has been the Human Resources Director of Abengoa since 2000. He holds a degree in Law from the Universidad de Sevilla, a master's degree in general management from the IESE Business School at the Universidad de Navarra, and a certificate in Executive Human Resources Education from the University of Michigan Ross School of Business.

Luis Fernández Mateo

Mr. Mateo has been Director of Organization, Quality and Budgets since 2007. He holds a degree in Economic Sciences and Business from Universidad Pontificia Comillas and also obtained a degree in Business Administration from the Instituto de Estudios Superiores de la Empresa.

Juan Carlos Jiménez Lora

Mr. Jiménez has been the Planning and Control Director of Abengoa since 2011. From 1996 to 2010 he was Head of Investor Relations. Previously, he served as the Group Financial Controller for five years. He holds a degree in Business Administration.

Germán Bejarano García

Mr. Bejarano García has been Chairman's Adviser and International Institutional Relations Director since 2008. He holds a degree in Economics and Business Administration from the Universidad Autónoma de Madrid, a *Diplôme d'Études Approfondies* from Université de Nancy II and a *Diplôme d'Études Supérieures Européennes*, Centre Universitaire Européen de Nancy. He held various positions in the Spanish Civil Service since 1988 when he joined the Ministry of Economy and Finance as a Senior Economist and Trade Specialist working at the General Technical Secretariat and the Treasury. He was also the representative of the Spanish government at the Inter-American Development Bank, where he was appointed as Executive Director and Alternate Executive Director (1992-1998). In addition, he served as Vice-Secretary General for Economic and Budgetary Matters at the Ministry of Economy and Finance of the Spanish government in 1999 and Director General for Economic International Relations at the Ministry of Foreign Affairs (2000-2004). He also served as Spain's ambassador to Malaysia (2004-2007) and Brunei Darussalam (2005-2007).

Fernando Martínez Salcedo

Mr. Martínez is the General Secretary for Sustainability for Abengoa. He previously served in a variety of roles, including as Director of the Metropolitan Company of Waters of Seville and Vice President of the AIE Municipal Companies of Seville. He holds a degree in Geography from the Universidad Complutense de Madrid and an Executive MBA from the Fundacio San Telmo.

Daniel Alaminos Echarri

Mr. Alaminos is currently the General Secretary of Abengoa and Secretary of its Board of Directors. He has been a state attorney since 1996 and he has held various previous positions, including General Counsel of SEPI, the Spanish holding group for state-owned companies. Prior to joining Abengoa in 2014, Daniel was a partner in the capital markets division of the law firm Ramón y Cajal Abogados. He also has experience of restructuring savings banks, capital increases and restructuring major real estate and industrial groups, as well as advising on a wide range of issues, especially financial, technological and industrial matters. He holds a law degree specializing in business law from Universidad San Pablo CEU.

Luis Enrique Pizarro Maqueda

Mr. Pizarro has been the Chief Audit Officer of Abengoa since 2005. Previously, he worked as an Internal Audit manager for the savings bank Caja San Fernando and at Arthur Andersen as a financial auditor. He holds a degree in Business Administration from Seville University, a degree in Law magna cum laude from the University Pablo de Olavide, and an Executive MBA from the IESE Business School at Navarra University, and is licensed as a certified public accountant in Spain.

Enrique Borrajo Lovera

Mr. Borrajo has been the Consolidation Officer of Abengoa since 2007. He joined Abengoa in 2000 in its internal audit department. He holds a degree in Business Administration from the University of Córdoba and an Executive MBA from the Fundación San Telmo.

Miguel Ángel Jiménez-Velasco Mazarío

Mr. Jiménez-Velasco Mazarío is currently the Compliance Officer of Abengoa. He has been General Secretary of Abengoa since 2003. He holds a degree in Law from the Universitat de Barcelona and a master's degree in Senior Business Management and Finance from the Instituto Internacional de Empresas at the Universidad de Deusto. Since 2003, he has served as General Counsel of Abengoa and was appointed Secretary and Advisory Lawyer of the Board of Directors of Abengoa.

Aída Pérez Alonso

Ms. Pérez is the Head of Legal Services of Abengoa. She joined Befesa Construcción y Tecnología Ambiental as Legal Director in 2006, where she supervised and coordinated legal aspects of domestic and foreign hydraulic projects, including desalination. Those projects involved business development, EPC and O&M contracts and concession agreements. In 2010 Ms. Pérez was appointed as Vice-secretary General and Deputy Legal Director at Befesa Medio Ambiente. In this role she assisted Befesa's chairman in the legal analysis and monitoring of strategy and business risk in all phases of negotiation, acquisition, and litigation. She joined the new business unit Abengoa Water in 2012 as Legal Director. Ms. Pérez has a Law degree from Alcala de Henares University and an MA in Environmental Policies from University Carlos III in Madrid. She completed her studies at Maastricht University, the Netherlands, with specific courses in International Environmental Law. She also took part in the Abengoa's Managing Directors Program at Loyola University, which included coursework at Georgetown University (USA).

Compensation

Compensation of Board of Directors

The salary (both fixed and variable) and allowances paid to the members of the Board of Abengoa in 2013 were €15,421 thousand (€13,887 thousand in 2012 and €13,237 thousand in 2011).

Details on individual salaries and benefits in 2013 paid to the Board of Directors are as follows:

<u>Name</u>	<u>Salary</u>	<u>Fixed remuneration</u>	<u>Daily allowance</u>	<u>Short term variable remuneration</u>	<u>Compensation as member of Board Committee</u>	<u>Compensation as officer of other Group companies</u>	<u>Other concepts</u>	<u>Total 2013</u>

(1) Representative of Aplidig, S.L. (formerly Aplicaciones Digitales, S.L.)

Additionally, in 2013, overall remuneration for our key management (senior management who are not executive directors), including both fixed and variable components, amounted to €14,656 thousand (€13,574 thousand in 2012 and €7,822 thousand in 2011).

Other Remuneration for Directors and Senior Management

Extraordinary Variable Compensation Plan

On July 24, 2006 and December 11, 2006, our Board of Directors approved an extraordinary variable pay scheme for directors ("**Plan Two**"), as proposed by the Appointments and Remuneration Committee. This plan included 190 beneficiaries (the "**Participants**") over a five year period from 2007 to 2011 and required the achievement, on an individual level, of objectives as set out in Abengoa's Strategic Plan as well as the individual's continued ongoing service throughout the period of the plan.

In addition, given that the acquisition of B.U.S. Group AB was completed only shortly following the establishment of the plan, on October 22, 2007, our Board of Directors approved that the directors of B.U.S. Group AB (10 directors) enter the plan under the same conditions.

The following conditions must be fulfilled in order for a Participant to earn compensation under Plan Two:

- (a) The Participant must remain in the employment of Abengoa or one of our subsidiaries throughout the term of Plan Two.

(b) For each fiscal year of Plan Two, the Participant was entitled to receive an annual bonus under the bonus plan of the company with which the Participant was employed for that year, based on the achievement of at least 90% of the objectives other than bookings or quality specified in such company's bonus plan. Failure to earn a bonus under that company's bonus plan in one year does not disqualify a Participant from being eligible to earn compensation under the Plan in another year.

(c) Fulfillment of the consolidated five-year budget of Abengoa or the relevant subsidiary by which Participant is employed corresponding to the fiscal years 2007-2011 according to the Internal Strategic Plan dated June, 2006.

In case of termination of the employment of a Participant (whether voluntary or by dismissal) before the end of the term of Plan Two, Plan Two will terminate with respect to that Participant, and the Participant will not be entitled to receive any payment under Plan Two. In the case of death of a Participant, Plan Two will terminate with respect to that Participant and, at the end of the term of Plan Two, the heirs of the Participant will be entitled to receive the compensation earned under Plan Two by the Participant for the fiscal years completed prior to the death of the Participant. In the case of either retirement of a Participant on reaching 65 years of age or total disability (that prevents the Participant from being able to do any other type of work) before the end of the term of Plan Two, Plan Two will terminate with respect to that Participant and the Participant will be entitled to receive the compensation earned under Plan Two for fiscal years completed to the date of his retirement. In addition, the Participant will be entitled to receive compensation for the fiscal year in which the Participant retired if the objectives for that fiscal year are fulfilled. Plan Two expired in January 2013.

On January 24, 2011, our Board of Directors approved an extraordinary variable pay scheme for directors ("**Plan Three**") as proposed by our Appointments and Remuneration Committee. This plan includes 104 beneficiaries over a five year period from 2011 to 2015, and requires the achievement, on an individual level, of objectives as set out in Abengoa's Strategic Plan as well as the individual's continued ongoing service throughout the period of the plan. Conditions are the same in either plan.

In December 2013, this plan was replaced by a new one ("**Plan Four**"), which cancelled and superseded Plan Three. The new plan has a duration of five years (from 2013 to 2017) and continues the previously established conditions. At the end of 2013, there were 347 participants in Plan Four.

On July 21, 2014, our Board of Directors unanimously approved an extraordinary variable pay scheme for directors ("**Plan Four+**") as proposed by our Appointments and Remuneration Committee, that includes approximately 350 beneficiaries (including two members of our Board of Directors).

Board Practices

Under Spanish Law, the board of directors of a Spanish corporation is responsible for management, administration and representation in all matters concerning its business, subject to the provisions of its bylaws and resolutions adopted at general shareholders' meetings by a majority vote of the shareholders. Five of our sixteen current directors (Messrs. Borrell Fontellés, Martínez Rico and Hausmann, and Mmes. Gracia Díez and Velarde Valiente) are independent under applicable NASDAQ listing standards.

Directors are elected by our shareholders to serve four-year terms. A director may be re-elected to serve for one or more four-year terms. If a director does not serve out his or her entire term, the board of directors may fill the vacancy by appointing a shareholder as a replacement director to serve until the next general shareholders' meeting, when the appointment may be ratified or a new director to fill the vacancy is elected or replaced. A director may resign or be removed (with or without cause) from office by a majority vote of the shareholders at a general shareholders' meeting. As a result of these four-year terms, not all of our directors will be elected each year.

Under Spanish law, the board of directors may delegate its powers to an executive committee or other delegated committee or to one or more executive officers, unless the shareholders, through a meeting, have

specifically delegated certain powers belonging to the shareholders' meeting to the board and have not approved the possibility for the board's sub-delegation to others. Since they were appointed, the independent directors on our board of directors have held meetings in conjunction with the regular meetings of the board of directors. Spanish corporate law provides that resolutions appointing an executive committee or any executive officer or authorizing the permanent delegation of all, or part of, the board's power require a two-thirds majority of the members of the board of directors. Certain powers provided in Spanish corporate law may not be delegated, including the drafting of the financial statements and the proposal for its approval by the shareholders at their annual meeting, disapproval of which would prohibit the filing of the Company's annual accounts in the Mercantile Registry of Seville.

Audit Committee

The Audit Committee of Abengoa comprises the following three members plus the Secretary to the Audit Committee:

<u>Name</u>	<u>Position</u>
Mercedes Gracia Díez ⁽¹⁾	Chairman
José Borrell Fontellés ⁽¹⁾	Member
Alicia Velarde Valiente ⁽¹⁾	Member
Daniel Alaminos Echarri	Secretary

(1) Independent member of the Audit Committee.

The duties and functions of our Audit Committee include, among others, to report information on the annual financial statements, as well as on our quarterly and semi-annual financial statements that must be presented to the regulatory or supervisory bodies of the securities markets on which Abengoa is listed. In addition, our Audit Committee proposes the appointment of the external financial auditors to the Board of Directors, and oversees our internal audit services, our financial information reporting process and our internal control systems. The Audit Committee meets as often as necessary in order to discharge its functions, and at least once every quarter.

Mr. Alaminos Echarri, the Secretary to the Board of Directors of the Company, serves as Secretary to the Audit Committee in accordance with the Audit Committee Charter.

Appointments and Remuneration Committee

The Appointments and Remuneration Committee of Abengoa comprises of the following three members:

<u>Name</u>	<u>Position</u>
José Borrell Fontellés ⁽¹⁾	Chairman
Mercedes Gracia Díez ⁽¹⁾	Member
Alicia Velarde Valiente ⁽¹⁾	Member
Juan Carlos Jiménez Lora	Secretary

(1) Independent member of the Appointments and Remuneration Committee.

The duties and functions of our Appointments and Remuneration Committee include, among others, the duty to inform our Board of Directors of appointments, re-elections, terminations and remuneration of the Board and its members, as well as upon general remuneration and incentives policy for the Board and senior management. The Appointments and Remuneration Committee meets as often as necessary in order to perform its functions, and at least once every six months.

Benefits upon Termination of Employment

Neither we nor our subsidiaries maintain any directors' service contracts providing for benefits upon termination of service.

Employees

During 2013, 2012 and 2011, on a consolidated basis, the average number of employees was 26,818, 26,654 and 25,004 employees, respectively, including locally hired staff in our foreign offices but excluding temporary employees. We believe our relations with our employees are good and we have not experienced any significant labor disputes or work stoppages. Certain businesses are participating in a series of share based incentive schemes for directors and employees. Such programs are linked to the achievement of certain agreed upon management objectives.

The following tables show the average number of our full-time employees during 2013 on a consolidated basis broken down based on business segment and geographical location:

<u>Employee Numbers by Segment Group</u>	<u>Average Number of Employees</u>
Engineering and Construction	19,078
Concession-Type Infrastructure	376
Industrial Production	7,364
Total	26,818

<u>Employee Numbers by Location</u>	<u>Average Number of Employees</u>
Spain	7,328
United States	1,321
Europe (excluding Spain)	686
Latin America (excluding Brazil)	9,648
Brazil	6,595
Other regions	1,140
Total	26,818

Corporate Governance

We are a Spanish listed company and qualify as a foreign private issuer listed on the NASDAQ Global Select Market. Under NASDAQ's applicable corporate governance rules, foreign private issuers are permitted to follow home country corporate governance practices in certain circumstances in lieu of NASDAQ's corporate governance rules. Set forth below is a summary of the significant differences between the corporate governance practices we follow under Spanish law and those followed by NASDAQ listed U.S. domestic issuers.

Under NASDAQ's corporate governance rules, the board of directors of a U.S. domestic issuer must have a majority of independent members. As a foreign private issuer, we are permitted to follow Spanish corporate governance requirements for the number of independent directors on our Board of Directors. As of the date of this Listing Memorandum, we have 16 directors, out of which five have been deemed independent by our Board of Directors. We assess the independence of our directors by evaluating, among other things, (i) the contractual, employment and commercial relations between directors, our shareholders and us, (ii) other board of directors positions held by our directors, and (iii) the presence of material business dealings with us or any other company in our Group. The classification of our directors as independent is reviewed annually by

our Board of Directors and is reported in our annual corporate governance report filed in accordance with Spanish corporate law.

Under NASDAQ's corporate governance rules, U.S. domestic issuers are required to provide a quorum as specified in its bylaws for any meeting of the holders of common stock, provided, however, that such quorum is not permitted to be less than 33 $\frac{1}{3}$ % of the outstanding shares of common voting stock. Our articles of association provide that, on the first call of our general shareholders' meeting, a duly constituted meeting requires a quorum of at least 25% of our subscribed share capital, and, if a quorum was not obtained on the first call, a meeting is validly convened on the second call regardless of the share capital in attendance. However, certain major corporate actions (such as issuing additional ordinary shares, increasing or decreasing our share capital, issuing debt securities, amending our bylaws or approving merger transactions) require shareholder approval at a meeting at which at least 50% of our subscribed share capital is present or represented on the first call or at least 25% of the our share capital present or represented on the second call. However, when the number of shareholders attending a meeting represents less than 50% of our subscribed share capital, resolutions on any of these major corporate actions must be adopted by the affirmative vote of at least two thirds of the share capital present or represented at such meeting.

Under NASDAQ's corporate governance rules, U.S. domestic issuers are required to solicit proxies, provide proxy statements for all shareholder meetings and provide copies of such proxy materials to NASDAQ. As a foreign private issuer, we are generally exempt from the SEC's rules governing the solicitation of shareholder proxies. However, under Spanish law we are required to publish a "calling of the meeting" generally at least one month in advance of the meeting setting forth the matters to be voted upon with respect to a shareholder meeting on our corporate website, on the website of the CNMV (the Spanish Securities and Exchange Commission) and on either a Spanish widely read newspaper or the BORME. We distribute a copy of the calling of the meeting and a form of proxy to our U.S. shareholders and also make these materials available through our website in advance of such meeting.

Under NASDAQ's corporate governance rules, shareholders of U.S. domestic issuers must be given the opportunity to vote on equity compensation plans and material revisions thereto, with limited exceptions set forth in the NASDAQ Marketplace Rules, including an exception for foreign private issuers who follow the laws of their home country. Under Spanish law, equity compensation plans involving the issuance of our securities require prior shareholder approval. Additionally, equity compensation plans in which our officers and employees participate can be approved by our Board of Directors without shareholder approval. However, the establishment of equity compensation plans in which members of our Board of Directors participate must be authorized in our articles of association. Our articles of association currently do not include this type of provision and would have to be amended by our shareholders before any such plan could be adopted.

Under NASDAQ's corporate governance rules, shareholders of U.S. domestic issuers must approve the issuance of our securities when such issuance would result in a change in control of such issuer. Under Spanish law, any issuance of our securities, regardless of whether such issuance would result in a change of control, requires prior shareholder approval.

PRINCIPAL SHAREHOLDERS

Our major shareholders as of the date of this Listing Memorandum are as follows:

<u>Name:</u>	<u>Number of Class A shares beneficially held</u>	<u>Percentage of Class A shares issued</u>	<u>Number of Class B shares beneficially held</u>	<u>Percentage of Class B shares issued</u>	<u>Combined voting power</u>
Inversión Corporativa IC, S.A.	44,082,885	52.21%	197,981,005	26.21%	50.072%
Finarpisa, S.A. ⁽¹⁾	5,465,183	6.47%	21,860,732	2.89%	6.179%

(1) Finarpisa is a wholly owned subsidiary of Inversión Corporativa.

Shareholders in the United States

Because some of our ordinary shares are held by brokers and other nominees, the number of shares held by and the number of beneficial holders with addresses in the United States is not fully ascertainable. As of June 30, 2014, to the best of an knowledge, there were holders of our Class A and Class B shares with addresses in the United States, whose shareholdings represented approximately 27.17% of our outstanding shares.

Control of the Company

Inversión Corporativa IC, S.A. beneficially owns, either directly or indirectly through Finarpisa, S.A., as of the date of this Listing Memorandum, 49,548,068 of our Class A shares and 219,841,737 of our Class B shares and 56.25% of the total combined voting power of our Class A shares and Class B shares outstanding (subject to its agreement entered into on August 27, 2012 with us not to exercise voting rights in excess of 55.93% of the voting power in the Company unless its economic rights in us exceed such amount).

Inversión Corporativa IC, S.A. is beneficially owned by more than 300 shareholders, including, directly or indirectly, various members of the founding families of Abengoa, including our directors Felipe Benjumea Llorente, Javier Benjumea Llorente, María Teresa Benjumea Llorente, José Joaquín Abaurre Llorente and José Luis Aya Abaurre.

Arrangements for Change in Control of the Company

We are not aware of any arrangements the operation of which may at a later time result in a change of control.

Shareholdings by Directors and Senior Management

The following table shows the number of our Class A shares and Class B shares beneficially owned by our directors and senior management as of the date of this Listing Memorandum:

Directors and senior management:	Number of Class A shares beneficially owned	Number of Class B shares beneficially owned
Felipe Benjumea Llorente ⁽¹⁾⁽⁴⁾	0	4,715,075
José B, Terceiro Lomba ⁽²⁾	0	4,737,756
Manuel Sánchez Ortega	0	913,167
José Joaquín Abaurre Llorente ⁽⁴⁾	0	9,870
José Luis Aya Abaurre ⁽⁴⁾	0	339,438
José Borrell Fontellés	0	41,695
María Teresa Benjumea Llorente ⁽⁴⁾	12,390	49,560
Javier Benjumea Llorente ⁽⁴⁾	3,888	15,552
Mercedes Gracia Díez	0	2,500
Ricardo Martínez Rico	0	2,565
Claudi Santiago Ponsa	200	800
Ignacio Solís Guardiola	17,000	68,000
Fernando Solís Martínez-Campos ⁽³⁾	85,272	341,088
Carlos Sundheim Losada	0	247,118
Alicia Velarde Valiente	400	1,600
Ricardo Hausmann	0	0
Germán Bejarano García	0	0
Carlos Cosín Fernández	0	23,959
Armando Zuluaga Zilbermann	0	0
Santiago Seage Medela	0	135,000
Javier Garoz Neira	1,684	6,736

Carmen Inés Cruz de León	Financial Manager

The business address of the members of the management team of Teyma Internacional, S.A. is Av. Uruguay 1287, Montevideo, República Oriental del Uruguay.

There are no potential conflicts of interest between the private interests or other duties of the individuals listed above and their duties to Teyma Internacional, S.A.

Teyma USA & Abener Engineering and Construction Services General Partnership

Board of Control of Teyma USA & Abener Engineering and Construction Services General Partnership (“Teymer Abener”)

The Board of Control of Teyma Abener comprises the following members as of the date hereof:

<u>Name</u>	<u>Position</u>
Manuel Valverde	Abener North America Member
Borja Navarro	Member
Juan Callesí	Member
Brandon Kaufman	Member
Leonardo B. Maccio	Member
Pablo E. Schenone	Member

The business address of the members of the Board of Control is 2929 N. Central Avenue, Suite 1100, Phoenix, Arizona, 85012.

There are no potential conflicts of interest between the private interests or other duties of the Board of Control members listed above and their duties to Teyma Abener.

Management Structure of Teyma Abener

The persons responsible for the day-to-day management of Teyma Abener and their functions are as follows:

Name	Position
Leonardo B. Maccio	Project Director
Pablo E. Schenone	Sub-Project Director
Emilio Orozco	Sub-Project Director

The business address of the members of the management team of Teyma Abener is 2929 N. Central Avenue, Suite 1100, Phoenix, Arizona, 85012.

There are no potential conflicts of interest between the private interests or other duties of the individuals listed above and their duties to Teyma Abener.

Abener Teyma Hugoton General Partnership

Board of Control of Abener Teyma Hugoton General Partnership

The Board of Control of Abener Teyma Hugoton General Partnership comprises the following members as of the date hereof:

Name	Position
Borja Navarro	Member
Manuel Valverde	Member
Juan Callesi	Member
Leonardo B. Macció	Member
Brandon Kaufman	Member
Victor Grille	Member

The business address of the members of the Board of Control of Abener Teyma Hugoton General Partnership is 2929 N. Central Avenue, Suite 1100, Phoenix, Arizona 85012, United States of America.

There are no potential conflicts of interest between the private interests or other duties of the Board of Control members listed above and their duties to Abener Teyma Hugoton General Partnership.

Management Structure of Abener Teyma Hugoton General Partnership

The person responsible for the day-to-day management of Abener Teyma Hugoton General Partnership is Victor Grille as Project Director.

The business address of Victor Grille is 2929 N. Central Avenue, Suite 1100, Phoenix, Arizona 85012, United States of America.

There are no potential conflicts of interest between the private interests or other duties of the individuals listed above and their duties to Abener Teyma Hugoton General Partnership.

Abener Teyma Mojave General Partnership

Board of Control of Abener Teyma Mojave General Partnership

The Board of Control of Abener Teyma Mojave General Partnership comprises the following members as of the date hereof:

<u>Name</u>	<u>Position</u>
Borja Navarro	Member
Manuel Valverde	Member
Juan Callesi	Member
Leonardo B. Macció	Member
Brandon Kaufman	Member
Pablo E. Schenone	Member

The business address of the members of the Board of Control of Abener Teyma Mojave General Partnership is 2929 N. Central Avenue, Suite 1100, Phoenix, Arizona 85012, United States of America.

There are no potential conflicts of interest between the private interests or other duties of the Board of Control members listed above and their duties to Abener Teyma Mojave General Partnership.

Management Structure of Abener Teyma Mojave General Partnership

The persons responsible for the day-to-day management of Abener Teyma Mojave General Partnership and their functions are as follows:

<u>Name</u>	<u>Position</u>
Pablo E. Schenone	Project Director
Nicolas Gallo	Project Sub-Director

The business address of the members of the management team of Abener Teyma Mojave General Partnership is 2929 N. Central Avenue, Suite 1100, Phoenix, Arizona 85012, United States of America.

There are no potential conflicts of interest between the private interests or other duties of the individuals disclosed under "Management Structure of Abener Teyma Mojave General Partnership" above and their duties to Abener Teyma Mojave General Partnership.

Abengoa Solar New Technologies, S.A.

Board of Directors of Abengoa Solar New Technologies, S.A.

The Board of Directors of Abengoa Solar New Technologies, S.A. comprises the following members as of the date hereof:

<u>Name</u>	<u>Position</u>
Armando Zuluaga Zilbermann	Chairman
Eduardo Duque García	Director
Ricardo Abaurre Llorente	Director
Javier León-Castro Gómez	Non-Director Secretary

The business address of the members of the Board of Directors of Abengoa Solar New Technologies, S.A. is Campus Palmas Altas C/ Energía Solar, 1, 41014 Seville, Spain.

There are no potential conflicts of interest between the private interests or other duties of the Directors listed above and their duties to Abengoa Solar New Technologies, S.A.

Management Structure of Abengoa Solar New Technologies, S.A.

The persons responsible for the day-to-day management of Abengoa Solar New Technologies, S.A. and their functions are as follows:

Name	Position
Armando Zuluaga Zilbermann	Director
Teodoro López del Cerro	Director
David Fernández Fuentes	Financial Director

The business address of the members of the management team of Abengoa Solar New Technologies, S.A. is Campus Palmas Altas C/ Energía Solar, 1, 40141 Seville, Spain.

There are no potential conflicts of interest between the private interests or other duties of the individuals listed above and their duties to Abengoa Solar New Technologies, S.A.

Centro Morelos 264, S.A. de C.V.

Board of Directors of Centro Morelos 264, S.A. de C.V.

The Board of Directors of Centro Morelos 264, S.A. de C.V. comprises the following members as of the date hereof:

Name	Position
Leonardo Bruno Macció Diz	President
Fernando Gamero Moreno	Member
Sebastián Nicolás Felicetti	Member
Augusto Formento Serrentino	Non-Member Secretary

The business address of the members of the Board of Directors of Centro Morelos 264, S.A. de C.V. is Bahía de Santa Barbara 174, Verónica Anzures, C.P. 11300, Mexico D.F., Mexico.

There are no potential conflicts of interest between the private interests or other duties of the Directors listed above and their duties to Centro Morelos 264, S.A. de C.V..

Management Structure of Centro Morelos 264, S.A. DE C.V.

The persons responsible for the day-to-day management of Centro Morelos 264, S.A. de C.V. and their functions are as follows:

Name	Position
Fernando Gamero Moreno	General Manager
Daniel Jiménez Gallo	Director of finance and administration
Aldrín Osnaya Corona	Project Officer
Gabriel Gerónimo Cárdenas	Director of Operations
Mauricio Nicolás Huerta	Director of Engineering

The business address of the members of the management team of Centro Morelos 264, S.A. DE C.V. is Bahía de Santa Barbara 174, Verónica Anzures, C.P. 11300, Mexico D.F., Mexico.

There are no potential conflicts of interest between the private interests or other duties of the individuals listed above and their duties to Centro Morelos 264, S.A. DE C.V.

Teyma Uruguay ZF S.A.

Board of Directors of Teyma Uruguay ZF S.A.

The Board of Directors of Teyma Uruguay ZF S.A. comprises the following members as of the date hereof:

<u>Name</u>	<u>Position</u>
Brandon Kaufman	President
Alejandro Fynn	Director
Daniel Gutiérrez García	Director

The business address of the members of the Board of Directors of Teyma Uruguay ZF S.A. is Avda Uruguay 1283, Montevideo Uruguay.

There are no potential conflicts of interest between the private interests or other duties of the Directors listed above and their duties to Teyma Uruguay ZF S.A.

Management Structure of Teyma Uruguay ZF S.A.

The persons responsible for the day-to-day management of Teyma Uruguay ZF S.A. and their functions are as follows:

<u>Name</u>	<u>Position</u>
Daniel Gutiérrez	General Manager
José Luis Rigoli	Sub General Manager
Leonardo Sandman	Chief Financial Officer

The business address of the members of the management team of Teyma Uruguay ZF S.A. is Avda Uruguay 1283, Montevideo Uruguay.

There are no potential conflicts of interest between the private interests or other duties of the individuals listed above and their duties to Teyma Uruguay ZF S.A.

Abengoa Construção Brasil Ltda.

Board of Directors of Abengoa Construção Brasil, Ltda.

The Board of Directors of Abengoa Construção Brasil Ltda. comprises the following members as of the date hereof:

<u>Name</u>	<u>Position</u>
Luis Maria Solaro Mascari	Director
Jorge Raul Bauer	Director
Antonio Lisboa Salles Neto	Director
Luciano Paulino Junqueira	Director

The business address of the members of the Board of Directors of Abengoa Construção Brasil Ltda. is Avenida Belisário Leite de Andrade Neto, nº 80—Barra da Tijuca, Rio de Janeiro, RJ, Brazil, CEP: 22621-270.

There are no potential conflicts of interest between the private interests or other duties of the Directors listed above and their duties to Abengoa Construção Brasil Ltda.

Management Structure of Abengoa Construção Brasil Ltda.

The persons responsible for the day-to-day management of Abengoa Construção Brasil Ltda. and their functions are as follows:

<u>Name</u>	<u>Position</u>
Luis Maria Solaro Mascari	General Manager
Jorge Raul Bauer	Project Officer
Antonio Lisboa Salles Neto	Operational Manager
Luciano Paulino Junqueira	Accounting and Financial Manager

The business address of the members of the management team of Abengoa Construção Brasil Ltda. is Avenida Belisário Leite de Andrade Neto, nº 80—Barra da Tijuca, Rio de Janeiro, RJ, Brazil, CEP: 22621-270.

There are no potential conflicts of interest between the private interests or other duties of the individuals listed above to Abengoa Construção Brasil Ltda.

Abeima Teyma Zapotillo Sociedad de Responsabilidad Limitada de Capital Variable (Abeima Teyma Zapotillo S.R.L. de C.V.)

Board of Managers of Abeima Teyma Zapotillo S.R.L. de C.V.

The Board of Managers of Abeima Teyma Zapotillo S.R.L. de C.V. comprises the following members as of the date hereof:

<u>Name</u>	<u>Position</u>
Leonardo Bruno Macció	Member
Martín José Salgado Devincenzi	Member
Sebastián Nicolás Felicetti	Member
Eduardo Andrés Paperán Saccone	Member
Juan Francisco Sánchez Matamoros	Member
Julián Restrepo Quintero	Member
Fernando Gamero Moreno	Member
Daniel Luis Jiménez Gallo	Member
Augusto Formento Serrentino	Secretario—non member

The business address of the members of the Board of Managers is Bahía de Santa Bárbara número 174, colonia Verónica Anzures, delegación Miguel Hidalgo, México.

There are no potential conflicts of interest between the private interests or other duties of the Directors listed above and their duties to Abeima Teyma Zapotillo S.R.L. de C.V.

Management Structure of Abeima Teyma Zapotillo S.R.L. de C.V.

The person responsible for the day-to-day management of Abeima Teyma Zapotillo S.R.L. de C.V and his function is as follows:

<u>Name</u>	<u>Position</u>
Juan Francisco Sánchez Matamoros	General Manager

The business address of the members of the management team of Abeima Teyma Zapotillo S.R.L. de C.V is Bahía de Santa Bárbara número 174, colonia Verónica Anzures, delegación Miguel Hidalgo, México.

There are no potential conflicts of interest between the private interests or other duties of the individual listed above to Abeima Teyma Zapotillo S.R.L. de C.V.

Certain Financial Information Relating to the Issuer, the Guarantors and the Non-Guarantor Subsidiaries

The following tables present condensed financial information as of and for the six months ended June 30, 2014 separately for the Issuer, the Guarantors and the non-guarantor subsidiaries, together with the adjustments to reach the consolidated total.

Given the significant intra-group adjustments, information in the tables below may not be comparable with certain other information included in this Offering Memorandum and readers are cautioned not to place undue reliance on such information.

Statement of Financial Position as of June 30, 2014

Assets	Issuer	Guarantors	Non-Guarantors subsidiaries	Intragroup Adjustments	Consolidated total
			(€ in thousands)		
Non-current assets	—	9,573,698	19,700,142	(13,401,626)	15,872,214
Current assets	—	5,609,077	4,118,478	(2,698,032)	7,029,523

RELATED PARTY TRANSACTIONS

In the ordinary course of our business, we carry out transactions with related parties in accordance with established market practice and specific legal requirements. In particular, these related party transactions include the supply of business, administrative and financial services. All transactions between Abengoa, S.A. and our subsidiaries and related companies for the six months ended June 30, 2014 and the years ended December 31, 2013, 2012 and 2011 occurred within the ordinary course of our business.

For a summary of our revenue and expenses and receivables and payables with related parties, please see Note 23 of our Consolidated Financial Statements and Interim Consolidated Financial Statements included elsewhere in this Listing Memorandum.

The account held by Abengoa with Inversión Corporativa I.C., S.A., as of the years ending 2013 and 2012 has a nil balance. Dividends distributed to related parties during 2013 amounted to €17,182 thousand (€17,212 thousand in 2012 and €10,140 thousand in 2011).

On January 9, 2013, we entered into certain stock loan agreements with Inversión Corporativa IC, S.A. for a total amount of 11,047,468 Class B shares to facilitate stock borrow liquidity to investors in the 2019 Convertible Notes. This loan was cancelled on July 8, 2013. The total compensation that we paid to Inversión Corporativa IC, S.A. was €52 thousand.

On February 27, 2013, we signed a service provision agreement between Centro Tecnológico Palmas Altas, S.A. and Ms. Blanca de Porres Guardiola, which involved consideration of €72 thousand.

As indicated in Note 18 of our Consolidated Financial Statements and Note 14 of our Interim Consolidated Financial Statements, Inversión Corporativa IC, S.A. is Abengoa's main shareholder, and issues its own separate consolidated financial statements.

We announced on September 22, 2014, that we expect to enter into an asset transfer agreement with Abengoa Yield, see "*Summary—Recent Developments—Expected Sale of Certain Assets to Abengoa Yield.*"

All related party transactions are, and were, subject to verification by the our Audit Committee and the consideration paid for the different transactions was determined by third parties.

QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

Our activities are undertaken through our segments and are exposed to market risk, credit risk, liquidity risk and capital risk. Risk management is the responsibility of our corporate finance department in accordance with mandatory internal management rules. The internal management rules provide written policies for the management of overall risk, as well as for specific areas, such as exchange rate risk, credit risk, interest rate risk, liquidity risk, use of hedging instruments and derivatives, and the investment of excess cash.

Market Risk

We are exposed to market risk, such as movement in foreign exchange rates, interest rates, changes in the prices of assets and commodities purchased (principally zinc, aluminum, grain, ethanol, sugar and gas). All of these market risks arise in the normal course of business and we do not carry out speculative operations. For the purpose of managing these risks, we use a series of forward sale contracts, swaps and options on exchange rates, interest rates and raw materials. None of the derivative contracts signed has an unlimited loss exposure.

Foreign Exchange Rate Risk

Foreign exchange risks arise (i) from commercial transactions to be settled in the future, for which assets and liabilities are not denominated in the functional currency of the entity and (ii) from financial liabilities denominated in a different currency from the functional currency of the subsidiary.

Risks from commercial transactions: To manage foreign exchange risks arising from commercial transactions, we purchase forward purchase/sale contracts. Such contracts provide protection related to the fair value of future cash flow. Approximately 95% of projected transactions which are not denominated in our functional currency qualify as highly probable forecast transactions for hedge accounting purposes. The main exchange rate exposures relate to the U.S. Dollar and the euro. Our foreign exchange risks mainly relate to our operations in connection with purchases and sales in a currency other than the functional currency, mostly affecting the U.S. Dollar against the euro. These purchases and sales, other than in the functional currency, are hedged through our purchase of future currency sale/purchase contracts. Specifically, an appreciation of the U.S. Dollar against the euro would result in a decrease/increase of our purchase costs/sale price in the profit and loss account, which would be compensated by the derivatives purchased, to the extent that the transactions have been hedged. We would recognize a net gain or loss in the income statement from the net assets or liabilities that remain unhedged.

The total notional amount of the financial instruments relating to amounts receivable and payable outstanding in foreign currencies for each of the years ended December 31, 2013, 2012 and 2011 was as follows:

<u>Exchange Rate</u>	<u>Collections Hedging</u>			<u>Payments Hedging</u>		
	<u>2013</u>	<u>2012</u>	<u>2011</u>	<u>2013</u>	<u>2012</u>	<u>2011</u>

At the end of 2013, the fair value of the exchange rate derivatives was:

<u>Exchange Rate</u>	<u>Collections Hedging 2013</u>	<u>Payments Hedging 2013</u>
	(€ in thousands)	
Dirham (United Arab Emirates)	430	(289)
Dirham (Morocco)	4	—
Dollar (Australia)	—	(102)
Dollar (Canada)	—	—
Dollar (USA)	12,499	(14,378)
euro	—	1
Franc (Switzerland)	—	—
Pound Sterling (UK)	—	2
Yen (Japan)	—	(1)
Krona (Sweden)	—	2
Rand (South Africa)	—	—
Zloty (Poland)	(8,555)	2,896
Total	<u>4,378</u>	<u>(11,869)</u>

In the event that the exchange rate of the U.S. Dollar had risen (/decreased) by 10% against the euro on December 31, 2013, with the rest of the variables remaining constant, the effect in the profit and loss accounts would have been a decrease in profit (/loss) of €8.50 million, mainly due to our U.S. Dollar unhedged net liability position in companies with euro functional currency and an increase in other reserves of €1.19 million, respectively, as a result of the cash flow hedging effects on highly probable future transactions.

Interest Rate Risk

Interest rate risks arise mainly from our financial liabilities at variable interest rate. To mitigate interest rate risk, we use interest rate swaps and interest rate options (caps and collars).

As a result, the notional amounts hedged, strikes contracted and maturities, depending on the characteristics of the debt on which the interest rate risk is being hedged, are very diverse, including the following:

- Corporate debt: between 78% and 100% of the notional amount, with maturities up to 2022 and average guaranteed interest rates of between 0.70% and 4.75% for loans referenced to the 1-month, 3-month and 6-month EURIBOR rates; and
- Non-recourse debt:
 - Non-recourse debt in euro: between 80% and 100% of the notional amount, maturities until 2032 and average guaranteed interest rates of between 0.75% and 4.87%; and
 - Non-recourse debt in U.S. Dollars: between 75% and 100% of the notional amount, maturities until 2028 average guaranteed interest rates of between 0.70% and 3.787%.

In connection with our interest rate derivative positions, the most significant impact on our financial statements are derived from the changes in EURIBOR, which represents the reference interest rate for the majority of our corporate and non-recourse debt.

In relation to our interest rate swaps positions, an increase in EURIBOR above the contracted fixed interest rate would create an increase in our financial expense which would be positively mitigated by our hedges, reducing our financial expenses to our contracted fixed interest rate. However, an increase in EURIBOR that does not exceed the contracted fixed interest rate would not be offset by our derivative position and would result in a net financial loss recognized in our consolidated income statement. Conversely, a decrease in EURIBOR below the contracted fixed interest rate would result in lower interest expense on our variable rate debt, which would be offset by a negative impact from the mark-to-market of our hedges, increasing our financial expenses up to our contracted fixed interest rate, thus resulting in a likely neutral effect.

In relation to our interest rate options positions, an increase in EURIBOR above the strike price would result in higher interest expenses which would be positively mitigated by our hedges, reducing our financial expenses to our capped interest rate, whereas a decrease of EURIBOR below the strike price would result in lower interest expenses.

In addition to the above, our results of operations can be affected by changes in interest rates with respect to the unhedged portion of our indebtedness that bears interest at floating rates.

In the event that EURIBOR interest rates had risen by 25 basis points on December 31, 2013, with the rest of the variables remaining constant, the effect in the income statement would have been a profit of €13.67 million, mainly due to the fair value increase due to the time value of the interest rate options (caps and collars) designated as hedges and an increase of €48.05 million in other reserves as a result of the fair value increase of interest rate swaps, caps and collars designated as hedges.

Commodity Risk

The risk of commodity price changes through both the sale of products and services as well as the purchase of commodities for production processes. In general, we use forward purchase contracts and options that are listed on organized markets, as well as over-the-counter ("OTC") contracts with financial institutions, to mitigate the risk of market price fluctuations.

The most significant impacts on our financial statements derived from commodity risks are related to the price and supply of grains such as wheat, barley, corn and sorghum, sugar, ethanol, gas and aluminum. Prior to the Befesa Sale, our commodity risks also included the prices of zinc and steel.

In relation to our bioethanol production, prices of inputs (grain, sugarcane, natural gas and others) and prices of outputs (ethanol, sugar, DGS and others) are affected by market forces that are independent from each other. Consequently, an increase in the cost of grains or other inputs would increase our production costs for ethanol, sugar, DGS and other products. These increases may be compensated by hedges in place to cover highly probable future purchases that have been contracted to fix the purchase price of inputs, which could neutralize some input price volatility on a transaction-by-transaction basis.

In addition, an increase in ethanol, sugar, DGS and other production costs cannot be directly converted into higher selling prices, since the prices of these outputs are referenced to market trading prices. We seek to mitigate the volatility in the output prices by purchasing OTC derivatives.

These hedging strategies are implemented in order to manage the spread between the prices of inputs and outputs by securing the production costs of each transaction where the output prices are fixed by contract. As a result of the combination of these two strategies, increases or decreases in market prices of ethanol and/or grains affect the spread that can be secured for each transaction, but do not eliminate volatility in net income, since the spread fluctuates in each transaction.

Gas hedging strategies are carried out together with other commodities, as described above, in order to manage our exposure to changes in energy prices. Therefore, depending on forward production sales and on the types of contracts, we may hedge the cost of our natural gas consumption. These hedging transactions are usually OTC natural gas swaps that are only traded with investment-grade counterparties and are recorded as financial derivatives for cash flow hedging. As of December 31, 2013, we have only traded natural gas hedging swaps in the United States, and have no hedging in place in Europe, although our ethanol sale contracts with Repsol S.A. ("Repsol") enable us to pass on this cost. We do not have any energy contracts that could generate material losses to our Consolidated Financial Statements if the corresponding energy prices were to decrease.

In addition, certain of our subsidiaries have engaged in purchase and sale transactions in the grain and ethanol markets, in accordance with management trading policy. These operations reflect the implementation of management- approved strategies for the purchase and sale of forward and swap contracts, mainly for grain and ethanol, which are controlled and reported on daily following the procedures established under our trading policy. As a risk-mitigation element, we set daily limits or "stop losses" for each strategy and, depending on the market in which we are operating, the financial instruments purchased and the risks defined in the transaction.

In relation to the cost of aluminum, which is purchased and then sold, an increase in the price of aluminum would result in an increase in both our cost (from the purchase transactions) and our revenue (from sale transactions) resulting in a natural hedge.

The table below shows a breakdown of the maturities of notional amounts for the commodity price derivatives designated as cash flow hedges for each of the years ended December 31, 2013, 2012 and 2011, including zinc and aluminum derivatives obtained prior to the completion of the Befesa Sale:

2013	Ethanol	Gas	Grain	Zinc	Aluminum	Others
	(Gallons)	(MWh)	(Bushels)	(Tons)	(Tons)	(Tons)

There were no commodity price derivatives not designated as hedges as of December 31, 2013, 2012 and 2011.

At December 31, 2013, if the price of grain had increased by 10%, with all other variables remaining constant, the effect in the consolidated income statement would have been null and an increase in other reserves of €4,567 thousand due to open derivative contracts primarily grain purchases held by the Group.

At December 31, 2013, if the price of ethanol had increased by 10%, with all other variables remaining constant, the effect in the consolidated income statement would have been null and an increase in other reserves of €60,040 thousand due to open derivative contracts primarily ethanol purchases held by the Group.

For additional information about our financial instrument and hedging activity refer to Note 4, Note 12 and Note 14 of our Consolidated Financial Statements included elsewhere in this Listing Memorandum.

Credit Risk

Trade and other receivables, current financial investments and cash are the main financial assets of the company and present the greatest exposure to credit risk in the event that a third-party does not comply with its obligations.

Most of our receivables relate to our customers who operate in a range of industries and countries with contracts that require ongoing payments as the project advances, the service is rendered or upon delivery of the product. It is common practice for us to reserve the right to cancel the work in the event of a material breach, especially non-payment. In addition, we rely on written confirmation for the non-recourse purchase of accounts receivable (factoring). In these arrangements, we pay a bank fee to assume the credit risk as well as interest charges for the financing component.

In this regard, derecognizing of factored accounts receivable is taken only when all the requirements of IAS 39, *Financial instruments; Recognition and Measurement* are met. Therefore, we consider whether or not the risks and rewards inherent in the ownership of the asset have been transferred, including a comparison of our risk before and after the transfer, considering the amounts and timing of net cash payments to be received. Once the risk to the grantor company has been eliminated or is considered to be substantially reduced, it is considered that the financial asset in fact has been transferred.

In general, our greatest risk is the risk of not collecting a trade account receivable. This is our greatest risk because it may be of significant value in the development of a project or in the provision of a service and it is not within our control. However, for those contracts in which there is a possibility of customer payment delay, with no commercial justification, could theoretically be identified as a risk associated to the financial asset, and so we establish that, not only should the risk of legal insolvency (bankruptcy, etc.) be covered, but also that of *de facto* or evident insolvency (arising from the client's management of its own cash, even though there is no "general moratorium").

As indicated, it is our policy to transfer the credit risk associated with our customers and other accounts receivable through the use of non-recourse factoring. As such, with regard to considering risks inherent with debtors and other accounts receivable on the statement of financial position, amounts can be excluded that relate to works completed and awaiting certification for which factoring contracts are in place, as well as amounts which could be factored which are outstanding to be submitted to the financial entity providing the factoring, and also those debtors included which are covered by an insurance policy.

The following table shows the maturity detail of trade receivables as of each of the years ended December 31, 2013, 2012 and 2011:

	Balance as of December 31		
	2013	2012	2011
	(€ in thousands)		
Maturity			
Up to 3 months	409,744	941,048	444,780
Between 3 and 6 months	43,305	49,271	64,227
Over 6 months	113,881	74,519	68,095
Total	566,930	1,064,838	577,102

Liquidity Risk

The objective of our financing and liquidity policy is to ensure that we maintain sufficient funds to meet our financial obligations as they fall due.

To ensure there are sufficient funds available for debt repayment in relation to its cash-generating capacity, the Corporate Financial Department annually prepares and the Board of Directors reviews a Financial

Plan that details all the financing needs and how such financing will be provided. We fund in advance disbursements for major cash requirements, such as capital expenditures, debt repayments and working capital requirements. In addition, as a general rule, we do not commit our own equity in projects until the associated long-term financing is obtained.

During 2012 and 2013, we covered our financing needs through the following financial transactions:

- In 2012, we completed the refinancing of our syndicated loans as well as new financing transactions in subsidiaries which have the support of export credit agencies.
- During 2013, we successfully extended the maturity profile of our debt maturities through access to capital markets.
- During 2013, we issued €400 million convertible bonds due in 2019, and €550 million ordinary bonds due in 2018.
- In October 2013, we completed a capital increase for a total amount of €517.5 million.
- In December 2013, we issued \$450 million ordinary notes due in 2020.
- In March 2014, we issued €500 million senior notes due in 2021.

We aim to maintain our strong liquidity position, extend the debt maturities of our existing corporate loans and bonds, continue to access the capital markets from time to time, as appropriate, and further diversify our funding sources. We aim to continue to raise equity funding at the project company level through partnerships.

In accordance with the above, we have a policy to diversify our sources of finance in order to prevent concentration of financing sources that may limit our working capital liquidity risk.

Capital risk

We manage capital risk to ensure the continuity of the activities of our subsidiaries from an equity standpoint by maximizing the return for the shareholders and optimizing the structure of equity and debt in the respective companies or projects.

The leverage objective of the activities of the company is not measured based on the level of debt on own resources, but on the nature of the activities:

- For activities financed through non-recourse financing, each project is assigned a leverage objective based on the cash and cash flow generating capacity, generally, of contracts that provide these projects with highly recurrent and predictable levels of cash flow generation.
- For activities financed with Corporate Financing, the objective is to maintain reasonable leverage, defined as 2.0 times corporate EBITDA over Net Corporate Debt (excluding the EBITDA and the non-recourse financing) in 2014.

DESCRIPTION OF THE NOTES

In this *"Description of the Notes,"* the word "Issuer" refers only to Abengoa Greenfield, S.A. and the words "Parent Guarantor" refer only to Abengoa, S.A. and not to any of its Subsidiaries. In addition, the words "Subsidiary Guarantors" refer to Restricted Subsidiaries that provide a Guarantee and the word "Guarantors" refers to the Parent Guarantor and the Subsidiary Guarantors collectively. Each of the Issuer and the Subsidiary Guarantors is a directly or indirectly held Restricted Subsidiary of the Parent Guarantor. The word "Notes," unless the context requires otherwise, also refers to "book-entry interests" in the Notes, as defined herein. The definitions of certain other terms used in this description are set forth throughout the text or under "*Certain Definitions.*"

The Issuer issued, and the Guarantors guaranteed, (i) the U.S. Dollar Notes (as defined below) pursuant to an indenture dated September 30, 2014 (the "**U.S. Dollar Indenture**"), among the Issuer, the Guarantors, Deutsche Trustee Company Limited, as trustee (the "**U.S. Dollar Note Trustee**"), Deutsche Bank Trust Company Americas, as paying agent (the "**U.S. Dollar Note Paying Agent**"), and Deutsche Bank Trust Company Americas, as registrar (the "**U.S. Dollar Note Registrar**") and as transfer agent (the "**U.S. Dollar Note Transfer Agent**", collectively, the "**U.S. Dollar Note Agents**") and (ii) the Euro Notes (as defined below) pursuant to an indenture dated September 30, 2014 (the "**Euro Indenture**" and together with the U.S. Dollar Indenture, the "**Indentures**" and each an "**Indenture**"), among the Issuer, the Guarantors and Deutsche Trustee Company Limited, as trustee, (the "**Euro Note Trustee**, together with the U.S. Dollar Note Trustee, the "**Trustees**" and each a "**Trustee**"), Deutsche Bank AG, London Branch, as paying agent (the "**Euro Note Paying Agent**") and together with the U.S. Dollar Note Paying Agent, the "**Paying Agents**" and each a "**Paying Agent**") and Deutsche Bank Luxembourg S.A., as registrar (the "**Euro Note Registrar**", together with the U.S. Dollar Note Registrar, the "**Registrars**" and each a "**Registrar**") and as transfer agent (the "**Euro Note Transfer Agent**" and together with the U.S. Dollar Note Transfer Agent, the "**Transfer Agents**" and each a "**Transfer Agent**", the Euro Note Registrar and Euro Note Transfer Agent are together the "**Euro Note Agents**", and the Euro Note Agents together with the U.S. Dollar Note Agents are together the "**Agents**"). The terms of the Notes (as defined below) include those set forth in the applicable Indentures. The Notes were not registered under the U.S. Securities Act of 1933, as amended (the "**Securities Act**"), and are subject to certain transfer restrictions. Except as otherwise indicated in this Description of the Notes, the redemption provisions, covenants, events of default and other terms applicable to the U.S. Dollar Notes (as defined below) and the Euro Notes (as defined below) are substantially identical.

The following description is a summary of the material terms of the Indentures. It does not, however, restate each of the Indentures in its entirety, and where reference is made to a particular provision of each of the Indentures, such reference, including the definitions of certain terms, is qualified in its entirety by reference to all of the provisions of each of the Indentures and the Notes. You should read the Indentures because they contain additional information and because they, and not this description, define your rights as a holder of the Notes. Following the issuance of the Notes, a copy of each of the Indentures may be obtained by requesting it from the Issuer at the address indicated under "*Issuer—General Information.*"

Only a registered holder of the Notes are treated as the owner of it for all purposes. Only registered holders have rights under either or both of the Indentures. References in this description to "holders" or "holders of the Notes" are references to registered holders of the Notes only.

The Indentures are not qualified under, or are subject to, the provisions of, the U.S. Trust Indenture Act of 1939, as amended (the "*TIA*"). Consequently, the holders of the Notes generally will not be entitled to the protections provided under the TIA to holders of debt securities issued under a qualified indenture, including those requiring the Trustee under the applicable Indenture to resign in the event of certain conflicts of interest and to inform the holders of the Notes of the applicable series of certain relationships between it and the Issuer or the Guarantors.

Application has been made to admit the Euro Notes to the Official List of the Luxembourg Stock Exchange and admitted to trading on the Euro MTF Market.

The Issuer issued \$300 million in initial aggregate principal amount of senior unsecured notes denominated in U.S. Dollars (the “**Initial U.S. Dollar Notes**”) and €265 million in initial aggregate principal amount of senior unsecured notes denominated in Euros (the “**Initial Euro Notes**” and together with the Initial U.S. Dollar Notes, the “**Initial Notes**”). The Issuer may issue additional Notes denominated in U.S. Dollars (the “**Additional U.S. Dollar Notes**” and, together with the Initial U.S. Dollar Notes, the “**U.S. Dollar Notes**”) and/or additional Notes denominated in Euros (the “**Additional Euro Notes**” and, together with the Initial Euro Notes, the “**Euro Notes**”) from time to time after the Offering without the consent of holders. The Additional U.S. Dollar Notes and the Additional Euro Notes are collectively referred to herein as the “**Additional Notes**,” and the Initial Notes and the Additional Notes are collectively referred to herein as the “**Notes**.” Any offering of Additional Notes is subject to the covenant described below under the caption “—*Certain Covenants—Limitation on Indebtedness.*” Except as otherwise stated herein, the Initial U.S. Dollar Notes and any Additional U.S. Dollar Notes subsequently issued under the U.S. Dollar Indenture will be treated as a single series for all purposes under the U.S. Dollar Indenture, including, without limitation, waivers, amendments, redemptions and offers to purchase. Except as otherwise stated herein, the Initial Euro Notes and any Additional Euro Notes subsequently issued under the Euro Indenture are treated as a single series for all purposes under the Euro Indenture, including, without limitation, waivers, amendments, redemptions and offers to purchase. The U.S. Dollar Notes and the Euro Notes are treated as separate series for all purposes, including, without limitation, with respect to waivers, amendments, redemptions and offers to purchase. Unless the context otherwise requires, for all purposes of the Indentures and this “*Description of the Notes*,” references to the Notes include any Additional Notes actually issued.

The Notes were issued only in fully registered form, without coupons. The U.S. Dollar Notes were issued in minimum denominations of \$200,000 and any integral multiple of \$1,000 in excess thereof. The Euro Notes were issued in minimum denominations of €100,000 and any integral multiple of €1,000 in excess thereof. No service charge were made for any registration of transfer or exchange of Notes, but the Issuer may require payment of a sum sufficient to cover any transfer tax or other similar governmental charge payable in connection therewith.

Brief Description of the Structure and Ranking of the Notes and the Guarantees

The Notes

The Notes are senior unsecured obligations of the Issuer. The U.S. Dollar Notes will mature on October 1, 2019, and the Euro Notes will mature on October 1, 2019.

The Notes:

- are the Issuer’s general unsecured obligations;
- rank equally (subject to any applicable statutory exemptions) in right of payment with all of the Issuer’s existing and future debt that is not subordinated in right of payment to the Notes;
- are effectively subordinated to all existing and future secured debt of the Issuer to the extent of the assets securing such debt and to any preferential obligations under Spanish law; and
- are fully and unconditionally guaranteed on a senior basis by the Guarantors.

The Parent Guarantor’s Guarantee

The Parent Guarantor’s Guarantee:

- is a general unsecured obligation of the Parent Guarantor;
- ranks equally in right of payment with all of the existing and future debt of the Parent Guarantor that is not subordinated in right of payment to the Guarantee of the Parent Guarantor; and

- is effectively subordinated to all existing and future secured debt of the Parent Guarantor to the extent of the assets securing such debt and to any preferential obligations under Spanish law.

The Subsidiary Guarantors' Guarantees

Each Subsidiary Guarantor's Guarantee will:

- be a general unsecured obligation of the Subsidiary Guarantor that granted such Guarantee;
- rank equally in right of payment with all of the existing and future debt of such Subsidiary Guarantor that is not subordinated in right of payment to the Guarantee of such Subsidiary Guarantor; and
- be effectively subordinated to all existing and future secured debt of such Subsidiary Guarantor to the extent of the assets securing such debt and to any preferential obligations under applicable law.

General

On the Issue Date, not all of the Parent Guarantor's Subsidiaries were "Restricted Subsidiaries." "Restricted Subsidiary" is defined in the Indentures as any Subsidiary of the Parent Guarantor that is not an Unrestricted Subsidiary. Unrestricted Subsidiaries will not be subject to any of the restrictive covenants in either of the Indentures and will not Guarantee the Notes of the applicable series. For the twelve months ended June 30, 2014, the Parent Guarantor and its Restricted Subsidiaries (including the Issuer and the Subsidiary Guarantors) generated approximately 63% of the Parent Guarantor's consolidated EBITDA and accounted for approximately 38% of consolidated total assets.

As of June 30, 2014, after giving pro forma effect to the issuance and of the Notes and the use of proceeds therefrom:

- the Issuer and the Guarantors would have had, on a combined basis, approximately €5,010.8 million of Indebtedness outstanding of which €499.7 million would have been represented by the Notes;
- the Parent Guarantor's Restricted Subsidiaries that have not guaranteed the Notes would have had approximately €2,094.3 million of Indebtedness outstanding and total assets of approximately €4,219.6 million; and
- the Parent Guarantor's Unrestricted Subsidiaries would have had: (i) Indebtedness of approximately €6,319.1 million of which €6,319.1 million constitutes Non-Recourse Financing; and (ii) total assets of approximately €14,100.2 million.

Although each of the Indentures contain limitations on the amount of additional Indebtedness that the Issuer, the Parent Guarantor and the Restricted Subsidiaries may incur, the amount of such additional Indebtedness could be substantial. In addition, the Issuer, the Guarantors and Restricted Subsidiaries may incur unlimited amounts of Non-Recourse Financing and such Non-Recourse Financing may be secured.

Not all of the Parent Guarantor's Restricted Subsidiaries guarantee the Notes. In the event of a bankruptcy, liquidation or reorganization of any of these non-guarantor Restricted Subsidiaries, such non-guarantor Restricted Subsidiaries will likely be required to repay financial and trade creditors before distributing any assets to the Issuer or a Guarantor. The Notes are thus effectively subordinated to all Indebtedness and other liabilities and commitments (including trade payables, lease obligations and Non-Recourse Financing) of the Parent Guarantor's Subsidiaries that do not provide Guarantees. As of and for the twelve months ended June 30, 2014, the Issuer and the Guarantors (calculated on an unconsolidated basis) represented approximately 59% of the Parent Guarantor's consolidated EBITDA, and, as of June 30, 2014, the Issuer and the Guarantors (calculated on an unconsolidated basis) represented approximately 20% of total assets of the Parent Guarantor and its consolidated subsidiaries.

The Issuer is a finance subsidiary without operations and, therefore, the Issuer depends on the cash flow of the Parent Guarantor and its subsidiaries to meet its obligations, including its obligations under the Notes.

Principal, Maturity and Interest

The U.S. Dollar Notes will mature at par on October 1, 2019 and the Euro Notes will mature at par on October 1, 2019 in each case unless redeemed prior thereto as described herein. The Issuer issued (i) the U.S. Dollar Notes in an aggregate principal amount of \$300 million and (ii) the Euro Notes in an aggregate principal amount of €265 million. Subject to the covenant described under “—*Certain Covenants—Limitation on Indebtedness*,” the Issuer is permitted to issue Additional Notes under each of the Indentures. The Issuer may issue and the Guarantors may guarantee unlimited amounts of Additional Notes that are classified as Non-Recourse Financing. The Notes and any Additional Notes that are fungible with the relevant series of Notes for U.S. federal income tax purposes are treated as a single class for all purposes of the Indentures, including those with respect to waivers, amendments, redemptions and offers to purchase (subject to certain exceptions). Unless the context otherwise requires, references to the “Notes” for all purposes of the Indentures and in this “*Description of the Notes*” include references to the Notes and any Additional Notes that are issued. No issue of Additional Notes shall utilize the same ISIN, Common Code or other identifying numbers as a Note already issued hereunder unless the Additional Notes were issued in a “qualified reopening” (within the meaning of U.S. Treas. Reg. 1.1275-2(k)(3), or any successor provision, as in effect at the time of further issue).

Each U.S. Dollar Note bears interest at a rate per annum of 6.50% and each Euro Note bears interest at a rate per annum of 5.50% in each case payable semi-annually from the Issue Date or from the most recent interest payment date to which interest has been paid or provided for, whichever is later. Interest is payable on each Note on October 1 and April 1 of each year, commencing on April 1, 2015. Interest is payable to holders of record on each Note in respect of the principal amount thereof outstanding as of the immediately preceding September 15 and March 15, as the case may be.

Interest is computed on the basis of a 360-day year comprised of twelve 30-day months. Interest on overdue principal and interest is accrued at a rate that is 1.0% higher than the then applicable interest rate on the Notes. In no event will the rate of interest on the Notes be higher than the maximum rate permitted by applicable law.

Form of Notes

The U.S. Dollar Notes will be issued on the Issue Date only in fully registered form without coupons and only in denominations of \$200,000 and integral multiples of \$1,000 in excess thereof and the Euro Notes will be issued on the Issue Date only in fully registered form without coupons and only in denominations of €100,000 and integral multiples of €1,000 in excess thereof.

The U.S. Dollar Notes were initially in the form of one or more global notes (the “**U.S. Dollar Global Notes**”) and the Euro Notes were initially in the form of one or more global notes (the “**Euro Global Notes**”) and together with the U.S. Dollar Global Notes, the “**Global Notes**”). The Euro Global Notes were registered in the name of the nominee for the common depository for Euroclear and Clearstream, and were deposited with the common depository for Euroclear and Clearstream. Ownership of interests in the Euro Global Notes, referred to as “Book Entry Interests,” are available to participants in Euroclear, Clearstream or persons that hold interests through those participants. Book Entry Interests in the Euro Notes are shown on, and transfers thereof are effected only through, records maintained in book entry form by Euroclear and Clearstream, as applicable, and their direct or indirect participants. The terms of the Euro Indenture provide for the issuance of definitive registered Euro Notes in certain circumstances. See “*Book-Entry, Delivery and Form.*”

The U.S. Dollar Global Notes were deposited with, or on behalf of, a custodian for DTC and registered in the name of Cede & Co. as DTC’s nominee. Ownership of interests in the U.S. Dollar Global Notes, referred to as “book-entry interests,” is limited to persons that have accounts with DTC or its participants. Book-entry interests will be shown on, and transfers thereof will be effected only through, records maintained in book-entry form by DTC and its participants. The terms of the U.S. Dollar Indenture provide for the issuance of definitive registered U.S. Dollar Notes in certain circumstances. See “*Book-Entry, Delivery and Form.*”

Transfer

All transfers of Book Entry Interests between participant, in the case of DTC, are effected by DTC and, in the case of, Euroclear or Clearstream are effected by Euroclear or Clearstream, as applicable, in each case pursuant to customary procedures and subject to applicable rules and procedures established respectively by (i) DTC and (ii) Euroclear and Clearstream and, in each case, their participants. See the section entitled "*Book-Entry, Delivery and Form.*"

The Notes are subject to certain restrictions on transfer and certification requirements, as described under "*Book-Entry, Delivery and Form*" and "*Notice to Certain Investors.*"

Payments on the Notes; Paying Agent

The Issuer will maintain one or more Paying Agents for the Notes. The initial Paying Agent in respect of the U.S. Dollar Notes will be Deutsche Bank Trust Company Americas and in respect of the Euro Notes is Deutsche Bank AG, London Branch.

The Issuer may change the Paying Agent in respect of each series of Notes without prior notice to the holders of the Notes. In addition, the Issuer or any of its Subsidiaries may act as paying agent in connection with the Notes other than for the purposes of effecting a redemption described under "*—Optional Redemption*" or an offer to purchase the Notes described under either of "*—Certain Covenants—Change of Control*" and "*—Certain Covenants—Limitation on Sales of Assets.*" The Issuer will make all payments in same-day funds. Payments on the Global Notes will be made to, in the case of the U.S. Dollar Global Notes, the nominee for DTC and, in the case of the Euro Global Notes, the nominee for the common depository for Euroclear and Clearstream, in each case, as the registered holder of the Global Notes.

The Issuer undertakes that it will maintain and make payments through a paying agent outside of Luxembourg and in an EU Member State in respect of each series of Notes that is not obliged to withhold or deduct tax pursuant to the EU Savings Directive, European Council Directive 2014/48/EU, or any other Directive implementing the conclusions of the ECOFIN Council Meeting of 26-27 November 2000, or any law implementing or complying with, or introduced in order to conform to, any such Directives.

No service charge is made for any registration of transfer, exchange or redemption of the Notes, but the Issuer may require payment of a sum sufficient to cover any transfer tax or similar governmental charge payable in connection with any such registration of transfer or exchange.

Guarantees

General

Under each of the Indentures, the Guarantors will jointly, severally and irrevocably agree to guarantee the due and punctual payment of all amounts payable under the relevant series of Notes, including principal of, premium, if any, interest on the Notes and Additional Amounts, if any. Unless all Subsidiary Guarantors have previously been released from their Guarantees in accordance with "*—Release of the Guarantees*" below, following the occurrence of a Rating Release Event, the Parent Guarantor shall procure that: (i) each of its Subsidiaries that is a guarantor of Parent Indebtedness on the Issue Date is (and, until released in accordance with the applicable Indenture, will continue to be) an original Subsidiary Guarantor; and (ii) each of its Subsidiaries that becomes a guarantor of Parent Indebtedness after the Issue Date becomes (subject to the applicable Trustee's completion of customary client identification processes for any such subsidiary and, until released in accordance with each of the Indentures, will continue to be) a Subsidiary Guarantor within 30 days of becoming a guarantor of Parent Indebtedness (except that Subsidiaries of the Parent Guarantor that are or become prohibited or restricted from providing a guarantee with respect to the Notes under laws generally applicable to persons of the same legal form as such Subsidiaries will not be required to become or continue to be Subsidiary Guarantors provided that if such prohibition or restriction is removed, the Parent Guarantor shall, within 30 days thereof, cause that Subsidiary to become a Subsidiary Guarantor).

Limitations

The obligations of each Subsidiary Guarantor under its Guarantee are limited to an amount not to exceed the maximum amount that can be guaranteed by such Subsidiary Guarantor by law or without resulting in its obligations under its Guarantee being voidable or unenforceable under applicable laws relating to fraudulent transfer, or under similar laws affecting the rights of creditors generally. Each Subsidiary Guarantor that makes a payment or distribution under its Guarantee is entitled to contribution from any other Guarantor. See "*Risk Factors—Risks Related to the Notes—The Note Guarantees may be limited by applicable laws or subject to certain limitations or defenses.*"

If a Subsidiary of the Parent Guarantor that is a guarantor of Parent Indebtedness is prohibited or restricted under laws generally applicable to persons of the same legal form as it from becoming a Subsidiary Guarantor, but such prohibition or restriction could be avoided by the inclusion of limitations in the Guarantee to be given by it, such Subsidiary of the Parent Guarantor shall become a Subsidiary Guarantor provided that its Guarantee shall incorporate and shall be given subject to such limitations.

If, as a result of a change in law taking effect after the Issue Date (in respect of original Subsidiary Guarantors) or the date on which a Subsidiary became a Subsidiary Guarantor (in respect of new Subsidiary Guarantors), the guarantee of a Subsidiary Guarantor becomes prohibited or restricted under laws generally applicable to persons of the same legal form as it from continuing to be a Subsidiary Guarantor, but such prohibition or restriction could be avoided by the inclusion of limitations in the Guarantee given by it, the Guarantee of such Subsidiary Guarantor shall be deemed to incorporate the applicable limitations as of the date such change in law comes into effect, and the Parent Guarantor shall procure that the Guarantee of such Subsidiary Guarantor is amended within 30 days of the Parent Guarantor becoming aware of any such prohibition or restriction to reflect such limitations.

In the circumstances described above, the limitations applicable to such Guarantee shall be the minimum limitations required under relevant laws in order that the prohibition or restriction be avoided.

Release of the Guarantees

A Guarantee of the relevant Subsidiary Guarantor or Subsidiary Guarantors, as the case may be, will be automatically and unconditionally released (and thereupon will terminate and be discharged and be of no further force and effect) in each of the following circumstances described below.

- If: (i) a Release Event has occurred with respect to a Subsidiary Guarantor; and (ii) (other than with respect to a Release Event of the type referred to in paragraph (b) of the definition thereof) no Event of Default has occurred and is continuing, the relevant Subsidiary Guarantor shall, subject to "*—Limitations*" above, be released from its obligations under its Guarantee.
- If: (i) a Rating Release Event has occurred; and (ii) no Event of Default has occurred and is continuing, each Subsidiary Guarantor shall be permanently released from its obligations under its Guarantee.
- Upon the voluntary sale or disposition (including through merger, consolidation, amalgamation or other combination) or conveyance, transfer or lease of the Capital Stock, or all or substantially all of the assets, of a Subsidiary Guarantor (or a Holding Company thereof), if such sale is made in compliance with the covenant described under "*—Certain Covenants—Limitation on Sales of Assets,*" each such Subsidiary Guarantor shall be permanently released from its obligations under its Guarantee.
- Upon a Legal Defeasance or satisfaction and discharge of the Indenture that complies with the provisions under "*—Defeasance*" or "*—Satisfaction and Discharge,*" each Subsidiary Guarantor shall be permanently released from its obligations under its Guarantee.

- Upon payment in full of the aggregate principal amount of all Notes then outstanding and all other financial obligations under the Indentures and the Notes then due and owing, each Guarantor shall be permanently released from its obligations under its Guarantee.

Upon any occurrence giving rise to a release of a Guarantee as specified above, the applicable Trustee upon receipt of an Officer's Certificate and opinion of counsel will execute any documents reasonably required in order to evidence such release, discharge and termination in respect of such Guarantee. Neither the Issuer, the applicable Trustee, the applicable Registrar nor any Guarantor are required to make a notation on the relevant series Notes to reflect any such Guarantee or any such release, termination or discharge. The Issuer is required to notify the holders of the Notes under "*—Notices*" below.

Additional Amounts

All payments by the Issuer made under or with respect to the Notes or that any Guarantor makes under or with respect to the Guarantees are made free and clear of, and without withholding or deduction for or on account of, any present or future taxes, duties, levies, imposts, deductions, assessments or other similar governmental charges imposed or levied by or on behalf of: (i) any jurisdiction in which the Issuer or any Guarantor (including any successor Persons) is organized, engaged in business or resident for tax purposes; or (ii) any jurisdiction from or through which payment on the Notes or any Guarantee is made by or on behalf of the Issuer or any Guarantor (including, without limitation, the jurisdiction of the Paying Agents) or any political subdivision or authority thereof or therein having the power to tax (each, a "**Relevant Taxing Jurisdiction**") and any interest, surcharges, penalties and other liabilities with respect thereto (collectively, "**Taxes**"), unless the Issuer or any Guarantor is required to so withhold or deduct such Taxes by law or by the relevant taxing authority's interpretation or administration thereof. In the event that the Issuer or a Guarantor is required to so withhold or deduct any amount for, or on account of, any such Taxes from any payment made under or with respect to the Notes or any Guarantee, including, without limitation, payments of principal, redemption price, purchase price, interest or premium, the Issuer or such Guarantor, as the case may be, will pay such additional amounts ("**Additional Amounts**") as may be necessary so that the net amount received by each holder of the Notes after such withholding or deduction is not less than the amount that such holder of the Notes would have received if such Taxes had not been required to be withheld or deducted.

Notwithstanding the foregoing, neither the Issuer nor any Guarantor will pay Additional Amounts to a holder of the Notes of any Note in respect or on account of:

- any Taxes that would not have been imposed, withheld or deducted but for the holder of the Notes or the beneficial owner of the Notes having any present or former connection with the Relevant Taxing Jurisdiction (including, without limitation, being a citizen or resident or national of, incorporated in or carrying on a business in, or otherwise maintaining therein a permanent establishment), other than the mere acquisition, holding, enforcement or receipt of payment in respect of the Notes (or such beneficial interest) or with respect to any Guarantee;
- at any time when the Notes are listed on an organized market in an OECD country, any payment by the Issuer to, or to a third party on behalf of, a holder who does not provide to the Issuer or the Guarantor (or an agent acting on behalf of the Issuer or the Guarantor) the information concerning such holder as may be required in order to comply with the procedures that may be implemented to comply with any current or future interpretation of Royal Decree 1145/2011 by the Spanish Tax Authorities, as well as with any such current or future interpretation of successor legislation or regulation;
- in respect of any payments by any Guarantor not resident for tax purposes in the Kingdom of Spain, any Taxes that are imposed, withheld or deducted by reason of the failure of the holder of any Note or the beneficial owner of any Note, prior to the relevant date on which a payment under and with respect to the Note or any Guarantee is due and payable (the "**Relevant Payment Date**") to comply with such Guarantor's written request addressed to the relevant holder, sent at least 30 calendar days

prior to the Relevant Payment Date, to provide accurate information with respect to any certification, identification, information or other reporting requirements concerning nationality, residence, identity or connection with the Relevant Taxing Jurisdiction, which such holder or beneficial owner is legally required to satisfy, whether imposed by statute, treaty, regulation or administrative practice, in each such case by such Relevant Taxing Jurisdiction, as a precondition to benefit from an exemption from, or reduction in the rate of deduction or withholding of, Taxes imposed by such Relevant Taxing Jurisdiction (including, without limitation, a certification that such holder or beneficial owner is not resident in the Relevant Taxing Jurisdiction);

- any estate, inheritance, gift, sales, transfer, personal property or similar Taxes;
- any Tax that is payable other than by deduction or withholding from payments made under or with respect to any Note or any Guarantee;
- any Tax which would not have been so imposed but for the presentation (where presentation is required in order to receive payment) by the holder of the Notes or beneficial owner of a Note for payment on a date more than 30 days after the relevant payment is first made available for payment to the holder of the Notes or beneficial owner, except to the extent that the holder of the Notes or beneficial owner would have been entitled to such Additional Amounts had the Note been presented on the last day of such 30-day period;
- any withholding or deduction in respect of any Taxes where such withholding or deduction is imposed on a payment and is required to be made pursuant to the EU Savings Directive, European Council Directive 2014/48/EU, or any other Directive implementing the conclusions of the ECOFIN Council Meeting of 26-27 November 2000, or any law implementing or complying with, or introduced in order to conform to, any such Directives;
- any withholding or deduction required pursuant to FATCA and any intergovernmental agreement implementing FATCA;
- any Taxes that would not have been imposed but for the holder of the Note being a fiduciary, a partnership, a limited liability company or a person other than the sole beneficial owner of such payment, to the extent that such payment would be required by the laws of a Relevant Taxing Jurisdiction to be included for tax purposes in the income of a beneficiary or settlor (with respect to the fiduciary), a member of that partnership, a holder of an interest in that limited liability company or a beneficial owner who would not have been entitled to such Additional Amounts had it been a holder of the Note; or
- any Note presented (where the presentation is required) by or on behalf of a holder of the Notes or a beneficial owner who would have been able to avoid such withholding or deduction by presenting such Note to another Paying Agent in a Member State of the European Union.

In addition, Additional Amounts will not be payable with respect to any Taxes that are imposed in respect of any combination of the items set forth in (1) through (10) above.

For a description of the formalities that must be followed in order to ensure the applicability of an exemption from withholding Taxes imposed by the Kingdom of Spain and certain disclosure requirements imposed on the Issuer and on the applicable Paying Agent, see *"Taxation—Spanish Tax Considerations—Disclosure of Information in Connection to the Notes"* and *"Risk Factors—Risks Related to Certain Taxation Matters."*

The Issuer or the relevant Guarantor will make or cause to be made such withholding or deduction of Taxes and remit the full amount of Taxes so deducted or withheld to the relevant taxing authority in accordance with all applicable laws. The Issuer or the relevant Guarantor will, upon request, make available to the holders of the Notes, within 30 days after the date on which the payment of any Taxes so deducted or withheld is due pursuant to applicable law, certified copies of tax receipts evidencing such payment by the

Issuer or the relevant Guarantor, or if, notwithstanding the Issuer's reasonable efforts to obtain such receipts, the same are not obtainable, other evidence reasonably satisfactory to the applicable Trustee of such payment by the Issuer or the relevant Guarantor, as applicable.

At least 30 calendar days prior to each date on which any payment under, or with respect to, the Notes is due and payable, if the Issuer or a relevant Guarantor is obliged to pay Additional Amounts with respect to such payment (unless such obligation to pay Additional Amounts arises after the 30th day prior to the date on which payment under or with respect to the Notes is due and payable, in which case it will be promptly thereafter), the Issuer or such Guarantor will deliver to the applicable Trustee an Officer's Certificate stating that such Additional Amounts are payable, the amounts so payable and setting forth such other information as is necessary to enable that Trustee or the applicable Paying Agent to pay such Additional Amounts to the holders of the Notes on the payment date. The Issuer will promptly publish a notice in accordance with the provisions set forth in "*—Notices*" stating that such Additional Amounts are payable and describing the obligation to pay such amounts and the amounts to be paid.

The applicable Trustee is entitled to rely solely on such Officer's Certificate as conclusive proof that such payments are necessary and amounts payable. The Issuer or the Guarantor will provide the applicable Trustee with documentation reasonably satisfactory to that Trustee evidencing the payment of Additional Amounts.

In addition, the Issuer and the relevant Guarantor will also pay and indemnify the holder of the Notes for any present or future stamp, issue, registration, court or documentary taxes, or any other excise or property taxes, charges or similar levies or Taxes which are levied on the execution, delivery, registration or enforcement of any of the Notes, the Indenture, and Guarantee, or any other document or instrument referred to therein.

The foregoing provisions will survive any termination, defeasance or discharge of the Indenture and will apply *mutatis mutandis* to any jurisdiction in which any successor Person to the Issuer or a Guarantor is organized, engaged in business or resident for tax purposes and any jurisdiction from or through which such person makes any payment on the Note or Guarantee and or any political subdivision or taxing authority or agency thereof or therein.

Whenever in the Indentures or this "*Description of the Notes*" there is mentioned, in any context, the payment of principal, premium, interest or any other amount payable under or with respect to any Note (including payments thereof made pursuant to any Guarantee), such mention will be deemed to include mention of the payment of Additional Amounts, if applicable.

Optional Make-Whole Redemption

At any time, upon not less than 30 nor more than 60 days' notice, the Issuer may redeem all or part of each series of the Notes at a redemption price equal to 100% of the principal amount thereof plus the Applicable Redemption Premium and accrued and unpaid interest and Additional Amounts, if any, to the redemption date.

"Applicable Redemption Premium" means, with respect to any Note on any redemption date, the greater of:

- (1) 1.0% of the principal amount of the Note; and
- (2) the excess of:
 - (a) the present value at such redemption date of: (x) 100% of the aggregate principal amount of such Note to be redeemed; *plus* (y) all required interest payments that would otherwise be due to be paid on such Note through October 1, 2019 (excluding accrued but unpaid interest to the redemption date), computed using a discount rate equal to (i), in the case of the U.S. Dollar Notes, the Treasury Rate at such redemption plus 50 basis points and (ii) in the case of the Euro Notes, the Bund Rate at such redemption date plus 50 basis points; over

(b) the outstanding principal amount of the Note;

as calculated by the Issuer or an agent appointed by the Issuer. For the avoidance of doubt, calculations of the Applicable Redemption Premium shall not be a duty or obligation of the applicable Trustee or any applicable Paying Agent.

Unless the Issuer defaults in the payment of the redemption price, interest will cease to accrue on the Notes or portions thereof called for redemption on the applicable redemption date.

Any notice of redemption may, in the Issuer's discretion, be subject to the satisfaction of one or more conditions precedent.

Notice of Optional Redemption

The Issuer will publish a notice of any optional redemption of the Notes described above in accordance with the provisions of each of the Indentures described under "*—Notices.*" The Issuer will inform the Luxembourg Stock Exchange of the principal amount of the Notes that have not been redeemed in connection with any optional redemption. If fewer than all of the Notes are to be redeemed at any time, the applicable Trustee will select the Notes of the relevant series by a method that complies with the requirements, as certified to that Trustee by the Issuer in an Officer's Certificate, of the principal securities exchange, if any, on which the Notes are listed at such time or, if the Notes are not listed on a securities exchange, *pro rata*, by lot or by such other method as that Trustee or the applicable Registrar shall deem fair and appropriate (in each case in compliance with DTC requirements); provided that no such partial redemption will reduce the portion of the principal amount of a Note not redeemed to less than (i), in the case of the U.S. Dollar Notes, \$200,000 and (ii), in the case of the Euro Notes, €100,000. Neither the Trustees nor the Registrars, as applicable under the relevant series of the Notes are liable for any selections made by or in accordance with this paragraph.

Redemption Upon Changes in Withholding Taxes

The Issuer may, at its option, redeem each series of Notes, in whole but not in part, at any time upon giving not less than 30 nor more than 60 days' notice to the holders of the Notes, at a redemption price equal to 100% of the principal amount thereof, together with accrued and unpaid interest thereon, if any, to the redemption date and all Additional Amounts, if any, then due and which will become due on the date of redemption as a result of the redemption or otherwise (subject to the rights of the holders of the Notes on the relevant record date to receive interest due on the relevant interest payment date and Additional Amounts, if any, in respect thereof), if the Issuer or any of the Guarantors is or, on the next date on which any amount would be payable in respect of the Notes, would be obliged to pay Additional Amounts (as defined above under "*—Additional Amounts*"), which the Issuer or any Guarantor, as the case may be, cannot avoid by the use of reasonable measures available to it (including making payment through a Paying Agent located in another jurisdiction) as a result of:

- any change in, or amendment to, the laws or treaties (or any regulations or rulings promulgated thereunder) of any Relevant Taxing Jurisdiction (as defined above under "*—Additional Amounts*") affecting taxation which becomes effective on or after the date of the relevant Indenture or, if the Relevant Taxing Jurisdiction has changed since the date of the relevant Indenture, on or after the date on which the then current Relevant Taxing Jurisdiction became the Relevant Taxing Jurisdiction under the relevant Indenture (or, in the case of a successor Person, on or after the date of assumption by the successor Person of the Issuer's or any Guarantor's obligations hereunder); or
- any change in, or amendment to, the existing official position or the introduction of an official position regarding the application, administration, or interpretation of the laws, treaties, regulations or rulings of any Relevant Taxing Jurisdiction (including a holding, judgment or order by a court of competent jurisdiction) which becomes effective on or after the date of the relevant Indenture or, if the Relevant

Taxing Jurisdiction has changed since the date of the relevant Indenture, on or after the date on which the then current Relevant Taxing Jurisdiction became the Relevant Taxing Jurisdiction under the relevant Indenture (or, in the case of a successor Person, on or after the date of assumption by the successor Person of the Issuer's, or any Guarantor's, obligations hereunder) (each of the foregoing clauses (1) and (2) being a "**Change in Tax Law**").

Notwithstanding the above, the Issuer may not redeem the relevant series of Notes under this provision if the Relevant Taxing Jurisdiction changes under the relevant Indenture and the Issuer or any Guarantor is obliged to pay Additional Amounts as a result of a Change in Tax Law of the Relevant Taxing Jurisdiction which, at the time the taxing jurisdiction became the Relevant Taxing Jurisdiction under the relevant Indenture, had been publicly announced as being or having been formally proposed.

In the case of Additional Amounts required to be paid as a result of the Issuer conducting business in a jurisdiction other than its place of organization, the Change in Tax Law must become effective after the date the Issuer begins to conduct the business giving rise to the relevant withholding or deduction.

Notwithstanding the foregoing, no such notice of redemption will be given: (a) earlier than 90 days prior to the earliest date on which the Issuer or any Guarantor, as the case may be, would be obliged to make such payment of Additional Amounts or withholding if a payment in respect of the Notes were then due; and (b) unless at the time such notice is given, the obligation to pay Additional Amounts remains in effect.

Prior to the publication or, where relevant, mailing of any notice of redemption pursuant to the foregoing, the Issuer will deliver to the Trustee of the applicable series of Notes:

- an Officer's Certificate stating that the obligation to pay such Additional Amounts cannot be avoided by the Issuer taking reasonable measures available to it; and
- a written opinion of independent tax counsel of recognized standing, qualified under the laws of the Relevant Taxing Jurisdiction and reasonably satisfactory to that Trustee to the effect that the Issuer is or would be obliged to pay such Additional Amounts as a result of a Change in Tax Law.

The applicable Trustee will accept such Officer's Certificate and opinion as sufficient evidence of the satisfaction of the conditions precedent as described above, in which event it will be conclusive and binding on the holders of the Notes.

The foregoing provisions will apply mutatis mutandis to any successor Person, after such successor Person becomes a party to the relevant Indentures, with respect to a Change in Tax Law occurring after the time such successor Person becomes a party to the relevant Indentures.

For the avoidance of doubt, the implementation of the European Council Directive 2003/48/EC or any law implementing, or complying with, or introduced in order to conform to, such directive will not be a change or amendment for such purposes.

Mandatory Redemption; Offers to Purchase; Open Market Purchases

The Issuer will not be required to make any mandatory redemption or sinking fund payments with respect to the Notes. However, under certain circumstances, the Issuer may be required to offer to purchase the Notes of each series as described under "*—Certain Covenants—Limitation on Sales of Assets*" and "*—Certain Covenants—Change of Control*." The Issuer, the Parent Guarantor and the Restricted Subsidiaries may at any time and from time to time purchase the Notes of each series in the open market or otherwise.

Certain Covenants

The Indentures will each contain, among others, the following covenants.

Limitation on Indebtedness

- (1) Subject to the exceptions set out under paragraph (2) below, the Parent Guarantor will not, and will procure that none of its Restricted Subsidiaries will, after the Issue Date, incur any additional Indebtedness if, on the date of the incurrence of such additional Indebtedness, the Debt Ratio is more than 3.0 to 1.0, assuming for these purposes that such additional Indebtedness has been incurred, and the net proceeds thereof applied, on the first day of the relevant Testing Period.
- (2) Irrespective of the Debt Ratio, the Parent Guarantor and its Restricted Subsidiaries are permitted to incur the following Indebtedness:
 - (a) Indebtedness incurred pursuant to the Existing Facilities Agreements;
 - (b) Indebtedness of the Parent Guarantor owing to any of its Subsidiaries or Indebtedness of any of its Restricted Subsidiaries owing to the Parent Guarantor or any Subsidiary of the Parent Guarantor;
 - (c) Indebtedness under the relevant series of Notes (other than any Additional Notes) and any Indebtedness (other than the Indebtedness under clauses (a), (b), (f), (g), (h), (i), (j) and (o) of this paragraph) outstanding on the Issue Date;
 - (d) Indebtedness of a Restricted Subsidiary incurred and outstanding on the date on which such Restricted Subsidiary was directly or indirectly acquired by the Parent Guarantor after the Issue Date or on the date it otherwise becomes a Restricted Subsidiary;
 - (e) Indebtedness of the Parent Guarantor and its Restricted Subsidiaries represented by capital lease obligations, mortgage financings, purchase money obligations or other similar indebtedness with respect to assets or property not to exceed in the aggregate €15.0 million;
 - (f) Indebtedness of the Parent Guarantor and its Restricted Subsidiaries incurred in respect of worker's compensation claims, self-insurance obligations, performance, surety and similar bonds and completion guarantees provided by the Parent Guarantor and its Subsidiaries in the ordinary course of business;
 - (g) Indebtedness of the Parent Guarantor and its Restricted Subsidiaries providing for indemnification, adjustment of purchase price or similar obligations in connection with the acquisition or disposition of any business, assets or capital stock of a Subsidiary after the Issue Date;
 - (h) Indebtedness arising from honoring by a bank or other financial institution of a check, draft or similar instrument drawn against insufficient funds or credit lines in the ordinary course of business provided that such Indebtedness is disbursed within seven days of incurrence;
 - (i) advance payments received from customers for goods and services purchased and credit periods in the ordinary course of business;
 - (j) Indebtedness constituting reimbursement obligations with respect to letters of credit, bankers' acceptances or similar instruments or obligations issued in the ordinary course of business; provided that upon the drawing or other funding of such letters of credit or other instruments or obligations, such drawings or fundings are reimbursed within seven days;
 - (k) Indebtedness under cash pooling arrangements and hedging arrangements (with respect to currency risks, interest rate risks, commodity risks and price risks) in the ordinary course of business;
 - (l) the guarantee by the Parent Guarantor or a Restricted Subsidiary of Indebtedness that is permitted to be incurred pursuant to another provision of this "*Limitation on Indebtedness*" covenant;

- (m) the factoring of accounts receivable arising in the ordinary course of business pursuant to customary arrangements;
- (n) Indebtedness that constitutes Non-Recourse Financing;
- (o) Indebtedness of the Parent Guarantor and its Restricted Subsidiaries not exceeding an aggregate principal amount of €100.0 million; and
- (p) any Refinancing Indebtedness incurred with respect to the refinancing of any Indebtedness permitted under paragraph (1) above or clauses (c), (d), or (p) of this paragraph.

For purposes of determining compliance with this "*Limitation on Indebtedness*" covenant, in the event that an item of proposed Indebtedness meets the criteria of more than one of the categories described in paragraphs (2)(b) through (p) of this "*Limitation on Indebtedness*" covenant, or is entitled to be incurred pursuant to paragraph (1) of this "*Limitation on Indebtedness*" covenant, the Parent Guarantor will be permitted to classify such item of Indebtedness on the date of its incurrence, or later reclassify all or a portion of such item of Indebtedness, in any manner that complies with this "*Limitation on Indebtedness*" covenant. The accrual of interest, the accretion or amortization of original issue discount, the payment of interest on any Indebtedness in the form of additional Indebtedness with the same terms and the reclassification of preferred stock as Indebtedness due to a change in accounting principles will not be deemed to be an incurrence of Indebtedness for purposes of this "*Limitation on Indebtedness*" covenant.

For purposes of determining compliance with any euro-denominated restriction on the incurrence of Indebtedness, the Euro Equivalent of the principal amount of Indebtedness denominated in another currency will be calculated based on the relevant currency exchange rate in effect on the date such Indebtedness was incurred, in the case of term Indebtedness, or first committed, in the case of Indebtedness incurred under a revolving credit facility; *provided* that: (i) if such Indebtedness is incurred to refinance other Indebtedness denominated in a currency other than euro, and such refinancing would cause the applicable euro-denominated restriction to be exceeded if calculated at the relevant currency exchange rate in effect on the date of such refinancing, such euro-denominated restriction will be deemed not to have been exceeded so long as the principal amount of such Refinancing Indebtedness does not exceed the principal amount of such Indebtedness being refinanced; (ii) the Euro Equivalent of the principal amount of any such Indebtedness outstanding on the Issue Date will be calculated based on the relevant currency exchange rate in effect on the Issue Date; and (iii) if and for so long as any such Indebtedness is subject to an agreement intended to protect against fluctuations in currency exchange rates with respect to the currency in which such Indebtedness is denominated covering principal and interest on such Indebtedness, the amount of such Indebtedness, if denominated other than in euro, will be the amount of the principal payment required to be made under such currency agreement and, otherwise, the Euro Equivalent of such amount plus the Euro Equivalent of any premium which is at such time due and payable but is not covered by such currency agreement.

Limitation on Restricted Subsidiary Indebtedness

No Restricted Subsidiary that is not a Subsidiary Guarantor will, after the Issue Date, incur any additional Indebtedness if following the incurrence of such additional Indebtedness the total Financial Debt of all such Restricted Subsidiaries that are not Subsidiary Guarantors would constitute more than 20% of the consolidated Financial Debt of the Parent Guarantor and its Subsidiaries; *provided, however*, that: (i) this calculation shall exclude the Indebtedness of any entity that became a Restricted Subsidiary less than six months prior to the relevant calculation date; and (ii) this covenant shall not apply to, and this calculation shall exclude, Relevant Indebtedness guaranteed by the Parent Guarantor that is incurred by any Restricted Subsidiary formed or used primarily for the purpose of incurring such Indebtedness.

Limitation on Restricted Distributions

- (1) The Parent Guarantor will not, and will not cause or permit any of its Restricted Subsidiaries to, directly or indirectly:
 - (a) declare or pay any dividend or make any other payment or distribution on account of the Parent Guarantor's or any of its Restricted Subsidiaries' Equity Interests (including, without limitation, any payment in connection with any merger or consolidation involving the Parent Guarantor or any of its Restricted Subsidiaries) or to the direct or indirect holders of the Parent Guarantor's or any of its Restricted Subsidiaries' Equity Interests in their capacity as holders (other than dividends or distributions payable in Equity Interests (other than Disqualified Stock) of the Parent Guarantor or any of its Restricted Subsidiaries and other than dividends or distributions payable to the Parent Guarantor or to a Restricted Subsidiary); or
 - (b) purchase, redeem or otherwise acquire or retire for value (including, without limitation, in connection with any merger or consolidation involving the Parent Guarantor) any Equity Interests of the Parent Guarantor or any direct or indirect parent entity of the Parent Guarantor,

(all such payments and other actions set forth in clauses (a) and (b) above being collectively referred to as "*Restricted Distributions*"), unless, at the time of any such Restricted Distribution:
 - (A) no Default or Event of Default has occurred and is continuing or would occur as a consequence of such Restricted Distribution;
 - (B) the Parent Guarantor would, at the time of such Restricted Distribution and after giving pro forma effect thereto as if such Restricted Distribution had been made at the beginning of the applicable Testing Period, have been permitted to incur at least €1.00 of additional Indebtedness pursuant to the Debt Ratio test set forth in paragraph (1) of the "*Limitation on Indebtedness*" covenant; and
 - (C) such Restricted Distribution, together with the aggregate amount of all other Restricted Distributions made by the Parent Guarantor and its Restricted Subsidiaries since the Issue Date (excluding Restricted Distributions permitted by paragraphs 2(b), (c) and (d) of this "*Limitation on Restricted Distributions*" covenant) is less than the sum, without duplication, of:
 - i. 50% of the Consolidated Net Income of the Parent Guarantor for the period (taken as one accounting period) from the beginning of the six month period commencing immediately prior to the Issue Date to the end of the Parent Guarantor's most recently ended six month period for which internal financial statements are available at the time of such Restricted Distribution (or, if such Consolidated Net Income for such period is a deficit, less 100% of such deficit); plus
 - ii. 100% of the aggregate net cash proceeds and the Fair Market Value of marketable securities received by the Parent Guarantor since September 30, 2013 as a contribution to its common equity capital or from the issue or sale of Equity Interests of the Parent Guarantor (other than Disqualified Stock) or from the issue or sale of convertible or exchangeable Disqualified Stock of the Parent Guarantor or convertible or exchangeable debt securities of the Parent Guarantor, in each case that have been converted into or exchanged for Equity Interests of the Parent Guarantor (other than Equity Interests, or Disqualified Stock or debt securities, sold to a Subsidiary of the Parent Guarantor).
- (2) The preceding provisions will not prohibit:
 - (a) the payment of any dividend or the consummation of any redemption within 60 days after the date of declaration of the dividend or giving of the redemption notice, as the case may be, if at

the date of declaration or notice, the dividend or redemption payment would have complied with the Indenture;

- (b) the making of any Restricted Distribution in exchange for, or out of or with the net cash proceeds of the substantially concurrent sale or issuance (other than to a Subsidiary of the Parent Guarantor) of, Equity Interests of the Parent Guarantor (other than Disqualified Stock), or from the substantially concurrent contribution of common equity capital to the Parent Guarantor; provided that the amount of any such net cash proceeds that are utilized for any such Restricted Distribution will be excluded from paragraph (1)(C)(ii) of this "*Limitation on Restricted Distributions*" covenant;
- (c) the repurchase, redemption or other acquisition or retirement for value of any Equity Interests of the Parent Guarantor held by any current or former officer, director, employee or consultant of the Parent Guarantor or any of its Restricted Subsidiaries pursuant to any equity subscription agreement, stock option agreement, restricted stock grant, shareholders' agreement or similar agreement; *provided* that the aggregate price paid for all such repurchased, redeemed, acquired or retired Equity Interests may not exceed €2.0 million in any calendar year (with unused amounts in any calendar year being carried over to succeeding calendar years); and *provided further*, that such amount in any calendar year may be increased by an amount not to exceed the cash proceeds from the sale of Equity Interests of the Parent Guarantor or a Restricted Subsidiary received by the Parent Guarantor or a Restricted Subsidiary during such calendar year, in each case to members of management, directors or consultants of the Parent Guarantor, any of its Restricted Subsidiaries or any of its direct or indirect parent companies to the extent the cash proceeds from the sale of Equity Interests have not otherwise been applied to the making of Restricted Distributions pursuant to paragraph (1)(C)(ii) of this "*Limitation on Restricted Distributions*" covenant or clause (b) above;
- (d) the repurchase, redemption or other acquisition or retirement for value of those Equity Interests of the Parent Guarantor that participants in the Parent Guarantor's share-based incentive scheme for managers and employees have pledged under the bank loan facility in connection with such scheme, but only if and to the extent that the bank providing such facility calls upon the Parent Guarantor's guarantee of the facility;
- (e) the repurchase of Equity Interests deemed to occur upon the exercise of stock options to the extent such Equity Interests represent a portion of the exercise price of those stock options;
- (f) the declaration and payment of regularly scheduled or accrued dividends to holders of any class or series of Disqualified Stock of the Parent Guarantor or any preferred stock of any Restricted Subsidiary issued on or after the Issue Date in accordance with the "*Limitation on Indebtedness*" covenant;
- (g) payments of cash, dividends, distributions, advances or other Restricted Distributions by the Parent Guarantor or any of its Restricted Subsidiaries to allow the payment of cash in lieu of the issuance of fractional shares upon: (x) the exercise of options or warrants; or (y) the conversion or exchange of Capital Stock of any such person;
- (h) the repurchase of Equity Interests of the Parent Guarantor to be held as treasury stock; provided that the total aggregate amount of Restricted Distributions made under this paragraph (h) does not exceed €20.0 million plus the cash proceeds from the sale of such Equity Interests of the Parent Guarantor from treasury stock since the Issue Date;
- (i) the payment of any dividend (or, in the case of any partnership or limited liability company, any similar distribution) by a Restricted Subsidiary to the holders of its Equity Interests (other than the Parent Guarantor or any Restricted Subsidiary) on no more than a *pro rata* basis;

- (j) the repurchase of Equity Interests of the Parent Guarantor for delivery to holders of the Existing Convertible Notes upon conversion and payments made to holders of the Existing Convertible Notes pursuant to their terms, including upon and following conversion thereof; or
- (k) so long as no Default or Event of Default has occurred and is continuing, other Restricted Distributions in an aggregate amount not to exceed €20.0 million per year.

Limitation on Transactions with Affiliates

- (1) The Parent Guarantor will not, and will not permit any Restricted Subsidiary to, directly or indirectly, enter into or suffer to exist any transaction or series of related transactions (including, without limitation, the sale, purchase, exchange or lease of assets or property or the rendering of any service) with, or for the benefit of, any Affiliate of the Parent Guarantor or any other Restricted Subsidiary involving aggregate payments or consideration in excess of €5.0 million, unless such transaction or series of transactions is entered into in good faith and:
 - (a) such transaction or series of transactions is on terms that, taken as a whole, are not materially less favorable to the Parent Guarantor or such Restricted Subsidiary, as the case may be, than those that would have been obtained in a comparable transaction at such time on an arm's-length basis with third parties that are not Affiliates;
 - (b) with respect to any transaction or series of related transactions involving aggregate payments or the transfer of assets or the provision of services, in each case having a value greater than €10.0 million, the Parent Guarantor will deliver a resolution adopted by a majority of the members of its or the applicable Restricted Subsidiary's Board of Directors (attached to an Officer's Certificate to the applicable Trustee) resolving that such transaction complies with clause (a) above; and
 - (c) with respect to any transaction or series of related transactions involving aggregate payments or the transfer of assets or the provision of services, in each case having a value greater than €75.0 million, the Parent Guarantor will deliver to the applicable Trustee a written opinion of an Independent Financial Advisor stating that the transaction or series of transactions is fair to the Parent Guarantor or such Restricted Subsidiary from a financial point of view.
- (2) Notwithstanding the foregoing, the restrictions set forth in this description will not apply to:
 - (a) customary directors' fees, indemnities and similar arrangements (including the payment of directors' and officers' insurance premiums), consulting fees, employee compensation, employee and director bonuses, employment agreements and arrangements or employee benefit arrangements, including stock options or legal fees, as determined in good faith by the Parent Guarantor's Board of Directors or senior management;
 - (b) any Restricted Distribution not prohibited by the "*Limitation on Restricted Distributions*" covenant;
 - (c) loans and advances (or guarantees to third party loans, but not any forgiveness of such loans or advances) to directors, officers or employees of the Parent Guarantor or any Restricted Subsidiary made in the ordinary course of business and consistent with the Parent Guarantor's past practices or past practices of the relevant Restricted Subsidiary, as the case may be;
 - (d) agreements and arrangements existing on the Issue Date and any amendment, modification or supplement thereto; *provided* that any such amendment, modification or supplement to the terms thereof is not more disadvantageous to the holders of the Notes in any material respect than the original agreement or arrangement as in effect on the Issue Date;

- (e) the issuance of securities pursuant to, or for the purpose of the funding of, employment arrangements, stock options and stock ownership plans, as long as the terms thereof are or have been previously approved by the Parent Guarantor's or the relevant Restricted Subsidiary's Board of Directors;
- (f) transactions between or among the Parent Guarantor and the Restricted Subsidiaries or between or among Restricted Subsidiaries;
- (g) any transaction between or among: (I) the Parent Guarantor and/or its Restricted Subsidiaries; and (II) any joint venture or Unrestricted Subsidiary (where such joint venture or Unrestricted Subsidiary is an Affiliate solely because the Parent Guarantor and/or its Restricted Subsidiaries owns an equity interest in or otherwise controls such joint venture or Unrestricted Subsidiary): (a) pursuant to the terms of the respective joint venture or other agreements, including but not limited to engineering, procurement and construction contracts, operation and maintenance contracts and other project agreements; (b) in the ordinary course of business in accordance with past practice; (c) pursuant to cash pooling or other similar arrangements; (d) consisting of an Investment; (e) which are fair to the Parent Guarantor or the relevant Restricted Subsidiary, in the reasonable determination of the Board of Directors or senior management of the Parent Guarantor or the Restricted Subsidiary, as applicable; or (f) which is on terms no less favorable than those that could reasonably have been obtained at such time from an unaffiliated Person, in the reasonable determination of the Board of Directors or senior management of the Parent Guarantor or the Restricted Subsidiary, as applicable;
- (h) any issuance of Equity Interests (other than Disqualified Capital Stock) of the Parent Guarantor; and
- (i) the existence of, or the performance by the Parent Guarantor or any of its Restricted Subsidiaries of its obligations under the terms of, any stockholders agreement (including any registration rights agreement or purchase agreement relating thereto) to which it is a party as of the Issue Date and any similar agreements which it may enter into thereafter; *provided, however,* that the existence of, or the performance by the Parent Guarantor or any of its Restricted Subsidiaries of, obligations under any future amendment to any such existing agreement or under any similar agreement entered into after the Issue Date shall only be permitted by this clause (i) to the extent that the terms of any such amendment or new agreement are not disadvantageous to the holders of the Notes in any material respect.

Limitation on Liens

So long as any of the Notes remain outstanding, neither the Parent Guarantor nor the Issuer nor any of the Subsidiary Guarantors will create or permit to subsist, and the Parent Guarantor will ensure that none of its Material Subsidiaries will create or permit to subsist, any mortgage, charge, lien, pledge or other form of encumbrance or security interest (each a "**Security Interest**") upon the whole or any part of its present or future property or assets (including any uncalled capital) to secure any Financial Indebtedness or any guarantee or indemnity in respect of any Financial Indebtedness (other than Permitted Security Interests) unless in any such case, before or at the same time as the creation of the Security Interest, any and all action necessary shall have been taken to ensure that:

- all amounts payable under the Notes are secured equally and ratably with the Financial Indebtedness or such guarantee or indemnity, as the case may be (until such time as such Financial Indebtedness or guarantee or indemnity is no longer secured by a Security Interest); or
- such other Security Interest or guarantee or other arrangement (whether or not including the giving of a Security Interest) is provided in respect of all amounts payable under the Notes as shall be approved by not less than a majority in aggregate principal amount of the Notes then outstanding.

In addition, so long as any of the Notes remain outstanding, neither the Parent Guarantor nor the Issuer nor any of the Subsidiary Guarantors will create or permit to subsist, and the Parent Guarantor will ensure that none of its Subsidiaries will create or permit to subsist a Security Interest upon the whole or any part of the share capital of any Non-Recourse Subsidiary owned by the Parent Guarantor or any of its Subsidiaries to secure any Financial Indebtedness or any guarantee or indemnity in respect of any Financial Indebtedness (other than Permitted Security Interests) unless in any such case, before or at the same time as the creation of the Security Interest, any and all action necessary shall have been taken to ensure that:

- all amounts payable under the Notes are secured equally and ratably with the Financial Indebtedness or such guarantee or indemnity, as the case may be (until such time as such Financial Indebtedness or guarantee or indemnity is no longer secured by a Security Interest); or
- such other Security Interest or guarantee or other arrangement (whether or not including the giving of a Security Interest) is provided in respect of all amounts payable under the Notes as shall be approved by not less than a majority in aggregate principal amount of the Notes then outstanding.

Change of Control

If a Change of Control occurs, each holder of the Notes will have the right to require the Issuer or the Parent Guarantor to repurchase all or any part (being not less than (i), in the case of the U.S. Dollar Notes, \$200,000 or an integral multiple of \$1,000 in excess thereof and (ii), in the case of the Euro Notes, €100,000 or an integral multiple of €1,000 in excess thereof) of that holder's Notes pursuant to a Change of Control Offer on the terms set forth in the respective Indentures. In the Change of Control Offer, the Issuer or the Parent Guarantor will offer a payment in cash equal to 101% of the aggregate principal amount of Notes repurchased, plus accrued and unpaid interest and Additional Amounts, if any, on the Notes repurchased to the date of purchase (the "**Change of Control Payment**"), subject to the rights of holders of Notes on the relevant record date to receive interest due on the relevant Interest Payment Date. Within 30 days following any Change of Control, the Issuer or the Parent Guarantor will mail a notice to each holder of the Notes at such holder of the Note's registered address or otherwise deliver a notice in accordance with the procedures described under "*—Notices,*" stating that a Change of Control Offer is being made and offering to repurchase Notes on the date (the "**Change of Control Payment Date**") specified in the notice, which date will be no earlier than 30 days and no later than 60 days from the date such notice is mailed or delivered, pursuant to the procedures required by each of the Indentures and described in such notice. The Issuer and the Parent Guarantor will comply with the requirements of Rule 14e-1 under the Exchange Act and any other applicable securities laws and regulations to the extent those laws and regulations are applicable in connection with the repurchase of the Notes as a result of a Change of Control Offer. To the extent that the provisions of any securities laws or regulations conflict with the Change of Control provisions of the Indentures, the Issuer and the Parent Guarantor will comply with any applicable securities laws and regulations and will not be deemed to have breached its obligations under the Indenture by virtue of such compliance.

On the Change of Control Payment Date, the Issuer or the Parent Guarantor will, to the extent lawful:

- accept for payment all Notes or portions of Notes properly tendered pursuant to the Change of Control Offer;
- deposit with the Paying Agents an amount equal to the Change of Control Payment in respect of all Notes or portions of Notes properly tendered; and
- deliver or cause to be delivered to the relevant Trustee the Notes of the relevant series properly accepted together with an Officer's Certificate stating the aggregate principal amount of Notes or portions of Notes being purchased by the Issuer or the Parent Guarantor, as the case may be.

The Paying Agents will promptly mail (or cause to be delivered) to each holder of the Notes of the applicable series properly tendered the Change of Control Payment for such Notes, and the Trustees (or its

authenticating agent) will promptly authenticate and mail (or cause to be transferred by book-entry) to each holder of the Notes a new Note equal in principal amount to any unpurchased portion of the Notes surrendered, if any. The Issuer or the Parent Guarantor will publicly announce the results of the Change of Control Offer on or as soon as practicable after the Change of Control Payment Date.

The provisions described above that require the Issuer and the Parent Guarantor to make a Change of Control Offer following a Change of Control will be applicable whether or not any other provisions of the Indenture are applicable. Except as described above with respect to a Change of Control, neither of the Indentures will contain provisions that permit the holders of the Notes to require that the Issuer or the Parent Guarantor repurchase or redeem the respective Notes in the event of a takeover, recapitalization or similar transaction.

Neither the Issuer nor the Parent Guarantor is required to make a Change of Control Offer upon a Change of Control if: (1) a third party makes the Change of Control Offer in the manner, at the times and otherwise in compliance with the requirements set forth in each of the Indentures applicable to a Change of Control Offer made by the Issuer or the Parent Guarantor, as the case may be, and purchases all Notes properly tendered and not withdrawn under the Change of Control Offer; or (2) a notice of redemption has been given pursuant to the Indenture as described above under the caption “—*Optional Redemption*,” unless and until there is a default in payment of the applicable redemption price. Notwithstanding anything to the contrary contained herein, a Change of Control Offer may be made in advance of a Change of Control, conditional upon the consummation of such Change of Control, if a definitive agreement is in place for the Change of Control at the time the Change of Control Offer is made.

The definition of Change of Control includes a phrase relating to the direct or indirect sale, lease, transfer, conveyance or other disposition of “all or substantially all” of the properties or assets of the Parent Guarantor and its Subsidiaries taken as a whole. Although there is a limited body of case law interpreting the phrase “substantially all,” there is no precise established definition of the phrase under applicable law. Accordingly, the ability of a holder of the Notes to require the Issuer and the Parent Guarantor to repurchase its Notes as a result of a sale, lease, transfer, conveyance or other disposition of less than all of the assets of the Parent Guarantor and its Restricted Subsidiaries taken as a whole to another Person or group may be uncertain.

The provisions under each of the Indentures relating to the Issuer’s and the Parent Guarantor’s obligation to make an offer to repurchase the respective Notes as a result of a Change of Control may be waived or modified with the consent of the holders of a majority in principal amount of the Notes.

If at the time of such notice the Notes of either series are listed on the Official List of the Luxembourg Stock Exchange and traded on the Euro MTF Market and the rules of the Luxembourg Stock Exchange so require, the Issuer or the Parent Guarantor, as the case may be, will publish notices relating to the Change of Control Offer in a leading newspaper of general circulation in Luxembourg (which is expected to be the *Luxemburger Wort*), or on the website of the Luxembourg Stock Exchange.

Limitation on Sales of Assets

The Parent Guarantor will not, and will not cause or permit any of its Restricted Subsidiaries to, directly or indirectly, consummate an Asset Sale unless:

- (1) the Parent Guarantor (or the relevant Restricted Subsidiary, as the case may be) receives consideration at the time of the Asset Sale at least equal to the Fair Market Value of the assets or Equity Interests issued or sold or otherwise disposed of;

- (2) at least 75% of the consideration received in the Asset Sale by the Parent Guarantor or such Restricted Subsidiary is in the form of cash or Cash Equivalents. For purposes of this provision, each of the following will be deemed to be cash:
- (a) any liabilities, as recorded on the balance sheet of the Parent Guarantor or any Restricted Subsidiary (other than contingent liabilities), that are assumed by the transferee of any such assets and as a result of which the Parent Guarantor and its Restricted Subsidiaries are no longer obliged with respect to such liabilities or are indemnified against further liabilities;
 - (b) any securities, notes or other obligations received by the Parent Guarantor or any such Restricted Subsidiary from such transferee that are converted by the Parent Guarantor or such Restricted Subsidiary into cash or Cash Equivalents within 90 days following the closing of the Asset Sale, to the extent of the cash or Cash Equivalents received in that conversion;
 - (c) any Capital Stock or assets of the kind referred to in clauses (3)(b) or (d) below;
 - (d) Indebtedness of any Restricted Subsidiary that is no longer a Restricted Subsidiary as a result of such Asset Sale, to the extent that the Parent Guarantor and each other Restricted Subsidiary are released from any Guarantee of such Indebtedness in connection with such Asset Sale;
 - (e) consideration consisting of Indebtedness of the Parent Guarantor or any Guarantor received from persons who are not the Parent Guarantor or any Restricted Subsidiary; and
 - (f) any consideration consisting of Equity Interests in an entity (including a Non-Recourse Subsidiary) engaged in a Permitted Business received in connection with the sale or exchange of an Equity Interest in a Restricted Subsidiary so long as after giving effect to such transaction, the entity in which the Equity Interest has been sold or exchanged remains a Restricted Subsidiary, if the Fair Market Value of such consideration is determined by a reputable investment banking, accounting or appraisal firm that is, in the judgment of the Board of Directors of the Parent Guarantor, qualified to perform the task for which such firm has been engaged and independent with respect to the Parent Guarantor; and
- (3) within 365 days after the receipt of any Net Proceeds from an Asset Sale, the Parent Guarantor (or the applicable Restricted Subsidiary, as the case may be) may apply such Net Proceeds (at the option of the Parent Guarantor or Restricted Subsidiary):
- (a) to purchase the Notes pursuant to an offer to all holders of the Notes at a purchase price equal to 100% of the principal amount thereof, plus accrued and unpaid interest and Additional Amounts, if any, to (but not including) the date of purchase (a "Notes Offer");
 - (b) to acquire all or substantially all of the assets of, or any Capital Stock of another Permitted Business, if, after giving effect to any such acquisition of Capital Stock, the Permitted Business is or becomes a Subsidiary (including a Non-Recourse Subsidiary);
 - (c) to make a capital expenditure;
 - (d) to acquire other assets (other than Capital Stock) not classified as current assets under IFRS-EU that are used or useful in a Permitted Business;
 - (e) to repurchase, prepay, redeem or repay Pari Passu Indebtedness; or
 - (f) enters into a binding commitment to apply the Net Proceeds pursuant to clauses (3)(b), (c) or (d) of this "Limitation on Sales of Assets" covenant; provided that such binding commitment will be treated as a permitted application of the Net Proceeds from the date of such commitment until the earlier of: (x) the date on which such acquisition or expenditure is consummated; and (y) the 180th day following the expiration of the aforementioned 365-day period.

Pending the final application of any Net Proceeds, the Parent Guarantor (or the applicable Restricted Subsidiary) may temporarily reduce revolving credit borrowings or otherwise invest the Net Proceeds in any manner that is not prohibited by the Indentures.

Any Net Proceeds from Asset Sales that are not applied or invested as provided in paragraph (3) above in this "*Limitation of Sales of Assets*" covenant will constitute "Excess Proceeds." When the aggregate amount of Excess Proceeds exceeds €20.0 million, within 10 Business Days thereof, the Issuer or the Parent Guarantor will make an offer (an "*Asset Sale Offer*") to all holders of the Notes and may make an offer to all holders of other Pari Passu Indebtedness to purchase, prepay or redeem with the proceeds of sales of assets to purchase, prepay or redeem the maximum principal amount of Notes and such other Pari Passu Indebtedness (plus all accrued interest on the Indebtedness and the amount of all fees and expenses, including premiums, incurred in connection therewith) that may be purchased, prepaid or redeemed out of the Excess Proceeds. The offer price for the Notes in any Asset Sale Offer will be equal to 100% of the principal amount, plus accrued and unpaid interest and additional amounts, if any, to the date of purchase, prepayment or redemption, subject to the rights of holders of Notes on the relevant record date to receive interest due on the relevant Interest Payment Date, and will be payable in cash. If any Excess Proceeds remain after consummation of an Asset Sale Offer, the Parent Guarantor may use those Excess Proceeds for any purpose not otherwise prohibited by the Indenture. If the aggregate principal amount of Notes and other Pari Passu Indebtedness tendered into (or to be prepaid or redeemed in connection with) such Asset Sale Offer exceeds the amount of Excess Proceeds or if the aggregate amount of the Notes tendered pursuant to a Notes Offer exceeds the amount of the Net Proceeds so applied, such Notes and such other Pari Passu Indebtedness, if applicable, will be purchased on a *pro rata* basis, based on the amounts tendered or required to be prepaid or redeemed. Upon completion of each Asset Sale Offer, the amount of Excess Proceeds will be reset at zero.

Limitation on Dividends and Other Payment Restrictions Affecting Restricted Subsidiaries

- (1) The Parent Guarantor will not, and will not permit any Restricted Subsidiary to, directly or indirectly, create or otherwise cause or suffer to exist or become effective any consensual encumbrance or restriction of any kind on the ability of any Restricted Subsidiary to:
 - (a) pay dividends, in cash or otherwise, or make any other distributions on or in respect of its Capital Stock or any other interest or participation in, or measured by, its profits;
 - (b) pay any Indebtedness owed to the Parent Guarantor or any other Restricted Subsidiary;
 - (c) make loans or advances to the Parent Guarantor or any other Restricted Subsidiary; or
 - (d) transfer any of its properties or assets to the Parent Guarantor or any other Restricted Subsidiary.
- (2) The provisions of this "*Limitation on Dividends and Other Payment Restrictions Affecting Restricted Subsidiaries*" covenant described in paragraph (1) above will not apply to:
 - (a) encumbrances and restrictions imposed by the Notes, the Indentures or the Guarantees;
 - (b) any encumbrance or restriction arising pursuant to an agreement or instrument relating to any Indebtedness permitted to be incurred subsequent to the Issue Date pursuant to the covenant described under "*—Limitation on Indebtedness*" if the encumbrances and restrictions, taken as a whole, are not materially more disadvantageous to the holders of the Notes than is customary in comparable financings (as determined in good faith by the Parent Guarantor's Board of Directors or senior management) and either: (x) the Parent Guarantor's Board of Directors or senior management determines that such encumbrance or restriction will not adversely affect the Parent Guarantor's and the Issuer's ability to make principal and interest payments on the Notes as and when they fall due; or (y) such encumbrances and restrictions

apply only during the continuance of a default in respect of a payment or financial maintenance covenant relating to such Indebtedness;

- (c) any agreement or instrument in effect on the Issue Date;
- (d) with respect to restrictions or encumbrances referred to in clause (1)(d) above, encumbrances and restrictions: (i) that restrict in a customary manner the subletting, assignment or transfer of any properties or assets that are subject to a lease, license, conveyance or other similar agreement to which the Parent Guarantor or any Restricted Subsidiary is a party; and (ii) contained in operating leases for real property and restricting only the transfer of such real property upon the occurrence and during the continuance of a default in the payment of rent;
- (e) encumbrances or restrictions contained in any agreement or other instrument of a Person acquired by the Parent Guarantor or any Restricted Subsidiary in effect at the time of such acquisition (but not created in contemplation thereof), which encumbrance or restriction is not applicable to any Person, or the properties or assets of any Person, other than the Person, or the property or assets of the Person, so acquired;
- (f) encumbrances or restrictions contained in contracts for sales of Capital Stock or assets permitted by the "*Limitation on Sales of Assets*" covenant with respect to the assets or Capital Stock to be sold pursuant to such contract or in customary merger or acquisition agreements (or any option to enter into such contract) for the purchase or acquisition of Capital Stock or assets or any of the Parent Guarantor's Subsidiaries by another Person;
- (g) encumbrances or restrictions imposed by applicable law or regulation or by governmental licenses, concessions, franchises or permits;
- (h) encumbrances or restrictions on cash or other deposits or net worth imposed by customers under contracts entered into the ordinary course of business;
- (i) customary provisions in joint venture agreements and other similar agreements entered into in the ordinary course of business;
- (j) in the case of clause (1)(d) above, customary encumbrances or restrictions in connection with purchase money obligations, mortgage financings and capitalized lease obligations for property acquired in the ordinary course of business;
- (k) any encumbrance or restriction arising by reason of customary non-assignment provisions in agreements;
- (l) customary restrictions on fiduciary cash held by the Parent Guarantor's Restricted Subsidiaries;
- (m) customary provisions contained in leases and other agreements entered into in the ordinary course of business or any Security Interest permitted to be incurred pursuant to the covenant described under "*—Limitation on Liens*";
- (n) customary restrictions contained in project financing arrangements and shareholder agreements; or
- (o) any encumbrance or restriction pursuant to an agreement or instrument effecting a refunding, renewal, replacement or refinancing of Indebtedness incurred pursuant to, or that otherwise extends, renews, refunds, increases, supplements, modifies, refinances or replaces, an agreement, contract, obligation or instrument referred to in clauses (a), (c) or (e) of this paragraph or contained in any amendment, supplement or other modification to an agreement referred to in clauses (a), (c) or (e) of this paragraph; *provided, however*, that the encumbrances and restrictions with respect to such Restricted Subsidiary contained in any such agreement or instrument are not materially less favorable to the holders of the Notes taken as a

whole than the encumbrances and restrictions contained in such agreements and instruments referred to in clauses (a), (c) or (e) of this paragraph (as determined in good faith by the Parent Guarantor).

Reports to Holders of the Notes

- (1) So long as any Notes of either series are outstanding, the Parent Guarantor will furnish to the applicable Trustee:
 - (a) within 120 days after the end of the Parent Guarantor's fiscal year beginning with the fiscal year ended December 31, 2014, audited consolidated statements of income and statements of cash flow of the Parent Guarantor for the most recent two fiscal years and balance sheets as of the two most recent fiscal year-ends prepared in accordance with IFRS-EU, including appropriate footnotes to such financial statements as required under IFRS-EU and the report of the independent auditors on such financial statements;
 - (b) within 150 days after the end of the Parent Guarantor's fiscal year, beginning with the year ending December 31, 2014, the English translation of its annual report as filed with the CNMV (or any successor document under applicable regulation) for such fiscal year or, in the event the Parent Guarantor is no longer required to file an annual report with the CNMV, a report similar in scope to the last such report filed, in either case along with information that is substantially similar in scope to "*Management's Discussion and Analysis of Financial Condition and Results of Operations*" with respect to the two most recent fiscal years; and
 - (c) within 60 days following the end of each of the first three fiscal quarters in each fiscal year of the Parent Guarantor beginning with the fiscal quarter ending March 31, 2014, quarterly financial statements containing the Parent Guarantor's unaudited condensed consolidated balance sheet as of the end of such quarter and unaudited condensed statements of income and cash flow for the most recent quarter year-to-date period ending on the unaudited condensed balance sheet date and the comparable prior period, together with condensed footnote disclosure.
- (2) In addition, each of the Parent Guarantor and the Issuer shall furnish to the holders of the Notes and to prospective investors, upon the request of such holders, any information required to be delivered pursuant to Rule 144A(d)(4) under the U.S. Securities Act for so long as the Notes are not freely transferable under the Exchange Act by Persons who are not "affiliates" under the U.S. Securities Act.
- (3) The Parent Guarantor shall also make available copies of all reports furnished to the applicable Trustee: (a) on the Parent Guarantor's public website (without any requirement for registration, passwords or any similar restriction on access); (b) through the newswire service of Bloomberg, or, if Bloomberg does not then operate, any similar agency; and (c) if and so long as the Notes of either series are listed on the Official List of the Luxembourg Stock Exchange and traded on the Euro MTF Market, at the specified office of the relevant listing agent in Luxembourg.
- (4) Within three Business Days after the delivery of each report referred to in clauses (1)(b) and (c) above, the Parent Guarantor will at its option either: (i) conduct a conference call to discuss such report and answer questions about such report, which conference call will be open to all holders of Notes and prospective investors; or (ii) make itself available for one-on-one calls with holders of Notes and prospective investors. Details of such conference call or one-on-one calls will be included in each such report.

Merger, Consolidation or Sale of Assets

The Parent Guarantor will not directly or indirectly: (1) consolidate or merge with or into another Person (whether or not the Parent Guarantor is the surviving corporation); or (2) sell, assign, transfer, lease, convey or otherwise dispose of all or substantially all of the properties or assets of the Parent Guarantor and its Restricted Subsidiaries taken as a whole in one or more related transactions, to another Person, unless:

- (1) either: (a) the Parent Guarantor is the surviving corporation; or (b) the Person formed by or surviving any such consolidation or merger (if other than the Parent Guarantor) or to which such sale, assignment, transfer, conveyance, lease or other disposition has been made is an entity organized or existing under the laws of any member state of the European Union, Switzerland, Canada, any state of the United States or the District of Columbia;
- (2) the Person formed by or surviving any such consolidation or merger with the Parent Guarantor (if other than the Parent Guarantor) or the Person to which such sale, assignment, transfer, conveyance, lease or other disposition has been made assumes all the obligations of the Parent Guarantor under the Notes and the Indentures;
- (3) immediately after such transaction, no Default or Event of Default exists;
- (4) the Parent Guarantor or the Person formed by or surviving any such consolidation or merger (if other than the Parent Guarantor), or to which such sale, assignment, transfer, conveyance, lease or other disposition has been made would, on the date of such transaction after giving pro forma effect thereto and any related financing transactions as if the same had occurred at the beginning of the applicable two-quarter period: (i) be permitted to incur at least €1.00 of additional Indebtedness pursuant to the Debt Ratio test set forth in the first paragraph of the covenant described above under "*—Limitation on Indebtedness*"; or (ii) have a Debt Ratio no greater than it was immediately prior to giving effect to such transaction; and
- (5) the Parent Guarantor delivers to the applicable Trustee an Officer's Certificate and opinion of counsel, in each case, stating that such consolidation, merger or transfer and such supplemental indenture comply with this covenant.

A Subsidiary Guarantor (other than a Guarantor whose Guarantee is to be released in accordance with the terms of the Guarantee and the Indenture as described under "*—Guarantees*") will not, directly or indirectly: (1) consolidate or merge with or into another Person (whether or not such Subsidiary Guarantor is the surviving corporation); or (2) sell, assign, transfer, lease, convey or otherwise dispose of all or substantially all of the properties or assets of such Subsidiary Guarantor and its Subsidiaries which are Restricted Subsidiaries taken as a whole, in one or more related transactions, to another Person other than the Parent Guarantor or any other Restricted Subsidiary, unless:

- (1) immediately after giving effect to that transaction, no Default or Event of Default exists; and
- (2) either:
 - (a) the Person acquiring the property in any such sale or disposition or the Person formed by or surviving any such consolidation or merger assumes all the obligations of that Subsidiary Guarantor under its Guarantee and the Indenture to which such Subsidiary Guarantor is a party pursuant to a supplemental indenture satisfactory to the applicable Trustee; or
 - (b) the Net Proceeds of such sale or other disposition are applied in accordance with the applicable provisions of the Indentures.

This "*Merger, Consolidation or Sale of Assets*" covenant will not apply to: (a) any consolidation or merger of any Restricted Subsidiary that is not a Guarantor into the Parent Guarantor, the Issuer or any other Guarantor; (b) any consolidation or merger among Guarantors; (c) any consolidation or merger among the Issuer and any Guarantor; *provided* that, if the Issuer is not the surviving entity of such merger or

consolidation, the relevant Guarantor will assume the obligations of the Issuer under the Indentures and the Notes; or (d) any sale, assignment, transfer, conveyance, lease or other disposition of assets among the Parent Guarantor and its Restricted Subsidiaries. Clauses (3) and (4) of the first paragraph and clause (1) of the second paragraph of this "*Merger, Consolidation or Sale of Assets*" covenant will not apply to any merger or consolidation of the Issuer or any Guarantors with or into an Affiliate solely for the purpose of reincorporating the Issuer or such Guarantor in another jurisdiction.

Clauses (3) and (4) of the first paragraph of this "*Merger, Consolidation or Sale of Assets*" covenant will not apply to any sale or other disposition of all or substantially all of the assets or merger or consolidation of the Parent Guarantor with or into any other Guarantor and clause (4) of the first paragraph of this "*Merger, Consolidation or Sale of Assets*" covenant will not apply to any sale or other disposition of all or substantially all of the assets or merger or consolidation of the Parent Guarantor with or into an Affiliate solely for the purpose of reincorporating the Parent Guarantor in another jurisdiction for tax reasons.

Business Activities

The Parent Guarantor will not, and will not permit any of its Restricted Subsidiaries to, engage in any business other than Permitted Businesses, except to the extent that would not be material to the Parent Guarantor and its Restricted Subsidiaries taken as a whole.

Limitation on Issuer Activities

Notwithstanding anything contained in the Indentures to the contrary, the Issuer will not engage in any business activity or undertake any other activity, except any activity: (a) relating to the offering, sale, or issuance of the Notes and any Additional Notes and the servicing, purchase, redemption, refinancing or retirement of the Notes and any Additional Notes, the incurrence of Indebtedness represented by the Notes and the Additional Notes or other Indebtedness (including guarantees) of the Issuer permitted under the Indentures (including the refinancing thereof), lending or otherwise advancing the proceeds thereof to the Parent Guarantor and any other activities in connection therewith; (b) undertaken with the purpose of fulfilling any other obligation under the Notes, the Additional Notes and the Indentures or such other Indebtedness (or guarantees); (c) directly related to the establishment and/or maintenance of the Issuer's corporate existence or otherwise complying with applicable law; or (d) other activities not specifically enumerated above that are *de minimis* in nature.

The Issuer shall not take any action which would cause it to no longer satisfy the requirements of an available exemption from the provisions of the U.S. Investment Company Act of 1940, as amended.

The Issuer shall not issue any Capital Stock other than ordinary shares to the Parent Guarantor or any Restricted Subsidiary that is directly or indirectly wholly-owned by the Parent Guarantor.

The Issuer shall, at all times remain a direct or indirect wholly-owned Restricted Subsidiary of the Parent Guarantor.

Covenant Fall Away

If: (i) a Rating Release Event has occurred; and (ii) no Event of Default has occurred and is continuing, then, beginning on that day, the Parent Guarantor and its Subsidiaries shall be released from their respective obligations under the provisions of this Description of the Notes described under the covenants "*—Limitation on Indebtedness,*" "*—Limitation on Restricted Subsidiary Indebtedness,*" "*—Limitation on Restricted Distributions,*" "*—Limitation on Transactions with Affiliates,*" "*—Change of Control,*" "*—Limitation on Sales of Assets,*" "*—Limitation on Dividends and Other Payment Restrictions Affecting Restricted Subsidiaries,*" and the provisions of clauses (3) and (4) of the first paragraph of the covenant described under "*—Merger, Consolidation or Sale of Assets,*" and such provisions shall permanently cease to have effect. The Parent Guarantor shall promptly give notice to Holders and the applicable Trustee and provide such Trustee with an

Officer's Certificate stating that the conditions set forth in this paragraph have been satisfied, provided that such notification shall not be a condition for the suspension of the covenants described under this caption to be effective.

Events of Default

Each of the following is an "Event of Default":

- (1) default for 30 days in the payment when due of interest or Additional Amounts, if any, with respect to the Notes;
- (2) default in the payment when due (at maturity, upon redemption or otherwise) of the principal of, or premium, if any, on, the Notes;
- (3) failure by the Parent Guarantor, the Issuer or relevant Subsidiary Guarantor to comply with the provisions described under the covenant "*—Merger, Consolidation or Sale of Assets*";
- (4) failure by the Parent Guarantor or relevant Subsidiary Guarantor for 60 days after written notice to the Issuer by the applicable Trustee or the holders of at least 25% in aggregate principal amount of the relevant series of Notes then outstanding voting as a single class to comply with any of the agreements or covenants in the Indenture (other than a default in performance, or breach, or a covenant or agreement which is specifically dealt with in clauses (1), (2) or (3) above);
- (5) default under any mortgage, indenture or instrument under which there may be issued or by which there may be secured or evidenced any Indebtedness for money borrowed by the Parent Guarantor, the Issuer or any Material Subsidiary (or the payment of which is guaranteed by the Parent Guarantor, the Issuer or any Material Subsidiary), whether such Indebtedness or Guarantee now exists, or is created after the Issue Date, if that default:
 - (a) is caused by a failure to pay principal of such Indebtedness at the Stated Maturity thereof prior to the expiration of the grace period provided in such Indebtedness on the date of such default (a "*Payment Default*"); or
 - (b) results in the acceleration of such Indebtedness prior to its express maturity, and, in each case, the principal amount of any such Indebtedness, together with the principal amount of any such Indebtedness under which there has been a Payment Default or the maturity of which has been so accelerated, aggregates €30.0 million or more;
- (6) failure by the Parent Guarantor, the Issuer or any Material Subsidiary to pay final judgments entered by a court or courts of competent jurisdiction aggregating in excess of €30.0 million (exclusive of any amounts that a solvent insurance company has acknowledged liability for), which judgments shall not have been discharged or waived and there shall have been a period of 60 consecutive days during which a stay of enforcement of such judgment or order, by reason of an appeal, waiver or otherwise, shall not have been in effect;
- (7) except as permitted by the Indentures (including with respect to any limitations), any Guarantee of the Parent Guarantor or any Material Subsidiary that is a Guarantor is held in any judicial proceeding to be unenforceable or invalid or ceases for any reason to be in full force and effect, or any such Guarantor, or any Person acting on behalf of any such Guarantor, denies or disaffirms its obligations under its Guarantee; and
- (8) certain events of bankruptcy or insolvency described in the Indentures with respect to the Parent Guarantor, the Issuer or any Material Subsidiary.

In the case of an Event of Default arising from certain events of bankruptcy or insolvency, with respect to the Issuer, the Parent Guarantor or any Material Subsidiary, all outstanding Notes will become due and

payable immediately without further action or notice. If any other Event of Default occurs and is continuing, the relevant Trustee or the holders of at least 25% in aggregate principal amount of either series of the then outstanding Notes may declare all the Notes of such series to be due and payable immediately by notice in writing to the Issuer and such Trustee specifying the respective Event of Default and that it is a notice of acceleration.

Subject to certain limitations, holders of a majority in aggregate principal amount of either series of the then outstanding Notes may direct the relevant Trustee in its exercise of any trust or power. The relevant Trustee may withhold from holders of the Notes notice of any continuing Default or Event of Default if it determines that withholding notice is in their interest, except a Default or Event of Default relating to the payment of principal, interest or Additional Amounts or premium, if any.

Subject to the provisions of the Indentures relating to the duties of the relevant Trustee, in case an Event of Default occurs and is continuing, that Trustee will be under no obligation to exercise any of the rights or powers under the applicable Indenture at the request or direction of any holders of the Notes unless such holders of the Notes have offered to that Trustee indemnity and/or security satisfactory to it (including by way of pre-funding) against any loss, liability or expense. Except (subject to the provisions described under “—Amendments, Supplements and Waivers”) to enforce the right to receive payment of principal, premium, if any, or interest or Additional Amounts when due, no holder of a Note may pursue any remedy with respect to the relevant Indenture or the relevant series of Notes unless:

- (1) such holder of the Notes has previously given the relevant Trustee notice that an Event of Default is continuing;
- (2) holders of the Notes of at least 25% in aggregate principal amount of the then outstanding Notes of such series have requested the relevant Trustee to pursue the remedy;
- (3) such holders of the Notes have offered the relevant Trustee security and/or indemnity satisfactory to it (including by way of pre-funding) against any loss, liability or expense;
- (4) the relevant Trustee has not complied with such request within 60 days after the receipt of the request and the offer of security and/or indemnity; and
- (5) holders of a majority in aggregate principal amount of the then outstanding Notes of such series have not given the relevant Trustee a direction inconsistent with such request within such 60-day period.

The holders of not less than a majority in aggregate principal amount of the Notes outstanding may, on behalf of the holders of all outstanding Notes of either series, waive any past default under the relevant Indenture and its consequences, except a continuing default in the payment of the principal of premium, if any, any Additional Amounts or interest on any Note held by a non-consenting holder.

The Parent Guarantor is required to deliver to the relevant Trustee annually a statement regarding compliance with the relevant Indenture.

Defeasance

- (1) The Indentures provide that the Issuer and the Parent Guarantor may, at their option and at any time prior to the Stated Maturity of the Notes of either series, elect to have the obligations of the Issuer, the Parent Guarantor and the Subsidiary Guarantors discharged with respect to the outstanding Notes of such series and all obligations of any Guarantor discharged with respect to its Guarantee (“*Legal Defeasance*”), except as to:
 - (a) the rights of holders of the outstanding Notes of such series to receive payments in respect of the principal of, premium, if any, Additional Amounts and interest on, such Notes when such payments are due from the trust account referred to below;

- (b) the Issuer's obligations to issue temporary Notes of the applicable series, register, transfer or exchange any Notes of the applicable series, replace mutilated, destroyed, lost or stolen Notes, maintain an office or agency for payments in respect of the Notes of the applicable series and segregate and hold such payments in trust;
 - (c) the rights, powers, trusts, duties and immunities and indemnifications of the applicable Trustee and the other Agents in respect of such series of Notes and the obligations of the Issuer, the Parent Guarantor and the Subsidiary Guarantors in connection therewith; and
 - (d) the Legal Defeasance provisions of the Indentures.
- (2) In addition, the Issuer and the Parent Guarantor may, at their option and at any time, elect to have the obligations of the Issuer, the Parent Guarantor and the Subsidiary Guarantors released with respect to certain covenants set forth in the Indentures ("*Covenant Defeasance*") and thereafter any failure to comply with such covenants will not constitute a Default or an Event of Default with respect to the Notes. In the event that a Covenant Defeasance occurs, certain events described under "*—Events of Default*" will no longer constitute an Event of Default with respect to the Notes. These events will not include events relating to non-payment, bankruptcy, insolvency, receivership and reorganization. The Issuer and the Parent Guarantor may exercise their Legal Defeasance option regardless of whether it has previously exercised any Covenant Defeasance. If the Issuer or the Parent Guarantor exercises its Legal Defeasance or Covenant Defeasance option, each Subsidiary Guarantor will be released from its obligations with respect to its Guarantee.
- (3) In order to exercise either Legal Defeasance or Covenant Defeasance:
- (a) the Issuer or the Parent Guarantor must irrevocably deposit or cause to be deposited in trust with the relevant Trustee (or such other entity designated by it for this purpose), for the benefit of the holders of the Notes of the applicable series, cash in euros for the Euro Notes, U.S. dollars for the U.S. Dollar Notes, German Government Securities for the Euro Notes, U.S. Government Securities for the U.S. Dollar Notes or a combination thereof in each case matching the currency of the applicable series of Notes, in such amounts as will be sufficient, in the opinion of an internationally recognized firm of independent public accountants, to pay and discharge the principal of, premium, if any, Additional Amounts and interest, on the outstanding Notes of the applicable series on the Stated Maturity or on the applicable redemption date, as the case may be, and the Issuer or the Parent Guarantor must: (i) specify whether the Notes are being defeased to maturity or to a particular redemption date; and (ii) if applicable, have delivered to the relevant Trustee an irrevocable notice to redeem all of the outstanding Notes;
 - (b) in the case of Legal Defeasance, the Issuer or the Parent Guarantor must have delivered to the relevant Trustee an opinion of counsel reasonably acceptable to the relevant Trustee stating that: (x) the Issuer has received from, or there has been published by, the U.S. Internal Revenue Service a ruling; or (y) since the Issue Date, there has been a change in applicable U.S. federal income tax law, in either case to the effect that (and based thereon such opinion shall confirm that) the beneficial owners of the outstanding Notes of the applicable series will not recognize income, gain or loss for U.S. federal income tax purposes as a result of such Legal Defeasance and will be subject to U.S. federal income tax on the same amounts, in the same manner and at the same times as would have been the case if such Legal Defeasance had not occurred;
 - (c) in the case of Covenant Defeasance, the Issuer or the Parent Guarantor must deliver to the relevant Trustee an opinion of counsel reasonably acceptable to the relevant Trustee to the effect that the beneficial owners of the outstanding Notes of the applicable series will not recognize income, gain or loss for U.S. federal income tax purposes as a result of such Covenant Defeasance and will be subject to U.S. federal income tax on the same amounts, in

the same manner and at the same times as would have been the case if such Covenant Defeasance had not occurred;

- (d) the Issuer or the Parent Guarantor must have delivered to the relevant Trustee an Officer's Certificate stating that the deposit was not made by the Issuer or the Parent Guarantor with the intent of preferring the holders of the Notes of the applicable series over the other creditors of the Issuer or the Parent Guarantor with the intent of defeating, hindering, delaying or defrauding creditors of the Issuer or the Parent Guarantor or other creditors, or removing assets beyond the reach of the relevant creditors or increasing debts of the Issuer or the Parent Guarantor to the detriment of the relevant creditors; and
 - (e) the Issuer or the Parent Guarantor must have delivered to the relevant Trustee an Officer's Certificate and an opinion of counsel, each stating that all conditions precedent provided for relating to the Legal Defeasance or the Covenant Defeasance, as the case may be, have been complied with.
- (4) If the funds deposited with the relevant Trustee to effect Covenant Defeasance are insufficient to pay the principal of, premium, if any, Additional Amounts and interest on the Notes of the applicable series when due because of any acceleration occurring after an Event of Default, then the Issuer and the Guarantors will remain liable for such payments.

Satisfaction and Discharge

The Indentures will be discharged and will cease to be of further effect (except as to surviving rights of registration of transfer or exchange of the Notes and any indemnities as expressly provided for in the Indenture) when:

- (1) the Issuer or the Parent Guarantor has irrevocably deposited or caused to be deposited with the relevant Trustee (or such other entity designated by it for this purpose) as funds on trust for such purpose an amount in euros for the Euro Notes, U.S. dollars for the U.S. Dollar Notes, German Government Securities for the Euro Notes, U.S. Government Securities for the U.S. Dollar Notes or a combination thereof in each case matching the currency of the applicable series of the Notes, sufficient to pay and discharge the entire Indebtedness on such Notes that have not, prior to such time, been delivered to the relevant Trustee for cancellation, for principal of, premium, if any, and any Additional Amounts and accrued and unpaid interest on the Notes to the date of such deposit (in the case of Notes which have become due and payable) or to the Stated Maturity or redemption date, as the case may be, and the Issuer or the Parent Guarantor has delivered irrevocable instructions to the relevant Trustee under the Indentures to apply the deposited money toward the payment of Notes at Stated Maturity or on the redemption date, as the case may be and either:
 - (a) all of the Notes that have been authenticated and delivered (other than destroyed, lost or stolen Notes that have been replaced or paid and Notes for which payment money has been deposited on trust or segregated and held on trust by the Issuer and thereafter repaid to the Issuer or discharged from such trust as provided for in the Indenture) have been delivered to the relevant Trustee for cancellation; or
 - (b) all Notes that have not been delivered to the relevant Trustee for cancellation: (x) have become due and payable (by reason of the mailing of a notice of redemption or otherwise); (y) will become due and payable within one year of Stated Maturity; or (z) are to be called for redemption within one year of the proposed discharge date under arrangements satisfactory to the relevant Trustee for the giving of notice of redemption by the relevant Paying Agent in the Issuer's name and at the Issuer's expense;
- (2) the Issuer or any Guarantor has paid or caused to be paid all sums payable by it under the Indentures; and

- (3) the Issuer or the Parent Guarantor has delivered to the relevant Trustee an Officer's Certificate and an opinion of counsel, each stating that all conditions precedent provided in the Indentures relating to the satisfaction and discharge of that Indenture have been satisfied.

Amendments, Supplements and Waivers

- (1) With the consent of the holders of not less than a majority in aggregate principal amount of the Notes then outstanding, the Issuer, the Guarantors and the relevant Trustee are permitted to amend or supplement the respective Indentures (including, without limitation, consents obtained in connection with a purchase of, or tender offer or exchange offer for, the Notes of the applicable series); *provided* that no such modification or amendment may, without the consent of the holders of 90% of the then outstanding Notes (with respect to any Notes held by a non-consenting holder):
 - (a) change the Stated Maturity of the principal of, or any installment of or Additional Amounts or interest on, any Note (or change any Default or Event of Default related thereto);
 - (b) reduce the principal amount of any Note (or Additional Amounts or premium, if any) or the rate of, or change the time for payment of interest on, any Note (or change any Default or Event of Default related thereto) or make any change in the provisions of the Indenture relating to waivers of past Defaults;
 - (c) change the coin or currency in which the principal of any Note or any premium or any Additional Amounts or the interest thereon is payable;
 - (d) impair the right to institute suit for the enforcement of any payment of any Note in accordance with the provisions of such Note and the Indenture relating to such Notes;
 - (e) reduce the principal amount of Notes whose holders must consent to any amendment, supplement or waiver of provisions of the Indenture relating to such Notes;
 - (f) waive a Default or Event of Default in the payment of principal of, or interest, Additional Amounts or premium, if any, on the Notes (except a rescission of acceleration of the Notes by the holders of at least a majority in aggregate principal amount of the then outstanding Notes and a waiver of the Default with respect to that resulted from such acceleration); or
 - (g) release any Guarantor from any of their obligations under their respective Guarantees except in compliance with the terms of the Indentures.
- (2) Notwithstanding the foregoing, without the consent of any holder of the Notes, the Issuer, the Guarantors and the relevant Trustee may modify, amend or supplement the Indentures:
 - (a) to evidence the succession of another Person to the Issuer or a Guarantor and the assumption by any such successor of the covenants in the Indentures and in the Notes or in respect of a Guarantor's Guarantee in accordance with the covenant "*—Certain Covenants—Merger, Consolidation or Sale of Assets*";
 - (b) to add to the Issuer's covenants and those of any Guarantor or any other obligor in respect of the Notes for the benefit of the holders of the Notes or to surrender any right or power conferred upon the Issuer or any Guarantor or any other obligor in respect of the Notes, as applicable, in the Indentures, the Notes or any Guarantee or that does not adversely affect the legal rights under the Indentures of any such holder of the Notes in any material respect;
 - (c) to cure any ambiguity, or to correct or supplement any provision in the Indentures, the Notes or any Guarantee that may be defective or inconsistent with any other provision in the Indentures, the Notes or any Guarantee or make any other provisions with respect to matters or questions arising under the Indentures, the Notes or any Guarantee; *provided* such actions shall not adversely affect the interests of the holders;

- (d) to conform the text of the Indentures, the Notes or any Guarantee to any provision of this Description of the Notes to the extent that such provision in this Description of the Notes was intended to be a verbatim recitation of a provision of the Indentures, the Notes or any Guarantee;
- (e) to release any Guarantor in accordance with (and if permitted by) the terms of the Indentures;
- (f) to add a Guarantor under the Indentures;
- (g) to evidence and provide the acceptance of the appointment of a successor Trustee under the Indentures;
- (h) to mortgage, pledge, hypothecate or grant a security interest in favor of the Trustee for the benefit of the holders of the Notes as security for the payment and performance of the Issuer's and any Guarantor's obligations under the Indentures, in any property, or assets, including any of which are required to be mortgaged, pledged or hypothecated, or in which a security interest is required to be granted to the Trustee pursuant to the Indenture or otherwise;
- (i) to provide for uncertificated Notes in addition to or in place of certificated Notes; or
- (j) to provide for the issuance of Additional Notes in accordance with and if permitted by the terms of and limitations set forth in the Indentures.

The Issuer shall deliver an Officer's Certificate and an opinion of Counsel regarding the foregoing, and in formulating its decision on such matters, the Trustee may require such further evidence as it deems appropriate and may rely on such Officer's Certificate, opinion of counsel and any such further information.

- (3) The holders of a majority in aggregate principal amount of the Notes outstanding may waive compliance with certain restrictive covenants and provisions of the Indenture.

Spanish corporate law

As a consequence of the Notes and the Indentures being governed by New York law, a holder of the Notes: (i) will not benefit from the constitution of a Spanish syndicate of holders (*sindicato de obligacionistas*) and the appointment of a commissioner (*comisario*); and (ii) will be deemed to have agreed with the foregoing and have irrevocably instructed the Trustee to take any action and/or to sign or execute and deliver any documents or notices that may be necessary or desirable to comply with and give effect to (i) above. Notwithstanding the foregoing, the effectiveness of certain amendments, consents, waivers or other actions of the holders of the Notes taken pursuant to the Indenture or the lack of a syndicate of holders or of an express appointment of a commissioner may be challenged under Spanish law. See "*Risk Factors—Risks Related to the Notes—There exist certain risks relating to certain provisions of the Indenture and Spanish Law.*"

Currency Indemnity

U.S. Dollars are the sole currency of account and payment for all sums payable under the U.S. Dollar Notes, the Guarantees relating the U.S. Dollar Notes and the U.S. Dollar Indenture and Euro is the sole currency of account and payment for all sums payable under the Euro Notes, the Guarantees relating to the Euro Notes and the Euro Indenture. Any amount received or recovered in respect of the Notes or the Guarantees in a currency other than euro or U.S. dollars, as the case may be (whether as a result of, or of the enforcement of, a judgment or order of a court of any jurisdiction, in the winding up or dissolution of the Issuer, any Subsidiary or otherwise) by a holder of the Notes in respect of any sum expressed to be due to such holder from the Issuer or the Guarantors will constitute a discharge of their obligation only to the extent of the euro or U.S. dollar amount (as the case may be) which the recipient is able to purchase with the amount so received or recovered in such other currency on the date of that receipt or recovery (or, if it is not possible to

purchase euros or U.S. dollars (as the case may be) on that date, on the first date on which it is possible to do so). If the euro or U.S. dollar amount (as the case may be) that could be recovered following such a purchase is less than the euro or U.S. dollar amount (as the case may be) expressed to be due to the recipient under any Note, the Issuer and the Guarantors will jointly and severally indemnify the recipient against the cost of the recipient's making a further purchase of euros or U.S. dollars (as the case may be) in an amount equal to such difference. For the purposes of this paragraph, it will be sufficient for the holder of the Notes to certify that it would have suffered a loss had the actual purchase of euros or U.S. dollars (as the case may be) been made with the amount so received in that other currency on the date of receipt or recovery (or, if a purchase of euros or U.S. dollars (as the case may be) on that date had not been possible, on the first date on which it would have been possible). These indemnities, to the extent permitted by law:

- constitute a separate and independent obligation from the Issuer's and the Guarantors' other obligations;
- give rise to a separate and independent cause of action;
- apply irrespective of any waiver granted by any holder of the Notes; and
- will continue in full force and effect despite any other judgment, order, claim or proof for a liquidated amount in respect of any sum due under any Note or any other judgment or order.

Notices

Notices regarding the Notes are:

- published: (i) if and for as long as the relevant series of Notes are listed on the Official List of the Luxembourg Stock Exchange and traded on the Euro MTF Market and the rules of the Luxembourg Stock Exchange so require in a newspaper having general circulation in Luxembourg (which is expected to be the *Luxemburger Wort*) (ii) through the newswire service of Bloomberg or, if Bloomberg does not then operate, any similar agency; and (iii) may also be published on the website of the Luxembourg Stock Exchange (www.bourse.lu); and
- in the case of certificated Notes, mailed to holders of such Notes by first-class mail at their respective addresses as they appear on the registration books of the applicable Registrar.

Notices given by first-class mail will be deemed given five calendar days after mailing (whether or not the addressee receives it) and notices given by publication will be deemed given on the first date on which publication is made.

If and so long as the Notes of either series are listed on any other securities exchange, notices will also be given in accordance with any applicable requirements of such securities exchange.

No Personal Liability of Directors, Officers, Employees and Stockholders

No director, officer, employee, incorporator or stockholder of the Issuer or any Guarantor, as such, will have any liability for any obligations of the Issuer or the Guarantors under the Notes, the Indentures, the Guarantees relating to the Notes or for any claim based on, in respect of, or by reason of, such obligations or their creation. Each holder of the Notes by accepting a Note will waive and release all such liability. The waiver and release will be part of the consideration for issuance of the Notes. The waiver may not be effective to waive liabilities under U.S. federal securities laws.

The Trustees

The Indentures contain provisions for the indemnification of the applicable Trustee and the relevant Agents and for their relief from responsibility, including provisions relieving it from taking action unless indemnified and/or secured to its satisfaction.

Governing Law

The Indentures, the Notes and the Guarantees relating to the Notes are governed by and construed in accordance with the laws of the State of New York.

Consent to Jurisdiction and Service of Process

The Indentures provide that the Issuer and each Guarantor will appoint Corporation Service Company as its agent for service of process in any suit, action or proceeding with respect to the Indentures, the Notes and the Guarantees relating to the Notes (as the case may be) brought in any federal or state court located in the City of New York and will submit to such jurisdiction.

Enforceability of Judgments

Since a substantial portion of the assets of the Issuer and the Guarantors are outside the United States, any judgment obtained in the United States against the Issuer or any Guarantor may not be collectable within the United States.

Prescription

Claims against the Issuer or any Guarantor for the payment of principal, interest or Additional Amounts, if any, on the Notes shall be prescribed and become void ten years (in the case of principal) or five years (in the case of interest, premium, if any, or Additional Amounts, if any) from the applicable due date in respect of such payment and thereafter any principal, interest, premium, if any, or Additional Amounts, if any, shall be forfeited and revert to the Issuer.

Certain Definitions

Set forth below are certain defined terms used in the Indentures. Reference is made to the Indentures for a full description of all defined terms used therein, as well as any other capitalized terms used herein for which no definition is provided.

"Affiliate" means, with respect to any specified Person any other Person directly or indirectly controlling or controlled by or under direct or indirect common control with such specified Person.

For the purposes of this definition, *"control,"* when used with respect to any specified Person, means the power to direct or cause the direction of the management and policies of such Person, directly or indirectly, whether through the ownership of voting securities, by contract or otherwise; and the terms *"controlling"* and *"controlled"* have meanings correlative to the foregoing.

"Asset Sale" means:

- (a) the sale, lease, conveyance or other disposition of any assets by the Parent Guarantor or any of its Restricted Subsidiaries; *provided, however,* that the sale, lease, transfer, conveyance or other disposition of all or substantially all of the assets of the Parent Guarantor and its Subsidiaries taken as a whole will be governed by the provisions described under *"—Certain Covenants—Change of Control"* and/or the provisions described under *"—Certain Covenants—Merger, Consolidation or Sale of Assets"* and not by the provisions described under *"—Certain Covenants—Limitation on Sales of Assets"*; and
- (b) the issuance of Equity Interests by any Restricted Subsidiary or the sale by the Parent Guarantor or any of its Restricted Subsidiaries of Equity Interests in any of the Restricted Subsidiaries (in each case, other than directors' qualifying shares).

Notwithstanding the preceding, none of the following items will be deemed to be an Asset Sale:

- (i) any single transaction or series of related transactions that involves assets having a Fair Market Value of less than €10.0 million;
- (ii) a transfer of assets or Equity Interests between or among the Parent Guarantor and any Restricted Subsidiary;
- (iii) an issuance of Equity Interests by a Restricted Subsidiary to the Parent Guarantor or to a Restricted Subsidiary;
- (iv) the sale, lease or other transfer of accounts receivable, inventory or other assets in the ordinary course of business and any sale or other disposition of damaged, worn-out or obsolete assets or assets that are no longer useful in the conduct of the business of the Parent Guarantor and its Restricted Subsidiaries;
- (v) licenses and sublicenses by the Parent Guarantor or any of its Restricted Subsidiaries in the ordinary course of business;
- (vi) any surrender or waiver of contract rights or settlement, release, recovery on or surrender of contract, tort or other claims in the ordinary course of business;
- (vii) the granting of a Security Interest not prohibited by the "*Limitation on Liens*" covenant;
- (viii) the sale or other disposition of cash or Cash Equivalents;
- (ix) the disposition of receivables in connection with the compromise, settlement or collection thereof in the ordinary course of business or in bankruptcy or similar proceedings;
- (x) the foreclosure, condemnation or any similar action with respect to any property or other assets or a surrender or waiver of contract rights or the settlement, release or surrender of contract, tort or other claims of any kind;
- (xi) the disposition of assets to a person who is providing services (the provision of which have been or are to be outsourced by the Parent Guarantor or any Subsidiary to such person) related to such assets;
- (xii) the disposition of assets carried out in the ordinary course of business of the Parent Guarantor or its Restricted Subsidiaries; and
- (xiii) swaps of assets for other similar assets or assets whose value is greater in terms of type, value and quality, than the assets being swapped.

"*Available Marketable Securities*" means: (i) any financial investments and cash equivalent instruments as set forth in the Parent Guarantor's consolidated financial statements; and (ii) any shares of companies listed on any stock exchange and any short-term debt securities, in each case not issued by the Parent Guarantor or a Subsidiary and, in each case, valued at their book value, but excluding any investments, instruments, shares or debt securities deposited in the reserve accounts for the service of debt of Non-Recourse Subsidiaries.

"*Board of Directors*" means:

- (a) with respect to any corporation, the board of directors or managers of the corporation (which, in the case of any corporation having both a supervisory board and an executive or management board, shall be the executive or management board) or any duly authorized committee thereof;
- (b) with respect to any partnership, the board of directors of the general partner of the partnership or any duly authorized committee thereof;
- (c) with respect to a limited liability company, the managing member (or, in the case of a company incorporated under the laws of England and Wales, the managing director) or members (or, in the

case of a company incorporated under the laws of England and Wales, the managing directors) (or analogous governing body) or any controlling committee of managing members (or, in the case of a company incorporated under the laws of England and Wales, any controlling committee of managing directors) thereof; and

- (d) with respect to any other Person, the board or any duly authorized committee thereof or committee of such Person serving a similar function.

"Bund Rate" means, with respect to any relevant date, the rate per annum equal to the equivalent yield to maturity as of such date of the Comparable German Bund Issue, assuming a price for the Comparable German Bund Issue (expressed as a percentage of its principal amount) equal to the Comparable German Bund Price for such relevant date, where:

- (a) *"Comparable German Bund Issue"* means the German Bundesanleihe security selected by any Reference German Bund Dealer as having a fixed maturity most nearly equal to the period from such redemption date to October 1, 2019, and that would be utilized, at the time of selection and in accordance with customary financial practice, in pricing new issues of euro denominated corporate debt securities in a principal amount approximately equal to the then outstanding principal amount of the Notes and of a maturity most nearly equal to October 1, 2019, *provided, however,* that, if the period from such redemption date to October 1, 2019 is less than one year, a fixed maturity of one year shall be used;
- (b) *"Comparable German Bund Price"* means, with respect to any relevant date, the average of all Reference German Bund Dealer Quotations for such date (which, in any event, must include at least two such quotations), after excluding the highest and lowest of such Reference German Bund Dealer Quotations, or if the Issuer obtains fewer than four such Reference German Bund Dealer Quotations, the average of all such quotations;
- (c) *"Reference German Bund Dealer"* means any dealer of German Bundesanleihe securities appointed by the Issuer in good faith; and
- (d) *"Reference German Bund Dealer Quotations"* means, with respect to each Reference German Bund Dealer and any relevant date, the average as determined by the Issuer of the bid and offered prices for the Comparable German Bund Issue (expressed in each case as a percentage of its principal amount) quoted in writing to the Issuer by such Reference German Bund Dealer at 3:30 p.m. Frankfurt, German time on the third Business Day preceding the relevant date."

"Business Day" means a day other than a Saturday, Sunday or other day on which banking institutions in Madrid, London, New York or a place of payment under the relevant Indenture are authorized or required by law to close and, in relation to a transaction involving euros, any TARGET day.

"Capital Stock" means:

- (a) in the case of a corporation or company, corporate stock or shares;
- (b) in the case of an association or business entity, any and all shares, interests, participations, rights or other equivalents (however designated) of corporate stock;
- (c) in the case of a partnership or limited liability company, partnership interests (whether general or limited) or membership interests; and
- (d) any other interest or participation that confers on a person the right to receive a share of the profits and losses of, or distributions of assets of, the issuing person, but excluding from all of the foregoing any debt securities convertible into Capital Stock, whether or not such debt securities include any right of participation with Capital Stock.

"Cash Equivalents" means:

- (a) direct obligations (or certificates representing an interest in such obligations) issued by, or unconditionally guaranteed by, the government of a member state of the European Union, the United States of America, Switzerland or Canada (including, in each case, any agency or instrumentality thereof), as the case may be, the payment of which is backed by the full faith and credit of the relevant member state of the European Union or the United States of America, Switzerland or Canada, as the case may be, and which are not callable or redeemable at the Parent Guarantor's option;
- (b) overnight bank deposits, time deposit accounts, certificates of deposit, banker's acceptances and money market deposits with maturities (and similar instruments) of 12 months or less from the date of acquisition issued by a bank or trust company which is organized under, or authorized to operate as a bank or trust company under, the laws of a member state of the European Union or of the United States of America or any state thereof, Switzerland or Canada; *provided* that such bank or trust company has capital, surplus and undivided profits aggregating in excess of €250,000,000 (or the foreign currency equivalent thereof as of the date of such investment) and whose long-term debt is rated A1 or higher by Moody's or A+ or higher by S&P or the equivalent rating category or another internationally recognized rating agency;
- (c) repurchase obligations with a term of not more than 30 days for underlying securities of the types described in paragraphs (i) and (ii) above entered into with any financial institution meeting the qualifications specified in paragraph (ii) above;
- (d) commercial paper having one of the two highest ratings obtainable from Moody's or S&P and, in each case, maturing within one year after the date of acquisition; and
- (e) money market funds at least 95% of the assets of which constitute Cash Equivalents of the kinds described in paragraphs (i) through (iv) of this definition.

A *"Change of Control"* means: (a) any person or group of persons acting in concert, in each case other than a Relevant Person, acquiring or controlling: (i) more than 50% of the Voting Rights; or (ii) the right to appoint and/or remove all or the majority of the members of the Parent Guarantor's Board of Directors or other governing body, in each case whether obtained directly or indirectly, and whether obtained by ownership of share capital, the possession of Voting Rights, contract or otherwise; or (b) the direct or indirect sale, lease, transfer, conveyance or other disposition (other than by way of merger or consolidation) in one or a series of related transactions, of all or substantially all of the properties or assets of the Parent Guarantor and its Subsidiaries taken as a whole to any person or group of persons acting in concert.

"Change of Control Offer" has the meaning assigned to that term in the Indentures.

"Commission" means the U.S. Securities and Exchange Commission.

"Consolidated EBITDA" means, the aggregate EBITDA of the Parent Guarantor and its Subsidiaries that are not Non-Recourse Subsidiaries.

"Consolidated Net Income" means, in relation to any specified person for any period, the consolidated profit after tax from continuing operations of such person for such period, on a consolidated basis, determined in accordance with IFRS-EU.

"control" means, unless otherwise provided herein: (a) the acquisition or control of more than 50% of the Voting Rights; or (b) the right to appoint and/or remove all or the majority of the members of the Parent Guarantor's Board of Directors or other governing body, whether obtained directly or indirectly, and whether obtained by ownership of share capital, the possession of Voting Rights, contract or otherwise and *"controlled"* shall be construed accordingly.

“*Debt Ratio*” means, as of any date of determination, the ratio of: (x) the aggregate amount of the Net Financial Debt of the Parent Guarantor and its Subsidiaries for the most recent balance sheet for which financial statements are in existence; to (y) the aggregate amount of the Consolidated EBITDA of the Parent Guarantor for the Testing Period preceding such balance sheet date.

“*Default*” means any event that is, or with the passage of time or the giving of notice or both would be, an Event of Default.

“*Disqualified Stock*” means any Capital Stock that, by its terms (or by the terms of any security into which it is convertible, or for which it is exchangeable, in each case, at the option of the holder of the Capital Stock), or upon the happening of any event, matures or is mandatorily redeemable, pursuant to a sinking fund obligation or otherwise, or redeemable at the option of the holder of the Capital Stock, in whole or in part, on or prior to the six month anniversary of the date that the Notes mature. Notwithstanding the preceding sentence, any Capital Stock that would constitute Disqualified Stock solely because the holders of the Capital Stock have the right to require the issuer thereof to repurchase such Capital Stock upon the occurrence of a Change of Control or an Asset Sale will not constitute Disqualified Stock if the terms of such Capital Stock provide that the issuer thereof may not repurchase or redeem any such Capital Stock pursuant to such provisions unless such repurchase or redemption complies with the “*Limitation on Indebtedness*” covenant. For purposes hereof, the amount of Disqualified Stock which does not have a fixed repurchase price shall be calculated in accordance with the terms of such Disqualified Stock as if such Disqualified Stock were purchased on any date on which Indebtedness shall be required to be determined pursuant to the “*Limitation on Indebtedness*” covenant, and if such price is based upon, or measured by, the Fair Market Value of such Disqualified Stock, such Fair Market Value to be determined as set forth herein.

“*EBITDA*” means:

- (a) in relation to the Parent Guarantor for any relevant period, the consolidated operating profit (loss) (*resultado de explotación*), after adding back research and development costs and depreciation and amortization expense of the Parent Guarantor and its Subsidiaries; and
- (b) in relation to any Subsidiary of the Parent Guarantor for any relevant period, the consolidated operating profit (loss) (*resultado de explotación*), after adding back research and development costs and depreciation and amortization expense of such Subsidiary (consolidated in the case of a Subsidiary that prepares consolidated accounts),

in each case as derived from the relevant accounts or financial statements of the relevant entity in respect of such period.

“*Equity Interests*” means Capital Stock and all warrants, options or other rights to acquire Capital Stock (but excluding any debt security that is convertible into, or exchangeable for, Capital Stock).

“*euro*” or “*€*” means the lawful currency of the member states of the European Union that participate in the third stage of the European Economic and Monetary Union.

“*Euro Equivalent*” means, with respect to any monetary amount in a currency other than euro, at any time for the determination thereof, the amount of euro obtained by converting such foreign currency involved in such computation into euro at the spot rate for the purchase of euro with the applicable foreign currency as published under “*Currency Rates*” in the section of *The Financial Times* entitled “*Currencies, Bonds & Interest Rates*” on the date two Business Days prior to such determination.

“*Existing Convertible Notes*” means the Parent Guarantor’s €200,000,000 6.875% Senior Unsecured Convertible Notes due 2014, its €250,000,000 4.5% Senior Unsecured Convertible Notes due 2017 and its €400,000,000 6.25% Senior Unsecured Convertible Notes due 2019. As of the date of this Listing Memorandum, the remaining 6.875% Senior Unsecured Convertible Notes due 2014 have matured and were cancelled for cash according to their terms and conditions in July, 2014.

"Existing Facilities Agreements" means the Existing Syndicated Loan, including any guarantees, collateral documents, instruments and agreements executed in connection therewith, as such agreement, documents and instruments may be amended (including any amendment and restatement thereof), supplemented or otherwise modified from time to time, including any agreement extending the maturity of, refinancing (including pursuant to credit facilities, or commercial paper facilities with banks, investors, other lenders or institutional investors or by means of sales of debt securities to institutional investors or others), replacing or otherwise restructuring (without limitations as to amount, terms, conditions, covenants and other provisions, including increasing the amount of available borrowings thereunder or altering the maturities thereof or adding Subsidiaries of the Parent Guarantor as additional borrowers or guarantors thereunder) all or any portion of the debt under such agreement or any successor or replacement agreement and whether by the same or any other agent, lender or group of lenders or other party; *provided, however*, that the total aggregate principal amount of Indebtedness outstanding under such agreements, as so supplemented, modified, replaced or otherwise restructured, shall not exceed €1,837,848,285.

"Existing Syndicated Loan" means the forward start facility entered into by the Parent Guarantor amounting to €1,566,209,640.77 originally dated April 27, 2012, as increased on May 22, 2012 and July 11, 2012 to a total aggregate principal amount of €1,663,209,640.77.

"Exchange Act" means the U.S. Securities Exchange Act of 1934, as amended, or any successor statute, and the rules and regulations promulgated by the Commission thereunder.

"Fair Market Value" means the value that would be paid by a willing buyer to an unaffiliated willing seller in a transaction not involving distress of either party, determined in good faith by the Parent Guarantor's chief executive officer, director of finance or responsible accounting or financial officer.

"FATCA" means Sections 1471-1474 of the U.S. Internal Revenue Code of 1986, as amended, any U.S. Treasury regulations thereunder, any intergovernmental agreement with respect thereto or any Spanish law implementing such intergovernmental agreement.

"Financial Debt" means, in relation to the Parent Guarantor or any of its Subsidiaries: (i) long-term debt (debt with a maturity of greater than one year) incurred with credit institutions; plus (ii) short-term debt (debt with a maturity of less than one year) incurred with credit institutions; plus (iii) notes, obligations, promissory notes and any other such obligations or liabilities the purpose of which is to provide finance and generate a financial cost for the Parent Guarantor and its Subsidiaries; plus (iv) obligations relating to guarantees of third-party obligations (other than intra-Group guarantees), but in each case excluding any Non-Recourse Financing.

"Financial Indebtedness" means, with respect to any specified Person, any present or future indebtedness (whether being principal, interest or other amounts): (i) in respect of borrowed money; or (ii) evidenced by notes, bonds, debentures, loan stock or other similar instruments for which such Person is liable, in each case whether issued for cash or in whole or in part for a consideration other than cash or other similar instruments and if and to the extent any of the preceding items would appear as a liability upon a balance sheet (excluding the footnotes thereto) of the specified Person in accordance with IFRS-EU; *provided, however*, that "Financial Indebtedness" shall not include any Non-Recourse Financing or any indebtedness representing any capital lease obligations.

"German Government Securities" means direct obligations of the Federal Republic of Germany (Bund or Bundesanleihen).

"guarantee" means a guarantee other than by endorsement of negotiable instruments for collection or deposit in the ordinary course of business, of all or any part of any Indebtedness (whether arising by agreements to keep-well, to take or pay or to maintain financial statement conditions, pledges of assets or otherwise).

“*Guarantee*” means any guarantee of the Issuer’s obligations under the Indenture and the Notes by the Parent Guarantor or any Restricted Subsidiary in accordance with the provisions of the Indenture. When used as a verb, “*Guarantee*” shall have a corresponding meaning.

“*Guarantors*” means:

- (a) the Parent Guarantor, Abeinsa Infraestructuras Medio Ambiente, S.A. (incorporated in Spain), Abeinsa, Ingeniería y Construcción Industrial, S.A. (incorporated in Spain), Abencor Suministros, S.A. (incorporated in Spain), Abener Energía, S.A. (incorporated in Spain), Abengoa Bioenergía, S.A. (incorporated in Spain), Abengoa Bioenergy Company LLC (incorporated in Kansas, United States), Abengoa Bioenergy New Technologies, LLC (incorporated in Missouri, United States), Abengoa Bioenergy of Nebraska, LLC (organized in Nebraska, United States), Abengoa Bioenergy Trading Europe B.V. (incorporated in the Netherlands), Abengoa México, S.A. de C.V. (incorporated in Mexico), Abengoa Solar, S.A. (incorporated in Spain), Abengoa Solar España, S.A. (incorporated in Spain), Abentel Telecomunicaciones, S.A. (incorporated in Spain), Abentey Gerenciamento de Projetos de Engenharia e Construções Ltda. (incorporated in Brazil), ASA Desulfuración, S.A. (incorporated in Spain), ASA Investment Brasil Ltda. (incorporated in Brazil), Bioetanol Galicia, S.A. (incorporated in Spain), Construcciones Metálicas Mexicanas Comemsa, S.A. de C.V. (incorporated in Mexico), Ecoagrícola, S.A. (incorporated in Spain), Europea de Construcciones Metálicas, S.A. (incorporated in Spain), Inabensa Rio Ltda. (incorporated in Brazil), Instalaciones Inabensa, S.A. (incorporated in Spain), Negocios Industriales y Comerciales, S.A. (incorporated in Spain), Nicsamex, S.A. de C.V. (incorporated in Mexico), Teyma Gestión de Contratos de Construcción e Ingeniería, S.A. (incorporated in Spain), Teyma Internacional, S.A. (incorporated in Uruguay), Teyma USA & Abener Engineering and Construction Services General Partnership (incorporated in Delaware, United States), Abener Teyma Hugoton General Partnership (incorporated in Delaware, United States), Abener Teyma Mojave General Partnership (incorporated in Delaware, United States), Abengoa Solar New Technologies, S.A. (incorporated in Spain), Centro Morelos 264, S.A. de C.V. (incorporated in Mexico), Teyma Uruguay ZF S.A. (incorporated in Uruguay), Abengoa Construção Brasil LTDA (incorporated in Brazil), Abeima Teyma Zapotillo S. de R.L. de C.V. (incorporated in Mexico) and Abengoa Concessions Investments Limited (incorporated under the laws of England and Wales); and
- (b) any other Restricted Subsidiary that incurs a Guarantee, until the Guarantee of such Person has been released in accordance with the provisions of the Indentures.

“*Holding Company*” of a Person means any other Person (other than a natural person) of which the first Person is a Subsidiary.

“*IFRS-EU*” means International Financial Reporting Standards as adopted by the European Union.

“*Indebtedness*” means: (i) indebtedness for borrowed money; (ii) obligations evidenced by bonds, debentures, notes or other similar instruments; (iii) the principal component of obligations in respect of letters of credit, bankers’ acceptances and similar instruments; (iv) obligations to pay the deferred and unpaid purchase price of property other than trade debt in the ordinary course of business and not overdue by 30 days or more; (v) capitalized lease obligations and attributable indebtedness related to sale/leaseback transactions; (vi) with respect to guarantees provided by an entity, the principal amount of indebtedness guaranteed by such guarantee; and (vii) net obligations under currency hedging agreements and interest rate, commodity price risk and energy price risk hedging agreements if and to the extent that any of the preceding indebtedness would appear as a liability on the balance sheet of the debtor prepared in accordance with IFRS-EU.

“*Indebtedness Threshold*” means 3% of Financial Debt of the Parent Guarantor, as calculated by reference to the then latest unconsolidated accounts or unconsolidated six-monthly reports of the Parent Guarantor.

"Independent Financial Advisor" means an investment banking firm, bank, accounting firm or third-party appraiser, in any such case, of international standing; *provided* that such firm is not an Affiliate of the Parent Guarantor.

"Investment" means, with respect to any Person, all direct or indirect investments by such Person in other Persons in the forms of loans (including guarantees or other obligations), advances or capital contributions, purchases or other acquisitions for consideration of Indebtedness, Equity Interests or other securities.

"Investment Grade Rating" means: (a) with respect to S&P, any of the categories from and including AAA to and including BBB – (or equivalent successor categories); (b) with respect to Moody's, any of the categories from and including Aaa to and including Baa3 (or equivalent successor categories); and (c) with respect to Fitch, any of the categories from and including AAA to and including BBB – (or equivalent successor categories).

"Issue Date" means September 30, 2014.

"Material Subsidiary" means, at any relevant time, a Subsidiary of the Parent Guarantor (not being a Non-Recourse Subsidiary):

- (a) whose total assets or EBITDA (or, where the Subsidiary in question prepares consolidated accounts, whose total consolidated assets or EBITDA) at any relevant time represent no less than 5% of the total consolidated assets or EBITDA, respectively, of the Parent Guarantor and its subsidiaries, as calculated by reference to the then latest audited consolidated annual accounts or consolidated six-monthly reports of the Parent Guarantor, and the latest accounts or six-monthly reports of each relevant Subsidiary (consolidated or, as the case may be, unconsolidated) prepared in accordance with IFRS-EU, provided that: (i) if the then latest audited consolidated accounts or consolidated six-monthly reports of the Parent Guarantor show EBITDA as a negative number for the relevant financial period then there shall be substituted for the words "EBITDA" the words "net turnover" for the purposes of this definition; and (ii) in the case of a Subsidiary acquired after the end of the financial period to which the then latest consolidated audited accounts or consolidated six-monthly reports of the Parent Guarantor relate, then for the purpose of applying each of the foregoing tests, the reference to the Parent Guarantor's latest consolidated audited accounts or consolidated six-monthly reports shall be deemed to be a reference to such accounts or reports as if such Subsidiary had been shown therein by reference to its then latest relevant financial statements, adjusted as deemed appropriate by the auditors of the Parent Guarantor for the time being after consultation with the Parent Guarantor; or
- (b) to which is transferred all or substantially all of the assets and undertaking of a Subsidiary which, immediately prior to such transfer, is a Material Subsidiary.

"Net Financial Debt" means Financial Debt minus cash and Available Marketable Securities.

"Net Proceeds" means the aggregate cash proceeds received by the Parent Guarantor or any of its Restricted Subsidiaries in respect of any Asset Sale (including, without limitation, any cash received upon the sale or other disposition of any non-cash consideration or Cash Equivalents substantially concurrently received in any Asset Sale), net of the direct costs relating to such Asset Sale, including, without limitation, legal, accounting and investment banking fees, and sales commissions, and any relocation expenses incurred as a result of the Asset Sale, taxes paid or payable as a result of the Asset Sale, all distributions and other payments required to be made to minority interest holders (other than the Parent Guarantor or any Subsidiary) in Subsidiaries or joint ventures as a result of such Asset Sale, and any reserve for adjustment or indemnification obligations in respect of the sale price of such asset or assets established in accordance with IFRS-EU.

"Non-Recourse Debt" means Indebtedness as to which neither the Parent Guarantor nor any of its Restricted Subsidiaries: (a) provides credit support of any kind (including any undertaking, agreement or

instrument that would constitute Indebtedness); or (b) is directly or indirectly liable as a guarantor or otherwise.

"Non-Recourse Financing" means any indebtedness which is, or is expected to be, recorded as "non-recourse financing" in the Parent Guarantor's consolidated annual accounts.

"Non-Recourse Subsidiary" means any present or future Subsidiary of the Parent Guarantor (other than the Issuer or any successor to the Issuer):

- (a) the Capital Stock or the assets of which have been acquired primarily by means of Non-Recourse Financing; and
- (b) the principal business of which involves the ownership, acquisition, construction, creation, development, maintenance and/or operation of an asset (whether or not an asset of the Parent Guarantor or any of its Subsidiaries), or any associated rehabilitation works which has been or is intended to be primarily financed with Non-Recourse Financing.

"Officer's Certificate" means a certificate signed by an officer of the Parent Guarantor, a Guarantor or any successor Person to the Parent Guarantor or any Guarantor, as the case may be, and delivered to the applicable Trustee.

"Parent Indebtedness" means any present or future indebtedness for or in respect of moneys borrowed or raised (whether being principal, premium, interest or other amounts) which is incurred or guaranteed by the Parent Guarantor under:

- (a) the Existing Syndicated Loan (or any other agreement(s) entered into to extend, renew or refinance the Existing Syndicated Loan (or its extensions, renewals or refinancings));
- (b) any other agreement which:
 - (i) provides for money to be borrowed in a principal amount exceeding the Indebtedness Threshold (or its equivalent in other currencies); and
 - (ii) has been (or is intended by the parties thereto to be) syndicated to one or more financial institutions or other entities which are regularly engaged in or established for the purpose of making, purchasing or investing in loans, securities or other financial assets; or
- (c) the Existing Convertible Notes and any other Relevant Indebtedness having a principal amount exceeding the Indebtedness Threshold (or its equivalent in other currencies),

except that in no event shall indebtedness under or in respect of the Notes or any Non-Recourse Financing be considered as "Parent Indebtedness."

"Pari Passu Indebtedness" means: (a) any Indebtedness of the Issuer that ranks equally in right of payment with the Notes; (b) any Indebtedness of the Parent Guarantor that ranks equally in right of payment with its Guarantee; or (c) with respect to any Guarantee of a Subsidiary Guarantor, any Indebtedness that ranks equally in right of payment to such Guarantee.

"Permitted Business" means: (a) any businesses, services or activities engaged in by the Parent Guarantor or any of its Subsidiaries on the Issue Date; and (b) any businesses, services and activities engaged in by the Parent Guarantor or any of its Subsidiaries that are related, complementary, incidental, ancillary or similar to any of the foregoing or are extensions or developments of any thereof.

"Permitted Security Interests" means:

- (a) Security Interests on property (including Capital Stock) of a Person existing at the time such Person becomes a Restricted Subsidiary or is merged with or into or consolidated with the Parent Guarantor or any Restricted Subsidiary; *provided* that such Security Interests were in existence prior to the contemplation of such Person becoming a Restricted Subsidiary or such merger or consolidation,

were not incurred in contemplation thereof and do not extend to any assets other than those of the Person that becomes a Restricted Subsidiary or is merged with or into or consolidated with the Parent Guarantor or any Restricted Subsidiary;

- (b) Security Interests securing Indebtedness under cash pooling and hedging obligations, which obligations are permitted by paragraph (2)(k) of the covenant described above under “—*Certain Covenants—Limitation on Indebtedness*” and Security Interests securing or arising by reason of any netting or set-off arrangement entered into in the ordinary course of banking or other trading activities;
- (c) Security Interests in respect of factoring of accounts receivable permitted by paragraph (2)(m) of the covenant described above under “—*Certain Covenants—Limitation on Indebtedness*”;
- (d) Security Interests on real estate in connection with the financing of the acquisition or development thereof, *provided* that offices are or will be located on such property or assets primarily for the use of the Parent Guarantor or any of its Subsidiaries;
- (e) any other Security Interests where the aggregate principal amount of Indebtedness and other obligations secured by such Security Interests at any time outstanding does not exceed the greater of (i) €350.0 million and (ii) an amount equal to 0.5 times Consolidated EBITDA for the period of the most recent four consecutive fiscal quarters ended prior to the date of such incurrence for which financial statements are available; and
- (f) any extension, renewal, refinancing or replacement, in whole or in part, of any Security Interest described in the foregoing clauses (a) through (d); *provided* that any such Security Interest is limited to all or part of the same property or assets (plus improvements, accessions, proceeds or dividends or distributions in respect thereof) that secured (or, under the written arrangements under which the original Security Interest arose, could secure) the Indebtedness being refinanced.

“*Person*” means any individual, corporation, limited liability company, partnership, joint venture, association, joint-stock company, trust, unincorporated organization or government or any agency or political subdivision thereof.

“*Qualified Capital Stock*” of any Person means any and all Capital Stock of such Person other than Disqualified Capital Stock.

“*Rating Agency*” means any of the following: (a) Standard & Poor’s Credit Market Services Europe Limited, a division of The McGraw Hill Companies, Inc. (“*S&P*”); (b) Moody’s Investors Service Limited (“*Moody’s*”); or (c) Fitch Ratings Ltd (“*Fitch*”), and, in each case, their respective successors.

A “*Rating Release Event*” occurs if at any time while the Notes remain outstanding the Parent Guarantor seeks and obtains a rating from at least two of the Rating Agencies and two such Rating Agencies assign the Notes an Investment Grade Rating.

“*Refinancing Indebtedness*” means any Indebtedness that refinances any Indebtedness in compliance with the “*Limitation on Indebtedness*” covenant; *provided, however*:

- (a) such Refinancing Indebtedness has a stated maturity that is either: (i) no earlier than the stated maturity of the Indebtedness being refinanced; or (ii) after the final maturity of the Notes;
- (b) such Refinancing Indebtedness has an average life at the time such Refinancing Indebtedness is incurred that is equal to or greater than the average life of the Indebtedness being refinanced; and
- (c) such Refinancing Indebtedness has an aggregate principal amount (or if issued with an original issue discount, an aggregate issue price) that is equal to or less than the aggregate principal amount (or if incurred with original issue discount, the aggregate accreted value) then outstanding or

committed (plus fees and expenses, including any premiums) under the Indebtedness being refinanced.

A “*Release Event*” occurs in relation to a Guarantor (other than the Parent Guarantor) if at any time while the Notes remain outstanding, (a) the Guarantor is unconditionally released from all guarantees given by it of Parent Indebtedness; or (b) as a result of a change in law taking effect after the Issue Date (in respect of an original Guarantor) or the date upon which the relevant Subsidiary became a Guarantor (in respect of a new Guarantor), the guarantee of the Notes given by the Guarantor is prohibited or restricted under laws generally applicable to persons of the same legal form as that Guarantor.

“*Relevant Indebtedness*” means any present or future indebtedness (whether being principal, interest or other amounts), in the form of or evidenced by notes, bonds, debentures, loan stock or other similar debt instruments, whether issued for cash or in whole or in part for a consideration other than cash, and which are, or are capable of being, quoted, listed or ordinarily dealt in or traded on any recognized stock exchange, over-the-counter or other securities market but shall not in any event include any Non-Recourse Financing.

“*Relevant Person*” means a holding company whose shareholders are or are to be substantially similar to the pre-existing shareholders of the Parent Guarantor and/or Inversión Corporativa IC, S.A. and/or any person or persons controlled by Inversión Corporativa IC, S.A.

“*Restricted Distributions*” shall have the meaning set forth under “—*Certain Covenants—Limitation on Restricted Distributions.*”

“*Restricted Subsidiary*” means any Subsidiary of the Parent Guarantor that is not an Unrestricted Subsidiary.

“*Security Interest*” shall have the meaning set forth under “—*Certain Covenants—Limitation on Liens.*”

“*Spanish Guarantor*” means any Guarantor in respect of which the relevant Taxing Jurisdiction is the Kingdom of Spain.

“*Stated Maturity*” means, when used with respect to any Note or any payment of interest thereon, the date specified in such Note as the fixed date on which the principal of such Note or such payment of interest, respectively, is due and payable, and, when used with respect to any other Debt, means the date specified in the instrument governing such Debt as the fixed date on which the principal of such Debt, or any payment of interest thereon, is due and payable and will not include any contingent obligations to repay, redeem or repurchase any such interest or principal prior to the date originally scheduled for the payment thereof.

“*Subsidiary*” means, with respect to any Person:

- (a) any corporation, association or other business entity: (i) of which more than 50% of the Voting Rights is at the time owned or controlled, directly or indirectly, by that Person or one or more of the other Subsidiaries of that Person (or a combination thereof); or (ii) that is deemed by such Person’s auditors to be controlled by such Person and as a result of such control (whether legal or *de facto*) such corporation’s, association’s or business entity’s financial position and results of operations are fully consolidated with those of such Person for the purposes of such Person’s audited and interim financial statements as of the most recent relevant financial period; and
- (b) any partnership or limited liability company of which: (i) more than 50% of the capital accounts, distribution rights, total equity and voting interests or general and limited partnership interests, as applicable, are owned or controlled, directly or indirectly, by such Person or one or more of the other Subsidiaries of that Person or a combination thereof, whether in the form of membership, general, special or limited partnership interests or otherwise; and (ii) such Person or any Subsidiary of such Person is a controlling general partner or otherwise controls such entity.

"Taxing Jurisdiction" means any jurisdiction under the laws of which the Issuer or any Guarantor is organized or in which it is resident for tax purposes, or any political subdivision or any authority thereof or therein having power to tax.

"Testing Period" means the Parent Guarantor's most recently ended two consecutive full fiscal six month periods: *provided, however*, that if the Parent Guarantor has begun to prepare full quarterly financial statements, upon the completion of four fiscal quarters *"Testing Period"* will be defined as the Parent Guarantor's most recently ended four full consecutive fiscal quarters.

"Treasury Rate" means, as at any redemption date, the yield to maturity as at such redemption date of United States Treasury securities with a constant maturity (as compiled and published in the most recent Federal Reserve Statistical Release H.15 (519) that has become publicly available at least two Business Days prior to the redemption date (or, if such Statistical Release is no longer published, any publicly available source of similar market data)) most nearly equal to the period from the redemption date to October 1, 2019; *provided, however*, that if the period from the redemption date to October 1, 2019, is less than one year, the weekly average yield on actually traded United States securities adjusted to a constant maturity of one year will be used.

"Unrestricted Subsidiary" means:

- (a) any Non-Recourse Subsidiary (other than the Issuer or any successor to the Issuer) and its Subsidiaries (other than the Issuer or any successor to the Issuer); and
- (b) any other Subsidiary of the Parent Guarantor (other than the Issuer or any successor to the Issuer) but only to the extent that (in the case of this clause (b) only) such Subsidiary:
 - (i) has no Indebtedness other than Non-Recourse Debt;
 - (ii) except as permitted by the covenant described above under "*Certain Covenants—Limitation on Transactions with Affiliates*," is not a party to any agreement, contract, arrangement or understanding with the Parent Guarantor or any Restricted Subsidiary unless the terms of any such agreement, contract, arrangement or understanding are no less favorable to the Parent Guarantor or such Restricted Subsidiary than those that might be obtained at the time from Persons who are not Affiliates of the Parent Guarantor; and
 - (iii) is a Person with respect to which neither the Parent Guarantor nor any Restricted Subsidiary has any direct or indirect obligation: (a) to subscribe for additional Equity Interests; or (b) to maintain or preserve such Person's financial condition or to cause such Person to achieve any specified levels of operating results.

"U.S. dollars" means the lawful currency of the United States of America.

"U.S. Government Securities" means direct obligations of, or obligations guaranteed by, the United States of America, and the payment for which the United States of America pledges its full faith and credit.

"Voting Rights" means the right generally to vote at a general meeting of shareholders of the Parent Guarantor (irrespective of whether or not, at the time, stock of any other class or classes shall have, or might have, voting power by reason of the happening of any contingency).

BOOK-ENTRY, DELIVERY AND FORM

The information set out below is subject to any change in or reinterpretation of the rules, regulations and procedures of Euroclear and/or Clearstream and/or DTC as applicable, currently in effect. The information in this section concerning Euroclear, Clearstream and DTC has been obtained from sources that the Issuer and the Guarantors believe to be reliable, but none of the Issuer, the Guarantors, the Trustees under the relevant series of Notes, the Paying Agents, the Transfer Agents, the Registrars nor the Initial Purchasers under the relevant series of Notes take any responsibility for the accuracy thereof. Investors wishing to use the facilities of Euroclear, Clearstream or DTC, as applicable, are advised to confirm the continued applicability of the rules, regulations and procedures of such facilities. None of the Issuer, the Guarantors, the Trustee nor any other party to the Indenture will have any responsibility or liability for any aspect of the records relating to, or payments made on account of, beneficial ownership interests in the Notes held through the facilities of Euroclear and/or Clearstream and/or DTC, as applicable, or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests.

General

Each series of the notes sold outside the United States pursuant to Regulation S under the Securities Act will initially be represented by one or more global notes in registered form without interest coupons attached (the "Regulation S Global Notes"). The Regulation S Global Notes representing the U.S. Dollar Notes (the "U.S. Dollar Regulation S Global Notes") will be deposited upon issuance with Deutsche Bank Trust Company Americas as custodian for DTC and registered in the name of Cede & Co., as nominee of DTC. The Regulation S Global Notes representing the Euro Notes (the "Euro Regulation S Global Notes") will be deposited, on the Issue Date, with a common depository and registered in the name of the nominee of the common depository for the accounts of Euroclear and Clearstream.

Each series of the notes sold within the United States to qualified institutional buyers pursuant to Rule 144A under the Securities Act will initially be represented by one or more global notes in registered form without interest coupons attached (the "144A Global Notes" and, together with the Regulation S Global Notes, the "Global Notes"). The 144A Global Notes representing the U.S. Dollar Notes (the "U.S. Dollar 144A Global Notes") will be deposited upon issuance with Deutsche Bank Trust Company Americas as custodian for DTC and registered in the name of Cede & Co., as nominee of DTC. The 144A Global Notes representing the Euro Notes (the "Euro 144A Global Notes") were deposited, on the Issue Date, with a common depository and registered in the name of the nominee of the common depository for the accounts of Euroclear and Clearstream.

The U.S. Dollar 144A Global Notes and the U.S. Dollar Regulation S Global Notes are collectively referred to herein as the "U.S. Dollar Global Notes." The Euro 144A Global Notes and the Euro Regulation S Global Notes are collectively referred to herein as the "Euro Global Notes."

Ownership of interests in the 144A Global Notes ("144A Book-Entry Interests") and ownership of interests in the Regulation S Global Notes (the "Regulation S Book-Entry Interest" and, together with the 144A Book-Entry Interests, the "Book-Entry Interests") are limited to persons that have accounts with DTC, Euroclear and/or Clearstream or persons that may hold interests through such participants. Book-Entry Interests are shown on, and transfers thereof is effected only through, records maintained in book-entry form by DTC, Euroclear and/or Clearstream and their participants. The Book-Entry Interests in the U.S. Dollar Global Notes were issued only in denominations of \$200,000 and integral multiples of \$1,000 in excess thereof and the Book-Entry Interests in Euro Global Notes were issued only in denominations of €100,000 and in integral multiples of €1,000 in excess thereof.

The Book-Entry Interests are not be held in definitive form. Instead, DTC, Euroclear or Clearstream, as applicable, credit on their respective book-entry registration and transfer systems a participant's account with the interest beneficially owned by such participant. The laws of some jurisdictions, including certain states of the United States, may require that certain purchasers of securities take physical delivery of such securities in

definitive form. The foregoing limitations may impair the ability to own, transfer or pledge Book-Entry Interests. In addition, while the notes are in global form, owners of interest in the Global Notes do not have the notes registered in their names, do not receive physical delivery of the notes in certificated form and are not considered the registered owners or “holder” of the notes under the Indenture for any purpose.

So long as the notes are held in global form, the custodian for DTC or the common depository for Euroclear or Clearstream, as applicable (or their respective nominees), are considered the holders of Global Notes for all purposes under the Indenture relating to the applicable series of notes. As such, participants must rely on the procedures of DTC, Euroclear or Clearstream, as applicable, and indirect participants must rely on the procedures of DTC, Euroclear or Clearstream, as applicable, and the participants through which they own Book-Entry Interests in order to exercise any rights of holders under the Indenture relating to the applicable series of notes.

Neither the Issuer, the Registrar, Deutsche Bank Trust Company Americas as custodian for DTC nor the Trustee under each of the Indentures nor any of the Issuer’s respective agents have no responsibility or be liable for any aspect of the records relating to the Book-Entry Interests.

Issuance of Definitive Registered Notes

Under the terms of each Indenture, owners of Book-Entry Interests receive definitive notes in registered form (the “Definitive Registered Notes”):

- if DTC (with respect to the U.S. Dollar Global Notes) or Euroclear and Clearstream (with respect to the Euro Global Notes) notify the Issuer that it is unwilling or unable to continue to act as depository and a successor depository is not appointed by the Issuer within 120 days; or
- if the owner of a book-entry interest requires such an exchange in writing delivered through DTC or Euroclear or Clearstream (as the case may be) following an event of default under the Indenture relating to the applicable series of notes.

In such an event, the registrar will issue Definitive Registered Notes, registered in the name or names and issued in any approved denominations, requested by or on behalf of DTC, Euroclear or Clearstream, as applicable, or the Issuer, as applicable (in accordance with their respective customary procedures and based upon directions received from participants reflecting the beneficial ownership of Book-Entry Interests), and such Definitive Registered Notes bear the restrictive legend referred to in “Notice to Investors,” unless that legend is not required by the Indenture or applicable law.

Redemption of the Global Notes

In the event any Global Note, or any portion thereof, is redeemed, DTC, Euroclear or Clearstream, as applicable, will distribute the amount received by it in respect of the Global Note so redeemed to the holders of the Book-Entry Interests in such Global Note from the amount received by it in respect of the redemption of such Global Note. The redemption price payable in connection with the redemption of such Book-Entry Interests will be equal to the amount received by DTC, Euroclear or Clearstream, as applicable, in connection with the redemption of such Global Note (or any portion thereof). The Issuer understands that under existing practices of DTC, Euroclear and Clearstream if fewer than all of the notes are to be redeemed at any time, DTC, Euroclear and Clearstream will credit their respective participants’ accounts on a proportionate basis (with adjustments to prevent fractions) or by lot or on such other basis as they deem fair and appropriate; *provided, however*, that no Book-Entry Interest of less than \$200,000, in the case of the U.S. Dollar Notes, or €100,000, in the case of the Euro Notes, principal amount at maturity, or less, may be redeemed in part.

Payments on Global Notes

Payments of amounts owing in respect of the Global Notes (including principal, premium, interest, additional interest and additional amounts) are made by the Issuer to the Paying Agent. The Paying Agent

will, in turn, make such payments to DTC or its nominee (in the case of the U.S. Dollar Global Notes) and to the common depository for Euroclear and Clearstream (in the case of the Euro Global Notes), which will distribute such payments to participants in accordance with their respective procedures.

Under the terms of the Indentures governing the notes, the Issuer and the relevant Trustee treat the registered holder of the Global Notes (for example, DTC, Euroclear or Clearstream (or their respective nominees)) as the owner thereof for the purpose of receiving payments and for all other purposes.

Consequently, neither the Issuer, each Trustee, the Registrar nor any Paying Agent or any of their respective agents has or have any responsibility or liability for:

- any aspects of the records of DTC, Euroclear, Clearstream or any participant or indirect participant relating to or payments made on account of a Book-Entry Interest, for any such payments made by DTC, Euroclear, Clearstream or any participant or indirect participant, or for maintaining, supervising or reviewing the records of DTC, Euroclear, Clearstream or any participant or indirect participant relating to, or payments made on account of, a Book-Entry Interest; or
- payments made by DTC, Euroclear, Clearstream or any participant or indirect participant, or for maintaining, supervising or reviewing the records of DTC, Euroclear, Clearstream or any participant or indirect participant relating to or payments made on account of a Book-Entry Interest; or
- DTC, Euroclear, Clearstream or any participant or indirect participant. Payments by participants to owners of Book-Entry Interests held through participants are the responsibility of such participants, as is now the case with securities held for the accounts of subscribers registered in "street name."

Currency of Payment for the Global Notes

The principal of, premium, if any, and interest on, and all other amounts payable in respect of, the U.S. Dollar Global Notes are paid to holders of interest in such notes (the "DTC Holders") through DTC in U.S. dollars. The principal of, premium, if any, and interest on, and all other amounts payable in respect of, the Euro Global Notes are paid to holders of interest in such notes (the "Euroclear/ Clearstream Holders") through Euroclear or Clearstream, as applicable, in euro.

Action by Owners of Book-Entry Interests

DTC, Euroclear and Clearstream have advised the Issuer that they will take any action permitted to be taken by a holder of the notes only at the direction of one or more participants to whose account the Book-Entry Interests in the Global Notes are credited and only in respect of such portion of the aggregate principal amount of the notes as to which such participant or participants has or have given such direction. DTC, Euroclear and Clearstream will not exercise any discretion in the granting of consents, waivers or the taking of any other action in respect of the Global Notes. However, if there is an event of default under the notes, each of DTC, Euroclear and Clearstream reserves the right to exchange the Global Notes for Definitive Registered Notes in certificated form, and to distribute such Definitive Registered Notes to their respective participants.

Transfers

Transfers between participants in DTC or, as the case may be, Euroclear and Clearstream are done in accordance with DTC or, as the case may be, Euroclear and Clearstream rules and will be settled in immediately available funds. If a holder requires physical delivery of Definitive Registered Notes for any reason, including to sell the notes to persons in states which require physical delivery of such securities or to pledge such securities, such holder must transfer its interest in the Global Notes in accordance with the normal procedures of DTC or, as the case may be, Euroclear and Clearstream and in accordance with the provisions of the Indenture relating to the applicable series of notes.

The Global Notes bear a legend to the effect set forth in “Notice to Investors.” Book-Entry Interests in the Global Notes are subject to the restrictions on transfer discussed in “Notice to Investors.”

Through and including the 40th day after the later of the commencement of the Offering of the notes and the closing of the Offering (the “40-day Period”), beneficial interests in a Regulation S Global Note may be transferred to a person who takes delivery in the form of an interest in the Rule 144A Global Note denominated in the same currency only if such transfer is made pursuant to Rule 144A and the transferor first delivers to the Trustee relating to the applicable series of notes a certificate (in the form provided in the applicable Indenture) to the effect that such transfer is being made to a person who the transferor reasonably believes is a “qualified institutional buyer” within the meaning of Rule 144A in a transaction meeting the requirements of Rule 144A or otherwise in accordance with the transfer restrictions described under “Notice to Investors” and in accordance with all applicable securities laws of the states of the United States and other jurisdictions.

After the expiration of the 40-day Period, beneficial interests in a Regulation S Global Note may be transferred to a person who takes delivery in the form of a beneficial interest in the Rule 144A Global Note denominated in the same currency without compliance with these certification requirements.

Beneficial interests in a Rule 144A Global Note may be transferred to a person who takes delivery in the form of a beneficial interest in the Regulation S Global Note denominated in the same currency only upon receipt by the Trustee of a written certification (in the form provided in the Indenture relating to the applicable series of notes) from the transferor to the effect that such transfer is being made in accordance with Regulation S or Rule 144 under the Securities Act (if available).

Subject to the foregoing, and as set forth in “Notice to Investors,” Book-Entry Interests may be transferred and exchanged as described under “Description of the Notes—Transfer and Exchange.” Any Book-Entry Interest in one of the Global Notes that is transferred to a person who takes delivery in the form of a Book-Entry Interest in the other Global Note of the same denomination will, upon transfer, cease to be a Book-Entry Interest in the first mentioned Global Note and become a Book-Entry Interest in the other Global Note, and accordingly, will thereafter be subject to all transfer restrictions, if any, and other procedures applicable to Book-Entry Interests in such other Global Note for as long as it retains such a Book-Entry Interest.

Definitive Registered Notes may be transferred and exchanged for Book-Entry Interests in a Global Note only as described under “Description of the Notes—Transfer and Exchange” and, if required, only if the transferor first delivers to the Trustee a written certificate (in the form provided in the Indenture) to the effect that such transfer will comply with the appropriate transfer restrictions applicable to such notes. See “Notice to Investors.”

This paragraph refers to transfers and exchanges with respect to U.S. Dollar Global Notes only. Transfers involving an exchange of a Regulation S Book-Entry Interest for 144A Book-Entry Interest in a U.S. Dollar Global Note will be done by DTC by means of an instruction originating from the Trustee through the DTC Deposit/Withdrawal Custodian system. Accordingly, in connection with any such transfer, appropriate adjustments will be made to reflect a decrease in the principal amount of the relevant Regulation S Global Note and a corresponding increase in the principal amount of the corresponding 144A Global Note. The policies and practices of DTC may prohibit transfers of unrestricted Book-Entry Interests in the Regulation S Global Note prior to the expiration of the 40 days after the date of initial issuance of the notes. Any Book-Entry Interest in one of the Global Notes that is transferred to a person who takes delivery in the form of a Book-Entry Interest in any other Global Note will, upon transfer, cease to be a Book-Entry Interest in the first mentioned Global Note and become a Book-Entry interest in such other Global Note, and accordingly will thereafter be subject to all transfer restrictions, if any, and other procedures applicable to Book-Entry Interests in such other Global Note for as long as it remains such a Book-Entry Interest.

Information Concerning DTC, Euroclear and Clearstream

All Book-Entry Interests will be subject to the operations and procedures of DTC, Euroclear and Clearstream, as applicable. The Issuer provides the following summaries of those operations and procedures solely for the convenience of investors. The operations and procedures of each settlement system are controlled by that settlement system and may be changed at any time. Neither the Issuer nor the initial purchasers are responsible for those operations or procedures. DTC has advised the Issuer that it is:

- a limited purpose trust company organized under New York Banking Law;
- a “banking organization” under New York Banking Law;
- a member of the Federal Reserve System;
- a “clearing corporation” within the meaning of the New York Uniform Commercial Code; And
- a “clearing agency” registered under Section 17A of the U.S. Exchange Act.

DTC was created to hold securities for its participants and to facilitate the clearance and settlement of transactions among its participants. It does this through electronic book-entry changes in the accounts of securities participants, eliminating the need for physical movement of securities certificates. DTC participants include securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations. DTC’s owners are the New York Stock Exchange, Inc., the American Stock Exchange, Inc., the National Association of Securities Dealers, Inc. and a number of its direct participants. Others, such as banks, brokers and dealers and trust companies that clear through or maintain a custodial relationship with a direct participant, also have access to the DTC system and are known as indirect participants.

Like DTC, Euroclear and Clearstream hold securities for participating organizations, they also facilitate the clearance and settlement of securities transactions between their respective participants through electronic book-entry changes in the accounts of such participants. Euroclear and Clearstream provide various services to their participants, including the safekeeping, administration, clearance, settlement, lending and borrowing of internationally traded securities. Euroclear and Clearstream interface with domestic securities markets. Euroclear and Clearstream participants are financial institutions, such as underwriters, securities brokers and dealers, banks, trust companies and certain other organizations. Indirect access to Euroclear and Clearstream is also available to others, such as banks, brokers, dealers and trust companies, that clear through or maintain a custodial relationship with a Euroclear and Clearstream participant, either directly or indirectly.

Because DTC, Euroclear and Clearstream can only act on behalf of participants, who in turn act on behalf of indirect participants and certain banks, the ability of an owner of a beneficial interest to pledge such interest to persons or entities that do not participate in the DTC, Euroclear and Clearstream systems, or otherwise take actions in respect of such interest, may be limited by the lack of a definite certificate for that interest. The laws of some jurisdictions require that certain persons take physical delivery of securities in definitive form. Consequently, the ability to transfer beneficial interests to such person may be limited. In addition, owners of beneficial interests through the DTC, Euroclear and Clearstream systems will receive distributions attributable to the 144A Global Notes only through DTC, Euroclear and Clearstream participants.

Global Clearance and Settlement Under the Book-Entry System

The notes represented by the Global Notes are expected to be admitted to trading on the Euro MTF and listed on the official list of the Luxembourg Stock Exchange and to trade in DTC’s Same-Day Funds Settlement System, and any permitted secondary market trading activity in such notes will therefore be required by DTC to be settled in immediately available funds. The Issuer expects that secondary trading in any certificated notes will also be settled in immediately available funds. Subject to compliance with the transfer restrictions applicable to the Global Notes, crossmarket transfers between participants in DTC, on the one hand, and

Euroclear or Clearstream participants, on the other hand, will be done through DTC in accordance with DTC's rules on behalf of each of Euroclear or Clearstream by its common depository; however, such crossmarket transactions will require delivery of instructions to Euroclear or Clearstream by the counterparty in such system in accordance with the rules and regulations and within the established deadlines of such system (Brussels time). Euroclear or Clearstream will, if the transaction meets its settlement requirements, deliver instructions to the common depository to take action to effect final settlement on its behalf by delivering or receiving interests in the Global Notes by DTC, and making and receiving payment in accordance with normal procedures for same-day funds settlement application to DTC. Euroclear participants and Clearstream participants may not deliver instructions directly to the common depository.

Because of the time zone differences, the securities account of a Euroclear or Clearstream participant purchasing an interest in a Global Note from a participant in DTC will be credited, and any such crediting will be reported to the relevant Euroclear or Clearstream participant, during the securities settlement processing day (which must be a business day for Euroclear and Clearstream) immediately following the settlement date of DTC. Cash received in Euroclear and Clearstream as a result of a sale of an interest in a Global Note by or through a Euroclear or Clearstream participant to a participant in DTC, will be received with value on the settlement date of DTC, but will be available in the relevant Euroclear or Clearstream cash account only as of the business day for Euroclear or Clearstream following DTC's settlement date.

Although DTC, Euroclear or Clearstream currently follow the foregoing procedures in order to facilitate transfers of interests in the Global Notes among participants in DTC, Euroclear or Clearstream, as the case may be, they are under no obligation to perform or continue to perform such procedures, and such procedures may be discontinued or modified at any time. None of the Issuer, any Guarantor, the Trustee, the Registrar or the Principal Paying Agent will have any responsibility for the performance by DTC, Euroclear or Clearstream or their respective participants or indirect participants, of their respective obligations under the rules and procedures governing their operations.

Initial Settlement

Initial settlement for the Euro Notes was made in euros and initial settlement for the U.S. Dollar Notes will be made in U.S. dollars. Book-Entry Interests owned through DTC, Euroclear or Clearstream accounts will follow the settlement procedures applicable to conventional Eurobonds in registered form. Book-Entry Interests are credited to the securities custody accounts of DTC, Euroclear and Clearstream holders on the business day following the settlement date against payment for value on the settlement date.

Secondary Market Trading

The Book-Entry Interests will trade through participants of DTC and Euroclear or Clearstream will settle in same-day funds. Since the purchase determines the place of delivery, it is important to establish at the time of trading of any Book-Entry Interests where both the purchaser's and the seller's accounts are located to ensure that settlement can be made on the desired value date.

Special Timing Considerations

You should be aware that investors will only be able to make and receive deliveries, payments and other communications involving the Notes through DTC, Euroclear or Clearstream on days when those systems are open for business.

Trustee's Powers

In considering the interests of the holders of the Notes, while title to the Notes is registered in the name of a nominee of a clearing system, the Trustee may have regard to, and rely on, any information provided to it by that clearing system as to the identity (either individually or by category) of its accountholders with

entitlements to Notes and may consider such interests as if such accountholders were the holders of the Notes.

Enforcement

For the purposes of enforcement of the provisions of the Indenture by the Trustee, the persons named in a certificate of the holder of the Notes in respect of which a Global Note is issued shall be recognized as the beneficiaries of the trusts set out in the Indenture relating to the applicable series of Notes to the extent of the principal amounts of their interests in the Notes set out in the certificate of the holder, as if they were themselves the holders of the Notes in such principal amounts.

TAXATION

Spanish Tax Considerations

Introduction

The following summary describes the main Spanish tax implications arising in connection with the acquisition holding, transfer or redemption of the Notes, by beneficial owners ("**Noteholders**"). The information provided below does not purport to be a complete analysis of the tax law and practice currently applicable in Spain and does not purport to address the tax consequences applicable to all categories of investors, some of which may be subject to special rules.

All the tax consequences described in this section are based on the general assumption that the Notes are initially registered for clearance and settlement in Euroclear or Clearstream.

Prospective purchasers of the Notes should consult their own tax advisors as to the tax consequences, including those under the tax laws of the country of which they are resident, of purchasing, owning and disposing of Notes.

The summary set out below is based upon Spanish law as in effect on the date of this Listing Memorandum and is subject to any change in such law after such date, including changes with retroactive effect.

This information has been prepared in accordance with the following Spanish tax legislation in force at the date of this Listing Memorandum:

- of general application, First Additional Provision of Law 10/2014, of June 26, on organization, supervision and solvency of credit institutions ("**Law 10/2014**") and Royal Decree 1065/2007, of July 27 (as amended "**Royal Decree 1065/2007**");
- for individuals resident for tax purposes in Spain which are subject to the Personal Income Tax ("**PIT**"), Law 35/2006, of November 28, on PIT and partial amendment of Corporate Income Tax Law and Non Residents Income Tax Law, and Royal Decree 439/2007, of March 30, enacting the PIT Regulations, along with Law 19/1991, of June 6, on Net Wealth Tax, as amended by Law 4/2008, of December 23, which abolishes Net Wealth Tax, provides for a monthly Value Added Tax refund system and introduces other amendments to Spanish tax legislation and by Royal Decree-law 13/2011, of September 16, Law 16/2012, of December 27, which re-establish, temporarily, the Net Wealth Tax and Law 22/2013, of December 23 of General State Budget for 2014 and Law 29/1987, of December 18, on Inheritance and Gift Tax;
- for legal entities resident for tax purposes in Spain which are subject to the Corporate Income Tax ("**CIT**"), Royal Legislative Decree 4/2004, of March 5, promulgating the Consolidated Text of the CIT Law, and Royal Decree 1777/2004, of July 30, promulgating the CIT Regulations; and
- for individuals and entities who are not resident for tax purposes in Spain which are subject to the Non-Resident Income Tax ("**NRIT**"), Royal Legislative Decree 5/2004, of March 5, promulgating the Consolidated Text of the NRIT Law, and Royal Decree 1776/2004, of July 30, promulgating the NRIT Regulations, along with Law 19/1991, of June 6, 1991 on Net Wealth Tax, as amended by Law 4/2008, of December 23, which abolishes Net Wealth Tax, provides for a monthly Value Added Tax refund system and introduces other amendments to Spanish legislation and by Royal Decree-law 13/2011, of September 16, Law 16/2012, of December 27, which re-establish temporarily Net Wealth Tax and Law 22/2013, of December 23, of General State Budget for 2014 and Law 29/1987, of December 18, on Inheritance and Gift Tax.

Whatever the nature and residence of the Noteholder, the acquisition and transfer of Notes are exempt from indirect taxes in Spain, in accordance article 108 of the Spanish Securities Market Act.

The Issuer considers that the First Additional Provision of Law 10/2014, of June 26 applies to the Notes according to its Section 8, provided that the Notes were issued by a company which is (i) tax resident in Spain, (ii) the Notes do not grant voting rights, (iii) the Notes do not grant preferred subscription rights with respect to future offerings and (iv) the Notes are listed on a regulated market.

The Issuer considers that references made by the Spanish legislation to Law 13/1985, of May 25, on investment ratios, own funds and information obligations of financial intermediaries ("**Law 13/1985**"), derogated by Law 10/2014, shall be construed as references to Law 10/2014.

Individuals with tax residence in Spain

Personal Income Tax (Impuesto sobre la Renta de las Personas Físicas)

Both interest periodically received and income derived from the transfer, redemption or repayment of the Notes constitute a return on investment obtained from the transfer of a person's own capital to third parties in accordance with the provisions of Section 25 of the PIT Law, and therefore will form part of the so called savings income tax base pursuant to the provisions of the aforementioned Law and will be subject to the following taxes: (i) income up to €6,000 will be taxed at a flat rate of 21%; (ii) income between €6,001 and €24,000 will be taxed at a flat rate of 25%; and (iii) the excess over €24,000 will be subject to a flat rate of 27%.

According to Article 75 of the PIT regulation, the above mentioned income will be subject to the corresponding PIT withholding tax at the applicable tax rate (currently, 21%).

However, the Issuer considers that, according to sub-section 5 of section 44 of Royal Decree 1065/2007, it is not obliged to withhold any tax amount on payments of interest and proceeds of redemption or retirement of the Notes to individual Noteholders who are resident in Spain for tax purposes provided that the simplified information procedures (which do not require identification of the Noteholders) are complied with by the Paying Agent as it is described in section "*Disclosure of Information in Connection to the Notes.*"

In any event, individual Noteholders may credit the withholding against their final PIT liability for the relevant fiscal year.

However, regarding the interpretation of information contained in the "*Disclosure of Information in Connection to the Notes*" section please refer to "*Risk Factors—Risks related to the Spanish withholding tax regime.*"

Net Wealth Tax (Impuesto sobre el Patrimonio)

According to Law 16/2012 on certain tax measures, Net Wealth Tax was restored for tax period 2013. Law 22/2013, of December 23, on State General Budget for 2014, sets forth the extension of the restoration of this tax for fiscal year 2014.

This tax is levied on the net worth of an individual's assets and rights to the extent that their net worth exceeds €700,000. The marginal rates ranging between 0.2% and 2.5% and some reductions could apply. Individuals with tax residency in Spain who are under the obligation to pay Net Wealth Tax must take into account the amount of the Notes which they hold as at December 31, in each year, when calculating their Net Wealth Tax liabilities.

Inheritance and Gift Tax (Impuesto sobre Sucesiones y Donaciones)

Individuals resident in Spain for tax purposes who acquire ownership or other rights over any Notes by inheritance, gift or legacy will be subject to the Spanish Inheritance and Gift Tax in accordance with the applicable Spanish regional and central government rules. The final effective tax rates range between 0% and 81.6%, depending on relevant factors.

Legal entities with tax residence in Spain

Corporate Income Tax (Impuesto sobre Sociedades)

Both interest periodically received and income derived from the transfer, redemption or repayment of the Notes are included in the CIT taxable income and will be taxed at the general tax rate of 30% in accordance with the rules for this tax.

The Issuer considers that according to sub-section 5 of section 44 of Royal Decree 1065/2007, it is not obliged to withhold any tax amount on payments of interest and proceeds of redemption or retirement of the Notes to legal entities Noteholders who are resident in Spain for tax purposes (which for the sake of clarity, include Spanish tax resident funds and Spanish tax resident pension funds) provided that the simplified information procedures (which do not require identification of the Noteholders) are complied with by the Paying Agent as it is described in section "*Disclosure of Information in Connection to the Notes.*"

With regard to income derived from the transfer of the Notes, in accordance with Section 59(s) of CIT Regulations, there is no obligation to withhold on income obtained by Spanish CIT taxpayers (which for the sake of clarity, include Spanish tax resident funds and Spanish tax resident pension funds) from financial assets listed on an organized market of an OECD country, as in the case of the Notes.

On July 27, 2004, the Spanish Tax Authorities (Dirección General de Tributos) issued a ruling indicating that in the case of issues made by persons resident in Spain, as in the case of the Issuer, application of the withholding exemption requires that, in addition to being listed on an organized market of an OECD country, the Notes must be placed in an OECD State other than Spain. Therefore, withholding should be made to Spanish CIT taxpayers on income derived from the transfer of the Notes if the conditions for the withholding exemption to be applicable are not met.

Regarding the interpretation of information in the "*Disclosure of Information in Connection to the Notes*" section please refer to "Risk Factors—Risks related to the Spanish withholding tax regime".

Notwithstanding the above, amounts withheld, if any, may be credited by the relevant investors against its final CIT liability for the relevant fiscal year.

Inheritance and Gift Tax (Impuesto sobre Sucesiones y Donaciones)

Legal entities resident in Spain for tax purposes which acquire ownership or other rights over the Notes by inheritance, gift or legacy are not subject to the Spanish Inheritance and Gift Tax but must include the market value of the acquired Notes in their taxable income for Spanish CIT purposes.

Net Wealth Tax (Impuesto sobre el Patrimonio)

Legal entities are not subject to Net Wealth Tax.

Individuals and legal entities with no tax residence in Spain

Non-Resident Income Tax (Impuesto sobre la Renta de No Residentes)—Non-Spanish tax resident investors acting through a permanent establishment in Spain

Ownership of the Notes by investors who are not resident for tax purposes in Spain will not in itself create the existence of a permanent establishment in Spain.

If the Notes form part of the assets of a permanent establishment in Spain of a person or legal entity who is not resident in Spain for tax purposes, the tax rules applicable to income deriving from such Notes are, generally, the same as those previously set out for Spanish CIT taxpayers. See "*Legal entities with tax residence in Spain—Corporate Income Tax (Impuesto sobre Sociedades).*"

Non-Resident Income Tax (Impuesto sobre la Renta de No Residentes)—Non-Spanish tax resident investors not acting through a permanent establishment in Spain

Both interest payments periodically received and income derived from the transfer, redemption or repayment of the Notes obtained by individuals or entities who are not resident in Spain for tax purposes and do not act, with respect to the Notes, through a permanent establishment in Spain, are exempt from NRIT. However, in order for payments to be exempt from withholding at source, according to Royal Decree 1065/2007, the Paying Agent must comply with the simplified information procedures described in “—Disclosure of Information in Connection to the Notes” below. If the Paying Agent fails to comply with the information procedures, then the related payment will be subject to Spanish withholding tax, (currently at the rate of 21%). In such an event, the Issuer (or the Guarantors, as the case may be) will pay the relevant Noteholder such Additional Amounts as may be necessary in order that the net amount received by such Note holder after such withholding equals the sum of the respective amounts of principal, premium, if any, and interest, if any, which would otherwise have been receivable in respect of the Notes in the absence of such withholding, except as provided in “Description of the Notes—Additional Amounts.”

Finally, regarding the interpretation of “Disclosure of Information in Connection to the Notes” please refer to “Risk Factors—Risks related to the Spanish withholding tax regime.”

Inheritance and Gift Tax (Impuesto sobre Sucesiones y Donaciones)

Individuals not resident in Spain for tax purposes who acquire ownership or other rights over Notes by inheritance, gift or legacy, will be subject to the Spanish Inheritance and Gift Tax in accordance with the applicable Spanish regulations, unless they reside in a country for tax purposes with which Spain has entered into a treaty for the avoidance of double taxation in relation to inheritance tax. In such case, the provisions of the relevant treaty for the avoidance of double taxation will apply.

Non-Spanish tax resident entities which acquire ownership or other rights over Notes by inheritance, gift or legacy are not subject to the Spanish Inheritance and Gift Tax. Such acquisitions will be subject to NRIT (as described above), subject to the provisions of any applicable treaty for the avoidance of double taxation entered into by Spain and the investor’s country of residence. In general, treaties for the avoidance of double taxation provide for the taxation of this type of income in the country of residence of the beneficiary.

Net Wealth Tax (Impuesto sobre el Patrimonio)

According to Law 16/2012 on certain tax measures, Net Wealth Tax was restored for tax period 2013. Law 22/2013, of December 23, on State General Budget for 2014, sets forth the extension of the restoration of this tax for fiscal year 2014.

To the extent that income deriving from the Notes is exempt from NRIT, individuals who do not have tax residency in Spain who hold such Notes are exempt from Net Wealth Tax. Furthermore, individuals resident in a country with which Spain has entered into a double tax treaty in relation to Net Wealth Tax will generally be exempt from Net Wealth Tax. If the exemptions outlined do not apply, individuals who are not tax residents in Spain are subject to Net Wealth Tax to the extent that the Notes are located in Spain or the rights deriving from the Notes can be exercised in Spain. Although it is not entirely clear, the Issuer believes the Notes and the rights deriving from the Notes are deemed to be located in Spain for Net Wealth Tax purposes because the Issuer is a Spanish company.

Non-resident legal entities are not subject to Net Wealth Tax.

Tax Rules for Notes Not Listed on an Organized Market in an OECD Country on any Interest Payment Date

Withholding on Account of PIT, NRIT and CIT

If the Notes are not listed on an organized market in an OECD country on any Interest Payment Date, interest or income from redemption or repayment of the Notes obtained by Noteholders will be subject to withholding tax at the then-applicable withholding tax rate (currently, 21%), except in the case of Noteholders which are: (a) resident in a Member State of the European Union (other than Spain), or a permanent establishment of such residents located in another Member State of the European Union, provided that such Noteholders (i) do not obtain the income on the Notes through a permanent establishment in Spain and (ii) are not resident of, are not located in, nor obtain income through, a tax haven (as defined by Royal Decree 1080/1991, as amended); or (b) resident for tax purposes of a country which has entered into a convention for the avoidance of double taxation with Spain, and applicable to such holder, which provides for an exemption from Spanish tax or a reduced withholding tax rate with respect to interest or income from redemption or repayment of the Notes payable to any Noteholder.

In the event the Notes are not listed on an organized market in an OECD country as described above, and such withholding tax is imposed, the Issuer (or the Guarantors, as the case may be) will pay the relevant Noteholder such Additional Amounts as may be necessary in order that the net amount received by such Noteholder after such withholding equals the same amount which would otherwise have been receivable in respect of the Notes in the absence of such withholding, except as provided in "*Description of the Notes—Additional Amounts.*"

Net Wealth Tax (Impuesto sobre el Patrimonio)

See "*—Individuals with tax residence in Spain—Net Wealth Tax (Impuesto sobre el Patrimonio),*" "*—Legal entities with tax residence in Spain—Net Wealth Tax (Impuesto sobre el Patrimonio)*" and "*—Individuals and legal entities with no tax residence in Spain—Net Wealth Tax (Impuesto sobre el Patrimonio).*"

Inheritance and Gift Tax (Impuesto sobre Sucesiones y Donaciones)

The same Inheritance and Gift Tax rules described above under "*—Individuals with tax residence in Spain—Inheritance and Gift Tax (Impuesto sobre Sucesiones y Donaciones),*" "*—Legal entities with tax residence in Spain—Inheritance and Gift Tax (Impuesto sobre Sucesiones y Donaciones)*" and "*—Individuals and legal entities with no tax residence in Spain—Inheritance and Gift Tax (Impuesto sobre Sucesiones y Donaciones)*" apply in respect of the acquisition of ownership or other rights (by inheritance, gift or legacy) in respect of Notes that are not listed on an organized market.

Disclosure of Information in Connection to the Notes

As described under "*Non-Resident Income Tax (Impuesto sobre la Renta de No Residentes)—Non-Spanish tax resident investors not acting through a permanent establishment in Spain*"; "*—Legal entities with tax residence in Spain—Corporate Income Tax (Impuesto sobre Sociedades)*" and "*—Individuals with tax residence in Spain—Personal Income Tax (Impuesto sobre la Renta de las Personas Físicas)*", and provided, among other conditions set forth in Law 10/2014, that the Notes are listed on an organized market in an OECD country on any income payment date, interest and other financial income paid with respect to the Notes, will not be subject to Spanish withholding tax unless the Paying Agent fails to comply with certain formalities described below.

The tax formalities to be complied with in order to apply the exemption are those laid down in Section 44 of Royal Decree 1065/2007 ("**Section 44**").

In accordance with sub-section 5 and 6 of Section 44, a Payment Statement (the “**Payment Statement**”) must be submitted to the Issuer by the Paying Agent by no later than the close of business of the business day immediately preceding the relevant payment date. In accordance with the form attached as Annex I to Royal Decree 1145/2011, the Payment Statement shall include the following information:

- Identification of the Notes and payment date;
- total amount of income to be paid on the relevant payment date; and
- total amount of income corresponding to Notes held through each clearing system located outside Spain (such as Euroclear and Clearstream).

If this requirement is complied with, the Issuer will pay gross (without deduction of any withholding tax) all interest under the Notes and any payment of income to all Noteholders (irrespective of whether they are tax resident in Spain).

In the event that the Paying Agent designated by Issuer were to fail to provide the information detailed above, according to sub-section 7 of Section 44 of Royal Decree 1065/2007, the Issuer (or the Paying Agent acting on instructions from the Issuer) would be required to withhold tax from the relevant interest or other payment of income at the general withholding tax rate (currently, 21%). If on or before the 10th day of the month following the month in which the interest is payable, the Paying Agent designated by the Issuer were to submit such information, the Issuer (or the Paying Agent acting on instructions from the Issuer) would refund the total amount of taxes withheld.

Notwithstanding the foregoing, if the Issuer has agreed that a payment in respect of the Notes is subject to Spanish withholding tax, the Issuer (or the Guarantors, as the case may be) will pay the relevant Noteholder such Additional Amounts as may be necessary in order that the net amount received by such Noteholder after such withholding equals the same amount which would otherwise have been receivable in respect of the Notes in the absence of such withholding, except as provided in “*Description of the Notes—Additional Amounts.*”

The procedures to be carried out by the Paying Agent pursuant to the Indentures are subject to any changes in Spanish tax law and/or regulations, or the administrative interpretation thereof, which the Spanish Tax Authorities may promulgate from time to time. These procedures are fully described in the Fiscal Agency Agreement, which may be inspected during normal business hours at the specified office of the Paying Agent. None of the Issuer or the Initial Purchasers assume any responsibility therefore.

Tax Rules for Payments made by a Spanish Guarantor

On the basis that payments of principal and interest made by any Spanish Guarantor under the Note Guarantees are characterized as an indemnity under Spanish law, such payments may be made free and clear of, and without withholding or deduction on account of, any Spanish Tax. However, although there is no clear precedent, statement of law, or regulation on this matter, if the Spanish Tax Authorities take the position that the relevant Spanish Guarantor has validly, legally and effectively assumed all the obligations of the Issuer under the Notes (whether contractually or by any other means), the Spanish Tax Authorities may determine that payments made by such Spanish Guarantor relating to the Notes are subject to the same tax rules set out above for payments made by the Issuer.

Should the Spanish Tax Authorities take this position, it should be noted, in particular, that payments of principal and interest made under the Note Guarantees by a Guarantor who is not resident for tax purposes in Spain (“**Non-Spanish Guarantor**”), to individuals or entities who are not resident in Spain for tax purposes and who do not act, with respect to the Notes, through a permanent establishment in Spain (“**Non-resident Noteholders**”), will be regarded as Spanish source income for purposes of the NRIT, to the extent payments of such interest are deemed to remunerate the use of funds in Spanish territory. There are no clear precedents or regulations interpreting when funds obtained through the issuance of notes should be deemed to be used

in Spanish territory, though. In any event, such interest shall be exempt from NRIT, to the extent the new information procedures set forth under Royal Decree 1065/2007 are complied with by the Paying Agent (and provided that the Notes are listed on an organized market on any income payment date). See *"Taxation—Spanish Tax Considerations—Disclosure of Information in Connection to the Notes."*

EU Savings Directive

Under the EU Savings Directive, EU Member States are required to provide to the tax authorities of another EU Member State details of payments of interest (or similar income) made by a person within its jurisdiction to, or collected by such a person for, an individual (or certain other types of person) resident in that other EU Member State. However, for a transitional period, Luxembourg and Austria are instead required (unless during that period they elect otherwise) to operate a withholding system in relation to such payments, requiring payors located in Luxembourg and Austria to deduct tax at a 35% rate (the ending of such transitional period being dependent upon the conclusion of certain other agreements relating to information exchange with certain other countries). The Luxembourg government has announced that it will elect out of the withholding system in favour of automatic exchange of information with effect from 1 January 2015. A number of non-European Union countries and territories have agreed to adopt similar measures (either provision of information or transitional withholding). On 24 March 2014, the Council of the European Union adopted a Directive (Council Directive 2014/48/EU) amending the EU Savings Directive which, when implemented, will amend and potentially broaden the scope of the requirements described above. EU Member States will have until 1 January 2016 to adopt the national legislation necessary to comply with this amending Directive.

If a payment were to be made or collected through an EU Member State which has opted for a withholding system pursuant to the EU Savings Directive or European Council Directive 2014/48/EU and an amount of, or in respect of, tax were to be withheld from that payment, none of the Issuer, the Paying Agent or any other person (including any relevant Guarantor, as the case may be) would be obliged to pay Additional Amounts with respect to any Note as a result of the imposition of such withholding tax. The Issuer is required to maintain and make payments through a paying agent outside of Luxembourg and in an EU Member State that is not obliged to withhold or deduct tax pursuant to the EU Savings Directive. European Council Directive 2014/48/EU, or any other Directive implementing the conclusions of the ECOFIN Council Meeting of 26-27 November 2000, or any law implementing or complying with, or introduced in order to conform to, any such Directives. See *"Description of the Notes—Payments on the Notes; Paying Agents."*

The Proposed EU Financial Transactions Tax

The European Commission has published a proposal to establish the FTT in Belgium, Germany, Estonia, Greece, Spain, France, Italy, Austria, Portugal, Slovenia and Slovakia. The proposed FTT has a very broad scope and could, if introduced in its current proposed form, apply to certain transactions relating to the Notes (including secondary market transactions) in certain circumstances.

Under current proposals the FTT could apply in certain circumstances to persons both within and outside of the Participating Member States. Generally, it would apply to certain transactions relating to the Notes where at least one party is a financial institution (as defined for FTT purposes), and at least one party is established in a Participating Member State. A financial institution may be, or be deemed to be, "established" in a Participating Member State in a broad range of circumstances, including (a) by transacting with a person established in a Participating Member State, or (b) when the financial instrument which is subject to the dealings is issued in a Participating Member State. As a result, the FTT could impose an additional cost on secondary market transactions in the Notes. In May 2014, however, a joint statement by ministers of the Participating Member States (excluding Slovenia) proposed progressive implementation of the FTT, with the initial focus on applying the tax to transactions in shares and some derivatives.

The FTT proposal remains subject to negotiation between the Participating Member States. It may therefore be altered prior to any implementation, the timing of which remains unclear. Additional EU Member States may decide to participate. Prospective holders of the Notes are advised to seek their own professional advice in relation to the FTT.

Certain U.S. Federal Income Tax Considerations

The following is a summary of certain U.S. federal income tax consequences of the acquisition, ownership and disposition of Notes by a U.S. Holder (as defined below). This summary deals only with U.S. Holders that are initial purchasers of Notes at the Issue Price in the Offering and that will hold the Notes as capital assets. The discussion does not cover all aspects of U.S. federal income taxation that may be relevant to, or the actual tax effect that any of the matters described herein will have on, the acquisition, ownership or disposition of Notes by particular investors, and does not address state, local, foreign or other tax laws. This summary also does not discuss all of the tax considerations that may be relevant to certain types of investors subject to special treatment under the U.S. federal income tax laws (such as certain financial institutions, insurance companies, investors liable for the alternative minimum tax, investors liable for the Medicare tax on net investment income, individual retirement accounts and other tax-deferred accounts, tax-exempt organisations, dealers in securities, investors that will hold the Notes as part of straddles, hedging transactions or conversion transactions for U.S. federal income tax purposes or investors whose functional currency is not the U.S. dollar).

As used herein, the term "U.S. Holder" means a beneficial owner of Notes that is, for U.S. federal income tax purposes, (i) an individual citizen or resident of the United States, (ii) a corporation created or organized under the laws of the United States or any State thereof, (iii) an estate the income of which is subject to U.S. federal income tax without regard to its source or (iv) a trust if a court within the United States is able to exercise primary supervision over the administration of the trust and one or more U.S. persons have the authority to control all substantial decisions of the trust, or the trust has validly elected to be treated as a domestic trust for U.S. federal income tax purposes.

The U.S. federal income tax treatment of a partner in an entity treated as a partnership for U.S. federal income tax purposes that holds Notes will depend on the status of the partner and the activities of the partnership. Prospective purchasers that are entities treated as partnerships for U.S. federal income tax purposes and their partners should consult their tax advisers concerning the U.S. federal income tax consequences of the acquisition, ownership and disposition of Notes.

This summary is based on the tax laws of the United States, including the Internal Revenue Code of 1986, as amended, its legislative history, existing and proposed regulations thereunder, published rulings and court decisions, as well as on the income tax treaty between the United States and Spain (the "**Treaty**"), all as of the date hereof and all subject to change at any time, possibly with retroactive effect.

THE SUMMARY OF U.S. FEDERAL INCOME TAX CONSEQUENCES SET OUT BELOW IS FOR GENERAL INFORMATION ONLY. PROSPECTIVE PURCHASERS SHOULD CONSULT THEIR TAX ADVISERS AS TO THE PARTICULAR TAX CONSEQUENCES TO THEM OF OWNING THE NOTES, INCLUDING THEIR ELIGIBILITY FOR THE BENEFITS OF THE TREATY, THE APPLICABILITY AND EFFECT OF STATE, LOCAL, FOREIGN AND OTHER TAX LAWS AND POSSIBLE CHANGES IN TAX LAW.

Characterisation of the Notes

No authority directly addresses the U.S. federal income tax characterisation of securities like the Notes and the Issuer has not and will not seek a ruling from the U.S. Internal Revenue Service ("**IRS**") as to their characterisation for such purposes. To the extent relevant for U.S. federal income tax purposes, the Issuer intends to treat the Notes as indebtedness for such purposes and this discussion assumes that treatment is correct. No assurance can be given that the IRS will not assert, or a court would not sustain, a position regarding the characterisation of the Notes that is contrary to this discussion. If the IRS were to successfully

challenge the characterisation of the Notes as debt, the timing, amount and character of income inclusions on the Notes may be affected. Prospective investors should seek advice from their own tax advisors as to the consequences to them of alternative characterisations of the Notes for U.S. federal income tax purposes.

Payments of Interest

In certain circumstances, the Issuer may redeem, or be obligated to redeem, the Notes at an amount in excess of their stated principal. The Issuer believes that, based on all the facts and circumstances as of the Issue Date of the Notes, the possibility of paying such redemption premium does not result in the Notes being treated as contingent payment debt instruments (“**CPDIs**”) under the applicable Treasury regulations (the “**CPDI Regulations**”) and the Issuer does not intend to treat the Notes as CPDIs. This determination, however, is not binding on the IRS, and if the IRS were to challenge this determination, a U.S. Holder may be required to accrue income on its Notes in excess of stated interest, and to treat as ordinary income rather than capital gain any gain realized on the taxable disposition of Notes. In the event that the Notes were treated as CPDIs, it would affect the amount and timing of the income or gain that a U.S. holder recognises. U.S. Holders are urged to consult their tax advisors regarding the potential application to the Notes of the CPDI Regulations and the consequences thereof. This summary assumes that the Notes will not be treated as CPDIs.

It is expected and this summary assumes that either the Issue Price of the Notes will equal their stated principal amount, or the Notes were issued with less than a *de minimis* amount of “original issue discount.” Generally the Notes are treated as issued with less than a *de minimis* amount of original issue discount if the excess of the Notes’ principal amount over their issue price is less than 0.25% of the principal amount multiplied by the number of complete years to maturity.

Therefore, interest on a Note will be taxable to a U.S. Holder as ordinary income at the time it is received or accrued, depending on the U.S. Holder’s method of accounting for U.S. tax purposes. Regarding interest payments on the Euro Notes, the amount of interest income realized by a U.S. Holder that uses the cash method of tax accounting will be the U.S. dollar value of the payment in euros, based on the exchange rate in effect on the date of receipt regardless of whether the payment is in fact converted to U.S. dollars on such date. A U.S. Holder that uses the accrual method of tax accounting will accrue interest income on its Euro Notes in euros and translate the amount accrued into U.S. dollars based on the average exchange rate in effect during the interest accrual period (or in the case of an accrual period that spans two taxable years of a U.S. Holder, the portion thereof within the U.S. Holder’s taxable year), or at the U.S. Holder’s election at the spot rate of exchange on the last day of the accrual period (or the last day of the taxable year within such accrual period if the accrual period spans two taxable years) or at the spot rate of exchange on the date of receipt, if such date is within five business days of the last day of the accrual period. An accrual basis U.S. Holder that makes such election must apply it consistently to all debt instruments from year to year and cannot change the election without the consent of the IRS. A U.S. Holder that uses the accrual method of tax accounting will recognise foreign currency gain or loss, as the case may be, on the receipt of an interest payment made in euros if the exchange rate in effect on the date the payment is received differs from the rate applicable to its previous accrual of that interest income. This foreign currency gain or loss will be treated as ordinary income or loss but generally will not be treated as an adjustment to interest income received on the Notes.

The amount of interest taxable as ordinary income will include amounts withheld in respect of Spanish taxes, if any. Interest paid by the Issuer on the Notes constitutes income from sources outside the United States. Non-refundable Spanish taxes withheld from interest income on a Note at a rate not exceeding any applicable rate under the Treaty generally will be creditable against the U.S. Holder’s U.S. federal income tax liability, subject to applicable limitations that may vary depending upon the U.S. Holder’s circumstances. The limitation on foreign taxes eligible for credit is calculated separately with respect to specific classes of income. The rules governing foreign tax credits are complex, and U.S. Holders should consult their own tax advisers regarding the availability of foreign tax credits in their particular circumstances. Instead of claiming a credit,

the U.S. Holder may, at its election, deduct such Spanish taxes in computing its taxable income. An election to deduct foreign taxes instead of claiming foreign tax credits must apply to all taxes paid or accrued in the taxable year to foreign countries and possessions of the United States. U.S. Holders should consult their tax advisers concerning the applicability of the foreign tax credit and source of income rules to income attributable to the Notes.

Sale and Retirement of the Notes

A U.S. Holder will generally recognise gain or loss on the sale or retirement of a Note equal to the difference between the amount realized on the sale or retirement and the U.S. Holder's tax basis in the Note. A U.S. Holder's tax basis in a Note will generally be its cost, and the cost of a Euro Note to a U.S. Holder will be the U.S. dollar value of its purchase price in euros on the date of purchase. If the Euro Notes are traded on an "established securities market," a cash basis U.S. Holder, and if it so elects an accrual basis U.S. Holder, will determine the U.S. dollar value of the cost of the Note by translating the amount paid at the spot rate of exchange on the settlement date of the purchase. A U.S. Holder's conversion of U.S. dollars to euros and its immediate use of the euros to purchase a Note generally will not result in taxable gain or loss for the U.S. Holder.

The amount realized does not include the amount attributable to accrued but unpaid interest, which will be taxable as interest income to the extent not previously included in income. If a U.S. Holder receives a currency other than the U.S. dollar in respect of the sale or retirement of a Note, the amount realized will be the U.S. dollar value of the specified currency received calculated at the exchange rate in effect on the date the instrument is sold or retired. If the Euro Notes are traded on an "established securities market," a cash basis U.S. Holder, and if it so elects an accrual basis U.S. Holder, will determine the U.S. dollar value of the amount realized by translating such amount at the spot rate of exchange on the settlement date of the sale or retirement. The election available to accrual basis U.S. Holders in respect of the purchase and sale of Euro Notes if they are traded on an "established securities market," discussed above, must be applied consistently to all debt instruments from year to year and cannot be changed without consent of the IRS.

Gain or loss recognised by a U.S. Holder on the sale or retirement of a Euro Note generally will be capital gain or loss but in the case of a Euro Note will be treated as ordinary income or loss to the extent that the gain or loss is attributable to changes in exchange rates during the period in which the Holder held such Note. This foreign currency gain or loss will not be treated as an adjustment to interest income received on the Notes. Any capital gain or loss will be considered long-term capital gain or loss if the Note was held by the U.S. Holder for more than one year. Gain or loss realized by a U.S. Holder on the sale or retirement of a Note generally will be U.S. source. Consequently, a U.S. Holder may not be able to claim a credit for any foreign tax imposed upon the disposition of a Note unless such credit can be applied (subject to applicable limitations) against its U.S. federal income tax due on other income or gain treated as derived from foreign sources. The deductibility of capital losses is subject to limitations.

Backup Withholding and Information Reporting

Payments of principal, interest on, and the proceeds of sale or other disposition of Notes, by a U.S. paying agent or other U.S. intermediary will be reported to the IRS and to the U.S. Holder as may be required under applicable regulations. Backup withholding may apply to these payments if the U.S. Holder fails to provide an accurate taxpayer identification number or certification of exempt status or fails to report all interest required to be shown on its U.S. federal income tax returns. The amount of any backup withholding from a payment to a U.S. Holder will be allowed as a credit against the U.S. Holder's U.S. federal income tax liability, and may entitle the U.S. Holder to a refund, provided that the required information is timely furnished to the IRS. U.S. Holders should consult their tax advisers as to their qualification for exemption from backup withholding and the procedure for obtaining an exemption.

Foreign Financial Asset Reporting

Certain U.S. Holders who are individuals (and, under proposed Treasury Regulations, certain entities) may be required to report on IRS Form 8938 information relating to securities issued by a non-U.S. person (or foreign accounts through which the securities are held), subject to certain exceptions (including an exception for securities held in accounts maintained by U.S. financial institutions). U.S. Holders should consult their tax advisors regarding their reporting obligations with respect to the Notes.

SUBSCRIPTION AND SALE

Subject to the terms and conditions set forth in a purchase agreement dated September 24, 2014 (the "**Purchase Agreement**") the Issuer agreed to sell to each of HSBC Bank plc, Merrill Lynch International, Crédit Agricole Corporate and Investment Bank, Natixis, Banco Santander, S.A and Société Générale (together, the "**Initial Purchasers**") a set quantity of Notes, and each of them agreed, severally and not jointly, to purchase from the Issuer such quantity of Notes. On September 30, 2014, the total amount of Notes were sold to the Initial Purchasers and re-sold by the Initial Purchasers to qualified institutional buyers under Rule 144A under the U.S. Securities Act and to certain non-U.S. persons (within the meaning of Regulation S under the U.S. Securities Act) in offshore transactions outside the U.S. under Regulation S under the U.S. Securities Act.

The Initial Purchasers offered the Notes initially at the prices indicated on the cover page hereof.

The Notes and the Note Guarantees have not been and will not be registered under the U.S. Securities Act and may not be offered or sold within the United States except to qualified institutional buyers in reliance on Rule 144A under the U.S. Securities Act and to certain non-U.S. persons in offshore transactions in reliance on Regulation S under the U.S. Securities Act. In connection with sales outside the United States, the Initial Purchasers have agreed that they will not offer and sell the Notes (i) as part of their distribution at any time or (ii) otherwise until 40 days after the later of the commencement of the offering and the closing date of this offering to, or for the account or benefit of, U.S. persons, and they will have sent to each dealer to which they sell such Notes during the distribution compliance period a confirmation or other notice setting forth the restrictions on offers and sales of the Notes within the United States or to, or for the account or benefit of, U.S. persons. Terms used in this paragraph have the meanings given to them by Regulation S. The Purchase Agreement provides that the Initial Purchasers may directly or through their respective U.S. broker-dealer affiliates arrange for the offer and resale of Notes within the United States only to qualified institutional buyers in reliance on Rule 144A.

Resales of the Notes are restricted as described under "*Notice to Certain Investors.*"

The Notes have not been and will not be registered with the Kingdom of Spain's Comisión Nacional del Mercado de Valores. Pursuant to the Purchase Agreement, the Notes shall not be distributed or sold in the Primary Market in Spain.

No action has been taken in any jurisdiction, including the United States, Spain and the United Kingdom, by us or the Initial Purchasers that would permit a public offering of the Notes or the possession, circulation or distribution of this Listing Memorandum or any material relating to us or the Notes in any jurisdiction where action for this purpose is required. Accordingly, the Notes may not be offered or sold, directly or indirectly, and neither this Listing Memorandum nor any other offering material or advertisements in connection with the Notes may be distributed or published, in or from any country or jurisdiction, except in compliance with any applicable rules and regulations of any such country or jurisdiction. This Listing Memorandum does not constitute an offer to sell or a solicitation of an offer to purchase in any jurisdiction where such offer or solicitation would be unlawful. Persons into whose possession this Listing Memorandum comes are advised to inform themselves about, and to observe any restrictions relating to, the offering of the Notes, the distribution of this Listing Memorandum and resale of the Notes. See "*Notice to Certain Investors.*"

The Notes are a new issue of securities for which there currently is no market. Application has been made to admit the Notes to the Official List of the Luxembourg Stock Exchange and traded on the Euro MTF Market.

The Initial Purchasers have advised us that they intend to make a market in the Notes as permitted by applicable law. The Initial Purchasers are not obligated, however, to make a market in the Notes, and any market-making activity may be discontinued at any time at the sole discretion of the Initial Purchasers without notice. In addition, any such market-making activity will be subject to the limits imposed by the U.S. Securities Act and the U.S. Exchange Act. Accordingly, we cannot assure you that any market for the Notes will develop, that it will be liquid if it does develop, or that you will be able to sell any Notes at a particular time or at a price

which will be favorable to you. See *“Risk Factors—Risks Related to the Notes—There is no established trading market for the Notes.”*

Delivery of the Notes was made against payment on the Notes on the Issue Date.

In connection with the Offering, the Stabilizing Manager, or persons acting on its behalf, may engage in transactions that stabilize, maintain or otherwise affect the price of the Notes. Specifically, the Stabilizing Manager, or persons acting on its behalf, may bid for and purchase Notes in the open markets in connection with over-allotment, stabilizing transactions, covering transactions and penalty bids in accordance with Regulation M under the U.S. Exchange Act. Over-allotment involves sales in excess of the offering size, which creates a short position for the Stabilizing Manager. Stabilizing transactions permit bidders to purchase the underlying security so long as the stabilizing bids do not exceed a specified maximum. Covering transactions involve purchases of the Notes in the open market after the distribution has been completed in order to cover short positions. Penalty bids permit the Stabilizing Manager to reclaim a selling concession from a broker or dealer when the Notes originally sold by that broker or dealer are purchased in a stabilizing or covering transaction to cover short positions. These activities may stabilize or maintain the respective market price of the Notes above market levels that may otherwise prevail. The Stabilizing Manager is not required to engage in these activities. Such stabilizing, if commenced, may be discontinued at any time, and must be brought to an end after a limited period. Accordingly, no assurance can be given as to the liquidity of, or trading markets for, the Notes. See *“Risk Factors—Risks Related to the Notes—There may not be an active trading market for the Notes, in which case your ability to sell the Notes will be limited.”*

The Initial Purchasers or their affiliates from time to time have provided in the past, and may provide in the future, investment banking, financial advisory, broker dealer and commercial banking services to us and our affiliates in the ordinary course of business for which they have received, or may receive, customary fees and commissions. In addition, one or more of the Initial Purchasers are lenders (either directly or through their affiliates) under certain of our issuances and facilities. In their capacity as lenders, such Initial Purchasers may in the future seek a reduction of a loan commitment to us, or impose incremental pricing or collateral requirements with respect to such facilities or credit agreements. In addition, the Initial Purchasers who are lenders to us and their affiliates routinely hedge their credit exposure to us consistent with their customary risk management policies. Typically, the Initial Purchasers and their affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in our securities, including potentially the Notes. Any such short positions could adversely affect future trading prices of the Notes.

Moreover, in the ordinary course of their various business activities, the Initial Purchasers and their affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (which may include bank loans and/or credit default swaps) for their own account and for the accounts of their customers and may at any time hold long and short positions in such securities and instruments. Such investment and securities activities involve our securities and instruments. The Initial Purchasers and their affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

NOTICE TO CERTAIN INVESTORS

You are advised to consult legal counsel prior to making any offer, resale, pledge or other transfer of any of the Notes.

The Notes and the Note Guarantees have not been and will not be registered under the U.S. Securities Act, or with any securities regulatory authority of any state of the United States or other jurisdiction, and, unless so registered, may not be offered or sold except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, the Notes were sold only to persons reasonably believed to be qualified institutional buyers (as defined in Rule 144A under the U.S. Securities Act) in reliance on Rule 144A under the U.S. Securities Act and offered and sold to non-U.S. persons in offshore transactions in reliance on Regulation S under the U.S. Securities Act.

We have not registered, and will not register, the Notes or the Note Guarantees under the U.S. Securities Act, and, therefore, the Notes may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act. Accordingly, we offered and sold the Notes to the Initial Purchasers for re-offer and resale only:

- (i) in the United States to persons reasonably believed to be “qualified institutional buyers,” commonly referred to as “QIBs,” as defined in Rule 144A in compliance with Rule 144A; and
- (ii) outside the United States to non-U.S. persons in an offshore transaction in accordance with Regulation S.

We use the terms “offshore transaction,” “U.S. person” and “United States” with the meanings given to them in Regulation S of the U.S. Securities Act.

Each purchaser of Notes, by its acceptance thereof, will be deemed to have acknowledged, represented to and agreed with us and the Initial Purchasers as follows:

- (i) You understand and acknowledge that the Notes and the Note Guarantees have not been registered under the U.S. Securities Act or with any securities regulatory authority of any state of the United States or other jurisdiction and that the Notes are being offered for resale in transactions not requiring registration under the U.S. Securities Act or any other securities laws, including sales pursuant to Rule 144A under the U.S. Securities Act, and, unless so registered, may not be offered, sold or otherwise transferred except in compliance with the registration requirements of the U.S. Securities Act or any other applicable securities laws, pursuant to an exemption therefrom or in any transaction not subject thereto and in each case in compliance with the conditions for transfer set forth in paragraphs (iv) and (v) below.
- (ii) You are not our “affiliate” (as defined in Rule 144 under the U.S. Securities Act) or acting on our behalf, and either:
 - (1) you are a QIB, within the meaning of Rule 144A under the U.S. Securities Act and are aware that any sale of these Notes to you will be made in reliance on Rule 144A under the U.S. Securities Act, and such acquisition will be for your own account or for the account of another QIB; or
 - (2) you are not a U.S. person or purchasing for the account or benefit of a U.S. person, other than a distributor, and you are purchasing the Notes in an offshore transaction in accordance with Regulation S under the U.S. Securities Act.
- (iii) You acknowledge that none of us, the Guarantors, or the Initial Purchasers, nor any person representing them, has made any representation to you with respect to us or the offer or sale of any of the Notes, other than the information contained in this Listing Memorandum, which Listing

Memorandum has been delivered to you and upon which you are relying in making your investment decision with respect to the Notes. You acknowledge that neither the Initial Purchasers nor any person representing the Initial Purchasers make any representation or warranty as to the accuracy or completeness of this Listing Memorandum. You have had access to such financial and other information concerning us and the Notes as you have deemed necessary in connection with your decision to purchase any of the Notes, including an opportunity to ask questions of, and request information from, us and the Initial Purchasers.

- (iv) You are purchasing the Notes for your own account, or for one or more investor accounts for which you are acting as a fiduciary or agent, in each case for investment, and not with a view to, or for offer or sale in connection with, any distribution thereof in violation of the U.S. Securities Act or any state securities laws, subject to any requirement of law that the disposition of your property or the property of such investor account or accounts be at all times within its, or their control, and subject to your or their ability to resell such Notes pursuant to Rule 144A, Regulation S or any other exemption from registration available under the U.S. Securities Act.
- (v) You agree on your own behalf and on behalf of any investor account for which you are purchasing the Notes, and each subsequent Noteholder by its acceptance thereof will be deemed to agree, to offer, sell or otherwise transfer such Notes prior to the date (the “**Resale Restriction Termination Date**”) that is one year (in the case of Rule 144A Notes) or 40 days (in the case of Regulation S Notes) after the later of the date of the original issue and the last date on which we or any of our affiliates were the owner of such Notes (or any predecessor thereto) only: (a) to us; (b) pursuant to a registration statement that has been declared effective under the U.S. Securities Act; (c) for so long as the Notes are eligible pursuant to Rule 144A under the U.S. Securities Act, to a person you reasonably believe is a QIB that purchases for its own account or for the account of a QIB to whom notice is given that the transfer is being made in reliance on Rule 144A under the U.S. Securities Act; (d) pursuant to offers and sales that occur outside the United States to non-U.S. persons in compliance with Regulation S under the U.S. Securities Act; or (e) pursuant to any other available exemption from the registration requirements of the U.S. Securities Act, subject in each of the foregoing cases to any requirement of law that the disposition of its property or the property of such investor account or accounts be at all times within its or their control and to compliance with any applicable state securities laws, and any applicable local laws and regulations, and further subject to our and the Trustee’s rights prior to any such offer, sale or transfer: (I) pursuant to clauses (d) and (e) to require the delivery of an opinion of counsel, certification and/or other information satisfactory to each of them; and (II) in each of the foregoing cases, to require that a certificate of transfer in the form appearing on the reverse of the security is completed and delivered by the transferor to the Trustee. The foregoing restrictions on resale will not apply subsequent to the Resale Restriction Termination Date.

Each purchaser acknowledges that each Note will contain a legend substantially to the following effect:

THIS SECURITY HAS NOT BEEN AND WILL NOT BE REGISTERED UNDER THE U.S. SECURITIES ACT OF 1933, AS AMENDED (THE “U.S. SECURITIES ACT”) OR WITH ANY SECURITIES REGULATORY AUTHORITY OF ANY STATE OF THE UNITED STATES OR OTHER JURISDICTION OF ANY STATE OR OTHER JURISDICTION. NEITHER THIS SECURITY NOR ANY INTEREST OR PARTICIPATION HEREIN MAY BE OFFERED, SOLD, ASSIGNED, TRANSFERRED, PLEDGED, ENCUMBERED OR OTHERWISE DISPOSED OF IN THE ABSENCE OF SUCH REGISTRATION OR UNLESS SUCH TRANSACTION IS EXEMPT FROM, OR NOT SUBJECT TO, THE REGISTRATION REQUIREMENTS OF THE U.S. SECURITIES ACT. THE HOLDER OF THIS SECURITY BY ITS ACCEPTANCE HEREOF AGREES ON ITS OWN BEHALF AND ON BEHALF OF ANY INVESTOR FOR WHICH IT HAS PURCHASED SECURITIES TO OFFER, SELL OR OTHERWISE TRANSFER SUCH SECURITY, PRIOR TO THE DATE (THE “RESALE RESTRICTION TERMINATION DATE”) WHICH IS [IN THE CASE OF RULE 144A NOTES: ONE YEAR] [IN THE CASE OF

REGULATION S NOTES: 40 DAYS] AFTER THE LATER OF THE ORIGINAL ISSUE DATE HEREOF AND THE LAST DATE ON WHICH THE ISSUER OR ANY AFFILIATE OF THE ISSUER WAS THE OWNER OF THIS SECURITY (OR ANY PREDECESSOR OF THIS SECURITY) ONLY (A) TO THE ISSUER, (B) PURSUANT TO A REGISTRATION STATEMENT WHICH HAS BEEN DECLARED EFFECTIVE UNDER THE U.S. SECURITIES ACT, (C) FOR SO LONG AS THE SECURITIES ARE ELIGIBLE FOR RESALE PURSUANT TO RULE 144A UNDER THE U.S. SECURITIES ACT ("RULE 144A"), TO A PERSON IT REASONABLY BELIEVES IS A "QUALIFIED INSTITUTIONAL BUYER" AS DEFINED IN RULE 144A THAT PURCHASES FOR ITS OWN ACCOUNT OR FOR THE ACCOUNT OF A QUALIFIED INSTITUTIONAL BUYER TO WHOM NOTICE IS GIVEN THAT THE TRANSFER IS BEING MADE IN RELIANCE ON RULE 144A, (D) PURSUANT TO OFFERS AND SALES THAT OCCUR OUTSIDE THE UNITED STATES TO NON-U.S. PERSONS IN COMPLIANCE WITH REGULATION S UNDER THE U.S. SECURITIES ACT OR (E) PURSUANT TO ANY OTHER AVAILABLE EXEMPTION FROM THE REGISTRATION REQUIREMENTS OF THE U.S. SECURITIES ACT, SUBJECT IN EACH OF THE FOREGOING CASES TO ANY REQUIREMENT OF LAW THAT THE DISPOSITION OF ITS PROPERTY OR THE PROPERTY OF SUCH INVESTOR ACCOUNT OR ACCOUNTS BE AT ALL TIMES WITHIN ITS OR THEIR CONTROL AND TO COMPLIANCE WITH ANY APPLICABLE STATE SECURITIES LAWS, AND ANY APPLICABLE LOCAL LAWS AND REGULATIONS AND FURTHER SUBJECT TO THE ISSUER'S AND THE TRUSTEE'S RIGHTS PRIOR TO ANY SUCH OFFER, SALE OR TRANSFER: (I) PURSUANT TO CLAUSE (E) TO REQUIRE THE DELIVERY OF AN OPINION OF COUNSEL, CERTIFICATION AND/OR OTHER INFORMATION SATISFACTORY TO EACH OF THEM AND (II) IN EACH OF THE FOREGOING CASES, TO REQUIRE THAT A CERTIFICATE OF TRANSFER IN THE FORM APPEARING ON THE OTHER SIDE OF THIS SECURITY IS COMPLETED AND DELIVERED BY THE TRANSFEROR TO THE TRUSTEE AND (III) AGREES THAT IT WILL GIVE TO EACH PERSON TO WHOM THIS SECURITY IS TRANSFERRED A NOTICE SUBSTANTIALLY TO THE EFFECT OF THIS LEGEND.

If you purchase Notes, you will also be deemed to acknowledge that the foregoing restrictions apply to holders of beneficial interests in these Notes as well as to holders of these Notes.

- (vi) You agree that you will give to each person to whom you transfer the Notes notice of any restrictions on the transfer of such Notes.
- (vii) You acknowledge that until 40 days after the commencement of the offering, any offer or sale of the Notes within the United States by a dealer (whether or not participating in the offering) may violate the registration requirements of the U.S. Securities Act if such offer or sale is made otherwise than in accordance with Rule 144A under the U.S. Securities Act.
- (viii) You acknowledge that the Registrar will not be required to accept for registration or transfer any Notes acquired by you except upon presentation of evidence satisfactory to us and the Registrar that the restrictions set forth therein have been complied with.
- (ix) You acknowledge that we, the Initial Purchasers and others will rely upon the truth and accuracy of your acknowledgements, representations, warranties and agreements and agrees that if any of the acknowledgements, representations, warranties and agreements deemed to have been made by your purchase of the Notes are no longer accurate, it shall promptly notify the Initial Purchasers. If you are acquiring any Notes as a fiduciary or agent for one or more investor accounts, you represent that you have sole investment discretion with respect to each such investor account and that you have full power to make the foregoing acknowledgements, representations and agreements on behalf of each such investor account.

LEGAL MATTERS

Certain legal matters in connection with the Offering are being passed upon for us by DLA Piper UK LLP with respect to matters of U.S. federal and New York state law and English law, by DLA Piper Spain S.L. with respect to matters of Spanish law, by SFME Advogados with respect to matters of Brazilian law, by DLA Piper Nederland N.V. with respect to matters of Dutch law, by González Calvillo, S.C. with respect to matters of Mexican law, by Guyer & Regules with respect to matters of Uruguay law and by Dentons U.S. LLP with respect to matters of Delaware, Kansas, Missouri, Nebraska and New York state law.

INDEPENDENT AUDITORS

Our audited consolidated financial statements as of and for the year ended December 31, 2013 included elsewhere in this Listing Memorandum have been audited by Deloitte, S.L., independent registered public accounting firm as stated in their report.

Our audited consolidated financial statements as of and for the year ended December 31, 2012 included elsewhere in this Listing Memorandum have been audited by Deloitte, S.L., independent registered public accounting firm as stated in their report.

Our audited consolidated financial statements for the year ended December 31, 2011 included elsewhere in this Listing Memorandum have been audited by PricewaterhouseCoopers Auditores, S.L., independent registered public accounting firm, as stated in their report.

At the proposal of the Board of Directors and the Audit Committee, the General Shareholders' Meeting held on April 1, 2012 approved the appointment of Deloitte, S.L. as its independent auditor for Abengoa's consolidated group and for its subsidiaries for the fiscal years ending December 31, 2012, 2013 and 2014. As a consequence, PricewaterhouseCoopers Auditores, S.L., is no longer the independent auditor of Abengoa.

Deloitte, S.L. is registered with the Registro Oficial de Auditores de Cuentas in Spain and has its registered address at Plaza Pablo Ruiz Picasso, 1, Torre Picasso, 28020, Madrid, Spain. Deloitte, S.L. was appointed as independent auditor of Abengoa on April 1, 2012.

PricewaterhouseCoopers Auditores, S.L., is registered with the Registro Oficial de Auditores de Cuentas in Spain and has its registered address at Torre PwC, Paseo de la Castellana, 259B, 28046, Madrid, Spain.

AVAILABLE INFORMATION

For so long as any of the Notes remain outstanding and are “restricted securities” within the meaning of Rule 144(a)(3) under the U.S. Securities Act, we will, during any period in which we are not subject to Section 13 or 15(d) under the U.S. Exchange Act, nor exempt from reporting thereunder pursuant to Rule 12g3-2(b), make available to any holder or beneficial holder of Notes, or to any prospective purchaser of Notes designated by such holder or beneficial holder, the information specified in, and meeting the requirements of, Rule 144A(d)(4) under the U.S. Securities Act upon the written request of any such holder or beneficial owner.

We are a listed company on the Madrid and Barcelona stock exchanges and traded on the Spanish automated quotation system (*Sistema de Interconexión Bursátil Español—SIBE*). While we remain as a listed company, we have to comply with the reporting requirements established on the Spanish Securities Act and related regulations. Among other obligations, we must timely publish on the CNMV website any relevant information (*hecho relevante*) that may substantially affect the price of our shares listed. We are also obligated to submit to the CNMV for disclosing interim (quarterly and semiannual) and annual financial information of Abengoa, including our annual reports on corporate governance and on remuneration of directors, among others.

Since October 17, 2013 we are also a listed company on the NASDAQ Global Select Market and while we remain listed on the NASDAQ Global Select Market we must comply with the reporting and governance requirements under the Securities Exchange Act of 1934, as amended, and the listing rules of the NASDAQ Global Select Market, as a foreign private issuer.

Pursuant to the Indenture, we have agreed to furnish periodic information to the holders of the Notes. See “*Description of the Notes—Certain Covenants—Reports to Holders of the Notes.*”

Application has been made to admit the Notes to the Official List of the Luxembourg Stock Exchange and traded on the Euro MTF Market.

SERVICE OF PROCESS AND ENFORCEMENT OF CIVIL LIABILITIES

We are a limited company (*sociedad anónima unipersonal*) organized under the laws of the Kingdom of Spain and our Guarantors are organized or incorporated under the laws of England and Wales, Spain, Mexico, Brazil, Uruguay, The Netherlands and the United States. Many of our and the Guarantors' directors, officers and other executives are neither residents nor citizens of the United States. Furthermore, most of our and the Guarantors' assets are located outside the United States. As a result, it may not be possible for investors to effect service of process within the United States upon such persons or us, or to enforce against them or us, judgments of U.S. courts predicated upon the civil liability provisions of U.S. federal or state securities laws despite the fact that, pursuant to the terms of the Indenture, we and the Guarantors have appointed, or will appoint, an agent for the service of process in New York. It may be possible for investors to effect service of process within Spain, Mexico, Brazil, Uruguay and The Netherlands upon those persons or us or over our subsidiaries provided that either The Hague Convention on the Service Abroad of Judicial and Extrajudicial Documents in Civil or Commercial Matters of November 15, 1965 and/or any other applicable law is complied with.

We have been advised by our legal counsel that there is doubt that a lawsuit based upon U.S. federal or state securities laws could be brought in an original action in Spain, Mexico, Brazil and Uruguay and that a foreign judgment based upon U.S. securities laws would be enforced in such countries. Therefore, a final judgment for the payment of money rendered by any federal or state court in the United States based on civil liability, whether or not based on United States federal or state securities laws, may not be automatically enforceable in England and Wales, Spain, Mexico, Brazil, Uruguay and The Netherlands.

A judgment rendered by a U.S. federal or state court will not be recognised and enforced by the Dutch courts. However, if a person has obtained a final and conclusive judgment for the payment of money rendered by a U.S. federal or state court which is enforceable in the U.S. (or relevant state) and files his claim with the competent Dutch court, the Dutch court will generally give binding effect to the judgment of the relevant court in the U.S. insofar as it finds that the jurisdiction of the U.S. federal or state court has been based on grounds which are internationally acceptable and that proper legal procedures have been observed and unless the foreign judgment contravenes Dutch public policy.

LISTING AND GENERAL INFORMATION

6 Financial Information

Deloitte, S.L., whose address is Plaza Pablo Ruiz Picasso 1, Torre Picasso, 28020, Madrid, Spain, is the auditor of Abengoa, S.A. and has audited the consolidated annual financial statements of Abengoa, S.A. for the years ended December 31, 2013 and 2012. The reports in respect of such annual financial statements were unqualified.

PricewaterhouseCoopers Auditores, S.L., whose address is Edificio Pórtico, Concejal Francisco Ballesteros, 4, 41018, Seville, Spain, was the auditor of Abengoa, S.A. and audited the consolidated annual financial statements of Abengoa, S.A. for the year ended December 31, 2011. The report in respect of such annual financial statements was unqualified.

7 Documents on Display

So long as the Notes are listed in the Official List of the Luxembourg Stock Exchange and admitted to trading on the Euro MTF market and the rules of the Luxembourg Stock Exchange shall so require, copies of the following documents (and, where appropriate, English translations) will be available free of charge at the offices of the Listing Agent in Luxembourg and may be inspected during normal business hours at the offices of Abengoa at Avenida de la Buhaira, 2, 41018, Seville, Spain for so long as any of the Notes remain outstanding.

Documents on display:

- (a) the constitutional documents (with an English translation thereof) of the Issuer and the constitutional documents (with, where relevant, an English translation thereof) of each Guarantor;
- (b) the Consolidated Financial Statements of Abengoa, S.A. in respect of the financial years ended December 31, 2013, 2012, 2011 and future consolidated financial statements of Abengoa, S.A. as long as the Notes are listed in the Official List of the Luxembourg Stock Exchange (with an English translation thereof) together with the audit reports and the consolidated directors' reports in connection therewith;
- (c) the Interim Consolidated Financial Statements of Abengoa, S.A. in respect of the six months ended June 30, 2014 and 2013 (with an English translation thereof) together with the consolidated directors' reports in connection therewith;
- (e) the Indenture, including the Note Guarantees contained therein; and
- (f) a copy of this Listing Memorandum.

The Issuer does not prepare or publish semi-annual or quarterly financial statements. Future annual reports of the Issuer will be available free of charge.

8 Initial Purchasers Transacting with the Issuer and the Guarantors

The Initial Purchasers and their affiliates have engaged, and may in the future engage, in investment banking and/or commercial banking transactions with, and may perform services for the Issuer, the Guarantors and their affiliates in the ordinary course of business.

9 Available Information

We have agreed that, for so long as any Notes are "restricted securities" within the meaning of Rule 144(a)(3) under the U.S. Securities Act, we will, during any period in which we are neither subject to Section 13 or 15(d) of the Exchange Act nor exempt from reporting pursuant to Rule 12g3-2(b) thereunder, provide to any holder or beneficial owner of such restricted securities or to any prospective purchaser of such restricted securities designated by such holder or beneficial owner for delivery to such holder, beneficial owner or prospective purchaser, in each case upon the request of such holder, beneficial owner, prospective purchaser, the information required to be provided by Rule 144A(d)(4) under the U.S. Securities Act.

10 Third-party Information

Where information in this Listing Memorandum has been sourced from third parties, this information has been accurately reproduced, and, as far as the Issuer and the Guarantors are aware and are able to ascertain from the information published by such third parties, no facts have been omitted which would render the reproduced information inaccurate or misleading. The source of third-party information is identified where used.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders of
Abengoa, S.A.:

We have audited the accompanying consolidated statements of financial position of Abengoa, S.A. and subsidiaries (the "Company") as of December 31, 2013 and 2012, and the related consolidated income statements, the consolidated statements of comprehensive income (loss), the consolidated statements of changes in equity and the consolidated cash flow statements for each of the years in the two-year period ended December 31, 2013. These consolidated financial statements are the responsibility of Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States of America). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statements presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Abengoa, S.A. and subsidiaries as of December 31, 2013 and 2012, and the results of their operations and their cash flows for each of the years in the two-year period ended December 31, 2013, in conformity with International Financial Reporting Standards ("IFRS"), as issued by the International Accounting Standards Boards.

As discussed in Note 2.1.1 to the consolidated financial statements, the Company, as of January 1, 2013, adopted IFRS 10-Consolidated Financial Statements and IFRS 11-Joint Arrangements which were applied to the years ended December 31, 2013 and 2012. As allowed by the transition guidance in IFRS 10-Consolidated Financial Statements and IFRS 11-Joint Arrangements, the mentioned standards were not applied to the year ended December 31, 2011.

Seville, Spain
March 14, 2014

Report of Independent Registered Public Accounting Firm

To the shareholders of
Abengoa, S.A.
Seville, Spain

In our opinion, the consolidated income statement, statement of comprehensive income, statement of changes in equity and statement of cash flows for the period ended December 31, 2011 present fairly, in all material respects, the results of operations and cash flows of Abengoa, S.A. and its subsidiaries for the period ended December 31, 2011, in conformity with International Financial Reporting Standards as issued by the International Accounting Standards Board. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

Notes to the consolidated financial statements

Note 1. — General information

Abengoa, S.A. is the parent company of the Abengoa Group (referred to hereinafter as 'Abengoa', 'the Group' or 'the Company'), which at the end of 2013, was made up of 578 companies: the parent company itself, 534 subsidiaries, 19 associates and 24 joint ventures. Additionally, as of the end of 2013, certain subsidiaries were participating in 227 temporary joint operations (UTE) and, furthermore, the Group held a number of interests, of less than 20%, in several other entities.

Abengoa, S.A. was incorporated in Seville, Spain on January 4, 1941 as a Limited Liability Company and was subsequently transformed into a Limited Liability Corporation ('S.A.' in Spain) on March 20, 1952. Its registered office is Campus Palmas Altas, C/ Energía Solar nº 1, 41014 Seville.

The Group's corporate purpose is set out in Article 3 of its Bylaws. It covers a wide range of activities, although Abengoa is principally an applied engineering and equipment manufacturer, providing integrated project solutions to customers in the following sectors: energy, telecommunications, transport, water utilities, environmental, industrial and service.

On October 17, 2013 Abengoa carried out a capital increase of 250,000,000 class B shares and on October 29, 2013 the Company issued, as a result of the exercise of the option to purchase additional shares to cover over-allotment by the underwriters of the capital increase, 37,500,000 additional Class B shares ('greenshoe' option).

Abengoa's shares are represented by class A and B shares which are listed on the Madrid and Barcelona stock exchanges and on the Spanish Stock Exchange Electronic Trading System (Electronic Market). Class A shares have been listed since November 29, 1996 and class B shares since October 25, 2012. Additionally, Class B shares are also listed on the NASDAQ Global Select Market in the form of American Depositary Shares from October 29, 2013 as mentioned above (see Note 18) The Company presents mandatory financial information quarterly and semiannually.

Abengoa is an international company that applies innovative technology solutions for sustainability in the energy and environment sectors, generating electricity from renewable resources, converting biomass into biofuels and producing drinking water from sea water. The Company supplies engineering projects under the 'turnkey' contract modality and operates assets that generate renewable energy, produce biofuel, manage water resources, desalinate sea water and treat sewage.

Abengoa's activity and the internal and external management information are organized under the following three activities:

- Engineering and construction: includes our traditional engineering activities in the energy and water sectors, with more than 70 years of experience in the market and the development of thermo-solar technology. Abengoa is specialized in carrying out complex turn-key projects for thermo-solar plants, solar-gas hybrid plants, conventional generation plants, biofuels plants and water infrastructures, as well as large-scale desalination plants and transmission lines, among others.
- Concession-type infrastructures: groups together the company's extensive portfolio of proprietary concession assets that generate revenues governed by long-term sales agreements, such as take-or-pay contracts, tariff contracts or power purchase agreements. This activity includes the operation of electric (solar, cogeneration or wind) energy generation plants and transmission lines. These assets generate low demand risk and the Company focuses on operating them as efficiently as possible.

- Industrial production: covers Abengoa's businesses with a commodity component, such as biofuels and industrial waste recycling (until the sale of shareholding in Befesa Medio Ambiente, S.L.U. (Befesa), see Note 7.1). The Company holds an important leadership position in these activities in the geographical markets in which it operates.

These Consolidated Financial Statements were approved by the Chief Executive Officer on March 12, 2014.

All public documents on Abengoa may be viewed at www.abengoa.com.

Note 2. — Significant accounting policies

The significant accounting policies adopted in the preparation of the accompanying Consolidated Financial Statements are set forth below:

2.1. Basis of presentation

The Consolidated Financial Statements as of December 31, 2013 and 2012, and for the three years ended December 31, 2013, 2012 and 2011 have been prepared in accordance with International Financial Reporting Standards Board (herein, IFRS), as issued by the International Accounting Standard Board (IASB) and, they present the Group's consolidated statement of financial position as of December 31, 2013 and 2012 and January 1, 2012 and the consolidated income statements, consolidated statements of comprehensive income, consolidated statements of change in equity and the consolidated cash flows statements for the years ended December 31, 2013, 2012 and 2011.

Unless otherwise stated, the accounting policies set out below have been applied consistently throughout all periods presented within these Consolidated Financial Statements.

The Consolidated Financial Statements have been prepared under the historical cost convention, modified by the revaluation of certain available-for-sale non-current financial assets under IFRS 1 and with the exception of those situations where IFRS requires that financial assets and financial liabilities are measured at fair value.

The preparation of the Consolidated Financial Statements under IFRS requires the use of certain critical accounting estimates. It also requires that Management exercises its judgment in the process of applying Abengoa's accounting policies. Note 3 provides further information on those areas which involve a higher degree of judgment or areas of complexity for which the assumptions or estimates made are significant to the financial statements.

The amounts included within the documents comprising the Consolidated Financial Statements (Consolidated Statement of Financial Position, Consolidated Income Statement, Consolidated Statement of Comprehensive Income, Consolidated Statement of Changes in Equity, Consolidated Cash Flow Statement and notes herein) are, unless otherwise stated, all expressed in thousands of Euros (€).

Unless otherwise stated, any presented percentage of interest in subsidiaries, joint ventures (including temporary joint operations) and associates includes both direct and indirect ownership.

2.1.1. Application of new accounting standards

- a) Standards, interpretations and amendments published by the IASB effective from January 1, 2013, applied prospectively by the Group:
- IFRS 13 'Fair value measurement'. IFRS 13 defines fair value, sets out a framework for measuring fair value in a single IFRS and requires disclosures about fair value measurements.

According to IFRS 13, this standard has been applied prospectively from the beginning of the annual period in which it is initially applied. The disclosure requirements of this IFRS do not need to be applied to compare information provided for periods prior to the initial application of this IFRS.

The main impact relates to the measurement of the financial derivatives that the Group has, including call options on Abengoa's own shares that were signed to hedge the convertible notes as well as the embedded derivative in the convertible notes (see Note 14). This impact is not significant on the Consolidated Financial Statements.
 - International Accounting Standard (IAS) 1 (amendment) 'Financial statements presentation'. The main change resulting from this amendment is a requirement to group items presented in 'other comprehensive income' (OCI) into two categories on the basis of whether or not they will be subsequently reclassified to profit or loss (reclassification adjustments).
- b) Standards, interpretations and amendments published by the IASB effective from January 1, 2013 applied retrospectively by the Group:
- IFRS 10 'Consolidated Financial Statements'. IFRS 10 supersedes current consolidation requirements of IAS 27 and establishes principles for the presentation and preparation of Consolidated Financial Statements when an entity controls one or more other entities. IFRS 10 modifies the former definition of control. The new definition of control sets out the following three elements: power over the investee; exposure, or rights, to variable returns from involvement with the investee; and the ability to use power over the investee to affect the amount of the investor's returns.
 - IFRS 11 'Joint Arrangements'. IFRS 11 supersedes the current IAS 31 about joint ventures, and under this standard investments in joint arrangements are classified either as joint operations or joint ventures, depending on the contractual rights and obligations each investor has rather than just the legal structure of the joint arrangement. Joint operations arise where a joint operator has rights to the assets and obligations relating to the arrangement and hence accounts for its interest in assets, liabilities, revenue and expenses. Joint ventures arise where the joint operator has rights to the net assets of the arrangement and accounts for its interest under the equity method. Proportional consolidation of joint ventures is no longer allowed.
 - IFRS 12 'Disclosures of Interests in Other Entities'. IFRS 12 defines the required disclosures of interests in subsidiaries, associates, joint ventures and non-controlling interests.

- IAS 27 (amendment) 'Separated Financial Statements'. After the publication of IFRS 10 has been published, IAS 27 covers only separate financial statements.
- IAS 28 (amendment) 'Associates and Joint Ventures'. IAS 28 has been amended to include the requirements for joint ventures to be accounted for under the equity method following the issuance of IFRS 11.
- IFRS 10, IFRS 11 and IFRS 12 (amendments) 'Transition guidance'.

The main impacts of the application of the new standards IFRS 10 and 11, as well as the amendments to IAS 27 and 28, in relation to what was applied previously, relate to:

- (i) The de-consolidation of companies that do not fulfill the conditions of effective control of the interest in terms of decision making and leading to their integration in the consolidated financial statements according to the equity method. It is expected that some of these projects have been de-consolidated in the construction phase because they do not fulfill the control requirements and will be fully consolidated again once they enter into operation and control over them is gained.
- (ii) The elimination of the proportional consolidation for the joint ventures, with the equity method being applied instead.

According to the terms and requirements established in IAS 8 'Accounting policies, changes in accounting estimates and errors', the above standards and amendments were retrospectively applied, recasting the comparison information presented for the year 2012. The above standards and amendments have already been applied in the Consolidated Financial statements as of December 31, 2012, presented in Abengoa's Form F-1. Consolidated Financial Statements as of December, 31, 2011 have not been recasted according to the transition guidance of IFRS 10. Additionally, according to IAS 1 (40A), a third consolidated statement of financial position as of the beginning of the preceding period, which is January 1, 2012, has been presented applying the new accounting standards. According to IAS 1 (40c), it has not been necessary to present the notes relating to the consolidated statement of position as of January 1, 2012.

The effect of the de-consolidation of the affected companies and their integration according to the equity method on the Consolidated Statements of Financial Position as of December 31, 2012 and January 1, 2012 is shown below:

	<u>Balance as of 12.31.12</u>	<u>Balance as of 01.01.12</u>
Assets		
Intangible assets and Property, Plant & Equipment	(25,212)	2,198
Fixed assets in projects (project finance)	(2,341,152)	(1,501,341)
Investments in associates carried under the equity method	855,627	647,945
Financial investments	31,775	30,679
Deferred tax assets	(18,976)	(7,283)
Current assets	237,834	(15,239)
Total assets	<u>(1,260,104)</u>	<u>(843,041)</u>
Equity and liabilities		
Equity	(19,959)	20,584
Long-term non-recourse project financing	(1,707,460)	(876,168)
Long-term corporate financing	(40)	6,884
Other non-current liabilities	(189,989)	(92,164)
Current liabilities	657,344	97,823
Total equity and liabilities	<u>(1,260,104)</u>	<u>(843,041)</u>

In addition, the effect of this de-consolidation on the consolidated income statement for the year 2012 is shown below:

	<u>For the year ended 12.31.12</u>
Revenue	(57,235)
Other operating income	(64,756)
Operating expenses	62,745
I. Operating profit	(59,246)
II. Financial expense, net	27,487
III. Share of profit/(loss) of associates carried under the equity method	19,477
IV. Profit before income tax	(12,282)
V. Income tax benefit	7,823
VI. Profit for the period from continuing operations	(4,459)
VII. Profit attributable to non-controlling interests	4,459
VIII. Profit for the period attributable to the parent company	—

c) Standards, interpretations and amendments published by the IASB that will be effective for periods beginning on or after January 1, 2014:

- IAS 32 (amendment) 'Offsetting of financial assets and financial liabilities'. The IAS 32 amendment is mandatory for periods beginning on or after January 1, 2014 under IFRS-EU and IFRS-IASB and is to be applied retroactively.

- IAS 36 (Amendment) 'Recoverable Amount Disclosures for Non-Financial Assets'. The IAS 36 amendment is mandatory for periods beginning on or after January 1, 2014 under IFRS-EU and IFRS-IASB.
- IAS 39 (Amendment) 'Novation of Derivatives and Continuation of Hedge Accounting'. The IAS 39 amendment is mandatory for periods beginning on or after January 1, 2014 under IFRS-EU and IFRS-IASB.
- IFRS 9 'Financial Instruments'. This Standard will be effective from January 1, 2018 under IFRS-IASB and has not yet been adopted by the EU.

The Group is currently in the process of evaluating the impact on the Consolidated Financial Statement derived from the application of these new standards.

2.2. Principles of consolidation

In order to provide information on a consistent basis, the same principles and standards applied to the parent company have been applied to all other consolidated entities.

All subsidiaries, associates and joint ventures included in the consolidated group for the years 2013, 2012 and 2011 that form the basis of these Consolidated Financial Statements are set out in Appendices I (XII and XVII), II (XIII and XVIII) and III (XIV and XIX), respectively.

Note 6 of these Consolidated Financial Statements reflects the information on the changes in the composition of the Group.

a) Subsidiaries

Subsidiaries are those entities over which Abengoa has control.

Control is achieved when the Company:

- has power over the investee;
- is exposed, or has rights, to variable returns from its involvement with the investee; and
- has the ability to use its power to affect its returns.

The Company reassesses whether or not it controls an investee when facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

The Company operates an integrated business model in which it provides complete services from initial design, construction and engineering to operation and maintenance of infrastructure assets. In order to evaluate the existence of control, we need to distinguish two independent stages in these projects in terms of decision making process: the construction phase and the operation phase. In some of these projects (such as Solana and Mojave thermo-solar plants in the United States, Hugoton second generation biofuels plant in the United States and solar plants currently under construction in South Africa), all the relevant decisions during the construction phase are subject to the approval and control of a third party. As a result, Abengoa does not have control over these assets during this period and records these companies as associates under the equity method. Once the project is in operation, Abengoa gains control over these companies which are then fully consolidated.

When the Company has less than a majority of the voting rights of an investee, it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Company considers all relevant facts and

circumstances in assessing whether or not the Company's voting rights in an investee are sufficient to give it power, including:

- the size of the Company's holding of voting rights relative to the size and dispersion of holdings of the other vote holders;
- potential voting rights held by the Company, other vote holders or other parties;
- rights arising from other contractual arrangements; and
- any additional facts and circumstances that indicate that the Company has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including voting patterns at previous shareholders' meetings.

Consolidation of a subsidiary begins when the Company obtains control over the subsidiary and ceases when the Company loses control of the subsidiary.

The Group uses the acquisition method to account for business combinations. According to this method, the consideration transferred for the acquisition of a subsidiary corresponds to the fair value of the assets transferred, the liabilities incurred and the equity interests issued by the Group and includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Any contingent consideration is recognized at fair value at the acquisition date and subsequent changes in its fair value are recognized in accordance with IAS 39 either in profit or loss or as a change to other comprehensive income. Acquisition related costs are expensed as incurred. Identifiable assets acquired, liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. The Group recognizes any non controlling interest in the acquiree either at fair value or at the non controlling interest's proportionate share of the acquirer's net assets on an acquisition basis.

The value of non controlling interest in equity and the consolidated results are shown, respectively, under 'Non controlling interest' of the Consolidated Statements of Financial Position and 'Profit attributable to non controlling interest' in the Consolidated Income Statements.

Profit for the period and each component of other comprehensive income are attributed to the owners of the Company and to the non controlling interests. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non controlling interests even if this results in the non controlling interests having a total negative balance.

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies in line with the Group's accounting policies.

All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

In compliance with Article 155 of Spanish Corporate Law (Ley de Sociedades de Capital), the parent company has notified all these companies that, either by itself or through another subsidiary, it owns more than 10 per 100 shares of their capital. Appendix IX lists the Companies external to the Group which have a share equal to or greater than 10% of a subsidiary of the parent company under consolidation.

b) Associates and joint ventures

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

A joint venture (as opposed to a joint operation described in section c) below) is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

The results and assets and liabilities of associates or joint ventures are incorporated in these Consolidated Financial Statements using the equity method of accounting. Under the equity method, an investment in an associate or a joint venture is initially recognized in the consolidated statement of financial position at cost and adjusted thereafter to recognize the Group's share of the profit or loss and other comprehensive income of the associate or joint venture. When the Group's share of losses of an associate or a joint venture exceeds the Group's interest in that associate or joint venture, the Group discontinues recognizing its share of further losses. Additional losses are recognized only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate or joint venture.

An investment in an associate or a joint venture is accounted for using the equity method from the date on which the investee becomes an associate or a joint venture.

Profits and losses resulting from the transactions of the Company with the associate or joint venture are recognized in the Group's Consolidated Financial Statements only to the extent of interests in the associate or joint venture that are not related to the Group.

In compliance with Article 155 of Spanish Corporate Law (Ley de Sociedades de Capital), the parent company has notified all these companies that, either by itself or through another subsidiary, it owns more than 10 per 100 shares of their capital.

As of December 31, 2013 and 2012 there are no significant contingent liabilities in the Group's interests in joint ventures.

c) Interest in joint operations and temporary joint operations (UTE)

A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the assets, and obligations for the liabilities, relating to the arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

When a group entity undertakes its activities under joint operations, the Group as a joint operator recognises in relation to its interest in a joint operation:

- Its assets, including its share of any assets held jointly.
- Its liabilities, including its share of any liabilities incurred jointly.
- Its share of the revenue from the sale of the output by the joint operation.
- Its expenses, including its share of any expenses incurred jointly.

When a group entity transacts with a joint operation in which a group entity is a joint operator (such as a purchase of assets), the Group does not recognize its share of the gains and losses until it resells those assets to a third party.

'Unión Temporal de Empresas' (UTE) are temporary joint operations generally formed to execute specific commercial and/or industrial projects in a wide variety of areas and particularly in the fields of engineering and construction and infrastructure projects. They are normally used to combine the characteristics and qualifications of the UTE's partners into a single proposal in order to obtain the most favorable technical assessment possible. UTE are normally limited as standalone entities with limited action, since, although they may enter into commitments in their own name, such commitments are generally undertaken by their partners, in proportion to each investor's share in the UTE.

The partners' shares in the UTE normally depend on their contributions (quantitative or qualitative) to the project, are limited to their own tasks and are intended solely to generate their own specific results. Each partner is responsible for executing its own tasks and does so in its own interests.

The fact that one of the UTE's partners acts as project manager does not affect its position or share in the UTE. The UTE's partners are collectively responsible for technical issues, although there are strict *pari passu* clauses that assign the specific consequences of each investor's correct or incorrect actions.

UTE are not variable interest or special purpose entities. UTE do not usually own assets or liabilities on a standalone basis. Their activity is conducted for a specific period of time that is normally limited to the execution of the project. The UTE may own certain fixed assets used in carrying out its activity, although in this case they are generally acquired and used jointly by all the UTE's investors, for a period similar to the project's duration, or prior agreements are signed by the partners on the assignment or disposal of the UTE's assets upon completion of the project.

UTE in which the Company participates are operated through a management committee comprised of equal representation from each of the temporary joint operation partners, and such committee makes all the decisions about the temporary joint operation's activities that have a significant effect on its success. All the decisions require consent of each of the parties sharing power, so that all the parties together have the power to direct the activities of the UTE. Each partner has rights to the assets and obligations relating to the arrangement. As a result, these temporary joint operations are consolidated proportionally.

The proportional part of the UTE's Consolidated Statement of Financial Position and Consolidated Income Statement is integrated into the Consolidated Statement of Financial Position and the Consolidated Income Statement of the Company in proportion to its interest in the UTE on a line by line basis.

As of December 31, 2013 and 2012 there are no significant material contingent liabilities in relation to the Group's shareholdings in the UTE.

d) Transactions with non-controlling interests

Transactions with non-controlling interests are accounted for as transactions with equity owners of the group. When the Group acquires non-controlling interests, the difference between any consideration paid and the carrying value of the proportionate share of net assets

acquired is recorded in equity. Gains or losses on disposals of non-controlling interests are also recorded in equity.

When the group ceases to have control or significant influence, any retained interest in the entity is remeasured to its fair value, and any difference between fair value and its carrying amount is recognized in profit or loss. In addition, any amount previously recognized in other comprehensive income in respect of that entity is accounted for as if the group had directly disposed of the related assets or liabilities.

Companies and entities which are third parties the Group and which hold a share equal to or larger than 10% in the share capital of any company included in the consolidation group are disclosed in Appendix VIII.

2.3. Intangible assets

a) Goodwill

Goodwill is recognized as the excess between (A) and (B), where (A) is the sum of the considerations transferred, the amount of any non-controlling interest in the acquiree and in the case of a business combination achieved in stages, the fair value on the acquisition date of the previously held interest in the acquiree and (B) the net value, at the acquisition date, of the identifiable assets acquired, the liabilities and contingent liabilities assumed, measured at fair value. If the resulting amount is negative, in the case of a bargain purchase, the difference is recognized as income directly in the Consolidated Income Statement.

Goodwill relating to the acquisition of subsidiaries is included in intangible assets, while goodwill relating to associates is included in investments in associates.

Goodwill is carried at initial value less accumulated impairment losses (see Note 2.8). Goodwill is allocated to Cash Generating Units (CGU) for the purposes of impairment testing, these CGU's being the units which are expected to benefit from the business combination that generated the goodwill.

b) Computer programs

Costs paid for licenses for computer programs are capitalized, including preparation and installation costs directly associated with the software. Such costs are amortized over their estimated useful life. Maintenance costs are expensed in the period in which they are incurred.

Costs directly related with the production of identifiable computer programs are recognized as intangible assets when they are likely to generate future economic benefit for a period of one or more years and they fulfill the following conditions:

- it is technically possible to complete the production of the intangible asset;
- management intends to complete the intangible asset;
- the Company is able to use or sell the intangible asset;
- there are technical, financial and other resources available to complete the development of the intangible asset; and
- disbursements attributed to the intangible asset during its development may be reliably measured.

Costs directly related to the production of computer programs recognized as intangible assets are amortized over their estimated useful lives which do not exceed 10 years.

Costs that do not meet the criteria above are recognized as expenses in the Consolidated Income Statement when incurred.

c) Research and development cost

Research costs are recognized as an expense when they are incurred.

Development costs (relating to the design and testing of new and improved products) are recognized as an intangible asset when all the following criteria are met:

- it is probable that the project will be successful, taking into account its technical and commercial feasibility, so that the project will be available for its use or sale;
- it is probable that the project will generate future economic benefits;
- management intends to complete the project;
- the Company is able to use or sell the intangible asset;
- there are appropriate technical, financial or other resources available to complete the development of the intangible asset; and
- the costs of the project/product can be measured reliably.

Once the product is in the market, capitalized costs are amortized on a straight-line basis over the period for which the product is expected to generate economic benefits, which is normally 5 years, except for development assets related to the thermo-solar plant using tower technology which are amortized over 25 years and the second-generation biofuels plant which is amortized according to its useful life.

Development costs that do not meet the criteria above are recognized as expenses in the Consolidated Income Statement when incurred.

Grants or subsidized loans obtained to finance research and development projects are recognized as income in the Consolidated Income Statement consistently with the expenses they are financing (following the rules described above).

2.4. Property, plant and equipment

Property, plant and equipment includes property, plant and equipment of companies or project companies which have been self-financed or financed through external financing with recourse facilities or through non-recourse project finance.

In general, property, plant and equipment is measured at historical cost, including all expenses directly attributable to the acquisition, less depreciation and impairment losses, with the exception of land, which is presented net of any impairment losses.

Subsequent costs are capitalized when it is probable that future economic benefits associated with that asset can be separately and reliably identified.

Work carried out by a company on its own property, plant and equipment is valued at production cost. In construction projects of the Company's owned assets carried out by its Engineering and Construction segment which are not under the scope of IFRIC 12 on Service Concession Arrangements (see Note 2.5), internal margins are eliminated. The corresponding costs are recognized in the individual expense line item in the accompanying income statements. The recognition of an income for the sum of such costs through the line item 'Other income- Work performed by the entity and capitalized and other' results in these costs having no impact in net operating profit. The

corresponding assets are capitalized and included in property, plant and equipment in the accompanying balance sheets.

All other repair and maintenance costs are charged to the Consolidated Income Statement in the period in which they are incurred.

Costs incurred during the construction period may also include gains or losses from foreign-currency cash-flow hedging instruments for the acquisition of property, plant and equipment in foreign currency, transferred from equity.

With regard to investments in property, plant and equipment located on land belonging to third parties, an initial estimate of the costs of dismantling the asset and restoring the site to its original condition is also included in the carrying amount of the asset. Such costs are recorded at their net present value in accordance with IAS 37.

The annual depreciation rates of property, plant and equipment (including property, plant and equipment in projects) are as follows:

<u>Items</u>	<u>% of depreciation</u>
Lands and buildings	
Buildings	2% – 3%
Technical installations and machinery	
Installations	3% – 4% – 12% – 20%
Machinery	12%
Other fixed assets	
Data processing equipment	25%
Tools and equipment	15% – 30%
Furniture	10% – 15%
Works equipment	30%
Transport elements	8% – 20%

The assets’ residual values and useful economic lives are reviewed, and adjusted if necessary, at the end of the accounting period of the company which owns the asset.

When the carrying amount of an asset is higher than its recoverable amount, the carrying amount is reduced immediately to reflect the lower recoverable amount.

2.5. Fixed assets in projects (project finance)

This category includes property, plant and equipment, intangible assets and financial assets of consolidated companies which are financed through Non-recourse Project Finance, that are raised specifically and solely to finance individual projects as detailed in the terms of the loan agreement.

These non-recourse Project Finance assets are generally the result of projects which consist of the design, construction, financing, application and maintenance of large-scale complex operational assets or infrastructures, which are owned by the company or are held under a concession agreement for a period of time. The projects are initially financed through non-recourse medium-term bridge loans and later by Non-recourse Project Finance.

In this respect, the basis of the financing agreement between the Company and the bank lies in the allocation of the cash flows generated by the project to the repayment of the principal amount and interest expenses, excluding or limiting the amount secured by other assets, in such a way that the bank recovers the investment solely through the cash flows generated by the project financed, any

other debt being subordinated to the debt arising from the non-recourse financing applied to projects until the non-recourse debt has been fully repaid. For this reason, fixed assets in projects are separately reported on the face of the Consolidated Statement of Financial Position, as is the related non-recourse debt in the liability section of the same statement.

Assets in the 'fixed assets in projects' line item of the Consolidated Statement of Financial Position are sub-classified under the following two headings, depending upon their nature and their accounting treatment:

2.5.1. Concession assets in projects

This heading includes fixed assets financed through non-recourse loans related to Service Concession Arrangements recorded in accordance with IFRIC 12.

Service concession agreements are recorded in accordance with the provisions of IFRIC 12. IFRIC 12 is applicable to public-to-private service concession arrangements where the grantor of the concession governs what services the operator must provide using the infrastructure, to whom and at what price and also controls any significant residual interest in the infrastructure at the end of the term of the arrangement. When the operator of the infrastructure is also responsible for the engineering, procurement and construction of such asset, IFRIC 12 requires the separate accounting for the revenue and margins associated with the construction activities, which is not eliminated in consolidation even between companies within the same consolidated group, and for the subsequent operation and maintenance of the infrastructure. In such cases, the investment in the infrastructure used in the concession arrangement cannot be classified as property, plant and equipment of the operator, but rather must be classified as a financial asset or an intangible asset, depending on the nature of the payment rights established under the contract. The infrastructures accounted for by us as service concessions under IFRIC 12 are mainly related to the activities concerning power transmission lines, desalination plants and thermo-solar electricity generation plants.

a) Intangible asset

The Group recognizes an intangible asset when the demand risk to the extent that it has a right to charge final customers for the use of the infrastructure. This intangible asset is subject to the provisions of IAS 38 and is amortized linearly, taking into account the estimated period of commercial operation of infrastructure which generally coincides with the concession period.

The Group recognizes and measures revenue, costs and margin for providing construction services during the period of construction of the infrastructure in accordance with IAS 11 'Construction Contracts' and revenue for other services in accordance with IAS 18 'Revenue'. As indicated in Note 2.7, the interest costs derived from financing the project incurred during construction are capitalized during the period of time required to complete and prepare the asset for its predetermined use.

Once the infrastructure is in operation, the treatment of income and expenses is as follows:

Revenues from the updated annual royalty for the concession, as well as operations and maintenance services are recognized in each period according to IAS 18 'Revenue' in Revenue.

Operating and maintenance costs and general overheads and administrative costs are charged to the Consolidated Income Statement in accordance with the nature of the cost incurred (amount due) in each period.

Financing costs are classified within heading finance expenses in the Consolidated Income Statement.

b) Financial asset

The Group recognizes a financial asset when demand risk is assumed by the grantor to the extent that the concession holder has an unconditional right to receive payments for construction or improvement services. This asset is recognized at the fair value of the construction or improvement services provided, considering upgrade services in accordance with IAS 11, if any.

The financial assets is subsequently recorded at amortized cost method calculated according to the effective interest method, the corresponding income from updating the flows of collections is recognized as revenue in the Consolidated Income Statement according to the effective interest rate.

The finance expenses of financing these assets are classified under the financial expenses heading of the Consolidated Income Statement.

As indicated above for intangible assets, income from operations and maintenance services is recognized in each period as Revenue according to IAS 18 'Revenue'.

2.5.2. Other assets in projects

This heading includes tangible fixed and intangible assets which are financed through a non-recourse loan and are not subject to a concession agreement as described below. Their accounting treatment is described in Notes 2.3 and 2.4.

Non-recourse project finance typically includes the following guarantees:

- Shares of the project developers are pledged.
- Assignment of collection rights.
- Limitations on the availability of assets relating to the project.
- Compliance with debt coverage ratios.
- Subordination of the payment of interest and dividends to meet loan financial ratios.

Once the project finance has been repaid and the non-recourse debt and related guarantees fully extinguished, any remaining net book value reported under this category is reclassified to the Property, Plant and Equipment or Intangible Assets line items, as applicable, in the Consolidated Statement of Financial Position.

2.6. Current and non-current classification

Assets are classified as current assets if they are expected to be realized in less than 12 months after the date of the Consolidated Statements of Financial Position. Otherwise, they are classified as non-current assets.

Liabilities are classified as current liabilities unless an unconditional right exists to defer their repayment by at least 12 months following the date of the Consolidated Statement of Financial Position.

2.7. Borrowing costs

Interest costs incurred in the construction of any qualifying asset are capitalized over the period required to complete and prepare the asset for its intended use. A qualifying asset is an asset that necessarily takes a substantial period of time to get ready for its internal use or sale, which in Abengoa is considered to be more than one year.

Costs incurred relating to non-recourse factoring are expensed when the factoring transaction is completed with the financial institution.

Remaining borrowing costs are expensed in the period in which they are incurred.

2.8. Impairment of non-financial assets

Abengoa reviews its property, plant and equipment, intangible assets with finite and indefinite useful life and goodwill to identify any indicators of impairment annually.

The recoverable amount of an asset is the higher of its fair value less costs to sell and its value in use, defined as the present value of the estimated future cash flows to be generated by the asset. In the event that the asset does not generate cash flows independently of other assets, Abengoa calculates the recoverable amount of the Cash-Generating Unit to which the asset belongs.

When the carrying amount of the Cash Generating Unit to which these assets belong is lower than its recoverable amount assets are impaired.

Assumptions used to calculate value in use include a discount rate, growth rates and projected changes in both selling prices and costs. The discount rate is estimated by Management, to reflect both changes in the value of money over time and the risks associated with the specific Cash-Generating Unit. Growth rates and changes in prices and costs are projected based upon internal and industry projections and management experience respectively. Financial projections range between 5 and 10 years depending on the growth potential of each Cash Generating Unit.

To calculate the value in use of the major goodwill balances, the following assumptions were made:

- 10-year financial projections were used for those Cash-Generating Units (CGUs) that have high growth potential based on cash flows taken into account in the strategic plans for each business unit, considering a residual value based on the flow in the final year of the projection.

The use of these 10-year financial projections was based on the assumption that it is the minimum period necessary for the discounted cash flow model to reflect all potential growth in the CGUs in each business segment showing significant investments.

The aforementioned estimated cash flows were considered to be reliable due to their capacity to adapt to the real market and/or business situation faced by the CGU in accordance with the business's margin and cash-flow experience and future expectations.

These cash flows are reviewed and approved every six months by Senior Management so that the estimates are continually updated to ensure consistency with the actual results obtained.

In these cases, given that the period used is reasonably long, the Group then applies a zero growth rate for the cash flows subsequent to the period covered by the strategic plan.

- For concession assets with a defined useful life and with a specific financial structure, cash flow projections until the end of the project are considered and no terminal value is assumed.
 Concession assets have a contractual structure that permit the Company to estimate quite accurately the costs of the project (both in the construction and in the operations periods) and revenue during the life of the project.
 Projections take into account real data based on the contract terms and fundamental assumptions based on specific reports prepared by experts, assumptions on demand and assumptions on production. Additionally, assumptions on macro-economic conditions are taken into account, such as inflation rates, future interest rates, etc. and sensitivity analyses are performed over all major assumptions which can have a significant impact in the value of the asset.
- 5-year cash flow projections are used for all other CGUs, considering the residual value to be the cash flow in the final year projected.
- Cash flow projections of CGUs located in other countries are calculated in the functional currency of those CGUs and are discounted using rates that take into consideration the risk corresponding to each specific country and currency. Present values obtained with this method are then converted to euros at the year-end exchange rate of each currency.
- Taking into account that in most CGUs the specific financial structure is linked to the financial structure of the projects that are part of those CGUs, the discount rate used to calculate the present value of cash-flow projections is based on the weighted average cost of capital (WACC) for the type of asset, adjusted, if necessary, in accordance with the business of the specific activity and with the risk associated with the country where the project is performed.
- In any case, sensitivity analyses are performed, especially in relation with the discount rate used, residual value and fair value changes in the main business variables, in order to ensure that possible changes in the estimates of these items do not impact the possible recovery of recognized assets.
- Accordingly, the following table provides a summary of the discount rates used (WACC) and growth rates to calculate the recoverable amount for Cash-Generating Units with the operating segment to which it pertains:

<u>Operating segment</u>	<u>Discount rate</u>	<u>Growth Rate</u>
Engineering and construction		
Engineering and construction	8% – 11%	0%
Concession-type infrastructure		
Solar	4% – 6%	0%
Water	6% – 8%	0%
Transmission lines	5% – 10%	0%
Cogeneration and other	6% – 8%	0%
Industrial production		
Biofuels	5% – 8%	0%

In the event that the recoverable amount of an asset is lower than its carrying amount, an impairment charge for the difference is recorded in the Consolidated Income Statement under the item 'Depreciation, amortization and impairment charges'. With the exception of goodwill, impairment

losses recognized in prior periods which are later deemed to have been recovered are credited to the same income statement heading.

2.9. Financial Investments (current and non-current)

Financial investments are classified into the following categories, based primarily on the purpose for which they were acquired:

- a) financial assets at fair value through profit and loss;
- b) loans and accounts receivable;
- c) financial assets held to maturity; and
- d) available for sale financial assets.

Classification of each financial asset is determined by management upon initial recognition, and is reviewed at each year end.

a) Financial assets at fair value through profit and loss

This category includes the financial assets acquired for trading and those initially designated at fair value through profit and loss. A financial asset is classified in this category if it is acquired mainly for the purpose of sale in the short term or if it is so designated by Management. Financial derivatives are also classified at fair value through profit and loss when they do not meet the accounting requirements to be designated as hedging instruments.

These financial assets are recognized initially at fair value, without including transaction costs. Subsequent changes in fair value are recognized under 'Gains or losses from financial assets at fair value' within the 'Finance income or expense' line of the Consolidated Income Statement for the period.

b) Loans and accounts receivable

Loans and accounts receivable are non-derivative financial assets with fixed or determinable payments, not listed on an active market.

In accordance with IFRIC 12, certain assets under concessions qualify as financial receivables (see Note 2.5).

Loans and accounts receivable are initially recognized at fair value plus transaction costs and are subsequently measured at amortized cost in accordance with the effective interest rate method. Interest calculated using the effective interest rate method is recognized under 'Interest income from loans and debts' within the 'Finance income' line of the Consolidated Income Statement.

c) Financial assets held to maturity

This category includes non-derivative financial assets expected to be held to maturity which have fixed or determinable payments.

These assets are initially recognized at fair value plus transaction costs and subsequently measured at their amortized cost under the effective interest rate method. Interest calculated under the effective interest rate method is recognized under 'Other finance income' within the 'Other net finance income/expense' line of the Consolidated Income Statement.

d) Available for sale financial assets

This category includes non-derivative financial assets which do not fall within any of the previously mentioned categories. For Abengoa, they primarily comprise interests in other companies that are not consolidated.

Financial assets available for sale are initially recognized at fair value plus transaction costs and subsequently measured at fair value, with changes in fair value recognized directly in equity, with the exception of translation differences of monetary assets, which are charged to the Consolidated Income Statement. Dividends from available-for-sale financial assets are recognized under 'Other finance income' within the 'Other net finance income/expense' line of the Consolidated Income Statement when the right to receive the dividend is established.

When available for sale financial assets are sold or impaired, the accumulated amount recorded in equity is transferred to the Consolidated Income Statement. To establish whether the assets have been impaired, it is necessary to consider whether the reduction in their fair value is significantly below cost and whether it will be for a prolonged period of time. The cumulative gain or loss reclassified from equity to profit or loss when the financial assets are impaired is the difference between their acquisition cost (net of any principal repayment and amortization) and current fair value, less any impairment loss on that financial asset previously recognized in profit or loss. Impairment losses recognized in the Consolidated Income Statement are not subsequently reversed through the Consolidated Income Statement.

Acquisitions and disposals of financial assets are recognized on the trading date, i.e. the date upon which there is a commitment to purchase or sell the asset. Available for sale financial assets are derecognized when the right to receive cash flows from the investment has expired or has been transferred and all the risks and rewards derived from owning the asset have likewise been substantially transferred.

At the date of each Consolidated Statement of Financial Position, the Group evaluates if there is any objective evidence that the value of any financial asset or any group of financial assets has been impaired.

2.10. Derivative financial instruments and hedging activities

Derivatives are recorded at fair value. The Company applies hedge accounting to all hedging derivatives that qualify to be accounted for as hedges under IFRS.

When hedge accounting is applied, hedging strategy and risk management objectives are documented at inception, as well as the relationship between hedging instruments and hedged items. Effectiveness of the hedging relationship needs to be assessed on an ongoing basis. Effectiveness tests are performed prospectively and retrospectively at inception and at each reporting date, following the dollar offset method or the regression method, depending on the type of derivatives.

The Company has three types of hedges:

a) Fair value hedge for recognized assets and liabilities

Changes in fair value of the derivatives are recorded in the Consolidated Income Statement, together with any changes in the fair value of the asset or liability that is being hedged.

b) Cash flow hedge for forecasted transactions

The effective portion of changes in fair value of derivatives designated as cash flow hedges are recorded temporarily in equity and are subsequently reclassified from equity to profit or loss in

the same period or periods during which the hedged item affects profit or loss. Any ineffective portion of the hedged transaction is recorded in the Consolidated Income Statement as it occurs.

When options are designated as hedging instruments (such as interest rate options described in Note 14), the intrinsic value and time value of the financial hedge instrument are separated. Changes in intrinsic value which are highly effective are recorded in equity and subsequently reclassified from equity to profit or loss in the same period or periods during which the hedged item affects profit or loss. Changes in time value are recorded in the Consolidated Income Statement, together with any ineffectiveness.

When the hedged forecasted transaction results in the recognition of a non-financial asset or liability, gains and losses previously recorded in equity are included in the initial cost of the asset or liability.

When the hedging instrument matures or is sold, or when it no longer meets the requirements to apply hedge accounting, accumulated gains and losses recorded in equity remain as such until the forecast transaction is ultimately recognized in the Consolidated Income Statement. However, if it becomes unlikely that the forecasted transaction will actually take place, the accumulated gains and losses in equity are recognized immediately in the Consolidated Income Statement.

c) Net investment hedges in foreign operation

Hedges of a net investment in a foreign operation, including the hedging of a monetary item considered part of a net investment, are recognized in a similar way to cash flow hedges. The foreign currency transaction gain or loss on the non-derivative hedging instrument that is designated as, and is effective as, an economic hedge of the net investment in a foreign operation shall be reported in the same manner as a translation adjustment. That is, reported in the cumulative translation adjustment section of equity to the extent it is effective as a hedge, as long as the following conditions are met: the notional amount of the non-derivative instrument matches the portion of the net investment designated as being hedged and the non-derivative instrument is denominated in the functional currency of the hedged net investment. In that circumstance, no hedge ineffectiveness would be recognized in earnings.

Amounts recorded in equity will be reclassified to the Consolidated Income Statement when the foreign operation is sold or otherwise disposed of.

Contracts held for the purposes of receiving or making payment of non-financial elements in accordance with expected purchases, sales or use of goods ('own-use contracts') of the Group are not recognized as derivative instruments, but as executory contracts. In the event that such contracts include embedded derivatives, they are recognized separately from the host contract, if the economic characteristics of the embedded derivative are not closely related to the economic characteristics of the host contract. The options contracted for the purchase or sale of non-financial elements which may be cancelled through cash outflows are not considered to be own-use contracts.

Changes in fair value of derivative instruments which do not qualify for hedge accounting are recognized immediately in the Consolidated Income Statement. Trading derivatives are classified as a current assets or liabilities.

2.11. Fair value estimates

Financial instruments measured at fair value are presented in accordance with the following level classification based on the nature of the inputs used for the calculation of fair value:

- Level 1: Inputs are quoted prices in active markets for identical assets or liabilities.
- Level 2: Fair value is measured based on inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: Fair value is measured based on unobservable inputs for the asset or liability.

In the event that prices cannot be observed, the management shall make its best estimate of the price that the market would otherwise establish based on proprietary internal models which, in the majority of cases, use data based on observable market parameters as significant inputs (Level 2) but occasionally use market data that is not observed as significant inputs (Level 3). Different techniques can be used to make this estimate, including extrapolation of observable market data. The best indication of the initial fair value of a financial instrument is the price of the transaction, except when the value of the instrument can be obtained from other transactions carried out in the market with the same or similar instruments, or valued using a valuation technique in which the variables used only include observable market data, mainly interest rates. According to current legislation (IFRS-EU), differences between the transaction price and the fair value based on valuation techniques that use data that is not observed in the market, are not initially recognized in the income statement.

a) Level 2 valuation

The majority of Abengoa's portfolio comprises financial derivatives designated as cash flow hedges, is classified as level 2 and corresponds mainly to the interest rate swaps (see Note 14).

Credit risk effect on the valuation of derivatives is calculated for each of the instruments in the portfolio of derivatives classified within level 2, using the own risk of the Abengoa companies and financial counterparty risk.

Description of the valuation method

• Interest rate swaps

Interest rate swap valuations are made by valuing the swap component of the contract and valuing the credit risk.

The most common methodology used by the market and applied by Abengoa to value interest rate swaps is to discount the expected future cash flows according to the parameters of the contract. Variable interest rates, which are needed to estimate future cash flows, are calculated using the curve for the corresponding currency and extracting the implicit rates for each of the reference dates in the contract. These estimated flows are discounted with the swap zero curve for the reference period of the contract 1, 3 or 6 months.

The effect of the credit risk on the valuation of the interest rate swaps depends on the future settlement. If the settlement is favorable for the Company, the counterparty credit spread will be incorporated to quantify the probability of default at maturity. If the expected settlement is negative for the company, its own credit risk will be applied to the final settlement.

Classic models for valuing interest rate swaps use deterministic valuation of the future of variable rates, based on future outlooks. When quantifying credit risk, this model is limited by considering only the risk for the current paying party, ignoring the fact that the derivative could change sign at maturity. A payer and receiver swaption model is used for these cases. This enables the associated risk in each swap position to be reflected. Thus, the model shows each agent's exposure, on each payment date, as the value of entering into the 'tail' of the swap, i.e. the live part of the swap.

- Interest rate caps and floors

Interest rate caps and floors are valued by separating the derivative in the successive caplets/floorlets that comprise the transaction. Each caplet or floorlet is valued as a call or put option, respectively, on the reference interest rate, for which the Black-Scholes approach is used for European-type options (exercise at maturity) with minor adaptations and following the Black-76 model.

- Forward foreign exchange transactions

Forward contracts are valued by comparing the contracted forward rate and the rate in the valuation scenario at the maturity date. The contract is valued by calculating the flow that would be obtained or paid from theoretically closing out the position and then discounting that amount.

- Commodity swaps

Commodity swaps are valued in the same way as forward foreign exchange contracts, calculating the flow that would be obtained or paid from theoretically closing out the position.

- Equity options

Equity options are valued using the Black-Scholes model for American-type options on equities.

- Embedded derivatives in convertible bonds

The embedded derivatives in convertible bonds consist of an option to convert the bond into shares in favor of the bondholder; call options for the issuer to repurchase the bonds at a specific price on specific dates; and put options for the bondholder to redeem the bonds at a specific price and on specific dates. Since these are Bermuda-type options (multiple exercise dates), they are valued using the Longstaff-Schwartz model and the Monte Carlo method.

Variables (Inputs)

Interest rate derivative valuation models use the corresponding interest rate curves for the relevant currency and underlying reference in order to estimate the future cash flows and to discount them. Market prices for deposits, futures contracts and interest rate swaps are used to construct these curves. Interest rate options (caps and floors) also use the volatility of the reference interest rate curve.

Exchange rate derivatives are valued using the interest rate curves of the underlying currencies in the derivative, as well as the corresponding spot exchange rates.

The inputs in equity models include the interest rate curves of the corresponding currency, the price of the underlying asset, as well as the implicit volatility and any expected future dividends.

To estimate the credit risk of the counterparty, the credit default swap (CDS) spreads curve is obtained in the market for important individual issuers. For less liquid issuers, the spreads curve is estimated using comparable CDSs or based on the country curve. To estimate proprietary credit risk, prices of debt issues in the market and CDSs for the sector and geographic location are used.

The fair value of the financial instruments that results from the aforementioned internal models, takes into account, among other factors, the terms and conditions of the contracts and observable market data, such as interest rates, credit risk, exchange rates, commodities and share prices, and volatility. The valuation models do not include significant levels of subjectivity, since these methodologies can be adjusted and calibrated, as appropriate, using the internal calculation of fair value and subsequently compared to the corresponding actively traded price. However, valuation adjustments may be necessary when the listed market prices are not available for comparison purposes.

b) Level 3 valuation

Level 3 includes shares in companies that, pursuant to the regulations in force, have not been included in the scope of consolidation for the years ended December 31, 2013 and 2012 and in which the Company's stake is greater than 5% and lower than 20%.

Fair value within these elements was calculated by taking as the main reference the value of the investment — the company's cash flow generation based on its current business plan, discounted at a rate appropriate for the sector in which each of the companies is operating. Valuations were obtained from internal models. These valuations could vary where other models and assumptions made on the principle variables had been used, however the fair value of the assets and liabilities, as well as the results generated by these financial instruments are considered reasonable.

Detailed information on fair values is included in Note 12.

2.12. Inventories

Inventories are valued at the lower of cost or net realizable value. In general, cost is determined by using the first-in-first-out (FIFO) method. The cost of finished goods and work in progress includes design costs, raw materials, direct labor, other direct costs and general manufacturing costs (assuming normal operating capacity). Borrowing costs are not included. The net realizable value is the estimated sales value in the normal course of business, less applicable variable selling costs.

Cost of inventories includes the transfer from equity of gains and losses on qualifying cash-flow hedging instruments related with the purchase of raw materials or with foreign exchange contracts.

2.13. Biological assets

Abengoa recognizes sugar cane in production as biological assets. The production period of sugar cane covers the period from preparation of the land and sowing the seedlings until the plant is ready for first production and harvesting. Biological assets are classified as property, plant and equipment in the Consolidated Statement of Financial Position. Biological assets are recognized at fair value, calculated as the market value less estimated harvesting and transport costs.

Agricultural products harvested from biological assets, which in the case of Abengoa are cut sugar cane, are classified as inventories and measured at fair value less estimated sale costs at the point of sale or harvesting.

Fair value of biological assets is calculated using as a reference the forecasted market price of sugarcane, which is estimated using public information and estimates on future prices of sugar and ethanol. Fair value of agricultural products is calculated using as a reference the price of sugar cane made public on a monthly basis by the Cane, Sugar and Alcohol Producers Board (Consecana).

Gains or losses arising as a result of changes in the fair value of such assets are recorded, within 'Operating profit' in the Consolidated Income Statement.

To obtain the fair value of the sugar cane while growing, a number of assumptions and estimates have been made in relation to the area of land sown, the estimated TRS (Total Recoverable Sugar contained within the cane) per ton to be harvested and the average degree of growth of the agricultural product in the different areas sown.

2.14. Clients and other receivables

Clients and other receivables relate to amounts due from customers for sales of goods and services rendered in the normal course of operation.

Clients and other receivables are recognized initially at fair value and are subsequently measured at amortized cost using the effective interest rate method, less provision for impairment. Trade receivables due in less than one year are carried at their face value at both initial recognition and subsequent measurement, provided that the effect of not discounting flows is not significant.

A provision for impairment of trade receivables is recorded when there is objective evidence that the Group will not be able to recover all amounts due as per the original terms of the receivables. The existence of significant financial difficulties, the probability that the debtor is in bankruptcy or financial reorganization and the lack or delay in payments are considered evidence that the receivable is impaired.

The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the effective interest rate. When a trade receivable is uncollectable, it is written off against the bad debt provision.

Clients and other receivables which have been factored with financial entities are derecognized and hence removed from assets on the Consolidated Statement of Financial Position only if all risks and rewards of ownership of the related financial assets have been transferred, comparing the Company's exposure, before and after the transfer, to the variability in the amounts and the calendar of net cash flows from the transferred asset. Once the Company's exposure to this variability has been eliminated or substantially reduced, the financial asset has been transferred, and is derecognized from the Consolidated Statement of Financial Position (See Note 4.b).

2.15. Cash and cash equivalents

Cash and cash equivalents include cash in hand, cash in bank and other highly-liquid current investments with an original maturity of three months or less which are held for the purpose of meeting short-term cash commitments.

In the Consolidated Statement of Financial Position, bank overdrafts are classified as borrowings within current liabilities.

2.16. Share capital

Parent company shares are classified as equity. Transaction costs directly attributable to new shares are presented in equity as a reduction, net of taxes, to the consideration received from the issue.

Treasury shares are classified in Equity-Parent company reserves. Any amounts received from the sale of treasury shares, net of transaction costs, are classified equity.

2.17. Government grants

Non-refundable capital grants are recognized at fair value when it is considered that there is a reasonable assurance that the grant will be received and that the necessary qualifying conditions, as agreed with the entity assigning the grant, will be adequately met.

Grants related to income are recorded as liabilities in the Consolidated Statement of Financial Position and are recognized in 'Other operating income' in the Consolidated Income Statement based on the period necessary to match them with the costs they intend to compensate.

Grants related to fixed assets are recorded as non-current liabilities in the Consolidated Statement of Financial Position and are recognized in 'Other operating income' in the Consolidated Income Statement on a straight-line basis over the estimated useful economic life of the assets.

2.18. Loans and borrowings

External resources are classified in the following categories:

- a) non-recourse financing applied to projects (project financing) (see note 19);
- b) corporate financing (see Note 20).

Loans and borrowings are initially recognized at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortized cost and any difference between the proceeds initially received (net of transaction costs incurred in obtaining such proceeds) and the repayment value is recognized in the Consolidated Income Statement over the duration of the borrowing using the effective interest rate method.

Interest free loans and loans with interest rates below market rates, mainly granted for research and development projects, are initially recognized at fair value in liabilities in the Consolidated Statement of Financial Position. The difference between proceeds received from the loan and its fair value is initially recorded within 'Grants and Other liabilities' in the Consolidated Statement of Financial Position, and subsequently recorded in 'Other operating income- Grants' in the Consolidated income statement when the costs financed with the loan are expensed. In the case of interest free loans received for development projects where the Company record an intangible asset, income from the grant will be recognized according to the useful life of the asset, at the same rate as we record its amortization.

Commissions paid for obtaining credit lines are recognized as transaction costs if it is probable that part or all of the credit line will be drawn down. If this is the case, commissions are deferred until the credit line is drawn down. If it is not probable that all or part of the credit line will be drawn down, commission costs are expensed in the period.

2.18.1. Convertible notes

Pursuant to the Terms and Conditions of each of the convertible notes issued, when investors exercise their conversion right, the Company may decide whether to deliver shares of the company, cash, or a combination of cash and shares (see Note 20.3 for further information).

In accordance with IAS 32 and 39, since Abengoa has a contractual right to choose the type of payment and one of these possibilities is paying through a variable number of shares and cash, the conversion option qualifies as an embedded derivative. Thus, the convertible bond is

considered a hybrid instrument, which includes a component of debt and an embedded derivative for the conversion option held by the bondholder.

The Company initially measures the embedded derivative at fair value and classifies it under the derivative financial instruments liability heading. At the end of each period, the embedded derivative is re-measured and changes in fair value are recognized under 'Other net finance income or expense' within the 'Finance expense net' line of the Consolidated Income Statement. The debt component of the bond is initially recorded as the difference between the proceeds received for the notes and the fair value of the aforementioned embedded derivative. Subsequently, the debt component is measured at amortized cost until it is settled upon conversion or maturity. Debt issuance costs are recognized as a deduction in the value of the debt in the Consolidated Statement of Financial Position and included as part of its amortized cost.

2.18.2. Ordinary notes

The company initially recognizes ordinary notes at fair value, net of issuance costs incurred. Subsequently, notes are measured at amortized cost until settlement upon maturity. Any other difference between the proceeds obtained (net of transaction costs) and the redemption value is recognized in the Consolidated Income Statement over the term of the debt using the effective interest rate method.

2.19. Current and deferred income taxes

Income tax expense for the period comprises current and deferred income tax. Income tax is recognized in the Consolidated Income Statement, except to the extent that it relates to items recognized directly in equity. In these cases, income tax is also recognized directly in equity.

Current income tax expense is calculated on the basis of the tax laws in force or about to enter into force as of the date of the Consolidated Statement of Financial Position in the countries in which the subsidiaries and associates operate and generate taxable income.

Deferred income tax is calculated in accordance with the Consolidated Statement of Financial Position liability method, based upon the temporary differences arising between the carrying amount of assets and liabilities and their tax base. However, deferred income tax is not recognized if it arises from initial recognition of an asset or liability in a transaction other than a business combination that, at the time of the transaction, affects neither the accounting nor the taxable profit or loss. Deferred income tax is determined using tax rates and regulations which are enacted or substantially enacted at the date of the Consolidated Statement of Financial Position and are expected to apply and/or be in force at the time when the deferred income tax asset is realized or the deferred income tax liability is settled.

Deferred tax assets are recognized only when it is probable that sufficient future taxable profit will be available to use deferred tax assets.

Deferred taxes are recognized on temporary differences arising on investments in subsidiaries and associates, except where the timing of the reversal of the temporary differences is controlled by the Group and it is not probable that temporary differences will reverse in the foreseeable future.

2.20. Employee benefits

a) Share plans

Certain Group companies have obligations in connection with certain share-based incentive plans for managers and employees. These plans are linked to the achievement of certain management objectives during the upcoming years. When the shares have an active market

(which is the case for plans linked to Abengoa shares), personnel expense is recognized during the vesting period based on their fair value at grant date. In either case, the impact of these share plans on Abengoa's Consolidated Financial Statements is not significant. When there is a non-active market for the shares granted by the plan, personnel expense is recognized on the basis of the repurchase price identified in the plan during the vesting period.

Share plans are considered cash-settled share-based payment plans in accordance with IFRS 2, since the company compensates the participants for their services in exchange for the assumption of the market risk on the shares. By use of the guarantee on the loan, Abengoa guarantees participants, up to the end of the plan period, no personal losses in conjunction with a change in the price of the shares purchased. As such, Abengoa measures and recognizes at the end of each reporting period, a liability based on the value of the shares. Upon expiration of the Plan, employees may sell the shares to repay the individual loan or may otherwise repay the loan as they wish.

The fair value of the services received in exchange for the granting of the option is recognized as a personnel expense using the Black-Scholes valuation model. Certain inputs are used in the Black-Scholes model to generate variables such as the share price, the estimated return per dividend, the expected life of the option (5 years), the interest rates and the share market volatility, as appropriate.

The total amount charged to expenses during the vesting period is determined by reference to the fair value of a hypothetical option to sell ('put') granted by the company to the managers, excluding the effect of the vesting conditions that are not market conditions, and including in the hypotheses only the number of options that are expected will become exercisable. In this regard, the number of options it is expected will become exercisable is considered in the calculation.

b) Bonus schemes

The Group records the amount annually accrued in accordance with the percentage of compliance with the plan's established objectives as personnel expense in the Consolidated Income Statement

Expenses incurred from employee benefits are disclosed in Note 29.

2.21. Provisions and contingencies

Provisions are recognized when:

- there is a present obligation, either legal or constructive, as a result of past events;
- it is more likely than not that there will be a future outflow of resources to settle the obligation; and
- the amount has been reliably estimated.

Provisions are initially measured at the present value of the expected outflows required to settle the obligation and subsequently valued at amortized cost following the effective interest method. The balance of Provisions disclosed in the Notes reflects management's best estimate of the potential exposure as of the date of preparation of the Consolidated Financial Statements.

Contingent liabilities are possible obligations, existing obligations with low probability of a future outflow of economic resources and existing obligations where the future outflow cannot be reliably

estimated. Contingences are not recognized in the Consolidated Statements of Financial Position unless they have been acquired in a business combination.

2.22. Trade payables and other liabilities

Trade payables and other liabilities are obligations arising from the purchase of goods or services in the ordinary course of business and are recognized initially at fair value and are subsequently measured at their amortized cost using the effective interest method.

Other liabilities are obligations not arising from the purchase of goods or services in the normal course of business and which are not treated as financing transactions.

Advances received from customers are recognized as 'Trade payables and other current liabilities'.

2.23. Foreign currency transactions

a) Functional currency

Financial statements of each subsidiary within the Group are measured and reported in the currency of the principal economic environment in which the subsidiary operates (subsidiary's functional currency). The Consolidated Financial Statements are presented in euro, which is Abengoa's functional and reporting currency.

b) Transactions and balances

Transactions denominated in a currency different from the subsidiary's functional currency are translated into the subsidiary's functional currency applying the exchange rates in force at the time of the transactions. Foreign currency gains and losses that result from the settlement of these transactions and the translation of monetary assets and liabilities denominated in foreign currency at the year-end rates are recognized in the Consolidated Income Statement, unless they are deferred in equity, as occurs with cash-flow hedges and net investment in foreign operations hedges.

c) Translation of the financial statements of foreign companies within the Group

Income Statements and Statements of Financial Position of all Group companies with a functional currency different from the group's reporting currency (Euro) are translated to Euros as follows:

- 1) All assets and liabilities are translated to Euros using the exchange rate in force at the closing date of the Financial Statements.
- 2) Items in the Income Statement are translated into Euros using the average annual exchange rate, calculated as the arithmetical average of the average exchange rates for each of the twelve months of the year, which does not differ significantly from using the exchange rates of the dates of each transaction.
- 3) The difference between equity, including profit or loss calculated as described in (2) above, translated at the historical exchange rate, and the net financial position that results from translating the assets, and liabilities in accordance with (1) above, is recorded in equity in the Consolidated Statement of Financial Position under the heading 'Accumulated currency translation differences'.

Results of companies carried under the equity method are translated at the average annual exchange rate calculated described in (2) above.

Goodwill arising on the acquisition of a foreign company is treated as an asset of the foreign company and is translated at the year-end exchange rate.

2.24. Revenue recognition

a) Ordinary income

Ordinary income comprises the fair value of sales of goods or services, excluding VAT or similar taxes, any discounts or returns and excluding sales between Group entities.

Ordinary income is recognized as follows:

- Income from the sale of goods is recognized when the Group delivers the goods to the client, the client accepts them and it is reasonably certain that the related receivables will be collectible.
- Income from the sale of services is recognized in the period in which the service is provided.
- Interest income is recognized using the effective interest rate method. When a receivable is considered impaired, the carrying amount is reduced to its recoverable amount, discounting the estimated future cash flows at the original effective interest rate of the instrument and recording the discount as a reduction in interest income. Income from interest on loans that have been impaired is recognized when the cash is collected or on the basis of the recovery of the cost when the conditions are guaranteed.
- Dividend income is recognized when the right to receive payment is established.

b) Construction contracts

Costs incurred in relation to construction contracts are recognized when incurred. When the outcome of a construction contract cannot be reliably estimated, revenues are only recognized up to the amount of the costs incurred to date that are likely to be recovered.

When the outcome of a construction contract can be reliably estimated and it is probable that it will be profitable, revenue from the contract is recognized over the term of the contract. When it is probable that the costs of the project will be greater than its revenue, expected loss is recognized immediately as an expense. To determine the appropriate amount of revenue to be recognized in any period, the percentage of completion method is applied. The percentage of completion method considers, at the date of the Statement of Financial Position, the actual costs incurred as a percentage of total estimated costs for the entire contract. Costs incurred in the period which relate to future project activities are not included when determining the percentage of completion. Prepayments and certain other assets are recognized as inventories, depending upon their specific nature.

Partial billing that has not yet been settled by the clients and withholdings is included under the Trade and other receivables heading.

Gross amounts owed by clients for ongoing works in which the costs incurred plus recognized profits (minus recognized losses) exceed partial billing are presented as assets under the heading of 'Unbilled Revenue' within 'Clients and other receivables' heading of the Statement of Financial Position.

On the other hand, amounts outstanding from customers for work in progress for which the billing to date is greater than the costs incurred plus recognized profits (less recognized losses)

are shown as liabilities within the line item 'Advance payments from clients' in the Trade payables and other current liabilities caption of the Consolidated Statement of Financial Position.

Lastly, as stated in point 2.4 on the measurement of property, plant and equipment in internal asset construction projects outside the scope of IFRIC 12 on Service Concession Arrangements (see Note 2.5), revenues and profits between group companies are eliminated, meaning that such assets are shown at their acquisition cost.

c) Concession contracts

Concession contracts are agreements for periods usually between 20 and 30 years including both the construction of infrastructure and future services associated with the operation and maintenance of assets in the concession period which are under the scope of IFRIC 12. Revenue recognition, as well as, the main characteristics of these contracts are detailed in Note 2.5.

2.25. Leases

Lease contracts of fixed assets in which a Group company is the lessee and substantially retains all the risks and rewards associated with the ownership of the assets are classified as finance leases.

Finance leases are recognized at inception of the lease at the lower of the fair value of the leased asset and the present value of the minimum lease payments over the contract term. Each lease payment is distributed between debt and financing costs, in a way which establishes a constant interest rate on the outstanding debt. The amounts to be paid over the lease term, net of financing costs, are recognized as non-current and current payables, as appropriate. The interest portion of the financing costs is charged to the Consolidated Income Statement over the period of the lease agreement, in order to obtain a constant periodic interest rate on the balance of the outstanding debt in each period. Assets acquired under finance lease agreements are depreciated over the shorter of the useful life of the asset and the lease term.

Lease agreements undertaken by the Group in which the entity entering into the agreement does not substantially retain all the risks and rewards associated with the ownership of the asset are classified as operating leases. Payments made under operating leases are charged to the Consolidated Income Statement (net of any incentives received from the lessor) on a straight-line basis over the lease term.

2.26. Segment reporting

Information on the Group's operating segments is presented in accordance with internal information provided to the Group's Chief Operating Decision Maker (CODM). The CODM, responsible for assigning resources and evaluating the performance of the operating segments, has been identified as the CEO and the Chairman.

As described in Note 5, the CODM reviews the business by 7 operating segments (8 operating segments until the sale of shareholding in Befesa) which are in turn grouped, for business purposes, into three activities: Engineering & Construction, Concession-type Infrastructures and Industrial Production.

Geographically, the Group reports financial information by 6 regions which are Spain (home market), USA, Europe (excluding Spain), Latin America (excluding Brazil), Brazil and other (the remaining overseas markets).

For detailed information on segment reporting, see Note 5.

2.27. Environmental assets

Equipment, installations and systems used to eliminate, reduce or control possible environmental impacts are recognized applying the same criteria used for other similar assets.

Provisions made for environmental restoration, costs of restructuring and litigations are recognized when the company has a legal or constructive obligation as a result of past events, it becomes probable that an outflow of resources will be necessary to settle the obligation and the outflow can be reliably estimated.

Note 33.7 gives additional information on the Group's environmental policies.

2.28. Severance payments

Severance payments are made to employees in the event that the company terminates their employment contract prior to the normal retirement age or when the employee voluntarily accepts redundancy in the terms offered by the employer. The Group recognizes severance payments when it is demonstrably committed to third parties to provide indemnities for leaving the company or to dismiss the current workers in accordance with a detailed formal plan, with no possibility of retracting.

2.29. Non-current Assets held for sale and discontinued operations

The Group classifies property, plant and equipment, intangible assets and disposal groups (groups of assets that are to be sold together with their directly associated liabilities) as non-current assets held for sale when, at the date of the Consolidated Statement of Financial Position, an active program to sell them has been initiated by Management and the sale is foreseen to take place within the following twelve months.

The Group includes in discontinued operations those business lines which have been sold or otherwise disposed of or those that meet the conditions to be classified as held-for-sale. Discontinued operations also include those assets which are included in the same sale program together with the business line. Entities which are acquired exclusively with a view for resale are also classified as discontinued operations.

Assets held for sale or disposal groups are measured at the lower of their carrying value or fair value less estimated costs necessary to sell them. They are no longer amortized or depreciated from the moment they are classified as non-current assets held for sale.

Assets held for sale and the components of disposal groups are presented in the Consolidated Statement of Financial Position grouped under a single heading as 'Assets held for sale'. Liabilities are also grouped under a single heading as 'Liabilities held for sale'.

The after-tax profit or loss on discontinued operations is presented in a single line within the Consolidated Income Statement under the heading 'Profit (loss) from discontinued operations, net of tax'.

Note 3. — Critical accounting policies

The preparation of the Consolidated Financial Statements in conformity with IFRS requires to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses. Actual results may differ from these estimates under different assumptions or conditions. The most critical accounting policies, which reflect significant management estimates and judgment to determine amounts in the Consolidated Financial Statements are:

- Impairment of intangible assets and goodwill.

- Revenue from construction contracts.
- Concession agreements.
- Income taxes and recoverable amount of deferred tax assets.
- Derivative financial instruments and hedging.

Some of these accounting policies require the application of significant judgment by management to select the appropriate assumptions to determine these estimates. These assumptions and estimates are based on our historical experience, advice from experienced consultants, forecasts and other circumstances and expectations as of the close of the financial period. The assessment is considered in relation to the global economic situation of the industries and regions where the Group operates, taking into account future development of our businesses. By their nature, these judgments are subject to an inherent degree of uncertainty; therefore, actual results could materially differ from the estimates and assumptions used. In such cases, the carrying values of assets and liabilities are adjusted.

As of the date of preparation of these Consolidated Financial Statements, no relevant changes in the estimates made are anticipated and, therefore, no significant changes in the value of the assets and liabilities recognized at December 31, 2013 are expected.

Although these estimates and assumptions are being made using all available facts and circumstances, it is possible that future events may require management to amend such estimates and assumptions in future periods. Changes in accounting estimates are recognized prospectively, in accordance with IAS 8, in the Consolidated Income Statement of the year in which the change occurs. The Group significant accounting policies have been fully described in Note 2.

Impairment of intangible assets and goodwill

Goodwill and Intangible assets which have not yet come into operation or that have an indefinite useful life are not amortized and are tested for impairment on an annual basis or whenever there is an impairment indicator. Goodwill is tested for impairment within the Cash-Generating Unit to which it belongs. Other intangible assets are tested individually, unless they do not generate cash flows independently from other assets, in which case they are tested within the Cash-Generating Unit to which they belong.

For those cash generating units with high potential growth, the Group uses cash flow projections for a period of 10 years based on the cash flows identified in the Group's strategic plans, which are reviewed and approved every six months by the management of the Group. The residual value is calculated based on the cash flows of the latest year projected using a steady or nil growth rate. The use of a 10 year period is based on the consideration that this is the minimum period that needs to be used in order to appropriately reflect all the potential growth of these cash generating units. In addition, 10 years projections are prepared based on the historical experience within the Group in preparing long-term strategic plans, which are considered reliable and are prepared on the basis of the Group's internal control system. These cash flows are considered reliable since they can easily adapt to the changes of the market and of the business segment to which cash generating units belong, based on the Group's past experience on cash flows and margins and on future expectations.

For other cash generating units the Group uses cash flows projections based on a period of 5 years, calculating the residual value based on the cash flows of the latest year projected, using a growth rate 'using a zero growth rate'.

Projected cash flows are discounted using the Weighted Average Cost of Capital (see Note 2.8), adjusted for the specific risks associated to the business unit to which the cash generating unit belongs.

Based on values in use calculated in accordance with the assumptions and hypotheses described above and in Note 8 for the years 2013, 2012 and 2011, the recoverable amount of the cash generating units to which goodwill was assigned is higher than their carrying amount. Detailed sensitivity analysis has been carried out and the Management is confident that the carrying amount of the cash generating units will be recovered in full. Main variables considered in sensitivity analysis are growth rates, discount rates based in weighted average cost of capital (WACC) and the main variables of each business.

During the years 2013, 2012 and 2011 there were no intangible assets with indefinite useful life or there were no significant intangible assets not yet in use that were impaired.

Revenue from construction contracts

Revenue from construction contracts is recognized using the percentage-of-completion method for contracts whose outcome can be reliably estimated and it is probable that they will be profitable. When the outcome of a construction contract cannot be reliably estimated, revenue is recognized only to the extent it is probable that contract costs incurred will be recoverable.

As described in Note 2.24.b), the percentage of completion is determined at the date of every Consolidated Statement of Financial Position based on the actual costs incurred as a percentage of total estimated costs for the entire contract.

Revenue recognition using the percentage-of-completion method involves the use of estimates of certain key elements of the construction contracts, such as total estimated contract costs, allowances or provisions related to the contract, period of execution of the contract and recoverability of the claims. The Company has established, over the years, a robust project management and control system, with periodic monitoring of each project. This system is based on the long-track experience of the Group in constructing complex infrastructures and installations. As far as practicable, the Group applies past experience in estimating the main elements of construction contracts and relies on objective data such as physical inspections or third parties confirmations. Nevertheless, given the highly tailored characteristics of the construction contracts, most of the estimates are unique to the specific facts and circumstances of each contract.

Although estimates on construction contracts are periodically reviewed on an individual basis, we exercise significant judgments and not all possible risks can be specifically quantified.

It is important to point out that, as stated in Note 2.4 on the measurement of property, plant and equipment, in the internal asset construction projects outside the scope of IFRIC 12 on Service Concession Arrangements (see Note 2.5), the totality of the revenues and profits between group companies is eliminated, meaning that said assets are shown at their acquisition cost.

Concession Agreements

The analysis on whether the IFRIC 12 applies to certain contracts and activities involves various complex factors and it is significantly affected by legal interpretation of certain contractual agreements or other terms and conditions with public sector entities.

Therefore, the application of IFRIC 12 requires extensive judgment in relation with, amongst other factors, (i) the identification of certain infrastructures (and not contractual agreements) in the scope of IFRIC 12, (ii) the understanding of the nature of the payments in order to determine the classification of the infrastructure as a financial asset or as an intangible asset and (iii) the recognition of the revenue from construction and concessionary activity.

Changes in one or more of the factors described above may significantly affect the conclusions as to the appropriateness of the application of IFRIC 12 and, therefore, the results of operations or our financial position (see Note 10.1).

Income taxes and recoverable amount of deferred tax assets

Determining income tax expense requires judgment in assessing the timing and the amount of deductible and taxable items, as well as the interpretation and application of tax laws in different jurisdictions. Due to this fact, contingencies or additional tax expenses could arise as a result of tax inspections or different interpretations of certain tax laws by the corresponding tax authorities.

Group Management assesses the recoverability of deferred tax assets on the basis of estimates of the future taxable profit. In making this assessment, Management considers the foreseen reversal of deferred tax liabilities, projected taxable profit and tax planning strategies. This assessment is carried out on the basis of internal projections, which are updated to reflect the Group's most recent operating trends.

The Group's current and deferred income taxes may be impacted by events and transactions arising in the normal course of business as well as by special non-recurring circumstances. Assessment of the appropriate amount and classification of income taxes is dependent on several factors, including estimates of the timing and realization of deferred tax assets and the timing of income tax payments.

Actual collections and payments may materially differ from these estimates as a result of changes in tax laws as well as unforeseen future transactions impacting the income tax balances.

Derivatives and hedging

The Group uses derivatives in order to mitigate risks arising from foreign exchange, interest rates and changes in the prices of assets and commodities purchased (principally aluminum, grain, ethanol, sugar and gas). Derivatives are initially recognized at fair value on the date that the derivative contract is entered into, and are subsequently re-measured at fair value at each reporting date (see Note 2.10 and 2.11 for a full description of the accounting policy for derivatives).

Contracts held for the purposes of receiving or making payment of non-financial elements in accordance with expected purchases, sales or use of goods (own-use contracts) of the Group are not recognized as financial derivative instruments, but as executory contracts. In the event that such contracts include embedded derivatives, those derivatives are recorded separately from the original contract, if the economic characteristics of the embedded derivative are not closely related to the economic characteristics of the original host contract. Options contracted for the purchase or sale of non-financial elements which may be cancelled through cash outflows are not considered to be 'own-use contracts'.

The inputs used to calculate fair value of our derivatives are based on prices observable on not quoted markets, through the application of valuation models (Level 2). The valuation techniques used to calculate fair value of our derivatives include discounting estimated future cash flows, using assumptions based on market conditions at the date of valuation or using market prices of similar comparable instruments, amongst others. The valuation of derivatives and the identification and valuation of embedded derivatives and own-use contracts requires the use of considerable professional judgment. These determinations were based on available market information and appropriate valuation methodologies. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.

Note 4. — Financial risk management

Abengoa's activities are undertaken through its operating segments and are exposed to various financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk, liquidity risk and capital risk.

The risk management model attempts to minimize the potential adverse impact of such risks upon the Group's financial performance. Risk is managed by the Group's Corporate Finance Department, which is responsible for identifying and evaluating financial risks in conjunction with the Group's operating segments, quantifying them by project, region and company.

Written internal risk management policies exist for global risk management, as well as for specific areas of risk, such as foreign exchange risk, credit risk, interest rate risk, liquidity risk, the use of hedging instruments and derivatives and the investment of cash surpluses.

In addition, there are official written management regulations regarding key controls and control procedures for each company and the implementation of these controls is monitored through internal audit procedures.

The Group is affected by the following financial risks:

a) Market risk

Market risk arises when group activities are exposed fundamentally to financial risk derived from changes in foreign exchange rates, interest rates and changes in the fair values of certain raw materials.

To hedge such exposure, Abengoa uses currency forward contracts, options and interest rate swaps as well as future contracts for commodities. The Group does not generally use derivatives for speculative purposes.

- Foreign exchange rate risk: the international activity of the Group generates exposure to foreign exchange rate risk. Foreign exchange rate risk arises when future commercial transactions and assets and liabilities recognized are not denominated in the functional currency of the group company that undertakes the transaction or records the asset or liability. The main exchange rate exposure for the Group relates to the US Dollar against the Euro.

To control foreign exchange risk, the Group purchases forward exchange contracts. Such contracts are designated as fair-value or cash-flow hedges, as appropriate.

In the event that the exchange rate of the US Dollar had risen by 10% against the Euro as of December 31, 2013, with the rest of the variables remaining constant, the effect in the Consolidated Income Statement would have been a loss of €8,496 thousand (loss of €10,602 thousand in 2012 and loss of €1,206 thousand in 2011) mainly due to the US Dollar net liability position of the Group in companies with Euro functional currency and an increase of €1,192 thousand (decrease of €2,440 in 2012 and increase of €3,338 thousand in 2011) in other reserves as a result of the cash flow hedging effects on highly probable future transactions.

Details of the financial hedging instruments and foreign currency payments as of December 31, 2013 and 2012 are included in Note 14 of these Notes to these Consolidated Financial Statements.

- Interest rate risk: arises mainly from financial liabilities at variable interest rates.

Abengoa actively manages its risks exposure to variations in interest rates associated with its variable interest debt.

In non-recourse financing (see Note 19), as a general rule, the Company enters into hedging arrangements for at least 80% of the amount and the timeframe of the relevant financing.

In corporate financing (see Note 20), as general rule, 80% of the debt is covered throughout the term of the debt; in addition, in 2009, 2010 and 2013, Abengoa issued notes at a fixed interest rate.

The main interest rate exposure for the Group relates to the variable interest rate with reference to the Euribor.

To control the interest rate risk, the Group primarily uses interest rate swaps and interest rate options (caps and collars), which, in exchange for a fee, offer protection against an increase in interest rates.

In the event that Euribor had risen by 25 basic points as of December 31, 2013, with the rest of the variables remaining constant, the effect in the Consolidated Income Statement would have been a profit of €13,669 thousand (profit of €4,004 thousand in 2012 and profit of €15,923 thousand in 2011) mainly due to the increase in time value of hedge interest rate options (caps and collars) and an increase of € 48,050 thousand in other reserves (increase of €52,163 thousand in 2012 and increase of €44,077 thousand in 2011) mainly due to the increase in value of hedging interest derivatives (swaps, caps and collars).

A breakdown of the interest rate derivatives as of December 31, 2013 and 2012 is provided in Note 14 of these Notes to the Consolidated Financial Statements.

- Risk of change in commodities prices: arises both through the sale of the Group's products and the purchase of commodities for production processes. The main risk of change in commodities prices for the Group is related to the price of grain, ethanol, sugar, gas, and aluminum (and zinc until the sale of the Company's shareholding in Befesa).

In general, the Group uses futures and options listed on organized markets, as well as OTC (over-the-counter) contracts with financial institutions, to mitigate the risk of market price fluctuations.

At December 31, 2013, if the price of grain had increased by 10%, with the rest of the variables remaining constant, the effect in the Consolidated Income Statement would have been null (loss of €35,092 thousand in 2012 and null impact in 2011) and an increase in other reserves of € 4,567 thousand (decrease of €16,391 thousand in 2012 and decrease of €2,661 thousand in 2011) due to open derivative contracts primarily on grain purchases held by the Group.

At December 31, 2013, if the price of ethanol had increased by 10%, with the rest of the variables remaining constant, the effect in the Consolidated Income Statement would have been null (profit of €11,035 thousand in 2012 and null in 2011) and an increase in other reserves of €60,040 thousand (null in 2012 and increase of €969 thousand in 2011) due to open derivative contracts primarily on ethanol purchases held by the Group.

A breakdown of the commodity derivative instruments as of December 31, 2013 and 2012 is included in Note 14 to these Consolidated Financial Statements.

In addition, certain Bioenergy Business Group companies engage in purchase and sale transactions in the grain and ethanol markets, in accordance with a management policy for trading transactions.

Management has approved and supplemented trading strategies to control the purchase and sale of forward and swap contracts, mainly for sugar, grain and ethanol, which are reported on a daily basis, following the internal procedures established in the Transactions Policy. As a risk-mitigation element, the company sets daily limits or 'stop losses' for each strategy, depending on the markets in which it operates, the financial instruments purchased and the risks defined in the transaction.

These transactions are measured monthly at fair value through the Consolidated Income Statement. In 2013, Abengoa recorded a profit of €15 thousand (profit of €11,768 thousand in 2012 and loss of €4,593 thousand in 2011), corresponding to settled transactions in years 2013 and 2012. In 2011, a loss of €4,567 thousand is related to profit on settled transactions and a loss of €26 thousand to open derivative contracts valued at the year ended.

b) Credit risk

The main financial assets exposed to credit risk derived from the failure of the counterparty to meet its obligations are trade and other receivables, current financial investments and cash.

a) Clients and other receivables (see Note 15).

b) Current financial investments and cash (see Notes 13, 14, 15 and 17).

- Clients and other receivables: Most receivables relate to clients operating in a range of industries and countries with contracts that require ongoing payments as the project advances; the service is rendered or upon delivery of the product. It is a common practice for the company to reserve the right to cancel the work in the event of a material breach, especially non-payment.

In general, and to mitigate the credit risk, prior to any commercial contract or business agreement, the company generally holds a firm commitment from a leading financial institution to purchase the receivables through a non-recourse factoring arrangement. Under these agreements, the company pays the bank for assuming the credit risk and also pays interest for the discounted amounts. The company always assumes the responsibility that the receivables are valid.

Abengoa derecognizes the factored receivables from the Consolidated Statement of Financial Position when all the conditions of IAS 39 for derecognition of assets are met. In other words, an analysis is made to determine whether all risks and rewards of the financial assets have been transferred, comparing the company's exposure, before and after the transfer, to the variability in the amounts and the calendar of net cash flows from the transferred asset. Once the company's exposure to this variability has been eliminated or substantially reduced, the financial asset is transferred.

In general, Abengoa considers that the most significant risk related to Clients and other receivables is the risk of non-collection, since: a) trade receivables may

be quantitatively significant during the progress of work performed for a project or service rendered; b) it is not under the company's control. However, the risk of delays in payment typically relates to technical problems, i.e., associated with the technical risk of the service provided and, therefore, within the company's control.

If the company concludes that the risk associated to the contract has been transferred to the financial institution, the receivable is derecognized in the Consolidated Statement of Financial Position at the time it is transferred, in accordance with IAS 39.20.

An aging of trade receivables as of December 31, 2013 and 2012 is included in Note 15 'Clients and other receivable accounts'. The same note also discloses the credit quality of the clients as well as the movement on provisions for receivables for the years ended December 31, 2013 and 2012.

- Financial investments: to control credit risk in financial investments, the Group has established corporate criteria which require that counterparties are always highly rated financial entities and government debt, as well as establishing investing limits with periodic review.

c) Liquidity risk

Abengoa's liquidity and financing policy is intended to ensure that the company keeps sufficient funds available to meet its financial obligations as they fall due. Abengoa uses two main sources of financing:

- Non-recourse project financing, which is typically used to finance any significant investment (see Notes 2.5 and 19). The repayment profile of each project is established on the basis of the projected cash flow generation of the business, allowing for variability depending on whether the cash flows of the transaction or project can be forecast accurately. This ensures that sufficient financing is available to meet deadlines and maturities, which mitigates the liquidity risk significantly.
- Corporate Financing, used to finance the activities of the remaining companies which are not financed under the aforementioned financing model. This means of financing is managed through Abengoa, S.A., which pools cash held by the rest of the companies so as to be able to re-distribute funds in accordance with the needs of the Group (see Notes 2.18 and 20) and to ensure that the necessary resources are obtained from the bank and capital markets.

To ensure there are sufficient funds available for debt repayment in relation to its cash-generating capacity, the Corporate Financial Department annually prepares and the Board of Directors reviews a Financial Plan that details all the financing needs and how such financing will be provided. We fund in advance disbursements for major cash requirements, such as capital expenditures, debt repayments and working capital requirements. In addition, as a general rule, we do not commit our own equity in projects until the associated long-term financing is obtained.

During 2013, Abengoa covered its financing needs through the following financial transactions:

- In 2012, the Company completed the refinancing of its syndicated loans as well as new financing transactions in subsidiaries which have the support of export credit agencies.

- During 2013 the Company successfully extended the maturity profile of its debt maturities through access to capital markets.
- In January 2013 the Company issued € 400 million convertible notes due in 2019. In addition, in February 2013 the Company issued € 250 million ordinary notes due in 2018 (the 'February notes') and in October and November 2013, additional notes fungible with the February notes were issued for an amount of €50 and €250 million, respectively.
- Furthermore, the Company completed a capital increase for a total amount of € 517.5 million in October 2013.
- Finally, in November 2013 Abengoa issued USD 450 million ordinary notes due in 2020 (see Notes 18 and 20).

Abengoa aims to maintain its strong liquidity position, extend the debt maturities of its existing corporate loans and bonds, continue to access the capital markets from time to time, as appropriate, and further diversify its funding sources. The Company aims to continue to raise equity funding at the project company level through partnerships.

In accordance with the foregoing, the sources of financing are diversified, in an attempt to prevent concentrations that may affect our liquidity risk.

An analysis of the Group's financial liabilities classified into relevant maturity groupings based on the remaining period is included in the following Notes to these Consolidated Financial Statements:

<u>Current and non-current</u>	<u>Notes to the consolidated financial statements</u>
Financial debt	Note 19 Non-recourse financing and Note 20 Corporate financing
Lease-back	Note 20 Corporate financing
Finance lease	Note 20 Corporate financing
Borrowings and other loans	Note 20 Corporate financing
Trade and other accounts payable	Note 25 Trade payables and other current liabilities
Derivatives and hedging instruments	Note 14 Financial derivatives instruments
Other liabilities	Note 21 Grants and other liabilities

d) Capital risk

The Group manages capital risk to ensure the continuity of the activities of its subsidiaries from an equity standpoint by maximizing the return for the shareholders and optimizing the structure of equity and debt in the respective companies or projects.

Since the admission of its shares to trade on the stock market, the company has grown in the following ways:

- cash flows generated by conventional businesses;
- financing of new investments through non-recourse financing, which also generates business for conventional businesses;
- corporate financing, either through banks or capital markets;
- issuance of new shares of subsidiaries through organized markets;

- asset rotation or divestitures, such as divestiture of Befesa or the sale of mature concessional shares, the sale of a transmission line concession activity in Brazil and a water concession activity in China (for details see Note 6.2.b and 7.2);
- capital increase carried out for €300 million in 2011 and for €517.5 million in 2013 (see Note 18.1).

The leverage objective of the activities of the company is not measured based on the level of debt on its own resources, but on the nature of the activities:

- for activities financed through Non-recourse Financing each project is assigned a leverage objective based on the cash and cash flow generating capacity, generally, of contracts that provide these projects with highly recurrent and predictable levels of cash flow generation;
- for activities financed with Corporate Financing, the objective is to maintain reasonable leverage, defined as 2.5 times corporate Ebitda over Net Corporate Debt (excluding the Ebitda and the non-recourse financing) in 2013.

Note 5. — Financial information by segment

5.1. Information by business segment

As indicated in Note 1, Abengoa's activity is grouped under the following three activities which are in turn composed of seven operating segments (eight operating segments until the sale of shareholding in Befesa, see Note 7.1):

- Engineering and construction; includes our traditional engineering activities in the energy and water sectors, with more than 70 years of experience in the market as well as the development of solar technology.

This activity comprises two operating segments:

- Engineering and construction — Abengoa specializes in carrying out complex turn-key projects for thermo-solar plants, solar-gas hybrid plants, conventional generation plants, biofuels plants and water infrastructures, as well as large-scale desalination plants and transmission lines, among others.
- Technology and other — This segment includes those activities related to the development of thermo-solar technology, water management technology and innovative technology businesses such as hydrogen energy or the management of energy crops.
- Concession-type infrastructures; groups together the company's proprietary concession assets that generate revenues governed by long-term sales agreements, such as take-or-pay contracts or power purchase agreements. This activity includes the operation of electric (solar, cogeneration or wind) energy generation plants, desalination plants and transmission lines. These assets generate low demand risk and we focus on operating them as efficiently as possible.

This activity currently comprises four operating segments:

- Solar — Operation and maintenance of solar energy plants, mainly using thermo-solar technology.

ABENGOA

Consolidated financial statements

- Transmission — Operation and maintenance of high-voltage transmission power line infrastructures.
- Water — Operation and maintenance of facilities aimed at generating, transporting, treating and managing water, including desalination and water treatment and purification plants.
- Cogeneration and other — Operation and maintenance of conventional cogeneration electricity plants.
- Industrial production; covers Abengoa's businesses with a commodity component, such as biofuels (industrial waste recycling was part of this activity until the sale of shareholding in Befesa, see Note 7.1). The company holds an important leadership position in these activities in the geographical markets in which it operates.

This activity is comprised of one operating segment:

- Biofuels — Production and development of biofuels, mainly bioethanol for transport, which uses cereals, sugar cane and oil seeds (soya, rape and palm) as raw materials.

Abengoa's Chief Operating Decision Maker ('CODM') assesses the performance and assignment of resources according to the above identified segments. The CODM in Abengoa considers the revenues as a measure of the activity and the EBITDA (Earnings before interest, tax, depreciation and amortization) as measure of the performance of each segment. In order to assess performance of the business, the CODM receives reports of each reportable segment using revenues and EBITDA. Net interest expense evolution is assessed on a consolidated basis given that the majority of the corporate financing is incurred at the holding level and that most of the related assets are held at project companies which are financed through non-recourse project finance. The depreciation, amortization and impairment charges are assessed on a consolidated basis in order to analyze the evolution of net income and to determine the dividend pay-out ratio. These charges are not taken into consideration by CODM for the allocation of resources because they are non-cash charges.

The process to allocate resources by the CODM takes place prior to the award of a new project. Prior to presenting a bid, the company must ensure that the non-recourse financing for the new project has been obtained. These efforts are taken on a project by project basis. Once the project has been awarded, its evolution is monitored at a lower level and the CODM receives periodic information (revenues and EBITDA) on each operating segment's performance.

- a) The following table shows the Segment Revenues and EBITDA for the years 2013, 2012 and 2011:

Item	Revenue			Ebitda		
	2013	2012	2011	2013	2012	2011
Engineering and construction						
Engineering and construction	4,472,759	3,477,832	3,710,580	593,335	475,544	511,249
Technology and other	335,689	302,786	313,310	213,151	148,358	195,997
Total	4,808,448	3,780,618	4,023,890	806,486	623,902	707,246
Concession-type infrastructure						
Solar	320,999	281,566	131,526	200,261	203,357	92,916
Transmission lines	66,621	37,626	237,618	42,627	15,726	193,218
Water	40,194	20,679	21,041	28,135	11,625	10,327
Cogeneration and other	91,097	53,243	50,111	46,711	2,896	7,196
Total	518,911	393,114	440,296	317,734	233,604	303,657
Industrial production						
Biofuels	2,029,111	2,138,220	2,224,970	240,907	91,103	152,140
Total	2,029,111	2,138,220	2,224,970	240,907	91,103	152,140
Total	7,356,470	6,311,952	6,689,156	1,365,127	948,609	1,163,043

The reconciliation of segment EBITDA with the profit attributable to owners of the parent is as follows:

Line	2013	2012	2011
Total segment EBITDA	1,365,127	948,609	1,163,043
Amortization and depreciation	(571,161)	(422,013)	(230,555)
Financial expenses net	(721,815)	(654,593)	(666,870)
Share in profits/(losses) of associates	(5,165)	17,561	3,975
Income tax expense	43,933	171,913	(3,188)
Profit (loss) from discontinued operations, net of tax	(595)	32,543	129,077
Profit attributable to non-controlling interests	(8,879)	(38,650)	(21,337)
Profit attributable to the parent company	101,445	55,370	374,145

b) The long-term assets and liabilities by Segment at the end of 2013 and 2012 are as follows:

(*) Operating segment existing until the sale of shareholding in Befesa (see Note 7)

The criteria used to obtain the assets and liabilities per segment, are described as follows:

- With the only objective of presenting liabilities by segment, Corporate Financing signed by Abengoa, S.A. and Abengoa Finance, S.A.U. has been allocated by segments (see

Note 20), since its main purpose is to finance investments in projects and in companies needed to expand businesses and lines of activity of the group.

c) Net Debt by segment as of December 31, 2013 and 2012 is as follows:

Item	Engineering and construction		Concession-type infrastructure				Industrial production		Balance as of 12.31.13
	Eng. and const.	Techn. and other	Solar	Trans.	Water	Cog. and other	Biofuels	Recycling(*)	
Bank debt and current/ non-curr. bond	919,808	668,692	1,137,763	112,812	—	2,536	2,648,987	—	5,490,598

Total net debt (cash)	(385,311)	463,506	2,704,673	801,932	243,480	579,188	1,965,018	327,881	6,700,367

(*) Operating segment existing until the sale of shareholding in Befesa (see Note 7).

In order to obtain Net Debt, by segment:

1. With the only objective of presenting liabilities by segment, Corporate Financing signed by Abengoa, S.A. and Abengoa Finance, S.A.U. has been allocated by operating segment (see Note 20), since its main purpose is to finance investments in projects and in companies needed to expand the businesses and lines of activity of the group.
2. Short-term financial investments and Cash and cash equivalents are presented reducing debt, since both items are considered highly liquid, even though short-term financial investments do not fulfill all the conditions to be classified as cash and cash equivalents.

d) The Capex by segments for the years ended December 31, 2013 and 2012 is as follows:

<u>Item</u>	<u>2013</u>	<u>2012</u>
Engineering and construction		
Engineering and construction	64,679	43,027
Technology and other	67,155	68,226
Total	131,834	111,253
Concession-type infrastructure		
Solar	389,173	848,250
Transmission lines	727,198	863,422
Water	242,086	53,361

Total	9,914,273	7,786,005

Note 6. — Changes in the composition of the group

6.1. Changes in the consolidation group

- a) In 2013 a total of 56 subsidiaries (79 in 2012 and 26 in 2011), 2 associates (5 in 2012 and 1 in 2011) and 3 joint ventures (9 in 2012 and 3 in 2011), were included in the consolidation group, which are identified in Appendices I, II, III, XII, XIII, XIV, XVII, XVIII and XIX of these Consolidated Financial Statements.

These changes did not have a significant impact on the overall consolidated amounts in 2013, 2012 and 2011.

As described in Note 2.1.1 the Group has applied IFRS 10, 11, 12 and amendments to IAS 27 and 28 in 2013 (December 31, 2012 and January 1, 2012), recasting the information presented in 2012 according to the transition guidance of this standard. As a result 5 companies previously considered as subsidiaries and 33 companies previously considered as joint ventures are treated as associates recorded under the equity method in 2012. The effect of the de-consolidation of the affected companies and their integration according to the equity method on the consolidated statements of financial position as of December 31, 2012 and January 1, 2012 and on the consolidated income statement for the year 2012 is shown in Note 2.1.1.

In addition, during 2013, 22 Temporary joint operations (UTE), (14 in 2012 and 39 in 2011) 3 of them with partners which do not belong to the Group, have commenced their activity or have started to undertake a significant level of activity and were included in the consolidation group.

On the other hand, the amounts set out below represent the Group's proportional interest in the assets, liabilities, revenues and profits of the UTE with partners non Group shareholding, which have been included in the Consolidated Financial Statements in 2013 and 2012 (and revenues and profits of the UTE with partners non Group shareholding, which have been included in the Consolidated Financial Statements in 2011):

	<u>2013</u>	<u>2012</u>	
Non-current assets	7,498	16,366	
Current assets	152,974	131,977	
Non-current liabilities	5,534	25,219	
Current liabilities	152,871	123,124	
	<u>2013</u>	<u>2012</u>	<u>2011</u>
Revenue	58,112	66,419	204,503
Expenses	(61,032)	(76,795)	(203,119)
Profit/(loss) after taxes	(2,920)	(10,376)	1,384

- b) In 2013 a total of 88 subsidiaries were no longer included in the consolidation group (46 in 2012 and 84 in 2011), 4 associates (5 in 2012 and 2 in 2011) and 9 joint ventures (7 in 2012 and 3 in 2011), which are identified in Appendix IV, V and VI and which did not have any material impact in the Consolidated Income Statement, except for disposals mentioned in Note 6.2b).

During 2013, 17 UTE, (33 in 2012 and 147 in 2011), which do not belong to the Group, were excluded from the consolidated group because they had ceased their activities or had become

insignificant in relation to overall group activity levels. The proportional consolidated revenues of these UTE in 2013 were € 53 thousand (€271 thousand in 2012 and €26,294 thousand in 2011).

- c) On October 13, 2013, Arizona Solar One, LLC which was recorded under the equity method during its construction phase entered into operation and started to be fully consolidated after we gained control over the entity (see Note 6.3).

During 2012, Rioglass group, which was consolidated proportionally until December 31, 2011, started to be fully consolidated due to the business combination conducted in this period (see Note 6.3).

During 2011, no companies changed the method of consolidation due to a change in its shares with the exception of the Brazilian transmission line companies which were consolidated globally until November 30, 2011 and proportionally after the sale of this first portion and until the sale of the second portion on March 16, 2012 (see Note 6.2b).

6.2. Main acquisitions and disposals

a) Acquisitions

- There were no significant acquisitions during the year 2013 and 2012.
- On March 17, 2011, the Board of Directors of Proyectos de Inversiones Medioambientales, S.L. (the bidding company), a subsidiary of Abengoa, S.A., agreed to formulate a public tender offer to acquire the shares in Befesa Medio Ambiente, S.A. (Befesa), in order to delist Befesa's shares from the Spanish official secondary markets on which it was listed, in accordance with Article 34.5 and subsequent articles of the Securities Market Act and Article 10 and subsequent articles of Royal Decree 1066/2007 and other applicable legislation.

On April 25, 2011, the General Shareholders' Meeting of Befesa approved the resolution to delist the shares representing the share capital of the Affected Company from stock markets and the subsequent public tender offer for the shares. The offer was to acquire 710,502 Befesa shares, which represent 2.62% of its share capital at 23.78 Euros per share.

On August 24, 2011 the Governing Body of the Bilbao Stock Exchange reported the delisting of the shares of Befesa Medioambiente, S.A. from trading, effective August 25, 2011, upon the forced sale of shares by Proyectos de Inversiones Medioambientales, S.L. As of the date of issuance of these financial statements Befesa's shares have been delisted from trading due to the successful tender offer process.

- On November 2, 2011, Abengoa reached an agreement with Qualitas Venture Capital (QVC) to acquire its 38% stake in the aluminum recycling business for €34 million, which resulted in a final 98.25% ownership by Abengoa in the aluminum recycling company on November 24, 2011, date on which approval was obtained from the competent authorities. In 2007 Abengoa and QVC integrated their respective aluminum waste recycling activities in the Abengoa division responsible for this business. The transaction gave Abengoa a 60.25% stake in the company.

b) Disposals

- On May 2, 2013 the Company signed an agreement with Corning Incorporated to sell its Brazilian subsidiary, Bargoa S.A., a company which manufactures telecommunications components. The transaction price was set at 80 million US dollars. This sale brought Abengoa a cash inflow of 50 million US dollars and generated an after-tax profit of €29 million.
- On June 13, 2013 Abengoa signed a strategic agreement with the European private equity fund, Triton Partners (Triton), to sell 100% of Befesa Medio Ambiente, S.L.U. Note 7 on Discontinued operations and Non-current assets held for sale gives further details on this transaction.
- On March 16, 2012, the Company reached an agreement with Companhia Energética Minas Gerais (CEMIG) to sell the 50% stake that Abengoa, S.A. still owned in four transmission line concessions in Brazil (STE, ATE, ATE II and ATE III). On July 2, we received €354 million of cash proceeds corresponding to the total price agreed for the shares. The gain from this sale has amounted to €4 million and is recorded in 'Other operating income' in the Consolidated Income Statements.
- On September 5, 2011, Abengoa, S.A. closed an agreement with Schneider Electric, S.A. for the sale of 40% of its shares in Telvent GIT, S.A. The sale of said shares brought in cash proceeds of €391 million and a net profit from discontinued operations, including gain, of €91 million, reflected in the section 'Profit (loss) from discontinued operations, net of tax' of the Consolidated Income Statement. For more information on the sale of the shares of Telvent GIT, S.A. (see Note 7.3).
- In addition, on November 30, 2011, Abengoa, S.A. closed an agreement with Companhia Energética Minas Gerais (CEMIG) through Transmissora Aliança de Energia Elétrica, S.A. (TAESA) for the sale of 50% shares in the companies STE, ATE, ATE II and ATE III, and 100% in NTE. The sale of said shares generated cash proceeds of €479 million and a gain of €45 million reflected in the section 'Other operating income' in the Consolidated Income Statement (€43 million after tax). Of the €45 million gain, €10.6 million is attributable to recognizing the investment retained at fair value at the date when control is lost, according to IAS 27, and the remaining €34.4 million correspond to the profit obtained in the sale.

6.3. Business combinations

On October 13, 2013, Arizona Solar One, LLC, the Company that holds the assets in Solana thermo-solar plant in the United States, which was recorded under the equity method during its construction period, entered into operation and started to be fully consolidated once control over this company was gained.

As it is indicated in note 2.1.1.b), the Company reassesses whether or not it controls an investee when facts and circumstances indicate that there are changes to the elements that determine control (power over the investee, exposition to variable returns of the investee and ability to use its power to affect its returns). The Company concluded that during the construction phase of Solana plant all the relevant decisions were subject to the control and approval of the third party. As a result, the Company did not have control over these assets during the construction period. IFRS 10 (B80) establishes that control requires a continuous assessment and that the Company shall reassess if it controls an investee if facts and circumstances indicate that there are changes to the elements of control. Once the project

entered into operation, the decision making process changed, the investee was controlled and it started to be fully consolidated.

This business combination has been recorded in accordance with IFRS 3 'Business combinations'. Since during the construction period the assets were included under the scope of IFRIC 12, the book value of assets and liabilities consolidated is the same as its fair value.

The amount of assets and liabilities consolidated is shown in the following table:

	As of October 13, 2013
Non-current assets	1,522,152
Current assets	7,774
Non-current and current liabilities	(1,117,349)
Equity	(412,577)
Total	—

In 2012 the Group carried out the business combination of Rioglass Group. Rioglass Group was incorporated in 2006 as a joint venture between Abengoa and its former shareholders. The group manufactures and sells parabolic trough mirrors for thermo-solar plants.

Since the incorporation of Rioglass Group, thermo-solar energy has experienced a very high development worldwide, mainly in Spain and the United States. Recently, we can appreciate a significant international expansion in other geographies, with plants in construction in the Middle East, Africa and India and with ambitious plans to develop new thermo-solar plants in several countries such as South Africa, Australia, China, India, Saudi Arabia and Chile.

On January 16, 2012, Abengoa Solar, S.A. closed an agreement with Rioglass Laminar, S.L. to acquire an additional share of Rioglass Holding, S.A. With this acquisition and once the conditions for the closing were fulfilled, Abengoa Solar, S.A. became the majority shareholder of Rioglass Holding, S.L. and obtained control of the management of the group, a business which is key in its strategy of international expansion. As a result, Rioglass group, which was integrated proportionally, started to be fully consolidated.

Since the business combination was achieved in stages, according to IFRS 3, the Company has remeasured its previously held equity interest in the acquiree at its acquisition-date fair value, which has consisted basically in the value of committed sales from Rioglass Group for the use of technology and mirrors, linked to relations and contracts existing with clients in the construction of thermo-solar plants in Spain, the United States, South Africa, Mexico and India. This valuation has represented a gain of € 85,247 thousand.

The difference between the fair value of the stake acquired in Rioglass group and the fair value of the identifiable assets and liabilities acquired, amounting to € 38,919 thousand, was recorded as Goodwill.

Additionally, according to IFRS 3, the purchase price allocation, was as follows:

	<u>Book value</u>	<u>Fair value</u>
Non-current assets	66,141	187,157
Current assets	64,856	73,564
Non-current and current liabilities	(73,082)	(110,148)
Book value of share capital of acquired net assets	28,958	—
Fair value of acquired net assets	—	150,573
Stake in fair value of acquired net assets (I)	—	75,287
Fair value of the stake acquired (II)	—	114,206
Goodwill (Difference II—I)	—	38,919

In 2011 no significant business combinations were carried out by the Group.

Note 7. — Discontinued operations and Non-current assets held for sale

7.1. Sale of shares in Befesa Medio Ambiente, S.L.U.

On June 13, 2013 the Company reached an exclusive agreement with certain investment funds managed by Triton Partners to wholly transfer Abengoa's shareholding in Befesa Medio Ambiente, S.L.U. The agreed sale price was €1,075 million (considering the net debt adjustments, total consideration to Abengoa amounts to €620 million).

The sale of this shareholding involved a cash deposit of €331 million. The balance of the agreed payment, to complete the aforementioned figure of €620 million, consists of:

- A deferred payment of €17 million (€15 million held as a deposit until ongoing litigations are resolved and two million Euros in long-term receivables from a client of Befesa Medioambiente).
- A credit note of €48 million to mature in five years, accruing annual interest of 2% in the first year, 4% in the second, 6% in the third, 8% in the fourth and 12% in the fifth year, and payable at the expiration of each period.
- A deferred payment of €225 million through a convertible loan with 15 years maturity and subject to two extension options of five years each at the discretion of the venture capital fund. The loan's principal shall be settled with a single repayment at maturity and accrues interest at the 6-month Euribor, plus a 6% spread, with an option for the fund to capitalize or pay interest at the end of each accrual period. Certain triggering events, which include Befesa's insolvency, a maximum net debt/EBITDA ratio of 8.0 throughout the life of the convertible loan, and failure to meet certain financial objectives in the last three years of the 15-year loan (minimum expected operating cash flow, minimum cash coverage ratio of 1.3) would result in the automatic conversion of the loan into 14.06% of Befesa's shares. Furthermore, under certain scenarios of sale of Befesa by the fund, and conversion of the convertible loan into the 14.06% of Befesa's shares, the fund can require that Abengoa sells its 14.06% ownership together with the sale of the fund's ownership and under the same conditions applicable to the fund. In any case, if Abengoa does not receive such requirement from the fund, Abengoa can sell its 14.06% ownership coming from the conversion together with the remaining ownership sold by the fund and in this case the sale will be valid only if the acquirer also bought the 14.06%.

The convertible loan is a hybrid instrument including a loan receivable and multiple embedded derivatives. According to IAS 39, derivatives which are not closely related with the host contract (the loan receivable) should be accounted for separately. In our case, the value of all the options which are not closely related with the host contract is mainly based in the performance of Befesa and in consequence they are considered as a single derivative instrument.

In accordance with the provisions of IAS 39, the hybrid financial instrument has been initially valued at fair value, amounting to €170 million, as the sum of the loan receivable and the derivatives as a whole. The fair value of the loan has been determined taking into account capitalization of accrued interest and a discount rate equal to the Spanish bond with a similar maturity plus a market spread of approximately 4.5%. The embedded derivative has been initially valued close to zero, because the occurrence of any of the events that would trigger the conversion is highly unlikely. In subsequent periods, the loan receivable is valued at amortized cost and the derivatives are valued at fair value, with changes in profit and loss. The probability of occurrence of conversion events will be periodically monitored to calculate the embedded derivatives fair value. As of December 31, 2013, the fair value of the embedded derivative has remained close to zero (see Note 12).

The convertible loan is included in "Other Receivable Accounts" in non-current assets and the derivative is included in non-current 'Derivative liabilities' in the Consolidated Statements of Financial Position.

The sale transaction generated a gain of €0.4 million in the 'Results for the year from discontinued operations, net of taxes' in the Consolidated Income Statement for the year, 2013.

Taking into account the significance that the activities carried out by Befesa have for Abengoa, the sale of this shareholding is considered as a discontinued operation in accordance with the stipulations and requirements of IFRS 5, 'Non-Current Assets Held for Sale and Discontinued Operations'.

In accordance with this standard, the results of Befesa until the closing of the sale and the result of this sale are included under a single heading in Abengoa's Consolidated Financial Statements for the year ended December 31, 2013. Likewise, the Consolidated Income Statement for the years 2012 and 2011, which are included for comparison purposes in Abengoa's Consolidated Financial Statements for the year ended December 31, 2013 also include the results generated by Befesa under a single heading, for the activities which are now considered discontinued.

ABENGOA**Consolidated financial statements**

Below is the breakdown of the Consolidated Interim Income Statements related to Befesa up to the date of sale (January 13, 2013) and for the years 2012 and 2011:

	<u>2013</u>	<u>2012</u>	<u>2011</u>
Revenue	317,517	605,597	594,327
Other operating income	4,670	15,373	19,546
Operating expenses	(317,132)	(536,565)	(528,177)
I. Operating profit	5,055	84,405	85,696
II. Financial expense, net	(18,623)	(46,624)	(28,157)
III. Share of profit/(loss) of associates carried under the equity method	138	4,931	254
IV. Profit before income tax	(13,430)	42,712	57,793
V. Income tax benefit	12,454	(10,169)	(20,179)
VI. Profit for the period from continuing operations	(976)	32,543	37,614
VII. Profit attributable to non-controlling interests	—	(1,345)	(2,769)
VIII. Profit for the period attributable to the Parent Company	<u>(976)</u>	<u>31,198</u>	<u>34,845</u>

Additionally, below is the composition of the heading 'Profit (loss) from discontinued operations, net of tax' included in the Consolidated Interim Income Statements for year 2013:

	<u>2013</u>
Gain on the sale of Befesa	381
% result of Befesa integration	(976)
Profit from discontinued operations, net of tax	<u>(595)</u>

The credit note and the convertible loan are recorded in Non-current financial investments (see Note 15.10).

7.2. Assets held for sale — shares in BCTA Qingdao, S.L.

As of December 31, 2013, the Company has started a process of negotiations to sell its 92.6% interest in Qingdao BCTA Desalination Co., Ltd., ('Qingdao') a desalination plant in China. Given that as of that date the subsidiary was available for immediate sale and the sale is highly probable, the Company has classified the assets and liabilities of Qingdao as held for sale in the Consolidated Statement of Financial Position as of December 31, 2013. Until closing of the sale transaction, the assets will be reported as held for sale in accordance with the stipulations and requirements of IFRS 5, Non-Current Assets Held for Sale and Discontinued Operations.

As of December 31, 2013, the breakdown of the assets and liabilities classified as Held for Sale, are as follows:

	Balance as of 12.31.13
Assets	
Fixed assets in projects (project finance)	138,067
Financial investments	16
Deferred tax assets	432
Current assets	<u>27,888</u>
Total assets	<u>166,403</u>
Equity and liabilities	
Long-term non-recourse project financing	95,460
Current liabilities	<u>25,809</u>
Total equity and liabilities	<u>121,269</u>

7.3. Sales of shares in Telvent GIT, S.A.

On June 1, 2011, our 40% owned subsidiary, Telvent GIT, S.A., entered into an acquisition agreement with Schneider Electric S.A., ('SE'), under which SE launched a tender offer to acquire all Telvent shares. Concurrently with the signing of the acquisition agreement between SE and Telvent, Abengoa entered into an irrevocable undertaking agreement with SE under which we agreed to tender our 40% shareholding in Telvent into the tender.

SE launched the tender offer to acquire all Telvent shares at a price of \$40 per share in cash, which represented a company value of €1,360 million, and a premium of 36% to Telvent's average share price over the previous 90 days prior to the announcement of the offer.

The transaction was closed in September 2011, following completion of the usual closing conditions and once all of the regulatory authorizations had been obtained. The sale generated cash proceeds of €391 million and a total gain from discontinued operations of €91 million for Abengoa, reflected under the heading of 'Profit (loss) from discontinued operations, net of tax' in the income statement for the twelve months ending in December 2011.

Taking into account the significance of the activities carried out by Telvent GIT, S.A. to Abengoa, the sale of this shareholding was considered as a discontinued operation in accordance with the stipulations and requirements of IFRS 5, Non Current Assets Held for Sale and Discontinued Operations, and therefore included under a single heading in the consolidated income statement for the twelve month period ending December 31, 2011.

ABENGOA
Consolidated financial statements

Below is the Income Statement of Telvent GIT up to the date of sale and a detail of the heading 'Profit/(loss) for the year from discontinued operations' of the Consolidated Income Statement for the year 2011:

	<u>2011</u>
Revenue	435,622
Operating profit	14,506
Profit before income tax	(21,305)
Income tax benefit (benefit)	3,446
Profit/(loss) for the period from continuing operations	(17,859)
Profit/(loss) attributable to non-controlling interests	<u>72</u>
Profit/(loss) for the period attributable to the Parent Company	<u>(17,931)</u>
	<u>2011</u>
Gain on the sale of Telvent	98,636
% result of Telvent integration	<u>(7,173)</u>
Profit from discontinued operations, net of tax	<u>91,463</u>

Note 8. — Intangible assets

8.1. The following table sets out the movement of intangible assets in 2013:

<u>Cost</u>	<u>Goodwill</u>	<u>Development assets</u>	<u>Other</u>	<u>Total</u>
Total cost as of December 31, 2012	1,115,275	223,751	392,450	1,731,476
Additions	—	100,888	386,775	487,663
Disposals and decreases	—	(4,691)	—	(4,691)
Translation differences	(77,681)	(1,640)	(1,859)	(81,180)
Change in consolidation	(561,535)	(6,864)	(5,828)	(574,227)
Reclassifications	—	—	(498,253)	(498,253)
Total cost as of December 31, 2013	<u>476,059</u>	<u>311,444</u>	<u>273,285</u>	<u>1,060,788</u>
	<u>Goodwill</u>	<u>Development assets</u>	<u>Other</u>	<u>Total</u>
Accumulated amortization				
Total amort. as of December 31, 2012	—	(116,823)	(57,908)	(174,731)
Additions	—	(31,510)	(20,463)	(51,973)
Translation differences	—	604	519	1,123
Change in consolidation	—	1,078	5,826	6,904
Total amort. as of December 31, 2013	<u>—</u>	<u>(146,651)</u>	<u>(72,026)</u>	<u>(218,677)</u>
Net balance at December 31, 2013	<u>476,059</u>	<u>164,793</u>	<u>201,259</u>	<u>842,111</u>

The decrease in goodwill is mainly due to the exclusion of Befesa from the consolidation scope (see Note 7) and due to the negative effect of the depreciation of the Brazilian real with respect to the Euro.

The cost of intangible assets has increased principally due to the investment effort in research and development projects (see Note 8.4) offset by the reclassification of the fixed assets related to the

Solabes 1 and 6 thermosolar plants as Fixed assets in projects, once the non-recourse financing for these projects has been obtained (see Note 10.1).

During 2013 no significant losses from impairment of intangible assets were recorded.

8.2. The following table sets out the movement of intangible assets in 2012:

<u>Cost</u>	<u>Goodwill</u>	<u>Development assets</u>	<u>Other</u>	<u>Total</u>
Total cost as of December 31, 2011	1,118,186	151,741	127,307	1,397,234
Additions	2,821	72,350	182,054	257,225
Disposals and decreases	(4,182)	—	(863)	(5,045)
Translation differences	(37,199)	(619)	(454)	(38,272)
Change in consolidation	35,649	279	84,406	120,334
Total cost as of December 31, 2012	<u>1,115,275</u>	<u>223,751</u>	<u>392,450</u>	<u>1,731,476</u>
<u>Accumulated amortization</u>	<u>Goodwill</u>	<u>Development assets</u>	<u>Other</u>	<u>Total</u>
Total amort. as of December 31, 2011	—	(83,552)	(23,155)	(106,707)
Additions	—	(33,491)	(34,975)	(68,466)
Translation differences	—	220	222	442
Total amort. as of December 31, 2012	—	<u>(116,823)</u>	<u>(57,908)</u>	<u>(174,731)</u>
Net balance at December 31, 2012	<u>1,115,275</u>	<u>106,928</u>	<u>334,542</u>	<u>1,556,745</u>

Goodwill remained stable: the increase arising from the business combination of the Rioglass group, by €38,919 thousand, was offset by the negative effect of translation differences, arising mainly from the depreciation of the Brazilian real with respect to the Euro. Additionally, the business combination of Rioglass caused that intangible assets identified in the purchase price allocation were recorded at fair value and fully consolidated, in accordance with IFRS 3, which explained the increase in the rest of the intangible assets (see Note 6.3), together with the progress in the construction of several thermosolar plants in Spain (€172 million) and investment effort in research and development projects (see Note 8.4).

During 2012 no significant losses for impairment of intangible assets were recorded.

8.3. Total amortization expense of intangible assets for the year 2011 was €29,974 thousand.

8.4. Development assets

During 2013, Abengoa made significant Research, Development and Innovation (R&D&i) investment efforts, investing a total of €426,358 thousand (€91,260 thousand in 2012 and €90,630 thousand in 2011) through the development of new technologies in different areas of business (solar technology, biotechnology, desalination, water treatment and reuse, hydrogen, energy storage and new renewable energies).

ABENGOA
Consolidated financial statements

The following table summarizes the total investments made in R&D&i in 2013 and 2012:

	<u>Assets as of 12.31.12</u>	<u>Investment during the fiscal year</u>	<u>Other movements</u>	<u>Assets as of 12.31.13</u>
Development assets (Note 8.1)	223,751	100,888	(13,195)	311,444
Development assets in projects (Note 10.1)	73,424	—	(2,220)	71,204
Development assets in investments in associates (Note 11.2)	155,301	318,938	—	474,239
Technological development research 2013	—	6,532	(6,532)	—
Total in the 2013 fiscal year	<u>452,476</u>	<u>426,358</u>	<u>(21,947)</u>	<u>856,887</u>
	<u>Assets as of 12.31.11</u>	<u>Investment during the fiscal year</u>	<u>Other movements</u>	<u>Assets as of 12.31.12</u>
Development assets (Note 8.2)	151,741	72,350	(340)	223,751
Development assets in projects (Note 10.1)	64,045	12,304	(2,925)	73,424
Development assets in investments in associates (Note 11.2)	30,827	—	124,474	155,301
Technological development research 2012	—	6,404	(6,404)	—
Total in the 2012 fiscal year	<u>246,613</u>	<u>91,058</u>	<u>114,805</u>	<u>452,476</u>
Change in consolidation (Befesa Medio Ambiente, S.L.U.)	—	202	—	—
Total adjusted in the 2012 fiscal year	<u>—</u>	<u>91,260</u>	<u>—</u>	<u>—</u>

Last year, 2013, demonstrated Abengoa's strategic commitment to technology as a vector for growth and a source of competitive advantage in its energy and environment sectors. In order to strengthen its R&D model, Abengoa Research (AR), the company that heads Abengoa's technological development, has been structured into five scientific-technological areas aligned with the businesses in which the company applies its technology, consisting of biotechnology, bioenergy, waste; processes, water and hydrogen; and electrical systems and power electronics. Through these areas, Abengoa develops and strengthens the company's existing and future technologies.

The main development assets come from technologies that enable progress to be made in Abengoa's strategic R&D areas; technologies for high-performance thermo-electric solar plants, bio-refineries, treating municipal solid waste for energy production, and water treatment plants.

To increase its technological capacity, Abengoa has added two research laboratories to its existing assets. The Soland laboratory specializes in solar technology, while the Abengoa Research laboratory is equipped with experimental facilities and covers the majority of the company's scientific areas. Furthermore, this year the Technology Surveillance and Patents Office, which was created in 2012 and manages all the intellectual property activities, has consolidated its position. To date, Abengoa has filed 261 patent applications, of which 106 have been granted, with the number of patent applications rising by more than 20% compared to 2012.

In solar-thermal technology it is worth noting the start of construction of Khi Solar One, the world's first commercial plant using tower technology and superheated steam, in South Africa. The 50 MW plant is expected to come into operation at the end of 2014.

In the area of biofuels, Abengoa has continued to construct the commercial bio-refinery plant in Hugoton, which will come into operation in the second quarter of 2014. The technology used in this plant has been developed and proven by Abengoa over the last ten years at the second generation (2G) demonstration plant in Salamanca, Spain. A waste to biofuels (W2B) demonstration plant has also been operated at the same complex, which is capable of obtaining second-generation biofuels from recovered municipal solid waste (MSW). In addition to this progress, Abengoa continues to develop various processes to obtain high value-added bio-products from biomass, such as a catalyst that has been patented that enables biobutanol to be produced from ethanol using a catalytic process. This technology offers an additional advantage since it can be applied at the company's existing conventional biofuels facilities.

Taking into account the investment in Khi Solar One, Hugoton and the waste to biofuels demonstration plant and the rest of our activities expensed or capitalized, total investment in R&D during the year has amounted to €426,358 thousand (€91,260 thousand in 2012 and €90,630 thousand in 2011).

Progress also continues in developing and optimizing various technologies related to desalination, treating drinking water and other water treatments and reuse, all based on improvements in the operating conditions of ultra-filtration membranes, which are fundamental for achieving high levels of water purity and quality.

The expenses for Technological development research for the year 2011 was €25,560 thousand.

8.5. Goodwill

The table below shows the breakdown of Goodwill as of December 31, 2013 and 2012:

Goodwill/Operating segment	Balance as of 12.31.13	Balance as of 12.31.12
Abener Eng. and Const. Services, LLC (Engineering and construction)	25,663	26,658
Abengoa Bioenergía Brasil (Biofuels)	351,280	421,084
Abengoa Bioenergy USA (Biofuels)	32,334	33,741
Befesa Aluminio S.L. (Recycling)	—	38,131
Befesa Gest. Res. Ind, S.L. (Recycling)	—	57,666
Befesa Medio Ambiente, S.A. (Recycling)	—	176,848
BUS Group AG (Recycling)	—	263,442
Rioglass Solar (Engineering and construction)	38,919	38,919
Other	27,863	58,786
Total	476,059	1,115,275

In 2013, the decrease is due to the exclusion of Befesa from the consolidation scope (see Note 7), as well as the negative effect of the translation differences mainly due to the depreciation of the Brazilian real with respect to the Euro.

Based on the values in use calculated in accordance with the assumptions and hypothesis described in Notes 2.8 and 3, in 2013 and 2012 the recoverable amount of the cash generating units to which goodwill was assigned is higher than their carrying amount.

For each goodwill, sensitivity analysis have been performed, especially in relation to discount rates, terminal values and changes in the main business key variables, to ensure that potential changes in valuation do not make cash generating units fair value lower than its book value.

- 8.6. There are no intangible assets with indefinite useful life other than goodwill. There are no intangible assets with restricted ownerships or that may be under pledge as liabilities guarantee.

Note 9. — Property, plant and equipment

- 9.1. The table below shows the movement on the different categories of Property, plant and equipment (PP&E) for 2013:

<u>Cost</u>	<u>Lands and buildings</u>	<u>Technical installations and machinery</u>	<u>Advances and fixed assets in progress</u>	<u>Other fixed assets</u>	<u>Total</u>
Total balance as of					
December 31, 2012	523,679	1,306,824	95,498	107,883	2,033,884
Additions	9,155	42,206	23,859	71	75,291
Disposals and decreases	(209)	(1,251)	(34,064)	(1,121)	(36,645)
Translation differences	(8,980)	(16,906)	(1,850)	(2,522)	(30,258)
Change in consolidation	(52,050)	(91,251)	(31,887)	(15,991)	(191,179)
Reclassifications	22,579	836	(1,955)	(479)	20,981
Total Balance as of					
December 31, 2013	494,174	1,240,458	49,601	87,841	1,872,074
<u>Accumulated depreciation</u>	<u>Buildings</u>	<u>Technical installations and machinery</u>	<u>Advances and fixed assets in progress</u>	<u>Other fixed assets</u>	<u>Total</u>
Total accum. deprec. as of					
December 31, 2012	(109,014)	(436,385)	—	(56,886)	(602,285)
Additions	(15,043)	(49,481)	—	(32,249)	(96,773)
Disposals and decreases	166	1,198	—	794	2,158
Translation differences	1,403	7,382	—	1,771	10,556
Change in consolidation	12,645	58,782	—	14,896	86,323
Reclassifications	557	393	—	586	1,536
Total accum. deprec. as of					
December 31, 2013	(109,286)	(418,111)	—	(71,088)	(598,485)
Net balance at December 31, 2013	384,888	822,347	49,601	16,753	1,273,589

In 2013, the decrease in Property, plant and equipment was mainly due to the exclusion of Befesa Medio Ambiente, S.L.U. (see Note 7) and Bargoa, S.A. (see Note 6.2.b) from the consolidation scope following the sales of their shareholdings (-€105 million). However, there was an increase due to construction of a new metal structures manufacturing plant in India; the construction and equipping of a research laboratory in Spain; and the acquisition of machinery for projects in Peru.

During 2013 no significant losses from impairment of PP&E were recorded.

- 9.2. The table below shows the movement on the different categories of Property, plant and equipment (PP&E) for 2012:

<u>Cost</u>	<u>Lands and buildings</u>	<u>Technical installations and machinery</u>	<u>Advances and fixed assets in progress</u>	<u>Other fixed assets</u>	<u>Total</u>
Total balance as of					
December 31, 2011	527,574	1,325,091	118,381	124,136	2,095,182
Additions	5,510	43,706	37,426	8,691	95,333
Disposals and decreases	(2,825)	(80,553)	(4,406)	(10,823)	(98,607)
Translation differences	993	(5,964)	2,406	(555)	(3,120)
Change in consolidation	(9,942)	35,627	654	33	26,372
Reclassifications	2,369	(11,083)	(58,963)	(13,599)	(81,276)
Total Balance as of December 31, 2012	<u>523,679</u>	<u>1,306,824</u>	<u>95,498</u>	<u>107,883</u>	<u>2,033,884</u>
<u>Accumulated depreciation</u>	<u>Buildings</u>	<u>Technical installations and machinery</u>	<u>Advances and fixed assets in progress</u>	<u>Other fixed assets</u>	<u>Total</u>
Total accum. deprec. as of					
December 31, 2011	(90,577)	(436,780)	—	(64,917)	(592,274)
Additions	(15,786)	(89,693)	—	(4,004)	(109,483)
Disposals and decreases	—	76,692	—	3,428	80,120
Translation differences	(549)	2,493	—	311	2,255
Change in consolidation	(1,535)	5,493	—	(5,265)	(1,307)
Reclassifications	(567)	5,410	—	13,561	18,404
Other movements	—	—	—	—	—
Total accum. deprec. as of December 31, 2012	<u>(109,014)</u>	<u>(436,385)</u>	<u>—</u>	<u>(56,886)</u>	<u>(602,285)</u>
Net balance at December 31, 2012	<u>414,665</u>	<u>870,439</u>	<u>95,498</u>	<u>50,997</u>	<u>1,431,599</u>

Property, plant and equipment cost decreased in December 31, 2012 when compared to December 31, 2011 due to the dismantling of Rontalde (Vizcaya) desulfuration plant and to the reclassification from 'PP&E' to 'Intangible assets in projects' of the fixed assets related with the Mojave solar plant in the United States, once the construction of the plant started after obtaining the project financing. This effect was partially offset by the recognition of the Rioglass Group's business combination described in Note 6.3, which resulted in the consolidation of 100% of the identifiable fixed assets of the group and its valuation at fair value in compliance with IFRS 3.

During 2012, no significant losses from impairment of PP&E were recorded.

ABENGOA**Consolidated financial statements**

- 9.3. The depreciation expense of Property, plant and equipment for the year 2011 was €71,560 thousand.
- 9.4. Property, plant and equipment not assigned to operating activities at the year-end is not significant.
- 9.5. The companies' policy is to contract all insurance policies deemed necessary to ensure that all Property, plant and equipment is covered against possible risks that might affect it.
- 9.6. The amount of capitalized interest costs included in PP&E at December 31, 2013 was €1,846 thousand (€2,051 thousand in 2012 and €1,669 thousand in 2011).
- 9.7. At the end of 2013 and 2012, Property, Plant and Equipment include the following amounts where the group is a lessee under a finance lease:

	<u>Balance as of 12.31.13</u>	<u>Balance as of 12.31.12</u>
Capitalized finance-lease cost	21,304	25,978
Accumulated depreciation	(2,635)	(3,395)
Net carrying amount	<u>18,669</u>	<u>22,583</u>

- 9.8. The cost of lands included in the lands and building subcategory amounted to €82,205 thousand at December 31, 2013 (€94,907 thousand in 2012).
- 9.9. The table below sets out the information related to those assets constructed by the Group during 2013 and 2012 classified under the heading Property, plant and equipment of the Consolidated Statement of Financial Position):

	<u>12.31.13</u>	<u>12.31.12</u>
Property, plant and equipment constructed by the Group (accumulated) . . .	931,422	977,313
Revenue generated by property, plant and equipment constructed by the Group	746,745	973,553
Operating result of property, plant and equipment constructed by the Group	(50,966)	(37,818)

Note 10. — Fixed assets in projects (project finance)

As indicated in Note 2.5 included in the Group are several companies which engage in the development of projects including the design, construction, financing, operation and maintenance of owned assets or assets under concession-type agreements which are financed through non-recourse financing.

This note provides a breakdown of fixed assets within such companies. Non-recourse financing details related to such companies are disclosed in Note 19 of these Notes to the Consolidated Financial Statements.

10.1. Concession assets in projects.

a) The following table shows the movements of 'Concession assets in projects' for 2013:

<u>Cost</u>	<u>Intangible and financial assets</u>	<u>Development assets</u>	<u>Total</u>
Total as of December 31, 2012	6,109,689	73,424	6,183,113
Additions	1,295,290	—	1,295,290
Disposals and decreases	(2,741)	—	(2,741)
Translation differences	(414,484)	—	(414,484)
Change in consolidation	1,469,234	(2,220)	1,467,014
Reclassifications	362,373	—	362,373
Total as of December 31, 2013	8,819,361	71,204	8,890,565
<u>Accumulated amortization</u>	<u>Intangible and financial assets</u>	<u>Development assets</u>	<u>Total</u>
Total accum. amort. as of December 31, 2012 . .	(166,053)	(15,353)	(181,406)
Additions	(153,803)	(2,878)	(156,681)
Disposals and decreases	177	—	177
Translation differences	9,271	—	9,271
Change in consolidation	(3,017)	397	(2,620)
Reclassifications	13,937	—	13,937
Total accum amort. as of December 31, 2013 .	(299,488)	(17,834)	(317,322)
Net balance at December 31, 2013	8,519,873	53,370	8,573,243

The increase in the cost of concession assets is primarily due to progress in developing infrastructure concessions projects, mainly various transmission lines in Brazil and Peru (€727 million); projects in México (€381 million); the Palmatir and Cadonal wind farms in Uruguay (€114 million) and the desalination plants in Ghana and Algeria (€83 million).

Additionally, the increase is caused by the reclassification due to transfer of the fixed assets related to the Solaben 1 and 6 thermosolar plants in Spain from PP&E (see Note 8.1); and the change in the consolidation scope following the entry into operation and control of the company Arizona Solar One, LLC (see Note 6.3), partially offset by the reclassification of the assets of the Qingdao desalination plant under Assets Held for Sale (-€142 million), see Note 7.2, and the depreciation of the Brazilian real and the US dollar with respect to the Euro.

No significant losses from impairment of 'Concession assets in projects' were recorded during 2013.

ABENGOA
Consolidated financial statements

- b) The following table shows the movements of intangible assets included in the heading 'Concession assets in projects' for 2012:

<u>Cost</u>	<u>Intangible and financial assets</u>	<u>Development assets</u>	<u>Total</u>
Total as of December 31, 2011	5,953,700	64,045	6,017,745
Additions	1,808,794	12,304	1,821,098
Translation differences	(324,755)	—	(324,755)
Change in consolidation	(1,450,016)	(14,715)	(1,464,731)
Reclassifications	121,966	11,790	133,756
Total as of December 31, 2012	<u>6,109,689</u>	<u>73,424</u>	<u>6,183,113</u>
	<u>Intangible and financial assets</u>	<u>Development assets</u>	<u>Total</u>
Accumulated amortization			
Total accum. amort. as of December 31, 2011	(152,092)	(9,704)	(161,796)
Additions	(93,104)	6,257	(86,847)
Translation differences	4,456	—	4,456
Change in consolidation	74,149	—	74,149
Reclassifications	538	(11,906)	(11,368)
Total accum amort. as of December 31, 2012	<u>(166,053)</u>	<u>(15,353)</u>	<u>(181,406)</u>
Net balance at December 31, 2012	<u>5,943,636</u>	<u>58,071</u>	<u>6,001,707</u>

During 2012 concession assets increased due to Concession projects in process, mainly solar-thermal power plants in Spain (€511 million), as well as the cogeneration plant in Mexico (€97 million) and transmission lines in Brazil and Peru (€860 million). This increase was partially offset by the implementation of new standards IFRS 10 and IFRS11 (€-1,373 million) retroactively applied until January 1, 2012 (see Note 2.1.1.), and by the net negative effect of translation differences.

No significant losses from impairment of 'Concession assets in projects' were recorded during 2012.

- c) Amortization expense of Concession assets in projects for the year 2011 was €70,911 thousand.
- d) Capitalized interest cost for the year ended December 31, 2013 amounts to €115,113 thousand (€172,854 thousand in 2012 and €156,185 thousand in 2011).
- e) There are no intangible assets with indefinite useful lives. There are no intangible assets restricted for use or pledged as security for liabilities.
- f) As of December 31, 2013, concessional financial assets amount to €729,611 thousand. Pursuant to IAS 39, an impairment loss is recognized if the carrying amount of these assets exceeds the present value of future cash flow discounted at the initial effective interest rate.
- g) Appendix VII to these Consolidated Financial Statements includes certain information on project companies included within the scope of IFRIC 12.

10.2. Other assets in projects

a) The table below shows the movement in 'Other assets in projects' for 2013:

Cost	Land and buildings	Technical installations and machinery	Advances and fixed assets in progress	Other PP&E	Software and other intangibles	Total
Total as of						
December 31, 2012	424,847	1,447,136	137,143	351,979	91,228	2,452,333
Additions	2,183	3,645	1,675	18,635	—	26,138
Disposals and decreases	—	(8,421)	(218)	(155)	—	(8,794)
Translation differences	(12,642)	(83,320)	(2,023)	(68,642)	(4,071)	(170,698)
Change in consolidation	(119,326)	(298,276)	(81,863)	(14,412)	(9,007)	(522,884)
Reclassifications	(10,510)	(2,305)	(30,527)	89,045	(4,289)	41,414
Total as of December 31, 2013	284,552	1,058,459	24,187	376,450	73,861	1,817,509
Accumulated depreciation	Buildings	Technical installations and machinery	Advances and fixed assets in progress	Other PP&E	Software and other intangibles	Total
Total accum. deprec. as of December 31, 2012	(105,131)	(416,435)	—	(122,846)	(23,623)	(668,035)
Additions	(19,091)	(32,214)	—	(49,851)	(2,066)	(103,222)
Disposals and decreases	—	4,926	—	125	—	5,051
Translation differences	2,655	26,453	—	24,528	984	54,620
Change in consolidation	33,370	184,348	—	9,770	3,010	230,498
Reclassifications	4,031	1,405	—	(827)	—	4,609
Total accum. deprec. as of December 31, 2013	(84,166)	(231,517)	—	(139,101)	(21,695)	(476,479)
Net balance at December 31, 2013	200,386	826,942	24,187	237,349	52,166	1,341,030

The decrease in Other assets in projects is primarily due to changes in the consolidation scope caused by the sale of the shareholding in Befesa Medio Ambiente, S.L.U. (-€290 million), see Note 7, as well as the negative effect of the depreciation of the Brazilian real with respect to the Euro.

No significant losses from impairment of 'Other assets in projects' were recorded during 2013.

b) The table below shows the movement in 'Other assets in projects' for 2012 :

<u>Cost</u>	<u>Land and buildings</u>	<u>Technical installations and machinery</u>	<u>Advances and fixed assets in progress</u>	<u>Other PP&E</u>	<u>Software and other intangibles</u>	<u>Total</u>

Total accum. deprec. as of December 31, 2012	(105,131)	(416,435)	—	(122,846)	(23,623)	(668,035)
Net balance at December 31, 2012	319,716	1,030,701	137,143	229,133	67,605	1,784,298

During 2012, the decrease of fixed assets in projects was mainly due to the implementation of the changes in IFRS 10 and IFRS 11 (€-132 million), retroactively applied until January 1, 2012 (see Note 2.1.1) and the negative effect of the depreciation of the Brazilian Real with respect to the Euro. This decrease was partially offset by the increased biological assets in the bioenergy business in Brazil.

During 2012, no significant losses from impairment of 'Other assets in projects' were recorded.

- c) Amortization/depreciation expense of Other assets in projects for the year 2011 was €115,855 thousand.
- d) Borrowing costs capitalized for the years ended December 31, 2013, 2012 and 2011 amounted to €1,635 thousand, €19,484 thousand and €5,881 thousand.

ABENGOA**Consolidated financial statements**

- e) The fixed assets in projects have no mortgage warranty additional to the ones assigned to its non-recourse financing (see Note 19).
- f) It is the policy of the Group to enter into a number of insurance policies to cover risks relating to property, plant and equipment.
- g) In cases of property plant and equipment over third party land, the company has estimated the dismantling costs of affected items, as well as the rehabilitation costs of the place where they are settled. See Note 22.1.

10.3. Assets constructed by group

The table below sets out the information related to those assets constructed by the Group during 2013 and 2012 classified under the heading fixed assets in projects of the Consolidated Statement of Financial Position (concessions and other assets in projects):

<u>Item</u>	<u>12.31.13</u>	<u>12.31.12</u>
Fixed assets in projects constructed by the Group (accumulated)	9,747,611	7,307,632
Revenue generated by fixed assets in project constructed by the Group .	1,362,642	972,047
Operating result of fixed assets in project constructed by the Group . . .	156,184	88,944

Note 11. — Investments in associates

- 11.1 The table below shows the breakdown and the movement of the investments held in associates for 2013 and 2012:

<u>Investment in associates</u>	<u>Balance as of 12.31.13</u>	<u>Balance as of 12.31.12</u>
Initial balance	920,140	51,270
Translation differences	(27,536)	(18,284)
Equity contributions	372,736	517,002
Changes in consolidation	(412,577)	358,121
Distribution of dividends	(11,916)	(5,530)
Share of (loss)/profit	(5,165)	17,561
Final balance	<u>835,682</u>	<u>920,140</u>

The increase in 2012 was mainly due to the initial application of IFRS 10 and 11 from January 1, 2012 (€855.6 million), see Note 2.1.1. Subsidiary companies included in the consolidation scope using the equity method, due to the application of IFRS 10 and 11 are disclosed in Appendix XXII.

- 11.2. The tables below shows a breakdown of assets, revenues and operating profit as well as other information of interest for the years 2013, 2012 and 2011 of the associated companies:

The information on the financial instruments measured at fair value, is presented in accordance with the following level classification:

- Level 1: Quoted prices in active markets for identical assets or liabilities.
- Level 2: Measured on inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: Measured on inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The following is a breakdown of the Group's assets and liabilities measured at fair value at December 31, 2013 and 2012 (except assets and liabilities with a carrying amount close to their fair value, non-quoted equity instruments measured at cost and contracts with components that cannot be measured reliably):

<u>Category</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Balance as of 12.31.13</u>
Non-hedging derivatives	—	(78,844)	—	(78,844)
Hedging derivatives	—	(170,787)	—	(170,787)
Available-for-sale	4,449	—	45,758	50,207
Total	4,449	(249,631)	45,758	(199,424)

<u>Category</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Balance as of 12.31.12</u>
Non-hedging derivatives	—	(63,932)	—	(63,932)
Hedging derivatives	—	(354,636)	—	(354,636)
Available-for-sale	3,991	—	45,704	49,695
Total	3,991	(418,568)	45,704	(368,873)

The financial instruments at fair value, determined from prices published in active markets (Level 1), consist of shares.

The majority of Abengoa's portfolio comprises financial derivatives designated as cash flow hedges, is classified as level 2 and corresponds mainly to the interest rate swaps (see Note 14).

The caption Non-hedging derivatives accounting includes the fair value of the derivatives embedded in the convertible notes, the fair value of the call options over Abengoa's own shares, as well as those derivatives purchased with the purpose of hedging a market risk (interest rate, foreign exchange or commodities) that do not fulfil all the requirements, according to IAS 39 to be recorded as hedges from an accounting point of view.

Level 3 corresponds mainly to the 3% interest held by Abengoa, S.A. in Yoigo, S.A., a Spanish telecom operator, recorded at fair value of €32,997 thousand and held through the ownership of Siema Investments, S.L. (a holding company owned 100% by Abengoa, S.A.).

The valuation method used to calculate the fair value was discounting cash flows based on its business plan, using as discount rate a weighted average cost of capital (WACC) of market, 10%. It also has been made a sensitivity analysis considering different discount rates and deviations of the business plan in order to ensure that potential valuation changes do not worsen in any case the fair value.

Additionally, the embedded derivative of the convertible loan received as part of the consideration for the sale of Befesa (See Note 7.1), is classified within Level 3. As of December 31, 2013, the embedded derivative has a negative fair value of €36 thousands.

If the equity value of Befesa had increased by 10%, assuming that the average horizon of permanence of the financial fund before the sale of Befesa did not change compared with respect to the hypotheses considered in assessing, the fair value of the embedded derivative would have increased €20 thousand.

The following table shows the changes in the fair value of level 3 assets for the years ended December 31, 2013 and 2012:

<u>Movements</u>	<u>Amount</u>
Beginning balance as of December 31, 2011	39,134
Gains and losses recognized in Equity (see Note 13.1)	1,390
Change in consolidation, reclassifications and translation differences	5,180
Total as of December 31, 2012	<u>45,704</u>
Gains and losses recognized in Equity (see Note 13.1)	(568)
Change in consolidation, reclassifications and translation differences	622
Total as of December 31, 2013	<u>45,758</u>

During the periods ended December 31, 2013 and 2012, there have not been any reclassifications amongst the three levels presented above.

There were no losses recognized in the Consolidated Income Statement for the year 2011.

Note 13. — Available-for-sale financial assets

13.1. The following table shows the detail and the movement on available-for-sale financial assets during 2013 and 2012:

<u>Available for sale financial assets</u>	<u>Balance</u>
At January 1, 2011	61,401
Additions	2,213
Gain/Losses transferred to equity	1,390
Derecognitions	(15,309)
At December 31 , 2012	<u>49,695</u>
Additions	3,802
Gain/Losses transferred to equity	(568)
Derecognitions	(2,722)
At December 31 , 2013	<u>50,207</u>
Less: Non-current portion	40,700
Current portion	9,507

13.2. The following table shows those entities which, in accordance with the then current legislation, were not consolidated in the years 2013 and 2012 and in which the parent company's direct and indirect shareholding is higher than 5% and lower than 20%. The net carrying amount of these holdings is €8,159 thousand at December 31, 2013 (€8,626 thousand in 2012).

Mediación Bursátil, S.V.B., S.A.	8.00	8.00

13.3. All necessary notifications have been made to the companies in which the Group holds an interest of over 10%, as required under Article 155 of Spanish Corporate Law (Ley de Sociedades de Capital).

13.4. There are no circumstances which have a material impact on the financial assets on the Group's portfolio, such as litigations, pledges, etc.

- 13.5. There are no firm agreements in place regarding the sale or purchase of these investments which could be considered material in relation to the Group's Financial Statements.
- 13.6. The amount of interest accrued but not yet collected is not material.
- 13.7. There are no fixed-yield securities in arrears. The average rate of return on fixed-yield securities is in line with the market.
- 13.8. As of December 31, 2013 and 2012, Abengoa, S.A. held a 3% interest in Yoigo, S.A, a Spanish telecom operator, recorded at fair value of €32,997 thousand and held in the Group through the ownership of Siema Investments, S.L. (a holding company owned 100% by Abengoa, S.A.). Additionally the shareholders of Yoigo have granted this company several 'participative' loans in accordance with a pre-established plan, which involved a total disbursement of €21,030 thousand (as of December 31, 2013 and 2012), equivalent to 3% of the total loan made to the company by its shareholders in said years.

To value this holding, as in prior periods, once Yoigo's activities had commenced, the principal reference point taken is the company's future cash-flow generation on the basis of its current Business Plan, discounted at a rate appropriate to the sector in which this company operates (See Note 12).

As a result of the purchase of its holding in Yoigo, Siema Investment, S.L. became responsible, for furnishing guarantees to the Spanish Administration as security for compliance with the commitments relating to investment, commercialization, employment and network development acquired by Yoigo, together with other guarantees relating to the Radioelectronic Spectrum Rate, which the Group is required to counter-guarantee, for a total amount of €3,387 thousand (€12,085 thousand in 2012).

- 13.9. The Group applies IAS 39 to determine whether the carrying amount of an available-for-sale financial asset has been impaired. This process requires significant judgment. To make this judgment, the Group assesses, among other factors, for how long and to what extent the fair value of an investment will be below its cost, considering the financial health and short-term prospects of the company issuing the securities, including factors such as the industry and sector return, changes in the technology and cash flows from operating and financing activities.

Note 14. — Derivative financial instruments

- 14.1. The fair value of derivative financial instruments (see Note 12) as of December 31, 2013 and 2012 is as follows:

	Note	12.31.13		12.31.12	
		Assets	Liabilities	Assets	Liabilities
Exchange rate derivatives — cash flow hedge . . .	14.2.a	6,028	13,519	3,455	21,060
Interest rate derivatives — cash flow hedge . . .	14.3.a	43,889	200,483	23,052	361,824
Interest rate derivatives — non-hedge accounting	14.3.c	—	14,765	—	12,094
Commodity derivatives — cash flow hedge . . .	14.4.a	8,948	15,650	7,895	6,154
Embedded derivatives of convertible bonds and shares options	20.3	2,686	66,765	8,781	60,619
Total		61,551	311,182	43,183	461,751
Non-current part		46,347	266,802	31,683	407,551
Current part		15,204	44,380	11,500	54,200

Information about the valuation techniques of derivative financial instruments is described in Notes 2.11 and 12.

Derivatives classified as non-hedge accounting are those derivative financial instruments which, although obtained for the purpose of hedging certain market risks (interest rates, exchange rates and commodity prices), do not meet the specific requirements established by IAS 39 to be designated as hedging instruments from an accounting point of view (since, at the inception of the hedge, there was no designation or formal documentation relating to the hedge or the risk management strategy that it was intended to implement) or, having complied with all of the requirements to be designated a hedging instrument, the underlying has been sold or the hedging designation has been interrupted.

Fair value of derivative assets increased during 2013 due to new interest rate derivatives contracted, which was partially offset by the decrease in fair value of call options on Abengoa's own shares that were signed to hedge the convertible notes, mainly due to a decrease in the stock price of the shares of Abengoa, which is a principal factor in the fair value of the embedded derivatives and the options.

The fair value of derivative liabilities decreased during 2013 mainly due to the favorable evolution of hedging interest rate derivatives, measured according to IFRS 13. Additionally there has been an increase due to the recognition of the embedded derivative component of convertible notes issued in January 2013 (see Note 20.3), partially offset by the decrease in the fair value of the derivative liabilities embedded in convertible notes issued in 2009 and 2010 and by the partial cancellation of the embedded derivative component of convertible notes due 2014 once the repurchase process has been completed on January 17, 2013.

The fair value amount recognized in the Consolidated Income Statement of the 2013 and 2012 fiscal year for the financial instruments derivatives designated as hedging instruments is a loss of €88,924 thousand (loss of €96,172 thousand in 2012).

Included in the following sections are detailed fair value presentations of each of the categories of derivative financial instruments presented in the table above. The net position of assets and liabilities for each line item of the summary table above reconciles with the net amount of the fair values of collections and payments for exchange rate derivatives, the net amount of the fair values of caps and swaps for interest rates hedges and the net amount of the fair values of commodity price derivatives, respectively.

14.2. Exchange rate hedges

The terms 'Collection hedges' and 'Payment hedges' refer to foreign currency derivatives designated as hedging instruments of future cash inflows and outflows associated to highly probable forecasted sales and purchase, respectively, denominated in a foreign currency.

ABENGOA
Consolidated financial statements

The following table shows a breakdown of the notional amounts of the financial instruments relating to amounts receivable and payable in foreign currencies as of December 31, 2013 and 2012.

Exchange Rates	Collection hedges		Payment hedges	
	2013	2012	2013	2012
Krona (Sweden)	—	—	1,653	880
Dirhams (UAE)	13,222	15,344	7,683	7,325
Dirhams (Morocco)	533	—	—	6
Dollar (Australia)	—	—	1,939	29
Dollar (Canada)	—	—	—	144
Dollar (USA)	328,421	76,765	226,943	209,104
Euro	—	20,093	4,978	50,480
Franc (Switzerland)	—	—	—	2,881
Pound Sterling (UK)	—	—	68	32
Mexican Peso (Mexico)	—	98	8	10
Yen (Japan)	—	—	15	—
Rand (South Africa)	—	52,094	—	10,707
Zloty (Poland)	137,363	199,081	65,647	76,928
Total	479,539	363,475	308,934	358,526

The following table shows a breakdown of the fair values of exchange rate derivatives relating to amounts receivable and payable in foreign currencies as of December 31, 2013 and 2012:

Exchange Rates	Collection hedges		Payment hedges	
	2013	2012	2013	2012
Krona (Sweden)	—	—	2	(6)
Dirhams (UAE)	430	167	(289)	(148)

Dollar (Australia)	—	—	(102)	(1)
Dollar (Canada)	—	—	—	8
Dollar (USA)	12,499	307	(14,378)	(6,714)
Euro	—	551	1	(936)
Franc (Switzerland)	—	—	—	17
Pound Sterling (UK)	—	—	2	—
Yen (Japan)	—	—	(1)	—
Rand (South Africa)	—	(1,029)	—	179
Zloty (Poland)	(8,555)	(18,267)	2,896	8,267
Total	4,378	(18,271)	(11,869)	666

a) Cash flow hedges

The table below shows a breakdown of the maturities of notional amounts of exchange rate derivatives designated as cash flow hedges at the end of 2013 and 2012:

<u>Notionals</u>	<u>12.31.13</u>		<u>12.31.12</u>	
	<u>Collections</u>	<u>Payments</u>	<u>Collections</u>	<u>Payments</u>
Up to 1 year	404,477	290,853	150,270	263,340
Between 1 and 2 years	45,579	17,616	149,995	95,186
Between 2 and 3 years	29,483	465	63,210	—
Total	<u>479,539</u>	<u>308,934</u>	<u>363,475</u>	<u>358,526</u>

The table below shows a breakdown of the maturities of fair value amounts of exchange rate derivatives designated as cash flow hedges at the end of 2013 and 2012 year end:

<u>Fair value</u>	<u>12.31.13</u>		<u>12.31.12</u>	
	<u>Collections</u>	<u>Payments</u>	<u>Collections</u>	<u>Payments</u>
Up to 1 year	8,714	(11,880)	43	(6,088)
Between 1 and 2 years	(2,988)	36	(9,583)	6,754
Between 2 and 3 years	(1,348)	(25)	(8,731)	—
Total	<u>4,378</u>	<u>(11,869)</u>	<u>(18,271)</u>	<u>666</u>

The net amount of the fair value of exchange rate derivatives designated as cash flow hedges transferred to the Consolidated Income Statement in 2013, 2012 and 2011 has been of €-5,211 thousand, €1,033 thousand and €-1,163 thousand respectively (see Note 18.3).

The ineffective amount recognized in the Consolidated Income Statement for the years 2013, 2012 and 2011 with respect to exchange rate derivatives designated as cash flow hedges amounts to €1,040 thousand, €-17,193 thousand and €2,225 thousand respectively.

The after-tax gains/losses accumulated in equity in connection with exchange rate derivatives designated as cash flow hedges at December 31, 2013 amounted to €-4,362 thousand (€-17,395 thousand in 2012 and €45,708 thousand in 2011). See note 18.3.

b) Fair value hedges

The group does not have any exchange rate derivatives designated as fair value hedges at the end of 2013 and 2012.

The net amount of the fair value of exchange rate derivatives designated as fair value hedges transferred to the Consolidated Income Statement in 2011 was €7,561 thousand (see Note 30.2).

c) Non-hedge accounting derivatives

At the end of 2013 and 2012 the Group does not hold any exchange rate non-hedge accounting derivatives instruments.

The net amount of the fair value of exchange rate derivatives charged directly to the Consolidated Income Statement as a result of not meeting all the requirements of IAS 39 to be designated as hedges represented an impact of €283 thousand (€-19,947 thousand in 2012 and €0 thousand in 2011) (see Note 30.2).

14.3. Interest rate hedges

As stated in Note 4 to these Consolidated Financial Statements, the general hedging policy for interest rates is to purchase call options in exchange of a premium to fix the maximum interest rate cost. Additionally, under certain circumstances, the company also uses floating to fixed interest rate swaps.

As a result, the notional amounts hedged, strikes contracted and maturities, depending on the characteristics of the debt on which the interest rate risk is being hedged, can be diverse:

- Corporate Financing: we hedge between 78% and 100% of the notional amount, with maturities up to 2022 and average guaranteed interest rates of between 0.70% and 4.75% for loans referenced to the 1-month, 3-months and 6 months Euribor rates.
- Non-recourse financing:
 - Non-recourse financing in Euros: we hedge between 80% and 100% of the notional amount, maturities until 2032 and average guaranteed interest rates of between 0.75% and 4.87%.
 - Non-recourse financing in US Dollars: we hedge between 75% and 100% of the notional amount, including maturities until 2028 and average guaranteed interest rates of between 0.70% and 3.787%.

a) Cash flow hedges

The table below shows a breakdown of the maturities of notional amounts of interest rate derivatives designated as cash flow hedges at the 2013 and 2012 year end:

Notionals	12.31.13		12.31.12	
	Cap/Collar	Swap	Cap/Collar	Swap
Up to 1 year	3,029,715	231,932	100,999	754,090
Between 1 and 2 years	3,033,757	37,190	2,832,548	42,526
Between 2 and 3 years	2,756,511	39,962	2,790,374	43,284
Subsequent years	4,764,796	821,217	5,605,113	932,066
Total	13,584,779	1,130,301	11,329,034	1,771,966

The table below shows a breakdown of the maturity of the fair values of interest rate derivatives designated as cash flow hedges at the 2013 and 2012 year end:

Fair value	12.31.13		12.31.12	
	Cap/Collar	Swap	Cap/Collar	Swap
Up to 1 year	(14,910)	(13,219)	(6,373)	(37,440)
Between 1 and 2 years	(15,705)	87	(13,543)	(11,532)
Between 2 and 3 years	(1,157)	90	(12,397)	(9,941)
Subsequent years	36,227	(148,007)	20,968	(268,514)
Total	4,455	(161,049)	(11,345)	(327,427)

The net amount of the fair value of interest rate derivatives designated as cash flow hedges transferred to the Consolidated Income Statement in 2013, 2012 and 2011 has been of €-94,226 thousand, €-75,664 thousand and €-49,775 thousand respectively (see Note 18.3).

The after-tax gains/losses accumulated in equity in connection with derivatives designated as cash flow hedges at the end of 2013, 2012 and 2011 amount to €-151,733 thousand, €-273,966 thousand and €-254,028 thousand respectively (see Note 18.3).

The net amount of the time value component of the cash flow derivatives fair value recognized in the Consolidated Income Statement for the years 2013, 2012 and 2011 has been € 21,734 thousand, €-24,221 thousand and €-64,324 thousand respectively.

b) Fair value hedges

The Group does not have any interest rate derivatives designated as fair value hedges at the end of 2013 and 2012.

c) Non-hedges accounting derivatives

The table below shows a detail of the maturities of notional amounts of interest rate derivatives that not meet the requirements to be designed as hedging instruments at the end of 2013 and 2012:

Notionals	12.31.13			12.31.12		
	Cap	Floor	Swap	Cap	Floor	Swap
Up to 1 year	—	—	—	169,613	—	72,691
Between 1 and 2 years	—	630,000	—	—	—	—
Between 2 and 3 years	—	300,000	—	—	660,000	—
Subsequent years	—	1,815,000	—	—	300,000	—
Total	—	2,745,000	—	169,613	960,000	72,691

The table below shows a detail of the maturities of fair values of non-hedge accounting interest rate derivatives at the end of 2013 and 2012:

Fair value	12.31.13			12.31.12		
	Cap	Floor	Swap	Cap	Floor	Swap
Up to 1 year	—	—	—	—	—	(2,206)
Between 1 and 2 years	—	(6,497)	—	—	—	—
Between 2 and 3 years	—	(1,993)	—	—	(7,044)	—
Subsequent years	—	(6,275)	—	—	(2,816)	—
Total	—	(14,765)	—	—	(9,860)	(2,206)

At the end of 2013, 2012 and 2011, the net amount of the fair value of interest rate derivatives charged directly to the Consolidated Income Statement as a result of not meeting all the requirements of IAS 39 to be designated as hedges represented an impact of €534 thousand, €-4,305 thousand and €2,104 thousand, respectively (see Note 30.1).

Additionally, a series of interest rate swaps and caps were settled in 2008, generating a positive cash flow upon liquidation. These contracts had been designated as cash flow hedge as a result of the respective effectiveness tests performed. Therefore, applying IAS 39, when the hedging instrument no longer exists and the hedged transaction continues to be probable, the cumulative gain or loss on the hedging instrument that remains recognized in equity from the period when the hedge was effective should remain in equity until the forecasted transaction occurs. This amount will be reclassified to profit or loss in the same period or periods in which the hedged forecasted transaction affects profit or loss. In the present case, it will be

reclassified to profit or loss as the finance expense originated by the loan hedged is recognized in the Consolidated Income Statement. As a result, Abengoa will reclassify the profit recognized in equity to the Consolidated Income Statement following the swaplet method, where each interest rate calculation period of the swap is called a swaplet.

The balance calculated for each swaplet is recognized in the Consolidated Income Statement in the period of each swaplet. The amounts transferred from equity to the Consolidated Income Statement in 2013, 2012 and 2011 were a gain of €1,032 thousand, €7,695 thousand and €10,095 thousand, respectively, with an amount of €0 thousand (€1,032 thousand in 2012 and €8,727 thousand in 2011) yet to be transferred to the Consolidated Income Statement in the following years.

14.4. Commodity price hedges

In relation to hedges of commodity prices, as stated in Note 2.10 of the Consolidated Financial Statements of Abengoa for the year ended on December 31, 2013, the different activities carried on by Abengoa through its different segments (Biofuels, Recycling (until the sale of shareholding in Befesa) and Engineering and construction) expose the group to risks derived from the fair value of certain commodity prices (zinc, aluminum, grain, ethanol and gas).

To hedge these risks, Abengoa uses derivative contracts and OTC derivatives for commodity prices.

a) Cash flow hedges

The table below shows a breakdown of the maturities of notional amounts for the commodity price derivatives designated as cash flow hedges at the 2013 and 2012 year end:

2013	Ethanol (Gallons)	Gas (MWh)	Grain (Bushels)	Zinc (Tons)	Aluminum (Tons)	Other (Tons)
Up to 1 year	94,752,000	2,814,591	41,735,000	—	120,642	—
Total	94,752,000	2,814,591	41,735,000	—	120,642	—

2012	Ethanol (Gallons)	Gas (MWh)	Grain (Bushels)	Zinc (Tons)	Aluminum (Tons)	Other (Tons)
Up to 1 year	14,987,300	5,202,000	32,090,000	67,920	800	908
Between 1 and 2 years	—	—	—	36,000	—	—
Total	14,987,300	5,202,000	32,090,000	103,920	800	908

The table below shows a breakdown of the maturities of the fair value of commodity price derivatives designated as cash flow hedges at the 2013 and 2012 year end:

2013	Ethanol	Gas	Grain	Zinc	Aluminum	Other
			(€ thousands)			
Up to 1 year	4,587	755	2,715	—	(14,759)	—
Total	4,587	755	2,715	—	(14,759)	—

ABENGOA**Consolidated financial statements**

<u>2012</u>	<u>Ethanol</u>	<u>Gas</u>	<u>Grain</u>	<u>Zinc</u>	<u>Aluminum</u>	<u>Other</u>
	(€ thousands)					
Up to 1 year	(387)	(369)	(368)	6,818	135	76
Between 1 and 2 years	—	—	—	(4,164)	—	—
Total	(387)	(369)	(368)	2,654	135	76

The net amount of the fair value of commodity price derivatives designated as cash flow hedges transferred to the Income statement in 2013, 2012 and 2011 has been of €10,513 thousand, €-21,541 thousand and €58,516 thousand respectively (see Note 18.3).

The after-tax gains/losses accumulated in equity in connection with derivatives designated as cash flow hedges at December 31, 2013 amounted to €-7,674 thousand (€8,761 thousand in 2012 and €28,286 thousand in 2011), see Note 18.3.

b) Non-hedge accounting derivatives

At the end of 2013 and 2012, the Group does not hold non-hedge accounting derivative financial instruments of commodity prices.

The net amount of the fair value of commodity prices derivatives charged directly to the Consolidated Income Statement as a result of not meeting all the requirements of IAS 39 to be designed as hedges represented losses of €9,837 thousand (losses of €20,428 thousand in 2012 and losses of €19,142 thousand in 2011) (see Note 30.3).

Note 15. — Clients and other receivable accounts

15.1. The breakdown of Clients and Other Receivable Accounts as of December 31, 2013 and 2012 is as follows:

<u>Item</u>	<u>Balance as of 12.31.13</u>	<u>Balance as of 12.31.12</u>
Trade receivables	566,930	1,064,838
Unbilled revenues	488,883	393,200
Bad debt provisions	(64,047)	(46,086)
Tax receivables	640,567	621,034
Other debtors	237,639	238,320
Total	1,869,972	2,271,306

As a general rule, 'Unbilled revenues' are billed within the three months following completion of the work being performed on the project. Nevertheless, given the highly-tailored characteristics of some construction contracts, some projects may take longer to be billed due to specific billing milestones in the contracts. The total outstanding balances as of December 31, 2013 and 2012 are supported by contracts signed with such customers and do not include any receivables relating to customer claims.

At the end of 2013 and the 2012 there were no balances with related parties (see Note 33.2).

15.2. The fair value of Clients and other receivable accounts does not differ significantly from its carrying value.

ABENGOA**Consolidated financial statements**

15.3. The list of Clients and Other Accounts Receivable according to foreign currency as at December 31, 2013 and 2012 are as follows:

<u>Currency</u>	<u>Balance as of 12.31.13</u>	<u>Balance as of 12.31.12</u>
Algerian dinar	11,219	18,548
Dirhams (Morocco)	16,926	16,980
American dollar	259,751	169,211
New peruvian sol	25,883	59,931
Argentinian peso	9,988	11,278
Chilean peso	38,217	28,814
Mexican peso	78,155	85,171
Uruguayan peso	17,125	12,864
Brazilian real	56,344	109,984
Indian rupee	8,546	5,313
Chinese yuan	28,904	9,174
Polish zloty	13,685	1,278
Others	65,631	27,663
Total	<u>630,374</u>	<u>556,209</u>

15.4. The following table shows the maturity detail of trade receivables as of December 31, 2013 and 2012:

<u>Maturity</u>	<u>Balance as of 12.31.13</u>	<u>Balance as of 12.31.12</u>
Up to 3 months	409,744	941,048
Between 3 and 6 months	43,305	49,271
Over 6 months	113,881	74,519
Total	<u>566,930</u>	<u>1,064,838</u>

15.5. The credit quality of outstanding Trade receivables, that are neither past due nor impaired, may be assessed under the following categories:

<u>Categories</u>	<u>Balance as of 12.31.13</u>	<u>Balance as of 12.31.12</u>
Trade receivables subject to non-recourse factoring by the bank	217,318	728,301
Trade receivables subject to recourse factoring by the bank	—	5,486
Trade receivables covered by credit insurance	2,276	21,805
Trade receivables in cash or by transfer	208,996	131,997
Trade receivables UTE/Public Entities/Other accounts	138,340	177,249
Total trade receivables	<u>566,930</u>	<u>1,064,838</u>

15.6. The movement in the bad debt provision for 2013 and 2012 is the following:

	<u>Balance as of 12.31.13</u>	<u>Balance as of 12.31.12</u>
Initial Balance	(46,086)	(29,077)
Provision for receivables impairment	(31,680)	(22,301)
Receivables written off during the year as uncollectible	533	(633)
Reversal of unused amounts	7,235	6,506
Change in consolidation	2,218	—
Reclassifications and other movements	3,733	(581)
Total	<u>(64,047)</u>	<u>(46,086)</u>

The most significant variations in 2013 are primarily due to recognition of doubtful trade loans with debtor balances that mostly correspond to public clients in Spain and abroad, against whom the corresponding claims have been made for the amounts owing from various construction projects, supported by the company's formal procedures, depending on each case. Given the uncertainty in relation to the future recoverability of these loans, due to various factors but most of which are beyond the company's control, it has been decided to make the corresponding provision. Once the process has been definitively resolved, and in the event that it is favorable for the company, the corresponding provision will be reversed against the "Reversal of unused amounts" heading.

The most significant variations for the year 2012 are due to the recognition of doubtful trade receivables mainly related to water infrastructure projects as well as other minor engineering and construction projects.

Total provision for receivables impairment and reversal of unused amounts recognized in the Consolidated Income Statement for the year 2011 were €-4,897 thousand and €8,450 thousand, respectively.

15.7. The Company maintains a number of non-recourse factoring lines of credit. The Company enters into these factoring agreements with certain financial institution by selling the Company's credit rights in certain commercial contracts. The factoring agreements are entered into on a non-recourse basis, meaning that the financial institutions undertake the credit risk associated with the Company's customers. The Company is responsible for the existence and legitimacy of the credit rights being sold to the financial institutions. Credit rights from recurring customers or with terms of up to one year are supported by annual revolving factoring lines of credit. Credit rights from non-recurring customers or with terms longer than a year are supported with global transfer agreements commencing on the date when the underlying commercial contract comes into force and expiring when the contracted works are completed.

At the end of the 2013 financial year, approximately €285 million (€360 million in 2012 and €346 million in 2011) were factored and derecognized pursuant to the provisions of IAS39.

The finance cost in the 2013 fiscal year derived from factoring operations amounted to €17 million (€24 million in 2012 and €20 million in 2011).

15.8. Furthermore, as of December 31, 2013 collections amounted to €298 million (€196 million in 2012 and €0 million in 2011), related to a construction contract for a combined cycle plant in Mexico with a transfer agreement of the non-recourse collection rights signed with a financial institution under the 'Pidiregas' deferred financing scheme, in which a financial institution provides the funds required to construct the project until the provisional handover of the plant, when the amount of the contract is paid directly by the client to the financial institution. Consequently, Abengoa is being paid as the

construction milestones are completed. The financial expense associated with this scheme in 2013 amounted to €12 million (€20 million in 2012 and €0 million in 2011).

15.9. The breakdown of Tax receivables as of December 31, 2013 and 2012 is as follows:

<u>Item</u>	<u>Balance as of 12.31.13</u>	<u>Balance as of 12.31.12</u>
Income and other taxes receivable	387,924	406,916
Social Security debtors	436	439
VAT charged	171,047	141,715
Withholdings tax and income tax advance	81,160	71,964
Total tax receivables	<u>640,567</u>	<u>621,034</u>

15.10. The following table shows a breakdown of financial accounts receivable as of December 31, 2013 and 2012:

<u>Description</u>	<u>Balance as of 12.31.13</u>	<u>Balance as of 12.31.12</u>
Loans	570,321	289,843
Fixed-term deposits and down payments and lease deposits	97,934	116,677
Other financial assets	5,928	28
Total non-current portion	<u>674,183</u>	<u>406,548</u>
Loans	159,513	24,347
Fixed-term deposits and down payments and lease deposits	741,605	856,029
Total current portion	<u>901,118</u>	<u>880,376</u>

This heading includes the loans, deposits and other accounts receivable considered as non-derivative financial assets not listed in an active market, with a maturity period of less than twelve months (current assets) or exceeding that period (non-current assets).

The market value of these assets does not differ significantly from their carrying amount.

Current and non-current loans for an amount of €730 million in 2013 (€314 million in 2012), mainly includes the convertible loan and credit note received in the sale of Befesa (see Note 7.1) amounting €225 million, an account receivable of €141.8 million resulting from a favorable resolution from the Court of Arbitration of the International Chamber of Commerce in relation with the arbitration against Adriano Gianetti Dedini Ometto and Adriano Ometto Agrícola Ltda. (see Note 15.11), loans with associates amounting to €168 million, as well as credits with local administrations.

Current and non-current fixed-term and deposits for an amount of €840 million (€973 million in 2012) includes primarily restricted investments in fixed-income securities and bank deposits.

Other financial assets include other receivable amounts considered as non-derivative financial assets not listed in an active market, which are not classified in any of the other categories.

15.11. In November 2011, two related arbitration proceedings were concluded in our favor in the International Court of Arbitration of the International Chamber of Commerce with seat in New York, United States. Our subsidiary ASA Bioenergy Holding A.G. ('ASA') was awarded favorably in relation to demands for certain breaches of contract by Adriano Gianetti Dedini Ometto and Adriano Ometto Agrícola Ltda. (the 'Adriano' Defendants). In each of the proceedings, Adriano filed various counterclaims which were appropriately answered by us. Both arbitration proceedings were decided

in ASA's favor, in October 2012, when we received confirmation from the International Chamber of Arbitration in the approximate total amount of USD 118.3 million plus accrued interest. Adriano Defendants presented motions to vacate such arbitral awards in the ordinary courts of New York City, which was in turn decided in our favor, with full confirmation on the validity of the two awards in first instance. As a result, the Defendants appealed in the Second Circuit Court in New York. The appeal hearing took place in New York in December 2013. On January, 2014 the Second Circuit Court has decided again in favor of ASA. The last action that Adriano can take is to appeal to the Supreme Tribunal, which has remote chances of success, in the Directors opinion. In addition, the Company has started the actions to recognition of the awards in Brazil. The purpose of this process is the verification of purely formal requirements of the Court of Arbitration decision and does not include an analysis of the basis of the conclusion. Although the defendants do not agree with the process of recognition of the awards, the Company's local lawyers consider that the probability of non-recognition is remote.

The resolution of the Second Circuit Court provides additional evidence of the existence of an account receivable as of December 31, 2013. As a result, an income and an account receivable have been recorded as of that date for an amount of € 142 million.

Note 16. — Inventories

16.1. Inventories as of December 31, 2013 and 2012 were as follows:

<u>Item</u>	<u>Balance as of 12.31.13</u>	<u>Balance as of 12.31.12</u>
Goods for sale	15,817	39,676
Raw materials and other supplies	112,657	147,499
Work in progress and semi-finished products	1,160	3,940
Projects in progress	58,588	50,856
Finished products	64,582	103,218
Advance Payments to suppliers	78,177	81,637
Total	<u>330,981</u>	<u>426,826</u>

Inventories for entities located outside Spain were €219,447 thousand (€249,233 thousand in 2012).

16.2. There are no restrictions on the availability of inventories, with the exception of guarantees provided for construction projects in the normal course of business, which are released as the contractual milestones of the project are achieved.

Note 17. — Cash and cash equivalents

The following table sets out the detail of Cash and cash equivalents at December 31, 2013 and 2012:

<u>Item</u>	<u>Balance as of 12.31.13</u>	<u>Balance as of 12.31.12</u>
Cash at bank and on hand	1,630,597	1,625,195
Bank deposit	1,321,086	787,989
Total	<u>2,951,683</u>	<u>2,413,184</u>

The following breakdown shows the main currencies in which cash and cash equivalent balances are denominated:

Currency	12.31.13		12.31.12	
	Domestic companies	Non-domestic companies	Domestic companies	Non-domestic companies
Euro	934,785	220,265	639,055	154,258
US dollar	641,729	767,361	404,870	537,019
Swiss franc	592	59	2,541	70
Sterling pound	3	4	1,158	71
Argentinian peso	—	9,061	—	5,220
Peruvian sol	7	58,380	490	15,427
Algerian dinar	525	42,026	—	22,724
Brazilian real	—	222,167	10	521,927
South african rand	37	27,583	344	78,443
Others	7,000	20,099	3,543	26,014
Total	<u>1,584,678</u>	<u>1,367,005</u>	<u>1,052,011</u>	<u>1,361,173</u>

Note 18. — Shareholders' equity

18.1. Share capital

As of December 31, 2013 the share capital amounts to €91,856,888.71 represented by two distinct classes of 825,562,690 shares completely subscribed and disbursed:

- 84,445,719 class A shares with a nominal value of 1 Euro each, all in the same class and series, each of which grants the holder a total of 100 voting rights ('Class A Shares').
- 741,116,971 class B shares with a nominal value of 0.01 Euros each, all in the same class and series, each of which grants One (1) voting right and which afford its holder economic rights identical to the economic rights of Class A shares as stated in article 8 of the Company's by laws ('Class B Shares' and, together with class A shares, 'Shares with Voting Rights').

On October 17, 2013, we carried out a capital increase of 250,000,000 Class B shares and on October 29, 2013 we issued, as a result of the exercise of the option to purchase additional shares to cover over-allotment by the underwriters of the capital increase, 37,500,000 additional Class B shares ('greenshoe' option). The shares were offered at a price of €1.80 per share, for total gross proceeds, including shares sold pursuant to the greenshoe option, of €517.5 million.

With the net proceeds of the capital increase, the Company has repaid in 2013 and intends to repay some of its corporate debt with maturities in 2014, totaling approximately €347 million including: (a) the first installment due under the Official Credit Institute Loan (€50 million); (b) the entirety of the EIB R&D&i 2007 Credit Facility and the EIB 2007 Credit Facility (€109 million); (c) installments due under the Swedish Export Buyer Credit Agreement and the Second Swedish Credit Agreement (€127 million); (d) and certain corporate loans of some of our subsidiaries (€37 million). The remaining part of the issue will be held for additional financial flexibility. The capital increase will strengthen the company's balance sheet, reinforcing and optimizing its capital structure, as well as diversifying its sources of financing by providing access to the US capital markets.

Moreover, the controlling shareholder, Inversión Corporativa IC, S.A., has subscribed 35,000,000 shares with an investment of €63 million, so that following the capital increase the Inversión

Corporativa group holds a 57.79% shareholding. As part of the capital increase, the company and Inversión Corporativa IC, S.A. agreed a lock-up clause for a period of 180 days under the standard terms for these types of transactions.

Class A and B shares are listed on the Madrid and Barcelona stock exchanges and on the Spanish Stock Exchange Electronic Trading System (Electronic Market). Class A shares have been listed since November 29, 1996 and class B shares since October 25, 2012. The Company presents mandatory financial information on a quarterly and semiannual basis.

The new class B shares issued in the capital increase in 2013, are also listed on the NASDAQ Global Select Market in the form of American Depositary Shares (with five Class B shares exchangeable for one American Depositary Share).

In accordance with notifications received by the company and in compliance with reporting requirements to communicate shareholding percentages and the information received from relevant parties, shareholders with a significant holding as of December 31, 2013 are as follows:

Shareholders	Share %
Inversión Corporativa IC, S.A. (*)	51.60
Finarpisa, S.A. (*)	6.19

(*) Inversión Corporativa Group.

On September 30, 2012, the Extraordinary General Shareholders' Meeting approved a capital increase of 430,450,152 class B shares with a nominal value of €0.01 per share, charged to our freely available reserves, which have been distributed for no consideration to all existing shareholders on the basis of four class B shares for each class A share or class B share which they hold ('the Capital increase'). Consequently, this capital increase did not cause any dilution or concentration with respect to the shareholders previous ownership.

The General Shareholders' Meeting approved a right of voluntary conversion for the class A shareholders to convert their class A shares with a nominal value of 1 Euro into class B shares with a nominal value of 0.01 Euros during pre-set windows until December 31, 2017. Following the exercise of this right, after each conversion window, a capital reduction has taken place and will take place, by reducing the par value of a number of converted class A shares to by 0.99 euros per share, with a credit to restricted reserves.

In the context of the Capital increase, Inversión Corporativa IC, S.A. ('Inversión') has agreed to (i) limit its voting rights to the 56% of the total voting rights of Class A shares and to guarantee (ii) that the percentage of voting shares held by Inversión Corporativa (whether they are class A shares or class B ordinary shares) over the total shares of the Company shall at no time be lower than one fourth of the percentage of voting rights that those shares provide to Inversión Corporativa, with respect to its total voting rights in the Company, meaning that its voting rights may not exceed four times its economic rights. Should that threshold be exceeded, Inversión Corporativa will transfer class A ordinary shares, or convert class A shares into class B shares, in such number as may be necessary to maintain such proportion.

During 2013 four capital conversions took place, through which 1,173,788 Class A shares were converted into class B shares, which has resulted in a reduction of capital of €1,162 thousand.

Since the approval by the General Shareholder's Meeting (September 30, 2012) of the aforementioned voluntary conversion light conversion right of class A shares into class B shares, eight

capital conversions have taken place after eight conversion windows periods; the last one has finalized on January 15, 2014.

After such capital conversions the share capital as of January 27, 2014 after the end of the eighth conversion period amounts to €91,223,623.33 represented by two distinct classes of 825,562,690 shares completely subscribed and disbursed: 83,806,057 class A shares and 741,756,633 class B shares.

On November 4, 2011, Abengoa, S.A. closed an investment transaction with First Reserve Corporation (FRC), a US Investment Fund specialized in Private Capital and Investments within the energy sector, by virtue of which it invested €300 million in Abengoa's stock capital, through the issuance of 17,142,858 new class B shares at a nominal value of €0.01 per share, at a nominal price plus a premium of €17.50 per share.

At the same time, Abengoa issued 4,020,124 warrants of class B shares, at an exercise price of €0.01, which are transmissible, and which shall afford FRC the right to subscribe a class B share from Abengoa for each warrant and to receive a cash sum equivalent to the dividend per share and other distributions, for a period of 5 years. As a consequence of the distribution of class B shares approved by the Extraordinary General Meeting held on September 30, 2012, FRC received 16,080,496 warrants of class B shares, at an exercise price of €0.01.

The General Shareholders' meeting held on April 7, 2013 approved a dividend of €0.072 per share, which totals €38,741 thousand, compared to €37,664 thousand in the previous year. On April 9, 2013 the dividend was paid.

18.2. Parent company reserves

The following table shows the amounts and movements of the Parent Company Reserves in 2013, 2012 and 2011:

	Balance as of 12.31.12	Distribution of 2011 profits	Capital increase	Other movements	Balance as of 12.31.13
Share premium	388,752	—	514,625	—	903,377
Revaluation reserve	3,679	—	—	—	3,679
Other reserves of the parent company:					
— Unrestricted reserves	219,426	70,390	(16,865)	(84,173)	188,778
— Legal reserves	16,549	6,365	1,162	—	24,076
Total	628,406	76,755	498,922	(84,173)	1,119,910

	628,406				

ABENGOA
Consolidated financial statements

	<u>Balance as of 12.31.10</u>	<u>Distribution of 2009 profits</u>	<u>Capital increase</u>	<u>Other movements</u>	<u>Balance as of 12.31.11</u>
Share premium	110,009	—	278,743	—	388,752
Revaluation reserve	3,679	—	—	—	3,679
Other reserves of the parent company:					
— Unrestricted reserves	203,716	93,024	(46,767)	(47,795)	202,178
— Legal reserves	4,607	—	—	—	4,607
Total	<u>322,011</u>	<u>93,024</u>	<u>231,976</u>	<u>(47,795)</u>	<u>599,216</u>

The amount corresponding to 'Other movements' for 2013, 2012 and 2011 is mainly part of operations carried out with treasury shares.

The Legal Reserve is created in accordance with Article 274 the Spanish Corporate Law (Ley de Sociedades de Capital), which states that in all cases an amount of at least 10% of the earnings for the period will be allocated to this reserve until at least 20% of the share capital is achieved and maintained. The Legal Reserve may not be distributed and, if used to compensate losses in the event that there are no other reserves available to do so, it should be replenished from future profits.

On November 19, 2007, the company entered into a liquidity agreement on class A shares with Santander Investment Bolsa, S.V. Replacing this liquidity agreement, on January 8, 2013, the company entered into a liquidity agreement on class A shares with Santander Investment Bolsa, S.V. in compliance with the conditions set forth in CNMV Circular 3/2007 of December 19. On November 8, 2012, the company entered into a liquidity agreement on class B shares with Santander Investment Bolsa, S.V. in compliance with the conditions set forth in CNMV Circular 3/2007 of December 19.

As of December 31, 2013 treasury stock amounted to 40,009,307 shares (14,681,667 shares in 2012 and 2,913,435 shares in 2011), which 5,382,896 are class A shares and 34,626,411 are class B shares.

Regarding the operations carried out during the year, the number of treasury stock purchased amounted to 8,125,581 class A shares and 62,025,632 class B shares and treasury stock transferred amounted to 5,681,820 class A shares and 39,141,753 class B shares, with a net result of €-89,612 thousand recognized in equity (€-961 thousand in 2012 and €-2,144 thousand in 2011).

The proposed distribution of 2013 profits of the Parent Company:

<u>Distribution</u>	<u>Balance as of 12.31.13</u>
Legal reserve	343
Unrestricted reserves	102,040
Dividends	91,637
Total	<u>194,020</u>

The proposed distribution of 2013 profits involves the payment of €0.111 per share in 2014. The Company paid a dividend of €0.072 per share in 2013.

18.3. Other reserves

Other reserves include the impact of the valuation of derivative instruments and available for sale investments at the end of the year.

ABENGOA
Consolidated financial statements

The following table shows the balances and movements of Other reserves by item for 2013, 2012 and 2011:

	Hedging reserves	Available-for-sale financial assets reserves	Total
Balance as of December 31, 2012	(282,600)	2,334	(280,266)
— Gains/(losses) on fair value for the year	89,584	(616)	88,968
— Transfer to the Consolidated Income Statement	88,924	—	88,924

Balance as of December 31, 2011	<u>(180,034)</u>	<u>644</u>	<u>(179,390)</u>

For further information on hedging activities, see Note 14.

18.4. Accumulated currency translation differences

The amount of accumulated currency translation differences for fully and proportionally consolidated companies and associates at the end of 2013, 2012 and 2011 is as follows:

	Balance as of 12.31.13	Balance as of 12.31.12	Balance as of 12.31.11
Currency translation differences:			
— Fully and proportionally consolidated companies	(545,950)	(153,246)	42,943
— Associates	(36,885)	(14,134)	(1,589)
Total	<u>(582,835)</u>	<u>(167,380)</u>	<u>41,354</u>

ABENGOA
Consolidated financial statements

In 2013, the decrease in the accumulated currency translation differences is mainly due to the depreciation of the Brazilian Real against the Euro.

For the year 2012, the decrease in the accumulated currency translation differences is mainly due to the depreciation of the Brazilian Real and US Dollar against the Euro.

18.5. Retained earnings

The breakdown and movement of Retained earnings during the 2013, 2012 and 2011 fiscal years are as follows:

	Balance as of 12.31.12	Dist. of 2012 profit	2013 profit	Other movements	Balance as of 12.31.13
Reserves in full & proportionate consolidated entities	772,943	(77,687)	—	40,169	735,425

Total	735,425	15,508	772,943	18,938	491,110	17,323

Note 19. — Non-recourse financing (project financing)

As indicated in Note 2.2, there are certain entities within the Group for which, in general, the main commercial purpose is the long-term development of integrated products which are financed through non-recourse project finance. This note outlines the non-recourse financing linked to the assets included in Note 10 of these Consolidated Financial Statements.

Non-recourse financing is generally used for constructing and/or acquiring an asset, exclusively using as guarantee the assets and cash flows of the company or group of companies carrying out the activities financed. In most of the cases, the assets and/or contracts are set up as guarantee to ensure the repayment of the related financing.

Compared to corporate financing, non-recourse financing has certain key advantages, including a greater leverage period permitted and a clearly defined risk profile.

19.1. The balances and movements for 2013 and 2012 of non-recourse financing are set out in the table below:

	Non-recourse financing — long-term	Non-recourse financing — short term	Total
Balance as of 12.31.12	4,678,993	577,779	5,256,772
Increases	1,666,324	164,506	1,830,830
Decreases (reimbursement)	(477,684)	(476,417)	(954,101)
Currency translation differences	(285,264)	(63,015)	(348,279)
Changes in consolidation and reclassifications	153,782	381,946	535,728
Balance as of 12.31.13	<u>5,736,151</u>	<u>584,799</u>	<u>6,320,950</u>

The increase in 2013 was mainly due to the consolidation of Arizona Solar One (see Notes 2.1.1 and 6.3) by €809 million and to new drawings related to transmission lines projects (€605 million). In addition, the Company obtained new financing for the cogeneration plant in Tabasco, Mexico (€566 million). There were also new drawings for thermosolar projects (€366 million), mainly Solaben 1 and 6 (€200 million).

Additionally, the Company has repaid €377 million corresponding to the existing debt of the cogeneration plant in Tabasco, Mexico, which has been replaced by a new financing as referred to above. Furthermore, there have been repayments of debt related to thermosolar projects (€175 million) and transmission lines (€122 million). Non-recourse financing also decreased due to the sale of Befesa (€369 million), to the classification of Qingdao as held for sale (€106 million) and to translation differences (€348 million) mainly caused by the depreciation of Brazilian real with respect to the euro.

	Non-recourse financing — long-term	Non-recourse financing — short term	Total
Balance as of 12.31.11	4,982,975	407,135	5,390,110
Increases	780,859	62,311	843,170
Decreases (reimbursement)	(18,878)	(155,894)	(174,772)
Currency translation differences	(150,735)	(32,826)	(183,561)
Changes in consolidation and reclassifications	(915,228)	297,053	(618,175)
Balance as of 12.31.12	<u>4,678,993</u>	<u>577,779</u>	<u>5,256,772</u>

During 2012 the increase in non-recourse financing was mainly due to drawings in relation to transmission lines amounting to €549 million. In addition, €217 million were drawn in relation with new solar projects and €48 million in relation to the co-generation project in Tabasco, Mexico. On the other hand, non-recourse financing decreased due to de-consolidation of companies resulting from the initial application of IFRS10 and 11 as of January 1, 2012 (€635 million) and due to translation differences (€-184 million decrease) mainly caused by the depreciation of Brazilian real with respect to the euro.

19.2. Within the assets on the Consolidated Statement of Financial Position and under the Cash and Cash equivalent and Financial Receivables (Current and non-current) headings, there are debt service reserve accounts in the amount of €156 million relating to project finance in 2013 (€192 million in 2012).

- 19.3. Appendix IX of this consolidated report details the Project companies as of the end of 2013 which are financed by Non-recourse project finance.
- 19.4. The repayment schedule for Non-recourse project financing, at the end of 2013 is as follows and is consistent with the projected cash flows of the related projects.

<u>2014</u>	<u>2015</u>	<u>2016</u>	<u>2017</u>	<u>2018</u>	<u>Subsequents years</u>
584,799	653,369	596,008	290,075	452,199	3,744,500

Included within the amounts repayable there are balances relating to operations financed through non-recourse bridge loans (see Note 19.6) which will be repaid upon granting long-term non-recourse project financing.

- 19.5. Non-recourse financing projects entered into in 2013 and 2012 (in Millions of Euros) is as follows:

<u>Project</u>	<u>Year</u>	<u>Country</u>	<u>Amount committed</u>	<u>Amount drawn</u>
Palmatir, S.A.	2013	Uruguay	84	43
Solaben Electricidad Uno y Seis	2013	España	200	200
Abengoa Transmisión Norte S.A. (ATN)	2013	Perú	83	83

(*) Project companies included in the consolidation group by the equity method after application of IFRS 10 and 11 effective from January 1, 2013 and retroactively applied until January 1, 2012.

- 19.6. Non-recourse project finance applied to projects also includes Non-Recourse Finance in Process. This relates to certain operations which are financed in a similar manner to non-recourse projects, generally by financial entities, and which are earmarked to be future development projects which typically will eventually be financed through non-recourse project finance. Receiving finance in process is in effect similar to receiving traditional customer prepayments during various early phases of construction of a project; Non-recourse finance in process varies slightly from traditional prepayments, however, in that it is not received from customers but from a financial entity. Such funding typically relates to transitional financing phases of a project (typically periods of less than 2-3 years) during the launch and construction phase of goods/projects which once completed and ready for operation become financed under the non-recourse project finance model (See Note 2.5).

However, if during the transitory period there is a risk of non-compliance with the debt repayment schedule necessary for the formalization of Project Finance (or of construction, which will ultimately require financing), this would be reclassified to elsewhere on the Consolidated Statement of Financial Position, depending upon the nature of the arrangement, typically being Loans with financial entities.

ABENGOA
Consolidated financial statements

The table below lists projects with non-recourse financing in progress as of December 31, 2013 (amount in thousands of euros):

	ATN 3	ATE XVI Miracema	ATE XVII Milagres	ATE XVIII Estreito	Hospital Manaus	Cadonal
Project start date	June-13	March-13	March-13	March-13	April-13	December-12

Total current	919,264	590,384
Total corporate financing	5,654,409	4,946,828

20.2. Credit facilities with financial entities

- a) The amount of current and non-current credit facilities with financial entities as of December 31, 2013 includes debts denominated in foreign currencies in the amount of €278,511 thousand (€259,242 thousand in 2012).

The most significant amounts of debt in foreign currencies with financial entities are as follows:

<u>Currency</u>	<u>12.31.13</u>		<u>12.31.12</u>	
	<u>Non-domestic companies</u>	<u>Domestic companies</u>	<u>Non-domestic companies</u>	<u>Domestic companies</u>

Total	165,902	112,609	258,953	289

- b) The following table shows a list of credit facilities with financial entities:

<u>Loan details</u>	<u>Year granted</u>	<u>Granted amount</u>	<u>Outstanding</u>	<u>Expiry</u>
Loan with Instituto de Crédito Oficial	2007	151,389	151,389	jul-16
Loan with the European Investment Bank (R&D&i)	2007	109,069	109,069	aug-14
Inabensa financing	2010-2013	407,204	318,960	2014-2020
Abener Energía S.A. financing	2010-2013	469,819	331,440	2014-2024
Forward Start Facility 2012	2012	1,663,210	1,421,797	jul-16
Other borrowings	Various	263,417	263,417	Various
Total		3,064,108	2,596,072	

With the aim of minimizing the volatility in interest rates of financial operations, specific contracts are signed to hedge the possible variations that may occur (See Note 14).

The long-term syndicated financing loan was signed for the purposes of financing investments and general financing requirements of Abengoa, S.A. and all the companies of the group without non-recourse financing.

On April 27, 2012, the Company signed the refinancing and syndication of €1,566,210 thousand of its long-term corporate debt. The refinancing was led by a group of national and international entities, which acted as arrangers and bookrunners for the transaction. On May 22, 2012 and according to the option included in the contract, the principal amount was increased by €47,000 thousand and on July 11, 2012 it was additionally increased by €50,000 thousand, so the refinancing amounted to 1,663,210 thousand. The refinancing was supported by 37 international financial institutions. As of December 31, 2013, borrowings under the 2013 Forward Start Facility amounted to €1,416,710 thousand.

On December 23, 2013 there was a repayment of the Forward Start Facility 2012 against the maturity of July 2014 for an amount of €246,500 thousand.

Interest rate applicable is Euribor plus a margin of 3.75% until January 20, 2013, 4.00% until January 2015 and 4.25% until July 20, 2016.

In addition, the bilateral loans with the Official Credit Institute (ICO) and the European Investment Bank (EIB) are aimed at financing specific investment programs, more notably overseas programs, as well as R&D&i programs.

Furthermore, some subsidiaries of Abengoa, S.A. undersigned long-term loans with various entities, including two financing agreements signed with a group of financing entities backed by an EKN (Swedish Export Credit Agency) guarantee to finance industrial machinery in various projects:

To ensure that the Company has sufficient funds to repay the debt with respect to its capacity to generate cash flow, Abengoa has to comply with a Corporate Net Debt/EBITDA financial ratio with the financial institutions.

According to the financing agreements, the maximum limit of this ratio is 3.0 for the years 2012, 2013 and until December 30, 2014 and 2.5 starting December 31, 2014. As of December 31, 2013 and 2012, Corporate Net Debt/EBITDA financial ratio was 1.69 and 1.80 respectively, according to the conditions of the financing agreements.

c) As of December 31, 2013 the debt repayment calendar was as set out in the following table:

	2014	2015	2016	2017	2018	Subsequent years	Total
FSF 2012	240,881	505,114	675,802	—	—	—	1,421,797
EIB financing	109,069	—	—	—	—	—	109,069
ICO financing	51,476	49,942	49,971	—	—	—	151,389
Abener Energia SA financing	73,998	61,749	41,837	34,795	46,361	72,700	331,440
Instalaciones Inabensa SA financing	70,918	59,699	55,098	54,519	52,048	26,678	318,960
Remaining loans and credits	90,391	30,529	10,127	18,320	9,222	104,828	263,417
Total	636,733	707,033	832,835	107,634	107,631	204,206	2,596,072

The exposure of the Group to movements in interest rates and the dates at which prices are revised is specified in Note 4 on the management of financial risks. Corporate financing is mainly based in variable interest rates, as such its fair value is close to its book value. The fair

value is based on discounted cash flows, applying a discount rate being that of the third-party loan.

- d) The balance of interest payable is €39,664 thousand as of 2013 (€17,890 thousand in 2012) and is included under 'Short-term borrowings'.
- e) Real estate pledged against mortgages corporate financing as of December 31, 2013 is not significant.
- f) The average interest rates associated with the debt facilities reflect normal levels in each of the regions and areas in which the facility was agreed upon.
- g) The average cost of total financing during 2013 was 7.1%.

20.3. Notes and bonds

The table below shows the maturities of the existing notes as of December 31, 2013:

	2014	2015	2016	2017	2018	2019	2020
Convertible notes Abengoa . . .	100,100	—	—	250,000	—	400,000	—
Ordinary notes Abengoa	—	300,000	500,000	472,246	550,000	—	326,940
Euro-Commercial Paper Programme (ECP) (*)	104,912	—	—	—	—	—	—
Total	205,012	300,000	500,000	722,246	550,000	400,000	326,940

(*) With possibility of renewal

Convertible notes 2014

On July 24, 2009, Abengoa, S.A. issued Convertible Notes, convertible into ordinary shares, to qualified investors and institutions in Europe for the amount of €200 million. On January 17, 2013, Abengoa, S.A. repurchased a nominal amount of €99.9 for a purchase price of €108.8 million. The terms and conditions of the issuance are currently as follows:

- a) The nominal amount of the notes is one hundred million and one hundred thousand Euros (€100.1 million) with maturity set at five (5) years.
- b) The Notes accrue a fixed annual interest of 6.875% payable semiannually.
- c) The 2014 Convertible Notes are convertible into fully paid class A shares or class B shares of Abengoa, subject to certain liquidity conditions, credited in the number determined by dividing the aggregate nominal amount of the Notes by the applicable conversion price. The conversion price was initially set at €21.12 per ordinary share of Abengoa and was adjusted to €20.84 per share in July 2012 following a dividend payment (€0.35 per share) in excess of the dividend threshold permitted without adjustment in the conversion price (€0.21 per share). In October 2012, the conversion price was adjusted to €4.17 per share of Abengoa due to the distribution of class B shares as approved by the Extraordinary General Shareholders' Meeting held on September 30, 2012. Additionally, the conversion price has been adjusted to €3.81 per share of Abengoa as a result of the Capital Increase completed on October 29, 2013.
- d) Pursuant to the Terms and Conditions, in the event that investors decide to exercise their right of conversion, the Company may decide to settle the issuance entirely in shares, in cash or in a combination of shares and cash.

As described in Note 2.18.1 in Significant accounting policies, in accordance with IAS 32 and 39 and the Terms and Conditions of the issuance, since Abengoa has a contractual right to choose the type of settlement and one of these possibilities is paying through a variable number of shares and cash, the conversion option qualifies as an embedded derivative. Thus, the convertible bonds are considered a hybrid instrument, which includes a component of debt and an embedded derivative for the conversion option held by the bondholder. This happens with 2014, 2017 and 2019 convertible bonds.

The carrying value amount of the liability component of this note at December 31, 2013 amounted to 96,183 thousand (€178,720 thousand at December 31, 2012, corresponding to a nominal amount of €200 million).

At December 31, 2013, the fair value of the derivative liability embedded in the convertible bond is €984 thousand, while its fair value as of December 31, 2012 amounted to €21,313 thousand. The decrease in fair value has been recorded as an income amounting to €9,672 thousand in 'Other net finance income/expense' in the Consolidated Income Statement for the year ended December 31, 2013 (€24,788 thousand in 2012 and €4,360 thousand in 2011), see Note 30.3.

Additionally, a net loss of €4,815 thousand was recorded due to the partial repayment of the convertible notes due 2013, the repayment resulted in an income of €7,212 thousand due to the fair value measurement of the cancelled embedded derivative component and a loss of €12,027 thousand due to the difference between the amount paid and the cancelled components of the liability.

The key data for the valuation model were the share price, the estimated profitability of the dividend, an envisaged option maturity life, an interest rate and underlying volatility as set out in the table below:

	<u>12.31.2013</u>	<u>12.31.2012</u>
'Spot Abengoa' Price (euros)	2.18	2.34
'Strike' Price (euros)	3.81	4.17
Maturity	07/24/2014	07/24/2014
Volatility	40%	65%
Number of shares	52,493,438	47,961,631

Furthermore, in order to partially hedge the derivatives embedded in the notes convertible, during the years 2011 and 2010 the Company purchased two call options over 7,000,000 Abengoa's own shares with a strike price of €21.125 per share, maturing on July 24, 2014 (over 35,000,000 Abengoa's shares with a strike price of €4.22 after the distribution of class B. shares approved by the Extraordinary General Meeting held on September 30, 2012).

These options hedge around 67% of the notes in the event of conversion.

The fair value of the options at December 31, 2012, calculated using the Black-Scholes model, was €4,714 thousand, while the fair value was €419 thousand at December 31, 2013. The decrease in fair value has been recorded as a finance expense amounting to €4,295 thousand recorded in 'Other net finance income/expense' in the Consolidated Income Statement (an expense of €15,320 thousand in 2012 and an expense of €19,446 thousand in 2011), see Note 30.3. As of December 31, 2013 the listed price of these bonds was 102.006%.

ABENGOA**Consolidated financial statements**

The key data for the valuation model included the share price, the estimated profitability of the dividend, the envisaged life of maturity, an interest rate and underlying volatility as set forth in the table below:

	<u>12.31.2013</u>	<u>12.31.2012</u>
'Spot Abengoa' Price (euros)	2.18	2.34
'Strike' Price (euros)	4.22	4.22
Maturity	07/24/2014	07/24/2014
Volatility	47%	51%
Number of shares	35,000,000	35,000,000

Convertible notes 2017

On February 3, 2010, Abengoa, S.A. issued Convertible Notes, convertible into ordinary shares, to qualified investors and institutions for the amount of €250 million. The terms and conditions of the issuance are currently as follows:

- a) The Notes were issued for two hundred million Euros (€250 million) with maturity set at seven (7) years.
- b) The Notes accrue a fixed annual interest of 4.5% payable semiannually.
- c) The 2017 Convertible Notes are convertible into fully paid class A shares or class B shares of Abengoa, subject to certain liquidity conditions, credited in the number determined by dividing the aggregate nominal amount of the Notes by the applicable conversion price. The conversion price was initially set at €30.27 per ordinary share of Abengoa and was adjusted to €29.87 per share in July 2012 following a dividend payment (€0.35 per share) in excess of the dividend threshold permitted without adjustment in the conversion price (€0.21 per share). In October 2012, the conversion price was adjusted to €5.97 per share of Abengoa due to the distribution of class B shares as approved by the Extraordinary General Shareholders' Meeting held on September 30, 2012. Additionally, the conversion price has been adjusted to €5.45 per share of Abengoa as a result of the Capital Increase completed on October 29, 2013.
- d) Pursuant to the Terms and Conditions, in the event that investors decide to exercise their right of conversion, the Company may decide to settle the issuance entirely in shares, in cash or in a combination of shares and cash.

The carrying value amount of the liability component of this bond at December 31, 2013 amounted to 203,422 thousand (€191,516 thousand at December 31, 2012).

Additionally, at December 31, 2013, the fair value of the derivative liability embedded in the convertible bond is €2,887 thousand, while its fair value as of December 31, 2012 amounted to €39,306 thousand. The decrease in fair value has been recorded as an income amounting to €36,419 thousand in 'Other net finance income/expense' in the Consolidated Income Statement for the year ended December 31, 2012 (€16,885 thousand in 2012 and €3,194 thousand in 2011), see Note 30.3.

ABENGOA**Consolidated financial statements**

The key data for the valuation model included the share price, the estimated profitability of the dividend, an envisaged option maturity life, an interest rate and underlying volatility as set forth in the table below:

	<u>12.31.2013</u>	<u>12.31.2012</u>
'Spot Abengoa' Price (euros)	2.18	2.34
'Strike' Price (euros)	5.45	5.97
Maturity	02/03/2017	02/03/2017
Volatility	39%	65%
Number of shares	45,871,560	41,876,047

Furthermore, in order to partially hedge the derivatives embedded in the notes convertible, during the years 2011 and 2010 the Company purchased two call options over 7,100,000 Abengoa's own shares with a strike price of €30.27 per share, maturing on February 3, 2017 (over 35,500,000 Abengoa's own shares with a strike price of €6.05 after the distribution of class B shares approved by the Extraordinary General Meeting held on September 30, 2012).

These options hedge around 76% of the notes in the event of conversion.

The fair value of the options at December 31, 2012, calculated using the Black-Scholes model, was €4,065 thousand, while the fair value was €2,322 thousand at December 31, 2013. The decrease in fair value has been recorded as a finance expense amounting to €1,743 thousand recorded in 'Other net finance income/expense' in the Consolidated Income Statement (€17,139 thousand in 2012 and €17,812 thousand in 2011), see Note 30.3. As of December 31, 2013 the listed price of these bonds was 100.453%.

The key data for the valuation model included the share price, the estimated profitability of the dividend an envisaged option maturity life, an interest rate and underlying volatility as set forth in the table below:

	<u>12.31.2013</u>	<u>12.31.2012</u>
'Spot Abengoa' Price (euros)	2.18	2.34
'Strike' Price (euros)	6.05	6.05
Maturity	02/03/2017	02/03/2017
Volatility	43%	43%
Number of shares	35,500,000	35,500,000

On February 3, 2015, holders of the 2017 Convertible Notes will have the right to require Abengoa to redeem the 2017 Convertible Notes at the principal amount together with accrued and unpaid interest to such date.

Convertible notes 2019

On January 17, 2013, Abengoa, S.A. issued €400 million aggregate principal amount among qualified and institutional investors of 6.25% convertible notes due 2019 (the '2019 Convertible Notes'). The notes are convertible into class B shares. In summary, the final terms and conditions of the issuance are as follows:

- a) The Notes were issued for four hundred million Euros (€400 million) with maturity set at six (6) years.
- b) The Notes accrue a fixed annual interest of 6.25% payable semiannually.
- c) The Notes are convertible, at the option of noteholders into fully paid class B shares.

- d) In the event that investors decide to exercise their right of conversion, the Company may decide to repay the notes in shares, cash or a combination of cash and shares.
- e) The 2019 Convertible Notes are convertible into class B shares of the Parent Guarantor credited in the number determined by dividing the aggregate nominal amount of the Notes by the applicable conversion price. The initial conversion price is three Euros and twenty-seven cents of a Euro (€3.27) for each class B share of the Company. The conversion price has been adjusted to €3.04 per share of Abengoa as a result of the Capital Increase completed on October 29, 2013.

The carrying value of the liability component of the notes at December 31, 2013 amounts to €309,249 thousand.

At December 31, 2013, the fair value of the derivative liability embedded in the convertible note is €62,894 thousand, while its initial valuation generated in the issuance of the convertible notes amounted to €91,244 thousand. The decrease in fair value has been recorded as income amounting to €28,350 thousand in 'Other finance income' in the Consolidated Income Statement for the year ended December 31, 2013. As of December 31, 2013 the listed price of these bonds was 101.509%.

The key data for the valuation model included the share price, the estimated profitability of the dividend an envisaged option maturity life, an interest rate and underlying volatility as set forth in the table below:

	<u>12.31.2013</u>
'Spot Abengoa' Price (euros)	2.18
'Strike' Price (euros)	3.04
Maturity	17/01/2019
Volatility	37%
Number of shares	131,578,947

Ordinary notes Abengoa 2015

On December 1, 2009, Abengoa, S.A. issued ordinary Notes for the amount of €300 million. In summary, the final terms and conditions of the issuance are as follows:

- a) The Notes were issued for three hundred million Euros (€300 million) with maturity set at five (5) years.
- b) These Notes will accrue a fixed annual interest of 9.625% payable semiannually.
- c) These Notes are jointly guaranteed by some subsidiaries of the group.

As of December 31, 2013 the listed price of these bonds was 107.125%.

Ordinary notes Abengoa 2016

On March 31, 2010, Abengoa, S.A. issued ordinary Notes to qualified investors and institutions in Europe for the amount of €500 million. In summary, the final terms and conditions of the issuance are as follows:

- a) The Notes were issued for five hundred million Euros (€500 million) with maturity set at six (6) years.
- b) The fixed annual payable twice-yearly interest on the Notes is 8.50% annually.
- c) The notes are guaranteed jointly by certain subsidiaries of the group.

As of December 31, 2013 the listed price of these bonds was 108.375%.

Ordinary notes Abengoa 2017

On October 19, 2010, Abengoa Finance, S.A.U., a subsidiary of Abengoa, S.A., issued an ordinary bonds for USD 650 million among qualified and institutional investors in accordance with Rule 144A of the Securities Act of 1933 and subsequent amendments thereto. In summary, the terms and conditions of the issue that were established definitively are:

- a) The bond issue is for an amount of six hundred and fifty million United States dollars (USD 650 million) and matures at seven (7) years.
- b) The notes will accrue fixed annual interest of 8.875%, payable every six months.
- c) The notes are jointly and severally guaranteed by Abengoa, S.A. and certain group subsidiaries.

As of December 31, 2013 the listed price of these bonds was 107.938%.

Ordinary notes Abengoa 2018

On February 5, 2013, Abengoa Finance, S.A.U., a subsidiary of Abengoa, S.A., issued Ordinary Notes to qualified and institutional investors for €250 million. On October 3, 2013, Abengoa Finance, S.A.U. issued €250 million of additional and fungible notes, at a price of 100.25%, which is equivalent to a yield of 8.799%. Furthermore, on November 5, 2013, Abengoa Finance, S.A.U. issued €50 million of additional and fungible notes, at a price of 105.25%, which is equivalent to a yield of 7.408%. The terms and conditions of the issuance are as follows:

- a) The aggregate nominal amount of the Notes is five hundred and fifty million Euros (€550 million) with maturity set in February 5, 2018.
- b) The Notes accrue a fixed annual interest of 8.875% payable semiannually.
- c) The notes are guaranteed jointly by certain subsidiaries of the group.

As of December 31, 2013 the listed price of these bonds was 108.125%.

Ordinary notes Abengoa 2020

On December 13, 2013, Abengoa Finance, S.A. Unipersonal, a subsidiary of Abengoa, S.A., issued an ordinary bond for USD 450 million among qualified and institutional investors. In summary, the terms and conditions of the issuance are:

- a) The bond was issued for an amount of USD 450 million and matures in 6 years.
- b) The notes accrue fixed annual interest of 7.75%, payable every six months.
- c) The notes are jointly and severally guaranteed by Abengoa, S.A. and certain group subsidiaries.

As of December 31, 2013 the listed price of these bonds was 103.520%.

Euro-Commercial Paper Programme

On January 29, 2013, Abengoa, S.A. carried out a Euro Commercial Paper (ECP) program for a maximum of €500 million, listed in the Irish Stock Exchange with one-year maturity. Through this program, the company was able to issue notes between one and twelve months maturity, diversifying its financing options in the capital markets.

On December 20, 2013, the program was renewed for one more year and for the same amount. At the end of 2013, the program had a balance of €104,912 thousand.

20.4. Finance lease liabilities

Finance lease creditors as of the end of 2013 and 2012 were:

<u>Finance lease</u>	<u>Balance as of 12.31.13</u>	<u>Balance as of 12.31.12</u>
Present values of future payments for finance lease	40,038	39,934
Liabilities: minimum payments for finance lease:		
Less than 1 year	15,031	13,786
From 1 to 5 years	22,339	24,105
More than 5 years	8,139	8,040
Net book value:		
Technical installations and machinery	24,997	24,900
Information processing equipment	2,515	5,024
Other tangible assets	22,606	18,064

20.5. Other loans and borrowings

The following table sets out the movement of Other loans and borrowings at the 2013 and 2012 year end:

	<u>Balance as of 12.31.13</u>	<u>Balance as of 12.31.12</u>
Sale and lease back	—	6,397
Derivative premiums payable	76,518	97,537
Low interest loans	6,732	14,998
Loans with public institutions and others	40,523	71,098
Total	<u>123,773</u>	<u>190,030</u>

Note 21. — Grants and other liabilities

Grants and Other Liabilities as of December 31, 2013 and 2012 are shown in the following table:

	<u>Balance as of 12.31.13</u>	<u>Balance as of 12.31.12</u>
Grants	374,345	70,600
Suppliers of non-current assets	2,239	5,292
Long-term trade payables	269,604	118,528
Grants and other non-current liabilities	<u>646,188</u>	<u>194,420</u>

The increase in Long-term trade payables was primarily due to the investment from Liberty Interactive Corporation ('Liberty') made on October 2, 2013 for an amount of USD 300 million. The investment was made in shares of class A shares of Arizona Solar Holding, the holding of Solana thermo-solar plant in the United States. Such investment was made in a tax equity partnership which permits the partners to have certain tax benefits such as accelerated depreciation and Investment Tax Credits (ITC).

According to the stipulations of IAS 32 and in spite of the fact that the investment of Liberty is in shares, it does not qualify as equity and has been classified as a Liability as of December 31, 2013, the non-current portion of the liability is recorded in Grants and other liabilities for an amount of €171 million and its current portion is recorded in other current liabilities for an amount of €47 million.

This liability has been initially valued at fair value, calculated as the present value of expected cash-flows during the useful life of the concession, and will be measured at amortized cost according with the effective interest method.

The control and management of the thermo-solar plant is a responsibility of Abengoa and the plant is fully consolidated in these consolidated financial statements.

In addition, the increase in Grants was mainly due to grants arising from loans at rates below market rates. Loans with the Federal Financing Bank guaranteed by the Department of Energy related to the Solana thermosolar project bear interest at a rate below market rates for these types of project and term. The difference between proceeds received from these loans and its fair value is recorded as a grant.

Note 22. — Provisions and contingencies

22.1. Provisions for other liabilities and charge

The following table shows the movement of the non-current heading of 'Provisions for other liabilities and charges' for the years 2013 and 2012:

<u>Item</u>	<u>Taxes</u>	<u>Liabilities</u>	<u>Dismantling</u>	<u>Total</u>
Balance as of 31.12.11	39,708	42,235	37,406	119,349
Net increase/(decrease) with impact in profit and loss	(12)	1,626	(1,035)	579
Translation differences	(85)	(798)	(1,060)	(1,943)
Reclassifications and other movements	(6,277)	(571)	7,140	292
Balance as of 12.31.12	<u>33,334</u>	<u>42,492</u>	<u>42,451</u>	<u>118,277</u>
Net increase/(decrease) with impact in profit and loss	99	(678)	855	276
Translation differences	(37)	(459)	(419)	(915)
Changes in consolidation	(14,275)	(13,981)	(10,991)	(39,247)
Reclassifications and other movements	(3,906)	2,277	1,282	(347)
Balance as of 12.31.13	<u>15,215</u>	<u>29,651</u>	<u>33,178</u>	<u>78,044</u>

The decrease of total provisions in 2013 is mainly due to the exclusion of Befesa from the consolidation scope following the sale of its shareholding.

The decrease of total provisions in 2012 is mainly due to translation differences arising from the depreciation of the Algerian dinar with respect to the Euro.

Provision for tax and legal contingencies

This provision represents the Group's best estimates in connection with risks relating to tax contingencies arising during the normal course of the Group's business, fundamentally in Latin America, when it is considered probable that there will be an outflow of resources in the medium or long-term (which has been estimated being comprised in a period between 2 to 5 years), although the development of the contingencies and the new facts and circumstances that may arise overtime could change such estimated settlement period.

There are also provisions recorded by Group companies in relation with court rulings and unfavorable tax inspections that are under appeal but have not been resolved yet. For these tax disputes the Group

considers that it is probable that there will be an outflow of resources in the medium term (between 2 and 5 years).

Provision for liabilities

This provision includes the Group's best estimates of probable cash outflows in connection with litigation, arbitration and claims in progress in which the various group companies are defendants as a result of the activities they carry out. Management considers that these liabilities will likely be settled in the medium or long-term (which has been estimated being comprised in a period between 2 to 5 years).

Dismantling provision

This provision is intended to cover future expenditures related to the dismantlement of the solar plants and it will be likely to be settled with an outflow of resources in the long-term (over 5 years).

22.2. Contingent liabilities

As of December 31, 2013 Abengoa and its Group of companies are involved in certain claims and litigations both against and in their favor. Such matters arise during the Group's normal course of business and represent the technical and economic claims that the contractual parties typically invoke.

We have briefly summarized below the most significant proceedings, which in the Management opinion are not expected to have a material adverse effect in the Consolidated Financial Statements, individually or as a whole, or for which the future outcome cannot be reliably estimated.

- In May 2000, Abengoa Puerto Rico S.E., a subsidiary of Abengoa S.A, brought a lawsuit against the Electricity Power Authority (Autoridad de Energía Eléctrica, 'AEE') of Puerto Rico and terminated the agreement that both parties had entered into in relation to an EPC project for the construction of an electricity power station in Puerto Rico, in which the AEE was the Principal Contractor. The referred lawsuit contained different claims such as, inter alia, withholding payments, defaulted invoices, loss of future profits damages and several other costs, which tentatively amounted to USD 40 million.

In response to the lawsuit brought by Abengoa Puerto Rico, S.E., the AEE brought a counterclaim premised upon unlawful termination and consequential damages relating to the agreement with Abengoa Puerto Rico, S.E. and, at the same time, brought an additional lawsuit for the same amount against Abengoa and its insurer, American International Insurance Co. of Puerto Rico. The amount claimed by the AEE is approximately USD 450 million.

- On April 29, 2013, the European Commission decided to initiate an inspection on the Parent Guarantor, along with all the companies directly or indirectly under its control, including Abengoa Bioenergy Trading Europe B.V., regarding its possible participation in anticompetitive agreements or actions which were allegedly aimed at manipulating the results of Platt's Market on Close (MOC) price assessment as well as denying the access of one or more companies to participation in the MOC price assessment process. According to such European Commission's decision, the suspected anticompetitive conduct, agreements and/or mutually coordinated concrete actions have allegedly existed since 2002 and would likely involve various markets for which the Platt's MOC process is used to report prices, including markets for biofuels. In the Directors opinion the investigation is still in a preliminary phase, and the European Commission has not initiated formal proceedings. Directors believe that it and the relevant companies within the Group (including Abengoa Bioenergy Trading Europe B.V.) have at all times complied

with the applicable competition laws. We are actively cooperating with the European Commission in its investigation.

22.3. Contingent assets

As of December 31, 2013 Abengoa and its Group of companies do not have significant contingent assets.

Note 23. — Third-party guarantees and commitments

23.1. Third-party guarantees

At the close of 2013 the overall sum of Bank Bond and Surety Insurance directly deposited by the group companies and all that the parent company deposited to any company in the group as guarantee to third parties (clients, financial entities, Public Entities and other third parties) amounted to €1,323,267 thousand (€1,541,255 thousand in 2012) out of which € 2,229 thousand (€6,464 thousand in 2012) are attributed to operations of financial nature and € 1,321,038 thousand (€1,534,791 thousand in 2012) to those of technical nature.

In addition, the declarations of intent and commitments undertaken by the Group companies and what the parent company undertook to any company in the group as guarantee to third parties (clients, financial entities, Public Entities and other third parties) amounted to € 6,187,269 thousand (€4,428,780 thousand in 2012) out of which € 32,480 thousand (€148,508 thousand in 2012) are attributed to operations of financial nature and € 6,154,789 thousand (€4,280,272 thousand in 2012) to those of technical nature.

23.2. Contractual obligations

The following table shows the breakdown of the third-party commitments and contractual obligations as of December 31, 2013 and 2012 (in thousands of Euros):

<u>2013</u>	<u>Total</u>	<u>Up to one year</u>	<u>Between one and three years</u>	<u>Between three and five years</u>	<u>Subsequent</u>
Loans with credit institutions	8,917,022	1,221,532	2,837,961	938,084	3,919,445
Notes and bonds	2,894,526	256,443	795,159	1,210,960	631,964
Liabilities due to financial leases	40,038	12,945	12,348	1,588	13,157
Other loans and borrowings	123,773	13,143	62,835	39,394	8,401
Obligations under operating Leases	17,147	12,804	1,610	1,277	1,456
Purchase commitments	1,172,565	1,033,952	117,829	1,278	19,506
Accrued interest estimate during the useful life of loans	3,534,516	664,610	955,679	658,304	1,255,923

ABENGOA**Consolidated financial statements**

2012	Total	Up to one year	Between one and three years	Between three and five years	Subsequent
Loans with credit institutions	8,298,829	1,113,831	2,212,839	1,444,057	3,528,102
Notes and bonds	1,674,807	30,881	475,891	1,168,035	—
Liabilities due to financial leases	39,934	11,885	12,140	2,241	13,668
Other loans and borrowings	190,030	11,566	89,393	66,124	22,947
Obligations under operating Leases	14,359	5,714	5,412	2,757	476
Purchase commitments	1,718,113	1,617,739	97,120	2,016	1,238
Accrued interest estimate during the useful life of loans	3,243,566	453,647	926,356	602,224	1,261,339

Note 24. — Tax situation

24.1 Application of rules and tax groups

Abengoa, S.A. and 242, 256 and 283 consolidated subsidiaries in 2013, 2012 and 2011, respectively (see Appendixes XI, XVI and XXI of these Consolidated Financial Statements) have filed its 2013, 2012 and 2011 income taxes following the rules for tax consolidation in Spain under the 'Special Regime for Tax Consolidation' Number 2/97.

All the other Spanish and foreign companies included in the Consolidation group file income taxes according to the tax regulations in force in each country on an individual basis or under consolidation tax regulations.

In order to calculate the taxable income of the consolidated tax Group and the consolidated entities individually, the accounting profit is adjusted for temporary and permanent differences, recording the corresponding deferred tax assets and liabilities. At each Consolidated Income Statement date, a current tax asset or liability is recorded, representing income taxes currently refundable or payable. Deferred income taxes reflect the net tax effects of temporary differences between the carrying amount of assets and liabilities for financial statement and income tax purposes, as determined under enacted tax laws and rates.

Income tax payable is the result of applying the applicable tax rate in force to each tax-paying entity, in accordance with the tax laws in force in the territory and/or country in which the entity is registered. Additionally, tax deductions and credits are available to certain entities, primarily relating to inter-company trades and tax treaties between various countries to prevent double taxation.

24.2. Deferred tax assets and liabilities

At the end of 2013 and 2012 the analysis of deferred tax assets and deferred tax liabilities is as follows:

	<u>Balance as of 12.31.13</u>	<u>Balance as of 12.31.12</u>
Tax credits for tax loss carryforwards	378,229	368,419
Tax credits for deductions pending application		
Tax credits for export activities	242,872	256,983
Tax credits for R+D+i	72,525	69,874
Other deductions	168,180	115,160
Temporary differences		
Provisions	48,462	40,757
Impairment	16,274	17,692
Remuneration plans	18,550	21,665
Derivatives financial instruments	119,211	188,153
Non deductible expenses (Art. 20 TRLIS, Art. 7 Ley 16/2012)	80,726	—
Consolidation adjustments, homogenization adjustments and other	136,063	69,621
Total deferred tax assets	<u>1,281,092</u>	<u>1,148,324</u>
	<u>Balance as of 12.31.13</u>	<u>Balance as of 12.31.12</u>
Accelerated tax amortization	32,272	32,109
Business combination	39,852	76,383
Consolidation adjustments, homogenization adjustments and other	255,180	168,058
Total deferred tax liabilities	<u>327,304</u>	<u>276,550</u>

Most of the tax credits for net operating loss carryforwards correspond to Brazil (€169 million), the United States (€55 million), Spain (€66 million) and the Netherlands (€57 million).

Tax loss carryforwards in Brazil have been generated in years with poor meteorological conditions which have negatively affected sugarcane production. From 2011 to 2013 investments have been made to improve the quality of biological assets, to increase milling capacity and cogeneration plant capacity, with the ultimate purpose of increasing assets profitability. Tax loss carryforwards in the United States correspond mainly to projects in an initial stage of development or operation and to application of tax incentives. Tax loss carryforwards in Spain correspond mainly to the application of tax incentives.

Tax credits for deductions have been generated mainly in Spain. Among these tax credits the larger amount corresponds to deduction on export activities (DAEX), which is calculated as a percentage over investments effectively made for the acquisition of foreign companies or capital increases in foreign companies. This percentage, which was initially 25% was been gradually reduced since 2007 to reach 3% in 2010, disappearing the deduction on 2011. To benefit from this deduction, among other requirements, the acquisition or incorporation of companies should be directly related to the export of goods and services from Spain.

From the year 2012, the Company has not recorded any income in relation to this deduction, as it had been recorded entirely as of December 31, 2011.

In addition, efforts in research, development and innovation activities (R&D&i) that Abengoa has been carrying out during the last years have resulted in the generation of important tax deductions, some of which are recorded as deferred tax assets for an amount of €72 million as of December 31, 2013.

'Other deductions', which have been generated mainly in Spain, correspond primarily to deductions for double taxation (€12 million), environmental deductions (€85 million), deduction for reinvestment of extraordinary benefits (€50 million) and deductions for donations to non-profit organizations (€19 million).

In relation to tax loss carryforwards and deductions pending to be used recorded as deferred tax assets, the Company evaluates its recoverability projecting forecasted taxable income for the upcoming years and taking into account the Company tax planning strategy. Deferred tax liabilities reversals are also considered in these projections, as well as any limitation established by tax regulations in force in each tax jurisdiction.

On the other hand, the Company has certain tax credits as of December 31, 2013 which it has not capitalized, as it determined that recoverability of such assets is not probable. These tax credits consist mainly of tax loss carryforwards related to our US subsidiaries amounting to €35.1 million (€28.2 million in 2012 and €21.6 million in 2011), with expiration dates between 2029 and 2032; and R&D&i and environmental tax credits in Spain amounting to €74.7 million (€50.3 million in 2012 and €57.9 million in 2011), with expiration dates between 2022 and 2031.

The movements in deferred tax assets and liabilities during 2013 and 2012 were as follows:

Deferred tax assets	Amount
As of January 1, 2012	939,707
Increase/Decrease through the consolidated income statement	196,433
Increase/Decrease through other comprehensive income (equity)	60,588
Change in consolidation, various reclassifications and translation diff.	(48,404)
As of December 31, 2012	1,148,324
Increase/Decrease through the consolidated income statement	159,703
Increase/Decrease through other comprehensive income (equity)	(40,703)
Change in consolidation, various reclassifications and translation diff.	13,768
As of December 31, 2013	1,281,092
Deferred tax liabilities	Amount
As of January 1, 2012	232,109
Increase/Decrease through the consolidated income statement	1,667
Increase/Decrease through other comprehensive income (equity)	21,340
Change in consolidation, various reclassifications and translation diff.	21,434
As of December 31, 2012	276,550
Increase/Decrease through the consolidated income statement	87,163
Increase/Decrease through other comprehensive income (equity)	11,126
Change in consolidation, various reclassifications and translation diff.	(47,535)
As of December 31, 2013	327,304

Note 25. — Trade payables and other current liabilities

25.1. Trade payable and other current liabilities as of the close of 2013 and 2012 are shown in the following table:

<u>Item</u>	<u>Balance as of 12.31.13</u>	<u>Balance as of 12.31.12</u>
Trade payables for purchases of goods	3,707,470	3,587,221
Trade payables for services	1,121,466	989,387
Billings in excess and advance payments from clients	429,462	1,036,789
Remunerations payable to employees	37,017	41,779
Suppliers of intangible assets current	14,748	228,262
Other accounts payables	204,023	72,151
Total	<u>5,514,186</u>	<u>5,955,589</u>

25.2. Nominal values of Trade payables and other current liabilities are considered to approximate fair values and the effect of discounting them is not significant.

25.3. The table above includes amounts payable to companies in the Group through "Confirming without recourse" for an amount of €469 million at December 31, 2013 (€648 million in 2012) relating to various agreements entered into with a number of financial entities in which the Group receives 'confirming' services in connection with cash advances from trade receivables. There are deposits and cash and cash equivalents of the Consolidated Statement of Financial Position linked to the payment of such 'confirming without recourse' for an amount of € 369 million (€459 million in 2012).

Note 26. — Construction contracts

Further to the information set out in Note 2.24.b) relating to the accounting treatment of construction contracts, the table below includes aggregated information on outstanding construction contracts to which IAS 11 was applied at the end of the years 2013 , 2012 and 2011:

<u>2013</u>	<u>Construction contracts</u>
Operating revenues	5,110,959
Billings in excess and advance payments received	619,678
Payment withholdings	24,363
Account receivables	2,536,586
Account payables	3,959,876
<u>2012</u>	<u>Construction contracts</u>
Operating revenues	3,946,966
Billings in excess and advance payments received	1,245,514
Payment withholdings	28,797
Account receivables	2,284,938
Account payables	4,108,388

<u>2011</u>	<u>Construction contracts</u>
Operating revenues	3,663,406
Billings in excess and advance payments received	814,149
Payment withholdings	31,787
Account receivables	1,603,787
Account payables	3,311,785

The amount of unbilled revenue by the end of the years 2013, 2012 and 2011 is €488,883, €393,200 thousand and €493,371 thousand, respectively.

The aggregated total amount of the costs incurred and the aggregated total profits (less the related losses) recognized since origin for all the ongoing contracts at December 31, 2013 amount to €11,869,900 thousand and €995,928 thousand respectively (€10,498,336 thousand and €829,611 thousand in 2012).

Note 27. — Revenues

The breakdown of Revenues for the years 2013, 2012 and 2011 is as follows:

	<u>2013</u>	<u>2012</u>	<u>2011</u>
Product sales	2,302,224	2,495,552	2,437,054
Rendering of services and construction contracts	5,054,246	3,816,400	4,252,102
Total revenue	<u>7,356,470</u>	<u>6,311,952</u>	<u>6,689,156</u>

Note 28. — Other operating income and expenses

The table below shows the detail of Other Operating Income and Expenses for the years 2013, 2012 and 2011:

<u>Other operating income</u>	<u>2013</u>	<u>2012</u>	<u>2011</u>
Work performed by the entity and capitalized and other	322,308	367,798	429,886
Grants	25,384	13,826	74,778
Income from various services	99,336	103,604	93,807
Total	<u>447,028</u>	<u>485,228</u>	<u>598,471</u>
<u>Other operating expenses</u>	<u>2013</u>	<u>2012</u>	<u>2011</u>
Research and development cost	(6,532)	(6,404)	(25,560)
Leases and fees	(112,207)	(100,076)	(73,126)
Repairs and maintenance	(69,673)	(66,732)	(59,017)
Independent professional services	(488,672)	(284,332)	(325,562)
Transportation	(75,739)	(77,613)	(67,532)
Supplies	(126,191)	(102,134)	(120,102)
Other external services	(162,082)	(140,113)	(122,548)
Taxes	(75,993)	(53,754)	(64,023)
Other minor management expenses	(112,459)	(86,349)	(64,707)
Total	<u>(1,229,548)</u>	<u>(917,507)</u>	<u>(922,177)</u>

Work performed by the entity and capitalized and other corresponds to income from capitalized costs, including mainly the capitalization of costs associated with the construction of our own assets (except for concession assets for which IFRIC 12 is applied). The corresponding costs are recognized in the individual expense line item in the accompanying income statements. The recognition of an income for the sum of such costs through the line item 'work performed by the entity and capitalized costs and other' results in these costs having no impact in net operating profit. The corresponding assets are capitalized and included in property, plant and equipment in the accompanying balance sheets.

Additionally, other income in 2013 primarily includes an income of €141.8 million corresponding to a favorable jury verdict in a litigation process against Adriano Gianetti Dedini Ometto and Adriano Ometto Agrícola, Ltda. (see Note 15.10) and other minor income. In 2012 primary corresponds to the gain amounting to €85 million arising from the business combination of Rioglass Group, where we achieved control by increasing our ownership in stages well as an income of €26 million recorded by Abengoa Bioenergy U.S. Holding in the last quarter of 2012, corresponding to a collection from Chicago Title Insurance Company after a favorable jury verdict in a litigation process against that company. Finally, this heading includes income arising from the fair value adjustment of our biological assets in Brazil, to sales of property plant and equipment and to other minor income.

Grants include government grants related to R&D activities and to loans at a rate below interest rates which are considered as subsidized loans (see Note 2.17).

Income from various services in 2013 primarily includes profits generated by the sale of the Brazilian subsidiary, Bargoa, S.A. amounting to €33.2 million and other income by minor services. In 2012 primarily includes profits generated by the sale of the second 50% of the shareholding of STE, ATE, ATE II and ATE III amounting to €4.5 million and other income by minor services. In 2011 it primarily includes profits generated by the sale of the first 50% of the Brazilian transmission lines amounting to €45 million.

'Leases and fees' mainly includes leases of buildings, offices, machinery and construction equipment required in the ordinary course of operating activities of companies.

Under 'Other external services' are mainly recorded trips and per diem expenses.

Note 29. — Employee benefit expenses

The breakdown of Employee Benefit Expense for 2013, 2012 and 2011 is as follows:

<u>Item</u>	<u>2013</u>	<u>2012</u>	<u>2011</u>
Wages	624,045	577,967	475,384
Social security costs	119,312	111,058	103,960
Stock plans and other employee benefits	14,999	20,527	31,052
Total	<u>758,356</u>	<u>709,552</u>	<u>610,396</u>

a) Share plan

On February 2, 2006, Abengoa granted a Share Acquisition Plan, or Plan, which was approved by the Board of Directors of Abengoa on January 23, 2006. The Plan was on the same terms to all participants, members of the senior management of Abengoa and its subsidiaries. Under the Plan, participants were entitled to purchase up to 3,200,000 shares of Abengoa. Subsequently, the number of shares was adjusted due to the increase in class B share capital charged to our freely available reserves, approved by the Extraordinary General Meeting held on September 30, 2012 (see Note 18). As described below, this plan was terminated on December 31, 2012.

The material terms of the Plan were as follows:

1. Participants: 122 members of the senior management of the Abengoa Group (business group managers, business unit managers, technical and research and development officers and corporate services officers) from all its subsidiaries and business areas were eligible to participate in the Plan if they desire to do so. The Plan was not open to any member of Abengoa's Board of Directors. At the end of 2012, besides the participants excluded from the Plan, there were 98 participants.
2. Shares Available for Purchase: Up to 3,200,000 Abengoa shares (the 'shares'). The shares purchased by Plan participants were already issued and in circulation and were purchased on the open market, at the then current market price, over a period that extended to December 31, 2006, in accordance with the Stock Exchange Act (Spain). A total of 3,166,000 were purchased under the Plan. As such, these shares were not dilutive instruments for earnings per share calculation purposes. At year ended 2012, the number of shares covered by the plan amounted to 12,251,425 shares, adjusted due to capital increase by distribution of class B shares mentioned above.
3. Financing: As a feature of the Plan, each participant utilized the proceeds of an individual bank loan from Banco Sabadell, S.A. or Caja Madrid (collectively the 'Bank') to finance the purchase of shares of Abengoa under the Plan. The same standard loan terms applied to all participants. The interest rate on the loans was a variable rate equal to EURIBOR plus 0.75%. These were bullet and not amortizing loans. The loans must be repaid by the participants by August 7, 2011. Each loan was secured by a pledge of 100% of the participant's shares and was guaranteed by the Company to the extent set forth under paragraph 8 below. Except for the pledge of the shares, the loan was not considered a non-recourse financing to the participant. The maximum amount of indebtedness related to all such loans was €87 million (including expenses, commissions and interests). As of December 31, 2012, the amounts drawn by total participants under these loans amounted to €61 million.
4. Share Purchase: The acquisition cost for all participants has been the average acquisition price, plus associated commissions and other costs, for all of the shares purchased under the Plan for all participants.
5. Term and Vesting Period: The duration and vesting period of the Plan was five complete financial years (2006-2010) plus six months (until June 30, 2011) (the requisite service period). The Plan required the annual accomplishment by the participant of annual management objectives, including specific financial targets and qualitative objectives, set by the management of the Abengoa Group company by which the participant was employed, as well as their continuation as a Group employee through June 30, 2011. If the annual objectives were not met by the participant, the Bank from which the participant borrowed the funds to purchase his/her shares may sell a percentage of the shares purchased for such participant as follows: 2006-30%, 2007-30%, 2008-15%, 2009-15%, 2010-10%.
6. As of December 31, 2010, the participants had consolidated the annual objectives required by the Plan.
7. Restrictions on Sales: A participant may not transfer, sell, borrow against or otherwise dispose of the shares purchased before July 1, 2011.
8. Repurchase Option: Under the Plan, Abengoa had a repurchase option under which Abengoa could require a participant to sell the shares back to the Company on the occurrence of certain

events, such as death, disability or retirement of the participant or termination of the employment of the participant with the Abengoa Group Company.

9. Shortfall on Sale of Shares: At the end of the five years and six months term of the Plan, if the amount realized on a sale of the shares did not entirely cover the amount owed under the loan and costs and taxes on capital gains, Abengoa would compensate the participant with the necessary amount to repay the loan plus accrued and unpaid interest and pay such taxes.
10. In 2011 agreements were closed with participating financial entities and the directors of said Plan for its extension for an additional period of two years, until December 31, 2012.

The above terms are incorporated in the form of agreement that each participant in the Plan enters into with Abengoa. In order to compensate the Plan participants under the terms of the share acquisition plan for the negative difference between the fair market value of the shares at the time of expiration of the Plan and the amounts owed by the participants under the bank loans initially received to finance their acquisition of the shares, on June 10, 2013 we repurchased from the participants 2,450,285 Class A shares and 9,801,140 Class B shares and cancelled on their behalf the obligations outstanding under the banks loans. Therefore, there is no share plan as of December 31, 2013.

Compensation expense was recognized over the requisite service period (the vesting period), and was determined by reference to the fair value of a hypothetical put option granted by the company to the participant, excluding the effect of vesting conditions that are not market conditions. For these purposes, the calculation took into account the number of shares that were expected to become exercisable (or vested), which was updated at each year end, recognizing the impact of the revision of the original estimates, if applicable, in the Consolidated Income Statement.

The fair value of the hypothetical options granted during the year 2012, calculated using the Black-Scholes model was €36,245 thousand, recording a loss during the year 2012 of €9,473 thousand (expense of €7,914 thousand in 2011). The key data required for the valuation model were share price, the estimated return per dividend, an expected option life of 5 years, an annual interest rate and share market volatility that are included in the table below:

	<u>12.31.2012</u>	<u>12.31.2011</u>
'Spot Abengoa' Price (euros)	2.34	3.28
'Strike' Price (euros)	5.30	5.30
Maturity	12/31/2012	12/31/2012
Volatility class A shares	63%	42%
Volatility class B shares	57%	—
Number of class A shares	2,450,285	12,398,975
Number of class B shares	9,801,140	—

b) Bonus schemes

On July 24, 2006 and December 11, 2006, the Board of Directors approved an Extraordinary Variable Compensation Plan for Managers (Plan II) at the proposal of the Remuneration Committee. This plan initially included 190 beneficiaries and had a total cost of €51,630 thousand over a five-year period from 2007 to 2011, inclusive. It required that objectives set forth in the Strategic Plan be attained at an individual level as well as the individual's continued ongoing service throughout the period in question.

In addition to the aforementioned, given that the acquisition of the company B.U.S. Group AB was completed only shortly after implementation of the Plan, on October 22, 2007 the Board of Directors approved the inclusion of the management team of such company, formed by 10 people, in the Plan

under the same conditions as those established for the rest of the beneficiaries, for a total amount of €2,520 thousand. At the close of 2012 financial year, there were 155 participants, and the total cost of the plan was €35,237 thousand.

On October 24, 2011, the Board of Directors approved the extension of the Plan II for a period of one additional year. This Plan was liquidated in 2013

On January 24, 2011, the Board of Directors approved an Extraordinary Variable Compensation Plan for Managers (Plan III), proposed by the Remuneration Committee. The plan, which includes 104 beneficiaries (the participants), has a duration of five years (from 2011 to 2015) and is based on achieving the objectives defined in the Strategic Plan, at an individual level. The plan also requires the individual's continued ongoing service for the entire period considered. The total amount available under the plan for the 104 participants is €56,500 thousand. The company recognizes the corresponding personnel expense in the Consolidated Income Statements for the amounts accrued based on the percentage of consolidation of the objectives. In December 2013 this plan was replaced by a new one (Plan IV), which cancelled and superseded the previous plan (Plan III). The new plan has a duration of five years (from 2013 to 2017), continuing the previously established conditions. At the end of 2013, there were 347 participants and the total amount of the plan was €84,991 thousand.

The cost recognized through the variable remuneration plans in 2013 was €8,582 thousand, the accumulated cost being €22,528 thousand. The cost of Plan corresponding to senior Management of the Company recognized in 2013 amounts to €2,766 thousand.

Note 30. — Finance income and expenses

30.1. Finance income and expenses

The following table sets forth our Finance income and expenses for the years ended 2013, 2012 and 2011:

<u>Finance income</u>	<u>2013</u>	<u>2012</u>	<u>2011</u>
Interest income from loans and credits	35,306	73,864	85,073
Interest rates benefits derivatives: cash flow hedges	28,774	10,185	17,229
Interest rates benefits derivatives: non-hedging	546	17	3,073
Total	<u>64,626</u>	<u>84,066</u>	<u>105,375</u>
<u>Finance expenses</u>	<u>2013</u>	<u>2012</u>	<u>2011</u>
Expenses due to interest:			
—Loans from credit entities	(277,226)	(217,294)	(237,153)
—Other debts	(279,432)	(219,371)	(203,952)
Interest rates losses derivatives: cash flow hedges	(105,011)	(103,866)	(131,710)
Interest rates losses derivatives: non-hedging	(13)	(4,322)	(969)
Total	<u>(661,682)</u>	<u>(544,853)</u>	<u>(573,784)</u>
Net financial loss	<u>(597,056)</u>	<u>(460,787)</u>	<u>(468,409)</u>

In 2013, finance income has decreased due to lower interest income from loans and credits in Brazil, partially offset by higher interest rates benefits derivatives as a result of income for the time value of interest rate options that in the previous year was a loss classified in Finance expenses.

Interest expenses from loans with credit entities increased mainly due to the lower capitalization of interest expenses for financing projects under construction, thanks to various projects coming into

operation. The interest accrued on other debt increased, mainly due to the new notes issued during 2013 (see Note 20.3).

In 2012 finance income decreased with respect to the same period of the previous year mainly due to lower interest income from loans and credits in Brazil.

Interest expenses from loans and credits have remained stable during 2012 compared to the previous year: amounts outstanding from non recourse financing have been higher during the year 2012 but capitalized interest have also been higher, as non recourse financing increased primarily to finance projects under construction and interest expenses is capitalized during the construction period. The increase in interest from other debts, mainly due to a larger volume in our non recourse factoring arrangements, has been practically offset by a decrease in losses from our interest rate derivatives.

In 2011, the increase in finance income was primarily due to an increase in the average outstanding balance of short term financial investments in Brazil, where we benefit from higher interest rates.

In 2011, finance expenses increased primarily due to interest expense payable on a higher average amount of indebtedness during the year ended December 31, 2011 and interest expense accrued in debt from project companies entering into operation during 2011. The main non recourse projects that entered into operation during the year 2011 were Helioenergy 1 solar thermal plant in Spain (with €78 million debt as of December 31, 2011), Solar Power Plant One ('SPP1') in Algeria (with €244 million debt as of December 31, 2011), the desalination plant in Honaine (Algeria) (with €155 million debt as of December 31, 2011) and the ATN power transmission lines in Peru (with €54 million debt as of December 31, 2011).

The net financial expenses for non-recourse financing project companies is €-244,810 thousand (€-115,254 thousand in 2012 and €-124,225 thousand in 2011).

30.2. Net exchange differences

The following table sets out the exchange rate differences for the years 2013, 2012 and 2011:

Net exchange differences	2013	2012	2011
Gains and losses from foreign exchange transactions	(343)	7,085	(30,291)
Gains and losses from foreign exchange contracts: cash flow hedges	(4,171)	(22,936)	(5,424)
Gains and losses from foreign exchange contracts: fair value hedges	—	—	7,561
Gains and losses from foreign exchange contracts: non-hedging . .	283	(19,947)	—
Total	(4,231)	(35,798)	(28,154)

The most significant amounts in net exchange differences during 2013 correspond to the negative impact of the accumulated translation differences transferred to the Consolidated Income Statement and to different hedges in several subsidiaries that have not been offset perfectly with the differences generated by the hedged item.

The most significant amounts in net exchange differences during 2012 correspond to a loss from exchange rate derivatives recognized as a result of the interruption of the hedging relationship, when the transaction hedge is no longer expected to occur, to the negative impact of the accumulated translation differences transferred to the Consolidated Income Statement, to the termination of foreign exchange derivatives signed to hedge certain Brazilian transmission line concessions sold (see Note 6.2) and to different hedges in several subsidiaries that have not been offset perfectly with the differences generated by the hedged item.

The most significant amounts in net exchange differences during 2011 correspond to the negative impact of foreign exchange transactions, for an amount of €32.3 million, due to the unfavorable evolution of the Brazilian real U.S. Dollar exchange rate related to the U.S. Dollar denominated debt financings of our Brazilian subsidiaries.

Net exchange rate differences in 2013 for entities with non-recourse financing amounts to €-4,672 thousand (€-27,327 thousand in 2012 and €6,961 thousand in 2011).

30.3. Other net finance income and expenses

The following table sets out 'Other net finance income and expenses' in 2013, 2012 and 2011:

Other finance income	2013	2012	2011
Profits from the sale of financial assets	70	1,017	1,228
Income on financial assets	649	282	3,825
Other finance income	18,867	16,877	23,862
Changes in the fair value of the derivatives embedded in the convertible bonds and options over shares	75,614	9,214	—
Commodity derivatives gains: Cash flow hedge	154	—	—
Total	<u>95,354</u>	<u>27,390</u>	<u>28,915</u>
Other finance expenses	2013	2012	2011
Loss from sale of financial assets	(335)	—	(104)
Losses from partial repayment of the convertible notes due 2014	(12,026)	—	—
Changes in the fair value of the derivatives embedded in the convertible bonds and options over shares	—	—	(29,726)
Outsourcing of payables	(81,342)	(88,457)	(65,679)
Other financial losses	(112,342)	(76,513)	(84,571)
Commodity derivatives losses: non hedge	(9,837)	(20,428)	(19,142)
Total	<u>(215,882)</u>	<u>(185,398)</u>	<u>(199,222)</u>
Other net finance income/expenses	<u>(120,528)</u>	<u>(158,008)</u>	<u>(170,307)</u>

For the year ended December 31, 2013 the heading 'Other finance income' has increased when compared to the previous year, mainly due to the change in fair value of embedded derivatives of the convertible bonds, net of change in fair value of the call options over Abengoa's own share, which hedge the embedded derivatives partially, amounting to a net gain of €75,614 thousand, see Note 20.3 (€9,214 thousand for the year ended December 31, 2012).

The heading 'Other finance expenses' has increased for the year ended December 31, 2013 compared to the previous year mainly due to losses from partial repayment of the convertible notes due in 2014 (see Note 20.3), the increase in other financial losses due to a higher volume of uncollectible financial accounts with related parties, according to the current situation of negotiations with them in developing projects in Latin America; and the impairment of financial investments associated with thermosolar projects in the USA, partially offset by lower costs of outsourcing supplier payments and lower commodity derivatives losses corresponding to the interruption of the hedging relationship, when the transaction hedged is no longer expected to occur. Additionally, 'Other finance losses' include finance expenses mainly related to financial guarantees and letters of credit, to wire transfers and other bank fees, losses on available for sale financial assets and other minor finance expenses.

In the year ended December 31, 2012 the heading 'Other finance income' mainly includes the change in fair value of embedded derivatives of the convertible bonds, net of change in fair value of the call options over Abengoa's own share, which hedge the embedded derivatives partially, amounting to a net gain of €9,214 thousand (see Note 20.3). The remaining balance of 'Other finance income' corresponds mainly to interests from deposits and cash and cash equivalents related to our outsourcing of trade payables (see Note 25.3), which have remained stable period over period.

In the year ended December 31, 2012 in the heading 'Other finance expenses', expenses related to outsourcing of payables have increased with respect to a larger volume of payables outsourced during the period the prior year. Commodity derivatives losses correspond to the interruption of the hedging relationship, when the transaction hedged is no longer expected to occur. Additionally, 'Other finance losses' include finance expenses mainly related to financial guarantees and letters of credit, to wire transfers and other bank fees, losses on available for sale financial assets and other minor finance expenses.

In the year 2011, total 'Other finance income' decreased mainly due to the changes in fair value of derivatives embedded in convertible notes of Abengoa with regards to previous periods and to changes in the fair value of options over the shares of Abengoa (basically due to the decrease in the price of the shares of Abengoa, which is a principal factor in the valuation of derivatives embedded in the options) for a net sum of €30 million in losses.

'Other finance expense' increased in 2011 due to a larger expense related to the outsourcing of payables caused by a larger volume of payables outsourced during the year.

The net of 'Other incomes and financial expenses' for Non-recourse financing project companies is €-47,671 thousand (€-33,607 thousand in 2012 and €-59,455 thousand in 2011).

30.4. Non-monetary items of derivative financial instruments

The table below provides a breakdown of the line item 'Fair value gains on derivative financial instruments' included in the Consolidated Cash Flow Statement for the years 2013, 2012 and 2011:

Fair value gains on derivative financial instruments	2013	2012	2011
Change in fair value of the embedded derivative of convertible debt and shares options	75,614	9,214	(29,726)
Non-cash profit/(losses) from cash flow hedges	20,617	(30,330)	(45,520)
Non-cash profit/(losses) from derivatives — non-hedge accounting	(15,482)	(44,243)	3,277
Other non-cash gains/losses on derivative instruments	763	(9,778)	(21,327)
Fair value gains (losses) on derivative financial instruments (non cash items)	81,512	(75,137)	(93,296)
Cash gains (losses) on derivative financial instruments (monetary effect)	(166,899)	(43,277)	(38,223)
Total fair value gains/(loss) on derivative financial instruments (Notes 30.1 & 30.3)	(85,387)	(118,414)	(131,519)

Note 31. — Income tax

Details regarding income tax for the years 2013, 2012 and 2011 are as follows:

<u>Item</u>	<u>2013</u>	<u>2012</u>	<u>2011</u>
Current tax	(28,607)	(22,853)	(13,451)
Deferred tax	72,540	194,766	10,263
Total income tax benefit/(expense)	<u>43,933</u>	<u>171,913</u>	<u>(3,188)</u>

The reconciliation between the theoretical income tax resulting from applying statutory tax rate in Spain to income before income tax and the actual income tax expense recognized in the Consolidated Income Statement for the years 2013, 2012 and 2011 is as follows:

	<u>2013</u>	<u>2012</u>	<u>2011</u>
Consolidated profit before taxes	66,986	(110,436)	269,593
Regulatory tax rate	30%	30%	30%
Corporate income tax at regulatory tax rate	<u>(20,096)</u>	<u>33,131</u>	<u>(80,878)</u>
Income tax of associates, net	(1,549)	(222)	1,269
Differences in foreign tax rates	9,004	12,099	4,034
Incentives, deductions and tax losses carryforwards	83,362	61,181	76,204
Non taxable gains	—	25,573	—
Other non-taxable income/(expense)	(26,788)	40,151	(3,817)
Corporate income tax	<u>43,933</u>	<u>171,913</u>	<u>(3,188)</u>

Differences between theoretical tax and actual tax expense arise mainly from:

- Companies based in jurisdictions with statutory tax rates different from Spanish statutory tax rate.
- Application in Spain of tax incentive for the transfer of use of intangible assets under Article 23 of the Revised Text of the Spanish Income Tax Act and application also in Spain of the tax incentive which exempts any profits generated abroad for international projects involving the export of goods and services from Spain. Generation of tax deductions, mainly in Spain, among which we can outline R&D&I deductions, double taxation deductions, deductions on training expenses and deductions on donation expenses. In addition, the Company recorded deferred tax assets for tax loss carryforwards generated in past years in other tax jurisdictions.
- In 2012, the Company has recorded no taxable gains corresponding to the gain obtained in the business combination achieved in stages over Rioglass Group.
- The heading 'Other non-taxable income/(expense)' includes, among others, the regularization of the tax expense of the previous year as well as certain permanent differences arising in other jurisdictions as a consequence of the adjustments in the valuation of assets and liabilities.

Note 32. — Earnings per share

As explained in Note 18, on September 30, 2012, the General Shareholders' Meeting approved a capital increase in class B shares, charged to our freely available reserves, which were distributed for no consideration to all existing shareholders on the basis of four (4) class B shares for each class A share or class B

share which they hold. Therefore, no dilution or further concentration with respect to our share capital occurred.

According to IAS 33, when ordinary shares are issued to existing shareholders for no additional consideration, the transaction is equivalent to a share split. In this case, the number of ordinary shares outstanding before the event is adjusted for the proportionate change in the number of ordinary shares outstanding as if the event had occurred at the beginning of the earliest period presented.

In addition, the average number of shares outstanding in 2013 has been calculated taking into account the capital increase carried out in October 2013 (see Note 18).

On the other hand, the weighted average number of shares for the year ended on December 31, 2011 is different from the number of shares for the year ended on December 31, 2012 because the latter incorporates during the entire period the capital increase subscribed by FRC in November 2011, as described in Note 18.

32.1. Basic earnings per share

Basic earnings per share are calculated by dividing the profit attributable to equity holders of the company by the weighted average number of ordinary shares outstanding during the period.

<u>Item</u>	<u>2013</u>	<u>2012</u>	<u>2011</u>
Profit from continuing operations attributable to equity holders of the company	102,040	24,172	247,837
Profit from discontinuing operations attributable to equity holders of the company	(595)	31,198	126,308
Average number of ordinary shares outstanding (thousands)	<u>595,905</u>	<u>538,063</u>	<u>466,634</u>
Earnings per share from continuing operations (€ per share) . . .	0.17	0.04	0.53
Earnings per share from discontinuing operations (€ per share) . .	—	0.06	0.27
Earnings per share from profit for the year (€ per share) . .	<u>0.17</u>	<u>0.10</u>	<u>0.80</u>

32.2. Diluted earnings per share

To calculate the diluted earnings per share, the average weighted number of ordinary shares issued and outstanding is adjusted to reflect the conversion of all the potential diluting ordinary shares.

The potential diluting ordinary shares held by the group correspond to the warrants on Class B shares issued in November 2011. The assumption is that all warrants will be exercised and a calculation is made to determine the number of shares that may have been acquired at fair value based on the monetary value of the subscription rights of the warrants still to be exercised. The difference between

the number of shares issued assuming the exercise of the warrants, and the number of shares calculated based on the above, is included in the calculation of the income per diluted share.

	<u>2013</u>	<u>2012</u>	<u>2011</u>
Profit for the year			
—Profit from continuing operations attributable to equity holders of the company	102,040	24,172	247,837
—Profit from discontinuing operations attributable to equity holders of the company	(595)	31,198	126,308
—Adjustments to attributable profit	—	—	—
Profit used to determine the diluted earnings per share	<u>101,445</u>	<u>55,370</u>	<u>374,145</u>
Average weighted number of ordinary shares outstanding (thousands)	595,905	538,063	466,634
—Warrants adjustments (average weighted number of shares in outstanding since issue)	19,995	20,021	3,348
Average weighted number of ordinary shares affecting the diluted earnings per share (thousands)	<u>615,900</u>	<u>558,084</u>	<u>469,982</u>
Diluted earnings per share from continuing operations (€ per share)	0.16	0.04	0.53
Diluted earnings per share from discontinuing operations (€ per share)	—	0.06	0.27
Diluted earnings per share to the profit for the year (€ per share)	<u>0.16</u>	<u>0.10</u>	<u>0.80</u>

Note 33. — Other information

33.1. Average number of employees

The average number of employees classified by category during 2013, 2012 and 2011 was:

Categories	Average number of employees in 2013			Average number of employees in 2012			Average number of employees in 2011		
	Female	Male	% Total	Female	Male	% Total	Female	Male	% Total
Directors	73	536	2.3	76	583	2.5	86	594	2.7
Management	426	1,512	7.2	391	1,724	7.9	382	1,979	9.4
Engineers	1,278	3,268	17.0	1,108	2,485	13.5	1,124	2,911	16.2
Assistants and professionals	1,128	1,507	9.8	1,255	1,904	11.9	1,353	2,039	13.6
Operators	925	15,648	61.8	975	15,640	62.3	919	13,218	56.5
Interns	230	287	1.9	214	299	1.9	149	250	1.6
Total	<u>4,060</u>	<u>22,758</u>	<u>100</u>	<u>4,019</u>	<u>22,635</u>	<u>100</u>	<u>4,013</u>	<u>20,991</u>	<u>100</u>

The average number of employees is 27% in Spain (29% in 2012 and 34% in 2011) and 73% abroad (71% in 2012 and 66% in 2011).

The average number of employees during the year with disabilities above or equal to 33% is 107 (115 in 2012 and 108 in 2011).

The total number of people employed at the end of 2013 was 24,748 (26,402 in 2012).

33.2. Related parties

The account held by Abengoa with Inversión Corporativa I.C., S.A., as of year-end 2013 and 2012 has a nil balance.

Dividends distributed to related parties during 2013 amounted to €17,182 thousand (€17,212 thousand in 2012 and €10,140 thousand in 2011).

During 2013 the only transactions associated with related parties were the following:

- Share lending agreement signed by Abengoa with Inversión Corporativa IC, S.A. for a total of 11,047,468 Class B shares in order to improve the liquidity in lending these shares to investors of the convertible bonds maturing in 2019. This loan was repaid in July 2013 with a consideration of €670 thousand of which €52 thousand corresponds to interest and the rest corresponds to dividends.
- Service provision agreement signed between Centro Tecnológico Palmas Altas, S.A. and Ms. Blanca de Porres Guardiola, which involved a consideration of €72 thousand.

As indicated in Note 18.1, Inversión Corporativa is Abengoa's main shareholder, and issues its own separate Consolidated Financial Statements.

These operations were subject to verification by the Abengoa Audit Committee and the consideration paid for the different transactions has been determined by third parties.

33.3. Employee remuneration and other benefits

Directors are remunerated as established in article 39 of the Bylaws. The remuneration of Directors is made up of a fixed amount as agreed upon at the General Shareholders' Meeting, and is not necessarily equal for all directors. Additionally, they may participate in profit sharing programs, for a percentage between 5% and 10% (maximum) of the net income of the Company after the declaration of the dividends for the year. Travel expenses related to work undertaken by the board are reimbursed to Directors.

Salary (both fixed and variable) and allowances paid to the members of the Board of Abengoa, S.A. in 2013 were €15,421 thousand (€13,887 thousand in 2012 and €13,237 thousand in 2011).

ABENGOA
Consolidated financial statements

Detail on individual salaries and benefits in 2013 paid to the Board of Directors are as follows (in thousands of Euros):

Note (1): Represented by Mr. José B. Terceiro Lomba

Note (2) To 07.15.11

Note (3) From 10.24.11

Additionally, in 2013 overall remuneration for key management of the Company (Senior Management which are not executive directors), including both fixed and variable components, amounted to €14,656 thousand (€13,574 thousand in 2012 and €7,822 thousand in 2011).

No advanced payments or credits are granted to members of the Board, nor are any guarantees or obligations granted in their favor.

As of December 31, 2013 there existed € 29,789 thousand in non-current personnel compensation obligations (€70,599 thousand in 2012 and €64,154 thousand in 2011).

- 33.4. On May 3, 2012 Mrs. Mercedes Gracia Díez was appointed as president of the Audit Committee.
- 33.5. In compliance with Royal Decree 1/2010 of July 2, that approves the Capital Corporations Law, the Company informs that no member of the Board of Directors of Abengoa, S.A. and, to its knowledge, none of the individuals related parties as referred to by article 231 in the Capital Corporations Law Act maintains any direct to indirect share in the capital of companies with the same, analogous or complementary kind of activity that the parent company's corporate purpose, nor has any position in any company with the same, analogous or complementary kind of activity that the parent company's corporate purpose. In addition, no member of the Board of Directors has accomplished any activity with the same, analogous or complementary kind of activity that the parent company's corporate purpose.

ABENGOA**Consolidated financial statements**

As of December 31, 2013, members of the Board of Directors who are in turn directors or management in other subsidiaries included in the consolidation group are:

Name	Company	Charge
Prof. José B. Terceiro	Bioetanol Galicia S.A	President
D. Javier Benjumea Llorente	Abengoa Bioenergía, S.A.	President
Dña. María Teresa Benjumea Llorente	Sociedad Inversora en Energía y Medio Ambiente, S.A.	Member of Board of Directors
D. Manuel Sánchez Ortega	Abengoa Bioenergía, S.A.	Member of Board of Directors

In accordance with the record of significant holding in the Company, and as required by the 'Internal Rules and Regulations for Conduct involving Stock Exchange Matters', the shares and the holding percentages of the Company Directors as of December 31, 2013 are:

	No. of direct class A shares	No. of indirect class A shares	No. of direct class B shares	No. of indirect class B shares	% Total
Felipe Benjumea Llorente . . .	—	—	414,170	4,300,905	0.0513
Aplicaciones Digitales S.L. . .	—	—	4,737,756	—	0.0516
Manuel Sánchez Ortega	—	—	913,167	—	0.0099
José Joaquín Abaurre Llorente	1,900	—	7,600	—	0.0022
José Luis Aya Abaurre	65,609	—	262,438	—	0.0743
M ^a Teresa Benjumea Llorente	12,390	—	49,560	—	0.0140
Javier Benjumea Llorente . . .	3,888	—	15,552	—	0.0044
José Borrell Fontelles	—	—	41,695	—	0.0005
Mercedes Gracia Díez	—	—	2,500	—	—
Ricardo Martínez Rico	—	—	2,565	—	—
Claudio Santiago Ponsa	200	—	800	—	0.0002
Ignacio Solís Guardiola	17,000	—	68,000	—	0.0192
Fernando Solís Martínez-Campos	50,832	34,440	203,328	137,760	0.0965
Carlos Sundheim Losada	—	—	247,118	—	0.0027
Alicia Velarde Valiente	400	—	1,600	—	0.0005

Throughout out 2013 and 2012 there was no evidence of any direct or indirect conflict of interest situation, in accordance with what is envisaged in Article 229 of the Capital Corporation Law.

33.6. Audit fees

The fees and costs obtained by Deloitte, S.L. (2013 and 2012), PricewaterhouseCoopers Auditors, S.L. (2011) and other auditors are the following:

	2013			2012			2011		
	Deloitte	Other Auditors	Total	Deloitte	Other Auditors	Total	PwC	Other Auditors	Total
(€ in thousands)									
Audit Fees	3,541	270	3,811	3,622	549	4,171	3,892	182	4,074
Other verification services	245	1	246	305	1	306	439	43	482
Tax Fees	636	3,934	4,570	1,488 ^(*)	2,674	4,162	247	1,117	1,364
Other audit complementary services	886	246	1,132	544	840	1,384	908	—	908
Other services	680	2,137	2,817	219	2,272	2,491	1,202	2,425	3,627
Total	5,988	6,588	12,576	6,178	6,336	12,514	6,688	3,767	10,455

(*) From this amount, €845 thousand correspond to tax advisory services provided by Deloitte, S.L. prior to their appointment as Group auditors.

The amounts included in the table above show all the fees related to the services provided by the principal auditor (Deloitte, S.L.) during 2013 and 2012 and by the principal auditor (PricewaterhouseCoopers Auditors, S.L.) during 2011.

33.7. Environmental information

The principles of the environmental policies of Abengoa are based on compliance with the current legal regulations applicable, preventing or minimizing damaging or negative environmental consequences, reducing the consumption of energy and natural resources, and achieving ongoing improvement in environmental conduct.

In response to this commitment to the sustainable use of energy and natural resources, Abengoa, in its Management Rules and Guidelines for the entire Group, explicitly establishes the obligation to implement and certify environmental management systems in accordance with the ISO 14001 International Standard.

Consequently, by year-end 2013, the percentage of Companies with Environment Management Systems certified according to the ISO 14001 Standard per sales volume is 92.92% (91.98% in 2012).

The table below lists the percentage of distribution of the Companies with Certified Environmental Management Systems, broken down by business unit:

Business unit	ISO 14001-certified companies (% of revenue)
Engineering and Construction	96.35%
Industrial Production	89.46%
Concession-type Infrastructure	27.20%

33.8. Restricted net assets

Abengoa considers that its traditional engineering activity represents no more than a valuable tool through which it can construct a more sustainable world, and it applies this philosophy in all its

activities such that from concession type infrastructures, industrial production and engineering and construction, Abengoa applies innovative technology solutions for sustainable development.

Certain of our consolidated subsidiaries are restricted from remitting certain funds to us in the form of dividends or loans by a variety of regulations, contractual or statutory requirements. These restrictions are related to debt covenants that require the maintenance of debt coverage ratios and net assets ratios which restrict the amount of cash that can be paid to the parent. Also for certain project finance entities that are in construction, no dividends may be distributed until activity commences or, after construction completion, be subject to cash waterfall provision. At December 31, 2013, the accumulated amount of the restrictions for the whole restricted term of these affiliates was €1,506 million. Even though the Company currently does not require any such dividends, loans or advances for working capital and other funding purposes, the Company may in the future require additional cash resources from the subsidiaries due to changes in business conditions, to fund future acquisitions and development, or merely to declare and pay dividends to make distributions to shareholders. Despite these restrictions, subsidiaries in operations have been distributing dividends up to the amount allowed by covenant ratios.

The Company performed a test on the restricted net assets of consolidated subsidiaries in accordance with Securities and Exchange Commission Regulation S X Rule 4 08 (e) (3) 'General Notes to Financial Statements' and rule 5 04 (c) 'what schedules are to be filed' and concluded the restricted net assets exceed 25% of the consolidated net assets of the Company as of December 31, 2013. Therefore the separate condensed financial statements of the Company should be presented (see Appendix XXIII for details).

At December 31, 2013 the amount of consolidated retained earnings which represents undistributed earnings of 50 percent or less owned entities is €6,948 thousand.

33.9. Subsequent events

After the end of the year 2013 and following the so-called "regulatory reform of the electric sector", the Ministry of Industry, Energy and Tourism submitted to the National Competition and Markets Commission a proposal of Ministerial Order establishing a set of compensation parameters regarding energy-generation facilities from renewable sources, cogeneration and waste. Among other parameters, there are those related to benchmarks of investment and operation of thermosolar facilities (both solar power tower and parabolic-cylinder technology), photovoltaic and cogeneration plants of the Group. This new regulatory development, since it represents an additional evidence regarding some conditions that existed prior to the closing date of the financial year and, in particular, allows us to estimate future cash flows from the abovementioned facilities, has been taken into account when preparing these Financial Statements.

On February 28, 2014, the Company confidentially submitted a draft registration statement on Form F-1 to the United States Securities and Exchange Commission (SEC) relating to the proposed initial public offering of the common stock of a yieldco vehicle. The number of shares of common stock to be sold and the price range for the proposed offering have not yet been determined. The initial public offering is expected to commence after the SEC completes its review process, subject to market and other conditions.

Since December 31, 2013, apart from what is detailed above, no other events have occurred that might significantly influence the information reflected in the Consolidated Financial Statements, nor has there been any event of significance to the Group as a whole.

Solnova Electricidad Cuatro, S.A.	Seville (ES)	(6)	Operational
Solnova Electricidad Cinco, S.A.	Seville (ES)	(6)	Construction phase
Solnova Electricidad, S.A.	Seville (ES)	(6)	Operational
Solnova Electricidad Dos, S.A.	Seville (ES)	(6)	Construction phase
Solnova Electricidad Tres, S.A.	Seville (ES)	(6)	Operational
Solnova Electricidad Séis, S.A.	Seville (ES)	(6)	Construction phase
Transmisora Baquedano, S.A.	Santiago de Chile (CL)	(9)	Construction phase
Transmisora Mejillones S.A.	Santiago de Chile (CL)	(9)	Construction phase

(*) Electricity operations as described in Note 2.29 in accordance with the provisions of Law 54/1997.

- (1) Production under Special Regime: Cogeneration. Primary energy type: Fuel.
- (2) Production under Special Regime: Wind. Primary energy type: Wind.
- (3) Includes production under Special Regime: Cogeneration. Primary energy type: Natural gas.
- (4) Production under Special Regime: Cogeneration. Primary energy type: Natural gas.
- (5) Production under Special Regime: Solar Photovoltaic. Primary energy type: Solar light.
- (6) Production under Special Regime: Solar. Primary energy type: Solar light.
- (7) Production under Special Regime: Hydraulic. Primary energy type: Water.
- (8) Production under Special Regime: Other. Primary energy type: Industrial waste (used oils).
- (9) Transport.
- (10) Electricity production: Based on hydrogen. Primary type of energy: Hydrogen.

Abengoa Tax Group Number 02/97

Company Name	Tax Address	Shareholding
Sociedad Inversora Lineas de Brasil, S.L. (ETVE)	Seville (ES)	Asa Iberoamérica, S.L.
Sol3G	Barcelona (ES)	Abengoa Solar, S.A.
Solaben Electricidad Uno	Caceres (ES)	Extremadura Equity Investments SárI.
Solaben Electricidad Seis	Badajoz (ES)	Extremadura Equity Investments SárI.
Solaben Electricidad Ocho, S.A.	Caceres (ES)	Abengoa Solar España, S.A./Abengoa Solar New Technologies, S.A.
Solaben Electricidad Nueve, S.A.	Badajoz (ES)	Abengoa Solar España, S.A./Abengoa Solar NT, S.A.
Solaben Electricidad Diez, S.A.	Caceres (ES)	Abengoa Solar España, S.A./Abengoa Solar NT, S.A.
Solaben Electricidad Once, S.A.	Badajoz (ES)	Abengoa Solar España, S.A./Abengoa Solar NT, S.A.
Solaben Electricidad Doce, S.A.	Badajoz (ES)	Abengoa Solar España, S.A./Abengoa Solar NT, S.A.
Solaben Electricidad Quince, S.A.	Badajoz (ES)	Abengoa Solar España, S.A./Abengoa Solar NT, S.A.
Solar de Receptores de Andalucía, S.A.	Seville (ES)	Abengoa Solar, S.A./Abengoa Solar NT, S.A.
Solar Processes, S.A.	Seville (ES)	Abengoa Solar España, S.A./Instalaciones Inabensa, S.A.
Solargate Electricidad Dos, S.A.	Seville (ES)	Abengoa Solar España, S.A./Abengoa Solar NT, S.A.
Solargate Electricidad Tres, S.A.	Seville (ES)	Abengoa Solar España, S.A./Abengoa Solar NT, S.A.
Solargate Electricidad Cuatro, S.A.	Seville (ES)	Abengoa Solar España, S.A./Abengoa Solar NT, S.A.
Solargate Electricidad Cinco, S.A.	Seville (ES)	Abengoa Solar España, S.A./Abengoa Solar NT, S.A.
Solnova Electricidad Cinco, S.A.	Seville (ES)	Abengoa Solar España, S.A./Abengoa Solar, S.A.
Solnova Electricidad, S.A.	Seville (ES)	Solnova Solar Inversiones, S.A./Instalaciones Inabensa, S.A.
Solnova Electricidad Dos, S.A.	Seville (ES)	Abengoa Solar España, S.A./Abengoa Solar, S.A.
Solnova Electricidad Tres, S.A.	Seville (ES)	Solnova Solar Inversiones, S.A./Instalaciones Inabensa, S.A.
Solnova Electricidad Cuatro, S.A.	Seville (ES)	Solnova Solar Inversiones, S.A./Instalaciones Inabensa, S.A.
Solnova Solar Inversiones, S.A.	Seville (ES)	Abengoa Solar España, S.A.
Solúcar Andalucía FV1, S.A.	Seville (ES)	Abengoa Solar España, S.A./Abengoa Solar NT, S.A.
Solúcar Andalucía FV2, S.A.	Seville (ES)	Abengoa Solar España, S.A./Abengoa Solar NT, S.A.
Solúcar Castilla FV1, S.A.	Seville (ES)	Abengoa Solar España, S.A./Abengoa Solar NT, S.A.
Solúcar Castilla FV2, S.A.	Seville (ES)	Abengoa Solar España, S.A./Abengoa Solar NT, S.A.
Solugas Energía S.A.	Seville (ES)	Abengoa Solar NT, S.A./Abengoa Solar S.A.
South Africa PV Investments, S.L.	Seville (ES)	Abengoa Solar Internacional, S.A./Abengoa Solar Ventures, S.A.
South Africa Solar Investments, S.L.	Seville (ES)	Abengoa Solar Internacional, S.A.
South Africa Solar Ventures, S.L.	Seville (ES)	Abengoa Solar Internacional, S.A./Abengoa Solar Ventures, S.A.
Telvent Implantación de Sistemas S.L.	Madrid (ES)	Simosa I.T., S.A.
Teyma, Gestión de Contratos de Construcción e Ingeniería, S.A.	Seville (ES)	Abeinsa Ingeniería y Construcción Industrial, S.A.
Zero Emissions Technologies, S.A.	Seville (ES)	Abeinsa Ingeniería y Construcción Industrial, S.A./Abengoa Hidrógeno, S.A.
Zeroemissions Carbon Trust, S.A.	Seville (ES)	Zeroemissions Technologies, S.A./Abeinsa Ingeniería y Construcción Industrial, S.A.

(*) Electricity operations as described in Note 2.29 in accordance with the provisions of Law 54/1997.

- (1) Production under Special Regime: Cogeneration. Primary energy type: Fuel.
- (2) Production under Special Regime: Wind. Primary energy type: Wind.
- (3) Includes production under Special Regime: Cogeneration. Primary energy type: Natural gas.
- (4) Production under Special Regime: Cogeneration. Primary energy type: Natural gas.
- (5) Production under Special Regime: Solar Photovoltaic. Primary energy type: Solar light.
- (6) Production under Special Regime: Solar. Primary energy type: Solar light.
- (7) Production under Special Regime: Hydraulic. Primary energy type: Water.
- (8) Production under Special Regime: Other. Primary energy type: Industrial waste (used oils).
- (9) Transport.
- (10) Electricity production: Based on hydrogen. Primary type of energy: Hydrogen.

(*) Companies incorporated or acquired and consolidated for the first time in the year.

(1) Operating segment activities area: Engineering and Construction.

(2) Operating segment activities area: Transmission.

(3) Operating segment activities area: Solar.

Appendices
Appendix XIX

**Temporary joint ventures included in the 2011 consolidation perimeter
using the proportional integration method (Continuation)**

- (4) Operating segment activities area: Water.
- (5) Operating segment activities area: Cogeneration and others.
- (6) Operating segment activities area: Bioenergy.
- (7) Operating segment activities area: Recycling .
- (8) Operating segment activities area: Others.
- A Audited by PricewaterhouseCoopers Auditores.
- B Audited by Deloitte (for legal purposes).
- C Audited by Auditoria y Consulta (for legal purposes).
- D Audited by others auditors (for legal purposes).

Appendix XX

Companies with electricity operations included in the 2011 consolidation perimeter
(Continuation)

<u>Company Name</u>	<u>Registered Address</u>	<u>Activity (*)</u>	<u>Comments</u>
Solargate Electricidad Tres, S.A.	Seville (ES)	6	Construction phase
Solargate Electricidad Cuatro, S.A.	Seville (ES)	6	Construction phase
Solargate Electricidad Cinco, S.A.	Seville (ES)	6	Construction phase
Solnova Electricidad, S.A.AZ-50	Seville (ES)	6	Operational
Solnova Electricidad Uno, S.A.	Seville (ES)	6	Operational
Solnova Electricidad Dos, S.A.	Seville (ES)	6	Construction phase
Solnova Electricidad Tres, S.A.	Seville (ES)	6	Operational
Solnova Electricidad Cuatro, S.A.	Seville (ES)	6	Operational
Solnova Electricidad Cinco, S.A.	Seville (ES)	6	Construction phase
Solnova Electricidad Seis, S.A.	Seville (ES)	6	Construction phase
Solúcar Andalucía FV1, S.A	Seville (ES)	5	Construction phase
Solúcar Andalucía FV2, S.A	Seville (ES)	5	Construction phase
Solúcar Castilla FV1, S.A	Seville (ES)	5	Construction phase
Solúcar Castilla FV2, S.A	Seville (ES)	5	Construction phase
Son Rivieren (Pty) Limited	Gauteng (ZA)	6	Construction phase
STE-Sul Transmissora de Energia, Ltda.	R. de Janeiro (BR)	9	Operational

(*) Electricity operations as described in Note 2.29 in accordance with the provisions of Law 54/1997.

- (1) Production under Special Regime: Cogeneration. Primary energy type: Fuel.
- (2) Production under Special Regime: Wind. Primary energy type: Wind.
- (3) Includes production under Special Regime: Cogeneration. Primary energy type: Natural gas.
- (4) Production under Special Regime: Cogeneration. Primary energy type: Natural gas.
- (5) Production under Special Regime: Solar Photovoltaic. Primary energy type: Solar light.
- (6) Production under Special Regime: Solar Termosolar. Primary energy type: Solar light.
- (7) Production under Special Regime: Hydraulic. Primary energy type: Water.
- (8) Production under Special Regime: Other. Primary energy type: Industrial waste (used oils).
- (9) Transport.
- (10) Electricity production: Based on hydrogen. Primary type of energy: Hydrogen.

Appendix XXI

Companies taxed under the special regime for company groups at 12.31.11

Abengoa Tax Group Number 02/97		
Company Name	Tax Address	Shareholding
Abengoa S.A.	Seville (ES)	Parent Company
Abeinsa Ingeniería y Construcción Industrial, S.A.	Seville (ES)	Abengoa, S.A./Siema
Abencor Suministros S.A.	Seville (ES)	Negocios Industriales y Comerciales, S.A./Abeinsa Ingeniería y Construcción Industrial, S.A.
Abener Argelia, S.L.	Seville (ES)	Abener Energía, S.A./Abeinsa Ingeniería y Construcción Industrial, S.A.
Abener Energía, S.A.	Seville (ES)	Abeinsa Ingeniería y Construcción Industrial, S.A.
Abener Inversiones, S.L.	Seville (ES)	Abener Energía, S.A./Negocios Industriales y Comerciales, S.A.
Abengoa Bioenergía Biodiesel S.A.	Seville (ES)	Abengoa Bioenergía, S.A./Ecoagrícola, S.A.
Abengoa Bioenergía Inversiones, S.A.	Seville (ES)	Abengoa Bioenergía, S.A./Abengoa Bioenergía Nuevas Tecnologías, S.A.
Abengoa Bioenergía Nuevas Tecnologías, S.A. ABNT	Seville (ES)	Abengoa Bioenergía, S.L./Instalaciones Inabensa, S.A.
Abengoa Bioenergía San Roque, S.A.	Cádiz (ES)	Ecoagrícola, S.A./Abengoa Bioenergía, S.A.
Abengoa Bioenergía, S.A.	Seville (ES)	Abengoa, S.A./Sociedad Inversora Energía y Medio Ambiente, S.A.
Abengoa Finance	Seville (ES)	Abengoa, S.A.
Abengoa Hidrógeno, S.A.	Seville (ES)	Abeinsa Ingeniería y Construcción Industrial, S.A./Instalaciones Inabensa, S.A.
Abengoa Research, S.L.	Seville (ES)	Abeinsa, Ingeniería y Construcción Industrial, S.A.
Abengoa Solar España, S.A.	Seville (ES)	Abengoa Solar, S.A./Abengoa Solar PV, S.A.
Abengoa Solar Extremadura, S.A.	Seville (ES)	Abengoa Solar España, S.A./Abengoa Solar New Technologies, S.A.
Abengoa Solar Internacional, S.A.	Seville (ES)	Abengoa Solar, S.A.
Abengoa Solar New Technologies, S.A.	Seville (ES)	Abengoa Solar, S.A.
Abengoa Solar Power, S.A.	Seville (ES)	Abengoa Solar, S.A./Abengoa Solar PV, S.A.
Abengoa Solar PV, S.A.	Seville (ES)	Abengoa Solar, S.A.
Abengoa Solar S.A.	Seville (ES)	Abengoa, S.A./Abengoa Solar España, S.A.
Abengoa Solar Ventures S.A.	Seville (ES)	Abengoa Solar, S.A.
Abentel Telecomunicaciones, S.A.	Seville (ES)	Abener Energía, S.A./Abeinsa Ingeniería y Construcción Industrial, S.A.
Aleduca, S.L.	Madrid (ES)	Abengoa Solar España, S.A./Abengoa Solar, S.A.
Aprofursa, Aprovechamientos Energéticos Furesa, S.A.	Murcia (ES)	Abener Inversiones, S.L.
Asa Iberoamérica, S.L.	Seville (ES)	Siema/Abeinsa Ingeniería y Construcción Industrial, S.A.
Aznalcóllar Solar, S.A.	Seville (ES)	Abengoa Solar España, S.A./Abengoa Solar, S.A.
Biocarburantes de Castilla y León, S.A.	Salamanca (ES)	Abengoa Bioenergía, S.A./Ecoagrícola, S.A.
Bioeléctrica Jienense, S.A.	Seville (ES)	Abener Inversiones, S.L.
Bioetanol Galicia, S.A.	A Coruña (ES)	Abengoa Bioenergía, S.A.
Captación Solar, S.A.	Seville (ES)	Abener Inversiones, S.L./Abener Energía, S.A.
Captasol Fotovoltaica 1, S.L.	Seville (ES)	Abengoa Solar España, S.A./Casaquemada Fotovoltaica, S.L.
Captasol Fotovoltaica 10, S.L.	Seville (ES)	Abengoa Solar España, S.A./Casaquemada Fotovoltaica, S.L.
Captasol Fotovoltaica 11, S.L.	Seville (ES)	Abengoa Solar España, S.A./Casaquemada Fotovoltaica, S.L.

Notes to the Condensed Financial Statements

Schedule I has been provided pursuant to the requirements of Rule 12-04(a) and 5-04-(c) of Regulation S-X, of the US Securities and Exchange Commission (SEC) which require condensed financial information as to the financial position, change in financial position, results of operations of a parent company, other comprehensive income statement and cash flow statement as of the same dates and for the same periods for which audited consolidated financial statements have been presented when the restricted net assets of consolidated subsidiaries exceed 25 percent of consolidated net assets as of the end of the most recently completed fiscal year.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with International Financial Reporting Standards have been condensed or omitted. The footnote disclosures contain supplemental information only and, as such, these statements should be read in conjunction with the notes to the accompanying consolidated financial statements.

Basis of Presentation.

- a) The presentation of the parent company stands alone condensed financial statement has been prepared using the same accounting policies as set out in the accompanying consolidated financial statements except that, the Company records its investment in subsidiaries under the cost method of accounting and that financial income from credits to companies in the group are recorded under Income from services, given that the company is a holding and this type of service is part of its primary activity. Such investments are presented on the statements of financial position as "Investment in and advances to affiliates" at cost less any identified impairment loss.
- b) As of December 31, 2013 and 2012 there were no material contingencies, significant provisions of long-term obligations, mandatory dividend or redemption requirements of redeemable stocks or guarantees of the Company, except for those which have been separately disclosed in the Consolidated Financial Statements, if any.
- c) For years ended December 31, 2013, 2012 and 2011, cash dividends of €104,202 thousand, €104,205 thousand and €37,642 thousand were declared to the Company by its consolidated subsidiaries or associates, respectively.

Reconciliation IFRS—Abengoa

Notes to the consolidated condensed interim financial statements for the six month period ended June 30, 2014

Note 1.- General information

Abengoa, S.A. is the parent company of the Abengoa Group (referred to hereinafter as 'Abengoa', 'the Group' or 'the Company'), which at the end of the six month period ended June 30, 2014, was made up of 627 companies: the parent company itself, 582 subsidiaries, 20 associates and 24 joint ventures.

Abengoa, S.A. was incorporated in Seville, Spain on January 4, 1941 as a Limited Liability Company and was subsequently transformed into a Limited Liability Corporation ('S.A.' in Spain) on March 20, 1952. Its registered office is Campus Palmas Altas, C/ Energía Solar nº 1, 41014 Seville.

Abengoa's shares are represented by class A and B shares which are listed on the Madrid and Barcelona Stock Exchanges and on the Spanish Stock Exchange Electronic Trading System (Electronic Market). Class A shares have been listed since November 29, 1996 and class B shares since October 25, 2012. Additionally, Class B shares are also listed on the NASDAQ Global Select Market in the form of American Depositary Shares from October 29, 2013 because of the capital increase carried out in October 2013. The Company presents mandatory financial information quarterly and semiannually.

Following the initial public offering of our subsidiary Abengoa Yield (see Note 6.2), on which Abengoa currently holds a 64.28% interest, Abengoa Yield's shares are also listed in the NASDAQ Global Select Market from June 13, 2014.

Abengoa is an international company that applies innovative technology solutions for sustainability in the energy and environment sectors, generating electricity from renewable resources, converting biomass into biofuels and producing drinking water from sea water. The Company supplies engineering projects under the 'turnkey' contract modality and operates assets that generate renewable energy, produce biofuel, manage water resources, desalinate sea water and treat sewage.

Abengoa's activity and the internal and external management information are organized under the following three activities:

- **Engineering and construction:** includes our traditional engineering activities in the energy and water sectors, with more than 70 years of experience in the market and the development of thermo-solar technology. Abengoa is specialized in carrying out complex turn-key projects for thermo-solar plants, solar-gas hybrid plants, conventional generation plants, biofuels plants and water infrastructures, as well as large-scale desalination plants and transmission lines, among others.
- **Concession-type infrastructures:** groups together the company's extensive portfolio of proprietary concession assets that generate revenues governed by long term sales agreements, such as take-or-pay contracts, tariff contracts or power purchase agreements. This activity includes Abengoa Yield, the operation of electric (solar, cogeneration or wind) energy generation plants and transmission lines. These assets generate low demand risk and the Company focuses on operating them as efficiently as possible.
- **Industrial production:** covers Abengoa's businesses with a commodity component, such as biofuels and industrial waste recycling (until the sale of shareholding in Befesa Medio Ambiente, S.L.U. (Befesa), see Note 7.3). The Company holds an important leadership position in these activities in the geographical markets in which it operates.

The Consolidated Condensed Interim Financial Statements for the period ended on June 30, 2014 were formulated on August 11, 2014.

Note 2.- Basis of presentation

The Group's consolidated financial statements corresponding to the fiscal year ended December 31, 2013 were prepared by the Directors of the Company in accordance with International Financial Reporting Standards (herein, IFRS), as issued by the International Accounting Standard Board (IASB), applying the principles of consolidation, accounting policies and valuation criteria described in Note 2 of the notes to the aforementioned consolidated financial statements, so that they present the Group's equity and financial position as of December 31, 2013 and the consolidated results of its operations, the changes in the consolidated net equity and the consolidated cash flows for the financial year ending on that date.

The Group's consolidated financial statements corresponding to the 2013 financial year were approved by the General Shareholders' Meeting of the Parent Company held on April 6, 2014.

These Consolidated Condensed Interim Financial Statements are presented in accordance with IAS 34, 'Financial Reporting', as issued by the International Accounting Standard Board (IASB).

These Consolidated Condensed Interim Financial Statements have been prepared based on the accounting records of Abengoa and the subsidiary companies which are part of the Group, and include the adjustments and re-classifications necessary to achieve uniformity between the accounting and presentation criteria followed by all the companies of the Group (in all cases, in accordance with local regulations) and those applied by Abengoa, S.A. for the purpose of preparing consolidated financial statements.

In accordance with IAS 34, financial information is prepared solely in order to update the most recent annual consolidated financial statements prepared by the Group, placing emphasis on new activities, occurrences and circumstances that have taken place during the six month period ended June 30, 2014 and not duplicating the information previously published in the annual consolidated financial statements for the year ended December 31, 2013. Therefore, the Consolidated Condensed Interim Financial Statements do not include all the information that would be required in complete consolidated financial statements prepared in accordance with the International Financial Reporting Standards as issued by the IASB.

In view of the above, for an adequate understanding of the information, these Consolidated Condensed Interim Financial Statements must be read together with Abengoa's consolidated financial statements for the year ended December 31, 2013.

Given the activities in which the companies of the Group engage, their transactions are not of a cyclical or seasonal nature. For this reason, specific breakdowns are not included in these explanatory notes to the Consolidated Condensed Interim Financial Statements corresponding to the twelve-month period ending on June 30, 2014.

In determining the information to be disclosed in the notes to the Consolidated Condensed Interim Financial Statements, the Group, in accordance with IAS 34, has taken into account its materiality in relation to the Consolidated Condensed Interim Financial Statements.

The amounts included within the documents comprising the Consolidated Condensed Interim Financial Statements (Consolidated Condensed Statement of Financial Position, Consolidated Income Statement, Consolidated Statement of Comprehensive Income, Consolidated Statement of Changes in Equity, Consolidated Condensed Cash Flow Statement and notes herein) are, unless otherwise stated, all expressed in thousands of Euros (€).

Unless otherwise stated, any presented percentage of interest in subsidiaries, joint ventures (including temporary joint operations) and associates includes both direct and indirect ownership.

2.1. Application of new accounting standards

- a) Standards, interpretations and amendments effective from January 1, 2014 under IFRS-IASB, applied by the Group:
- IAS 32 (Amendment) 'Offsetting of financial assets and financial liabilities'. The IAS 32 amendment is mandatory for periods beginning on or after January 1, 2014 and is to be applied retroactively.
 - IAS 36 (Amendment) 'Recoverable Amount Disclosures for Non-Financial Assets'. The IAS 36 amendment is mandatory for periods beginning on or after January 1, 2014 IFRS-IASB.
 - IAS 39 (Amendment) 'Novation of Derivatives and Continuation of Hedge Accounting'. The IAS 39 amendment is for periods beginning on or after January 1, 2014 under IFRS-IASB.

The applications of these amendments have not had any material impact on these Consolidated Condensed Interim Financial Statements.

- IFRIC 21 (Interpretation) “Levies”. The IFRIC 21 is mandatory for periods beginning on or after January 1, 2014 under IFRS-IASB

The amendments and interpretations effective from January 1, 2014 have not had any significant impact on these Consolidated Condensed Interim Financial Statements.

b) Standards, interpretations and amendments published by the IASB that will be effective for periods after June 30, 2014:

- Annual Improvements to IFRSs 2010-2012 and 2011-2013 cycles. These improvements are mandatory for periods beginning on or after July 1, 2014 under IFRS-IASB.
- IFRS 9 ‘Financial Instruments’. This Standard will be effective from January 1, 2018 under IFRS-IASB
- IFRS 15 ‘Revenues from contracts with Customers’. IFRS 15 is applicable for periods beginning on or after 1 January 2017. Earlier application is permitted.
- IAS 16 (Amendment) ‘Property, Plant and Equipment’ and IAS 38 ‘Intangible Assets’, regarding to acceptable methods of amortization and depreciation. This amendment is mandatory for periods beginning on or after January 1, 2016 under IFRS-IASB, earlier application is permitted.
- IFRS 11 (Amendment) ‘Joint Arrangements’ This amendment is mandatory for periods beginning on or after January 1, 2016 under IFRS-IASB, earlier application is permitted.

The Group is currently in the process of evaluating the impact on the Consolidated Condensed Interim Financial Statements derived from the application of the new standards and amendments that will be effective for periods beginning after June 30, 2014.

Note 3.- Critical accounting policies

The Accounting Policies followed in these Consolidated Condensed Interim Financial Statements are consistent with those established in Abengoa’s Consolidated Financial Statements as of December 31, 2013 which are described in Note 2 to such Consolidated Financial Statements.

In Abengoa’s Consolidated Condensed Interim Financial Statements corresponding to the six month period ended June 30, 2014 estimates and assumptions have been made by the Management of the Group and the Management of the consolidated subsidiaries (and subsequently verified by their Directors), in order to quantify some of the assets, liabilities, income, expenses and commitments recorded therein.

The most critical accounting policies that involve estimations are as follows:

- Impairment of intangible assets and goodwill.
- Revenue from construction contracts.
- Concession agreements.
- Income taxes and recoverable amount of deferred tax assets.
- Derivatives and hedging.

A full description of the above mentioned critical accounting estimates and judgments is provided in Note 3 to the Abengoa’s Consolidated Financial Statements as of December 31, 2013.

Although these estimates and assumptions are made using all available facts and circumstances, it is possible that future events may require management to amend such estimates and assumptions in future periods. Changes in accounting estimates are recognized prospectively, in accordance with IAS 8 “Accounting Policies, Changes in Accounting Estimates and Errors”, in the Consolidated Income Statement of the year in which the change occurs. During the first six months of 2014, in opinion of the Directors there were no significant changes to the estimates made at the end of 2013.

Note 4.- Financial risk management

Abengoa's activities undertaken through its operating segments are exposed to various financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk, liquidity risk and capital risk.

The risk management model attempts to minimize the potential adverse impact of such risks upon the Group's financial performance. Risk is managed by the Group's Corporate Finance Department, which is responsible for identifying and evaluating financial risks in conjunction with the Group's operating segments, quantifying them by project, region and company.

Additionally, the sources of finance are diversified, in an attempt to prevent concentrations that may affect our liquidity risk.

Written internal risk management policies exist for global risk management, as well as for specific areas of risk, such as foreign exchange risk, credit risk, interest rate risk, liquidity risk, the use of hedging instruments and derivatives and the investment of cash surpluses.

In addition, there are official written management regulations regarding key controls and control procedures for each company and the implementation of these controls is monitored through internal audit procedures.

These Consolidated Condensed Interim Financial Statements do not include all financial risk management information and disclosures required for annual financial statements, and should be read together with the information included in Note 4 to Abengoa's Consolidated Financial Statements as of December 31, 2013.

Note 5.- Financial information by segment

5.1. Information by business segment

As indicated in Note 1, Abengoa's activity is grouped under the following three activities which are in turn composed of seven operating segments (eight operating segments until the sale of shareholding in Befesa, see Note 7.3).

- **Engineering and construction:** includes our traditional engineering activities in the energy and water sectors, with more than 70 years of experience in the market as well as the development of solar technology. Since the beginning of 2014, this activity comprises one operating segment Engineering and Construction (previously, the operating segment of Technology and Others was also included. Since 2014, it is included in the operating segment of Engineering and Construction, in accordance with IFRS 8 "Operating Segment"). Abengoa specializes in carrying out complex turn-key projects for thermo-solar plants, solar-gas hybrid plants, conventional generation plants, biofuels plants and water infrastructures, as well as large-scale desalination plants and transmission lines, among others. In addition, this segment includes those activities related to the development of thermo-solar technology, water management technology and innovative technology businesses such as hydrogen energy or the management of energy crops.
- **Concession-type infrastructures:** groups together the company's proprietary concession assets that generate revenues governed by long term sales agreements, such as take-or-pay contracts or power purchase agreements. This activity is included in the operating segment of Abengoa Yield (ABY), the operation of electric (solar, cogeneration or wind) energy generation plants, desalination plants and transmission lines. These assets generate low demand risk and we focus on operating them as efficiently as possible.

During June 2014, the Company listed one of its subsidiaries, Abengoa Yield plc in the US. ABY groups ten assets previously reported in different operating segments within the Concession-type infrastructures activity. As such, ABY has become a new operating segment within activity of Concessions. Abengoa currently holds a 64.3% stake in ABY.

As a result, the Concession-type infrastructures activity currently comprises five operating segments:

- Solar – Operation and maintenance of solar energy plants, mainly using thermo-solar technology.
- Transmission – Operation and maintenance of high-voltage transmission power line infrastructures.
- Water – Operation and maintenance of facilities aimed at generating, transporting, treating and managing water, including desalination and water treatment and purification plants.
- Cogeneration and other – Operation and maintenance of conventional cogeneration electricity plants.

- Abengoa Yield – Management, ownership and acquisition of renewable energy, conventional power, electric transmission lines and other concession-type revenue-generating assets. Currently Abengoa Yield owns and manages 10 concessional assets and has a right of first offer on any proposed sale from Abengoa over certain assets.
- Industrial production; covers Abengoa’s businesses with a commodity component, such as biofuels (industrial waste recycling was part of this activity until the sale of shareholding in Befesa, at the end of 2013, see Note 7.3). The company holds an important leadership position in these activities in the geographical markets in which it operates.

This activity is comprised of one operating segment:

- Biofuels – Production and development of biofuels, mainly bioethanol for transport, which uses cereals, sugar cane and oil seeds (soya, rape and palm) as raw materials.

Prior period segment financial information has been restated to conform to the new structure, according to IFRS 8 “Operating Segments”.

Abengoa’s Chief Operating Decision Maker (“CODM”) assesses the performance and assignment of resources according to the above identified segments. The CODM in Abengoa considers the revenues as a measure of the activity and the EBITDA (Earnings before interest, tax, depreciation and amortization) as measure of the performance of each segment. In order to assess performance of the business, the CODM receives reports of each reportable segment using revenues and EBITDA. Net interest expense evolution is assessed on a consolidated basis given that the majority of the corporate financing is incurred at the holding level and that most of the related assets are held at project companies which are financed through non-recourse project finance. The depreciation, amortization and impairment charges are assessed on a consolidated basis in order to analyze the evolution of net income and to determine the dividend pay-out ratio. These charges are not taken into consideration by CODM for the allocation of resources because they are non-cash charges.

The process to allocate resources by the CODM takes place prior to the award of a new project. Prior to presenting a bid, the company must ensure that the non-recourse financing for the new project has been obtained. These efforts are taken on a project by project basis. Once the project has been awarded, its evolution is monitored at a lower level and the CODM receives periodic information (revenues and EBITDA) on each operating segment’s performance.

a) The following table shows the Segment Revenues and EBITDA for the six month periods ended June 30, 2014 and 2013:

Item	Revenue		Ebitda	
	For the six months ended		For the six months ended	
	06.30.14	06.30.13	06.30.14	06.30.13
Engineering and construction				
Engineering and construction	2,068,312	2,181,529	366,127	349,918
Total	2,068,312	2,181,529	366,127	349,918
Concession-type infrastructure				
Solar	157,627	111,626	107,318	68,617
Transmission lines	30,992	24,511	20,469	15,430
Water	20,595	20,637	13,951	16,242
Cogeneration and other	12,811	28,137	2,518	5,514
Abengoa Yield	123,867	51,461	100,053	34,268
Total	345,892	236,372	244,309	140,071
Industrial production				
Biofuels	991,283	984,400	84,214	40,668
Total	991,283	984,400	84,214	40,668
Total	3,405,487	3,402,301	694,650	530,657

The reconciliation of segment EBITDA with the profit attributable to owners of the parent is as follows:

Line	For the six months ended 06.30.14	For the six months ended 06.30.13
Total segment EBITDA	694,650	530,657
Amortization and depreciation	(233,675)	(238,144)
Financial expenses net	(454,400)	(237,339)
Share in profits/ (losses) of associates	2,648	(6,471)
Income tax expense	43,240	35,156
Profit (loss) from discontinued operations, net of tax	-	(595)
Profit attributable to non-controlling interests	16,304	(15,935)
Profit attributable to the parent company	68,767	67,329

b) The long term assets and liabilities by Segment as of June 30, 2014 and December 31, 2013 are as follows:

Item	Engineering and construction	Concession-type infrastructure					Industrial production	Balance as of 06.30.14
	Eng. and const.	Solar	Trans.	Water	Cog. and other	Abengoa Yield	Biofuels	
Assets allocated								
Intangible assets	364,860	758	-	5,078	2,638	-	486,546	859,880

The criteria used to obtain the assets and liabilities per segment, are described as follows:

- With the only objective of presenting liabilities by segment, Corporate Financing signed by Abengoa, S.A. and Abengoa Finance, S.A.U. has been allocated by segments (see Note 16), since its main purpose is to finance investments in projects and in companies needed to expand businesses and lines of activity of the group.

c) Net Debt by segment as of June 30, 2014 and December 31, 2013 is as follows:

Item	Engineering and construction	Concession-type infrastructure					Industrial prod.	Balance as of 06.30.14
	Eng. and const.	Solar	Trans.	Water	Cog. and other	Abengoa Yield	Biofuels	
Bank debt and current/non-curr. bond	1,814,918	1,503,785	225,976	-	37,357	-	2,865,423	6,447,459
L-T and S-T non rec. financing	172,088	2,015,202	1,234,003	235,988	381,003	1,835,547	445,270	6,319,101
Obligat. under curr./non-curr. financial lease	15,825	-	-	-	-	-	20,741	36,566
Current financial investments	(758,986)	(147,508)	(46,378)	(14)	(650)	(195,254)	(112,627)	(1,261,417)
Cash and cash equivalents	(1,761,374)	(172,620)	(136,359)	(29,473)	(20,665)	(159,216)	(713,847)	(2,993,554)
Total net debt (cash)	(517,529)	3,198,859	1,277,242	206,501	397,045	1,481,077	2,504,960	8,548,155

Item	Engineering and construction	Concession-type infrastructure					Industrial prod.	Balance as of 12.31.13
	Eng. and const.	Solar	Trans.	Water	Cog. and other	Abengoa Yield	Biofuels	
Bank debt and current/non-curr. bond	1,588,500	1,137,763	112,812	-	2,536	-	2,648,987	5,490,598
L-T and S-T non rec. financing	160,463	1,895,616	1,254,289	218,302	221,870	2,103,058	467,352	6,320,950
Obligat. under curr./non-curr. financial lease	19,247	-	-	-	-	-	20,791	40,038
Current financial investments	(574,399)	(17,297)	(82,284)	(9,923)	(34,638)	(129,949)	(77,339)	(925,829)
Cash and cash equivalents	(1,537,418)	(196,832)	(50,578)	(35,369)	(4,378)	(259,854)	(867,254)	(2,951,684)
Total net debt (cash)	(343,607)	2,819,250	1,234,239	173,010	185,390	1,713,255	2,192,537	7,974,073

In order to obtain Net Debt, by segment:

1. With the only objective of presenting liabilities by segment, Corporate Financing signed by Abengoa, S.A. and Abengoa Finance, S.A.U. has been allocated by operating segment (see Note 16), since its main purpose is to finance investments in projects and in companies needed to expand the businesses and lines of activity of the group.
2. Short-term financial investments and Cash and cash equivalents are presented reducing debt, since both items are considered highly liquid, even though short-term financial investments do not fulfill all the conditions to be classified as cash and cash equivalents.

d) The Capex by segments for the six month periods ended June 30, 2014 and 2013 is as follows:

Item	For the six months ended 06.30.14	For the six months ended 06.30.13
Engineering and construction		
Engineering and construction	52,981	49,697
Total	52,981	49,697
Concession-type infrastructure		
Solar	200,114	237,514

Total	83,399	86,006
Total	233,675	238,144

5.2. Information by geographic areas

The revenue distribution by geographical region for the six month periods ended June 30, 2014 and 2013 is as follows:

Geographical region	For the six months ended		For the six months ended	
	06.30.14	%	06.30.13	%
- North America	1,329,267	39.0	1,229,196	36.1
- Latin America (except Brazil and Mexico)	487,886	14.3	332,184	9.8
- Brazil	357,668	10.5	371,190	10.9
- Europe (except Spain)	441,804	13.0	418,903	12.3
- Other regions	318,105	9.4	446,716	13.1
- Spain	470,757	13.8	604,112	17.8
Consolidated Total	3,405,487	100	3,402,301	100
Outside Spain amount	2,934,730	86.2	2,798,189	82.2
Spain amount	470,757	13.8	604,112	17.8

Note 6.- Changes in the composition of the group

6.1. Changes in the consolidation group

During the six month period ended June 30, 2014, 54 subsidiaries and 2 associates, were added to the consolidation perimeter of the group. In addition, 6 subsidiaries and 1 associate were no longer included in the consolidation group. These changes did not have a significant impact on these Consolidated Condensed Interim Financial Statements.

6.2. Initial Public Offering of Abengoa Yield Plc

On June 18, 2014 Abengoa Yield Plc ("Abengoa Yield"), a wholly-owned subsidiary of Abengoa, closed its initial public offering of 28,577,500 ordinary shares, including the exercise in full of the option to purchase additional shares to cover over-allotment by the underwriters of the initial public offering ("greenshoe option"). These shares were offered at a price of U.S. \$29 per share for total gross proceeds of \$828.7 million (€611.0 million) before fees and all the expenses related to the initial public offering.

Abengoa Yield's shares began trading on the NASDAQ Global Select Market under the symbol "ABY" on June 13, 2014.

Abengoa Yield is a dividend growth-oriented company formed to serve as the primary vehicle through which Abengoa will own, manage and acquire renewable energy, conventional power and electric transmission lines and other contracted revenue-generating assets, initially focused on North America and South America, as well as Europe.

Abengoa Yield Limited was incorporated on December 17, 2013. On March 17, 2014, the General Shareholders Meeting approved its conversion to Plc, with effect on March 19, 2014. Prior to the closing of the offering, Abengoa has contributed to Abengoa Yield ten concessional assets, certain holding companies and a preferred equity investment in ACBH (a subsidiary of Abengoa engaged in the development, construction and management of transmission lines in Brazil). In exchange for this asset transfer, Abengoa has received a 64.28% interest in Abengoa Yield and U.S.\$779.8 million (€575.0 million) in cash, corresponding to the net proceeds of the initial public offering after deducting underwriting fees and all the expenses related to the initial public offering. As a result of the Initial Public Offering, Abengoa has recorded Non-controlling interest amounting to €488.9 million, corresponding to the book value of the 35.72% stake in Abengoa Yield sold and an impact in Equity amounting to €86 million, for the difference between the net proceeds and the book value of the net assets transferred.

6.3. Main acquisitions and disposals

a) Acquisitions

There were no significant acquisitions during the six month period ended June 30, 2014.

b) Disposals

- On May 2, 2013 the Company signed an agreement with Corning Incorporated to sell its Brazilian subsidiary, Bargoa S.A., a company which manufactures telecommunications components. The transaction price was set at 80 million US dollars. This sale brought Abengoa a cash inflow of 50 million US dollars and generated an after-tax profit of €29 million.
- On June 13, 2013 Abengoa signed a strategic agreement with the European private equity fund, Triton Partners (Triton), to sell 100% of Befesa Medio Ambiente, S.L.U. Note 7 on Discontinued operations and Non-current assets held for sale gives further details on this transaction.

6.4. Business combinations

During the six month period ended June 30, 2014, no significant business combinations were carried out by the Group.

Regarding 2013, on October 13, 2013, Arizona Solar One, LLC, the Company that holds the assets in Solana thermo-solar plant in the United States, which was recorded under the equity method during its construction period, entered into operation and started to be fully consolidated once control over this company was gained.

The Company reassesses whether or not it controls an investee when facts and circumstances indicate that there are changes to the elements that determine control (power over the investee, exposition to variable returns of the investee and ability to use its power to affect its returns). The Company concluded that during the construction phase of Solana plant all the relevant decisions were subject to the control and approval of the Administration. As a result, the Company did not have control over these assets during the construction period. IFRS 10 (B80) establishes that control requires a continuous assessment and that the Company shall reassess if it controls on investee if facts and circumstances indicate that there are changes to the elements of control. Once the project entered into operation, the decision making process changed, the investee was controlled and it started to be fully consolidated.

This business combination was recorded in accordance with IFRS 3 'Business combinations' with no material impact in the Consolidated Income Statement.

The amount of assets and liabilities consolidated is shown in the following table:

	As of October 13, 2013
Non-current assets	1,522,152
Current assets	7,774
Non-current and current liabilities	(1,117,349)
Net Investment	(412,577)
Total	-

Note 7.- Discontinued operations and Non-current assets held for sale

7.1. Assets held for sale -shares in BCTA Qingdao, S.L.

As of December 31, 2013 and June 30, 2014, the Company is in a process of negotiations to sell its 92.6% interest in Qingdao BCTA Desalination Co., Ltd., ('Qingdao') a desalination plant in China. Given that as of that date the subsidiary is available for immediate sale and the sale is highly probable, the Company has classified the assets and liabilities of Qingdao as held for sale in the Consolidated Statement of Financial Position both as of December 31, 2013 and June 30, 2014. Until closing of the sale transaction, the assets will be reported as held for sale in accordance with the stipulations and requirements of IFRS 5, Non-Current Assets Held for Sale and Discontinued Operations.

The expected cash proceeds will be approximately €51 million. As of June 30, 2014, the agreement is subject to certain closing conditions.

As of June 30, 2014 and December 31, 2013, the breakdown of the assets and liabilities classified as Held for Sale, are as follows:

	Balance as of 06.30.14	Balance as of 12.31.13
Assets		
Fixed assets in projects (project finance)	138,286	138,067
Financial investments	11	16
Deferred tax assets	-	432
Current assets	33,259	27,888
Total assets	171,556	166,403
Liabilities		
Long-term non-recourse project financing	91,060	95,460
Current liabilities	30,419	25,809
Total liabilities	121,479	121,269

7.2. Assets held for sale -shares in Linha Verde Transmissora de Energia S.A.

The Company has signed with Centrais Elétricas do Norte do Brasil S.A (Eletronorte) a share purchase agreement to sell its 51% stake in Linha Verde Transmissora de Energia S.A. ("Linha Verde"), a company with a concession of an electric transmission line in Brazil which is currently in pre-operational stage. As of June 30, 2014, the sale is subject to the closing conditions customary for the sale of these types of assets.

Given that as of that date the subsidiary is available for immediate sale and the sale is highly probable, the Company has classified the assets and liabilities of Linha Verde as held for sale in the Consolidated Statement of Financial Position as of June 30, 2014. Until closing of the sale transaction, the assets will be reported as held for sale in accordance with the stipulations and requirements of IFRS 5, Non-Current Assets Held for Sale and Discontinued Operations.

The expected cash proceeds will be approximately 40 million Brazilian real (approximately €13.3 million).

As of June 30, 2014, the breakdown of the assets and liabilities classified as Held for Sale, are as follows:

	Balance as of 06.30.14
Assets	
Fixed assets in projects (project finance)	175,248
Deferred tax assets	894
Current assets	5,381
Total assets	181,523
Liabilities	
Long-term non-recourse project financing	122,307
Current liabilities	35,352
Total liabilities	157,659

7.3. Sale of shares in Befesa Medio Ambiente, S.L.U.

On June 13, 2013 the Company reached an exclusive agreement with certain investment funds managed by Triton Partners to wholly transfer Abengoa's shareholding in Befesa Medio Ambiente, S.L.U. The agreed sale price was €1,075 million (considering the net debt adjustments, total consideration to Abengoa amounts to €620 million).

The sale of this shareholding involved a cash deposit of €331 million. The balance of the agreed payment, to complete the aforementioned figure of €620 million, consisted of a deferred payment of €17 million (€15 million held as a deposit until ongoing litigations are resolved and two million Euros in long-term receivables from a client of Befesa Medioambiente), a credit note of €48 million to mature in five years and a deferred payment of €225 million through a convertible loan with 15 years maturity and subject to two extension options of five years each at the discretion of the venture capital fund. The loan's principal shall be settled with a single repayment at maturity and accrues interest at the 6-month Euribor, plus a 6% spread, with an option for the fund to capitalize or pay interest at the end of each accrual period. Certain triggering events, which include Befesa's insolvency, a maximum net debt/EBITDA ratio of 8.0 throughout the life of the convertible loan, and failure to meet certain financial objectives in the last three years of the 15-year loan (minimum expected operating cash flow, minimum cash coverage ratio of 1.3) would result in the automatic conversion of the loan into 14.06% of Befesa's shares.

The sale transaction generated a gain of €0.4 million in the 'Results for the year from discontinued operations, net of taxes' in the Consolidated Income Statement for the year 2013.

Taking into account the significance that the activities carried out by Befesa had for Abengoa, the sale of this shareholding was considered as a discontinued operation in accordance with the stipulations and requirements of IFRS 5, 'Non-Current Assets Held for Sale and Discontinued Operations'.

In accordance with this standard, the Consolidated Income Statement for the six month period ended June 30, 2013, which is included for comparison purposes in Abengoa's Consolidated Interim Financial Statements for the six month period ended June 30, 2014 includes the results generated by Befesa under a single heading, for the activities which are now considered discontinued.

Below is the breakdown of the Consolidated Income Statement related to Befesa for the six month period ended June 30, 2013:

	For the six months ended 06.30.13
Revenue	317,517
Other operating income	5,051
Operating expenses	(316,479)
I. Operating profit	6,089
II. Financial expense, net	(18,623)
III. Share of profit/(loss) of associates carried under the equity method	138
IV. Profit before income tax	(12,396)
V. Income tax benefit	12,454
VI. Profit for the period from continuing operations	58
VII. Profit attributable to non-controlling interests	(653)
VIII. Profit for the period attributable to the Parent Company	(595)

Note 8.- Intangible assets and property, plant & equipment

8.1. The detail of the main categories included in Intangible assets as of June 30, 2014 and December 31, 2013 is as follows:

	Goodwill	Development assets	Other	Total
Intangible assets cost	504,939	339,040	267,571	1,111,550
Amortization and impairment	-	(165,422)	(86,248)	(251,670)
Total as of June 30, 2014	504,939	173,618	181,323	859,880

	Goodwill	Development assets	Other	Total
Intangible assets cost	476,059	311,444	273,285	1,060,788
Amortization and impairment	-	(146,651)	(72,026)	(218,677)
Total as of December 31, 2013	476,059	164,793	201,259	842,111

8.2. The detail of main categories included in Property, plant and equipment as of June 30, 2014 and December 31, 2013 is as follows:

	Lands and buildings	Technical installations and machinery	Advances and fixed assets in progress	Other fixed assets	Total
Property, plant & equipment cost	506,106	1,255,112	46,115	95,637	1,902,970
Depreciation and impairment	(107,247)	(470,825)	-	(65,341)	(643,413)
Total as of June 30, 2014	398,859	784,287	46,115	30,296	1,259,557

	Lands and buildings	Technical installations and machinery	Advances and fixed assets in progress	Other fixed assets	Total
Property, plant & equipment cost	494,174	1,240,458	49,601	87,841	1,872,074
Depreciation and impairment	(109,286)	(418,111)	-	(71,088)	(598,485)
Total as of December 31, 2013	384,888	822,347	49,601	16,753	1,273,589

8.3. As of June 30, 2014, there was no impairment evidence in our tangible or intangible assets with an indefinite useful life.

Note 9.- Fixed assets in projects (project finance)

There are several companies which engage in the development of projects including the design, construction, financing, operation and maintenance of owned assets or assets under concession-type agreements which are financed through non-recourse financing.

9.1. The detail of the main categories included in Concession assets in projects as of June 30, 2014 and December 31, 2013 is as follows:

	Intangible and financial assets	Development assets	Total
Concession assets in projects cost	9,682,562	71,204	9,753,766
Amortization and impairment	(391,129)	(19,274)	(410,403)
Total as of June 30, 2014	9,291,433	51,930	9,343,363

	Intangible and financial assets	Development assets	Total
Concession assets in projects cost	8,819,361	71,204	8,890,565
Amortization and impairment	(299,488)	(17,834)	(317,322)
Total as of December 31, 2013	8,519,873	53,370	8,573,243

The increase in the cost of concession assets is primarily due to progress in developing infrastructure concessions projects, mainly cogeneration projects in México (€310 million); various transmission lines in Brazil and Peru (€203 million), and the thermosolar plant in Chile (€186 million), as well as the effect of translation differences mainly caused by the appreciation of the Brazilian real with respect to the Euro.

The most significant variations in current financial investments during the six month periods ended June 30, 2014 are due to the reclassification from non-current financial investments of deposits held as of guarantee of short-term projects and to the maturity of some deposits as of guarantee of certain projects.

The amount as of June 30, 2014 of Current financial investments corresponding to companies with non-recourse financing is €324,654 thousand (€167,938 thousand as of December 31, 2013).

Note 11.- Derivative financial instruments

The fair value of derivative financial instruments as of June 30, 2014 and December 31, 2013 is as follows:

	06.30.14		12.31.13	
	Assets	Liabilities	Assets	Liabilities
Exchange rate derivatives – cash flow hedge	4,249	19,405	6,028	13,519
Interest rate derivatives – cash flow hedge	18,371	294,610	43,889	200,483
Interest rate derivatives – non-hedge accounting	-	26,409	-	14,765
Commodity derivatives – cash flow hedge	8,330	22,211	8,948	15,650
Embedded derivatives of convertible bonds and shares options (Note 16.3)	14,366	27,771	2,686	66,765
Total	45,316	390,406	61,551	311,182
Non-current part	31,137	340,292	46,347	266,802
Current part	14,179	50,114	15,204	44,380

Fair value of derivative assets decreased in the six month period ended June 30, 2014 mainly due to the unfavorable evolution of hedging interest rate derivatives mainly due to a decrease in the fair value of interest rate options resulting from the expected decrease in the future interest rates. This decrease was partially offset by the increase in the fair value of call options on Abengoa's own shares that were signed to hedge the convertible notes, caused by to an increase in the stock price of the shares of Abengoa, which is a principal factor in the fair value of the embedded derivatives and the options.

The fair value of derivative liabilities increased in the six month period ended June 30, 2014 due to the unfavorable evolution of hedging interest rate derivatives, mainly due to a decrease in the fair value of swaps resulting from the decrease in the future interest rates. Additionally, there has been an increase due to the increase in the fair value of the derivative liabilities embedded in convertible notes due in 2014 and 2017, partially offset by the reclassification to equity of the fair value of the embedded derivative of the convertible note due in 2019 because in 2014, the conversion option meets the definition of equity instrument (see Note 16.3).

The fair value amount recognized in the Consolidated Income Statement in the six month period ended June 30, 2014 for the financial instruments derivatives designated as hedging instruments is a loss of €35,267 thousand (loss of €46,280 thousand in the six month period ended June 30, 2013).

At the end of the six month period ended June 30, 2014, the net amount of the fair value of derivatives recorded directly in the Consolidated Income Statement as a result of not meeting all the requirements of IAS39 to be designated as accounting hedges represented a loss of €11,589 thousand (loss of €786 thousand for the six months ended June 30, 2013).

Note 12.- Inventories

Inventories as of June 30, 2014 and December 31, 2013 are as follows:

Item	Balance as of 06.30.14	Balance as of 12.31.13
Goods for sale	7,180	15,817
Raw materials and other supplies	139,898	112,657
Work in progress and semi-finished products	1,750	1,160
Projects in progress	84,781	58,588
Finished products	89,202	64,582
Advance Payments to suppliers	41,128	78,177
Total	363,939	330,981

Note 13.- Clients and other receivable accounts

The breakdown of Clients and Other Receivable Accounts as of June 30, 2014 and December 31, 2013 is as follows:

Item	Balance as of 06.30.14	Balance as of 12.31.13
Trade receivables	709,603	566,930
Unbilled revenues	503,044	488,883
Bad debt provisions	(76,995)	(64,047)
Tax receivables	690,298	640,567
Other debtors	231,584	237,639
Total	2,057,534	1,869,972

The fair value of Clients and other receivable accounts does not differ significantly from its carrying value.

Note 14.- Share capital

As of June 30, 2014 the share capital amounts to €92,049,848.97 represented by two distinct classes of 839,769,720 shares completely subscribed and disbursed:

- 84,497,123 class A shares with a nominal value of 1 Euro each, all in the same class and series, each of which grants the holder a total of 100 voting rights ('Class A Shares').
- 755,272,597 class B shares with a nominal value of 0.01 Euros each, all in the same class and series, each of which grants One (1) voting right and which afford its holder economic rights identical to the economic rights of Class A shares as stated in article 8 of the Company's by laws ('Class B Shares' and, together with class A shares, 'Shares with Voting Rights').

In accordance with notifications received by the company and in compliance with reporting requirements to communicate shareholding percentages and the information received from relevant parties, shareholders with a significant holding as of June 30, 2014 are as follows:

Shareholders	Share %
Inversión Corporativa IC, S.A. (*)	51.49
Finarpisa, S.A. (*)	6.17

(*) Inversión Corporativa Group.

On October 17, 2013, we carried out a capital increase of 250,000,000 Class B shares and on October 29, 2013 we issued, as a result of the exercise of the option to purchase additional shares to cover over-allotment by the underwriters of the capital increase, 37,500,000 additional Class B shares ('greenshoe' option). The shares were offered at a price of €1.80 per share, for total gross proceeds, including shares sold pursuant to the greenshoe option, of €517.5 million.

Moreover, the controlling shareholder, Inversión Corporativa IC, S.A., subscribed 35,000,000 shares with an investment of €63 million, so that following the capital increase the Inversión Corporativa group held a 57.79% shareholding. As part of the capital increase, the company and Inversión Corporativa IC, S.A. agreed a lock-up clause for a period of 180 days under the standard terms for these types of transactions, which terminated on April 24, 2014.

Class A and B shares are listed on the Madrid and Barcelona Stock Exchange and on the Spanish Stock Exchange Electronic Trading System (Electronic Market). Class A shares have been listed since November 29, 1996 and class B shares since October 25, 2012. The Company presents mandatory financial information on a quarterly and semiannual basis.

The new class B shares issued in the capital increased in 2013, are also listed on the NASDAQ Global Select Market in the form of American Depositary Shares (with five Class B shares exchangeable for one American Depositary Share).

On September 30, 2012, the Extraordinary General Shareholders' Meeting approved a capital increase of 430,450,152 class B shares with a nominal value of €0.01 per share, charged to our freely available reserves, which were been distributed for no consideration to all existing shareholders on the basis of four class B shares for each class A share or class B share which they hold. This General Shareholders' Meeting approved a right of voluntary conversion for the class A shareholders to convert their class A shares with a nominal value of 1 Euro into class B shares with a nominal value of 0.01 Euros during pre-set windows until December 31, 2017. Following the exercise of this right, after each conversion window, a capital reduction has taken place and will take place, by reducing the par value of a number of converted class A shares to by 0.99 euros per share, with a credit to restricted reserves.

As a result of the aforementioned capital conversions, following the completion of the tenth conversion period as of July 15, 2014, the share capital amounts to €91,992,981.39 represented by two different classes of 839,769,720 shares completely subscribed and disbursed: 84,439,681 class A shares and 755,330,039 class B shares.

As of June 30, 2014 treasury stock amounted to 41,144,487 shares, which 5,513,168 are class A shares and 35,631,319 are class B shares.

Regarding the operations carried out during the period, the number of treasury stock purchased amounted to 6,919,106 class A shares and 57,146,153 class B shares and treasury stock transferred amounted to 6,788,834 class A shares and 56,141,245 class B shares, with a net result of €-246 thousand recognized in equity.

The General Shareholders' meeting held on April 6, 2014 approved a dividend of €0.111 per share, which totals €91,637 thousand, compared to €38,741 thousand in the previous year. On April 6, 2014, the Ordinary General Shareholders' Meeting approved the paid-up capital increase with the purpose of implementing the payment of the dividend for the fiscal year 2013 means of a 'scrip dividend'.

On July 23, 2014 the period for trading the free allotment rights corresponding to the aforementioned capital increase ended. During the period established for such purpose, the holders of 351,867,124 free allotment rights (52,193,313 of which corresponding to Class A shares and 299,673,811 corresponding to Class B shares) entitled to accept the irrevocable commitment to purchase the referred rights made by Abengoa have done so. As such, On 22 April 2014, Abengoa proceed to acquire such rights in the total gross amount of € 39,057 thousand.

Note 15.- Non-recourse financing (project financing)

There are certain entities within the Group for which, in general, the main commercial purpose is the long-term development of integrated products which are financed through non-recourse project finance.

15.1. The detail of Non-recourse financing of both non-current and current liabilities as of June 30, 2014 and December 31, 2013 are as follows:

Non-recourse financing	Balance as of 06.30.14	Balance as of 12.31.13
Non-Current	5,619,803	5,736,151
Current	699,298	584,799
Total Non-recourse financing	6,319,101	6,320,950

During the six month period ended June 30, 2014 there were no significant changes in non-recourse financing. The increase was mainly due to new financing obtained for the cogeneration projects in México (€129 million), new drawings related to transmission lines projects (182 million), the net effect of the bond issue in ATS and the repayment of the previous debt associated to the project (€70 million) and the effect of translation differences mainly caused by the appreciation of the Brazilian real with respect to the Euro (€117 million). Additionally, non-recourse financing decreased due to the repayments of debt related to Solana project (€-324 million) and also to the classification of Linha Verde as held for sale (€-115 million).

15.2. The repayment schedule for Non-recourse project financing, as of June 30, 2014 is as follows and is consistent with the projected cash flows of the related projects.

Rest 2014	Between January and June 2015	Between July and December 2015	2016	2017	2018	2019	Subsequent years
573,998	125,300	540,191	646,001	364,308	238,171	344,165	3,486,967

Note 16.- Corporate financing

16.1. The breakdown of the corporate financing as of June 30, 2014 and December 31, 2013 is as follows:

Non-current	Balance as of 06.30.14	Balance as of 12.31.13
Credit facilities with financial entities	1,975,090	1,959,339
Notes and bonds	2,853,687	2,638,083
Finance lease liabilities	27,137	27,093
Other loans and borrowings	100,704	110,630
Total non-current	4,956,618	4,735,145

Current	Balance as of 06.30.14	Balance as of 12.31.13
Credit facilities with financial entities	655,659	636,733
Notes and bonds	963,023	256,443
Finance lease liabilities	9,429	12,945
Other loans and borrowings	20,673	13,143
Total current	1,648,784	919,264

Total corporate financing	6,605,402	5,654,409
----------------------------------	------------------	------------------

The increase in corporate financing during the six month period ended June 30, 2014 was mainly due to the increase of notes and bonds as a result of the issuance during march 2014 of the ordinary notes due 2021 for an amount of €500 million and due to the higher outstanding amount of Euro Commercial Paper (ECP) program, listed in the Irish Stock Exchange with one-year maturity.

16.2. Credit facilities with financial entities

As of June 30, 2014 the debt repayment calendar was as set out in the following table:

	Rest 2014	Between January and June 2015	Between July and December 2015	2016	2017	2018	2019	Subsequent years	Total
FSF 2012	208,718*	-	505,114	681,043	-	-	-	-	1,394,875
EIB financing	109,096	-	-	-	-	-	-	-	109,096
ICO financing	51,401	-	49,942	50,000	-	-	-	-	151,343
Abener Energia SA financing	67,260	33,558	30,982	48,736	36,929	49,511	30,086	54,912	351,974
Instalaciones Inabensa SA financing	40,887	26,582	26,052	69,802	57,746	51,573	37,213	5,741	315,596
Remaining loans and credits	93,333	24,824	67,827	24,462	23,580	25,626	10,206	38,007	307,865
Total	570,695	84,964	679,917	874,043	118,255	126,710	77,505	98,660	2,630,749

(*) On July 21, 2014 there was a repayment of this amount as scheduled.

To ensure that the Company has sufficient funds to repay the debt with respect to its capacity to generate cash flow, Abengoa has to comply with a Corporate Net Debt/EBITDA financial ratio with the financial institutions.

According to the financing agreements, the maximum limit of this ratio is 3.0 for the years 2012, 2013 and until December 30, 2014 and 2.5 starting December 31, 2014. As of June 30, 2014, Corporate Net Debt/EBITDA financial ratio is 2.44.

16.3. Notes and bonds

The table below shows the maturities of the existing notes as of June 30, 2014:

	Rest 2014	Between January and June 2015	Between July and December 2015	2016	2017	2018	2019	2020	2021
Convertible notes Abengoa	100,100	-	-	-	250,000	-	400,000	-	-
Ordinary notes Abengoa	-	300,000	-	500,000	476,156	550,000	-	329,646	500,000
Euro-Commercial Paper Programme (ECP) (*)	225,446	310,054	-	-	-	-	-	-	-
Total	325,546	610,054	-	500,000	726,156	550,000	400,000	329,646	500,000

(*) With possibility of renewal

In accordance with IAS 32 and 39 and the Terms and Conditions of the issuance in all convertible notes except for the 2019 notes, since Abengoa has a contractual right to choose the type of settlement and one of these possibilities is paying through a variable number of shares and cash, the conversion option qualifies as an embedded derivative. Thus, the convertible notes are considered a hybrid instrument, which includes a component of debt and an embedded derivative for the conversion option held by the bondholder, except for the conversion option embedded in the 2019 notes, which qualifies as equity, and the notes are, thus, considered a compound financial instrument.

2014 Convertible notes

In relation to the Convertible notes for an amount of €200 million issued on July 24, 2009 and maturing on July 24, 2014, Abengoa, S.A. repurchased, on January 17, 2013 a nominal amount of €99.9 million, so its nominal amount is reduced to €100.1 million. The carrying value of the liability component of this note as of June 30, 2013 amounts to €99,556 thousand (€96,183 thousand as of December 31, 2013).

As of June 30, 2014, the fair value of the derivative liability embedded in the convertible note is €3,990 thousand, while its fair value as of December 31, 2013 amounted to €984 thousand. The increase in fair value has been recorded as an expense amounting to €3,006 in 'Other finance expense' in the Consolidated Income Statement for the six months ended June 30, 2014.

On the other hand, in order to partially hedge the derivatives embedded in the convertible notes, during the years 2011 and 2010 the Company purchased two call options over 7,000,000 Abengoa's own shares with a strike price of €21.125 per share, maturing on July 24, 2014 (over 35,000,000 Abengoa's shares with a strike price of €4.22 after the distribution of class B shares approved by the Extraordinary General Meeting held on September 30, 2012). The fair value of such call options as of December 31, 2013 was €419 thousand, while the fair value was €2,440 thousand on June 30, 2014. The increase in fair value has been recorded as a finance income amounting to €2,021 thousand recorded in 'Other finance expense' in the Consolidated Income Statement for the six months ended June 30, 2014.

On July 24, 2014, the convertible notes have matured, being cancelled in cash, according to its terms and conditions.

2017 Convertible notes

In relation to the €250 million convertible notes maturing in 2017 issued on February 3, 2010, the carrying value of the liability component of the note as of June 30, 2014 amounts to €210,031 thousand (€203,422 thousand as of December 31, 2013).

As of June 30, 2014, the fair value of the derivative liability embedded in the convertible note is €22,696 thousand, while its fair value as of December 31, 2013 amounted to €2,887 thousand. The increase in fair value has been recorded as an expense amounting to €19,809 thousand in 'Other finance expense' in the Consolidated Income Statement for the six months ended June 30, 2014.

On the other hand, in order to partially hedge the derivatives embedded in the convertible notes, during the years 2011 and 2010 the Company purchased two call options over 7,100,000 Abengoa's own shares with a strike price of €30.27 per share, maturing on February 3, 2017 (over 35,500,000 Abengoa's own shares with a strike price of €6.05 after the distribution of class B shares approved by the Extraordinary General Meeting held on September 30, 2012). The fair value of such call options as of December 31, 2013 was €2,322 thousand, while the fair value was €12,087 thousand on June 30, 2014. The increase in fair value has been recorded as a finance income amounting to €9,764 thousand recorded in 'Other finance expense' in the Consolidated Income Statement for the six months ended June 30, 2014.

On February 3, 2015, holders of the 2017 Convertible Notes will have the right to require Abengoa to redeem the 2017 Convertible Notes at the principal amount together with accrued and unpaid interest to such date.

2019 Convertible notes

In relation to the €400 million convertible notes maturing in 2019 issued on January 17, 2013, the carrying value of the liability component of the note as of June 30, 2014 amounts to €316,194 thousand (€309,249 thousand as of December 31, 2013).

At the beginning of 2014, the Board of Directors expressly and irrevocably stated, with binding effect, that in relation to the right conferred by Clause 6 (j) (Settlement in cash) of the Terms and Conditions of this convertible note, which grants Abengoa the right to choose the type of payment, the Company shall not exercise the cash settlement option in the event that noteholders decide to exercise their conversion right early during the period granted for that effect and Abengoa, S.A. shall therefore only settle this conversion right in shares. Accordingly, the fair value at the beginning of the year of the derivative liability embedded in the convertible note, which totaled €62,894 thousand, was reclassified as equity since after that date the conversion option meets the definition of an equity instrument.

Ordinary notes Abengoa 2021

On March 27, 2014, Abengoa Finance, S.A.U., a subsidiary of Abengoa, S.A., issued an ordinary bond for €500 million among qualified and institutional investors. In summary, the terms and conditions of the issue that were established definitively are:

- The bond was issued for an amount of €500 million and matures in seven (7) years (March 31, 2021).
- The notes will accrue fixed annual interest of 6.00%, payable every six months, on March 15 and September 15.
- The notes are jointly and severally guaranteed by Abengoa, S.A. and certain group subsidiaries.

Note 17.- Trade payables and other current liabilities

Trade payable and other current liabilities as of June 30, 2014 and December 31, 2013 are shown in the following table:

Item	Balance as of 06.30.14	Balance as of 12.31.13
Trade payables for purchases of goods	3,379,705	3,707,470
Trade payables for services	1,086,971	1,121,466
Billings in excess and advance payments from clients	279,632	429,462
Remunerations payable to employees	52,198	37,017
Suppliers of intangible assets current	11,898	14,748
Other accounts payables	132,756	204,023
Total	4,943,160	5,514,186

Nominal values of Trade payables and other current liabilities are considered to approximate fair values and the effect of discounting them is not significant.

Note 18.- Finance income and expenses

18.1. Finance income and expenses

The following table sets forth our Finance income and expenses for the six month periods ended June 30, 2014 and 2013:

Finance income	For the six months ended 06.30.14	For the six months ended 06.30.13
Interest income from loans and credits	10,668	18,537
Interest rates benefits derivatives: cash flow hedges	4,968	20,074
Interest rates benefits derivatives: non-hedging	263	5,262
Total	15,899	43,873

Finance expenses	For the six months ended 06.30.14	For the six months ended 06.30.13
Expenses due to interest:		
- Loans from credit entities	(149,470)	(85,106)
- Other debts	(184,852)	(140,754)
Interest rates losses derivatives: cash flow hedges	(52,544)	(56,264)
Interest rates losses derivatives: non-hedging	(11,909)	(3,726)
Total	(398,775)	(285,850)

Net financial loss	(382,876)	(241,977)
---------------------------	------------------	------------------

For the six month period ended June 30, 2014 finance income has decreased when compared to the same period of the previous year, mainly due to lower income from the interest rates benefits derivatives as a result of income for the time value of interest rate options.

Finance expenses have increased for the six month period ended June 30, 2014 when compared to the same period of the previous year, mainly due to the increase in interest expenses from loans with credit entities because of the lower capitalization of interest expenses for financing projects under construction, thanks to various projects coming into operation, the higher interest accrued on other debts due to the new notes issued in the last quarter of 2013 and in the first quarter of 2014, as well as, the negative effect on the valuation of interest rate derivatives.

The net financial expenses for non-recourse financing project companies is €-173.984 thousand (€-54,693 thousand for the six month period ended June 30, 2013).

18.2. Other net finance income and expenses

The following table sets out 'Other net finance income and expenses' for the six month periods ended June 30, 2014 and 2013:

	For the six months ended 06.30.14	For the six months ended 06.30.13
Other finance income		
Income on financial assets	940	287
Other finance income	6,706	9,317
Changes in the fair value of the derivatives embedded in the convertible bonds and options over shares	-	94,466
Total	7,646	104,070
Other finance expenses		
Losses from partial repayment of the convertible notes due in 2014	-	(12,025)
Outsourcing of payables	(37,867)	(31,449)
Other financial losses	(25,579)	(39,782)
Changes in the fair value of the derivatives embedded in the convertible bonds and options over shares	(11,030)	-
Commodity derivatives losses: cash flow hedge	(1,886)	-
Commodity derivatives losses: non hedge	(1,553)	(10,328)
Total	(77,915)	(93,584)
Other net finance income/expenses	(70,269)	10,486

For the six month period ended June 30, 2014 the heading 'Other finance income' has decreased when compared to the same period in the previous year mainly due to the change in fair value of embedded derivatives of the convertible notes, net of change in fair value of the call options over Abengoa's own share, which hedge the embedded derivatives partially, amounting to a net gain of €94,466 thousand for the six month period ended June 30, 2013 (a loss of €11,030 thousand for the six month period ended June 30, 2014).

The heading 'Other finance expenses' has decreased for the six month period ended June 30, 2014 compared to the same period in the previous year mainly due to losses recorded for the six month period ended June 30, 2013, from the partial repayment of the convertible notes due in 2014 and losses from non effective commodity derivatives, as well as, the decrease in the heading 'Other financial losses', which include finance expenses mainly related to financial guarantees and letters of credit, to wire transfers and other bank fees, losses on available for sale financial assets and other minor finance expenses, partially offset by losses from the change in fair value of embedded derivatives of convertible notes due in 2014 and 2017 and the call options over Abengoa's own share, as mentioned above.

The net amount of 'Other incomes and financial expenses' for non-recourse financing project companies is €-18,912 thousand (€-12,217 thousand in the six month period ended June 30, 2013).

Note 19.- Income tax

- 19.1.** The effective tax rate for the period presented has been established based on Management's best estimates.
- 19.2.** The effective tax rate for the six month period ended June 30, 2014 was lower than the effective tax rate for the same period in the previous year due to various incentives for exporting goods and services from Spain; investment and work in R&D+i activities; and the contribution to Abengoa's profit from results from other countries.
- 19.3.** On 20 June, 2014, the Council of Ministers in Spain received a report from the Ministry of Finance and Public Administrations about four proposed bills to reform the Spanish tax system, which include changing the general tax rate to 28% for 2015 and to 25% for 2016, among other measures (from 30% in 2014). As of the date of preparing these half-yearly financial statements, these laws have still not been definitively passed. Abengoa is in the process of evaluating the potential impact of this reform in relation to the net deferred tax assets recorded in the attached consolidated financial statements, which have been calculated according to existing regulations as of the reporting date.

Note 20.- Fair value of financial instruments

The information on the financial instruments measured at fair value, is presented in accordance with the following:

- Level 1: assets or liabilities listed on active markets.
- Level 2: Measured on inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: Measured on inputs for the assets or liabilities that are not based on observable market data (unobservable inputs).

The following is a breakdown of the Group's assets and liabilities measured at fair value as of June 30, 2014 and December 31, 2013 (except assets and liabilities with a carrying amount close to their fair value, non-quoted equity instruments measured at cost and contracts with components that cannot be measured reliably):

Category	Level 1	Level 2	Level 3	Balance as of 06.30.14
Non-hedging derivatives	-	(39,814)	-	(39,814)
Hedging derivatives	-	(305,276)	-	(305,276)
Available-for-sale	38	-	46,017	46,055
Total	38	(345,090)	46,017	(299,035)

Category	Level 1	Level 2	Level 3	Balance as of 12.31.13
Non-hedging derivatives	-	(78,844)	-	(78,844)
Hedging derivatives	-	(170,787)	-	(170,787)
Available-for-sale	4,449	-	45,758	50,207
Total	4,449	(249,631)	45,758	(199,424)

The financial instruments at fair value, determined from prices published in active markets (Level 1), consist of shares.

The majority of Abengoa's portfolio comprises financial derivatives designated as cash flow hedges, is classified as level 2 and corresponds mainly to the interest rate swaps (see Note 11).

The caption Non-hedging derivatives accounting includes the fair value of the derivatives embedded in the convertible notes, the fair value of the call options over Abengoa's own shares, as well as those derivatives purchased with the purpose of hedging a market risk (interest rate, foreign exchange or commodities) that do not fulfil all the requirements, according to IAS 39 to be recorded as hedges from an accounting point of view.

Level 3 corresponds mainly to the 3% interest held by Abengoa, S.A. in Yoigo, S.A., a Spanish telecom operator, recorded at fair value of €32,997 thousand and held through the ownership of Siema Investments, S.L. (a holding company owned 100% by Abengoa, S.A.).

The valuation method used to calculate the fair value was discounting cash flows based on its business plan, using as discount rate a weighted average cost of capital (WACC) of market, 10%. It also has been made a sensitivity analysis considering different discount rates and deviations of the business plan in order to ensure that potential valuation changes do not worsen in any case the fair value.

The following table shows the changes in the fair value of level 3 assets for the six month period ended June 30, 2014 and for the year ended December 31, 2013:

Movements	Amount
Beginning balance as of December 31, 2012	45,704
Gains and losses recognized in Equity	(568)
Change in consolidation, reclassifications and translation differences	622
Total as of December 31, 2013	45,758
Gains and losses recognized in Equity	434
Change in consolidation, reclassifications and translation differences	(175)
Total as of June 30, 2014	46,017

During the periods ended June 30, 2014 and December 31, 2013, there have not been any significant reclassifications amongst the three levels presented above.

Note 21.- Earnings per share

21.1. Basic earnings per share

Basic earnings per share are calculated by dividing the profit attributable to equity holders of the company by the weighted average number of ordinary shares outstanding during the period.

Item	For the six months ended 06.30.14	For the six months ended 06.30.13
Profit from continuing operations attributable to equity holders of the company	68,767	67,924
Profit from discontinuing operations attributable to equity holders of the company	-	(595)
Average number of ordinary shares outstanding (thousands)	839,770	538,063
Earnings per share from continuing operations (€ per share)	0.08	0.13
Earnings per share from discontinuing operations (€ per share)	-	-
Earnings per share from profit for the year (€ per share)	0.08	0.13

21.2. Diluted earnings per share

To calculate the diluted earnings per share, the average weighted number of ordinary shares issued and outstanding is adjusted to reflect the conversion of all the potential diluting ordinary shares.

The potential diluting ordinary shares held by the group correspond to the warrants on Class B shares issued in November 2011. The assumption is that all warrants will be exercised and a calculation is made to determine the number of shares that may have been acquired at fair value based on the monetary value of the subscription rights of the warrants still to be exercised. The difference between the number of shares issued assuming the exercise of the warrants, and the number of shares calculated based on the above, is included in the calculation of the income per diluted share.

	For the six months ended 06.30.14	For the six months ended 06.30.13
Profit for the year		
- Profit from continuing operations attributable to equity holders of the company	68,767	67,924
- Profit from discontinuing operations attributable to equity holders of the company	-	(595)
Profit used to determine the diluted earnings per share	68,767	67,329
Average weighted number of ordinary shares outstanding (thousands)	839,770	538,063
- Warrants adjustments (average weighted number of shares in outstanding since issue)	20,038	19,996
Average weighted number of ordinary shares affecting the diluted earnings per share (thousands)	859,808	558,059
Diluted earnings per share from continuing operations (€ per share)	0.08	0.12
Diluted earnings per share from discontinuing operations (€ per share)	-	-
Diluted earnings per share to the profit for the year (€ per share)	0.08	0.12

Note 22.- Average number of employees

The average number of employees classified by category during the six month periods ended June 30, 2014 and 2013 was:

Categories	Average number of employees for the six months ended 06.30.14			Average number of employees for the six months ended 06.30.13		
	Female	Male	% Total	Female	Male	% Total
Directors	69	506	2.0	76	560	2.3
Management	427	1,454	6.6	433	1,602	7.4
Engineers	1,335	3,405	16.5	1,284	3,195	16.3
Assistants and professionals	1,102	1,447	8.9	1,165	1,525	9.8
Operators	899	17,462	64.1	984	16,057	62.2
Interns	235	317	1.9	233	303	2.0
Total	4,067	24,591	100	4,175	23,242	100

During the six month period ended June 30, 2014 the average number of employees is 23% in Spain and 77% abroad.

Note 23.- Transactions with related parties

Dividends distributed to related parties during the period amounted to €32,023 thousand (€17,182 thousand in December 31, 2013).

During 2014 the only transactions associated with related parties was the following:

- Service provision agreement signed between Centro Tecnológico Palmas Altas, S.A. and Ms. Blanca de Porres Guardiola, which involved a consideration of €36 thousand.

These operations were subject to verification by the Abengoa Audit Committee.

Note 24.- Employee remuneration and other benefits

Directors are remunerated as established in article 39 of the Bylaws. The remuneration of Directors is made up of a fixed amount as agreed upon at the General Shareholders' Meeting, and is not necessarily equal for all directors. Additionally, they may participate in profit sharing programs, for a percentage between 5% and 10% (maximum) of the net income of the Company after the declaration of the dividends for the year. Travel expenses related to work undertaken by the board are reimbursed to Directors.

Additionally, for the six month period ended June 30, 2014 overall remuneration for key management of the Company (Senior Management which are not executive directors), including both fixed and variable components, amounted to €5,567 thousand (€8,100 thousand for the six month period ended June 30, 2013).

No advanced payments or credits are granted to members of the Board, nor are any guarantees or obligations granted in their favor.

As of June 30, 2014 there were €40,515 thousand in non-current personnel compensation obligations (€29,789 thousand as of December 31, 2013).

Note 25.- Subsequent events

On July 21, 2014, the Board of Directors of Abengoa unanimously adopted, on a proposal from the Appointments and Remuneration Committee, a variable compensation plan. The beneficiaries will be approximately 350 managers of the group (including two members of the Board of Directors).

Since June 30, 2014, no other events have occurred that might significantly influence the information reflected in the Consolidated Condensed Interim Financial Statements, nor has there been any event of significance to the Group as a whole.

ANNEX I

FORM OF PAYMENT STATEMENT TO BE DELIVERED BY THE PAYING AGENT

[English translation provided for informational purposes only]

Modelo de declaración a que se refieren los apartados 3, 4 y 5 del artículo 44 del Reglamento General de las actuaciones y los procedimientos de gestión e inspección tributaria y de desarrollo de las normas comunes de los procedimientos de aplicación de los tributos⁽¹⁾

Model declaration form referred to in paragraphs 3, 4 and 5 of section 44 of the General Regulations of conduct and procedures relating to tax administration and inspection and the development of general rules of procedures for the enforcement of taxes

Don (nombre), con número de identificación fiscal (1) (...), en nombre y representación de (entidad declarante), con número de identificación fiscal (1) (...) y domicilio en (...) en calidad de (marcar la letra que proceda):

Mr. (name), with tax identification number (1) (...), in the name and on behalf of (declaring entity), with tax identification number (1) (...), with domicile in (address) acting in its capacity as (check as appropriate)

(e) Entidad Gestora del Mercado de Deuda Pública en Anotaciones

(a) Managing Entity of the Public Debt Book-Entry Market

(f) Entidad que gestiona el sistema de compensación y liquidación de valores con sede en el extranjero

(b) Clearing and settlement entity located outside Spain

(g) Otras entidades que mantienen valores por cuenta de terceros en entidades de compensación y liquidación de valores domiciliadas en territorio español

(c) Other entities that hold securities on behalf of third parties in clearing and settlement systems domiciled in Spain

(h) Agente de pagos designado por el emisor

(d) Paying Agent appointed by the issuer

Formula la siguiente declaración, de acuerdo con lo que consta en sus propios registros:

Files the following statement, in accordance with the information set forth in its own registers:

1 En relación con los apartados 3 y 4 del artículo 44:

1. Regarding sections 3 and 4 of section 44:

1.1 Identificación de los valores

1.1. Identification of the securities

1.2 Fecha de pago de los rendimientos (o de reembolso si son valores emitidos al descuento o segregados)

1.2. Date on which payment will be made (or reimbursement date in case of securities issued at a discount or segregated securities)

(1) The Paying Agent will only need to provide responses to the questions set forth in Section 2 of this form (i.e., questions 2.1 to 2.6).

1.3 Importe total de los rendimientos (o importe total a reembolsar, en todo caso, si son valores emitidos al descuento o segregados)

1.3. Total amount of payment (or total amount to be reimbursed, in any event, in case of securities issued at a discount or segregated securities)

1.4 Importe de los rendimientos correspondiente a contribuyentes del Impuesto sobre la Renta de las Personas Físicas, excepto cupones segregados y principales segregados en cuyo reembolso intervenga una Entidad Gestora

1.4. Amount of payment corresponding to Spanish Individual Income Tax taxpayers, except with respect to segregated coupons and segregated principal the payment of which is handled by a Managing Entity

1.5 Importe de los rendimientos que conforme al apartado 2 del artículo 44 debe abonarse por su importe íntegro (o importe total a reembolsar si son valores emitidos al descuento o segregados)

1.5. Amount of payment that, pursuant to section 2 of section 44, must be paid in full (or the total amount to be reimbursed in the case of securities issued at a discount or segregated securities)

2 En relación con el apartado 5 del artículo 44:

2. Regarding section 5 of section 44:

2.1 Identificación de los valores

2.1. Identification of the securities

2.2 Fecha de pago de los rendimientos (o de reembolso si son valores emitidos al descuento o segregados)

2.2. Date on which payment will be made (or reimbursement date in case of securities issued at a discount or segregated securities)

2.3 Importe total de los rendimientos (o importe total a reembolsar si son valores emitidos al descuento o segregados)

2.3. Total amount of payment (or total amount to be reimbursed, in any event, in case of securities issued at a discount or segregated securities)

2.4 Importe correspondiente a la entidad que gestiona el sistema de compensación y liquidación de valores con sede en el extranjero A

2.4. Amount of payment corresponding to clearing and settlement entity "A"⁽²⁾ located outside Spain

2.5 Importe correspondiente a la entidad que gestiona el sistema de compensación y liquidación de valores con sede en el extranjero B

2.5. Amount of payment corresponding to clearing and settlement entity "B"⁽³⁾ located outside Spain

2.6 Importe correspondiente a la entidad que gestiona el sistema de compensación y liquidación de valores con sede en el extranjero C

2.6. Amount of payment corresponding to clearing and settlement entity "C"⁽³⁾ located outside Spain⁽³⁾

(2) References to A, B and C, respectively, shall be replaced by the complete denomination of the relevant foreign clearing and settlement entity (such as Euroclear and Clearstream, Luxembourg).

(3) To be complemented as appropriate if the relevant payment of income is made through more than three different clearing and settlement entities located outside Spain.

Lo que declaro ena dede

I declare the above in [location] on the [day] of [month] of [year].

- (1) En caso de personas, físicas o jurídicas, no residentes sin establecimiento permanente se hará constar el número o código de identificación que corresponda de conformidad con su país de residencia.
- (2) In case of individuals or corporations that are not resident in Spain and do not act through a permanent establishment in Spain, please include the identification number or code that corresponds in accordance with the country of residence.
